Here, Plaintiffs' claims arise from the loan origination and refinancing, which occurred in 2007-2008, so prior to their bankruptcy action, which was initiated in December of 2010 and discharged in 2011. In addition, Plaintiffs filed their lawsuit in state court during the pendency of the bankruptcy action. Plaintiffs were therefore on notice of their claims but failed to raise them in the bankruptcy proceedings. They are therefore estopped from proceeding with this lawsuit on the basis of claims that they failed to raise in their bankruptcy proceeding. See *id. at 783-84*.

Furthermore, Plaintiffs have not demonstrated good cause for this Court to hold this matter in abeyance while they **[*11]** attempt to reopen the bankruptcy proceedings and raise these claims. Plaintiffs have not presented any reason why their claims could not have been brought in the Bankruptcy Court in the first instance, and their failure to do so is not a basis for this Court to further delay this action while they seek to reopen the bankruptcy proceeding.

Therefore, Plaintiffs' MTD is granted without leave to amend on the basis that Plaintiffs are judicially estopped from bringing the present action due to their failure to raise their claims in the prior bankruptcy proceeding and any amendment to their FAC would be futile. However, even if the Court were to consider the substance of Plaintiffs' claims, the Court would still grant the motion to dismiss.

2. State Law Claims Barred by HOLA

(a) Parties' Contentions

Defendants contend that Plaintiffs' state law claims are preempted by HOLA. (ECF No. 5 at 4-8.) They state that World Savings was a federal savings bank organized and operating under HOLA, and that the alleged misconduct here falls within HOLA, even though World Savings was subsequently acquired by Wachovia Mortgage and Wachovia Mortgage later merged with Wells Fargo. Id. at 4.

Plaintiffs argue that **[*12]** HOLA was not intended to preempt common law fraud claims or otherwise supplant state law and it does not preempt their claims. (ECF No. 19 at 7-10).

(b) Analysis

HN5[] Federal savings associations, including federal savings banks, are subject to HOLA and are regulated by the Office of Thrift Supervision ("OTS"). *12 U.S.C. § 1464*; *Silvas v. E*Trade Mortg. Corp., 514 F.3d 1001, 1005 (9th Cir. 2008)*. Here, because Plaintiffs' loan originated with World Savings, which was a federal savings bank, their claims are subject to HOLA. Further, the Court finds that HOLA continues to apply after Wachovia Mortgage acquired World Savings and later merged with Wells Fargo. See, e.g., *DeLeon v. Wells Fargo Bank, N.A., 729 F.*

Supp.2d 1119, 1126, (N.D. Cal. 2010) ("Wells Fargo notes that at the time the loan was made to the DeLeons [plaintiffs], World Savings Bank, FSB was a federally chartered savings bank organized and operating under HOLA and observes correctly that the same preemption analysis would apply to any alleged misconduct after November 1, 2009, when the lender merged into a national savings banking association.) (internal quotation mark omitted); Guerrero v. Wells Fargo Bank, N.A., 2010 U.S. Dist. LEXIS 96261 (C.D. Cal. Sept. 14, 2010) **[*13]** ("Where a national association, such as [Wells Fargo], acquires the loan of a federal savings bank, it is proper to apply preemption under HOLA.").

HN6[] Under HOLA, the OTS enjoys "plenary and exclusive authority ... to regulate all aspects of the operations of Federal savings associations" and its authority "occupies the entire field of lending regulation for federal savings associations." 12 C.F.R. §§ 545.2, 560.2(a). The Ninth Circuit has stated that the enabling statute and subsequent agency regulations are "so pervasive as to leave no room for state regulatory control." Conference of Fed. Sav. & Loan Ass'ns v. Stein, 604 F.2d 1256, 1260 (9th Cir. 1979). Under the regulations promulgated by the OTS, HOLA preempts any state law claim having to do with disclosures and advertising; processing, origination, servicing, sale, or purchase of, or investment or participation in, mortgages; terms of credit; and loan-related fees. See 12 C.F.R. § 560.2(b)(4), (5), (9), (10).

Here, Plaintiffs' state law (1) fraudulent omissions, (2) UCL, (3) breach of contract and (4) good faith and fair dealing claims are all barred by HOLA. Each of Plaintiffs' claims arise out of the origination of the loan and, **[*14]** to a lesser extent, its subsequent servicing. In essence, the Plaintiffs' FAC alleges that Defendants' Option ARM is a deceptively devised financial product, which had higher interest rates than promised, and which was designed to, and did in fact, cause negative amortization of their loan to occur. (FAC at 8-9.) Because the origination and servicing of the loan is subject to HOLA, and because each of Plaintiffs' claims is predicated on the origination and servicing of the loan, each of Plaintiffs' state law claims are preempted.

Therefore, even if the Court had not already concluded that this action is barred by judicial estoppel, it would still conclude that Defendants' state law claims are preempted by HOLA and dismiss those claims on that basis. However, even if the Court were to reach the merits of each of Plaintiffs' claims, it would grant Defendants' MTD.

3. Failure to State Substantive Claims

Because the Court has determined that Plaintiffs' state law claims are barred on the basis of judicial estoppel and judicial estoppel and HOLA, and because the Court finds that each of Plaintiffs' substantive claims fails to satisfy the pleading requirements of Rule 8(a), as interpreted by **[*15]** Iqbal and Twombly, its treatment of these claims will be limited.

(a) Violations of TILA

(i) Parties' Contentions

Defendants' argue that Plaintiffs' (1) damages claim is time-barred, and (2) their rescission claim fails because they have failed to tender their indebtedness. (ECF No. 16-17.) Specifically, Defendants contend that the statute of limitations for a TILA damages claim is within one year from the consumation of the loan, and that Plaintiffs failed to bring this action within one year following the loan origination in 2007. (Id. (citing 15 U.S.C. §§ 1635(f), 1640(e)). Further, Defendants contend that a plaintiff seeking rescission under TILA must plead and prove an ability to tender the loan, and that Plaintiffs have not done so here. Id. at 16.

Plaintiffs contend that equitable tolling saves their damages claim. They allege that they did not have a reasonable opportunity to discover the fraud/nondisclosure during the one-year statute of limitations period. (ECF No. 19 at 10-13.) In the alternative, Plaintiffs assert that their claims also fall within the three-year statute of limitations set forth in

15 U.S.C. § 1635(f) because they were not given proper notice of their right **[*16]** to rescind their loan agreement. (Id. at 12, citing FAC, ECF No. 1 at ¶¶ 40-44, 68-73.) Regarding the rescission claim, Plaintiffs argue that they do not have to tender payment now, but can do so after they prevail on their rescission claim. (Id. at 13-15 (citing Palmer v. Wilson, 502 F.2d 860, 861 (9th Cir. 1974)).)

(ii) Analysis

HN7[] TILA requires that lenders make certain disclosures to borrowers, which will give rise to a cause of action if the lender violates its disclosure requirements. See, e.g., 15 U.S.C. §§ 1601-1667f. Further, TILA mandates that borrowers be given three business days to rescind, without penalty, a consumer loan that uses their principle dwelling as security. § 1635(a). A TILA claim seeking damages is subject to a one-year statute of limitations. See 15 U.S.C. § 1640(e) ("Any action under this section may be brought in any United States district court, or in any other court of competent jurisdiction, within one year from the date of the occurrence of the violation...."). That limitations period begins to run "on the date of consummation of the transaction." King v. State of Cal., 784 F.2d 910, 915 (9th Cir. 1986) If the lender has not complied with TILA's disclosure **[*17]** requirements, the rescission period is extended to three years. § 1635(f); see also Miguel v. Country Funding Corp., 309 F.3d 1161, 1164-65 (9th Cir. 2002) (upholding dismissal of a rescission claim under TILA where the three-year statute of limitations had expired).

First, Plaintiffs' TILA claims are insufficient to satisfy the pleading requirements of Rule 8(a). Plaintiffs do not allege any facts that support their contention that the Defendants failed to satisfy their disclosure requirements. Rather, Plaintiffs' FAC contains generic conclusory accusations that Defendants failed to comply with their disclosure requirements without providing any facts that would support such a conclusion. (See ECF No. 1, at ¶¶ 9-38, 40-44, 68-73.) A court is not required to accept as true a "legal conclusion couched as a factual allegation." Iqbal, 556 U.S. at 678 (quoting Twombly, 550 U.S. at 555). "Factual allegations must be enough to raise a right to relief above the speculative level." Twombly, 550 U.S. at 555.

Second, Plaintiffs' damages claim is barred by the one-year statute of limitations, 15 U.S.C. § 1640(e), and equitable tolling does not apply. **HN8**[] The Court "will apply equitable tolling in **[*18]** situations where, despite all due diligence, the party invoking equitable tolling is unable to obtain vital information bearing on the existence of the claim." Cervantes v. Countrywide Home Loans, Inc., 656 F.3d 1034, 1045 (9th Cir. 2011) (internal quotation marks and alterations omitted). Plaintiffs' conclusory allegations in that they didn't have the opportunity to learn of the disclosure violations during the statutory period is conclusory. Further, they provide no facts that support the conclusion that any "disclosure" by Defendants was either not made or was faulty. Plaintiffs are therefore not entitled to equitable tolling of the TILA claim. [6]

In addition, Plaintiffs' claim for rescission under TILA fails because they have failed to allege either that they have the ability to tender or offer evidence that they have tendered payment to Defendants. **HN9**[] Under California law, a plaintiff **[*19]** challenging a foreclosure sale or any cause of action "implicitly integrated" with the sale is required to make a valid and viable tender of payment of the debt. Arnolds Mgmt. Corp. v. Eischen, 158 Cal. App. 3d 575, 578-79, 205 Cal. Rptr. 15 (1984); Karlsen v. Am. Sav. & Loan Assn., 15 Cal. App. 3d 112, 121, 92 Cal. Rptr. 851 (1971). An offer to tender is "an offer to pay the full amount of the debt for which the property was security." Arnolds Mgmt. Corp., 158 Cal. App. 3d at 578.

In conclusion, Plaintiffs' TILA claim fails because: (1) they failed to sufficiently plead their claim in accordance with Rule 8(a) as interpreted by the United States Supreme Court in Iqbal and Twombly; (2) their claim is time-barred;

---

[6] Further, Plaintiffs' contention that the three-year statute of limitations may apply to their damages claim misconstrues the statute: the one-year limitations period applies to damages claims, the three-year period applies to rescission claims. Cf. 15 U.S.C. §§ 1640, 1640(e) and 15 U.S.C. §§ 1635, 1635(f).

and (3) it fails because of lack of tender. Therefore, even if the Court were to reach the merits of Plaintiffs' TILA claim, it would be dismissed.

(b) Fraudulent Omissions

(i) Parties' Contentions

Defendants argue that Plaintiffs have failed to sufficiently plead fraud with particularity. (ECF No. 5 at 17-19.) Specifically, Defendants contend that Plaintiffs' claims that Defendants concealed the actual interest rates and the resulting negative amortization does not specify what Defendants caused what harm, nor does **[*20]** the FAC detail what facts were concealed, when they were concealed, what representations were made, or what duties were owed by the particular parties that either omitted or concealed any facts. (Id.)

Plaintiffs contend that they sufficiently pleaded fraud with particularity in their FAC, the misrepresentations are written into the loan agreement, and, in any event, they cannot recall exactly who, if anyone, made any misrepresentations.

(ii) Analysis

HN10[] The elements for a fraud claim are "(a) a misrepresentation (false representation, concealment, or nondisclosure); (b) knowledge of falsity (or scienter); (c) intent to defraud, i.e., to induce reliance; (d) justifiable reliance; and (e) resulting damage." *In re Estate of Young, 160 Cal. App. 4th 62, 72, 72 Cal. Rptr. 3d 520 (2008)*. *Rule 9(b)* requires a plaintiff to "state with particularity the circumstances constituting fraud." This includes "an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations." *Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007)* (citation and quotations omitted).

Here, even if Plaintiffs' claims were not barred by judicial estoppel and preempted **[*21]** by HOLA, the Court would still conclude that Plaintiffs have failed to sufficiently plead their fraudulent omission claim under either *Rule 8(a)* or the higher standard set forth in *Rule 9(b)*. Plaintiffs' claims are essentially legal conclusions couched as facts. They lack sufficient detail to provide notice as to what the omissions are and who was responsible for them.

(c) Unfair Competition Law

(i) Parties' Contentions

Defendants assert that Plaintiffs have failed to allege sufficient facts to support a UCL claim. (ECF No. 5 at 19-20.). Plaintiffs contend that the same set of facts that form the basis for their fraudulent omission claims form the basis for their UCL claim. (ECF No. 19 at 17-18.)

(ii) Analysis

HN11[] California's UCL, *Business and Professions Code §§ 17200 et seq.*, defines unfair competition as "any unlawful, unfair or fraudulent business act or practice." "Unlawful" practices are practices "forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulation, or court-made." *Saunders v. Superior Court, 27 Cal. App. 4th 832, 838-39, 33 Cal. Rptr. 2d 438 (1994)* (citing *People v. McKale, 25 Cal. 3d 626, 632, 159 Cal. Rptr. 811, 602 P.2d 731 (1979))*. To state a cause of action based on an "unlawful" business **[*22]** act or practice under the UCL, a plaintiff must allege facts sufficient to show a violation of some underlying law. *McKale, 25 Cal.3d at 635*.

HN12[] A business act or practice is "unfair" when the conduct "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to a violation of the law, or that otherwise significantly threatens or harms competition." *Cel-Tech Communications, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. To sufficiently plead an action based on an "unfair" business act or practice, a plaintiff must allege facts showing the "unfair" nature of the conduct and that the harm caused by the conduct outweighs any benefits that the conduct may have. *Motors, Inc. v. Times Mirror Co., 102 Cal. App. 3d 735, 740, 162 Cal. Rptr. 543 (1980)*.

HN13[] A "fraudulent" business act or practice is one in which members of the public are likely to be deceived. *Hall v. Time, Inc., 158 Cal. App. 4th 847, 849, 70 Cal. Rptr. 3d 466 (2008)*; *Olsen v. Breeze, Inc., 48 Cal. App. 4th 608, 618, 55 Cal. Rptr. 2d 818 (1996)*("does not refer to the common law tort of fraud but only requires a showing members of the public 'are likely to be deceived'"). Thus, in order to state a cause **[*23]** of action based on a "fraudulent" business act or practice, the plaintiff must allege that consumers are likely to be deceived by the defendant's conduct. *Committee on Children's Television, Inc. v. General Foods Corp., 35 Cal. 3d 197, 212, 197 Cal. Rptr. 783, 673 P.2d 660 (1983)*. Furthermore, a plaintiff alleging unfair business practices under *§ 17200* "must state with reasonable particularity the facts supporting the statutory elements of the violation. *Khoury v. Maly's of California, Inc., 14 Cal. App. 4th 612, 619, 17 Cal. Rptr. 2d 708 (1993)*.

In this case, Plaintiffs fail to plead a UCL claim under any available theory. First, the 'unlawful" prong of the UCL requires an underlying violation of a state or federal statute or common law. As noted above, the Court is granting Defendants' MTD as to all of Plaintiffs' state and federal claims. As a result, none of these claims cannot form the basis of Plaintiffs' UCL claim. In addition, conclusory allegations that Defendants knowingly promised consumers low payments that were insufficient to pay off their loan amounts, as Plaintiffs do here, without more, is not sufficient to maintain a plausible claim, particularly not where the loan documents themselves explicitly warn that the mortgage **[*24]** payments may not be sufficient to pay down the balance. Such conclusory allegations are insufficient to satisfy *Rule 8(a)*'s pleading standard. See *Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868*; *Twombly, 550 U.S. at 555*.

Next, Plaintiffs do not adequately plead an independent UCL claim for unfair or fraudulent business practices because Plaintiffs fail to allege facts to support any identifiable wrongdoing by any specific Defendants. Likewise, Plaintiffs' mere conclusory recitation of the elements of these claims do not give proper notice to the respective Defendants as to the alleged misconduct.

Accordingly, even if the Court were to reach Plaintiffs' UCL claim, it could not survive Defendants' MTD.

(d) Breach of Contract

(i) Parties' Contentions

Defendants contend that Plaintiffs' argument that monthly payments were not applied to the principal loan balance fails to describe a breach of contract where the contract document explicitly states that the payments may not be sufficient to pay the entire amount of monthly accrued interest. (ECF No. 5 at 20-22.) Plaintiffs respond that they sufficiently alleged breach by arguing that Defendants failed to apply the interest rate listed in the note. (ECF No. 19 at 19-21, **[*25]** citing FAC, ECF No. 1 at ¶¶ 120-125.)

(ii) Analysis

HN14[] Under California law, a claim for breach of contract requires that a plaintiff demonstrate: (1) the existence of the contract; (2) plaintiff's performance or excuse for nonperformance of the contract; (3) defendant's breach of the contract; and (4) resulting damages. *Armstrong Petrol. Corp. v. Tri Valley Oil & Gas Co., 116 Cal. App. 4th 1375, 1391 n.6, 11 Cal. Rptr. 3d 412 (2004)*.

Here again, the FAC fails to adhere to the pleading standard set forth in Rule 8(a) as interpreted by Iqbal and Twombly. Plaintiffs' claims lack specificity as to how Defendants breached the note beyond the conclusory statements that: (1) Defendants provided Plaintiffs with a payment schedule that was inconsistent with the contract; (2) applied a different interest rate than the one set forth in the note; and (3) failed to apply any of Plaintiffs' monthly payments toward the balance of the loan. In addition to being conclusory, Plaintiffs have failed to establish how these allegations are inconsistent with the terms of the note, which expressly states that Plaintiffs chose the amount of their monthly payment and that the amount of that payment might not be sufficient to cover accrued **[*26]** interest. (See, e.g., ECF No. 5 at 12-14.) In sum, even if the Court were to reach Plaintiffs' breach of contract claim, it would be dismissed.

(e) Implied Covenant of Good Faith and Fair Dealing

(i) Parties' Contentions

Defendants assert that Plaintiffs are attempting to use California's implied covenant of good faith and fair dealing as a means to overturn the express terms of the contract. (ECF No. 5 at 22). Plaintiffs contend that by breaching the terms of the note, Defendants violated the covenant of good faith and fair dealing.

(ii) Analysis

HN15[] Under California law, "[e]very contract imposes upon each party a duty of good faith and fair dealing in its performance and its enforcement." *Marsu, B.V. v. Walt Disney Co., 185 F.3d 932, 937 (9th Cir. 1999)*(internal quotation marks omitted). The covenant of good faith and fair dealing requires "that neither party will do anything which will injure the right of the other to receive the benefits of the agreement." *Andrews v. Mobile Aire Estates, 125 Cal. App. 4th 578, 589, 22 Cal. Rptr. 3d 832 (2005)* (internal quotation marks omitted). The covenant "is limited to assuring compliance with the express terms of the contract, and cannot be extended to create obligations **[*27]** not contemplated in the contract." *Racine & Laramie, Ltd. v. Dep't of Parks & Recreation, 11 Cal. App. 4th 1026, 1032, 14 Cal. Rptr. 2d 335 (1992)*.

To the extent that Plaintiffs allege bad faith in the origination of the loan on Defendants' part, Plaintiffs' claim fails because ***HN16***[] "the implied covenant . . . does not require parties to negotiate in good faith prior to any agreement." *McClain v. Octagon Plaza, LLC, 159 Cal. App. 4th 784, 799, 71 Cal. Rptr. 3d 885 (2008)*. With respect to Defendants' alleged breach of the note's terms and failure to modify the note, Plaintiffs' claims fail for lack of sufficient factual support. See *Twombly, 550 U.S. at 555-56*. Again, were the Court to reach this issue, it would dismiss this claim.

II. MOTION FOR TEMPORARY RESTRAINING ORDER/PRELIMINARY INJUNCTION[7]

Because the Court has dismissed Plaintiffs' FAC without leave to amend, Plaintiffs' motions for a Temporary Restraining Order ("TRO/PI") and an expedited hearing on same (ECF Nos. 20 and 25) are denied as moot. However, even if the Court were to reach the merits of Plaintiffs' Motion for a TRO/PI, it would still deny the motion.

A. Standard

HN17[] The party **[*28]** requesting preliminary injunctive relief must show that "he is likely to succeed on the merits, that he is likely to suffer irreparable harm in the absence of preliminary relief, that the balance of equities tips

[7] Defendants have not yet filed an Opposition to the Motions for TRO/PI and an expedited hearing.

in his favor, and that an injunction is in the public interest." *Winter v. Natural Resources Defense Council, 555 U.S. 7, 20, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008)*; *Stormans, Inc. v. Selecky, 586 F.3d 1109, 1127 (9th Cir. 2009)* (quoting same).

Alternatively, under the so-called sliding scale approach, as long as the Plaintiffs demonstrate the requisite likelihood of irreparable harm and show that an injunction is in the public interest, a preliminary injunction can still issue so long as serious questions going to the merits are raised and the balance of hardships tips sharply in Plaintiffs' favor. *Alliance for Wild Rockies v. Cottrell, 632 F.3d 1127, 1131-36 (9th Cir. 2011)* (concluding that the "serious questions" version of the sliding scale test for preliminary injunctions remains viable after Winter).

B. Plaintiffs' Contentions

Plaintiffs generally contend that they have a likelihood of success on the merits, that the unlawful detainer action/eviction proceeding will cause them irreparable harm, and that **[*29]** the balance of equities tip in their favor because the Defendants will not suffer any serious hardship if the unlawful detainer action/eviction is enjoined. (See ECF Nos. 21-24.)

C. Analysis

Because the Court dismisses Plaintiffs' Complaint without leave to amend on the basis that their claims are barred by (1) judicial estoppel; (2) HOLA; and (3) they generally fail to satisfy the pleading requirements under *Rules 8(a)* and *9(b)* and the cases interpreting those rules, the Court concludes that Plaintiffs have little likelihood of success on the merits. Although Plaintiffs raise various claims against Defendants, it does not appear that any of these claims are meritorious. Rather, it appears that Plaintiffs defaulted on their mortgage and are now attempting to use the legal system in an effort to delay or block the unlawful detainer/eviction action. Because such action appears to be within the legal rights of the Defendants, the balance of hardships and equities tips sharply in Defendants' favor. Therefore, the Court concludes that under either the Natural Resources Defense Council or Cottrell standards for granting a TRO or PI, Plaintiffs' motion fails.

CONCLUSION

As a matter of law, and **[*30]** for the reasons set forth above, Defendants' Motion to Dismiss (ECF No. 5) and Request for Judicial Notice (ECF No. 7) are GRANTED. Defendants' Motion to Strike (ECF No. 6) is DENIED as MOOT. Plaintiffs' Motion for Remand (ECF No. 9) is DENIED, Plaintiffs' Motion for Untimely Filing of Opposition to Motion to Dismiss (ECF No. 13) is GRANTED, and Plaintiffs' Motions for TRO/PI and a For an Expedited Hearing on same (ECF Nos. 20 and 25) are DENIED as MOOT. The Clerk of the Court is directed to close this case.

IT IS SO ORDERED.

UNITED STATES DISTRICT JUDGE

Card Tech Int'l, LLLP v. Provenzano

United States District Court for the Central District of California

June 7, 2012, Decided; June 7, 2012, Filed

Case No. CV 11-2434 DSF (PLAx)

Reporter
2012 U.S. Dist. LEXIS 81481 *; 2012 WL 2135357

CARD TECH INTERNATIONAL, LLLP, a Maine Limited Liability Limited Partnership, Plaintiff, v. SHARYN PROVENZANO a.k.a. SHARYN PROVENZANO, an individual, and PRODEEN, INC., Defendants.

Prior History: *Card Tech Int'l, LLLP v. Provenzano, 2011 U.S. Dist. LEXIS 164910 (C.D. Cal., Apr. 6, 2011)*

Core Terms

Card, website, trade dress, presat, products, sales, infringement, packaging, trademarks, customers, invoice, marks, terminated, domain name, Counter-claim, profits, DIAMOND, shipping, cleaning, orders, Disko, deliberately, appearance, conveyed, Proven, deposits, Prodeen, inventory, transferred, TECHNOLOGY

Counsel: **[*1]** For Card Tech International LLLP, a Maine Limited Liability Limited Partnership, Plaintiff, Counter Defendant: Arnold E Sklar, Ernest E Price, Ropers Majeski Kohn and Bentley, Los Angeles, CA.

For Sharyn Provenzano, also known as Sharyn Nappi, an individual, Defendant: Bayleigh Jordan Pettigrew, Brandon Charles Murphy, James G Morris, Morris and Associates, Burbank, CA.

For Prodeen Inc, Defendant: James G Morris, LEAD ATTORNEY, Bayleigh Jordan Pettigrew, Brandon Charles Murphy, Morris and Associates, Burbank, CA.

For Prodeen Inc, Sharyn Provenzano, Counter Claimants: James G Morris, LEAD ATTORNEY, Bayleigh Jordan Pettigrew, Brandon Charles Murphy, Morris and Associates, Burbank, CA.

For Norman Farrar, an individual, Counter Defendant: Ernest E Price, Ropers Majeski Kohn and Bentley, Los Angeles, CA.

For Card Tech International LLLP, a Maine Limited Liability Limited Partnership, Counter Defendant: Arnold E Sklar, Ernest E Price, Ropers Majeski Kohn and Bentley, Los Angeles, CA.

Judges: Dale S. Fischer, United States District Judge.

Opinion by: Dale S. Fischer

Opinion

FINDINGS OF FACT AND CONCLUSIONS OF LAW

A trial by the Court was held January 10-13, 2012.

The Court ordered that counsel for Card Tech International LLLP **[*2]** (Card Tech) submit Card Tech's proposed Findings of Fact and Conclusions of Law to counsel for Defendants Sharyn Nappi a.k.a. Sharyn Provenzano and

Prodeen, Inc. (referred to jointly and severally as Provenzano except as otherwise indicated). Apparently because of defense counsel's trial schedule, he was unable to provide timely comments. Card Tech lodged its [Proposed] Findings of Fact and Conclusions of Law on February 23, 2012. On February 27, 2012, Provenzano lodged Defendants and Counterclaimants' [Proposed] Findings of Fact and Conclusions of Law On March 12, 2012, Provenzano lodged her Opposition to Card Tech's Proposed Findings of Fact and Conclusions of Law, and Card Tech lodged its Objections to Defendants' [Proposed] Findings of Fact and Conclusions of Law. Although the Court has reviewed and considered all of these documents, and has made some additions, deletions, and changes based on its detailed review of the transcript and the documentary evidence and its own recollection of the trial and assessment of the credibility of the witnesses, where Provenzano has not objected to paragraphs of Card Tech's [Proposed] Findings of Fact and Conclusions of Law, the Court generally **[*3]** accepts those findings as accurate, and has not sought or cited to further support in the record. The Court has included proposed Findings of Fact and Conclusions of Law proposed by Provenzano, to the extent relevant and not contradicted by the evidence. The deletion of a proposed finding or conclusion does not necessarily mean that the Court disagrees with the proposed finding or conclusion. The Court may simply have determined that the finding was not necessary to its determination.

FINDINGS OF FACT

1. This Court has subject matter jurisdiction pursuant to the Trademark Act of 1946, as amended (the Lanham Act), *15 U.S.C. § 1125(a)* and *§ 1125(d)*. Also, the Court has diversity jurisdiction pursuant to *28 U.S.C. § 1332*: the matter in controversy exceeds the sum or value of $75,000, exclusive of interest and costs and there is complete diversity of citizenship between the parties. The Court has supplemental jurisdiction over the state-law claims. *28 U.S.C. § 1367*.

2. Venue is proper in this district as the defendants reside here.

3. Card Tech is a Maine limited liability limited partnership, with its principal place of business in Maine.

4. At the time of trial, the employees of Card Tech **[*4]** were Norman Farrar, his son Stephen Farrar, and one other person. Norman Farrar is a principal of Card Tech.

5. Provenzano is an individual residing in Acton, California.

6. Prodeen, Inc. is a California corporation with its principal place of business in California. Provenzano directs the conduct of Prodeen. From 2003 through 2010 there were no other employees of Prodeen. Tr. 1/12/12 at p. 162:11-18. There is no evidence of any other employees of Prodeen since 2010.

7. Card Tech is, and since March 2010 has been, in the business of selling technical cleaning products. Technical cleaning products are used to clean the slots of credit card machines, bill readers, slot machines, key cards, and similar magnetic card readers. It is a niche business. Individual technical cleaning products are very inexpensive. Tr. 1/12/12 at p. 161:8-9.

8. In the late 1990s Norman Farrar was a principal of a company named Enefco, which decided to go into the card cleaning products business. Farrar met Provenzano at a trade show and eventually hired her as Enefco's first sales manager for the card cleaning business. Provenzano worked from her home in Acton, California, and was in charge of sales and market development. **[*5]** Farrar worked well with Provenzano and thought she was talented.

9. In or around 2003, Farrar sold his company. The new owners "released" Provenzano — she was terminated. Tr. 1/10/12 at p. 42:24-25, Tr. 1/11/12 at pp. 179:22-180:1.

10. In 2003 Provenzano began marketing and selling technical cleaning products. In or around March 2006, Provenzano established Prodeen, Inc. dba Proven Products, which sold cleaning cards. Tr. 1/11/12 at pp. 180:14-181:6. Provenzano owns all of the stock of Prodeen, Exhibit 75, and directs the conduct of Prodeen.

11. As of the beginning of 2010, Provenzano marketed and sold technical cleaning products under the trademarks and trade dress PROVEN PRODUCTS, a stylized V symbol, PRESAT with a water droplet symbol, PRESAT with a rippled water image, DIAMOND TECHNOLOGY, a "magnifying glass and dollar bill" image, an orange area on the left side and images of certain machines in certain layouts, CLEAN SWAB, EASY WIPES, EASY CLEAN CARD, and EASY SWAB, and the slogan "The Results Are Obvious"; and utilized a website. Tr. 1/10/12 at pp. 64:15-70:10; Tr. 1/11/12 at pp. 181:12-22, 183:1-185:6, Exhibit 26. On June 10, 2008, trademark registration number 3443482 was issued **[*6]** to Provenzano for the mark PRESAT. See Exhibit 93-2.

12. There is nothing about the layout or overall appearance of the trade dress, both packaging and website, that enables the package or website, respectively, to function. The "V"-shaped Proven Products logo, and the Diamond Technology logo with its three overlapping diamonds, are wholly nonfunctional; the water drop design and the rippled water designs, the magnifying glass and dollar bill images, and the slogan, are wholly non-functional for cleaning cards. The content of the website can be arranged differently; the package can have a different appearance. Neither the appearance of the packaging nor the website provides a benefit apart from identifying the source of the product. Neither the layout of the website nor the layout or color of the packaging describes the products. The particular arrangement of the depictions and instructions, and the overall visual impression created by Card Tech's website and packaging, is not essential to use of the products Card Tech sells. Moreover, there are numerous ways to design a website or product packaging for cleaning card products. See Exhibit 26. Therefore, protecting Card Tech's trade **[*7]** dress will not impair competition in the industry.

The Asset Purchase Agreement

13. In 2006 Farrar reconnected with and provided some assistance to Provenzano. He was impressed with the package design she used. At about the time that Farrar's "non-compete" agreement with Enefco was about to end, Farrar and Provenzano began negotiating for Card Tech's purchase of Provenzano's business. Card Tech was established to purchase the assets of Proven Products from Prodeen. TR. 1/10/12 at p. 46:5-19. Prior to entering into the Asset Purchase Agreement, Farrar wanted Provenzano to be sure she would be happy in her new role. Tr. 1/10/12 at pp. 44:8 -56:15; see Exhibit 21.

14. On March 8, 2010, Provenzano and Card Tech entered into an Asset Purchase Agreement. Exhibit 75. The signatories for the seller are Prodeen, Inc. and Provenzano. Pursuant to that Agreement, Provenzano sold to Card Tech and Card Tech bought from Provenzano the business assets including, among other things:

• All inventory;

• All right, title and interest in and to all of the trademarks, trade names, dbas and assumed names used to any extent in the operation of the business or otherwise related thereto;

• All business records, including **[*8]** but not limited to all customer and supplier lists;

• The internet websites: *www.4cleaningcard.com* and *www.presat.com*, including the content and all rights necessary to access, operate and use those websites, and the domain names related to the business;

• All goodwill of the business.

Exhibit 75 at 1.1. Card Tech understood it was purchasing all trademarks, trade names, business records, customers, promotional material, and goodwill. Tr. 1/10/12 at pp. 62:23-70:21. Provenzano understood she was selling to Card Tech all of the trademarks, trade names, and dbas, assumed names, the art work for the packaging and all business records. Tr. 1/12/12 at pp. 3:24-4:4, 5:13-17, 6:22-24. Provenzano executed a separate written assignment of the PRESAT trademark. Exhibit 93.

15. In the Agreement, Provenzano represented that there were no undisclosed liabilities, and that she had disclosed to Card Tech all material facts. Exhibit 75 at 8.11, 8.17.

16. Acquiring all of Provenzano's intellectual property was important to Card Tech. Card Tech considered the name, the packaging and the website important to have. Tr. 1/10/12 at pp. 51:7-21, 57:20-58:14.

17. Provenzano's packaging was attractive and desirable **[*9]** to Card Tech. No other competitors were using a design similar to the Provenzano packaging that Card Tech purchased. Tr. 1/10/12 at p. 68:23-25. It was important to Card Tech to go into the market with a known product and trade name. Tr. 1/10/12 at pp. 51:15-18, 58:1-4.

18. The purchase price to be paid by Card Tech to Provenzano is $253,315.36, payable $205,795.36 at closing and $47,520.00 paid over two years. Card Tech paid $205,795.36 at closing and executed a promissory note for $47,520.00. It appears that the $205,795.36 was for the inventory, and the $47,520.00 was for the goodwill and all of the other assets. Tr. 1/10/12 at p. 73:21-23; 1/12/12 at p. 14:14-23. The Agreement itself states that there was an allocation of the purchase price set forth in Schedule 7, Exhibit 75 at **7**, but no schedules were provided to the Court. Card Tech has paid $23,760.00 on the promissory note. The last payment Card Tech made on the promissory note was the February 2011 payment. Tr. 1/11/12 at p. 107:15-17. The amount unpaid on the note is $23,760.00.

19. Card Tech contends that Provenzano did not disclose a liability that she was obligated to disclose by the terms of the Asset Purchase Agreement, **[*10]** in the amount of about $6,000. Card Tech contends it paid that liability at Provenzano's request and was not able to offset this liability completely. Tr. 1/11/12 at p. 135:3-25. Provenzano's objection that she was not required to disclose the liability because Card Tech was not assuming liabilities is legally incorrect. The Asset Purchase Agreement contained a specific warranty that all liabilities had been disclosed. Provenzano breached this warranty by her failure to disclose. Moreover, that Card Tech paid the amount is undisputed. Nevertheless, this breach does not appear to have been material to Card Tech.

20. The Asset Purchase Agreement, Employment Agreement, and promissory note were executed in connection with one another. See Exhibits 75, 76, and 77.

The Employment Agreement

21. Both Card Tech and Provenzano wanted Provenzano to have a five year employment contract. Tr. 1/11/12 at p. 15:22-23. Provenzano, at the age of 62, wanted job security through an agreement that could be terminated only for just cause. Tr. 1/12/12 at p.168:4-11. Card Tech felt Provenzano would be a very important part of the company and wanted her services. Tr. 1/10/12 at pp. 52:11-14, 125:15-17. During **[*11]** the negotiations, Provenzano's attorney was asking for a salaried position. Tr. 1/10/12 at p. 53:1-4.

22. Concurrently with the sale of the business, Card Tech and Provenzano entered into an Employment Agreement. Exhibit 77.

23. By the Employment Agreement, Provenzano was employed by Card Tech for five years as Vice President of Sales. Exhibit 77 at 2a. Provenzano was to devote her full time and exclusive attention to perform duties for Card Tech. Tr. 1/12/12 at p. 70:10-13; Exhibit 77 at 3. The Agreement provides for termination for just cause. Just cause is defined as, *inter alia*, dishonesty, disobedience of reasonable directives, breach of Card Tech policies and procedures not cured within seven days after written notice, misappropriation of assets, material inaccuracy in any report, any breach under the Asset Purchase Agreement. Exhibit 77 at 6c.

24. Provenzano was Vice President of Sales and reported directly to the President of Card Tech. See Exhibit 77 at 3. Provenzano's role was to develop and implement a sales program to increase the business of Proven Products. She was the entire sales and marketing staff of Card Tech. Tr. 1/10/12 at p. 53:8-11; Tr. 1/11/12 at p. 31:24-25.

25. **[*12]** Card Tech did not supervise or micro-manage Provenzano's work. Instead, she operated autonomously, submitting reports on her activities from time to time. Tr. 1/10/12 at p. 85:4-12. She did many things on her own initiative, including: ordering inventory to have on hand, Tr. 1/12/12 at p. 18:19-24; giving discounts to customers, Tr. 1/13/12 at p. 18:8-22; and seeking to register domain names, Tr. 1/12/12 at p. 75:19-24. As Vice President of Sales, she thus had duties and responsibilities that involved the performance of the office or non-manual work

directly related to Card Tech's management policies and general business operations; she customarily and regularly exercised discretion and independent judgment; she executed special assignments and tasks without any supervision or, at most, under only general supervision; and she spent most of her Card Tech work time engaged in such duties. Though Provenzano objects to what she refers to as Card Tech's attempts to qualify her employment as exempt from overtime, her own description of her employment relationship in her proposed findings is somewhat more favorable to Card Tech's position than is Card Tech's own description. The Court concludes **[*13]** this inconsistency results from her recognition that the only possible - though ultimately unsuccessful - response that she has to the evidence of her wrongful conduct is her complete autonomy in her employment.

26. The Employment Agreement provides for an annual base salary of $55,000 per year, plus sales commissions under certain circumstances. Exhibit 77 at 4a. There was never any consideration of overtime. Both parties agree Provenzano had complete autonomy to keep her own hours and flexibility to take whatever time off she wished for any reason. Tr. 1/11/12 at p. 112:10-14; 1/13/12 at p. 76:22-77:11. The Agreement also provided that Provenzano would be entitled to medical benefits, two weeks paid vacation, and reimbursement for all authorized business expenses. Exhibit 77.

27. Prior to April 13, 2011, Provenzano did not indicate that she was working overtime or expected to be compensated for overtime. Tr. 1/10/12 at pp. 100:24-101:6, 230:11-15; Tr. 1/11/12 at p. 112:8-11; Tr. 1/13/12 at p. 76:11-21. Card Tech told her she did not have to work weekends. Tr. 1/11/12 at p. 112:19-23. When Card Tech learned she was working overtime, Card Tech instructed her not to do so. Exhibit 147-1.

28. **[*14]** Provenzano did not produce any documentary evidence of working more than 40 hours per week for the benefit of Card Tech, or any requests for overtime during the course of her employment.

29. Provenzano admits she understood that she had an obligation to keep Card Tech informed of her business activities. Tr. 1/12/12 at p. 9:14-17. As set forth throughout these findings, the evidence establishes that — at least since December 2010 — she failed to do so in material respects.

Provenzano's conduct with regard to the presat.com website and domain name

30. Provenzano makes much of the distinction between the presat.com website, which she apparently owned, and the presat.com domain name, which she has at all relevant times known she did not own. Tr. 1/11/12 at p. 68:7-16; p. 185:7-11; Tr. 1/12/12 at p. 170:8-10. The Court is not entirely certain that either the Court or the parties or their counsel fully grasp the distinction between the two concepts. But Provenzano's efforts to defend her wrongful conduct based on this technicality fail. By at least September 25, 2009, before the execution of the Asset Purchase Agreement, Card Tech made clear that it required that "presat.com" - both the website **[*15]** and the domain name - be provided as part of the sale. Tr. 1/10/12 at p. 57:20-24; Exhibit 21. Farrar's email of that date specifically stresses the importance to Card Tech of ownership of the domain name. Exhibit 21 ("We never spoke specifically regarding domain names. I am surprised that you would not include those used on your letterhead. I really don't care about the others but it is necessary that both 4cleaningcards.com and presat.com be included in the sale."). And the Asset Purchase Agreement specifically provides that among the "assets of the Sellers" being sold are "the following internet web sites (including without limitation the content located thereon and all rights necessary to access, operate and use such web sites) and domain names related to the Business: *www.4cleaningcards.com* and *www.presat.com*." Exhibit 75 at 1.1(g).

31. Because it was important to Card Tech to enter the market with a known website and a way for customers to contact Card Tech, and a way to refer people to the website for information, the presat.com website was a material part of the assets Card Tech was buying. Tr. 1/10/12 at pp. 57:22-59:5. But for at least several years before the 2010 sale, Provenzano **[*16]** knew that Richard Rzasa owned the domain name. Tr. 1/11/12 at pp. 68:9-69:2; Exhibit 81, p. 34. Provenzano also knew that without ownership of the domain name, one could not be assured of access to the website through use of "presat.com." See Tr. 1/11/12 at p. 68:9-16.

32. Although the presat.com website could be accessed through 4cleaningcards.com, Provenzano clearly knew that this was not what Card Tech had bargained for. Indeed, she made efforts to keep from Card Tech the fact that she did not own the presat.com domain name. For example, on December 29, 2010, she affirmatively deceived Card Tech by stating to Card Tech that the website's server had possibly been hacked and that Card Tech should not use presat.com. Tr. 1/10/12 at pp. 118:17-119:3; Exhibit 37-1. There is no evidence that Provenzano informed Card Tech that the website was accessible through the domain name 4cleaningcards.com. Provenzano never explained the ownership of presat.com. Tr. 1/10/12 at p.120:1-3.

33. On January 20, 2011, Card Tech stated that it was "very concerned that sales and shipments have dropped off so drastically since the start of December." Exhibit 37-2. Card Tech had seen a drop off of about $5,000 **[*17]** to $6,000 sales per month after early December 2010, with little or no orders through the websites. Card Tech asked the status of the problem with the presat.com website; Provenzano did not respond. Tr. 1/10/12 at pp. 120:4-121:13, 122:12-25.

34. On February 2, 2011, Card Tech again asked Provenzano about the presat.com website, and when it could "start using this site." She delayed revealing her previous misrepresentations by stating: "It is something we need to discuss." Tr. 1/10/12 at pp.123:22-124:15; 1/11/12 at p. 196:5-18; Exhibit 37-3. There is no evidence that such a discussion ever took place and Provenzano does not appear to contend that it did.

35. Card Tech did not know that Provenzano did not own the right to access the presat.com website because she did not own the domain name until it was discovered on or about February 10, 2011. Tr. 1/11/12 at pp. 133:19-134:12; see Exhibit 59; see Tr. 1/11/12 at p. 92:2-15. That the website was not "down" at all, that it was "down" only for a few days, that Card Tech eventually decided to abandon it, etc., even if true, is irrelevant.

36. There is no evidence that Provenzano ever transferred to Card Tech the presat.com website or the **[*18]** content, rights necessary to access, operate and use the website, or the domain names. In fact, the evidence shows that Provenzano did not own the rights necessary to provide access to the website at any relevant time. See Tr. 1/11/12 at pp. 86: 2-87:12. Provenzano materially breached the Asset Purchase Agreement by failing to provide all necessary rights to presat.com or reveal the truth of the status of presat.com.

37. In response to Card Tech's request for the password to the presat.com website, on or about April 20, 2011, Provenzano provided the password for 4cleaningcards.com. There is no evidence that she provided Card Tech the password for 4cleaningcards.com before April 2011. She did not provide the password for presat.com. Tr. 1/13/12 at p. 73:24-25; see Exhibit 307.

38. Provenzano owned the 4cleaningcards.com domain name. That domain name linked to presat.com. Tr. 1/10/12 at pp. 50:18-51:1. There is no evidence that Provenzano transferred to Card Tech the content, rights necessary to access, operate and use any website, or the domain name. Nor would it have served any purpose because it linked to a site that relied on a domain name that Card Tech did not own. See Tr. 1/11/12 **[*19]** at pp. 86: 21 - 87:12.

39. Sales through the presat.com website were about $2,968 in 2008 and increased steadily through the first three months of 2011: $3,042 in 2009; $9,304 in 2010; and $3,781 in the first three months of 2011. Tr. 1/11/12 at pp. 85:20-86:5.

40. Because Provenzano did not own the domain name and did not transfer the website to Card Tech, since late April 2011 Card Tech has not had a website. Card Tech eventually decided that it would develop its own website rather than dealing with the issues created by Provenzano's conduct concerning the presat.com website. Tr. 1/11/12 at p. 48:2-11. At the time of trial, Card Tech was in the process of developing a website, but it would not be completed for several more months. Card Tech had to that point spent about $4-5,000 and expects to spend an additional $2-3,000 for a new website. Management of Card Tech has contributed "untold" hours to the process.

Normal Procedures at Card Tech

41. The parties dispute whether there were any "normal procedures" at Card Tech. Provenzano at times claims there were none, and at times explains such procedures in significant detail (including in her post-trial submissions). To the extent that **[*20]** the nature of such procedures is relevant (which is minimal), the Court generally accepts the testimony of Farrar and rejects the testimony of Provenzano, as the Court finds Provenzano was not credible.

42. Card Tech believed UPS account # X8535 was a "Proven Products" account utilized for shipping goods from Acton, California to fill orders. Tr. 1/11/12 at pp. 25:22-26:11. Provenzano was to send end-of-day reports, provided by UPS, daily. Until November 2010, she did so. Tr. 1/11/12 at p. 138:4-9, Exhibit 94-12. Exhibits 53-1 and 150. Some orders were invoiced and shipped by Provenzano from her location in California. For those orders Provenzano testified that she prepared the invoice and sent a copy of the invoice and "UPS daily reports" weekly (or sometimes less frequently) to Card Tech in Maine via fax. Tr. 1/11/12 at pp. 185:1-186:1.

43. Other orders were shipped from Maine. UPS account # A3766 was used to ship these orders. For any order placed through Provenzano to be shipped from Maine, Provenzano testified that she prepared and faxed to Maine a packing slip. After it was shipped, Card Tech would inform Provenzano and she would prepare and send out an invoice and send a copy **[*21]** of the invoice to Maine. Provenzano was to make deposit slips each day for payments received and fax them to Card Tech in Maine. Tr. 1/11/12 at pp. 22:23-23:3; Tr. 1/12/12 at p. 186:8-14.

44. Sales proceeds received by Provenzano were to be deposited into a bank account in California authorized by Card Tech (set up by Provenzano) and then paid over to Card Tech in Maine. Tr. 1/11/12 at p. 16:17-18.

45. From March through November 2010, sales averaged $32,000 to $35,000 per month. Tr. 1/10/12 at p. 99:18-24.

<u>Provenzano's control of bank accounts</u>

46. At Provenzano's request and with the approval of Card Tech, Provenzano opened a bank account in California in the name of Prodeen, Inc. (account number XXXXXX2277—the '277 account). This account was for the purpose of Provenzano depositing any sales proceeds Provenzano received. Tr. 1/12/12 at p. 105:6-11. Provenzano would issue a check from this account to Card Tech as money was received. Tr. 1/11/12 at p. 28:14-19. Provenzano received the statements for this account and provided the statements to Card Tech. Tr. 1/10/12 at pp. 95:18-96:10. Provenzano was responsible for this bank account; she maintained it in the name of her corporation for **[*22]** the benefit of Card Tech. Tr. 1/11/12 at p.17:15-20.

47. Card Tech trusted Provenzano with the bank account. Tr. 1/11/12 at p. 17:11-14. Provenzano provided reports to Maine; Card Tech relied on her for accurate information. Tr. 1/10/12 at p. 82:8-10.

48. Provenzano had, and continued to maintain, a pre-existing bank account in the name of Prodeen, Inc. (account number XXXXXX4207—the '207 account). Tr. 1/12/12 at p. 105:19-22. Card Tech did not have access to this account and Provenzano never provided a statement for this account to Card Tech. Tr. 1/12/12 at p. 110:17-21.

49. In December 2010, and January and February 2011, there was a trend of decreasing deposits into the '277 account and a trend of increasing deposits to the '207 account. Tr. 1/11/12 at p. 163:9-24; Exhibit 87. One reason for that uptrend is that Provenzano was depositing Card Tech funds into the '207 account. Tr. 1/12/12 at p. 108:12-20. A customer named Castle Six made a $14,766.55 payment by check. It was deposited to the '207 account, though it should have been deposited into the '277 account. Tr. 1/12/12 at pp. 109:11- 110:2.

50. In March and April 2011, there was a substantial increase in electronic bank transfers **[*23]** from the '207 account to the '277 account. $46,000 was transferred in March and April 2011; for the entire year or year plus period $95,000 was transferred. Tr. 1/11/12 at p. 166:13-20. This occurred after Card Tech began asking Provenzano questions and requesting information about the UPS '046 account. Before March 2011, there had been some months when there were no transfers between the accounts, and in other months the transfers were much smaller than the amounts transferred in March and April 2011. Tr. 1/11/12 at p. 171:1-10.

51. Card Tech established that Provenzano has not transferred approximately $21,000 of proceeds from sales received into Provenzano's two Prodeen accounts. Tr. 1/11/12 at pp. 159:1 - 160:16. Nappi admits that she still holds at least $20,000 of Card Tech's money that should have been transferred to Card Tech. Tr. 1/12/12 at pp. 98:24-99:14.

Provenzano resists notice of the transfer of her business to Card Tech

52. Card Tech had originally planned to send a notice to the trade that it had acquired Proven Products. After discussions with Provenzano, Card Tech felt it was best not to notify the customers until the inventory was relocated in Maine -which took place **[*24]** over the summer months - and until the business had settled into the new shipping routine. At Provenzano's request Card Tech agreed to delay an announcement. Tr. 1/10/12 at p. 101:21-25, Tr. 1/11/12 at p. 27:1-15.

53. From Card Tech's perspective, the main reason that the bank account was set up in California was that Provenzano was afraid that if customers sent funds to a bank account in Maine, it might cause the customers to question what was going on. Tr. 1/10/12 at p. 102:9-12.

54. Provenzano kept secret from vendors that Card Tech had acquired her business. Michael Caulley of Plastic Printing Professionals (P3), a supplier, had been dealing with Provenzano for some time. On March 18, 2010, Provenzano instructed P3 to change the billing address to Card Tech. Caulley asked who Card Tech was. She responded: "We have set up an accounting, marketing communications and east coast shipping office. . . . " Tr. 1/10/12 at pp. 148:19-152:17, Exhibit 79-312 and 313. Before April 2011 Provenzano deliberately referred to Card Tech as an "investor," though it was not. In early April 2011, Provenzano told George Mouchet, her website designer, for the first time that she had sold her company to **[*25]** Card Tech and she was hired to do its sales. Tr. 1/11/12 at pp. 77:18-78:4, Tr. 1/10/12 at p. 168:1-3, Exhibits 79-128, 81-42.

55. In December 2010, Card Tech decided that enough time had passed for an announcement that it had acquired Proven Products. On December 7, 2010, Card Tech told Provenzano that a notice must go out by mid-December, and asked her to draft a letter. Tr. 1/10/12 at pp. 101:21-102:2, 104:8-21; Tr. 1/11/12 at pp. 27:16-20, 28:20-23, 198:12-20; Exhibit 94-8. Card Tech determined this announcement was important for customers to know who Card Tech was, to have administrative control in Maine, and most importantly to get bank accounts directed to Maine. Tr. 1/10/12 at pp. 102:4-8, 104:19-106:7.

56. On January 18, 2011, Card Tech again asked Provenzano for an announcement letter, and directed that certain points be included. Tr. 1/10/12 at pp. 106:14-110:15; Exhibit 94-4, 5. Provenzano responded the next day that she would put something together. Tr. 1/10/12 at pp. 111:23-112:12; Exhibit 94-3.

57. On February 1, 2011, Card Tech received from Provenzano, by fax, a draft outline as a proposed notice to the trade. Tr. 1/10/12 at pp. 112:16-113:4; Exhibit 94-10. It did not **[*26]** include any of the points requested. It did not satisfy Card Tech's request that the marketplace be informed of Card Tech ownership and that accounting would be in Maine; and it contained false statements - for example, that Card Tech was an investment company and that the transaction occurred January 31, 2011. Tr. 1/10/12 at pp. 112:16-7, 114:5-115:22, Tr. 1/11/12 at p. 203:5-12; Exhibit 94-10. It seemed to Card Tech that Provenzano was resisting notice of the actual circumstances. Tr. 1/10/12 at p. 116:8-13. Provenzano testified that she thought that since it was now almost a year since the purchase "it would be more of a problem to say 'Hey, guess what, I sold the company a year ago but you're only finding out about it now.'" Tr. 1/11/12 at p. 203:12-15. The Court agrees with Card Tech.

Purchases of inventory from P3

58. On or about November 30, 2010, Provenzano issued a purchase order to P3 for 15 cases (500 per case) of item #207, with the following instructions: "ALSO VERY, VERY IMPORTANT: INVOICE TO ME IN ACTON, CA!

PLEASE CHANGE THE BILLING ADDRESS BACK TO ACTON, CA." Card Tech was not aware of this order. Tr. 1/10/12 at pp. 157:16-158:11; Exhibit 79-310, 311.

59. On or about **[*27]** December 9, 2010, Provenzano ordered 18,200 pieces of item # 200 and made note to bill to Proven Products in California; and she directed the use of UPS X8535 account. Tr. 1/10/12 at pp. 160:14-161:18; Exhibit 79-239.

60. On or about December 27, 2010, Provenzano ordered from P3 100,000 units of item # 207. It was billed to her in Acton, California. Exhibit 50-1. This was for a product sold to a customer in Europe; Card Tech had previously informed Provenzano that it had 300,000 of this item in production. Tr. 1/10/12 at pp. 130:17-131:11. On the same date Provenzano also ordered from P3 40,000 units of item # 200, which is the most popular card Card Tech sold. At the time, Card Tech had inventory which Provenzano knew was being packaged at that time in California. Tr. 1/10/12 at p. 135:4-14, Exhibit 50-2.

61. On or about January 4, 2011, Card Tech received two invoices from P3 for these orders, though Card Tech had no knowledge of these transactions. One invoice was addressed to Provenzano, individually, in Acton, California. Card Tech was shocked when it received the invoices for these large orders. Normal procedure would be for Provenzano to coordinate with Card Tech in Maine any **[*28]** purchases of inventory Provenzano wished to make, but Provenzano did not coordinate this purchase with Maine. These invoices caused Card Tech concern. Tr. 1/10/12 at pp.129:9-135:17. Provenzano contends that she had ordered goods in the past and been commended for her actions and reimbursed for the purchases. As with her other wrongful conduct, Provenzano had a purported explanation. She contended that she was concerned that products Card Tech had ordered for manufacture in China would not be ready in time to deliver to the customer, and that Card Tech's inventory levels were low. 1/13/12 at pp. 12-13. The Court concludes that this purchase was significantly different — especially in light of the fact that Provenzano went to great lengths to be sure Card Tech was unaware of the purchase. The Court does not find Provenzano's testimony credible. Even if Provenzano were truthful in this case, her after-the-fact explanation does not justify concealing her conduct from Card Tech, both before and after she ordered the goods.

62. Card Tech did not contact Provenzano for an explanation because it hoped this was an oversight. Card Tech decided to wait until the end of the month to see if Provenzano **[*29]** would provide an explanation. No explanation was ever provided. Tr. 1/10/12 at 135:19-22.

63. On January 5, 2011, P3 confirmed to Provenzano that as of December 31, 2010, she had not paid invoice number 8703. Provenzano responded that she had no record of it and hoped it was not sent to another office. Tr. 1/10/12 at p. 163:11-24; 1/12/12 at p. 27:7-13; Exhibit 79-295. On or about January 31, 2011, P3 followed up to ask Card Tech about payment of outstanding invoices. Tr. 1/10/12 at pp. 177:20-179:1; Exhibit 79-257.

64. Provenzano tried to conceal from Card Tech that she had purchased inventory for her own account. Provenzano spoke to a P3 representative on the phone and told P3 that the email was sent to Card Tech in error and that P3 should send her the invoices. Tr. 1/10/12 at p. 181:7-11. P3 told Provenzano "if it's OK with you," P3 would tell Card Tech her request for payment was sent to the wrong account. Provenzano responded: "Thanks, that should be fine." Tr. 1/12/12 at pp. 28:12-29:8.

65. On January 31, 2011, Card Tech responded to P3 that it had no record of outstanding invoices. P3 replied that the email requesting payment was sent to Card Tech in error; it should have gone **[*30]** to a different company. Tr. 1/10/12 at pp. 178:9-16, 183:9-21; Exhibit 64. P3 justifiably interpreted Provenzano's "Thanks, that should be fine" response as condoning this misleading strategy. Tr. 1/10/12 at pp. 182:6-183:4.

66. On about January 31, 2011, Card Tech asked Provenzano if she was holding any P3 invoices. Provenzano clearly knew what Card Tech was referring to, and she admits that she deliberately misled her employer by denying that she had the invoices. See Tr. 1/12/12 at pp. 32:2-33:15. The Court finds Provenzano's explanation of why this answer was acceptable to be simply another step in her efforts to conceal her wrongdoing.

67. Provenzano did not inform Card Tech that she had purchased inventory from P3, and Card Tech would have known that only if it needed the inventory. Tr. 1/13/12 at p. 53:17-24. Provenzano admitted - and the Court finds -

that she breached her obligation to be truthful to her employer by encouraging a vendor to withhold material information from Card Tech. See Tr. 1/12/12 at p. 30:20-24.

Card Tech's investigation reveals Provenzano is shipping with an unknown UPS account, not reporting sales, and not depositing sales proceeds into the approved '277 **[*31]** account.

68. Card Tech received UPS daily reports from Provenzano through November 2010; she stopped sending them in December 2010. Tr. 1/10/12 at p. 197:2-6. On or about January 7, 2011, Card Tech noted to Provenzano that it had not received UPS end-of-day reports since November 2010. Provenzano responded that she faxed them in December. Card Tech did not receive any UPS dailies from Provenzano in December, but did receive other faxes from Provenzano in December. Tr. 1/10/12 at pp. 202:23-204:9; Exhibit 94-12.

69. Also on or about January 7, 2011, Provenzano sent a handwritten list confirming shipments, and days with no shipments, in December 2010. Tr. 1/10/12 at pp. 205:15-207:13; Exhibit 74. Sending such a handwritten list was unusual. Tr. 1/10/12 at p. 208:2-5. There was only one discrepancy with the information Card Tech had. Tr. 1/10/12 at pp. 206:15-18, 208:13-17.

70. Having received the P3 invoices and not having received UPS end-of-day reports, Card Tech investigated Provenzano's conduct. It decided to test the website by arranging for several orders to be placed to see if the billing would be done in the normal manner. Tr.1/10/12 at pp. 188:22-189:3.

71. Card Tech asked three **[*32]** individuals to place such orders: Hibscher, Robert, and Lakhani. Hibscher placed an order, and a few weeks later Card Tech received a package from Hibscher that contained a sealed carton with Card Tech products, in Card Tech trade dress, with a Card Tech packing slip indicating that the order was placed by Hibscher on January 11, 2011. Card Tech expected that it would have received an invoice that same day and the payment would have been deposited into the '277 account the same day. But Card Tech did not receive invoicing for that shipment at that time, and the money was not then deposited into the '277 account. Tr. 1/10/12 at pp. 188:22-193:7. Instead, Card Tech received a batch of invoices at the end of February that accounted for some sales in January and February. There was a new numbering system used on those invoices. Hibscher's invoice was among these. Tr. 1/11/12 at p. 56:9:17.

72. Card Tech then decided to conduct another test purchase. Card Tech wanted to give Provenzano the benefit of the doubt by placing another order to see if the results would be the same. It did not contact Provenzano directly to ask for an explanation. Tr. 1/11/12 at p. 50:12-19. It requested Robert **[*33]** to place an order from presat.com or 4cleaningcards.com. Shortly thereafter a package was received from Robert in the same fashion as the Hibscher package, with a Card Tech packing slip indicating "sold to Stacy Robert" and that the order was placed on February 2, 2011. Tr. 1/10/12 at pp. 193:16-195:18; Exhibit 1. Card Tech received the invoice "quite a long time after" the order was placed. Tr. 1/11/12 at p. 56:19-24.

73. The shipping label on the Robert package indicated that it was shipped using a UPS account in the name "Proven Products" - the UPS '046 account. Tr. 1/10/12 at pp. 195:21-196:24; Exhibit 1. Although Provenzano had earlier expressed concern about keeping her personal shipping separate from Card Tech's shipping, this was the first indication Card Tech had of this UPS '046 account. Tr. 1/10/12 at p. 197:2-11; Tr. 1/11/12 at p. 61:3-20. Card Tech also made a test purchase through Lakhani. Card Tech did receive payment for that purchase. Tr. 1/11/12 at p. 130:5-16. Contrary to Provenzano's implication, this establishes only that on one of the three test orders, Provenzano promptly and properly accounted for the sale.

74. Card Tech decided to wait to see if Provenzano would **[*34]** come forward with an explanation for this situation, but she did not offer any explanation. Tr. 1/10/12 at p. 125:12-20.

75. On or about April 4, 2011, Card Tech requested a UPS end-of-day report from Provenzano. Later that day, instead of sending the UPS daily report, Provenzano sent a copy of a shipping label to a customer, UTI. Card Tech saw that the shipment to UTI was shipped via Provenzano's UPS '046 account. Tr. 1/10/12 at pp. 222:1-224:5.

76. The next day, April 5, Card Tech asked Provenzano about that UPS '046 account. In response, after consulting with her counsel, she stated that it was for personal shipping. Tr. 1/12/12 at pp. 56:3-57:12. Provenzano never provided a UPS daily report for the UPS '046 account. Tr. 1/10/12 at p. 197:9-11, 15-17. Evidence at trial established that at least 65-70 shipments Provenzano sent via her UPS '046 account were business-related, not personal. Tr. 1/10/12 at pp. 232:15-242:25, Exhibit 151. The test purchase by Robert and a further test purchase by Hibscher were shipped via Provenzano's UPS '046 account. Tr. 1/10/12 at pp. 197:21-198:5; Tr. 1/10/12 at p. 195:21-23, Exhibit 89, Bates numbers 269, 272, 273. Once again, Provenzano provided an **[*35]** explanation for her apparent deception: When using the UPS website, the default for shipping is the account that was last used. While that is true, the Court finds Provenzano's implied claim that she simply forgot to reset the account number after making a person purchase on 65 to 70 shipments during this period is not credible. Even if that were true, Provenzano's response that the account was for personal shipping was misleading under these circumstances.

77. Card Tech directed Provenzano to provide accurate sales and collections information for October 2010 through March 2011. On or about April 4, 2011, Card Tech received from Provenzano a summary report of sales. Card Tech had no record of any of the sales on that report, and had never received copies of invoices for those sales. The invoice numbering had changed. Tr. 1/10/12 at pp. 214:18-215:20, 216:19-219:3, 220:10-221:4, Exhibits 5-1, 5-2, 27 and 74-1.

78. Provenzano had started a new invoicing system in 2011, but did not inform Card Tech. The new sequence applied to website orders, and all orders with this new invoicing system were shipped on the UPS '046 account. Test purchases by Hibscher and Robert were invoiced on Provenzano's **[*36]** new invoice numbering system. Tr. 1/12/12 at pp. 46:10-25, 47:10-20, 48:3-51:11; Exhibit 89. Provenzano attempts to deflect Card Tech's criticism and concern by stating that she had total autonomy, and therefore could unilaterally institute a new numbering system. Even assuming she had the authority to do so, her implementation of this measure without notice of or explanation to Card Tech was justifiable cause for concern.

79. Card Tech compared Provenzano's April sales report to the handwritten report of December 2010 sales and found that the dates of activity did not match. For example, the handwritten report stated no shipments on December 1, 2, and 3 through 10, whereas the typed report received in April showed shipments on the 1st, 8th, and 10th. Tr. 1/10/12 at pp. 220:16-221:4.

80. From these documents Card Tech concluded that Provenzano kept two sets of documents for December, that the information in the handwritten note was incorrect, and that Provenzano was not being honest with Card Tech. Tr. 1/10/12 at pp. 218:16-19, 221:8-17.

81. Card Tech compared the invoice numbers provided by Provenzano for website sales from November 2010 through early April 2011. Card Tech found numerous **[*37]** gaps in the invoice numbering. The website prepares invoice numbers automatically. The gaps indicated to Card Tech that there were orders Provenzano did not report to Card Tech. Tr. 1/11/12 at pp. 52:23-53:22, 54:5-9, 141:14-22.

Provenzano's new website

82. Card Tech approved a trip to Europe to take place in February 2011, to visit a customer and to visit Disko, a supplier, ostensibly for training. Tr. 86:10-19, Tr. 1/12/12 at p. 69:15-20. On about February 21, 2011, days after returning from this trip, Provenzano told Mouchet that she wanted a website separate from Proven Products, devoted entirely to Disko, with the same structure as Proven Products. Tr. 1/11/12 at pp. 72:13-73:2, Tr. 1/12/12 at p.69:6-25; Exhibit 81. Provenzano did not inform Card Tech that she was seeking to establish a Disko website. Tr. 1/12/12 at p. 71:4. She told Mouchet that she had made an arrangement with the Disko company to be their exclusive distributor in the Americas. Tr. 1/11/12 at p. 77:1-5.

83. On about March 19, 2011, Provenzano told Mouchet: "I would like to get this website up and running ASAP, including a shopping cart. It's going to have to be a Disko domain in the U.S." Tr. 1/11/12 at p. 73:18-22: **[*38]** Exhibit 81-50. Provenzano did not inform Card Tech. Tr. 1/12/12 at p. 71:4. Provenzano contends that she

had total autonomy, and that there is no evidence that she was required to inform Card Tech of the domain name or website. While this is factually accurate, the Court finds that the only reason Provenzano would not immediately tout such a substantial coup to Card Tech is that she was in the process of considering leaving Card Tech - or had already decided to do so - and that she planned to appropriate this opportunity for herself in breach of her duty to and agreement with Card Tech. She did not instruct Mouchet to register the website in Card Tech's or Proven Products' name.

84. On April 2, 2011, Provenzano asked Mouchet to begin work on the Disko website, stating: "I will need to get this up and going ASAP so I can continue making [a] living." She also asked Mouchet to register the domain name disko-us.com, and to email her only at an aol.com email address: snapprotek7@aolcom. She further asked that he not use any of the 4cleaningcards or presat email addresses. Tr. 1/11/12 at p. 76:1-25; Exhibit 81-44, 45, 48. By this date, if not sooner, Provenzano had clearly decided to end **[*39]** her employment with Card Tech (or that Card Tech would be terminating her), and that she would hide her misappropriation of the Disko business from Card Tech. Provenzano admits that as of this date she believed Card Tech would terminate her, and contends that on April 5 Card Tech did decide to terminate her. This, of course, does not justify hiding her April 2 activities with regard to Disko.

85. On April 7, 2011, Provenzano asked Mouchet if he had the template for presat.com and 4cleaningcards.com so she could use it later. She wanted to be sure he had all the files associated with the website. Tr. 1/11/12 at pp. 78:17-79:10; Exhibit 81-42.

86. Again on April 23, 2011, Provenzano told Mouchet she wanted to be sure he had all orders, customers, purchases, and other records from the presat.com website. Tr. 1/11/12 at p. 82:8-21, Exhibit 81-30.

87. At Provenzano's request all of the records from the presat.com website were put onto a new website for Provenzano, prodeeninc.com (sometimes referred to as the "disko website"). Mouchet cloned the presat.com website to make Provenzano's new website, so that all the information from the presat.com website was on the disko.com website. Tr. 1/11/12 **[*40]** at p. 83:3-15.

<u>Provenzano's claimed expenses</u>

88. Provenzano was instructed that expenses for the European trip should be reasonable. Card Tech requested a trip report but Provenzano never provided one. Tr. 1/10/12 at p. 87:4-16; Tr. 1/13/12 at p. 63:23-25.

89. Provenzano submitted a request for expenses. Card Tech believed certain expenses were extraordinarily high: a chauffeured car for about $398, a meal with clients for about $500 (for four people), telephone expenses of about $500. The hotel bill for London for four nights was $2,686. Provenzano stated that the rate was $395 per night, but that other things such as taxes were included on the bill. Tr. 1/13/12 at pp. 64:16-24-65:19.

90. In or about early March 2011, Card Tech and Provenzano each received a cease and desist letter from the owner of a patent. Card Tech decided to stop selling the product and informed the patentee. Tr. 1/11/12 at p. 30:4-22. On March 5, 2011, Card Tech also informed Provenzano. Tr. 1/13/12 at pp. 72:24-73:4; Exhibit 116. Provenzano nevertheless hired a lawyer to represent her in the matter after March 5, 2011.

<u>Termination of Provenzano's employment</u>

91. Card Tech had grounds to terminate Provenzano by at **[*41]** least April 5, 2011. On April 13, 2011, Card Tech requested specific information from Provenzano. When Card Tech sent its letter, it had not yet decided to terminate her. Tr. 1/11/12 at pp. 113:13-17; 118:13-17. Provenzano was seen as an important part of the Card Tech operation and Card Tech wanted to work with her. Tr. 1/10/12 at p. 125:14-17, Tr. 1/11/12 at p. 31:21-22. Provenzano was given a short time to respond to the letter because Card Tech knew that some damage had been done, but it did

not know what else had occurred, and it did not want to delay and risk more damage. Tr. 1/11/12 at pp. 113:25-114:5.

92. Provenzano responded that she could not get the information within 48 hours. Tr. 1/11/12 at p. 115:2-4. Card Tech decided not to give Provenzano more time. Tr. 1/11/12 at p. 114:2-5.

93. Provenzano was officially terminated by an email sent April 18, 2011. Termination was effective April 25, 2011. Exhibit 78. The email stated: "Your employment is being terminated for just cause within the meaning of your employment agreement with the company. The grounds for termination include, but are not necessarily limited to, the following." Id. The email then lists a number of non-exclusive **[*42]** grounds for the termination. Id. In addition, the email referred to the instant litigation and stated: "The facts stated in our complaint and in [Farrar's] declaration establish numerous other grounds for terminating your employment." Id. Farrar testified that one of the "prime" reasons for terminating Provenzano was that she was not being truthful and honest with Card Tech. Tr. 1/10/12 at pp. 229:24-230:11. The Court agrees with this analysis. As described in these Findings, there were numerous occasions on which Provenzano had not been truthful or honest with Card Tech. In addition, the Court finds credible Farrar's testimony that Card Tech did not terminate Provenzano to avoid paying her under the Employment Agreement, paying her for overtime, or paying her travel expenses. Tr. 1/10/12 at p. 230:3. Provenzano's last payment for her employment was probably April 15, 2012. Tr. 1/11/12 at p. 107:18-20.

94. For all of the reasons described previously, Card Tech had just cause to terminate the Employment Agreement with Provenzano.

Provenzano's unauthorized use of Card Tech trademarks and trade dress

95. After her employment with Card Tech was terminated, Provenzano continued to engage in **[*43]** the business of selling technical cleaning cards; she uses the '207 account for that business. Tr. 1/12/12 at p. 121:7-18.

96. Since May or June 2011 Provenzano has been selling the same technical cleaning products in packaging very similar to Card Tech packaging. Tr. 1/13/12 at p. 83:5-16. The products Provenzano has been selling are similar to the products sold by Card Tech and directly competitive. Exhibits 26 and 46. Provenzano does not contend that Card Tech approved, authorized, or in any way consented to Provenzano's use of Card Tech's trademarks or trade dress competing with Card Tech.

97. Provenzano mimicked Card Tech packaging because all the templates were there, the artwork plates were already there, the cost to change was significantly less than going into an entirely new design; she saved herself a considerable amount of money. Tr. 1/13/12 at p. 90:15-20.

98. In about June 2011, Card Tech discovered a prodeen.com website. It had the same overall appearance and impression as the presat.com website, offered directly competing products, and displayed the same packaging as Card Tech packaging. Tr. 1/10/12 at pp. 247:13-248:7, 248:24-251:3, 89:15-91:3; Exhibit 46.

99. On May 12, **[*44]** 2011, nearly three weeks after Provenzano was terminated by Card Tech, Provenzano issued her P.O. # 0716-621 to Diamond Wipes for a package design that is similar to the package design conveyed by Provenzano to Card Tech. Tr. 1/12/12 pp. 128:10-133:17. Provenzano used that design after April 2011. Tr. 1/12/12 at p. 134:2-3.

100. At the time of trial, Provenzano was still offering and selling products in packaging that looks like the Card Tech design. Tr. 1/10/12 at pp. 251:10-252:9; Tr. 1/12/12 at pp. 127:23-25, 129:14-149:3; Exhibit 35; Exhibit 128-4. Provenzano's website shows that she has been offering and selling technical cleaning products for sale using Card Tech's trademarks, or confusingly similar marks, including *at least* the marks PRESAT, DIAMOND TECHNOLOGY, the Three Drop symbol, EASY CLEAN CARD, and EASY SWAB. Exhibit 46.

101. The overall appearance of Card Tech's packaging, taken as a whole, is not functional — packaging can have many different appearances and there are other equally efficient ways to arrange images in connection with

instructions (and indeed other images). Many of the aspects of the packaging copied by Provenzano are not related to instructions at all; **[*45]** while some images may be suggestive, other suggestive images could be used. The overall appearance of Card Tech's packaging, taken as a whole, is not functional.

102. Card Tech acquired from Provenzano and uses the mark DIAMOND TECHNOLOGY and a "magnifying glass and dollar bill" symbol. Tr. 1/10/12 at pp. 64:6-8, 67:21-68:1, Tr. 1/11/12 at pp. 184:13-185:5; Exhibit 26-31. Some time prior to August 25, 2011, Provenzano changed the use of DIAMOND TECHNOLOGIES on her website to DIAMOND ICE TECH. Exhibit 46-15. Those marks are likely to be confused, though no evidence of actual confusion was presented.

103. As of the time of trial, Provenzano was still offering and selling products in packaging similar to Card Tech packaging with an image of a diamond and in other respects the same as the Card Tech package that uses the trademark DIAMOND TECHNOLOGIES. Provenzano admits the diamond image could be confused with the DIAMOND mark. Tr. 1/12/12 at pp. 143:7-144:24.

104. As of the time of trial, Provenzano was still offering and selling packaging that is very similar to the Card Tech package bearing the mark PRESAT. Tr. 1/12/12 at pp. 145:22-148:8; Exhibit 119. Provenzano admitted her packaging **[*46]** duplicates the entire format of the Card Tech package except that "saturated" is substituted for SAT. Tr. 1/12/12 at pp. 147:25-148:2. A person seeing PRESAT and presaturated would think there is some commonality between the two. Tr. 1/11/12 at p. 81:8-15. PRESAT and PREsaturated are likely to be confused.

105. Before she was terminated from Card Tech, Provenzano asked Mouchet about names similar to the names she had conveyed to Card Tech. Tr. 1/11/12 at p. 80:12-81:7. Also, Mouchet had asked her about registering disko.us to prevent confusion with disko-us.com, to which Provenzano replied, "yes." Exhibit 81-44, 45.

106. As of the time of trial, Provenzano was offering technical cleaning products for sale through a website, prodeeninc.com, that was substantially similar in overall impression to the presat.com website used for Card Tech's business in 2010, which was an asset Provenzano had agreed to convey to Card Tech. Tr. 1/10/12 at p. 89:3-25; Exhibit 75. Mouchet cloned the presat.com website to make Provenzano's new website. Tr. 1/11/12 at p. 83:7-9. The only difference is that some images are not displayed on the website currently. Tr. 1/12/12 at pp. 131:11-14, 135:15-18.

107. The **[*47]** overall appearance of Card Tech's website is not functional - there are many different "looks" for websites and there are other equally efficient ways to arrange a website. The overall appearance of Card Tech's website, taken as a whole, is not functional.

108. Money deposited to Provenzano's '207 account in May, June, and July 2011, totaled $107,022, all of which appeared to be business deposits. Tr. 1/11/12 at p. 168:18-25, p. 169:19-23. There was a clear upward trend of deposits into this account. Tr. 1/11/12 at p. 169:16-18. In August through December 2011, monthly sales have been $15-20,000 per month. Tr. 1/12/12 at p. 122:13-25. Provenzano's total sales from May until the preliminary injunction are, therefore, $167,022.

109. Provenzano used trademarks and trade dress that are very similar to the Card Tech marks. She knew they were similar, having transferred the trademarks and trade dress to Card Tech. She intended to use the similar marks, and did so because it was less expensive for her. She knew and understood that marks that are similar, even if not identical, would infringe. To the extent she contends otherwise, the Court finds her testimony incredible or irrelevant. The goods **[*48]** in connection with which the marks are used are identical and directly competitive with Card Tech goods; and the goods are inexpensive. Provenzano and Card Tech use similar marketing channels, and Provenzano used a website (a marketing channel) that is identical in overall look and feel. There is a likelihood of confusion between Provenzano marks, including her website, and Card Tech marks. No evidence of actual confusion was submitted.

<u>Provenzano used Card Tech customer information</u>

110. Provenzano sold and conveyed all of her business records and customer list information (among other things) to Card Tech. Exhibit 75. Thereafter, Provenzano was Vice President of Sales and reported directly to the President of Card Tech. See Exhibit 77 at 3. Provenzano was the entire sales and marketing staff of Card Tech. Tr. 1/10/12 at p. 53:8-11; Tr. 1/11/12 at p. 31:24-25.

111. While Provenzano was still an officer of and employed by Card Tech, she instructed Mouchet to be sure he had in his files "all the information from the Presat website such as all orders, customers, best products purchased, etc., and whatever other records [Provenzano] gathered during the years of this website up and running." **[*49]** Tr. 1/12/12 at p. 87:9-20. Thus by having Mouchet clone the information into her new website, Provenzano took for her own use information she had sold to Card Tech, and breached the Asset Purchase Agreement. She used the information in her own website, used marks on her website that are similar or identical to Card Tech trademarks, and solicited sales of goods that used without permission Card Tech trademarks and trade dress.

112. Provenzano was aware of an economic relationship between Card Tech and its customers that probably would have resulted in a continuing relationship with those customers and economic benefit to Card Tech. Indeed, that was the purpose of conveying the customer list and information to Card Tech. While it appears likely that Provenzano solicited Card Tech's customers, Card Tech provided no evidence of any actual solicitations. Card Tech has provided no facts that would justify an award of damages. Card Tech's First Amended Complaint seeks actual damages according to proof at trial, but Card Tech has not proven - or even requested - a specific sum.

Defamatory statements

113. Provenzano sent emails to third parties stating that Card Tech swindled her out of her business, **[*50]** Card Tech had no clue how to run a business, Card Tech stole her company, and Card Tech was trying to turn vendors and suppliers against her so they would not want to do business with her. Tr. 1/12/12 at pp. 89:16-91:10, 94:15-25, 95:10-96:8; Exhibit 83-93; 79-56.

114. There is no evidence that Card Tech swindled her out of her business or was trying to turn vendors against her. In fact, this Court has determined that no such conduct occurred. Failing to pay on a note when there is a dispute whether payment continues to be due is not "swindling."

115. However, Card Tech has not established that any recipient of the emails knew Provenzano was referring to Card Tech or Farrar.

116. Such statements conveyed a negative impression, were mean-spirited, and painted Card Tech in a negative light. Tr. 1/12/12 at pp. 91:24-25, 93:6-8, 94:15-25. However, there is no evidence that any of the recipients of the emails thereafter declined to do business with Card Tech, or that Card Tech even wished to do business with these particular entities. Card Tech's First Amended Complaint seeks general damages for this wrongful conduct, but Card Tech has not requested a specific sum and there is no evidence **[*51]** of actual damage.

Provenzano was not truthful with or concerning Card Tech

117. Provenzano failed to disclose and then avoided disclosing the status of the presat.com domain name and website. She failed to disclose a liability in breach of the Asset Purchase Agreement.

118. Provenzano had little or no documentary evidence for her explanations. Her response to written requests was often 'we need to talk about it,' and often no response at all.

119. The Court does not believe - and Card Tech was justified in not believing - that Provenzano ordered and paid for more than ten thousand dollars of inventory without telling Card Tech, planning to request reimbursement only if it was needed at an unknown time in the future. That Provenzano had "total autonomy" is irrelevant as she took affirmative steps to hide this transaction from Card Tech.

120. Provenzano misrepresented that Card Tech was an investor. She misrepresented her activities to Card Tech. Provenzano shipped product using her UPS '046 account and deposited the proceeds into her '207 account, without reporting the activity to Card Tech. Card Tech would not have known about the transactions, Tr. 1/12/12 at pp. 112:6-111:2, but for its **[*52]** investigation. Provenzano misappropriated customer information that she had sold to Card Tech. Provenzano's contention that in order for a misrepresentation to have occurred, it must be "material" is simply incorrect. Provenzano's repeated misrepresentations are relevant to the Court's analysis of the evidence in this case. In any event, many of Provenzano's misrepresentations were material.

Provenzano's testimony was evasive, contradictory, disingenuous, and generally lacking in credibility

121. Provenzano contended she was a good and loyal employee, but her own testimony established that she was not. She testified that her purchases of inventory without Card Tech's approval - or even its knowledge - were for the good of Card Tech in case it needed the inventory, Tr. 1/12/12 at p. 19:18-20:1. She then testified that the payment for a purchase by Castle Six properly went into her separate '207 bank account because it was a purchase of something not in Card Tech/Proven Products inventory, Tr. 1/12/12 at pp. 109:18-110:2. She stated that she didn't have the responsibility for paying the bills (except in the vendors' minds), Tr. 1/12/12 at p. 184:13-18, but she deliberately ordered inventory **[*53]** and directed that it be billed to her personally, Tr. 1/12/12 at p. 21:4-6; she directed a vendor (P3) to change billing to Card Tech International but described Card Tech as her east coast office, Exhibit 79-312-313. Thus, if Provenzano was viewed as financially responsible it was because of her own misrepresentations. The Court does not find credible Provenzano's allegation that it was Farrar who wanted the Card Tech purchase to remain a secret due to his alleged concerns about a "non-compete." Provenzano also testified: "We" were the exclusive distributor for Disko. Tr. 1/12/12 at p. 72:22-23; Proven Products (which Card Tech had purchased) was a distributor for Disko, Tr. 1/12/12 at p. 78:17-20; Card Tech did not assume her rights as exclusive distributor for Disko because Card Tech was the distributor based only on her personal relationship with Disko, Tr. 1/13/12 at pp. 78:3-81:16. She also testified both that she presumed Card Tech had an interest in Disko, Tr. 1/12/12 at pp. 78:21-79:1, and that Card Tech had no interest in Disko, Tr. 1/12/12 at pp. 79:2- 80:13. She testified she started a new invoicing system that deliberately was not numbered sequentially, Tr. 1/13/12 at **[*54]** p. 56:8-11; but then stated that the non-sequencing was from a typographical error multiple times, Tr. 1/13/12 at pp. 56:12-58:6. She testified that she asked Mouchet to get a new, separate Disko website up and running ASAP on March 19, 2011, Tr. 1/12/12 at p. 73:8-25, Exhibit 81; but also stated she did not "initiate" a Disko website before April 5, 2011, Tr. 1/12/12 at p. 70:18-25.

122. Provenzano admitted several times she was not being honest with Card Tech. On other occasions her responses were technically true but misleading. For example, it is technically true that the "purpose" of the UPS '046 account was for personal items, but in fact she used it over and over to ship business items. Tr. 1/12/12 at p. 56:3-25. It is technically true that Provenzano was not "holding" any P3 invoices, because she did not have the physical invoices, Tr. 1/12/12 at p. 32:2-21, but it is misleading.

123. Provenzano's responses to questions at trial were frequently evasive, seeking to be technically true but not answering the entire question; and sometimes not responsive at all. For example, "Q: Were you trying to associate that product with the earlier Diamond Technologies by using the diamond? **[*55]** A: The product itself is distinctive," Tr. 1/12/12 at p. 144:8-10; "Q: [C]onceivably a customer could receive, if they got a head cleaning card, this type of design; correct? A. That design is not on the website any longer." Tr. 1/12/12 at p. 135:15-18.

124. Provenzano had a prepared excuse for much of her wrongful conduct. Some of the excuses were incredible on their face. Others the Court found not to be credible based on her demeanor and manner while testifying, as well as contradictory documentary evidence, and the testimony of Norman Farrar, whom the Court found to be credible. Provenzano also often tried to excuse her wrongful conduct by claiming she was not a lawyer or didn't know that what she was doing was wrong. Nevertheless, Provenzano continued to engage in her infringing conduct even after this Court issued a preliminary injunction. Docket No. 105.

125. It appears to the Court that, while Provenzano may have entered into the Asset Purchase Agreement and Employment Agreements intending to perform -albeit reluctantly - she soon after developed "seller's remorse" and

began efforts to develop her own business once again. In addition, she concluded that Farrar and Card Tech had **[*56]** stolen her business from her. Based on her actions, she appears to believe that this justifies whatever conduct she chooses to engage in.

CONCLUSIONS OF LAW

A. Plaintiff's claims

Claim 1: Breach of Contract

1. Card Tech and Provenzano entered into several related contracts. The Asset Purchase Agreement provides that Maine law will govern. Exhibit 75 at 15.10. The Employment Agreement does not contain a choice of law provision.

2. Under both Maine and California law, when several documents are executed together for one transaction, the documents are construed together as one instrument. *Handy Boat Serv., Inc. v. Prof'l Servs., Inc., 1998 ME 134, 711 A.2d 1306, 1308 (Me. 1998)*; *Margolis v. Margolis, 115 Cal. App. 2d 131, 136, 251 P.2d 396 (1952)*. Under both Maine and California law, to prevail on a breach of contract claim, the plaintiff must show (1) a valid contract existed, (2) performance, or excuse of performance, by the plaintiff, (3) a breach of obligation by the defendant, and (4) damages. *Jenkins, Inc. v. Walsh Bros., 2001 ME 98, 776 A.2d 1229, 1234-35 (Me. 2001)*; *Wall Street Network, Ltd. v. N.Y. Times Co., 164 Cal. App. 4th 1171, 1178, 80 Cal. Rptr. 3d 6 (2008)*. To excuse performance by one party to a contract, the breach by the other **[*57]** party must be material. *Jenkins, 776 A.2d at 1234*; *Brown v. Grimes, 192 Cal. App. 4th 265, 277, 120 Cal. Rptr. 3d 893 (2011)*.

3. Provenzano's failure to deliver what she promised to deliver pursuant to the Asset Purchase Agreement is a breach. *C.N. Brown Co. v. Gillen, 569 A.2d 1206, 1214 (Me. 1990)*; *Woodard v. Glenwood Lumber Co., 171 Cal. 513, 522-23, 153 P. 951 (1915)*; 1 Witkin Summary of California Law: Contracts § 849 (10th ed. 2005). It also constitutes a failure of consideration. *Augusta Bank v. Hamblet, 35 Me. 491, 495-96 (1853)*; *Madera Canal & Irrigation Co. v. K. Arakelian, Inc., 103 Cal. App. 592, 597, 284 P. 971 (1930)*; 1 Witkin Summary § 813.

4. Provenzano failed to perform material obligations — for example, she failed to deliver all rights and domain names to presat.com, used for her own purposes trademarks and business information that she had conveyed to Card Tech for its exclusive use, failed to report sales, provided inaccurate information of sales and shipments, and did not devote her exclusive attention to Card Tech's business. Provenzano was not excused from performance of her contractual obligations.

5. Conveying the trademarks, trade names, trade dress, and goodwill of a business and then using them again in **[*58]** derogation of the assets conveyed constitutes a material breach of contract, as well as trademark infringement. 3 McCarthy on Trademarks and Unfair Competition § 18:15 (4th ed. 1994).

6. Provenzano's material breaches excused further performance of the Asset Purchase Agreement by Card Tech. *Augusta Bank, 35 Me. at 495-96*; *Brown, 192 Cal. App. 4th at 277* (citing 1 Witkin Summary §§ 813, 814). No further sums are due from Card Tech to Provenzano.

7. As a result of Provenzano's failure to convey all rights and domain names to presat.com, Card Tech has had to develop its own website. Card Tech has suffered damages in the amount of $4000 spent to create the website, and will likely incur $2000 in additional damages. Defendants are liable to Card Tech in the amount of $6000.

Claim 2: Fraudulent Inducement

8. The elements of fraud, which give rise to the tort action for deceit, are (1) a misrepresentation, (2) scienter, (3) intent to induce reliance, (4) justifiable reliance, and (5) damages. *Lazar v. Superior Court, 12 Cal. 4th 631, 638, 49 Cal. Rptr. 2d 377, 909 P.2d 981 (1996)*. A promise made with no intent to perform constitutes a misrepresentation that will give rise to a fraud claim. *Cal. Civ. Code § 1710(4)*; *Lazar, 12 Cal. 4th at 638*.

9. **[*59]** While there is evidence that Provenzano never intended to convey exclusive ownership of at least the presat.com domain name and website, the Court finds that Card Tech has not shown fraudulent inducement of the Asset Purchase Agreement by a preponderance of the evidence. Provenzano knew that she did not have the rights she claimed to have, but she apparently believed Card Tech would have exclusive access to the website nevertheless.

10. There is little or no evidence that — at the time she entered into the Employment Agreement — Provenzano did not intend to be an employee and work exclusively for Card Tech for five years.

11. The Court finds in favor of Provenzano as to the fraudulent inducement claim.

Claim 4: Unfair Competition — trade dress

12. Trade dress is the total image of a product and may include features such as size, shape, color or color combinations, texture, or graphics. *Two Pesos v. Taco Cabana, 505 U.S. 763, 765 n.1, 112 S. Ct. 2753, 120 L. Ed. 2d 615 (1992)*; *Clicks Billiards, Inc. v. Sixshooters, Inc., 251 F.3d 1252, 1257 (9th Cir. 2001)*. To prevail on a trade dress infringement claim, the plaintiff must establish (1) that its trade dress is nonfunctional, (2) that it is inherently distinctive or has acquired **[*60]** a secondary meaning, and (3) that the defendant's conduct creates a likelihood of confusion. *Clicks Billiards, 251 F.3d at 1258*.

13. Trade dress is considered as a whole. Elements that are separately unprotectable may be protected together as part of a trade dress. See *Bristol-Myers Squibb Co. v. McNeil-P.P.C., Inc., 973 F.2d 1033, 1042 (2d Cir. 1992)* ("In examining trade dress the focus is on the entire look of the product or packaging. Individual aspects of a trade dress may be eligible for trademark protection in their own right, but in an action for trade dress infringement each aspect should be viewed in relation to the entire trade dress.").

14. For example, "[a] restaurateur cannot prevent others from using any particular color or feature, but can protect a combination of visual elements 'that, taken together, . . . may create a distinctive visual impression.'" *Fuddruckers, Inc. v. Doc's B.R. Others, Inc., 826 F.2d 837, 842 (9th Cir. 1987)* (quoting *Falcon Rice Mill, Inc. v. Cmty. Rice Mill, Inc., 725 F.2d 336, 346 (5th Cir. 1984))*.

The overall appearance of the Card Tech trade dress is not functional

15. To be protectable, trade dress must be nonfunctional. *Clicks Billiards, 251 F.3d at 1258*. **[*61]** Here, the trade dress is the packaging, not the product itself. To the extent product trade dress is treated differently from packaging trade dress, authorities dealing with product trade dress may not be applicable.

16. "A product feature is functional and cannot serve as a trademark if the product feature is essential to the use or purpose of the article or if it affects the cost or quality of the article, that is, if the exclusive use of the feature would put competitors at a significant, non-reputation-related disadvantage." *Clicks Billiards, 251 F.3d at 1258*.

17. Trade dress is examined as a whole to determine its functionality; functional elements that are not protectable separately can be protected together as part of a trade dress. *Clicks Billiards, 251 F.3d at 1259*; *Kendall-Jackson Winery Ltd. v. E. & J. Gallo Winery, 150 F.3d 1042, 1050 (9th Cir. 1998)*; *Fuddruckers, 826 F.2d at 842-43*.

18. Courts consider several factors in determining the functionality of trade dress: "(1) whether the design yields a utilitarian advantage, (2) whether alternative designs are available, (3) whether advertising touts the utilitarian

advantages of the design, and (4) whether the particular design **[*62]** results from a comparatively simple or inexpensive method of manufacture." *Clicks Billiards, 251 F.3d at 1260*. The functionality requirement is designed "to protect advances in functional design from being monopolized." *Le Sportsac, Inc. v. K Mart Corp., 754 F.2d 71, 76 (2d Cir. 1985)* (citation omitted). Trade dress likely is not functional where protection would leave many alternatives to competitors that would not prove confusingly similar to the protected trade dress. *Clicks Billiards, 251 F.3d at 1261*.

19. The overall appearance created by a combination of colors and design features is not functional. See, e.g., *Fuddruckers, 826 F.2d at 842* (stating that a "combinational of visual elements" in the design of a restaurant that, "taken together may create a distinctive visual impression" was not functional (alteration, citation, and internal quotation marks omitted)); *Lisa Frank, Inc. v. Impact Int'l, Inc., 799 F. Supp. 980, 986-87 (D. Ariz. 1992)* (concluding that the "overall visual appearance" of novelty stationery resulting from a combination of colors, graphics, and aesthetic features was not functional). One court has specifically reached this conclusion in the context of Internet **[*63]** websites. See *Conf. Archives, Inc. v. Sound Images, Inc., 2010 U.S. Dist. LEXIS 46955, 2010 WL 1626072, at *17 (W.D. Pa. Mar. 31, 2010)* ("Concerns about . . . monopolization are minimized in the context of web sites," because there are "so many other equally efficient ways to arrange a site. . . . As long as there are alternate ways to design a web site, beyond the arrangement protected by the trade dress, the site's interface should not be considered functional." (citation and internal quotation marks omitted)).

20. The overall appearance of Card Tech's website and packaging are not functional. Providing a product name, instructions for use, depictions of the product, and how-to illustrations are arguably functional features because they yield a utilitarian advantage, and because preventing a competitor from using these features would hamper competition and put competitors at a non-reputation-related disadvantage. *Clicks Billiards, 251 F.3d at 1258-60*. However, trade dress is to be viewed as a whole. The particular arrangement of these features, along with the colors and shapes on Card Tech's packaging, is not functional. Card Tech submitted examples of its trade dress. That was sufficient evidence for the Court **[*64]** to perform the functionality analysis.

Card Tech's trade dress is inherently distinctive

21. To qualify for protection, trade dress must either be inherently distinctive or have acquired secondary meaning. *Two Pesos, 505 U.S. at 769*. If trade dress is inherently distinctive, the plaintiff need not show secondary meaning. *Id. at 771-73*. Card Tech's trade dress is inherently distinctive.

22. In considering whether a mark is inherently distinctive, courts consider "whether it is a 'common' basic shape or design, whether it is unique or unusual in a particular field, and whether it is a mere refinement of a commonly-adopted and well-known form of ornamentation for a particular class of goods viewed by the public as a dress or ornamentation for the goods . . . ." *Brooks Shoe Mfg. Co., Inc. v. Suave Shoe Corp., 716 F.2d 854, 858 (11th Cir. 1983)* (alterations omitted) (quoting *Seabrook Foods, Inc. v. Bar-Well Foods Ltd., 568 F.2d 1342, 1344 (C.C.P.A. 1977))*.

23. Card Tech's trade dress is unique (aside from Provenzano's copying). A unique combination of common aesthetic features can be distinctive. For example, "[t]he combination of particular hues of [two] colors, arranged in certain geometric **[*65]** designs, presented in conjunction with a particular style of printing" on a chemical label that creates "a distinctive visual impression" is inherently distinctive. *Chevron Chem. Co. v. Voluntary Purchasing Grps., Inc., 659 F.2d 695, 703 (5th Cir. 1981)*; see also *AmBrit, Inc. v. Kraft, Inc., 812 F.2d 1531, 1536 (11th Cir. 1986)* (concluding that the Klondike bar trade dress "with its square size, bright coloring, pebbled texture, polar bear and sunburst images, and distinctive style of printing" was inherently distinctive); *Lisa Frank, 799 F. Supp. at 989* (concluding that the "use of bold colors and a graduated color-fade with knock-out graphics and other artwork" created a "distinctive visual impression" in novelty stationery and was inherently distinctive). Although certain elements of Card Tech's trade dress may be commonly available, its particular combination of elements is not a mere refinement of well-known forms of ornamentation commonly used by others in the relevant industry.

There is a likelihood of confusion

24. Likelihood of confusion is the touchstone for trade dress infringement. "Likelihood of confusion exists when customers viewing the mark would probably assume that **[*66]** the product or service it represents is associated with the source of a different product or service identified by a similar mark." *Clicks Billiards, 251 F.3d at 1265*. The factual elements to be considered for likelihood of confusion include the strength of the mark, proximity of goods, similarity of the marks, evidence of actual confusion, marketing channels used, degree of care exercised by purchasers, defendant's intent in adopting the mark, and likelihood of expansion of product lines. *AMF, Inc. v. Sleekcraft Boats, 599 F.2d 341, 348-49 (9th Cir. 1979)*, abrogated on other grounds by *Mattel Inc. v. Walking Mt. Prods., 353 F.3d 792, 810 n.19 (9th Cir. 2003)*. These factors are not a "rote checklist." *Network Automation, Inc. v. Advanced Sys. Concepts, Inc., 638 F.3d 1137, 1145 (9th Cir. 2011)*.

25. In this case, Defendants' trade dress is virtually identical to Card Tech's, the goods are the same, and the marketing channel (i.e., the Internet) is the same. The use of an identical advertisement of a nearly identical product with a nearly identical name is likely to cause consumer confusion. Docket No. 82, Order Granting Application for Preliminary Injunction at 11.

26. Although evidence **[*67]** of actual confusion is a factor in determining likelihood of confusion, absence of such evidence is not dispositive. See, e.g., *Eclipse Assocs., Ltd. v. Data Gen. Corp., 894 F.2d 1114, 1118 (9th Cir. 1990)* (citing *Sleekcraft, 599 F.2d at 353*). A plaintiff need not prove actual confusion to prevail on a trade dress infringement claim. See *15 U.S.C. § 1125(a)(1)(A)*; *Clicks Billiards, 251 F.3d at 1258*.

27. Deliberate copying of a similar mark creates a presumption of intent to deceive. *Interstellar Starship Servs., Ltd. v. Epix, Inc., 184 F.3d 1107, 1111 (9th Cir. 1999)*; *Official Airline Guides v. Goss, 6 F.3d 1385, 1394 (9th Cir. 1993)*. Intent to deceive is strong evidence of likely confusion. *Interstellar Starship Servs., 184 F.3d at 1111*.

28. Bad faith is not required for deliberate copying to be strong evidence of likely confusion. See *Sleekcraft, 599 F. 2d at 354* ("When the alleged infringer knowingly adopts a mark similar to another's, reviewing courts presume that the defendant can accomplish his purpose: that is, that the public will be deceived. Good faith is less probative of the likelihood of confusion, yet may be given considerable weight in fashioning a remedy." (citations **[*68]** omitted)).

29. Provenzano's use of Card Tech's trade dress was deliberate. The obvious similarity of the trade dress, Provenzano's knowledge of the trade dress and that it belonged to Card Tech, and Provenzano's deliberate and unmitigated copying of the presat.com website establishes deliberate copying. Provenzano deliberately sought and received a substantially identical website and packaging that is identical in overall appearance and impression. Provenzano chose to use Card Tech's trade dress because it was less expensive for her. To the extent that Provenzano claimed that she was unaware that her conduct was wrongful, the Court finds her testimony is not credible. Provenzano's conduct is strong evidence of likely confusion.

30. "When the goods produced by the infringer compete for sales with those of the trademark owner, infringement usually will be found if the marks are sufficiently similar that confusion can be expected." *Sleekcraft, 599 F.2d at 348*; see also *Fin. Express LLC v. Nowcom Corp., 564 F. Supp. 2d 1160, 1175 (C.D. Cal. 2008)*. Consumer confusion is likely here because the similar trade dress is used by Provenzano to sell products that are virtually identical to Card **[*69]** Tech products. Cf. *Faegre & Benson, LLP v. Purdy, 367 F. Supp. 2d 1238, 1244-45 (D. Minn. 2005)* (finding a low likelihood of confusion where similar websites were used for completely distinct purposes, and one of the websites included a disclaimer on each page stating that it was a parody of the other site). Where the marks are the same and the products are the same, the strength of the mark is of diminished importance. *Brookfield Commc'ns, Inc. v. W. Coast Entm't, 174 F.3d 1036, 1058-59 (9th Cir. 1999)*.

31. Where products are relatively inexpensive, there is a higher likelihood that consumers will be confused because they are likely to use less care while shopping. *Classic Foods Int'l Corp. v. Kettle Foods, Inc., 2006 U.S. Dist. LEXIS 97200, 2006 WL 5187497, at *14 (C.D. Cal. Mar. 2, 2006)*. Because the relevant products here are inexpensive,

customers are more likely to be confused by Defendants' nearly identical trade dress. Moreover, Provenzano took affirmative steps to conceal from customers that she had sold her business to Card Tech. Thus, any investigation by the customer would be unlikely to eliminate confusion. Injunctive relief is warranted

32. Injunctive relief is appropriate where there is no adequate **[*70]** remedy at law. *Richfield Oil Corp. v. United States, 207 F.2d 864, 870 (9th Cir. 1953)*.

33. Legal remedies are generally inadequate in the context of trademark infringement. See, e.g., *Century 21 Real Estate Corp. v. Sandlin, 846 F.2d 1175, 1180 (9th Cir. 1988)* ("Injunctive relief is the remedy of choice for trademark and unfair competition cases since there is no adequate remedy at law for the injury caused by a defendant's continuing infringement."); 5 McCarthy § 30:2 ("It is difficult to imagine an unfair competition case where damages are adequate to remedy the problem of defendant's continued acts."). This is because the likelihood of confusion generated by an infringing mark generally threatens the plaintiff's goodwill and reputation. *Paulsson Geophysical Servs. v. Sigmar, 529 F.3d 303, 313 (5th Cir. 2008)* (noting that the defendant's infringement causes the plaintiff to "los[e] control of the quality of the technology that was being associated with its mark"). Loss of goodwill and damage to reputation is "not readily measurable," and loss of sales is "notoriously difficult to calculate," making money damages an inadequate remedy. *Omega Importing Corp. v. Petri-Kine Camera Co., 451 F.2d 1190, 1195 (2d Cir. 1971)*.

34. **[*71]** Causation is not an element of a trade dress infringement claim; Card Tech need not prove that *any* sales in fact resulted from actual confusion. See *15 U.S.C. § 1125(a)(1)(A)*; *Sleekcraft, 599 F.2d at 352-53* (a plaintiff need only prove that confusion is *likely*). Where a plaintiff seeks injunctive relief, as opposed to actual damages, actual loss need not be proven. See *15 U.S.C. § 1125(a)(1)(A)*; *Safeway Stores, Inc. v. Rudner, 246 F.2d 826, 829 (9th Cir. 1957)*.

Claim 5: Unfair Competition - trademark

35. Trademark rights arise from use. *CreAgri, Inc. v. USANA Health Sciences, Inc., 474 F.3d 626, 630 (9th Cir. 2007)*. Each and all of the marks at issue were in use by Provenzano prior to March 2010. These marks were assets conveyed to Card Tech by the Asset Purchase Agreement. Ms. Provenzano individually was a signatory to that conveyance.

36. The trademark PRESAT is registered with the U.S. Patent and Trademark Office (Registration Number 3443482). That registration includes a Three Drop symbol used with the word PRESAT.

37. The PRESAT mark is presumptively valid and protectable. *15 U.S.C. § 1057(b)*; *Quiksilver, Inc. v. Kymsta Corp., 466 F.3d 749, 755 (9th Cir. 2006)*. Provenzano has not **[*72]** claimed that the PRESAT mark is not protectable.

38. DIAMOND TECHNOLOGY, CLEAN SWAB, EASY WIPES, EASY CLEAN CARD, EASY SWAB, and the slogan "Results Are Obvious" are unregistered trademarks used by Card Tech. Unregistered marks are subject to the same standard as registered marks. *Brookfield Commn'cs, 174 F.3d at 1046*.

There is a likelihood of confusion

39. Likelihood of confusion is the touchstone for trade dress infringement. "Likelihood of confusion exists when customers viewing the mark would probably assume that the product or service it represents is associated with the source of a different product or service identified by a similar mark." *Clicks Billiards, 251 F.3d at 1265*. The factual elements to be considered for likelihood of confusion include the strength of the mark, proximity of goods, similarity of the marks, evidence of actual confusion, marketing channels used, degree of care exercised by purchasers, defendant's intent in adopting the mark, and likelihood of expansion of product lines. *Sleekcraft, 599 F.2d at 348-49*. These factors are not a "rote checklist." *Network Automation, 638 F.3d at 1145*.

40. Although evidence of actual confusion is a factor in determining likelihood **[*73]** of confusion, absence of such evidence is not dispositive. See, e.g., *Eclipse Assocs., 894 F.2d at 1118* (citing *Sleekcraft, 599 F.2d at 353*). A plaintiff need not prove actual confusion to prevail on a trade dress infringement claim. See *15 U.S.C. § 1125(a)(1)(A)*; *Clicks Billiards, 251 F.3d at 1258*.

41. Trademarks need not be identical in order to infringe; it is enough if they are confusingly similar. See, e.g., *Saxlehner v. Eisner & Mendelson Co., 179 U.S. 19, 21 S. Ct. 7, 45 L. Ed. 60, 1900 Dec. Comm'r Pat. 362 (1900)*; *Wash. Speakers Bureau Inc. v. Leading Authorities Inc., 33 F. Supp. 2d 488 (E.D. VA. 1999)* (considering domain names), aff'd *217 F.3d 843 (4th Cir. 2000)*. Conflicting marks are to be compared with respect to sight, sound, and meaning. *Sleekcraft, 599 F.2d at 351*.

42. After this action was commenced, Provenzano changed her use of the DIAMOND TECHNOLOGY mark to use of DIAMOND ICE TECHNOLOGY. DIAMOND ICE TECHNOLOGY is confusingly similar to Card Tech's mark DIAMOND TECHNOLOGY. See, e.g., *Con Agra v. Hormel & Co., 990 F.2d 368 (8th Cir. 1998)* (concluding, in the context of the facts of the case, that "Healthy Choice" and "Health Selections" were confusingly similar marks); *Mobil Oil Corp. v. Teagarden, 190 U.S.P.Q. 560 (T.T.A.B. 1976)* **[*74]** (concluding, in the context of the facts of the case, that "Mobil Man" and "Mobil Muffler Man" were confusingly similar marks); see also 4 McCarthy § 23.29.

43. After being ordered to cease using any mark confusingly similar to DIAMOND TECHNOLOGY, Provenzano replaced the word DIAMOND with the image of a Diamond. A picture and a word may be confusingly similar. See, e.g., *Beer Nuts, Inc. v. King Nut Co., 477 F.2d 326 (6th Cir. 1973)* (concluding that use of the word NUTS as part of a mark with a picture of stein of beer infringed on the word mark BEER NUTS); *Arrow-Hart, Inc. v. Yazaki Corp., 169 U.S.P.Q. 249 (T.T.A.B. 1971)* (concluding that an ARROW and picture of an arrow were confusingly similar to the registered mark ARROW); *Jockey Int'l, Inc. v. Butler, 3 U.S.P.Q.2d 1607 (T.T.A.B. 1987)* (concluding that a picture of a jockey riding a horse was confusingly similar to the word mark JOCKEY). The mark using the picture of a diamond is confusingly similar to the DIAMOND TECHNOLOGY mark.

44. Provenzano changed her use of PRESAT to PREsaturated. Moreover, she continued to use the rippled water image from the Card Tech trade dress with the PREsaturated mark. This mark is confusingly similar **[*75]** to the PRESAT mark.

45. In this case, Defendants' marks are very similar to Card Tech's, the goods are the same, and the marketing channel (i.e., the Internet) is the same. The use of an identical advertisement of a nearly identical product with a nearly identical name is likely to cause consumer confusion. Docket No. 82, Order Granting Application for Preliminary Injunction at 11. "When the goods produced by the infringer compete for sales with those of the trademark owner, infringement usually will be found if the marks are sufficiently similar that confusion can be expected." *Sleekcraft, 599 F.2d at 348*; see also *Fin. Express LLC, 564 F. Supp. 2d at 1175*. Consumer confusion is likely here because the similar marks were used by Provenzano to sell products that are virtually identical to Card Tech products. Cf. *Faegre & Benson, LLP, 367 F. Supp. 2d at 1244-45*.

46. Where the marks are the same and the products are the same, the strength of the mark is of diminished importance. *Brookfield Commc'ns, 174 F.3d at 1058-59*.

47. Deliberate copying of a similar mark creates a presumption of intent to deceive, which is strong evidence of likely confusion. *Interstellar Starship Servs., 184 F.3d at 1111*; **[*76]** *Official Airline Guides, 6 F.3d at 1394*. Deliberate copying, even absent bad faith, is evidence of likely confusion. See *Sleekcraft, 599 F. 2d at 354*.

48. Provenzano's use of these marks was deliberate - she knew that she had conveyed the marks to Card Tech, and she used identical or nearly identical marks. She chose to use the marks because it was less expensive for her. In addition, Provenzano's series of minor, incremental changes to the similar marks evidence the intent to deceive, and the intent to continue to take advantage of Card Tech's goodwill. Provenzano's conduct is strong evidence of likely confusion.

49. Where products are relatively inexpensive, there is a higher likelihood that consumers will be confused because they are likely to use less care while shopping. *Classic Foods Int'l Corp., 2006 U.S. Dist. LEXIS 97200, 2006 WL 5187497, at *14*. Because the relevant products here are inexpensive, customers are more likely to be confused by Defendants' nearly identical trade dress. Moreover, Provenzano took affirmative efforts to conceal from customers that she had sold her business to Card Tech would make any investigation by a customer unlikely to eliminate confusion.

Injunctive relief is warranted

50. **[*77]** Injunctive relief is appropriate where there is no adequate remedy at law. *Richfield Oil Corp., 207 F.2d at 870*.

51. Legal remedies are generally inadequate in the context of trademark infringement. See, e.g., *Century 21, 846 F.2d at 1180*; 5 McCarthy § 30:2. This is because the likelihood of confusion generated by an infringing mark generally threatens the plaintiff's goodwill and reputation. *Paulsson Geophysical Servs., 529 F.3d at 313*. Loss of goodwill and damage to reputation is "not readily measurable," and loss of sales is "notoriously difficult to calculate," making money damages an inadequate remedy. *Omega Importing Corp., 451 F.2d at 1195*.

52. Causation is not an element of an action for trademark infringement; Card Tech need not prove that *any* sales in fact resulted from actual confusion. See *15 U.S.C. § 1125(a)(1)(A)*; *Sleekcraft, 599 F.2d at 352-53* (a plaintiff need only prove that confusion is *likely*). Where a plaintiff seeks injunctive relief, as opposed to actual damages, actual loss need not be proven. See *15 U.S.C. § 1125(a)(1)(A)*; *Safeway Stores, 246 F.2d at 829*.

Claim 6: Unfair Competition - state law

53. The basis for Card Tech's claim under California's unfair competition **[*78]** law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, is identical to its federal trademark and trade dress infringement claims. UCL claims are "substantially congruent" to trademark infringement claims under the Lanham Act. *Acad. of Motion Picture Arts & Scis. v. Creative House Promotions, Inc., 944 F.2d 1446, 1457 (9th Cir. 1991)* (citation omitted).

54. However, California's UCL is broader than the Lanham Act. The UCL "does not proscribe specific practices," but rather "defines 'unfair competition' to include 'any unlawful, unfair or fraudulent business act or practice.'" *Cel-Tech Commn'cs, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (quoting *Cal. Bus. & Prof. Code § 17200*). "[T]he Legislature . . . intended by [the UCL's] sweeping language to permit tribunals to enjoin on-going wrongful business conduct in whatever context such activity might occur." *Id. at 181* (alterations in original) (citation omitted); see also *Bank of the West v. Superior Court, 2 Cal. 4th 1254, 1266-67, 10 Cal. Rptr. 2d 538, 833 P.2d 545 (1992)* ("In drafting the act, the Legislature deliberately traded the attributes of tort law for speed and administrative simplicity."). "In permitting the restraining of all 'unfair' **[*79]** business practices, [the UCL] undeniably establishes only a wide standard to guide courts of equity; . . . given the creative nature of the scheming mind, the Legislature evidently concluded that a less inclusive standard would not be adequate." *Cel-Tech, 20 Cal. 4th at 181* (citation omitted).

55. Courts have consistently interpreted the language of *§ 17200* broadly. See, e.g., *Prata v. Superior Court, 91 Cal. App. 4th 1128, 1137, 111 Cal. Rptr. 2d 296 (2001)*. The statute imposes strict liability - i.e., a defendant may be liable even if she did not intend to injure anyone. Id.

56. The UCL "governs 'anti-competitive business practices' as well as injuries to consumers, and has as a major purpose the preservation of fair business competition.'" *Cel-Tech, 20 Cal. 4th at 180*.

57. *Section 17200* defines unfair competition to include any "unfair" business practice. The California Supreme Court has specifically defined "unfair" in the context of competitor actions, in which the plaintiff claims that it "suffered injury from a direct competitor's 'unfair' act or practice." *Cel-Tech, 20 Cal. 4th at 187*. In the competitor

context, "unfair" refers to "conduct that threatens an incipient violation of an ***antitrust law***, or **[*80]** violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." Id. The policy should be "tethered to a constitutional or statutory provision or a regulation carrying out statutory policy." *Id. at 185* (citation omitted). In the context of consumer actions — or actions by competitors "alleging other kinds of violations of the [UCL]," *id. at 187 n.12* — a different standard applies. Many California courts apply the rule that a business practice is "unfair" if "(1) the consumer injury is substantial; (2) the injury is not outweighed by any countervailing benefits to consumers or competition; and (3) the injury could not reasonably have been avoided by consumers themselves." *Klein v. Chevron U.S.A., Inc., 202 Cal. App. 4th 1342, 1376, 137 Cal. Rptr. 3d 293 (2012)* (citing *Camacho v. Auto. Club of S. Cal., 142 Cal. App. 4th 1394, 1403, 48 Cal. Rptr. 3d 770 (2006)* (distinguishing Cel-Tech)). Card Tech may not sue under the UCL to vindicate the rights of consumers. See *Cal. Bus. & Prof. Code § 17204* (stating that a UCL claim may be brought "by a person who has suffered injury in fact and has lost money or property **[*81]** as a result of the unfair competition").

58. Provenzano's use of infringing trademarks and trade dress, as well as her efforts to conceal the fact that she had sold her business to Card Tech, clearly "violates the policy or spirit of [the anti-trust] laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech, 20 Cal. 4th at 187*. The purpose underlying California's Unfair Practices Act, *Cal. Bus. & Prof. Code § 17000 et seq.*, California's anti-trust law, is "to foster and encourage competition, by prohibiting unfair, dishonest, deceptive, destructive, fraudulent and discriminatory practices by which fair and honest competition is destroyed or prevented." *Cal. Bus. & Prof. Code § 17001*. Provenzano's conduct clearly destroyed or prevented fair and honest competition by misleading the public as to the true source of her products, and by appropriating sales of Card Tech's goods as her own, thus denying Card Tech the ability to compete in the market. This conduct qualifies as "unfair" under the UCL. See *Cel-Tech, 20 Cal. 4th at 189* (concluding that practices violating *§ 17001* qualify as "unfair" under **[*82]** the UCL). Card Tech was harmed by this conduct, as evidenced by the decline in its sales. See *Cal. Bus. & Prof. Code § 17204*.

59. A court may enjoin any practice that constitutes unfair competition under the UCL. *Cal. Bus. & Prof. Code § 17203*.

Claim 9: Fraudulent Concealment

60. The elements of a fraudulent concealment claim are: "(1) the defendant must have concealed or suppressed a material fact, (2) the defendant must have been under a duty to disclose the fact to the plaintiff, (3) the defendant must have intentionally concealed or suppressed the fact with the intent to defraud the plaintiff, (4) the plaintiff must have been unaware of the fact and would not have acted as he did if he had known of the concealed or suppressed fact, and (5) as a result of the concealment or suppression of the fact, the plaintiff must have sustained damage." *Jones v. ConocoPhillips Co., 198 Cal. App. 4th 1187, 1198, 130 Cal. Rptr. 3d 571 (2011)* (citation omitted). The plaintiff bears the burden of proof by a preponderance of the evidence. *Liodas v. Sahadi, 19 Cal. 3d 278, 291, 137 Cal. Rptr. 635, 562 P.2d 316 (1977)*; *Sierra Nat'l Bank v. Brown, 18 Cal. App. 3d 98, 105, 95 Cal. Rptr. 742 (1971)*; see also *Cal. Evid. Code § 115*.

61. Provenzano was an officer and an employee of Card **[*83]** Tech. As either, she owed a fiduciary duty to Card Tech. *Diodes, Inc. v. Franzen, 260 Cal. App. 2d 244, 249, 67 Cal. Rptr. 19 (1968)*.

62. Provenzano concealed at least the following material facts from Card Tech: that she did not own the presat.com domain name, purchases of inventory used by Card Tech for her own account, orders from customers, shipments via her UPS '046 account not known to Card Tech and for which she did not provide reports, deposits of payments intended for Card Tech into her '207 bank account that were not authorized by Card Tech and for which she never provided any statements, the creation, and/or the preparation to create, new websites. She concealed all these things knowingly and intentionally. Provenzano understood that she had an obligation to keep Card Tech informed of her business activities.

63. Card Tech did not know of those activities and could not reasonably have discovered them without an investigation.

64. Card Tech has established by a preponderance of the evidence that Provenzano concealed the deposits made to the '207 account with the intent to defraud Card Tech. Provenzano transferred money from her '207 account into the Card Tech-authorized '277 account in March **[*84]** and April that far exceeded the amounts transferred in any prior months. The great increase in transfers combined with the questions that Card Tech was asking is evidence that Provenzano made the transfers only when she believed that Card Tech would find out about her diversion if the money was not transferred to the '277 account.

65. The $20,000 that Provenzano admits she failed to transfer to Card Tech's account constitutes damages.

Claim 11: Conversion

66. The "essential elements of a conversion action . . . are the plaintiff's ownership or right to possession of the property at the time of the conversion; the defendant's conversion by a wrongful act or disposition of property rights; and damages." *Shopoff & Cavallo LLP v. Hyon, 167 Cal. App. 4th 1489, 1507, 85 Cal. Rptr. 3d 268 (2008)* (internal quotation marks and citation omitted). Any act of dominion wrongfully exerted over the personal property of another is conversion. *Plummer v. Day/Eisenberg, LLP, 184 Cal. App. 4th 38, 50, 108 Cal. Rptr. 3d 455 (2010)*. It is not necessary for conversion that there be a manual taking of the property; any assumption of control or ownership over the property, or application of the property to the alleged converter's own use, is conversion. **[*85]** Id.; *Shopoff & Cavallo, 167 Cal. App. 4th at 1507*. Money can be the subject of a cause of action for conversion if there is a "specific, identifiable sum involved, such as where an agent accepts a sum of money to be paid to another and fails to make the payment." *PCO, Inc. v. Christensen, Miller, Fink, Jacobs, Glaser, Weil & Shapiro, LLP, 150 Cal. App. 4th 384, 395, 58 Cal. Rptr. 3d 516 (2007)*.

67. Provenzano accepted a fixed sum of money — approximately $20,000 — for payment of Card Tech goods shipped to fill an order.

68. Provenzano does not dispute that she exercised and continues to exercise dominion over at least $20,000 of Card Tech's money.

69. Provenzano's exercise of dominion is wrongful. She is not entitled to retain the funds even if Card Tech owed her money under *California Labor Code §§ 203* and *2802*. Rights to penalties under *§ 203* do not vest until the employee brings an enforcement action. *Pineda v. Bank of Am., N.A., 50 Cal. 4th 1389, 1402, 117 Cal. Rptr. 3d 377, 241 P.3d 870 (2010)*; *Murphy v. Kenneth Cole Prods., Inc., 40 Cal. 4th 1094, 1108, 56 Cal. Rptr. 3d 880, 155 P.3d 284 (2007)*. And even if the funds owed under *§ 2802* constitute wages in which Provenzano has a vested interest, California law suggests that she must file either a judicial action or an administrative **[*86]** action to recover the funds. *Reynolds v. Bement, 36 Cal. 4th 1075, 1084, 32 Cal. Rptr. 3d 483, 116 P.3d 1162 (2005)*, abrogated on other grounds by *Martinez v. Combs, 49 Cal. 4th 35, 50 n.12, 109 Cal. Rptr. 3d 514, 231 P.3d 259 (2010)*. Defendants provide no support for the claim that Provenzano could rightfully retain the funds.

70. As an officer and an employee of Card Tech, Provenzano was an agent of Card Tech. An agent "is ordinarily liable for converting the funds of [her] principal when [she] refuses to account for them upon proper demand. While it is true that money cannot be the subject of an action for conversion unless a specific sum capable of identification is involved, it is not necessary that each coin or bill be earmarked. When an agent is required to turn over to [her] principal a definite sum received by [her] on [her] principal's account, the remedy of conversion is proper." *Fischer v. Machado, 50 Cal. App. 4th 1069, 1072, 58 Cal. Rptr. 2d 213 (1996)*.

71. Initially the sum over which Provenzano exercised dominion without authority (deposits to the '207 account not promptly transferred to the '277 account) was considerably in excess of $20,000. Eventually, after some months and after Card Tech began asking probing questions for information, Provenzano paid over all **[*87]** except at least $20,000. Provenzano is liable to Card Tech in that amount.

Claim 12: Intentional interference with prospective economic advantage

72. The elements of the tort of intentional interference with prospective economic advantage are: "(1) an economic relationship between the plaintiff and a third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) an intentional act by the defendant, designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm to the plaintiff proximately caused by the defendant's wrongful act, including an intentional act by the defendant that is designed to disrupt the relationship between the plaintiff and a third party." *Edwards v. Arthur Andersen LLP, 44 Cal. 4th 937, 944, 81 Cal. Rptr. 3d 282, 189 P.3d 285 (2008)*. "The plaintiff must also prove that the interference was wrongful, independent of its interfering character." Id. (citing *Della Penna v. Toyota Motor Sales, U.S.A., Inc., 11 Cal. 4th 376, 392-93, 45 Cal. Rptr. 2d 436, 902 P.2d 740 (1985))*.

73. Provenzano knew Card Tech's customers - she had conveyed her rights to the customer list and their sales records - and she was selling Card Tech products to **[*88]** those customers. She also knew there was a probability that the customers would continue dealing with Card Tech. Provenzano intended to disrupt Card Tech's business relationship and deal with the customers herself.

74. Soliciting business in competition is not wrongful unless by action that is wrongful in and of itself. *Reeves v. Hanlon, 33 Cal. 4th 1140, 1150, 17 Cal. Rptr. 3d 289, 95 P.3d 513 (2004)*; *Della Penna, 11 Cal. 4th at 392-93*. Using business information that had been conveyed to Card Tech is wrongful in and of itself. See, e.g., *Tri-Growth Centre City, Ltd. v. Silldorf, Burdman, Duignan & Eisenberg, 216 Cal. App. 3d 1139, 1154, 265 Cal. Rptr. 330 (1989)* (stating that use of confidential information, or breach of fiduciary duty, is wrongful in and of itself). Infringement of Card Tech's trade dress and trademarks is wrongful in and of itself.

75. However, Card Tech has provided no evidence that it lost a single sale or lost a single customer as a result of Provenzano's wrongful conduct. Nor does it provide evidence of any damage at all. Therefore, Card Tech cannot prevail on this claim. See, e.g., *Reeves, 33 Cal. 4th at 1146-48* (affirming a judgment for the plaintiffs where former employees of a firm persuaded nine employees to **[*89]** leave, causing the firm to spend more than $20,000 for employee recruitment to mitigate damages, and solicited the business of the firm's clients, causing 144 of them to fail to pay fees they owed the firm); *Little v. Amber Hotel Co., 202 Cal. App. 4th 280, 305, 136 Cal. Rptr. 3d 97 (2011)* (affirming the award of lost profits where the evidence showed that the defendant's misconduct ended the plaintiff's profitable relationship with identified individuals); *Guillory v. Godfrey, 134 Cal. App. 2d 628, 632, 286 P.2d 474 (1955)* (rejecting the claim that a damage award was not supported by evidence of lost profits because the plaintiff had provided evidence of medical expenses resulting from physical illness resulting from the defendants' conduct).

Claim 13: Defamation

76. Libel is a form of defamation. See *Cal. Civ. Code § 44(a)*. Libel is "a false and unprivileged publication . . . which exposes any person to hatred, contempt, ridicule, or obloquy, or which causes him to be shunned or avoided, or which has a tendency to injure him in his occupation." Id. *§ 45*. "A corporation can be libeled by statements which injure its business reputation." *Barnes-Hind, Inc. v. Superior Court, 181 Cal. App. 3d 377, 381, 226 Cal. Rptr. 354 (1986)*.

77. Libel that **[*90]** is "defamatory of the plaintiff without the necessity of explanatory matter" is libel per se. *Barnes-Hind, 181 Cal. App. 3d at 382*. Where a statement is libel per se, damage to reputation is presumed, and the plaintiff need not show actual damage.

78. Provenzano's statement that Card Tech "swindled" her out of her business is libel per se. The statement is false. There is no evidence that Card Tech swindled her out of her business or was trying to turn vendors against

her. Not continuing to pay on a note when there is a dispute whether payment continues to be due is not "swindling."

79. A false accusation of "swindling" is an accusation of a crime or of fraud. *People v. Berry, 191 Cal. 109, 122, 215 P. 74 (1923)*; Black's Law Dictionary (9th ed. 2009). Such a statement could have a tendency to injure Card Tech in its occupation and to discourage others from associating or dealing with it.

80. However, Card Tech has not established that any recipient of the emails knew Provenzano was referring to Card Tech or Farrar. Therefore, Card Tech cannot prevail on this claim.

Card Tech is entitled to Provenzano's "infringer profits"

81. Card Tech is entitled to Provenzano's "infringer profits" on sales up to **[*91]** November 7, 2011, the date the preliminary injunction issued - profit from sales after November 7 are being awarded pursuant to the Contempt Order. In this case, that profit is Provenzano's gross receipts, because she did not produce any admissible evidence of deductible costs.

82. An award of infringer profits in a trademark case is a statutory remedy. "In addition to actual damages, *Section 1117(a)* expressly provides for an award of defendant's profits, subject to the principles of equity." *Hansen Beverage Co. v. Vital Pharm., Inc., 2010 U.S. Dist. LEXIS 79218, 2010 WL 3069690, at *8 (S.D. Cal. Aug. 3, 2010)*; see also *Lindy Pen Co. v. Bic Pen Corp., 982 F.2d 1400, 1405 (9th Cir. 1993)* ("The Supreme Court has indicated that an accounting of profits follows as a matter of course after infringement is found by a competitor. Nonetheless, an accounting of profits is not automatic and must be granted in light of equitable considerations." (citations omitted)), superseded on other grounds by *Pub. L. No. 106-43, § 3(b), 113 Stat. 219 (Aug. 5, 1999)*.

83. The Ninth Circuit has recognized three justifications for awarding an infringer's profits: (1) compensating the plaintiff for diverted sales; (2) preventing unjust enrichment; **[*92]** and (3) serving as a deterrent to infringers. *Maier Brewing Co. v. Fleischmann Distilling Corp., 390 F.2d 117, 123 (9th Cir.1968)*.

84. To support an award of profits, a plaintiff must prove that the defendant's infringement was willful. *Adray v. Adry-Mart, Inc., 76 F.3d 984, 988 (9th Cir. 1996)* (noting that a plaintiff need not prove willfulness when lost profits are merely used a proxy for estimating the plaintiff's actual damages); *Lindy Pen, 982 F.2d at 1405*; *Maier, 390 F.2d at 123*. The infringement must be "willfully calculated to exploit the advantage of an established mark." *Lindy Pen, 982 F.2d at 1405* (citation omitted).

85. The Ninth Circuit has suggested that where infringement is deliberate and willful, a remedy no greater than an injunction is insufficient. See *Playboy Enters., Inc. v. Baccarat Clothing Co., Inc., 692 F.2d 1272, 1274 (9th Cir. 1982)* ("[A]n award of little more than nominal damages would encourage a counterfeiter to merely switch from one infringing scheme to another as soon as the infringed owner became aware of the fabrication. Such a method of enforcement would fail to serve as a convincing deterrent to the profit maximizing entrepreneur who engages in trademark **[*93]** piracy."); see also *Lindy Pen, 982 F.2d at 1405*. The Ninth Circuit has also stated that making acts of deliberate trademark infringement unprofitable - through the award of profits - accomplishes the purposes of the Lanham Act. *Maier Brewing, 390 F.2d at 123*.

86. Proof of actual injury is not required to recover profits. *Gracie v. Gracie, 217 F.3d 1060, 1068 (9th Cir.2000)*. When awarding profits, the plaintiff "is not . . . entitled to a windfall." *Bandag, Inc. v. Al Bolser's Tire Stores, Inc., 750 F.2d 903, 918 (Fed. Cir. 1984)*.

87. The award of profits is justified in this case. Provenzano deliberately continued to operate the very business, using the very trademarks, trade dress, and goodwill that she conveyed to Card Tech. There can be no doubt here that Provenzano did not act in a good faith belief in her right to use the marks and trade dress. Although there is little evidence of fraudulent inducement, Provenzano clearly regretted her decision to sell her business and eventually decided Card Tech had "stolen" it from her. Provenzano intentionally sought to exploit the trademarks,

trade dress, and goodwill that she had conveyed to Card Tech, and her testimony that she did not know **[*94]** she was acting wrongfully is false. Further, Provenzano not only deliberately infringed on Card Tech's trademarks and trade dress, but she then violated the Court's preliminary injunction barring that conduct. Under the circumstances of this case, a judgment limited to an injunction is clearly inadequate.

88. In computing defendant's profits, the defendant has the burden of proof as to the allowance of any deductions or costs from its gross sales. *15 U.S.C. § 1117(a)*; *Mishawaka Rubber & Woolen Mfg. Co. v. S. S. Kresge Co., 316 U.S. 203, 206-07, 62 S. Ct. 1022, 86 L. Ed. 1381, 1942 Dec. Comm'r Pat. 767 (1942)*. There is a presumption that an infringer's sale of infringing products resulted from the infringement and not from another cause. See *Mishawaka Rubber, 316 U.S. at 207* ("In the absence of his proving to the contrary, it promotes honesty and comports with experience to assume that the wrongdoer who makes profits from the sales of goods bearing a mark belonging to another was enabled to do so because he was drawing upon the good will generated by that mark."). Where the defendant fails to establish allowable deductions, courts will award gross sales. *Id. at 206-07*; *WMS Gaming Inc. v. WPC Prods. Ltd., 542 F.3d 601, 609 (7th Cir. 2008)*.

89. **[*95]** It is Defendants' burden to prove (1) which, if any, of their sales were not attributable to the wrongful act, and (2) deductible costs and expenses to arrive at net profits. *15 U.S.C. § 1117(a)*; *Mishawaka Rubber, 316 U.S. at 206-07*. In discovery, Provenzano claimed to have no records, and she did not produce any at trial. Any doubts about the actual amount of gross sales or profits are resolved against the infringing party. See *Louis Vuitton S.A. v. Spencer Handbags Corp., 765 F.2d 966, 972 (2d Cir. 1985)* (concluding that the district court did not clearly err in finding sufficient evidence of profits where the defendants stated in a videotaped interview that they earned $3.00 to $3.50 on every $18.00 counterfeit bag they sold, and that they purchased a certain amount of counterfeit bags every week for a period of months).

90. Provenzano did not present sufficient evidence that her nonwebsite sales were not attributable to Card Tech's goodwill in the industry. Where there is evidence that a percentage of the infringer's sales resulted from something other than infringement, apportionment of profits may be proper. See, e.g., *Holiday Inns, Inc. v. Airport Holiday Corp., 493 F. Supp. 1025, 1027-28 (N.D. Tex. 1980)* **[*96]** (awarding the plaintiff 30% of the profits made by a hotel that wrongfully used a sign bearing the plaintiff's mark where the defendant testified that 30% of the hotel's profits resulted from transient patrons reading the sign, and that 70% was "weekly trade" that resulted from the defendant's personal efforts to drum up business by knocking on doors in the community), aff'd *683 F.2d 931 (5th Cir. 1982)*; but see *Truck Equip. Serv. Co. v. Fruehauf Corp., 536 F.2d 1210, 1222 (8th Cir. 1976)* (concluding in a willful infringement case that equity required awarding all profits, regardless of a market report indicating that only 20% of the defendant's profits resulted from the appearance of the infringing product or customers' knowledge of the plaintiff's mark). Defendants presented evidence that only 10% of their sales resulted from website orders. However, this does not show by a preponderance of the evidence that telephone orders did not result from Card Tech's goodwill. That a customer placed an order by phone does not mean that the customer never viewed the website.

91. Provenzano did not present any evidence of deductible costs. Evidence of Card Tech's profit margin in 2010, or of Prodeen's **[*97]** profit margin in 2009 (before it was purchased by Card Tech), does not constitute evidence of Provenzano's profit margin after her employment with Card Tech terminated. An invoice from P3 was received into evidence. Exhibit 18. An invoice, that presumably must be paid before the goods are received, is sufficient proof of a single deductible cost. *Tamko Roofing Prods., Inc. v. Ideal Roofing Co., 282 F.3d 23, 39 (1st Cir. 2002)*; *Bambu Sales, Inc. v. Ozak Trading, 58 F.3d 849 (2d Cir. 1995)*. However, the invoice is from 2010, and therefore is not relevant to determining Provenzano's profits from May through November 2011.

This case is exceptional—Card Tech is entitled to attorney's fees attributable to the trademark and trade dress claims

92. The Lanham Act permits the award of attorney's fees in exceptional cases. *15 U.S.C. § 1117(a)*.

93. There is no statutory definition of an exceptional case. The Ninth Circuit defines a case as exceptional when the non-prevailing party's case is groundless, unreasonable, vexatious or pursued in bad faith. *Gracie, 217 F.3d. at 1071* (quoting *Interstellar Starship Servs., 184 F.3d at 1112*). The standard applies equally to prevailing defendants and prevailing **[*98]** plaintiffs. Id. Conclusory, unsupported statements that a party acted in bad faith are not sufficient to support the award of attorney's fees. Id. However, actual evidence of willful infringement has been held sufficient to support an award of attorney's fees. *Intel Corp. v. Terabyte Int'l, 6 F.3d 614, 622 (9th Cir. 1993)*. The district court, as a trier of fact, may find bad faith. Id.

94. As stated previously, Provenzano's conduct clearly constituted willful infringement. Provenzano intentionally used the trademarks and trade dress she had conveyed to Card Tech for her own benefit. The Court finds that her testimony that she did not know such use was wrongful is not credible. Therefore, her defense is groundless and unreasonable. Furthermore, Provenzano deliberately continued her infringing conduct in violation of the preliminary injunction. The Court finds that Provenzano acted in bad faith and with the intent to harm Card Tech. This is an exceptional case in which the award of attorney's fees is appropriate.

Sharyn Provenzano is personally liable

95. Provenzano committed the wrongful conduct individually. To the extent wrongful conduct was committed by Prodeen Inc., Provenzano knew **[*99]** of, authorized, directed, consented to, and actively participated in the wrongful conduct of Prodeen, Inc. Provenzano was and is the sole person through whom Prodeen, Inc. operated.

96. Directors or officers of a corporation incur personal liability for torts of the corporation if they participate in the wrong or authorize or direct that it be done. *U.S. Liab. Ins. Co. v. Haidinger-Hayes, Inc., 1 Cal. 3d 586, 595, 83 Cal. Rptr. 418, 463 P.2d 770 (1970)*. In other words, "an officer or director will not be liable for torts in which he does not personally participate, of which he has no knowledge, or to which he has not consented. While the corporation itself may be liable for such acts, the individual officer or director will be immune unless he authorizes, directs, or in some meaningful sense actively participates in the wrongful conduct." *Seagate Tech. v. A. J. Kogyo Co., 219 Cal. App. 3d 696, 701, 268 Cal. Rptr. 586 (1990)* (alterations omitted).

97. Provenzano is personally liable for the acts of Prodeen, Inc.

B. Defendant's counter-claims

Counter-claim 1: Money due on promissory note

98. When several documents are executed together for one transaction, the documents are construed together as one instrument. *Handy Boat Serv., Inc. v. Prof'l Servs., Inc., 1998 ME 134, 711 A.2d 1306, 1308 (Me. 1998)*; **[*100]** *Margolis v. Margolis, 115 Cal. App. 2d 131, 136, 251 P.2d 396 (1952)*. Thus, the promissory note must be read together with the Asset Purchase Agreement.

99. Card Tech has not paid all of the money due on the promissory note.

100. To prevail on a breach of contract claim, the plaintiff must show (1) a valid contract existed, (2) performance, or excuse of performance, by the plaintiff, (3) a breach of obligations by the defendant, and (4) damages. *Jenkins, Inc. v. Walsh Bros., 2001 ME 98, 776 A.2d 1229, 1234-35 (Me. 2001)*; *Wall Street Network, Ltd. v. N.Y. Times Co., 164 Cal. App. 4th 1171, 1178, 80 Cal. Rptr. 3d 6 (2008)*. To excuse performance by one party to a contract, the breach by the other party must be material. *Jenkins, 776 A.2d at 1234*; *Brown v. Grimes, 192 Cal. App. 4th 265, 277, 120 Cal. Rptr. 3d 893 (2011)*. A "material" breach is the non-performance of a duty "that is so material and important as to justify the injured party in regarding the whole transaction as at an end." *Jenkins, 776 A.2d at 1234* (finding material breach of a construction contract where the contractor failed to maintain necessary working

conditions at the job site); Associated Builders, Inc. v. Coggins, 1999 ME 12, 722 A.2d 1278, 1280-81 (Me. 1999) (finding that a three-day delay in **[*101]** payment was not a material breach).

101. Provenzano failed to perform material obligations - for example, she failed to deliver all rights and domain names to presat.com, used for her own purposes trademarks and business information that she had conveyed to Card Tech for its exclusive use, failed to report sales, provided inaccurate information of sales and shipments, and did not devote her exclusive attention to Card Tech's business.

102. Card Tech is excused from further performance under the promissory note.

103. The Court finds for Card Tech on this claim.

Counter-claim 2: Breach of contract — termination without just cause

104. The Employment Agreement must be read together with the Asset Purchase Agreement. *Margolis, 115 Cal. App. 2d at 136*.

105. California law applies to this counter-claim. The Employment Agreement's choice-of-law agreement (providing that Maine law applies) is not applicable because the counter-claim is based on Provenzano's unwaivable rights under the California Labor Code. See *Perry v. AT&T Mobility LLC, 2011 U.S. Dist. LEXIS 102334, 2011 WL 4080625, at *5 (N.D. Cal. Sept. 12, 2011)* (citing *Gentry v. Superior Court, 42 Cal. 4th 443, 465, 64 Cal. Rptr. 3d 773, 165 P.3d 556 & n.8 (2007)* and *Armendariz v. Found. Health Psychcare Servs., Inc., 24 Cal. 4th 83, 98-99, 99 Cal. Rptr. 2d 745, 6 P.3d 669 (2000)*, **[*102]** overruled on other grounds by *AT&T Mobility LLC v. Concepcion, 131 S. Ct. 1740, 1748-49, 179 L. Ed. 2d 742 (2011))*.

106. Provenzano's employment was for a specified term under the Employment Agreement. "An employment for a specified term may be terminated at any time by the employer in case of any willful breach of duty by the employee in the course of his employment . . . ." *Cal. Lab. Code §2924*. To establish that its termination of Provenzano was justified, Card Tech must prove that Provenzano willfully breached the Employment Agreement — it is not sufficient that Card Tech mistakenly believed that Provenzano breached the agreement. *Khajavi v. Feather River Anesthesia Med. Grp., 84 Cal. App. 4th 32, 57, 100 Cal. Rptr. 2d 627 (2000)* (considering an oral contract for a specified term); cf. *Cotran v. Rollins Hudig Hall Int'l, Inc., 17 Cal. 4th 93, 95, 69 Cal. Rptr. 2d 900, 948 P.2d 412 (1998)* (concluding that an employer's reasonable, though mistaken, belief, reached after an adequate investigation, was sufficient to justify discharge where there was an implied agreement, not for a specified term, that an employee not be dismissed except for good cause).

107. Provenzano could only be terminated for "Just Cause" pursuant to the Employment Agreement. The Court has **[*103]** previously found that Provenzano materially breached the Asset Purchase Agreement by failing to convey ownership of the preset.com domain name. A material breach of the Asset Purchase Agreement is specified as "Just Cause" for termination in the Employment Agreement, and the evidence establishes that this breach by Provenzano was willful. Card Tech need not prove any further grounds for termination. Card Tech further proved, however, that Provenzano was dishonest with Card Tech in that she, *inter alia*, affirmatively misrepresented to Card Tech that the presat.com website had been hacked, concealed the fact that she was ordering inventory for her own sales, and concealed her true nature of her interaction with Disko. Card Tech also established that Provenzano misappropriated company assets, and provided inaccurate reports. These breaches constitute just cause for termination, and Card Tech has established that these breaches were willful.

108. Termination of the Employment Agreement excused any further performance by Card Tech. *Brown, 192 Cal. App. 4th at 277*.

Counter-claim 3: Failure to pay overtime

109. Under California wage and hour law, an employer is not required to pay an employee **[*104]** overtime pay for overtime work on behalf of the employer if the employee spends more than half of his or her time doing work that comes within specified exemptions. The employer claiming the exemption bears the burden of proving that the employee is exempt. *Kettenring v. L.A. Unified Sch. Dist., 167 Cal. App. 4th 507, 513, 84 Cal. Rptr. 3d 196 (2008)*.

110. The applicable exemption is the Administrative Exemption: California Industrial Welfare Commission Order 4-2001 ("Wage Order 4") § 1(A)(2). Provenzano's work for Card Tech is subject to that exemption. Findings of Fact ¶ 24; Wage Order 4 § 1(A)(2)(a)(i), (A)(2)(b), (A)(2)(e), and (A)(2)(f). As a result, Card Tech was not required to pay Provenzano overtime.

111. Card Tech was not required to provide Provenzano with *any* pay, much less overtime pay, for time she spent doing her own business rather than Card Tech's. Wage Order 4, § 1.

112. The employee bears the burden of proving that she performed work for which she was not sufficiently compensated. *Eicher v. Advanced Bus. Integrators, Inc., 151 Cal. App. 4th 1363, 1377, 61 Cal. Rptr. 3d 114 (2007)*.

113. Ordinarily, the employer must keep track of the amount of time a non-exempt employee works. Here, there is no dispute that Provenzano **[*105]** worked autonomously. Indeed, this is her defense to many of Card Tech's claims. She also had autonomy to take time off as she wished. Moreover, it is apparent that Provenzano was working for herself at the same time she was working for Card Tech. Even if Card Tech had kept records, the information could only have been provided by Provenzano herself because Card Tech had no ability to keep track of the hours she worked.

114. Provenzano did not keep any record of time she spent working for Card Tech versus time she spent on her personal matters. Provenzano never asserted she was working overtime until Card Tech began raising issues about her conduct. Provenzano produced no documentary evidence that she spent more than 40 hours per week working for Card Tech. The Court finds Provenzano's testimony to that effect is not credible. The Court concludes that Provenzano was not working more than 40 hours per week for Card Tech. Findings of Fact ¶¶ 58-67.

115. Thus, even if Provenzano were eligible for overtime pay, Provenzano simply did not present credible evidence that she is entitled to any.

Counter-claim 4: Waiting time penalties

116. Under California wage and hour law, waiting time penalties **[*106]** are awardable only if the employer *willfully* fails to pay a departing employee all wages due at the time of termination. *Cal. Lab. Code § 203(a)*. No waiting time penalties are awardable if the employer believes in good faith that it has valid defenses to the departing employee's claims for additional pay. *Armenta v. Osmose, Inc., 135 Cal. App. 4th 314, 325, 37 Cal. Rptr. 3d 460 (2005)*.

117. Card Tech had a good faith basis to believe that no additional payments were due to Provenzano at the time she was terminated because Provenzano had deliberately withheld funds and therefore had dishonestly and willfully caused losses to Card Tech. See Wage Order 4 § 8 (providing that deductions from an employee's wages are permissible where a cash shortage, breakage, or loss was caused "by a dishonest or willful act, or by the gross negligence of the employee"). In fact, the Court finds that Provenzano did just that.

118. At trial Ms. Provenzano alluded to vacation pay. However, she acknowledged that she could take time off whenever and for whatever reason she wanted. Provenzano did not present any credible evidence that she was owed vacation pay. There is evidence that she took time off for personal matters. Indeed, **[*107]** the trip to Europe appears to have been, at least in part, for Provenzano's personal business in violation of her duties to Card Tech. At the very least, this would qualify as vacation.

119. In any event, because the Court finds no additional payments were due Provenzano at the time she was terminated, Provenzano cannot prevail on this claim.

Counter-claim 5: Expenditures

120. Provenzano's claim that she has incurred business expenses on behalf of Card Tech, but that the company has wrongfully refused to reimburse her for them, is governed by ordinary common law principles of contract law.

121. There was no reason for her to retain an attorney to represent her regarding a claim of patent infringement that Card Tech had already amicably resolved with the claimant.

122. Provenzano was told to keep expenses within reason on the trip to Europe. At least certain expenses (e.g., chauffeured limousine, hotel) were not reasonable on their face. Shortly after her return, Card Tech was suspicious of Provenzano's activities in general — and rightly so. Provenzano used the trip for her personal benefit — to make a deal with Disko to be its exclusive distributor in the United States.

123. A plaintiff **[*108]** claiming reimbursement for necessary expenditures bears the burden of proving recoverable expenses. *Cassady v. Morgan, Lewis & Bockius LLP, 145 Cal. App. 4th 220, 239, 51 Cal. Rptr. 3d 527 (2006)*. Provenzano has failed to carry this burden. Card Tech provided Provenzano ample opportunity to prove that the expense items she now claims were in fact incurred in the course and scope of her work for Card Tech and were reasonable in amount. While a portion of the trip expenses may be justified as both reasonable and for the benefit of Card Tech, Provenzano has not provided such proof. Accordingly, Card Tech has not violated any obligation to reimburse her for Card Tech business expenses, and Provenzano cannot prevail on this claim.

Counter-claim 6: Alter ego

124. Alter ego is not a separate claim for relief. *Leek v. Cooper, 194 Cal. App. 4th 399, 418, 125 Cal. Rptr. 3d 56 (2011)*. It is a basis for liability. Provenzano has not proven facts that establish that Card Tech was the alter ego of Norman Farrar. In any event, Provenzano has not established that she is entitled to any relief, so the claim is moot.

CONCLUSION

Card Tech's Claims

Claim 1: Breach of Contract

125. The Court finds for Card Tech on the breach of contract claim. Defendants **[*109]** are liable to Card Tech in the amount of $6,000.

Claim 2: Fraudulent Inducement

126. The Court finds for Defendants on the fraudulent inducement claim.

Claims 4 and 5: Unfair Competition — trademark and trade dress infringement

127. The Court finds for Card Tech on the trademark and trade dress infringement claims. Defendants are liable for profits in the amount of $167,022. Defendants are permanently enjoined from the conduct described in the separate judgment. Card Tech is entitled to attorney's fees in an amount to be determined.

Claim 6: Unfair Competition — state law

128. The Court finds for Card Tech on the state law unfair competition claim. Defendants are permanently enjoined from the conduct described in the separate judgment.

Claim 9: Fraudulent Concealment

129. The Court finds for Card Tech on the fraudulent concealment claim. Defendants are liable to Card Tech in the amount of $20,000.

Claim 11: Conversion

130. The Court finds for Card Tech on the conversion claim. The damages on this claim are the same as the damages on Card Tech's fraudulent concealment claim.

Claim 12: Intentional interference with prospective economic advantage

131. The Court finds for Defendants on the intentional **[*110]** interference with prospective economic advantage claim.

Claim 13: Defamation

132. The Court finds for Defendants on the defamation claim.

Defendants' Counter-claims

Counter-claim 1: Money due on promissory note

133. The Court finds for Card Tech on this counter-claim.

Counter-claim 2: Breach of contract

134. The Court finds for Card Tech on this counter-claim.

Counter-claim 3: Failure to pay overtime

135. The Court finds for Card Tech on this counter-claim.

Counter-claim 4: Waiting time penalties

136. The Court finds for Card Tech on this counter-claim.

Counter-claim 5: Expenditures

137. The Court finds for Card Tech on this counter-claim.

Counter-claim 6: Alter ego

138. The Court finds for Card Tech on this counter-claim.

United States District Judge

JUDGMENT

The Court having conducted a trial of this case, and having reviewed the evidence submitted by the parties that it deemed relevant, and having issued its Findings of Fact and Conclusions of Law,

It is hereby ORDERED, ADJUDGED, AND DECREED that judgment be entered as follows:

- In favor of Card Tech on the First claim for breach of contract,
- In favor of Defendants on the Second claim for fraudulent **[*111]** inducement,
- In favor of Card Tech on the Fourth claim for trade dress infringement,
- In favor of Card Tech on the Fifth claim for trademark infringement,
- In favor of Card Tech on the Sixth claim for unfair competition under California law,
- In favor of Card Tech on the Ninth claim for fraudulent concealment,
- In favor of Card Tech on the Eleventh claim for conversion,
- In favor of Defendants on the Twelfth claim for intentional interference with prospective economic advantage,
- In favor of Defendants on the Thirteenth claim for defamation,
- In favor of Card Tech on Defendants' First Counter-claim for money due on a promissory note,
- In favor of Card Tech on Defendants' Second Counter-claim for breach of contract,
- In favor of Card Tech on Defendants' Third Counter-claim for failure to pay overtime compensation,
- In favor of Card Tech on Defendants' Fourth Counter-claim for waiting-time penalties,
- In favor of Card Tech on Defendants' Fifth Counter-claim for indemnification for expenditures, and
- In favor of Card Tech on Defendants' Sixth Counter-claim for alter ego.

Plaintiff's Third, Seventh, Eighth, and Tenth claims were resolved between the parties prior to trial, and these claims **[*112]** are therefore dismissed.

Plaintiff shall recover from Defendants $20,000 in deposits for Card Tech's sales, $6000 as damages that have been, and will be incurred, in creating a new website, and $167,022 in Defendants' profits. The total amount awarded to Plaintiff is $193,022.00. Post-judgment interest shall accrue and be calculated in accordance with *28 U.S.C. § 1961(a)* and shall be calculated from the date of entry of judgment. Plaintiff shall recover its reasonable attorney's fees in an amount to be determined.

The Court having found that Defendants committed trademark and trade dress infringement in violation of the Lanham Act, *15 U.S.C. § 1125(a)*, and California's Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, Defendants are ordered to discontinue use of the term "Diamond Technology" - and any terms confusingly similar thereto, including, but not limited to, "Diamond Ice Technology" - as well as use of all pictures and phrases that typically appear with that mark. Defendants are also ordered to discontinue use of the terms "Proven Products" and "PreSat," as well as any terms confusingly similar thereto. Defendants are further enjoined from using - in their packaging, their **[*113]** website, or in any other capacity - the subject trade dress, or any trade dress that emulates the overall impression of the subject trade dress, including through the particular arrangement of product name, instructions for use, and visual depictions, together with Plaintiff's use of colored shapes and borders.

Plaintiff is awarded costs of suit pursuant to a bill of costs filed in accordance with *28 U.S.C. § 1920*.

Dated: 6/7/12

867 F. Supp. 2d 76 *; 2012 U.S. Dist. LEXIS 79287 **; 2012 WL 2054882

GEORGE R. HUGHES, Plaintiff, v. VINCENT ABELL, et al., Defendants.

Prior History: *Hughes v. Abell, 634 F. Supp. 2d 110, 2009 U.S. Dist. LEXIS 62495 (D.D.C., July 20, 2009)*

Core Terms

mortgage, counterclaims, equitable subrogation, quiet title, documents, alleges, unjust enrichment, material fact, misrepresentation, deed, summary judgment, argues, contends, lease, unconscionable, asserts, summary judgment motion, equitable lien, crossclaim, refinance, interest rate, own property, consumer, liens, no reasonable probability, equitable, damages, parties, mortgage deed, unclean hands

LexisNexis® Headnotes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate when the pleadings and the evidence demonstrate that there is no genuine issue as to any material fact and that the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)(2)*.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN2[] **Burdens of Proof, Movant Persuasion & Proof**

A party seeking summary judgment bears the initial responsibility of demonstrating the absence of a genuine dispute of material fact.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN3[] **Summary Judgment, Supporting Materials**

A moving party may successfully support its motion by identifying those portions of the pleadings, the discovery and disclosure materials on file, and any affidavits" which it believes demonstrate the absence of a genuine issue of material fact. *Fed. R. Civ. P. 56(c)(2)*.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN4[] **Summary Judgment, Evidentiary Considerations**

In determining whether there exists a genuine issue of material fact sufficient to preclude summary judgment, a court must regard the nonmovant's statements as true and accept all evidence and make all inferences in the nonmovant's favor.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Scintilla Rule

HN5[] **Burdens of Proof, Scintilla Rule**

On summary judgment, a non-moving party must establish more than the mere existence of a scintilla of evidence in support of its position.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN6[] **Burdens of Proof, Movant Persuasion & Proof**

By pointing to the absence of evidence proffered by the nonmoving party, a moving party may succeed on summary judgment.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN7[] **Summary Judgment, Entitlement as Matter of Law**

If the evidence is merely colorable, or is not significantly probative, summary judgment may be granted.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN8[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate if the nonmovant fails to offer evidence on which the jury could reasonably find for the nonmovant.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Banking Law > Consumer Protection > State Law > General Overview

HN9[] **Deceptive & Unfair Trade Practices, State Regulation**

The D.C. Consumer Protection Procedures Act, *D.C. Code § 28-3904(r)*, applies to real estate finance transactions. Whether a practice is unconscionable under this provision is determined by weighing several factors, including knowledge by the person at the time credit sales are consummated that there was no reasonable probability of payment in full of the obligation by the consumer, knowledge by the person at the time of the sale or lease of the inability of the consumer to receive substantial benefits from the property or services sold or leased, and that the person has knowingly taken advantage of the inability of the consumer reasonably to protect his interests. *D.C. Code § 28-3904(r)(1)*, *(2)*, *(5)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Banking Law > Consumer Protection > State Law > General Overview

HN10[] **Deceptive & Unfair Trade Practices, State Regulation**

The D.C. Consumer Protection Procedures Act, prohibits misrepresentations as to a material fact which has a tendency to mislead. *D.C. Code § 28-3904(e)*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Banking Law > Consumer Protection > State Law > General Overview

Civil Procedure > ... > Equity > Maxims > Clean Hands Principle

Governments > Legislation > Types of Statutes

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Unclean Hands

HN11[] **Deceptive & Unfair Trade Practices, State Regulation**

The defense of unclean hands does not fit comfortably with alleged violations of the D.C. Consumer Protection Procedures Act (CPPA), *D.C. Code § 28-3904*, which is a broad remedial statute intended to assure that a just mechanism exists to remedy all improper trade practices. A claim under the CPPA cannot be barred by the plaintiff's own misconduct.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Banking Law > Consumer Protection > State Law > General Overview

HN12[] **Deceptive & Unfair Trade Practices, State Regulation**

The D.C. Consumer Protection Procedures Act (CPPA), *D.C. Code § 28-3901*, is intended to promote fair business practices in the community at large, not just to resolve individual disputes between consumers and businesses. Accordingly, the CPPA expressly indicates that conduct may constitute a violation whether or not any consumer is in fact misled, deceived or damaged thereby, *D.C. Code § 28-3904*, and provides for the recovery of treble damages, *D.C. Code § 28-3905(k)(1)(A)*. Hence, as with federal ***antitrust law***, the statute operates through private enforcement via suits by affected consumers, but the statute is concerned with the deterrence effect on the general business community as well as with making individual consumers whole. That is why the statute allows for plaintiffs to recover treble damages and defines violations to include instances in which a consumer is not in fact misled, deceived, or damaged. *D.C. Code § 28-3904*. Similarly, the fact that an individual plaintiff may have engaged in inequitable conduct is not particularly relevant to the desired outcome of deterring unlawful behavior in the business community.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Banking Law > Consumer Protection > State Law > General Overview

HN13[] **Deceptive & Unfair Trade Practices, State Regulation**

The D.C. Consumer Protection Procedures Act prohibits misrepresentations as to a material fact which has a tendency to mislead. *D.C. Code § 28-3904(e)*.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN14[] **Business Torts, Fraud & Misrepresentation**

Opinions or predictions of future events do not constitute representations of material fact upon which a plaintiff successfully may place dispositive reliance for misrepresentation.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Banking Law > Consumer Protection > State Law > Remedies

Contracts Law > Remedies > Rescission & Redhibition > General Overview

HN15[] **Deceptive & Unfair Trade Practices, State Regulation**

Civil remedies available under the D.C. Consumer Protection Procedures Act include any relief which the court deems proper, which may include rescission. *D.C. Code § 28-3905(k)(1)(F)*.

Real Property Law > Title Quality > Adverse Claim Actions > Quiet Title Actions

HN16[] **Adverse Claim Actions, Quiet Title Actions**

A court's equitable powers allow it to quiet title in favor of a borrower if the lender's actions warrant that remedy.

Civil Procedure > Pleading & Practice > General Overview

HN17[] **Civil Procedure, Pleading & Practice**

Fed. R. Civ. P. 7 states that only these pleadings are allowed and then sets forth a list of pleadings that does not include counterclaims.

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

HN18[] **Pleadings, Counterclaims**

Fed. R. Civ. P. 13 requires that a counterclaim be set forth in a pleading.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN19[] **Pleadings, Amendment of Pleadings**

Once an amended pleading is interposed, the original pleading no longer performs any function in the case.

Civil Procedure > Pleading & Practice > Pleadings > Answers

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

HN20[] **Pleadings, Answers**

An answer and a counterclaim, even if contained in the same document, serve different functions; the counterclaim shares more with a complaint, setting out claims against the other party, than it does with the answer.

Evidence > Burdens of Proof > Clear & Convincing Proof

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN21[] **Burdens of Proof, Clear & Convincing Proof**

The essential elements of common law fraud are: (1) a false representation, (2) in reference to a material fact, (3) made with knowledge of its falsity, (4) with intent to deceive, and (5) on which reliance is placed. Fraud must be established by clear and convincing evidence.

Real Property Law > ... > Liens > Nonmortgage Liens > General Overview

HN22[] **Liens, Nonmortgage Liens**

Liens, whether equitable or legal, are merely a means to the end of satisfying a claim for the recovery of money.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN23[] **Types of Contracts, Quasi Contracts**

There can be no claim for unjust enrichment when an express contract exists between parties.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > Judgments > Entry of Judgments > Multiple Claims & Parties

HN24[] **Judges, Discretionary Powers**

Although there is no Federal Rule of Civil Procedure that expressly addresses motions for reconsideration, where a court's opinion does not fully adjudicate all the claims in the case, a reconsideration motion is properly characterized as a motion pursuant to *Fed. R. Civ. P. 54(b)*. Under *Fed. R. Civ. P. 54(b)*, where a court resolves fewer than all the claims, it may revise its opinion at any time before the entry of a judgment adjudicating all the claims and all the parties' rights and liabilities. A court has broad discretion to hear a motion for reconsideration brought under *Rule 54(b)*, and reconsideration is appropriate as justice requires. Considerations a court may take into account under the as justice requires standard include whether the court patently misunderstood the parties, made a decision beyond the adversarial issues presented, made an error in failing to consider controlling decisions or data, or whether a controlling or significant change in the law has occurred. Review under *Rule 54(b)* amounts to determining, within the court's discretion, whether reconsideration is necessary under the relevant circumstances.

Opinion by: JOHN D. BATES

Opinion

[*79] **MEMORANDUM OPINION**

Plaintiff George R. Hughes brings this action against Vincent Abell, Calvin Baltimore, Modern Management Company, and **[*80]** Wells Fargo Bank. His claims relate to two transactions involving Hughes' residence, a property in Washington, DC, which Hughes purchased in 1997. In 2004, Hughes transferred title to the property to Abell in a transaction also involving Baltimore and Modern Management. Then, in 2006, Hughes nonetheless entered into a mortgage transaction with Wells Fargo, not disclosing **[**2]** to Wells Fargo that he had previously transferred title to the property.

With respect to Abell, Baltimore, and Modern Management, Hughes brings claims for violations of the D.C. Consumer Protection Procedures Act ("CPPA"), the Truth in Lending Act ("TILA") and the Home Ownership and Equity Protection Act ("HOEPA"), a claim for common law fraud, and a claim for an equitable mortgage. With respect to Wells Fargo, Hughes alleges violations of the CPPA. Hughes maintains that he is the rightful owner of the residence and he seeks to quiet title with respect to both Abell and Wells Fargo. Wells Fargo asserts counterclaims against Hughes for equitable subrogation, equitable lien, unjust enrichment, fraud, and breach of contract, and against Abell for fraud, quiet title, equitable subrogation, and unjust enrichment. Abell asserts a crossclaim for quiet title against Wells Fargo.

Now before the Court are Wells Fargo's motion for summary judgment on its claims against the other parties and Abell's renewed motion for summary judgment on Hughes' claims against Abell and Modern Management. Although the numerous claims in this case belie easy description, Wells Fargo's primary contention is that the **[**3]** evidence in the record shows that Hughes was aware that Abell claimed ownership of the residence at the time that Hughes entered into the transaction with Wells Fargo. Wells Fargo argues that Hughes' knowledge should bar any recovery against Wells Fargo and also warrants judgment in Wells Fargo's favor on its claims. Abell, for his part, moves out of disagreement with this Court's prior decision rejecting his argument that Hughes' claims are barred by the statute of limitations.

For the reasons discussed below, the Court will grant Wells Fargo's motion in part and deny it in part. As described below, the Court has reached two primary conclusions at this stage of the proceedings. With respect to Wells Fargo's claims, the Court concludes that Hughes committed fraud against Wells Fargo. Nonetheless, the Court rejects Wells Fargo's assertion that Hughes' conduct bars his recovery under the CPPA. This claim will be permitted to proceed, but in more limited form than as alleged by Hughes' complaint.

There are many other issues in this case, some of which can also be resolved now based on the fraud determination. Others are also largely decided by the fraud decision, but technically cannot **[**4]** be resolved until the resolution of the CPPA claim or the resolution of the dispute between Hughes and Abell about the prior transaction. Many of these issues will nonetheless fall easily into place once the other claims in the case are resolved.

Accordingly, the Court will grant Wells Fargo's motion with respect to the fraud claim, as well as with respect to some, but not all, of Wells Fargo's other claims. For the reasons discussed below, the Court will also deny Abell's motion.

I. Background

a. Facts

Hughes purchased 5236 5th Street, NW, Washington, DC ("the Property") in November 1997. Am. Compl. [Docket Entry **[*81]** 53] ¶¶ 4, 9. He took out two mortgages against the Property in order to pay for it, the larger of the two from Chase Manhattan Bank. Id. ¶¶ 10, 12. After Hughes became delinquent on the larger loan in 2004, Chase Manhattan notified him that it would foreclose. Id. ¶¶ 13, 14. Hughes needed to pay arrears in the amount of $16,485.51, plus costs and fees, to prevent the auction of his home in September 2004. Id. ¶ 4. Prior to foreclosure, Calvin Baltimore, working with Abell and Modern Management, solicited Hughes's business and represented that he would help Hughes remain in his **[**5]** home. Id. ¶¶ 15-17, 24. Hughes signed a series of documents, the effect of which was to transfer title to the property to Abell, who then rented it back to Hughes. Id. ¶¶ 20, 25. Hughes alleges that he understood the transaction "as a way to retain ownership of his home." Id. ¶ 24.

The only papers Baltimore provided Hughes at the end of the transaction were a lease agreement and an option agreement. Id. ¶ 21. Baltimore told Hughes that he would provide him with copies of the other papers, but never did, despite Hughes's repeated attempts to contact Baltimore and obtain copies. Id. The lease agreement provided that Hughes would pay $1034.76 per month, which Hughes alleges that he believed would "cover his mortgage as well as the loan." Id. ¶ 20. Attached to the lease was an "Option Agreement" that provided that Hughes could purchase his home for $75,000.00 within the next year. Id. ¶ 22. Baltimore explained that Modern Management would help Hughes refinance the loan at the end of the year. Id. ¶ 20. Hughes also received $10,000.00 up front as part of this transaction. Id. Assuming Hughes borrowed $30,000 under this loan — the $10,000 payment and approximately $20,000 to cover arrears **[**6]** — the annual percentage rate would have been 122.57%, based on twelve monthly payments of $1034.76 and a final payment of $75,000. Id. ¶ 23. At the time of this transaction in September 2004, the property was worth $147,060, according to D.C. property tax assessment records. Id. ¶ 24.

Around August 2006, Hughes received notice from Chase Manhattan that it had changed his contact information to that of the offices of Modern Management. Id. ¶ 29. He also received notice from Modern Management that he was behind in his payments. Id. ¶ 30. Hughes approached defendant Wells Fargo to seek refinancing of his Chase Manhattan mortgage. Id. ¶¶ 31, 32. With respect to his transaction with Abell, Hughes told Wells Fargo, orally and in writing, "that he had previously borrowed money (from Calvin Baltimore) to stop a foreclosure against the Property." Id. ¶ 34. Wells Fargo tried unsuccessfully to reach Baltimore and did not find any recordation of Hughes' transaction with Abell upon inquiring at the Recorder of Deeds. Id. Wells Fargo suggested to Hughes that he discuss his transaction with Baltimore with a lawyer, and Hughes spoke with the law firm of Weinstock, Friedman, and Friedman, P.A. See Decl. **[**7]** of George Hughes [Docket Entry 115-2] ¶¶ 18, 21-22.

Wells Fargo offered to refinance Hughes' Chase Manhattan mortgage so long as Hughes consolidated his second mortgage and other nonmortgage debts, which together totaled $33,517.03, into his agreement with Wells Fargo. Id. ¶¶ 33, 36. Hughes would also receive $61,080.22 up front at closing. Id. ¶ 36. The statute of limitations had passed for some of these nonmortgage debts. Id. ¶ 35. Hughes's outstanding balance on his Chase Manhattan mortgage was $87,775.43, so that after consolidation Wells Fargo was proposing to make a loan with a 38% increase over the value of Hughes's prior mortgage debt. **[*82]** Id. ¶ 36. Hughes was to pay $1,604.18 per month for this loan; his previous monthly payment to Chase Manhattan was $815 per month. Id. ¶¶ 11, 42. This payment amounted to approximately 46% of Hughes's monthly income of $3,511.83. Id. ¶ 38. Hughes reported this income to Wells Fargo and made no representations about whether it would increase or decrease in the future. Id. The application that Wells Fargo prepared for his loan indicates that Hughes had monthly income of $3,783.33 per month. Id. ¶ 37.

Wells Fargo reserved the right to increase the **[**8]** loan's initial interest rate of 7.875% up to a limit of 13.875% after the first two years of the loan. Id. ¶ 41. Wells Fargo's representative told Hughes that "he did not need to worry about the loan being an adjustable-rate mortgage, because he should be able to refinance the loan before the rate changed," which Hughes has not been able to do. Id. ¶ 43-44. Hughes accepted these terms and closed the loan on September 22, 2006. Id. ¶ 40. Hughes paid $10,127.32 in closing costs. Id. ¶ 46. Prior to the commencement of the transaction between Hughes and Wells Fargo on September 22, and unbeknownst to either party, on September 15, 2006, Abell recorded a deed transferring title of the property from Hughes to Abell. Id. ¶ 47.

b. Present Suit

Hughes brought the present action on January 15, 2009 in the Superior Court of the District of Columbia. Wells Fargo removed the case to this Court on January 29, 2009. Hughes asserts the following claims against Abell, Baltimore, and Modern Management: violations of the CPPA (Count I), creation of an equitable mortgage (Count II), violations of TILA and HOEPA (Count III), common law fraud (Count IV), and usury (Count VIII). Am. Compl. ¶¶ 50-79, 95-98. **[**9]** Against Wells Fargo, Hughes asserts violations of the CPPA (Count V) and common law negligence (Count VII). Id. ¶¶ 80-84, 90-94. Count VI seeks to quiet title against both Wells Fargo and Abell. Id. ¶¶ 85-89. Abell filed counterclaims against Hughes for quiet title, rent or possession, unjust enrichment, and fraud. Countercl. [Docket Entry 70] ¶¶ 43-69. Abell also filed a crossclaim to quiet title against Wells Fargo. Cross-cl. [Docket Entry 70] ("Abell Cross-cl. Against Wells Fargo") ¶¶ 74-75. Wells Fargo filed crossclaims against Abell for fraud (Count I), quiet title (Count II), equitable subrogation (Count III), and unjust enrichment (Count IV). Cross-cl. [Docket Entry 12] ("Wells Fargo Cross-cls. Against Abell") ¶¶ 6-33. Wells Fargo also asserts the following counterclaims against Hughes: equitable subrogation (Count I), equitable lien (Count II), unjust enrichment (Count III), fraud (Count IV), and breach of contract (Count V). Wells Fargo Bank, N.A.'s Am. Answer and Countercls. to Pl. George R. Hughes' Compl. [Docket Entry 30] ("Wells Fargo Countercls. Against Hughes").

This Court previously ruled, in July 2009, on Wells Fargo's motion to dismiss Hughes's original complaint. *Hughes v. Abell, 634 F. Supp. 2d 110 (D.D.C. 2009)*. **[**10]** The Court ruled that Hughes had alleged facts sufficient to state an unconscionability claim under the CPPA, and that Hughes's quiet title count also survived. Wells Fargo's motion to dismiss was, however, granted in part, because Hughes failed adequately to allege misrepresentation under the CPPA. Wells Fargo then filed an answer to Hughes' complaint and then an amended answer, which contained Wells Fargo's counterclaims against Hughes. Hughes was granted leave to file an amended complaint with restated allegations of misrepresentations under the **[*83]** CPPA in May 2010. Wells Fargo filed a motion to dismiss this amended complaint and Abell filed a motion for summary judgment on some, but not all, of the claims against him. After the filing of these motions and during the course of ongoing discovery, the Court was informed of a privilege dispute arising from a subpoena directed to the Weinstock firm by Wells Fargo. After considering argument from the parties and reviewing relevant documents in camera, the Court ruled that the content of communications between Hughes and staff of the law firm was protected by the attorney-client privilege.

In November 2010, the Court ruled on Wells Fargo's **[**11]** motion to dismiss and Abell's motion for summary judgment. *Hughes v. Abell, 794 F. Supp. 2d 1 (D.D.C. 2010)*. The Court denied Wells Fargo's motion in its entirety, granted Abell's motion with respect to the usury claim, and denied Abell's motion with respect to the remaining claims. *Id. at 15*. Wells Fargo then filed an answer to the amended complaint.

Wells Fargo filed the present motion for summary judgment in April 2011. In January 2012, the Court ordered supplemental briefing on whether a declaration by Hughes that was attached to Hughes' opposition to Wells Fargo's motion waived the attorney-client privilege with respect to the content of his communications with the Weinstock firm. A hearing on the motion for summary judgment, as well as the privilege issue, was held on February 24, 2012. The Court then ruled that Hughes' declaration did waive the attorney-client privilege with respect to his communications with the firm in the time period surrounding his transaction with Wells Fargo. The Court subsequently released a partially redacted version of a document produced by the Weinstock firm that had previously been provided to the Court for in camera review. The document, entitled **[**12]** "Redacted Intake Notes Summary," described communications between Hughes and Weinstock firm staff. The Court ordered Wells Fargo to refile its motion for summary judgment with a supplemental memorandum addressing the significance, if any, of the released document. On March 23, 2012, Hughes stipulated to the dismissal of his negligence claim (Count VII) against Wells Fargo. Wells Fargo then refiled its motion for summary judgment with a supplemental memorandum addressing the significance of the released documents. On April 20, 2012, Abell filed a renewed motion for summary judgment on all the remaining counts that Hughes alleges against Abell and Modern Management. The motions are now ripe for decision by the Court.

II. Summary Judgment Standard

HN1[] Summary judgment is appropriate when the pleadings and the evidence demonstrate that "there is no genuine issue as to any material fact and that the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(c)(2)*. ***HN2***[] The party seeking summary judgment bears the initial responsibility of demonstrating the absence of a genuine dispute of material fact. See *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. ***HN3***[] The moving party may successfully **[**13]** support its motion by identifying those portions of "the pleadings, the discovery and disclosure materials on file, and any affidavits" which it believes demonstrate the absence of a genuine issue of material fact. *Fed. R. Civ. P. 56(c)(2)*; see *Celotex, 477 U.S. at 323*.

HN4[] In determining whether there exists a genuine issue of material fact sufficient to preclude summary judgment, the court must regard the non-movant's statements as true and accept all evidence and make **[*84]** all inferences in the non-movant's favor. See *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. ***HN5***[] A non-moving party, however, must establish more than the "mere existence of a scintilla of evidence" in support of its position. *Id. at 252*. ***HN6***[] By pointing to the absence of evidence proffered by the non-moving party, a moving party may succeed on summary judgment. *Celotex, 477 U.S. at 322*. ***HN7***[] "If the evidence is merely colorable, or is not significantly probative, summary judgment may be granted." *Anderson, 477 U.S. at 249-50* (citations omitted).***HN8***[] Summary judgment is appropriate if the non-movant fails to offer "evidence on which the jury could reasonably find for the [non-movant]." *Id. at 252*.

III. Discussion

a. Hughes' Claims **[**14]** Against Wells Fargo

Hughes has two remaining claims against Wells Fargo. First, he alleges that Wells Fargo violated the CPPA by providing him financing on unconscionable terms and misrepresenting material facts about the transaction. Second, Hughes seeks to quiet title on the Property on the ground that Wells Fargo obtained its security interest in the Property in violation of the CPPA.

i. Hughes' Claim Under the CPPA

Hughes asserts that Wells Fargo's financing practices are unconscionable within the meaning of *D.C. Code § 28-3904(r)*. Am. Compl. ¶¶ 80-83. ***HN9***[] The CPPA applies to real estate finance transactions like the one in this case. *DeBerry v. First Gov't Mortgage & Investors Corp., 743 A.2d 699, 703 (D.C. 1999)*. Whether a practice is unconscionable under this provision is determined by weighing several factors, including "knowledge by the person at the time credit sales are consummated that there was no reasonable probability of payment in full of the obligation by the consumer," "knowledge by the person at the time of the sale or lease of the inability of the consumer to receive substantial benefits from the property or services sold or leased," and "that the person has knowingly **[**15]** taken advantage of the inability of the consumer reasonably to protect his interests." *D.C. Code § 28-3904(r)(1)*, *(2)*, *(5)*.

Hughes supports his claim that Wells Fargo provided him financing on which "there was no reasonable probability of payment in full," id. *§ 28-3904(r)(1)*, with allegations that the financing requires payment of an excessive share of his income. Hughes alleges that his monthly payment to Wells Fargo amounts to approximately 46% of his monthly income. Am. Compl. ¶ 38. He further alleges that although the interest rate at the time was the minimum allowed by Wells Fargo's terms, that rate may increase in the future. Id. ¶ 42. Because Hughes made no representation about whether his present income would remain constant or increase, that —coupled with the adjustable rate — could result in future monthly payments of more than half of his income. Id. ¶ 37.

Hughes next alleges that Wells Fargo's terms are unconscionable under *D.C. Code § 28-3904(r)(2)* because Wells Fargo knew that he would be unable "to receive substantial benefits" from Wells Fargo's terms. Through the refinancing, Hughes received $61,080.22 upon closing and consolidated $33,517.03 in other debt. Am. Compl. **[**16]** ¶¶ 35, 36. Notwithstanding these apparent benefits, Hughes contends that the refinancing also doubled his monthly mortgage payment and paid off debt on which the statute of limitations had run. Id. ¶¶ 35, 42.

Finally, Hughes alleges that Wells Fargo has "knowingly taken advantage of the **[*85]** inability of the consumer reasonably to protect his interests." *D.C. Code § 28-3904(r)(5)*. He asserts that a representative from a settlement company retained by Wells Fargo had Hughes "sign a stack of papers" but only gave Hughes "unsigned copies" and that "no notary was present." Am. Compl. ¶ 40.

The Court has previously concluded that, in consideration of these three factors under *section 28-3904(r)*, Hughes stated a claim of unconscionability under the CPPA. *Hughes, 794 F. Supp. 2d at 9*. The Court determined that "[a]t minimum, Hughes sufficiently alleges that, under the first factor, 'there was no reasonable probability of payment in full.'" Id.

Hughes also alleges a second violation of the CPPA, claiming that Wells Fargo "misrepresent[ed] material facts when such failure tended to mislead." Am. Compl. ¶ 84. ***HN10***[] The CPPA prohibits "misrepresent[ations] as **[**17]** to a material fact which has a tendency to mislead." *D.C. Code § 28-3904(e)*. Hughes asserts that a Wells Fargo representative told him not to worry about the loan being an adjustable rate mortgage, because he should be able to refinance the loan before the rate changed in two years. Am. Compl. ¶ 43. Hughes alleges that he has not been able to refinance the Wells Fargo loan. Id. ¶ 44. The Court previously concluded that "Wells Fargo's alleged representation . . . may have misled Hughes regarding the potential costs and risks involved in his transaction with Wells Fargo." *Hughes, 794 F. Supp. 2d at 9*.

ii. Wells Fargo's Argument for Summary Judgment on CPPA Claim

Wells Fargo argues that, contrary to Hughes' allegations, the terms of the loan are not unconscionable. First, Wells Fargo indicates that Hughes' contention that the loan had "an interest rate that would range between 7.875% and 13.875%," Am. Compl. ¶ 42, is factually incorrect. Wells Fargo's Mem. in Supp. of its Mot. for Summ. J. [Docket Entry 132-1] ("Wells Fargo Mem.") at 11-12. Although the initial interest rate was 7.875% and the rate was adjustable, the rate could vary both downward and upward; indeed, in 2009-2010, the rate **[**18]** adjusted as low as 5.625%. Id. Wells Fargo seems to suggest that it could not have had "knowledge . . . that there was no reasonable probability of payment in full," *D.C. Code § 28-3904(r)(1)*, by Hughes because the required loan payments could have decreased. Furthermore, Wells Fargo contends that Hughes' allegation that he did not "receive substantial benefits," *D.C. Code § 28-3904(r)(2)*, from the loan is unsupportable from the record. Wells

Fargo notes that the loan was applied to satisfy two outstanding mortgages on the property as well as more than $15,000 in other outstanding debts and that Hughes received an immediate payout of more than $60,000. Wells Fargo Mem. at 12-13. Wells Fargo observes that Hughes stated at his deposition that he benefitted from the loan by receiving cash and having Wells Fargo become his mortgage holder. Id. at 13; see id. Ex. 12. Relatedly, Wells Fargo maintains that Hughes cannot establish that he suffered injury-in-fact from Wells Fargo's conduct because he benefitted from the loan, including by the loan's decreasing interest rate. Wells Fargo's Supplemental Mem. in Supp. of its Mot. for Summ. J. [Docket Entry 134] ("Wells Fargo Suppl. Mem.") at 6-8. **[**19]** Additionally, Wells Fargo argues that there is no evidence that Hughes had an "inability . . . reasonably to protect his interests by reasons of age, physical or mental infirmities, ignorance, illiteracy, or inability to understand the language of the agreement, or similar factors." *D.C. Code § 28-3904(r)(5)*. Wells Fargo notes that **[*86]** Hughes is literate and educated and testified at his deposition that he understood the details of the loan. Wells Fargo Mem. at 15-17; see id. Ex. 12.

With respect to the allegation that Wells Fargo misrepresented material facts about the loan, Wells Fargo disputes that its agent made the relevant statement and argues that even if the statement was made, it was neither material nor a representation of fact. Wells Fargo contends that the alleged statement — that Hughes should have been able to refinance the loan within two years, before the interest rate adjusted — cannot be considered a representation of material fact because it was a prediction about a future event. Wells Fargo Mem. at 17-18. Wells Fargo argues further that the alleged statement was not material because the record indicates that Hughes has not attempted to refinance the loan. Id. at 18-19.

Finally, **[**20]** Wells Fargo contends that Hughes concealed material facts about the previous transaction on the Property (with Abell, Baltimore, and Modern Management) when entering into the transaction with Wells Fargo. Wells Fargo Suppl. Mem. at 7-8. Wells Fargo argues on the basis of this alleged concealment both that Hughes cannot show Wells Fargo caused any harm to him — because it would not have entered into the loan if it had known the true circumstances — and that Hughes should not be allowed to recover under the CPPA due to his unclean hands. Id.

iii. Analysis of CPPA Claim

As indicated at the motion to dismiss stage, see *Hughes, 794 F. Supp. 2d at 8*, Hughes' claim is analogous to other CPPA claims that have been sustained in this Circuit, most notably in *Williams v. First Government Mortgage & Investors Corp., 225 F.3d 738, 343 U.S. App. D.C. 222 (D.C. Cir. 2000)*. There, the D.C. Circuit upheld a jury verdict finding that the defendant had knowledge that there was no reasonable probability of payment on a refinanced mortgage requiring 57% of the plaintiff's monthly income. See *225 F.3d at 744*; see also *Johnson v. Long Beach Mortgage Loan Trust 2001-4, 451 F. Supp. 2d 16 (D.D.C. 2006)* (declining to dismiss a complaint **[**21]** under *section 28-3904(r)(1)* alleging that loan payments would require more than half of the plaintiff's income). Williams's "disposable income" (after accounting for $100 per month in health insurance) was no more than $1,200 a month and the monthly payment on his loan was $686, leaving "little more than $500 each month to buy necessities for himself and his dependents." *225 F.3d at 743-44*. The D.C. Circuit therefore found that "a reasonable jury could conclude that [the bank] made the loan to Williams knowing 'there was no reasonable probability of payment in full of the obligation.'" *Id. at 744* (quoting *D.C. Code § 28-3904(r)(1)*). The court also noted that Williams had only a sixth-grade education, limited literacy, and an inability to understand basic mathematics. *Id. at 744-45*. The court therefore found that a reasonable jury "could conclude that Williams was unable fully to understand the transaction" and that the bank knowingly took advantage of his inability reasonably to protect his interests. *Id. at 744* (quoting *D.C. Code § 28-3904(r)(5)*).

Although the current facts are somewhat more favorable to Wells Fargo than were those in *Williams*, the Court finds that there is a genuine **[**22]** issue of material fact as to whether the Hughes-Wells Fargo transaction was unconscionable. A reasonable jury could conclude that Wells Fargo knew that there was no reasonable probability of payment on the loan. To be sure, considering all the evidence in the record, especially Hughes' deposition testimony, the Court concludes that it would **[*87]** not be possible for a finder-of-fact to reasonably conclude either that Hughes did not receive a substantial benefit from the loan or that Hughes did not understand the transaction.

But as the Court has noted previously, "[t]he five factors by which the CPPA defines unconscionability are disjunctive and non-exhaustive." *Hughes, 794 F. Supp. 2d at 9*.

According to the amended complaint, at the initial interest rate of 7.875%, Hughes was to pay $1,604.18 per month for this loan, amounting to approximately 46% of his monthly income of $3,511.83; indeed, Wells Fargo's underwriting documentation indicated that Hughes would be paying 53.69% of his gross monthly income. Am. Compl. ¶ 38. Hughes now indicates that, by his calculation (based on documents reviewed by Wells Fargo prior to the transaction), his net income was only $2093.89, making the loan payments **[**23]** 77% of his net income. Pl.'s Mem. of P. & A. in Opp'n to Def. Wells Fargo's Mot. for Summ. J. [Docket Entry 115] ("Hughes Opp'n") at 14. Putting aside the adjustable rate for a moment, the loan here required payment of more than the approximately half of "disposable income" noted in Williams — and payment of an amount that was substantially higher than the previous mortgage payments that Wells Fargo knew Hughes was having trouble making. It is true that here Hughes received a substantial initial lump sum payment which, if spent wisely, could have been used to service the loan or pay other costs going forward. Yet it is difficult to see why Wells Fargo and Hughes would have structured the loan in this manner if anyone expected Hughes to use the lump sum for later mortgage payments. If this money was intended to be used for ongoing periodic payments, why pay substantial interest to receive the money as a lump sum?

As for the fact that this was an adjustable rate mortgage, it is hard to say that this aspect of the loan unequivocally favors either side, though the fact somewhat hurts Wells Fargo's case for summary judgment. Under the CPPA, the question is whether Wells Fargo knew there **[**24]** was no reasonable probability of repayment at the time it made the loan. For all Wells Fargo knew, the interest rate could have gone up (as it initially did) or down (as it later did). The Court has no basis for knowing if one contingency was more likely than the other. But given the precariousness of Hughes' financial situation, the fact that the loan payments could have gone up substantially should have been cause for concern. Although the required payments could have also decreased, it cannot be reasonable for a lender to rest hope of repayment on the contingency that interest rates happen to fall. In other words, the volatility in the loan's interest rate hurts Wells Fargo's case because it added an element of chance to an already questionable situation.

In the Court's view, then, a reasonable jury could conclude that Wells Fargo had knowledge at the time of the transaction "that there was no reasonable probability of payment in full of the obligation by the consumer." The mortgage was for approximately half of Hughes' gross monthly income and certainly more than half of his net income, that income was not extremely large, Hughes had trouble making even smaller payments in the past, **[**25]** and the mortgage's interest rate could increase at any time. The fact that Hughes received a large onetime pay-out helps Wells Fargo's case, but whether it helps enough is a question of fact for a jury.

The Court is also not persuaded by Wells Fargo's argument that Hughes' CPPA claim must fail given his misconduct in entering into the transaction, either because **[*88]** his conduct undermines any injury-in-fact or because of the doctrine of unclean hands. With respect to injury-in-fact, Wells Fargo confuses facts that may diminish or even eliminate Hughes' ability to recover on his claim with facts suggesting Hughes has no standing to bring the claim in the first place. As Wells Fargo accurately notes, in *Grayson v. AT&T Corp., 15 A.3d 219, 246-47 (D.C. 2011)*, the D.C. Court of Appeals concluded that a plaintiff had no standing to bring a CPPA claim because he could show no injury-in-fact. But that plaintiff in Grayson did not claim to have been personally injured by the defendant; rather, he "rest[ed] his claim entirely 'on the legal rights or interests of third parties,'" and was "in no different a position to bring this claim than any other unaffected third party." *Id. at 246-47* (quoting **[**26]** *Warth v. Seldin, 422 U.S. 490, 499, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975))*. Here, by contrast, Hughes and Wells Fargo entered into a transaction in which Hughes claims that Wells Fargo injured him. That alleged injury gives Hughes standing, in a very direct way, to bring his claim. Wells Fargo presents a colorable argument that Hughes was not, in fact, injured by Wells Fargo in the transaction, but that is relevant to Hughes' ultimate success on the merits of his CPPA claim, not to whether Hughes has standing to bring a claim about the transaction, and is, in any case, a contested issue of fact for the jury.

Regarding Wells Fargo's contention that Hughes' "unclean hands" should bar his recovery, the Court finds that such a defense is simply unavailable under the CPPA. The Court has previously noted that ***HN11***[] "the defense of unclean hands does not fit comfortably with alleged violations of CPPA, which is a broad remedial statute intended to 'assure that a just mechanism exists to remedy all improper trade practices.'" *Hughes, 794 F. Supp. 2d at 11* (quoting *DeBerry v. First Gov't Mortg. & Investors Corp., 743 A.2d 699, 700 (D.C. 1999))*. Further consideration confirms the Court's earlier conclusion that a claim under the **[**27]** CPPA cannot be barred by the plaintiff's own misconduct.

Wells Fargo confirmed at the hearing before the Court that it is not aware of a single case in which a defense of unclean hands was accepted under the CPPA or a similar state statute. Hughes notes that in *Davis v. Wholesale Motors, Inc., 86 Haw. 405, 949 P.2d 1026, 1038-39 (Haw. Ct. App. 1998)*, the court concluded that such a defense was not available to a claim brought under the comparable Hawaii statute, *HRS § 480*. Davis noted that the Hawaii statute intended to follow comparable provisions of federal ***antitrust law***, including providing for treble damages to encourage enforcement, and relied on *Perma Life Mufflers, Inc. v. Int'l Parts Corp., 392 U.S. 134, 139, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*. The Supreme Court concluded there that "[t]he plaintiff who reaps the reward of treble damages may be no less morally reprehensible than the defendant, but the law encourages his suit to further the overriding public policy in favor of competition." *Perma Life, 392 U.S. at 139*.

The Court finds this reasoning persuasive with respect to the CPPA as well. The purpose of the CPPA, as stated in the statute's text, is to "(1) assure that a just mechanism exists to remedy all improper **[**28]** trade practices and deter the continuing use of such practices; (2) promote, through effective enforcement, fair business practices throughout the community; and (3) educate consumers to demand high standards and seek proper redress of grievances." *D.C. Code § 28-3901(b)*. ***HN12***[] The statute is therefore intended to promote fair business practices in the community **[*89]** at large, not just to resolve individual disputes between consumers and businesses. Accordingly, the CPPA expressly indicates that conduct may constitute a violation "whether or not any consumer is in fact misled, deceived or damaged thereby," *D.C. Code § 28-3904*, and provides for the recovery of treble damages, *D.C. Code § 28-3905(k)(1)(A)*. Hence, as with federal ***antitrust law***, the statute operates through private enforcement via suits by affected consumers, but the statute is concerned with the deterrence effect on the general business community as well as with making individual consumers whole. That is why the statute allows for plaintiffs to recover treble damages and defines violations to include instances in which a consumer is not "in fact misled, deceived, or damaged." *D.C. Code § 28-3904*. Similarly, the fact that an individual **[**29]** plaintiff may have engaged in inequitable conduct is not particularly relevant to the desired outcome of deterring unlawful behavior in the business community.

Hence, the doctrine of unclean hands should not bar Hughes' claims under the CPPA. As discussed below, he did indeed make material misrepresentations to Wells Fargo when entering into the mortgage transaction. Even so, it may still be the case that the transaction that Wells Fargo thought it was entering into was unconscionable on the terms of the contract as Wells Fargo understood them. In other words, it is no defense for Wells Fargo to argue that it tried to enter into a possibly unconscionable contract, but was prevented from doing so by Hughes' fraud. It is consistent both with the statute and with equity for Wells Fargo to be held to account for this behavior if it was, in fact, unlawful.

On the other hand, with respect to the misrepresentation of material fact claim under the CPPA, the Court now finds that Hughes' claim cannot be sustained. The basis for Hughes' misrepresentation claim is that Wells Fargo's representative told him that "he did not need to worry about the loan being an adjustable-rate mortgage, because he **[**30]** should be able to refinance the loan before the rate changed," Am. Compl. ¶¶ 43-44. ***HN13***[] The CPPA prohibits "misrepresent[ations] as to a material fact which has a tendency to mislead." *D.C. Code § 28-3904(e)*. As a preliminary matter, Wells Fargo's statement was a suggestion about something that Hughes would be able to do in the future, rather than a statement about a "fact" in a literal sense. See *Howard v. Riggs National Bank, 432 A.2d 701, 706 (D.C. 1981)* (***HN14***[] "Opinions or predictions of future events do not constitute representations of material fact upon which a plaintiff successfully may place dispositive reliance.") To be sure, Hughes' ability to refinance the loan was at least arguably in Wells Fargo's control, since Wells Fargo had the ability to renegotiate the loan's terms at a future date. Strictly speaking, however, if Hughes had been misled by Wells Fargo's statement about something Wells Fargo then failed to do in the future, Hughes would be detrimentally relying on an implicit promise by Wells Fargo, rather than a misrepresentation of a fact (i.e., a statement that was false at the time). See id. In any case, the distinction is not of much consequence here, since Hughes has **[**31]** never indicated that he actually tried to refinance the loan. The statement was therefore not a misrepresentation because it might actually have been accurate. There is no indication that Wells Fargo made the statement without intending it to be true; on the contrary, deposition testimony from Wells Fargo's representative suggests that it was Wells Fargo's standard practice to make loans of this sort with the intention of refinancing. See Hughes Opp'n Ex. 48. Hence, even if a **[*90]** statement about a future event that did not occur could be construed as a misrepresentation of fact, Hughes has presented no evidence that such a misrepresentation was actually made in this instance.

In sum, Hughes' claim under the CPPA may proceed, but in more limited form than alleged in the complaint. Hughes' CPPA unconscionability claim may proceed on the ground that Wells Fargo had knowledge that there was no reasonable probability of payment in full of the obligation by Hughes. But Hughes has presented insufficient evidence for a jury to reasonably conclude either that he did not understand the nature of the transaction with Wells Fargo or that he received no substantial benefit from the loan. Hughes has **[**32]** also presented insufficient evidence, as a matter of law, that Wells Fargo made a material misrepresentation of fact to Hughes in the transaction, and hence that CPPA claim must be dismissed.

iv. Hughes' Quiet Title Claim

Hughes seeks to quiet title against Wells Fargo on the ground that Wells Fargo obtained its security interest in the Property through unconscionable terms. Am. Compl. ¶ 84. As the Court noted previously, the quiet title count depends upon the outcome of the CPPA count. *Hughes, 794 F. Supp. 2d at 9*. ***HN15***[] Civil remedies available under the CPPA include "any [] relief which the court deems proper," which may include rescission. *D.C. Code § 28-3905(k)(1)(F)*. In addition,***HN16***[] the Court's equitable powers allow it to quiet title in favor of Hughes if Wells Fargo's actions warrant that remedy. Hence, it would be premature to dismiss Hughes's quiet title count while his CPPA unconscionability claim remains pending. See, e.g., *Armenian Genocide Museum and Mem'l, Inc. v. Cafesjian Family Found., Inc., 595 F. Supp. 2d 110, 119 (D.D.C. 2009)* ("[I]t is premature to consider dismissal of [a quiet title count], which may or may not constitute an appropriate remedy depending on the evidence **[**33]** yet to be adduced in this case.")

b. Wells Fargo's Counterclaims Against Hughes

Wells Fargo asserts five counterclaims against Hughes. First, Wells Fargo claims that, under the doctrine of equitable subrogation, its lien should be subrogated to those of the prior secured creditors whose debts were satisfied by Wells Fargo. Wells Fargo Countercls. Against Hughes ¶¶ 8-14. Second, Wells Fargo contends that it is entitled to an equitable lien on the property for the full amount of its loan to Hughes. Id. ¶¶ 15-17. Third, Wells Fargo argues that Hughes was unjustly enriched at its expense. Id. ¶¶ 18-24. Fourth, Wells Fargo maintains that Hughes committed fraud against it by concealing material facts about his transaction with Abell. Id. ¶¶ 25-30. Fifth, Wells Fargo contends that Hughes is in breach of his mortgage contract with Wells Fargo. Id. ¶¶ 25-30.

The Court will consider each of Wells Fargo's counterclaims. The Court notes at the outset, in all candor, that Wells Fargo's counterclaims against both Hughes and Abell are difficult to resolve prior to resolution of the dispute involving the earlier transaction between Hughes and Abell. Hence, the Court is unable to presently resolve all **[**34]** of the matters that ultimately might warrant judgment in Wells Fargo's favor.

i. Hughes' Argument that Wells Fargo Abandoned its Counterclaims

As a preliminary matter, Hughes argues that Wells Fargo's counterclaims are not properly before the Court. Hughes accurately points out that Wells Fargo's counterclaims **[*91]** were included in the same document as its amended answer to Hughes' original complaint. Hughes Opp'n at 38. Hughes then filed an amended complaint, and Wells Fargo filed an answer to the amended complaint that did not include any counterclaims. Hughes argues that this superseding pleading nullifies the earlier document containing the counterclaims.

The Court finds that Wells Fargo's later filing did not abandon its counterclaims. To be sure, Hughes' argument has some force. ***HN17***[] *Federal Rule of Civil Procedure 7* states that "[o]nly these pleadings are allowed" and then sets forth a list of pleadings that does not include counterclaims. ***HN18***[] *Rule 13* requires that a counterclaim be set forth in a pleading. It would be reasonable to conclude from these two rules that a counterclaim is not a distinct pleading, but rather must be included as part of another pleading, such as an answer. And it **[**35]** is certainly true that***HN19***[] "[o]nce an amended pleading is interposed, the original pleading no longer performs any function in the case." 6 Charles A. Wright, et al., Fed. Prac. & Proc. Civ. § 1476 (3d ed.). Accordingly, it is reasonable for Hughes to assert that when Wells Fargo replaced its answer with an answer that did not contain counterclaims, the pleading that was before the Court (the new answer) did not contain counterclaims.

Nonetheless, in the Court's view, this conclusion would put form over substance. ***HN20***[] An answer and a counterclaim, even if contained in the same document, serve different functions; the counterclaim shares more with a complaint, setting out claims against the other party, than it does with the answer. See *Dunkin Donuts, Inc. v. Romanias, 2002 U.S. Dist. LEXIS 28405, at *5-6 (W.D. Pa. May 29, 2002)*. It was therefore reasonable for Wells Fargo to view the answer and the counterclaims as separate pleadings. That Wells Fargo intended the counterclaim as separate is confirmed by the fact that Wells Fargo did not continue the answer's paragraph numbering in the counterclaim. It is not especially intuitive that a counterclaim is part of the pleading to which it is attached, **[**36]** nor is it obvious that counterclaims must be re-pled when an answer with counterclaims attached is superseded. And Hughes does not indicate that he was actually under the impression that Wells Fargo had dropped its counterclaims and then took action accordingly, or that he is otherwise prejudiced in any way. Hence, Wells Fargo should not be penalized for failing to restate the counterclaims when it superseded its answer.

ii. Fraud Claim

The Court begins with Wells Fargo's fraud claim because resolution of the fraud claim affects resolution of the other issues. Wells Fargo alleges that Hughes knowingly misrepresented that he owned the Property when he applied in 2006 for a "refinance" loan with Wells Fargo and that Wells Fargo relied upon his misrepresentation in evaluating and approving his loan application. Wells Fargo Countercls. Against Hughes ¶¶ 26-28. Wells Fargo argues that the record clearly and convincingly establishes that, prior to closing on the Wells Fargo transaction, Hughes was aware that he had sold his home, but failed to disclose this fact to Wells Fargo. Wells Fargo Mem. at 32-33. Wells Fargo contends that, prior to commencing the transaction, Hughes told Wells Fargo **[**37]** only that "a loan shark loaned [him] some money" to prevent foreclosure, and that Hughes further misrepresented to Wells Fargo that he possessed no other documents or information concerning his transaction with Abell, when in fact he possessed copies of **[*92]** the lease and option agreements. Id. Wells Fargo seeks judgment against Hughes in the full amount of the principal of the loan, $192,500, as well as punitive damages and fees and costs. Wells Fargo Countercls. Against Hughes ¶ 30. The principal of the loan was approximately equal (though slightly greater) than the amount Wells Fargo paid out — the sum of the amount of the two prior liens on the property, which Wells Fargo paid off (approximately $105,000 in total), more than $16,000 in Hughes' unsecured debt, which Wells Fargo paid off, and the more than $60,000 lump sum that was disbursed to Hughes immediately. Counterclaim ¶¶ 29-30. Wells Fargo contends further that the document describing Hughes' contact with the Weinstock firm — the redacted document that the Court initially found protected by the attorney-client privilege, but later released to the parties when Hughes waived the privilege —indicates that "Hughes well understood **[**38]** that someone else was claiming ownership of the Property and that the Lease Agreement and Option Agreement were not only relevant, but integral" to the claim of ownership. Wells Fargo Suppl. Mem. at 10-12.

The parties agree that ***HN21***[] the essential elements of common law fraud are: (1) a false representation, (2) in reference to a material fact, (3) made with knowledge of its falsity, (4) with intent to deceive, and (5) on which reliance is placed. *Virginia Acad. of Clinical Psychologists v. Group Hospitalization & Med. Servs., Inc., 878 A.2d 1226, 1233 (D.C. 2005)*; *D'Ambrosio v. Colonnade Council of Unit Owners, 717 A.2d 356, 360-61 (D.C. 1998)*. Fraud must be established by clear and convincing evidence. *Virginia Acad., 878 A.2d at 1233*.

Hughes argues that he neither knew that he had transferred title to his home nor intended to defraud Wells Fargo. He notes that the essence of his complaint against Abell, Modern Management, and Baltimore is that these defendants defrauded him out of title to his home. Hughes Opp'n at 42-43. Hughes also notes that he voluntarily disclosed his transaction with Abell to Wells Fargo and then, at Wells Fargo's suggestion, wrote a letter to Wells Fargo documenting **[**39]** the transaction and contacted the Weinstock firm in order to better understand the nature of the transaction. Id. at 43. Hughes contends that these actions both belie that he intended to defraud Wells

Fargo and confirm that he did not know that he had transferred title to his home. Id. at 43-44. Hughes argues that the document from the Weinstock firm "indicates confusion, not fraud." Hughes Suppl. Mem. at 12-13.

Having reviewed the relevant documents and deposition testimony, the Court concludes that Wells Fargo has presented clear and convincing evidence that Hughes committed fraud against Wells Fargo and that no jury could reasonably find otherwise. The record contains abundant evidence that Hughes understood, when he entered into the transaction with Wells Fargo, that Abell at a minimum purported to have gained ownership of the Property. Because Hughes understood this information, the only conclusion that can reasonably be drawn from Hughes' repeated statements to Wells Fargo only that he had borrowed money to prevent foreclosure is that Hughes intended to deceive Wells Fargo. And since it is impossible to believe that Wells Fargo would have proceeded with a "mortgage" transaction **[**40]** if it had known that someone else was purporting to own the Property, Hughes' intentional misrepresentation to Wells Fargo was material to the transaction.

With respect to Hughes' understanding of his transaction with Abell, there are several documents in the record about **[*93]** which there is no dispute with respect to authenticity. The documentation accompanying the Hughes-Abell transaction includes a document bearing the title "AGREEMENT TO SELL REAL ESTATE," which both Hughes (as seller) and Abell (as purchaser) signed. See Wells Fargo Mem. Ex. 3. In addition to a significant amount of printed text, this document contains handwritten text just above the signature line that states that "the property is transfer[red] as is," "the purchaser will lease to seller for one year," "the purchaser will transfer back to seller within one year for $175,000," and that "if the seller is 2 consecutive payments late the buy back is null & void." Id. The documentation further includes a "Lease Agreement" and an "Option Agreement," both signed by Hughes, which refer to Hughes in many places as "Tenant" and Modern Management as "Landlord." See id. Exs. 4, 5. Accompanying this documentation is a note, in **[**41]** Hughes' handwriting, that states: "My home, located at 5236 5th Street N.W., Washington, D.C. 20011-4043, is in foreclosure. I sold my home, leased it back for one (1) year and allowed to repurchase my home during this year. This allowed my family and I to stay in our home and an opportunity to buy it." Id. Ex. 6. The note is then signed by Hughes. Id. The record also contains various receipts, apparently provided to Hughes by Modern Management, that refer to "rent" paid by Hughes for the 2005-2006 time period. Id. Ex. 10.

Hughes has stated that he received copies only of the lease and option agreements, not the other documentation of his transaction with Abell, and that he believed his transaction with Abell was to obtain a loan. See Hughes Opp'n at 42-43; Am. Compl. ¶¶ 20-21. In Hughes' deposition, he testified that he "didn't read through [the sale] agreement" but instead "went mainly by verbal [statements] for what I was being explained by Calvin Baltimore and he seemed to be in a hurry so I trusted what I heard." Hughes Opp'n Ex. 49. Hughes further testified that he understood that he "was being loaned money in order to enable [him] to stay in the home" and that "the loan was to **[**42]** be repaid, the monthly payments, that included mortgage payments to Chase." Id. Hughes also testified that he did not read the documents that he signed and that he did not receive a copy of the documents. Id.

The document from the Weinstock firm is entitled "Redacted Intake Notes Summary." Wells Fargo Suppl. Mem. Ex. S-1. The document appears to be a log of Hughes' interactions with the Weinstock firm and contains two unredacted entries. The first entry, dated September 7, 2006 — approximately two weeks before the completion of the Hughes-Wells Fargo transaction — states:

> Mbr made a loan from the O/P because he was about to lose the property. Now Mbr is in better shape and can afford to pay his own mortgage (Chase Mortgage)[.] O/P is stating he cannot break contract with him because he owns the property from the lease he signed with him for the loan. Mbr states he r'cvd about $60,000 but O/P is telling him he has to pay back $190,000 for the loan. Mbr wanted to refinance with Wells Fargo and that how he found out that the O/P owns his house. Mbr states he isn't on the deed but does have a lease.

The second entry, dated October 23, 2006, states:

> Mbr went over the whole story with me. Mbr **[**43]** says that he did refi the house but that O/P still says that he owes them $$. He apparently signed some docs back then that he does not have copies of. My guess is that one was a Promissory Note. There was no lien on the property. **[*94]** He does have a tenant/LL agreement that he will rent the property back from the O/P.. ????. That was going to pay the mortgage but now Mbr refi'd the house and he still has to pay the lease and the mortgage. Mbr then adv that there is a lease purchase

> option attached to the doc.. ?? So . . what docs did he sign then, ??? Mbr will fax in docs and I will do a demand ltr to the O/P to ask for all docs rel to the transaction to see what is going on here.

Wells Fargo argues that the Intake Notes "further establish that Hughes committed fraud against Wells Fargo by failing to disclose material facts to Wells Fargo, which if disclosed would have resulted in cancellation of the loan." Wells Fargo Suppl. Mem. at 4. Hughes contends, however, that the notes only indicate Hughes' confusion about the prior transaction. Pl.'s Supplemental Mem. of P. & A. in Opp'n to Def. Wells Fargo's Mot. for Summ. J. [Docket Entry 139] ("Hughes Suppl. Mem.") at 2-5, 11-14. [1]

There is not any significant dispute regarding what information Hughes conveyed to Wells Fargo about his transaction with Abell. Hughes' amended complaint in this case indicates that he told Wells Fargo that he borrowed money to stop foreclosure — not that he sold his home or even that anyone else was asserting ownership of the Property. Am. Compl. ¶ 34. The letter Hughes wrote to Wells Fargo prior to the completion of the "refinancing" transaction accordingly states that Hughes "borrowed money to bring [his] property out of foreclosure and current, and ha[s] remained current to date." Wells Fargo Mem. Ex. 28. Hughes does not indicate that he ever stated anything else to Wells Fargo.

Upon consideration of the record, the Court concludes that a jury applying the clear and convincing standard of evidence could reasonably conclude only that Hughes committed fraud against Wells Fargo. In light of the written documentation in the record, the Court finds that a finder-of-fact could not reasonably find **[**46]** Hughes' claims and accompanying testimony credible. The documents consummating the Hughes-Abell matter are extremely clear about the fact that the transaction was a sale of Hughes' home, and this fact is repeated in several instances. Still, it might perhaps be conceivable that Hughes did not actually read these documents before signing them. But there simply is no explanation for how a note describing the transaction in detail —including the words "I sold my home" — could be handwritten **[*95]** and signed by Hughes without Hughes at least comprehending how the other parties understood the transaction. Even if Hughes did not himself have a copy of this documentation, he did have a copy of the "lease" and "option" agreements (each of which made clear that Abell now purported to own the property) and he received "rental receipts" for approximately the next two years. Considering the handwritten note and these documents, which were, in fact, in Hughes' possession, it is simply not credible for Hughes to maintain that he did not understand the transaction initially or that he did not receive any written documents clearing up his misimpression. Furthermore, although Hughes may now dispute how the **[**47]** Weinstock document should be interpreted, he cannot deny that the document reveals, at the very least, that he knew Abell was claiming that he owned the Property at the time of the transaction with Wells Fargo. And it is also clear that Hughes told a different, more complete version of the facts to Weinstock than to Wells Fargo. Hence, the document from the Weinstock firm further confirms that Hughes knew that Abell was asserting ownership and yet he made no mention of that key fact to Wells Fargo.

The Court need not resolve the dispute about the transaction between Hughes and Abell — that is, whether Abell did, indeed, become the owner of the Property in that transaction — in order to conclude that Hughes misrepresented the facts, that the misrepresentation was material, or that Wells Fargo relied on the misrepresentation. Wells Fargo has shown that Hughes knowingly made a representation that he knew to be false

---

[1] Hughes further **[**44]** argues that the Intake notes are inadmissible because they are unreliable and represent multiple levels of hearsay. Hughes Suppl. Mem. at 14-16. Neither of these arguments has merit. Hughes contends that the notes are unreliable because they reflect confusion and contain inconsistent statements. Id. at 14-15. But the inconsistencies in the notes can be taken into account in assessing their probative value. There is no reason why the confusion reflected in the notes need bar their inadmissibility altogether. Hughes further contends that the notes "present multiple levels of hearsay, as they purport to reflect the out of court statements of three different declarants: the intake screening person, Mr. Hughes, and O/P." Id. at 15-16. But Hughes himself seems to recognize that the hearsay of whomever wrote the notes is admissible under the business records exception. Id. at 15. And Hughes' own statements about the transaction are not hearsay at all, as they are not being admitted for their truth — that what Hughes said was true or that "O/P" actually said those things — but rather as evidence of what Hughes thought about the transaction when he spoke to Weinstock. For example, even if Hughes **[**45]** were incorrect in his representation that "he isn't on the deed but does have a lease," that would nonetheless be probative of what Hughes thought at that time about whether he was on the deed.

— that he previously had merely entered into a loan, rather than a transaction in which someone purported to gain ownership of the Property. No reasonable jury could conclude otherwise under the clear and convincing evidence standard. Whatever the resolution of the Hughes-Abell **[**48]** dispute, then, it cannot seriously be disputed that Wells Fargo would never have entered into the transaction with Hughes had Hughes honestly disclosed that he had entered into a transaction with another party through which that party claimed to have purchased the Property. Hughes' strongest counterargument is that, due to his purported confusion about the transaction, Hughes had no intent to deceive Wells Fargo, but rather simply did not understand what information Wells Fargo would deem relevant to the transaction. Intent is typically a difficult element to prove, requiring as it does the judging of not only a person's actions but his motivations. But it is simply not credible that Hughes completed the transaction with Wells Fargo without understanding the significance of someone else claiming ownership of the Property. No jury could reasonably conclude that Hughes made the misrepresentations with anything other than the intent to deceive Wells Fargo. Since a jury could not reasonably conclude other than that Wells Fargo has established a claim of fraud against Hughes by clear and convincing evidence, the Court will grant summary judgment for Wells Fargo on this claim. The Court **[**49]** notes that it is not presently reaching a determination as to the damages Wells Fargo is entitled to on this counterclaim.

iii. Equitable Subrogation Claim

Wells Fargo argues that it "is entitled to be equitably subrogated to the lien position and extent of the prior liens and deeds of trust" on the Property. Wells Fargo Countercls. Against Hughes ¶ 14. Wells Fargo currently holds a note (mortgage) secured by a deed to the property. Id. ¶ 10. However, both Hughes and Abell contend that Wells Fargo's **[*96]** mortgage deed is invalid. Hughes contends that his transaction with Wells Fargo violated the CPPA, and Abell contends that Hughes did not own the property when he purported to enter into the transaction with Wells Fargo. Wells Fargo notes that its funds were used to pay off two prior liens on the Property, one held by Chase Home Finance in the amount of $87,745.13 and one held by Independence Financial Corporation in the amount of $16,755.03. Id. ¶ 13; Wells Fargo Mem. at 30. Wells Fargo thus argues that, to the extent its deed of trust is ruled void, it is entitled to be equitably subrogated — that is, to "step into the shoes" — of the prior liens on the property that were paid off using **[**50]** its funds. Wells Fargo Countercls. Against Hughes ¶ 14. As a practical matter, this would mean that Wells Fargo would receive a lien on the property in the amount of $104,500.46, the sum of the amounts of the two previously-existing liens. Wells Fargo Mem. at 30. Wells Fargo's crossclaim against Abell seeks equitable subrogation against Abell on the same logic if Abell is ultimately found to be the owner of the Property. Wells Fargo Cross-cls. Against Abell ¶¶ 21-27.

Abell's written briefing contends that Wells Fargo is not entitled to equitable subrogation because Wells Fargo had notice of the defects in the Property's title when it commenced the transaction with Hughes. Def. Vincent Abell's Opp'n to Wells Fargo's Mot. for Summ. J. [Docket Entry 140] at 6. However, at the motions hearing before the Court on February 24, 2012, Abell indicated that he did not object to Wells Fargo's equitable subrogation claim because, assuming that he owns the property, he should not receive a windfall of the prior liens being paid off at Wells Fargo's expense. Hughes, however, does object to Wells Fargo's equitable subrogation claim. He argues that it is premature for Wells Fargo to seek equitable **[**51]** subrogation before the Court has even made a determination as to the validity of Wells Fargo's mortgage deed. Hughes Opp'n at 40. Hughes contends further that equitable relief would be inappropriate because Wells Fargo allegedly violated the CPPA in making the mortgage, and a party is not entitled to equity if he has himself behaved wrongfully. Id. at 40-41.

The Court is not inclined to accept Hughes' argument with respect to the alleged CPPA violation. Hughes is essentially making the same argument that he urged the Court to reject with respect to his own CPPA claim, namely that unclean hands bars recovery. To be sure, there may be a distinction between asserting that unclean hands bars an equitable remedy such as subrogation and claiming that inequitable conduct bars recovery under a statute such as the CPPA. Nonetheless, having allowed Hughes to proceed on his CPPA claim despite his conduct, and considering the nature of that conduct, the Court is not inclined to bar Wells Fargo from receiving equitable subrogation of its loan, regardless of how the CPPA claim is ultimately resolved. Prior to the events of this case, the Property was encumbered by two liens. Wells Fargo paid off **[**52]** those loans because, due to Hughes' fraud, it did not know that Abell was claiming ownership of the Property. Even if Hughes were to prevail on a parallel (and therefore informally "offsetting") CPPA claim, there is simply no reason why the Property's current owner should take the Property unencumbered when Wells Fargo paid off the existing liens under fraudulent circumstances. The Court believes that it is appropriate for Wells Fargo to have a lien on the Property in the amount of the two previously-existing liens that Wells Fargo satisfied, regardless of whether Abell or Hughes owns the Property and regardless **[*97]** of whether Hughes prevails on his CPPA claim.

Hughes is on somewhat firmer ground when he argues that it may be premature for the Court to grant equitable subrogation to Wells Fargo before it is determined whether Wells Fargo's mortgage deed is valid. If Hughes prevails in his assertion of title over Abell, and if the CPPA claim does not ultimately require rescission of the Wells Fargo-Hughes transaction (either because the claim is unsuccessful or because that is not the appropriate remedy), Wells Fargo may well possess a valid mortgage on the property, making equitable subrogation **[**53]** unnecessary. Furthermore, even if the Wells Fargo-Hughes transaction is unwound, making equitable subrogation necessary, which of Wells Fargo's equitable subrogation claims should be granted (the one against Hughes or the one against Abell) will depend on the outcome of the Hughes-Abell dispute.

Under these circumstances, the Court is inclined to grant both of Wells Fargo's equitable subrogation claims with recognition that this issue cannot be resolved definitively separate from Hughes' ongoing claims against Wells Fargo and Abell. Wells Fargo's motion for summary judgment will therefore be granted both as to Hughes and as to Abell, with the acknowledgment that final judgment in this case with respect to equitable subrogation will ultimately need to account for the resolution of the other disputes, consistent with this Opinion.

iv. Equitable Lien and Unjust Enrichment Claims

Wells Fargo contends that it should receive an equitable lien on the Property. Wells Fargo claims that "it would be improper and inequitable for Mr. Hughes to obtain a windfall by receiving an unencumbered interest in the Property or a priority interest in the Property" and that, therefore, "[s]hould Wells Fargo's **[**54]** lien be deemed void, then equity and the ends of justice require that the Court declare that Wells Fargo has an equitable lien securing its loan." Wells Fargo Countercls. Against Hughes ¶¶ 16-17. Hughes argues that Wells Fargo's violation of the CPPA should act as a bar to this equitable relief. Hughes Opp'n at 41.

Even if Wells Fargo is not barred from seeking an equitable lien, considering the outcomes that now seem possible in this case, it is unclear to the Court how such a lien would make sense.***HN22***[] "Liens, whether equitable or legal, are merely a means to the end of satisfying a claim for the recovery of money." *Dep't of Army v. Blue Fox, Inc., 525 U.S. 255, 262, 119 S. Ct. 687, 142 L. Ed. 2d 718 (1999)*. If Abell, rather than Hughes, is ultimately found to own the Property, Hughes' mortgage deed is probably invalid, since Abell was not a party to the transaction with Wells Fargo. Under those circumstances, it is not clear why Wells Fargo would be entitled to an equitable lien as a claim against Hughes on a property that Hughes does not actually own. If, on the other hand, the dispute between Hughes and Abell results in Hughes' ownership of the Property, then it is also not clear why an equitable lien would be appropriate. **[**55]** An equitable lien would not be necessary, of course, if Wells Fargo's mortgage deed is valid. And if the Wells Fargo-Hughes transaction violated the CPPA and the mortgage deed was deemed invalid on that ground, it is difficult to see why a lien should be placed on the property to replace a transaction that was deemed unlawful.

Given this apparent uncertainty, the Court will now deny Wells Fargo's motion for summary judgment on this count. If Wells Fargo can articulate a coherent rationale in support of an equitable lien at a **[*98]** later date, the Court will reconsider the issue at that juncture.

v. Unjust Enrichment and Breach of Contract Claims

Wells Fargo claims that Hughes would be unjustly enriched to the extent that he is successful in any claim that Wells Fargo's mortgage deed is invalid. Wells Fargo Countercls. Against Hughes ¶ 23. Wells Fargo notes that it paid off the liens on the Property, as well as Hughes' unsecured debts, and seeks judgment for the sum total amount of this debt —$121,292.46, plus interest. Id. ¶¶ 19-24. Wells Fargo also asserts a claim for breach of contract, on the theory that if the mortgage note is in fact valid, Hughes is in default for the principal amount **[**56]** of $188,952.96, plus interest, fees, and costs. Id. ¶¶ 31-37.

HN23[] There can be no claim for unjust enrichment when an express contract exists between parties. See *Schiff v. AARP, 697 A.2d 1193, 1194 (D.C. 1997)*. Wells Fargo's claims for unjust enrichment and breach of contract are therefore mutually exclusive; it cannot prevail on both claims. Furthermore, both because Abell may actually own the Property and because rescission is a remedy available under the CPPA, it is still not clear whether Wells Fargo has a valid mortgage with Hughes. On the other hand, given Hughes' conduct here, it would be inequitable for Hughes to have his debts paid off by Wells Fargo at no cost to him, even if Hughes has a parallel claim under the CPPA based on Wells Fargo's conduct. Under these circumstances, the Court feels it is most appropriate to grant Wells Fargo's motion for summary judgment on the unjust enrichment claim, again with the understanding that final judgment in this case will ultimately need to account for whether Wells Fargo has a valid contract with Hughes that makes this remedy inappropriate. [2] But since the breach of contract claim is also tied up in Hughes' dispute with Abell, the Court **[**57]** will deny summary judgment on Wells Fargo's breach of contract claim. Resolution of this count must wait for another day.

c. Wells Fargo's Crossclaims Against Abell and Abell's Crossclaim Against Wells Fargo

Wells Fargo asserts four crossclaims against Abell, who in turn asserts one crossclaim against Wells Fargo. First, Wells Fargo alleges that Abell defrauded Wells Fargo by intentionally failing to inform it that he held the deed to the Property and failing to record his deed for almost two years. Wells Fargo Cross-cls. Against Abell ¶¶ 6-15. Second, Wells Fargo seeks to quiet title against Abell on the ground that Abell obtained his deed from Hughes by improper means. Id. ¶¶ 16-20. Third, as noted above, Wells Fargo claims that, under the doctrine of equitable subrogation, its lien should be subrogated to those of the prior secured creditors whose debts were satisfied by Wells Fargo. Id. ¶¶ 21-27. Fourth, Wells Fargo contends that Abell has been unjustly enriched because Wells Fargo paid off the loans encumbering the **[**58]** Property. Id. ¶¶ 28-33. In turn, Abell's crossclaim against Wells Fargo seeks to quiet title on the ground that Abell's deed was recorded first in time to Wells Fargo's mortgage deed. Abell Cross-cl. Against Wells Fargo ¶¶ 74-75.

i. Fraud Claim

Wells Fargo alleges that Abell defrauded Wells Fargo by failing to inform it **[*99]** that he had a deed to the Property when he knew that Hughes was representing himself to be the owner of the Property. Wells Fargo Cross-cls. Against Abell ¶¶ 9-11. Wells Fargo also alleges that Abell intentionally failed to record his deed for almost two years so that Wells Fargo would believe Hughes was the record owner of the property. Id. ¶ 11. Wells Fargo seeks a judgment against Abell in the amount of the principal of its loan to Hughes, $192,500, plus interest, punitive damages, and fees and costs. Id. 15. Abell responds that he was unaware that Hughes and Wells Fargo were entering into a "refinancing" transaction, but rather thought that Hughes was seeking a loan in order to exercise the "option" agreement between Hughes and Abell. Defendant/Counter-Pl./Cross-Pl. Vincent Abell's Mem. of P. & A. in Opp'n to Wells Fargo Bank, N.A.'s Mot. for Summ. J. [Docket Entry **[**59]** 116] ("Abell Opp'n") at 3, 6. Abell further claims to have attempted to notify Wells Fargo of his claim of ownership of the Property by contacting the company that he believed was serving as title agent to the transaction. Id. at 3, 6-7. Abell informed the Court at the motions hearing that the company has since gone out of business.

The Court finds that too many material facts are in dispute for summary judgment to be granted in Wells Fargo's favor on the fraud count. It is certainly suspicious that Abell, after nearly two years, suddenly chose to record his deed to the Property one week before the Wells Fargo-Hughes transaction. But Wells Fargo has not put forward concrete evidence that Abell knew the nature of its developing transaction with Hughes. Abell's claims that he thought the transaction was, in fact, merely a loan and that he tried to notify a title company of his purported ownership are plausible, albeit questionable given the suspicious timing of his recording of his deed and the convenient fact that the company that he claims to have notified is no longer in operation. Hence, Wells Fargo's motion for summary judgment will be denied on this count.

ii. Quiet Title Claims

---

[2] If the Court ultimately concludes that there is a contract between Wells Fargo and Hughes, then under Schiff the judgment for unjust enrichment will have to be vacated.

Wells **[**60]** Fargo seeks to quiet title against Abell on the ground that Abell improperly procured the deed from Hughes. Wells Fargo Cross-cls. Against Abell ¶¶ 16-20. In turn, Abell also seeks to quiet title against Wells Fargo on the ground that Abell's deed was recorded first in time and is superior in title to the Wells Fargo deed of trust. Abell Cross-cl. Against Wells Fargo ¶¶ 74-75. These quiet title counts depend on the outcome of the Hughes-Abell dispute, which is not the subject of Wells Fargo's motion for summary judgment. Wells Fargo may be entitled to a quiet title judgment against Abell, but that determination must await a finding that Abell improperly obtained the deed from Hughes. Hence, it would be premature to grant either Wells Fargo's or Abell's quiet title counts.

iii. Equitable Subrogation Claim

As discussed above, Wells Fargo claims that it would be inequitable for Abell to obtain a windfall from Wells Fargo paying off the two liens previously encumbering the property. Wells Fargo Cross-cls. Against Abell ¶¶ 21-27. As indicated above, at the motions hearing before the Court, Abell indicated that he acquiesces to Wells Fargo's equitable subrogation claim because he does not **[**61]** believe he is entitled to a windfall from Wells Fargo paying off the liens on the Property.

The Court agrees that Wells Fargo's claim of equitable subrogation should be granted, with the acknowledgment that final judgment in this case with respect to **[*100]** equitable subrogation will ultimately need to account for the resolution of the other disputes in the case, including disposition of the ownership of the Property. The Court notes that while the text of Wells Fargo's crossclaim implies that the lien on the Property should be in the full amount of Wells Fargo's mortgage agreement with Hughes, Wells Fargo's briefing seems to suggest that the lien should be in the lesser amount of the encumbrances that Wells Fargo paid off (about $104,500). Compare Wells Fargo Cross-cls. Against Abell ¶ 27 with Wells Fargo Mem. at 39. The amount of Wells Fargo's lien on the Property can be resolved at a later date based on the resolution of the other disputes.

iv. Unjust Enrichment Claim

Wells Fargo alleges that Abell's failure to record his deed and "complicity in Hughes' misrepresentation of ownership of the Property" led to Wells Fargo satisfying the liens on the Property. Wells Fargo Cross-cls. Against Abell **[**62]** ¶¶ 28- 33; see Wells Fargo Mem. at 39-40. Wells Fargo therefore seeks a judgment against Hughes for unjust enrichment in the amount of the liens that it paid off. The Court agrees that Wells Fargo should receive compensation from Abell for paying off the liens on the Property if Abell is ultimately found to be the owner of the Property. However, the Court believes it is more appropriate that Wells Fargo receive a judgment in the form of a lien on the Property, which can be paid off by Abell as a mortgage would, than a judgment in this amount against Abell. Hence, the granting of Wells Fargo's equitable subrogation claim with respect to Abell makes this unjust enrichment claim unnecessary. The Court will therefore deny Wells Fargo's motion for summary judgment with respect to the unjust enrichment claim against Abell.

d. Abell's Renewed Motion for Summary Judgment

On April 20, 2012, Abell filed a renewed motion for summary judgment on all the remaining counts that Hughes alleges against Abell and Modern Management, arguing that the statute of limitations bars these claims. Mem. of P. & A. in Supp. of Vincent Abell and Modern Mgmt. Co.'s (Renewed) Mot. for Summ. J. [Docket Entry 137] ("Abell **[**63]** Mem."). Abell acknowledges that the Court previously rejected this argument, concluding that Hughes' allegations that defendants had concealed material terms of the transaction either obscured when Hughes' claims accrued or raised the possibility of equitable tolling of the statute of limitations. *Hughes, 794 F. Supp. 2d at 12-13*. Abell states that he "respectfully disagrees" with these conclusions. Abell Mem. at 2-3. Hence, his motion is really a motion for reconsideration of the Court's previous decision.

HN24[] Although there is no Federal Rule of Civil Procedure that expressly addresses motions for reconsideration, see *Lance v. United Mine Workers of Am. 1974 Pension Trust, 400 F. Supp. 2d 29, 31 (D.D.C. 2005)*, because the Court's opinion did not fully adjudicate all the claims in the case, Abell's motion is properly characterized as a motion pursuant to *Rule 54(b)*, see *Fed. R. Civ. P. 54(b)* (where court resolves "fewer than all the claims," it may revise "its opinion at any time before the entry of a judgment adjudicating all the claims and all the parties' rights and liabilities"). "The Court has broad discretion to hear a motion for reconsideration brought under *Rule 54(b)*," *Isse v. Am. Univ., 544 F. Supp. 2d 25, 29 (D.D.C. 2008)*, **[**64]** and reconsideration is appropriate "as justice requires," *Cobell v. Norton, 355 F. Supp. 2d 531, 540* ***[*101]*** *(D.D.C. 2005)*. "Considerations a court may take into account under the 'as justice requires' standard include whether the court 'patently' misunderstood the parties, made a decision beyond the adversarial issues presented, made an error in failing to consider controlling decisions or data, or whether a controlling or significant change in the law has occurred." *Williams v. Johanns, 555 F. Supp. 2d 162, 164 (D.D.C. 2008)*. Review under *Rule 54(b)* "amounts to determining, within the Court's discretion, whether reconsideration is necessary under the relevant circumstances." *Cobell, 355 F. Supp. 2d at 540*.

The essence of Abell's argument at this stage is that a reasonable person in Hughes' position would have been put on "inquiry notice" that Abell and Modern Management concealed material facts about the transaction. Abell Mem. at 8-15. Abell contends that even if Hughes believed, on the basis of Abell and Modern Management's alleged misrepresentations, that the transaction was a loan, not a sale, the other facts — such as the handwritten note in Hughes' handwriting indicating that he "sold **[**65]** my home" — should have put him on notice that what had been represented was not quite right. Id. at 7-12. Abell maintains that a reasonable person under these circumstances was under an obligation to investigate further. Id. at 12-13.

The Court will deny Abell's motion. As a preliminary matter, the Court notes that the motion was filed well over a year after the Court's November 2010 decision and well after the deadlines for filing dispositive motions in this case. Abell does not rely on any new facts in expressing his disagreement with the Court's prior decision. Although the Court may, consistent with *Rule 54(b)*, revise its opinion at any time prior to judgment on all claims in the case, fairness to the other parties suggests that the Court's prior decision should not be revisited so late in the day unless it was truly erroneous. And here the Court believes its original decision was correct. As indicated above, the Court believes that Hughes was at least aware that Abell was asserting ownership over the Property at the time of Hughes' transaction with Wells Fargo. Nonetheless, the Court notes that Hughes' claims against Abell, Modern Management, and Baltimore are not limited to injury **[**66]** from misrepresentations regarding who would own the Property after the transaction, but also include, for example, the allegation that there was a gross disparity between the price of the property or services sold and the value of the property or services sold. See, e.g., Am. Compl. ¶¶ 50-55. Misrepresentations made to Hughes by Abell or Modern Management may have concealed essential details of the transaction from Hughes that could be vital to his assertion of these claims. Dismissal of Hughes' claims on the basis of the statute of limitations would therefore be inappropriate on the basis of the record at this time.

IV. Conclusion

For the reasons described above, Wells Fargo's motion will be granted in part and denied in part. Wells Fargo's motion will be denied with respect to Hughes' remaining claims against Wells Fargo. With respect to Wells Fargo's counterclaims against Hughes, Wells Fargo's motion will be granted with respect to the equitable subrogation claim (Count I), denied with respect to the equitable lien claim (Count II), granted with respect to the unjust enrichment claim (Count III), granted with respect to the fraud claim (Count IV), and denied with respect to the breach **[**67]** of contract claim (Count V). With respect to Wells Fargo's crossclaims against Abell, Wells Fargo's motion will be denied with respect to the fraud claim (Count I), denied **[*102]** with respect to the quiet title claim (Count II), granted with respect to the equitable subrogation claim (Count III), and denied with respect to the unjust enrichment claim (Count IV). With respect to Abell's crossclaim for quiet title against Wells Fargo, Wells Fargo's motion will be denied. Abell's renewed motion for summary judgment will be denied in its entirety. A separate order has been issued on this date.

For Heat and Control, Inc., Defendant: Robert Scott Shwarts, Russell P. Cohen, Orrick Herrington & Sutcliffe LLP, San Francisco, CA.

Judges: YVONNE GONZALEZ ROGERS, UNITED STATES DISTRICT COURT JUDGE.

Opinion by: YVONNE GONZALEZ ROGERS

Opinion

NOTICE OF TENTATIVE RULING ON MOTION OF DEFENDANT HEAT AND CONTROL, INC. TO DISMISS, PARTIALLY GRANTING MOTION WITH LEAVE TO AMEND

TO ALL PARTIES AND THEIR ATTORNEYS OF RECORD, PLEASE TAKE NOTICE OF THE FOLLOWING TENTATIVE RULING ON THE MOTION TO DISMISS SCHEDULED FOR HEARING ON JULY 19, 2012 AT 2:00 P.M.

The Court has reviewed the parties' papers and is inclined to partially grant the motion to dismiss with leave to amend. This is a *tentative* ruling and the parties still have an opportunity to present oral argument. Alternatively, if the parties **JOINTLY** stipulate in writing to entry of the tentative ruling, the hearing shall be taken off calendar, and the tentative ruling shall become the Order of the Court. Otherwise, the hearing shall be continued to June 26, 2012 at 2:00 p.m.

The Court ***TENTATIVELY*** **GRANTS IN PART** and **DENIES IN PART** the Motion **[*2]** of Defendant Heat and Control, Inc. to Dismiss the Complaint **WITH LEAVE TO AMEND** as follows:

I. BACKGROUND

This case involves access to replacement parts for processing, packaging, and weighing equipment used in food production. The Complaint alleges that Defendant Heat and Control, Inc. ("H&C") is the exclusive North America distributor of scales, equipment and parts manufactured by Ishida Co., Ltd. ("Ishida"). Complaint ¶ 8. Plaintiff High Tek USA, Inc. ("High Tek") alleges that its inability to purchase Ishida parts from H&C violates federal antitrust and California unfair competition laws.

High Tek alleges seven causes of action: violations of Sections 1 and 2 of the Sherman Act, *15 U.S.C. §§ 1* & *2* (Counts I and II); price discrimination under the Robinson-Patman Act, *15 U.S.C. § 13* (Count III); and state law claims for Intentional Interference with Contractual Relations (Count IV); Intentional Interference with Prospective Economic Advantage (Count V); Promissory Estoppel (Count VI); and violations of California's Unfair Competition Law, *Cal. Bus. & Prof. Code §§ 17200 et seq.* (Count VII). H&C has moved to dismiss on the grounds that this is a garden-variety business dispute between **[*3]** a parts supplier and its former customer, which the antitrust laws do not reach.

II. LEGAL STANDARD

To survive a motion to dismiss, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. In the antitrust context, "a court must determine whether an antitrust claim is 'plausible' in light of basic economic principles." *William O. Gilley Enters., Inc. v. Atl. Richfield Co., 588 F.3d 659, 662 (9th Cir. 2009)* (citing *Twombly, supra, 550 U.S. at 556*). If the allegations in the complaint fail to give rise to a plausible claim for relief, "'this basic deficiency should . . . be exposed at the point of minimum expenditure of time and money by the parties and the court.'" *Twombly, supra, 550 U.S. at 558* (citations omitted).

III. ANALYSIS

A. Section 1 Sherman Act — Contract in Restraint of Trade

As to Count I, alleging a violation of *Section 1* of the Sherman Act, High Tek fails to allege sufficiently each of the required elements of the claim. *Section 1* of the Sherman Act forbids contracts in restraint of trade. [1] To **[*4]** state a *Section 1* Sherman Act claim, the plaintiff must plead not just ultimate facts (such as a conspiracy), but evidentiary facts which, if true, will prove: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce; (3) which actually injures competition. *Twombly, supra, 550 U.S. at 548*.

Here, the Complaint identifies H&C's contract with Ishida, which makes H&C the exclusive North America distributor of Ishida parts, but does not allege that either H&C or Ishida entered into the contract for the purpose of harming or restraining commerce. Moreover, as to the third element, the Complaint alleges only the ultimate fact that "the [unspecified] way [H&C] executes **[*5]** those contracts in North America unreasonably restrains trade" without providing any evidentiary fact of injury to competition.

Based on the foregoing analysis, the Court **Grants** the Motion to Dismiss Count I **With Leave To Amend.**

---

[1] *15 U.S.C. § 1*. Trusts, etc., in restraint of trade illegal; penalty

> Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony ...

B. *Section 2* SHERMAN ACT — ILLEGAL MONOPOLY

As to Count II, alleging a violation of *Section 2* of the Sherman Act, Plaintiff fails to plead facts regarding the relevant product market. *Section 2* of the Sherman Act makes it unlawful to monopolize, attempt to monopolize, or combine or conspire to monopolize. [2] To state a cause of action for the offense of monopoly under *Section 2* of the Sherman Act, a plaintiff must plead three elements: (1) the relevant market that defendant has monopolized; (2) possession of monopoly power in that market; and (3) willful acquisition or maintenance of that power through competitively unreasonable means, rather than as a consequence of a superior product, business acumen, or historic accident. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

Charges of monopolization can only be judged in the framework of the relevant market, which has two dimensions: the "relevant geographic market" and the "relevant product market." While the parties agree that the relevant geographic market is the United States, they differ on the scope of the "relevant product market." In the Complaint, High Tek alleges that the relevant product market is the purchase of Ishida parts. Complaint ¶ 29. In its Opposition Brief, High Tek adds two additional relevant markets: the aftermarket for refurbished Ishida scales and the aftermarket for servicing Ishida scales. H&C argues that the relevant product market is all food processing scales sold in the United States.

High Tek alleges no facts from which it plausibly could be inferred that the relevant product market is the purchase of Ishida parts (the aftermarket for refurbished Ishida scales and/or the aftermarket for servicing Ishida scales) [3] as opposed to all food processing scales sold in the United States. *See* *Brown Shoe Co. v. United States, 370 U.S. 294, 325-26, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)* ("The **[*7]** outer boundaries of a product market are determined by the reasonable interchangeability of use . . . between the product itself and the substitutes for it."); *see also* *Volvo Trucks N. Am., Inc. v. Reeder-Simco GMC, Inc., 546 U.S. 164, 180, 126 S. Ct. 860, 163 L. Ed. 2d 663 (2006)* ("Interbrand competition, our opinions affirm, is the 'primary concern of ***antitrust law***.'"). This infirmity is fatal to its *section 1* Sherman Act claim. *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)* ("where there are market alternatives that buyers may readily use for their purposes, illegal monopoly does not exist.").

Because High Tek has failed to show a relevant market against which H&C's market power and the anticompetitive effects of its practices can be judged, [4] High Tek has failed to state a *Section 2* Sherman Act claim.

---

[2] *15 U.S.C. § 2*. Monopolizing trade a felony; penalty

> Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize **[*6]** any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony ...

[3] In its Opposition Brief, High Tek attempts to explain why it believes that Ishida parts is the relevant market. For example, it argues that Ishida equipment is the "premium brand," the "gold standard" of weighing and packaging equipment, that Ishida equipment is utilized by a majority of manufacturers and distributors of packaging equipment. Facts not alleged in the Complaint will not prevent dismissal for failure to state a claim. Without deciding whether the additional facts are sufficient to state a *Section 2* Sherman Act claim, the Court will permit High Tek to amend its Complaint to allege additional **[*8]** facts.

[4] The term "monopolize," as used in the federal antitrust laws, means the power either to obtain, or to maintain, the power to remove or exclude competitors from the field of competition in a particular business or industry. Since H&C is the exclusive distributor of Ishida parts, H&C maintains its so-called monopoly power to purchase Ishida parts because of H&C's contract with Ishida to be the exclusive North American distributor for Ishida parts, not because of any of the alleged anticompetitive behavior. Additionally, High Tek's theory, that because it is a competitor that has been harmed, that H&C has harmed competition does not state a claim under the antitrust laws. "[T]he plaintiff here must allege and prove harm, not just to a single competitor, but to the competitive process, *i.e.*, to competition itself." *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*.

Based on the foregoing analysis, the Court **GRANTS** the Motion to Dismiss Count II **WITH LEAVE TO AMEND.**

C. ROBINSON-PATMAN [*9] ACT CLAIM — PRICE DISCRIMINATION

As to Count III for violation of the Robinson-Patman Act, High Tek fails to allege each of the required elements of the claim. The Robinson-Patman Act of 1936, *15 U.S.C. § 13*, forbids price discrimination when it is apt to have an anticompetitive effect. To state a claim for a violation of *Section 2(a) of the Robinson-Patman Act*, a plaintiff must plead four elements: (1) the relevant sales were made in interstate commerce; (2) the products sold were of the same grade and quality; (3) that H&C discriminated in price as between High Tek and another purchaser; and (4) the discrimination had a prohibited effect on competition. *See* *Texaco Inc. v. Hasbrouck, 496 U.S. 543, 556, 110 S. Ct. 2535, 110 L. Ed. 2d 492 (1990)*.

The Complaint alleges that H&C required High Tek to pay a 10-20% markup on all Ishida parts — something other companies who were not in direct competition with H&C were not required to pay. Complaint ¶ 15. Thus, High Tek alleges that it was *not* in competition with the purchasers who were allegedly the beneficiaries of the price discrimination. As such, High Tek has failed to state a claim for price discrimination under the Robinson-Patman Act.

Based on the foregoing analysis, the **[*10]** Court **GRANTS** the Motion to Dismiss Count III **WITH LEAVE TO AMEND.**

D. INTENTIONAL INTERFERENCE

As to Counts IV and V for intentional interference with contractual relations and intentional interference with prospective economic advantage, H&C attacks the merits of the claim but does not address the sufficiency of the allegations in the Complaint. The elements for a cause of action for intentional interference with contractual relations and intentional interference with prospective economic advantage essentially are: (1) a contract or other economic relationship between plaintiff and a third party; (2) the defendant's knowledge of the contract or relationship; (3) defendant's intentional acts designed to induce a breach or disrupt the contract or relationship; (4) actual breach or disruption; and (5) damage. *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1153, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (Cal. 2003)*; *Quelimane Co. v. Stewart Title Guaranty Co., 19 Cal. 4th 26, 55, 77 Cal. Rptr. 2d 709, 960 P.2d 513 (Cal. 1998)*.

High Tek alleges that its inability to purchase Ishida parts has halted the company's ability to conduct business. Complaint ¶ 20. H&C argues that its decision not to sell High Tek Ishida parts was justified and was not wrongful. **[*11]** Whether H&C's actions were justified or privileged is an evidentiary issue (for which H&C will have the burden of proof), not a pleading issue. As such, H&C has failed to identify a pleading defect in High Tek's intentional interference claims.

The Court **DENIES** the Motion to Dismiss Counts IV and V on this basis.

E. PROMISSORY ESTOPPEL

As to Count VI, High Tek fails to state a claim for promissory estoppel because the Complaint alleges that H&C performed the very promise the High Tek seeks to enforce. The elements for a claim of promissory estoppel are: "'(1) the party to be estopped must be apprised of the facts; (2) he must intend that his conduct shall be acted upon, or must so act that the party asserting the estoppel has a right to believe it was so intended; (3) the other party must be ignorant of the true state of facts; and (4) he must rely upon the conduct to his injury.'" *People v. Castillo, 49 Cal. 4th 145, 156 n.10, 109 Cal. Rptr. 3d 346, 230 P.3d 1132 (Cal. 2010)* (quoting *City of Goleta v. Superior Court, 40 Cal. 4th 270, 279, 52 Cal. Rptr. 3d 114, 147 P.3d 1037 (Cal. 2006)*). If the promise sought to be enforced was performed, then the doctrine is inapplicable. *Money Store Inv. Corp. v. S. California Bank, 98 Cal. App. 4th 722, 732, 120 Cal. Rptr. 2d 58 (Cal. Ct. App. 2002)* **[*12]** ("A cause of action for promissory estoppel would be superfluous"). Moreover, because promissory estoppel is an equitable doctrine that provides a substitute for consideration to enforce a promise, if the only claimed reliance is performance of the act bargained for, the doctrine is inapplicable. *See* *Fontenot v. Wells Fargo Bank, N.A., 198 Cal. App. 4th 256, 275, 129 Cal. Rptr. 3d 467 (Cal. Ct. App. 2011)*.

The Complaint alleges that prior to entering into a parts account, H&C required that High Tek remove language from its catalog that stated something to the effect of "High Tek is the best in the industry." Complaint ¶ 14. High Tek alleges that it detrimentally relied upon a promise of a long-term parts account, and made the requested change to its catalog. H&C provided High Tek with a parts account to purchase Ishida parts from early 2007 until December 20, 2011. *Id.* ¶¶ 14-16.

Either adequate consideration was given here, *i.e.*, H&C promised a long-term parts account if High Tek removed certain language from its catalog, or it was rendered moot by H&C's performance of its obligations under the agreement, *i.e.*, H&C granted High Tek a parts account and provided High Tek Ishida parts for four over years. To **[*13]** the extent that High Tek believes that it was entitled to a longer term contract, under California law, any agreement not to be performed within a year must be reduced to writing to be valid. *See* *Cal. Civ. Code § 1624(a)(1)* (statute of frauds).

Based on the foregoing analysis, High Tek has failed to state a claim for promissory estoppel.

F. *California Business and Professions Code §§ 17200 et seq.*

As to Count VII, for violations of California's Unfair Competition Law ("UCL"), *Cal. Bus. Prof. Code. § 17200*, High Tek claims are based upon its federal antitrust claims. California's UCL statute prohibits "any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. Prof. Code. § 17200*; *Cel-Tech Comm., Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (Cal. 1999)*. With respect to Plaintiff's allegations under the unfair prong of the UCL, because High Tek simply borrows from its federal antitrust claims, and because High Tek has failed to adequately plead its antitrust claims, its UCL claim necessarily fails as well. *See* *Ingels v. Westwood One Broad. Servs., Inc., 129 Cal. App. 4th 1050, 1060, 28 Cal. Rptr. 3d 933 (Cal. Ct. App. 2005)*.

Based on the foregoing analysis, the Court **GRANTS** the Motion **[*14]** to Dismiss Count VII **WITH LEAVE TO AMEND.**

IV. CONCLUSION

Therefore, the Court *tentatively* Orders the following:

1) Defendant's Motion to Dismiss is **GRANTED IN PART** and **DENIED IN PART.**

2) Counts I, II, III, VI, and VII are **DISMISSED WITH LEAVE TO AMEND.**

3) Plaintiff shall have until July 16, 2012 to file an amended complaint.

No later than **2:00 p.m.** on **Friday, June 15, 2012,** the parties may **JOINTLY** stipulate in writing to entry of this tentative ruling. If the parties so stipulate, then the hearing shall be taken off calendar, and the tentative ruling shall become the Order of the Court. Otherwise, the hearing will take place on Tuesday, June 26, 2012 at 2:00 p.m.

IT IS SO ORDERED.

Date: June 11, 2012

/s/ Yvonne Gonzalez Rogers

YVONNE GONZALEZ ROGERS

UNITED STATES DISTRICT COURT JUDGE

LexisNexis® Headnotes

Business & Corporate Law > ... > Actions Against Corporations > Derivative Actions > Enforcement of Corporate Rights

HN1[] **Derivative Actions, Enforcement of Corporate Rights**

The theory in a derivative suit is that a corporation's board has been so faithless to investors' interests that investors must be allowed to pursue a claim in the corporation's name.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN2[] **Private Actions, Standing**

Perpetrators of antitrust offenses lack standing to complain about their own misconduct (which inures to their profit). Under the antitrust-injury doctrine, private antitrust litigation is limited to suits by those persons for whose benefit the laws were enacted.

Antitrust & Trade Law > Clayton Act > Claims

Mergers & Acquisitions Law > Antitrust > Interlocking Directorates

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

HN3[] Clayton Act, Claims

The antitrust-injury doctrine limits which private parties can pursue § 8 of the Clayton Act, *15 U.S.C.S. § 19*, claims.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > Interlocking Directorates

HN4[] Regulated Practices, Market Definition

To resolve a case under § 8 of the Clayton Act, *15 U.S.C.S. § 19*, a district judge must define a market and decide whether a merger between a company and one of the firms interlocked by the directorships would be unlawful.

Business & Corporate Law > ... > Actions Against Corporations > Derivative Actions > Procedural Matters

Civil Procedure > ... > Class Actions > Derivative Actions > Compromise

Civil Procedure > ... > Class Actions > Derivative Actions > Notice of Derivative Action

HN5[] Derivative Actions, Procedural Matters

The settlement of derivative litigation requires notice to other investors, followed by judicial approval, *Fed. R. Civ. P. 23.1(c)*.

Civil Procedure > ... > Class Actions > Derivative Actions > General Overview

Civil Procedure > Parties > Intervention > Intervention of Right

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > General Overview

HN6[] Class Actions, Derivative Actions

Under the law of the Seventh Circuit intervention (and thus party status) is essential to an appeal in a derivative suit. An immediate appeal is proper when a district court denies a motion for leave to intervene as of right under *Fed. R. Civ. P. 24(a)*.

Business & Corporate Law > ... > Actions Against Corporations > Derivative Actions > Procedural Matters

Civil Procedure > ... > Class Actions > Derivative Actions > Compromise

HN7[] Derivative Actions, Procedural Matters

Fed. R. Civ. P. 23.1(c) requires judicial approval of settlements in derivative suits precisely because the self-appointed investors may be poor champions of corporate interests and thus injure fellow shareholders. That the plaintiffs say they have other investors' interests at heart does not make it so.

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

Civil Procedure > Parties > Intervention > General Overview

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > ... > Class Actions > Derivative Actions > Compromise

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > General Overview

HN8[] Class Actions, Appellate Review

A district judge ought not try to insulate his decisions from appellate review by preventing a person from acquiring a status essential to that review. District judges are to grant intervention freely to persons who want to contest settlements in class actions under Fed. R. Civ. P. 23; that is no less true of derivative actions under Fed. R. Civ. P. 23.1.

Counsel: For ROBERT F. BOOTH TRUST, derivatively on behalf of nominal defendant Sears Holdings Corporation, RONALD GROSS, Plaintiffs - Appellees: Matthew Todd Hurst, Attorney, SUSMAN, HEFFNER & HURST, Chicago, IL; Kenneth J. Vianale, Attorney, VIANALE & VIANALE, Boca Raton, FL.

For THEODORE H. FRANK, Appellant: Theodore H. Frank, Attorney, CENTER FOR CLASS ACTION FAIRNESS, Washington, DC.

For WILLIAM C. CROWLEY, EDWARD S. LAMPERT, STEVEN T. MNUCHIN, RICHARD PERRY, ANN N. REESE, Defendants - Appellees: Paul Vizcarrondo, Attorney, WACHTELL, LIPTON, ROSEN & KATZ, New York, NY.

Judges: Before EASTERBROOK, Chief Judge, and BAUER and POSNER, Circuit Judges.

Opinion by: EASTERBROOK

Opinion

[*316] EASTERBROOK, *Chief Judge*. When Sears, Roebuck & Co. merged with Kmart Corp. in 2005, the holding company formed as the parent (Sears for short) inherited directors from both businesses. This suit concerns two of them: William C. Crowley and Ann N. Reese. Crowley also serves on the boards of AutoNation, Inc., and AutoZone, Inc., and Reese on the board of Jones Apparel Group, Inc. Two of Sears's shareholders **[**2]** contend that the consolidated business competes with those other firms and that §8 of the Clayton Act, 15 U.S.C. §19, forbids the interlocking directorships.

This is a shareholders' derivative action rather than a suit directly under §8. HN1[] The theory in a derivative suit is that a corporation's board has been so faithless to investors' interests that investors must **[*317]** be allowed to pursue a claim in the corporation's name. Sears is incorporated in Delaware, whose law determines whether investors may litigate derivatively on its behalf. See *Kamen v. Kemper Financial Services, Inc., 500 U.S. 90, 111 S. Ct. 1711, 114 L. Ed. 2d 152 (1991)*. Sears asked the district court to dismiss the suit, observing that Delaware usually allows investors to sue derivatively only if, after a demand for action, the board cannot make a disinterested decision. See *Braddock v. Zimmerman, 906 A.2d 776, 784-85 (Del. 2006)* (collecting authority). The two investors—Robert F. Booth Trust and Ronald Gross—filed this suit without first demanding that the board address the §8 issue. Sears observed that a majority of the board has no stake in the §8 question and can decide where the corporation's interests lie. But the district court refused to dismiss the **[**3]** suit, accepting the investors' assertion that a demand would have been futile. *2010 U.S. Dist. Lexis 18355 (N.D. Ill. Feb. 26, 2010)*.

Later the judge concluded that, despite *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, and its successors, §8 can be enforced through derivative litigation, even though cooperation with a competitor should benefit the investors. The concern of ***antitrust law***, after all, is that producers will cooperate and raise prices to the detriment of consumers. Higher prices mean lower output and a social loss through misallocation of resources. Yet no consumer has complained about the other directorships held by members of Sears's board, nor has the Department of Justice or the Federal Trade Commission raised an eyebrow. It seems odd to allow investors, who stand to gain if producers with market power cooperate, to invoke an antitrust doctrine that is designed for strangers' benefit. The problem is not only that ***HN2***[] perpetrators of antitrust offenses lack standing to complain about their own misconduct (which inures to their profit), but also that, when such people do invoke the antitrust laws, likely they have other objectives in view. In *Brunswick* **[**4]** the antitrust claim had been used to give one producer an advantage by shuttering a rival, at the expense of customers; the Supreme Court replied that this abuse of ***antitrust law*** must not be tolerated. It created the antitrust-injury doctrine, under which private antitrust litigation is limited to suits by those persons for whose benefit the laws were enacted. See also *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*; *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*.

Plaintiffs rely on *Protectoseal Co. v. Barancik, 484 F.2d 585 (7th Cir. 1973)*, for the proposition that private plaintiffs can enforce §8. We don't doubt this—but *Protectoseal* was not a shareholders' derivative suit, and ***HN3***[] the antitrust-injury doctrine, which the Supreme Court adopted four years after *Protectoseal*, limits which private parties can pursue §8 claims.

Antitrust suits are notoriously costly. See *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 557-60, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. ***HN4***[] To resolve a case under §8, a district judge must define a market and decide whether a merger between Sears and one of the firms interlocked by the directorships would be unlawful. After the district judge held that this case must **[**5]** proceed, the investors and Sears proposed a settlement: one of the two contested directors would resign, and the lawyers representing the investors could request as much as $925,000 in fees under a "clear sailing" clause that prohibited Sears from objecting. Perhaps Sears concluded that it was better to jettison one **[*318]** director and pay up to $925,000 in legal fees to opposing counsel than to dig in its heels and pay its own lawyers more than $1 million to defend an antitrust suit. But Theodore H. Frank, another of Sears's investors, thought the settlement a bad deal. It cost the firm cash out of pocket plus a director the shareholders had re-elected in 2009 (four years after the Kmart merger), without eliminating the risk of a later §8 suit by someone else (since one of the two directors would remain).

HN5[] The settlement of derivative litigation requires notice to other investors, followed by judicial approval, see *Fed. R. Civ. P. 23.1(c)*. Frank moved for leave to intervene so that he could oppose the settlement and appeal if necessary—for ***HN6***[] under the law of this circuit intervention (and thus party status) is essential to an appeal in a derivative suit. See *Felzen v. Andreas, 134 F.3d 873 (7th Cir. 1998)*, **[**6]** affirmed by an equally divided Court under the name *California Public Employees' Retirement System v. Felzen, 525 U.S. 315, 119 S. Ct. 720, 142 L. Ed. 2d 766 (1999)*. But the district court denied this motion, stating that Booth Trust and Gross adequately represent Frank's interests. Frank immediately appealed, which is proper when a district court denies a motion for leave to intervene as of right under *Fed. R. Civ. P. 24(a)*. See *Dickinson v. Petroleum Conversion Corp., 338 U.S. 507, 70 S. Ct. 322, 94 L. Ed. 299 (1950)*.

After the district judge denied Frank's motion to intervene, it also rejected the proposed settlement, though on grounds that allowed the parties to try again. Plaintiffs have asked us to dismiss the appeal as moot. Yet the case remains pending, and the parties have submitted another settlement for the district judge's approval. Even though the interlocks are gone—Crowley is no longer on Sears's board, and Reese has left the board of Jones Apparel—the prospect of future interlocks prevents the suit from being moot. See *United States v. W.T. Grant Co., 345 U.S. 629, 73 S. Ct. 894, 97 L. Ed. 1303 (1953)*. Frank wants to oppose any settlement (indeed, wants the district court to dismiss the suit) and appeal if one should be approved. Both the merits and the propriety **[**7]** of intervention are live issues. The motion to dismiss is denied.

The district judge's reason for denying Frank's motion to intervene—that Booth Trust and Gross adequately represent his interests—is unsound. Frank's position is entirely incompatible with the stance taken by Booth Trust and Gross. ***HN7***[] *Rule 23.1(c)* requires judicial approval of settlements in derivative suits precisely because the self-appointed investors may be poor champions of corporate interests and thus injure fellow shareholders. That the plaintiffs *say* they have other investors' interests at heart does not make it so. The district judge did not find that plaintiffs are right, and Frank wrong, about where the corporate interest lies. And even if the judge had concluded that the plaintiffs have the better of their dispute with Frank, still the judge should have granted his motion to intervene—for given *Felzen* the only way he can get appellate review is to become a party. ***HN8***[] A district judge ought not try to insulate his decisions from appellate review by preventing a person from acquiring a status essential to that review. In *Crawford v. Equifax Payment Services, Inc., 201 F.3d 877, 881 (7th Cir. 2000)*, we told district **[**8]** judges to grant intervention freely to persons who want to contest settlements in class actions under *Fed. R. Civ. P. 23*; that is no less true of derivative actions under *Rule 23.1*.

Our conclusion that Frank is entitled to intervene makes it unnecessary to decide whether *Felzen* survives *Devlin **[*319]** v. Scardelletti, 536 U.S. 1, 122 S. Ct. 2005, 153 L. Ed. 2d 27 (2002)*. *Devlin* holds that a member of a class certified under *Rule 23*, who asks the district court not to approve a settlement, need not intervene in order to appeal an adverse decision. Our opinion in *Felzen* gives several reasons why investors in a derivative suit differ from members of a certified class. See *134 F.3d at 875-76*. For example: a class member holds a personal claim for relief, which could be extinguished or cashed out by a settlement; but an investor does not hold any kind of personal stake in a derivative suit. The chose in action belongs to the corporation. Intervention separates an objecting investor from the thousands or even millions of shareholders, bondholders, employees, suppliers, and customers who could be affected, more or less directly, by the resolution of a derivative action.

The Supreme Court affirmed *Felzen* without opinion by a vote of **[**9]** 4-4. *Devlin* was decided by a vote of 6-3. This suggests that one or two Justices see a difference between the Rule 23 situation and the *Rule 23.1* situation. It is thus hard for a court of appeals to be confident that the Supreme Court as a whole would conclude that *Devlin* controls derivative actions as well as class actions. We think it best to leave the status of *Felzen* to another day—a day that, if district judges grant party status to serious objectors as they should, need never arrive.

We could stop at this point and leave the parties to slug it out in the district court, with an appeal by whoever loses (or objects to a settlement). But this litigation is so feeble that it is best to end it immediately, as both Sears and Frank unsuccessfully asked the district judge to do. The only goal of this suit appears to be fees for the plaintiffs' lawyers. It is impossible to see how the investors could gain from it—and therefore impossible to see how Sears's directors could be said to violate their fiduciary duty by declining to pursue it. See *Schechtman v. Wolfson, 244 F.2d 537, 540 (2d Cir. 1957)* (refusing, for this reason, to award attorneys' fees to the plaintiffs in a derivative suit **[**10]** based on a §8 claim).

We have mentioned that Booth Trust and Gross did not make a demand on the directors before filing suit, and that neither plaintiff nor any other investor (in his role as investor) suffers antitrust injury. Plaintiffs say that investors still can gain from this suit, because removing interlocking directors from the board will eliminate any chance that the United States will file a §8 suit to remove them. We don't get it. In order to avoid a *risk* of antitrust litigation, the company should be put through the litigation wringer (this suit) *with certainty* ?! How can replacing a 1% or even a 20% chance of a bad thing with a 100% chance of the same bad thing make investors better off?

Actually, the chance of suit by the United States or the FTC is not even 1%. The national government rarely sues under §8. *Borg-Warner Corp. v. FTC, 746 F.2d 108 (2d Cir. 1984)*, which began in 1978, may be the most recent contested case. See ABA Section of ***Antitrust Law***, I ***Antitrust Law*** *Developments* 425-31 (6th ed. 2007). When the Antitrust Division or the FTC concludes that directorships improperly overlap, it notifies the firm and gives it a chance to avoid litigation (or to convince the **[**11]** enforcers that the interlock is lawful). For more than 30 years, this process has enabled antitrust enforcers to resolve §8 issues amicably-either avoiding litigation or entering consent decrees contemporaneous with a suit's initiation. It is an abuse of the legal system to cram unnecessary litigation down the throats of firms whose directors serve on multiple boards, and then use the high costs of **[*320]** antitrust suits to extort settlements (including undeserved attorneys' fees) from the targets.

Plaintiffs told the district judge that a demand on directors would have been futile—and surely they are right, because, if they had made a demand, conscientious directors acting in investors' interests *would* have nixed this suit. That's a reason to require demand, not to excuse it. The suit serves no goal other than to move money from the corporate treasury to the attorneys' coffers, while depriving Sears of directors whom its investors freely elected. Directors other than Crowley and Reese would not have violated their fiduciary duty of loyalty by concluding that these two directors benefit the firm. Usually serving on multiple boards demonstrates breadth of experience, which promotes competent **[**12]** and profitable management. If the Antitrust Division or the FTC sees a problem, there will be time enough to work it out. Derivative litigation in the teeth of the demand requirement and the antitrust-injury doctrine is *not* the way to handle this subject.

The judgment of the district court is reversed, and the case is remanded with instructions to grant Frank's motion for leave to intervene and to enter judgment for defendants.

[*453] OPINION OF THE COURT

---

* Hon. Sandra Day O'Connor, Associate **[**2]** Justice (Ret.) of the Supreme Court of the United States, sitting by designation.

SLOVITER, *Circuit Judge*.

In their challenge to New Jersey's title insurance regulations, Appellants would have this court disregard a decision of the United States Supreme Court and the numerous cases that have relied on it. We are not about to do that. Appellants' efforts belong in another venue.

I.

Background

Appellants, title insurance purchasers, on behalf of themselves and similarly situated consumers, appeal the District Court's orders dismissing their state and federal antitrust claims against numerous New Jersey title insurance companies. Appellants claim that the Appellee insurers collectively fixed title insurance rates in violation of the Sherman Act and the New Jersey Antitrust Act. The District Court held that Appellants' complaint is barred by the filed rate doctrine, a lack of standing, and federal and state antitrust liability exemptions.

In New Jersey, the Department of Banking and Insurance ("DOBI") approves and regulates title insurance rates. *See* *N.J. Stat. Ann. § 17:1C-19(a)(1)*. Insurers may collectively file rates for approval with the DOBI through a licensed **[**3]** "rating organization." *Id*. *§ 17:46B-46*. Appellees are members of and file their rates through the New Jersey Land Title Insurance Rating Bureau ("NJTIRB")—a "voluntary association of title insurers" acting under New Jersey law. App. at 31, 74. The NJLTIRB "operates, more or less, as a clearing house for its constituent members by collecting their proposed rates and supporting data and submitting them to the [DOBI]." *In re N.J. Title Ins. Litig., No. 08-1425, 2009 U.S. Dist. LEXIS 92310, 2009 WL 3233529, at *1 (D.N.J. Oct. 5, 2009)*. New Jersey thus specifically "authorize[s] cooperative action between or among title insurance companies in rate making." *N.J. Stat. Ann. § 17:46B-41*.

Once insurers submit rate filings with the DOBI, the Commissioner "shall make such review of the filing as may be necessary to carry out the provisions of [the Title Insurance Act]." *Id*. *§ 17:46B-42(c)*. The Commissioner may approve the rates, *id*. *§ 17:46B-45(a)*, or, after holding a hearing, issue an order disapproving the rates, *id*. *§ 17:46B-45(b)*. Additionally, the Commissioner can only approve rates that "are not unreasonably high, and are not inadequate for the safeness and soundness of the insurer, and are not unfairly discriminatory." **[**4]** *Id*. *§ 17:46B-45(a)*. Once the DOBI issues its approval, each member of the "title insurance rating organization shall adhere to the filings made on its behalf." *Id*. *§ 17:46B-47*. Members, however, can seek to modify their individual rates through a "deviation filing." *Id*. Moreover, aggrieved parties can challenge title insurance rates through an administrative hearing, after which the Commissioner may deem the rates "no longer effective."[1] *Id*. *§ 17:46B-45(c)*.

[*454] On September 19, 2008, Appellants filed a putative class action complaint, alleging that Appellees engaged in collective price fixing in violation of *Section 1* of the Sherman Act and the New Jersey Antitrust Act. Appellants alleged that "[t]hrough NJLTIRB, [Appellees] and their co-conspirators **[**5]** have agreed upon and engaged in concerted efforts to (i) collectively set and charge uniform and supra-competitive rates for title insurance and attendant services in New Jersey, (ii) embed within these title insurance rates payoffs, kickbacks, and other charges that are unrelated to the issuance of title insurance or the business of insurance, and (iii) hide these . . . 'costs' from regulatory scrutiny by funneling them to and through title agents." App. at 42, 44. Appellants sought immediate injunctive relief and treble damages.

[1] Specifically, *N.J. Stat. Ann. § 17:46B-45(c)* provides that "[a]ny person or organization aggrieved with respect to any filing which is in effect, may make written application to the commissioner for a hearing thereon," which the commissioner will review to determine if a hearing is necessary. *Id*. at *§ 17:46B-45(c)*. At oral argument, Appellants admitted that they have not challenged the Appellees' title insurance rates in a formal administrative hearing.

The District Court dismissed Appellants' complaint under *Fed. R. Civ. P. 12(b)(6)* but granted Appellants leave to amend their claims. Specifically, the Court concluded that Appellants' claims are barred by the filed rate doctrine, which precludes antitrust suits based on rates currently filed with federal or state agencies. *See* *In re N.J. Title Ins. Litig., 2009 U.S. Dist. LEXIS 92310, 2009 WL 3233529, at *3*. On November 4, 2009, Appellants filed a nearly identical amended complaint which the Court also dismissed under *12(b)(6)*. *See* *In re N.J. Title Ins. Litig., No. 08-1425, 2010 U.S. Dist. LEXIS 67273, 2010 WL 2710570, at *1 (D.N.J. July 6, 2010)*. The Court held that: (1) Appellants lack standing to seek injunctive **[**6]** relief under Article III of the Constitution and *Section 16* of the Clayton Act; (2) Appellants' Sherman Act claim is barred by the McCarran-Ferguson Act's antitrust exemption; (3) Appellants' New Jersey Antitrust Act claim is barred by *N.J. Stat. Ann. § 56:9-5(b)(4)*'s antitrust exemption; and (4) the subsequent amendment of Appellants' complaint would be futile. Plaintiffs appeal.

II.

Discussion

The District Court had jurisdiction pursuant to *28 U.S.C. §§ 1331* and *1367*. This court has appellate jurisdiction under *28 U.S.C. § 1291* and reviews *de novo* the District Court's dismissal of Appellants' initial and amended complaints. *Utilimax.com, Inc. v. PPL Energy Plus, LLC, 378 F.3d 303, 306 (3d Cir. 2004)*. In addition, we review the District Court's refusal to grant Appellants leave to amend their final complaint for abuse of discretion. *Shane v. Fauver, 213 F.3d 113, 115 (3d Cir. 2000)*.

A. *The Filed Rate Doctrine*

Courts often trace the filed rate doctrine to *Keogh v. Chicago & Northwestern Railway Co., 260 U.S. 156, 43 S. Ct. 47, 67 L. Ed. 183 (1922)*. In that case, a shipper alleged that certain railroad carriers conspired to fix freight transportation rates in violation of the Sherman Act. *Id. at 160-61*. **[*455]** The shipper **[**7]** sought damages based on the unusually high rates. *Id*. The Supreme Court, however, denied the shipper's claim because the carriers had been authorized to charge the challenged rates by the Interstate Commerce Commission ("ICC"). *Id. at 162*. The Court reasoned that it would be improper to hold carriers civilly liable for enforcing rates that the ICC had already approved as legal. *Id. at 162-63*. In addition, the Court expressed a concern for rate discrimination, stating that the shipper's potential damages "might, like a rebate, operate to give him a preference over his trade competitors." *Id. at 163*. Finally, the Court considered the impracticability of awarding damages based on a lower hypothetical rate, which would require "reconstituting the whole rate structure"— a task that the Court viewed the ICC as more competent to handle. *Id. at 164* ("[I]t is the Commission which must determine whether a rate is discriminatory [*i.e*., legal]; at least, in the first instance.").

The filed rate doctrine stood undisturbed by the Supreme Court for almost three quarters of a century when the Court re-examined the doctrine in *Square D Co. v. Niagara Frontier Tariff Bureau Inc., 476 U.S. 409, 106 S. Ct. 1922, 90 L. Ed. 2d 413 (1986)*. **[**8]** There, various corporations alleged that the respondents conspired with their rate making bureau to fix freight transportation rates in violation of the Sherman Act. *Id. at 410-11*. The petitioners sought treble damages based on the fixed rates. *Id. at 410*. They argued that "unlike *Keogh*, respondents' rates . . . were not challenged in a formal ICC hearing," thus claiming that the agency's approval was insufficient to trigger the filed rate doctrine. *Id. at 417*; *see also id*. at n.19. Rejecting that argument, the Court reasoned that respondents' rates were "duly submitted, lawful rates under the Interstate Commerce Act in the same sense that the rates filed in *Keogh* were lawful." *Id. at 417*. Therefore, the Court concluded that the petitioners cannot bring a treble-damages antitrust action. *See* *id. at 417, 424*. Moreover, the Court approvingly quoted the Second Circuit's interpretation of *Keogh*:

> "Rather than limiting its holding to cases where, as in *Keogh*, rates had been investigated and approved by the ICC, the [*Keogh*] Court said broadly that shippers could not recover treble-damages for overcharges whenever tariffs have been filed."

Id. at 417 n.19 (quoting Square D Co. v. Niagara Frontier Tariff Bureau, Inc., 760 F.2d 1347, 1351 (2d Cir. 1985)).

This **[**9]** court has recognized that the filed rate doctrine "bars antitrust suits based on rates that have been filed and approved by federal agencies." Utilimax.com, 378 F.3d at 306. Other courts of appeals have also extended the doctrine to rates filed with state agencies. *See, e.g.,* Wegoland Ltd. v. NYNEX Corp., 27 F.3d 17, 20 (2d Cir. 1994) ("[C]ourts have uniformly held, and we agree, that the rationales underlying the filed rate doctrine apply equally strongly to regulation by state agencies."); H.J. Inc. v. NW. Bell Tel. Co., 954 F.2d 485, 494 (8th Cir. 1992) ("[W]e see no reason to distinguish between rates promulgated by state and federal agencies."). Moreover, although the doctrine "has its origins in . . . cases interpreting the Interstate Commerce Act," it "has been extended across the spectrum of regulated utilities." Ark. La. Gas Co. v. Hall, 453 U.S. 571, 577, 101 S. Ct. 2925, 69 L. Ed. 2d 856 (1981).

Appellants argue that the filed rate doctrine does not preclude their antitrust claims because those claims do not implicate the doctrine's underlying policies. Although we have not previously outlined the policies underlying the filed rate doctrine, the Court of Appeals for the Second Circuit has explained that the **[**10]** doctrine is designed to advance two "companion principles": (1) "preventing carriers from engaging in price discrimination as between ratepayers," and (2) "preserving the exclusive role of . . . agencies in approving rates . . . by keeping courts out of the rate-making process," a function that "regulatory agencies are more competent to perform." Marcus v. AT&T Corp., 138 F.3d 46, 58 (2d Cir. 1998). These "companion principles" are often called the "nondiscrimination strand" and the **[*456]** "nonjusticiability strand." Id. The "nonjusticiability strand" recognizes that "(1) legislatively appointed regulatory bodies have institutional competence to address rate-making issues; (2) courts lack the competence to set . . . rates; and (3) the interference of courts in the rate-making process would subvert the authority of rate-setting bodies and undermine the regulatory regime." Sun City Taxpayers' Assoc. v. Citizens Utils. Co., 45 F.3d 58, 62 (2d Cir. 1995). The "nondiscrimination strand" recognizes that "victorious plaintiffs would wind up paying less than non-suing ratepayers." Wegoland Ltd., 27 F.3d at 21.

The policies underlying the filed rate doctrine are also reflected in Supreme Court precedent. **[**11]** In Montana-Dakota Utilities Co. v. Northwestern Public Service Co., for example, the Court refused to grant relief to a petitioner who claimed that its predecessor company had paid unreasonably high electric rates to the respondent. 341 U.S. 246, 247-48, 71 S. Ct. 692, 95 L. Ed. 912 (1951). Addressing the issue of damages, the Court stated that "the problem is whether it is open to the courts to determine what the reasonable rates during the past should have been." Id. at 251. Although the Court did not explicitly mention the filed rate doctrine, it relied on the nonjusticiability principle to deny relief, concluding that "reduc[ing] the abstract concept of reasonableness to concrete expression in dollars and cents is the function of the [Agency] Commission." Id.

In Arkansas Louisiana Gas Co., on the other hand, the Court relied heavily on the nondiscrimination strand to deny relief. 453 U.S. at 571. There, the plaintiffs, natural gas producers, sued a customer to recover an unfiled gas rate under the parties' purchase agreement. Id. at 573-74. The parties' agreement contained a "favored nations clause," which allowed the plaintiffs to charge the defendant at a rate higher than the filed rate if the defendant ever **[**12]** "purchased . . . gas from another party at a rate higher than the one it was paying [the plaintiffs]." Id. at 573. Relying on the filed rate doctrine, the Court recognized that "'[t]he considerations underlying the doctrine . . . are preservation of the agency's primary jurisdiction over reasonableness of rates and the need to insure that regulated companies charge only those rates of which the agency has been made cognizant.'" Id. at 577-78 (quoting City of Cleveland v. Fed. Power Comm'n, 525 F.2d 845, 854, 174 U.S. App. D.C. 1 (D.C. Cir. 1976)). The Court denied plaintiffs' requested relief, however, specifically because awarding damages based on "a rate never filed . . . and thus never found to be reasonable" would "undermine the congressional scheme of uniform rate regulation." Id. at 579.

As a preliminary matter, Appellants argue that the District Court erred by concluding that "the mere filing and approval of rates with a regulating agency" triggers the filed rate doctrine. Appellant's Br. at 11. According to Appellants, that approach is only proper where *stare decisis* requires the doctrine's application to the regulatory scheme at issue. *See id*. at 12-13. Thus, before extending the doctrine to a "new **[**13]** regulatory context"—i.e., New Jersey title insurance—Appellants argue that the District Court should have determined whether the doctrine's underlying policies are implicated. *Id*. at 11-14. Yet Appellants offer no authority showing that those policies are elements in determining whether to extend the doctrine to new areas. The Supreme Court has indicated that the doctrine applies whenever rates are properly filed with a regulating agency. *Compare* Square D Co., 476 U.S. at 422 (applying the doctrine **[*457]** to rates governed by the Interstate Commerce Act and noting that "*Keogh* simply held that an award of treble damages is not an available remedy for a private shipper claiming that the rate submitted to, and approved by, the ICC was the product of an antitrust violation"), *with* Ark. La. Gas Co., 453 U.S. at 577 (extending the doctrine to rates governed by the Natural Gas Act because they were "properly filed with the appropriate federal regulatory authority"). Furthermore, the Second Circuit has held that "the doctrine is applied strictly . . . whenever *either* the nondiscrimination strand or the nonjusticiability strand . . . is implicated." Marcus, 138 F.3d at 59 (emphasis added).

Appellants **[**14]** argue that this action does not implicate the nonjusticiability strand because it does "not second-guess any ratemaking determination made by the DOBI." Appellants' Br. at 14. They alleged in their complaint that the DOBI has neither "actively supervised the Defendants' collective rate setting scheme" nor "subjected the Defendants to any analysis designed to determine whether [their] filed rates for title insurance and attendant services conformed to . . . statutory requirements." App. at 81. Appellants therefore claim that the doctrine's policy of deferring to agency rate-making expertise (*i.e*., nonjusticiability) is irrelevant because the DOBI did not exercise any "meaningful review" of the challenged rates. *See* Appellants' Br. at 15.

Appellees counter that the nonjusticiability strand is "actually . . . grounded in concerns about the institutional competence of federal courts to set rates," not "the expertise of state regulatory agencies." Appellees' Br. at 21-22. Thus, they contend that the policy is applicable in this case because Appellants requested the District Court to award damages based on the rates that "would have been paid in the absence of . . . antitrust violations." **[**15]** *Id*. at 23 (quoting Am. Compl. at ¶ 69, App. at 45). Moreover, Appellees argue that *Square D* rejected the idea that the filed rate doctrine only applies if an agency conducts "meaningful review" of the challenged rates. *Id*. at 24.

Appellants' argument is meritless because the nonjusticiability strand recognizes that federal courts are ill-equipped to engage in the rate making process, which does not depend on whether agencies actually use their superior expertise. *See, e.g.,* Montana-Dakota Utils. Co., 341 U.S. at 251 (finding that it is not "open to the courts to determine what the reasonable rates during the past should have been"); Sun City Taxpayers' Assoc., 45 F.3d at 62 ("[C]ourts lack the competence to set utility rates. . . ."); Wegoland Ltd., 27 F.3d at 21 ("Courts are simply ill-suited to systematically second guess the regulators' decisions and overlay their own resolution."). Indeed, Appellants argue that "[t]here is no reason a court cannot determine what [rates] the DOBI would have approved since it does nothing but rubber stamp rates filed by [Appellees]" but, at the same time, suggest that the District Court should have determined what the "competitive rates" would have **[**16]** been in order to award damages. Appellants' Reply Br. at 9. Therefore, even accepting Appellants' logic, their antitrust claims would require the District Court to determine the reasonable rate absent the alleged conspiracy—"a function that . . . regulatory agencies are more competent to perform." Marcus, 138 F.3d at 58. Additionally, to the extent that the justiciability principle is aimed at "preserv[ing] . . . the agency's primary jurisdiction over reasonableness of rates," Hall, 453 U.S. at 577-78, the adjudication of Appellants' complaint would intrude upon that jurisdiction because it challenges rates that the DOBI has already approved as "not unreasonably high . . . or unfairly discriminatory." N.J. Stat. Ann. § 17:46B-45(a).[2]

[*458] Appellants seek to reinforce their argument that the nonjusticiability strand is only implicated where agencies have meaningfully reviewed the challenged rate by relying on Brown v. Ticor Title Ins. Co., 982 F.2d 386 (9th Cir. 1992). In that case, consumers alleged that various title insurance companies conspired to "fix price levels

[2] Although Appellants state in their complaint that the DOBI has not obtained the type of data necessary to determine whether Appellees' title insurance rates "conformed to . . . statutory requirements," App. at 81, they nonetheless concede that the DOBI approved Appellees' rates, *see* App. at 82. Under New Jersey law, such approval necessarily requires a determination that the rates are "not unreasonably high, and are not inadequate for the safeness and **[**17]** soundness of the insurer, and are not unfairly discriminatory." N.J. Stat. Ann. § 17:46B-45(a); *see also* N.J. Builders Ass'n v. Sheeran, 168 N.J. Super. 237, 402 A.2d 956, 961 (N.J. Super. Ct. App. Div. 1979) (noting that N.J. Stat. Ann. § 17:46B-45 evidently requires the DOBI Commissioner to conduct "some degree" of fact-finding).

for title search and examination services." *Id. at 387*. Although the insurers filed their rates with regulating agencies, the relevant statutory schemes required "only 'non-disapproval' of the rates" before they became effective "and d[id] not require compliance with strict guidelines." *Id. at 394*. The court therefore observed that if the challenged rates "were **[**18]** the product of unlawful activity prior to their being filed and were not subjected to meaningful review by the state, then the fact that they were filed does not render them immune from challenge." *Id.* Furthermore, the court reasoned that "[t]he absence of meaningful state review allows the insurers to file any rates they want." *Id.* Thus, it concluded that "the act of filing does not legitimize a rate arrived at by improper action" and refused to apply the filed rate doctrine. *Id.*

Appellants' reliance on *Brown* is unpersuasive. *Brown* adopts a particularly narrow and unprecedented view of the filed rate doctrine. The regulatory schemes at issue in *Brown* also required only "non-disapproval" of the challenged rates, and it is unclear from the court's opinion whether the regulating agencies had to conduct any review of the rates at all. Here, by contrast, the DOBI affirmatively approved Appellees' insurance rates and was legally required to do so before the rates became effective. *See N.J. Stat. Ann. § 17:46B-45(a)*. Under New Jersey law, the DOBI is required to review filings to make sure they "produce rates that are not unreasonably high, . . . are not inadequate for the safeness and soundness **[**19]** of the insurer, and are not unfairly discriminatory." *Id*. Accordingly, even if *Brown* adopted a "meaningful review" standard for applying the doctrine, the DOBI would easily meet that requirement, as it: (1) affirmatively approved the challenged rates, and (2) was required to review the rates before issuing its approval. Finally, given Appellants' policy argument, their reliance on *Brown* seems misplaced because the Ninth Circuit's opinion does not mention the nonjusticiability or nondiscrimination strands.

The Supreme Court moreover has rejected the notion that agencies must "meaningfully review" rates under the filed rate doctrine. In *Square D*, the petitioners argued that the doctrine should not bar their antitrust claim because the ICC did not conduct a hearing before approving the disputed rates. *Square D Co., 476 U.S. at 417 n.19*. The Court, however, clarified that *Keogh* is not limited to situations where rates "'had been investigated and approved by the ICC,'" but applied "'whenever tariffs have been filed.'" *Id*. (quoting *Square D Co., 760 F.2d at 1351*); *see also Montana-Dakota Utils. Co., 341 U.S. at 251* (holding that the petitioner "can claim **[*459]** no rate as a legal right . . . other **[**20]** than the filed rate, whether fixed or merely accepted by the [Agency] Commission"). Similarly, other courts of appeals have held that the filed rate doctrine does not require "meaningful" agency review. *Goldwasser v. Ameritech Corp., 222 F.3d 390, 402 (7th Cir. 2000)* (rejecting the argument that the doctrine should not apply if reviewing agencies "rarely exercise their muscle and thus give no meaningful review to the rate structure"); *Town of Norwood v. New Eng. Power Co., 202 F.3d 408, 419 (1st Cir. 2000)* ("It is the *filing* of the tariffs, and not any affirmative approval or scrutiny by the agency, that triggers the filed rate doctrine."). Accordingly, the nonjusticiability strand fully supports the District Court's application of the filed rate doctrine in this case.

Appellants claim that their action does not implicate the doctrine's nondiscrimination strand because it "has been brought on behalf of all those similarly situated to the named Plaintiffs, thus eliminating any discrimination issues." Appellants' Br. at 17. Appellees, on the other hand, argue that the nondiscrimination policy is relevant because "not every [title insurance] purchaser will necessarily become a member of **[**21]** the class or obtain recovery," and "some class members may opt out, while others may fail to receive actual notice or may be excluded from the class." Appellees' Br. at 28.

Various courts have recognized that class-actions reduce discrimination concerns. In *Square D*, for instance, the Supreme Court indicated that "the development of class actions . . . might alleviate the . . . concern about unfair rebates" and seems to undermine some of the reasoning supporting the filed rate doctrine. *476 U.S. at 423*. Similarly, the Second Circuit has noted that "concerns for discrimination are substantially alleviated in [a] putative class action." *Wegoland Ltd., 27 F.3d at 22*. Thus, Appellants are correct that their action does not clearly impact the doctrine's nondiscrimination strand. However, we hold that the nonjusticiability policy alone warrants the doctrine's application to Appellants' treble damages Sherman Act and New Jersey Antitrust Act claims.[3] *See* Marcus, 138 F.3d at 59 (noting that the doctrine applies strictly "whenever either the nondiscrimination strand or the nonjusticiability strand . . . is implicated").

This result is also appropriate under New Jersey law. *See* Parkway Garage, Inc. v. City of Philadelphia, 5 F.3d 685, 701 (3d Cir. 1993) ("Federal courts that decide state law claims are required to apply the substantive law of the state whose laws govern the action." (internal quotation marks and citation omitted)); *see also* Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 992-93 (9th Cir. 2000) (applying state law in rejecting application of the filed rate doctrine to cases involving rates set by state agencies).

Appellants argue that New Jersey precedent, particularly Richardson v. Standard Guaranty Ins. Co., 371 N.J. Super. 449, 853 A.2d 955 (N.J. Super. Ct. App. Div. 2004), does not support the doctrine's application to their New Jersey Antitrust Act claim. In Richardson, the plaintiff alleged that the sales practices of various credit card and insurance companies fraudulently induced her to purchase several insurance policies. Id. at 961. The court held that the plaintiff's action—which **[**23]** alleged, inter alia, that the defendants had "unfairly or inaccurately **[*460]** calculated premiums"—was barred by the filed rate doctrine. Id. As Appellants point out, the court indicated that the "under-enforcement of ratemaking regulations may constitute a basis for a less rigorous application of the filed rate doctrine." Id. at 964. The court, however, emphasized that the statutory framework at issue required the rate regulator (the DOBI) to "examine [rate] filings for their fairness and their ability to disclose terms relevant to consumers." Id. Thus, the court ultimately concluded that "the filed rate doctrine should be applied." Id. at 965.

Relying on Richardson, Appellants argue that the filed rate doctrine should not bar their state claim because New Jersey's title insurance regulations are under-enforced. More specifically, they claim that "the DOBI has not enacted a single regulation [governing title insurance], despite a Legislative mandate to do so." Appellants' Br. at 43-44. Even assuming those allegations to be true, Appellants' argument is unpersuasive. In particular, the regulations in Richardson required credit insurers to file policy rates with the DOBI and required the Commissioner **[**24]** to review those rates for excessiveness. 853 A.2d at 964. A similar regulatory scheme is present here, since insurers must file their rates with the DOBI, *see* N.J. Stat. Ann. § 17:46B-42(a), and the DOBI must review those rates to ensure that they are not "unreasonably high" or "unfairly discriminatory," *see id*. § 17:46B-45(a). Accordingly, state law does not preclude the doctrine's application to Appellants' New Jersey Antitrust Act claim.[4]

B. *Standing to Sue*

Appellants contend that the District Court erred by dismissing their injunctive relief claims[5] under Article III of the Constitution and Section 16 of the Clayton Act for lack of standing.[6] "Section 16 of the Clayton Act, which authorizes injunctive relief **[**25]** in private antitrust cases, focuses on 'threatened loss or damage' resulting from a violation of the antitrust laws, and it authorizes an injunction when and under the same conditions as injunctions are granted by 'courts of equity.'" Weiss v. York Hosp., 745 F.2d 786, 829 (3d Cir. 1984) (footnote and citations

---

[3] It is well established that the filed rate doctrine can serve as a defense **[**22]** against both federal and state actions. *See, e.g.,* Am. Tel. & Tel. Co. v. Cent. Office Tel., Inc., 524 U.S. 214, 228, 118 S. Ct. 1956, 141 L. Ed. 2d 222 (1998) (holding that the "respondent's state-law claims are barred by the filed rate doctrine").

[4] Appellants also argue that "the filed rate doctrine has been the subject of sustained criticism by the [New Jersey] courts and has *never* been applied to the New Jersey title insurance regulatory regime." Appellants' Br. at 40. However, as the District Court correctly noted, New Jersey courts have recently affirmed the vitality of the filed rate doctrine. *See, e.g.,* Richardson, 853 A.2d at 963 ("[T]he doctrine maintains a substantial role in administrative ratemaking . . . .").

[5] Appellants sought, inter alia, a "final injunction . . . enjoining Defendants **[**26]** from engaging in collective rate setting with regard to all future title insurance rate filings with the Department of Insurance." App. at 86.

[6] As the District Court recognized, the filed rate doctrine does not bar injunctive relief claims against future rates. *See* Square D. Co., 476 U.S. at 422 & n.28 (noting that the filed rate doctrine specifically precludes antitrust claims for treble damages).

omitted). To establish standing under *Section 16*, Appellants must "demonstrate a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 130, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. Similarly, to establish Article III standing, Appellants must show: "(1) injury-in-fact, which is an invasion of a legally protected interest that is (a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical; (2) a causal connection between the injury and the conduct complained of; and (3) it must be likely, as opposed to merely speculative, **[*461]** that the injury will be redressed by a favorable decision." *Danvers Motor Co., Inc. v. Ford Motor Co., 432 F.3d 286, 290-91 (3d Cir. 2005)*.

Appellants argue that they have standing to pursue their Sherman Act and New Jersey Antitrust Act injunctive relief claims because Appellees' "collusion has deprived, and will continue to deprive [them] of the benefits of free, open and unrestricted competition" in the title insurance market. Appellants' Br. at 31-32. Further, Appellants argue that their injuries are imminent and thus confer standing because: (1) New Jersey requires Appellees to file any new rates with the DOBI; and (2) "people who have already purchased real estate are most likely to do so again and . . . homeowners, on average, change residence every seven years."[7] *Id*. at 36. Appellees, on the other hand, argue that Appellants lack standing because they have not alleged that "any new rate submission to the DOBI by NJLTIRB **[**27]** is imminent, [or] that any particular Plaintiff will purchase title insurance in the future." Appellees' Br. at 46.

Appellants do not have standing because they have failed to allege **[**28]** any impending injury. In their complaint, Appellants alleged that:

> (a) price competition in the sale of title insurance and attendant services has been and will be suppressed, restrained and eliminated;
> (b) prices for title insurance and attendant services have been and will be raised, fixed, maintained and stabilized at artificially high and non-competitive levels; and,
> (c) purchasers of title insurance have been and will be deprived of the benefit of free and open competition.

App. at 85. However, as the District Court correctly observed, Appellants did not allege that Appellees have collectively "filed new proposed insurance rates" or "intend to do so in the near future." *In re N.J. Title Ins. Litig., 2010 U.S. Dist. LEXIS 67273, 2010 WL 2710570, at *6*. Additionally, Appellants did not assert that they intend to re-purchase title insurance. Although they emphasize that New Jersey law requires insurers to file new rates with the DOBI, that mandate does not make their claims any less speculative because it does not indicate when Appellees will file new rates. Likewise, Appellants' claim that home owners generally relocate every seven years does not show that any Appellant plans to buy title insurance in the future, **[**29]** thus failing to raise their claims above the speculative level. Therefore, Appellants have neither established "actual or imminent" injury-in-fact under Article III, *Danvers Motor Co., 432 F.3d at 291*, nor an "impending violation of the antitrust laws" under the Clayton Act.[8] *Zenith Radio Corp., 395 U.S. at 130*.

[*462] C. *Dismissal with Prejudice*

---

[7] Appellants must establish standing based on future harm, since their previous title insurance purchases do not constitute a continuing injury. As the District Court held, the existing rates do not constitute a cognizable legal injury under the filed rate doctrine. *Keogh, 260 U.S. at 163* (stating that "[u]nless and until suspended or set aside, th[e filed] rate is made, for all purposes, the legal rate"); *see also* *Wegoland Ltd., 27 F.3d at 18* ("[T]he doctrine holds that any 'filed rate' . . . is per se reasonable and unassailable in judicial proceedings brought by ratepayers."). Thus, Appellants must establish standing based on the possibility of future unfair rates. *See* Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law**: An Analysis of Antitrust Principles and Their Application* ¶ 247d (3d ed. 2006) ("[T]here is no reason to think *Keogh* would prohibit an injunction against an antitrust violation attending some tariff that would or might be filed in the future. Such a tariff has not been 'filed' at all.").

[8] Because Appellants lack standing to pursue their claims, we will not reach their arguments that the District Court erred by concluding that Appellants' injunctive relief claims are barred by the McCarran-Ferguson Act and *N.J. Stat. Ann. § 56:9-5(b)(4)* antitrust liability exemptions.

Finally, Appellants argue that if they lack standing, we must hold that the District Court abused its discretion by denying them leave to amend their complaint and "substitute an appropriate plaintiff." Appellants' Br. at 37-38. *Federal Rule of Civil Procedure 15(a)(2)* provides that courts "should freely give leave [to amend] when justice so requires." Further, this court has "held that even when a plaintiff does not seek leave to amend, if a complaint is vulnerable to 12(b)(6) dismissal, a District Court must permit a curative amendment, unless an amendment would be inequitable **[**30]** or futile." *Alston v. Parker, 363 F.3d 229, 235 (3d Cir. 2004)*.

The District Court did not abuse its discretion by denying Appellants leave to amend their complaint. Appellants lack standing to assert their injunctive relief claims specifically because there is no imminent threat that the NJTIRB will file future rates. Thus, even if Appellants substituted a plaintiff with concrete plans to purchase title insurance, s/he would still lack standing—thus making the amendment of Appellants' complaint futile.[9] The District Court therefore did not abuse its discretion by dismissing Appellants' action with prejudice.

III.

Conclusion

For the foregoing reasons, we will affirm the District Court's orders.

End of Document

[9] Although the District Court dismissed Appellants' complaint with prejudice because "the McCarran-Ferguson Act and *N.J. Stat. Ann. § 56:9-5(b)(4)* bar [Appellants'] federal and state antitrust claims," *In re N.J. Title Ins. Litig., 2010 U.S. Dist. LEXIS 67273, 2010 WL 2710570, at *12*, we may affirm the District Court's decision on different grounds. *See* *Morse v. Lower Merion Sch. Dist., 132 F.3d 902, 904 n.1 (3d Cir. 1997)*.

Opinion

[*233] OPINION OF THE COURT

SLOVITER, *Circuit Judge*.

Appellants' challenge to the Delaware title insurance program trenches on the challenge raised by other parties to the New Jersey title insurance program, a challenge that we rejected today in our opinion in *In Re: New Jersey Title Insurance Litigation*. The same result follows here to the extent the analysis set forth here unavoidably duplicates that in *In Re: New Jersey Title Insurance Litigation*.

I.

Background

Dawn McCray, William Williamson and Daralice Grayo ("Appellants"), on behalf of themselves and similarly situated consumers, appeal the District Court's orders dismissing their federal antitrust claims against numerous Delaware title insurance companies ("Appellees"). Appellants assert that Appellees fixed the prices of title insurance in Delaware in violation of the Sherman Act and seek treble damages and injunctive relief. The District Court held that Appellants' claims **[**3]** are barred by the filed rate doctrine and the McCarran-Ferguson Act. We will affirm the District Court's judgment with respect to the filed rate doctrine and hold that Appellants lack standing to seek injunctive relief.

Title insurers in Delaware are required to file their insurance rates with the state's Department of Insurance ("DOI"). *See Del. Code Ann. tit. 18, § 2504(a)* (2012). Insurers may comply with the state's rate **[*234]** filing requirements through a licensed rating organization. *Id*. *§§ 2510-12*. Appellee title insurers are members of and file their rates through the Appellee Delaware Title Insurance Rating Bureau ("DTIRB" or "the bureau"), which is licensed by the DOI. "DTIRB claims to obtain, compile, and analyze statistical data from its members relating to their title insurance premiums, losses and expenses." J.A. at 216.

Delaware insurers must propose their own "effective date" for new insurance rates. Tit. 18, *§ 2504(a)*. However, they must file those rates with the DOI Commissioner "not less than 30 days prior to the proposed effective date." *Id*. *§ 2506(c)*. The Delaware Code requires the Commissioner to "review filings as soon as reasonably possible." *Id*. *§ 2506(a)*. The Commissioner **[**4]** must consider various factors to determine whether the rates comport with the law and ensure that the rates are not "excessive, inadequate or unfairly discriminatory." *Id*. *§ 2503(a)*. Filings "shall be deemed to meet the statutory requirements unless disapproved by the Commissioner within 30 days." *Id*. *§ 2506(c)*. If the Commissioner determines that "additional time is needed to review a rate filing," s/he "shall . . . notify the filer that the review . . . shall be extended" and can extend the review up to ninety days, "unless the insurer . . . agree[s] to a longer term." *Id*.

[*] Hon. Sandra Day O'Connor, Associate Justice (Ret.) of the Supreme Court of the United States, sitting by designation.

In addition to rates, the DOI typically requires insurers to "develop and file . . . advisory prospective loss costs and supporting actuarial and statistical data."[1] J.A. at 206. Prospective loss costs are "the portion of a rate that does not include provisions for expenses (other than loss adjustment expenses) or profit, and are based on historical aggregate losses and loss adjustment expenses." *Id*. At DTIRB's request, the DOI temporarily exempted DTIRB's members from its "prospective loss costs" and supporting data requirement.[2] In particular, the DOI recognized that "there is no credible historic data, particularly **[**5]** with regard to expenses, that the rating bureau could use in preparing the initial rates." J.A. at 137. It therefore granted the bureau an "exception to the requirements of using the rating format (loss cost) prescribed in Bulletin No. 5." *Id*. Nevertheless, the Commissioner required DTIRB to "have an approved statistical plan in place," that would "enable the [DOI] to monitor rate adequacy," *id*., which the bureau did until at least 2007.

On October 15, 2008, Appellants **[**6]** filed a class action complaint, alleging that Appellees engaged in collective price-fixing in violation of *Section 1* of the Sherman Act.[3] Appellants claim that Appellees used DTIRB as a vehicle for setting uniform rates, which "consist[] of costs unrelated **[*235]** to the issuance of title insurance, including kickbacks and other financial inducements title insurers provide to title agents" and other parties. J.A. at 56. Appellants allege that as a result, the title insurance market is non-competitive and dominated by a relatively small number of insurers.[4] Furthermore, Appellants assert that despite growing profits and efficiencies, Appellees' rates have not changed since 2004.

The District Court dismissed Appellants' complaint under *Federal Rule of Civil Procedure 12(b)(6)* **[**7]** but granted Appellants leave to amend their request for injunctive relief. Specifically, the court concluded that Appellants' Sherman Act claim is barred by the filed rate doctrine, which precludes antitrust suits challenging rates currently filed with federal or state agencies. *McCray, 636 F. Supp. 2d at 327* (citations omitted). Because the doctrine does not bar certain injunctive relief claims, the Court granted Appellants leave to amend their complaint, as they "d[id] not describe in much detail the type of injunctive relief they [sought]." *Id. at 334*.

Appellants filed a nearly identical amended complaint, which the District Court also dismissed under *Rule 12(b)(6)*. The Court held that Appellants' injunctive relief claim is barred by *Section 1012(b)* of the McCarran Ferguson Act, which exempts conduct from antitrust liability if it constitutes the "business of insurance" and is "regulated by state law." *See McCray v. Fidelity Nat'l Title Ins. Co., No. 08-775, 2010 U.S. Dist. LEXIS 76616, 2010 WL 3023164 (D. Del. July 29, 2010)*. The Court determined that Appellees' conduct met both those requirements. Appellants appeal.

II.

Discussion

---

[1] This directive is set forth in Department of Insurance Forms and Rates Bulletin No. 5. Loss Cost Filing Requirements, Forms and Rates Bulletin No. 5 (Dep't of Ins. amended Nov. 27, 1995), *http://delawareinsurance.gov*/ departments/documents/ bulletins/formbull5.pdf [hereinafter Bulletin No.5]. The DOI Commissioner may issue orders, notices and bulletins regulating Delaware insurance practices. *See Del. Code Ann. tit. 18, § 312(a)-(c)*.

[2] The exemption is set forth in Department of Insurance Forms and Rates Bulletin No. 27. Title Insurance Filing Requirements, Forms and Rates Bulletin No. 27 (Dep't of Ins. Sept. 2, 2010), *http://delawareinsurance.gov*/ departments/documents/bulletins/ formbull27.pdf [hereinafter Bulletin No. 27].

[3] Appellants also named Appellees' parent companies as defendants and asserted an unjust enrichment claim. The District Court dismissed that claim as well as the parent companies under *Federal Rule of Civil Procedure 12(b)(6)*. *See McCray v. Fidelity Nat'l Title Ins. Co., 636 F. Supp. 2d 322 (D. Del. 2009)*. Appellants do not pursue those claims on appeal.

[4] Appellees allegedly account for about 98 percent of the title insurance premiums paid in Delaware.

The District Court had jurisdiction under 28 U.S.C. §§ 1331 and 1367. This court **[**8]** has appellate jurisdiction under 28 U.S.C. § 1291 and reviews *de novo* the District Court's dismissal of Appellants' initial and amended complaints. Utilimax.com, Inc. v. PPL Energy Plus, LLC, 378 F.3d 303, 306 (3d Cir. 2004).

A. *The Filed Rate Doctrine*

Appellants argue that the District Court erred by applying the filed rate doctrine to dismiss their damages claims.[5] The District Court invoked the doctrine to dismiss Appellants' demand for: (1) "treble damages as provided by Section 4 of the Clayton Act, 15 U.S.C. § 15," and (2) the return of "overpayments made by [Plaintiffs and the Class] for defendants' title insurance policies." J.A. at 65.

Courts often trace the filed rate doctrine to *Keogh v. Chicago & Northwestern Railway Co., 260 U.S. 156, 43 S. Ct. 47, 67 L. Ed. 183 (1922)*. In that case, a shipper alleged that certain railroad carriers conspired to fix freight transportation rates in violation of the Sherman Act. *Id. at 160-61*. The shipper sought damages **[*236]** based on the unusually high rates. *Id*. The Supreme Court, however, denied the shipper's claim because the carriers had filed the challenged rates with the Interstate Commerce Commission ("ICC"), which authorized them. *Id. at 162*. The Court reasoned that it would be improper to hold carriers civilly liable for enforcing rates that the ICC had already approved as legal. *Id. at 162-63*. In addition, the Court expressed a concern about rate discrimination, stating that the shipper's potential damages "might, like a rebate, operate to give him a preference over his trade competitors." *Id. at 163*. Finally, the Court considered the impracticability of awarding damages based on a lower **[**10]** hypothetical rate, which would require "reconstituting the whole rate structure"—a task that the Court viewed the ICC as more competent to handle. *Id. at 164* ("[I]t is the Commission which must determine whether a rate is discriminatory; at least, in the first instance.").

The Court re-examined the filed rate doctrine in *Square D Co. v. Niagara Frontier Tariff Bureau Inc., 476 U.S. 409, 106 S. Ct. 1922, 90 L. Ed. 2d 413 (1986)*. In that case, various corporations alleged that the respondents conspired with their rate making bureau to fix freight transportation rates in violation of the Sherman Act. *Id. at 410-11*. The petitioners sought treble damages based on the fixed rates. *Id. at 410*. They argued that "unlike *Keogh*, respondents' rates . . . were not challenged in a formal ICC hearing," thereby claiming that the agency's approval was insufficient to trigger the filed rate doctrine. *Id. at 417*; *see also id. at n.19*. Rejecting that argument, the Court reasoned that respondents' rates were "duly submitted, lawful rates under the Interstate Commerce Act in the same sense that the rates filed in *Keogh* were lawful." *Id. at 417*. Therefore, the Court concluded that "petitioners may not bring a treble-damages antitrust action." **[**11]** *Id*.

This court has recognized that the filed rate doctrine "bars antitrust suits based on rates that have been filed and approved by federal agencies." *Utilimax.com, 378 F.3d at 306 (3d Cir. 2004)*. Other courts of appeals have also extended the doctrine to rates filed with state agencies. *See, e.g., Wegoland Ltd. v. NYNEX Corp., 27 F.3d 17, 20 (2d Cir. 1994)* ("[C]ourts have uniformly held, and we agree, that the rationales underlying the filed rate doctrine apply equally strongly to regulation by state agencies."); *H.J. Inc. v. Nw. Bell Tel. Co., 954 F.2d 485, 494 (8th Cir. 1992)* ("[W]e see no reason to distinguish between rates promulgated by state and federal agencies."). Moreover, although the doctrine "has its origins in . . . cases interpreting the Interstate Commerce Act," it "has been extended across the spectrum of regulated utilities." *Ark. La. Gas Co. v. Hall, 453 U.S. 571, 577, 101 S. Ct. 2925, 69 L. Ed. 2d 856 (1981)*.

---

[5] Appellants also argue that District Court erred by applying the filed rate doctrine to dismiss their injunctive relief claim. The District Court correctly observed that the filed rate doctrine precludes injunctive relief to the extent that such relief "seeks to prevent the defendants from relying on the filed rate." *McCray, 636 F. Supp. 2d at 334*; *see Burlington N., Inc. v. United States, 459 U.S. 131, 138-42, 103 S. Ct. 514, 74 L. Ed. 2d 311 (1982)* (vacating an injunction that ordered a reduction in rates). Because Appellants did not clearly state the type of injunctive relief **[**9]** they sought in their initial complaint and requested only that the "unlawful conduct be enjoined," J.A. at 65, the District Court properly dismissed the claim and granted Appellants leave to clarify their demand for relief.

Appellants argue that the filed rate doctrine does not apply to Delaware title insurance rates because the doctrine is limited to comprehensive regulatory regimes, such as the Interstate Commerce Act ("ICA"). Additionally, Appellants emphasize that the interstate commerce industry, among others, **[**12]** no longer requires rate filing and argue that such deregulation "weighs heavily against the district court's first time extension of the doctrine to Delaware's title insurance regime." Appellants' Br. at 19. However, the fact that one industry has been partially deregulated does not mean that the filed rate doctrine is no longer valid in other areas. Because Appellants offer no authority to **[*237]** the contrary, their argument necessarily fails.

Appellants further contend that the filed rate doctrine should not apply because "there is no clear repugnancy between the antitrust laws and Delaware's title insurance regulations." Appellants' Br. at 21. That argument, however, is also meritless and requires little attention from this court. As the District Court observed, Appellants' "repugnancy" argument relies on characterizing the filed rate doctrine as a complete bar against antitrust liability. *See McCray, 636 F. Supp. 2d at 328*; *see also Carnation Co. v. Pac. Westbound Conference, 383 U.S. 213, 217-18, 383 U.S. 932, 86 S. Ct. 781, 15 L. Ed. 2d 709 (1966)* (recognizing that collective ratemaking activities should not be immunized from antitrust scrutiny unless there is "plain repugnancy between the antitrust and regulatory provisions" (internal **[**13]** quotation marks and citation omitted)). But the doctrine itself does not eliminate "scrutiny under the antitrust laws by the Government and . . . possible criminal sanctions or equitable relief." *Square D, 476 U.S. at 422*. Furthermore, the Supreme Court has stated that it "disagree[s]" with the "view that the issue in *Keogh* . . . is properly categorized as an 'immunity' question," thus making Appellants' repugnancy argument inapplicable. *Id.; see also Essential Commc'ns Sys., Inc. v. Am. Tel. & Tel. Co., 610 F.2d 1114, 1121 (3d Cir. 1979)* ("[T]he filed tariff doctrine does not confer immunity from antitrust liability generally.").

Alternatively, Appellants argue that the filed rate doctrine does not apply because Delaware's title insurance laws do not require the DOI to "meaningfully regulate title insurance rate filings." Appellants' Br. at 22. Appellees, on the other hand, argue that the filed rate doctrine is not limited to situations where the agency has meaningfully regulated or reviewed the challenged rates. Moreover, even if there is such a requirement, Appellees argue that Delaware's title insurance laws are comprehensive enough to warrant the doctrine's application.

To support **[**14]** their "meaningful regulation" argument, Appellants rely on two Ninth Circuit cases—*Wileman Bros. & Elliott, Inc. v. Giannini, 909 F.2d 332 (9th Cir. 1990)*, and *Brown v. Ticor Title Insurance Co., 982 F.2d 386 (9th Cir. 1992)*. In *Wileman*, the plaintiffs claimed that the defendant competing fruit producers had issued unfair marketing standards without authorization from the Secretary of Agriculture. *909 F.2d at 333*. Seeking to invoke the filed rate doctrine, the defendants argued that the Secretary "tacitly approved" the challenged standards because he never disapproved them and had the right to do so at any time. *Id. at 337*. However, the court reasoned that in *Square D*, "governmental approval was required before there could be any effect from the collective activity and it was such approval that legitimized the allotments and the rates." *Id*. The court also reasoned that the Secretary's non-disapproval did "not guarantee any level of review" and was "equally consistent with lack of knowledge or neglect." *Id. at 338*. It therefore refused to apply the filed rate doctrine and held that "[t]he **[**15]** mere fact of failure to disapprove . . . does not legitimize otherwise anticompetitive conduct." *Id. at 337-38*.

The Ninth Circuit went a step further in *Brown*. There, the defendant title insurance companies actually filed their rates with regulatory agencies, but the law required "only 'non-disapproval' of the rates" before they became effective "and d[id] not require compliance with strict guidelines." *982 F.2d at 394*. Relying on its holding in *Wileman*, the court refused to apply the **[*238]** filed rate doctrine. The court reasoned that "[t]he absence of meaningful state review allows the [defendants] to file any rates they want." *Id*. In addition, the court explained that if the challenged rates "were the product of unlawful activity prior to their being filed and were not subjected to meaningful review by the state, then the fact that they were filed does not render them immune from challenge." *Id*. It therefore concluded that "the act of filing does not legitimize a rate arrived at by improper action." *Id*.

Appellants argue that *Brown* and *Wileman*, along with other district court cases, represent the correct approach to the filed rate doctrine—applying the doctrine only where agencies had to **[**16]** engage in meaningful review of the challenged rates. Although Appellants do not indicate what level of review is necessary, they suggest that the doctrine, at a minimum, does not apply if "[r]ates are collectively set by the insurers themselves and automatically become effective unless disapproved by the agency." Appellants' Br. at 22.

Despite *Brown* and *Wileman*, the Supreme Court has never indicated that the filed rate doctrine requires a certain type of agency approval or level of regulatory review. Instead, the doctrine applies as long as the agency has in fact authorized the challenged rate.[6] As the District Court observed, the relevant statute in *Keogh* only required common carriers to provide ten days public notice before charging new rates, and did not require the ICC to expressly approve such rates before they went into effect. *See* 24 Stat. 381-84 (49th Cong. Feb. 4, 1887). Similarly, the statute in *Square D* did not require the ICC to affirmatively approve freight transportation rates. *See Square D. v. Niagara Frontier Tariff Bureau, Inc., 760 F.2d 1347, 1349 (2d Cir. 1985)* (characterizing the central issue as "whether *Keogh* . . . has been overruled so far as its language extends **[**17]** to rates filed with but not investigated and approved by the [ICC]"). *Square D* also endorsed the appellate court's statement that the doctrine applies "'whenever tariffs have been filed.'" *Square D, 476 U.S. at 417 n.19* (citation omitted); *see also Montana-Dakota Utils. Co. v. Nw. Pub. Serv. Co., 341 U.S. 246, 251, 71 S. Ct. 692, 95 L. Ed. 912 (1951)* (holding that the petitioner "can claim no rate as a legal right . . . other than the filed rate, whether fixed or merely accepted by the [Agency] Commission"). Finally, the First Circuit has held that the filed rate doctrine only requires rates to be filed, not affirmatively approved or scrutinized. *See Town of Norwood v. New Eng. Power **[*239]** Co., 202 F.3d 408, 419 (1st Cir. 2000)* ("It is the *filing* of the tariffs, and not any affirmative approval or scrutiny by the agency, that triggers the filed rate doctrine.").

Indeed, neither this court nor the Supreme Court has suggested that a distinction should exist between agency authorization through "approval" or "non-disapproval" of filed rates. Moreover, in this case such a distinction would be meaningless because the **[**19]** DOI was required to review the challenged rates. Delaware law states that "[t]he Commissioner shall review filings as soon as reasonably possible after they have been made in order to determine whether they meet the [statutory] requirements." *Del. Code Ann. tit. 18, § 2506(a)*. Further, the Commissioner must consider various factors to make sure rate filings are not "excessive, inadequate or unfairly discriminatory." *Id*. *§ 2503(a)*. Therefore, even though rate filings are "deemed to meet the statutory requirements unless disapproved by the Commissioner within 30 days," the Commissioner is required to review the rates during that period and may extend the review if "additional time is needed."[7] *Id*. *§ 2506(c)*.

Appellants next argue that the filed rate doctrine should not apply because Appellants cannot obtain retroactive relief directly from the DOI. To support this argument, Appellants rely on a series of "price squeeze" cases, which hold that the filed rate doctrine is inapplicable if a single regulator does not have authority over the challenged rates and thus cannot grant full relief. *See, e.g., City of Kirkwood, 671 F.2d at 1178-79*; *Borough of Lansdale v. PP & L,*

---

[6] Appellants argue that interpreting the filed rate doctrine as lacking a "meaningful review" requirement would eradicate the state action doctrine. Under the state action doctrine, private entities participating in state-administered price regulation can assert antitrust immunity if, inter alia, "the State provides active supervision of anticompetitive conduct **[**18]** undertaken by private actors." *FTC v. Ticor Title Ins. Co., 504 U.S. 621, 631, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992)*. Therefore, "[t]he mere potential for state supervision" is not sufficient to invoke the state action doctrine. *Id. at 638*. However, there is no apparent requirement to reconcile the filed rate and state action doctrines, as courts have generally applied them independently. *See, e.g., Trigen-Okla. City Energy Corp. v. Okla. Gas & Elec. Co., 244 F.3d 1220, 1224-25 (10th Cir. 2001)* (dismissing claims under state action doctrine and as a result declining to reach filed rate doctrine); *City of Kirkwood v. Union Elec. Co., 671 F.2d 1173, 1182 (8th Cir. 1982)* (independently analyzing the filed rate doctrine and the state action doctrine). Moreover, the doctrines do not completely overlap because the filed rate doctrine, unlike the state action doctrine, does not provide complete immunity from antitrust liability. *See Essential Commc'ns, 610 F.2d at 1121*.

[7] Appellants suggest that the DOI could not genuinely review the challenged rates because DTIRB did not provide sufficient data to support its filings. However, Appellants do not provide any authority showing that the filed rate doctrine is dependent on the thoroughness of an agency's fact-finding. *See Goldwasser v. Ameritech Corp., 222 F.3d 390, 402 (7th Cir. 2000)* (rejecting the argument that the doctrine should not apply where agencies "rarely exercise their muscle and thus give **[**20]** no meaningful review to the rate structure"). Additionally, since filing its rates in 2004, DTIRB has provided a statistical plan that enables the DOI to monitor the bureau's rate adequacy.

Inc., 503 F. Supp. 2d 730, 740-42 (E.D. Pa. 2007). Yet, as the District Court held, those cases are irrelevant because the DOI is "fully empowered to regulate the one rate at issue." McCray, 636 F. Supp. 2d at 331. Moreover, Appellants fail to present any authority showing that plaintiffs must have access to an alternative regulatory remedy before courts may apply the filed rate doctrine.[8]

Finally, Appellants argue that the filed rate doctrine does not apply because Appellees' filings do not comply with Delaware law. The filed rate doctrine applies to rates "properly filed with the appropriate . . . regulatory authority." Ark. La. Gas Co., 453 U.S. at 577. The Supreme Court explained the properly filed requirement in Security Services, Inc. v. Kmart Corp., 511 U.S. 431, 114 S. Ct. **[*240]** 1702, 128 L. Ed. 2d 433 (1994). In that case, the petitioner—a corporation that agreed to deliver goods for Kmart—sued Kmart to enforce the petitioner's filed delivery rates. The Court, however, held that the rates were unenforceable, *see* id. at 444, because they had **[**22]** become "void as a matter of law under the Interstate Commerce Commission's regulations," id. at 433. The Court reasoned that the petitioner's rates were "incomplete" and therefore "insufficient to support a reliable calculation of charges." Id. at 443. More precisely, the rates included per mile delivery prices, but relied on an outside source to "calculat[e] charges for a given shipment." Id. at 433. Because that source was no longer available to the petitioner, the Court concluded that the rates were missing an "essential element," id. at 440, and were thus void, *see* id. at 443-44.

Although we have not yet interpreted *Kmart*, other courts have understood the decision to mean that the filed rate doctrine does not apply where: (1) "there is an absence of a calculable rate," Whitaker v. Frito-Lay, Inc., 88 F.3d 952, 961 (11th Cir. 1996); or (2) the rates are void per se under a statutory or regulatory scheme, *see* Norwest Transp., Inc. v. Horn's Poultry, Inc., 37 F.3d 1237, 1239 (7th Cir. 1994) (finding *Kmart* inapplicable because the regulations at issue did not "make the previously filed tariffs void"); *see also* Atlantis Express, Inc. v. Associated Wholesale Grocers, Inc., 989 F.2d 281, 283-84 (8th Cir. 1993) **[**23]** (applying both factors).

According to Appellants, the filed rate doctrine should not apply under *Kmart* because Appellees' filings "lack essential cost data," which is required under the DOI's regulations. Appellants' Br. at 32. The DOI typically requires insurers to "file . . . prospective loss costs" and supporting data along with their proposed rates. Bulletin No. 5. However, the DOI waived that requirement with regard to Appellees' first rate filings. Bulletin No. 27. Because Appellees never filed additional rates, Appellants assert that the challenged rates no longer conform with the DOI's regulations, making the filed rate doctrine inapplicable. In response, Appellees contend that their failure to file additional rates does not show that the existing "rates were not properly filed" because the DOI "waived loss cost requirements for DTIRB's initial rate filing."[9] Appellees' Br. at 38 (internal quotation marks and citation omitted).

Appellees' rates do not fall under the Kmart improper filing exception. First, Appellants do not claim that Appellees' filings make it impossible for consumers to calculate the chargeable rates. *See* Kmart Corp., 511 U.S. at 443. To the contrary, in their complaint, Appellants provide a detailed explanation of DTIRB's title insurance rates and state that "[t]hese uniform rates are set forth in DTIRB's rating manual and on many of defendants' websites." J.A. at 222. In addition, there is no indication that DTIRB's rates are void per se under a statutory or regulatory scheme. *See* Norwest Transp., Inc., 37 F.3d at 1239. Although the DOI usually requires insurers to accompany their rates with "prospective loss costs" and supporting data, the DOI waived that requirement with respect to **[*241]** Appellants' first rate filing and was permitted to do so under Delaware law. *See* Del. Code Ann. tit. 18, § 2505 ("[T]he

---

[8] Indeed, Appellants concede that "cases have noted that the availability of an alternative regulatory remedy is not a 'prerequisite' for application of **[**21]** the filed rate doctrine." Appellants' Br. at 28 n.9 (citing Wegoland, Ltd. v. NYNEX Corp., 806 F. Supp. 1112 (S.D.N.Y. 1992)). And in any event, Delaware allows interested parties to challenge insurance rates by making written application to the Commissioner for an administrative hearing. The Commissioner will determine if a hearing is justified, after which the Commissioner may deem the filings "no longer effective." Del. Code Ann. tit. 18, § 2520(a)-(c). At oral argument, counsel for Appellants conceded that they did not administratively challenge DTIRB's rates.

[9] Appellees also argue that the DOI's supporting data requirement governs "filings by rating bureaus for lines of insurance *other* than title insurance." Appellees' Br. at 7 n.3. However, nothing in Bulletin No. 5 indicates that the regulation is limited **[**24]** to certain types of insurance. *See* Bulletin No. 5 (stating that the bulletin applies generally to "participating insurers").

Commissioner may, by written order, suspend or modify the requirement of filing as to any kind of insurance . . . ").[10] Furthermore, by requiring Appellees to "have **[**25]** an approved statistical plan in place" that will "enable the [DOI] to monitor rate adequacy," Bulletin No. 27, the DOI complied with its statutory duty to "require the insurer to furnish the information upon which it supports the filing." Tit. 18, *§ 2504(b)*. Overall, Appellees have "properly filed" their rates with the "appropriate . . . regulatory authority," thus justifying the District Court's application of the filed rate doctrine.[11] *Ark. La. Gas Co., 453 U.S. at 577*.

B. *Policies Underlying the Filed Rate Doctrine*

In their reply brief, Appellants argue that the policies underlying the filed rate doctrine do not require its application in this case. Although we have generally held that "[a]n appellant waives an argument in support of reversal if he does not raise that argument in his opening brief," *AT & T v. FCC, 582 F.3d 490, 495 (3d Cir. 2009)*, *rev'd on other grounds*, *131 S. Ct. 1177, 179 L. Ed. 2d 132 (2011)*, it is well settled that "where an appellee raises a[n] argument not addressed by the appellant in its opening brief, the appellant may reply." *Bennett v. Tucker, 827 F.2d 63, 69-70 n.2 (7th Cir. 1987)*. This court may thus consider Appellants' policy argument because Appellees raised it for the first time in their brief.

The filed rate doctrine is designed to advance two "companion principles": (1) "preventing carriers **[**28]** from engaging in price discrimination as between ratepayers," and (2) "preserving the exclusive role of . . . agencies in approving rates **[*242]** . . . by keeping courts out of the rate-making process," a function that "regulatory agencies are more competent to perform." *Marcus v. AT&T Corp., 138 F.3d 46, 58 (2d Cir. 1998)*. These "companion principles" are often called the "nondiscrimination strand" and the "nonjusticiability strand." *Id*. The "nonjusticiability strand" recognizes that "(1) legislatively appointed regulatory bodies have institutional competence to address rate-making issues; (2) courts lack the competence to set . . . rates; and (3) the interference of courts in the rate-making process would subvert the authority of rate-setting bodies and undermine the regulatory regime." *Sun City Taxpayers' Assoc. v. Citizens Utils. Co., 45 F.3d 58, 62 (2d Cir. 1995)*. The "nondiscrimination strand" recognizes that "victorious plaintiffs would wind up paying less than non-suing ratepayers." *Wegoland, 27 F.3d at 21*.

Appellants argue that the nonjusticiability strand does not compel the doctrine's application in this case. More precisely, Appellants claim that nonjusticiability concerns arise **[**29]** only "when there is an *active* regulator." Reply Br. at 6. Here, Appellants claim that the DOI neither "*sets* the rates nor *exercises any meaningful review* of the rates." *Id*. Thus, they contend that the District Court would not interfere with "the regulatory authority of the DOI" by awarding damages based on hypothetical legal rates. *Id*. at 7. Appellees assert that such a damage award would

---

[10] At oral argument, counsel for Appellant argued that Appellees' rate filings are invalid because the Appellees jointly formulated the proposed rates even though Bulletin No. 5 required each insurer to "individually determine and file the rates it will use as a result of its own independent company decision-making process." Bulletin No. 5. However, Bulletin No. 27 "allow[ed] an exception to the requirements of using the rating format (loss cost) prescribed in Bulletin No. 5," which necessarily included the directive to individually determine and file rates. Bulletin No. 27. Indeed, the DOI issued Bulletin No. 5 in order to "specif[y] the framework under which . . . insurers . . . will operate in a loss cost system." **[**26]** Bulletin No. 5. Because that system was temporarily lifted in Bulletin No. 27, Appellants cannot rely on its requirements to insist that Appellants' rate filings are improper. In addition, title 18, *section 2501* of the Delaware Code states that, among other things, "[t]he purpose of this chapter is to . . . authorize and regulate cooperative action among insurers in rate making."

[11] Appellants also argue that the *Kmart* improper filing exception applies because: (1) the DITRB's filings include hidden costs based on "kickbacks and other inducements unrelated to the business of insurance," Appellants' Br. at 32 (internal quotation marks and citation omitted); and (2) the Tenth Circuit addressed a similar situation in *TON Services, Inc. v. Qwest Corp., 493 F.3d 1225 (10th Cir. 2007)*, and refused to apply the filed rate doctrine, *see* Appellants' Br. at 33. These arguments are meritless. With regard to Appellants' "hidden costs" argument, it is well established that "there is no fraud exception to the filed rate doctrine." *AT & T Corp. v. JMC Telecom, LLC, 470 F.3d 525, 535 (3d Cir. 2006)*. Thus, the fact that Appellees allegedly hid expenses and engaged in other fraudulent conduct does not **[**27]** make the doctrine inapplicable. Furthermore, Appellants' second argument is unpersuasive both because *TON Services* is non-binding authority and because the insurers in that case, unlike Appellees, failed to file new rates and failed to file supporting data for existing rates absent legal permission from the regulating agency. *See 493 F.3d at 1237*.

implicate the nonjusticiability strand because it would "second-guess the [DOI's] specialized knowledge." Appellees' Br. at 27.

The nonjusticiability strand supports the doctrine's application in this case. In their initial complaint, Appellants requested treble damages and "returned overpayments" based on Appellees' allegedly inflated title insurance rates. J.A. at 65. To award such damages, the District Court would have to calculate the legal rate but for DTIRB's antitrust violations. That task alone is enough to implicate the nonjusticiability principle, which is primarily concerned with preventing courts from engaging in the ratemaking process. *See, e.g.,* Montana-Dakota Utils., 341 U.S. at 251 (finding that it is not "open to the courts to determine what the reasonable rates during the past should **[**30]** have been"). In addition, the District Court's interference in the rate making process would "subvert the authority" of the DOI by second-guessing its rate determination, thus further implicating the nonjusticiability strand. Sun City Taxpayers' Assoc., 45 F.3d at 62.

The nondiscrimination strand, on the other hand, is not implicated by Appellants' claims. Appellants brought the underlying suit on behalf of "themselves and all others similarly situated." J.A. at 45. Accordingly, it is unlikely that a victory would allow Appellants to pay less than other ratepayers. *See* Square D, 476 U.S. at 423 (noting that "the development of class actions . . . might alleviate the . . . concern about unfair rebates"); Wegoland, 27 F.3d at 22 ("[C]oncerns for discrimination are substantially alleviated in [a] putative class action."). Nonetheless, we hold that the filed rate doctrine applies to Appellants' claims based on the nonjusticiability principle alone. *See* Marcus, 138 F.3d at 59 (stating that the doctrine applies "whenever either the nondiscrimination strand or the nonjusticiability strand . . . is implicated").

C. *Standing*

With respect to Appellants' injunctive relief claims, they argue that **[**31]** the District Court erred by concluding that Appellees' "actions are statutorily exempt from antitrust liability pursuant to the **[*243]** McCarran-Ferguson Act."[12] Appellants' Br. at 35. We will not reach this issue because Appellants lack standing to seek injunctive relief.[13]

"Absent Article III standing, a federal court does not have subject matter jurisdiction to address a plaintiff's claims, and they must be dismissed." Taliaferro v. Darby Twp. Zoning Bd., 458 F.3d 181, 188 (3d Cir. 2006). Article III standing requires "(1) injury-in-fact, which is an invasion of a legally protected interest that is (a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical; (2) a causal connection between the injury and the conduct complained of; and (3) it must be likely, as opposed to merely speculative, that the injury will be redressed by a favorable decision." Danvers Motor Co., Inc. v. Ford Motor Co., 432 F.3d 286, 290-91 (3d Cir. 2005). "Allegations of 'possible future injury' are not sufficient to satisfy Article III." Reilly v. Ceridian Corp., 664 F.3d 38, 42 (3d Cir. 2011) (citation omitted). Instead, "'[a] threatened injury must be certainly impending,' and 'proceed with a high **[**33]** degree of immediacy.'" *Id*. (citations omitted). In the context of class actions, Article III standing "is determined vis-a-vis the named parties." Krell v. Prudential Ins. Co. of Am., 148 F.3d 283, 306 (3d Cir. 1998).

---

[12] The filed rate doctrine does not bar injunctive relief claims with respect to future rates. *See* Square D, 476 U.S. at 422 & n.28 (noting that the filed rate doctrine precludes antitrust claims for treble damages); Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application ¶ 247d (3d ed. 2006) ("[T]here is no reason to think *Keogh* would prohibit an injunction against an antitrust violation attending some tariff that would or might be filed in the future. Such a tariff has not been 'filed' at all."). However, the McCarran-Ferguson Act exempts conduct from antitrust liability if it: (1) constitutes "the business of insurance," (2) is "regulated pursuant to state law," and (3) does not "constitute acts of boycott, coercion or intimidation." Ticor Title Ins. Co. v. FTC, 998 F.2d 1129, 1133 (3d Cir. 1993) (internal quotation marks and citation omitted).

[13] Although Appellees **[**32]** do not address standing, "we are required to raise issues of standing sua sponte if such issues exist." Steele v. Blackman, 236 F.3d 130, 134 n.4 (3d Cir. 2001) (citing FOCUS v. Allegheny Cnty. Court of Common Pleas, 75 F.3d 834, 838 (3d Cir. 1996)).

Appellants lack standing to seek injunctive relief because they failed to allege an injury-in-fact.[14] In their amended complaint, Appellants "challenge[d] the defendants' collective price-setting of rates . . . as *per se* illegal price-fixing" and sought "injunctive relief . . . due to the significant threat of future losses and injuries resulting from those antitrust violations." J.A. at 213. However, Appellants did not indicate when such "future losses and injuries" will occur. Instead, they vaguely alleged that "[a]s a proximate result of defendants' unlawful conduct, plaintiffs and the Class will suffer future loss or damages in that they will be required to pay supra-competitive prices for title insurance policies." J.A. at 230. Those allegations, taken as true, do not indicate that a named party has "actual or imminent" plans to purchase title insurance. Nor do they establish that DTIRB intends to file new rates in the future.[15] **[*244]** On the contrary, Appellants state in **[**34]** their amended complaint that "[t]here is a remarkable absence of rate changes by title insurers over the past several years," and "Defendants' current rates, for example, have been in place since February 2004 without any change." J.A. at 225. Therefore, because it is "merely speculative" that Appellants' injury will be "redressed by a favorable decision," we lack appellate jurisdiction to address Appellants' injunctive relief claims.

III.

Conclusion

For **[**35]** the foregoing reasons, we will affirm the District Court's orders.

End of Document

---

[14] When reviewing a complaint for standing, we determine "whether the allegations on the face of the complaint, taken as true, allege facts sufficient to invoke the [court's] jurisdiction." *Reilly, 664 F.3d at 41* (internal quotation marks and citation omitted).

[15] DTIRB's current rates do not constitute a legal injury under the filed rate doctrine. *Keogh, 260 U.S. at 163* (stating that "[u]nless and until suspended or set aside, th[e filed] rate is made, for all purposes, the legal rate"); *see also* *Wegoland, 27 F.3d at 18* ("[T]he doctrine holds that any 'filed rate' . . . is per se reasonable and unassailable in judicial proceedings brought by ratepayers."). Thus, Appellants must establish standing based on the possibility of future unfair rates.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN3[] **Standards of Review, Abuse of Discretion**

In reviewing the sufficiency of a complaint, a court must accept all well pled facts as true and draw all permissible inferences in favor of the plaintiff. The Federal Rules of Civil Procedure require only that a complaint provide the defendant with fair notice of what the claim is and the grounds upon which it rests. However, a complaint may be so sketchy that the complaint does not provide the type of notice of the claim to which the defendant is entitled under the Federal Rules of Civil Procedure, in which case a dismissal of the complaint is proper. The United States Supreme Court has described this notice-pleading standard as requiring a complaint to contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. While factual allegations must be accepted as true, legal conclusions may not be considered. Dismissals under *Fed. R. Civ. P. 12(b)(6)* are questions of law and thus are reviewed de novo. A district court's decision to dismiss a complaint with prejudice is reviewed for abuse of discretion.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN4[] **Sherman Act, Claims**

The purpose of the Sherman Act is to protect consumers from injury that results from diminished competition. Thus, a plaintiff must allege, not only an injury to himself, but an injury to the market as well. Accordingly, a plaintiff must prove three elements to succeed under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*: (1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in a relevant market; and (3) an accompanying injury.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN5[] **Sherman Act, Claims**

Most *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, cases focus not on whether a relevant market exists, but on the other aspect of the second required showing—whether a restraint of trade in a given market was actually unreasonable.

Antitrust & Trade Law > Sherman Act > Claims

HN6[] **Sherman Act, Claims**

Since the Sherman Act is meant to protect the benefits of competition, the determination of whether a restraint is unreasonable must focus on the competitive effects of challenged behavior relative to such alternatives as its abandonment or a less restrictive substitute. Courts have established three categories of analysis—per se, quick-look, and Rule of Reason—for determining whether actions have anticompetitive effects, though the methods often blend together. All of these methods of analysis are meant to answer the same question: whether or not the challenged restraint enhances competition.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN7[] Per Se Rule Tests, Manifestly Anticompetitive Effects

In the context of the Sherman Act, the standard framework for analyzing an action's anticompetitive effects on a market is the Rule of Reason. Under a Rule of Reason analysis, the plaintiff carries the burden of showing that an agreement or contract has an anticompetitive effect on a given market within a given geographic area. As a threshold matter, a plaintiff must show that the defendant has market power—that is, the ability to raise prices significantly without going out of business—without which the defendant could not cause anticompetitive effects on market pricing. If the plaintiff meets his burden, the defendant can show that the restraint in question actually has a procompetitive effect on balance, while the plaintiff can dispute this claim or show that the restraint in question is not reasonably necessary to achieve the procompetitive objective.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN8[] Per Se Rule Tests, Manifestly Anticompetitive Effects

In the context of the Sherman Act, the second framework utilized by courts—the per se rule—for analyzing an action's anticompetitive effects on a market is employed when a practice facially appears to be one that would always or almost always tend to restrict competition and decrease output. Restraints that would fall under this category are illegal as a matter of law for reasons of efficiency; in essence, it is simply not worth the effort or resources of a Rule of Reason analysis when the court can predict with confidence that the Rule of Reason will condemn a restraint. Under the per se framework, a restraint is deemed unreasonable without any inquiry into the market context in which the restraint operates. Horizontal price fixing and output limitation are classic examples of behavior that is considered anticompetitive per se.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN9[] Per Se Rule Tests, Manifestly Anticompetitive Effects

In the context of the Sherman Act, the third framework for analyzing an action's anticompetitive effects on a market is the quick-look analysis, which is used where the per se framework is inappropriate, but where no elaborate industry analysis is required to demonstrate the anticompetitive character of an agreement, and proof of market power is not required. Put another way, the quick-look approach can be used when an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets, but there are nonetheless reasons to examine potential procompetitive justifications. Among other situations, the quick-look approach is used when a restraint would normally be considered illegal per se, but a certain degree of cooperation is necessary if the product at issue is to be preserved. Under this approach, if no legitimate justifications for facially anticompetitive behavior (such as price-fixing) are found, no market power analysis is necessary and the court condemns the practice without ado. But if justifications are found, a full Rule of Reason analysis may need to take place.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN10[] Sherman Act, Claims

In the context of the Sherman Act, a plaintiff's threshold burden under the Rule of Reason analysis involves the showing of a precise market definition in order to demonstrate that a defendant wields market power, which, by definition, means that the defendant can produce anticompetitive effects. The quick-look doctrine permits plaintiffs to forgo any strict showing of market power, and thus a specific definition of the relevant market. Where a practice has obvious anticompetitive effects—as does price-fixing—there is no need to prove that the defendant possesses market power. This does not mean, however, that there need not be a relevant market on which actions have an anticompetitive effect. The entire point of the Sherman Act is to protect competition in the commercial arena; without a commercial market, the goals of the Sherman Act have no place. If a plaintiff can show that a defendant has engaged in naked restrictions on price or output, he can dispense with any showing of market power until a procompetitive justification is shown, but the existence of a relevant market cannot be dispensed with altogether. It is the existence of a commercial market that implicates the Sherman Act in the first instance.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN11[] Sherman Act, Claims

In the context of the Sherman Act, a showing of market power is not necessary in a case involving clear restrictions on price and output unless and until a full Rule of Reason analysis takes place.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN12[] Sherman Act, Scope

The Sherman Act applies to the National Collegiate Athletic Association bylaws generally. The Sherman Act applies to commercial transactions, and the modern definition of commerce includes almost every activity from which an actor anticipates economic gain.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN13[] Sherman Act, Scope

The transactions between National Collegiate Athletic Association schools and student-athletes are, to some degree, commercial in nature, and therefore take place in a relevant market with respect to the Sherman Act.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Evidence > Inferences & Presumptions > Presumptions

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN14[] Sherman Act, Scope

In the context of the Sherman Act, the first—and possibly only—question to be answered when National Collegiate Athletic Association (NCAA) bylaws are challenged is whether the NCAA regulations at issue are of the type that have been blessed by the United States Supreme Court, making them presumptively procompetitive.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Evidence > Inferences & Presumptions > Presumptions

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN15[] Per Se Rule Tests, Manifestly Anticompetitive Effects

In the context of the Sherman Act, a certain amount of collusion in college football is permitted because it is necessary for the product to exist. Accordingly, when a National Collegiate Athletic Association (NCAA) bylaw is clearly meant to help maintain the revered tradition of amateurism in college sports or the preservation of the student-athlete in higher education, the bylaw will be presumed procompetitive since a court must give the NCAA ample latitude to play that role. But if a regulation is not, on its face, helping to preserve a tradition that might otherwise die, either a more searching Rule of Reason analysis will be necessary to convince the court of its procompetitive or anticompetitive nature, or a quick look at the rule will obviously illustrate its anticompetitiveness.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Evidence > Inferences & Presumptions > Presumptions

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN16[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

In the context of the Sherman Act, most—if not all—eligibility rules fall comfortably within the presumption of procompetitiveness afforded to certain National Collegiate Athletic Association (NCAA) regulations. Beyond the obvious fact that the United States Supreme Court explicitly mentioned eligibility rules as a type that fits into the same mold as other procompetitive rules, they are clearly necessary to preserve amateurism and the student-athlete in college football. Indeed, they define what it means to be an amateur or a student-athlete, and are therefore essential to the very existence of the product of college football. There may not be such a thing as a student-athlete, for instance, if it was not for the NCAA rules requiring class attendance, and thus no detailed analysis would be necessary to deem such rules procompetitive. The same goes for bylaws eliminating the eligibility of players who receive cash payments beyond the costs attendant to receiving an education—a rule that clearly protects amateurism.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN17[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

In the context of the Sherman Act, financial aid rules do not always assist in the preservation of amateurism or the existence of student-athletes.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN18[] **Sherman Act, Claims**

Naked price and output controls can obviate the need for a detailed market analysis in a Sherman Act case, but that does not eliminate the need for a relevant commercial market to exist altogether. In an area that is not obviously commercial, and thus where the Sherman Act's application is not clearly apparent, it is incumbent on the plaintiff to describe the rough contours of the relevant commercial market in which anticompetitive effects may be felt, even when a quick-look approach is all that is called for.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN19[] Sherman Act, Scope

In the context of the Sherman Act, the difference between a market for educational services and a market for bachelor's degrees is of vital importance. A student is owed educational instruction upon payment of tuition, though what a student does with that instruction and whether that instruction leads to a degree is up to the student. A bachelor's degree, on the other hand, is not bought outright. It is the opportunity to earn a bachelor's degree that one pays for (or performs athletic services for, as the case may be).

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN20[] Sherman Act, Scope

Labor markets are cognizable under the Sherman Act.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN21[] Sherman Act, Scope

The fact that certain procompetitive, legitimate trade restrictions exist in a given industry does not remove that industry from the purview of the Sherman Act altogether. Rather, all National Collegiate Athletic Association actions that are facially anticompetitive must have procompetitive justifications supporting their existence.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN22[] Standards of Review, Abuse of Discretion

A district court's denial of plaintiffs' request to amend their complaint is reviewed for abuse of discretion, which is a heavy burden. Under *Fed. R. Civ. P. 15(a)*, a complainant may amend his complaint as a matter of course in response to a motion to dismiss, but any subsequent amendments can only be made with consent of the opposing party or the court's leave. A district court is not required to grant such leave when a plaintiff has had multiple opportunities to state a claim upon which relief may be granted.

Civil Procedure > Appeals > Appellate Briefs

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN23[] **Appeals, Appellate Briefs**

It is a basic principle that a complaint may not be amended by the briefs in opposition to a motion to dismiss, nor can it be amended by the briefs on appeal.

For NATIONAL COLLEGIATE ATHLETIC ASSOCIATION, Defendant - Appellee: Gregory L. Curtner, Attorney, SCHIFF HARDIN LLP, Ann Arbor, MI.

Judges: Before FLAUM and KANNE, Circuit Judges, and CHANG, District Judge.[**]

Opinion by: FLAUM

Opinion

[*332] FLAUM, *Circuit Judge*. Joseph Agnew and Patrick Courtney ("plaintiffs") have at least two things in common: they were both highly successful high school football players that earned scholarships to play for National Collegiate Athletic Association ("NCAA") Division I football programs, and they both suffered career-ending football injuries during their college tenures. The athletic scholarships held by plaintiffs at the time of their injuries were good for one year only, and needed to be renewed **[**2]** to be valid for any subsequent seasons. When plaintiffs' injuries prevented them from playing football, their scholarships were not renewed. Plaintiffs claim that two NCAA regulations—the cap on the number of scholarships given per team and the prohibition of multi-year scholarships[1]—prevented them from obtaining scholarships that covered the entire cost of their college education. These regulations, according to plaintiffs, have an anticompetitive effect on the market for student-athletes, and therefore violate § 1 of the Sherman Act. *15 U.S.C. § 1*. The NCAA filed a motion to dismiss and the district court granted that motion, finding that plaintiffs failed to allege a relevant market on which the NCAA's Bylaws had an anticompetitive effect. Plaintiffs appealed the dismissal. While we depart from some of the district court's reasoning,

---

[**] The Honorable Edmond E. Chang, Judge of the United States District Court for the Northern District of Illinois, sitting by designation.

[1] On February 17, 2012, a new NCAA regulation permitting multi-year scholarships became final. *See* Steve Wieberg, *Multiyear Scholarship* ***[**3]*** *Rule Narrowly Survives Override Vote*, USA TODAY (Feb. 17, 2012, 7:00 p.m.), *http://www.usatoday.com*/sports/college/story/2012-02-17/multiyear-scholarships-survives-close-vote/53137194/1. Since plaintiffs seek damages for prior actions taken by the NCAA and its member schools, the repeal of the multi-year scholarship prohibition does not render this case nonjusticiable.

we ultimately conclude that plaintiffs' complaint did not sufficiently identify a commercial market—an obvious necessity for Sherman Act violations—and thus we affirm the district court's dismissal of plaintiffs' suit.

I. Background

In 2006, after receiving several offers from a number of college football teams, Agnew enrolled at Rice University on an athletic scholarship. In exchange for agreeing to play football at Rice, Agnew received a year of education, room, and board at no charge. That scholarship was renewed for Agnew's second year at Rice. During his sophomore year, Agnew suffered a series of football-related injuries. The injuries, along with a coaching change at Rice, resulted in the school's decision not to renew Agnew's scholarship for his junior year. Agnew successfully appealed this decision and received one more year-long scholarship, but he was unable to acquire a scholarship for his senior year. As a result, he was forced to pay full price for the last year of his undergraduate education.

Courtney endured a similar **[**4]** experience. In 2009, Courtney decided to attend North Carolina A&T on full athletic scholarship to play football. As with Agnew, the scholarship was only a year long. During training camp Courtney was injured, and as a result, his scholarship was not renewed. Due to his financial circumstances and the high cost of out-of-state tuition, Courtney was forced to transfer to a different school and pay tuition out-of-pocket.

Plaintiffs allege that their failure to acquire a scholarship equal to the full cost of obtaining a bachelor's degree is the result **[*333]** of the NCAA's regulation of participating schools' athletic scholarships. Plaintiffs specifically cite two NCAA bylaws (the "Bylaws") as the source of their injury: (1) the one-year scholarship limit, which prohibits NCAA member schools from offering student-athletes multi-year scholarships, 2009-10 NCAA Division I Manual, Bylaw 15.3.3.1 (2009-10); and (2) the cap on the number of athletic scholarships a school can offer for each team in a given year, *see, e.g.*, 2009-10 NCAA Division I Manual, Bylaw 15.5.4. According to plaintiffs, NCAA member schools compete intensely over the premier student-athletes in the country, and if the Bylaws had **[**5]** not been passed, schools would need to offer multi-year scholarships to stay competitive in the market for elite athletes. They assert that multi-year scholarships used to be the norm before the Bylaws went into effect. The current ban on such scholarships, they claim, forces student-athletes who do not have their scholarships renewed to pay more for their undergraduate education. Plaintiffs further contend that the limit on the number of athletic scholarships a school can offer reduces the total number of athletic scholarships offered, thus preventing some students—perhaps those that are injured but would have been offered a multiyear scholarship but for the Bylaws—from obtaining a bargained for education. Plaintiffs therefore maintain that the Bylaws violate § 1 of the Sherman Act. *15 U.S.C. § 1*.

On October 25, 2010, plaintiffs filed suit against the NCAA in the United States District Court for the Northern District of California.[2] In response, the NCAA filed a motion to dismiss and a motion to transfer simultaneously. The motion to dismiss was fully briefed, but in February 2011, the Northern District of California decided not to rule on the motion and to transfer the case to the **[**6]** Southern District of Indiana. The parties set a schedule for rebriefing applying Seventh Circuit case law, and before the briefs were submitted, plaintiffs filed an amended complaint. The complaint alleged that the Bylaws resulted in a horizontal agreement to fix prices and reduce output, which caused a reduction of the supply of bachelor's degrees and an increase in the price for bachelor's degrees for those that did not have their scholarships renewed.

In its motion to dismiss, the NCAA argued that plaintiffs' complaint should be dismissed for three reasons: (1) it failed to identify a relevant market, a necessity for a valid Sherman Act claim; (2) it failed to allege facts sufficient to show that the NCAA injured competition in a relevant market; and (3) it failed to allege facts sufficient to show an injury **[**7]** as a result of anticompetitive acts committed by the NCAA. On September 1, 2011, the district court granted the NCAA's motion to dismiss. The court held that plaintiffs failed to identify a cognizable market in which trade was improperly restrained, and that even if plaintiffs did adequately allege that there is a product market for

[2] Agnew originally filed the lawsuit as a class action, but had not filed a motion to certify a class at the time of the dismissal of the claims at issue. Thus, when plaintiffs' claims were dismissed, the entire lawsuit was dismissed, since there were no other parties with legally protected interests in the litigation. *See Wiesmueller v. Kosobucki, 513 F.3d 784, 786 (7th Cir. 2008)*.

bachelor's degrees or a labor market for student-athletes—as plaintiffs contended during oral argument—those markets are not cognizable in the context of the Sherman Act. Since the NCAA's first argument was sufficient to dismiss plaintiffs' claims, the court did not pass on the NCAA's other arguments. The district court also held that plaintiffs' claims would **[*334]** be dismissed with prejudice for two reasons. First, plaintiffs already had the opportunity to amend their complaint after being exposed to the NCAA's arguments in the Northern District of California, and yet they chose not to clearly identify a relevant commercial market. Second, plaintiffs did not show how they could alter their complaint to make it sufficient since, according to the district court, the markets discussed at oral argument are not cognizable under the Sherman Act. Plaintiffs have appealed **[**8]** the district court's decision to dismiss its claims as well as its decision to dismiss with prejudice.

II. Discussion

Plaintiffs' suit was brought pursuant to statutory provisions found in the Sherman Act and the Clayton Act. Under § 1 of the Sherman Act, ***HN1***[] "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal." *15 U.S.C. § 1*. Plaintiffs' civil cause of action is rooted in the Clayton Act, which states that ***HN2***[] "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue . . . and shall recover threefold the damages by him sustained." *15 U.S.C. § 15*. Plaintiffs allege that the Bylaws are a restraint on trade in the labor market for student-athletes and the product market for bachelor's degrees, and thus violated plaintiffs' statutory rights under the Sherman Act. The NCAA contends that plaintiffs' complaint did not identify any market, including a bachelor's degree or labor market, in which the Bylaws restrained trade. The NCAA further argues that even if plaintiffs' complaint did sufficiently identify a product market for bachelor's degrees **[**9]** or a labor market for student-athletes, those markets are not commercial, and therefore are not cognizable under the Sherman Act. If this is true, then any NCAA actions affecting those markets—to the extent that they are markets—are not subject to antitrust laws.

HN3[] In reviewing the sufficiency of a complaint, we must accept all well pled facts as true and draw all permissible inferences in favor of the plaintiff. *Active Disposal, Inc. v. City of Darien, 635 F.3d 883, 886 (7th Cir. 2011)*. The Federal Rules of Civil Procedure require only that a complaint provide the defendant with "fair notice of what the . . . claim is and the grounds upon which it rests." *Erickson v. Pardus, 551 U.S. 89, 93, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. We have explained, however, that a complaint may be "so sketchy that the complaint does not provide the type of notice of the claim to which the defendant is entitled under [the Federal Rules of Civil Procedure]," in which case a dismissal of the complaint is proper. *Airborne Beepers & Video, Inc. v. AT&T Mobility LLC, 499 F.3d 663, 667 (7th Cir. 2007)*. The Supreme Court has described this notice-pleading standard as requiring **[**10]** a complaint to "contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*). While factual allegations must be accepted as true, legal conclusions may not be considered. *Id*. Dismissals under Rule 12(b)(6) are questions of law, and thus are reviewed de novo. *Autry v. Nw. Premium Servs., Inc., 144 F.3d 1037, 1039 (7th Cir. 1998)*. A district court's decision to dismiss a complaint with prejudice is reviewed for abuse of discretion. *Stanard v. Nygren, 658 F.3d 792, 797 (7th Cir. 2011)*.

A. Sherman Act Framework

HN4[] The purpose of the Sherman Act is to protect consumers from injury that **[*335]** results from diminished competition. *Banks v. NCAA, 977 F.2d 1081, 1087 (7th Cir. 1992)*. "Thus, the plaintiff must allege, not only an injury to himself, but an injury to the market as well." *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1107 (7th Cir. 1984)*. Accordingly, a plaintiff must prove three elements to succeed under § 1 of the Sherman Act: "(1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in [a] relevant market; and (3) **[**11]** an accompanying injury." *Denny's Marina, Inc. v. Renfro Prods., Inc., 8 F.3d 1217, 1220 (7th Cir. 1993)*. There is no question that all NCAA member schools have agreed to abide by the Bylaws; the first showing of an agreement or contract is therefore not at issue in this case.

The district court's dismissal of plaintiffs' claims focused solely on the second necessary showing—whether there has been an unreasonable restraint of trade in a relevant market. The court did not ultimately reach the question of whether the restraints were reasonable, since it found that plaintiffs did not allege a relevant market on which a restraint of trade could operate. ***HN5***[] Most § 1 cases focus not on whether a relevant market exists, but on the other aspect of the second required showing—whether a restraint of trade in a given market was actually unreasonable. While our central discussion will revolve around whether a relevant market was—or even could have been—identified in plaintiffs' complaint, a brief explanation of how courts determine if restraints are unreasonable will be helpful in understanding why plaintiffs are mistaken in their belief that a relevant market need not be identified at all in this **[**12]** case.

HN6[] Since the Sherman Act is meant to protect the benefits of competition, the determination of whether a restraint is unreasonable must focus on "the competitive effects of challenged behavior relative to such alternatives as its abandonment or a less restrictive substitute." Phillip Areeda, ***Antitrust Law*** ¶ 1500, at 362-63 (1986). Courts have established three categories of analysis—per se, quick-look, and Rule of Reason—for determining whether actions have anticompetitive effects, though the methods often blend together. *Cal. Dental Ass'n. v. FTC, 526 U.S. 756, 779, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)* ("The truth is that our categories of analysis of anticompetitive effect are less fixed than terms like '*per se*,' 'quick look,' and 'Rule of Reason' tend to make them appear."); *see also* *United States v. Brown Univ., 5 F.3d 658, 668 (3d Cir. 1993)*. All of these methods of analysis are meant to answer the same question: "whether or not the challenged restraint enhances competition." *Cal. Dental, 526 U.S. at 780*; *NCAA v. Bd. of Regents, 468 U.S. 85, 104, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*.

HN7[] The standard framework for analyzing an action's anticompetitive effects on a market is the Rule of Reason. *Cf.* *Chicago Prof'l Sports Ltd. P'ship v. NBA, 961 F.2d 667, 673 (7th Cir. 1992)*. **[**13]** Under a Rule of Reason analysis, the plaintiff carries the burden of showing that an agreement or contract has an anticompetitive effect on a given market within a given geographic area. *See* *Reifert v. S. Cent. Wis. MLS Corp., 450 F.3d 312, 321 (7th Cir. 2006)*. As a threshold matter, a plaintiff must show that the defendant has market power—that is, the ability to raise prices significantly without going out of business—without which the defendant could not cause anticompetitive effects on market pricing. *Valley Liquors, Inc. v. Renfield Importers, Ltd., 822 F.2d 656, 666 (7th Cir. 1987)*. If the plaintiff meets his burden, the defendant can show that the restraint in question actually has a procompetitive **[*336]** effect on balance, while the plaintiff can dispute this claim or show that the restraint in question is not reasonably necessary to achieve the procompetitive objective. Areeda, ***Antitrust Law***, ¶1507b, at 397 (1986).

HN8[] The second framework utilized by courts—the per se rule—is employed when a "practice facially appears to be one that would always or almost always tend to restrict competition and decrease output." *Bd. of Regents, 468 U.S. at 100* (quoting *Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 19-20, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*). **[**14]** Restraints that would fall under this category are illegal as a matter of law for reasons of efficiency; in essence, it is simply not worth the effort or resources of a Rule of Reason analysis when "the Court [can] predict with confidence that the Rule of Reason will condemn [a restraint]." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (quoting *Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 344, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*). Under the per se framework, a restraint is deemed unreasonable without any inquiry into the market context in which the restraint operates. *Bd. of Regents, 468 U.S. at 100*. Horizontal price fixing and output limitation are classic examples of behavior that is considered anticompetitive per se. *Id*.

HN9[] The third framework is the "quick-look" analysis, which is used where the per se framework is inappropriate, but where "no elaborate industry analysis is required to demonstrate the anticompetitive character of . . . an agreement," and proof of market power is not required. *Bd. of Regents, 468 U.S. at 109* (quoting *Nat'l Soc'y of Prof'l Engineers v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*). Put another way, the quick-look approach can be used when "an observer with even **[**15]** a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets," *Cal. Dental, 526 U.S. at 770*, but there are nonetheless reasons to examine potential procompetitive justifications. *See* Herbert Hovenkamp, ***Antitrust Law***, ¶ 1911c, at 273 (1998). Among other situations, the quick-look approach is used when a restraint would normally be considered illegal per se, but "a certain degree of cooperation is necessary if the [product at issue] is to be preserved." *Bd. of Regents, 468 U.S. at 117*; *see also* Hovenkamp, ***Antitrust Law***, ¶ 1911c, at 274 (1998). Under this approach, if no legitimate justifications for facially anticompetitive behavior (such as price-fixing) are found, no market power analysis is necessary and the court "condemns the practice without ado." *Chicago Prof'l Sports, 961 F.2d at 674*. But if justifications are found, a full Rule of Reason analysis may need to take place. *Cf.* *Chicago Prof'l Sports Ltd. P'ship v. NBA, 95 F.3d 593, 600 (7th Cir. 1996)*.

Plaintiffs contend that the third framework—the quick-look approach—is the appropriate method for analyzing whether the NCAA's actions have **[**16]** had an anticompetitive effect on a commercial market. This argument finds support in *Board of Regents*, where the Supreme Court held that since college athletics is "an industry in which horizontal restrictions on competition are essential if the product is to be available at all," it is inappropriate to apply a per se rule to NCAA regulations, even if they amount to horizontal price fixing and output limitation. *468 U.S. at 100-01*; *accord* *Chicago Prof'l Sports, 961 F.2d at 674*. According to plaintiffs, the NCAA's restriction on the **[*337]** number of scholarships a school can provide is a clear limitation on output (that is, the number of scholarships and, therefore, bachelor's degrees) and the NCAA's restriction of scholarships to one year is a clear limitation on price (that is, the price of bachelor's degrees and the cost that schools must pay for student-athletes). They therefore argue that despite the inapplicability of per se rule cases, a quick-look approach is warranted in this case, as it was in *Board of Regents*. Plaintiffs next argue that the quick-look framework absolves them of the burden of describing a relevant market on which the Bylaws have had an anticompetitive effect. The **[**17]** Supreme Court, in *Board of Regents*, stated that "when there is an agreement not to compete in terms of price or output, no elaborate industry analysis is required," and "naked restraint[s] on price and output require[] some competitive justification even in the absence of a detailed market analysis." *468 U.S. at 109-10* (internal quotation marks and citation omitted); *see also* *Law v. NCAA, 134 F.3d 1010, 1020 (10th Cir. 1998)* ("Under a quick look Rule of Reason analysis, anticompetitive effect is established, even without a determination of the relevant market, where the plaintiff shows that a horizontal agreement to fix prices exists . . . .").

Out of context, while these quotations seem to support plaintiffs' view of the quick-look doctrine, they are misleading. The quotes from *Board of Regents* and *Law* are not referring to the need for a relevant market to exist, but rather to the plaintiff's burden of showing that an agreement had anticompetitive effects on a particular market. As noted above, ***HN10***[] a plaintiff's threshold burden under the Rule of Reason analysis involves the showing of a precise market definition in order to demonstrate that a defendant wields market power, which, by definition, **[**18]** means that the defendant can produce anticompetitive effects. *See* *Valley Liquors, Inc., 822 F.2d at 666*. The quick-look doctrine permits plaintiffs to forgo any strict showing of market power, and thus a specific definition of the relevant market. *See* *Law, 134 F.3d at 1020* ("[W]here a practice has obvious anticompetitive effects—as does price-fixing—there is no need to prove that the defendant possesses market power."). This does not mean, however, that there need not be a relevant market on which actions have an anticompetitive effect. The entire point of the Sherman Act is to protect competition in the commercial arena, *Banks, 977 F.2d at 1087*; without a commercial market, the goals of the Sherman Act have no place. If a plaintiff can show that a defendant has engaged in naked restrictions on price or output, he can dispense with any showing of market power until a procompetitive justification is shown—but the existence of a relevant market cannot be dispensed with altogether. *Cf.* *Law, 134 F.3d at 1020*. It is the existence of a commercial market that implicates the Sherman Act in the first instance.[3]

[3] Aside from the fact that the plaintiffs misunderstand the need for the existence **[**19]** of a relevant market, it is unclear why they would adamantly seek to avoid the topic of market power. This appears to be a clear monopsony case, since the NCAA is the only purchaser of student athletic labor. In any event, ***HN11***[] a showing of market power is not necessary in a case involving clear restrictions on price and output unless and until a full Rule of Reason analysis takes place. *See* *Bd. of Regents, 468 U.S. at 109-10*.

The stage is therefore set. To succeed in its challenge of the district court's dismissal, plaintiffs must prove two points: (1) that there is a cognizable market on which the NCAA's actions could have had **[*338]** anticompetitive effects (thus implicating the Sherman Act); and (2) that plaintiffs did, in fact, identify that market in their complaint.[4]

B. Applicability of the Sherman Act to NCAA's Bylaws

The district court held that the bachelor's degree market and the student-athlete labor market, to the extent that they exist at all, could never be cognizable markets under the Sherman Act regardless of the clarity of plaintiffs' complaint. First, the district court found that we foreclosed any possibility that a labor market for student-athletes could be cognizable in *Banks v. NCAA, 977 F.2d 1081 (7th Cir. 1992)*. The district court went on to reject the possibility of a cognizable market for bachelor's degrees, finding two points to be particularly relevant: **[**21]** (1) that one cannot buy a bachelor's degree outright, but rather must meet certain requirements to receive the degree even after tuition has been paid; and (2) that student-athletes are not given bachelor's degrees for playing sports, but rather are given the opportunity to fulfill certain requirements that could lead to the bestowal of a bachelor's degree. Plaintiffs challenge the district court's findings.

It is undeniable that a market of some sort is at play in this case. A transaction clearly occurs between a student-athlete and a university: the student-athlete uses his athletic abilities on behalf of the university in exchange for an athletic and academic education, room, and board. As the Supreme Court made clear long ago, however, the Sherman Act was intended for, and thus only applies to, commercial transactions. *Apex Hosiery Co. v. Leader, 310 U.S. 469, 492-93, 60 S. Ct. 982, 84 L. Ed. 1311 (1940)*. *See also* Brown, 5 F.3d at 665 ("It is axiomatic that section one of the Sherman Act regulates only transactions that are commercial in nature."); Areeda & Hovenkamp, ***Antitrust Law***, ¶260b, at 250 (2000). In determining whether the exchange of free or reduced-rate education for athletic participation constitutes **[**22]** a cognizable market, then, we must determine whether such a transaction can be considered commercial. To begin with, the NCAA is not exempt from the strictures of the Sherman Act merely because it is a nonprofit entity, as *Board of Regents* makes clear. *See* 468 U.S. at 100. There is no clear line as to what constitutes a "commercial transaction," but one leading commentator has suggested that "today the term 'commerce' is much broader than it was [in the past] . . ., including almost every activity from which [an] actor anticipates economic gain." Areeda & Hovenkamp, ***Antitrust Law***, ¶260b, at 250 (2000).

The Sherman Act clearly applies to at least some of the NCAA's behavior. *See Bd. of Regents, 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70*; *see also Law, 134 F.3d 1010* (holding that **[*339]** the Sherman Act applies to the NCAA's regulation of the salaries of coaches). The question for us, however, is whether and when the Sherman Act applies to the NCAA and its member schools in relation to their interaction with student-athletes. The Supreme Court has not weighed in on this issue directly, but *Board of Regents*, the seminal case on the interaction between the NCAA and the Sherman Act, implies that *all* regulations passed by the **[**23]** NCAA are subject to the Sherman Act. *468 U.S. at 117*. In *Board of Regents*, the Supreme Court ruled that the NCAA's restrictions on televising football games were a violation of § 1 of the Sherman Act. In so holding, the Court stated the following:

> It is reasonable to assume that most of the regulatory controls of the NCAA are justifiable means of fostering competition among amateur athletic teams and therefore procompetitive because they enhance public interest in intercollegiate athletics. The specific restraints on football telecasts that are challenged in this case do not, however, fit into the same mold as do rules defining the conditions of the contest, the eligibility of participants,

---

[4] Of course, plaintiffs must show more than this to actually progress past the motion-to-dismiss stage. As stated *supra*, a successful Sherman Act plaintiff must prove the existence of "(1) a contract, combination, or conspiracy; (2) a resultant unreasonable restraint of trade in the relevant market; and (3) an accompanying injury." *Denny's Marina, 8 F.3d at 1220*. It is unquestionable that the member schools of the NCAA agreed to **[**20]** follow the NCAA's Bylaws, thus meeting the first element of a Sherman Act claim. Since the district court concluded that plaintiffs did not identify a relevant market in their complaint, it did not address whether plaintiffs adequately alleged that the Bylaws are an unreasonable restraint of trade or that they suffered an accompanying injury. Likewise, we need not analyze plaintiffs' assertions regarding the reasonableness of the NCAA's restraints or plaintiffs' alleged injury, since we ultimately conclude that plaintiffs failed to allege a relevant market in their complaint.

> or the manner in which members of a joint enterprise shall share the responsibilities and the benefits of the total venture.

Id. This presumes the applicability of the Sherman Act to NCAA bylaws, since no procompetitive justifications would be necessary for noncommercial activity to which the Sherman Act does not apply. Nonetheless, courts have struggled with the applicability of the Sherman Act to NCAA regulations.

Specifically, the Third and Fifth Circuits have confronted the issue at hand. The Third **[**24]** Circuit decided the issue definitively, but limited its holding to the NCAA's eligibility rules. *See* *Smith v. NCAA, 139 F.3d 180 (3d Cir. 1998)*. In *Smith*, the Third Circuit upheld the dismissal of a suit claiming that an NCAA bylaw "prohibiting a student-athlete from participating in intercollegiate athletics while enrolled in a graduate program at an institution other than the student-athlete's undergraduate institution" violated the Sherman Act. *Id. at 182*. The court first held that the NCAA's eligibility rules are not related to the NCAA's commercial interests, and thus the Sherman Act does not apply to the NCAA's promulgation of such rules. *Id. at 185-86*; *see also* *Gaines v. NCAA, 746 F.Supp. 738, 743-44 (M.D. Tenn. 1990)* (distinguishing between the NCAA's commercial rules and noncommercial rules, and finding that eligibility rules are of the latter type, and thus not subject to the Sherman Act). In an alternative holding, the Third Circuit also reasoned that even if the NCAA's actions were subject to the Sherman Act, the plaintiff's suit should have been dismissed based on a Rule of Reason analysis. *Smith, 139 F.3d at 186*. The court observed that NCAA eligibility rules "allow for **[**25]** survival of the product, amateur sports, and allow for an even playing field," thus making them procompetitive on balance. *Id. at 187*. Contrary to the Third Circuit, the Fifth Circuit assumed without deciding that the Sherman Act applies to the NCAA's promulgation of eligibility rules in *McCormack v. NCAA. 845 F.2d 1338, 1343-44 (5th Cir. 1988)*. The Fifth Circuit nonetheless ruled that a particular NCAA eligibility rule—the restriction on benefits awarded to student-athletes—easily survived a Rule of Reason analysis, even at the dismissal stage. *Id*. As in *Smith*, the Fifth Circuit cited the eligibility rules' ability to create the product of college football, preserve that product, and preserve "a mixture containing some amateur elements." *Id. at 1344-45*.

While this Circuit has not definitively decided whether a cognizable market exists **[*340]** between universities and student-athletes under the Sherman Act, our case of *Banks v. NCAA* included a discussion of the issue in the form of dicta found in the majority opinion (Coffey and Grant, JJ.) and in a partial concurrence and dissent (Flaum, J.). *See generally* *977 F.2d 1081*. In *Banks*, a former University of Notre Dame football player challenged **[**26]** the NCAA's rule barring any players who have hired an agent or entered a professional draft. *Id. at 1082*. The majority held that the plaintiff's complaint failed to allege an anticompetitive effect on a relevant market, and thus affirmed the district court's dismissal of the plaintiff's claim. *Id. at 1093* ("[W]e need not reach the merits of whether the no-draft rule is a 'material term of employment' as the dissent argues because Banks has failed to allege how the no-draft and no-agent rules are restraints of trade . . . ."). In dicta, the majority determined that even if the plaintiff had properly alleged anticompetitive effects of the NCAA bylaw in question, his claim would have failed. *Id. at 1090-91*. The opinion reasoned that the no-draft and no-agent bylaws were both eligibility requirements, which are essential to preserving the existence of a football league consisting of student-athletes as well as maintaining a clear line of demarcation between college sports and professional sports. *Id. at 1089-90*. Further, the majority expressed doubt that a labor market for NCAA athletes exists at all, since "the value of [a] scholarship is based upon the school's tuition and room and board, **[**27]** not by the supply and demand for players." *Id. at 1091*. The dissent, conversely, believed that the plaintiff had alleged anticompetitive effects on the nationwide labor market for college football players, a market that is cognizable under the Sherman Act, and that a view of the NCAA's eligibility rules as noncommercial was "an outmoded image of intercollegiate sports that no longer jibes with reality." *Id. at 1095, 1099* (Flaum, J., dissenting). Successful college football programs often lead to large profits, and to acquire those profits, schools must pay in-kind benefits, namely, grant-in-aid, access to training facilities, and instruction from premier coaching. *Id. at 1096, 1099*. Significantly, the dissent noted that the no-agent and no-draft rules are not necessarily Sherman Act violations, but believed that the plaintiff's complaint should have survived a motion to dismiss, and the procompetitive justifications of the eligibility rules at stake should have been examined more closely. *Id. at 1098*.

We start with the view that ***HN12***[] the Sherman Act applies to the NCAA bylaws generally. As indicated above, the Sherman Act applies to commercial transactions, and the modern definition of commerce **[**28]** includes "almost every activity from which [an] actor anticipates economic gain." Areeda & Hovenkamp, ***Antitrust Law***,

¶260b, at 250 (2000). No knowledgeable observer could earnestly assert that big-time college football programs competing for highly sought-after high school football players do not anticipate economic gain from a successful recruiting program. Despite the nonprofit status of NCAA member schools, the transactions those schools make with premier athletes—full scholarships in exchange for athletic services—are not noncommercial, since schools can make millions of dollars as a result of these transactions.[5] Indeed, this is likely one reason that some schools **[*341]** are willing to pay their football coaches up to $5 million a year rather than invest that money into educational resources. *See* Kristin DeRamus et al., *College Football Coach Salary Database*, 2006-2011, (Nov. 17, 2011 11:02 AM), USA TODAY, *http://www.usatoday.com/sports*/ college/football/story/2011-11-17/cover-college-football-coaches-salaries-rise/51242232/1 (putting top salary for a college head football coach at roughly $5.2 million). That is not to suggest that all universities with a football program are solely **[**29]** driven by economic benefit; the profits derived from athletics can aid a university in many positive ways that fall in line with the mission of the university as a whole. But that does not prevent many universities, through their football teams, from entering the recruiting market, setting their recruiting budget, and making recruiting decisions with economic interests in mind. Similarly, student-athletes contemplating scholarship offers likely include economic factors in their decision-making process, such as the value of a given degree or the increased potential for entry into professional football. It follows that the NCAA's bylaws can have an anticompetitive or a procompetitive effect on collegiate athletics generally and the national college football recruiting market specifically, and those effects can have an economic component. Thus, ***HN13***[] the transactions between NCAA schools and student-athletes are, to some degree, commercial in nature, and therefore take place in a relevant market with respect to the Sherman Act. *See White v. NCAA*, CV 06-999-RGK (C.D. Cal. Sept. 20, 2006) (holding that under the Sherman Act, "Major College Football" is a relevant market in which "colleges and **[**30]** universities compete to attract prospective student-athletes").

None of this is to suggest that all NCAA bylaws, or even *any* NCAA bylaws, are violative of the Sherman Act. On the contrary, *Board of Regents* implies that the Sherman Act does apply to NCAA regulations, but most regulations will be a "justifiable means of fostering competition among amateur athletic teams," and are therefore procompetitive. *468 U.S. at 117*. In fact, the Supreme Court seemed to create a presumption in favor of certain NCAA rules when it stated:

> It is reasonable to assume that most of the regulatory controls of the NCAA are . . . procompetitive because they enhance public interest in intercollegiate athletics. The specific restraints . . . that are challenged in this case do not, however, fit into the same mold as do rules defining the conditions of the contest, the eligibility of **[**31]** participants, or the manner in which members of a joint enterprise shall share the responsibilities and the benefits of the total venture.

Id. We construe this language as a license to find certain NCAA bylaws that "fit into the same mold" as those discussed in *Board of Regents* to be procompetitive "in the twinkling of an eye," *Bd. of Regents, 468 U.S. at 110 n.39* (citation and quotation marks omitted)—that is, at the motion-to-dismiss stage. *See Am. Needle v. N.F.L., 130 S.Ct. 2201, 2216-17, 176 L. Ed. 2d 947 (2010)* (observing that certain agreements between members of a joint venture are "likely to survive the Rule of Reason" such that they do not require "a detailed analysis," and thus the Rule of Reason "can . . . be applied in the twinkling of an eye"). Thus, ***HN14***[] the first—and possibly only—question to be answered when NCAA bylaws are challenged is whether the NCAA regulations at issue are of the type that have been blessed by the Supreme Court, making them presumptively procompetitive. We now turn to that question.

[*342] The parties disagree on the scope of the presumption favoring certain NCAA regulations. Plaintiffs argue that the presumption should be limited to NCAA eligibility rules. They distinguish *Banks,* ***[**32]*** *Smith*, and *McCormack* on the grounds that the regulations upheld in those cases, unlike the regulations here, were eligibility rules. *See Banks, 977 F.2d 1081* (suggesting in dicta that procompetitive justifications for NCAA eligibility rules would undoubtedly outweigh any anticompetitive effects if the Sherman Act does, in fact, apply to said rules); *Smith,*

---

[5] To illustrate, *Forbes* reported that the University of Texas' college football team was worth $129 million in 2011 and generated $71 million in profits. Chris Smith, *College Football's Most Valuable Teams*, FORBES (Dec. 22, 2011, 11:43 a.m.), *http://www.forbes.com/sites/chrissmith/2011/12/22/college-footballs-most-valuable-teams/*.

139 F.3d 180 (same); *McCormack, 845 F.2d at 1345* (reasoning at the motion to dismiss stage that "[t]he eligibility rules create the product and allow its survival in the face of commercializing pressures," and thus "do not violate the antitrust laws"). The NCAA, on the other hand, argues that the procompetitive presumption should not be limited to eligibility rules. Despite the Fifth Circuit's clear conceptualization of the limitation on collegiate athlete compensation as an eligibility rule, *see McCormack, 845 F.2d at 1343*, the NCAA argues that the regulation at issue in *McCormack* is better characterized as a financial aid rule, similar to the Bylaws at issue in this case. It therefore argues that any procompetitive presumption that might have been at play in *McCormack* should apply here.

In considering the parties' arguments and **[**33]** attempting to discern the scope of the presumption established by *Board of Regents*, it is important to consider the context in which that presumption was discussed. Directly preceding the language that allegedly establishes the presumption is a reminder that the NCAA's collusive behavior is only permissible because "a certain degree of cooperation is necessary if the type of competition that [the NCAA] and its member institutions seek to market is to be preserved." *Bd. of Regents, 468 U.S. at 117*. The Supreme Court made this point in greater detail in a separate section of its opinion, where it explained why "horizontal restraints on competition are essential if the product [of collegiate sports] is to be available at all." *See id. at 98-105*. The Court explained that any league sport will require the joint establishment of certain rules, such as the "size of the field" or the "number of players on a team." *Id. at 101*. College football, the court reasoned, requires even more joint activity, since

> the NCAA seeks to market a particular brand of football—college football. The identification of this "product" with an academic tradition differentiates college football from and makes it more **[**34]** popular than professional sports to which it might otherwise be comparable, such as, for example, minor league baseball. In order to preserve the character and quality of the "product," athletes must not be paid, must be required to attend class, and the like. And the integrity of the "product" cannot be preserved except by mutual agreement; if an institution adopted such restrictions unilaterally, its effectiveness as a competitor on the playing field might soon be destroyed. Thus, the NCAA plays a vital role in enabling college football to preserve its character, and as a result enables a product to be marketed which might otherwise be unavailable.

Id. at 101-02. Herein lies the scope of the procompetitive presumption for certain NCAA regulations. ***HN15***[] A certain amount of collusion in college football is permitted because it is necessary for the product to exist. Accordingly, when an NCAA bylaw is clearly meant to help maintain the "revered tradition of amateurism in college sports" or the "preservation of the student-athlete in higher education," the bylaw will be presumed **[*343]** procompetitive, since we must give the NCAA "ample latitude to play that role." *Id. at 120*. But if a regulation is **[**35]** not, on its face, helping to "preserve a tradition that might otherwise die," either a more searching Rule of Reason analysis will be necessary to convince us of its procompetitive or anticompetitive nature, or a quick look at the rule will obviously illustrate its anticompetitiveness. *See id*. In *Board of Regents*, for instance, the Supreme Court ruled that the limitation on the type of television contracts that member schools are allowed to enter into does not aid in the preservation of amateurism or student-athletes, and is thus a violation of the Sherman Act. *Id*. The Court rejected the argument that the television plan equalized competition on the field and reasoned that, in any event, "the NCAA imposes a variety of other restrictions designed to serve amateurism which are much better tailored to the goal of competitive balance . . . [and] which are 'clearly sufficient' to preserve competitive balance to the extent it is within the NCAA's power to do so." *Id. at 117-20*.

HN16[] Most—if not all—eligibility rules, on the other hand, fall comfortably within the presumption of procompetitiveness afforded to certain NCAA regulations, as both parties agree.[6] Beyond the obvious fact that the Supreme **[**36]** Court explicitly mentioned eligibility rules as a type that "fit[s] into the same mold" as other procompetitive rules, they are clearly necessary to preserve amateurism and the student-athlete in college football. Indeed, they define what it means to be an amateur or a student-athlete, and are therefore essential to the very existence of the product of college football. *Accord Banks, 977 F.2d at 1089-90* ("[T]he no-draft rule and other like

---

[6] We need not touch upon the debate of whether all eligibility rules or just *most* eligibility rules are due a presumption, as the Bylaws at issue in this case are not, in fact, eligibility rules.

NCAA regulations preserve the bright line of demarcation between college and 'pay for play' football."); Smith, 139 F.3d at 187 ("[T]he NCAA's eligibility rules allow for the survival of the product, amateur sports, and allow for an even playing field."); McCormack, 845 F.2d at 1344-45 ("The NCAA markets college football as a product distinct from professional football. The eligibility rules create the product and allow its survival in the face of commercializing pressures."). There may not be such a thing as a student-athlete, for instance, if it was not for the NCAA rules requiring class attendance, and thus no "detailed analysis," Am. Needle, 130 S.Ct. at 2216-17, would be necessary to deem such rules procompetitive. *Cf.* Bd. of Regents, 468 U.S. at 102. **[**37]** The same goes for bylaws eliminating the eligibility of players who receive cash payments beyond the costs attendant to receiving an education—a rule that clearly protects amateurism. *Cf.* McCormack, 845 F.2d 1338.[7]

The Bylaws at issue in this case, however, are not eligibility rules, nor do we conclude that they "fit into the same mold" as eligibility rules. *See* In re NCAA I-A Walk-on Football Players Litigation, 398 F.Supp.2d 1144, 1149 (W.D.Wash. 2005) (finding that the cap on the number of scholarships a college team can grant does not implicate student-athlete eligibility "in **[*344]** the same manner as rules **[**38]** requiring students to attend class or rules revoking eligibility for entering a professional draft"). These Bylaws—a one-year limit to scholarships and a limit on scholarships per team—are not inherently or obviously necessary for the preservation of amateurism, the student-athlete, or the general product of college football. Issuing more scholarships (thus creating more amateur players) and issuing longer scholarships cannot be said to have an obviously negative impact on amateurism. Nor is there an obvious effect on the ability of college football to survive without the Bylaws in question. The NCAA argues that multi-year scholarships would make it too difficult for less wealthy schools to compete in the recruiting market, but this claim is weakened by the fact that the restriction on multi-year scholarships was only instituted in 1973, Zachary Stauffer, *NCAA Approves New Rules—But Do They Matter?*, FRONTLINE (Oct. 28, 2011, 4:58 p.m.), http://www.pbs.org/wgbh/pages/frontline/ sports/money-and-march-madness/ncaa-approves-new-rules-but-do-they-matter/, and has recently been rescinded, *see* Steve Wieberg, *supra*. In any event, the claim is far too great a leap to make without evidentiary **[**39]** proof at the full Rule of Reason stage. Similarly, the rules limiting the number of scholarships available for every NCAA team may have procompetitive effects, such as the prevention of elite programs stockpiling athletes, but it is not intuitive that the recruiting market would be unable to handle this potential pitfall on its own. The Bylaws at issue, especially the prohibition against multi-year scholarships, seem to be aimed at containing university costs, not preserving the product of college football, though evidence presented at a later stage could prove that the Bylaws are, in fact, key to the survival of the student-athlete and amateurism.

It is true that the prohibition against multi-year scholarships is, in a sense, a rule concerning the amount of payment a player receives for his labor, and thus may seem to implicate the split between amateur and pay-for-play sports. After all, student-athletes are paid, but their payment is limited to reimbursement for costs attendant to receiving an education. For the purposes of college sports, and in the name of amateurism, we consider players who receive nothing more than educational costs in return for their services to be "unpaid **[**40]** athletes." It is for this reason, though, that the prohibition against multi-year scholarships does not implicate the preservation of amateurism, for whether or not a player receives four years of educational expenses or one year of educational expenses, he is still an amateur. It is not until payment above and beyond educational costs is received that a player is considered a "paid athlete." The NCAA could (but does not) argue that payment of more than one year's educational costs for only one year of athletic services—a scenario that may unfold if a player with a multi-year scholarship is released from the team or injured—would result in the destruction of amateurism. Once again, this assertion is belied by the fact that multi-year scholarships were wholly permissible before 1973, *see* Zachary Stauffer, *supra*, and amateurism, by all accounts, was alive and well in college sports in the first seven decades of the twentieth century. *See, e.g.*, Mechelle Voepel, *College athletes are already getting paid*, ESPN.COM (July 18, 2011), http://sports.espn.go.com/ncaa/columns/story?columnist= voepel_mechelle&id=6739971.

---

[7] One should not mistake the analysis we discuss here as requiring proof of the procompetitive nature of the NCAA's "no payment" rules on a case-by-case basis. This analysis involves a determination of whether a rule is, on its face, supportive of the "no payment" and "student-athlete" models, not whether "no payment" rules are themselves procompetitive—under *Board of Regents*, they clearly are.

As for the NCAA's argument that, according to *McCormack*, both eligibility **[**41]** rules *and* financial aid rules are deserving of a procompetitive presumption, we disagree. The NCAA's limitation on **[*345]** athlete compensation *beyond* educational expenses, which was implicated in *McCormack*, directly advances the goal of maintaining a "clear line of demarcation between intercollegiate athletics and professional sports," *Banks, 977 F.2d at 1089* (quoting *Gaines, 746 F.Supp. at 744*), and thus is best categorized as an eligibility rule aimed at preserving the existence of amateurism and the student-athlete. The Bylaws at issue in this case, on the other hand, are not directly related to the separation of amateur athletics from pay-for-play athletics, as explained in the preceding paragraphs. Nor do they help preserve the existence of the student-athlete (as a facial matter, anyway), since they actually limit the number of athletes awarded financial aid and the amount of financial aid that an athlete can be awarded. Thus, ***HN17***[] financial aid rules do not always assist in the preservation of amateurism or the existence of student-athletes, so the regulations at issue cannot be presumptively procompetitive simply because they relate to financial aid.

The lack of a procompetitive presumption **[**42]** in favor of the two Bylaws under consideration does not equal a finding that they are anticompetitive; it simply means that they cannot be deemed procompetitive at the motion-to-dismiss stage. In fact, some of the procompetitive arguments made by the NCAA, if supported by evidence, could lead to a finding that the Bylaws are reasonable restrictions on trade. The district court did not reach the issue of whether the NCAA Bylaws were an unreasonable restriction on trade, but rather held that plaintiffs did not—and could not—allege a relevant market cognizable under the Sherman Act. As we have made clear, we disagree that plaintiffs *could not* have alleged a relevant cognizable market, but we ultimately conclude that plaintiffs *did not* identify such a market in their complaint, *see infra* Part C, and that the district court's dismissal was justified.

C. Adequacy of Plaintiffs' Complaint

As already noted, ***HN18***[] naked price and output controls can obviate the need for a detailed market analysis in a Sherman Act case, *Bd. of Regents, 468 U.S. at 109*, but that does not eliminate the need for a relevant commercial market to exist altogether. *Apex Hosiery, 310 U.S. at 492-93*. In an area that is not obviously **[**43]** commercial, and thus where the Sherman Act's application is not clearly apparent, we believe it is incumbent on the plaintiff to describe the rough contours of the relevant commercial market in which anticompetitive effects may be felt, even when a quick-look approach is all that is called for. It must therefore be determined whether the actual markets allegedly identified in plaintiffs' complaint—the market for bachelor's degrees and the market for student-athlete labor—were actually identified, and if so, whether they adequately describe the relevant market on which the Bylaws may have had an anticompetitive effect. The district court held that plaintiffs failed to identify in their complaint either of the markets they now present, and we agree.

Plaintiffs come closest to identifying a relevant commercial market in their discussion of bachelor's degrees, but we nonetheless conclude that the complaint falls short. Plaintiffs admit that before filing their amended complaint in the lower court, they removed two important portions from their original complaint: (1) a section heading entitled "Relevant Market," and (2) a sentence stating that "bachelor's degrees from accredited colleges **[**44]** and/or universities constitute a distinct product market." It is clear, therefore, that they believed a relevant market need **[*346]** not be identified or they attempted to hedge their bets by keeping their market allegations vague. Plaintiffs' complaint did state that "NCAA member institutions compete with each other to attract and enroll highly skilled athletes to their institution for obtaining bachelor's degrees," which at least suggests the existence of *some* market, but the confines of that market are far too unclear. For instance, it is not apparent whether plaintiffs believe that the Bylaws affect an overall market for bachelor's degrees, which would impact scholarship athletes and non-athletes alike, or some subsidiary market that only concerns athletes attempting to obtain educational degrees in exchange for athletic services. This may seem like nitpicking, but if a Sherman Act claim of this nature progresses past the quick-look stage and enters a full-fledged Rule of Reason analysis, the scope of the market becomes of central importance.

Moreover, even if we deemed plaintiffs' complaint to put the NCAA on sufficient notice of the relevant market affected by the Bylaws, we would still **[**45]** have doubts about plaintiffs' ability to survive a motion to dismiss. As mentioned above, the customer base in a product market for bachelor's degrees would include many more people than scholarship athletes. Bachelor's degrees are issued to literally thousands of people, only a small portion of which are scholarship athletes, and an even smaller portion of which are athletes whose scholarships were not renewed. The anticompetitive impact of an NCAA bylaw would therefore likely be very minimal. Another problem with the alleged market for bachelor's degrees, which was discussed by the district court, is the fact that degrees are not automatically received or guaranteed upon payment of tuition. As many unhappy undergraduates can attest, payment of tuition does not ensure the receipt of a degree. Plaintiffs cite *Brown* in support of their proposed market, where the Third Circuit found a cognizable market for educational services provided by Ivy League colleges. 5 F.3d 658. But **HN19**[] the difference between a market for educational services and a market for bachelor's degrees is of vital importance. A student is owed educational instruction upon payment of tuition, though what a student does with **[**46]** that instruction and whether that instruction leads to a degree is up to the student. A bachelor's degree, on the other hand, is not bought outright. It is the *opportunity* to earn a bachelor's degree that one pays for (or performs athletic services for, as the case may be). Thus, plaintiffs' complaint did not identify a product market for bachelor's degrees, but even if it did, we would likely find that such a market—to the extent that it exists—is not cognizable under the Sherman Act.

The proper identification of a labor market for student-athletes, on the other hand, would meet plaintiffs' burden of describing a cognizable market under the Sherman Act. As an initial matter, **HN20**[] labor markets are cognizable under the Sherman Act. *Nichols v. Spencer Int'l Press, Inc., 371 F.2d 332, 335-36 (7th Cir. 1967)*. The *Banks* majority, in dicta, opined that the market for scholarship athletes cannot be considered a labor market, since schools do not engage in price competition for players, nor does supply and demand determine the worth of student-athletes' labor. 977 F.2d at 1091. We find this argument unconvincing for two reasons. First, the only reason that colleges do not engage in price competition **[**47]** for student-athletes is that other NCAA bylaws prevent them from doing so. **HN21**[] The fact that certain procompetitive, legitimate trade restrictions exist in a given industry does not remove that industry from the purview of the Sherman Act altogether. **[*347]** Rather, all NCAA actions that are facially anticompetitive must have procompetitive justifications supporting their existence.[8] Second, colleges do, in fact, compete for student athletes, though the price they pay involves in-kind benefits as opposed to cash. For instance, colleges may compete to hire the coach that will be best able to launch players from the NCAA to the National Football League, an attractive component for a prospective college football player. Colleges also engage in veritable arms races to provide top-of-the-line training facilities which, in turn, are supposed to attract collegiate athletes. Many future student-athletes also look to the strength of a college's academic programs in deciding where to attend. These are all part of the competitive market to attract student-athletes whose athletic labor can result in many benefits for a college, including economic gain.

Unfortunately for plaintiffs, nothing resembling a discussion of a relevant market for student-athlete labor can be found in the amended complaint. Indeed, the word labor is wholly absent. Plaintiffs claim that they "allege[d] that there was 'no practical alternative' available for students wishing to pursue an education in exchange for their playing ability," but the paragraph that they cite to in their amended complaint explains the lack of "practical alternatives" for colleges wanting to field teams outside of the NCAA's framework, not the lack of "practical alternatives" for student-athletes. Plaintiffs appear to have made the strategic decision to forgo identifying a specific relevant market. Whatever the reasons for that strategic decision, they cannot now offer post hoc arguments attempting to illuminate a buried market allegation. We therefore affirm the district court's dismissal **[**49]** of plaintiffs' claims.

D. Dismissal with Prejudice

HN22[] The district court's denial of plaintiffs' request to amend their complaint is reviewed for abuse of discretion, *Stanard, 658 F.3d at 797*, which is a "heavy burden." *Jackson v. Bunge Corp., 40 F.3d 239, 246 (7th Cir.*

---

[8] Again, this does not necessarily mean that any challenge **[**48]** of any NCAA bylaw will survive the motion-to-dismiss stage. Many NCAA bylaws can be deemed procompetitive "in the twinkling of an eye." *Cf.* *Bd. of Regents, 468 U.S. at 109 n.39* (quoting P. Areeda, *The "Rule of Reason" in Antitrust Analysis: General Issues* 37-38 (Federal Judicial Center, June 1981)).

1994). Under *Rule 15(a) of the Federal Rules of Civil Procedure*, a complainant may amend his complaint as a matter of course in response to a motion to dismiss, but any subsequent amendments can only be made with consent of the opposing party or the court's leave. We have stated that a district court is not required to grant such leave when a plaintiff has had multiple opportunities to state a claim upon which relief may be granted. *Emery v. Am. Gen. Finance, Inc., 134 F.3d 1321, 1322-23 (7th Cir. 1998)*. By our count, plaintiffs had three opportunities to identify a relevant market in which the NCAA allegedly committed violations of the Sherman Act. Plaintiffs obviously could have established a relevant market from the outset, but they also had the opportunity to amend their complaint and include an identification of a cognizable market after the full briefing and argument of the NCAA's motion to dismiss in the California **[**50]** district court. Further, plaintiffs actually took advantage of their ability to amend their complaint in the Indiana district court, yet even after confronting the NCAA's claim that a relevant market had not been identified, they still did not include a clear identification of the market in which the NCAA allegedly acted in an anticompetitive **[*348]** manner. Further, ***HN23***[] "[i]t is a basic principle that the complaint may not be amended by the briefs in opposition to a motion to dismiss, nor can it be amended by the briefs on appeal." *Thomason v. Nachtrieb, 888 F.2d 1202, 1205 (7th Cir. 1989)*. We therefore cannot find that the district court abused its discretion in dismissing plaintiffs' claims with prejudice.

III. Conclusion

For the foregoing reasons, we AFFIRM the decision of the district court.

Amos v. Aspen Alps 123, LLC

Supreme Court of Colorado

June 18, 2012, Decided

Supreme Court Case No. 10SC187

Reporter

2012 CO 46 *; 280 P.3d 1256 **; 2012 Colo. LEXIS 428 ***; 2012 WL 2244839

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN1[] **Standards of Review, De Novo Review**

The Colorado Supreme Court reviews a trial court's grant of summary judgment de novo. Summary judgment is appropriate when no issues of material fact exist and the moving party is entitled to judgment as a matter of law, *Colo. R. Civ. P. 56(c)*. The nonmoving party is entitled to the benefit of all favorable inferences that may be drawn from the undisputed facts, and all doubts as to the existence of a triable issue of fact must be resolved against the moving party.

Real Property Law > Financing > Foreclosures > General Overview

HN2[] Financing, Foreclosures

Colo. R. Civ. P. 120 governs the process by which an interested person may request that a court enter an order authorizing the sale of real property when the power of sale is contained in a deed of trust to a public trustee. To request an Order Authorizing Sale, the interested person files a verified motion with the trial court. Rule 120 states that the motion shall be accompanied by a copy of the instrument containing the power of sale, shall describe the property to be sold, and shall specify the default or other facts claimed by the moving party to justify invocation of the power of sale. The Rule further provides that in the instance of foreclosure of the real property secured by a deed of trust to a public trustee: the motion shall state the name and last known address, as shown by the records of the moving party, of the grantor of such deed of trust, of the current record owner of the property to be sold, and of any person known or believed by the moving party to be personally liable upon the indebtedness secured by the deed of trust, as well as the names and addresses of those persons who appear to have acquired a record interest in such real property, subsequent to the recording of such deed of trust and prior to the recording of the notice of election and demand for sale, whether by deed, mortgage, judgment or any other instrument of record.

Real Property Law > Financing > Foreclosures > General Overview

HN3[] Financing, Foreclosures

Colo. R. Civ. P. 120(b) provides a notice requirement which states that a copy of the motion shall be served to each person named in the motion (other than persons for whom no address is stated) at the address or addresses stated in the motion.

Real Property Law > Financing > Foreclosures > General Overview

HN4[] Financing, Foreclosures

When a procedural irregularity did not injure or harm the complaining party, a foreclosure sale will not be set aside. Notice should further the purposes of the requirement: to apprise interested parties of the pendency of the action and afford them an opportunity to present their objections. Colo. R. Civ. P. 120's requirement to provide notice to all interested persons was devised to provide actual notice to those with an interest in the pendency of the action and afford them an opportunity to be heard. Rule 120's notice provisions are fashioned to ensure that notice is timely. In addition, Rule 120 ensures that the hearing provides the allegedly defaulting party an opportunity to be heard at a meaningful time and in a meaningful manner concerning the matters constituting the alleged defaults.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN5[] Sherman Act, Claims

A party may bring a civil claim under the Colorado Antitrust Act to recover damages for bid rigging, Colo. Rev. Stat. § 6-4-114 (2011).

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] Standing, Requirements

The statute provides a civil private right of action for violation of the Colorado Antitrust Act in *Colo. Rev. Stat. § 6-4-114*: Any person injured in its property by reason of any violation of this article may sue therefor and, if successful, shall recover any actual damages sustained by such person.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN7[] Regulated Practices, Private Actions

See *Colo. Rev. Stat. § 6-4-121*.

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN8[] Standards of Review, Clearly Erroneous Review

In an appeal of a judgment entered after a trial to the court, the Colorado Supreme Court defers to the trial court's credibility determinations and will disturb its findings of fact only if they are clearly erroneous and are not supported by the record, *Colo. R. Civ. P. 52*. When the facts are undisputed, the reviewing court will not defer to the trial court's factual findings, but will instead conduct a de novo review and make an independent judgment on the merits.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN9[] Regulated Practices, Private Actions

The Colorado Antitrust Act prohibits bid rigging under *Colo. Rev. Stat. § 6-4-106: (1)* It is illegal for any person to contract, combine, or conspire with any person to rig any bid, or any aspect of the bidding process, in any way related to the provision of any commodity or service. The term "commodity" includes land and real property, *Colo. Rev. Stat. § 6-4-103* (2011).

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN10[] Per Se Rule & Rule of Reason, Per Se Violations

There are no cases in Colorado interpreting *Colo. Rev. Stat. § 6-4-106*. The Colorado Supreme Court therefore looks to federal antitrust cases as its guide when interpreting the Colorado Antitrust Act, *Colo. Rev. Stat. 6-4-119* (2011). The Sherman Act differs from Colorado's Antitrust Act in that the federal law does not contain a provision specifically prohibiting bid rigging. Nonetheless, a federal body of case law exists interpreting the Sherman Act to prohibit bid rigging, and classifying bid rigging as a per se violation of section 1 of the Act.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN11[] **Regulated Practices, Private Actions**

The Colorado Supreme Court looks to federal cases involving bid rigging as a guide to its determination of what constitutes bid rigging. Most of the federal cases involving bid rigging arise as criminal prosecutions that do not involve real property.

Headnotes/Summary

Headnotes

Real Property — *Rule 120* and Public Trustee Sale/Court Foreclosures; Antitrust - Bid Rigging

Syllabus

The supreme court affirms the court of appeals' judgment holding that notice was sufficient under *Rule 120*. The supreme court concludes that when the parties received actual notice which afforded them an opportunity to present their objections and no prejudice resulted, a completed foreclosure sale will not be disturbed for a failure to strictly comply with *C.R.C.P. 120*'s notice requirements.

Further, the supreme court determines that, based on the limited trial record in this case, the plaintiffs failed to establish bid rigging in violation of the Colorado Antitrust Act, *section 6-4-106, C.R.S.* (2011), as a defense. Accordingly, the supreme court reverses the court of appeals' judgment holding that illegal bid rigging had occurred.

Counsel: Attorneys for Petitioners: Holland & Hart, LLP, Wiley E. Mayne, Steven T. Collis, Denver, Colorado; Holland & Hart, LLP, Christopher J. Heaphey, Aspen, Colorado.

Attorneys for Respondent, Aspen Alps 123, LLC: Garfield & Hecht, P.C., Matthew C. Ferguson, Christopher D. Bryan, Aspen, Colorado.

Attorneys for Respondent, Equitable Bank: Duncan, **[***2]** Ostrander & Dingess, P.C., Richard F. Rodriguez, James Birch, Denver, Colorado.

Judges: JUSTICE RICE delivered the Opinion of the Court. CHIEF JUSTICE BENDER concurs in part and dissents in part. JUSTICE COATS dissents.

Opinion

[1257]** *en banc*

[*P1] In this appeal, we address whether a failure to strictly comply with *C.R.C.P. 120*'s notice requirements mandates setting aside a completed foreclosure sale. We conclude that when the parties received actual notice which afforded them an opportunity to present their objections and no prejudice resulted, we will not disturb a completed foreclosure sale. Accordingly, we affirm the court of appeals' judgment with respect to *Rule 120* notification.

[*P2] We also examine whether the principals of Aspen Alps 123, LLC (Aspen Alps) engaged in bid rigging in violation of the Colorado Antitrust Act, *section 6-4-106, C.R.S.* (2011). We determine that the limited record before us fails to establish bid rigging and, therefore, we reverse the court of appeals on the issue of bid rigging.

I. Facts and Proceedings Below

[*P3] This case involves the public trustee foreclosure sale under *C.R.C.P. 120* of a condominium unit in Aspen. Prior to the foreclosure sale, Betty Amos and her late husband, Thomas **[***3]** Righetti, owned the unit. Amos borrowed approximately $1.6 million from Equitable Bank securing the loan with a Deed of Trust on the condominium unit in favor of Equitable Bank and granted by Amos and Righetti.

[*P4] In September 2002, Righetti died. Amos and Righetti's daughter, Brandy Righetti, were named as co-personal representatives of the Estate of Thomas Righetti.

[*P5] In 2006, Amos' loan fell into default and Equitable Bank decided to foreclose on the property. Equitable Bank filed a *Rule 120* **[**1258]** Motion for Order Authorizing Sale and sent notice of the proceeding to Amos in her individual capacity. Equitable Bank did not send notice of the *Rule 120* proceeding to the Estate or to Brandy Righetti. Neither Amos nor the Estate opposed the order authorizing sale.

[*P6] The public trustee held a foreclosure sale on February 27, 2007. Neither Amos nor the Estate submitted a bid. After Equitable Bank bid the amount of its debt, three individuals -- Seguin, Mayer, and Griffin (representing Flaum) -— bid competitively until Seguin had bid $1.86 million. At that point, Griffin proposed to the others that, instead of "bidding the property up further and further," they cease bidding against each other and buy **[***4]** the property jointly. All agreed and formed Aspen Alps 123, LLC after the auction. The public trustee deemed Aspen Alps as the successful bidder. On August 14, 2007, the public trustee issued the deed quieting title in the property to Aspen Alps.

[*P7] Amos then brought this action against the public trustee and Equitable Bank to enjoin the issuance of the deed to Aspen Alps, and to compel the trustee to allow her to redeem.[1] Concurrently, she filed a notice of lis pendens. When the trial court refused to grant a preliminary injunction in Amos' favor, she filed a second notice of lis pendens. Amos then amended her complaint to include a claim that Equitable Bank failed to strictly comply with the notice requirements of *Rule 120*.

[*P8] Prior to trial, Amos also filed a summary judgment motion asserting that Equitable Bank failed to comply with the foreclosure procedure set forth in *Rule 120*. The trial court determined that Equitable Bank sent Righetti's notice to the wrong address and thus did not strictly comply with the Rule. Nonetheless, the trial court found that the error was a mere technicality and that the plaintiffs failed to show any prejudice since they received actual notice. Accordingly, the trial court declined to declare the sale null and void.

[*P9] Shortly before trial, Amos attempted to add a third claim alleging bid rigging, antitrust violations, and conspiracy by the principals of Aspen Alps. The trial court denied Amos' motion to amend, but allowed evidence of bid rigging as a defense to counterclaims[2] asserted by Aspen Alps.

---

[1] Under *Rule 120* in 2007, Amos had 75 days (until May 14, 2007) in which to redeem. She claimed that she sent an intent-to-redeem letter to the public trustee before the redemption deadline. The public trustee, however, never received the letter. On May 8, six days prior to the redemption deadline, Amos' attorney notified the public trustee of Amos' intent to redeem. And, on May 14, Amos wired the necessary funds to the public trustee. Aspen Alps, however, exercised **[***5]** its statutory right to veto the redemption and directed the public trustee to deny Amos' attempt to redeem.

[2] Aspen Alps asserted counterclaims, including, for declaratory judgment that Aspen Alps properly purchased the property at the foreclosure sale and that it held free and marketable title, and to quiet title in the property.

[*P10] The case proceeded to a trial to the court and the **[***6]** court dismissed Amos' redemption claim under *C.R.C.P. 41(b)*. The trial court also determined that the principals of Aspen Alps had not engaged in illegal bid rigging and that both lis pendens filed by Amos were spurious documents and slandered title to the property.

[*P11] Amos appealed. The court of appeals held that a foreclosing party must strictly comply with the notice requirements of *Rule 120*, but excused Equitable Bank's failure to send notice to Brandy Righetti or to the Estate. The court of appeals reasoned that Equitable Bank sent notice to Amos, a co-personal representative and agent of the Estate. Accordingly, because the Estate had constructive notice of the foreclosure and was not prejudiced, there was no basis for setting aside the foreclosure sale. The court of appeals also held that the principals of Aspen Alps had engaged in illegal bid rigging because their agreement to purchase the property together was anti-competitive. Consequently, it set aside the deed to Aspen Alps. The court of appeals did not, however, void the foreclosure sale. Instead, it remanded to the trial court with instructions for that court to exercise its equitable discretion to determine whether to award **[***7]** the deed to the high bidder or void the foreclosure sale.

[1259]** **[*P12]** Amos sought certiorari review by this Court.[3] We now affirm the court of appeals' judgment with respect to the *Rule 120* notice requirement, and reverse its decision with respect to bid rigging.

II. Analysis

A. Notice Requirement

[*P13] First, we examine whether a failure to strictly comply with *Rule 120*'s notice requirements mandates setting aside a completed foreclosure sale. ***HN1***[] We review a trial court's grant of summary judgment de novo. *A.C. Excavating v. Yacht Club II Homeowners Ass'n, 114 P.3d 862, 865 (Colo. 2005)*. Summary judgment is appropriate when no issues of material fact exist and the moving party is entitled to judgment as a matter of law. *C.R.C.P. 56(c)*; **[***8]** *A.C. Excavating, 114 P.3d at 865*. The nonmoving party is entitled to the benefit of all favorable inferences that may be drawn from the undisputed facts, and all doubts as to the existence of a triable issue of fact must be resolved against the moving party. *A.C. Excavating, 114 P.3d at 865*.

[*P14] ***HN2***[] *C.R.C.P. 120* governs the process by which an interested person may request that a court enter an order authorizing the sale of real property when the power of sale is contained in a deed of trust to a public trustee. To request an Order Authorizing Sale, the interested person files a verified motion with the trial court. *Rule 120* states that the motion "shall be accompanied by a copy of the instrument containing the power of sale, shall describe the property to be sold, and shall specify the default or other facts claimed by the moving party to justify invocation of the power of sale." The Rule further provides that in the instance of foreclosure of the real property secured by a deed of trust to a public trustee:

> the motion shall state the name and last known address, as shown by the records of the moving party, of the grantor of such deed of trust, of the current record owner of the property to **[***9]** be sold, and of any person known or believed by the moving party to be personally liable upon the indebtedness secured by the deed of trust, as well as the names and addresses of those persons who appear to have acquired a record interest in such real property, subsequent to the recording of such deed of trust and prior to the recording of the notice of election and demand for sale, whether by deed, mortgage, judgment or any other instrument of record.

---

[3] We granted review on the following issues:

> 1. When bidders at a public foreclosure sale conspired to rig the bidding in violation of the Colorado Antitrust Act and the resulting deed is void, may the court nevertheless award the foreclosed property to one of the conspirators rather than void the sale?
>
> 2. Whether a foreclosing bank's material failure to comply with *C.R.C.P. 120*'s requirements to identify and give notice to all interested parties voids the resulting foreclosure sale.

C.R.C.P. 120(a). **HN3**[] The Rule then provides a notice requirement which states that a copy of the motion shall be served "to each person named in the motion (other than persons for whom no address is stated) at the address or addresses stated in the motion." C.R.C.P. 120(b).

[*P15] First, we hold that the trial court correctly found that Equitable Bank failed to strictly comply with Rule 120's notice requirements by serving Righetti at the wrong address. Amos and Righetti were the grantors of the Deed of Trust in favor of Equitable Bank. Equitable Bank mailed notice to the deceased Righetti at the address on the Deed of Trust, but that notice contained a typographical error so that the street address numbers were transposed, rendering the mail undeliverable. **[***10]** Pursuant to Rule 120 and the terms of the Deed of Trust, Equitable Bank was required to provide notice to Righetti at his last known address. Because Equitable Bank failed to do so, it did not strictly comply with the Rule.[4]

[*P16] This brings us to the question before the Court on certiorari review: whether a completed foreclosure sale must be set aside for a failure to strictly adhere to Rule 120's notification requirements when actual notice was received. Jurisdictions across the country are divided as to whether **[**1260]** the standard for foreclosure notification is actual notice or strict compliance.[5] This Court addressed public trustee foreclosure notice requirements in *Dews v. District Court, 648 P.2d 662, 664 (Colo. 1982)*, and found that the "provisions of Rule 120 must be strictly complied with by one seeking foreclosure under a power of sale through the public trustee." At issue in Dews was the fact that the Rule 120 foreclosure notices were not timely sent to the debtor. *Id. at 663*. Rather than being mailed at least 15 days prior to the proceeding as required by the Rule, the notices were mailed out **[***11]** 14 days prior to the proceeding. Id. As a result, the debtors received notice of the Rule 120 proceeding only two to three days before they were required to respond. Id. Due to the foreclosing party's failure to strictly comply with Rule 120's notice provisions and the resulting untimely notice, this Court voided the order authorizing the sale and required a new Rule 120 proceeding. *Id. at 664*. The question then is whether Dews requires a completed foreclosure sale be declared void due to a foreclosing party's failure to strictly comply with Rule 120. We do not read Dews to mandate such a result.

[*P17] The petitioners urge this Court to void the completed foreclosure sale for a deviation from the notice requirement -- namely, that the notice was addressed only to Amos individually and not to Amos individually and as personal representative of Righetti's Estate -- when they had actual notice of the Rule 120 hearing and pending foreclosure, and where the foreclosing party and trustee otherwise fully complied with Rule 120. We **[***13]** decline to do so. **HN4**[] When, as here, a procedural irregularity did not injure or harm the complaining party, a foreclosure sale will not be set aside. "Notice should further the purposes of the requirement: 'to apprise interested parties of the pendency of the action and afford them an opportunity to present their objections.'" *Lehner v. United States, 685 F.2d 1187, 1191 (9th Cir. 1982)* (citing *Mullane v. Cent. Hanover Bank & Trust Co., 339 U.S. 306, 314, 70 S. Ct. 652, 94 L. Ed. 865 (1950)*). Rule 120's requirement to provide notice to all interested persons was devised to provide actual notice to those with an interest in the pendency of the action and afford them an opportunity to be heard. Charles D. Calvin, Legislative History: C.R.C.P. Rule 120, 8 Colo. Law. 785, 788 (1979) (citing *Mullane, 339 U.S. at 314*). Rule 120's notice provisions are fashioned to ensure that notice is timely. *Dews, 648 P.2d at 664*. In

---

[4] Equitable Bank does not claim to have mailed notice to the Estate or to Brandy Righetti.

[5] Compare *Long v. Bd. of Governors, 117 F.3d 1145, 1158 (10th Cir. 1997)* ("To establish a due process violation, an individual must show that he or she has sustained prejudice as a result of the allegedly insufficient notice."); *Baker v. Latham Sparrowbush Assocs., 72 F.3d 246, 254 (2d Cir. 1995)* ("If a party receives actual notice that apprises it of the pendency of the action and affords an opportunity to respond, the due process clause is not offended."); *Lyon v. Estate of Cornell, 269 A.D.2d 737, 738, 703 N.Y.S.2d 325 (N.Y. App. Div. 2000)* ("Once actual notice is received, strict compliance with the statute **[***12]** is no longer required."); *Amresco Independence Funding, Inc. v. SPS Props., LLC, 129 Wn. App. 532, 119 P.3d 884, 886-87 (Wash. Ct. App. 2005)* ("Despite the strict compliance requirement, a plaintiff must show prejudice before a court will set aside a trustee sale."), with *Ameribank, N.A. v. Quattlebaum, 269 Ga. 857, 505 S.E.2d 476, 478 (Ga. 1998)* (strict compliance required even though "departure may not result in injustice in this case"); *Sec. Pacific Fin. Corp. v. Bishop, 109 Idaho 25, 704 P.2d 357, 359 (Idaho Ct. App. 1985)* (strict compliance with deed of trust foreclosure statutes required); *Equivest Ltd. P'ship v. Foster, 253 Mich. App. 450, 656 N.W.2d 369, 374 (Mich. Ct. App. 2002)* ("We . . . feel constrained to" require strict compliance with tax sale notice provisions, "even if doing so produces anomalous results.").

addition, *Rule 120* ensures that the hearing provides the allegedly defaulting party an opportunity to be heard at a meaningful time and in a meaningful manner concerning the matters constituting the alleged defaults. Id.

[*P18] Here, it is undisputed that Equitable Bank provided notice to Amos at her last known **[***14]** address -- the same address at which the Estate received correspondence. It is also undisputed that Amos received that notice. The record additionally establishes that Amos served as the co-personal representative of the Estate. Therefore, the Estate -- with Amos as a personal representative -- received constructive notice of the foreclosure through the actual, timely notice provided to Amos. See *C.R.C.P. 4(e)(4)*. Upon receiving notice of the *Rule 120* proceeding, Amos forwarded the notice to her attorneys who, together with Amos, chose not to challenge **[**1261]** the default. Thus, Amos, and thereby the Estate, was afforded timely notice and a meaningful opportunity to appear and defend the foreclosure action.[6]

[*P19] The instant case differs **[***15]** from Dews which came before this Court on a *C.A.R. 21* petition before a foreclosure sale had occurred. *648 P.2d at 662-63*. Moreover, the allegedly defaulting party in Dews received notice only days before the proceeding and therefore was not given timely notice or afforded a meaningful opportunity to be heard. *Id. at 664*.

[*P20] Here, the failure to provide notice to Righetti as required under *Rule 120* did not result in harm to Righetti or his Estate. Amos and the Estate had sufficient notice of the *Rule 120* proceeding and could have chosen to defend the foreclosure action. Instead, after consulting with counsel, Amos made an informed decision not to contest the default on her own behalf or on behalf of the Estate. To determine that the notice fails here because it was addressed only to Amos individually and not to Amos individually and as personal representative of Righetti's Estate would ignore the purpose underlying notice: "to apprise interested parties of the pendency of the action and afford them an opportunity to present their objections." *Mullane, 339 U.S. at 314*. We will not elevate form over substance and void a completed foreclosure sale at this late juncture when the Estate had **[***16]** constructive notice, made no timely objection to the *Rule 120* hearing, and no injury resulted. Thus, we affirm the court of appeals with respect to its *Rule 120* determination.

B. Bid Rigging

[*P21] We now turn to the issue of bid rigging.[7] First, we describe the unusual procedural posture of this case. Next, we discuss what constitutes bid rigging under the Colorado Antitrust Act, taking guidance from the Sherman Act. Finally, we determine that the trial court's findings and conclusion that the plaintiffs failed to prove bid rigging as a defense are supported by the record.

1. Procedural History

---

[6] The petitioners challenge the trial court's finding that the Estate and Brandy Righetti were not entitled to notice under *Rule 120*. Even assuming that *C.R.C.P. 120* required Equitable Bank to provide notice to the Estate or to Brandy Righetti as co-personal representative of the Estate, we would reach the same result because the Estate received constructive notice through the actual notice provided to Amos. Thus, the same lack of prejudice analysis would apply.

[7] The parties disagree about whether the issue of bid rigging is before the Court, or whether we are confined to the issue on which we granted certiorari review: whether, when bidders at a public foreclosure sale conspired to rig the bidding in violation of the Colorado Antitrust Act and the resulting deed is void, the foreclosed property may be awarded to one of the conspirators rather than void the sale. This Court has the authority to review issues encompassed within the certiorari issue. *C.A.R. 53(a)(1)* ("The statement of an issue presented will be deemed to include every subsidiary issue clearly comprised therein."). **[***17]** Here, the issue of whether bid rigging occurred must be resolved to reach the issue on certiorari.

[*P22] This issue comes before the Court in an unusual procedural posture. ***HN5***[] A party may bring a civil claim under the Colorado Antitrust Act to recover damages for bid rigging. See *§ 6-4-114, C.R.S.* (2011).[8] Here, the trial court denied the plaintiffs' motion to amend their complaint a third time to include a claim for bid rigging. The trial court reasoned that the plaintiffs had unduly delayed adding the potential claim, and failed to show good cause for amending their complaint only forty-five days before trial and after the close of discovery. Further, the trial court found that prejudice could result from the introduction of the claim so close to trial, and from the lack of discovery on bid rigging.

[*P23] The trial court did, however, permit plaintiffs to present evidence of bid rigging as a defense **[***18]** to Aspen Alps' counterclaims despite acknowledging that the plaintiffs were attempting "to admit evidence of bid rigging through the back door." The trial court allowed the defense, finding that the evidence was relevant because in order to **[**1262]** recover on its counterclaims, Aspen Alps would need to establish valid title to the property. Though valid title is presumed when, as here, title is conferred by the official act of a public official, the trial court determined that evidence of bid rigging could rebut the presumption. Therefore, the trial court determined, bid rigging could be introduced as a defense. Even so, the trial court did not allow the plaintiffs to reopen discovery to further develop the defense, determining that the plaintiffs "could have and should have discovered this defense long before." Instead, the trial court only permitted the plaintiffs to designate previously taken deposition testimony from Mayer, one of the parties bidding at the auction, and from Tiffany Wincura, Public Trustee of Pitkin County. Thus, bid rigging was introduced as only a defense, late in the case, with limited discovery.

[*P24] With this limited record before it, the court of appeals determined that **[***19]** bid rigging had occurred. The court of appeals then relied on *section 6-4-121, C.R.S.* (2011),[9] to reverse the quiet title decree, but declined to void the foreclosure sale. Instead, the court of appeals remanded the case to the trial court to determine in its equitable discretion whether the sale should be void or if the high bidder at the foreclosure sale should be awarded the deed to the property. We reverse.

2. Standard of Review

[*P25] ***HN8***[] In an appeal of a judgment entered after a trial to the court, we defer to the trial court's credibility determinations and will disturb its findings of fact only if they are clearly erroneous and are not supported by the record. *C.R.C.P. 52*; *Ranta Constr., Inc. v. Anderson, 190 P.3d 835, 843 (Colo. App. 2008)*. When the facts are undisputed, the reviewing **[***20]** court will not defer to the trial court's factual findings, but will instead conduct a de novo review and make an independent judgment on the merits. *Hinojos v. Lohmann, 182 P.3d 692, 694-95 (Colo. App. 2008)*.

3. Requirements for Bid Rigging

[*P26] ***HN9***[] The Colorado Antitrust Act prohibits bid rigging under *section 6-4-106*: "(1) It is illegal for any person to contract, combine, or conspire with any person to rig any bid, or any aspect of the bidding process, in any

[8] ***HN6***[] The statute provides a civil private right of action for violation of the Act in *section 6-4-114*: "Any person injured in its . . . property by reason of any violation of this article may sue therefor and, if successful, shall recover any actual damages sustained by such person."

[9] *Section 6-4-121* provides:

> ***HN7***[] All contracts or agreements made by any person while a member of any combination, [or] conspiracy . . . prohibited under this article which are founded upon, or are the result of, or grow out of, or are connected with any violation of this article, either directly or indirectly, shall be void, and no recovery thereon or benefit therefrom shall be had by or for any such person. . . .

way related to the provision of any commodity or service." The term "commodity" includes land and real property. *§ 6-4-103, C.R.S.* (2011).

[*P27] ***HN10***[] There are no cases in Colorado interpreting *section 6-4-106*. We therefore look to federal antitrust cases as our guide when interpreting the Colorado Antitrust Act. *§ 6-4-119, C.R.S.* (2011) ("It is the intent of the general assembly that, in construing this article, the courts shall use as a guide interpretations given the federal courts to comparable federal antitrust laws."); *People ex rel. Woodard v. Colo. Springs Bd. of Realtors, Inc., 692 P.2d 1055, 1061 (Colo. 1984)* ("[B]ecause our statute is intended to protect the public from illegal restraints of trade beyond the reach of federal law, decisions **[***21]** of federal courts construing the Sherman and Clayton Acts, although not controlling, are entitled to careful scrutiny in resolving issues arising under Colorado's antitrust statute."). The Sherman Act differs from Colorado's Antitrust Act in that the federal law does not contain a provision specifically prohibiting bid rigging. Compare *15 U.S.C. § 1 (2006)* ("Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal."), with *§ 6-4-106*. Nonetheless, a federal body of case law exists interpreting the Sherman Act to prohibit bid rigging, and classifying bid rigging as a per se violation of section 1 of the Act. See, e.g., *United States v. Koppers Co., 652 F.2d 290, 294 (2d Cir. 1981)*; *United States v. Bensinger Co., 430 F.2d 584, 589 (8th Cir. 1970)*; *Love v. Basque Cartel, 873 F. Supp. 563, 576 (D. Wyo. 1995)*.

[1263]** **[*P28]** Thus, ***HN11***[] we look to federal cases involving bid rigging as a guide to our determination of what constitutes bid rigging. Most of the federal cases involving bid rigging arise as criminal prosecutions that do not involve real property. See, e.g., *United States v. Reicher, 983 F.2d 168 (10th Cir. 1992)* **[***22]** (reviewing a criminal prosecution under the Sherman Act for bid rigging); *United States v. W.F. Brinkley & Son Constr. Co., 783 F.2d 1157 (4th Cir. 1986)* (same); *United States v. Lyons, 670 F.2d 77 (7th Cir. 1982)* (same). We have some guidance, however, from two cases involving claims of bid rigging in foreclosure sales: *United States v. Guthrie, 814 F. Supp. 942, 943 (E.D. Wash. 1993)*, and *Love v. Basque Cartel, 873 F. Supp. at 563*.

[*P29] In Guthrie, Guthrie was convicted under the Sherman Act for rigging bids at two real estate foreclosure sales. *814 F. Supp. at 943*. Guthrie approached potential bidders prior to the scheduled foreclosure sales and requested that they forego bidding at the sale in return for payment. *Id. at 943-44*. Guthrie was subsequently the only bidder at the foreclosure sales and won by submitting a bid $1 above the minimum bid level. *Id. at 944*. The court determined that Guthrie had engaged in bid rigging, which it defined as "an agreement between two or more persons to eliminate, reduce, or interfere with competition for a job or contract that is to be awarded on the basis of bids." *Id. at 950*.

[*P30] In Love, the court dismissed claims of bid rigging cautioning that "[b]id **[***23]** rigging should not be confused with joint bidding, which allows bidders to pool their resources to place bids on property which they would otherwise be unable to afford." *873 F. Supp. at 577*. The plaintiffs asserted that bid rigging occurred when a group agreed to buy an entire property for a set price rather than buying the parcels the members of the group had originally tried to obtain. *Id. at 577-78*. Because the defendants joined to purchase the property in its entirety, the plaintiffs asserted that the defendants were able to purchase the entire property for an artificially low price. *Id. at 578*. The court rejected the argument, determining that "its adoption would essentially outlaw joint bids of any kind since it could always be said that joint bidding agreements removed potential bidders from the bidder pool and thus suppressed competition." Id. The court also considered the fact that the plaintiffs failed to present evidence that they or anyone else were foreclosed from bidding. Id.

[*P31] The Love court also relied on *Kearney v. Taylor, 56 U.S. 494, 520, 14 L. Ed. 787 (1853)*, to find the bidders conduct "consonant with the Supreme Court's support for joint bidding." *Love, 873 F. Supp. at 578*. In **[***24]** Kearney the United States Supreme Court announced that joint bidding is necessary and even desirable:

> The property at stake might be beyond the means of the individual, or might absorb more of them than he would desire to invest in the article, or be of a description that a mere capitalist, without practical men as associates, would not wish to encumber himself with.

56 U.S. at 520. Thus, the Court reasoned that it must "look beyond the mere fact of an association of persons formed for the purpose of bidding at this sale, as it may be not only unobjectionable, but oftentimes meritorious, if not necessary, and examine into the object and purposes of it." Id. at 520-21. If the purpose of the association is not to prevent competition, but to enable or induce those in the association to participate in the bidding, then the sale should be upheld. Id. at 521.

[*P32] With this guidance in mind, we turn to the issue of bid rigging in the case at hand.

4. Application

[*P33] In this case, the trial court concluded that the plaintiffs failed to establish bid rigging as a defense. Rather, the three individual bidders exercised their right to contract by pooling their resources to place bids on a property which **[***25]** they would otherwise be unable to afford. See Love, 873 F. Supp. at 577. The trial court based its conclusion on several key findings of fact. First, Seguin, Mayer, and Flaum (via Griffin) were each unable to individually bid any higher than the $1.86 million winning bid at the foreclosure sale. Mayer ceased bidding before the three decided to form the LLC because the bid surpassed her available funds. Similarly, Flaum testified that $1.8 **[**1264]** million was the maximum amount of authority that Griffin had to bid. Seguin's bid of $1.86 million was the highest bid and was offered before the agreement to stop bidding and form Aspen Alps to jointly buy the property was made. In addition, the plaintiffs failed to establish that any competitors were shut out of the bidding process as Mayer, Seguin, and Flaum were the only bidders. Based on these findings of fact, the trial court concluded that the actions constituted joint bidding, not bid rigging. Consequently, the trial court held that the plaintiffs failed to establish bid rigging as a defense. We agree.

[*P34] Because of the late introduction of the bid rigging theory and the lack of discovery on the issue, the plaintiffs offered extremely limited **[***26]** testimony regarding bid rigging. Evidence at trial established that only three people bid at the foreclosure sale: Mayer, Seguin, and Griffin (on behalf of Flaum). Unlike the defendant in Guthrie, the three did not know each other before the day of the foreclosure sale. Also, the three bid competitively. Mayer stopped bidding at $1.75 million because she did not have any more funds available to bid. Flaum authorized Griffin to bid only up to $1.8 million. Seguin submitted the high bid at $1.86 million. The final bid was also significantly higher than the starting bid of $1.495 million. Mayer testified that it was at that point in the bidding that Griffin said "we could be bidding this up further and further," and suggested that the three form Aspen Alps to purchase the property instead of bidding against one another.[10] The Pitkin County Public Trustee, Tiffany Wancura, testified that Mayer, Griffin, and Seguin decided to form Aspen Alps and purchase the property together rather than continue to bid against each other. While a prior agreement is not necessary to prove bid rigging, based on this testimony, we can conclude that, unlike in Guthrie, there was not an agreement prior to the **[***27]** foreclosure sale to rig the bid.

[*P35] Moreover, this case resembles Love and Kearney in that testimony shows that Mayer, Griffin, and Seguin pooled their resources to purchase the property. The bidding had exceeded Mayer's funds as well as Griffin's funds. Then Griffin proposed joint ownership of the property. In examining the purpose of the combined bid, we cannot say based on the limited evidence in the record that the purpose of the individuals joining to purchase the property was to eliminate, reduce, or interfere with competition. Thus, the record does not support a determination that bid rigging occurred.

[*P36] As such, the record supports the trial court's determination that bid rigging was not established; therefore, we find no reason to disturb the judgment on appeal. Consequently, we reverse the court of appeals.

III. Conclusion

---

[10] The trial court admitted the statements under the CRE 801(d)(2)(E) hearsay exception.

[*P37] For the foregoing reasons, we affirm the court of appeals' judgment with respect to *Rule 120* notification. We reverse the court of appeals on the issue of bid rigging.

CHIEF JUSTICE BENDER concurs in part and dissents in part.

JUSTICE COATS dissents.

Concur by: BENDER (In part)

Dissent by: BENDER (In **[***28]** part); COATS

Dissent

CHIEF JUSTICE BENDER concurs in part and dissents in part.

[*P38] The majority holds that unlawful bid rigging does not occur when all of the bidders in an ongoing foreclosure auction agree that "instead of 'bidding the property up further and further,' they cease bidding against each other and buy the property jointly." Maj. op. at ¶ 6. I disagree with this holding because I believe that this anti-competitive scheme was intended to stop further bidding and thus constitutes an illegal bid rigging conspiracy in violation of *section 6-4-106(1), C.R.S.* (2011). Thus, I respectfully dissent from Part II.B of the majority's opinion. However, because I agree with the majority's resolution of the *Rule 120* notification issue, I concur in Part II.A. Hence, I concur in part and dissent in part.

I.

[*P39] The material facts in this case are undisputed. There were three principle bidders[11] **[**1265]** at the auction for the foreclosed condo below: Seguin, Meyer, and Griffin (representing Flaum). The three bidders bid competitively until Seguin bid $1.86 million. At that point, Griffin approached both Seguin and Meyer and proposed that rather than "bidding the property up further and further," they all stop bidding **[***29]** and instead agree to purchase the property jointly. Seguin and Meyer agreed and no further bids were submitted. After the auction, Seguin, Meyer, and Flaum formed Aspen Alps 123, LLC, and, shortly thereafter, the public trustee issued a deed quieting title to the real property in Aspen Alps.

II.

[*P40] Based upon these undisputed facts, I respectfully disagree with the majority's holding that bid rigging did not occur in this case. In the words of the bidders themselves, after the auction began, all of the bidders present at the auction unlawfully colluded to "stop the bidding process" and thus kept the sale price from rising "further and further." Accordingly, in my view, the parties engaged in an anti-competitive conspiracy in violation of *section 6-4-106(1)*.[12]

[*P41] "[A]n agreement that 'interfere[s] with the setting of price by free market forces' is illegal on its **[***30]** face." *Nat'l Soc. of Prof'l Eng'rs v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)* (quoting *United States v. Container Corp., 393 U.S. 333, 337, 89 S. Ct. 510, 21 L. Ed. 2d 526 (1969))*. More specifically, an

---

[11] The creditor bank, Equitable Bank, submitted an initial bid in the amount of its debt, which was then outmatched by the remaining bidders.

[12] I agree with the majority that, under *section 6-4-119, C.R.S.* (2011), we must interpret *section 6-4-106(1)*'s prohibition on bid rigging consistent with federal ***antitrust law***. Maj. op. at ¶ 27.

auction "will be set aside where a person, desirous of purchasing, prevents others by his improper conduct from bidding against him . . . ." 7A C.J.S. Auction & Auctioneers § 14 (1980). Because bid rigging is per se unlawful, the relevant inquiry is whether an agreement existed to rig the bid, and not whether the agreement was successful. *United States v. Guthrie, 814 F.Supp. 942, 949 (E.D. Wash. 1993)*.

[*P42] The majority reasons that the bidders' agreement did not constitute unlawful bid rigging, but was instead lawful "pooling" of the bidders' resources to create a joint bid similar to the arrangement that the Wyoming Federal District Court found to be lawful in *Love v. Basque Cartel, 873 F.Supp. 563 (D. Wyo. 1995)*. Maj. op. at ¶ 33. Specifically, the Love court warned that "[b]id rigging should not be confused with joint bidding, which allows bidders to pool their resources to place bids on property which they would otherwise be unable to afford." *873 F.Supp. at 578*. I disagree with the majority's reliance on Love because **[***31]** that case is easily distinguished from the present matter.

[*P43] In Love, the court based its ruling that the joint bidding agreement constituted lawful bid pooling on three reasons. First, the Love court was persuaded by the fact that the parties to the joint bidding agreement were never in competition because each was only interested in owning a distinct parcel of the larger ranch that their joint bid succeeded in winning. *Id. at 577-78*. Second, the Love court reasoned that it was significant that the was no evidence that others that were present at the auction were prevented from matching or exceeding the joint bidders' final bid. *Id. at 578*. Finally, the Love court held that the agreement constituted lawful joint bidding because the evidence showed that in the absence of the joint bidding agreement, the reserve would not have been met for several of the parcels and therefore the auction would have failed. *Id. at 579*.

[*P44] Each of these rationales is inapplicable to the auction in this case. First, there was only one parcel, the condo, and all three bidders were bidding competitively against one another to obtain the property in its entirety. Second, unlike in Love, where there were other **[***32]** bidders that may have competed against the joint bidders, here, all of the bidders present at the auction colluded to stop bidding. Their collusive behavior, which **[**1266]** occurred while the auction was underway, destroyed any incentive among the bidders to match or to exceed the final bid. Finally, the reserve (or minimum bid amount) was met well before the parties conspired to stop bidding up the price of the auction. Thus, the success of the auction, in surpassing the reserve, was not contingent upon the parties' ability to submit a combined bid. Although I am mindful of Love's warning that ""[b]id rigging should not be confused with joint bidding," *id. at 577*, Love should not control this case. I acknowledge that, under certain circumstances, a combined bid may actually serve to foster competition by allowing joint bids to reach ever higher. In this case, however, the combined bid served to cut off all competition and, in the words of one of the bidders, "stop the bidding process."

[*P45] Indeed, in direct contradiction to the facts in Love, the uncontroverted evidence here shows that the bidders did not come together to make the final, winning bid. Rather, after several rounds of bidding, Seguin, **[***33]** in his individual capacity, bid $1.86 million, and then, once that bid was submitted, Griffin (representing Flaum) approached Meyer and Seguin and "proposed to the others that, instead of 'bidding the property up further and further,' they cease bidding against each other and buy the property jointly." Maj. op. at ¶ 6. Unlike in Love, where, prior to the final round of bidding, the bidders pooled their bids to reach a price that they otherwise could not afford, here, Seguin could have afforded the final bid price independent of the financial contributions of the other bidders.

[*P46] Seguin won the auction with his individual bid, and it was not until after the close of the auction that the parties came together to form Aspen Alps. At the time that their anti-competitive agreement occurred, Seguin held the high bid independent of the others. Thus, the incentive for him to join in the agreement was to prevent the auction price from getting bid up "further and further." Seguin was able to buy-off his competitors by agreeing to "form an LLC and stop the bidding process." In my view, their agreement represented a classic bid rigging scheme. It constituted an "'agreement between competitors pursuant **[***34]** to which contract offers are to be submitted to or withheld from a third party.'" *Love, 873 F.Supp. at 576* (quoting *United States v. Mobile Materials, Inc., 881 F.2d 866, 869 (10th Cir. 1989)*, cert. denied *493 U.S. 1043, 110 S. Ct. 837, 107 L. Ed. 2d 833 (1990))*.

[*P47] The majority reasons that this scheme did not constitute bid rigging because the non-winning bidders, Flaum (who was represented by Griffin at the auction) and Meyer, each provided self-serving testimony that they could not afford to match Seguin's final, winning bid. Maj. op. at ¶¶ 34-35. In my view, this misapprehends federal bid rigging jurisprudence, which has long recognized that the existence of a conspiracy to rig an auction is neither dependent on the success of the conspiracy nor on any showing that the agreement injured the seller by negatively impacting the final sale price. See ABA Section of ***Antitrust Law***, Model Jury Instructions in Criminal Antitrust Cases 61 (2009) ("Bid Rigging"). Rather, the relevant inquiry is whether the "aim and result" of the conspiracy was "the elimination of one form of competition." Id. Thus, the sole issue in determining whether a joint bidding scheme constitutes unlawful bid rigging is whether it produces an anti-competitive **[***35]** result. In the present matter, the parties explicitly agreed to stop bidding to prevent the auction price from rising. This is the definition of anti-competitive behavior. Id. ("A conspiracy to rig bids may be an agreement among competitors about . . . who should be the successful bidder . . . or who should refrain from bidding . . . that affects, limits, or avoids competition among them.").

[*P48] Finally, I do not agree with the majority's implication that the fact that the bidders' agreement was made during—rather than before—the auction supports the conclusion that this scheme did not constitute bid rigging. Although the majority acknowledges that "a prior agreement is not necessary to prove bid rigging," maj. op. at ¶ 34, it nevertheless uses this fact to distinguish the present matter from Guthrie, in which the federal district court for the Eastern District of Washington denied a defendant's motion for judgment of acquittal on bid rigging **[**1267]** charges because the defendant had contacted other potential bidders and offered them money to refrain from participating in upcoming auctions. *814 F.Supp. at 943-44, 950*. In my view, from a competitiveness standpoint, this case presents a more troublesome **[***36]** situation than existed in Guthrie. In Guthrie, because the alleged bid rigging occurred prior to the auctions, there was no guarantee that the defendant had bought off every potential bidder that might attend the auction. See *id. at 943-44*. In contrast, because the bidders' agreement in this case was not made until after the auction was already underway, the three bidders were assured that their agreement eliminated all competition.

III.

[*P49] I would hold that the bidders' agreement constituted unlawful bid rigging in violation of *section 6-4-106* and proceed to address the remedy issue consistent with *section 6-4-121, C.R.S.* (2011), which, in my opinion, would void this unlawful transfer. Accordingly, I respectfully dissent from Part II.B of the majority's opinion.

JUSTICE COATS, dissenting.

[*P50] Unlike the majority I would not be so quick to relieve the Bank of its obligation to at least substantially comply with the statutory prerequisites for a court-authorized foreclosure sale. Even if I were to agree, however, that constructive notice bars a challenge to the validity of a foreclosure sale once it has already taken place, I would nevertheless disagree with the majority's imputation of notice **[***37]** to the Righetti Estate, under the circumstances of this case. Because I would void the judicial authorization and subsequent foreclosure sale in this case, without regard to the claim of bid-rigging, solely on the basis of a challenge by the not-yet-closed estate of a deceased tenant in common that went completely unidentified in the Bank's verified motion for authorization to proceed, I respectfully dissent.

[*P51] I understand the majority to hold that a foreclosure sale will not be set aside for failure of the party seeking foreclosure to include an interested party of record in its motion for judicial authorization, as required by *Rule 120* and *section 38-38-105, C.R.S.* (2011), as long as that interested party had constructive notice of the foreclosure proceeding but nevertheless failed appear and oppose the sale sometime before it actually took place. Without further analysis, the majority finds that the Righetti Estate had constructive notice of the foreclosure proceeding, apparently considering it self-evident that if Righetti's widow had actual notice, and she was a personal representative of the estate, then the estate must have been on constructive notice. Not only is this proposition **[***38]** not self-evident, I actually consider it to be erroneous, as a matter of law, or logic, or both.

[*P52] Apparently agreeing that an inference of notice to the estate and its beneficiaries could hardly be considered self-evident, the court of appeals attempted to justify it by expressly reasoning that as a fiduciary a personal representative is also an agent, whose knowledge is imputed to her principal according to accepted principles of agency law. While an agency is a fiduciary relationship in which the agent has fiduciary obligations to his principal, it is not necessarily the case, however, that a fiduciary relationship also involves an agency relationship. Whether a fiduciary is additionally the agent of his principal depends entirely on the circumstances of the particular relationship and involves a separate legal inquiry. *Restatement (Third) of Agency § 1.01 cmt. g* (2006). By way of example, the Comments to the Restatement make clear that "a trustee is not an agent of the settlor or beneficiaries unless the terms of the trust subject the trustee to the control of either the settlor or the beneficiaries. Principals in agency relationships have power to terminate authority and thus remove **[***39]** the agent; trust beneficiaries, in contrast, do not have power to remove the trustee." Id.

[*P53] Not only, therefore, is it erroneous to assume that a fiduciary relationship is necessarily governed by agency principles, but the close analogy between estates and trusts militates against finding an agency relationship in the former, any more than in the latter, in the absence of express provisions of a statute or will to the contrary. As with a trustee, **[**1268]** heirs or devisees lack the power to terminate a personal representative, in the absence an express provision of the will, and by statute in this jurisdiction, the liability of a personal representative for breach of his fiduciary duties is precisely the same as that of "a trustee of an express trust." *§ 15-12-714, C.R.S.* (2011). While a trustee, or personal representative, by the very nature of a fiduciary relationship, has a heightened duty of care to beneficiaries of the trust or will, it would literally stand the relationship on its head to conclude that the beneficiaries are for that reason alone also liable to third parties for the fiduciary's action or inaction.[13]

[*P54] In any event, Righetti's widow was not the personal representative of the Righetti Estate but merely a co-representative, along with the **[***41]** decedent's daughter. By statute, co-representatives do not independently have the powers of a personal representative but rather share those powers, which must be exercised cooperatively, with the consent of the other co-representatives. § 15-12-717. Because the statute expressly bars one co-representative from exercising the power of an agent to bind the estate with regard to the administration or distribution of estate property, it is not clear to me that a lone co-representative retains any greater power to waive interests of the estate. Even if I agreed with the majority that a foreclosure sale should not be voided merely because an interested party with actual notice of the proceedings was not designated, as statutorily required, in the motion for judicial authorization, I would still not decline to void this particular sale.

[*P55] The majority's exclusive focus on notice, however, points to an even more fundamental objection to its rationale. From both its explanation and the authorities on which it relies, it appears that the majority is concerned only that the minimum notice requirements of procedural due process were satisfied. By contrast, not only do I not believe the notice requirements **[***42]** of our statute and rule are designed to ensure only this minimal degree of notice, I do not even consider notice the sole concern of our insistence on judicial authorization as a prerequisite to the exercise of a power of sale.

[*P56] In this jurisdiction, before a public trustee may conduct a foreclosure sale, the holder of the evidence of debt must obtain a court order complying with *C.R.C.P. 120*. In addition to providing notice, that rule requires the filing of a verified motion in the district court stating the names and addresses of the various interested parties and anyone liable upon the secured indebtedness. Id. Before the motion may be granted, the court must examine it and be satisfied that the moving party is entitled to an order authorizing a sale on the facts. Id. Any sale held without an

---

[13] To the extent the majority's "see" cite to the "Personal Service" provisions **[***40]** of ***C.R.C.P. 4*** is intended to imply that a personal representative is a designated agent of her estate for purposes of service of process, I consider that suggestion not only mistaken but also irrelevant. As a general matter, the manner of presenting claims against an estate is prescribed at *section 15-12-804, C.R.S.* (2011), but proceedings to enforce a mortgage or other lien against property of an estate are expressly exempted from this provision and are governed instead by *C.R.C.P. 120*, which contains service requirements of its own, separate and distinct from those of Rule 4. In any event, ***Rule 4(e)(4)*** delineates persons upon whom delivery of process naming a particular entity will be considered adequate, not persons from whom notice of an ongoing proceeding will be imputed to that entity, regardless of adequate service. In this case, it is undisputed that neither the estate itself nor anyone in the capacity of personal representative for the estate was ever even named in the motion for a foreclosure sale, much less served with notice of the sale.

order issued in compliance with the statute and rule is statutorily declared invalid. See *§ 38-38-105(2)(a), C.R.S.* (2011).

[*P57] In this case, the Bank not only failed to serve the estate, whose representative the Bank knew to stand in the shoes of the decedent debtor and owner by tenancy in common of the subject property; perhaps even more importantly, it failed to designate the estate as a necessary **[***43]** interested party in its verified motion for court authorization, as required by *Rule 120*. Without being made aware that the decedent's widow was not the sole owner through a right of survivorship, as implied by the motion naming only her, and instead that the decedent's half interest in the property would pass through his estate to unnamed beneficiaries, the district court **[**1269]** lacked the required information to assess the merits of the motion, as contemplated by statute and rule. While compliance with the dictates of the rule is clearly required for a valid sale by both statute and case law, regardless of the nature of the complaining party, it seems particularly ironic for the majority to excuse compliance with regard to an estate, statutorily subject to claims only upon written notice to, or litigation against, the personal representative, or filing with the clerk of the probate court, regardless of actual notice. See *In re Estate of Ongaro, 998 P.2d 1097, 1100 (Colo. 2000)* (requiring compliance with *section 15-12-804*, notwithstanding the personal representative's awareness of a potential claim).

[*P58] For one final touch of irony in this case, no reader of the court of appeals opinion below **[***44]** can fail to appreciate that the majority finds itself relieving the Bank of its obligation to comply with the requirements of *Rule 120* for failure of any demonstration of prejudice only because the decedent's widow, who produced the required payment to the public trustee within the statutory redemption period, was held strictly, without any required showing of prejudice, to compliance with an additional 15-day notice requirement, which she missed by some 9 days.

[*P59] Because I believe there has always been and yet remains very good reason for validating a foreclosure sale by the public trustee only upon compliance with the express procedural requirements of the rule and a valid court order, I would not abandon those requirements at all, much less in a case such as this. I therefore respectfully dissent.

Opinion

[*210] **MEMORANDUM**

Plaintiffs A.F. of L.-A.G.C. Building Trades Welfare Plan ("AFL"), IBEW-NECA Local 505 Health & Welfare Plan ("IBEW"), Painters District Council No. 30 Health & Welfare Fund ("Painters"), and Andrea Kehoe ("Kehoe"), collectively "Indirect Purchasers," are indirect purchasers of the prescription drug Flonase and its generic equivalent. Flonase is the brand-name version of fluticasone propionate ("FP")—a steroid nasal spray produced by Defendant SmithKline Beecham Corporation, doing business as GlaxoSmithKline PLC ("GSK"). Indirect Purchasers allege that GSK filed sham citizen petitions with the Food and Drug Administration ("FDA") to delay the entry of a cheaper, generic version of Flonase into the market. Indirect Purchasers have moved to certify a class of consumers and third-party payors ("TPPs") [1] under the monopolization, **[*211]** unfair and deceptive trade practices ("UDTP"), and unjust enrichment laws of five states. [2] Also before me are three *Daubert* motions seeking to exclude expert **[**6]** reports and testimony critical to this class certification determination: (1) GSK's Motion to Exclude the Expert Report and Testimony of Gordon Rausser; (2) Indirect Purchasers' Motion to Exclude the Report and Testimony of Bruce Stangle; and (3) Indirect Purchasers' Motion to Exclude the Report and Testimony of Robert Navarro.

GSK asserts that Indirect Purchasers have failed to meet certain requirements for class certification under *Federal Rule of Civil Procedure 23*—in particular, that **[**7]** common issues do not predominate over individual issues for purposes of establishing antitrust impact and damages. GSK contends that only through individual proof and inquiries can the fact of injury or the extent of damage for each class member's purchase and/or reimbursement of Flonase or its generic equivalent be determined.

I am satisfied that Indirect Purchasers have demonstrated that common issues will predominate and that the Rule 23 requirements have been met. In reaching that conclusion, however, certain adjustments to Indirect Purchasers' proposed class definition will be necessary. As opposed to the larger proposed class, a more limited indirect purchaser class will be certified that excludes those class members who did not purchase a generic equivalent of Flonase after it became available. Furthermore, I will only certify the class under the state laws which Indirect Purchasers have demonstrated standing to invoke. Therefore, I will grant in part and deny in part Indirect Purchasers' motion for class certification.

I. BACKGROUND[3]

A. Hatch-Waxman and the Generic Drug Approval [**8] Process

In order to market a drug in the United States, a company must obtain FDA approval by filing a "New Drug Application" ("NDA") to demonstrate the safety and efficacy of its product. *21 U.S.C. § 355(b)*. The NDA process is usually lengthy and expensive, and in 1984, Congress enacted the Drug Price Competition and Patent Term Restoration Act of 1984 ("Hatch-Waxman Act") to expedite the approval process for generic drugs. Under Hatch-Waxman, to receive FDA approval for a generic drug, a prospective manufacturer need only file an Abbreviated New Drug Application ("ANDA"), which relies on the safety and efficacy data previously provided in the NDA for its branded equivalent. *21 U.S.C. § 355(j)*. Instead of clinical trials, an ANDA requires a demonstration of a certain level of bioequivalence [4] to a listed drug. The FDA issues and regularly modifies bioequivalence guidance for various categories of generic drugs in order to inform the public of the bioequivalence standards that ANDAs must

---

[1] AFL, IBEW, and Painters are all TPPs that underwrite prescription drugs costs for their plan members, i.e. insured consumers. They will be referred to collectively in this opinion as "named plaintiff TPPs."

[2] Jurisdiction over this action is proper under the Class Action Fairness Act of 2005, which grants federal district courts original jurisdiction over "any civil action in which the matter in controversy exceeds the sum or value of $5,000,000, exclusive of interests and costs, and is a class action in which . . . any member of a class of plaintiffs is a citizen of a State different from any defendant." *28 U.S.C. § 1332(d)(2)*; see *Kaufman v. Allstate N.J. Ins. Co., 561 F.3d 144, 148 (3d Cir. 2009)*.

[3] The facts are stated based on evidence offered to support Indirect Purchasers' Fourth Amended Complaint.

[4] To establish **[**9]** bioequivalence, the generic version must contain the same active ingredient(s), dosage form, route of administration, and strength.

meet in order to be approved. Generic drugs certified by the FDA as bioequivalent to the brand drug are completely interchangeable with that branded drug and are referred to as "AB-rated."

While an ANDA is pending before the FDA, any interested party can file a citizen petition with the FDA to register a complaint about the pending application. *21 C.F.R. §§ 10.25(a)*, *10.30*. Until 2007, the FDA was required to consider and respond to every citizen petition. [5] For this reason, filing a **[*212]** citizen petition necessarily delayed the approval of any pending ANDA—only after the FDA responded to all pending citizen petitions could an ANDA be approved. The citizen petition process often was abused by pharmaceutical companies attempting to prolong their monopoly in the market.

B. Flonase and GSK's Alleged Misconduct

In October 1994, the FDA approved GSK's NDA to treat nasal inflammation caused by seasonal and non-seasonal allergies. GSK released Flonase in the United **[**10]** States in 1995, and it quickly became the most prescribed nasal steroid inhalant in the United States. By 2000, Flonase commanded 38% of brand-name inhaled nasal steroid sales in the United States, resulting in over $600 million in sales. By 2005, the peak year for Flonase sales and the last full year of GSK's market exclusivity, Flonase sales exceeded $1.3 billion.

GSK's single patent on Flonase expired on November 13, 2003. However, GSK obtained a statutory extension of market exclusivity from the FDA to August 2004. By the time Flonase's market exclusivity was set to expire in 2004, GSK had identified a number of generic pharmaceutical manufacturers—including Roxane Laboratories, Inc. ("Roxane")—intent on filing ANDAs and bringing competitive generic FP nasal sprays to the market. This case concerns GSK's alleged "brand maturation strategy," crafted to maintain Flonase's market dominance in the face of inevitable generic competition.

Indirect Purchasers offer evidence that GSK's alleged "brand maturation strategy" included four tactics to delay the entry of generic FP nasal sprays into the market: (1) GSK improperly influenced the FDA's bioequivalence guidance process; (2) GSK filed **[**11]** several frivolous citizen petitions with the FDA regarding pending generic FP ANDAs in order to force the FDA to respond and delay approval; (3) GSK drafted an FP monograph for submission to the United States Pharmacopeia—which lists tests, procedures, and acceptance criteria in order to set standards for the quality, purity, strength, and consistency of the pharmaceutical ingredients in an approved drug—in attempt to raise the bar for FP market entry; and (4) GSK supplemented its original NDA in an attempt to delay the FDA from approving any ANDAs before approving GSK's supplements.

Roxane's generic version of Flonase did not enter the market until March 6, 2006. Indirect Purchasers argue that GSK used each of these four tactics to delay the market entry of AB-rated generic equivanlents of Flonase, and that, absent GSK's exclusionary conduct, generic FP would have entered the market in August 2004. As a result, Indirect Purchasers claim that they were prevented from purchasing and/or reimbursing for less-expensive generic FP between August 2004 and March 2006, and that they were forced to pay inflated prices for generic FP between March 2006 and March 2009. [6]

C. Procedural History

---

[5] In 2007, after the citizen petitions at issue in this case were filed, Congress passed a law allowing the FDA to summarily dismiss citizen petitions, in order to prevent pharmaceutical companies from using this process to delay generic entry into the market. See *21 U.S.C. § 355(q)(1)(A)(ii)*.

[6] Indirect Purchasers also **[**12]** allege that consumers and TPPs were forced to pay and/or reimburse for Flonase at a supracompetitive price as a result of GSK's conduct. However, for reasons discussed *infra*, I will exclude the proposed class members proceeding under this "branded overcharge" theory.

Indirect Purchasers initiated this case in September 2008. In December 2011, they filed their motion for class certification now before me. During this time, as a result of two Third Circuit opinions and GSK's filing of several motions to dismiss and motions for summary judgment, the claims and issues presented in this motion for class certification have been narrowed to a significant degree. A review of this procedural history follows.

On September 3, 2008, Indirect Purchasers filed a first amended class action complaint ("FAC") against GSK asserting claims of monopolization, UDTP, and unjust enrichment under numerous state laws. On October 17, 2008, GSK moved to dismiss the FAC. In addressing this motion on April 15, 2009, I concluded that it was appropriate to analyze issues regarding Indirect Purchasers' standing prior to class certification. I granted **[*213]** GSK's motion for two reasons: (1) although Indirect **[**13]** Purchasers could establish standing to bring their claims in the states where they resided or had a principal place of business, they failed to state a claim under any of those state laws; and (2) Indirect Purchasers could not establish standing merely by relying on claims of putative class members. *See In re Flonase Antitrust Litig., 610 F. Supp. 2d 409, 413 (E.D. Pa. 2009)* ("Unless at least one named Plaintiff can state a claim for relief under each count Plaintiffs do not have standing to bring claims as part of a putative class action."). I dismissed the FAC without prejudice, so that Indirect Purchasers could amend their complaint and, as Indirect Purchasers specifically noted, "named Plaintiffs from additional states could join the case" to address issues of standing. *Id.*

On May 21, 2009, Indirect Purchasers filed a second amended class action complaint ("SAC") asserting state law claims under the laws of seven states and adding Kehoe, an individual consumer from Massachusetts, as a named plaintiff. GSK moved to dismiss the SAC by again contending that Indirect Purchasers had not sufficiently plead an injury to have standing to bring their state law claims, or, alternatively, **[**14]** failed to state a claim under those state laws. On January 21, 2010, I held that Indirect Purchasers had sufficiently plead standing "in states where they reside, and where they purchased Flonase or reimbursed for purchases of Flonase." *In re Flonase Antitrust Litig., 692 F. Supp. 2d 524, 534 (E.D. Pa. 2010)*. Additionally, *inter alia*, Indirect Purchasers' unjust enrichment claim under Florida law was dismissed because, unlike most unjust enrichment state law, Florida requires that a plaintiff confer a direct benefit upon a defendant in order to state a claim for unjust enrichment. *Id. at 544*.

Indirect Purchasers filed a third amended class action complaint ("TAC") on March 1, 2010, asserting the following state law claims: monopolization under the laws of Arizona, Iowa, North Carolina, and Wisconsin; (2) unfair and deceptive trade practices under the laws of Arizona, Florida, Massachusetts, and North Carolina; and (3) unjust enrichment under the laws of Arizona, Iowa, Massachusetts, and Wisconsin. GSK subsequently filed three different motions for summary judgment in October 2010. I denied GSK's motions for summary judgment on *Noerr-Pennington* and causation grounds in June and July **[**15]** 2010, respectively. GSK's third motion for summary judgment against Indirect Purchasers rested on the following three arguments: (1) Indirect Purchasers failed to provide sufficient evidence to raise a genuine issue of material fact as to whether they have standing to bring their state law claims; (2) choice of law rules require that the Indirect Purchasers' claims be governed by the laws of their home states, rather than the laws of the states in which they purchased and/or reimbursed for purchases of Flonase; and (3) Indirect Purchasers failed to provide sufficient evidence to support several of their state law claims.

On September 26, 2011, I granted in part and denied in part GSK's motion. In addressing GSK's standing argument, I again noted that in a class action, [t]he initial inquiry . . . is whether the lead plaintiff individually has standing." *Winer Family Trust v. Queen, 503 F.3d 319, 326 (3d Cir. 2007)*; *see also O'Shea v. Littleton, 414 U.S. 488, 494, 94 S. Ct. 669, 38 L. Ed. 2d 674 (1974)*. And although GSK's standing contentions had previously been addressed, at the summary judgment stage the standing inquiry changed because Indirect Purchasers could no longer rely on their allegations; instead, they needed **[**16]** to put forth evidence to establish standing. *See Lujan v. Nat'l Wildlife Fed'n, 497 U.S. 871, 902, 110 S. Ct. 3177, 111 L. Ed. 2d 695 (1990)*. Considering this burden, I granted GSK's motion as to the following named Plaintiffs' claims for lack of standing: (1) IABORI's monopolization and UDTP claims under North Carolina law and (2) Painters' monopolization and unjust enrichment claims under Iowa law; and (3) Painters' UDTP claim under Florida law. [7]

[7] As a result of this ruling, named plaintiff International Association of Bridge, Structural, Ornamental and Reinforcing Ironworkers Local No. 79 Health Fund ("IABORI ") was dismissed from this action.

[*214] I also conducted a thorough choice of law analysis and concluded that Indirect Purchasers' claims were best considered under the laws of the states in which Flonase or its generic equivalent were purchased (the "purchase states"), as opposed to the states in which Indirect Purchasers resided or had a principal place of business (the "home states"). *In re Flonase Antitrust Litig., 815 F. Supp. 2d. 867, 882-85 (E.D. Pa. 2011)*. Finally, GSK's motion was granted as to Painters' Arizona UDTP claim because no genuine issue of fact had been raised regarding whether GSK had deceived **[**17]** Indirect Purchasers as required under Arizona UDTP law. *Id. at 885-86*.

Indirect Purchasers have since filed a fourth amended class action complaint. [8] The following named Plaintiffs and state law claims remain [9]:

Type of Claim	State	Relevant Plaintiff(s)
Monopolization	Arizona	Painters
Monopolization	Wisconsin	Painters
UDTP	Florida	AFL, IBEW
UDTP	Massachussets	Kehoe
Unjust Enrichment	Arizona	Painters
Unjust Enrichment	Massachussets	Kehoe
Unjust Enrichment	Wisconsin	Painters

In December 2011, Indirect Purchasers moved for class certification. [10] On February **[*215]** 22, 2012, a hearing was held to establish the parameters of the class sought for certification. In that hearing, Indirect Purchasers

[8] Indirect Purchasers' fourth amended class action complaint includes claims under North Carolina's monopolization statute, *N.C. Gen. Stat. § 75-2.1, et seq.*, and North Carolina's UDTP statute, *N.C. Gen. Stat. § 75-1.1, et seq.* I have already found that none of the named plaintiffs in this case can establish standing to bring an action under these North Carolina statutes. For the reasons outlined *infra*, I do not find that Indirect Purchasers can seek certification of a class pursuant to the monopolization and UDTP statutes of North Carolina.

Additionally, Indirect Purchasers' fourth amended class action complaint includes a claim under Arizona's UDTP statute, *Ariz. Rev. Stat. § 44-1522, et seq.* However, I previously granted GSK's motion for **[**18]** summary judgment as to Indirect Purchasers' Arizona UDTP claim because Indirect Purchasers had failed to raise a genuine issue of material fact as to whether GSK engaged in deception, as required by the Arizona statute. *In re Flonase Antitrust Litig., 815 F. Supp. 2d. 867, 885-86 (E.D. Pa. 2011)*; *see also* *Kuehn v. Stanley, 208 Ariz. 124, 91 P.3d 346, 351 (Ariz. Ct. App. 2004)*. At this stage in the litigation, with discovery already closed and without any evidence raising a genuine issue as to whether GSK engaged in deception, I do not find that Indirect Purchasers can now seek certification of a class pursuant to Arizona's UDTP statute.

[9] The remaining state law claims have been outlined in "Appendix A" at the end of this opinion. The statutes at issue are often labeled "*Illinois Brick* repealers" in light of the Supreme Court's decision prohibiting federal antitrust suits by indirect purchasers. *Ill. Brick Co. v. Illinois, 431 U.S. 720, 728, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Numerous states across the country have subsequently passed "*Illinois Brick* repealers" enabling an indirect purchaser to bring an antitrust claim under state law. Furthermore, in those states with a repealer statute, indirect purchasers are not barred from **[**19]** recovery for unjust enrichment damages.

My previous opinions have detailed "*Illinois Brick* repealers" and the similar theories underlying each of Indirect Purchasers' remaining state law claims. *See* *In re Flonase Antitrust Litig., 815 F. Supp. 2d. 867, 882-85 (E.D. Pa. 2011)*; *In re Flonase Antitrust Litig., 692 F. Supp. 2d 524, 534 (E.D. Pa. 2010)*; *In re Flonase Antitrust Litig., 610 F. Supp. 2d 409, 413 (E.D. Pa. 2009)*.

[10] Indirect Purchasers first moved for class certification on December 12, 2008. Since that time, I have twice denied Indirect Purchasers' motion for class certification without prejudice to re-brief the issue in light of opinions by the Third Circuit, first in *In re Hydrogen Peroxide Antitrust Litigation, 552 F.3d 305 (3d Cir. 2008)*, **[**20]** then in *Sullivan v. DB Investments, Inc., 667 F.3d 273 (3d Cir. 2011)*. In December 2011, Indirect Purchasers re-filed their previous two motions for class certification and accompanying memoranda and expert declarations, along with new supplemental memoranda. GSK responded to Indirect Purchasers' motion in the same fashion. All of the re-filed motions, memoranda, and declarations that have been filed since December 2011 have been taken into consideration.

generally asserted that: (1) the laws of North Carolina, GSK's home state, should be applied for choice of law purposes, and (2) their proposed class could consist of class members in states where no named plaintiff had established standing.

With regard to choice of law, for the reasons set forth in my September 26, 2011 opinion on GSK's motion for summary judgment and stated on the record in the February 22, 2012 hearing, I find that the Indirect Purchasers' claims are best considered under the laws of the states where they either purchased FP, or where TPP's plan members purchased FP and were reimbursed for those purchases.

Regarding standing and class certification, the Third Circuit has held that "to be a class representative on a particular claim, the plaintiff himself must have a cause of action on that claim." *Zimmerman v. HBO Affiliate, 834 F.2d 1163, 1169 (3d Cir. 1987)*. Although Indirect Purchasers are correct that named plaintiffs may generally represent other **[**21]** plaintiffs with common but not identical claims, *see* *Sullivan, 667 F.3d at 302*, Indirect Purchasers cannot attempt to expand their class to include states in which no named plaintiff has demonstrated injury after the completion of discovery and three rounds of dispositive motions addressing the issue of standing. *See* *Griffin v. Dugger, 823 F.2d 1476, 1483 (11th Cir. 1987)* ("Each claim must be analyzed separately, and a claim cannot be asserted on behalf of a class unless at least one plaintiff has suffered the injury that gives rise to that claim."); *In re Packaged Ice Antitrust Litig., 779 F. Supp. 2d 642, 657 (E.D. Mich. 2011)* (detailing the numerous federal district courts that have held that named plaintiffs lack standing to assert claims under the laws of the states in which they do no reside or in which they suffered no injury); *In re Wellbutrin XL Antitrust Litigation, 260 F.R.D. 143, 156-158 (E.D. Pa. 2009)* (reviewing extensively the applicable case law and subsequently rejecting plaintiffs' argument that named plaintiffs with standing in one state may represent absent plaintiffs from states in which the named plaintiff does not have standing).

Therefore, as a result of my choice **[**22]** of law and standing decisions, and as stated on the record in the February 22, 2012 hearing, I find that the indirect purchaser class can only consist of individuals and entities that purchased and/or reimbursed for FP in Arizona, Florida, Massachusetts, and Wisconsin (the "class states")—states in which at least one named plaintiff has demonstrated injury.

From February 27-29, 2012, a hearing was held on Indirect Purchasers' motion for class certification, with both sides offering the testimony of their respective experts, and the three *Daubert* motions lodged against each expert. The parties have since filed post-hearing briefs, particularly focused on whether Indirect Purchasers have demonstrated that common issues predominate over individual issues for purposes of establishing antitrust impact and damages.

III. LEGAL STANDARD

Subsection (a) of Fed. R. Civ. P. 23 lists four prerequisites for any class action: numerosity, commonality, typicality, and adequacy. *Fed. R. Civ. P. 23(a)*. *Subsection (b)* specifies additional requirements for each type of class action. For certification under *subsection (b)(3)*, the movant must also show "that the questions of law or fact common to class members **[**23]** predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. These requirements are called predominance and superiority.

In In re Hydrogen Peroxide, the Third Circuit clarified the standard of review for motions for class certification. The court held that "proper analysis under *Rule 23* requires rigorous consideration of all the evidence and arguments offered by the parties." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 321 (3d Cir. 2008)*. A district court must "consider carefully all relevant evidence and make a definitive determination that the requirements of *Rule 23* have been met before certifying a class." *Id. at 320*. **[*216]** Further, "the court must resolve all factual or legal disputes relevant to class certification, even if they overlap with the merits . . . [and] [f]actual determinations necessary to make Rule 23 findings must be made by a preponderance of the evidence." *Id. at 307, 320*. Finally, "[w]eighing conflicting expert testimony at the certification stage is not only permissible; it may be integral to the rigorous **[**24]** analysis Rule 23 demands." *Id. at 323*. "[A] district court may find it unnecessary to consider certain expert opinion with respect to a certification requirement, but it may not decline to resolve a genuine legal or factual dispute" relevant to class certification. *Id. at 324*.

IV. Discussion

The following are certified as a class pursuant to *Federal Rule of Civil Procedure 23* for the class period of August 2004 through March 2009:

A. With respect to the monopolization and UDTP claims

(1) *For the Class Period from August 2004 through March 2006* All persons or entities throughout the United States and its territories who from August 2004 through March 2006 purchased, paid for, and/or reimbursed for branded Flonase in any of the following four states—Arizona, Florida, Massachusetts, or Wisconsin. These persons or entities must have also purchased, paid for, and/or reimbursed for an AB-rated generic fluticasone propionate nasal spray equivalent of branded Flonase ("generic FP") from March 2006 to March 2009 in the same designated state in which the Flonase purchase was made.

(2) *For the Class Period from March 2006 through March 2009* All persons or entities throughout the United States and **[**25]** its territories who from March 2006 to March 2009 purchased, paid for, and/or reimbursed for generic FP in the following states—Arizona, Florida, Massachusetts, or Wisconsin.

B. With respect to the unjust enrichment claims

(1) All persons or entities throughout the United States and its territories who from August 2004 through March 2006 purchased, paid for, and/or reimbursed for branded Flonase in any of the following three states—Arizona, Massachusetts, or Wisconsin. These persons or entities must have also purchased, paid for, and/or reimbursed for generic FP from March 2006 to March 2009 in the same designated state in which the Flonase purchase was made.

C. For purposes of the class definition, the Flonase and/or generic FP drugs must have been intended for consumption by the class members, their families or their members, employees, plan participants, beneficiaries, or insureds.

D. The following are excluded from the class:

(1) GSK and its respective subsidiaries and affiliates;

(2) all governmental entities (except for government funded employee benefit plans);

(3) all persons or entities that purchased FP nasal spray, including Flonase, for purposes of resale or directly from GSK **[**26]** to the extent and solely to the extent of such purpose for resale or as a direct purchase;

(4) insured individuals covered by plans imposing a flat dollar co-pay that was the same dollar amount for generic as for brand name drug purchases;

(5) fully insured health plans, i.e. plans that purchased insurance from another third-party payor covering 100% of the plan's reimbursement obligations to its members; and

(6) insured individuals who purchased only generic FP (never branded Flonase) and whose health plans imposed a flat dollar co-pay applicable to generic drugs.

E. From August 2004 through March 2009 will be referred to as the "Class Period."

[*217] A. *Rule 23(a)* Requirements

I will first consider the *Rule 23(a)* requirements of numerosity, commonality, typicality, and adequacy. These prerequisites must be satisfied to bring any class action.

1. Numerosity

The first prerequisite in *Rule 23(a)* requires that the proposed class be "so numerous that joinder of all members is impracticable." *Fed. R. Civ. P. 23(a)*. Although "no minimum number of plaintiffs is required to maintain a suit as a class action," in general sufficient numerosity exists "if the named plaintiff demonstrates that the potential **[**27]** number of plaintiffs exceeds 40 . . . ." *Stewart v. Abraham, 275 F.3d 220, 226-27 (3d Cir. 2001)*. This requirement is plainly satisfied as Indirect Purchasers seek to certify a class of tens of thousands of consumer class members and hundreds of TPP class members. *See In re Wellbutrin XL Antitrust Litig., No. 08-2433, 282 F.R.D. 126, 2011 U.S. Dist. LEXIS 90697, 2011 WL 3563835, at *7 (E.D. Pa. Aug. 15, 2011)* ("*Wellbutrin XL*"). GSK conceded the numerosity requirement. Accordingly, IPPs have established the numerosity requirement of *Rule 23(a)*.

2. Commonality

The second prerequisite in *Rule 23(a)* requires that "there are questions of law or fact common to the class." *Fed. R. Civ. P. 23(a)(2)*. To establish commonality, plaintiffs must demonstrate that their claims "depend upon a common contention," the resolution of which "will resolve an issue that is central to the validity of each one of the claims in one stroke." *Wal-Mart Stores, Inc. v. Dukes, __ U.S. __, 131 S. Ct. 2541, 2551, 180 L. Ed. 2d 374 (2011)*. "However, where an action is to proceed under *Rule 23(b)(3)*, the commonality requirement is subsumed by the predominance requirement" because "it is far more demanding than the *Rule 23(a)(2)* commonality requirement." *Danvers Motor Co., Inc. v. Ford Motor Co., 543 F.3d 141, 148 (3d Cir. 2008)* **[**28]** (internal quotation marks omitted). It is therefore appropriate to "analyze the two factors together, with particular focus on the predominance requirement." *In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 528 (3d Cir. 2004)*.

Although Indirect Purchasers assert state law claims of monopolization, UDTP, and unjust enrichment, proof of the essential elements of these claims will be common across the class and focused on GSK's behavior, not that of the individual class members. The common issues presented in each of the class members' claims include: (1) whether GSK unlawfully monopolized or attempted to monopolize the market for Flonase; (2) whether GSK unlawfully possessed and/or extended its monopoly power over the Flonase market; (3) whether GSK's actions caused the price of FP to be maintained at supra-competitive levels; (4) whether GSK's citizen petitions were intended to prevent generic entry and/or constitute unlawful conduct; (5) whether the class members suffered antitrust injury; and (6) whether GSK was unjustly enriched to the detriment of the class members. Resolving the allegations surrounding GSK's alleged conduct in delaying generic entry will resolve issues that **[**29]** are "central to the validity of each one of the claims in one stroke." Therefore, I find the commonality requirement satisfied here.

3. Typicality

The third prerequisite in *Rule 23(a)* requires that "the claims or defenses of the representative parties are typical of the claims or defenses of the class." *Fed. R. Civ. P. 23(a)(3)*. "Typicality entails an inquiry whether the named plaintiff's individual circumstances are markedly different or the legal theory upon which the claims are based differs from that upon which the claims of other class members will perforce be based." *Hassine v. Jeffes, 846 F.2d 169, 177 (3d Cir. 1988)* (citations and internal quotation marks omitted). "The typicality requirement is intended to preclude certification of those cases where the legal theories of the named plaintiffs potentially conflict with those of the absentees." *Georgine v. Amchem Prods., Inc., 83 F.3d 610, 631 (3d Cir. 1996)*. "The inquiry assesses whether the named plaintiffs have incentives that align with those of absent class members so that the absentees' interests will be fairly represented." *Id.* "Factual differences will not defeat typicality if the named plaintiffs' **[*218]** claims arise from the **[**30]** same event or course of conduct that gives rise to the claims of the class members and are based on the same legal theory." *Danvers Motor Co., Inc., 543 F.3d at 150* (emphasis omitted).

In this case, Indirect Purchasers allege that the same unlawful conduct injured both the class representatives and the absent class members. IPPs' state law claims for monopolization, UDTP, and unjust enrichment arise from an identical course of conduct—GSK's allegedly monopolistic "brand maturation strategy." GSK implemented this strategy without reference to individual purchasers, and all members of the proposed class seek to recover for the resulting overcharge injury, or unjust enrichment at their expense, based on the same legal theories. *In re Terazosin Hydrochloride Antitrust Litig., 220 F.R.D 672, 688 (S.D. Fla. 2004)* ("[I]f one class representative is able to prove that Defendants' alleged anticompetitive acts caused an overcharge for [the brand drug], or that Defendants were unjustly enriched at Indirect Purchaser Plaintiffs' expense, such proof will likewise prove the case on liability for every other class member."). GSK does not contest the typicality requirement. I find that Indirect Purchasers **[**31]** have satisfied *Rule 23(a)(3)*.

4. Adequacy of Representation

The fourth prerequisite in *Rule 23(a)* requires that "the representative parties will fairly and adequately protect the interests of the class." *Fed. R. Civ. P. 23(a)(4)*. The adequacy determination "depends on two factors: (a) the plaintiff's attorney must be qualified, experienced, and generally able to conduct the proposed litigation, and (b) the plaintiff must not have interests antagonistic to those of the class." *New Directions Treatment Servs. v. City of Reading, 490 F.3d 293, 313 (3d Cir. 2007)*. Indirect Purchasers' lead counsel has presented evidence of its extensive experience in complex antitrust actions, including cases involving delayed entry of generic pharmaceuticals. After reviewing Indirect Purchasers' submissions, I find that the first prong of the adequacy inquiry is satisfied, as Indirect Purchasers' counsel are "qualified, experienced, and generally able to conduct the proposed litigation." *New Directions, 490 F.3d at 313*.

The absence-of-conflict requirement "seeks to uncover conflicts of interest between named parties and the class they seek to represent." *Warfarin, 391 F.3d at 532*. "A class representative must **[**32]** be part of the class and possess the same interest and suffer the same injury as the class members." *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 625-26, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* (internal quotation marks omitted). Adequacy will not be denied simply "because of a potential conflict of interest that may not become actual." *Kohen v. Pac. Inv. Mgmt. Co. LLC, 571 F.3d 672, 680 (7th Cir. 2009)*. GSK has not raised any conflicts with the class. Each class member purchased and/or reimbursed for FP at some point during the Class Period at a supracompetitive price. Each class member holds a strong common interest in establishing GSK's liability for these alleged overcharges.

Because the class suffers from no conflicts and is represented by qualified counsel, I conclude that the class meets both prongs of the adequacy requirement of *Rule 23(a)(4)*.

B. *Rule 23(b)* Requirements

Once the *Rule 23(a)* requirements are met, other requirements under *Rule 23(b)* must be satisfied based on the type of class action. Indirect Purchasers seek certification under section (b)(3), requiring proof of predominance and superiority. Indirect Purchasers must demonstrate "that the questions of law or fact common to class members predominate **[**33]** over any questions affecting only individual members," and "that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*.

1. Predominance

The parties in this matter directed their arguments regarding certification almost exclusively to the question of predominance. Predominance "'tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation.'" **[*219]** *In re Ins. Broker Antitrust Litig., 579 F.3d 241, 266 (3d Cir. 2009)* (quoting *Amchem, 521 U.S at 623*). "Issues common to the class must predominate over individual issues." *Hydrogen Peroxide, 552 F.3d at 311*. "Individual questions need not be absent . . . . [*Rule 23(b)(3)*] requires only that those questions not predominate over the common questions affecting the class as a whole." *Messner v. Northshore Univ. Healthsystem, 669 F.3d 802, 815 (7th Cir. 2011)*. "Because the nature of the evidence that will suffice to resolve a question determines whether the question is common or individual, a district court must formulate some prediction as to how specific issues will play out in order to determine whether common or individual issues **[**34]** predominate in a given case." *Hydrogen Peroxide, 552 F.3d at 311* (internal quotation marks and citation omitted). "If proof of the essential elements of the cause of action requires individual treatment, then class certification is unsuitable." *Id.* (citing *Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 172 (3d Cir. 2001))*.

The predominance inquiry "begins, of course, with the elements of the underlying cause of action." *John Fund, Inc. v. Halliburton Co., U.S. , 131 S.Ct. 2179, 2184, 180 L.Ed.2d 24 (2011)*. Importantly, the parties agree that the essential elements of Indirect Purchasers' remaining state monopolization and UDTP claims are the same, paralleling their federal counterparts, the Sherman Act and the Federal Trade Commission Act. *See App. A.* (outlining the elements of the monopolization and UDTP state statutes). To satisfy *Rule 23(b)(3)*, Indirect Purchasers must show that common evidence can establish: (1) liability on each of their claims; (2) injury-in-fact, and (3) measurable damages. I will address each of these elements in turn.

a. Common Proof on Liability

Indirect Purchasers have successfully plead, and survived summary judgment on, the following **[**35]** state law claims: (1) monopolization under the laws of Arizona and Wisconsin, (2) unfair and deceptive trade practices under the laws of Florida and Massachusetts, and (3) unjust enrichment under the laws of Arizona, Massachusetts, and Wisconsin. To prove liability on each of these state law claims, each class member will rely on the same evidence focused on GSK's allegedly anticompetitive conduct aimed at preventing a generic version of Flonase from entering the market. The issues relevant to proving liability—relevant market, monopoly power, exclusionary conduct, and causation—can be proven through class-wide, common evidence because these issues focus on GSK's conduct, not on the actions of the individual class members. *See Warfarin, 391 F.3d at 528* (explaining that liability for anticompetitive conduct centers on the defendants' conduct, not the actions of individual class members). Although Indirect Purchasers also assert three state unjust enrichment claims, they will utilize the same operative evidence to establish GSK's liability for these claims, as with their monopolization and UDTP claims. *See Sullivan v. DB Investments, Inc., 667 F.3d 273, 301 (3d Cir. 2011)* (emphasizing **[**36]** that any minor variations between state laws will not defeat class certification "as long as a sufficient constellation of common issues binds class members together"); *Terazosin, 220 F.R.D. at 697-98* (certifying a class of indirect purchasers in part because "the same common operative facts that form the basis for each of the state classes' antitrust claims form the basis for the unjust enrichment claims"). [11] GSK admitted that, with regard **[*220]** to proving liability, the evidence would be the

[11] I recognize that the elements of the remaining state unjust enrichment claims are not exactly the same as those of the monopolization and UDTP state statutes. In general, to state a claim for unjust enrichment, a plaintiff must show that the defendant received a benefit from the plaintiff, that the defendant accepted and retained the benefit conferred, and that it would be inequitable for the defendant to retain that benefit without paying. *See Powers v. Lycoming Engines, 245 F.R.D. 226, 231 (E.D. Pa. 2007)*; *Undoing the Otherwise* ***[**37]*** *Perfect Crime—Applying Unjust Enrichment to Consumer Price-Fixing Claims*, Daniel R. Karon, *108 W. Va. L. Rev. 395, 409 (2005)*. Indirect Purchasers have successfully plead, and survived summary judgment on, unjust enrichment claims under the laws of Arizona, Massachusetts, and Wisconsin. While there are minor variations amongst these claims, *see App. A*, I do not find, nor does GSK assert, that the variation among the remaining state unjust enrichment laws is material to this decision on certification.

To prove their unjust enrichment claims, all class members will rely on common evidence focused on whether: (1) GSK's conduct delayed generic competition; (2) the delay of generic entry enriched GSK as a result of overcharges and monopoly profits in the Flonase market from August 2004 to March 2006; (3) this additional enrichment came at the expense of the class; and (4) whether, as a matter of equity, the retention of this benefit would be unjust. "As is the nature of unjust enrichment claims, this common evidence will focus on the defendant's gain and not on the plaintiff's loss." *Terazosin, 220 F.R.D. at 698*.

same for each of Indirect Purchasers' state law claims. Therefore, I find that common issues of fact and law will predominate on this element of Indirect Purchasers' case.

b. Antitrust Impact

Indirect Purchasers next must demonstrate individual injury, i.e. antitrust impact or fact of damage (as opposed to the extent of damage). "In antitrust cases, impact often is critically important for the purpose of evaluating *Rule 23(b)(3)*'s predominance requirement because it is an element of the claim that may call for individual, as opposed to common, proof." *Hydrogen Peroxide, 552 F.3d at 311*. The Third Circuit has explained plaintiff's burden in establishing antitrust impact at the class certification stage:

> Plaintiffs' burden . . . is not to prove the element of antitrust impact, although in order to prevail on the merits each class **[**39]** member must do so. Instead, the task for plaintiffs at class certification is to demonstrate that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual to its members. Deciding this issue calls for the district court's rigorous assessment of the available evidence and the method or methods by which plaintiffs propose to use the evidence to prove impact at trial.

552 F.3d at 311-12.

Indirect Purchasers contend that class members were injured through overcharges for purchases and/or reimbursements of FP during the Class Period, as a result of delayed generic entry into the market. To support their argument on common impact and damages, Indirect Purchasers present expert declarations and testimony from Gordon Rausser, Ph.D., an economics professor at the University of California-Berkeley. [12] Rausser opines that general economic principles and actual market data establish common impact in this case, and that through a "yardstick" methodology—comparing prices in the actual world with prices in a hypothetical "but-world" without GSK's misconduct—he can demonstrate that across all types of end-payors and all distribution **[**40]** channels, injury and damages occurred in this case as a result of GSK's delaying generic entry.

This common evidence is capable of establishing two types of injury in the purchase of FP during the Class Period: (1) "switcher overcharge," from August 2004 through March 2006, that applies to class members who purchased Flonase before generic entry and would have switched to the less expensive generic FP if it had been available; and (2) "generic overcharge," from March 2006 to March 2009, that applies to class members who purchased generic FP at a supracompetitive price because delayed generic entry prevented earlier generic price competition and a lower initial generic price. I will refer to the first group of class members as "switchers" and to the second group of class members as "generic only."

GSK challenges Indirect Purchasers' claim that antitrust impact is capable of proof at **[*221]** trial through evidence that is common to **[**41]** the class rather than individual to each class member. Specifically, GSK raises three arguments: (1) Rausser's methodology, which relies on aggregated data, masks considerable variation in the actual prices paid by class members, the purchasing patterns of class members, and the prescription drug formularies possessed by TPP class members, and therefore cannot determine whether a given class member was in fact

---

The class proceeding under unjust enrichment claims will only be limited to **[**38]** the extent that (1) "generic only" class members (March 2006—March 2009 generic FP purchasers only) and (2) class members who only purchased and/or reimbursed for FP in the state of Florida cannot recover damages based on a theory of unjust enrichment. *See In re Flonase Antitrust Litig., 692 F. Supp. 2d 524, 544 (E.D. Pa. 2010)* (dismissing Indirect Purchasers' unjust enrichment claim under Florida law because Florida requires that a plaintiff confer a direct benefit upon a defendant in order to state a claim for unjust enrichment).

[12] Rausser's opinions can be found in three separate expert declarations (January 2010, May 2010, and October 2010 Declarations), two depositions (March 2010, January 2012), and his testimony at Indirect Purchasers' class certification hearing on February 27-29, 2012.

injured; (2) uninjured class members remain in the class; and (3) complex and individualized inquiries are necessary to prove impact, as well as damages. In rebutting Dr. Rausser, GSK relies on the expert opinions of Dr. Robert Navarro, a trained pharmacist and expert in pharmacy benefit programs, and Dr. Bruce Stangle, an economist. [13]

I will first discuss how Indirect Purchasers have demonstrated that impact to the class is capable of proof through their common evidence. **[**42]** Then I will address how GSK's arguments fail to show that individual inquiries will predominate in determining impact to this class.

(1) Impact to All Class Members

To meet their burden in demonstrating impact to purchasers of generic FP, Indirect Purchasers must show that generic FP prices would have been lower absent GSK's conduct through common evidence. Rausser described how certain general principles demonstrate that impact for generic FP purchasers occurs through basic market mechanisms, and how the actual market data confirms that these market mechanisms were present in this case. First, he explained that by delaying generic entry, GSK can capture an extended exclusivity period for a brand drug like Flonase during which time large numbers of consumers are willing to pay elevated prices because the drug is effective for them and less expensive alternatives are unavailable. In this case, the price per unit of Flonase showed a steady increase from the beginning of the Class Period until just prior to generic entry, moving from around $60/bottle to $70/bottle. When the first generic drug then enters the market, that generic drug is invariably priced at a discount to the brand drug's **[**43]** price at that same time. Upon generic entry in March 2006, both Roxane and GSK introduced generic FP drugs at a price 25% below the price of Flonase. While the initial generic price was lower than the brand price, absent GSK's conduct it would have been even lower because it would have been discounted off the brand price in August 2004, not the higher brand price in March 2006.

Rausser further explained that by delaying generic entry, GSK prevented generic price competition that would have resulted in lower generic FP prices for those class members purchasing generic FP between March 2006 and March 2009 in this case. Specifically, he noted that after its initial discount off the brand price, the generic FP price steadily declined over the first eighteen months after entry with only two generic drugs on the market. Rausser explained that this decline was consistent with extensive historical data and academic studies detailing how generic price declines, while spurred on by new generic drug entries, are not dependent on additional generic drugs entering the market. As more drug manufacturers launch additional generic drugs, competition intensifies and drives the generic price down further. **[**44]** In 2007, when a third generic drug (Apotex) launched, the generic price dropped even further; a fourth generic drug (Hi-Tec) arrived on the market in 2009 initiating yet another generic price decrease.

These basic market principles, confirmed by historical data and actual market data in this case, demonstrate how class members would have paid less for generic FP "but-for" GSK's exclusionary conduct.

To meet their burden in establishing "switcher overcharge," Indirect Purchasers must show through common evidence not only that generic FP prices would have been lower than Flonase prices between August 2004 and March 2006 (the period during **[*222]** which GSK prevented generic entry), but also that those class members who purchased Flonase prior to generic entry would have switched to the generic product if it had been available. Many of the same market mechanisms described above explain the cost differential that existed between brand and generic FP. Upon generic entry, the first generic drug is invariably priced at a significant discount to the brand. Two years after generic entry, as a result of generic drug competition, Rausser stated that the generic price is on average 70% less than the brand **[**45]** price. In this case, although the average price of Flonase decreased after

---

[13] Stangle's opinions can be found in three expert declarations (April 2010, June 2010, February 2012) and one deposition (May 2010). Navarro issued one expert declaration in April 2010 and was deposed in May 2010. Both Stangle and Navarro testified during the class certification hearings on February 27-29, 2012.

generic entry—dropping to approximately the same price as the generic three months after entry—from that point on, the generic price stayed consistently and significantly below the price of Flonase.

For the "switcher" class members that actually purchased and/or reimbursed for generic FP after entry in March 2006, it is reasonable to assume—based on their observed decisions between the brand and generic—that if the generic had been available earlier, they would have purchased and/or reimbursed for it over the higher-priced brand drug. *See* In re Cardizem CD Antitrust Litig., 200 F.R.D. 326, 343 (E.D. Mich. 2001) ("Evidence that class members have purchased a generic [drug] after it became available gives rise to the inference that they would have similarly done so in the 'but-for' world at the 'but-for' price. There is no need for individual analysis of switching behavior as to these putative class members."); *see also* Wellbutrin XL, 2011 U.S. Dist. LEXIS 90697, 2011 WL 3563835, at *14 (making similar finding regarding TPPs that purchased and/or reimbursed for a generic drug after it became available). This inference is further supported **[**46]** by the rapid conversion to generic drugs that occurred in this case. Rausser stated that one month after generic entry in March 2006, Flonase had lost 88% of the total bottle sales of FP at pharmacies. Within the first year following entry, 95% of the FP sales became generic. By the end of the Class Period, Flonase made up only 1% of the FP market, as the generic captured the remaining 99%. The erosion of brand-name Flonase was even faster than GSK had initially expected, and was one of the most rapid Rausser had ever examined.

Such rapid conversion can be explained not only by the purchase price differential between the drugs, but also by state generic substitution laws that make the substitution of generic drugs for prescribed brand drugs either mandatory or within the discretion of a pharmacist. Furthermore, TPPs offer prescription drug formularies, i.e. tiered pricing, with lowers co-pays and coinsurance to encourage insured consumers to purchase a generic equivalent over the brand drug.

This common evidence is capable of demonstrating that the "switchers" would have purchased the generic drug over Flonase prior to March 2006 absent GSK's exclusionary conduct. It further shows the **[**47]** price of generic FP would have been lower than that of Flonase. [14]

---

[14] Indirect Purchasers repeatedly emphasize that this evidence of general economic principles and actual market data is the same evidence that a group of direct purchasers relied on in seeking certification in a related action, alleging injury through overcharges as a result of delayed generic entry into the market. *See* ***American Sales Co., Inc. v. SmithKline Beecham Corp., 274 F.R.D. 127 (E.D. Pa. 2010)***. Because in November 2010 I granted that motion for class certification, Indirect Purchasers claim that their proposed class should be certified. However, this motion for class certification presents certain issues and complexities that were absent in my certification of a direct purchaser class. For one, GSK neither contested that motion nor asserted a *Daubert* challenge against the direct purchaser plaintiffs' two certification experts. More importantly, though, the issues of antitrust impact and damages are different in the context of an indirect purchaser class, largely as a result of the cost and payment structure present in the pharmaceutical industry and the fact that the indirect purchaser class is much larger than **[**48]** thirty member direct purchaser class.

To the extent Indirect Purchasers assert that impact can be proven based solely on GSK's alleged exclusionary conduct, in accordance with the presumption of impact established in Bogosian v. Gulf Oil Co., 561 F.2d 434 (3d Cir. 1977), I do not find such a presumption compatible with the record of this case. *See* In re OSB Antitrust Litig., No. 06-826, 2007 U.S. Dist. LEXIS 56617, 2007 WL 2253425, at *6-7 (E.D. Pa. Aug. 3, 2007) (noting that courts in the Third Circuit apply the *Bogosian* doctrine almost exclusively in direct, not indirect, purchaser actions, and explaining that even in direct purchaser actions "the Third Circuit also requires proof of actual classwide economic injury - a 'belt and suspenders' approach to establishing impact."). In addition, the continued existence of the *Bogosian* presumption appears uncertain within the Third Circuit. *See* Hydrogen Peroxide, 552 F.3d at 326 ("We emphasize that actual, not presumed, conformance with the Rule 23 requirements is essential.").

Regardless, Indirect Purchasers do not rely exclusively on general economic principles and GSK's alleged anticompetitive conduct to demonstrate impact. As discussed *infra*, Rausser utilizes a yardstick **[**49]** methodology and sensitivity analysis, relying on available industry nationwide and state-specific data, to show that impact to these class members is capable of proof through common evidence.

[*223] *(2) Rausser's Yardstick Methodology*

To further demonstrate impact, as well as damages, Rausser proposes to utilize a "yardstick" methodology through which he can compare prices paid for FP in the actual world (i.e. with GSK's alleged misconduct delaying generic entry until March 2006) with the prices paid in a hypothetical "but-for" world (i.e. with generic entry nineteen months earlier in August 2004).

To construct the actual world of FP prices in each class state, Rausser utilized monthly nationwide data on the actual volume and dollar sales of Flonase and generic FP that took place within each distribution channel throughout the Class Period. These distribution channels are pharmacy (or retail), mail order, long-term care, clinics, HMOs, home health care, non-federal hospitals, and miscellaneous. He then computed the average brand and generic price each month within each channel by simply dividing the dollar sales with the volume data.

Rausser subsequently constructed a "but-for world" to estimate **[**50]** how the prices paid for FP would have changed if generic entry had not been delayed. In doing this, he used the market data of what actually occurred in the FP market after generic entry, along with generic economic principles and historical studies in generic pricing and entry. Rausser first assumed that, as in the actual world, GSK's generic product (Par) would have launched simultaneously with Roxane's generic FP drug because historically brand drug companies usually decide to launch their own authorized generic alongside the first non-authorized generic as a means to offset any losses inevitably resulting from generic entry. He conservatively assumed that the launch dates for the third and fourth generic FP drugs—Apotex in October 2007 and Hi-Tech in February 2008—would not be accelerated in the "but-for" world.

Rausser explained that his analysis of the rhinitis drug market revealed no other substantial differences between the markets before and after generic entry that would have caused a material change in the pricing of Flonase or its generic substitutes. The competitive therapies available were substantially the same, consumer demand did not materially change, and reimbursement **[**51]** practices were essentially the same.

To construct the "but for" price of Flonase and generic FP across the Class Period, Rausser used the price changes, discounts and conversion rates observed in the actual market data after March 2006 as a yardstick for estimating what the effect of generic entry would have been in 2004. Rausser explained that he set the initial "but-for" generic price at 25% below the Flonase price in August 2004; this discount is consistent with industry practice and with the initial price discount set in this case. Rausser then used price data observed in the available industry market data to map out the generic prices in the "but-for" world. Generic prices eventually leveled out in the actual world in March 2009 at $20, and Rausser used this same price in his "but for" world as a benchmark for the end of the Class Period

From this yardstick analysis, Rausser showed that the "but-for" generic prices would have been lower than the actual generic FP prices between March 2006 and March 2009, as well as the actual Flonase prices between August 2004 and March 2006.

However, within the prescription drug market, Rausser noted that two characteristics might be thought to **[**52]** distinguish the price experience of one class member from another: (1) type of end-payor, i.e. uninsured consumer, insured consumer, or TPP; and (2) sales channel (i.e., retail/pharmacy, mail order) through which the class member paid and/or reimbursed for FP. Rausser contends **[*224]** that available market data enables him to examine each of these distinctions and conclude that there is no significant group of class members who were not impacted as a result of GSK's conduct.

To test the robustness of his methodology considering these distinctions, Rausser conducted a sensitivity analysis. First, he analyzed the uninsured consumers' prices across each sales channel and for each generic manufacturer (Roxane, Par, Apotex, Hi-Tech). Rausser concluded that his average was robust for this group of consumers—of course, uninsured consumers capture the entire price difference between Flonase and generic FP across all sales channels.

Next, Rausser analyzed the insured consumers, whose cost burden for an FP purchase derives from the contractual arrangement with their TPP. As a result of this contractual arrangement, an insured consumer may pay a percentage of a drug's purchase price (coinsurance), a flat **[**53]** dollar amount of the purchase price (co-pay), or the full purchase price (if they have not met their deductible or have exceeded their annual benefit maximum). The payment amount can also vary between brand and generic drug purchases, as set by a TPP's formulary or tiers. For example, a three tier formulary could include generic, preferred brand, non-preferred brand tiers, each with different co-pay or coinsurance amounts. Generally, Rausser noted, co-pay and coinsurance rates are lower for generic drugs than for brand drugs, as TPPs often place brand drugs on a less favorable formulary status than generic drugs.

In testing the impact of plan provisions in each class state, Rausser separated out insured consumer cost-sharing by state by using data on the net consumer contribution for commercial and Medicare third-party payer plans. This data showed that, in each of the four class states, insured consumers contributed more money per claim for brand purchases prior to generic entry than for generic purchases. In each class state, the difference was greater than eight dollars per claim. Moreover, because this data revealed net consumer contributions, it took into account all the complexities **[**54]** of a plan's provisions, i.e. co-pay, coinsurance, deductible. Rausser noted that his analysis of insured consumer contributions excluded two groups of consumers whose plan provisions do not allow for injury—specifically, insured consumers with the same flat dollar co-pay for brand and generic drug purchases ("one-tier plans"), and insured consumers with a flat dollar co-pay for generic drug purchases and who only purchased generic FP, not Flonase, during the Class Period. [15]

Finally, Rausser analyzed the robustness of his yardstick methodology for TPPs, whose **[**55]** net cost for FP purchases during the Class Period is determined by subtracting the applicable consumer contribution (i.e. co-pay, coinsurance) and drug manufacturer rebates from the gross drug cost. [16] As the literature and actual market data indicated, generic entry has the following effect on each of these three variables: lowers the gross FP price, lowers the co-pay/coinsurance rate, and reduces the number of manufacturer rebates. Therefore, Rausser explained, the effect of generic entry on the net cost to TPPs depends on whether the decline in gross FP drug price exceeds the reductions in co-pays, coinsurance, and manufacturer rebates.

[*225] Rausser tested whether TPPs still suffer injury when extreme values are used for the reduction in co-pay/coinsurance rates and manufacturer rebate rates. For example, the average difference in the co-pay/coinsurance amount between brand and generic drugs averaged $15. Rausser analyzed whether impact still occurred for a TPP if that differential was actually $40. The average rebate price reduction for Flonase after generic entry was 12%. Rausser examined whether TPPs were still injured if the rebates offered were 50% of the gross drug price. Even using these extreme values, Rausser stated that TPPs still suffer monetary loss during the Class Period as a result of GSK's conduct. [17]

---

[15] In a similar delayed generic entry case, the presence of these consumers in a proposed class of consumers and TPPs was a critical reason behind the court's denial of class certification. *See* Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, No. 04-5898, 2010 U.S. Dist. LEXIS 105646, 2010 WL 3855552, at *26 (E.D. Pa. Sept. 30, 2010). At the early stages of this litigation, Indirect Purchasers' proposed class included these consumers. Stangle and Navarro pointed out the existence of these uninjured parties in their initial expert declarations. Indirect Purchasers subsequently amended their class definition to exclude these consumers.

[16] Rausser explained that rebates are offered by manufacturers of branded drugs to create incentives for moving volume. Rebates, of course, offset the net cost of a brand drug; therefore, they only make sense economically if the revenue decrease GSK experiences is more than outweighed by the volume increase that they are able to capture as a result. Because generic entry triggers a steady decrease in brand drug volume, drug manufacturers typically reduce the number of rebates offered after generic entry. This case was no different, as Rausser reviewed **[**56]** internal GSK data demonstrating such a reduction in rebates after generic entry.

[17] It must be noted that Rausser's analysis of TPPs does not include fully-insured TPPs, which have been excluded from the class because they do not bear the cost burden for an FP purchase. At the early stages of this litigation, Indirect Purchasers' proposed class included these TPPs—one named plaintiff, in fact, was a fully-insured TPP. Again, Stangle and Navarro

Additionally, Rausser examined the actual transaction data from the named Plaintiff TPPs. Utilizing his yardstick methodology, Rausser demonstrated that each of the TPPs suffered at least some injury in each of the class states in which it purchased and/or reimbursed for Flonase or generic FP.

Through this common evidence and Rausser's methodology, Indirect Purchasers have demonstrated that they can establish impact to this class of consumers and TPPs through class-wide evidence. GSK raises several objections to Rausser's methodology and Indirect Purchasers' assertions, which are addressed below.

(3) GSK's Objections: Aggregated Data and its Effect on TPP Cost-Sharing Provisions

GSK attacks the reliability of Dr. Rausser's methodology for its use of aggregated data sources, which this section addresses, that allegedly mask the presence of injury and exaggerate the extent of damages for the class. According to GSK, this aggregated data, particularly concerning pricing and distribution of purchases, fails to represent **[**58]** the actual FP prices paid by class members in the class states or the actual distribution of purchases reimbursed by TPP class members in the class states. As a result, GSK argues that Rausser's methodology cannot adequately assess injury or measure damages for TPPs at the state level.

In addressing the argument regarding the use of aggregated data and its effect on TPP cost-sharing provisions, GSK relies on the expert opinions and declarations of Dr. Robert Navarro, a trained pharmacist and expert in pharmacy benefit programs, and Dr. Bruce Stangle, an economist. Dr. Navarro explained that TPPs and prescription benefit managers ("PBMs") offer widely variable prescription drug programs. Several commonly used mechanisms and incentives can influence the amount of cost-sharing and price for any given prescription drug transaction. Navarro outlined each of these, including patient copayment/coinsurance, deductibles, benefit caps, drug formularies, participating pharmacy networks, and use of mail service. Each of these provisions is highly varied among the named Plaintiff TPPs, and, Navarro opined, this variation is consistent with that seen among TPPs across the country. Furthermore, Navarro **[**59]** explained that each of these plan features can alter the cost burden imposed on insured consumers and TPPs.

As a result of this variation in the structure of prescription drug benefit programs, Stangle opined that it was impossible for Rausser's class-wide methodology to assess fact of injury. He explained that the various plan provisions detailed by Navarro (i.e. co-pays, deductibles, benefit maximums) must be considered in the impact analysis. Stangle opined that only through an analysis of individual transactions, considering each TPP's provisions, could impact be established.

Rausser's sensitivity analysis, though, tested his methodology against each of these various plan provisions. Using state-specific data, Rausser showed that even considering **[*226]** all the various plan provisions that determine an insured consumer's cost burden for an individual FP purchase, insured consumers' net contribution per claim would have been much lower in each class state absent GSK's conduct. GSK ignores the fact that this data takes into account more than simply co-pays and coinsurance. By looking at the net contribution per claim, this data factors in all the plan provisions—including deductibles—that **[**60]** Stangle and Navarro highlighted as factors that could alter the price experience for consumers and undermine Rausser's analysis. [18]

Rausser additionally analyzed whether extreme drug formularies—in particular, a co-pay/coinsurance differential of $40 between brand and generic drugs, as opposed to the average $15 differential—could alter impact to TPPs in this case. [19] He concluded that TPPs still suffered impact. He also examined whether impact would still occur for

---

explained the presence and uninjured nature of these TPPs in their **[**57]** initial declarations. Indirect Purchasers subsequently amended their class definition to exclude these TPPs. All of the remaining named plaintiff TPPs are self-insured plans.

[18] Moreover, some of these plan provisions, though present in a particular TPP prescription drug program, are unlikely to effect this analysis because they are rarely triggered. For instance, Stangle admitted that it is unlikely that benefit maximums will ever affect an individual plan member. Named plaintiff Painters utilizes a participating pharmacy network, requiring its plan members to absorb more of a drug's cost if purchased outside that network. In reviewing all of Painters' actual claims data, Rausser noted that no prescriptions were filled in non-participating pharmacies during the Class Period.

TPPs if GSK offered extreme rebates (50% off the gross Flonase price as opposed to the average 12%), contrary to pharmaceutical **[**61]** industry practice. Again he found that his methodology did not mask injury, as the TPPs continued to be impacted.

In response, GSK grasps onto the possibility that certain TPPs might be uninjured—even benefitted—by delayed generic entry if they only reimbursed for a few FP purchases. Specifically, GSK points to the following testimony by Rausser: "[I]n the early part of the 'but for' period, because the [TPP] is losing the rebates and there is a more favorable co-pay for generics in the early part of the damage period . . . it takes a while before the [TPPs] catch up with what . . . they have foregone . . . in the first part of the period." (2/28 AM H'rg Tr. 31-32). Rausser noted that if a TPP only had a couple transactions in the first nineteen months of the Class Period you could not show injury for them. GSK asserts that many TPPs **[**62]** could potentially exhibit this same reimbursement pattern because many class member TPPs, like the named plaintiff TPPs, may be from outside the class states and may have made only a few reimbursements for FP purchases during the Class Period. Stangle emphasized that Rausser's methodology could not account for these TPPs because he applied an average distribution of purchases/reimbursements for TPPs across the Class Period.

It is apparent that underlying GSK's contention is its belief that the Third Circuit's decision in *Hydrogen Peroxide* requires Indirect Purchasers to demonstrate, by a preponderance of the evidence, that impact can be established for *every* class member through common proof. GSK cites to a statement, however, that concerns plaintiffs' burden at the *merits* stage of the litigation—"individual injury (also known as antitrust impact) is an element of the cause of action; to prevail on the merits, every class member must prove at least some antitrust impact resulting from the alleged violation." *Hydrogen Peroxide, 552 F.3d at 311*; *see In re Neurontin Antitrust Litig., No. 02-md-1390, 2011 U.S. Dist. LEXIS 7453, 2011 WL 286118, at *8 n.23 (D.N.J. Jan. 25, 2011)* (considering a similar argument by defendants **[**63]** and noting that this passage relates to plaintiffs' burden at the merits stage of the litigation).

The Seventh Circuit has explained this distinction regarding uninjured class members in the following manner:

> [A] class will often include persons who have not been injured by the defendant's conduct . . . . Such a possibility or indeed inevitability does not preclude class certification, despite statements in some cases that it must be reasonably clear at the **[*227]** outset that all class members were injured by the defendant's conduct. Those cases focus on the class definition; if the definition is so broad that it sweeps within it persons who could not have been injured by the defendant's conduct, it is too broad.

Kohen v. Pacific Inv. Management Co. LLC, 571 F.3d 672, 677 (7th Cir. 2009) (citations omitted). I agree with the analysis in *Kohen* and with other courts that "have routinely observed that the inability to show injury as to a few does not defeat class certification where the plaintiffs can show widespread injury to the class." *In re Cardizem CD Antitrust Litig., 200 F.R.D. 297, 320-21 (E.D. Mich. 2001)* (citing *In re NASDAQ Market-Makers Antitrust Litig., 169 F.R.D. 493, 523 (S.D.N.Y. 1996))*; **[**64]** *see also Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. 293, 309-310 (D.D.C. 2007)* (same); *In re K-Dur Antitrust Litig., No. 01-1652, 2008 U.S. Dist. LEXIS 118396, 2008 WL 2699390, at *18 (D.N.J. April 14, 2008)* (same).

GSK's speculative concern does not undermine the ability of Rausser's methodology and the available common evidence to demonstrate widespread injury to the class. For one, Rausser has shown that all named plaintiff TPPs—who fit a similar profile, i.e. out-of-state TPP with a select number of FP reimbursements—suffered injury as a result of GSK's alleged misconduct. Additionally, by removing from the class all TPPs and consumers that only purchased and/or reimbursed for Flonase, never generic FP, during the Class Period, *see infra*, this concern largely disappears. Therefore, I am satisfied that the class definition is not so overly broad as to defeat certification.

GSK also asserted that Rausser's methodology was flawed because its use of aggregated data masked varied pricing at the end-payor level in each of the class states. With regard to pricing, Stangle criticized Rausser's use of

---

[19] Stangle challenged the sufficiency of Rausser's sensitivity analysis by claiming that it only accounted for a two-tier drug formulary. However, Rausser explained that by using such an extreme value ($40 differential in consumer contribution between brand and generic drugs), his sensitivity analysis encompassed more than a two-tier prescription drug plan.

a national average price for both the actual and "but-for" FP prices. Stangle labeled these national **[**65]** average prices as "synthetic prices"—computations derived from national data on FP volume and sales dollars—that mask the actual transaction prices paid by class members in the class states. [20]

Stangle spent significant time comparing the actual state price data of named plaintiff TPPs with Rausser's national average generic price, both in the actual and "but-for" worlds. However, Stangle only offered one concrete example of Rausser's national average generic price masking injury—named plaintiff AFL. Stangle looked at the actual transaction prices for AFL in Florida for generic FP after generic entry in March 2006 to construct his own "but for" generic price lines for assessing impact to AFL. Based on this analysis, he concluded that AFL actually benefitted from the alleged delay of generic entry in the state of Florida. Yet, **[**66]** as Rausser explained, Stangle's analysis was lacking in two critical respects: (1) Stangle failed to consider that earlier generic entry in August 2004 would typically mean a lower initial generic price, because the generic price in August 2004 would be discounted off the Flonase price at that same time, not the higher Flonase price in March 2006; and (2) Stangle failed to account for the full price decline that occurred over the first nineteen months after generic entry. [21] Instead, he averaged the generic prices that occurred for the first year after generic entry and applied that same average price across the first nineteen months of the "but-for" world. By making these two corrections, Rausser showed that AFL suffered injury in Florida during the Class Period. [22]

[*228] Stangle also compared Rausser's national average generic price to the prices actually paid for the FP generic in ten states, based on data from the named plaintiff TPPs. [23] Although Stangle demonstrated that the prices exhibited some level of variation around Rausser's national average generic FP price, GSK fails to explain how any price variation that may exist for FP purchases is masking injury, i.e. that class members would have actually paid and/or reimbursed more for FP absent GSK's conduct. In fact, in analyzing the state-specific **[**68]** prices paid by AFL and IBEW during specific time increments, Rausser demonstrated that the price variation across the states was less than 1%. Much of the price variation is merely a reflection of the changes in brand and generic prices over time. [24] And because Rausser computed average prices for each month—he did not compute average prices over time—his analysis factored in price variation across the Class Period.

Rausser also testified that although he lacked state-specific FP pricing data, he did consider what differential between state prices and national prices would need to exist for his national average to mask injury. He explained

---

[20] Rausser does not argue with the notion that he uses an average price. As he explained: "It's a price that's used throughout the pharmaceutical industry. I look at the total dollars, I look at the extended units, and I've got a price for which those extended units moved through the market. It is an average price, there is no question about that." (H'rg Tr. 33.)

[21] Rausser pointed out a third mistake in Stangle's analysis: the inclusion of a transaction that fell outside the Class Period. While correcting for this mistake also changed the calculation such that AFL was injured in Florida, this mistake/correction does not carry the same weight as the other two corrections noted above in attempting to ascertain whether Rausser's methodology is capable of establishing impact to this **[**67]** class.

[22] GSK and Stangle repeatedly note the significant variation between the actual generic prices paid in a given state and Rausser's "but-for" generic price. For example, they noted that although Rausser's "but-for" generic price never exceeds $50/bottle, named plaintiff Painters reimbursed for generic FP purchases in 2006 at prices as high as $63.97/bottle. Therefore, GSK appears to argue that the "but-for" prices in 2004 should match up more closely with the actual prices paid in the class states in 2006. However, this contention again fails to recognize that earlier generic entry in 2004 would allow for a lower generic entry price than in 2006.

[23] The ten states are Alabama, Arizona, Florida, Illinois, Indiana, Kentucky, Mississippi, New Mexico, Tennessee, and Wisconsin.

[24] The rest of the price variation, as Rausser explained, existed because Stangle included prices from the mail-order distribution channel, all of which were found in named plaintiff Painters' internal data. Rausser demonstrated that these prices also exhibited little price variation. Furthermore, although the prices in the mail-order channel do not exactly parallel those seen in the retail channel, Rausser analyzed each of the distribution channels for FP and found that consumers of FP were injured by GSK's exclusionary conduct. Unlike Rausser's average brand price for Flonase after generic entry, discussed *infra*, I do not find that Rausser's average **[**69]** generic price is masking the absence of injury for class members purchasing FP in certain distribution channels.

that prices would have to move outside the realm of the data outliers to reach a point where there was no injury. Furthermore, as noted above, Rausser conducted a sensitivity analysis, using state-specific data, to test whether his national average price masked injury for TPPs or insured consumers.

Courts, under certain circumstances, have found averaged data to be unreliable on the question of common impact and class-wide damages. *See* *Reed v. Advocate Health Care, 268 F.R.D. 573, 591 (N.D. Ill. 2009)* (explaining that "averaging by definition glides over what may be important differences") (internal quotation marks and citation omitted); *In re Graphics Processing Units Antitrust Litig. 253 F.R.D. 478, 502 (N.D. Cal. 2008)* (same). [25] Regarding the use of averages in econometric analyses, the American Bar Association has noted:

> Sometimes the prices used **[**70]** by economists are averages of a number of different prices charged to different customers or for somewhat different products. Using such averages can lead to serious analytical problems. For example, averages can hide substantial variation across individual cases, which may be key to determining whether there is common impact. In addition, average prices may combine the prices of different package sizes of the same product or of somewhat different **[*229]** products. When this happens, the average price paid by a customer can change when the mix of products that the customer buys changes-even if the price of the single product changed.

ABA Section of ***Antitrust Law***, *Econometrics: Legal, Practical, and Technical Issues* 220 (2005). It is critical to note that this case does not involve several different products or different markets of supply and demand. The allegations in this case involve two bioequivalent substitutable drugs with a supply and demand market that exhibited no significant changes during the relevant time periods. Within this homogenous market, Rausser has demonstrated through common evidence that between March 2006 and March 2009, after generic FP became available, the actual price **[**71]** for generic FP was higher than the corresponding generic FP price would have been in the "but-for" world, and that between August 2004 and March 2006, the "but-for" generic FP prices would have been lower than the actual Flonase prices.

I recognize, though, that certain **[**72]** variables—in particular co-pay/coinsurance and deductibles—can alter the FP price experience for a given class member, such that an average price differential by itself may not answer the question of impact for the class members under all circumstances. *See* *Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, No. 04-5898, 2010 U.S. Dist. LEXIS 105646, 2010 WL 3855552 (E.D. Pa. Sept. 30, 2010)* (*"Wellbutrin SR"*) ("Just because an average price was increased or decreased by the alleged foreclosure does not mean that all members of the proposed class paid supracompetitive prices or that any damage for an individual end-payor or that any damage for an individual end-payor could be calculated in any formulaic way by common proof."). But as I have already thoroughly discussed above, Rausser did much more than simply compare a monthly average FP price in the actual and "but-for" worlds to demonstrate common impact. He conducted a sensitivity analysis to test whether his methodology was robust in assessing impact for all three types of class members. He also showed that each named plaintiff TPP was injured during the Class Period, applying the available common data and his yardstick methodology. **[**73]** I am satisfied that the data variation in this case is not so extreme as to mask the absence of injury for a significant number of class members. [26]

---

[25] GSK cites to *Reed*, in particular, where plaintiffs relied on Rausser's expert testimony, and the court did not find that he had applied his econometric principles and methods reliably to the particular facts of that case. Yet this case and *Reed* are simply inapposite. *Reed* involved allegations of wage-suppression by a class of hospital-based registered nurses. The court noted that numerous factors could affect the wages of an individual nurse—age, nurse performance and merit, sign-on or retention bonuses, and non-wage compensation (i.e. employee benefits, overtime). Defendants presented evidence that, because of these various factors, the wages paid varied greatly and, more importantly, certain nurses actually received pay increases during the class period. Although Dr. Rausser's methodology failed to control for all the relevant factors in *Reed*, I find Rausser's methodology to be sufficient for the facts of this case.

[26] In *Weiss v. AstraZeneca*, No. BC323107 (Ca. Sup. Ct. 2008), Rausser criticized the usefulness of similar aggregated data from third-party vendors to establish impact and class-wide damages to a class of uninsured consumers, insured consumers, and third-party payors. Much of the testimony, admittedly, appears contradictory to that set forth by Rausser in the instant case. Rausser explained that *Weiss* required a different analysis because the class was alleging that a drug manufacturer issued

Finally, GSK contests whether Indirect Purchasers must show that **[**74]** the overcharges for FP had been "passed through" to the indirect purchaser class, as opposed to merely demonstrating that the actual FP prices paid by the class were greater than the prices it would have paid but-for GSK's delaying generic entry. Rausser testified that in a case alleging foreclosed competition like this one, conducting a formal pass-through analysis to trace the economic damages throughout the distribution chain was unnecessary. Rather, he explained that by comparing the actual and "but-for" FP prices as he did in his yardstick methodology, he could observe the clear price differential in the actual and "but-for" worlds that shows impact. He further stated that unlike a price-fixing case, where an end-payor can mitigate or even avoid the prices increases through various measures, in a foreclosed competition case, impact can be measured in terms of what product the end-payor was actually forced to buy because of the delayed entry, versus what product(s) they would have purchased, absent the forestalling of competition. I agree that in the instant case Indirect Purchasers need not conduct a formal **[*230]** pass-through analysis, and that Rausser's methodology is sufficient. *See* ***[**75]*** *In re Cardizem CD Antitrust Litig., 200 F.R.D. 326, 344 (E.D. Mich. 2001)* ("[A]n indirect purchaser must estimate only the 'but-for' price that it should have paid, which is a far less exacting exercise than apportioning the overcharge throughout the entire chain of distribution") (quoting Roger D. Blair & Jeffrey L. Harrison, *Reexamining the Role of Illinois Brick in Modern Antitrust Analysis*, *68 Geo. Wash. L. Rev. 1, 29 (1999)*); *see also* *Wellbutrin XL, 2011 U.S. Dist. LEXIS 90697, 2011 WL 3563835, at *15* (finding pass-through unnecessary to establish antitrust impact).

I find that Indirect Purchasers have shown that impact is capable of proof at trial through evidence that is common to the class rather than individual to its members for "generic only" and "switcher" overcharges.

(4) Proposed Class Members That Never Purchased Generic FP

Indirect Purchasers proposed class included certain types of consumers and TPPs that either were not impacted by GSK's conduct, or will be unable to show impact through the class-wide evidence presented. These include the following class members: (1) uninsured consumers who purchased Flonase after generic entry; (2) all consumers who purchased Flonase prior to generic entry and **[**76]** did not purchase Flonase or generic FP after entry; and (3) TPPs that only purchased and/or reimbursed for Flonase, never generic FP, during the Class Period. Each of these class members possesses a common attribute—they never purchased and/or reimbursed for generic FP during the Class Period. For the reasons detailed below, I am unwilling to certify these class members.

(i) Uninsured Consumers Who Purchased Flonase After Generic Entry

Consumers purchasing Flonase after generic entry are known as "brand loyalists." Indirect Purchasers' proposed class excludes "brand loyal consumers," defined as insured consumers who purchased only the branded version of Flonase after generic entry. GSK pointed out that this exclusion failed to include uninsured consumers who purchased only the branded version of Flonase after generic entry, i.e. uninsured "brand loyal consumers."

The only plausible theory by which "brand loyalists" can show damage in a delayed generic entry case is "branded overcharge"—paying supracompetitive prices for Flonase because earlier generic entry would have lowered Flonase prices. Stangle declared that according to Dr. Rausser's own data, brand prices actually increased in **[**77]** some distribution channels—in particular, the retail/pharmacy channel—after generic entry, even though Rausser's national average brand price exhibited a decrease in brand prices after generic entry. The limited data from Indirect Purchaser TPPs—showing only twenty purchases of Flonase after generic entry—further confirmed this trend as the large majority of those purchases were at a price equal to or greater than the price of Flonase just prior to generic entry. Rausser admitted that Flonase prices within the retail channel stayed high and increased slightly over the course of the damage period. Rausser further admitted that such uninsured consumers would not

misleading advertisements concerning the effectiveness of one drug compared to another drug with a chemically different makeup, different dosage requirements, and a relatively similar price. On the other hand, this case concerns allegations of foreclosed generic competition, involving two bioequivalent substitutable drugs with vastly different prices. I am satisfied that the market dynamics of the two cases are sufficiently different so as not to undermine Rausser's testimony in this case.

have been injured as a result of GSK's conduct. He also acknowledged that Flonase prices may have risen in at least one other channel during certain periods after generic entry.

In this particular instance, therefore, Rausser's national average Flonase price after generic entry does mask price increases, and in turn fact of injury, across certain distribution channels for uninsured consumers. Because his methodology is not reliable in establishing injury for uninsured consumers that purchased Flonase after generic entry, I excluded **[**78]** these members from Indirect Purchasers' proposed class.

(ii) Consumers Who Purchased Flonase Before Generic Entry and Made No Brand or Generic Purchases After Generic Entry

A select number of consumers who purchased Flonase before generic entry made no drug purchases, either brand or generic, after generic entry. For these consumers, there were no observed transactions in which they chose between the brand and the generic **[*231]** drug. [27] Indirect Purchasers argue that nearly all of these consumers would have switched to generic FP if generic entry had occurred in August 2004. GSK contends that, without resorting to individualized proof of a consumer's personal medical-decisionmaking, Indirect Purchasers cannot establish which class members would have switched to generic FP and which class members would have continued purchasing Flonase.

To demonstrate that these consumers would have converted to generic FP in the "but-for" world, Rausser **[**79]** points out that 91% of FP volume switched from brand to generic after generic entry. He also noted that each of the four class states have generic substitution laws that facilitate conversion to the generic drug, either by mandate or at a pharmacist's discretion. Finally, given the cost difference between the generic and brand drugs, whether in co-pay/coinsurance rates for insured consumers or full purchase price for uninsured consumers, general economic principles hold that in choosing between equivalent products, consumers will choose the less-expensive one.

This common evidence, however, is cannot establish which of these consumers would have switched to the generic. Indirect Purchasers attempt to transpose a volume statistic—generic conversion rate of FP prescriptions—on a group of entirely different customers, who did not exhibit a preference for the generic during the Class Period. Rausser acknowledged that this data only concerned volume conversion and failed to display the number of individuals who switched to the generic.

Regardless of what other features might exist to encourage generic conversion, I do not find that injury is capable of being established for these individual **[**80]** through evidence common to the class. An individual consumer might continue to purchase Flonase for various reasons, i.e. the nature of her health insurance coverage, a perceived difference in the relative quality between Flonase and generic FP, or some other personal reason. Only through knowledge of an individual consumer's personal medical decision-making can this determination be made. For these reasons, I have excluded these consumers from the class.

(iii) TPPs That Never Purchased and/or Reimbursed for Generic FP

GSK has repeatedly stressed that, based on the difficulties noted above with regard to consumers that only purchased Flonase, Indirect Purchasers have failed to meet their burden to show that impact is capable of proof through common evidence for TPPs that only paid and/or reimbursed for Flonase during the Class Period. [28]

---

[27] Both Stangle and Rausser agreed that approximately 21.5% of insured consumers fit this purchasing pattern. Neither expert offered an estimate as to how many uninsured consumers only purchased Flonase before generic entry and made no purchases after generic entry.

[28] Navarro and Stangle noted that it is quite possible that TPPs may have only reimbursed for Flonase purchases during the Class Period; for example, a TPP may have shut down in the period between May 2004 and May 2006, or it may only have a

Indirect Purchasers, meanwhile, have continually ignored any explanation as to why TPPs that never paid for and/or reimbursed for generic FP remain in the class. Asked about a TPP's burden regarding brand loyal consumers, Rausser stated that a TPP is going to end up paying exactly what it paid in both the actual and "but-for" world in reimbursing for **[**81]** those insured consumers' purchases. He explained that the injury for a TPP derives from the cumulative effect on the TPP across all its reimbursed transactions—in other words, transactions that produce "switcher" or "generic only" overcharges in the "but-for" world.

For a TPP that only paid and/or reimbursed for Flonase during the Class Period, this argument rests on the underlying assumption that in the "but-for" world, at least some of the TPP's reimbursements would be for purchases of the generic product. Whether a TPP would have continued to reimburse for Flonase, or would have switched to make some reimbursements for generic FP, turns on the personal medical **[*232]** decision-making of its plan members, who decide to make the purchases underlying those reimbursements. Therefore, the same significant individual **[**82]** issues are present in the impact analysis for TPPs that only reimbursed for Flonase, as they are for consumers that only bought Flonase prior to generic entry. *See* *Wellbutrin XL, 2011 U.S. Dist. LEXIS 90697, 2011 WL 3563835, at *13-14* (rejecting plaintiffs' argument that a probability analysis can establish impact for TPPs that never reimbursed for generic purchases because significant individual issues concerning a plan member's purchasing behavior undermine the reliability of the analysis).

For the foregoing reasons, I find that Indirect Purchasers have failed to establish that impact is capable of proof through common evidence for class members that never purchased and/or reimbursed for generic FP during the Class Period.

c. Measurable Damages

The last prong of the predominance inquiry is whether Indirect Purchasers "have demonstrated by a preponderance of the evidence that they will be able to measure damages on a class-wide basis using common proof." *Behrend v. Comcast Corp., 655 F.3d 182, 204 (3d Cir. 2011)* (citing *Hydrogen Peroxide, 552 F.3d at 325*). "Some variation of damages among class members does not defeat certification." *Id.* (citing 7AA Charles Alan Wright, et al., *Federal Practice and Procedure* § 1781 **[**83]** (3d ed. 2005) (noting that for antitrust class certification "it uniformly has been held that differences among the members as to the amount of damages incurred does not mean that a class action would be inappropriate.")). "Complex and individual questions of damages, however, weigh against finding predominance." *Id.* (citations omitted).

"The usual measure in an overcharge case is the difference between the illegal price that was actually charged and the price that would have been charged 'but for' the violation multiplied by the number of units purchased." *Behrend, 655 F.3d at 203*. Due to the "inherent difficulty of identifying a 'but-for world,'" the Third Circuit has explained that such damages need not be "measured with certainty," but rather may be "demonstrated as 'a matter of just and reasonable inference.'" *Id. at 203-204* (quoting *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 563, 51 S. Ct. 248, 75 L. Ed. 544 (1931))*; *see also* *Rossi v. Standard Roofing, Inc., 156 F.3d 452, 483 (3d Cir. 1998)* (holding that for class certification purposes, "[i]t is not necessary to show with total certainty the amount of damages sustained"); *In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1176 (3d Cir. 1993)* **[**84]** (noting that a "relaxed measure of proof is afforded to the amount" of damages).

i. Monopolization and UDTP Overcharge Damages To measure class-wide damages, Rausser relies on the same "yardstick" methodology he utilized to establish common impact. Through the use of "yardsticks," Rausser compares the prices actually paid by purchasers of FP to what prices would have been paid in the "but-for" world. The model is relatively straightforward as aggregate class-wide damages equal the difference between the costs paid by class members for FP in the actual world versus the costs class members would have paid for FP in the

few reimbursements in a class state during the Class Period, all concentrated between May 2004 and May 2006, because it is an out-of-state TPP.

"but-for" world; Rausser calculates these costs and isolates certain sales because of the class exclusions (i.e. federal facilities, Medicare reimbursements, HMO direct purchasers, GSK rebates) through the use of available industry data. [29]

The before-and-after "yardstick" methodology has been accepted by courts as a means to measuring damages in both indirect and direct purchaser antitrust **[**85]** actions. GSK does not attack the validity of the methodology generally, but instead attacks the data on which Rausser relies to implement his methodology—specifically, again, that the data is not representative of state-specific pricing. To calculate damages within each of the class states, Rausser utilized state-specific data on FP prescriptions in retail and mail-order channels to allocate the nationwide data on FP unit sales and dollars to each of the class **[*233]** states. GSK is correct that through this allocation, Rausser is essentially implementing nationwide prices in measuring state damages. However, Rausser did utilize certain state-specific data to more precisely calculate damages in the class states (i.e. co-pay data, prescription data by payer type). He also demonstrated, based on the named plaintiff TPPs' transaction data in several class states, that FP prices exhibited minimal variance from state to state. Although, as Stangle pointed out, Rausser's national average generic price is consistently below the state prices observed in the named plaintiff TPPs' data, Rausser explained that named plaintiff TPPs' data comes from a small set of individual transactions, and is not representative **[**86]** of the full volume of FP purchases in the class states that will drive the damages calculation. While of course Rausser's methodology would have been even more reliable had he been provided with state-specific FP pricing, "it is important not to let a quest for perfect evidence become the enemy of good evidence." *Messner, 669 F.3d at 808*.

GSK's other challenges to Rausser's methodology "are concerns that relate primarily to the allocation of damages among individual class members, not to the computation of aggregate damages on a class-wide basis. Assuming the jury renders an aggregate judgment, allocation will become an intra-class matter accomplished pursuant to a court-approved plan of allocation, and such individual damages allocation issues are insufficient to defeat class certification." *Terazosin, 220 F.R.D. at 699*; *see also* *In re Potash Antitrust Litig., 159 F.R.D. 682, 697 (D. Minn. 1995)* ("The amount of damages largely involves individualized questions. This is typically true in antitrust actions, however, and does not preclude certification."). [30]

I am satisfied that although the magnitude of overcharges will vary across class members, Indirect Purchasers have set forth a just and reasonable estimate of the class-wide overcharge damages in each of the four class states.

ii. Unjust Enrichment Damages

In addition to his yardstick methodology measuring damages resulting from the anticompetitive overcharge, Rausser has also proposed a methodology to calculate unjust enrichment damages for the class by comparing GSK's actual profits to what its profits would have been in the "but-for" world. This methodology would rely on common evidence in the form of profit and loss statements for Flonase possessed by GSK. Rausser further explained that this data could be adjusted to calculate state-specific damages by relying on available state-specific data on FP prescriptions and their penetration in the class state markets.

Neither of GSK's experts challenged the reliability of Rausser's proposed methodology to calculate unjust **[**88]** enrichment damages in Arizona, Massachusetts, and Wisconsin. GSK asserts that because Rausser has failed to show an actual calculation of unjust enrichment damages, based on his proposed methodology, his methodology is unreliable and incapable of measuring class-wide damages. However, at this stage of the litigation,

[29] Rausser also explained that common data was available to enable him to "back out" of his damages calculation transactions by consumers purchasing only Flonase during the Class Period.

[30] Both *Rule 23(c)(1)(C)*, which allows for the amendment of class certification orders at any time before final judgment, and *Rule 23(d)*, **[**87]** which authorizes courts to make appropriate orders to facilitate class action proceedings, provide adequate methods through which I can address any potential difficulties associated with damage allocations as they may arise.

this bare contention is simply insufficient. *See* In re Wellbutrin SR Direct Purchaser Antitrust Litig., 2008 U.S. Dist. LEXIS 36719, 2008 WL 1946848, at *9 (E.D. Pa. May 2, 2008) (explaining that the court's inquiry is "limited to whether or not the proposed methods are so insubstantial as to amount to no method at all") (quoting Potash, 159 F.R.D. at 697); In re Vitamins Antitrust Litig., 209 F.R.D. 251, 268 (D.D.C. 2002) ("At the certification stage, the preliminary inquiry in assessing the proposed methods of proving damages is limited: The inquiry is not whether the methods are valid, but is only to assess whether the methods are available to prove damages on a class-wide basis."). I find that, based on Rausser's testimony and declarations and the available common data possessed by GSK, that Indirect Purchasers have demonstrated that unjust enrichment **[*234]** damages can be calculated on a class-wide **[**89]** basis using common evidence.

2. Superiority

Rule 23(b)(3) also requires that a class action be "superior to other available methods for the fair and efficient adjudication of the controversy." Fed. R. Civ. P. 23(b)(3). Assessing superiority requires a court "to balance, in terms of fairness and efficiency, the merits of a class action against those of 'alternative available methods' of adjudication." Georgine v. Amchem Prods., Inc., 83 F.3d 610, 632 (3d Cir. 1996). The Supreme Court explained in *Amchem* that, similar to the predominance requirement, the requirement of superiority ensures that resolution by class action will "'achieve economies of time, effort, and expense, and promote . . . uniformity of decision without sacrificing procedural fairness or bringing about other undesirable results.'" Amchem, 521 U.S. at 615 (quoting Advisory Committee's Note on Fed. R. Civ. P. 23).

GSK reiterates its arguments regarding predominance in contending that a class action is not superior to other available methods of adjudication. However, both fairness and efficiency dictate that I certify the class in this case; otherwise, the numerous individual class members would be forced to file suit individually, **[**90]** producing numerous identical issues in each case that would waste judicial resources and leave all parties vulnerable to unfair inconsistencies. I agree with the vast majority of district courts that in a delayed generic entry case such as this, class action treatment is superior to other available methods of adjudication. Therefore, I find that the requirements of Rule 23(b)(3) have been met.

C. *Daubert* Motions

Both Indirect Purchasers and GSK moved to exclude the other party's respective expert(s) (Rausser, Stangle, Navarro) on class certification issues. The party offering an expert must demonstrate, by a preponderance of the evidence, that the expert's qualifications and opinions comply with Federal Rule of Evidence 702. *See* Daubert v. Merrell Dow Pharms., 509 U.S. 579, 592-93, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993) (citation omitted). Rule 702 provides:

> If scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education, may testify thereto in the form of an opinion or otherwise, if (1) the testimony is based upon sufficient facts or data, (2) **[**91]** the testimony is the product of reliable principles and methods, and (3) the witness has applied the principles and methods reliably to the facts of the case.

Fed. R. Evid. 702. Rule 702 has "a liberal policy of admissibility." Pineda v. Ford Motor Co., 520 F.3d 237, 243 (3d Cir. 2008) (citation omitted).

The Third Circuit has explained that to survive a *Daubert* challenge, an expert must satisfy three "restrictions on expert testimony: qualification, reliability, and fit." Schneider ex rel. Estate of Schneider v. Fried, 320 F.3d 396, 404 (3d Cir. 2003) (citations omitted). The qualification inquiry examines whether a witness possesses specialized expertise. The Third Circuit "has interpreted this requirement liberally, holding that a broad range of knowledge, skills, and training qualify an expert." *Id.* (citing In re Paoli R.R. Yard PCB Litig., 35 F.3d 717, 742 (3d Cir. 1994)).

For an expert's testimony to be reliable, it "must be based on [] methods and procedures . . . rather than subjective belief or speculation." *In re TMI Litig., 193 F.3d 613, 670 (3d Cir. 1999)*. "[T]he admissibility inquiry thus focuses on principles and methodology, not on the conclusions generated by principles **[**92]** and methodology." *Id. at 665*. Furthermore, an "expert's testimony must be accompanied by a sufficient factual foundation before it can be submitted to the jury." *Elcock v. Kmart Corp., 233 F.3d 734, 754 (3d Cir. 2000)* (citation omitted).

Finally, *Rule 702* requires that the expert testimony fit the issues in the case. Testimony "fits" a case when it is "relevant **[*235]** for the purposes of the case and . . . assist[s] the trier of fact." *Schneider, 320 F.3d at 404*.

The Third Circuit has not explicitly addressed the question of whether expert testimony must satisfy *Daubert* at the class certification stage. Nevertheless, the Supreme Court has strongly suggested that a full *Daubert* examination may be necessary at class certification. *See* *Dukes, ___ U.S. ___, 131 S. Ct. at 2553-54* ("The District Court concluded that *Daubert* did not apply to expert testimony at the certification stage of class-action proceedings. We doubt that is so . . . ." (internal citation omitted)). Furthermore, in *Hydrogen Peroxide*, the Third Circuit explained that "opinion testimony should not be uncritically accepted as establishing a Rule 23 requirement merely because the court holds the testimony should not be excluded, under *Daubert* **[**93]** or for any other reason." *552 F.3d at 323*. "Inherent in that statement is the conclusion that a court could, at the class certification stage, exclude expert testimony under *Daubert.*" *Behrend, 665 F.3d at 215 n.18* (Jordan, J., concurring in the judgment in part and dissenting in part).

Regardless, I will not exclude any of the expert testimony and declarations on class certification, even making a full *Daubert* examination. Both parties concede the issue of expert qualification and focus their arguments on the reliability and fit of each expert's testimony and declarations. From a review of this opinion, it is clear that the expert opinions of Rausser, Stangle, and Navarro were reliable, relevant, and significant contributions to the issues raised by Indirect Purchasers' class certification. Therefore, I will deny all of the following *Daubert* motions: (1) GSK's Motion to Exclude the Expert Report and Testimony of Gordon Rausser; (2) Indirect Purchasers' Motion to Exclude the Report and Testimony of Bruce Stangle; and (3) Indirect Purchasers' Motion to Exclude the Report and Testimony of Robert P. Navarro.

V. CONCLUSION

For the reasons explained above, I conclude that Indirect Purchasers **[**94]** have carried their burden under *Rules 23(a)* and *(b)(3)*. In reaching that conclusion, however, the indirect purchaser class was limited to class members that purchased/or reimbursed for generic FP during the Class Period. I will therefore grant in part and deny in part Indirect Purchasers' motion for class certification. Additionally, I will deny the three *Daubert* motions that seek to exclude each party's respective expert(s) on class certification.

/s/ Anita B. Brody

ANITA B. BRODY, J.

APPENDIX A

State Monopolization Claims

Arizona	
	Arizona's monopolization statute, *Ariz. Rev. Stat. § 44-1401, et seq.*, permits any "person threatened with injury or injured in his business or property" to sue for redress of a violation of the statute." *Ariz. Rev. Stat. § 44-1408(B)*. The statute includes a federal guidance clause, which notes that it is "the intent of the legislature that in construing this article, the courts may use as a guide interpretations given by the federal courts to comparable

State Monopolization Claims

federal antitrust statutes." *Id.* § 44-1412. Indirect purchasers have standing to sue under this statute. Bunker's Glass Co. v. Pilkington, PLC, 206 Ariz. 9, 75 P.3d 99 (Ariz. 2003).

Wisconsin

Wisconsin's monopolization statute, Wis. Stat. § 133.01, et seq., aims to prohibit "unfair and discriminatory business practices which destroy or hamper competition," *id.*, and provides for penalties against every person "who monopolizes, or attempts to monopolize." *Id.* § 133.03. Section 133.18 permits any person injured directly or indirectly by an antitrust violation to seek treble damages. Id. § 133.18. The statute was also "intended as a reenactment of the first two sections of the federal Sherman Antitrust Act . . . ." Grams v. Boss, 97 Wis. 2d 332, 294 N.W.2d 473, 480 (Wisc. 1980).

State UDTP Claims

Florida

Florida's Deceptive and Unfair Trade Practices Act ("FDUTPA"), Fla. Stat. § 501.201, et seq., declares unlawful any "[u]nfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce." Fla. Stat. § 501.204(1). A "claim for damages under FDUTPA has three elements: (1) a deceptive act or unfair practice; (2) causation; and (3) actual damages." Rollins, Inc. v. Butland, 951 So.2d 860, 869 (Fla. Dist. Ct. App. 2006). To ascertain whether a FDUTPA violation has occurred, a court may utilize rules promulgated "pursuant to the Federal Trade Commission Act" and the "standards of unfairness and deception set forth and interpreted by the Federal Trade Commission or the federal courts." Fla. Stat. § 501.203(3). While Florida bars indirect purchasers from asserting claims under its antitrust act, they may state claims under FDUTPA. *See* Mack v. Bristol-Myers Squibb Co., 673 So.2d 100, 103, 107-08 (Fla. Dist. Ct. App. 1996).

Massachusetts

Massachusetts UDTP statute, Mass. Gen. Laws ch. 93A, et seq., provides that "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are ... unlawful. *Id.* § 2. The claim has three elements, as a plaintiff "must establish (1) that the defendant has committed a violation of [Mass. Gen. Laws ch. 93A, § 2]; (2) injury; and (3) a causal connection between the injury suffered and the defendant's unfair or deceptive method, act, or practice." Herman v. Admit One Ticket

	State Monopolization Claims
	Agency LLC, 454 Mass. 611, 912 N.E.2d 450, 454 (Mass. 2009). Although Massachusetts bars indirect purchasers from bringing claims under its ***antitrust law***, it does not bar indirect purchaser standing under its UDTP act. *See Ciardi v. F. Hoffmann-La Roche Ltd., 436 Mass. 53, 762 N.E. 2d 303, 308-10 (Mass. 2002)*.
	State Unjust Enrichment Claims
Arizona	"In Arizona, five elements must be proved to make a case of unjust enrichment: (1) an enrichment; (2) an impoverishment; (3) a connection between the enrichment and the impoverishment; (4) absence of justification for the enrichment and the impoverishment and (5) an absence of a remedy provided by law." *Trustmark Ins. Co. v. Bank One, 202 Ariz. 535, 48 P.3d 485, 492 (Ariz. Ct. App. 2002)*.
Massachusetts	To state a claim for unjust enrichment in Massachusetts, a plaintiff must give proof of "some misconduct, fault or culpable action on the part of the defendant as 'wrongdoer' which renders his retention of a benefit at the expense of another contrary to equity and good conscience." *DeSanctis v. Labell's Airport Parking Inc., 1991 Mass App. Div. 37, 40, 1991 WL 71921 (Mass. Dist. Ct. 1991)*.
Wisconsin	In Wisconsin, "[t]o recover on a claim for unjust enrichment, three elements must be proven: (1) a benefit conferred upon the defendant by the plaintiff; (2) an appreciation or knowledge by the defendant of the benefit; and (3) the acceptance or retention by the defendant of the benefit under circumstances that makes its retention inequitable." *Tri-State Mechanical, Inc. v. Northland College, 2004 WI App 100, 273 Wis. 2d 471, 681 N.W.2d 302, 306 (Wis. Ct. App. 2004)*.

[*237] ORDER

AND [95] NOW**, this 18th day of June 2012, upon consideration of the Indirect Purchaser Plaintiffs' Motion for Class Certification (ECF No. 321) and Amended Motion for Class Certification (ECF No. 323), and the accompanying memoranda in support of and in opposition to these motions, the supplemental memoranda, the hearings on February 22 and February 27-29, 2012, the post-hearing briefs, the expert declarations, the *Daubert* motions and accompanying memoranda, and for the reasons set forth in the memorandum of today's date, it is **ORDERED** that Indirect Purchasers' motion for class certification is **GRANTED IN PART** and **DENIED IN PART.**

It is **FURTHER ORDERED** that:

I. The following indirect purchaser litigation class is certified pursuant to *Federal Rule of Civil Procedure 23(a)* and *23(b)(3)* for the class period of August 2004 to March 2009:

A. With respect to the monopolization and UDTP claims

(1) *For the Class Period from August 2004 through March 2006*

All persons or entities throughout the United States and its territories who from August 2004 through March 2006 purchased, paid for, and/or reimbursed for branded Flonase in any of the following four states—Arizona, Florida, Massachusetts, or Wisconsin. **[**96]** These persons or entities must have also purchased, paid for, and/or reimbursed for an AB-rated generic fluticasone propionate nasal spray equivalent of branded Flonase ("generic FP") from March 2006 to March 2009 in the same designated state in which the Flonase purchase was made.

(2) *For the Class Period from March 2006 through March 2009*

All persons or entities throughout the United States and its territories who from March 2006 to March 2009 purchased, paid for, and/or reimbursed for generic FP in the following states—Arizona, Florida, Massachusetts, or Wisconsin.

B. With respect to the unjust enrichment claims

(1) All persons or entities throughout the United States and its territories who from August 2004 through March 2006 purchased, paid for, and/or reimbursed for branded Flonase in any of the following three states—Arizona, Massachusetts, or Wisconsin. These persons or entities must have also purchased, paid for, and/or reimbursed for an AB-rated generic fluticasone propionate nasal spray equivalent of branded Flonase ("generic FP") from March 2006 to March 2009 in the same designated state in which the Flonase purchase was made.

C. For purposes of the class definition, the Flonase **[**97]** and/or generic FP drugs must have been intended for consumption by the class members, their families or their members, employees, plan participants, beneficiaries, or insureds.

D. The following are excluded from the class:

(1) GSK and its respective subsidiaries and affiliates;

(2) all governmental entities (except for government funded employee benefit plans);

(3) all persons or entities that purchased FP nasal spray, including Flonase, for purposes of resale or directly from GSK to the extent and solely to the extent of such purpose for resale or as a direct purchase;

(4) insured individuals covered by plans imposing a flat dollar co-pay that was the same dollar amount for generic as for brand name drug purchases;

(5) fully insured health plans, i.e. plans that purchased insurance from another third-party payor covering 100% of the plan's reimbursement obligations to its members; and

(6) insured individuals who purchased only generic FP (never branded Flonase) and whose health plans imposed a flat dollar co-pay applicable to generic drugs.

[*238] E. From August 2004 through March 2009 will be referred to as the "Class Period."

II. Class claims, issues, and defenses are those outlined in the memorandum **[**98]** of today's date.

III. The following class members are appointed as class representatives for claims under the laws of the following states:

State	Class Representative
Arizona	Painters
Wisconsin	Painters
Florida	AFL, IBEW
Massachussetts	Kohoe

IV. **By July 9, 2012**, the parties shall submit a proposed class notice to the Court.

It is **FURTHER ORDERED** that GSK's Motion to Exclude the Expert Report and Testimony of Gordon Rausser (ECF No. 307), Indirect Purchaser Plaintiffs' Motion to Exclude the Report and Testimony of Bruce Stangle (ECF No. 338), and (3) Indirect Purchaser Plaintiffs' Motion to Exclude the Report and Testimony of Robert P. Navarro (ECF No. 339) are all **DENIED.**

Opinion

DECISION AND ORDER GRANTING IN PART AND DENYING IN PART PLAINTIFF'S MOTION TO DISMISS THE COUNTERCLAIM

McMahon, J.:

INTRODUCTION

Plaintiff/Counterclaim-Defendant Bel Canto Design, Ltd. ("Bel Canto") is a manufacturer of high-end audio equipment. It sued-Defendants/Counterclaimants MSS HiFi Inc. ("MSS HiFi"), a former Bel Canto authorized dealer, and its principal, John Boey ("Boey," and with MSS HiFi, "Counterclaimants"), in the United States District **[*2]** Court for the District of Minnesota, for Lanham Act violations. The Minnesota District Court transferred the case to this Court on September 12, 2011, and Bel Canto moved for a preliminary injunction to halt several of Counterclaimants' business practices that Bel Canto claimed misled consumers and damaged Bel Canto's goodwill.

I held a preliminary injunction hearing on November 28 and 29, 2011. On December 16, 2011, I granted in part and denied in part Bel Canto's motion for a preliminary injunction. In particular, I enjoined MSS HiFi from (1) falsely claiming affiliation with or endorsement by Bel Canto, (2) advertising or selling Bel Canto products bearing altered serial numbers, or (3) advertising or selling Bel Canto products for which warranty protection is unavailable because of actions taken by MSS HiFi. *Bel Canto Design, Ltd. v. MSS Hifi, Inc., 837 F.Supp.2d 208, 2011 U.S. Dist. LEXIS 146701 , 2011 WL 6355215, at *1 (S.D.N.Y. 2011)*.

Prior to my decision, MSS HiFi and Boey answered Bel Canto's complaint and counterclaimed. (ECF No. 83.) On November 1, 2011 Bel Canto moved to dismiss the Counterclaim in its entirety. (ECF No. 85.) I did not decide this latter motion in my order granting a preliminary injunction, **[*3]** because it was not necessary to do so. It is necessary to do so now.

For the reasons discussed below, Bel Canto's motion to dismiss the Counterclaim is granted in part and denied in part.

BACKGROUND

A. Counterclaim allegations

The following allegations are drawn from the Counterclaim and the documents incorporated therein. *DiFolco v. MSNBC Cable L.L.C., 622 F.3d 104, 111 (2d Cir. 2010)*.

Boey opened MSS HiFi in May 2007 in Rockland, New York. His business plan was to sell high-end home audio electronics at below wholesale prices. (Counterclaim ¶ 7.) One of the brands Boey wanted to stock at MSS HiFi was Bel Canto's. Bel Canto designs and manufactures "highly compact, high-powered digital amplifiers and low-noise, high dynamic range digital-to-analog converters." (Id. ¶ 8.) Counterclaimants allege that Bel Canto products have a "unique appeal" for a "select segment" of consumers, especially those in urban areas like New York City. (Id.)

Bel Canto does not market or sell its products directly to consumers, but distributes them through a network of authorized dealers. (Id. ¶ 9.) In early 2009, MSS HiFi became an authorized Bel Canto dealer by agreeing to Bel Canto's standard form Dealership **[*4]** Agreement, which is incorporated by reference into the Counterclaim. Several of its terms are relevant here.

First, the Dealership Agreement prevents authorized dealers from selling Bel Canto products to anyone — except other authorized dealers — for purposes of resale, and expressly allows Bel Canto to terminate the dealership of any authorized dealer who sells to unauthorized resalers. Second, the Dealership Agreement prohibits authorized dealers from selling to anyone outside of the United States. Third, the Dealership Agreement says this about Bel Canto's policy towards its manufacturer's suggested retail price ("MSRP"):

> It is Bel Canto's policy to supply Bel Canto products only to dealers that observe the MSRP . . . . Nothing in this Agreement, however, is intended to restrict the price at which the Dealer advertises or sells Bel Canto products supplied to the Dealer. Dealer agrees to sell Bel Canto products based on the value of the products and not price.

(See generally ECF No. 28, Ex. 2.)

Shortly after MMS Hifi's first order, Bel Canto's National Sales Manager, P.J. Zornosa, reprimanded MSS HiFi for attempting to make sales below the MSRP. (Counterclaim, ¶ 15.) Shortly thereafter, **[*5]** on February 15, 2009, Zornosa sent an email to Boey, which is quoted in the Counterclaim. It says:

> I also need my dealers to be a little less predatory when it comes to procuring customers. I think it works well when other dealers work with each other and not against each other. We have enough competition in our world in terms of what customers like to spend their money on than to make it distasteful when some are (or collectively) operating in bad taste.
>
> I am NOT stating that MSRP is always called for but when quoting Dealer Cost I don't think it's going to be sold profitably. I thought this was one of the reasons that MSS HiFi wanted to be our dealer? (To make $$!)

(ECF No. 22, Ex. A.)

At a February 20, 2009 meeting with MSS HiFi's principals, including Boey, Zornosa advised that Bel Canto was under "tremendous pressure" from its other authorized dealers, many of whom demanded that Bel Canto cease selling product to MSS HiFi. Those dealers, all competitors of MSS HiFi, included Stereo Exchange, a New York City outlet for high-end audio equipment, AudioFeil International, located in Upstate New York, and CSA Audio, located in Montclair, New Jersey. (Counterclaim, ¶ 17.) Stereo Exchange **[*6]** went so far as to threaten to stop buying from Bel Canto unless Bel Canto terminated MSS HiFi as an authorized dealer. (Id. ¶ 18.) Zornosa allegedly told MSS HiFi that as a result, it was forbidden to sell Bel Canto products outside of its then-principal place of business in Rockland, or to sell them for less than the price prescribed by Bel Canto. (Id. ¶ 19.)

MSS HiFi continued to sell Bel Canto products as an authorized dealer until November 2009, when Bel Canto terminated the parties' Dealership Agreement. (Id. ¶ 20.) Counterclaimants allege that, "Bel Canto terminated the Agreement in response to other dealer's demands and as a consequence of [MSS HiFi's] unwillingness to maintain artificially elevated prices and to restrict sales to a narrowly defined geographic area." (Id. ¶ 22.)

Nevertheless, MSS HiFi continued to sell Bel Canto products as an *un*authorized dealer; its practices in doing so are the subject of Bel Canto's underlying complaint as well as this Court's prior decision in this matter, which enjoined some of those practices. *Bel Canto, 2011 U.S. Dist. LEXIS 146701, 2011 WL 6355215, at *2-7*. Bel Canto's efforts to stop MSS HiFi, in turn, are the basis for several of the counts of the Counterclaim.

First, **[*7]** in early 2011, Mt. Washington Valley Audiophile ("Mt. Washington") — at the time an authorized Bel Canto dealer — agreed with MSS HiFi that it would obtain Bel Canto products on MSS HiFi's behalf, in exchange for a commission on MSS HiFi's sales. This agreement was in violation of Mt. Washington's Dealership Agreement with Bel Canto, which, as noted, forbids sales to unauthorized resalers. (See supra.) Bel Canto caught wind of the scheme after a couple of months. Suspecting that MSS HiFi's money, rather than Mt. Washington's, was being used to pay for product invoices, Bel Canto billed Mt. Washington $15K to fill an order. After Bel Canto received that amount (secretly from MSS HiFi), it refused to fill the order, presumably on the ground that Mt. Washington had breached its agreement and was not entitled to the product. (Counterclaim ¶¶ 24-26.)

Over the summer of 2011, Bel Canto contacted eBay, where MSS HiFi continued to sell Bel Canto products that it obtained from authorized dealers. Bel Canto persuaded eBay to remove MSS HiFi's listings on the ground that they violated Bel Canto's trademarks. Counterclaimants allege that this action was part of a conspiracy between Bel Canto and **[*8]** its authorized dealers to preclude MSS HiFi from selling Bel Canto products, and also tortiously interfered with its prospective economic relationships with eBay and eBay users. (Id. ¶¶ 27-33.)

Counterclaimants also allege that Bel Canto "retaliated" against those of its authorized dealers that sold Bel Canto products to MSS HiFi after MSS HiFi was terminated as an authorized dealer. In particular, after this Court ordered limited discovery on Bel Canto's trademark claims in September 2011, Bel Canto was able to identify two of its authorized dealers — Alpha Stereo ("Alpha") and Precision Audio and Video ("Precision") — that had sold to MSS HiFi. Bel Canto terminated those dealers for violating the terms of the Dealership Agreement. (Id. 40-45.) Counterclaimants suggest that either including a provision that prohibited selling to resalers in the Dealership Agreement, or enforcing that provision, is anti-competitive behavior in furtherance of an illegal conspiracy to prop up the price of Bel Canto products, and interferes with MSS HiFi's prospective economic relationship with those dealers.

Finally, Counterclaimants point to Bel Canto's policy of refusing to honor warranties on Bel Canto **[*9]** products purchased from an unauthorized dealer. They argue that this refusal is intended to, and succeeds in, forcing discounters like MSS HiFi out of the market (see id. ¶¶ 34-39); or, that if unauthorized dealers continue to sell Bel Canto products, Bel Canto's refusal to honor warranties results in a decrease in quality services to Bel Canto customers who buy from unauthorized dealers. (Id. ¶ 55.)

B. Procedural history

Bel Canto commenced this case by suing MSS HiFi and Boey in the District of Minnesota on July 28, 2011. It sought a temporary restraining order and preliminary injunction to stop MSS HiFi from selling Bel Canto products in violation of the Lanham Act. (ECF No. 1.) Judge Doty, granted a TRO on August 25, 2011. On September 12, 2011, Judge Doty extended the TRO and transferred the case this Court. Judge Doty's orders, which are mostly irrelevant to the instant motion, are discussed in greater detail in my prior opinion in this case. *Bel Canto, 2011 U.S. Dist. LEXIS 146701, 2011 WL 6355215, at *7-8*.

MSS HiFi and Boey answered Bel Canto's complaint and counterclaimed on October 7, 2011. The Counterclaim has nine counts. (ECF No. 83.) Count I seeks damages for violation of section 1 of the Sherman Act, **[*10]** *15 U.S.C. § 1*; Count II seeks damages under New York law for commercial disparagement; Count III seeks damages under New York law for tortious interference with prospective economic advantage; Count IV seeks damages for breach of the Dealership Agreement between Bel Canto and MSS HiFi; Count V seeks damages for false advertising under the Lanham Act; Count VI seeks damages under *section 349 of New York's General Business Law* ("GBL") for deceptive trade practices; Count VII seeks damages under *section 350 of the GBL* for false advertising; Count VIII seeks damages for a violation of New York's duty of good faith and fair dealing; and Count IX seeks damages for a violation of New York's Donnelly Act, *GBL § 340*, which parallels the Count I claim under the Sherman Act. Each Count is addressed separately below.

Rather than answer, Bel Canto moved to dismiss all of the counterclaims on November 1, 2011. That motion was not fully briefed when the preliminary injunction hearing was held on November 28, 2011. In ruling on the preliminary injunction motion, I made several preliminary findings of fact that, as discussed below, are relevant to some of the Counterclaims. See *Bel Canto, 2011 U.S. Dist. LEXIS 146701, 2011 WL 6355215, at *1-7*. **[*11]** Those findings do not bind me in my consideration of this motion.

DISCUSSION

A. Standard of review

A motion to dismiss counterclaims is governed by the familiar standards of *Rule 12(b)(6)*. "In deciding a motion to dismiss pursuant to *Rule 12(b)(6)*, the Court evaluates the sufficiency of the complaint under the 'two-pronged approach' suggested by the United States Supreme Court in *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 173 L. Ed. 2d 868 (2009)*." *Bektic-Marrero v. Goldberg, 850 F. Supp. 2d 418, 2012 U.S. Dist. LEXIS 30764, 2012 WL 733875, at *5 (S.D.N.Y. Mar. 7, 2012)*. First, "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements," are not entitled to the assumption of truth and are thus not sufficient to withstand a motion to dismiss. *Iqbal, 129 S.Ct. at 1949*; *Hayden v. Paterson, 594 F.3d 150, 161 (2d Cir. 2010)*.

Second, "When there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement for relief." *Iqbal, 129 S.Ct. at 1950*. A claim is facially plausible "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct **[*12]** alleged." *Id. at 1949*. "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." Id.

I analyze the Counterclaims as follows: Antitrust claims, Counts I and IX (Section B); Claims based on Bel Canto's allegedly false statements, Counts II, III, V, VI, VII (Section C); and Claims based on breach of contract, Counts IV and VIII (Section D).

B. Anti-trust claims, Counts I and IX

Counterclaimants first seek relief under section 1 of the Sherman Act, *15 U.S.C. § 1*, and the analogous provisions of New York's Donnelly Act, codified at *GBL § 340*. They allege that "Bel Canto forged a de facto conspiracy with its authorized distributors . . . by their refusal to do business with MSS [HiFi]," (id. ¶ 49); and that "This de facto conspiracy was among a manufacturer together with competitive distributors and had as its purposes fixing prices, . . . and it has greatly impeded MSS [HiFi]'s ability to sell Bel Canto products at discounted prices." (Id. ¶¶ 50-51.) Counterclaimants allege that this conspiracy, and Bel Canto's practices, "have had an adverse effect on prices, output, and the quality of services **[*13]** in the digital amplifier and digital-to-analog converter market — without any countervailing efficiencies o[r] benefit to consumers." (Id. ¶ 54.)

Section 1 of the Sherman Act says that "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. Private causes of action for Sherman Act violations are permitted by Section 4 of the Clayton Act, *15 U.S.C. § 15*. *Floors-N-More, Inc. v. Freight Liquidators, 142 F.Supp.2d 496, 500 (S.D.N.Y. 2001)* (citation omitted). In order to state a claim for violation of this section, the party asserting it must allege three things: (1) an agreement (2) between two or more persons or entities (3) that "unreasonably" restrains trade.

1. *Illegal agreement vs. independent action*

Unilateral action by one market participant against another is not a basis for an anti-trust claim, even if the action has the effect of restraining trade, because unilateral action is inconsistent with an illegal "agreement" or conspiracy. "Unilateral conduct on the part of a single person or enterprise falls outside the purview of *[section 1 of the Sherman Act]*." **[*14]** *Capital Imaging Associates, P.C. v. Mohawk Valley Medical Associates, Inc., 996 F.2d 537, 542 (2d Cir. 1993)*; see also *Burlington Coat Factory Warehouse Corp. v. Esprit De Corp., 769 F.2d 919, 923 (2d Cir. 1985)*. Rather, "a manufacturer ... generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." Id. (internal citations omitted). This principle is often referred to as the "Colgate doctrine," after the United States Supreme Court's decision in *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*.

Cases that premise an anti-trust violation on an authorized dealer's termination by a manufacturer implicate the foregoing principle. It should come as no surprise that manufacturers, like Bel Canto, that chose to distribute through a network of authorized dealers will receive complaints about discounters from their authorized dealers — particularly if the authorized dealer agreement suggests an MSRP or geographic restrictions. The Supreme Court held, in *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*, that if the manufacturer responds to such complaints by terminating the price cutting dealer, this **[*15]** response alone does not suggest any anti-competitive conspiracy between the manufacturer and its complaining authorized dealers. Rather, such a response is consistent with a unilateral decision by the manufacturer not to authorize price-cutting dealers.

As my colleague Judge Skretny on United States District Court for New York's Western District has explained, discussing Monsanto:

> a manufacturer has the right: (1) to deal or refuse to deal with whomever it chooses; and (2) "to announce in advance the circumstances under which it will refuse to sell," so long as it does so independently. To protect against erosion of this principle, the [Supreme Court in Monsanto] explicitly held that evidence of complaints by distributors, standing alone, does not support an inference of antitrust conspiracy. The Court reasoned that complaints about price cutters "are natural — and from the manufacturer's perspective, unavoidable — reactions by distributors to the activities of their rivals," which "arise in the normal course of business and do

> not indicate illegal concerted action." Accordingly, it cautioned that barring a manufacturer from acting "solely because the information upon which it acts originated **[*16]** as a price complaint would create an irrational dislocation in the market."

Campbell v. Austin Air Systems, Ltd., 423 F. Supp. 2d 61, 68-69 (W.D.N.Y. 2005) (internal citations omitted); see also Burlington Coat Factory, 769 F.2d at 919. Applying Monsanto, the court in Campbell held that the plaintiff's "allegation that [his distributor] terminated his distributorship in response to the complaints of his competitors is legally insufficient to infer concerted action required under Section 1 of the Sherman Act." 423 F. Supp. 2d at 69.

Of course, the fact that dealers complained remains *relevant* to alleging (and ultimately proving) an illegal agreement, but "something more than evidence of complaints is needed. There must be evidence that tends to exclude the possibility that the manufacturer and non-terminated distributors were acting independently;" or, a plaintiff must produce evidence that would allow a jury to conclude that "the alleged conspirators had a unity of purpose or a common design and understanding, or a meeting of the minds." Monsanto, 465 U.S. at 764. At the pleading stage, of course, the plaintiff must allege facts that if proved would entitle it to relief, and thus simply **[*17]** alleging competitor complaints and a manufacturer's response is not sufficient to satisfy the Rule 8 pleading requirement. "The need at the pleading stage for allegations plausibly suggesting (not merely consistent with) agreement reflects the threshold requirement of Rule 8(a)(2) that the 'plain statement' possess enough heft to 'sho[w] that the pleader is entitled to relief.'" Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007); cf. Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986).

The Counterclaim fails to allege an anti-trust conspiracy under the foregoing cases.

Counterclaimants allege, in wholly conclusory fashion, that Bel Canto "forged a de facto conspiracy with its authorized distributors," but it pleads no facts that would tend to establish any such conspiracy. To the extent Counterclaimants' usage of the phrase "de facto conspiracy" reflects the total absence of allegations tending to show the existence of an *actual* agreement, it is apt.

There is no allegation that Bel Canto met with some of its authorized dealers and forged an agreement to do anything. "In order to successfully allege conspiracy, Twombly requires that a plaintiff provide **[*18]** 'specific time(s), place(s), or person(s) involved in the alleged conspiracies.' It is well established that '[s]olely pleading opportunities to conspire is not sufficient to support a claim of actual conspiracy.'" American Medical Ass'n v. United Healthcare Corp., 588 F.Supp.2d 432, 446 (S.D.N. Y. 2008) (citations omitted). Counterclaimants do not plead specific times, places, or persons involved in the alleged de facto conspiracy.

Instead, they plead (1) price complaints by three local competitors, and (2) a series of actions by Bel Canto, including terminating MSS HiFi's dealership and seeking to prevent MSS HiFi from selling Bel Canto products as an unauthorized dealer. But Monsanto makes it clear that the allegation of competitor complaints followed by a response, such as termination of a dealership, is not sufficient to establish a conspiracy; pleading no more than those facts is likewise insufficient under Twombly. As for the steps Bel Canto has taken to prevent MSS HiFi from continuing as an unauthorized dealer, every one of them is consistent with Bel Canto's enforcing its rights under its other Dealership Agreements (such as terminating Mt. Washington for selling to MSS HiFi), **[*19]** or with its rights under the Lanham Act (such a contacting eBay to remove MSS HiFi listings of Bel Canto products). Because all of the actions pleaded are equally consistent with Bel Canto's business decision to enforce its rights, as with an actual agreement with its other authorized dealers, they do not give rise to a plausible inference of a conspiracy under Monsanto and Twombly.

2. *"Unreasonable " restraint of trade*

The failure to allege an agreement to restrain trade is sufficient by itself to doom the anti-trust counterclaims. But even if MSS had pleaded an agreement to restrain trade between Bel Canto and its authorized dealers, I would dismiss its antitrust counterclaims, because it has not alleged that this agreement constituted an unreasonable restraint of trade.

a. Controlling law

Pleading an agreement to restrain trade is not sufficient to state a claim under *section 1* of the Sherman Act. As the Supreme Court has explained, "the Sherman Act's prohibition of '[e]very' agreement in 'restraint of trade,' prohibits only agreements that *unreasonably* restrain trade." *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 133, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)* (emphasis in original); see also *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. **[*20]** Thus, the party challenging an agreement bears the burden of showing that the agreement is, in fact, unreasonably anticompetitive in the circumstances. "If a § 1 plaintiff establishes the existence of an illegal contract or combination, it must then proceed to demonstrate that the agreement constituted an unreasonable restraint of trade." *Capital Imaging, 996 F.2d at 542*; see also *Toledo Mack Sales & Service, Inc. v. Mack Trucks, Inc., 530 F.3d 204, 218 (3d Cir. 2008)*.

An anti-trust claimant can show that an agreement unreasonably restrains trade in one of two ways.[1] See *Capital Imaging, 996 F.2d at 542*. First, certain kinds of agreements are, by their nature, presumed to constitute unreasonable restraints. "[C]ertain kinds of agreements will so often prove so harmful to competition and so rarely prove justified that the antitrust laws do not require proof that an agreement of that kind is, in fact, anticompetitive in the particular circumstances. An agreement of such a kind is unlawful per se." *NYNEX, 525 U.S. at 133*; see also *Major League Baseball Properties, Inc. v. Salvino. Inc., 542 F.3d 290, 315 (2d Cir. 2008)* ("MLB" herein).

However, the class of agreements considered unreasonable per se is limited. *Floors-N-More, 142 F. Supp. 2d at 500* (quoting *Capital Imaging, 996 F.2d at 542*). It includes agreements between competitors at the same level of distribution to fix prices, divide a market; or otherwise restrain competition — so-called "horizontal" agreements. See *MLB, 542 F.3d at 315*. The per se rule was long applied to agreements between market participants at different levels of the distribution chain ("vertical" agreements), but only if the agreement involved price restraints or price-fixing. However, since 2007, no vertical restraint is considered illegal per se under the Sherman Act. *Leegin, 551 U.S. at 877* (overruling *Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 31 S. Ct. 376, 55 L. Ed. 502 (1911))*. Thus, "agreements between persons at different levels of a market structure, for example between manufacturer and distributor or between franchisor **[*22]** and franchisee — referred to as 'vertical restraints' — are analyzed under the [so-called] rule of reason," and no longer treated as presumptively illegal. *Integrated Systems and Power, Inc. v. Honeywell Intern., Inc., 713 F. Supp. 2d 286, 291 (S.D.N.Y. 2010)* (citations omitted).

In limited circumstances, agreements to exclude a particular entity from participating in a market, for instance, by refusing to deal with that entity (so-called "group boycotts") have been deemed per se illegal. *U.S. v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*. However, a group boycott is not per se illegal unless it involves a horizontal agreement; as the Supreme Court explained in *NYNEX, 525 U.S. at 135*, "precedent limits the per se rule in the boycott context to cases involving horizontal agreements among direct competitors." Thus, an agreement between a manufacturer and its distributor — parties in a vertical relationship — to exclude one of the distributor's competitors from the market is not per se illegal. *Leegin, 551 U.S. at 877*; see also *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126 (2d Cir. 1978)*; *Floors-N-More, 142 F. Supp. 2d at 496*.

If an agreement is not an unreasonable restraint of trade per **[*23]** se, courts evaluate whether it in fact unreasonably restrains trade under the so-called "rule of reason." "The inapplicability of a per se analysis is not dispositive of Defendant's motion. The conduct alleged in the complaint would constitute a violation of *§ 1* . . . if Defendant's conduct is shown to be a violation under the rule of reason." *Integrated Systems, 713 F. Supp. 2d at 298* (citing *MLB, 542 F.3d at 316*).

---

[1] The Court is aware of the "quick look," or abbreviated **[*21]** rule of reason analysis discussed in *Major League Baseball Properties, Inc. v. Salvino, Inc., 542 F.3d 290, 317-18 (2d Cir. 2008)*. However, neither party invokes that analysis, and rightly so, as it is not applicable to the facts of this case. I therefore discuss it no further.

An unreasonable restraint of trade under the rule of reason requires "an actual adverse effect on competition *as a whole* in the relevant market." *Commercial Data Servers, Inc. v. International Business Machines Corp., 262 F. Supp. 2d 50, 78 (S.D.N.Y. 2003)* (internal citation omitted) (emphasis added); see also *Continental T. V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49 n.15, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)* (quoting *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918))*. As the Second Circuit has explained:

> Insisting on proof of harm to the whole market fulfills the broad purpose of the ***antitrust law*** that was enacted to ensure competition in general, not narrowly focused to protect individual competitors. Were the law construed otherwise, routine disputes between business competitors **[*24]** would be elevated to the status of an antitrust action, thereby trivializing the Act because of its too ready availability.

Capital Imaging, 996 F.2d at 543 (internal citations omitted).

b. The rule of reason applies here

The agreements alleged in this case are not per se unreasonable restraints of trade, because no horizontal agreement is alleged. Thus, the legality of the alleged agreement will be judged under the rule of reason.

Counterclaimants do not allege an agreement between its competitors — other Bel Canto dealers — and thus do not allege a horizontal conspiracy. Not a single allegation in the Counterclaim identifies the persons, places, or times involved in any horizontal conspiracy among Bel Canto dealers. None of the facts alleged — which detail Bel Canto's efforts to stop MSS HiFi from selling Bel Canto products — gives rise to any inference of a conspiracy or agreement among other Bel Canto dealers. Only three such dealers are identified — Stereo Exchange, AudioFeil International, and CSA Audio. The only allegation with respect to them is that they complained to Bel Canto about MSS HiFi and Boey; there is no allegation that they did so together, or only after conspiring **[*25]** to boycott MSS HiFi from the high end audio market. Indeed, these dealers are not alleged to have agreed amongst themselves to do anything at all.

As stated above, I do not believe Counterclaimants plausibly allege an agreement between Bel Canto and its authorized dealers, either. But even if they succeeded in doing so, such a "vertical" agreement is not per se illegal. *Leegin, 551 U.S. at 877*. Under controlling Supreme Court and Second Circuit precedent, and analogous cases from this District, such allegations do not state a per se illegal horizontal restraint of trade. See *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*; *Oreck, 579 F.2d at 126*; *Integrated Systems, 713 F. Supp. 2d at 286*; *Floors-N-More, 142 F. Supp. 2d at 496*. Thus, the rule of reason applies.

c. Counterclaimants fail to allege a violation under the rule of reason

Under the rule of reason analysis, Counterclaimants must allege that that Bel Canto's actions have had an actual adverse effect on competition as a whole in the relevant market. This requires pleading (1) a relevant market, (2) an anti-trust injury, i.e., an adverse effect on competition in the market, and (3) anti-competitive conduct **[*26]** by Bel Canto that causes the injury. *Commercial Data Servers, Inc. v. International Business Machines Corp., 2002 U.S. Dist. LEXIS 5600, 2002 WL 1205740, at *4-8 (S.D.N.Y. March 15, 2002)*.

i. *Relevant market*

"In order to plead an antitrust violation under the rule of reason, a plaintiff must allege a relevant market, including both a product market and a geographic market." *Integrated Systems, 713 F. Supp. 2d at 298*. As this Court explained in *Commercial Data, 262 F. Supp. 2d at 63-64*:

> The relevant product market is "the area of effective competition" within which a firm's products compete. The market must include all products "that have reasonable interchangeability for the purposes for which they are produced — price, use and qualities considered." Products are "reasonably interchangeable" where there is

> sufficient cross-elasticity of demand, i.e., where consumers would respond to an increase in the price of one product by purchasing another product. Products need not be identical, however, to be included in the same market, complete functional overlap is not required.

Market definition is frequently a fact-intensive inquiry and courts are hesitant to grant a motion to dismiss for failure to allege an appropriate **[*27]** market. Nevertheless:

> To survive a Rule 12(b)(6) motion to dismiss, an alleged product market must bear a rational relation to the methodology courts prescribe to define a market for antitrust purposes — analysis of the interchangeability of use or the cross-elasticity of demand, and it must be plausible. Cases in which dismissal on the pleadings is appropriate frequently involve either (1) failed attempts to limit a product market to a single brand . . . that competes with potential substitutes or (2) failure even to attempt a plausible explanation as to why a market should be limited in a particular way.

Todd v. Exxon Corp., 275 F.3d 191, 200 (quoted in *Integrated Systems, 713 F. Supp. 2d at 298*).

Here, Counterclaimants fail to allege a proper market against which to measure their allegations of anti-competitive impact. Few allegations in the Counterclaim even suggest which market should be used to judge Bel Canto's behavior. First, Counterclaimants allege that Bel Canto is the "exclusive" manufacturer of "unique lines of audio equipment," including "highly compact, high-powered digital amplifiers and low-noise, high dynamic range digital-to-analog converters." (Counterclaim, ¶ 8.) **[*28]** These products are alleged to have "appeal for a select segment consumers, particularly in urban areas like New York City." Counterclaimants allege that "no other manufacturer produces equipment with like features on a competitive scale." (Id.) Next, Counterclaimants describe their competitors in the market as "three outlets for high end audio products in the New York Tri-State area." (Id. ¶ 17.) Finally, Counterclaimants suggest a deleterious impact on competition in the "niche market for compact high power digital amplifiers and digital to analog converters" (id. ¶ 1), or the "digital amplifier and digital-to-analog converter market," (id. ¶¶ 54, 123).

These allegations are not sufficient. Courts in the Second Circuit generally reject efforts define a market as consisting of a single brand, and will dismiss a complaint that alleges only such a market. "[A]ntitrust law protects competition, not competitors. Thus, courts generally conclude that single brands do not constitute separate markets." *Commercial Data, 262 F. Supp. 2d at 66* (collecting authority).

Counterclaimants quite clearly attempt to allege a single-brand market: the market for Bel Canto's "unique" and "niche" digital amplifiers **[*29]** and digital-to-analog converters. (Counterclaim ¶ 8.) Although some of the allegations suggest a market definition broader than just Bel Canto products — "high end audio products in the New York City area" (id. ¶ 17), or the "digital amplifier and digital-to-analog converter market," (id. ¶¶ 54, 123) — Counterclaimants expressly embrace a single-brand market definition in their opposition to the Bel Canto's motion to dismiss. (Opp'n at 12-13.) Finally, as discussed further below, Counterclaimants' allegations that Bel Canto's behavior has adversely affected competition "in the market" — for example, by increasing prices for Bel Canto products — is only "plausible" on the assumption that the relevant market is the single brand of Bel Canto products.

"High end audio equipment in the New York City area" might have been a serviceable market definition; so might have "highly compact, high-powered digital amplifiers and low-noise, high dynamic range digital-to-analog converters in the Tri-State area." But Counterclaimants do not plead any facts about the nature of this market; the existence of competitors, the interchangeability of offered products, or the impact on consumer choice that would **[*30]** result if Bel Canto were to raise prices. Thus, even had Counterclaimants tried to define a market larger than a single brand, they would have failed to attempt any "plausible explanation as to why [that] market should be a limited in [that] particular way," *Todd, 275 F.3d at 200*, and failed to plead any facts that would allow the Court to make a meaningful assessment of market power, the cross-elasticity of demand, or any of the other components of anti-trust analysis.

Because they have not alleged a plausible market, Counterclaimants have failed to state a claim for a violation of *section 1* of the Sherman Act under the rule of reason.

ii. *Adverse effect on competition*

At this point, I have identified two sufficient bases for dismissing the anti-trust counterclaims: Counterclaimants' failure to plead an agreement, and their failure to identify a plausible market. But there is yet another failing in the pleadings that requires dismissal: Counterclaimants have failed to allege an "adverse effect on competition" within an appropriate market.

"The traditional indicators of an adverse effect" on competition in a market are "reduced output, increased price, or decreased quality." *Commercial Data, 262 F. Supp. 2d at 78*. **[*31]** A party lacking such direct evidence of an adverse effect on competition may be able to prove it instead by showing that the defendant possessed "market power" and "that 'other grounds [exist] to believe that the defendant's behavior will harm competition market-wide such as the inherent anti-competitive nature of defendant's behavior or the structure of the interbrand market.'" *Id. at 78* (quoting *Clorox Co. v. Sterling Winthrop, Inc., 117 F.3d 50, 59 (2d Cir. 1997))*.

"Market power is defined as the power to raise prices significantly above the competitive level without losing all of one's business." *American Medical Ass'n, 588 F. Supp. 2d at 447-48* (quoting *Kasada, Inc. v. Access Capital Inc., 2004 U.S. Dist. LEXIS 25257, 2004 WL 2903776, *8 (S.D.N.Y. Dec. 14, 2004))*. If a business has "market power," then there is a risk that its conduct can cause anti-competitive effects, and its practices will be scrutinized even if the plaintiff cannot demonstrate a causal link between those practices and reduced output, increased price, or decreased quality. In this way, proof of market power acts as a proxy for proof of adverse effects on competition.

On the other hand, when there is no evidence that competition has been **[*32]** harmed, and no evidence that the defendant possesses market power, the courts have little reason to be concerned about the anti-competitive effects of the behavior complained of. The Second Circuit explains that:

> firms lacking substantial market power act against their own self-interest when they raise prices, reduce output, or otherwise restrain trade. The marketplace itself will discipline such misguided efforts as buyers switch to substitutes or new sources of supply enter the market. When market power is lacking, antitrust litigation is not needed to police restraints and maintain competition.

Capital Imaging, 996 F.2d at 546 (internal citation, bracket and ellipses omitted).

Failure to allege adverse effects warrants dismissal of the complaint: "Like the relevant market definition, the adverse effect on competition is a requirement that must be alleged at the pleading stage and can be the basis for a motion to dismiss." *Integrated Systems, 713 F. Supp. 2d at 299* (citing *Electronics Communs. Corp. v. Toshiba Am. Consumer Prods., 129 F.3d 240, 244-46 (2d Cir. 1997))* (other citation omitted).

Counterclaimants have failed to plead any indicators of diminished competition in any relevant **[*33]** market — e.g., high end audio equipment, including amplifiers and digital-to-analog converters, in the New York City or Tri-State area. Of course, they have offered purely conclusory statements, like the one that Bel Canto misconduct "has had, and continues to have, a deleterious effect on the availability of goods in the applicable market" and "has caused additional consumer injury through a diminishment of services and their quality." But while this might conceivably be true with respect to the market for Bel Canto products, that is not an appropriate market definition, as discussed above. Bel Canto's distribution structure, and its willingness to terminate dealers who do not abide by the restrictions Bel Canto imposes, may very well reduce intrabrand competition, driving up the prices for Bel Canto products and decreasing the availability and quality of service for them. However, this restraint on competition is not considered necessarily "unreasonable" because any decrease in *intra*brand competition will likely have the effect of stimulating *inter*brand competition. Assuming there is a competitive market for high-end audio equipment, any increase in Bel Canto prices caused by eliminating **[*34]** discounters may have the effect of driving consumers to Bel Canto's competitors. Thus, while vertical restraints, such as a manufacturer terminating a distributor, have the potential to restrain intrabrand competition, they also have "real potential to stimulate interbrand competition," which the Supreme Court has identified as "the primary concern of ***antitrust law***." *Business Electronics, 485 U.S. at 724*.

Counterclaimants have not alleged any adverse effects on the interbrand market for high-end audio equipment of the kind that Bel Canto manufactures. Nor has it pleaded that Bel Canto has power in that market. Having failed in both, the anti-trust Counterclaims must be dismissed. *Integrated Systems, 713 F. Supp. 2d at 299-300*.

This Court will not allow a "routine dispute" between the parties to "be elevated to the status of an antitrust action," and "thereby trivialize[e] the Act because of its too ready availability." *Capital Imaging, 996 F.2d at 543*. Counterclaimants have failed conclusively to allege an anti-trust violation arising out of Bel Canto's actions in this case. Count I of the Counterclaim is dismissed.

3. *The Donnelly Act claim (Count IX) fails for the same reasons*

Section 340 of the New York General Business Law, **[*35]** known as the Donnelly Act, is modeled after the Sherman Act. *X.L.O. Concrete Corp. v. Rivergate Corp., 83 N.Y.2d 513, 634 N.E.2d 158, 611 N.Y.S.2d 786 (1994)*. Indeed, the New York Court of Appeals has stated that the Donnelly Act "should generally be construed in light of federal precedent and given a different interpretation only where State policy, differences in the statutory language or the legislative history justify such a result." *Worldhomecenter.com, Inc. v. KWC America, Inc., 2011 U.S. Dist. LEXIS 104496, 2011 WL 4352390, at *2 (S.D.N.Y. Sept. 15, 2011)* (citing *Anheuser—Busch, Inc. v. Abrams, 71 N.Y.2d 327, 335, 520 N.E.2d 535, 525 N.Y.S.2d 816 (1988))*.

For the same reasons the Counterclaim fails to state a claim under the Sherman Act, it also fails to state a claim under the Donnelly Act. *Commercial Data, 262 F. Supp. 2d at 84* (citing *Empire Volkswagen, Inc. v. World-Wide Volkswagen Corp., 814 F.2d 90, 98 n. 4 (2d Cir. 1987))*. Count IX of the Counterclaim is therefore dismissed.

C. Counterclaims based on Bel Canto's allegedly false statements

With the exception of two claims based on contract theories, Counterclaimants' remaining causes of action are based on Bel Canto statements that Counterclaimants allege are false. I address each claim separately below.

1. *Commercial* ***[*36]*** *disparagement/defamation (Count II)*

Counterclaimants seek damages for commercial disparagement under New York law. To state a claim for commercial disparagement, they must allege that Bel Canto directed defamatory statements at the quality of MSS HiFi's goods or services, and that the statements caused special damages. See *Ruder & Finn v Seaboard Sur. Co., 52 N.Y.2d 663, 670-71, 422 N.E.2d 518, 439 N.Y.S.2d 858 (1981)*.

Counterclaimants allege that Bel Canto disparaged them by making statements on eBay, and in letters to the authorized dealers that Bel Canto terminated for selling to MSS HiFi, to the effect that Counterclaimants engaged in "illegal" behavior, including infringement of Bel Canto's intellectual property rights. (Id. ¶¶ 58-66.) Counterclaimants allege (1) that these statements "intended to and did call into question the quality" of MSS HiFi's "goods or services in order to inflict economic harm" on MSS HiFi; and (2) that Bel Canto knew they were false when they made them. (Id. ¶ 63). Counterclaimants allege that these false statements have caused MSS HiFi to suffer damages in the form of diminished reputation and lost business opportunities.

These allegations state a claim for commercial disparagement. Bel **[*37]** Canto's statements can be taken to mean that MSS HiFi's purported "Bel Canto" products are not the "genuine article," and therefore inferior to Bel Canto products offered by Bel Canto through its authorized dealers. Bel Canto's statement of fact to the effect that Boey and MSS HiFi conduct their business illegally, together with an allegation of damages, also states a claim for defamation. Counterclaimants' allegations, if believed, give rise to plausible entitlement to relief, and therefore survive Bel Canto's motion to dismiss.

Of course, I have already found — after hearing evidence presented by both sides — that Bel Canto is likely to succeed in proving that Counterclaimants did, in fact, violate Bel Canto's intellectual property rights. *Bel Canto, 2011 U.S. Dist. LEXIS 146701, 2011 WL 6355215, at *10-12, 23*. If this conclusion is reached again after trial, it would provide Bel Canto with a complete defense to a commercial disparagement or defamation claim — truth. "It is axiomatic that a claim for commercial disparagement — which New York recognizes as the tort of either trade libel or disparagement of goods — rises and falls on the truth or falsity of a statement that is actually made." *Imig, Inc. v. Electrolux Home Care Products, Ltd., 2007 U.S. Dist. LEXIS 20530, 2007 WL 900310, at *19 (E.D.N.Y. Mar. 22, 2007)* **[*38]** (citing *Restatement of Torts (Second) §§ 626*, *629* (1977)). Although my finding was only preliminary, and is not binding on future proceedings (summary judgment or trial), Counterclaimants should think very carefully about whether they wish to continue pursuing this claim. If they do, and they lose, I will entertain a motion for Rule 11 sanctions.

Assuming Counterclaimants continue to press this claim, Bel Canto is free to renew its argument on a motion for summary judgment that these statements are protected by the absolute litigation privilege. See *Kilkenny v Law Off. of Cushner & Garvey, LLP, 76 A.D.3d 512, 905 N.Y.S.2d 661 (2d Dept 2010)*. To prove that its statements to eBay and to its former authorized dealers were "part of" the instant judicial proceeding, Bel Canto will need to introduce factual material into the record that is not properly considered on a motion to dismiss. See, e.g., *O'Brien v. Alexander, 898 F. Supp. 162, 171 (S.D.N.Y. 1995)* (collecting cases), affd in part *101 F.3d 1479 (2d Cir. 1996)*.

2. *Tortious interference with prospective economic advantage*

Counterclaimants next allege that Bel Canto tortiously interfered with its prospective economic advantage.

> Under New York law, to state **[*39]** a claim for tortious interference with prospective economic advantage, the plaintiff must allege that "(1) it had a business relationship with a third party; (2) the defendant knew of that relationship and intentionally interfered with it; (3) the defendant acted solely out of malice, or used dishonest, unfair, or improper means; and (4) the defendant's interference caused injury to the relationship."

Kirch v. Liberty Media Corp., 449 F.3d 388, 400 (2d Cir. 2006) (citation omitted).

Counterclaimants allege that Bel Canto knew that MSS HiFi had a business relationship with eBay and the customers it gained through eBay, and that it used "improper means" to interfere with those relationships, and thereby caused damage to MSS HiFi. The "improper means" alleged are Bel Canto's defamatory accusations that MSS HiFi and Boey violated Bel Canto's intellectual property rights. Independently tortious behavior that interferes with an economic relationship is, by itself, a wrongful means that may give rise to liability. Cf. *Carvel Corp. v Noonan, 3 N.Y.3d 182, 818 N.E.2d 1100, 785 N.Y.S.2d 359 (2004)*.

Of course, this cause of action also collapses if what Bel Canto said to eBay (and, through it, MSS HiFi's customers on eBay) was true. **[*40]** If Counterclaimants did, in fact, violate Bel Canto's intellectual property rights, then Bel Canto's saying so was not a "wrongful means" and Bel Canto will not be liable for tortious interference with MSS HiFi's prospective relationships. Thus, for the reasons discussed above, Counterclaimants should consider carefully whether they wish to pursue this claim any further in light of my early finding that Bel Canto is likely to succeed in proving that Counterclaimants did in fact violate the Lanham Act.

It appears that Counterclaimants would also premise tort liability on Bel Canto's termination of Mt. Washington, Alpha Stereo ("Alpha") and Precision Audio and Video ("Precision") as authorized Bel Canto dealers. As noted, Counterclaimants allege that Mt. Washington had a secret agreement to supply MSS HiFi with Bel Canto products in violation of Mt. Washington's Dealership Agreement, and that when Bel Canto found out, it terminated Mt. Washington. MSS HiFi had similar agreements with Alpha and Precision, but after Bel Canto obtained limited discovery, it discovered that MSS HiFi's inventory of Bel Canto products had been supplied by Alpha and Precision, and terminated them as authorized **[*41]** dealers. Counterclaimants suggest that Bel Canto may be liable for interfering with their ability to enter additional such agreements with Mt. Washington, Alpha and Precision in the future.

Unlike the allegation that Bel Canto published defamatory statements to eBay and its customers, these allegations do not state a claim for tortious interference. I have already determined, in the context of this motion, that Counterclaimants have not alleged any anti-trust violation as a matter of law. Insofar as terminating its authorized dealers for breaching their Dealership Agreements was not in any way illegal or tortious — it was not anticompetitive, and no other sort of illegality is suggested — it was not an "improper" or "wrongful" means, or intended solely to injure MSS HiFi. Rather, it was a perfectly legal and proper business decision to enforce the Dealership Agreement's proscription of sales to unauthorized resalers. As the New York Court of Appeals has explained, "Conduct that is not criminal or tortious will generally be 'lawful' and thus insufficiently 'culpable' to create liability for interference with prospective contracts or other nonbinding economic relations." *Carvel, 3 N.Y.3d at 190*. **[*42]** Since there are no allegations tending to show that the terms of the dealer agreements were either illegal or otherwise than as alleged, Counterclaimants have not stated a claim for tortious interference based on the termination of Mt. Washington, Alpha and Precision as authorized dealers.

3. *Misleading business practices under the Lanham Act and the New York GBL*

Counterclaimants next allege that Bel Canto engages in false advertising and misleading business practices, in violation of the Lanham Act and New York's GBL.

a. False advertising under the Lanham Act, GBL § 350 (Counts V and VII)

Section 43(a)(1)(B) of the Lanham Act prohibits any representation "in commercial advertising or promotion [that] misrepresents the nature, characteristics . . . or qualities . . . of goods, services, or commercial activities." To state a claim under this section, Counterclaimants must allege that Bel Canto made a misrepresentation in commerce that: (1) actually deceived or tended to deceive its customers; (2) was material, i.e., likely to influence purchasing decisions; and (3) injured or was likely to injure MSS HiFi. See *Gameologist Group, LLC v. Scientific Games Intern., Inc., 838 F.Supp.2d 141, 2011 U.S. Dist. LEXIS 123150 , 2011 WL 5075224, at *17 (S.D.N.Y. 2011)* **[*43]** (citing *Time Warner Cable, Inc. v. DIRECTV, Inc., 497 F.3d 144, 153 n.3 (2d Cir. 2007))*.

The scope of *GBL § 350* is similar, prohibiting the promulgation of "False advertising in the conduct of any business, trade or commerce or in the furnishing of any service in this state." Advertising is "false" if it "is misleading in a material respect." *GBL § 350-a(1)*.

The following allegations are relevant to Counterclaimants' false advertising claims.

First, they allege that, at some point in the past, via some medium, Bel Canto conveyed to consumers that its products are sold with a ninety-day warranty. (Counterclaim ¶ 34.) This statement was misleading, Counterclaimants say, because Bel Canto will not honor the warranty on products sold by unauthorized dealers, like MSS HiFi. (Id. ¶ 35.) For example, Saim Bensaada bought a Bel Canto product from MSS HiFi after MSS HiFi was terminated as an authorized dealer. The product malfunctioned, and Bensaada sought warranty protection from Bel Canto, which initially refused to honor the warranty under its then-undisclosed policy, but eventually relented and honored the policy. (Id. ¶ 36-37.)

Counterclaimants admit that the policy of refusing to honor the **[*44]** warranty on products sold by unauthorized dealers is now disclosed on Bel Canto's website. The date of this disclosure is not revealed.

Even viewed generously, the Counterclaim does not adequately allege a misrepresentation. It may be misleading to say, without qualification, that Bel Canto products carry warranties if some do not. But this misrepresentation is not pleaded with any factual specificity, i.e., where, when and to whom it was made. Without any allegation of the words Bel Canto used, and where it used them, the Court cannot conclude that Counterclaimants have plausibly stated a claim for relief. For example, the Court cannot evaluate whether the statement of warranty coverage was unqualified, or whether the fact that the warranty was conditioned on purchasing products only through an authorized dealer was expressed in a way that would make the alleged omission not misleading. To evaluate context, the Court must also know where the representation was made — on the website, in the manual, on the warranty card — and what other information was readily available to one reading it. Finally, from everything else the Counterclaim alleges, it appears to have been well known that **[*45]** Bel Canto sells only through a network of authorized dealers. In the one instance of customer confusion alluded to, there is no allegation that Mr. Bensaada relied on any statement (or omission) made by Bel Canto about the availability of warranty coverage.

For this reason, the counterclaim has to be dismissed — albeit without prejudice, if they can supply the missing allegations.

Counterclaimants also argue that Bel Canto's disclosure of its policy is itself a misleading statement. This is so, they claim, because Bel Canto must honor all warranties, even those on products sold by non-authorized dealers, under *GBL § 369-b*. As explained in my prior decision, that statute forbids a manufacturer from refusing to honor warranties on the sole ground that the dealer that sold the product was not authorized to do so. *Bel Canto, 2011 U.S. Dist. LEXIS 146701, 2011 WL 6355215, at *16-18*. Counterclaimants suggest that it is misleading to say that Bel Canto's policy is to refuse to honor a warranty when the GBL says that Bel Canto must honor that warranty.

At this stage, I will allow this (apparently novel) theory to continue. In my earlier decision, I concluded that Defendants had not shown that Bel Canto did not have other reasons **[*46]** for refusing to honor any warranty — reasons that, if proven at trial, would render anyone's reliance on the GBL immaterial. *Bel Canto, 2011 U.S. Dist. LEXIS 146701, 2011 WL 6355215, at *16-22*. This is not an issue we can resolve on a motion to dismiss, however; if the trier of fact were to reach a different conclusion at trial, then the GBL issue would remain in the case.

Finally, Counterclaimants point to the statements that Bel Canto made to eBay and its terminated authorized dealers, to the effect that Counterclaimants were selling Bel Canto products in violation of the Lanham Act. But this "false advertising" theory is duplicative of the commercial disparagement claim, which I have already allowed to survive, subject to the warning that if what Bel Canto said was true, Counterclaimants have no case, and they know it. Although I have already found that Bel Canto is likely to succeed in proving that Counterclaimants violated the Lanham Act, that decision was non-final and non-binding. Even so, counsel for the Counterclaimants is advised to keep its Rule 11 obligations in mind as the case proceeds.

b. Deceptive trade practices under GBL § 349 (Count VI)

Under *section 349*, "deceptive acts or practices in the conduct **[*47]** of any business, trade, or commerce or in the furnishing of any service in this state are hereby declared unlawful." *GBL § 349*. Although violations of this statute are prosecuted by the New York Attorney General, see id. *§ 349(b)-(g)*, the statute was amended in 1980 to provide a private right of action for citizens who wish to recover damages or to enjoin an unlawful act or practice. Id. *§ 349(h)*.

To state a claim under *§ 349(h)*, a plaintiff must show that the defendant has engaged in: (1) consumer-oriented conduct that is (2) materially misleading and that (3) plaintiff suffered injury as a result of the deceptive act or practice. *City of New York v. Smokes-Spirits.com, Inc., 12 N.Y.3d 616, 621, 911 N.E.2d 834, 883 N.Y.S.2d 772 (2009)*. A plaintiff alleging an injury that is indirect or derivative, such that it arises solely as a result of injuries sustained by another party, lacks standing to pursue a *§ 349* claim. *Id. at 622* (citing *Blue Cross & Blue Shield of N.J., Inc. v. Philip Morris USA, Inc., 3 N.Y.3d 200, 207, 818 N.E.2d 1140, 785 N.Y.S.2d 399 (2004))*. However, entities other than consumers, such as business competitors, have been held to have standing to bring a claim "so long as harm to the public at large is at issue." *Securitron Magnalock Corp. v. Schnabolk, 65 F.3d 256, 264 (2d Cir. 1995)*; **[*48]** see generally *Worldhomecenter, 2011 U.S. Dist. LEXIS 104496, 2011 WL 4352390, at *7*.

Counterclaimants do not specify which of Bel Canto's business practices violate *§ 349*. It may be that this claim is intended to encompass the tortious interference, disparagement, and advertising claims discussed already. To the extent the first two of those claims survive, subject to this Court's repeated warnings about their viability, I will allow the GBL § 349 claim to survive as well, subject to the same warning.

D. Contract claims

Finally, Bel Canto brings two counterclaims that arise under the Dealership Agreement between Bel Canto and MSS HiFi. As noted, the parties entered this standard form agreement in early 2009, and Bel Canto terminated the agreement in November 2009.

1. *Minnesota Franchise Act (Count IV)*

First, Counterclaimants allege that MSS HiFi was terminated as an authorized dealer without cause and without 60 days notice, in violation of the *Minnesota Franchise Act*. That Act creates mandatory contract terms between franchisees and franchisors in Minnesota, including the term MSS HiFi relies on to establish a breach. Counterclaimants allege that the Dealership Agreement is governed, by its terms, by Minnesota law, **[*49]** including the *Franchise Act*.

In the Order that transferred this case to me, Judge Doty rejected Counterclaimants reliance on the *Franchise Act* because they failed to allege a franchisee-franchisor relationship to which the Act could apply. (ECF No. 65, at 7-8.) Counterclaimants have not corrected the deficiencies that Judge Doty identified, and I see no reason to revisit his reasoning. Thus, Count IV of the Counterclaim is dismissed.

2. *Breach of the duty of good faith and fair dealing (Count VIII)*

In the alternative to Count IV, Count VIII relies on the duty of good faith and fair dealing implicit in all contracts. This Count fails for several independently sufficient reasons. The most simple is that the only breach of the duty that Counterclaimants allege is that Bel Canto terminated MSS HiFi pursuant to an anti-trust conspiracy with its other authorized dealers. I have already concluded that no such conspiracy has been alleged as a matter of law. Thus, Count VIII of the Counterclaim is dismissed as well.

CONCLUSION

The motion is GRANTED with respect to Counts I, IV, VIII and IX, which are dismissed. The motion is DENIED with respect to Counts II, III, V, VI and VII, subject to the limitations **[*50]** discussed with each, and warning I have issued to counsel for the Counterclaimants above.

Counterclaimants have leave to amend Counts V and VII to supply the allegations necessary for their primary theory of false advertising.

Dated: June 20, 2011

Judges: NARES, Acting P. J.; McDONALD, J., IRION, J. concurred.

Opinion by: NARES, Acting P. J.

Opinion

This action arises out of a loan to a real estate development property company, Pergola, a Nevada LLC controlled by plaintiff Robert W. Wilson. The loan was secured by a deed of trust on undeveloped land owned by Wilson's company and a deed of trust on a residence owned by Wilson and his wife, plaintiff Sharon Wilson (together, the Wilsons). Defendant Coast Capital Mortgage Company (Coast), a licensed real estate broker, and Coast Capital Income Fund, LLC (together, Coast defendants) arranged for a $1.6 million loan (the Pergola loan) from defendant Polo Investment Fund No. 1, LLC (Polo 1) and Polo Investment Funds, LLC (together, Polo Fund). Thereafter, Pergola borrowed an additional $1.25 million from Aztec Financial (the Aztec loan), also secured by a deed of trust on the undeveloped land. Subsequently, Pergola borrowed an additional $500,000 from Brian and Gayl Hynek (the Hyneks), secured by a third deed of trust on the undeveloped land.

When the loans matured and Pergola **[*2]** did not pay them off, nonjudicial foreclosure proceedings were instituted. Before the foreclosure process was complete, the Hyneks purchased the loans from Polo 1 and Aztec Financial.

The Wilsons filed the instant action against Coast, Polo Fund and the Hyneks, alleging that that they had resisted putting up their residence as additional security, but that they did so because a representative of Coast and Polo Fund, Joe Monte, orally represented to them that: (1) in the event of a foreclosure, the lender would first foreclose on the vacant land and, only if there were a deficiency, would the lender foreclose on their residence; (2) the residence would be released once they provided Polo Fund with an appraisal showing the vacant land to be worth at least $5 million; and (3) the loan documents would guarantee and provide that the residence would only be foreclosed upon if there were a deficiency after the foreclosure of the vacant land. The complaint alleges that they signed the loan documents based upon Monte's representations. The complaint further alleges that the Hyneks conspired with the other defendants to foreclose on the residence.

Defendants filed a series of demurrers, which, **[*3]** after the second demurrer, left only causes of action for unfair business practices under *Business and Professions Code section 17200* (all undesignated statutory references are to the Business and Professions Code) and intentional infliction of emotional distress in the Wilsons' second amended complaint. The court sustained the defendants' demurrers to these remaining causes of action without leave to amend.

On appeal, the Wilsons contend the court erred in sustaining the demurrers to their second amended complaint because (1) their unfair business practices claim was properly pled; and (2) their emotional distress cause of action was also properly pled. The Wilsons also contend they should be given leave to amend because the notice of default recorded during the foreclosure process was defective because it was recorded by the wrong entity. We affirm.

FACTUAL AND PROCEDURAL BACKGROUND

Because we are reviewing a judgment of dismissal following the sustaining of a demurrer, we take much of the factual background from the applicable complaint in this action. The applicable complaint is the Wilson's second amended complaint.

A. *The Pergola Note and Related Deeds of Trust*

In early 2004 Wilson **[*4]** was manager of Pergola, which was in the process of purchasing 22 acres of land in Carlsbad for development or for resale (Carlsbad vacant land). In order to obtain funds necessary to acquire the Carlsbad vacant land, Pergola, through the Coast defendants, arranged for a $1.6 million loan (the Pergola loan) with Polo 1 as the lender.

The Pergola loan was evidenced by a note secured by deed of trust (Pergola note) dated January 12, 2004, and was executed by Mr. Wilson as manager of Pergola. The Pergola note was secured by a first deed of trust on the Carlsbad vacant land and was also executed by Mr. Wilson as manager of Pergola (Pergola deed of trust), by a second deed of trust executed by Wilson and his wife, Sharon L. Wilson (Wilson deed of trust) on their personal residence on Amberwood Court in Carlsbad (the Amberwood property), and by a deed of trust on a condominium owned by the Wilsons.

The Wilsons' complaint alleges that just prior to the close of the Pergola loan, Monte, an agent of the Coast defendants, told Mr. Wilson that, in addition to the Carlsbad vacant land, the lender required two additional properties as security for the Pergola loan; i.e., the Amberwood property and **[*5]** a condominium owned by the Wilsons. The Wilsons also asserted that they resisted putting up such additional security, but that they did so because Monte orally represented to them that: (1) in the event of a foreclosure, the lender would first foreclose on the Carlsbad vacant land and, only if there were a deficiency would the lender foreclose on the Amberwood property or the condominium; (2) the Amberwood property and the condominium would be released once they provided Polo Fund with an appraisal showing the Carlsbad vacant land to be worth at least $5 million; and (3) the loan documents would guarantee and provide that the Amberwood property would only be foreclosed upon if there were a deficiency after the foreclosure of the Carlsbad vacant land. The complaint alleges that they signed the loan documents based upon Monte's representations,.

The second amended complaint alleges that around October 2004 the Wilsons provided the Coast defendants with an appraisal for $6.6 million on the Carlsbad vacant land and information that Pergola had a pending resale of the property for $7 million. The complaint also alleges that, contrary to the representations by Monte, defendants agreed to **[*6]** release the condominium, but not the Amberwood property, even though the Wilsons complied with all of the conditions of the oral release agreement.

B. *Aztec Second Deed of Trust on Carlsbad Vacant Land*

In or about March 2004, Pergola borrowed an additional $1.25 million from Aztec Financial and secured it with a second deed of trust only on the Carlsbad vacant land.

C. *The Hyneks' Third Deed of Trust on Carlsbad Vacant Land*

On April 19, 2004, Pergola borrowed $500,000 from the Hyneks (Hynek loan), and secured it by a third deed of trust on the Carlsbad vacant land.

D. *The Hyneks Foreclose on the Carlsbad Vacant Land*

The Hynek loan matured on April 21, 2005. On May 6, 2008, the Hyneks foreclosed on their third deed of trust and became the owners of the Carlsbad vacant land, subject only to the Pergola deed of trust. Prior to the foreclosure, the Hyneks purchased the deed of trust securing the $1.25 million Aztec loan.

E. *Defaults on the Pergola Loan and Wilson Deed of Trust*

In or about April/May 2008, Polo 1 and the Coast defendants commenced separate foreclosures on the Pergola deed of trust and on the Wilson deed of trust, setting the sale of the Carlsbad vacant land for August 5, 2008, and **[*7]** the sale of the Amberwood property for August 15, 2008.

F. *The Wilsons' Alleged Attempt To Bid the Amount Due at Foreclosure Sale*

The complaint alleges that the Wilsons were "ready, willing and able" to bid at the trustee's sale the amount due at the foreclosure sale of the Pergola deed of trust set for August 5, 2008, or, alternatively, that they would be willing to purchase the Pergola note. In support of this allegation, the complaint quotes from a letter sent by the Wilsons' attorney to the attorney for the Coast defendants:

> "Mr. Wilson has arranged to facilitate a bid on the 22 acres, which will meet or exceed the $1,856,316.77 loan balance. Mr. Wilson plans to provide payment for the 22 acres in the form of a cashier's check. In lieu of a Trustee's Sale on the 22 acres, *Mr, Wilson has also offered to purchase the Deed of Trust for $1,856,316.77.* Mr. Wilson is willing and able to pay the debt which will release the Deed of Trust on the Amberwood residence. (Italics added.)

That letter also protested any postponement of the sale of the Carlsbad vacant land and informed the defendants that "if the Amberwood residence is sold prior to the [Carlsbad vacant land], your clients will be **[*8]** the Defendants in causes of action for wrongful foreclosure."

The complaint further alleges that defendants "conspired and agreed among themselves <u>not</u> to hold a foreclosure sale for the [Carlsbad vacant land], but instead to assign the note and first deed of trust for $1,660,000 to Defendants HYNEK, who would then offer the deed of trust and note as collateral to Defendants [Polo 1] and [Coast defendants]." The complaint alleges that defendants were "attempting to avoid foreclosing on the 22-acre parcel so that defendants HYNEK could hold title to that property and still be allowed to proceed with their foreclosure on [the Wilsons'] residence."

G. *Trustee's Sale of Amberwood Property*

On November 19, 2008, the trustee's sale under the Wilson deed of trust was concluded and the Amberwood property was sold to defendant U.S. Financial LLP.

PROCEDURAL BACKGROUND

A. *The Original Complaint*

In December 2008 the Wilsons filed a complaint alleging causes of action for declaratory relief, wrongful foreclosure, breach of contract, equitable relief from foreclosure sale, quiet title, cancellation of instrument, violation of *section 17200*, fraud and intentional infliction of emotional distress.

In addition **[*9]** to making substantially similar allegations as are recited, *ante,* the complaint attached as exhibits the loan documents and deeds of trust related to the transactions. The deeds of trust state that "[t]o the fullest extent allowed by law, *Borrower hereby expressly waives any right which it may have to direct the order in which any of the Property shall be sold* in the event of any sale or sales pursuant to this Deed of Trust." (Italics added.) The deeds of trust state that "Trustee and Lender, and each of [them] *shall be entitled to enforce this Deed of Trust and any other rights or security now or hereafter held by Lender or Trustee in such order and manner as they or either of them may in their absolute discretion determine.*" (Italics added.) The deeds of trust further state: "Lender, at any time and without the consent of Borrower, may grant participations in or sell, transfer, assign and convey all or any portion of its right, title and interest in and to the Loan, this Deed of Trust and other Loan Documents, guaranties given in connection with the Loan and any collateral given to secure the Loan."

The Coast defendants and Polo Fund demurred to the complaint, and the court sustained **[*10]** the demurrer without leave to amend as to the first two causes of action, finding that pursuant to the deeds of trust, the Wilsons waived their right to direct the priority and order of the foreclosure. The court also sustained without leave to amend the causes of action for equitable relief from foreclosure, quiet title and cancellation of instrument because those defendants did not claim an interest in the property. As to the remaining causes of action, the court sustained the demurrer with leave to amend.

The court sustained the Hyneks' demurrer without leave to amend as to all causes of action with the exception of the cause of action for unfair business practices and intentional infliction of emotional distress.

The Wilsons filed a verified first amended complaint that stated causes of action for breach of written contract, unfair business practices, fraud, intentional infliction of emotional distress and equitable relief. The complaint again attached the relevant loan documents and deeds of trust.

In response, the Hyneks, the Coast defendants and Polo Fund again demurred, and the court sustained the demurrers without leave to amend as to all but the causes of action for unfair business **[*11]** practices and intentional infliction of emotional distress. The court sustained the demurrers to the cause of action for breach of contract based upon the statute of frauds because it only referenced the alleged oral agreement with Monte. The court sustained the demurrers to the cause of action for fraud based upon the statute of limitations. There was no cause of action for equitable relief pleaded in the first amended complaint. The court also admonished the Wilsons "not to file an amended Complaint containing allegations inconsistent with the previously verified Complaints filed in this case."

The Wilsons filed a second amended complaint containing only causes of action for unfair business practices and intentional infliction of emotional distress, as detailed in the factual background, *ante.* However, the second amended complaint omitted as exhibits the loan documents attached to the first two complaints and omitted any references to those exhibits.

The defendants filed demurrers to the second amended complaint, which the court sustained without leave to amend. As to the first cause of action brought under *section 17200*, the court found that the Wilsons have "failed to plead facts **[*12]** indicating that the lawful acts taken by defendant Coast were unlawful, fraudulent or unfair." As to the cause of action for intentional infliction of emotion distress, the court found "the allegations as [pled] do not rise to the level of 'extreme and outrageous.'"

This timely appeal follows.[1]

DISCUSSION

I. *STANDARD OF REVIEW*

We review an order sustaining a demurrer without leave to amend de novo (*Blank v. Kirwan (1985) 39 Cal.3d 311, 318, 216 Cal. Rptr. 718, 703 P.2d 58)*, assuming the truth of all properly pleaded facts as well as facts inferred from the pleadings, and give the complaint a reasonable interpretation by reading it as a whole and its parts in context. (*Palacin v. Allstate Ins. Co. (2004) 119 Cal.App.4th 855, 861, 14 Cal. Rptr. 3d 731*.) However, we give no credit to allegations that merely set forth contentions or legal **[*13]** conclusions. (*Financial Corp. of America v. Wilburn (1987) 189 Cal.App.3d 764, 768-769, 234 Cal. Rptr. 653*.) A complaint will be construed "liberally . . . with a view to substantial justice between the parties." (*Code Civ. Proc., § 452*.) If the complaint states a cause of action on any possible legal theory, we must reverse the trial court's order sustaining the demurrer. (*Palestini v. General Dynamics Corp. (2002) 99 Cal.App.4th 80, 86, 120 Cal. Rptr. 2d 741*.) Whether a plaintiff will be able to prove its allegations is not relevant. (*Alcorn v. Anbro Engineering, Inc. (1970) 2 Cal.3d 493, 496, 86 Cal. Rptr. 88, 468 P.2d 216*.)

II. *ANALYSIS*

A. *The Wilsons' Unfair Competition Cause of Action*

Section 17200 defines "unfair competition" to "mean and include any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising" under *section 17500*. A claim made under *section 17200* "'is not confined to anticompetitive business practices, but is also directed toward the public's right to protection from fraud, deceit, and unlawful conduct. [Citation.] Thus, California courts have consistently interpreted the language of *section 17200* broadly.'" (*South Bay Chevrolet v. General Motors Acceptance Corp. (1999) 72 Cal.App.4th 861, 877, 85 Cal. Rptr. 2d 301*, **[*14]** quoting *Hewlett v. Squaw Valley Ski Corp. (1997) 54 Cal.App.4th 499, 519, 63 Cal. Rptr. 2d 118*.) "[S]ection 17200's definition is 'disjunctive,' the statute is violated where a defendant's act or practice is unlawful, unfair, fraudulent or in violation of *section 17500*." (*South Bay Chevrolet v. General Motors Acceptance Corp., supra, 72 Cal.App.4th at p. 878*; *State Farm Fire & Casualty Co. v. Superior Court (1996) 45 Cal.App.4th 1093, 1102, 53 Cal. Rptr. 2d 229*.)

The Wilsons do not assert on appeal that any of the defendants' actions were "unlawful" or "fraudulent." Rather, the sole basis for their assertion they have adequately pled such a cause of action under *section 17200* is that the defendants' actions were "unfair." This contention is unavailing.

"Determination of whether a business practice or act is 'unfair' within the meaning of *[section 17200]* entails examination of the impact of the practice or act on its victim, '" . . . balanced against the reasons, justifications and motives of the alleged wrongdoer. In brief, the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim . . . ." [Citation.]' [Citation.] In general the 'unfairness' prong 'has been used to enjoin **[*15]** deceptive or sharp practices. . . .'" (*Klein v. Earth Elements, Inc. (1997) 59 Cal.App.4th 965, 969-970, 69 Cal. Rptr. 2d 623*.)

There is a split of authority in California as to the proper definition of "unfair." The Wilsons assert the proper test for the unfairness prong is whether the practice "'offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.'" (*State Farm Fire & Casualty Co. v. Superior Court, supra, 45 Cal.App.4th at p. 1104*.)

---

[1] In their respondents' brief, the Hyneks assert that this appeal is premature because it is taken from the court's order sustaining defendants' demurrers, not the final judgment in this matter. However, as is pointed out by the Wilsons in their reply brief, the clerk of this court notified the parties by a letter dated June 29, 2010, that we would consider the appeal as being from the judgment or dismissal order.

However, this court has, on three occasions, rejected that test and has applied a much narrower test, the so-called "Cel-Tech test" for establishing unfairness. (See *Durell v. Sharp Healthcare (2010) 183 Cal.App.4th 1350, 1366, 108 Cal. Rptr. 3d 682*; *Scripps Clinic v. Superior Court (2003) 108 Cal.App.4th 917, 940, 134 Cal. Rptr. 2d 101*; *Byars v. SCME Mortgage Bankers, Inc. (2003) 109 Cal.App.4th 1134, 1147, 135 Cal. Rptr. 2d 796*.) Under that test, a plaintiff must prove that the defendant's "conduct is tethered to an[] underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***." (*Durell, at p. 1366*.)

In both their opening and reply **[*16]** briefs, the Wilsons ignore these cases. Moreover, they do not even attempt to show how their allegations in the second amended complaint can meet this test. Nor can they. As detailed, *ante,* their claims of alleged wrongdoing are directly contradicted by the terms of the deeds of trust, which they omitted as exhibits to their second amended complaint. Accordingly, the court did not err in sustaining the defendants' demurrer to the *section 17200* claim.[2]

B. *The Emotional Distress Claim*

"The elements of a prima facie case for the tort of intentional infliction of emotional distress are: (1) extreme and outrageous conduct by the defendant with the intention of causing, or reckless disregard of the probability of causing, emotional distress; (2) the plaintiff's suffering severe or extreme emotional distress; and (3) actual and proximate causation of the emotional distress by the defendant's outrageous conduct. **[*17]** [Citations.] . . . Conduct to be outrageous must be so extreme as to exceed all bounds of that usually tolerated in a civilized community." (*Cervantez v. J. C. Penney Co. (1979) 24 Cal.3d 579, 593, 156 Cal. Rptr. 198, 595 P.2d 975*.)

The court properly sustained the demurrer to the cause of action for intentional infliction of emotional distress because the Wilsons have not pled any allegations of conduct by the defendants that could be considered "outrageous." At most, this was a creditor/debtor situation, whereby the defendants were exercising their rights under the loan agreements. There are no allegations that in conducting the foreclosure proceedings any of the defendants threatened, insulted, abused or humiliated the Wilsons. Thus, the Wilsons cannot state a claim for intentional infliction of emotional distress.

C. *The Wilsons' Request for Leave To Amend*

For **[*18]** the first time on appeal, the Wilsons assert they can amend the complaint to challenge the nonjudicial foreclosure sale of the Amberwood property because the notice of default was not recorded by E.C.I. Corporation, the original trustee named in the Wilson deed of trust, but rather by PLM Lender Service as agent for the beneficiary. This contention is unavailing.

Civil Code section 2924 et seq. provides a comprehensive scheme for regulation of nonjudicial foreclosure sales. (*Gomes v. Countrywide Home Loans, Inc. (2011) 192 Cal.App.4th 1149, 1154, 121 Cal. Rptr. 3d 819*.) *Civil Code section 2924, subdivision (a)(1)* states in part that "[t]he trustee, mortgagee, or beneficiary, *or any of their authorized agents* shall first file for record, in the office of the recorder of each county wherein the mortgaged or trust property or some part or parcel thereof is situated, a notice of default." (Italics added.)

Thus, the recording of a notice of default by an authorized agent of the beneficiary is specifically authorized by that statute, and the Wilsons cannot state a claim for a defect in the recording of the notice of default.

DISPOSITION

The judgment is affirmed. Defendants shall recover their costs on appeal.

NARES, **[*19]** Acting P. J.

---

[2] Polo Fund and the Coast Defendants also assert that the Wilsons' *section 17200* claim is barred by the statute of limitations. However, as we have concluded that the *section 17200* claim fails to state a cause of action as a matter of law, we need not address this alternative contention.

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > US Surface Transportation Board

HN1[] **Transportation, Railroads**

Under *49 U.S.C.S. 10709*, the Surface Transportation Board has no authority to regulate rail rates and services that are governed by a contract. Under *49 U.S.C.S. § 10709* traffic that moves under railroad-shipper contracts generally is not subject to challenge before the Surface Transportation Board.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN2[] Class Actions, Certification of Classes

To obtain class certification plaintiffs must satisfy the four threshold requirements of *Fed. R. Civ. P. 23(a)* — commonly referred to as numerosity, commonality, typicality, and adequacy — and the two additional requirements of *Rule 23(b)(3)* — predominance and superiority.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN3[] Prerequisites for Class Action, Predominance

Predominance concerns whether plaintiffs have met their burden to show that questions of law or fact common to class members predominate over any questions affecting only individual members. *Fed. R. Civ. P. 23(b)(3)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN4[] Class Actions, Prerequisites for Class Action

In addition to the four express requirements of *Fed. R. Civ. P. 23(a)*, there are two implied requirements: (1) the class must be sufficiently defined so as to be identifiable as a class; and (2) the named representatives must fall within the class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN5[] Class Actions, Certification of Classes

A party that moves for class certification bears the burden of showing that its proposed suit meets all of the requirements for certification. Those requirements fall into two categories. First, the moving party must show that its proposed suit satisfies the two implied and the four express requirements of *Fed. R. Civ. P. 23(a)*. As for the implied requirements, plaintiffs must show (1) that their proposed class is sufficiently defined so as to be identifiable as a class; and (2) that the named representatives fall within the class. As for the express requirements, the moving party must show that (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)*. Those four express requirements commonly are referred to as numerosity, commonality, typicality, and adequacy. Failure to adequately demonstrate any of the *Rule 23(a)* requirements is fatal to class certification.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN6[] Class Actions, Certification of Classes

A party that moves for class certification must show that its proposed suit falls within at least one of the three categories of cases set forth in Fed. R. Civ. P. 23(b). Rule 23(b)(3) is intended to encompass cases in which a class action would achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results. In order to certify a class under Rule 23(b)(3), a court must find (1) that the questions of law or fact common to class members predominate over any questions affecting only individual members, and (2) that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. Fed. R. Civ. P. 23(b)(3). These two requirements commonly are referred to as predominance and superiority.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN7[] Prerequisites for Class Action, Predominance

As Rule 23(b)(3) states, in deciding whether a moving party has satisfied the predominance and superiority requirements, pertinent considerations for a court include: (A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the ligation of the claims in the particular forum; and (D) the likely difficulties in managing a class action.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN8[] Class Actions, Certification of Classes

The U.S. Supreme Court has emphasized that a class certification decision invites a close look at the case, and a class may be certified only if the trial court is satisfied, after rigorous analysis, that the applicable Fed. R. Civ. P. 23 requirements have been met. In examining the predominance requirement under Rule 23(b)(3), a court's rigorous analysis begins with the elements of the underlying cause of action. A court must examine the elements of a plaintiffs' claim through the prism of Rule 23 to determine whether the Rule 23 requirements have been met. Under Rule 23(b)(3), individual questions need not be absent. Indeed, the text of Rule 23(b)(3) itself contemplates that such individual questions will be present. The rule requires only that those questions not predominate over the common questions affecting the class as a whole. If proof of the essential elements of the cause of action requires individual treatment, then class certification is unsuitable.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Burdens of Proof > Allocation

HN9[] Sherman Act, Claims

To prevail on the merits of a claim of a violation of Section 1 of the Sherman Act, 15 U.S.C.S. § 1, at trial, plaintiffs have to prove three elements: (1) a violation of 15 U.S.C.S. § 1; (2) individual impact or injury resulting from that violation; and (3) measurable damages. In antitrust cases, injury includes both injury-in-fact and so-called antitrust injury.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN10[] Class Actions, Certification of Classes

At the class certification stage, plaintiffs need not prove their case. Instead, plaintiffs' burden at the class certification stage is to demonstrate that the elements of their claim are capable of proof at trial through evidence that is common to the class rather than individual to its members. Thus, the court's focus at the class certification stage is on how plaintiffs will attempt to prove the elements of their claim at trial.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Preponderance of Evidence

HN11[] Class Actions, Certification of Classes

In the context of determining whether to certify a class, the court can and must resolve any factual disputes relevant to the requirements for class certification — even if that requires considerations enmeshed in the factual and legal issues comprising plaintiffs' claim on the merits, and it should apply a preponderance of the evidence standard of proof in doing so.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN12[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23 does not set forth a mere pleading standard. A party seeking class certification must affirmatively demonstrate his compliance with the Rule — that is, he must be prepared to prove that there are in fact sufficiently numerous parties, common questions of law or fact, etc. A district court must be satisfied, after rigorous analysis, that the requirements of *Rule 23* have been met, and frequently that rigorous analysis will entail some overlap with the merits of the plaintiff's underlying claim. That cannot be helped. The class determination generally involves considerations that are enmeshed in the factual and legal issues comprising the plaintiff's cause of action. Nor is there anything unusual about that consequence.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN13[] Class Actions, Certification of Classes

The required rigorous factual review that a court must perform in examining whether the requirements of *Fed. R. Civ. P. 23(a)* and *(b)* have been met similarly applies to disputes among experts relevant to class certification. As the United States Court of Appeals for the Third Circuit stated: Expert opinion with respect to class certification, like any matter relevant to a *Rule 23* requirement, calls for rigorous analysis. Nothing in *Rule 23* distinguishes expert evidence from other types of evidence. Under *Rule 23* the district court must be satisfied, or persuaded, that each requirement is met before certifying a class. Like any evidence, admissible expert opinion may persuade its audience, or it may not. This point is especially important to bear in mind when a party opposing certification offers expert opinion. The district court may be persuaded by the testimony of either (or neither) party's expert with respect to whether a certification requirement is met. Weighing conflicting expert testimony at the certification stage is not only permissible; it may be integral to the rigorous analysis *Rule 23* demands.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Expert Witnesses > Credibility of Witnesses > General Overview

Civil Procedure > Judicial Officers > Judges > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN14[] **Class Actions, Certification of Classes**

Resolving expert disputes in order to determine whether a class certification requirement has been met is always a task for the court — no matter whether a dispute might appear to implicate the credibility of one or more experts. Such disputes among experts in an antitrust case may include, among other things, different views on the appropriate characterization of the relevant market, different views on how defendants structured their prices, and any other considerations relevant to whether plaintiffs have satisfied the requirements of *Fed. R. Civ. P. 23*. Failure to weigh conflicting expert opinions amounts to a delegation of judicial power to the plaintiffs, who can obtain class certification just by hiring a competent expert.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN15[] **Class Actions, Certification of Classes**

There are, of course, limits to a court's inquiry into disputes among experts, just as there are limits to a court's inquiry into factual disputes generally: they should be resolved at the class certification stage only to the extent necessary to satisfy or persuade a court that each requirement of *Fed. R. Civ. P. 23* has or has not been met. Thus, for example, a court should only engage itself in statistical dueling of experts if such dueling presents a valid basis for granting or denying class certification. Similarly, for example, a court should resolve which expert is correct, when experts disagree on whether a single formula can be created, or whether there really are too many factors at work for a multiple regression model to be methodologically sound. In contrast, if the defendants' expert is merely disputing the results of the plaintiffs' experts' analysis rather than the feasibility of using a single formula methodology, that would be a merits issue, not a class certification issue. When both experts agree on a methodology for determining class-wide impact, but ultimately reach different conclusions whether putative class members were injured by an alleged conspiracy, a court need not resolve which expert is correct at the class certification stage; that dispute presents a merits question to be resolved by the finder of fact at trial.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Evidence > Burdens of Proof > Preponderance of Evidence

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN16[] **Class Actions, Certification of Classes**

Plaintiffs must establish the requirements of *Fed. R. Civ. P. 23* by a preponderance of the evidence, and this standard applies to any factual disputes, including those among experts, that bear on the decision whether to certify a class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Preponderance of Evidence

HN17[] **Class Actions, Certification of Classes**

Class certification requires a finding that each of the requirements of *Fed. R. Civ. P. 23* has been met by a preponderance of the evidence. *Fed. R. Civ. P. 23(b)(3)*. A court can only do so upon weighing all relevant evidence for and against class certification and then concluding by a preponderance of the evidence that the *Rule 23* requirements in fact have been met. Applying a lesser standard would permit class certification even if a court thought it less than likely that each *Rule 23* requirement had been met, violating the U.S. Supreme Court's instruction that actual, not presumed conformance with *Rule 23* is indispensable.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN18[] **Class Actions, Certification of Classes**

An expert opinion presenting economic regression analysis commonly is used as a basis for certifying a class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Evidence > Burdens of Proof > Preponderance of Evidence

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN19[] **Class Actions, Certification of Classes**

Where experts disagree on the ultimate question whether an economic regression model shows that impact is capable of proof at trial through evidence common to a class, that disagreement must be resolved by a court at the class certification stage: a court must determine which expert is correct about whether the injury-in-fact question is common to the class. To answer that question, the United States Court of Appeals for the Third Circuit instructed that a court must apply a two prong test, examining (1) whether the plaintiffs have established that their expert's theory of common impact is plausible; and, if so, (2) whether the plaintiffs have established by a preponderance of the evidence that the expert's plausible theory is susceptible to proof at trial through available evidence common to the class. An expert's theory that impact is capable of common proof at trial — by means of regression analysis or other common evidence — is not a question of fact necessarily capable of resolution by a preponderance of the evidence. The plausibility standard falls below a requirement of perfection, and above a "threshold," or a "not fatally flawed" standard. Plausibility depends on the ability to establish — whether through mathematical models or further data or other means — the key logical steps behind the theory.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Preponderance of Evidence

HN20[] Class Actions, Certification of Classes

In order to certify plaintiffs' putative class, the court must find that the evidence more likely than not establishes each fact necessary to meet the requirements of *Fed. R. Civ. P. Rule 23*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN21[] Class Actions, Certification of Classes

A court's findings for the purpose of class certification are conclusive on that topic, but do not bind the fact-finder on the merits. The findings therefore 'may be revised (or wholly rejected) by the ultimate factfinder.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN22[] Class Actions, Prerequisites for Class Action

The first implied requirement of *Fed. R. Civ. P. 23(a)* is that the class must be sufficiently defined so as to be identifiable as a class. The requirement that a class be clearly defined is designed primarily to help the trial court manage the class. This requirement is not designed to be a particularly stringent test, but plaintiffs must at least be able to establish that the general outlines of the members of the class are determinable at the outset of the litigation. In other words, the class must be sufficiently definite that it is administratively feasible for the court to determine whether a particular individual is a member. A court therefore should deny class certification where the class definitions are overly broad, amorphous, and vague, or whether the number of individualized determinations required to determine class membership becomes too administratively difficult.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN23[] Class Actions, Prerequisites for Class Action

An implied requirement of *Fed. R. Civ. P. 23(a)* is that the named representative plaintiffs must fall within the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Evidence > Burdens of Proof > Allocation

HN24[] Prerequisites for Class Action, Numerosity

The first express requirement of *Fed. R. Civ. P. 23(a)* is numerosity: the putative class must be so numerous that joinder of all members is impracticable. *Fed. R. Civ. P. 23(a)(1)*. Typically, a class in excess of 40 members is sufficiently numerous to satisfy this requirement. Mere conjecture, without more, is insufficient to establish numerosity, but plaintiffs do not have to provide an exact number of putative class members in order to satisfy the numerosity requirement.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN25[] Prerequisites for Class Action, Numerosity

When a class is large, numbers alone are dispositive of the numerosity requirement.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN26[] Prerequisites for Class Action, Commonality

The second express requirement of *Fed. R. Civ. P. 23(a)* is commonality: there must be questions of law or fact common to the class. *Fed. R. Civ. P. 23(a)(2)*. Not every issue of law or fact need be the same for each member. Rather, the commonality test is met when there is at least one issue the resolution of which will affect all or a significant number of the putative class members. Because the commonality requirement is satisfied "by a single common issue," courts have noted that it often is easily met. But as the U.S. Supreme Court recently made clear, what matters for purposes of commonality is not the raising of common questions — even in droves — but, rather the capacity of a classwide proceeding to generate common answers apt to drive the resolution of the litigation.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN27[] Regulated Practices, Private Actions

In antitrust class actions, allegations concerning the existence, scope, and efficacy of an alleged antitrust conspiracy present important common questions sufficient to satisfy the commonality requirement.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN28[] Regulated Practices, Private Actions

The third express requirement of *Fed. R. Civ. P. 23(a)* is typicality: the claims or defenses of the representative parties must be typical of the claims or defenses of the class. *Fed. R. Civ. P. 23(a)(3)*. Typicality is intended to assess whether the action can be efficiently maintained as a class and whether the named plaintiffs have incentives that align with those of the absent class members so as to assure that the absentees' interests will be fairly represented. If the class representative's claims arise from the same events, practice, or conduct, and are based on the same legal theory as those of other class members, the typicality requirement is satisfied. The facts and claims of each class member do not have to be identical to support a finding of typicality, rather, the requirement goes to whether the named plaintiff's claim and the class claims are so interrelated that the interests of the class members will be fairly and adequately protected in their absence. The requirement has been liberally construed by courts and in the antitrust context, typicality will be established by plaintiffs and all class members alleging the same antitrust violations by defendants.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

Evidence > Relevance > Preservation of Relevant Evidence > Spoliation

Civil Procedure > ... > Class Actions > Class Members > Named Members

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN29[] **Responses, Defenses, Demurrers & Objections**

The requirement that the proposed class representatives not be subject to unique defenses — which includes spoliation — can be seen as an offshoot of the requirement that the representative have circumstances that are sufficiently similar to those of the class. Because *Fed. R. Civ. P. 23* requires that both the claims and the defenses be typical, a proposed class representative will not satisfy *Rule 23(a)(3)* if the representative is subject to a unique defense that is likely to become a major focus of the litigation. Spoliation of evidence constitutes a unique defense, and courts have concluded that in some circumstances defending against a charge of spoliation of evidence can render a plaintiff an inadequate class representative. The presence of a unique defense, however, will not destroy typicality unless it will skew the focus of the litigation and create a danger that absent class members will suffer if their representative is preoccupied with defenses unique to it.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN30[] **Prerequisites for Class Action, Commonality**

Courts generally have considered the question of defenses in the context of examining the typicality and commonality requirements of *Fed. R. Civ. P. 23(a)*, as well as the predominance requirement of *Rule 23(b)(3)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Class Attorneys > General Overview

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN31[] Prerequisites for Class Action, Adequacy of Representation

The fourth and final express requirement of *Fed. R. Civ. P. 23(a)* is adequacy. It requires that the representative parties will fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)(4)*. Thus, this requirement necessitates an inquiry into the adequacy of representation, including the quality of class counsel, any disparity of interest between class representatives and members of the class, communication between class counsel and the class and the overall context of the litigation. A proposed representative is adequate if (1) his interests do not conflict with those of other class members, and (2) he will vigorously prosecute the interests of the class through qualified counsel.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN32[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23(b)(3) requires that the court find that the questions of law or fact common to class members predominate over any questions affecting only individual members. *Fed. R. Civ. P. 23(b)(3)*. A court's rigorous analysis begins with the elements of the underlying cause of action. The court must scrutinze plaintiffs' legal causes of action to determine whether they are suitable for resolution on a classwide basis. The court therefore examines the elements of plaintiffs' claim through the prism of *Rule 23* to determine whether plaintiffs have satisfied the predominance requirement. If proof of the essential elements of the claim requires individual treatment, then common questions do not predominate and class certification is unsuitable.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Evidence > Burdens of Proof > Preponderance of Evidence

HN33[] Sherman Act, Claims

When plaintiffs allege that defendants engaged in price fixing, in violation of *Section 1* of the Sherman Act, *15 U.S.C.S. § 1*, at trial, plaintiffs have to prove three elements: (1) a violation of the antitrust laws, specifically *15 U.S.C.S. § 1*; (2) individual impact resulting from that violation; and (3) measurable damages. At the class certification stage, plaintiffs' burden is different: plaintiffs must show by a preponderance of the evidence that the elements of their claim are capable of proof at trial through evidence that is common to the class rather than individual to its members.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN34[] Per Se Rule & Rule of Reason, Per Se Violations

A horizontal price fixing conspiracy is a per se violation of the Sherman Act.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Evidence > Burdens of Proof > Allocation

HN35[] Private Actions, Remedies

In examining whether impact is capable of common proof, it is important to note at the outset that this element involves two distinct components: injury-in-fact; and antitrust injury. These two components pose two distinct questions: injury-in-fact presents the familiar factual question whether the plaintiff has indeed suffered harm, whereas antitrust injury presents the legal question whether any such injury is the injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Antitrust injury is injury to competition, not just injury to an individual. And the reason an antitrust plaintiff is required to prove antitrust injury is to ensure that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN36[] Private Actions, Remedies

Antitrust injury is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN37[] Class Actions, Certification of Classes

Class certification is not precluded simply because a class may include persons who have not been injured by the defendants' conduct.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

HN38[] Class Actions, Certification of Classes

The inability to show injury as to a few does not defeat class certification where the plaintiffs can show widespread injury to the class. Only when it is apparent that a great many persons have not been impacted should a court deny class certification. There is no precise measure for "a great many." Such determinations are a matter of degree, and will turn on the facts as they appear from case to case.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Inferences & Presumptions > Inferences

HN39[] Regulated Practices, Price Fixing & Restraints of Trade

Applying a presumption of impact based on an unadorned allegation of price fixing appears inconsistent with the rigorous analysis that must be performed in examining whether the requirements of *Fed. R. Civ. P. 23(b)(3)* have been met.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN40[] Regulated Practices, Private Actions

In order to establish antitrust injury, as the legal component of the impact element of a class action, at trial, plaintiffs must prove that the defendants engaged in an anti-competitive manipulation of the markets.

Antitrust & Trade Law > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN41[] Antitrust & Trade Law

The antitrust laws were enacted for the protection of competition. Therefore, where there is no competition, there is no antitrust injury. In other words, without demonstrating that there was competition, a plaintiff cannot show that the defendants' actions have had or will have anticompetitive effects.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN42[] **Sherman Act, Claims**

It is a basic tenet of ***antitrust law*** that a cause of action will not lie if the plaintiff has not been harmed. Thus, in order to prevail at a trial on a Sherman Act claim plaintiffs must prove not only an antitrust violation but also a causal link between the violation and an injury to business or property. Plaintiffs need not exhaust all possible alternative sources of injury in fulfilling their burden of proving compensable injury under the antitrust laws, but they must show that the antitrust violation was a material cause of the injury. If plaintiffs would have suffered the same injury absent a conspiracy, then plaintiffs will fail on the merits of their claim. Put another way, if the same alleged injury would have been caused by independent, non-conspiratorial forces, then no causal link exists between the alleged antitrust violation and the injury. And if individualized inquiry is necessary to make such a determination on causation, then plaintiffs will have failed to show that common questions predominate as to injury-in-fact.

Antitrust & Trade Law > Sherman Act > Claims

HN43[] **Sherman Act, Claims**

In the context of a Sherman Act claim, the causation question — whether an antitrust violation was a material cause of an injury — commonly is assessed by reference to the but-for world. This hypothetical construct is a world that is free of the restraints and conduct alleged to be anticompetitive.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Evidence > Burdens of Proof > Preponderance of Evidence

HN44[] **Private Actions, Remedies**

One way of showing that common questions predominate on the issue of injury-in-fact is to show that there is a common method for proving that class plaintiffs paid higher actual prices than in the but-for world, such as using an economic regression model incorporating a variety of factors to demonstrate that a conspiracy variable was at work during the class period, raising prices above the but-for level for all plaintiffs. Comparing but-for prices with actual transaction prices by regression analysis, however, is not the only way for plaintiffs to succeed in a motion for class certification. Other accepted types of evidence for establishing class-wide injury-in-fact include: evidence of lock-step increases of national price lists, proof that defendants conspired to maintain an inflated base price from which all negotiations began, and evidence of structural factors that make an industry susceptible to successful collusion. Ultimately, the question is whether plaintiffs have shown by a preponderance of the evidence — through regressions, structural industry factors, or any other persuasive means — that methods of common proof exist to show class-wide impact.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Evidence > Burdens of Proof > Preponderance of Evidence

HN45[] **Private Actions, Sherman Act**

To prevail on the merits of their Sherman Act claim at trial, plaintiffs need not exhaust all possible alternative sources of injury in fulfilling their burden of proving compensable injury under the antitrust laws. Rather, they must show only that the antitrust violation was a material cause of the injury. And at the class certification stage, plaintiffs must show by a preponderance of the evidence that this is capable of common proof.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN46[] **Regulated Practices, Private Actions**

Class-wide injury-in-fact can be proven at trial by showing that allegedly conspiratorial fuel surcharges were the starting point from which negotiations for discounts began. The theory behind such cases is that the negotiated transaction prices would have been lower if the starting point for negotiations had been list prices set in a competitive market. Hence, if a plaintiff proves the alleged conspiracy resulted in artificially inflated list prices, a jury could reasonably conclude that each purchaser who negotiated an individual price suffered some injury. In sum, individualized negotiations and discounts are not an automatic bar to class action treatment.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Evidence > ... > Testimony > Expert Witnesses > General Overview

Evidence > Inferences & Presumptions > Inferences

HN47[] **Cartels & Horizontal Restraints, Price Fixing**

In an antitrust suit, plaintiffs will generally use multiple regression analysis to demonstrate that a conspiracy variable has influence over the dependent variable (price) — that is, class members paid a higher price than the basic economic principles of supply and demand would otherwise dictate, thus demonstrating collusive behavior was at work. A multiple regression model must, of course, be correctly set up for the results to be valid. The expert's choices are crucial for the success of the analysis and the ultimate fact-finder should consider the following when evaluating the efficacy of the expert's analysis: has the expert correctly identified the dependent variable; has he or she chosen the correct explanatory variable that is relevant to the question at issue; are the additional variables chosen all correct or are some missing and/or irrelevant; is the form of the analysis correct? Ultimately, even the best regression equation cannot prove causation. Rather, the most it can show is a correlation that can give rise to an inference that causation exists. Thus, one must infer that a causal relationship exists on the basis of an underlying causal theory that explains the relationship between the two variables.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Evidence > Burdens of Proof > Preponderance of Evidence

HN48[] **Regulated Practices, Private Actions**

The burden for plaintiffs at the class certification stage is to show by a preponderance of the evidence that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual to its members.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > Remedies > Damages > General Overview

Evidence > Burdens of Proof > Preponderance of Evidence

HN49[] **Class Actions, Certification of Classes**

The third element that plaintiffs seeking class certification have to prove at trial is measurable damages. The element of damages is distinct from impact: impact asks whether the plaintiffs were harmed, whereas damages quantify by how much. The inquiry for a district court at the class certification stage is whether the plaintiffs have demonstrated by a preponderance of the evidence that they will be able to measure damages on a class-wide basis using common proof. Some variation of damages among class members does not defeat class certification. Moreover, the presence of individualized questions regarding damages does not prevent certification under *Fed. R. Civ. P. 23(b)(3)*. To be sure, however, complex and individualized questions of damages weigh against finding predominance.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

HN50[] **Private Actions, Remedies**

At the class certification stage the court does not require that plaintiffs tie each theory of antitrust impact to an exact calculation of damages, but instead requires that they assure the court that if they can prove impact, the resulting damages are capable of measurement and will not require labyrinthine individual calculations.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN51[] **Prerequisites for Class Action, Superiority**

The second requirement of *Fed. R. Civ. P. 23(b)(3)* is superiority: a court must find that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. *Fed. R. Civ. P. 23(b)(3)*. This requirement ensures that resolution by class action will achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable consequences.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN52[] **Prerequisites for Class Action, Predominance**

When common questions are found to predominate, then courts also generally have ruled that the second prerequisite of *Fed. R. Civ. P. 23(b)(3)* — that the class suit be superior to any other available means of settling the controversy — is satisfied in the context of an antitrust action. In contrast, when individual issues predominate, a class action will be deemed inferior.

Counsel: [1]** For RAIL FREIGHT FUEL SURCHARGE ANTITRUST LITIGATION - MDL NO. 1869, In Re: Roger M. Adelman, LEAD ATTORNEY, LAW OFFICE OF ROGER M. ADELMAN, Washington, DC; Richard P. Rouco, PRO HAC VICE, WHATLEY DRAKE & KALLAS, LLC, Birmingham, AL.

PETER H. DIAMANDIS, Movant, Pro se, Mclean, VA.

Judges: PAUL L. FRIEDMAN, United States District Judge.

Opinion by: PAUL L. FRIEDMAN

Opinion

[*9] TABLE OF CONTENTS

[*10] I. **[**13]** INTRODUCTION

This matter is before the Court on the motion of the direct purchaser plaintiffs for class certification under *Rule 23(b)(3) of the Federal Rules of Civil Procedure*. Also before the Court is the motion of the defendants to exclude what they refer to as "interline-related communications" from consideration for class certification or for any other purpose under *49 U.S.C. § 10706*. The Court heard oral argument on both motions on October 6 and 7, 2010, and took them under advisement. The Court delayed decision on the motions until after the Supreme Court decided *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*, and then invited the parties to file supplemental briefs discussing the impact of the Wal-Mart decision on the class certification question in this case. Those briefs have been filed, and the motions now are ripe.

Upon consideration of the parties' papers, the oral arguments presented by counsel, the relevant legal authorities, and the entire extensive record in this case, the Court finds by a preponderance of the evidence that the direct purchaser plaintiffs have satisfied all of the requirements of *Rule 23*. The Court therefore will grant the direct purchaser plaintiffs' **[**14]** motion for class certification; will certify this case as a class action under *Rule 23(b)(3)* for purposes of litigation and trial; will define the class as proposed by the direct purchaser plaintiffs in their motion for class certification; will certify for class treatment the direct purchaser plaintiffs' claim for price fixing in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*; will designate the eight named plaintiffs as the class representatives; and will appoint Quinn Emanuel Urquhart & Sullivan, LLP and Hausfled LLP as co-lead class counsel. The Court concludes that it need not rule at this time on the defendants' motion to exclude interline-related communications. [1]

---

[1] The papers reviewed in connection with the pending motions include the following:

Class Certification. The second consolidated amended class action complaint ("2d Am. Compl.") [Dkt. No. 324]; the direct purchaser plaintiffs' motion for class certification ("Class Mot.") [Dkt. No. 337]; the direct purchaser plaintiffs' memorandum in support of motion for class certification ("Class Mem.") [Dkt. No. 337-9]; the corrected expert report of Gordon Rausser ("1st Rausser Report"); exhibits A through D submitted in **[**15]** support of the direct purchaser plaintiffs' motion for class certification; exhibits 1 through 224 submitted in support of the direct purchaser plaintiffs' motion for class certification (individually, "RD Ex."); the defendants' memorandum of law in opposition to plaintiffs' motion for class certification ("Class Opp.") [Dkt. No. 381]; the revised expert report of Robert D. Willig ("Willig Report"); the 21 declarations and their accompanying exhibits submitted in support of defendants' memorandum of law in opposition to plaintiffs' motion for class certification; exhibits 1 through 51 submitted in support of defendants' memorandum of law in opposition to plaintiffs' motion for class certification (individually, "PD Ex."); the plaintiffs' reply memorandum in support of their motion for class certification ("Class Reply") [Dkt. No. 406]; the corrected expert reply report of Gordon Rausser ("2d Rausser Report"); exhibits 1 through 150 submitted in support of plaintiffs' reply memorandum in support of their motion for class certification (individually, "HD Ex."); the plaintiffs' supplemental memorandum pursuant to the Court's September 17, 2010 Order ("Pls. Supp. Brief") [Dkt. No. 434]; **[**16]** the defendants' supplemental memorandum of law regarding class certification standards ("Defs. Supp. Brief") [Dkt. No. 439]; plaintiffs' and defendants' joint submission regarding class definition ("Joint Class Definition Submission") [Dkt. No. 456]; the plaintiffs' memorandum addressing Wal-Mart Stores, Inc. v. Dukes ("Pls. Wal-Mart Brief") [Dkt. No. 523]; the defendants' supplemental memorandum concerning Wal-Mart Stores, Inc. v. Dukes submitted pursuant to the Court's July 20, 2011 Order ("Defs. Wal-Mart Brief") [Dkt. No. 524]; the defendants' reply memorandum concerning Wal-Mart Stores, Inc. v. Dukes submitted pursuant to the Court's July 20, 2011 Order ("Defs. Wal-Mart Reply Brief") [Dkt. No. 526]; and the plaintiffs' reply memorandum addressing Wal-Mart Stores, Inc. v. Dukes ("Pls. Wal-Mart Reply Brief") [Dkt. No. 528]. Included as exhibits to the class certification papers are many deposition transcripts; the Court has reviewed all relevant parts of those transcripts, but lists here only those cited in this Opinion, grouped and alphabetized for ease of reference:

- *Experts* — Deposition of Gordon Rausser ("1st Rausser Dep."), June 3, 2010; Deposition of Gordon Rausser ("2d Rausser **[**17]** Dep."), Sept. 24, 2010; Deposition of Robert D. Willig ("Willig Dep."), Aug. 4, 2010.

- *Defendant BNSF Railway Company* — Deposition of Marc Allen ("HD Ex. 85, Allen Dep."), Aug. 12, 2010; Deposition of George Duggan ("HD Ex. 81, Duggan Dep."), Aug. 13, 2010; Deposition of David Garin ("HD Ex. 79, Garin Dep."), Aug. 16, 2010; Deposition of Thomas Jacobowski ("HD Ex. 76, Jacobowski Dep."), Aug. 12, 2010; Deposition of John Lanigan ("HD Ex. 68, Lanigan Dep."), June 22, 2010; Deposition of Matthew K. Rose ("HD Ex. 72, Rose Dep."), July 16, 2010.

[*11] II. BACKGROUND

The Court previously has described the background of this case. See , *In re Rail Freight Fuel Surcharge Antitrust Litig. ("Rail Freight I") 587 F. Supp. 2d 27, 29-31 (D.D.C. 2008)*; *In re Rail Freight Fuel Surcharge Antitrust Litig. ("Rail Freight II"), 593 F. Supp. 2d 29, 32, 34-35 (D.D.C. 2008)*, aff'd, *Fayus Enters. v. BNSF Ry. Co., 602 F.3d 444, 445-46, 454, 390 U.S. App. D.C. 213 (D.C. Cir. 2010)*. It therefore will limit its discussion accordingly.

This case involves the claim that defendants — BNSF Railway Company **[**21]** ("BNSF"); CSX Transportation, Inc. ("CSX"); Norfolk Southern Railway Company ("NS"); and Union Pacific Railroad Company ("UP") — engaged **[*12]** in a price fixing conspiracy to coordinate their fuel surcharge programs as a means to impose supra-competitive total price increases on their shipping customers. See 2d Am. Compl. ¶¶ 1-2; Class Mem. at 1. As plaintiffs describe it, a rail fuel surcharge "is a separately-identified fee that is charged by the railroads for . . . agreed-upon transportation [services], purportedly to compensate for increases in the cost of fuel." 2d Am. Compl. ¶ 2. Plaintiffs allege, however, that the four defendants, through their collective action, "conspired to impose Rail Fuel Surcharges that far exceeded any of the Defendants' fuel costs, and thereby collected billions of dollars of additional profits during the . . . conspiracy." Id.

• *Defendant CSX Transportation, Inc.* — Deposition of Donna Cerwonka ("HD Ex. 86, Cerwonka Dep."), Aug. 13, 2010; Deposition of Clarence Gooden ("HD Ex. 69, Gooden Dep."), July 16, 2010; Deposition of Tim McNulty ("HD Ex. 71, McNulty Dep."), Aug. 10, 2010; Deposition of Dean Piacente ("HD Ex. 87, Piacente Dep."), Aug. 13, 2010.

• *Defendant Norfolk Southern Railway Company* — Deposition of Patrick Glennon ("HD Ex. 65, Glennon Dep."), July 20, 2010; Deposition of John Kraemer ("HD Ex. 82, Kraemer Dep."), Aug. 11, 2010; Deposition of David Lawson ("HD Ex. 83, Lawson Dep."), Aug. 5, 2010; Deposition of Ronald Listwak ("HD Ex. 77, Listwak Dep."), Aug. 6, **[**18]** 2010; Deposition of Joseph Osborne ("HD Ex. 78, Osborne Dep."), Aug. 11, 2010; Deposition of Donald W. Seale ("RD Ex. 173, Seale Dep."), Feb. 26, 2010.

• *Defendant Union Pacific Railroad Company* — Deposition of Mark Draper ("HD Ex. 153, Draper Dep."), Mar. 3, 2010; Deposition of Thomas Gehl ("HD Ex. 88, Gehl Dep."), Aug. 10, 2010; Deposition of Robert Knight, Jr. ("HD Ex. 70, Knight Dep."), July 9, 2010; Deposition of Richard Pagan ("HD Ex. 89, Pagan Dep."), Aug. 9, 2010; Deposition of James Young ("HD Ex. 66, Young Dep.").

Interline-Related Communications. The defendants' motion to exclude interline-related communications from consideration for class certification or any other purpose prohibited by *49 U.S.C. § 10706* ("Interline Mot.") [Dkt. No. 417]; the defendants' memorandum in support of motion to exclude interline-related communications from consideration for class certification or any other purpose prohibited by *49 U.S.C. § 10706* ("Interline Mem.") [Dkt. No. 420]; the plaintiffs' memorandum and exhibits 1 through 18 in opposition to defendants' motion to exclude interline-related communications from consideration for class certification or any other purpose prohibited by *49 U.S.C. § 10706* **[**19]** ("Interline Opp.") [Dkt. No. 438]; the defendants' reply memorandum and exhibits 1 through 8 in support of their motion to exclude interline-related communications from consideration for class certification or any other purpose prohibited by *49 U.S.C. § 10706* ("Interline Reply") [Dkt. No. 444]; the defendants' objections under *49 U.S.C. § 10706* to plaintiffs' exhibits in support of plaintiffs' motion for class certification, and exhibits 1 through 11 and A through C to defendants' objections ("Defs. Interline Objections") [Dkt. No. 454]; the plaintiffs' response to defendants' objections under *49 U.S.C. § 10706* to plaintiffs' exhibits in support of plaintiffs' motion for class certification, and exhibits 1 through 15 to plaintiffs' response ("Pls. Interline Response") [Dkt. No. 457-19]; the plaintiffs' notice of additional evidence and exhibits relevant to the parties' briefing on *49 U.S.C. § 10706*, and exhibits 1 through 21 to plaintiffs' notice ("Pls. Interline Notice") [Dkt. No. 530-1]; the defendants' response to plaintiffs' notice of additional evidence relevant to the parties' briefing on *49 U.S.C. § 10706*, and exhibits A through E to defendants' response ("Defs. Response to **[**20]** Pls. Interline Notice") [Dkt. No. 532].

Motions Hearing and Related Submissions. The Court also reviewed the transcripts of the motions hearing of October 6 and 7, 2010 (respectively, "Oct. 6 Tr."; "Oct. 7 Tr."), and the binders of materials, consisting of demonstratives, exhibits, and deposition excerpts, submitted by the parties at the hearing: the plaintiffs' binder regarding *section 10706* ("Pls. *Section 10706* Binder"); the plaintiffs' hearing binder ("Pls. Hr'g Binder"); the defendants' hearing binder ("Defs. Hr'g Binder"); the defendants' proffer at hearing on class certification binder ("Defs. Proffer Binder"); and the plaintiffs' closing arguments binder ("Pls. Closing Binder").

Plaintiffs have been divided into two putative classes: (1) the direct purchasers — those who allegedly purchased rail freight transportation from defendants from July 1, 2003 until December 31, 2008 and who were assessed a rail fuel surcharge for the transportation; and (2) the indirect purchasers — those who allegedly purchased rail **[**22]** freight transportation services indirectly from defendants. See *Rail Freight I, 587 F. Supp. 2d at 29*. Plaintiffs in both putative classes allege that defendants violated *Section 1* of the Sherman Act, *15 U.S.C. § 1*, by conspiring to fix prices through use of their fuel surcharges, and seek recovery under *Section 4* of the Clayton Act, *15 U.S.C. § 15*. See *Rail Freight I, 587 F. Supp. 2d at 29*; 2d Am. Compl. ¶ 33.

In 2008, defendants moved to dismiss the claims of both putative classes. On November 7, 2008, the Court denied defendants' motion regarding the direct purchaser plaintiffs, concluding that the direct purchasers had sufficiently alleged an agreement in restraint of trade. See *Rail Freight I, 587 F. Supp. 2d at 32*. Shortly thereafter, on December 28, 2008, the Court denied in part and granted in part defendants' motion regarding the indirect purchaser plaintiffs, concluding that the indirect purchasers' state law claims were preempted and must be dismissed, but that the indirect purchasers' federal antitrust claim for injunctive relief could proceed. See *Rail Freight II, 593 F. Supp. 2d at 32, 43*. The United States Court of Appeals for the District of Columbia Circuit affirmed **[**23]** this Court's dismissal of the indirect purchasers' state law claims. See *Fayus Enters. v. BNSF Ry. Co., 602 F.3d at 454*. [2]

The direct purchaser plaintiffs (hereinafter, "plaintiffs" unless otherwise specified) now move for class certification. Specifically, plaintiffs move this Court under *Rule 23(b)(3) of the Federal Rules of Civil Procedure* for certification of a class of

> All entities or persons that at any time from July 1, 2003 until December 31, 2008 (the "Class Period") purchased rate-unregulated rail freight transportation services directly from one or more of the Defendants, as to which Defendants assessed a stand-alone rail freight fuel surcharge applied as a percentage of the base rate for the freight transport (or where some or all of the fuel surcharge was included in the base rate through a method referred to as "rebasing") ("Fuel Surcharge").
>
> Excluded from this Class definition are (a) Defendants, any subsidiaries or affiliates of Defendants, any of Defendants' co-conspirators, whether or not named as a Defendant in the Complaint, and all federal governmental entities, and (b) all entities or persons that paid a Fuel Surcharge directly to any of the Defendants solely pursuant to a railroad-shipper contract that was (i) **[*13]** entered **[**25]** into before July 1, 2003, and (ii) provided for a stand-alone Fuel Surcharge to be paid under a predetermined formula specifically set forth in the contract.

Class Mot. at 1.

Plaintiffs request that this case be certified as a class action for litigation and trial of plaintiffs' claim for price fixing under Section 1 of the Sherman Act, *15 U.S.C. § 1*, and that the eight named plaintiffs — Dust Pro, Inc.; Carter Distributing Company; Dakota Granite Company; Donnelly Commodities, Inc.; U.S. Magnesium LLC; Nyrstar Taylor Chemicals, Inc.; Olin Corporation; and Strates Shows, Inc. — be designated as class representatives. Class Mot. at 1. Plaintiffs further request that Quinn Emanuel Urquhart & Sullivan, LLP and Hausfeld LLP be designated as co-lead class counsel under *Rule 23(g) of the Federal Rules of Civil Procedure*. Defendants oppose plaintiffs' motion for class certification, arguing that plaintiffs have failed to satisfy the requirements of *Rule 23*.

---

[2] On January 13, 2009, in view of the huge volume of documents to be produced in discovery and other discovery issues, many of which involved challenging e-discovery matters, the Court referred this case for the management of all pretrial matters, discovery, and scheduling jointly to Magistrate Judge John M. Facciola and Magistrate Judge Alan Kay. See Referral Order at 2, Jan. 13, 2009 [Dkt. No. 179]. Magistrate Judge Facciola and Magistrate Judge Kay have provided the Court and the parties with invaluable assistance, presiding over a lengthy discovery process, lasting over two years, in which the parties have raised complex legal issues and have exchanged millions of pages of documents. See *In re Rail Freight Fuel Surcharge Antitrust Litig., MDL No. 1869, 281 F.R.D. 1, 2011 U.S. Dist. LEXIS 132720, 2011 WL 5603995, at *1 (D.D.C. Nov. 17, 2011)* (Facciola, Mag. J.). Magistrate Judge Facciola's expertise in e-discovery matters and his weekly conference calls with counsel during the early stages of discovery made possible an efficient and largely non-contentious discovery process despite the complexity **[**24]** of the case and the challenging nature of some of the discovery issues.

A. The Alleged Conspiracy

Plaintiffs allege that in early 2003 defendants, the four largest Class I railroads in the continental United States, see 2d Am. Compl. ¶ 1, conspired to increase their total revenues through the use of standardized, **[**26]** uniform, and supra-competitive fuel surcharges. *Rail Freight I, 587 F. Supp. 2d at 29*. A Class I railroad is a large freight railway company that has "annual carrier operating revenues of at least $250 million." 1st Rausser Report at 20. Together, defendants comprise just one percent of all the freight railroads, see id., but control about 90 percent of rail freight traffic in the United States. 2d Am. Compl. ¶ 4; see Class Mem. at 7. BNSF and UP operate in the western United States; CSX and NS operate in the east. See 1st Rausser Report at 30-31; Willig Report ¶ 166. [3]

Before Congress passed the Staggers Rail Act in 1980, defendants would have had to apply to the Interstate Commerce Commission ("ICC") for approval of an across-the-board rate increase. *Rail Freight I, 587 F. Supp. 2d at 29-30*. Following the deregulation of the railroad industry, at least 80 percent of all rail shipments now move under private transportation contracts, which are not rate regulated, or are otherwise exempt from rate regulation. Id. Plaintiffs allege that defendants ultimately determined that the most efficient way to increase their profits was through the imposition of an across-the-board, artificially high, and uniform fuel surcharge, see *id. at 30*, instead of attempting to renegotiate all of their individual contracts, id., or attempting to fix each base rate separately, which plaintiffs say "would have been extremely complex, highly costly and effectively unmanageable." 1st Rausser Report at 52 n.118.

The total freight price for a shipping customer, that is, the all-in rate, consists of a base rate (also referred to as a line-haul rate) **[**28]** and any percentage fuel surcharge applied to the base rate. See Willig Report ¶ 18; Class Opp. at 3 (all-in price includes the base rate, fuel surcharge, and other charges and elements of value). The base rate

> includes fixed cost (or overhead) elements, such as the cost of organizing a particular shipment[,] . . . . the large fixed costs of building and maintaining track, bridges, and other structures to achieve long-run sustainability[,] . . . . [and] the railroad's markup of price over costs, i.e., the profitability element of pricing.

1st Rausser Report at 62. Plaintiffs allege that defendants imposed "an across-the-board artificially high and uniform fuel surcharge" as a percentage multiplier of the base rate, thereby permitting defendants "to raise total freight prices widely by a given percentage." *Rail Freight 1, 587 F. Supp. 2d* ***[*14]*** *at 30*; see also 1st Rausser Report at 50 ("[A]dding a percentage fuel surcharge on top of line-haul rates or base rates is by its very nature a general price increase."). In effect, according to plaintiffs, the allegedly conspiratorial fuel surcharges operated like a tax, increasing the total price of shipping by a set percentage. 1st Rausser Report at **[**29]** 80. Plaintiffs contend that this "approach yielded defendants billions of dollars of additional profits because the surcharge raised rates far beyond the real increased cost of fuel." *Rail Freight I, 587 F. Supp. 2d at 30*.

According to plaintiffs, it took defendants some trial and error to reach the point of conspiracy. Before the class period, plaintiffs say that defendants "operated as a price-discriminating, interdependent, but non-collusive oligopoly." Class Mem. at 8. And for many years before the class period, defendants "confronted a long-term, structural decline in rail freight rates." Id. "Between 2000 and early 2003, the three-year period preceding the Class Period," plaintiffs contend that defendants "unilaterally took various actions designed to increase rail freight prices and revenues." Id. at 9. As plaintiffs describe it, "[t]hese uncoordinated actions included, among other things, unilateral attempts to apply stand-alone fuel surcharges, which were designed 'to take advantage of future rising

[3] To preview, see infra at 61 n.11 & 64 n.12, Gordon Rausser is plaintiffs' retained expert, and Robert D. Willig is defendants' retained expert. Dr. Rausser is the Robert Gordon Sproul Distinguished Professor at the University of California at Berkeley. He has held positions teaching economics and statistics at numerous universities and has published widely in these fields. See 1st Rausser Report at 1. Dr. Willig is a Professor of Economics and Public Affairs at Princeton University, where he holds a joint appointment in the Economics Department and at the Woodrow Wilson School of Public and International Affairs. His **[**27]** focus is microeconomics, specializing in industrial organization. He has published widely in these fields. See Willig Report at 1.

fuel prices' and intended as 'revenue enhancement steps.'" Id. (quoting RD Ex. 9, E-mail from C. Adams, at UPFSC 0147060, Dec. 5, 2002; RD Ex. 163, NS 2000 Annual Report, at 3). **[**30]** But plaintiffs contend that defendants "acting on their own had limited success when trying to boost revenues through fuel surcharges." Id. Plaintiffs contend that these pre-class period "fuel surcharges were applied only sporadically to a limited number of shippers," because defendants were concerned about competition — "losing business to other [railroads] that did not apply fuel surcharges[.]" Id. at 9-10.

Another barrier to broad application of fuel surcharges during the pre-class period, according to plaintiffs, was wide use of "the so-called Rail Cost Adjustment Factor, or 'RCAF.'" Class Mem. at 11. The RCAF "is a weighted index that accounts for all significant input costs, including fuel." Id.; see also Willig Rep. ¶ 63 ("RCAF measures changes in the prices of major components of the railroad industry's operating expenses, including labor, fuel, materials, equipment rents, depreciation, interest and other expenses."). According to plaintiffs, wide use of the RCAF impeded broad application of fuel surcharges because defendants "recognized that imposing a stand-alone fuel surcharge where fuel price increases were already covered by the RCAF would be perceived by shippers as double **[**31]** dipping." Class Mem. at 11 (quotations omitted).

Thus, plaintiffs contend that before the class period

> the number of shippers covered by stand-alone, rate-based fuel surcharges was relatively low . . . , and fuel surcharges did not contribute significantly to Defendants' revenues or bottom lines. Defendants were unable to meet their respective revenue enhancement goals through the use of uncoordinated fuel surcharges.

Class Mem. at 12.

But all of this allegedly changed in 2003. Plaintiffs contend that beginning in the spring of 2003 "[t]he four Defendants agreed to create and apply a common Fuel Surcharge" — linked to the price of oil on one of two oil indexes, the On-Highway Diesel Fuel ("HDF") index or the West Texas Intermediate ("WTI") index — "based on a percentage of base rates on an across-the-board basis to all members of" plaintiffs' putative class. Class Mem. at 19. Under CSX's new, allegedly conspiratorial fuel surcharge program, the railroad would assess a 0.4 percent surcharge when the price of oil on the WTI index exceeded $23 per barrel, and an additional 0.4 percent for every dollar above $23. Id. at 19. Plaintiffs say that "[u]nlike its predecessor program, which required **[**32]** the price of oil to exceed the threshold price ($28 per barrel under the old program) for 30 consecutive days, CSX's new program would be based on the average price of oil from the preceding month." Id. at 19-20. And plaintiffs allege that BNSF, UP, and NS adopted "essentially uniform" programs, and all four **[*15]** defendants "remained in synch through the class period." Id. at 24.

As plaintiffs describe it,

> "[t]he only differences in the Defendants' programs concerned the indices used and the thresholds chosen. The two indices chosen were closely related. The western railroads (BNSF and the UP) linked their fuel surcharge to the on-highway diesel fuel (HDF) index, whereas the eastern railroads (CSX and NS) linked their fuel surcharge to the [WTI] index."

Class Mem. at 24 n.76 (quoting 1st Rausser Report at 54-55). Although UP and BNSF used slightly different thresholds in their fuel surcharge programs, plaintiffs allege that this difference "had no practical effect":

> "The UP applied a fuel surcharge when the HDF was above the threshold of $1.35 per gallon and the BNSF applied a Fuel Surcharge when the HDF index was above $1.25 per gallon. CSX and NS both applied fuel surcharges when the WTI **[**33]** index was above $23 per barrel. The different thresholds used by UP and BNSF were not relevant to fuel surcharge amounts during the class period, because the indices were all above the threshold values for the entire Class Period. Consequently, the UP and BNSF Fuel Surcharge programs provided for identical fuel surcharge percentages once the $1.35 threshold was reached."

Id. (quoting 1st Rausser Report at 55).

The next step in the alleged conspiracy, according to plaintiffs, was defendants' agreement and collective action to cause the American Association of Railroads ("AAR") to create a new cost escalation index, the All Inclusive Index Less Fuel ("AIILF"), that removed fuel costs from the prior cost escalation index, the All Inclusive Index ("AII"), on which the RCAF was based. See *Rail Freight I, 587 F. Supp. 2d at 30*; see Class Mem. at 27. Plaintiffs say that defendants reached this agreement during the October and December 2003 meetings of the AAR; the AIILF index was published in December 2003. *Rail Freight I, 587 F. Supp. 2d at 30*; see Class Mem. at 29. As plaintiffs describe it, "[t]he magnitude of this accomplishment from Defendants' perspective cannot be understated." Class **[**34]** Mem. at 29. Plaintiffs point to a letter written by BNSF's chief economist, Sam Kyei, in which he stated:

> "In December 2003 [Matt Rose, BNSF's chief executive officer], single-handedly got the A.A.R. to establish a non-fuel RCAF index, now called the All-Inclusive Index Less Fuel . . . . In my 18-year railroad career, no one had ever succeeded in steering the A.A.R. to do this. . . . [T]he combination of sound price escalation using this index and a fuel surcharge should tremendously help our bottom-line for years to come. In fact, . . . the entire rail industry should benefit from the escalation options the index provides."

Class Mem. at 29-30 (quoting RD Ex. 122, Letter from S. Kyei, at BNSF-0070502, Mar. 15, 2005).

At this point, plaintiffs allege that defendants, having coordinated their fuel surcharges and created and published the AIILF, "worked tirelessly to achieve 100% Fuel Surcharge coverage across their customers." Class Mem. at 31. Plaintiffs say that following defendants' agreement to coordinate their fuel surcharges, defendants' fuel surcharge revenue "skyrocketed": as an example, plaintiffs state that NS saw fuel surcharge revenue for certain businesses grow exponentially **[**35]** from about $11.6 million in 2002 to about $61.7 million, $208 million, $650 million, and $974 million in 2003, 2004, 2005, and 2006, respectively. Id. at 42-43. Plaintiffs say that because of the conspiracy, defendants "were able to reverse the long-term downward trend in rail freight rates and move rates sharply upward[,]" id. at 43, at the expense of putative class members. Id. at 45.

B. Surface Transportation Board Proceedings and 18 Class Action Lawsuits

Eventually, shippers of both rate-regulated and rate-unregulated freight traffic complained about defendants' use of fuel surcharges, arguing that the surcharges recovered far more than the incremental cost of fuel, and that the surcharges had become non-negotiable. Shippers of rate-regulated traffic expressed their complaints to the Surface **[*16]** Transportation Board ("STB"), see 2d Am. Compl. ¶ 96; Class Mem. at 47, an agency that regulates certain aspects of the railroad industry. See *Manufacturers Ry. Co. v. Surface Transp. Bd., 676 F.3d 1094, 1095, 400 U.S. App. D.C. 157 (D.C. Cir. 2012)*. In response, the STB "instituted [a] proceeding to inquire into rail carrier practices related to fuel surcharges." *Rail Fuel Surcharges, Ex Parte No. 661, 2007 STB LEXIS 39, 2007 WL 201205, at *1 (S.T.B. Jan. 26, 2007)*.

As **[**36]** the STB made clear, ***HN1***[] its proceedings on fuel surcharges and its ultimate decision on the matter related only to rate-*regulated* freight traffic. See *Rail Fuel Surcharges, 2007 STB LEXIS 39, 2007 WL 201205, at *10* ("Under *49 U.S.C. 10709*, we have no authority to regulate rail rates and services that are governed by a contract. Therefore, our findings and actions here apply only to regulated common carrier traffic."); see also *Fayus Enters. v. BNSF Ry. Co., 602 F.3d at 445* (noting that under *49 U.S.C. § 10709* traffic that moves under railroad-shipper contracts generally is not subject to challenge before the STB). And plaintiffs' putative class in the instant case includes only those shippers who purchased rate-*unregulated* transportation services. See Class Mot. at 1. But plaintiffs say that the fuel surcharges applied to rate-regulated freight traffic are the same fuel surcharges applied during the class period to putative class members, see Class Mem. at 49; 2d Am. Compl. ¶ 98, and both sides reference the STB decision and rely on it for various propositions in their class certification briefing. See Class Mem. at 49; Class Opp. at 16-17; Class Reply at 22-25. The Court therefore will describe below the **[**37]** STB proceedings and the STB's 2007 decision.

The STB held hearings on the use of fuel surcharges on rate-regulated traffic in May and August 2006. *Rail Fuel Surcharges, 2007 STB LEXIS 39, 2007 WL 201205, at *1*. On January 26, 2007, the STB issued its decision on the matter, concluding:

> [I]t is an unreasonable practice to compute fuel surcharges as a percentage of the base rates. Because railroads rely on differential pricing, under which rates are dependent on factors other than costs, a surcharge that is tied to the level of the base rate, rather than to fuel consumption for the movement to which the surcharge is applied, cannot fairly be described as merely a cost recovery mechanism. Rather, a fuel

> surcharge program that increases all rates by a set percentage stands virtually no prospect of reflecting the actual increase in fuel costs for handling the particular traffic to which the surcharge is applied. Two shippers may have traffic with identical fuel costs, but if one starts out with a higher base rate (because, for example, it has fewer transportation alternatives), it will pay dramatically more in fuel surcharges.

*2007 STB LEXIS 39, [WL] at *4*. Thus, the STB directed defendants to change their practice of "computing **[**38]** rail fuel surcharges as a percentage of a base rate" on regulated traffic. *2007 STB LEXIS 39, [WL] at *1*.

The STB emphasized, however, that its ruling did not ban all fuel surcharges for regulated traffic. See *Rail Fuel Surcharges, 2007 STB LEXIS 39, 2007 WL 201205, at *6* ("[W]e are not precluding railroads from incorporating as many factors that affect fuel consumption as they wish in calculating fuel surcharges. Nor are we requiring them to incorporate every conceivable such factor, as we agree that would be impracticable."). Under the STB's decision, a railroad could still choose to implement a fuel surcharge for rate-regulated traffic, but that surcharge "must be based upon attributes of a movement that directly affect the amount of fuel consumed." Id. Essentially, the STB imposed the requirement that any fuel surcharge applied by a railroad must have "a reasonable nexus to fuel consumption." Id. The STB concluded that a fuel surcharge applied as a percentage of a base rate fails that test because it "increases all rates by a set percentage" and therefore "stands virtually no prospect of reflecting the actual increase in fuel costs for handling the particular traffic to which the surcharge is applied." *2007 STB LEXIS 39, [WL] at *4*.

As discussed, **[**39]** the STB decision did not apply to rate-unregulated freight traffic. Nor did the STB decision in any way preclude railroads from using fuel surcharges tied to base rates in private contracts. As the STB noted in its decision:

> Several carriers introduced evidence that many of their customers favor the continued **[*17]** use of a fuel surcharge program that is tied to the base rate. Given that such a program shifts greater responsibility for fuel recovery to shippers with higher rates, it is not surprising that a subset of customers (presumably those with lower base rates) favor retaining a percentage-of-the-base-rate approach. We note that such shippers are free to enter into contractual arrangements with carriers that incorporate into those contracts any escalation provision for fuel cost recovery that the parties wish.

*Rail Fuel Surcharges, 2007 STB LEXIS 39, 2007 WL 201205, at *6 n.34*.

Although some customers of rate-unregulated freight traffic may have favored the use of fuel surcharges tied to base rates, many others did not, and that latter group of shippers had similar complaints to those expressed before the STB. See Class Mem. at 45-47. Those complaints eventually gave rise to 18 separate class action lawsuits, **[**40]** pending in six districts, involving common antitrust allegations relating to the use of fuel surcharges on rate-unregulated freight traffic. See *Rail Freight I, 587 F. Supp. 2d at 29*; *In re Rail Freight Fuel Surcharge Antitrust Litig., 528 F. Supp. 2d 1358, 1358-59 (J.P.M.L. 2007)*. On November 26, 2007, the Multidistrict Litigation Panel consolidated those 18 separate class actions and transferred them to this Court, see *In re Rail Freight Fuel Surcharge Antitrust Litig., 528 F. Supp. 2d at 1358-59*, and now eight named plaintiffs request that this Court certify this case as a class action under *Rule 23(b)(3)*. See Class Mot. at 1-2.

C. Class Certification Papers and Supplemental Briefing Before and After the Motions Hearing

As will be discussed in detail below, ***HN2***[] to obtain class certification plaintiffs must satisfy the four threshold requirements of *Rule 23(a)* — commonly referred to as numerosity, commonality, typicality, and adequacy — and the two additional requirements of *Rule 23(b)(3)* — predominance and superiority. [4] Although there is some dispute

---

[4] ***HN4***[] In addition to the four express requirements of *Rule 23(a)*, there are two implied requirements: (1) the class must be "sufficiently defined so as to be identifiable as a class"; and (2) the named representatives must "fall within the class." *Vigus v. Southern Ill. Riverboat/Casino Cruises, Inc., 274 F.R.D. 229, 235 (S.D. Ill. 2011)* (citing *Oshana v. Coca-Cola Co., 472 F.3d 506, 513 (7th Cir. 2006)*; *Alliance to End Repression v. Rochford, 565 F.2d 975, 977 (7th Cir. 1977))*.

over whether plaintiffs have satisfied some of the requirements of *Rule 23(a)*, see Class Opp. at 75-82, the parties agree that the central **[**41]** question before the Court relates to ***HN3***[] predominance, that is, whether plaintiffs have met their burden to show that "questions of law or fact common to class members predominate over any questions affecting only individual members[.]" *Fed. R. Civ. P. 23(b)(3)*; see Defs. Wal-Mart Reply Brief at 1; Oct. 6 Tr. at 88; Oct. 7 Tr. at 167. That question, in turn, focuses on whether plaintiffs have shown that the harm — that is, the impact — from the alleged conspiracy is capable of proof at trial through evidence that is common to the class rather than individual to its members. See, e.g., Defs. Wal-Mart Reply Brief at 1.

Plaintiffs maintain that they will be able to demonstrate the alleged conspiracy's impact at trial with **[**42]** common evidence. See Class Mem. at 67-75. And in support of their motion for class certification, plaintiffs have submitted for consideration by the Court the expert report of Dr. Gordon Rausser, the Robert Gordon Sproul Distinguished Professor at the University of California at Berkeley. See 1st Rausser Report at 1. Plaintiffs asked Dr. Rausser to determine, among other things, whether "[t]here was a common impact of Defendants' alleged conspiracy on the Plaintiffs and the Class which can be demonstrated through evidence and economic analysis common to the Class[.]" Id. at 4. Dr. Rausser analyzed the rail freight industry and defendants' transaction data and concluded that there was such a common impact. See id. at 5-8. As Dr. Rausser explains, he developed economic regressions that he applied to defendants' transaction data; in view of the results of his regressions, he concludes, among other things, that common evidence and economic analysis can be used to determine the impact of defendants' alleged conspiracy on a class-wide basis. See id. at 7-8, 80-81.

[*18] Defendants oppose plaintiffs' motion for class certification, arguing primarily that individual issues predominate in determining **[**43]** the impact of the alleged conspiracy. See Class Opp. at 28-72. In support of their position that class certification is inappropriate, defendants have submitted for consideration by the Court the expert report of Dr. Robert Willig, a Professor of Economics and Public Affairs at Princeton University. See Willig Report ¶ 1. Among other things, defendants asked Dr. Willig to determine "whether it is feasible for plaintiffs to demonstrate through common proof that members of the proposed class suffered economic injury[.]" Id. ¶ 11. Dr. Willig concludes that it is not feasible; as he sees it, individual issues predominate over common issues for purposes of determining the impact from the alleged conspiracy. Id. ¶ 25. According to Dr. Willig, "[e]valuation of plaintiffs' claims in this matter would require undertaking analysis that is specific to individual plaintiffs." Id. Furthermore, Dr. Willig contends that Dr. Rausser's regressions are flawed, and he disagrees with Dr. Rausser's conclusion that common evidence and analysis can be used to determine the impact of the alleged conspiracy. Id.

The parties and their experts therefore have presented this Court with what other courts have referred **[**44]** to as a "battle of the experts" on predominance and, in turn, impact. *Ellis v. Costco Wholesale Corp., 657 F.3d 970, 982 (9th Cir. 2011)*; *In re Puerto Rican Cabotage Antitrust Litig., 269 F.R.D. 125, 132 (D.P.R. 2010)*. Compare 1st Rausser Report at 7, with Willig Report ¶ 25. As plaintiffs see it, they should win this battle: whereas Dr. Rausser used economic analysis to show persuasively that workable formulas, common to the class, are available to prove impact, Class Reply at 1, Dr. Willig's analysis should not be credited because his methodology is "overtly flawed." Id. at 5. Defendants say the opposite, arguing that the Court should not credit Dr. Rausser's analysis because it is "fatally flawed." Class Opp. at 50.

In preparation for the hearing on plaintiffs' motion for class certification and in view of the disputes between Dr. Rausser and Dr. Willig on the central issue of predominance, the Court concluded that supplemental briefing was necessary. The Court therefore ordered supplemental briefing on two issues, to be completed before the class certification motions hearing: (1) What standard of proof should the Court apply when examining the requirements of *Rule 23 of the Federal Rules of Civil Procedure*?; **[**45]** and (2) Can the Court resolve factual disputes relevant to *Rule 23* requirements — with particular emphasis on conflicting expert reports — if those factual disputes overlap with the merits of this case? See Order at 1-2, Sept. 17, 2010 [Dkt. No. 423]. The Court then heard oral argument on plaintiffs' motion for class certification, including argument on these two supplemental issues, on October 6 and 7, 2010. See generally Oct. 6 Tr.; Oct. 7 Tr.; see also Order at 1-2, Oct. 5, 2010 [Dkt. No. 445] (listing topics and schedule of argument).

After the class certification motions hearing, the Court, on its own review of the Supreme Court's oral argument transcript in Wal-Mart Stores, Inc. v. Dukes, provided the parties with the opportunity for further supplemental briefing. As the Court explained, although plaintiffs' class certification motion involves *Rule 23(b)(3)*, and the certification question in Wal-Mart Stores, Inc. v. Dukes involved *Rule 23(b)(2)*, "a review of the oral argument transcript in Wal-Mart . . . suggest[ed] that the Supreme Court's decision in that case may have a bearing on this case." Order at 1, Apr. 7, 2011 [Dkt. No. 504]. Thus, the Court ordered the parties to meet **[**46]** and confer and file a joint report with the Court 30 days after the Supreme Court issued its decision in Wal-Mart, stating whether either side believed that supplemental briefing was necessary and, if so, listing the proposed topics and proposing a briefing schedule. Id. at 1-2.

On June 20, 2011, the Supreme Court issued its decision in Wal-Mart Stores, Inc. v. Dukes, and one month later the parties agreed that supplemental briefing was necessary and submitted a joint report listing three proposed topics. See Joint Report Pursuant to April 7, 2011 Order at 1-2, July 20, 2011 [Dkt. No. 519]. The Court approved the parties' joint proposal and ordered supplemental **[*19]** briefing on the following three questions:

> (1) Whether Wal-Mart provides guidance with respect to the standards to be applied in determining whether to certify a class here.
>
> (2) Whether Wal-Mart has any implications for the plaintiffs' ability to satisfy the requirements of *Rule 23(b)(3)*, in light of the facts of this case, plaintiffs' claims and defendants' asserted defenses.
>
> (3) Whether Wal-Mart has any implication for this Court's evaluation of the parties' expert evidence submitted in connection with the pending class certification **[**47]** motion.

Order at 1, July 20, 2011 [Dkt. No. 520]. That supplemental briefing now is complete.

D. "Interline-Related" Communications

One final matter requires preliminary discussion. In the course of briefing on plaintiffs' motion for class certification, defendants filed a motion to exclude what they refer to as "interline-related" communications from consideration for class certification or for any other purpose under *49 U.S.C. § 10706*. Interline Mot. at 1. According to defendants, plaintiffs devote substantial class certification briefing "to the merits of this case" and "repeatedly cite to evidence of communications between Defendants related to interline traffic," defined by defendants as "traffic that originates on the line of one rail carrier but must be handed off to one or more other rail carriers to reach a destination point." Interline Mem. at 1. Defendants argue that "Congress, by statute, has banned such evidence in antitrust cases because it regards such communications as necessary and perfectly lawful, and wanted to protect rail carriers from false allegations of antitrust violations." Id.

The relevant statute is *49 U.S.C. § 10706*, and defendants say that Congress enacted **[**48]** it specifically

> to prevent plaintiffs from inferring an unlawful agreement "from evidence that two or more rail carriers acted together with respect to an interline rate or related matter and that a party to such action took similar action with respect to a rate or related matter on another route or traffic," and
>
> to provide that "evidence of a discussion or agreement between or among such rail carrier and one or more other rail carriers, or of any rate or other action resulting from such discussion or agreement, shall not be admissible if the discussion or agreement . . . concerned an interline movement of the rail carrier, and the discussion or agreement would not, considered by itself, violate the [antitrust] laws."

Interline Mem. at 1 (quoting *49 U.S.C. § 10706(a)(3)(B)(ii)*) (alteration in original).

Plaintiffs oppose defendants' motion on procedural and substantive grounds. See Interline Opp. at 1-2. As for the latter, plaintiffs argue that

> to the extent it applies at all, the limited scope of *§ 10706(a)(3)(B)(ii)*'s evidentiary protection is clear. That subsection does not — as Defendants assert — immunize any discussion or agreement relating in any way to anything having to do with **[**49]** interline traffic. Rather, it narrowly protects only a discussion or agreement that concerned a specific "interline movement of the rail carrier."

Id. at 4 (quoting *49 U.S.C. § 10706(a)(3)(B)(ii)(II)*). Plaintiffs therefore contend that *49 U.S.C. § 10706* does not preclude the admissibility of the evidence that defendants purport to challenge. See id. at 10.

The parties agree that the question whether there was a conspiracy can be established by common proof, so it is not an issue in dispute for purposes of class certification. See infra at 58-59. Thus, defendants note that they "expect that at this stage of the case the Court will not find it necessary to consider any of the [interline-related communications] evidence that Plaintiffs have cited to support their claim that Defendants engaged in an unlawful conspiracy." Interline Mem. at 27; see id. (describing as "legally immaterial" plaintiffs' argument in their certification briefs referencing purported interline communications); see also Oct. 6 Tr. at 44. Consequently, the parties also agree that the Court need only rule on defendants' **[*20]** motion before relying on any such disputed evidence. See Oct. 6 Tr. at 44.

At the Court's direction, **[**50]** after the class certification hearing defendants provided the Court with the list of specific objections to documents and deposition testimony that plaintiffs submitted in support of their motion for class certification, as well as annotated copies of relevant excerpts from Dr. Rausser's two reports that purportedly rely on interline-related communications. See Defs. Interline Objections at 1; see also id., Exs. 1-11, A-C. Because the Court has not relied on any of the disputed evidence in reaching its decision on plaintiffs' motion for class certification, the Court concludes that it need not rule at this time on defendants' motion to exclude interline-related communications.

III. LEGAL STANDARD FOR CLASS CERTIFICATION UNDER *RULE 23(b)(3) OF THE FEDERAL RULES OF CIVIL PROCEDURE*

A. Requirements of Rule 23(a) and (b)(3)

HN5[] A party that moves for class certification bears the burden of showing that its proposed suit meets all of the requirements for certification. See *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 316 n.14 (3d Cir. 2008)*; *Lindsay v. Government Emples. Ins. Co., 251 F.R.D. 51, 54 (D.D.C. 2008)*. Those requirements fall into two categories.

First, the moving party must **[**51]** show that its proposed suit satisfies the two implied and the four express requirements of *Rule 23(a)*. See *Vigus v. Southern Ill. Riverboat/Casino Cruises, Inc., 274 F.R.D. at 235*; *Lindsay v. Government Emples. Ins. Co., 251 F.R.D. at 54*. As for the implied requirements, plaintiffs must show (1) that their proposed class is "sufficiently defined so as to be identifiable as a class"; and (2) that the named representatives "fall within the class." *Vigus v. Southern Ill. Riverboat/Casino Cruises, Inc., 274 F.R.D. at 235*. As for the express requirements, the moving party must show that

(1) the class is so numerous that joinder of all members is impracticable;
(2) there are questions of law or fact common to the class;
(3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and
(4) the representative parties will fairly and adequately protect the interests of the class.

Fed. R. Civ. P. 23(a). Those four express requirements commonly are referred to as numerosity, commonality, typicality, and adequacy. Failure to adequately demonstrate any of the *Rule 23(a)* requirements is fatal to class certification. See *Garcia v. Johanns, 444 F.3d 625, 631, 370 U.S. App. D.C. 280 (D.C. Cir. 2006)*.

HN6[] Second, **[**52]** the moving party must show that its proposed suit falls within at least one of the three categories of cases set forth in *Rule 23(b)*. *Lindsay v. Government Emples, Ins. Co., 251 F.R.D. at 54*. In this case, plaintiffs move for class certification under *Rule 23(b)(3)*. That part of *Rule 23* is intended to encompass cases in which "a class action would achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results." *Id. at 56* (quoting *Fed. R. Civ. P. 23(b)* ADVISORY COMMITTEE NOTE TO 1966 AMENDMENTS). In order to certify a class under *Rule 23(b)(3)*, a court must find "[1] that the questions of law or fact common to class members predominate over any questions affecting only individual members, and [2] that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. These two requirements commonly are referred to as predominance and superiority. ***HN7***[] As *Rule 23(b)(3)* states, in deciding whether a moving party has satisfied the predominance and superiority requirements, pertinent considerations **[**53]** for a court include:

(A) the class members' interests in individually controlling the prosecution or defense of separate actions;

(B) the extent and nature of any litigation concerning the controversy already begun by or against class members;

(C) the desirability or undesirability of concentrating the ligation of the claims in the particular forum; and

[*21] (D) the likely difficulties in managing a class action.

Id.

HN8[] The Supreme Court has emphasized that a class certification decision invites a "close look at the case," *Amchem Prods. Inc. v. Windsor, 521 U.S. 591, 615, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* (quotations omitted), and a class may be certified only "if the trial court is satisfied, after rigorous analysis," that the applicable Rule 23 requirements have been met. *General Tel. Co. of the Sw. v. Falcon, 457 U.S. 147, 161, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)*. In examining the predominance requirement under *Rule 23(b)(3)*, a court's rigorous analysis "'begins . . . with the elements of the underlying cause of action.'" *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 815 (7th Cir. 2012)* (quoting *Erica P. John Fund, Inc. v. Halliburton, Co., 131 S. Ct. 2179, 2184, 180 L. Ed. 2d 24 (2011)*); see *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311*; see also **[**54]** *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. 293, 299 (D.D.C. 2007)*. A court must "examine the elements of plaintiffs' claim through the prism of *Rule 23* to determine whether" the Rule 23 requirements have been met. *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311* (quotations omitted).

Under *Rule 23(b)(3)*, "[i]ndividual questions need not be absent." *Messner v. Northshore Univ. HealthSystem, 669 F.3d at 815*. Indeed, "[t]he text of *Rule 23(b)(3)* itself contemplates that such individual questions will be present. The rule requires only that those questions not predominate over the common questions affecting the class as a whole." Id. "If proof of the essential elements of the cause of action requires individual treatment, then class certification is unsuitable." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311* (quotations omitted).

In this case, plaintiffs allege that defendants engaged in price fixing, in violation of *Section 1* of the Sherman Act. ***HN9***[] To prevail on the merits of their claim at trial, plaintiffs will have to prove three elements: (1) a violation of the antitrust laws — here, *Section 1* of the Sherman Act; (2) individual impact or injury resulting **[**55]** from that violation; and (3) measurable damages. See *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311*; *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 307*. In antitrust cases, injury includes both injury-in-fact and so-called antitrust injury. See *Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d 91, 106 (2d Cir. 2007)*; see also *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311*.

HN10[] At the class certification stage, however, plaintiffs need not prove their case. See *Behrend v. Comcast Corp., 655 F.3d 182, 199 (3d Cir. 2011)*, petition for cert. filed (U.S. Jan. 11, 2012) (No. 11-864) [cert. denied, *133 S. Ct. 24, 183 L. Ed. 2d 673, 2012 U.S. LEXIS 4754*]; *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311*; see also *Walsh v. Ford Motor Co., 807 F.2d 1000, 1017-18, 257 U.S. App. D.C. 85 (D.C. Cir. 1986)* ("Class action proponents may not be called upon to prove their case in order to obtain certification."). Instead, plaintiffs' burden at the class certification stage is to demonstrate that the elements of their claim are "*capable of proof* at trial through evidence that is common to the class rather than individual to its members." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311-12* (emphasis added); see *Messner v. Northshore Univ. HealthSystem, 669 F.3d at 818*; **[**56]** *Behrend v. Comcast Corp., 655 F.3d at 192-93*. Thus, the Court's focus at the class certification stage is on *how* plaintiffs will attempt to prove the elements of their claim at trial. See *Behrend v. Comcast Corp., 655 F.3d at 199*; *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311*.

B. Resolution of Factual Disputes and Standard of Proof

It has long been established that the moving party cannot be called upon to prove its case at the class certification stage. See, e.g., Walsh v. Ford Motor Co., 807 F.2d at 1017-18. Until recently, however, it was unclear whether and, if so, how, a court should assess factual disputes, especially those related to the merits of plaintiffs' cause of action, in ruling on a motion for class certification. Compare In re Vitamins Antitrust Litig., 209 F.R.D. 251, 257 n.9 (D.D.C. 2002), with In re Hydrogen Peroxide Antitrust Litig., **[*22]** 552 F.3d at 316-20. Moreover, there was "little guidance . . . available on the subject of the proper standard of 'proof' for class certification." In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 316; see 1 JOSEPH M. MCLAUGHLIN, MCLAUGHLIN ON CLASS ACTIONS § 3:12 (8th ed. 2011) ("Until recently . . . there had been surprisingly **[**57]** little case law addressing the evidentiary standard the proponent of certification must meet in demonstrating that Rule 23's requirements are satisfied."); Teamsters Local 445 Freight Div. Pension v. Bombardier Inc., 546 F.3d 196, 202 (2d Cir. 2008) ("readily acknowledg[ing]" that prior case law had "been less than clear," and directly "address[ing] a question that weaves through the[] various requirements of Rule 23: the standard of proof applicable to evidence proffered to meet them"); see also Shariff v. Goord, 235 F.R.D. 563, 568 n.3 (W.D.N.Y. 2006) ("Neither Rule 23, nor the vast majority of cases interpreting it identifies a particular burden of proof on the plaintiff.").

Although the D.C. Circuit has not yet had occasion to provide much guidance on these questions, see Kottaras v. Whole Foods Mkt., Inc., Civil Action No. 08-1832, 281 F.R.D. 16, 2012 U.S. Dist. LEXIS 10885, 2012 WL 259862, at *5 (D.D.C. Jan. 30, 2012), the Supreme Court's recent decision in Wal-Mart as well as persuasive decisions from the Third Circuit and others have clarified the standards that a district court must apply in determining whether to certify a class. Upon review of those decisions, the Court concludes (1) **HN11**[] that it can and **[**58]** must resolve any factual disputes relevant to the requirements for class certification — even if that requires considerations enmeshed in the factual and legal issues comprising plaintiffs' claim on the merits, see Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. at 2551-52; see also In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 320; and (2) that it should apply a preponderance of the evidence standard of proof in doing so. See, e.g., In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 320.

1. Factual Disputes and Dueling Experts

As the Supreme Court stated in Wal-Mart Stores, Inc. v. Dukes: **HN12**[] "Rule 23 does not set forth a mere pleading standard. A party seeking class certification must affirmatively demonstrate his compliance with the Rule — that is, he must be prepared to prove that there are *in fact* sufficiently numerous parties, common questions of law or fact, etc." Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. at 2551 (emphasis in original). A district court must be satisfied, after "rigorous analysis," that the requirements of Rule 23 have been met, and

> [f]requently that rigorous analysis will entail some overlap with the merits of the plaintiff's underlying claim. That cannot be **[**59]** helped. [T]he class determination generally involves considerations that are enmeshed in the factual and legal issues comprising the plaintiff's cause of action. . . . Nor is there anything unusual about that consequence[.]

Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. at 2551-52 (quotations and citations omitted).

The Supreme Court in Wal-Mart definitively resolved the question whether its decision in Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974), precludes inquiry into the merits at the class certification stage. Before the Supreme Court issued its decision in Wal-Mart, much of the law on that question arose from an "oft-quoted statement" in Eisen, see In re Initial Pub. Offerings Sec. Litig., 471 F.3d 24, 33 (2d Cir. 2006), that "nothing in either the language or history of Rule 23 . . . gives a court any authority to conduct a preliminary inquiry into the merits of a suit in order to determine whether it may be maintained as a class action." Eisen v. Carlisle & Jacquelin, 417 U.S. at 177. In the past, that statement in Eisen

> has led some courts to think that in determining whether any Rule 23 requirement is met, a judge may not consider any aspect of the merits, and has led other **[**60]** courts to think that a judge may not do so at least with respect to a prerequisite of Rule 23 that overlaps with an aspect of the merits of the case.

In re Initial Pub. Offerings Sec. Litig., 471 F.3d at 33.

The Supreme Court in Wal-Mart made clear that that reading of its decision in **[*23]** Eisen is wrong. As the Supreme Court stated:

> [I]n [Eisen], the judge had conducted a preliminary inquiry into the merits of a suit, *not in order to determine the propriety of certification under Rules 23(a) and (b) (he had already done that . . .)*, but in order to shift the cost of notice required by Rule 23(c)(2) from the plaintiff to the defendants.

Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. at 2552 n.6 (emphasis added) (citation omitted). To the extent that language in Eisen suggests the impermissibility of a merits inquiry *related to the Rule 23(a) and (b) analysis*, the Supreme Court made clear that such language "is the purest dictum and is contradicted by . . . other [Supreme Court] cases." *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. at 2552 n.6*. Thus, "it is appropriate — and indeed necessary — in some circumstances to 'consider[] a merits question at the Rule 23 stage.'" *Kottaras v. Whole Foods Mkt., Inc., 2012 U.S. Dist. LEXIS 10885, 2012 WL 259862, at *6* **[**61]** (quoting *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. at 2552 n.6*); see *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 316-20*; *Regents of the Univ. of Cal. v. Credit Suisse First Boston (USA), Inc., 482 F.3d 372, 381 (5th Cir. 2007)*; *In re Initial Public Offerings Sec. Litig., 471 F.3d at 41*; *Gariety v. Grant Thornton, LLP, 368 F.3d 356, 366 (4th Cir. 2004)*; *Szabo v. Bridgeport Machines, Inc., 249 F.3d 672, 677 (7th Cir. 2001)*; see also 1 McLaughlin on Class Actions § 3:12 ("The Supreme Court recently cemented consensus that recently emerged among the United States Courts of Appeal. Virtually every circuit had expressly adopted standards that require a district court considering class certification to consider evidence" and "resolve factual disputes that are relevant to Rule 23's criteria[.]").

HN13[] The required rigorous factual review that a court must perform in examining whether the requirements of *Rule 23(a)* and *(b)* have been met similarly applies to disputes among experts relevant to class certification. As the Third Circuit stated in In re Hydrogen Peroxide Antitrust Litig.: "Expert opinion with respect to class certification, like any matter relevant to a Rule 23 requirement, **[**62]** calls for rigorous analysis." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 323*. Nothing in Rule 23 distinguishes expert evidence from other types of evidence.

> Under *Rule 23* the district court must be "satisfied," . . . or "persuaded," . . . that each requirement is met before certifying a class. Like any evidence, admissible expert opinion may persuade its audience, or it may not. This point is especially important to bear in mind when a party opposing certification offers expert opinion. The district court may be persuaded by the testimony of either (or neither) party's expert with respect to whether a certification requirement is met. Weighing conflicting expert testimony at the certification stage is not only permissible; it may be integral to the rigorous analysis Rule 23 demands.

In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 323 (quoting *General Tel. Co. of the Sw. v. Falcon, 457 U.S. at 161*; *In re Initial Pub. Offerings Sec. Litig., 471 F.3d at 41*); see also *id. at 315 n.13* (stating that the "ultimate question" at the class certification stage is "whether the district court is satisfied, by all the evidence and arguments including all relevant expert opinion, that **[**63]** the requirements of *Rule 23* have been met").

HN14[] "Resolving expert disputes in order to determine whether a class certification requirement has been met is always a task for the court — no matter whether a dispute might appear to implicate the 'credibility' of one or more experts[.]" *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 324*; see *In re Initial Pub. Offerings Sec. Litig., 471 F.3d at 40* (concluding that courts must "resolve[] factual disputes relevant to each Rule 23 requirement," including weighing conflicting opinion evidence); *Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d at 107*; *In re Ethylene Propylene Diene Monomer (EPDM) Antitrust Litig., 256 F.R.D. 82, 96-97 (D. Conn. 2009)*. Such disputes among experts in an antitrust case may include, among other things, different views on the appropriate characterization of the relevant market, different views on how defendants structured their prices, and any other considerations relevant to whether **[*24]** plaintiffs have satisfied the requirements of *Rule 23*. See *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 325*; *In re EPDM Antitrust Litig., 256 F.R.D. at 96-97*; *Hnot v. Willis Grp. Holdings Ltd., 241 F.R.D. 204, 209-10 (S.D.N.Y. 2007)*. **[**64]** Failure to weigh conflicting expert opinions "'amounts to a delegation of judicial power to the plaintiffs, who can obtain class certification just by hiring a competent expert.'" *Kottaras v. Whole Foods Mkt., Inc., 2012 U.S. Dist. LEXIS 10885, 2012 WL 259862, at *11* (quoting *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 323*).

HN15[] There are, of course, limits to a court's inquiry into disputes among experts, just as there are limits to a court's inquiry into factual disputes generally: they should be resolved at the class certification stage only to the extent necessary to "satisf[y]" or "persuade[]" a court that each requirement of Rule 23 has or has not been met. In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 323 (quotations and citations omitted); see also In re Zurn Pex Plumbing Prods. Liab. Litig., 644 F.3d 604, 611 (8th Cir. 2011). Thus, for example, a court should only engage itself in "'statistical dueling'" of experts if "such dueling presents 'a valid basis for [granting or] denying class certification.'" Hnot v. Willis Grp. Holdings Ltd., 241 F.R.D. at 210 (quoting In re Initial Pub. Offerings Sec. Litig.,471 F.3d at 35). Similarly, for example, a court should resolve "which expert is correct," **[**65]** Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d at 107, when experts disagree on "*whether* a single formula can be created, or *whether* there really [are] too many factors at work for a multiple regression model to be methodologically sound." In re EPDM Antitrust Litig., 256 F.R.D. at 96-97 (citing Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d at 107) (emphasis added).

In contrast, if the defendants' expert is "merely disputing the *results* of the plaintiffs' experts' analysis rather than the feasibility of using a single formula methodology, that would be a merits issue, not a class certification issue." In re EPDM Antitrust Litig., 256 F.R.D. at 96 (emphasis added); see id. at 100-01 (concluding that defendants' challenge to plaintiffs' expert at the class certification stage was a matter to be resolved at trial because, although each sides' expert "arrived at a polar opposing finding concerning common impact[,] . . . significantly both employ single formulas"). When both experts agree on a methodology for determining class-wide impact, but ultimately reach different conclusions whether putative class members were injured by an alleged conspiracy, **[**66]** a court need not resolve which expert is correct at the class certification stage; that dispute presents a merits question to be resolved by the finder of fact at trial. In re Currency Conversion Fee Antitrust Litig., 264 F.R.D. 100, 115 (S.D.N.Y. 2010); see In re EPDM Antitrust Litig., 256 F.R.D. at 90; Hnot v. Willis Grp. Holdings Ltd., 241 F.R.D. at 209-10.

2. Standard of Proof

a. Facts Bearing on Rule 23

The Court concludes that HN16[] plaintiffs must establish the requirements of Rule 23 by a preponderance of the evidence, and that this standard applies to any factual disputes, including those among experts, that bear on the decision whether to certify a class. As both sides acknowledge, in the past some judges in this district at the class certification stage have required plaintiffs to make only a "threshold showing" or to set forth a "colorable method" by which they intend to satisfy the requirements of Rule 23. In re Vitamins Antitrust Litig., 209 F.R.D. at 264; see Pls. Supp. Brief at 1-2; Defs. Supp. Brief at 14-15. Recent decisions by the Second, Third, and Fifth Circuits, however, all expressly hold that Rule 23 requirements must be established by a higher standard: a preponderance **[**67]** of the evidence. See Brown v. Kelly, 609 F.3d 467, 476 (2d Cir. 2010) ("The Rule 23 requirements must be established by at least a preponderance of the evidence.") (citing Teamsters Local 445 Freight Div. Pension v. Bombardier Inc., 546 F.3d at 202 ("Today, we dispel any remaining confusion and hold that the preponderance of the evidence standard applies to evidence proffered to establish Rule 23's requirements.")); In re Ins. Brokerage Antitrust Litig., 579 F.3d 241, 257-58 (3d Cir. 2009) ("The '[f]actual determinations **[*25]** necessary to make Rule 23 findings must be made by a preponderance of the evidence.'") (quoting In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 320); In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 307 (expressly rejecting a "threshold showing" standard and requiring proof by a preponderance of the evidence); Alaska Elec. Pension Fund v. Flowserve Corp., 572 F.3d 221, 228 (5th Cir. 2009) ("'[T]he preponderance of the evidence standard applies to evidence proffered to establish Rule 23's requirements.'") (quoting Teamsters Local 445 Freight Div. Pension v. Bombardier Inc., 546 F.3d at 202) (alteration in original). [5]

As the Third Circuit stated in In re Hydrogen Peroxide:

[5] In their supplemental briefing, plaintiffs **[**68]** state that they do not object to the Court applying the preponderance of the evidence standard because they believe they can readily satisfy it; nevertheless, plaintiffs note that they "are not agreeing that a preponderance standard should apply." Pls. Supp. Brief at 3 n.5.

> [I]nvoking the phrase "threshold showing" risks misapplying *Rule 23*. A "threshold showing" could signify, incorrectly, that the burden on the party seeking certification is a lenient one (such as a prima facie showing or a burden of production) or that the party seeking certification receives deference or a presumption in its favor. So defined, "threshold showing" is an inadequate and improper standard. [T]he requirements of *Rule 23* must be met, not just supported by some evidence.

In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 321 (quotations omitted).

HN17[] "Class certification requires a finding that each of the requirements of *Rule 23* has been met" by a preponderance of the evidence. *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 320*; see *Fed. R. Civ. P. 23(b)(3)* (the court must "find[] that the questions of law or fact common to class members predominate"). **[**69]** A court can only do so upon weighing all relevant evidence for and against class certification and then concluding by a preponderance of the evidence that the *Rule 23* requirements in fact have been met. See *id. at 320-22*; see also *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. at 2551* (party seeking certification "must be prepared to prove that there are *in fact* sufficiently numerous parties, common questions of law or fact, etc.") (emphasis in original). Applying a lesser standard would permit class certification even if a court thought it less than likely that each *Rule 23* requirement had been met, violating the Supreme Court's instruction that "actual, not presumed conformance" with *Rule 23* is "indispensable." *General Tel. Co. of the Sw. v. Falcon, 457 U.S. at 160*; see also *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. at 2551*.

b. Expert Opinions and Regression Analyses

HN18[] An expert opinion presenting economic regression analysis commonly is used as a basis for certifying a class. See, e.g., *In re TFT-LCD (Flat Panel) Antitrust Litig., 267 F.R.D. 291, 313 (N.D. Cal. 2010)* (citing cases accepting multiple regression analysis as a means of proving antitrust injury and damages on a class-wide **[**70]** basis); *In re EPDM Antitrust Litig., 256 F.R.D. at 95*; see also DANIEL L. RUBINFELD, REFERENCE GUIDE ON MULTIPLE REGRESSION 305-08 (FED. JUDICIAL CENTER, 3d ed. 2011). In this case, plaintiffs' expert, Dr. Gordon Rausser, has developed two multiple regression models, a common factor model and a damage model, that, in his opinion, together reveal that impact can be established at trial with evidence common to the class. See 2d Rausser Report at 91-92, 99-100; see also Oct. 6 Tr. at 137. Defendants' expert, Dr. Robert Willig, disagrees with Dr. Rausser's analysis and concludes that Dr. Rausser's regressions suffer from fatal flaws. See generally Willig Report.

HN19[] Where, as here, experts disagree on the ultimate question whether an economic regression model shows that impact is capable of proof at trial through evidence common to the class, that disagreement must be resolved by a court at the class certification stage: a court must determine "which expert is correct" about whether "the injury-in-fact question is common to the class." *Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d at 107*; see *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at* ***[*26]*** *324*. To answer that question, **[**71]** the Third Circuit instructed in In re Hydrogen Peroxide Antitrust Litig. that a court must apply a two prong test, examining (1) whether the plaintiffs have established that their expert's theory of common impact is "plausible"; and, if so, (2) whether the plaintiffs have established by a preponderance of the evidence that the expert's plausible theory is "susceptible to proof at trial through available evidence common to the class." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 325*; see *Behrend v. Comcast Corp., 655 F.3d at 192-93*.

The Third Circuit recognized in In re Hydrogen Peroxide Antitrust Litig., and then reaffirmed in Behrend v. Comcast Corp., that an expert's theory that impact is capable of common proof at trial — by means of regression analysis or other common evidence — is not a question of fact necessarily capable of resolution by a preponderance of the evidence. The plausibility standard falls below a requirement of perfection, see *Behrend v. Comcast Corp., 655 F.3d at 204 n.13* (a court need not determine that a regression model "is perfect at the certification stage"), and above a "threshold," *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 321* (quotations **[**72]** omitted), or a "not fatally flawed" standard. *In re Initial Pub. Offerings Sec. Litig., 471 F.3d at 42*. Plausibility depends on the "ability to establish — whether through mathematical models or further data or other means — the key logical steps behind [the] theory." In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d 6, 25-26 (1st Cir. 2008).

By way of illustration, Dr. Willig criticizes Dr. Rausser's common factor regression model for looking at only a snapshot in time and therefore purportedly failing to examine changes in freight rates over time. See Willig Report ¶ 213. Whether this purported error discredits Dr. Rausser's common factor model is not a question that readily lends itself to resolution by a preponderance of the evidence; indeed, such a standard has not been adopted by any court and lacks intuitive force. See Oct. 6 Tr. at 20 (plaintiffs' counsel noting that "there has been no direction by any circuit, let alone this district or the Supreme Court that applies an evidentiary type standard to the assessment by the court as a whole of an expert report directed at proof of impact or fact of damage and amount of damage"). Instead, applying the first prong **[**73]** of the test set forth in In re Hydrogen Peroxide Antitrust Litig., the Court will evaluate whether this purported error precludes a determination that Dr. Rausser's theory of proof is "plausible," Behrend v. Comcast Corp., 655 F.3d at 204 n.13; In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 325, or "viable," In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d at 25 (1st Cir. 2008); and that his regression analysis is "feasible," In re EPDM Antitrust Litig., 256 F.R.D. at 96, or "workable." In re Amaranth Natural Gas Commodities Litig., 269 F.R.D. 366, 383 & n.118 (S.D.N.Y. 2010); see In re Ready-Mixed Concrete Antitrust Litig., 261 F.R.D. 154, 171 (S.D. Ind. 2009). [6]

If a court determines that the plaintiffs have established that their expert's theory of proof is plausible and that their expert's regression analysis, if any, is workable, then the next question for the court to resolve is whether the plaintiffs have established by a preponderance of the evidence that the plausible theory and workable regression are "susceptible to proof at trial through available evidence common to the class." In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 325; see Behrend v. Comcast Corp., 655 F.3d at 192-93. In assessing that question in this case, the Court will resolve all factual disputes bearing on Dr. Rausser's and Dr. Willig's analyses — including what the parties refer to as subsidiary factual disputes underlying the experts' opinions — by a preponderance of the evidence. See In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at **[*27]** 320-25; see Oct. 6 Tr. at 30-31. And ultimately, the Court will determine which expert is correct, Dr. Rausser or Dr. Willig, on the question whether a workable regression model can be used to establish by a preponderance of the evidence that impact can be proven at trial with common evidence. See, e.g., Behrend v. Comcast Corp., 655 F.3d at 192-93; **[**75]** In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 325; Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d at 107.

* * * *

To summarize, the Court will resolve factual disputes relevant to Rule 23 requirements, and the Court will apply a preponderance of the evidence standard in examining whether plaintiffs have satisfied each of the requirements of Rule 23. Accordingly, **HN20**[] in order to certify plaintiffs' putative class, the Court "must find that the evidence more likely than not establishes each fact necessary to meet the requirements of Rule 23." In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 320; see also Behrend v. Comcast Corp., 655 F.3d at 185 (plaintiffs must establish by a preponderance of the evidence that they would be able to prove through common evidence impact and a common methodology to quantify damages). As for the predominance requirement of Rule 23(b)(3), in examining Dr. Rausser's conclusion that impact can be established at trial with common evidence, the Court will determine whether Dr. Rausser's theory of proof is plausible and whether his regression models are workable; and, if so, whether plaintiffs have established by preponderance of **[**76]** the evidence that his theory and models are "susceptible to proof at trial through available evidence common to the class." In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 325; see Behrend v. Comcast Corp., 655 F.3d at 192-93.

---

[6] Defendants use the terms "feasible" and "viable" in evaluating the issue of common impact. See Willig Report ¶ 11 (stating that defendants asked Dr. Willig to determine "whether it is *feasible* for plaintiffs to demonstrate through common proof that members of the proposed class suffered economic injury") (emphasis added); Defs. Wal-Mart Reply Brief at 1 (stating that the central question before the Court is whether plaintiffs have proffered "a *viable* classwide method for proving injury at trial") (emphasis **[**74]** added).

Defendants contend that there are numerous factual disputes between the parties and their experts that are relevant to whether plaintiffs have satisfied the predominance requirement of *Rule 23(b)(3)*, and defendants further contend that Dr. Rausser's analysis is fatally flawed. Defendants identify four principal factual disputes and assert that each one bears on whether impact can be proven at trial with common evidence: (1) whether rate-based fuel surcharges frequently were used before the class period, see Defs. Wal-Mart Brief at 5; (2) whether "legacy shippers" — that is, shippers who paid a rate-based fuel surcharge during the class period under a contract that was entered into before July 1, 2003 — would have continued paying fuel surcharges, even absent the alleged conspiracy, see id.; see also Defs. Supp. Brief at 17; (3) whether captive shippers — that is, those shippers served by only one railroad or those shippers with no viable transport alternatives **[**77]** to the railroad that serves it — would have paid fuel surcharges, even absent the alleged conspiracy, see Defs. Wal-Mart Brief at 6; Defs. Supp. Brief at 18 & n.10; and (4) whether some class members received concessions from a defendant on certain aspects of their rail transportation agreement in exchange for acceptance of the defendant's fuel surcharge. See Defs. Wal-Mart Brief at 6; Defs. Supp. Brief at 19. As defendants describe it, the Court's resolution of each of these factual disputes in plaintiffs' favor is a necessary condition for class certification; defendants contend that these disputes "must be resolved" in examining whether to certify plaintiffs' putative class. Defs. Wal-Mart Brief at 6; see Defs. Supp. Brief at 19-20.

The Court agrees with defendants that these factual disputes are relevant to *Rule 23(b)(3)*'s predominance requirement — primarily, whether plaintiffs can show that impact is capable of proof at trial through evidence that is common to the class. Regarding, for example, the issue of concessions, if shippers received concessions in the form of base rate discounts in exchange for the application of a fuel surcharge, then, as plaintiffs' expert himself acknowledges, **[**78]** the impact for those shippers "wouldn't have been common to others" who did not receive such discounts. 1st Rausser Dep. at 272; see also id. at 270 (Dr. Rausser, acknowledging that "any coordinated program that focuses just on a part of the pricing can be unwound or made far less effective if there is a change in the base pricing"). Going further, if the fuel surcharge applied to a shipper "was **[*28]** exactly offset by the base rate," then, as plaintiffs' expert states, "there would be no injury." 2d Rausser Dep. at 208. [7]

Defendants and their expert contend that some shippers included within plaintiffs' class were not harmed by the alleged conspiracy because they received contract concessions in the form of base rate discounts. And defendants say that determining which shippers received such discounts requires individualized evidence and analysis that precludes a finding that impact can be proven on a class-wide basis with common evidence. Plaintiffs and their expert disagree, arguing that there is no evidence of widespread discounting and any examples of discounting are anomalies that do not preclude a finding that impact can be proven on a class-wide basis with common evidence. Because this dispute is relevant to whether common evidence can be used to establish impact at trial, the Court must resolve it by a preponderance of the evidence — even though it plainly is an issue **[**80]** enmeshed in the factual and legal issues comprising the merits of plaintiffs' claim.

Although the Court agrees with defendants that it must resolve this (and other) factual disputes, the Court disagrees with defendants that the facts fall in their favor at this stage. As discussed below, the Court finds by a preponderance of the evidence that the fuel surcharge programs applied by defendants before the class period were nothing like the widespread application of defendants' more aggressive, standardized fuel surcharge programs during the class period; that these standardized fuel surcharges were applied uniformly, to all or virtually all class members; and that there is no evidence of widespread discounting of base rates in exchange for application of fuel surcharges, and that any such discounting in the record is an anomaly that does not preclude a

[7] To be clear on terms, as discussed below, such an exact offset between a fuel surcharge and a base rate would mean that an individual plaintiff has no claim for damages, but not necessarily that that plaintiff was not injured by the defendants' alleged conspiracy. See, e.g., *In re EPDM Antitrust Litig., 256 F.R.D. at 88* ("[I]t is possible for a plaintiff to suffer antitrust injury-in-fact and yet have no damages because it has taken steps to mitigate the actual price paid through rebates, discounts, and other non-price factors . . . . By expending resources to negotiate down from the supracomeptitive prices established by the cartel, plaintiffs who have suffered no damages **[**79]** may still have suffered an injury-in-fact from the antitrust conspiracy. The fact that a plaintiff may have successfully employed bargaining power to fend off the *effect* of the conspiratorial practices does not mean that it has not been put in a worse position but-for the conspiracy.") (emphasis in original); see infra at 115-16.

finding of predominance. Furthermore, the Court credits Dr. Rausser's conclusion that impact and damages are capable of proof at trial with common evidence. The Court finds that Dr. Rausser's economic regression analysis is workable, and that he presents a theory of proof that is plausible and susceptible to proof at trial through available **[**81]** evidence common to the class. [8]

IV. *RULE 23(a)* FINDINGS AND CONCLUSIONS

A. Two Implied Requirements

1. Class Definition

HN22[] The first implied requirement of *Rule 23(a)* is that the class must be "sufficiently defined so as to be identifiable as a class." *Vigus v. Southern Ill. Riverboat/Casino Cruises, Inc., 274 F.R.D. at 235*; see also *Johnson v. District of Columbia, 248 F.R.D. 46, 52 (D.D.C. 2008)*; *Pigford v. Glickman, 182 F.R.D. 341, 346 (D.D.C. 1998)*. "The requirement that a class be clearly defined is **[**82]** designed primarily to help the trial court manage the class." *Pigford v. Glickman, 182 F.R.D. at 346*. This requirement "is not designed to be a particularly stringent test, but plaintiffs must at least be able to establish that 'the general outlines of the members of the class are determinable at the outset of the litigation.'" Id. (quoting 7A **[*29]** CHARLES ALAN WRIGHT, ARTHUR R. MILLER & MARY KAY KANE, FEDERAL PRACTICE & PROCEDURE § 1790, at 118). "In other words, the class must be sufficiently definite 'that it is administratively feasible for the court to determine whether a particular individual is a member.'" Id. (quoting 7A FEDERAL PRACTICE & PROCEDURE, supra, § 1760, at 121). A court therefore should deny class certification "where the class definitions are overly broad, amorphous, and vague, or whether the number of individualized determinations required to determine class membership becomes too administratively difficult." *Perez v. Metabolife Int'l, Inc., 218 F.R.D. 262, 269 (S.D. Fla. 2003)*; see also *Johnson v. District of Columbia, 248 F.R.D. at 52*.

In this case, plaintiffs seek certification of the following class:

> All entities or persons that at any time from July 1, 2003 until **[**83]** December 31, 2008 (the "Class Period") purchased rate-unregulated rail freight transportation services directly from one or more of the Defendants, as to which Defendants assessed a stand-alone rail freight fuel surcharge applied as a percentage of the base rate for the freight transport (or where some or all of the fuel surcharge was included in the base rate through a method referred to as "rebasing") ("Fuel Surcharge").
> Excluded from this Class definition are (a) Defendants, any subsidiaries or affiliates of Defendants, any of Defendants' co-conspirators, whether or not named as a Defendant in the Complaint, and all federal governmental entities, and (b) all entities or persons that paid a Fuel Surcharge directly to any of the Defendants solely pursuant to a railroad-shipper contract that was (i) entered into before July 1, 2003, and (ii) provided for a stand-alone Fuel Surcharge to be paid under a predetermined formula specifically set forth in the contract.

Class Mot. at 1. [9]

---

[8] The findings set forth in this Opinion are made "only for purposes of class certification and [are] not binding on the trier of facts" on the merits at trial. *In re Initial Pub. Offerings Sec. Litig., 471 F.3d at 41*; see *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 318* (***HN21***[] a court's findings "for the purpose of class certification are conclusive on that topic," but "do not bind the fact-finder on the merits"); see also *Behrend v. Comcast Corp., 655 F.3d at 190*. These findings therefore "'may be revised (or wholly rejected) by the ultimate factfinder[.]'" *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 318 n.19* (quoting *Unger v. Amedisys Inc., 401 F.3d 316, 323 (5th Cir. 2005))*.

[9] During the class certification motions hearing, the Court noted that the class definition proposed by plaintiffs in their motion papers is different from the class definition proposed by plaintiffs in their **[**84]** second consolidated amended complaint. See Oct. 7 Tr. at 331. Compare Class Mot. at 1, with 2d Am. Compl. ¶ 38. In view of some case law suggesting that a district court may be bound by the class definition set forth in a complaint, see *Berlowitz v. Nob Hill Masonic Mgmt., Inc., Civil Action No. 96-1241, 1996 U.S. Dist. LEXIS 22599, 1996 WL 724776, at *2 (N.D. Cal. Dec. 6, 1996)*; see also *Brewer v. Salyer, Civil Action No.*

Defendants contend that plaintiffs' class definition "renders determining which shippers would actually be in the proposed class extremely difficult, if not impossible." Class Opp. at 75. According to defendants, there are two problems with plaintiffs' proposed class: (1) there is no "[e]asy [w]ay" to determine whether freight traffic qualifies as rate-unregulated, id.; and (2) plaintiffs propose no method to identify shippers with "rebased" rates. Id. at 76.

As discussed, plaintiffs' proposed class is specifically limited to "rate-unregulated" traffic. Class Mot. at 1. Plaintiffs have defined the term "unregulated" as referring to "rail freight transportation services where the rates are set by private contracts or through other means exempt from rate regulation under federal law." 2d Am. Compl. ¶ 1. Defendants contend that it is difficult to discern whether freight traffic moves under a regulated common carrier authority or, instead, under an unregulated contract. Class Opp. at 75. According to defendants, **[**86]** determining whether freight traffic is rate-regulated or rate-unregulated requires individualized inquiries viewed in light of the parties' intent. Id. Consequently, defendants contend that "[d]etermining **[*30]** class membership would require individualized inquiries, making class certification inappropriate." Id. at 76.

The Court disagrees with defendants. As plaintiffs point out, the STB ruling in 2007 distinguished between rate-regulated and rate-unregulated traffic, expressly stating that its ruling applied only to the former. See Class Reply at 39. Neither the STB nor defendants asserted that it was too difficult to determine which traffic the ruling covered. Id. Furthermore, in this case defendants have produced during discovery transaction data for rate-unregulated traffic without arguing that it was too difficult to determine which transaction data related to that type of traffic. Id. And finally, defendants' expert, Dr. Willig, has not claimed any difficulty in distinguishing between rate-regulated and rate-unregulated traffic. To the contrary, Dr. Willig was able to quantify both the amount of rate-unregulated traffic during the class period and the revenue it produced for defendants. **[**87]** See Willig Report ¶ 24 ("[S]hippers of unregulated traffic with revenue-based FSCs[, that is, fuel surcharges,]generated roughly 72 million carloads of rail traffic during the class period and $110 billion in revenue for defendants. This reflects roughly 56 percent of defendants' total non-regulated traffic over this period. For the class period as a whole, there were nearly 30,000 shippers of unregulated traffic with revenue-based FSCs[.]"); see also 1st Rausser Report at 89 (noting that "the data supplied by BNSF . . . records whether the shipment was regulated or not"). Dr. Willig's report therefore belies defendants' claim that it is too difficult to determine whether rail traffic qualifies as rate-unregulated.

Defendants' second argument focuses on plaintiffs' proposed inclusion of shippers who paid "rebased" rates. As plaintiffs describe it, at some point during the alleged conspiracy NS "engaged in something that has come to be known in this case as rebasing; namely folding at least part of the fuel surcharge into the base rate." Oct. 6 Tr. at 133. Defendants contend that plaintiffs "do not identify . . . shippers" who paid a rebased rate "or propose any methodology for doing **[**88]** so." Class Opp. at 76. And in the absence of any viable methodology, defendants contend that it is impossible to determine what shippers are in the class due to rebasing. Id.

The Court disagrees with defendants. Plaintiffs assert that shippers who paid a rebased rate simply paid a new base rate with a portion of the previous supra-competitive fuel surcharge "bake[d]" in. Class Reply at 40 (citing HD Ex. 83, Lawson Dep. at 72); see Class Mot. at 48. As Dr. Rausser explains it, NS' rebasing strategy "effectively made permanent a surcharge based on a WTI of $64 by folding that amount into base rates, and supplemented that with a new stand-alone fuel surcharge anytime the WTI exceeded $64." 1st Rausser Report at 117 n.250. And Dr. Rausser has accounted for NS' alleged rebasing in his analysis. See id. ("As my analysis considers the gross price

---

06-1324, 2009 U.S. Dist. LEXIS 61285, 2009 WL 2019923, at *3 (E.D. Cal. July 8, 2009), the Court directed two questions to the parties at the motions hearing: (1) How do the plaintiffs want the class defined?; and (2) Is there some obligation on the plaintiffs to move to amend their amended complaint to match the definition set forth in the class certification motion? See Oct. 7 Tr. at 331.

In response to the Court's two questions, the parties filed a joint submission regarding the class definition in which they agreed that a formal amendment to plaintiffs' complaint was "not necessary" and that the Court "may decide plaintiffs' motion for class certification based on the proposed class definition in the motion, and on the record before it." Joint Class Definition Submission at 1. In accordance with the parties' joint submission, **[**85]** the Court has decided plaintiffs' motion for class certification based on the proposed class definition in their motion, not the definition in their second consolidated amended complaint.

it will not be affected by NS' change to their fuel surcharge program" by means of rebased rates.); see also id. at 47 n.105 ("[M]ost shipments still received a fuel surcharge on top of that new base rate[.]").

The Court therefore finds by a preponderance of the evidence that plaintiffs' proposed class is defined so as "to establish that 'the general **[**89]** outlines of the membership of the class are determinable at the outset of the litigation.'" *Pigford v. Glickman, 182 F.R.D. at 346* (quoting 7A FEDERAL PRACTICE & PROCEDURE, supra, § 1790, at 118). Plaintiffs have satisfied their burden of showing that "'it is administratively feasible for the court to determine whether a particular individual is a member.'" Id. (quoting 7A FEDERAL PRACTICE & PROCEDURE, supra, § 1760, at 121).

2. Named Representatives Within the Putative Class

HN23[] The second implied requirement of *Rule 23(a)* is that the named representative plaintiffs must "fall within the class." *Vigus v. Southern Ill. Riverboat/Casino Cruises, Inc., 274 F.R.D. at 235*. Defendants appear to argue that some (or perhaps all) of the proposed representatives are not part of the putative class. See Class Opp. at 80 (stating that "[a] class cannot be certified where the proposed representatives would not be members **[*31]** of the class."). The basis for that argument, however, is unclear, and the Court is not persuaded. Plaintiffs assert, and defendants do not dispute, that during the class period each of the eight named representatives directly purchased from one or more of the defendants rail freight **[**90]** services as to which a fuel surcharge was applied. See Class Mem. at 1; id. at 58-60. Consequently, the Court finds by a preponderance of the evidence that the second implied requirement of *Rule 23(a)* is met: each of the named representative plaintiffs falls within the putative class.

B. Four Express Requirements

1. Numerosity

HN24[] The first express requirement of *Rule 23(a)* is numerosity: the putative class must be "so numerous that joinder of all members is impracticable." *Fed. R. Civ. P. 23(a)(1)*. "Typically, a class in excess of 40 members is sufficiently numerous to satisfy this requirement." *Lindsay v. Government Emples. Ins. Co., 251 F.R.D. at 55*. "Mere conjecture, without more, is insufficient to establish numerosity, but plaintiffs do not have to provide an exact number of putative class members in order to satisfy the numerosity requirement." *Pigford v. Glickman, 182 F.R.D. at 347*.

Plaintiffs assert that defendants' transaction data show that "tens of thousands of shippers" are included in the putative class. Class Mem. at 56. Defendants do not contest the numerosity requirement and themselves acknowledge that plaintiffs' putative class includes approximately 30,000 shippers. See, e.g., **[**91]** Oct. 7 Tr. at 258; see also Willig Report ¶ 24 ("For the class period as a whole, there were nearly 30,000 shippers of unregulated traffic with revenue-based FSCs[.]"). ***HN25***[] "When the class is large" — here, in the tens of thousands — "numbers alone are dispositive[.]" *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 306*. The Court therefore finds that plaintiffs have satisfied their burden of showing by a preponderance of the evidence that the putative class "is so numerous that joinder of all members is impracticable[.]" *Fed. R. Civ. P. 23(a)(1)*.

2. Commonality

HN26[] The second express requirement of *Rule 23(a)* is commonality: there must be "questions of law or fact common to the class[.]" *Fed. R. Civ. P. 23(a)(2)*. "Not every issue of law or fact [need] be the same for each member." *Lindsay v. Government Emples. Ins. Co., 251 F.R.D. at 55* (quotations omitted) (alteration in original). "Rather, the commonality test is met when there is at least one issue . . . the resolution of which will affect all or a significant number of the putative class members." Id. (quotations omitted) (alteration in original).

Because the commonality requirement is satisfied "by a single common issue," courts **[**92]** have noted that it often is easily met. *Taylor v. District of Columbia Water & Sewer Auth., 241 F.R.D. 33, 37 (D.D.C. 2007)*. But as the Supreme Court recently made clear, what matters for purposes of commonality "is not the raising of common questions — even in droves — but, rather the capacity of a classwide proceeding to generate common *answers* apt to drive the resolution of the litigation." *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. at 2551* (quotations omitted).

HN27[] In antitrust class actions, "numerous courts have held that allegations concerning the existence, scope, and efficacy of an alleged antitrust conspiracy present important common questions sufficient to satisfy the commonality requirement[.]" *Meijer Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 300* (quotations omitted). As plaintiffs assert, and as defendants do not dispute, the question whether defendants engaged in a conspiracy — the first element of plaintiffs' claim — is an issue that is common to all class members because the answer to that question will focus exclusively on defendants' conduct. See Class Mem. at 57; see also Oct. 7 Tr. at 161 (defendants' counsel, acknowledging that "whether there was or was **[**93]** not a conspiracy is in fact capable of common proof"). The Court therefore finds by a preponderance of the evidence that "there are questions of law or fact common to the class[.]" *Fed. R. Civ. P. 23(a)(2)*.

[*32] 3. Typicality

HN28[] The third express requirement of *Rule 23(a)* is typicality: "the claims or defenses of the representative parties [must be] typical of the claims or defenses of the class[.]" *Fed. R. Civ. P. 23(a)(3)*. Typicality is "intended to assess whether the action can be efficiently maintained as a class and whether the named plaintiffs have incentives that align with those of the absent class members so as to assure that the absentees' interests will be fairly represented." *Pigford v. Glickman, 182 F.R.D. at 349* (quotations omitted). "[I]f the class representative's claims arise from the same events, practice, or conduct, and are based on the same legal theory as those of other class members, the typicality requirement is satisfied." *Lindsay v. Government Emples. Ins. Co., 251 F.R.D. at 55* (quotations omitted); see *Pigford v. Glickman, 182 F.R.D. at 349*.

"The facts and claims of each class member do not have to be identical to support a finding of typicality . . . , rather, the requirement **[**94]** goes to whether the named plaintiff's claim and the class claims are so interrelated that the interests of the class members will be fairly and adequately protected in their absence." *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 301* (citation and quotations omitted)); see also *Johnson v. District of Columbia, 248 F.R.D. at 53*. "The requirement has been liberally construed by courts . . . [and] in the antitrust context, typicality will be established by plaintiffs and all class members alleging the same antitrust violations by defendants." *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 301* (alternations in original) (quotations omitted).

Plaintiffs contend that the typicality requirement easily is satisfied in this case because "all named Plaintiffs and all Class members seek overcharge damages pursuant to an identical price-fixing claim under *Section 1* of the Sherman Act." Class Mem. at 58. As plaintiffs describe it, "[t]he **[**95]** claims of the named Plaintiffs and the absent Class members alike arose out of the same course of events: Defendants' conspiracy to impose stand-alone, rate-based Fuel Surcharges in order to raise shipping prices across the board." Id.

Defendants disagree. They argue that none of the eight proposed class representatives is typical. See Class Opp. at 79. First, defendants argue that shippers that paid a fuel surcharge before July 1, 2003 are not properly members of the class, and shippers that are served by only one defendant can have no claim because there was no competition among defendants for their business that could have been affected by the alleged conspiracy. See id. According to defendants, this disqualifies all of the eight proposed class representatives. Id.

The Court finds defendants' arguments inapposite because the typicality requirement focuses on the "*claims* of the representative, not the individual characteristics of the [named] plaintiff[s]." *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 301* (quotations omitted) (emphasis added). The claims of the eight named plaintiffs and those of the absentee class members arose from the same course of events: defendants' **[**96]** alleged conspiracy to impose supra-competitive fuel surcharges across-the-board on all shippers. And the eight named plaintiffs and the absentee class members seek the same relief: overcharge damages under *Section 1* of the Sherman Act.

Next, defendants target two of the named representatives, Dust Pro and Nystar, arguing that each one faces a disqualifying problem. As for Dust Pro, defendants argue that the shipper "generally did not pay for its shipments — it liquidated the business while owing a substantial debt to UP — and has no evidence that the dollar total of fuel surcharges it actually paid even approached the amount of its unpaid debt[.]" Class Opp. at 79 n.89. Defendants, however, cite no authority for their claim that Dust Pro's alleged "non-payment" should disqualify it as a class representative. Nor can the Court surmise any reason why Dust Pro should be disqualified.

Regarding Nystar, defendants argue that this named plaintiff should be disqualified because, according to defendants, it spoliated evidence. Class Opp. at 80-81. ***HN29***[] "The requirement that the proposed representatives **[*33]** not be subject to *unique defenses*" — which includes spoliation — "can be seen as an offshoot of **[**97]** the requirement that the representative have circumstances that are sufficiently similar to those of the class." *In re Schering Plough Corp. ERISA Litig., 589 F.3d 585, 598 (3d Cir. 2009)* (emphasis in original). Because *Rule 23* requires that both the claims and the defenses be typical, a proposed class representative will not satisfy *Rule 23(a)(3)* "if the representative is subject to a unique defense that is likely to become a major focus of the litigation." Id. (quotations omitted); see also *Gary Plastic Packaging Corp. v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 903 F.2d 176, 180 (2d Cir. 1990)* ("[T]here is a danger that absent class members will suffer if their representative is preoccupied with defenses unique to it.").

Spoliation of evidence constitutes a unique defense, and courts have concluded that in some circumstances defending against a charge of spoliation of evidence can render a plaintiff an inadequate class representative. See, e.g., *Falcon v. Philips Elecs. N. Am. Corp., 304 Fed. App'x 896, 897 (2d Cir. 2008)* (district court did not abuse its discretion in concluding that defending against a charge of spoliation rendered a plaintiff an inadequate class representative). **[**98]** The presence of a unique defense, however, "will not . . . destroy typicality [unless it] will skew the focus of the litigation and create a danger that absent class members will suffer if their representative is preoccupied with defenses unique to it." *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 302* (quotations omitted) (alteration in original). In this case, the Court agrees with plaintiffs that at this stage the spoliation issue is hypothetical and speculative, see Class Reply at 39, and the Court is satisfied that this alleged unique defense presents a question of law and fact "that can readily be resolved by the Court without skewing the focus of the litigation or creating a significant danger of distracting [plaintiffs'] ability to pursue the interests of the absent class members." *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 302* (quotations omitted).

Finally, defendants argue that a "significant number" of putative class members' contracts include broad arbitration clauses. See Class Opp. at 78. Defendants state that they "intend, as they have a right to do, to rely on [those putative class members'] agreements to arbitrate," which would **[**99]** include, according to defendants, the Sherman Act claim alleged in this case. Id. at 78-79. Thus, defendants argue that shippers whose contracts include arbitration provisions cannot pursue their claims in this Court and, as a result, cannot be part of the class that plaintiffs seek to certify here. Id. at 79. And defendants assert that the Court should consider these agreements to arbitrate — constituting, as defendants see it, affirmative defenses — in making its class certification decision. Id. (citing *Rodney v. Northwest Airlines, Inc., 146 Fed. App'x 783, 786 (6th Cir. 2005)*. Defendants do not assert, however, that any of the eight named plaintiffs have contracts containing arbitration clauses; nor do defendants assert that they have initiated any arbitrations. See Class Reply at 40.

While defendants do not suggest under what part of *Rule 23* the Court should consider their argument regarding arbitration, ***HN30***[] courts generally have considered the question of defenses in the context of examining the typicality and commonality requirements of *Rule 23(a)*, as well as the predominance requirement of *Rule 23(b)(3)*. See, e.g., *In re Schering Plough Corp. ERISA Litig., 589 F.3d at 598* (question **[**100]** of unique defenses is an offshoot of typicality requirement); *Gene & Gene LLC v. BioPay LLC, 541 F.3d 318, 327 (5th Cir. 2008)* ("[T]he predominance of individual issues necessary to decide an affirmative defense may preclude class certification.") (quotations omitted); *Gunnells v. Healthplan Servs., Inc., 348 F.3d 417, 438 (4th Cir. 2003)* ("[A]ffirmative defenses must be factored into the calculus of whether common issues predominate."). Regardless of which part of *Rule 23* applies, however, the Court concludes that "the *possible* arbitration of some class members" does not, "by itself, defeat class certification." *Lerner v. Haimsohn, 126 F.R.D. 64, 66 (D. Colo. 1989)* (emphasis added). Neither plaintiffs nor defendants have initiated arbitration, and the Court concludes that defendants' assertion regarding their "inten[t]" to **[*34]** initiate arbitration, Class Opp. at 78, is too speculative to defeat predominance, much less commonality or typicality.

The Court finds that the claims of the eight named class representatives arise from the "same events, practice, or conduct, and are based on the same legal theory as those of other class members." *Lindsay v. Government Emples. Ins. Co., 251 F.R.D. at 55* **[**101]** (quotations omitted). Consequently, plaintiffs have satisfied their burden of showing by a preponderance of the evidence that "the claims or defenses of the representative parties are typical of the claims or defenses of the class[.]" *Fed. R. Civ. P. 23(a)(3)*.

4. Adequacy of Representation

HN31[] The fourth and final express requirement of *Rule 23(a)* is adequacy. It requires that "the representative parties will fairly and adequately protect the interests of the class." *Fed. R. Civ. P. 23(a)(4)*. Thus, this requirement "necessitates an inquiry into the adequacy of representation, including the quality of class counsel, any disparity of interest between class representatives and members of the class, communication between class counsel and the class and the overall context of the litigation." *Pigford v. Glickman, 182 F.R.D. at 350*. "A proposed representative is 'adequate' if (1) his interests do not conflict with those of other class members, and (2) he will vigorously prosecute the interests of the class through qualified counsel." *Lindsay v. Government Emples. Ins. Co., 251 F.R.D. at 55*.

Plaintiffs assert that the eight named representative plaintiffs have shown a willingness to step forward, **[**102]** incur substantial discovery burdens, and prosecute this case in the best interests of the members of the putative class. Class Mem. at 61. Furthermore, plaintiffs assert that there are no conflicts with the unnamed members of the class that would warrant denial of class certification. Id. Finally, plaintiffs contend that they have protected the interests of absent class members through the selection of qualified class counsel. As plaintiffs describe it, interim co-lead class counsel Quinn Emanuel and Hausfeld

> — firms that have extensive experience in both antitrust litigation in particular and class action litigation generally — have vigorously prosecuted this action, expending substantial time and resources in investigating the claims, overseeing the production and review of documents, taking and defending of depositions, working with experts, and briefing and arguing motions.

Id. at 62. Defendants present mostly the same arguments regarding adequacy as they did for typicality. See Class Opp. at 79-80. For the reasons just discussed, see *supra at 49-54*, the Court rejects them.

In addition, defendants argue that Donnelly Commodities, Inc. should be disqualified because it filed for bankruptcy **[**103]** and is currently under the control of an appointed trustee. Class Opp. at 81-82. According to defendants, when a class representative has filed for bankruptcy under Chapter 7 and has had a trustee appointed, an "'inherent' conflict of interest exists." Id. at 82 (quoting *Dechert v. Cadle Co., 333 F.3d 801, 803 (7th Cir. 2003))*. As defendants see it, this is because of the trustee's "'dual role as class representative and creditors' representative.'" Id. (quoting *Dechert v. Cadle Co., 333 F.3d at 803*). But the authority upon which defendants rely for that proposition, Dechert v. Cadle Co., rejected a "flat rule that a trustee in a bankruptcy . . . can never be a class representative." *Dechert v. Cadle Co., 333 F.3d at 803*. And other courts have allowed such representation where, as here, "an additional representative [is designated] to appear as plaintiff along with the Trustee[.]" *Ernst & Ernst v. U.S. Dist. Court for the S. Dist. of Tex., 457 F.2d 1399, 1400 (5th Cir. 1972)*. In this case, of course, there are eight representative plaintiffs only one of which, Donnelly Commodities, Inc., is under the control of a trustee in bankruptcy. The Court therefore sees no basis at this stage **[**104]** to disqualify Donnelly Commodities, Inc. as a named representative.

Finally, as for the quality of class counsel, the Court agrees with plaintiffs' undisputed assertion that they have protected the interests of absent class members through the selection of class counsel. See Class Mem. at 62-63. As the Court previously has stated, the firms Quinn Emanuel and Hausfeld both **[*35]** have sufficient resources and expertise to prosecute this matter in the putative class' best interests. See Memorandum Op. & Order at 3, Mar. 13, 2009 [Dkt. No. 232]. As plaintiffs state:

> Quinn Emanuel and Hausfeld LLP have already demonstrated their ability to work well together, coordinate the efforts of the various other firms also representing plaintiffs in this multidistrict litigation, and generate work

> product at the highest professional levels. Together, these firms are extraordinarily well situated to assess how Plaintiffs' case will be presented at trial, and will be prepared to try this case should that be necessary.

Class Mem. at 63. Defendants do not disagree, and neither does this Court. [10]

The Court finds that plaintiffs have met their burden of showing by a preponderance of the evidence that "the representative parties will fairly and adequately protect the interests of the class," *Fed. R. Civ. P. 23(a)(4)*, because the interests of the eight named representatives do not conflict with those of other class members, and because they will vigorously prosecute the interests of the class through qualified counsel. *Lindsay v. Government Emples. Ins. Co., 251 F.R.D. at 55*.

V. *RULE 23(b)(3)* FINDINGS AND CONCLUSIONS

Because plaintiffs have satisfied all of the threshold *Rule 23(a)* requirements by a preponderance of the evidence, the Court now must conduct a "rigorous analysis" of the requirements of *Rule 23(b)(3)*. See *In re Zurn Pex Plumbing Prods. Liab. Litig., 644 F.3d at 611*; *Madison v. Chalmette Refining, L.L.C., 637 F.3d 551, 554 (5th Cir. 2011)*; see also *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. at 2551*. In examining whether plaintiffs have satisfied their burden **[**106]** under *Rule 23(b)(3)*, the Court has resolved the factual disputes between the parties and their experts that are relevant to the requirements for class certification — even when such resolution requires considerations enmeshed in the factual and legal issues comprising the plaintiffs' claim on the merits — and the Court has applied a preponderance of the evidence standard of proof in doing so.

A. Predominance

HN32[] *Rule 23(b)(3)* requires that the Court "find[] that the questions of law or fact common to class members predominate over any questions affecting only individual members[.]" *Fed. R. Civ. P. 23(b)(3)*. As discussed, see supra at 25, in examining the predominance requirement under *Rule 23(b)(3)*, a court's rigorous analysis "'begins . . . with the elements of the underlying cause of action.'" *Messner v. Northshore Univ. HealthSystem, 669 F.3d at 815* (quoting *Erica P. John Fund, Inc. v. Halliburton, Co., 131 S. Ct. at 2184*). The Court must "scrutinz[e] plaintiffs' legal causes of action to determine whether they are suitable for resolution on a classwide basis." *McCarthy v. Kleindienst, 741 F.2d 1406, 1412 n.6, 239 U.S. App. D.C. 247 (D.C. Cir. 1984)*. The Court therefore examines "the elements of plaintiffs' claim **[**107]** through the prism of *Rule 23* to determine" whether plaintiffs have satisfied the predominance requirement. *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311* (quotations omitted). If proof of the essential elements of the claim requires individual treatment, then common questions do not predominate and class certification is "unsuitable." Id. (quotations omitted).

In this case, ***HN33***[] plaintiffs allege that defendants engaged in price fixing, in violation of *Section 1* of the Sherman Act. Thus, to prevail on the merits of their claim at trial, plaintiffs will have to prove three elements: (1) a violation of the antitrust laws — here, *Section 1* of the Sherman Act; (2) individual impact resulting from that violation; and (3) measurable damages. See *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311*. At the class certification stage, plaintiffs' burden is different: plaintiffs must show by a preponderance of the evidence that the elements of their claim are "*capable of proof* at **[*36]** trial through evidence that is common to the class rather than individual to its members." *Id. at 311-12* (emphasis added).

1. Violation of ***Antitrust Law***

Plaintiffs have alleged that defendants engaged in a horizontal **[**108]** price fixing conspiracy to coordinate their fuel surcharge programs in order to effect an overall supra-competitive total price increase on their customers, in violation of *Section 1* of the Sherman Act. See Am. Compl. ¶¶ 1-2. ***HN34***[] A horizontal price fixing conspiracy, as

---

[10] Under *Rule 23(c)(1)(B)* and *(g)*, plaintiffs seek formal designation of Quinn Emanuel and Hausfeld as co-lead class **[**105]** counsel. See Class Mot. at 2; Class Mem. at 62 n.219. Upon consideration of the matters set forth in *Rule 23(g)*, the Court will grant plaintiffs' request and will designate these two firms as co-lead class counsel.

alleged here, is a *per se* violation of the Sherman Act. See, e.g., *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*; *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 133-34, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*; *Jacobs v. Tempur-Pedic Int'l, Inc., 626 F.3d 1327, 1334 (11th Cir. 2010)*. And the parties agree that this element of plaintiffs' claim is capable of proof at trial through evidence that is common to the class. See Class Mem. at 65-66; see Oct. 7 Tr. at 161 (defendants' counsel, acknowledging that "whether there was or was not a conspiracy is in fact capable of common proof, so that's really not at issue in the predominance analysis"). That is because plaintiffs' allegations of price fixing indisputably "will focus on the actions of the defendants, and, as such, proof for these issues will not vary among class members." *In re Vitamins Antitrust Litig., 209 F.R.D. at 264*; see *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 308* (because alleged **[**109]** violation of the antitrust laws "relates solely to Defendants' conduct . . . proof for [this] issue will not vary among class members") (quotations omitted) (alteration in original). The Court therefore finds by a preponderance of the evidence that the first element of plaintiffs' claim is capable of proof at trial through evidence that is common to the class rather than individual to its members.

2. Impact

In this case, as in many antitrust cases, the second element of plaintiffs' claim —individual impact resulting from the alleged conspiratorial conduct (also referred to by the parties as "injury") — is the central issue. See Oct. 6 Tr. at 9; Defs. Wal-Mart Reply Brief at 1 ("The parties . . . agree that the central question here is whether Plaintiffs have met their burden . . . to show that common questions predominate over individual ones, which in turn requires that they proffer a viable classwide method for proving injury at trial."); see also *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311*.

HN35[] In examining whether impact is capable of common proof, it is important to note at the outset that this element involves two distinct components: injury-in-fact; and antitrust injury. **[**110]** See *Bassett v. National Collegiate Athletic Ass'n, 528 F.3d 426, 434 (6th Cir. 2008)* ("[A] private antitrust plaintiff, in addition to having to show injury-in-fact and proximate cause, must allege, and eventually prove, antitrust injury.") (quotations omitted); *Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d at 106*; see also *In re Currency Conversion Fee Antitrust Litig., 264 F.R.D. at 114*; *Mazanderan v. Independent Taxi Owners' Ass'n, Inc., 700 F. Supp. 588, 590 (D.D.C. 1988)* (discussing the "two-fold requirement of individual economic injury to [a] plaintiff that is grounded in the antitrust laws"). These two components pose "two distinct questions": injury-in-fact presents the "familiar factual question whether the plaintiff has indeed suffered harm," whereas antitrust injury presents "the legal question whether any such injury is the 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d at 106* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*). Antitrust injury is injury to competition, **[**111]** not just injury to an individual. *Andrx Pharms., Inc. v. Biovail Corp. Int'l, 256 F.3d 799, 812, 347 U.S. App. D.C. 178 (D.C. Cir. 2001)*. And the reason an antitrust plaintiff is required to prove antitrust injury is to ensure that a plaintiff can recover "only if the loss stems from a competition-*reducing* aspect or effect of the defendant's behavior." *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (emphasis in original).

[*37] *1. Injury-in-fact.* The primary dispute in this case relates to the injury-in-fact component of the impact element. The parties vigorously dispute whether injury-in-fact can be established at trial with common evidence, and they have submitted expert reports by distinguished economists that reach diametrically opposed conclusions. Plaintiffs contend that they will prove injury-in-fact on a class-wide basis at trial "by showing that Defendants' conspiracy caused the Class members to pay supra-competitive prices during the Class Period." Class Mem. at 67. According to plaintiffs, the effect of defendants' alleged conspiracy was to impose "on all Class members coordinated Fuel Surcharges that rose in lockstep and resulted in across-the-board prices increases." Id. at 68.

Plaintiffs **[**112]** assert that they will show injury-in-fact "with public information, Defendants' documents, and witness testimony" — all of which, they contend, will be evidence that is common to the class. Class Mem. at 70. Specifically, plaintiffs assert that common evidence will show at trial that

- Defendants intended to use their coordinated Fuel Surcharge programs not as a means solely to recover fuel costs, but as a means to raise revenues and profits.

- Defendants[] intended their coordinated fuel surcharge programs to be applied across-the-board.
- Defendants each, and in coordination with each other, undertook during the Class Period to monitor success in achieving broad application o[f] the Fuel Surcharges.
- Defendants during the Class Period adopted policies precluding discounting to offset the Fuel Surcharges.
- Defendants recognized in internal documents that during the Class Period, the Fuel Surcharges generated revenues by raising prices paid by the Class far beyond Defendants' actual fuel costs.
- During the Class Period, the Fuel Surcharges were responsible in large part for very large increases in Defendants' revenues and profits.

Id. (citations omitted).

Plaintiffs further contend that **[**113]** the analysis of their expert, Dr. Gordon Rausser, confirms that injury-in-fact can be established at trial with common evidence and economic analysis. See Class Mem. at 71. [11] Dr. Rausser explains that he has examined the rail freight industry and concludes that certain structural factors make it so that "had a conspiracy occurred it would have succeeded in subjecting the Class to a common" injury-in-fact. 2d Rausser Report at 80; see 1st Rausser Report at 7-8. Furthermore, Dr. Rausser has developed two economic regression models and has analyzed 100 percent of defendants' transaction data during the alleged conspiracy. 2d Rausser Report at 91-92, 96. Dr. Rausser's regression analyses purportedly substantiate his theory of common proof, showing that

- [Defendants] did implement a common rate increase across the Class through their use of the fuel surcharge applied as a percentage of base rates.

- Common factors such as shipment weight, distance, route and commodity type, among others, predominate over individual factors in the determination of freight rates. These common factors can be measured using the Defendants' transaction data and used in a common analysis to identify and quantity **[**114]** the harm experienced by the Class.

- Defendants' transaction data reveals that there was no material discounting of base rates to offset the fuel surcharges that were applied to shipments made by **[*38]** the Class. As a result, Class members commonly experienced price increases from the Defendants' actions irrespective of the commodity they were shipping. . . .
- Class members paid significantly higher prices to Defendants for rail freight transportation during the Class Period than before and that these higher prices are not explainable by price determinants other than the conspiracy.

1st Rausser Report at 7-8. Thus, according to Dr. Rausser, "[t]here was a common impact of Defendants' alleged conspiracy on the Plaintiffs and the Class which can be demonstrated through evidence and economic analysis common to the Class[.]" 1st Rausser Report at 4.

Defendants disagree that injury-in-fact can be proven at trial with common evidence. As defendants frame the issues, in order to demonstrate that plaintiffs' claims are suited for class treatment

> Plaintiffs must prove . . . that they have a method of providing a common answer to each of the core questions each class member would have to answer had it brought its own claim: (i) *Did I pay a fuel surcharge (or higher fuel surcharge) because of the alleged conspiracy?* and (ii) *Did payment of a fuel surcharge cause me to pay more for shipping than it would have otherwise paid?*

---

[11] Dr. Rausser provides a detailed discussion of his qualifications and background in his expert report. See 1st Rausser Report at 1-2. In summary, Dr. Rausser is the Robert Gordon Sproul Distinguished Professor at the University of California at Berkeley and the former Dean of that University's College of Natural Resources. Class Mem. at 4 n.3. Dr. **[**115]** Rausser's work focuses on the subjects of economics, applied economics, econometrics, and statistics. See id. He has published more than 250 articles, books, and book chapters, and has written more than 100 commissioned papers, governmental reports, and work papers. Id. Dr. Rausser served as the Chief Economist to the Agency for International Development in Washington, D.C. from 1988 to 1990, and as a Senior Economist at the President's Council of Economic Advisors from 1986 to 1987. Id.

Defs. Wal-Mart Brief at 2 (emphasis in original). Defendants contend that the facts in this case make clear that rate-based fuel surcharges **[**116]** were widely used before the start of the alleged conspiracy; that the use of fuel surcharges was growing; and that even Dr. Rausser concedes that some class members would have paid rate-based fuel surcharges absent the alleged conspiracy. See id. Given these proffered facts, among others, defendants conclude that neither plaintiffs nor their expert "has offered any way to use common evidence to show that, absent the alleged conspiracy, every shipper would have paid a lower fuel surcharge or none at all." Id. According to defendants, plaintiffs therefore have failed to show that they have a common answer to the first question quoted above. Id.

As for the second question quoted above, defendants contend that it, too, cannot be answered with common evidence. According to defendants, the facts show that "many shippers received contract concessions, including lower base rates than the railroads initially offered, in exchange for accepting a fuel surcharge[.]" Defs. Wal-Mart Brief at 6. Because the alleged conspiracy was only directed at a portion of the total price of shipping, defendants say that any class member who obtained anything of value in exchange for accepting a fuel surcharge **[**117]** may not have suffered injury-in-fact. See Class Opp. at 41. And in view of the purported evidence that "some (but not all) shippers made trade-offs for fuel surcharges," id., defendants contend that individualized issues predominate because "it is necessary to examine the circumstances and negotiating history of each shipper to prove that it did not negotiate offsetting savings and therefore pay a higher all-in price for shipping as a result of its having agreed to a fuel surcharge." Defs. Wal-Mart Brief at 2.

In support of their position that class certification is inappropriate in this case, defendants have submitted the expert report of Dr. Robert Willig. [12] As Dr. Willig explains, he was asked by defendants to address from an economic perspective "whether it is feasible for plaintiffs to demonstrate through common proof that members of the proposed class suffered economic injury"; "whether it is feasible to estimate each class member's **[*39]** damages on a class-wide basis"; and "to evaluate the damage methodology proposed by Professor Rausser as well as the analyses that support his conclusions." Willig Report ¶ 11.

As for the issue of injury-in-fact, Dr. Willig's overall conclusion is that assessing injury-in-fact "requires an in-depth individualized inquiry into the circumstances of the particular shipper." Willig Report ¶ 15. In arriving at this conclusion, Dr. Willig makes six principal points:

• First, "[t]he fact that shippers paid FSCs [fuel surcharges] is not common evidence of class-wide **[**119]** impact or damages assessment." Willig Report at 13.

• Second, "[t]he levels of the FSCs paid by shippers provide no common evidence of class-wide impact or damages assessment." Id. at 14.

• Third, "[t]he processes by which FSCs were applied to shipper rates preclude common evidence of class-wide impact or damages assessment." Id. at 16.

• Fourth, "[a]ll-in rates varied widely and contradict the possibility of common evidence showing class-wide impact." Id. at 18.

• Fifth, "Professor Rausser's attempts to show that common evidence can establish class-wide impact and assessment of damages fail to support his conclusion." Id. at 22.

---

[12] Dr. Willig provides a detailed description of his qualifications and **[**118]** background in his expert report. See Willig Report ¶¶ 1-6. In summary, Dr. Willig has been a Professor of Economics and Public Affairs at Princeton University for over 30 years. Class Opp. at 6 n.2. He has written 75 articles on economics and a book on competition and the theory of industrial market structure. Id. His focus is on microeconomics, with particular specialization in industrial organization, and he teaches courses on microeconomics, regulation, antitrust, and competition policy. Id. Dr. Willig served as the Chief Economist in the Antitrust Division of the United States Department of Justice from 1989 to 1991. Id. He also has done research and economic analysis of the railroad industry, including testifying before the STB, and its predecessor, the ICC, about issues affecting the industry. Id.

• Sixth, "[m]embers of the proposed class have conflicting economic interests." Id. at 28.

2. Antitrust injury. Although it was not initially apparent from defendants' papers that they also dispute whether antitrust injury can be established at trial with common evidence, see Class Opp. at 50-56 (seemingly equating antitrust injury with injury-in-fact arguments); see also Oct. 7 Tr. at 172, defendants' counsel stated at oral argument that defendants do argue that some class members — specifically, captive shippers — cannot suffer antitrust injury. See Oct. 7 Tr. **[**120]** at 171-73. As discussed, ***HN36***[] antitrust injury is "'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d at 106* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. at 489*). As defendants see it, certain shippers in plaintiffs' putative class are "captive shippers," also referred to synonymously as "sole served" shippers. Oct. 6 Tr. at 30. Because of various factors, including geographic location, these shippers have "no option but to use a single railroad when it ships out of its place[.]" Oct. 7 Tr. at 172. Defendants contend that these captive shippers cannot as a matter of law suffer antitrust injury because they have "no reduction in competition" — having had no competition in the first place — "as a result of the alleged wrong." Id. And defendants argue that identifying such captive shippers requires individualized inquiry.

Plaintiffs disagree. Plaintiffs contend that defendants themselves, as well as defendants' expert, Dr. Willig, admit that captives shippers are subject to competitive pressures, see Oct. 7 Tr. at 304, and that **[**121]** Dr. Rausser's analysis confirms what defendants themselves have admitted. Id. at 304-05.

The Court first addressees two preliminary legal issues regarding the impact element: the number of uninjured class members sufficient to preclude a finding of predominance, and the "presumption" of common impact. The Court then examines the parties' and the experts' arguments regarding whether antitrust injury and injury-in-fact are capable of proof at trial through evidence that is common to the class.

a. Uninjured Class Members

The first preliminary legal issue regarding impact involves a dispute between the parties over the number of uninjured class members sufficient to preclude a finding of predominance. Defendants contend that plaintiffs "must proffer a valid method for proving . . . injury to all or virtually all class members on a simultaneous, class-wide basis[.]" Class Opp. at 26-27 (quotations omitted). Defendants acknowledge that "[s]ome cases have suggested a more relaxed requirement in which inability to show injury as to a few does not defeat class certification where the **[*40]** plaintiffs can show widespread injury to the class." Id. at 27 n.39 (quotations omitted); see Oct. 7 Tr. at 258 **[**122]** (defendants' counsel, acknowledging that "the case law . . . is mixed on the issue of whether every single class member must be injured or whether there's some negligible number"); see also *Kottaras v. Whole Foods Mkt., Inc., 2012 U.S. Dist. LEXIS 10885, 2012 WL 259862, at *7-8* (discussing cases addressing number of uninjured class members sufficient to preclude a finding of predominance). Defendants assert, however, that this "relaxed requirement" has not been adopted by the D.C. Circuit, and argue that, in any event, plaintiffs have failed to meet either standard in this case. See Class Opp. at 27; Oct. 7 Tr. at 258

The Court concludes that defendants are incorrect about the legal standard for impact. ***HN37***[] "Class certification is not precluded simply because a class may include persons who have not been injured by the defendants' conduct." *Mims v. Stewart Title Guar. Co., 590 F.3d 298, 308 (5th Cir. 2009)* (citing *Kohen v. Pacific Inv. Mgmt. Co., 571 F.3d 672, 677 (7th Cir. 2009)*. As the Seventh Circuit stated in Kohen v. Pacific Investment Management Co.:

> [A] class will often include persons who have not been injured by the defendant's conduct; indeed this is almost inevitable because at the outset of the case many **[**123]** of the members of the class may be unknown, or if they are known still the facts bearing on their claims may be unknown. Such a possibility or indeed inevitability does not preclude class certification[.]

Kohen v. Pacific Inv. Mgmt. Co., 571 F.3d at 677; see *Messner v. Northshore Univ. HealthSystem, 669 F.3d at 823* (citing and quoting *Kohen v. Pacific Inv. Mgmt. Co., 571 F.3d at 677*). Thus, ***HN38***[] the "inability to show injury as to a few does not defeat class certification where the plaintiffs can show widespread injury to the class." *Meijer, Inc.*

v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 310 (quotations omitted). Only when it is apparent that "a great many persons" have not been impacted should a court deny class certification. Kohen v. Pacific Inv. Mgmt. Co., 571 F.3d at 677. "There is no precise measure for 'a great many.' Such determinations are a matter of degree, and will turn on the facts as they appear from case to case." Messner v. Northshore Univ. HealthSystem, 669 F.3d at 825 (quoting Kohen v. Pacific Inv. Mgmt. Co., 571 F.3d at 677).

b. "Presumption" of Common Impact

The second preliminary legal issue involves what the partes refer to as a "presumption" of common impact. **[**124]** Class Mem. at 69; Class Opp. at 27 n.40. "Some courts have found a presumption of common impact in cases involving allegations of horizontal price-fixing." In re Vitamins Antitrust Litig., 209 F.R.D. at 266 (citing e.g., In re Master Key Antitrust Litig., 528 F.2d 5, 12, n.11 (2d Cir. 1975); In re Auction Houses Antitrust Litig., 193 F.R.D. 162, 166 (S.D.N.Y. 2000)). As the Third Circuit stated in Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., "[i]n antitrust class actions, injury may be presumed when it is clear the violation results in harm to the entire class." Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 179 n.21 (3d Cir. 2001).

Plaintiffs contend that applying a presumption of common impact in this case would be warranted, because if "Plaintiffs prove that Defendants coordinated their Fuel Surcharge programs in an anticompetitive manner, then it would make basic economic sense to recognize that all Class members, all of whom paid Fuel Surcharges that were either imposed for the first time, or increased by the conspiracy, were impacted by the conspiracy." Class Mem. at 69-70. Plaintiffs, however, make clear that they "do **[**125]** not rest on such a presumption," asserting that they need not do so in view of the evidence in the record in support of their claim of common impact. Id.

Although several judges in this district have mentioned this presumption in passing, none actually has applied it. See, e.g., Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 308 n.16 (concluding that "[n]o . . . presumption is required . . . because [p]laintiffs have established that common proof will predominate over individual issues"). And as the Third Circuit more recently stated in In re Hydrogen Peroxide **[*41]** Antitrust Litig.: "Applying a presumption of impact based solely on an unadorned allegation of price-fixing would appear to conflict with the 2003 amendments to Rule 23, which emphasize the need for a careful, fact-based approach, informed, if necessary, by discovery." In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 326. To the extent that any such presumption of common impact remains valid law, see id. at 327 (stating that district court, on remand, could consider whether presumption of common impact "is compatible with the record of th[e] case"), it appears to be some sort of presumption-plus, requiring **[**126]** "some additional amount of empirical evidence." American Seed Co., Inc. v. Monsanto Co., 271 Fed. App'x 138, 141 (3d Cir. 2008).

The Court agrees with the reasoning set forth by the Third Circuit in In re Hydrogen Peroxide Antitrust Litig. and concludes that ***HN39***[] applying a presumption of impact based on an unadorned allegation of price fixing appears inconsistent with the rigorous analysis that must be performed in examining whether the requirements of Rule 23(b)(3) have been met. And whatever remains of any such presumption or presumption-plus under the law, the Court concludes that no presumption is required in this case, as plaintiffs themselves make clear that they do not rely on it. Nor do they need to.

c. Antitrust Injury

HN40[] In order to establish antitrust injury, the legal component of the impact element, at trial, plaintiffs "must prove that the defendants engaged in an anti-competitive manipulation of the markets." In re EPDM Antitrust Litig., 256 F.R.D. at 87. In examining this legal component at the class certification stage, the Second Circuit held in Cordes & Co. Financial Services, Inc. v. A. G. Edwards & Sons, Inc. that the plaintiffs successfully established that antitrust injury **[**127]** was common to the class and predominated over individual questions because the plaintiffs alleged only one type of injury in the complaint: "overcharges paid to a horizontal price-fixing conspiracy." Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d at 107. As the Second Circuit stated in Cordes:

"Because each class member allegedly suffered the same type of injury, the legal question of whether such an injury is 'of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful,' . . . is a common one." Id. (quoting *Brunswick v. Pueblo Bowl-O-Mat, Inc., 429 U.S. at 489*). As in Cordes, the Court concludes that plaintiffs have satisfied the first part of the impact element by showing that the legal question of antitrust injury is common to the class and predominates over individual issues.

Plaintiffs have alleged only one type of injury in their second amended consolidated complaint: that defendants' price fixing conspiracy imposed supra-competitive total price increases on the putative class, in violation of *Section 1* of the Sherman Act. See 2d Am. Compl. ¶¶ 1-2; Class Mem. at 1. Plaintiffs contend that the type **[**128]** of supra-competitive overcharges allegedly imposed in this case "clearly constitute antitrust injury." Class Mem. at 65 n.221. Defendants disagree as to a subset of putative class members, arguing that so-called captive shippers cannot suffer antitrust injury.

As defendants' counsel described it at oral argument, antitrust injury is the injury that flows from the harm that the antitrust laws are intended to prevent, and the antitrust laws are intended to prevent only a reduction in competition. See Oct. 7 Tr. at 172-73. Consequently, if there is "no competition in the first instance for a customer's business, that customer cannot suffer antitrust injury." Id. at 173. Defendants and Dr. Willig contend that shippers served by only one railroad do not benefit from rail-to-rail competition, and, as a result,

> the railroad serving such a shipper would be expected to attempt to extract the maximum possible rate given the shipper's non-rail alternatives and the value the shipper derives from rail service. A conspiracy among railroads does not enable the serving railroad to extract more than the maximum rates from such a shipper. For shippers served by only one railroad, any attempt by the serving **[**129]** railroad to impose an FSC that is not desired by that shipper would be expected to require that **[*42]** the railroad make a concession with respect to base rate or another dimension of contract.

Willig Report ¶ 132. Dr. Willig contends that any claim that captive shippers enjoy competition "is contradicted by the well-recognized fact that 'captive' shippers experience higher prices than shippers that face head-to-head rail competition." Id. ¶ 135.

HN41[] The antitrust laws were enacted for "'the protection of *competition*[.]'" *Andrx Pharms., Inc. v. Biovail Corp. Int'l, 256 F.3d at 812* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. at 488*) (emphasis in original). Defendants therefore are correct that "where there [is] no competition, there [is] no antitrust injury." *City of Pittsburgh v. West Penn Power Comp., 147 F.3d 256, 266-67 (3d Cir. 1998)*. In other words, "[w]ithout demonstrating that there was competition, a plaintiff cannot show that the defendants' actions have had or will have anticompetitive effects." Id. (citing *Continental Cablevision of Ohio, Inc. v. American Elec. Power Co., 715 F.2d 1115, 1119-20 (6th Cir. 1983)*; see also *In re Tobacco/Governmental Health Care Costs Litig., 83 F. Supp. 2d 125, 134-35 (D.D.C. 1999)* **[**130]** ("The antitrust laws were not intended to prevent losses that result from increased competition but those resulting from activity that may tend to lessen competition. . . . The reason an antitrust plaintiff is required to plead antitrust injury is to assure that a plaintiff can recover only if the loss stems from a competition-*reducing* aspect or effect of the defendant's behavior.") (quotations omitted) (alteration and emphasis in original).

The Court, however, disagrees with defendants and Dr. Willig that captive shippers are not subject to competitive forces — a claim that is contradicted by the statements of defendants' own executives. NS' chief executive officer, Charles W. Moorman, testified before Congress in 2007 that even captive shippers are subject to "competitive constraints [that] are real," and he expressly acknowledged that "even where there is only one railroad serving a facility, there are market factors at play." Corrected HD Ex. 36, Written Statement of Charles W. Moorman, at 16, Sept. 20, 2007. Similarly, UP's chief executive officer, James Young, agreed that railroads place "competitive constraints" on each other, even in the case of captive shippers. HD Ex. 66, **[**131]** Young Dep. at 201. And CSX has acknowledged in internal documents that "[s]tudies have shown that, in aggregate, captive shippers don't pay higher prices than non-captive shippers," and that "CSX[] sets prices based on all competitive factors." HD Ex. 37, CSX Talking Points Response to Escalation Resource - Fuel Surcharge Alert, at CSXFSC000153187.

That captive shippers enjoy competition is further reflected by the experience of one of the named plaintiffs in this case before and during the class period. U.S. Magnesium has an operating facility outside of Salt Lake City, Utah. As plaintiffs' counsel stated at oral argument, that plant is truly captive — "[t]here is . . . a single rail line coming up to the plant, which is owned by [UP]." Oct. 6 Tr. at 92-93. In December 2002, before the class period, U.S. Magnesium *negotiated out* of the application of a fuel surcharge. See RD Ex. 10, at USM005647 (UP proposing to U.S. Magnesium a 4 percent increase on all rates and application of a fuel surcharge, but ultimately agreeing to a 4 percent across the board increase without a fuel surcharge). But one year later, during the period when plaintiffs say that defendants were conspiring to impose **[**132]** fuel surcharges uniformly as to all shippers, the application of a fuel surcharge was "mandate[d] by UP management[.]" RD Ex. 72, at USM005663.

Moreover, defendants' executives expressly have denied in their depositions taken in this case that they would have tried to impose more aggressive programs on captive shippers than they were able to impose on non-captive shippers. BNSF's chief executive officer, Matthew K. Rose, stated that BNSF had never considered having a higher or more onerous fuel surcharge for captive shippers, and that such an approach would "violate [BNSF] principle." HD Ex. 72, Rose Dep. at 232. UP's chief financial officer, Robert Knight, Jr., acknowledged that he was unaware of any discussions on the topic of having separate fuel surcharge programs for captive shippers. HD Ex. 70, **[*43]** Knight Dep. at 64. These statements are consistent with Dr. Rausser's analysis and conclusion, which the Court finds persuasive, that defendants' transaction data show that "so-called captive shippers paid the same Fuel Surcharge as others" during the class period. 2d Rausser Report at 23.

The Court therefore finds by a preponderance of the evidence that railroads are affected by competitive **[**133]** constraints that apply to both captive and non-captive shippers, and that plaintiffs have satisfied the first part of the impact element for all putative class members, including captive shippers, by showing that the legal question of antitrust injury is common to the class and predominates over individual issues. See *Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d at 107*. [13]

d. Injury-In-Fact

The Court now addresses whether injury-in-fact is capable of proof at trial with evidence common to the class rather than individual to its members. See *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311-12*. The Court finds by a preponderance of the evidence that it is.

HN42[] "It is a basic tenet of ***antitrust law*** that a cause of action will not lie if the plaintiff has not been harmed." *Warren Gen. Hosp. v. Amgen Inc., 643 F.3d 77, 92 (3d Cir. 2011)*. Thus, in order to prevail at trial on their Sherman Act claim plaintiffs must prove not only an antitrust violation — here, that defendants' conspired on their fuel surcharge **[**135]** programs — but also a "causal link between the violation and an injury to . . . business or property." *Federal Prescription Serv., Inc. v. American Pharm. Ass'n, 663 F.2d 253, 268, 214 U.S. App. D.C. 76 (D.C. Cir. 1981)*; see *Taylor Publ'g Co. v. Jostens, Inc., 216 F.3d 465, 485 (5th Cir. 2000)* ("[T]he fact of damages . . . means that the antitrust violation must cause injury to the antitrust plaintiff.") (quotations omitted); see also *Hecht v. Pro-Football, Inc., 570 F.2d 982, 987, 187 U.S. App. D.C. 73 (D.C. Cir. 1977)* ("[T]he plaintiff must show both an

---

[13] The Seventh Circuit's decision in Messner v. Northshore University HealthSystem suggests that defendants' argument regarding captive shippers and antitrust injury is more appropriately categorized as an argument that "the class for which certification is requested is fatally overbroad because it contains members who could not have been harmed[.]" *Messner v. Northshore Univ. HealthSystem, 669 F.3d at 824*. As the court in Messner explained: "[I]f a proposed class consists largely (or entirely, for that matter) of members *who are ultimately shown to have suffered no harm*, that may not mean that the class was improperly certified but only that the class failed to meet its burden of proof on the merits. . . . If, however, a class is defined so broadly as to include a great number of members *who* ***[**134]*** *for some reason could not have been harmed* by the defendant's allegedly unlawful conduct, the class is defined too broadly to permit certification." Id. (emphasis added). As the Court has found, however, plaintiffs have shown by a preponderance of the evidence that railroads are affected by competitive constraints applying to both captive and non-captive shippers. Thus, the Court concludes that the class is not defined so broadly as to include a great number of members who "could not have been harmed" by defendants' allegedly unlawful conduct. Id.

injury-in-fact to his business or property and a *causal connection* between that injury and the defendant's allegedly illegal acts.") (emphasis in original) (quotations omitted). Plaintiffs "need not exhaust all possible alternative sources of injury in fulfilling [their] burden of proving compensable injury under" the antitrust laws, but they must show that the antitrust violation was a "material cause of the injury[.]" *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*.

If plaintiffs would have suffered the same injury absent a conspiracy, then plaintiffs will fail on the merits of their claim. See *Federal Prescription Serv., Inc. v. American Pharm. Ass'n, 663 F.2d at 268*. **[**136]** Put another way, if the same alleged injury would have been caused by independent, non-conspiratorial forces, then no causal link exists between the alleged antitrust violation and the injury. And if individualized inquiry is necessary to make such a determination on causation, then plaintiffs will have failed to show that common questions predominate as to injury-in-fact. See *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d at 25* ("Plaintiffs cannot make their case without common proof of causation[.]"); see also *Kottaras v. Whole Foods Mkt., Inc., 2012 U.S. Dist. LEXIS 10885, 2012 WL 259862, at *7*.

[*44] ***HN43***[] This causation question — whether an antitrust violation was a material cause of an injury — commonly is assessed by reference to what the parties and their experts refer to as the but-for world. See *In re EPDM Antitrust Litig., 256 F.R.D. at 88* ("[G]enerally speaking, antitrust injury-in-fact and damages are often determined by comparing the 'but-for' price — the price a customer would have paid in the absence of the conspiracy — and the actual price paid."). This hypothetical construct is a world that is "free of the restraints and conduct alleged to be anticompetitive." *Blades v. Monsanto Co., 400 F.3d 562, 569 (8th Cir. 2005)*; **[**137]** see *Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d at 107*; *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1055 (8th Cir. 2000)*. ***HN44***[] One way of showing that common questions predominate on the issue of injury-in-fact

> is to show that there is a common method for proving that the class plaintiffs paid higher actual prices than in the but-for world, such as using an economic regression model incorporating a variety of factors to demonstrate that a conspiracy variable was at work during the class period, raising prices above the but-for level for all plaintiffs.

In re EPDM Antitrust Litig., 256 F.R.D. at 88. And this precisely is what plaintiffs have attempted to do through their expert, Dr. Rausser.

Comparing but-for prices with actual transaction prices by regression analysis, however, is "not the *only* way for plaintiffs to succeed in a motion for class certification." *In re EPDM Antitrust Litig., 256 F.R.D. at 88* (emphasis in original). Other accepted types of evidence for establishing class-wide injury-in-fact include: evidence of lock-step increases of national price lists, see id.; proof that defendants conspired to maintain an inflated base price from which **[**138]** all negotiations began, see *id. at 89*; and evidence of structural factors that make an industry susceptible to successful collusion. See *id. at 91-93*; see also *Behrend v. Comcast Corp., 655 F.3d at 199*. Ultimately, the question is whether plaintiffs have shown by a preponderance of the evidence — through regressions, structural industry factors, or any other persuasive means — that "methods of common proof exist to show class-wide impact[.]" *In re EPDM Antitrust Litig., 256 F.R.D. at 88*; see *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d at 25-26*.

The alleged antitrust violation in this case is a conspiratorial agreement to impose supra-competitive fuel surcharges — a component of the total price of a freight shipment — as a percentage multiplier of the base rate of transportation as a means to impose supra-competitive price increases on the putative class. See Class Mem. at 1; Am. Compl. ¶¶ 1-2. Plaintiffs do not allege that defendants conspired to fix each base rate separately, see 1st Rausser Dep. at 98 ("*Q.* . . . There is no agreement to raise the base; right? *A.* Yes. *Q.* So all of the injury comes from the fuel surcharge; right? *A.* Ultimately, yes."), which, Dr. **[**139]** Rausser explains, "would have been extremely complex, highly costly and effectively unmanageable." 1st Rausser Rep. at 52 n.118.

Because the alleged antitrust violation involves only a component of the total price, at trial plaintiffs will be required to prove in fact (1) that they paid a fuel surcharge because of the alleged conspiracy and (2) that, as a result, they paid more for shipping than they otherwise would have paid. And in order to prevail at the class certification stage, plaintiffs now must show by a preponderance of the evidence that common proof can be used to answer the questions (1) whether class members paid a fuel surcharge because of the alleged conspiracy; and, if so, (2) whether payment of that fuel surcharge caused class members to pay more for shipping than they otherwise would have paid.

Plaintiffs contend that they have met their burden. They assert that they will prove injury-in-fact at trial with public information, defendants' own documents, and witness testimony, all of which will be common to the class. See Class Mem. at 70-71. Plaintiffs further assert that Dr. Rausser's expert report confirms through economic regression analysis that injury-in-fact is **[**140]** capable of common proof at trial. See id. at 71-75.

Defendants and Dr. Willig disagree that common evidence can be used to establish **[*45]** injury-in-fact at trial. See Class Opp. at 28-56. As for Dr. Rausser's economic regressions, defendants and Dr. Willig argue that Dr. Rausser's analysis is "fatally flawed." Id. at 50. Defendants do not "quibble with the notion . . . that regression analysis can in many cases provide a basis for certifying a class." Oct. 7 Tr. at 263. But defendants maintain that Dr. Rausser's regressions and analysis suffer from methodological failures that render his conclusions unreliable, see Class Opp. at 62-72, ultimately invalidating his report altogether. Id. at 72.

The Court concludes that plaintiffs have satisfied their burden at this stage. It finds by a preponderance of the evidence that injury-in-fact is capable of proof at trial through evidence that is common to the class rather than individual to its members.

i. Payment of an allegedly conspiratorial fuel surcharge

Defendants argue that individualized analysis is required to determine whether class members would have paid a fuel surcharge but for the conspiracy. See Class Opp. at 28. As defendants see it, **[**141]** plaintiffs have failed to offer any methodology by which they can show with common proof that class members would not have paid a fuel surcharge in the but-for world —that is, the non-conspiratorial world. See id.

First, defendants assert that they had considerable ability and incentive to adopt fuel surcharges entirely independent of any conspiracy. See Class Opp. at 30. In support of this claim, defendants point to the purported trend toward increased use of fuel surcharges before the alleged conspiracy, and then contend that it is implausible that this trend would have stopped in the but-for world. See id. at 30-31. Specifically, defendants assert that fuel surcharges were "widely used" before the start of the conspiracy, with nearly 60 percent of shippers paying a rate-based fuel surcharge as of June 2003, id. at 31 (citing Willig Report ¶ 77); that there was "a strong trend toward increasing use of fuel surcharges before the start of the alleged conspiracy," id. at 32, and that it is "implausible to suggest that this trend would have come to a screeching halt in mid-2003," id. at 33; and that the use of fuel surcharges did not accelerate after the start of the alleged conspiracy **[**142]** — "on the contrary . . . , the growth rate actually *slowed* after July 2003 for every defendant." Id. at 34 (emphasis in original).

Dr. Willig points out that there are legitimate economic rationales for the use of fuel surcharges because they can enhance economic efficiency. See Willig Report ¶¶ 65-68. As Dr. Willig explains:

> The use of FSCs in many industries expanded in the early 2000s in response to increases in both the levels and the volatility of fuel prices. Over the alleged conspiracy period, fuel costs became an increasingly large component of rail costs. . . .
> FSCs were adopted in the rail industry due in part to dissatisfaction with the RCAF index, which lags behind changes in fuel prices, resulting in delays in cost recovery when fuel prices are rising.

Willig Report ¶¶ 65-66. Thus, in view of the purported evidence showing a trend toward the increasing use of fuel surcharges and the legitimate rationales for their use, defendants conclude that there is no basis upon which the Court can conclude "that all or most of the members of the purported class would not have paid fuel surcharges absent the alleged conspiracy." Id. at 35.

Second, defendants argue that plaintiffs face an **[**143]** even higher hurdle for a large group of shippers in plaintiffs' putative class, 55 to 68 percent of the class, that were already paying fuel surcharges before July 2003 —

a group referred to by the parties as legacy shippers. See Class Opp. at 35. As defendants note, plaintiffs have excluded some legacy shippers from the class definition. See id. Specifically, plaintiffs have excluded from their putative class those shippers that paid a fuel surcharge during the conspiracy period "solely pursuant to a railroad-shipper contract that was (i) entered into before July 1, 2003, and (ii) provided for a stand-alone Fuel Surcharge to be paid under a predetermined formula specifically set forth in the contract." Class Mot. at 1. If, however, a legacy shipper entered into a new contract during the class period that included a fuel **[*46]** surcharge, that shipper then is included in plaintiffs' class because it would not have paid a fuel surcharge "*solely* pursuant to a railroad-shipper contract that was . . . entered into before July 1, 2003[.]" Class Mot. at 1 (emphasis added); see Class Opp. at 35-36. And defendants contend that this "narrow legacy exclusion," Class Opp. at 35, presents a significant **[**144]** causation problem illustrated by the following example:

> Consider a shipper that entered into a contract running from January 2002 through December 2003 that contained a fuel surcharge. If such a shipper entered into a new contract in January 2004 that also contained a fuel surcharge, it would fall within Plaintiffs' class definition because the fuel surcharge was not "solely" in the pre-conspiracy contract. But, proof of causation for such a shipper is problematic at best. The fact that the shipper had a fuel surcharge when Defendants were concededly acting independently makes it extremely likely that a fuel surcharge would have been included in its January 2004 contract, regardless of any alleged conspiracy to expand fuel surcharge coverage. Certainly one cannot presume that all such shippers would have avoided fuel surcharges thereafter.

Id. at 36.

Third, defendants argue that any attempt to distinguish class members that had a fuel surcharge only because of the alleged conspiracy from those that would have been subject to one anyway necessarily would require individualized analysis. See Class Opp. at 36-39. According to defendants, many factors influence not only whether a customer **[**145]** would pay a fuel surcharge in the but-for world but also the level of that surcharge. Id. at 37. Defendants contend that these factors include: customers served by only one railroad (captive shippers); customer history of purchasing rail freight; existence of capacity constraints; customers whose primary freight alternative was truck; and customer receptivity to fuel surcharges. See id. at 37-39. Defendants contend that these factors show that individualized analysis is required to determine injury-in-fact at trial. See id. at 36-37.

Plaintiffs disagree with defendants and make three principal points in response. First, plaintiffs argue that defendants have incorrectly lumped fuel surcharges before the conspiracy with the uniform, standardized, and supra-competitive fuel surcharges imposed during the conspiracy. According to plaintiffs, the fuel surcharges imposed during the conspiracy period were "different both in design and application from those that came before." Class Reply at 7. Second, plaintiffs argue that evidence common to the class contradicts defendants' claim that the same fuel surcharges imposed during the conspiracy would have been imposed in the but-for world. And third, **[**146]** relying on the economic regression analysis conducted by Dr. Rausser, plaintiffs contend that evidence common to the class refutes defendants' claim that any individualized factors predominate. See Class Reply at 6-16.

As for plaintiffs' first point, they contend that "[m]ost of defendants' arguments and Dr. Willig's analysis are built on a faulty assumption: that the FSCs used by Defendants before and during the conspiracy were the same." Class Reply at 7. Plaintiffs assert, however, that the allegedly conspiratorial fuel surcharges put in place in the spring of 2003 were

> different both in design and application from those that came before. . . . [T]hese new FSCs (i) got Defendants in lockstep in calculating the percentage based on fuel indexes; (ii) used a trigger equal to about $23 per barrel, rather than the higher $28 per barrel (or higher) that several Defendants had previously used; and (iii) adjusted the FSC based on the 30-day average fuel price, rather than, as in several Defendants' earlier programs, only when the trigger was exceeded for 30 (or more) consecutive days.

Class Reply at 7. For this argument, plaintiffs rely on the testimony of defendants' own employees who repeatedly **[**147]** have admitted in depositions that the new fuel surcharges imposed during the class period were "not the same as, were more aggressive than, and definitely yielded more revenue" than fuel surcharge programs applied before the alleged conspiracy. Id. at 7 & n.16 (quotations **[*47]** omitted). Moreover, plaintiffs say that these new, standardized, more aggressive fuel surcharges were uniformly applied, with the express goal of 100 percent coverage. Id. at 1; see id. at 9-10. In contrast, fuel surcharge programs applied before the conspiracy in some contracts were only "theoretically billable, in that they often were not triggered or applied, and when they were, they were small." Id. at 8 (quotations omitted).

Regarding their second point, plaintiffs dispute defendants' view of the but-for world, arguing that it fails to acknowledge actual facts, established with evidence common to the class, that defendants needed to conspire to surmount obstacles to widespread application of uncoordinated fuel surcharges. As plaintiffs see it, before the conspiracy, defendants were frustrated by the structural decline in rail freight rates and their inability to raise prices due to "destructive pricing for rail **[**148]** share." Class Reply at 10 (quotations omitted). According to plaintiffs, defendants were unable to use fuel surcharges as an effective revenue generator because of competition among the defendants, customer resistance, and the frequent use of the RCAF index. Id. Consequently, plaintiffs argue that defendants' experience with "theoretical and insignificant FSCs before the Class Period cannot be extrapolated to the Class Period because, among other reasons, increased customer resistance would be expected as the FSCs were triggered with rising fuel prices, and as Defendants sought to lower the trigger thresholds and implement more aggressive FSC programs." Class Reply at 11-12 (quotations omitted).

Regarding their third point, plaintiffs contend that Dr. Rausser's regressions —now based on an analysis of 100 percent of defendants' transaction data, see 2d Rausser Report at 12; Class Reply at 38 — refute defendants' and Dr. Willig's assertion that individualized factors predominate. See Class Reply at 12. According to plaintiffs, Dr. Rausser has used economic analysis to show that workable formulas, common to the putative class, are available to "prove the conspiracy's impact on the class **[**149]** — a 'structural break in the relationship between fuel prices and freight rates,' a surge in rates attributable to the conspiracy, and significant overcharges in comparison to prices that would have prevailed absent the conspiracy[.]" Id. at 1 (quoting 1st Rausser Report at 120, 122-23).

As plaintiffs describe it, Dr. Rausser's analysis confirms that overall freight prices are based on seven factors that are common to all shipments, including, among other factors, shipment weight, distance, route, and commodity type; and that these seven factors can be measured using defendants' transaction data and can be used in a common analysis to identify and quantify the injury experienced by the class. 1st Rausser Report at 7. Dr. Rausser's regression analysis takes into account the factors that influenced defendants' prices during the class period compared with benchmark prices during the three preceding years — a time period in which Dr. Rausser concludes that defendants "acted as an interdependent oligopoly unaffected by the type of collusion that determined prices during the Class Period." 1st Rausser Report at 113. Upon an analysis of defendants' transaction data, Dr. Rausser identified **[**150]** a "structural break in the relationship between freight rates and fuel prices around 2003, which is consistent with a conspiracy using Fuel Surcharges to raise freight rates." 2d Rausser Report at 92. In other words, Dr. Rausser's analysis shows that, before the alleged conspiracy, "there was a relationship between fuel costs and overall prices that was dramatically changed once the [alleged] conspiracy went into effect." Oct. 6 Tr. at 139; see id. (stating that, before the alleged conspiracy, "if fuel prices went up by a certain amount, it would have a certain effect . . . on rail freight prices overall; and after the [alleged] conspiracy, if fuel prices went up, it had a much bigger effect on the overall price"). Plaintiffs therefore contend that Dr. Rausser's analysis shows that members of the class paid artificially higher prices as a result of the conspiracy and were injured-in-fact by the antitrust violation. See Class Mem. at 47.

The Court agrees with plaintiffs and finds that they have shown by a preponderance of the evidence that common evidence can be **[*48]** used at trial to answer the question whether class members paid the allegedly conspiratorial fuel surcharges because of the **[**151]** alleged conspiracy:

1. Fuel surcharges during the class period — aggressive, standardized, and uniform. The Court is unpersuaded by defendants' and Dr. Willig's attempt to link fuel surcharges that were in place before the alleged conspiracy to those applied during the alleged conspiracy. Defendants place significant weight on their conclusion that their transaction data show that "almost 60% of Defendants' customers, including all eight of the named Plaintiffs, paid rate-based fuel surcharges *before* the conspiracy began." Class Opp. at 2 (emphasis in original). And, according to defendants, Dr. Rausser's admission during his deposition that he would have expected each defendant to impose fuel surcharges as broadly as possible even absent the conspiracy is particularly damning. See id. (citing 1st Rausser

Dep. at 281). But as plaintiffs and their expert make clear, their antitrust claim in this case is not a conspiracy to impose just *any* fuel surcharge; rather, plaintiffs claim that defendants agreed to increase total prices "by widespread application and enforcement of coordinated, and aggressive, fuel surcharges." Pls. Wal-Mart Reply Brief at 7 n. 11; see also 1st Rausser Dep. at **[**152]** 94; 2d Rausser Dep. at 119-21.

The Court finds by a preponderance of the evidence that the fuel surcharge programs applied before the class period were nothing like the widespread and uniform application of standardized fuel surcharges during the class period. Before the alleged conspiracy, defendants' differentiated fuel surcharges were subject to competition and negotiation with shippers, were less aggressive, and were applied only sporadically. Furthermore, these pre-class period fuel surcharges were only "theoretically billable." HD Ex. 65, Glennon Dep. at 26 (manager of NS pricing systems (now retired) acknowledging that before the class period "the fuel surcharge was theoretically billable, so I would say that . . . customers might not resist it as much"). That is, these pre-class period fuel surcharges often were not triggered or applied, and when they were they were small. See HD Ex. 66, Young Dep. at 24-25 (UP chief executive officer stating that before the class period "[w]e had fuel surge (sic) programs in many contracts, but because fuel had not run up, they were never implemented"); id. at 28 (agreeing that fuel surcharges triggered "during the 2000 through 2002 time period **[**153]** never reached significant percentage levels"); HD Ex. 70, Knight Dep. at 24 (UP chief financial officer stating that during the 2000 through 2002 time period UP did not have a company-wide policy on fuel surcharges: "[t]here were some isolated situations where there were surcharges, but . . . no policy position"); HD Ex. 68, Lanigan Dep. at 27 (BNSF executive vice president and chief marketing officer stating that BNSF's fuel surcharge participation rates in January 2003 were "low," in the "25 to 30 percent rage"); HD Ex. 69, Gooden Dep. at 101 (CSX executive vice president of sales and marketing agreeing that the "fuel surcharge revenue [CSX] was generating prior to adoption of this new program in March of 2003" was "[l]ow — relatively low to where it needed to be"); HD Ex. 71, McNulty Dep. at 118-19 (CSX director of marketing, agricultural products discussing "fairly minimal" fuel surchargers in 2001 and 2002).

The fuel surcharges that defendants put in place in the spring of 2003 were of a different breed. See Class Reply at 7 (fuel surcharges were different "both in design and application from those that came before"). The evidence shows that defendants employed these fuel surcharges **[**154]** in lockstep, lowered the trigger price for the imposition of the fuel surcharge, and adjusted the fuel surcharge based on the 30-day average fuel price rather than only when the trigger was exceeded for 30 (or more) consecutive days. See 1st Rausser Report at 54-60. Defendants' own executives admitted that the new fuel surcharge programs applied by the defendants during the class period were different — that is, they were more aggressive and yielded more revenue than earlier programs. For example, UP's chief executive officer, James Young, testified that compared to the pre-2003 time period,

> the impact of fuel surcharges on customers . . . was greater in '03, it was greater in **[*49]** '04, it was greater in '05 because, again, the percent of recovery. And in negotiating contracts, [UP was] able to get a fuel surcharge included in those contracts so you were having a — having a greater recovery each year.

HD Ex. 66, Young Dep. at 57. Patrick Glennon, a manager of pricing systems for NS (now retired), testified that the new fuel surcharge program was "not the same" as before, HD Ex. 65, Glennon Dep. at 67, admitting that it "definitely was more aggressive," and "definitely yielded more revenue." **[**155]** Id. at 42; see id. at 67. Indeed, as Mr. Glennon described the new program in an internal NS e-mail: "By dropping the base to $23 per barrel, raising the percentage yield and taking it sooner, the change is in fact a blatant general rate increase[.]" HD Ex. 30, E-mail from P. Glennon, at NS_010004522, Apr. 29, 2003. Internal CSX e-mails similarly stated that although the new fuel surcharge program may "seem[] somewhat benevolent, it is actually a large increase in fuel surcharge billings — maybe as much as 100%." RD Ex. 23, E-mail from J. Couch, at CSX000326, Mar. 19, 2003.

Not only were defendants' class period fuel surcharges more aggressive than before, but they also were standardized and uniformly applied across all or virtually all shippers — regardless of whether such shippers were legacy or captive shippers. BNSF's chief financial officer testified before the STB in 2006 that "[o]ur surcharge program is the same for all customers[.]" HD Ex. 9, Testimony of Tom Hunt, at 272, May 11, 2006. UP told a major customer, [TEXT REDACTED BY THE COURT], in 2005 that it was "uniformly requiring" its "standard fuel surcharge program . . . of all of [its] customers." HD Ex. 149, Letter from **[**156]** J. Koraleski, at UPFSC 0342883, Apr. 22, 2005.

Defendants and Dr. Willig, relying heavily on 21 declarations submitted by railroad executives, contend that the evidence of aggressive, uniform, and standardized fuel surcharges is not reflective of reality. See Class Opp. at 21-22, 56-58; Willig Report at 54-55. [14] According to defendants, their fuel surcharge programs during the class period "varied widely from railroad to railroad as well as by shipper and commodity." Class Opp. at 21, 56-58. Defendants say that

> [i]t is an indisputable fact that the Defendants used dozens of fuel surcharges during the Class Period. NS alone applied fifty distinct fuel surcharge formulas during the Class Period, Lawson Decl. ¶ 14, UP had 90 different fuel surcharges between 2000 and 2008, Adams Decl. ¶ 3, and BNSF had a total of 152 in effect at some point between 2000 and 2007. Jacobowski Decl. ¶ 6.

Class Opp. at 56. Defendants also argue that they had different fuel surcharges for intermodal traffic, id. at 21 — that is, traffic that involves "goods shipped in containers or trailers on rail flat cars as part of a continuous movement with another mode of transport, such as truck or steamship." Class Opp. at 14 n.18. **[**157]** [15] In view of these proffered **[*50]** facts, defendants argue that there is no uniform or standard class-wide fuel surcharge that could be used to demonstrate a common impact. See id. at 56.

The Court finds the railroad executives' declarations unpersuasive. Indeed, the most damning portions of almost every single declaration on which defendants **[**159]** rely are contradicted by the declarant's subsequent deposition testimony. By way of example, relying on the declaration of Thomas J. Jacobowski, the general director of price management in BNSF's industrial products marketing department, defendants say that BNSF "had a total of 152 [fuel surcharge formulas] in effect at some point between 2000 and 2007." Class Opp. at 56 (citing Jacobowski Decl. ¶ 6). But when this assertion was tested during his deposition, Mr. Jacobowski testified that these non-standard fuel surcharges were associated with only 24 shippers, HD Ex. 76, Jacobowski Dep. at 28-30, out of approximately 10,000 shippers, id. at 35-36, and that it is "very possible" that all of those 24 shippers also paid BNSF's standard fuel surcharge on at least some routes. Id. at 31-32; see also id. at 38.

Relying on the declaration of David T. Lawson, the vice president of industrial products for NS, defendants say that "NS alone applied fifty distinct fuel surcharge formulas during the class period[.]" Class Opp. at 56 (citing Lawson Decl. ¶ 14). But at his deposition Mr. Lawson admitted that during the alleged conspiracy period NS had "a policy to apply the standard fuel surcharge **[**160]** to as many customers as possible," HD Ex. 83, Lawson Dep. at 38; that "for any authority that would have either a nonstandard fuel surcharge or no fuel surcharge, it required group vice-president approval," id.; that he himself had to authorize "any [fuel surcharge] authority [that] was going to contain any nonstandard fuel surcharge," id.; that the 50 distinct non-standard fuel surcharges could include "duplicates," id. at 16; and that his declaration provided no information as to the percentage of NS customers that were using the

---

[14] The 21 declarations submitted by defendants are listed below in alphabetical order: Declaration of Charles M. Adams, UP ("Adams Decl."), June 18, 2010; Declaration of Marc Allen, BNSF ("Allen Decl."), June 24, 2010; Declaration of Jim Bolander, NS ("Bolander Decl."), June 28, 2010; Declaration of Donna Cerwonka, CSX ("Cerwonka Decl."), June 22, 2010; Declaration of George T. Duggan, BNSF ("Duggan Decl."), June 29, 2010; Declaration of David Garin, BNSF ("Garin Decl."), June 24, 2010; Declaration of Thomas R. Gehl, UP ("Gehl Decl."), June 17, 2010; Declaration of Thomas J. Jacobowski, BNSF ("Jacobowski Decl."), June 23, 2010; Declaration of Christopher Jenkins, CSX ("Jenkins Decl."), June 28, 2010; Declaration of Richard Kiley, NS ("Kiley Decl."), June 28, 2010; Declaration of John Kraemer, NS ("Kraemer Decl."), June 23, 2010; Declaration of Julie A. Krehbiel, UP ("Krehbiel Decl."), June 15, 2010; Declaration of David T. Lawson, NS ("Lawson Decl."), June 25, 2010; Declaration of Ronald Listwak, NS ("Listwak **[**158]** Decl."), June 28, 2010; Declaration of Scott D. McGregor, NS ("McGregor Decl."), June 23, 2010; Declaration of Tim McNulty, CSX ("McNulty Decl."), June 28, 2010; Declaration of Joseph Osborne, NS ("Osborne Decl."), June 28, 2010; Declaration of Dean Piacente, CSX ("Piacente Decl."), June 22, 2010; Declaration of Richard A. Pagan, UP ("Pagan Decl."), June 16, 2010; Declaration of James R. Schaaf, NS ("Schaaf Decl."), June 23, 2010; Declaration of Andrew Strok, CSX ("Strok Decl."), June 21, 2010.

[15] There are two basic types of rail traffic: intermodal traffic; and carload traffic. See Class Opp. at 14 n.18; Oct. 7 Tr. at 207. As defendants define it, intermodal traffic "proceeds both by rail and by some other mode." Oct. 7 Tr. at 207; see Class Opp. at 14 n.18. "All other rail traffic is known as 'carload' traffic," Class Opp. at 14 n.18, which consists of, for example, "a container that has chemicals in it or that has coal, or it's a designated kind of rail vessel designed to hold the specific kind of traffic." Oct. 7 Tr. at 207-08.

standard fuel surcharge at any time during the class period. Id. at 36; see id. at 37 (agreeing that his declaration did not address "whether a majority or a minority of NS customers were paying the standard fuel surcharge").

Moreover, contrary to what defendants suggest in their opposition papers, the evidence in the record makes plain, and the railroad executives themselves admitted, that during the class period defendants uniformly began their negotiations with their standard fuel surcharge program and their objective was to apply their standard fuel surcharge as widely as possible. See HD Ex. 85, Allen Dep. at 25-27 ("*Q.* . . . [Y]ou started the negotiation **[**161]** with a given [BNSF] customer with the $1.25 HDF standard fuel surcharge program as the starting point? *A.* That's correct."); HD Ex. 76, Jacobowski Dep. at 23 ("*Q.* Now I'm correct . . . that [BNSF's] goal was to apply the standard fuel surcharges to as much of its traffic as possible? *A.* Correct. *Q.* In fact, the goal was to apply the standard fuel surcharge to 100 percent of your shippers. Is that correct, sir? *A.* Correct. *Q.* And any exceptions had to be approved by senior management? *A.* Correct."); HD Ex. 83, Lawson Dep. at 37-38 ("*Q.* Now, NS had a policy to try to apply the standard fuel surcharge to as many customers as possible, correct? *A.* Yes. . . . *Q.* And, in fact, for any authority that would have either a nonstandard fuel surcharge or no fuel surcharge, it required group vice-president approval correct? *A.* Yes. And I think ultimately my approval as well."); see also HD Ex. 78, Osborne Dep. at 38-41, 48-49; HD Ex. 77, Listwak Dep. at 29-31; HD Ex. 86, Cerwonka Dep. at 7-8; HD Ex. 87, Piacente Dep. at 7-10. And any deviations from defendants' standard fuel surcharge programs were rare. See, e.g., HD Ex. 82, Kraemer Dep. at 30; HD Ex. 86, Cerwonka Dep. at 19-20; HD Ex. 79, Garin **[**162]** Dep. at 67-68; see supra at 89-90. Furthermore, each defendant enforced strict policies ensuring across-the-board application of these standardized fuel surcharge programs on all of their shippers, see supra at 88, including legacy shippers renewing a contract during **[*51]** the class period. See HD Ex. 50, Union Pacific 2005 Analyst Fact Book, at 11 ("In 2006, approximately 13 percent of the remaining 45 percent of long-term contracts will be available for repricing. As Union Pacific renegotiates this business to market rates, it will also include Union Pacific's standard fuel surcharge."); Pls. Hr'g Binder Tabs 39, 118-19.

Defendants contend that the question "*[w]hy* a shipper paid a particular fuel surcharge is an inherently individualized question, given all the reasons why shippers paid fuel surcharges both before and during the alleged conspiracy." Defs. Wal-Mart Reply Brief at 7 (emphasis in original). But the evidence in the record at this stage reveals that the answer to that question is rather simple and applies class-wide: shippers paid the standard fuel surcharges during the alleged conspiracy because the surcharges were non-negotiable. As of January 2004, BNSF pricing guidelines **[**163]** stated: "*Every contract* should include a fuel surcharge clause. All new and all renewing contract negotiations should have a fuel surcharge as the goal." RD Ex. 223, BNSF Price and Fuel Escalation General Guidelines, at BNSF-0404221, Jan. 2004 (emphasis added). And as BNSF internal e-mails emphasized, contracts requiring the chief executive officer's signature "but excluding full fuel surcharge provisions *will not be signed.*" RD Ex. 224, E-mail from S. Kyei, at BNSF-FSC 000488, Mar. 11, 2004 (emphasis added). Similarly, as UP explained it to a customer: "As a company policy, all contracts without fuel language will have fuel language upon renewal. This is a mandate by UP management." RD Ex. 72, E-mail from B. Denkers, at USM005663, Dec. 22, 2003. And internal CSX e-mails said the same thing:

> We have very clear instructions with our team to pursue FSC. . . . Here are some specific directions we've given the team that will help CSX's overall success:
> 1) all renewals include fuel — very very few exceptions as we discussed last month.
> 2) any multiyear deals must include FSC in the out years[.]
>
> 3) any new prices for customers with master contracts that don't renew in the near term should be **[**164]** added to a different price vehicle for that customer. The new price vehicle should incorporate our FSC program. Even though these master contracts likely have an RCAF component.

RD Ex. 141, E-mail from D. Piacente, at CSXFSC000086200, June 5, 2006. As for NS, its vice president of industrial products agreed that "there was a policy to apply the standard fuel surcharge to as many customers as possible." HD Ex. 83, Lawson Dep. at 38.

Notwithstanding the documentary evidence and the railroad executives' admissions during their depositions, Dr. Willig examines defendants' transaction data and concludes that it tells a different story. Dr. Willig says that there was "widespread use of FSCs prior to the alleged conspiracy," and asserts that "all eight named plaintiffs paid

FSCs prior to July 2003." Willig Report ¶ 73. As he describes it, the transaction data show that "FSC use was growing rapidly prior to the start of the alleged conspiracy." Id. ¶ 78. And Dr. Willig ultimately concludes that "[t]he growth in FSCs before the alleged conspiracy precludes the possibility of showing that all class members paid an FSC because of the conspiracy." Id. at 36.

Dr. Rausser disagrees. As he sees it, **[**165]** Dr. Willig's analysis is flawed because, among other reasons, it relies on a "revenue weighting error [that] concealed both how much more extensive Fuel Surcharge coverage became during the Class Period and that the sharp increase in coverage began in mid-2003, consistent with the facts of the alleged conspiracy." 2d Rausser Report at 34. Dr. Rausser also contends that Dr. Willig uses an insufficient set of data points to establish the purported trend toward increasing use of fuel surcharges. See id. at 7, 32-34. Dr. Rausser, analyzing the same data as Dr. Willig and correcting the problems he identified in Dr. Willig's analysis, concludes that "the pattern in Fuel Surcharge coverage is consistent with the implementation of the conspiracy as alleged." Id. at 35.

The Court is not persuaded by Dr. Willig. In his analysis, Dr. Willig treated *any* fuel surcharge applied to a single shipment by a class member as equal to a fuel surcharge **[*52]** applied to *all* of that class member's shipments during the class period. See Willig Dep. at 47, 52-53; see also Class Reply at 3 n.8. The Court finds that analysis inadequate: under Dr. Willig's metric, if the effect of the alleged conspiracy was to cause **[**166]** a class member paying a two percent fuel surcharge on a single route before the class period to pay the allegedly conspiratorial fuel surcharge at, for example, up to 20 percent on 50 routes during the class period, then Dr. Willig's trend analysis would not recognize this clearly significant change, since his fuel surcharge incidence inputs would treat both circumstances as the same. See Class Reply at 3 n.8. Ultimately, Dr. Willig's analysis suffers from the same problem as defendants' primary argument: both defendants and Dr. Willig incorrectly lump fuel surcharges before the alleged conspiracy with fuel surcharges applied during the alleged conspiracy. As plaintiffs point out, Dr. Willig made no effort to assess whether, in cases where fuel surcharges were applied before the start of the class period, those fuel surcharges were the same as the standardized fuel surcharges applied during the alleged conspiracy. See Willig Dep. at 253-57.

The Court finds Dr. Rausser's analysis persuasive and credits his conclusion that defendants' transaction data show that each defendant applied a standard fuel surcharge program during the class period, across railroads and shipment types, see 2d **[**167]** Rausser Report at 15-16; and that any deviations from the standard fuel surcharge program were rare and without consequence for purposes of determining injury-in-fact at trial with common evidence. Id. at 22-23, 53-54. As Dr. Rausser concludes: "[F]or each railroad 83% to 92% of its non-intermodal revenue and 92% to 100% of its intermodal revenue can be accounted for by a handful or programs and a few identifiable exceptional programs." Id. at 54. The Court also credits Dr. Rausser's conclusion that standard fuel surcharge coverage became more extensive during the class period and that the sharp increase in coverage began in mid-2003, consistent with the start of the alleged conspiracy. See id. at 34-37. [16]

2. Additional ***[**168]*** *factors identified by defendants.* The Court concludes that none of the additional factors identified by defendants — economic efficiency; captive shippers; customer history of purchasing rail freight; existence of capacity constraints; customers whose primary freight alternative was truck; and customer receptivity to fuel surcharges, see Class Opp. at 37-39 — precludes a finding that evidence common to the class can be used to prove that class members paid a fuel surcharge because of the alleged conspiracy.

Economic Efficiency. As discussed, defendants argue that fuel surcharges can enhance economic efficiency. See Willig Report at 31. As Dr. Willig describes it, fuel surcharges allocate risk and were adopted by many industries in the early 2000s in response to increases in both the levels and volatility of fuel prices. See id. ¶ 64. He further explains:

---

[16] During the class certification hearing, defendants' counsel argued, seemingly for the first time, that "[t]here was no change in the intermodal standard fuel surcharges of any consequence during the class period." Oct. 7 Tr. at 208. After the hearing, defendants argued this point again in their supplemental briefing. See Defs. Wal-Mart Brief at 11. The Court is not persuaded by that argument. See 2d Rausser Report at 22-23; Pls. Wal-Mart Reply Brief at 14-15 & nn.33-34.

> Price adjustment mechanisms have been widely adopted and have long been used in the railroad industry. Historically, many rail contracts have included price adjustment clauses tied to the . . . RCAF[]. . . . RCAF measures changes in the prices of major components of the railroad industry's operating expenses, including labor, fuel, materials, **[**169]** equipment rents, depreciation interest and other expenses. . . . The widespread use of price-adjustment provisions such as RCAF indicates that these mechanisms can enhance economic efficiency. FSCs serve the same function but are based on a single input instead of a basket of inputs. Such fuel-only formulas were in use prior to the alleged conspiracy both in the rail and other industries. . . . The use of FSCs in many industries expanded in the early 2000s in response to increases in both the levels and volatility of fuel prices. . . . FSCs were adopted in the **[*53]** rail industry due in large part to dissatisfaction with the FCAF index, which lags behind changes in fuel prices, resulting in delays in cost recovery when fuel prices are rising.

Id. ¶¶ 63-66. Thus, in view of the legitimate economic rationales identified by Dr. Willig for adopting fuel surcharges, he argues that growth in fuel surcharge use "would be expected even absent the alleged conspiracy." Id. at 31.

This case, however, is not about fuel surcharges generally, but rather about aggressive and standardized fuel surcharges tied to base rates. The Court disagrees with Dr. Willig's conclusion that fuel surcharges tied to base **[**170]** rates are a more accurate and efficient method for recovery of fuel costs than other alternatives, such as the RCAF, and thus would have increased even absent a conspiracy. As Dr. Rausser persuasively explains:

> Dr. Willig describes the increased use of Fuel Surcharges as a "normal business adaptation to the increasing importance of volatile costs of fuel" and argues that they were superior to RCAF, because "the weights used in the RCAF formula are *only updated annually.*" The RCAF used these weights to translate movements in underlying costs indexes, one for labor, one for fuel and so on, into percentage increases to be applied to freight rates. The Fuel Surcharge program also translated fuel price movements into percentage increase in freight rates, but the translation formula (the "slope") was *never* updated. As a result, the Fuel Surcharge program was clearly not superior to the RCAF in this respect. Furthermore, one variant of the RCAF, the RCAF-A, adjusted for productivity improvements over time, thus reflecting changes in fuel efficiency rates. The Fuel Surcharge program incorporated no such adjustments and was therefore less likely to properly reflect changes over time than was **[**171]** the RCAF.

2d Rausser Report at 30-31 (footnotes omitted) (emphasis in original). [17] Moreover, as the STB noted during its proceedings addressing rate-unregulated traffic, railroads largely "concede[d] that their fuel surcharges [were] not tied to the fuel consumption associated with the individual movements to which they [were] applied." *Rail Fuel Surcharges, 2007 STB LEXIS 39, 2007 WL 201205, at *1*.

Dr. Willig also maintains that the standardization and mechanical application of fuel surcharges to base rates makes them an efficient tool for increasing freight rates across shippers without having to renegotiate individual contracts. See Willig Report at 35-36. Dr. Rausser agrees, but persuasively argues that "it is precisely this fact that makes the Fuel Surcharges an efficient mechanism for price-fixing, raising total freight rates and thus the Defendants' profits." 2d Rausser Report at 30. Indeed, as the STB noted: "A fuel surcharge program keyed to the base rate has one primary **[**172]** benefit — ease of application." *Rail Fuel Surcharges, 2007 STB LEXIS 39, 2007 WL 201205, at *6*. But such a program — that is, one "that increases all rates by a set percentage" — "stands virtually no prospect of reflecting the actual increase in fuel costs for handling the particular traffic to which the surcharge is applied." *2007 STB LEXIS 39, [WL] at *4*; see also 1st Rausser Report at 50 ("[A]dding a percentage fuel surcharge on top of line-haul rates or base rates is by its very nature a general price increase.").

Captive shippers. Defendants' and Dr. Willig's argument regarding captive shippers and injury-in-fact is essentially identical to the one made during oral argument regarding antitrust injury. See supra at 65-66, 71-72. Defendants say that customers served by only one railroad — referred to by the parties as either "captive" or "sole served"

---

[17] As for use of the RCAF-A mechanism of recovery, BNSF price and fuel escalation guidelines stated: "RCAF-A is absolutely unacceptable." RD Ex. 223, BNSF Price and Fuel Escalation General Guidelines, at BNSF-0404221, Jan. 2004.

shippers — "might have difficulty avoiding a fuel surcharge, even absent a conspiracy." Class Opp. at 37. [18] Moreover, as **[*54]** defendants contend, such shippers "do not benefit from rail competition in the first place" and therefore "cannot be injured by an alleged conspiracy among railroads." Defs. Supp. Brief at 18 n.10. Thus, defendants argue that the alleged conspiracy on **[**173]** fuel surcharges would not be expected to injure such captive shippers, Class Opp. at 37, and that such shippers — of which they are "many . . . , although the number cannot be determined with precision," Willig Report at 75 — can be identified only with individualized inquiry. See Willig Report ¶¶ 139-43. And so defendants argue that the existence of such shippers in plaintiffs' putative class precludes a finding of predominance.

The Court disagrees with defendants. As the Court already has concluded, plaintiffs have shown that captive shippers are subject to competitive forces; that defendants' executives expressly have denied that they would have tried to impose more aggressive programs on captive shippers than they were able to impose on non-captive shippers; and that defendants **[**174]** uniformly imposed their standard fuel surcharges during the class period without regard for whether the shipper was captive or had access to alternative modes of transportation. See supra at 72-74; see, e.g., HD Ex. 79, Garin Dep. at 111-14, 117-18, 120-21, 126-29; HD Ex. 77, Listwak Dep. at 74-76, 93-101; see also HD Ex. 153, Draper Dep. at 322 (agreeing that UP "adopted a standard surcharge program that it intended to be common across its customers," and explaining that "the difficulty of doing it on a customer-by-customer basis is one of the reasons it was done on a global basis"). Plaintiffs have shown by a preponderance of the evidence that defendants applied the allegedly conspiratorial fuel surcharges without discrimination. Thus, the captive-shipper factor does not preclude a finding that injury-in-fact is capable of common proof at trial.

Customer history of purchasing rail freight; existence of capacity constraints; customers whose primary freight alternative was truck. Defendants argue that roughly one-third of the shippers in the putative class first purchased rail freight after July 2003, and these shippers therefore "have no pre-conspiracy history on which to assess their **[**175]** likelihood of paying fuel surcharges absent collusion." Class Opp. at 38. Other shippers "have a long-standing history of rail freight purchases from Defendants, which could inform what the negotiation would have looked like, and whether it would have resulted in an assessment of a fuel surcharge, absent the conspiracy." Id. Defendants contend that these varying histories require individualized analysis that preclude a finding of predominance.

Next, defendants argue that certain shippers faced capacity constraints, and such shippers would be more likely to pay a fuel surcharge in the but-for world, even with rail-to-rail competition. See Class Opp. at 38. And defendants then point to customers whose primary freight alternative was truck. See id. According to defendants, these customers "would be likely to accept a rail fuel surcharge because trucking companies charged a fuel surcharges." Id. As defendants see it, "[c]ustomers already paying fuel surcharges to competing transportation alternatives would be unlikely to reject the idea of fuel surcharges by railroads." Id.

The Court disagrees with defendants that any of these factors preclude a finding that injury-in-fact can be established **[**176]** at trial with common evidence. Evidence common to the class shows that defendants intended to apply the new standard fuel surcharges to all of their freight shipments — regardless of prior freight purchasing history or any other factor. ***HN45***[] To prevail on the merits of their claim at trial, plaintiffs "need not exhaust all possible alternative sources of injury in fulfilling [their] burden of proving compensable injury under" the antitrust laws. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. at 114 n.9*. Rather, they must show only that the antitrust violation was a "material cause of the injury[.]" Id. And at the class certification stage, plaintiffs must show by a preponderance of the evidence **[*55]** that this is capable of common proof. They have satisfied their burden at this stage: plaintiffs have established by a preponderance of the evidence that each defendant enforced policies ensuring across-the-board, uniform application of their new fuel surcharge program.

---

[18] As defendants explain, the term "captive" is used in two different ways: "In some cases, it is applied to a shipper that is served by only one railroad although that shipper has viable transportation options available through trucks and/or barges. Other times, it is applied to a shipper that claims that it has no viable transport alternatives to the railroad that serves it." Defs. Supp. Brief at 18 n.10.

Customer receptivity to fuel surcharges. Defendants argue that some shippers were "more amenable to fuel surcharges, and thus would have been more likely to agree to a fuel surcharge even with competition among railroads." **[**177]** Class Opp. at 39. Defendants point out that several sophisticated clients — [TEXT REDACTED BY THE COURT] — themselves proposed to pay a rate-based fuel surcharge. See id. According to defendants, [TEXT REDACTED BY THE COURT], for example, "proposed a rate-based fuel surcharge when its UP contract first came up for renewal after July 2003." Id. [TEXT REDACTED BY THE COURT] "volunteered to pay BNSF and NS a fuel surcharge even though its contracts with those carriers did not require it." Id. [TEXT REDACTED BY THE COURT] "acknowledged the need for a fuel surcharge in its contracts with CSX[] because of the volatility of fuel prices." Id. [TEXT REDACTED BY THE COURT], both BNSF customers, "were willing to pay a fuel surcharge so long as their own formulas were used." Id. According to defendants, these examples provide further support for their claim that individualized analysis is necessary in order to determine what caused shippers to pay a fuel surcharge and whether they would have paid a fuel surcharge in the but-for world. See id.

The Court disagrees with defendants. That some shippers may have been willing to pay *a* fuel surcharge is not surprising. Indeed, the STB noted in its 2007 **[**178]** decision that several railroads had introduced evidence that "many of their customers favor the continued use of a fuel surcharge program that is tied to the base rate." *Rail Fuel Surcharges, 2007 STB LEXIS 39, 2007 WL 201205, at *6 n.34*. As the STB stated: "Given that such a program shifts greater responsibility for fuel recovery to shippers with higher rates, it is not surprising that a subset of customers (presumably those with lower base rates) favor retaining a percentage-of-the-base-rate approach." Id. But the claim in this case is not a conspiracy to impose just *any* fuel surcharge; rather, plaintiffs claim that defendant conspired to increase total prices "by widespread application and enforcement of *coordinated, and aggressive, fuel surcharges.*" Pls. Wal-Mart Reply Brief at 7 n.11 (emphasis added); see also 1st Rausser Dep. at 94-95. Thus, defendants' assertion that, for example, [TEXT REDACTED BY THE COURT] were "willing to pay *a* fuel surcharge *so long as their own formulas were used*," Class Opp. at 39 (emphasis added), does not discredit plaintiffs' conclusion that injury-in-fact from widespread, aggressive, standardized, and uniform fuel surcharges is capable of common proof at trial.

ii. Component **[**179]** of the total price of shipping

A fuel surcharge is an add-on to the base rate for freight transportation. The total rail freight price for a shipping customer — the all-in rate — consists of the base rate and any percentage fuel surcharge applied to the base rate. Willig Report ¶ 18; see Class Opp. at 3; 1st Rausser Report at 62. The base rate

> includes fixed cost (or overhead) elements, such as the cost of organizing a particular shipment[,] . . . . the large fixed costs of building and maintaining track, bridges, and other structures to achieve long-run sustainability[,] . . . . [and] the railroad's markup of price over costs, i.e., the profitability element of pricing.

1st Rausser Report at 62. As discussed, plaintiffs do not allege that defendants conspired to fix each base rate separately. See 1st Rausser Dep. at 98; see also 1st Rausser Report at 52 n.118. Rather, plaintiffs allege that defendants imposed "an across-the-board artificially high and uniform fuel surcharge" as a percentage multiplier of the base rate, thereby permitting defendants "to raise total freight prices widely by a given percentage." *Rail Freight I, 587 F. Supp. 2d at 30*; see also 1st Rausser Report at 50 ("[A]dding **[**180]** a percentage fuel surcharge on top of line-haul rates or base rates is by its very nature a general price increase."); 2d Am. Compl. ¶ 13.

Defendants argue that since plaintiffs' conspiracy claim is based on a component of the overall price of shipping, "[p]ayment of a **[*56]** collusively-imposed fuel surcharge . . . can injure a shipper only if it caused the overall rate to be inflated above the competitive level." Class Opp. at 41. And "[g]iven that the alleged conspiracy was directed only at a portion of the total price," defendants argue that "any class member that obtained anything of value in exchange for accepting a fuel surcharge may not have suffered impact from the alleged conspiracy." Id. As defendants describe it,

> [i]n view of evidence that some (but not all) shippers made trade-offs for fuel surcharges, the task of determining which class members were injured (because their fuel surcharge was added to the rate with no corresponding reduction in price of other railroad concession) and which were not injured (because they were

> able to negotiate a price reduction or other service component that the shipper valued, requires an individualized analysis of hundreds or even thousands of **[**181]** railroad-shipper contract negotiations.

Id. at 41-42.

Defendants maintain that cases in which a conspiracy claim is based only on a component of the overall price "face a serious problem on class certification" because "[i]t is nearly impossible to determine, using common class-wide proof, whether the alleged conspirators never reduced (or failed to raise) other elements of the price and thereby competed on an overall price basis." Class Opp. at 43 (citing *Exhaust Unlimited, Inc. v. Cintas Corp., 223 F.R.D. 506, 513 (S.D. Ill. 2004)*; *Schoenbaum v. E.I. DuPont de Nemours & Co., Civil Action No. 05-1108, 2009 U.S. Dist. LEXIS 114080, at *35 (E.D. Mo. Dec. 8, 2009)*; *American Seed Co. v. Monsanto Co., 238 F.R.D. 394, 401 (D. Del. 2006)*, aff'd, *271 Fed. Appx. 138, 2008 U.S. App. LEXIS 6963 (3d Cir. Apr. 1, 2008))*. And defendants contend that this case is similar to *Robinson v. Texas Auto Dealers Ass'n, 387 F.3d 416 (5th Cir. 2004)*, in which the Fifth Circuit reversed certification of a class of automobile purchasers who challenged an agreement among auto dealers on how they would list an automobile tax, referred to as a Vehicle Inventory Tax ("VIT"). See Class Opp. at 44.

The Fifth Circuit in Robinson rejected **[**182]** the plaintiffs' assumption that the tax was simply added to the purchase price "for every consumer in the class," concluding:

> Such an assumption defies the realities of the haggling that ensues in the American market when one buys a vehicle. Although some purchasers certainly negotiate a price that excludes taxes, titles, and fees, others negotiate with an eye toward the "bottom line." Bottom-line purchasers base their negotiations on the *final* purchase price, including every tax, fee, and surcharge.

Robinson v. Texas Auto Dealers Ass'n, 387 F.3d at 423 (emphasis in original). Thus, the Fifth Circuit concluded that

> [t]o determine whether a purchaser negotiated in a top-line or bottom-line fashion, a court would have to hear evidence regarding *each purported class member and his transaction.* Such an individual examination would destroy any alleged predominance present in the proposed class. The offered evidence plainly shows that the class members' individual negotiation styles prevent the plaintiffs from arguing that all members of the class suffered an antitrust injury just by paying a VIT.

Id. at 424 (emphasis in original). Defendants contend that, if anything, this case is even less **[**183]** suited for class certification than Robinson because the automobile tax there never varied, whereas, here "the actual fuel surcharge assessed can and does vary from shipper to shipper — adding another variable to the negotiation over total prices." Class Opp. at 44.

Defendants also assert that the evidence in the record, similar to the circumstances in Robinson, shows that many of defendants' customers negotiate toward the bottom line and frequently trade fuel surcharges for rate reductions or other benefits. See Class Opp. at 45. As defendants describe it, "[t]here is overwhelming evidence that many of the sophisticated shippers constituting a substantial portion of Defendants' customer base focus on the overall price/service package and frequently negotiate trade-offs between base rates, fuel surcharges and many other terms of service." Id. And relying on the **[*57]** declarations of various railroad executives, defendants say that they have provided "numerous examples of major customers that negotiated items of value to them as part of their contracts that also included their agreement to pay fuel surcharges[.]" Id. Thus, given the highly individualized nature of rail freight pricing, defendants **[**184]** contend that plaintiffs cannot establish with common evidence that class members paid more for shipping as a result of paying the allegedly conspiratorial fuel surcharge.

On this point, Dr. Willig has the same view. As he explains, rail contracts are multidimensional, involving a wide variety of complex contractual provisions, and a shipper's evaluation of a contract "depends on the full package of contract terms[.]" Willig Report ¶ 116. Dr. Willig examines defendants' transaction data and relies on defendants' declarations to conclude that the introduction of fuel surcharges into rail contacts during the class period "often" resulted in concessions on other contract terms. Id. ¶ 122; see id. ¶ 123.

Plaintiffs do not appear to disagree with the general proposition that evidence of discounting — for example, reductions in a base rate — is relevant in assessing whether class certification is appropriate. Dr. Rausser himself has acknowledged that if shippers received concessions in the form of base rate discounts in exchange for the application of a fuel surcharge, then the impact for those shippers "wouldn't have been common to those" who did not receive such discounts. 1st Rausser Dep. **[**185]** at 272; see also id at 270. Plaintiffs argue, however, that the depositions of defendants' declarants, on whom defendants primarily rely for their purported evidence of discounting, have exposed that the declarations are both unreliable and inconsistent with later deposition testimony. See Class Reply at 17. According to plaintiffs, although defendants claim that customers traded fuel surcharges for trade reductions, the depositions establish that most reductions were in fact reduced *increases*, and even those such situations were rare. See id. at 20.

As for Dr. Rausser, he acknowledges that defendants' transaction data show that a nominal amount of discounting occurred, see 2d Rausser Dep. at 211 (describing "very little deviations or anomalies"), but contends that there is no evidence of systematic discounting of base rates to offset increases. See 2d Rausser Report at 91 ("There is no evidence of a systematic pattern of discounting base rates or providing other concessions in order to offset Fuel Surcharges[.]"); Class Reply at 14. As Dr. Rausser sees it, "there is no real-world evidence of widespread discounting of base rates, nor is there any established causal link between the **[**186]** isolated instances of declining base rates and the imposition of Fuel Surcharges." 2d Rausser Report at 66.

The Court agrees with plaintiffs that defendants' executives' declarations are unpersuasive and inconsistent with their later deposition testimony. Furthermore, the Court finds by a preponderance of the evidence that any examples of discounting are, at best, anomalies that do not preclude a finding of predominance. Finally, the Court concludes that the Fifth Circuit's decision in *Robinson* is inapposite to this case.

1. Defendants' declarations. Defendants and Dr. Willig rely heavily on the 21 declarations submitted by defendants' executives purporting to show that many of defendants' customers traded fuel surcharges for rate reductions. Defendants point to eight such examples in their opposition papers, see Class Opp. at 45-46, and then state that they "are not trivial exceptions to a rule," but rather "represent large revenues" and "reflect the diversity of outcomes among negotiated contracts." Id. If defendants' declarations provide examples of anything, it is the paucity of any evidence of discounting.

Relying on the declaration of George T. Duggan, a vice president at BNSF, **[**187]** defendants state: [TEXT REDACTED BY THE COURT] Class Opp. at 45 (citing Duggan Decl. ¶ 16). But during his deposition, Mr. Duggan testified that [TEXT REDACTED BY THE COURT] HD Ex. 81, Duggan Dep. at 26-27 (emphasis added). [TEXT REDACTED BY THE COURT] This, then, is an example of a reduced increase, not a discounting of the base rate in exchange for application of a standardized fuel surcharge.

[*58] Relying on the declarations of Marc Allen and David Garin, both vice presidents at BNSF, defendants state:

> [TEXT REDACTED BY THE COURT] In other instances, shippers agreed to pay the standard BNSF fuel surcharge in exchange for receiving other economic concessions from BNSF. Garin Decl. ¶ 12.

Class Opp. at 45-46. Mr. Allen, however, testified that BNSF's "standard fuel surcharge provision" was "the starting point in contract negotiations with respect to the fuel surcharge provision to be included in the contract." HD Ex. 85, Allen Dep. at 27; see id. at 25 ("[O]ur initial opening offer is almost always one that includes a standard fuel surcharge program."). As for Mr. Garin, he admitted that [TEXT REDACTED BY THE COURT] Id. at 198-99.

Relying on the declaration of Dean Piacente, a CSX vice president, **[**188]** defendants state: [TEXT REDACTED BY THE COURT] Class Opp. at 46 (citing Piacente Decl. ¶ 6). But Mr. Piacente subsequently testified that [TEXT REDACTED BY THE COURT] HD Ex. 87, Piacente Dep. at 102.

Relying on the declaration of Tim McNulty, CSX's director of marketing, agricultural products, defendants state: [TEXT REDACTED BY THE COURT] Class Opp. at 46 (citing McNulty Decl. ¶ 10). But as Mr. McNulty later testified at his deposition, [TEXT REDACTED BY THE COURT] HD Ex. 71, McNulty Dep. at 148.

Relying on the declarations of Ronald Listwak and James R. Schaaf, both vice presidents at NS, defendants state: "In 2006, the South Mississippi Electric Power Association agreed to pay the fuel surcharge if NS reduced the base rate by $0.35/ton. NS agreed." Class Opp. at 46 (citing Listwak Decl. ¶ 15; Schaaf Decl. ¶ 18). But as Mr. Listwak subsequently testified during his deposition, NS "was able to achieve *both the standard fuel surcharge and significant base rate increases*" on its contract with the South Mississippi Electric Power Association. HD Ex. 77, Listwak Dep. at 111. Thus, Mr. Listwak's declaration describes another example of a reduced increase of the base rate, not a discounting **[**189]** of the original base rate in exchange for application of the standard fuel surcharge.[19]

Relying again on the declaration of Mr. Listwak, defendants state:

> [TEXT REDACTED BY THE COURT]

Class Opp. at 46 (citing Listwak Decl. ¶¶ 19-23). As Mr. Listwak admitted during his deposition, however, NS [TEXT REDACTED BY THE COURT] HD Ex. 77, Listwak Dep. at 117; NS [TEXT REDACTED BY THE COURT] id.; and NS [TEXT REDACTED BY THE COURT] Id. at 119 (emphasis added).

2. Mandates not to discount base rates. Based in large part on the deposition testimony of defendants' own executives, the Court finds that plaintiffs have established by a preponderance of the evidence that any discounting of the base rate by defendants was rare — which is consistent with clear mandates from defendants not to modify their standard fuel surcharge program. As an illustrative **[**190]** example, Donald Seale, at the time NS' senior vice president of marketing services, stated in an internal NS e-mail: "I expect market based price increases to be applied independent of the FSC, and we should *absolutely not* be deferring any rate increases because we are applying the FSC." RD Ex. 84, E-mail from D. Seale, at NS_010034244, Apr. 14, 2004 (emphasis added). Subsequently, Mr. Seale, now the chief marketing officer of NS, testified:

> *A.* . . . . Do not trade off one to gain the other. That was the directive.
>
> *Q.* And don't give up the fuel surcharge for base rate, don't give up base rate for the fuel surcharge, goes to both sides of the equation, correct?
>
> *A.* Well, it would . . . have relationship to both sides of the equation because they are all components of the overall price.
>
> *Q.* And your directive was, If you want to defer rate increases because you are applying a fuel surcharge, you come to me and get my approval, correct?
>
> *A.* That is correct.
>
> *Q.* Okay. And so you would be the sign-off authority for any situation in which, **[*59]** where people were following your directives, at least, someone sought to defer a rate increase because the fuel surcharge was being applied, correct?
>
> *A.* If the fuel **[**191]** surcharge was being modified/customized through negotiation, the directive was that they would secure authority to make that modification.
>
> *Q.* Okay. I understand that that was the directive. But it was also the directive, was it not, that you are not to defer rate increases because you are applying the fuel surcharge, that was a separate directive?
>
> *A.* That was — that was a part of the directive. The two are inseparable.

---

[19] Mr. Schaff, in his declaration, referenced the shipping customer [TEXT REDACTED BY THE COURT] See Schaff Decl. ¶ 18. But Mr. Lawson, another NS vice president, admitted during his deposition that the Schaff declaration described only three contracts without providing any information on whether [TEXT REDACTED BY THE COURT] HD Ex. 83, Lawson Dep. at 126.

> *Q.* And you were the person that had final sign-off authority both with respect to any modification of the fuel surcharge and with respect to any deferring of rate increases because of the application of the fuel surcharge, correct?
>
> *A.* That would be correct.
>
> *Q.* And so my question is: Did you keep some record of the situations in which you specifically approved a modification of the fuel surcharge, that is Question Number 1?
>
> *A.* No.
>
> *Q.* Did you keep any record of any situations or of the situations in which you specifically approved the deferring of any rate increase because of the application of the fuel surcharge?
>
> *A.* No. I did not.

RD Ex. 173, Seale Dep. at 299-301. Mr. Seale admitted — despite being the individual with final sign-off authority for any modifications to NS' clear **[**192]** directives on its fuel surcharge program — that he had "no direct knowledge" of situations in which rate increases were deferred because NS was applying its fuel surcharge. Id. at 297; see id. at 299-301. [20]

3. Expert opinions on discounting. As for the parties' experts, Dr. Rausser and Dr. Willig disagree on the extent of any discounting in exchange for application of the standard fuel surcharge program. Compare 1st Rausser Report at 94-101, and 2d Rausser Report at 57-66, with Willig Report at 66-70. The Court finds persuasive Dr. Rausser's analysis, which is consistent with the evidence in the record. Dr. Willig, relying on the declarations provided by defendants, states that these declarations show that the application of fuel surcharges "often resulted in concessions with respect to other contract **[**193]** terms," including discounts on base rates. Willig Report ¶ 122. Dr. Rausser disagrees. See 2d Rausser Dep. at 205. He explains that he went through "each and every instance that's specified in the declarations and discussed in depositions" and concludes that the declarations provide "weak evidence . . . [b]ecause they don't offset the actual over-recovery of fuel surcharges resulting from" the coordinated fuel surcharge programs. Id. The Court agrees with Dr. Rausser. As discussed above, the Court finds the defendants' declarations unpersuasive and often inconsistent with later deposition testimony of the same people; the declarations primarily reveal reduced increases in base rates with application of the standard fuel surcharge program.

Both experts also reviewed defendants' transaction data and reached different conclusions as to discounting. Dr. Willig concludes that defendants' transaction data reveal "a variety of examples of pairs of shippers of the same commodity that faced similar changes during the class period in 'all-in' rates," and that "[t]hese examples demonstrate large differences across shippers in the extent to which all-in rate increases were attributable to changes **[**194]** in base rates as opposed to changes in FSCs." Willig Report ¶ 123. In contrast, Dr. Rausser analyzed defendants' transaction data and concluded that there was no systematic discounting of base rates to offset the application of the standard fuel surcharge. See 1st Rausser Report at 94-101. As Dr. Rausser describes it: "An analysis **[*60]** of the transaction data reveals that there is no evidence of widespread discounting of base rates. Instead, base rates across the main commodities shipped by defendants remained largely constant in real terms from the years before the Class Period to the years during the Class Period." 1st Rausser Report at 95; see also 2d Rausser Report at 66.

In resolving this dispute between the experts, the Court notes, as an initial matter, that Dr. Willig has relied on the defendants' transactional data to reach his conclusions about purported examples of discounting. See Willig Report

[20] For another example of a company directive not to discount base rates in exchange for application of a fuel surcharge, see RD Ex. 91, BNSF Memorandum from S. Kyei, at BNSF-0325453, Mar. 28, 2008 ("CEO's Mandate for Marketing's Fuel Surcharge Programs": "Every price authority should have a fuel surcharge applied"; "Marketing Team should not discount a fuel surcharge to raise price").

at 67 ("Defendants' transaction data reveal large differences across comparable shippers in the contribution of base rates and FSCs to all-in rates."). Thus, Dr. Willig is relying on evidence common to the class to dispute the results of Dr. Rausser's analysis regarding discounting and, **[**195]** ultimately, whether class members experienced injury-in-fact. This, then, appears to raise a merits issue, not a class certification issue. The question before the Court is whether plaintiffs, through Dr. Rausser, have "'established a workable multiple regression equation, *not whether plaintiffs' model actually works*[.]'" *In re Amaranth Natural Gas Commodities Litig., 269 F.R.D. at 383* (quoting *In re EPDM Antitrust Litig., 256 F.R.D. at 100*) (emphasis in original); see *In re TFT-LCD (Flat Panel) Antitrust Litig., 267 F.R.D. 583, 604 (N.D. Cal. 2010)*. Defendants should be "focused on disputing the use of the methodology itself, not the results of the methodology." *In re EPDM Antitrust Litig., 256 F.R.D. at 96*. In any event, the Court finds Dr. Rausser's analysis persuasive, see 2d Rausser Report at 57-66, and credits his determination from his review of the data that there was no evidence of systematic discounting. The Court concludes that any examples of such discounting are outliers, insufficient to defeat a finding of predominance. See *Kohen v. Pacific Inv. Mgmt. Co., 571 F.3d at 677*.

4. Starting point for negotiations. Finally, the Court concludes that the Fifth Circuit's decision **[**196]** in Robinson v. Texas Auto Dealers Ass'n, a case upon which defendants' heavily rely, is inapposite to this case. The Fifth Circuit in Robinson framed the question presented as "whether the mere payment of a VIT — unaccompanied by any other evidence — provides enough information such that a party may sustain a price-fixing suit on behalf of the entire class." *Robinson v. Texas Auto Dealers Ass'n, 387 F.3d at 423*. In concluding that class certification was inappropriate, the Fifth Circuit criticized the plaintiffs for *assuming* that the automobile tax at issue "represents an additional charge that artificially increases the final purchase price for every consumer in the class." Id. As the Fifth Circuit stated:

> Such an assumption defies the realities of haggling that ensues in the American market when one buys a vehicle. Although some purchasers certainly negotiate a price that excludes taxes, titles, and fees, others negotiate with an eye to the "bottom line." Bottom-line purchasers base their negotiations on the *final* purchase price, including every tax, fee, and surcharge.

Id. (internal footnote omitted) (emphasis in original). Thus, in order to determine whether a customer is a bottom-line **[**197]** or top-line negotiator, the Fifth Circuit concluded that "a court would have to hear evidence regarding *each purported class member and his transaction*," and that was fatal to a finding of predominance. *Id. at 424* (emphasis in original).

Here, however, plaintiffs have presented persuasive documentary and expert opinion evidence that is common to the class that shows that the standard fuel surcharges were intended to raise overall prices as a percentage multiplier of the base rate. Because each defendant's standardized fuel surcharge program was applied as a percentage multiplier of a shipper's base rate, application of that surcharge without discounting directly had the effect of "increas[ing] all rates by a set percentage[.]" *Rail Fuel Surcharges, 2007 STB LEXIS 39, 2007 WL 201205, at *4*. And the standardized fuel surcharges applied during the class period were uniform, were not subject to negotiation, and were not discounted except in the case of anomalies. Finally even when, in the rare case, base rates were discounted, railroad executives admitted that **[*61]** the standard fuel surcharge program "even if not accepted . . . was an effort to at least influence the discussion on . . . fuel surcharge." HD Ex. **[**198]** 88, Gehl Dep. at 55. In other words, the allegedly conspiratorial fuel surcharges were the starting point for negotiations — a situation commonly observed in price fixing conspiracies where classes have been certified. See, e.g., *In re Universal Serv. Fund Tel. Billing Practices Litig., 219 F.R.D. 661, 675 (D. Kan. 2004)* (describing class actions where "'the negotiated transaction prices would have been lower if the stating point for negotiations had been list prices set in a competitive market'") (quoting *In re Industrial Diamonds Antitrust Litig., 167 F.R.D. 374, 383 (S.D.N.Y. 1996))*.

This case therefore is nothing like Robinson. Compare *Robinson v. Texas Auto Dealers Ass'n, 387 F.3d at 423* (deciding "whether the mere payment of a V1T — *unaccompanied by any other evidence* — provides enough information such that a party may sustain a price-fixing suit on behalf of the entire class") (emphasis added). Instead, this case falls within the line of cases holding that ***HN46***[] class-wide injury-in-fact can be proven at trial by showing that the allegedly conspiratorial fuel surcharges were the starting point '"from which negotiations for discounts began.'" *In re Universal Serv. Fund Tel. Billing Practices Litig., 219 F.R.D. at 675* **[**199]** (quoting *In re Industrial Diamonds Antitrust Litig., 167 F.R.D. at 383*); see *In re Ready-Mixed Concrete Antitrust Litig., 261 F.R.D. at 171-72*. The theory behind this line of cases — which applies with equal force here —

> "is . . . that the negotiated transaction prices would have been lower if the starting point for negotiations had been list prices set in a competitive market. Hence, if a plaintiff proves the alleged conspiracy resulted in artificially inflated list prices, a jury could reasonably conclude that each purchaser who negotiated an individual price suffered some injury."

In re Universal Serv. Fund Tel. Billing Practices Litig., 219 F.R.D. at 675 (quoting *In re Industrial Diamonds Antitrust Litig., 167 F.R.D. at 383*). In sum, individualized negotiations and discounts are not an automatic bar to class action treatment. See *In re EPDM Antitrust Litig., 256 F.R.D. at 89*; *In re Urethane Antitrust Litig., 251 F.R.D. 629, 637-38 (D. Kan. 2008)*; *In re Industrial Diamonds Antitrust Litig., 167 F.R.D. at 383*.

Under this line of cases, then, the question is whether common proof can be used to show that the alleged conspiracy on fuel surcharges, at the very least, affected the starting **[**200]** point for negotiations. See *In re EPDM Antitrust Litig., 256 F.R.D. at 88-89*; *In re Urethane Antitrust Litig., 251 F.R.D. at 637-38*. The answer is yes. Not only have defendants' own executives admitted that negotiations started with the standard fuel surcharge program, see HD Ex. 88, Gehl Dep. at 55; HD Ex. 85, Allen Dep. at 24-27; HD Ex. 83, Lawson Dep. at 38-41; HD Ex. 77, Listwak Dep. at 23, 129; HD Ex. 89, Pagan Dep. at 55-56; HD Ex. 66, Young Dep. at 71-75, but plaintiffs have shown — in reliance on defendants' own documents and economic analysis of defendants' transaction data — that defendants' standardized fuel surcharge programs overwhelmingly were applied without discounting the base rate. See supra at 106-13.

iii. Expert opinions on injury-in-fact

Plaintiffs do not rely only on the extensive documentary evidence in the record to show that injury-in-fact is capable of proof at trial with evidence common to the class. Plaintiffs also submit that they anticipate presenting at trial the testimony of Dr. Rausser, who, as they describe, confirms with economic principles common to the class and a regression analysis that injury-in-fact is capable of common proof. See Class Mem. at **[**201]** 71-75; see also Class Mot., Ex. B, Trial Plan at 8-9.

In his report, Dr. Rausser first discusses the rail freight industry and concludes that five structural factors strongly suggest that a conspiracy to impose supra-competitive fuel surcharges on shippers would have succeeded in subjecting the class to a common injury-in-fact. See 1st Rausser Report at 10-52; 2d Rausser Report at 80-81. Then, Dr. Rausser performs economic regression analyses on defendants' transaction data that he says reveal that class members suffered a **[*62]** common injury-in-fact from the alleged conspiracy. See 1st Rausser Report at 80-101, 120; 2d Rausser Report at 91-92. Dr. Rausser has developed two economic regression models: a "common factor model and a damage model." Oct. 6 Tr. at 137. According to plaintiffs and Dr. Rausser, "[t]hese models together show that there are identifiable common factors that explain pricing in the rail freight industry; and . . . that the conspiracy caused significant overcharges across the class." Id.; see 2d Rausser Report at 91-92. Thus, plaintiffs say that Dr. Rausser has established that economic analyses relying on evidence common to the class — defendants' transaction data and **[**202]** economic principles common to the class — "can be used to show that Defendants' conspiracy led to artificially high prices during the Class Period for Class members." 1st Rausser Report at 80-81. [21]

Dr. Willig disagrees with some of Dr. Rausser's views about the rail freight market. See Willig Report at 64-100. More importantly, Dr. Willig finds flaws in Dr. Rausser's regression analyses, see id. at 107-59, and concludes that individualized inquiry is required to determine whether a particular shipper was injured-in-fact as a result of the alleged conspiracy. See id. ¶ 285.

---

[21] As discussed below, see infra at 138-39, Dr. Rausser also concludes that a common damage methodology works in this case.

As the Third Circuit instructed in In re Hydrogen Peroxide Antitrust Litig., the Court has weighed the expert reports of Dr. Rausser and Dr. Willig as a part of the rigorous analysis Rule 23 demands. See *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 323-24*. The Court finds persuasive Dr. Rausser's analysis, which supports plaintiffs' argument that injury-in-fact is capable of proof at trial through evidence common to the class. The Court finds that Dr. Rausser's theory is "plausible," *Behrend v. Comcast Corp., 655 F.3d at 204 n.13*; **[**203]** *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 325*, and "susceptible to proof at trial through available evidence common to the class." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 325*. Dr. Rausser persuasively has established "the key logical steps behind [his] theory," *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d at 26*, that injury-in-fact is capable of proof at trial with workable economic models and analysis — that is, common evidence.

1. Rail freight industry. Dr. Rausser contends that the rail freight industry is conducive to price fixing. See 1st Rausser Report at 5. He first identifies the geographic and product scope relevant to the rail freight industry. See id. at 10. As for the geographic scope, defendants sell rail services throughout the continental United States. Id. Together, defendants possess a 90 percent market share based on track miles and a 94 percent market share based on freight revenue. Id. at 21. Together, they provide rail services throughout the continental United States "to nearly every industrial, wholesale, retail, and resource-based sector of the economy." Id. In short, Dr. Rausser concludes that defendants have "an **[**204]** enormous market share in the rail freight market," and that this "structure . . . created an environment conducive to collusion[.]" Id. at 20.

The product at issue is freight service. See 1st Rausser Report at 16. As Dr. Rausser describes it, freight services are "homogenous and interchangeable across Defendants." Id. at 27. He further explains:

> The service that the Class I railroads offer shippers is interchangeable and therefore, when shippers make a choice between railroads, they do so based on price. The service that is offered to the market is simply the movement of goods between origin and destination. Shippers can even use their own cars and often do. Any differences that may exist between shippers concerning reliability and speed are very likely to be eliminated over time as railroads compete with each other and invest to eliminate any service deficiencies they may have.

Id. In view of this characterization of the product, Dr. Rausser concludes that "[b]ecause customers choose between railroads based on price, there are strong incentives **[*63]** for railroads to restrict the resulting price competition by collusion." Id.

Having examined the geographic market and the product at issue, Dr. **[**205]** Rausser contends that the rail freight industry has five characteristics that make it conducive to price fixing: (1) the industry is heavily concentrated; (2) there are significant barriers to entry; (3) rail freight services are interchangeable across defendants, and shippers choose their railroad based on price; (4) the demand for rail freight services generally is inelastic; and (5) pricing is transparent. See 2d Rausser Report at 79. And according to Dr. Rausser, these five characteristics strongly suggest that "had a conspiracy occurred it would have succeeded in subjecting the Class to a common" injury-in-fact. 2d Rausser Report at 80. Dr. Rausser concludes:

> *Characteristic 1* — as the industry is concentrated in the hands of the Defendants, the alleged cartel would have been able to sustain high prices across the Class and non-Defendant railroads would have lacked the capacity to lure Class members away with lower prices;
>
> *Characteristic 2* — the Defendants' high prices would not have been undercut by the creation of new railroads (*de novo* entry), or the expansion of existing railroads;
>
> *Characteristic 3* — because Class members considered the railroads' services as interchangeable and **[**206]** chose their railroad based on price, they would have been harmed by the restriction of that choice and the routinely imposed higher prices;
>
> *Characteristic 4* — although some shippers may have been able to find viable transport alternatives to rail (all price-fixing cartels lose some customers), the vast majority would have been unable to do so and, thus, Defendants could profitably elevate their prices in a coordinated manner without risk of losing substantial business;

> *Characteristic 5* — costs of implementing and maintaining the conspiracy would have been extremely low due to thoroughly standardized service descriptions, established mechanisms for communicating and tracking prices, and ease of using generally available indexes to increase prices.

2d Rausser Report at 80-81 (footnotes omitted). [22]

Not surprisingly, Dr. Willig disagrees with Dr. Rausser: he contends that the industry characteristics discussed by Dr. Rausser "do not suggest, and provide no valid basis for concluding, that the alleged conspiracy would have had a systematic effect on rail rates paid by members of the purported class." Willig Report ¶ 43. As Dr. Willig sees it, the economics of the rail industry imply that there can no common evidence of class-wide injury-in-fact. Willig Report at 64.

Dr. Willig's disagreement with Dr. Rausser appears to focus on two questions about the structure of the rail freight industry: whether freight prices are truly interchangeable; and whether pricing is transparent. As for the first issue, Dr. Willig contends that rail contracts involve a wide variety of complex contractual agreements and are multidimensional in nature. Willig Report ¶ 115. Dr. Willig concludes:

> Testimony from defendants' marketing personnel as well as defendants' transaction data demonstrate that FSCs cannot be viewed **[**208]** in insolation from the other dimensions of agreements between railroads and shippers. Rather, only an individualized inquiry can determine whether shippers benefitted from modification of other parts of the agreement as part of their agreement to pay an FSC. The existence and magnitude of such modifications cannot be measured on a class-wide basis since they depend upon the terms of both rate and non-rate provisions of the agreements.

Willig Report ¶ 115. According to defendants, they "do not provide a product, much **[*64]** less a fungible commodity"; rather, they "provide the majority of their services pursuant to contracts that reflect the diversity of rail customers and are highly differentiated, varying by customer, lane, equipment, product being shipped, and numerous other factors." Class Opp. at 58; see Willig Report ¶ 116.

Regarding the second issue, Dr. Willig contends that Dr. Rausser's claim that pricing is transparent is incorrect. Willig Report ¶ 43. According to Dr. Willig, "rates typically paid by members of the proposed class are confidential and are not transparent to other members of the alleged conspiracy." Id. This industry characteristic, Dr. Willig says, "creates practical **[**209]** incentives for members of the alleged cartel to 'cheat' or 'deviate' by offering concessions to shippers on base rates, fuel escalation provisions, or other elements of rail contracts." Id.

The Court finds persuasive Dr. Rausser's characterization of the rail freight industry. There is no question that the rail freight industry is concentrated in the hands of the four defendants — they possess 90 percent market share based on track miles and control 94 percent of the market based on freight revenue — and Dr. Willig does not claim otherwise. Nor does Dr. Willig dispute Dr. Rausser's contention that there are significant barriers to entry.

As for the nature of the product, the Court disagrees with defendants that "there are a lot of individualized factors that drive shippers to choose between different rail freight service providers." Oct. 6 Tr. at 32. Dr. Rausser persuasively has explained that customers routinely switch between railroads for shipments along the same routes, "confirming that they see the railroads' services as interchangeable." 1st Rausser Report at 27; see id. at 27-29. The Court also credits Dr. Rausser's conclusion that demand for freight services generally is inelastic. **[**210]** See 1st Rausser Report at 29-36. As he explains, "an analysis of the industry demonstrates that Defendants' businesses are concentrated in commodities and distances over which rail is the most cost efficient transport option and therefore the demand that they faced was in general inelastic." Id. at 31-32.

---

[22] Defendants contend that one part of "Characteristic 5" references objectionable interline-related communications. See Defs. Interline Objections, Ex. C, at 80-81. Specifically, defendants say that Dr. Rausser improperly has relied on interline-related communications when he states that costs of implementing and maintaining the conspiracy would have been extremely low due to "*established mechanisms* ***[**207]*** *for communicating and tracking prices*[.]" Id. (emphasis added). The Court has not relied on this part of Characteristic 5 in reaching in decision on plaintiffs' motion for class certification.

Finally, regarding the issue of transparency, Dr. Rausser acknowledges, as he must, the existence of private contracts, but explains that rail freight pricing nevertheless is established, well defined, and easily understood. See 1st Rausser Report at 37. [23] As Dr. Rausser states: "[F]reight railroad companies use common types of *price authority* documents, which provide a detailed account of all the base freight charges, surcharges, accessorial, and fuel surcharges associated with a specified rail movement." Id. at 37 (emphasis in original). Although rail freight is, of course, a service, rather than a good, "that service is well defined and highly standardized using commodity classifications for the material shipped, tonnage as a measure of quantity, and miles representing the distance traveled." 2d Rausser Report at 29. Thus, "[i]ntelligence on price quotes for this service can be **[**211]** exchanged and both parties in the exchange know exactly what they are talking about," which "eases the costs of monitoring for a cartel." Id. Moreover, the allegedly conspiratorial mechanism applied by defendants — standardized fuel surcharges — does not require constant communications once the details of the surcharge have been agreed upon. See 1st Rausser Report at 50. And although Dr. Willig contends that the existence of private price quotes creates practical incentives to "cheat" or "deviate" by offering concessions, see Willig Report ¶ 43, as the Court previously has found by a preponderance of the evidence, see supra at 106, the examples of discounting are, at best, anomalies.

The Court **[**212]** therefore is not persuaded by Dr. Willig's characterization of the rail freight industry, see Willig Report ¶¶ 43, 115-16, or by defendants' attempts to discredit **[*65]** Dr. Rausser's analysis. See Defs. Hr'g Binder, Part III at 45; Oct. 7 Tr. at 222-35. Rather, the Court finds that the five structural characteristics of the rail freight industry identified by Dr. Rausser, and the evidence he marshals regarding those characteristics, provide strong support for plaintiffs' contention that injury-in-fact is capable of proof at trial with evidence common to the class. See *In re Puerto Rican Cabotage Antitrust Litig., 269 F.R.D. at 139* (considering, among other things, highly concentrated industry, high entry barriers, static elasticity, and price competition in finding by a preponderance of the evidence that predominance requirement was satisfied); *In re EPDM Antitrust Litig., 256 F.R.D. at 92* (according to expert analysis credited by the court, certain market factors "lay the groundwork for plaintiffs' argument that, if collusive behavior did occur, it would have been effective in raising prices across the class, thus demonstrating class-wide injury-in-fact").

2. Background on multiple regression ***[**213]*** *analysis.* The centerpiece of Dr. Rausser's report focuses on two economic models that examine defendants' transaction data through multiple regression analysis. See 2d Rausser Report at 91-92; see also id. at 11. Before addressing the specific analyses done in this case, the Court provides below some background on multiple regressions in general, as set forth in a reference guide published by the Federal Judicial Center:

> Multiple regression analysis is a statistical tool for understanding the relationship between or among two or more variables. Multiple regression involves a variable to be explained — called the dependent variable — and additional explanatory variables that are thought to produce or be associated with changes in the dependent variable. For example, a multiple regression analysis might estimate the effect of the number of years of work on salary. Salary would be the dependent variable to be explained; years of experience would be the explanatory variable.
>
> Multiple regression analysis is sometimes well suited to the analysis of data about competing theories for which there are several possible explanations for the relationships among a number of explanatory variables. **[**214]** Multiple regression typically uses a single dependent variable and several explanatory variables to assess the statistical data pertinent to these theories. . . . [For example, [in an antitrust cartel damages case, the plaintiff's expert might utilize multiple regression to evaluate the extent to which the price of a product increased during the period in which the cartel was effective, after accounting for costs and other variables unrelated to the cartel. The defendant's expert might use multiple regression to suggest that the plaintiff's expert had omitted a number of price-determining variables.

[23] Moreover, as Dr. Rausser points out, the existence of private price agreements in the rail freight industry does not distinguish the industry "from many other industries, including some that have experienced price fixing despite the supposedly confidential nature of customer contracts." 2d Rausser Report at 10 & n. 16 (citing peer-reviewed study concluding that "cartels in industries with fuller reporting on prices are not statistically significantly higher than for cartels in other industries").

> More generally, multiple regression may be useful (1) in determining whether a particular effect is present; (2) in measuring the magnitude of a particular effect; and (3) in forecasting what a particular effect would be, but for an intervening event. . . .
>
> Multiple regression analysis can be a source of valuable scientific testimony in litigation. However, when inappropriately used, regression analysis can confuse important issues while having little, if any, probative value.

RUBINFELD, supra, at 305-08.

HN47[] "In an antitrust suit, plaintiffs will generally use multiple regression analysis to demonstrate **[**215]** that a 'conspiracy' variable has influence over the dependent variable (price) — that is, class members paid a higher price than the basic economic principles of supply and demand would otherwise dictate, thus demonstrating collusive behavior was at work." *In re EPDM Antitrust Litig., 256 F.R.D. at 95*; see *Schumacher v. Tyson Fresh Meats, Inc., Civil Action No. 02-1027, 2006 U.S. Dist. LEXIS 1943, 2006 WL 47504, at *1 n.1 (D.S.D. Jan. 5, 2006)* ("A multiple regression analysis is a statistical tool that attempts to reveal relationships between explanatory variables and a dependent variable."). A multiple regression model must, of course,

> be correctly set up for the results to be valid. The expert's choices are crucial for the success of the analysis and the ultimate fact-finder should consider the following **[*66]** when evaluating the efficacy of the expert's analysis: has the expert correctly identified the dependent variable; has he or she chosen the correct explanatory variable that is relevant to the question at issue; are the additional variables chosen all correct or are some missing and/or irrelevant; is the form of the analysis correct?

In re EPDM Antitrust Litig., 256 F.R.D. at 95; see RUBINFELD, supra, at 310-17.

Ultimately, **[**216]** "[e]ven the best regression equation cannot prove causation." *Schumacher v. Tyson Fresh Meats, Inc., 2006 U.S. Dist. LEXIS 1943, 2006 WL 47504, at *7*; see RUBINFELD, supra, at 310. Rather, "[t]he most it can show is a correlation that can give rise to an inference that causation exists." *Schumacher v. Tyson Fresh Meats, Inc., 2006 U.S. Dist. LEXIS 1943, 2006 WL 47504, at *7*; see *Morgan v. United Parcel Serv. of Am., Inc., 380 F.3d 459, 466 (8th Cir. 2004)* (a valid regression equation gives rise to an inference of causation, but does not itself prove causation); see also *In re Oil Spill by the Amoco Cadiz Off the Coast of Fr. on Mar. 16, 1978, 954 F.2d 1279, 1320 (7th Cir. 1992)* ("If done right, regression analysis permits an inference of causation, and of the size of the effect."). Thus, "one must infer that a causal relationship exists on the basis of an underlying causal theory that explains the relationship between the two variables." RUBINFELD, supra, at 310.

3. Dr. Rausser's regressions are workable and susceptible to proof at trial through common evidence. As discussed, Dr. Rausser explains that he developed two multiple regression models, a common factor model and a damage model, that together reveal that injury-in-fact can be established **[**217]** at trial with evidence common to the class. See, e.g., 2d Rausser Report at 91-92, 99-100; see also Oct. 6 Tr. at 137. As Dr. Rausser describes it, his common factor model performs "an investigation of whether . . . common transaction characteristics predominate over individual factors in determining the variation in freight rates." 2d Rausser Report at 84. Dr. Rausser analyzed defendants' transaction data and concluded that there are seven common factors that predominately explain rail price variations, and that these factors can be controlled for in a regression. See 1st Rausser Report at 92. In other words, according to Dr. Rausser, his common factor model explains pricing in the rail freight industry and shows, relying only on defendants' transaction data, that rail freight pricing is "highly standardized." Id. at 84.

According to Dr. Rausser, the seven factors that predominately explain rail price variations are: (1) weight of the shipment; (2) distance; (3) whether the shipment is interline; (4) the origin and destination; (5) the commodity being transported; (6) the rail car type; and (7) the quarter of departure. See 1st Rausser Report at 92. Dr. Rausser concludes that these **[**218]** seven factors are highly predictive of freight rates: he says that these factors explain "over 75% of the variation in actual per car revenues for individual shipments." 2d Rausser Report at 66-67. Because, according to Dr. Rausser, the seven common factors predominate over individual factors in determining rail freight price, the seven common factors can be used in a common analysis of impact. See 2d Rausser Report at

67; see also 1st Rausser Report at 7 (stating that "common factors can be measured using the Defendants' transaction data and used in a common analysis to identify and quantify the harm experienced by the Class").

Dr. Rausser's damage model builds on the common factor model to show, again relying on defendants' transaction data, that the alleged conspiracy injured class members by inflating freight prices and to quantify the amount of damages. See 2d Rausser Report at 91-92. Dr. Rausser says that the damage model works by taking into account the factors that influenced defendants' prices during the class period as compared to "benchmark" prices during the three preceding years. 1st Rausser Report at 113. Dr. Rausser says that his regression analyses — applied now to 100 **[**219]** percent of defendants' transaction data, see 2d Rausser Report at 12 — find "that all-in freight rates were higher during the Class Period than could be explained by economic forces other than the alleged price-fixing conspiracy" and reveal "a structural break in the relationship between fuel prices and freight rates starting in 2003, consistent with the **[*67]** advent of a price-fixing conspiracy using Fuel Surcharges as its facilitating mechanism." Id. at 82-83; see 1st Rausser Report at 120. Dr. Rausser's damage model calculates a class-wide overcharge of 13.4 percent. See 2d Rausser Report at 83; 1st Rausser Report at 119-20.

Defendants and Dr. Willig argue that Dr. Rausser's economic regressions suffer from fatal flaws, and that neither his common factor model nor his damage model satisfies plaintiffs' burden of showing that injury-in-fact is capable of proof at trial with common evidence. See Class Opp. at 63. As for the common factor model, defendants contend that it has four flaws. See id. at 63-65. First, defendants contend that Dr. Rausser "only studied traffic destined for three geographic areas out of the thousands served by Defendants and only for a single year — 2006." Id. at 63. **[**220]** The three destinations that he chose, according to defendants, are not representative samples. Id. Second, defendants argue that although Dr. Rausser's model shows that certain characteristics "play an important role in overall rail rates," it "says nothing about whether the conspiracy caused all class members to pay a fuel surcharge they otherwise would not have paid or how that fuel surcharge compared to whatever cost recovery mechanism would have been used instead." Id. at 64. Third, defendants argue that Dr. Rausser's model "purports to explain 76-89% of the variation in overall rates," but provides "no scientific basis to dismiss the 11-24% in unexplained price variation as unimportant." Id. Fourth, defendants argue that Dr. Rausser's model "looks only at a snapshot in time — 2006 — and thus cannot examine changes in rates over time." Id. at 65. Thus, as defendants see it, Dr. Rausser's common factor model "tells the [C]ourt nothing about what factors would have an effect on rates over time[.]" Id.

Next, addressing Dr. Rausser's damage model, defendants argue that it is "not a model of injury causation," and that Dr. Rausser purportedly has not claimed otherwise. Class Opp. at 65 **[**221]** (citing 1st Rausser Dep. at 142-43). And even if it were a model of injury causation, defendants argue that it suffers the same underlying flaw as his common factor model. As defendants see it, his damage model "cannot show whether a shipper paid a fuel surcharge *because* of the conspiracy or would have paid one anyway. The model simply assumes causation and then attempts to quantify the damages." Id.

Finally, defendants argue that Dr. Rausser's analysis fails to specify a but-for world. See Class Opp. at 67. According to defendants, absent a clearly identified but-for world, "there is no basis to say whether prices would have been lower across-the-board." Id. Defendants contend:

> Given the unprecedented increase in fuel costs, which even Dr. Rausser concedes would have led to increased prices, the logical question is what price strategy supposedly would have been used in lieu of the rate-based fuel surcharges. In contrast to a simple reduction in price in the typical price-fixing case, alternative fuel pricing strategies affect class members in very different ways and the Court simply cannot assume — as Plaintiffs would like it to — that a mechanism that might have been chosen but for **[**222]** the conspiracy would always yield a lower fuel surcharge. Rather, Plaintiffs must posit an alternative and demonstrate that it would yield a lower charge for all (or nearly all) members of the class.

Class Opp. at 67-68. Defendants say that plaintiffs have not identified a but-for fuel pricing strategy, and Dr. Rausser's regressions fail to measure any specific but-fur fuel cost recovery mechanism. Id.

The Court disagrees with defendants and concludes that Dr. Rausser has presented a theory of proof that is plausible and economic regression analyses that are workable. The Court finds by a preponderance of the evidence that Dr. Rausser's theory and regression analyses are susceptible to proof at trial through evidence common to the class. See *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 325*; see also *In re EPDM Antitrust Litig., 256 F.R.D. at 96*. The Court addresses each of defendants' arguments in turn:

First, the Court is not persuaded by defendants' argument that Dr. Rausser's common factor model relies on unrepresentative destinations. **[*68]** The point of the common factor regression is to demonstrate that certain factors predominately explain rail price variations. See 1st Rausser **[**223]** Report at 92; 2d Rausser Report at 85. As defendants acknowledge, Dr. Rausser's model "[o]f course" shows that "a shipment's physical characteristics, such as its weight, car type and commodity, play an important role in overall rail rates." Class Opp. at 64. Defendants do not assert that, had Dr. Rausser chosen other destinations, he would have reached a different conclusion that seven common factors predominately explain freight rates. The Court concludes that defendants have failed to undermine plaintiffs' showing that the seven factors identified and controlled for in Dr. Rausser's analysis are the determinative factors of rail freight pricing.

Second, defendants criticize Dr. Rausser's common factor model for purportedly failing to say anything about whether the conspiracy caused all class members to pay a fuel surcharge they otherwise would not have paid or how that fuel surcharge compared to whatever cost recovery mechanism would have been used instead. Class Opp. at 64. The Court finds that criticism misplaced. Dr. Rausser's common factor and damage models together set forth persuasive, workable multivariate regressions that give rise to an inference of causation (the most any **[**224]** regression analysis can be expected to do) — that is, that putative class members paid more for rail freight transportation services than they would have absent the conspiracy on fuel surcharges. Dr. Rausser has examined the entire universe of defendants' transaction data from 2000 to 2008. As plaintiffs point out, that data consist of "more than 200 million unregulated shipments nationwide over an eight-year period." Pls. Wal-Mart Brief at 15. Dr. Rausser's regression analyses revealed that seven common factors predominate over individual factors in determining rail freight prices, and that these common factors permit a common analysis of defendants' transaction data that can measure injury-in-fact suffered by the class.

Third, defendants criticize Dr. Rausser's common factor model for failing to "explain all of the variation in rail rates." Oct. 7 Tr. at 265; see also Class Opp. at 64. As defendants' counsel stated at oral argument, "there's quite a bit of variation that's unexplained by [Dr. Rausser's] common factors model." Oct. 7 Tr. at 265. But Dr. Rausser's model explains "over 75% of the variation in actual per car revenues for individual shipments." 2d Rausser Report at 66. **[**225]** His damage model, which builds on the common factor model, explains "84% of the variation in all-in rates." Id. at 67. The Court agrees with plaintiffs that both of Dr. Rausser's regression models provide high levels of explanatory power, and that there is no basis for demanding, as defendants appear to do, 100 percent explanatory power. See Pls. Wal-Mart Reply Brief at 10; 2d Rausser Report at 67 ("In no industry is it possible to explain 100% of the variation in prices."); see also *In re TFT-LCD (Flat Panel) Antitrust Litig., 267 F.R.D. at 601* (concluding that plaintiffs put forth feasible regression methodology that, among other things, found that 77 percent of price variation was determined by five variables); see *id. at 604* (plaintiffs "need not demonstrate that their multiple regression analysis captures all the proper variables and thus reaches the 'right' answer, as the defendants would require"). Furthermore, Dr. Rausser persuasively explains that the important question for the Court is

> whether the remaining unexplained variation is both systematic and related to the conspiracy. Unless this is true, the residual (random) unexplained price component is irrelevant for class certification **[**226]** purposes, given that it would have been present even in the but-for world. In evaluating this question, economic logic plays an important role, identifying factors that would be likely to influence price and therefore should be included in the model.

2d Rausser Report at 68. The Court agrees that Dr. Rausser's common factor and damage models together plausibly include the logical determinants of freight rates, and neither defendants nor Dr. Willig credibly have identified any missing variables.

Fourth, regarding defendants' claim that Dr. Rausser's common factor model is merely a snapshot in time that does not explain rail rates over time, the Court disagrees that **[*69]** this is a valid basis on which to discredit Dr.

Rausser's model. Dr. Rausser examined rail rates over a 12-month period, and defendants have not asserted that this time period was not representative of the years of the alleged conspiracy period, was somehow aberrational or unreliable, or that Dr. Rausser would have reached any other conclusion had he chosen different years within the period or examined all years.

Fifth, defendants criticize Dr. Rausser's damage model, arguing that it is not a model of injury causation, as Dr. **[**227]** Rausser purportedly admitted during his deposition. Class Opp. at 65 (citing 1st Rausser Dep. at 142-43). But what Dr. Rausser explained in his deposition was that his common factor model was a "maintained hypothesis," 2d Rausser Dep. at 143, in his damage model — which he then uses to explore what effect, if any, can be attributed to the alleged conspiracy, and what portion of the prices paid by shippers can be attributed to the conspiracy. See id. As Dr. Rausser explains in his reply report, neither his common factor model nor his damage model in isolation attempts to prove common injury-in-fact. Rather, the result of the damage model "must be viewed as the final step in the body of evidence . . . presented" to show that injury-in-fact is capable of common proof. 2d Rausser Report at 92.

Sixth, defendants argue that Dr. Rausser's damage model cannot show whether a shipper paid a fuel surcharge because of the conspiracy — it simply assumes causation. The Court disagrees. As discussed, see supra at 127-28, Dr. Rausser's common factor model and damage model work in conjunction. Together, these two models set forth a persuasive inference of causation: certain common factors predominate **[**228]** in the determination of freight rates; controlling for those common factors, analysis of defendants' transaction data reveals that there was a structural break in the relationship between freight rates and fuel prices around 2003, "which is consistent with a conspiracy using Fuel Surcharges to raise freight rates[.]" 2d Rausser Report at 92.

Finally, defendants argue that Dr. Rausser has not clearly identified a but-for world or a but-for fuel pricing strategy, and he therefore has no basis to say whether prices would have been lower across-the-board. Class Opp. at 68. Defendants contend that there is some suggestion in plaintiffs' complaint that, at one point, plaintiffs may have thought that defendants should have used a mileage-based fuel surcharge, but that plaintiffs have not pursued that theory. See id. Defendants contend that the reason for that is simple: "Dr. Willig examined whether shippers would have been better off with mileage-based fuel surcharges and found that a substantial percentage of shippers would have paid *more* under a mileage-based surcharge." Id. (emphasis in original) (citing Willig Report ¶ 282). According to defendants, "[a]bsent a clearly identified but-for **[**229]** world, there is no basis to say whether prices would have been lower across-the-board." Class Opp. at 67.

Plaintiffs, however, do not need to prove at the class certification stage that prices would have been lower across-the-board. Plaintiffs' burden, rather, is to demonstrate that injury-in-fact is capable of common proof at trial. See *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311-12*. And as to Dr. Rausser's regression analyses,

> "[t]he real question . . . is whether the plaintiffs have established a workable multiple regression equation, *not whether plaintiffs' model actually works*, because the issue at class certification is not which expert is the most credible, or the most accurate modeler, but rather [whether] the plaintiffs [have] demonstrated that there is a way to prove a class-wide [injury-in-fact] through generalized proof."

In re Amaranth Natural Gas Commodities Litig., 269 F.R.D. at 383 (quoting *In re EPDM Antitrust Litig., 256 F.R.D. at 100*) (emphasis in original); see *In re TFT-LCD (Flat Panel) Antitrust Litig., 267 F.R.D. at 604*; *In re Ready-Mixed Concrete Antitrust Litig., 261 F.R.D. at 170-71*. The Court concludes that Dr. Rausser's regression analyses are **[**230]** workable. Dr. Rausser has presented a plausible theory of injury-in-fact that is susceptible to proof at trial through available evidence common to the class. See *Behrend v. Comcast Corp., 655 F.3d at 198*; *In re **[*70]** Hydrogen Peroxide Antitrust Litig., 552 F.3d at 325*.

As Dr. Rausser describes it:

> [A]bsent the conspiracy, fuel cost recovery would have been but one component of a total price kept lower by price competition between the railroads . . . . The "but-for" world analyzed in my Initial Report is simply characterized by railroads competing with each other over *total price* (base rates plus Fuel Surcharges) as they

> did in the pre-Class period. A combination of different fuel recovery programs might be used, or none at all. This is what the world looked like prior to mid-2003 . . . , and this period serves as a reliable benchmark with which to quantify damages.

2d Rausser Report at 47 (emphasis in original). As for Dr. Willig's analysis that shippers would have been better off with mileage-based fuel surcharges, he essentially is submitting a *competing* view of the but-for world based on an analysis of defendants' transaction data, which is not an appropriate inquiry for the Court at the **[**231]** class certification stage. See, e.g., *In re Currency Conversion Fee Antitrust Litig., 264 F.R.D. at 115* ("[W]hen both experts rely on evidence common to the class, this Court should not resolve which 'but for' price is correct."); *In re EPDM Antitrust Litig., 256 F.R.D. at 90*; *Hnot v. Willis Group Holdings Ltd., 241 F.R.D. at 209-10*; see also *In re TFT-LCD (Flat Panel) Antitrust Litig., MDL No. 1827, 2012 U.S. Dist. LEXIS 9449, 2012 WL 253298, at *4 (N.D. Cal. Jan. 26, 2012)* ("Defendants have not challenged the reasonableness of plaintiffs' methodology for proving classwide impact. Instead, their arguments concern the application of that methodology. Such analysis, however, goes beyond the inquiry at the class certification stage.") (citing *In re Graphics Processing Units Antitrust Litig., 253 F.R.D. 478, 490 (N.D. Cal. 2008))*. [24]

Ultimately, in evaluating Dr. Rausser's regressions and Dr. Willig's criticisms, the Court must determine whether Dr. Rausser's theory of proof is plausible and whether his regression models are workable. The Court concludes that they are: Dr. Rausser has established "the key logical steps behind [his] **[**233]** theory" that injury-in-fact is capable of proof at trial with common evidence. *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d at 26*. Relying on principles common to the class and an analysis of 100 percent of defendants' transaction data, Dr. Rausser has presented a workable regression analysis that is susceptible to proof at trial through available evidence common to the class. See *Behrend v. Comcast Corp., 655 F.3d at 198*; *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 325*.

* * * *

HN48[↑] The burden for plaintiffs at the class certification stage is to show by a preponderance of the evidence "that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual to its members." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311-12*. Plaintiffs have satisfied that burden. The Court has examined all the relevant evidence and arguments including all relevant expert opinion, see *id. at 315 n. 13*, and finds by a preponderance of the evidence that plaintiffs have shown that impact is capable of proof at trial through common evidence.

[*71] 3. Damages

HN49[↑] The third element that plaintiffs will have to prove at trial **[**234]** is "measurable damages." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311*; *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 307*. The element of damages is distinct from impact: impact asks "*whether* the plaintiffs were harmed," whereas damages "quantify *by how much.*" *In re EPDM Antitrust Litig., 256 F.R.D. at 88* (emphasis in original). "The inquiry

---

[24] Both sides and their experts reference and rely on a 2009 study that was conducted by Laurits R. Christensen Associates, Inc. and commissioned by the STB to analyze competition, capacity, and service quality in the rail freight industry. See, e.g., Oct. 6 Tr. at 140-41; Oct. 7 Tr. at 272-73; see generally HD Ex. 12, LAURITS R. CHRISTENSEN ASSOCIATES, INC., VOLUME 2, ANALYSIS OF COMPETITION, **[**232]** CAPACITY, AND SERVICE QUALITY (Nov. 2009) (hereinafter, "Christensen Report"). Plaintiffs say that the Christensen Report supports Dr. Rausser's conclusion that there was a structural break in the relationship between fuel costs and rail freight prices that was consistent with the start of the alleged conspiracy. See Oct. 6 Tr. at 140-41; see also Christensen Report at 9-16-9-17. Defendants say, among other things, that the Christensen Report "does quite the opposite." Oct. 7 Tr. at 272. Defendants do not dispute, however, that the Christensen Report relies on evidence common to the class and itself constitutes such common evidence. Thus, if anything, the Christensen Report supports plaintiffs view that injury-in-fact is *capable* of common proof at trial. The question of which party's characterization of that report is correct is a matter to be resolved by the finder of fact at trial.

for a district court at the class certification stage is whether the plaintiffs have demonstrated by a preponderance of the evidence that they will be able to measure damages on a class-wide basis using common proof." *Behrend v. Comcast Corp., 655 F.3d at 204*.

"Some variation of damages among class members does not defeat class certification." *Behrend v. Comcast Corp., 655 F.3d at 204*; see 7AA FEDERAL PRACTICE & PROCEDURE, supra, § 1781 ("[I]t uniformly has been held that differences among the members as to the amount of damages incurred does not mean that a class action would be inappropriate."). Moreover, as the Seventh Circuit recently stated: "It is well established that the presence of individualized questions regarding damages does not prevent certification under *Rule 23(b)(3)*." *Messner v. Northshore Univ. HealthSystem, 669 F.3d at 815*; **[**235]** see *Arreola v. Godinez, 546 F.3d 788, 801 (7th Cir. 2008)* ("Although the extent of each class member's personal damages might vary, district judges can devise solutions to address that problem if there are substantial common issues that outweigh the single variable of damages amounts. . . . [T]he need for individual damages determinations does not, in and of itself, require denial of [a] motion for certification.") (internal citations omitted); *Allapattah Servs., Inc. v. Exxon Corp., 333 F.3d 1248, 1261 (11th Cir. 2003)* ("[N]umerous courts have recognized that the presence of individualized damages issues does not prevent a finding that common issues in the case predominate."); *Hardy v. City Optical Inc., 39 F.3d 765, 771 (7th Cir. 1994)* (recognizing that "[t]here have been many antitrust class actions in which the relief sought was damages, and the fact that the damages would generally be different for each member of the class was not deemed an insurperable obstacle"); see also *Kottaras v. Whole Foods Mkt., Inc., 2012 U.S. Dist. LEXIS 10885, 2012 WL 259862, at *7*. To be sure, however, "[c]omplex and individualized questions of damages . . . weigh against finding predominance." *Behrend v. Comcast Corp., 655 F.3d at 204*.

Plaintiffs **[**236]** rely on Dr. Rausser to show that analysis common to the class can be used to calculate and apportion class-wide damages among class members. See Class Mem. at 75. As plaintiffs describe it, Dr. Rausser has observed that "it is entirely feasible to perform the estimation of the percentage overcharge across the entire class for each regression specification described in his report, yielding a calculation of overcharge for the entire class." Id.

According to Dr. Rausser, his analysis reveals that "a professionally accepted regression based methodology using the Defendants' transaction data . . . does in fact work" in assessing class-wide damages. 1st Rausser Report at 113. As Dr. Rausser explains, he "developed such a regression model" — that is, his damage model — "to test whether the prices during the Class Period are significantly different than prices generated from an appropriate 'benchmark' period, after adjusting for differences in all relevant economic forces." Id.

Dr. Rausser has calculated class-wide damages using his damage model employing the conspiracy and pre-conspiracy transaction data:

> The percentage overcharge due to the alleged conspiracy can be calculated using the regression **[**237]** model to compare freight rates in the Class Period to those in the pre-Class Period, while using the Defendants' transaction data and publicly available data to account for the other predominating common economic forces that determine prices. The transaction data can be used to account for the effect of shipment specific characteristics, such as weight, distance, route, car type, commodity type, and so on. . . . The regression model can be used to "back out" the effect **[*72]** of these factors to isolate the effect of the alleged conspiracy on freight rates.

1st Rausser Report at 114. He further adds that "to calculate each individual customer's damages[,] the relationship between price drivers and freight rates calculated by the model run on the full range of data can be used to estimate the but-for price for each customer transaction." Id. at 122. Thus, the "difference between this but-for price and the actual price paid is the overcharge to that customer for that transaction." Id. at 122-23.

Defendants argue that "the complications of the individualized proof of damages here preclude class certification." Class Opp. at 72. As defendants describe it, in most price fixing cases, plaintiffs **[**238]** will propose to calculate a standard overcharge percentage, which then is applied to all class member purchases. See id. at 73. In that situation, defendants contend that an assessment of damages is not particularly complicated: "the only individualized task is to tally up a class member's purchases, which are then multiplied by the common overcharge percentage." Id.

Here, however, defendants argue that determining individualized damages requires evidence of, among other things:

> (1) the [individual] class member's actual fuel surcharge payments, (2) the but-for fuel cost recovery that would have applied to that class member in light of its specific competitive situation, including both the timing of when that fuel surcharge would have been added and its terms, and (3) other adjustments to the base rate or non-rate elements of the contract that were made as part of the negotiations to add the fuel surcharge.

Class Opp. at 73. According to defendants, "[t]hese are all individualized determinations," and Dr. Rausser's damage model "does not account for any of these elements and therefore cannot be used to estimate an individual class member's damages." Id. Thus, defendants contend that class **[**239]** certification must be denied. See id. at 73-74 (citing *Piggly Wiggly Clarksville, Inc. v. Interstate Brands Corp., 215 F.R.D. 523, 530-31 (E.D. Tex. 2003))*; see also Willig Report at 137-51.

The Court disagrees with defendants and finds that plaintiffs have satisfied their burden of showing by a preponderance of the evidence that "they will be able to measure damages on a class-wide basis using common proof." *Behrend v. Comcast Corp., 655 F.3d at 204*. Dr. Rausser has developed a workable regression model that uses defendants' transaction data to calculate damages to the class and to each class member. In his original report, Dr. Rausser applied his regression methodology on a dataset that included about 25 percent of each defendants' total unregulated freight traffic over the period 2000 to 2008. See Class Reply at 37. As Dr. Rausser explains in his reply report, he now has run his regression model on the complete set of defendants' transaction data. See 2d Rausser Report at 96; see also Class Reply at 37. And, according to Dr. Rausser, "[t]he results on 100% of the relevant transactions confirm that a structural break in the relationship between fuel prices and freight rates occurred **[**240]** in 2003, and that this break increased freight rates above what they would have been absent the conspiracy. The estimated class-wide overcharge is 13.4%." 2d Rausser Report at 83. Furthermore, as Dr. Rausser explains, his damage model "does not assume that all shippers paid the same overcharge." 2d Rausser Report at 92. Rather, he explains that his damage model "can be used to calculate individual damages[.]" Id.

The Court rejects defendants' argument that Dr. Rausser's damage model cannot be applied on a class-wide basis to calculate damages because such damages vary on particular shipments. See Class Opp. at 65; Willig Report ¶ 273. Even if that were true, it would not preclude a finding of predominance. See *Messner v. Northshore Univ. HealthSystem, 669 F.3d at 815*; see *supra at 137-38*. And in any event, the Court agrees with Dr. Rausser that the reported variation among shipments is to be expected and does not prevent a common damage methodology from applying in this case. See 2d Rausser Report at 98 n.225.

[*73] The Court also rejects defendants' argument that Dr. Rausser's damage model "yields nonsensical results." Class Opp. at 66. As defendants describe it: "Dr. Rausser says injury **[**241]** to class members results from the payment of fuel surcharges, but the damages he calculates, which are expressed as percentage reductions in all-in-rates, vastly exceed the fuel surcharges actually assessed." Id.; see Willig Report ¶¶ 258-60. The Court agrees with plaintiffs that this criticism is misplaced. As Dr. Rausser persuasively explains:

> My damage methodology pertains to all-in rates, rather than merely the increase in Fuel Surcharge percentages, and estimates how much those all-in rates increased as a result of Defendants' conspiratorial conduct. As documented throughout the discovery record, the Fuel Surcharge is the facilitating mechanism used by Defendants to increase these all-in rates. The computed all-in overcharge which 1 have arrived at using 100% of the transaction data is 13.4%, a figure well below the *average* percentage Fuel Surcharge imposed during the Class Period.

2d Rausser Report at 96 (emphasis in original). To the extent that there are instances where calculated overcharges do exceed the fuel surcharges assessed, the Court credits Dr. Rausser's explanation that this reflects various factors, including, for example, instances of "double-dipping" — that is, when **[**242]** fuel surcharges were applied on top of base rates that themselves already have built-in fuel cost recovery mechanisms — and instances of rebasing. See id at 96.

As the Third Circuit recently stated: **HN50**[] "At the class certification stage we do not require that Plaintiffs tie each theory of antitrust impact to an exact calculation of damages, but instead [require] that they assure us that if they can prove impact, the resulting damages are capable of measurement and will not require labyrinthine individual calculations." *Behrend v. Comcast Corp., 655 F.3d at 206*. The Court is persuaded that Dr. Rausser's damage model satisfies this burden, and the Court finds by a preponderance of the evidence that plaintiffs "will be able to measure damages on a class-wide basis using common proof." *Id. at 204*.

B. Superiority

HN51[] The second requirement of *Rule 23(b)(3)* is superiority: a court must find "that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*; see *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 313*. This requirement "ensures that resolution by class action will 'achieve economies of time, effort, **[**243]** and expense, and promote . . . uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable consequences." *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 313* (quoting *Amchem Prods Inc. v. Windsor, 521 U.S. at 615*) (alteration in original).

HN52[] "When common questions are found to predominate, then courts also generally have ruled that the second prerequisite of *Rule 23(b)(3)* — that the class suit be superior to any other available means of settling the controversy — is satisfied in the context of an antitrust action." *In re Ready-Mixed Concrete Antitrust Litig., 261 F.R.D. at 173* (quotations omitted). In contrast, when individual issues predominate, a class action will be deemed inferior. See *McCarthy v. Kleindienst, 741 F.2d at 1415*; see also *Williams v. Glickman, Civil Action No. 95-1149, 1997 U.S. Dist. LEXIS 1683, 1997 WL 33772612, at *11 (D.D.C. Feb. 14, 1997)* ("The greater the number of individual issues, the less likely superiority can be established.").

Defendants contest the superiority requirement on the same grounds as they contest predominance: they say that a class action is inferior because individual issues predominate **[**244]** regarding injury and damages. See Class Opp. at 74-75. But as the Court has concluded, individual issues do not predominate, and so the Court finds that plaintiffs have satisfied the superiority requirement.

This case involves approximately 30,000 shippers, and plaintiffs have shown by a preponderance of the evidence that the elements of plaintiffs' Sherman Act claim are **[*74]** capable of proof at trial through evidence that is common to the class. Given the size, complexity, and expense of this case, the Court finds that class action treatment is superior to any other available methods for fairly and efficiently adjudicating plaintiffs' claim. See *Fed. R. Civ. P. 23(b)(3)*. The Court has considered plaintiffs' proposed trial plan, see Class Mot., Ex. B, Trial Plan at 1-10, as well as any possible difficulties in a trial on plaintiffs' Sherman Act claim. See Class Opp. at 77-78. The Court concludes that the resolution of this case by class action will "'achieve economies of time, effort, and expense, and promote . . . uniformity of decision as to persons similarly situated, without sacrificing fairness or bringing about other undesirable consequences." *Meijer, Inc. v. Warner Chilcott Holdings Co. III, 246 F.R.D. at 313* **[**245]** (quoting *Amchem Prods Inc. v. Windsor, 521 U.S. at 615*).

VI. CONCLUSION

For the foregoing reasons, the Court finds by a preponderance of the evidence (1) that plaintiffs have established each fact necessary to meet the requirements of *Rule 23 of the Federal Rules of Civil Procedure*; and (2) that plaintiffs have established that the elements of their Sherman Act claim are capable of proof at trial through evidence that is common to the class rather than individual to its members.

Therefore, the Court will grant the motion of the direct purchaser plaintiffs' for class certification [Dkt. No. 337]; will certify this case as a class action under *Rule 23(b)(3)* for purposes of litigation and trial; will define the class as proposed by the direct purchaser plaintiffs' in their motion for class certification; will certify for class treatment the direct purchaser plaintiffs' claim for price fixing in violation of Section 1 of the Sherman Act, *15 U.S.C. § 1*; will designate the eight named plaintiffs as the class representatives; and will appoint Quinn Emanuel Urquhart & Sullivan, LLP and Hausfled LLP as co-lead class counsel for the class. The Court will not rule at this time on the motion of the **[**246]** defendants to exclude interline-related communications from consideration for class certification or for any other purpose [Dkt. No. 417].

This Opinion temporarily has been issued under seal in its entirety in view of the possibility that the Court has referenced "Confidential" or "Highly Confidential — Attorneys' Eyes Only" material, as described in the Protective Order issued in this case. See Protective Order ¶¶ 1.3, 1.4, Jan. 29, 2009 (Facciola, Mag. J.) [Dkt. No. 195]. This Opinion, however, will not remain under seal. The Court will order the parties to meet and confer and file a joint report by July 10, 2012 showing cause why this Opinion should not be published in full without redactions on the public docket of this Court.

If either party believes that some passage(s) of the Court's Opinion should be redacted, they must specify in the joint report which passage(s) and must specifically state the cause for each redaction. In making any such request, the parties are reminded that the courts are not intended to be, nor should they be, secretive places for the resolution of secret disputes. See, e.g., *Nixon v. Warner Communs, Inc., 435 U.S. 589, 597, 98 S. Ct. 1306, 55 L. Ed. 2d 570 (1978)* ("It is clear that the **[**247]** courts of this country recognize a general right to inspect and copy public records and documents, including judicial records and documents.") (footnotes omitted); *Johnson v. Greater Se. Cmty. Hosp. Corp., 951 F.2d 1268, 1277, 293 U.S. App. D.C. 1 (D.C. Cir. 1991)* (noting that there is a "strong presumption in favor of public access to judicial proceedings"); *United States v. Hubbard, 650 F.2d 293, 317 n.89, 208 U.S. App. D.C. 399 (D.C. Cir. 1980)* (holding that the trial court's discretion to restrict access to court records should "clearly be informed by this country's strong tradition of access to judicial proceedings"). Accordingly, any redactions shall be made solely to the extent necessary to preserve the confidentiality of the relevant information in accordance with the terms of the Protective Order issued in this case. See Protective Order ¶¶ 1.3, 1.4.

An Order consistent with this Opinion shall issue this same day.

SO ORDERED.

/s/ PAUL L. FRIEDMAN

United States District Judge

Opinion by: VIRGINIA M. HERNANDEZ COVINGTON

Opinion

ORDER

This matter comes before the Court pursuant to Astellas's Motion to Strike Class Action Allegations from the First Amended Complaint, or Alternatively, for a Case Management **[*2]** Conference to Set a Schedule for Class Certification Briefing (Doc. # 90), which was filed on May 4, 2012. Lakeland Regional Medical Center filed a Response to the Motion to Strike (Doc. # 94) on May 21, 2012. Also before the Court is Lakeland Regional's Motion to Extend Time for Filing Class Certification Brief (Doc. # 95), filed on May 22, 2012. Astellas filed a Response to the Extension Motion on June 6, 2012, (Doc. # 98), and Lakeland Regional Filed a Reply Memorandum (Doc. # 109) on June 21, 2012, with leave of Court. For the reasons that follow, the Court grants the Extension Motion and denies the Motion to Strike as moot.

I. Factual and Procedural Background

Lakeland Regional, a "full-service hospital," is a not-for-profit Florida corporation with its headquarters in Lakeland, Florida. (Doc. # 11 at ¶ 7). Defendants Astellas US, LLC and Astellas Pharma US, Inc. (collectively, "Astellas") are Delaware corporations with headquarters in Deerfield, Illinois. Id. at ¶ 8. Astellas is the exclusive licensee of two patents involving the administration of adenosine to patients undergoing cardiac stress tests. Lakeland Regional alleges that Astellas has engaged in unlawful, anticompetitive, **[*3]** monopolistic, and exclusionary activity with respect to adenosine in violation of the Sherman Antitrust Act, *15 U.S.C. §§ 1* and *2*, the Clayton Antitrust Act, *15 U.S.C. § 14*, Florida ***antitrust law***, and Florida common law.

Lakeland Regional initiated this action against Astellas on September 13, 2010, and filed an amended, putative class action complaint on October 19, 2010. (Doc. ## 1, 11). Lakeland Regional's amended complaint arrays the following counts against Astellas: unlawful tying (count one), exclusive dealing (count two), attempted monopolize (count three), unreasonable restraint of trade (count four), attempted monopolization (count five), and tortious interference with a prospective economic advantage (count six). Astellas filed a Motion to Dismiss the Amended Complaint (Doc. # 16), which this Court denied. (Doc. # 66). The parties filed the Case Management Report (Doc. # 27) on December 17, 2010, and as this is a Track Three Case, the Court set a preliminary pretrial conference before the assigned Magistrate Judge. (Doc. # 31). Astellas filed a Motion for Phased Discovery (class discovery to be conducted before merits discovery)(Doc. # 28), which this Court denied, finding, **[*4]** "phased discovery will unnecessarily prolong this litigation and increase the expense involved for both sides [and] will lead to duplicative and delayed discovery." (Doc. # 40 at 5).

On February 24, 2011, the Magistrate Judge issued a Report and Recommendation (Doc. # 47) concerning the case management deadlines. On March 14, 2011, the Court issued its Case Management and Scheduling Order. (Doc. # 58). Neither the Report and Recommendation nor the Court's Case Management and Scheduling Order addressed the deadline for Plaintiff to file a motion for class certification. At this juncture, Astellas seeks an order striking from the amended complaint all class allegations, as Lakeland Regional failed to timely move for class certification under the Court's Local Rules. Lakeland Regional seeks an extension of time in which to move for class certification.

II. Analysis

Local Rule 4.04(b), M.D. Fla., provides that motions for class certification shall be filed within ninety days following the filing of the initial complaint, unless the time is extended by the Court for cause shown. Here, Lakeland Regional filed its initial complaint on September 13, 2010. Accordingly, under the Local Rules, Lakeland **[*5]** Regional's motion for class certification should have been filed by December 13, 2010.

However, it should be noted that both parties contemplated that Lakeland Regional's motion for class certification would be filed at a later time. For instance, the parties initially agreed in the Case Management Report that Lakeland Regional would file its motion for class certification by September 11, 2011. (Doc. # 27 at 11). Astellas also represents that it previously agreed to Lakeland Regional filing its motion for class certification by January 25, 2012, or May 10, 2012, and that Lakeland Regional "reneged" on those two proposed deadlines. (Doc. # 90 at 2).

Lakeland Regional requests the opportunity to file its motion for class certification by August 6, 2012. The Court determines that it is appropriate to grant a limited extension of time for Lakeland Regional to file the motion for class certification, but declines to allow Lakeland Regional until August 6, 2012. [1]

Lakeland Regional has demonstrated excusable neglect for missing the deadline set forth in the Local Rules. **[*6]** Although it would have been a far better choice for Lakeland Regional to seek an extension of time prior to the expiration of the deadline, the Court agrees with Lakeland Regional that, due to the complex nature of this case, a worthwhile motion for class certification could not have been filed within that initial ninety day period after Lakeland Regional filed its complaint. The Court also agrees with Lakeland Regional that the requirements of *Rule 23* cannot be satisfied with skeletal, perfunctory motions for class certification. As explained by Justice Scalia in *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. 2541, 2551-52, 180 L. Ed. 2d 374 (2011)*:

> *Rule 23* does not set forth a mere pleading standard. A party seeking class certification must affirmatively demonstrate his compliance with the Rule—that is, he must be prepared to prove that there are *in fact* sufficiently numerous parties, common questions of law and fact, etc.... [C]ertification is proper only if the trial court is satisfied, after a rigorous analysis, that the prerequisites of *Rule 23(a)* have been satisfied. . . . Frequently, that rigorous analysis will entail some overlap with the merits of the plaintiff's underlying claim.

Id. (internal citations **[*7]** and quotation marks omitted).

Balancing the equities and in consideration of the foregoing, the Court determines that it is appropriate to allow Lakeland Regional to file its motion for class certification by July 13, 2012. Astellas has until July 26, 2012, to respond to the motion for class certification. Lakeland Regional may file a reply, limited to ten pages, by August 3, 2012.

Accordingly, it is

ORDERED, ADJUDGED, and **DECREED**:

(1) Lakeland Regional's Motion to Extend Time for Filing Class Certification Brief (Doc. # 95) is **GRANTED** consistent with the foregoing.

(2) Astellas's Motion to Strike Class Action Allegations from the First Amended Complaint, or Alternatively, for a Case Management Conference to Set a Schedule for Class Certification Briefing (Doc. # 90) is **DENIED AS MOOT.**

DONE and **ORDERED** in Chambers in Tampa, Florida, this 26th day of June, 2012.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Arbitration Clauses

Civil Procedure > ... > Arbitration > Federal Arbitration Act > General Overview

HN1[] **Contract Conditions & Provisions, Arbitration Clauses**

The Federal Arbitration Act, *9 U.S.C.S. § 1 et seq.*, is an expression of a strong federal policy favoring arbitration as an alternative means of dispute resolution. Whether parties have agreed to submit a particular dispute to arbitration is typically an issue for judicial determination. When deciding whether the parties agreed to arbitrate a certain matter courts generally should apply ordinary principles that govern the formation of contracts.

Civil Procedure > ... > Alternative Dispute Resolution > Arbitration > General Overview

HN2[] **Alternative Dispute Resolution, Arbitration**

Arbitration has been recognized as an effective vehicle for vindicating statutory rights, but only so long as the prospective litigant effectively may vindicate its statutory cause of action in the arbitral forum.

Antitrust & Trade Law > General Overview

Contracts Law > Contract Conditions & Provisions > Waivers > General Overview

Contracts Law > Defenses > Public Policy Violations

HN3[] **Antitrust & Trade Law**

An agreement which in practice acts as a waiver of future liability under the federal antitrust statutes is void as a matter of public policy.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Arbitration Clauses

Civil Procedure > Special Proceedings > Class Actions > General Overview

Contracts Law > Contract Conditions & Provisions > Waivers > General Overview

Evidence > Burdens of Proof > Allocation

Contracts Law > Defenses > Public Policy Violations

HN4[] **Contract Conditions & Provisions, Arbitration Clauses**

In cases in which a large number of individuals have suffered an alleged wrong but the individual prospective damages awards are small, class action lawsuits may be the only economically rational alternative. Accordingly, plaintiffs may successfully invalidate an arbitration agreement that contains a class action waiver on the grounds that the agreement would prevent them from effectively vindicating their federal statutory rights. The party seeking to invalidate the agreement bears the burden of showing the likelihood of incurring prohibitive costs. Furthermore, each waiver must be considered on its own merits, based on its own record, and governed with a healthy regard for the fact that the Federal Arbitration Act, *9 U.S.C.S. § 1 et seq.*, is a congressional declaration of a liberal federal policy favoring arbitration agreements.

Opinion

OPINION & ORDER

DENISE COTE, District Judge:

Plaintiffs in this class action bring claims for violation of Section 1 of the Sherman Antitrust Act, *15 U.S.C. § 1* (the "Sherman Act"); violation of California's Cartwright Act, *California Business and Professions Code §§ 16720, et seq*.; violation of state antitrust and restraint of trade laws and consumer protection statutes; and unjust enrichment. The defendant Penguin Group (USA), Inc. ("Penguin") has moved to stay the proceedings and compel arbitration. For the following reasons, the motion to stay the proceedings and **[*2]** compel arbitration of the Sherman Act claim is denied.

BACKGROUND

A comprehensive description of the facts in this matter are recounted in the Court's Opinion and Order of May 15, 2012, *In re Elec. Books Antitrust Litig., 11 MD 2293 (DLC), 859 F. Supp. 2d 671, 2012 U.S. Dist. LEXIS 68058, 2012 WL 1946759 (S.D.N.Y. May 15, 2012)*, familiarity with which is presumed. Only those facts relevant to the disposition of this motion are recounted below. These facts are undisputed unless otherwise noted.

The plaintiffs are purchasers of electronic books or "eBooks." They bring this action on behalf of themselves and others who claim that they paid higher prices for their eBooks as a direct and foreseeable result of defendants' allegedly unlawful conduct. Penguin is one of the six largest publishing companies in the United States. The plaintiffs allege that Penguin and its co-defendants conspired from the Fall of 2009 until April 2010 to fix and raise eBooks prices through, inter alia, adopting the "agency" sales model for eBooks, and that this conspiracy in fact resulted in higher eBooks prices.

Penguin seeks to stay the proceedings and compel arbitration as to a subset of the putative class -- specifically, those plaintiffs who purchased their **[*3]** eBooks through the vendors Amazon.com ("Amazon") and Barnes & Noble. Penguin claims that the plaintiffs who purchased their eBooks through these vendors expressly agreed to arbitrate any disputes related to their purchases of eBooks, and are equitably stopped from denying that their claims against Penguin are subject to arbitration. Penguin does not seek to compel arbitration as to those plaintiffs who purchased their eBooks through other vendors besides Amazon and Barnes & Noble, such as defendant Apple, Inc. ("Apple").

The Terms of Use for the Amazon Kindle and for Barnes & Noble include mandatory arbitration clauses. The Amazon Kindle Terms of Use read in pertinent part:

> Disputes. Any dispute or claim relating in any way to your use of the Kindle, Reading Applications or Kindle Store, or the goods or services sold or distributed by Amazon or through the Kindle, Reading Applications or Kindle Store, will be resolved by binding arbitration, rather than in court, except that you may assert claims in small claims court if your claims qualify. The Federal Arbitration Act and federal arbitration law apply to this agreement.
>
> ***
>
> The arbitration will be conducted by the American Arbitration **[*4]** Association (AAA) under its rules, including the AAA's Supplementary Procedures for Consumer-Related Disputes. *** Payment of all filing, administration and arbitrator fees will be governed by the AAA's rules. We will reimburse those fees for claims totaling less than $10,000 unless the arbitrator determines the claims are frivolous.
>
> ***
>
> You and Amazon each agree that any dispute resolution proceedings will be conducted only on an individual basis and not in a class, consolidated or representative action. If for any reason a claim proceeds in court rather than in arbitration you and Amazon each waive any right to a jury trial.

(Emphasis supplied.) The Barnes & Noble Terms of Use provide:

> XVIII. DISPUTE RESOLUTION
>
> Any claim or controversy at law or equity that arises out of the Terms of Use, the Barnes & Noble.com Site or any Barnes & Noble.com Service (each a "Claim"), shall be resolved through binding arbitration conducted by telephone, online or based solely upon written submissions where no in-person appearance is required. In

> such cases, the arbitration shall be administered by the American Arbitration Association under its Commercial Arbitration Rules (including without limitation **[*5]** the Supplementary Procedures for Consumer-Related Disputes, if applicable), and judgment on the award rendered by the arbitrator(s) may be entered in any court having jurisdiction thereof.
> Alternatively, at Barnes & Noble.com's sole option, a Claim (including Claims for injunctive or other equitable relief) may be adjudicated by a court of competent jurisdiction located in New York County, New York.
>
> Any Claim shall be arbitrated or litigated, as the case may be, on an individual basis and shall not be consolidated with any Claim of any other party whether through class action proceedings, class arbitration proceedings or otherwise.

(Emphasis supplied.) The Amazon and Barnes & Noble Terms of Use in effect in early 2010, when Penguin adopted the agency model, included similar arbitration clauses. Both sets of arbitration agreements contain waivers of plaintiffs' right to pursue their claims through a class action.

Penguin filed its motion to stay proceedings and compel arbitration on March 2, 2012. The motion became fully submitted on April 13.

DISCUSSION

HN1[] The Federal Arbitration Act, *9 U.S.C. § 1 et seq.* ("FAA"), is "an expression of a strong federal policy favoring arbitration as an alternative **[*6]** means of dispute resolution." *Ragone v. Atl. Video at Manhattan Ctr., 595 F.3d 115, 121 (2d Cir. 2010)* (citation omitted). "[W]hether parties have agreed to submit a particular dispute to arbitration is typically an issue for judicial determination." *Granite Rock Co. v. Int'l B'hood of Teamsters, 561 U.S. 287, 130 S.Ct. 2847, 2855, 177 L. Ed. 2d 567 (2010)* (citation omitted). "When deciding whether the parties agreed to arbitrate a certain matter courts generally should apply ordinary principles that govern the formation of contracts." *Id. at 2856* (citation omitted).

HN2[] Arbitration has been recognized as an effective vehicle for vindicating statutory rights, but only "so long as the prospective litigant effectively may vindicate its statutory cause of action in the arbitral forum. . . ." *Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 637, 105 S. Ct. 3346, 87 L. Ed. 2d 444 (1985)*. ***HN3***[] "[A]n agreement which in practice acts as a waiver of future liability under the federal antitrust statutes is void as a matter of public policy." *In re American Exp. Merchants' Litig., 667 F.3d 204, 214 (2d Cir. 2012)* ("Amex III") (citation omitted).

HN4[] In cases in which a large number of individuals have suffered an alleged wrong but the individual prospective **[*7]** damages awards are small, class action lawsuits may be the "the only economically rational alternative." Id. Accordingly, plaintiffs may successfully invalidate an arbitration agreement that contains a class action waiver on the grounds that the agreement would prevent them from "effectively vindicating" their federal statutory rights. *Id. at 216* (citation omitted). The party seeking to invalidate the agreement "bears the burden of showing the likelihood of incurring [prohibitive] costs." *Green Tree Fin. Corp.-Alabama v. Randolph, 531 U.S. 79, 92, 121 S. Ct. 513, 148 L. Ed. 2d 373 (2000)*. Furthermore, "each waiver must be considered on its own merits, based on its own record, and governed with a healthy regard for the fact that the FAA is a congressional declaration of a liberal federal policy favoring arbitration agreements." *Amex III, 667 F.3d at 219* (citation omitted).

Here, even if the Amazon and Barnes & Noble arbitration agreements are otherwise enforceable in this action, they are invalid as to plaintiffs' Sherman Act claims because the plaintiffs have established that the agreements would prevent them from effectively vindicating their rights under the Sherman Act. This case falls squarely within the ambit of **[*8]** the Second Circuit's recent opinion in *Amex III*. In Amex III, the Second Circuit invalidated an arbitration agreement that contained a class action waiver on the grounds that the costs of pursuing the action through an individual arbitration, when compared with the size of the damages at issue, rendered arbitration prohibitively expensive. The plaintiffs in Amex III submitted detailed affidavits demonstrating that they faced costs "in the middle of the range" of $300,000 to $2 million, and a median recovery of only $5,252 in trebled damages. *In re Am. Express Merchants' Litig., 554 F.3d 300, 316 (2d Cir. 2009)* ("Amex I").

In this case, the plaintiffs have presented similarly detailed affidavits demonstrating that, given the complexities of proving this particular antitrust violation, plaintiffs can expect at most a median recovery of $540 in treble damages, and face several hundred thousand dollars to millions of dollars in expert expenses alone. Plaintiffs have also demonstrated that they are likely to incur significant expenses in securing, organizing, and maintaining documents, deposing witnesses, and in attorneys' fees, and that they face no guarantee of recovering any or all of **[*9]** these expenses. Plaintiffs have already expended $45,000 in expert expenses evaluating the claims and drafting the complaint. Plaintiffs' affidavits demonstrate that it would be economically irrational for any plaintiff to pursue his or her claims through an individual arbitration. Penguin has presented no serious argument to the contrary.

Penguin argues that the plaintiffs might pool resources and share the cost of expert fees. In Amex I, the Second Circuit described a similar proposition as "intriguing," but rejected it on the grounds that the plaintiffs in that action were not permitted to share information presented in any individual arbitration pursuant to a confidentiality provision in the relevant arbitration agreement. See *id. at 318*. Penguin notes that the Amazon and Barnes & Noble arbitration agreements contain no such confidentiality provisions.

This argument blinkers reality. The size of the prospective class in this case is enormous. Even if plaintiffs could share experts, these experts would still need to testify at each of potentially thousands or more individual arbitrations and be paid accordingly. Moreover, even if Penguin's suggestion were practically feasible -- which **[*10]** it is not -- the Second Circuit noted in Amex I that "plaintiffs must include the risk of losing, and thereby not recovering any fees" when evaluating prospective costs. Id. Penguin has not demonstrated how plaintiffs could rationally account for this risk of losing and still go forward with individual arbitrations that will net them, at most, an average of $540.

Penguin questions plaintiffs' suggestion that some of their costs might be unrecoverable because Penguin would oppose reimbursement. Penguin notes that federal ***antitrust law*** mandates recovery of "the cost of suit" by prevailing claimants, *15 U.S.C. § 15(a)*, and there is "no reason to assume at the outset that arbitrators will not follow the law." *Shearson/am. Express Inc. v. McMahon, 482 U.S. 220, 232, 107 S. Ct. 2332, 96 L. Ed. 2d 185 (1987)*. Declining to assume that arbitrators will fail to follow the law is not the same as engaging in a pragmatic accounting of the likely costs and benefits of bringing an individual arbitration and the incumbent risks. Amex III recognizes that plaintiffs in the real world will do the latter, and decline to arbitrate their claims if the economics are sufficiently stacked against them. See *Amex III, 667 F.3d at 218*. As discussed **[*11]** above, the plaintiffs in this case have demonstrated, convincingly, that it would be economically irrational for them to pursue their claims through individual arbitrations.

Penguin notes that because Penguin has not sought to compel arbitration as to all the plaintiffs, class counsel will be going forward with their case regardless of the outcome of this motion. Penguin argues that the plaintiffs who are compelled to arbitrate may therefore obtain representation through class counsel. This argument is absurd. Penguin has not set forward any realistic argument as to how such an arrangement would possibly benefit class counsel when each individual plaintiff can anticipate such a small recovery through arbitration.

Penguin further argues that Amex III is wrongly decided. *Amex III* is Second Circuit precedent, and as Penguin acknowledges, this Court is obliged to give it controlling weight.

Penguin also seeks to compel arbitration as to plaintiffs' state law claims. The Court reserves judgment on this issue. In any event, even if Penguin could successfully compel this partial class of plaintiffs to arbitrate their state law claims, litigation of plaintiffs' federal claims would not be stayed. **[*12]** Penguin has not put forward any argument as to why a stay would be appropriate in these circumstances, and there is no reason to believe a stay would help avoid "piecemeal litigation" or avoid "duplication of discovery or issue resolution." *Admin. Comm. of The Time Warner, Inc. Benefit Plans v. Biscardi, 99 Civ. 12270 (DLC) , 2000 U.S. Dist. LEXIS 6238, 2000 WL 565210, at *2 (S.D.N.Y. May 8, 2000)*. For many of the reasons discus above, it is highly unlikely that any such arbitrations would actually occur in practice.

CONCLUSION

Penguin's March 5, 2012 motion to stay the proceedings and compel arbitration is denied as to plaintiffs' federal claims.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

International Law > Authority to Regulate > Anticompetitive Activities

HN1[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The criteria of the Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C.S. § 6a*, relate to the merits of a claim, and not to the subject-matter jurisdiction of the court. The United States Court of Appeals for the Seventh Circuit therefore overrules its earlier en banc decision in *United Phosphorus, Ltd. v. Angus Chem. Co., 322 F.3d 942 (7th Cir. 2003)*.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

HN2[] **Jurisdiction, Subject Matter Jurisdiction**

The United States Supreme Court has emphasized the need to draw a careful line between true jurisdictional limitations and other types of rules.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

HN3[] **Jurisdiction, Subject Matter Jurisdiction**

Subject-matter jurisdiction refers to a tribunal's power to hear a case.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

International Law > Authority to Regulate > Anticompetitive Activities

HN4[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C.S. § 6a*, sets forth an element of an antitrust claim, not a jurisdictional limit on the power of the federal courts.

International Law > Authority to Regulate > General Overview

HN5[] **International Law, Authority to Regulate**

Limitations on the extraterritorial reach of a statute describe what conduct the law purports to regulate and what lies outside its reach.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

International Law > Authority to Regulate > Anticompetitive Activities

HN6[] **International Aspects, Foreign Trade Antitrust Improvements Act**

When Congress decides to strip the courts of subject-matter jurisdiction in a particular area, it speaks clearly. The Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C.S. § 6a*, however, never comes close to using the word "jurisdiction" or any commonly accepted synonym. Instead, it speaks of the "conduct" to which the Sherman Act (or the Federal Trade Commission Act) applies. This is the language of elements, not jurisdiction.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Burdens of Proof > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN7[] **International Aspects, Foreign Trade Antitrust Improvements Act**

From a procedural standpoint, a party who wishes to contest the propriety of an antitrust claim implicating foreign activities must, at the outset, use *Fed. R. Civ. P. 12(b)(6)*, not *Rule 12(b)(1)*. This is not a picky point that is of interest only to procedure buffs. Rather, this distinction affects how disputed facts are handled, and it determines when a party may raise the point. While it is the burden of the party who seeks the exercise of jurisdiction in his favor clearly to allege facts demonstrating that he is a proper party to invoke judicial resolution, a court accepts as true all of the allegations contained in a complaint, subject, of course, to the limitations articulated in the relevant cases. Likewise, subject-matter jurisdiction must be secure at all times, regardless of whether the parties raise the issue, and no matter how much has been invested in a case. By contrast, a motion to dismiss for failure to state a claim may only be brought as late as trial. *Fed. R. Civ. P. 12(h)(2)*.

International Law > Authority to Regulate > Anticompetitive Activities

HN9[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The opening phrase of *15 U.S.C.S. § 6a* (sometimes referred to as a chapeau in international circles) reflects Congress's effort to indicate that the Sherman Act does not apply to every arrangement that literally can be said to involve trade or commerce with foreign nations. The public recognition of this limitation was inspired largely by international comity. But, by inserting the parenthetical "other than import trade or import commerce" in the chapeau, Congress recognized that there was no need for this self-restraint with respect to imports, even though they represent part of the foreign commerce of the United States. Although some have referred to this as the "import exception," that is not an accurate description. Import trade and commerce are excluded at the outset from the coverage of the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA) in the same way that domestic interstate commerce is excluded. This means only that conduct in both domestic and import trade is subject to the Sherman Act's general requirements for effects on commerce, not to the special requirements spelled out in the FTAIA. Where the FTAIA does apply, it removes from the Sherman Act's reach commercial activities taking place abroad, unless those activities adversely affect imports to the United States.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

HN10[] International Aspects, Foreign Trade Antitrust Improvements Act

Regarding the treatment by the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA) of nonimport, non-domestic commerce. the FTAIA handles that problem by laying down a general rule placing all (nonimport) activity involving foreign commerce outside the Sherman Act's reach and then bringing such conduct back within the Act provided that it meets the two criteria provided. The first criterion dictates the kinds of effects that truly foreign commerce must have in the U.S. market. Conduct involving trade or commerce with foreign nations must have a direct, substantial, and reasonably foreseeable effect on either (A) U.S. domestic commerce (phrased awkwardly as "trade or commerce which is not trade or commerce with foreign nations") or U.S. import commerce, or (B) the export trade or commerce of a U.S. exporter. *15 U.S.C.S. § 6a(1)*. The second criterion is that the direct, substantial and foreseeable effect shown under *§ 6a(1)* must give rise to a substantive claim under the Sherman Act.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN11[] International Aspects, Foreign Trade Antitrust Improvements Act

The Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C.S. § 6a*, does not require any special showing in order to bring import commerce transactions back into the Sherman Act because they were never removed from the statute. That does not mean, however, that plaintiffs are home free. Rather, a court must still apply the rules governing import commerce for purposes of the antitrust laws.

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN12[] International Aspects, Commerce With Foreign Nations

The Sherman Act covers imports when actual and intended effects on U.S. commerce have been shown. The Sherman Act covers foreign conduct producing a substantial intended effect in the United States. The United States Court of Appeals for the Third Circuit has suggested that this standard is met where the defendants' conduct targets import goods or services.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

HN13[] International Aspects, Foreign Trade Antitrust Improvements Act

Trade involving only foreign sellers and domestic buyers (i.e., import trade) is not subject to the extra layer of protection under the Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C.S. § 6a*, against Sherman Act claims implicating foreign activities.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN14[] **International Aspects, Foreign Trade Antitrust Improvements Act**

Regardless of whether a case is brought by the government or in private litigation, it is essential to meet the criteria spelled out by the Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C.S. § 6a*.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

HN15[] **International Aspects, Foreign Trade Antitrust Improvements Act**

After excluding foreign activities from the scope of the Sherman Act, the Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C.S. § 6a* brings back into the statute's reach conduct that has a "direct, substantial, and reasonably foreseeable effect" on domestic or import commerce.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

HN16[] **International Aspects, Foreign Trade Antitrust Improvements Act**

No one needs to read the words "substantial" and "foreseeable" into the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA), *15 U.S.C.S. § 6a*. Congress put them there, and in so doing, it signaled that the word "direct" used along with them had to be interpreted as part of an integrated phrase. Superimposing the idea of "immediate consequence" on top of the full phrase results in a stricter test than the complete text of the statute can bear. To demand a foreseeable, substantial, and "immediate" consequence on import or domestic commerce comes close to ignoring the fact that straightforward import commerce has already been excluded from the FTAIA's coverage.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

HN17[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The word "direct" as used in the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA), *15 U.S.C.S. § 6a*, addresses the classic concern about remoteness—a concern, incidentally, that has been at the forefront of international ***antitrust law*** at least since it was written in Alcoa that a court should not impute to Congress an intent to punish all whom its courts can catch, for conduct which has no consequences within the United States. Just as tort law cuts off recovery for those whose injuries are too remote from the cause of an injury, so does the FTAIA exclude from the Sherman Act foreign activities that are too remote from the ultimate effects on U.S. domestic or import commerce.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

HN18[] International Aspects, Foreign Trade Antitrust Improvements Act

If a foreign company is engaged in direct import sales, it must naturally comply with U.S. law just as all of its domestic competitors do. If its foreign sales do not meet the threshold for "effects" on import or domestic commerce established by cases such as Hartford Fire and Summit Health, then, for those transactions, it has nothing to worry about. If the hypothetical foreign company is engaged in the kind of conduct outside the United States that the Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C.S. § 6a*, addresses, then its actions can be reached only if there are direct, substantial, and reasonably foreseeable effects.

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

International Law > Authority to Regulate > Anticompetitive Activities

HN19[] International Aspects, Commerce With Foreign Nations

While the United States Supreme Court has held that the U.S. antitrust laws are not to be used for injury to foreign customers, the Court has reaffirmed the well-established principle that the U.S. antitrust laws reach foreign conduct that harms U.S. commerce: application of U.S. antitrust laws to foreign anticompetitive conduct is nonetheless reasonable, and hence consistent with principles of prescriptive comity, insofar as they reflect a legislative effort to redress domestic antitrust injury that foreign anticompetitive conduct has caused.

Antitrust & Trade Law > Sherman Act > Claims

International Law > Authority to Regulate > Anticompetitive Activities

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

HN20[] Sherman Act, Claims

No matter what the quality of the foreign conduct, the Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C.S. § 6a*, will not cover it unless the plaintiff manages to state a claim under the Sherman Act.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

HN21[] International Aspects, Foreign Trade Antitrust Improvements Act

If an antitrust complaint alleges straightforward import transactions, the plaintiffs must allege that the conduct of foreign cartel members was (1) meant to produce and (2) did in fact produce some substantial effect in the United States. The import trade or commerce exclusion under the Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C.S. § 6a*, requires that the defendants' conduct target import goods or services.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

International Law > Authority to Regulate > Anticompetitive Activities

HN22[] International Aspects, Foreign Trade Antitrust Improvements Act

The Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C.S. § 6a*, itself demands that the facts of each case must be evaluated for compliance with its demands.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN23[] Motions to Dismiss, Failure to State Claim

If the allegations in a complaint state a claim, as required by *Fed. R. Civ. P. 8*, they thus are enough to withstand a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*.

Opinion by: WOOD

---

* Circuit Judges Flaum, Rovner, and Williams took no part in the consideration or decision of this case.

Opinion

[*848] WOOD, *Circuit Judge*. Potash, a naturally occurring mineral used in agricultural fertilizers and other **[**3]** products, is produced and sold in a global market. In this case, the plaintiffs, U.S. companies that are direct and indirect purchasers of potash, accuse several global producers of price-fixing in violation of the U.S. anti-trust laws. See *15 U.S.C. §§ 1 et seq.* The district court denied the defendants' motion to dismiss the complaint, but it certified its ruling for interlocutory appeal under *28 U.S.C. § 1292(b)*. We agreed with that court's assessment of the importance of the issues presented and accepted the appeal. A panel of the court concluded that the complaint failed to meet the requirements of the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA), *15 U.S.C. § 6a*, and it thus voted to reverse. *Minn-Chem, Inc. v. Agrium Inc., 657 F.3d 650 (7th Cir. 2011)*. We then decided to rehear the case *en banc*. We hold first that ***HN1***[] the FTAIA's criteria relate to the merits of a claim, and not to the subject-matter jurisdiction of the court. We therefore overrule our earlier *en banc* decision in *United Phosphorus, Ltd. v. Angus Chem. Co., 322 F.3d 942 (7th Cir. 2003)*. We then address the applicable standards for antitrust cases involving import commerce and the restrictions imposed by **[**4]** the FTAIA. We conclude that the district court correctly ruled that the complaint does state a claim under the federal antitrust laws.

I

The district court's opinion details the critical facts alleged in the Complaint, see *In re Potash Antitrust Litig., 667 F. Supp. 2d 907, 915-19 (N.D. Ill. 2009)*, but for convenience we briefly summarize them here. The term "potash" refers to mineral and chemical salts that are rich in potassium. It is mined from naturally occurring ore deposits and its primary use is in agricultural fertilizers, but it is also used in the production of such varied products as glass, ceramics, soaps, and animal feed supplements. Importantly for our later antitrust analysis, potash is a homogeneous commodity: One manufacturer's supply is interchangeable with an-other's. As a result, buyers choose among suppliers based largely on price. Markets for this type of product are especially vulnerable to price-fixing.

We focus our analysis on the Direct Purchaser Amended Consolidated Class Action Complaint (referred to here simply as the Complaint), because the complaint filed by the indirect potash purchasers focuses primarily on state law remedies (since indirect purchasers **[**5]** are not entitled to sue for damages under the federal antitrust laws, see *Illinois Brick Co. v. Illinois, 431 U.S. 720, 729, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977))*.[1] The Complaint alleges that the world's potash reserves are confined to a handful of areas, with over half of global capacity located in just two regions—Canada and the former Soviet Union (in particular, Russia and Belarus). Commercially, the industry has been dominated by a small group of companies that market, sell, and distribute potash. The key actors are:

- Potash Corporation of Saskatchewan (Canada) Inc. and its U.S. subsidiary Potash Sales (USA), Inc. (collectively PCS), the world's largest producer of potash;
- Mosaic Company and Mosaic Crop Nutrition (Mosaic) a Delaware company headquartered in Minnesota, number three globally;

[*849] • Agrium Inc. and Agrium U.S. Inc. (Agrium), a Canadian corporation and its wholly owned U.S. subsidiary;

- Uralkali, a Russian joint venture headquartered in Moscow; fifth largest in the world and holder of a one-half interest in JSC Belarusian Potash Company (Belarusian Potash), which acts as the exclusive distributor of potash for Uralkali;

- Belaruskali, a Belarusian company and the owner of the other one-half interest **[**6]** in Belarusian Potash, which, as it is for Uralkali, is Belaruskali's exclusive distributor;

---

[1] The indirect purchasers had sought injunctive relief under the federal antitrust laws, but the district court dismissed those claims, *667 F. Supp. 2d at 941*, and they are not now before us.

- Silvinit, a Russian company that sells potash throughout the world, including the United States; and
- IPC, another Russian company, which is Silvinit's exclusive distributor.

The Complaint alleges that as of 2008, these seven entities produced approximately 71% of the world's potash.

In 2008, the United States consumed 6.2 million tons of potash. Of that total, 5.3 million tons were imports, and PCS, Mosaic, Agrium, and Belarusian Potash (acting for both Uralkali and Belaruskali, its equal and joint owners) were responsible for the lion's share of those sales. Data for other years covered by the Complaint are comparable.

The total world market for potash, in which the United States is an important consumer (second only to China, Complaint ¶51), is allegedly under the thumb of a global cartel consisting primarily of the companies listed above. This cartel restrained global output of potash in order to inflate **[**7]** prices. The cartel members used a rolling strategy: They would first negotiate prices in Brazil, India, and China (Complaint ¶111), and then use those prices as benchmarks for sales to U.S. customers. (Complaint ¶¶117-121). For example, in May 2004, the cartel arranged for prices to increase by $20 per ton for some foreign customers; shortly thereafter, prices in the United States went up by precisely the same amount.

The cartel initiated a sustained and successful effort to drive prices up beginning in mid-2003; by 2008 potash prices had increased at least 600%. The plaintiffs assert that this increase cannot be explained by a significant uptick in demand, changes in the cost of production, or other changes in input costs. In fact, U.S. consumption of fertilizer, of which potash is a consistent part, remained relatively steady throughout the period covered by this case; demand declined somewhat in 2008 but then returned to normal levels in 2009.[2] One might think that the decrease in demand in 2008 was because of the increase in price, but the slippage in demand did not build up over the entire Class Period and appears to have been only temporary, and is thus not correlated to potash **[**8]** price movements. Furthermore, the specific allegation in the Complaint that a $100 per ton increase in the price of potash adds only $0.03 to the production cost of a bushel of corn suggests that demand for potash is inelastic. Complaint ¶54. Prices for potash rose and stayed high, increasing even while fertilizer prices declined. Based on World Bank statistics, average fertilizer price indices rose from 1.0 to 2.2, and then fell back to 1.0 in 2008, while potash price indices started in 2008 at 1.0 and rose to 3.5 by the end of the year. Earnings by cartel members reinforce this picture of financial gain even in **[*850]** the face of waning demand: PCS posted first-quarter income figures in 2008 that tripled its previous-year figure, while Mosaic's earnings for that quarter were up more than tenfold over the year before.

The Complaint **[**9]** goes into detail about ways in which the defendants managed their collective output. (A cartel will always try to restrict output to the level where marginal cost equals marginal revenue, but in the real world, this normally requires constant adjustment.) For example, when global demand for potash declined in 2005, rather than decreasing its price, PCS announced that it was shutting down three of its mines in November and December 2005 for "inventory control purposes." Complaint ¶88. This action had the effect of removing 1.34 million tons of potash from the world market. At the same time, rather than jumping into the gap this drastic cutback created, Mosaic announced that it too was implementing temporary cutbacks that would remove an additional 200,000 tons from the market. These (allegedly) coordinated and deep reductions continued into 2006. In the first three months of that year, PCS reduced output from 2.4 million tons to 1.3 million tons, removing yet another 1.1 million tons from the market, or the equivalent of 32 weeks of mining. Uralkali reduced its output by 200,000 tons, and Belaruskali cut its exports back by 50%, or 250,000 tons. In the second quarter of that year, **[**10]** Silvinit followed suit with mine stoppages that removed about 100,000 tons from the market. Collectively, these three companies removed over half a million tons of potash from the market in early 2006. See Complaint ¶¶88-93. Their compatriots applauded the "discipline" of the former Soviet Union producers, "noting that many years earlier when demand for potash declined those same producers had sought to maintain volume over price and flooded the market with excess supply." Complaint ¶93.

---

[2] Data from the International Fertilizer Industry Association give the following figures for 2003 through 2009: 21,203.1 (2003); 20,090.7 (2004); 19,273.3 (2005); 20,770.9 (2006); 19,455.1 (2007); 16,045.7 (2008); and 18,908.2 (2009). See http://www.fertilizer.org/ifa/ifadata/search (last visited June 25, 2012). These data appear to refer to thousands of metric tons.

China was a particular target of the cartel's efforts, given its importance as a consumer. The shortages created by Uralkali's and PCS's supply restrictions in the first half of 2006 induced China to accept an increase in the price of potash. Shortly thereafter, a similar price increase was implemented throughout the world. Complaint ¶95. Comparable actions took place in 2007, as the Complaint rehearses in detail. The plaintiffs assert that a number of the defendants had excess capacity throughout the period between 2003 and mid-2009 (which represents the Class Period defined in ¶1 of the Complaint). PCS, for instance, had a utilization rate of only 54% to 69%, and Uralkali bragged in December 2007 **[**11]** that it had the "ability to add significant capacity on the cheapest basis vs. global peers." Complaint ¶¶133-134. This pattern of restrained output made it possible for the cartel to maintain its inflated prices, but the excess capacity inevitably gave its members an easy opportunity to cheat, and so the group had to coordinate to ensure that its price control efforts were not undermined.

The Complaint also points to several ways in which the cartel members had the opportunity to cooperate, to conspire on future actions, and to monitor one another's actions for possible cheating. First, the major suppliers participated in joint ventures that facilitated coordination. PCS, Agrium, and Mosaic were joint venturers and equal shareholders in Canpotex Ltd., a Canadian company that sold, marketed, and distributed potash throughout the world excluding the United States. Through that vehicle, those three companies had access to one another's sensitive production and pricing information. Canpotex in turn entered into cooperative marketing agreements with the Russian and Belarusian entities. As part of those deals, Canpotex agreed to market Uralkali potash outside North America and Europe. **[*851]** For **[**12]** their part, the former Soviet producers coordinated their sales and marketing through Belarusian Potash. That joint venture, formed between Uralkali and Belaruskali in 2005, supplied 34% of the market for potash by the following year. Complaint ¶26. Silvinit has sought to join the venture, and one of its owners (with a 20% share) owns 60% of the stock of Uralkali.

Beyond the access created by these structural relations among the entities, there were other more immediate opportunities to collude. The defendants routinely held meetings during the Class Period and engaged in an exchange program through which senior executives from each visited the others' plants. These meetings gave the defendants an opportunity to exchange sensitive information. Critically, one such meeting of the key players at PCS, Canpotex, Mosaic, Uralkali, Belaruskali, and Silvinit—mostly at the presidential level—took place in October 2005. As we described above, in the very next month, November 2005, PCS and Mosaic announced significant production cutbacks; the others followed suit with additional supply reductions through the beginning of 2006.

In addition, all of the defendants are members of the International **[**13]** Fertilizer Industry Association and the Fertilizer Institute, and they regularly attended those trade organizations' conferences. During one such meeting in Turkey, in May 2007, the defendants announced an additional price increase.

The Complaint contains, in its 165 paragraphs, many more details, which we discuss as needed below. What we have said here, however, is enough to set the stage for the two legal issues before us: how the FTAIA should be interpreted, and whether the district court correctly allowed this case to go forward.

II

Whether this case can be entertained by a court in the United States turns on the global reach of the antitrust laws, and to a significant degree on the Foreign Trade Antitrust Improvements Act of 1982, *15 U.S.C. § 6a*. Before delving into the FTAIA's requirements, however, we take this opportunity to revisit the question whether that law affects the subject-matter jurisdiction of the district court or if, on the other hand, it relates to the scope of coverage of the antitrust laws. Nine years ago, in *United Phosphorus v. Angus Chemical*, the *en banc* court concluded that the former interpretation was correct. *322 F.3d 942, 952 (7th Cir. 2003)*. In so doing, **[**14]** we relied on the legislative history of the statute, the vocabulary used by a number of commentators, and a number of court decisions that used the word "jurisdiction" in describing the requirement that challenged conduct must affect interstate or import commerce in specified ways.

Since that decision, ***HN2***[] the Supreme Court has emphasized the need to draw a careful line between true jurisdictional limitations and other types of rules. Thus, in *Morrison v. Nat'l Austl. Bank Ltd.., 561 U.S. 247, 130 S.*

Ct. 2869, 177 L. Ed. 2d 535 (2010), which dealt with the securities laws, the Court squarely rejected the notion that the extraterritorial reach of § 10(b) of the Securities Exchange Act, 15 U.S.C. § 78j(b), raises a question of subject-matter jurisdiction. Id. at 2877. "[T]o ask what conduct § 10(b) reaches is to ask what conduct § 10(b) prohibits, which is a merits question. **HN3**[] Subject-matter jurisdiction, by contrast, refers to a tribunal's power to hear a case." *Id*. (citing Union Pacific R. Co. v. Locomotive Eng'rs & Trainmen Gen. Comm. of Adjustment, 558 U.S. 67, 130 S. Ct. 584, 596, 175 L. Ed. 2d 428 (2009); Arbaugh v. Y&H Corp., 546 U.S. 500, 514, 126 S. Ct. 1235, 163 L. Ed. 2d **[*852]** 1097 (2006); United States v. Cotton, 535 U.S. 625, 630, 122 S. Ct. 1781, 152 L. Ed. 2d 860 (2002)). The Court might have added to that list Reed Elsevier, Inc. v. Muchnick, 559 U.S. 154, 130 S. Ct. 1237, 1243, 176 L. Ed. 2d 18 (2010), **[**15]** Kontrick v. Ryan, 540 U.S. 443, 455, 124 S. Ct. 906, 157 L. Ed. 2d 867 (2004), and Steel Co. v. Citizens for a Better Environment, 523 U.S. 83, 89, 118 S. Ct. 1003, 140 L. Ed. 2d 210 (1998). Even more recently, the Court restated this proposition in Henderson v. Shinseki, 562 U.S. 428, 131 S. Ct. 1197, 1202-03, 179 L. Ed. 2d 159 (2011). Notably, what may have been thought a nascent idea at the time *United Phosphorus* was decided (as one can tell by the dates of decision in our list) has now become a firmly established principle of statutory construction.

The panel in the present case had no quarrel with the proposition that this recent string of decisions undermined the holding in *United Phosphorus*. 657 F.3d at 653. It commented that "[t]hese intervening developments suggest that *United Phosphorus* may be ripe for reconsideration," but it was hesitant to take that step on its own. The panel also observed that the same issue had recently come before the Third Circuit, which held that the FTAIA does not impose a jurisdictional limit but instead establishes an element of a Sherman Act claim. Id. at 659 n.3 (citing Animal Sci. Prods., Inc. v. China Minmetals Corp., 654 F.3d 462 (3d Cir. 2011)). Indeed, the *Animal Science* opinion expressly approved the position of the *United Phosphorus* dissenters. **[**16]** 654 F.3d at 469 n.8. We agree with the panel that this issue is indeed ripe for reconsideration and ought to be settled now.

The Supreme Court's decision in Morrison, we believe, provides all the guidance we need to conclude that, like **HN4**[] § 10(b) of the Exchange Act, the FTAIA sets forth an element of an antitrust claim, not a jurisdictional limit on the power of the federal courts. As the Court put it, **HN5**[] limitations on the extraterritorial reach of a statute describe what conduct the law purports to regulate and what lies outside its reach. The Supreme Court itself used much the same language with respect to the antitrust laws in its decision in F. Hoffmann-La Roche Ltd v. Empagran S.A.., 542 U.S. 155, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004), which dealt specifically with the FTAIA. The Court spoke, for example, of the FTAIA's "removing from the Sherman Act's reach" certain types of conduct, id. at 161, and whether it was reasonable under the facts presented there "to apply this law to conduct that is significantly foreign," id. at 166. Even if one thought the language in *Empagran* to be less than dispositive, we can now see no way to distinguish this case from *Morrison*.

We add briefly that the interpretation we adopt today—that **[**17]** the FTAIA spells out an element of a claim—is the one that is both more consistent with the language of the statute and sounder from a procedural standpoint. **HN6**[] When Congress decides to strip the courts of subject-matter jurisdiction in a particular area, it speaks clearly. The FTAIA, however, never comes close to using the word "jurisdiction" or any commonly accepted synonym. Instead, it speaks of the "conduct" to which the Sherman Act (or the Federal Trade Commission Act) applies. This is the language of elements, not jurisdiction.

HN7[] From a procedural standpoint, this means that a party who wishes to contest the propriety of an antitrust claim implicating foreign activities must, at the outset, use Federal Rule of Civil Procedure 12(b)(6), not Rule 12(b)(1). This is not a picky point that is of interest only to procedure buffs. Rather, this distinction affects how disputed facts are handled, and **[*853]** it determines when a party may raise the point. While "it is the burden of the party who seeks the exercise of jurisdiction in his favor clearly to allege facts demonstrating that he is a proper party to invoke judicial resolution," FW/PBS, Inc. v. City of Dallas, 493 U.S. 215, 231, 110 S. Ct. 596, 107 L. Ed. 2d 603 (1990) (citations **[**18]** and quotation marks omitted), we "accept as true all of the allegations contained in a complaint," Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (citing Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)) subject, of course, to the limitations articulated in those cases. Likewise, subject-matter jurisdiction must be secure at all times, regardless of whether the parties raise the issue, and no matter how much has been invested in a case. See, *e.g.,* Cotton, 535 U.S. at 630 (citing *Louisville & Nashville R. Co. v. Mottley, 211 U.S. 149, 29 S. Ct. 42, 53 L. Ed. 126 (1908))*. By contrast, a motion to dismiss for failure to state a claim may only be brought as late as trial. *Fed . R. C iv. P. 12(h)(2)*. Although this is a significant difference, we note that foreign connections of the kind at issue here are unlikely to be difficult to detect, and so we are confident that parties who want to argue that a particular claim fails the requirements of the FTAIA will be able to do so within these generous time limits.

III

Having established that the FTAIA relates to the merits of a claim, rather than the subject-matter jurisdiction of the court, we can now turn to the principal issues in this appeal. We consider first how the **[**19]** statute should be interpreted and then, on that understanding of the law, we decide whether the district court correctly found that the Complaint stated a claim that could go forward.

A

Although the FTAIA has been parsed in a number of judicial opinions, including notably *Empagran*, we think it important to begin with the language of the statute, in order to place our discussion of these decisions in context. We note that the 1982 legislation that we are examining actually amended both the Sherman Act, see *15 U.S.C. § 6a*, and the Federal Trade Commission Act, see *15 U.S.C. § 45(a)(3)*, using identical language. That fact is important insofar as it underscores the generality of the issue we face: The statute applies not only to private actions, such as this one, but also to actions brought by the two federal agencies entrusted with the enforcement of the antitrust laws. Since it is the Sherman Act that applies to our case, however, from this point forward we cite only its provision. It reads as follows:

> *§ 6a*. Conduct involving trade or commerce with foreign nations
>
> ***HN8***[] *Sections 1 to 7* of this title [*i.e.*, the Sherman Act] shall not apply to conduct involving trade or commerce (other than import **[**20]** trade or import commerce) with foreign nations unless—
> (1) such conduct has a direct, substantial, and reasonably foreseeable effect—
> (A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; or
> (B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States; and
>
> (2) such effect gives rise to a claim under the provisions of *sections 1 to 7* of this title, other than this section.
>
> **[*854]** If *sections 1 to 7* of this title apply to such conduct only because of the operation of *paragraph (1)(B)*, then *sections 1 to 7* of this title shall apply to such conduct only for injury to export business in the United States.

HN9[] The opening phrase (sometimes referred to as a *chapeau* in international circles) reflects Congress's effort to indicate that the Sherman Act does not apply to every arrangement that literally can be said to involve trade or commerce with foreign nations. As the Supreme Court stressed in *Empagran*, the public recognition of this limitation was inspired largely by international comity. But, by inserting the parenthetical "other than import trade or import **[**21]** commerce" in the *chapeau*, Congress recognized that there was no need for this self-restraint with respect to imports, even though they represent part of the foreign commerce of the United States. Although some, including the Third Circuit in *Animal Science*, have referred to this as the "import exception," that is not an accurate description. Import trade and commerce are excluded at the outset from the coverage of the FTAIA in the same way that domestic interstate commerce is excluded. This means only that conduct in both domestic and import trade is subject to the Sherman Act's general requirements for effects on commerce, not to the special requirements spelled out in the FTAIA. Where the FTAIA does apply, it "remov[es] from the Sherman Act's reach . . . commercial activities taking place abroad, unless those activities adversely affect . . . imports to the United States" *Empagran,* 542 U.S. at 161. The Court's decision in Hartford Fire Ins. Co. v. California, 509 U.S. 764, 113 S. Ct. 2891, 125 L. Ed. 2d 612 (1993), suggests a pragmatic reason for this distinction: The applicability of U.S. law to transactions in which a good or service is being sent directly into the United States, with no intermediate stops, is both **[**22]** fully predictable to foreign entities and necessary for the protection of U.S. consumers. Foreigners who want to earn money from the sale of goods or services in American markets should expect to have to comply with U.S. law.

Next, we come to ***HN10***[] the statute's treatment of nonimport, non-domestic commerce. *Empagran* explained that the FTAIA handles that problem by "lay[ing] down a general rule placing *all* (nonimport) activity involving foreign commerce outside the Sherman Act's reach . . . [and then] bring[ing] such conduct back within" the Act provided that it meets the two criteria provided. *Id. at 162* (emphasis in original). The first criterion dictates the kinds of effects that truly foreign commerce must have in the U.S. market. Conduct "involving trade or commerce . . . with foreign nations" must have "a direct, substantial, and reasonably foreseeable effect" on *either* [A] U.S. domestic commerce (phrased awkwardly as "trade or commerce which is not trade or commerce with foreign nations") or U.S. import commerce, *or* [B] the export trade or commerce of a U.S. exporter. See § 6a(1). The export trade provision plays no part in our case, and so we do not address it further here. The second **[**23]** criterion, which was the focus of *Empagran*, is that the direct, substantial and foreseeable effect shown under subpart (1) must give rise to a substantive claim under the Sherman Act. The reason this was important in *Empagran* is that the plaintiffs there were foreign purchasers of allegedly price-fixed products that were sold in foreign markets. The Court held that their claims fell outside the scope of the Sherman Act. In our case, by contrast, the plaintiffs are all U.S. purchasers, and so the particular problem addressed in *Empagran* does not arise here.

[*855] Thus, before we can address the merits of the complaint, we must address two distinct questions of statutory interpretation. The first is how to define pure import commerce—that is, the kind of commerce that is not subject to the special rules created by the FTAIA. Second, we must explore the FTAIA's standards further and explain what it takes to show that foreign conduct has a direct, substantial, and reasonably foreseeable effect on U.S. domestic or import commerce.

1

There can be no question that the import commerce exclusion puts some of the conduct alleged in the Complaint outside the special rules created in the FTAIA for Sherman **[**24]** Act claims. The plaintiffs are U.S. entities that have purchased potash directly from members of the alleged cartel. The defendant members of the cartel are all located outside the United States. Those transactions that are directly between the plaintiff purchasers and the defendant cartel members *are* the import commerce of the United States in this sector.

HN11[] The FTAIA does not require any special showing in order to bring these transactions back into the Sherman Act, as *Empagran* put it, because they were never removed from the statute. That does not mean, however, that plaintiffs are home free. Rather, we must still apply the rules governing import commerce for purposes of the antitrust laws. For several decades, the leading authority on this subject was Judge Learned Hand's opinion for the Second Circuit in United States v. Aluminum Co. of America, 148 F.2d 416, 444 (2d Cir. 1945) (*Alcoa*). There the court (sitting as a court of last resort because the Supreme Court lacked a quorum) held that***HN12***[] the Sherman Act covers imports when actual and intended effects on U.S. commerce have been shown. In *Hartford Fire*, the Supreme Court confirmed this rule, stating that "the Sherman Act covers foreign **[**25]** conduct producing a substantial intended effect in the United States." 509 U.S. at 797. The Third Circuit has suggested that this standard is met where "the defendants' conduct target[s] import goods or services." Animal Science, 654 F.3d at 470.

As noted, the Complaint before us alleges import transactions. Thus, the only outstanding question is whether this import trade has been substantially and intentionally affected by an anticompetitive arrangement (*i.e.*, something that would violate the U.S. antitrust laws). There is nothing particularly "international" about that question. Effects on commerce are a part of every Sherman Act case. See, *e.g.,* Hartford Fire, supra (import commerce); Summit Health, Ltd. v. Pinhas, 500 U.S. 322, 111 S. Ct. 1842, 114 L. Ed. 2d 366 (1991) (interstate commerce). We address the adequacy of the Complaint under the Sherman Act in more detail below.

2

As we already have observed, ***HN13***[] trade involving only foreign sellers and domestic buyers (*i.e*., import trade) is not subject to the FTAIA's extra layer of protection against Sherman Act claims implicating foreign activities. Some of the activities alleged in the Complaint, however, may be best understood as sufficiently outside the arena of simple **[**26]** import transactions as to require application of the FTAIA. For example, Canpotex is the unified marketing and sales agent for Agrium, Mosaic and PCS in all markets *except* Canada and the United States, yet its actions are an important part of the alleged scheme to set inflated benchmark prices. Presumably, in order to avoid *Illinois Brick's* prohibition on "pass on" antitrust damages, *431 U.S. at 728*, the plaintiffs are **[*856]** seeking to hold firms like Canpotex jointly and severally liable for any damages the direct sellers might be ordered to pay, perhaps under a conspiracy theory. If this were an action by the Department of Justice or the Federal Trade Commission, we would not need to worry about *Illinois Brick*, but ***HN14***[] regardless of whether the case is brought by the government or in private litigation, it is essential to meet the criteria spelled out by the FTAIA. We thus take a closer look at what kind of conduct "involve[s] trade or commerce . . . with foreign nations" and what showing is necessary to demonstrate "direct, substantial and reasonably foreseeable" effects on domestic [*i.e*., "not trade or commerce with foreign nations"] or import commerce.

The first question—whether the conduct **[**27]** alleged in this case "involves" foreign commerce—is readily answered. The Complaint alleges an international cartel in a commodity, and it asserts that the cartel succeeded in raising prices for direct U.S. purchasers of the product, potash. This alleged arrangement plainly involves foreign commerce, and so we move immediately to the second inquiry—the task of parsing the statute's central requirements. As *Empagran* put it, ***HN15***[] after excluding foreign activities from the scope of the Sherman Act, the FTAIA brings back into the statute's reach conduct that has a "direct, substantial, and reasonably foreseeable effect" on domestic or import commerce.

The potash cartel described in the Complaint is one for which the requirements of substantiality and foreseeability are easily met. There is little dispute that the Complaint has alleged substantial effects: The Complaint alleges that 5.3 million tons of potash were imported into the United States in 2008 alone, and the Complaint elsewhere asserts that the vast majority of these imports came from the defendants. From 2003 to 2008, the price of potash increased by over 600%. We do not need to belabor the point. These allegations easily satisfy **[**28]** the requirement to show substantial effects in the U.S. market. Wherever the floor may be, it is so far below these numbers that we do not worry about it here.

Foreseeability is equally straightforward. It is objectively foreseeable that an international cartel with a grip on 71% of the world's supply of a homogeneous commodity will charge supracompetitive prices, and in the absence of any evidence showing that arbitrage is impossible (and there is none here), those prices (net of shipping costs) will be uniform throughout the world. Higher prices cannot be divorced from reductions in supply, and so the effects alleged here are a rationally expected outcome of the conduct stated in the Complaint.

The question that has caused more discussion among various courts and commentators is what it takes to show "direct" effects. One school of thought, launched by the Ninth Circuit's split decision in *United States v. LSL Biotechs., 379 F.3d 672 (9th Cir. 2004)*, has borrowed the definition of the word "direct" that the Supreme Court adopted for a different statute, the Foreign Sovereign Immunities Act (FSIA), *28 U.S.C. § 1605(a)(2)*; see *Republic of Argentina v. Weltover, Inc., 504 U.S. 607, 112 S. Ct. 2160, 119 L. Ed. 2d 394 (1992)*. **[**29]** The word appears in the exception for foreign sovereign immunity that applies for commercial activity that takes place outside the territory of the United States when "that act causes a direct effect in the United States." In that setting, the Court held that an effect is "direct" if it "follows as an immediate consequence of the defendant's . . . activity." *Id. at 618*. The other school of thought has been articulated by the Department of Justice's Antitrust Division, which takes the position that, for FTAIA **[*857]** purposes, the term "direct" means only "a reasonably proximate causal nexus." Makan Delrahim, *Drawing the Boundaries of the Sherman Act: Recent Developments in the Application of the Antitrust Laws to Foreign Conduct*, *61 N.Y.U. Ann. Surv. Am. L. 415, 430 (2005)* (remarks of the Deputy Assistant Attorney General); Brief for Appellant United States of America 38 in *United States v. LSL Biotechs., supra*, *available at* *http://www.justice.gov/atr/cases/f200200/200243.pdf* (directness is a synonym for proximate cause).

In our view, the Ninth Circuit jumped too quickly to the assumption that the FSIA and the FTAIA use the word "direct" in the same way. Critically, the Supreme Court in *Weltover* **[**30]** reached its definition of "direct" for FSIA purposes only after refusing to import from the legislative history of that statute the notion that an effect is "direct" only if it is both "substantial" and "foreseeable." *504 U.S. at 617*. "[W]e reject," it said, "the suggestion that *§ 1605(a)(2)* contains any unexpressed requirement of 'substantiality' or 'foreseeability.'" *Id. at 618*. Only then did the Court endorse the appellate court's definition that an effect is "direct" if it follows "as an immediate consequence" of the defendant's activity. *Id*.

HN16[] No one needs to read the words "substantial" and "foreseeable" into the FTAIA. Congress put them there, and in so doing, it signaled that the word "direct" used along with them had to be interpreted as part of an integrated phrase. Superimposing the idea of "immediate consequence" on top of the full phrase results in a stricter test than the complete text of the statute can bear. To demand a foreseeable, substantial, and "immediate" consequence on import or domestic commerce comes close to ignoring the fact that straightforward import commerce has already been excluded from the FTAIA's coverage.

We are persuaded that the Department of Justice's **[**31]** approach is more consistent with the language of the statute. ***HN17***[] The word "direct" addresses the classic concern about remoteness—a concern, incidently, that has been at the forefront of international ***antitrust law*** at least since Judge Hand wrote in *Alcoa* that "[w]e should not impute to Congress an intent to punish all whom its courts can catch, for conduct which has no consequences within the United States." *148 F.2d at 443*; see also *LSL Biotechs., 379 F.3d at 683-91* (Aldisert, J., dissenting) (tracing the history of the FTAIA's effects test through *Alcoa*). Just as tort law cuts off recovery for those whose injuries are too remote from the cause of an injury, so does the FTAIA exclude from the Sherman Act foreign activities that are too remote from the ultimate effects on U.S. domestic or import commerce.

This understanding of the FTAIA should allay any concern that a foreign company that does any import business at all in the United States would violate the Sherman Act whenever it entered into a joint-selling arrangement overseas regardless of its impact on the American market. A number of safeguards exist to protect against that risk. ***HN18***[] If the hypothetical foreign com-pany is engaged **[**32]** in direct import sales, it must naturally comply with U.S. law just as all of its domestic competitors do. If its foreign sales do not meet the threshold for "effects" on import or domestic commerce established by cases such as *Hartford Fire* and *Summit Health*, then, for those transactions, it has nothing to worry about. If the hypothetical foreign company is engaged in the kind of conduct outside the United States that the FTAIA addresses, then its actions can be reached only if there are direct, substantial, and **[*858]** reasonably foreseeable effects. This is a standard with teeth, as the many cases that have been dismissed for failing to meet those criteria attest. *E.g., Turicentro, S.A. v. Am. Airlines, Inc., 303 F.3d 293 (3d Cir. 2002)*; *Carpet Grp. Int'l v. Oriental Rug Imps. Ass'n, 227 F.3d 62 (3d Cir. 2000)*; *McGlinchy v. Shell Chem. Co., 845 F.2d 802 (9th Cir. 1988)*; *Filetech S.A. v. France Telecom S.A., 212 F. Supp. 2d 183 (S.D.N.Y. 2001)*.

Empagran is consistent with the interpretation we adopt here. ***HN19***[] While it holds that the U.S. antitrust laws are not to be used for injury to foreign customers, it goes on to reaffirm the well-established principle that the U.S. antitrust laws reach foreign **[**33]** conduct that harms U.S. commerce:

> [O]ur courts have long held that application of our antitrust laws to foreign anticompetitive conduct is nonetheless reasonable, and hence consistent with principles of prescriptive comity, insofar as they reflect a legislative effort to redress domestic antitrust injury that foreign anticompetitive conduct has caused.

Empagran, 542 U.S. at 165. Finally, we note that *§ 6a(2)* will protect many a foreign defendant. ***HN20***[] No matter what the quality of the foreign conduct, the statute will not cover it unless the plaintiff manages to state a claim under the Sherman Act. In this connection, we point out that a great many joint-selling arrangements are legal, efficiency-enhancing structures. See, *e.g., Texaco Inc. v. Dagher, 547 U.S. 1, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*; *Broadcast Music, Inc. v. Columbia Broadcasting Sys., Inc., 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*.

B

Having described the requirements for both simple import commerce and the FTAIA, our final task is to measure the Complaint against these standards. In particular, we must decide whether the plaintiffs have plausibly alleged that the defendants' conduct took place either in import commerce and are thus subject to the more general rules of *Hartford* ***[**34]*** *Fire* for effects on commerce, or if they have in whole or in part described conduct subject to the FTAIA, and if so, whether the allegations describe direct, substantial, and foreseeable effects on domestic or import commerce.

1

In our view, ***HN21***[] much of the Complaint alleges straightforward import transactions. Under *Hartfrd Fire* the plaintiffs thus must allege that the conduct of the foreign cartel members was (1) meant to produce and (2) did in fact produce some substantial effect in the United States. See also *Animal Science, 654 F.3d at 470* ("[T]he import trade or commerce [exclusion] requires that the defendants' conduct target import goods or services."). The Complaint contains ample material supporting both of those points.

The plaintiffs describe a tight-knit global cartel, similar to OPEC in its heyday, that restrained global output of potash so that prices throughout this homogeneous world market would remain artificially high. Just like the raisin producers in California in the famous state-action antitrust case, *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, who controlled 90% of the world market in raisins, the alleged cartel members here control a comparable share of the world market **[**35]** in potash. The purpose of this cartel was to inflate the profits of its members. Its alleged effect was substantial. The United States, according to the Complaint, is one of the two largest consumers of potash in the world, and approximately 85% of U.S. potash comes from overseas. From 2003 to 2008, the price of potash increased six-fold. The inference from these allegations **[*859]** is not just plausible but compelling that the cartel meant to, and did in fact, keep prices artificially high in the United States.

2

We turn next to an analysis of the conduct that falls outside the import exclusion to determine whether it may nevertheless be subject to the Sherman Act under the FTAIA. For example, the Complaint alleges that Canpotex, a Canadian entity that does not sell directly into the United States, restricted supply during a period of especially difficult price negotiations with China. This supply restriction compelled Chinese buyers to accept a price increase. Complaint ¶94. We assume for present purposes that none of this literally involved import trade. Our discussion, however, is rooted in the facts of this Complaint. In that connection, it is important to recall that ***HN22***[] the FTAIA itself demands **[**36]** that the facts of each case must be evaluated for compliance with its demands. We thus address only the situation before us, in which several members of the cartel sold directly into the United States and others allegedly worked with them in connection with those efforts. The question before us is thus whether the al legations in the plaintiffs' Complaint describe conduct that had a direct, substantial, and reasonably foreseeable effect on domestic or import commerce by, for example, setting a benchmark price intended to govern later U.S. sales.

As we noted above, the effects of the supply restriction on U.S. potash prices were foreseeable. So too were the effects of forcing foreign purchasers to accept higher prices in a commoditized and cartelized market: Either someone in the cartel would cheat, or a new entrant would begin to arbitrage its purchases, or, as the plaintiffs allege, the cartel would succeed in pushing prices up across all of its markets, including the United States. And, as we have explained, there is every reason to infer that any such effects in the U.S. potash market were substantial.

We turn to the question whether these effects are "direct," as we have defined **[**37]** the term. The plaintiffs allege that the defendants would first negotiate prices in Brazil, India, and China, and then they would use those prices for sales to U.S. customers. The alleged supply reductions led to price hikes in these foreign markets, and those increases showed up almost immediately in the prices of U.S. imports. The defendants do not suggest that the potash market is insulated from these effects by regulatory structures or other arrangements, and even if they did, that would be no reason to dismiss the Complaint outright. To the contrary, the plaintiffs have alleged that the cartel established benchmark prices in markets where it was relatively free to operate, and it then applied those prices to its U.S. sales. (Benchmark prices set in one market for general use are common: think, for instance of the London Interbank Offered Rate (LIBOR), in the credit market; the Brent Crude price, formally used for North Sea oil but in general use in oil markets; or even the Medicare Fee Schedule, which though technically only for Medicare reimbursements, has widespread effects on the healthcare market.) It is no stretch to say that the foreign supply restrictions, and the concomitant **[**38]** price increases forced upon the Chinese purchasers, were a direct—that is, proximate—cause of the subsequent price increases in the United States.

HN23[] The allegations in the Complaint state a claim, as required by *Federal Rule of Civil Procedure 8*, and thus are enough to withstand a motion to dismiss under *Rule 12(b)(6)*, as interpreted by the Supreme Court in *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* and *Ashcroft v. Iqbal, 556 U.S. 662, **[*860]** 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. The Complaint is not defeated by the defendants' contention that the alleged cartel was not efficacious. See *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 656 (7th Cir. 2002)*. We are also satisfied that the allegations suffice, at this stage, to support a plausible story of concerted action. See *In re Text Messaging Antitrust Litig., 630 F.3d 622 (7th Cir. 2010)*. We stress, however, that our evaluation throughout has proceeded exclusively on the face of the Complaint. Nothing we have said should be understood as a prediction of the facts that may turn up in discovery, nor are we opining about the likely fate of any possible defenses. In particular, the defendants mentioned in their opposition to the petition for rehearing **[**39]** *en banc* that some of their actions were under-taken with the approval of foreign governments (*e.g.*, Canada's). We express no opinion on either the contours or the likely success of any such argument. Similarly, we do not have before us any question about the court's personal jurisdiction over the various defendants. *Cf. J. McIntyre Machinery, Ltd. v. Nicastro, 564 U.S. 873, 131 S. Ct. 2780, 180 L. Ed. 2d 765 (2011)*. We are not faced with the question of whether the actions of the non-selling defendants, such as Canpotex, fall outside the substantive scope of *Sherman Act § 1* (as opposed to the law's territorial reach), nor have the defendants argued that Congress as a matter of U.S. law has no constitutional power to enact laws with some extraterritorial effect. These or other theories may all be important to explore as the case goes forward, but they do not provide a reason to throw out the case on the grounds that the plaintiffs failed to show either that the challenged transactions occurred in import commerce or that they had a direct, substantial, and reasonably foreseeable effect on either the domestic or import commerce of the United States.

IV

Foreign cartels, especially those over natural resources that are scarce **[**40]** in the United States and that are traded in a unified international market, have often been the target of either governmental or private litigation. The host country for the cartel will often have no incentive to prosecute it. Canada and Russia, here (just like California in *Parker*), would logically be pleased to reap economic rents from other countries; their losses from higher prices for the potash used in their own fertilizers are more than made up by the gains from the cartel price their exporters collect. Export cartels are often exempt from a country's antitrust laws: the United States does just that, through its Webb-Pomerene Associations, see *15 U.S.C. §§ 61 et seq.*, and Export Trading Companies, see *15 U.S.C. §§ 4001 et seq.* This case is actually the mirror image of the situation described in *Empagran*, where the foreign country whose consumers are hurt would have been the better enforcer. It is the U.S. authorities or private plaintiffs who have the incentive—and the right—to complain about overcharges paid as a result of the potash cartel, and whose interests will be sacrificed if the law is interpreted not to permit this kind of case.

The world market for potash is highly **[**41]** concentrated, and customers located in the United States account for a high percentage of sales. This is not a House-that-Jack-Built situation in which action in a foreign country filters through many layers and finally causes a few ripples in the United States. To the contrary: foreign sellers allegedly created a cartel, took steps outside the United States to drive the price up of a product that is wanted in the United States, and then (after succeeding in doing so) sold that product to U.S. customers. The payment of overcharges **[*861]** by those customers was objectively foreseeable, and the amount of commerce is plainly substantial. We AFFIRM the order of the district court denying the motion to dismiss for failure to state a claim.

Opinion

MEMORANDUM AND ORDER

JOHN GLEESON, United States District Judge:

Plaintiff Jeremy Sparig commenced this *pro se* action on October 24, 2011, alleging a variety of claims arising from his former relationship with Select Real Estate, LLC ("SRE"), a real estate brokerage based in Brooklyn, New York. Sparig has asserted federal claims against SRE, its principals and related companies for copyright infringement, as well as violations of § 1 of the Sherman Act, *15 U.S.C. § 1*, and the Racketeer Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. § 1961 et seq.* He has also asserted various claims under state law. For the reasons set forth below, the Defendants' motion to dismiss is granted in part and denied in part.

BACKGROUND

A. *Factual Background*

Sparig began working as a real estate salesperson for SRE, a real estate brokerage, in April 2008. Am. Compl. ¶¶ 27, 29, ECF No. 3.[1] He worked for SRE as an independent contractor, paid by commission. *Id*. ¶¶ 29, 31. When he accepted a position **[*2]** with SRE, Sparig signed a non-compete agreement. *See id*. ¶ 32. This agreement broadly prohibits Sparig from being involved with another real estate brokerage within five miles of SRE's office for a period of three years. *See id*.

When Sparig interviewed for the position with SRE, Danenberg told him that he would be provided with "expert training by a senior expert Broker." *Id*. ¶ 39(i). He would work with this senior broker on his first four transactions and they would split both the work and the commissions. *Id*. ¶ 39(v). He was told commissions would be paid one week after a lease was signed. *Id*. ¶ 39(iii). Danenberg also told Sparig about DANBRO studios, a property owned by Danenberg and his brother. *Id*. ¶ 39(vi). Danenberg told Sparig he would receive a commission of one month's rent for each unit he was able to lease at DANBRO studios. *Id*. ¶ 39(vii). Based on these and other statements by Danenberg, Sparig agreed to work for SRE and to sign the non-compete agreement. *Id*. ¶ 40.

Despite the promise of being paired with a senior broker, when Sparig began working at SRE he was actually **[*3]** paired with the next-most-junior broker. *Id*. ¶ 41. Sparig completed his first transactions alone, without training or assistance from that junior broker or others, but still had half of his commissions taken away. *See id*. ¶¶ 42-43. In addition, Sparig alleges that for each month he worked at SRE, his commissions were not paid on time and he did not receive the full amount of commissions he had earned. *See, e.g.*, ¶¶ 47, 59, 72.

In October 2008, Sparig terminated his relationship with SRE. *Id*. ¶ 84. He told Danenberg that he intended to go into the real estate business with his father. *See id*. In response, Danenberg threatened to enforce the non-compete agreement and commence litigation against Sparig that he would seek to make as lengthy and expensive as possible, causing financial ruin to Sparig and his father. *See id*. ¶ 85. SRE subsequently sent cease and desist notices to Sparig, demanding that he refrain from violating the non-compete agreement. *See, e.g., id*. ¶ 137.

Danenberg also told Sparig that any judgment against SRE would be unenforceable because SRE has no assets and all its money is funneled into various other companies. *Id*. ¶¶ 85, 138. Danenberg refused to allow Sparig to **[*4]** take some of his personal belongings as well as records he was required to maintain under New York law regulating real estate salespersons. *See id*. ¶¶ 89, 134, 160. After Sparig resigned, Danenberg instructed SRE employees to call Sparig's former clients and inform them that Sparig had been fired and that they should not work with him. *See id*. ¶¶ 88, 122. In addition, SRE failed to provide Sparig with forms documenting his experience as a salesperson there, which he needed in order to become a licensed real estate broker. *See id*. ¶¶ 102, 154, 159.

Danenberg's conduct prevented Sparig from entering into a real estate business on his own or with his father. *See id*. ¶¶ 84-85, 123-24, 151. In particular, Sparig was unable to work with the landlord of 476 Jefferson Street, with whom he had obtained an exclusive listing agreement during his time at SRE. *See id*. ¶¶ 54, 76. Although the landlord had been willing to continue to work with Sparig after he left SRE, Danenberg's conduct prevented him from doing so. *See id*. ¶¶ 76, 122, 150. Sparig also had to turn down another offer to be an exclusive listing agent for a commercial property. *Id*. ¶ 155. And the failure to provide Sparig with documentation **[*5]** of his work "made it impossible for [him] to expand his business and hire other agents." *Id*. ¶ 154.

Prior to working at SRE, Sparig had worked as a professional photographer. *Id*. ¶ 28. Although he had asked SRE to hire him as a photographer, SRE declined to do so. *See id*. ¶ 30. Sparig nevertheless employed his photography skills and equipment in his real estate work at SRE. *See id*. ¶ 90. After he left SRE, SRE continued to use Sparig's photographs to market properties on its website. *See id*. ¶¶ 90, 93, 96, 98. Sparig's attorney sent a letter to SRE demanding that it cease and desist from using Sparig's photographs. *See id*.¶ 101. SRE refused and continued to use the photographs. *See id*. ¶¶ 102-03.

B. *Procedural Background*

---

[1] The facts are drawn from the Amended Complaint and are assumed to be true for purposes of this motion.

Sparig commenced this action on October 24, 2011, and filed an amended complaint on November 9, 2011. He named as Defendants both SRE and Danenberg, as well as Sarah Russell,[2] Danenberg's wife and a broker at SRE. He also named DANBRO Studios, Dusty Group, LLC, Piggyback, Inc., 31 Bushwick Corp. and other unidentified companies, all of which are allegedly owned by Danenberg.[3]

On March 23, 2012, the Defendants filed an answer and counterclaims, including a counterclaim for breach of the non-compete agreement. The Defendants also moved to dismiss the amended complaint. In addition, their motion seeks the imposition of sanctions against Sparig pursuant to *Rule 11 of the Federal Rules of Civil Procedure*.[4]

DISCUSSION

A. *Standard of Review*

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Wilson v. Merrill Lynch & Co., 671 F.3d 120, 128 (2d Cir. 2011)* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009))* (internal quotation marks omitted). A court considering a motion to dismiss should assume the veracity of the well-pleaded factual allegations in the complaint "and then determine whether they plausibly give rise to an entitlement to relief." *Iqbal, 129 S. Ct. at 1950*.

B. *Federal Claims*

1. *The Antitrust Claim*

Section 1 of the **[*7]** Sherman Act prohibits any "combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 1*. Despite its broad language, courts have recognized that *§ 1* does not prohibit every agreement that restrains trade. *See Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 687-88, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*; *Ark. Carpenters Health & Welfare Fund v. Bayer AG, 604 F.3d 98, 104 (2d Cir. 2010)*, *cert. denied*, *131 S. Ct. 1606, 179 L. Ed. 2d 517 (2011)*. Instead, most agreements are subject to "rule of reason" analysis, while only a limited class of agreements is deemed per se unlawful. *See Ark. Carpenters Health & Welfare Fund, 604 F.3d at 104*.

Restrictive covenants not to compete, such as the one at issue here, are not per se violations of the Sherman Act. *Bradford v. N.Y. Times Co., 501 F.2d 51, 59-60 (2d Cir. 1974)*; *see also Capital Temporaries, Inc. of Hartford v. Olsten Corp., 506 F.2d 658, 666 (2d Cir. 1974)*. Thus, they are analyzed under the rule of reason. *Eichorn v. AT&T Corp., 248 F.3d 131, 144 (3d Cir. 2001)*; *Bradford, 501 F.2d at 60*.

Under the rule of reason, an antitrust plaintiff must allege "an adverse effect on competition, **[*8]** not merely injury to itself." *See Integrated Sys. & Power, Inc. v. Honeywell Int'l, Inc., 713 F. Supp. 2d 286, 299 (S.D.N.Y. 2010)* (citing *Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 96 (2d Cir. 1998))*. Sparig has failed to allege facts supporting a plausible claim of an adverse effect on competition in general. He has not alleged that use of the covenant not to compete has given SRE undue market power in any relevant market. While it may have inhibited Sparig's personal ability to compete with SRE, that is not the type of injury the antitrust laws are designed to address. *See Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 543 (2d Cir. 1993)* ("Insisting on proof of harm to the whole market fulfills the broad purpose of the ***antitrust law*** that was enacted to ensure competition in general, not narrowly focused to protect individual competitors."). Accordingly, the antitrust claim is dismissed.

2. *The RICO Claim*

---

[2] Russell's name is misspelled as Russel in the amended complaint.

[3] Some of these companies are **[*6]** not listed in the case caption, but are listed in the body of the amended complaint.

[4] In a March 26, 2012 Order, I stated that the motion for sanctions would not be heard unless and until the Defendants' motion to dismiss is granted.

RICO prohibits, *inter alia*, conducting (or participating in the conduct of) the affairs of an enterprise affecting interstate or foreign commerce through "a pattern of racketeering activity." *18 U.S.C. § 1962(a)-(c)*; *see also* *GICC Capital Corp. v. Tech. Fin. Grp., Inc., 67 F.3d 463, 465 (2d Cir. 1995)* **[*9]** ("Under any prong of *§ 1962*, a plaintiff in a civil RICO suit must establish a 'pattern of racketeering activity.'"). "RICO provides a private right of action for treble damages for a 'person injured in his business or property by reason of a violation of *section 1962*.'" *Ideal Steel Supply Corp. v. Anza, 652 F.3d 310, 321 (2d Cir. 2011)* (quoting *18 U.S.C. § 1964(c)*), *cert. denied*, *132 S. Ct. 1636, 182 L. Ed. 2d 246 (2012)*.

Racketeering activity is defined by statute to consist of a number of specific criminal acts. Among these are certain felonies under state law, such as extortion, and violations of enumerated federal statutes, including certain types of fraud and extortion. *See id*. *§ 1961(1)*. A "pattern" of racketeering activity "*requires* at least two acts of racketeering activity." *Id*. *§ 1961(5)* (emphasis added). Thus, "while two acts are necessary, they may not be sufficient" to constitute a pattern. *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 496 n.14, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985)*. A pattern requires that two or more racketeering acts "are related, *and* that they amount to or pose a threat of continued criminal activity." *H.J. Inc. v. Nw. Bell Tel. Co., 492 U.S. 229, 239, 109 S. Ct. 2893, 106 L. Ed. 2d 195 (1989)*; *see also* *United States v. Pizzonia, 577 F.3d 455, 465 (2d Cir. 2009)*.

The **[*10]** Defendants have moved to dismiss the RICO claim, arguing that Sparig has failed to allege the existence of an enterprise, any predicate acts or that such acts were the proximate cause of his injury. In his opposition to the Defendants' motion, Sparig concedes — with admirable candor — that his civil RICO claim in this case "may be inappropriate" and he "defer[s] to the court as to whether this claim should be dropped or retained." Sparig Aff. ¶ 107, ECF No. 23-1.

I conclude that Sparig has not alleged a RICO claim. He fails to allege a pattern of racketeering or any racketeering acts, let alone how he was injured in his business or property by reason of such acts. Sparig's speculation in his opposition that the failure to pay him commissions amounted to extortion under color of official right reflects a misapprehension of the Hobbs Act, *18 U.S.C. § 1951*. For these and other reasons, I dismiss Sparig's RICO claim.

3. *The Copyright Infringement Claim*

"In order to establish a claim of copyright infringement, 'a plaintiff with a valid copyright must demonstrate that: (1) the defendant has actually copied the plaintiff's work; and (2) the copying is illegal because a substantial similarity **[*11]** exists between the defendant's work and the protectible elements of plaintiff's.'" *Peter F. Gaito Architecture, LLC v. Simone Dev. Corp., 602 F.3d 57, 63 (2d Cir. 2010)* (quoting *Hamil Am. Inc. v. GFI, 193 F.3d 92, 99 (2d Cir. 1999))*.

The Defendants' principal argument supporting dismissal of Sparig's copyright claim is that the copyrights in the photos at issue are owned by SRE. According to the Defendants, "[i]t is common practice in the real estate industry that [sales personnel] are called upon to photograph their inventory . . . without . . . the creation of any personal, independent copyright interest." Pasquariello Aff. ¶ 85, ECF No. 11. Because the photos were "taken incidental to [Sparig's] affiliation with [SRE]," *id*. ¶ 86, the Defendants argue that the photos are owned by SRE, not Sparig, *id*. ¶ 87.

The Defendants' argument is wrong. A copyright "vests initially in the author or authors of the work." *17 U.S.C. § 201(a)*. "As a general rule, the author is the party who *actually creates the work*, that is, the person who translates an idea into a fixed, tangible expression entitled to copyright protection." *Cmty. for Creative Non-Violence v. Reid, 490 U.S. 730, 737, 109 S. Ct. 2166, 104 L. Ed. 2d 811 (1989)* (emphasis **[*12]** added). An exception applies to works "made for hire," for which "the employer or other person for whom the work was prepared is considered the author . . . and, unless the parties have expressly agreed otherwise in a written instrument signed by them, owns all of the rights comprised in the copyright." *17 U.S.C. § 201(b)*; *see also* *Reid, 490 U.S. at 737*. A work made for hire is defined as either "a work prepared by an employee within the scope of his or her employment" or certain types of commissioned or specially ordered works where "the parties expressly agree in a written instrument signed by them that the work shall be considered a work made for hire." *17 U.S.C. § 101*.

Here, the Defendants do not claim that there is a signed written instrument designating the photos taken by Sparig to be works made for hire. Accordingly, the work-for-hire doctrine applies only if Sparig was an employee and took the photos in the scope of his employment. *See* Reid, 490 U.S. at 738. In *Reid*, the Court held that "the term 'employee' should be understood in light of the general common law of agency," and thus does not include independent contractors. Id. at 741; *see also* id. at 751-53. Since the parties **[*13]** agree that Sparig worked for SRE as an independent contractor, not an employee, the photos are not works made for hire. *See* id. at 753; Valdez v. Laffey Assocs., No. 07-CV-4566 (BMC) (LB), 2010 U.S. Dist. LEXIS 30160, 2010 WL 1221404, at *4 (E.D.N.Y. Mar. 26, 2010).[5]

The Defendants have cited no provision under which the ownership of a copyright is affected by "common practice" in a particular industry. Since the work-for-hire doctrine does not apply and Defendants have advanced no additional theory for dismissal of the copyright infringement claim, the motion to dismiss is denied with respect to that claim as asserted against SRE, the allegedly infringing party.

C. *State Law Claims*

Sparig has asserted a wide variety of state-law claims. Because he has pleaded a viable federal copyright claim, I have supplemental jurisdiction over **[*14]** his state-law claims, which arise out of a common nucleus of operative facts involving Sparig's employment relationship with SRE. *See* 28 U.S.C. § 1367(a); *see also* United Mine Workers of Am. v. Gibbs, 383 U.S. 715, 725, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966); Achtman v. Kirby, McInerney & Squire, LLP, 464 F.3d 328, 335 (2d Cir. 2006).

Sparig's state-law claims include assault, fraudulent inducement, intentional infliction of emotional distress, abuse of process and violations of Article 12-A of the New York Real Property law, which regulates real estate brokers and salespersons. Many of these legal theories simply do not fit the facts alleged.[6]

However, a court must construe the complaint of a *pro se* litigant "liberally and interpret it 'to raise the strongest arguments that [it] suggest[s].'" Chavis v. Chappius, 618 F.3d 162, 170 (2d Cir. 2010) (quoting Harris v. City of New York, 607 F.3d 18, 24 (2d Cir. 2010)) (alterations in original). Construing the complaint in this matter, it is clear that Sparig has **[*15]** alleged viable claims for breach of contract and tortious interference with existing contractual relations and prospective economic advantage.[7]

The facts alleged clearly establish a breach of contract. Sparig was promised he would earn commissions of a certain amount to be paid at a certain time. He did not receive the full amount of the commissions he had earned and what he did receive was paid late, in breach of that promise. Sparig may sue to recover the unpaid commissions plus interest and, perhaps, any consequential damages that were reasonably contemplated by the parties. *See* Bi-Econ. Mkt., Inc. v. Harleysville Ins. Co. of N.Y., 10 N.Y.3d 187, 886 N.E.2d 127, 130, 856 N.Y.S.2d 505 (N.Y. 2008).

Sparig also has alleged SRE's tortious interference with his contractual relations with the landlord at 476 Jefferson Street. Sparig alleges that he had arranged to be the exclusive salesperson at 476 Jefferson Street, that SRE prevented him from obtaining the benefit of that agreement, which resulted in Sparig's inability to obtain

[5] In *Valdez*, the court held that photos of properties taken by a real estate salesperson constitute "listing information," ownership of which is vested in a real estate broker after the salesperson's "association" with the broker ends under New York law. *See* Valdez, 2010 U.S. Dist. LEXIS 30160, 2010 WL 1221404, at *5-6 (citing 19 N.Y. Comp. Codes R. & Regs. § 175.14). The Defendants here have not advanced this argument.

[6] I agree with the Defendants that, to the extent Sparig seeks prospective relief relating to the covenant not to compete, his claims are moot since the covenant has expired and no longer restricts him in any way.

[7] Although Sparig has not expressly pleaded a breach of contract claim, his fourteenth cause of action refers to "Nonpayment of Commissions." Am. Compl. p. 32.

commissions from that property. This **[*16]** establishes a viable tortious interference claim. *See Ullmannglass v. Oneida, Ltd., 86 A.D.3d 827, 927 N.Y.S.2d 702, 705 (App. Div. 2011)*.

Sparig has also alleged the sort of conduct that can support a claim for tortious interference with prospective economic advantage. *See Citi Mgmt. Grp., Ltd. v. Highbridge House Ogden, LLC, 45 A.D.3d 487, 847 N.Y.S.2d 33, 34 (App. Div. 2007)*; *see also Carvel Corp. v. Noonan, 3 N.Y.3d 182, 818 N.E.2d 1100, 1103, 785 N.Y.S.2d 359 (N.Y. 2004)*. Specifically, he has alleged that, in violation of New York law, SRE has withheld documents, refused to provide documentation of Sparig's work at SRE and threatened to commence litigation for an improper purpose of harassment. Through this conduct, SRE has inhibited Sparig from obtaining income from work as a real estate salesperson or broker. These alleged facts amount to a tortious interference with his prospective economic advantage.

Because I construe Sparig's complaint as sufficiently alleging claims for breach of contract, tortious interference with contractual relations and tortious interference with prospective economic advantage, the motion to dismiss is denied with respect to those claims.

D. *Piercing the Corporate Veil*

Although Sparig's dispute is with SRE (and Danenberg **[*17]** acting as SRE's principal), he has named a number of additional defendants, including Danenberg, Russell and various companies they are alleged to own. Since the owners and officers of a company are not ordinarily liable for injuries caused by the company, *see Walkovszky v. Carlton, 18 N.Y.2d 414, 223 N.E.2d 6, 7, 276 N.Y.S.2d 585 (N.Y. 1966)*, the Defendants other than SRE can be liable only if the Court pierces the corporate veil of SRE.[8]

Generally, "piercing the corporate veil requires a showing that: (1) the owners exercised complete domination of the corporation in respect to the transaction attacked; and (2) that such domination was used to commit a fraud **[*18]** or wrong against the plaintiff which resulted in plaintiff's injury." *Morris v. N.Y. State Dep't of Taxation & Fin., 82 N.Y.2d 135, 623 N.E.2d 1157, 1160-61, 603 N.Y.S.2d 807 (N.Y. 1993)*; *see also ABN AMRO Bank, N.V. v. MBIA Inc., 17 N.Y.3d 208, 952 N.E.2d 463, 475, 928 N.Y.S.2d 647 (N.Y. 2011)*; *MAG Portfolio Consultant, GMBH v. Merlin Biomed Grp. LLC, 268 F.3d 58, 63 (2d Cir. 2001)*.

Sparig alleges that Danenberg is the owner and chief operating officer of SRE and that he controls it and the other companies named as Defendants. Am. Compl. ¶¶ 130, 139. Sparig also alleges an abuse of the corporate form in that Danenberg threatened to commence frivolous litigation against Sparig for the purpose of causing him additional expense and delay while likewise shielding his own assets from any recovery through his use of corporate shells. *See, e.g., id*. ¶¶ 85,138; *see also Godwin Realty Assocs. v. CATV Enters., Inc., 275 A.D.2d 269, 712 N.Y.S.2d 39, 41 (App. Div. 2000)*; *Telenor Mobile Commc'ns AS v. Storm LLC, 587 F. Supp. 2d 594, 621 (S.D.N.Y. 2008)*, *aff'd*, *351 F. App'x 467 (2d Cir. 2009)*; *Feitshans v. Kahn, No. 06-CV-2125 (SAS), 2007 U.S. Dist. LEXIS 63028, 2007 WL 2438411, at *5 (S.D.N.Y. Aug. 24, 2007)* ("'Proof of a stripping of the assets' of a subsidiary by the parent, or of an entity by its shareholders, **[*19]** which is 'motivated by a desire to render the subsidiary [or entity] judgment proof,' constitutes a fraud or wrong in satisfaction of the second prong." (quoting *Carte Blanche (Sing.) PTE., Ltd. v. Diners Club Int'l, Inc., 758 F. Supp. 908, 917 (S.D.N.Y. 1991))* (alteration in original)). Accordingly, Sparig has sufficiently alleged that SRE's corporate veil may be pierced and Danenberg may be liable for SRE's conduct.

The same cannot be said with respect to any of the remaining Defendants.[9] Overlapping ownership is all that is alleged. Accordingly, the claims against those Defendants must be dismissed.

---

[8] The Defendants argue that Sparig cannot raise a piercing-the-veil claim for the first time in his opposition to their motion. But "an attempt of a third party to pierce the corporate veil does not constitute a cause of action independent of that against the corporation; rather it is an assertion of facts and circumstances which will persuade the court to impose the corporate obligation on its owners." *Morris v. N.Y. State Dep't of Taxation & Fin., 82 N.Y.2d 135, 623 N.E.2d 1157, 1160, 603 N.Y.S.2d 807 (N.Y. 1993)*. Thus, Sparig did not need to assert a separate claim to pierce the corporate veil.

CONCLUSION

For the reasons stated above, the Defendants' motion to dismiss is denied with respect to the claims for copyright infringement, breach of contract and tortious interference against SRE and Danenberg, and otherwise granted.

So ordered.

John Gleeson, U.S.D.J.

Dated: June 29, 2012

Brooklyn, New **[*20]** York

End of Document

---

[9] Danenberg and Russell have submitted affidavits stating that Russell owns 99% of SRE and Danenberg owns the remaining 1%. *See* Danenberg Aff. ¶¶ 3, 5, ECF No. 11; Russell Aff. ¶ 4, ECF No. 11. If Sparig wants to further amend his complaint based on this information, he may seek leave to do so.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

A *Fed. R. Civ. P. 12(b)(6)* motion to dismiss should be granted when, assuming the truth of the plaintiff's allegations, the complaint fails to state a claim for which relief can be granted. In deciding whether the plaintiff has stated a claim, the court must assume the plaintiff's allegations are true and draw all reasonable inferences in the plaintiff's favor. However, the court is not required to accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences. A court reads the complaint as a whole, together with matters appropriate for judicial notice, rather than isolating allegations and taking them out of context.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN2[] **Federal & State Interrelationships, Erie Doctrine**

In general, the federal district court will apply federal law to federal claims and will apply the state law of the transferor forum, including the transferor forum's choice-of-law rules, to state law claims.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN3[] **Heightened Pleading Requirements, Fraud Claims**

When a plaintiff alleges fraud, it must plead misstatements with particularity under *Fed. R. Civ. P. 9(b)*. *Rule 9(b)* requires plaintiffs to identify the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentation. The plaintiff must also identify the nature of the fraud through precise allegations explaining how the alleged misstatements were misleading or untrue when made.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN4[] **Heightened Pleading Requirements, Fraud Claims**

Fed. R. Civ. P. 9(b) does not allow a complaint to merely lump multiple defendants together but requires plaintiffs to differentiate their allegations when suing more than one defendant and inform each defendant separately of the allegations surrounding his alleged participation in the fraud.

Torts > ... > Fraud & Misrepresentation > Negligent Misrepresentation > General Overview

Torts > ... > Fraud & Misrepresentation > Actual Fraud > General Overview

HN5[] **Fraud & Misrepresentation, Negligent Misrepresentation**

Courts must be sensitive to the distinctions between breach of contract cases and misrepresentation cases; more so when a contract provides specific mechanisms for redress. Failure to maintain the distinctions between contract and fraud cases raises the potential for duplicative litigation and double recoveries. As importantly, serious violence is done to the contract by failing to respect the contractual remedies that each party has agreed to. For this reason, most courts to consider the issue hold that the breach of a contractual promise of future performance typically does not constitute a misrepresentation that will support an action for fraud.

Torts > ... > Fraud & Misrepresentation > Negligent Misrepresentation > General Overview

Torts > ... > Fraud & Misrepresentation > Actual Fraud > General Overview

HN6[] **Fraud & Misrepresentation, Negligent Misrepresentation**

The United States District Court for the Central District of California will follow the Ninth Circuit rule that the failure to honor a contractual obligation does not transform the original contract into a tortious misrepresentation. Such a rule is especially appropriate when the contract contains express provisions to redress the failures that the plaintiff complains of.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN7[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

To plead a violation of the Ohio Corrupt Activities Act, *Ohio Rev. Code Ann. § 2923.31 et seq.*, a plaintiff must allege that the defendant participated in, directly or indirectly, the affairs of the enterprise through a pattern of corrupt activity. *Ohio Rev. Code Ann. § 2923.32(A)(1)*.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN8[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

To violate the Ohio Corrupt Activities Act, *Ohio Rev. Code Ann. § 2923.31 et seq.*, each defendant must have been part of an enterprise. Enterprise includes any individual, sole proprietorship, partnership, limited partnership, corporation, trust, union, government agency, or other legal entity, or any organization, association, or group of persons associated in fact although not a legal entity. Enterprise includes illicit as well as licit enterprises. *Ohio Rev. Code Ann. § 2923.31(C)*.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN9[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The Ohio Corrupt Activities Act (OCAA), *Ohio Rev. Code Ann. § 2923.31 et seq.*, is patterned on the federal Racketeer Influenced and Corrupt Organizations Act, and Ohio courts look to federal decisions to interpret the OCAA.

Governments > Courts > Judicial Precedent

HN10[] **Courts, Judicial Precedent**

Ohio courts, though not bound by decisions from courts within the Sixth Circuit, frequently cite such decisions and would likely find them more persuasive than decisions from outside the Sixth Circuit.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN11[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The United States Court of Appeals for the Sixth Circuit has held that for purposes of the Racketeer Influenced and Corrupt Organizations Act, an enterprise must exist separate and apart from the defendant. Under this requirement, a corporation may not be liable for participating in the affairs of an enterprise that consists only of its own subdivisions, agents, or members. The Ohio courts that have considered the question agree.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN12[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

For purposes of the Racketeer Influenced and Corrupt Organizations Act, an association-in-fact enterprise must have at least three structural features: a purpose, relationships among those associated with the enterprise, and longevity sufficient to permit these associates to pursue the enterprise's purpose.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN13[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Parties that enter commercial relationships for their own gain or benefit do not constitute an enterprise for purposes of the Racketeer Influenced and Corrupt Organizations Act.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN14[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

A corporation and a law firm acting as its agent are not insufficiently distinct so as to form a Racketeer Influenced and Corrupt Organizations Act enterprise.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN15[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Under a doctrine called the something more test, a parent and its subsidiary may constitute a Racketeer Influenced and Corrupt Organizations Act enterprise when each plays a different role or the decision to operate through a subsidiary facilitates the activity of the enterprise in some way. The something more test has not been endorsed by the United States Courts of Appeals for the Ninth or Sixth Circuits, or any Ohio court. The United States District Court for the Central District of California finds no indication that an Ohio court would apply the something more exception to the Ohio Corrupt Activities Act, *Ohio Rev. Code Ann. § 2923.31 et seq.*

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN16[] **Civil Conspiracy, Elements**

A civil conspiracy is a malicious combination of two or more persons to injure another person or property, in a way not competent for one alone, resulting in actual damages.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN17[] **Civil Conspiracy, Elements**

The Ohio Supreme Court has never addressed the intra-corporate conspiracy doctrine. However, the United States Court of Appeals for the Sixth Circuit predicted that the Ohio Supreme Court would adopt the doctrine. The Sixth Circuit drew upon a common sense insight that a person cannot conspire with himself and held that, since a corporation only acts through its officers, a group of corporate officers acting within the scope of employment cannot create a conspiracy.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN18[] Civil Conspiracy, Elements

The United States District Court for the Southern District of Ohio accepted the intra-corporate conspiracy doctrine but found that it did not apply to unrelated legal entities just because those entities share an employee. The court also recognized the doctrine as applied to employees acting within the scope of their employment, but declined to extend it to corporate subsidiaries. Other case law clarifies that the doctrine does not apply to employees acting outside the scope of their employment.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN19[] Civil Conspiracy, Elements

The intra-corporate conspiracy doctrine shields employees acting within the scope of their employment. The United States District Court for the Central District of California agrees; it will follow the United States Court of Appeals for the Sixth Circuit and the intermediate Ohio courts on this issue.

Governments > Courts > Judicial Precedent

HN20[] Courts, Judicial Precedent

In the absence of a controlling state supreme court decision, the federal court must predict how the state supreme court would decide an issue. It is appropriate to use intermediate appellate court decisions, statutes, and decisions from other jurisdictions as interpretive aids.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN21[] Civil Conspiracy, Elements

The United States District Court for the Central District of California concludes that, if faced with the question, the Ohio Supreme Court would hold that a corporation and its subsidiaries are not capable of conspiring with each other. First, while courts and states disagree, a majority appear to have adopted the intra-corporate conspiracy doctrine in the context of subsidiaries. Second, the majority view better serves the purpose of conspiracy law. The bedrock of any conspiracy claim is a malicious combination. The United States Court of Appeals for the Sixth Circuit noted that it is common sense that employees of a corporation do not combine when they act within the scope of their employment, they merely fulfill their role as agents of the corporation. In many ways though, an employee is more capable of combination with an employer than is a subsidiary. An employee, at least, is a human being capable of motivations distinct from his employer. A subsidiary is capable of no such independence; it is entirely controlled by the parent company.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN22[] Civil Conspiracy, Elements

The United States District Court for the Central District of California finds that, were the Ohio Supreme Court to consider the issue, it would find that members of the same corporate family, including subsidiaries, are incapable of conspiring with each other.

Securities Law > ... > Civil Liability > Blue Sky Fraud > General Overview

HN23[] **Civil Liability, Blue Sky Fraud**

Blue sky laws are designed to regulate securities transactions within (or impacting) a particular state. If a transaction touches multiple states, it follows that multiple blue sky laws may apply simultaneously. The United States District Court for the Central District of California agrees with the majority view that a plaintiff may sue under the securities laws of several states at once so long as the requirements of each state's law are met.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN24[] **Federal & State Interrelationships, Choice of Law**

Under New York law, the first step in a choice-of-law analysis is to determine whether an actual conflict exists.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN25[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

New York does not permit any private action under its racketeering law. *N.Y. Penal Law § 460.20*.

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN26[] **Concerted Action, Civil Conspiracy**

New York law does not recognize a tort action for civil conspiracy.

Torts > ... > Fraud & Misrepresentation > Negligent Misrepresentation > Elements

HN27[] **Negligent Misrepresentation, Elements**

Applying New York law, the United States District Court for the Central District of California has repeatedly dismissed negligent misrepresentation claims by residential mortgage-backed securities investors for failure to plead a special relationship between the investor and the lender. Some courts find that Ohio has a similar special relationship requirement. Other courts eschew the special relationship language in favor of a requirement that (1) the defendant must provide false information for the guidance of the plaintiff in its business transactions and (2) the plaintiff must be the person or one of a limited group of persons for whose benefit and guidance the defendant intends to supply the information or knows that the recipient intends to supply it. In those courts' view, special relationship is merely convenient shorthand for the limiting (to information provided for use in business transactions and to a limited group) elements of a negligent misrepresentation claim.

Torts > ... > Fraud & Misrepresentation > Negligent Misrepresentation > Elements

HN28[] **Negligent Misrepresentation, Elements**

Ohio law does not impose a separate special relationship requirement. Rather, the term is properly viewed as shorthand for the limiting elements of the negligent misrepresentation cause of action.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN29[] **Class Actions, Prerequisites for Class Action**

The general rule is that the investing public is not a sufficiently limited class.

Opinion

ORDER RE SUBSTANTIVE MOTIONS TO DISMISS

I. INTRODUCTION & BACKGROUND

This Order concerns Defendants' motions **[*4]** to dismiss the related *Western and Southern Life Ins. Co. v. Countrywide Fin. Corp.*, 11-CV-07166-MRP (MANx) ("*Western and Southern*") and *National Integrity Life Ins. Co. v. Countrywide Fin. Corp.*, 11-CV-09889-MRP (MANx) ("*National Integrity*") actions. *Western and Southern* and *National Integrity* are part of Multidistrict Litigation No. 2265, captioned *In Re Countrywide Financial Corp. Mortgage-Backed Securities Litigation* ("the MDL"). The plaintiffs in *Western and Southern* and *National Integrity* allege violations of the Securities Act of 1933 ("the Securities Act"), the Exchange Act of 1934 ("the Exchange Act"), and a number of state laws in connection with their purchase of residential mortgage-backed securities ("RMBS") in offerings structured and sold by several of the defendants. Specifically, the *Western and Southern* and *National Integrity* plaintiffs ("Plaintiffs") argue that Countrywide Financial Corporation ("CFC"), its subsidiaries, and its former management misrepresented the quality of the underlying loans in the RMBS Certificates [1] that plaintiffs purchased. [2] They also allege that the defendants misrepresented that they would comply with various policies, best practices, **[*5]** and laws related to the transfer, servicing, and maintenance of the loans in the Offerings. Finally, Plaintiffs allege that Bank of America and several related entities are liable as Countrywide's successor.

With the Court's approval, Defendants bifurcated the briefing of motions to dismiss in *Western and Southern* and *National Integrity*. On March 9, 2012, the Court issued an order (the "First Round Order") dismissing many of the claims and defendants on the basis of timeliness and jurisdiction. *In re Countrywide Fin. Corp. Mortgage-Backed Sec. Litig., 2:11-ML-02265-MRP, 2012 U.S. Dist. LEXIS 60776, 2012 WL 1097244, at *16 (C.D. Cal. Mar. 9, 2012)*. The claims that remain in Western and Southern are: (i) two claims under the Exchange Act of 1934 that hinge upon alleged misrepresentations regarding transfer of title and loan servicing; (ii) five claims under the Ohio Securities Act that hinge upon the same transfer-of-title and servicing allegations; (iii) claims for fraud and negligent misrepresentation that hinge upon the same transfer-of-title and servicing allegations; (iv) a claim under the Ohio Corrupt Activities **[*7]** Act ("OCAA") alleging that Defendants were part of a racketeering enterprise organized for the purpose of originating risky loans, packaging those loans into RMBS, selling the RMBS to investors, and then failing to service the loans properly; (v) a claim for civil conspiracy alleging that Defendants formed an association-in-fact for the same purposes; and (vi) claims that Bank of America and related entities are liable as Countrywide's

---

[1] A Certificate is a document that shows ownership of a mortgage-backed security issued pursuant to a registration statement and prospectus supplement in a public offering. Each Certificate represents a particular tranche within an offering. Because "Certificate" refers to the document evidencing ownership of a specific tranche, the Court uses the terms "tranche" and "Certificate" somewhat interchangeably. An Offering refers to the process by which the Certificates were sold to Plaintiffs. The Offering Documents refer to the Registration Statements, Prospectuses and Prospectus Supplements, Term Sheets, and other written materials pursuant to which the Certificates were offered.

[2] The Defendants are: CWALT, Inc., CWABS, Inc., CWMBS, Inc., CWHEQ, Inc., (the "Depositors"), CFC, Countrywide Home Loans, Inc. ("CHL"), Countrywide Capital Markets, LLC ("CCM"), Countrywide Securities Corp. ("CSC") (together with the Depositor Defendants, the "Countrywide Defendants" or "Countrywide"), Bank **[*6]** of America Corp., Bank of America, N.A., BAC Home Loans Servicing, LP, NB Holdings Corp. ("Bank of America" or the "Bank of America Defendants"), Angelo Mozilo, David Sambol, Eric Sieracki, Ranjit Kripalani, Stanford Kurland, David Spector, N. Joshua Adler, and Jennifer Sandefur (the "Individual Defendants").

successor. The same claims remain in *National Integrity*. In addition, *National Integrity* includes common law fraud and negligent misrepresentation claims alleging misrepresentations regarding underwriting, appraisals, loan-to-value ratios, and ratings. [3]

Defendants have moved to dismiss the remaining claims in both *Western and Southern* and *National Integrity*. Those issues are fully briefed, and the Court heard extensive oral argument on June 13, 2012. As set out more fully below, Plaintiffs have failed to allege that any statement made by the **[*8]** Defendants regarding transfer of title or servicing was actionably false. Plaintiffs have also failed to allege either an "enterprise" as required by the OCAA or an association-in-fact as required to plead civil conspiracy. National Integrity has also failed to allege a negligent misrepresentation claim under Ohio law. Finally, National Integrity's successor liability claims are defective under Delaware law. Defendants have raised a number of other grounds for dismissal; the Court finds it unnecessary to address them at this time. For the reasons set out below, *Western and Southern* is dismissed in its entirety. *National Integrity* is dismissed except for the portion of Cause of Action Fourteen related to underwriting, appraisals, loan-to-value ratios, and ratings.

II. LEGAL STANDARDS

HN1[] A *Rule 12(b)(6)* motion to dismiss should be granted when, assuming the truth of the plaintiff's allegations, the complaint fails to state a claim for which relief can be granted. *See* *Epstein v. Washington Energy Co., 83 F.3d 1136, 1140 (9th Cir. 1996)*. In deciding whether the plaintiff has stated a claim, the Court must assume the plaintiff's allegations are true and draw all reasonable inferences in the **[*9]** plaintiff's favor. *Usher v. City of Los Angeles, 828 F.2d 556, 561 (9th Cir. 1987)*. However, the Court is not required to accept as true "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)*. A court reads the complaint as a whole, together with matters appropriate for judicial notice, rather than isolating allegations and taking them out of context. *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)*.

HN2[] In general, the Court will apply Ninth Circuit law to federal claims and will apply the state law of the transferor forum, including the transferor forum's choice-of-law rules, to state law claims. *In re Nucorp Energy Sec. Litig., 772 F.2d 1486, 1492 (9th Cir. 1985)*. More detailed choice-of-law analysis is performed as required for particular claims.

III. WESTERN AND SOUTHERN

Plaintiffs The Western and Southern Life Insurance Company, Western-Southern Life Assurance Company, Columbus Life Insurance Company, Integrity Life Insurance Company, and Fort Washington Investment Advisors, Inc., (collectively "Western and Southern") allege violations of the Exchange Act **[*10]** and Ohio law in connection with Western and Southern's purchase of 36 Certificates.

A. Western and Southern's Transfer of Title Allegations Do Not Plead Falsity

The federal, [4] OSA, [5] fraud, [6] and negligent misrepresentation [7] causes of action asserted require Western and Southern to identify a misrepresentation. ***HN3***[] Because Western and Southern alleges fraud, it must plead

---

[3] Those claims were time-barred under the two-year statute of limitations applicable in *Western and Southern*, but not the six-year period applicable to *National Integrity. First Round Order, 2012 U.S. Dist. LEXIS 60776, 2012 WL 1097244, at *16*.

[4] *Stoneridge Inv. Partners, LLC v. Scientific-Atlanta, 552 U.S. 148, 157, 128 S. Ct. 761, 169 L. Ed. 2d 627 (2008)* (A *§ 10(b)* "plaintiff must prove . . . a material misrepresentation or omission by the defendant . . . ."); *15 U.S.C. § 78t(a)* (requiring a primary violation for liability under *§ 20(a)*).

those misstatements with particularity under Fed. R. Civ. P. 9(b). Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1104 (9th Cir. 2003) ("It is established law, in this circuit and elsewhere, that Rule 9(b)'s particularity requirement applies to state-law causes of action."). Rule 9(b) requires plaintiffs to identify the "time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentation." Sanford v. MemberWorks, Inc., 625 F.3d 550, 558 (9th Cir. 2010). Western and Southern must also identify the nature of the fraud through "precise allegations explaining how the alleged misstatements were misleading or untrue when made." In re Stac Elecs. Sec. Litig, 89 F.3d 1399, 1409 (9th Cir. 1996). Western and Southern's Amended Complaint (the "AC") identifies three statements **[*11]** with the required "time, place, content" level of specificity:

- A representation that "each loan is secured by a valid lien on, or a perfected security interest with respect to, the Property." AC ¶ 205 (quoting CWALT 2007-16CB Prospectus Supplement at 26);
- A representation that:

    [O]n the closing date, the depositor will sell, transfer, assign, set over and otherwise convey without recourse to the trustee in trust for the benefit of the certificateholders all right, title and interest of the depositor in and to each mortgage loan and all right, title and interest in and to all other assets included in Alternative Loan Trust 2007-16CB, including all principal and interest received on or with respect to the mortgage loans, but not any principal and interest due on or before the cut-off date.

    In connection with the transfer and assignment of a mortgage loan, the depositor will deliver or cause to be delivered to the trustee, or a custodian for the trustee, the mortgage file, which contains among other things,

    □ The original mortgage note (and any modification or amendment to it) endorsed in blank without recourse, except that the depositor may deliver or cause to be delivered a lost note **[*12]** affidavit in lieu of any original mortgage note that has been lost;

    □ The original instrument creating a first lien on the related mortgaged property with evidence of recording indicated thereon or a copy of such instrument;

    □ An assignment in recordable form of the mortgage or a copy of such assignment;

    □ If applicable, all recorded intervening assignments of the mortgage or copies thereof and any riders or modifications to the mortgage note and mortgage or copies thereof (except for any documents not returned from the public recording office, which will be delivered to the trustee as soon as the same is available to the depositor). AC ¶ 206 (quoting CWALT 2007-16CB Prospectus Supplement at S-39 to S-40);
- A representation that:

    For any mortgage held through the MERS® System, the mortgage is recorded in the name of Mortgage Electronic Registration Systems, Inc., or MERS, as nominee for the owner of the mortgage loan, and subsequent assignments of the mortgage were, or in the future may be, at the discretion of the master servicer, registered electronically through the MERS® System. For each of **[*13]** these mortgage loans, MERS serves as mortgagee of record on the mortgage solely as a nominee in an administrative capacity

---

[5] *See* Ohio Rev. Code §§ 1707.41 (Plaintiff must plead "the falsity of any material statement"); 1707.44(B)(4) ("No person shall knowingly make or cause to be made any false representation concerning a material and relevant fact . . . ."); 1707.44(B)(4) (Prohibiting statements or advertisements "when the person knows that the statement or advertisement is false in any material respect."); 1707.44(G) (requires predicate violation of OSA); 1707.43 (requires predicate violation of OSA).

[6] Burr v. Bd. of County Com'rs of Stark County, 23 Ohio St. 3d 69, 69, 23 Ohio B. 200, 491 N.E.2d 1101 (1986) (Fraud allegation requires "a representation . . . of a fact . . . made falsely").

[7] Delman v. City of Cleveland Heights, 41 Ohio St. 3d 1, 4, 534 N.E.2d 835 (1989) **[*14]** (negligent misrepresentation requires the Defendant to "suppl[y] false information for the guidance of others in their business transactions").

on behalf of the trustee, and does not have any interest in the mortgage loan. AC ¶ 207 (quoting CWALT 2007-16CB Prospectus Supplement at S-41).

These three statements appear in the CWALT 2007-16CB Prospectus Supplement, and substantially identical statements appear in the Prospectus Supplements for each of the other Certificates. AC ¶¶ 205-07. It is apparent from the pleadings and from the judicially noticeable Prospectus Supplements and PSAs that none of the three statements is false.

The first statement identified by Western and Southern is a representation that "each loan is secured by a valid lien on, or a perfected security interest with respect to, the Property." AC ¶ 205 (quoting CWALT 2007-16CB Prospectus Supplement at 26). Nothing in the AC casts doubt on this statement. The transfer of title allegations in paragraphs 205 through 240 say nothing about the validity of liens, the perfection of security interests, or the rather straightforward principle that loans are secured by liens. Western and Southern attempts to match the statement to its theory of harm by ascribing to it the following meaning: "each mortgage represented a valid lien *such* ***[*15]*** *that the issuing trust could foreclose* upon the mortgage in the event of a borrower's default." AC ¶ 205 (emphasis added). Nothing about the context of the statement suggests such a reading. On the contrary, it appears in a section of the Prospectus Supplements titled "Representations by Sellers; Repurchases." That section begins by stating that, "[e]ach seller or, in some cases, originator, will have made representations and warranties in respect of the loans sold" and that one of those representations may be "that each loan is secured by a valid lien." CWALT 2007-16CB Prospectus Supplement at 26. This statement has nothing to do with whether a trustee will be able to foreclose in the event of default; read properly, it does not even relate to whether the loans are properly secured by liens. Instead, it relates to representations that *may* be made by sellers. Nothing in the AC indicates that sellers may not have made such representations.

Like the first, the second statement has been quoted without reference to its context. The statement appears in a section of the Prospectus Supplement titled "Assignment of the Mortgage Loans" and begins, "*[p]ursuant to* ***[*16]*** *the pooling and servicing agreement*, on the closing date, the depositor will sell, transfer, assign, set over and otherwise convey without recourse to the trustee in trust for the benefit of the certificateholders all right, title and interest of the depositor in and to each mortgage loan . . . ." CWALT 2007-16CB Prospectus Supplement at S-39 (emphasis added). In securitization, a prospectus supplement is used to market the asset-backed security, while the PSA is the actual governing document for the trust. The timing of the process is such that RMBS are marketed and sold before a PSA has been finalized and made available to investors. Prospectus Supplements therefore will typically summarize the PSA for investors that would not otherwise have access to its terms. An RMBS investor reading the "Assignment of the Mortgage Loans" section identified by Western and Southern would understand that the "pursuant to the pooling and servicing agreement" language indicates that the section is meant as a description of the PSA rather than an independent manifestation of present intent. And, Western and Southern has not alleged that the Prospectus Supplement states any term of the PSA inaccurately. **[*17]** On the contrary, each portion of the second statement matches a portion of the PSA. *See* CW RJN 34; 54.

Western and Southern's allegations with respect to the second statement also fail to differentiate the Defendants as required by *Rule 9(b)*. The section states that, under the PSA, the *depositor* will transfer the loan and deliver the mortgage file to the trustee or the trustee's custodian. Paragraphs 209 through 217 of the AC do not mention the Depositors or indicate that the Depositors failed to take any action that they were mandated to take under the PSAs. On the contrary, this section of the AC refers to "Countrywide," a defined term that includes each of the Countrywide Defendants. But, ***HN4***[] "*Rule 9(b)* does not allow a complaint to merely lump multiple defendants together but requires plaintiffs to differentiate their allegations when suing more than one defendant and inform each defendant separately of the allegations surrounding his alleged participation in the fraud." *Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007)* (citations and quotations omitted). For the second statement to be actionable, the AC would have to explain what actions the Depositors failed to take and which **[*18]** specific Defendants knew or should have known that the Depositors would fail to take those actions. The AC suggests that this would be a difficult task. Its allegation is that the physical mortgage documents remained with the *servicers*, not the Depositors. AC ¶¶ 209-17. The AC does not allege that the servicers were not the "custodians" of the trustees, as contemplated by the Prospectus Supplements and PSAs. *Id.* On the face of the AC, it is therefore difficult to determine (i) which Defendants could have misrepresented the Depositors' intentions and (ii) what the Depositors could or should have done differently.

Finally, nothing in the AC indicates that the third statement was false when it was made. Western and Southern argues that "Defendants' representations in the Offering Materials that MERS would be the 'beneficial owner' of each mortgage were false." AC ¶ 242. But, the statement regarding MERS in the Prospectus Supplement does not contain the words "beneficial owner." Instead, the statement says, in effect, that the mortgages may be recorded in MERS' name but that MERS serves as mortgagee only in an administrative capacity. CWALT 2007-16CB Prospectus Supplement at S-41. Western **[*19]** and Southern has not identified any reason why that statement is false or misleading.

The Court's distinctions may seem pedantic, but they illustrate a fundamental problem with Western and Southern's theory. The title transfer allegations that remain in the AC allege a litany of failures. Defendants allegedly "lost, failed to timely create, or failed to timely deliver the paperwork necessary to prove title to the mortgages and the notes under state law." AC ¶ 208. They allegedly did not comply with various states' "strict rules governing assignment of mortgages, and transfer of promissory notes and loan files." *Id.* ¶ 209. They then allegedly engaged in a cover-up by back-dating documents, signing fraudulent affidavits, and improperly pressuring homeowners. *Id.* ¶¶ 209-40. These are serious allegations and the Court does not minimize them. But if the allegations regarding assignment and servicing are true, the PSAs contain explicit provisions that allow the servicer to "put" undocumented or otherwise unsatisfactory loans back to the originators. CWALT 2007-16CB Prospectus Supplement at S-41. The Prospectus Supplements explicitly state that "[t]he cure, repurchase or substitution obligation **[*20]** constitutes the sole remedy available to certificateholders or the trustee for omission of, or a material defect in, a mortgage loan document." *Id.*

To the extent that the problems that Western and Southern identifies are actionable, it would be as claims for breach of contract or breach of fiduciary duty. ***HN5***[] Courts must be sensitive to the distinctions between such cases and misrepresentation cases; more so when a contract provides specific mechanisms for redress as the PSAs do here. Failure to maintain the distinctions between contract and fraud cases raises the potential for duplicative litigation and double recoveries. As importantly, serious violence is done to the contract by failing to respect the contractual remedies that each party has agreed to. *See Lockerby v. Sierra, 535 F.3d 1038, 1041-42 (9th Cir. 2008)* (More than intentional breach of contract necessary to commit "tortious conduct."). For this reason, most courts to consider the issue have held that the "breach of a contractual promise of future performance typically does not constitute a misrepresentation that will support an action for fraud." *Reese v. BP Exploration (Alaska) Inc., 643 F.3d 681, 691 (9th Cir. 2011)*; *see* ***[*21]*** *also United States v. Blankenship, 382 F.3d 1110, 1133 (11th Cir. 2004)* ("A 'promise' contained in a contract is not a certification that the promisor will actually perform the specified acts."); *Mills v. Polar Molecular Corp., 12 F.3d 1170, 1176 (2d Cir. 1993)* ("The failure to carry out a promise made in connection with a securities transaction is normally a breach of contract. It does not constitute fraud unless, when the promise was made, the defendant secretly intended not to perform or knew that he could not perform."); *IDT Corp. v. eGlobe, Inc., 140 F.Supp.2d 30, 35 (D.D.C. 2001)* (same).

BP Exploration, cited above, is on point. There, an oil exploration trust repeatedly filed copies of a contract with the SEC as required by various regulatory requirements. *643 F.3d at 686*. The trust repeatedly filed the contract despite the fact that, at the time of each filing, the trust was allegedly in breach of one of the contract's provisions. *Id.* The Ninth Circuit held that "contract breach is not a sufficient predicate for securities fraud" and ordered the case dismissed. The plaintiff had argued that the repeated filing of the contract (which had been forward-looking when originally signed) **[*22]** created a false impression of continuing compliance. *Id. at 691*. The Ninth Circuit disagreed, holding that "a reasonable investor would likely view the Trust's attachment of the [contract] to its SEC filings as a statement of the rights of the Trust and its unit holders, not as certification by [the Defendant] that all of its operations were in compliance with the [contract]." *Id. at 693*. This holding reflects the commonplace understanding that, "[a] 'promise' contained in a contract is not a certification that the promisor will actually perform the specified acts," it is merely an expression of the party's contractual obligation. *Id. at 691* (citing *Blankenship, 382 F.3d at 1133*). Indeed, the cases cited by the Ninth Circuit made clear that the contract in *BP Exploration* was not actionable both because it was forward-looking and because a contractual obligation is not a promise to perform, but rather a promise to either perform or submit to the contractual remedy. *Id. at 691-94*.

Western and Southern cites cases for the principle that a promise to perform a future act may be an actionable misrepresentation when the defendant has no intention of keeping the promise at the time that it **[*23]** makes the promise. Opp. at 46-47 (citing *Tibbs v. Nat'l Homes Constr. Corp., 52 Ohio App. 2d 281, 287, 369 N.E.2d 1218 (12th Dist. 1977)*. However, none of the cases cited by Western and Southern arose in the context of a "promise" to comply with contractual obligations. [8], [9] In the absence of any such authority, ***HN6***[] the Court will follow the Ninth Circuit rule that the failure to honor a contractual obligation does not transform the original contract into a tortious misrepresentation. Such a rule is especially appropriate when, as here, the PSA contains express provisions to redress the failures that Western and Southern complains of. Stripped to its essentials, the AC makes the same allegation as the plaintiff in *BP Exploration*, except that the AC is one level more attenuated. There, the plaintiff alleged that the contract itself contained a false statement. Here, Western and Southern alleges that an accurate *description* of the contract (here the PSA) is false because the defendants did not intend to follow the PSA. Even if the Defendants did not intend to follow the PSA, [10] their description of its contractual obligations was accurate, and any failure to meet those obligations is better addressed through **[*24]** other means.

For the reasons discussed above, the statements contained in Paragraphs 205 through 207 of the AC are not actionable misstatements. Causes of Action One, Two, Three, Four, Five, Seven, Eight, Nine, and Fourteen are predicated on an actionable misrepresentation. Western and Southern has failed to **[*25]** plead any such misrepresentation. Accordingly, Causes of Action One, Two, Three, Four, Five, Seven, Eight, Nine, and Fourteen are **DISMISSED WITH PREJUDICE**.

B. The OCAA Claim Does Not Allege an Enterprise

Cause of Action Six alleges a violation of the Ohio Corrupt Activities Act ("OCAA"), *Ohio Rev. Code §§ 2923.31-36*. AC ¶¶ 418-26. Specifically, it alleges that CFC, CHL, CCM, CSC, CWABS, CWALT, CWHEQ, CWMBS, Mozilo, Sambol, Bank of America, Bank of America, N.A., and BAC Servicing, together with non-party entities such as correspondent lenders, RMBS underwriters, appraisers, foreclosure law firms, PMI insurers, and the Bank of New York were part of a racketeering enterprise with the common purpose of originating risky loans, packaging those loans into RMBS, selling the RMBS to investors, and then failing to service the loans properly. *Id.* ¶¶ 420-21. ***HN7***[] To plead a violation of the OCAA, Western and Southern must allege that Defendants "participate[d] in, directly or indirectly, the affairs of the enterprise through a pattern of corrupt activity." *Ohio Rev. Code § 2923.32(A)(1)*. The AC does not plead an "enterprise" as required by the statute and therefore must be dismissed.

HN8[] To violate the **[*26]** OCAA, each Defendant must have been part of an "enterprise." "'Enterprise' includes any individual, sole proprietorship, partnership, limited partnership, corporation, trust, union, government agency, or other legal entity, or any organization, association, or group of persons associated in fact although not a legal entity. 'Enterprise' includes illicit as well as licit enterprises." *Ohio Rev. Code § 2923.31(C)*. ***HN9***[] The OCAA is patterned on the federal RICO statute, and Ohio courts look to federal decisions to interpret the OCAA. *Herakovic v.*

---

[8] *Burlington Ins. Co. v. Artisan Mech., Inc.*, relied upon by Western and Southern, merely stands for the proposition that a misrepresentation as to the *existence* of a contract may be actionable. *188 Ohio App. 3d 560, 566, 2010 Ohio 3142, 936 N.E.2d 114 (Ohio Ct. App. 1st Dist. 2010)*.

[9] The Court further notes that the AC fails to plead with specificity facts that would allow the Court to infer that, at the time the Prospectus Supplements were issued, specific defendants intended for other specific defendants to violate the transfer-of-title provisions in the PSAs. Were this the AC's only deficiency, repleading the misrepresentation claims might be appropriate. As discussed above, it is not.

[10] As discussed above, the Court accepts this proposition for the sake of argument but notes that Western and Southern has failed to plead subjective intent not to perform with the requisite level of specificity under *Rule 9(b)*.

Catholic Diocese of Cleveland, 2005 Ohio 5985, P15, 2005 WL 3007145, at *3 (Ohio Ct. App. Nov. 10, 2005) ("[F]ederal case law interpreting the federal RICO law" should not be ignored.) (citing Universal Coach, Inc. v. New York City Transit Auth., Inc., 90 Ohio App. 3d 284, 291, 629 N.E.2d 28 (1993)). [11]

HN11[] The Sixth Circuit has held that an enterprise must exist separate and apart from the defendant. Shields v. UnumProvident Corp., 415 F. App'x 686, 691 (6th Cir. 2011) ("[T]he 'person' charged with violating RICO [must] be a separate entity from the 'enterprise.'"). "Under this requirement, a corporation may not be liable . . . for participating in the affairs of an enterprise that consists only of its own subdivisions, agents, or members." *Id.* The Ohio courts that have considered the question have agreed. *See* Herakovic, 2005 Ohio 5985, P25, 2005 WL 3007145, at *4 (Ohio Ct. App. Nov. 10, 2005) (dismissal appropriate because "appellants have not pled the individuals separate from the enterprise."). [12] This rule is practical and gives proper effect to the purpose of the statute. If members of a corporate family could constitute a RICO enterprise, then every act of corporate malfeasance could also be pleaded as a RICO violation, complete with its longer statute of limitations, joint and several liability, and other advantages. Each of the named OCAA defendants is a Countrywide parent, subsidiary, **[*28]** or agent. Under Shields and Herakovic, the named defendants cannot, on their own, constitute an enterprise.

Western and Southern also alleges that a number of non-parties combined with the Countrywide Defendants to form an enterprise to profit from the sale, securitization, and servicing of Countrywide mortgage loans. Opp. at 9; AC ¶ 421. HN12[] "[A]n association-in-fact enterprise must have at least three structural features: a purpose, relationships **[*29]** among those associated with the enterprise, and longevity sufficient to permit these associates to pursue the enterprise's purpose." Boyle v. United States, 556 U.S. 938, 946, 129 S. Ct. 2237, 173 L. Ed. 2d 1265 (2009). The AC plausibly alleges that the various non-parties had longstanding business relationships with the Countrywide Defendants. Nothing in the AC, however, creates a plausible inference that the purpose of those relationships was to "profit illegally from the sale, securitization, and servicing of Countrywide mortgage loans." Opp. at 9. On the contrary, from the face of the AC it appears that each of the non-parties identified by Western and Southern entered into a business relationship for their own commercial reasons. Even if the Court credits Western and Southern's assertion that the non-parties' actions assisted Countrywide in a scheme to "profit illegally from the sale, securitization, and servicing of Countrywide mortgage loans," (Opp. at 9) the AC makes clear that the assistance was in response to each entity's own business incentives. HN13[] Parties that enter commercial relationships "for their own gain or benefit" do not constitute an "enterprise." City of Cleveland v. Woodhill Supply, Inc., 403 F. Supp. 2d 631, 635 (N.D. Ohio 2005) **[*30]** (citing VanDenBroeck v. CommonPoint Mortgage Co., 210 F.3d 696, 699 (6th Cir. 2000) (abrogated on other grounds by Bridge v. Phoenix Bond & Indem. Co., 553 U.S. 639, 646, 128 S. Ct. 2131, 170 L. Ed. 2d 1012 (2008))); *see also* Morrow v. Reminger & Reminger Co., L.P.A., 183 Ohio App. 3d 40, 60, 2009 Ohio 2665, 915 N.E.2d 696 (2009) (no enterprise when each party acts in its "contractual" role); Robins v. Global Fitness Holdings, LLC, 838 F. Supp. 2d 631, 653, 2012 WL 163031, at *18 (N.D. Ohio 2012) ("routine business relationships, without more, are insufficient to establish a RICO claim"); Javitch v. Capwill, 284 F.Supp.2d 848, 857 (N.D. Ohio 2003) (business relationship, even one that furthers a fraud, is insufficient to plead a RICO enterprise); Wuliger v. Liberty Bank, No. 3:02 CV 1378, 2004 U.S. Dist. LEXIS 27353, at 18, 2004 WL 3377416 (N.D. Ohio 2004) (provision of banking services, without more, does not constitute a RICO enterprise).

---

[11] The parties agree that the Court should look to federal law for interpretation of the OCAA. They disagree as to which Circuit's precedent is most helpful. The Court is interpreting an Ohio law. HN10[] Ohio courts, though not bound by decisions from courts within the Sixth Circuit, frequently cite such decisions and would likely find them more persuasive than decisions from outside the Sixth **[*27]** Circuit. The Court therefore gives preference to decisions from within the Sixth Circuit in the OCAA portion of this Order.

[12] Ohio courts are split on the related question of whether a plaintiff must also plead an enterprise distinct from the alleged pattern of corrupt activity. *Compare* State v. Lynch, 2012 Ohio 2521, P21, 2012 WL 2050862, at *4 (Ohio Ct. App. June 6, 2012) ("We will therefore herein consider whether the State indeed demonstrated a 'structure separate and apart, or distinct, from the pattern of corrupt activity' concerning appellant's heroin-dealing activities.") *with* State v. Baker, 2012 Ohio 887, P12, 2012 WL 707093, at *3 (Ohio Ct. App. Mar. 5, 2012) ("[T]his court has expressly rejected the notion that the state must prove that the enterprise is an entity separate and apart from the pattern of activity in which it engages."). The Court does not find it necessary to reach this question.

A recent case from the Southern District of Ohio is instructive. In *HMV Properties, LLC v. IDC Ohio Management., LLC,* plaintiffs brought a federal RICO claim against a number of defendants. *2:08-CV-895, 2011 U.S. Dist. LEXIS 1161, 2011 WL 53166, at *1 (S.D. Ohio Jan. 6, 2011)*. The plaintiffs alleged that they bought a number of Dairy Queen franchises based on "over-inflated property **[*31]** appraisals, over-hyped 'triple-net' leases, and the overstated expertise of several of the [d]efendants." *Id.* They further alleged that the various appraisers, brokers, sellers, and managers of the franchises formed an enterprise with the purpose of duping the plaintiffs into purchasing over-valued assets. *Id.* The court found that the plaintiffs had failed to allege an enterprise because, "[p]laintiffs have alleged only a string of actions taken by [d]efendants either severally or in small sub-groups, and they have alleged no facts that support any allegation of "coordinated behavior" among the Defendants." *Id. 2011 U.S. Dist. LEXIS 1161, at *35, [WL] at 13*. There may have been bilateral relationships between the various defendants, and various defendants may have acted improperly, but that is not the same as an allegation that the defendants acted as an ongoing and continuing organization. *Id.* [13]

In this case, like *HMV Properties,* Western and Southern has identified a number of parties to the securitization process. Many of the identified parties are Countrywide-owned or Countrywide agents and therefore incapable of constituting an enterprise on their own. As to the non-Countrywide entities, the AC pleads a number of facts from which the Court *might* conclude that the parties acted improperly in response to incentives set by Countrywide or by the securitization process generally, and then attempts to bootstrap a conclusion that these thousands of diverse and disparate entities shared a common purpose and cooperated with each other in furtherance of that purpose. The AC contains no facts indicating that the various non-Countrywide entities it identifies coordinated their behavior or combined as an enterprise. On the contrary, a number of the AC's allegations indicate that these **[*33]** entities were actively competing with each other for Countrywide's business.

Western and Southern has identified a number of non-parties that were allegedly part of the enterprise. The Court addresses each and its alleged role in the enterprise briefly:

- Correspondent lenders such as People's Choice Mortgage, Summit Mortgage LLC, Loans for Residential Homes Mortgage Corporation, Sprint Funding Corporation, Ameribanq Mortgage Group LLC, and E-Loan, Inc. AC ¶¶ 168-88; 419-20. The allegations in the AC, as summarized by the Western and Southern, are that the correspondent lenders would "'churn out' large numbers of loans, without regard to quality," based on the price they would fetch in the secondary market rather than the borrower's ability to repay. Opp. at 12. At the risk of being glib, this allegation amounts to one that "Countrywide offered to buy something, and the lenders obliged." Western and Southern has identified exactly the type of arms-length business transaction, with each party pursuing its own independent economic interests, that does not constitute a RICO enterprise.

- Real estate appraisers controlled or influenced by Countrywide, including LandSafe, Inc. ("LandSafe"). **[*34]** AC ¶¶ 245-50; 420. LandSafe was a Countrywide subsidiary and therefore cannot constitute an enterprise for the reasons set out above. [14] The allegations respecting other appraisers are vague, but they

---

[13] Western and Southern argues that *HMV Properties* does not apply because it involved a federal RICO claim and relied on *pre-Boyle* authority. Opp. at 17-18 n.23. To the contrary, Ohio courts look to federal RICO cases to interpret the OCAA (*supra*, n.11), and *HMV Properties* explicitly considered *Boyle* and held that allegations similar **[*32]** to the ones in this case were insufficient. *HMV Properties, LLC, 2011 U.S. Dist. LEXIS 1161, at *37, 2011 WL 53166 at *14* ("Plaintiffs do little more than offer conclusory statements as to the existence of an association-in-fact enterprise without offering any facts in support of the *Boyle* factors: purpose, relationship, or longevity.").

[14] Two recent cases have held that Countrywide and LandSafe could constitute a RICO enterprise. *In re Countrywide Fin. Corp. Mortg. Mktg. & Sales Practices Litig, 601 F. Supp. 2d 1201, 1214-15 (S.D. Cal. 2009)*; **[*37]** *Johnson v. KB Home, 720 F. Supp. 2d 1109, 1120-21 (D. Ariz. 2010)*. Those cases did so ***HN15***[] under a doctrine called the "something more" test, which holds that a parent and its subsidiary may constitute a RICO enterprise when each plays a different role or the decision to operate through a subsidiary facilitates the activity of the enterprise in some way. *In re Countrywide Fin. Corp. Mortg. Mktg. & Sales Practices Litig., 601 F. Supp. 2d at 1214-15*. The "something more" test has not been endorsed by the Ninth Circuit, Sixth Circuit, or any Ohio court. The Court finds no indication that an Ohio court would apply the "something more" exception, and therefore declines to address it in this case.

amount to an allegation that Countrywide pressured brokers to use "acceptable" appraisers that would provide inflated valuations. AC ¶¶ 247-250. If true, these allegations mean that the various brokers responded to market incentives created by Countrywide and hired appraisers accordingly. The AC does not allege that the "acceptable" appraisers had any direct relationship with Countrywide or otherwise constituted an enterprise.

• Underwriters of Countrywide RMBS, including Credit Suisse First Boston LLC and Deutsche Bank Securities, Inc. AC ¶¶ 123; 420. The allegations relating to the underwriters are that they ignored red flags and "waived in" to the securitizations noncompliant and risky loans. *Id.* ¶¶ 124-30. The role of an underwriter is to act as a sales agent for the issuer. Nothing in the AC indicates that the underwriters worked together to operate the affairs of an enterprise rather than their own affairs. [15] The most damning possible inference possible from the facts in the AC **[*35]** is that the underwriters responded to pressure (real or perceived) from Countrywide and "waived in" loans that did not meet standards. This is the type of bilateral conduct that does not constitute a RICO enterprise. Every securities issue has an underwriter; if a claim of underwriter complicity were sufficient, then every securities claim could be recast as a RICO claim.

• Foreclosure law firms, including Lerner, Sampson & Rothfuss of Cincinnati, that allegedly promoted forgery, perjury, and tampering in attempting to cover up Countrywide's failure to meet Transfer of Title obligations and vest losses on bad loans in the securitization trusts. Opp. at 10; AC ¶¶ 229-40. For the reasons set out above,***HN14***[] a corporation and a law firm acting as its agent are not insufficiently distinct so as to form a RICO enterprise. *See Kelly v. Palmer, Reifler, & Associates, P.A., 681 F. Supp. 2d 1356, 1380 (S.D. Fla. 2010)* ("The Palmer Law Firm's tactics, even if deceptive or extortionate, were not separate and apart from its corporate client seeking to obtain a civil recovery from the [plaintiffs."). [16]

• PMI insurers that allegedly paid unlawful kickbacks to Countrywide, including Mortgage Guaranty Insurance **[*36]** Corporation, Genworth Mortgage Insurance Corporation, Radian Guaranty Inc., United Guaranty Residential Insurance Company, Triad Guaranty Insurance Company, and Republic Mortgage Insurance. AC ¶¶ 262-276. As with the underwriter allegations, the AC alleges that the various PMI insurers entered into bilateral commercial agreements with Countrywide. The AC does not allege that the PMI insurers agreed or cooperated with each other in any way. Moreover, if the Court credits the AC's allegations that the PMI insurers were forced to pay kickbacks to Countrywide under a pay-to-play system, then the PMI insurers are properly viewed as *victims*, not members of a racketeering enterprise.

• Bank of New York Mellon ("BNY"), the trustee for the RMBS trusts, which allegedly furthered the enterprise's goals by failing to enforce Countrywide's repurchase obligations. AC ¶ 420. The AC contains no factual allegation, much less one that would survive challenge under *Twombly*, that BNY's actions as trustee were not unilateral.

Nothing in the AC indicates that any of the groups above shared a "common purpose" and coordinated with each other as required to plead an enterprise. Many of the allegations indicate the opposite, that the entities engaged in bilateral business dealings with Countrywide but in sharp competition with each other. That is the type **[*39]** of rimless hub-and-spoke structure that the Third Circuit considered and found wanting in *In re Ins. Brokerage*

---

[15] *In re Ins. Brokerage Antitrust Litig.*, cited by Western and Southern, is instructive. *618 F.3d 300 (3d Cir. 2010)*. There, the Third Circuit found that, under *Boyle*, a series of bilateral contracts between one broker and many insurers did not constitute a RICO enterprise. *Id. at 375*. The insurers were not connected as part of an enterprise because, "plaintiffs' factual allegations do not plausibly imply anything more than parallel conduct by the insurers." *Id. at 374*. A bid-rigging allegation succeeded, **[*38]** because bid-rigging required the cooperation of the various insurers. *Id. at 377-78*. Nothing in the AC alleges that the underwriters coordinated or cooperated with each other. On the contrary, the implication of the AC is that Countrywide pressured the underwriters to compete with each other by "waiving in" increasing numbers of noncompliant loans.

[16] The Court also notes that the allegations relating to foreclosure misconduct do not make economic sense. The gist of Plaintiff's foreclosure misconduct allegations is that foreclosure firms attempted to cover up deficiencies in title transfers and foreclose on borrowers. But it is not clear how that behavior could have hurt noteholders. If the foreclosure firms were successful, then the recovery to the trusts would increase; if unsuccessful, the trusts would not be in any worse position than before the misconduct.

Antitrust Litig., 618 F.3d 300 (3d Cir. 2010). Western and Southern has cited no reason why such a structure suffices to plead an enterprise in this case.

C. WESTERN AND SOUTHERN'S CIVIL CONSPIRACY CLAIM FAILS UNDER THE INTRA-CORPORATE CONSPIRACY DOCTRINE

Cause of Action Seventeen alleges that Defendants are liable for civil conspiracy because they "formed an association in fact of entities that conspired to underwrite and purchase fraudulently and improperly underwritten loans, to package those loans for resale, and to fraudulently service such loans through use of fraudulent and forged documents in foreclosures and overcharges to borrowers for insurance and other services." AC ¶ 497. ***HN16***[] A civil conspiracy is a "malicious combination of two or more persons to injure another person or property, in a way not competent for one alone, resulting in actual damages." *Kenty v. Transamerica Premium Ins. Co., 72 Ohio St.3d 415, 419, 1995 Ohio 61, 650 N.E.2d 863 (1995)* (citation omitted).

Defendants argue that the civil conspiracy claim must be dismissed under the "intra-corporate conspiracy doctrine." The intra-corporate **[*40]** conspiracy doctrine provides that members of the same corporate family, including subsidiaries and employees, cannot conspire with each because they are the same legal entity. Western and Southern argues that the doctrine does not apply (or at least that it does not apply to separate legal entities such as subsidiaries). Opp. at 64-65. Western and Southern apparently concedes that its civil conspiracy claim is barred if the doctrine applies to legally distinct entities that are nevertheless wholly owned by the same corporate parent.

HN17[] The Ohio Supreme Court has never addressed the intra-corporate conspiracy doctrine. In 2009, however, the Sixth Circuit predicted that the Ohio Supreme Court would adopt the doctrine. *Bays v. Canty, 330 F. App'x 594, 594 (6th Cir. 2009)*. *Bays* drew upon a "'common sense' insight 'that a person cannot conspire with himself'" and held that, "since a corporation only acts through its officers, a group of corporate officers acting within the scope of employment cannot create a conspiracy." *Id.* Western and Southern cites three cases to dispute the Sixth Circuit's finding. Opp. at 64 n.71 (citing *Ohio Bureau of Workers' Comp. v. MDL Active Duration Fund, LTD., 476 F. Supp. 2d 809, 825-26 (S.D. Ohio 2007)*; **[*41]** *Nilavar v. Mercy Health Sys., 142 F. Supp. 2d 859, 889 (S.D. Ohio 2000)*; *Berryhill v. Khouri, No. 10-CV-721073, 2011 Ohio Misc. LEXIS 364, at *7 (Ohio C.P., Jan. 13, 2011))*. ***HN18***[] *Ohio Bureau of Workers' Comp.* accepted the intra-corporate conspiracy doctrine but found that it did not apply to unrelated legal entities just because those entities share an employee. *476 F. Supp. 2d at 825-26*. *Nilavar* recognized the doctrine as applied to employees acting within the scope of their employment, but declined to extend it to corporate subsidiaries. *142 F. Supp. 2d at 888-89*. *Berryhill* merely clarified that the doctrine does not apply to employees acting outside the scope of their employment. *2011 Ohio Misc. LEXIS 364, at *7*.

Even the cases cited by Western and Southern recognize that ***HN19***[] the intra-corporate conspiracy doctrine shields employees acting within the scope of their employment. The Court agrees; it will follow *Bays* and the intermediate Ohio courts on this issue. *Bays, 330 F. App'x at 594*; *Tandem Staffing v. ABC Automation Packing, Inc., 2000 Ohio App. LEXIS 2366, 2000 WL 727534, at *8 (Ohio App. June 7, 2000)*; *Scanlon v. Gordon F. Stofer & Bro. Co., 1989 Ohio App. LEXIS 2528, 1989 WL 69400, at *16 (Ohio App. June 22, 1989)*; *Schrock v. D & N Development, Inc., 1995 Ohio App. LEXIS 3709, 1995 WL 495488, at *2 (Ohio App. June 28, 1995)*.

Western **[*42]** and Southern does not argue that any of the Individual Defendants acted outside the scope of their employment. The remaining question is therefore whether the intra-corporate conspiracy doctrine applies to related corporate entities like the ones in this case. *Nilavar* held that it does not. *142 F. Supp. 2d at 889*. Defendants cite two Ohio trial court cases that have held the opposite. *Hometown Health Plan v. Aultman Health Foundation, 2009 Ohio Misc. LEXIS 550, 2009 WL 1806759 (Ohio Ct. Com. Pl. Apr. 15, 2009)*; *Andrew v. Power Marketing Direct Inc., 2010 WL 7405622 (Ohio Ct. Com. Pl. May 20, 2010)*. ***HN20***[] In the absence of a controlling Ohio Supreme Court decision, the Court must predict how the Ohio Supreme Court would decide the issue. *Gravquick A/S v. Trimble Navigation Int'l Ltd., 323 F.3d 1219, 1222 (9th Cir. 2003)*. It is appropriate to use "intermediate appellate court decisions, statutes, and decisions from other jurisdictions as interpretive aids." *Id.*

HN21[] The Court concludes that, if faced with the question, the Ohio Supreme Court would hold that a corporation and its subsidiaries are not capable of conspiring with each other. First, while courts and states disagree, a majority appear to have adopted the intra-corporate **[*43]** conspiracy doctrine in the context of subsidiaries. *See* *Platten v. HG Bermuda Exempted Ltd., 437 F.3d 118, 131 (1st Cir. 2006)* ("[A] family relationship among corporations" will not support a civil conspiracy claim under Massachusetts law); *Davidson & Schaaff, Inc. v. Liberty Nat. Fire Ins. Co., 69 F.3d 868, 871 (8th Cir. 1995)* ("[T]wo subsidiaries of the same parent cannot conspire" under Missouri law.); *Okusami v. Psychiatric Inst. of Washington, Inc., 959 F.2d 1062, 1066, 295 U.S. App. D.C. 58 (D.C. Cir. 1992)* (Civil conspiracy not possible between a parent and its subsidiary); *Tate v. Sallie Mae, Inc., 3:10-CV-00386, 2011 U.S. Dist. LEXIS 93235, at *6, 2011 WL 3651813, at *3 (W.D.N.C. Aug. 19, 2011)* (same; North Carolina law); *Pizza Mgmt., Inc. v. Pizza Hut, Inc., 737 F. Supp. 1154, 1166 (D. Kan. 1990)* (same; Kansas law); *Bryant Heating and Air Cond. Corp. v. Carrier Corp., 597 F.Supp. 1045, 1054 (S.D. Fla. 1984)* (same; Florida law) *Bunch v. Artec Int'l Corp., 559 F. Supp. 961, 970 (S.D.N.Y. 1983)* (same; Oregon and Pennsylvania law); *Chrysler Credit Corp. v. Rebhan, 66 N.C. App. 255, 259, 311 S.E.2d 606 (1984)* (same; Michigan law). *But see* *ASARCO LLC v. Americas Mining Corp., 396 B.R. 278, 417-18 (S.D. Tex. 2008)* ("[T]he most well-reasoned approach is **[*44]** the one that recognizes a cause of action for conspiracy between a parent and subsidiary only when the parent acts outside its role as 100% owner of the subsidiary."); *Blades v. Countrywide Home Loans, Inc., CIVA1:06CV1000LG-JMR, 2007 U.S. Dist. LEXIS 69903, at *10, 2007 WL 2746678 (S.D. Miss. Sept. 18, 2007)* ([T]he separate nature of these subsidiaries prevents the Court from holding that CFC, the parent company, should be considered the same entity as both subsidiaries."); *Seeco, Inc. v. Hales, 341 Ark. 673, 22 S.W.3d 157, 173 (Ark. 2000)* (refusing to apply the doctrine to civil conspiracy claims against wholly owned subsidiaries of the same parent company); *Allied Capital Corp. v. GC-Sun Holdings, L.P., 910 A.2d 1020, 1044 (Del. Ch. 2006)* (refusing to apply the doctrine under Delaware law). Second, the majority view better serves the purpose of conspiracy law. The bedrock of any conspiracy claim is a "malicious combination." *Kenty, 72 Ohio St.3d at 419*. *Bays* noted that it is common sense that employees of a corporation do not "combine" when they act within the scope of their employment, they merely fulfill their role as agents of the corporation. *330 Fed. App'x at 594*. In many ways though, an employee is more capable of combination **[*45]** with an employer than is a subsidiary. An employee, at least, is a human being capable of motivations distinct from his employer. A subsidiary is capable of no such independence; it is entirely controlled by the parent company.

The Supreme Court explicitly considered this issue in the context of ***antitrust law***:

> [T]he coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the Sherman Act. A parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but one. They are not unlike a multiple team of horses drawing a vehicle under the control of a single driver. With or without a formal "agreement," the subsidiary acts for the benefit of the parent, its sole shareholder. If a parent and a wholly owned subsidiary do "agree" to a course of action, there is no sudden joining of economic resources that had previously served different interests, and there is no justification for *§ 1* scrutiny.

Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984). **[*46]** *Copperweld* was an antitrust case, but the Supreme Court could as easily have been discussing any conspiracy. A conspiracy charge will not lie without multiple independent actors. But, as explained in *Copperweld,* a parent and subsidiary have "not . . . two separate corporate consciousnesses, but one." *Id.* The logic of *Copperweld* does not apply only to ***antitrust law***, but rather any cause of action that requires a "combination." Applying it here is a logical application of *Bays'* "common sense" approach to the combination requirement. Accordingly, ***HN22***[] the Court finds that, were the Ohio Supreme Court to consider the issue, it would find that members of the same corporate family, including subsidiaries, are incapable of conspiring with each other. Every member of the alleged conspiracy is a member of the Countrywide corporate family. Accordingly, Cause of Action Seventeen is **DISMISSED WITH PREJUDICE**.

IV. NATIONAL INTEGRITY

National Integrity's complaint (the "Complaint") is identical in most respects to the Amended Complaint in *Western and Southern*. The only significant difference is that National Integrity filed its action in the Southern District of New York. This fact compels the Court to **[*47]** apply New York law, including New York choice-of-law rules. *In re Nucorp Energy Sec. Litig., 772 F.2d at 1492*. In The First Round Order, the Court found that National Integrity was a New York resident, that its common law claims should therefore be evaluated under New York's statute of limitations, and that those claims were therefore timely. *First Round Order, 2012 U.S.Dist. LEXIS 60776, 2012 WL 1097244, at 15-16*. The presence of those claims and the applicability of New York law require further analysis of the state law claims. National Integrity's federal claims are identical to Western and Southern's and are **DISMISSED WITH PREJUDICE** for the same reasons set out above.

A. Choice of Law is Not Applicable to National Integrity's OSA Claims

In the First Round Order, the Court implicitly applied Ohio law to National Integrity's OSA claims. *Id. 2012 U.S. Dist. LEXIS 60776, [WL] at *16*. In a related case, the Court analyzed the potential for overlapping and/or conflicting blue sky laws. *In re Countrywide Fin. Corp. Mortg.-Backed Sec. Litig., 2:11-ML-02265-MRP, 2012 U.S. Dist. LEXIS 59620, at *11, 2012 WL 1322884, *2 (C.D. Cal. Apr. 16, 2012)* ("*MassMutual*"). The Court held that conflict-of-law analysis is not necessary for Blue Sky laws because they are nonexclusive. As the Court explained **[*48]** in *MassMutual:*

> ***HN23***[] Blue Sky laws are designed to regulate securities transactions within (or impacting) a particular state. If a transaction touches multiple states, it follows that multiple Blue Sky laws may apply simultaneously. The Court agrees with the majority view that a plaintiff may sue under the securities laws of several states at once so long as the requirements of each state's law are met.

Id. [17] Nothing about the OSA requires a different result. The Court therefore adopts *MassMutual* in this case. Because Blue Sky laws may overlap, it is unnecessary to perform a conflict analysis with respect to National Integrity's OSA claims.

Only the transfer-of-title-related OSA claims survived the *First Round Order. 2012 U.S. Dist. LEXIS 60776, 2012 WL 1097244, at 16*. The Court considered and dismissed identical OSA transfer of title allegations in Section III.A. above. The same law and the same analysis apply to National Integrity's OSA claims. National Integrity's OSA claims are therefore **DISMISSED WITH PREJUDICE**.

B. National Integrity's Racketeering and Conspiracy Claims Must Be Dismissed Under Either New York or Ohio Law

HN24[] Under New York law, the first step in a choice-of-law analysis is to **[*50]** determine whether an actual conflict exists. *Matter of Allstate Ins. Co. (Stolarz), 81 N.Y.2d 219, 223, 613 N.E.2d 936, 597 N.Y.S.2d 904 (1993)*. In Section III.B above, the Court determined that identical allegations fail under the OCAA. ***HN25***[] New York

---

[17] *MassMutual* was based on, among others, the following cases: *Lintz v. Carey Manor Ltd., 613 F. Supp. 543, 551 (W.D. Va. 1985)* ("Just as the same act can violate both federal and state law simultaneously, or a state statute as well as state common law, so too can it violate several Blue Sky laws simultaneously."); *Simms Inv. Co. v. E.F. Hutton & Co., 699 F. Supp. 543, 546 (M.D.N.C. 1988)* ("[T]he securities laws of two or more states may be applicable to a single transaction without presenting a conflict of laws question."); *Barnebey v. E.F. Hutton & Co., 715 F. Supp. 1512, 1536 (M.D. Fla 1989)* **[*49]** ("[N]o reason to apply a traditional conflicts of laws analysis" when suit was brought under a state Blue Sky law.); *Chrysler Capital Corp. v. Century Power Corp., No. 91 Civ. 1937, 1992 U.S. Dist. LEXIS 9187, at *6, 1992 WL 163006, at *2 (S.D.N.Y. June 24, 1992)* ("[B]ecause application of multiple state securities laws to a single securities transaction does not present a conflict of laws issue, [defendant]'s argument that only New York law may apply to the transaction at issue is rejected."); *United Heritage Life Ins. Co. v. First Matrix Investor Services, No. CV 06-0496, 2009 U.S. Dist. LEXIS 91245, at *13, 2009 WL 3229374, at *4 (D. Idaho Sept. 30, 2009)* ("[M]ore than one state's securities laws can apply to a transaction.").

does not permit *any* private action under its racketeering law. N.Y. Penal Law § 460.20. Similarly, Section III.C finds identical conspiracy allegations deficient under Ohio law. Like racketeering, **HN26**[] "New York law does not recognize a tort action for civil conspiracy." Vasile v. Dean Witter Reynolds Inc., 20 F. Supp. 2d 465, 481 (E.D.N.Y. 1998) *aff'd sub nom. Vasile v. Dean Witter Reynolds, Inc., 205 F.3d 1327 (2d Cir. 2000)*. Plaintiffs do not dispute either point.

Ohio and New York law differ, but each would require dismissal of National Integrity's racketeering and conspiracy causes of action. The Court therefore finds no actual conflict between them in this case. Causes of Action Six and Fifteen are **DISMISSED WITH PREJUDICE**.

C. National Integrity's Negligent Misrepresentation Claim is Barred

The parties agree that Ohio law should apply to National Integrity's negligent misrepresentation claim. **HN27**[] Applying New York law, this Court has repeatedly dismissed negligent misrepresentation **[*51]** claims by RMBS investors for failure to plead a "special relationship" between the investor and Countrywide. *Dexia Holdings, Inc. v. Countrywide Fin. Corp., 2:11-CV-07165-MRP, 2012 U.S. Dist. LEXIS 71374at *26, 2012 WL 1798997, at *7 (C.D. Cal. Feb. 17, 2012)*; *Allstate Ins. Co. v. Countrywide Fin. Corp., 824 F. Supp. 2d 1164, 1192 (C.D. Cal. 2011)*. Some courts have found that Ohio has a similar "special relationship" requirement. *Doe v. SexSearch.com, 551 F.3d 412, 418 (6th Cir. 2008)* ("[A] claim for negligent misrepresentation requires 'a special relationship under which the defendant supplied information to the plaintiff for the latter's guidance in its business transaction.'") (citing *Ziegler v. Findlay Indus., Inc., 464 F. Supp. 2d 733, 738 (N.D. Ohio 2006))*; *Advantage Renovations, Inc. v. Maui Sands Resort, Co., L.L.C., 2012 Ohio 1866, P31, 2012 WL 1493826, at *7 (Ohio Ct. App. 2012)* (Ohio law requires "special duty or relationship"); *McNabb v. Hoeppner, 2011 Ohio 3224, P22, 2011 WL 2571386, at *4 (Ohio Ct. App. 2011)* (dismissing for lack of a "special relationship"). Other courts have eschewed the "special relationship" language in favor of a requirement that "(1) the defendant must provide false information for the guidance of the plaintiff **[*52]** in its business transactions and (2) the plaintiff must be the person or one of a limited group of persons for whose benefit and guidance the defendant intends to supply the information or knows that the recipient intends to supply it." *Nat'l Mulch & Seed, Inc. v. Rexius Forest By-Products Inc., 2:02-CV-1288, 2007 U.S. Dist. LEXIS 24904, at *38, 2007 WL 894833, at *9-11 (S.D. Ohio Mar. 22, 2007)* (citing *Gutter v. Dow Jones, Inc., 22 Ohio St.3d 286, 288, 22 Ohio B. 457, 490 N.E.2d 898 (1986))*. In those courts' view, "special relationship" is merely convenient shorthand for the limiting (to information provided for use in business transactions and to a limited group) elements of a negligent misrepresentation claim. *In re Nat'l Century Fin. Enters., Inc., Inv. Litig., 580 F. Supp. 2d 630, 647 (S.D. Ohio 2008)*.

The approach taken in *National Mulch & Seed* is persuasive. **HN28**[] Ohio law does not impose a separate "special relationship" requirement. Rather, the term is properly viewed as shorthand for the limiting elements of the cause of action. *2007 U.S. Dist. LEXIS 24904, at *38, 2007 WL 894833, at *9-11*. National Integrity alleges that it is part of a "limited class" of purchasers because (i) it is an institutional investor, (ii) its portfolio managers had face-to-face meetings with Countrywide, **[*53]** and (iii) Countrywide provided data and helped National Integrity develop pricing models. Opp at 62. These allegations are not sufficient to state a claim for negligent misrepresentation under Ohio law.

HN29[] The general rule is that the investing public is not a sufficiently limited class. *Federated Mgmt. Co. v. Coopers & Lybrand, 137 Ohio App. 3d 366, 738 N.E.2d 842, 855-56 (Ohio Ct. App. 2000)*. National Integrity has alleged that it is a sophisticated institutional investor, but nothing about the Certificates or Offering Materials limited purchases to such entities. Two cases from Ohio district courts help frame the issue. In *In re National Century Financial Enterprises, Inc., Investment Litigation,* the court held that representations made in connection with a private placement may state a claim for negligent misrepresentation because participation in the private placement was limited to a small group of Qualified Institutional Buyers ("QIBs"). *580 F. Supp. 2d at 652-53* (QIB purchasers constitute a sufficiently limited group). A more recent case, *Ohio Police & Fire Pension Fund v. Standard & Poor's Fin. Services, LLC*, held that even QIBs constitute an insufficiently limited group to state a cause of action **[*54]** for negligent misrepresentation. *813 F. Supp. 2d 871, 881-82 (S.D. Ohio 2011)*. The *Ohio Police* court also dismissed claims relating to non-private placements because the "complaint [did] not allege that the securities . . . were offered only to qualified institutional investors or only to pension funds." *Id. at 881*. The same analysis applies here. Any investor with sufficient means was eligible to buy the Certificates at issue in this case. And thousands of investors from around the world bought the same or substantially the same Countrywide-issued RMBS. That is not the type of limited class that will support a negligent misrepresentation claim.

National Integrity's allegations regarding face-to-face meetings and data provision do nothing to narrow the scope of the "class." The data and pricing models that National Integrity discusses were publicly available to any investor on Countrywide's website. Complaint ¶ 374. Similarly, the face-to-face meetings that National Integrity cites to were at marketing road shows and public investor forums. Complaint ¶ 81. These events were open to the public. More importantly, the alleged misrepresentations that National Integrity complains of occurred **[*55]** in the Offering Documents, not in the face-to-face meetings. Those Offering Documents were available to the entire investing world. Accordingly, an action for negligent misrepresentation is unsustainable under Ohio law. Cause of Action Seven is **DISMISSED WITH PREJUDICE**.

D. THE PARTIES HAVE NOT IDENTIFIED ANY CONFLICT BETWEEN NEW YORK AND OHIO WITH RESPECT TO THE COMMON LAW FRAUD CLAIM

National Integrity's only remaining primary claim is for common law fraud. The representations that National Integrity has identified relating to transfer of title are not false for the reasons set out in Section III.A above. That leaves National Integrity's allegations premised on underwriting, appraisals, loan-to-value ratios, and ratings. Applying New York law, the Court has repeatedly held that identical allegations are better addressed on a more complete factual record. *Dexia Holdings, Inc. v. Countrywide Fin. Corp., 2:11-CV-07165-MRP, 2012 U.S. Dist. LEXIS 71374, 2012 WL 1798997, at *5-6 (C.D. Cal. Feb. 17, 2012)*; *Allstate Ins. Co. v. Countrywide Fin. Corp., 824 F. Supp. 2d 1164, 1183-88 (C.D. Cal. 2011)* ("*Allstate I*"). National Integrity argues that Ohio substantive law should apply to its common law claims (Opp. at 71), but **[*56]** no party has identified a material difference between the laws of Ohio and New York with respect to common law fraud. The Court will therefore adopt its previous rulings in *Allstate* and *Dexia* with respect to the common law fraud claim. National Integrity's fraud allegations premised on underwriting, appraisals, loan-to-value ratios, and ratings are sufficient at the motion to dismiss stage.

E. DELAWARE LAW BARS NATIONAL INTEGRITY'S SUCCESSOR LIABILITY CLAIMS

The *National Integrity* action was transferred from a district court in New York. Accordingly, New York's choice-of-law rules apply to National Integrity's claims. In *Allstate*, the Court applied New York's choice-of-law rules to a successor liability claim against Bank of America. *Allstate I, 824 F. Supp. 2d at 1171-72*. The Court found that Delaware law applies to such claims, and that the claims are barred under Delaware law. *Id. at 1171-74*; *1192-93*. The logic of *Allstate* applies with equal force in this case. Accordingly, Cause of Action Thirteen is **DISMISSED WITH PREJUDICE.**

V. CONCLUSION

For the reasons set out above, the *Western and Southern* action is **DISMISSED WITH PREJUDICE**. Cause of Action Fourteen in *National Integrity* may proceed **[*57]** based on allegations relating to underwriting, appraisals, loan-to-value ratios, and ratings. *National Integrity* is otherwise **DISMISSED WITH PREJUDICE.**

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Discovery & Disclosure > General Overview

HN1[] **Standards of Review, Abuse of Discretion**

Generally, the standard of review on appeal of a discovery order is abuse of discretion.

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] Antitrust & Trade Law, Sherman Act

Within the body of law particular to the Sherman Act, *15 U.S.C.S. § 1 et seq.*, there are concepts which represent sub-textual matters that define and shape the attendant jurisprudence. One such concept is known as a "Twombly" issue.

Antitrust & Trade Law > Sherman Act > Claims

HN3[] Sherman Act, Claims

Because *15 U.S.C.S. § 1* (Sherman Act) does not prohibit all unreasonable restraints of trade, but only restraints effected by a contract, combination, or conspiracy, the crucial question is whether challenged anticompetitive conduct stems from an independent decision or from an agreement, tacit or express. While a showing of parallel business behavior is admissible circumstantial evidence from which a fact finder may infer an agreement, it falls short of conclusively establishing an agreement or itself constituting a Sherman Act offense. Even conscious parallelism, a common reaction of firms in a concentrated market that recognize their shared economic interests and their interdependence with respect to price and output decisions, is not in itself unlawful. The inadequacy of showing parallel conduct or interdependence, without more, mirrors the ambiguity of the behavior: consistent with conspiracy, but just as much in line with a wide swath of rational and competitive business strategy unilaterally prompted by common perceptions of the market.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN4[] Complaints, Requirements for Complaint

While a complaint attacked by a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his or her entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Factual allegations must be enough to raise a right to relief above the speculative level.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN5[] Noerr-Pennington Doctrine, Right to Petition Immunity

15 U.S.C.S. § 1 makes it unlawful for persons to engage in a combination or conspiracy in restraint of trade. However, a wide variety of undertakings by persons acting in concert, to seek legislative action, judicial relief, administrative agency activity, or action by the executive branch of government may result in governmental steps which restrain competitors or diminish competition. Indeed, the very act of seeking that governmental relief, even if unsuccessful, may have adverse competitive effects. Similarly, monopolization or attempts to monopolize, which are proscribed by *15 U.S.C.S. § 2*, may be advanced by an individual or firm seeking one of these forms of governmental assistance. Additionally, conduct which is regulated by other provisions of the antitrust laws may also involve or be affected by governmental intervention and private requests for such assistance. Although such conduct may raise competitive concerns which the antitrust laws are generally designed to protect, petitions by individuals or groups of persons for governmental action or intervention implicate other important political, and even constitutional, values. There are various reasons why private requests for such action are generally immunized from challenge under the antitrust laws.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN6[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

Undertakings by persons acting in concert to seek legislative action, judicial relief, administrative agency activity, or action by the executive branch of government are generally immunized from challenge under the antitrust laws because permitting an antitrust action to be predicated on private requests for governmental action would actually impair the ability of the government to function. Because the government in a representative democracy is acting on behalf of its citizens and must know what they desire and believe would best serve their interests, it is important that these channels of communication be encouraged and kept open.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN7[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

Undertakings by persons acting in concert to seek legislative action, judicial relief, administrative agency activity, or action by the executive branch of government are generally immunized from challenge under the antitrust laws because prohibiting such private requests would raise constitutional questions. The First Amendment protects freedom of speech and the right to petition governmental officials. Thus, even if Congress, when enacting the Sherman Act, *15 U.S.C.S. § 1 et seq.*, had sought to limit these constitutional rights, it is doubtful that such a result would be permissible.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN8[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

Undertakings by persons acting in concert to seek legislative action, judicial relief, administrative agency activity, or action by the executive branch of government are generally immunized from challenge under the antitrust laws because the United States Supreme Court has inferred a contrary legislative intent. Congress affirmatively chose not to extend the antitrust laws to reach conduct of a distinctly political nature.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN9[] **Noerr-Pennington Doctrine, Sham Exception**

An exemption from Noerr-Pennington immunity for undertakings by persons acting in concert to seek legislative action, judicial relief, administrative agency activity, or action by the executive branch of government arises if the "petitioning activities" are not in good faith. Petitioning activities which are a "mere sham" of true attempts to engage in political conduct, and which are designed simply to exclude competitors or injure competition, are not protected from antitrust scrutiny.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN10[] **Noerr-Pennington Doctrine, Sham Exception**

Allegations of a use of the political process solely to deny competitors "free and unlimited access" to administrative agencies and the courts are sufficient to take the conduct outside the scope of Noerr-Pennington immunity.

Judges: ALLAN L. TERESHKO, J.

Opinion by: ALLAN L. TERESHKO

Opinion

On May 22, 2012, this Court entered an Order and Findings in support thereof, stating in relevant part:

> After conducting an in camera review of the submitted documents, the following are found to be discoverable and are **ordered to be produced**. The numbers used to identify the documents are referenced from Defendant's charted submissions:
>
> **1(and 2), 8, 15, 16, 17, 18, 19, 21, 23, 24 (and 27), 30, 33, 36 (and 46), 38, 39, 48, 49 (and 54), 53 (and 60), 57, 59, 61, 62, 82, 83 and 88**.
>
> The following documents are **not required to be produced**:
>
> **3, 4, 5, 6, 7, 11 (and 13), 26 (and 28), 32, 37 (47 and 52), 44 (and 45), 75 (and 78), 81**.
>
> Some of the documents on the *need not produce list* are there because they are repetitious of other documents on the *must produce list*. If they are on the *must produce list*, this will control.
> Further, the documents in Defendants' chart, numbers 84 through and including 94 were not produced. They appear to be publicly available research documents and if such is accurate, they are equally available to Plaintiff and need not be produced.
>
> Group three, which is a series of Amended Federal **[*2]** Complaints in various non-final draft form, need not be produced.
> The unredacted versions of the documents required to be produced must be within ten (10) days.

Following the entry of this Court's Findings and Order, the Kaplin Stewart Defendants[1] appealed on May 30, 2012 and filed their Concise Statement of Errors complained of on Appeal on June 22, 2012. (See Docket). The BPG Defendants[2] appealed on May 31, 2012 and filed their Concise Statement of Errors Complained of on Appeal on June 21, 2012.

The issue to be addressed on appeal is whether the documents ordered to be produced are protected from discovery by an attorney/client privilege existing between the Kaplin Stewart Defendants and the BPG Defendants or by virtue of the work product doctrine.

HN1[] Generally, the standard of review on appeal of a discovery order is abuse of discretion." *Lockley v. CSX Transp. Inc., 2010 Pa. Super. 167, 5 A.3d 383, 388 (2010)*, *quoting* *Berkeyheiser v. A-Plus Investigations, Inc., 2007 Pa. Super. 336, 936 A.2d 1117, 1125 (2007)*.

The underlying Action is a Wrongful Use of Civil Process brought by a real estate developer against another real estate developer and its counsel defendants. The Action maintains that Defendants brought Sherman Anti-Trust

---

claims in Federal Court in violation of *42 Pa. C.S. 8371* Pa. Cons. Stat. Ann. *§8351 et seq*. The Federal claims alleged violations of *Section 1* of the Sherman Act (Restraint of Trade) and *Section 2* of the Act (Attempted Monopolization). ***HN2***[] Within the body of law particular to the Sherman Act, there are concepts which represent sub-textual matters that define and shape the attendant jurisprudence.

One such concept is **[*4]** known as a "*Twombly*" issue. For purposes of this decision, the issue is best captured by Headnotes 3 and 5 of the Lawyer's Edition of the *Twombly* opinion. *Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929*; *550 U.S. 544, 127 S.Ct. 1955, 167 L. Ed. 2d 929*; *550 U.S. 544, 127 S. Ct. 1955, 167 L.Ed.2d 929*; *550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929, 2007 U.S. Lexis 5901. (2007)*.

> ***HN3***[] Because § 1 (*15 U.S.C.S. §1*) of the Sherman Act does not prohibit all unreasonable restraints of trade, but only restraints effected by a contract, combination, or conspiracy, the crucial question is whether challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express. While a showing of parallel business behavior is admissible circumstantial evidence from which the fact finder may infer agreement, it falls short to conclusively establishing agreement or itself constituting a Sherman Act offense. Even conscious parallelism, a common reaction of firms in a concentrated market that recognize their shared economic interests and their interdependence with respect to price and output decisions is not in itself unlawful. The inadequacy of showing parallel conduct or interdependence, without more, mirrors the ambiguity of the behavior: consistent with conspiracy, but just as much **[*5]** in line with a wide swath of rational and competitive business strategy unilaterally prompted by common perceptions of the market. *Id*. LEd HN 3.
>
> ***HN4***[] While a complaint attached by a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss does not need detailed factual allegations, a Plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Factual allegations must be enough to raise a right to relief above the speculative level. *Id*. LEd HN5.

Another such concept is known as the *Noerr Pennington* Doctrine. For purposes of this decision, a competent but necessarily limited explanation follows:

> ***HN5***[] *Section 1* of the Sherman Act makes it unlawful for persons to engage in a "combination...or conspiracy, in restraint of trade." However, a wide variety of undertakings by persons acting in concert, to seek legislative action, judicial relief, administrative agency activity, or action by the executive branch of government might result in governmental steps which restrain competitors or diminish competition. Indeed, the very act of seeking that governmental relief even if unsuccessful **[*6]** may have adverse competitive effects. Similarly, "monopolization or attempts to monopolize," which are proscribed by *Section 2* of the Sherman Act, might be advanced by an individual or firm seeking one of these forms of governmental assistance. Additionally, conduct which is regulated by other provisions of the antitrust laws may also involve or be affected by governmental intervention and private requests for such assistance.
>
> Although such conduct may raise competitive concerns which the antitrust laws are generally designed to protect, petitions by individuals or groups of persons for governmental action or intervention implicate other important political, and even constitutional, values. In the seminal decision dealing with the interface of antitrust prohibitions and the right to seek governmental relief, *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc*., the Supreme Court identified various reasons that private requests for such action are generally *immunized* from challenge under the antitrust laws.
>
> ***HN6***[] First, permitting an antitrust action to be predicated on private requests for governmental action would actually impair the ability of the government to function. Because **[*7]** the government in a representative democracy is acting on behalf of its citizens and must know what they desire and believe would best serve their interests, it is important that these channels of communication be encouraged and kept open. ***HN7***[] Second, prohibiting such private requests would raise constitutional questions. The *First Amendment* protects freedom of speech and the right to petition governmental officials. Thus, even if Congress in 1890, when enacting the Sherman Act, had sought to limit these constitutional rights, it is doubtful that such a result would be

permissible. ***HN8***[] Third, the *Noerr* Court inferred a contrary legislative intent. The Fifty-first Congress affirmatively chose not to extend the antitrust laws to reach conduct of a distinctly *political* nature.

10-77 Federal ***Antitrust Law*** § 77.1.

HN9[] The exemption from the *Noerr-Pennington* immunity would arise if the "petitioning activities" were not in good faith.

In *Noerr*, the Supreme Court stated that petitioning activities which were a "mere sham" of true attempts to engage in political conduct, and which were designed simply to exclude competitors or injure competition, would not be protected from antitrust scrutiny. Yet, this was **[*8]** mere dictum; the Court found that the facts there fell far short of the "sham" attempt.

In *California Motor Transport Co. v. Trucking Unlimited*, however, the Supreme Court held that ***HN10***[] allegations that defendants used the political process solely to deny their competitors "free and unlimited access" to administrative agencies and the courts were sufficient to take the conduct outside the scope of the *Noerr-Pennington* immunity. However, the plaintiffs' allegations in that case were rather general, and therefore the contours of the "sham exception" were still left unclear.

In *California Transport*, the parties were competing groups of trucking companies subject to regulation by federal and state agencies. The defendants were principally established carriers; the plaintiffs were attempting to enter some of the defendants' markets. The plaintiffs alleged that the defendants instituted frequent, groundless and harassing actions before administrative agencies and in the courts, in an attempt to frustrate the adjudicative process and with the purpose of denying to the plaintiffs "free and unlimited access" to those tribunals. It was this type of conduct which the Supreme Court concluded might result **[*9]** in the loss of *Noerr* immunity.

10-77 Federal ***Antitrust Law*** § 77.4.

The third issue, which dominates the scope of discovery here, was made very much apparent as a result of the Federal Court's dismissal of the underlying Sherman Act Complaint. This issue is the failure of the Plaintiffs in the Federal Action to prove that a "relevant geographic market" exists. *BPG Real Estate Investors Straw Party 1, L.P., et al. v. Claude de Botton, et al*., 2:09-CV-01714 SD Doc. 43 (Federal Opinion).

Therefore, the scope of discovery should allow for inquiry into the areas which include acts by the Defendants here which are relevant to:

1. How the relevant geographic market was defined in the underlying Federal Complaint;

2. Issues concerning the level of fact pleading necessary to satisfy the pleading requirement established under *Twombly* and its progeny;

3. Issues concerning the *Noerr-Pennington* Doctrine which involve the Plaintiff's right to petition governmental agencies as part of permitted political conduct and Plaintiff's inherent *First Amendment Rights*;
4. Issues concerning whether the petitioning activities were "mere sham."

Various allegations in Defendant's Federal Complaint implicate the above **[*10]** issues.

B. The Relevant Market

28. The relevant market in this action is the business of developing and operating mixed use town centers located at the intersection of Route 3, an east/west axis, and Route 252, a north/south axis in the Township (the **"Intersection")**.
29. The physical location of mixed use town centers is circumscribed by a number of unique factors. Mixed use town centers can only be built where a municipality is pre-disposed to such development and/or use zoning regulations permit flexible or mixed use development. Because mixed use town centers must be substantially sized to accommodate their multiple uses, including pedestrian circulation and parking facilities, they also

require significant acreage and therefore can only be located in areas where large tracts of land are available for development. In addition, easy access to highways and the presence of a surrounding population at the appropriate density and per capita and household income levels are essential ingredients of mixed use town center developments, particularly for their retail, office and entertainment components, to be able to thrive.

30. The Ellis Preserve Tract uniquely fulfills the above criteria in **[*11]** that: (a) in or about 2001, the Township designated in its Comprehensive Plan the location of the Ellis Preserve Tract as suited for mixed use town center development; (b) at over 200 acres, the Ellis Preserve Tract contains the requisite amount of acreage for development as a mixed use town center; (c) the Ellis Preserve Tract is located at the cross roads of two major highways, Route 3 and Route 252, giving north/south and east/west access; and (d) market studies confirm that the Ellis Preserve Tract is surrounded by the requisite population demographics, as to both density and per capita and household income levels, so as to be particularly suited for mixed use town center development.
31. The Ellis Preserve Tract and the Marville Tract are the exclusive sites within the Township which can be developed as mixed use town centers due to their size, access to major highways and proximity to the required population density at the required per capita and household income levels.

32. Because the Ellis Preserve Tract and the Marville Tract are located within a mile and a half of each other, Plaintiffs and the de Botton entities are in direct competition for the same category of high-end **[*12]** retail, commercial and office tenants and for residential tenants/buyers looking to lease space or buy homes in mixed use town centers within the Township.
* * *
38. The approximately five mile area surrounding the cross roads of the two major access and travel roads (Route 3 and 252), with the requisite demographics, make the relevant geographic market a premium destination for mixed use town center development, as recognized in the Township's Comprehensive Plan.
39. Madison/Marquette had defined the relevant geographic market for the Shoppes of Marville as five miles.
40. Claude de Botton has admitted in deposition testimony that the geographic market for the Ellis Preserve MUTC and for the Marville MUTC is five miles.
* * *
64. Public meetings were held on the proposed agreement at which the de Botton Entities, directly or indirectly, through their co-conspirators MadisonMarquette, Franklin, Semeister and IC4NS, continued to oppose the Ellis Preserve MUTC by continuing to make false and misleading statements about the Ellis Preserve MUTC as more fully described in paragraphs 80 and 81 below.
* * *

F. Defendants' Anti-Competitive Conduct and False Statements

66. Once the de Botton Entities **[*13]** obtained Township approval for development of the Marville MUTC, Defendants orchestrated a scheme and embarked on a course and pattern of anticompetitive conduct to prevent, deter and delay the development of the Ellis Preserve MUTC.
67. Commencing in or around early 2007, Defendants knowingly and intentionally agreed, combined and conspired with MadisonMarquette, Franklin, IC4NS and Semeister to orchestrate and engage in a course of conduct to delay, obstruct and intentionally prevent development of the Ellis Preserve MUTC and to prevent competition for tenants and residential buyers in the mixed use town center market in the Township.
68. Upon information and belief, de Botton and Semeister agreed that Semeister would form IC4NS for the specific purpose of creating and fomenting community opposition aimed at the Ellis Preserve MUTC and not the Marville MUTC in order to delay, protract the public hearing process in an attempt to influence the Township to take action against the Ellis Preserve MUTC or inordinately delay any approval of the Ellis Preserve MUTC until the Marville MUTC was developed and operating.
* * *

71. Upon information and belief, de Botton and Franklin agreed to use **[*14]** MadisonMarquette to influence the Township to take action against the Ellis Preserve MUTC.
* * *

74. de Botton tried to prevent, deter and/or delay the Township from approving the Ellis Preserve MUTC by engaging in a publicity campaign to incite the neighboring business and residential community to oppose the Ellis Preserve MUTC, and by conspiring with and funding, either directly or indirectly, community opposition and legal proceedings in opposition to the MUTC, including, *inter alia*:

a. On or about June 15, 2007, de Botton funded the widespread distribution of a letter to residents of the Township suggesting that the Ellis Preserve MUTC would harm the Township: "Do we need, and can the area support, two new retail centers called Lifestyle Village or Town Center" and "Which one, do you think, would most affect traffic in the center of town, the LIFESTYLE CENTER one mile away from town, or the TOWN CENTER in the major crossroads of town." The Defendants attempt to differentiate the Marville MUTC as a "lifestyle center" and the Ellis Preserve MUTC as a "town center" but the terms are interchangeable.

b. Similarly, on or about June 30, 2007, de Botton funded the distribution of a letter **[*15]** to residents of the Township referring to a "new developer" proposing to create a town center on the Ellis Preserve Tract and questioning whether the community could handle this new development.

c. de Botton thereafter funded the distribution of further mailings to residents of the Township promoting false and misleading statements about BPG's proposed MUTC including disparaging BPG's reputation as a developer/owner capable of developing the Ellis Preserve MUTC.

* * *

76. In written and verbal communications to individual members of the Board and Planning Commission, de Botton and Franklin threatened to abandon the Marville MUTC plan and construct and lease five box stores instead if the Ellis Preserve MUTC was approved.

77. de Botton has also attempted to prevent, deter and/or delay the Township from approving the Ellis Preserve MUTC by causing representatives of Defendants to speak out at public meetings against the Ellis Preserve MUTC and make false and misleading statements without identifying their affiliation with Defendants so as to give the impression of wide-spread opposition to the Ellis Preserve MUTC.

* * *

80. Upon information and belief, de Botton in combination and conspiracy **[*16]** with Semeister used IC4NS as an artifice and/or instrumentality to disseminate and distribute false and misleading information to the public concerning the Ellis Preserve MUTC including, *inter alia*:

a. On or about August 8, 2007, Semeister, published in the *Delaware County Press* a statement which contained false and misleading information concerning the Ellis Preserve MUTC and which urged all residents of Newtown Township to oppose the Ellis Preserve MUTC;

b. On or about August 29, 2007, Semeister published in the *Delaware County Press* a Letter to the Editor purporting to be on behalf of IC4NS, which contained false and misleading information concerning the Ellis Preserve MUTC and which urged all residents of Newtown Township to oppose the Ellis Preserve MUTC;

* * *

80. f. IC4NS has held informational meetings to which it has invited the public and at which it has disseminated false and misleading information about the Ellis Preserve MUTC including, *inter alia*, falsely conveying that the proposed development will have a negative impact on local traffic, require road improvements at taxpayer's expense, will burden public services, cause taxes to rise significantly, increase crime, threaten **[*17]** the environment and result in property condemnations.

* * *

81. Upon information and belief, de Botton, in combination and conspiracy with Semeister, caused IC4NS to disseminate false and/or misleading statements about the Ellis Preserve MUTC to libel, disparage and defame BPG and to play on the public's fears, concerns and prejudices...

* * *

82. de Botton's and Semeister's intent was to incite the public to attend and oppose the Ellis Preserve MUTC at Township public hearings using the false and misleading information.

* * *

96. Defendants used and continue to use the municipal and judicial process, without probable cause and in complete disregard of the law, to directly interfere with BPG's ability to proceed with the Ellis Preserve MUTC.
97. The malicious and sham use of governmental and judicial proceedings and the publicity campaign was and continues to be motivated by anticompetitive conduct and monopolistic purposes.

These documents were found, after an in camera review, to be directly discoverable or reasonably contemplated to lead to discoverable evidence which is the touchstone for discoverability (citations omitted).

For the foregoing reasons, this Court respectfully requests that **[*18]** its decision to order the production of certain documents identified in its Order of May 22, 2012 be AFFIRMED.

BY THE COURT:

ALLAN L. TERESHKO, J.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

In considering a party's motion to dismiss, the court takes as true the facts alleged by the party whose complaint or counterclaim is challenged.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Integration Clauses

Contracts Law > Contract Interpretation > Parol Evidence > General Overview

HN2[] **Contract Conditions & Provisions, Integration Clauses**

It is well settled under the doctrine of merger and the parol evidence rule that a written agreement which is complete on its face supersedes all prior agreements on the same subject matter.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

HN3[] **False Advertising, Lanham Act**

Section 43(a)(1)(B) of the Lanham Act, *15 U.S.C.S. § 1125(a)(1)(B)*, forbids the use of any false or misleading description of fact, or false or misleading representation of fact, which in commercial advertising or promotion, misrepresents the nature, characteristics, or qualities of the seller's or another person's goods.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

HN4[] **False Advertising, Lanham Act**

To establish a claim under the false or deceptive advertising prong of section 43(a)(1)(B) of the Lanham Act, *15 U.S.C.S. § 1125(a)(1)(B)*, a plaintiff must prove: (1) a false statement of fact by the defendant in a commercial advertisement about its own or another's product; (2) the statement actually deceived or has the tendency to deceive a substantial segment of its audience; (3) the deception is material, in that it is likely to influence the purchasing decision; (4) the defendant caused its false statement to enter interstate commerce; and (5) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to defendant or by a loss of goodwill associated with its products.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

HN5[] **False Advertising, Lanham Act**

Advertising is a subset of persuasion and refers to dissemination of prefabricated promotional materials. Section 43(a) of the Lanham Act, *15 U.S.C.S. § 1125(a)*, addresses promotional material disseminated to anonymous recipients. This definition contrasts a form of promotion to anonymous recipients with face-to-face communication such as a person-to-person pitch by an account executive.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

HN6[] **False Advertising, Lanham Act**

Commercial advertising or promotion within the meaning of section 43(a) of the Lanham Act, *15 U.S.C.S. § 1125(a)*, may consist of unsolicited statements to numerous potential clients with which an advertiser had no relationship. To be covered under § 43(a), representations must involve commercial speech by a defendant, for the purpose of influencing customers to buy the defendant's goods or services, and must be disseminated sufficiently to the relevant purchasing public to constitute advertising or promotion within that industry. Where the potential purchasers in the market are relatively small in number, a single promotional presentation to an individual purchaser may be sufficient to invoke the protections of the Lanham Act.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

HN7[] **False Advertising, Lanham Act**

Section 43(a) of the Lanham Act, *15 U.S.C.S. § 1125(a)*, does not cover every instance in which a business speaks to the customer of another business, even if the speaker is lying.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN8[] Deceptive & Unfair Trade Practices, State Regulation

The Illinois Consumer Fraud Act (ICFA), *815 ILCS 505/2*, does not apply to fraudulent transactions which take place outside Illinois. The critical question in deciding whether an in-state transaction occurred is whether the circumstances relating to the disputed transactions occurred primarily and substantially in Illinois. The place of injury or deception is only one of the circumstances, however, and a case in which the bulk of the circumstances that make up a fraudulent transaction occur within Illinois, and the only thing that occurs out-of-state is the injury or deception, the claim may be actionable.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN9[] Trade Practices & Unfair Competition, State Regulation

The following factors are suggestive of a claim that may be brought under the Illinois Uniform Deceptive Trade Practices Act (IUDTPA), *815 ILCS 510/2*, and the Illinois Consumer Fraud Act (ICFA), *815 ILCS 505/2*: (1) the contracts containing the deceptive statements were all executed in Illinois; (2) the defendant's principal place of business was in Illinois; (3) the contract contained express choice-of-law and forum-selection clauses specifying that any litigation would be conducted in Illinois under Illinois law; (4) complaints regarding the defendant's performance were to be directed to its Chicago office; and (5) payments for the defendant's services were to be sent to its office in Illinois.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN10[] Trade Practices & Unfair Competition, State Regulation

The fact that a scheme to defraud was disseminated from a company's headquarters in Illinois is insufficient without more to support a claim under the Illinois Uniform Deceptive Trade Practices Act (IUDTPA), *815 ILCS 510/2*, and the Illinois Consumer Fraud Act (ICFA), *815 ILCS 505/2*.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN11[] Intentional Interference, Elements

To succeed on a claim for tortious interference with prospective economic advantage under Illinois law, a plaintiff must prove (1) the plaintiff's reasonable expectation of a future business relationship; (2) the defendant's knowledge of that expectation; (3) purposeful interference by the defendant that prevents the plaintiff's legitimate expectations from ripening; and (4) damages.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN12[] Intentional Interference, Elements

Illinois courts require a plaintiff claiming tortious interference with prospective economic advantage to demonstrate a sufficiently strong expectancy that he or she would receive a particular economic advantage and have rejected claims by, for example, a plaintiff who alleged only having undergone several interviews and been invited back for further interviews.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

HN13[] Actual Monopolization, Claims

The offense of monopoly under § 2 of the Sherman Act, 15 U.S.C.S. § 2, has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. The plaintiff must also allege that defendant's conduct has caused antitrust injury, because private antitrust litigation is limited to suits by those persons for whose benefit the laws were enacted.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN14[] Actual Monopolization, Monopoly Power

Monopoly power for purposes of § 2 of the Sherman Act, 15 U.S.C.S. § 2, is the power to control prices or exclude competition. It is a seller's ability to charge a price above the competitive level (roughly speaking, above cost, including the cost of capital) without losing so many sales to existing competitors or new entrants as to make the price increase unprofitable. Monopoly does not mean that there is only one seller — a seller who has a large market share may be able to charge a price persistently above the competitive level despite the existence of competitors.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN15[] Actual Monopolization, Monopoly Power

The concept of market power in a Sherman Act § 1 case, 15 U.S.C.S. § 1, is defined as the ability to raise prices above the competitive level by restricting output. Monopoly power under 15 U.S.C.S. § 2 requires, of course, something greater than market power under § 1. Market power may well be a factor to consider in determining whether a business has monopoly power, but an allegation of market share accompanied by the Wilk factors is not sufficient to survive a Fed. R. Civ. P. 12(b)(6) motion on a § 2 claim.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN16[] Actual Monopolization, Monopoly Power

If a plaintiff fails to identify any facts from which the court can infer that defendants had sufficient market power to have been able to create a monopoly, its § 2 Sherman Act claim, 15 U.S.C.S. § 2, may be properly dismissed on a Fed. R. Civ. P. 12(b)(6) motion.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN17[] Attempts to Monopolize, Elements

It is generally required that to demonstrate attempted monopolization under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, a plaintiff must prove (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN18[] **Attempts to Monopolize, Elements**

To state a claim for attempted monopolization in violation of the Sherman Act, *15 U.S.C.S. § 2*, a claimant must allege a dangerous probability of achieving monopoly power, which requires that the antitrust defendant currently has market power and that such market power will tend to approach monopoly power if the alleged unlawful conduct remains unchecked. Market share indicates market power only when sales reflect control of the productive assets in the business, for only then does it reflect an ability to curtail total market output.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN19[] **Actual Monopolization, Claims**

The Seventh Circuit has recommended the greatest restraint in condemning any unilateral practice as monopolization, because any firm's unilateral conduct is almost always deemed lawful unless it creates a dangerous probability of success in monopolizing.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN20[] **Regulated Practices, Monopolies & Monopolization**

Antitrust law condemns practices that drive up prices by curtailing output. The injury must be the result of anti-competitive behavior, meaning injury resulting from acts that either reduce output or raise prices to consumers.

Torts > Intentional Torts > Abuse of Process > Elements

HN21[] **Abuse of Process, Elements**

In order to state a claim for abuse of process, the pleading must allege the existence of an ulterior purpose or motive and some act in the use of legal process not proper in the regular prosecution of the proceedings.

Torts > Intentional Torts > Abuse of Process > Elements

HN22[] **Abuse of Process, Elements**

Unlike malicious prosecution, which involves filing a baseless suit to harass or intimidate an antagonist, abuse of process is the use of the litigation process for an improper purpose, whether or not the claim is colorable. The gist of the abuse of process tort is said to be misuse of legal process primarily to accomplish a purpose for which it was not designed, usually to compel the victim to yield on some matter not involved in the suit. If the plaintiff can show instigation of a suit for an improper purpose without probable cause and with a termination favorable to the now plaintiff, she has a malicious prosecution or a wrongful litigation claim, not a claim for abuse of process. The mere institution of proceedings, even with a malicious motive, does not in and of itself constitute abuse of process.

Torts > Intentional Torts > Abuse of Process > Elements

HN23[] **Abuse of Process, Elements**

Absent an inappropriate act in the regular prosecution of a suit, an abuse of process action will not lie.

Trade Secrets Law > Misappropriation Actions > General Overview

HN25[] **Trade Secrets Law, Misappropriation Actions**

The Illinois Trade Secrets Act (ITSA) provides that it does not affect other civil remedies that are not based upon the misappropriation of a trade secret. *765 ILCS 1065/8(b)(2)*.

Antitrust & Trade Law > Consumer Protection > Likelihood of Confusion > False Designation of Origin

Torts > Business Torts > Unfair Business Practices > Elements

HN26[] **Likelihood of Confusion, False Designation of Origin**

A party's claim under § 43 of the Lanham Act that a competitor passed off goods as the party's and that it used a false designation of origin will succeed only if the party shows that the competitor uses in commerce any false designation of origin, false or misleading description of fact, or false or misleading representation of fact, which is likely to cause confusion, or to cause mistake, or to deceive as to the origin, sponsorship, or approval of its goods. *15 U.S.C.S. § 1125(a)(1)(A)*.

Antitrust & Trade Law > Consumer Protection > Likelihood of Confusion > False Designation of Origin

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN27[] **Likelihood of Confusion, False Designation of Origin**

Claims alleging false representation under the Lanham Act, *15 U.S.C.S. § 1125(a)*, are subject to *Fed. R. Civ. P. 9(b)*.

Antitrust & Trade Law > Consumer Protection > Likelihood of Confusion > False Designation of Origin

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

HN28[] **Likelihood of Confusion, False Designation of Origin**

Although false designation claims under the Lanham Act, *15 U.S.C.S. § 1125(a)*, need not involve allegations that the defendant misused a specific logo or mark, there does need to be some indication that the defendant made a false representation.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

HN29[] **False Advertising, Lanham Act**

The fact that a scheme to defraud was disseminated from a company's headquarters in Illinois is insufficient to support a claim under the Illinois Uniform Deceptive Trade Practices Act (IUDTPA), *815 ILCS 510/2*, and the Illinois Consumer Fraud Act (ICFA), *815 ILCS 505/2*.

Opinion

MEMORANDUM OPINION AND ORDER

MATTHEW F. KENNELLY, District Judge:

Organ Recovery Systems, Inc. (ORS) has sued Preservation Solutions, Inc., its president Gary L. Swanson, Bridge to Life, Ltd., and BTL Solutions, LLC, for breach of contract, false advertising and unfair competition under the Lanham Act, deceptive trade practices, and **[*2]** consumer fraud. Both Preservation Solutions and Swanson (collectively PSI) and Bridge to Life and BTL Solutions (collectively BTL) filed motions to dismiss ORS's first amended complaint, which the Court granted in part. *Organ Recovery Systems, Inc. v. Preservation Solutions, Inc.,* *No. 11 C 4041, 2012 U.S. Dist. LEXIS 4634, 2012 WL 116041 (N.D. Ill. Jan. 16, 2012)*. Both PSI and BTL have now moved to dismiss ORS's second amended complaint. In addition, BTL and PSI have each filed counterclaims against ORS, and ORS has moved to dismiss those claims. In this decision, the Court rules on each of the motions to dismiss.

Background

HN1[] In considering each party's motion to dismiss, the Court takes as true the facts alleged by the party whose complaint or counterclaim is challenged. *Hallinan v. Fraternal Order of Police of Chi. Lodge No. 7, 570 F.3d 811, 820 (7th Cir. 2009)*. The Court will discuss the allegations in more detail as necessary.

ORS's allegations are substantially similar to those the Court discussed in its previous decision, with which the Court assumes familiarity. ORS provides two solutions that are used to preserve kidneys during transplant procedures. One of these solutions, "KPS-1," is based on a freely available **[*3]** recipe developed by the University of Wisconsin. ORS attempted to improve the solution's packaging and shelf life. It entered into a contract with PSI to have PSI assist with testing, manufacturing and obtaining regulatory approval for KPS-1. The contract prohibited PSI from using or disclosing ORS's confidential information.

Since 2008 or 2009, BTL has competed with ORS in the organ preservation solutions market. The two companies sell formulas based on the same solutions and have focused on innovations in packaging and storage. ORS alleges that PSI misappropriated ORS's confidential information by using it in FDA applications and delivering it to BTL. ORS also makes a series of allegations regarding communications by BTL and/or PSI to current or prospective ORS customers that suggested false or damaging information about ORS products.

In its previous decision, the Court granted in part defendants' motions to dismiss an earlier version of ORS's complaint. Specifically, the Court dismissed claims by ORS against PSI for breach of fiduciary duty and for imposition of a constructive trust (as a separate claim rather than a remedy). The Court also dismissed ORS's claim against all defendants **[*4]** for civil conspiracy.

Discussion

A. ORS's amended complaint

1. Counts one and two

In its amended complaint, ORS asserts two claims against PSI alone. In count one, ORS alleges that PSI breached a "confidentiality agreement" that the two businesses made in 2000 "for the purpose of exploring the possibility of engaging PSI to perform work for ORS involving the development of and improvements to organ preservation solutions." 2d Am. Compl. ¶ 21. The agreement states that ORS "desires to explore the possibility of engaging [PSI] for the purpose of prototype & development of disposables and [illegible]." *Id.*, Ex. A at 1. According to ORS, PSI breached its obligations under the confidentiality agreement by "among other things, filing 510K applications with the FDA impermissibly based on ORS's Confidential Information and/or using ORS's Confidential Information in the design and development of packaging and label claims for organ preservation solutions sold and offered for sale by BTL and/or others." *Id.* ¶ 103.

In count two, ORS claims that PSI breached a 2002 contract between the parties under which PSI agreed to create solutions. PSI does not seek dismissal of count two. It contends, however, **[*5]** that count one should be dismissed because the 2000 confidentiality agreement merged into the 2002 contract. The 2002 contract contains a provision stating that it "is the entire agreement between [ORS and PSI] concerning the provision of the services described in Exhibit B (Statement of Work)." *Id.*, Ex. B at 2. The contract also "supersedes any prior agreements (including without limitation any non-disclosure agreements) proposals or other communications, oral, written, between the parties with respect to the Services." *Id.* Exhibit B to the agreement indicates that PSI agrees to undertake five projects, including "processing specifications to support the initial 510(k) for KPS-1," "initial production of KPS-1," and "design modification to packaging and shelf-life extension." *Id.*, Ex. B at 10.

HN2[] "It is well settled under the doctrine of merger and the parol evidence rule that a written agreement which is complete on its face supersedes all prior agreements on the same subject matter." *Barille v. Sears Roebuck and Co., 289 Ill. App. 3d 171, 177, 682 N.E.2d 118, 123, 224 Ill. Dec. 557 (1997)*. ORS does not appear to contest that the 2000 confidentiality agreement merged into the parties' later contract. In **[*6]** particular, ORS does not argue that the 2002 agreement is incomplete on its face, and it does not argue that the two documents concern different subject matter. ORS does argue, however, that "to the extent ORS entrusted Confidential Information to PSI prior to January 30, 2002, it was subject to the terms of the Confidentiality Agreement and any misappropriation would be subject to the terms of the Confidentiality Agreement." ORS Resp. to PSI Mot. to Dismiss at 10.

ORS does not allege that PSI did anything impermissible before the 2002 contract became effective. Rather, it alleges only that it entrusted PSI with confidential information while the confidentiality agreement was in effect. ORS offers no legal support for its argument that a breach of the 2000 confidentiality agreement that occurred, if at all, only after the 2002 contract is separately actionable under the earlier, merged agreement. The Court agrees with PSI that the earlier contract merged into the later one and therefore dismisses count one.

2. Count three

a. ORS's claims against PSI

In count three, ORS asserts claims under section 43(a)(1)(B) of the Lanham Act, *15 U.S.C. § 1125(a)(1)(B)*, against both sets of defendants. **[*7]** ***HN3***[] "Section 43(a)(1)(B) of the Lanham Act . . . forbids the use of any false or misleading description of fact, or false or misleading representation of fact, which in commercial advertising or promotion, misrepresents the nature, characteristics, or qualities of the seller's or another person's goods." *Schering- Plough Healthcare Prods. v. Schwarz Pharma, Inc., 586 F.3d 500, 503 (7th Cir. 2009)* (citing *15 U.S.C. § 1125(a)(1)(B)*) (brackets and ellipses in original omitted).

ORS's Lanham Act claims against PSI appear to be based solely on a letter that PSI sent on September 12, 2011 to (among others) an Illinois organ procurement organization ("OPO") called Gift of Hope Organ & Tissue. The letter reads as follows:

> Dear OPO Administrator:
>
> We have been informed that one of the companies that has distributed UW Cold Storage Solution in compliance with the Preservation Solutions Inc. (PSI) FDA 510K applications, K073693, K083453, and K091245 is presently distributing a Solution not manufactured by PSI. . . .
>
> This is critical to you and your patients for the following reasons:
>
> 1. The instructions for use allowed for the substituted product may be different from PSI's UW Cold Storage Solution.
>
> 2. **[*8]** The PSI product has been stability tested, reviewed and certified for storage and shipping at room temperature. (USP definition)
>
> 3. The PSI UW Cold Storage Solution has been stability tested, reviewed and certified for use without a final filter. PSI's UW Cold Storage Solution is certified to meet both USP and European Pharmacopeial limits for endotoxin.
>
> The transplant solution is an integral part of your organ transplant procedure. We know that patient safety is paramount and that full disclosure is essential to protecting your patient. Please check the product label to determine the manufacturer of the solution being supplied to your center.

2d Am. Compl., Ex. I. ORS alleges, on information and belief, that "PSI sent the same letter to OPO administrators, hospitals and other potential ORS customers throughout the country" and that "[n]umerous customers and potential customers have expressed confusion and concern regarding the content of PSI's letter." *Id.* ¶¶ 95-96. ORS alleges that two OPO employees contacted ORS to follow up on PSI's letter and that a third e-mailed other OPOs asking if "anyone know[s] what is going on?" *Id.* ¶¶ 98- 100.

HN4[] "To establish a claim under the false or deceptive **[*9]** advertising prong of § 43(a) of the Lanham Act, a plaintiff must prove: (1) a false statement of fact by the defendant in a commercial advertisement about its own or another's product; (2) the statement actually deceived or has the tendency to deceive a substantial segment of its audience; (3) the deception is material, in that it is likely to influence the purchasing decision; (4) the defendant caused its false statement to enter interstate commerce; and (5) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to defendant or by a loss of goodwill associated with its products." *Hot Wax, Inc. v. Turtle Wax, Inc., 191 F.3d 813, 819 (7th Cir. 1999)*.

In its motion to dismiss, PSI first argues that ORS does not allege the type of conduct that § 43(a) is intended to reach — essentially, that the letter does not qualify as "commercial advertising or promotion." **HN5**[] "Advertising is a subset of persuasion and refers to dissemination of prefabricated promotional materials." *Zurich Ins. Co. v. Amcor Sunclipse North America, 241 F.3d 605, 607 (7th Cir 2001)*. The Seventh Circuit has stated "that § 43(a) addresses 'promotional **[*10]** material disseminated to anonymous recipients.'" *Sanderson v. Culligan Intern. Co., 415 F.3d 620, 624 (7th Cir. 2005)* (quoting *First Health Group Corp. v. BCE Emergis Corp., 269 F.3d 800, 804 (7th Cir. 2001))*. This definition contrasts "a form of promotion to anonymous recipients" with "face-to-face communication" such as "a person-to-person pitch by an account executive." *First Health Group, 269 F.3d at 803*.

In this same vein, the Seventh Circuit determined that "three . . . supposedly false . . . person-to-person communications at trade shows" did not qualify as advertising under § 43(a). *Sanderson, 415 F.3d at 624*. The court has also noted that "letters sent to customers do not come within the scope of § 43(a)(1)(B)." *ISI Intern., Inc. v. Borden Ladner Gervais LLP, 316 F.3d 731, 733 (7th Cir. 2003)*. The Seventh Circuit has never held, however, that "anonymous" must mean that a corporation cannot know the identities of the recipients of the communications.

This Court has recently determined that **HN6**[] commercial advertising or promotion within the meaning of § 43(a) may consist of "unsolicited statements to numerous potential clients with which [an advertiser] had no relationship." *Gov't Payment Serv., Inc. v. LexisNexis VitalChek Network, Inc., No. 12 C 1946, 2012 U.S. Dist. LEXIS 73943, 2012 WL 1952905, at *5 (N.D. Ill. May 29, 2012)*. **[*11]** This Court has also noted determinations from other circuits stating that to be covered under § 43(a), representations must "involve commercial speech by a defendant, for the purpose of influencing customers to buy the defendant's goods or services, and must be disseminated sufficiently to the relevant purchasing public to constitute 'advertising' or 'promotion' within that industry." *Installation Servs., Inc. v. Elec. Research, Inc., No. 04 C 6906, 2005 U.S. Dist. LEXIS 17185, 2005 WL 645244, at *2 (N.D. Ill. Mar. 21, 2005)*. Another court has concluded that "where the potential purchasers in the market are relatively small in number a single promotional presentation to an individual purchaser may be sufficient to invoke the protections of the Lanham Act." *Derby Indus., Inc. v. Chestnut Ridge Foam, Inc., 202 F. Supp. 2d 818, 822-23 (N.D. Ind. 2002)*.

PSI contends that ORS's Lanham Act claim fails because "actionable advertising must be anonymous" and ORS has alleged only "[p]erson to person statements" by PSI. PSI Reply at 2-3. ORS, however, has alleged that the letter was received by "potential ORS customers throughout the country." 2d Am. Compl. ¶ 95. The fact that the letter that ORS submitted with its amended **[*12]** complaint is addressed "Dear OPO Administrator" rather than to a named individual or business supports ORS's suggestion that it was a mass unsolicited communication. The Court concludes that even if PSI's letter was specifically targeted to OPOs — which would mean that PSI knew the identities of all recipients based on its mailing list — ORS has alleged that the letters were a generalized solicitation rather than an individualized communication. For this reason, ORS has not failed to allege "commercial advertising or promotion."

PSI next argues that ORS has not alleged that the letter had the necessary effect on customers. Because ORS is arguing not that the letter made false statements but rather that it made statements that "may be literally true or ambiguous, but which implicitly convey a false impression [or] are misleading in context," ORS must "prove that the statement is misleading in context by demonstrated actual consumer confusion." *Hot Wax, 191 F.3d at 820*. The Court agrees with ORS that claims that three OPO employees expressed confusion — two of them directly to ORS — allege customer confusion sufficiently to survive PSI's motion to dismiss. These allegations could also **[*13]** support a finding that ORS is "likely to be injured as a result of" PSI's statements. *See id. at 819*.

For these reasons, the Court declines to dismiss count three as against PSI.

b. ORS's claims against BTL

BTL makes an argument similar to one of PSI's arguments: apart from one press release, the communications that ORS contends provide a basis for a Lanham Act claim do not constitute "commercial advertising or promotion." In response, ORS argues that several of its allegations independently support the claim and those that do not should be construed in the aggregate.

In a section of its complaint entitled "BTL's Misrepresentations," ORS alleges that a BTL officer sent a "broadcast email to 'Organ Procurement Professional[s]'" stating falsely that it was "Bridge to Life that made the FDA approved label change for the room-temperature storage of UW solution possible." 2d Am. Compl. ¶ 65. ORS argues that it was ORS itself, not BTL, that enabled the label change and that for BTL to imply otherwise is damaging to ORS. ORS alleges that BTL issued a press release in April 2009 that contained similar information. *Id.* ¶ 74.

Both of these statements can support a claim that BTL engaged in advertising **[*14]** or commercial speech. Even if ORS knew all of the businesses that would receive the broadcast e-mail, the allegations would allow for a finding that the e-mail was not specifically targeted to any of them individually. Rather, as characterized by ORS, the e-mail was an anonymous communication not in the sense that a television commercial is anonymous, but in that it was a generic communication to a large group, and each recipient was provided with the same material.

ORS alleges that "BTL attempted to acquire one of ORS' customers, New England Organ Bank, by making false and disparaging remarks about ORS" and that "[u]pon information and belief, BTL has made similar statements to other potential customers and ORS's existing customers as well." *Id.* ¶ 70. These allegations cannot serve as the basis for a Lanham Act claim because they describe individualized communications. ***HN7***[] The Lanham Act does not cover every instance in which a business speaks to the customer of another business, even if the speaker is lying. ORS alleges that this act occurred because BTL was specifically trying to acquire a particular customer. Whether or not this might be actionable under another legal theory, it does **[*15]** not amount to "advertising" for purposes of the Lanham Act.

The same is true of ORS's allegations that it and BTL both responded to a call for proposals from a transplant organization in the United Kingdom and that BTL's response improperly included false statements about ORS. BTL's statements were individualized communications, as were the two additional examples of person-to-person communications listed in the amended complaint — ORS alleges that named BTL personnel "told" something to named OPO personnel. 2d Am. Compl. ¶¶ 84-85. This is likewise true of ORS's allegation that "BTL has told organ preservation solution customers that ORS has had a recall of SPS-1 when, in fact, it was BTL that had a recall of its static preservation solutions." *Id.* ¶ 89. Although ORS contends that these communications are examples of a larger advertising campaign, the manner in which they are alleged in the amended complaint does not permit that characterization.

The Court therefore declines to dismiss count three in its entirety as against BTL but circumscribes ORS's claims to those the Court has indicated may viably be characterized as advertising within the meaning of § 43(a).

3. Counts four and five

a. [*16] ORS's claims against PSI

In count four, ORS asserts a claim under the Illinois Uniform Deceptive Trade Practices Act (IUDTPA), *815 ILCS 510/2*, against both sets of defendants. In count five, it asserts a claim under the Illinois Consumer Fraud ACT (ICFA), *815 ILCS 505/2*, against both sets of defendants.

ORS bases its claims against PSI on two sets of allegations. First, ORS alleges that PSI is liable under IUDTPA and ICFA for the conduct discussed in the previous section, because "claims under [IUDTPA and ICFA] rise and fall with . . . Lanham Act claims." *M. Arthur Gensler, Jr. & Assocs., Inc. v. Strabala, No. 11 C 3945, 2012 U.S. Dist. LEXIS 21255, 2012 WL 600679, at *3 (N.D. Ill. Feb. 21, 2012)* (citing *MJ & Partners Rest. Ltd. P'ship v. Zadikoff, 10 F. Supp. 2d 922, 929 (N.D. Ill. 1998))*. PSI argues that because the Lanham Act claims are deficient, these claims fail as well. The Court has determined, however, that ORS's Lanham Act claim based on PSI's letter survives. PSI offers no other argument regarding why this portion of ORS's IUDTPA claim or its ICFA claim should be dismissed.

ORS's IUDTPA claim also contains allegations that PSI "engaged in unfair and deceptive trade practices by exploiting ORS's Confidential **[*17]** Information for [its] own gain" by filing "applications with the FDA impermissibly based on ORS's Confidential Information" and using the information "in the design and development of the packaging for BTL's organ preservation solutions." 2d Am. Compl. ¶¶ 122-24. [1] After the Court issued its previous decision in this case, PSI filed a motion seeking clarification. At a hearing on the motion, the Court stated:

> I don't think the complaint alleges that PSI itself ever made a deceptive claim about its products in the way that it alleges that BTL did. On the other hand, the plaintiff has alleged the PSI made the solutions for BTL using the plaintiff's confidential information. And that at least in theory could fit under a section of the [IUDTPA] as other conduct creating a likelihood of confusion. The complaint can be read, I think fairly, as saying that PSI and Swanson as the makers of the solution then supported and profited from this sort of what the statute calls a deceptive practice. . . .
>
> So I'm, frankly, not quite sure as I sit here exactly what the theory is that the plaintiff is advancing on Count 4, but I guess I'm not prepared to dismiss it at this point. It may be that what ought **[*18]** to happen is it ought to be repled in some way, or it maybe ought to be tweaked, I guess.

Feb. 6, 2012 Tr. at 6-7.

PSI appears to suggest that ORS's failure to "tweak" its allegations mandates dismissal. The Court did not state, however, that ORS was required to alter its complaint in order for this claim to survive. As the Court indicated during the hearing, ORS's allegations of conduct by PSI provide a sufficient basis for a claim that PSI can be found to have engaged in "other conduct which similarly creates a likelihood of confusion or misunderstanding." *815 ILCS 510/2(a)(12)*.

For these reasons, the Court declines to dismiss count five as against PSI.

b. ORS's claims against BTL

BTL argues that ORS has failed to allege a significant connection between the conduct at issue and Illinois, which both IUDTPA and ICFA require. The Illinois Supreme Court has held that ***HN8***[] ICFA does not "apply to fraudulent transactions which take place outside Illinois." *Avery v. State Farm Mut. Auto. Ins. Co., 216 Ill. 2d 100, 185, 835 N.E.2d 801, 853, 296 Ill. Dec. 448 (2005)*. **[*19]** The "critical question" in deciding whether an in-state transaction occurred is "whether the circumstances relating to [the] disputed transactions . . . occurred primarily and substantially in Illinois." *Id. at 187, 835 N.E.2d at 854*. "The place of injury or deception is only one of the circumstances," however, and a case in which "the bulk of the circumstances that make up a fraudulent transaction

[1] Although the amended complaint indicates that ORS asserts a claim based on this confidential information against BTL as well as PSI, neither BTL's motion to dismiss nor ORS's response mentions the point.

occur within Illinois, and the only thing that occurs out-of-state is the injury or deception," the claim may be actionable. *Id. at 187, 835 N.E.2d at 853*.

The Seventh Circuit has noted that the *Avery* standard is "not exactly self defining." *Morrison v. YTB Intern., Inc., 649 F.3d 533, 538 (7th Cir. 2011)*. The Illinois Supreme Court did indicate, however, that factors including ***HN9***[] the following were suggestive of a claim that may be brought under IUDTPA and ICFA: "(1) the contracts containing the deceptive statements were all executed in Illinois; (2) the defendant's principal place of business was in Illinois; (3) the contract contained express choice-of-law and forum-selection clauses specifying that any litigation would be conducted in Illinois under Illinois law; (4) complaints regarding **[*20]** the defendant's performance were to be directed to its Chicago office; and (5) payments for the defendant's services were to be sent to its Chicago office." *Avery, 216 Ill. 2d at 189, 835 N.E.2d at 855*.

Bridge to Life (one of the two defendants referred to in this opinion collectively as BTL) is a Delaware corporation that has its principal place of business in Illinois. ORS is also headquartered in Illinois. ***HN10***[] "The fact that a scheme to defraud was disseminated from a company's headquarters in Illinois is insufficient" without more. *Phillips v. Bally Total Fitness Holding Corp., 372 Ill. App. 3d 53, 58, 865 N.E.2d 310, 315, 309 Ill. Dec. 947 (2007)*. In this case, however, both the plaintiff and one of the defendants are headquartered in Illinois. (Defendants use "BTL" in the counterclaim, referring to themselves collectively, allowing for an inference that the circumstances of "BTL's" transactions were the same for both of them.) It is likely that the disputed communications - which include press releases and a blast e-mail - originated in Illinois and that ORS felt harm in Illinois. In that event, even if all of the disputed communications reached only out-of-state plaintiffs, that would not necessarily **[*21]** place the acts beyond ICFA's reach. *Avery, 216 Ill. 2d at 187, 835 N.E.2d at 853*. The Court declines to dismiss count four on this basis at this stage of the proceedings.

BTL argues that IUDTPA claims are subject to the same territoriality requirement as ICFA claims. *See LG Elecs. USA, Inc. v. Whirlpool Corp., 809 F. Supp. 2d 857, 859- 61 (N.D. Ill. 2011)*. Other than its argument that IUTDPA claims are also analyzed under the Lanham Act, BTL offers no other argument that the Court should dismiss count five. For the reasons already stated, the Court declines to do so.

4. Count six

In count six, ORS asserts a claim against BTL for tortious interference with prospective economic advantage. ***HN11***[] To succeed on this claim under Illinois law, a plaintiff must prove "(1) the plaintiff's reasonable expectation of a future business relationship; (2) the defendant's knowledge of that expectation; (3) purposeful interference by the defendant that prevents the plaintiff's legitimate expectations from ripening; and (4) damages." *Ali v. Shaw, 481 F.3d 942, 944 (7th Cir. 2007)*.

BTL argues that ORS's complaint fails to identify anyone with whom ORS had an actual "expectation of a future business relationship." **[*22]** ***HN12***[] Illinois courts require a plaintiff to demonstrate a "sufficiently strong expectancy" that he or she would receive a particular economic advantage and have rejected claims by, for example, a plaintiff who alleged only having "undergone several interviews [and] been invited back for further interviews." *Anderson v. Vanden Dorpel, 172 Ill. 2d 399, 409-411, 667 N.E.2d 1296, 1300-01, 217 Ill. Dec. 720 (1996)*; *see also Aslam v. Bd. of Educ. of City of Chi., No. 06 C 4920, 2008 U.S. Dist. LEXIS 83798, 2008 WL 3978562, at *8 (N.D. Ill. Aug. 25, 2008)* (dismissing claims by plaintiff "relying on . . . merely the hope of being eligible to receive a job offer in the future"); *Automated Concepts, Inc. v. Weaver, No. 99 C 7599, 2000 U.S. Dist. LEXIS 11560, 2000 WL 1134541, at *7 (N.D. Ill. Aug. 9, 2000)* ("[A] 'track record' of receiving work from a particular customer in the past, in and of itself, does not establish a reasonable expectation of . . . entering into any particular future business relationship."); *Hoopla Sports and Ent., Inc. v. Nike, Inc., 947 F. Supp. 347, 358 (N.D. Ill. 1996)* ("[A]lthough a plaintiff need not allege that it had a firm offer in hand prior to the alleged interference, mere allegations that the plaintiff was involved in the process of negotiations **[*23]** with a third party were insufficient.").

For the most part, BTL is correct that ORS has failed to plead an actual expectancy. For example, as the Court indicated earlier, ORS emphasizes an incident in which both ORS and BTL responded to a British OPO's "request to submit a proposal to supply the UK with static cold storage solution." 2d Am. Compl. ¶ 79. The OPO then "relied on BTL's misrepresentation [about the quality of ORS's solutions] in making [its] purchasing decisions." *Id.* ¶ 82. The Court concludes that ORS's allegations regarding this incident are insufficient because there is no indication that there was an actual business expectancy. Mere unsuccessful solicitation does not give rise to a tortious interference claim.

ORS cites two cases in support of its claims. In one, a resort developer successfully alleged that there was a business expectancy after he received a letter of interest from a large hotel company and "entered into preliminary negotiations" about a property. *Clarage v. Kuzma, 342 Ill. App. 3d 573, 577, 795 N.E.2d 348, 353, 276 Ill. Dec. 995 (2003)*. In the other, "allegations that negotiations regarding an exclusive supply agreement were conducted" were sufficient. *Laser Inds., Ltd. v. Eder Instrument Co., 573 F. Supp. 987, 993 (N.D. Ill. 1983)*. **[*24]** ORS argues that these cases show that allegations of "preliminary stages of negotiation are sufficient" to support a claim for tortious interference. ORS Resp. to BTL Mot. to Dismiss at 12. Even that is true, ORS has not alleged that it had entered any kind of negotiations with the British OPO, but only that it responded to a call from proposals. ORS has not alleged any response from the British OPO indicating interest or the initiation of a business relationship, and this allegation therefore cannot support ORS's tortious interference claim against BTL.

ORS also alleges that BTL made misrepresentations to three specific OPOs and alleges generally that ORS has made "misrepresentations to consumers" and that "consumers have relied on the same or similar misrepresentations made by BTL in making their purchasing decisions." 2d Am. Compl. ¶¶ 81-86. With one exception, these allegations suffer from the same problem as those in the previous paragraph: even if BTL's communications influenced the consumers' decisions, there is no allegation that ORS had a prospective business arrangement or a relationship of any kind with them.

ORS does allege that BTL made misstatements to Juan Ramirez, an **[*25]** employee of One Legacy OPO. "[B]ased on his belief that BTL's solutions were the only 'Belzer UW' solutions in the marketplace, and after having previously orally committed to purchasing ORS's products, [the employee] chose to purchase BTL's products instead." *Id.* ¶ 86. ORS's statement that it had received a commitment from One Legacy to purchase its product constitutes a sufficient allegation of a business expectancy.

BTL argues, however, that the allegations regarding Ramirez cannot support a claim because ORS has not alleged that BTL had "knowledge of that expectation." *See Ali, 481 F.3d at 944*. The Court agrees. Nothing in ORS's amended complaint suggests, generally or specifically, that BTL knew that Ramirez had agreed to purchase ORS products or had entered a business relationship with ORS in any way.

For these reasons, the Court dismisses count six.

B. BTL's counterclaim

1. Count one

In count one of its counterclaim, BTL alleges that ORS has engaged in monopolization in violation of the Sherman Act, *15 U.S.C. § 2*. BTL alleges that ORS dominates the organ preservation solutions market and has utilized anti-competitive tactics — primarily the filing of this lawsuit — to drive BTL out **[*26]** of business and punish PSI for working with BTL. According to BTL, this has, among other things, "increased costs to customers by preventing competitive entrants from reaching economies of scale." BTL Countercl. ¶ 76.

HN13[] The "offense of monopoly under *§ 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident."

Goldwasser v. Ameritech Corp., 222 F.3d 390, 396-97 (7th Cir. 2000) (quoting Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)) (internal quotation marks omitted). BTL must also allege that ORS's conduct has caused "antitrust injury" because "private antitrust litigation is limited to suits by those persons for whose benefit the laws were enacted." Robert F. Booth Trust v. Crowley, 687 F.3d 314, No. 10-3285, 2012 U.S. App. LEXIS 11927, 2012 WL 2126314, at *1 (7th Cir. June 13, 2012).

ORS argues that BTL's allegations are insufficient to meet each of these three requirements. First, ORS argues that BTL has not alleged facts sufficient to establish that ORS has monopoly **[*27]** power in the relevant market. ***HN14***[] "Monopoly power is the power to control prices or exclude competition." United States v. E.I. du Pont Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956). It "is a seller's ability to charge a price above the competitive level (roughly speaking, above cost, including the cost of capital) without losing so many sales to existing competitors or new entrants as to make the price increase unprofitable." Sheridan v. Marathon Petroleum Co., 530 F.3d 590, 594 (7th Cir. 2008). "Monopoly" does not mean that there is only one seller — "a seller who has a large market share may be able to charge a price persistently above the competitive level despite the existence of competitors." *Id.*

In its response to ORS's motion to dismiss, BTL relies in large part on the Seventh Circuit's statement that it has not "rule[d] out [the] approach" of "relying solely on market share as a basis for inferring market power . . . especially . . . where there are barriers to entry and no substitutes from the consumer's perspective." Wilk v. Am. Med. Ass'n, 895 F.2d 352, 360 (7th Cir. 1990). BTL contends that its allegation that ORS has a sixty-eight percent market share is sufficient to allege monopoly **[*28]** power when considered along with the barriers to entry posed by the FDA approval process and the small number of participants in the organ preservation solutions market.

Wilk, however, does not concern the definition of monopoly power. Rather, the quoted discussion involves ***HN15***[] the concept of market power in a Sherman Act § 1 case, which is defined as "the ability to raise prices above the competitive level by restricting output." Id. at 359. "Monopoly power under § 2 requires, of course, something greater than market power under § 1." Eastman Kodak, 504 U.S. at 481. Market power may well be a factor to consider in determining whether a business has monopoly power, but BTL provides no support for the proposition that an allegation of market share accompanied by the *Wilk* factors is sufficient to survive a 12(b)(6) motion on a § 2 claim.

The only other fact that BTL argues is indicative of monopoly power is that in "2008 to 2009, ORS implemented massive price increases (300% or higher) for some of its products, including the 'kits' that are necessary for the use of its machine perfusion pumps." BTL Countercl. ¶ 31. The ensuing paragraph of the counterclaim states, "ORS exercises monopoly power **[*29]** in the organ preservation solution market, as evidenced by its ability to unilaterally impose large price increases on its customers." *Id.* ¶ 32. ORS argues that these allegations are irrelevant because the relevant market in this case is that of organ solutions, not kits, and the price increase is indicative only of ORS's power in the kits market.

The Court agrees that the language in paragraph thirty-one provides no indication of ORS's power in the organ preservation solutions market, and paragraph thirty-two is a legal conclusion. The statement about price increases thus cannot provide an additional basis for finding monopoly power, leaving BTL with only its allegations regarding market power. As the Court has explained, these allegations are insufficient.

HN16[] If a plaintiff "fail[s] to identify any facts from which the court can infer that defendants had sufficient market power to have been able to create a monopoly, [its] § 2 claim may be properly dismissed" on a Rule 12(b)(6) motion. Endsley v. City of Chicago, 230 F.3d 276, 282 (7th Cir. 2000) (internal quotation marks and citation omitted). In *Endsley*, the Seventh Circuit considered allegations that the tolls for the Chicago Skyway **[*30]** bridge were higher than what was needed to meet operating costs, violating § 2. The court concluded that plaintiffs had failed to allege "that defendant had enough market power to create a monopoly" because "very viable" alternative options were available to consumers even though the Skyway was "more desirable." Id. at 282-83. "If the Skyway tolls become too high, drivers will take one of the alternate routes." Id. at 283.

BTL has not alleged that no viable alternatives exist for customers who find ORS's prices for organ preservation solutions to be too high. Although a firm need not be the only seller in a market to exercise monopoly power, BTL's allegation that its "sales account for approximately 28 percent [of] both the static and machine perfusion forms of Wisconsin-formula solutions" cuts against an implication that customers lack other options. BTL Countercl. ¶ 20. The same is true of BTL's allegation that "ORS has been forced to reduce its prices or forestall price increases due to the competitive presence of BTL in the marketplace." *Id.* ¶ 29.

The Court concludes that BTL has not alleged facts sufficient to support a finding that ORS has exercised monopoly power at any time relevant **[*31]** to this lawsuit. The Court therefore dismisses count one of BTL's counterclaim.

2. Count two

In count two of its counterclaim, BTL alleges, based on essentially the same facts set forth in count one, that ORS has engaged in conduct that constitutes attempted monopolization in violation of the Sherman Act. ***HN17***[] "[I]t is generally required that to demonstrate attempted monopolization a plaintiff must prove (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*.

BTL argues that it has alleged anti-competitive acts, primarily based on ORS's filing of this lawsuit. BTL contends that the lawsuit amounts to sham litigation and that ORS's claims are objectively baseless. Since the filing of this lawsuit, BTL alleges, it "has been forced to divert most of its available revenue away from research on pioneering organ preservation technology and into a legal defense against ORS's sham and baseless claims." BTL Countercl. ¶ 25. "BTL has had no choice but to reduce its research and development efforts, which will delay the **[*32]** introduction of these new and improved products to the organ transplant community." *Id.* BTL also argues in its brief that ORS has used the lawsuit to try to capture the production of organ preservation solutions by, for example, seeking the placement of PSI's assets in a constructive trust. BTL contends that because ORS has an exclusive relationship with an entity that BTL alleges is the only other manufacturer of organ preservation solutions in the country, ORS's success in this lawsuit — or even its continued prosecution of the suit — will drive BTL and PSI out of the marketplace. If the lawsuit turns out to be baseless, BTL argues, that will indicate that ORS filed the suit in bad faith to produce exactly these effects.

ORS argues that even if it had filed a sham lawsuit, it would not be liable under the Sherman Act based on that alone. BTL's allegations, however, concern not just the filing of this suit but ORS's alleged use of it to gain effective control of the manufacture of organ preservation solutions. The Court agrees with BTL that if ORS's actions and motivation are as alleged, that would constitute an anti-competitive act.

HN18[] BTL must also allege a "dangerous probability of **[*33]** achieving monopoly power," which requires that "the antitrust defendant currently has market power and that such market power will tend to approach monopoly power if the alleged unlawful conduct remains unchecked." *Walter Kidde Portable Equip., Inc. v. Universal Sec. Instruments, Inc., 669 F. Supp. 2d 895, 901 (N.D. Ill. 2009)*. "Market share indicates market power only when sales reflect control of the productive assets in the business, for only then does it reflect an ability to curtail total market output." *Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1414 (7th Cir. 1989)*.

ORS makes no argument specifically directed at count two, and it does not discuss at all the question of its probability of achieving monopoly power. ***HN19***[] The Seventh Circuit has recommended "the greatest restraint in condemning any unilateral practice as 'monopolization'" because "any firm's unilateral conduct is almost always deemed lawful unless it creates a dangerous probability of success in monopolizing." *Schor v. Abbott Labs., 457 F.3d 608, 613 (7th Cir. 2006)*. If ORS acted in the manner described in the previous paragraphs, however, and if it succeeded in driving BTL and PSI out of the marketplace, **[*34]** ORS would end up with a market share of nearly ninety percent. It would also have an exclusive relationship with the only remaining manufacturer. Thus if BTL and PSI were to leave the marketplace, ORS would almost certainly achieve monopoly power. Assuming the truth of

BTL's allegations, therefore, BTL has sufficiently alleged the dangerous probability element of an attempted monopolization claim.

ORS also argues that BTL has failed to allege that ORS's conduct could cause an antitrust injury. ***HN20***[] "***Antitrust law*** condemns practices that drive up prices by curtailing output." *Sanderson, 415 F.3d at 623*. The injury must be the result of anti-competitive behavior, meaning "injury resulting from acts that either reduce output or raise prices to consumers." *Medrad, Inc. v. Sprite Dev., LLC, No. 08 C 5088, 2011 U.S. Dist. LEXIS 99848, 2011 WL 3900730, at *3 (N.D. Ill. Sept. 6, 2011)*; *see also* *Midwest Gas Servs., Inc. v. Indiana Gas Co., 317 F.3d 703, 714 (7th Cir. 2003)* (rejecting claim of antitrust injury when "losses [do not] stem from . . . behavior that is anticompetitive, *e.g.*, predatory pricing"). According to ORS, BTL's allegations regarding the lawsuit fail to include facts regarding prices or output. The Court disagrees. **[*35]** BTL's claim is essentially that ORS is trying to prevent BTL from succeeding in the marketplace, which would leave ORS as the only real option for consumers. BTL also alleges that ORS is trying to control output by trying to disable PSI. Taking BTL's allegations in the light most favorable to BTL, as required at this stage of the proceedings, it has sufficiently alleged that ORS's success in its alleged endeavor would have a high likelihood of lowering output and raising prices of organ preservation solution. The Court accordingly declines to dismiss the count two on this basis.

ORS argues that if a claim based on sham litigation survives, the Court should stay count two and the associated discovery until the end of this lawsuit. At that point, if ORS has prevailed in its action against BTL, BTL's sham litigation counterclaim necessarily will fail because a successful claim, by definition, cannot constitute sham litigation. *See, e.g.,* *Rubloff Dev. Group, Inc. v. SuperValu, Inc., 863 F. Supp. 2d 732, 2012 U.S. Dist. LEXIS 41304, 2012 WL 1032784 (N.D. Ill. Mar. 27, 2012)* (citing *Prof'l Real Estate Investors, Inc. v. Columbia Pictures Indus., 508 U.S. 49, 60, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993))* ("As to the sham lawsuit branch, the lawsuits must **[*36]** first be objectively meritless before any exploration of subjective intent can be undertaken. A successful action, by definition, cannot be objectively meritless.").

ORS has also separately moved the Court for a stay. BTL argues that a stay is inappropriate because it would lead to needless duplication of extensive discovery proceedings. For example, BTL argues that delaying discovery would result in the need to re-depose several witnesses at additional inconvenience and expense at a later point in time, when those witnesses' memories of the relevant events will be less clear than it is today. BTL argues that a stay will also lead to further disputes between the parties as they fight about whether particular discovery requests are relevant only to antitrust issues. BTL also claims that the motion comes too late, having been filed four months after BTL filed its counterclaim and after a significant amount of discovery has already been exchanged.

The Court concludes that a stay is justified. As described above, success by ORS on one or more of its claims would leave BTL unable to prevail on count two. The discovery on ORS's claims and the antitrust counterclaim is not so intertwined so **[*37]** as to make a stay pointless. The Court is unpersuaded that it will be unable to sort out relevance issues as BTL contends. On the flip side, a stay may allow all concerned to avoid a great deal of expensive and time-consuming discovery. The Court grants ORS's motion for a stay of discovery with regard to count two of BTL's counterclaim.

3. Count three

In count three, BTL asserts a claim for abuse of process based on its arguments that this lawsuit is a sham. ***HN21***[] "In order to state a claim for abuse of process, the pleading must allege the existence of an ulterior purpose or motive and some act in the use of legal process not proper in the regular prosecution of the proceedings." *Reed v. Doctor's Assocs, Inc., 355 Ill. App. 3d 865, 875, 824 N.E.2d 1198, 1206, 291 Ill. Dec. 948 (2005)*. BTL argues that it has "allege[d] in detail that ORS brought its sham litigation to interfere with BTL's business" and that "Illinois courts hold that suits brought for such purposes are 'not proper' and state a claim for abuse of process." BTL Resp. to ORS Mot. to Dismiss at 11.

ORS responds that BTL has mischaracterized the nature of a claim for abuse of process. The Court agrees:

> HN22[] Unlike malicious prosecution, which involves filing **[*38]** a baseless suit to harass or intimidate an antagonist, abuse of process is the use of the litigation process for an improper purpose, whether or not the claim is colorable. "The gist of the abuse of process tort is said to be misuse of legal process primarily to accomplish a purpose for which it was not designed, usually to compel the victim to yield on some matter not involved in the suit . . . . If the plaintiff can show instigation of a suit for an improper purpose without probable cause and with a termination favorable to the now plaintiff, she has a malicious prosecution or a wrongful litigation claim, not a claim for abuse of process."

Nightingale Home Healthcare, Inc. v. Anodyne Therapy, LLC, 626 F.3d 958, 963 (7th Cir. 2010) (quoting 2 Dan B. Dobbs, *The Law of Torts* § 438 (2001)). "The mere institution of proceedings, even with a malicious motive, does not in and of itself constitute abuse of process." *Landau v. Schneider, 154 Ill. App. 3d 875, 878, 506 N.E.2d 735, 737, 106 Ill. Dec. 935 (1987)*.

BTL essentially alleges that ORS's entire lawsuit was designed to drive BTL out of business by subjecting it to overly burdensome attorneys' fees. BTL cites two cases in support of its allegations. BTL **[*39]** argues that the judge in the first case denied a motion to dismiss because the bringing of a lawsuit to interfere with business can support a claim. The judge in that case, however, noted that the claimant alleged that the plaintiff was using the proceedings to hire an employee and interfere with a particular business relationship. *Junction Solutions, LLC v. MBS Dev., Inc., No. 06 C 1632, 2007 U.S. Dist. LEXIS 86953, 2007 WL 4234091, at *4 (N.D. Ill. Nov. 20, 2007)*.

BTL's second case does include language to the effect that "harassment, economic hardship, and distraction from the marketplace in order to control the market are acts in the use of legal process." *Helene Curtis Inds., Inc. v. Milo Corp., No. 84 C 5217, 1985 U.S. Dist. LEXIS 23870, 1985 WL 1282 (N.D. Ill. May 2, 1985)*. To the extent that this case implies that simply filing a lawsuit for these purposes gives rise to a claim of abuse of process, however, the Court concludes that subsequent Seventh Circuit precedent has foreclosed this contention. *See* *Nightingale, 626 F.3d at 963*; *Evans v. West, 935 F.2d 922, 923 (7th Cir. 1991)* HN23[] ("Absent an 'inappropriate act' in the regular prosecution of a suit, an abuse of process action will not lie."). Because BTL has not alleged an "inappropriate **[*40]** act" beyond filing and maintaining the instant lawsuit, the Court dismisses count three of BTL's counterclaim.

4. Count four

Section 5 of the Illinois Trade Secrets Act (ITSA), *765 ILCS 1065/5*, provides: HN24[] "If a claim of misappropriation is made in bad faith . . . the court may award reasonable attorney's fees to the prevailing party." In count four of its counterclaim, BTL alleges that it is entitled to damages under ITSA based on the following events. ORS initiated this lawsuit with a complaint that included allegations that ORS's "trade secrets" had been stolen. After BTL moved to dismiss the complaint, ORS filed an amended complaint that did not include the phrase "trade secrets." In the amended complaint, ORS classified the information that had been the subject of its trade secrets claim as "confidential information," the misappropriation of which was the basis for a claim of civil conspiracy. The Court granted BTL's motion to dismiss this claim, concluding that ORS had not alleged anything other than the misappropriation of information and that the claim was therefore preempted by ITSA.

ORS argues that this sequence of events does not render BTL a "prevailing party" for purposes of **[*41]** the statute. ORS points out that it voluntarily filed a new complaint that did not include a trade secrets claim and that the claim the Court dismissed did not implicate ITSA because it sought a separate remedy. BTL responds that there is "no doubt that, absent the unlikely contingency of a reversal on appeal, ORS could never revive its misappropriation claim." BTL Resp. to ORS Mot. to Dismiss at 12. As ORS notes, however, BTL cites no authority to support its assertion that the Court's dismissal of ORS's civil conspiracy claim can support BTL's current ITSA damages claim just because the dismissed claim involved the same factual allegations and the word "misappropriation." BTL's contention is also unconvincing in light of the fact that HN25[] ITSA provides that it "does not affect . . . other civil remedies that are not based upon the misappropriation of a trade secret." *765 ILCS 1065/8(b)(2)*. The Court concludes that BTL has not shown that ITSA permits a defendant to recover damages as a prevailing party when a plaintiff has dismissed its own claim. The Court therefore grants ORS's motion to dismiss count four of BTL's counterclaim.

5. Count five

In count five of its counterclaim, BTL asserts **[*42]** a claim against ORS under § 43(a) of the Lanham Act. BTL contends that ORS has engaged in false advertising by misrepresenting that it has FDA approval to sell its SPS-1 solution with a label indicating that the solution does not need to be filtered before use. BTL attaches to its counterclaim two documents retrieved from ORS's website. The documents appear to be pamphlets or brochures, and they include statements that no filter is necessary for the use of ORS products.

ORS argues that this claim cannot survive not because the communications do not constitute advertising, but because ORS has, in fact, received approval from the FDA. In support of this argument, ORS submits four letters. The first is a letter from an FDA employee to ORS's director of regulatory affairs. In the letter, the FDA asked ORS to address marketing concerns, including the fact that the product as labeled did not include a filtering requirement. In its response to the FDA's letter, ORS stated, "Data comparing unfiltered SPS-1 to filtered SPS-1 solutions demonstrate that unfiltered SPS-1 is equivalent to filtered SPS-1 solutions." ORS Mot. to Dismiss BTL Countercl. Ex. B at 5. ORS's response to the FDA also stated **[*43]** that ColStorSol, PSI's name for the solution that ORS purchased and marketed as SPS-1, had been approved for marketing without a filtering requirement.

In a subsequent letter to ORS, the FDA stated that it had found that SPS-1 was "substantially equivalent . . . to legally marketed predicate devices." *Id.* Ex. D at 1. The FDA told ORS that it "may, therefore, market the device, subject to the general controls provisions of the Act [which] include requirements for . . . labeling, and prohibitions against misbranding." *Id.* ORS argues that the Court may take judicial notice of these documents and that they unambiguously indicate that the FDA approved ORS's labeling practice, which in turn would preclude a claim that ORS's advertisement was false.

The Court agrees that the documents appear consistent with ORS's assertion that the FDA has approved the practices regarding which ORS responded. Even were the Court to consider these documents in the context of a Rule 12(b)(6) motion, however, neither the counterclaim nor these documents contain sufficient details about FDA practice for the Court to say that the letter constitutes "approval" for purposes of this particular claim. The Court therefore **[*44]** declines to dismiss count five.

C. PSI's counterclaim

In its counterclaim, PSI asserts claims under the Lanham Act § 43(a), IUDTPA, and ICFA. All three claims are premised on PSI's allegations that after it rejected a proposed exclusivity agreement with ORS, ORS terminated PSI's services and engaged another manufacturer. The solutions produced by the other manufacturer have been substandard, PSI says, resulting in several of ORS's customers noticing problems with the solution and raising complaints. PSI alleges that ORS solicited business by telling prospective customers about PSI's services and that ORS's current customers therefore believe that the solutions are made by PSI. Because ORS did not inform its customers that it was switching manufacturers, PSI says, the customers now believe that PSI is responsible for the defective solutions. PSI also alleges that ORS continues to use an instructional insert stating that the solution does not have to be filtered before use. This insert was originally added by PSI, further confusing consumers regarding the current source of ORS's solutions.

In count three of its counterclaim, PSI asserts claims under Lanham Act § 43(a) based on this alleged **[*45]** conduct. PSI does not indicate in its counterclaim precisely what portion of this section forms the basis for its claim. It argues in its briefs, however, that ORS is liable for "passing off" its goods as PSI's and that it used a "false designation of origin." Thus ***HN26***[] the claim will succeed only if PSI shows that ORS "uses in commerce . . . any false designation of origin, false or misleading description of fact, or false or misleading representation of fact, which

. . . is likely to cause confusion, or to cause mistake, or to deceive as to . . . the origin, sponsorship, or approval of [its] goods." *15 U.S.C. § 1125(a)(1)(A)*.

ORS states repeatedly that it is under no "legal or regulatory duty" to disclose the identity of or change in its manufacturers. PSI's claims, however, are premised not on the existence of a separate legal duty but on the allegation that certain conduct by ORS has caused confusion.

ORS contends that PSI's allegations cannot support a false designation claim under the Lanham Act because of two binding cases. In the first, the Supreme Court held that incorporation of an uncopyrighted video into a copyrighted videotape did not provide a basis for a claim of false designation **[*46]** of origin. *Dastar Corp. v. Twentieth Century Fox Film Corp., 539 U.S. 23, 123 S. Ct. 2041, 156 L. Ed. 2d 18 (2003)*. The Court stated that the "'origin' of 'goods' . . . is the producer of the tangible product sold in the marketplace." *Id. at 31*. In the second case, the Seventh Circuit found that a furniture manufacturer's claim against another manufacturer for the uncredited use of its pre-made table legs likewise could not survive. *Bretford Mfg., Inc. v. Smith System Mfg. Co., 419 F.3d 576, 581 (7th Cir. 2005)*. The court noted in that case that "the question is whether the consumer knows who has produced the finished product." *Id.* "As far as [the consumer] was concerned, the table's 'origin' was Smith System, no matter who made any component or subassembly." *Id.*

ORS argues that even though PSI manufactures the solution, the solution itself is not the finished product. Rather, the product is solution labeled and bagged by ORS, thereby rendering it ORS's product regardless of who made the solution itself. ORS argues that it can be held liable only if it "falsely represents, as its own, a tangible 'good' manufactured by [PSI]." ORS Reply at 8. According to ORS, the solution is only a component of the tangible good — it **[*47]** is more akin to the wood in the table rather than to the table itself.

PSI maintains that its claim is for "passing off" (leading customers to believe that the ORS-sold solution is PSI's product) rather than "reverse passing off" (selling PSI's solution under ORS's name). Although *Bretford Manufacturing* dealt with reverse passing off, the case focuses on what alleged conduct can support a claim for false designation of origin. The case's focus on the finished product for purposes of a false designation claim is pertinent whether the claim is for passing off or reverse passing off.

Either way, however, the Court does not find ORS's arguments convincing at this point. PSI's allegations clearly suggest that the customers at issue believe that they are buying solution. The solution is not just a component of its package; it is a tangible product. By contrast, a customer who buys a table likely would not consider the purchase to be "wood" or "legs." PSI's allegations that customers have asked it to provide more information about its solutions further support its implication that the customers understand the product they are purchasing to be coming from PSI. *See* *Bretford Mfg., 419 F.3d at 580* **[*48]** (considering whether product incorporated "design elements" that "consumers understand . . . to signify the goods' *origin* and not just its attributes") (emphasis in original). The Court concludes that *Dastar* and *Bretford Manufacturing* do not bar PSI's Lanham Act claim.

ORS also argues, however, that PSI's complaint is insufficiently specific to meet the standards of *Rule 9(b)*. ***HN27***[] "Claims alleging false representation under the Lanham Act are subject to *Rule 9(b)*." *MPC Containment Sys., Ltd. v. Moreland, No. 05 C 6973, 2006 U.S. Dist. LEXIS 55780, 2006 WL 2331148, at *2 (N.D. Ill. Aug. 10, 2006)* (citations omitted). The Court agrees that PSI's allegations, at least in their current form, do not meet *Rule 9(b)*'s requirements. The only allegations made other than in conclusory form are the following: PSI alleges that "an OPO in Philadelphia, Pennsylvania that recently purchased SPS-1, believing that it was still being manufactured by PSI, complained to PSI that its product was off color." PSI Countercl. ¶ 25. PSI also alleges that "an OPO in Nebraska contacted PSI after receiving SPS-1 with two lot numbers in order to confirm if the products had been manufactured by PSI (or by another manufacturer)" and that "[o]n information **[*49]** and belief, other OPOs have been similarly confused regarding the current source of KPS-1 and SPS-1. *Id.* ¶¶ 26-27.

The Court agrees with PSI that this suggests that the customers believed that PSI was making the solution, and that they therefore had not been informed otherwise. The counterclaim, however, contains no detail whatsoever about the manner in which these customers came to believe, or the reason that they continue to believe, that PSI manufactured the solutions in the first place. ***HN28***[] Although false designation claims need not involve allegations that the defendant misused a specific logo or mark, there does need to be some indication that the defendant made a false representation. *Cf.* *Illinois Tool Works, Inc. v. Chester Bros. Machined Prods., Inc., No. 05 C 5002, 2006 U.S. Dist. LEXIS 57316, 2006 WL 2191982, at *3 (N.D. Ill. July 27, 2006)* ("Though misbranding can give rise to a false designation claim, such claims can also be based on representations that lead consumers to believe that the mark's owner sponsored or otherwise approved [its] use.").

PSI states "on information and belief" that "when ORS began using PSI as the manufacturer of its KPS-1 and SPS-1 solutions, it informed each of the OPOs to which **[*50]** it was selling the solutions that they had been manufactured by PSI." *Id.* ¶ 22. Without any indication, however, of what method ORS used to provide this information — what designation, design element, advertising, solicitation, or other means of communication — the allegation falls short of what *Rule 9(b)* requires. *See* *Specht v. Google, Inc., 660 F. Supp. 2d 858, 865 (N.D. Ill. 2009)* (general allegations on information and belief, without factual specifics, that defendants used a mark in promotional materials to sell "goods and services" was insufficient to survive motion to dismiss). Similarly, although PSI alleges that ORS's continued use of PSI's instructional insert is confusing, it has not provided a copy of the insert. Nor has PSI identified any characteristics of the insert that might lead customers to identify the solution with PSI even though ORS is responsible for the rest of the packaging. The Court concludes that count three, in its current form, must be dismissed.

In counts one and two, PSI asserts its own IUDTPA and ICFA claims, which it argues are subject to essentially the same legal standard as each other. *See* *Unichem Corp. v. Gurtler, 148 Ill. App. 3d 284, 292, 498 N.E.2d 724, 729, 101 Ill. Dec. 400 (1986)* **[*51]** (passing off under the IUDTPA involves "the deception of a consumer as to the source of a product."); *Microsoft Corp. v. Logical Choice Computers, Inc., No. 99 C 1300, 2001 U.S. Dist. LEXIS 479, 2001 WL 58950, at *8 (N.D. Ill. Jan. 22, 2001)* (quoting *815 ILCS 505/2*) ("[L]iability under ICFA] may arise upon 'the use or employment of any practice described in Section 2 of [IUDTPA] in the conduct of any trade or commerce."). PSI does not dispute ORS's contention that IUDTPA and ICFA claims regarding passing off are subject to the pleading requirements of *Rule 9(b)*. *See* *Nakajima All Co., Ltd. v. SL Ventures Corp., No. 00 C 6594, 2001 U.S. Dist. LEXIS 7535, 2001 WL 641415, at *6 (N.D. Ill. May 312001)* (IUDTPA claims); *Karpowicz v. General Motors Corp., No. 97 C 1390, 1997 U.S. Dist. LEXIS 10604, 1997 WL 413929, at *6 (N.D. Ill. 1997)* (ICFA claims).

For the reasons the Court has explained, PSI has not made sufficiently specific allegations of conduct by ORS that resulted in customer confusion. In addition, as ORS points out, PSI has alleged no acts connecting the allegations to Illinois other than the fact that ORS is headquartered here. As the Court discussed above regarding ORS's claims against BTL, ***HN29***[] "[t]he fact that a scheme to defraud was disseminated from a company's **[*52]** headquarters in Illinois is insufficient." *Phillips, 372 Ill. App. 3d at 58, 865 N.E.2d at 315*.

For these reasons, the Court dismisses PSI's counterclaim.

Conclusion

For the reasons stated above, the Court grants ORS's motion to dismiss PSI's counterclaim [docket no. 78]; ORS's motion to dismiss as to counts one, three, and four of BTL's counterclaim [docket no. 82]; PSI's motion to dismiss as to count one of ORS's complaint [docket no. 121]; BTL's motion to dismiss as to count six of ORS's complaint [docket no. 117]; and ORS's motion for a stay of discovery relating to count two of BTL's counterclaim [docket no. 128]. The Court otherwise denies the motions to dismiss.

Opinion

ORDER DENYING DEFENDANT'S MOTION TO DISMISS

[Docket Item No. 14]

Presently before the court is Defendant Cypress Semiconductors Corporation's ("Defendant") Motion to Dismiss the Complaint filed by Plaintiff GSI Technology, Inc. ("Plaintiff"). See Docket Item No. 14. Plaintiff filed written opposition to the motion. The court found this matter suitable for decision without oral argument pursuant to Civil *Local Rule 7-1(b)* and previously vacated the hearing date.

This court has subject matter jurisdiction under *28 U.S.C. § 1337* and *28 U.S.C. § 1331*, as this action arises under *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*, and *Sections 4* and *16* of the Clayton Act, *15 U.S.C. §§ 15(a)* and *26*. This court also has supplemental subject matter jurisdiction of the pendent state **[*2]** law claims under *28 U.S.C. § 1367(a)*. For the reasons explained below, Plaintiff's Motion to Dismiss will be denied.

I. FACTUAL AND PROCEDURAL BACKGROUND

The allegations contained in this section are taken largely from the Complaint. Plaintiff and Defendant are manufacturers of memory technology and chips known as static random access memory ("SRAM"). See Compl., at ¶¶ 1-2. The SRAM market consists of a small number of customers making early market entry a critical success factor for networking memory vendors. See id., at ¶ 24. Customers in the SRAM market demand standardized products, thus it is critical for manufacturers to comply with recognized standards. See id., at ¶ 3. The Institute of Electrical and Electronics Engineers ("IEEE") and the JEDEC Solid State Technology Associations ("JEDEC") are two recognized standard-setting organizations for memory components. See id., at ¶ 2. These organizations provide an open and public standard setting process, in which all competitors in the market have equal access to the same information at the same time allowing for competitive products and competitive product introduction schedules. See id., at ¶¶ 3-4.

In February 1999, Defendant decided **[*3]** to pursue its own unique product development and bypass the open standard setting processes provided by the IEEE and the JEDEC. See id., at ¶¶ 1, 4. To achieve this goal, Defendant and two principal competitors, Integrated Device Technology, Inc. ("IDT") and Micron Technology, Inc. ("Micron"), entered into a combination, which they named the "QDR Consortium" (the "Consortium"). See id., at ¶ 3. The purpose of the Consortium was to develop standards for higher performance networking SRAM products outside of the open and public standard setting organizations to obtain a competitive advantage over other competitors. See id., at ¶ 2. The Consortium members shared information and combined their market power to define and promote a family of SRAMs that would address the new market demand. See id., at ¶ 27. Despite Plaintiff's continuous request for open membership and participation by others, the Consortium excluded Plaintiff and other SRAM vendors. See id., at ¶ 28.

After being excluded from the Consortium, Plaintiff, IBM, Samsung, and Motorola started a separate group known as "SigmaRAM" to facilitate the design and development of an open SRAM standard. See id., at ¶ 30. Unlike the Consortium **[*4]** members, the members in SigmaRAM opened participation to any company and complied with JEDEC's standard setting process. See id., at ¶ 30.

On February 16, 2000, the Consortium announced that it had completed the specifications of its initial QDR and DDR SRAM architectural design. See id., at ¶ 32. Even though the Consortium announced that it would publish the data sheets for QDR and DDR SRAM, it only did so after a sufficient time delay. See id., at ¶ 33. With the time delay, the Consortium members had a "time-to- market" competitive advantage over all SRAM vendors. See id., at ¶ 33. The Consortium further compounded the injury to competitors by publishing only minimally complete data sheets. See id., at ¶ 33. Through these actions, the Consortium created a barrier to market entry that excluded its competitors for one to two years, thereby assuring Consortium members a generational lock in with Cisco, other major networking equipment manufacturers, network processor vendors and Field-Programmable Gateway Arrays ("FPGA") vendors. See id., at ¶ 33.

After Cisco decided to use the Consortium's Quad SRAM, the membership of the Consortium has been shifting. In January 2001, the Consortium **[*5]** announced that NEC Corporation was joining the Consortium. See id., at ¶ 34. Thereafter, in April 2001 Samsung withdrew from SigmaRAM and joined the Consortium. See id., at ¶ 34. [1] On September 24, 2001, Hitachi, Ltd. ("Hitachi") joined the Consortium. See id., at ¶ 35. Currently, the Defendant and Renasas Electronic Corporation ("Renesas") are the only members of the Consortium. See id., at ¶ 48. Defendant has functioned as the leader and principal member of the Consortium since its inception. See id., at ¶ 8.

The Consortium members, through their combined market power and limited membership, created exclusive but de facto product standards, which allowed them to lock in customers and impede entry into the SRAM market, thereby harming competition and consumers. See id., at ¶ 56. Plaintiff believes that pursuant to the Consortium's

---

[1] Plaintiff believes that Samsung's membership in the Consortium was granted on the condition that Samsung drop all public use, promotion or attribution of the SigmaRAM name. See Compl., at ¶ 34.

exclusionary agreement, the full terms of which are presently unknown, Defendant had, and exercised, a veto over Plaintiff's numerous requests, including in 1999, **[*6]** 2003, 2004, 2008, and 2011, to be admitted to participation in the Consortium. See id., at ¶ 51(c). The Consortium and its member have repeatedly refused requests to operate as an "open" forum of competitive SRAM vendors or to operate under the supervision of an industry recognized standards setting organization, such as JEDEC. See id., at ¶ 51(I). As a direct result of the Consortium's exclusionary combination from 1999 to and including the present date, the Consortium collectively designed, developed, manufactured and introduced generations of its QDR and DDR SRAM and several enhanced product family devices in the market free of any timely and effective competition from any other networking SRAM vendors. See id., at ¶ 51(g). With each new product released, the Consortium delayed the public release of its data sheets inflicting independent and accumulating injury on Plaintiff and other SRAM competitors outside the Consortium. See id., at ¶ 51(g). In addition, Consortium members also required SRAM customers to sign non-disclosure agreements so that buyers could be ready to accept the new version of devices before non-Consortium competitors could learn of their existence. See id., at **[*7]** ¶ 23. By its conduct, the Consortium has also harmed consumers by denying them the benefits of innovation in product development and lower prices. See id., at ¶ 6.

Plaintiff commenced the instant action in this court on July 22, 2011 for (1) violation of *section 1* of the Sherman Act, *15 U.S.C. § 1*, (2) violation of *sections 16720* and *16726* of the California Business & Profession Code, and (3) violation of *section 17200 et. seq.* of the California Business & Profession Code. This motion followed.

II. LEGAL STANDARD

Federal Rule of Civil Procedure 8(a) requires a plaintiff to plead each claim with sufficient specificity to "give the defendant fair notice of what the. . . claim is and the grounds upon which it rests." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal quotations omitted). A complaint which falls short of the *Rule 8(a)* standard may therefore be dismissed if it fails to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. "Dismissal under *Rule 12(b)(6)* is appropriate only where the complaint lacks a cognizable legal theory or sufficient facts to support a cognizable legal theory." *Mendiondo v. Centinela Hosp. Med. Ctr., 521 F.3d 1097, 1104 (9th Cir. 2008)*.

When **[*8]** deciding whether to grant a motion to dismiss, the court must accept as true all "well-pleaded factual allegations." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1950, 173 L. Ed. 2d 868 (2009)*. The court must also construe the alleged facts in the light most favorable to the plaintiff. *Love v. United States, 915 F.2d 1242, 1245 (9th Cir. 1988)*. However, "courts are not bound to accept as true a legal conclusion couched as a factual allegation." *Twombly, 550 U.S. at 555*. Moreover, anything beyond the pleadings generally may not generally be examined. *Hal Roach Studios, Inc. v. Richard Feiner & Co., 896 F.2d 1542, 1555 n. 19 (9th Cir. 1990)*. But "material which is properly submitted as part of the complaint may be considered." *Twombly, 550 U.S. at 555*.

III. DISCUSSION

A. First Cause of Action: Violation of § 1 Sherman Act

Plaintiff alleges that Defendant's conduct violated *section 1* of the Sherman Act, *15 U.S.C. § 1*. *Section 1* prohibits restraints on trade: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restrain of trade or commerce ... is declared to be illegal." To prevail on a cause of action for violation of *15 U.S.C. § 1*, a plaintiff must plead, "(1) a contract, **[*9]** combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition." *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)*.

i. Unlawful Agreement

Defendant argues the Complaint fails to allege facts plausibly supporting an inference that Plaintiff's exclusion from the Consortium was the product of an unlawful agreement among competitors. See Motion, Docket Item 14, at 5. The court disagrees.

To sufficiently plead the first element of *section 1* of the Sherman Act, the complaint must set forth:

> [E]nough factual matter (taken as true) to suggest that an agreement was made. Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact[s] to raise a reasonable expectation that discovery will reveal evidence of illegal agreement."

Kendall, 518 F.3d at 1047 (quoting *Twombly, 550 U.S. at 556*). In Kendall, the 9th Circuit granted the defendants' motion to dismiss because the plaintiffs had an opportunity to conduct **[*10]** discovery and still did not allege any facts in their amended complaint to support their theory that the defendants conspired with each other to restrain trade. *Id. at 1048*.

In this case, the Plaintiff set forth enough factual matter to meet the pleading requirement established in Kendall. The Complaint alleges that in late July 1999, Defendant, IDT and Micron announced the formation of the Consortium with the purpose of defining and developing new networking SRAM architectures. See Compl., at ¶¶ 27, 29. From the time of the Consortium's inception in 1999, Defendant, "on behalf of the Consortium" and pursuant to the group's exclusionary agreement, denied Plaintiff's requests in 1999, 2003, 2004, 2008, and 2011 to be admitted to membership in the Consortium. See id., at ¶ 51(a)-(c). The Consortium's exclusionary agreement afforded its members the opportunity to exclude their competing SRAM vendors and to prevent them from entering the SRAM market on a timely and competitive basis. See id., at ¶ 51(d). Although the makeup of the Consortium fluctuated over time, there are still plausible grounds to infer an agreement, especially since Defendant, the leader of the Consortium, has been a **[*11]** member from the group's inception. The allegations of the Complaint sufficiently assert the existence of an unlawful agreement.

ii. Unreasonable Restraint of Trade

As to the second element, Defendant argues that the Complaint fails to plead that Plaintiff's exclusion from the QDR Consortium unreasonably restrained trade. See Motion, at 5. The court disagrees.

Section 1 of the Sherman Act prohibits, "[o]nly unreasonable or undue restraints" of trade. *OSC Corp. v. Apple Computer, Inc., 792 F.2d 1464, 1467 (9th Cir. 1986)* (citing *Standard Oil v. United States, 221 U.S. 1, 58-60, 31 S. Ct. 502, 55 L. Ed. 619 (1911))*. Most antitrust claims are, "analyze[d] under a 'rule of reason,' according to which the finder of fact must decided whether the question practice imposes an unreasonable restraint on competition, taking into account a variety of factors . . . ." *California ex rel. Harris v. Safeway, Inc., 651 F.3d 1118, 1133 (9th Cir. 2011)* (quoting *State Oil v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*. "The rule of reason is the presumptive or default standard, and it requires that the antitrust plaintiff to 'demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive.'" Id. (quoting *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006))*. **[*12]** "Some types of restraints, however, have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful per se." *State Oil, 522 U.S. at 10*. The Supreme Court has expressed reluctance to adopt per se rules where the "economic impact of certain practices is not immediately obvious." *Dagher, 547 U.S. at 5*.

Plaintiff alleges that its exclusion from the QDR Consortium, "constituted a group boycott and/or concerted refusal to deal," warranting a per se analysis. See Compl., at ¶ 51(d). Three characteristics indicative of a per se illegal boycott are: "(1) the boycott cuts off access to a supply, facility, or market necessary to enable the victim firm to compete; (2) the boycotting firm possesses a dominant market position; and (3) the practices are not justified by plausible arguments that they enhanced overall efficiency or competition." *Hahn v. Oregon Physicians' Serv., 868*

F.2d 1022, 1030 (9th Cir. 1988). Although the Supreme Court recognizes group boycotts as per se illegal, it holds that the category of activities compromising group boycotts, "is not to be expanded indiscriminately." FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 458, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986).

The **[*13]** allegations in the Complaint do not establish a per se illegal boycott because they do not illustrate that Defendant "cut off" Plaintiff's access to the market. Here, the Complaint expressly alleges that has continued to market and sell Networking SRAM products throughout the period of the alleged conspiracy, introducing a new, high-performance product introduced as recently as 2010. See Compl., at ¶ 56. By its own admission, Plaintiff's efforts to sell its products have been at least "minimally successful." Id. Though the Complaint alleges that the Consortium prevented the Plaintiff, "from entering the Networking SRAM market on a timely and competitive basis" (See Compl., at ¶ 51(d)), these accusations alone do not demonstrate a sufficient "cut off" to fall under the narrow category of illegal boycotts. Therefore, the Complaint's allegations should be analyzed under the "rule of reason."

"Under the rule of reason, to decide whether a challenged restraint is unreasonable under the Sherman Act, '[t]he focus is on actual effects that the challenged restraint has had on competition in a relevant market.'" Adaptive Power Solutions, LLC v. Hughes Missile Sys. Co., 141 F.3d 947, 950 (9th Cir. 1998) **[*14]** (quoting Bhan v. NME Hospitals, Inc., 929 F.2d 1404, 1410 (9th Cir. 1991)). To make this showing the plaintiff must establish both that the defendant possessed (1) market power within the relevant market, and that (2) the defendant's conduct harmed competition within that market. Id. at 951.

a. Market Power

"In order to state a valid claim under the Sherman Act, a plaintiff must allege that the defendant has market power within a 'relevant market.' That is, the plaintiff must allege both that a 'relevant market' exists and that the defendant has power within that market." Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1044 (9th Cir. 2008). In that regard, the Ninth Circuit has held:

> There is no requirement that these elements of the antitrust claim be pled with specificity. An antitrust complaint therefore survives a Rule 12(b)(6) motion unless it is apparent from the facts of the complaint that the alleged market suffers a fatal legal defect. And since the validity of the "relevant market" is typically a factual element rather than a legal element, alleged markets may survive scrutiny under Rule 12(b)(6) subject to factual testing by summary judgment or trial.

Id. at 1045 **[*15]** (citation omitted).

The facts pleaded in this case illustrate the existence of a relevant market and that the defendant has power within that market. First, the Complaint alleges that in 2001, industry analysts estimated that the Consortium would supply "two-thirds" of Fast SRAM worldwide. See Compl., at ¶ 36. Throughout the Complaint, Plaintiff alleges that the goal of the Consortium was monopolization of the market (e.g. ¶ 1), that Defendant and Consortium members combined their market power to exclude competitors (e.g. ¶ 27), and that the Consortium has excluded not only Plaintiff but other competitors from the market (e.g. ¶ 28). The Complaint further alleges that Defendant was the largest Networking SRAM supplier in 2010. Id. at ¶ 47. These allegations are sufficient at the pleading stage, as the Ninth Circuit made clear in Newcal Industries, Inc. v. Ikon Office Solution.

b. Injury to Competition

"It can't be said often enough that the antitrust laws protect competition, *not* competitors." United States v. Syufy Enters., 903 F.2d 659, 668 (9th Cir. 1990). Consequently, "[t]o succeed on a rule of reason claim, an antitrust plaintiff must prove that the restraint in question injures **[*16]** competition in the relevant market." Robert's Waikiki U-Drive, Inc. v. Budget Rent-A-Car Systems, Inc., 732 F.2d 1403, 1408 (9th Cir. 1984) (citing Kaplan v. Burroughs Corp., 611 F.2d 286, 291 (9th Cir. 1979)). "In order to plead injury to competition . . . sufficiently to withstand a motion to dismiss, 'a section one claimant may not merely recite the bare legal conclusion that competition has been restrained unreasonably.'" *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1198 (9th Cir. 2012)* (citing *Les Shockley Racing, Inc. v. Nat'l Hot Rod Ass'n, 884 F.2d 504, 507-08 (9th Cir.1989))*. A claimant "'must, at a minimum, sketch the outline of [the injury to competition] with allegations of supporting factual detail.'" Id. (citing *Les Shockley Racing, Inc., 884 F.2d at 508*).

"In sketching the outline of an injury to competition . . . the claimant must identify a contract, combination or conspiracy that has an anticompetitive effect. Courts have held that agreements between competitors in the same market (referred to as 'horizontal agreements') may injure competition." Id. An example of a horizontal agreement is when, "a group of competitors . . . act in concert to harm another competitor or exclude **[*17]** that competitor from the market and thus 'protect . . . dealers from real or apparent price competition' from the targeted competitor." Id. (citing *United States v. Gen. Motors Corp., 384 U.S. 127, 146-147, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966))*. With a horizontal agreement the harm to one market competitor can be considered an injury to competition, "when the relevant market is both narrow and discrete and the market participants are few." *Les Shockley Racing, Inc., 884 F.2d at 508-509*.

Here, the Complaint provides an outline of the injury to competition by describing the harmful effects the Consortium's horizontal agreement has on outside competitors. The Complaint alleges that in February 1999 Defendant reached an agreement with two of its competitors to share information for the development of new Networking SRAM products. See Compl., at ¶ 1. According to the Complaint, the Consortium used its agreement to exclude, "Plaintiff and other competitors from participation in development of product standards intended to serve the market and their ability to enter the market in a timely manner and to compete effectively for those customers." See id. Without timely access to product standards, numerous SRAM vendors were **[*18]** forced to exit the market. See id., at ¶ 14. Additionally, the Complaint alleges that because delayed market entry, even by just a few months, the Consortium locked in the market's few purchasers, including Cisco. See id., at ¶¶ 24, 33. The Complaint further alleges that competition has been harmed in that customers have been denied the benefits of innovation and product development and lower prices. See id. at ¶ 6. Since the Complaint alleges a detailed outline of the injury to competition it satisfies the Court's pleading standard.

iii. Injury to Plaintiff

Defendant argues that the Complaint does not adequately allege an injury to the Plaintiff. See Motion, at 20. Again, the court disagrees.

A plaintiff seeking damages under the antitrust laws must shows that is has been "injured in his business or property" as a result of the claimed offense. *15 U.S.C. § 15(a)*. "Antitrust injury is defined not merely as injury caused by an antitrust violation, but more restrictively as 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Glen Holly Entm't, Inc. v. Tektronix, Inc., 352 F.3d 367, 371 (9th Cir. 2002)* (citing *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. **[*19]** The Ninth Circuit has identified four requirements for antitrust injury: (1) unlawful conduct, (2) causing injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent. *American Ad Mgmt. Inc. V. Gen. Tel. Co., 190 F.3d 1051, 1055 (9th Cir. 1999)*. In addition, the Ninth Circuit requires that the injured party be a participant in the same market as the alleged malefactors. *Glen Holly Entm't, 352 F.3d at 372*.

The Complaint's allegations taken as true show that the Defendant caused an antitrust injury to the Plaintiff under the Ninth Circuit's requirements. The Complaint alleges that as a result of the Consortium's unlawful exclusion of Plaintiff and other competitors from its private de facto standards setting, Plaintiff has been injured in its ability to market competitive products and to lock in key customers. See Compl., at ¶ 64. The Complaint further alleges that as a result of Defendant's conduct, Plaintiff suffered multiple injuries such as lost revenues, lost profits and market share, and the stifling of product innovation. See Compl., at ¶¶ 56-57, 64, 66. Plaintiff also alleges that from **[*20]** 2007 to 2010 it introduced "succeeding higher density and faster products," however it was, "unable to gain market acceptance as a result of the conduct alleged." See Compl., at ¶ 56. Defendant's conduct is the type that antitrust laws were intended to prevent because it allegedly denied consumers, "the benefits of innovation in product development and lower prices." See Compl., at ¶ 6. The court therefore cannot conclude on a motion to dismiss that Plaintiff suffered no injury under the Ninth Circuit's requirements.

B. Second and Third Cause of Action: Cartwright Act and Unfair Competition

i. Cartwright Act

The Cartwright Act is "California's ***antitrust law***" and "was modeled after the Sherman Act." *County of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*. Accordingly, analysis under the Cartwright Act "mirror the analysis under federal law." Id. (citing *Nova Designs, Inc. v. Scuba Retailers Ass'n, 202 F.3d 1088, 1091 (9th Cir. 2000)*, and *Mailand v. Burckle, 20 Cal. 3d 367, 375, 143 Cal. Rptr. 1, 572 P.2d 1142 (1978))*; see also *Colonial Med. Group, Inc. v. Catholic Health Care West, 444 Fed. Appx. 937, 2011 WL 2938227, at *2 (9th Cir. 2011)* ("the requirements for a claim under California's Cartwright Act are **[*21]** identical to those for a claim under the Sherman Act"). Consequently, Plaintiff's Cartwright Act claim should not be dismissed for the same reasons as its Sherman Act claim.

ii. Unfair Competition Claim

Business and Professions Code *section 17200* governs anti-competitive business practices and has a major purpose in preserving fair business competition. *Belton v. Comcast Cable Holdings, LLC, 151 Cal. App. 4th 1224, 1233, 60 Cal. Rptr. 3d 631 (2007)*. *Section 17200*, "borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable." Id. Plaintiff's Unfair Competition Claim is expressly predicated on Defendant's alleged violations of the Sherman and Cartwright Acts. See Compl., at ¶ 75-76. Since Defendant's Motion depends on the assumption that Plaintiff has no claim under the Sherman and Cartwright Acts, the motion to dismiss this claim will be denied.

C. Statute of Limitations

Finally, Defendant claims that Plaintiff's claims are barred by the statute of limitations. See Motion, at 22. The court disagrees.

Plaintiff's claims are subject to a four-year limitations period, which runs from the date cause of action accrues. See *15 U.S.C. § 15(b)* **[*22]** (Sherman Act); *Cal. Bus. & Prof. Code § 16750.1* (Cartwright Act); Cal. Bus. & Prof. *§ 17208* (Unfair Competition Law). While private antitrust claims are subject to four-year statute of limitations, a new cause of action arises "each time the plaintiff's interest is invaded to his damage, and the statute of limitations begins to run at that time." *Hennegan v. Pacifico Creative Serv., 787 F.2d 1299, 1300 (9th Cir. 1986)* (citing *In re Multidistrict Vehicle Air Pollution Litig., 591 F.2d 68, 70 (9th Cir. 1979))*. If a plaintiff, "alleges a continuing violation, an overt act by the defendant is required to restart the statute of limitations and the statute runs from the last overt act." *Pace Indus., Inc. v. Three Phoenix Co., 813 F.2d 234, 237 (9th Cir. 1987)*. An overt act will restart the statute of limitations if: (1) it is a new and independent act that is not merely a reaffirmation of a previous act; and (2) it inflicts new and accumulating injury on the plaintiff. *Id. at 238*.

Plaintiff has alleged continuing violations and corresponding injuries suffered during the limitations period. The Complaint alleges that in October, 2008, and in January, 2011, Plaintiff requested membership in **[*23]** the Consortium and open standard setting, which requests were rejected as part of a continuing effort to exclude Plaintiff as a competitor from the Networking SRAM market. See Compl., at ¶ 45, 48, 51(c). The overt acts alleged in the Complaint are not limited only to denials of membership. The Complaint also alleges that between 2007 and 2010, the Consortium announced and offered a succession of variants on their second generation Networking SRAM device, each of which altered the elements of the devices' definitions in order to keep the public definitions in flux until late 2010, and each of which caused further injury to Plaintiff. See id., at ¶ 51(g). As alleged in the Complaint, the "Consortium's introduction of each generation and each enhancement of its QDR and DDR SRAM products inflicted new, independent and accumulating damage and injury on Plaintiff, other SRAM competitors and competition in general by excluding them from access to information and extending the lock in of Networking SRAM customers to QDR products." See id., at ¶ 51(g). The overt actions that allegedly occurred during the four years prior to the filing of the Complaint are independents actions that caused further **[*24]** injury to the Plaintiff, therefore they satisfy the statute of limitations.

IV. ORDER

Based on the foregoing, Defendant's Motion to Dismiss is DENIED.

IT IS SO ORDERED.

Opinion

OPINION and ORDER

This antitrust suit focuses on the market in the Fort Wayne, Indiana, area for television local spot advertising supported by network programming. Until its affiliation expired at the end of last July, Nexstar Broadcasting, Inc. operated the FOX affiliate in Fort Wayne. Granite Broadcasting Corporation became the FOX affiliate, giving Granite and Malara Broadcasting (with which Granite is allegedly associated) five of the six network affiliations in the Fort Wayne area. Nexstar contends that by its anticompetitive conduct, Granite has foreclosed **[*2]** it from the market. Granite has moved to dismiss Nexstar's complaint for failure to state a claim. The court heard argument on June 14, and now denies Granite's motion.

The issue on a motion to dismiss under *Federal Rule of Procedure 12(b)(6)* isn't "whether a plaintiff will ultimately prevail, but whether the claimant is entitled to offer evidence to support the claims." *Caremark, Inc. v. Coram Healthcare Corp., 113 F.3d 645, 649 (7th Cir. 1997)*. The complaint must contain a "short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. Detailed factual allegations aren't required, but the complaint must contain enough factual matter "to 'state a claim that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*; *see also* *Morrison v. YTB Int'l, Inc., 649 F.3d 533, 538 (7th Cir. 2011)*; *Brooks v. Ross, 578 F.3d 574, 581 (7th Cir. 2009)*. To plead a plausible claim, a complaint must contain "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. at 678*; *see* **[*3]** *also* *Swanson v. Citibank, N.A., 614 F.3d 400, 404 (7th Cir. 2010)* ("[T]he plaintiff must give enough details about the subject-matter of the case to present a story that holds together."). "Threadbare recital of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Ashcroft v. Iqbal, 556 U.S. at 678*.

The complaint needn't specifically plead each element the pleader must prove at trial, *see* *Reynolds v. CB Sports Bar, Inc., 623 F.3d 1143, 1147 (7th Cir. 2010)*; *Bausch v. Stryker Corp., 630 F.3d 546, 560 (7th Cir. 2010)*, *cert. denied*, *132 S. Ct. 498, 181 L. Ed. 2d 346 (Oct. 31, 2011)*, but it must contain enough factual allegations to make it more than a "sheer possibility" that the defendant has acted unlawfully. *Ashcroft v. Iqbal, 556 U.S. at. 678*; *accord*, *In re Text Messaging Antitrust Litigation, 630 F.3d 622, 629 (7th Cir. 2010)*, *cert denied*, *131 S. Ct. 2165, 179 L. Ed. 2d 937 (Apr. 25, 2011)* ("[T]hat the allegations undergirding a claim could be true is no longer enough to save a complaint from being dismissed; the complaint must establish a nonnegligible probability that the claim is valid; but the probability need not be as great as such terms as 'preponderance of the evidence' **[*4]** connote."). "The required level of factual specificity rises with the complexity of the case." *McCauley v. City of Chicago, 671 F.3d 611, 616 (7th Cir. 2011)*; *Swanson v. Citibank, N.A., 614 F.3d 400, 404 (7th Cir. 2010)* ("A more complex case . . . will require more detail, both to give the opposing party notice of what the case is all about and to show how, in the plaintiff's mind at least, the dots should be connected."); *Limestone Development Corp., 520 F.3d at 803* ("RICO cases, like antitrust cases, are 'big' cases and the defendant should not be put to the expense of big-case discovery on the basis of a threadbare claim.").

I.

Nexstar brings this suit against Granite and its subsidiaries, WISE-TV License, LLC and WISE-TV, Inc. (to whom the court collectively refers as "Granite"), alleging that Granite engaged in anti-competitive conduct with Malara Broadcasting and other unnamed co-conspirators that significantly limited or foreclosed competition in the television local spot advertising market in the Fort Wayne designated market area by restricting access to an essential element of competition-network programming, to the detriment of competitors (like Nexstar), local advertisers, **[*5]** and consumers, and that its actions constitute an unreasonable restraint of trade, an attempt to monopolize, and a conspiracy to monopolize in violation of §§ 1 and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2* (Counts 1-3), § 7 of the Clayton Act, *15 U.S.C. § 18* (Count 4), and Indiana's Antitrust Act, *Ind. Code §§ 24-1-2-1* and *24-1-2-2* (Count 5).

The court accepts (without vouching for their truth) the following factual allegations in the complaint as true for purposes of the motion to dismiss:

Nexstar owns and operates WFFT-TV, one of five commercial full-power television stations in Fort Wayne and the exclusive FOX network affiliate from October 1986 until Nexstar's agreement with FOX Broadcasting terminated on July 31, 2011.

Granite owns and controls WISE-TV, the exclusive NBC affiliate and MyNetworkTV affiliate in the Fort Wayne DMA, and controls the advertising sales and revenues of WPTA-TV, the exclusive ABC affiliate and the CW affiliate in the

Fort Wayne designated market area, under an advertising representation agreement with Malara Broadcasting, which owns WPTA-TV.

Access to network programming is an essential element, or "key input," for competition in the television local spot **[*6]** advertising market in the Fort Wayne designated market area. As a result of its relationship with Malara, Granite controls access to network programming for ABC, NBC, CW and MyNetworkTV and about 45 percent of the broadcast television local spot advertising revenues in the Fort Wayne designated market area.

When Nexstar's agreement with FOX Broadcasting ended in 2011, Granite paid a supra-competitive price to become the new exclusive FOX affiliate in Fort Wayne (effective August 1, 2011), providing Granite with control over programming and local advertising for five of the six major national network affiliations and three of the "Big Four" networks in the Fort Wayne DMA (ABC, NBC, FOX, CW, and MyNetwork TV), substantially increasing Granite's share of the television local spot advertising market, and significantly limiting or foreclosing competitors' access to network programming and their ability to compete for advertising revenues.

Since announcing its agreement with FOX in July 2011, Granite, Malara, and/or Indiana's NewsCenter (the brand name for Granite's consolidated operations in Fort Wayne) have used offers lucrative compensation packages to entice several key Nexstar sales employees **[*7]** who have confidential and proprietary information pertaining to Nexstar's advertising prices. Granite also has tried to speed the movement of advertisers from Nexstar's WFFT-TV to the stations Granite and Malara owns by telling advertisers that WFFT-TV won't have "must have" network programming. or will be going off the air, or is about to be sold, or will discontinue local news.

Granite's collusive aggregation of exclusive network affiliations, denigrating commercial speech, and predatory hiring is harming competition generally, and Nexstar specifically. The injuries include lost advertising revenues, higher operating costs (such as the cost of new equipment and licenses to broadcast new programs to replace the network programming from which Nexstar is foreclosed, and the cost of producing competitive news broadcasts), loss of experienced sales staff and their confidential and proprietary information. Local advertisers will have to pay higher prices for advertising, so consumers will have to pay higher prices for what local advertisers sell.

Nexstar asks the court to: (1) enjoin Granite and Malara, their directors, officers, employees, agents, successors, and assigns from directly or **[*8]** indirectly controlling television stations affiliated with ABC, CBS, FOX, and NBC; (2) order Granite to cease efforts to employee individuals currently employed by Nexstar's WFFT-TV, to delete or expunge any WFFT-TV proprietary and confidential information provided, and to enjoin and restrain Granite from all attempts to discover such information in the future; and (3) award Nexstar actual and treble damages, interest, attorneys' fees, and costs.

In support of its dismissal motion, Granite contends that: (1) the complaint doesn't sufficiently allege antitrust injury; (2) Nexstar lacks standing to maintain a private antitrust action; (3) the allegations of denigrating commercial speech and predatory hiring don't state an actionable antitrust claim; and (4) Nexstar hasn't sufficiently alleged a conspiracy in Counts 1 and 3.

II.

A. *Antitrust Injury*

An antitrust claim has three elements: (1) conduct that violates the antitrust laws; (2) antitrust injury, and (3) measurable damages. *In re Scrap Metal Antitrust Litig., 527 F.3d 517, 532 (6th Cir. 2008)*; *Deich-Keibler v. Bank One, 243 Fed. Appx. 164, 168 (7th Cir. 2007)*; *Deiter v. Microsoft Corp., 436 F.3d 461, 467 (4th Cir. 2006)*; *Blades v. Monsanto Co., 400 F.3d 562, 566 (8th Cir. 2005)*; **[*9]** *In re Urethane Antitrust Litigation, 251 F.R.D. 629, 634 (D. Kan. 2008)*; *City of Auburn v. Mavis, 468 N.E.2d 584, 585 (Ind. App. 1984)*. To satisfy the requirement of antitrust injury, Nexstar must show that it suffered an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful," *Brunswick Corp. V. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, meaning that it "suffered a loss that stems from a competition-reducing aspect of the defendant's behavior." *In re Urethane Antitrust Litigation, 251 F.R.D. at 634*.

Granite contends that Nexstar hasn't alleged antitrust injury because the only injuries alleged are higher consumer prices and the loss of its exclusive FOX affiliation contract (a change from one exclusive distributor to another), and the antitrust laws weren't intended to prevent either, citing, *e.g.*, Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 582-583, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986) ("Respondents cannot recover . . . for any conspiracy by petitioners to charge higher than competitive prices in the American market."); O.K. Sand & Gravel, Inc. v. Martin Marietta Techs., Inc., 36 F.3d 565, 572-573 (7th Cir. 1994) **[*10]** ("price increases could not be considered an antitrust injury to competitors"); Alberta Gas Chems. Ltd. v. E.I. DuPont de Nemours & Co., 826 F.2d 1235, 1242-1243 (3rd Cir 1987); Ralph C. Wilson Indus., Inc. v. Chronicle Broad. Co., 794 F.2d 1359, 1364 (9th Cir. 1986) ("competition is not injured where a distributor seeks to obtain a product at the expense of any or all potential distributors"); Arnett Physician Group, P.C. v. Greater Lafayette Health Svcs. Inc., 382 F.Supp.2d 1092, 1095-1096 (N.D. Ind. 2005) (substitution of one exclusive radiology services provider for another doesn't violate antitrust laws); Agency Development, Inc. v. Med. Am. Ins. Co., 310 F.Supp.2d 538, 544-545 (W.D.N.Y. 2004) ("Plaintiff's alleged drop in sales and lost profits . . . are not the result of any anticompetitive conduct of defendants [but r]ather . . .the result of the lawful termination of an agency contract."); Fidelity Nat'l Title Ins. Co. v. Intercounty Nat'l Title Ins. Co., 161 F.Supp.2d 876, 884 (N.D. Ill. 2001) ("plaintiff suffers no antitrust injury when prices are raised by a defendant's behavior"); Futurevision Cable Sys. Of Wiggins, Inc. v. Multivision Cable TV Corp., 789 F.Supp. 760, 770, 771 n.6 and 775 (S.D. Miss. 1992) **[*11]** (network's selection of one distributor over another fails to state a restraint of trade violation), *aff'd without opinion*, *986 F.2d 1418 (5th Cir. 1993)*.

Granite also contends that Nexstar hasn't alleged that any anticompetitive conduct on Granite's part caused Nexstar's injury — that but for the violation (which Granite understands to be Granite's acquisition of the FOX network affiliation), the injury (which Granite understands to be loss of the Fox affiliation and programming) wouldn't have occurred. *Citing* Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 395 (7th Cir. 1993); O.K. Sand & Gravel, Inc. v. Martin Marietta Techs., Inc., 36 F.3d at 573-574; Agency Dev., Inc. v. Med. Am. Ins. Co., 310 F.Supp.2d at 544-545. Granite contends that the alleged injury would be the same no matter who succeeded Nexstar as the FOX affiliate, *see* Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 487, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977); Alberta Gas Chems. Ltd. v. E.I. DuPont de Nemours & Co., 826 F.2d at 1241-1242, 1246, and that "Nexstar's alleged injury flows from its termination of FOX's exclusive programming distributor agreement and its own unwillingness to pay for **[*12]** that programming, rather than from anything illegal that Granite did."

Nexstar says the injury it alleges isn't the loss of a single exclusive-dealing relationship (the FOX affiliation agreement) or higher prices, as Granite suggests, but rather the loss of the ability to compete at all in the local advertising market, so its case differs from the cases on which Granite relies. Nexstar says it and other television stations in the Fort Wayne area have suffered and/or will suffer an antitrust injury as a result of Granite and Malara's collusive aggregation of the exclusive contracts for five of the six national network affiliations in the Fort Wayne area - not just the FOX affiliation. That collusive aggregation, Nexstar says, cuts off an essential or "key" input for effective competition in the local advertising market ("must have" network programming), creates a barrier to entry and expansion in that market, and gives Granite the market power to effectively foreclose competition and to raise advertising prices above competitive levels. Nexstar reasons that its injury flows from the harm to competition perpetrated by Granite, and satisfies the "but for" causation and antitrust injury **[*13]** requirements for antitrust standing. *Citing e.g.*, Fishman v. Estate of Wirtz, 807 F.2d 520, 533 (7th Cir. 1986); Ohio-Sealy Mattress Mfg. Co. v. Kaplan, 745 F.2d 441, 449-450 (7th Cir. 1984); Medscan v. N.Y. Univ. Sch. of Med., 430 F.Supp.2d 140, 148-149 (S.D.N.Y. 2006) (Chin, J.).

Granite replies that Nexstar's "aggregation" theory of liability is meritless because Nexstar had access to network programming until August 2011 and suffered no injury until it lost its bid to renew the FOX affiliation contract. Granite concludes that its pre-2011 network affiliations couldn't have been the "but for" cause of the alleged injury, that this is a simple case of one exclusive distributor replacing another, and that the antitrust laws weren't intended to prevent that type of injury or the higher consumer prices that might result.

The conduct complained of and the injury alleged aren't as simple as Granite contends. The complaint alleges that Granite, either alone or with Malara and others, engaged in a course of conduct that had the purpose and effect of excluding competition in the television local spot advertising market in violation of the antitrust laws when it: (1) entered into agreements **[*14]** and/or conspired with Malara and others to consolidate market power, raise the price of advertising, acquire exclusive affiliation agreements with five of the six major national television networks in the Fort Wayne DMA, and deny competitors' access to "must have" network programming, the large consumer audiences that it attracts and that advertisers target, and the advertising revenues that it generates[1] (2) accelerated the movement of advertisers from Nexstar's WFFT-TV to the stations Granite and Malara own by telling advertisers that WFFT-TV won't be able to access "must have" network programming and will be going off the air, is about to be sold, or will no longer broadcast local news; and (3) approached and tried to entice (through offers of high compensation) several key Nexstar sales employees with confidential and proprietary information about Nexstar's WFFT-TV advertising prices.

Nexstar says Granite's acquisition of the FOX affiliation in 2011 simply nailed the lid on the coffin, and alleges that no offsetting efficiency rationale or pro-competitive benefit that justifies Granite's acts. Nexstar says Granite's actions have caused Nexstar to incur past and future substantial harm in the form of lost profits (advertising revenues), higher operating costs, and the loss of experienced sales staff and the proprietary information they possess.

Nexstar's aggregation or "chain reaction" theory of liability was pleaded in each of its claims, as was the requisite antitrust injury. Contrary to Granite's assertions, the alleged facts support a reasonable inference that Granite's concerted pre-2011 actions gave it the market power needed to acquire control over all a majority of the network affiliations and network programming in the Fort Wayne DMA and the advertising sales and revenues those affiliations generate, to the exclusion of other competitors. Whether Nexstar can prove that Granite's concerted actions are illegal per se or under the rule of reason (*i.e.*, that Granite was involved in a horizontal conspiracy **[*16]** with the purpose and effect of excluding direct competitors from the market, or that the alleged conduct would always or almost always tend to restrict competition and decrease output, without justification), *see* *Broadcast Music, Inc. v. CBS, 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1980)*, and whether Granite's actions were the "but for" cause of Nexstar's alleged injuries remains to be determined. The court can't decide at the pleadings stage whether Nexstar would have suffered identical injuries had someone else acquired the FOX affiliation, as Granite contends. While Nexstar's injuries might have been the same if another competitor had purchased the FOX affiliation, it could be inferred plausibly from the complaint's allegations that Granite, because of its market power, was the only competitor who could and would pay a "supra-competitive" price for the FOX affiliation agreement.

The complaint contains enough in the way of factual allegations to make Nexstar's antitrust claims "plausible" and to survive a motion to dismiss.

B. *Antitrust Standing*

"Standing . . . examines the connection between the asserted wrongdoing and the claimed injury to limit the class of potential plaintiffs to those who are in the best **[*17]** position to vindicate the antitrust infraction." *Greater Rockford Energy and Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 395 (7th Cir. 1993)*. "[N]ot all persons who have suffered an injury flowing from [an] antitrust violation have [antitrust standing]." *In re Industrial Gas Antitrust Litigation, 681 F.2d 514, 516 (7th Cir. 1982)*. "From the class of injured persons suffering an 'antitrust injury' only those parties who can most efficiently vindicate the purposes of the antitrust laws have antitrust standing to maintain a private action . . . ." *Serfecz v. Jewel Food Stores, 67 F.3d 591, 598 (7th Cir. 1995)* (quoting *In re Indus. Gas Antitrust Litig., 681 F.2d 514, 516 (7th Cir. 1982)*; *accord*, *Kochert v. Greater Lafayette Health Svcs, Inc., 463 F.3d 710, 716 (7th Cir 2006)*.

A court considers multiple factors in determining whether a plaintiff has antitrust standing, including: (1) "the causal connection between the damages claimed by the antitrust plaintiff and the harm to the plaintiff;" (2) "the nature of the injury suffered by the plaintiff and the relationship between the injury and the type of conduct sought to be

---

[1] It's not clear from the complaint when the alleged anti-competitive conduct actually began, but it could reasonably be inferred that it started in 2005 with the acquisition of WISE-TV (the NBC affiliate), sale of WPTA-TV to Malara, and subsequent agreements between Granite and Malara which effectively **[*15]** transferred operation and control of WPTA-TV back to Granite.

redressed by providing a private remedy for antitrust violations;" **[*18]** (3) "the directness of the asserted injury;" and (4) "the risk of duplicate recoveries or (conversely) the difficulties of apportioning damages among various classes of plaintiffs." *Nelson v. Monroe Reg'l Med. Ctr., 925 F.2d 1555, 1562-63 (7th Cir. 1991)*. *See also Associated General Contractors v. California State Council of Carpenters, 459 U.S. 519, 537-46, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*; *Kochert v. Greater Lafayette Health Servs., 463 F.3d at 718*; *Sanner v. Bd. of Trade of the City of Chicago, 62 F.3d 918, 927 (7th Cir. 1995)*. "The existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement diminishes the justification for allowing a more remote party . . . to perform the office of a private attorney general." *Associated General Contractors v. California State Council of Carpenters, 459 U.S. at 542*.

Granite contends that Nexstar lacks antitrust standing because it can't prove antitrust injury or but for causation, and so isn't the party that "can most efficiently vindicate the purposes of the antitrust laws." *Citing Kochert v. Greater Lafayette Health Svcs, Inc., 463 F.3d at 716*; *Serfecz v. Jewel Food Stores, 67 F.3d at 598*. **[*19]** But the issue at this stage isn't whether Nexstar will prevail on the merits; it's whether the complaint sufficiently alleges a "plausible" antitrust claim. *Ashcroft v. Iqbal, 556 U.S. at 678*; *In re Text Messaging Antitrust Litigation, 630 F.3d at 629*. While "[t]he required level of factual specificity rises with the complexity of the case," *McCauley v. City of Chicago, 671 F.3d 611, 616 (7th Cir. 2011)*; *Swanson v. Citibank, N.A., 614 F.3d 400, 404 (7th Cir. 2010)* ("A more complex case...will require more detail, both to give the opposing party notice of what the case is all about and to show how, in the plaintiff's mind at least, the dots should be connected."); *Limestone Development Corp., 520 F.3d at 803* ("Rico cases, like antitrust cases, are "big" cases and the defendant should not be put to the expense of big-case discovery on the basis of a threadbare claim."), the court already has decided that Nexstar has sufficiently alleged antitrust injury and stated a plausible claim under federal and state antitrust laws. Nexstar doesn't purport to stand in the shoes of third parties (advertisers or consumers) or complain about "secondary consequences arising from an injury to a third **[*20]** party." *Sanner v. Bd. of Trade of the City of Chicago, 62 F.3d at 929*. Nexstar's alleged injuries appear to be direct, and the risk of duplicate recoveries appears remote at this stage. *See Loeb Indus., Inc. v. Sumitomo Corp., 306 F.3d 469, 492 (7th Cir. 2002)*. Based on the record before the court so far, Nexstar has the requisite antitrust standing.

C. *Denigrating Speech and Predatory Hiring*

Granite asks the court to dismiss Nexstar's claims of denigrating commercial speech and predatory hiring, contending that such allegations don't state an actionable anti-trust claim under our circuit's law. *See Sanderson v. Culligan Int'l Co., 415 F.3d 620, 624 (7th Cir. 2005)* ("Commercial speech is not actionable under the antitrust laws."); *Mercatus Group, LLC v. Lake Forest Hospital, 641 F.3d 834, 852, 854 n.12 (7th Cir. 2011)* (noting that the Seventh Circuit has "never recognized predatory hiring as a valid theory of antitrust liability"). Granite cites *Mercatus Group, LLC v. Lake Forest Hospital, 641 F.3d at 850-51*, for the proposition that "speech made in the commercial context does not violate the antitrust laws unless it . . . is accompanied by some sort of 'enforcement mechanism' designed **[*21]** somehow to coerce or compel [the listener] to heed the admonition," and contends that Nexstar hasn't alleged that Granite engaged in any coercive threats or that "advertisers and the public" aren't free to accept or ignore Granite's alleged denigrating comments.

Nexstar maintains that Granite's predatory hiring and disparagement of Nexstar are part of Granite's "course of conduct" and evidence Granite's specific intent to monopolize the Fort Wayne market for television local spot advertising, *Mercatus Group, LLC v. Lake Forest Hospital, 641 F.3d at 852* (acknowledging that "false and misleading statements about a competitor" can be anticompetitive, albeit minimally); *DSM Desotech Inc. v. 3D Sys. Corp., 2009 U.S. Dist. LEXIS 5980, 2009 WL 174989 at *10 (N.D. Ill. Jan. 26, 2009)* ("'an intent to control prices and destroy competition'" can be inferred from predatory or anticompetitive conduct), and that Granite's ability to wield market power and withhold necessary inputs (like network programming) are coercive enforcement mechanisms. *See Mercatus Group, LLC v. Lake Forest Hospital, 641 F.3d at 851-852, 855*. Nexstar contends that Granite's market power also gives it the ability to offer supra-competitive compensation **[*22]** packages to WFFT-TV's skilled advertising sales staff, giving Granite access to confidential and proprietary pricing information, and enhancing Granite's ability to exercise market power by charging supra-competitive prices for advertising.

Whether Granite's alleged derogatory or disparaging statements are actionable in antitrust depends on the nature of the speech (who it made the statements to and what it said), and whether there was an "enforcement mechanism" in place — whether Granite's statements were backed by any sort of coercive conduct or threat (*i.e.*, the ability to boycott, to enter into agreements not to advertise certain products, or an inherent authority that it could leverage to compel advertisers to deal exclusively with Granite). *Mercatus Group, LLC v. Lake Forest Hospital, 641 F.3d at 850-852*; *Sanderson v. Culligan Int'l Co., 415 F.3d 620, 623-624 (7th Cir. 2005)*; *Schachar v. American Academy of Ophthalmology, Inc., 870 F.2d 397, 399-400 (7th Cir. 1989)*. "[A]bsent an accompanying coercive enforcement mechanism of some kind, even demonstrably false "[c]ommercial speech is not actionable under the antitrust laws." *Mercatus Group, 641 F.3d at 852* (quoting *Sanderson v. Culligan Int'l Co., 415 F.3d at 624*). **[*23]** "The genuine anticompetitive effects of false and misleading statements about a competitor are minimal, at best . . . As a result, courts must exercise 'caution . . . against attaching much weight to isolated examples of disparagement,' and claims based on one competitor's disparagement of another 'should presumptively be ignored.'" *Mercatus Group, 641 F.3d at 852* (quoting *American Prof'l Testing Service, Inc., v. Harcourt Brace Jovanovich Legal & Prof'l Publications, Inc., 108 F.3d 1147, 1152 (9th Cir. 1997)* [quoting 3 P. AREEDA & D. TURNER, ***ANTITRUST LAW***, ¶ 737b at 280-281 (1978)]. *See also* *American Council of Certified Podiatric Physicians & Surgeons v. American Bd. of Podiatric Surgery, Inc., 323 F.3d 366, 370 (6th Cir. 2003)*; *National Ass'n of Pharmaceutical Mfrs. v. Ayerst Labs, 850 F.2d 904, 916 (2d Cir. 1988)*.

The allegations of denigrating speech and predatory hiring standing alone might not suffice to state an antitrust claim, but Nexstar doesn't contend they would. Nexstar alleges that they are part of a course of conduct (or "chain reaction") and show Granite's intent to monopolize the television advertising market and destroy competition, *see* *DSM Desotech Inc. v. 3D Sys. Corp., 2009 U.S. Dist. LEXIS 5980, 2009 WL 174989 at *10 (N.D. Ill. Jan. 26, 2009)*, **[*24]** and that Granite had a coercive enforcement mechanism (market power and the ability to limit input), and could use it to back its derogatory statements and force advertisers to deal exclusively with it. *See* *Mercatus Group, 641 F.3d at 851, 855*. Those allegations suffice.

D. *Conspiracy to Violate Antitrust Laws (Counts I and III)*

Granite contends that Nexstar's conspiracy claims (Counts I and III) should be dismissed because a conspiracy "requires proof of at least two independent economic actors,"*see* *Great Escape, Inc. v. Union City Body Co., 791 F.2d 532, 536-540 (7th Cir. 1986)*, and the "judicial admissions" in the complaint conclusively establish that Malara (the only named conspirator) has a "unity of economic interest" with Granite, isn't an "independent center of decisionmaking," and therefore isn't capable of conspiring with Granite to violate the antitrust laws. *American Needle, Inc. v. NFL, __ U.S. __, 130 S.Ct. 2201, 2209-2212, 176 L. Ed. 2d 947 (2010)* ("the question in not whether the defendant is a legally single entity or has a single name . . . [but] whether there is a 'contract, combination . . . or conspiracy' amongst 'separate economic actors pursuing separate economic interests,' such **[*25]** that the agreement 'deprives the marketplace of independent centers of decisionmaking'"); *Cooperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 769, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* ("the coordinated activity of a parent [corporation] and its wholly owned subsidiary must be viewed as that of a single enterprise" for purposes of a conspiracy to restrain trade in violation of Section 1 of the Sherman Act).

Nexstar maintains that an entity's nature and ability to combine or conspire is a fact question, *L.A. Mem'l Coliseum Comm'n v. NFL, 726 F.2d 1381, 1387 (9th Cir. 1984)*, and that the facts alleged in its complaint show that Granite and Malara are independent economic entities capable of conspiring: "Like the competitor NFL teams in American Needle, Granite and Malara have acted in concert to join "independent centers of decisionmaking" and have placed a revenue stream-spot advertising from Fort Wayne advertising sales-under common control. Absent their agreement, Granite and Malara would compete for advertisers and would not be able to join their resources to foreclose competitors from network programming."

The complaint contains various descriptions of Malara and its relationship with Granite. It alleges **[*26]** that Malara owns WPTA-TV, and that Granite entered into agreements with Malara to operate the station and serve as its advertising representative. The complaint also alleges that Malara is "Granite's partner" and a "co-conspirator", that "Granite . . . defined Malara as a Granite subsidiary" in submissions to the bankruptcy court in the Southern District of New York in 2007, and that Indiana's NewsCenter (the brand name for Granite's consolidated operations in Fort

Wayne) "currently identifies Granite as 'the present owner' of WPTA." But those allegations don't foreclose the possibility that Malara is an independent entity capable of conspiring with Granite. The complaint contains enough in the way of factual allegations to make Nexstar's conspiracy claims "plausible". Nothing more is required at this stage of the proceedings.

III.

For the foregoing reasons, the court DENIES the defendants' motion to dismiss [Doc. No. 32].

SO ORDERED.

2012 U.S. Dist. LEXIS 199411 *

FELICE CATENA, Plaintiff, vs. CAPITOL RECORDS, LLC f/k/a CAPITOL RECORDS, INC., A DIVISION OF EMI MUSIC NORTH AMERICA, LLC, Defendant.

Core Terms

royalties, partnership, recording, unfair, fraudulent, allegations, individual member, consumers, contracts, parties, royalty payment, motion to dismiss, download, licenses, music, prong, business practice, contends, sentence, songs, contractual, courts, entity, unfair business practice, reasonably susceptible, factual allegations, susceptible, conclusory, references, ambiguity

Counsel: **[*1]** For Felice Catena, Plaintiff: Mark L Block, Wargo and French LLP, Los Angeles, CA USA; Paul H Duvall, King and Ballow, San Diego, CA USA; Richard S Busch, PRO HAC VICE, King and Ballow, Nashville, TN USA.

For Capitol Records Llc, A Division of Emi Music North America LLC doing business as Capitol Records Inc, Defendant: Jennifer A Jones, Kelly M Klaus, Melinda E LeMoine, Munger Tolles and Olson LLP, Los Angeles, CA USA.

Judges: MARGARET M. MORROW, UNITED STATES DISTRICT JUDGE.

Opinion by: MARGARET M. MORROW

Opinion

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS

On December 22, 2011, Felice Catena commenced this action against Capitol Records ("Capitol") in Los Angeles Superior Court.[1] Capitol removed the action to federal court on January 30, 2012, invoking the court's diversity jurisdiction.[2] On March 7, 2012, it filed a motion to dismiss the complaint.[3] Catena opposes the motion.[4]

I. FACTUAL BACKGROUND

[1] Notice of Removal Pursuant ("Removal"), Docket No. 1 (Jan. 30, 2012), Exh. A ("Complaint").

[2] Removal at 2.

[3] Motion to Dismiss Pursuant to *Fed. R. Civ. P. 12(b)(6)* ("Motion"), Docket No. 14 (Mar. 7, 2012). See also Reply in Support of Capital Records, LLC's Motion to Dismiss for Failure to State a Claim ("Reply"), Docket No. 18 (May 7, 2012).

[4] Plaintiff's Response to Defendant's Motion to Dismiss ("Opp."), Docket No. 17 (Apr. 30, 2012).

Catena is the heir and holder of legal rights to the intellectual property and estate of her deceased brother, Bruce Gary, a member of a musical group known as The Knack.[5] The Knack's hit songs include "My Sharona," a number one single in 1979, and "Good Girls Don't."[6] The group's debut album, titled **[*2]** "Get the Knack," sold more than 2 million copies in the United States and more than 6 million copies worldwide.[7]

Catena alleges that under the terms of a recording agreement between members of The Knack and Capitol, the group gave Capitol certain of its recorded performances ("the masters").[8] In exchange, Capitol agreed to manufacture, distribute, sell, and license the masters for distribution "in various configurations."[9] The agreement dictated the royalties Capitol was to pay for its licensing of the masters; specifically, it stated that "[w]ith respect to any use of masters recorded hereunder . . . by a licensee of Capitol . . . in lieu of any other royalty specified in this agreement Capitol shall pay . . . 50% of Capitol's net receipts from such licensee . . ., computed on the same quantity, basis and in the same manner as Capitol is paid."[10]

Catena asserts that Capitol licensed the masters to several third parties, including music download providers such as iTunes, cMusic, Amazon, Verizon, and T-Mobile, so that those providers could manufacture and sell music downloads, master tones and ring tones to the public.[11] She contends that Capitol received income from these licenses, **[*3]** and that it has "continuously and persistently" failed to pay 50% of its net receipts as required by the recording agreement.[12] Instead, Capitol purportedly paid Catena and members of The Knack at a lower royalty rate, pursuant to provisions of the recording agreement that were applicable to its sale of phonorecords rather than to licensing of the masters.[13]

Catena notified Capitol of its failure to pay members of The Knack the royalties they were due; despite this, Capitol has allegedly failed to make remit the monies owing.[14] She asserts, on information and belief, that Capitol knew its agreements with music download providers were licenses that entitled Catena and members of The Knack to 50% of the net receipts from the sales. Nonetheless, she contends, Capitol "deliberately and purposefully . . . vetted . . . [the] . . . practices at issue . . . at its highest corporate levels," chose to ignore its contractual obligations in order to accrue greater profits for itself, and enlisted music download providers' help "in an effort to re-characterize its dealings with them."[15] Catena alleges that Capitol "has employed and continues to employ a host of unfair tactics and strategies . . **[*4]** . to minimize [its] exposure from the unlawful conduct" alleged.[16]

She pleads claims for breach of contract; violation of California's e Unfair Competition Law ("UCL"), Business and Professions Code *§ 17200, et seq.*; an accounting; and declaratory relief.[17]

II. DISCUSSION

A. Legal Standard Governing Motions to Dismiss under *Rule 12(b)(6)*

A *Rule 12(b)(6)* motion tests the legal sufficiency of the claims asserted in the complaint. A *Rule 12(b)(6)* dismissal is proper only where there is either a "lack of a cognizable legal theory" or "the absence of sufficient facts alleged under a cognizable legal theory." *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1988)*. The court must accept all factual allegations pleaded in the complaint as true, and construe them and draw all reasonable inferences from them in favor of the nonmoving party. *Cahill v. Liberty Mutual Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*; *Mier v. Owens, 57 F.3d 747, 750 (9th Cir. 1995)*. It need not, however, accept as true unreasonable inferences or legal conclusions cast in the form of factual allegations. See *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* ("While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Factual allegations must be enough **[*5]** to raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact)" (citations omitted)).

Thus, a complaint must "contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.' . . . A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)*; see also *Twombly, 550 U.S. at 545* ("Factual allegations must be enough to raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact)" (citations omitted)); *Moss v. United States Secret Service, 572 F.3d 962, 969 (9th Cir. 2009)* ("[F]or a complaint to survive a motion to dismiss, the non-conclusory 'factual content,' and reasonable inferences from that content, must be plausibly suggestive of a claim entitling the plaintiff to relief," citing *Iqbal* and *Twombly*).

The manner in which the court assesses the adequacy and plausibility of a plaintiff's allegations is described in *Telesaurus VPC, LLC v. Power, 623 F.3d 998 (9th Cir. 2010)*, where the court said:

> "For purposes of our review, we begin by identifying pleadings that, because they are no more than **[*6]** conclusions, are not entitled to the assumption of truth. We disregard threadbare recitals of the elements of a cause of action, supported by mere conclusory statements. After eliminating such unsupported legal conclusions, we identify well-pleaded factual allegations, which we assume to be true, and then determine whether they plausibly give rise to an entitlement to relief." *Id. at 1003* (citations and quotation marks omitted).

B. Whether Plaintiff's Claims Should Be Dismissed

1. Interpretation of the Recording Agreement

The gravamen of defendant's motion is that the express terms of the recording agreement preclude Catena from suing Capitol for the payment of royalties. A court may grant a motion to dismiss based on interpretation of a contract so long as the contract's terms are unambiguous. *Bedrosian v. Tenet Healthcare Corp., 208 F.3d 220*, *[published in full-text format at 2000 U.S. App. LEXIS 2840], 2000 WL 206633, *1 (9th Cir. Feb. 23, 2000) (Unpub.*

---

[17] *Id.*, ¶¶ 16-41.

Disp.) ("Resolution of contractual claims on a motion to dismiss is proper if the terms of the contract are unambiguous."). If the contract's terms are reasonably susceptible of more than one meaning, however, the motion must be denied. See *Velasquez v. GMAC Mortg. Corp., 605 F.Supp.2d 1049, 1069 (C.D. Cal. 2008)* ("While the resolution of contractual claims on a motion to dismiss may be proper if the terms of the contract are unambiguous, a motion to dismiss should not **[*7]** be granted where the contract 'leaves doubt as to the parties' intent,'" quoting *Consul Ltd. v. Solide Enters., Inc., 802 F.2d 1143, 1149 (9th Cir. 1986))*; *Rodman v. Safeway, Inc., No. C 11-03003, 2011 U.S. Dist. LEXIS 126212, 2011WL 5241113,*3 (N.D. Cal. Nov. 1, 2011)* (denying a motion to dismiss a breach of contract claim "[b]ecause Plaintiff adequately alleges the existence of a contract, which both parties construe to be binding, and which is susceptible to Plaintiff's reasonable construction").

"A party's assertion of ambiguity does not require the district court to allow additional opportunities to find or present extrinsic evidence if the court considers the contract language and the evidence the parties have presented and concludes that the language is reasonably susceptible to only one interpretation." *Skilstaf, Inc. v. CVS Caremark Corp., 669 F.3d 1005, 1017 (9th Cir. 2012)*. "That conclusion can be reached . . . on a motion to dismiss if the evidence can properly be considered under *Rule 12(b)(6)*." *Id.*; see also *AMC Tech., LLC v. CiscoSystems, Inc., No. 11—CV—03403 PSG, 2012 U.S. Dist. LEXIS 6487, 2012 WL 174949,*4 (N.D. Cal. Jan. 20, 2012)* ("The mere suggestion that extrinsic evidence could create an ambiguity is not sufficient where there is no language in the contract that is reasonably susceptible to the meaning allegedly supported by that evidence"). Although the material facts alleged in the complaint must be construed in plaintiff's **[*8]** favor, "the court [is not] required to accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *Sprewell v. Golden State Warriors, 266 F.3d 979 (9th Cir. 2001)*. Nor is the court required to accept as true allegations that are contradicted by documents incorporated in the complaint or properly subject to judicial notice. *Id.*

The parties do not dispute that California law governs interpretation of the recording agreement. "Under California law,'[t]he fundamental goal of contract interpretation is to give effect to the mutual intent of the parties as it existed at the time of contracting.'" *Skilstaf, Inc., 669 F.3d at 1015* (quoting *Miller v. Glenn Miller Prods., Inc., 454 F.3d 975, 989 (9th Cir. 2006)* (per curiam)). "Because California law recognizes that the words of a written instrument often lack a clear meaning apart from the context in which the words are written, courts may preliminarily consider any extrinsic evidence offered by the parties." *Id. at 989-90*; see also *Dore v. Arnold Worldwide, Inc., 39 Cal.4th 384, 391, 46 Cal. Rptr. 3d 668, 139 P.3d 56 (2006)* ("'[E]ven if a contract appears unambiguous on its face, a latent ambiguity may be exposed by extrinsic evidence which reveals more than one possible meaning to which the language of the contract is yet reasonably susceptible,'" quoting *Morey v. Vannucci, 64 Cal.App.4th 904, 912, 75 Cal. Rptr. 2d 573 (1998))*. "If the court decides, after consideration of this evidence, that the language of a contract, in **[*9]** the light of all the circumstances, is fairly susceptible of either one of the two interpretations contended for, extrinsic evidence relevant to prove either of such meanings is admissible." *Pacific Gas & Elec. Co. v. G.W. Thomas Drayage & Rigging Co., 69 Cal.2d 33, 40, 69 Cal. Rptr. 561, 442 P.2d 641 (1968)*. "If, however, the court decides that the contract is not reasonably susceptible to more than one interpretation, the court can reject the assertion of ambiguity." *Skilstaf, 669 F.3d at 1015*.

"It is the outward expression of the agreement, rather than a party's unexpressed intention, which the court will enforce." *Winet v. Price, 4 Cal.App.4th 1159, 1165, 6 Cal. Rptr. 2d 554 (1992)*. "Language in a contract must be construed in the context of that instrument as a whole, and in the circumstances of that case, and cannot be found to be ambiguous in the abstract." *Foster-Gardner, Inc. v. Nat'l Union Fire Ins. Co., 18 Cal.4th 857, 868, 77 Cal. Rptr. 2d 107, 959 P.2d 265 (1998)* (internal citation and quotations omitted); see also *CAL. CIV. CODE § 1641* ("The whole of a contract is to be taken together, so as to give effect to every part, if reasonably practicable, each clause helping to interpret the other").

While only an excerpt of the recording agreement is attached to the complaint,[18] Capitol has proffers the entire agreement in support of its motion.[19] Capitol also proffers a February 12, 1982, letter indicating that Bruce Gary

---

[18] Complaint, Exh. A.

had terminated his membership in The Knack, and invoked a provision in the agreement concerning a **[*10]** "member [who] ceases to be a member of the Group."[20] While a court may not ordinarily rely on matters outside the pleadings in deciding a Rule a *12(b)(6)* motion, under the incorporation by reference doctrine, a court can consider a document if "(1) the complaint refers to the document; (2) the document is central to plaintiff's claim; and (3) no party questions the authenticity of the [document]." *Marder v. Lopez, 450 F.3d 445, 448 (9th Cir. 2006)*; see also *Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)* ("If the documents are not physically attached to the complaint, they may be considered if the documents' 'authenticity . . . is not contested' and 'the plaintiff's complaint necessarily relies on them," quoting *Parrino v. FHP, Inc., 146 F.3d 699, 705-06 (9th Cir. 1998))*.

Catena's complaint refers to and necessarily relies on the recording agreement. It also references Gary's membership in The Knack, and "all subsequent amendments and supplements" to the agreement.[21] Catena does not dispute the authenticity of the copies of the recording agreement and February 1982 letter that Capitol has proffered. Consequently, the court will rely on these documents in deciding the motion.

The agreement is in two parts — the first is the "agreement" between the members of The Knack (Doug Fieger, Berton Averre, Bruce Gary, and Prescott Niles) and Capitol. **[*11]** This portion is written in the first person and signed by all four members of the group and a representative of Capitol. The second part is a "group supplement," which is paginated consecutively with the agreement and states that it is "an integral part of the Agreement to the same extent as if included therein."[22] The group supplement is signed only by the members of The Knack.[23] The parties' dispute centers on the proper interpretation to be given paragraphs 1(a) and 6 of the group supplement. Paragraph 1(a) states:

> "All payments under the Agreement . . . shall be paid to The Knack partnership. . . . Except as provided in Paragraph 8, Doug Fieger, Berton Averre, Bruce Gary, and Prescott Niles all agree to look solely to The Knack partnership for payment of all royalties and/or fees, as the case may be, and will not assert any claim in this regard against Capitol or in this regard attempt to prevent the manufacture, sale, or distribution of phonograph records manufactured from masters recorded under the Agreement."[24]

Paragraph 6 states that "[i]f any member ceases to be a member of the Group, such member shall continue to look solely to The Knack partnership for payment of all applicable **[*12]** royalties and/or fees in accordance with Paragraph 1.a. of this Group Supplement."[25]

Capitol contends that these provisions clearly and unambiguously require individual members of The Knack to look solely to "The Knack partnership" for "payment of all royalties and fees," and bar "any claim in this regard against Capitol." As each of Catena's claims is based on purportedly unpaid royalties, Capitol contends the contract maintenance of the suit. Capitol also notes that the contract and the group supplement differentiate between Capitol's rights and obligations with respect to The Knack as a whole, and its rights and obligations with respect to individual members of the group. Capitol cites various paragraphs of the agreement as evidence of this,[26] and

[19] Declaration of Melinda E. LeMoine in Support of Motion to Dismiss ("LeMoine Decl."), Docket No. 15 (Mar. 7, 2012), Exh. A ("Recording Agreement").

[20] *Id. at 40*; LeMoine Decl., Exh. B ("Gary Letter").

[21] Complaint, ¶ 2.

[22] Recording Agreement at 38.

[23] *Id. at 42*.

[24] *Id. at 38*.

[25] *Id. at 40*.

[26] See, e.g., *id. at 33* ("Payments to me provided herein other than union scale shall be made to "The Knack", c/o Upstart Management, or to such other address as I may direct Capitol by notice in writing, and payment so made shall fulfill Capitol's

contrasts them with provisions that reference individual Knack members by name, clarifying that some have different rights and obligations than others.[27] When read in light of these other provisions, Capitol contends, paragraphs 1(a) and 6 of the group supplement require that the individual members of The Knack seek payment of any unpaid royalties from The Knack partnership, rather than from Capitol.

While this interpretation of the contract **[*13]** is certainly reasonable, it is not the *only* construction of which the agreement is susceptible. As noted, paragraph 1(a) states that the group's members "all agree to look solely to The Knack partnership *for payment of all royalties and/or fees*, as the case may be, and will not assert *any claim in this regard* against Capitol. . . ."[28] Capitol emphasizes the first italicized phrase, arguing that it encompasses all claims that implicate or concern royalty payments. Paragraph 1(a), however, begins with the sentence: "All payments under the Agreement other than applicable union scale shall be paid to The Knack partnership, c/o Upstart Management, or such other address as Capitol is notified in writing." This sentence requires that payments Capitol makes to the group members under the agreement "shall be paid" to the partnership; it thus describes the manner in which Capitol is to make royalty payments to members of The Knack. The second sentence, which is the focus of the parties' dispute, states that individual members of The Knack will look to the partnership for "the payment of all royalties and/or fees." Capitol's interpretation may be the more obvious one based on the plain language **[*14]** of the second sentence; its interpretation could be said to, however, disregard the immediately preceding sentence, which appears to limit the "royalties and/or fees" that are the subject of the second sentence to the "payments under the Agreement" that "shall be paid" to the partnership entity. Because of this, the second sentence of Paragraph 1(a) is reasonably susceptible of being a reference to the recourse individual members of The Knack had available to obtain the "payment of all royalties and/or fees" that Capitol had paid pursuant to the first sentence of the paragraph. Stated differently, the sentences can be interpreted together to mean that after Capitol made required royalty payments to The Knack partnership, individual members of the group could only recoup their percentage of the payment made by Capitol "under the Agreement" from the partnership. Paragraph 1(a) clearly bars the individual members from asserting "any claim in this regard" against Capitol.

Catena's claim, however, is not that Capitol validly paid royalties due to The Knack partnership and that she has not received the percentage of the royalty payments to which she is entitled. Instead, she alleges that **[*15]** Capitol is withholding royalty payments from The Knack that it is required to make in violation of the recording agreement. Her claim that Capitol is not making "[a]ll payments under the Agreement" is thus distinct from a claim that the partnership failed to pay its members profits Capitol paid to it.

Capitol argues that this interpretation is unreasonable, and requires that the contract be construed to mean that the "individual members [of The Knack] won't bring claims for royalties against Capitol unless the individuals have claims for royalties against Capitol."[29] To the contrary, Catena's construction of paragraph 1(a) merely reads the paragraph as a whole, and does not single out the phrase "all royalties and/or fees" for special emphasis. See *People v. Doolin, 45 Cal. 4th 390, 413 n.17, 87 Cal. Rptr. 3d 209, 198 P.3d 11 (2009)* ("Courts must interpret the contractual language to give force and effect to every provision and avoid an interpretation that renders some clauses nugatory, inoperative or meaningless" (internal citations omitted)).

---

obligation hereunder to each of the group's signatories"); *id. at 39* ("If we refuse or neglect to fail to perform together for Capitol in fulfillment of the obligations agreed to be performed under the Agreement, Capitol may by notice in writing terminate the Agreement entirely. . .").

[27] See, e.g., *id. at 39* ("the said professional name shall be and remain the property of Doug Fieger"); *id.* ("[I]f either Doug Fieger or Berton Averre leaves the Group, and a mutual agreement cannot be reached as to a replacement therefor, Capitol may elect to terminate the engagement of the remaining members of the Group by notice in writing"); *id. at 42* (stating that "[a]ll approvals, consents, selections, and notifications shall be made solely by, and all consultations shall be solely with" Fieger or the group's manager).

[28] Recording Agreement at 38 (emphasis added).

[29] Motion at 12.

Under the facts of this case, Capitol's interpretation would place Catena and the individual members of The Knack in the position of suing "The Knack partnership," i.e. each other, for money none of them possesses. In a practical **[*16]** sense, therefore, Capitol's construction may result in individual members being unable to assert that Capitol is withholding royalty payments in violation of the contract. This may further support the existence of a contractual ambiguity. See *Battram v. Emerald Bay Community Assn., 157 Cal. App. 3d 1184, 1189, 204 Cal. Rptr. 107 (1984)* ("'[W]here a contract is susceptible of two interpretations, the courts shall give it such a construction as will make it lawful, operative, definite, reasonable and capable of being carried into effect . . . .[and] avoid an interpretation which will make [the contract] extraordinary, harsh, unjust, inequitable or which would result in absurdity.'" (quoting *Howe v. American Baptist Homes of the West, Inc., 112 Cal.App.3d 622, 626-627, 169 Cal. Rptr. 418 (1980))*.

Capitol responds that while individual members of The Knack can assert rights to royalties only against the partnership, The Knack *partnership* can sue Capitol. Under this interpretation, the individual members' rights would be preserved and collectively they would have recourse against Capitol if it breached the terms of the agreement. Neither the agreement nor the group supplement, however, is signed by anyone on behalf of "The Knack partnership."[30] Nor, other than the fact that the agreement was structured to pay royalties to the group, and through it, to individual members, is there any **[*17]** information the court can consider concerning the past or current existence of such a partnership. See *Love v. The Mail on Sunday, 489 F.Supp.2d 1100, 1106-07 (C.D. Cal. 2007)* ("Plaintiff simply does not demonstrate that he and Defendant were 'carry[ing] on as coowners a business for profit.' It is uncontested that Plaintiff and Defendant wrote songs together and, until 1969, co-owned those songs. However, this collaboration and co-ownership of songs does not show that they were engaged as co-owners of a business. Further, the assets that Plaintiff characterizes as 'partnership assets' — the copyrights to their co-authored songs — are not owned by any partnership entity between Plaintiff and Defendant, or even by Plaintiff and Defendant jointly or in common; instead these copyright have been owned by Rondor since 1969. Plaintiff and Defendant are each entitled to royalties based on those copyrights, but there is no evidence that their entitlement to royalties runs through any partnership between them. Rather, Rondor pays royalties directly to Plaintiff and directly to Defendant individually. In short, Plaintiff's evidence cannot satisfy the 1994 UPA's definition of 'partnership.' In addition, Defendant has demonstrated that objective indicia of partnership **[*18]** simply do not exist, and that there is no evidence that the parties entered into a partnership orally. Indeed, it is undisputed that Plaintiff and Defendant never signed any type of written partnership agreement, that they never had any discussions regarding what would be done with the songs they wrote together, that Plaintiff cannot recall any conversations with Defendant about the need to inform each other regarding the use of the songs, that Plaintiff never filed partnership tax returns in connection with the songwriting royalties received from the exploitation of the co-authored songs, and that there is no 'partnership entity' that currently collects the songwriting royalties for the co-authored songs"). Indeed, some of the language in the recording agreement suggests that it is a contract between Capitol and four individuals, as it speaks in the first person and repeatedly refers to "my exclusive personal services" and the obligations of individual Knack members.[31]

A somewhat more compelling argument in Capitol's favor is that its reading of the contract is the more sensible one given the agreement's purposes and goals. As noted, the royalty agreement defines the royalty rate on **[*19]** a group basis and provides that Capitol can make a group royalty payment to fulfill its contractual obligation to The Knack's members.[32] The agreement does not define the share of group royalties due any individual member of The

---

[30] Recording Agreement at 37, 42. The signature pages do note that the individual signatories are the "[g]roup performing as 'The Knack.'"

[31] See, e.g., *id.* at 1, 3 ("Capitol hereby guarantees me . . ."); *id.* at 12 ("At any time within three years after my royalty statement is rendered to me hereunder . . ."); *id.* at 21 ("Capitol and I agree to indemnify and hold the other harmless from any claims, damages, expenses (including reasonable attorney's fees), and litigation which may come about as a result of a breach by Capitol or me . . . of any of our respective representations or warranties contained in this agreement. . . . Capitol shall have the right to withhold from royalties otherwise payable to me. . .").

[32] *Id. at 33*.

Knack, and does not explicitly state that Gary (Catena's predecessor) is to receive a 25% share, as Catena contends.[33] Interpreting the agreement in the manner Capitol suggests would ensure that it would not be drawn into any internal dispute among the group's members regarding payments or percentages, and that any dispute regarding the division of royalties could be addressed without its involvement. While such an interpretation is, once again, quite plausible, it does not answer what a member of The Knack is to do if Capitol breaches its contractual obligations by withholding royalty payments altogether. The lack of any clear answer to this question on the face of the contract suggests that Catena's construction of the agreement is also plausible, since it preserves the right of individual members of The Knack to bring a claim for unpaid royalties against Capitol. The court reaches this conclusion in part because the court has before it no allegations or evidence **[*20]** that a legal entity known as "The Knack" partnership ever existed, that the entity continues in existence today, or that, if dissolved, there were or were not specific provisions in The Knack's partnership agreement that controlled what happened to partnership assets post-dissolution. Given that the face of the contract is reasonably susceptible of different meanings, the answers to these questions, as well as evidence of the parties' intent that will be developed through discovery, is critical to construing the contract in the proper manner.

Consequently, the court cannot conclude at this stage of the litigation that Capitol's interpretation is the only reasonable construction of the contract. The court wishes to emphasize that it does not definitively decide in this order the proper interpretation of the contract, as that determination must await further factual development. While the plain language of the agreement is susceptible of the interpretation Capitol advances, Catena's alternate construction is also reasonable. Because the contract is susceptible of more than one reasonable interpretation, Capitol's motion to dismiss all of Catena's claims must be denied.[34] See **[*21]** *Yang v. Home Loan Funding, Inc., No. CV F 07-1454 AWI GSA, 2010 U.S. Dist. LEXIS 21837, 2010 WL 670958, *14 (E.D. Cal. Feb. 22, 2010)* ("While the issue with respect to timing of rate changes for the first year is close and has been the subject of disagreement between courts, this court finds that the ambiguity is sufficient for present purposes to warrant denial of the motion to dismiss"); compare *Skilstaf, Inc., 669 F.3d at 1016* (affirming dismissal of a claim where the contract was "susceptible to only one interpretation").

2. Whether the UCL Claims Must Be Dismissed

Capitol next argues that Catena's UCL claim is barred for reasons independent of proper interpretation of the recording agreement. "The UCL was enacted 'to protect . . . consumers and competitors by promoting fair competition in commercial markets for goods and services.'" *Linear Tech. Corp. v. Applied Materials, Inc., 152 Cal.App.4th 115, 135, 61 Cal. Rptr. 3d 221 (2007)* (quoting *Kasky v. Nike, Inc., 27 Cal.4th 939, 119 Cal. Rptr. 2d 296, 45 P.3d 243 (2002))*. It is "sweeping, embracing anything that can properly be called a business practice and at the same time is forbidden by law." *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal.4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*; *Palestini v. Homecomings Fin., LLC, No. 10CV1049-MMA, 2010 U.S. Dist. LEXIS 72985, 2010 WL 3339459, *9 (S.D. Cal. Aug. 23, 2010)* (same).

The act defines "unfair competition" as "any unlawful, unfair or fraudulent business act or practice." *Bus. & Prof. Code § 17200*; *Cel-Tech Communications, 20 Cal.4th at 180*. "'An act can be alleged to violate any or all of the three prongs of the UCL — unlawful, unfair, or fraudulent.'" *Id.* (quoting *Berryman v. Merit Prop. Mgmt., Inc., 152 Cal.App.4th 1544, 1554, 62 Cal. Rptr. 3d 177 (2007))*.

California courts have held that "an **[*22]** action under the UCL is not an all-purpose substitute for a tort or contract action." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal.4th 1134, 1150, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)* (citations and quotes omitted). "Contractual duties are voluntarily undertaken by the parties to the contract, not imposed by state or federal law." *Smith v. Wells Fargo Bank, N.A., 135 Cal.App.4th 1463, 1484, 38 Cal. Rptr.*

[33] Opp. at 10.

[34] Given the court's conclusion, it declines to address Catena's contention that she was not required to look to the partnership for royalty payments because Gary had ceased being a member of The Knack. (Opp. at 13-14.)

3d 653 (2005) (internal modification and quotation omitted). "[A] breach of contract [can only] . . . form the predicate for Section 17200 claims, provided it also constitutes conduct that is 'unlawful, or unfair, or fraudulent.'" Puentes v. Wells Fargo Home Mortg., Inc., 160 Cal.App.4th 638, 645, 72 Cal. Rptr. 3d 903 (2008) (emphasis original). Consequently, Catena must plead some element of unfairness, unlawfulness, or fraud in addition to a "garden-variety" breach of contract claim in order to allege a viable UCL claim. See Sybersound Records, Inc. v. UAV Corp., 517 F.3d 1137, 1152 (9th Cir. 2008) (rejecting the argument that breach of a contract to pay royalties constituted a violation of the UCL because it was not independently "unlawful, unfair [or] fraudulent"); Boland, Inc. v. Rolf C. Hagen (USA) Corp., 685 F.Supp.2d 1094, 1110 (E.D. Cal. 2010) ("An act that breaches a contract may also breach the UCL, but only when the act is unfair, unlawful or fraudulent for some additional reason" (emphasis added)).

Capitol contends that because Catena is neither a consumer nor a competitor, she is not among the class of people the UCL was designed to protect. This argument is linked to a second, which is that Catena asserts a standard **[*23]** breach of contract claim, and she should be restricted to seeking contractual remedies and not be permitted to assert a separate claim for unfair business practices. Capitol cites Linear Technology Corp. v. Applied Materials, Inc., 152 Cal.App.4th 115, 61 Cal. Rptr. 3d 221 (2007), which held that "where a UCL action is based on contracts not involving either the public in general or individual consumers who are parties to the contract, a corporate plaintiff may not rely on the UCL for the relief it seeks." Id. at 135. In *Linear Technology*, the Court of Appeal observed that "the harm [plaintiff] suffered . . . result[ed] from contracts specifically with the plaintiff," and that "[t]he other alleged victims likewise are sophisticated corporate customers who have entered or will enter their own contracts with respondents, although neither these victims nor the contracts are identified in the complaint." Id. at 136. The court concluded: "In these circumstances, where a UCL action is based on contracts not involving either the public in general or individual consumers who are parties to the contract, a corporate plaintiff may not rely on the UCL for the relief it seeks." *Id.*

Linear Technology Corp.'s facts clearly track the facts of this case. Catena does not purport to represent a class of consumers who **[*24]** were injured by a deceptive business practice aimed at the public at large. Instead, her claims are based on a specific contract between the individual members of a musical group and a recording label concerning royalty payments. While Catena cites authority for the proposition that "a systematic breach of certain types of contracts (e.g., breaches of standard consumer or producer contracts involved in a class action) can constitute an unfair business practice under the UCL," Arce v. Kaiser Foundation Health Plan, Inc., 181 Cal.App.4th 471, 489-90, 104 Cal. Rptr. 3d 545 (2010) (citing Smith v. Wells Fargo Bank, N.A., 135 Cal.App.4th 1463, 1483, 38 Cal. Rptr. 3d 653 (2005), the contract at issue here is not a boilerplate consumer contract of the type that unwary consumers typically enter into with large corporate entities. Compare Ansanelli v. JP Morgan Chase Bank, N.A., No. C 10-03892 WHA, 2011 U.S. Dist. LEXIS 32350, 2011 WL 1134451, *9 (N.D. Cal. Mar. 28, 2011) ("[D]efendant argues that plaintiffs fail to 'allege that the purported unfair business practices offend an established public policy or [that] the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.' It is sufficient that plaintiffs have alleged injury by a policy of defendant that violates law and public policy"). Instead, Gary and other members of The Knack are more properly deemed "sophisticated corporate customers" as that term was used in Linear **[*25]** Technology Corp. Despite alleging the existence of an "unfair business practice," the complaint does not identify other individuals who were similarly injured by Capitol's conduct.

Fairly read, the complaint discusses a single contract — that between The Knack and Capitol. See also Sybersound Records, Inc., 517 F.3d at 1153 ("Courts are institutionally ill-suited to enforce and superintend private contracts among business entities where the concerned entities themselves are not parties to the suit"); Rosenbluth Int'l, Inc. v. Superior Court, 101 Cal.App.4th 1073, 1077, 124 Cal. Rptr. 2d 844 (2002) (distinguishing between "actions brought to assert the claims of individual consumers under section 17200, which lend themselves well to representative UCL cases, and actions that involve sophisticated business finance issues, which do not").

Pleading a UCL claim based on these facts is not necessarily impossible, however. James v. UMG Recordings, Inc., Nos. C 11-01613 SI, C 11-02431 SI, 2012 U.S. Dist. LEXIS 55298, 2012 WL 1376977, *2 (N.D. Cal. Apr. 19, 2012) is instructive here. That case also involved claims brought by a small group of recording artists against a defendant that was allegedly withholding royalty payments in violation of a contract. 2012 U.S. Dist. LEXIS 55298, [WL] at *2. As here, "[a] central question in th[e] litigation [was] whether, within the meaning of the recording contracts, agreements between defendant and digital retailers, such as **[*26]** Apple/iTunes or Amazon.com, for the sale of digital products like downloads and/or ringtones are license agreements or resale agreements." *Id.* The plaintiffs alleged a UCL claim, which defendant sought to resolve on an early motion for summary judgment. In the motion, it repeated arguments it had made in an earlier motion to dismiss, namely, that plaintiffs' UCL claim was based on "purely private contractual arrangements, which [did] not affect consumers." *Id.* The *James* court disagreed, stating that it had previously denied defendant's motion to dismiss because "plaintiffs could base the[ ] UCL claim on a systematic breach of contracts theory, in part because they alleged defendant's conduct was part of a 'broad scheme' involving misinformation and deception of the public regarding royalty payments to musicians." *Id.* Regarding the summary judgment motion, the court stated that it could not "fully assess the impact of defendant's conduct on the plaintiffs as well as the public interest based on the current record, and [that] plaintiffs should be given a full opportunity to develop that record, including expert testimony as necessary." *Id.* The factual allegations of the *James* complaint **[*27]** are similar to those in this case, suggesting that Catena may plausibly be able to plead a UCL claim. As discussed in more detail *infra*, however, Catena's allegations of a coordinated effort among record labels to breach contracts with artists by paying lower royalty rates than those to which they were entitled on licenses to music download providers are conclusory, unsupported by facts, and therefore not plausible under *Iqbal*.

Consequently, the court must dismiss Catena's UCL claim as pled because she has alleged nothing more than a simple breach of contract in support of the claim. To provide further guidance for any amended complaint, however, the court addresses Catena's specific claims under each of the UCL's three prongs to determine if she has adequately pled the statutory elements of the claim. "'A plaintiff alleging unfair business practices under the[ ] [UCL] must state with reasonable particularity the facts supporting the statutory elements of the violation.'" *Saldate v. Wilshire Credit Corp., 686 F.Supp.2d 1051, 1067 (E.D. Cal. 2010)* (citing *Khoury v. Maly's of California, Inc., 14 Cal.App.4th 612, 619, 17 Cal. Rptr. 2d 708 (1993))*.

a. The "Fraudulent" Prong

"The 'fraudulent' prong [of] the UCL requires a plaintiff to 'show deception to some members of the public, or harm to the public interest,' or to allege that 'members of the public **[*28]** are likely to be deceived.'" *Id.* (citing *Watson Laboratories, Inc. v. Rhone-Poulenc Rorer, Inc., 178 F.Supp.2d 1099, 1121 (C.D. Cal. 2001)*, and *Medical Instrument Development Laboratories v. Alcon Laboratories, No. C 05-1138 MJJ, 2005 U.S. Dist. LEXIS 41411, 2005 WL 1926673, *5 (N.D. Cal. Aug. 10, 2005)*).

The parties agree that a claim asserted under this prong of the UCL sounds in fraud, and is therefore subject to the heightened pleading standard of *Rule 9(b)*.[35] See *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)* ("[W]e have specifically ruled that *Rule 9(b)*'s heightened pleading standards apply to claims for violations of the CLRA and UCL. . . . [Where] the claim is . . . 'grounded in fraud' or . . . 'sound[s] in fraud,' . . . the pleading . . . as a whole must satisfy the particularity requirement of *Rule 9(b)*," quoting *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1103-04 (9th Cir. 2003)* ("In cases where fraud is not a necessary element of a claim, a plaintiff may choose nonetheless to allege in the complaint that the defendant has engaged in fraudulent conduct. In some cases, the plaintiff may allege a unified course of fraudulent conduct and rely entirely on that course of conduct as the basis of a claim. In that event, the claim is said to be 'grounded in fraud' or to 'sound in fraud,' and the pleading of that claim as a whole must satisfy the particularity requirement of *Rule 9(b)*")).

Rule 9(b) requires that the facts constituting the fraud be pled with specificity. Conclusory allegations are insufficient. *Fed.R.Civ.Proc. 9(b)*; *Moore v. Kayport Package Exp., Inc., 885 F.2d 531, 540 (9th Cir. 1989)* ("A **[*29]** pleading is sufficient under *Rule 9(b)* if it identifies the circumstances constituting fraud so that a defendant can prepare an adequate answer to the allegations. While statements of the time, place and nature of the alleged fraudulent activities are sufficient, mere conclusory allegations of fraud are insufficient"). See also *Walling v. Beverly Enters., 476 F.2d 393, 397 (9th Cir. 1973)* (concluding that allegations stating the time, place, and nature of

[35] Opp. at 22.

allegedly fraudulent activities meet *Rule 9(b)*'s particularity requirement). *Rule 9(b)* "does not require nor make legitimate the pleading of detailed evidentiary matter." All that is necessary is "identification of the circumstances constituting fraud so that the defendant can prepare an adequate answer from the allegations." *Id.* (alleging in conclusory fashion that defendant's conduct was fraudulent was not sufficient under *Rule 9(b)*).

Catena contends that she has pled the existence of a scheme through which "Capitol [ ]withheld monies due to Plaintiff," and she "was led to believe that the royalty rates paid by Capitol accurately reflected the amounts actually owed . . . and accurately accounted for the nature of Capitol's agreements with the third-party vendors."[36] The scheme was purportedly executed in coordination "with other **[*30]** major record labels," and was "vetted . . . at [Capitol's] highest corporate levels."[37] These allegations are deficient for several reasons. First, the gravamen of Catena's claim under the fraudulent prong of the UCL appears to be that Capitol represented to members of The Knack that its licenses with third party music download providers were not covered by the royalty provision that entitled them to higher fees. The contract contains no such representation, however, and Catena does not allege *any* specific instance in which a Capitol representative made such a statement to a member or members of The Knack. Nor does she allege a single instance in which a Capitol representative told a member or members of The Knack that they were entitled to receive the payments Catena seeks in the complaint, much less the content of any representations, where and when they took place, who made them, or any of the other information that is necessary to survive under *Rule 9(b)*.

Although Catena cites various allegations that purportedly detail Capitol's "knowing and/or reckless failure to properly account to and pay Plaintiff royalties pursuant to the recording agreement,"[38] these paragraphs merely cite contract **[*31]** provisions that require Capitol to pay a certain amount of money in royalties. Proper categorization of the license fees Capitol received under agreements with third party download providers is the core of Catena's contract dispute with Capitol. The court can discern no additional element that elevates her claim above a standard breach of contract action or transforms it into a fraudulent business practice.

Catena's claim under the UCL's fraudulent prong fails for another reason, which is the complaint's failure to allege what deception Capitol's conduct worked upon the public. *Saldate, 686 F.Supp.2d at 1067*. Catena contends that references to "other artists" and their contracts suffices to meet her pleading burden.[39] These vague and scattered references to third parties who may have been similarly "deceived" by Capitol's conduct are insufficient to support a UCL claim. Moreover, even if other artists were affected by Capitol's practice, the court perceives no connection between that deception and members of the public at large. The complaint identifies not a single representation made to members of the public concerning Capitol's business practices, or how those practices would have affected a consumer of The Knack's **[*32]** music or some other group's music in any way. While the complaint contains occasional references to the fact that third party music download providers sold the downloads to "the general public,"[40] the mere suggestion that "the public" is indirectly implicated is not adequate to state a claim for fraudulent business practices. See *Express, LLC v. Fetish Group, Inc., 464 F.Supp.2d 965, 980 (C.D. Cal. 2006)* ("Express does not point to any evidence suggesting that the representations concerning the copyright were disseminated to the public, let alone likely to deceive the public. Therefore, Express has failed to raise a triable issue of material fact for a cause of action under *§ 17200* based on 'fraudulent conduct'"). Consequently, Catena's UCL claim based on "fraudulent" business practices fails.

b. The "Unlawful" Prong

"For an action based upon an allegedly unlawful business practice, the UCL 'borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable.'" *Stearns v. Select Comfort Retail Corp., 763 F.Supp.2d 1128, 1150 (N.D. Cal. 2010)* (quoting *Cel-Tech Communications, 20 Cal.4th at 180*, in turn citing *Farmers Ins. Exch. Super. Ct. v. Superior Court, 2 Cal.4th 377, 383, 6 Cal. Rptr. 2d 487, 826 P.2d 730 (1992))*; see also *Jackson v. Ocwen Loan Servicing, LLC, No. 2:10-cv-00711-MCE-GGH, 2010 U.S. Dist. LEXIS 93524, 2010 WL 3294397, *5 (E.D. Cal. Aug. 20, 2010)* ("'Unlawful' practices are practices 'forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulation, or court-made'" **[*33]** citing *Saunders v. Superior Court, 27 Cal.App.4th 832, 838-39, 33 Cal. Rptr. 2d 438 (1994)*, and *People v. McKale, 25 Cal.3d 626, 632, 159 Cal. Rptr. 811, 602 P.2d 731 (1979))*.

Catena does not allege that Capitol's conduct violated any law or regulation. Indeed, her opposition suggests that her "unlawful" business practices claim is predicated solely on Capitol's alleged breach of contract.[41] As the court has already noted, the mere allegation of a breach of contract does not suffice to state a UCL claim in the absence of some additional element that causes Capitol's conduct to be unlawful. Catena cites the Ninth Circuit's decision in *F.B.T. Productions, LLC v. Aftermath Records, 621 F.3d 958 (9th Cir. 2010)*, which addressed a similar dispute and interpreted the parties' contract to mean that "agreements permitting third parties to use its sound recordings to produce and sell permanent downloads and mastertones are licenses," rather than "full price records sold in the United States . . . through normal retail channels." *Id. at 964, 966*. While the decision certainly provides support for Catena's breach of contract claim, *F.B.T. Products, LLC* did not involve a UCL claim of any kind, and addressed a different contract between different parties. Catena therefore cannot rely on it to argue that the contract at issue between *these* parties in *this* case is unlawful.

As a result, Catena's UCL claim for "unlawful" business practices must be **[*34]** dismissed.

c. The "Unfair" Prong

"[A] practice may be deemed unfair even if not specifically proscribed by some other law." *Cel-Tech Communications, 20 Cal.4th at 180*. "To sufficiently plead an action based on an 'unfair' business act or practice, a plaintiff must allege facts showing the 'unfair' nature of the conduct and that the harm caused by the conduct outweighs any benefits that the conduct may have." *Jackson, 2010 U.S. Dist. LEXIS 93524, 2010 WL 3294397 at *5* (citing *Motors, Inc. v. Times Mirror Co., 102 Cal.App.3d 735, 740, 162 Cal. Rptr. 543 (1980))*.

Capitol cites *Cel-Tech* for the proposition that an unfair act is "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech, 20 Cal.4th at 187*. The California Supreme Court specifically noted, however, that the case before it involved competitors alleging anticompetitive practices; it appears clear that the Court did not intend this definition to extend beyond the context of the case, and to apply to other violations of the UCL's "unfair" prong. *Id. at 187 n. 12* ("This case involves an action by a competitor alleging anticompetitive practices. Our discussion and this test are limited to that context. Nothing we say relates to actions by consumers or **[*35]** by competitors alleging other kinds of violations of the unfair competition law such as 'fraudulent' or 'unlawful' business practices or 'unfair, deceptive, untrue or misleading advertising'"). Nonetheless, in the years since *Cel-Tech*, it "has produced confusion among the California appellate courts over whether the clarified definition of 'unfair' is properly applied to consumer cases." *Kilgore v. KeyBank, 712 F.Supp.2d 939, 951 (N.D. Cal. 2010)*, rev'd on other grounds, *673 F.3d 947 (9th Cir. 2012)*; see also *Williamson v. Reinalt-Thomas Corp., No. 5:11—CV—03548—LHK, 2012 U.S. Dist. LEXIS 58639, 2012 WL 1438812, *11-12 (N.D. Cal. Apr. 25, 2012)* (observing that the "question of what constitutes an unfair business practice appears to be unsettled," and surveying conclusions reached by California Courts of Appeal and federal

[41] Opp. at 21.

courts). But see *National Rural Telecommunications Co-op. v. DIRECTV, Inc., 319 F. Supp. 2d 1059, 1075 (C.D. Cal. 2003)* ("The test annunciated in *Cel-Tech*, however, applies only to cases between direct competitors, not all 'commercial' cases").

The court need not resolve this question here, as the complaint contains no allegations that distinguish Catena's claim under the UCL's "unfair" prong from her breach of contract claim. Her opposition does not cite any paragraphs in the complaint that plead the additional required element, stating only that "it is impossible to see how the benefits Capitol received by withholding and under-accounting **[*36]** for royalties due to Plaintiff would outweigh the harm that this underpayment and under-accounting caused Plaintiff."[42] This conclusory assertion is no way explains how why Capitol's conduct was unfair beyond a mere violation of the contract. Catena simply parrots the applicable legal standard without pleading facts that support a conclusion it was violated. As a result, Catena's UCL claim for unfair business practices must be dismissed.

III. CONCLUSION

For the reasons stated, the court grants Capitol's motion to dismiss Catena's UCL claim. The remainder of its motion is denied. Plaintiff may file an amended complaint within twenty (20) days of the date of entry of this order, if she can do so consistent with the reasoning set forth in this order.

HN1[] **Standards of Review, De Novo Standard of Review**

A court reviews the Federal Trade Commission's legal conclusions de novo. The court also reviews the application of the facts to the law de novo. The court's review of the factual findings is governed by *15 U.S.C.S. § 45(c)*, which provides that the findings of the Commission as to the facts, if supported by evidence, shall be conclusive. The statute forbids a court to make its own appraisal of the testimony, picking and choosing for itself among uncertain and conflicting inferences. The court must accept the Commission's findings of fact if they are supported by such relevant evidence as a reasonable mind might accept as adequate to support a conclusion. A court accords deference to the Commission's chosen remedy for violations of the Clayton Act.

Antitrust & Trade Law > Clayton Act > Scope

HN2[] **Market Definition, Relevant Market**

Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, prohibits acquisitions where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or tend to create a monopoly. The United States Congress enacted § 7 to arrest anticompetitive tendencies in their incipiency. The intense congressional concern with economic concentration counseled against requiring elaborate proof of market structure, market behavior, or probable anticompetitive effects. Instead, a merger which produces a firm controlling an undue percentage share of the relevant market, and results in a significant increase in the concentration of firms in that market, is so inherently likely to lessen competition substantially that it must be enjoined in the absence of evidence clearly showing that the merger is not likely to have such anticompetitive effects. This test comported with economic theory because competition is greatest when there are many sellers, none of which has any significant market share. Once the government makes a showing that a firm controls an undue percentage share of the relevant market and the acquisition would cause a significant increase in the concentration, the defendant must produce evidence that shows the market share statistics inaccurately show the probable effect on competition.

Antitrust & Trade Law > Clayton Act > Scope

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

HN3[] **Antitrust & Trade Law, Clayton Act**

Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, is concerned with probabilities, not certainties. Unsuccessful bidders are no less competitors than the successful one.

Antitrust & Trade Law > Clayton Act > Scope

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

HN4[] **Antitrust & Trade Law, Clayton Act**

Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, is intended to arrest the trend toward concentration, the tendency to monopoly, before the consumer's alternatives disappear. In a healthy, growing market, the fact that an acquired company did not win a contract or had never sold in the market is not conclusive.

Antitrust & Trade Law > Clayton Act > Claims

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

HN5[] Clayton Act, Claims

In the context of § 7 of the Clayton Act, *15 U.S.C.S. § 18*, evidence of intent is highly probative because knowledge of intent may help the court to interpret the facts and to predict consequences.

Antitrust & Trade Law > Clayton Act > Scope

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

HN6[] Antitrust & Trade Law, Clayton Act

The acquisition by an already dominant firm of a new or nascent rival can be just as anticompetitive as a merger to monopoly. If the rival has already made its first sale in the monopolist's market, the merger is clearly horizontal. If the rival has not yet made its first sale, the tendency is to call the acquisition a potential competition or non-horizontal merger. But the distinction between actual and potential competition is readily exaggerated. For example, a firm that submits bids against the dominant firm but loses is clearly an actual competitor, perhaps even forcing the dominant firm to lower its bid in the face of a rival bidder. But even the firm that is preparing to make its first bid or its first sale must be counted as an actual rival once the entry decision has been made. Acquisition of such a rival preserves the dominant firm's status, at least until another nascent rival appears on the scene. In most such cases, it is not worthwhile to ascertain the number of rivals or the likelihood or time period in which another nascent rival will appear. The important point is that the acquisition eliminates an important route by which competition could have increased in the immediate future. It thus bears a very strong presumption of illegality that should rarely be defeated.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Mergers & Acquisitions Law > Antitrust > Market Definition

HN7[] Market Definition, Relevant Market

Defining a relevant product market is primarily a process of describing those groups of producers which, because of the similarity of their products, have the ability—actual or potential—to take significant amounts of business away from each other. As such, it is a factual question that an appellate court reviews for clear error. The factors the appellate court looks at are industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. The boundaries of the product market are determined by the reasonable interchangeability of use between the product itself and substitutes for it.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Discretion

HN8[] Remedial Powers, Discretion

The Federal Trade Commission has broad discretion in the formulating of a remedy for unlawful practices.

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Opinion by: ANDERSON

Opinion

[*1210] ANDERSON, Circuit Judge:

Polypore International appeals the Federal Trade Commission's decision finding a violation of § 7 of the Clayton Act and ordering divestiture. The Commission held that Polypore's February 2008 acquisition of Microporous would substantially lessen competition or tend to create a monopoly in relevant markets.

[*1211] I. FACTS AND PROCEDURAL HISTORY

Polypore and the acquired Microporous Products are producers of battery separators. Battery **[**2]** separators are membranes installed between the positive and negative plates in flooded lead-acid batteries to prevent short circuits and to regulate the flow of electrical current between the plates. The manufacturers of these separators make them for different types of batteries and their size and thickness are adjusted accordingly. Different types of batteries also perform better with separators made of different materials.

Polypore, through its Daramic division, primarily manufactured pure polyethylene ("PE") separators for use in automotive and motive batteries. Automotive batteries, also known as starter-lighter-ignition ("SLI") batteries, are used in cars, trucks, buses, boats, and jet skis, while motive batteries are used in mobile industrial machines such as forklifts and mining equipment. Daramic also produced separators for deep-cycle batteries, which are used in equipment that requires a lower amperage over a longer period of time. Daramic had two production plants in the United States and five overseas.

The much smaller Microporous (formerly known as Amerace) manufactured pure rubber battery separators (called Flex-Sil) for use in deep-cycle batteries and a line of rubberized **[**3]** PE-based separators (CellForce) for use in motive batteries. Microporous did not yet actually sell in the SLI battery market although for several years they had been investigating entry into that market. Microporous operated one plant in Piney Flats, Tennessee, and

[*] Honorable Jerome Farris, United States Circuit Judge for the Ninth Circuit, sitting by designation.

constructed one in Feistritz, Austria, which was not yet operational and was intended to serve European customers. Microporous had also purchased equipment for another production line that the parties refer to as the "line in boxes" and which constituted some of the acquired assets.

Microporous's Flex-Sil product was recognized as being the industry standard for deep-cycle batteries. Polypore introduced its Daramic HD product for the deep-cycle market, which is made of latex-coated polyethylene. It is arguably not as effective, and is used in low-end batteries. Despite a higher price, Microporous's Flex-Sil still controlled 90% of the market, while Daramic controlled the remaining 10%. The market shares were the opposite in the motive market, with Daramic owning 90% to Microporous's 10%.

The other company that produces battery separators in the United States is Entek. Entek produces separators for SLI batteries but ceased **[**4]** producing separators for motive batteries. Entek and Daramic alone competed in the SLI market, with Entek controlling 52% of sales to Daramic's 48%. One of the battery producers testified, however, that Daramic and Entek did not behave as competitors. SLI production accounts for three-quarters of all battery separator production. There are numerous other separator producers in Europe and Asia but they do not sell to North American battery makers.

The Commission identified these three battery types[1] as the relevant product markets and North America as the geographic scope of each. Major customers for the battery separators were Johnson Controls ("JCI"), the largest manufacturer of SLI batteries; Exide, the global leader in motive power batteries; Trojan Battery Company, the global leader in deep-cycle batteries and Microporous's largest customer; East Penn Battery; Crown Battery; **[*1212]** EnerSys; Douglas Battery, which makes motive and deep-cycle batteries; and U.S. Battery, which makes deep-cycle batteries.

In the early to mid 2000s, **[**5]** Microporous began testing the waters of the SLI market. One of Daramic's vice presidents, Tucker Roe, testified that its largest customer, JCI, told him that Microporous was bidding on SLI contracts in 2003. Daramic responded to this information by convincing JCI to enter into a long-term supply contract by suggesting that it would cut off supply to JCI's European facilities if JCI declined Daramic's long-term contract. Microporous in fact ran sample SLI separators for JCI in 2003 and 2004, and obtained for its product the status of "qualified" by JCI. For other reasons, however, JCI ultimately entered into a contract with Entek. Microporous began talks in 2007 with Exide about producing SLI separators for Exide's North American and European markets, and the two companies entered into memoranda of understanding in September 2007 and February 2008. Exide tested some of the sample separators that Microporous created, and planned to purchase Microporous separators beginning in 2010. Polypore was concerned about losing East Penn Battery to Microporous after it learned of Microporous's overtures in this area, and the Commission found that Polypore made price concessions in order to retain **[**6]** East Penn's business.

Polypore internal memos reveal that it had developed the "MP Plan," which was a response to competition from Microporous. The MP Plan sought to secure long-term contracts with customers that Polypore thought were in danger of switching to Microporous. Internal memos reveal Polypore's concern about losing business to this "real threat." Polypore's 2008 budget projected that Daramic would lose increasing amounts of business to Microporous and would be forced to reduce prices if it did not acquire Microporous. Indeed, Daramic froze its 2009 prices because of fear about Microporous. One battery producer, EnerSys, used Microporous's prices in the motive market as leverage to bring down Daramic's prices, succeeding in that effort in 2004. Polypore was also concerned that it would lose East Penn's business if it did not act.

The president of Daramic put Microporous on the top of his list of potential acquisitions to "eliminate price competition." The 2008 budget predicted that it could increase the prices of CellForce and Microporous's industrial products if it did acquire Microporous. Microporous was in the process of expanding its production capacity in both North America **[**7]** and Europe, constructing a new plant in Feistritz, Austria, with two PE lines that could produce either motive or SLI battery separators. Its plan was to shift production of its motive battery separators for European

---

[1] The ALJ identified a fourth battery type - the uninterruptible power source("UPS") — but the Commission rejected that finding, and it is not at issue on appeal.

customers to Austria so that it could increase that production for domestic customers in the United States. A March 2005 memo from the Daramic head of sales to the CEO warned that Microporous's plans for expansion into a second line would result in a loss of customers for Daramic. Through the next two years, the threat of Microporous's expansion was the subject of numerous memoranda, and acquisition was discussed as a means to avoid costly competition.

The Commission issued an administrative complaint on September 9, 2008. Specifically relevant to the issues in this appeal, the FTC charged that Polypore's acquisition of Microporous may substantially lessen competition or tend to create a monopoly for several types of battery separators, in violation of § 7 of Clayton Act.[2] After a four-week hearing, the ALJ issued an extensive opinion holding that **[*1213]** the acquisition was reasonably likely to substantially lessen competition in four relevant markets. It ordered the divestiture **[**8]** of all acquired assets, including the plant in Austria. Polypore appealed the decision to the Commission, which issued a comprehensive opinion affirming the decision for three of the relevant markets — SLI, motive, and deep-cycle — but not for the fourth, UPS batteries. Thus, it issued a modified divestiture order. On appeal, Polypore argues that the Commission erred when it employed the Philadelphia National[3] presumption to find that Polypore had illegally merged to a duopoly in the SLI market. It also asserts that the Commission erred when it found one market for both Microporous's and Polypore's deep-cycle battery separators, and that Entek would not enter the motive battery separator market. Finally, Polypore challenges the Commission's inclusion of Microporous's Austrian plant in the divestiture order.

II. STANDARD OF REVIEW

HN1[] We review the Commission's legal conclusions de novo. *Schering-Plough Corp. v. FTC, 402 F.3d 1056, 1063 (11th Cir. 2005)*. We also review the application of the facts to the law de novo. *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 454, 106 S. Ct. 2009, 2016, 90 L. Ed. 2d 445 (1986)*. Our review of the factual findings is governed by *15 U.S.C. § 45(c)*, which provides that "[t]he findings of the Commission as to the facts, if supported by evidence, shall be conclusive." The statute forbids a court to "make its own appraisal of the testimony, picking and choosing for itself among uncertain and conflicting inferences." *FTC v. Algoma Lumber Co., 291 U.S. 67, 73, 54 S. Ct. 315, 318, 78 L. Ed. 655, 18 F.T.C. 669 (1934)*. The court must accept the Commission's findings of fact if they are supported by "such relevant evidence as a reasonable mind might accept as adequate to support a conclusion." *Universal Camera Corp. v. NLRB, 340 U.S. 474, 477, 71 S. Ct. 456, 459, 95 L. Ed. 456 (1951)* (quotation marks omitted). We accord deference to the Commission's **[**10]** chosen remedy for violations of the Act. *Jacob Siegel Co. v. FTC, 327 U.S. 608, 611, 66 S. Ct. 758, 760, 90 L. Ed. 888, 42 F.T.C. 902 (1946)*.

III. DISCUSSION

A. SLI Separators

Polypore argues that the Commission erred when it analyzed the acquisition as a horizontal merger by treating Microporous as an actual competitor in the SLI separator market rather than a potential competitor. By treating Microporous as an actual competitor, Polypore also argues that the Commission improperly relied on the presumption of liability found in Philadelphia National. Polypore argues that the Commission should have used only the potential competition doctrine because Microporous had not entered the SLI market at the time of the acquisition or in the years beforehand.

---

[2] The complaint also charged Polypore with entering into an unlawful joint marketing agreement with Hollingsworth & Vose, in violation of § 5 of the FTC Act, and that Daramic monopolized the alleged relevant markets, in violation of § 5, by executing contracts with large customers that would preclude or deter Microporous from competing effectively. The ALJ found against Polypore on **[**9]** the first count but against complaint counsel on the second. Neither decision was appealed to the Commission.

[3] *United States v. Philadelphia National Bank, 374 U.S. 321, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*.

HN2[] Section 7 of the Clayton Act prohibits acquisitions "where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or tend to create a monopoly." 15 U.S.C. § 18. Congress enacted § 7 to "arrest anticompetitive **[*1214]** tendencies in their 'incipiency.'" United States v. Phila. Nat'l Bank, 374 U.S. 321, 362, 83 S. Ct. 1715, 1741, 10 L. Ed. 2d 915 (1963) (quoting Brown Shoe Co. v. United States, 370 U.S. 294, 317, 322, 82 S. Ct. 1502, 1519-20, 1522, 8 L. Ed. 2d 510 (1962)). **[**11]** In Philadelphia National, the Supreme Court determined that the "intense congressional concern" with economic concentration counseled against requiring "elaborate proof of market structure, market behavior, or probable anticompetitive effects." Id. at 363, 83 S. Ct. at 1741. Instead, the Court stated,

> a merger which produces a firm controlling an undue percentage share of the relevant market, and results in a significant increase in the concentration of firms in that market is so inherently likely to lessen competition substantially that it must be enjoined in the absence of evidence clearly showing that the merger is not likely to have such anticompetitive effects.

Id. This test, it reasoned, comported with economic theory because competition is "greatest when there are many sellers, none of which has any significant market share . . . ." Id. (quotation and citation omitted).[4]

In United States v. El Paso Natural Gas Co., 376 U.S. 651, 84 S. Ct. 1044, 12 L. Ed. 2d 12(1964), the Supreme Court discussed a situation factually similar to the instant case. El Paso involved the acquisition of a gas company that was deemed a threat by one of its competitors, El Paso. A California utility had approached the acquired company, Pacific Northwest, about supplying natural gas, and when they reached a tentative agreement, El Paso responded by lowering its pricing and offering a firm supply of gas — as opposed to the intermittent supply that it had been providing — to the utility. Id. at 655, 84 S. Ct. at 1046. As a result, the tentative agreement with Pacific Northwest was terminated. The Court held that the acquired company was shown to have been a substantial factor in the California market: "Though young, it was prospering and appeared strong enough to warrant a 'treaty' with El Paso that protected El Paso's California markets." Id. at 659, 84 S. Ct. at 1048. The acquired company had not actually sold gas in the market but the Court noted that HN3[] § 7 of the Clayton Act was concerned with probabilities, not certainties. Id. at 658, 84 S. Ct. at 1048. **[**13]** "Unsuccessful bidders are no less competitors than the successful one." Id. at 661, 84 S. Ct. at 1049. As the Court noted, "[w]e would have to wear blinders not to see that the mere efforts of Pacific Northwest to get into the California market, though unsuccessful, had a powerful influence on El Paso's business attitudes." Id. at 659, 84 S. Ct. at 1048. It then emphasized again that HN4[] § 7 was intended to "arrest the trend toward concentration, the tendency to monopoly, before the consumer's alternatives disappeared." Id. at 659, 84 S. Ct. at 1049. In a healthy, growing market, the fact that the acquired company did not win a contract or had never sold in the market was not conclusive. Id. at 660, 84 S. Ct. at 1049.

Like the acquired company in El Paso that was already engaged in the business of selling gas in other markets, Microporous was already making similar separators. It would need only to retool a production line, and it had already purchased a new one that could produce the **[*1215]** SLI separators. It had begun discussions with several companies and had produced a sample product satisfactorily for at least one large customer. It had even submitted quotes and entered into memoranda of **[**14]** understanding with another large customer. Both Polypore and El Paso certainly considered the companies that they acquired to be competitive threats. Both companies lowered their prices and gave other concessions in response to their customers' dealings with the acquired companies. Polypore began to discuss the possibility of acquiring Microporous to eliminate competition and developed the MP Plan to remove Microporous as a competitive threat not only in the deep-cycle market but also in the SLI market. As the Court stated in El Paso, the Clayton Act is about probabilities and not certainties. Polypore clearly viewed Microporous as a serious threat and sought to acquire it to eliminate that threat.

---

[4] Once the Government makes a showing that the firm controls an undue percentage share of the relevant market and the acquisition would cause a significant increase in the concentration, the defendant must produce evidence that shows the market share statistics inaccurately show the probable effect on competition. **[**12]** FTC v. Univ. Health, Inc., 938 F.2d 1206, 1218 (11th Cir. 1991).

We conclude that the facts of the instant case are sufficiently similar to those in El Paso such that it guides our decision in this case. In both cases, the pre-acquisition relevant market was highly concentrated.[5] In both cases, the acquisition ensured a continuation of the high concentration and eliminated the decrease in concentration that would result from the acquired company's entry into the market. In both cases, the pre-acquisition market activity by the acquired company - although **[**15]** resulting in no actual sales — had a substantial, actual pro-competitive effect on the market.[6] In both cases, the perception by the acquiring company of the competitive threat posed by the acquired company provided additional evidence of the acquired company's competitive presence.[7] Indeed, the instant case is stronger for the government than was El Paso in that here, there was additional evidence that Polypore increased SLI prices following the acquisition.

As noted above, in concluding that the acquisition may substantially lessen competition in the SLI market, the Commission applied the Philadelphia National presumption. Polypore's primary challenge to the Commission's application of the presumption is that the Commission erred by treating Microporous as an actual competitor, rather than using the potential competitor analysis. Although we have noted that the instant case seems very close in principle to El Paso, it is true that the Supreme Court in that case did not expressly invoke the presumption, and did not expressly label the acquired company as an actual competitor.[8] However, a later Supreme Court case did so. In *United **[*1216]** States v. Marine Bancorporation, 418 U.S. 602, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974)*, the Court stated that El Paso was an actual competitor case, rather than a potential competitor case. *Id. at 623, 94 S. Ct. at 2871*. Thus, because El Paso was an actual competition case, because it is very **[**17]** close in principle to this case, and because the actual competitor issue is Polypore's primary challenge in this regard,[9] we see no error resulting from the Commission's application of the Philadelphia National presumption to find that Polypore had illegally acquired Microporous, thus substantially lessening competition.[10]

---

[5] El Paso supplied more than 50% of the gas consumed in California and was the only out-of-state provider. Here, Daramic controlled 48% of the SLI market to Entek's 52%, and one battery producer testified that the two did not act as competitors.

[6] In El Paso, Pacific Northwest's dealings with the utility customer caused El Paso to depart from its previous offer of interruptible supply and offer the utility a long-term contract for firm deliveries and at lower prices. In the instant case, Microporous's dealings with East Penn caused Polypore to make price concessions to East Penn. Similarly, Microporous's overture to JCI caused Polypore to seek a longer term contract.

[7] See *Graphic Prods. Distribs., Inc. v. Itek Corp., 717 F.2d 1560, 1573 (11th Cir. 1983)* **[**16]** (***HN5***[] "Evidence of intent is highly probative . . . 'because knowledge of intent may help the court to interpret the facts and to predict consequences.'") (quoting *Chi. Bd. of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 244, 62 L. Ed. 683 (1918))*.

[8] Although El Paso did not use the term actual competitor, that meaning was clear. The court held: "Unsuccessful bidders are no less competitors than the successful one." *376 U.S. at 661, 84 S. Ct. at 1049*. It also noted that the acquired company's efforts to win contracts, "though unsuccessful, had a powerful influence" on El Paso. *Id. at 659, 84 S. Ct. at 1048*. Similarly, Microporous was an unsuccessful bidder, and its efforts had an influence on the market very similar to that in El Paso.

[9] Polypore's only other argument - that the acquisition here did not increase concentration because Microporous had no actual pre-acquisition sales in the market - is foreclosed by El Paso. Moreover, the acquisition here did increase concentration in that it eliminated the pre-acquisition influence on the market exercised by Microporous. And, it eliminated the competition in the **[**18]** market which Polypore itself contemplated in its MP Plan.

[10] Our confidence that Microporous was an actual competitor is amply supported by the Supreme Court decisions in El Paso and Marine Bancorporation. That conclusion, and the applicability of the presumption, is also confirmed by the leading scholar:

> ***HN6***[] The acquisition by an already dominant firm of a new or nascent rival can be just as anticompetitive as a merger to monopoly. If the rival has already made its first sale in the monopolist's market, the merger is clearly "horizontal." If the rival has not yet made its first sale, the tendency is to call the acquisition a "potential competition" or non-horizontal merger. But the distinction between "actual" and "potential" competition is readily exaggerated. For example, a firm that submits bids against the dominant firm but loses is clearly an "actual" competitor, perhaps even forcing the dominant firm to lower its bid in the face of a rival bidder. But even the firm that is preparing to make its first bid or its first sale must be counted as an "actual" rival once the entry decision has been made.

To overcome the Philadelphia National presumption, Polypore would need to show that the merger to duopoly did not have an anticompetitive effect. This it cannot do. The representative for Exide testified that prices for SLI separators are less favorable than those submitted before the acquisition. Specifically, the representative testified that it will "pay more, in the millions of dollars more" than it did before the acquisition. Polypore has not pointed to any evidence that negates this evidence of anticompetitve effect.[11] Thus, we hold that the Commission correctly found that the merger substantially lessened competition and violated § 7 of the Clayton Act.[12]

[*1217] B. Deep-Cycle Separators

Polypore argues that its product and Microporous's product for deep-cycle batteries were not close competitive substitutes and so should not be considered part of the same product market. Polypore cites *United States Anchor Manufacturing, Inc. v. Rule Industries, Inc., 7 F.3d 986, 995-99 (11th Cir. 1993)*, **[**21]** where we held that if customers perceive a significant quality difference between the products, especially where there is a wide disparity in price, the court will treat the products as being in separate markets. Polypore argues that Microporous's pure rubber separators were recognized as being superior in deep-cycle applications and that customers were willing to pay a premium for that superiority. Daramic HD, the Polypore competitor to Microporous's Flex-Sil, was only able to gain a small portion of the deep-cycle market and was used exclusively in low-end batteries. Polypore points to the fact that several of the battery makers had not qualified Daramic HD for use and another exclusively used Microporous's product. Ninety percent of the market was in Microporous's hands and accounted for most of Microporous's sales.

HN7[] "Defining a relevant product market is primarily a process of describing those groups of producers which, because of the similarity of their products, have the ability—actual or potential—to take significant amounts of business away from each other." *U.S. Anchor, 7 F.3d at 995* (quotations and citations omitted). As such, it is a factual question that we review for clear **[**22]** error. *United States v. Engelhard Corp., 126 F.3d 1302, 1305 (11th Cir. 1997)*. In U.S. Anchor, we looked at the factors set forth in *Brown Shoe Co. v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*:

> industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors . . . .

U.S. Anchor, 7 F.3d at 995 (quoting *Brown Shoe, 370 U.S. at 325, 82 S. Ct. at 1523*). "The boundaries of the product market are determined by 'the reasonable interchangeability of use . . . between the product itself and substitutes for it.'"*Engelhard, 126 F.3d at 1305* (quoting *Brown Shoe, 370 U.S. at 325, 82 S. Ct. at 1523-24*).

> Acquisition of such a rival preserves the dominant firm's status, at least until another **[**19]** nascent rival appears on the scene. In most such cases, we do not believe it is worthwhile to ascertain the number of rivals or the likelihood or time period in which another nascent rival will appear. The important point is that the acquisition eliminates an important route by which competition could have increased in the immediate future. It thus bears a very strong presumption of illegality that should rarely be defeated.

4 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 912a (3d ed. 2006).

[11] Our careful review of the **[**20]** record persuades us that the several challenges to the Commission's findings of fact are wholly without merit - e.g., with respect to whether Microporous's dealings with JCI, Exide, and East Penn involved the SLI market; with respect to whether Microporous's board of directors was on board with the expansion plans of management; with respect to the imminent capability of Microporous to supply the SLI market; and with respect to whether before acquisition, Polypore did in fact act in procompetitive ways (in the SLI market as well as the other two markets) in response to Microporous's dealings in the market.

[12] Because we conclude that this case is guided by El Paso, and because the Commission properly applied the *Philadelphia National* presumption, we do not reach the Commission's alternative holding that the acquisition violated § 7 based on the potential competitor doctrine.

Here, the Commission based its finding on the switch of several battery producers from Flex-Sil to Daramic HD. Daramic HD increased its share of the market, at Flex-Sil's expense, from 3.8% in 2005 to 10.6% in 2007. The Commission specifically cited the switch by U.S. Battery and Exide, with the latter using both Flex-Sil and Daramic HD in its golf cart batteries, which make up 80% of its sales. Significantly, **[**23]** the Commission also pointed to the successful threat by three companies to switch to Daramic HD to avoid a price increase by Microporous. If the two brands were not interchangeable, the threat would not have been successful. There is also evidence that Microporous considered the two competitors: in its own pre-acquisition assessment of its value to Polypore, Microporous noted that Polypore would gain complete control of the deep-cycle separator market if the acquisition occurred.

There is ample evidence to support the Commission's finding that there was only one market for deep-cycle battery separators. **[*1218]** Several of the battery producers used both products in their deep-cycle batteries and used the presence of Daramic HD to bring down Microporous's prices. While the industry recognized that Flex-Sil, being a pure rubber separator, was superior, it was willing to substitute Daramic HD when it could in order to keep prices lower. Thus, although there were distinct prices, there were not distinct customers. The products were used for slightly different purposes — i.e., Flex-Sil was used in higher end batteries than Daramic HD — but both were used in deep-cycle applications and both were **[**24]** made in the same type of production facilities. Thus, under the *Brown Shoe* factors, we conclude that the Commission did not err when it found that there existed only one market.

C. Motive Separators

Polypore argues that the Commission erred in holding that Polypore had not shown that Entek would enter the motive battery market and counteract the anticompetitive effects of the merger to monopoly in that market. It points out that motive battery separators are made from PE, the same substance used in SLI separators. The only difference between the two types of separators is that motive separators are generally larger and thicker. Accordingly, the only difference in the production lines is larger rollers, which are easily switched out in a matter of hours. Additionally, Polypore highlights the fact that Entek produced motive separators in the 1990s, and expressed interest in resuming that role in 2006 when Daramic had a strike.

The Commission did not err when it held that Polypore had not shown that Entek was a participant in the motive battery market or that it had plans to enter it. Although Entek was approached by both Exide and EnerSys, it failed to follow through with those overtures. **[**25]** As of the time of the trial, in June 2009, Entek had not even run any material for Exide. EnerSys repeatedly made overtures to Entek, only to have it finally respond with an unsatisfactory quote. Polypore has not pointed to any evidence that rebuts these findings.

D. Divestiture

Conceding that the Commission enjoys broad authority to craft a remedy, Polypore argues that the divestiture order was too extensive because it included Microporous's Austrian plant. The Commission's authority, it argues, must relate logically to the harms identified by the Commission and the specific markets at issue. Polypore notes that the Commission specifically limited the relevant markets to North America and held that battery separator producers outside of North America did not compete here. The Commission stated that its rationale for including the Austrian plant was to allow the acquiring company to maintain sufficient capacity at the Tennessee plant to compete effectively in North America. But, Polypore asserts, the Commission had already determined that Microporous was an effective and important competitor for North American customers from its Tennessee plant alone. Additionally, Polypore posits, the **[**26]** evidence showed that there was excess production capacity at the Tennessee plant. Finally, Polypore argues that the Commission did not explain why an Asian or European separator manufacturer would not be fully satisfied with just the North American facility, which would satisfy its need for a foothold in North America.

HN8[] The Commission has broad discretion in the formulating of a remedy for unlawful practices. *Jacob Siegel Co. v. FTC, 327 U.S. 608, 611, 66 S. Ct. 758, 760, 90 L. Ed. 888, 42 F.T.C. 902 (1946)*. Here, the Commission

[*1219] did not abuse its discretion when it ordered the divestiture of the Austrian plant. The Commission reasoned that the Austrian plant needed to be divested to restore the competition eliminated by the acquisition and provide the acquirer with the ability to compete. *Ford Motor Co. v. United States, 405 U.S. 562, 573, 92 S. Ct. 1142, 1149, 31 L. Ed. 2d 492 (1972)* (***HN9***[] "The relief in an antitrust case must be 'effective to redress the violations' and 'to restore competition.'") (quoting *United States v. E. I. Du Pont De Nemours & Co., 366 U.S. 316, 326, 81 S. Ct. 1243, 1250, 6 L. Ed. 2d 318 (1961))*. It found that when Microporous produced CellForce for its foreign customers at its Tennessee plant, capacity constraints limited its **[**27]** ability to compete for additional North American business. However, once the Feistritz plant was constructed, Microporous was able to commit to additional North American sales to customers. Additionally, the Commission reasoned that multiple plants provide insurance against supply disruptions and provide the ability to supply local customers, which in turn made Microporous a more effective competitor. These are all reasonable considerations such that we will not disturb the order.[13]

IV. CONCLUSION

For the reasons stated above, we conclude that the Commission is due to be affirmed. The **[**28]** Commission did not err when it treated the acquisition as a horizontal merger, found that there was a single market for deep-cycle separators, determined that Entek would not enter the motive market, and included Microporous's Austrian plant in its divestiture order.

AFFIRMED.

End of Document

---

[13] Polypore argues in its reply brief that the divestiture order should have contained a "safety valve," like that found in *Chicago Bridge & Iron Co. v. FTC, 534 F.3d 410 (5th Cir. 2008)*, which permitted the exclusion of certain assets in the divestiture order if the acquirer and the monitor trustee both found them unnecessary. However, Polypore neither raised this issue before the Commission nor in its initial brief so the issue is waived. See *Norelus v. Denny's, Inc., 628 F.3d 1270, 1297 (11th Cir. 2010)* (initial brief); *Cotherman v. FTC, 417 F.2d 587, 591-92 (5th Cir. 1969)* (exhaustion before the FTC).

Civil Procedure > ... > Justiciability > Standing > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN3[] **Standards of Review, Clearly Erroneous Review**

Standing is a question of law for a district court to decide. The ultimate responsibility to ensure subject matter jurisdiction always lies with the court, not the parties. Because the court, and not a jury, decides standing, a district court must decide issues of fact necessary to make the standing determination. The fact-finding of a district court to support or deny standing is subject to review under the clearly erroneous standard. Where an appellate court cannot say its is left with the definite and firm conviction that a finding by the trial court is clearly erroneous; the appellate court is bound to accept it.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN4[] **Entitlement as Matter of Law, Appropriateness**

When standing is challenged on summary judgment, a court shall not grant summary judgment if the movant shows that there is a genuine dispute as to any material fact. Fed. R. Civ. P. 56(a). Each element of standing must be supported in the same way as any other matter on which the plaintiff bears the burden of proof, that is, with the manner and degree of evidence required at the successive stages of the litigation. Therefore, if there is a genuine issue of material fact, then summary judgment is inappropriate without the district court resolving the factual dispute.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN5[] **Standards of Review, De Novo Review**

When a district court determines standing on summary judgment, appellate courts must determine de novo, viewing the evidence in the light most favorable to the nonmoving party, whether there are any genuine issues of material fact and whether the district court correctly applied the relevant substantive law.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

HN6[] **Entitlement as Matter of Law, Appropriateness**

In the absence of genuine issues of material fact, appellate courts may affirm a district court's summary judgment on any ground supported by the record, regardless of whether the district court relied upon, rejected, or even considered that ground, if the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Governments > Legislation > Interpretation

HN7[] **Standing, Clayton Act**

Under § 4 of the Clayton Act, any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee. *15 U.S.C.S. § 15(a)*. However, the U.S. Supreme Court has interpreted that section narrowly, thereby constraining the class of parties that have statutory standing to recover damages through antitrust suits.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN8[] **Standing, Clayton Act**

The U.S. Supreme Court has held that a direct purchaser has been injured in its business as required by § 4 of the Clayton Act, *15 U.S.C.S. § 15(a)*, even though it passes on claimed illegal overcharges to its customers. The Supreme Court has also held that § 4 of the Clayton Act does not permit offensive use of a pass-on theory against an alleged violator that could not use the same theory as a defense in an action by direct purchasers. In other words, indirect purchasers may not use a pass-on theory to recover damages and thus have no standing to sue. This rule--the Illinois Brick rule--that indirect purchasers suffer no injury under § 4, was reaffirmed in Kansas v.

UtiliCorp United. In sum, a bright line rule emerged from Illinois Brick: only direct purchasers have standing under § 4 of the Clayton Act to seek damages for antitrust violations.

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN9[] **Standing, Clayton Act**

The U.S. Supreme Court's firm rule in Illinois Brick does not provide courts the leeway to make a policy determination on a case-by-case basis as to whether standing should be recognized when there are special business arrangements.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN10[] **Standing, Clayton Act**

While the U.S. Supreme Court has expressed reluctance in carving out exceptions to the Illinois Brick rule, limited exceptions do exist. First, the Supreme Court recognized standing for indirect purchasers when a preexisting cost-plus contract with the direct purchaser exists. Second, indirect purchasers may have standing under a coconspirator exception. An indirect purchaser may bring suit where he establishes a price-fixing conspiracy between the manufacturer and the middleman. However, for the indirect purchaser to merit standing under this exception, the conspiracy must fix the price paid by the plaintiffs. Third, indirect purchasers may sue when customers of the direct purchaser own or control the direct purchaser, or when a conspiring seller owns or controls the direct purchaser. For example, an indirect purchaser may sue if the direct purchaser is a division or subsidiary of the price-fixing seller. There may be a fourth exception, that indirect purchasers can sue for damages if there is no realistic possibility that the direct purchaser will sue, relying on the seller's control of the direct purchaser.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN11[] **Standing, Clayton Act**

The coconspirator exception to the Illinois Brick rule allows an indirect purchaser to sue when coconspirators set the price paid by the plaintiff. Illinois Brick does not limit suits by consumers against a manufacturer who illegally contracted with its dealers to set the latter's resale price. The consumer plaintiff is a direct purchaser from the dealer who has conspired illegally with the manufacturer with respect to the very price paid by the consumer.

HN12[] **Standing, Clayton Act**

The exception to the Illinois Brick rule in Shamrock Foods as applying when the direct purchaser conspires horizontally or vertically to fix the price paid by the plaintiffs. This coconspirator exception is not really an exception at all. Whether one adopts a coconspirator exception or regards this situation as outside Illinois Brick's domain, there is no tracing or apportionment to be done. If the direct purchaser conspires to fix the price paid by the plaintiffs, then the plaintiffs pay the fixed price directly and are not indirect purchasers, that this, there is no pass-on theory involved.

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

HN19[] **Standing, Clayton Act**

Fixing one fee for the purpose and effect of inflating another fee does not make the purchaser a direct purchaser under Illinois Brick.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN20[] **Standing, Clayton Act**

Royal Printing allows indirect purchasers to sue where a direct purchaser is a division or subsidiary of a coconspirator. Royal Printing created an exception to the Illinois Brick rule when parental control existed, because applying Illinois Brick would eliminate the threat of private enforcement, and close off every avenue for private enforcement. The coconspirator parent will forbid its subsidiary or division to bring a lawsuit that would only reveal the parents own participation in the conspiracy.

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN21[] **Standing, Clayton Act**

Freeman enunciates the coconspirator exception to the Illinois Brick rule as follows: Indirect purchasers can sue for damages if there is no realistic possibility that the direct purchaser will sue its supplier over the antitrust violation.

Freeman outlines that, whether a realistic possibility of suit exists, depends on the existence of ownership or control between the direct purchaser and the seller.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

HN22[] **Standing, Clayton Act**

The U.S. Court of Appeals for the Ninth Circuit declines to extend the exception to the Illinois Brick rule noted in Royal Printing and Freeman to situations where the seller does not own or control the direct purchasers, because, after Royal Printing, the U.S. Supreme Court stated that the possibility of allowing an exception, even in rather meritorious circumstances, would undermine the rule.

Governments > Legislation > Interpretation

HN23[] **Legislation, Interpretation**

Where the applicable statute does not define control, courts construe it in its ordinary, contemporary, and common meaning. Control means to exercise restraint or direction over; dominate, regulate, or command, or to have the power or authority to guide or manage.

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Controlling Shareholders > Fiduciary Duties

HN24[] **Controlling Shareholders, Fiduciary Duties**

In finding that a fiduciary duty exists, a shareholder must have control of the affairs of the corporation, which does not exist unless the shareholder owns a majority of the stock or has actual control over the corporation's conduct.

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Controlling Shareholders > General Overview

Evidence > Burdens of Proof > Allocation

HN25[] **Shareholder Duties & Liabilities, Controlling Shareholders**

A plaintiff who alleges domination of a board of directors and/or control of its affairs must prove it. Stock ownership alone, at least when it amounts to less than a majority, is not sufficient proof of domination or control.

Business & Corporate Law > ... > Directors & Officers > Scope of Authority > General Overview

Judges: Before: Carlos F. Lucero,* Consuelo M. Callahan, and N. Randy Smith, Circuit Judges. Opinion by Judge N.R. Smith.

Opinion by: N.R. Smith

Opinion

[*744] N.R. SMITH, Circuit Judge:

Plaintiffs-Appellants (Plaintiffs) are automated teller machine (ATM) cardholders, who allege horizontal price fixing of fees paid to the ATM owners by the banks (issuing the ATM cards to the cardholders) when cardholders retrieve cash from an ATM not owned by their bank. Plaintiffs do not directly pay the allegedly fixed fee; therefore, as indirect purchasers, Supreme Court precedent prohibits Plaintiffs from bringing this suit. *See Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Further, Plaintiffs do not qualify for the narrow exceptions to the *Illinois Brick* rule, because **[**3]** (1) they do not allege a conspiracy to fix the price paid by the Plaintiffs and (2) the banks are not controlled by each other or by the ATM network. Therefore, Plaintiffs do not have standing under *§ 4 of the Clayton Act* to proceed with their *§ 1 Sherman Act* suit. We thus affirm the district court's summary judgment dismissal of this suit for lack of antitrust standing.

We limit our discussion in this opinion to the issues relevant to standing. Because Plaintiffs lack antitrust standing, we do not address Plaintiffs' appeal regarding the district court's (1) determination that the rule of reason, and not the per se rule, applies here; (2) rejection of the single-brand, derivative aftermarket alleged in the complaint; and

* The Honorable Carlos F. Lucero, Circuit Judge for the Tenth Circuit, sitting by designation.

(3) determination that Plaintiffs' claim against Bank of America, N.A., did not relate back to the filing of the original complaint under *Rule 15(c) of the Federal Rules of Civil Procedure*.

I. BACKGROUND

A. Facts

A "foreign ATM transaction" occurs when ATM cardholders withdraw money from their bank account using an ATM not owned by their bank (which issued them **[*745]** the card). Such foreign ATM transactions involve four parties: (1) the cardholder, i.e., the person using the **[**4]** ATM to retrieve money from his or her bank account; (2) the card-issuing bank, i.e., the bank at which the cardholder holds an account and who issues the cardholder an ATM card; (3) the ATM owner, i.e., the entity that owns the machine used by the cardholder; and (4) the ATM network, i.e., the entity that connects the ATM owners with card-issuing banks. Of all these parties, the ATM network plays a particularly important role in this fact situation. The network administers agreements between card-issuing banks and ATM owners to ensure that customers can withdraw money from network member ATMs.

Foreign ATM transactions generate four fees. The cardholder must pay two of these fees—one to the ATM owner for use of the ATM (known as a "surcharge") and one to the card-issuing bank (known as a "foreign ATM fee"). The card-issuing bank also pays two of these fees—one to the ATM network that routed the transaction (known as a "switch fee") and one to the ATM owner (known as an "interchange fee"). At issue in this case are the interchange fee and the foreign ATM fee. The ATM network (not the card-issuing bank nor the ATM owners) establishes the interchange fee. Individual card-issuing banks set **[**5]** their own foreign ATM fees.

The STAR Network (STAR) is the ATM network at issue in this case. STAR has thousands of members who collectively own hundreds of thousands of ATMs nationwide. These members can be roughly divided into three groups. The first group includes so-called Independent Service Organizations ("ISOs"). ISOs own ATMs, but they are not banks and do not issue ATM cards (e.g., grocery stores or gas stations). The second group consists of financial institutions that accept deposits and issue ATM cards, but do not own any ATMs (e.g., credit unions or internet banks). The third and largest STAR member group includes financial institutions that both issue ATM cards and own ATMs. The defendant banks (or Bank Defendants) named in this case, which include all defendants except for Concord EFS, Inc. (Concord) and First Data Corporation, fit into this category. Until February 1, 2001, STAR was a member-owned network. As a member-owned network, member banks (including Bank Defendants), controlled STAR and set the interchange fees paid by the members. On February 1, 2001, Defendant-Appellee Concord, a publicly traded Delaware corporation, acquired STAR. After the acquisition by Concord, **[**6]** Bank Defendants lacked control of STAR based on ownership and board member appointment, because Concord was not owned by the member banks of STAR.

Some Bank Defendants were concerned about the acquisition by Concord, because Concord was not owned by the member banks and thus Bank Defendants would likely lose influence over policies and pricing decisions (such as interchange fees). To moderate this concern, before the acquisition STAR revised its agreement with its members to include language that indicated that it would not change fees arbitrarily and that it would consider the interests of its members before implementing any changes. Additionally, to allegedly quell the reluctance by the Bank Defendants, Concord agreed to retain the pre-acquisition Chief Executive Officer of STAR (who has no formal affiliation with the Bank Defendants) to run the new network and agreed to elect him to Concord's board of directors to give a voice to the Bank Defendants. Concord also agreed to establish a Network Advisory Board (comprised of the larger member banks including Bank Defendants) to advise Concord **[*746]** concerning the interests of the large financial institutions. The Network Advisory Board would **[**7]** provide input to Concord's board as to policy and pricing decisions, but had no authority to determine or veto interchange fee changes.

In February 2004, First Data Corporation (another Delaware corporation) acquired Concord. As such, after February 2004, First Data owned and operated STAR.[1]

B. Procedural History

On July 2, 2004, Plaintiffs filed suit. On behalf of themselves and all those similarly situated, Plaintiffs alleged that Defendants engaged in horizontal price fixing, a per se violation of *§ 1 of the Sherman Act*. They alleged that Defendants colluded to fix the STAR interchange fee, which is then passed on to Plaintiffs as part of the foreign ATM fee. Plaintiffs sought damages dating back to July 2, 2000.

Defendants filed a motion to dismiss arguing that Plaintiffs, as indirect purchasers, lacked standing to allege an antitrust violation pursuant to *Illinois Brick. In re ATM Fee Antitrust Litig., 768 F. Supp. 2d 984, 990 (N.D. Cal. 2009)*. On September 4, 2009, the district court denied the motion to dismiss. *Id. at 994*. **[**8]** Accepting all of Plaintiffs' allegations as true and construing the pleadings in the light most favorable to Plaintiffs, the district court found that Plaintiffs' suit could not be dismissed for lack of standing. *Id. at 992-94*. The court found that there was no realistic possibility that the Bank Defendants would sue STAR and that Plaintiffs alleged that they were "purchasing directly from the price-fixing conspirators . . . ." *Id. at 992*. On October 19, 2009, Plaintiffs filed their third amended complaint.

Subsequently, "Defendants . . . moved for summary judgment, [again] arguing that the *Illinois Brick* rule barring indirect purchasers from recovering monetary damages in an antitrust suit applies here and precludes Plaintiffs from seeking such damages.", *No. C 04-02676 CRB, 2010 U.S. Dist. LEXIS 97009, 2010 WL 3701912, at *4 (N.D. Cal. Sep. 16, 2010)*. On September 16, 2010, the district court granted Defendants' motion for summary judgment and dismissed Plaintiffs' claim on the ground that Plaintiffs lack standing under *Illinois Brick's* direct purchaser rule. *2010 U.S. Dist. LEXIS 97009, [WL] at *11*. Finding no genuine issue of material fact, the district court found Plaintiffs to be indirect purchasers. *2010 U.S. Dist. LEXIS 97009, [WL] at *12*. Plaintiffs did not directly **[**9]** pay the alleged fixed interchange fees—labeled by the district court as the alleged "unlawful fee." *2010 U.S. Dist. LEXIS 97009, [WL] at *5*.

> Critically, Plaintiffs do *not* allege that Defendants have conspired to illegally fix the foreign ATM fee that Plaintiffs pay to their bank when they use a foreign ATM. . . . Importantly, Plaintiffs do not allege that the Defendants or any other banks have conspired to fix the foreign ATM fee that Plaintiffs must pay. . . . Instead, Plaintiffs assert that their banks pay an unlawfully inflated interchange fee and then pass the cost of the artificially high interchange fee along to them through foreign ATM fees. . . . Plaintiffs . . . do not pay this allegedly unlawful fee directly (their banks do) and therefore are not directly harmed by it. . . . Plaintiffs do not dispute that they pay the purportedly unlawful interchange fee only indirectly. . . . Plaintiffs therefore acknowledge that they are only indirect payers of the interchange fee and that the banks are the direct payers. . . . Given that Plaintiffs **[*747]** are not "direct purchasers" of the unlawful fee, their damages claims are barred by the *Illinois Brick* rule, unless an exception to the rule applies.

*2010 U.S. Dist. LEXIS 97009, [WL] at *2, *3, *5*. The **[**10]** district court found no exception applicable.[2] *2010 U.S. Dist. LEXIS 97009, [WL] at *5-10*. The district court filed a final judgment against Plaintiffs on September 17, 2010. A timely appeal followed.

---

[1] For simplicity, throughout the rest of the opinion we refer to Concord as the owner and operator of STAR even though First Data took over that role in 2004.

[2] Notably, "Plaintiffs argue[d] that there is 'no realistic possibility' that the direct purchasers of interchange fees—i.e., the card-issuing banks—would file a lawsuit challenging the unlawful fixing of those fees, for several reasons." *2010 U.S. Dist. LEXIS 97009, [WL] at *7*. The district court rejected the argument, "because it ignores the critical fact that the overwhelming majority of ATM card-issuing banks pay more in interchange fees than they receive." *Id*. In other words, they are net payers. *Id*. "Because they pay more in interchange fees than they receive, the higher the interchange fee, the higher their costs. Thus, there is a very

II. JURISDICTION AND STANDARD OF REVIEW

HN1[] Federal district courts have jurisdiction over "questions **[**11]** alleging the violation of federal laws pursuant to *28 U.S.C. § 1331*." *Del. Valley Surgical Supply Inc. v. Johnson & Johnson, 523 F.3d 1116, 1119 (9th Cir. 2008)*.**HN2**[] We have jurisdiction over appeals from final decisions of district courts. *28 U.S.C. § 1291*.

HN3[] Standing is a question of law for the district court to decide. *See Warth v. Seldin, 422 U.S. 490, 498-99, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)*; *Del. Valley, 523 F.3d at 1119*; *see also Haase v. Sessions, 835 F.2d 902, 904, 266 U.S. App. D.C. 325 (D.C. Cir. 1987)* ("[T]he ultimate responsibility to ensure subject matter jurisdiction always lies with the court, not the parties."). Because the court (and not a jury) decides standing, the district court must decide issues of fact necessary to make the standing determination. *See Duke Power Co. v. Carolina Envtl. Study Group, Inc., 438 U.S. 59, 72, 98 S. Ct. 2620, 57 L. Ed. 2d 595 (1978)* (district court held four days of hearings to decide motion to dismiss for want of standing). "The fact-finding of the [district] court to support or deny standing is subject to review under the clearly erroneous standard." *Haase, 835 F.2d at 907* (citing *Duke Power, 438 U.S. at 77* ("[W]e cannot say we are left with 'the definite and firm conviction that' the finding by the trial court . . . is **[**12]** clearly erroneous; and, hence, we are bound to accept it." (citation omitted))). However, **HN4**[] when standing is challenged on summary judgment, "[t]he court shall [not] grant summary judgment if the movant shows that there is [a] genuine dispute as to any material fact . . . ." *Fed. R. Civ. P. 56(a)*; *see also Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)* ("[E]ach element [of standing] must be supported in the same way as any other matter on which the plaintiff bears the burden of proof, i.e., with the manner and degree of evidence required at the successive stages of the litigation."). Therefore, if there is a genuine issue of material fact, then summary judgment is inappropriate without the district court resolving the factual dispute. *See Bischoff v. Osceola Cnty., Fla., 222 F.3d 874, 878-80 (11th Cir. 2000)*; *see also Haase, 835 F.2d at 907, 910*. "Several [other] circuits explicitly prohibit district courts from resolving disputed factual questions or making credibility determinations essential to the question of standing on the basis of affidavits alone." Harry T. Edwards & Linda A. Elliott, *Federal Standards of Review* **[*748]** Ch. III.A (2007) (citing *Bischoff, 222 F.3d at 880-81* **[**13]** (following First and Fifth Circuit cases)). We need not decide whether the district court must conduct additional evidentiary inquiries or the necessary extent of those inquires when resolving issues of material fact at the summary judgment stage, because our holding confronts no genuine issue of material fact and does not rely on factual findings of the district court.

HN5[] When a district court determines standing on summary judgment (as is the case here), "[w]e must determine [de novo], viewing the evidence in the light most favorable to the nonmoving party, whether there are any genuine issues of material fact and whether the district court correctly applied the relevant substantive law." *Del. Valley, 523 F.3d at 1119*. **HN6**[] In the absence of genuine issues of material fact, we may affirm the district court's summary judgment "on any ground supported by the record, regardless of whether the district court relied upon, rejected, or even considered that ground," *Kling v. Hallmark Cards Inc., 225 F.3d 1030, 1039 (9th Cir. 2000)*, if "the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*.

III. DISCUSSION

HN7[] Under *§ 4 of the Clayton Act*, "any person who shall be injured in his **[**14]** business or property by reason of anything forbidden in the antitrust laws may sue . . . and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." *15 U.S.C. § 15(a)*. However, "[t]he Supreme Court has interpreted that section narrowly, thereby constraining the class of parties that have statutory standing to recover damages through antitrust suits." *Del. Valley, 523 F.3d at 1119* (citing *Illinois Brick, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707*).

---

realistic possibility that these entities (or some subset of them) would file suit to challenge the fixing of interchange fees at artificially high rates." *2010 U.S. Dist. LEXIS 97009, [WL] at *8*. In the end, the district court concluded that "card-issuing banks are better-off if interchange fees are eliminated," and so they have incentive to sue. *Id*.

HN8[] The Supreme Court has held that a direct purchaser has "been injured in its business as required by *[§] 4*" even though it passes on "claimed illegal overcharge[s] to" its customers. *Illinois Brick, 431 U.S. at 724* (discussing *Hanover Shoe, Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968))*. Thus, defendants may not use a pass-on theory to challenge the standing of direct purchasers. However, the Supreme Court has also held that *§ 4 of the Clayton Act* does not "permit offensive use of a pass-on theory against an alleged violator that could not use the same theory as a defense in an action by direct purchasers." *Id. at 735*. In other words, indirect purchasers may not use a pass-on theory to recover damages and **[**15]** thus have no standing to sue. *Id. at 745-46*. This rule (the *Illinois Brick* rule), that indirect purchasers suffer no injury under *§ 4*, was reaffirmed in *Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 207, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)*. "In sum, a bright line rule emerged from *Illinois Brick*: only direct purchasers have standing under *§ 4 of the Clayton Act* to seek damages for antitrust violations." *Del. Valley, 523 F.3d at 1120-21*.

The underlying purposes for the rule are (1) "to eliminate the complications of apportioning overcharges between direct and indirect purchasers," *UtiliCorp, 497 U.S. at 208*; (2) "to eliminate multiple recoveries," *id. at 212*; and (3) to "promote the vigorous enforcement of the antitrust laws," *id. at 214*. However, the Supreme Court has stated that, while "[t]he rationales underlying . . . *Illinois Brick* will not apply with equal force in all cases[, w]e nonetheless believe that ample justification exists for our stated decision not to 'carve out exceptions to the [direct purchaser] **[*749]** rule for particular types of markets.'" *Id. at 216* (second alteration in original) (quoting *Illinois Brick, 431 U.S. at 744*). "[E]ven assuming that any economic assumptions underlying the *Illinois Brick* **[**16]** rule might be disproved in a specific case, we think it an unwarranted and counterproductive exercise to litigate a series of exceptions." *Id. at 217*; *see also* *Del. Valley, 523 F.3d at 1124* (*HN9*[] "The Court's firm rule does not provide us the leeway to make a policy determination on a case-by-case basis as to whether standing should be recognized when there are special business arrangements.").

HN10[] While the Supreme Court has expressed reluctance in carving out exceptions to the *Illinois Brick* rule, limited exceptions do exist. First, the Supreme Court recognized standing for indirect purchasers when a preexisting cost-plus contract with the direct purchaser exists. *Illinois Brick, 431 U.S. at 736*; *Utilicorp, 497 U.S. at 217-18*. Second, indirect purchasers may have standing under a "co-conspirator" exception. 2A Phillip E. Areeda et al., ***Antitrust Law*** ¶ 346h (3d ed. 2007). The court explained this exception, stating that "an indirect purchaser may bring suit where he establishes a price-fixing conspiracy between the manufacturer and the middleman." *Del. Valley, 523 F.3d at 1123 n.1* (citing *Arizona v. Shamrock Foods, Co., 729 F.2d 1208, 1211 (9th Cir. 1984))*. However, for the indirect purchaser **[**17]** to merit standing under this exception, the conspiracy must fix the price paid by the plaintiffs. *Shamrock Foods, 729 F.2d at 1211*. Third, indirect purchasers may sue when customers of the direct purchaser own or control the direct purchaser, *Illinois Brick, 431 U.S. at 736 n.16*, or when a conspiring seller owns or controls the direct purchaser, *Royal Printing Co. v. Kimberly Clark Corp., 621 F.2d 323, 326 (9th Cir. 1990)*. For example, an indirect purchaser may sue if the direct purchaser is a division or subsidiary of the price-fixing seller. *Id*. In *Freeman*, our court may have outlined a fourth exception, that "indirect purchasers can sue for damages if there is no realistic possibility that the direct purchaser will sue," relying on the seller's control of the direct purchaser. *Freeman, 322 F.3d at 1145-46* (citing *Royal Printing Co., 621 F.2d at 326*). However, whether there is such an exception is unclear, because we held that standing existed in *Freeman* based on the control or co-conspirator exceptions.[3] *See id*.

In this case, the parties argue over the contours of these exceptions. But after review, none of the exceptions allow Plaintiffs to avoid "run[ning] squarely into the *Illinois Brick* wall." *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1049 (9th Cir. 2008)*.

A. Indirect Purchasers

---

[3] "[T]he exception that [*Freeman*] purported to recognize is not yet one acknowledged by the Supreme Court, which has thus far been indifferent to the question whether the **[**18]** direct purchaser is likely to sue. What the [Ninth Circuit] was really describing was a 'control' or perhaps a 'co-conspirator' exception." 2A Phillip E. Areeda et al., ***Antitrust Law*** ¶ 346f (3d ed. 2007).

Plaintiffs argue that they should be considered as direct purchasers or fit within the co-conspirator exception, because the foreign ATM fee they have paid is an illegally fixed fee as defined by ***antitrust law***.[4] However, Plaintiffs concede **[*750]** that they have never directly paid interchange fees. Instead, card-issuing banks (including Bank Defendants) pay interchange fees and then include them when they charge foreign ATM fees (alleged by Plaintiffs to be artificially inflated). In other words, the Bank Defendants pass on the cost of the interchange fees through the foreign ATM fees. The district court found Plaintiffs to be indirect purchasers, because they do not directly pay the fixed interchange fee, labeled by **[**19]** the district court as the alleged "unlawful fee." *In re ATM Fee Antitrust Litig., 2010 U.S. Dist. LEXIS 97009, 2010 WL 3701912, at *5*. The district court found it important that "Plaintiffs do not allege that the Defendants or any other banks have conspired to fix the foreign ATM fee that the Plaintiffs must pay." *2010 U.S. Dist. LEXIS 97009, [WL] at *2*. We agree with the district court that Plaintiffs are indirect purchasers.

B. Exceptions to *Illinois Brick*

1. No Preexisting Cost-Plus Contract

Plaintiffs do not contend that they had a preexisting cost-plus contract with Defendants. Therefore, this exception, allowing indirect purchasers to sue when they have a preexisting cost-plus contract with the direct purchaser, *Illinois Brick, 431 U.S. at 736*; *Utilicorp, 497 U.S. at 217-18*, does not apply here.

2. Co-Conspirator Exception and the Price "Fixed"

HN11[] This co-conspirator exception allows an indirect purchaser to sue when co-conspirators set the price paid by the plaintiff. 2A Phillip E. Areeda et al., ***Antitrust Law*** ¶ 346h ("*Illinois Brick* does not limit suits by consumers **[**20]** against a manufacturer who illegally contracted with its dealers to set the latter's resale price. The consumer plaintiff is a direct purchaser from the dealer who . . . has conspired illegally with the manufacturer with respect to the very price paid by the consumer." (footnote omitted)).

Specifically, our circuit has outlined ***HN12***[] this exception in *Shamrock Foods* as applying when the direct purchaser conspires horizontally or vertically to fix the price paid by the plaintiffs. *729 F.2d at 1211*. In *Shamrock Foods*, consumers alleged that retail grocery stores conspired with dairy producers, who also sold directly to consumers, to fix the retail prices of dairy products. *Id. Illinois Brick* did not apply, because "the retail price was the one fixed," and thus, the "theory of recovery d[id] not depend on pass-on damages." *Id.; see also id. at 1214* ("The consumers confine their claim for damages . . . solely to that overcharge resulting from a retail level price-fixing conspiracy. There is no need to apportion that overcharge because it was not passed on to the consumers through any other level in the distribution chain."). As the district court aptly noted, this co-conspirator exception is **[**21]** not really an exception at all. *In re ATM Fee Antitrust Litig., 2010 U.S. Dist. LEXIS 97009, 2010 WL 3701912, at *6*; *see also* 2A Phillip E. Areeda et al., ***Antitrust Law*** ¶ 346h ("Whether one adopts a co-conspirator exception or regards this situation as outside *Illinois Brick's* domain, there is no tracing or apportionment to be done." (footnote omitted)). If the direct purchaser conspires to fix the price paid by the plaintiffs, then the plaintiffs pay the fixed price directly and are not indirect purchasers (i.e., there is no pass-on theory involved). *See Shamrock Foods, 729 F.2d at 1211-12*.

Here, the district court found *Shamrock Foods* inapplicable, because

> Plaintiffs in this case, unlike the plaintiffs in *Shamrock Foods*, do not allege that Defendants conspired to fix the price Plaintiffs paid (*i.e.*, the foreign ATM fee). Instead, Plaintiffs allege **[*751]** that Defendants fixed the

---

[4] Although the argument touches upon the initial inquiry whether Plaintiffs are indirect purchasers, we address the argument within our discussion of the co-conspirator exception.

> interchange fee that Star Network pay one another and then passed along the artificially inflated fee to Plaintiffs. Thus, unlike *Shamrock Foods*, Plaintiffs' theory of recovery expressly depends on pass-on damages. . . . In short, the *Shamrock Foods* exception applies where the Defendants have conspired to fix the price that Plaintiffs paid directly. **[**22]** That is not the case here.

In re ATM Fee Antitrust Litig., 2010 U.S. Dist. LEXIS 97009, 2010 WL 3701912, at *6 (internal quotation marks and alterations omitted). We agree with the district court.

As we emphasized in Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, the price paid by plaintiffs must be fixed. *Kendall* applies particularly well to this case, because it involved similar allegations and fee structures. In *Kendall*, merchants sued credit card companies (or Consortiums) and banks, alleging that they conspired to set the transaction fee charged to merchants for each retail transaction—i.e., the merchant discount fee—by setting the interchange fees charged by the Consortiums to the issuing banks. Id. at 1049. The merchant plaintiffs alleged that setting the interchange fees "establish[ed] a minimum amount for the merchant discount fees." *Id*. However, the merchant plaintiffs "[ran] squarely into the *Illinois Brick* wall," with respect to interchange fees, because they were not charged the interchange fee directly. *Id*. Also, "[a]ppellants allege[d] the Consortiums indirectly establish[ed] the minimum merchant discount fee the Banks charge[ed] Merchants." *Id*. "[T]his allegation [was] barred by *Illinois Brick* to the **[**23]** extent that the Consortiums d[id] not directly set the merchant discount fee; the acquiring bank sets that fee." *Id*. More importantly, the *Kendall* plaintiffs alleged that the credit card companies directly conspired with the banks *to set the merchant discount fee*, so they should have standing under the co-conspirator exception. Id. at 1050. Critically, the plaintiffs alleged a conspiracy to fix the price paid by the plaintiffs. *Id*. Although the court rejected the argument because plaintiffs provided no facts to support such a conspiracy, the court found significant the fact that the plaintiffs did "not allege any facts showing the Consortiums have any direct control over the merchant discount fee the acquiring bank chooses to charge . . . ." *Id*.

The *Kendall* plaintiffs failed to show a conspiracy "to set merchant discount fees," and "appellants [did] not allege any facts showing the Consortiums ha[d] any direct control over the merchant discount fee." *Id*. As such, ***HN13***[] Kendall reaffirmed that the co-conspirator exception applies when the conspirators set the price paid by the consumer. The same analysis applies in our case. Here, while Plaintiffs allege a conspiracy to set interchange fees, **[**24]** they fail to show a conspiracy to set foreign ATM fees. Plaintiffs do not allege that STAR has control to set foreign ATM fees. Further, Bank Defendants have no control over the foreign ATM fees of other Bank Defendants or STAR members.

The Fourth Circuit also requires that plaintiffs allege a conspiracy to fix the price paid by the plaintiffs. Dickson v. Microsoft Corp., 309 F.3d 193 (4th Cir. 2002). In *Dickson*, computer purchasers alleged that license agreements between computer sellers and Microsoft

> resulted in supracompetitive prices for Microsoft's operating system and application software. [Computer purchasers do] not allege any conspiracy between Microsoft and the OEM Defendants to set the resale price of the software. Instead, [they] claim[ ] that overcharges were passed on to the consumers by the OEM Defendants when the consumers **[*752]** purchased personal computers (PCs) from the OEM Defendants.

309 F.3d at 200. As such, *Dickson* held the claim it faced to be "materially indistinguishable from the claim under consideration in *Illinois Brick*, and [the plaintiffs'] inclusion of a conspiracy allegation [was] insufficient to circumvent the *Illinois Brick* rule." Id. at 215. *Dickson* acknowledged **[**25]** the trend of recognizing a co-conspirator exception. Id. at 214-15. However, the court "interpret[ed] these cases as standing for the more narrow proposition that *Illinois Brick* is inapplicable to a particular type of conspiracy—price-fixing conspiracies." Id. at 215. In other words, the court concluded that only a conspiracy to fix the price paid by the consumer is an exception to *Illinois Brick*, because it is "grounded on the damages theory underlying the alleged conspiracy"—i.e., "no overcharge has been passed on to the consumer." *Id. Dickson* refused to recognize an exception when plaintiffs allege a conspiracy but the conspirators did not fix the price paid by the plaintiffs, because such an action would be contrary to the Supreme Court's direction not to carve out exceptions to the *Illinois Brick* rule. Id. at 214 (citing Utilicorp, 497 U.S. at 216 ("We . . . believe that ample justification exists for our stated decision not to 'carve out exceptions to the [direct purchaser] rule for particular types of markets.'" (quoting Illinois Brick, 431 U.S. at 744))).

Although *Dickson* cites *Shamrock Foods* as an example of the co-conspirator exception, *id. at 214-15*, *Shamrock Foods* parallels **[**26]** *Dickson's* understanding that the exception only applies when the co-conspirators fix the price paid by the plaintiff. *Shamrock Foods* held that *Illinois Brick* does not apply when co-conspirators fix the retail price paid by consumers because the "theory of recovery does not depend on pass-on of damages . . . ."[5] *See 729 F.2d at 1211*. *Shamrock Foods* then indicates that a conspiracy to fix upstream prices relies on the pass-on damages *Illinois Brick* prohibits. *See id*. Therefore,***HN14***[] we agree with the Fourth Circuit and decline to extend the co-conspirator exception past the situation when alleged co-conspirators set the price paid by the plaintiffs.

Plaintiffs argue that they have standing here, because Defendants conspired to fix interchange fees for the purpose and effect of fixing foreign ATM fees. In **[**27]** sum, Plaintiffs argue that the foreign ATM fee was "fixed," because

> [w]hen the term 'fix prices' is used, that term is used in its larger sense. A combination or conspiracy formed for the purpose and with the effect of raising, depressing, fixing, pegging or stabilizing the price of a commodity in interstate commerce is unreasonable per se under the Sherman Act.

Plymouth Dealers' Ass'n of N. Cal. v. United States, 279 F.2d 128, 132 (9th Cir. 1960); *see also Palmer v. BRG of Ga., Inc., 498 U.S. 46, 48, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)* (per curiam). Plaintiffs argue that Defendants conspired to fix interchange fees for the purpose of raising foreign ATM fees. Therefore, Defendants fixed the foreign ATM fees (which Plaintiffs directly paid), and Plaintiffs have standing.

However, Plaintiffs' argument hinges on what it means to "fix" a price. The district **[*753]** court and Defendants suggest that, ***HN15***[] in the *Illinois Brick* context, fixing a price sets the price directly paid, not a price latter passed-on as part of the price at issue. However, Plaintiffs argue that conspiring to set a price for the purpose and effect of raising the price at issue equates to fixing that price and makes the payers of the raised price direct purchasers.

Plaintiffs' **[**28]** argument misses the mark. *Illinois Brick* rejected this argument when it rejected "mark up" claims. *See 431 U.S. at 744*. Plaintiffs' argument re-characterizes the "mark up" claim by alleging that the Defendants imposed fixed interchange fees for the purpose of marking up foreign ATM fees. Plaintiffs' argument differs little from the argument that a fixed percentage mark up or a price-fixed good used in the ultimate product should allow indirect purchasers to sue, because the price ultimately paid by Plaintiffs includes the fixed costs. However, the Supreme Court expressly rejected such arguments, based largely on the reasoning that "[f]irms in many sectors of the economy rely to an extent on cost-based rules of thumb in setting prices . . . [and t]he intricacies of tracing the effect of an overcharge on the purchaser's prices, costs, sales, and profits . . . are not spared the litigants." *Id*. Further, Plaintiffs do not allege here that the banks agreed to fix the level of the "mark up" in the foreign ATM fees or even whether such fees would be charged at all. The third amended complaint states that "Defendants have continued to impose fixed Interchange Fees because the Bank Defendants **[**29]** mark them up to set Foreign ATM Fees, which generate substantial revenues for Bank Defendants." Plaintiffs allege a mark up of foreign ATM fees to pass on the interchange fees. The allegation contradicts *Illinois Brick*, because ***HN16***[] *Illinois Brick* rejected exceptions for markups by middlemen or when the price-fixed good is a vital input to a larger product. *431 U.S. at 743-45*.

Moreover, Plaintiffs' cited precedent does not support the argument that foreign ATM fees were fixed*. See Plymouth Dealers' Ass'n, 279 F.2d at 132*; *Palmer, 498 U.S. at 48*. Neither case involved the question of who is injured under *§ 4 of the Clayton Act* or pass-on theories. In *Plymouth Dealers' Ass'n*, car dealers agreed to a fixed price list that would be the starting point for bargaining. *279 F.2d at 132*. In *Palmer*, competitors agreed to give one of them the exclusive rights to Georgia. *498 U.S. at 47-48*. Neither involved passing on the price fixed through the price paid by the plaintiffs. Both cases determined what constituted fixing prices under *§ 1 of the Sherman Act*. *See,*

---

[5] Plaintiffs argue that *Delaware Valley* construed *Shamrock Foods* to mean that plaintiffs have standing by "establish[ing] a price-fixing conspiracy between manufacturer and middleman—without regard to the price at issue." But *Delaware Valley* only discussed *Shamrock Foods* in a passing footnote and did not describe the scope of the price-fixing conspiracy. *Delaware Valley, 523 F.3d at 1123 n.1*.

e.g., Plymouth Dealers' Ass'n, 279 F.2d at 132 (holding that conspiring to raise, depress, fix, peg, or stabilize a price "is unreasonable per **[**30]** se under the *Sherman Act*" (emphasis added)).

However, as in *Illinois Brick*, our task involves determining whether Plaintiffs are injured within the meaning of § 4 of the Clayton Act. *See* Illinois Brick, 431 U.S. at 723-26. ***HN17***[] Section 4 of the Clayton Act provides: "Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue . . . ." 15 U.S.C. § 15(a). Therefore, *Plymouth Dealers' Association* and *Palmer* decided what constitutes "anything forbidden in the antitrust laws," while *Illinois Brick* decided whether injury results based on a pass-on theory. *See* Illinois Brick, 431 U.S. at 729 ("[T]he overcharged direct purchaser, and not others in the chain of manufacture or distribution, is the party 'injured in his business or property' within the meaning **[*754]** of [§ 4 of the Clayton Act] . . . ."). In sum, ***HN18***[] the price paid by plaintiffs must be the price set (not merely "fixed" in some broad sense) for plaintiffs to be a direct purchaser under the narrowly defined injury requirement of § 4 of the Clayton Act. Further, under the co-conspirator exception recognized in this circuit, the price paid by a plaintiff must be set by the conspiracy **[**31]** and not merely affected by the setting of another price. *See* Shamrock Foods, 729 F.2d at 1211.

Plaintiffs cite Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979 (9th Cir. 2000), for the proposition that Defendants effectively fixed foreign ATM fees by fixing interchange fees, which thus gives Plaintiffs standing. However, Plaintiffs inappropriately rely on *Knevelbaard*, because *Knevelbaard* found antitrust injury under California's Cartwright Act, which "is enlarged, by statute, in comparison to federal law." Id. at 991. "As a result, the more restrictive definition of antitrust injury under [*Illinois Brick*] does not apply to the Cartwright Act." *Id*. (internal quotation marks omitted). Because "California law affords standing more liberally than does federal law," *Knevelbaard* did not decide whether antitrust injury, or standing, existed under *Illinois Brick. See* id. at 987.

Lastly, *Freeman* fails to support Plaintiffs' argument that the foreign ATM fees were "fixed." In *Freeman*, realtor associations formed a single MLS[6] database ran by Sandicor, a corporation they created, owned, and controlled. 322 F.3d at 1141, 1146. The plaintiffs alleged that the associations conspired to fix support **[**32]** fees charged to Sandicor, and that these fees inflated the MLS fees charged by Sandicor and paid by plaintiffs. Id. at 1142. The associations fixed the support fees charged to Sandicor, and Sandicor set the MLS fees charged to subscribers. Id. at 1141, 1145. *Freeman* held that fixing the support fees artificially inflated that MLS fees paid by the plaintiffs. *See* Freeman, 322 F.3d at 1145.

Contrary to Plaintiffs' argument, Freeman demonstrates that ***HN19***[] fixing one fee for the purpose and effect of inflating another fee does not make the purchaser a direct purchaser under *Illinois Brick*. In *Freeman*, the court was forced to find an exception to *Illinois Brick* even though the court found price fixing by setting the support fees and passing them on through MLS fees. Id. at 1145-46. Therefore, in the context of Illinois Brick, fixing an upstream cost did not equate to fixing the price paid by the plaintiffs. Standing existed **[**33]** in *Freeman*, not because the associations fixed the support fees for the purpose and effect of raising MLS fees, but because of the associations' ownership and control of Sandicor (the direct purchaser). Id. at 1145-46 (citing Royal Printing, 621 F.2d at 326).

Plaintiffs argue *Freeman* relies on the co-conspirator exception, because the court noted that the associations, in essence, had agreed to have the MLS charge be $44. *See* 322 F.3d at 1146 (comparing the case to resale price maintenance and noting that "Defendants can't turn a horizontal agreement to fix prices into something innocuous just by changing the way they keep their books"). However, even if Freeman applied the co-conspirator exception, it does not help Plaintiffs. The defendants in that case conspired to effectively set the price paid by the customers of the MLS. **[*755]** *See id*. (associations effectively "agree[d] among themselves to resell [MLS database access] with support services for exactly $22.50"). Here, unlike *Freeman*, the Bank Defendants independently set the fee paid by Plaintiffs (i.e., foreign ATM fee) and the amount of such fee varies between Bank Defendants. As such,

[6] "[T]he Multiple Listing Service, or 'MLS,' [ ] lets agents share information about properties on the market with the help of a computerized database. Agents who subscribe to the MLS can peruse the listings of other subscribers and post their own." Freeman, 322 F.3d at 1140.

Defendants have not conspired to set the foreign **[**34]** ATM fees unlike the associations in *Freeman* effectively setting the price for Sandicor's MLS service.

Plaintiffs next argue that they have standing, because they "purchased directly from price-fixing Defendants," an argument closely related to the argument that the foreign ATM fees were "fixed." In other words, Plaintiffs argue that the direct purchaser Bank Defendants conspired to fix the interchange fees (an upstream cost), so Plaintiffs purchased from a horizontal price fixing conspirator. They argue *Illinois Brick* does not apply even though Defendants did not fix the price Plaintiffs directly paid, because they are purchasing from a violator. However, because *Shamrock Foods* only involved the setting of the price actually paid (and not an upstream price that was then passed on), we would have to extend our current co-conspirator exception. Though other courts have,[7] we decline to do so.

Based on our precedent in *Kendall* and *Shamrock Foods*, we recognize the co-conspirator exception only when the conspiracy involves setting the price paid by the plaintiffs. Therefore, as the district court concluded, the exception **[**37]** does not apply, because the theory of recovery depends on pass-on damages. We decline to extend the co-conspirator exception further. As in *Kendall*, Plaintiffs "run into the *Illinois Brick* wall," because Plaintiffs do not pay interchange fees directly and the Bank **[*756]** Defendants independently set foreign ATM fees.

3. Ownership and Control and Freeman's "*No Realistic Possibility that Direct Purchasers Will Sue*"

HN20[] *Royal Printing* allowed indirect purchasers to sue "where a direct purchaser is a division or subsidiary of a co-conspirator." *621 F.2d at 326*. *Royal Printing* created an exception when parental control existed, because applying *Illinois Brick* "would eliminate the threat of private enforcement," *id. at 326 n.7*, and "close off every avenue for private enforcement," *id. at 327*. "The co-conspirator parent will forbid its subsidiary or division to bring a lawsuit that would only reveal the parents own participation in the conspiracy." *Id. at 326*. In our case, neither Bank Defendants nor STAR are divisions or subsidiaries of the other. However, Plaintiffs argue that the exception in *Royal Printing* should, as construed in *Freeman, 322 F.3d at 1145-46*, apply in any event. We disagree.

---

[7] In *In re TFT LCD (Flat Panel) Antitrust Litigation*, the Northern District of California held that a purchaser of a finished TFT-LCD product was a direct purchaser, even though "the alleged price-fixing conspiracy existed only with regard to TFT-LCD panels, and not finished products." *267 F.R.D. 291, 306-07 (N.D. Cal. 2010)*. **[**35]** The district court classified consumers of the final products as direct purchasers because they "purchase[d] directly from the alleged violator." *Id. at 307* (quoting *In re Sugar Indus. Antitrust Litig., 579 F.2d 13, 17 (3d Cir. 1978))*. In support of the conclusion, the Northern District of California cited two Third Circuit cases.

In *In re Sugar Industries Antitrust Litigation*, the Third Circuit classified candy wholesalers as direct purchasers because the candy manufacturers also refined sugar (sugar refiners being the alleged violators). *579 F.2d at 17-18*. In *In re Sugar Industries*, the plaintiff "limited the issue to the summary judgment only insofar as it affects the direct purchases of candy from defendants," because "in the face of *Illinois Brick* . . . plaintiff has no hope of success on the purchases from nondefendants." ***Id. at 16***. Thus, *In re Sugar Industries* actually exemplifies the exception allowed when an upstream violator controls or owns the direct purchaser, which is discussed in more detail below. *See id. at 18-19*; 2A Phillip E. Areeda et al., ***Antitrust Law*** ¶ 346f & n. 41.

Later, in *In re Linerboard Antitrust Litigation*, the Third Circuit classified purchasers of corrugated **[**36]** sheets and boxes as direct purchasers of linerboard (which was included in the purchased corrugated sheets and boxes), because the linerboard was subject to a price-fixing agreement. *305 F.3d 145, 158-60 (3d Cir. 2002)* ("*Illinois Brick* . . . bans Clayton Act lawsuits by persons who are not direct purchasers from the defendant antitrust violator."). Similarly, the Seventh Circuit has held that "the first purchaser[ ] from *outside* the conspiracy" may sue. *Paper Sys. Inc. v. Nippon Paper Indus. Co., 281 F.3d 629, 631-32 (7th Cir. 2002)*. Thus, these cases restrict *Illinois Brick's* influence by allowing an exception when the direct purchaser conspires with the seller, even though the price illegally set is an upstream cost that is passed-on to the plaintiffs. This contradicts the Supreme Court's admonition "not to 'carve out exceptions to the [direct purchaser] rule for particular types of markets.'" *Utilicorp, 497 U.S. at 216* (quoting *Illinois Brick, 431 U.S. at 744*).

HN21[] *Freeman*, **[**38]** citing *Royal Printing*, enunciated the exception as follows: "[I]ndirect purchasers can sue for damages if there is no realistic possibility that the direct purchaser will sue its supplier over the antitrust violation." *Freeman, 322 F.3d at 1145-46*. However, *Freeman* did not create a new variation of the *Royal Printing* exception, because *Freeman* relied on ownership and control to find standing. *Id. at 1146* ("The associations own Sandicor . . ., [t]hey appoint its board of directors, and they are accused of conspiring with it."); *id. at 1146 n.12* ("*Royal Printing* applies because the associations own Sandicor."). In *Freeman*, the co-conspiring realtor associations owned and controlled Sandicor (the direct purchaser) and had the power to appoint Sandicor's board of directors. *Id*. Thus, in *Freeman*, we found no realistic possibility of suit, because the associations owned and controlled the direct purchaser.[8] *Id. at 1146*. Therefore, *Freeman* outlines that, whether a realistic possibility of suit exists, depends on the existence of ownership or control between the direct purchaser and the seller. *See, e.g., Royal Printing, 621 F.2d at 326 n.7* ("[I]f Royal Printing is . . . barred [from suing], **[**39]** and the *controlled* wholesalers will not sue, the appellees' transactions would be immune from private antitrust enforcement." (emphasis added)).

We do not overlook that Plaintiffs argue that there is no realistic possibility that the Bank Defendants will sue STAR or their co-defendants, because the district court preliminarily denied the Defendants' motion to dismiss (on September 4, 2009) on such grounds. *In re ATM Fee Antitrust Litig., 768 F. Supp. 2d at 991-92*. However on summary judgment (with more information in the record than at the time of the motion to dismiss), the district court subsequently found a lack of standing, because there was a realistic possibility of suit by pure-payer (and net-payer) direct purchasers of the interchange fee.[9] **[*757]** *In re ATM Fee Antitrust Litig., 2010 U.S. Dist. LEXIS 97009, 2010 WL 3701912*.

In *Royal Printing* and *Freeman*, the ownership or control of the direct purchasers by the conspiring sellers created no realistic possibility of suit. Here, Plaintiffs do not allege that STAR owns or controls Bank Defendants or that Bank Defendants own or control other Bank Defendants. Thus, this case does not involve a lack of a realistic possibility of suit because of the seller (STAR) prohibiting the direct purchasers (Bank Defendants) from suing through its ownership or control, as found in *Royal Printing* and *Freeman*. Instead, this case deals with whether a realistic possibility of suit exists when a direct purchaser conspires with the seller to set a cost passed-on to Plaintiffs. ***HN22***[] We decline to extend the exception noted in *Royal Printing* and *Freeman* to situations where the seller does not own or control the direct purchasers, because, after *Royal Printing*, the Supreme Court stated that **[**41]** "[t]he possibility of allowing an exception, even in rather meritorious circumstances, would undermine the rule." *Utilicorp, 497 U.S. at 216*; *see* 2A Phillip E. Areeda et al., ***Antitrust Law*** ¶ 346h ("[T]he Supreme Court . . . has thus far been indifferent to the question whether the direct purchaser is likely to sue . . . .").

Plaintiffs argue that Bank Defendants owned or controlled STAR.***HN23***[] The applicable statute does not define control. Therefore, we construe it in its ordinary, contemporary, and common meaning. *United States v. Bennett, 621 F.3d 1131, 1139 n.2 (9th Cir. 2010)*. Control means "'to exercise restraint or direction over; dominate, regulate, or command,'" *id*. (quoting Webster's College Dictionary 297 (Random House 1991)), or to have "the 'power or authority to guide or manage,'" *id*. (quoting Webster's New Collegiate Dictionary 285 (9th ed.1983)).

Plaintiffs' outline sources purported to show that Bank Defendants' ownership and control of STAR foreclosed a realistic possibility of suit. However, Bank Defendants did not control STAR after Concord, a publicly owned Delaware corporation, purchased STAR on February 1, 2001.[10] Former stockholders of STAR owned, in aggregate,

---

[8] *Freeman* concludes the paragraph discussing the exception by stating that "[t]here's no realistic possibility Sandicor will sue them," but in the corresponding footnote the court finds *Royal Printing* applicable because of the associations *ownership* of Sandicor. *322 F.3d at 1146 n.12*.

[9] We do not rely on the same reasoning as the district court, because *Royal Printing* may cast some doubt on the **[**40]** district court's conclusion. In *Royal Printing*, we found that the plaintiffs had standing to sue for the purchases they had made from wholesalers controlled by the paper manufactures even though the plaintiffs also made purchases from independent wholesalers. *Royal Printing, 621 F.2d at 324, 327-28*.

approximately **[**42]** ten percent of Concord's outstanding common stock after the merger. Because of Concord's widely disbursed ownership and Bank Defendants' small ownership percentage, Bank Defendants had insufficient ownership interests to control Concord and thus STAR. *Cf. Weinstein Enters., Inc. v. Orloff, 870 A.2d 499, 506-08 (Del. 2005)* (***HN24***[] in finding that a fiduciary duty exists, a shareholder must have control of the affairs of the corporation, which does not exist unless the shareholder owns a majority of the stock or has actual control over the corporation's conduct); *Kaplan v. Centex Corp., 284 A.2d 119, 122-23 (Del. Ch. 1971)* (***HN25***[] "A plaintiff who alleges domination of a board of directors and/or control of its affairs must prove it. Stock ownership alone, at least when it amounts to less than a majority, is not sufficient proof of domination or control." (citation omitted)). Moreover, the language added to STAR's agreement with its members does not create control, because (1) it is a negotiated agreement between STAR and its members, and (2) STAR still has the ultimate power to change interchange fees based on market conditions. The language essentially protects Bank **[*758]** Defendants from arbitrary changes, **[**43]** but Concord has the power to change interchange fees if changes are reasonably related to prevailing market conditions. Likewise, the Network Advisory Board (composed of large member banks like Bank Defendants) does not create control, because it had no power to set interchange fees or to control Concord's board. The Network Advisory Board has influence, because it represents the views of large member banks. However, input on policies and pricing issues by interested members does not constitute the type of control necessary to meet the exception to *Illinois Brick*. *See Freeman, 322 F.3d at 1145-46* (control existed from ownership); *cf. Werner v. Miller Tech. Mgmt., L.P., 831 A.2d 318, 328 (Del. Ch. 2003)* ("The ability to offer ideas [by the Advisory Board] cannot be construed as an ability to manage the affairs of Interprise."). ***HN26***[] As a Delaware corporation, Concord's board of directors has the power, authority, and responsibility to manage the corporation. *Del. Code Ann. tit. 8, § 141*. Therefore, to control STAR, the Bank Defendants must have had control of Concord's board of directors, which is not demonstrated here.

CONCLUSION

For these reasons, we AFFIRM the district court's summary judgment. Plaintiffs lack standing to seek damages for the alleged antitrust violations.

End of Document

---

[10] As for the time period from July 2, 2000, to February 1, 2001, there **[**44]** are no allegations that Bank Defendants controlled one another or conspired to fix foreign ATM fees. As such, the concern in *Royal Printing* of a controlling party prohibiting the direct purchaser from suing is not present here.

HN3[] Sherman Act, Scope

See 15 U.S.C.S. § 1.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN4[] Sherman Act, Claims

Under a literal reading, 15 U.S.C.S. § 1 would make illegal every agreement in restraint of trade. However, it has not been so interpreted. Rather the U.S. Supreme Court has long construed it to prohibit only unreasonable restraints. Whether a restraint qualifies as unreasonable and therefore conflicts with the statute is normally evaluated under the "rule of reason." Applying this approach, the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect. This inquiry has been divided into three parts. First, the plaintiff must show that the challenged conduct has produced anticompetitive effects within the market. If the plaintiff meets the initial burden, the burden shifts to the defendant to show that the challenged conduct promotes a sufficiently pro-competitive objective. Finally, the plaintiff can rebut the defendant's purported pro-competitive justification by showing that the restraint is not reasonably necessary to achieve the pro-competitive objective.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Evidence > Burdens of Proof > Allocation

HN5[] Per Se Rule & Rule of Reason, Per Se Violations

Courts have recognized that some types of restraints have such predictable and pernicious anticompetitive effect, and such limited potential for pro-competitive benefit, that they should be deemed unlawful per se. Examples of agreements that have been held unlawful pursuant to the per se rule include horizontal price fixing, output limitations, market allocation, and group boycotts. The per se rule is applied where a practice facially appears to be one that would always or almost always tend to restrict competition or decrease output. In some situations, courts apply an antitrust analysis that falls between the full rule of reason inquiry on the one hand and the rigid per se approach on the other. This so-called "quick look" or "truncated rule of reason" analysis applies where the plaintiff has shown that the defendant has engaged in practices similar to those subject to per se treatment. Having so shown, the plaintiff is not required to make a full showing of anticompetitive effects within the market; rather the defendant has the burden of demonstrating pro-competitive justifications.

Patent Law > Infringement Actions > General Overview

HN7[] **Sherman Act, Scope**

While the first two courts of appeal to address the issue of reverse payments subjected those agreements to antitrust scrutiny, later courts have gravitated toward the scope of the patent test under which reverse payments are permitted so long as (1) the exclusion does not exceed the patent's scope, (2) the patent holder's claim of infringement was not objectively baseless, and (3) the patent was not procured by fraud on the Patent and Trademark Office. As a practical matter, the scope of the patent test does not subject reverse payment agreements to any antitrust scrutiny. No court applying the scope of the patent test has ever permitted a reverse payment antitrust case to go to trial. The U.S. Court of Appeals for the Third Circuit cannot agree with those courts that apply the scope of the patent test. That test improperly restricts the application of ***antitrust law*** and is contrary to the policies underlying the Drug Price Competition and Patent Term Restoration Act, commonly known as the Hatch-Waxman Act, Pub. L. No. 98-417, 98 Stat. 1585 (1984), and a long line of U.S. Supreme Court precedent on patent litigation and competition.

Patent Law > ... > Defenses > Patent Invalidity > Presumption of Validity

HN8[] **Patent Invalidity, Presumption of Validity**

While persons challenging the validity of a patent in litigation bear the burden of defeating a presumption of validity, this presumption is intended merely as a procedural device and is not a substantive right of the patent holder. The presumption, like all legal presumptions, is a procedural device, not substantive law.

Patent Law > Infringement Actions > Burdens of Proof

HN9[] **Infringement Actions, Burdens of Proof**

In infringement cases it is the patent holder who bears the burden of showing infringement.

Patent Law > US Patent & Trademark Office Proceedings > General Overview

HN10[] **Patent Law, US Patent & Trademark Office Proceedings**

Courts must be mindful of the fact that a patent, in the last analysis, simply represents a legal conclusion reached by the Patent and Trademark Office.

Patent Law > General Overview

HN11[] **Patent Law**

Valid patents are a limited exception to a general rule of the free exploitation of ideas. It follows that the public interest supports judicial testing and elimination of weak patents.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN12[] **Sherman Act, Scope**

If a patent is invalid, the price fixing provision of a licensing agreement will violate federal ***antitrust law*** and, as such, the licensor can not be estopped from challenging the patent. In reaching this conclusion the U.S. Supreme Court emphasized the broad public interest in freeing the United States's competitive economy from the trade restraints which might be imposed by price-fixing agreements stemming from narrow or invalid patents. It is the public interest which is dominant in the patent system and the right to challenge a patent is not only a private right to the individual, but it is founded on public policy which is promoted by his making the defence, and contravened by his refusal to make it.

Antitrust & Trade Law > Regulated Industries > General Overview

HN13[] **Antitrust & Trade Law, Regulated Industries**

Antitrust analysis must sensitively recognize and reflect the distinctive economic and legal setting of the regulated industry to which it applies.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN14[] **Sherman Act, Scope**

In passing the Drug Price Competition and Patent Term Restoration Act, commonly known as the Hatch-Waxman Act, Pub. L. No. 98-417, 98 Stat. 1585 (1984), Congress drew a careful line between patent protection and the need to provide incentives for competition in the pharmaceutical industry. The line that Congress drew between these competing objectives strongly supports the application of rule of reason scrutiny of reverse payment settlements in the pharmaceutical industry.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Patent Law > Infringement Actions > General Overview

HN15[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The goal of the Drug Price Competition and Patent Term Restoration Act, commonly known as the Hatch-Waxman Act, Pub. L. No. 98-417, 98 Stat. 1585 (1984), is to increase the availability of low cost generic drugs. One method Congress employed was to encourage litigated challenges by generic manufacturers against the holders of weak or narrow patents. *21 U.S.C.S. § 355(j)(5)(B)(iv)* (establishing 180-day exclusivity period as reward for successfully challenging a patent). That goal is undermined by application of the scope of the patent test which entitles the patent holder to pay its potential generic competitors not to compete. This approach nominally protects intellectual property, not on the strength of a patent holder's legal rights, but on the strength of its wallet. The principal beneficiaries of such an approach will be name brand manufacturers with weak or narrow patents that are unlikely to prevail in court. Thus while such a rule might be good policy from the perspective of name brand and generic pharmaceutical producers, it is bad policy from the perspective of the consumer, precisely the constituency Congress was seeking to protect.

Civil Procedure > Settlements > Settlement Agreements > General Overview

Patent Law > Infringement Actions > General Overview

HN16[] **Settlements, Settlement Agreements**

The judicial preference for settlement, while generally laudable, should not displace countervailing public policy objectives or Congress's determination that litigated patent challenges are necessary to protect consumers from unjustified monopolies by name brand drug manufacturers.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Patent Law > Infringement Actions > General Overview

HN17[] **Sherman Act, Scope**

In the context of a reverse payment settlement agreement, the U.S. Court of Appeals for the Third Circuit rejects the scope of the patent test. In its place it will direct a district court to apply a quick look rule of reason analysis based on the economic realities of the reverse payment settlement rather than the labels applied by the settling parties.

Specifically, the finder of fact must treat any payment from a pharmaceutical patent holder to a generic patent challenger who agrees to delay entry into the market as prima facie evidence of an unreasonable restraint of trade, which could be rebutted by showing that the payment (1) was for a purpose other than delayed entry or (2) offers some pro-competitive benefit.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Patent Law > Infringement Actions > General Overview

HN18[] **Sherman Act, Scope**

In the context of a reverse payment settlement agreement, there is no need to consider the merits of the underlying pharmaceutical patent suit because absent proof of other offsetting consideration, it is logical to conclude that the quid pro quo for the payment was an agreement by the generic to defer entry beyond the date that represents an otherwise reasonable litigation compromise. Of course, a patent holder may attempt to rebut a plaintiff's prima facie case of an unreasonable restraint of trade by arguing that there is in fact no reverse payment because any money that changed hands was for something other than a delay in market entry. Alternatively, the patent holder may attempt to rebut the prima facie case by demonstrating that the reverse payment offers a competitive benefit that could not have been achieved in the absence of a reverse payment. This second possible defense attempts to account for the--probably rare--situations where a reverse payment increases competition. For example, a modest cash payment that enables a cash-starved generic manufacturer to avoid bankruptcy and begin marketing a generic drug might have an overall effect of increasing the amount of competition in the market.

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN19[] **Appellate Jurisdiction, Interlocutory Orders**

An appeals court has discretion to consider an interlocutory appeal even after the entry of final judgment.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

HN20[] **Standards of Review, Abuse of Discretion**

An appellate court reviews class certification orders for abuse of discretion, which occurs if the district court's decision rests upon a clearly erroneous finding of fact, an errant conclusion of law or an improper application of law to fact.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN21[] **Class Actions, Prerequisites for Class Action**

In order to certify a class under *Fed. R. Civ. P. 23(b)(3)*, a plaintiff must satisfy both the general class action prerequisites--numerosity, commonality, typicality, and adequacy of representation--and the additional requirements of predominance and superiority. *Fed. R. Civ. P. 23(a)*, *(b)(3)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

***HN22*[]** **Prerequisites for Class Action, Predominance**

In order for the predominance requirement of *Fed. R. Civ. P. 23* to be satisfied issues common to the class must predominate over individual issues. Class certification calls for the district court to conduct a rigorous assessment of the available evidence, and is only appropriate in antitrust cases where plaintiffs can show, by a preponderance of the evidence, that proof of the essential elements of the cause of action, including antitrust injury, do not require individual treatment.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

***HN23*[]** **Standing, Requirements**

The U.S. Court of Appeals for the Third Circuit has held that when an antitrust violation impacts upon a class of persons who do have standing, there is no reason in doctrine why proof of impact cannot be made on a common basis, so long as the common proof adequately demonstrates some damage to each individual.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

***HN24*[]** **Private Actions, Remedies**

The preponderance requirement of *Fed. R. Civ. P. 23* demands more than a mere threshold showing by a party seeking to certify a class and, in considering a motion for class certification, a district court is required to resolve any factual or legal disputes necessary to determine whether a plaintiff will be able to show antitrust injury for all plaintiffs with common evidence.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

***HN25*[]** **Private Actions, Remedies**

Antitrust injury does not require a showing of lost profits. Rather, the U.S. Supreme Court has ruled that a plaintiff suffers an antitrust injury where it is overcharged for a product, regardless of whether it can show lost profits.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN26[] **Private Actions, Remedies**

For class certification a plaintiff need not prove antitrust injury actually occurred. Plaintiffs' burden at the class certification stage is not to prove the element of antitrust impact, although in order to prevail on the merits each class member must do so. Instead, the task for plaintiffs at class certification is to demonstrate that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual to its members. To the extent that there were minor variations, they can be handled at trial in the context of damages.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN27[] **Prerequisites for Class Action, Adequacy of Representation**

The inquiry that a court should make regarding the adequacy of representation requisite of *Fed. R. Civ. P. 23(a)(4)* is to determine that the putative named plaintiff has the ability and the incentive to represent the claims of the class vigorously, and that there is no conflict between the individual's claims and those asserted on behalf of the class. Only a fundamental conflict will defeat adequacy of representation.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN28[] **Prerequisites for Class Action, Adequacy of Representation**

A potential conflict between the representatives and some class members should not preclude the use of the class-action device if the parties appear united in interest against an outsider at the beginning of the case.

Judges: Before: SLOVITER, VANASKIE, Circuit Judges and STENGEL[*], District Judge.

Opinion by: SLOVITER

Opinion

[*1498]** **[*202]** OPINION OF THE COURT

SLOVITER, *Circuit Judge*.

In this appeal, we consider the antitrust implications of an agreement by a manufacturer of a generic drug that, in return for a payment by the patent holder, agrees to drop its challenge to the patent and refrain from entering the market for a specified period of time.

A secondary issue concerns the certification by the District Court of a class of antitrust plaintiffs. Specifically, we must determine whether the antitrust injury allegedly suffered by class members can be shown through common proof, i.e. proof applicable to all plaintiffs, and whether there **[**4]** are insurmountable conflicts preventing named plaintiffs from adequately **[***1499]** representing the members of the class.

These appeals arise out of the settlement of two patent cases involving the drug K-Dur 20 ("K-Dur"), which is manufactured by Schering-Plough Corporation ("Schering"). Plaintiffs are Louisiana Wholesale Drug Company, Inc., on behalf of a class of wholesalers and retailers who purchased K-Dur directly from Schering and nine individual plaintiffs, including CVS Pharmacy, Inc., Rite Aid Corporation, and other pharmacies. Defendants are Schering and Upsher-Smith Laboratories ("Upsher Smith").[1]

[*203] I. STATUTORY AND REGULATORY FRAMEWORK

K-Dur is Schering's brand-name sustained-release potassium chloride supplement.[2] Sustained-release potassium chloride is used to treat potassium deficiencies, including those that arise as a side effect of the use of diuretic products to treat high blood pressure.

Schering did not hold a patent for the potassium chloride salt itself, as that compound is commonly known and not patentable. Instead, Schering held a formulation patent on the controlled release coating it applied to the potassium chloride crystals. Schering identified patent number 4,863,743 ("the '743 patent") as the patent that would be

---

[*] Hon. Lawrence F. Stengel, United States District Court for the Eastern District of Pennsylvania, sitting by designation.

[1] In appeals numbered 10-2077, 10-2078, and 10-2079, Appellants challenge the District Court's grant of summary judgment on behalf of defendants, relying on their patents. In No. 10-4571, defendants challenge the District Court's certification of a class of plaintiffs.

[2] After the facts at issue **[**5]** in this case, Merck & Co. acquired Schering, the named defendant in these actions. However, in keeping with the practice of the parties and amici, the court will refer to Schering.

infringed by the production of a generic version of K-Dur. Schering assigned the '743 patent to its subsidiary Key Pharmaceuticals, Inc. The '743 patent was set to expire on September 5, 2006.

By statute, a pharmaceutical company must obtain from the Food and Drug Administration ("FDA") approval before it may market a prescription drug. *21 U.S.C. § 355(a)*. For a new drug, the approval process requires submission of a New Drug Application ("NDA"), which includes exhaustive information about the drug, including safety and efficacy studies, the method of producing the drug, and any patents issued on the drug's composition or methods of use. *Id*. *§ 355(b)(1)*. The FDA publishes **[**6]** the patent information submitted in NDAs in the "Approved Drug Products with Therapeutic Equivalence Evaluations," otherwise known as the "Orange Book." *See* FDA Electronic Orange Book, *http://www.fda.gov/cder/ob/*.

In 1984, attempting to jumpstart generic competition with name brand pharmaceuticals, Congress passed the Drug Price Competition and Patent Term Restoration Act, commonly known as the Hatch-Waxman Act. Pub. L. No. 98-417, 98 Stat. 1585 (1984). The Hatch-Waxman Act amended the Federal Food, Drug, and Cosmetic Act, *21 U.S.C. §§ 301-399*, to permit a potential manufacturer of a generic version of a patented drug to file an abbreviated application for approval with the FDA. *See* *21 U.S.C. § 355(j)*. This short form application, known as an Abbreviated New Drug Application ("ANDA"), may rely on the FDA's prior determinations of safety and efficacy made in considering the application of the patented drug. *Id*. *§ 355(j)(2)(A)*.

When a generic manufacturer files an ANDA, it is also required to file a certification that, "in the opinion of the applicant and to the best of his knowledge," the proposed generic drug does not infringe any patent listed with the FDA as covering the patented drug. **[**7]** *Id*. *§ 355(j)(2)(A)(vii)*. The generic manufacturer can satisfy this requirement by certifying one of the following four options with respect to the patent for the listed drug: "(I) that such patent information has not been filed, (II) that such patent has expired, (III) [by certifying] the date on which such patent will expire, or (IV) that such patent is invalid or will not be infringed by the manufacture, use, or sale of the new drug for which the application is submitted." *Id*. *§ 355(j)(2)(A)(vii)*. The generic manufacturers at issue here, Upsher and ESI, used the fourth of these certification options, the so-called "paragraph IV certification." *Id*. *§ 355(j)(2)(A)(vii)(IV)*. When a would-be generic manufacturer submits a paragraph IV certification, it must consult the Orange Book and provide written **[*204]** notice to each listed patent owner impacted by the ANDA. *Id*. *§ 355(j)(2)(B)(iii)(I)*. By statute, a paragraph IV certification constitutes a technical act of patent infringement. *35 U.S.C. § 271(e)(2)(A)*.

Upon receiving notice of a paragraph IV certification with respect to one of its pharmaceutical patents, the patent holder may initiate an infringement suit based on the filing of the paragraph **[**8]** IV certification alone within forty-five days after the generic applicant files its ANDA and paragraph IV certification. *21 U.S.C. § 355(j)(5)(B)(iii)*. Filing suit by the **[***1500]** patent holder within that window effects an automatic stay that prevents the FDA from approving the generic drug until the earlier of (1) thirty months have run or (2) the court hearing the patent challenge finds that the patent is either invalid or not infringed. *Id*. *§ 355(j)(5)(B)(iii)(I)*.

Congress explained that the purpose of the Hatch-Waxman Act is "to make available more low cost generic drugs." H.R. Rep. No. 98-857(I), at 14-15, *reprinted in* 1984 U.S.C.C.A.N. 2647, 2647-48. In order to encourage generic entry and challenges to drug patents, the Hatch-Waxman Act rewards the first generic manufacturer who submits an ANDA and a paragraph IV certification by providing it with a 180-day period during which the FDA will not approve subsequent ANDA applications. *21 U.S.C. § 355(j)(5)(B)(iv)*. The 180-day exclusivity period is triggered on the date on which the first ANDA applicant begins commercial marketing of its drug. *Id*. Notably, the 180-day exclusivity window is only available to the first filer of an ANDA with **[**9]** a paragraph IV certification, meaning that even if the first filer never becomes eligible to use its 180-day exclusivity period because it settles, loses, or withdraws the litigation, that potential benefit will not pass to subsequent filers. *21 U.S.C. § 355(j)(5)(D)(iii)*. It has been suggested that the first filer is usually the most motivated challenger to the patent holder's claimed intellectual property. *See* C. Scott Hemphill, *Paying for Delay: Pharmaceutical Patent Settlement as a Regulatory Design Problem*, *81 N.Y.U. L. Rev. 1553, 1583 (2006)* (noting "a sharp difference in incentives . . . between [the first paragraph IV] filer and all other generic firms").

As explained further below, in the years after the passage of Hatch-Waxman, some of the patent infringement suits occurring under the Hatch-Waxman framework were resolved through settlement agreements in which the patent holder paid the would-be generic manufacturer to drop its patent challenge and refrain from producing a generic drug for a specified period. These agreements are known as "reverse payment agreements" or "exclusion agreements." Concerned about the possible anticompetitive effects of reverse payment agreements, **[**10]** *see* S. Rep. No. 107-167, at 4 (2002), Congress amended Hatch-Waxman as part of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003. Those amendments require branded and generic pharmaceutical companies who enter into patent litigation settlements to file those settlement agreements with the Federal Trade Commission ("FTC") and the Department of Justice ("DOJ") for antitrust review. Pub. L. No. 108-173, §§ 1111-1118, 117 Stat. 2066, 2461-64 (codified as amended at *21 U.S.C. § 355(j)*).

II. FACTUAL AND PROCEDURAL BACKGROUND

A. Approval of the '743 Patent

The patented invention claims a controlled-release dispersible potassium chloride tablet. The '743 patent was developed using a technique called "microencapsulation," a process in which small particles of a drug are coated to **[*205]** make them disperse over time. The research supporting the '743 patent built on work that Schering had done for an earlier patent for a controlled-release aspirin tablet, Patent No. 4,555,399 ("the '399 patent"). The application for what became the '743 patent was initially rejected by the Patent and Trademark Office ("PTO") as obvious in light of the '399 patent and other prior art. In order to **[**11]** circumvent the prior art, Schering amended its application for what became the '743 patent to clarify that the controlled release coating in the invention contained ethylcellulose with a viscosity of greater than 40 cp,[3] whereas the '399 patent called for the use of ethylcellulose with a viscosity of 9-11 cp. Schering argued that a coating containing ethylcellulose of greater than 40 cp was not obvious under the prior art. After this amendment, the PTO granted the '743 patent on September 5, 1989.

B. The Schering-Upsher Litigation and Settlement

In August 1995, Upsher filed the first ANDA seeking approval to produce a generic version of K-Dur to be called Klor-Con M20. Upsher provided a paragraph IV certification to Schering in November 1995, certifying that its generic would not infringe Schering's '743 patent. On December 15, 1995, within the forty-five-day window provided by Hatch-Waxman, Schering sued Upsher in the District of New Jersey for patent infringement, triggering the 30-month automatic stay in FDA approval of Upsher's generic.

Upsher's defense **[**12]** against Schering's patent infringement suit was based on differences between the chemical composition of the controlled **[***1501]** release coating in its generic product and that of the invention claimed in the '743 patent. Throughout the litigation, Upsher vigorously defended against Schering's infringement claims, at one point telling the court that Schering's claims of infringement "are baseless and could not have been made in good faith." App. at 3610.

The parties began trying to settle the infringement case at least as early as May 1997. During settlement negotiations, Upsher requested both a cash payment and an early entry date for its generic product. However, Schering expressed concern about possible antitrust problems that might arise if it made a reverse payment.

In the early morning of June 18, 1997, just hours before the District Court was to rule on the pending cross motions for summary judgment and begin, if necessary, a patent trial, Upsher and Schering agreed to settle the case. The

---

[3] Centipoise, abbreviated "cp", is a measure of viscosity. McGraw-Hill Dictionary of Scientific and Technical Terms 354 (6th ed. 2003).

settlement was memorialized in an eleven-page short-form agreement dated June 17, 1997 ("the Schering-Upsher agreement"). That agreement provided that, while Upsher did not concede the validity, infringement, **[**13]** or enforceability of the '743 patent, it would refrain from marketing its generic potassium chloride supplement or any similar product until September 1, 2001, at which point it would receive a non-royalty non-exclusive license under the '743 patent to make and sell a generic form of Klor-Con. Additionally, Upsher granted Schering licenses to make and sell several pharmaceutical products Upsher had developed, including Niacor-SR, a sustained-release niacin product used to treat high cholesterol. In return, Schering promised to pay Upsher sixty million dollars ($60,000,000) over three years, plus additional smaller sums depending upon its sales of Niacor-SR **[*206]** in defined markets. While the parties to this litigation dispute whether the payment was solely for the licensing of Upsher products or instead formed part of the consideration for dropping the patent action, the agreement lists Upsher's promises to dismiss the patent infringement action and not to market any sustained-release microencapsulated potassium chloride tablet until September 1, 2001, as part of the consideration for the payment.

The settlement agreement and the acquisition of licenses from Upsher were ratified by Schering's **[**14]** board of directors on June 24, 1997. Subsequent to the settlement, Upsher and Schering abandoned plans to make and market Niacor-SR.

In this action, the parties dispute the facts related to the Niacor-SR license. Plaintiffs contend that the license was a sham and that the $60 million paid as royalties for Niacor-SR was actually compensation for Upsher's agreement to delay the entry of its generic extended-release potassium tablet. On the other hand, defendants contend that Schering's board valued the license deal separately and that $60 million was its good faith valuation of the licenses at the time.

C. The Schering-ESI Litigation and Settlement

In December 1995, ESI Lederle[4] ("ESI") filed an ANDA seeking FDA approval to make and sell a generic version of K-Dur along with a paragraph IV certification stating that its proposed generic did not infringe the '743 patent. Within the forty-five-day period provided by the Hatch-Waxman Act, Schering sued ESI for patent infringement in the Eastern District of Pennsylvania. ESI defended on the ground that, unlike K-Dur, its generic equivalent did not employ a "coating material with two different ingredients" as specified by the '743 patent, but **[**15]** rather was made by a "different technology which produces a multi-layered coating with each layer comprised of a separate material having only a single ingredient." App. at 1696-97.

In the fall of 1996, Schering and ESI agreed to participate in court-supervised mediation before a magistrate judge. The settlement agreement the parties eventually reached ("the Schering-ESI agreement") called for Schering to grant ESI a royalty-free license under the '743 patent beginning on January 1, 2004. In exchange, Schering would pay ESI $5 million up front and a varying sum depending on when ESI's ANDA was approved by the FDA. Specifically, Schering agreed to pay ESI an amount ranging from a maximum of $10 million if ESI's ANDA was approved **[**16]** before July 1999 down to a minimum of $625,000 if the ANDA was not approved until 2002. As part of the settlement, ESI also represented that it was not developing and had **[***1502]** no plans to develop any other potassium chloride product.

The FDA approved ESI's generic K-Dur product in May 1999, and Schering paid ESI the additional $10 million as required under the settlement agreement.

D. The FTC Action

---

[4] ESI is the generic division of American Home Products, Inc., which changed its name to Wyeth in 2002. Melody Peterson, *American Home Is Changing Name to Wyeth*, New York Times, Mar. 11, 2002. Wyeth was subsequently acquired by Pfizer, Inc. in 2009. Pfizer, "Wyeth Transaction," http://www.pfizer.com/investors/ shareholder_services/wyeth_transaction.jsp (last visited May 8, 2012). Plaintiffs settled their claims against ESI's corporate parent Wyeth in January 2005.

In March 2001, the FTC filed a complaint against Schering, Upsher, and ESI alleging that Schering's settlements with **[*207]** Upsher and ESI unreasonably restrained commerce in violation of Section 5 of the Federal Trade Commission Act, *15 U.S.C. § 45*. Specifically, the FTC alleged that the settlement payments from Schering to Upsher and ESI constituted reverse payments intended to delay generic entry and improperly preserve Schering's monopoly.

In June 2002, after a lengthy trial, the Administrative Law Judge ("ALJ") issued an initial decision dismissing the FTC's complaint and finding that neither agreement violated Section 5 of the FTC Act. *In re Schering-Plough Corp., Initial Decision, 136 F.T.C. 956, 1092, 1263 (2002)*. The ALJ found that there was no reverse payment in the Schering-Upsher agreement because **[**17]** the licensing deal included in that agreement was separately valued and was not a payment to Upsher to delay generic entry. *Id. at 1243*. The ALJ also found that the Schering-ESI agreement was not an attempt to unlawfully preserve Schering's monopoly power in the market. *Id. at 1236, 1262-63*.

In December 2003, the FTC unanimously reversed the ALJ's ruling, finding that there was a "direct nexus between Schering's payment and Upsher's agreement to delay its competitive entry" and that this agreement "unreasonably restrain[ed] commerce." *In re Schering-Plough Corp., Final Order, 136 F.T.C. 956, 1052 (2003)*. The FTC likewise found that the ESI settlement violated ***antitrust law***, noting that Schering had not attempted to rebut the natural presumption that the payment to ESI was for delay in generic entry, except to argue unpersuasively that the parties felt judicial pressure to settle. *Id. at 1056-57*. In making these determinations, the FTC found that it was "neither necessary nor helpful to delve into the merits of the [underlying patent disputes]." *Id. at 1055*. Rather, the FTC determined that, where a name brand pharmaceutical maker pays a generic manufacturer as part of a settlement, "[a]bsent **[**18]** proof of other offsetting consideration, it is logical to conclude that the *quid pro quo* for the payment was an agreement by the generic to defer entry beyond the date that represents an otherwise reasonable litigation compromise." *Id. at 988*. In applying the rule of reason, the FTC concluded that the possible existence of a reverse payment raises a red flag and can give rise to a prima facie case that an agreement is anticompetitive. *Id. at 991, 1000-01*. The FTC concluded that the reverse payment at issue was illegal because the settling parties could show neither (1) that the payment was for something other than delay of generic entry nor (2) that the payment had pro-competitive effects. *Id. at 988-89, 1061*.

Schering appealed the FTC's ruling to the Eleventh Circuit, which reversed in *Schering-Plough Corp. v. FTC, 402 F.3d 1056 (11th Cir. 2005)*. The Eleventh Circuit's ruling in *Schering-Plough* is discussed in Section III(C) *infra*.

E. The Instant Litigation

Separate from the FTC's challenge, various private parties filed antitrust suits attacking the settlements. Those suits, the matters giving rise to this appeal, were consolidated in the District of New Jersey by the Judicial Panel **[**19]** on Multidistrict Litigation. In 2006, by consent of the parties, the District Court appointed Stephen Orlofsky as Special Master with responsibility to handle all motions, including motions for class certification and summary judgment.[5]

[*208] On April 14, 2008, the Special Master certified a class of plaintiffs consisting of forty-four wholesalers and retailers who purchased K-Dur directly from Schering. The District Court adopted that decision on December 30, 2008.[6]

---

[5] Because there was no objection to the appointment of a Special Master, we have no occasion to address the use of Special Master to prepare Reports and Recommendations on summary judgment motions. *See In re Bituminous Coal Operators' Ass'n, Inc., 949 F.2d 1165, 1168, 292 U.S. App. D.C. 309 (D.C. Cir. 1991)* ("*Rule 53 of the Federal Rules of Civil Procedure* authorizes the appointment of special masters to *assist*, not to replace, the adjudicator, whether judge or jury, constitutionally indicated for federal court litigation.") (emphasis in original) (*citing La Buy v. Howes Leather Co., Inc., 352 U.S. 249, 256, 77 S. Ct. 309, 1 L. Ed. 2d 290 (1957))*.

In February 2009, the Special Master issued a Report and Recommendation **[**20]** granting defendants' motions for summary judgment and denying plaintiffs' motions for partial summary judgment. In his Report and Recommendation, **[***1503]** the Special Master applied a presumption that Schering's '743 patent was valid and that it gave Schering the right to exclude infringing products until the end of its term, including through reverse payment settlements. Under this analysis, the settlements in this case would only be subject to antitrust scrutiny if (1) they exceeded the scope of the '743 patent or (2) the underlying patent infringement suits were objectively baseless. The Special Master determined that neither of these exceptions applied. The District Court subsequently adopted the Report and Recommendation in its entirety.

F. Economic Background and the History of Reverse Payment Settlements

Reverse payment settlements appear to be unique to the Hatch-Waxman context, and the FTC has made them a top enforcement priority in recent years. A 2010 analysis by the FTC found that reverse payment settlements cost consumers $3.5 billion annually. FTC, *Pay-for-Delay: How Drug Company Pay-Offs Cost Consumers Billions* 2 (2010), *available at* http://www.ftc.gov/os/2010/01/100112 payfordelayrpt.pdf. **[**21]** The FTC estimates that about one year after market entry an average generic pharmaceutical product takes over ninety percent of the patent holder's unit sales and sells for fifteen percent of the price of the name brand product. *Id*. at 8. This price differential means that consumers, rather than generic producers, are typically the biggest beneficiaries of generic entry.

III. THE ANTITRUST ISSUE (Appeals Nos. 10-2077, 10-2078, 10-2079)

A. Jurisdiction and Standard of Review

The District Court had jurisdiction pursuant to *15 U.S.C. § 15(a)* and *28 U.S.C. §§ 1331* and *1337*. ***HN1***[] This court has jurisdiction over the antitrust appeals pursuant to *28 U.S.C. § 1291*.

HN2[] This court exercises plenary review of the District Court's grant of summary judgment, applying the same summary judgment standard that guides the District Court. *Eichenlaub v. Twp. of Indiana, 385 F.3d 274, 279 (3d Cir. 2004)*.

B. General Antitrust Standard

The Sherman Act provides, in part, that ***HN3***[] "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. ***HN4***[] Under a literal reading, this provision **[**22]** would make illegal every agreement **[*209]** in restraint of trade. *See* *Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 342, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. However, it has not been so interpreted. Rather the Supreme Court has long construed it to prohibit only unreasonable restraints. *See* *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Whether a restraint qualifies as unreasonable and therefore conflicts with the statute is normally evaluated under the "rule of reason." *Id*. Applying this approach, "the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *Id*. This inquiry has been divided into three parts. First, the plaintiff must show that the challenged conduct has produced anti-competitive effects within the market. *United States v. Brown Univ., 5 F.3d 658, 668 (3d Cir. 1993)*. If the plaintiff meets the initial burden, "the burden shifts to the defendant to show that the challenged conduct promotes a sufficiently pro-competitive objective." *Id. at 669*. **[**23]** Finally, the plaintiff

---

[6] The class certification decision is discussed in Section IV *infra*.

can rebut the defendant's purported pro-competitive justification by showing that the restraint is not reasonably necessary to achieve the pro-competitive objective. *Id*.

HN5[] Courts have recognized, however, that "[s]ome types of restraints . . . have such predictable and pernicious anticompetitive effect, and such limited potential for pro-competitive benefit, that they [should be] deemed unlawful *per se*." *State Oil Co., 522 U.S. at 10*. Examples of agreements that have been held unlawful pursuant to the *per se* rule include horizontal price fixing, output limitations, market allocation, and group boycotts. *See* *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*; *N. Pac. Ry. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. The *per se* rule is applied where a "practice facially appears to be one that would always or almost always tend to restrict competition or decrease output." *Broad. Music, Inc. v. CBS, Inc., 441 U.S. 1, 19-20, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*.

In some situations, courts apply an antitrust analysis that falls between the full rule of reason inquiry on the one hand and the rigid *per se* approach on the other. This so-called **[***1504]** "quick look" or "truncated rule of reason" analysis **[**24]** applies where the plaintiff has shown that the defendant has engaged in practices similar to those subject to *per se* treatment. *See* *Brown Univ., 5 F.3d at 669*. Having so shown, plaintiff is not required to make a full showing of anti-competitive effects within the market; rather defendant has the burden of demonstrating pro-competitive justifications. *Id*.

C. Precedent from Other Circuits

Neither this court nor the Supreme Court has yet weighed in on the legality of reverse payment settlements. However, five other circuits have addressed the question. Two of those courts — the first two to consider the question — concluded that such agreements should be subject to strict antitrust scrutiny, at least where the settling parties attempted to manipulate the 180-day exclusivity period to block all potential generic competition. The three courts to address the question of reverse payments more recently have reached a contrary result, ruling that such agreements are permissible so long as they do not exceed the potential exclusionary scope of the patent.

[*210] 1. D.C. Circuit — *Andrx Pharms., Inc. v. Biovail Corp. Int'l, 256 F.3d 799, 347 U.S. App. D.C. 178 (D.C. Cir. 2001)*

The D.C. Circuit considered a reverse payment in *Andrx Pharmaceuticals, Inc. v. Biovail Corp. International, 256 F.3d 799, 347 U.S. App. D.C. 178 (D.C. Cir. 2001)*, **[**25]** *cert. denied*, *535 U.S. 931, 122 S. Ct. 1305, 152 L. Ed. 2d 216 (2002)*. Unlike the instant case, that case did not involve a settlement resolving patent litigation. Rather, while allowing the patent litigation to continue, the name brand manufacturer agreed to compensate the would-be generic producer to delay marketing a generic product.

In September 1995, Andrx Pharmaceuticals ("Andrx") filed an ANDA seeking to manufacture and sell a generic form of Cardizem CD, a heart drug for which Hoechst Marion Russell, Inc. ("HMRI") held the patent. *Id. at 803*. Andrx filed a paragraph IV certification and was timely sued for patent infringement by HMRI. *Id*. The filing of the patent infringement suit triggered the thirty-month waiting period during which the FDA could not give final approval to Andrx or any subsequent ANDA applicants seeking to make a generic version of Cardizem CD. *Id*. (citing *21 U.S.C. § 355(j)(5)(B)(iii)*). In June 1997, a second generic manufacturer, Biovail Corp. International ("Biovail"), filed an ANDA and a paragraph IV certification to produce generic Cardizem CD. Shortly thereafter, the FDA issued a tentative approval of Andrx's ANDA. *Id*.

Soon after the tentative approval was issued, HMRI and Andrx entered **[**26]** into an agreement pursuant to which HMRI would pay Andrx $40 million per year beginning on the date that Andrx received final approval from the FDA and ending on the date that Andrx either began selling generic Cardizem CD or was adjudged liable for patent infringement in the pending suit. *Id*. The apparent purpose of this agreement was to create a bottleneck by delaying the triggering of Andrx's 180-day period of exclusivity, and thereby delaying generic entry not only by Andrx but also by any other potential generic manufacturer. *Id. at 804*.

The D.C. Circuit reversed the district court's dismissal with prejudice of Biovail's antitrust claims, holding that the agreement between HMRI and Andrx could "reasonably be viewed as an attempt to allocate market share and preserve monopolistic conditions." *Id. at 811*. The D.C. Circuit treated the payment from HMRI to Andrx as *prima facie* evidence of an illegal agreement not to compete, noting that "Andrx's argument that any rational actor would wait for resolution of the patent infringement suit [before triggering the 180-day exclusivity period] is belied by the *quid* of HRMI's *quo*." *Id. at 813*.

2. Sixth Circuit — *In re Cardizem CD Antitrust Litig., 332 F.3d 896 (6th Cir. 2003)*

The **[**27]** Sixth Circuit's decision of *In re Cardizem CD Antitrust Litigation* concerned the same agreement considered by the D.C. Circuit in *Andrx*. *332 F.3d 896 (6th Cir. 2003)*, *cert. denied*, *543 U.S. 939, 125 S. Ct. 307, 160 L. Ed. 2d 248 (2004)*. The Sixth Circuit case was brought by direct and indirect purchasers of Cardizem CD who alleged that they suffered antitrust harm as a result of Andrx's agreement with HRMI to delay market entry. *Id. at 903-04*. The Sixth Circuit held that the Andrx-HRMI agreement was "a horizontal agreement to eliminate competition in the market for Cardizem CD throughout the entire United States, a classic example of a *per se* illegal restraint of trade." *Id. at 908*.

While both *Cardizem* and *Andrx* concerned an agreement that caused a bottleneck **[*211]** by preventing other generic manufactures from entering the market by delaying the triggering of the first filer's 180-day exclusivity period, **[***1505]** much of the Sixth Circuit's reasoning in *Cardizem* is equally applicable to cases, like the instant one, that do not involve bottlenecking. Specifically, the Sixth Circuit emphasized its concern that, even setting aside the bar to subsequent generic applicants, HMRI had paid Andrx not to enter the market itself, stating, "it **[**28]** is one thing to take advantage of a monopoly that naturally arises from a patent, but another thing altogether to bolster the patent's effectiveness in inhibiting competitors by paying the only potential competitor $40 million per year to stay out of the market." *Id. at 908*.

3. Eleventh Circuit — *Valley Drug Co. v. Geneva Pharms., Inc., 344 F.3d 1294 (11th Cir. 2003)* and *Schering-Plough Corp. v. FTC, 402 F.3d 1056 (11th Cir. 2005)*

The Eleventh Circuit has also considered the question of reverse payments settlements in three significant cases. The first of these, *Valley Drug Co. v. Geneva Pharmaceuticals, Inc., 344 F.3d 1294 (11th Cir. 2003)*, *cert. denied*, *543 U.S. 939, 125 S. Ct. 308, 160 L. Ed. 2d 248 (2004)*, concerned two agreements arising out of cases where a name brand drug manufacturer sued generic manufacturers for patent infringement and the generic manufacturers defended on the ground of patent invalidity.[7] *Id. at 1299-301*. In the two agreements at issue, the name brand manufacturer agreed to pay the generic manufacturer substantial sums to refrain from entering the market until the end of the name brand manufacturer's patent term. *Id. at 1300*. The patent at issue was subsequently declared invalid in another **[**29]** case. *Id. at 1306-07*. The district court granted summary judgment to antitrust plaintiffs, holding that the settlements were *per se* violations of the Sherman Act. *Id. at 1301*. The Eleventh Circuit reversed on the ground that the name brand manufacturer held a patent that gave it the right to exclude competitors. *Id. at 1306*. In so ruling, the court emphasized the fact that the name brand manufacturer might have prevailed in the underlying patent litigation, *id. at 1309*, and highlighted policy considerations favoring the settlement of patent litigation, *id. at 1308 n.20*. The court applied neither a *per se* nor rule of reason analysis to the agreements as a whole; rather, it directed the district court to first determine whether any part of the agreement went beyond the protections afforded by the name brand manufacturer's patent and, if so, to apply traditional antitrust scrutiny only to those portions of the agreement. *Id. at 1311-1312*.

---

[7] One of these agreements was a final settlement of certain claims, the other was structured, like the agreements in *Andrx* and *Cardizem*, to take effect even as the litigation continued. *See* *Valley Drug, 344 F.3d at 1300*.

A subsequent Eleventh Circuit case, **[**30]** *Schering-Plough Corp. v. FTC*, arose out of the same settlement agreement as the instant appeal.[8] *402 F.3d 1056 (11th Cir. **[*212]** 2005)*, *cert. denied*, *548 U.S. 919, 126 S. Ct. 2929, 165 L. Ed. 2d 977 (2006)*. After the FTC found that both agreements violated antitrust laws, the defendants appealed to the Eleventh Circuit. Applying the test articulated in *Valley Drug*, the Eleventh Circuit set aside the ruling of the FTC. *Id. at 1065-66, 1076*. The court rejected the FTC's conclusion that Schering's $60 million payment to Upsher was for something other than the licenses it obtained, finding by "overwhelming evidence" that the payment was only for the licenses. *Id. 1069-71*. As such, the court found that there was no reverse payment from Schering to Upsher and thus necessarily no antitrust violation in that agreement. *Id*. With respect to the ESI settlement, the court acknowledged the presence of a reverse payment but concluded that the payment was acceptable in light of judicial policy favoring settlements and the court's finding that the settlement terms "'reflect[ed] a reasonable implementation' of the protections afforded by patent law." *Id. at 1072* (quoting *Valley Drug, 344 F.3d at 1312*).[9]

[*1506]** Plaintiffs construe *Valley Drug* and *Schering-Plough* as requiring courts to conduct an *ex post* evaluation of the strength of the underlying patent before determining whether the patent shields an agreement from antitrust scrutiny. However, following oral argument **[**32]** in this case, the Eleventh Circuit explicitly rejected that interpretation of its prior holdings. In *FTC v. Watson Pharmaceuticals, Inc*., the Eleventh Circuit clarified that its prior opinions did not call for an evaluation of the strength of the patent but rather only a determination whether, absent sham litigation or fraud in obtaining the patent, the settlement agreement exceeded the scope of the patent. *FTC v. Watson Pharms, Inc., 677 F.3d 1298, 2012 WL 1427789, at *11 n.8, *12 (11th Cir. 2012)*. Thus the standard applied by the Eleventh Circuit is identical to the scope of the patent test applied by the Second Circuit to which we now turn.

4. Second Circuit — *In re Tamoxifen Citrate Antitrust Litig., 466 F.3d 187 (2d Cir. 2006)*

The Second Circuit's decision of *In re Tamoxifen Citrate Antitrust Litigation* arose out of an agreement settling a patent infringement suit over the drug tamoxifen, then the most widely prescribed drug for the treatment of breast cancer. *466 F.3d 187, 190 (2d Cir. 2006)*, *cert. denied*, *551 U.S. 1144, 127 S. Ct. 3001, 168 L. Ed. 2d 726 (2007)*. That settlement was reached while the patent case was on appeal after the district court had ruled the patent invalid. *Id*. The settlement called **[**33]** for the name brand manufacturer to grant the generic manufacturer a license to sell an unbranded version of tamoxifen and make a reverse payment of $21 million to the generic manufacturer. The settlement was contingent on obtaining a vacatur of the district court's judgment holding the patent to be invalid, which was subsequently obtained. *Id*.

Affirming the district court's dismissal of antitrust plaintiffs' claims, the Second Circuit applied a presumption of patent validity and held that "there is no injury to the market cognizable under existing ***antitrust law***, as long as competition is restrained only within the scope of the patent." *Id. at 213* (internal citations and quotation marks omitted). The only exceptions to this rule, the court held, occur where there is evidence that the patent was procured by fraud or that the enforcement **[*213]** suit was objectively baseless. *Id*. This test is commonly referred to as the "scope of the patent test" or the "*Tamoxifen* test." The Second Circuit conceded that there was a potentially troubling result of such a rule in that "[t]he less sound the patent or the less clear the infringement, and therefore the less justified the monopoly enjoyed by the patent **[**34]** holder, the more a rule permitting settlement

---

8 Defendants argue in passing that this **[**31]** court should begin its analysis in this case with a strong presumption in favor of following the Eleventh Circuit's decision in *Schering-Plough*. However, none of the cases cited by defendants employs such a presumption; rather, they stand for the unsurprising proposition that ***HN6***[] this court will follow the decisions of its sister courts where it finds them persuasive. *See, e.g., Ramadan v. Chase Manhattan Corp., 229 F.3d 194, 197-203 (3d Cir. 2000)* (following the rulings of other courts of appeal on similar facts but conducting an independent analysis). As explained below, we do not find the Eleventh Circuit's decision in *Schering-Plough* persuasive, and thus decline to follow it.

9 The Eleventh Circuit subsequently applied, without further significant explication, the scope of the patent test announced in *Valley Drug* and *Schering-Plough* in another case, *Andrx Pharmaceuticals, Inc. v. Elan Corporation, PLC, 421 F.3d 1227 (11th Cir. 2005)*.

is likely to benefit the patent holder by allowing it to retain the patent." *Id. at 211*. The court determined, however, that this risk was counterbalanced by the judicial preference for settlement. *Id*.

In reaching this conclusion, the Second Circuit concluded that "the Hatch-Waxman Act created an environment that encourages [reverse payments]" because, unlike traditional infringement suits where the patent holder can negotiate by agreeing to forego the infringement damages it expects to recover, there usually are no infringement damages in Hatch-Waxman suits. *Id. at 206*. The Second Circuit thus reasoned that the "reverse payments" common in Hatch-Waxman suits are less troubling because they take the place of infringement damages that the patent holder might have otherwise waived in order to reach a settlement. *Id*.

Judge Pooler dissented from the decision in *Tamoxifen*, contending that the scope of the patent rule applied by the majority "is not soundly grounded in Supreme Court precedent and is insufficiently protective of the consumer interests safeguarded by the Hatch-Waxman Act and the antitrust laws." *Id. at 224* (Pooler, J., dissenting). **[**35]** Judge Pooler argued, *inter alia*, that judicial reevaluation of patent validity is a public good that reverse payment settlements undercut, *id. at 225-26*, and suggested that the proper antitrust standard is one of reasonableness considering all the circumstances affecting a restrictive agreement including (1) the strength of the patent as it appeared at the time of settlement, (2) the amount of the reverse payment, (3) the amount the generic manufacturer would have made during its 180-day exclusivity period, and (4) any ancillary anti-competitive effects of the agreement. *Id. at 228*.

In a subsequent reverse payment case, *Arkansas Carpenters Health & Welfare Fund v. Bayer AG*, the Second Circuit applied the *Tamoxifen* standard and rejected an antitrust challenge to a Hatch-Waxman settlement involving a reverse payment. *604 F.3d 98 (2d Cir. 2010)*, *cert. denied*, *562 U.S. 1280, 131 S. Ct. 1606, 179 L. Ed. 2d 517 (2011)*. However, the judges on the *Arkansas Carpenters* panel made clear that they thought that *Tamoxifen* was wrongly **[***1507]** decided and invited appellants to petition for rehearing en banc. *Id. at 108-10*. Among other things, the *Arkansas Carpenters* court noted its concern about evidence suggesting that the number of reverse **[**36]** payment settlements had increased dramatically in the wake of the *Tamoxifen* decision. *Id. at 109*. Rehearing en banc was subsequently denied over a dissent from Judge Pooler. *Ark. Carpenters Health & Welfare Fund v. Bayer AG, 625 F.3d 779 (2d Cir. 2010)*.

5. Federal Circuit — *In re Ciprofloxacin Hydrochloride Antitrust Litig., 544 F.3d 1323 (Fed. Cir. 2008)*

In *In re Ciprofloxacin Hydrochloride Antitrust Litigation* the Federal Circuit considered a case related to those confronted by the Second Circuit in *Arkansas Carpenters. 544 F.3d 1323 (Fed. Cir. 2008)*, *cert. denied*, *557 U.S. 920, 129 S. Ct. 2828, 174 L. Ed. 2d 553 (2009)*.[10] The Federal **[*214]** Circuit applied the scope of the patent test explicated in *Tamoxifen* and other cases, stating, "[t]he essence of the inquiry is whether the agreements restrict competition beyond the exclusionary zone of the patent." *Id. at 1336*. The court further "agree[d] with the Second and Eleventh Circuits . . . that, in the absence of evidence of fraud before the PTO or sham litigation, the court need not consider the validity of the patent in the antitrust analysis of a settlement agreement involving a reverse payment." *Id*.

D. Analysis

HN7[] While the first two courts of appeal to address the issue of reverse payments subjected those agreements to antitrust scrutiny, later courts have gravitated toward the scope of the patent test under which reverse payments are permitted so long as (1) the exclusion does not exceed the patent's scope, (2) the patent holder's claim of infringement was not objectively baseless, and (3) the patent was not procured by fraud on the PTO. The scope of the patent test was applied by the Special Master in this case and has been applied by at least one other district court in this circuit. *See King Drug Co. of Florence, Inc. v. Cephalon, Inc., 702 F. Supp. 2d 514, 528-29, 533 (E.D.*

[10] That case was severed by the Second Circuit and transferred to the Federal **[**37]** Circuit because it involved a claim arising out of patent law. *See* Order, No. 05-2863 (2d Cir. Nov. 7, 2007).

Pa. 2010) (applying scope of the patent test but denying defendants' motion to dismiss where plaintiffs pleaded facts supporting their claim that the underlying patent suit was objectively baseless). As a practical matter, the scope of the patent test does not subject reverse payment agreements to any antitrust scrutiny. As the antitrust defendants concede, no court applying the scope of the patent **[**38]** test has ever permitted a reverse payment antitrust case to go to trial.

After consideration of the arguments of counsel, the conflicting decisions in the other circuits, the Report of the Special Master, and our own reading, we cannot agree with those courts that apply the scope of the patent test. In our view, that test improperly restricts the application of ***antitrust law*** and is contrary to the policies underlying the Hatch-Waxman Act and a long line of Supreme Court precedent on patent litigation and competition.

First, we take issue with the scope of the patent test's almost unrebuttable presumption of patent validity. This presumption assumes away the question being litigated in the underlying patent suit, enforcing a presumption that the patent holder would have prevailed. We can identify no significant support for such a policy. ***HN8***[] While persons challenging the validity of a patent in litigation bear the burden of defeating a presumption of validity, this presumption is intended merely as a procedural device and is not a substantive right of the patent holder. *See* *Stratoflex, Inc. v. Aeroquip Corp., 713 F.2d 1530, 1534 (Fed. Cir. 1983)* ("The presumption, like all legal presumptions, **[**39]** is a procedural device, not substantive law."). Moreover, the effectively conclusive presumption that a patent holder is entitled to exclude competitors is particularly misguided with respect to agreements — like those here — where the underlying suit concerned patent infringement rather than patent validity: ***HN9***[] In infringement cases it is the patent holder who bears the burden of showing infringement. *See* *Egyptian Goddess, Inc. v. Swisa, Inc., 543 F.3d 665, 679 (Fed. Cir. 2008)*.

Rather than adopt an unrebuttable presumption of patent validity, we believe ***HN10***[] **[*215]** courts must be mindful of the fact that "[a] patent, in the last analysis, simply represents a legal conclusion reached by the Patent Office." *Lear, Inc. v. Adkins, 395 U.S. 653, 670, 89 S. Ct. 1902, 23 L. Ed. 2d 610 (1969)*. Many patents issued by the PTO are later found to be invalid or not infringed, and a 2002 study conducted by the FTC concluded that, in Hatch-Waxman challenges made under paragraph IV, the generic challenger prevailed **[***1508]** seventy-three percent of the time. *See* FTC, *Generic Drug Entry Prior to Patent Expiration* 16 (2002), *available at* *http://www.ftc.gov/os/2002/07/genericdrugstudy.pdf;* Kimberly A. Moore, *Judges, Juries, and Patent Cases — An Empirical* ***[**40]*** *Peek Inside the Black Box*, *99 Mich. L. Rev. 365, 385 (2000)* (noting that between 1983 and 1999 the alleged infringer prevailed in forty-two percent of patent cases that reached trial).[11] These figures add force to the likelihood — conceded by the *Tamoxifen* majority — that reverse payments enable the holder of a patent that the holder knows is weak to buy its way out of both competition with the challenging competitor and possible invalidation of the patent. *466 F.3d at 211* ("The less sound the patent or the less clear the infringement, and therefore the less justified the monopoly enjoyed by the patent holder, the more a rule permitting settlement is likely to benefit the patent holder by allowing it to retain the patent.").

Moreover, we question the assumption underlying the view of the Second Circuit and other courts that subsequent challenges by other generic manufacturers will suffice to eliminate weak patents preserved through a reverse payment to the initial challenger. *Cf., e.g., id. at 211-12*. We note that the initial generic challenger is necessarily the most motivated because, unlike all subsequent challengers, it stands to benefit from the 180-day exclusivity period of *21 U.S.C. § 355(j)(5)(B)(iv)*. Additionally, as the experience of at least one court in this Circuit confirms, the high profit margins of a monopolist drug manufacturer may enable it to pay off a whole series of challengers rather than suffer the possible loss of its patent through litigation. *See* *King Drug Co. of Florence, Inc., 702 F. Supp. 2d at 521-22* (drug manufacturer settled infringement suits by four generic firms, which agreed to delay market entry "in

[11] The Pharmaceutical Research and Manufacturers of America points to a more recent study concluding that, in the years from 2000 to 2009, generics prevailed in slightly less than half of their challenges. RBC Capital Mkts., *Pharmaceuticals: Analyzing Litigation Success Rates* 4 (2010), *available at* *http://www.amlawdaily.typepad.com/pharmareport.pdf*. Even if the industry's own figures are accepted, they show that a substantial fraction of Hatch-Waxman patent challenges **[**41]** succeed on the merits. Moreover, the study cited by the industry further states that "when you take into account patent settlements and cases that were dropped, the success rate for generics jumps to 76%, substantially in favor of challenging patents." *Id*.

exchange for significant **[**42]** payments . . . for various licensing agreements, supply agreements and research and development deals").

This practical analysis is supported by a long line of Supreme Court cases recognizing that ***HN11***[] valid patents are a limited exception to a general rule of the free exploitation of ideas. It follows that the public interest supports judicial testing and elimination of weak patents. *See* *Cardinal Chem. Co. v. Morton Int'l, Inc., 508 U.S. 83, 100-01, 113 S. Ct. 1967, 124 L. Ed. 2d 1 (1993)* (explaining the "importance to the public at large of resolving questions of patent validity" and noting the danger of "grant[ing] monopoly privileges to the holders of invalid patents"); *Bonito Boats, Inc. v. Thundercraft Boats, Inc.,* ***[*216]*** *489 U.S. 141, 146, 109 S. Ct. 971, 103 L. Ed. 2d 118 (1989)* (noting that the patent laws embody "a careful balance between the need to promote innovation and the recognition that imitation and refinement through imitation are both necessary to invention itself and the very lifeblood of a competitive economy"); *United States v. Masonite Corp., 316 U.S. 265, 277, 62 S. Ct. 1070, 86 L. Ed. 1461, 1942 Dec. Comm'r Pat. 777 (1942)* (a patent "affords no immunity for a monopoly not fairly or plainly within the grant"); *id. at 280* (patents are to be "strictly construed" because they are "privileges restrictive **[**43]** of a free economy"); *Pope Mfg. Co. v. Gormully, 144 U.S. 224, 234, 12 S. Ct. 632, 36 L. Ed. 414, 1892 Dec. Comm'r Pat. 343 (1892)* ("It is as important to the public that competition should not be repressed by worthless patents, as that the patentee of a really valuable invention should be protected in his monopoly.").

That reasoning underlies the decision of the Supreme Court in *Edward Katzinger Co. v Chicago Metallic Manufacturing Co*., where the Court considered whether a patent licensor could be contractually estopped from challenging the validity of the patent under a licensing agreement that also contained a price fixing term. *329 U.S. 394, 67 S. Ct. 416, 91 L. Ed. 374 (1947)*. The Court reasoned that ***HN12***[] if the patent was invalid, the price fixing provision would violate federal ***antitrust law*** and that, as such, the licensor could not be estopped from challenging the patent. *Id. at 399, 401-02*. In reaching this conclusion the Court emphasized "the broad public interest in freeing our competitive economy from the trade restraints which might be imposed by price-fixing agreements stemming from narrow or invalid patents." *Id. at 400* (citing *Sola Elec. Co. v. Jefferson Elec. Co., 317 U.S. 173, 177, 63 S. Ct. 172, 87 L. Ed. 165, 1943 Dec. Comm'r Pat. 765 (1942))*. The Court additionally stated: "It is the public interest which is **[**44]** dominant in the patent system and . . . the right to challenge [a patent] is not only a private right **[***1509]** to the individual, but it is founded on public policy which is promoted by his making the defence, and contravened by his refusal to make it." *Id. at 401* (internal citations and quotation marks omitted).

This logic is persuasive with respect to the situation at bar because reverse payments permit the sharing of monopoly rents between would-be competitors without any assurance that the underlying patent is valid. *See also* *United States v. Studiengesellschaft Kohle, m.b.H., 670 F.2d 1122, 1136, 216 U.S. App. D.C. 303 (D.C. Cir. 1981)* (suggesting an agreement might be anticompetitive if it "give[s] potential competitors incentives to remain in cartels rather than turning to another product, inventing around the patent, or challenging its validity"). It appears that these aspects of the Supreme Court's general patent jurisprudence had been overlooked by the Special Master and others adopting the scope of the patent test.

We caution that our decision today is limited to reverse payments between patent holders and would be generic competitors in the pharmaceutical industry. As the Supreme Court has made clear, ***HN13***[] "antitrust **[**45]** analysis must sensitively recognize and reflect the distinctive economic and legal setting of the regulated industry to which it applies." *Verizon Commc'ns. Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 411-12, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*; *see also* IA Phillip E. Areeda & Herbert Hovenkamp ***Antitrust Law***, ¶ 240d, 289 (3d ed. 2006) ("[T]he presence of regulation in some instances limits the antitrust role and in some instances simply changes it or even enlarges it."). The Supreme Court's admonition is particularly relevant in an **[*217]** industry, like the pharmaceutical industry, that is subject to extensive regulation in which Congress has balanced the protection of intellectual property and the need for competition. Specifically, ***HN14***[] in passing the Hatch-Waxman Act, Congress drew a careful line between patent protection and the need to provide incentives for competition in the pharmaceutical industry. *See* 130 Cong. Rec. 24425 (Sept. 6, 1984) (statement of Rep. Waxman underscoring the "fundamental balance of the bill"); H.R. Rep. No. 98-857, pt. 2, at 30 (1984) (emphasizing that the bill achieves "what the Congress has traditionally done in the area of intellectual property law[:] balance the need to stimulate **[**46]** innovation against the goal of furthering the public interest"), *reprinted in* 1984 U.S.C.C.A.N. 2686,

2715. The line that Congress drew between these competing objectives strongly supports the application of rule of reason scrutiny of reverse payment settlements in the pharmaceutical industry.

HN15[] The goal of the Hatch-Waxman Act is to increase the availability of low cost generic drugs. H.R. Rep. No. 98-857, pt. 1, at 14, *reprinted in* 1984 U.S.C.C.A.N. 2647, 2647. One method Congress employed was to encourage litigated challenges by generic manufacturers against the holders of weak or narrow patents. *See* *21 U.S.C. § 355(j)(5)(B)(iv)* (establishing 180-day exclusivity period as reward for successfully challenging a patent); S. Rep. No. 107-167, at 4 (2002) ("Under Hatch-Waxman, manufacturers of generic drugs are encouraged to challenge weak or invalid patents on brand name drugs so consumers can enjoy lower drug prices."). That goal is undermined by application of the scope of the patent test which entitles the patent holder to pay its potential generic competitors not to compete. As one commentator has noted, this approach nominally protects intellectual property, not on the strength of **[**47]** a patent holder's legal rights, but on the strength of its wallet. *See* Hemphill, *Paying for Delay, supra* at 1614 ("In the Hatch-Waxman Act . . . the promotion and delay of litigation are central preoccupations of the regulatory regime. An open-ended permission for innovators to set innovation policy by self-help [through reverse payments] is less plausible, as Congress has taken explicit steps to fill those gaps.") As the Second Circuit acknowledged in its *Tamoxifen* decision, the principal beneficiaries of such an approach will be name brand manufacturers with weak or narrow patents that are unlikely to prevail in court. *See* *466 F.3d at 211*. Thus while such a rule might be good policy from the perspective of name brand and generic pharmaceutical producers, it is bad policy from the perspective of the consumer, precisely the constituency Congress was seeking to protect.

In rejecting the scope of the patent test, we are cognizant that such a test encourages settlement, an objective our decisions generally support. *See, e.g., Ehrheart v. Verizon Wireless, 609 F.3d 590, 595 (3d Cir. 2010)* ("Settlement agreements are to be encouraged because they promote the amicable resolution of disputes **[**48]** and lighten the increasing load of litigation faced by the federal courts."). However, ***HN16***[] the judicial preference for settlement, while generally laudable, should not displace countervailing public policy objectives or, in this case, Congress's determination — which is evident from the structure of the Hatch- **[***1510]** Waxman Act and the statements in the legislative record — that litigated patent challenges are necessary to protect consumers from unjustified monopolies by name brand drug manufacturers. We also emphasize that nothing in the rule of reason test that we adopt here limits the ability of the parties to reach settlements based on a negotiated entry date for marketing **[*218]** of the generic drug: the only settlements subject to antitrust scrutiny are those involving a reverse payment from the name brand manufacturer to the generic challenger. Data analyzed by the FTC suggest that this will leave the vast majority of pharmaceutical patent settlements unaffected. *See* FTC, Bureau of Competition, *Agreements Filed with the Federal Trade Commission under the Medicare Prescription Drug, Improvement, and Modernization Act of 2003: Overview of Agreements Filed in FY 2010*, 2 (2011) (showing that nearly **[**49]** seventy-five percent of Hatch-Waxman Act infringement suits that settled in 2010 did so without reverse payments), *available at* *http://www.ftc.gov/os/2011/05/1105mmagreements.pdf*.

For all of these reasons ***HN17***[] we reject the scope of the patent test. In its place we will direct the District Court to apply a quick look rule of reason analysis based on the economic realities of the reverse payment settlement rather than the labels applied by the settling parties. Specifically, the finder of fact must treat any payment from a patent holder to a generic patent challenger who agrees to delay entry into the market as *prima facie* evidence of an unreasonable restraint of trade, which could be rebutted by showing that the payment (1) was for a purpose other than delayed entry or (2) offers some pro-competitive benefit.

In holding that a reverse payment is *prima facie* evidence of an unreasonable restraint of trade, we follow the approach suggested by the DC Circuit in *Andrx* and embrace that court's common sense conclusion that "[a] payment flowing from the innovator to the challenging generic firm may suggest strongly the anticompetitive intent of the parties entering the agreement . . . ." *256 F.3d at 809* **[**50]** (internal quotation marks and citation omitted).

We agree, moreover, with the FTC that ***HN18***[] there is no need to consider the merits of the underlying patent suit because "[a]bsent proof of other offsetting consideration, it is logical to conclude that the *quid pro quo* for the payment was an agreement by the generic to defer entry beyond the date that represents an otherwise reasonable litigation compromise." *In re Schering-Plough Corp., Final Order, 136 F.T.C. at 988*. Of course, a patent holder may attempt to rebut plaintiff's *prima facie* case of an unreasonable restraint of trade by arguing that there is in fact no reverse payment because any money that changed hands was for something other than a delay in market entry. Alternatively, the patent holder may attempt to rebut the *prima facie* case by demonstrating that the reverse payment offers a competitive benefit that could not have been achieved in the absence of a reverse payment. This second possible defense attempts to account for the — probably rare — situations where a reverse payment increases competition. For example, a modest cash payment that enables a cash-starved generic manufacturer to avoid bankruptcy and begin marketing a **[**51]** generic drug might have an overall effect of increasing the amount of competition in the market. For the reasons set forth, we will reverse the judgment of the District Court and remand for further proceedings in accordance with the foregoing.

IV. THE CLASS CERTIFICATION ISSUE (Appeal No. 10-4571)

A. Procedural Background

The other issue before us on this appeal concerns plaintiffs' effort to certify a class of persons who purchased K-Dur directly from Schering between November 20, 1998 and September 1, 2001 and subsequently purchased a generic version of K-Dur. As identified by the parties' experts, the class **[*219]** consists of forty-four wholesalers and retailers. The Special Master recommended granting plaintiffs' motion to certify the class. The District Court adopted the Special Master's Report and Recommendation and formally certified the class.

Defendants sought interlocutory review of the District Court's order under *Federal Rule of Civil Procedure 23(f)*. While that petition was pending, the District Court ruled on the cross motions for summary judgment and entered final judgment in defendants' favor. Plaintiffs filed a notice of appeal, and defendants filed a cross appeal, which this **[**52]** court dismissed as untimely. *See* Order, *In re K-Dur Antitrust Litig*., No. 10-2727 (3d Cir. Nov. 24, 2010). However, this court accepted defendants' *Rule 23(f)* petition, *see* Order, *In re K-Dur Antitrust Litig*., No. 09-8006 (3d Cir. **[***1511]** Nov. 16, 2010), and we therefore have jurisdiction pursuant to *28 U.S.C. § 1292(e)*.[12]

B. Standard of Review

HN20[] This court reviews class certification orders "for abuse of discretion, which occurs if the district court's decision rests upon a clearly erroneous finding of fact, an errant conclusion of law or an improper application of law to fact." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 312 (3d Cir. 2008)* **[**53]** (internal quotation marks and citation omitted).

C. Defendants' Arguments

HN21[] In order to certify a class under *Rule 23(b)(3)*, a plaintiff must satisfy both the general class action prerequisites — numerosity, commonality, typicality, and adequacy of representation — and the additional requirements of predominance and superiority. *Fed. R. Civ. P. 23(a)*, *(b)(3)*. The Special Master, in a report adopted in full by the District Court, discussed the class requirements in detail; defendants challenge only a few of those findings. Defendants assert that (1) plaintiffs cannot use common evidence to prove that the class members suffered an actual injury from defendants' conduct because showing actual injury means demonstrating lost profits

---

[12] Plaintiffs argue that because defendants' cross appeal was dismissed as untimely defendants' 23(f) petition should have been dismissed also. ***HN19***[] An appeals court has discretion to consider an interlocutory appeal even after the entry of final judgment. *Cf. In re Coordinated Pretrial Proceedings in Petroleum Prods. Antitrust Litig., 788 F.2d 1571, 1573-74 (Temp. Emer. Ct. App. 1986)*. Moreover, in granting defendants' 23(f) petition, this court has already considered the issue of the appropriateness of review, and we see no reason to reconsider the decision to hear this appeal.

damages, which defendants argue necessarily requires individualized assessments, (2) even assuming that overcharges are an acceptable form of injury, the District Court erred in its conclusion that there was common evidence of injury to all class members, and (3) the class should not have been certified because of inherent conflicts between members. Defendants' first two arguments challenge the District Court's finding with respect to the predominance requirement, **[**54]** while the third goes to the adequacy requirement. We address these arguments in order.

1. Predominance Issues

HN22[] In order for the predominance requirement to be satisfied "[i]ssues common to the class must predominate over individual issues." *In re Hydrogen Peroxide, 552 F.3d at 311* (internal citations and quotation marks omitted). Class certification calls for the district court to conduct a "rigorous assessment of the available evidence," *id. at 312*, and is only appropriate in antitrust cases where plaintiffs can show, by a preponderance of the evidence, **[*220]** that proof of the essential elements of the cause of action, including antitrust injury, do not require individual treatment. *Id. at 307, 311*.

It is plaintiffs' thesis that they will prove that class members paid more for K-Dur because of Schering's antitrust violations, and that this constitutes the required antitrust impact. The Special Master accepted this based on Third Circuit law, stating:

> ***HN23***[] The Third Circuit has held that "when an antitrust violation impacts upon a class of persons who do have standing, there is no reason in doctrine why proof of impact cannot be made on a common basis, so long as the common proof adequately demonstrates **[**55]** some damage to each individual."

App. at 7980 (quoting *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 454 (3d Cir. 1977))*. Because all of the class members purchased some of the generic versions of K-Dur, plaintiffs have satisfactorily explained their theory of impact.

Plaintiffs proposed to prove antitrust injury through common proof consisting largely of the declarations and report of their expert, Dr. Leitzinger. Dr. Leitzinger offered statistical and economic analyses of the overall brand-name and generic drug market and of the specific entry of generic potassium chloride in the market to show that, but for the challenged reverse payment agreements, "all (or virtually all) members of the proposed class" would have purchased at least some less expensive generic potassium chloride earlier, and therefore suffered an antitrust injury as a result of the delay in generic entry. The Special Master considered Dr. Leitzinger's proposed methodology and the criticisms of it made by defendants' expert, Dr. Rubinfeld, in detail. After slightly narrowing the class definition to accommodate a criticism made by defendants' expert,[13] the Special Master found that plaintiffs had satisfied their burden **[**56]** of showing that antitrust impact may be proven by evidence common to all class members. **[***1512]**

In December 2008, several months after the Special Master's Report and Recommendation, this court issued its decision in *In re Hydrogen Peroxide Antitrust Litigation*, which clarified the standard to be applied when certifying a class of plaintiffs in an antitrust action. *552 F.3d 305*. In that case, we held that ***HN24***[] the preponderance requirement demands more than a mere threshold showing by a party seeking to certify a class and that, in considering a motion for class certification, a district court is required to resolve any factual or legal disputes necessary to determine whether a plaintiff will be able to show antitrust injury for all plaintiffs with common evidence. *Id. at 316-18*.

a. Whether Lost Profits Are the Relevant Antitrust Injury

---

[13] Specifically, the Special Master excluded from the class direct purchasers who did not purchase a generic version of K-Dur after generic entry.

Defendants argue first that the predominance requirement of *Rule 23(b)(3)* is not satisfied because, in order to prove actual injury from delayed generic entry, plaintiffs must produce evidence of lost profits, which necessarily **[**57]** requires an individual assessment for each class member. Defendants contend specifically that some of the wholesalers lost substantial sales volumes after generic entry, and that, for such wholesalers, generic entry caused a decrease in profits.

Defendants' lost profits argument is unavailing because it is simply a version of the so-called "passing-on defense" that was rejected by the Supreme Court in *Hanover Shoe, Inc. v. United Shoe Machinery Corporation.* ***[*221]*** *392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*. In that case, the Supreme Court held that demonstrating ***HN25***[] antitrust injury does not require a showing of lost profits. *Id. at 494*. Rather, the Supreme Court ruled that a plaintiff suffers an antitrust injury where it is overcharged for a product, regardless of whether it can show lost profits. *Id. at 492-95*. In reaching this conclusion, the Court noted that requiring plaintiffs to show lost profits was too burdensome on both courts and litigants and would undercut the effectiveness of private antitrust suits as an enforcement mechanism. *Id. at 492-94*; *see also* *Bogosian, 561 F.2d at 456* (noting that a lost-profits inquiry would be "enormously complicated, posing a tremendous burden on the presentation of plaintiffs' **[**58]** case" and that "it is precisely for this reason that the Supreme Court eliminated the 'passing-on defense' in *Hanover Shoe*").

Defendants argue that the *Hanover Shoe* rule should not apply here because that case involved an overcharge for an identical product whereas this one involves two different products, a name brand drug with a higher price and a lower priced generic drug. However, defendants cite no authority distinguishing *Hanover Shoe* on that basis, and their own expert conceded that the generic supplement that Schering began manufacturing after Upsher entered the market was made in the same plant as K-Dur and chemically identical to K-Dur. Moreover, in *In re Warfarin Sodium Antitrust Litigation*, this court affirmed class certification where plaintiffs sought overcharges — not lost profits — stemming from anti-competitive behavior that hindered their access to generic pharmaceuticals. *391 F.3d 516, 532 (3d Cir. 2004)*.

In sum, defendants' contention that plaintiffs are required to show lost profits in order to demonstrate antitrust injury is without support in law or the facts of this case. As such, we reject it.

b. Whether There Was Common Evidence of Injury to All Class Members

Defendants **[**59]** argue that because of discrepancies in the pricing of K-Dur and variations in purchaser behavior, plaintiffs cannot prove injury to all class members by common evidence, even if lost profits are not required to show antitrust injury. They contend further that the District Court applied the wrong standard in evaluating plaintiffs' evidence that antitrust injury could be proven by common evidence.

In support of their argument that antitrust injury requires an individualized assessment for each class member, defendants point to two places where purportedly conflicting evidence demonstrates the need for individualized assessment of antitrust harm. Defendants point out that they did not sell K-Dur to all customers at a single list price; rather, the price paid varied considerably among class members. Additionally, defendants argue that, for certain customers at certain times, Schering offered rebates which caused further price variation among customers. Defendants contend that these pricing variations caused several class members to have zero or negative damages under the formula applied by plaintiffs' expert. Finally, defendants point out that not all class members purchased generic potassium **[**60]** chloride as soon as it became available and argue that, in light of this variation in purchase timing, plaintiffs need to make an individualized showing that each plaintiff **[***1513]** would have purchased a generic product earlier if one had been available.

[*222] We do not read *Hydrogen Peroxide* as precluding a class because of variations in purchasing by a very small percentage of those who purchased K-Dur. As the Special Master recognized, defendants conceded "that 45 of the proposed Class members purchased <u>some</u> amount of generic K-Dur." App. at 7984 (emphasis in original). He noted that defendants' arguments "relate to the quantum of damages, rather than the fact of injury." *Id*. Indeed, in *Hydrogen Peroxide* itself, we focused on what was really at issue — that ***HN26***[] for certification plaintiff need not prove antitrust injury actually occurred.

> Plaintiffs' burden at the class certification stage is not to prove the element of antitrust impact, although in order to prevail on the merits each class member must do so. Instead, the task for plaintiffs at class certification is to demonstrate that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather **[**61]** than individual to its members.

552 F.3d at 311-12. To the extent that there were minor variations, they can be handled at trial in the context of damages.

With regard to both the price-variation and purchase-timing issues, the Special Master conducted an exceedingly thorough review of plaintiffs' proposal for demonstrating antitrust impact through common evidence and determined that defendants' objections were without support. Critically, the Special Master recognized his obligation to "probe beyond the pleadings" and to conduct a "rigorous analysis" of the available evidence. App. at 7960 (internal citations and quotation marks omitted).

Our review confirms that the Special Master applied the appropriate standard. In contrast to *Hydrogen Peroxide*, where the court found that there was "no tendency for prices . . . to move together," *552 F.3d at 314* (internal quotation marks omitted), plaintiffs in this case presented evidence, credited by the Special Master, of significant, industry-wide price drops after generic entry. Such evidence of an industry-wide price drop after generic entry supports the Special Master's rejection of defendants' arguments about limited price variations and purchase-timing **[**62]** variations between plaintiffs.

First, concerning the price-variation argument, the Special Master carefully considered the conflicting opinions of plaintiffs' and defendants' experts and credited the theories of plaintiffs' expert over that of defendants. The Special Master concluded that "Plaintiffs have satisfied their burden of adducing sufficient evidence and a plausible theory to convince me that impact may be proven by evidence common to all class members." App. at 7988 (internal citations and quotation marks omitted). Our review of the record confirms that plaintiffs presented a comprehensive and detailed means of proving impact through common means, notwithstanding some very limited pricing variation, and that the Special Master conducted an appropriately searching evaluation of this evidence.

With regard to defendants' argument about variations in the timing of the purchase of generic K-Dur, the Special Master explicitly rejected that argument and concluded that "[e]vidence that all (or virtually all) class members substituted a lower priced generic for some of their K-Dur 20 purchases gives rise to the inference that they would have similarly done in the but-for world." App. at 7984. **[**63]** This, combined with plaintiffs' theory of damages, means that impact could be proven on a class-wide basis via common evidence. Here again, the Special Master conducted a thorough evaluation of the available evidence and resolved all significant disputes between conflicting evidence as required **[*223]** under the standard set forth in *Hydrogen Peroxide*.

2. Adequacy Issue — Whether the Class Faces Inherent Conflicts

Defendants next contend that the District Court erred in certifying a class because the class faces inherent conflicts that preclude adequacy of representation. ***HN27***[] "The inquiry that a court should make regarding the adequacy of representation requisite of *Rule 23(a)(4)* is to determine that the putative named plaintiff has the ability and the incentive to represent the claims of the class vigorously, . . . and that there is no conflict between the individual's claims and those asserted on behalf of the class." *In re Cmty. Bank of N. Va., 622 F.3d 275, 291 (3d Cir. 2010)* (quoting *Hassine v. Jeffes, 846 F.2d 169, 179 (3d Cir. 1988))*. Only a fundamental conflict will defeat adequacy of representation. *See, e.g., id. at 303* (adequacy defeated by "obvious and fundamental intra-class conflict **[**64]** of interest"); *Ward v. Dixie Nat. Life Ins. Co., 595 F.3d 164, 180 (4th Cir. 2010)*. **[***1514]**

Defendants contend that three members of the class, all national wholesalers, were net beneficiaries of the absence of generic competition in the potassium chloride supplement market because once generics came on the market those class members saw decreased sales volumes and lower per-pill profits. Defendants argue that, because these three class members have financial incentives to delay generic entry, there is an inherent conflict between them and the rest of the class.

The case law on defendants' argument reveals a split in authority. A large number of district courts, including some in this Circuit, have rejected defendants' argument. *See, e.g., Teva Pharms USA, Inc. v. Abbott Labs., 252 F.R.D. 213, 226-27 (D. Del. 2008)* (Robinson, J.); *Meijer, Inc. v. Abbott Labs., 251 F.R.D. 431, 435 (N.D. Cal. 2008)*; *but see Valley Drug Co. v. Geneva Pharms., Inc., 350 F.3d 1181, 1190 (11th Cir. 2003)*.[14]

We reject the *Valley Drug* decision for two reasons. First, requiring plaintiffs to show that no class member benefitted **[**65]** from the challenged conduct in the form of greater profits is contrary to the Supreme Court's decision in *Hanover Shoe*. In *Hanover Shoe*, the Supreme Court permitted antitrust plaintiffs to seek overcharge damages rather than lost profits damages precisely because proving lost profits was too complicated and burdensome. *392 U.S. at 493*; *Bogosian, 561 F.2d at 456*. The same logic applies equally, if not more strongly, in the class certification setting because under defendants' proposed approach, plaintiffs would not only have to assess their own lost profits but also those of potential class members. Moreover, because *Hanover Shoe* sets the amount of the overcharge as plaintiffs' damages, all of the class members have the same financial incentive for purposes of the litigation — *i.e*. proving that they were overcharged and recovering damages based on that overcharge. *See* 7A Charles Alan Wright, Arthur R. Miller & Mary Kay Kane, *Federal Practice and Procedure* § 1768 (3d ed. 2005) (***HN28***[] "[A] potential conflict between the representatives and some class members should not preclude the use of the class-action device if the parties appear united in interest against an outsider at the beginning of **[**66]** the case."). Defendants have not pointed to any plausible scenario in which the class members might seek conflicting forms of relief. For **[*224]** these reasons, we conclude that defendants' conflict argument fails.

D. Conclusion — Class Certification Issues

In sum, with respect to the class certification issues, we reject defendants' arguments and will affirm the District Court's determination approving maintenance of the class action.

End of Document

[14] This is a different appeal than *Valley Drug, 344 F.3d 1294 (11th Cir. 2003)*, discussed *supra*.

In re Processed Egg Prods. Antitrust Litig.

United States District Court for the Eastern District of Pennsylvania

July 16, 2012, Decided; July 16, 2012, Filed

Opinion

[*251] **MEMORANDUM**

GENE E.K. PRATTER, J.

Direct Purchaser Plaintiffs move the Court for final approval of a proposed settlement agreement between the Plaintiffs and Defendants Moark, LLC, Norco Ranch, Inc., and **[*252]** Land O'Lakes, Inc. (collectively, "Moark"). [1] Under the proposed Moark Settlement, Plaintiffs will release Moark from all pending claims in exchange for monetary consideration as well as information and documents. For the reasons set forth below, the Court grants the motion for final approval of the Moark Settlement.

[1] Plaintiffs filed a Motion for Final Approval of the Class Action Settlement Between Plaintiffs and Defendants Moark, LLC, Norco Ranch, Inc., and Land O'Lakes, Inc. (Doc. No. 465) (hereinafter, "Mot."). They also submitted filings supplementing this Motion. (Doc. Nos. 483, 484, and 690).

I. Factual Background[2]

This litigation embraces numerous consolidated and coordinated actions based upon allegations of a conspiracy in violation of the Sherman Act among egg producers and trade groups to manipulate the supply of eggs and egg products and thereby affect the domestic prices of those goods. *See In re Processed Egg Prods. Antitrust Litig., 588 F. Supp. 2d 1366, 1367 (J.P.M.L. 2008)*. The plaintiffs are direct purchasers (such as grocery stores, commercial food manufacturers, restaurants, other food service providers, and other entities who purchase directly from Defendants or other egg producers) and indirect purchasers (individual consumers who purchased **[**3]** from other parties along the distribution chain) of shell eggs, egg products, or both. The direct purchaser plaintiffs are categorized as "Direct Purchaser Plaintiffs" who have brought a consolidated class action against Defendants, and "Direct Action Plaintiffs" who are pursuing individual actions against Defendants.

A. Direct Purchaser Plaintiffs' Suit

The moving Plaintiffs are Direct Purchaser Plaintiffs who accuse defendant egg producers, including Moark, and certain trade groups, of violating *Section 1* of the Sherman Act and seek injunctive relief, treble damages, attorneys' fees and costs. They have demanded a jury trial. These Plaintiffs filed a consolidated class action complaint which they have amended. The allegations of the consolidated complaint superseded or replaced all of the previously-filed individual and consolidated complaints.

The most recent iteration of the Plaintiffs' claim is the Second Consolidated Amended Class Action Complaint which prompted extensive motion practice. [3] The culmination of this motion activity resulted in the Court dismissing without prejudice claims brought against individual Defendants Hillandale-Gettysburg, L.P., Hillandale Farms, Inc., and **[**4]** Hillandale Farms East, Inc. and United Egg Association. *See* Sept. 26, 2011 Mem. and Order, *821 F. Supp. 2d 709* (Doc. Nos. 562 and 563). The Court also dismissed without prejudice claims against all Defendants for damages barred by the four-year statute of limitations. *See* Nov. 30, 2011 Opinion and Order, *2011 U.S. Dist. LEXIS 139995, 2011 WL 5980001* (Doc. Nos. 593 and 594). [4]

As a result of these rulings, Plaintiffs presently proceed on the core of their Section 1 **[*253]** Sherman Act claims against Defendants. At the time the parties' filed their motions to dismiss, the Court partially lifted the stay of discovery previously entered at the outset of this litigation. Lifting the stay permitted the parties to exchange requests for production of documents and confer as to various aspects of a discovery plan. *See* Order (Doc. No. 320); Fees Mot., Ex. 1, Asher Decl. ¶¶ 21-22 (Doc. No. 493-2) (hereinafter, "Asher Decl."). Following the Court's rulings on the motions to dismiss the Second Consolidated Amended Class Action Complaint, the parties requested

---

[2] The factual background discussed here is drawn from the exhibits and materials submitted in relation to the Motion *sub judice*, the hearing on the Motion, and the overall record of this case. The Court **[**2]** also considered the Plaintiffs' Motion for Final Approval of the Sparboe Settlement (Doc. No. 443) (hereinafter, "Sparboe Final Approval Mot."), and the pending Plaintiffs' Motion for an Award of Attorneys' Fees and for Reimbursement of Expenses (Doc. No. 493) (hereinafter, "Fees Mot."), in which Plaintiffs seek attorneys' fees and reimbursement of expenses relating to the litigation to be paid from the Moark Settlement. As to the motion for fees, the Court does not address here the substantive arguments, which will be addressed separately.

[3] Land O'Lakes Inc. filed an individual motion to dismiss this complaint (Doc. No. 239) and joined Moark, LLC and Norco Ranch, Inc., as well as several other Defendants, in certain joint motions to dismiss the complaint. The individual motion and the joint motions respect to Moark were withdrawn with subject to reinstatement if the proposed Moark Settlement is not finally approved. *See* Stipulation (Doc. No. 338). Although they had joined several joint motions to dismiss, Moark, LLC and Norco Ranch, Inc. also filed an answer to the complaint. *See* Answer (Doc. No. 245).

[4] Plaintiffs have filed a motion seeking leave to file a Third Consolidated Amended Class Action Complaint that seeks, *inter alia*, to revive claims against Defendants Hillandale-Gettysburg, L.P., Hillandale Farms, Inc., and Hillandale Farms East, Inc. and to amend claims of fraudulent **[**5]** concealment and tolling of the statute of limitations. Opposition briefing has been filed, and the Court will address that motion separately.

a further partial lifting of the discovery stay. The Court entered Orders further partially lifting the discovery stay, commencing the discovery period, and setting forth various discovery deadlines and parameters concerning, *inter alia*, document production, interrogatories, depositions, non-party discovery, class certification, and class certification experts. *See* Case Mgmt. Orders **[**6]** Nos. 18 and 19 (Doc. Nos. 656 and 676).

B. Sparboe Settlement

Following the earlier partial lift of discovery that permitted the parties to exchange requests for production of documents and meet and confer as to certain matters, Defendant Sparboe Farms, Inc. and Plaintiffs entered into a settlement agreement ("Sparboe Settlement"), the terms of which provided that Sparboe would produce certain documents and make certain witnesses available to Plaintiffs. In turn, Plaintiffs used the information that they obtained from Sparboe to draft their Second Consolidated Amended Class Action Complaint. *See* Mot., Ex. 1, Bernstein Decl. ¶ 4 (hereinafter, "Bernstein Decl."); Asher Decl. ¶ 11; Sparboe Final Approval Mot., Ex. A, Hausfeld Decl. ¶ 18 (hereinafter, "Hausfeld Decl."). The Court preliminarily approved the Sparboe Settlement and held a final fairness hearing. *See* Order on Preliminary Approval of Sparboe Settlement (Doc. No. 214); Sparboe Final Approval Hr'g Tr. (Doc. No. 463). In a separate Memorandum and Order issued this same date, the Court is granting the Plaintiffs' motion for final approval of the Sparboe Settlement.

C. Moark Settlement Negotiations and Preliminary Approval

Subsequent **[**7]** to the Sparboe Settlement, Moark's counsel reportedly contacted Interim Co-Lead Counsel for Plaintiffs [5] about a potential settlement, and the parties had a meeting during which Moark provided Plaintiffs with their sales data and other financial information. *See* Bernstein Decl. ¶¶ 8, 9. Some five months later, the parties began to engage in settlement negotiations. *See id.* ¶ 10.

Over the course of the ensuing three months, the parties negotiated through telephone conferences and in-person meetings on multiple occasions. *See id.* ¶¶ 11, 12. They discussed potential settlement terms, including possible settlement amounts and the extent of Moark's cooperation, and exchanged information, **[**8]** such as sales data for the alleged class period. *See id.* At the conclusion of these efforts, the parties reached an agreement and executed the Moark Settlement documents. *See id.* ¶ 13. [6]

The parties submitted the proposed settlement to the Court for preliminary approval. Following a hearing, the Court entered an Order preliminarily approving the proposed Moark agreement and preliminarily certifying the class and subclasses for settlement purposes. *See* Order on Preliminary Approval of Settlement with Moark, LLC, Norco **[*254]** Ranch, Inc., and Land O'Lakes Inc. (Doc. No. 387) (hereinafter, "Moark Preliminary Approval Order"). The Order also stayed the litigation against Moark pending further order of the Court. *Id.* In a separate Order, the Court approved **[**9]** the form of notice of the Moark Settlement in conjunction with a separate form of notice for the Sparboe Settlement. *See* Order Approving Dissemination of Notice of Settlements Between Direct Purchaser Plaintiffs and (i) Defendant Sparboe Farms, Inc. and (ii) Defendants Moark, LLC, Norco Ranch, Inc. and Land O'Lakes, Inc. (Doc. No. 388) (hereinafter, "Notice Approval Order").

---

[5] In Case Management Order No. 1, the Court approved the following law firms to serve as Interim Co-Lead Counsel: Weinstein Kitchenoff & Asher LLC; Hausfeld LLP; Bernstein Liebhard LLP; and Susman Godfrey LLP. It appears there are additional counsel that Interim Co-Lead Counsel have directed to work on this case. *See* Fees Mot. at 1. Thus, reference herein to "Interim Co-Lead Counsel" may also encompass the efforts of other counsel who represent Plaintiffs and acted at the direction of Interim Co-Lead Counsel.

[6] Eleven days following the execution of the Moark Settlement, the parties executed a First Addendum to Settlement Agreement Between Direct Purchaser Plaintiffs and Defendants Moark, LLC, Norco Ranch, Inc. and Land O'Lakes, Inc. Mot., Ex. 1B (Doc. No. 465-4). The Addendum extended the date that obliged Moark to transfer the Settlement Amount to an escrow account from ten days following the execution date of the Moark Settlement to sixteen days. *Id.*

Plaintiffs filed the motion *sub judice*, and the Court held the final fairness hearing on the Moark Settlement as required by *Fed. R. Civ. P. 23(e)(2)*. *See* Moark Final Approval Hr'g Tr. (Doc. No. 688) (hereinafter, "Final Hr'g Tr."). No objections were filed to the proposed Moark Agreement. No objectors appeared at the fairness hearing. Plaintiffs filed supplemental briefing and materials in support of their motion for final approval. Following the hearing, the Court withheld ruling on the motion until the notice period required pursuant to *28 U.S.C. § 1715(d)* under the Class Action Fairness Act ("CAFA") had elapsed. After the expiration of the notice period, Plaintiffs filed a motion for approval of attorneys' fees, which the Court will address apart from this Memorandum.

II. Proposed Moark Settlement Agreement[7]

The proposed Settlement Class for settlement purposes under the Moark Settlement is defined as:

> All persons and entities that purchased eggs, including Shell Eggs and Egg Products, produced from caged birds in the United States directly from any Producer, including any Defendant, during the Class Period from January 1, 2000 through the date when notice of the Court's entry of an order preliminarily approving this settlement and certifying a Class for settlement purposes is first published.
>
> > a.) Shell Egg SubClass
> >
> > All individuals and entities that purchased Shell Eggs produced from caged birds in the United States directly from any Producer including any Defendant, during the Class Period from January 1, 2000 through the date when notice of the Court's entry of an order preliminarily approving this settlement and certifying a Class for settlement purposes is first published, excluding individuals and entities that purchased only "specialty" Shell Eggs (certified organic, nutritionally enhanced, cage-free, free-range, **[**11]** and vegetarian-fed types) and "hatching" Shell Eggs (used by poultry breeders to produce breeder stock or growing stock for laying hens or meat).
> >
> > b.) Egg Products SubClass
> >
> > All individuals and entities that purchased Egg Products produced from Shell Eggs that came from caged birds in the United States directly from any Producer, including any Defendant, during the Class Period from January 1, 2000 through the date when notice of the Court's entry of an order preliminarily approving this settlement and certifying a Class for settlement purposes is first published, excluding individuals and entities that purchased only "specialty" Egg Products (certified organic, nutritionally enhanced, cage-free, free-range, and vegetarian-fed types).
>
> Excluded from the Class and SubClasses are Producers, and their respective parents, subsidiaries and affiliates, all government entities, as well as the Court and staff to whom this case is assigned, and any member of the Court's or staff's immediate family.

Mot., Ex. A, Settlement Agreement Between Direct Purchaser Plaintiffs and Defendants Moark, LLC, Norco Ranch, Inc., and Land O'Lakes, Inc. ¶ 19 (hereinafter, "Moark Settlement Agreement"). As mentioned **[**12]** earlier, the Court preliminarily certified the Settlement Class for settlement purposes under *Fed. R. Civ. P. 23(b)(3)*. *See* Moark Preliminary **[*255]** Approval Order. The agreement's principal terms require Moark to pay the Settlement Amount of twenty-five million dollars ($25,000,000). *See* Moark Settlement Agreement ¶¶ 15, 33. The Settlement Amount has been deposited into an interest-bearing escrow account. *See* Bernstein Decl. ¶ 15; Fees Mot. at 2. Any interest, net realized gains and other earnings accrued on the Settlement Amount are part of the funds available for disbursement to the Class and Subclass Members. *See* Moark Settlement Agreement ¶ 33; Moark Settlement Agreement, Ex. A, Escrow Agreement, Schedule A, at 1-4 (Doc. No. 690-1) (hereinafter, "Escrow Agreement").

---

[7] The **[**10]** terms used in this Order that are defined in the Moark Settlement Agreement are, unless otherwise defined herein, used in this Order consistent with the definitions of the agreement.

According to the Notice of the Moark Settlement, which is discussed in more detail, *infra*, the Settlement Amount, with any interest earned, and less administrative expenses, escrow expenses, taxes, and attorneys' fees, will be distributed on a *pro rata* basis to the settlement class members who timely and properly submit a valid Claim Form, which is a form documenting a member's claim for damages. *See* Mot., Ex. 2.1, Notice of Moark Settlement at 3-4 **[**13]** (Doc. No. 465-8) (hereinafter, "Moark Notice"); *see also* Mot. at Ex. 2.1, Moark Claim Form (hereinafter, "Claim Form"); Escrow Agreement at 3-4. The *pro rata* share is based upon the dollar amount of a Class Members' direct purchases of shell egg and egg products in the United States from any producer, including Defendants, during the period designated in the Agreement. *See* Notice at 3; Claim Form at 1. The Claims Notice provided that "[b]ecause the alleged overcharge is only a portion of the price paid for eggs and egg products, your recovery will be less than the total amount you paid." Notice at 3. [8]

Additionally, pursuant to the agreement, Moark will cooperate with the Plaintiffs' preparation for and prosecution of their class action. *See* Moark Settlement Agreement ¶ 39. The Agreement details the extent of Moark's cooperation in terms **[**14]** of production of certain non-privileged documents and ensuring the availability of current Moark directors, officers, and employees to give non-privileged testimony through interviews, depositions, declarations and affidavits, and appearance at trial. *See id.* Moark also agrees to assist Plaintiffs in arranging for non-privileged testimony from former directors, officers, and employees. *See id.* ¶ 39(b).

In consideration, Plaintiffs agree that they "shall not . . . seek to recover against [Moark] for any of the Released Claims." *Id.* ¶ 25. Under the Agreement, "Released Claims" are defined as any and all claims arising out of injuries or damages that occurred "from the beginning of time to the date when notice of the Court's entry of an order preliminarily approving this Agreement is first published" and that resulted from the conduct asserted in the Plaintiffs' suit. *See id.* The Agreement delineates the conduct asserted by the Plaintiffs' suit as: "(i) any agreement or understanding between or among two or more Producers of eggs, including any Defendants, including any entities or individuals that may later be added as a defendant to the Action, (ii) the reduction or restraint of supply, **[**15]** the reduction of or restrictions on production capacity, or (ii) the pricing, selling, discounting, marketing, or distributing of Shell Eggs and Egg Products in the United States or elsewhere." *Id.* The Agreement sets forth non-exclusive examples of Released Claims by providing that such claims "includ[e] but [are] not limited to any conduct alleged, and causes of action asserted, or that could have been alleged or asserted, whether or not concealed or hidden, in the Complaints filed in the Action, which in whole or in part arise from or are related to the facts and/or actions described in the Complaints, including under any federal or state antirust, unfair competition, unfair practices, price discrimination, unitary pricing, trade practice, consumer protection, fraud, RICO, civil conspiracy law, or similar laws, including without limitation, the Sherman Antitrust Act, *15 U.S.C. § 1 et seq.*" *Id.* Plaintiffs also agree to waive *California Civil Code Section 1542* **[*256]** and similar provisions in other states. *Id.* ¶ 26. Additionally, Plaintiffs agree to waive and release "all defenses, rights, and benefits that [Plaintiffs] may have or that may have been derived from the provisions of applicable **[**16]** law which, absent such waiver, may limit the extent or effect of the release" of the aforementioned claims. *Id.* ¶ 27. The release excludes "claims relating to payment disputes, physical harm, defective product or bodily injury . . . and do[es] not include any Non-Settling Defendant." *Id.* ¶ 28.

The settlement proposes an opt-out provision which sets forth the procedures through which possible class members could opt out of the settlement. *Id.* ¶ 22; *see also* Moark Notice at 1, 5-6. Class members had 75 days from the postmark date that the notice of the settlement was mailed by first-class mail to the final postmark date designated in the Claims Notice to return an exclusion request. *See* Moark Notice at 1, 5-6. Class Members had 127 days from the postmark date that the notice of the settlement was mailed by first-class mail to the final postmark date designated in the Claims Notice to return a completed Claim Form to make a claim for benefits. *See id.* at 3-4.

Finally, the parties set forth certain provisions in their agreement concerning attorneys' fees, specifically:

---

[8] The agreement provided that Settlement Fund may be reduced if "class members whose sales equal 7.5% or more of the total US egg sales" opt out of the Moark Settlement. Moark Notice at 3. However, this reduction provision is inapplicable because the condition that would otherwise trigger that provision did not occur. *See* Final Hr'g Tr. at 35:10-35:20.

> Class Counsel may seek an award of attorneys' fees and reasonable litigation expenses approved by the Court, to be paid out **[**17]** of the Settlement Amount after the Final Approval of the Agreement. Moark Defendants agree not to object to Class Counsel's petition to the Court for payment of attorneys' fees, costs, and expenses from the Settlement Amount. The Moark Defendants shall have no obligation to pay any fees or expenses from Class Counsel.

Moark Settlement Agreement ¶ 35.

III. Notice

Notice of the Moark Settlement was disseminated to possible members of the Settlement Class through a variety of means ranging from direct mailings, publications, press releases, a website and a toll-free information and request telephone line. *See* Mot., Ex. 2, Affidavit of Jennifer M. Keough re: Notice and Settlement Administration ¶¶ 5-6 (Doc. No. 465-7) (hereinafter, "Keough Aff."); *see also* Moark Settlement Agreement ¶ 21. The Notice explained that any possible Class Members wishing to be excluded from or to object to the terms of the Moark Settlement Agreement should postmark their exclusion requests or objections no later than a specific date that was 104 days before the final fairness hearing on the Moark Settlement. *See* Moark Notice at 1, 5-6. A maximum of $350,000 of the Settlement Amount was authorized to be used for **[**18]** costs of notice. *See* Moark Settlement Agreement ¶ 45. Ultimately, $170,000 was spent on notice expenses with respect to the Moark Settlement Agreement. *See* Final Hr'g Tr. at 30:21-30-23. No other information has been provided to the Court concerning whether other administrative costs and expenses were (or were not) incurred.

The Claims Administrator received 905 Claim forms by the time of the hearing for final approval of the settlement; 881 of those Claim Forms met the deadline set forth for filing such forms and 24 Claim Forms did not. *See* Final Hr'g Tr. 14:4-14:6. [9] The Claims Administrator received no objections to the settlement and received 150 requests for exclusion from the class. *See id.* at 14:7-14:9. Some of those parties who opted-out of the class have filed their own complaints against Defendants, including Moark, such as Direct Action Plaintiffs Giant Eagle Inc., Winn-Dixie Stores, Inc., Roundy's Supermarkets, Inc., C&S Wholesale Grocers, Inc., and H.J. Heinz Company, L.P., as well as plaintiffs in a state court action proceeding in Kansas. *See* Am. Compl. (Doc. No. 623) (Giant Eagle Inc.); Second Am. Compl. (Doc. No. 622) (Winn-Dixie Stores, Inc., Roundy's **[*257]** Supermarkets, **[**19]** Inc., C&S Wholesale Grocers, Inc., and H.J. Heinz Company, L.P.), Dec. 19, 2011 Mem. and Order, *836 F. Supp. 2d 290, 2011 U.S. Dist. LEXIS 146258, 2011 WL 6396462, at *5 n.8* (Doc. Nos. 601 and 602) (explaining that six direct purchasers opted out of the Sparboe and Moark Settlements and filed an action against Defendants in Kansas state court, which, after being removed to federal court by Defendants, was remanded to state court); Direct Action Plaintiff Status Report (Doc. No. 457). [10] Interim Co-Lead Counsel has represented that the "potential Class is composed of

---

[9] The Plaintiff's Motion stated that 894 Claim Forms had been submitted. *See* Keough Aff. ¶ 16. However, because the Plaintiffs provided updated numbers during their presentation in the final fairness hearing, the Court references those numbers here. Plaintiffs intend to make recommendations as to the treatment of late Claims Forms in a plan of allocation that will be submitted for the Court's approval.

[10] The Direct Action Plaintiff Status Report states that "[a]ll of the Direct Action Plaintiffs except Giant Eagle have remained in the Moark class **[**20]** settlement based on the statements in the Moark Class Settlement Agreement and Notice that remaining in that settlement class "does not prejudice their rights to exclude themselves from any other past, present or future settlement class or certified litigation class" in this case. To be clear, only Giant Eagle has opted out of the Moark settlement class." *Id.* at 2. This statement applies only to the presently pending Direct Action Plaintiff cases brought by The Kroger Co. and co-plaintiffs (Civil Action No. 10-7605 (E.D. Pa.)), Supervalu Inc. (Civil Action No. 10-6736 (E.D. Pa.)), Publix Super Markets, Inc. (Civil Action No. 10-6737 (E.D. Pa.)), and Giant Eagle, Inc. (Civil Action No. 10-1698 (W.D. Pa.)).

The statement does not apply to the pending Direct Action Plaintiff cases brought by Kraft Foods Global, Inc. and its co-plaintiffs (Civil Action No. 11-8808 (E.D. Pa.), and Winn-Dixie Stores, Inc. (Civil Action No. 11-0510 (E.D. Pa.). Both of these cases were filed after the Status Report. However, because Kraft Foods Global, Inc. and its co-plaintiffs' names do not appear on the list of names of those parties who filed requests for exclusion from the Moark Settlement, Exhibit 4 to **[**21]** the Plaintiffs' Motion (Doc. No. 465-10), it appears that this group of Direct Action Plaintiffs did not opt-out of the Moark Settlement. However, the names of thousands of entities nationwide, many of which are sophisticated companies with their own in-house legal counsel." Fees Mot. at 12.

The Claims Administrator mailed Notice and Claim Forms to 13,211 direct purchasers of shell eggs and egg products, whose names and addresses were obtained from various electronic data files that contained potential Class Member names and addresses from 17 named egg producer Defendants that were given to the Claims Administrator at the direction of the Court. *See* Keough Aff. ¶ 7, 9; Notice Approval Order ¶ 3. Eighty-three (83) Notice and Claim Forms, returned by the U.S. Postal Service with forwarding address information, were re-mailed. *See id.* ¶ 12. In contrast, twenty-three hundred thirty-three (2,333) Notice and **[**22]** Claim Forms were returned without forwarding address information and, according to Interim Co-Lead Counsel, could not be re-mailed. *See id.* [11]

Additionally, during the notice period a Summary Notice was published in several publications with a total circulation of over 2,316,000. *See id.* ¶ 11. The Summary Notice was published in a monthly issue of fifteen (15) industry journals thought to be likely to reach potential purchasers of shell eggs and egg products. *See id.* Those publications are: *PetFoodIndustry, Restaurant Business, Convenience Store News, Hotel F&B, Nation's Restaurant News, Food Service Director, Progressive Grocer, Food Manufacturing, Supermarket News, Stores, Egg Industry Magazine, Modern Baking, Baking Buyer, Food Processing*, and *Long Term Living. See id.*

The Summary Notice was also published for one day in the *Wall Street Journal. See id.* That same day, the Claims Administrator distributed a press **[**23]** release for the Moark Settlement, as well as a separate release about the Sparboe Settlement, to approximately 1,000 journalists in the restaurant and food industries through the US1 Newsline on the PR Newswire. *See id.* ¶ 13. The press releases resulted in some 335 articles that reported on the two settlements. *See id.*

A publicly-available website specifically devoted to the Moark and Sparboe Settlements **[*258]** was established. *See id.* ¶ 14. The website makes available for review and downloading the Notice Packet, the Moark Settlement Agreement, and various Court orders and filings relating to the Moark Settlement. *See id.* In the first 148 days of operation, the website received 4,820 "visits." *See id.*

The Claims Administrator and Plaintiffs established a toll-free 24-hour telephone number and call center for potential Class Members to obtain information about the settlement and to request the Notice and Claim Form. *See id.* ¶ 15. The automated number received 549 calls, and 95 callers requested and received a Notice Packet during the first 148 days of operation. *See id.*

Additionally, Moark served notice of the settlement to federal and state officials of the settlement as required by 28 U.S.C. § 1715(d) **[**24]** under CAFA. *See* Mot. at 9. No federal or state officials filed objections to the Moark Settlement, nor requested a hearing following the issuance of the CAFA notice. The statutory period elapsed prior to the date of this Memorandum and accompanying Order. [12]

Winn-Dixie Stores, Inc. and its co-plaintiffs do appear on that list, and it appears they have opted out of the Settlement. *See* Keough Aff. ¶ 17.

Moark and Winn-Dixie Stores, Inc., Roundy's Supermarkets, Inc., C&S Wholesale Grocers, Inc., and H.J. Heinz Company, L.P. recently reported reaching a settlement of the claims against Moak and submitted a stipulation of dismissal that the Court is approving this same date.

[11] The Court recognizes that the statistics provided here slightly differ with the equivalent statistics that the Plaintiffs provided in connection with their motion for approval of the Sparboe Settlement. However, the Court deems these minor differences to be inconsequential.

[12] Although Moark served notice of the settlement to the appropriate officials, it did not do so promptly after the Agreement was filed, as required by 28 U.S.C. § 1715(b). Mot. at 9. Section 1715(b) provides: "Not later than 10 days after a proposed settlement of a class action is filed in court, each defendant that is participating in the proposed settlement shall serve upon the appropriate State official of each State in which a class member resides and the appropriate Federal official, a notice of the

Following approval of the settlement, Plaintiffs intend to submit for the Court's approval a plan of allocation relating to the Claims Administration process for evaluating the procedure for processing individual claims under the settlement, the allocation of the Settlement Fund distributions, administrative costs and expenses, and so forth. *See* Mot. at 1 n.1. The Claims Notice provided that the "Court retains the power to approve or reject, in part or in full, any individual claim of a class member based on equitable grounds." Moark Notice at 3. The Notice also stated that the Settlement Amount "may be reduced by court-ordered attorneys' fees and reimbursement of litigation expenses, including administration of the Settlement, as approved by the Court" and reduced "by the expense of providing notice to the Class." *Id.*

The **[**27]** Claims Notice also explained that "Class Counsel will apply to the Court for an award from the Settlement Funds of attorneys' fees and for reimbursement of litigation costs and expenses incurred, including fees and costs expended while providing Notice to the Class and while administering the Settlement Fund (including the plan of allocation)." *Id.* at 4. The Notice stated that Interim Co-Lead Counsel intends to apply for attorneys' fees "in an amount not to exceed thirty percent of $25 million as well as the costs and expenses incurred." *Id.*

[*259] **IV. Discussion**

Federal Rule of Civil Procedure 23 provides that "[t]he claims, issues, or defenses of a certified class may be settled, voluntarily dismissed, or compromised only with the court's approval." *Fed. R. Civ. P. 23(e)*. The following procedures apply to a proposed settlement, voluntary dismissal, or compromise:

> (1) The court must direct notice in a reasonable manner to all class members who would be bound by the proposal.
> (2) If the proposal would bind class members, the court may approve it only after a hearing and on finding that it is fair, reasonable, and adequate.
>
> (3) The parties seeking approval must file a statement identifying any **[**28]** agreement made in connection with the proposal.
>
> (4) If the class action was previously certified under *Rule 23(b)(3)*, the court may refuse to approve a settlement unless it affords a new opportunity to request exclusion to individual class members who had an earlier opportunity to request exclusion but did not do so.
> (5) Any class member may object to the proposal if it requires court approval under this subdivision (e); the objection maybe withdrawn only with the court's approval.

---

proposed settlement . . . ." Under *Section 1715(d)*, an order granting final approval of a settlement agreement may not take place earlier than ninety days after the appropriate federal and state officials have been served with notice.

Plaintiffs advised the Court about the timing of the CAFA notice requirement on the Moark and Sparboe Settlements, and requested the Court proceed with the final approval hearing on the Moark Settlement **[**25]** as scheduled and to hold its decision on the Plaintiffs' motion for final approval in abeyance until the ninety-day expiration date passed without any objections or requests for hearings being received from any relevant authority pursuant to *28 U.S.C. § 1715(d)*. *See* Mot. at 9. Over ninety days have elapsed since Moark served the appropriate state or federal officials with the CAFA notice, and there have been no requests for hearings or objections to the settlement made. It follows that, although the notice requirements under CAFA have not been fully met on a technical basis, the substance of the requirements have been satisfied insofar as giving federal and state officials sufficient notice and opportunity to be heard concerning the Moark Settlement. *See* *D.S. ex rel. S.S. v. New York City Dep't of Educ., 255 F.R.D. 59, 80 (E.D.N.Y. 2008)* (approving the settlement on a provisional basis until the CAFA notice deadline passes and no federal or state official requests a hearing); *Kay Co. v. Equitable Prod. Co., No. 06 Civ. 00612, 2010 U.S. Dist. LEXIS 41892, 2010 WL 1734869, at *4 (S.D. W.Va. Apr. 28, 2010)* ("Since more than 100 days have passed since service was perfected and since there have been no adverse comments **[**26]** from any of the aforesaid State or Federal officials, the Court FINDS that compliance with CAFA is satisfactory."). *But see* *True v. Am. Honda Motor Co., 749 F. Supp. 2d 1052, 1083 (C.D. Cal.2010)* (determining that its authority to approve a settlement was "questionable" when the defendant gave CAFA notice only ten days prior to the final settlement approval hearing).

Id. The "[f]actual determinations necessary to make Rule 23 findings must be made by a preponderance of the evidence. In other words, to certify a class the district court must find that the evidence more likely than not establishes each fact necessary to meet the requirements of *Rule 23*." *In re Ins. Brokerage Antitrust Litig., 579 F.3d 241, 257-58 (3d Cir. 2009)* (quoting *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 320 (3d Cir. 2008))*. "The decision of whether to approve a proposed settlement of a class action is left to the sound discretion of the district court." *In re Prudential Ins. Co. Am. Sales Practice Litig. Agent Actions, 148 F.3d 283, 299 (3d Cir. 1998)* (quoting *Girsh v. Jepson, 521 F.2d 153, 156 (3d Cir. 1975))*.

A. [**29] Class Certification

Where, as here, the Court has not already certified a class prior to evaluating a settlement, the Court initially must determine whether the proposed settlement classes satisfy the requirements of *Federal Rule of Civil Procedure 23(a)* and *(b)*. *See* *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 619, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*; *see also* *In re Pet Food Prods. Liab. Litig., 629 F.3d 333, 341 (3d Cir. 2010)* ("[A] district court first must determine that the requirements for class certification under *Rule 23(a)* and *(b)* are met."). The Third Circuit Court of Appeals recently summarized the demands of *Rule 23* as follows:

> *Rule 23(a)* contains four threshold requirements, which every putative class must satisfy:
>
> > (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class.
>
> *Fed. R. Civ. P. 23(a)*; *see also* *Amchem, 521 U.S. at 613*. Upon finding each of these prerequisites satisfied, a district court must then determine that the **[**30]** proposed class fits within one of the categories of class actions enumerated in *Rule 23(b)*.
>
> As mentioned, *Rule 23(b)(2)* authorizes class actions seeking injunctive relief in instances where the defendant "has acted or refused to act on grounds that apply generally to the class, so that final injunctive relief . . . is appropriate respecting the class as a whole." *Fed. R. Civ. P. 23(b)(2)*; *see* *In re Comm. Bank of N. Va. (Comm. Bank I), 418 F.3d 277, 302 n.14 (2005)*. Separately, certification pursuant to *Rule 23(b)(3)* seeking monetary compensation is permitted where (1) "questions of law or fact common to class members predominate over any questions affecting only individual members," and (2) "a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*; *see* *Collins v. E.I. DuPont de Nemours & Co., 34 F.3d 172, 180 (3d Cir. 1994)*. These twin **[*260]** requirements are commonly referred to as predominance and superiority.

Sullivan v. DB Invs., Inc., 667 F.3d 273, 296 (3d Cir. 2011) (en banc).

1. *Federal Rule of Civil Procedure 23(a)*

First, under *Rule 23(a)*, the Court determines that the Class Members are ascertainable from **[**31]** objective criteria, such as various electronic data files that contained names and addresses of customers that purchased shell eggs or egg products produced from caged birds in the United States, which were provided by 17 named egg producer Defendants, and that the Class Members thus ascertained are so numerous that their joinder before the Court would be impracticable. Plaintiffs "need not precisely enumerate the potential size of the proposed class, nor [are] plaintiff[s] required to demonstrate that joinder would be impossible." *Cannon v. Cherry Hill Toyota, Inc., 184 F.R.D. 540, 543 (D.N.J. 1999)* (citation omitted); *see also* 7A Charles Alan Wright & Arthur R. Miller, *Federal Practice and Procedure* § 1762 (3d ed. 2005) ("'[I]mpracticable' does not mean 'impossible.' The representatives only need to show that it is extremely difficult or inconvenient to join all the members of the class."); 1 A. Conte & H. Newberg, *Class Actions* § 3:14 (5th ed. 2011) ("Plaintiffs bear the burden of demonstrating that joinder is impracticable, but *impracticable* does not mean *impossible*."). "[G]enerally if the named plaintiff demonstrates that the potential number of plaintiffs exceeds 40, the first **[**32]** prong of *Rule 23(a)* has been met." *Stewart v. Abraham, 275 F.3d 220, 226-27 (3d Cir. 2001)* (citation omitted). Here, thousands of direct purchasers of shell eggs and egg products located across the United States were identified, based upon information provided by 17 named Defendants, as proposed members of the Settlement Class, and 905 Claim Forms were submitted to the Claims Administrator. This information certainly demonstrates that a class of this size makes individual joinder of all members impracticable and that the numerosity requirement is satisfied.

Second, the commonality requirement is satisfied insofar as Plaintiffs have alleged one or more questions of fact and law common throughout the Class. The commonality prerequisite does not require that all members of the prospective class share identical claims. *Hassine v. Jeffes, 846 F.2d 169, 176-77 (3d Cir. 1988)* (relying on *Eisenberg v. Gagnon, 766 F.2d 770, 786 (3d Cir. 1985))*. Rather, "[t]he commonality requirement will be satisfied if the named plaintiffs share at least one question of fact or law with the grievances of the prospective class." *Baby Neal v. Casey, 43 F.3d 48, 56 (3d Cir. 1994)*. Also, class members can assert **[**33]** such a single common complaint if they demonstrate that all class members are subject to the same harm. *Id.* [13]

As is also further discussed in regards to the superiority requirement under *Rule 23(b)(3)*, *infra*, the Plaintiffs' claims here are based upon Moark's alleged conduct during the period in question, which Plaintiffs contend constituted an agreement to and furtherance of an unlawful conspiracy to manipulate the supply and prices of domestic eggs and egg products in violation of *Section 1* of the Sherman Act. *See generally* Sept. 26, 2011 Mem., *821 F. Supp. 2d at 713-15* (discussing the specific alleged conduct of Defendants generally in **[**34]** furtherance of alleged conspiracy). Additionally, Plaintiffs allegedly were subjected to the same type of harm by directly purchasing eggs and egg products at artificially inflated prices due to the alleged conspiracy. Because the class members' claims arise from the same nucleus of operative facts and involve the same legal theories against Moark, the Court finds that the commonality prong under *Rule 23(a)(2)* is met.

Third, the Court finds that the claims of the named Plaintiffs—companies, corporations, **[*261]** and businesses that purchased shell eggs, egg products, or both, from one or more of the Defendants—are typical of the claims of the Class Members and the respective Subclass members. "If the claims of the named plaintiffs and putative class members involve the same conduct by the defendant, typicality is established regardless of factual differences." *Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 183-84 (3d Cir. 2001)*. The Third Circuit Court of Appeals has recognized that the "jurisprudence 'assures that a claim framed as a violative practice can support a class action embracing a variety of injuries so long as those injuries can all be linked to the practice.'" **[**35]** *Id. at 184* (quoting *Baby Neal, 43 F.3d at 63*). In this action, the claims of the class representatives are aligned with those of the Class Members, and members of the Subclasses, inasmuch as the claims of the representatives arise out of the same alleged misconduct of the Defendants and core facts and events. Further, the representative Plaintiffs' claims and the absent Class Members' claims rely on the same legal theories and arise from the same alleged "conspiracy" and "illegal agreement" by Defendants. Moreover, named Plaintiffs, like all putative Class Members, allegedly have suffered the same injury—namely, economic damages arising from alleged artificially-inflated purchase prices—as a result of the Defendants' alleged anticompetitive conduct.

Fourth, the final prerequisite under *Rule 23(a)*, the adequacy of the representative parties requirement, "has two components: (1) concerning the experience and performance of class counsel; and (2) concerning the interests and incentives of the representative plaintiffs." *Dewey v. Volkswagen Aktiengesellschaft, 681 F.3d 170, 182 (3d Cir. 2012)* (citing *Comm. Bank I, 418 F.3d at 303*). Essentially, the inquiry into the adequacy of the representative **[**36]** parties examines whether "the putative named plaintiff has the ability and the incentive to represent the

---

[13] The Supreme Court recently explained: "What matters to class certification . . . is not the raising of common 'questions'—even in droves—but, rather the capacity of a classwide proceeding to generate common answers apt to drive the resolution of the litigation. Dissimilarities within the proposed class are what have the potential to impede the generation of common answers." *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. 2541, 2551, 180 L. Ed. 2d 374 (2011)* (quoting Richard A. Nagareda, *Class Certification in the Age of Aggregate Proof*, *84 N.Y.U. L. Rev. 97, 132 (2009)*)

claims of the class vigorously, that he or she has obtained adequate counsel, and that there is no conflict between the individual's claims and those asserted on behalf of the class." Hassine, 846 F.2d 169 at 179 (citations omitted); *see also* Dewey, 681 F.3d at 182 (recognizing that "the linchpin of the adequacy requirement is the alignment of interests and incentives between the representative plaintiffs and the rest of the class"). In other words, "Rule 23(a)(4) serves to uncover conflicts of interest between named parties and the class they seek to represent." Amchem, 521 U.S. at 625. If any conflicts "undercut the representative plaintiffs' ability to adequately represent the class" they are "fundamental," such that class representation is structurally faulty and Rule 23(a)(4) cannot be satisfied. Dewey, 681 F.3d at 184-85.

The Court determines that the representative Plaintiffs indeed will fairly and adequately protect the interests of the Settlement Class. Here, the interests of the representative Plaintiffs are consistent with those of the Class Members, and respective Subclass **[**37]** members, and there appear to be no conflicts between or among these groups. As discussed, the representative Plaintiffs were damaged as a result of the Defendants' allegedly unlawful conduct, including Moark's alleged conduct, and the named Plaintiffs would have had to prove the same wrongdoing as the putative Class Members to establish the Defendants' (and Moark's) liability. Moreover, all representative Plaintiffs and Class Members have present claims (and no future claims) and have suffered economic damages. Furthermore, there is no apparent conflict among Class Members, or Subclasses, with respect to the allocations for distribution of the Settlement Amount because such allocations are based upon a *pro rata* share determined by purchases of shell eggs and egg products from any producer, including any Defendant, in the United States during the period designated in the Agreement. The representative and putative Class Members have a common interest in Moark's cooperation in assisting with the prosecution of the class claims against the non-settling Defendants. It follows that the representative Plaintiffs' interests are directly aligned with those of other members of the Class and **[**38]** Subclasses.

Additionally, the representative Plaintiffs have been, have the incentive, and appear to be capable of continuing to be active participants in both the prosecution and the settlement **[*262]** of this suit against Moark, if the case had continued, and against the remaining Defendants. To assist them, Plaintiffs have retained attorneys who are highly qualified, experienced, and able to conduct this litigation. The Court analyzes the capabilities and performance of Interim Co-Lead Counsel under Rule 23(a)(4) based upon the factors set forth in Rule 23(g). *See* Sheinberg v. Sorensen, 606 F.3d 130, 132 (3d Cir. 2010) ("Although questions concerning the adequacy of class counsel were traditionally analyzed under the aegis of the adequate representation requirement of Rule 23(a)(4) of the Federal Rules of Civil Procedure, those questions have, since 2003, been governed by Rule 23(g)." (citing Fed. R. Civ. P. 23(g), advisory comm. note (2003))).

Here, the Court concludes that Interim Co-Lead Counsel satisfies Rule 23(g). Rule 23(g) requires consideration of four factors: "the work counsel has done in identifying or investigating potential claims in the action," "counsel's experience in handling **[**39]** class actions, other complex litigation, and "the types of claims asserted in the action," "counsel's knowledge of the applicable law," and "the resources that counsel will commit to representing the class." Fed. R. Civ. P. 23(g)(1)(A)(i)-(iv). The Court "must also ensure that '[c]lass counsel [will] fairly and adequately represent the interests of the class.'" Sheinberg, 606 F.3d at 132-33 (quoting Fed. R. Civ. P. 23(g)(4)). [14]

Interim Co-Lead Counsel have extensive documented experience in complex class action litigation, including those based upon violations of ***antitrust law***, and are well-respected law firms in the plaintiffs' class action bar who have demonstrated considerable dedication and ability thus far in this litigation. Interim Co-Lead Counsel have capably managed this suit on behalf of Plaintiffs since the Court formally appointed them to that role. Their work has **[**40]** included the consolidation of the individual cases, negotiating the Moark and Sparboe Settlements, handling the motion to dismiss stage, and preparing for and commencing discovery. In sum, Interim Co-Lead Counsel's work

---

[14] The Court may also consider other possibly relevant information as to the adequacy of counsel, such as proposed terms for attorneys' fees and nontaxable costs and "any other matter pertinent to counsel's ability to fairly and adequately represent the interests of the class." Fed. R. Civ. P. 23(g)(1)(B), (C).

on behalf of the Plaintiffs has been extensive and involved the dedication of substantial resources and energy. Interim Co-Lead Counsel's work thus far in this suit and prior experience demonstrate that these attorneys have fairly and adequately represented the interests of the Moark Settlement Class, and Subclasses, and will continue to do so.

Accordingly, the Court finds that four threshold requirements of *Rule 23(a)* have been satisfied.

2. *Federal Rule of Civil Procedure 23(b)*

Having determined that the requirements of *Rule 23(a)* are met, the Court next must consider whether the requirements of at least one subsection of *Rule 23(b)* are met. Here, Plaintiffs are seeking certification under *Rule 23(b)(3)*. *See also* Pls.' Mem. of Law on Prelim. Approval of Moark Settlement at 24 (Doc. No. 349). *Rule 23(b)(3)* permits class actions where "the court finds that the questions of law or fact common to Class members predominate over any questions affecting only individual members, **[**41]** and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. These requirements are commonly separated into the so-called "predominance" and "superiority" requirements. *See* *Ins. Brokerage, 579 F.3d at 257-58*.

a. Predominance

To evaluate the predominance requirement, a court must determine whether common questions of law or fact predominate over any questions affecting only individual members. *See* *Hydrogen Peroxide, 552 F.3d at 311-12*. "*Rule 23(b)(3)*'s predominance requirement imposes a more rigorous obligation [than *Rule 23(a)(2)*'s commonality element] upon a reviewing court to ensure that issues common to the class predominate over those affecting only individual class members. *Sullivan, 667 F.3d at 297* (quoting **[*263]** *Ins. Broker., 579 F.3d at 266*). As such, the Third Circuit Court of Appeals "consider[s] the *Rule 23(a)* commonality requirement to be incorporated into the more stringent *Rule 23(b)(3)* predominance requirement, and therefore deem[s] it appropriate to 'analyze the two factors together, with particular focus on the predominance requirement.'" *Id.* Third Circuit precedent "provides that the focus **[**42]** of the predominance inquiry is on whether the defendant's conduct was common as to all of the class members, and whether all of the class members were harmed by the defendant's conduct." *Id.*

"Predominance is a test readily met in certain cases alleging . . . violations of the antitrust laws." *Amchem, 521 U.S. at 625*. This is because these types of claims typically arise from an alleged common course of conduct on the part of the defendant, and depend upon common proof of liability, such as evidence of the defendants' conduct. *See, e.g.,* *In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 528 (3d Cir. 2004)* (questions of fact and law are common to the class because the claims at issue and proof of liability depend upon the defendants' alleged conduct). Furthermore, that Plaintiffs have allegedly suffered "purely an economic injury"—in contrast to a physical injury—such overpayment for a product on account of the Defendants', and more specifically, Moark's, alleged anticompetitive conduct can "further support[] a finding of commonality and predominance because there are little or no individual proof problems in this case otherwise commonly associated with physical injury claims." *Id.*

Indeed, **[**43]** this same rationale leads the Court to conclude here that the common issues of Class Members predominate over any individual issues as to their antitrust claim against Moark. The task at hand requires the Court to "examine the elements of plaintiffs' claim through the prism of *Rule 23*." *Hydrogen Peroxide, 552 F.3d at 311* (internal quotation marks omitted). Here, the Plaintiffs' claim arises under *Section 1* of the Sherman Act. "To establish a violation of *Section 1*, a plaintiff must prove: (1) concerted action by the defendants; (2) that produced anticompetitive effects within the relevant product and geographic markets; (3) that the concerted actions were illegal; and (4) that it was injured as a proximate result of the concerted action." *Gordon v. Lewistown Hosp., 423 F.3d 184, 207 (3d Cir. 2005)*.

The reasoning in *In re Insurance Brokerage Antitrust Litigation* is applicable here. In *Insurance Brokerage*, our Court of Appeals concluded that "[b]ecause each of the elements of a Sherman Act violation involves common questions of law and fact, . . . common questions predominate over individual ones with respect to the federal antitrust claim." *579 F.3d at 269*. The Court determined that **[**44]** since "the first and third elements of a Sherman Act violation focus on the conduct of the defendants, we find that common questions abound with respect to whether the defendants engaged in illegal, concerted action." *Id. at 268*. This is true in this case, because the common questions relevant to these elements include, *inter alia*, whether Moark and the other Defendants agreed to the alleged conspiracy to manipulate the supply and prices of domestic eggs and egg products in violation of *Section 1* of the Sherman Act, and whether the alleged conspirators' conduct amounted to an illegal restraint of trade. Furthermore, with respect to the second element of the Plaintiffs' Section 1 claim, there are at the very least the common questions relating to whether the alleged conspirators' actions reduced the supply of and increased prices for domestic eggs and egg products.

Also, like *Insurance Brokerage*, here, the fourth element of the Sherman Act claim "focuses on whether the plaintiffs were injured by the defendants' conduct," and as a result "it may still involve common questions of law and fact if proof of injury can be established on a class-wide basis." *Id. at 268*. As the Court of Appeals **[**45]** recognized, "for purposes of class certification pursuant to *Rule 23(b)(3)*, 'the task for plaintiffs . . . is to demonstrate that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual to its members.'" *Id.* (citing *Hydrogen Peroxide, 552 F.3d at 311-12*. The issue here is whether the Class Members were proximately injured by the conduct **[*264]** of Moark and other Defendants, which is a question that is capable of proof common to the class members. Thus, even though the amount of damage that each plaintiff allegedly suffered could not necessarily be established by common proof, nonetheless, "the element of antitrust injury-that is, the fact of damages-is susceptible to common proof." *Id.* The reasoning in *Insurance Brokerage* applies here:

> [W]e are not as concerned with "formulat[ing] some prediction" as to how this element of a Sherman Act violation would "play out" at trial, *552 F.3d at 311* (internal quotation marks omitted), "for the proposal is that there be no trial," *Amchem, 521 U.S. at 620*, and instead our inquiry into the element of antitrust injury is solely for the purpose of ensuring that issues common to the class **[**46]** predominate over individual ones. As the foregoing analysis demonstrates, common questions exist even with respect to the element of antitrust injury and therefore any individual issues do not overwhelm the common ones.

Id.

Furthermore, the Court does not find that the use of Subclasses of direct purchasers of eggs and direct purchasers of egg products alters any of the foregoing analysis because the claims with respect to each Subclass rely upon the same alleged conduct of Moark and other Defendants, common proof of such conduct, and economic harm of overpayment for the respective products resulting from such conduct. Accordingly, the Court concludes that the predominance requirement is satisfied here because each element of the Plaintiffs' federal antitrust violation involves common questions of law and fact, and these common questions predominate over individual issues.

b. Superiority

To meet the superiority requirement, Plaintiffs must show that a class action, rather than individual litigation or other available methods of adjudication, is the best method for achieving a fair and efficient adjudication of the controversy. *See* *Newton, 259 F.3d at 191*. Several factors are relevant to **[**47]** the superiority inquiry: "(A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action." *Fed. R. Civ. P. 23(b)(3)*. In effect, "[t]he superiority requirement asks the court to balance, in terms of fairness and efficiency, the merits of a class action against those of alternative available methods of adjudication." *Prudential, 148 F.3d at 316* (internal quotations omitted).

The Court makes no determination at this time concerning the manageability of the Plaintiffs' suit as a class action if this action were to go to trial in a single forum or, to the extent this possibility remains, be remanded to the various transferor courts. "Confronted with a request for settlement-only class certification, a district court need not inquire whether the case, if tried, would present intractable management problems, *see* Fed. R. Civ. P. 23(b)(3)(D), for the proposal is that there **[**48]** be no trial." *Amchem, 521 U.S. at 620*.

In considering the other relevant factors, the Court finds that the Class, and Subclasses, satisfy the superiority requirements of *Rule 23(b)(3)*. Here, there is a potentially large number of class members—perhaps numbering over 13,000—who as a whole are geographically widely disbursed. *See* Pls.' Mem. of Law on Prelim. Approval of Moark Settlement at 14. These factors represent a potentially crushing strain on and inefficient application of judicial resources if the putative class members' claims were prosecuted individually. Furthermore, when "each consumer has a very small claim in relation to the cost of prosecuting a lawsuit. . . , a class action facilitates spreading of the litigation costs among the numerous injured parties and encourages private enforcement of the statutes." *Warfarin, 391 F.3d at 534*. Under the present circumstances, a class action device enables individual direct purchasers to pursue their claims in an economically feasible manner, with greater efficacy **[*265]** in achieving enforcement and deterrence goals, and with greater bargaining power for settlement purposes. [15]

Putative Class Members were free to opt out of the settlement to pursue their own claims individually if they so chose, and some of the direct purchasers who opted out of the Moark Settlement, namely, a subset of the Direct Action Plaintiffs, indeed have filed individual actions that name Moark as a defendant and that have been consolidated or coordinated in this multi-district litigation. Another case brought by opt out parties against Moark for its alleged conduct is pending in Kansas state court as a result of a ruling of this Court. *See* Dec. 19, 2011 Mem., *2011 U.S. Dist. LEXIS 146258, 2011 WL 6396462*, (Doc. No. 601). That there are only two pending Direct Action Plaintiff suits and one **[**51]** state court suit pending against Moark based upon its alleged antitrust conduct suggests that few Class Members have significant individual claims, or interest in bringing their claims separately, and that there is a lack of interest in the individual prosecution of claims among Class Members on the whole. *See id.*

For these reasons, a class action resolution in the manner proposed in the Moark Settlement would be superior to other available methods for a fair and efficient adjudication of the case against Moark.

3. Conclusion as to Class Certification for Settlement Purposes

Because the Court concludes that all of the *Rule 23(a)* and *(b)(3)* requirements have been met, the Court certifies the Class, and Subclasses, as defined above for settlement purposes.

---

[15] For these same reasons, to the extent that consideration of *Rule 23(b)(3)(C)* **[**49]** is pertinent here, and, for now, without regard to the remand mechanisms for an MDL action, it would be preferable to adjudicate these claims in one judicial proceeding and in one forum as a class action. *See Amalgamated Workers Union of Virgin Islands v. Hess Oil Virgin Islands Corp., 478 F.2d 540, 543, 10 V.I. 575 (3d Cir. 1973)* ("The 'superiority requirement' was intended to refer to the preferability of adjudicating claims of multiple-parties in one judicial proceeding and in one forum, rather than forcing each plaintiff to proceed by separate suit, and possibly requiring a defendant to answer suits growing out of one incident in geographically separated courts."). *See generally* *Fed. R. Civ. P. 23(b)(2)* 1966 note ("Also pertinent is the question of the desirability of concentrating the trial of the claims in the particular forum by means of a class action, in contrast to allowing the claims to be litigated separately in forums to which they would ordinarily be brought."). However, as one commentator has discussed, in light of *28 U.S.C. § 1407*, as a general matter, "[t]his factor should . . . be of little or no significance in resolving the superiority issue." Newberg, *supra*, §4:31. Indeed, **[**50]** this factor appears to have limited bearing under the present circumstances because the United States Judicial Panel on Multidistrict Litigation previously considered, pursuant to *28 U.S.C. § 1407*, the desirability of centralizing the various initially-filed direct purchaser class action suits in this particular forum, *see In re Processed Egg Prods. Antitrust Litig., 588 F. Supp. 2d 1366, 1367 (J.P.M.L. 2008)*, and a consolidated class action complaint was filed which superseded all previously-filed direct purchaser complaints.

B. Notice

"In the class action context, the district court obtains personal jurisdiction over the absentee class members by providing proper notice of the impending class action and providing the absentees with the opportunity to be heard or the opportunity to exclude themselves from the class." *Prudential, 148 F.3d at 306*. *Fed. R. Civ. P. 23* sets forth two provisions concerning notice to class members.

First, *Fed. R. Civ. P. 23(c)(2)(B)* **[**52]** requires that class members be given the best notice practicable under the circumstances, including individual notice to all potential class members identifiable through reasonable effort. This notice is to be given to all potential members of a *Rule 23(b)(3)* class. *Prudential, 148 F.3d at 326*. Specifically, the Rule provides that such notice

> must, in clear, concise and plain language, state: (i) the nature of the action; (ii) the definition of the class certified; (iii) the class claims, issues or defenses; (iv) the class member's right to enter an appearance by an attorney; (v) the class member's right to be excluded from the class; (vi) the time and manner for requesting exclusion; and (vii) the binding effect of settlement on class members.

Fed. R. Civ. P. 23(c)(2)(B).

Second, *Rule 23(e)* requires all members of the class be notified of the terms of any **[*266]** proposed settlement. *Fed. R. Civ. P. 23(e)*. This "notice is designed to summarize the litigation and the settlement" and "to apprise class members of the right and opportunity to inspect the complete settlement documents, papers, and pleadings filed in the litigation." *Prudential, 148 F.3d at 327* (quoting 2 Newberg, *supra*, § 8.32 at **[**53]** 8-109).

Here, the Notice of the Moark Settlement contained the information required by *Rules 23(c)(2)* and *23(e)*. The Notice appropriately detailed the nature of the action, the Class claims, the definition of the Class and Subclasses, the terms of the proposed settlement agreement, and the class members' right to object or request exclusion from the settlement and the timing and manner for doing so. The Notice also informed Class Members of their opportunity to be heard at the fairness hearing and to enter an appearance through an attorney, and stated that the settlement would be binding on Class Members who did not opt out of it.

Furthermore, the extent of the Plaintiffs' efforts to notify potential Class Members is adequate. The Notice was mailed to potential Class Members individually based upon consumer information provided by Moark. *See Larson v. AT&T Mobility LLC, No. 10-1285, 687 F.3d 109, 2012 U.S. App. LEXIS 13292, 2012 WL 2478376, at *9 (3d Cir. June 29, 2012)* (recognizing that "'individual notice to identifiable class members is not a discretionary consideration to be waived in a particular case. It is, rather, an unambiguous requirement of *Rule 23*. . . . Accordingly, each class member who can be identified through **[**54]** reasonable effort must be notified. . . .'" (quoting *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 176, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974))*). In addition, the parties published a notice of the settlement on the same day in several appropriate publications, and distributed a press release concerning the Moark Settlement to approximately 1,000 journalists in the restaurant and food industries, which resulted in some 335 articles that reported on both the Moark and Sparboe Settlements. *See Zimmer Paper Prods., Inc. v. Berger & Montague, P.C., 758 F.2d 86, 90 (3d Cir.1985)* ("It is well settled that in the usual situation first-class mail and publication in the press fully satisfy the notice requirement of both *Fed. R. Civ. P. 23* and the *due process clause*.").

Accordingly, the Court determines that the notice provided to the putative Class Members constitutes adequate notice in satisfaction of the demands of *Rule 23*.

C. Fair, Reasonable, and Adequate

To grant final approval, the Court must conclude that the proposed settlement is fair, reasonable and adequate. *Ins. Brokerage, 579 F.3d at 258*; *Fed. R. Civ. P. 23(e)(2)*. Trial courts generally are afforded broad discretion in determining whether to approve a proposed class **[**55]** action settlement. *Eichenholtz v. Brennan, 52 F.3d 478, 482 (3d Cir. 1995)*. [16]

Although no opposition has been filed to the Motion and no objectors have contested the settlement, pursuant to *Rule 23(e)*, the Court has the duty of protecting absentee class members, and the Court executes this duty by independently "assuring the settlement represents adequate compensation for the release of the class claims." *Prudential, 148 F.3d at 316-317*. [17] Indeed, **[*267]** certain requirements of *Rule 23* "demand undiluted, even heightened, attention in the settlement context." *Amchem, 521 U.S. at 620*. Cognizant of this duty, the Court evaluates the fairness, reasonableness, and adequacy of the Moark Settlement **[**56]** as follows.

1. Initial Presumption of Fairness

Based upon the record, the Court concludes that an initial presumption of fairness attaches to the Settlement. The Third Circuit Court of Appeals has "directed a district court to apply an initial presumption of fairness when reviewing a proposed settlement where: '(1) the settlement negotiations occurred at arm's length; (2) there was sufficient discovery; (3) the proponents of the settlement are experienced in similar litigation; and (4) only a small fraction of the class objected.'" *Warfarin, 391 F.3d at 535* (citing *In re Cendant Corp. Litig., 264 F.3d 201, 232 n.18 (3d Cir. 2001))*.

These criteria have been met here. The proposed class settlement was negotiated at arm's length over the course of four months by the Plaintiffs' Interim Co-Lead Counsel and Moark's counsel. As further discussed, *infra*, although no formal discovery was conducted in this case during the time of the Moark Settlement negotiations or agreement, Plaintiffs' Interim Co-Lead Counsel conducted informal discovery, including, *inter alia*, independently **[**59]** investigating the merits prior to filing the complaint (with additional investigation prior to filing amended

[16] The Third Circuit Court of Appeals recognizes that "[g]reat weight is accorded [the] views [of the trial judge] because he is exposed to the litigants, and their strategies, positions and proofs. He is aware of the expense and possible legal bars to success. Simply stated, he is on the firing line and can evaluate the action accordingly." *Walsh v. Great Atlantic & Pacific Tea Co., Inc., 726 F.2d 956, 965 (3d Cir. 1983)* (quoting *Ace Heating & Plumbing Co. v. Crane Co., 453 F.2d 30, 34 (3d Cir. 1971))*.

[17] The *Manual for Complex Litigation* observes that the "task is demanding because the adversariness of litigation is often lost after the agreement to settle." David F. Herr, *The Manual for Complex Litigation* § 21.61, at 487 (4th ed. 2011). Indeed, the observation that "'[c]ourts applying [a multifactor] test [ ] often recite the litany and engage in pro forma analyses, but their hearts are not in it,'" could be an equally a propos statement for those parties advancing unopposed motions for final settlement approval. *Ehrheart v. Verizon Wireless, 609 F.3d 590, 605 n.10 (3d Cir. 2010)* (dissenting, Smith, J.) (quoting *Jonathan R. Macey & Geoffrey P. Miller, Judicial Review of Class Action Settlements*, *1 J. of Legal Analysis 167, 172* (2009)).

Here, there is an absence of any objectors or any adversarial challenge to the Motion at bar, which appears to account for the dearth of any arguments criticizing, exposing, or meaningfully addressing possible flaws or drawbacks to the settlement agreement appearing in the record. Nonetheless, the Court recognizes that although the final settlement approval process may have lacked an edgy or adversarial demeanor, this does not necessarily **[**57]** bear on whether the settlement negotiation process was adversarial and resulted in a fair, reasonable, and adequate settlement. This is because the focus here is on the settlement agreement, and "[w]hether or not there are objectors or opponents to the proposed settlement, the court must make an independent analysis of the settlement terms." Herr, *supra*, at 488. Furthermore, the Court notes that, in response to the Court's inquiries for additional facts and development of the record, Interim Co-Lead Counsel fully and appropriately cooperated in the Court's efforts to consider and analyze the proposed settlement.

Nonetheless, in the event that any other partial or complete settlements are reached in the future of this case, or in this multi-district litigation generally, all parties' counsel are well-advised to, again, continue to be responsive and attentive to the Court's inquiries as to settlement agreements during the various approval processes, and also to anticipate and be cognizant of what appropriate, specific information the Court needs—particularly in light of recent case law developments—in order to perform the *fact intensive* inquiry required for executing its duty to protect **[**58]** absentee class members. After all, the burden lies with the movants to demonstrate that the settlement is fair, reasonable, and adequate.

complaints) and exercising opportunities to review records provided by Sparboe, all of which enabled counsel to have sufficient background in the facts of the case, including Moark's alleged role in it. As previously discussed, Interim Co-Lead Counsel are extremely experienced in class action litigation, and specifically, similar antitrust litigation. Furthermore, no member of the purported class objected to the settlement.

Given that the Court finds that the four factors are sufficiently met, the presumption of fairness applies to the settlement.

2. Standards for Determining Fairness of Proposed Settlement

The Third Circuit Court of Appeals has set forth nine factors, known as the *Girsh* factors, to be considered when determining the fairness of a proposed settlement:

> (1) the complexity, expense and likely duration of the litigation; (2) the reaction of the class to the settlement; (3) the stage of the proceedings and the amount of discovery completed; (4) the risks of establishing liability; (5) the risks of establishing damages; (6) the risks of maintaining the class action through **[**60]** trial; (7) the ability of the defendants to withstand a greater judgment; (8) the range of reasonableness of the settlement fund in light of the best possible recovery; (9) the range of reasonableness of the settlement fund to a possible recovery in light of all the attendant risks of litigation . . .

Girsh, 521 F.2d at 157 (internal quotations and punctuation marks omitted); *Prudential, 148 F.3d at 317*. "The settling parties bear **[*268]** the burden of providing that the *Girsh* factors weigh in favour of approval of the settlement." *Pet Food, 629 F.3d at 350* (citing *In re General Motors Corp. Pick-Up Truck Fuel Tank Prods. Liab. Litig., 55 F.3d 768, 785 (3d Cir. 1995))*.

In *In re Prudential Insurance Company of America Sales Practice Litigation Agent Actions*, the Third Circuit Court of Appeals also identified additional non-exclusive factors for courts to consider for a "thoroughgoing analysis of settlement terms." *See Pet Food, 629 F.3d at 350*. Those factors, known as the *Prudential* factors, include:

> [T]he maturity of the underlying substantive issues, as measured by experience in adjudicating individual actions, the development of scientific knowledge, the extent of discovery on the merits, and **[**61]** other factors that bear on the ability to assess the probable outcome of a trial on the merits of liability and individual damages; the existence and probable outcome of claims by other classes and subclasses; the comparison between the results achieved by the settlement for individual class or subclass members and the results achieved—or likely to be achieved—for other claimants; whether class or subclass members are accorded the right to opt out of the settlement; whether any provision for attorneys' fees are reasonable; and whether the procedure for processing individual claims under the settlement is fair and reasonable.

See Prudential, 148 F.3d at 323. [18] While the Court must make findings as to the *Girsh* factors to approve a settlement as fair, reasonable, and adequate, the *Prudential* factors are illustrative of additional factors that may be useful even though they are not essential or inexorable depending upon the specific circumstances.

Although there is an overriding public interest in settling class actions, **[**62]** district courts should apply "an even more rigorous, heightened standard in cases where settlement negotiations precede class certification, and approval for settlement and class certification are sought simultaneously." *Pet Food, 629 F.3d at 350* (internal quotations omitted). "This heightened standard is designed to ensure that class counsel has demonstrated 'sustained advocacy' throughout the course of the proceedings and has protected the interests of all class members." *Prudential, 148 F.3d at 317*.

---

[18] The Court of Appeals invites individualized analysis by noting that "[o]ther related factors . . . also may be relevant to this inquiry." *Prudential, 148 F. 3d at 323 n.73*.

Thus, the Court is required to make an independent analysis of the settlement to determine whether it is fair, reasonable, and adequate by independently evaluating all of the *Girsh* factors (and the *Prudential* factors, as appropriate), recognizing that the Court cannot substitute the parties' assurances or conclusory statements for its independent analysis of the settlement terms. *Pet Food, 629 F.3d at 351*. Accordingly, the Court "may find it necessary to drill down into the case and into the agreement to make an independent 'scrupulous' analysis of the settlement terms" and affirmatively seek out information to the extent that the parties have either not supplied it or have provided only **[**63]** conclusory statements. *See id.*

3. Discussion of *Girsh* and *Prudential* Factors

The Court's analysis of the *Girsh* factors, and the *Prudential* factors, as appropriate, leads to the conclusion that the relevant considerations weigh in favor of a finding of fairness under *Rule 23(e)*.

a. The Complexity, Expense and Likely Duration of the Litigation

The first *Girsh* factor, which evaluates the complexity, expenses and likely duration of the litigation, "captures the probable costs, in both time and money, of continued litigation." *Warfarin, 391 F.3d at 536* (citation omitted). At the outset, the Court appreciates that antitrust suits, like this one, are often complex actions to prosecute. *See In re Linerboard Antitrust Litig.,, 292 F. Supp. 2d 631, 639 (E.D. Pa. 2003)*. Furthermore, given that the settlement agreement occurred at an early stage of this litigation, prior to the active commencement of discovery, Plaintiffs have avoided such expense and **[*269]** delay as may have attached to these settling Defendants. *See Bell Atl. Corp. v. Twombly, 550 U.S. 544, 558-59, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (recognizing that "antitrust discovery can be expensive"). Discovery in this case against Moark would entail—which would demand reasonably **[**64]** the same and similar discovery that will occur as to the remaining Defendants in this suit—considerable expenditures of financial resources and hours of attorney time relating to discovery for liability and damages, including extensive electronic discovery and scores of witness depositions, experts, class certification, further pre-trial motions, and potentially a trial on the merits. The Court determines that such an undertaking "would not only further prolong the litigation but also reduce the value of any recovery to the class." *Warfarin, 391 F.3d at 536*. Accordingly, this factor weighs in favor of the Moark Settlement.

b. The Reaction of the Class to the Settlement

"In an effort to measure the class's own reaction to the settlement's terms directly, courts look to the number and vociferousness of the objectors." *Gen. Motors, 55 F.3d at 812*. Considering this factor from a somewhat different angle, the Third Circuit Court of Appeals has recognized the practical conclusion that it is generally appropriate to assume that "silence constitutes tacit consent to the agreement" in the class settlement context. *See Bell Atl. Corp. v. Bolger, 2 F.3d 1304, 1313 n.15 (3d Cir. 1993)*. By using **[**65]** these considerations as a gauge of class reaction to the Moark Settlement, the Court determines that the class reaction here favors settlement. Indeed, there were no objections filed to the Settlement and thus no negative feedback to the settlement. Moreover, as Interim Co-Lead Counsel has represented, many of the Class Members are sophisticated entities with their own in-house counsel, and ostensibly have the resources and ability to assess the settlement agreement beyond the average layperson or enterprise.

Moreover, there were only 150 requests for exclusion from the Class, which is 1.14% of the Notice addressees, or virtually *di minimis* in light of the over 13,200 Notices of settlement that were sent (as well as published notices and press releases about the settlement). Additionally, 150 opt-outs is low in comparison to the 905 Claims Forms that were returned. [19] Furthermore, as Interim Co-Lead Counsel discussed at the final fairness hearing, many of the 150 requests for exclusion come from entities or subsidiaries organizationally related to other opt-out filers, and so "the approximate number of individual parties that have excluded [themselves from the settlement] resembles **[**66]** more like approximately 74 [parties] as opposed to 150." Final Hr'g Tr. at 12:2-12:4. [20] As such, this factor weighs in favor of the proposed settlement's fairness and adequacy. *See* Cendant Corp., 264 F.3d at 234-35 (recognizing that low number of objectors and opt-outs strongly favors settlement and that "[t]he vast disparity between the number of potential class members who received notice of the Settlement and the number of objectors creates a strong presumption that this factor weighs in favor of the Settlement").

[*270] *c. The Stage of the Proceedings and the Amount of Discovery Completed*

This *Girsh* factor requires the Court to evaluate whether Plaintiffs have an "adequate appreciation of the merits of the case before negotiating" settlement. *Prudential, 148 F.3d at 319* (quoting *Gen. Motors, 55 F.3d at 813*). "To ensure that a proposed settlement is the product of informed negotiations, there should be an inquiry into the type and amount of discovery the parties have undertaken." *Id.* The Third Circuit Court of Appeals has recognized that, even if a settlement occurs in an early stage of litigation, there are means for class counsel **[**68]** to apprise themselves of the merits of the litigation, such as "conduct[ing] significant independent discovery or investigations to develop the merits of their case (as opposed to supporting the value of the settlement)" or retaining their own experts or interviewing witnesses. *See* *Gen. Motors, 55 F.3d at 814*.

Here, the Court is satisfied that Interim Co-Lead Counsel had adequate knowledge of the litigation and informed negotiations. [21] First, Interim Co-Lead Counsel has represented to the Court that they "conducted extensive investigations into the case in preparation for filing of the complaint." Sparboe Final Approval Mot. at 17-18; *see also* Hausfeld Decl. ¶ 5 ("Plaintiffs entered the negotiations with Sparboe with a significant amount of knowledge of Defendants' antitrust conspiracy, as a result of months of investigations into the conspiracy conducted by the numerous experienced law firms representing them."); Asher Decl. ¶ 6 (recounting that the counsel's investigations included research into the egg industry, egg trade associations, such as United Egg Producers ("UEP"), UEP's animal welfare programs, the economics underlying the alleged conspiracy, and the legal issues relating **[**69]** to the conspiracy). [22]

---

[19] Although the response rate to the Notice of Settlement (as measured by the number of Claim Forms returned in relation to number of Notices distributed) is low, the Court does not draw any inferences of negative class reaction to the settlement from this response rate. *Cf.* *Zimmer Paper Products, Inc. v. Berger & Montague, P.C., 758 F.2d 86, 92-93 (3d Cir. 1985)* (recognizing that an ostensibly low response rate may not in fact be low in light of other similar settlements). As previously discussed, the Court has determined that Class Members had adequate notice and opportunity to submit claims, opt out, or file objections. Furthermore, by comparison there were an additional **[**67]** 222 Class Members who only requested exclusion from the Sparboe Settlement. *See* Keogh Aff. ¶ 17.

[20] Interim Co-Lead Counsel has represented that several of the parties that opted out of the settlement, and that have now filed suits as Direct Action Plaintiffs, were in contact with counsel prior to the filing of this class action suit and so "Plaintiffs and [those parties" knew exactly what [the suit] was about. So . . . everyone was well familiar with what the settlement was, what the terms of settlement were, and what the litigation was about." *See* Final Hr'g Tr. at 42:19-43:2.

[21] As to this *Girsh* factor, the Plaintiffs' Motion argues that this factor weighs in favor of final approval because of "the cooperation that will be provided by Moark as a result of this Settlement." Mot. at 17. Because this factor requires assessment of the adequacy of counsel's knowledge and appreciation for the merits *before* settlement negotiations to ensure those negotiations are informed, the Court does not find this particular *post hoc* argument dispositive of whether Interim Co-Lead Counsel was adequately informed entering into and during settlement negotiations.

[22] The Court recognizes that once experienced litigators, such as Interim Co-Lead Counsel, have acquired certain knowledge or insights about the litigation, such information will continue to inform Counsel's understanding of the case and appreciation of the merits. Accordingly, the Court determines it is appropriate to cross-reference here its observations and findings made in its

Second, although virtually all formal discovery was stayed in this case **[**70]** until after the execution of the Sparboe and Moark Agreements, Interim Co-Lead Counsel pursued informal discovery prior to negotiating settlement with Sparboe which enabled counsel to obtain the information that Plaintiffs needed concerning the merits of the case. *See* Prudential, 148 F.3d at 319 (recognizing that informal discovery methods can support adequate appreciation of the merits). Indeed, Interim Co-Lead Counsel has attested that they benefited from information exchanged during negotiations preceding the Sparboe settlement "including the production of hundreds of pages of highly pertinent documents, prior to entering the Settlement Agreement" and an interview with a Sparboe employee. *See* Sparboe Final Approval Mot. at 18; Hausfeld Decl. ¶¶ 7, 10, 12, 13. The information disclosed in that process pertained to the egg industry and specific conduct of the remaining Defendants. Asher Decl. ¶ 11. Interim Co-Lead Counsel represented that the documents Sparboe produced preceding and during the course of settlement negotiations, "support Plaintiffs' allegations that there was a conspiracy to reduce egg supply through various means." Hausfeld Decl. ¶ 14.

Indeed, Plaintiffs apparently **[**71]** used the information acquired from the Sparboe negotiations in drafting their Second Consolidated Amended Class Action Complaint. *See* Sparboe Final Approval Mot. at 2 ("As a result of Sparboe's significant cooperation, Plaintiffs were able to file the now-operative Complaint, unprecedented in size and detail, explaining, in over 500 paragraphs and 140 **[*271]** pages, the intricate workings of Defendants' conspiracy, as well as the statements made, meetings held and actions taken in furtherance thereof."). According to Plaintiffs, "Moark produced transactional data and over 3,200 other documents to [Plaintiffs]. Those materials contained general descriptions of times, places and corporate participants relating to the conspiracy, as well as details regarding [United Egg Producer]'s participation in the conspiracy for the entire length of the class period." Final Hr'g Tr. at 15:13-15:18. [23]

Third, prior to the commencement of the Moark Settlement negotiations, Moark, LLC and Norco Ranch, Inc. had answered the Second Consolidated Amended Class Action Complaint and set forth their affirmative defenses. Land O'Lakes, Inc. had moved for a Rule 12(b)(6) dismissal. These pleadings and motion provided Interim Co-Lead Counsel with an additional platform from which to ascertain Moark's positions on the case and thereby to evaluate the merits of the litigation.

Based upon **[**73]** the foregoing, the Court is satisfied that Interim Co-Lead Counsel, as highly experienced antitrust litigators, were in such a position prior to negotiating and entering into the Moark Settlement that they had an adequate understanding and appreciation of the strengths and weaknesses of the Plaintiffs' case. Accordingly, the Court determines this factor weighs in favor of settlement.

d. Risks of Establishing Liability, Damages, and Maintaining the Class Action Through Trial

These three *Girsh* factors concern the risks of establishing liability, damages, and maintaining a class action through trial. The factors require the Court to "survey the potential risks and rewards of proceeding to litigation in order to weigh the likelihood of success against the benefits of an immediate settlement." Warfarin, 391 F.3d at 537. The inquiry requires balancing "the likelihood of success and the potential damage award if the case were

---

separate Memorandum concerning final approval of the Sparboe Settlement as it is relevant to the Court's independent assessment of this *Girsh* factor.

[23] Additionally, Moark "provided sales data and other financial information" in advance of settlement negotiations "that permitted Plaintiffs to accurately estimate the range of damages that could be proven at trial." Bernstein Decl. ¶ 9. This particular information exchange appears primarily to have assisted **[**72]** Interim Co-Lead Counsel in supporting the value of the settlement. *See, e.g., id.* ¶ 16 (framing the settlement amount in terms of Moark egg sales, net profits, and availability of "reliable data"); Mot. at 11-12 ("The Settlement Agreement was only entered into after careful review of Moark's sales figures, net profits and market share during the damages period, and balanced them against the likely expense of litigating claims against Moark through trial."). However, this does not appear to be the only result of the information exchange because such information also would have furthered counsel's appreciation for the merits of the case as well as establishing damages and identification of potential class members.

taken to trial against the benefits of immediate settlement." *Prudential, 148 F.3d at 319*. For example, the Court assesses the risks of establishing liability to "examine what the potential rewards (or downside) of litigation might have been had class counsel decided to **[**74]** litigate the claims rather than settle them." *Gen. Motors, 55 F.3d at 814*. As another example, the inquiry into establishing damages "attempts to measure the expected value of litigating the action rather than settling it at the current time." *Id. at 816*.

In cases of settlements with only a subset of defendants to the suit, as is the case here:

> [g]iven that the litigation might continue against other defendants, the parties may be reluctant to disclose fully and candidly their assessment of the proposed settlement's strengths and weaknesses that led them to settle separately. The adequacy of the settlement depends in part on the relative exposure and resources of other parties. An informed evaluation is extremely difficult if discovery is incomplete or has been conducted against only a few of the defendants.

Herr, *supra*, § 21.651, at 505. Thus, the Court understands why Plaintiffs decline to provide a detailed assessment of any risks perceived in establishing liability and damages, and instead emphasize that the Court should consider Interim Co-Lead Counsel's estimation of the probability of success in assessing these factors. *See* Mot. at 18-19 & n.8. Indeed, the Court gives credence **[**75]** to **[*272]** counsel's representation that although "they believe [Plaintiffs] will prevail at trial, they recognize that antitrust cases, like all complex litigation against large companies with highly talented defense counsel, have inherent risks." *Id.* at 18-19. The record demonstrates that counsel have significant experience in antitrust cases such as this one which ought to enable them to appreciate the strengths and weakness of the case and the risks of maintaining the action through trial.

Furthermore, antitrust class action litigation is complex, and, especially at its early stages, inherently rife with risk and unpredictability in terms of ultimately prevailing to establish liability and damages and achieve class certification. The Court finds that this suit presents no exception. The bulk of discovery, dispositive motion practice, expert discovery, class certification, and trial are on the horizon of this case with the attendant expense and uncertainties. Thus, there is a genuine risk of not prevailing in establishing class certification, liability, or damages. As all experienced litigators and jurists know, that a jury will be the ultimate fact-finder at trial presents further risks **[**76]** and uncertainties.

The motion practice that has already transpired is indicative of the future risk that Plaintiffs face in prosecuting their case against Moark. The parties have already engaged in extensive motion practice concerning the Second Consolidated Amended Class Action Complaint, which initially included Land O'Lakes, Inc.'s individual motion to dismiss before it was withdrawn subject to final approval of the Moark Settlement. The Plaintiffs' pending motion for leave to file a Third Consolidated Amended Class Action has been challenged in part by one group of defendants as to the claims against them individually.

Based on the detailed allegations in the Second Consolidated Amended Class Action Complaint, Plaintiffs appear to have evidence to support their theory that Defendants conspired to reduce the supply of eggs and egg products, and thereby increase prices. *See* *Fed. R. Civ. P. 11(b)* (concerning representations to the Court in pleadings). Nonetheless, even assuming Plaintiffs could establish their theory of an overarching conspiracy at trial, their success in establishing liability and damages as to individual defendants, such as Moark, is by no means assured.

Through the **[**77]** Sparboe Settlement, Plaintiffs may have secured cooperation in prosecuting their case, which, according to Interim Co-Lead Counsel, "significantly reduces the risks associated with discovery." *See* Sparboe Final Approval Mot. at 20. Nonetheless, such cooperation is no guarantee to success in proving liability and damages in this complex litigation, and Plaintiffs still must show that Defendants individually agreed to join the alleged conspiracy. Indeed, the other Defendants' individual motions to dismiss raised issues concerning whether they individually actually joined the conspiracy. Furthermore, Defendants jointly challenged at the motion to dismiss stage whether Plaintiffs could recover damages outside the statute of limitations. These issues remain live subjects for discovery and additional dispositive motion practice, and any trial on these issues would be protracted and involve a significant amount of testimony and documentary evidence, particularly given the time period at issue, which spans almost a decade, and the number of parties involved.

In **[**78]** addition to challenging the Plaintiffs' complaints, Defendants also have demonstrated an intent to vigorously defend against this suit—including by raising privilege issues relating to the Sparboe Settlement, *see, e.g.*, Order (Doc. No. 361); Order (Doc. No. 403), and other discovery-related issues, *see, e.g.*, Conf. Tr. (Doc. No. 591); Conf. Tr. (Doc. No. 675); Case Mgmt Order Nos. 16 to 19 (Doc. Nos. 604, 626, 656, and 676). Furthermore, Defendants have indicated during the course of these proceedings, particularly during the development of a discovery plan, that they intend to advance defenses, such as an agricultural cooperative immunity defense under the Capper-Volstead Act and a defense involving standard-setting conduct, that will present difficult factual and legal issues for the parties, creating their own brand and quantity of uncertainty for the Plaintiffs' case. *See, e.g.*, Case Mgmt Order No. 19. The parties also contemplate expert discovery on damages, which likely will result in competing expert opinions representing very **[*273]** different damage estimates that will present further ambiguity as to resolution on damages as to each Defendant. *See, e.g.*, Conf. Tr. (Doc. No. 675).

It **[**79]** is entirely likely that Plaintiffs would face similar, if not identical, legal challenges and uncertainties in their claims again Moark. Moark's counsel has represented that Moark would otherwise vigorously defend itself against the Plaintiffs' claims, but for reaching a settlement agreement. Indeed, according to counsel, "the Moark employees feel as though they have never done anything unlawful. They have never engaged in any price fixing. And [insofar that they may cooperate with Plaintiffs pursuant to the Moark Settlement] they will not come into any interview or deposition saying that they had ever done anything wrong." Final Hr'g Tr. at 43:9-43:16.

Finally, Plaintiffs not only face the risk that they will not succeed in establishing liability and damages, but also the risks associated with certifying and maintain a class. *See* *Warfarin, 391 F. 3d at 537*. Indeed "'the prospects for obtaining certification have a great impact on the range of recovery one can expect to reap from the [class] action.'" *Id.* (quoting *Gen. Motors, 55 F.3d at 817*). "The value of a class action depends largely on the certification of the class because, not only does the aggregation of the claims enlarge the **[**80]** value of the suit, but often the combination of the individual cases also pools litigation resources and may facilitate proof on the merits." *Gen. Motors, 55 F.3d at 817*. Thus, this *Girsh* "factor measures the likelihood of obtaining and keeping a class certification if the action were to proceed to trial," recognizing that a "district court retains the authority to decertify or modify a class at any time during the litigation if it proves to be unmanageable." *Id.* (citing *Prudential, 148 F.3d at 321*).

Many, if not all, Defendants no doubt will vigorously oppose class certification. As Interim Co-Lead Counsel has recognized, Moark, if it remained in this litigation, would join those defense efforts in this respect. *See* Mot. at 20 ("Interim Counsel acknowledges that had Moark not settled, it would have joined the non-settling Defendants in contesting class certification."). The Court of Appeals for the Third Circuit has recognized: "There will always be a 'risk' or possibility of decertification, and consequently the court can always claim this factor weighs in favor of settlement." *Prudential, 148 F.3d at 321*. [24] Thus, there are inherent difficulties in bringing a class action to trial **[**81]** that apply here.

Because Plaintiffs would face genuine risks and uncertainties in establishing liability and damages against Moark, and in obtaining and maintaining class certification, should the claims against Moark continue without settlement, these three factors weigh in favor of settlement.

e. The Ability of the Defendant to Withstand a Greater Judgment

This factor "is concerned with whether the defendants could withstand a judgment for an amount significantly greater than the Settlement." *Cendant, 264 F.3d at 240*. Thus, the Court must consider here whether Moark could withstand a judgment for an amount significantly greater than $25 million and the costs associated with the proposed cooperation.

---

[24] Based on this observation, the Court of Appeals has questioned the significance of this factor in "settlement-only" class actions following the Supreme Court's decision in *Amchem. See* *Prudential, 148 F.3d at 321*.

The limited evidence in the record suggests that Moark would be able to withstand a greater judgment. Indeed, the "$25,000,000 Settlement Amount represents almost 1% of total Moark egg sales during the class period and almost 28% of Moark's cumulative net profits in the egg division **[**82]** for the last six years." Bernstein Decl. ¶ 16. "For the full time period in which reliable data was available (2002-2008), Moark's total shell egg sales to non-defendants from 2002-2008 were approximately $2,456,200,000. Moark's net profits from shell eggs and egg products were approximately $90,516,000." *Id.* There is no evidence concerning the financial or other possible impacts a greater judgment amount would have on Moark. *See, e.g.,* **[*274]** *Cendant, 264 F.3d at 240-41* (discussing the possibility of bankruptcy for a settling defendant).

Furthermore, the Plaintiffs' arguments tacitly suggest that Moark could withstand a larger judgment. They argue that even if Moark could withstand a larger judgment, it is "not an obstacle to approving the Settlement." Mot. at 20.

Thus, the record suggests that Moark could pay substantially more than the consideration set forth in the Settlement terms. Accordingly, this factor does not weigh in favor of approval.

f. The Range of Reasonableness of the Settlement in Light of the Best Possible Recovery and the Attendant Risks of Litigation

"The last two *Girsh* factors ask whether the settlement is reasonable in light of the best possible recovery and the risks the **[**83]** parties would face if the case went to trial." *Prudential, 148 F.3d at 322*. In other words, the Court evaluates "whether the settlement represents a good value for a weak case or a poor value for a strong case. The factors test two sides of the same coin: reasonableness in light of the best possible recovery and reasonableness in light of the risks the parties would face if the case went to trial." *Warfarin, 391 F.3d at 538* (citing *Prudential, 148 F.3d at 322*).

Here, the Court evaluates the settlement in light of its monetary and nonmonetary consideration. Ordinarily, "[i]n order to assess the reasonableness of a proposed settlement seeking monetary relief, 'the present value of the damages plaintiffs would likely recover if successful, appropriately discounted for the risk of not prevailing, should be compared with the amount of the proposed settlement.'" *Prudential, 148 F.3d at 322*. (citing *Gen. Motors, 55 F.3d at 806*). [25] "Settlements involving nonmonetary provisions for class members . . . deserve careful scrutiny to ensure that these provisions have actual value to the class," which can be accomplished through a *Rule 23(e)* analysis. *Fed. R. Civ. P. 23(h)* advisory committee note **[**84]** (2003). "Despite the difficulties they pose to measurement, nonpecuniary benefits . . . may support a settlement." *Bolger, 2 F.3d at 1311*.

As this settlement is structured to provide both monetary and nonmonetary consideration, it is difficult to determine accurately the actual total value of the proposed settlement. The traditional calculus for ascertaining the value of monetary settlements under Third Circuit law is inappropriate under these circumstances because it would not entirely capture the value of the relief afforded by this settlement. *Cf.* ***[**85]*** *Prudential, 148 F.3d at 323* (recognizing that "both the structure of the settlement and the uncapped nature of the relief provided make it difficult to determine accurately the actual value of the settlement" and as such, "the traditional calculus suggested by the *Manual for Complex Litigation 2d* and adopted by this Court in *G.M. Trucks* [*Gen. Motors*] cannot be applied to this case"). [26]

The Court determines that the $25 million monetary relief in conjunction with the additional, valuable consideration of Moark's agreement to cooperate with Plaintiffs is reasonable both in light of the best possible recovery against

---

[25] The Third Circuit Court of Appeals expects that "settling parties . . . should . . . provide[] information to determine the range of reasonableness of the [settlement] allocation 'in light of the best possible recovery,' and 'in light of all the attendant risks of litigation.'" *Pet Food, 629 F.3d at 354* (citations omitted). The Court further explains that "'[t]his figure should generate a range of reasonableness (based on size of the proposed award and the uncertainty inherent in these estimates) within which a district court approving (or rejecting) a settlement will not be set aside.' Precise value determinations are not required.'" *Id.*

[26] Plaintiffs have not proffered any evidence for the record concerning such a present value analysis.

Moark and in light of the risks the parties would face if the case went to trial against Moark. Certainly, calculating the best possible recovery against Moark for the class in the aggregate is "exceedingly speculative" **[**86]** at this point in time given the previously-discussed risks of establishing liability and damages associated with this complex litigation, even when considering that **[*275]** treble damages are technically available for recovery under the Plaintiffs' Sherman Act claim.

At the same time, the Court recognizes that Moark's agreement to cooperate with Plaintiffs throughout the course of pre-trial proceedings and trial is valuable consideration in light of the risks in proceeding with this suit against the remaining Defendants. [27] Interim Co-Lead Counsel has attested that "[o]ne such benefit [of Moark's cooperation] is information regarding the conspiracy and Defendant UEP's participation in it for the length of the Class Period" and the provision of "important information and witnesses that bolster Plaintiffs' claims against the non-settling Defendants will be made available to Plaintiffs without the time and expense involved in pursuing formal discovery." Bernstein Decl. at ¶ 18. Indeed, Moark produced some 3,200 documents with transactional data to Plaintiffs already, as well as making available employees for Plaintiffs to interview. *Id.* Granted, it seems that much of this non-privileged information **[**87]** would otherwise be available eventually through discovery as required under the federal rules, if Moark remained in this suit. Nonetheless, such cooperation reduces costs and time associated with formal discovery. Indeed, the Moark Settlement likely has short-circuited at least some of the expense and delay of future discovery by securing Moark's cooperation and removing the Moark forces from those who would contest or complicate Plaintiffs' discovery efforts. Additionally, Plaintiffs gain a clear tactical advantage in obtaining such information through non-traditional discovery mechanisms, including, by way of example, the advantage of having this information to formulate strategy in taking discovery from the remaining Defendants, specific tailoring the scope and focus of discovery, and so forth. Finally, Plaintiffs have represented to the Court that Moark has helped Interim Co-Lead Counsel in resolving privilege issues relating to the Sparboe Settlement. Final Hr'g Tr. at 15:19-16:3.

While the value of this **[**88]** cooperation is certainly of tangible value, it is not entirely without compare. First, Sparboe, too, has agreed to cooperate with Plaintiffs—albeit the information that Sparboe purportedly can provide pertains to a shorter time period than Moark's information. Second, Moark's cooperation does not appear to assure that Plaintiffs will have conclusive evidence in support of their claims against the remaining Defendants. Moark's counsel represented concerning the nature of Moark's cooperation as follows: "No one will come in and say there was this giant conspiracy and people conspired and were all sitting in a room conspiring. [B]ut they will say exactly what happened, when it happened and who did what. Whatever that means. It means whatever it is." Final Hr'g Tr. at 43:9-43:16. Indeed, Moark is a named Defendant in other cases in this litigation for the Indirect Purchaser Plaintiffs and Direct Action Plaintiff Giant Eagle Inc., Winn-Dixie Stores, Inc., Roundy's Supermarkets, Inc., C&S Wholesale Grocers, Inc., and H.J. Heinz Company, L.P., and the Moark Settlement does not impact those plaintiffs' claims against which Moark must continue to defend.

Nonetheless, when considering these two **[**89]** *Girsh* factors in light of the record *in toto*, the Court is persuaded that the $25 million settlement amount and Moark's cooperation confer real and substantial benefits upon the Class. The Court further concludes that the settlement is reasonable in light of the best possible recovery and the risks the parties would face if the case went to trial against Moark. These factors weigh in favor of approval of the settlement.

g. Prudential *Factors*

The relevant *Prudential* factors weigh in favor of approving the Moark Settlement, or, at worst, are neutral factors. First, the Court has already addressed the impact that the limited extent of discovery on the merits thus far has on this litigation and other factors that bear on the ability to assess the **[*276]** probable outcome of a trial on the merits of liability and individual damages.

---

[27] The Court does not comment on whether the information and facts that Moark may provide would be established, or even admissible, at trial, based upon counsel's representations.

Second, the settlement agreement allows putative class members the right to opt out of the settlement. Indeed, some parties exercised this right by filing requests for exclusion. Furthermore, the Notice Packet included both a Notice of the Moark Settlement and a Notice of the Sparboe Settlement, thereby simultaneously notified class members of the Sparboe Settlement and **[**90]** enabling class members to assess the adequacy of the two settlements in conjunction with one another and as to the whole suit.

Third, the results achieved by the settlement for the Class and Subclasses are immediate, concrete, and realized without the costs and delays associated with extensive discovery and other later stages of litigation. Moark's cooperation pursuant to the settlement aids the Plaintiffs in prosecuting and resolving their claims against the other Defendants. Indeed, Interim Co-Lead Counsel describe the Moark Settlement (in conjunction with the Sparboe Settlement) as an "icebreaker" settlement, which is a term used to describe "the first settlement in the litigation—and [a settlement that] should increase the likelihood of future settlements." *Linerboard, 292 F. Supp. 2d at 643*. By contrast, it is unclear, given the aforementioned risks and uncertainties, *supra*, whether Direct Action Plaintiffs who are individually prosecuting their claims apart from the Class, or other parties who opted-out of the Moark Settlement, will be successful in their claims against Moark and the other Defendants, and whether that result will be immeasurably better than the result for class **[**91]** members under the settlement agreement and as to the entire suit. For the same reasons, it is unclear whether those opt-out parties might achieve better settlements than the class to resolve similar claims against Moark.

Fourth, the Moark Settlement only releases Class Members' claims against Moark for claims arising out of injuries or damages that occurred "from the beginning of time to the date when notice of the Court's entry of an order preliminarily approving this Agreement is first published" *and* that resulted from the conduct asserted in the Plaintiffs' suit. As such, future claims for injuries or damages against Moark arising outside this time period but resulting from the alleged conduct giving rise to the class claims are not barred. The Release does not apply to those parties who opted-out of the Moark Settlement, such as Direct Action Plaintiffs Giant Eagle Inc., Winn-Dixie Stores, Inc., Roundy's Supermarkets, Inc., C&S Wholesale Grocers, Inc., and H.J. Heinz Company, L.P.

Fifth, all segments of the class are being treated equally relative to the monetary relief under the Moark Settlement. The distribution of the Settlement Amount, after administrative costs and expenses **[**92]** and counsel fees, is a *pro rata* share proportionate to the dollar amount of a class members' direct purchases of shell egg and egg products in the United States during the period designated in the Agreement. There is no differentiation among class members in terms of subclasses or class representatives.

The Moark Settlement sets forth a method for calculating the distribution for recovery by Class Members based upon *pro rata* allocations, which appears to conform with a common formula used in class actions:

> [A] common formula in class actions for damages is to distribute the net settlement fund after payment of counsel fees and expenses, ratably among class claimants according to the amount of their recognized transactions during the relevant time period. A typical requirement is for recognized loss to be established by the filing of proofs of claim, or statements of intention to prove claims, based on a specified value of transactions involved. . . . [I]n antitrust class actions, a proof of claim form may be utilized in disseminating the settlement proceeds among class members."

Newberg, supra, § 12.35. Although the record demonstrates that the distribution allocation will be based upon **[**93]** *pro rata* shares after costs and expenses and that the amount of recovery "will be less than the total amount you paid" for the eggs and egg products, given that the recovery represents "overcharge," Notice at 5, Plaintiffs have not submitted a formal plan of allocation with the settlement agreement concerning the procedure for processing individual claims under the settlement, **[*277]** addressing administrative costs and fees for the settlement, and so forth. "The plan of allocation is usually submitted with the settlement agreement for consideration at the settlement hearing, though it may be deferred until a later date with court approval." Newberg, *supra*, § 12.35. Here, Plaintiffs have represented they intend to separately apply to the Court to approve a final plan of allocation following settlement approval. [28]

Sixth, the Moark Settlement's provision for the possible award of attorneys' fees and costs from the Settlement Amount is a neutral factor at this time. The Court cannot ascertain based upon the Agreement, which merely provides that Plaintiffs may seek attorneys' fees, whether such unspecified fees and costs impact the fairness, reasonableness, and adequacy of the settlement. [29] As a general matter, that the parties have agreed the attorneys' fees and costs may be awarded from the Settlement Amount would not weigh against approving the settlement. *Cf.* Newberg, *supra*, § 12:3 ("The defendants in a class action settlement may properly agree to pay the plaintiffs' attorneys' fees and expenses . . . . Such an agreement may take the form of an agreement to pay reasonable fees, to be subsequently determined by the court . . . ."). The Settlement Agreement specifically provides that "Class Counsel may seek an award of attorneys' fees and reasonable litigation expenses approved by the Court, to be paid out of the Settlement Amount after the Final Approval of the Agreement." Moark Settlement ¶ 35. The Notice of Settlement expands upon the agreement's language, **[**95]** stating that "Class Counsel will apply to the Court for an award from the Settlement Fund of attorneys' fees and for reimbursement of litigation costs and expenses incurred, including fees and costs expended while providing Notice to the Class and while administering the Settlement Fund (including the plan of allocation)." Notice at 4. The Notice also stated that the application would be for an award "in an amount not to exceed thirty percent of $25 million as well as the costs and expenses incurred." *Id.* Because, here, the Moark Settlement Agreement provides that the attorneys' fees and expenses ultimately will be determined upon approval of the Court, which will require the assessment of the reasonableness of any such fees and expenses sought pursuant to *Fed. R. Civ. P. 23(h)* (and *Fed. R. Civ. P. 54(d)(2)*), the Moark Settlement's provisions concerning attorneys' fees and expenses do not raise issues at this time that would weigh against approving the settlement.

h. Summary of Girsh *and* Prudential *Factors*

Upon considering the Moark Settlement Agreement in light of all of the *Girsh* and the relevant *Prudential* factors, the Court is satisfied that the settlement is fair, reasonable, and adequate. As discussed, a few of the factors are neutral or weigh against settlement approval. However, all of the factors considered in determining the fairness of a settlement "are a guide; an unfavorable conclusion regarding one or more factors does not automatically render the settlement unfair." 2 Joseph M. McLaughlin, *McLaughlin on Class Actions: Law and Practice* § 6:8 (6th ed. 2010); *see also* *Ehrheart, 609 F.3d at 605* **[**97]** (dissenting, Smith, J.) (quoting same). Accordingly, not every factor need weigh in favor of settlement in order for the settlement **[*278]** to be approved by the Court. *See* *Cendant, 264 F. 3d at 242-43* (affirming a final settlement approval when not all factors weighed in favor of approval). Because, on balance, the factors as considered above weigh in favor of settlement, the Court concludes that approval of the settlement is appropriate pursuant to *Fed. R. Civ. P. 23(e)*.

V. Conclusion

---

[28] *See generally* ***In re Ikon Office Solutions, Inc., Secs. Litig., 194 F.R.D. 166, 184 (E.D. Pa. 2000)*** ("Approval of a plan of allocation of a settlement fund in a class action is 'governed by the same standards of review applicable to approval of the settlement as a whole: the distribution plan must be fair, reasonable and adequate.' " (quoting *In re Computron Software, Inc., 6 F. Supp. 2d 313, 321 (D.N.J. 1998))*; **[**94]** Newberg, *supra*, § 12.35 (same).

[29] As discussed earlier, following the final fairness hearing Plaintiffs filed a Motion for an Award of Attorneys' Fees and for Reimbursement of Expenses, in which Plaintiffs seek specific amounts for attorneys' fees and reimbursement **[**96]** of expenses relating to the litigation to be paid from the Moark Settlement. The Court intends to address this Motion separately, and does not consider here the substantive arguments presented in that Motion in relation to considering whether the Moark Settlement is fair, reasonable, and adequate. After all, the Court's inquiry as to this *Prudential* factor focuses on whether the settlement agreement's *provision* for attorneys' fees are reasonable, and that provision only sets forth that attorneys' fees and expenses are subject to Court approval.

For the foregoing reasons, the Court determines that the Class and Subclasses meet the certification requirements of *Rule 23* for settlement purposes, and concludes that the proposed settlement agreement is fair, reasonable, and adequate. Accordingly, the Court grants the Plaintiffs' motion for final approval of the class action settlement with Defendants Moark, LLC, Norco Ranch, Inc., and Land O'Lakes, Inc.

An Order consistent with this Memorandum follows.

BY THE COURT:

/s/ Gene E.K. Pratter

GENE E.K. PRATTER

United States District Judge

ORDER GRANTING FINAL APPROVAL OF THE CLASS ACTION SETTLEMENT BETWEEN DIRECT PURCHASER PLAINTIFFS AND DEFENDANTS MOARK, LLC, NORCO RANCH, INC., AND LAND O'LAKES, INC.

AND NOW, this 16th **[**98]** day of July, 2012, upon consideration of the Motion for Final Approval of the Class Action Settlement Between Plaintiffs and Defendants Moark, LLC, Norco Ranch, Inc., and Land O'Lakes, Inc. (Doc. No. 465), and following a final fairness hearing, in accordance with *Federal Rule of Civil Procedure 23*, it is hereby **ORDERED** that the Motion (Doc. No. 465) is **GRANTED** as outlined in this Order and the accompanying Memorandum.

Based on the Court's review of the proposed Settlement Agreement Between Direct Purchaser Plaintiffs and Defendants Moark, LLC, Norco Ranch, Inc., and Land O'Lakes, Inc. ("Settlement Agreement"), and the entire record of this case, and having conducted a final fairness hearing on the matter, the Court determines as follows:

1. The Court has jurisdiction over the subject matter of this action.

2. Terms used in this Order that are defined in the Settlement Agreement, unless otherwise defined herein, have the same meanings in this Order as in the Settlement Agreement.

3. The following Settlement Class, as defined in the Settlement Agreement, which was conditionally certified in the Court's Order granting preliminary approval of this settlement, is certified for settlement purposes **[**99]** only as follows:

> All persons and entities that purchased eggs, including Shell Eggs and Egg Products, produced from caged birds in the United States directly from any Producer, including any Defendant, during the Class Period from January 1, 2000 through the date when notice of the Court's entry of an order preliminarily approving this settlement and certifying a Class for settlement purposes is first published.
>
> > a.) Shell Egg SubClass
> > All individuals and entities that purchased Shell Eggs produced from caged birds in the United States directly from any Producer including any Defendant, during the Class Period from January 1, 2000 through the date when notice of the Court's entry of an order preliminarily approving this settlement and certifying a Class for settlement purposes is first published, excluding individuals and entities that purchased only "specialty" Shell Eggs (certified organic, nutritionally enhanced, cage-free, free-range, and vegetarian-fed types) and "hatching" Shell Eggs (used by poultry breeders to produce breeder stock or growing stock for laying hens or meat).
> >
> > b.) Egg Products SubClass

> All individuals and entities that purchased Egg Products produced from Shell Eggs **[**100]** that came from caged birds in the United States directly from any Producer, including any Defendant, during the Class Period from January 1, 2000 through the date when notice of the Court's entry of an order preliminarily approving this settlement and certifying a Class for settlement purposes is first published, excluding individuals and entities that purchased only "specialty" Egg Products (certified organic, nutritionally enhanced, cage-free, free-range, and vegetarian-fed types).

Excluded from the Class and SubClasses are Producers, and their respective parents, subsidiaries and affiliates, all government entities, as well as the Court and staff to whom this case is assigned, and any member of the Court's or staff's immediate family.

4. The Court finds, as discussed more thoroughly in the accompanying Memorandum, that the Settlement Class satisfies the applicable prerequisites for class action treatment under *Federal Rule of Civil Procedure 23(a)* and *(b)*. The Settlement Class is so numerous that joinder of all members is not practicable, there are questions of law and fact common to the Settlement Class, the claims of the Class Representatives are typical of the claims of the Settlement **[**101]** Class, and the Class Representatives will fairly and adequately protect the interests of the Settlement Class. For purposes of this settlement, questions of law and fact common to the members of the Settlement Class predominate over any questions affecting only individual members, and a class action is superior to other available methods for the fair and efficient adjudication of the controversy.

5. Notice of the Settlement Agreement to the Settlement Class required by *Rule 23(e) of the Federal Rules of Civil Procedure* has been provided in accordance with the Court's Orders granting preliminary approval of this settlement and notice of this settlement, and such Notice has been given in an adequate and sufficient manner; constitutes the best notice practicable under the circumstances; and satisfies *Federal Rules of Civil Procedure 23(c)(2)(B)* and *23(e)* and due process.

6. Defendants have filed notification of this settlement with the appropriate federal and state officials pursuant to the Class Action Fairness Act of 2005 ("CAFA"), *28 U.S.C. § 1715*.

7. As discussed more thoroughly in the accompanying Memorandum, the Court finds that the Settlement Agreement is sufficiently fair, reasonable **[**102]** and adequate to the Settlement Class pursuant to *Federal Rule of Civil Procedure 23(e)*. Specifically, the Court finds that the settlement meets the standard for an initial presumption of fairness. Additionally, the Court's analysis of the factors set forth in *Girsh v. Jepson, 521 F.2d 153 (3d Cir. 1975)*, and factors set forth in *In re Prudential Insurance Co. American Sales Practice Litigation Agent Actions, 148 F.3d 283 (3d Cir. 1998)*, as appropriate, leads to the conclusion that the relevant considerations weigh in favor of finding the settlement is fair, reasonable and adequate under *Federal Rule of Civil Procedure 23(e)*.

9. The Settlement Agreement is finally approved pursuant to *Federal Rule of Civil Procedure 23(e)* of the Federal Rules of Civil Procedure as fair, reasonable, and adequate, and the parties are directed to consummate the Settlement Agreement in accordance with its terms.

10. The United States District Court for the Eastern District of Pennsylvania shall retain jurisdiction over the implementation, enforcement, and performance of this Settlement Agreement, and shall have exclusive jurisdiction over any suit, action, motion, proceeding, or dispute arising out of or **[**103]** relating to this Settlement Agreement or the applicability of this Settlement Agreement that cannot be resolved by negotiation and agreement by Plaintiffs and Moark, LLC, Norco Ranch, Inc., and Land O'Lakes, Inc. This Settlement Agreement shall be governed by and interpreted according to the substantive laws of the Commonwealth of Pennsylvania without regard to its choice of law or conflict of laws principles. Moark, LLC, Norco Ranch, Inc., and Land O'Lakes, Inc. submit to the jurisdiction in the Eastern District of Pennsylvania only for the purposes of this Settlement Agreement and the implementation, enforcement and performance thereof. Moark, LLC, Norco Ranch, Inc., and Land O'Lakes, Inc. otherwise retain all defenses to the Court's exercise of personal jurisdiction over Moark, LLC, Norco Ranch, Inc., and Land O'Lakes, Inc.

Opinion

[*281] **MEMORANDUM**

GENE E.K. PRATTER, J.

Direct Purchaser Plaintiffs move the Court for final approval of a proposed settlement agreement between the Plaintiffs and Defendant Sparboe Farms, Inc. ("Sparboe"). [1] Under the proposed Sparboe Settlement, Plaintiffs will release Sparboe from all pending claims in exchange for cooperation in prosecuting the Plaintiffs' claims against the

---

[1] Plaintiffs filed a Motion for Final Approval of Settlement Agreement with Sparboe Farms, Inc. (Doc. No. 443) (hereinafter, "Mot."). They also submitted filings supplementing this Motion. (Doc. Nos. 483 and 485).

remaining Defendants, such cooperation being in the form of documents and witness testimony. For the reasons set forth below, the Court grants the motion for final approval of the Sparboe Settlement.

I. Factual and Procedural Background[2]

This litigation embraces numerous consolidated and coordinated actions based upon allegations of a conspiracy in violation of the Sherman Act among egg producers and trade groups to manipulate the supply of eggs and egg products and thereby affect the domestic prices of those goods. *See* In re Processed Egg Prods. Antitrust Litig., 588 F. Supp. 2d 1366, 1367 (J.P.M.L. 2008). The plaintiffs are direct purchasers (such as grocery stores, commercial food manufacturers, restaurants, other food service providers, and other entities who purchase directly from Defendants or other egg producers) and indirect purchasers (individual consumers who purchased from other parties along the distribution chain) of shell eggs, egg products, or both. The direct purchaser plaintiffs are categorized as "Direct Purchaser Plaintiffs" who have brought a consolidated class action against Defendants, **[**3]** and "Direct Action Plaintiffs" who are pursuing individual actions against Defendants.

A. Direct Purchaser Plaintiffs' Suit

The moving Plaintiffs are Direct Purchaser Plaintiffs who accuse defendant egg producers, including Sparboe, and certain trade groups, of violating Section 1 of the Sherman Act and seek injunctive relief, treble damages, attorneys' fees and costs. They have demanded a jury trial. These Plaintiffs filed a consolidated class action complaint, which **[*282]** they have amended. The allegations of the consolidated complaint superseded or replaced all of the previously-filed individual and consolidated complaints.

The most recent iteration of the Plaintiffs' claim is the Second Consolidated Amended Class Action Complaint (Doc. No. 291) which prompted extensive motion practice. The culmination of this motion activity resulted in the Court dismissing without prejudice claims brought against individual Defendants Hillandale-Gettysburg, L.P., Hillandale Farms, Inc., and Hillandale Farms East, Inc. and United Egg Association. *See* Sept. 26, 2011 Mem. and Order, 821 F. Supp. 2d 709 (Doc. Nos. 562 and 563). The Court also dismissed without prejudice claims against all Defendants for damages **[**4]** barred by the four-year statute of limitations. *See* Nov. 30, 2011 Opinion and Order, 2011 U.S. Dist. LEXIS 139995, 2011 WL 5980001 (Doc. Nos. 593 and 594). [3]

As a result of these rulings, Plaintiffs presently proceed on the core of their Section 1 Sherman Act claims against Defendants. At the time the parties' filed their motions to dismiss, the Court partially lifted the stay of discovery previously entered at the outset of this litigation. Lifting the stay permitted the parties to exchange requests for production of documents and confer as to various aspects of a discovery plan. *See* Order (Doc. No. 320); Pls.' Mot. for an Award of Attorneys' Fees and for Reimbursement of Expenses (Doc. No. 493) (hereinafter, "Fees Mot."), Ex. 1, Asher Decl. ¶¶ 21-22 (Doc. No. 493-2) (hereinafter, "Asher Decl."). **[**5]** Following the Court's rulings on the motions to dismiss the Second Consolidated Amended Class Action Complaint, the parties requested a further partial lifting of the discovery stay. The Court entered Orders further partially lifting the discovery stay, commencing the discovery period, and setting forth various discovery deadlines and parameters concerning, *inter alia*, document

---

[2] The background discussed here is drawn from the exhibits and materials submitted in relation **[**2]** to the Motion *sub judice*, the hearing on the Motion, and the overall record of this case, including the Plaintiffs' Motion for Final Approval of the Class Action Settlement Between Plaintiffs and Defendants Moark, LLC, Norco Ranch, Inc., and Land O'Lakes, Inc. (Doc. No. 465) (hereinafter, "Moark Final Approval Mot.").

[3] Plaintiffs have filed a motion seeking leave to file a Third Consolidated Amended Class Action Complaint that seeks, *inter alia*, to revive claims against Defendants Hillandale-Gettysburg, L.P., Hillandale Farms, Inc., and Hillandale Farms East, Inc. and to amend claims of fraudulent concealment and tolling of the statute of limitations. Opposition briefing has been filed, and the Court will address that motion separately.

production, interrogatories, depositions, non-party discovery, class certification, and class certification experts. *See* Case Mgmt. Orders Nos. 18 and 19 (Doc. Nos. 656 and 676).

B. Sparboe Settlement Negotiations

Sparboe was named as a Defendant in the Consolidated Amended Class Action Complaint (Doc. No. 41). Less than two months after the Consolidated Amended Class Action Complaint was filed, Interim Co-Lead Counsel [4] and Sparboe's counsel began engaging in settlement negotiations. Mot., Ex. A, Hausfeld Decl. ¶ 8 (Doc. No. 443-2) (hereinafter, "Hausfeld Decl."). Spanning three months, these negotiations included numerous telephone conferences and four in-person meetings. *Id.* ¶¶ 6, 7. The negotiations centered upon Sparboe cooperating with Plaintiffs in the prosecution of the claims against the other Defendants **[**6]** by providing to Plaintiffs information in the form of documents and witness testimony. *Id.* ¶¶ 8-9.

Sparboe made an initial proffer to Interim Co-Lead Counsel in Washington, D.C. "regarding what Sparboe's information would show and how it would assist Plaintiffs' in the prosecution of their case." *Id.* ¶ 9. A month later, Sparboe "proffered both hundreds of pages of documents and live witness testimony from Sparboe employee Wayne Carlson in Minneapolis" to Plaintiffs. *Id.* ¶ 10. Plaintiffs have represented that Interim Co-Lead Counsel was "not initially convinced that they should enter into a settlement agreement" at that time, and Interim Co-Lead Counsel and Sparboe's counsel held **[**7]** several telephone conferences concerning the nature of Sparboe's cooperation. *Id.* ¶ 11.

[*283] Following these conferences, Sparboe then proffered "hundreds of pages of additional documents, as well as identifying several executives and current and former Sparboe employees who could offer testimony in the case that may corroborate the information contained in the documents, as well as provide additional information." *Id.* ¶ 12. Shortly thereafter, Sparboe's counsel proffered documents and "additional descriptions of expected witness testimony." *Id.* ¶ 13.

In addition to the proffers concerning documents and witness testimony, at some point during negotiations Interim Co-Lead Counsel made a demand for monetary compensation that "was based on what an econometric analysis would have produced with regard to the production of transaction data and then an analysis of the market and the transaction data as it related to Sparboe with the traditional approach as well of having Sparboe, if it were the first [party to settle], have a discount off its actual damages." Prelim. Hr'g Tr. at 7:16-21. (Doc. No. 198). Sparboe consistently maintained the position that it would not agree to a settlement that provided **[**8]** direct monetary compensation to the Class Members. *See* Prelim. Hr'g Tr. at 7:12-14; *id.* at 7:22-23.

Based upon the conferences and proffers, Interim Co-Lead Counsel concluded that Sparboe's cooperation in advance of discovery would provide information that would supplement and enhance the information that Interim Co-Lead Counsel previously had uncovered through their own independent investigation prior to filing the First Consolidated Amended Complaint. *See* Hausfeld Decl.¶ 14; Mot. at 3. Thereafter, the parties reached an agreement and executed the Sparboe Settlement Agreement. Hausfeld Decl. ¶ 15.

The day after the parties executed the Agreement, Sparboe produced documents to Interim Co-Lead Counsel for inspection and review in Minneapolis, Minnesota. *Id.* ¶ 16. In the next months, Sparboe made available for interviews four witnesses, who, according to Interim Co-Lead Counsel, "provided invaluable information about Defendants' conspiracy." *Id.* ¶ 17. Based upon the information that Interim Co-Lead Counsel obtained from Sparboe, they prepared the Second Consolidated Amended Class Action Complaint. *Id.* ¶ 18. Sparboe is not

[4] In Case Management Order No. 1, the Court approved the following law firms to serve as Interim Co-Lead Counsel: Weinstein Kitchenoff & Asher LLC; Hausfeld LLP; Bernstein Liebhard LLP; and Susman Godfrey LLP. It appears there are additional counsel that Interim Co-Lead Counsel have directed to work on this case. *See* Fees Mot. at 1. Thus, reference herein to "Interim Co-Lead Counsel" may also encompass the efforts of other counsel who represent Plaintiffs and acted at the direction of Interim Co-Lead Counsel.

presently named in this Complaint. *See* Second Consol. Am. Class **[**9]** Action Compl. ¶ 3. [5] Presumably, Sparboe's absence is the result of the pending settlement. The following discussion of the nature of the case presupposes Sparboe would indeed occupy in the claims going forward the role it was assigned in the claims initially if the settlement had not been achieved.

The Court preliminarily approved the Sparboe Settlement and certified the Class and Subclasses for settlement purposes following a hearing. *See* Order on Preliminary Approval of Sparboe Settlement (Doc. No. 214). In the same Order, the Court stayed the Plaintiffs' suit against Sparboe pending further Order of the Court. *See id.* at ¶ E.1. In a separate Order, the Court **[**10]** also approved the form of notice of the Sparboe Settlement. *See* Order Approving Dissemination of Notice of Settlements Between Direct Purchaser Plaintiffs and (i) Defendant Sparboe Farms, Inc. and (ii) Defendants Moark, LLC, Norco Ranch, Inc. and Land O'Lakes, Inc. (Doc. No. 388) (hereinafter, "Notice Approval Order").

Following the notice period established by the Court, Plaintiffs filed the motion *sub judice*, and the Court held the final fairness hearing on the Sparboe Settlement as required by *Fed. R. Civ. P. 23(e)(2)*. *See* Sparboe Final Approval Hr'g Tr. (Doc. No. 463) (hereinafter, "Final Hr'g Tr."). No objections were filed to the proposed Sparboe Agreement. No objectors appeared at the fairness hearing. Plaintiffs filed supplemental **[*284]** briefing and materials in support of their motion for final approval. Following the hearing, the Court withheld ruling on the motion until the notice period required pursuant to *28 U.S.C. § 1715(d)* under the Class Action Fairness Act ("CAFA") had elapsed.

C. Moark Settlement

As further background, following the Sparboe Settlement, Defendants Moark, LLC, Norco Ranch, Inc., and Land O'Lakes, Inc. (collectively, "Moark") entered into a settlement agreement. **[**11]** Following a hearing, the Court entered Orders preliminarily approving that agreement and the form of notice. *See* Order on Preliminary Approval of Settlement with Moark, LLC, Norco Ranch, Inc., and Land O'Lakes Inc. (Doc. No. 387); Notice Approval Order. Following the notice period, Plaintiffs filed a motion seeking final approval of the Moark Settlement, and the Court held a final fairness hearing. *See* Moark Final Approval Hr'g Tr. (Doc. No. 688) (hereinafter, "Moark Final Hr'g Tr."). In a separate Memorandum and Order issued this same date, the Court is granting the Plaintiffs' motion for final approval of the Moark Settlement.

II. Proposed Sparboe Settlement Agreement[6]

The proposed Settlement Class for settlement purposes under the Sparboe Settlement is defined as:

> All persons and entities that purchased eggs, including shell eggs and egg products, produced from caged birds in the United States directly from any producer during the Class Period from January 1, 2000 through the present.
>
> > a.) Shell Egg **[**12]** Subclass
> > All individuals and entities that purchased shell eggs produced from caged birds in the United States directly from any during the Class Period from January 1, 2000 through the present.

---

[5] Paragraph 3 of the Second Consolidated Amended Class Action Complaint states:

> Plaintiffs entered into a Settlement Agreement with Sparboe Farms, Inc. ("Sparboe"), a formerly named Defendant, which this Court has preliminarily approved. As part of that Settlement Agreement, Sparboe agreed to cooperate with Plaintiffs and provide documents and information related to the allegations in Plaintiffs' initial Complaint. Plaintiffs have incorporated much of that information into this Second Consolidated Amended Class Action Complaint.

[6] The terms used in this Order that are defined in the Sparboe Settlement Agreement are, unless otherwise defined herein, used in this Order consistent with the definitions of the agreement.

b.) Egg Products Subclass

All individuals and entities that purchased egg products produced from shell eggs that came from caged birds in the United States directly from any producer during the Class Period from January 1, 2000 through the present.

Excluded from the class and subclasses are the Defendants, their co-conspirators, and their respective parents, subsidiaries and affiliates, all government entities, as well as the Court and staff to whom this case is assigned, and any member of the Court's or staff's immediate family. Also excluded from the Class and Subclasses are purchases of "specialty" shell egg or egg products (such as "organic," "free-range" or "cage-free") and purchases of hatching eggs (used by poultry breeders to produce breeder stock or growing stock for laying hens or meat).

Mot., Ex. A, Settlement Agreement Between Direct Purchaser Plaintiffs and Sparboe Farms, Inc. ¶ 11 (hereinafter, "Sparboe Settlement Agreement"). [7] As mentioned earlier, the Court preliminarily certified **[**13]** the Settlement Class for settlement purposes under Fed. R. Civ. P. 23(b)(3). *See* Order on Preliminary Approval of Sparboe Settlement. The agreement's principal terms require Sparboe to cooperate with the Plaintiffs' preparation **[*285]** for and prosecution of their class action. *See* Moark Settlement Agreement ¶ 23. The Agreement details the extent of Sparboe's cooperation in terms of "making documents related to the claims asserted in this action available for review and making witnesses with knowledge related to the claims asserted in this action available for informal interviews and, as necessary, consultation with Plaintiffs' Counsel." *Id.* "Sparboe Farms agree[d] to provide discovery to Plaintiffs in the pending Action as if Sparboe Farms were a party subject to all rules for discovery." *Id.* Sparboe agreed to "use its best efforts to produce interviewees . . . who are current or former directors, officers, or employees of Sparboe Farms for deposition at the time discovery in this Action commences . . . and make those person available for trial testimony." *Id.* ¶ 23(a).

In consideration, Plaintiffs and their counsel "agree not to assert that Sparboe Farms waived its attorney-client privilege, work product immunity or any other privilege or protection with respect to information or documents **[**15]** provided or identified" to Plaintiffs pursuant to the Agreement. *Id.* ¶ 24.

Furthermore, Plaintiffs agree that they "shall not . . . seek to recover against [Sparboe] for any of the Released Claims." *Id.* ¶ 17. Under the Agreement, "Released Claims" are defined as any and all claims arising out of injuries or damages that occurred "from the beginning of time to the date of this Agreement" and that arose out of or resulted from "conduct concerning any agreement among Defendants, the reduction or restraint of supply, the reduction of or restrictions on production capacity, or the pricing, selling, discounting, marketing, or distributing of Shell Eggs and Processed Egg Products in the United States or elsewhere. *Id.* The Agreement sets forth non-exclusive examples of Released Claims by providing that such claims "includ[e] but [are] not limited to any conduct alleged, and causes of action asserted, or that could have been alleged or asserted, whether or not concealed or hidden, in the Complaints filed in the Action . . . , which arise from or are predicated on the facts and/or actions described in the Complaints under any federal, state, or foreign antirust, unfair competition, unfair practices, **[**16]** price discrimination, unitary pricing, trade practice, consumer protection, fraud, RICO, civil conspiracy law, or

---

[7] In the Agreement, "Class Period" is defined as "the period from and including January 1, 2000 up to and including the date **[**14]** when Notice of the Court's entry of an order preliminarily approving this settlement and certifying a class for settlement purposes is first published." *Id.* ¶ 5. Thus, the Class Period for the Sparboe Settlement is from January 1, 2000 through October 23, 2009.

This actual Class Period contrasts with the end date for the Class Period listed in the Notice of the Sparboe Settlement, which is stated as July 15, 2010. *See* Mot., Ex. 2.A., Notice of Sparboe Settlement at 2 (Doc. No. 443-6) (hereinafter, "Sparboe Notice"). It appears that the date listed in the Sparboe Notice is an inadvertent typo. July 15, 2010 is the end date of the class period for the Moark Settlement (and the date on which the Court preliminarily approved the Moark Settlement and the notices of the Sparboe and Moark Settlements). *See* Order on Preliminary Approval of Settlement with Moark, LLC, Norco Ranch, Inc., and Land O'Lakes Inc.; Notice Approval Order; Mot., Ex. 2.A., Notice of Moark Settlement at 2.

similar laws, including, without limitation, the Sherman Antitrust Act, *15 U.S.C. § 1 et seq.*" *Id.* Plaintiffs also agree to waive *California Civil Code Section 1542* and similar provisions in other states. *Id.* ¶ 17(a). Additionally, Plaintiffs agree to waive and release "any and all defenses, rights, and benefits that [Plaintiffs] may have or that may be derived from the provisions of applicable law which, absent such waiver, may limit the extent or effect of the release" set forth in the Agreement. *Id.* ¶ 18. The release excludes "claims relating to payment disputes, physical harm, defective product or bodily injury . . . and do[es] not include any Non-Settling Defendant." *Id.* ¶ 19.

The settlement proposes an opt-out provision which sets forth the procedures through which possible class members could opt out of the settlement. *Id.* ¶ 14; *see also* Sparboe Notice at 1, 4. Class members had 75 days from the postmark date that the notice of the settlement was mailed by first-class mail to the final postmark date designated in the Claims Notice to return an exclusion request or **[**17]** submit an objection to the Settlement. *See* Sparboe Notice at 1, 3, 4; Mot., Ex. 2, Affidavit of Jennifer M. Keough re: Notice and Settlement Administration ¶¶ 9, 17 (Doc. No. 443-5) (hereinafter, "Keough Aff.").

Finally, the Agreement delineates Sparboe's agreement to reimburse Plaintiffs up to a maximum of $350,000.00 towards the cost of notice of the Settlement." Sparboe Settlement Agreement ¶ 28. However, this provision is subject to several provisos, one of which provides that "[i]n the event Plaintiffs enter into a cash settlement with any Non-Settling Defendant and receive preliminary approval of that settlement prior to the issuance of notice under this Agreement (such that the settlement notices can be combined), Plaintiffs shall apply those settlement funds towards the cost of notice, thus reducing or eliminating Sparboe Farms' obligation to reimburse Plaintiffs for the notice costs of this Agreement." *Id.* ¶ 29.

[*286] **III. Notice of Sparboe Settlement**

Notice of the Sparboe Settlement was disseminated to possible members of the Settlement Class through a variety of means ranging from direct mailings, publications, press releases, a website and a toll-free information and request telephone **[**18]** line. *See* Keough Aff. ¶¶ 5-6; *see also* Sparboe Settlement Agreement ¶ 13. The Notice explained that any possible Class Members wishing to be excluded from or to object to the terms of the Sparboe Settlement Agreement should postmark their exclusion requests or objections no later than a specific date that was 58 days before the final fairness hearing on the Sparboe Settlement. *See* Sparboe Notice at 1, 3-4. Notices of the Moark and Sparboe Settlements were jointly distributed to the putative Class members, and $170,000 was spent on notice expenses with respect to the Sparboe Settlement Agreement. *See* Moark Final Hr'g Tr. at 31:3-31-23. No other information has been provided to the Court concerning whether other administrative costs and expenses were (or were not) incurred in relation to the Sparboe Settlement.

The Claims Administrator received no objections to the Sparboe Settlement and received 364 requests for exclusion from the Sparboe Settlement Class. *See* Keough Aff. ¶ 17. Some of those parties who opted-out of the class have filed their own complaints against Defendants, including Sparboe, such as Direct Action Plaintiffs Giant Eagle, Inc., Winn-Dixie Stores, Inc., Roundy's Supermarkets, **[**19]** Inc., C&S Wholesale Grocers, Inc., H.J. Heinz Company, L.P., Publix Super Markets, Inc., Kraft Foods Global, Inc., The Kellogg Company, General Mills, Inc., and Nestle USA, Inc., The Kroger Co., The Great Atlantic & Pacific Tea Co., Inc., Hy-Vee, Inc., H.E. Butt Grocery Co., Conopco, Inc., Safeway Inc., Albertsons LLC, and Walgreen Co., and Supervalu, Inc., as well as plaintiffs in a state court action proceeding in Kansas. [8] Interim Co-Lead Counsel has represented that the potential Class for the

[8] *See* Am. Compl. (Doc. No. 623) (Giant Eagle, Inc.); Second Am. Compl.(Doc. No. 622) (Winn-Dixie Stores, Inc., Roundy's Supermarkets, Inc., C&S Wholesale Grocers, Inc., and H.J. Heinz Company, L.P.); Am. Compl. (Doc. No. 621) (Publix Super Markets, Inc.); First Am. Compl. (Doc. No. 624) (Kraft Foods Global, Inc., The Kellogg Company, General Mills, Inc., and Nestle USA, **[**20]** Inc.); Am. Compl. (Doc. No. 619) (The Kroger Co., The Great Atlantic & Pacific Tea Co., Inc., Hy-Vee, Inc., H.E. Butt Grocery Co. and Conopco, Inc., Safeway Inc., Albertsons LLC, and Walgreen Co.); Am. Compl. (Doc. No. 620) (Supervalu, Inc.); Dec. 19, 2011 Mem. and Order, *836 F. Supp. 2d 290, 2011 U.S. Dist. LEXIS 146258, 2011 WL 6396462, at *5 n.8* (Doc. Nos. 601 and 602) (explaining that six direct purchasers opted out of the Sparboe and Moark Settlements and filed an action

Moark Settlement "is composed of thousands of entities nationwide, many of which are sophisticated companies with their own in-house legal counsel," Fees Mot. at 12, a descriptor which the Court recognizes can be applied to the Sparboe Settlement Class, given that both settlements' classes are defined virtually identically.

The Claims Administrator mailed Notice and Claim Forms to 13,211 direct purchasers of shell eggs and egg products, whose names and addresses were obtained from various electronic data files that contained potential Class Member names and addresses from 17 named egg producer Defendants that were given to the Claims Administrator at the direction of the Court. *See* Keough Aff. ¶ 7, 9; Notice Approval Order ¶ 3. Eighty-three (83) Notice and Claim Forms, returned by the U.S. Postal Service with forwarding address information, were re-mailed. *See id.* ¶ 12. In contrast, twenty-three hundred **[*287]** thirty-nine (2,339) Notice and Claim Forms were returned without forwarding address information and, according to Interim Co-Lead Counsel, could not be re-mailed. *See* ***[**22]*** *id.* [9]

Additionally, during the notice period a Summary Notice was published in several publications with a total circulation of over 2,316,000. *See id.* ¶ 11. The Summary Notice was published in a monthly issue of fifteen (15) industry journals thought to be likely to reach potential purchasers of shell eggs and egg products. *See id.* Those publications are: *PetFood Industry, Restaurant Business, Convenience Store News, Hotel F&B, Nation's Restaurant News, Food Service Director, Progressive Grocer, Food Manufacturing, Supermarket News, Stores, Egg Industry Magazine, Modern Baking, Baking Buyer, Food Processing*, and *Long Term Living. See id.*

The Summary Notice was also published for one day in the *Wall Street Journal. See id.* That same day, the Claims Administrator distributed a press release for the Sparboe Settlement, as well as a separate release about the Moark Settlement, to approximately 1,000 journalists in the **[**23]** restaurant and food industries through the US1 Newsline on the PR Newswire. *See id.* ¶ 13. The press releases resulted in some 335 articles that reported on the two settlements. *See id.*

A publicly-available website specifically devoted to the Sparboe and Moark Settlements was established. *See id.* ¶ 14. The website makes available for review and downloading the Notice Packet, the Sparboe Settlement Agreement, and various Court orders and filings relating to the Sparboe Settlement. *See id.* In the first 106 days of operation, the website received 2,821 "visits." *See id.*

The Claims Administrator and Plaintiffs established a toll-free 24-hour telephone number and call center for potential Class Members to obtain information about the settlement and to request the Notice and Claim Form. *See id.* ¶ 15. The automated number received 328 calls, and 61 callers requested and received a Notice Packet during the first 106 days of operation. *See id.*

Additionally, Sparboe served notice of the settlement to federal and state officials of the settlement pursuant to *28 U.S.C. § 1715(d)* under CAFA. *See* Final Hr'g Tr. at 26:23-26:24, 38:1-38:6. No federal or state officials filed

---

against Defendants in Kansas state court, which, after being removed to federal court by Defendants, was remanded to state court); Direct Action Plaintiff Status Report (Doc. No. 457).

The Direct Action Plaintiff Status Report states that "[a]ll of the Direct Action Plaintiffs . . . have opted out of the Sparboe class settlement and will play no role in the fairness hearing." *Id.* at 2. This statement applies only to the presently pending Direct Action Plaintiff cases brought by The Kroger Co. and co-plaintiffs (Civil Action No. 10-7605 (E.D. Pa.)), Supervalu Inc. (Civil Action No. 10-6736 (E.D. Pa.)), Publix Super Markets, Inc. (Civil Action No. 10-6737 (E.D. Pa.)), and Giant Eagle, Inc. (Civil Action No. 10-1698 (W.D. Pa.)).

The statement does not apply to the **[**21]** pending Direct Action Plaintiff cases brought by Kraft Foods Global, Inc. and its co-plaintiffs (Civil Action No. 11-8808 (E.D. Pa.)), and Winn-Dixie Stores, Inc. (Civil Action No. 11-0510 (E.D. Pa.)). Both of these cases were filed after the Status Report. However, it appears that Kraft Foods Global, Inc. and its co-plaintiffs, and Winn-Dixie Stores, Inc. and its co-plaintiffs, have opted out of the Sparboe Settlement. *See* Keough Aff. ¶ 17.

[9] The Court recognizes that the statistics provided here slightly differ with the equivalent statistics that the Plaintiffs provided in connection with their motion for approval of the Moark Settlement. However, the Court deems these minor differences to be inconsequential.

objections to the Sparboe **[**24]** Settlement, nor requested a hearing following the issuance of the CAFA notice. The statutory period elapsed prior to the date of this Memorandum and accompanying Order. [10]

[*288] **IV. Discussion**

Federal Rule of Civil Procedure 23 provides that "[t]he claims, issues, or defenses of a certified class may be settled, voluntarily dismissed, or compromised only with the court's approval." Fed. R. Civ. P. 23(e). The following procedures apply to a proposed settlement, voluntary dismissal, or compromise:

> (1) The court must direct notice in a reasonable manner to all class members who would be bound by the proposal.
> (2) If the proposal would bind class members, the court may approve it only after a hearing and on finding that it is fair, reasonable, and adequate.
> (3) The parties seeking approval must file a statement identifying any agreement made in connection with the proposal.
>
> (4) If the class action was previously certified under Rule 23(b)(3), the court may refuse to approve a settlement unless it affords a new opportunity to request exclusion to individual class members who had an earlier **[**27]** opportunity to request exclusion but did not do so.
> (5) Any class member may object to the proposal if it requires court approval under this subdivision (e); the objection may be withdrawn only with the court's approval.

Id. The "[f]actual determinations necessary to make Rule 23 findings must be made by a preponderance of the evidence. In other words, to certify a class the district court must find that the evidence more likely than not establishes each fact necessary to meet the requirements of Rule 23." In re Ins. Brokerage Antitrust Litig., 579 F.3d 241, 257-58 (3d Cir. 2009) (quoting In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 320 (3d Cir. 2008)). "The decision of whether to approve a proposed settlement of a class action is left to the sound discretion of the district court." In re Prudential Ins. Co. Am. Sales Practice Litig. Agent Actions, 148 F.3d 283, 299 (3d Cir. 1998) (quoting Girsh v. Jepson, 521 F.2d 153, 156 (3d Cir. 1975)).

---

[10] Although Sparboe served notice of the settlement to the appropriate officials, it did not do so promptly after the Agreement was filed, as required by 28 U.S.C. § 1715(b). Mot. at 7. Section 1715(b) provides: "Not later than 10 days after a proposed settlement of a class action is filed in court, each defendant that is participating in the proposed settlement shall serve upon the appropriate State official of each State in which a class member resides and the appropriate Federal official, a notice of the proposed settlement . . . ." Under Section 1715(d), an order granting final approval of a settlement agreement may not take place earlier than ninety days after the appropriate federal and state officials have been served with notice.

Plaintiffs advised the Court about the timing of the CAFA notice requirement on the Sparboe and Moark Settlements, and requested the Court proceed with the final approval hearing on the Sparboe Settlement as scheduled and to hold its decision on the Plaintiffs' motion for final approval **[**25]** in abeyance until the ninety-day expiration date passed without any objections or requests for hearings being received from any relevant authority pursuant to 28 U.S.C. § 1715(d). *See* Mot. at 7. Over ninety days have elapsed since Sparboe served the appropriate state or federal officials with the CAFA notice, and there have been no requests for hearings or objections to the settlement. It follows that, although the notice requirements under CAFA have not been fully met on a technical basis, the substance of the requirements have been satisfied insofar as giving federal and state officials sufficient notice and opportunity to be heard concerning the Sparboe Settlement. *See* D.S. ex rel. S.S. v. New York City Dep't of Educ., 255 F.R.D. 59, 80 (E.D.N.Y. 2008) (approving the settlement on a provisional basis until the CAFA notice deadline passes and no federal or state official requests a hearing); Kay Co. v. Equitable Prod. Co., No. 06 Civ. 00612, 2010 U.S. Dist. LEXIS 41892, 2010 WL 1734869, at *4 (S.D. W.Va. Apr. 28, 2010) ("Since more than 100 days have passed since service was perfected and since there have been no adverse comments from any of the aforesaid State or Federal officials, the Court FINDS that compliance **[**26]** with CAFA is satisfactory."). *But see* True v. Am. Honda Motor Co., 749 F. Supp. 2d 1052, 1083 (C.D. Cal. 2010) (determining that its authority to approve a settlement was "questionable" when the defendant gave CAFA notice only ten days prior to the final settlement approval hearing).

A. Class Certification

Where, as here, the Court has not already certified a class prior to evaluating a settlement, the Court initially must determine whether the proposed settlement classes satisfy the requirements of *Federal Rule of Civil Procedure 23(a)* **[**28]** and *(b)*. *See Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 619, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*; *see also In re Pet Food Prods. Liab. Litig., 629 F.3d 333, 341 (3d Cir. 2010)* ("[A] district court first must determine that the requirements for class certification under *Rule 23(a)* and *(b)* are met."). The Third Circuit Court of Appeals recently summarized the demands of *Rule 23* as follows:

> *Rule 23(a)* contains four threshold requirements, which every putative class must satisfy:
>
> > (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class.
>
> *Fed. R. Civ. P. 23(a)*; *see also Amchem, 521 U.S. at 613*. Upon finding each of these prerequisites satisfied, a district court must then determine that the proposed class fits within one of the categories of class actions enumerated in *Rule 23(b)*.
>
> As mentioned, *Rule 23(b)(2)* authorizes class actions seeking injunctive relief in instances where the defendant "has acted or refused to act on grounds that apply **[**29]** generally to the class, so that final injunctive relief . . . is appropriate respecting the class as a whole." *Fed. R. Civ. P. 23(b)(2)*; *see In re Comm. Bank of N. Va. (Comm. Bank I), 418 F.3d 277, 302 n.14 (2005)*. Separately, certification pursuant to *Rule 23(b)(3)* seeking monetary compensation is permitted where (1) "questions of law or fact common to class members predominate **[*289]** over any questions affecting only individual members," and (2) "a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*; *see Collins v. E.I. DuPont de Nemours & Co., 34 F.3d 172, 180 (3d Cir. 1994)*. These twin requirements are commonly referred to as predominance and superiority.

Sullivan v. DB Invs., Inc., 667 F.3d 273, 296 (3d Cir. 2011) (en banc).

1. *Federal Rule of Civil Procedure 23(a)*

First, under *Rule 23(a)*, the Court determines that the Class Members are ascertainable from objective criteria, such as various electronic data files that contained names and addresses of customers that purchased shell eggs or egg products produced from caged birds in the United States, which were provided by 17 named egg producer Defendants, and **[**30]** that the Class Members thus ascertained are so numerous that their joinder before the Court would be impracticable. Plaintiffs "need not precisely enumerate the potential size of the proposed class, nor [are] plaintiff[s] required to demonstrate that joinder would be impossible." *Cannon v. Cherry Hill Toyota, Inc., 184 F.R.D. 540, 543 (D.N.J. 1999)* (citation omitted); *see also* 7A Charles Alan Wright & Arthur R. Miller, *Federal Practice and Procedure* § 1762 (3d ed. 2005) ("'[I]mpracticable' does not mean 'impossible.' The representatives only need to show that it is extremely difficult or inconvenient to join all the members of the class."); 1 A. Conte & H. Newberg, *Class Actions* § 3:14 (5th ed. 2011) ("Plaintiffs bear the burden of demonstrating that joinder is impracticable, but *impracticable* does not mean *impossible.*"). "[G]enerally if the named plaintiff demonstrates that the potential number of plaintiffs exceeds 40, the first prong of *Rule 23(a)* has been met." *Stewart v. Abraham, 275 F.3d 220, 226-27 (3d Cir. 2001)* (citation omitted). Here, thousands of direct purchasers of shell eggs and egg products located across the United States were identified, based upon consumer information **[**31]** provided by 17 named Defendants, as proposed members of the Settlement Class. This information certainly demonstrates that a class of this size makes individual joinder of all members impracticable and that the numerosity requirement is satisfied.

Second, the commonality requirement is satisfied insofar as Plaintiffs have alleged one or more questions of fact and law common throughout the Class. The commonality prerequisite does not require that all members of the prospective class share identical claims. *Hassine v. Jeffes, 846 F.2d 169, 176-77 (3d Cir. 1988)* (relying on *Eisenberg v. Gagnon, 766 F.2d 770, 786 (3d Cir. 1985))*. Rather, "[t]he commonality requirement will be satisfied if the named plaintiffs share at least one question of fact or law with the grievances of the prospective class." *Baby Neal v. Casey, 43 F.3d 48, 56 (3d Cir. 1994)*. Also, class members can assert such a single common complaint if they demonstrate that all class members are subject to the same harm. *Id.* [11]

As is also further discussed in regards to the superiority requirement under *Rule 23(b)(3)*, *infra*, the Plaintiffs' claims against Sparboe are based upon its alleged conduct during the period in question, which Plaintiffs contend constituted an agreement to and furtherance of an unlawful conspiracy to manipulate the supply and prices of domestic eggs and egg products in violation of *Section 1* of the Sherman Act. *See generally* Sept. 26, 2011 Mem., *821 F. Supp. 2d at 713-15* (discussing the specific alleged conduct of Defendants generally in furtherance of alleged conspiracy). [12] Additionally, Plaintiffs **[*290]** allegedly were subjected to the same type of harm by directly purchasing eggs and egg products at artificially inflated prices due to the alleged conspiracy. Because the class members' claims arise from the same nucleus of operative facts and involve **[**33]** the same legal theories against Sparboe, the Court finds that the commonality prong under *Rule 23(a)(2)* is met.

Third, the Court finds that the claims of the named Plaintiffs—companies, corporations, and businesses that purchased shell eggs, egg products, or both, from one or more of the Defendants—are typical of the claims of the Class Members and the respective Subclass members. "If the claims of the named plaintiffs **[**34]** and putative class members involve the same conduct by the defendant, typicality is established regardless of factual differences." *Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 183-84 (3d Cir. 2001)*. The Third Circuit Court of Appeals has recognized that the "jurisprudence 'assures that a claim framed as a violative practice can support a class action embracing a variety of injuries so long as those injuries can all be linked to the practice.'" *Id. at 184* (quoting *Baby Neal, 43 F.3d at 63*). In this action, the claims of the class representatives are aligned with those of the Class Members, and members of the Subclasses, inasmuch as the claims of the representatives arise out of the same alleged misconduct of the Defendants and core facts and events. Further, the representative Plaintiffs' claims and the absent Class Members' claims rely on the same legal theories and arise from the same alleged "conspiracy" and "illegal agreement" by Defendants. Moreover, named Plaintiffs, like all putative Class Members, allegedly have suffered the same injury-namely, economic damages arising from alleged artificially-inflated purchase prices-as a result of the Defendants' **[**35]** alleged anticompetitive conduct.

Fourth, the final prerequisite under *Rule 23(a)*, the adequacy of the representative parties requirement, "has two components: (1) concerning the experience and performance of class counsel; and (2) concerning the interests and incentives of the representative plaintiffs." *Dewey v. Volkswagen Aktiengesellschaft, 681 F.3d 170, 182 (3d Cir. 2012)* (citing *Comm. Bank I, 418 F.3d at 303*). Essentially, the inquiry into the adequacy of the representative parties examines whether "the putative named plaintiff has the ability and the incentive to represent the claims of the class vigorously, that he or she has obtained adequate counsel, and that there is no conflict between the

---

[11] The Supreme Court recently explained: "What matters to class certification . . . is not the raising of common 'questions'—even in droves—but, rather the capacity of a classwide proceeding to generate common **[**32]** answers apt to drive the resolution of the litigation. Dissimilarities within the proposed class are what have the potential to impede the generation of common answers." *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. 2541, 2551, 180 L. Ed. 2d 374 (2011)* (quoting Richard A. Nagareda, *Class Certification in the Age of Aggregate Proof*, *84 N.Y.U. L. Rev. 97, 132 (2009)*).

[12] For purposes of this Motion and in considering the Plaintiffs' claims against Sparboe, the Court considers Sparboe as a named Defendant in this suit even though it is not named as a defendant in the operative pleading, the Second Consolidated Amended Class Action Complaint. The Court recognizes that the Order preliminarily approving the Sparboe Settlement stayed the suit against Sparboe and was entered prior to the filing of the Second Consolidated Amended Class Action Complaint. As explained above, the Court determines that if Sparboe had been named as a defendant in the Second Consolidated Amended, the claims against it would not have substantively differed from the essence of the claims against it asserted in the First Consolidated Amended Class Action Complaint.

individual's claims and those asserted on behalf of the class." *Hassine, 846 F.2d 169 at 179* (citations omitted); *see also* *Dewey, 681 F.3d at 182* (recognizing that "the linchpin of the adequacy requirement is the alignment of interests and incentives between the representative plaintiffs and the rest of the class"). In other words, "*Rule 23(a)(4)* serves to uncover conflicts of interest between named parties and the class they seek to represent." *Amchem, 521 U.S. at 625*. If any conflicts **[**36]** "undercut the representative plaintiffs' ability to adequately represent the class" they are "fundamental," such that class representation is structurally faulty and *Rule 23(a)(4)* cannot be satisfied. *Dewey, 681 F.3d at 184-85*.

The Court determines that the representative Plaintiffs indeed will fairly and adequately protect the interests of the Settlement Class. Here, the interests of the representative Plaintiffs are consistent with those of the Class members, and respective Subclass members, and there appear to be no conflicts between or among these groups. As discussed, the representative Plaintiffs were damaged as a result of the Defendants' allegedly unlawful conduct, including Sparboe's alleged conduct, and the named Plaintiffs would have had to prove the same wrongdoing as the putative Class Members to establish the Defendants' (and Sparboe's) liability. Moreover, all representative Plaintiffs **[*291]** and Class Members have present claims (and no future claims) and have suffered economic damages. Furthermore, there is no apparent conflict among Class Members, or Subclasses, with respect to the allocations for distribution of monetary consideration because the Agreement does not set forth **[**37]** such consideration. The representative and putative Class Members have a common interest in Sparboe's cooperation in assisting with the prosecution of the class claims against the non-settling Defendants. [13] It follows that the representative Plaintiffs' interests are directly aligned with those of other members of the Class and Subclasses.

Additionally, the representative Plaintiffs have been, have the incentive, and appear to be capable of continuing to be active participants in both the prosecution and the settlement of this suit against Sparboe, if the case had continued, and against the remaining Defendants. To assist them, Plaintiffs have retained attorneys who are highly qualified, experienced, and able to conduct this litigation. The Court analyzes the capabilities and performance of Interim Co-Lead Counsel under *Rule 23(a)(4)* based upon the factors set forth in *Rule 23(g)*. *See* *Sheinberg v. Sorensen, 606 F.3d 130, 132 (3d Cir. 2010)* ("Although questions concerning the adequacy of class counsel were traditionally analyzed under the aegis of the adequate representation requirement of *Rule 23(a)(4) of the Federal Rules of Civil Procedure*, those questions have, since 2003, been governed by *Rule 23(g)*." (citing *Fed. R. Civ. P. 23(g)* note (2003))).

Here, the Court concludes that Interim Co-Lead Counsel satisfies *Rule 23(g)*. *Rule 23(g)* requires consideration of four factors: **[**39]** "the work counsel has done in identifying or investigating potential claims in the action," "counsel's experience in handling class actions, other complex litigation, and "the types of claims asserted in the action," "counsel's knowledge of the applicable law," and "the resources that counsel will commit to representing the class." *Fed. R. Civ. P. 23(g)(1)(A)(i)-(iv)*. The Court "must also ensure that '[c]lass counsel [will] fairly and adequately represent the interests of the class.'" *Sheinberg, 606 F.3d at 132-33* (quoting *Fed. R. Civ. P. 23(g)(4)*). [14]

---

[13] The possible diversity among the Class members in terms of financial resources—for example, a national corporate entity as compared to the proprietor of a neighborhood restaurant—and the implications of that diversity was discussed during the preliminary approval hearing. In particular, the possibility was raised that a class member with less financial resources might find a monetary settlement with Sparboe more beneficial than a class member with greater financial resources. In response, Interim Co-Lead Counsel explained that all Class members equally benefit from advancing the entire suit against the remaining Defendants which would enable them to obtain the "aggregate damages" the Class members would be entitled to, and that, indeed, a Class member with less financial resources might obtain greater benefit from Sparboe's cooperation than a larger **[**38]** producer in this nonmonetary consideration when considered in light of the relative scale of the costs of bringing this suit. Prelim. Hr'g Tr. 22:7-22:13.

[14] The Court may also consider other possibly relevant information as to the adequacy of counsel, such as proposed terms for attorneys' fees and nontaxable costs and "any other matter pertinent to counsel's ability to fairly and adequately represent the interests of the class." *Fed. R. Civ. P. 23(g)(1)(B)*, *(C)*.

Interim Co-Lead Counsel have extensive documented experience in complex class action litigation, including those based upon violations of ***antitrust law***, and are well-respected law firms in the plaintiffs' class action bar who have demonstrated considerable dedication and ability thus far in this litigation. Interim Co-Lead Counsel **[**40]** have capably managed this suit on behalf of Plaintiffs since the Court formally appointed them to that role. Their work has included the consolidation of the individual cases, negotiating the Sparboe and Moark Settlements, handling the motion to dismiss stage, and preparing for and commencing discovery. In sum, Interim Co-Lead Counsel's work on behalf of the Plaintiffs has been extensive and involved the dedication of substantial resources and energy. Interim Co-Lead Counsel's work thus far in this suit and prior experience demonstrate that these attorneys have fairly and adequately represented the interests of the Sparboe Settlement Class, and Subclasses, and will continue to do so.

Accordingly, the Court finds that four threshold requirements of *Rule 23(a)* have been satisfied.

[*292] 2. *Federal Rule of Civil Procedure 23(b)*

Having determined that the requirements of *Rule 23(a)* are met, the Court next must consider whether the requirements of at least one subsection of *Rule 23(b)* are met. Here, Plaintiffs are seeking certification under *Rule 23(b)(3)*. *See also* Pls.' Mem. of Law on Prelim. Approval of Sparboe Settlement at 24 (Doc. No. 172). *Rule 23(b)(3)* permits class actions where "the court **[**41]** finds that the questions of law or fact common to Class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. These requirements are commonly separated into the so-called "predominance" and "superiority" requirements. *See Ins. Brokerage, 579 F.3d at 257-58*.

a. Predominance

To evaluate the predominance requirement, a court must determine whether common questions of law or fact predominate over any questions affecting only individual members. *See Hydrogen Peroxide, 552 F.3d at 311-12*. "*Rule 23(b)(3)*'s predominance requirement imposes a more rigorous obligation [than *Rule 23(a)(2)*'s commonality element] upon a reviewing court to ensure that issues common to the class predominate over those affecting only individual class members. *Sullivan, 667 F.3d at 297* (quoting *Ins. Broker., 579 F.3d at 266*). As such, the Third Circuit Court of Appeals "consider[s] the *Rule 23(a)* commonality requirement to be incorporated into the more stringent *Rule 23(b)(3)* predominance requirement, and therefore deem[s] it appropriate to 'analyze the **[**42]** two factors together, with particular focus on the predominance requirement.'" *Id.* (quoting *In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 528 (3d Cir. 2004))*. Third Circuit precedent "provides that the focus of the predominance inquiry is on whether the defendant's conduct was common as to all of the class members, and whether all of the class members were harmed by the defendant's conduct." *Id.*

"Predominance is a test readily met in certain cases alleging . . . violations of the antitrust laws." *Amchem, 521 U.S. at 625*. This is because these types of claims typically arise from an alleged common course of conduct on the part of the defendant, and depend upon common proof of liability, such as evidence of the defendants' conduct. *See, e.g., Warfarin, 391 F.3d at 528* (questions of fact and law are common to the class because the claims at issue and proof of liability depend upon the defendants' alleged conduct). Furthermore, that Plaintiffs have allegedly suffered "purely an economic injury"—in contrast to a physical injury—such overpayment for a product on account of the Defendants', and more specifically, Sparboe's, alleged anticompetitive conduct can "further support[] a finding **[**43]** of commonality and predominance because there are little or no individual proof problems in this case otherwise commonly associated with physical injury claims." *Id. at 529*.

Indeed, this same rationale leads the Court to conclude here that the common issues of Class Members predominate over any individual issues as to their antitrust claim against Sparboe. The task at hand requires the Court to "examine the elements of plaintiffs' claim through the prism of *Rule 23*." *Hydrogen Peroxide, 552 F.3d at 311* (internal quotation marks omitted). Here, the Plaintiffs' claim arises under *Section 1* of the Sherman Act. "To establish a violation of *Section 1*, a plaintiff must prove: (1) concerted action by the defendants; (2) that produced anticompetitive effects within the relevant product and geographic markets; (3) that the concerted actions were illegal; and (4) that it was injured as a proximate result of the concerted action." *Gordon v. Lewistown Hosp., 423 F.3d 184, 207 (3d Cir. 2005)*.

The reasoning in *In re Insurance Brokerage Antitrust Litigation* is applicable here. In *Insurance Brokerage*, our Court of Appeals concluded that "[b]ecause each of the elements of a Sherman Act violation involves **[**44]** common questions of law and fact, . . . common questions predominate over individual ones with respect to the federal antitrust claim." *579 F.3d at 269*. The Court determined that since "the first and third elements **[*293]** of a Sherman Act violation focus on the conduct of the defendants, we find that common questions abound with respect to whether the defendants engaged in illegal, concerted action." *Id. at 268*. This is true in this case, because the common questions relevant to these elements include, *inter alia*, whether Sparboe and the other Defendants agreed to the alleged conspiracy to manipulate the supply and prices of domestic eggs and egg products in violation of *Section 1* of the Sherman Act, and whether the alleged conspirators' conduct amounted to an illegal restraint of trade. Furthermore, with respect to the second element of the Plaintiffs' Section 1 claim, there are at the very least the common questions relating to whether the alleged conspirators' actions reduced the supply of and increased prices for domestic eggs and egg products.

Also, like *Insurance Brokerage*, here, the fourth element of the Sherman Act claim "focuses on whether the plaintiffs were injured by the defendants' **[**45]** conduct," and as a result "it may still involve common questions of law and fact if proof of injury can be established on a class-wide basis." *Id. at 269*. As the Court of Appeals recognized, "for purposes of class certification pursuant to *Rule 23(b)(3)*, 'the task for plaintiffs . . . is to demonstrate that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual to its members.'" *Id.* (citing *Hydrogen Peroxide, 552 F.3d at 311-12*. The issue here is whether the Class Members were proximately injured by the conduct of Sparboe and other Defendants, which is a question that is capable of proof common to the class members. Thus, even though the amount of damage that each plaintiff allegedly suffered could not necessarily be established by common proof, nonetheless, "the element of antitrust injury—that is, the fact of damages—is susceptible to common proof." *Id.* The reasoning in *Insurance Brokerage* applies here:

> [W]e are not as concerned with "formulat[ing] some prediction" as to how this element of a Sherman Act violation would "play out" at trial, *[Hydrogen Peroxide,] 552 F.3d at 311* (internal quotation marks omitted), **[**46]** "for the proposal is that there be no trial," *Amchem, 521 U.S. at 620*, and instead our inquiry into the element of antitrust injury is solely for the purpose of ensuring that issues common to the class predominate over individual ones. As the foregoing analysis demonstrates, common questions exist even with respect to the element of antitrust injury and therefore any individual issues do not overwhelm the common ones.

Id.

Furthermore, the Court does not find that the use of Subclasses of direct purchasers of eggs and direct purchasers of egg products alters any of the foregoing analysis because the claims with respect to each Subclass rely upon the same alleged conduct of Sparboe and other Defendants, common proof of such conduct, and economic harm of overpayment for the respective products resulting from such conduct. Accordingly, the Court concludes that the predominance requirement is satisfied here because each element of the Plaintiffs' federal antitrust violation involves common questions of law and fact, and these common questions predominate over individual issues.

b. Superiority

To meet the superiority requirement, Plaintiffs must show that a class action, rather than individual **[**47]** litigation or other available methods of adjudication, is the best method for achieving a fair and efficient adjudication of the controversy. *See Newton, 259 F.3d at 191*. Several factors are relevant to the superiority inquiry: "(A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action." *Fed. R. Civ. P. 23(b)(3)*. In effect, "[t]he superiority requirement asks the court to balance, in terms of fairness and efficiency, the merits of a class action against those of alternative available methods of adjudication." **[*294]** *Prudential, 148 F.3d at 316* (internal quotations omitted).

The Court makes no determination at this time concerning the manageability of the Plaintiffs' suit as a class action if this action were to go to trial in a single forum or, to the extent this possibility remains, be remanded to the various transferor courts. "Confronted with a request for settlement-only **[**48]** class certification, a district court need not inquire whether the case, if tried, would present intractable management problems, *see Fed. R. Civ. P. 23(b)(3)(D)*, for the proposal is that there be no trial." *Amchem, 521 U.S. at 620*.

In considering the other relevant factors, the Court finds that the Class, and Subclasses, satisfy the superiority requirements of *Rule 23(b)(3)*. Here, there is a potentially large number of class members—perhaps numbering over 13,000—who as a whole are geographically widely disbursed. *See* Pls.' Mem. of Law on Prelim. Approval of Sparboe Settlement at 20. These factors represent a potentially crushing strain on and inefficient application of judicial resources if the putative class members' claims were prosecuted individually. Furthermore, when "each consumer has a very small claim in relation to the cost of prosecuting a lawsuit. . . , a class action facilitates spreading of the litigation costs among the numerous injured parties and encourages private enforcement of the statutes." *Warfarin, 391 F.3d at 534*. Under the present circumstances, a class action device enables individual direct purchasers to pursue their claims in an economically feasible manner, **[**49]** with greater efficacy in achieving enforcement and deterrence goals, and with greater bargaining power for settlement purposes. [15]

Putative Class Members were free to opt out of the settlement to pursue their own claims individually if they so chose, and some of the direct purchasers who opted out of the Sparboe Settlement, namely, Direct Action Plaintiffs, indeed have filed individual actions that name Sparboe as a defendant and that have been consolidated or coordinated in this multi-district litigation. Another case brought by opt-out parties against Sparboe for its alleged conduct **[**51]** is pending in Kansas state court as a result of a ruling of this Court. *See* Dec. 19, 2011 Mem., *2011 U.S. Dist. LEXIS 146258, 2011 WL 6396462* (Doc. No. 601). That there are only six pending Direct Action Plaintiff suits and one state court suit pending against Sparboe based upon its alleged antitrust conduct suggests that few Class Members have significant individual claims, or interest in bringing their claims separately, and that there is a lack of interest in the individual prosecution of claims among Class Members on the whole. *See id.*

For these reasons, a class action resolution in the manner proposed in the Sparboe Settlement would be superior to other available methods for a fair and efficient adjudication of the case against Sparboe.

---

[15] For these same reasons, to the extent that consideration of *Rule 23(b)(3)(C)* is pertinent here, and, for now, without regard to the remand mechanisms for an MDL action, it would be preferable to adjudicate these claims in one judicial proceeding and in one forum as a class action. *See Amalgamated Workers Union of Virgin Islands v. Hess Oil Virgin Islands Corp., 478 F.2d 540, 543, 10 V.I. 575 (3d Cir. 1973)* ("The 'superiority requirement' was intended to refer to the preferability of adjudicating claims of multiple-parties in one judicial proceeding and in one forum, rather than forcing each plaintiff to proceed by separate suit, and possibly requiring a defendant to answer suits growing out of one incident in geographically separated courts."). *See generally Fed. R. Civ. P. 23(b)(2)* note (1966) ("Also pertinent is the question of the desirability of concentrating the trial of the claims in the particular forum by means of a class action, in contrast to allowing the claims to be litigated separately in forums to which they would ordinarily be brought."). However, as **[**50]** one commentator has discussed, in light of *28 U.S.C. § 1407*, as a general matter, "[t]his factor should . . . be of little or no significance in resolving the superiority issue." Newberg, *supra*, §4:31. Indeed, this factor appears to have limited bearing under the present circumstances because the United States Judicial Panel on Multidistrict Litigation previously considered, pursuant to *28 U.S.C. § 1407*, the desirability of centralizing the various initially-filed direct purchaser class action suits in this particular forum, *see In re Processed Egg Prods. Antitrust Litig., 588 F. Supp. 2d 1366, 1367 (J.P.M.L. 2008)*, and a consolidated class action complaint was filed which superseded all previously-filed direct purchaser complaints.

3. Conclusion as to Class Certification for Settlement Purposes

Because the Court concludes that all of the *Rule 23(a)* and *(b)(3)* requirements have **[*295]** been met, the Court certifies the Class, and Subclasses, as defined above for settlement purposes.

B. Notice

"In the class action context, the district court obtains personal jurisdiction over the absentee class members by providing proper notice of the impending class action and providing the absentees with the opportunity to be heard **[**52]** or the opportunity to exclude themselves from the class." *Prudential, 148 F.3d at 306*. *Fed. R. Civ. P. 23* sets forth two provisions concerning notice to class members.

First, *Fed. R. Civ. P. 23(c)(2)(B)* requires that class members be given the best notice practicable under the circumstances, including individual notice to all potential class members identifiable through reasonable effort. This notice is to be given to all potential members of a *Rule 23(b)(3)* class. *Prudential, 148 F.3d at 326*. Specifically, the Rule provides that such notice

> must clearly and concisely state in plain, easily understood language: (i) the nature of the action; (ii) the definition of the class certified; (iii) the class claims, issues, or defenses; (iv) that a class member may enter an appearance through an attorney if the member so desires; (v) that the court will exclude from the class any member who requests exclusion; (vi) the time and manner for requesting exclusion; and (vii) the binding effect of a class judgment on members under *Rule 23(c)(3)*.

Fed. R. Civ. P. 23(c)(2)(B).

Second, *Rule 23(e)* requires all members of the class be notified of the terms of any proposed settlement. *Fed. R. Civ. P. 23(e)*. **[**53]** This "notice is designed to summarize the litigation and the settlement" and "to apprise class members of the right and opportunity to inspect the complete settlement documents, papers, and pleadings filed in the litigation." *Prudential, 148 F.3d at 327* (quoting 2 Newberg, *supra*, § 8.32 at 8-109).

Here, the Notice of the Sparboe Settlement contained the information required by *Rules 23(c)(2)* and *23(e)*. The Notice appropriately detailed the nature of the action, the Class claims, the definition of the Class and Subclasses, [16] the terms of the proposed settlement agreement, and the class members' right to object or request exclusion from the settlement and the timing and manner for doing so. The Notice also informed Class Members of their opportunity to be heard at the fairness hearing and to enter an appearance through an attorney, and stated that the settlement would be binding on Class Members who did not opt out of it.

Furthermore, the extent of the Plaintiffs' efforts to notify potential Class Members is adequate. The Notice was mailed to potential Class Members individually based upon consumer information provided by Sparboe and the other Defendants. *See* *Larson v. AT&T Mobility LLC, No. 10-1285, 687 F.3d 109, 2012 U.S. App. LEXIS 13292, 2012 WL 2478376, at *9 (3d Cir. June 29, 2012)* (recognizing that "'individual notice to identifiable class members is not a discretionary consideration to be waived in a particular case. It is, rather, an unambiguous requirement of *Rule 23*. . . . Accordingly, each class member who can be identified through reasonable effort must be notified.'"

---

[16] As discussed earlier, the Notice of the Sparboe Settlement appears to contain an inadvertent typo as to the end date for the Class Period. However, because the actual Class Period was set forth in the Settlement Agreement, which was made available for the putative **[**54]** Class Members' examination, and because the Notice as disseminated defined the Class broader, rather than narrower, than the actual Class definition, the Court does not find the oversight sufficient to have prevented putative class members from failing to understand the Settlement Agreement terms or prevent them from opportunity to opt out or object to the Agreement. It follows that the Court does not find that the existence of this typo requires additional notice to new class members as to the Class Period.

(quoting *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 176, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974))*. **[**55]** In addition, the parties published a notice of the settlement on the same day in several appropriate publications, and distributed a press release concerning the Sparboe Settlement to approximately 1,000 journalists in the restaurant and food industries, which resulted in some 335 articles that reported on both the Sparboe and Moark Settlements. *See Zimmer Paper Prods., Inc. v. Berger & Montague, P.C., 758 F.2d 86, 90 (3d Cir. 1985)* **[*296]** ("It is well settled that in the usual situation first-class mail and publication in the press fully satisfy the notice requirement of both *Fed. R. Civ. P. 23* and the *due process clause*.").

Accordingly, the Court determines that the notice provided to the putative Class Members constitutes adequate notice in satisfaction of the demands of *Rule 23*.

C. Fair, Reasonable, and Adequate

To grant final approval, the Court must conclude that the proposed settlement is fair, reasonable and adequate. *Ins. Brokerage, 579 F.3d at 258*; *Fed. R. Civ. P. 23(e)(2)*. Trial courts generally are afforded broad discretion in determining whether to approve a proposed class action settlement. *Eichenholtz v. Brennan, 52 F.3d 478, 482 (3d Cir. 1995)*. [17]

Although no opposition has been filed to the Motion and no objectors have contested the settlement, pursuant to *Rule 23(e)*, the Court has the duty of protecting absentee class members, and the Court executes this duty by independently "assuring the settlement represents adequate compensation for the release of the class claims." *Prudential, 148 F.3d at 316-17*. [18] Indeed, certain requirements of *Rule 23* "demand undiluted, even heightened, attention in the settlement context." *Amchem, 521 U.S. at 620*. Cognizant of this duty, the Court evaluates the fairness, reasonableness, and adequacy of the Sparboe Settlement as follows.

---

[17] The Third Circuit Court of **[**56]** Appeals recognizes that "[g]reat weight is accorded [the] views [of the trial judge] because he is exposed to the litigants, and their strategies, positions and proofs. He is aware of the expense and possible legal bars to success. Simply stated, he is on the firing line and can evaluate the action accordingly." *Walsh v. Great Atlantic & Pacific Tea Co., Inc., 726 F.2d 956, 965 (3d Cir. 1983)* (quoting *Ace Heating & Plumbing Co. v. Crane Co., 453 F.2d 30, 34 (3d Cir. 1971))*.

[18] The *Manual for Complex Litigation* observes that the "task is demanding because the adversariness **[**57]** of litigation is often lost after the agreement to settle." David F. Herr, *The Manual for Complex Litigation* § 21.61, at 487 (4th ed. 2011). Indeed, the observation that "'[c]ourts applying [a multifactor] test [ ] often recite the litany and engage in pro forma analyses, but their hearts are not in it,'" could be an equally a propos statement for those parties advancing unopposed motions for final settlement approval. *Ehrheart v. Verizon Wireless, 609 F.3d 590, 605 n.10 (3d Cir. 2010)* (dissenting, Smith, J.) (quoting *Jonathan R. Macey & Geoffrey P. Miller, Judicial Review of Class Action Settlements*, 1 J. of Legal Analysis 167, 172 (2009)).

Here, there is an absence of any objectors or any adversarial challenge to the Motion at bar, which appears to account for the dearth of any arguments criticizing, exposing, or meaningfully addressing possible flaws or drawbacks to the settlement agreement appearing in the record. Nonetheless, the Court recognizes that although the final settlement approval process may have lacked an edgy or adversarial demeanor, this does not necessarily bear on whether the settlement negotiation process was adversarial and resulted in a fair, reasonable, and adequate **[**58]** settlement. This is because the focus here is on the settlement agreement, and "[w]hether or not there are objectors or opponents to the proposed settlement, the court must make an independent analysis of the settlement terms." Herr, *supra*, at 488. Furthermore, the Court notes that, in response to the Court's inquiries for additional facts and development of the record, Interim Co-Lead Counsel fully and appropriately cooperated in the Court's efforts to consider and analyze the proposed settlement.

Nonetheless, in the event that any other partial or complete settlements are reached in the future of this case, or in this multi-district litigation generally, all parties' counsel are well-advised, again, to continue to be responsive and attentive to the Court's inquiries as to settlement agreements during the various approval processes, and also to anticipate and be cognizant of what appropriate, specific information the Court needs—particularly in light of recent case law developments—in order to perform the *fact intensive* inquiry required for executing its duty to protect absentee class members. After all, the burden lies with the movants to demonstrate that the settlement is fair, reasonable, **[**59]** and adequate.

1. Initial Presumption of Fairness

Based upon the record, the Court concludes that an initial presumption of fairness attaches to the Settlement. The Third Circuit Court of Appeals has "directed a district court to apply an initial presumption of fairness when reviewing a proposed settlement where: '(1) the settlement negotiations occurred at arm's length; (2) there was sufficient discovery; (3) the proponents of the settlement are experienced in similar litigation; and (4) only a small fraction of the class objected.'" *Warfarin, 391 F.3d at 535* (citing **[*297]** *In re Cendant Corp. Litig., 264 F.3d 201, 232 n.18 (3d Cir. 2001))*.

These criteria have been met here. The proposed class settlement was negotiated at arm's length over the course of four months by the Plaintiffs' Interim Co-Lead Counsel and Sparboe's counsel. As further discussed, *infra*, although no formal discovery was conducted in this case during the time of the Sparboe Settlement negotiations or agreement, Plaintiffs' Interim Co-Lead Counsel conducted informal discovery, including, *inter alia*, independently investigating the merits prior to filing the complaint, which enabled counsel to have sufficient background in **[**60]** the facts of the case, including Sparboe's alleged role in it. As previously discussed, Interim Co-Lead Counsel are extremely experienced in class action litigation, and specifically, similar antitrust litigation. Furthermore, no member of the purported class objected to the settlement.

Given that the Court finds that the four factors are sufficiently met, the presumption of fairness applies to the settlement.

2. Standards for Determining Fairness of Proposed Settlement

The Third Circuit Court of Appeals has set forth nine factors, known as the *Girsh* factors, to be considered when determining the fairness of a proposed settlement:

> (1) the complexity, expense and likely duration of the litigation; (2) the reaction of the class to the settlement; (3) the stage of the proceedings and the amount of discovery completed; (4) the risks of establishing liability; (5) the risks of establishing damages; (6) the risks of maintaining the class action through trial; (7) the ability of the defendants to withstand a greater judgment; (8) the range of reasonableness of the settlement fund in light of the best possible recovery; (9) the range of reasonableness of the settlement fund to a possible recovery **[**61]** in light of all the attendant risks of litigation . . . .

Girsh, 521 F.2d at 157 (internal quotations and punctuation marks omitted); *Prudential, 148 F.3d at 317*. "The settling parties bear the burden of providing that the *Girsh* factors weigh in favor of approval of the settlement." *Pet Food, 629 F.3d at 350* (citing *In re General Motors Corp. PickUp Truck Fuel Tank Prods. Liab. Litig., 55 F.3d 768, 785 (3d Cir. 1995))*.

In *In re Prudential Insurance Company of America Sales Practice Litigation Agent Actions*, the Third Circuit Court of Appeals also identified additional non-exclusive factors for courts to consider for a "thoroughgoing analysis of a settlement's terms." *See* *Pet Food, 629 F.3d at 350*. Those factors, known as the *Prudential* factors, include:

> [T]he maturity of the underlying substantive issues, as measured by experience in adjudicating individual actions, the development of scientific knowledge, the extent of discovery on the merits, and other factors that bear on the ability to assess the probable outcome of a trial on the merits of liability and individual damages; the existence and probable outcome of claims by other classes and subclasses; the comparison between the results **[**62]** achieved by the settlement for individual class or subclass members and the results achieved—or likely to be achieved—for other claimants; whether class or subclass members are accorded the right to opt out of the settlement; whether any provision for attorneys' fees are reasonable; and whether the procedure for processing individual claims under the settlement is fair and reasonable.

See Prudential, 148 F.3d at 323. [19] While the Court must make findings as to the *Girsh* factors to approve a settlement as fair, reasonable, and adequate, the *Prudential* factors are illustrative of additional factors that may be useful even though they are not essential or inexorable depending upon the specific circumstances.

Although there is an overriding public interest in settling class actions, district courts should apply "an even more rigorous, heightened standard in cases where settlement negotiations precede class certification, and approval for settlement and class certification **[*298]** are sought simultaneously." Pet Food, 629 F.3d at 350 **[**63]** (internal quotations omitted). "This heightened standard is designed to ensure that class counsel has demonstrated 'sustained advocacy' throughout the course of the proceedings and has protected the interests of all class members." Prudential, 148 F.3d at 317.

Thus, the Court is required to make an independent analysis of the settlement to determine whether it is fair, reasonable, and adequate by independently evaluating all of the *Girsh* factors (and the *Prudential* factors, as appropriate), recognizing that the Court cannot substitute the parties' assurances or conclusory statements for its independent analysis of the settlement terms. Pet Food, 629 F.3d at 351. Accordingly, the Court "may find it necessary to drill down into the case and into the agreement to make an independent 'scrupulous' analysis of the settlement terms" and affirmatively seek out information to the extent that the parties have either not supplied it or have provided only conclusory statements. *See id.*

3. Discussion of *Girsh* and *Prudential* Factors

The Court's analysis of the Girsh factors, and the Prudential factors, as appropriate, leads to the conclusion that the relevant considerations weigh in favor of a finding **[**64]** of fairness under Rule 23(e).

a. The Complexity, Expense and Likely Duration of the Litigation

The first *Girsh* factor, which evaluates the complexity, expenses and likely duration of the litigation, "captures the probable costs, in both time and money, of continued litigation." Warfarin, 391 F.3d at 535-36 (citation omitted). At the outset, the Court appreciates that antitrust suits, like this one, are often complex actions to prosecute. *See* In re Linerboard Antitrust Litig., 292 F. Supp. 2d 631, 639 (E.D. Pa. 2003). Furthermore, given that the settlement agreement occurred at an early stage of this litigation, prior to the active commencement of discovery, Plaintiffs have avoided such expense and delay as may have attached to these settling Defendants. *See* Bell Atl. Corp. v. Twombly, 550 U.S. 544, 558-59, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007) (recognizing that "antitrust discovery can be expensive"). Discovery in this case against Sparboe would entail—which would demand reasonably the same and similar discovery that will occur as to the remaining Defendants in this suit—considerable expenditures of financial resources and hours of attorney time relating to discovery for liability and damages, including extensive electronic **[**65]** discovery and scores of witness depositions, experts, class certification, further pre-trial motions, and potentially a trial on the merits. The Court determines that such an undertaking "would not only further prolong the litigation but also reduce the value of any recovery to the class." Warfarin, 391 F.3d at 536. Accordingly, this factor weighs in favor of the Sparboe Settlement.

b. The Reaction of the Class to the Settlement

"In an effort to measure the class's own reaction to the settlement's terms directly, courts look to the number and vociferousness of the objectors." Gen. Motors, 55 F.3d at 812. Considering this factor from a somewhat different angle, the Third Circuit Court of Appeals has recognized the practical conclusion that it is generally appropriate to

---

[19] The Court of Appeals invites individualized analysis by noting that "[o]ther related factors . . . also may be relevant to this inquiry." Prudential, 148 F. 3d at 323 n.73.

assume that "silence constitutes tacit consent to the agreement" in the class settlement context. *See* Bell Atlantic Corp. v. Bolger, 2 F.3d 1304, 1313 n.15 (3d Cir. 1993). By using these considerations as a gauge of class reaction to the Sparboe Settlement, the Court determines that the class reaction here favors settlement. Indeed, there were no objections filed to the Settlement and thus no negative feedback to the settlement. **[**66]** Moreover, as Interim Co-Lead Counsel has represented, many of the Class Members are sophisticated entities with their own in-house counsel, and ostensibly have the resources and ability to assess the settlement agreement beyond the average layperson or enterprise.

Moreover, there were only 364 requests for exclusion from the Class, which is 2.76% of the Notice addressees, or virtually *di minimis* in light of the over 13,200 Notices of **[*299]** settlement that were sent (as well as published notices and press releases about the settlement). Furthermore, many of the 364 requests for exclusion come from entities or subsidiaries organizationally related to other opt-out filers, and so the Court understands that the number of distinct, independent parties who have excluded themselves likely is less than 364 in number. Keogh Aff. ¶ 17. As such, this factor weighs in favor of the proposed settlement's fairness and adequacy. *See* Cendant Corp., 264 F.3d at 234-35 (recognizing that low number of objectors and opt-outs strongly favors settlement and that "[t]he vast disparity between the number of potential class members who received notice of the Settlement and the number of objectors creates a strong **[**67]** presumption that this factor weighs in favor of the Settlement").

c. The Stage of the Proceedings and the Amount of Discovery Completed

This *Girsh* factor requires the Court to evaluate whether Plaintiffs had an "adequate appreciation of the merits of the case before negotiating" settlement. Prudential, 148 F.3d at 319 (quoting Gen. Motors, 55 F.3d at 813). "To ensure that a proposed settlement is the product of informed negotiations, there should be an inquiry into the type and amount of discovery the parties have undertaken." *Id.* The Third Circuit Court of Appeals has recognized that, even if a settlement occurs in an early stage of litigation, there are means for class counsel to apprise themselves of the merits of the litigation, such as "conduct[ing] significant independent discovery or investigations to develop the merits of their case (as opposed to supporting the value of the settlement)" or retaining their own experts or interviewing witnesses. *See* Gen. Motors, 55 F.3d at 814.

Here, the Court is satisfied that Interim Co-Lead Counsel had adequate knowledge of the litigation and informed negotiations. Interim Co-Lead Counsel has represented to the Court that they "conducted extensive **[**68]** investigations into the case in preparation for filing of the complaint." Mot. at 17-18; *see also* Mot., Ex. A, Hausfeld Decl. ¶ 5 ("Plaintiffs entered the negotiations with Sparboe with a significant amount of knowledge of Defendants' antitrust conspiracy, as a result of months of investigations into the conspiracy conducted by the numerous experienced law firms representing them."); Asher Decl. ¶ 6 (recounting that the counsel's investigations included research into the egg industry, egg trade associations, such as United Egg Producer ("UEP"), UEP's animal welfare programs, the economics underlying the alleged conspiracy, and the legal issues relating to the conspiracy). *See* Prudential, 148 F.3d at 319 (recognizing that informal discovery methods can support adequate appreciation of the merits).

Several Defendants filed motions to dismiss the Consolidated Amended Class Action Complaint in the midst of the negotiations for the Sparboe Settlement. Indeed, the Court granted Sparboe an extension of the deadline to respond to that very pleading. *See* Order (Doc. No. 98) (granting Defendant Sparboe Farms, Inc.'s Motion to Extend Defendant Sparboe's Time to Respond to Direct Purchasers' Consolidated **[**69]** Amended Class Action Complaint and to Extend Subsequent Deadlines (Docket No. 90)). These motions provided Interim Co-Lead Counsel with an additional platform from which to ascertain Sparboe's and the other Defendants' positions on the case and thereby to evaluate further the merits of the litigation.

As a result, the Court is satisfied that Interim Co-Lead Counsel, as highly experienced antitrust litigators, were in such a position prior to negotiating and entering into the Sparboe Settlement that they had an adequate understanding and appreciation of strengths and weaknesses of the Plaintiffs' case. Accordingly, the Court determines this factor weighs in favor of settlement.

d. Risks of Establishing Liability, Damages, and Maintaining the Class Action Through Trial

These three *Girsh* factors concern the risks of establishing liability, damages, and maintaining a class action through trial. The factors require the Court to "survey the potential risks and rewards of proceeding to litigation in order to weigh the likelihood of success against the benefits of an immediate **[*300]** settlement." *Warfarin, 391 F.3d at 537*. The inquiry requires balancing "the likelihood of success and the potential damage **[**70]** award if the case were taken to trial against the benefits of immediate settlement." *Prudential, 148 F.3d at 319*. For example, the Court assesses the risks of establishing liability to "examine what the potential rewards (or downside) of litigation might have been had class counsel decided to litigate the claims rather than settle them." *Gen. Motors, 55 F.3d at 814*. As another example, the inquiry into establishing damages "attempts to measure the expected value of litigating the action rather than settling it at the current time." *Id. at 816*.

In cases of settlements with only a subset of defendants to the suit, as is the case here:

> [g]iven that the litigation might continue against other defendants, the parties may be reluctant to disclose fully and candidly their assessment of the proposed settlement's strengths and weaknesses that led them to settle separately. The adequacy of the settlement depends in part on the relative exposure and resources of other parties. An informed evaluation is extremely difficult if discovery is incomplete or has been conducted against only a few of the defendants.

Herr, *supra*, § 21.651, at 505. Thus, the Court understands why Plaintiffs decline to provide **[**71]** a detailed assessment of any risks perceived in establishing liability and damages, and instead emphasize that the Court should consider Interim Co-Lead Counsel's estimation of the probability of success in assessing these factors. *See* Mot. at 18-19 & n.5. Indeed, the Court gives credence to counsel's representation that although "they believe [Plaintiffs] will prevail at trial, they recognize that antitrust cases, like all complex litigation against large companies with highly talented defense counsel, have inherent risks." *Id.* at 19. The record demonstrates that counsel have significant experience in antitrust cases such as this one which ought to enable them to appreciate the strengths and weakness of the case and the risks of maintaining the action through trial.

Furthermore, antitrust class action litigation is complex, and, especially at its early stages, inherently rife with risk and unpredictability in terms of ultimately prevailing to establish liability and damages and achieve class certification. The Court finds that this suit presents no exception. Indeed, this settlement was executed prior to the amendment of the Consolidated Amended Class Action Complaint and the extensive **[**72]** motion to dismiss practice that followed. At present, the bulk of discovery, dispositive motion practice, expert discovery, class certification, and trial are on the horizon of this case with the attendant expense and uncertainties. Thus, there is a genuine risk of not prevailing in establishing class certification, liability, or damages. As all experienced litigators and jurists know, that a jury will be the ultimate fact-finder at trial presents further risks and uncertainties.

The motion practice that has already transpired is indicative of the future risk that Plaintiffs face in prosecuting their case against Sparboe. Plaintiffs have already engaged with several of the other Defendants in extensive motion practice concerning the Second Consolidated Amended Class Action Complaint. The Plaintiffs' pending motion for leave to file a Third Consolidated Amended Class Action has been challenged in part by one group of defendants as to the claims against them individually. Moreover, Sparboe itself has filed motions to dismiss the six complaints brought by Direct Action Plaintiffs as to the individual claims against it. *See* Docket Nos. 635-637, 639-643, and 645.

Based on the detailed allegations **[**73]** in the Second Consolidated Amended Class Action Complaint, Plaintiffs appear to have evidence to support their theory that Defendants conspired to reduce the supply of eggs and egg products, and thereby increase prices. *See Fed. R. Civ. P. 11(b)* (concerning representations to the Court in pleadings). Nonetheless, even assuming Plaintiffs could establish their theory of an overarching conspiracy at trial, their success in establishing liability and damages as to individual defendants, such as Sparboe, is by no means assured.

Through the Sparboe Settlement, Plaintiffs may have secured cooperation in prosecuting their case, which, according to Interim Co-Lead Counsel, "significantly reduces the **[*301]** risks associated with discovery." *See* Mot. at 20. Nonetheless, such cooperation is no guarantee to success in proving liability and damages in this complex litigation, and Plaintiffs still must show that Defendants individually agreed to join the alleged conspiracy. Indeed, the other Defendants' individual motions to dismiss raised issues concerning whether they individually actually joined the conspiracy. Furthermore, Defendants jointly challenged at the motion to dismiss stage whether Plaintiffs **[**74]** could recover damages outside the statute of limitations. These issues remain live subjects for discovery and additional dispositive motion practice, and any trial on these issues would be protracted and involve a significant amount of testimony and documentary evidence, particularly given the time period at issue, which spans almost a decade, and the number of parties involved.

In addition to challenging the Plaintiffs' complaints, Defendants also have demonstrated an intent to vigorously defend against this suit—including by raising privilege issues relating to the Sparboe Settlement, *see, e.g.*, Order (Doc. No. 361); Order (Doc. No. 403), and other discovery-related issues, *see, e.g.*, Conf. Tr. (Doc. No. 591); Conf. Tr. (Doc. No. 675); Case Mgmt Order Nos. 16 to 19 (Doc. Nos. 604, 626, 656, and 676). Furthermore, Defendants have indicated during the course of these proceedings, particularly during the development of a discovery plan, that they intend to advance defenses, such as an agricultural cooperative immunity defense under the Capper-Volstead Act and a defense involving standard-setting conduct, that will present difficult factual and legal issues for the parties, creating their **[**75]** own brand and quantity of uncertainty for the Plaintiffs' case. *See, e.g.*, Case Mgmt Order No. 19. The parties also contemplate expert discovery on damages, which likely will result in competing expert opinions representing very different damage estimates that will present further ambiguity as to resolution on damages as to each Defendant. *See, e.g.,* Conf. Tr. (Doc. No. 675).

It is entirely likely that Plaintiffs would face similar, if not identical, legal challenges and uncertainties in their claims again Sparboe. Indeed, as mentioned above, Sparboe has filed motions to dismiss the individual claims asserted against it in the six Direct Action Plaintiffs' complaints, and has joined the Defendants' joint motion to dismiss the Direct Action Plaintiffs' complaints for recovery of damages outside the statute of limitations period.

Finally, Plaintiffs not only face the risk that they will not succeed in establishing liability and damages, but also the risks associated with certifying and maintain a class. *See* *Warfarin, 391 F. 3d at 537*. Indeed "'the prospects for obtaining certification have a great impact on the range of recovery one can expect to reap from the [class] action.'" *Id.* (quoting **[**76]** *Gen. Motors, 55 F.3d at 817*). "The value of a class action depends largely on the certification of the class because, not only does the aggregation of the claims enlarge the value of the suit, but often the combination of the individual cases also pools litigation resources and may facilitate proof on the merits." *Gen. Motors, 55 F.3d at 817*. Thus, this *Girsh* "factor measures the likelihood of obtaining and keeping a class certification if the action were to proceed to trial," recognizing that a "district court retains the authority to decertify or modify a class at any time during the litigation if it proves to be unmanageable." *Warfarin, 391 F.3d at 537* (citing *Prudential, 148 F.3d at 321*).

Many, if not all, Defendants no doubt will vigorously oppose class certification. If Sparboe remained in this litigation, in all likelihood it would join those defense efforts in this respect just as it has joined the joint defense in the suits brought by the Direct Action Plaintiffs. The Court of Appeals for the Third Circuit has recognized: "There will always be a 'risk' or possibility of decertification, and consequently the court can always claim this factor weighs in favor of settlement." *Prudential, 148 F.3d at 321*. **[**77]** [20] Thus, there are inherent difficulties in bringing a class action to trial that apply here.

[*302] Because the Plaintiffs would face genuine risks and uncertainties in establishing liability and damages against Sparboe, and in obtaining and maintaining class certification, should the claims against Sparboe continue without settlement, these three factors weigh in favor of settlement.

---

[20] Based on this observation, the Court of Appeals has questioned the significance of this factor in "settlement-only" class actions following the Supreme Court's decision in *Amchem. See* *Prudential, 148 F.3d at 321*.

e. The Ability of the Defendant to Withstand a Greater Judgment

This factor "is concerned with whether the defendants could withstand a judgment for an amount significantly greater than the Settlement." *Cendant, 264 F.3d at 240*. Thus, the Court must consider here whether Sparboe could withstand a judgment for an amount significantly greater than the costs associated with the proposed cooperation.

The limited evidence in the record suggests that Sparboe would be able to withstand a greater judgment, namely some sort of monetary payment. Indeed, in the Consolidated Amended Class Action Complaint, Sparboe **[**78]** is alleged to be the fifth largest shell egg marketer and producer in the United States. *See* Consol. Am. Class Action Compl. at ¶ 85. There is no evidence concerning the financial or other possible impacts a greater judgment amount would have on Sparboe. *See, e.g., Cendant, 264 F.3d at 240-41* (discussing the possibility of bankruptcy for a settling defendant).

Furthermore, the Plaintiffs' arguments tacitly suggest that Sparboe could withstand a larger judgment. They argue that "[t]his factor deserves little weight, especially in light of the risks of continued litigation against remaining Defendants without the cooperation obtained from Sparboe." Mot. at 21.

Thus, the record suggests that Sparboe could pay monetary consideration as opposed to only providing the nonmonetary consideration set forth in the Settlement terms. Accordingly, this factor does not weigh in favor of approval.

f. The Range of Reasonableness of the Settlement in Light of the Best Possible Recovery and the Attendant Risks of Litigation

"The last two *Girsh* factors ask whether the settlement is reasonable in light of the best possible recovery and the risks the parties would face if the case went to trial." *Prudential, 148 F.3d at 322*. **[**79]** In other words, the Court evaluates "whether the settlement represents a good value for a weak case or a poor value for a strong case. The factors test two sides of the same coin: reasonableness in light of the best possible recovery and reasonableness in light of the risks the parties would face if the case went to trial." *Warfarin, 391 F.3d at 538* (citing *Prudential, 148 F.3d at 322*).

Here, the Court evaluates the settlement in light of its nonmonetary consideration—namely, Sparboe's cooperation in the prosecution of the Plaintiffs' case against the other remaining Defendants by providing documents and witness testimony. "Settlements involving nonmonetary provisions for class members . . . deserve careful scrutiny to ensure that these provisions have actual value to the class," which can be accomplished through a *Rule 23(e)* analysis. *Fed. R. Civ. P. 23(h)* note (2003). "Despite the difficulties they pose to measurement, nonpecuniary benefits . . . may support a settlement." *Bolger, 2 F.3d at 1311*. [21]

As this settlement is structured, it is difficult to determine accurately the actual value of the proposed settlement. Nonetheless, the Court determines that Sparboe's conferral of the nonpecuniary benefits to class members that is proposed under the settlement is valuable consideration, and reasonable both in light of the best possible recovery against Sparboe and in light of the risks the parties would face if the case went to trial against Sparboe. Certainly, calculating the best possible recovery against Sparboe for the class in the aggregate is "exceedingly speculative" at this point in time given the **[*303]** previously-discussed risks of establishing liability and damages associated with this complex litigation, even when considering that treble damages are technically available for recovery under the Plaintiffs' Sherman Act claim.

---

[21] By contrast, ordinarily, "[i]n order to assess the reasonableness of a proposed settlement seeking monetary relief, 'the present value of the damages plaintiffs would likely recover if **[**80]** successful, appropriately discounted for the risk of not prevailing, should be compared with the amount of the proposed settlement.'" *Prudential, 148 F.3d at 322*. (citing *Gen. Motors, 55 F.3d at 806*).

According to Interim Co-Lead Counsel, in cooperating with Plaintiffs, Sparboe

> guide[s] [Plaintiffs] through not only the nature of the industry and the market, **[**81]** but as well the workings of the UEP and the relationship of all of the defendants to the UEP and to the market. They're able to tell us how the domestic market or with regard to the export market and how the supply in both markets effected price domestically. They will be able to tell us others who were of like mind with them that the program was an effort to control supply and increase price. They will be able to identify those entities-those persons for us or those companies as well as others within other portions of the market that would have testimony that would be beneficial to the class which we otherwise would not know clearly for quite some time into the litigation.

Prelim. Hr'g Tr. at 17:22-18:10. Furthermore, "Sparboe produced documents from its in-house counsel that it may have otherwise withheld had Sparboe litigated this case." Hausfeld Decl. ¶ 14. Indeed, "[t]he information Sparboe disclosed to Plaintiffs-both in documents and witness interviews-in some instances included communications between Sparboe's officers and attorneys and UEP's officers and attorneys." Oct. 19, 2011 Mem. Op., *278 F.R.D. 112, 116* (Rice, J.) (Doc. No. 585).

At the same time, the Court recognizes **[**82]** that Sparboe's agreement to cooperate with Plaintiffs throughout the course of pre-trial proceedings and trial is valuable consideration in light of the risks in proceeding with this suit against the remaining Defendants. [22]

At the Court's hearing on preliminary approval of the settlement, Interim Co-Lead Counsel noted Sparboe did not have an interest in offering any monetary consideration even though there was a demand for such consideration. Counsel explained that this case's unique attributes create greater value for a defendant's cooperation: "In a majority of antitrust cases who are on behalf of classes, there is either a government investigation that precedes the filing of the complaint or a government indictment or even a guilty plea. There is none of that here." Prelim. Hr'g Tr. at 8:12-8:15.

Interim Co-Lead Counsel also noted that the pleading standards as set forth in *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929*, and its progeny raise the value of cooperation in that the information provided by Sparboe **[**83]** comes in advance of discovery. *Id.* at 9:17-9:25, 10:1-10:5. There is greater efficiency in the Plaintiffs proceeding with their case with Sparboe's cooperation then with monetary consideration from an early settlement. Obtaining such information also assists in "lay[ing] out for [Plaintiffs,] with greater clarity and the force of having witnesses and documents[,] what this case is about[,] so that [Plaintiffs] can move it more expeditiously as opposed to going through a protracted process even on an expedited basis of discovery one defendant at a time with possible motion and practice in between." *Id.* at 12:11-12:16.

Granted, the Court observes that much of Sparboe's information provided under the Settlement Agreement would otherwise be available eventually through discovery as required under the federal rules, if Sparboe remained in this suit. Nonetheless, Sparboe's cooperation reduces costs and time associated with formal discovery. Plaintiffs are saved expenses by avoiding motion practice to obtain documents and having more focused depositions on subjects relevant to the claims' merits. *Id.* at 13:24-25, 14:1-8. Moreover, the Sparboe Settlement likely has short-circuited at least **[**84]** some of the expense and delay of future discovery by securing Sparboe's cooperation and removing the Sparboe forces from those who would contest or complicate Plaintiffs' discovery efforts. Plaintiffs also gain a clear tactical advantage in obtaining Sparboe's information through **[*304]** non-traditional discovery mechanisms, including, by way of example, the advantage of having this information to formulate strategy in taking discovery from the remaining Defendants, specific tailoring the scope and focus of discovery.

Furthermore, the settlement prevents Plaintiffs from having to defend against Sparboe, which has indicated that it may raise defenses involving service of process, venue, and personal jurisdiction, and abandonment of the conspiracy. *Id.* at 15:8-12, 17:13-17. Interim Co-Lead Counsel also indicated that on average Plaintiffs could save on average $100,000 to $200,000 for each motion. *Id.* at 15:19-15:20.

---

[22] The Court does not comment on whether the information and facts that Sparboe may provide would be established, or even admissible, at trial, based upon counsel's representations.

The Court recognizes that a nonpecuniary settlement presents certain concerns because it may merely be a means of expediting the receipt of attorneys fees, and thereby is of dubious value to the class members. *Cf. Bolger, 2 F.3d at 1318* ("Although nonmonetary relief is adequate consideration **[**85]** for settling a derivative or class action, the risks of concealment and collusion are not insignificant. Derivative actions may settle for cosmetic changes and no tangible relief to the corporation in exchange for large attorneys' fees."); *Gen. Motors, 55 F.3d at 778* (rejecting settlement where each class member would receive a $1,000 coupon towards a new truck but attorneys requested fees of $ 9.5 million). However, the Court determines that such a concern is not present here because the Settlement Agreement does not set forth provisions concerning the collection of attorneys' fees relating to the settlement, and Interim Co-Lead Counsel has represented they do not intend to seek fees resulting from this Settlement Agreement.

While the value of this cooperation is certainly of tangible value, it is not entirely without compare. Moark, too, has agreed to cooperate with Plaintiffs with information that purportedly pertains to a longer time period than Sparboe's information. *See* Second Consol. Am. Class Action Compl. ¶ 240 (alleging that "Sparboe ended its participation in both the UEP Certified Program and exports made through USEM that reduced domestic egg supply" sometime shortly after **[**86]** July 2003). Second, Sparboe's cooperation does not appear to assure that Plaintiffs will have conclusive evidence in support of their claims against the remaining Defendants. Indeed, Sparboe is a named Defendant in other cases in this litigation for the Direct Action Plaintiffs, and the Sparboe Settlement does not impact those plaintiffs' claims against which Sparboe must continue to defend.

Nonetheless, when considering these two *Girsh* factors in light of the record *in toto*, the Court is persuaded that Sparboe's cooperation confers real and substantial benefits upon the Class. The Court further concludes that the settlement is reasonable in light of the best possible recovery and the risks the parties would face if the case went to trial against Sparboe. These factors weigh in favor of approval of the settlement.

g. Prudential Factors

The relevant *Prudential* factors weigh in favor of approving the Sparboe Settlement, or, at worst, are neutral factors. First, the Court has already addressed the impact that the limited extent of discovery on the merits thus far has on this litigation and other factors that bear on the ability to assess the probable outcome of a trial on the merits of liability **[**87]** and individual damages.

Second, the settlement agreement allows putative class members the right to opt out of the settlement. Indeed, some parties exercised this right by filing requests for exclusion. Furthermore, the Notice Packet included both a Notice of the Sparboe Settlement and a Notice of the Moark Settlement, thereby simultaneously notified class members of the Moark Settlement and enabling class members to assess the adequacy of the two settlements in conjunction with one another and as to the whole suit.

Third, the results achieved by the settlement for the Class and Subclasses are immediate, concrete, and realized without the costs and delays associated with extensive discovery and other later stages of litigation. Sparboe's cooperation pursuant to the settlement aids the Plaintiffs in prosecuting and resolving their claims against the other Defendants. Indeed, Interim Co-Lead Counsel **[*305]** describe the Sparboe Settlement as an "ice-breaker" settlement, which is a term used to describe "the first settlement in the litigation—and [a settlement that] should increase the likelihood of future settlements." *Linerboard, 292 F. Supp. 2d at 643*. By contrast, it is unclear, given the aforementioned **[**88]** risks and uncertainties, *supra*, whether Direct Action Plaintiffs who are individually prosecuting their claims apart from the Class, or other parties who opted-out of the Sparboe Settlement, will be successful in their claims against Moark and the other Defendants, and whether that result will be immeasurably better than the result for class members under the settlement agreement and as to the entire suit. For the same reasons, it is unclear whether those opt-out parties might achieve better settlements than the class to resolve similar claims against Sparboe.

Fourth, the Sparboe Settlement only releases Class Members' claims against Sparboe for claims arising out of injuries or damages that occurred "from the beginning of time to the date of th[e] Agreement" *and* that resulted from the conduct asserted in the Plaintiffs' suit. As such, future claims for injuries or damages against Sparboe arising outside this time period but resulting from the alleged conduct giving rise to the class claims are not barred. Moreover, the Release does not apply to those parties who opted-out of the Sparboe Settlement, such as Direct Action Plaintiffs.

Fifth, all segments of the class are being treated **[**89]** equally relative to the consideration under the Sparboe Settlement. Sparboe is conferring its cooperation upon all class members. There is no differentiation among class members in terms of Subclasses or class representatives in terms of the information received.

h. Summary of Girsh *and* Prudential *Factors*

Upon considering the Sparboe Settlement Agreement in light of all of the *Girsh* and the relevant *Prudential* factors, the Court is satisfied that the settlement is fair, reasonable, and adequate. As discussed, a few of the factors are neutral or weigh against settlement approval. However, all of the factors considered in determining the fairness of a settlement "are a guide; an unfavorable conclusion regarding one or more factors does not automatically render the settlement unfair." 2 Joseph M. McLaughlin, *McLaughlin on Class Actions: Law and Practice* § 6:8 (6th ed. 2010); *see also* *Ehrheart, 609 F.3d at 605* (dissenting, Smith, J.) (quoting same). Accordingly, not every factor need weigh in favor of settlement in order for the settlement to be approved by the Court. *See* *Cendant, 264 F. 3d at 242-43* (affirming a final settlement approval when not all factors weighed in favor of approval). **[**90]** Because, on balance, the factors as considered above weigh in favor of settlement, the Court concludes that approval of the settlement is appropriate pursuant to *Fed. R. Civ. P. 23(e)*.

V. Conclusion

For the foregoing reasons, the Court determines that the Class and Subclasses meet the certification requirements of *Rule 23* for settlement purposes, and concludes that the proposed settlement agreement is fair, reasonable, and adequate. Accordingly, the Court grants the Plaintiffs' motion for final approval of the class action settlement with Defendant Sparboe Farms, Inc.

An Order consistent with this Memorandum follows.

BY THE COURT:

/s/ Gene E.K. Pratter

GENE E.K. PRATTER

United States District Judge

ORDER GRANTING FINAL APPROVAL OF THE CLASS ACTION SETTLEMENT BETWEEN DIRECT PURCHASER PLAINTIFFS AND DEFENDANT SPARBOE FARMS, INC.

AND NOW, this 16th day of July, 2012, upon consideration of the Motion for Final Approval of Settlement Agreement with Sparboe Farms, Inc. (Doc. No. 443), and following a final fairness hearing, in accordance with *Federal Rule of Civil Procedure 23*, it is hereby **ORDERED** that the Motion (Doc. No. 443) is **GRANTED** **[**91]** as outlined in this Order and the accompanying Memorandum.

Based on the Court's review of the proposed Settlement Agreement Between Direct Purchaser Plaintiffs and Sparboe Farms, Inc. ("Settlement Agreement"), and the entire record of this case, and having conducted a final fairness hearing on the matter, the Court determines as follows:

1. The Court has jurisdiction over the subject matter of this action.

2. Terms used in this Order that are defined in the Settlement Agreement, unless otherwise defined herein, have the same meanings in this Order as in the Settlement Agreement.

3. The following Settlement Class, as defined in the Settlement Agreement, which was conditionally certified in the Court's Order granting preliminary approval of this settlement, is certified for settlement purposes only as follows [23]:

> All persons and entities that purchased eggs, including shell eggs and egg products, produced from caged birds in the United States directly from any producer during the Class Period from January 1, 2000 through the present.
>
> a.) Shell Egg SubClass
>
> All individuals and entities that purchased shell eggs produced from caged birds in the United States directly from any producer during the **[**92]** Class Period from January 1, 2000 through the present.
>
> b.) Egg Products SubClass
>
> All individuals and entities that purchased egg products produced from shell eggs that came from caged birds in the United States directly from any producer during the Class Period from January 1, 2000 through the present.
>
> Excluded from the class and subclasses are the Defendants, their co-conspirators, and their respective parents, subsidiaries and affiliates, all government entities, as well as the Court and staff to whom this case is assigned, and any member of the Court's or staff's immediate family. Also excluded from the Class and Subclasses are purchases of "specialty" shell egg or egg products (such as "organic," "freerange"or "cage-free") and purchases of hatching eggs (used by poultry breeders to produce breeder stock or growing stock for laying hens or meat).

4. The Court finds, as discussed more thoroughly in the accompanying Memorandum, that the Settlement Class satisfies the applicable prerequisites for class action treatment under *Federal Rule of Civil Procedure 23(a)* and *(b)*. The Settlement Class is so numerous that joinder of all members is not practicable, there are questions of law and fact common to the Settlement Class, the claims of the Class Representatives are typical of the claims of the Settlement Class, and the Class Representatives will fairly and adequately protect the interests of the Settlement Class. For purposes of this settlement, questions of law and fact common to the members of the Settlement Class predominate over any questions affecting only individual members, and a class action is superior to other available methods for the fair and efficient adjudication of the controversy.

5. Notice of the Settlement Agreement to the Settlement Class required by *Rule 23(e) of the Federal Rules of Civil Procedure* has been provided in accordance with the Court's Orders granting preliminary approval of this settlement and notice of this settlement, and such Notice has been given in an adequate and sufficient **[**94]** manner; constitutes the best notice practicable under the circumstances; and satisfies *Federal Rules of Civil Procedure 23(c)(2)(B)* and *23(e)* and due process.

6. Defendants have filed notification of this settlement with the appropriate federal and state officials pursuant to the Class Action Fairness Act of 2005 ("CAFA"), *28 U.S.C. § 1715*.

7. As discussed more thoroughly in the accompanying Memorandum, the Court finds that the Settlement Agreement is sufficiently fair, reasonable and adequate to the Settlement Class pursuant to *Federal Rule of Civil Procedure 23(e)*. Specifically, the Court finds that the settlement meets the standard for an initial presumption of fairness. Additionally, the Court's analysis of the factors set forth in *Girsh v. Jepson, 521 F.2d 153 (3d Cir. 1975)*, and factors set forth in *In re Prudential Insurance Co. American Sales Practice Litigation Agent Actions, 148 F.3d*

---

[23] "Class Period" is defined as "the period from and including January 1, 2000 up to and including the date when Notice of the Court's entry of an order preliminarily approving this settlement and certifying a class for settlement purposes is first published." Thus, the Class Period for the Settlement Agreement is from January 1, 2000 through **[**93]** October 23, 2009.

283 (3d Cir. 1998), as appropriate, leads to the conclusion that the relevant considerations weigh in favor of finding the settlement is fair, reasonable and adequate under Federal Rule of Civil Procedure 23(e).

8. The Settlement Agreement is finally approved pursuant to Federal Rule of Civil Procedure 23(e) **[**95]** of the Federal Rules of Civil Procedure as fair, reasonable, and adequate, and the parties are directed to consummate the Settlement Agreement in accordance with its terms.

9. The United States District Court for the Eastern District of Pennsylvania shall retain jurisdiction over the implementation, enforcement, and performance of this Settlement Agreement, and shall have exclusive jurisdiction over any suit, action, motion, proceeding, or dispute arising out of or relating to this Settlement Agreement or the applicability of this Agreement that cannot be resolved by negotiation and agreement by Plaintiffs and Sparboe Farms, Inc. This Settlement Agreement shall be governed by and interpreted according to the substantive laws of the Commonwealth of Pennsylvania without regard to its choice of law or conflict of laws principles. Sparboe Farms, Inc. submits to the jurisdiction in the Eastern District of Pennsylvania only for the purposes of this Settlement Agreement and the implementation, enforcement and performance thereof. Sparboe Farms, Inc. otherwise retains all defenses to the Court's exercise of personal jurisdiction over Sparboe Farms, Inc..

Judges: J. Frederick Motz, United States District Judge.

Opinion by: J. Frederick Motz

Opinion

Novell, Inc. instituted this action against Microsoft under § 4 of the Clayton Act, 15 U.S.C. § 15, alleging violations of the Sherman Act, 15 U.S.C §§ 1-2. [1] Initially, Novell asserted three sets of claims: (1) that Microsoft violated § 2 of the Sherman Act and caused antitrust injury to Novell by unlawfully monopolizing and attempting to monopolize the software *applications* market; (2) that Microsoft violated § 2 of the Sherman Act and caused antitrust injury to Novell by unlawfully maintaining its monopoly in the *operating systems* market; and (3) that Microsoft violated § 1 of the Sherman Act and caused antitrust injury to Novell by engaging in exclusionary agreements in unreasonable restraint of trade. Novell has abandoned the third claim, *see* Novell, Inc. v. Microsoft Corp., 429 Fed. Appx. 254, 258 n.7 (4th Cir. 2011), and the Fourth Circuit affirmed a ruling I made that Novell's monopolization and attempted monopolization **[*3]** claims in the applications market are barred by limitations. *See* Novell, Inc. v. Microsoft Corp., No. MDL 1332, No. 05-cv-1087(JFM), 2005 U.S. Dist. LEXIS 11520, 2005 WL 1398643, at *5 (D. Md. June 10, 2005), *aff'd*, 505 F.3d 302, 322 (4th Cir. 2007). [2] Thus, the only remaining claim is the second: that Microsoft violated § 2 of the Sherman Act and caused antitrust injury to Novell by maintaining its monopoly in the *operating systems* market. For this claim, Novell advanced two somewhat different theories: the "franchise theory" and the "middleware theory." [3]

That claim was tried to a jury. After an approximately eight-week trial, the jury hung and was unable to return a verdict. [4] Now pending is Microsoft's motion under Fed. R. Civ. P. 50(b) for judgment as a matter of law. Although Novell presented evidence from which a jury could have found that Microsoft engaged in aggressive conduct, perhaps to monopolize or attempt to monopolize the applications market, it did not present evidence sufficient for a

---

[1] This case was brought in the wake of the 1998 government antitrust enforcement action against Microsoft. That action ultimately resulted in a ruling, supported by factual findings made by Judge Thomas Penfield Jackson, that Microsoft violated § 2 of the Sherman Act by monopolizing and attempting to monopolize the operating systems market. *See* United States v. Microsoft Corp., 87 F. Supp. 2d 30 (D.D.C. 2000), *aff'd in part*, 253 F.3d 34, 346 U.S. App. D.C. 330 (D.C. Cir. 2001). Novell's claim that it was injured by virtue of Microsoft's monopolization of the operating systems market was tolled while the government action was pending because it overlapped with the government's claim **[*4]** in that action. Some of Judge Jackson's factual findings in the government case have been granted collateral estoppel effect in this action. (*See* Oct. 4 Court Correspondence, ECF No. 163; Trial Tr. at 143-57, 167-97, Oct. 18 & Nov. 14, 2011). In this Opinion, I refer to Judge Jackson's findings as Factual Finding ¶ __.

[2] The Fourth Circuit had jurisdiction to review the limitations question because this action had been transferred to the District of Maryland for resolution of pretrial issues pursuant to the Multidistrict Litigation Act. *See* 28 U.S.C. § 1407. I served as the trial judge in the action under an intercircuit assignment to the District of Utah, the district in which the case was filed. In the District of Maryland pretrial proceedings, the case number for this action was No. 05-cv-1087-JFM. In the District of Utah, its case number is No. 2:04-cv-01045-JFM. ECF references in this Opinion are to the Utah docket.

[3] I discuss these theories in section V.B. In the government case, Judge Jackson defined "middleware" as software that "relies on the interfaces provided by the underlying operating system while simultaneously exposing its own APIs to developers." Finding of Fact ¶ 28. **[*5]** The D.C. Circuit accepted this definition, writing that middleware simply refers to "software products that expose their own APIs." Microsoft, 253 F.3d at 53. The products Novell developed that it alleges constitute middleware are PerfectFit (the shared code written into WordPerfect and PerfectOffice), AppWare (which was included in PerfectOffice), and OpenDoc.

[4] After the jury hung, I interviewed the jurors and permitted counsel to do so as well. It appears undisputed that eleven of the twelve jurors would have returned a verdict in favor of Novell on the issue **[*6]** of liability. However, in light of what jurors said after the trial, it would be entirely speculative to assess the amount of damages the jury would have awarded had it not hung on the issue of liability. It might have taken into account in awarding damages not only weaknesses in Novell's damages claim but weaknesses in its liability claim as well. In any event, the fact that a majority of the jurors would have returned a verdict of liability in favor of Novell does not relieve me of the responsibility to rule on independent claims or on Microsoft's Rule 50(b) motion. *See* Noonan v. Midland Capital Corp., 453 F.2d 459, 463 (2d Cir. 1972) ("If the position of some jurors favoring plaintiff is enough [to prevent a judge from granting a Rule 50(b) motion], there could never be a judgment for insufficiency of the evidence notwithstanding a verdict."); Stewart v. Walbridge, Aldinger Co., 882 F. Supp. 1441, 1443 (D. Del. 1995) ("[T]he fact that the jury was unable to reach a unanimous verdict does not in any way affect this Court's duty to rule on the [Rule 50(b)] motion.").

jury to find that Microsoft committed any acts that violated *§ 2* in maintaining its monopoly in the operating systems market. Therefore, Microsoft's Rule 50 motion will be granted. [5]

I.

In the mid-1990s, Microsoft, which for many years had possessed a monopoly in the PC operating systems market, was developing a new operating system. This operating system became known as Windows 95 and was released for sale to the public on August 24, 1995. [6] Microsoft also sold a word processing application, Word, and a spreadsheet application, Excel. Beginning in 1990, Microsoft marketed these two applications together in an office productivity suite, Office. (Gibb, Trial Tr. at 823, Oct. 26, 2011; Frankenberg, Trial Tr. at 1080, Nov. 7, 2011).

WordPerfect, a word processing application, was originally developed by WordPerfect Corporation, a company located in Orem, Utah. WordPerfect competed with Word and was particularly popular with customers who used character-based DOS operating systems. In the mid-1980s and early 1990s, WordPerfect was the acknowledged "king of the hill" on the DOS platform. (Peterson, Trial Tr. at 4667, Dec. 7, 2011; *see* Middleton, Trial Tr. at 4178 (Dec. 13, 2008 Video Dep.), Dec. 5, 2011). Although **[*9]** Microsoft manufactured and sold a character-based operating system known as MS-DOS, as early as 1984 it began concentrating on an alternative type of operating system, known as a graphic user interface ("GUI") system. (Gates, Trial Tr. at 2709, 2713, Nov. 21, 2011). As Microsoft developed Windows, its GUI-based operating system, Bill Gates, the Chief Executive Officer of Microsoft, attempted to persuade Pete Peterson, then a principal of WordPerfect, to write for Windows. [7] (Peterson, Trial Tr. at 4708-09, Dec. 7, 2011). WordPerfect, however, was reluctant to devote significant resources to developing applications to run on Windows because Peterson "was not going to put any effort into producing a product that would put another penny in Bill Gates' pocket." (Bushman, Trial Tr. at 3152-53, Nov. 28, 2011). In May 1990, Microsoft released Windows 3.0. WordPerfect did not release a Windows 3.0—compatible WordPerfect program until eighteen months later, in November 1991. (Middleton, Trial Tr. at 4187 (Dec. 13, 2008 Video Dep.), Dec. 5, 2011)

Novell announced its intent to purchase WordPerfect on March 21, 1994 and completed the purchase on June 24, 1994. At the same time, Novell purchased Quattro Pro, a spreadsheet application that had been developed by Borland, Inc., a company located in Scotts Valley, California. (Frankenberg, Trial Tr. at 1080, Nov. 7, 2011). Robert Frankenberg, who was the Chief Executive Officer of Novell after its purchase of WordPerfect and Quattro Pro, saw that GUI operating systems were the wave of the future, and he was more inclined than Peterson to work with Microsoft and to develop versions of its applications for Windows. (*Id.* at 1040). The WordPerfect products for Windows had generally not been well received by the market, and Frankenberg recognized the need to improve those products. In November 1994, Novell released WordPerfect 6.1 for Windows, which met with favorable

---

[5] This Opinion does not contain extensive citations to Tenth Circuit ***antitrust law*** because I have concluded that the **[*7]** facts governing my ruling are so case specific that the proper disposition of the Rule 50 motion requires close examination of the evidence in this case rather than comparison of this case to others. I note, however, my holding entirely accords with the Tenth Circuit's view that, as a general matter, a tough-minded business decision that adversely affects competition does not constitute an *ipso facto* violation of the Sherman Act. *See* *Christy Sports, LLC v. Deer Valley Resort Co., 555 F.3d 1188, 1198 (10th Cir. 2009)*.

[6] Windows 95 was launched at a gala event at Microsoft's corporate headquarters. Gary Gibb, who managed the development of the **[*8]** versions of Novell's office productivity applications for Windows 95, attended the event. He testified that he was displeased because he was not invited into the tent where Jay Leno, a television personality, was serving as the master of ceremonies. It was apparent to Gibb that Microsoft was using the event to market not only Windows 95 but also Microsoft's own office productivity applications, which ran on Windows 95. (Gibb, Trial Tr. at 818, Oct. 26, 2011). Gibb's perception of the event reflects that in 1995, Novell was concerned that what Microsoft was attempting to do was to use Windows 95 to increase its share of the applications market, not to maintain its monopoly in the operating systems market.

[7] At the same time, some executives at Microsoft encouraged developers to write for another operating system, OS/2, rather than for Windows. (*See* Peterson, **[*10]** Trial Tr. at 4708, Dec. 7, 2011). Novell relies upon this evidence to infer that Microsoft, in pursuit of monopoly power, was talking from both sides of its mouth.

industry reviews. (*See* Pl.'s Exs. 239 & 241). Frankenberg also saw the need for Novell to market an office productivity suite, and in late December 1994 WordPerfect **[*11]** successfully released a Windows-compatible suite, PerfectOffice 3.0. [8] (Frankenberg, Trial Tr. at 1012, Nov. 7, 2011). Although Frankenberg recognized that Microsoft had "a huge head start" in the suite market, in January of 1994 approximately 74% of users had yet to choose among the available suite products. (*Id.* at 1008-09, 1063; Pl.'s Ex. 412 at 2).

On June 10, 1994, shortly before Novell finalized its purchase of WordPerfect Corporation and Quattro Pro, Microsoft provided independent software vendors ("ISVs"), including WordPerfect, with the Milestone 6 beta version of Windows 95. (*See* Harral, Trial Tr. at 434-35, Oct. 24, 2011). Novell was extremely enthusiastic about Windows 95 when it was released in beta form to ISVs. Frankenberg testified that Windows 95 was a significant step forward and that Novell was "very excited and very interested" in **[*12]** it. (Frankenberg, Trial Tr. at 1225-26, Nov. 8, 2011). He further testified that Novell's business strategy was to "take advantage of the capabilities in Windows 95." (*Id.* at 1226). The testimony of other Novell witnesses was to the same effect. (Harral, Trial Tr. at 253-54, 256-57, Oct. 20, 2011; Richardson, Trial Tr. at 607, Oct. 25, 2011; Gibb, Trial Tr. at 788, Oct. 26, 2011; Noll, Trial Tr. at 1911, Nov. 15, 2011).

On October 3, 1994, Microsoft withdrew support for the part of this beta version making namespace extension application programming interfaces ("APIs") accessible to ISVs. (*See* Pl.'s Ex. 1). Prior to the hearing on the Rule 50 motion, Novell contended that the act of withdrawing support for the namespace extension APIs was itself an unlawful act because beta versions of a release cannot be modified except to fix bugs discovered during the course of the beta process. Novell did not, however, press this argument at the Rule 50 hearing. Its reason for not doing so is clear. Although one Novell software developer, Adam Harral, did so suggest, (Harral, Trial Tr. at 303, Oct. 20, 2011), all of the other evidence was to the contrary. Microsoft's licensing agreement with WordPerfect/Novell **[*13]** provided that the beta version "may be substantially modified prior to first commercial shipment," and that WordPerfect "assume[d] the entire risk with respect to the use of the beta." (Def.'s Ex. 18 at 1 ¶ 2; Def.'s Ex. 19 ¶ 2). Moreover, numerous witnesses, including Frankenberg and other persons who during the relevant time frame had been employed by Novell, testified that they understood the beta versions of Windows 95 "could change" and "might change" prior to commercial release. (Frankenberg, Trial Tr. at 1201, 1204-05, 1209, Nov. 8, 2011; Larsen, Trial Tr. at 3603, 3654-58, Nov. 30, 2011). Novell's expert witnesses likewise agreed with this proposition. (Alepin, Trial Tr. at 1555-56, Nov. 10, 2011; Noll, Trial Tr. at 1878, Nov. 15, 2011).

The parties dispute the reasons that Microsoft decided, on October 3, 1994, to withdraw support for the namespace extension APIs. Microsoft argues it had legitimate "stability" and "robustness" concerns, particularly because, as Novell's own technical expert, Ronald Alepin, conceded, an ISV that wrote a bad program using the namespace extension APIs could cause Windows 95 to crash. (Alepin, Trial Tr. at 1601-02, Nov. 10, 2011; *see* Gates, Trial **[*14]** Tr. at 2781-82, Nov. 21, 2011). Moreover, according to Microsoft, there was an internal debate at Microsoft between the Windows team and another team, working on what was known as the "Cairo Shell," about the design of the namespace extension APIs. (Gates, Trial Tr. at 2792-93, Nov. 21, 2011; Muglia, Trial Tr. at 3385-90, 3397-3400, Nov. 29, 2011; Nakajima, Trial Tr. at 3763-64, 3768-71, Dec. 1, 2011; Belfiore, Trial Tr. at 4269-71, 4278-80, Dec. 5, 2011). Finally, Microsoft contends that the namespace extension APIs did not provide the functionalities Gates had contemplated. (Gates, Trial Tr. at 2786-87, 2800-04, Nov. 21, 2011; Pl.'s Ex. 1).

Novell argues that all of the reasons Microsoft articulated for the October 3, 1994 decision were pretextual, and that, as revealed in an internal email Gates authored, the real reason for withdrawing support for the namespace extension APIs was to provide a competitive advantage to Microsoft's own office productivity suite, Office. (*See* Pl.'s Ex. 1). In the October 3, 1994 email announcing the withdrawal decision, Gates stated: "I have decided that we should not publish these extensions. We should wait until we have a way to do a high level of **[*15]** integration that

[8] PerfectOffice 3.0 did not achieve a sizeable market share. (*See* Noll, Trial Tr. at 1915, Nov. 15, 2011). However, this may well have been due to the fact that many consumers were not buying new applications during 1994 and the first seven months of 1995 because they were awaiting the release of Windows 95 and applications written to it.

will be harder for the likes of Notes [a Lotus product], WordPerfect to achieve, and which will give Office a real advantage." (*Id.*). [9]
