period. Without additional evidence describing the nature and scope of these shipments, the court is unable to conclude that they qualify as systematic, continuous contacts with the United States sufficient to subject Mars Canada to general jurisdiction. See, e.g., *Aaron Ferer & Sons Co. v. Am. Compressed Steel Co., 564 F.2d 1206, 1209 (8th Cir. 1977)* (concluding that two bills of lading documenting shipments into a forum were insufficient to confer jurisdiction over defendant); *NII Brokerage, LLC v. Roadway Express, Inc., No. 07-5125, 2008 U.S. Dist. LEXIS 64784, 2008 WL 2810160, at *5-6 (D.N.J. July 18, 2008)* (same with respect to an unspecified number of bills of lading); cf. *Asarco, Inc. v. Glenara, Ltd., 912 F.2d 784, 787 (5th Cir. 1990)* (declining to exercise general **[**91]** jurisdiction on the basis of forty-seven ports-of-call made by defendant's ships over a four-year period); *Conner v. Bouchard Transp. Co., No. 93-450, 1993 U.S. Dist. LEXIS 13786, 1993 WL 388274, at *3 (E.D. Pa. Sept. 30, 1993)* (refusing to exercise general jurisdiction over a defendant that owned thirty-six vessels that made one hundred ports-of-call in the forum over a five-year period). For example, the record does not indicate whether Mars Canada and Mars Snackfood perform these transfers pursuant to a contract for the sale of goods, as like-kind exchanges, or as accounting conventions for the purpose of relocating assets. Information about the frequency of the transfers, the products involved, and the resulting financial benefit, if any, to Mars Canada is also absent. At present, the record evidence is inadequate to establish that Mars Canada's in-forum activities occur on a systematic and continuous basis.

b. Alter Ego Jurisdiction

HN40[] A court may exercise general jurisdiction over a foreign corporation if it possesses jurisdiction over a parent or subsidiary and the two companies operate de facto as a single, organic entity. **[**92]** The applicability of alter ego jurisdiction depends upon whether

(1) the parent owns all or a significant majority of the subsidiary's stock,
(2) commonality of officers or directors exists between the two corporations,
(3) the corporate family possesses a unified marketing image, including common branding of products,
(4) corporate insignias, trademarks, and logos are uniform across corporate boundaries,
(5) corporate family members share employees,

[*570] (6) the parent has integrated its sales and distribution systems with those of its subsidiaries,
(7) the corporations exchange or share managerial or supervisory personnel,
(8) the subsidiary performs business functions that would ordinarily be handled by a parent corporation,

(9) the parent uses the subsidiary as a marketing division or as an exclusive distributor, and

(10) the parent exercises control or provides instruction to the subsidiary's officers and directors.

See *Simeone, 360 F. Supp. 2d at 675*; see also *Directory Dividends, Inc. v. SBC Commc'ns, Inc., No. 01-CV-1974, 2003 U.S. Dist. LEXIS 12214, 2003 WL 21961448, at *3 (E.D. Pa. July 2, 2003)*; accord *Genesis Bio. Pharms. v. Chiron Corp., 27 F. App'x 94, 98 (3d Cir. 2002)*. No single factor is dispositive, and the **[**93]** court may consider all relevant evidence to determine whether the parent exercises actual control over a subsidiary beyond that which is characteristic of a usual parent-subsidiary relationship. *Directory Dividends, 2003 U.S. Dist. LEXIS 12214, 2003 WL 21961448, at *3* ("The Court 'should examine *all relevant factors* that relate to the intimacy of the relationship between the parent and the subsidiary. . . ." (quoting *Arch v. Am. Tobacco Co., 984 F. Supp. 830, 837 (E.D. Pa. 1997)* (emphasis added))); see also *Action Mfg. Co. v. Simon Wrecking Co., 375 F. Supp. 2d 411, 421 n.13 (E.D. Pa. 2005)* (observing that ***HN41***[] alter ego factors developed in the corporate veil-piercing context, such as gross undercapitalization and extensive parental control, are also relevant to the jurisdictional analysis). [34] ***HN42***[] A

[34] ***HN43***[] Courts evaluate alter egos in the veil-piercing context by reference to factors such **[**94]** as undercapitalization of the subsidiary, "failure to observe corporate formalities, nonpayment of dividends, insolvency of [the] debtor corporation, siphoning of funds from the debtor corporation by the dominant stockholder, nonfunctioning of officers and directors, absence of corporate records, and whether the corporation is merely a facade for the operations of the dominant stockholder." *Action Mfg., 375 F. Supp. 2d at 421-22*; see also *Pearson v. Component Tech. Corp., 247 F.3d 471, 484-85 (3d Cir. 2001)*. These factors also affect the alter ego jurisdictional analysis but do not preclude consideration of other indicia of corporate control. *Action Mfg.,*

plaintiff may invoke alter ego jurisdiction against "nonresident corporations upon a finding that *either* the 'dominant' or 'subservient' corporation does business" within the forum. Directory Dividends, 2003 U.S. Dist. LEXIS 12214, 2003 WL 21961448, at *3 (emphasis added) (quoting Aamco Automatic Transmissions, Inc. v. Tayloe, 368 F. Supp. 1283, 1300 (E.D. Pa. 1973)).

Plaintiffs contend **[**95]** that the court may exercise alter ego jurisdiction over the Rule 12(b)(2) defendants because their respective corporate families operate as integrated conglomerates with a single identity. Defendants' corporate parents own all of the outstanding stock of the subsidiaries, and each corporate family has cultivated a unified global image. Defendants websites, [35] annual reports, and corporate **[*571]** policy statements confirm that each corporate family operates in multi-national markets, promulgates international standards for product quality and employee conduct, and implements global marketing and sales strategies. In addition, Mars Canada and Nestle Canada participate in intra-family product distribution, and one Mars Global employee sits on Mars Canada's board of directors. (Doc. 472, Ex. A PP 10-11, 19; Doc. 479, Ex. B PP 11-12.)

This evidence does not construct a prima facie case of alter ego jurisdiction under the Simeone factors because it fails to demonstrate the corporate parents' actual control over the daily affairs of their subsidiaries. See, e.g., Toys "R" Us, 318 F.3d at 452 (stating that passive websites that provide information but do not solicit business will not confer general jurisdiction over an out-of-forum defendant); Action Mfg., 375 F. Supp. 2d at 423 (concluding that **HN46**[] alter ego jurisdiction does not arise merely because a parent corporation refers to its subsidiaries as corporate divisions). It is unclear whether defendants' subsidiaries develop market-specific plans for growth and product development independent of their parent corporations. The record does not reflect whether supervisory personnel flow freely among members of the corporate families, whether or the extent to which parent corporations control subsidiaries' budgets, or whether parent corporations oversee essential **[**98]** components of subsidiaries' businesses. [36] Alter ego jurisdiction requires evidence of such control. Simeone, 360 F. Supp. 2d at 676-77 (applying alter ego jurisdiction to a case in which the parent corporation supervised the subsidiary's management, possessed the power to fire the subsidiary's managers, controlled the subsidiary's budget, participated in decisions pertaining to the subsidiary's corporate structure, and regularly evaluated the subsidiary's operations against performance benchmarks), Directory Dividends, 2003 U.S. Dist. LEXIS 12214, 2003 WL 21941448, at *4-6

---

375 F. Supp. 2d at 421 n.13 (observing that **HN44**[] "the factors considered in deciding whether to pierce the corporate veil for liability purposes are similar to the factors considered in deciding whether to pierce the corporate veil in the jurisdictional context" but that a court should address "all relevant factors" when resolving questions of jurisdiction); Arch, 984 F. Supp. at 837 ("[The court] should examine all relevant factors that relate to the intimacy of the relationship between the parent and subsidiary.").

[35] Plaintiffs rely upon defendants' websites as a component of their jurisdictional arguments. **HN45**[] A website may support exercise of jurisdiction if the defendant "intentionally interacts with the forum . . . via the web site." Toys "R" Us, 318 F.3d at 452. Websites that passively furnish information do not confer jurisdiction over the defendant, whereas sites that allow **[**96]** users to purchase goods or services generally provide a jurisdictional anchor. Id. A defendant's "conscious choice to conduct business with residents of a forum state" via its website is pivotal to this inquiry. Id. (quoting Zippo Mfg. Co. v. Zippo Dot Com, Inc., 952 F. Supp. 1119, 1126 (W.D. Pa. 1997)). The Rule 12(b)(2) defendants maintain centralized corporate websites that provide basic information about defendants' history, brands, and market development. They inform visitors of the current price of defendants' stock and ADRs, provide links to annual reports and press releases, and allow prospective employees both in the U.S. and abroad to search open positions and submit online applications. None of the websites offers products for sale. None of the websites allows visitors to purchase stock or ADRs online. Although the websites contain information about defendants' activities within the U.S., they are not customized for an American audience, and they treat the U.S. market no differently than other global markets. The court concludes that these websites are properly considered as a contact for purposes of general jurisdiction. However, the court also concludes that they are broad **[**97]** resources designed for an international audience. They do not reflect a particularized intent to conduct business with American residents and therefore receive relatively little weight in the jurisdictional analysis.

[36] Plaintiffs advance alter ego jurisdiction **[**99]** over Cadbury plc and Cadbury Holdings by virtue of alleged control over their American subsidiary, Cadbury Adams USA LLC, which is not a party to this matter. (Doc. 571 at 21-23.) Plaintiffs have identified no case law addressing whether a court may obtain alter ego jurisdiction over a holding company by virtue of its relationship with a non-party subsidiary. The court will defer consideration of this issue until completion of jurisdictional discovery. If plaintiffs wish to pursue this argument, counsel will be expected to address it in supplemental briefing.

(exercising alter ego jurisdiction over a parent of a corporate family that possessed a unified identity, featured numerous overlapping directorates, allowed free exchange of supervisory personnel, and in **[*572]** which the parents' officers established corporate policy for all family members). [37] ***HN47***[] Defendants cannot be subject to alter ego jurisdiction without additional evidence that they have beclouded corporate boundaries and that two or more affiliated entities are de facto one. At this juncture, plaintiffs have not established a prima facie case of personal jurisdiction against the *Rule 12(b)(2)* defendants.

3. Jurisdictional Discovery

HN49[] A plaintiff who fails to establish a prima facie case **[**101]** of personal jurisdiction may request a period of limited discovery for the purpose of obtaining further jurisdictional evidence. "[C]ourts are to assist the plaintiff by allowing jurisdictional discovery unless the plaintiff's claim is 'clearly frivolous.'" *Toys "R" Us, 318 F.3d at 456* (quoting *Mass. Sch. of Law, 107 F.3d at 1042*). Plaintiffs must identify particular facts that demonstrate the likelihood of contacts sufficient to corral defendants within the court's jurisdiction. Id. ***HN50***[] General allegations that defendants transact business within the forum do not entitle plaintiffs to jurisdictional discovery; plaintiffs must produce evidence suggesting that discovery will bear fruit. *Brown v. AST Sports Sci., Inc., No. Civ.A. 02-1682, 2002 U.S. Dist. LEXIS 12294, 2002 WL 32345935, at *10 (E.D. Pa. June 28, 2002)* (citations omitted); see also *Base Metal Trading Ltd. v. OJSC "Novokuznetsky Aluminum Factory", 47 F. App'x 73, 77 (3d Cir. 2000)* (observing that ***HN51***[] jurisdictional discovery is inappropriate if it constitutes a "fishing expedition" to procure evidence in support of the plaintiff's claim). ***HN52***[] A court weighing a jurisdictional discovery request must "accept the plaintiff's allegations as true, and . . . construe **[**102]** disputed facts in favor of plaintiff." *Toys "R" Us, 318 F.3d at 457*. The court should generally permit jurisdictional discovery prior to dismissing a defendant for lack of personal jurisdiction. See *In re Auto. Refinishing Paint Antitrust Litig., No. 1426, 2002 U.S. Dist. LEXIS 15099, 2002 WL 31261330, at *5 (E.D. Pa. July 31, 2002)*; *Molnlycke Health Care AB v. Dumex Med Surgical Prods., 64 F. Supp. 2d 448, 454 (E.D. Pa. 1999)*.

In the instant matter, plaintiffs have adduced sufficient evidence to warrant jurisdictional discovery against the *Rule 12(b)(2)* defendants. Mars Canada and Nestle Canada interacted with the American chocolate candy market by importing **[*573]** products into the United States. Cadbury plc and Cadbury Holdings periodically consult with Hershey Global in the U.S. under the trademark licensing agreements. The nature of Nestle S.A.'s relationship, if any, to the Societe--Hershey trademark licensing agreements is presently unknown. Although Nestle S.A. has engaged in merger activity, it is unclear whether and to what extent it has solicited capital, marketed securities, courted investors, or controlled acquisition subsidiaries in the United States. The present record contains faint silhouettes of these **[**103]** in-forum contacts but lacks a substantive portrait thereof. A period of discovery will enable plaintiffs to develop the lineaments of these relationships with the U.S. market. [38] Plaintiffs have filed a

---

[37] ***HN48***[] Alter ego jurisdiction does not attach merely because a parent corporation participates in its subsidiary's business. In Savin Corp. v. Heritage Copy Products, Inc., a parent corporation appointed six of the subsidiary's directors, five of which were officers or directors of the parent. *661 F. Supp. 463, 469 (M.D. Pa. 1987)*. One of the parent's officers conducted weekly business visits to the subsidiary's premises to oversee the parent's investment in the subsidiary, and the parent covered a portion of the subsidiary's operating costs. *Id. at 470*. The parent also consolidated the subsidiary's earnings in its financial statements **[**100]** (as required by the law of the country of its incorporation) and utilized the subsidiary's office space. *Id. at 471*. Despite this extensive interaction between two corporations, the court declined to assert alter ego jurisdiction. The court observed that the two entities engaged in different lines of business, maintained separate corporate books, did not implement common marketing strategy, and had complied with all legal formalities. Id. Moreover, the plaintiff failed to "convince the court that [the parent corporation] exercised the type of control over [the subsidiary's] day-to-day operations which would evidence an alter-ego relationship." *Id. at 470*.

Plaintiffs in the instant case have identified significantly fewer interactions between Nestle S.A., Mars Global, Cadbury Holdings, and Cadbury plc, and their respective subsidiaries. The annual reports, websites, and corporate value statements offered by plaintiffs do not describe the day-to-day operational relationship that exists among these corporations, and this evidentiary deficiency subverts plaintiffs' arguments in favor of alter ego jurisdiction.

[38] As a non-exclusive guide for 38 counsel, the court suggests exploration of the following issues:

motion for preliminary discovery (Doc. 458) accompanied by several proposed requests for production of documents (Doc. 458, Ex. A). The court will allow plaintiffs to serve these requests [39] and to take limited deposition testimony, [40] after which all parties will **[*574]** submit supplemental briefs on the personal jurisdiction motions. The court will issue a Case Management Order concurrently with this memorandum governing the parameters and deadlines for this period of jurisdictional discovery. [41]

III. Motions to Dismiss for Failure to State a Claim Upon Which Relief Can Be Granted

---

. Do representatives of Hershey Global and Cadbury plc or Cadbury Holdings regularly confer as contemplated in the asset purchase and trademark agreements? If so, what information do they discuss?

. Which party to the Cadbury--Hershey agreements prosecutes and defends trademark infringement actions under the Lanham Act?

. What benefits, if any, does Nestle S.A. receive under the Societe--Hershey trademark **[**104]** license agreement?

. Have the *Rule 12(b)(2)* defendants filed any lawsuit(s) in any court in the United States?

. Do the *Rule 12(b)(2)* defendants transact business in the United States, e.g., by purchasing raw materials, retaining consultants, maintaining sales agents, or recruiting employees?

. Have the *Rule 12(b)(2)* defendants executed service contracts with U.S. companies, e.g., for shipment of their products, design or manufacture of machinery, or development of promotional materials?

. Did the *Rule 12(b)(2)* defendants increase or reduce the volume of products shipped into the United States during the putative class period. If so, what were the reasons for the change?

. What form of compensation do Mars Canada and Nestle Canada receive from the transfer of their products to Mars Snackfood and Nestle U.S.A.? Are the transfers booked as direct sales or in some other fashion?

. Does Nestle S.A. market securities, solicit capital, or entice investors in the United States in furtherance of its merger activity?

. Does Mars Canada possess autonomy to determine to whom it sells its products, i.e., does Mars Canada sell its products to non-Mars entities?

. Do Mars Canada and Nestle Canada exercise **[**105]** independent control over their marketing, sales, and distribution systems, or are they required to utilize systems that interconnect with other members of their corporate families?

The court emphasizes that these issues are only illustrative of those to which the court will turn when resolving the jurisdictional challenges. Plaintiffs may pursue additional areas of inquiry insofar as it elucidates the *Rule 12(b)(2)* defendants' contacts with the United States.

[39] *As currently worded*, several 39 of plaintiffs' requests exceed the scope of the jurisdictional issues implicated by the *Rule 12(b)(2)* motions. For example, Request No. 4 (pertaining to corporate officers' responsibilities), Request No. 7 (pertaining to sales data), Request No. 8 (pertaining to pricing letters and announcements), and Request No. 11 (pertaining to per-unit manufacturing and distribution costs) likely solicit information beyond the realm of personal jurisdiction. The court expects that the parties will meet and confer to tailor all jurisdictional discovery to the issues raised in this memorandum.

[40] The court will not impose specific limits on the aggregate number of depositions on jurisdictional issues. However, the **[**106]** court suggests that the parties attempt to address these issues predominantly through written discovery. Absent compelling circumstances, the court suggests a limit of two depositions per defendant.

[41] Defendant-intervenor Government of Canada initially opposed certain of these requests. (See Doc. 495 at 9-13.) All parties affected by the requested documents successfully negotiated a resolution of defendant-intervenor's objections and submitted a proposed order memorializing their agreement via facsimile on December 12, 2008. The court will incorporate this joint resolution into the Case Management Order that will govern jurisdictional discovery.

All defendants have moved to dismiss the amended complaints for failure to plead an antitrust claim. The court will defer the Rule 12(b)(2) defendants' challenges to the sufficiency of the complaints until it has resolved matters of personal jurisdiction. Hence, the following discussion of the Rule 12(b)(6) motions applies only to those defendants that do not contest personal jurisdiction. [42]

A. Standard of Review Applicable to Motions under Rule 12(b)(6)

HN53[] Rule 12(b)(6) of the Federal Rules of Civil Procedure provides for the dismissal of complaints that fail to state a claim upon which relief can be granted. FED. R. CIV. P. 12(b)(6). HN54[] When ruling on a motion to dismiss under Rule 12(b)(6), the court must "accept as true all [factual] allegations in the complaint and all reasonable inferences that can be drawn therefrom, and view them in the light most favorable to the plaintiff." Kanter v. Barella, 489 F.3d 170, 177 (3d Cir. 2007) (quoting Evancho v. Fisher, 423 F.3d 347, 350 (3d Cir. 2005)). Although the court is generally limited in its review to the facts in the complaint, it "may also consider matters of public record, orders, exhibits attached to the complaint and items appearing in the record of the case." Oshiver v. Levin, Fishbein, Sedran & Berman, 38 F.3d 1380, 1384 n. 2 (3d Cir. 1994); see also In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1426 (3d Cir. 1997).

HN55[] Federal notice and pleading rules require the complaint to "give the defendant notice of what the . . . claim is and the grounds upon which it rests." **[**108]** Sershen v. Cholish, No. 3:07-CV-1011, 2007 U.S. Dist. LEXIS 79627, 2007 WL 3146357, at *4 (M.D. Pa. Oct. 26, 2007) (quoting Erickson v. Pardus, 551 U.S. 89, 127 S. Ct. 2197, 2200, 167 L. Ed. 2d 1081 (2007)). The plaintiff must present facts that, if true, demonstrate a plausible right to relief. See FED. R. CIV. P. 8(a) (stating that the complaint should include "a short and plain statement of the claim showing that the pleader is entitled to relief"); Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 1965, 167 L. Ed. 2d 929 (2007) (requiring plaintiffs to allege facts sufficient to "raise a right to relief above the speculative level"); Victaulic Co. v. Tieman, 499 F.3d 227, 234 (3d Cir. 2007). Thus, HN56[] courts should not dismiss a complaint for failure to state a claim if it contains "enough factual matter (taken as true) to suggest the required element. This does not impose a probability requirement at the pleading stage, but instead simply calls for enough facts to raise a reasonable expectation that discovery will reveal evidence of the necessary element." Phillips v. County of Allegheny, 515 F.3d 224, 234 [*575] (3d Cir. 2008) (quoting Twombly, 550 U.S. at 556, 127 S. Ct. at 1965). Under this liberal pleading standard, courts should generally **[**109]** grant plaintiffs leave to amend their claims before dismissing a complaint that is merely deficient. See Grayson v. Mayview State Hosp., 293 F.3d 103, 108 (3d Cir. 2002); Shane v. Fauver, 213 F.3d 113, 116-17 (3d Cir. 2000).

B. Discussion

Defendants move to dismiss the amended complaints for failure to plead facts raising a plausible right to relief according to the standard set forth in the recent Supreme Court decision of Bell Atlantic Co. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007). In addition to the Twombly challenge, defendants asseverate that certain state law claims are not cognizable as a matter of substantive law. The court will address the Twombly defense before turning to state law issues.

1. Sherman Act Claims

HN57[] Section 1 of the Sherman Act proscribes "contract[s], combination[s] . . . or conspirac[ies], in restraint of trade or commerce." 15 U.S.C. § 1. A § 1 claim requires the plaintiff to demonstrate that the defendants engaged in unlawful, concerted activity that both produced anticompetitive effects in the relevant market and resulted in harm to the plaintiff. Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 760-61, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984); Petruzzi's IGA Supermarkets, Inc. v. Darling-Del. Co., 998 F.2d 1224, 1232 (3d Cir. 1993); **[**110]** In re Pressure Sensitive Labelstock Antitrust Litig. (Labelstock I), 356 F. Supp. 2d 484, 489 (M.D. Pa. 2005). HN58[] The existence of an agreement is an essential component of any § 1 claim. In re Flat Glass Antitrust Litig., 385 F.3d

[42] These defendants 42 are Cadbury Canada, Hershey Global, Hershey Canada, **[**107]** Mars Global, Mars Snackfood, and Nestle U.S.A.

350, 356 (3d Cir. 2004). A plaintiff must establish that the defendants possessed a "conscious commitment" to a common scheme contrived for the purpose of advancing an unlawful objective such as fixing prices. Monsanto, 465 U.S. at 764.

HN59[] At the pleading stage, plaintiff's complaint must aver facts creating a plausible inference that defendants entered an agreement to restrain trade. Twombly, 550 U.S. at 555, 127 S. Ct. at 1965. The plaintiff must "raise a reasonable expectation that discovery will reveal evidence of illegal agreement." Id.; Phillips, 515 F.3d at 232. Specifically, HN60[] sufficiency of a complaint depends upon the particular facts alleged and the context in which they appear. The complaint must, when evaluated macroscopically, raise a plausible right to relief and notify the defendants of the ground from which it arises. Twombly, 550 U.S. at 553, 127 S. Ct. at 1964; Phillips, 515 F.3d at 232; see also FED. R. CIV. P. 8(a).

HN61[] Mere averments of parallel **[**111]** conduct by the defendants are inadequate to state a § 1 claim because such action may reflect either an anticompetitive agreement or independent, competitive activity. See Twombly, 550 U.S. at 556, 127 S. Ct. at 1966; In re OSB Antitrust Litig., No. 06-826, 2007 U.S. Dist. LEXIS 56573, 2007 WL 2253419, at *2 (E.D. Pa. Aug. 3, 2007). Rather, the plaintiff must allege a factual framework sufficient to "nudge[] th[e] claims across the line from conceivable to plausible." Twombly, 550 U.S. at 570, 127 S. Ct. at 1974; Behrend v. Comcast Corp., 532 F. Supp. 2d 735, 741 (E.D. Pa. 2007) (characterizing a Twombly complaint's primary deficiency as a lack of facts sufficient to raise an inference of collusive activity).

Any plaintiff may raise this inference of plausibility through allegations that contextually suggest an anticompetitive agreement. In re Flat Glass Antitrust Litigation delineates HN62[] various market **[*576]** characteristics that raise an inference of plausibility when juxtaposed with parallel conduct. See In re Pressure Sensitive Labelstock Antitrust Litig. (Labelstock II), 566 F. Supp. 2d 363, 371 (M.D. Pa. 2008).[43] For example, a plaintiff may aver that the relevant market is ripe for collusion due to the presence of oligarchic **[**112]** sellers, diffuse buyers, prohibitive entry barriers, and standardized products. See Flat Glass, 385 F.3d at 361; In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d 1109, 1115-16 (N.D. Cal. 2008); In re Static Random Access Memory (SRAM) Antitrust Litig., 580 F. Supp. 2d 896, 901 (N.D. Cal. 2008). Allegations that demand is in decline, that the market features high fixed costs, or that competitors possess excess capacity may also implicate an agreement when joined with averments of anticompetitive or parallel conduct. See Flat Glass, 385 F.3d at 361-62; Labelstock II, 566 F. Supp. 2d at 372-73 & n.8; OSB, 2007 U.S. Dist. LEXIS 56573, 2007 WL 2253419, at *3-4. The court should also consider whether the alleged collusion makes economic sense. Petruzzi's Supermarkets, 998 F.2d at 1232 (expressing skepticism of alleged conspiracies that have no economic justification from the defendant's perspective); Labelstock I, 356 F. Supp. 2d at 493 & n.8.

In the case *sub judice*, plaintiffs have alleged that defendants engaged in three coordinated price increases between 2002 and 2007. Each installment featured uniform increases in prices for defendants' standard-size chocolate bars and nearly congruent escalations for other products. The amended complaints depict a mature chocolate market featuring dispersed buyers and concentrated sellers. Strong entry barriers surround the market in the form of high fixed costs, extensive expenditures associated with launching new products, and a steep curve in the acquisition of technical expertise. During the putative class period, the costs of energy and of defendants' key raw materials remained stable as a result of placid supply markets and the strategic hedge of futures contracts. In addition, defendants purportedly faced waning demand as a result of consumer trends favoring healthier snack options. The complaints depict a prototypical market susceptible to conspiratorial price-fixing. **[**114]** In re Flat Glass, 385 F.3d at 361.

---

[43] Although Flat Glass was decided in a summary judgment posture, this court has previously concluded that its circumstantial analysis of anticompetitive conduct is relevant to the plausibility analysis under Twombly. See Labelstock II, 566 F. Supp. 2d at 372-73 (HN63[] "[A]llegations **[**113]** of observed conduct--actual forbearance from competition for customers, parallel price increases, and excess production capacity--are placed among other factual allegations that plausibly suggest a preceding agreement.").

Defendants' alleged conduct in Canada enhances the plausibility of the alleged U.S. price-fixing conspiracy. [44] **[*577]** Both the U.S. and Canadian markets are structured in a similar manner, the Canadian defendants allegedly transport chocolate candy into the U.S., and defendants have developed integrated distribution systems that service both markets. [45] The Canadian defendants exchanged numerous pricing communications and raised Canadian prices concurrently with uniform price increases in the United States. Hershey Global facilitated communications among the Canadian defendants by providing Nestle Canada's Leonidas with contact information for Hershey Canada's Lent. The operational and structural similarities between the American and Canadian markets lend plausibility to plaintiffs' allegations of conspiratorial pricing agreements in the U.S. Moreover, defendants had ample opportunity to consult with one another about the U.S. and Canadian price increases. Sherman Act notwithstanding, the alleged anticompetitive activity also makes economic sense. In a saturated, declining market, defendants faced stagnant or decreasing demand with limited capacity for market **[**115]** growth. Plaintiffs' contention that defendants sought to increase revenue through non-competitive means is a plausible reaction to harsh market realities. The alleged price-fixing agreement would increase profits without branding and marketing expenditures, which are essential to capturing a competitor's market share. Therefore, it represents an economically sensible course of action.

These allegations satisfy *Twombly's* pleading standard. The motion to dismiss (Doc. 476) the Sherman Act claims under *Rule 12(b)(6)* will be denied with respect **[**117]** to defendants that have not filed a *Rule 12(b)(2)* motion. [46]

---

[44] ***HN64***[] The Foreign 44 Trade Antitrust Improvement Act of 1982 ("FTAIA"), *15 U.S.C. § 6a*, does not foreclose consideration of defendants' conduct in Canada for purposes of the *Rule 12(b)(6)* motions. The FTAIA places foreign anticompetitive conduct beyond the reach of the Sherman Act if it "adversely affect[s] *only* foreign markets." *F. Hoffmann-La Roche Ltd. v. Empagran S.A., 542 U.S. 155, 161, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)* (emphasis added). It does preclude a Sherman Act claim based upon foreign conduct that has a "direct, substantial, and reasonably foreseeable effect" on domestic commerce. *Id. at 161* (quoting *15 U.S.C. § 6a(1)*); *Advanced Micro Devices, Inc. v. Intel Corp. (In re Intel Corp. Microprocessor Antitrust Litig.), No. Civ.A. 05-1717, 2007 U.S. Dist. LEXIS 3407, 2007 WL 137152, at *11 (D. Del. Jan. 12, 2007)* (observing that the FTAIA does not prohibit inquiry into foreign conduct that is relevant **[**116]** to domestic claims.) Hence, the Act permits assessment of the Canadian conduct, which allegedly constitutes an integral component of the instant price-fixing scheme. See *Intel Corp., 2007 U.S. Dist. LEXIS 3407, 2007 WL 137152, at *11*; cf. *In re Aspartame Antitrust Litig., No. 2:06-CV-1732, 2008 U.S. Dist. LEXIS 109670, 2008 WL 2275531, at *3 (E.D. Pa. May 13, 2008)* (concluding that the FTAIA does not limit discovery requests directed abroad if they are related to an antitrust matter properly before a federal court).

[45] Of course, defendants contest the connectivity between the U.S. and Canadian chocolate confectionary markets and have produced evidence that the Canadian defendants do not interact with the U.S. See supra p. 23. ***HN65***[] Unlike *Rule 12(b)(2)* challenges, however, a *Rule 12(b)(6)* motion restricts the court's review to the face of the complaint and documents upon which it relies. See supra note 18; Part III.A. Accordingly, the court has considered only the facts contained in the amended complaints for purposes of the instant motions notwithstanding defendants evidence to the contrary.

[46] *In re Elevator Antitrust Litigation, 502 F.3d 47 (2d Cir. 2007)*, does not compel a contrary conclusion. The plaintiffs in Elevator alleged a price-fixing conspiracy in the U.S. market for elevators based upon evidence that defendants fixed prices in European markets. *Id. at 51-52*. As to the American market, plaintiffs advanced only conclusory allegations that defendants "(a) [p]articipated in meetings in the United States and Europe to discuss pricing and market divisions; (b) [a]greed to fix prices for elevators and services; (c) [r]igged bids for sales and maintenance; (d) [e]xchanged price quotes; (e) [a]llocated markets for sales and maintenance; (f) [c]ollusively required customers to enter long-term maintenance contracts; and (g) [c]ollectively took actions to drive independent repair companies out of business." *Id. at 51 n.5*. (internal quotation omitted). The court upheld dismissal of the plaintiff's allegations because "[a]llegations of anticompetitive wrongdoing in Europe--*absent any evidence of linkage between such foreign conduct and conduct here*--is merely to suggest . . . that if it happened there, it could **[**118]** have happened here." *Id. at 52* (emphasis added, internal quotation omitted). The court noted that the outcome may have differed had the plaintiffs alleged that the defendants engaged in global marketing, produced fungible products, monitored prices in other markets, or raised prices successfully in the United States. Id.

The instant complaints do not suffer from the same Twombly infirmities. They assert that defendants instituted three contemporaneous and nearly identical price increases and monitored pricing in both the United States and Canada. They describe a market ripe for collusion, punctuated by declining demand and product saturation. They also detail significant

[*578] 2. State Law Claims

Plaintiffs representing the putative subclasses of indirect end users (hereinafter "the IEU plaintiffs") and indirect purchasers for resale **[**119]** (hereinafter "the IPR plaintiffs") collectively advance claims under the antitrust and consumer protection statutes of twenty-five states and the District of Columbia. [47] These plaintiffs also advance common law claims for unjust enrichment. Defendants move to dismiss certain of these claims on the grounds that plaintiffs lack standing and that plaintiffs have failed to allege facts demonstrating a plausible right to relief. [48] The court will address these claims *seriatim*.

a. Standing to Assert Claims under the Statutes of States Where No Named Plaintiff Resides

Defendants move to dismiss the IEU and IPR plaintiffs' claims under the statutes of states **[**121]** in which no putative class representative either resides or does business. Defendants contend that the named plaintiffs lack Article III standing to assert state law claims when they suffered no antitrust injury within these states. [49]

[*579] A plaintiff possesses standing under Article III if the plaintiff has suffered an "injury in fact--an invasion of a legally protected interest which is (a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical." *Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)* (citations and internal **[**122]** quotations omitted). In the class action context, standing requires that the named plaintiff's injury be typical of the class members he or she seeks to represent. See *FED. R. CIV. P. 23(a)(3)*; *In re Warfarin Sodium Antitrust Litig., 212 F.R.D. 231, 246 (D. Del. 2002)*. "[A] plaintiff who lacks the personalized, redressable injury required for standing to assert claims on his own behalf would also lack standing to assert similar claims on behalf of a class." *Holmes v. Pension Plan of Bethlehem Steel Corp., 213 F.3d 124, 135 (3d Cir. 2000)*.

HN66[] Courts generally address challenges to standing as threshold matters. *Warth v. Seldin, 422 U.S. 490, 517-18, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)*; *Pa. Prison Soc'y v. Cortes, 508 F.3d 156, 158 (3d Cir. 2007)*. In

---

interaction between similarly structured markets the U.S. and Canada, where authorities have identified strong evidence of price fixing. These allegations are sufficient to "nudge [plaintiffs'] claims across the line from conceivable to plausible," and render *Elevator* inapposite to defendants' motions. *Id. at 52* (quoting *Twombly, 550 U.S. at 570, 127 S. Ct. 1974*).

[47] The IEU plaintiffs advance antitrust claims under the laws of the following states: Arizona, California, the District of Columbia, Iowa, Kansas, Maine, Michigan, Minnesota, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, South Dakota, Tennessee, Vermont, West Virginia, and Wisconsin. (Doc. 420 PP 136-156.) They also allege claims under the following state consumer protection statutes: Arkansas, California, the District of Columbia, Florida, Kansas, Maine, Massachusetts, Nebraska, Nevada, New Mexico, New York, North Carolina, New Hampshire, Rhode Island, Vermont, and Wisconsin. (Id. PP 161-176.) The IPR plaintiffs maintain antitrust claims under the laws of Alabama, Arkansas, California, the District of Columbia, Florida, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, Tennessee, Vermont, West Virginia, and Wisconsin. (Doc. 422 P 102.)

The **[**120]** IEU and IPR plaintiffs have withdrawn their claims under the antitrust statutes of Hawaii, *HAW. REV. STAT. §§ 480-1 to -24*, and New York, *N.Y. GEN. BUS. LAW §§ 340-47*. (Doc. 525 at 22 n.24; Doc. 526 at 1 nn.1-2.) The IEU plaintiffs have likewise withdrawn their claim under New Jersey law, *N.J. STAT ANN. §§ 56:9-1 to -19*, as have the IPR plaintiffs with respect to their claims under Illinois law, *740 ILL. COMP. STAT. §§ 10/1-/12*. (Id.) The court is cognizant of defendants' request for dismissal "with prejudice," (Doc. 540 at 3), but declines to foreclose reassertion of these claims given the vast potential for changes in the litigation landscape. Hence, the court will deny the motion to dismiss (Doc. 469) these claims as moot.

[48] Defendants request dismissal of the state antitrust claims on the same basis that they seek dismissal of the Sherman Act claim, which constitutes a prerequisite to liability under state law. The court's ruling with respect to Twombly renders this argument moot. See supra Part III.B.1.

[49] The putative class of IPR plaintiffs 49 currently possesses one named plaintiff that does business in Kansas. Defendants seek dismissal on standing grounds of all of the IPR plaintiffs' claims except those brought under Kansas law. The IPR plaintiffs propose to resolve defendants' objection by filing a second amended complaint that (1) describes the named plaintiff's business activities in Iowa and Nebraska and (2) adds parties from each of the other states whose law the IPR plaintiffs invoke. The court will permit the IPR plaintiffs to pursue a second amended complaint in accordance with the order accompanying this memorandum.

class actions, however, the Supreme Court has crafted an exception to this general rule: Courts may evaluate class certification issues before Article III standing concerns if the former are "logically antecedent" to the latter. *Ortiz v. Fibreboard Corp., 527 U.S. 815, 831, 119 S. Ct. 2295, 144 L. Ed. 2d 715 (1999)* (quoting *Amchem Prods. v. Windsor, 521 U.S. 591, 612, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997))*. Neither the Supreme Court nor the Third Circuit has described the precise circumstances under which class certification logically takes **[**123]** precedence over standing. However, our sister court for the District of New Jersey has considered it on several occasions and concluded that

> ***HN67***[] [t]he Ortiz exception appears "to rest on the long-standing rule that, once a class is properly certified, statutory and Article III standing requirements must be assessed with reference to the class as a whole, not simply with reference to the individual named plaintiffs." *Payton v. County of Kane, 308 F.3d 673, 680 (7th Cir. 2002)*. Accordingly, *Rule 23* certification should be addressed first in those cases where it is the possibility of class certification that gives rise to the jurisdictional issue as to standing. See *Ford v. NYLCare Health Plans of Gulf Coast, Inc., 301 F.3d 329, 333 n.2 (5th Cir. 2002)*. Stated differently, *the Ortiz exception treating class certification as the antecedent consideration does not apply if the standing issue would exist regardless of whether the named plaintiff filed his claim alone or as part of a class*. See id.

Clark v. McDonald's Corp., 213 F.R.D. 198, 204 (D.N.J. 2003) (emphasis added). As interpreted by ***HN68***[] Clark, Ortiz allows a court to defer ruling on Article III standing issues when they are circumscribed **[**124]** by the act of certifying a class. Id.; see also *Sheet Metal Workers' Nat'l Health Fund v. Amgen, Inc., No. Civ.A. 07-5395, 2008 U.S. Dist. LEXIS 62181, 2008 WL 3833577, at *9 (D.N.J. Aug. 13, 2008)*; *In re Buspirone Patent Litig., 185 F. Supp. 2d 363, 377 (S.D.N.Y. 2002)*.

In the instant matter, the plaintiffs' capacity to represent individuals from other states depends upon obtaining class certification, and the standing issue would not exist but for their assertion of state law antitrust claims on behalf of class members in these states. See *Jabo's Pharm., Inc. v. Becton Dickinson & Co. (In re Hypodermic Prods. Antitrust Litig.), MDL No. 1730, 2007 U.S. Dist. LEXIS 47438, 2007 WL 1959225, at *15 (D.N.J. June 29, 2007)*. Therefore, the standing issues arise from the plaintiffs' attempts to represent the proposed class. Id. These class certification issues are "logically antecedent" to the standing concerns, and the court will defer ruling on the latter **[*580]** until class certification proceedings. *Ortiz, 527 U.S. at 831*; see also *Sheet Metal, 2008 U.S. Dist. LEXIS 62181, 2008 WL 3833577, at *9*; *Hypodermic Prods., 2007 U.S. Dist. LEXIS 47438, 2007 WL 1959225, at *15*; *Clark, 213 F.R.D. at 204-05*.

b. Claims under State Antitrust Statutes

Defendants move to dismiss the IPR and IEU plaintiffs' claims under the statutory and common law of New York. They also request **[**125]** dismissal of the IPR and IEU plaintiffs' claims under the antitrust statutes of Nevada, South Dakota, Tennessee, West Virginia, and Wisconsin. [50], [51] The court will address each of the state law claims respectively.

i. New York

---

[50] Defendants also challenge 50 the IPR plaintiffs' claims under these state statutes and under Alabama and Mississippi law. The IPR plaintiffs have not responded to defendants' challenge to their state antitrust claims. This omission appears to be an oversight resulting from the IPR plaintiffs' anticipation of a second amended complaint naming additional parties to cure the alleged standing defects. See supra Part III.B.2.a. Defendants' motion to dismiss the claims under Alabama and Mississippi antitrust statutes will be denied without prejudice to their right to renew the motion after the IPR plaintiffs have filed a second amended complaint. See supra note 49.

[51] Defendants move to dismiss claims brought by the IEU plaintiffs under the monopolization statutes of the District of Columbia, Michigan, and Minnesota. The IEU plaintiffs respond that their amended complaint erroneously cited these statutes. The motion will therefore be granted with respect to the monopolization **[**126]** claims, and the IEU plaintiffs may file a motion for leave to amend their complaint to rectify this deficiency.

Defendants move to dismiss the IPR plaintiffs' claim under New York's Donnelly Act, *N.Y. GEN. BUS. LAW § 340(6)*, and the IEU plaintiffs' claim for restraint of trade under New York common law. [52] ***HN69***[] New York law prohibits a plaintiff from maintaining a class action under any statutory claim that imposes a penalty or minimum recovery. *N.Y. C.P.L.R. 901(b)*. The Donnelly Act imposes such penalties and cannot be advanced on behalf of a class. *N.Y. GEN. BUS. LAW § 340(5)* (providing for treble damages); *Sperry v. Crompton Corp., 8 N.Y.3d 204, 863 N.E.2d 1012, 1017, 831 N.Y.S.2d 760 (N.Y. 2007)*. The Donnelly Act claim will be dismissed. Leave to amend will be denied as futile. *Grayson, 293 F.3d at 108*.

The IEU plaintiffs purport to assert a claim under the New York common law of restraint of trade. Plaintiffs have not identified any New York precedent supporting such a claim, i.e., independent of a statutory cause of action, and the court has found none. At least one New York **[**127]** district court has dismissed a similar claim for failure to "identify the distinct common law against restraints of trade" under which the plaintiffs wished to proceed. See *In re Digital Music Antitrust Litig., 592 F. Supp. 2d 435, 2008 U.S. Dist. LEXIS 79764, 2008 WL 4531821, at *9 n.18 (S.D.N.Y. Oct. 9, 2008)*. The court will therefore dismiss the IEU plaintiffs' claim for restraint of trade under the common law of New York. Plaintiffs may pursue this claim in a second amended complaint upon a clear showing that it is cognizable under New York law.

ii. Interstate Conduct as a Basis for Claims under State Law

Defendants seek dismissal of the IEU and IPR plaintiffs' claims under the antitrust statutes of Nevada, South Dakota, Tennessee, West Virginia, and Wisconsin on the ground that these statutes apply only to intrastate commerce.

[*581] I. Nevada

HN70[] The Nevada Unfair Trade Practices Act ("NUTPA") proscribes anticompetitive conduct including price fixing and renders it "unlawful to conduct *any part* of any such activity" within the state. *NEV. REV. STAT. § 598A.060(1)* (emphasis added). Hence, the statute creates a remedy against an interstate conspiracy that produces harm in Nevada. See *In re Intel Corp. Microprocessor Antitrust Litig., 496 F. Supp. 2d 404, 413-14 (D. Del. 2007)*; **[**128]** *In re New Motor Vehicles Canadian Export Antitrust Litig. (NMV), 350 F. Supp. 2d 160, 171-172 (D. Me. 2004)*. In the instant matter, the IEU and IPR plaintiffs allege that the defendants engaged in a national price-fixing conspiracy that resulted in price increases in Nevada and elsewhere. The complaints therefore state a claim under the NUTPA.

II. South Dakota

The South Dakota antitrust statute states that ***HN71***[] "[a] contract, combination, or conspiracy between two or more persons in restraint of trade or commerce any part of which is within this state is unlawful." *S.D. CODIFIED LAWS § 37-1-3.1*. ***HN72***[] "The statutory language is ambiguous as to whether it is a part of the conspiracy or a part of the trade or commerce that must be within the state." *NMV, 350 F. Supp. 2d at 172*; see also *Intel Corp., 496 F. Supp. 2d at 414*. Courts have resolved this ambiguity by adopting the latter statutory interpretation. *Intel Corp., 496 F. Supp. 2d at 414*; *NMV, 350 F. Supp. 2d at 172*. Therefore, a plaintiff must allege only that defendant's conduct produced anticompetitive effects within South Dakota. *NMV, 350 F. Supp. 2d at 172*. Here, plaintiffs state a claim under South Dakota law by alleging a national conspiracy **[**129]** that produced increased prices in South Dakota. [53]

---

[52] The IEU plaintiffs also advance a claim under *N.Y. GEN. BUS. LAW § 349*, which is not affected by the motion to dismiss (Doc. 469).

[53] *In re Dynamic Random Access Memory (DRAM) Antitrust Litigation (DRAM I), 516 F. Supp. 2d 1072 (N.D. Cal. 2007)* is factually distinguishable. DRAM I dismissed a South Dakota claim because the plaintiffs alleged merely "that defendants'

III. Tennessee

HN73[] The Tennessee Trade Practices Act ("TTPA") forbids "[a]ll arrangements . . . which tend to lessen[] full and free competition in the importation **[**130]** or sale of articles imported into this state . . . or which tend to advance, reduce, or control the price . . . of any such product or article . . . ." *TENN. CODE ANN. § 47-25-101*. "[S]ubstantial effects" of the defendant's allegedly anticompetitive conduct must be felt within the state. See *Freeman Indus. v. Eastman Chem. Co., 172 S.W.3d 512, 523 (Tenn. 2005)*. HN74[] The TTPA creates a claim against all "anticompetitive conduct that decreases competition in or increases the price of goods paid by consumers in Tennessee" regardless of whether the goods arrive in consumers' homes exclusively through intrastate means. *NMV, 350 F. Supp. 2d at 173* (quoting *Sherwood v. Microsoft Corp., No. M2000-01850-COA-R9CV, 2003 Tenn. App. LEXIS 539, 2003 WL 21780975, at *16 (Tenn. Ct. App. July 31, 2003))*. [54] In the context **[*582]** of Tennessee law, plaintiffs' allegations of a vast price-fixing conspiracy clearly articulate a viable state claim.

IV. West Virginia

HN75[] The West Virginia Antitrust Act ("WVAA") outlaws "conspirac[ies] in restraint of trade or commerce in this State." *W. VA. CODE § 47-18-3(a)*. Substantive provisions of the WVAA must be interpreted consistently with federal law, [55] *Kessel v. Monongalia County Gen. Hosp., 220 W. Va. 602, 648 S.E.2d 366, 381 (W. Va. 2007)* (applying per se antitrust rules and instructing courts to "harmonize" the WVAA with federal antitrust statutes), and federal courts have recognized that the Act applies to all anticompetitive conduct that produces in-state effects. *Intel Corp., 496 F. Supp. 2d at 414*; **[**132]** *NMV, 350 F. Supp. 2d at 175*; accord Buscher v. Abbott Labs., No. 94-C-755, slip op. at 2 (W. Va. Cir. Ct. Kanawha County Jan. 27, 1994) (HN76[] "[T]he Antitrust Act prohibits a conspiracy that restrains West Virginia trade or commerce, regardless of the locus of the conspiracy."). Accordingly, plaintiffs may advance a WVAA action.

V. Wisconsin

HN78[] Like other states, Wisconsin prohibits antitrust conspiracies "in restraint of trade or commerce." *WIS. STAT. § 133.03(1)*. A plaintiff may bring an antitrust claim arising from conduct outside the state's borders if it "'substantially affects' the people of Wisconsin and has impacts in th[e] state." *Meyers v. Bayer AG, 2007 WI 99, 303 Wis. 2d 295, 735 N.W.2d 448, 451 (Wis. 2007)* (quoting *Olstad v. Microsoft Corp., 2005 WI 121, 284 Wis. 2d*

---

activities had 'a substantial effect on the foreign and interstate commerce'" without describing the effects within South Dakota. *Id. at 1099*. In the instant matter, however, the IPR and IEU plaintiffs allege that defendants' sold products in South Dakota, (Doc. 420 PP 49-63, 76; 422 PP 9-23), that they suppressed competition in the Indirect Purchaser States, which include South Dakota, (Doc. 420 P 157; Doc. 422 P 107.a), and that they maintained prices at "noncompetitive levels throughout the United States and *in the Indirect Purchaser States*." (Doc. 422 P 107.b (emphasis added); see also Doc. 420 P 157). Plaintiffs have therefore alleged anticompetitive effects in South Dakota, and DRAM I does not require dismissal of the amended complaints.

[54] Defendants rely upon *Medison America, Inc. v. Preferred Medical Systems, 548 F. Supp. 2d 567 (W.D. Tenn. 2007)* for the proposition that "[b]are allegations that prices were raised as a result of conduct is insufficient to establish that Tennessee commerce was substantially affected." *Id. at 585*. **[**131]** In Medison America, plaintiff alleged that defendants made disparaging statements about plaintiff's financial stability and customer service, which reduced competition for plaintiff's products. Id. However, *Medison America* did not involve price fixing or Sherman Act claims, and plaintiff failed to establish that defendants engaged in any anticompetitive conduct that raised prices in Tennessee. Id. In contrast, the IEU and IPR plaintiffs have alleged price-maintenance conduct that elevated the cost of chocolate products in Tennessee and nationwide. See supra Part III.B.1. Plaintiffs' alleged injury is therefore cognizable under the TTPA.

[55] HN77[] Although West Virginia looks to federal law when interpreting the WVAA, the prohibition against indirect purchaser recovery announced in Illinois Brick does not apply to claims under the WVAA. See *California v. Infineon Techs. AG, 531 F. Supp. 2d 1124, 1154 (N.D. Cal. 2007)*; *DRAM I, 516 F. Supp. 2d at 1097*; *NMV, 350 F. Supp. 2d at 173-75*.

224, 700 N.W.2d 139, 158 (Wis. 2005)). The IEU and IPR plaintiffs' allegations of a national price-fixing conspiracy adequately state a claim **[**133]** under this statute.

c. Sufficiency of Plaintiffs' Claims under State Consumer Protection Statutes

Defendants seek to dismiss the IEU plaintiffs' claims under the consumer protection laws of Arkansas, the District of Columbia, Kansas, Maine, New Mexico, and Rhode Island. [56]

[*583] i. Arkansas

HN80[] The Arkansas Deceptive Trade Practices Act ("ADTPA") prohibits any "unconscionable" trade conduct as well as "false[] **[**134]** or deceptive act[s] or practice[s] in business commerce or trade." *ARK. CODE ANN. § 4-88-107(a)(10)*. The Act does not define the extent of "unconscionable" conduct; however, the Supreme Court of Arkansas has concluded that use of "the word[] . . . 'unconscionable' . . . illustrates that a liberal construction of the [A]DTPA is appropriate." *State ex rel Bryant v. R & A Inv. Co., 336 Ark. 289, 985 S.W.2d 299, 302 (Ark. 1999)* (rejecting argument that the unconscionability provision of the ADTPA rendered the statute too broad to be enforced). [57] ***HN81***[] The statute reaches any action that "show[s] no regard for conscience[,] affronting the sense of justice, decency, or reasonableness." *NMV, 350 F. Supp. 2d at 178* (quoting BLACK'S LAW DICTIONARY 1561 (8th ed. 2004); see also *In re Dynamic Random Access Memory (DRAM) Antitrust Litig. (DRAM I), 516 F. Supp. 2d 1072, 1109 (N.D. Cal. 2007)* (adopting NMV's construction of the ADTPA). Hence, courts have concluded that claims of price fixing are cognizable under the Act. *DRAM I, 516 F. Supp. 2d at 1109* (permitting indirect purchaser claims to proceed under the ADTPA in a Sherman Act case); *NMV, 350 F. Supp. 2d at 178* (allowing indirect purchaser plaintiffs to maintain **[**135]** an ADTPA claim based upon an alleged conspiracy to keep Canadian-manufactured vehicles from entering the U.S. automobile market). The IEU plaintiffs will be permitted to advance an ADTPA claim.

ii. District of Columbia

HN82[] The District of Columbia Consumer Protection Procedures Act ("DCCPPA") proscribes a litany of trade practices involving deception of consumers. *D.C. CODE § 28-3904*. The Act's prohibitions are not exclusive, however, and the DCCPPA does not require a showing of concealment or deception to support a claim. *Dist. Cablevision Ltd. v. Bassin, 828 A.2d 714, 723 (D.C. 2003)* (allowing plaintiffs to maintain a DCCPPA claim associated with allegedly excessive late fees despite a lack of deception or fraud); see also *Calvetti v. Antcliff, 346 F. Supp. 2d 92, 103 (D.D.C. 2004)* (***HN83***[] "The [DCCPPA] . . . is a comprehensive statute designed to provide . . . remedies for a broad spectrum of practices which injure consumers." (quoting *Bassin, 828 A.2d at 722-23*)).

---

[56] ***HN79***[] All of these consumer protection statutes 56 prohibit, *inter alia*, fraudulent or deceptive conduct. However, statutory prohibitions on consumer deception do not subsume conduct violative of the Sherman Act. *NMV, 350 F. Supp. 2d at 177 n.22*; see also, e.g., *Intel Corp., 496 F. Supp. 2d at 417-18* (allowing consumer protection claims to proceed alongside antitrust allegations because plaintiffs alleged that defendant actively concealed incompatibilities between its products and those of its competitors). Consequently, the court will address each state consumer protection claim to determine: (1) whether anticompetitive conduct falls within the ambit of the statutory language or (2) whether the IEU plaintiffs have alleged those additional facts necessary to plead a cause of action thereunder.

[57] Bryant, which challenged an allegedly 57 usurious contract, applied contract law principles of unconscionability. *985 S.W.2d at 302* (stating that unconscionability in contract law requires analysis of "whether there is a gross inequality of bargaining power between the parties to the contract and whether the aggrieved party was made aware of and comprehended the provision in question"). However, *Bryant* provides little guidance on the ADTPA outside of the contract arena. Federal courts addressing antitrust claims have therefore relied upon broader definitions of unconscionability. *DRAM I, 516 F. Supp. 2d at 1109*; *NMV, 350 F. Supp. 2d at 178*. Defendants contend that application of broad unconscionability principles is inappropriate under *In re Graphics Processing Units Antitrust Litigation (GPU), 527 F. Supp. 2d 1011 (N.D. Cal. 2007)*, which relied exclusively upon Bryant's contract law analysis. *Id. at 1029-30*. The court concludes that the broader views of *NMV* and *DRAM I* represent the most reasonable **[**136]** interpretation of the Arkansas statute in the antitrust context, particularly in light of Bryant's admonition that a "liberal construction of the [A]DPTA is appropriate." *Bryant, 985 S.W.2d at 302*.

"Trade practices that violate other laws, including the common law, also fall within the purview of the [DCCPPA]." Bassin, 828 A.2d at 723; Atwater v. D.C. Dep't of [*584] Consumer & Regulatory Affairs, 566 A.2d 462, 465 (D.C. 1989) [**137] (restating that the DCCPPA is designed to "assure that a just mechanism exists to remedy *all* improper trade practices." (quoting D.C. CODE § 28-3901(b)(1))). Hence,**HN84**[] the DCCPPA subsumes a Sherman Act claim and creates an indirect purchaser cause of action for conspiratorial price fixing regardless of whether defendants have engaged in deceptive conduct. See Osbourne v. Capital City Mortgage Corp., 727 A.2d 322, 326 (D.C. 1999); see also TFT-LCD, 586 F. Supp. 2d at 1126; NMV, 350 F. Supp. 2d at 183. For these reasons, defendants' motion to dismiss the DCCPPA is denied.

iii. Kansas

The Kansas Consumer Protection Act ("KCPA") provides that **HN85**[] "[n]o supplier shall engage in any unconscionable act or practice in connection with a consumer transaction. An unconscionable act or practice violates this act whether it occurs before, during or after the transaction." KAN. STAT. ANN. § 50-627(a). Defendants, as manufacturers and distributors of chocolate candy, qualify as "supplier[s]" within the meaning of the Act. Id. § 50-624(j). **HN86**[] Despite the KCPA's seemingly broad language, the Supreme Court of Kansas has distinguished between consumer harms redressable thereunder and pricing harms governed by the [**138] Kansas antitrust statute. Equitable Life Leasing Corp. v. Abbick, 243 Kan. 513, 516-17, 757 P.2d 304 (Kan. 1988) (holding that, while punitive damages were proper under ***antitrust law***, [58] the plaintiff could not recover them under the KCPA, which is designed to redress other forms of consumer harm); see also Maberry v. Said, No. 94-2416, 1996 U.S. Dist. LEXIS 4256, 1996 WL 157219, at *1 (D. Kan. Mar. 13, 1996) (stating that the purpose of the KCPA "is to encourage aggrieved consumers with small claims to file suit" (quoting Equitable Life, 757 P.2d at 307)). The statute is therefore inapplicable to price-fixing claims such as those at issue in the present case. See Schoenbaum v. E.I. DuPont De Nemours & Co., 517 F. Supp. 2d 1125, (E.D. Mo. 2007) (holding that the defendants' failure to inform consumers of collusive prices did not constitute a violation of the KCPA), vacated in part on other grounds, No. 4:05CV01108, 2007 U.S. Dist. LEXIS 82343, 2007 WL 3331291 (Nov. 6, 2007); Wille v. Sw. Bell Tele. Co., 219 Kan. 755, 549 P.2d 903, 907 (Kan. 1976) (concluding that **HN87**[] the KCPA is not designed to remedy "the consequences per se of uneven bargaining power or even a simple old-fashioned bad bargain"). Accordingly, the IEU plaintiffs' claim under the KCPA will be dismissed. [**139] Leave to amend will be denied as futile. Grayson, 293 F.3d at 108.

iv. Maine

HN88[] The Maine Unfair Trade Practices Act ("MUTPA") forbids "unfair methods of competition" as well as "unfair or deceptive . . . conduct of any trade." ME. REV. STAT. ANN. tit. 5, § 207. A business practice is "unfair" if the injury it produces is (1) "substantial," (2) not "outweighed by any countervailing benefits to consumers or competition that the practice produces," and (3) not reasonably avoidable by consumers. Tungate v. MacLean-Stevens Studios, Inc., 1998 ME 162, 714 A.2d 792, 797 (Me. 1998) (quoting Suminski v. Me. Appliance Warehouse, Inc., 602 A.2d 1173, 1174 n.1 (Me. 1992)). In pricing cases, the allegedly unfair practice must also induce the consumer to acquire something that he or she would not otherwise have purchased. Id. **HN89**[] The MUTPA creates no remedy in a case [*585] involving collusive prices because higher prices cannot "induc[e individuals] to purchase something they would not otherwise [**140] purchase." [59] TFT-LCD, 586 F. Supp. 2d at

[58] Equitable Life compared the KCPA to the Kansas antitrust treble-damages statute, previously codified at KAN. STAT. ANN. § 50-801(b). In 2000, the statute was re-codified at KAN. STAT. ANN. § 50-161(b) without substantive change.

[59] In NMV, the United States District Court for the District of Maine concluded that Tungate's consumer inducement criterion applies exclusively to claims brought under the MUTPA's prohibition on "unfair or deceptive acts" but not to "[u]nfair methods of competition." NMV, 350 F. Supp. 2d at 187 n.40 (quoting ME. REV. STAT. ANN. tit. 5 § 207). The court declines to adopt NMV's construction of Tungate.

Although Tungate did not involve price fixing, it nevertheless provides a fitting analysis for cases involving collusive pricing. Tungate addressed the legality of artificially elevated prices resulting from sales commissions that the defendant added to a

1126; accord In re Graphics Processing United Antitrust Litig. (GPU), 527 F. Supp. 2d 1011, 1031 (N.D. Cal. 2007) ("[T]he *higher* prices plaintiffs allegedly paid . . . because of the price-fixing conspiracy could not have induced plaintiffs to purchase [the defendants' products]."). The motion to dismiss the IEU plaintiffs' claims under the MUTPA will therefore be granted. Leave to amend will be denied as futile. Grayson, 293 F.3d at 108.

v. New Mexico

HN92[] The New Mexico Unfair Practices Act ("NMUPA") censures both "unfair or deceptive" and "unconscionable trade practices." N.M. STAT. § 57-12-3. "Unconscionable trade practices" include all sales that either "take[] advantage of the lack of knowledge, ability, experience or capacity of a person to a grossly unfair degree" or "result[] in a gross disparity between **[**143]** the value received by a person and the price paid." Id. § 57-12-2(E). **HN93**[] The NMUPA is primarily remedial in nature, and courts construe its provisions broadly to facilitate this purpose. State ex rel. Stratton v. Gurley Motor Co., 105 N.M. 803, 737 P.2d 1180, 1185 (N.M. 1987). **HN94**[] Federal courts generally permit NMUPA actions in price-fixing cases provided that the plaintiff alleges a "gross disparity" between the price paid for a product and the value received. See, e.g., TFT-LCD, 586 **[*586]** F. Supp. 2d at 1127; Intel Corp., 496 F. Supp. 2d at 418; NMV, 350 F. Supp. 2d at 196. Allegations that a plaintiff has paid approximately 30% more for a product as a result of price fixing are sufficient to plead a NMUPA claim, NMV, 350 F. Supp. 2d at 196, as are averments that a conspiracy produced "significant artificial increases in [product] price," TFT-LCD, 586 F. Supp. 2d at 1127. The IEU plaintiffs allege that they paid "artificially inflated prices for" chocolate candy products, (Doc. 420 P 4), that defendants stabilized prices at noncompetitive levels, (id. P 122.b), and that plaintiffs "paid more for [chocolate candy] products than they would have paid in the absence of [the alleged] antitrust violations," (id. P 197). **[**144]** These allegations adequately plead a claim under the NMUPA, and the motion to dismiss will be denied with respect to this claim. [60]

vi. Rhode Island

HN95[] The Rhode Island Unfair Trade Practice and Consumer Protection Act ("RIUTPCPA") prohibits "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." R.I.

---

product's purchase price without disclosure. The court did **[**141]** not parse the statutory language in the manner suggested by NMV. Rather, it assessed whether consumers changed their behavior as a result of the defendant's pricing tactics. Tungate, 714 A.2d at 797 ("The higher price . . . does not operate to induce customers to purchase [products] they would not otherwise purchase if no commission were paid and prices were 20% lower. . . .").

The decisions cited by Tungate confirm that **HN90**[] a *change in consumer conduct* forms the marrow of a MUTPA violation. For example, Tungate relied upon Kazmaier v. Wooten, 761 F.2d 46 (1st Cir. 1985), in which the court applied Massachusetts's equivalent of the MUTPA. Kazmaier, 761 F.2d at 51; see also MASS. GEN LAW. ch. 93A § 2. Kazmaier determined that unfairness requires a detrimental change in consumer behavior as a result of confusion fomented by the defendant. Id. at 51 (concluding that customers suffered no unfairness when their "compulsion to buy or not buy[] would scarcely be altered by any mistake" resulting from the defendant's conduct). The remaining cases cited in Tungate conducted a similar analysis. See FTC v. World Travel Vacation Brokers, Inc., 861 F.2d 1020, 1029 (7th Cir. 1988) (affirming grant of **[**142]** a preliminary injunction against unfair trade practices in which customers were induced to purchase products through advertisements reflecting inaccurately low prices); Resort Car Rental Sys. v. FTC, 518 F.2d 962, 963 (9th Cir. 1975) (concluding that a defendant violated the Federal Trade Act by soliciting customers through a deceptively low price). **HN91**[] A pricing claim under the MUTPA therefore requires proof that the defendant induced consumers to alter their behavior to their detriment.

Except in unusual circumstances, higher prices do not induce consumers to purchase products. TFT-LCD, 586 F. Supp. 2d at 1126; GPU, 527 F. Supp. 2d at 1031. Accordingly, the court adopts the position of those tribunals that have dismissed MUTPA claims in price-fixing cases. See TFT-LCD, 586 F. Supp. 2d at 1126; GPU, 527 F. Supp. 2d at 1031.

[60] Defendants rely upon GPU, which dismissed claims under the consumer protection statutes of Arkansas, the District of Columbia, Kansas, and New Mexico on the ground that price fixing does not constitute unconscionable conduct. 527 F. Supp. 2d at 1030. GPU, however, failed to address the decisions of other federal courts that permitted price-fixing claims to proceed under the statutes of Arkansas, the District of Columbia, and New Mexico. See, e.g., DRAM I, 516 F. Supp. 2d at 1109; NMV, 350 F. Supp. 2d at 178, 183, 196. The court adopts the reasoning of the latter cases, which evince a compelling trend favorable to consumer protection claims in price-fixing actions.

GEN. LAWS § 6-13.1-2. The statute enumerates twenty methods of unfair or deceptive competition, including conduct that "creates a **[**145]** likelihood of confusion or of misunderstanding." Id. § 6-13.1-1(6)(xii). ***HN96***[] A plaintiff possesses standing to advance a RIUTPCPA claim if he or she "purchases or leases goods or services primarily for personal, family or household purposes." Id. § 6-13.1-5.2(a). ***HN97***[] The following factors determine whether a trade practice qualifies as "unfair" under the RIUTPCPA: (1) whether the practice affronts public policy, as delineated by the common law, statutes, and "other established concept[s] of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; [and] (3) whether it causes substantial injury to consumers (or competitors or other businessmen)." *Ames v. Oceanside Welding & Towing Co., 767 A.2d 677, 681 (R.I. 2001)* (quoting *FTC v. Sperry & Hutchinson Co., 405 U.S. 233, 244-45 n.5, 92 S. Ct. 898, 31 L. Ed. 2d 170 (1972))*. These factors encompass price-fixing injuries, and consumers subject to collusive pricing possess a cognizable claim under the RIUTPCPA. See, e.g., *TFT-LCD, 586 F. Supp. 2d at 1129-30*; *In re Dynamic Random Access Memory (DRAM) Antitrust Litig. (DRAM II), 536 F. Supp. 2d 1129, 1144-45 (N.D. Cal. 2008)* (observing that price fixing is "likely to offend public policy[,]" as reflected by statutes **[**146]** proscribing anticompetitive activity). [61]

[*587] In the instant matter, the IEU plaintiffs allege that defendants conspired to raise prices in Rhode Island (Doc. 420 P 174.c), that they issued misleading statements about the true reasons for these price increases, (id. P 174.e), and that they caused Rhode Island consumers to believe that prices for chocolate candy were the result of fair competition in an open marketplace, (id. P 174.f.) The IEU plaintiffs further allege that they purchased defendants' products for personal, family, or household use. (Id. P 174.g.) These allegations adequately plead a cause of action under the RIUTPCPA, and the motion to dismiss this claim will be denied. See, e.g., *DRAM II, 536 F. Supp. 2d at 1145* (refusing to dismiss RIUTPCPA claim because plaintiffs alleged that defendant "engaged in 'unfair or deceptive' acts" that "mis[led] or deceive[d]" consumers and resulted in injury to Rhode **[**148]** Island consumers).

d. Unjust Enrichment

Defendants lastly move to dismiss the IPR and IEU plaintiffs' claims for unjust enrichment. Neither complaint identifies the state jurisdictions upon whose law plaintiffs predicate these claims. [62] ***HN100***[] Restitution remedies vary considerably from state to state. See, e.g., *Powers v. Lycoming Engines, 245 F.R.D. 226, 231 (E.D. Pa. 2007)* (describing four discrete approaches to restitution claims); *Clay v. American Tobacco Co., 188 F.R.D. 483, 500-01 (N.D. Ill. 1999)* (recounting variations among states' common law of restitution). Moreover, ***HN101***[] the availability of relief in an antitrust case may depend upon whether a particular state has adopted an Illinois Brick repealer or whether it limits antitrust recovery to compensatory damages. Several courts presented with generic restitution claims have required plaintiffs to identify at the pleading stage those states under whose law they advance their claims. See, e.g., *TFT-LCD, 586 F. Supp. 2d at 1124*; *SRAM, 580 F. Supp. 2d at 910*; *DRAM II, 536*

---

[61] This conclusion resonates with *ERI Max Entertainment, Inc. v. Streisand, 690 A.2d 1351 (R.I. 1997)*, which defendants invoke in support of their motion to dismiss. ERI considered, *inter alia*, claims under the RIUTPCPA and for unfair competition under Rhode Island common law. The defendants misapprehend the holding in *ERI*. Addressing the unfair competition claim, the court held that "a finding of unfair competition must be predicated upon conduct . . . that reasonably tended to confuse and mislead the general public into purchasing [the defendant's] product when the actual intent of the purchaser was to buy the product of [another]." *Id. at 1354* (quoting *George v. George F. Berkander, Inc., 92 R.I. 426, 169 A.2d 370, 371 (1961))*. Contrary to the defendants' contention, the court imposed no similar restriction on claims under ***HN98***[] the RIUTPCPA, which is "intended to declare unlawful a broad variety of activities that are unfair or deceptive." *Park v. Ford Motor Co., 844 A.2d 687, 692 (R.I. 2004)*. Moreover, the restrictive language in ERI regarding unfair competition derives from George, which was decided approximately eight years before the enactment of the RIUTPCPA **[**147]** and addressed a common law unfair competition claim. *George, 169 A.2d at 371*. ***HN99***[] While the RIUTPCPA provides a statutory remedy for such claims, its reach is not limited to the common law, see *Park, 844 A.2d at 692*, and the IEU plaintiffs may invoke it as a basis for the instant claim, *DRAM II, 536 F. Supp. 2d at 1144-45*.

[62] To the extent plaintiffs 62 rely upon federal common law, Illinois Brick precludes the claim. *Ill. Brick Co. v. Illinois, 431 U.S. 720, 744-47, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*; *NMV, 350 F. Supp. 2d at 211*.

F. Supp. 2d at 1145 (concluding that plaintiffs' complaint was inconsistent with *Rule 8* pleading standards because it neglected to identify the states under whose law they brought **[**149]** their unjust enrichment claims).

The court finds logic in this approach and will therefore dismiss the unjust enrichment claims. The IPR and IEU plaintiffs will be permitted to pursue these claims in the form of a second amended complaint provided, however, that they clearly identify the state jurisdictions invoked therein.

IV. Conclusion

The *Rule 12(b)(2)* defendants' motions will be deferred during a period of jurisdictional discovery, which will be governed by a Case Management Order accompanying this memorandum. The remaining defendants' *Rule 12(b)(6)* motions will be denied except with respect to the claims **[*588]** under the New York Donnelly Act, the KCPA, the MUTPA, New York common law of restraint of trade, and unjust enrichment. Leave to amend the first three claims will be denied as futile. The IEU and IPR plaintiffs may move for leave to file a second amended complaint consistent with the limitations set forth in this memorandum.

An appropriate order follows.

/s/ Christopher C. Conner

CHRISTOPHER C. CONNER

United **[**150]** States District Judge

Dated: March 4, 2009

ORDER

AND NOW, this 4th day of March, 2009, upon consideration of the motions to dismiss (Docs. 464, 466, 469, 471, 473, 474, 476), and for the reasons set forth in the accompanying memorandum, it is hereby ORDERED that:

1. The motions to dismiss (Docs. 466, 471, 473, 474) pursuant to *Rule 12(b)(2)* filed by defendants Cadbury plc, Cadbury Holdings, Mars Canada, Nestle S.A., and Nestle Canada are DEFERRED pending completion of jurisdictional discovery. Jurisdictional discovery shall be conducted in accordance with Case Management Order No. 9, issued simultaneously herewith.

2. The motion to dismiss (Doc. 469) the amended complaints of the indirect end users and the indirect purchasers for resale pursuant to *Rule 12(b)(6)* is GRANTED in part, DENIED in part, DENIED as moot in part, and DEFERRED in part as follows:

a. The motion is GRANTED in part, DENIED in part, and DENIED as moot in part as follows:

i. The motion is GRANTED with respect to the claims against defendants Cadbury Adams Canada, The Hershey Company, Hershey Canada, Mars, Mars Snackfood U.S., and Nestle U.S.A. under the following law:

I. *D.C. CODE § 28-4503*.

II. *MICSH. COMP. LAW § 443.773*.

III. **[**151]** *MINN. STAT. § 325D.52*.

IV. New York Donnelly Act, *N.Y. GEN. BUS. LAW § 340*.

V. Kansas Consumer Protection Act ("KCPA"), *KAN. STAT. ANN. §§ 50-623 to -643*.

VI. Maine Unfair Trade Practices Act ("MUTPA"), *ME. REV. STAT. ANN. tit. 5, §§ 205-A to 214*.
VII. New York common law of restraint of trade.
VIII. The common law of unjust enrichment.

Leave to amend is denied as futile with respect to the claims identified in Clauses I-VI above. *Grayson v. Mayview State Hosp., 293 F.3d 103, 108 (3d Cir. 2002)*. Plaintiffs may request leave to file a second amended complaint alleging the claims identified in Clauses VII and VIII in accordance with Paragraph 5.
ii. The motion is DENIED as moot with respect to the claims against Cadbury Adams Canada, The Hershey Company, Hershey Canada, Mars, Mars Snackfood U.S., and Nestle U.S.A. under the following statutes:

I. *HAW. REV. STAT. §§ 480-1 to -24*.

II. *N.Y. GEN. BUS. LAW §§ 340-47*.

III. *N.J. STAT ANN. §§ 56:9-1 to -19*.

IV. *740 ILL. COMP. STAT. §§ 10/1-/12*.

iii. The motion is DENIED with respect to all other claims against Cadbury Adams Canada, The Hershey Company, Hershey Canada, **[*589]** Mars, Mars Snackfood U.S., and Nestle U.S.A.

b. The motion is DEFERRED with respect to **[**152]** Cadbury plc, Cadbury Holdings, Mars Canada, Nestle S.A., and Nestle Canada pending a ruling on these defendants' motions to dismiss pursuant to *Rule 12(b)(2)*.

3. The motion to dismiss (Doc. 476) the amended complaints of the direct purchasers and individual plaintiffs pursuant to *Rule 12(b)(6)* is DENIED in part and DEFERRED in part as follows:
a. The motion is DENIED with respect to Cadbury Adams Canada, The Hershey Company, Hershey Canada, Mars, Mars Snackfood U.S., and Nestle U.S.A.

b. The motion is DEFERRED with respect to Cadbury plc, Cadbury Holdings, Mars Canada, Nestle S.A., and Nestle Canada pending a ruling on these defendants' motions to dismiss pursuant to *Rule 12(b)(2)*.

4. The supplemental motion to dismiss (Doc. 464) pursuant to *Rule 12(b)(6)* filed by Cadbury plc, Cadbury Holdings, and Cadbury Adams Canada is DENIED in part and DEFERRED in part as follows:
a. The motion is DENIED with respect to Cadbury Adams Canada.

b. The motion is DEFERRED with respect to Cadbury plc and Cadbury Holdings pending a ruling on these defendants' motions to dismiss pursuant to *Rule 12(b)(2)*.

5. Following complete disposition of the pending motions to dismiss, the indirect end users and indirect **[**153]** purchasers for resale may file a second amended complaint for the purposes of:
a. Adding parties who reside or transact business in states under whose law plaintiffs bring their claims.
b. Describing the business activities in Iowa and Nebraska of indirect purchaser for resale Treat America Limited.
c. Replacing the citations to state monopolization statutes in the indirect end users' current complaint with citations to statutes governing horizontal restraints.
d. Reinstating the indirect end users' claims under the New York common law of restraint of trade. Any motion requesting leave to reassert this claim shall identify legal authority supporting the claim.
e. Reinstating a claim for unjust enrichment. Any motion requesting leave to reassert this claim shall identify the jurisdiction under whose law the claim arises.

The second amended complaint shall be filed within fifteen (15) days after the court's ruling on the motions. In the absence of a second amended complaint, defendants shall be permitted to renew their motion to dismiss plaintiffs' claims under the state antitrust statutes of Alabama and Mississippi.

6. No discovery shall be taken in this above-captioned matter prior to complete **[**154]** disposition of the motions deferred hereunder unless authorized by Case Management Order No. 9.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN1[] **Tying Arrangements, Sherman Act Violations**

Section 1 (*15 U.S.C.S. § 1*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, prohibits a seller from tying the sale of one product to the purchase of a second product if the seller thereby avoids competition on the merits of the tied product. The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such forcing is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated. On the other hand, there is no tie for any antitrust purpose unless the defendant improperly imposes conditions that explicitly or practically require buyers to take the second product if they want the first one.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN2[] **Tying Arrangements, Per Se Rule**

The United States Supreme Court had historically employed a per se test in antitrust cases, under which certain species of contract in restraint of trade were deemed unreasonable as a matter of law, among them tying arrangements. The Supreme Court largely eviscerated the per se test by overruling the long-standing presumption that a patent confers market power on a patentee that renders any tying of a secondary product with the patented product a per se antitrust violation. In a unanimous opinion, the Court held that a valid patent notwithstanding, a plaintiff must prove market power as an affirmative element of its case. In rejecting any presumption of market power, the Court expressed skepticism about the durability of the anti-tying rule itself, observing that the Court's strong historical disapproval of tying arrangements has substantially diminished.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN3[] **Tying Arrangements, Sherman Act Violations**

To prove a tying claim, a plaintiff must produce evidence establishing each of four elements: (1) the tying and the tied products are actually two distinct products; (2) there is an agreement or condition, express or implied, that constitutes a tying; (3) the entity accused of tying has such economic power in the relevant market over supply of the tying product to distort consumers' choices with respect to the tied product; and (4) the tie forecloses a substantial amount of commerce in the market for the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN4[] **Tying Arrangements, Sherman Act Violations**

Under doctrine developed by the United States Supreme Court, the question whether products are distinct turns not on their functional relation, but rather on the nature of the demand in the market. The Court held that advertising space in a morning newspaper was the same product as advertising space in the evening edition of the same newspaper as advertisers had no reason to distinguish between morning and afternoon readers. By contrast, in another case, the Court observed that servicing and related parts can constitute distinct products if there is sufficient consumer demand so that it is efficient for a firm to provide them separately. Market power is the power to force a purchaser to do something that he would not do in a competitive market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN5[] **Tying Arrangements, Per Se Rule**

On a motion for summary judgment, though facts are to be viewed in the light most favorable to the non-moving party, it is incumbent on the nonmovant to present specific facts to show that there is a genuine issue for trial. It is not enough to rest on mere allegations in opposing a properly supported motion for summary judgment. Whether a plaintiff's alleged facts comprise a per se claim in antitrust cases is normally a question of legal characterization that can often be resolved by the judge on a motion to dismiss or for summary judgment.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN6[] Tying Arrangements, Sherman Act Violations

A victim of an illegal tying arrangement might well be a perfectly willing participant in the transaction, either because it prizes the tying product highly, or because it has a concomitant desire to acquire the tied product. It is the harm to competition that the antitrust laws seek to avert, not harms to individual market participants. That point is only confirmed by the cases that hold that even if the buyer is totally indifferent among brands of the second product and therefore loses nothing by agreeing to use the seller's brand of the second in order to get his brand of the first, a tying agreement may work significant restraints on competition in the tied product. Again, the focus is on the impact on the market from the illegal tie, not on the attitude of the putative customer. The ineluctable conclusion from the clear law is that because the buyer's state of mind is irrelevant, a plaintiff need not establish coercion to succeed with its per se tying claim.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN7[] Tying Arrangements, Sherman Act Violations

The defining element of a tying claim is exploitation by the seller of its market position. The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such forcing is present, competition on the merits in the market for the tied item is restrained and the Sherman Act, *15 U.S.C.S. § 1 et seq.*, is violated.

Civil Procedure > ... > Summary Judgment > Supporting Materials > Affidavits

HN8[] Supporting Materials, Affidavits

When an interested witness has given clear answers to unambiguous questions, he cannot create a conflict and resist summary judgment with an affidavit that is clearly contradictory, but does not give a satisfactory explanation of why the testimony is changed.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN9[] Standing, Requirements

A plaintiff must show injury in its business or property by reason of anything forbidden in the antitrust laws in order to have standing as a plaintiff. It is proper to indulge private antitrust plaintiffs only to the extent there is evidence on the record from which a trier of fact could make a just and reasonable inference regarding the amount of damages. If the plaintiff's proffered evidence permits no more than pure speculation and guesswork then the damage evidence is insufficient as a matter of law. An antitrust plaintiff has the burden of proof and damages cannot be speculative.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN10[] Standing, Requirements

A plaintiff may not recover damages merely by showing a violation of the Sherman Act; *15 U.S.C.S. § 1 et seq.*, rather, the plaintiff must also make some showing of actual injury attributable to something the antitrust laws were designed to prevent.

Civil Procedure > Discovery & Disclosure > Disclosure > Mandatory Disclosures

Civil Procedure > Discovery & Disclosure > Disclosure > Sanctions

HN11[] **Disclosure, Mandatory Disclosures**

Fed. R. Civ. P. 37(c)(1) provides that a party that without substantial justification fails to disclose information required by *Fed. R. Civ. P. 26(a)*, shall not, unless such failure is harmless, be permitted to use as evidence at a trial, any information not so disclosed. The required sanction in the ordinary case is mandatory preclusion.

Opinion

[*287] MEMORANDUM AND ORDER ON CROSS-MOTIONS FOR SUMMARY JUDGMENT

STEARNS, D.J.

This case will (hopefully) bring down the final curtain in this long-running lawsuit brought by plaintiffs AVX Corporation and AVX Limited (collectively AVX) against defendant Cabot Corporation (Cabot). The case arose out of a five-year agreement (the Supply Agreement) that committed AVX to purchase minimum quantities of "flake" and "non-flake" (or "nodular") tantalum powders from Cabot. [1] The Supply Agreement expired on December 31, 2005.

Over the years, AVX has sought to prosecute its claims in both the state and federal courts without great success. See, e.g., *Cabot Corp. v. AVX Corp., 448 Mass. 629, 863 N.E.2d 503 (2007)*; *AVX Corp. v. Cabot Corp., 424 F.3d 28 (1st Cir. 2005)*. All but one of AVX's claims have been pruned or weeded out over time by state and federal

[1] Tantalum is a rare, very hard, **[**2]** and highly corrosion-resistant metal. It occurs naturally in the mineral tantalite. The chemical inertness of tantalum makes it a valuable substance for laboratory equipment. It is almost completely immune from chemical attack at temperatures below 150[degree]C, and is permeable only by hydrofluoric acid, acidic solutions containing the fluoride ion, and free sulphur trioxide. The element has a melting point exceeded only by tungsten and rhenium. Tantalum's main use is in the manufacture of electrolytic capacitors.

decisions. Cabot now moves for entry of summary judgment on AVX's remaining claim, which alleges a violation by Cabot of the "anti-tying" prohibition of the Sherman Act, *15 U.S.C. §§ 1* and *14*. AVX, for its part, moves for partial summary judgment, contending that three of the four elements of its tying claim are undisputed.

To sum up Cabot's arguments: Cabot contends **[**3]** that AVX's last, best, and only chance has less to do with the antitrust laws than with buyer's remorse. From Cabot's perspective, AVX entered after arms-length negotiations into a long-term contract for the purchase of tantalum, a contract which over time lost its lustre when the market price for tantalum declined (contrary to AVX's expectations). According to Cabot, AVX is trying to win back in court what it lost fairly at the bargaining table. Additionally, Cabot contends that AVX is unable to show that anything Cabot did caused an "injury in [AVX's] business or property (in an antitrust sense)." See *Wells Real Estate, Inc. v. Greater Lowell Bd. of Realtors, 850 F.2d 803, 815 (1st Cir. 1988)*. Accordingly, Cabot moves for summary judgment.

To understand AVX's cross-motion: One must begin with the elements of a "tying" claim. ***HN1***[] "*Section 1* of the Sherman Act prohibits a seller from 'tying' the sale of one product to the purchase of a second product if the seller thereby avoids competition on the merits of the 'tied' product." See *Borschow Hosp. & Med. Supplies, Inc. v. Cesar Castillo, Inc., 96 F.3d 10, 17 (1st Cir. 1996)*.

> **[*288]** [T]he essential characteristic of an invalid tying arrangement lies **[**4]** in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such "forcing" is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated.

Id., quoting *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*. On the other hand, "[t]here is no tie for any antitrust purpose unless the defendant improperly imposes conditions that explicitly or practically require buyers to take the second product if they want the first one." 10 Phillip E. Areeda et al., ***Antitrust Law*** P 1752b, at 280 (1996).

HN2[] The United States Supreme Court had historically employed a per se test in antitrust cases, under which certain species of contract in restraint of trade were deemed unreasonable as a matter of law, among them tying arrangements. See *Data Gen. Corp. v. Grumman Sys. Support Corp., 36 F.3d 1147, 1178 (1st Cir. 1994)*. In *Illinois Tool Works, Inc. v. Indep. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*, however, the Supreme Court largely eviscerated the per se test by overruling the longstanding **[**5]** presumption that a patent confers market power on a patentee that renders any "tying" of a secondary product with the patented product a per se antitrust violation. In a unanimous opinion by Justice Stevens, the Court held that a valid patent notwithstanding, a plaintiff must prove market power as an affirmative element of its case. In rejecting any presumption of market power, Justice Stevens expressed skepticism about the durability of the anti-tying rule itself, observing that the Court's "strong [historical] disapproval of tying arrangements has substantially diminished." *Id. at 35*. [2] See *Sheridan v. Marathon Petroleum Co. LLC, 530 F.3d 590, 593-594 (7th Cir. 2008)* (noting that the Supreme Court has not discarded the tying rule but has modified it to require proof that the seller has power in the market for the tying product); Rachel Krevans & Daniel P. Muino, Restoring the Balance: The Supreme Court Joins the Patent Reform Movement, *9 Sedona Conf. J. 15 (Fall 2008)* (characterizing the Illinois Tool Works decision as being influenced by the "congressional judgment reflected in the 1988 amendment [to the patent code]" that "tying arrangements involving patented products should not **[**6]** be deemed per se antitrust violations . . ."). See also Gabriel Feldman, The Misuse of the Less Restrictive Alternative Inquiry in the Rule of Reason Analysis, *58 Am. U. L. Rev. 561, 578 (2009)* ("The per se test is applied with less rigidity in tying cases, as proof of the tying agreement leads only to a rebuttable presumption of illegality.").

[2] The skepticism is echoed in the academic literature. See William E. Kovacic, The Intellectual DNA of Modern U.S. Competition Law for Dominant Firm Conduct: The Chicago/Harvard Double Helix, *2007 Colum. Bus. L. Rev. 1, 35*; William E. Kovacic, The Antitrust Paradox Revisited: Robert Bork and the Transformation of Modern Antitrust Policy, 36 Wayne L. Rev. 1413, 1437-1439, 1445-1451 (1990)

HN3[] To prove a tying claim, a plaintiff must produce evidence establishing each of four elements: "(1) the tying and the tied products [here Cabot's nodular and flake tantalum powders] are actually two distinct products; [3] (2) there is an agreement or condition, express or implied, that **[*289]** constitutes a tying; (3) the entity accused of tying [Cabot] has such economic power in the relevant market over supply of the tying product to distort consumers' choices with respect **[**7]** to the tied product; [4] and (4) the tie forecloses a substantial amount of commerce in the market for the tied product." *Data Gen. Corp., 36 F.3d at 1178-1179*. With respect to the first, third, and fourth elements, AVX contends that it is undisputed that flake tantalum powder and non-flake (nodular) tantalum powder are "distinct products"; that Cabot in 2001 had dominant "market power" over flake tantalum powder and used its position to tie or "condition AVX's purchase of the flake powders on its purchase of non-flake [tantalum] powders"; and that the tie affected "a substantial amount of commerce." AVX asks the court to enter judgment as a matter of law with respect to these elements of its Sherman Act claim. Complaint PP 1, 33-41.

DISCUSSION

HN5[] Though facts are to be viewed in the light most favorable to the non-moving party, it is incumbent on the nonmovant to present specific facts to show that there is a genuine issue for trial. It is not enough to "rest on mere allegations" in opposing a properly supported motion for summary judgment. See *Borschow, 96 F.3d at 14* (approving a grant of summary judgment in a tying case). "Whether a plaintiff's alleged facts comprise a per se claim is normally a question of legal characterization that can often be resolved by the judge on a motion to dismiss or for summary judgment." See *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 61 (1st Cir. 2004)*, citing *Addamax Corp. v. Open Software Found., Inc., 152 F.3d 48, 50-51 (1st Cir. 1998)*.

The **[**9]** court will begin with Cabot's arguments as they are dispositive. Cabot contends that AVX has produced no evidence that Cabot coercively tied AVX's purchases of flake tantalum powder to the purchase of non-flake or nodular tantalum powder. Cabot argues that AVX has shown no more than: (1) that AVX was in the market for all types of tantalum powder; and (2) that Cabot would only sell tantalum products (separately or collectively) pursuant to multi-year contracts. When AVX's *Rule 30(b)(6)* deponent, Vice-President of Worldwide Tantalum Products Peter Collis, was asked to explain the thrust of AVX's Complaint, he replied that Cabot had "coerced" AVX into signing a binding, multi-year tantalum purchase contract instead of the shorter-term contract that had been contemplated in the parties' "letters of intent." [5] Cabot for its part contends that during the contract negotiations, "AVX consistently pressed for the opportunity to purchase *more* nodular powder, *more* flake powder, and *more* KTaF." [6] Cabot's Memorandum in Support **[*290]** of Summary Judgment at 3 (emphasis in original).

[3] *HN4*[] Under doctrine developed by the Supreme Court in Jefferson Parish, the question whether products are distinct turns not on their functional relation, but rather on the nature of the demand in the market. In *Times-Picayune Publ'g Co. v. United States, 345 U.S. 594, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*, the Court held that advertising space in a morning newspaper was the same product as advertising space in the evening edition of the same newspaper as advertisers had no reason to distinguish **[**8]** between morning and afternoon readers. By contrast, in *Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 462, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*, the Court observed that servicing and related parts can constitute distinct products if there is "sufficient consumer demand so that it is efficient for a firm to provide them separately."

[4] Market power is the power "to force a purchaser to do something that he would not do in a competitive market." *Jefferson Parish, 466 U.S. at 14*.

[5] See Collis Dep. at 27-28 (set out *infra*).

[6] KTaF is the industry's name for semi-refined tantalum ore. AVX alleges that KTaF **[**10]** is one of the "tied" products in this case. See AVX Statement of Facts (SOF) PP 7, 21 and 34. As will be explained, AVX is barred from asserting any claim based on the purchase of KTaF.

> AVX's President and Chief Executive Officer, who was directly involved in the negotiation of the Supply Agreement in the summer and fall of 2000, has testified under oath that AVX actually desired to purchase more, not less, nodular powder from Cabot at the time the parties entered into that Agreement, and AVX's desire for more nodular powder is confirmed in the Agreement itself; and regardless of the true nature of its claim in this action, AVX cannot prove that it suffered actual injury as a result of Cabot's purported violation of federal antitrust laws. In fact, AVX has produced no evidence that it suffered any harm whatsoever on account of Cabot's alleged misconduct.

Cabot's Opposition to AVX's Motion for Partial Summary Judgment at 6. [7] Cabot argues that on the undisputed facts, the parties' negotiation of a long-term purchase of products cannot constitute a per se tying arrangement as a matter of law. [8]

In response, AVX maintains that to defeat Cabot's motion, all it need show

> is an act of conditioning the purchase of one product on the purchase of another, not whether the plaintiff is coerced into buying the product or whether it wanted the product. The focus of an illegal tie is on actions of the defendant and the consequent harm to competition, not the harm to the plaintiff itself. As this Court so aptly stated in its earlier decision in this case:
>
> > ***HN6***[] A "victim" of an illegal tying arrangement might well be a perfectly willing participant in the transaction, either because it prizes the tying product highly, or because it has a concomitant desire to acquire the tied product. It is the harm **[**12]** to competition that the antitrust laws seek to avert -- not harms to individual market participants.
>
> This point is only confirmed by the cases that hold that even if the buyer is totally indifferent among brands of the second product and therefore loses nothing by agreeing to use the seller's brand of the second in order to get his brand of the first, a tying agreement may work significant restraints on competition in the tied product. *Jefferson Parish Hosp. v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*; *Key Enters. of Delaware, Inc. v. Venice Hosp., 919 F.2d 1550, 1560 (11th Cir. 1990)*. Again, the focus is on the impact on the market from the illegal tie, not on the attitude of the putative customer. Accordingly, AVX could have been reluctant, neutral, or willing to buy nodular from Cabot; if Cabot conditioned the purchase of nodular on the purchase of flake, this element would be satisfied. The ineluctable conclusion from the clear law is that because the buyer's state of mind is irrelevant, a plaintiff need not establish **[*291]** coercion to succeed with its per se tying claim.

AVX Opposition Memorandum at 5-6.

The error in AVX's argument is not in its premise that the state of mind of the purchaser is usually **[**13]** irrelevant in analyzing the market impact of a tying claim, but in its assumption that a refusal to sell products (singly or in tandem) on anything but a long-term basis constitutes "tying" for purposes of the Sherman Act. The teaching of Illinois Tool, as echoed by the First Circuit in Borschow and Data General, is that ***HN7***[] the defining element of a tying claim is exploitation by the seller of its market position. "[T]he essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such 'forcing' is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated." *Illinois Tool, 547 U.S. at 34-35*, quoting *Jefferson Parish, 466 U.S. at 12*. See *Borschow, 96 F.3d at 17* (same). See also *Data General, 36 F.3d at 1156* (The court found "insufficient proof of a tying agreement to withstand summary judgment" where there was no evidence of exploitation and "no explicit tying condition in any written agreement.").

---

[7] Cabot has produced undisputed evidence that AVX negotiated for an increase in the amount of **[**11]** nodular powder to be purchased from Cabot after the Supply Agreement was signed. See Docket No. 112-7 at 2; Gilbertson Dep. at 86-87, 164-166; Collis Dep. at 25-26.

[8] In the alternative, Cabot contends that AVX's claim is barred by the doctrine of claim preclusion or res judicata because "it is exactly the same claim that AVX previously litigated against Cabot, and lost, in the Massachusetts state courts." Cabot's Memorandum in Support of Summary Judgment at 2-3. See also *Cabot Corp., 448 Mass. at 646*.

Here, **[**14]** AVX offers no evidence that Cabot had a sufficiently dominant market position to "force" it into a multi-year purchase agreement for a product that it did not want. AVX only says that it might have purchased less nodular product in some years, or that its European subsidiaries might have purchased tantalum supplies during other years from Cabot competitors like Showa, Starck, or Ningxia "at substantially less cost." [9] AVX Memorandum at 6 n.5. This speculation falls far short of proof that Cabot exploited a market position over the flake tantalum market "to distort consumer choice with respect to the tied [non-flake] product."

AVX's only counter-argument is its insistence that the parties' contract serves as independent verification that Cabot "conditioned," that is, would not sell, flake powder to AVX unless it agreed to purchase nodular powder. [10] AVX relies on Section 2 of the Supply Agreement, which states that "Buyer shall purchase . . . the minimum purchase quantity . . . of each Product described on Appendix A." AVX contends that this "clear" language, **[**15]** as interpreted by its witness-employees, Kurt Cummings, Peter Collis, and John Chapple (AVX's Purchasing Manager), supports its "conditioning" argument.

The testimony does not bear out AVX's contention. Cummings **[**16]** and Collis testified only that Cabot refused to sell AVX tantalum, **[*292]** whether flake or non-flake (or both), unless AVX agreed to a long-term contract. On December 5, 2007, Collis during a *Rule 30(b)(6)* deposition directed to (among other topics), the "products or terms that AVX alleges it was forced to accept on account of 'Cabot's coercive strategies' as referenced in Paragraph 30 of [its] Complaint," testified as follows.

> DAVIS: Okay. Going back to [the Complaint] and Jury Demand at Paragraph 1, Mr. Collis, what are the non-flake powders that AVX claims that Cabot conditioned AVX's purchase of flake powders upon?
> COLLIS: Actually the nodular powders and the fact that we had to take a five year contract for these materials.
> DAVIS: Looking back please at [the Supply Agreement], which are the nodular powders that AVX did not wish to purchase from Cabot as of the time that this contract was executed?
> GOREN: Objection.
> DAVIS: You can respond.
> COLLIS: There is the nodular on Biddeford, the nodular under Europe. There's wire under Biddeford, wire under Europe and KTaF for the extent of the five year contract.
>
> MR. DAVIS: So I want to understand this correctly. Are you saying that AVX did not wish **[**17]** to purchase, as of the time that it entered into this supply agreement with Cabot, it did not wish to purchase any nodular powder from Cabot?
> COLLIS: We didn't wish to purchase -- enter into an agreement to purchase materials for five years.
> DAVIS: Putting aside the five year length of the contract, were there any nodular products that are listed on . . . the Supply Agreement that AVX actually wished to purchase from Cabot as of the time that this supply agreement was actually signed? Independent of the five year length of the contract.
> COLLIS: Yes. Yes.
> DAVIS: Which ones did AVX actually wish to purchase?
> COLLIS: We wished to purchase the ones that we had in the Letter of Intent at the time that we had the original agreement.
> * * *

---

[9] In making this argument, AVX is forced to acknowledge that alternative suppliers of tantalum products were available in the market.

[10] In its briefing, AVX states that the product over which Cabot is alleged to have market power is "flake" tantalum powder (which is designated as the "tying product"). The products that are associated with that product are the "tied products," in this case, "nonflake products, nodular powder and KTaF." AVX Opposition Memorandum at 4 n.3. Cabot counters that AVX's "belated attempt" to include semi-refined tantalum ore or KTaF as a tied product must fail as the Complaint references non-flake *powders*, which cannot include raw materials such as KTaF. Moreover, Cabot notes that AVX's economic expert Dr. Steven Schwartz testified in a February 2008 deposition that he "no longer makes the assertion that [AVX's] purchases of flake were conditioned on [its] purchases of KTaF." Schwartz Dep. at 50. The injection of KTaF at this stage of the litigation is illustrative of a distressing habit of AVX's counsel to attempt by stealth to recapture positions lost by AVX in previous skirmishes.

DAVIS: Is it fair to say that it's AVX's position that its complaint in this case is that it was forced by Cabot to sign a contract for years beyond 2001?
COLLIS: Yes.
DAVIS: Is there more to AVX's complaint in this action other than it was forced by Cabot, allegedly, to sign a contract or a binding contract for delivery of products beyond the calendar year 2001?
COLLIS: No.

Collis's testimony concerning the nature of AVX's claim was confirmed by Cummings, AVX's Chief **[**18]** Financial Officer, at his *Rule 30(b)(6)* deposition on December 12, 2007. He was asked to identify the "coercive strategies" exerted by Cabot that are alleged in Paragraph 30 of AVX's Complaint. Cummings testified as follows.

Q. And what were Cabot's coercive strategies, to your understanding?
A. I believe they surrounded the conditions under which the Supply Agreement was negotiated.
Q. They surrounded? Is that the word you just used?
A. Urn-hum.
Q. Surrounded with what?
A. Two issues. One, we had an existing supply agreement which Cabot indicated they would not honor.
Q. You are referring to the letter of intent?

A. Yes. And we were told that we would not get material unless we entered **[*293]** into a long-term supply agreement.
Q. And that is the coercive strategies you believe this is referring to?
A. Yes.
Q. What other coercive strategies are you aware of that Cabot engaged in during the negotiation of the 2001 Supply Agreement?
A. I think that covers it.

Cummings Dep. at 17-18.

Chapple, in a subsequent affidavit, states that it was his understanding that if AVX did not enter into a five-year supply contract for both flake and non-flake products, it would not get any flake for 2001. Chapple Aff. P 22. **[**19]** [11] Cabot asserts that the Chapple Affidavit should not be considered by the court as it is "inconsistent with the testimony of the same witness at his deposition" about a meeting between Chapple and Cabot's Hugh Tyler at Heathrow Airport in August of 2000. AVX asserts (somewhat ingenuously) that the affidavit does not contradict, but rather "amplifies upon" Chapple's earlier testimony. AVX Reply at 4. The court agrees that the affidavit is improper. See *Colantuoni v. Alfred Calcagni & Sons, Inc., 44 F.3d 1, 4-5 (1st Cir. 1994)* ***HN8***[] ("'When an interested witness has given clear answers to unambiguous questions, he cannot create a conflict and resist summary judgment with an affidavit that is clearly contradictory, but does not give a satisfactory explanation of why the testimony is changed.'" (quoting 10A Wright, Miller & Kane, Federal Practice and Procedure § 2726 at 30-31 (2d ed. 1994))). Perhaps more to the point, Chapple's carefully crafted affidavit concedes (albeit in a more weasling fashion than his testimony) that he was told that Cabot would not provide any product to AVX in 2001 unless it entered into a five-year, minimum purchase contract for the products it wanted.

There is one remaining dispositive issue. ***HN9***[] AVX must show "injury in [its] business or property by reason of anything forbidden in the antitrust laws" in order to have standing as a plaintiff. See *Wells, 850 F.2d at 815*. See also *Borschow, 96 F.3d at 17* (finding that plaintiff failed to adduce evidence that it was injured by defendant's alleged anti-competitive acts). In Wells, the First Circuit cautioned that "it is proper to indulge private antitrust plaintiffs only to the extent there is evidence on the record from which a trier of fact could make a 'just and reasonable inference' regarding the amount of damages. If the plaintiff's proffered evidence permits no more than 'pure speculation and guesswork' then the damage evidence is **[**21]** insufficient as a matter of law." *Wells, 850*

[11] "AVX did **[**20]** not want to commit to purchase from Cabot any fixed amounts of tantalum products for each 2002, 2003, 2004 and 2005 at fixed prices. . . . [O]nce as a condition of getting the flake products AVX accepted Cabot's requirement of a five year take or pay contract for both flake and non-flake products the negotiations were limited to the quantities to be purchased over the five years and the prices to be paid." AVX Response to Cabot's Statement of Facts at 13.

F.2d at 816, quoting Bigelow v. RKO Radio Pictures, 327 U.S. 251, 264, 66 S. Ct. 574, 90 L. Ed. 652 (1946). See also Telecor Commc'ns, Inc. v. Southwestern Bell Tel. Co., 305 F.3d 1124, 1151 (10th Cir. 2002) (An "antitrust plaintiff has the burden of proof and damages cannot be speculative.").

AVX here has offered no reliable evidence of damages. [12] See Texaco Inc. v. Hasbrouck, 496 U.S. 543, 572-573, 110 S. Ct. 2535, 110 L. Ed. 2d 492 (1990) **HN10**[] ("We have held that a plaintiff may not recover damages merely by showing a violation of **[*294]** the Act; rather, the plaintiff must also 'make some showing of actual injury attributable to something the antitrust laws were designed to prevent.'" (quoting Perkins v. Standard Oil Co., 395 U.S. 642, 648, 89 S. Ct. 1871, 23 L. Ed. 2d 599 (1969))). AVX's dilemma is one of its own making. Despite repeated accommodations by the court, including granting of numerous extensions of the scheduling order (four in all), AVX failed (or was unable) to produce expert testimony identifying any actual damages. [13] The extensions culminated on July 10, 2007, with the margin order that "[n]o further extensions will be granted." Nonetheless, because of a death in the family of plaintiff's counsel, the court again extended the **[**22]** expert deadline, setting December 15, 2007, as the date for AVX's submission of its expert report. [14]

On October **[**23]** 18, 2007, the court allowed AVX's motion to substitute a new expert, Steven Schwartz, in lieu of a prior expert who, because of medical issues, was unable to travel to view AVX's manufacturing facility in the United Kingdom. Cabot vehemently opposed the motion, contending that AVX should be bound by the prior expert's affidavit testimony. The court allowed AVX's motion. AVX submitted Schwartz's expert report on December 15, 2007. Schwartz's report, however, did not contain a calculation of AVX's damages. [15] Cabot served its expert report on January 15, 2008, noting the absence of any damages evidence. On February 8, 2008, AVX filed a motion seeking leave to file a substitute expert report. In doing so, AVX admitted that Schwartz's report was "incomplete." [16] The court denied the motion as untimely. It did allow AVX to file an addendum limited to issues raised by additional discovery allowed by the court in a separate order on February 15, 2008.

---

[12] The Supply Agreement terminated in 2005. AVX is not seeking injunctive relief. See Complaint at 9.

[13] See Nilavar v. Mercy Health System-Western Ohio, 244 Fed. Appx. 690, 2007 WL 2264439,* 2 (6th Cir. Aug. 7, 2007) (affirming the district court's finding on a motion for summary judgment that "plaintiff's claims failed as a result of his failure to have expert testimony on the geographic market and . . . he could not [therefore] show an antitrust injury."); Loeb Indus., Inc. v. Sumitomo Corp., 306 F.3d 469, 490 (7th Cir. 2002) ("The physical copper market is complicated, but not so complicated that one cannot estimate to a reasonable degree of accuracy the amount of damage a party has sustained. It is certainly acceptable through expert economic testimony to make a reasonable estimation of actual damages through probability and inferences.").

[14] The extended dates were set out on the court docket as December 15, 2007 - AVX's expert report deadline; January 15, 2008 - Cabot's expert report deadline; March 1, 2008 - completion of expert discovery; and March 31, 2008 - filing of dispositive motions.

[15] See Gregory J. Werden, Economic Evidence on the Existence of Collusion: Reconciling ***Antitrust Law*** with Oligopoly Theory, 71 Antitrust L.J. 719, 789 (2004) ("The role of the expert economist in antitrust cases is to apply microeconomic theory **[**24]** to the messy facts of a case.").

[16] At a deposition held on February 19, 2008, Schwartz testified as follows:

> Q. But you didn't issue any opinions regarding damages in the expert report that you submitted back in December, correct?
>
> A. That is correct.
>
> Q. And you hadn't been asked to at that point in time, correct?
>
> A. That is correct.

See Schwartz Dep. at 201-202.

Finally, AVX failed to provide timely substantive answers to Cabot's damages interrogatories or to otherwise respond when asked to identify its damages claim. [17] **[*295]** As a consequence, Magistrate Judge Bowler (to whom the ongoing discovery disputes had been referred) allowed Cabot's motion to strike AVX's answers to the damages interrogatories. [18] See *AVX Corp. v. Cabot Corp., 251 F.R.D. 70 (D. Mass. 2008)*. In her opinion (which was adopted by this court), Magistrate Judge Bowler did allow that "AVX may file a motion for leave to file, see L.R. 7.1(b)(3), a revised answer to the damages interrogatory based only on the information recently obtained from Cabot in March and April 2008." No revised damage calculation was ever offered by AVX. As AVX is unable to demonstrate that it has in fact suffered quantifiable damages as the result of **[**25]** any conduct attributable to Cabot, Cabot's motion for summary judgment will be granted on this ground as well.

ORDER

Based on the foregoing reasons, Cabot's Motion for Summary Judgment is ALLOWED. The Clerk will enter judgment for Cabot and close the case.

SO ORDERED.

/s/ Richard G. Stearns

UNITED STATES DISTRICT JUDGE

End of Document

---

[17] On December 5, 2007, as previously noted, Cabot took the *Rule 30(b)(6)* deposition of AVX's Peter Collis. One of the topics of the Collis deposition was damages: "Any damages that AVX claims to have sustained on account of the conduct alleged in the Complaint, including but not limited to the complete nature and amount of such damages, and the precise means by which AVX calculated such damages." Collis was unable to articulate any method of calculating damages. When asked if he had any understanding of the monetary value of AVX's alleged damages, Collis stated that AVX had "monitored the market price of material and compared that with what we ended up paying in the contract when we used the material as against what the market price was at the time, and passed that to our expert." When asked how he would calculate AVX's damages he responded that "we've left that with our expert to come up with that calculation."

[18] ***HN11***[] *Federal Rule of Civil Procedure 37(c)(1)* provides that "a party that without substantial justification fails to disclose information required by ***Rule 26(a)*** . . . shall **[**26]** not, unless such failure is harmless, be permitted to use evidence at a trial . . . any . . . information not so disclosed." "The required sanction in the ordinary case is mandatory preclusion." *Klonoski v. Mahlab, 156 F.3d 255, 269 (1st Cir. 1998)* (discussing failure to disclose letters written by the plaintiff's wife to her sister). See also *Pena-Crespo v. Commonwealth of Puerto Rico, 408 F.3d 10, 13 (1st Cir. 2005)* ("'[E]xclusion of evidence is a standard sanction for a violation of the duty of disclosure under ***Rule 26(a)***.'"); *Salgado by Salgado v. Gen. Motors Corp., 150 F.3d 735, 742 (7th Cir. 1998)* ("The sanction of exclusion is automatic and mandatory unless the sanctioned party can show that its violation of ***Rule 26(a)*** was either justified or harmless.").

Judges: MORRISON C. ENGLAND, JR., UNITED STATES DISTRICT JUDGE.

Opinion by: MORRISON C. ENGLAND, JR.

Opinion

ORDER

Counsel for Plaintiff Bruce Foods Corporation and Plaintiff Cliffstar Corporation[1] have filed a Motion requesting that the Court enter an order consolidating the above numbered and entitled lawsuits, pursuant to *Federal Rule of Civil Procedure 42(a)*,[2] into a single action. Plaintiff Four In One Company, Inc. joined in said Plaintiffs' request, and

---

[1] Cliffstar Corporation, whose lawsuit was filed on February 13, 2009, was not a party to the original Motion filed on behalf of Bruce Foods on or about January 23, 2009. The Reply Memorandum dated February 26, 2009, however, requests that the Cliffstar action, which has since been related to the other actions enumerated above, be included within the instant Motion to Consolidate.

Plaintiff Diversified Foods expressed its consent to consolidation for pretrial purposes, only. Defendants SK Foods, Ingomar Packing Company and Los Gatos Tomato Products have also filed statements indicating that they do not oppose limited pretrial consolidation at this stage of the litigation. Plaintiffs Morning Star Packing Company, et al., however, oppose consolidation on grounds that the other four lawsuits purport to be class actions instituted on behalf of purchasers of tomato products, whereas the Morning Star Plaintiffs sue Defendants as direct competitors claiming to be harmed by Defendants' alleged unlawful business practices in that capacity. The Morning **[*14]** Star Plaintiffs therefore claim that their issues differ from those of the class action Plaintiffs, and points to potential prejudice in the form of jury confusion should the actions be consolidated.

Factually, all five cases stem from alleged violations of ***antitrust law*** that arise from claimed anticompetitive conduct by numerous common defendants involved in the processed tomato products market. This Court has already determined that the cases are related in the sense that they involve similar questions of fact and of law.

"If actions before the court involve a common question of law or fact, the court may: (1) join for hearing or trail any or all matters at issue in the actions; (2) consolidate the actions; or (3) issue any other orders to avoid unnecessary cost or delay. *Fed. R. Civ. P. 42(a)*. As long as actions involve the requisite common questions of law or fact, a court has broad discretion to consolidate in whole or in part cases pending within the same district. *Investors Research Co. v. United States District Court for the Central District of California, 877 F.2d 777 (9th Cir. 1989)*. Consolidation of appropriate cases not only enhances judicial efficiency by avoiding unnecessary duplication of evidence and procedures, but also guards against the risk of inconsistent adjudications. See *E.E.O.C. v. HBE Corp., 135 F.3d 543, 550-51 (8th Cir. 1998)*.

Here, it is uncontroverted **[*15]** that all five actions arise from the same Department of Justice investigation into anticompetitive conduct within the processed tomato industry. Consolidation may be proper in instances where numerous lawsuits arise from the same common nucleus of operative facts. See Team Enterprises, LLC v. Western Investment Real Estate Trust, 2008 WL 4712759, * 1-2 (E.D. Cal., Oct. 23, 2009) (consolidation appropriate where actions presented similar factual issues).

The Court must nonetheless weigh considerations of judicial convenience in this regard against any potential for delay, confusion and/or prejudice caused by consolidation. *Southwest Marine, Inc. v. AAA Machine Shop, Inc., 720 F. Supp. 805, 807 (N.D. Cal. 1989)*.

Given the factual dissimilarities between the Morning Star complaint and the four proposed class actions, as well as the additional claims pursued by Morning Star (including claims under both the Robinson-Patman Act and California statutory and common law), the Court agrees that consolidation of the Morning Star action with the other cases is inappropriate. Given those distinctions, prejudice could result from consolidation, both given the unique attributes of class action litigation not shared by the Morning Star allegations, and the fact consolidation could ultimately prove to be confusing to the trier of fact. Consequently the Motion to Consolidate is denied to the extent **[*16]** it encompasses Morning Star. Counsel for Morning Star are nonetheless directed to coordinate common discovery with the class action litigants to the extent that such coordination eliminates duplicative discovery proceedings.

With regard to the class action complaints, the parties on both sides agree that consolidation for pretrial purposes is indicated. The only disagreement concerns the question of whether or not consolidation for all purposes, including trial, should be ordered at this juncture.

As indicated above, Defendants SK Foods, Ingomar Packing Company and Los Gatos Tomato Products all advocate for only pre-trial consolidation, arguing that at this early stage of litigation consolidation for trial purposes could be premature. See, e.g., *Newmark v. Turner Broadcasting Network, 226 F. Supp. 2d 1215, 1223 n.8 (C.D. Cal. 2002)* (ordering consolidation of cases in early stages of litigation for discovery and pretrial purposes but reserving "for another day the issue of whether these actions should be consolidated for trial"); Schwarzer, et al.,

---

[2] All further references to "Rule" or "Rules" are to the Federal Rules of Civil Procedure, unless otherwise noted.

Federal Civil Procedure Before Trial, Chapter 16-C, § 16-156 (actions are sometimes consolidated only for pretrial purposes and not for trial).

Because consolidation for all purposes may be inappropriate should discovery reveal circumstances **[*17]** making a joint trial unfeasible, and because in the view of the Court there is no downside for deferring any final decision on complete consolidation until more complete information is obtained, the Court need not adjudicate at this time whether complete consolidation should be ordered.

Given the foregoing, then, Plaintiffs' Motion to Consolidate is GRANTED in part and DENIED in part.[3] The following cases are hereby consolidated, for pretrial purposes only:

1. Four in One Company, Inc. v. SK Foods, et al., Case No. 2:08-cv-03017-MCE-EFB;

2. Diversified Foods and Seasonings, Inc. v. SK Foods, et al., Case No. 2:08-03074-MCE-EFB;

3. Bruce Foods Corporation v. SK Foods, et al., Case No. 2:09-cv-00148-MCE-EFB; and

4. Cliffstar Corporation v. SK Foods, et al., Case No. 2:09-cv-00442-MCE-EFB.

Plaintiffs' Motion is DENIED, without prejudice to being renewed at a later time, to the extent it seeks consolidation for all purposes of the cases enumerated above. Finally, Plaintiffs' Motion to Consolidate is DENIED with respect to consolidation of said cases with The Morning Packing Co., et al., v. SK Foods, et al., Case No. 2:09-cv-00208-MCE-EFB.

Any scheduling orders entered in the actions enumerated **[*18]** as 1 through 4 in the preceding paragraph are vacated. Counsel in said cases are directed to submit a Joint Status Report not later than the earlier of sixty (60) days following the date of this Order, or sixty (60) days after a consolidated amended complaint is filed, should counsel choose to do so within the sixty (60) day period following the date of this Order.

IT IS SO ORDERED.

Dated: March 11, 2009

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

In deciding a motion to dismiss for failure to state a claim upon which relief can be granted, a court must accept, as true, all allegations in the complaint and all reasonable inferences that can be drawn therefrom and view them in the light most favorable to the non-moving party. The court need not, however, credit either bald assertions or legal conclusions in a complaint when deciding a motion to dismiss. The factual allegations must be enough to raise the right to relief above the speculative level. Viewing the complaint in this manner, a court must dismiss a complaint if it fails to state a claim upon which relief can be granted.

Civil Procedure > Parties > Pro Se Litigants > Pleading Standards

HN2[] **Pro Se Litigants, Pleading Standards**

In cases involving pro se litigants, a court must liberally construe a pro se plaintiff's pleadings.

Trademark Law > ... > Federal Unfair Competition Law > False Advertising > General Overview

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Standing

HN3[] **Federal Unfair Competition Law, False Advertising**

To have standing to assert a false and misleading advertising claim under the Lanham Act, a plaintiff must show that he has a reasonable interest to be protected against false advertising. The United States Court of Appeals for the Third Circuit has identified the following factors to consider in the determination of whether a plaintiff has a "reasonable interest": (a) the nature of the plaintiff's alleged injury; (b) the directness or indirectness of the asserted injury; (c) the proximity or remoteness of the party to the alleged injurious conduct; (d) the speculativeness of the damages claim; and (e) the risk of duplicative damages or complexity in apportioning claims.

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN4[] **Justiciability, Standing**

Standing consists of both constitutional and prudential components. Constitutional standing is derived from the U.S. Const. art. III case and controversy requirement and mandates that a plaintiff demonstrate that he has suffered injury in fact, that the injury is fairly traceable to the actions of the defendant, and that the injury will likely be redressed by a favorable decision. Prudential standing is a set of judge-made rules which limit access to the federal courts to those litigants whose grievances fall within the zone of interests protected or regulated by the statutory provision invoked in the suit.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Standing

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

HN5[] **False Advertising, Elements of False Advertising**

Where plaintiffs allege a loss of sales at the retail level because of alleged false advertising, but do not allege an impact on the ability to compete, the harm alleged is not the type of injury that the Lanham Act seeks to prevent. The remoteness of the allegedly injurious conduct weighs against the right to sue where the defendant's conduct does not directly relate to the plaintiffs' alleged harm.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

HN6[] **Federal Unfair Competition Law, Lanham Act**

The United States Court of Appeals for the Third Circuit has found that recognizing the right of all potentially injured parties in a distribution chain to assert standing under the Lanham Act will subject a defendant to multiple liability for the same conduct and will result in administratively complex damages proceedings.

Trademark Law > ... > Federal Unfair Competition Law > False Advertising > General Overview

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Standing

HN7[] **Federal Unfair Competition Law, False Advertising**

The United States Court of Appeals for the Third Circuit has held that consumers whose purchases were influenced by false advertising lacked standing to sue under the Lanham Act where the defendants' conduct was not directly related to the consumers' injuries.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Elements of False Designation of Origin

HN8[] **False Designation of Origin, Elements of False Designation of Origin**

To state a claim for false designation of origin under the Lanham Act, a plaintiff must show: (1) the defendant uses a false designation of origin; (2) that such use of a false designation occurs in interstate commerce in connection with goods and services; (3) that such false designation is likely to cause confusion, mistake, or deception as to origin, sponsorship, or approval of the plaintiff's goods or services by another person; and (4) that the plaintiff has been, or is likely to be, damaged.

Trademark Law > ... > Federal Unfair Competition Law > False Designation of Origin > General Overview

HN9[] **Federal Unfair Competition Law, False Designation of Origin**

For Lanham Act purposes, the phrase "origin of goods" is incapable of connoting the person or entity that originated the ideas or communications that "goods" embody or contain. The United States Supreme Court has held that the "origin of goods" is the actual, tangible videotapes produced by a defendant, and not the ideas or concepts within those videotapes.

Trademark Law > ... > Federal Unfair Competition Law > False Designation of Origin > General Overview

HN10[] **Federal Unfair Competition Law, False Designation of Origin**

The United States District Court for the Eastern District of Pennsylvania has held that, for Lanham Act purposes, a false designation of origin does not arise when a defendant publishes a textile book containing a plaintiff's copyrighted photographs. The court has found that the "origin of goods" is the actual book that the defendant compiled, rather than the plaintiff's photographs contained within it.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Elements of False Designation of Origin

HN11[] **False Designation of Origin, Elements of False Designation of Origin**

A Lanham Act claim for false designation of origin presupposes that the plaintiff has used the designation of origin in issue to identify the plaintiff's own goods or services.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Elements of False Designation of Origin

HN12[] **False Designation of Origin, Elements of False Designation of Origin**

A Lanham Act false designation of origin claim fails when a plaintiff does not assert that the false designation is likely to cause confusion, mistake, or deception as to the origin of the plaintiff's goods.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Elements of False Designation of Origin

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

HN13[] **False Advertising, Elements of False Advertising**

See *15 U.S.C.S. § 1125(a)(1)(B)*.

Business & Corporate Compliance > ... > Contractual Relations & Housing > Fair Housing Rights > Enforcement Actions

Civil Rights Law > ... > Contractual Relations & Housing > Fair Housing Rights > Fair Housing Act

Civil Rights Law > ... > Contractual Relations & Housing > Fair Housing Rights > Prohibited Conduct

HN14[] **Fair Housing Rights, Enforcement Actions**

Under the Fair Housing Act (FHA), *42 U.S.C.S. §§ 3601-3631*, discrimination is the sale or rental of housing is prohibited on the basis of race, color, religion, sex, familial status, or national origin. To assert a violation under the FHA, a plaintiff must show: (1) he is the victim of a discriminatory housing practice; (2) that makes unavailable or denies housing on account of a protected classification. *42 U.S.C.S. § 3604(a)*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN15[] **Actual Monopolization, Claims**

Section 2 of the Sherman Act makes it unlawful to monopolize, or conspire to monopolize, interstate or international commerce. *15 U.S.C.S. § 2*. Liability under *§ 2* requires: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power, as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. To support an inference of monopoly power, a plaintiff must allege that a firm has a dominant share in a relevant market and that significant entry barriers protect that market. Barriers may include such factors as regulatory requirements, high capital costs, or technological obstacles that prevent new competition from entering a market in response to a monopolist's supra-competitive prices. Anti-competitive conduct is defined as conduct to obtain or maintain monopoly power as a result of competition on some basis other than the merits. Importantly, conduct that merely harms competitors, while not harming the competitive process itself, is not anti-competitive.

For VIACOM INTERNATIONAL, INC. d/b/a "VH-1" or "VH1", Defendant: JEANETTE MELENDEZ BEAD, LEAD ATTORNEY, LEVINE SULLIVAN KOCH & SCHULZ, L.L.P., WASHINGTON, DC.

Judges: EDUARDO C. ROBRENO, UNITED STATES DISTRICT JUDGE.

Opinion by: EDUARDO C. ROBRENO

Opinion

[*662] MEMORANDUM

EDUARDO C. ROBRENO, J.

Defendant Viacom International Inc. filed the instant motion to dismiss (doc. no. 4), arguing that Plaintiff failed to state a claim upon which relief can be granted. For the reasons that follow, Defendant's motion to dismiss will be granted. [1]

I. BACKGROUND

Pro se Plaintiff Gordon Roy Parker, an individual who currently residing in Pennsylvania, brings the instant action against Defendants, Viacom International Inc., Venusian Arts Corp. (hereinafter "VAC"), and Erik "Mystery" Von Markovik. Defendant Viacom International Inc. is a Delaware corporation with its principal **[**2]** place of business in New York, and the network on which the reality show, "The Pickup Artist" (hereinafter "TPUA") aired. Defendant Venusian Arts Corporation is headquartered in California, and provides information and live seminars on "dating" related advice. Defendant Von Markovic is an owner/ officer of Defendant VAC.

Defendant Viacom's reality television program, TPUA, debuted on August 5, 2007. [2] Plaintiff alleges violations of the Lanham Act, Fair Housing Act, and ***Antitrust law*** stemming from this television program. Specifically, Plaintiff's complaint contains five clusters of allegations:

1. *Misleading advertising under the Lanham Act*. This assertion is premised upon three misrepresentations: (a) Defendant Viacom lied about whether certain women in a dance club scene were paid actors; (b) one scene in a strip club was **[**3]** "completely fake;" and (c) Defendant Viacom overstated the social awkwardness of male contestants.

2. *False designations of origin under the Lanham Act*. Plaintiff contends that he is in the business of providing "seduction" advice to members of the public. In connection with this venture, Plaintiff authored a book entitled, "29 Reasons Not to Be a Nice Guy." Plaintiff asserts that he has "first use trademark" to the use of the term 'pivot,' as used in his book, in commerce related to "seduction" advice. Plaintiff contends that Defendants' use of the term constitutes false designations of the origin under the Lanham Act.

---

[1] As an alternative argument, Defendant contends that Plaintiff's complaint should be dismissed for violations of *Federal Rule of Civil Procedure Rule 8(a)*. Because the Court grants Defendant's Motion to Dismiss, the Court need not address Defendant's alternative argument.

[2] TPUA is an elimination-style reality show. Defendant Von Markovik instructs socially awkward male contestants how to meet women and challenges them to test their new skills on camera in various outings to clubs and bars. One contestant is eliminated in each episode; at the end of the season the remaining competitor is awarded the title of "Master Pick-Up Artist."

3. *Fair Housing Act violations*. Plaintiff alleges that Defendant Von Markovik posted disparaging messages about Plaintiff on the Internet and attempted to harass Plaintiff, "in the hope" that Plaintiff would move out of his residence and thereafter lose his internet access.

4. *Antitrust violations*. Plaintiff contends that Defendant Von Markovik won a battle among the seduction gurus and is now "abus[ing] their majority relevant market share."

[*663] 5. *Tortious Interference*. Plaintiff alleges that Defendants tortiously interfered with Plaintiff's housing contract.

II. DEFENDANT'S **[**4]** MOTION TO DISMISS

A. *Legal Standard - Pro Se Litigant*

HN1[] In deciding a motion to dismiss for failure to state a claim upon which relief can be granted, the Court must "accept as true all allegations in the complaint and all reasonable inferences that can be drawn therefrom, and view them in the light most favorable to the non-moving party." *DeBenedictis v. Merrill Lynch & Co., Inc., 492 F.3d 209, 216 (3d Cir. 2007)* (quotation omitted). The Court need not, however, "credit either bald assertions or legal conclusions in a complaint when deciding a motion to dismiss." *Id*. (quotation omitted). The "'[f]actual allegations must be enough to raise the right to relief above the speculative level.'" *Phillips v. County of Allegheny, 515 F.3d 224, 232 (3d Cir. 2008)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 & n.3 (2007))*. Viewing the complaint in this manner, the Court must dismiss the complaint if it fails to state a claim upon which relief can be granted. ***HN2***[] In cases involving pro se litigants, the Court must "liberally construe" Plaintiff's pleadings. *Dluhos v. Strasberg, 321 F.3d 365, 369 (3d Cir. 2003)*. [3]

B. *Analysis*

Defendant Viacom International Inc. filed the instant motion to dismiss, or in the alternative, motion for a more definite statement (doc. no. 4). Defendant addresses each of Plaintiff's claims in turn. Plaintiff has filed **[**6]** a response in opposition to this motion (doc. no. 7).

1. *False and Misleading Advertising Claim under the Lanham Act*

Defendant contends that Plaintiff's false and misleading advertising claims fail under the Lanham Act for three reasons: (1) Plaintiff lacks standing to bring a false and misleading advertising claim under this Act; (2) the alleged false statements at issue do not constitute commercial advertising or promotion; and (3) Plaintiff's alleged injuries are wholly speculative.

HN3[] To have standing [4] to assert a false and misleading advertising claim under **[*664]** the Lanham act, a plaintiff must show that he "has a reasonable interest to be protected against false advertising." *Thorn v. Reliance*

---

[3] Defendant points out that Plaintiff is a "serial litigator" who has brought a **[**5]** number of actions in the Eastern District of Pennsylvania. *See e.g., Parker v. Yahoo!, Inc*., No. 07-2757 (E.D. Pa) (alleging claims for copyright infringement, breach of contract, and negligence against Yahoo! and Microsoft arising from cached copies of plaintiff's USENET postings); *Parker v. Learn the Skills Corp*., No. 06-229 (D. Del.) (alleging antitrust and Lanham Act claims); *Parker v. Trustees of Univ. of Pennsylvania*, No. 05-4874 (E.D. Pa.) (alleging employment discrimination); *Parker v. Learn the Skills Corp*., No. 05-2752 (E.D. Pa.) (alleging antitrust and related claims); *Parker v. Google, Inc*., No. 04-3918 (E.D. Pa.) (alleging copyright infringement and Lanham Act claims against Google and 50,000 "John Doe" defendants); *Parker v. Learn the Skills Corp*., No. 03-6936 (E.D. Pa.) (alleging antitrust); *Parker v. Doe*, No. 02-7215 (E.D. Pa.) (alleging defamation); *Parker v. Univ. of Pennsylvania*, No. 02-567 (E.D. Pa.) (alleging employment discrimination).

[4] ***HN4***[] Standing consists of both constitutional and prudential components. Constitutional standing is derived from the Article III case and controversy requirement and mandates that a plaintiff "demonstrate that he has suffered injury in fact, that the injury is fairly traceable to the actions of the defendant, and that the injury will likely be redressed by a favorable decision." *Bennett v. Spear, 520 U.S. 154, 162, 117 S. Ct. 1154, 137 L. Ed. 2d 281 (1997)*. In contrast, prudential standing is a set of judge made

Van Co., 736 F.2d 929, 933 (3d Cir. 1984). The Third Circuit identified the following factors to consider in the determination of whether Plaintiff has a "reasonable interest": (a) nature of plaintiff's alleged injury; (b) directness or indirectness of asserted injury; (c) the proximity or remoteness of the party to the alleged injurious conduct; (d) the speculativeness of the damages claim; and (e) the risk of duplicative damages or complexity in apportioning claims. Conte Bros. Automotive, Inc. v. Quaker State-Slick 50, Inc., 165 F.3d 221, 233 (3d Cir. 1998) **[**7]** (citing Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 538, 540, 542, 543, 544, 103 S. Ct. 897, 74 L. Ed. 2d 723)).

In *Conte*, the Third Circuit affirmed the district court's dismissal of plaintiffs' complaint, concluding that plaintiffs lacked standing to sue under the Lanham Act. Id. at 224. The plaintiffs in *Conte*, a nationwide class of retail sellers of motor oil, alleged violations of the Lanham Act caused by the false advertising of defendant, a company manufacturing **[**8]** Slick 50, a Teflon-based engine lubricant. [5] Plaintiffs contended that defendant's false advertising statements increased Slick 50 sales and decreased sales of competing products sold by plaintiffs. *Id*.

In deciding that plaintiffs lacked standing under the Lanham Act, the Third Circuit applied the above articulated factors to determine if plaintiffs had a "reasonable interest to be protected against false advertising." First, the court analyzed the nature of plaintiffs' injuries and noted that plaintiffs alleged a commercial interest but not a *competitive harm.* Id. at 234. Specifically, **HN5**[] the plaintiffs alleged a loss of sales at the retail level because of alleged false advertising, but did not allege an impact on the ability to compete; accordingly, the harm alleged was not the type of injury that the Lanham Act sought to prevent. Id. at 234-35. Second, the court found that the remoteness of the allegedly injurious conduct weighed against the plaintiffs' right to sue because the defendant's conduct did not directly **[**9]** relate to plaintiffs' alleged harm. Id. at 235. [6] Third, the court noted that the plaintiffs' injuries, "if not speculative, were certainly avoidable," because the plaintiffs could have adjusted their Slick 50 stock to fit the "artificially-increased popularity" of the product. *Id*. Finally, **HN6**[] the court found that recognizing the right of all potentially injured parties in the distribution chain to assert standing under the Lanham Act would subject the defendant to multiple liability for the same conduct and would result in administratively complex damages proceedings. *Id*. [7]

[*665] Similarly, here, Defendant argues that Plaintiff lacks standing to assert a cause of action in the instant matter. As previously detailed, Plaintiff alleges that Defendant committed three instances of false advertising: (a) Viacom lied about whether certain women in a dance club scene were paid actors; (b) a certain scene in a strip club was "completely fake;" and (c) Viacom overstated the social awkwardness of male contestants. Even assuming that these instances do in fact constitute false advertising, applying the factors articulated by the Third Circuit in Conte, Plaintiff has failed to establish standing to sue under the Lanham Act for several **[**11]** reasons.

---

rules which limit access to the federal courts to those litigants whose grievances fall within the zone of interests protected or regulated by the statutory provision invoked in the suit. *Id*. Here, prudential standing is at issue.

[5] Specifically, in defendant's advertising material it stated, "one quart of Slick 50 substitutes for one quart of regular motor oil at the time of an oil change." Id. at 224.

[6] In reaching this conclusion, the court compared its decision in Serbin v. Ziebart Int'l Corp., 11 F.3d 1163 (3d Cir. 1993), where it held that the plaintiffs lacked standing to sue under the Lanham Act. In *Serbin*, **HN7**[] the Third Circuit held that plaintiff consumers whose purchases were influenced by false advertising lacked standing to sue under the Lanham Act because defendants' conduct was not directly related to plaintiffs' injuries. Id. at 1177. In *Conte* the Third Circuit commented that although the plaintiffs in *Serbin* ultimately lacked standing to sue, the *Conte* plaintiffs' injuries were even further attenuated **[**10]** from the *Conte* defendant's conduct than was the *Serbin* plaintiffs' injuries in comparison to the *Serbin* defendants' conduct. 165 F.3d at 235.

[7] The Third Circuit went on to state, "If every retailer had a cause of action for false adverting regardless of the amount in controversy, regardless of any impact on the retailer's ability to compete, regardless of any impact on the retailer's good will or reputation, and regardless of the remote nature of the injury suffered, the impact on the federal courts could be significant." Conte, 165 F.3d at 235.

First, similar to the insufficient commercial interest alleged by the *Conte* plaintiffs, here, Plaintiff alleges commercial interest in the "seduction education" industry, but fails to allege the required competitive harm caused by Defendant's actions. Second, like the remoteness of the alleged harmful conduct to the plaintiff's injuries in *Conte*, Plaintiff's injuries are remote as he has failed to state a direct connection between Defendants' false statements and his injuries. Finally, allowing Plaintiff to establish Lanham Act standing on these facts would raise the same administrative concerns expressed by the Third Circuit in *Conte*, as Defendants would face multiple liability for the same conduct. Accordingly, because Plaintiff lacks standing to assert this claim under the Lanham Act, his claim on this ground is dismissed.

2. *False Designation of Origin Claim*

Plaintiff argues that Defendant Viacom's unattributed use of the word "pivot" constitutes a claim for false designation of origin under the Lanham Act. According to Plaintiff, the term "pivot" describes a seduction technique, "a true 'gaming' tactic," that "any man can implement . . . with relatively equal effectiveness." **[**12]** Pl's Compl. at P 47. Plaintiff contends that he "debuted and defined both the term 'pivot' and the underlying concepts behind the theory in his 1999 book '29 Reasons Not to Be a Nice Guy.'" *Id*. at P 46. Defendant argues that Plaintiff has failed to allege the essential elements of a false designation of origin claim under the Lanham Act.

HN8[] To state a claim for false designation of origin under the Lanham Act, a plaintiff must show: (1) defendant "uses a false designation of origin;" (2) "[t]hat such use of a false designation occurs in interstate commerce in connection with goods and services;" (3) "[t]hat such false designation is likely to cause confusion, mistake or deception as to origin, sponsorship, or approval of [plaintiff's] goods or services by another person;" and (4) "[t]hat [plaintiff] has been or is likely to be damaged." *AT&T v. Winback and Conserve Program, Inc., 42 F.3d 1421, 1428 (3d Cir. 1994)*. Plaintiff has failed to state any of the essential elements of this action.

First, the "false designation of origin" element is unsatisfied because Defendant is the producer or "origin of" TPUA, the good or service in question. Pursuant to Supreme Court precedent ***HN9***[] "the phrase 'origin **[**13]** of goods' is . . . incapable of connoting the person or entity that originated the ideas or communications that 'goods' embody or contain." *Dastar Corp. v. Twentieth Century Fox Film Corp., 539 U.S. 23, 31, 123 S. Ct. 2041, 156 L. Ed. 2d 18 (2003)*. In *Dastar*, the defendant allegedly copied content from plaintiffs' television series and repackaged the content as videotapes **[*666]** that it sold on its own. *Id*. The plaintiffs asserted that the sale of the videotapes, without proper credit to the television series, violated the false designation of origin prong. The Court held that because the "origin of goods" was the actual, *tangible* videotapes produced, and not the ideas or concepts within the videotapes, the plaintiffs' claim failed the "origin of goods" prong.

This principle was applied in *Schiffer Publ'g, Ltd. v. Chronicle Books, LLC, 350 F. Supp. 2d 613, 618 (E.D. Pa. 2004)*. In *Schiffer Publ'g*,***HN10***[] the court held that false designation of origin did not arise where the defendant published a textile book containing plaintiff's copyrighted photographs. *Id*. Determinative to the court's decision, the court found that the "origin of goods" at issue was the *actual book* that defendant publishers compiled, rather than the plaintiff's **[**14]** photographs contained within. *Id*.

Like the videotapes in *Dastar* and the textile book in *Schiffer Pub'g*, the "origin of the goods or services" at issue in the instant matter is Defendant's production of TPUA. Just as the plaintiff's television series in *Dastar*, and the plaintiff's photographs in *Schiffer Pub'g*, were component parts of the good or service at issue, Plaintiff's term "pivot" is a component part of TPUA, but not the "origin of good or service" itself. Accordingly, because Defendant's production of TPUA is the "origin of the good" at issue, rather than Plaintiff's term "pivot," Plaintiff failed to satisfy the false designation of origin element.

Second, the facts viewed in the light most favorable to Plaintiff do not satisfy the requirement that the party asserting copyright violation has "a valid and legally protectable mark." *Louis Vuitton Malletier & Oakley Inc. v. Veit, 211 F. Supp. 2d 567, 580 (E.D. Pa. 2002)*. Notably, ***HN11***[] a claim for false designation of origin presupposes the plaintiff has used the designation of origin in issue to identify the plaintiff's *own goods or services. A.J. Canfield Co. v. Honickman, 808 F.2d 291, 296 (3d Cir. 1986)*.

Here, Plaintiff alleges that **[**15]** he "has a 'first use trademark' to the use of the term 'pivot' in commerce related to seduction-advice, but then notes that the work has acquired a secondary meaning as applied to seduction. (Pl.'s Compl. at P 56 and 48). Importantly, Plaintiff does not allege that the secondary meaning in the industry is a mark to identify himself as the source of any goods or services that he manufactures or provides. Plaintiff's allegations undermine Plaintiff's conclusory claim that he has used the term as a trademark or that the term has acquired a secondary meaning.

Finally, even if the Court were to conclude that Plaintiff's use of the term "pivot" constituted a designation of origin, Plaintiff's ***HN12***[] claim still fails because Plaintiff did not assert that the false designation is "likely to cause confusion, mistake, or deception" as to the origin of Plaintiff's goods.

In *Parker v. Google, Inc*., Plaintiff brought a claim under the same theory which was rejected by the Third Circuit. *242 Fed. Appx. 833, 838*. There, Plaintiff also alleged that defendant Google republished "Ray FAQ," a website which contained defamatory comments about him. *Id*. Plaintiff asserted that Google users searching for Plaintiff's **[**16]** site would find "Ray FAQ" and believe that Plaintiff created the site. *Id*. However, because Plaintiff failed to allege a likelihood of confusion with respect to the origin of his seduction website, the Third Circuit held that dismissal of the claim was appropriate. *Id*. As in *Parker*, Plaintiff in the instant matter **[*667]** failed to allege how Defendant's use of the term "pivot" created any confusion to the origin of this term. Accordingly, Plaintiff's claim on this ground is dismissed. [8]

3. *Fair Housing Act Violations*

Defendant avers that Plaintiff has failed to state a claim for a violation of the Fair Housing Act. Plaintiff contends that Defendant Von Markovik, posted an internet link and exhibit which implied Plaintiff was mentally ill, disclosed his home address, and encouraged third parties to contact authorities about him. Because of these alleged **[**18]** internet posts, Plaintiff contends that Defendant aimed to "force him to move, in the hope Plaintiff would lose his internet access." (Pl.'s Compl. at P 134).

HN14[] Under the Fair Housing Act, discrimination is the sale or rental of housing is prohibited on the basis of race, color, religion, sex, familial status, or national origin. *42 U.S.C §§ 3601-3631*. To assert a violation under the Fair Housing Act, plaintiff must show: (1) he is the "victim of a discriminatory housing practice;" (2) "that make[s] unavailable or den[ies]' housing" on account of a protected classification. *42 U.S.C. § 3604(a)*. Here, Plaintiff has made no such claim. Rather Plaintiff describes Defendants' behavior as harassment, designed to make him lose access to the Internet.

4. *Antitrust Violations*

Plaintiff alleges that the migration of the "seduction community" from a newsgroup on USENET to a website owned by Learn the Skills Corporation caused Defendant Von Markovik to win the "mini war" among the gurus for the favor

---

[8] In addition, Plaintiff brought a disparagement claim under the Lanham Act. In relevant part, the Lanham Act provides, ***HN13***[] "[a]ny person who, on or in connection with any goods or services . . . uses in commerce any word, term, name, symbol, or device . . . or false or misleading representation of fact which . . . in commercial advertising or promotion misrepresents the nature, characteristics, qualities, or geographic origin of . . . another person's goods, services or commercial activities, shall be liable in a civil action. . ." *Parker, 242 Fed. Appx. 833, 838-39 (3d Cir. 2007)* (quoting *15 U.S.C. § 1125(a)(1)(B)*).

Plaintiff alleges that Defendant Von Markovik directed non-party Derek Trust to post a comment **[**17]** and a link to a compressed or "zipped" document on the TPUA website. Pl's Compl. at § 114. The comment read: "Ray's books are free . . . he can't even give [them] away. He has to piggyback his garbage e-books on affiliate orders for The Game." *Id*.

In a previous case, Plaintiff raised a trade disparagement claim under the Lanham Act, citing disparaging statements about his seduction services. *Parker, 242 Fed. Appx. at 839*. Because Plaintiff did not purport that such statements were made in the context of commercial advertising or promotion, the Third Circuit upheld the District Court's dismissal of this claim. *Id.* Similarly, in the instant case, Plaintiff failed to assert that the alleged disparaging statement identified a proposed commercial transaction, and thus failed to state a disparagement claim under the Lanham Act.

of non-party Neil Strauss, which purportedly "shifted the balance of power in the community" to Defendant Von Markovik. Plaintiff also alleges that Defendants Von Markovik and VAC created an "affiliate **[**19]** program," through which Plaintiff asserts they "abused their majority relevant market share." [9]

Section 2 **HN15**[] of the Sherman Act makes it unlawful to monopolize, or conspire to monopolize interstate or international commerce. 15 U.S.C. § 2. Liability under Section 2 requires, "(1) the possession of monopoly power in the relevant **[*668]** market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." United States v. Grinnell Corp., 384 U.S. 563, 570-571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966); Schuylkill Energy Resources v. Pennsylvania Power & Light Co., 113 F.3d 405, 412-413 (3d Cir. 1997). To support an inference of monopoly power, a plaintiff must allege that a firm has a dominant share in a relevant market, and that significant "entry barriers" protect that market. Harrison Aire, Inc. v. Aerostar Int'l, Inc., 423 F.3d 374, 380 (3d Cir. 2005). Barriers may include such factors as "regulatory requirements, high capital costs, or technological obstacles that prevent new competition from entering a market in response to a monopolist's supracompetitive **[**20]** prices." Parker v. Learn the Skills Corp., 530 F. Supp. 2d 661, 677 (D. Del. 2008) (citing United States v. Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34, 51 (D.C. Cir. 2001)).

Anti-competitive conduct is defined as conduct to obtain or maintain monopoly power as a result of competition on some basis other than the merits. LePage's Inc. v. 3M, 324 F.3d 141, 169 (3d Cir. 2003). Importantly, conduct that merely harms competitors, while not harming the competitive process itself, is not anti-competitive. Parker, 530 F. Supp. 2d at 677 (citing Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)).

Plaintiff brought a similar antitrust claim, premised upon market share abuse, which was rejected by the District of Delaware. Parker, 530 F. Supp. 2d at 661. In *Parker*, Plaintiff alleged that defendants created a market for seduction products and specifically prohibited anyone from dealing with him. *Id*. Specifically, Plaintiff alleged that defendants posted derogatory and hostile comments about him on USENET, instructed internet users to use software to avoid messages and information generated by plaintiff, and invited readers interested in seduction to visit a private message board hosted **[**21]** by defendant. Id. 669. Finding that Plaintiff failed to state an antitrust claim, the court held that although defendants' conduct may have harmed Plaintiff, it did not harm the competitive process as a whole. Id. at 677.

In the instant case, Plaintiff makes a virtually indistinguishable argument. Specifically, Plaintiff contends that Defendants attempted restrict the flow of information in the seduction industry, so as to divert internet traffic from Plaintiff's website. [10] Just as in Parker, here, Plaintiff alleges personal harm, but does not allege harm to the competitive process as a whole. Accordingly, for the reasons set forth in *Parker*, Plaintiff's claim on this ground is dismissed.

5. *Tortious Interference*

Plaintiff alleges that Defendants tortiously interfered with his housing contract. The Court is without jurisdiction over this claim for two reasons. First, Plaintiff's complaint is predicated upon federal question jurisdiction. Because Plaintiff's claims based on federal questions are dismissed, the Court will decline to exercise supplemental jurisdiction, pursuant to 28 U.S.C. § 1367, over Plaintiff's tortious interference claims. Second, to the extent that the Court could **[**22]** exercise diversity **[*669]** jurisdiction over this claim, Plaintiff has failed to allege jurisdiction on this basis, or plead the necessary amount in controversy and citizenship requirements. Accordingly, because the Court does not have jurisdiction over this claim, Plaintiff's tortious interference claim is dismissed.

An appropriate order follows.

---

[9] Notably, Plaintiff did not name Viacom in this count.

[10] Plaintiff contends that Defendant Von Markovik created fastseduction.com, an alleged "seduction portal." Plaintiff asserts that Defendants used this site to restrict advertising in the seduction industry, and impair Plaintiff's access to the market.

ORDER

AND NOW, this **11th** day of **March 2009**, upon consideration of Defendant's Motion to Dismiss (doc. no. 4) and response thereto (doc. no. 7), it is hereby **ORDERED** that Defendant's Motion to Dismiss is **GRANTED**;

IT IS FURTHER ORDERED that as to Plaintiff's Counts I., II., III., IV., and V., Plaintiff's claims are dismissed on the merits. As to Plaintiff's Count VI, Plaintiff's claim is dismissed for lack of jurisdiction;

IT IS FURTHER ORDERED that the case shall be marked **CLOSED**.

AND IT IS SO ORDERED.

OPINION AND ORDER GRANTING DEFENDANT'S MOTION FOR JUDGMENT ON THE PLEADINGS

I. INTRODUCTION

Before the Court is Defendant the National Collegiate Athletic Association's ("NCAA") Motion for Judgment on the Pleadings. (Doc. 7). Plaintiffs Warrior Sports and Athlete's Connection filed a complaint alleging that the NCAA's act of changing the rules regarding the type of lacrosse sticks that are permitted in collegiate play gave rise to claims of (1) a federal ***antitrust law*** violation, (2) tortious interference with business relationships and expectancies, and (3) promissory estoppel. (Doc. 1). For the reasons that follow, the Court **[*2] GRANTS** the NCAA's Motion for Judgment on the Pleadings.

II. STATEMENT OF FACTS

This is a motion for judgment on the pleadings under *Federal Rule of Civil Procedure 12(c)*. Accordingly, because the Court, in deciding such a motion, must take all of the opposing party's well-pleaded allegations as true, the following facts are taken from Plaintiffs' complaint. See *Rawe v. Liberty Mut. Fire Ins. Co., 462 F.3d 521, 526 (6th Cir. 2006)*.

This is a case involving the NCAA's rules regarding the lacrosse stick heads that may be used in collegiate play. Plaintiffs allege that these rules are particularly influential because they not only govern the sticks that may be used in collegiate lacrosse, but they are also adopted by most of the sports' governing bodies, such as the National Federation of High School Sports.

Before September 2006, the NCAA had used the same rules regarding the allowable dimensions of lacrosse stick heads for 30 years. Manufacturers, including Warrior Sports, were able to submit their sticks to the NCAA to obtain confirmation that their sticks complied with the lacrosse rules, and Warrior Sports specifically notes that it did so in 2000. The pre-September 2006 rule only required **[*3]** that lacrosse heads be at least 6.5" at their widest point and 10" from top to bottom. In September 2006, the NCAA rules committee changed the rules ("2006 Rule Change"), effective January 1, 2009, as follows:

Measurement from throat of crosse	**Minimum distance between narrowest point on the crosse**
1.25"	2.75" (all measurements)
3"	3.25" (all measurements)
5"	4.25" front and 3.5" back
The widest point	6.5" front and 6" back

The NCAA claimed that it was changing the dimensions of the lacrosse stick head in order to promote free dislodgment of the ball during play. This rule would have rendered the vast majority of all current men's lacrosse heads illegal, including 14 of Warrior Sports' 15 lacrosse heads. Warrior Sports initiated a lawsuit over this rule change, but it subsequently withdrew the suit when the NCAA agreed to reconsider the 2006 rule change.

In September 2007, the NCAA rules committee adopted the following rules ("2007 Rule Change"), to be effective January 1, 2010:

Measurement from throat of crosse	**Minimum distance between narrowest point on the crosse**
1.25"	3" (all measurements)
3"	3" (all measurements)
5"4" front and 3.5" back	
The widest point	6.5" front and 6" back

This rule also would have **[*4]** rendered almost all current lacrosse heads illegal and, in particular, would have rendered all of Warrior Sports' heads illegal. In addition, the aforementioned specifications tracked designs patented by Warrior Sports. The NCAA claims that it discovered these patents after it adopted the 2007 Rule Change. Accordingly, the NCAA asked Warrior Sports whether it would be willing to license its intellectual property rights to other lacrosse manufacturers in connection with the 2007 Rule Change. The NCAA also asked to know the terms under which Warrior Sports would grant such licensing rights. Plaintiffs allege that this letter was an implicit threat that the NCAA would change the rules again to Warrior Sports detriment if Warrior Sports did not cooperate. Warrior Sports responded by claiming that it was inappropriate for the NCAA to be brokering deals between it and its competitors. Warrior Sports went on to indicate that it could not make a decision to license its intellectual property rights in the abstract because it made those decisions on a case-by-case basis.

The NCAA subsequently implemented the following rule change in February 2008 ("2008 Rule Change"), to be effective January **[*5]** 1, 2010:

Measurement from throat of crosse	**Minimum distance between narrowest point on the crosse**
1.25"	3" (all measurements)
3"	3" (all measurements)
5"	3.5" - 4" front and 3.5" back
The widest point	6" - 6.5" front and 6" back

This rule also would render all of Warrior Sports current lacrosse stick heads illegal. Plaintiffs claim that the NCAA enacted this rule in collusion with Warrior Sports' competitors. Plaintiffs allege that the rule changes by the NCAA will significantly inhibit competition and innovation in the lacrosse head market. In addition, Plaintiffs contend that the rule change will force lacrosse manufacturers to scrap their inventory, accept return of products from retailers, and retool their manufacturing process to produce new sticks.

III. STANDARD OF REVIEW

This Court will grant a *Rule 12(c)* motion for judgment on the pleadings "when no material issue of fact exists and the party making the motion is entitled to judgment as a matter of law." *Rawe, 462 F.3d at 526* (citation omitted). In reviewing such a motion, the Court construes the complaint in the light most favorable to the plaintiffs, accepts the complaint's factual allegations as true, and determines whether the plaintiffs **[*6]** can prove no set of facts in support of their claims that would entitle them to relief. Id.

IV. ANALYSIS

1. Antitrust Claims

The NCAA argues that Plaintiffs' antitrust claims fail because the lacrosse stick head rules are not commercial in nature and, therefore, not subject to antitrust scrutiny.

Section 1 of the Sherman Act states, "Every contract, combination . . . or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. The Sixth Circuit has held that the actions of the NCAA are subject to the Sherman Act when the actions are "commercial in nature." *Worldwide Basketball & Sport Tours, Inc. v. NCAA (Worldwide Basketball), 388 F.3d 955, 958 (6th Cir. 2004)*. For example, in NCAA v. Board of Regents of Univ. of Okla., the Supreme Court held that the NCAA's restriction of the number of televised football games violated the Sherman Act. *468 U.S. 85, 120, 104 S. Ct. 2948, 82 L. Ed. 2d 70*. The Court also noted, however, "It is reasonable to assume that most of the regulatory controls of the NCAA are justifiable means of fostering competition among amateur athletic teams and therefore procompetitive because they enhance public interest in intercollegiate **[*7]** athletics." *Id. at 117*. The court went on to distinguish the restriction on television broadcasts, which was at issue in that case, from, among other things, the "rules defining the conditions of the contest." Id. Likewise, in Worldwide Basketball, the Sixth Circuit held that an NCAA rule limiting the number of preseason tournaments that a school's basketball team could participate in was commercial in nature because the rule "has some commercial impact insofar as it regulates games that constitute sources of revenue for both the member schools and the Promoters." *388 F.3d at 959*.

The Sixth Circuit also recently reaffirmed this principle when it held that the NCAA's imposition of sanctions, which made it difficult for a coach to obtain employment with NCAA schools, as a result of the coach's violation of NCAA recruiting and academic rules, did not constitute an antitrust violation. *Bassett v. NCAA, 528 F.3d 426, 429 (6th Cir. 2008)*. In that case, the Sixth Circuit indicated that it agreed with the district court's conclusion that the NCAA's enforcement of the rules at issue was not commercial activity because the rules "were **[*8]** intended to ensure fair competition in intercollegiate athletics." *Id. at 433*.

In order to establish a violation of the Sherman Act, a plaintiff must prove that the defendant unreasonably restrained trade in a relevant market. *NHL Players' Ass'n v. Plymouth Whalers Hockey Club, 325 F.3d 712, 718 (6th Cir. 2003)*. The reasonableness of a trade restraint is assessed using either a "*per se* rule" or a "rule of reason." Id. In this case, Warrior Sports does not contend that the *per se* rule applies. (See doc. 13 at 12). The rule of reason uses a burden-shifting framework that requires the court to analyze the history of the restraint and the restraint's effect on competition. See *NHL Players' Ass'n, 325 F.3d at 718*.

> First, the plaintiff must establish that the restraint produces significant anticompetitive effects within the relevant product and geographic markets. If the plaintiff meets this burden, the defendant must come forward with evidence of the restraint's procompetitive effects to establish that the alleged conduct justifies the otherwise anticompetitive injuries. If the defendant is able to demonstrate procompetitive effects, the plaintiff then must show that any legitimate objectives **[*9]** can be achieved in a substantially less restrictive manner.

Id. (quotation and citations omitted).

The NCAA's rule regarding the type of lacrosse equipment that may be used during play appears not to be subject to antitrust scrutiny, in and of itself, because, it is not "commercial in nature." *Worldwide Basketball, 388 F.3d at 958*. In particular, the rule does not directly relate to the NCAA's commercial or business activities. See *Bassett, 528 F.3d at 429*. As such, the rule is only directed towards increasing the quality of play in college lacrosse and, thereby, enhancing interest in intercollegiate lacrosse. See *Board of Regents of Univ. of Okla., 468 U.S. at 117* (stating that most of the NCAA's regulations are a "justifiable means of fostering competition among amateur athletic teams, [which] enhance[s] public interest in intercollegiate athletics."); *Bassett, 528 F.3d at 429* (holding that the NCAA's enforcement of rules that were intended to insure fair competition in intercollegiate athletics was not commercial activity).

This case is analogous to Adidas America, Inc. v. NCAA, where the district court found that a NCAA bylaw prohibiting manufacturer's logos that were larger than **[*10]** a specified size was noncommercial. *40 F.Supp.2d 1275, 1286 (D.Kan. 1999)*. The court first stated that the bylaw had noncommercial purposes and objectives. Id. The court went on to find that the bylaw did not confer any direct economic benefit upon the NCAA because, even though the bylaw did not restrict "NCAA Football" logos, there was no evidence that the NCAA was a competitor in the sports apparel market. Id.

Like the rule in *Adidas America, Inc.*, the rule relating to lacrosse stick heads has a noncommercial purpose--to promote free dislodgment of the ball. In addition, Plaintiffs do not allege that the NCAA is a competitor in the lacrosse stick market or that the rule at issue in this case confers any commercial benefit upon the NCAA. Accordingly, because the rule, in and of itself, is not commercial in nature, it is not inherently subject to challenge under the Sherman Act. See *Worldwide Basketball, 388 F.3d at 958*.

In this case, however, Plaintiffs allege that the 2008 Rule Change was enacted in collusion with Warrior Sports' competitors. Accepting this allegation as true, the 2008 Rule Change would be commercial in nature because Warrior Sports' competitors presumably sought to **[*11]** enact the rule in order to benefit commercially. To violate the Sherman Act, however, the 2008 Rule Change also must restrain trade or commerce. See *15 U.S.C. § 1*. As will be shown, the 2008 Rule Change does not constitute such a restraint.

Plaintiffs allege that only the 2008 Rule Change was enacted in collusion with Warrior Sports' competitors. The only way the 2008 Rule Change differed from the 2007 Rule Change was that it reduced the minimum dimension for the front of the stick head. Therefore, any stick that was permitted under the 2007 Rule Change is still permitted under the 2008 Rule Change. Furthermore, some sticks that were not previously permitted under the 2007 Rule Change will now be permitted under the 2008 Rule Change's reduced minimum dimensions. As such, the 2008 Rule Change does not violate the Sherman Act because it does not restrict trade or commerce. See *15 U.S.C. § 1*. Thus, Plaintiffs' Sherman Act claim fails due to the fact that the 2006 and 2007 Rule Changes were not subject to the Sherman Act, and the 2008 Rule Change does not restrict trade or commerce.

2. Tortious Interference claim

The elements of the tort of interference with an advantageous business relationship **[*12]** are (1) a valid business relationship or expectancy (2) known to the defendant who (3) engaged in intentional conduct (4) causing the disruption or termination of that relationship or expectancy resulting in (5) damages. *Ass'n Research & Dev. Corp. v. CNA Fin. Corp., 123 Mich. App. 162, 169, 333 N.W.2d 206 (Mich. Ct. App. 1983)*; *N. Plumbing & Heating, Inc. v. Henderson Bros., Inc., 83 Mich. App. 84, 93, 268 N.W.2d 296 (1978)*. In order to make out such a claim, a plaintiff must show either an act that is *per se* unlawful or a lawful act done with a malicious and unlawful purpose. *CMI Int'l, Inc. v. Intermet Int'l Corp., 251 Mich. App. 125, 131, 649 N.W.2d 808 (Mich. Ct. App. 2002)* (quotation omitted).

Although Plaintiffs allege that the NCAA colluded with Warrior Sports' competitors in adopting the 2008 Rule Change, Plaintiffs' allegations do not show that the adoption of the 2008 Rule Change was done with a malicious and unlawful purpose, because the only effect of the 2008 Rule Change was to increase the number of sticks that would be allowed under the NCAA's rules. Furthermore, as Plaintiffs do not allege that the NCAA adopted either the 2006 or 2007 Rule Changes in collusion with Warrior Sports' competitors, Plaintiffs' allegations **[*13]** also do not show that these rule changes were adopted with a malicious and unlawful purpose. Accordingly, Plaintiffs' tortious interference claim fails. See *id*.

3. Promissory Estoppel

The NCAA argues that Warrior Sports' claim fails because it has not alleged that the NCAA promised not to change the lacrosse stick dimension rules.

The elements of a promissory estoppel claim are:

(1) a promise,

(2) that the promisor should reasonably have expected to induce action of a definite and substantial character on the part of promisee,

(3) which in fact produced reliance or forbearance of that nature, and

(4) in circumstances such that the promise must be enforced if injustice is to be avoided.

Ardt v. Titan Ins. Co., 233 Mich. App. 685, 692, 593 N.W.2d 215 (Mich. Ct. App. 1999).

Warrior Sports claims that the NCAA's act of allowing manufacturers to submit equipment for review constitutes a promise that approved equipment will be legal for play. This claim fails because the NCAA's act of reviewing proposed lacrosse sticks is, at most, a promise that approved sticks complied with the rules in effect at that time. The NCAA was not promising never to change its rules in a way that would make a previously approved stick **[*14]** illegal. Therefore, Warrior Sports' promissory estoppel claim fails. See id.

V. CONCLUSION

Accordingly, **IT IS HEREBY ORDERED** that Defendant's Motion for Judgment on the Pleadings is **GRANTED**.

HN7[] Intentional Interference, Elements

The elements of a claim for tortious interference with a business expectancy are: (1) the existence of a valid contractual relationship or business expectancy; (2) knowledge of the relationship or expectancy on the part of the interferer; (3) intentional interference inducing or causing a breach or termination of the relationship or expectancy; and (4) resultant damage to the party whose relationship or expectancy has been disrupted.

Governments > Local Governments > Ordinances & Regulations

HN8[] Local Governments, Ordinances & Regulations

When the primary purpose of a legislative act is to raise revenue, the act is a tax, regardless of the name applied to it. A municipal ordinance setting a fee for refuse collection and disposal is not an invalid revenue-generating device solely because the fee set by the ordinance generates a surplus. The relevant inquiry is whether there is a reasonable correlation between the benefit conferred and the cost exacted by the ordinance.

Governments > Legislation > Interpretation

Governments > Local Governments > Ordinances & Regulations

HN9[] Legislation, Interpretation

Whether an act is a "valid fee" or an "impermissible tax" does not depend on the label the parties apply to it. The analysis depends not only on the immediate cost of providing services, but may also may involve the retirement of debt incurred to build related infrastructure, and provision for future costs. The entire analysis is further affected by judicial deference for reasonable political and legislative judgments.

Headnotes/Summary

Headnotes

The state action doctrine applies principles of federalism in order to exempt state actions from liability under the federal antitrust laws, but it does not immunize a municipality from liability under the Virginia Antitrust Act.

A municipality may operate a waterworks outside its geographic limits without regard to anticompetitive effects only by agreement of the locality within whose geographic limits they are operating.

When the primary purpose of a legislative act is to raise revenue, the act is a tax, regardless of the name applied to it.

Judges: Jonathan C. Thacher.

Opinion by: Jonathan C. Thacher

Opinion

[*177] This matter came before the Court on the City's demurrer to the Water Authority's amended complaint. Having considered the pleadings and the written and oral arguments of counsel, the demurrer is overruled.

SUMMARY OF FACTS AS ALLEGED IN THE COMPLAINT

This is a dispute over municipal water service in the northeastern part of Fairfax County. In 1959 the parties entered into a thirty year agreement identifying exclusive service areas for provision of public water. The agreement permitted the City to provide water services for residents and businesses outside the City of Falls Church. The agreement established an exclusive service area for the City in the area of the County lying south and east of a line running (very roughly) north-northeast from the City of Fairfax to the Potomac, and lying to the north of a line running east from the **[*178]** City of Fairfax to Arlington County. [1] While the agreement was in effect the City developed a public water **[**2]** supply system capable of serving the entire area.

The agreement expired in 1989 and has not been renewed. Both parties currently provide water to businesses and residents in the area, although the Water Authority is not yet capable of providing water for the entire area. In addition to being the City's competitor, the Water Authority is also in some places its customer. The City runs its water service on a for-profit basis, and charges about twice the rate charged by the Water Authority. The City regularly transfers large profits from the water service into their general fund and uses the funds to provide other

[1] See Exhibit 1 to the complaint.

services to the residents of the City. Although they are not currently doing to, in the past they have charged County residents a higher rate than the rate they charge their own residents. They reserve the right to do so again in the future. About ninety percent of the City's customers are residents of Fairfax County, rather than of the City of Falls Church.

In an area known as the "Halstead Development", the location of the City's water lines interferes with construction of residential units. The developer wants to move the City's water lines, **[**3]** bearing the cost itself, and ensuring no adverse effect on service. Municipal authorities routinely consent to having their easements moved in the interests of permitting additional development so long as it does not interfere with services and is done at no cost to them.

The City has refused to allow the move unless the developer promises to connect the development exclusively to the City's water system. The developer would rather connect to the Water Authority's system because doing so permits them to pay less for the service. The Water Authority stands to lose about $ 7 million in assorted service fees and charges if the developer is forced to connect to the City's system. In addition to refusing to cooperate with reasonable requests to relocate water lines unless the developer agrees to forgo service from the Water Authority, the City has told citizens and businesses in the area that it has the exclusive right to provide water to them and has threatened them with civil or criminal sanctions if they attempt to connect to the Water Authority's system.

Although the Halstead development is the center of the instant dispute, the same issues will arise again and again as the Water Authority **[**4]** offers services to residents and businesses in the City's old exclusive service area. The City has no legal basis to threaten people with civil or criminal sanctions if they connect to the Water Authority's system, and has no valid reason to refuse to cooperate with the routine relocation of existing easements and water **[*179]** lines. The only reason they are doing so is to force residents and businesses to connect to their water system rather than the cheaper Water Authority system, resulting in a continuing stream of revenue for their general fund and lower taxes for the residents of the City.

Counts I & II of the complaint allege monopolization and attempted monopolization, in violation of the Virginia Antitrust Act. Count III was dismissed without prejudice by order of February 27, 2009. Count IV alleges tortious interference with a business expectancy. Count V alleges that the City's current practice of overcharging for municipal water service and transferring the profit to their general fund to subsidize other services in the City of Falls Church constitutes an unconstitutional extra-territorial tax.

The Water Authority seeks an injunction to prevent the City from threatening people and **[**5]** from using its existing easements as a weapon to force people to connect to its system. They further seek about $ 21 million in damages, and a judgment that the City's current practice of overcharging for water and transferring the profit into their general fund amounts to an unconstitutional extraterritorial tax. The City demurs to all counts.

ANALYSIS

HN1[] A demurrer tests the legal sufficiency of facts alleged in pleadings, not the strength of proof. The Court must accept as true all facts properly pleaded in the bill of complaint and all reasonable and fair inferences that may be drawn from those facts. *Glazebrook v. Bd. of Supervisors, 266 Va. 550, 554, 587 S.E.2d 589 (2003)*. "[E]ven though a motion for judgment or a bill of complaint may be imperfect, when it is drafted so that defendant cannot mistake the true nature of the claim, the trial court should overrule the demurrer." *CaterCorp, Inc. v. Catering Concepts, Inc., 246 Va. 22, 24, 431 S.E.2d 277, 9 Va. Law Rep. 1421 (1993)*.

Counts I & II: Monopolization and Attempted Monopolization, Under the Virginia Antitrust Act

The City's primary argument is that the state action doctrine precludes liability for the conduct alleged here. The Court has examined the **[**6]** authorities cited by both sides, and holds that the state action doctrine does not immunize the City from liability under the Virginia Antitrust Act. The Court further holds that nothing in the statutory provisions cited by the parties authorizes the City to engage in anti-competitive behavior in the provision of municipal utility services in a neighboring municipality, without first obtaining the consent of the neighboring municipality.

[*180] As a preliminary matter, the Water Authority seeks relief under the Virginia Antitrust Act, rather than similar federal statutes. ***HN2***[] The state action doctrine applies principles of federalism to exempt state actions from liability under the *federal* antitrust laws. *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. Although honorable and esteemed courts cited by both parties have applied the federal doctrine to claims raised under state antitrust laws, the Virginia Supreme Court has never applied the doctrine to claims made under state law, and this Court declines to do so here. [2] Instead, the proper question is whether the City's actions are "authorized, regulated or approved…by a statute of this Commonwealth…" *Virginia Code §59.1-9.4(b)*.

The City argues that *Virginia Code §§15.2-2109* and *15.2-2111* provide authority to engage in anticompetitive conduct. The relevant portions of those sections provide:

> *Va. Code §15.2-2109*:
>
> ***HN3***[] Any locality may…acquire or otherwise obtain control of or…establish, maintain, operate, extend and enlarge: waterworks… and other public utilities within or outside the limits of the locality and may acquire within or outside its limits…whatever land may be necessary for acquiring, locating, establishing, maintaining, operating, extending or enlarging waterworks…and other public **[**8]** utilities, and the rights-of-way, rails, pipes, poles, conduits or wires connected therewith, or any of the fixtures or appurtenances thereof. As required by *subsection C of § 15.2-1800*, this section expressly authorizes a county to acquire real property for a public use outside its boundaries.
>
> *Va. Code §15.2-2111*:
>
> ***HN4***[] Any locality may exercise its powers to regulate…water service notwithstanding any anticompetitive effect. Such regulation may include the establishment of an exclusive service area for any…water system, including a **[*181]** system owned or operated by the locality, the fixing of rates or charges for any…water service, and the prohibition, restriction or regulation of competition between entities providing…water service.

The City argues that *§15.2-2109* authorizes them to acquire and operate waterworks outside its limits, and that *§15.2-2111* authorizes them to regulate water service notwithstanding any anticompetitive effect. Ergo, they are authorized to operate a waterworks outside their limits notwithstanding any anticompetitive effect.

The Water Authority argues first that the provisions are distinct, and that the extraterritorial authority granted by *§15.2-2109* does not appear in *§15.2-2111*. **[**9]** They further argue that construing the two provisions as the City does renders other sections of the statute irrelevant, most notably *§15.2-2112*.

> *Virginia Code §15.2-2112*:
>
> ***HN5***[] Any two or more localities…may enter into agreements or contracts that create one or more exclusive service areas for the provision of…water service, that fix the rates or charges for any …water service provided separately or jointly by such entities, and that restrict or eliminate competition between or among such entities and any other public entity for the provision of sewage or water service.

---

[2] Along with a host of foreign **[**7]** authority, the City cites *Command Force Sec. v. City of Portsmouth, 968 F. Supp. 1069, 1074 (E.D. Va. 1997)* (citing ***Reasor v. Norfolk, 606 F. Supp. 788, 799 (E.D. Va. 1984))***; and *Hillman Flying Service, Inc. v. Roanoke, 652 F. Supp. 1142 (W.D. Va. 1987)*; as Virginia authority that the state action doctrine applies to claims made under the Virginia Antitrust Act. The City appears to misread these cases, which involve claims under both state and federal ***antitrust law***, but to the extent that the cases do hold that the state action doctrine applies to claims raised under the Virginia Antitrust Act, this Court declines to follow them.

The Water Authority argues that if the Legislature intended to authorize the City to operate waterworks outside their geographic limits without regard to anticompetitive effect, the Legislature would not have enacted *§ 15.2-2112*, authorizing localities to enter agreements permitting one another to do exactly that. Instead they argue that the statute should be construed to permit the City to operate waterworks outside its geographic limits without regard to anticompetitive effect only by agreement of the locality within whose geographic limits they are operating. Because the 1959 agreement to that effect expired, and has not **[**10]** been renewed, the City's anticompetitive acts are not authorized by statute.

The Court finds the Water Authority's construction to be the reasonable one. It recognizes and respects each local government's right to exercise the authority granted them by the statute within their own geographic limits. It also strives to avoid wasteful and costly legal conflicts between local governments. In addition, the City's construction leads to significant difficulties in application. If the code sections the City cites authorize the City to monopolize water service in neighboring Fairfax County, what precludes **[*182]** the City from monopolizing water service in Norfolk, or Richmond, or Bristol? This Court cannot recognize such a sweeping claim of authority without a clearer statement of intent from the legislature, or additional guidance from the Virginia Supreme Court.

The City next argues that even if their actions are not authorized by statute, the demurrer must be sustained because the Water Authority has not properly pled an antitrust violation. That argument fails because the complaint pleads particular facts such that the City cannot mistake the nature of the claim. ***HN6***[] When a complaint is drafted so **[**11]** that defendant cannot mistake the true nature of the claim, the trial court should overrule the demurrer. *CaterCorp, 246 Va. at 24*. The City's remaining arguments fail because they all rest on the assumption that the City's conduct is authorized by statute. That assumption is not true for the reasons already stated. The demurrer to Counts I and II is overruled.

Count IV: Tortious Interference With a Business Expectancy

HN7[] The elements of a claim for tortious interference with a business expectancy are: (1) the existence of a valid contractual relationship or business expectancy; (2) knowledge of the relationship or expectancy on the part of the interferor; (3) intentional interference inducing or causing a breach or termination of the relationship or expectancy; and (4) resultant damage to the party whose relationship or expectancy has been disrupted. *Chaves v. Johnson, 230 Va. 112, 120, 335 S.E.2d 97 (1985)*. The City's argument focuses on the first and third elements.

The City attacks the complaint's allegation of a valid business expectancy on the grounds that the development was contingent on the City agreeing to the relocation of its water lines. Any expectation by the Water Authority **[**12]** that the City would agree to permit the relocation is unreasonable because the City stands to gain nothing by offering its agreement. The Water Authority's expectation is even more unreasonable knowing that the City views any expansion of service by the Water Authority as a financial threat, and that the City has told developers that it is "looking to protect its service boundaries." [3] Finally, the expectation is unreasonable because the Water Authority knows that "the City has the right to provide water service without regard to its anticompetitive effects."

The City goes on to argue that even if a valid expectancy existed, the Water Authority cannot show any breach of the agreement between the developer and the Water Authority. There is no breach because the developer **[*183]** still has the ability to build on the site. They need merely redesign the development to build around the City's easements, and they can connect to whatever water supply they wish.

The City's arguments fail for three reasons. First, many of their arguments rest explicitly on the erroneous assumption that the Virginia Code authorizes them to act outside their geographic limits without regard **[**13]** to anticompetitive effect. Second, the allegation that the developer must either breach its agreement with the City or build significantly fewer units is a sufficient allegation of breach, and of damages. Finally, the arguments related to the validity of the Water Authority's expectations rest on the Authority's knowledge of the City's naked threat to use

[3] Defendant's Memorandum at 16.

any means at its disposal to "protect their service boundaries." This argument appears to be entirely without merit because the City's alleged means include improper means, such as falsely threatening with criminal and civil sanctions those residents who wish to connect to the Water Authority's service; and misrepresenting to residents that the City has the exclusive right to provide water service. The demurrer to Count IV is overruled.

Count V: Unconstitutionality of the City's Rates and Fees

HN8[] When the primary purpose of a legislative act is to raise revenue, the act is a tax, regardless of the name applied to it. *Marshall v. Northern Va. Transp. Authority, 275 Va. 419, 431, 657 S.E.2d 71 (2008)*. "[A] municipal ordinance setting a fee for refuse collection and disposal is not an invalid revenue-generating device solely because the fee **[**14]** set by the ordinance generates a surplus. The relevant inquiry…is whether there is a reasonable correlation between the benefit conferred and the cost exacted by the ordinance." *Mountain View Partnership v. Clifton Forge, 256 Va. 304, 312, 504 S.E.2d 371 (1998)*. [4]

The City argues that the fees charged to Fairfax County residents for water services cannot be a tax, because they are in the nature of a contractual obligation and residents are under no legal obligation to hook up to or accept the services. In fact they point out that the Water Authority contends that residents are under no obligation to connect to the City's service and are free to choose the Water Authority's service. In addition, the Virginia Supreme Court has repeatedly upheld public utility service fees against constitutional **[*184]** challenges. The Water Authority counters that in Fairfax **[**15]** County residents and businesses are required by law to connect to a public water system if one is available, that in some areas of the county the City's service is the only one available, and that the City's fees far exceed the cost of providing the service.

While this area of the law appears to have a number of uncertainties, it is clear that *HN9*[] whether an act is a "valid fee" or an "impermissible tax" does not depend on the label the parties apply to it. *Marshall, 275 Va. at 419*. The analysis depends not only on the immediate cost of providing services, but may also may involve the retirement of debt incurred to build related infrastructure, and provision for future costs. The entire analysis is further affected by judicial deference for reasonable political and legislative judgments. *See, Mountain View Partnership, 256 Va. at 304*.

None of these factors can be properly assessed on demurrer. If, as alleged, Fairfax County residents are required by law to use the City's service, and if the City overcharges residents of Fairfax County to subsidize the cost of providing other services to residents of Falls Church, this Court cannot say as a matter of law that their conduct is immune from **[**16]** constitutional challenge. The demurrer to Count V is overruled.

CONCLUSION

The demurrer is overruled in its entirety.

Opinion

[*30] MEMORANDUM OPINION

[1]

American drivers make nearly twenty-five million automobile insurance claims each year and insurers, in turn, spend an estimated $ 100 billion annually to cover those claims. Most insurers and automotive repair shops use specialized computer software to estimate the cost of repair or the value of replacement in the event of a total loss. These software systems play a critical role in the automotive repair industry. CCC Information Services, Inc. ("CCC") and Mitchell International, Inc. ("Mitchell") are two of the largest **[**3]** companies in these markets. Audatex North America, Inc. ("Audatex"), formerly ADP Claims Services Group, is the one other significant competitor for sales of partial loss estimating and total loss valuation software. [2]

CCC is a wholly owned subsidiary of CCC Holdings Inc. ("CCC Holdings"), a for-profit corporation, existing and doing business under the laws of Delaware, and headquartered in Chicago, Illinois. CCC Holdings is principally owned by Investcorp, S.A. ("Investcorp"), a private equity firm with more than $ 15 billion under management, and funded primarily by investors in Saudi Arabia. The majority owner of Mitchell is Aurora Equity Partners III, L.P. ("Aurora"), a private equity firm based in Los Angeles, California, which has approximately $ 2 billion of assets.

On April 2, 2008, Defendants CCC Holdings and Aurora entered into a Restructuring Agreement ("Restructuring Agreement") which contemplates a $ 1.4 billion "merger of equals" between CCC and Mitchell to be effected no later than March 31, 2009. PX 786. [3] The Federal Trade Commission ("FTC" **[**4]** or "Commission"), through its Bureau of Competition, seeks to preliminarily enjoin the pending transaction, positing that a 3-to-2 merger in the partial loss and total loss software markets would obviously and substantially harm competition. The Court finds the evidence more complicated and uncertain. Nonetheless, because the FTC has "raised questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the Court of Appeals," *FTC v. H.J. Heinz Co., 345 U.S. App. D.C. 364, 246 F.3d 708, 714-15 (D.C. Cir. 2001)* (internal quotations omitted); *see also FTC v. Whole Foods Mkt., Inc., 548 F.3d 1028, 1035, 383 U.S. App. D.C. 341 (D.C. Cir. 2008)* (Brown, J.); *id. at 1042* (Tatel, J., concurring), the Court will issue the requested injunction.

I. [**5] PROCEDURAL HISTORY

On November 25, 2008, the FTC found that it had "reason to believe" that the **[*31]** proposed merger would violate the antitrust laws, specifically Section 7 of the Clayton Act, *15 U.S.C. § 18*, and issued an administrative complaint challenging the proposed merger. At the same time, the Commission, pursuant to Section 13(b) of the Federal Trade Commission Act ("FTC Act"), *15 U.S.C. § 53(b)*, and Section 16 of the Clayton Act, *15 U.S.C. § 26*, authorized the Bureau of Competition to file the instant Complaint to petition the Court for a temporary restraining order and a preliminary injunction to preserve the status quo pending an administrative adjudication before the FTC; that trial is scheduled to commence no later than March 31, 2009, and the FTC has committed to rendering a final opinion within 90 days of an initial decision by the Administrative Law Judge. *See* FTC Press Release (Nov. 25, 2008). The merging parties suggest they will abandon the merger if an injunction issues, in part because financing would be too difficult to maintain during the administrative process. The Court held a total of nine days of evidentiary hearings and legal argument. The parties submitted **[**6]** approximately 15 boxes of documentary evidence, including documents obtained through discovery and deposition and FTC Investigation Hearing ("IH")

---

[1] This Memorandum Opinion was provided to the parties in final form on March 9, 2009, but public release was delayed to ensure that no confidential business information that had been submitted under seal was being released. Based on input from Defendants and certain interested third parties, some competitively sensitive information has been redacted and other minor adjustments have been made to the opinion. The phrase "[Text redacted]" has been inserted to signify where text has been redacted from the opinion.

[2] Audatex is a subsidiary of Solera Holdings, Inc. ("Solera"), a publicly-traded holding company based in San Diego, California.

[3] Technically, Mitchell's holding company would be merged into CCCM Parent (DE), Inc., a Delaware corporation, which, through a series of pass-through entities, would be held primarily by Investcorp and Aurora, as well as by the managing shareholders of CCC Holdings and Mitchell, and a mezzanine fund established by Goldman Sachs. PX786-018-019.

transcripts, as well as nearly 300 pages of findings of fact and two rounds of highly refined and informative legal briefing.

II. FACTS

There are millions of accidents each year on roads across the United States. If the drivers in those accidents are insured, they file an insurance claim. This leads to an assessment of the extent of the damage to the automobile and an estimate of the cost of parts and labor needed to effect repairs, or if too expensive, replace the vehicle.

A. The Products

1. Estimatics

Costs for repair of damaged vehicles, or partial loss claims, account for well over $ 30 billion in insurance claims payments annually. *See* PX 256-003 (CCC). [4] Performing partial loss estimations was once a manual process. The appraiser or claims adjuster would rely on information from published sources and perform the calculations either by hand or with a desk calculator. PX 1020 P 27 (Hayes Prelim. Report). Today, all major automobile insurers and the vast majority of the approximately 45,000 repair facilities subscribe to one or more estimating **[**7]** software products ("Estimatics"). PX 514-013, 015 (Mitchell); PX 531-001 (Mitchell); *see also* PX 6 P 3 (Mello Decl., Anderson Behel Body Shop); PX 10 P 2 (Dorn Decl., Dorn's Body & Paint). These products are much faster than manual calculations, permit analysis of more kinds of information, and are considered more reliable, consistent, and accurate. *See, e.g.*, PX 14 P 4 (Brandt Decl., Hartford Fire Ins. Co. ("The Hartford")); PX 13 P 3 (Hall Decl., GMAC); PX 20 PP 3-4 (Rollins Decl., Safeco Ins. Cos. ("Safeco")); PX 28 P 3 (Wilson Decl., The Hanover Ins. Group, Inc. ("Hanover")); PX 27 P 3 (Danford Decl., Ohio Mutual Ins. Group ("Ohio Mutual")); PX 11 P 3 (Brown Decl., Erie Ins. **[*32]** Group ("Erie")); PX 30 P 4 (Starnes Decl., State Farm Mutual Auto. Ins. Co. ("State Farm")). Estimatics products consist of three main components: (1) a spreadsheet that tracks the line items that are a part of a vehicle repair estimate, (2) the database from which parts and labor costs are pulled, and (3) the software that calculates the total cost of repair, taking into consideration overlap times (such as the need to remove a bumper only once to perform two repairs behind or to the bumper). PX 1020 P 12 (Hayes Prelim. Report) **[**8]** (citing Ramamurthy IH Tr. (7/22/08) at 198-200).

There are presently five companies in the United States that sell Estimatics: CCC, Mitchell, Audatex, Web-Est LLC ("Web-Est"), and Applied Computer Resources, but the three major competitors in the Estimatics market today are CCC, Audatex and Mitchell, which collectively hold the lion's share of the market -- approximately 99% [5] -- thus earning the nickname, the "Big Three." *See* PX 1020, Exs. 2-3 (Hayes Prelim. Report); *see also* PX 1028-004 (Web-Est). [6] There are two types of Estimatics products: **[**9]** communicating and non-communicating products. Communicating Estimatics tools are used by insurance companies and repair facilities that are part of a direct repair program ("DRP"), whereas non-communicating estimating tools are used by low-end repair facilities that are not

---

[4] Citations to the trial record are in the following form: references to Plaintiff's exhibits--"PX __ ([Company])"; references to Defendants' exhibits--"DX __ ([Company])"; references to the preliminary injunction hearing transcript--"[Name], Tr. ([Date]) at [page]:[line] ([Company])"; references to the FTC IH transcripts--"[Name] IH Tr. at [page] ([Company])"; references to deposition designations--"[Name] Dep. at [page] ([Company])"; references to Plaintiff's Findings of Fact--"PFF P [__]"; references to Defendants' Findings of Fact--"DFF P [__]". Citations may deviate from these formats as necessary to protect commercially sensitive information.

[5] Unless otherwise indicated, market shares approximate 2007 data, and are not current.

[6] Audatex also has a substantial global footprint, operating in approximately fifty-one countries across six continents. Including its international operations, Audatex is **[**10]** the largest Estimatics company in the world, and is twice the size of its nearest competitor. *See* PX 89-013 (Audatex).

part of a DRP. A DRP is a network of strategic alliances between an insurance company and the repair facilities with which it frequently does business. Communicating products allow insurance companies and DRP repair facilities to instantaneously relay information about the status of partial loss claims through specialized communication links, while non-communicating products do not have this capacity. *See* PX 1020 P 12 (Hayes Prelim. Report); DX 644, App. 2 P 7 (Ordover Coordinated Interaction Report). CCC, Mitchell and Audatex primarily sell communicating Estimatics products. Web-Est and Applied Computer Resources currently sell only non-communicating products.

CCC's core communicating Estimatics offering is called Pathways, but it also offers a low-end, non-communicating tool called Comp-Est which it markets to the independent repair facility segment. PX 86-008, 056 (CCC). [7] To procure the parts and labor data for its Estimatics product, CCC obtained an exclusive license to the Hearst Business Publishing, Inc. "Motor" database in 1998. PX 25 P 22 (Carr Decl., Motor Information Systems ("Motor")). [Text redacted.]. Mitchell's communicating Estimatics product is UltraMate, although it also sells a low-end product called Repairmate. PX 680-004-005 (Aurora). Audatex's Estimatics product is called Audatex Estimating. Unlike CCC, both Audatex and Mitchell have their own proprietary databases, which were developed over many years.

The Estimatics providers generally charge their customers on a per user basis. Currently, the predominant medium for Estimatics software installation is a CD or DVD; monthly software updates must be sent to clients and re-installed on their systems. Web-Est, **[**11]** however, offers a **[*33]** Web-based non-communicating Estimatics product. [8] Seidel, Tr. (1/22 p.m.) at 165:18-22, 167:7-8 (Web-Est). It currently licenses Mitchell's database under restrictive conditions which prohibit it from selling to the top fifty insurance companies, from selling communicating Estimatics products to insurance companies or repair facilities, and from integrating with other third-party service providers, such as parts locators, salvage, and other providers. *See* DX 59 (Mitchell-Web-Est License Agreement); Seidel, Tr. (1/22 p.m.) at 173:24-174:13 (Web-Est). This restrictive license effectively precludes Web-Est from selling to most insurance companies and DRP repair facilities.

2. TLV

Some accidents may prove to be so costly that the insurer will declare the automobile a total loss because the estimated cost of repair approaches or exceeds the vehicle's value. In such situations, the insurance company will calculate the replacement cost of the automobile, as it existed before the accident, based on model, make, upgrades, condition, mileage, etc., and pay the policyholder the vehicle's replacement **[**12]** cost. [9] As with estimating repair costs, the total loss valuation process was once done only by hand. Today there are several different methodologies and tools for insurance companies to calculate total loss. One option is the "book" providers -- NADA Appraisal Guides ("NADA"), the Kelley Blue Book, the Red Book, and the Black Book (collectively "the Books") -- whose reports are based on local or regional values. Brungger IH Tr. at 121-22 (Mitchell); Linder IH Tr. at 43, 46 (Mitchell); Marushka IH Tr. at 18, 29-30 (CCC). These products are available in hard copy and many are available electronically; the electronic versions are updated more frequently than the printed Books. A number of insurance companies perform some or even most of their total loss valuations in-house using a combination of the Books and market research conducted by internal staff in order to obtain a more accurate and localized valuation than the Books can provide alone. Most insurers, however, use total loss software systems ("TLV") which contain comprehensive databases of vehicle sales information that is regularly compiled from numerous sources and hundreds of localities. *See* PX 680-007-010 (Aurora); PX 86-008 **[**13]** (CCC). The TLV software products provided by CCC, Mitchell and Audatex account for more than 90% of all total loss valuations. PX 513-016 (Mitchell); PX 548-007 (Mitchell). Other providers of total loss services include AutoBid and Vehicle Valuation Services ("VVS"). VVS is a software product that is used mostly for specialty vehicles such as commercial trucks

---

[7] CCC acquired Comp-Est in 2003. PX 86-013 (CCC).

[8] Audatex also has begun offering a web-based product. *See* DX 225-33-35 (Audatex).

[9] Insurers will usually replace the damaged vehicle if the cost of repair approaches around 65 to 75% of the vehicles's value. Brungger IH Tr. at 118 (Mitchell).

and classic cars, and for a limited number of non-specialty vehicles as an accommodation to existing clients. *See* PX 401 PP 3, 5 (Blitstein Decl., VVS).

Until recently, CCC and Audatex were the only providers of TLV. However, Mitchell successfully entered the TLV market in 2005 after two previous failed attempts. CCC's TLV product is called ValueScope Salvage Solutions. PX 256-039, 046 (CCC). Mitchell's TLV product is called WorkCenter Total Loss, and Audatex's product is called Autosource.

B. Marketplace Dynamics

In addition to Estimatics and TLV, CCC, Mitchell and Audatex sell a number **[*34]** of other automotive damage products, including workflow management products, business **[**14]** intelligence products, and repair facility or shop management software. DX 82 (CCC); PX 560-031 (Mitchell). [10] Mitchell also sells an auto injury estimating, or "medical" product; it is the only of the Big Three companies that offers a medical product. *See* PX560-031-032 (Mitchell). Insurance companies often purchase a suite of products from one vendor. These "bundles" usually include a core Estimatics product and several add-on products, such as digital imaging, shop management, aftermarket parts data, workflow, and total loss valuation. Conway, Tr. (1/9) at 92:1-18 (Audatex); *see also* PX 680-007-008, 010 (Mitchell); PX 86-008-009 (CCC); PX 244-062 (CCC); PX 763 (Mitchell). Contracts for DRP repair facilities also often consist of bundles, including the base Estimatics product and a variety of add-ons. Conway, Tr. (1/9) at 111:9-13 (Audatex); DX 47 (Mitchell); DX 98 (CCC). Independent repair facilities tend to purchase only the core estimating product.

The buyers of Estimatics are insurance companies and auto **[**15]** repair facilities, while only insurance companies buy TLV products. Repair facilities account for about 60% of Estimatics revenues, while insurers account for the other 40%. *See* PX 1020, Ex. 2 (Hayes Prelim. Report). Insurers negotiate longer term contracts with Estimatics and TLV systems suppliers -- generally two to five years. Sun, Tr. (1/9) at 96:16-20 (Mitchell). In a typical year, approximately 100 insurance company accounts come up for renewal. Brungger IH Tr. at 185-86 (Mitchell). These contracts can cost anywhere from a few thousand dollars per year for a small insurer to several million dollars per year for a large insurer. Conway, Tr. (1/9) at 94:22-95:4 (Audatex); DX 13 P 69 (Hayes Prelim. Report); *see, e.g.*, DX 252-4, 53 (five-year, multimillion dollar contract with CCC). Most of these insurance contracts are obtained through a secret bidding process whereby the insurance company submits a request for proposal ("RFP") to the bidders in which it seeks information on the bidder's proposed prices and product bundle options. RFPs are usually accompanied by a non-disclosure agreement, Sun, Tr. (1/9) at 51-52, 46-47 (Mitchell); Brandt, Tr. (1/8 a.m.) at 23 (The Hartford), and **[**16]** therefore are not supposed to be shared with the bidder's competitors. Repair facility contracts are also intended to be confidential. *See, e.g.*, Cheskis, Tr. (1/23 a.m.) at 16:5-7, 17:21-23 (Gerber Collision & Glass ("Gerber")); Sun, Tr. (1/9) at 53:24-54:10 (Mitchell); Ramamurthy, Tr. (1/22 a.m.) at 108:19-109:25 (CCC); Conway, Tr. (1/12 a.m.) at 39:8-13 (Audatex).

Despite a highly concentrated supplier base and low growth rates in the industry, PX 543-005 (Mitchell); PX 574-002 (Mitchell), these markets are highly competitive today. Brandt, Tr. (1/8 a.m.) at 17:23-18:2, 18:6-7 (The Hartford); Cheskis, Tr. (1/23 a.m.) at 10:12-23 (Gerber); Aquila Dep. at 15 (Audatex); FTC's Pre-Trial Br. at 3; Ordover, Tr. (1/23 a.m.) at 76:20-77:8. Although insurance company and repair facility contracts are confidential, the Estimatics and TLV vendors expend significant resources in order to obtain "competitive intelligence" about each other's pricing, and compete vigorously for customers. Sun, Tr. (1/8 p.m.) at 53-58, 92-93 (Mitchell). The FTC fears that a merger of CCC and Mitchell will destroy **[*35]** the delicate balance that has sustained healthy competition despite the small number of competitors **[**17]** in these markets; hence this lawsuit.

III. APPLICABLE LAW

---

[10] These "add-on" products are 10 sold by a large number of companies in addition to CCC, Mitchell and Audatex, and the merger is not challenged by the FTC based on these products.

Section 7 of the Clayton Act prohibits mergers or acquisitions "the effect of [which] may be substantially to lessen competition, or to tend to create a monopoly" in "any line of commerce or in any activity affecting commerce in any section of the country." 15 U.S.C. § 18. The Supreme Court has explained that Section 7 "deals in probabilities, not certainties." United States v. Gen. Dynamics Corp., 415 U.S. 486, 505, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1974); *see also* Brown Shoe Co. v. United States, 370 U.S. 294, 323, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962); United States v. El Paso Natural Gas Co., 376 U.S. 651, 658, 84 S. Ct. 1044, 12 L. Ed. 2d 12 (1964). Thus, to establish a violation of Section 7, the FTC need not show that the challenged merger or acquisition *will* lessen competition, but only that the loss of competition is a "sufficiently probable and imminent" result of the merger or acquisition. United States v. Marine Bancorp., 418 U.S. 602, 623 n.22, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974) (quoting United States v. Continental Can Co., 378 U.S. 441, 458, 84 S. Ct. 1738, 12 L. Ed. 2d 953 (1964)).

When the FTC has "reason to believe" that the consummation of a merger will violate the antitrust laws, it may seek a preliminary injunction to prevent the merger until the agency has had an opportunity **[**18]** to adjudicate the merger's legality in an administrative proceeding. 15 U.S.C. § 53(b). Section 13(b) of the FTC Act "provides for the grant of a preliminary injunction where such action would be in the public interest." Heinz at 714; *see* 15 U.S.C. § 53(b). In enacting Section 13(b), Congress "'demonstrated its concern that injunctive relief be broadly available to the FTC.'" Heinz, 246 F.3d at 714 (quoting FTC v. Exxon Corp., 205 U.S. App. D.C. 208, 636 F.2d 1336, 1343 (D.C. Cir. 1980)); H.R. Rep. No., 93-624, at 31 (1973), *reprinted in* 1973 U.S.C.C.A.N. 2417, 2533; *see also Whole Foods, 548 F.3d at 1042 (Brown, J.)* ("the FTC -- an expert agency acting on the public's behalf -- should be able to obtain injunctive relief more readily than private parties."). Thus, the FTC "is not required to prove, nor is the court required to find, that the proposed merger would in fact violate Section 7 of the Clayton Act" in order for a preliminary injunction to be issued. FTC v. Staples, Inc., 970 F. Supp. 1066, 1070 (D.D.C. 1997) (citations omitted). Rather, the FTC "need only show that there is a 'reasonable probability' that the acquisition may substantially lessen competition." Id. at 1072.

Section 13(b) authorizes **[**19]** a court to issue a preliminary injunction "[u]pon a proper showing that, weighing the equities and considering the Commission's likelihood of ultimate success, such action would be in the public interest." 15 U.S.C. § 53(b). The Court must balance these considerations on a sliding scale. Heinz, 246 F.3d at 714; FTC v. Elders Grain, Inc., 868 F.2d 901, 903 (7th Cir. 1989); *see also Whole Foods, 548 F.3d at 1035* (Brown, J.). Thus, "[a] greater likelihood of the FTC's success will militate for a preliminary injunction unless particularly strong equities favor the merging parties." *Whole Foods, 548 F.3d at 1035* (Brown, J.).

The equities will often weigh in favor of the FTC because "'the public interest in effective enforcement of the antitrust laws' was Congress's specific 'public equity consideration' in enacting" Section 13(b). *Id*. (quoting Heinz, 246 F.3d at 726). If the FTC meets its burden of showing that it is likely to succeed on the merits, it "creates a presumption in favor of preliminary injunctive **[*36]** relief," *id*., which the merging parties may rebut by showing that, contrary to traditional antitrust theory, the public equities weigh in favor of the merger. *See Whole Foods, 548 F.3d at 1035* (Brown, J.); **[**20]** *see also* FTC v. Arch Coal, Inc., 329 F. Supp. 2d 109, 160 (D.D.C. 2004); *cf.* Heinz, 246 F.3d at 727 n.25 (noting that private equities are afforded little weight in Section 13(b) cases). If the merging parties are able to make such a showing, the FTC is required to show a greater likelihood of success on the merits. *Whole Foods, 548 F.3d at 1035 (Brown, J.)* (citing FTC v. Weyerhaeuser Co., 214 U.S. App. D.C. 254, 665 F.2d 1072, 1087 (D.C. Cir. 1981)).

IV. ANALYSIS

A. Likelihood of Success on the Merits

The burden of showing likelihood of success on the merits is met if the Commission has "raised questions going to the merits so serious, substantial, difficult and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the Court of Appeals." Heinz, 246 F.3d at 714-15 (internal citations omitted); *see also Whole Foods, 548 F.3d at 1035* (Brown, J); *id. at 1042*

(Tatel, J., concurring). At the same time, the Court may not "simply rubber-stamp an injunction whenever the FTC provides some threshold evidence; it must 'exercise independent judgment' about the questions § 53 commits to it." *Whole Foods, 548 F.3d at 1035* (Brown, J.) **[**21]** (citing Weyerhaeuser, 665 F.2d at 1082). [11]

In United States v. Baker Hughes Inc., 285 U.S. App. D.C. 222, 908 F.2d 981, 982-83 (D.C. Cir. 1990), the D.C. Circuit adopted an analytical approach to Section 7 cases which has been followed **[**22]** in subsequent Section 13(b) cases. *See, e.g.,* Heinz, 246 F.3d at 715; Arch Coal, 329 F. Supp. 2d at 116. First, to meet its initial burden, the government must show that the proposed merger would lead to "undue concentration in the market for a particular product in a particular geographic area." Baker Hughes, 908 F.2d at 982. Such a showing creates a "'presumption' that the merger will substantially lessen competition." *Id*. Upon such a showing, the burden shifts to the defendants to rebut the presumption with evidence that "'shows that the market-share statistics [give] an inaccurate account of the [merger's] probable effects on competition' in the relevant market." Heinz, 246 F.3d at 715 (quoting United States v. Citizens & S. Nat'l Bank, 422 U.S. 86, 120, 95 S. Ct. 2099, 45 L. Ed. 2d 41 (1975)) (alterations in original). If the defendants succeed in rebutting the presumption that the merger will lessen competition, "'the burden of producing additional evidence of anticompetitive effects shifts to the government, and merges with the ultimate burden of persuasion, which remains with the government at all times.'" Heinz, 246 **[*37]** F.3d at 715 (quoting Baker Hughes, 908 F.2d at 983).

The Supreme Court has cautioned, however, **[**23]** that while "statistics reflecting the shares of the market controlled by the industry leaders and the parties to the merger are . . . the primary index of market power[,] . . . only a further examination of the particular market -- its structure, history and probable future -- can provide the appropriate setting for judging the probable anticompetitive effect of [a] merger." Brown Shoe, 370 U.S. at 322 n.38. In order to adequately address these factors, "the merging parties are entitled to oppose a [Section 13(b)] preliminary injunction with their own evidence, and that evidence may force the FTC to respond with a more substantial showing" of the merger's probable anticompetitive effects. *Whole Foods, 548 F.3d at 1035 (Brown, J.)*. In the end, "antitrust theory and speculation cannot trump facts, and even Section 13(b) cases must be resolved on the basis of the record evidence relating to the market and its probable future." Arch Coal, 329 F. Supp. 2d at 116-17; *see also* Brown Shoe, 370 U.S. at 322 n.38. Thus, an analysis of the likely competitive effects of a merger requires determinations of (1) the relevant product market, (2) the relevant geographic market, and (3) the transaction's **[**24]** probable effect on competition in those markets. *See* Marine Bancorp., 418 U.S. at 618-23; Gen. Dynamics, 415 U.S. at 510-11; *see also* Arch Coal, 329 F. Supp. 2d at 117.

1. Prima Facie Case

A *prima facie* Section 7 case "rests on defining a market and showing undue concentration in that market." *Whole Foods, 548 F.3d at 1036 (Brown, J.)* (citing Baker Hughes, 908 F.2d at 982-83). Courts generally begin their analysis of a Section 7 case by defining the relevant market. *See, e.g.,* Marine Bancorp., 418 U.S. at 618-23; FTC v. Swedish Match, 131 F. Supp. 2d 151, 156 (D.D.C. 2000). *But see Whole Foods, 548 F.3d at 1036 (Brown, J.)* (noting that "this analytical structure does not exhaust the possible ways to prove a § 7 violation" (citing El Paso Natural Gas Co., 376 U.S. at 660)). A relevant market has two components: (1) the relevant product market and (2) the relevant geographic market. The "relevant product market" identifies the product and services with which the defendants' products compete. The "relevant geographic market" identifies the geographic area in which the

---

[11] Defendants take issue with the FTC's interpretation of the "serious, substantial" question standard set forth in *Heinz* and *Whole Foods*, asserting: "[Y]ou can talk about substantial questions, doubtful questions, whatever. . . . [W]hat those cases say [is that] it simply means nothing other than likelihood of success on the merits." Parker, Tr. (2/17 p.m.) at 41:24-42:3 (Mitchell). While Defendants' statement is literally true, precedents irrefutably teach that in this context "likelihood of success on the merits" has a less substantial meaning than in other preliminary injunction cases. Heinz not only emphasized this point but *Whole Foods* makes clear that *Heinz* remains good law. The analysis of likelihood of success "measure[s] the probability that, after an administrative hearing on the merits, the Commission will succeed" in proving that the effect of a merger "*may* be to substantially lessen competition or tend to create a monopoly." Heinz, 246 F.3d at 714 (emphasis added).

defendants compete in marketing their products or services. The FTC bears the burden of proof and persuasion in defining **[**25]** the relevant market. *Arch Coal, 329 F. Supp. 2d at 119*.

Once the relevant market is defined, the court can determine market concentration. The standard measure for market concentration is the Herfindahl-Hirschmann Index ("HHI"). *See* *Heinz, 246 F.3d at 716*. Under the Federal Trade Commission and U.S. Department of Justice Horizontal Merger Guidelines, a market with a post-merger HHI above 1800 is considered "highly concentrated," and mergers that increase the HHI in such a market by more than 100 points "are presumed . . . likely to create or enhance market power or facilitate its exercise." *Fed. Trade Comm'n & U.S. Dep't of Justice Horizontal Merger Guidelines* (1992), *as revised* (1997) ("Merger Guidelines") § 1.51. Although the Merger Guidelines are not binding on the Court, they provide a "useful illustration of the application of the HHI." *FTC v. PPG Indus., Inc., 255 U.S. App. D.C. 69, 798 F.2d 1500, 1503 n.4 (D.C. Cir. 1986)*. Moreover, the D.C. Circuit explained in *Heinz* that a **[*38]** merger to duopoly which increased the premerger HHI of 4,775 by 510 points "create[d], by a wide margin, a presumption that the merger w[ould] lessen competition" in the relevant market. *Heinz, 246 F.3d at 716*.

a. *Relevant Product [26] Markets***

In determining relevant product markets, courts have traditionally considered two factors: "[1] the reasonable interchangeability of use and [2] the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe, 370 U.S. at 325*. In other words, the question is "whether two products can be used for the same purpose, and if so, whether and to what extent purchasers are willing to substitute one for the other." *Staples, 970 F. Supp. at 1074* (internal quotations omitted). Relevant markets will generally include producers who, given product similarity, have the ability to take significant business from each other. *Arch Coal, 329 F. Supp. 2d at 119*.

If consumers can substitute the use of one product for another, those products will be deemed "functionally interchangeable." *Id.; see also* *Staples, 970 F. Supp. at 1074* (finding that office supplies sold by an "office superstore" like Staples are functionally interchangeable with office supplies sold at "mass merchandisers" like Wal-Mart). Courts generally will include functionally interchangeable products in the same product market unless factors other than use indicate that they are not actually part of the **[**27]** same market. *See, e.g., United States v. Archer-Daniels-Midland Co., 866 F.2d 242, 246 (8th Cir. 1988)* (even though beet sugars and high-fructose corn sugars were functionally interchangeable, they did not belong to the same product market because government price support for beet sugars meant that prices for corn sugars could be raised substantially without feeling the competitive impact of beet sugar prices). Crosselasticity of demand refers to the "'responsiveness of the sales of one product to price changes of the other.'" *Staples, 970 F. Supp. at 1074* (quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 400, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*). However, courts should "exclude any . . . product to which, within reasonable variations in price, only a limited number of buyers will turn." *Times-Picayune Publ'g Co. v. United States, 345 U.S. 594, 612, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*. [12]

Courts have relied on several "practical indicia" as aids in identifying the relevant product market, including: industry or public recognition of a submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. *Brown Shoe, 370 U.S. at 325*; *see also* *Arch Coal, 329 F. Supp. 2d at 120*. These indicia can be applied to augment the analyses of interchangeablity and cross-elasticity of demand.

1. *Estimatics Market*

---

[12] The Merger Guidelines provide an analytical tool for determining interchangeability and cross-elasticity of demand. The Merger Guidelines define a product market as "a product or group of products such that a hypothetical profit-maximizing firm that was the only present and future seller of those products ('monopolist') likely would **[**28]** impose at least a 'small but significant and nontransitory' increase in price (SSNIP)." Merger Guidelines § 1.11. In most contexts, the Merger Guidelines consider a price increase of 5% to constitute a SSNIP. *Id*.

Defendants do not dispute the FTC's contention that Estimatics is so far superior to the paper-based systems that their **[*39]** customers would not return to the old methods even if Estimatics prices increased substantially. *See, e.g*., PX 6 P 2 (Mello Decl.); PX 7 P 4 (Kostakis Decl., Angelo's Auto Body); PX 20 P 4 (Rollins Decl.); PX 27 P 3 (Danford Decl.); PX 11 P 3 (Brown Decl.). Thus, Defendants concede that the core Estimatics software **[**29]** product is a relevant product market. *See* Ordover, Tr. (1/23) at 204:20-25. [13]

2. *TLV Market*

Although the Defendants do not dispute the FTC's market definition for Estimatics, they disagree with its definition of the total loss valuation market. The FTC defines the relevant total loss valuation market to include only TLV sold in the United States by CCC, Mitchell and Audatex. PX 1020 P 48 (Hayes Prelim. Report); *see also* Hayes, Tr. (1/12 a.m.) at 84:12-22. The Defendants argue that the FTC has not met its initial burden of showing a properly defined product market because it fails to include other sources of total loss valuations that insurance companies currently use or to account for the fact that some insurance companies perform their total loss valuations in-house rather than using TLV products.

Defendants have demonstrated that insurers of auto physical damage currently use a variety of solutions to perform total loss valuations. In addition to the total loss software sold by **[**31]** CCC, Mitchell and Audatex, some insurance companies use the Books to perform some or most of their total loss valuations in-house. Brandt, Tr. (1/8 a.m.) at 47:5-9 (The Hartford); Dibble, Tr. (1/23 a.m.) at 38:23-39:18 (Infinity Ins. Co.). In fact, some of the largest auto insurers in the country rely on the Books for most of their total loss needs. *See* DX 49 (Mitchell); DX 50 (Mitchell). For instance, CCC's CEO, Githesh Ramamurthy, testified that, of the 700,000 total loss claims that [text redacted] processes each year, it calculates roughly 500,000 in-house using NADA. Ramamurthy, Tr. (1/22 a.m.) at 97:4-8 (CCC); *see also* Brandt, Tr. (1/8 a.m.) at 47:5-10 (The Hartford) (Progressive Insurance Company ("Progressive") uses NADA to calculate roughly 75% of its total loss claims). [14] Those insurance companies that **[*40]** perform some of their valuations internally may consult other data sources as well, such as Autotrader, or conduct their own research by contacting salvage yards and auto dealerships. *See, e.g*., Dibble, Tr. (1/23 a.m.) at 39:8-13 (Infinity Ins. Co.). Defendants point to these shifts between products as evidence of a single market between Estimatics and the Books. *See* IIB Phillip **[**32]** Areeda *et al.,* ***Antitrust Law*** P 562a, at 371 (3d ed. 2007) ("[A]ctual shifts between two products in response to -- or even without -- changes in their relative prices indicate a single market.").

---

[13] An argument could be made that the Estimatics 13 market should be further subdivided into communicating and non-communicating Estimatics platforms. *Cf*. Ordover, Tr. (1/23 p.m.) at 205:11-14 ("I did not reach an ultimate conclusion of whether these two are in the same market [for repair facilities] although obviously, people can move back and forth between communicating and non-communicating Estimatics systems"). Communication is required to work with the major insurance companies as part of a repair shop network, so all insurance companies and virtually all DRP repair facilities must use communicating products. *See* PX 1020 P 12 (Hayes Prelim. Report); DX 644, App. 2 P 7 (Ordover Coordinate Interaction Report). There also is a considerable cost differential between communicating and non-communicating Estimatics products. *See* PX 760 (Applied Computer Resources has two non-communicating Estimatics products that retail for $ 99 per month and $ 135 per month); PX 173 (CCC's "Competitive Comparison Chart"); PX 1407 (CCC). Nonetheless, while communicating Estimatics products may make up a relevant sub-market, **[**30]** that analysis is unnecessary here as it would only further limit the product market definition and minimally enhance the market concentration in the relevant market to a legally insignificant degree. The Court therefore will define the relevant market to include all Estimatics products.

[14] State Farm, Allstate Insurance ("Allstate") and Progressive, three of the largest auto insurers in the country, as well as American Family, Hanover, Cincinnati Insurance, Country Insurance, Kentucky Farm Bureau, Mississippi Farm Bureau, Assurant Specialty Property ("Assurant"), and Infinity Insurance Company use the Books to perform some or most of their total loss valuations in-house. Stanton Dep. at 18-19, 23, 26-28, 33, 38-39, 45, 50-51 (NADA); Dibble, Tr. (1/23 a.m.) at 39:8-18 (Infinity Ins. Co.); Licause Dep. at 73 (Assurant); Marushka Dep. at 29, 33-34 (CCC); DX 52 at FTC-PA-000004 (listing approved guide sources in Pennsylvania as Red Book, CCC, NADA, Audatex, Autobid, and Mitchell); Conway, Tr. (1/12 a.m.) at 64:1-9 (Audatex) (American Family uses Books for some of its total loss); Brandt, Tr. (1/8 a.m.) at 47:12-22 (The Hartford uses Book data for some of its total loss needs); Hall, Tr. (1/8 a.m.) at 87:11-14, 99:1-6 (GMAC used Books in North Carolina until it was able to negotiate **[**33]** a flat rate with Mitchell that was less expensive).

This evidence is factually unchallenged by the FTC but the agency contends that it does not have the force Defendants would imply, given that over 90% of all total loss claims are calculated using TLV sold by one of the three major competitors. PX 513-016 (Mitchell); PX 548-007 (Mitchell). [15] According to the FTC, there is sufficient evidence in the record to conclude that the TLV products sold by CCC, Mitchell and Audatex represent a separate product market from other total loss valuation methods.

Dr. John Hayes, an economics expert testifying for the FTC, conducted a critical loss analysis to determine whether a hypothetical monopolist could profitably impose a SSNIP in the TLV market, an approach described in the Merger Guidelines. PX 1020 PP 26, 42-48 (Hayes Prelim. Report). [16] Through his analysis, Dr. Hayes concluded that TLV software constitutes a relevant product market. *Id*. P 48. Dr. Hayes was aware that some insurance companies use the Books to conduct valuations, but he admitted that he did not know how pervasively internal valuations are used or how insurance companies produce internal valuations. Hayes, Tr. (1/21 p.m.) at 156:24-157:18. Thus, when calculating total loss market shares, Dr. Hayes did not include valuations that were performed internally. *Id*. at 149:22-150:8.

Although Defendants' expert, Dr. Janusz Ordover, did not reach a conclusion as to whether the Books are or are not part of the same market as TLV, Ordover, Tr. **[*41]** (1/23 p.m.) at 205:18-22, a critical failure to support Defendants' challenge to the FTC's market definition for TLV, the Defendants discredit Dr. Hayes's conclusions, arguing that his critical loss analysis is flawed because he incorrectly assumed that insurance companies lack the economies of scale to perform total loss valuations in-house. Hayes, Tr. (1/21 p.m.) at 150:14:151:4, 153:2-154:20, 157:2-158:17. The evidence is clear that CCC lost a large insurance company as a customer when that company decided to do most of its total loss calculations in-house using NADA. DX 86. "[C]ourts have generally recognized that when a customer can replace the services of [an external product] with an internally-created [ ] **[**36]** system, this 'captive output' (i.e. the self-production of all or part of the relevant product) should be included in the same market." *United States v. Sungard Data Sys., Inc., 172 F. Supp. 2d 172, at 193, 186 (D.D.C. 2001)* (quoting *FTC v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 48 (D.D.C. 1998))* (alterations in original) (internal quotations omitted); *accord* Merger Guidelines § 1.31 (vertically integrated firms are included in the market "to the extent that such inclusion accurately reflects their competitive significance in the relevant market prior to the merger").

Notwithstanding this gap in Dr. Hayes's analysis, the real-world evidence shows that Books and TLV are not part of the same product market. *See* *Arch Coal, 329 F. Supp. 2d at 116* ("[A]nti-trust theory and speculation cannot trump facts."). The Book vendors do not consider themselves to be in competition with CCC, Mitchell, and Audatex. PX 17 PP 7-13 (Stanton Decl., NADA); PX 19 P 5 (Fournier Decl., Automobile Red Book); PX 29 P 8 (Cross Decl., Nat'l Auto Research). In fact, CCC and Mitchell offer access to NADA as an add-on to their TLV products. PX 241-023 (CCC); PX 643-011 (Mitchell). Most insurance companies do not **[**37]** view the Books as an adequate substitute for TLV products. *See* PX 664-005 (Mitchell); Brown Dep. at 90-90 (Erie); *see also* Hall, Tr. (1/8 a.m.) at 79:15-17, 81:2-4 (GMAC); Danford Dep. at 58 (Ohio Mutual only uses Books for commercial and recreational vehicles that are not in the TLV databases); PX 11 P 7 (Brown Decl.). In fact, the majority of insurers who were contacted by the FTC stated that they would not switch from TLV products to the Books even if facing a price increase of 10% or more.

---

[15] Mitchell argued in closing argument that 15 it thinks the nine insurers who do some in-house total loss valuations account for about 20% of the total loss claims market, and that the FTC failed to include those in-house valuations in its HHI calculations. Prior to closing argument, however, there seemed to be a consensus that the Books consumed about 10% of the total loss valuation market. *See* PX 548-007 (Mitchell) (chart showing that "book values" account for 10% of all total loss claims). This figure must include internal calculations performed by insurance companies because only insurance companies (and independent appraisers to some **[**34]** extent) handle total loss claims, with or without TLV software. *See* Hayes, Tr. (1/12 p.m.) at 130:25-131:1.

[16] Critical loss analysis is a standard tool used by economists to study potentially relevant markets. The analysis is based on the assumption that if the price of a product were increased, some customers would not purchase the product, and if enough customers would not purchase the product, **[**35]** the price increase would not be profitable. PX 1020 P 42 (Hayes Prelim. Report). For the purpose of market delineation, Dr. Hayes was interested in whether or not a hypothetical monopolist over all TLV software could profitably impose a SSNIP on one or more of the products included in the candidate market. *Id*. P 44.

See, e.g., Adamson Dep. at 31-32, 40-41 (EMC Ins. Co.); PX 20 P 14 (Rollins Decl.) ("In the event of a 10% price increase in total loss valuation products, Safeco would not be likely to switch to using NADA, Kell[e]y, or other 'book' products for total loss estimates. The book products are only guides, which do not provide a local market evaluation of comparable vehicles."). Similarly, almost none of the Defendants' internal documents refer to the Books when describing the competitive landscape. [17] To the extent that the Books are mentioned, they are referred to as "ancillary databases." PX 643-011 (Mitchell document containing a competitive analysis between CCC, Mitchell **[*42]** and Audatex, and referring **[**38]** to NADA and other Books as "ancillary databases"). [18]

The market participants view TLV as separate from the Books for good reason. The evidence reveals that the Books simply are not as accurate, detailed, or up-to-date as TLV. CCC, Mitchell and Audatex use a consistent methodology across all vehicles that includes recent sales of comparable vehicles. PX 1964-009-010 (CCC); PX 1958-034-036 (Mitchell). Their methodology accounts for, among other factors, year, make, model, body style, engine, mileage, upgrades, condition, and includes numerous databases. PX 1964-006, 010 (CCC's TLV product "equates to a vehicle database of approximately 64,00 [sic] unique vehicles, which is substantially more than Red Book and Kelley Blue Book"). CCC's TLV database is "compiled by surveying over 4,400 car dealerships in more than 350 markets twice each month and through 1,800 publications." PX 99-020 (CCC). Mitchell's database contains over [text redacted] million electronic records including the Power Information Network (PIN) **[**40]** data received from JD Power and Associates. PX 643-011 (Mitchell); PX 541-024 (Mitchell). The valuation methodologies used by the Books include subjective data and do not account for all of the vehicle's options, mileage, or condition as precisely as TLV programs. Hall, Tr. (1/8 a.m.) at 79:18-80:8, 80:19-81:8 (GMAC); PX 1964-006, 010 (CCC). For instance, NADA uses wholesale and retail data sets and manipulates that information using analytical modeling and judgment by its editorial staff to estimate vehicle value. PX 17 P 3 (Stanton Decl.); PX 260-001 (CCC); PX1964-016 (CCC Valuescope Methodology & Settlement Tips). Thus, TLV has substantially different valuation methodologies than the Books. *See* Brown Shoe, 370 U.S. at 325 (peculiar characteristics of the product indicate separate product markets).

In addition, TLV provides valuations in local markets, while the Books provide only regional data that are rarely localized. See PX 20 P 14 (Rollins Decl.); PX 11 P 7 (Brown Decl.); PX 28 P 11 (Wilson Decl.) (stating that "pricing information in guidebooks . . . does . . . not contain the same level of specificity as local market comparables."); PX 1964-010 (CCC) ("Where NADA will have **[**41]** one region covering seven states, CCC will segment each state into an average of eight local markets."); PX 17 P 9 (Stanton Decl.); PX 256-048 (CCC). Furthermore, TLV systems' calculations are said to comply with applicable state regulations of each state, PX 81-038 (CCC Response to [text redacted] RFP); PX 116-039 (CCC Response to [text redacted] RFP); PX117-044, 051 (CCC Response to [text redacted] RFP), whereas the Books do not.

Nor does CCC, Mitchell, or Audatex price TLV against the Books. TLV costs approximately $ [text redacted] per estimate, PX 548-007, whereas the Books charge about 5-35 cents per use. Stanton Dep. at 101-03 (NADA); PX 19 P 2 (Fournier Decl.). Of course, "products competing against one another in a differentiated product market may have widely different prices." *United States v. Oracle Corp.,* ***[*43]*** *331 F. Supp. 2d 1098, 1121 (N.D. Cal. 2004)*. [19]

---

[17] *See* PX 1412-020 (pie graph showing 2007 market share data for total loss which refers only to Audatex, Mitchell and CCC); PX 99-022 (CCC); PX 107-018 (CCC); PX 204-002 (CCC); PX 214-002 (CCC); PX 515-036 (Mitchell) (noting the holders of the key insurance accounts for estimating, TLV and DRP shops); PX 583-041 (Mitchell); PX 513-012 (Mitchell); PX513-016 (Mitchell document referring only to CCC and Audatex as competitors); PX 643-008 (Mitchell pricing strategy); PX 629-002 (Aurora) ("Mitchell competes primarily against only two other companies, Audatex and CCC Information Services."). *But see* PX 677 (Mitchell) (Why Use Total Logic Versus NADA); DX 86 (CCC's competitive loss of [text redacted] to NADA); PX 1964-009 (CCC) ("CCC Versus Guidebook Value").

[18] The Court notes the apt warning that "separate markets are not indicated by documents within A firms that are preoccupied with other A firms. After all, a given producer of A cannot charge more than other A firms and thus may focus entirely on them even though a hypothetical monopolist of product A firms would focus entirely on the price of a close substitute B." IIB Areeda, *supra*, **[**39]** P 562a, at 372. If the FTC were relying solely on Defendants' documents, that evidence might be insufficient. However, various other industry participants from all sides share the view that TLV and the Books are not interchangeable.

If part of the same product market, the Books and the Defendants' TLV products are undoubtedly differentiated products. The variance in price therefore may not be surprising. [20] However, there is no evidence to suggest that the price of TLV is sensitive in any way to changes in pricing by Book vendors, or vice-versa. *Cf*. **[**42]** PX643-008 (Mitchell) (setting pricing strategy by reference to CCC and Audatex only). In addition, there is scant evidence of any direct competition between TLV and the Books.

In sum, the practical indicia -- particularly industry recognition of a separate market; TLV's peculiar characteristics including especially accurate, up-to-date valuations, speed, reliance and defensibility, and ability to interface with estimating products; and sensitivity to price changes only against other TLV products -- support the conclusion that TLV software products **[**43]** represent a relevant product market.

Despite this analysis, the fact remains that some of the largest insurance companies in the country perform a significant percentage of their total loss valuations in-house using the Books and that some others use the Books or other valuation methods for a small percentage of their total loss claims, rather that TLV. What this demonstrates, at best, is that some of the largest insurance companies in the country have the resources and scale to perform most of their total loss valuations in-house profitably in lieu of using TLV, and that a few middle tier insurance companies use the Books to supplement TLV software, but not that the Books constitute a viable substitute for TLV for the vast majority of insurers. [21] When TLV software is used to calculate 90% of the total loss claims made in this country, and the majority of the remaining 10% includes the largest insurers that do most of their calculations in-house, it is clear that the computer-based TLV products provided by these three suppliers constitute a relevant product market. The Books are, in the main, a complementary product and not a competitive product.

In any event, the FTC is not "required to settle on a market definition at this preliminary stage," *Whole Foods, 548 F.3d at 1036 (Brown, J.)*, and inclusion of the Books in the market would have an insignificant **[*44]** effect on the market shares because over **[**45]** 90% of total loss claims are calculated using TLV. PX 513-016 (Mitchell) (chart showing that CCC, Audatex and Mitchell were used to evaluate a combined 90% of all total loss claims made in 2007, while NADA and "other" products were used for approximately 10% of valuations); PX 548-007 (Mitchell) (table showing that book valuations are used for approximately 10% of all total loss claims while TLV software is used for 90% of claims). Even including the Books and other valuation methods, the combined CCC/Mitchell would still have over a 50% share of the broader total loss valuation product market. *See* PX 513-016 (Mitchell). The corresponding HHIs likewise would still establish a strong *prima facie* case for the FTC. *Cf. Arch Coal, 329 F. Supp.*

---

[19] A "differentiated product 'market' is a market in which sellers compete along more dimensions than price." *Oracle, 331 F. Supp. 2d at 1121*.

[20] The Defendants note that Book values are not the final word on total loss valuations; they are simply an input. Insurance companies incur additional costs by employing their own personnel and software to refine the Book valuations with more data points. Stanton Dep. at 26-27 (NADA); Dibble, Tr. (1/23 a.m.) at 38:23-40:4 (Infinity Ins. Co.). Thus, the true "cost" of using the Books is greater than would appear; how much this real cost approaches the pricing of a TLV product is not admitted in the record.

[21] *Cf. United States v. Grinnell Corp., 384 U.S. 563, 574, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)* **[**44]** ("Defendants earnestly urge that despite these differences [between the central station service and substitute alarm systems], they face competition from these other modes of protection. They seem to us seriously to overstate the degree of competition, but we recognize that . . . they 'do not have unfettered power to control the price of their services . . . due to the fringe competition of other alarm or watchmen services.' What defendants overlook is that the high degree of differentiation between central station protection and the other forms means that for many customers, only central station protection will do.") (quoting *United States v. Grinnell Corp., 236 F.Supp. 244, 254 (D.R.I. 1964))*; *accord* ***Whole Foods, 548 F.3d at 1038*** (Brown, J.). *But see United States v. Engelhard Corp., 126 F.3d 1302, 1306 (11th Cir. 1997)* ("[I]t is possible for only a few customers who switch to alternatives to make the price increase unprofitable.").

2d at 158 (concluding that the HHI increase of 49 to 2,103 was "far from compelling," and thus the *prima facie* case was "fairly weak."). [22]

b. *The Geographic Market*

Unlike some other Section 7 cases, the geographic market is not contested here. The relevant geographic market **[**46]** for both products in this case is the United States. Audatex competes in many foreign countries; CCC and Mitchell currently compete only in the United States. More significantly, although software products can be designed, manufactured and sold almost anywhere, the databases for Estimatics and TLV sold in the United States must contain data that apply to vehicles driven in the U.S., wherever manufactured. Hayes, Tr. (1/12 p.m.) at 131:2-10. Similar auto physical damage products sold outside the United States that rely on a database of foreign vehicles cannot provide partial loss and total loss valuations for most vehicles driven in this country. PX 1020 P 50 (Hayes Prelim. Report).

c. *Market Concentration*

Market share and concentration statistics can establish a presumption of harm and shift the burden of proof to Defendants to demonstrate that the presumption does not accurately reflect a merger's likely effects on competition in the relevant market(s). *Baker Hughes, 731 F. Supp. at 11-12*.

1. *Concentration in the Estimatics Market*

There are five competitors in the Estimatics market: CCC, Audatex, Mitchell, Web-Est, which sells the software product WebEst, and Applied Computer Resources, **[**47]** which sells the software product Crash-writeR. Of these, CCC, Mitchell and Audatex dominate the market. Ramamurthy IH Tr. at 157-158 (CCC); PX 1028-004, 017 (Web-Est); Ramamurthy, Tr. (1/22 a.m.) at 40:20-41:7, 74:1-10 (CCC). Defendants' expert, Dr. Ordover, agreed that CCC, Mitchell, and Audatex are the only three competitors for insurance customers in the Estimatics segment and that neither Web-Est nor Applied Computer Resources provides any services to insurers. Ordover, Tr. (1/23 p.m.) at 205:1-7. The Big Three are currently the only competitors for DRP repair facilities as well. PX 4 P 5 (Daly Decl.); PX 27 PP 4, 7 (Danford Decl.); PX 11 P 4 (Brown Decl.); PX 25 P 15 (Carr Decl.); PX 20 P 5 (Rollins Decl.); Kostakis Dep. at 18 (Angelo's Auto Body Shop). At this point in time, Web-Est and Applied Computer Resources offer only non-communicating Estimatics products to low-end repair facilities that are not part of a DRP. Web-Est and Applied Computer Resources together have a tiny fraction of the Estimatics market -- **[*45]** approximately 1% combined [23] -- and they currently do not compete to any meaningful extent with CCC, Mitchell and Audatex. Removing Web-Est and Applied Computer Resources **[**48]** from the market share data would have "almost no bearing" on the Estimatics market concentration calculations. Hayes, Tr. (1/12 p.m.) at 124:24-125:5. This is no surprise considering that the contract between Web-Est and Mitchell precludes Web-Est from offering communicating Estimatics to insurance companies or DRP facilities and from selling any Estimatics to the top 50 insurance companies. *See* DX 59 (Mitchell-Web-Est License Agreement); Seidel, Tr. (1/22 p.m.) at 173:24-174:13.

In 2007, CCC had approximately a 48% share of the revenue in the Estimatics market, Audatex had a 30% share of the market, and Mitchell had a 21% share. PX 1020-039, Ex. 2 (Hayes Prelim. Report); *see also* Hayes, Tr. (1/12 p.m.) at 120:15-122:10. Thus, the combined CCC/Mitchell would hold almost a 70% market share, and would be more than twice the size of Audatex North America. PX 1020 P 49, Ex. 2 (Hayes Prelim. Report). The merger would increase the HHI in Estimatics from approximately 3,650 to 5,685 -- an increase of 2,035 points. *Id*. P 60. The post-merger HHI would therefore be higher than it **[**49]** was in *Heinz*, which "create[d], by a wide margin, a presumption that the merger w[ould] lessen competition." *Heinz, 246 F.3d at 716*; *see also* *FTC v. H.J. Heinz, Co., 116 F. Supp. 2d 190, 195-96 (D.D.C. 2000)* (merger would have given the new company approximately 32% of the market and increased HHI by 510 to 5,285).

---

[22] If each of the Book vendors were included in the TLV market as separate suppliers, the merger would still produce an HHI delta well above 100. *See* Merger Guidelines § 1.51(c).

[23] Hayes, Tr. (1/12 Tr. p.m.) at 122:4-23 10; PX 1020, Ex. 2 (Hayes Prelim. Report); *see also* PX 543-011 (Mitchell).

Because insurance companies and repair facilities operate in different, albeit intertwined sub-markets, it also is useful to break down the numbers between insurance companies and repair facilities. In the repair facility segment, CCC's Estimatics market share as of 2007 was approximately 55.7%, Audatex had a 25.2% share, and Mitchell came in third with an 18.1% share. PX 1020-040, Ex. 3 (Hayes Prelim. Report); *see also* Tr., Hayes (1/12 p.m.) at 136:3-137:9; Ramamurthy, Tr. (1/22 a.m.) at 63:19-25. Web-Est and Applied Computer Resources each had an approximate 0.5% share. If the merger is consummated, the combined CCC/Mitchell would hold approximately a 73.8% share of the Estimatics market for repair facilities. *See* PX1020, Ex. 3 (Hayes Prelim. Report). With respect to the insurance company segment, Audatex led with a 38.5% market share, CCC held a 35.0% market share, and **[**50]** Mitchell came in third at 26.5%. *Id*. Post-merger, CCC/Mitchell would hold a 61.5% share of the insurance segment of the Estimatics market. *See id*.

2. *Concentration in the TLV Market*

The only providers of total loss software systems are CCC, Audatex and Mitchell. *But see* PX 534-005 (Mitchell) (listing three main competitors in total loss valuation segment as CCC, Audatex and Auto-Bid). In 2007, CCC held approximately 60.7% of the TLV market, followed by Audatex with an approximate 34.8% share, and Mitchell at third with only a 4.5% share. PX 1020, Ex. 4 (Hayes Prelim. Report); Hayes, Tr. (1/12 p.m.) at 128:8-23, 129:8-13; *see also* PX 514-019-020 (Mitchell) (pie graph projecting CCC with 51%, Audatex with 42% and Mitchell with 7% of the TLV market in 2008). A combined CCC/Mitchell would hold about a 65% market share. Hayes, Tr. (1/12 p.m.) at 128:13-23 (Dr. Hayes); PX 1020, Ex. 4 **[*46]** (Hayes Prelim. Report); *see also* PX 514-019 (Mitchell). The pre-merger HHI in this market currently exceeds 4,900. The merger would result in an HHI of 5,460, with a 545 delta, Hayes, Tr. (1/12 p.m.) at 128:24-129:7; PX 1020 P 64 (Hayes Prelim. Report), creating the presumption that the merger would lessen competition. **[**51]** *Heinz, 246 F.3d at 716*.

3. *Merger to Duopoly*

The FTC repeatedly proclaimed that this transaction represents a "merger to duopoly," that is, a 3-to-2 merger, as if that settles the question. It asserts that the Estimatics and TLV markets really consist only of the Big Three -- CCC, Mitchell, and Audatex. Defendants reject the notion that the descriptive term "duopoly" accurately depicts the post-merger competitive landscape because "Web-Est and a host of other new entrants offer innovative products that can transform the Estimatics market," and [text redacted]. Defs.' Post-Trial Brief at 25. The Court concludes that the accuracy of this descriptor has minimal significance to the analysis here.

The FTC relies heavily on *Heinz* for the proposition that a "merger to duopoly" is destined for a preliminary injunction because "no court has ever approved a merger to duopoly under similar circumstances." *246 F.3d at 717*. The FTC overlooks the significance of the phrase "under similar circumstances" in *Heinz, id*., and thus over-reads the case. Instead of making a generalized holding relevant to all 3-to-2 company mergers, the Court of Appeals focused on the nature of the baby food market at issue **[**52]** in *Heinz*, in which high barriers to entry and total transparency in pricing underscored the risk of coordination. While pricing is not completely secret in the instant markets, the characteristics of Estimatics and TLV are worlds apart from baby food. For starters, the software products are complex, the price quotes to insurers are confidential, and the products are usually sold in complex bundles that may include both Estimatics and TLV or just one of these, as well as various other software products. What is clear from this preliminary record is that this situation is not *Heinz*. The question, therefore, is not simply whether this merger would constitute a "merger-to-duopoly," but rather, whether the presumption of anticompetitive effects holds up, for preliminary relief, given the way these markets operate in fact.

As defense counsel admitted at the inception of this case, the HHIs in these markets are "very, very, high." Scheduling Conf. at 10-11. Because of the high market concentrations and HHIs in the pre- and post-merger Estimatics and TLV markets, the FTC has established a strong *prima facie* case that a merger between CCC and Mitchell would violate *Section 7* of the Clayton Act. **[**53]** *See* *Heinz, 246 F.3d at 716*. But that is just the beginning of the inquiry.

2. Rebuttal Arguments

Upon the showing of a *prima facie* case, the burden shifts to Defendants to show that traditional economic theories of the competitive effects of market concentration are not an accurate indicator of the merger's probable effect on competition in these markets or that the procompetitive effects of the merger are likely to outweigh any potential anticompetitive effects. The courts have not established a clear standard that the merging parties must meet in order to rebut a *prima facie* case, other than to advise that "[t]he more compelling the prima facie case, the more evidence the defendant must present to rebut [the presumption] successfully," Baker **[*47]** Hughes, 908 F.2d at 991. [24] Even in cases where the FTC has made a strong *prima facie* showing:

> [i]mposing a heavy burden of production on a defendant would be particularly anomalous where, as here, it is easy to establish a prima facie case. The government, after all, can carry its initial burden of production simply by presenting market concentration statistics. To allow the government virtually to rest its case at that point, leaving the defendant **[**54]** to prove the core of the dispute, would grossly inflate the role of statistics in actions brought under section 7. The Herfindahl-Hirschman Index cannot guarantee litigation victories.

Id. at 992. With these words of caution in mind, the Court turns to the Defendants' arguments.

a. *Barriers to Entry*

Defendants' first point of rebuttal is that both the Estimatics and TLV markets will lack significant barriers to entry after the proposed merger, and that existing competitors are "poised for future expansion." Id. at 988-89. A variety of factors, including the absence of significant entry barriers in the relevant market, can rebut a *prima facie* case. Id. at 984, 987 ("The existence and significance of barriers to entry are frequently, of course, crucial considerations in a rebuttal analysis."); *see also* Heinz, 246 F.3d at 717 n.13 ("Barriers **[**55]** to entry are important in evaluating whether market concentration statistics accurately reflect the pre- and likely post-merger competitive picture."). "Ease of entry is the ability of other firms to respond to collusive pricing practices by entering to compete in the market." Cardinal Health, 12 F. Supp. 2d at 54-55. Even in highly concentrated markets, if there is sufficient ease of entry, others might enter to compete and undercut the likely anti-competitive effects of a merger. *Id*. In other words, entry is one way in which post-merger pricing practices can be forced back down to competitive levels. *Id*.; *see also* Baker Hughes, 908 F.2d at 987 ("In the absence of significant barriers, a company probably cannot maintain a supracompetitive pricing for any length of time."); Merger Guidelines, § 3.0 ("A merger is not likely to create or enhance market power or to facilitate its exercise, if entry into the market is so easy that market participants, after the merger, either collectively or unilaterally could not profitably maintain a price increase above premerger levels."). "Determining whether there is ease of entry hinges upon an analysis of barriers to new firms entering the market **[**56]** or existing firms expanding into new regions of the market." Cardinal Health, 12 F. Supp. 2d at 55.

According to the Merger Guidelines, entry or expansion must be "timely, likely, and sufficient in its magnitude, character and scope to deter or counteract the competitive effects" that otherwise may be likely to result from a merger that significantly enhances market concentration. Merger Guidelines § 3.0; *see also* FTC v. Chi. Bridge & Iron Co., 534 F.3d 410, 427-29 (5th Cir. 2008); United States v. Visa USA, Inc., 163 F. Supp. 2d 322, 342 (S.D.N.Y. 2001) (entry must be "timely, likely, and [of a] sufficient scale to deter or counteract any anticompetitive restraints").

1. *History of Entry in the Estimatics and TLV Markets*

"The history of entry into the relevant market is a central factor in assessing the **[*48]** likelihood of entry in the future." Cardinal Health, 12 F. Supp. 2d at 56 (citing Merger Guidelines § 3.1); *see also* Baker Hughes, 908 F.2d at 988; United States v. Waste Mgmt., Inc., 743 F.2d 976, 982 (2d Cir. 1984); United States v. Tote, 768 F. Supp. 1064, 1076 (D. Del. 1991). The FTC argues that history has proven entry into the Estimatics and TLV markets to be very difficult. The **[**57]** Defendants disagree.

---

[24] *Baker Hughes* expressly rejected the FTC's theory 24 that "defendants can rebut a prima facie case *only by a clear showing that entry into the market by competitors would be quick and effective*," and instead accepted the district court's conclusion that "the acquisition was not likely to substantially lessen competition." 908 F.2d at 983 (emphasis added).

With respect to Estimatics, the FTC contends that Audatex was the last successful entrant with its own database, and that was over thirty years ago. Defendants counter that there have been several recent examples of successful new Estimatics vendors:

. Comp-Est--Founded in 1990 and grew to more than 5,000 customers by the time it was purchased by CCC in 2003 (which still offers the product today to low-end repair shops);

. Focus Write, LLC ("Focus Write")--Started in 2005 by the founder of Comp-Est and quickly grew to 1,500 customers but then floundered due to management issues;

. Web-Est--Founded in March 2008; has already doubled its customer base; and

. Applied Computer Resources--Began offering Crash-writeR in 1993; currently has 600 customers and sells four products to the automotive repair industry.

This evidence of supposed past successes fails to carry much water. Whatever brief success Comp-Est enjoyed, it has disappeared as a competitor through its purchase by CCC in 2003. PX 86-013 (CCC). [25] In 2008, Eric Seidel, a former investor in Focus Write, became the founder and CEO of Web-Est, and purchased the assets of Focus Write in an effort to recoup his investment. **[**58]** Web-Est and Applied Computer Resources are the only two recent entrants who are still in the market, and they held collectively less than a 1% share of the Estimatics market in 2007. For contrast, Crash-writeR is used by fewer than 600 repair facilities whereas CCC's communicating Estimatics product, Pathways, is used by more than 16,000. PX 406; PX 99-018 (CCC). Thus, even a "successful" commercial entry may not be sufficiently successful to affect the analysis here.

The history of successful entrants is additionally clouded by the fact that the companies identified by the Defendants compete(d) only in the "low end market," that is, the small, independent repair facilities that are not part of any DRP and that have traditionally been underserved or ignored by CCC, Mitchell, and Audatex. *See* PX 759 (Applied Computer Resources & Mitchell e-mail correspondence). These independent repair facilities do not require connectivity to insurers or the other add-on features offered by the large vendors and demanded by larger customers. *See id*. This distinction is reflected in the relative prices: Crash-writeR retails for $ 135 per month, PX 760, while Pathways lists at about **[**59]** [text redacted] per month, PX 1407 (CCC).

Moreover, the last decade has seen a decrease in the number of Estimatics providers. In the 1990s, there were almost a dozen companies offering some form of Estimatics, including Dupont and Sherwin Williams. Carr Dep. at 20-21 (Motor). By the end of the 1990s, the only remaining Estimatics providers were CCC, Mitchell, Audatex, and Comp-Est. *Id*. at 20. The former competitors have either exited the market or been acquired by **[*49]** CCC, Mitchell, or Audatex. PX 25 P 18 (Carr Decl.).

In the TLV market, Mitchell successfully entered the market in 2005, obtaining over a 4% share of the market by 2008, but that success followed two failed attempts, ten years of effort, and millions of dollars of investment. PX 1020 P 99 (Hayes Prelim. Report). Additionally, Mitchell already had a large share of the Estimatics market. It could capitalize on its strong reputation and relationship with insurance companies, as well as its ability to offer connectivity between its Estimatics product and its new TLV product, in order to gain significant shares of the TLV market. There is no evidence that a firm without an Estimatics product has ever successfully entered the TLV **[**60]** market. This history suggests that barriers to entry in these markets are significant.

2. *Defendants' Reliance on Historic Barriers to Entry*

Defendants have touted the historic barriers to entry into the Estimatics and TLV markets. Mitchell advertised the barriers to entry in countless financing and internal documents over the past few years. For instance, in a 2006 memorandum analyzing whether to purchase Mitchell, Aurora's analysts stated that:

[Text redacted.]

---

[25] [Text redacted.]

PX 629-001, 004 (Aurora) (emphasis added). [26] Aurora identified a "variety of significant barriers to entry": a proprietary auto physical damage database; a unique auto injury (medical) database; a large installed customer base; a small, low-growth industry with few primary competitors; and specialized regulatory knowledge of an editorial staff comprising [text redacted] professionals. PX 629-001-002. Separately, Aurora praised the "medium to high" switching costs from one of the Big Three to another and the "stable" competition between Mitchell, Audatex and CCC who have competed against each other for "a number of years." PX 629-004. Mitchell itself has repeatedly cited the "significant barriers to entry" in its financing documents. **[**61]** *See, e.g.*, PX 607-014 (Rating Agency Presentation) ("[s]ignificant barriers to entry through unique combination of data, software, communications and relationships"); Sun, Tr. (1/8 p.m.) at 42:12-17 (Mitchell); PX 583-027-028 (Mar. 2007 Confidential Info. Mem. for Senior Secured Credit Facilities) (citing customer network and experience, the Mitchell database, medical database, and high switching costs as significant barriers to entry); PX 560-027 (July 2004 Confidential Info. Memo. for Senior Secured Credit Facilities). Nor was this recitation of barriers saved only for external financiers. In Aurora's 2007 "Annual Meeting Presentation" to its investors after the acquisition of Mitchell, Aurora listed several "Significant Barriers to Entry" in Mitchell's businesses, including its "Customer Network and Experience," "The Mitchell Database," and customers' "High Switching Costs." PX 691-049 (Aurora).

Likewise, CCC and its private equity owner, Investcorp, have repeatedly noted high barriers to entry in these markets. Upon completing the acquisition of CCC, Investcorp issued a press release in which its Chief Operating Officer stated that "[t]his market . . . has high barriers to entry." PX 1401-001. CCC and Investcorp also told rating agencies that there **[*50]** are high barriers to entry in these markets. *See* PX 161-011 (Draft Rating Agency Presentation) ("Key rating considerations [include] [v]ery high barriers to entry with two primary competitors"). [27] According to CCC/Investcorp, the "likelihood" of a new entrant into Estimatics is "very low" because of:

. high overall satisfaction with CCC customers, no customer demand for change
. Fragmented market: CCC penetrated in over 20,000 body shops
. Dual network effect with both insurers and body shops
. CCC software involves over a decade of trials and is built on complex algorithms
. Source data on labor for autobody shops difficult to compile.

PX 161-023. CCC/Investcorp described the likelihood of a new entrant into TLV as "low" because:

. CCC Total Loss product is based on **[**63]** bi-monthly surveys of approximately 4,000 dealerships and 2,000 publications
. Differentiated product that is a critical component to insurer decision making
. Generating accurate, up-to-date valuations requires significant resources
. Database built on inspected "steel": unique in the industry
. Some states allow usage of book rates, which eliminates arguments with policyholders/claimants; however, most insurance customers will pay for the most accurate valuation
. Mitchell reportedly building product to compete with CCC and [Audatex], although no evidence that product would be a robust alternative. [28]

PX 161-023. *See also* PX 1420-024 (CCC) ([text redacted]). Audatex documents concur. PX 585-047 (Audatex).

---

[26] Defendants argue that statements 26 such as these are of little value because the industry representatives who made them are not antitrust lawyers and did not mean that there were entry barriers in an "antitrust sense." The Court recognizes the caution but, even discounting the statements **[**62]** as puffery, finds that they are supported by the preliminary record.

[27] CCC's CEO, Mr. Ramamurthy, expressed concern that this draft presentation may not accurately reflect the final version of its rating agency presentation because the document was initially drafted by a number of young financial analysts who are not familiar with the auto physical damage industry. To the extent that CCC failed to provide a final version of the presentation to the FTC in discovery, it was appropriate for the agency to rely on statements in the draft. Furthermore, considering **[**64]** the overwhelming number of references to barriers in other documents, it seems highly unlikely that the final version omitted any reference to "high barriers to entry."

[28] CCC obviously underestimated Mitchell's ability to penetrate the TLV market, although its unique situation would not readily transfer to another new entrant.

3. *Technical Barriers*

In addition to this historical evidence of Defendants capitalizing on barriers to entry, the very nature of the products in question illustrate why this has been the case. Estimatics products consist of a parts and labor database, and software that interacts with the database to calculate the total cost of repair. PX 1020 P 12 (Hayes Prelim. Report) (citing Ramamurthy IH Tr. (7/22/08) at 198-200). The difficulty and cost of developing and maintaining an entirely new parts and labor database that is accepted by the market would be significant barriers to new entrants. *See, e.g.*, PX 691-049 (Aurora); PX 161-023 (CCC). Such a database would need to cover at least 95% of all automobiles in the U.S. market, PX 28 P 5 (Wilson Decl.), and include parts data on all major makes and models of vehicles sold in North America, including "historical information **[**65]** for many years." PX 25 P 12 **[*51]** (Carr Decl.). [29] The database also would need to have comprehensive information on labor times and costs, which would involve an enormous number of expert-supervised time studies. PX 25 P 13 (Carr Decl.). Furthermore, customer feedback on the parts and labor information is developed over a period of years. Linder IH Tr. at 62 (Mitchell); PX 25 PP 9, 12 (Carr Decl.) ("there likely would be a high error rate . . . because [the entrant's database] would not benefit from corrections . . . accumulated over time based on customer feedback"). Thus, to create a credible database, a new entrant would need to regularly perform "highly resource-intensive tasks" such as "data revisions and time studies," PX 7 P 6 (Kostakis Decl.), by using parts data from the original equipment manufacturers, and continually update and refine its data. PX P 5 (Brown Decl.). [30]

Mitchell spends over $ [text redacted] million annually, and Audatex $ [text redacted] million annually, just to maintain, update, and refine their databases. Brungger IH Tr. at 93 (Mitchell); PX 516-003 (Mitchell). CCC pays $ [text redacted] million annually for exclusive use of the Motor database. PX 86-234 (CCC). It would take a number of years, untold thousands of man-hours, and millions of dollars of investment to create and maintain a competitive parts and labor database. *See, e.g.*, PX 573-009 (Mitchell's database "is unique and would require significant capital and development time to replicate"). *But see* PX 25 PP 14-15, 20 (Carr Decl.) (total sunk costs for building the Motor database was only about $ [text redacted] million). No firm has done so successfully since the mid-1990s.

Defendants argue, however, that this is a phantom barrier because new entrants will not be required to develop a new database **[**67]** after the merger. CCC has agreed that, upon consummation of the merger, it will relinquish its exclusive rights to license Hearst's Motor database, allowing any competitor or entrant the opportunity to obtain immediate access to a comprehensive, fully updated database of parts and services. Ramamurthy, Tr. (1/22 a.m.) at 90-91, 91-92:8; DX 218 (CCC Letter to Motor). Defendants argue that the renewed open access to the Motor database is likely to generate additional new entry. The use of "existing" or "idle facilities" can facilitate entry into a market. *FTC v. Occidental Petroleum Corp., No. 86-900, 1986 U.S. Dist. LEXIS 26138, at *21 (D.D.C. Apr. 29, 1986)* (reasoning that the presence of idle factories for the production of polyvinyl chloride resin -- a thermoplastic resin derived from the chemicals ethylene and chlorine -- could reduce barriers to entry because "[f]irms can enter the market through means other than *de novo* plant construction in considerably less time than it would take to build an entirely new facility"). Here, access to the Motor database certainly could make the Estimatics market more appealing to potential entrants.

However, economic realities may prevent a new **[**68]** entrant from pursuing a license to use the Motor database. CCC currently **[*52]** pays $ [text redacted] million per year for its exclusive license of the Motor database. PX 86-234 (CCC). While a new entrant might be expected to pay significantly less for a non-exclusive license, that negotiated price remains unknown and unknowable. A price that approached the $ [text redacted] million range that Mitchell and Audatex spend annually to maintain their databases may be prohibitively expensive for new entrants who also must offer lower prices to attract customers. Because this is a low-growth industry with few new

---

[29] For instance, the Motor database contains over 3 million unique parts. PX 25 P 6 (Carr Decl.). Mitchell's database has "over 7.6 million part descriptions, 2.2 million labor times, 128,000 vehicle configurations, 139,000 graphics and detailed parts information for vehicles up to 20 years old." PX 573-009 (Mitchell); **[**66]** *see also* PX 574-001.

[30] Mitchell, Motor, and Audatex each use labor times developed from their own propietary time studies. PX 578-025 (Mitchell); PX 25 P 8 (Carr Decl.); PX 1000-006 (Audatex) ("Forty years of experience, backed by time and labor studies"); PX 585-017 (Audatex).

customers, *see* PX 574-002 (Mitchell), new entrants would have to win business from incumbents to generate sufficient revenues to remain a going concern for any length of time. It is unclear whether they could do so profitably, or if the projected profits would be sufficient to entice new entrants, given the market power that would be held by CCC/Mitchell and Audatex. *See* Merger Guidelines § 3.3 (entry considered "likely" if it would be profitable at pre-merger prices, and if such prices could be secured by the entrant). Notably, no potential new entrant has contacted Motor about the availability **[**69]** of its database since the merger was announced in April 2008. PX 25 P 20 (Carr Decl.).

[Text redacted.]. *Id*. P 22 (Carr Decl.). [31]

Despite these hurdles, it cannot be gainsaid that the release of the Motor database would significantly reduce the most critical barrier to entry in Estimatics. However, access to acomplete and respected Estimatics database appears to be only one of many related barriers to entry.

As with Estimatics, a database for TLV also requires the compilation and integration of millions of data points collected from thousands of sources. For example, Audatex's database draws on "approximately 110 million vehicle records" per year, and contains data from over 11,000 dealerships and over 3,500 other local market resources. PX 534-019; *see also* PX 1943-007, 009; PX 688-075. CCC has a "vehicle database of approximately 64,00 [sic] unique vehicles." PX 1964-010 (CCC). Both CCC's and Mitchell's TLV products include vehicle history reports by Vehicle Identification Number (VIN) to verify the condition of the vehicle. PX 81-032-036 (CCC Response to [text redacted] RFP); PX 116-035-038 (CCC Response to [text redacted] RFP); PX 643-011 (Mitchell). Thus, development **[**70]** of a TLV database poses similar challenges to those relating to creation of an Estimatics database.

Besides the database, the second main component of Estimatics and TLV products is the software that computes repair estimates or, in the case of TLV, vehicle valuations. With respect to Estimatics, development of complex, customizable, and integrated software is another significant barrier to entry. Firms must design custom interfaces that support specific communication protocols. *See* PX 25 P 18 (Carr Decl.); *see also* Carr Dep. at 23 (Motor) (features and functionalities of Estimatics software are important to customers). CCC's Estimatics software "involves over a decade of trials and is built on complex algorithms." PX 204-006. It can communicate via the Internet or a private network, PX 81-006 ([text redacted] RFP), and offers a patented "Compare" feature that automatically alerts users when alternative parts are available. PX 81-019 (CCC). CCC began developing its Pathways product in 1993-94, but did not roll it out until 1996 even though it did not have to create its own database. Dickens IH Tr. at 115-117 (CCC). Despite advances in computer technology, it is projected that developing **[**71]** new Estimatics software **[*53]** would take one to two years. Lindner IH Tr. at 147:12-14 (Mitchell); *accord* PX 680-093-094 (Aurora); Lukens Dep. at 95-97 (APU Solutions, Inc. ("APU")) (Mitchell executive told an APU executive that the combined Mitchell-CCC platform would take 3-5 years to complete). [32] Focus Write developed a software interface over a period of about 18 months, PX 610-001, but its software "logic" was considerably improved once Focus Write was given access to Mitchell's software. PX 545-003 (2006 Focus Write Letter).

Similarly, TLV software is also powered by complex algorithms that interact with the database and drive the TLV system. Sun IH Tr. at 59-60 (Mitchell); Sun, Tr. (1/8 p.m.) at 47:199-48:19 (Mitchell) (to penetrate the TLV market, Mitchell partnered with J.D. Power, its source for the core database and development of algorithms for the software). In a combined effort, VVS and CCC spent eighteen to nineteen months developing a TLV software product for commercial trucks alone. Blitstein Dep. at 18-19 (VVS). CCC financed and provided **[**72]** the computer programs for the project. *Id*. at 17-18.

---

[31] [Text redacted.]

[32] APU is a technology provider for the alternative parts-supply industry that recently entered into a strategic relationship with Audatex.

Although small repair facilities can use and perhaps may even prefer a basic Estimatics tool without all of the add-on programs, insurance companies and DRP repair facilities, which constitute the overwhelming majority of the market, require communicating products that offer connectivity between the insurance company and the repair facility. For these customers, the Estimatics product must be able to communicate the status of partial loss claims through the Internet or other specialized communication links. *See* PX 1020 P 12 (Hayes Prelim. Report); *see also* PX 81-006 (CCC's Estimatics product can communicate via the Internet or a private network). In addition, because many customers, particularly insurance companies, prefer to purchase their auto physical damage and TLV products in bundles from one vendor, [33] successful vendors must be able to offer a full portfolio of products. *See* PX 25 P 18 (Carr Decl.). [34] This point is demonstrated by the business practices of the three major competitors: In addition to the core estimating products, the bundles offered by CCC, Mitchell and Audatex may include digital imaging, shop management, **[**73]** aftermarket parts data, workflow, audit tools, and total loss valuation, among others; they also may offer free or cut-rate training on the use of the products as well as variable pricing based on frequency of use or contract duration. Conway, Tr. (1/9) at 92:1-18 (Audatex); PX 680-007-008, 010 (Mitchell); PX 86-008-009 (CCC); PX 244-062 (CCC's Response to [text redacted] **[*54]** RFP). Without a full suite of products to offer, a new firm would face enormous difficulties in challenging the established companies for business from insurance companies and DRPs.

Indeed, partially as a result of product integration and connectivity between repair facilities and insurance companies, CCC has achieved "[d]eep integration with customers [that] supports a 95% retention rate." PX 99-011 (CCC). This "stickiness" affects both insurance companies and repair facilities because if an insurance company is unwilling to switch, the repair shops that are part of its DRP typically will not switch either. This is because insurance companies either "mandate" that members of its DRP use the same Estimatics product used in-house or recommend (issue a "soft mandate") that they use the same product. PX 531-002 ("Insurance DRP Mandates continue to drive market."); PX554-036 (Mitchell). Thus, relationships with large insurance carriers are an important dynamic in the industry because such relationships are:

> the leading **[**75]** driver of revenue as carriers are not only the estimatics vendors' largest customers in terms of direct revenue, but also generate secondary revenue streams through repair shops that are affiliated with the insurance carriers' DRP programs. These insurance carrier relationships are generally longstanding and difficult to break once established as the switching costs associated with retooling internal systems and forcing system turnover at the repair shop level are steep. In addition, the service provided by estimatics vendors are critical to the operation of insurance carriers' claims resolution process and any disruption would have negative ramifications for the carrier's operations.

PX 585-047 (Audatex). [35]

Additionally, "integrated services, technological infrastructure in place, and longterm customer contracts all contribute **[**76]** to prohibitively high switching costs," PX 583-028 (Mitchell), thus making it difficult for a new entrant to gain market share from an incumbent vendor. *See* PX 543-016 (Mitchell). Furthermore, "[s]witching vendors is a long, difficult process, often taking as much as 12 to 18 months to fully transition to a new provider."

---

[33] *See* PX 11 P 4 (Brown Decl.) ([text redacted]); PX 27 P 5 (Danforth Decl.) ([text redacted]); *see also* PX 686-013 (Ohio Casualty Ins. Co. ("Ohio Casualty") RFP); Brandt, Tr. (1/8 a.m.) at 20:18-21:3 ([text redacted]).

[34] *See, e.g.*, Burklin Dep. at 80-81 ([text redacted]); Brungger IH Tr. at 161-162, 158-159 ([text redacted]); PX 535-022 (Mitchell's TLV product was regarded as a "Killer Product [that] Closes [a] Big Portfolio Gap"); Hayes, Tr. (1/12 p.m.) at 134:14-135:10; PX 401 P 12 (Blitstein Decl.) ("[T]he inclusion of an automobile partial loss estimating system is widely regarded among customers as a necessary feature when considering **[**74]** the purchase of an automobile total loss valuation product."); PX 534-005 (Mitchell) (Kelley Blue Book and NADA cannot enter TLV market segment because they "do not have the base estimatics business to leverage (as does CCC, [Audatex] and Mitchell)"); PX 71-004 (CCC's total loss functionality will not be optimized unless it is paired with CCC's Estimatics).

[35] The current state of the marketplace for Estimatics products is as described. However, there is evidence that the insurance industry is moving towards open standards, by which the insurer would no longer mandate what software its DRP repair facilities use (potentially opening up the repair shop market considerably). *See* Ramamurthy, Tr. (1/22 a.m.) at 94:19-24 (CCC).

PX 585-029 (Audatex); PX 574-003, 016 (Mitchell) (A customer switching vendors "would be forced to retrain its employees, which can take as long as 3-4 days per employee for an insurance carrier, and make a significant capital expenditure to switch out [the] embedded technological infrastructure"). These disincentives to switching have resulted in an incumbent winning percentage of close to 90%. PX 574-003 (Mitchell); PX 629-003 (Mitchell); Conway, Tr. (1/9) at 121:4-5 (Audatex); Ramamurthy Dep. at 47 (CCC); Hayes, Tr. (1/12 p.m.) at 161:25-162:11. *See also* PX 668-021 (Mitchell) ("Particularly among Top 25, Core Vendors are entrenched -- switching rare").

Furthermore, on this preliminary record, it appears that reputation, scale, and relationships also serve as lesser barriers to entry. The significance of reputational barriers to entry in antitrust analysis is a somewhat **[**77]** unsettled question. *See Tote, 768 F. Supp. at 1075*. Reputation can be a considerable barrier to entry where customers and suppliers emphasize the importance **[*55]** of reputation and expertise. *See Chi. Bridge, 534 F.3d at 437-38 & n.17* (while "general reputation" alone is not an effective barrier to entry, reputation for "industry-specific traits" of expertise and experience was considered significant in the storage tank-building industry); *Cardinal Health, 12 F. Supp. 2d at 57* (reasoning that the strength of reputation of the merging companies over smaller companies in the pharmaceutical wholesale market served as barriers to growth of smaller competitors); *Tote, 768 F. Supp. at 1075* (stating that the lack of a record of demonstrated performance served as a significant barrier to entry in the totalisator market, an industry that creates systems that support a common form of wagering at racetracks). *But see Waste Mgmt., 743 F.2d at 984* ("[W]e fail to see how the existence of good will achieved through effective service is an impediment to, rather than the natural result of, competition."); *United States v. Consol. Foods Corp., 455 F. Supp. 108, 119 (E.D. Pa. 1978)* ("Particularly in selling **[**78]** to institutional customers brand names are not significant.").

The record illustrates that reputation for experience and scale are legitimate barriers to entry in the Estimatics and TLV markets. As a precondition to bidding, most insurance companies require multiple years of audited financial statements showing financial stability, and multiple references from other Estimatics customers. PX 94-016 (CCC Response to [text redacted] RFP); PX 95 at 5 (CCC Response to [text redacted] RFP); PX 687-07, 026, 027 ([text redacted] RFP); PX 118-065-066, 067 (CCC Response to [text redacted] RFP); PX 116-008 (CCC Response to [text redacted] RFP); PX 117-004, 005, 028 (CCC Response to [text redacted] RFP); PX 686-006 ([text redacted] RFP). Insurance customers demand a "strong [s]hop footprint . . .[,] a proven management team that is dedicated to customer service . . .[, and] a proven Estimatics product with a clear roadmap for future enhancement and options." PX204-007 (Audatex). Scale is important in this industry, in part, because a vendor has to be large enough to afford the continuous research and development necessary to be competitive in Estimatics and TLV. Sun Dep. at 101 (Mitchell); *see* ***[**79]*** *also* Daly Dep. at 76-77 (Allstate) ("I would suspect that some of these smaller companies simply didn't have the track record or resources to the extent that we felt comfortable partnering with them on such a . . . significant initiative and product."). In addition, insurance customers place great importance on extensive customer support capabilities and may require Estimatics suppliers to affirm that they have a single point of contact available 24 hours a day, seven days a week. *See, e.g.*, PX 118-009 (CCC Response to [text redacted] RFP).

On these factors, the Big Three have an enormous advantage. CCC, Mitchell, and Audatex are enormous companies in comparison to their remaining competitors, much less a new entrant. Mitchell has over 1,400 employees, Sun Dep. at 17 (Mitchell), of which [text redacted] to [text redacted] are dedicated to insurance customer support, Sun, Tr. (1/9) at 75:4-8 (Mitchell). It has [text redacted] to [text redacted] people across the country in its collision sales department, Sun Dep. at 39, and an editorial staff of [text redacted] to maintain its database, PX 572-026 (Mitchell). Mitchell has a technical assistance center staffed from 5 a.m. to 5 p.m. and **[**80]** offers the option of emergency technical assistance 24 hours a day, seven days a week. PX 1958-043 (Mitchell's Response to [text redacted] RFP); *see also* PX 681-003 ([text redacted]). CCC has over 834 full-time employees, including 225 product development personnel, and 36 client consultants who are scattered throughout the **[*56]** country and are responsible for training, customer service, and technical support. *See* PX 94-012, 019 (CCC Response to [text redacted] RFP). CCC also has over 120 field employees able to service insurance customers, PX 95-022 (CCC Response to [text redacted] RFP), 65 account managers and field support personnel covering all 50 states in its Insurance Services Division, and 60 representatives in its Automotive Services Group. PX 116-004 (CCC Response to [text redacted] RFP).

In terms of experience, Mitchell's Executive Vice President for Auto Physical Damage, Marc Brungger, has been with the Company for 20 years. PX 691-046 (Aurora). "Mitchell also has an editorial staff with an average of over 17 years of industry experience." PX 573-009 (Mitchell). CCC's management team has an "[a]verage of 10+ years of industry and company experience." PX 99-011 (CCC Lenders' Presentation). **[**81]** In addition, given the number of individuals who have defected to a competitor and the relative dearth of novices in this industry, *see, e.g.*, Conway, Tr. (1/9 a.m.) at 91:21-92:24 (Conway worked at Mitchell before moving to Audatex); PX562-33 (Tony Aquila was employed by Mitchell before leaving for Audatex); DX 30-8 (Eric Seidel was a former investor in Focus Write), the evidence suggests that there are a limited number of people who have significant experience on the seller side of this industry.

Relationships also play a significant role in insurance companies' and repair facilities' choice of vendor. CCC, Audatex and Mitchell have a large head start over the recent and potential new entrants in establishing customer relationships. Through its 60 year history of providing estimating solutions, Mitchell has established an extensive network of thousands of insurance staff and collision repair facility users that would be difficult to replicate. *See* PX 573-009 ("Mitchell has a long-standing and deep relationship with over [text redacted] insurance companies and over [text redacted] collision body shops through its 60 year history."). Likewise, "CCC has a highly diversified, stable customer **[**82]** base" and "strong, long-term customer relationships with a 95% customer retention rate." PX 99-011, 007 (CCC).

Finally, the return on investment in the Estimatics and TLV markets may make entry of new firms unlikely. The cost of creating the software (and potentially a database) are up-front sunk costs. The ability of new entrants to recoup those costs may be limited by factors that define these markets: (1) Estimatics and TLV markets are "**very** mature with not a lot of room for growth," PX 543-005 (Mitchell) (emphasis in original); (2) customers do not frequently switch firms, PX 618-027 (Mitchell); PX 161-007, 011 (CCC); PX 543-016 (Mitchell); PX 574-003 (Mitchell); PX 583-026 (Mitchell); and (3) insurance companies enter long-term contracts for Estimatics and TLV, so only about a third of insurers are even available for bid in a given year, PX 583-026 (Mitchell). These factors led Mitchell to conclude that the "small revenue opportunity" in Estimatics "should deter any potential new competitor from making the considerable capital investment it would require to develop the database and communications infrastructure necessary to compete in this space." PX 629-002 (Mitchell). Further **[**83]** consolidation of these markets is likely to make potential new entrants even more wary.

4. *Web-Est: The "Fix" To Barriers to Entry?*

Defendants rely heavily on the potential future of Web-Est to counter the FTC's case on barriers to entry. Web-Est was formed in March 2008 with Mitchell's financial backing around the same time CCC and Mitchell announced the merger; **[*57]** Mitchell holds a [text redacted] % interest in Web-Est. Seidel, Tr. (1/22 p.m.) at 173:11-15 (Web-Est). Web-Est now offers a Web-based non-communicating estimating product to low-end repair facilities. Seidel, Tr. (1/22 p.m.) at 165:18-22, 167:7-8 (Web-Est). [36] It does not currently participate in the TLV market. Web-Est's Estimatics system is based, in part, on a license permitting it to use Mitchell's parts database, but the license agreement contains a restrictive covenant that prohibits Web-Est from selling to the top fifty insurance companies, from selling communicating Estimatics products to insurance companies or repair facilities, and from integrating with other third-party service providers, such as parts locators, salvage, and other providers. *See* DX 59; Seidel, Tr. (1/22 p.m.) at 173:24-174:13 (Web-Est).

Facing FTC resistence to the merger, Mitchell followed suit to CCC's release of its exclusive hold on the Motor database. Mitchell and Web-Est have entered into a new licensing agreement which will become effective as soon as the merger closes. Seidel, Tr. (1/22 p.m.) at 175:20-23, 177:12-19 (Web-Est); DX 423 (Mitchell). Pursuant to the new agreement, Mitchell will remove virtually all of the restrictions on Web-Est's rights to sell to insurance companies and repair facilities. Seidel, Tr. (1/22 p.m.) at 175:20-25 (Web-Est); DX 423 (Mitchell).

[Text redacted.]

---

[36] [Text **[**84]** redacted.]

The new license agreement also resets the clock on Web-Est's initial five year license to the Mitchell database, and gives Web-Est an option to renew for an additional five years. Seidel, Tr. (1/22 p.m.) at 175:9-14 (Web-Est); DX 423 (Mitchell). Web-Est also will be permitted to use other databases if it wishes, and can integrate with other vendors' products. *Id*. Furthermore, if the merger closes, Mitchell will relinquish its equity in Web-Est as well as its purchase option for Web-Est. *Id*.; Sun Tr. (1/9 p.m.) at 65:11-25 (Mitchell).

[Text redacted.]

The ability and willingness of current competitors to expand their foothold **[**85]** in the market and/or reposition greatly reduces the anticompetitive effects of a merger, and is essentially equivalent to new entry. *See* *Arch Coal, 329 F. Supp. 2d at 148* ("Defendants have shown that the post-merger fringe capacity in the [market] would be more than sufficient to absorb any increase in demand caused by any production lag coordinated by the 'big three' producers . . . ."). Defendants argue that the release of these restrictions will shatter the only major barrier to entry, will enable Web-Est to expand its business to new heights, and will usher in a new era of dynamic competition in these markets. They offer numerous points of evidence in support of their conclusion.

Defendants contend that Web-Est's web-based product will make it a "game changer" in the industry. Seidel, Tr. (1/22 p.m.) at 193:11-21 (Web-Est). They argue that Audatex's experiences in the U.S. market confirm that the concept of web-based products is gaining ground in the auto physical damages industry. Cheskis, Tr. (1/23 a.m.) at 11:3-23 (Gerber uses Audatex's web-based product in sixteen facilities in the United States); DX 225-33-35 (Audatex [text redacted]). Additionally, Web-Est already has a communicating **[**86]** Estimatics product embedded in its non-communicating product which it can turn on almost immediately, Seidel, Tr. (1/22 p.m.) at 176:1-3, 186:19-187:3 (Web-Est); is in the process of developing [text redacted], *id*. at 188:10-189:12, thus eliminating **[*58]** the barrier of product portfolio in Estimatics and TLV.

Defendants suggest that these plans have already begun to reap significant rewards. Since its formation last spring, Web-Est has more than doubled its initial customer base; it now sells Estimatics to about 11% of its addressable market. *Id*. at 165:23-25, 174:14-21. [37] Looking forward, Eric Seidel plans an aggressive price-cutting strategy and forecasts sales to DRPs and insurers within the first year and annual revenues of $ 14.6 million within five years. DX 30 at 6-7, 50 (Web-Est Oct. 2008 Business Plan). Mr. Seidel expects to add 5,000 customers within five years, including three insurance carriers within the next year. *Id*. at 5, 28.

[Text redacted.]

Although Defendants acknowledge **[**87]** that Web-Est is not nearly as large as Audatex, CCC or Mitchell, they assert that Web-Est does not plan "to go out and try to replicate a CCC, a Mitchell, Audatex," because they are "brick and mortar" Estimatics firms. *Id*. at 193:11-21. Defendants argue that Web-Est believes it will become the Estimatics industry's version of Netflix which upended Blockbuster and revolutionized the movie rental business. *Id*. at 193:22-194:19.

Mr. Seidel, who testified at the preliminary injunction hearing, is an impressive man and the Court has no doubt that he has the entrepreneurship, experience, and drive that bode well for Web-Est's future. Then again, of course, Mr. Seidel is whole-heartedly behind the proposed merger because it would free his hands to compete as he wishes. Nonetheless, the Court cannot ignore that Web-Est is a ten to twelve person company with current projected annual revenues of $ [text redacted] million (assuming the merger is effected). *Id*. at 218:14-19; PX 1003-006-007, 033 (Web-Est). It will be an ant to an elephant, compared to a post-merger CCC/Mitchell, at $ 450 million in revenues and over 2,000 employees. *See* PX 529-006 (transaction valued at approximately $ 1.4 billion **[**88]** and CCC/Mitchell expects to earn $ 460 million in annual sales at inception); *see also* Seidel, Tr. (1/22 p.m.) at 205:3-6 ([text redacted]). Assuming that web-based products will succeed (society is increasingly using the web, including the courts for electronic case filing), insurance companies will still demand customer support services and suppliers still will need large sales forces to woo them. The growth curve to take Web-Est from where it is now to where it

---

[37] Due to the current restrictions of the Mitchell license, Web-Est currently is limited to pursuing a market of approximately [text redacted] small shops. Seidel, Tr. (1/22 p.m.) at 174:14-17 (Web-Est).

would need to be to compete with CCC/Mitchell seriously enough to cause price competition is extraordinarily steep and inevitably long. That journey is made more difficult by the fact that Mitchell will no longer lend its expertise to Web-Est, nor will it hire out its staff to Web-Est. Sun, Tr. (1/8 p.m.) at 13:5-9 (Mitchell).

Moreover, CCC, Mitchell and Audatex have been refining their Estimatics software for over a decade. *See* PX 204-006 (CCC). In discussing whether entry is "sufficient," the Merger Guidelines suggest that:

> where the concern is unilateral price elevation as a result of a merger between producers of differentiated products, entry, in order to be sufficient, must involve a product so close to the products of **[**89]** the merging firms that the merged firm will be unable to internalize enough of the sales loss due to the price rise, rendering the price increase unprofitable.

[*59] Merger Guidelines § 3.4. From this record, it is simply unknown how many insurance companies and DRP repair facilities will find Web-Est's communicating Estimatics product to be up to par, or at what pace.

And, Web-Est cannot be considered a truly independent actor because Mitchell will continue to be so involved in its business. In order to be accepted, "curative divestitures" must be made to a new competitor that is "in fact . . . a willing, *independent* competitor capable of effective production in the . . . market." *White Consol. Indus. v. Whirlpool Corp., 781 F.2d 1224, 1228 (6th Cir. 1986)* (emphasis added). Mitchell's counsel has similarly observed that it is a "problem" to allow "continuing relationships between the seller and buyer of divested assets after divestiture, such as a supply arrangement or technical assistance requirement, which may increase the buyer's vulnerability to the seller's behavior." Richard G. Parker & David A. Balto, Evolving Approach to Merger Remedies, Antitrust Report (May 2000), *available at http://www.ftc.gov/speeches/other/remedies.shtm* **[**90]** (citing FTC, *A Study of the Comm'n's Divestiture Process* (1999), *available at http://www.ftc.gov/os/1999/08/divestiture.pdf*). Although Mitchell will relinquish its financial interests in Web-Est upon consummation of the merger, Web-Est will continue to license Mitchell's database for at least five years, with a continuing option for five more.

[Text redacted.]

At its rosiest, Web-Est's most optimistic financial projection predicts annual revenues of approximately $ [text redacted] million by 2013 (of which $ [text redacted] million would come from insurance companies). PX 1003-033 (Web-Est); Seidel, Tr. (1/22 p.m.) at 198:19-23, 202:25-205:2 (Web-Est). This is admirable growth. By contrast, however, in 2007, Mitchell had $ [text redacted] million in total revenue and an EBITDA [38] of $ [text redacted] million. PX 530-004 (Mitchell). CCC had $ [text redacted] million in total revenue and an EBITDA of $ [text redacted] million. *Id*.; PX 86-034 (CCC) (also estimating Solera's global revenues in 2007 at $ [text redacted] million). A merged CCC/Mitchell would be even bigger. According to the Merger Guidelines, entry is "timely" if it can be achieved "within two years from initial planning to **[**91]** significant market impact." Merger Guidelines § 3.2. ("significant market impact" means "significant impact on price in the relevant market"). While two years may be a short time frame by which to judge successful entry in this industry, even within five years, Web-Est hopes to make hardly a splash compared to Mitchell's current market share. Whatever Web-Est's plans and aspirations for the future may be, it is very unlikely to be able to compete effectively, *i.e*., affect pricing, within five years or even soon thereafter. *See In re Chi. Bridge & Iron Co., 138 F.T.C. 1024, 1071 (2005)* ("the mere fact that new entrants and fringe firms have an intent to compete does not necessarily mean that those firms are significant competitors capable of replacing lost competition").

5. *Predictive Analytics*

Predictive analytics, an internal method of calculating future estimates based on an insurance company's own empirical data, Marushka Dep. at 14-15 (CCC), may supplant the Estimatics software sold by CCC, Mitchell and Audatex one day, and the Defendants hint that it may be sooner rather than later when they suggest that the merger **[**92]** of two outdated platforms cannot hurt anyone. It is acknowledged by **[*60]** CCC, however, that there is "nothing in production . . . that we've actually seen" that might replace today's Estimatics. Ramamurthy IH

---

[38] Earnings Before Interest, Taxes, Depreciation and Amortization.

Tr. at 203:13-19 (CCC). CCC's General Manager, Insurance Services Group, stated that no insurance company currently uses predictive analytics to calculate partial loss estimates and he does not know whether predictive analytics are allowed under insurance regulations. Marushka Dep. at 15 (CCC). In other words, while "there has been talk about . . . it," Ramamurthy IH Tr. at 203 (CCC), no insurance companies have implemented it. *See* Marushka Dep. at 15. The Court finds this evidence of new entry too speculative to rely upon. [39]

b. *Coordinated Effects*

Merger law "rests upon the theory that, where rivals are few, firms will be able to coordinate their behavior, either by overt collusion or implicit understanding in order to restrict output and **[**93]** achieve profits above competitive levels." *Heinz, 246 F.3d at 715* (citing *PPG Indus., 798 F.2d at 1503*). The theory follows that, absent extraordinary circumstances, a merger that results in an increase in concentration above certain levels "raise[s] a likelihood of 'interdependent anticompetitive conduct.'" *PPG Indus., 798 F.2d at 1503* (quoting *Gen. Dynamics, 415 U.S. at 497*); *see also* *FTC v. Univ. Health, Inc., 938 F.2d 1206, 1218 n.24 (11th Cir. 1991)* (high concentration makes it "easier for firms in the market to collude, expressly or tacitly, and thereby force price above or farther above the competitive level"); *Elders Grain, 868 F.2d at 905*. Successful coordinated interaction entails "[1] reaching terms of coordination [2] that are profitable to the firms involved and [3] an ability to detect and punish deviations that would undermine the coordinated interaction." Merger Guidelines § 2.1. Whether a merger will make coordinated interaction more likely depends "on whether market conditions, on the whole, are conducive to reaching terms of coordination and detecting and punishing deviations from those terms." *Id*. Because the FTC has established a *prima facie* case, the burden is **[**94]** on the Defendants to demonstrate "structural barriers," unique to this industry, that are sufficient to defeat the "ordinary presumption of collusion" that attaches to a merger in a highly concentrated market. *Heinz, 246 F.3d at 725*.

"The combination of a concentrated market and barriers to entry is a recipe for price coordination." *Id. at 724*. Yet, despite the high HHI numbers currently displayed in these markets, by all accounts, Estimatics and TLV are highly competitive markets today and there is no evidence of past coordination. Danford Dep. at 120 (Ohio Mutual); Brandt, Tr. (1/8 a.m.) at 17:23-18:7 (The Hartford); Cheskis, Tr. (1/23 a.m.) at 10:12-23 (Gerber); Aquila Dep. at 15 (Audatex); Conway, Tr. (1/9) at 169:10-21 (Audatex). *Compare with* *Elders Grain, 868 F.2d at 905* ("there is a history of efforts to fix prices in the industry"); *Hosp. Corp. of Am. v. FTC, 807 F.2d 1381, 1388 (7th Cir. 1986)* ("there is a tradition . . . of cooperation between competing hospitals in Chattanooga"). "While proof of prior cooperative behavior is relevant, it is not a necessary element of likely future coordination in violation of *Section 7*." *Arch Coal, 329 F. Supp. 2d at 116*. But Defendants do **[**95]** not rest there. Rather, they argue that these markets provide a perfect example of the HHI's failure to measure anticompetitive effects because, despite their high concentration, "[t]he undisputed **[*61]** market realities here present a perfect storm of factors that impede coordination." Defs.' Post-Trial Brief at 16. According to Defendants, those factors include: (1) product heterogeneity; (2) lack of price transparency; (3) complexity and lack of standardization with respect to pricing and products; (4) firm heterogeneity; (5) large, infrequent contracts; (6) high fixed costs relative to variable costs; and (7) the presence of sophisticated buyers. *See* Ordover, Tr. (1/23 a.m.) at 90:1-92:5.

1. *Characteristics of the Products and Competitors*

"[R]eaching terms of coordination may be limited or impeded by product heterogeneity." Merger Guidelines § 2.11; *see also, e.g.,* *Hosp. Corp. of Am., 807 F.2d at 1390*. "Estimatics software is differentiated along a number of important dimensions," including "accuracy and coverage of the underlying data for parts and estimated labor times, perceived differences in the ease of use of the competing products, and the quality and timeliness of technical support **[**96]** services." PX 1020 P 71 (Hayes Prelim. Report). Dr. Ordover opined that on a scale of zero to ten, these products are closer to a ten in terms of heterogeneity. Ordover, Tr. (1/23 a.m.) at 85:2-11. Insurance companies demand customized Estimatics and TLV products tailored to fit their individual needs. Ramamurthy, Tr.

[39] With the movement towards web-based platforms well underway, *see* DX 225-33-35 (Audatex), and the potential emergence of predictive analytics in the not too distant future, the FTC may be chasing yesterday's technology, when all is said and done.

(1/22 a.m.) at 99:8-100:2 (CCC). Some insurers even require that bidders commit to spending $ 500,000 to $ 600,000 per year to develop software unique to that customer. *Id*.

In addition to product heterogeneity, coordination may be impeded by a lack of "standardization of pricing or product variables on which firms could compete." Merger Guidelines § 2.11. The base Estimatics product is often sold in highly customized bundles that include other auto physical repair products and various add-on products to suit the particular requirements of the customer, thus resulting in significant product variability. Ramamurthy, Tr. (1/22 a.m.) at 88:3-7 (CCC); Conway, Tr. (1/9) at 93:24-95:5 (Audatex) ("With the number of products that [Audatex] offer[s] [to insurers], you could come up with thousands of different combinations of those products."); *id*. at 111:9-13 ("On the [repair] **[**97]** shop side with the number of different add on products," Audatex could offer "hundreds" of different bundles). Along with the base estimating product, the bundles can be comprised of any number or combination of other products and add-ons, as well as varying levels of installation support, customer service, training and integration. Rollins Dep. at 17 (Safeco); Kostakis Dep. 36, 37-39 (Angelo's Auto Body Shop); *see also* DX 98 (CCC Price Sheet); DX 47 (Mitchell's August 2007 price list for repair facilities is thirty-one pages long, consisting of almost 400 product and pricing options). These customized bundles have highly complex and varying pricing metrics including flat fees for the entire bundle, individual product pricing, and almost everything in between. *See, e.g*., DX 243-10-21 (CCC Pathways Services Agreement).

Defendants also assert that the likelihood of coordination in these markets is further diminished by the heterogeneity exhibited among the firms in these markets. "[R]eaching terms of coordination may be limited or impeded by firm heterogeneity, for example, . . . the production of another product that tends to be used together with the relevant product." Merger Guidelines **[**98]** § 2.11. Defendants argue that because the sale of add-ons and other products in conjunction with Estimatics and TLV is an increasingly important area of focus and source of revenue growth, "the merged firm's unique interest **[*62]** in enhancing sales of such related offerings further impedes any interest in coordinated interaction." Defs.' Post-Trial Brief at 20. They point to Mitchell's unique medical bill-review services as an example. *See* PX 583-027-028 (Mitchell); PX560-031-032 (Mitchell).

While Defendants' arguments do have force, particularly with regard to the insurance industry, their points are weakened by their own admissions that there is a "minimum differentiation in offerings," PX 1420-007 (CCC); *see also* PX 253-010 (CCC). "Generally speaking there are . . . three or four [bundles] that are purchased consistently from one insurance company to the next in most all of the bids." Conway, Tr. (1/9) at 94:9-11 (Audatex). The "standard package" includes the basic estimating system, the imaging systems, an aftermarket products tool and communication. *Id*. at 94:12-18. While it is true that Mitchell is the only one of the Big Three firms that offers a medical bill-review product, with limited **[**99]** other exceptions, CCC, Mitchell and Audatex have essentially the same suite of product offerings and add-ons, and are therefore unable to separate themselves from the pack on a consistent basis through unique sets of products. *See* PX 1420-007 (CCC document showing the different add-ons in Estimatics) ([text redacted]); PX 253-010 (CCC) (noting that [text redacted]). *But see* PX 550-022 (Mitchell) ("Continue to look for points of differentiation"); *see also* Carr Dep. at 23 (Motor).

2. *Dynamics of the Marketplace*

In addition to product and firm heterogeneity and variability, Defendants argue that the unique marketplace dynamics make coordination unlikely. First, Defendants assert that the lack of pricing transparency for Estimatics and TLV is a significant impediment to coordination. "Reaching terms of coordination may be limited or impeded . . . by firms having substantially incomplete information about the conditions and prospects of their rivals' businesses," Merger Guidelines § 2.11, and the ability to detect deviations from the terms of coordination is limited "if **[**100]** key information about specific transactions or individual price or output levels is [not] available routinely to competitors." *Id*. § 2.12. *See also* *Oracle, 331 F. Supp. 2d at 1166* ("Without homogeneity [of product offerings] or transparency [in pricing], the market conditions are not conducive to coordinated effects, either tacit or express."). The bidding process for insurance companies is conducted on a confidential basis, and bids are usually accompanied by a non-disclosure agreement. Sun, Tr. (1/9) at 46:22-47:4 (Mitchell); Brandt, Tr. (1/8 a.m.) at 23:19-22 (The Hartford). Though these competitors go to great lengths to obtain "intelligence" about each other's pricing, Sun, Tr. (1/8 p.m.) at 55:13-58:21 (Mitchell); Sun, Tr. (1/9) at 75:20-77:5 (Mitchell), and the record contains instances where one vendor has obtained partial bids, price lists, or other pricing information about their competitors, *e.g*., PX 85-059 (CCC); PX 506 (Mitchell on Audatex pricing); PX 623 (Mitchell), PX 696 (Mitchell); PX 713 (Mitchell on Audatex pricing); PX 714 (Mitchell on Audatex pricing); PX 715 (Mitchell on CCC pricing); PX 716 (Mitchell on CCC pricing), pricing for insurance company contracts is **[**101]** not "routinely available." [40] Furthermore, many times when CCC, Audatex or Mitchell obtain **[*63]** so-called competitive information on pricing, the information is either misleading or simply false (presumably to force a lower bid). *See, e.g*., DX 425-1 ([text redacted]); Conway, Tr. (1/12 a.m.) at 28:14-19 (Audatex "expect[s]" that customers have provided inaccurate information on occasion with the hopes of driving down Audatex's prices).

The FTC contends that CCC, Mitchell and Audatex obtain a substantial amount of information after a bidding process, which they can use to set future prices. *See* Sun, Tr. (1/8 p.m.) at 55:6-9 (Mitchell); *see also* PX 172-002 (CCC e-mail); PX 598-001 (Mitchell [text redacted]); PX 179-003 (CCC). Given the degree of product variability in the industry, past pricing information may be suggestive but not necessarily helpful for the next bid, particularly a bid for the same insurer because contracts with insurance companies can last from two to five years, during which time prices have **[**102]** been shown to alter significantly. *See* *Arch Coal, 329 F. Supp. 2d at 141* ("It is true that industry publications make some market information available among producers. However, the information published in those sources is limited, imperfect, and largely unreliable and untimely.").

Pricing is not as obscure in the repair facility segment. Like insurance company bids, repair facility contracts are confidential. *See, e.g*., Sun, Tr. (1/9) at 53:19-54:10 (Mitchell); Ramamurthy, Tr. (1/22 a.m.) at 108:23-25 (CCC); Conway, Tr. (1/12 a.m.) at 39:8-17 (Audatex). Repair facility contracts also often consist of bundled products, including the base Estimatics product and a variety of add-ons. Conway, Tr. (1/9) at 111:9-113:2 (Audatex). However, despite confidential repair facility contracts and product bundling, Estimatics pricing for the repair shop segment is "transparent." Seidel, Tr. (1/22 p.m.) at 227:9-14, 226:2-24 (Web-Est) (stating that it is possible to get the price points of the Big Three's Estimatics products by calling up shops and asking what they are paying); *see also, e.g*., PX 179-003 (CCC); PX 173 (CCC [text redacted]); PX 742-008 (Mitchell began a matching program in December **[**103]** of 2008 in which it offered to match CCC and Audatex on the condition that Mitchell had the "competitive quote faxed in").

Likewise, TLV prices are more transparent than Estimatics prices for insurance companies. Because TLV is sold on a per valuation basis, there is only one price to track. *See* PX 172-002 (CCC e-mail) ("Mitchell is already in [the] door with estimating and is offering total loss @ $ [text redacted]"); PX 722 (Mitchell e-mail) (Mitchell agreed on $ [text redacted] per valuation for a certain insurer "in part because CCC came in at $ [text redacted]."). However, TLV prices are becoming less transparent as vendors turn increasingly toward the "one throat to choke concept," *i.e*., bundling, whereby they purchase Estimatics, TLV and add-ons from a single source. *See* PX 543-019-020 (Mitchell); PX 550-025 (Mitchell); PX 1432-003 (CCC); PX 1402 (CCC web-page promoting the CCC One total repair platform). Even when TLV is sold separately, these three companies still have differing price metrics based on a variety of factors including, *inter alia*, the relationship with the customer and the size of the order. *See* DX 186-26 (CCC contract with [text redacted]) (per valuation price, **[**104]** plus surcharge for certain methods of ordering, as well as additional fees for different vehicles); DX 187-10 (CCC contract with [text redacted]) (per valuation price for cars, additional for trucks, with separate minimum purchase requirements for both).

On balance, as Dr. Ordover suggests, the pricing information in these markets is **[*64]** best described as "shrouded," Ordover, Tr. (1/23 a.m.) at 88:8-22, *i.e*., neither as transparent as the FTC would wish nor as secret as the Defendants would now prefer.

Defendants also contend that long-term, high-value Estimatics and TLV contracts in the insurance industry lower the incentives to coordinate and increase the incentives for cheating. *See id*. at 85:15-23. Insurance contracts typically range from two to five years, and can be priced anywhere from a few thousand dollars a year for a small insurer to several million dollars a year for a large insurer. Conway, Tr. (1/9) at 96:16-20, 94:22-95:4 (Audatex); *see, e.g*., DX 252-4, 53 (five-year contract with CCC). Defendants and their expert assert that the insurance contracts,

---

[40] One source of competitive intelligence is former employees of one of the Big Three competitors who migrate to another one. Sun Dep. at 10-12 (Mitchell); PX 624-001. [Text redacted.]

particularly for Tier One insurers, are just too valuable for any one of the three competitors to agree to forego, whether implicitly **[**105]** or explicitly. The Merger Guidelines provide that "[w]here large buyers likely would engage in long-term contracting, so that the sale covered by such contracts can be large relative to the total output of a firm in the market, firms may have the incentive to deviate" from the terms of coordination. Merger Guidelines § 2.12; *see also* United States v. Archer-Daniels-Midland Co., 781 F. Supp. 1400, 1416, 1423 (S.D. Iowa) (finding coordination unlikely where transactions in the market were "relatively large" and "infrequent"). And, although individual repair facility contracts are not particularly large, Defendants argue that because CCC, Audatex and Mitchell earn large portions of their revenues from the sale of non-Estimatics products, they have an incentive to deviate from any potential terms of coordination in order to sell additional products.

In a similar vein, Defendants argue that the bargaining power and sophistication of their insurance company customers further impede coordination. A sophisticated customer base makes price coordination more difficult, *see* *Baker Hughes, 908 F.2d at 986* (sophisticated "buyers closely examine available options and typically insist on receiving **[**106]** multiple, confidential bids for each order"), but buyer power is greater when there are few buyers in the market. *See* *Elders Grain, 868 F.2d at 908* ("A concentrated and knowledgeable buying side makes collusion by sellers more difficult."). Although the top fifty insurance companies account for approximately 80% of the total revenues in physical damage claims market, PX 543-019, the insurance market as a whole is not concentrated. The HHI for the nineteen largest insurers (*i.e.*, the only insurers with a greater than 1% market share), who together represent 76% of the entire insurance market, is only 631 -- not very concentrated. *See* PX 515-028; *see also* PFF P 197. However, it is true that the larger automobile insurance companies have enough buying power to demand customized products and to use their leverage regularly to keep Estimatics prices low for repair facilities in their DRP networks. *See* Cheskis, Tr. (1/23 a.m.) at 13:16-14:13 (Gerber); *see also* Hall, Tr. (1/8 a.m.) at 94:15-24 (GMAC); Ramamurthy, Tr. (1/22 a.m.) at 110:15-111:6 (CCC). Collectively, the heterogeneity of the base products and customized bundling, the largely confidential pricing, and the high-value insurance **[**107]** contracts tend to make tacit coordination less likely than the huge HHIs might predict.

But this conclusion is not the end of the analysis. Defendants ignore a number of other factors present in these markets that would tend to confirm the HHI's predictions regarding the likelihood of coordination. Estimatics and TLV are "stable" markets in which the same three companies have been competing against each other for over a decade, making the market participants very familiar with each **[*65]** other. PX 583-024 (Mitchell); Sun, Tr. (1/8 p.m.) at 20:11-22 (Mitchell); *see also* PX 574-002 (Aurora); PX 554-054, 055 (Mitchell) ("the industry will not dramatically change over the next 5-10 years"); PX 1970-027 (CCC-Mitchell) ("The $ 40 billion auto damage claims industry is large and stable . . . ."). Defendants point to a lack of price transparency as the "[k]ey information" that is not "available routinely." *See* Merger Guidelines §§ 2.11 & 2.12. But pricing is not the only "key information" that is contemplated by the Guidelines. Indeed, the Guidelines state that if "key information about specific transactions *or* individual price or output levels is available routinely to competitors, it may be difficult **[**108]** for a firm to deviate secretly." *Id*. § 2.12 (emphasis added). These three firms know what products each offers, what insurance accounts each has won, and, often, the identities of the final two bidders for an insurance company contract. *See, e.g*., Balbirer IH Tr. at 73 (CCC) ("Obviously we know what their products are, they know what our products are, and we're in the marketplace. They know who we sell to and we know who they sell to."). In particular, each of these three companies knows which one of them sells to which of the top twenty-five insurance companies. PX 543-011-012 (Mitchell) (identifying top twenty-five insurers, who won the contract, and claims volume). CCC, Audatex and Mitchell have sought to "gather as much competitive information [about each other] as possible" for a number of years, Sun, Tr. (1/8 p.m.) at 57:17-58:1 (Mitchell), and have largely succeeded in their efforts.

These competitive markets are stable in part because they are very mature and have little room for growth. PX 543-005 (Mitchell); *see also* PX 1970-033 (CCC-Mitchell). [41] Estimatics is "90%+ saturated," making it a "game [of] market share take-away." PX 630-017. But market shares have also remained **[**109]** stable over the last several years. *See* PX 583-024 (Mitchell); PX 543-020 (Mitchell) ("not a lot of switching going on"). "Taking [m]arket [s]hare is [d]ifficult" in this industry, largely because of the high switching costs and the time associated with switching products. PX 543-016 (Mitchell); *see also* PX 634-002 (Mitchell e-mail) (cost of switching generally is $ [text

[41] [Text redacted.]

redacted] per user); PX 585-029 (Audatex); PX 574-003, 016 (Mitchell). Because of the difficulty of gaining market share, CCC, Audatex and Mitchell have all shifted their focus toward selling more products to their existing customers rather than engaging in price wars over each other's customers. *See* PX 543-019, 020; PX 550-024-025, 030; *see also* [text redacted]; PX 632-034. This can lead to even greater stabilization of market share and greater segmentation of the market, thus increasing the incentives and lowering the impediments to tacit coordination. *See* Merger Guidelines § 2.11 ("Firms coordinating their interactions need not reach complex terms concerning the allocation of the market output across firms or the level of the market prices but may, instead, follow simple terms such as . . . stable market shares, **[**110]** or customer or territorial restrictions.").

Nor are high switching costs the only characteristics that make these markets conducive to tacit coordination in the form of market stabilization or customer allocation. Product heterogeneity, which in some ways can reduce the likelihood of coordination, can also lead to greater segmentation of the market and more entrenched market shares. [42] Decreasing the **[*66]** number of firms who can service the larger contracts from three to two is likely to accelerate the trend of market stability, as gaining market share will be marginalized, and increased customization and integration of products will become the primary goal.

Finally, the argument that high fixed costs relative to variable costs creates an incentive to seek volume, while broadly appealing, is not as applicable to the Estimatics and TLV markets as it might be to other software markets. When fixed costs are high relative to variable costs, there is a "strong economic incentive[] to produce at close to full capacity" that "works against the likelihood of any collusive price raising scheme which would require output restrictions." *Archer-Daniels, 781 F. Supp. at 1423*. As Dr. Ordover noted, industries with high fixed costs relative to variable costs are likely to have no barriers to expansion, and no capacity constraints on production. Ordover, Tr. (1/23 a.m.) at 91:16-92:1. Here, while the Big Three firms have no capacity constraints, the Estimatics and TLV markets are already "very mature" and offer little room for growth. PX 543-005 (Mitchell). Capacity is limited by customer demand, not vendor cost, and the volume of claims has been growing at a slow rate over the last several years. *See id*. Moreover, because of the time and high costs associated with switching products, it is very difficult **[**112]** to gain market share. Accordingly, Dr. Hayes calculated that "it's not in [the merged firm's] interests to reduce prices; in fact, it's in their interest to raise prices." *See* Hayes, Tr. (1/21 a.m.) at 69:11-72:1.

The Defendants point to a Solera financial document to support their contention that Audatex sees the merger as a potential opportunity to increase its competition for CCC's and Mitchell's existing customers. In that document, Solera stated:

> We view potential industry consolidation as a positive for Solera [because]: [1] It provides an opportunity for Solera to gain share in North America as its two competitors will be distracted; [and] [2] it likely creates a *more rational North American market*, as the newly combined competitors would be highly levered and capital constrained.

DX 41-AUD0000229 (Audatex) (emphasis added). As indicated by an internal company e-mail from [text redacted], which the FTC championed as a "smoking gun" of sorts, to a profit maximizing business operating under these market conditions, "rational" means avoiding price wars with competitors. PX 552. [43]

In a highly concentrated market, with stable market shares, low growth rates and significant **[**113]** barriers to entry, there are few incentives to engage in healthy competition. Although the FTC has exaggerated the legal significance of the "merger-to-duopoly" inquiry, it is clear that CCC/Mitchell and Audatex will likely be the only major players in these markets for the foreseeable future. "[I]t is easier for two firms to collude without being detected than for three to do so," *Am. Hosp. Supply Corp. v. Hosp. Prods. Ltd., 780 F.2d 589, 602 (7th Cir. 1985)*, but price fixing

---

[42] "Although homogeneity of products may make the creation and enforcement of a traditional cartel easier, tacit collusion may be easier when products are differentiated. When products are highly differentiated, direct competition between them is limited, in effect creating a smaller number of critical points for tacit interaction. . . . The result may be that highly segmented markets . . . can sustain high profits more effectively than homogeneous markets." Lawrence A. Sullivan & Warren S. Grimes, *The Law of Antitrust:* ***[**111]*** *An Integrated Handbook* § 11.2e1, at 635 (2d ed. 2006).

[43] [Text redacted.]

is only one concern of the antitrust **[*67]** laws. A more common concern is "the creation or reinforcement by merger of . . . oligopolistic market structures in which tacit coordination can occur." *Heinz, 246 F.3d at 725*. With only two dominant firms left in the market, the incentives to preserve market shares would be even greater, and the costs of price cutting riskier, as an attempt by either firm to undercut the other may result in a debilitating race to the bottom.

Nevertheless, Defendants have made a strong argument that despite these characteristics, the market dynamics create a number of incentives to compete, and indeed, have maintained a competitive marketplace to this day. *See* Mitchell, Tr. (2/17 p.m.) at 43:14-44:15 **[**114]** ("Concentrated though they are everybody agrees that [these markets] are competitive. . . . We know that this market does not operate the way the presumption indicates. Why? Because it's highly concentrated, [yet] it's [still] competitive, that's the first clue."). Although Defendants present several arguments why coordination is not likely to occur despite their merger, the FTC has responded with substantial evidence of significant barriers to entry as well as credible evidence that coordination is possible, and even likely, in these markets. Whether the Defendants' argument that the unique combination of factors in these markets negates the probability that the merger may tend to lessen competition substantially, or whether the FTC is correct that the market dynamics confirm the presumptions that follow its *prima facie* case, is ultimately not for this Court to decide. As Judge Tatel confirmed in *Whole Foods*, "[c]ritically, the district court's task is not 'to determine whether the antitrust laws have been or are about to be violated. That adjudicatory function is vested in the FTC in the first instance.'" *548 F.3d at 1042* (Tatel, J., concurring) (quoting *Heinz, 246 F.3d at 714-15*). **[**115]** The Defendants' arguments may ultimately win the day when a more robust collection of economic data is lain before the FTC. On this preliminary record, however, the Court must conclude that the FTC has raised questions that are so "serious, substantial, difficult and doubtful" that they are "fair ground for thorough investigation, study, deliberation and determination by the FTC." *Heinz, 246 F.3d at 714-15*.

c. *Unilateral Effects*

The FTC's sufficient response to the Defendants' rebuttal arguments on coordinated effects alone could suffice, but because the parties focused on unilateral effects throughout the evidentiary hearing, a brief analysis on this issue is in order. There are two basic analytical frameworks for analyzing the competitive effects of a merger: coordinated and unilateral effects. Though the distinction between these two frameworks has more significance in law than it does in economics, *see* Hayes, Tr. (1/12 p.m.) at 138:5-8, 10-11 (describing the distinction between coordinated and unilateral effects as "artificial"), the basic premise underlying the distinction is that the unilateral effects theory surmises that firms do not recognize their shared interest in elevating **[**116]** price, whereas the coordinated effects theory assumes that they do. *Id*. at 138:15-19. Thus, under unilateral effects theory, economists assume that firms behave independently. *Id*. at 138:18-19.

There are two main theories that predict unilateral effects: (1) the "dominant firm" theory and (2) the differentiated products theory. Both experts agreed that the "dominant firm" theory, also known as the "network effects" or "tipping point" theory, does not apply here, so the Court turns to the differentiated products theory. *See* Hayes, Tr. (1/21 p.m.) at 209:18-210:7 ("I **[*68]** do not credit the strength of the network effects being sufficient to undermine Audatex. I [do not give] that argument a lot of weight."); Ordover, Tr. (1/23 p.m.) at 148:5-18.

The differentiated products theory applies to markets where the products sold by different suppliers are not perfect substitutes for one another. Unilateral effects in a differentiated product market are likely to be profitable under the following conditions: (1) the products must be differentiated; (2) the products controlled by the *merging* firms must be close substitutes, *i.e*., "a substantial number of the customers of one firm would turn to the other **[**117]** in response to a price increase"; (3) other products must be sufficiently different from the products offered by the merging firms that a merger would make a small but significant and nontransitory price increase profitable for the merging firm; and (4) repositioning must be unlikely. *Oracle, 331 F. Supp. 2d at 1118*. As Dr. Ordover observed, the Estimatics and TLV products sold by CCC, Mitchell and Audatex are significantly heterogeneous. *See* Ordover, Tr. (1/23 a.m.) at 85:2-11. As to the second, third and fourth conditions, the Merger Guidelines advise that:

> [s]ubstantial unilateral price elevation in a market for differentiated products requires that there be a significant share of sales in the market accounted for by consumers who regard the products of the merging firms as their

> first and second choices, and that repositioning of the non-parties' product lines to replace the localized competition lost through the merger be unlikely.

Merger Guidelines § 2.21. Thus, the key point in contention is whether a significant percentage of consumers view CCC and Mitchell as their first and second choice, and Audatex as a "more distant third." *See* PX 1020 P 79 (Hayes Prelim. Report).

Economists **[**118]** employ a separate category of models to predict unilateral behavior, that is, to predict whether a hypothetical profit maximizing firm would find it profitable to raise prices on its own. Hayes, Tr. (1/12 p.m.) at 138:11-15. Dr. Hayes prepared three different models to predict the likelihood of unilateral effects in these markets: (1) a Bertrand simulation of price effects for repair facilities, (2) a bidding model for the sale of Estimatics to insurance companies and (3) a separate bidding model for the sale of TLV to insurance companies.

Dr. Hayes's Bertrand model, which incorporates data on market shares, diversion ratios, and production costs, predicts a post-merger average price increase of about 30% for Estimatics for repair facilities. Hayes, Tr. (1/12 p.m.) at 153:17-55:15; *see also* PX 1059 PP 6-10, 17, Ex. S-2 (Hayes Suppl. Report). Accounting for the cost savings and cross-selling opportunities that would be facilitated by the merger, the model still predicts an average price increase of approximately 19%. PX 1059, Ex. S-2. [44] Dr. Ordover challenges the accuracy of the diversion ratios that **[*69]** Dr. Hayes employs in his model, but even using Dr. Ordover's suggested diversion ratios, **[**119]** the model still predicts substantial price increases for repair facilities. Hayes, Tr. (1/21 p.m.) at 213:24-214:14.

Because CCC, Mitchell and Audatex bid on Estimatics contracts with insurance companies, Dr. Hayes employed a derivation of an auction model to predict the merger's effect on prices for the insurance segment of **[**120]** the Estimatics market. PX 1020 P 78 (Hayes Prelim. Report). [45] This model assumes that in a procurement auction, which these bids resemble, though the winner is the supplier that is able to make the most attractive offer to the customer, the winning price is actually determined by the supplier with the second-most attractive offer. *Id*. Thus, the most attractive offer determines the winner and the second-most attractive offer determines the price. *Id*. Critically, the model predicts that the merger will cause prices to increase "*if* the merging suppliers would have been the most attractive and second-most attractive suppliers had they remained separate, and the third-most attractive supplier is viewed as a more distant choice." *Id*. P 79 (emphasis added). [46] Therefore, the model attempts to mirror the economic theory. Through a series of calculations, which include data on market shares, profit margin earned on incremental sales, and incumbent winning percentage, *see* PX 1059 PP 24, 26, 27 (Hayes Suppl. Report), Dr.

---

[44] Defendants argue that Dr. Hayes's opinions are not based in reality because the combined CCC/Mitchell could not "conceivably get away with the sort of price increase that" his Bertrand model predicts. CCC, Tr. (1/21 p.m.) at 179:22-25. But Dr. Hayes admits that he puts "less weight on the precise numbers than the general directional indications that come out of the analyses. . . . [W]hether it's going to be 40 percent or 20 percent at each particular supplier, I wouldn't stake my reputation on that." Hayes, Tr. (1/21 p.m.) at 161:24, 177:10-12; *see also* Hayes, Tr. (1/21 p.m.) at 164:11-12 ("The world is complex[;] we can't capture everything in a model that we might like to."). Thus, it is not particularly troublesome that the extraordinary price increases predicted in the model may not accord with "economic realities." *See* Ordover, Tr. (1/23 p.m.) at 151:20-25.

[45] Specifically, Dr. Hayes analyzed the price effects on sales of Estimatics to insurers using "an independent private values English auction with no reserve price. The key role of the 'independent private values' assumption is to acknowledge that while bidders may know something about their rivals' costs, they do not know more about those costs than their rivals know. The absence of a reserve price (i.e., a maximum acceptable bid set by the insurer) is justified by the fact that there are no good substitutes for estimatics software . . . ." PX 1020 P 78 n. 123 (Hayes Prelim. Report).

[46] In addition to inferring from the price increase that the non-merging firm is a more distant third choice, the model also assumes a more distant third. This is because the auction model always predicts some unilateral price increase, which, under economic theory, can occur only where **[**122]** the non-merging firm is a more distant third choice; and because the model was calibrated to generate the 80% price-cost margin exhibited in these markets, which, in combination with the high incumbent winning percentage and market share data, produces a significant price increase. *See* DX 644 P 24 (Ordover Report) (lowering the economic margin in the model makes "the gap between the challeng[ing bidders] . . . small[er]," which, in Dr. Ordover's view, is an "assumption [that] more accurately reflects the business realities").

Hayes's model predicts that insurance companies are likely to receive a price increase of approximately 7% for Estimatics products. *Id*., Ex. S-7. [47] Thus, "[w]hat the model **[**121]** is telling us is that there [is a] reasonably large fraction of customers that think that . . . Audatex is a more distant third." Hayes, Tr. (1/21 a.m.) at 42:16-18. If the Defendants' asserted cost-savings are included in the calculations, the average price increase is a more modest 1%. PX 1059, Ex. S-7 (Hayes Suppl. Report).

Finally, Dr. Hayes prepared a similar auction simulation to determine whether there would be price effects **[**123]** for the TLV market. Using similar inputs as the auction **[*70]** model for Estimatics, the TLV simulation predicted, without accounting for cost savings, an increase in price to insurance companies of 15.8%. *Id*., S-12; *see also* Hayes, Tr. (1/12 p.m.) at 166:15-167:17. With cost savings, the model still finds an average price increase of 6% in TLV. PX 1059, S-12 (Hayes Suppl. Report); *see also* Hayes, Tr. (1/12 p.m.) at 167:18-168:9.

The main problem with Dr. Hayes's models is that the data and predictions cannot reasonably be confirmed by the evidence on this record. The FTC argues that there is a presumption that a "significant share" of customers prefer the merging parties' products as their first and second choices if the merged firm has a market share of at least 35%. FTC's Post-Trial Brief at 47 (citing Merger Guidelines § 2.211). However, this presumption is warranted only if: "each product's market share is reflective of not only its relative appeal as a first choice to consumers of the merging firms['] products but also its relative appeal as a second choice, and hence as a competitive constraint to the first choice." Merger Guidelines § 2.211.

As part of his investigation, Dr. Hayes reviewed **[**124]** a sample of eighteen bidding contests for Estimatics between 2003 and 2007. PX 1020 P 80 (Hayes Prelim. Report). In seventeen of those contests, CCC was the victor, while Mitchell was one of the finalists in nine and Audatex was the runner-up in eight. *Id*. Mitchell and Audatex were the finalists in the one remaining instance. *Id*. P 80 n. 126. But, approximately one hundred insurance contracts are up for renewal each year, Brungger IH Tr. at 186:1-22 (Mitchell), meaning that Dr. Hayes reviewed a total of eighteen bidding contests out of approximately 400 that occurred during that time span. This fraction of auctions is not large enough to rely on as a representative sample of the entire insurance market. *See Oracle, 331 F. Supp. 2d at 1167* ("Drawing generalized conclusions about an extremely heterogeneous customer market based upon testimony from a small sample is not only unreliable, it is nearly impossible."); *see also SunGard, 172 F. Supp. 2d at 182-83*. On the TLV side, Dr. Hayes reviewed data from a larger set of recent bid events, but only four of them identified who the two finalists were. *See* PX 1020 P 88 (Hayes Prelim. Report). CCC and Mitchell were one of the finalists in all **[**125]** of these instances; CCC and Audatex were the two finalists in no instances. *Id*. Again, this sample is too small to rely on to make broad conclusions about a highly fragmented market.

With respect to repair facilities, the diversion ratios are the best indicators of whether a significant share of the market views CCC and Mitchell as their first and second choices, and Audatex a more distant third. Dr. Hayes's diversion ratios are derived from a two-year old survey of thirty-one former CCC customers which notes that the results "cannot be projected to the population as a whole due to the limited number of completes." PX 1423-005 (CCC); Hayes, Tr. (1/21 p.m.) at 175:6-13. The warning that the diversion ratios cannot be projected to CCC's entire customer portfolio is evidence of its unreliability. Moreover, the twenty-nine responses that Dr. Hayes used to calculate his diversion ratios account for less than 0.2% of all of CCC's repair facility customers. Ramamurthy, Tr. (1/22 a.m.) at 62:7-8 (CCC has approximately 22,000 repair facility customers). This data is even more unreliable than the data relating to insurance company choices, especially considering that Bertrand models typically **[**126]** rely on large volumes of data to estimate diversion ratios. Ordover, Tr. (1/23 p.m.) at 153:20-154:5; *see also id*. at 154:12-155:7 (the **[*71]** Bertrand model is most reliable in markets where there are tens of thousands of data points, such as a consumer products market); *see also* Hayes, Tr. (1/21 p.m.) at 176:6-8 ("Certainly 31 customers is not a terribly large number. More customer information would be useful."). Moreover, Dr. Hayes had

---

[47] Notably, Dr. Hayes's auction model predicts that Audatex will have to reduce prices for Estimatics by approximately 15% when it is the incumbent bidder, *i.e.*, when it has a nearly 90% chance of winning, even though the combined CCC/Mitchell will be able to raise prices. PX 1059, Ex. S-7 (Hayes Suppl. Report). Defendants make much of the fact that Audatex has aggressively attempted to impede this merger, arguing that Audatex's opposition to the merger is evidence in itself of the merger's likely competitive effects. *See, e.g.*, Defs.' Post-Trial Brief at 1.

no data from Mitchell or Audatex regarding their diversion ratios. Instead, he used CCC's diversion ratios to predict Mitchell and Audatex's diversion ratios based on their respective market shares. [48]

Alternatively, the Merger Guidelines state that a combined market share of at least 35% may be sufficient to presume that the merger will result in unilateral effects if "data on product attributes and relative product appeal show that a significant share of purchasers of one merging firm's product regard the other as their second choice." Merger Guidelines § 2.211. Evidence of this sort is sorely lacking in each segment of these markets. Dr. Hayes could not identify any characteristics of Estimatics or TLV products that might make Audatex a more distant third choice for certain insurers. Nor could he identify any characteristics of a particular class of insurers that might cause them to view Audatex as a more distant third -- with the possible exception of lack of familiarity. Furthermore, Dr. Hayes relied on statements of only six out of approximately 300 insurance companies for his conclusion that Audatex's Estimatics product is a "more distant third" choice for a significant share of insurance companies. Of those six insurance companies, none of them actually stated that they viewed Audatex as a more distant third choice, nor could they identify any characteristics **[**128]** of Audatex's product that would make it a more distant third choice for them. *See* Hall, Tr. (1/8 a.m.) at 89:8-21 (GMAC did not "know anything about Audatex"); Brandt, Tr. (1/8 a.m.) at 20:3-6, 41:8-18 (The Hartford was "impressed" with all three of the firms' offerings and a director within its auto and liability practice department opined that CCC, Audatex and Mitchell all had a relatively similar look, touch and feel); *id*. at 41:4-5 ("Q. You're not suggesting [Audatex offers] an inferior product are you? A. Oh, no.").

The evidence is similarly lacking for TLV. Dr. Hayes could not identify any insurers -- let alone any group or class of insurers -- that view Audatex's TLV product as a "more distant third" choice. The only evidence that Dr. Hayes found that might suggest that Audatex's product is less desirable in some respect was one reference about higher valuations. Hayes, Tr. (1/21 a.m.) at 98:15-21. All the same, he continued the faulty assumption that some insurers view Audatex as a more distant third for Estimatics to assume that those same insurers view it as a more distant third in TLV. *See* Hayes, Tr. (1/21) at 96:12-23.

Evidence relating to repair facilities is also notably **[**129]** absent. The vast majority of repair facilities who testified or were contacted by the parties ranked Audatex as first or second in Estimatics. *See, e.g*., Kostakis Dep. at 40 (Angelo's Auto Body Shop); DX 25 P 8 (Benjamin Decl., ABRA Auto Body & Glass). In fact, a 2006 *Collision Week* survey ranked Audatex as the **[*72]** "Best Overall Estimating System Provider in 2006," finding Audatex superior to CCC and Mitchell in 8 of 8 categories for Estimatics. DX 43; *see also* DX 33 at 00064042, 0064044 (survey showing that shops using two estimating systems most frequently use Audatex and CCC). The evidence showing that Audatex is at least comparable to CCC and Mitchell does not necessarily mean that Audatex is not viewed as a more distant third choice by some share of the market. Even so, the absence of any evidence of identifiable characteristics of these firms' products or their customers that might make Audatex a more distant third option makes it impossible to reach the conclusion that Audatex is a more distant third choice. [49]

Without credible evidence that Audatex is a more distant third choice for a significant share of the market to support the predictions of Dr. Hayes's models, the Court cannot conclude that the merger is likely to result in unilateral price elevations.

---

[48] The Court does not conclude that the predictions of Dr. Hayes's Bertrand model are necessarily wrong or that the diversion ratios he used are necessarily incorrect. The Court merely concludes that it cannot rely upon such a limited amount of data. Dr. Ordover concluded that "the diversion ratios that [Dr. Hayes] is putting into his model are not robust, I don't think they're sound, I don't understand them, and I don't believe that they *necessarily* match up with the economic realities of the repair facilities in the marketplace." Ordover, Tr. (1/23) at 151:20-25 **[**127]** (emphasis added).

[49] Even if Audatex were a distant third for some percentage of the market, a unilateral price increase would be profitable for the merged firm only if it were unlikely that **[**130]** Audatex could reposition itself to replace CCC or Mitchell should they raise prices to supracompetitive levels. *See* Merger Guidelines § 2.21. Because the only evidence in the record regarding customer preference is that a few insurance companies lack familiarity with Audatex's products, there is no reason to believe that Audatex would not be a suitable replacement for CCC or Mitchell. *See* Hall, Tr. (1/8 a.m.) at 89:11-21 (GMAC does not "know anything about Audatex," but it "plan[s] to learn something about [it]" if the merger is consummated).

d. *Efficiencies*

Finally, Defendants argue that the efficiencies that will result from the merger will offset any potential anticompetitive effects of the merger. The Merger Guidelines recognize that "mergers have the potential to generate significant efficiencies by permitting a better utilization of existing assets, enabling the combined firm to achieve lower costs in producing a given quantity and **[**131]** quality than either firm could have achieved without the proposed transaction." Merger Guidelines § 4. Although the Supreme Court has not sanctioned the efficiencies defense in Section 7 cases, "the trend among lower courts is to recognize the defense." *Heinz, 246 F.3d at 720*. "The courts have recognized that 'in certain circumstances, a defendant may rebut the government's *prima facie* case with evidence showing that the intended merger would create significant efficiencies in the relevant market.'" *United States v. Long Island Jewish Med. Ctr., 983 F. Supp. 121, 146-47 (E.D.N.Y. 1997)* (quoting *Univ. Health, 938 F.2d at 1222*); *see also* *Arch Coal, Inc., 329 F. Supp. 2d at 150*. However, courts have rarely, if ever, denied a preliminary injunction solely based on the likely efficiencies. *See* *Heinz, 246 F.3d at 720*; *FTC v. Swedish Match N. Am., 131 F. Supp. 2d 151, 171-72 (D.D.C. 2000)*; *Tote, 768 F. Supp. at 1084-85*. And in a highly concentrated market characterized by high barriers to entry, the parties opposing a preliminary injunction must provide "proof of extraordinary efficiencies" in order to rebut the presumption of anticompetitive effects. *Heinz, 246 F.3d at 720*; *see also* Phillip **[**132]** E. Areeda, *et al*., IVA ***Antitrust Law*** P 971f, at 47 (2d ed. 2006) (requiring "a showing of 'extraordinary'" efficiencies where the "post-merger market's HHI is well above 1800 and the HHI increase is well above 100"). Moreover, in such circumstances, "the court must undertake a rigorous analysis of the kinds of efficiencies being urged by the parties in order to ensure that those 'efficiencies' represent more than mere speculation and promises about post-merger behavior." **[*73]** *Heinz, 246 F.3d at 721*. The Defendants have not demonstrated here that their efficiencies are verifiable, *see* *Staples, 970 F. Supp. at 1089*, or that the cost savings achieved through efficiencies are likely to be greater than the transaction's likely anticompetitive effects, *see* *Cardinal Health, 12 F. Supp. 2d at 62-63*.

1. *Cost Savings*

Efficiencies enabled by a merger "can create incentives to reduce prices, and if these efficiencies are sufficiently large, they may fully offset any price elevation that might otherwise flow from the merger." PX 1020 P 75 (Hayes Prelim. Report). Defendants assert that the efficiencies achieved through the merger will produce cost savings of at least $ 48 to $ 55 million per year resulting **[**133]** from the elimination of redundant or overlapping functions and the consolidation of product lines. DX 27 at 6-21 (PriceWaterhouseCoopers ("PWC") Synergy Analysis); DX 28 at 4-13 (CCC/Mitchell Confidential Synergy Review); Balbirer IH Tr. at 26-27, 50-51 (CCC); PX 746-006, 007 (Mitchell). These projected potential cost savings exceed 20% of the companies' combined cost base. DX 28 at 6 (CCC/Mitchell Confidential Synergy Review).

The projected cost savings would indeed be substantial and such cost savings were fundamental to the parties' decision to merge. *See, e.g*., Sun, Tr. (1/9) at 9:8-15 (Mitchell). However, the vast majority of these cost savings will be realized only if, and when, Defendants consolidate to a single software platform. DX 27 at 6-21 (PWC Synergy Analysis); Sun, Tr. (1/9) at 19:20-22:1 (Mitchell); Balbirer IH Tr. at 68 (CCC); DX 28 at 4-13 (CCC/Mitchell Confidential Synergy Review). CCC and Mitchell estimate that it will take two to three years to combine their operations and eliminate redundant software systems, DX 115-48 (CCC/Mitchell Confidential Offering Mem.), but they acknowledge that it might take as long as ten years to complete the integration, and the nature **[**134]** of the ultimate software product is uncertain, *see* PX 755 ([text redacted]); *see also* Sun, Tr. (1/8 p.m.) at 77:9-12 (Mitchell); PX 756 (Mitchell [text redacted]).

The Merger Guidelines advise that "[d]elayed benefits from efficiencies (due to delay in the achievement of, or the realization of customer benefits from, the efficiencies) will be given less weight because they are less proximate and more difficult to predict." Merger Guidelines § 4 n. 37. Thus, while the Court does not doubt that Defendants intend to consolidate the two firms' software into one platform, it cannot place great weight on the predicted cost savings resulting from that consolidation because there is no telling when those savings might begin to accrue or whether they will actually materialize and not be absorbed in the consolidation effort.

Defendants admit that the merger will result in one-time costs of approximately $ 27.5 million over the first three years, thus lessening their projected cost savings to approximately $ 20-27 million per year during that time period. DX 27 at 2, 7 (PWC Synergy Analysis). Even these numbers are speculative and are supported by little more than lawyer argument. Mitchell hired **[**135]** two financial consultants to analyze and confirm that the merger makes financial sense. *See* Sun, Tr. (1/9) at 18:14-18 (Mitchell). In their final estimates, both Bain & Co. ("Bain") and PWC predicted that the merger would result in a net loss (in terms of costs versus synergies) at the end of three years. PX 1823 (Bain); *see also* Sun, Tr. (1/9) at 37:9-19 (Mitchell). *But see* DX 115-48 (CCC/Mitchell Confidential Offering Memorandum predicting net synergies of $ 11.2 million in year one); DX 27 at 7 (PWC **[*74]** Synergy Analysis). Defendants argue, however, that Bain's final projections do not accurately portray the likely synergies because its analysis (a) treats as "costs" certain expenditures, such as investment in research and development, without allowing such expenditures to show efficiency gains, Sun, Tr. (1/9) at 24:22-25:4 (Mitchell), and (b) lists integration expenses without attempting to quantify the benefits that will arise from non-overlapping business units, *id*. at 25:10-26:2 (Mitchell). But Bain and PWC are Defendants' financial consultants, not the FTC's, and Mr. Sun admitted that he did not "have any reason to believe that these guys . . . did a bad job." *Id*. at 37:17-20. Thus, **[**136]** without overanalyzing the accuracy of their predictions based on incomplete information, it is enough to conclude that the record is far from clear what the net savings would be; hence, Defendants have not demonstrated that the cost savings are likely to counteract the potential anticompetitive effects.

Even assuming *arguendo* that the Defendants will achieve significant cost savings in a timely manner, there is no evidence to suggest that a sufficient percentage of those savings will accrue to the benefit of the consumers to offset the potential for increased prices. *See* *Univ. Health, 938 F.2d at 1223* (defendant asserting efficiency defense "must demonstrate that the intended acquisition would result in significant economies and that these economies ultimately would benefit competition and, hence, consumers"). First, platform consolidation would create significant one-time switching costs for a large number of repair facilities. At least a quarter of all repair facilities -- 11,000 or more -- use only one software platform. PX 635-018 (Mitchell). Those repair facilities currently using the platform that ultimately is not chosen for consolidation will incur one-time costs related to **[**137]** switching to the surviving platform. Rollins Dep. at 84 (Safeco); *see also* PX 1020 P 11 (Hayes Prelim. Report). Meanwhile, as of the end of 2007, only 1,500 use both CCC and Mitchell. *See* Ramamurthy Dep. at 72-73 (CCC); Balbirer IH Tr. at 189-190 (CCC); PX 632-033 (Mitchell); PX 516-006 (Mitchell). Thus, fewer than one in thirty repair facilities -- those that currently use both CCC and Mitchell -- will realize any costs savings by licensing one fewer product. *See* PX 516-006 (Mitchell). Furthermore, a substantial number of insurance companies would likewise incur switching costs.

Second, while reducing the costs of doing business provides several advantages for the merged firm, these advantages could show up in higher profits instead of benefitting customers or competition. *See* Hayes, Tr. (1/21 a.m.) at 87:7-88:14. Mr. Ramamurthy admits that CCC will give its shareholders much of any savings. Ramamurthy IH Tr. at 74-75 (CCC). CCC's CFO, Andrew Balbirer, similarly stated that the synergies from the deal would either be invested in new products or go to company profits. Balbirer IH Tr. at 50-51 (CCC). Likewise, Mr. Sun of Mitchell stated that the cost savings are likely to go to "building **[**138]** value added products" rather than lowering consumer costs. Sun IH Tr. at 49-50 (Mitchell).

2. *Innovations*

Defendants also assert that the merger will lead to innovations. Innovation claims are "often a speculative proposition," *see* *Heinz, 246 F.3d at 722*, and such claims are often looked upon with skepticism for good reason:

> [W]hen the two firms are already among the largest in the market, there is no empirical basis for thinking that even larger firms would produce more R&D. We would therefore limit the defense to **[*75]** instances in which the two merging firms can show that their size forces them to accept higher per-unit costs for research and development than larger firms in their market must pay, and that the merger will enable them to achieve some figure closer to parity.

IVA Areeda, *et al., supra*, P 975g, at 94. Defendants assert that as a result of the cost savings generated by the merger, the merged entity will spend considerably more on new product research and development than the two companies spend individually. *See* DX 28 at 2-3 (CCC/Mitchell Confidential Synergy Review); Ramamurthy IH Tr.

at 50-51 (CCC), 82-83; *see also* Ramamurthy, Tr. (1/22 a.m.) at 111:16-112:11 (CCC) (stating **[**139]** that the merger would "allow us to throw more resources" at development of [text redacted]). The CEOs for both Mitchell and CCC testified that the merged firm will spend approximately 50% more on new product research and development than the combined amount the two companies currently spend as separate companies. Sun, Tr. (1/9 a.m.) at 39:24-40:23 (Mitchell); Ramamurthy, Tr. (1/22 p.m.) at 148:20-25 (CCC) (stating that the combined firm will deploy $ 10-15 million more towards innovation). But there is no telling whether these aspirations of greatly enhanced investment in R&D will become a reality as the combined firm is saddled with the burden of paying off its combined debt. Furthermore, there is little evidence that these promises of increased R&D spending are merger-specific. Mr. Balbirer testified, for instance, that CCC could already afford to increase R&D funding on its own if its "shareholders were willing to trade off their return." Balbirer IH Tr. at 198 (CCC). This is a standard conflict between investors and management. There is no reason to believe that the merger will eliminate this pervasive problem.

In sum, although the merger may produce substantial efficiencies in **[**140]** the future, such efficiencies are too far afield and too speculative to overcome the strong presumption of anticompetitive effects created by the large HHIs and the high barriers to entry in the Estimatics and TLV markets.

B. Equities

When the FTC shows a likelihood of success on the merits, it will usually be able to obtain a preliminary injunction because the public equities often converge with the "success on the merits" analysis because "'the public interest in effective enforcement of the antitrust laws' was Congress's specific 'public equity consideration' in enacting" *Section 13(b)*. *Whole Foods, 548 F.3d at 1035 (Brown, J.)* (quoting *Heinz, 246 F.3d at 726*). However, the "likelihood of success" analysis and the "public equities" analysis are legally different points and the latter should be analyzed separately, no matter how strong the agency's case on the former. [50] But since, as discussed above, the FTC has demonstrated a likelihood of success on the merits as a preliminary matter, the Defendants must now show that, despite the likely anticompetitive effects of their proposed merger, the merger would nonetheless benefit their customers. Only "public **[*76]** equities" that benefit consumers **[**141]** can override the FTC's showing of serious questions on the merits. *Whole Foods, 548 F.3d at 1041 (Brown, J.)*. For instance, if potential merger partners can present credible evidence that the merged company will lower consumer prices because of extraordinary efficiencies (even when the same efficiencies might not suffice to overcome the presumption in favor of the FTC's *prima facie* case on the merits), and those efficiencies and lowered prices will be lost forever if the merger is preliminarily enjoined, the public equities in favor of the merger might outweigh the FTC's likelihood of success on the merits. However, it is clear that a "'risk that the transaction will not occur at all,' by itself, is a private consideration that cannot alone defeat the preliminary injunction." *Id*. (citing *Heinz, 246 F.3d at 726*; *Weyerhaeuser, 665 F.2d at 1082-83*).

The Defendants predict that the merger will produce cost savings of 20%. This would be an extraordinary degree of efficiencies. However, the evidence fails to induce confidence that such cost savings will in fact occur, much less when they might be realized. In addition, the evidence leaves uncertainty as to whether cost savings will be enjoyed by customers or by shareholders.

Contrary to this conclusion, Defendants urge the Court to recognize that "[t]he combined company will be able to offer an integrated product that incorporates the best features of each company's stand-alone product portfolio." DFF P 374. The Court accepts and agrees that the evidence supports this statement. "The merging parties envision using the combined resources of the two companies and spending more on new product research and development than they spend individually to improve existing and create new products and reduce costs" **[**143]** for customers.

---

[50] If the two factors always merged, then there would be 50 no need for a public equities analysis when the FTC shows a likelihood of success on the merits. The D.C. Circuit's plurality decision in *Whole Foods* indicated that a separate equities analysis is necessary. ***Whole Foods, 548 F.3d at 1035*** (Brown, J.) ("The district court did not apply **[**142]** the sliding scale, instead declining to consider the equities. . . . If, and only if, the district court's certainty [that the FTC would not succeed on the merits] was justified, it was appropriate for the court not to balance the likelihood of the FTC's success against the equities.").

Id. P 375. The Court accepts and agrees that the Defendants envision such a future. "[C]ustomers and consumers [will] benefit from more innovative products." *Id*. P 380. The Court agrees and accepts this statement as well.

Both timing and free choice undercut Defendants' predictions of the public value of the potential merger. That is, the parties predict that it will be at least three to five years before their separate software platforms might be merged, and perhaps as much as ten years before it makes sense to do that. During that lengthy waiting period, the serious questions raised by the FTC might ripen into fact and produce a coordinated marketplace through regional or customer allocation or other coordinated terms. During that lengthy waiting period, the evidentiary base for Dr. Hayes's predictions of unilateral effects might mature.

While the merging parties "envision" using their combined resources to increase research and development of new products, once a merger is effected, their choices would be wide open and they might reasonably decide to use profits to reduce debt instead of increase research, given the debt structure of the newly-merged company and its **[**144]** share of the markets for Estimatics and TLV. The Court does not doubt their intentions, but cannot bank on them for purposes of this preliminary analysis of the equities here.

The only "hard" equity point made by Defendants is that their customers will benefit from more innovative products. Even though such a result is uncertain, this benefit must be weighed against the public benefit. In that weighing, the Court uses a sliding scale. The uncertainty of the public benefit of innovative products is too long in coming and too uncertain in result to hold much weight against the FTC's interest in enforcing the antitrust **[*77]** laws. The equities favor granting a preliminary injunction.

V. CONCLUSION

For the foregoing reasons, the FTC's Motion for Preliminary Injunction [Dkt. # 4] will be granted. A memorializing order accompanies this Memorandum Opinion.

Opinion

OPINION & ORDER

KIMBA M. WOOD, U.S.D.J.:

Defendants Shell Petroleum, N.V. and Shell Transport and Trading Co., Ltd. ("Defendants") in *Wiwa v. Royal Dutch Petroleum Co*., 96 Civ. 8386 ("*Wiwa*"), move, pursuant to *Federal Rule of Civil Procedure 12(b)(1)*, to dismiss the Racketeer Influenced and Corrupt Organizations Act ("RICO") claims brought by *Wiwa* plaintiffs Owens Wiwa and Karololo Kogbara ("Plaintiffs") for lack of subject matter jurisdiction. (96 Civ. 8386 D.E. ("96-D.E.") 308.)

Among the ways that plaintiffs can establish that a court has subject matter jurisdiction over a RICO claim **[*3]** that involves foreign parties and racketeering activity that occurred outside the United States (an "extraterritorial" RICO claim), is to establish that the alleged racketeering activity had sufficient effects in the United States. They may also have to establish that these effects were intentional.

Here, Plaintiffs argue that Defendants' alleged racketeering activity, which occurred primarily in Nigeria, was intended to and did affect the United States by lowering Defendants' costs for producing Nigerian oil, which, in turn, gave Defendants a competitive advantage and/or increased profits in the United States. (*See generally* Pls.' Mem. L. Opp'n Defs.' Mot. Dismiss RICO Claims ("Pls.' Opp'n"), 96-D.E. 313.)

Defendants contend that Plaintiffs have failed to demonstrate that the racketeering activity Plaintiffs allege had effects in the United States sufficient to give the Court subject matter jurisdiction over Plaintiffs' extraterritorial RICO claims. (*See generally* Defs.' Mem. L. Supp. *Rule 12 (b)(1)* Mot. Dismiss Pls.' RICO Claim for Lack Subj. Matter Jd. ("Defs.' Mem. L."), 96-D.E. 309; Defs.' Reply Mem. L. Supp. *Rule 12(b)(1)* Mot. Dismiss Pls.' RICO Claim for Lack Subj. Matter Jd. **[*4]** ("Defs.' Reply"), 96-D.E. 328.)

As explained in further detail below, the Court GRANTS Defendants' *Rule 12(b)(1)* motion to dismiss Plaintiffs' RICO claims because Plaintiffs have not established that Defendants' alleged racketeering activity had sufficient effects in the United States to give the Court subject matter jurisdiction.

I. BACKGROUND

A. Relevant Procedural History

Previously, Defendants moved, under *Rule 12(b)(1)*, for the Court to dismiss Plaintiffs' extraterritorial RICO claims for lack of subject matter jurisdiction. In this prior 12(b)(1) motion, Defendants made a facial challenge, arguing that Plaintiffs had failed to allege sufficient effects on the United States.

The Court denied Defendants' prior *Rule 12(b)(1)* motion. *Wiwa v. Royal Dutch Petroleum Co., No. 96 Civ. 8386, 2002 U.S. Dist. LEXIS 3293, 2002 WL 319887, at *20-21 (S.D.N.Y. Feb. 28, 2002)*.

Since then, the parties have completed extensive discovery. Now Defendants make a factual challenge to the Court's subject matter jurisdiction over these same claims. [1] Specifically, Defendants argue that Plaintiffs lack

[1] "[T]he truth of jurisdictional allegations [need not] be determined with finality at the threshold of litigation." *Jerome B. Grubart, Inc. v. Great Lakes Dredge & Dock Co., 513 U.S. 527, 537, 115 S. Ct. 1043, 130 L. Ed. 2d 1024 (1995)*. Instead, "'subject-matter jurisdiction can be called into question *either* by challenging the sufficiency of the allegation *or* by challenging the accuracy of the jurisdictional facts alleged.'" *Europe and Overseas Commodity Traders, S.A. v. Banque Paribas London, 147 F.3d 118, 121 n.1*

evidence that the alleged racketeering activity had sufficient intended and actual effects in the United States to fall within the Court's **[*5]** subject matter jurisdiction.

B. Relevant Facts

Plaintiffs' allegations span the period between 1990 and 1998, inclusive. (Pls.' Fourth Am. Compl. PP 38-108.) A general description of their allegations can be found in the Court's previous orders, familiarity with which is assumed. *See, especially, Wiwa, 2002 U.S. Dist. LEXIS 3293, 2002 WL 319887*. Facts established through discovery that are relevant to deciding Defendants' *Rule 12(b)(1)* motion, particularly the intended and actual effects of Defendants' alleged racketeering activity in the United States, are described **[*6]** below. [2]

1. Defendants oil operations in Nigeria

During 1990 to 1993, a company affiliated with Defendants, Shell Petroleum Development Company ("SPDC"), [3] was extracting oil from the Ogoni region of Nigeria ("Ogoni"), located in that country's Niger Delta. During some or all of this period, SPDC operated in Nigeria pursuant to a joint venture agreement with the Nigerian government. (Pls.' Opp'n, Ex. 1-13.) SPDC sold oil that it produced in Nigeria to another Shell Group company for export from Nigeria. (Pls.' Opp'n, Exs. 1-55; 3-21 at 5686.)

In 1993, SPDC ceased extracting oil from Ogoni, but it continued to extract oil in Nigeria, including from other areas of the Niger Delta. (*see, e.g., id*. at Exs. 1-5 at app. 1; 1-9 at 20232-33, 20236-37, 20239; 1-12.) SPDC also continued work on a pipeline running through Ogoni. (*Id*. at Ex. 1-3 at 105-111.) In 1996, SPDC developed a plan for restarting oil production in Ogoni, but by 1998, the **[*8]** plan was still far from complete. (*Id*. at Ex. 1-48 at 1850.)

Between January 1990 and June 1996, SPDC shipped an average of approximately 3.5 million barrels of crude oil per month from Nigeria to the United States. [4] (Pls.' Opp'n, Ex. 3-22.)

(2d Cir. 1998) (quoting *Gwaltney of Smithfield, Ltd. v. Chesapeake Bay Found., Inc., 484 U.S. 49, 68, 108 S. Ct. 376, 98 L. Ed. 2d 306 (1987)* (Scalia, J., concurring in part and concurring in the judgment).

[2] Plaintiffs submit, in opposition to Defendants' motion, certain evidence that is not relevant to the Court's analysis of its subject matter jurisdiction over Plaintiffs' RICO claims. For instance, Plaintiffs' evidence regarding the proportion of Nigeria's foreign revenue that is earned from the oil that Nigeria exports, (*see* Pls.' Opp'n 19), does not help establish the effect Defendants' alleged racketeering activity had *on the United States*. The Court does not consider or discuss here evidence irrelevant to determining the Court's jurisdiction over Plaintiffs' RICO claims.

Unless otherwise noted, facts discussed herein are undisputed.

[3] The exact **[*7]** nature of SPDC's relationship with Defendants is at issue in this case. Plaintiffs contend that Defendants (1) control SPDC, (2) can be held liable for SPDC's actions; and (3) share SPDC's intent. (Pls.' Opp'n 15-19.) Defendants contend that they cannot be held liable for SPDC's actions, and that SPDC's intent cannot be imputed to them. (*See, e.g*., Defs.' Reply 8-9.) For the purposes of this motion, the Court assumes, without deciding, that Defendants control SPDC in the way that Plaintiffs allege.

Documents that Defendants produced to Plaintiffs use the term the "Shell Group" to refer to the international network of Shell-related companies. (*See, e.g*., Pls.' Opp'n, Ex. 1-17 at 289.) For the purposes of this motion, the Court attributes evidence generated by Shell Group companies to Defendants.

[4] In a letter to Plaintiffs, Defendants contend that oil SPDC shipped from Nigeria destined for the United States did not necessarily arrive in the United States because the oil cargo could, and frequently did, change ownership and/or destination en route. (Pls.' Opp'n Ex. 3-22.) However, Defendants do not provide any evidence to support this contention. Accordingly, for the purposes of this Order, the Court will assume that the amount of oil SPDC exported that was destined for the United States equals the amount of SPDC oil the United States imported.

2. Ogoni opposition to Defendants' Nigerian oil operations

In the early 1990s, Ken Saro-Wiwa, the deceased father of Plaintiff Ken Wiwa, and an organization named Movement for the Survival of the Ogoni People ("MOSOP"), made demands on Defendants. Mr. Saro-Wiwa and MOSOP protested various effects of SPDC's oil extraction, including gas flaring. (*See, e.g.*, Pls.' Opp'n Exs. 1-2 at 3116; 1-16 at 955; 1-17 **[*9]** at 290.) In 1992, they sent a list of demands to SPDC, including a demand that the company pay to the people of Ogoni ten billion American dollars in royalties for past oil extraction and to compensate the Ogoni for SPDC's environmental damage to their land. (*See id*. at Ex. 1-15.) MOSOP's list particularly emphasized the detrimental environmental effects of SPDC's gas flares. (*See id*.)

3. Defendants' response to the Ogoni opposition [5]

Beginning in 1992, there was significant international attention paid to Defendants' operations in Nigeria, including to the issue of gas flaring. (*See id*. at Exs. 1-3 at 102-03; 1-5 at 58; 1-14 at 2738; 1-16 at 955; 1-17 at 290.) Even after SPDC ceased extracting oil from Ogoni in 1993, Defendants determined that the Ogoni protests were a threat to their international reputation. (*See id*. at Exs. 1-5; 1-16 at 955; 1-17 at 289; 2-3 at 328:10-24.)

SPDC and Defendants invested resources to counter and mitigate the protests' effect **[*10]** from at least 1992 to 1996. (*See* Pls.' Opp'n Exs. 1-16 at 956; 1-17 at 290-92; 3-8 at 4313.) However, until 1996, although Defendants planned to take some measures to avoid some instances of gas flaring, they found the prevention of gas flaring too costly to implement on a broad scale. (*See* Pls.' Opp'n Exs. 1-5 at 44, 48; 1-6 at 2015; 1-7 at 120; 1-8 at 5414.) In 1996, Defendants determined that gas flaring was no longer an acceptable practice. [6] (*See id*. at Ex. 1-9 at 20238.) They proposed accelerating their "flare reduction projects" so that they could have their "'flares out by 2005.'" (*Id*.)

4. The health of Defendants' Nigerian operations during the period of Ogoni opposition

In 1994, SPDC was expected to achieve its financial targets, despite Defendants' concern about the "political turbulence in Nigeria." (*See* Pls.' Ex. 1-23 at 746, 750.) In 1995, Defendants reported that the country had continued its "steady decline into ungovernability," which created "challenges" for SPDC in its efforts to "sustain[] **[*11]** growth and continuous improvement of performance against a very tough environment." (*See* Pls.' Ex. 1-25 at 667.) In 1996, Defendants estimated that about one-quarter of its equity reserves were based in Nigeria and determined that despite the problems with its operations in Nigeria, the reserves had a "large potential," making Nigeria "a country worth investing in." (*See* Pls.' Ex. 1-1 at 570.)

II. DISCUSSION

A. Legal Standard

1. *Rule 12(b)(1)* Motion to Dismiss

---

[5] For the purposes of this order, the Court does not consider or weigh Plaintiffs' evidence regarding Defendants' alleged racketeering activity as this evidence is not essential to deciding the jurisdictional question before the Court.

[6] Plaintiffs mistakenly state that Defendants made this determination in 1998, (*see* Pls.' Opp'n 2 n.4). The exhibit that they cite as support is actually dated 1996. (*See id*. at Ex. 1-9.)

When a motion to dismiss under Rule 12(b)(1) challenges the factual basis for a court's subject matter jurisdiction, a court may refer to evidence outside the pleadings. [7] *See* Makarova v. U.S., 201 F.3d 110, 113 (2d Cir. 2000) (*citing* Kamen v. American Tel. & Tel. Co., 791 F. 2d 1006, 1011 (2d Cir. 1986)). This may include affidavits or other competent evidence. *See* Kamen, 791 F.2d at 1011.

The burden is on the plaintiff asserting **[*12]** subject matter jurisdiction to prove, by a preponderance of the evidence, that it exists. *See* Makarova 201 F.3d at 113; *see also* Luckett v. Bure, 290 F.3d 493, 497 (2d Cir. 2002); Scelsa v. City Univ. of N.Y., 76 F.3d 37, 40 (2d Cir. 1996).

Where, as here, the jurisdictional facts are sufficiently separable from the merits of a claim, they may be decided by a court. *Compare* Grubart, 513 U.S. at 537 ("any litigation of a contested subject-matter jurisdictional fact issue occurs in comparatively summary procedure before a judge alone"), *with* Alliance for Envtl. Renewal, Inc., v. Pyramid Crossgates Co., 436 F.3d 82, 88 (2d Cir. 2006) (noting that where the overlap between jurisdictional and merits evidence "is such that fact-finding on the jurisdictional issue will adjudicate factual issues required by the Seventh Amendment to be resolved by a jury, then the Court must leave the jurisdictional issue for the trial").

2. Extraterritorial Application of RICO

The RICO statute is silent as to its extraterritorial application. *See* North South Fin. Corp. v. Al-Turki, 100 F.3d 1046, 1051 (2d Cir. 1996). The Second Circuit Court of Appeals ("Second Circuit") has not determined what test district **[*13]** courts should apply in order to determine the statute's extraterritorial reach. *See* id. at 1052. However, the Second Circuit has recognized that, in determining the RICO statute's extraterritorial reach, courts have been guided "by precedents concerning subject matter jurisdiction for international securities transactions and antitrust matters." [8] Id. at 1052.

These precedents establish two kinds of **[*14]** tests, "conduct" and "effects," which assess the extent to which the otherwise extraterritorial racketeering activity involved conduct in, or had sufficient effects in, the United States. The effects test is further subdivided into a test derived from securities law ("securities-based effects test") and a test derived from ***antitrust law*** ("antitrust-based effects test"). *See id*. In either case, however, these tests apply only insofar as they serve the RICO statute's purpose, which is "to protect . . . domestic markets from corrupt foreign influences." Madanes v. Madanes, 981 F. Supp. 241, 250 n.6 (S.D.N.Y. 1997).

Plaintiffs assert, and Defendants do not dispute, that Plaintiffs may establish the Court's subject matter jurisdiction by meeting either the securities or antitrust version of the effects test. [9] (*See* Defs.' Mem. L. 9; Pls.' Opp'n 20.) Accordingly, the Court will apply both variants of the effects test.

---

[7] When the Court denied Defendants' prior facial challenge to the Court's jurisdiction over Plaintiffs' RICO claims, it noted that "plaintiffs' allegations are perhaps less explicit than they could be." Wiwa, 2002 U.S. Dist. LEXIS 3293, 2002 WL 319887, at *22. Plaintiffs' evidence must now provide the specificity lacking in their pleadings.

[8] The Court notes that, in light of the Supreme Court's decision in Arbaugh v. Y & H Corp., 546 U.S. 500, 126 S. Ct. 1235, 163 L. Ed. 2d 1097 (2006) (holding that only those statutory requirements that "the Legislature clearly states [are] . . . a threshold limitation on a statute's scope shall count as jurisdictional"), there is some doubt whether analyzing if a particular claim falls within the RICO statute's extraterritorial reach is, in fact, a *jurisdictional* inquiry. *See* Norex Petroleum Ltd. v. Access Indus. Inc., 540 F. Supp. 2d 438, 440-41 (S.D.N.Y. 2007); Republic of Colom. v. Diageo N. Am. Inc., 531 F. Supp. 2d 365, 381-82 (E.D.N.Y. 2007); Ayyash v. Bank Al Madina, No. 04 Civ. 9201, 2006 U.S. Dist. LEXIS 9677, 2006 WL 587342, at *4 (S.D.N.Y. March 9, 2006). Neither party, however, raises this question. Accordingly, the Court does not address it.

[9] The Second Circuit has suggested that the antitrust-based effects test may be "more appropriate" for RICO claims than the securities-based effects test because of the significant similarities between the RICO statute and the antitrust laws. Specifically, "the civil action provision **[*15]** of RICO was patterned after the Clayton Act" and both the RICO and antitrust statutes provide for treble damages. North South Fin., 100 F.3d at 1052 (internal quotations omitted).

The securities- and antitrust-based effects tests differ: Plaintiffs must show *substantial, direct* effects on the United States to meet the securities-based effects test and they must show *intentional, actual*, and *substantial* effects on United States imports and exports to meet the antitrust-based effects test. However, the two tests are similar in that Plaintiffs must provide specific, rather than general or speculative, evidence that the alleged racketeering activity affected the United States. Plaintiffs have failed to do so here.

a. Securities-Based Effects Test

Statutes prohibiting securities fraud "may be given extraterritorial reach whenever a predominantly foreign transaction has substantial effects within the United States." *North South Fin., 100 F.3d at 1052* (*quoting Consol. Gold Fields PLC v. Minorco, S.A., 871 F.2d 252, 261-62 (2d Cir. 1989)*). **[*16]** Transactions "with only remote and indirect effects in the United States do not qualify as substantial." [10] *Id*.

Courts applying the securities-based effects test demand that plaintiffs establish actual, as opposed to speculative, substantial effects. *See Nat'l Group for Communications and Computers, Ltd. v. Lucent Techs. Inc., 420 F. Supp. 2d 253, 261- 62 (S.D.N.Y. 2006)* **[*17]** (holding that securities-based effects test not met where the estimated impact on defendant's profits or stock price was purely speculative); *Roquette America, Inc. v. Amylum N.V., No. 03 Civ. 0434, 2004 U.S. Dist. LEXIS 12297, 2004 WL 1488384, at *8 (S.D.N.Y. July 1, 2004)* (finding effects test not met where plaintiffs did not identify any specific instances in which products using their trade secrets were made or sold in the United States); *Nuevo Mundo Holdings v. PriceWaterhouseCoopers LLP, No. 03 Civ. 0613, 2004 U.S. Dist. LEXIS 24900, 2004 WL 2848524, at *4 (S.D.N.Y. Dec. 9, 2004)* (holding that plaintiffs' allegation that defendant's racketeering activity caused United States investors to lose value on their investments, unaccompanied by information regarding the number of United States investors affected or the amount of their monetary loss, was too vague and conclusory to support a court's jurisdiction). *See also Nasser v. Andersen Worldwide Societe Cooperative, No. 02 Civ. 6832, 2003 U.S. Dist. LEXIS 16710, 2003 WL 22179008, at *6 (S.D.N.Y. Sept. 23, 2003)*.

In addition, where there are multiple intermediary steps between the alleged racketeering activity and the effect on U.S. markets, courts find that plaintiffs fail to meet the securities-based effects test. **[*18]** *See Boyd v. AWB Ltd., 544 F. Supp. 2d 236, 252 (S.D.N.Y. 2008)* (holding that an extraterritorial monopoly's effect on United States prices was too indirect where it was only "one factor among many" determining those prices); *Lucent, 420 F. Supp. 2d at 262* (finding cascading cancellation of contracts with United States businesses, which resulted after the alleged racketeering activities caused the cancellation of a contract with a foreign company, too "remote and indirect") (internal quotations omitted); *Amylum, 2004 U.S. Dist. LEXIS 12297, 2004 WL 1488384, at *8* (finding effects too indirect where plaintiffs' trade secrets were transferred to a United States company via an intermediary); *Giro v. Banco Espanol de Credito, No. 98 Civ. 6195, 1999 U.S. Dist. LEXIS 9673, 1999 WL 440462, at *3 (S.D.N.Y. June 28, 1999)* (deeming "four intermediate effects that led to the loss in the United States" too "remote and indirect").

b. Antitrust-Based Effects Test

Antitrust statutes may reach anticompetitive behavior occurring outside the United States "if the conduct is intended to and actually does have an effect on United States imports or exports which the state reprehends." *North South*

However, because neither party objects to the applicability of the securities-based effects test, and because the Court finds that Plaintiffs fail to meet either test, the Court need not resolve this issue.

[10] Defendants urge the Court, (Defs.' Mem. L. 10-11), to follow its sister court and further require that, in order to meet the securities-based effects test, plaintiffs establish that they, *themselves*, were harmed *in the United States* by Defendants' alleged racketeering activity. *See, Norex, 540 F. Supp. 2d at 446*. Plaintiffs urge the Court not to follow this approach because the Second Circuit has not adopted the United States injury requirement. (Pls.' Opp'n at 22).

As explained infra part II.C.1, Plaintiffs have not provided sufficient evidence that Defendants' racketeering activity affected *anyone* in the United States substantially and directly. Accordingly, the Court need not reach the question of whether Plaintiffs must particularly demonstrate that they, themselves, were harmed in the United States by Defendants' alleged racketeering activity.

Fin., 100 F.3d at 1052 (*citing* United States v. Aluminum Co. of Am., 148 F.2d 416, 443-44 (2d Cir. 1945). **[*19]** Under the antitrust statutes, the foreign conduct's effect in the United States must be "substantial." Hartford Fire Ins. Co. v. California, 509 U.S. 764, 796, 113 S. Ct. 2891, 125 L. Ed. 2d 612 (1993).

In applying the antitrust-based effects test, courts have required that plaintiffs' evidence be specific. *See* Norex, 540 F. Supp. 2d 438, 448 (finding general allegations of American shareholder losses and unfair competitive advantages in United States oil markets insufficiently specific to support subject matter jurisdiction over an extraterritorial RICO claim); Nuevo Mundo, 2004 U.S. Dist. LEXIS 24900, 2004 WL 2848524, at *4 (deeming insufficient general allegations of United States investors' losses, unaccompanied by specific information about the number of investors affected or the amount of their losses). *See also* Nasser, 2003 U.S. Dist. LEXIS 16710, 2003 WL 22179008, at *6.

B. Summary of Arguments

1. Plaintiffs' Arguments

Plaintiffs argue that Defendants engaged in racketeering activities with, *inter alia*, SPDC and the Nigerian government to suppress MOSOP and its opposition to SPDC's operations in Ogoni as well as to "diminish[] Ken Saro-Wiwa's influence." (Pls.' Opp'n 2.) According to Plaintiffs, Defendants' racketeering activity (1) protected Defendants from "a challenge **[*20]** to SPDC's manner of operations and Defendants' international position," (Pls.' Opp'n 4), (2) allowed Defendants to avoid meeting MOSOP's multi-billion dollar demands, and (3) allowed Defendants to avoid addressing the environmental hazards, including gas flaring, that MOSOP and Mr. Saro-Wiwa were protesting. [11] (*See* Pls.' Opp'n 1-2, 4.) Defendants wanted to avoid these costs in order to minimize the expense and maximize the profits of extracting the Nigerian oil that they ultimately intended to export to the United States. (Pls.' Opp'n 20-21.)

Plaintiffs further argue that Defendants' racketeering activities affected the United States both through the United States' import of Defendants' Nigerian-produced oil and through the sale of Defendants' stocks and ADR in the United States. Plaintiffs observe that SPDC's oil entered the United States market, although they are not clear precisely how this affected the United States. [12] (Pls.' Opp'n 3.) Plaintiffs also contend that SPDC's oil affected the

---

[11] Previously, Plaintiffs alleged that Defendants engaged in their racketeering activity in order to (1) prevent MOSOP and Mr. SaroWiwa's protests from interfering with Defendants' oil production in Ogoni, (*see, e.g.*, Pls.' RICO Statement, 96-D.E. 10, at 20-22), or (2) prevent the Ogoni protests from spreading to Defendants' other oil producing areas in Nigeria, (*see* Order, November 6, 2008, 96-D.E. 283, at 5). Plaintiffs do not make the former argument in response to this motion; the evidence they cite does not support the latter argument. Accordingly, the Court does not consider them herein. However, the Court notes that these alternate purposes **[*21]** would not change the Court's analysis of the effect of Defendants' alleged racketeering activity on the United States.

[12] Plaintiffs make no claims, nor do they offer any evidence, regarding *how* Defendants' oil affected the United States, e.g. by being sold at lower prices. They seem to assume that the fact that Defendants' oil entered the United States is, in and of itself, evidence that it affected the United States sufficiently for the Court to assume jurisdiction **[*22]** over Plaintiffs' RICO claims. It is not.

The closest Plaintiffs come to suggesting a theory of *how* Defendants' oil affected United States commerce is Plaintiffs' assertion that Defendants were able to produce oil at a lower cost than other Nigerian producers. (*See* Pls.' Opp'n 1-2.) Perhaps Plaintiffs mean to suggest, although they do not state, that, to the extent that the United States imported these other Nigerian producers' oil, Defendants had a competitive advantage in the United States over these other Nigerian producers. If so, Plaintiffs provide no evidence to support this contention. These other producers (1) may not have made any costly investments that Defendants avoided, and/or (2) may have also benefitted from Defendants' alleged racketeering activities.

United States because it allowed Defendants to sell stocks and American Depository Receipts ("ADR") in the United States that offered investors a higher margin of return than they would have had if Defendants had met MOSOP and Mr. Saro-Wiwa's demands. [13] (Pls.' Opp'n 3.)

2. Defendants' Arguments

Defendants argue that Plaintiffs' contention that the Court has jurisdiction over Plaintiffs' RICO claims lacks evidentiary support. In particular, they contend that Plaintiffs have failed to offer any specific proof (1) that Defendants had a competitive advantage in the sale of their oil, stocks, or ADR in the United States, (*see* Defs.' Reply 3, 5); or (2) that any effect Defendants' alleged racketeering activities had on the United States was direct or foreseeable, (*see id*. at 5). [14] (*See id*.)

C. Analysis

In order to meet the securities-based effects test, Plaintiffs must show *substantial, direct* effects on the United States. They must show *intentional, actual*, and *substantial* effects on United States imports and exports to meet the antitrust-based effects test. Both tests require Plaintiffs to provide specific, rather than general or speculative, evidence that the alleged racketeering activity affected the United States.

Plaintiffs have not proven by a preponderance of the evidence that Defendants' alleged racketeering activity had sufficient effects, under either the securities-based or the antitrust-based effects tests, to establish that the Court has subject matter jurisdiction over Plaintiffs' RICO claims.

1. Securities-Based Effects Test

Plaintiffs have not established either (1) that Defendants' alleged racketeering activity lowered their costs of producing oil in Nigeria ("Nigerian production costs"), or (2) if Defendants did have lower production costs in Nigeria, that these lower costs resulted in greater investment returns or otherwise affected commerce in the United States ("United States effects"). As a result, Plaintiffs have not established **[*25]** that Defendants' racketeering activities had an *actual* substantial and direct effect within the United States, as needed to meet the securities-based effects test.

a. Nigerian Production Costs

Plaintiffs have not proved that Defendants' racketeering activities lowered their costs of producing oil in Nigeria. In a similar case involving alleged human rights abuses related to oil exploration in Nigeria, *Bowoto v. Chevron Corp*., the court dismissed the plaintiffs' RICO claim because it found that they had "fail[ed] . . . to provide any evidence that defendants' treatment of the environment, the local community, oil protestors generally, or these specific

---

Accordingly, Plaintiffs offer evidence only *that* Defendants' oil entered the United States market. They do not allege or establish *how*, or how *substantially*, it affected United States commerce.

[13] Plaintiffs characterize this as a "competitive advantage" but they do not identify any person or entity against whom Defendants enjoyed this competitive advantage. (Pls.' Opp'n 3.) Plaintiffs appear to assume that, if Defendants lowered **[*23]** their costs of producing oil in Nigeria by engaging in the alleged racketeering activity rather than meeting protesters' demands, Defendants were able to translate these lower costs into higher profits. However, Plaintiffs do not specify *how*, or document *that*, Defendants were actually able to do so. *See infra*, pt. II.C.1.b.

[14] Because the Court finds that Plaintiffs do not prove by a preponderance of the evidence that Defendants' alleged racketeering activity had sufficient effects in the United States to justify the Court's jurisdiction over Plaintiffs' RICO claims, the Court does not reach Defendants' argument that principles of comity bar its assumption of jurisdiction. **[*24]** (Defs.' Mot. 14-15.)

plaintiffs . . . [at *] save[d] defendants money, or otherwise increase[d] their profit margin." *481 F. Supp. 2d 1010, 1014-1015 (N.D. Cal. 2007)*. The court noted that it was "equally likely that defendants' alleged exploitation and abuses have led to increased instability and violence in the region, resulting in increased production costs and decreased output." *Id. at 1015 n.3*. The court also observed that "defendants' alleged actions might have had both deleterious and beneficial effects, resulting in no net impact." *Id*.

Plaintiffs contend **[*26]** that they have succeeded where the *Bowoto* plaintiffs failed. The Court disagrees. Plaintiffs *have* provided evidence that the preventive and remedial measures that the Ogoni protestors demanded from Defendants were costly - more costly than the Defendants were initially willing to spend. (*See, e.g*., Pls.' Opp'n Ex. 1-5 at 44, 48.)

However, although Plaintiffs contend that they have also demonstrated that Defendants' alleged racketeering activities created a net saving for Defendants, (*see* Pls.' Opp'n 21), they *have not* done so.

Plaintiffs' evidence that Defendants' racketeering activity saved Defendants' money is insufficient. Plaintiffs assume that Defendants had to choose between racketeering or paying for the remedial and preventive measures protesters demanded. [15] Even if Defendants had to choose between investing in prevention and remediation or in racketeering activities, Plaintiffs have not proven that the alleged choice to invest in racketeering activity was less costly. Plaintiffs' only evidence that it was less costly for SPDC to engage in racketeering activity is the fact that SPDC predicted that it would meet its projected business goals for 1994, [16] (*see* Pls.' Opp'n Exs. **[*27]** 1-23 at 750; 1-24 at 765), a year in which the Defendants were allegedly engaging in racketeering activity rather than investing in these costly alternatives.

There are at least three ways this evidence does not **[*28]** support Plaintiffs' conclusion. First, just because Defendants *projected* that they would meet their business goals for the year does not establish that they actually *did* meet those goals. Second, even if Defendants *did* meet their goals in 1994, this fact, on its own, does not demonstrate that, in meeting these goals, Defendants' costs were lower than if they had instead invested in the remedial and preventive measures Ogoni protesters demanded. Defendants' ability to meet their business goals does not establish the relative costs of racketeering versus remediation. Third, even assuming that Plaintiffs have shown that, in 1994, racketeering was less costly than remediation, this fact alone would not support Plaintiffs' contention that *overall* racketeering was less costly than remediation. For instance, if Defendants' alleged racketeering activities increased violence and instability in Nigeria, as the *Bowoto* court hypothesized that they might, presumably the resulting costs would accrue over the long term, not immediately. As a result, evidence from one year alone does not demonstrate the overall relative impact that Defendants' alleged choice to invest in violence and repression, rather **[*29]** than remediation or prevention, had on their production costs.

b. United States Effects

Even assuming, *arguendo*, that Defendants' alleged choice to invest in repression rather than remediation lowered Defendants' Nigerian production costs, Plaintiffs' arguments would still fail because Plaintiffs do not establish that these lower costs affected the United States. The only specific evidence Plaintiffs provide that could help the Court establish how substantial an effect Defendants' alleged racketeering activity had within the United States is the gross amount of oil per month that SPDC exported to the United States. (*See* Pls.' Opp'n Ex. 3-22.) But Plaintiffs

---

[15] The Court notes that this may not be a necessary assumption. Faced with protests, Defendants could have chosen to neither suppress the protests nor meet the protesters' demands. For instance, they might have instead chosen to launch a public relations campaign against the protesters, or do nothing at all.

[16] The other evidence Plaintiffs cite in support of the proposition that "[a]ny costs Defendants incurred as a result of violence or instability in the region did not substantially affect their business" do not support this proposition. (Pls.' Opp'n 4 n.6.) Specifically, to the extent that the 1994 internal Shell memorandum Plaintiffs provide mentions the state of SPDC's business, it reports that the company's production was dropping and that it was "taking a lot of pain" because of changes in the Nigerian economy. (*See id*. at Ex. 1-22 at 10084.) The cited page of the "1995 Country Business Plan," also does not provide any relevant information. (*See id*. at Ex. 1-25 at 665.)

provide *no* evidence that would allow the Court to determine how substantial an effect this oil had on the United States. [17] For instance, Plaintiffs provide no evidence regarding what proportion of the oil that the United States imported during the relevant period originated from Defendants' Nigerian operations; how Defendants' lower Nigerian production costs affected the oil they produced, e.g. through lower prices or higher profits, once that oil reached the United States; or that this activity altered the rate of return on Defendants' **[*30]** stocks and ADR. [18] Thus, even if Plaintiffs' evidence supported the conclusion that Defendants' alleged racketeering activity lowered their Nigerian production costs, Plaintiffs have not provided *any* evidence that these lower costs affected the United States in the form of lower prices, higher investment returns, or in any other way.

Speculative claims about general effects on commodity prices or stock values do not satisfy the securities-based effects test. *See, e.g.,* *Lucent, 420 F. Supp. 2d at 261-62*; *Nuevo Mundo, 2004 U.S. Dist. LEXIS 24900, 2004 WL 2848524, at *4*. Accordingly, Plaintiffs have not established that Defendants' alleged racketeering activity affected the United States, substantially or otherwise. [19]

2. Antitrust-Based Effects Test

Plaintiffs also do not establish that Defendants' alleged racketeering activity was intended to, and actually did, affect United States imports and exports.

The antitrust-based effects test, like the securities-based effects test, requires that a plaintiff provide *specific evidence* that a defendant's alleged racketeering activity affected the United States. As discussed above, even assuming that Defendants' alleged racketeering activity lowered their Nigerian production costs, Plaintiffs provide no specific evidence that these lower costs resulted in lower oil prices or higher investment returns in the United States. *See* *Norex, 540 F. Supp. 2d at 448* (finding general allegations of effects on American oil commodity and investment markets insufficient **[*33]** to support a court's subject matter jurisdiction over an extraterritorial RICO claim). Accordingly, Plaintiffs do not meet the antitrust-based effects test. [20]

---

[17] The Court cannot use the other evidence Plaintiffs provide regarding United States effects. Plaintiffs provide evidence that, at some point in time, nearly half of Nigeria's oil was exported to the United States, most of it oil that had been produced by SPDC. (*Id*. Ex. 2-2 at 105: 15-18.) This evidence does not help establish the Court's jurisdiction over Plaintiffs' RICO claims because (1) this proportional measure does not help the Court quantify the impact of Defendants' oil in the United States, and (2) even if the Court could use this information to quantify the impact of Defendants' alleged racketeering activity in the United States, Plaintiffs do not indicate for what years this information was true.

Plaintiffs also provide a news article that states that Shell accounts for nearly half of Nigerian oil output and that Nigerian oil accounts for almost **[*31]** ten percent of United States oil imports. (*See* Pls.' Opp'n Ex. 3-23 at b-2.) However, the Court cannot use the article to help determine the impact of Defendants' alleged racketeering activities on the United States, in part because the article, which was published in 2002, does not state for which years these facts hold true.

[18] The Court does not decide whether these types of evidence are necessary or sufficient. They are listed only as examples of how Plaintiffs *might* have sought to prove United States effects. The Court's decision rests on Plaintiffs' lack of *any* evidence other than the gross number of barrels of Defendants' Nigerian oil that the United States imported. Regardless of what evidence *would* suffice, this evidence does *not* suffice.

[19] Plaintiffs' theory of a United States effect involves Defendants' racketeering activities **[*32]** leading to cost savings that in turn lead to higher investment returns in the United States. The Court notes that this theory, in addition to being too speculative, may also be too indirect to meet the securities-based effects test. *See* *Boyd, 544 F. Supp. 2d at 252* (holding effects on United States prices too indirect where the racketeering activity was only "one factor among many" determining those prices).

[20] The Court notes that Plaintiffs' theory of intent, that Defendants engaged in racketeering activity to minimize the expense of extracting Nigerian oil so as to affect the United States, also is not sufficiently supported by evidence. First, as explained above, Plaintiffs have not established that Defendants' alleged racketeering activity actually did lower their costs. Second, Plaintiffs have not established with sufficient specificity the proportion of Defendants' Nigerian oil that was exported to the United States. *See supra* note 17. Such evidence is necessary to support Plaintiffs' claim that enough of Defendants' Nigerian oil was exported to

D. Conclusion

Plaintiffs have not established that Defendants' alleged racketeering activity had the substantial, direct effects on the United States necessary to meet the securities-based **[*34]** effects test. In addition, Plaintiffs have not established that Defendants' alleged racketeering activity was intended to, or did, affect United States imports and exports sufficiently to meet the antitrust-based effects test. Accordingly, Plaintiffs have not met their burden of proving that their extraterritorial RICO claims fall within the Court's subject matter jurisdiction.

III. CONCLUSION

For the above reasons, Defendants' *Rule 12(b)(1)* motion to dismiss, 96-D.E. 308, Plaintiffs' extraterritorial RICO claims as outside the Court's subject matter jurisdiction is GRANTED.

SO ORDERED.

Dated: New York, New York

Opinion by: Susan R. Bolton

Opinion

ORDER

The Court now considers Defendants Mayo Clinic Arizona and Phoenix Children's Hospital's ("Defendants") Motion to Dismiss Class Plaintiffs' Third Amended Complaint ("Defs.' Mot.") (Doc. 318). Scottsdale Health Corporation has joined Defendants' Motion. (Doc. 319.) [1] The Court will also resolve Plaintiff Jane Doe's Motion to Withdraw as a Proposed Class Representative and for Other Relief ("Pl.'s Mot.") (Doc. 260).

---

[1] Plaintiffs note that Scottsdale Health Corporation already filed an answer to a previous iteration of the Complaint. (Pls.' Mem. of **[*8]** Law in Opp'n to Defs.' Mot. ("Pls.' Opp'n") at 6 n.1.) However, as Scottsdale Health Corporation has not answered Plaintiffs' Third Amended Complaint ("Compl."), they may join in the Moving Defendants' Motion to Dismiss.

I. Background

Plaintiffs are "Registered Nurses who work, or have worked, as temporary (per diem or travel) nurses." (Compl. P 1.) They have brought this lawsuit against Defendants Arizona Hospital and Healthcare Association, its subsidiary the AzHHA Service Corporation (collectively, "AzHHA"), and certain participating hospitals, charging that AzHHA and the hospitals engaged in illegal price-fixing. (Compl. PP 1-2.) The Complaint alleges that AzHHA's nursing Registry Program, which contracts with various agencies representing temporary nurses, operated as "an illegal and anticompetitive buyers' cartel." (Compl. PP3-5.) Plaintiffs claim that the AzHHA Registry and the Defendant hospitals conspired to keep temporary nursing wages below free market levels. (Compl. P4.) On May 22, 2007, the U.S. Department of Justice and the Arizona Attorney General filed a complaint against AzHHA, alleging violations of federal and state ***antitrust law***, after a lengthy investigation. (Compl. **[*9]** PP 13-14.) A final judgment was entered in that case, against AzHHA, in September 2007. (Compl. P 16.) The Complaint in the instant case contains claims under federal and state ***antitrust law***, as well as pursuant to Arizona tort law for interference with business expectancy, unfair competition, and unjust enrichment. (Compl. PP 146-70.) Defendants Mayo Clinic Arizona, Phoenix Children's Hospital, and Scottsdale Healthcare Corporation have moved to dismiss the Third Amended Complaint. (Defs.' Mot. at 1.)

Initially, the instant matter involved two pseudonymous class representatives, Jane Doe and Rhonda Roe. (Pl.'s Mot. at 4.) Plaintiffs claimed that the class representatives required anonymity because they feared retaliation from Defendants, who represent almost all the hospitals in Arizona. (*Id.*) On June 17, 2008, Rhonda Roe notified the Court that she wished to withdraw as a class representative "due to a family medical issue, and in light of the Court's Order of May 23, 2008, regarding disclosure of her identity to Defendants[.]" (Pl.'s Mot. at 5.) Her motion to withdraw was unopposed, and the Court granted it on June 18, 2008. (Pl.'s Mot. at 5; Doc. 209.) Plaintiff Jane Doe has subsequently **[*10]** also decided not to continue as a class representative, and she moved to withdraw on September 29, 2008. (Doc. 260.) Defendants oppose her Motion. (Doc. 284.)

II. Legal Standards and Analysis

A. Motion to Dismiss

The Federal Rules of Civil Procedure require "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*; *Gilligan v. Jamco Dev. Corp., 108 F.3d 246, 248 (9th Cir. 1997)*. Thus, dismissal for insufficiency of a complaint is proper if the complaint fails to state a claim on its face. *Lucas v. Bechtel Corp., 633 F.2d 757, 759 (9th Cir. 1980)*. A complaint should not be dismissed under *Rule 12(b)(6)* "unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*. A *Rule 12(b)(6)* dismissal for failure to state a claim can be based on either: (1) the lack of a cognizable legal theory; or (2) insufficient facts to support a cognizable legal claim. *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1990)*; *Robertson v. Dean Witter Reynolds, Inc., 749 F.2d 530, 534 (9th Cir. 1984)*. In determining whether **[*11]** an asserted claim can be sustained, all allegations of material fact are taken as true and construed in the light most favorable to the non-moving party. *Clegg v. Cult Awareness Network, 18 F.3d 752, 754 (9th Cir. 1994)*. The Supreme Court has explained that factual allegations need to be "plausible" and "must be enough to raise a right to relief above the speculative level." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1965, 167 L. Ed. 2d 929 (2007)*. In ruling on a motion to dismiss, the issue is not whether the plaintiff will ultimately prevail, but whether the claimant is entitled to offer evidence to support the claims. *Gilligan, 108 F.3d at 249*.

1. Per Se Versus Rule of Reason Analysis

Section 1 of the Sherman Act outlaws "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." 15 U.S.C. § 1. In construing § 1, however, the Supreme Court has interpreted the statute to only ban those contracts or combinations that are "unreasonably restrictive of competitive conditions," because many agreements that are beneficial to competition also restrain trade. *Standard Oil Co. of N.J. v. United States, 221 U.S. 1, 58, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*.

Treatment **[*12]** of an agreement as per se illegal is reserved for "agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." *Nw. Wholesale Stationers, Inc. v. Pac. Stationary & Printing Co., 472 U.S. 284, 289, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)*. The Supreme Court has held that the appropriate inquiry in these cases is "whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output, and in what portion of the market, or instead one designed to increase economic efficiency and render markets more, rather than less, competitive." *Broad. Music, Inc. v. Columbia Broad., 441 U.S. 1, 19-20, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)* (internal quotation and citation omitted). "For the sake of business certainty and litigation efficiency, we have tolerated the invalidation of some agreements [using the per se method] that a fullblown inquiry might have proved to be reasonable." *Arizona v. Maricopa County Med. Soc., 457 U.S. 332, 344, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*.

The Supreme Court has also held, "[O]ur decisions **[*13]** establish that price-fixing agreements are unlawful on their face." *Id. at 342*. "'The aim and result of every price-fixing agreement, if effective, is the elimination of one form of competition.'" *Id. at 346* (quoting *United States v. Trenton Potteries Co., 273 U.S. 392, 398, 47 S. Ct. 377, 71 L. Ed. 700 (1927)*); *see also* *N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)* ("Among the practices which the courts have heretofore deemed to be unlawful in and of themselves are price fixing, division of markets, group boycotts, and tying arrangements."); *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 222-23, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)* (finding that price-fixing agreements are per se illegal regardless of whether the price is fixed with some reference to the market price; "[P]rices are fixed because they are agreed upon."); *Freeman v. San Diego Ass'n of Realtors, 322 F.3d 1133, 1144 n.10 (9th Cir. 2003)* ("One manual captures the principle nicely in question and answer format: '[Q.] May competitors agree to fix prices? [A.] Duh. What do you think?'" (quoting ELIOT G. DISNER, ***ANTITRUST LAW*** FOR BUSINESS LAWYERS § 4.06, at 82 (2001))); *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 988 (9th Cir. 2000)* (holding that "[h]orizontal **[*14]** price fixing is a per se violation regardless of whether the prices set are minimum or maximum").

Price-fixing agreements among buyers, like those among sellers, are prohibited by the Sherman Act, even where the damage caused by the agreement is to sellers and not consumers. *Mandeville Island Farms v. Am. Crystal Sugar Co., 334 U.S. 219, 235, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)*; *Socony-Vacuum, 310 U.S. at 223-24*. "'Most courts understand that a buying cartel's low buying prices are illegal . . . . Clearly mistaken is the occasional court that considers low buying prices pro-competitive or that thinks sellers receiving illegally low prices do not suffer antitrust injury.'" *Knevelbaard, 232 F.3d at 988-89* (quoting 2 PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** P 375b at 297 (rev. ed. 1995)); *see also* AREEDA & HOVENKAMP, supra, P 2012 at 133-41 (observing that "once a naked agreement is found among rivals in the buying market limiting the price they will pay or the amount they will purchase, they are condemned categorically without inquiry into power or effects" and distinguishing these agreements from legal joint purchasing arrangements, which produce market efficiencies and increase output, rather than reducing **[*15]** output by forcing sellers to accept less than a competitive price).

To survive Defendants' Motion to Dismiss, Plaintiffs must allege sufficient facts to establish a plausible case of per se illegality. *Twombly, 127 S. Ct. at 1965*. Defendants argue that "Plaintiffs' mere allegation of price fixing does not mean that the *per se* illegal rule applies." (Defs.' Mot. at 8.) Plaintiffs, however, have done more than merely allege price fixing by the Defendants. The Complaint contains a number of allegations that raise the level of the claim above a generalized assertion. (*See, e.g.,* Compl. PP 5-6, 8-9, 11, 100-04.) The Complaint alleges not only that "Defendants have jointly set - and wrongfully suppressed - the wages and compensation" of temporary nursing staff, but also that those rates were set "below competitive levels" and that "[a]gencies have not obtained significant transactional efficiencies or scale economies as a result of the imposition of uniform bill rates." (Compl. PP 5, 9, 11.) Plaintiffs allege that Defendants also fraudulently "affirmatively misled Plaintiffs into believing that their wages were true market wages . . . rather than . . . artificially depressed wages[.]" (Compl. **[*16]** P 74.) The Complaint also contains specific allegations about the means by which Defendants allegedly engaged in price-fixing, including requiring that the agencies adopt a uniform pay rate scale for per diem and travel nurses and agreeing to "expel [from AzHHA] any hospital using participating agencies for less than 50 percent of its total per diem needs." (Compl. PP 101-02.)

Defendants have argued that their arrangement was not illegal price-fixing, but rather an efficient joint purchasing agreement. (Defs.' Mot. at 9-10; Defs.' Reply at 12-13.) Plaintiffs argue that "while AzHHA may have begun in 1988 to serve some legitimate ends, such as quality assurance, the program changed significantly in 1997 - with the support and active participation of the hospitals - and began to blatantly fix rates for temporary nursing personnel." (Pls.' Opp'n at 5; Compl. PP 3, 8, 101.) Plaintiffs claim that "there was no need for [Defendants] to begin price-fixing to permit AzHHA to continue providing other benefits to the hospitals." (Pls.' Opp'n at 5.) Defendants also contend that Plaintiffs are attempting to "cherry pick" one aspect of AzHHA's role, without considering the other, pro-competitive **[*17]** activities of the organization. (Defs.' Reply at 12-13.) In support of this argument, Defendants cite *Meijer, Inc. v. Barr Pharms. Inc., 572 F. Supp. 2d 38, 49 (D.D.C. 2008)*. In that case, however, the agreement at issue was a contract that contained an exclusive supply arrangement whereby a supplier and a potential competitor agreed not to compete with a buyer for the duration of the agreement. The court in *Meijer* held, "Considering that arrangement as a whole, it is apparent that the Agreement's resulting economic effects largely depend on the definition of the relevant market." *Id.* This scenario is entirely unlike the instant case, in which Plaintiffs challenge a different practice (price-fixing), one that is clearly established to be per se illegal. The present case does not involve a situation in which the economic effects necessarily or largely depend on the definition of the relevant market. "With few exceptions, price-fixing agreements are unlawful per se under the Sherman Act[.] . . . The dispositive question generally is not whether any price fixing was justified, but simply whether it occurred." *Freeman, 322 F.3d at 1144*.

For the purposes of this Motion, Plaintiffs have alleged **[*18]** facts sufficient to support a claim of per se illegality. [2]

2. Standing for Federal Antitrust Claims

Defendants advance that Plaintiffs do not have standing in this case because they "allege only an indirect injury that results from a negotiation between the agencies and the Defendants." (Defs.' Mot. at 10.) "[C]ourts have constructed the concept of antitrust standing, under which they 'evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them' to determine whether a plaintiff is a proper party to bring an antitrust claim." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1054 (9th Cir. 1999)* (quoting *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, Inc., 459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*. Because of the difficulty in creating a bright line rule to designate which plaintiffs have standing in antitrust matters, the Ninth Circuit Court of Appeals distilled the Supreme Court's decision in *Associated General* to five factors "for determining whether a plaintiff who has borne an injury has antitrust standing." *Id.* **[*19]** They are:

> (1) the nature of the plaintiff's alleged injury; that is, whether it was the type the antitrust laws were intended to forestall;
> (2) the directness of the injury;
> (3) the speculative measure of the harm;
>
> (4) the risk of duplicative recovery; and
>
> (5) the complexity in apportioning damages.

---

[2] As such, the Court will not address the parties' arguments about market definition in this Order.

Id. "To conclude that there is antitrust standing, a court need not find in favor of the plaintiff on each factor. Generally, no single factor is decisive." *Id. at 1055* (quotation and citations omitted). Courts are advised to balance the factors instead, giving great weight to the nature of the plaintiff's alleged injury. *Id.* "In fact, the Supreme Court has noted that [a] showing of antitrust injury is necessary, but not always sufficient to establish standing [in an antitrust case]." *Id.* (quotation and citation omitted).

After examining all five factors, the Court concludes that Plaintiffs have standing in this matter. Plaintiffs allege that they were injured when Defendants fixed the price of their wages below a competitive rate. (*See, e.g.,* Compl. PP 5, 7, 9, 19, 113, 138, 145.) As discussed in greater detail above, this is an example of the type of injury the antitrust laws are meant to protect **[*20]** against, thus satisfying the first factor. *Mandeville Island Farms, 334 U.S. at 235*; *Socony-Vacuum, 310 U.S. at 223-24*; *Knevelbaard, 232 F.3d at 988-89*. To establish the second factor, the Plaintiffs' injury must be the direct result of Defendants' allegedly anticompetitive behavior. *Am. Ad Mgmt., 190 F.3d at 1058*; *see also* *Yellow Pages Cost Consultants, Inc. v. GTE Directories Corp., 951 F.2d 1158, 1162 (9th Cir. 1991)* ("Directness in the antitrust context means close in the chain of causation." (internal quotation and citation omitted)). Plaintiffs have alleged that there is a direct correlation between bill rates set by AzHHA and nursing wages at the Defendant hospitals. (Compl. P 7.) This causal link, as alleged, between reduced bill rates and lower wages, is sufficiently direct for the purposes of antitrust standing. The Complaint states, "Most of the monies received by nursing agencies in the form of their bill rates are passed directly to nurses as wages and benefits. . . . Participating Hospitals, including the Hospital Defendants, also pay and compensate, and have paid and compensated, Class members directly." (Compl. P 7.) *Compare* *R.C. Dick Geothermal Corp. v. Thermogenics, Inc., 890 F.2d 139, 147 (9th Cir. 1989)* **[*21]** (finding that lost royalties were a direct injury, but that damages from lessened ability to compete due to overall lack of revenue, though traceable to lost royalties, were an indirect injury).

Turning to the third factor, the damages Plaintiffs allege are not speculative. Plaintiffs have alleged that a direct correlation exists between bill rates set by AzHHA and wages for temporary nurses at the Defendant hospitals and also that multiple calculations have been made of the "savings" to the hospitals due to the reduced rates for temporary nursing wages. (Compl. PP 7, 133-34.) Defendants argue that because "the price is ***always*** negotiated with the nurse agency, any measure of harm is speculative at best and apportioning damages between the agencies - one of which has already sued the same defendants for the same alleged antitrust violations - risks duplicative recovery and complex apportionment of any damages." (Defs.' Mot. at 11.) Defendants clarify in their Reply that this argument is not meant to suggest that the amount of any individual Plaintiff's damages might be speculative, but rather that "Plaintiffs' purported injury was too remote from the alleged antitrust harm to amount **[*22]** to an antitrust injury under *Associated General Contractors.*" (Defs.' Reply at 14.) In any event, the Court finds that the damages are both direct (for the purposes of standing) and not speculative. Regardless of the reliability of the estimates that have already been made, should damages need to be assessed, presumably the amount Plaintiffs' wages were depressed could be calculated.

The fourth and fifth factors have to do with other potential plaintiffs for the same injury. In this case, Defendants state that they have been sued by a nursing agency for the same antitrust violations. (Defs.' Mot. at 11.) Plaintiffs dispute that claim, saying that the only suit by an agency thus far instead sought lost profits arising from an illegal boycott and was settled in the summer of 2007. (Pl.'s Opp'n at 14.) For the purposes of this Order, the Court will assume that Plaintiffs' allegations are true. *Usher v. City of L.A., 828 F.2d 556, 561 (9th Cir. 1987)* (In ruling on a motion to dismiss, "the court must presume all factual allegations of the complaint to be true and draw all reasonable inferences in favor of the nonmoving party."). Even assuming that none of the nursing agencies are presently **[*23]** suing these defendants for antitrust violations, however, the possibility presumably still exists of parallel suits. The crux of the issue is the problem of apportioning damages between the nursing agencies and the individual nurses, which could depend on how much of the rate cut is passed on to nurses by their agencies. As Plaintiffs note, this is an issue to be decided using expert testimony and other evidence. (Pls.' Opp'n at 13.) For the purposes of a *Rule 12(b)(6)* motion, the Court confines itself to the allegations in the Complaint, on the basis of which the Court does not find a risk of duplicative recovery, provided that the damages were apportioned properly. While apportionment undoubtedly would need to be addressed in any damages calculation, the Court does not see any reason for that process to be prohibitively complex. For these reasons, the Court concludes that Plaintiffs have antitrust standing in this case.

3. Indirect Purchaser Rule

Defendants also argue that the indirect purchaser rule, outlined by the Supreme Court in *Illinois Brick v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, bars Plaintiffs' claims in this case. (Defs.' Mot. at 11; Defs.' Reply at 14-16.) Defendants' argument **[*24]** essentially is that because the hospitals purchased Plaintiffs' labor through an agency, the agency was the direct seller, so any antitrust action could only properly be brought by the agency itself. (Defs.' Mot. at 11.) Analysis under the indirect purchaser rule is distinct from a determination of standing, although it raises many of the same issues. *Ill. Brick, 431 U.S. at 728 n.7*. *Illinois Brick* involved claims brought by the State of Illinois and a number of local governmental entities against certain manufacturers of concrete blocks. The plaintiffs had hired general contractors, who had hired subcontractors, who had purchased blocks from the defendant manufacturers. The plaintiffs in *Illinois Brick* alleged that the block manufacturers had illegally fixed prices and that they were injured, although they did not purchase the blocks directly from the manufacturers. Under the rule of *Illinois Brick,* indirect purchasers are prohibited from recovering damages except in certain limited circumstances. *Id. at 730-33*. Indirect purchasers retain standing for injunctive relief. *Lucas Auto. Eng'g, Inc. v. Bridgestone/Firestone, Inc., 140 F.3d 1228, 1235 (9th Cir. 1998)*.

The rule announced in **[*25]** *Illinois Brick* stems from the Supreme Court's previous ruling in *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 494, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*, which held that an antitrust defendant was not permitted to introduce evidence that injury was passed on to indirect purchasers, thereby requiring the defendant to pay all recovery to the direct purchaser. The Supreme Court gave two reasons for its decision. First, the Supreme Court was concerned about the possibility of multiple liability because *Hanover Shoe* forbids defendants from introducing evidence of passing on an alleged antitrust injury to indirect buyers. *Ill. Brick, 431 U.S. at 730-31*. Second, analysis of indirect antitrust injury would protract and complicate already cumbersome proceedings. *Id. at 731-33*. As in other areas of ***antitrust law***, this logic applies equally to alleged buyers' cartels like the one at issue in this case. *See, e.g., Zinser v. Cont'l Grain Co., 660 F.2d 754, 760 (10th Cir. 1981), cert. denied, 455 U.S. 941, 102 S. Ct. 1434, 71 L. Ed. 2d 652 (1982)*; *In re Beef Indus. Antitrust Litig., 600 F.2d 1148, 1164-65 (5th Cir. 1979), cert. denied, 449 U.S. 905, 101 S. Ct. 280, 101 S. Ct. 281, 66 L. Ed. 2d 137 (1980)*.

In *Illinois Brick,* the Supreme Court suggested two exceptions to the prohibition against **[*26]** indirect purchaser antitrust suits: (1) if an indirect purchaser received goods from the direct purchaser according to a preexisting "cost-plus contract;" or (2) if the direct purchaser is controlled or owned by another party, either by the seller or the indirect purchaser. *Ill. Brick, 431 U.S. at 726 n.2, 736 n.16*; *see also Alaska v. Chevron Chem. Co., 669 F.2d 1299, 1301 & n.3 (9th Cir. 1982)* (discussing a conditionally certified class consisting of direct purchasers and "indirect purchasers who acquired fertilizer under the economic equivalent of a preexisting cost-plus contract"); *Royal Printing Co. v. Kimberly-Clark Corp., 621 F.2d 323, 326 (9th Cir. 1980)* (applying ownership or control exception to allow indirect purchaser's suit). The Supreme Court later clarified that these exceptions should be read narrowly and not expanded. *Kansas v. Utilicorp United, Inc., 497 U.S. 199, 216-17, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)*; *see also Burkhalter Travel Agency v. MacFarms Int'l, Inc., 141 F.R.D. 144, 148 (N.D. Cal. 1991)* ("The Supreme Court has made it clear that these are very limited exceptions."). The Supreme Court reasoned that cost-plus contracts present a different situation than the typical indirect purchaser **[*27]** scenario because the direct purchaser is insulated from any overcharge since its customer has agreed to buy a fixed quantity regardless of price. *Ill. Brick, 431 U.S. at 736*. The rationale of the second exception is that, in those situations, the direct purchaser would have little or no incentive to sue on their own behalf, thus leaving the indirect purchaser without recourse for any antitrust injuries. *Freeman, 322 F.3d at 1145-46*. Plaintiffs allege that none of the agencies have sued or are suing Defendants, but they do not claim that the agencies have no incentive to sue. (Pls.' Opp'n at 14.)

Plaintiffs argue that their "relationship with Defendants cannot be described as 'indirect'" because the members of the class worked at the hospitals and were compensated directly by the hospitals. (Pls.' Opp'n at 14-15; Compl. PP

4, 7, 92.) Plaintiffs analogize their situation to that presented in *In re Mercedes-Benz Antitrust Litigation, 364 F. Supp. 2d 468 (D.N.J. 2005)*. The individual plaintiffs in that case held leases on Mercedes-Benz vehicles, and the defendant car dealerships. Mercedes-Benz USA moved to dismiss their claims, citing the indirect purchaser rule, because the lease was financed **[*28]** by a separate company, Mercedes-Benz Credit Corporation, which typically pays the dealer for the car before leasing it to the customer, in effect purchasing it from the dealer. *Mercedes-Benz, 364 F. Supp. 2d at 469, 472*. The plaintiffs generally had negotiated the terms of the lease with the dealer, not the financing company. *Id. at 472*. The court held that the plaintiffs' claims could proceed because, under those facts, "both the leasing companies and the lessees could be considered the immediate buyers." *Id. at 478*. The court in *Mercedes-Benz* also noted the "direct interaction" between the customers and the alleged antitrust violators, which is "unlike the paradigm in which there is usually no direct interaction between the antitrust violator and the indirect purchaser." *Id. at 480*. The instant case is somewhere between *Illinois Brick* and *Mercedes-Benz,* as the Plaintiffs here did have some direct interaction with the Defendants, since they worked in the hospitals and were sometimes paid directly by the Defendants, but Plaintiffs do not allege that they had contact with Defendants at the negotiation stage of the transaction. (Defs.' Reply at 14.)

Plaintiffs also argue that Defendants' **[*29]** allegedly anticompetitive behavior caused a separate harm to individual nurses, distinct from the harm to the nursing agencies. (Pls.' Opp'n at 15-16.) In support of this contention, Plaintiffs cite *Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)* and *Loeb Industries, Inc. v. Sumitomo Corp., 306 F.3d 469 (7th Cir. 2002)*. In *McCready,* the plaintiff sued her insurance company for allegedly conspiring with psychiatrists and increasing her costs for treatment by a psychologist. *457 U.S. at 468-70*. The defendant argued that *Illinois Brick* prohibited the plaintiff from pursuing her claim because the employer was the direct purchaser of the insurance plan, but the court disagreed, holding that the injury Ms. McCready had suffered was distinct from the injury to the employer. *Id. at 475*. The court found that because the plaintiff had paid out of pocket to visit the psychologist, the employer had not experienced an injury due to the alleged overcharge. *Id.* The plaintiffs in *Loeb Industries* were purchasers of copper cathode, copper rod, and scrap copper who claimed that they had overpaid due to the defendants' alleged conspiracy to fix the price of copper futures at artificially high **[*30]** levels on international exchange markets. The court in that case relied on *McCready* when it observed that

> different injuries in distinct markets may be inflicted by a single antitrust conspiracy, and thus . . . differently situated plaintiffs might be able to raise claims. The injuries [in that case] suffered by the copper traders who purchased inflated futures contracts from the defendants are distinct from any harm inflicted on Viacom when it paid inflated cash prices for cathode or on Ocean View to the extent that it purchased copper rod from integrated producers.

Loeb Indus., 306 F.3d at 481-82.

For the purposes of a motion to dismiss, it is too early for the Court to conclude definitively that the indirect purchaser rule bars Plaintiffs from recovering damages for their federal antitrust claims. Without examining the contracts between the Defendant hospitals and the nursing agencies, there is no way for the Court to ascertain whether they were not, in fact, cost-plus arrangements that would fall within an exception to the indirect purchaser rule, and such a searching review would be inappropriate on a *Rule 12(b)(6)* motion. *See, e.g., Lucas Auto. Eng'g, 140 F.3d at 1234* (applying **[*31]** the rule from *Illinois Brick* to bar Plaintiffs from recovering damages on a motion for summary judgment, after studying the contracts between the parties). The Complaint alleges a direct correlation between the illegally suppressed wage rates and lower take-home pay for individual nurses and also that the Defendant hospitals sometimes paid temporary nursing staff directly. (Compl. PP 7, 91-92.) The facts of this case do not map neatly onto any of the examples the parties have cited, including *McCready or Loeb:* the individual nurses are undoubtedly indirect sellers, but the mechanics of the relationship between the nurses and the agencies, between the agencies and the hospitals, and between the nurses and the hospitals are not analogous to a wholesaler who sells to a retailer who sells to a consumer. [3] The Court, therefore, will not apply the indirect

[3] The instant case is also very different from a situation wherein a subcontractor **[*32]** purchases materials from a seller, then charges a general contractor, who charges his customer, as in *Illinois Brick.*

purchaser rule at this point to hold that Plaintiffs cannot recover damages for their alleged injury. Furthermore, even if the rule from *Illinois Brick* did operate to bar Plaintiffs' recovery, they could still pursue injunctive relief for their federal claims.

4. Arizona Uniform State Antitrust Act Statutory Labor Exemption

Under the version of the Uniform State Antitrust Act adopted in Arizona, "Labor of a human being is not a commodity or an article of commerce." *Ariz. Rev. Stat. ("A.R.S.") § 44-1404(A)*. Defendants argue that this provision bars Plaintiffs' state antitrust claims. (Defs.' Mot. at 12.) Plaintiffs respond that the statutory language, which is nearly identical to *§ 6* of the Clayton Act, "simply constitutes the 'statutory labor exclusion,' necessary to keep collective bargaining and union activity from being antitrust violations." (Pls.' Opp'n at 18.) Plaintiffs argue that to allow this language, intended to protect union activity from antitrust liability, to prohibit lawsuits such as the present case would be inimical to the purposes of the antitrust laws. (*Id.*) Indeed, the statute also states, "This article shall not be construed to forbid the existence and operation of any labor, agricultural or horticultural organization instituted for the purpose of mutual help, while lawfully carrying out its legitimate **[*33]** objects." *A.R.S. § 44-1404(B)*. "An exemption to the antitrust laws for activities related to collective bargaining traces its origin to *sections 6* and *20* of the Clayton Act and to the Norris-LaGuardia Act." *Brown v. Pro Football, Inc., 50 F.3d 1041, 1048, 311 U.S. App. D.C. 89 (D.C. Cir. 1995)* (citations omitted).

The Arizona Uniform State Antitrust Act "is interpreted in conformity with the federal [antitrust laws]." *Arizona v. Maricopa County Med. Soc'y, 643 F.2d 553, 554 n.1 (9th Cir. 1980)*, *rev'd on other grounds, 457 U.S. 332, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*; *see also Wedgewood Inv. Corp. v. Int'l Harvester Co., 126 Ariz. 157, 613 P.2d 620, 623 (Ariz. 1979)* ("The Arizona legislature clearly intended to strive for uniformity between federal and state antitrust laws."). Moreover, *A.R.S. § 44-1412* explicitly states, "It is the intent of the legislature that in construing [the Arizona antitrust laws], the courts may use as a guide interpretations given by the federal courts to comparable federal antitrust statutes." *But cf. Bunker's Glass Co. v. Pilkington, PLC, 206 Ariz. 9, 75 P.3d 99, 102, 106 (Ariz. 2003)* (acknowledging the federal antitrust laws' general "importance" to the interpretation of the Uniform State Antitrust Act, while also noting that Arizona **[*34]** courts need not "rigidly follow federal precedent on every issue of ***antitrust law*** regardless of whether differing concerns and interests exist in the state and federal systems").

No Arizona court has yet applied *A.R.S. § 44-1404* to a set of facts like the instant case. Nevertheless, in light of the Arizona legislature's avowed desire to achieve uniformity between the Uniform State Antitrust Act and the federal antitrust laws, the Arizona Supreme Court would most likely follow federal precedent and hold that the labor exemption is intended to apply only to lawful union activities. *See Assurance Co. of Am. v. Wall & Assocs. LLC of Olympia, 379 F.3d 557, 560 (9th Cir. 2004)* ("[W]hen interpreting state law, federal courts are bound by decisions of the state's highest court. In the absence of such a decision, a federal court must predict how the highest state court would decide the issue. . . ." (internal quotation marks and citation omitted)). "While none of [the corresponding federal] statutory provisions is phrased in terms of an exemption from the Sherman Act, the Supreme Court has interpreted them generally to waive antitrust liability for unilateral union conduct such as boycotts and **[*35]** picketing." *Brown, 50 F.3d at 1048* (citing *H.A. Artists & Assoc., Inc. v. Actors' Equity Ass'n, 451 U.S. 704, 714-15, 101 S. Ct. 2102, 68 L. Ed. 2d 558 (1981)*; *United States v. Hutcheson, 312 U.S. 219, 232, 61 S. Ct. 463, 85 L. Ed. 788 (1941))*.

Neither party has cited a case in which any court applied the Arizona labor exemption or a similar provision in any context other than one involving organized labor. Defendants point to *Montgomery v. Emerging Technologies Corp., No. 03-70947, 2006 U.S. Dist. LEXIS 13378, 2006 WL 680860 (E.D. Mich. Mar. 16, 2006)* as "applying the identical language under the Michigan Antitrust Reform Act" and dismissing an employee's claim against his employer. (Defs.' Mot. at 12.) However, while the same statutory language is cited by the court in *Montgomery,* the case was not decided on the grounds of the labor exemption. The court in that case notes that, under the plain language of the labor exemption, "any alleged conspiracy to restrict employment opportunities would not run afoul of the [Michigan antitrust laws'] 'restraint of trade' provision," but it goes on to determine that the plaintiff's complaint did not identify the parties with whom those defendants allegedly conspired, thus failing to include the essential elements of the claim and mandating **[*36]** dismissal. *Montgomery, 2006 U.S. Dist. LEXIS 13378, 2006 WL 680860, at *1*. The disposition of this case, even if it addressed the Arizona statute, would not countenance against the guidance of the Arizona legislature and the Arizona Supreme Court that courts interpreting Arizona ***antitrust law*** should look to comparable federal precedent. Here, federal courts and the U.S. Supreme Court have uniformly interpreted the analogous labor exemption in federal ***antitrust law*** as applying to unions engaged in lawful activities. *See, e.g., H.A. Artists, 451 U.S. at 713-17*; *Hutcheson, 312 U.S. at 232*; *Burlington N. Santa Fe Ry Co. v. Int'l Bhd. of Teamsters Local 174, 203 F.3d 703, 708 (9th Cir. 2000)*; *Quinonez v. Nat'l Ass'n of Sec. Dealers, Inc., 540 F.2d 824, 829 n.9 (5th Cir. 1976)*; *Cordova v. Bache & Co., 321 F. Supp. 600, 605 (S.D.N.Y. 1970)* (concluding that given the legislative history and purpose of *§ 6* of the Clayton Act and the consequences of its enforcement, "the sole purpose and effect of the section is to exempt activities and agreements on the part of labor, agricultural or horticultural organizations with respect to their furnishing labor in the marketplace"); *accord People v. N. Ave. Furniture & Appliance, Inc., 645 P.2d 1291, 1299 (Colo. 1982)* **[*37]** (en banc) (analyzing virtually identical statutory labor exemption in Colorado state antitrust laws and concluding that it applied only to concerted employee activities directed to the improvement of conditions of employment).

Even examining only the plain language of the statute, to find the meaning Defendants' advance, the Court would have to just read section (A), without considering section (B), which includes language also found in the Clayton Act and refers specifically to "labor, agricultural or horticultural organization[s] instituted for the purpose of mutual help." *A.R.S. § 44-1404(B)*. "To construe the labor exemption as suggested [by Defendants] would result in its extension to practically any form of human labor involving work for pay, independently of any employer-employee relationship. Such a construction inevitably would lead to the abrogation of the antitrust proscription itself." *N. Ave. Furniture, 645 P.2d at 1299*. The Court concludes that the labor exemption in Arizona's version of the Uniform State Antitrust Act does not bar Plaintiffs' claims in this case.

5. Common Law Claims

a. Interference with Business Expectancy

Under Arizona law, to make out a claim for tortious **[*38]** interference with business expectancy, a plaintiff must establish "the existence of a valid contractual relationship or business expectancy; the interferer's knowledge of the relationship or expectancy; intentional interference inducing or causing a breach or termination of the relationship or expectancy; and resultant damage to the party whose relationship or expectancy has been disrupted." *Wallace v. Casa Grande Union High Sch. Dist. No. 82 Bd. of Governors, 184 Ariz. 419, 909 P.2d 486, 494 (Ariz. Ct. App. 1995)*. Defendants have made several arguments with respect to Plaintiffs' claim for interference with business expectancy. First, Defendants argue that "[t]he only 'improper motive or means' alleged by [P]laintiffs are the antitrust claims." (Defs.' Mot. at 12.) Consequently, as Defendants believe that Plaintiffs' antitrust claims fail as a matter of law, Defendants contend that they could not be liable for interference with business expectancy. (*Id.*) As the Court concluded above, however, Plaintiffs' claims survive Defendants' Motion, at least as to injunctive relief, so this argument is unavailing.

Defendants also argue that "the cornerstone of a claim for interference with business expectancy **[*39]** is the existence of a valid business expectancy." (Defs.' Mot. at 13.) "A claim for tortious interference with a business expectancy is insufficient unless the plaintiff alleges facts showing the expectancy constitutes more than a mere 'hope.'" *Dube v. Likins, 216 Ariz. 406, 167 P.3d 93, 99-100 (Ariz. Ct. App. 2007)* (citing *Marmis v. Solot Co., 117 Ariz. 499, 573 P.2d 899, 902 (Ariz. Ct. App. 1977))*; *see also Pre-Fit Door, Inc. v. Dor-Ways, Inc., 13 Ariz. App. 438, 477 P.2d 557, 560 (Ariz. Ct. App. 1970)* ("In order for the plaintiff to prove a prima facie case it is fundamental that it must establish the existence of a valid contractual relationship or business expectancy."). Under Arizona law, "to prevail on a claim of tortious interference with a business relationship, when the relationship is prospective, there must be a reasonable assurance that the contract or relationship would have been entered into but for the interference." *S. Union Co. v. Sw. Gas Corp., 180 F. Supp. 2d 1021, 1048 (D. Ariz. 2002)* (internal quotation and citation omitted). Defendants note that the "Complaint provides no allegation of a reasonable assurance that, absent the alleged interference, any business expectancy would have been realized by the [P]laintiffs." **[*40]** (Defs.' Mot. at 13.)

Plaintiffs rejoin that, rather than the traditional conception of this tort, involving a prospective contractual or business relationship, they "allege that Defendants interfered with the reasonable expectancy that their wages and compensation would be set by a free market, not one corrupted by illegal price-fixing." (Pls.' Opp'n at 19; Compl. PP 74-76, 159-61.) Defendants respond that Plaintiffs have cited no authority for this novel claim and that "Arizona courts would never permit such a tort that, in practical terms, covers all worldly actions and transactions." (Defs.' Reply at 17.) Plaintiffs conceded in oral argument that if the Court recognized this claim as a version of the tort of interference with business expectancy, it would be ruling on an issue not yet spoken on by the Arizona Supreme Court or an Arizona Court of Appeals. (Mot. Hr'g Tr. ("Hr'g Tr.") 50:21-24, Feb. 13, 2009.) The Court declines to plow that new ground. As no Arizona court has recognized interference with the free market with respect to wage determination as a type of tortious interference with business expectancy, Plaintiffs cannot advance that argument in lieu of establishing the **[*41]** existence of a valid contractual relationship or business expectancy. The Complaint does not allege, and Plaintiffs do not argue in their briefs, that Plaintiffs have a reasonable assurance that the expectancy would have been realized absent the alleged interference. [4] Accordingly, Count III of the Complaint, for interference with business expectancy, is dismissed.

b. Unfair Competition

Count IV of the Complaint alleges that Defendants engaged in unfair competition, under Arizona law. (Compl. PP 164-67.) Defendants argue that the claim must be dismissed because "Plaintiffs do not allege that Defendants made any false representation to induce another to purchase Defendants' product . . ." (Defs.' Mot. at 14.) Plaintiffs respond that the tort is not limited to such circumstances of "palming off" and note that in other jurisdictions, antitrust activity has been found to qualify as unfair competition. (Pls.' Opp'n at 20.) The Arizona Court of Appeals has held that the common law doctrine of unfair competition **[*42]** "encompasses several tort theories, such as trademark infringement, false advertising, 'palming off,' and misappropriation." *Fairway Constructors, Inc. v. Ahern, 193 Ariz. 122, 970 P.2d 954, 956 (Ariz. Ct. App. 1998)* (citing W. PAGE KEETON ET AL., PROSSER AND KEETON ON THE LAW OF TORTS § 130 (5th ed. 1984)). "[T]he central tort in unfair competition at common law is known as 'palming off,' or 'passing off.' It consists in a false representation tending to induce buyers to believe that the defendant's product is that of the plaintiff . . ." *Id.* Moreover, while collecting opinions and noting that "no inflexible rule can be stated as to what conduct will constitute unfair competition," the Arizona Supreme Court held, "The universal test is whether the public is likely to be confused." *Boice v. Stevenson, 66 Ariz. 308, 187 P.2d 648, 653 (Ariz. 1947)*; *see also* *Sutter Home Winery, Inc. v. Vintage Selections, Ltd., 971 F.2d 401, 407 (9th Cir. 1992)* (explaining that, under Arizona law, an action for unfair competition requires the plaintiff to show either "that it was engaged in competitive business" with the defendant or that the defendant's actions "were likely to produce public confusion" (citations omitted)).

Neither **[*43]** party has cited a case where a court applied Arizona law and found that the tort of unfair competition existed in the absence of allegations of public confusion, and the Court is not aware of such a case. The Complaint does not allege that the public could be or has been misled by Defendants' conduct, merely that Plaintiffs and the other members of the class were injured by the alleged antitrust activity. (Compl. PP 165-67.) Nor does Plaintiffs' Complaint allege trademark infringement, false advertising, palming off, misappropriation, or any of the other actions that have been found to constitute unfair competition. Here, again, the Court is unwilling to find that Plaintiffs may maintain a theory of unfair competition that is entirely novel in Arizona. Count IV is also dismissed.

c. Unjust Enrichment

Defendants have also moved to dismiss Plaintiffs' claim for unjust enrichment. (Defs.' Mot. at 15-16.) Defendants argue that Plaintiffs cannot make out such a claim because they received the benefit of their bargain when they

---

[4] Because the Court determines that the Complaint does not allege a valid business expectancy, it will not reach the parties' arguments about whether the harm must involve a third party.

worked for the Defendant hospitals pursuant to a contract with the nursing agency. (Defs.' Mot. at 15-16.) Plaintiffs respond that unjust enrichment is a "flexible, **[*44]** equitable remedy" available when a defendant "is obliged by the ties of natural justice and equity" to compensate a plaintiff. (Pls.' Opp'n at 21 (internal quotations and citations omitted).) Plaintiffs cite *Adelman v. Christy, 90 F. Supp. 2d 1034, 1045 (D. Ariz. 2000)*. While the court in *Adelman* remarked that the existence of a contract does not automatically invalidate an unjust enrichment claim, it also held that "[a] theory of unjust enrichment is unavailable only to a plaintiff if that plaintiff has already *received* the benefit of her contractual bargain." *Id.* In that case, the plaintiff had claimed unjust enrichment as an alternative to breach of contract, when she allegedly had not been compensated under the contract. *Id.* The instant case presents a different situation: Plaintiffs are not arguing that Defendants did not pay the agencies what they owed under the contract; rather, they argue that the contractual amount was improperly reduced due to Defendants' allegedly anticompetitive behavior.

"Unjust enrichment occurs whenever a person has and retains money or benefits that in justice and equity belong to another." *City of Sierra Vista v. Cochise Enters., Inc., 144 Ariz. 375, 697 P.2d 1125, 1131 (Ariz. Ct. App. 1984)*. **[*45]** To recover on a theory of unjust enrichment, "a party must show: (1) an enrichment; (2) an impoverishment; (3) a connection between the enrichment and the impoverishment; (4) the absence of justification for the enrichment and the impoverishment; and (5) the absence of a legal remedy." *Trustmark Ins. Co. v. Bank One, Ariz., NA, 202 Ariz. 535, 48 P.3d 485, 491 (Ariz. Ct. App. 2002)* (citing *City of Sierra Vista, 697 P.3d at 1131*). Defendants also argue that Plaintiffs have not alleged sufficient facts to establish a "nexus between Defendants' supposed enrichment and the [P]laintiffs' supposed impoverishment." (Defs.' Mot. at 16.) Defendants advance that because the individual nurses were paid by agencies, the connection between their allegedly reduced compensation and bad acts of the Defendants is too tenuous. (*Id.*) Defendants cite *A M Leasing, Ltd. v. Baker, 163 Ariz. 194, 786 P.2d 1045, 1049 (Ariz. Ct. App. 1989)* as standing for the proposition that a plaintiff in an unjust enrichment action cannot recover where "the defendant paid in full, but paid someone to whom he was contractually liable for payment rather than the plaintiff." (Defs.' Mot. at 16.) In *A M Leasing,* the court was examining cases in which subcontractors **[*46]** performed work and expected to be paid directly by the defendants, who instead paid a general contractor for the service. *786 P.2d at 1049*. Here, the situation is slightly different. Plaintiffs argue that Defendants were unjustly enriched because they were able to retain the money saved by paying depressed wages to temporary nurses. (Pls.' Opp'n at 23.)

The only case the parties cite addressing analogous claims was in the Eastern District of Pennsylvania, where the court applied Arizona law to uphold the plaintiffs' claims for unjust enrichment based on alleged price-fixing. *D.R. Ward Constr. Co. v. Rohm & Haas Co., 470 F. Supp. 2d 485, 507-08 (E.D. Pa. 2006)*. The court in *D.R. Ward* determined that "Arizona law does not require either a direct causal connection between the enrichment and the impoverishment, or the transference of a direct enrichment from the plaintiff to the defendant." *Id. at 507*. The court in that case held that the plaintiffs had stated a claim under Arizona law sufficient to survive a motion to dismiss because they had alleged facts to suggest (1) that those defendants were enriched due to their unlawful price-fixing; (2) that the plaintiffs in that case were impoverished **[*47]** because they had paid the inflated prices; (3) that the plaintiffs' overpayment had flowed up the distribution chain and enriched the defendants; and (4) that the principles of equity demanded that the defendants disgorge this benefit. *Id. at 507-08*. Likewise, in the instant case, Plaintiffs have alleged that the Defendants were enriched because of the wrongfully suppressed wages of temporary nurses; that Plaintiffs were injured because their wages were set lower than market value; that Plaintiffs' injury stemmed from Defendants' allegedly anticompetitive behavior; and that Defendants therefore ought to be compelled to disgorge their ill-gotten savings. (Compl. PP 162, 169-70.) Defendants' Motion is denied as to Count V of the Complaint, for unjust enrichment.

B. Plaintiff Jane Doe's Motion to Withdraw as a Proposed Class Representative

Plaintiff Jane Doe has moved to withdraw as a class representative, to dismiss her claim without prejudice pursuant to *Rule 41(a) of the Federal Rules of Civil Procedure*, to be relieved of her discovery obligations (including appearing for a deposition), and to have Defendants return or destroy all documents she has produced in this litigation. (Pl.'s **[*48]** Mot. at 1.) Defendant Carondelet Health Network has responded, and that Response is joined by all the other Defendants in this case. Defendants argue that Jane Doe should not be allowed to withdraw as a class representative without the imposition of conditions, namely that she be required by the Court to comply with all outstanding discovery requests and to sit for a deposition. [5] (Def.'s Resp. at 3.)

"In **[*49]** federal practice, voluntary dismissals sought in good faith are generally granted 'unless the defendant would suffer prejudice other than the prospect of a second lawsuit or some tactical advantage.'" *In re Vitamins Antitrust Litig., 198 F.R.D. 296, 304 (D.D.C. 2000)* (quoting *Conafay v. Wyeth Labs., 793 F.2d 350, 353, 253 U.S. App. D.C. 279 (D.C. Cir. 1986))*. Allowing Jane Doe to withdraw as class representative "is the appropriate and just approach if [she] does not wish to represent the class." *In re Neopharm, Inc. Sec. Litig., No. 02 C 2976, 2004 U.S. Dist. LEXIS 5814, 2004 WL 742084, at *1 (N.D. Ill. Apr. 7, 2004)* (citing *KOrg. of Minority Vendors, Inc. v. Ill. Cent. Gulf R.R., No. 79 C 1512, 1987 U.S. Dist. LEXIS 14049, 1987 WL 8997, at *1 (N.D. Ill. Apr. 2, 1987)* ("Absent a good reason . . . a plaintiff should not be compelled to litigate if it doesn't wish to.")). In this case, there is no reason to believe that Jane Doe seeks to withdraw for anything other than good faith reasons, and there will be no serious prejudice to the Defendants, especially given that the litigation is in its relatively early stages. The Court is not in a position to question Ms. Doe's family or personal situation, which is her stated reason for wishing to withdraw; certainly, the **[*50]** pressures and obligations of extended litigation would present challenges to many people. Also, because there are several other identified class representatives, and the class has not yet been certified, Defendants in this case will not suffer the sort of prejudice that might stem from a later-stage withdrawal of a class representative. *See, e.g., In re Vitamins, 198 F.R.D. at 304* ("In determining whether a defendant would suffer legal prejudice by a voluntary dismissal of certain plaintiffs, the Court must consider: (1) the defendants' effort and expense for preparation of trial; (2) excessive delay or lack of diligence on the plaintiffs' part in prosecuting the action; (3) the adequacy of plaintiffs' explanation of the need for dismissal; and (4) the stage of the litigation at the time the motion to dismiss is made, specifically whether a motion for summary judgment is pending."). The Court concludes that Jane Doe's request to withdraw as class representative is made in good faith and that Defendants will not suffer undue prejudice as a result of her withdrawal.

Ordinarily, the burden to obtain discovery of any kind from absent class members is very high. *See, e.g., Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 810 n.2, 105 S. Ct. 2965, 86 L. Ed. 2d 628* **[*51]** (noting that burdens, including discovery, "are rarely imposed upon plaintiff class members"); *Pierce v. County of Orange, 526 F.3d 1190, 1202 n.9 (9th Cir. 2008)* (*Rule 23 of the Federal Rules of Civil Procedure* imposes inherent limitations on absent class member discovery); *Brennan v. Midwestern United Life Ins. Co., 450 F.2d 999, 1005 (7th Cir. 1971)* (observing that while courts have the power to compel absent class members to comply with discovery requests, they "should not be required to submit to discovery as a matter of course"); *In re Currency Conversion Fee Antitrust Litig., No. 1409, M-21-95, 2004 U.S. Dist. LEXIS 22320, 2004 WL 2453927 (S.D.N.Y. Nov. 3, 2004)* (denying request to depose withdrawing class representatives); *Redmond v. Moody's Investor Serv., No. 92 Civ. 9161 (WK), 1995 U.S. Dist. LEXIS 6277, 1995 WL 276150, at *1 (S.D.N.Y. May 10, 1995)* (holding that "discovery of absent class members regarding individual issues, as opposed to common questions, is inappropriate[, and]. . . . the burden on the defendant to justify discovery of absent class members by means of deposition is particularly heavy."). Here, Defendants have not met the substantial burden required to compel an absent plaintiff to submit to discovery, particularly **[*52]** a deposition.

The Court sees no convincing reason for the imposition of conditions on Jane Doe's withdrawal like those suggested by Carondelet. Such conditions seem particularly unnecessary in light of the fact that there are currently three identified class representatives who could be-and, in at least one case, already have been-deposed in her stead. (Pl.'s Reply Mem. in Supp. of Pl.'s Mot. ("Pl.'s Reply") at 4 & n.1.) Accordingly, Plaintiff Jane Doe's Motion to Withdraw is granted and her claim is dismissed without prejudice. Jane Doe is relieved of her discovery obligations

---

[5] Defendant Carondelet also argues that Jane Doe's request to withdraw is nothing more than a ploy to avoid complying with discovery requests, including sitting for a deposition. (Def. Carondolet Health Network's Resp. to Pl.'s Mot. ("Def.'s Resp.") at 2.) Defendant contends that the information provided about Doe "offered tantalizing glimpses of the truly individual and unique work patterns that characterize the nurses who make up the proposed class." (*Id.* at 8.) This argument goes to issues of class certification, which are not at issue in this Motion and will not be addressed at this time.

with respect to this case, including any deposition. Defendants are directed to return or destroy (and certify to Plaintiffs' counsel the destruction of) all documents produced by Jane Doe in the course of this litigation.

III. Conclusions

For the purposes of this Motion, under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, the Court finds that Plaintiffs have alleged sufficient facts to state a claim for a per se violation of the federal antitrust laws. The Court concludes that Plaintiffs have standing to pursue federal antitrust claims, and, at this stage, the indirect purchaser rule from *Illinois Brick* **[*53]** does not bar them from recovering damages, as well as injunctive relief, for those claims. Plaintiffs' claims under Arizona state law for interference with business expectancy and unfair competition are dismissed for failure to state a claim. Remaining are Plaintiffs' claims for injunctive relief under federal ***antitrust law***, Plaintiffs' claims under Arizona state ***antitrust law***, and Plaintiffs' claim for unjust enrichment under Arizona tort law. Plaintiff Jane Doe is permitted to withdraw as a class representative, and her claims are dismissed without prejudice as explained above.

IT IS ORDERED granting in part and denying in part Defendants Mayo Clinic Arizona and Phoenix Children's Hospital's Motion to Dismiss Class Plaintiffs' Third Amended Complaint (Doc. 318).

IT IS FURTHER ORDERED granting Plaintiff Jane Doe's Motion to Withdraw as a Proposed Class Representative and for Other Relief (Doc. 260).

DATED this 19th day of March, 2009.

Antitrust & Trade Law > Regulated Industries > General Overview

Business & Corporate Compliance > ... > Governments > State & Territorial Governments > Gaming & Lotteries

HN1[] **Antitrust & Trade Law, Regulated Industries**

The Interstate Horseracing Act (IHA), *15 U.S.C.S. §§ 3001-07*, requires that to engage in the off-track wagering business, industry participants must cooperate. Of particular interest here, the IHA requires five consents to approve any off-track wagering agreement: (1) the authorized horsemen's group, (2) the host racing association, that is, the host racetrack, *15 U.S.C.S. § 3002(9)*, *(3)* the host state racing commission, (4) the off-track racing commission, and (5) all currently operating tracks within 60 miles of the off-track betting office, or, if there are none, then the closest such track in an adjoining state. *15 U.S.C.S. § 3004*. The horsemen's group is defined as the group which represents the majority of owners and trainers racing there, for the races subject to the interstate off-track wager on any racing day. *15 U.S.C.S. § 3002(12)*. Thus, only the authorized horsemen's group at the host track can provide the required consent. A horsemen's group at another track has no ability to provide the statutory consent. Refusal to consent is commonly referred to as a horsemen's veto. The host racing commission and off-track racing commission's consents are governed by state law.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN2[] **Sherman Act, Scope**

The Sherman Act states that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. 15 U.S.C.S. § 1. The Act only forbids unreasonable restraints on trade. Courts determine whether a restraint is unreasonable using either the per se rule or the rule of reason.

Antitrust & Trade Law > Clayton Act > Scope

HN3[] Antitrust & Trade Law, Clayton Act

The Clayton Act gives a right of action to any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. 15 U.S.C.S. § 15(a).

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN4[] Standing, Requirements

Those making antitrust claims face heightened standing requirements. Thus plaintiffs must not only show the U.S. Const. art. III requirements of injury-in-fact, causation, and redressability, but must also show that the injury is an antitrust injury. Dismissal for failure to show antitrust standing is appropriate at an early stage. In reviewing such a motion, the court draws all reasonable inferences in favor of the plaintiff.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN5[] Standing, Elements

U.S. Const. art. III standing requires the plaintiff allege that he or she has suffered an actual injury, that is fairly traceable to the defendant's conduct, and that can likely be redressed by a favorable decision by the court. Plaintiffs do not have standing if it is purely speculative whether their injury resulted from defendants' conduct or whether it resulted from decisions made by third parties.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] Standing, Requirements

To address standing, the court assumes that an antitrust violation occurred and then determines whether plaintiffs are persons injured by reason of a violation of the antitrust laws. The antitrust standing analysis evaluates the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them. Since standing is determined under the assumption that Plaintiffs have pled an antitrust violation, analysis regarding the existence of a violation is irrelevant.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN7[] Standing, Requirements

A private antitrust plaintiff must plead an antitrust injury, which ensures that any loss stems from a competition-reducing aspect or effect of the defendant's behavior. The plaintiff must show (1) that the alleged violation tends to reduce competition in some market and (2) that the plaintiff's injury would result from a decrease in that competition rather than from some other consequence of the defendant's actions.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN8[ ] **Standing, Requirements**

A complaint must allege an anticompetitive effect on competition, i.e. the market, not merely the competitors themselves. Paying higher prices for a product due to a lack of competition in the market is a potential antitrust injury. A reduction of output can be proof of actual detrimental effects on competition. For purposes of standing analysis, the court must assume two things: that the facts in the complaint to are true, and that plaintiffs' antitrust theory is supported by facts that actually amount to antitrust violations.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN9[ ] **Standing, Requirements**

The second factor for antitrust standing requires the plaintiffs' alleged personal injury be attributable to an anticompetitive aspect of the practice under scrutiny. That is to say that the plaintiff must allege that the antitrust violation is either the necessary predicate for its injury or the only means by which the defendant could have caused its injury. Dismissal is warranted only where it is apparent from the allegations in the complaints that the plaintiffs' injury would have occurred even if there had been no antitrust violation. The defendant's legal action must be independent of the alleged antitrust violation, which was the actual indisputable, and sole cause of the plaintiff's injury to warrant dismissal. Thus, causation can be found where plaintiffs allege the violation caused the injury and no evidence of an independent, non-violative cause exists.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN10[ ] **Antitrust & Trade Law, Exemptions & Immunities**

Congress can preclude application of antitrust laws either by (1) explicitly stating such preclusion, or by (2) so regulating the substantive area that preclusion must be implied.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN11[ ] **Antitrust & Trade Law, Exemptions & Immunities**

Courts are cautioned that implied immunity is disfavored, because if exceptions are to be written into the Sherman Act, they must come from the Congress, not courts. Implied immunity can be justified only by a convincing showing of clear repugnancy between the antitrust laws and the regulatory system. It should be narrowly construed and only be found if necessary to make another federal law work.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN12[ ] **Antitrust & Trade Law, Exemptions & Immunities**

In all the cases where the U.S. Supreme Court has found immunity from antitrust laws, Congress has created a statutory and regulatory structure that actively controlled and monitored behavior or the participants within a particular substantive area. In each of these circumstances, the comprehensive regulatory scheme was deemed a substitute for antitrust regulation. In addition, the regulatory scheme was seen as likely to produce conflicting guidance from antitrust laws or to conflict directly with regulatory practices. Thus, the regulatory schemes confer implied immunity by providing alternative methods for supervising the regulated activity.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN13[] **Antitrust & Trade Law, Exemptions & Immunities**

Where a statute grants express immunity for certain activity and for certain groups, it can provide comprehensive immunity throughout the entire system. Implied immunity is not comprehensive and requires a different analysis.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > General Overview

Business & Corporate Compliance > ... > Governments > State & Territorial Governments > Gaming & Lotteries

HN14[] **Exemptions & Immunities, Collectives & Cooperatives**

The Interstate Horseracing Act (IHA), *15 U.S.C.S. §§ 3001-07*, does not imply immunity from antitrust laws for either an individual horseman or a group of them acting as one. Consequently, there is no implied immunity that courts may extend to a group of horsemen's groups.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN15[] **Antitrust & Trade Law, Exemptions & Immunities**

All of the circumstances where courts have found implied immunity present clear potential for conflict between the antitrust laws and the subsequent law. Mere incompatibility, as opposed to clear repugnancy, seems insufficient to find implied immunity. Immunity is only appropriate where the legislature's subsequent legislation would be so contradictory to antitrust legislation, or where attempting to follow both sets of legislation would be so confusing, that the legislature must have intended to repeal the antitrust laws in certain circumstances despite having failed to explicitly say so.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN16[] **Regulated Practices, Private Actions**

An antitrust complaint must nudge the claim across the line from conceivable to plausible. A plaintiff's allegations, while assumed to be true, must do more than create speculation or suspicion of a legally cognizable cause of action; they must show entitlement to relief. Antitrust complaints are held to a plausibility standard, which requires plaintiffs plead enough facts to raise a reasonable expectation that discovery will reveal evidence of illegal agreement.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

***HN17*[]** **Sherman Act, Claims**

Pleading a *15 U.S.C.S. § 1* violation cannot merely recite the elements of the cause of action, one must provide facts that support them. Those factual allegations, however, need not be detailed to survive a motion to dismiss. Either direct or inferential allegations respecting all the material elements to sustain recovery under some viable legal theory is sufficient. A bare assertion of a conspiracy, however, is insufficient. The facts must give rise to a plausible finding of an agreement that unreasonably restrains trade.

Antitrust & Trade Law > Sherman Act > Claims

***HN18*[]** **Sherman Act, Claims**

Plaintiffs must allege three elements to sustain a *15 U.S.C.S. § 1* cause of action: (1) the existence of a contract, combination, or conspiracy (2) affecting interstate commerce (3) that imposes an unreasonable restraint on trade. Element one requires evidence of the terms and membership of the conspiracy and the method adopted to effectuate its ends. Element two requires plaintiffs define the relevant product market and relevant geographic market. Element three requires showing the agreement had an anticompetitive effect. An anticompetitive effect can be shown using one of two analytical approaches: the per se rule and the rule of reason.

Antitrust & Trade Law > Sherman Act > Claims

***HN19*[]** **Sherman Act, Claims**

Plaintiffs must show that corporate agents are actively and knowingly engaged in a scheme designed to achieve anticompetitive ends in order to bring an antitrust action against them.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Evidence > Inferences & Presumptions > Presumptions

***HN20*[]** **Per Se Rule & Rule of Reason, Per Se Violations**

The per se rule applies to practices that by their nature have a substantial potential for impact on competition. Once the court determines that a practice is illegal per se, it does not have to further examine the practice's impact on the market or the procompetitive justifications for the practice to find a violation. As such, a per se violation only requires plaintiffs prove three things: (1) two or more entities engaged in a conspiracy, combination, or contract, (2) to effect a restraint or combination prohibited per se (wherein the anticompetitive effects within a relevant geographic and product market are implied), (3) that was the proximate cause of the plaintiff's antitrust injury. Plaintiffs do not have to show power, intent or impact. The presumption, however, is against per se violations.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN21[] **Horizontal Refusals to Deal, Boycotts**

Horizontal agreements involve direct competitors at a given level of the market and are viewed as especially injurious, and courts therefore bar them per se, regardless of any alleged ameliorative rationale. Examples include price-fixing and group boycotts. Commercially motivated group boycotts are per se violations because the likelihood of anticompetitive effects is clear and the possibility of countervailing procompetitive effects is remote. Such boycotts are designed to pressure another party into doing something by withholding, or enlisting others to withhold, patronage or services from the target. Evidence of a group boycott used to effectuate a price-fixing arrangement is sufficient to support a per se violation.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN22[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The rule of reason analysis permits case-by-case evaluation of a restraint's effect on competition. The prima facie case under the rule of reason requires facts sufficient to prove (1) that the antitrust defendant contracted, combined, or conspired; (2) that the combination or conspiracy produced adverse anticompetitive effects (3) within relevant product and geographical markets; (4) that the objects of and conduct pursuant to that contract or conspiracy were illegal; and (5) that the plaintiff was injured as a proximate result of that conspiracy. The defendant then has the burden to come forward with evidence of the restraint's procompetitive effects to establish that the alleged conduct justifies the otherwise anticompetitive injuries. Then, the plaintiff must show that any legitimate objectives can be achieved in a substantially less restrictive manner.

Contracts Law > Contract Interpretation > Ambiguities & Contra Proferentem > General Overview

HN23[] **Contract Interpretation, Ambiguities & Contra Proferentem**

A court will strictly enforce the terms of an unambiguous contract. Where a contract is susceptible to inconsistent interpretations, an ambiguity exists. The court interprets the provision according to the intention of the parties as demonstrated by the language used, the subject matter, and the purpose of the contract.

Business & Corporate Compliance > ... > Governments > State & Territorial Governments > Gaming & Lotteries

HN24[] **State & Territorial Government Licensing, Gaming & Lotteries**

The Interstate Horseracing Act (IHA), *15 U.S.C.S. §§ 3001-07*, defines horsemen's group in relation to a particular racetrack. *15 U.S.C.S. § 3002 (12)*. As such, the IHA requires the local horsemen's group consent to any off-track betting. *15 U.S.C.S. § 3004*.

Business & Corporate Law > Agency Relationships > Fiduciaries > General Overview

HN25[] **Agency Relationships, Fiduciaries**

Agency is the fiduciary relation which results from the manifestation of consent by one person to another that the other shall act on his behalf and subject to his control, and consent by the other so to act. In an agency relationship, the principal retains control.

Opinion by: John G. Heyburn II

Opinion

[*873] MEMORANDUM OPINION

Churchill Downs Incorporated ("Churchill"), Calder Race Course, Inc. ("Calder"), and Churchill Downs Technology Initiatives Company ("TwinSpires") (collectively, "Plaintiffs") brought suit asserting antitrust violations and breach of contract claims against Thoroughbred Horsemen's Group, LLC ("THG"), Kentucky Horsemen's Protective and Benevolent Association, Inc. ("Ky HBPA"), Rick Hiles ("Hiles"), and Martin A. Maline ("Maline") (collectively, "Defendants").

Defendants have moved to dismiss the amended complaint on the grounds that the Plaintiffs lack antitrust standing, that the Interstate Horseracing Act immunizes the Defendants' actions from antitrust liability, that the Plaintiffs fail to allege sufficient facts under *Bell Atlantic Corp. v. Twombly,* and that Ky HBPA's actions did not breach the contract between those groups and Churchill. **[**3]** Defendants Hiles and Maline also move to dismiss on the grounds that they are protected by the Volunteer Protection Act.

This litigation occurs in the context of the on-going dispute between the horse owners and trainers (collectively "horsemen") and racetracks concerning the proceeds from all forms of off-track betting. To apply some financial leverage against the racetracks, the horsemen have withheld their permission for the racetracks to sell the ability for off-track betting operators to accept wagers on the track's races. This antitrust action amounts to the racetracks' **[*874]** return salvo in an escalating war between two groups whose economic destinies are intertwined.

To decide these issues the Court must apply the concepts of antitrust standing and pleading in the unusual context of a federal statute which creates the business of interstate parimutuel wagering. Further, these issues, and analysis thereof, are interrelated, without clear delineations. The Court will address standing, statutory immunity, pleading under *Twombly,* and breach of contract in turn.

I.

The description of the facts is critical because it helps determine whether an antitrust violation is occurring at all. Regardless **[**4]** of the conclusions Plaintiffs allege, the facts themselves must illustrate the violation. For those reasons, a detailed review of the factual basis of this suit follows.

Churchill is a large racetrack conglomerate that operates both the famous racetrack in Louisville, Kentucky, and the internet-based interstate wagering company TwinSpires. Calder operates a racetrack in Florida. Churchill, as well as other racetracks, earns its revenue largely from pari-mutuel wagering at the racetrack and at off-track betting sites ("OTBs"). [1] As an OTB, both Churchill and Calder accept wagers on races run at other tracks. Another form of off-track betting is advanced deposit wagering ("ADW"). An ADW operation is one in which account holders deposit money with an operator for the purpose of making wagers. Account holders make wagers from remote locations via telephone, the internet, or a mobile device. TwinSpires is an example of an ADW.

In the pari-mutuel wagering system, wagers from all sources are placed **[**5]** together in a pool. Thus, the bettors wager against each other not against the operator of the pool. The tracks, ADWs and OTBs return 80% of the pool in the form of "payouts" to the winning bettors. The remaining 20% is called the "Takeout," which is in essence the profit divided between the OTB or ADW, the host racetrack, horsemen's groups (by way of race purses), and various governmental agencies.

Since 1978 when Congress authorized interstate wagering, OTBs and ADWs must contract with the host racetrack for the right to accept wagers on horse racing at other tracks. These agreements allow the off-site operators to accept wagers on those races and also to receive a simulcast of the races, referred to as the "signal." The "price" for the product is the percentage of the Takeout that is paid to the host racetrack and the horsemen's groups. The current dispute concerns the allocation of the ADW Takeout with regards to the fee it pays for the right to accept wagers on host track races.

OTBs pay the host track a "host fee" for the signal. ADWs compensate the host track by paying two separate fees: the "host fee" and the "source market fee" (collectively the "Signal Fee"). The host fee is **[**6]** a percentage of the Takeout from wagers made at the OTB or ADW on the races at the host racetrack. The source market fee is a percentage of all wagers placed by ADW customers who are located near the host racetrack (e.g., within 25 miles). The source market fee is designed to compensate the host racetrack for wagering that the customers would otherwise have made at the host racetrack. These fees can vary depending on the popularity **[*875]** of the racetrack. In the past, the host track has always entered into a separate agreement with the horsemen's groups governing the percentage of the Signal Fee that is used directly to increase race purses.

In 1978, Congress enacted the Interstate Horseracing Act ("IHA"), primarily to protect the business of smaller racetracks and horsemen's groups from potential interstate off-track wagering abuses. *15 U.S.C. § 3001-07*. Essentially, ***HN1***[] the IHA required that to engage in the business, industry participants must cooperate. Of particular interest here, the IHA requires five (5) consents to approve any off-track wagering agreement: (1) the authorized horsemen's group, (2) the host racing association, [2] (3) the host state racing commission, (4) the off-track racing **[**7]** commission, and (5) all currently operating tracks within 60 miles of the off-track betting office, or, if there are none, then the closest such track in an adjoining state. [3] *15 U.S.C. § 3004*. The horsemen's group is

---

[1] For purposes of this opinion, the Court defines "OTBs" as off-track betting sites that do not allow for advanced deposit wagering. Typically then, an OTB is a racetrack such as Churchill or Calder.

[2] The host racing association is the host racetrack. *15 U.S.C. § 3002(9)*.

[3] The host racing commission and off-track racing commission's consents are governed by state law.

defined as "the group which represents the majority of owners and trainers racing there, for the races subject to the interstate off-track wager on any racing day." *15 U.S.C. § 3002(12)*. Thus, only the authorized horsemen's group at the host track can provide the required consent. A horsemen's group at another track has no ability to provide the statutory consent. Refusal to consent is commonly referred to as a "horsemen's veto."

Two horsemen's groups, Ky HBPA and Kentucky Thoroughbred Association, Inc. ("KTA"), [4] represent the owners and trainers at Churchill Downs. Until recently, Churchill obtained Ky HBPA and KTA's consent to negotiate with OTBs and ADWs to sell Churchill's signals. Churchill then negotiated contracts with OTBs and ADWs. Churchill presented these contracts to Ky HBPA and KTA, which **[**8]** the horsemen's groups could veto on an individual basis. The horsemen's groups have consented to Churchill exporting the signal for the Kentucky Derby, the Kentucky Oaks, the Kentucky Derby Trial, the Woodford Reserve Turf Classic, and the Breeders' Cup Event Day races to any OTB or ADW and the horsemen's groups only reserve the right to veto four of those contracts. Churchill pays the horsemen's groups, by way of purses, 51% of the price Churchill receives for the signal. [5] This is the "Purse Share." The contracts stipulate that Churchill cannot export the signal for any other races without the horsemen's groups' consent, which the IHA requires.

In November 2007, horsemen's groups from many tracks formed the Thoroughbred Horsemen's Group, LLC ("THG"). [6] **[*876]** These horsemen's groups authorized THG to negotiate a separate but uniform Horsemen's Simulcast Licensing Agreement (the "Licensing Agreement") with each ADW. The Licensing Agreement sets a uniform fee by requiring ADWs pay THG **[**9]** a "License Fee" equivalent to at least one-third of the Takeout. [7] It also provides that THG member horsemen's groups would consent to the sale of the host signal only if the ADW signed it. In this way, THG will contract directly with ADWs, excluding the host tracks entirely. Defendant THG notes that each THG member would choose whether to join in each separate Licensing Agreement. Once signed, the Licensing Agreement's terms would control the relationship between ADWs and all of THG's member horsemen's groups who also sign it. Until the ADWs execute the Licensing Agreement, several THG members have vetoed their host racetracks' attempts to export race signals to all the ADWs.

The Licensing Agreement does not directly affect the existing relationship between the tracks and the ADWs, or between the tracks and the horsemen's groups. The ADWs would continue to pay the Signal Fee and the tracks would still pay the Purse Share. For that reason, the Licensing Agreement provides that the License Fee be reduced by the Purse Share. In this way, the benefit the horsemen's group and the host track receive **[**11]** are intertwined.

By requiring execution of the Licensing Agreement, the horsemen's goal is to ensure a minimum allocation from the Takeout. Nevertheless, the ADW may negotiate distribution of the remaining funds as it chooses. One, the ADW can continue to pay the host racetrack the current Signal Fee. In this scenario, the ADW would then pay THG

[4] KTA and KTA Executive Director David L. Switzer were formally parties to this lawsuit and have subsequently been dismissed by agreement of the parties.

[5] The purses receive 51% of the post-tax Signal Fee revenue.

[6] Horsemen's groups at over 40 tracks, which account for more than 65% of wagering on thoroughbred horseracing in the United States, have joined THG. The alliance includes the Arkansas Horsemen's Benevolent and Protective Association, the Delaware Thoroughbred Horsemen's Association, the Florida Horsemen's Benevolent and Protective Association, the Indiana Horsemen's Benevolent and Protective Association, the KTA, the Ky HBPA, the Louisiana Horsemen's Benevolent and Protective Association, the Maryland Thoroughbred **[**10]** Horsemen's Association, the Minnesota Horsemen's Benevolent and Protective Association, the Mountaineer Park Horsemen's Benevolent and Protective Association (in West Virginia), the Ohio Horsemen's Benevolent and Protective Association, the Oklahoma Horsemen's Benevolent and Protective Association, the Pennsylvania Horsemen's Benevolent and Protective Association, the Tampa Bay Downs Horsemen's Benevolent and Protective Association, the Texas Horsemen's Partnership, the Thoroughbred Owners of California, and the Virginia Horsemen's Benevolent and Protective Association.

[7] The Licensing Agreement would create a contractual obligation for the ADW to pay THG. The License Fee would be allocated through THG to the horsemen's groups directly, bypassing the track entirely.

directly the difference between the License Fee and the Purse Share. [8] Two, the ADW could renegotiate the Signal Fee with the host racetrack such that the Purse Share of the Signal Fee would itself equal 1/3 of the Takeout. Either way, the ADW would pay a higher price for the signal than it currently pays, so long as the Purse Share is not already 1/3 of the Takeout. The Licensing Agreement effectively precludes an ADW from negotiating to buy that signal for less than 1/3 of the Takeout.

In October 2006 Churchill entered into contracts with both KTA and Ky HBPA, which continued their past dealings. Once Churchill obtained contracts with several ADWs and OTBs, however, KTA and Ky HBPA refused to give their consent. KTA and Ky HBPA continued to exercise **[**12]** their horsemen's veto through 2008, while every ADW refused to enter into the Licensing Agreement. Even though Churchill and Calder did negotiate new contracts with several ADWs for a higher Signal Fee, KTA and Ky HBPA withheld their consent because none of the ADWs would sign the Licensing Agreement. Additionally, the FL HBPA has vetoed Calder's attempts to sell its signal to ADWs. Calder's dispute **[*877]** with the FL HBPA has caused several other horsemen's groups to revoke consent for their track to sell its signal to Calder. [9] Due to Florida law, the revocations prevent any Florida OTB or ADW from accepting wagers on any race not simulcast at Calder. [10]

In the midst of all this public controversy, on April 24, 2008, Churchill filed this federal lawsuit. One consequence of **[**13]** the ongoing dispute has been Churchill's decision to reduce its purses in the midst of its 2008 spring meet. Defendants claimed that the purse reductions violated the contracts between KTA and Ky HBPA and Churchill. In response, the horsemen immediately filed their own motion for a preliminary injunction to prevent Churchill from reducing purses.

On June 16, 2008, the Court held a full day hearing on the horsemen's request for injunctive relief. After hearing all the arguments, the Court issued an opinion from the bench denying the injunctive relief. The Court denied the relief because it was unclear from the evidence whether Churchill had breached its contractual duty to consult and because the damages, if any, did not appear to be irreparable. Shortly thereafter, Defendants filed the currently pending motions.

II.

HN2[] The Sherman Act states, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. The Act only forbids unreasonable restraints on trade. *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Courts determine whether a restraint is unreasonable **[**14]** using either the *per se* rule or the rule of reason. *Bassett v. Nat'l Collegiate Athletic Ass'n, 528 F.3d 426, 432 (6th Cir. 2008)*. To analyze the claims here, one must understand the theoretical and factual basis for the antitrust allegations.

The complaint presents one theory of antitrust violation: price-fixing perpetrated by a group boycott. Plaintiffs pleaded a "*per se* violation of *Section 1* of the Sherman Act" because "various horsemen's groups have contracted, combined and conspired to raise the amounts they receive from advanced deposit wagering" and that the horsemen are engaging in "an unlawful group boycott of racetrack operators" in order to accomplish this objective. (Am. Compl. P 1.) A more specific outline of Plaintiffs' argument follows. [11]

---

[8] This presumes that the current Purse Share is not equal to or greater than 1/3 of the Takeout.

[9] The horsemen's groups who have withdrawn their consent include the Delaware Thoroughbred Horsemen's Association, the Ky HBPA, the Maryland Thoroughbred Horsemen's Association, and the Ohio Horsemen's Benevolent and Protective Association.

[10] Florida law permits off-track wagering within the state only on race signals that are imported by Florida tracks presently hosting live races, which at this time only includes Calder.

[11] Defendants obviously characterize the facts and claims in a different light. They deny that the horsemen's groups can be engaged in a group boycott because the horsemen's groups do not compete against one another for the sale of signals.

[*878] In November 2007, Ky HBPA allied with THG, agreeing to a uniform policy with horsemen's groups at 40 other racetracks. (Am. Compl. P P 63-64.) Plaintiffs allege that the following **[**16]** concerted action amongst competitors. [12] KTA, Ky HBPA, and three other named horsemen's groups appointed THG to negotiate on their behalf. The Ky HBPA, the Pennsylvania HBPA, Florida HBPA, and the Texas Horsemen's Partnership have all stated in letters that they will not consent to the sale of the host track's signal unless the ADW signs the Licensing Agreement. THG members have vetoed racetrack attempts to sell their signals to ADWs that have not signed the Licensing Agreement. THG's member groups each exercise their separate vetoes collusively to create the boycott and effectuate their plan.

Plaintiffs say that the horsemen's groups control the signal price by refusing to allow its sale unless each ADW agrees to pay the specified percentage of the Takeout to the horsemen. Defendants do not directly set the minimum price at which the host track can sell its signal, but the Licensing Agreement does set a minimum purchase price for the ADW. According to Plaintiffs, ADWs are no longer able to freely negotiate to purchase the signal at the lowest price possible. When every horsemen's group collectively withholds the consent from all host racetracks to send signals to a particular ADW, Plaintiffs say their action constitutes a group boycott, which raises prices and limits competition. As a result, market forces alone no longer determine the lowest signal price.

III.

HN3[] The Clayton Act gives a right of action to "any person who shall be injured **[**18]** in his business or property by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15(a)*. ***HN4***[] Those making antitrust claims face heightened standing requirements. *NicSand, Inc. v. 3M Co., 507 F.3d 442, 449, 450 (6th Cir. 2007)*. Thus Plaintiffs must not only show the Article III requirements of injury-in-fact, causation, and redressability, but must also show that the injury is an antitrust injury. [13] *Id. at **[*879]** 449*. Dismissal for failure to show antitrust

---

Defendants say that the horsemen's groups play no role in controlling the pricing of the signals because the Ky HBPA contract with Churchill states that Churchill and the ADWs will establish the signal **[**15]** price. In fact, Defendants contend that the horsemen's groups cannot be appropriately viewed as sellers of signals since they only provide their consent to the racetrack, which independently negotiates the signal sale. Further, Defendants deny that horsemen's groups can be considered competitors since each horsemen's group only has the power to withhold their consent from their respective racetrack's sales.

Their characterization focuses on describing the horsemen's groups actions as merely ensuring the horsemen's groups' allocation of the revenues from ADW wagering. In so focusing, the Defendants attempt to divorce the allocation of revenues from the price of the signal, despite the Licensing Agreement's fee structure, which explicitly entwines revenue allocation with the Signal Fee. Finally, Defendants dispute whether a group boycott exists because Plaintiffs did not identify a target of the boycott and claim that the only potentially injured party would be the ADWs, who do not compete with the horsemen's groups.

[12] Plaintiffs allege that the horsemen's groups are at least indirectly competing with each other through their host racetrack. They explain that the host racetracks compete with each other to get ADWs, and other OTB operators, to buy their signal. Accordingly, the racetracks have an interest in selling their signal to as many OTB or ADW operators as possible, for the best price possible. The horsemen's groups benefit from this by way of their purses. Since they must consent to the sale of the signal, Plaintiffs contend that they are a party to the sale. Plaintiffs further contend that the horsemen's **[**17]** groups and tracks are actually joint sellers of the right to accept wagers on races since both must consent to the contracts. In that respect, the horsemen's groups may also be seen as direct competitors in their joint seller capacity. *See* Section VI for additional discussion of how the horsemen's groups participate in the market for signals.

[13] As a threshold requirement, Plaintiffs must have Article III standing. ***HN5***[] Article III standing requires the plaintiff allege that he or she has suffered an actual injury, that is fairly traceable to the defendant's conduct, and that can likely be redressed by a favorable decision by the court. *Bennett v. Spear, 520 U.S. 154, 167, 117 S. Ct. 1154, 137 L. Ed. 2d 281 (1997)*. Plaintiffs do not have standing if it is purely speculative whether their injury resulted from Defendants' conduct or whether it resulted from decisions made by third parties. *Simon v. E. Ky. Welfare Rights Org., 426 U.S. 26, 42-43, 96 S. Ct. 1917, 48 L. Ed. 2d 450 (1976)*. **[**19]** Churchill and Calder's injuries, the inability to sell their signals, result from the collective behavior of the horsemen's groups and ADWs, who are not defendants in this lawsuit. However, Plaintiffs do provide indication that if the Court removed the obstruction caused by the antitrust violation, Churchill and Calder could sell their signal to ADWs. Similarly, the allegations indicate the tracks would sell signals to Twinspires. Since the complaint alleges that Churchill and Calder have

standing is appropriate at an early stage. *Id. at 450*. In reviewing such a motion, the Court draws all reasonable inferences in favor of the plaintiff. *DirecTv, Inc. v. Treesh, 487 F.3d 471, 476 (6th Cir. 2007)*.

HN6[] To address standing, the Court assumes that an antitrust violation occurred and then determines whether **[**20]** Plaintiffs are "person[s] injured by reason of a violation of the antitrust laws." *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 528-29, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (*see also* *Watkins & Son Pet Supplies v. Iams Co., 254 F.3d 607, 616 (6th Cir. 2001)* (holding no antitrust injury and dismissing for lack of standing under analysis that assumed arguendo that defendant violated the Clayton Act)). [14] The antitrust standing analysis "evaluate[s] the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them." *Id. at 535*.

HN7[] A private antitrust plaintiff must plead an antitrust injury, which ensures that any "loss stems from a *competition-reducing* **[**21]** aspect or effect of the defendant's behavior." *NicSand, 507 F.3d at 449* (citing *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))*. The Sixth Circuit requires the plaintiff show "(1) that the alleged violation tends to reduce competition in some market and (2) that the plaintiff's injury would result from a decrease in that competition rather than from some other consequence of the defendant's actions." *Tennessean Truckstop, Inc. v. NTS, Inc., 875 F.2d 86, 88 (6th Cir. 1989)*. The Court will analyze each.

A.

The first factor focuses on the nature of the injury. ***HN8***[] The complaint must allege an anticompetitive effect on competition, i.e. the market, not merely the competitors themselves. *Bassett, 528 F.3d at 434*. The Sixth Circuit has previously held that "paying higher prices for a product due to a lack of competition in the market" is a potential antitrust injury. *In re Cardizem CD Antitrust Litig., 332 F.3d 896, 900 (6th Cir. 2002)*. The Supreme Court **[*880]** has also found that a reduction of output can be "proof of actual detrimental effects" on competition. *F.T.C. v. Ind. Fed'n of Dentists, 476 U.S. 447, 460, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*.

For purposes of standing analysis, the Court must assume two things: **[**22]** that the facts in the complaint to are true, and that Plaintiffs' antitrust theory is supported by facts that actually amount to antitrust violations. [15] Plaintiffs' antitrust theory is price-fixing perpetrated by group boycott. The group boycott is the horsemen's groups' agreement, through THG, to veto any sales of signals to ADWs absent a Licensing Agreement. The group boycott produces a detrimental effect when the horsemen's groups prevent signals from being sold, which results in fewer wagering opportunities for the ultimate individual consumer.

The Licensing Agreement sets a minimum cost of the signal that is higher than any ADW currently pays. Plaintiffs further allege that current pending contracts with ADWs, although not consented to yet, provide for higher fees than the ADWs paid in previous years. The Sixth Circuit has previously indicated that paying higher prices for a product due to a lack of competition causes harm to competition. The Supreme Court has also recognized the harm to competition a reduction of output causes. Since fewer signals are available **[**23]** for purchase, resulting in fewer

---

negotiated contracts for the 2008 season with several ADWs, which Defendants have vetoed as part of the alleged antitrust violation, remedying that violation could result in the contracts being approved. Plaintiffs provide the Court sufficient support to conclude that in this case victory would be substantially likely to result in Churchill and Calder being able to sell their signals to ADWs and Twinspires being able to purchase signals. Plaintiffs have Article III standing based on an alleged loss of wagering opportunities and an increased signal price caused by supposed anti-competitive behavior.

[14] Defendants' arguments regarding the application of the "rule of reason" and *per se* rule to the alleged violation are misplaced with regards to standing. That analysis is properly applied to determine whether an antitrust violation occurred since both standards assess whether the restraint on trade is unreasonable. *See* *Bassett, 528 F.3d at 432*. Since standing is determined under the assumption that Plaintiffs have pled an antitrust violation, analysis regarding the existence of a violation is irrelevant.

[15] The Court will directly address the issue of the nature of the an antitrust violation in Section VI of this opinion.

wagering opportunities, and prices are inflated because the group boycott prevents competition in the sale of signals, the complaint alleges harm to competition. Thus, the allegations appear to satisfy the first element of antitrust standing.

B.

HN9[] The second factor requires the Plaintiffs' alleged personal injury be "attributable to an anticompetitive aspect of the practice under scrutiny." *NicSand, 507 F.3d at 451* (quoting *Atl. Richfield Co., 495 U.S. at 334* (internal quotations omitted)). That is to say that the "plaintiff must allege that the antitrust violation is *either* the 'necessary predicate' for its injury or the only means by which the defendant could have caused its injury." *In re Cardizem CD Antitrust Litig., 332 F.3d at 900*. "[D]ismissal is warranted only where it is apparent from the allegations in the complaints that the plaintiffs' injury would have occurred even if there had been no antitrust violation." *In Re Cardizem CD Antitrust Litigation, 332 F.3d at 914*. The defendant's legal action must be "independent of the alleged antitrust violation, which was the actual indisputable, and sole cause of the plaintiff's injury" to warrant dismissal. **[**24]** *Id. at 914*. Thus, causation can be found where Plaintiffs allege the violation caused the injury and no evidence of an independent, non-violative cause exists.

Plaintiffs' specific injury is three-fold: (1) Churchill and Calder's inability to sell their signal, (2) the consequential decrease in wagering opportunities, and (3) a higher price to Twinspires, an ADW, to purchase the signal. The anti-trust violation causes these specific injuries. Price-fixing raises TwinSpires's cost of the signal. That price increase may lower the revenue Churchill and Calder receive. The group boycott also decreases the number of ADWs purchasing the signal, thereby reducing wager revenue to Churchill and Calder. It also reduces the wagering opportunities Twinspires can provide.

[*881] Although each horsemen's group could individually veto signal sales thereby causing similar injuries to tracks and ADWs, that behavior is not independent and separate from the alleged collusion. Since no independent lawful cause of the injury can be identified, Plaintiffs meet the second element of antitrust standing.

IV.

The Court next addresses whether the enactment of the Interstate Horseracing Act (the "IHA") creates a legislative **[**25]** immunity from antitrust liability under the Sherman Antitrust Act. Defendants argue that because the IHA authorizes their individual actions, it impliedly repeals Sherman Act liability and immunizes them from liability for any collective action. Indeed, ***HN10***[] Congress can preclude application of antitrust laws either by (1) explicitly stating such preclusion, or by (2) so regulating the substantive area that preclusion must be implied. *Credit Suisse Sec. LLC v. Billing, 551 U.S. 264, 127 S. Ct. 2383, 2389, 168 L. Ed. 2d 145 (2007)*. Neither party argues that the IHA does this explicitly. No court has addressed whether the IHA does so impliedly. This is a difficult issue because the IHA occupies such an unusual place within the business of parimutuel wagering.

HN11[] Courts are cautioned that implied immunity is disfavored, *Gordon v. New York Stock Exch., 422 U.S. 659, 682, 95 S. Ct. 2598, 45 L. Ed. 2d 463 (1975)*, because "if exceptions are to be written into the [Sherman] Act, they must come from the Congress, not [the] Court." *U.S. v. South-Eastern Underwriters Ass'n, 322 U.S. 533, 561, 64 S. Ct. 1162, 88 L. Ed. 1440 (1944)*. Implied immunity "can be justified only by a convincing showing of clear repugnancy between the antitrust laws and the regulatory system." *U.S. v. Nat'l Ass'n of Secs. Dealers, Inc., 422 U.S. 694, 719, 95 S. Ct. 2427, 45 L. Ed. 2d 486 (1975)*. **[**26]** It should be narrowly construed and only be found if necessary to make another federal law work. *Group Life & Health Ins. Co. v. Royal Drug Co., 440 U.S. 205, 231, 99 S. Ct. 1067, 59 L. Ed. 2d 261 (1979)*; *Silver v. New York Stock Exch., 373 U.S. 341, 357, 83 S. Ct. 1246, 10 L. Ed. 2d 389 (1963)*.

A.

Both parties agree that *Credit Suisse* sets the general ground rules for determining implied immunity in this case. The Supreme Court set out a number of factors that determine whether the securities laws were "plainly repugnant" to the antitrust laws, thus requiring immunity. *Credit Suisse, 127 S. Ct. at 2392*. Because *Credit Suisse* dealt with a hedge fund and securities laws, it is not directly applicable here. Nevertheless, its principles are instructive.

HN12[] In *Credit Suisse* and in all the other cases where the Supreme Court has found immunity, Congress has created a statutory and regulatory structure that actively controlled and monitored behavior or the participants within a particular substantive area. *See Credit Suisse, 127 S.Ct. at 2389*; *Brown v. Pro Football, Inc., 518 U.S. 231, 242, 116 S. Ct. 2116, 135 L. Ed. 2d 521 (1996)* (federal labor laws); *Gordon, 422 U.S. at 682* (Securities and Exchange Act of 1934); *United States v. Nat'l Ass'n of Sec. Dealers, Inc., 422 U.S. 694, 95 S. Ct. 2427, 45 L. Ed. 2d 486 (1975)* (Investment **[**27]** Company Act of 1940); *Silver, 373 U.S. at 358-59, 364* (Securities Exchange Act of 1934); *U.S. v. Borden Co., 308 U.S. 188, 198, 60 S. Ct. 182, 84 L. Ed. 181 (1939)* (Agricultural Marketing Agreement Act of 1937). In each of these circumstances, the comprehensive regulatory scheme was deemed a substitute for antitrust regulation. In addition, the regulatory scheme was seen as likely **[*882]** to produce conflicting guidance from antitrust laws or to conflict directly with regulatory practices. *Credit Suisse, 127 S.Ct. at 2389*. Thus, the regulatory schemes confer implied immunity by providing alternative methods for supervising the regulated activity.

The IHA is an unusual piece of legislation. Its provisions created the rules under which racetracks could legally market and facilitate inter-state horse race wagering. It requires consents from various parties before any track can sell its signal or before any wagering can occur. But the legislation neither creates nor envisions any other supervision or regulatory scheme. Its limited provisions do not seem to conflict either directly or indirectly with antitrust principles. In fact, regulation of the horse wagering industry is left to the respective state racing commissions. The **[**28]** Sixth Circuit seems to agree, given its passing assessment that the IHA envisions a lack of government regulation and interference. *Ky. Div., Horsemen's Benevolent & Protective Ass'n, Inc. v. Turfway Park Racing Ass'n, Inc., 20 F.3d 1406, 1414-15 (6th Cir. 1994)* (holding that the IHA is a constitutional exercise of Congressional power.)

In all the cases above, the Supreme Court found implied immunity from the antitrust laws because Congress had, in effect, substituted rigorous and pointed regulation. Moreover, it did so in highly regulated areas where the regulatory function appeared less certain and where nothing in the statute indicated a purpose justifying immunity. *See Silver, 373 U.S. at 358-59, 364*. The IHA's legislative framework suggests that antitrust immunity should not be implied here.

B.

Defendants argue that implied immunity may apply even where active supervision is absent. The Sixth Circuit has in fact found implied immunity in at least one arguably less regulated situation which Defendants liken to ours. *See McCarthy v. Middle Tenn. Elec. Membership Corp., 466 F.3d 399 (6th Cir. 2006)*. The Tennessee Valley Authority ("TVA") is a federally-chartered corporation that is **[**29]** charged with "maintaining and operating the properties now owned by the United States . . . in the interest of the national defense and for agricultural and industrial development." *16 U.S.C. § 831*. Electrical cooperative members challenged the legality of contracts between the TVA and the electrical cooperatives. *McCarthy, 466 F.3d at 403*. The Sixth Circuit held that TVA was immune from antitrust liability related to these contracts because the statute created municipal monopolies for electrical power, which was at odds with concerns about competition. *Id.* The Court also said that the statute specifically authorized the activity at issue. *Id. at 414*. Finally, the Sixth Circuit recognized that the actions were performed by a semipublic entity, and indicated that additional supervision could exist. *Id. at 414, n.25*. [16]

---

[16] Defendants cite no other convincing authority to support this avenue of argument. The Fifth, Tenth, and Eleventh Circuit have found implied immunity arising from the Amateur Sports Act ("ASA"). *Eleven Line, Inc. v. N. Tex. State Soccer Ass'n, Inc., 213 F.3d 198 (5th Cir. 2000)*; *Behagen v. Amateur Basketball Ass'n, 884 F.2d 524, 526 (10th Cir. 1989)*; *JES Props., Inc. v. USA*

[*883] The TVA represents a unique situation, as it is a quasi-governmental entity, wholly owned by the U.S. government. *Id. at 403, n.2*. In fact, the TVA is treated as an agency and evaluated under the Administrative Procedures Act. *Id. at 406*. The contracts at issue **[**31]** were approved by that agency board. *Id.* State law further regulates the TVA rates. *Id. at 414*. The combination of federal authority and state regulation created a regulatory scheme of sorts, and the scheme applied to the process of rate determinations and contract formation. *Id. at 414*. Applying antitrust laws would be completely at odds with that scheme. *Id.*

The IHA has a much more limited purview. Its purpose is to ensure that horsemen are compensated for their contributions to the successful operation of an off-track betting system. 124 Cong. Rec. 31,552, 31, 554. That purpose seems neither at odds with nor inhibited by antitrust laws. The IHA provides no such standards or oversights to regulate the horsemen's veto. The horsemen's groups have neither a public purpose nor a federal charter. Thus, the close nexus between the claims in the TVA case, and government control and involvement in that industry are simply not present here.

For all these reasons, the Court declines to use *McCarthy* as a launching pad to expand the doctrine of implied immunity.

C.

Defendants must acknowledge the difficulty of comparing the lack of comprehensive regulatory scheme in the IHA with that in other implied **[**32]** immunity cases. So, they make an interesting and nuanced argument-perhaps their best argument. They say that the IHA's proper application confers and, indeed, requires immunity from the antitrust laws. This is so based upon the theory of "extended immunity." The theory posits that if certain concerted action by individuals affiliated in a group is immune from antitrust laws, acts by a group of the groups of individuals must also be immune as well. As applied here, Defendants argue that because individual horsemen cannot comply with both the IHA and antitrust laws, the IHA creates implied antitrust immunity for groups of individuals. [17] Defendants then extend this individual immunity to the horsemen's groups, concluding that groups of the horsemen's groups are also immunized.

Defendants offer three cases to illustrate extending individual immunity to a **[*884]** group. The first two cases involved the Copper-Volstead Act, which regulates agricultural cooperatives. In *Sunkist Growers v. Winckler & Smith Citrus Products,* 12,000 citrus growers joined Sunkist Growers, Inc. and also formed two separate cooperatives: the Exchange Lemon and the Exchange Orange. *370 U.S. 19, 21-22, 82 S. Ct. 1130, 8 L. Ed. 2d 305 (1962)*. The Supreme Court held that these three legal entities could not be "considered independent parties for the

---

Equestrian, Inc., 458 F.3d 1224, 1231 (11th Cir. 2006). **[**30]** The ASA authorizes the United States Olympic Commission ("USOC") "to recognize one national governing body ("NGB") for each sport included in the program of the Olympic games." *Jes Props., Inc., 458 F.3d at 1229*. To be recognized, the NGB must satisfy a number of requirements. *Id.* Although the NGBs enjoy a great deal of autonomy, "the ASA provides for ongoing review of the NGB by the USOC in order to ensure compliance with the ASA." *Id. at 1229* (citing *Behagen, 884 F.2d at 528*). Not only does the ASA provide for regulatory supervision, but the circuits have rested their finding of immunity on the grounds that the activity at odds with ***antitrust law*** is "*necessary to implement Congress' intent.*" *Id. at 1231* (citing *Behagen, 884 F.2d at 527*) (emphasis in original). For the reasons explained in this Memorandum Opinion, the Court concludes that the antitrust activity alleged here is not so at odds with Congressional intent of the IHA.

[17] Defendants cite *Washington Trotting Ass'n v. Pennsylvania Harness Horsemen's Ass'n* to support the proposition that concerted action amongst individual horsemen could violate antitrust laws. *428 F. Supp. 122 (W.D. Pa. 1977)*. Although the case holds that individual horsemen acting together could violate antitrust laws, the case did not involve the IHA. *Id. at 126*. At issue was whether one horsemen's group could **[**33]** be recognized as the sole representative of the horsemen at the track. *Id. at 124*. To persuade the track to only deal with one horsemen's group, individual horsemen refused to enter their horses in races. *Id. at 124-25*. The Western District of Pennsylvania concluded that individual horsemen could independently choose not to participate in any track's races, but to do so in concert would violate the antitrust laws. *Id. at 126*. However, the *Washington Trotter Ass'n* case did not involve action under the IHA and this difference is critical. The IHA authorizes only the acts of a group, not an action of any individual.

purposes of the" antitrust acts. *Id. at 27*. It reasoned that the Capper-Volstead **[**34]** Act contemplated a "cooperative of such size and general activities" as the situation in the case. *Id. at 29*. The Supreme Court stated that the configuration of organizations here constituted "in practical effect and in the contemplation of the statutes one 'organization' or 'association' even though" there were three separate legal entities. *Id.*

In *Treasure Valley Potato Bargaining Association v. Ore-Ida Foods, Inc.,* individual potato sellers joined two larger grower associations that worked together to bargain collectively with the potato buyers. *497 F.2d 203, 206 (9th Cir. 1974)*. The two bargaining associations had at least a tacit agreement to secure similar contracts for both organizations' members. *Id. at 215*. The Ninth Circuit found that the Capper-Volstead Act expressly exempted agricultural cooperatives from antitrust liability. *Id. at 217*. It correctly reasoned that express immunity protects groups of individuals grouped in cooperatives from antitrust liability as well as protecting the cooperatives when they act together as one association. *Id.*

In the third case, *Brown v. Pro Football, Inc.,* the NFL Players Association challenged collective action on behalf of the NFL Clubs **[**35]** in contract negotiations with developmental squad players. *518 U.S. 231, 234-35, 116 S. Ct. 2116, 135 L. Ed. 2d 521 (1996)*. The NFL Clubs agreed on a salary floor for developmental squad players. *Id. at 235*. The Supreme Court reasoned that the implied antitrust immunity deriving from the federal labor laws applied here as well. *Id. at 236, 237*. [18] Such a conclusion was necessary to "make the statutorily authorized collective-bargaining process work." *Id. at 237*. The Supreme Court recognized these circumstances as simply a case of multi-employer bargaining under the federal labor laws. *Id. at 239*. The case did not involve groups joining together into a larger group of those groups.

Upon examination, however, none of these cases articulates a theory of immunity that is applicable here. Both *Sunkist* [19] and *Ore-Ida* [20] concerned statutes that provided express immunity. ***HN13***[] Where a statute grants express immunity **[**36]** for certain activity and for certain groups, it can provide comprehensive immunity throughout the entire system. Implied immunity is not comprehensive and requires a different **[*885]** analysis. In *Brown,* the Supreme Court did not actually extend implied immunity to groups but only held that it applied equally to employees and employers. To analogize *Brown* to this case would only indicate that any immunity, if found, would apply to both the horsemen's groups and the racetracks or ADWs.

The Court has spent considerable effort to understand this argument in the context of the IHA. However, the Court ultimately concludes that neither the cases cited nor the particular logic of them provide reason enough to extend antitrust immunity to state horsemen groups exercising their IHA powers **[**37]** in concert. With all due respect, these arguments actually confuse and conflate several different concepts. None of these cases support the proposition that implied immunity extends to a group of immune individuals. In fact, implied immunity doctrine would suggest the opposite conclusion given the fact that immunity is to be implied narrowly and only to the minimum extent necessary. *See Silver, 373 U.S. at 357*.

Moreover, to conclude that individual horsemen must be immune from antitrust liability under the IHA misconstrues these circumstances and the statutory scheme. Individual horsemen do not need immunity because no individual can exercise a horsemen's veto or, for that matter, take any action under the IHA. Prior to enactment of the IHA,

---

[18] The Supreme Court has recognized a "'nonstatutory' labor exemption from the antitrust laws," implied from federal labor statutes. *Brown, 518 U.S. at 235-36* (citing *Connell Constr. Co. v. Plumbers, 421 U.S. 616, 622, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*; *Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)*; *Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965))*.

[19] *Sunkist* does not clearly stand for the principle of extending individual immunity to group activity, but instead seems only to support the premise that legally separate entities may in reality only constitute one entity for purposes of the Capper-Volstead Act.

[20] The Court also notes that *Ore-Ida* only provides non-binding Ninth Circuit precedent, which for the reasons discussed it does not find supportive or persuasive.

individual horsemen had no right to prevent the tracks from exporting a signal. The IHA restructured the business of interstate wagering so that an authorized horsemen's group could withhold consent to the track. Since the horsemen only have a group right, individual horsemen cannot join together to exercise individual consents. ***Antitrust law*** prohibitions on colluding and conspiring do not interfere with each horsemen's group executing its consent **[**38]** power. [21] This grant of power does not conflict with an antitrust prohibition of concerted action among those groups.

HN14[] The IHA does not imply immunity for either an individual horseman or a group of them acting as one. Consequently, there is no implied immunity that the Court could then extend to a group of horsemen's groups, such as THG. If the IHA granted express immunity to horsemen's groups, then the logic of *Sunkist* and *Ore-Ida* might well extend to a group of groups. But, the IHA does not provide for express immunity and there is still no individual implied immunity here. Thus, neither could be extended. [22]

[*886] D.

HN15[] All of the circumstances where courts have found implied immunity present clear potential for conflict between the antitrust laws and the subsequent law. Mere incompatibility, as opposed to clear repugnancy, seems insufficient to find implied immunity. Immunity is only appropriate where the legislature's subsequent legislation would be so contradictory to antitrust legislation, or where attempting to follow both sets of legislation would be so **[**41]** confusing, that the legislature must have intended to repeal the antitrust laws in certain circumstances despite having failed to explicitly say so. *Credit Suisse, 127 S. Ct. at 2392*.

The facts and statute at hand fall outside such circumstances. The Court finds no such clear repugnancy between the IHA and the antitrust laws here. Although Defendants may later show that imposing the antitrust laws would disrupt the intended enactment of the IHA, this is not apparent as a matter of law at this time. Though Congress clearly intended that a horsemen's group at a racetrack could exercise the statutory veto, it expressed nothing else. The Court does not find the language to imply a broader authorization or immunization for groups to act in concert.

[21] Although the Western District of Pennsylvania concluded that some horsemen actions may be antitrust violations, its logic does not extend to this case.

[22] Defendants cite to a decision of Judge Charles Simpson of this district in which he found in open court that the IHA confers implied immunity from antitrust regulation. TRO Hr'g Tr., 69:16 to 69:21, Choctaw Racing Srvs., LLC v. Ky. Horsemen's Benevolent and Protective Ass'n, Inc., No. 07-237 (W.D. Ky. May 3, 2007) (citing *JES Properties v. U.S.A. Equestrian, 458 F.3d 1224 (11th Cir. 2006))*. The activity at issue in *Choctaw* was **[**39]** whether an individual horsemen's group's use of its veto with regard to a single OTB violated the antitrust laws. Compl. PP 2-3, 33, Choctaw Racing Srvs., LLC v. Ky. Horsemen's Benevolent and Protective Ass'n, Inc., No. 07-237 (W.D. Ky. May 5, 2007). Judge Simpson concluded that in that circumstance there was clear repugnancy between the IHA and anti-trust laws. TRO Hr'g Tr., 67:6 to 67:7. The implied repeal, he said, was the only way to ensure that the IHA's grant of the horsemen's veto to protect the entire sport of horseracing could work effectively. *Id.* 68:21 to 68:23, 69:7 to 69:11, 69: 16 to 69:2.

This Court agrees with the result in these circumstances, but not the analysis. For the reasons stated in the foregoing section, individual horsemen cannot be liable under the antitrust laws for exercising their IHA veto as part of an authorized group. Nor can an authorized group be liable for independently exercising its IHA veto right. Thus, neither an individual nor a group require immunity for their acts under the IHA. *See also, Hialeah, Inc. v. Fla. Horsemen's Benevolent & Protective Ass'n, 899 F.Supp. 616, 622 (S.D. Fla. 1995)* (holding the IHA provides no antitrust immunity).

Judge **[**40]** Simpson relied heavily on Congressional intent in reaching his conclusion. *Id.* 69:2 to 69:6. He cites to *Hialeah, 899 F.Supp. at 616* and *Saratoga Harness Racing v. Veneglia, 1997 U.S. Dist. LEXIS 3566, 1997 WL 135946 (N.D.N.Y. 1997)*. *Id.* 67:6 to 68:4. However, *Hialeah* makes a convincing case from the legislative history on the House bill, which stated the "legislation in no way modifies or affects the scope or application of antitrust laws," that the IHA does not provide immunity from antitrust liability. *Hialeah, 899 F. Supp. at 621*. *Saratoga* questions that conclusion. But, the Senate did not make any mention of antitrust concerns and this Court is not persuaded that Congress expressed any intent to apply or repeal the antitrust laws through its enactment of the IHA.

To so find, would require finding that Congress has so regulated the field that its intent to repeal the antitrust laws is implicit. *Credit Suisse, 127 S.Ct. at 2389*. This does not appear to be true.

V.

Defendants next argue that Plaintiffs' Sherman Act § 1 claim should be dismissed because it fails to state a claim for relief under *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* [hereinafter *Twombly*]. In *Twombly,* the Supreme **[**42]** Court clarified the *Rule 8(a)(2)* pleading standard by holding that the ***HN16***[] antitrust complaint must "nudge[] [the] claim[] across the line from conceivable to plausible." *Id., 127 S. Ct. at 1974*. *Twombly* requires that "a plaintiff's allegations, [while] 'assumed to be true, must do more than create speculation or suspicion of a legally cognizable cause of action; they must show entitlement to relief.'" *League of United Latin Am. Citizens v. Bredesen, 500 F.3d 523, 527 (6th Cir. 2007)*. *Twombly* established that antitrust complaints are held to a "plausibility standard," which requires Plaintiffs plead "enough facts to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Id. at 1965*. [23]

[*887] Under *Twombly,* ***HN17***[] pleading a § 1 violation cannot merely recite the elements of the cause of action, one must provide facts that support them. *Twombly, 127 S. Ct. at 1965*. Those factual allegations, however, need not be detailed to survive a motion to dismiss. *Id. at 1964*. "[E]ither direct or inferential allegations respecting all the material elements to sustain recovery under some viable legal theory" is sufficient. *Bredesen, 500 F.3d at 527* (citing *Twombly, 127 S. Ct. at 1969*). A bare assertion of a conspiracy, however, is insufficient. *Twombly, 127 S. Ct. at 1966*. The facts must give rise to a plausible finding of an agreement that unreasonably restrains trade.

The parties' *Twombly* arguments center on whether Plaintiffs have alleged an actual violation. The Court's analysis as to the existence of an antitrust cause of action is limited to only a determination that such a finding is plausible. Certainly if the complaint supports a finding of a *per se* violation such a finding would be plausible. If the complaint does not provide facts supporting a *per se* violation, the complaint must **[**45]** only provide sufficient facts to make finding a violation under a rule of reason analysis plausible. Full analysis under the rule of reason would not be appropriate at this time given the fact intensive nature of that analysis. The Court will proceed with its analysis under *Twombly* by assessing whether Plaintiffs have pleaded facts that support the elements of an antitrust violation.

A.

Plaintiffs' theory of violation is that Defendants are engaged in a group boycott for the purpose of price-fixing. The pleaded theory is a *per se* violation of antitrust laws because it has such "'predictable and pernicious anticompetitive effect[s], and such limited potential for procompetitive benefit,' that it is conclusively presumed to be

---

[23] Since *Twombly* expressly disavowed the previous pleading standard set forth in *Conley v. Gibson* courts have wrestled with its appropriate application. The Sixth Circuit has only addressed the issue of *Twombly's* pleading standard and antitrust litigation in a handful of decisions. Those decisions do not suggest a departure from the concept of notice pleading, but instead suggest that *Twombly* is best read as clarifying notice pleading. *See e.g., Bassett v. Nat'l Collegiate Athletic Ass'n, 528 F.3d 426, 430 (6th Cir. 2008)* **[**43]** (stating *Twombly* does not require heightened fact pleading); *Ferron v. Zoomego, Inc., 276 Fed. Appx. 473, 2008 WL 1988587, *2 (6th Cir. 2008)*; *Mich. Div.-Monument Builders of North America v. Mich. Cemetery Assoc., 524 F.3d 726, 731 (6th Cir. 2008)*. The Second Circuit agrees that *Twombly's* plausibility standard does not significantly alter notice pleading. *Weisbarth v. Geauga Park Dist., 499 F.3d 538, 542 (6th Cir. 2007)* (citing *Iqbal v. Hasty, 490 F.3d 143, 157-58 (2d Cir. 2007))*. Although the Sixth Circuit has not given such an explicit analysis, at least two Sixth Circuit judges have explicitly stated such an understanding in dissents. Judge Martin has stated "the key distinction is between a bare-bones complaint asserting only the elements of a claim and a complaint asserting not only legal elements, but also facts to support those elements." *NicSand, 507 F.3d at 460* (Martin, dissenting) (dismissed for lack of antitrust standing). Judge Clay similarly stated, "In other words, Twombly was a case where the plaintiff invoked a statute banning collusion, but failed to actually state any facts suggesting collusion." *Midwest Media Prop., L.L.C. v. Symmes Twp., Ohio, 503 F.3d 456, 472 n.3 (6th Cir. 2007)* **[**44]** (Clay, dissenting) (dismissed for lack of standing under redressability and the overbreadth doctrine).

unreasonable." *Bassett, 528 F.3d at 426*; *Expert Masonry, Inc. v. Boone County, KY, 440 F.3d 336, 342 (6th Cir. 2006)* (quoting *Bailey's, Inc. v. Windsor America, Inc., 948 F.2d 1018, 1027 (6th Cir. 1991))*.

Facts that make Plaintiffs' theory plausible, even though not conclusive, would meet the *Twombly* pleading standard. The question is only whether Plaintiff has pled sufficient facts to support finding price-fixing. ***HN18***[] Plaintiffs must allege three elements to sustain a § 1 cause **[**46]** of action: (1) the existence of a contract, combination, or conspiracy (2) affecting interstate commerce (3) that imposes an unreasonable **[*888]** restraint on trade. 54 Am. Jur. Monopolies and Restraints of Trade § 484; *see Cont'l Cablevison of Ohio, Inc. v. Am. Elec. Power Co., 715 F.2d 1115, 1118 (6th Cir. 1983)* (stating the essential elements plaintiffs must prove to sustain a § 1 claim); *see also Richter Concrete Corp. v. Hilltop Concrete Corp., 691 F.2d 818, 827 (6th Cir. 1982)*. Element one requires evidence of "the terms and membership of the conspiracy and the method adopted to effectuate its ends." 54 Am. Jur. Monopolies § 484. Element two requires Plaintiffs define the relevant product market and relevant geographic market. *See Mich. Div.-Monument Builders of N. America, 524 F.3d 726, 733 (6th Cir. 2008)* (quoting *Found. for Interior Design Educ. Research v. Savannah Coll. of Art & Design, 244 F.3d 521, 531 (6th Cir. 2001))*. Element three requires showing the agreement had an anticompetitive effect. *See Richter Concrete Corp., 691 F.2d at 827*. An anticompetitive effect can be shown using one of two analytical approaches: the *per se* rule and the rule of reason. *Nat'l Hockey League Players' Ass'n v. Plymouth Whalers Hockey Club, 325 F.3d 712, 718 (6th Cir. 2003)* **[**47]** (citing *Law v. Nat'l Collegiate Athletic Ass'n, 134 F.3d 1010, 1016 (10th Cir. 1998))*.

Plaintiffs have pled the following facts in support of their antitrust allegations. Ky HBPA allied with THG in November 2007, thereby entering into an agreement with horsemen's groups at 40 other racetracks. (Am. Compl. P P 63-64.) The views of the group are memorialized in a uniform Licensing Agreement that is attached to the complaint. (Am. Compl. P 65.) Once signed by an ADW, the Licensing Agreement would dictate minimum prices for ADWs purchasing signals. The presence of a tangible, and agreed upon, contract makes the existence of a combination or conspiracy amongst the horsemen plausible.

Plaintiffs define the relevant market as "the sale and licensing of the right to receive simulcast signals and to accept wagers on horse racing at locations other than the host racetrack." (Am. Compl. P 59.) The relevant geographic market is the entire United States. (Am. Compl. P 59.) These designations define where the buyers and sellers compete. As such, these allegations present sufficient facts to meet the plausibility standard for element two. Defendants strongly argue that this is the incorrect product **[**48]** market. For purposes of this motion, however, the Court accepts the market as pled. The Court does recognize Defendants' concerns as to whether Defendants actually participate in that market. The Court will discuss that question in Section VI of this Memorandum.

Plaintiffs' legal theory to support their claim of an antitrust violation is price-fixing effectuated by group boycotting. They assert that, as a part of the THG alliance, Ky HBPA "agreed to the terms of a uniform Horsemen's Simulcast Licensing Agreement" that "provides that horsemen's groups must receive one-third of the takeout arising from the sale of signals." (Am. Compl. P 65.) The Licensing Agreement requires any ADW to pay a minimum of 1/3 of the Takeout to any track horsemen's group that is a signatory THG member. In this way, the horsemen's groups have allied to require that minimum fee. These facts describe an agreement that plausibly sets a floor for the price of a signal. Such an agreement is plausibly construed as price-fixing.

Plaintiffs offer the Licensing Agreement and Defendants' contemporaneous use of their horsemen's veto as evidence of the perpetrating group boycott. Supporting facts include the KTA and Ky **[**49]** HBPA, as well as three other named horsemen's **[*889]** groups, appointing THG to negotiate with ADWs on their behalf and adopting a uniform agreement for signing by multiple horsemen's groups. This suggests concerted action beyond independent or mere parallel action since one single entity is performing each members' tasks in negotiations. They also assert that the Ky HBPA, the Pennsylvania HBPA, Florida HBPA, and the Texas Horsemen's Partnership have all stated in letters that they will not consent to the sale of the host track's signal unless the ADW has signed the Licensing Agreement. (Am. Compl. P 69.) The Florida HBPA's disagreement with Calder, its host track, has led other THG members [24] to revoke consent for their track to simulcast its signal to Calder. Plaintiffs further allege that "[t]he

---

[24] This includes the Delaware THA, Ky HBPA, **[**50]** Maryland THA, and Ohio HBPA. (Am. Compl. P 70.)

avowed goal of this concerted action by competing horsemen is to raise the prices paid to horsemen for signals." (Am. Compl. P 65.) These facts further illustrate a plausible finding of a group boycott to raise prices, which shows an anticompetitve effect. All three elements of a § 1 violation claim are plausibly supported by facts alleged in the complaint.

B.

For the individual defendants Hiles and Maline, ***HN19***[] Plaintiffs must show that the "corporate agents are actively and knowingly engaged in a scheme designed to achieve anticompetitive ends." *Brown v. Donco Enters., Inc., 783 F.2d 644, 646 (6th Cir. 1986)*. The Amended Complaint fails to provide facts that would support the plausibility of this claim. It identifies Hiles as the President of the Ky HBPA, and Maline as the Executive Director of the Ky HBPA. Beyond this mere identification of the defendants' roles in the organizations, it provides no facts that suggest the role these individuals played in the decision making process. Plaintiffs assert in conclusory language that these individual defendants "made a conscious commitment to the scheme to raise prices by directing the Kentucky HBPA and the KTA to appoint the THG as agent, and by requiring the Kentucky HBPA and the KTA to join the boycott of ADW operators." (Am. Compl. P 79.) Plaintiffs provide no facts that support the required elements that the agents be "actively and knowingly" engaged in the scheme. As such, Plaintiffs failed to plead in such a way as to create more than mere speculation **[**51]** of the individuals' involvement in the alleged conspiracy. [25]

Embedded in Defendants' *Twombly* arguments is a more fundamental question of whether the Amended Complaint actually alleges an antitrust cause of action. The proceeding factual basis supports finding that Plaintiffs have alleged a plausible conspiracy against the horsemen's groups in a relevant market for the purpose of price-fixing. The Court will separately address whether these facts, if true, may give rise to an antitrust violation.

VI.

Both parties argue about whether these facts amount to an antitrust violation under either a *per se* or a rule of reason analysis. Defendants' arguments question the viability of Plaintiffs' underlying claim. Defendants argue that the facts, as presented in the complaint, cannot constitute **[*890]** a group boycott for the purpose price-fixing and thus Plaintiffs fail to assert either a *per se* or rule of reason violation. Based upon **[**52]** its current understanding of this antitrust claim, the Court has concluded that the facts as pled do support its plausibility.

HN20[] The *per se* rule applies to "practices [that] by their nature have 'a substantial potential for impact on competition.'" *F.T.C. v. Super. Ct. Trial Lawyers Ass'n, 493 U.S. 411, 433, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)*. Once the Court determines that "a practice is illegal *per se,*" it does not have to further examine "the practice's impact on the market or the procompetitive justifications for the practice" to find a violation. *Expert Masonry, 440 F.3d at 342*. As such, a *per se* violation only requires Plaintiffs prove three things:

> (1) two or more entities engaged in a conspiracy, combination, or contract, *Guzowski v. Hartman, 969 F.2d 211, 214 (6th Cir.1992)*, (2) to effect a restraint or combination prohibited per se (wherein the anticompetitive effects within a relevant geographic and product market are implied), *Dunn & Mavis, Inc. v. Nu-Car Driveaway, Inc., 691 F.2d 241, 245 (6th Cir.1982)*, (3) that was the proximate cause of the plaintiff's antitrust injury, *Hodges v. WSM, Inc., 26 F.3d 36, 38 (6th Cir.1994)*.

Expert Masonry, 440 F.3d at 342. Plaintiffs do not have to show power, intent or **[**53]** impact. *Id.* (quoting *Stop & Shop Supermarket Co. v. Blue Cross & Shield of R.I., 373 F.3d 57, 61 (1st Cir. 2004))*. The presumption, however, is against *per se* violations. *Expert Masonry, 440 F.3d at 343*.

---

[25] The Court need not address Defendants' motion to dismiss on the grounds that Hiles and Maline are immune from antitrust liability under the Volunteer Protection Act since those defendants have been dismissed, pursuant to *12(b)(6)* and *Twombly,* for failure to state a claim.

HN21[] Horizontal agreements, as alleged here, "involve direct competitors at a given level of the market … [and] are viewed as especially injurious, and courts therefore bar them *per se,* regardless of any alleged ameliorative rationale." *Id. at 344*. Examples include price-fixing and group boycotts. *Id.* Commercially motivated group boycotts are *per se* violations because "the likelihood of anticompetitive effects is clear and the possibility of countervailing procompetitive effects is remote." *Nw. Wholesale Stationers, Inc. v. Pac. Stationery and Printing Co., 472 U.S. 284, 294, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (U.S. 1985)*. Such boycotts are "designed to 'pressure' another party into doing something by 'withholding, or enlisting others to withhold, patronage or services from the target.'" WILLIAM C. HOLMES, ***ANTITRUST LAW*** HANDBOOK § 2:16 Group boycotts-In general (quoting *St. Paul Fire & Marine Ins. Co. v. Barry, 438 U.S. 531, 541-43, 98 S. Ct. 2923, 57 L. Ed. 2d 932 (1978))*. Evidence of a group boycott used to effectuate a price-fixing arrangement is sufficient **[**54]** to support a *per se* violation. *See Super. Ct. Trial Lawyers Ass'n, 493 U.S. at 436 n.19*; *see also* HOLMES § 2:16.

HN22[] The rule of reason analysis "permits case-by-case evaluation of [the restraint's] effect on competition." *Expert Masonry, 440 F.3d at 342* (quoting *Bailey's, Inc. v. Windsor Am., Inc., 948 F.2d 1018, 1027 (6th Cir. 1991))*. The prima facie case under the rule of reason requires facts sufficient to prove:

> 1) that the antitrust defendant contracted, combined, or conspired; (2) that the combination or conspiracy produced adverse anticompetitive effects (3) within relevant product and geographical markets; (4) that the objects of and conduct pursuant to that contract or conspiracy were illegal; and (5) that the plaintiff was injured as a proximate result of that conspiracy.

Int'l Logistics Group, Ltd. v. Chrysler Corp., 884 F.2d 904, 907 (6th Cir. 1989). **[*891]** The defendant then has the burden "to 'come forward with evidence of the restraint's procompetitive effects to establish that the alleged conduct justifies the otherwise anticompetitive injuries.'" *Expert Masonry, 440 F.3d at 343* (citing *Nat'l Hockey League Players' Ass'n, 325 F.3d at 718*). Then, the plaintiff "must show that any **[**55]** legitimate objectives can be achieved in a substantially less restrictive manner." *Id. at 343* (citing *Nat'l Hockey League Players' Ass'n, 325 F.3d at 718*).

Although the Court does not conclude whether the actions at issue are definitely a *per se* violation, the Court will discuss it. [26] Defendants' primary contention is that the horsemen's groups are not direct competitors at a given level of the market, and thus cannot be price-fixing. The complaint identifies the given market as the market for the sale of signals. The "signal" is the common term to describe what the ADW receives, which is the ability to accept wagers on races at tracks in other states. As part of the package Churchill provides video footage of the races; however, that is not exactly the product at issue in this case. The visual images are ancillary to that core product of off-track betting under the IHA legislative scheme. [27]

Given the market as pled, the question remains whether the horsemen's groups participate in the market for the right to accept wagers on off-track races, "the signal." At this point, it appears that they may do so. The tracks clearly compete with one another to get the best deal from an ADW. The IHA makes the horsemen's groups and the tracks joint sellers of the right. Though neither party independently owns the right to allow ADWs or OTBs to accept wagers on the race, the horsemen's groups do hold that property right jointly with the track. Though the horsemen's groups are not selling the end product, their actions may still fix or increase the price of that product in a way that restrains commerce. Such an arrangement, if true, seems **[**57]** to indicate that the horsemen's groups do participate as competitors in the market for signals.

---

[26] The Court focuses on the *per se* analysis at this time given the pleadings and the Court's *Twombly* analysis. Since a boycott for the purpose of price-fixing has consistently been held as a *per se* illegal horizontal agreement, the Court only addresses the viability of that contention. If it proves **[**56]** unviable, the Court may perform a rule of reason analysis following discovery.

[27] If Plaintiffs had pled a market for consent only, no anti-trust violation could exist. Since each horsemen's group can only give consent to their track, there is no market for consents. The horsemen's groups are not competitors in regards to giving their consent to the track because the horsemen's groups cannot offer their consent to different tracks for a different price.

The Licensing Agreement pressures the ADWs, as the target of the boycott, to pay a minimum price for any signal it receives from tracks with THG member local horsemen's groups. The THG member groups are collectively threatening all ADWs that they must contract with THG horsemen's groups according to a certain set of terms. The ultimate result is that if the ADW does not assent to the Licensing Agreement, it is precluded from purchasing a signal from any track whose local horsemen's group participates in the THG scheme. Again, if true, this arrangement seems synonymous with previously identified *per se* violations.

There are many facts and economic relations as yet unknown that could influence this case. Plaintiffs' theory of an antitrust violation and injury may be quite difficult to establish in fact. Additional evidence may show that Plaintiffs are unable to **[*892]** support their allegations under either analytical approach: *per se* or rule of reason. At that time, the Court may more appropriately assess whether a violation has actually occurred.

VII.

Ky HBPA has also moved for dismissal of Count II **[**58]** of the Amended Complaint, which alleges breach of both (1) the contract's anti-assignment provision [28] and (2) its exclusive representation provision. As a basis for the breach, the Amended Complaint cites the appointment of THG to negotiate a License Fee for the horsemen's groups with the ADWs. It says that appointing THG as an agent "directly conflicts" with the horsemen's groups' obligation to serve as exclusive representative for purposes of the IHA. For the following reasons, the Court finds no grounds for a breach of contract claim.

The exclusive representation provision reads: "with respect to the matters set forth herein during the Term of this Agreement, the Ky HBPA shall be the exclusive representative of its members." ***HN23***[] The Court will strictly enforce the terms of an unambiguous contract. *Frear v. P.T.A. Indus., Inc., 103 S.W.3d 99, 106 (Ky. 2003)*. Where a contract is susceptible to inconsistent interpretations, an ambiguity exists. *Transp. Ins. Co. v. Ford, 886 S.W.2d 901, 905 (Ky. App. 1994)*. **[**59]** The Court interprets the provision according to the intention of the parties as demonstrated by "the language used, the subject matter, and the purpose of the contract." *D.L Walker & Co. v. Lewis, 267 Ky. 107, 101 S.W.2d 685, 687 (Ky. App. 1937)*. The parties agree that the exclusive representation provision does not prohibit the horsemen's group from appointing an agent to negotiate on its behalf. The Court's analysis must proceed by determining the nature of the relationship at issue and its relation to the contract terms.

The Court interprets the exclusive representation language in light of the contract's purpose. The focus of the contract is revenue distribution according to the purpose and terms of the IHA. As such the IHA impacts the scope and effect of the provision. ***HN24***[] The IHA defines horsemen's group in relation to a particular racetrack. *15 U.S.C. § 3002 (12)*. As such, the IHA requires the local horsemen's group consent to any off-track betting. *15 U.S.C. § 3004*. The contract provision provides that the local horsemen's group must be the exclusive representative of the horsemen for the purpose of consenting.

The crux of the analysis is determining whether THG's actions constitute only an agency **[**60]** relationship. Both parties agree that the local horsemen's groups can appoint an agent to advise, consult, or represent the groups during negotiations. ***HN25***[] "Agency is the fiduciary relation which results from the manifestation of consent by one person to another that the other shall act on his behalf and subject to his control, and consent by the other so to act." *McAlister v. Whitford, 365 S.W.2d 317, 319 (Ky. 1962)*. In an agency relationship, the principal retains control. *Louisville Ry. Co. v. Louisville Area Transp. Workers Union, 312 Ky. 656, 228 S.W.2d 652, 654 (1950)*.

Plaintiffs' own allegation asserts that the Ky HBPA breached the contract by appointing "the THG to act as their ***agent*** to negotiate a license fee for the sale of Churchill Downs' signals to ADWs." (Am. Compl. P 89.) (emphasis added). Not only **[*893]** do the Plaintiffs identify the relationship as an agency relationship, but the allegations support such a finding. THG is carrying out Ky HBPA's, the principal, interests. The local horsemen's groups have

---

[28] Plaintiffs concede Defendants have not violated the anti-assignment provision by their own admission in their response brief. The Court will therefore dismiss any claim for breach of the anti-assignment contract provision.

asserted the horsemen's veto themselves, THG has not exercised the veto on Ky HBPA's behalf. THG has no authority to decide when Ky HBPA may enter into a contract over interstate off-track **[**61]** wagering rights or when to consent to the sale of Churchill's interstate simulcast signal - and the complaint never alleges facts to the contrary. Any participation THG has in the negotiation process is in an agency capacity on behalf of the principal in furtherance of its specified interests. Further, THG's negotiations for a License Fee are between it and the ADWs themselves. Such negotiations seem outside the purview of the contracts' provisions. Even if the contract extends to such negotiations, THG remains in its agent role. Therefore, the exclusive representation provision is not violated because Ky HBPA has only appointed an agent to participate in the negotiations.

The Court will enter an order consistent with this Memorandum Opinion.

John G. Heyburn II, Judge

United States District Court

ORDER

Defendants have moved to dismiss almost every aspect of Plaintiffs' complaint on various grounds. The Court has issued a Memorandum Opinion addressing each issue Being otherwise sufficiently advised,

IT IS HEREBY ORDERED that Defendants' motions to dismiss the antitrust claims for lack of standing and due to antitrust immunity is DENIED as to all Plaintiffs.

IT IS FURTHER ORDERED that Defendants' motion to dismiss the antitrust claims for failure to satisfy *Twombly* is SUSTAINED as to Plaintiffs' claim against the individual Defendants Maline and Hiles and these Defendants are DISMISSED WITH PREJUDICE. The motion is DENIED regarding the remaining Defendants.

IT IS FURTHER ORDERED that Defendants' motion to dismiss for failure to state a claim for breach of contract is SUSTAINED and therefore the breach of contract claim is DISMISSED WITH PREJUDICE.

This is not a final order.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

A defendant may move to dismiss a claim for failure to state a claim upon which relief can be granted under *Fed. R. Civ. P. 12(b)(6)*. The purpose of a motion to dismiss under R. 12(b)(6) is to test the legal sufficiency of the complaint. When considering a R. 12(b)(6) motion, the factual allegations of a complaint are assumed true and are construed in favor of the plaintiff. To avoid dismissal for failure to state a claim, the complaint must contain a short and plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)(2)*. Although specific facts are not necessary, the plaintiff must allege facts sufficient to give fair notice of what the claim is and the grounds upon which it rests. A complaint should not be dismissed merely because the court doubts that a plaintiff will be able to prove all the necessary allegations. The issue is not whether the plaintiff will ultimately prevail, but whether she is entitled to present evidence to support her claims.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN2[] **Sherman Act, Claims**

To prove a violation of § 1 of the Sherman Antitrust Act, a plaintiff must show an agreement in the form of a contract, combination, or conspiracy that imposes an unreasonable restraint on trade. The elements of a § 1 of the Sherman Antitrust Act case are: (1) an agreement or conspiracy among two or more entities; (2) with the intent to unreasonably restrain competition; (3) which causes injury to competition. The entities must be legally distinct economic entities. The unreasonableness of a restraint is determined using either a per se standard or a standard that examines all of the circumstances, the so-called rule of reason. Examples of restraints that violate the per se standard include price-fixing, tying arrangements, and group boycotts. Most agreements are evaluated under the rule of reason, a standard that asks whether a contract unreasonably restrains trade in a relevant product or geographic market. Ultimately, the goal is to determine whether restrictions in an agreement among competitors potentially harm consumers.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN3[] **Sherman Act, Scope**

Courts have, on occasion, found certain no-hire agreements to violate or potentially violate antitrust laws.

Labor & Employment Law > Employment Relationships > Independent Contractors

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN4[] **Employment Relationships, Independent Contractors**

Where an agreement's intended purpose is not to constrain competition between an employer and a client, but to constrain competition between the employer and one of its workers--the employer seeks to prevent its own employees from choosing to work for its clients directly--that is not a "no-hire" agreement, it's a "noncompete" agreement--a common feature of countless independent contractor relationships in any number of industries. To the extent that the agreement constrains competition, it does so only to protect the employer's legitimate business interests.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN5[] **Sherman Act, Scope**

Although the text of the Sherman Antitrust Act declares every restraint on trade to be illegal, it cannot mean what it says because, to read it literally, would outlaw the entire body of private contract law.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN6[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Legitimate reasons exist to uphold noncompete covenants, even though by nature they necessarily restrain trade to some degree. The recognized benefits of reasonably enforced noncompetition covenants are now beyond question. The argument that noncompete agreements should be a per se antitrust violation is both bizarre and frivolous. An agreement that precludes two potential employers from competing for the services of a discrete group of employees can best be characterized as a covenant not to compete.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN7[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Where an agreement is properly analyzed under the antitrust rule of reason, the next step is to determine whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN8[] **Sherman Act, Claims**

Applying the rule of reason, the United States Court of Appeals for the Eleventh Circuit has held that a plaintiff failed as a matter of law to state an antitrust violation under §§ 1, 2, of the Sherman Antitrust Act arising from contracts between a supplier of temporary technical workers and the supplier's customers and between the supplier and its workers, which specified that neither the client nor the supplier would hire one another's employees and that the workers would not accept employment, directly or indirectly, with a client for 90 days after they finished working for that client. The court noted that the restrictive covenants impacted two sets of parties--the workers and the clients--but held that they did not have an adverse impact on competition of the type that violates the Sherman Antitrust Act. Rather, the covenants merely imposed contractual obligations that could be freely negotiated by all parties.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN9[] **Trade Secrets & Unfair Competition, Noncompetition & Nondisclosure Agreements**

Where an entity is not in the business of unilaterally barring its employees from seeking work, but merely sets a price at which it is willing to relinquish its right to its own employees' services, and a client is free to hire away any of the entity's employee, provided it does so on a full-time basis or pays the entity agreed-upon rates, this is a perfectly legitimate way for the entity to protect its business interests.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN10[] **Sherman Act, Scope**

The antitrust laws are not designed to redress an "informational" injury to a single plaintiff. They are designed to redress the injuries of consumers when an entire market is unlawfully constrained.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN11[] **Antitrust & Trade Law, Sherman Act**

Claims under the antitrust laws of Missouri and Florida necessarily fail when a plaintiff cannot maintain a federal antitrust action. The Missouri ***antitrust law*** expressly directs that its provisions shall be construed in harmony with ruling judicial interpretations of comparable federal antitrust statutes. *Mo. Rev. Stat. § 416.141*. The Florida statute similarly contains a provision stating that any activity or conduct exempt from the provisions of the antitrust laws of the United States is exempt from the provisions of Florida's ***antitrust law***. *Fla. Stat. § 542.20*. When a defendant is exempt from antitrust liability under federal law, a plaintiff's Florida antitrust claims must similarly fail.

For Verimed Healthcare Network, LLC, Defendant: James R. Wyrsch, LEAD ATTORNEY, Arindam Kar, Mark B. Leadlove, BRYAN CAVE LLP, St. Louis, MO.

Judges: CATHERINE D. PERRY, UNITED STATES DISTRICT JUDGE.

Opinion by: CATHERINE D. PERRY

Opinion

[*1134] **MEMORANDUM AND ORDER**

Plaintiff Cynthia Haines is a medical doctor who worked as an independent contractor for defendant VeriMed, writing and editing articles that VeriMed then sold to companies that run medical websites. Haines asserts antitrust and tort law claims against VeriMed, alleging that VeriMed unlawfully constrained Haines' employment opportunities by entering into no-hire agreements with VeriMed's clients. VeriMed has moved to dismiss Haines' complaint. Because I conclude that the injury Haines asserts is not of the type that the antitrust laws were designed to remedy, I will grant VeriMed's motion to dismiss Haines' antitrust claims. I will, however, deny VeriMed's motion with respect to Haines' tort claims.

Background Facts

The following facts are asserted in plaintiff's Second Amended Complaint. Dr. Cynthia Haines is a medical doctor and president of Haines Medical **[**2]** Communications, Inc. Working as an independent contractor, Haines supplies and reviews written content for publication on medical websites. Haines began her business in 2004 by initially supplying articles to the website WebMD. Since that time Haines has expanded her business, working for several other websites.

In 2006, Haines entered into a relationship with defendant VeriMed Healthcare Network. Unlike websites like WebMD, VeriMed does not directly provide medical information to the public. Rather, VeriMed acts as a "middleman" in the medical consulting business. VeriMed hires independent contractors like Haines to produce certain content, and then sells that content to websites that have a need for it. Haines was told she was under "no obligation" **[*1135]** when working for VeriMed, and was always free to work on projects of her choice. Under this arrangement, Haines reviewed ten urology articles for VeriMed at a rate of $ 15.00 each.

Around this same time, Haines also developed a relationship with another web content provider, The HealthCentral Network (THCN). THCN owns and operates a collection of websites, including 32 condition-specific websites with more than 11 million monthly visitors **[**3]** and 60 million page views. Haines agreed to provide certain material to THCN for a price that was significantly more than the $ 150.00 she received from VeriMed.

Unbeknownst to Haines, however, in addition to THCN being a client of Haines' independent consulting business, THCN was also a client of VeriMed. In fact, it was THCN that had requested VeriMed to produce the urology articles. In other words, Haines was working for VeriMed and THCN separately, but she did not know that the content she produced for VeriMed was actually being supplied to THCN.

THCN and VeriMed had a contractual relationship that was designed to prevent this type of scenario. When THCN agreed to purchase website content from VeriMed, THCN also agreed that it would not "go around" VeriMed and hire any of VeriMed's current or former independent contractors. Specifically, the contract language stated:

> [THCN] will not be able to utilize the services of any present or former VeriMed member that had previously provided services to [THCN], unless such member joins [THCN] in a full-time capacity, without paying VeriMed the agreed upon rates in the corresponding Statement of Work. The following paragraphs shall survive the **[**4]** termination of this Agreement: . . . (Solicitation).

The paragraph headed "Solicitation" then went on to state:

> Solicitation of Personnel. During the term of this Agreement and for one (1) year afterward, neither party shall recruit or solicit for employment any current or former employee or Author of the other.

When THCN learned that Haines was an independent contractor working for VeriMed, THCN terminated its relationship with Haines and told Haines that it would no longer employ her to provide content to THCN directly.

Haines alleges that the agreement between THCN and VeriMed is an unlawful restraint on trade that violates the Sherman Antitrust Act, as well as Missouri and Florida state antitrust laws. In addition, Haines asserts state law claims of fraudulent misrepresentation, fraudulent concealment, and appropriation of name. VeriMed has moved to dismiss each count of the complaint under various theories. [1]

Discussion

HN1[] A defendant **[**5]** may move to dismiss a claim "for failure to state a claim upon which relief can be granted" under *Fed. R. Civ. P. 12(b)(6)*. The purpose of a motion to dismiss under *Rule 12(b)(6)* is to test the legal sufficiency of the complaint. When considering a 12(b)(6) motion, the factual allegations of a complaint are assumed true and are construed in favor of the plaintiff. *Neitzke v. Williams, 490 U.S. 319, 326, 109 S. Ct. 1827,*

[1] Haines moved to amend her complaint after VeriMed filed its motion to dismiss. For reasons discussed during oral argument, I will grant Haines' motion to amend the complaint and will treat VeriMed's motion as though it relates to the newly amended pleading.

104 L. Ed. 2d 338 (1989). To avoid dismissal for failure to state a claim, the complaint must contain "a short and plain statement of the claim showing that the pleader is entitled **[*1136]** to relief." Rule 8(a)(2), Fed. R. Civ. P.; Bell Atlantic v. Twombly 550 U.S. 544, 127 S. Ct. 1955, 1966, 167 L. Ed. 2d 929 (2007). Although specific facts are not necessary, the plaintiff must allege facts sufficient to give fair notice of what the claim is and the grounds upon which it rests. Erickson v. Pardus, 551 U.S. 89, 127 S.Ct. 2197, 2200, 167 L. Ed. 2d 1081 (2007).

A complaint should not be dismissed merely because the court doubts that a plaintiff will be able to prove all the necessary allegations. Parnes v. Gateway 2000, Inc., 122 F.3d 539, 546 (8th Cir. 1997). The issue is not whether the plaintiff will ultimately prevail but whether she is entitled **[**6]** to present evidence to support her claims. Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S. Ct. 1683, 40 L. Ed. 2d 90 (1974).

A. Federal Antitrust Claims

HN2[] To prove a violation of Section 1 of the Sherman Antitrust Act, "a plaintiff must show an agreement in the form of a contract, combination, or conspiracy that imposes an unreasonable restraint on trade." Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1058 (8th Cir. 2000). Accord Double D Spotting Serv., Inc. v. Supervalu, Inc., 136 F.3d 554, 558 (8th Cir. 1998). *See also* Masimo Corp. v. Tyco Health Care Group, L.P., 2006 WL 1236666, *3 (C.D. Cal.2006) ("The elements of a Section 1 case are: (1) an agreement or conspiracy among two or more entities; (2) with the intent to unreasonably restrain competition; (3) which causes injury to competition."). The entities must be legally distinct economic entities. Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 95-96 (2nd Cir. 1998).

"The unreasonableness of a restraint is determined using either a per se standard or a standard that examines all of the circumstances, the so-called rule of reason." Concord Boat, 207 F.3d at 1058. Examples of restraints that violate the per se standard include price fixing, tying arrangements, **[**7]** and group boycotts. *Id.;* Double D Spotting Serv., Inc., 136 F.3d at 558. "Most agreements are evaluated under the 'rule of reason,' a standard that asks whether the contract unreasonably restrains trade in a relevant product or geographic market." Minnesota Ass'n of Nurse Anesthetists v. Unity Hosp., 208 F.3d 655, 659 (8th Cir. 2000). "Ultimately, the goal is to determine whether restrictions in an agreement among competitors potentially harm consumers." Virgin Atlantic Airways Ltd. v. British Airways PLC, 69 F. Supp. 2d 571, 582 (S.D.N.Y. 1999).

Haines argues that the agreement in place between VeriMed and THCN ought to constitute a per se violation of the Sherman Antitrust Act, or in the alternative, should be declared unlawful under the rule of reason. According to Haines, defendant's agreement with THCN unfairly restrains the market for contract employees like Haines who provide content to medical websites. Haines styles the arrangement between VeriMed and THCN as an unlawful "no-hire" agreement. That is to say, the two companies conspired to keep employment costs to a minimum by agreeing not to hire away one another's employees. Once VeriMed secured Haines as an independent contractor, **[**8]** it actively worked to prevent any other company from competing for the services Haines offered.

Haines correctly notes that **HN3**[] courts have on occasion found certain no-hire agreements to violate or potentially violate antitrust laws. *See* Roman v. Cessna Aircraft Co., 55 F.3d 542, 545 (10th Cir. 1995) (Plaintiff alleging that two airplane manufacturers conspired to restrain trade by agreeing not to hire one another's workers had adequately pleaded a violation of the Sherman Act.); Weisfeld v. Sun Chemical **[*1137]** Corp., 210 F.R.D. 136, 138 (D.N.J. 2002) (denying certification of a class action but discussing the antitrust implications of a no-hire agreement between competing companies). Haines' argument ultimately fails however, because the agreement to which Haines was subject was not a "no-hire" agreement of the type antitrust laws seek to prohibit.

In some limited sense, Haines is correct that "competition" between VeriMed and THCN for Haines' services was constrained. But Haines was working *for* VeriMed. **HN4**[] The agreement's intended purpose was not to constrain competition between VeriMed and THCN, but to constrain competition between VeriMed and Haines herself. VeriMed sought to prevent its own **[**9]** employees from choosing to work for VeriMed's clients directly. This is not a "no-hire" agreement; it's a "non-compete" agreement -- a common feature of countless independent contractor relationships in any number of industries. [2] To the extent that the agreement between VeriMed and THCN constrains competition, it does so only to protect VeriMed's legitimate business interests. *See* *National Society of Professional Engineers v. United States, 435 U.S. 679, 687-88, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)* (noting that ***HN5***[] although the text of the Sherman Act declares "every" restraint on trade to be "illegal," the Act "cannot mean what it says" because to read it literally "would outlaw the entire body of private contract law").

Haines' argument that this non-compete agreement should form the basis for a new per se violation of antitrust laws is completely without merit. ***HN6***[] "Legitimate reasons **[**10]** exist to uphold noncompete covenants even though by nature they necessarily restrain trade to some degree. The recognized benefits of reasonably enforced noncompetition covenants are now beyond question." *Lektro-Vend Corp. v. The Vendo Co., 660 F.2d 255, 265 (7th Cir. 1982)*. *See also* *Consultants & Designers, Inc. v. Butler Serv. Group, 720 F.2d 1553, 1560 (11th Cir. 1983)* (calling the argument that non-compete agreements should be a per se antitrust violation "both bizarre and frivolous"); *Cesnik v. Chrysler Corp., 490 F. Supp. 859, 868 (D.C. Tenn. 1980)* (recognizing that an agreement "precluding two potential employers from competing for the services of a discrete group of employees . . . can best be characterized as a covenant not to compete").

Given that the ***HN7***[] agreement is properly analyzed under the rule of reason, the next step is to determine "whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *Craftsmen Limousine, Inc. v. Ford Motor Co., 491 F.3d 380, 387 (8th Cir. 2007)* **[**11]** (quoting *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199(1997)*.

Haines' complaint fails to establish an antitrust violation under any of these considerations. The non-compete is limited in specific ways that narrowly tailor the agreement so as to protect VeriMed's legitimate business interests. Market participants are not precluded from all independent contracting work. Contractors such as Haines remain free to publish as much material as they wish on the Internet. They are merely restrained from **[*1138]** selling that material to VeriMed's clients, unless those clients choose to hire the contractors as full-time employees. The very nature of the independent contractor writing and publishing business is such that this type of agreement cannot have a market-wide impact. [3]

Haines' case is very similar to that of the plaintiffs in *Consultants & Designers, Inc. v. Butler Service Group, 720 F.2d 1553 (11th Cir. 1983)*. In that case, Butler, a technical services firm, recruited "job shoppers" who worked in fields such as engineering, designing, drafting and data processing. Butler then sent the job shoppers out to serve the needs of Butler's clients -- technical businesses that had a need for short-term highly skilled technical workers. *Id. at 1555*. Butler's contracts with its clients specified that neither the client nor Butler would hire one another's **[**13]** employees. Additionally, Butler's job shoppers agreed that they would not accept employment directly or indirectly by a Butler client for a period of 90 days following the completion of an assignment. *Id. at 1556*.

---

[2] At oral argument the Court noted that Haines' case is seemingly indistinguishable from, for example, that of a home healthcare worker who works for an agency. Such a worker is not allowed to go around the agency and provide services to clients directly. Haines' relationship with VeriMed is functionally equivalent to this type of situation.

[3] VeriMed further argues in its motion to dismiss that Haines' antitrust claims must fail because Haines is unable as a matter of law to define a relevant geographic market for her employment services. Under proper rule of reason analysis, a court must make "an inquiry into market power and market structure to assess the actual effect of the restraint." *Double D, 136 F.3d at 560* (quoting *Copperweld Corp v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. **[**12]** Here, the market exists over the Internet and is, by definition, worldwide. In theory, any person anywhere is capable of providing to VeriMed or THCN the type of website content that these companies seek. Moreover, individual actors are always free to publish on the Internet by themselves. Therefore, argues VeriMed, it is not possible for any one actor to assert market dominance. Defendant's argument is an interesting one, but it is not a theory I need consider. Because I conclude that Haines' antitrust claims fail for other reasons stated here, I will not consider VeriMed's arguments relating to geographic market.

The plaintiff, Consultants & Designers, Inc., was another technical services firm that competed with Butler, recruiting job shoppers and supplying clients with employees. C & D alleged that Butler's agreements with its clients and job shoppers violated *Sections 1* and *2* of the Sherman Act. *Id.*

HN8[] Applying the rule of reason, the Eleventh Circuit held that plaintiff failed as a matter of law to state an antitrust violation. *Id. at 1564*. The court noted that Butler's restrictive covenants impacted two sets of parties -- the job shoppers and the client firms. But the covenants did not have an adverse impact on competition of the type that violates the Sherman Act. Rather, the covenants merely imposed contractual obligations that could be freely negotiated by all parties. *Id. at 1562-63*. When Butler offered its job shoppers work, they had as an alternative all the other means of employment in their chosen fields. Similarly, when Butler offered its services to clients, they too had **[**14]** other alternative means of obtaining workers. *Id.* This is exactly analogous to the situation with Haines, VeriMed, and THCN. VeriMed had certain conditions under which it was willing to hire employees and provide services. Nothing in Haines' complaint establishes that these conditions had a market-wide impact that unfairly constrained competition among the entire universe of people working to provide medical content to websites.

Additionally, as the Eleventh Circuit in *Butler* noted, the contract rights retained by an entity such as VeriMed have a market value that can be bought and sold. That is, ***HN9***[] VeriMed is not in the business of unilaterally barring its employees from seeking work. Rather, it merely sets a **[*1139]** price at which VeriMed is willing to relinquish its right to its own employees' services. A VeriMed client is free to hire away any VeriMed employee, provided it does so on a full-time basis, or provided it pays VeriMed the agreed upon rates in the corresponding statement of work. This is a perfectly legitimate way for VeriMed to protect its business interests.

For the reasons stated above, Haines' complaint fails to allege an antitrust injury. That said, however, it would be premature **[**15]** to conclude that Haines' complaint does not allege an injury of any kind. The key difference between Haines' case and that in *Butler* was that Haines never agreed to be restrained from working for other companies. By agreeing to work for VeriMed, Haines unwittingly limited her other available options to seek contract work. She was, in effect, subjected to a non-compete agreement to which she was never made aware. Rather than tell Haines directly that she could not seek work from VeriMed's clients, VeriMed chose only to tell its clients that they could not hire Haines. Haines thus never knew that she would be confined to working only on the projects that VeriMed saw fit to give her. Haines' injury did not arise from an unlawful market restraint; it arose from her own lack of knowledge and VeriMed's failure to disclose material information. ***HN10***[] The antitrust laws are not designed to redress this type of "informational" injury to a single plaintiff. They are designed to redress the injuries of consumers when an entire market is unlawfully constrained. The "essential connection" between Haines' injury and the aims of the antitrust laws is missing in this case. *A.D.M. Corp. v. Sigma Instruments, Inc., 628 F.2d 753, 754 (2d Cir. 1980)*.

B. **[**16]** Missouri and Florida Antitrust Claims

Haines also asserts ***HN11***[] claims under the antitrust laws of Missouri (where Haines resides) and Florida (where VeriMed is based). These claims necessarily fail because Haines cannot maintain a federal antitrust action. The Missouri ***antitrust law*** expressly directs that its provisions "shall be construed in harmony with ruling judicial interpretations of comparable federal antitrust statutes." *Mo. Rev. Stat. 416.141*; *Fischer, Etc. v. Forrest T. Jones & Co., 586 S.W.2d 310, 313 (Mo. 1979)*. The Florida statute similarly contains a provision stating that "any activity or conduct . . . exempt from the provisions of the antitrust laws of the United States is exempt from the provisions [of Florida's ***antitrust law***]." *Fla. Stat. 542.20*. Because VeriMed is exempt from antitrust liability under Haines' federal claims, Haines' Florida antitrust claims must similarly fail. *Golta, Inc. v. Greater Orlando Aviation Authority, 761 F. Supp. 778, 782 (M.D. Fla. 1991)*.

C. Tort Claims

The remaining claims in Haines' complaint are state law tort claims for interference with a business expectancy, fraudulent misrepresentation, fraudulent concealment, and appropriation of name. **[**17]** Haines has alleged that she was intentionally misled by VeriMed, and that VeriMed's conduct prevented Haines from seeking work and obtaining contracts she was entitled to pursue. These are sufficient allegations to withstand a motion to dismiss. VeriMed's motion will be denied as to these counts.

Conclusion

For the foregoing reasons, plaintiff's federal and state antitrust claims will be dismissed. All other claims in plaintiff's Second Amended Complaint remain pending. Accordingly,

IT IS HEREBY ORDERED that plaintiff's motion [# 20] to file a Second Amended **[*1140]** Complaint and plaintiff's motion [# 22] for leave to file a sur-reply are GRANTED.

IT IS FURTHER ORDERED that defendant's motion [# 7] to dismiss or in the alternative for summary judgment is GRANTED IN PART and DENIED IN PART. Counts 1 through 6 of plaintiff's Second Amended Complaint are DISMISSED with prejudice. Defendant's motion is denied in all other respects. This case will be set for a Rule 16 Conference by a separate order.

IT IS FURTHER ORDERED that plaintiff's motion [# 13] to voluntarily dismiss Count 8 of the First Amended Complaint and plaintiff's motion [# 15] to deny defendant's summary judgment motion as premature are **[**18]** DENIED AS MOOT.

This case will be set for a Rule 16 Scheduling Conference by separate Order.

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > Scope > General Overview

***HN1*[]** **Sherman Act, Scope**

Section 1 of the Sherman Act forbids every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade. *15 U.S.C.S. § 1*. Although the Sherman Act, by its terms, prohibits every agreement in restraint of trade, the Supreme Court of the United States has repeatedly made clear that Congress intended to outlaw only unreasonable restraints.

Antitrust & Trade Law > Sherman Act > Claims

HN2[] Sherman Act, Claims

Showing a violation of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, requires proof of two elements: (1) a contract, combination, or conspiracy; (2) that imposed an unreasonable restraint of trade. The first element requires proof of some kind of agreement, for independent action is not proscribed. Plaintiffs must provide evidence of a relationship between at least two legally distinct persons or entities.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Resale Price Maintenance

HN3[] Sherman Act, Scope

Only alleged resale price maintenance that actually involves an agreement between two parties comes within the scope of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*. Prohibited resale price maintenance is the practice by which a manufacturer and a distributor agree on a minimum price below which the distributor will not sell the manufacturer's products. Unilateral action by a manufacturer does not suffice to implicate *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*; a manufacturer can, for example, refuse to sell to retailers who resell its products for less than the manufacturer's preferred price.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN4[] Sherman Act, Scope

A manufacturer has the right to sell its products on whatever terms it wishes; it is only when the manufacturer adopts a combination with others that *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, is implicated.

Antitrust & Trade Law > Sherman Act > Claims

HN5[] Sherman Act, Claims

To support liability under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, an agreement must satisfy the second element of *§ 1*: it must be an unreasonable restraint on trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[] Price Fixing & Restraints of Trade, Vertical Restraints

Vertical price restraints are to be judged according to the rule of reason. Under the rule of reason, a factfinder examines all of the circumstances to determine whether a practice unreasonably restrains competition. Factors that should be considered include specific information about the relevant business and the restraint's history, nature, and effect, as well as whether the businesses involved have market power.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN7[] Sherman Act, Scope

Where a manufacturer sells its products through its genuine agents, there is no contract, combination or conspiracy, and thus no basis for antitrust liability. *15 U.S.C.S. § 1*.

Governments > Courts > Judicial Precedent

HN8[] Courts, Judicial Precedent

The Supreme Court of the United states does not normally overturn earlier authority sub silentio.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN9[] Sherman Act, Scope

Employment relations do not violate the antitrust laws. The cases refusing to extend liability under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, to genuine agency relationships are premised on the idea that such relationships should be treated like employment relations.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Resale Price Maintenance

HN10[] Vertical Restraints, Resale Price Maintenance

A careful inquiry into a purported agency agreement is required in order to determine whether it is genuine or a sham. Courts must look to the substance of the parties' dealings rather than merely to form. In this inquiry, courts have considered most important how business risks were allocated between the parties. If a distributor deals with his supplier as an independent businessman who bears most or all of the risks on transactions with purchasers, then an agency or consignment agreement is ineffective to insulate the manufacturer from antitrust liability for fixing resale prices. However, where the manufacturer bears the financial risks of transactions with the customers it is likely that the distributor is merely an agent for the manufacturer. Looking to the distribution of business risks is sensible. If a manufacturer designates a distributor its agent yet insists that the distributor bear most or all of the traditional burdens of ownership, it is likely that the claimed agency relationship is merely a clever manipulation of words and not a legitimate business arrangement that should be protected by law. On the other hand, when a manufacturer is willing to assume the burdens associated with ownership, it should be entitled to the benefits as well--including the right to sell its property through an agent.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Resale Price Maintenance

HN11[] Vertical Restraints, Resale Price Maintenance

In cases in which courts are concerned that a company attempted to evade the rule against resale price maintenance by labeling its arrangement an agency relationship, courts should ask whether the agency relationship has a function other than to circumvent the rule against price fixing. As with the inquiry into the distribution of risks, considering economic justification helps distinguish between those arrangements that further the goal of ***antitrust law*** and those that subvert it. The purpose of ***antitrust law***, at least as articulated in the modern cases, is to protect the competitive process as a means of promoting economic efficiency. Agency relationships that have strong business justifications are the ones most likely to promote efficiency; those created merely to avoid antitrust scrutiny are the most likely to be inefficient and harmful to consumers.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Resale Price Maintenance

HN12[] **Vertical Restraints, Resale Price Maintenance**

In cases in which courts are concerned that a company attempted to evade the rule against resale price maintenance by labeling its arrangement an agency relationship, courts look to whether the agency agreement is a product of coercion.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Resale Price Maintenance

HN13[] **Vertical Restraints, Resale Price Maintenance**

In cases in which courts are concerned that a company attempted to evade the rule against resale price maintenance by labeling its arrangement an agency relationship, courts should be wary of arrangements where the purported agent possesses all or most of the indicia of entrepreneurship, but that is a far cry from saying that agents cannot have any of those attributes. The agent in a principal-agency relationship need be loyal, but not robotic.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN14[] **Sherman Act, Scope**

Manufacturers can use the agency method to distribute their products. Yet a distribution method labeled "agency" but that in substance is simply an agreement between manufacturers and retailers to fix prices can create liability under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*.

Opinion by: WILKINSON

Opinion

[*284] WILKINSON, Circuit Judge:

In this Sherman Act suit, plaintiffs, who provide pest control **[**2]** services to individual customers, allege that defendants, who manufacture pesticides, illegally conspired with their distributors to set minimum resale prices of certain termiticide products. Specifically, plaintiffs claim that defendant manufacturers Bayer CropScience LP and Bayer Corp. (hereinafter collectively referred to as "Bayer") and BASF Corp. each engaged in the practice known as "resale price maintenance" or "vertical price fixing"--Bayer with its product Premise and BASF with its product Termidor. Defendants counter that *United States v. General Electric Co., 272 U.S. 476, 47 S. Ct. 192, 71 L. Ed. 362 (1926)*, held that a manufacturer may lawfully set minimum prices for its products when there is a genuine principal-agent relationship between the manufacturer and its distributors, and that such relationships existed here. Plaintiffs rejoin that *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*, implicitly overruled *General Electric*, and in the alternative argue that the agency relationships between defendants and their distributors were a sham. Because *Leegin* did not eliminate the agency defense to a claim of resale price maintenance and the agency relationships between defendants **[**3]** and their distributors were genuine, we find no basis for antitrust liability and thus affirm the district court's grant of summary judgment to defendants.

I.

In 1996, Bayer introduced Premise, a termiticide that uses the active ingredient imidacloprid. Premise is a liquid "non-repellent" termiticide. Prior to Premise's arrival to the market, the only liquid termiticides were repellents, which create a chemical barrier around a house or other structure that prevents termites from entering. Non-repellent termiticides are similarly used to create a barrier around a structure, but do not repel termites; instead, the barrier they create is poisonous to termites that pass through it. The poison does not kill the termites immediately. Termites carry it back to their nests and likely spread it to the entire colony. Non-repellents are highly efficacious and have steadily grown in market share since their introduction.

Bayer initially sold its Premise products to the distributors of its other pesticide products. One of those distributors is a company now known as Univar USA, Inc., which is one of the nation's largest distributors of termiticides to pest management professionals ("PMPs"), who provide **[**4]** pest control services to homeowners and other individual customers. Univar and other distributors then resold the products to PMPs such as plaintiffs Valuepest.com of Charlotte, Inc. (formerly Budget Pest Prevention, Inc. and hereinafter "Valuepest"), National Pest Control, Inc., and Pest Pros, **[*285]** Inc. This arrangement continued for several years.

Then, in 2000, Aventis CropScience, L.P. began selling Termidor, a new non-repellent termiticide using the active ingredient fipronil. In early 2000, Aventis began selling Termidor directly to a select group of 200 PMPs, which was expanded to a group of 400 in July. In September of 2000, however, Aventis began distributing Termidor through Univar and other distributors pursuant to non-exclusive agency agreements. The agency agreements provided that Aventis was the seller of Termidor to PMPs, while the distributor-agent merely facilitated that transaction. Further, the agreements specified that Aventis retained title to the Termidor until it was sold to a PMP. The agents received commissions for the sales they facilitated. The agency arrangement allowed Aventis to set the price at which Termidor was sold to PMPs.

According to Bayer, after experiencing **[**5]** the benefits of the Termidor agency arrangement, some distributors became unhappy with the distribution arrangement for Premise. The agency contracts were more profitable to distributors than the previous distribution arrangement, in which the distributors purchased Premise from Bayer and resold it to PMPs. Bayer, dependent on its distributors for marketing, became concerned about losing sales if distributors chose to encourage PMPs to purchase Termidor instead of Premise--which the distributors had every incentive to do, given that they made more money selling Termidor.

Thus, in January of 2001 Bayer began selling Premise through an agency program similar to that used by Aventis. Bayer continued to use its old distributors, but whereas before the distributors had purchased the product from Bayer, the new agency agreements stated that Bayer would retain title to the Premise until it was sold to a PMP. The agreements further specified that Bayer would set the retail prices and that the distributors would receive a fixed commission for each sale.

In October of 2001, Bayer's and Aventis's respective boards of directors announced a plan in which Bayer would purchase all shares of Aventis. **[**6]** An investigation by the Federal Trade Commission ("FTC") ensued. The FTC approved the acquisition, which was completed in June of 2002, but required that Bayer divest assets relating to fipronil, Termidor's active ingredient. BASF acquired the fipronil assets from Bayer on March 21, 2003, and since that date has manufactured and sold Termidor in the United States. BASF became the assignee of the earlier agency contracts for Termidor, and continues to sell Termidor using agency agreements. Bayer ceased selling Premise via agency contracts in 2005.

On April 25, 2005, Valuepest filed a class action lawsuit in the United States District Court for the Western District of North Carolina, alleging vertical price fixing by Bayer, BASF, and other defendants in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*. The complaint was amended three times, adding and then dropping a claim, dismissing defendants other than Bayer and BASF, and adding National Pest Control and Pest Pros as plaintiffs and proposed class representatives.

On November 21, 2006, plaintiffs and defendants each filed motions for summary judgment; plaintiffs also filed a petition for class certification. [1] While the district **[*286]** court **[**7]** was considering these motions, the Supreme Court held argument in *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. The district court issued an order stating it would wait to rule on plaintiffs' summary judgment motion until after *Leegin* was decided, but would continue consideration of defendants' motions. Two weeks after the Supreme Court handed down its decision in *Leegin*, the district court granted summary judgment for defendants on the ground that defendants' contracts with their distributors represented genuine agency relationships that did not support liability under *§ 1*. The court also denied plaintiffs' motion for class certification as moot. Plaintiffs now appeal.

II.

Plaintiffs insist in their briefs and at oral argument that after *Leegin* the agency defense under *General Electric* to a claim of resale price maintenance is no longer viable. This argument fails because the two cases dealt with two separate elements of antitrust liability: *General Electric* addressed what types of relationships constitute agreements to set prices for purposes of the Sherman Act, while *Leegin* concerned whether such agreements, once proven, should be considered *per se* unlawful or evaluated for their reasonableness. The structure of *§ 1* of the Sherman Act makes the different focus of the two decisions clear.

HN1[] *Section 1* forbids "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade." *15 U.S.C. § 1*. "Although the Sherman Act, by its terms, prohibits every agreement 'in restraint of trade,'"

---

[1] The parties agreed that the district court would resolve first the vertical price fixing claims with respect to only one of Bayer's and BASF's distributors, Univar, and that the court's resolution of the claims regarding Univar would "set the framework for resolution of Plaintiffs' claims against Defendants with regard to all of their individual distributors." **[**8]** J.A. 430. Accordingly, in our subsequent analysis of the claims we discuss only the facts related to the agreements with Univar.

the Supreme Court has repeatedly made clear that "Congress intended to outlaw only unreasonable restraints." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. ***HN2***[] Showing a violation of *§ 1* thus requires proof of two elements: **[**9]** "(1) a contract, combination, or conspiracy; (2) that imposed an unreasonable restraint of trade." *Dickson v. Microsoft Corp., 309 F.3d 193, 202 (4th Cir. 2002)*.

The first element requires proof of some kind of agreement, for "[i]ndependent action is not proscribed." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. Plaintiffs must provide "evidence of a relationship between at least two legally distinct persons or entities." *Oksanen v. Page Mem'l Hosp., 945 F.2d 696, 702 (4th Cir. 1991)* (en banc). Thus ***HN3***[] only alleged resale price maintenance that actually involves an agreement between two parties comes within the scope of *§ 1*. Prohibited resale price maintenance is the practice by which a manufacturer and a distributor agree on a minimum price below which the distributor will not sell the manufacturer's products. *See* 8 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* 206-07 (2d ed. 2004). Unilateral action by a manufacturer does not suffice to implicate *§ 1*; a manufacturer can, for example, refuse to sell to retailers who resell its products for less than the manufacturer's preferred price. *See* *United States v. Colgate & Co., 250 U.S. 300, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*.

In **[**10]** *General Electric*, the Court addressed an allegation of resale price maintenance by a lamp manufacturer and its **[*287]** network of distributors. The defendant claimed "that its distributors were *bona fide* agents," while the government contended that "the system of distribution adopted was merely a device to enable the [defendant] to fix the resale prices of lamps in the hands of purchasers," and "that the so-called agents were in fact wholesale and retail merchants." *Gen. Elec., 272 U.S. at 479*. After examining the terms of the contracts between the defendant and its distributors, the Court determined that the distributors were genuinely the manufacturer's agents, and that therefore the scheme did not violate the Sherman Act. *See* *id. at 484-88*.

The Court reasoned that ***HN4***[] a manufacturer has the right to sell its products on whatever terms it wishes; it is only when the manufacturer "adopts a combination with others" that the Sherman Act is implicated. *Id. at 485*. Because the Court found that General Electric was indeed selling its lamps directly to consumers via its agents, rather than selling them to the retailers and requiring the retailers to resell them at a fixed price, the defendant was not **[**11]** guilty of unlawful vertical price fixing. *General Electric* thus concerned what facts sufficed in resale price maintenance claims to prove the first element of § 1 liability-whether a "contract, combination," or "conspiracy" existed. *15 U.S.C. § 1*.

As a general matter, ***HN5***[] to support liability an agreement must also satisfy the second element of *§ 1*: it must be an unreasonable restraint on trade. *See* *Dickson, 309 F.3d at 202*. Under the longstanding precedent of *Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 31 S. Ct. 376, 55 L. Ed. 502 (1911)*, resale price maintenance agreements were considered *per se* unlawful, and plaintiffs who could prove that such an agreement existed did not need to adduce further proof that the agreement unreasonably restrained trade. *Dr. Miles* remained the law for nearly a century until 2007, when it was overruled by the Supreme Court in *Leegin*. In that case, the Court abolished the *per se* rule against resale price maintenance and held that ***HN6***[] "[v]ertical price restraints are to be judged according to the rule of reason." *Leegin, 127 S. Ct. at 2725*.

Under the rule of reason, a factfinder examines all of the circumstances to determine whether a practice unreasonably restrains competition. **[**12]** *Id. at 2712*. Factors that should be considered "include 'specific information about the relevant business' and 'the restraint's history, nature, and effect,'" *id*. (quoting *Khan, 522 U.S. at 10*), as well as "[w]hether the businesses involved have market power," *id*. (citing *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*). The Court rejected the *per se* rule of *Dr. Miles* as excessively formalistic and not sufficiently grounded in the actual economic impact of vertical price restraints. *Id. at 2714*. The Court looked to a growing consensus in economic theory that vertical pricing agreements, while sometimes anti-competitive, can often have procompetitive effects. *Id. at 2714-16* (detailing how resale price maintenance can promote interbrand competition by encouraging retailers to invest in promotional efforts, giving customers a range of options including "low-price, low-service brands" and "high-price, high-service brands," and by facilitating market entry for new products).

Plaintiffs contend that *Leegin* overruled *General Electric* and replaced it with a generalized inquiry into market power and procompetitive benefits even where a genuine agency relationship exists. **[**13]** The foregoing analysis of § 1's structure should **[*288]** make clear why this assertion must be rejected. Plaintiffs' argument conflates the distinction between the two elements required to prove liability under *§ 1*. *General Electric* concerned the first necessary element of § 1 liability--the existence of an agreement. ***HN7***[] Where a manufacturer sells its products through its genuine agents, there is no "contract, combination" or "conspiracy," and thus no basis for antitrust liability. *15 U.S.C. § 1*. At issue in *Leegin* was an entirely different question regarding the second element of § 1 liability that applies when an agreement has been proven: should that agreement be considered *per se* unlawful or should it be analyzed under the rule of reason? The two cases dealt with separate and distinct issues, and thus no part of Leegin's reasoning casts the slightest bit of doubt on the underpinnings of the rule of *General Electric*.

Furthermore, *Leegin* never once mentioned or cited *General Electric*. The Court has made clear that ***HN8***[] it "does not normally overturn . . . earlier authority *sub silentio." Shalala v. Ill. Council on Long Term Care, Inc., 529 U.S. 1, 18, 120 S. Ct. 1084, 146 L. Ed. 2d 1 (2000)*. It would be especially odd for the Court **[**14]** to have overruled *General Electric* by implication given that the Court spent several pages of its decision in *Leegin* explicitly analyzing whether *stare decisis* required adherence to *Dr. Miles. See Leegin, 127 S. Ct. at 2720-25*. If the Court had thought that overruling *Dr. Miles* would simultaneously overrule another venerable antitrust precedent, it surely would have said so.

Quite simply, *Leegin* has no bearing on the continued vitality of *General Electric*, and plaintiffs' argument to the contrary cannot stand. The two holdings stand independently of each other. *General Electric* holds that a principal-agent relationship is not an agreement for antitrust purposes, while *Leegin* only addressed the circumstances under which an agreement proven to exist is reasonable under *§ 1*. *Leegin* thus is only relevant if plaintiffs can prove the agency relationships claimed by defendants were a sham. We must thus determine whether the agreements between defendants and Univar were genuine agency relationships under *General Electric*.

III.

It is important at the outset to note why principal-agency agreements are important. The owner of a good may generally set the price at which the good is sold. If one of **[**15]** the benefits of manufacturing a good is to set the price by which it is sold, then it is only sensible not to deprive the manufacturer of its right if, for reasons of efficiency, it chooses to use agents that are loyal to it rather than employees. ***HN9***[] "Employment relations do not violate the antitrust laws." *Ill. Corporate Travel, Inc. v. Am. Airlines, Inc., 806 F.2d 722, 724-25 (7th Cir. 1986)*. The cases refusing to extend § 1 liability to genuine agency relationships are premised on the idea that such relationships "should be treated like employment relations." *Id. at 725*; *see also Day v. Taylor, 400 F.3d 1272, 1276 (11th Cir. 2005)*.

Several factors are important in our evaluation of the relationships at issue here. Once again, *General Electric* is instructive. General Electric sold its lamps to consumers via a consignment arrangement with retail and wholesale merchants. *Gen. Elec., 272 U.S. at 481-83*. Prices were set by GE, and the dealers received fixed commissions. *Id*. GE retained title to the lamps in the possession of the agents until they were sold to actual consumers. *Id. at 482*. The manufacturer also assumed the risk of loss from fire, flood, obsolescence, **[*289]** and price decline, paid **[**16]** the taxes on the lamps, and carried insurance on the stock. *Id. at 483*. The agents were required to pay for all expenses related to storage, transportation, sale, and distribution of the lamps, and were responsible for lamps lost or damaged while in the agent's care. *Id. at 482-83*. The agents collected payments from customers and remitted the proceeds to the manufacturer, less their commission. *Id. at 482*.

After reviewing the details of the arrangement, the Court found "nothing in the form of the contracts and the practice under them" that made the distributors "anything more than genuine agents of the company." *Id. at 484*. The Court stressed several facts, including that the agents were not required to pay for the lamps until they had been sold to customers and that the title of the lamps passed directly from the manufacturer to the consumer at the time of sale. *Id*. The Court did not find the agents' obligations to pay for lost or damaged lamps or to pay for storage, transportation, sale, and distribution expenses inconsistent with a genuine agency relationship. *Id*. Nor did the "circumstance that the agents were in their regular business wholesale or retail merchants, and under a prior

[17]** arrangement had bought the lamps, and sold them as their owners" preclude GE from changing the relationship to one of genuine agency. *Id. at 484-85*.

The Court's other major case on the agency defense to a claim of resale price maintenance is *Simpson v. Union Oil Co. of California, 377 U.S. 13, 84 S. Ct. 1051, 12 L. Ed. 2d 98 (1963)*. At issue in that case was an oil company's scheme to set the retail price of its gasoline sold to customers by gas stations. Under the purported consignment agreement, retailers received commissions on gasoline sold, and the title to the consigned gasoline passed directly from the oil company to the consumer at the time of sale. *Id. at 15*. The oil company paid property taxes on the gasoline held by the retailers, but the retailers were required to carry personal liability and property damage insurance and were responsible for virtually all losses of the gasoline in their possession. *Id*.

The Court held that the arrangement constituted unlawful resale price maintenance. *Id. at 24*. It observed that the dealers were "independent businessmen" possessing "all or most of the indicia of entrepreneurs, except for price fixing." *Id. at 20*. The Court acknowledged that consignment is a legitimate method **[**18]** for an owner to sell his property. *Id. at 21*. But it looked beyond the agreements' form to consider their substance, and concluded they were precisely the kind of price-fixing arrangement that *§ 1* was meant to prevent. *Id. at 24*. "To allow Union Oil to achieve price fixing in this vast distribution system through this 'consignment' device would be to make legality for antitrust purposes turn on clever draftsmanship," the Court reasoned. *Id*.

The Court conceded that the agreement upheld in *General Electric* "somewhat parallels the one in the instant case." *Id. at 22-23*. The Court distinguished *General Electric* on the ground that that case concerned patented articles, and found its holding "not apposite to the special facts here." *Id. at 23*. In dissent, Justice Stewart called the Court's ground for distinguishing *General Electric* "specious," for the *General Electric* Court "gave no intimation whatsoever that its conclusion would have differed in any respect if the consigned article had been unpatented." *Id. at 27-28* (Stewart, J., dissenting).

[*290] Some subsequent commentators have agreed with Justice Stewart that the holdings in *General Electric* and *Simpson* are irreconcilable. *See, e.g.*, Terry **[**19]** Calvani & Andrew G. Berg, *Resale Price Maintenance after Monsanto: A Doctrine Still at War with Itself*, *1984 Duke L.J. 1163, 1178*. However, "courts generally have not interpreted *Simpson* as a blanket condemnation of all consignment agreements in which the manufacturer/supplier sets retail prices." *Hardwick v. Nu-Way Oil Co., 589 F.2d 806, 809 (5th Cir. 1979)*. Nor should they have. It cannot "seriously be argued that the ancient and ubiquitous practice of principals' telling their agents what price to charge the consumer is just some massive evasion of the rule against price fixing." *Morrison v. Murray Biscuit Co., 797 F.2d 1430, 1437 (7th Cir. 1986)*. Otherwise, perverse results would obtain--such as a homeowner being guilty of violating *§ 1* "when he tells his broker at what price to sell his home." *Id. at 1436*.

Instead, courts have read *Simpson* to require ***HN10***[] a careful inquiry into a purported agency agreement, in order to determine whether it is genuine or a sham. Courts must look "to the substance of the parties' dealings rather than merely to form." *Marty's Floor Covering Co. v. GAF Corp., 604 F.2d 266, 269 (4th Cir. 1979)*. In this inquiry, courts have considered most important how business **[**20]** risks were allocated between the parties. "If a distributor deals with his supplier as an 'independent businessman' who bears most or all of the risks on transactions with purchasers, then an agency or consignment agreement is ineffective to insulate the manufacturer from antitrust liability for fixing resale prices. However, where the manufacturer bears the financial risks of transactions with the customers . . . it is likely that the distributor is merely an agent for the manufacturer." *Ryko Mfg. Co. v. Eden Servs., 823 F.2d 1215, 1223 (8th Cir. 1987)* (citations omitted); *see also* *Farm Stores, Inc. v. Texaco, 763 F.2d 1335, 1344 (11th Cir. 1985)*; *Mesirow v. Pepperidge Farm, Inc., 703 F.2d 339, 342-43 (9th Cir. 1983)*.

Looking to the distribution of business risks is sensible. If a manufacturer designates a distributor its agent yet insists that the distributor bear most or all of the traditional burdens of ownership, it is likely that the claimed agency relationship is merely a "clever manipulation of words," *Simpson, 377 U.S. at 22*, and not a legitimate business arrangement that should be protected by law. On the other hand, when a manufacturer is willing to assume the burdens associated **[**21]** with ownership, it should be entitled to the benefits as well--including the right to sell its property through an agent. *See* id. at 21 ("[A]n owner of an article may send it to a dealer who may in turn undertake to sell it only at a price determined by the owner. There is nothing illegal about that arrangement.").

Courts also consider the economic justification offered for the agency agreement. The Seventh Circuit, noting the *Simpson* Court's concern that the oil company had merely evaded the rule against resale price maintenance by labeling its arrangement an agency relationship, held that ***HN11***[] in such cases courts should ask "whether the agency relationship has a function other than to circumvent the rule against price fixing." Morrison, 797 F.2d at 1436. As with the inquiry into the distribution of risks, considering economic justification helps distinguish between those arrangements that further the goal of ***antitrust law*** and those that subvert it. "The purpose of ***antitrust law***, at least as articulated in the modern cases, is to protect the competitive process as a means of promoting economic efficiency." **[*291]** Id. at 1437. Agency relationships that have strong business justifications are the **[**22]** ones most likely to promote efficiency; those created merely to avoid antitrust scrutiny are the most likely to be inefficient and harmful to consumers.

Finally, ***HN12***[] courts look to whether the agency agreement is a product of coercion. *See, e.g.,* Day, 400 F.3d at 1278. The Court in *Simpson* was concerned that the defendant oil company exercised coercive power over the gasoline retailers, for the retailers depended entirely on the contracts with the oil company for their business. *See* Simpson, 377 U.S. at 21. With these factors in mind, we now turn to an examination of the "substance" of the relationships between defendants and Univar. Marty's Floor Covering Co., 604 F.2d at 269.

IV.

A.

In examining Bayer's and BASF's contracts with Univar, the threshold question is which party bore the risk of loss. We find that this factor weighs in favor of a genuine agency relationship. First, as a formal matter, both Bayer and BASF retained title on their respective products while in Univar's possession, and the agreements specified that defendants, not Univar, bore the risk of loss on the termiticides until they were delivered into the hands of PMPs. While plaintiffs not surprisingly seek to dismiss the **[**23]** retention of title as a mere formality, such traditional incidents of property law, embodied here in the agency agreements, have real significance. And beyond the formal labels in the agreements, defendants also satisfied the standard in substance. They retained many of the burdens of ownership, indicating the agency relationships were authentic. The evidence strongly supports the conclusion that the risk of loss was borne by defendants.

A number of facts support the conclusion that defendants bore the risk of loss. The agreements required that Univar store defendants' termiticides separate from Univar's own property, and label the products as belonging to defendants. The agreements squarely placed the risk of economic loss due to nonpaying PMPs on defendants' shoulders. Both defendants' agreements set limits on the amounts of credit Univar could extend to purchasers, and required defendants, not Univar, to pursue delinquent purchasers. Under the contracts, defendants retained the right to audit Univar for compliance with the agency agreements; BASF, at least, audited Univar annually. Bayer's contract with Univar explicitly stated that Bayer would pay all property taxes on the Premise **[**24]** owned by Bayer.

Beyond the formal terms of the agreements, Bayer and BASF bore the risk of loss in practice as well. As the district court concluded, "testimony from representatives of Bayer, BASF, and Univar . . . confirm that Bayer and BASF actually retain both title and the risk of loss on Premise or Termidor, respectively" until sold to PMPs. J.A. 449. When Termidor in Univar's possession was stolen on two occasions, BASF, not Univar, wrote off the losses. When Univar suffered a credit loss on a sale of Premise, Bayer reimbursed Univar. Invoices sent to PMPs buying Premise or Termidor stated that the products were owned by Bayer or BASF, not by Univar.

Plaintiffs' arguments that defendants did not actually bear the risk of loss are unavailing. They contend that the fact Univar was required to carry insurance against its own negligence is evidence that Univar bore the risk of physical loss, but it makes perfect sense for a principal to require **[*292]** a genuine agent to be responsible for the agent's own carelessness in order to discourage it. *See* Day, 400 F.3d at 1277. Plaintiffs point out that until recently both defendants failed to pay property taxes on their products held by Univar in **[**25]** a number of states. But Univar never paid property taxes on the termiticides either, and Bayer's agreement, at least, assigned this responsibility to Bayer, not Univar. Furthermore, BASF paid inventory taxes on its Termidor.

Plaintiffs claim that the fact that defendants' insurance deductibles for their termiticides are greater than the amount of product stored at any one Univar location means that Univar bore the risk of loss. This conclusion does not follow; simply because defendants have made the business decision not to insure against the loss of their products from Univar's locations does not mean that they do not bear the risk of that loss. Plaintiffs point out that Univar designed its accounting system so that Univar took title to the pesticides at the moment of sale. However, this bookkeeping method, utilized by Univar in order to minimize Univar's tax liability, was clearly inconsistent with the clear terms of the agency agreements, and, so far as the record shows, was not even known to defendants.

Plaintiffs argue that Univar bore the risks associated with PMPs paying Univar by credit card. To alight on such an accepted method of payment as material is grasping at straws. Moreover, **[**26]** according to the agreements Univar was not required to accept credit cards in the first place. That Univar chose to attract customers in this manner and increase its commission income under the agency arrangement does not prove that the relationship was anything other than genuine. *See* *Ill. Corporate Travel, Inc. v. Am. Airlines, Inc., 889 F.2d 751, 753 (7th Cir. 1989)*. Plaintiffs are apparently under the misapprehension that an agency relationship must be devoid of any indication of entrepreneurship on the part of the agents involved. This view simply overlooks the point that every business relationship, however characterized, will have some elements of enterprise. *Simpson* directed that ***HN13***[] courts should be wary of arrangements where the purported agent possesses "all or most of the indicia of entrepreneur[ship]," *377 U.S. at 20*, but that is a far cry from saying that agents cannot have *any* of those attributes. The agent in a principal-agency relationship need be loyal, but not robotic.

Thus, we find that defendants, not Univar, bore the risk of loss of the termiticides--a factor which strongly supports a determination that Univar was a genuine agent of defendants. *See* *Ryko Mfg. Co., 823 F.2d at 1223*. **[**27]** The other two significant factors also weigh in favor of a genuine agency relationship. We review each in turn.

First, the record indicates that defendants used the agency sales method for legitimate business reasons. When Aventis first launched Termidor, it chose to use the agency method in order to retain more control over how Termidor was sold to PMPs than would have been possible under a more traditional distribution arrangement. The company wanted Termidor to be seen as a premium product of high efficacy, and thus wanted to retain control over how the product was presented to PMPs. Further, because Termidor was an entirely new termiticide, the company wanted through its agents to restrict sales to PMPs who had been trained how to use the product appropriately. Releasing a new product in a highly competitive marketplace is a difficult endeavor. In such a venture, the agency method can be useful because it enables a manufacturer **[*293]** to retain more control over how its product is marketed than it would if it merely sold the products to distributors. True resale price maintenance can usefully promote interbrand competition. *See* *Leegin, 127 S. Ct. at 2714-16*. Agency arrangements may likewise **[**28]** be suited to do so, given the greater control they give manufacturers over product presentation. The decision by Aventis, and later BASF, to use the agency method seems justified by sound business reasons.

Bayer, for its part, elected to switch to the agency sales method not out of a desire to fix prices, but because distributors preferred the agency method and the commissions they received from it to the traditional distribution method Bayer had been using. Bayer was forced to switch to the agency method in order to stay competitive. Certainly a desire to emulate a successful business model cannot be said to be an illegitimate business motive. Both defendants had legitimate business reasons for using the agency method.

Second, there is no evidence whatsoever that the agency agreements were the product of coercion. Unlike the gasoline retailers in *Simpson*, Univar was not dependent on the agency contracts for its livelihood; indeed, they constituted no more than a small fraction of its business. The record indicates that far from being compelled to adopt the agency sales method, distributors like Univar actually preferred it.

Thus, the factors courts consider when evaluating whether an **[**29]** agreement creates a genuine agency relationship militate in favor of finding that such a relationship existed here.

B.

Notwithstanding the several factors that weigh in favor of a genuine agency relationship, plaintiffs make several additional arguments against that conclusion. First, plaintiffs argue that distributors like Univar could not be agents while serving Bayer and BASF simultaneously. This argument is premised on a misunderstanding of the agency method, in which nonexclusive relationships are common. In *Illinois Corporate Travel, Inc. v. American Airlines, Inc., 889 F.2d 751 (7th Cir. 1989)*, the Seventh Circuit held that a travel service operator was an airline's genuine agent notwithstanding the fact that the relationship was nonexclusive, for "this is a common form of organization. Real estate agents work for many clients, and multiple-listing services allow many agents access to the same properties; auction houses sell works of art furnished by hundreds of owners at a single sitting." *Id. at 752-53*. Plaintiffs cite no case for the proposition that only exclusive agency relationships are genuine for antitrust purposes.

Second, plaintiffs make a number of related arguments **[**30]** about actions taken by Univar that plaintiffs suggest should instead have been taken by defendants. For example, plaintiffs state that Univar, not defendants, took out pesticide licenses. They point out that Univar hired and fired employees and paid for workers' compensation insurance. Plaintiffs emphasize that Univar, not defendants, sent bills to PMPs. Plaintiffs also note that Univar remitted payment to defendants less its commission rather than being paid by defendants for services rendered. They draw attention to the fact that Univar, not defendants, dealt with expenses relating to its warehouses and paid for warehouse insurance.

These arguments ignore the reasons why a manufacturer would use sales agents in the first place. It is hardly surprising that many effective agents have experienced employees and tested business **[*294]** techniques of their own. Univar, as a distributor that already sold many companies' pesticides, had low overhead costs and was in a better position to make staffing decisions, deal with licensing requirements, bill customers, and maintain its warehouses than were defendants. It was reasonable for defendants to leave those matters to the party best positioned to **[**31]** deal with them. Defendants chose to use Univar as an agent precisely because, with its robust pesticide distribution business, it was well-equipped to handle retail transactions more efficiently than could Bayer or BASF themselves. If the rule were otherwise--that is, if a manufacturer could not leave to an agent the responsibility for dealing with hiring employees and so on--there would be little reason for a manufacturer to use agents rather than employees. But "[e]fficiency would not be promoted by a rule that forbade principals to tell their agents at what price to sell the principal's product unless the agent was an employee." *Morrison, 797 F.2d at 1437*.

In sum, we find unconvincing plaintiffs' various arguments that the agency agreements at issue in this case were shams. Because the agency relationships between defendants and Univar were genuine, neither defendant violated *§ 1*. [2]

V.

Section 1 of the Sherman Act and the Supreme Court's cases interpreting it attempt to strike a balance. **[**32]** The law must prevent agreements that undermine the principle of competition necessary to make a free market function. Yet if law sweepingly declares off-limits business methods that companies might opt to use for legitimate commercial reasons, consumers--the intended beneficiaries of ***antitrust law***--are worse off. The Court's cases on resale price maintenance have walked this sensible path. Under *General Electric*, ***HN14***[] manufacturers can use the agency method to distribute their products. Yet under *Simpson*, a distribution method labeled "agency" but that in substance is simply an agreement between manufacturers and retailers to fix prices can create liability under *§ 1*. Here we are persuaded that the relationships at issue stand comfortably on the *General Electric* side of the line. Because the agency contracts are legitimate business arrangements, and not unreasonable restraints on trade creating potential § 1 liability, the judgment is affirmed.

AFFIRMED

---

[2] Because we conclude that there was no substantive § 1 violation, we need not reach defendants' argument that plaintiffs failed to prove injury as required by *§ 4* of the Clayton Act, *15 U.S.C. § 15*.

Opinion

MEMORANDUM AND ORDER

HURLEY, Senior District Judge:

Plaintiff Habitat, Ltd. ("Plaintiff") brings this antitrust suit against defendants The Art of the Muse, Inc. d/b/a Oly Studio ("Oly") and Mecox Gardens & Pottery, Inc. ("Mecox") (collectively, "Defendants"). The Complaint asserts seven Causes of Action. The First, Second and Fourth Causes of Action are asserted against both Defendants; the Third and Seventh Causes of Action are asserted against Mecox only, and the Fifth and Sixth Causes of Action are asserted against Oly only.

Oly moves to dismiss the First, Second, Fourth and Fifth Causes of Action for failure to state a claim pursuant to *Federal Rule of Civil Procedure ("Rule") 12(b)(6)*. Oly also moves for a more definitive statement pursuant to *Rule 12(e)* **[*2]** as to the Fifth Cause of Action, and to strike Plaintiff's demand for exemplary damages and attorneys' fees under the Fifth and Sixth Causes of Action. Mecox moves to dismiss the First, Second, Third, Fourth and Seventh Causes of Action pursuant to *Rule 12(b)(6)*. For the reasons that follow, Defendants' motions to dismiss the First, Second and Third Causes of Action -- the federal antitrust claims -- are granted. The Court declines to exercise supplemental jurisdiction over the remaining state law claims.

BACKGROUND

In crafting the following summary of facts, the Court accepts all of the factual allegations in the Complaint as true.

Plaintiff is a domestic retailer of antique and faux antique furniture in Suffolk County, New York. Plaintiff has operated an antique furniture retail store in Water Mill, New York for more than ten years (the "Original Store"). Plaintiff entered the faux antique furniture retail market three years ago. Plaintiff recently opened up a second retail store in Suffolk County in Bridgehampton (the "New Store").

Oly is a manufacturer and distributor of faux antique furniture. For more than three years, Plaintiff and other faux antique furniture dealers in Suffolk **[*3]** County have purchased Oly's products. In fact, Plaintiff has dealt "almost exclusively with Oly with regard to the purchase of faux antique furniture for resale to consumers in Suffolk County, NY." (Compl. P 13.)

Plaintiff first began selling Oly furniture in 2004. According to Plaintiff, Oly's faux antique furniture is one of a kind:

> Oly is an industry leader for the manufacture and distribution of faux antiques furniture because of the superior design, reasonable price and quality of its Products. Oly's Products are highly-sought-after pieces in the current market. Oly's Products are a fresh blend of clean lines and antique motifs synchronizing traditional with contemporary. Oly's Products are hand crated, unique and are considered a 'must-have' for any serious retailer or decorator of faux antique furniture in the current market; in fact defendant's Products make a market in and of themselves. No other company rivals the quality, pricing or the extent of Oly's Products. . . .

(*Id*. P 15.)

In 2004, Plaintiff ordered $ 21,744.54 worth of merchandise from Oly. In 2005, Plaintiff ordered $ 18,613.12 worth of merchandise from Oly. "Due to the popularity of Oly's Products at its Original Store **[*4]** . . . and relying to its detriment on the promise by Oly to [Plaintiff] that Oly would supply it with Oly's Products, [Plaintiff] in 2006 prepared to open [the] New Store exclusively for Oly's products . . . ." (*Id*. P 18.) Plaintiff signed a six-year lease at the total cost of $ 400,000 and renovated the space for an additional $ 250,000 plus insurance costs to operate the New Store for the exclusive sale of Oly's products.

In January 2007, Plaintiff placed an order for $ 27,670.91 of Oly's products for the New Store. On January 28, 2007, Plaintiff's President met with Oly's Director and informed him that Plaintiff was opening a New Store for Oly's products and would soon be ordering an additional $ 100,000 worth of Oly's products to stock the New Store. Oly's Director responded that "he would have to secure permission from third-party Mecox in order to continue to sell Oly's Products to [Plaintiff]." (*Id*. P 21.) Mecox is large retailer of home furnishings, including Oly furniture, operating at least seven retail stores nationwide, two of which are located in Suffolk County. Mecox is alleged to be Oly's largest or one of Oly's largest accounts and purchases a significant amount of Oly **[*5]** furniture for resale to consumers in Suffolk County.

On March 9, 2007, after consulting with Mecox and before Plaintiff could place any additional orders with Oly, Oly sent a letter to Plaintiff terminating their business relationship effective that date. As a result of the termination, Plaintiff was forced to exit the business of selling faux antique furniture at its retail stores and was caused a great loss of current and future revenue.

Plaintiff alleges that the intent of Defendants' actions in "boycotting" Plaintiff was to maintain their monopolistic power over the Suffolk County market for faux antique furniture, or alternatively, Oly furniture; to use their enormous market power to prevent competition in Suffolk County; to drive Plaintiff out of the faux antique furniture business; and to discourage other retailers in the faux antique furniture business from expanding. Plaintiff further alleges that Defendants' actions have harmed consumers in Suffolk County "in that consumers have less market options for the purchase of Oly's Products because [P]laintiff, a retail competitor of Mecox has been forced out of the business of selling Oly's Products in Suffolk County, NY and other **[*6]** small competitors in that locality may not seek to purchase larger orders of Oly products for resale for fear of having their purchase agreements similarly terminated." (*Id*. P 31.)

The Complaint asserts seven causes of action, to wit: (1) Defendants committed a per se violation of Section 1 of the Sherman Act (*15 U.S.C. § 1*); (2) Defendants violated Section 1 of the Sherman Act under the rule of reason; (3) Mecox violated *Section 2* of the Sherman Act (*15 U.S.C. § 2*); (4) Defendants violated the Donnelly Act (*N.Y. Gen. Bus. L. § 340*); (5) breach of contract against Oly; (6) detrimental reliance against Oly; and (7) tortious interference with commercial relations against Mecox. Both Oly and Mecox have filed motions to dismiss. For the reasons stated below, Defendants' motions are granted.

DISCUSSION

I. *Motion to Dismiss: Legal Standards*

A complaint is subject to dismissal under *Rule 12(b)(6)* where it "fail[s] to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. The test is whether the plaintiff is entitled to offer evidence to support her claim, not whether he is ultimately likely to prevail. *Chance v. Armstrong, 143 F.3d 698, 701 (2d Cir. 1998)*. A court must liberally **[*7]** construe the claims and "accept[] all factual allegations in the complaint and draw[] all reasonable inferences in the plaintiff's favor." *ATSI Commcn's, Inc. v. Shaar Fund, Ltd., 493 F.3d 87, 98 (2d Cir. 2007)*.

Rule 8(a) provides that a pleading shall contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. The Supreme Court recently addressed the pleading standard applicable in evaluating a motion to dismiss under *Rule 12(b)(6)*. In *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, the Court disavowed the well-known statement in *Conley v. Gibson, 355 U.S. 41, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)* that "a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley, 355 U.S. at 45-46*. Instead, to survive a motion to dismiss under *Twombly*, a plaintiff must allege "only enough facts to state a claim to relief that is plausible on its face." *127 S. Ct. at 1974*.

> While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to **[*8]** provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Factual allegations must be enough to raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact).

Id. at 1964-65 (citations and internal quotation marks omitted).

The Second Circuit has stated that *Twombly* does not require a universally heightened standard of fact pleading, but "instead requir[es] a flexible 'plausibility standard,' which obliges a pleader to amplify a claim with some factual allegations in those contexts where such amplification is needed to render the claim *plausible*." *Iqbal v. Hasty, 490 F.3d 143, 157-58 (2d Cir. 2007)*. In other words, *Twombly* "'require[s] enough facts to 'nudge [plaintiffs'] claims across the line from conceivable to *plausible*.'" *In re Elevator Antitrust Litig., 502 F.3d 47, 50 (2d Cir. 2007)* (quoting *Twombly, 127 S. Ct. at 1974*).

II. *Plaintiff's Claims Under Section 1 of the Sherman Act (the First and Second Causes of Action) are Dismissed*

A. The Requirement that Plaintiff Plead an Adverse Effect [*9] on Competition in the Relevant Market

Section 1 of the Sherman act proscribes "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 1*. Thus, to state a Section 1 claim, a plaintiff must establish: "[1] a combination or some form of concerted action between at least two legally distinct economic entities that [2] constituted an unreasonable restraint of trade either per se or under the rule of reason." *PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 109 (2d Cir. 2002)* (citations and internal quotation marks omitted).

Here, Plaintiff's First Cause of Action alleges that Defendants' restraint of trade constituted a per se violation under Section 1. In response to Defendants' motions to dismiss, Plaintiffs have withdrawn this claim. Accordingly, Plaintiff's First Cause of Action is hereby dismissed.

Plaintiff's Second Cause of Action alleges that Oly's agreement with Mecox to restrain the trade of Oly furniture in Suffolk County constituted an unreasonable restraint of trade in violation of Section 1 under the rule of reason. The rule of reason analysis "seeks to determine **[*10]** if the alleged restraint is unreasonable because its 'anticompetitive effects outweigh its procompetitive effects.'" *E & L Consulting, Ltd. v. Doman Indus. Ltd., 472 F.3d 23, 29 (2d Cir. 2006)* (quoting *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))*. Under the rule of reason, plaintiff bears an initial burden to show that "defendants' challenged behavior 'had an *actual* adverse effect on competition as a whole in the relevant market.'" *Geneva Pharms. Tech. v. Barr Labs. Inc., 386 F.3d 485, 506-07 (2d Cir. 2004)* (quoting *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 543 (2d Cir. 1993))*; *see also* *E & L Consulting, 472 F.3d at 28* (stating that an injury to competition is an element of a prima facie Section 1 claim). "Because the antitrust laws protect competition as a whole, evidence that plaintiffs have been harmed as individual competitors will not suffice." *Geneva Pharms. Tech., 386 F.3d at 507*. It is axiomatic that "'[t]he antitrust laws . . . were enacted for the protection of *competition*, not *competitors*.'" *Paycom Billing Servs. v. Mastercard Int'l, Inc., 467 F.3d 283, 290 (2d Cir. 2006)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*.

If **[*11]** plaintiff satisfies its initial burden and demonstrates that the defendants' actions had an actual adverse effect on competition as a whole in the relevant market, "the burden shifts to the defendants to offer evidence of the pro-competitive effects of their agreement." *Geneva Pharms. Tech., 386 F.3d at 507*. "Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means." *Id*. "Ultimately, the factfinder must engage in a careful weighing of the competitive effects of the agreement-both pro and con-to determine if the effects of the challenged restraint tend to promote or destroy competition." *Id*.

B. Plaintiff Fails to Allege an Adverse Effect on Competition in the Relevant Market

Here, the Complaint alleges a vertical restraint between a manufacturer (Oly) and a distributor (Mecox). [1] Essentially Plaintiff alleges that Oly terminated its distribution agreement with Plaintiff at the behest of Mecox, a national distributor of Oly furniture. Defendants argue that Plaintiff's Section 1 claim fails as a matter of law because the only harm alleged **[*12]** in the Complaint was harm to Plaintiff and not to competition in the relevant market. For the reasons that follow, the Court agrees. The Court begins its analysis with a discussion of relevant Second Circuit case law.

1. ***Second Circuit Case Law on Harm to Competition***

A plaintiff can allege an adverse effect on competition in one of two ways. First, it can plead an actual adverse effect on competition by alleging "reduced output, increased prices and decreased quality." *Virgin Atl. Airways Ltd. v. British Airways PLC, 257 F.3d 256, 264 (2d Cir. 2001)*. Alternatively, it can plead adverse effect indirectly by alleging that defendants "had sufficient market power to cause an adverse effect on competition.'" *Id. at 265* (quoting *Top Mkts, Inc. v. Quality Mkts., Inc., 142 F.3d 90, 96 (2d Cir. 1998))*. "Market power is defined as 'the

---

[1] "Restraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints, and those imposed by agreement between firms at different levels of distribution as vertical restraints." *Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*.

ability of a single seller to raise price[s] and restrict output.'" *Id*. **[*13]** (quoting *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 464, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992))*.

In *Elecs. Commc'ns. Corp. v. Toshiba Am. Consumer Prods., Inc., 129 F.3d 240 (2d Cir. 1997)*, the plaintiff alleged that it entered into an agreement with defendant Toshiba America Consumer Products, Inc. ("Toshiba") whereby plaintiff became a distributor of Toshiba-brand cellular phones in the United States. Prior to this alleged agreement, these cellular phones were sold in the United States exclusively by defendant Audiovox Corp. ("Audiovox") under the Audiovox name. *Id. at 241*.

Plaintiff further alleged that when Audiovox learned of Toshiba's plan to distribute phones under the Toshiba brand name through other distributors, Audiovox threatened to use economic and political pressure to deter Toshiba. Despite repeated reassurances to plaintiff that the relationship would continue, Toshiba thereafter terminated its agreement with plaintiff. *Id. at 242*.

Finding that plaintiff failed to allege how the agreement between Toshiba and Audiovox reduced competition in the market for cellular phones, and noting that the Toshiba phones were still on the market, albeit under the Audiovox brand name, the district court **[*14]** granted defendants' *Rule 12(b)(6)* motion and dismissed the case. *Id*. On appeal, the Second Circuit affirmed, finding as follows:

> [Plaintiff's] allegations, if true, establish nothing more than that Audiovox sought to preserve its role as an exclusive distributor of Toshiba phones, a role it played for many years before Toshiba tried to distribute Toshiba-brand phones through [plaintiff]. This is a so-called vertical restraint. . . .
> To state a claim under section 1, it is not enough merely to allege that, as a result of the agreement between Toshiba and Audiovox, Toshiba-brand cellular phones no longer compete against Audiovox-brand cellular phones. The fact remains that the dispute involves one manufacturer's product, Toshiba cellular phones. Although two brand names are involved, this is essentially a dispute about the way one product is distributed, a question of intrabrand competition. . . . [A]n actual adverse effect on interbrand competition is not established merely because an agreement removes from the marketplace one brand name under which a manufacturer's products are sold.
>
> Nor is it a violation of the antitrust laws, without a showing of an actual adverse effect on competition **[*15]** market-wide, for a manufacturer to terminate a distributor like [plaintiff] and to appoint an exclusive distributor. . . . *see also* *Burdett Sound, Inc. v. Altec Corp., 515 F.2d 1245, 1249 (5th Cir. 1975)* ("Lest any other former distributors succumb to the temptation of treble damages, we reiterate that it is simply not an antitrust violation for a manufacturer to contract with a new distributor, and as a consequence, to terminate his relationship with a former distributor, even if the effect of the new contract is to seriously damage the former distributor's business.") . . . . [T]he allegations in [plaintiff's] complaint establish nothing more than a run-of-themill exclusive distributorship controversy, where a former exclusive distributor is attempting to protect its competitive position vis a vis its supplier. Such exclusive distributorship arrangements are presumptively legal.
>
> The allegations in [plaintiff's] complaint, if true, do not establish that the agreement between Audiovox and Toshiba adversely affects market-wide competition. [Plaintiff] rests its entire case on the fact that the Toshiba name will no longer be available in the cellular telephone market, calling this a reduction **[*16]** in output of Toshiba phones that benefits only Audiovox. Toshiba phones, however, will still be available, presumably in whatever number is demanded by consumers. The complaint does not allege how Audiovox could sensibly reduce its sales of the phones and increase its prices. The allegations show, at most, a slight reduction in competition between Audiovox and Toshiba regarding the distribution of Toshiba-manufactured phones. It is settled, however, that to sustain a section 1 claim, a plaintiff must . . . show more than just an adverse effect on competition among different sellers of the same product. . . .
> Although competition from Toshiba could deter Audiovox from attempting to increase its margin on Toshiba phones by increasing price, the Toshiba-[plaintiff] endeavor was very limited in scope and would have had only a limited effect on Audiovox sales. In any event, ECC has not alleged how this slight reduction in intrabrand competition affects the market as a whole, given the continuing presence of Toshiba phones in the market-in

> whatever number consumers demand-and the lack of an allegedly anticompetitive agreement between Toshiba or Audiovox and their competitors.
>
> . . . .
>
> While **[*17]** Audiovox very well may have brought pressure to bear on Toshiba to preserve its role as an exclusive distributor of Toshiba products, that is not illegal without more. In the absence of pricefixing, agreements to terminate distributors, even at the behest of competing distributors who seek to maintain exclusive distribution rights, have repeatedly been sanctioned by the courts. . . . [citing cases] Manufacturers must enjoy some freedom to determine how to distribute their products without subjecting themselves to attack under the antitrust laws by disappointed distributors, absent activity that is manifestly anticompetitive. The fact that a distributor applies pressure to preserve its exclusive role does not alone raise special antitrust concerns.
>
> As we reasoned in *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 543 (2d Cir. 1993)*, "[i]nsisting on proof of harm to the whole market fulfills the broad purpose of the ***antitrust law*** that was enacted to ensure competition in general, not narrowly focused to protect individual competitors." While [plaintiff's] allegations suggest that it was harmed by Toshiba's decision to terminate it as a distributor, they **[*18]** do not show that the agreement threatens to harm overall competition in the cellular telephone market.

Id. at 243-246 (citations and internal quotation marks omitted).

Similarly, in *E & L Consulting*, the plaintiff was the distributor of green hem-fir lumber in New York, New Jersey, and Pennsylvania for defendant Doman Industries Limited ("Doman") and a Doman subsidiary. [2] Doman and its subsidiary supplied 95 percent of the green hem-fir lumber sold in New York, New Jersey, Pennsylvania, as well as other locations. *472 F.3d at 26*.

Doman thereafter terminated its relationship with plaintiff and notified its customers that Sherwood Lumber Corp. ("Sherwood") had become its exclusive distributor in the areas previously served by plaintiff. *Id. at 27*. Alleging that there were no commercially feasible alternative sources of green hem-fir lumber, plaintiff and the companies it did business under ("plaintiffs") brought an antitrust suit against Doman and Sherwood, which moved to dismiss the complaint under *Rule 12(b)(6)*. *Id*. The district court granted defendants' motion, **[*19]** finding that the complaint failed to adequately allege a relevant product market or injury cognizable under the antitrust laws. *Id. at 28*. The Second Circuit affirmed.

Analyzing plaintiffs' Section 1 claims under the rule of reason, the Circuit found that:

> [Plaintiffs] allege . . . the exclusive distributorship with Sherwood further harms competition. However, [plaintiffs'] hypothesizing of an unreasonable effect on competition fails because such a vertical arrangement provides no monopolistic benefit to Doman that it does not already enjoy and would not continue to enjoy if the exclusive distributorship were enjoined. To put it another way, had Doman established its own in-house distribution system with the same monopoly that Sherwood is alleged to possess, there would have been no increase in the restriction of output of green hem-fir lumber and in the resultant misallocation of resources.
>
> Indeed, an exclusive distributorship would be counterproductive so far as any monopolization goal of Doman is concerned. A monopolist manufacturer of a product restricts output of the product in order to maximize its profits. The power to restrict output to maximize profit is complete in the manufacturing **[*20]** monopoly, and there is no additional monopoly profit to be made by creating a monopoly in the retail distribution of the product. On the contrary, a firm with a monopoly at the retail distribution level will further reduce output to maximize its profits, thereby reducing the sales and profit of the monopoly manufacturer. Like any seller of a product, a monopolist would prefer multiple competing buyers unless an exclusive distributorship arrangement provides other benefits in the way of, for example, product promotion or distribution. In fact, we have explicitly noted that a vertically structured monopoly can take only one monopoly profit.

---

[2] Green hem-fir lumber is an inexpensive, durable wood that is often used for homebuilding. *See E & L Consulting, 472 F.3d at 26*.

> The only detriment to competition alleged to result from the Doman-Sherwood agreement is that "end-users of lumber and finished wood products have fewer options to purchase their required supplies and are now required to pay artificially inflated prices." This, by itself, is not a sufficient allegation of harm to competition caused by the exclusive distributorship, again, because the alleged single source and price increase, even if monopolistic, is something Doman can achieve without the aid of a distributor.
>
> Thus, we have noted that "exclusive distributorship **[*21]** arrangements are presumptively legal." *Elecs. Commc'ns. Corp., 129 F.3d at 245*. . . .

Id. at 29-30 (internal citations and quotation marks omitted) [3]; *see also* *Re-Alco Indus., Inc. v. Nat'l Ctr. for Health Educ., Inc., 812 F. Supp. 387, 392 (S.D.N.Y. 1993)* ("An exclusive distributorship agreement between a manufacturer and a distributor causing harm to another distributor is not, standing alone, sufficient to show antitrust injury. . . . The intent to harm a particular competitor is not actionable, even if a distributor-competitor is put out of business.").

2. *Application [*22] to Plaintiff's Allegations*

This case is directly analogous to *Elecs. Commc'ns. Corp*. and *E & L Consulting*. Similar to those cases, Plaintiff alleges that Oly and Mecox entered into an agreement to black list Plaintiff from selling Oly furniture. Plaintiff then attempts to convert its individual injury into an injury to consumers, alleging that:

> Defendants' actions have harmed consumers in Suffolk County, NY in that consumers have less market options for the purchase of Oly's Products because plaintiff, a retail competitor of Mecox has been forced out of the business of selling Oly's Products in Suffolk County, NY and other small competitors in that locality may not seek to purchase larger orders of Oly products for resale for fear of having their purchase agreements similarly terminated. . . .

(Compl. P 31.) Even if the Court were to accept that the sale of Oly furniture in Suffolk County created a market in and of itself [4] the Complaint fails to adequately allege harm to competition in this market. Plaintiff's claim was squarely rejected in *E & L Consulting* where the Circuit found that just because "end-users" had fewer purchase options and were required to pay artificially inflated **[*23]** prices, a harm to competition was not alleged: "[T]he alleged single source and price increase, even if monopolistic, is something [Oly] can achieve without the aid of a distributor." *472 F.3d at 30*.

Here, Plaintiff does not even allege that Suffolk County consumers will be required to pay higher prices. Instead, Plaintiff only alleges that these consumers will be unable to purchase Oly furniture through Plaintiff and other small competitors who **[*24]** "may not seek to" do business with Oly for fear of having their agreements terminated. Plaintiff does not dispute, however, that these consumers will still be able to purchase Oly furniture through Mecox, a nationwide distributor with two stores in Suffolk County. Simply put, the fact that consumers can no longer purchase Oly furniture from Plaintiff or other hypothetical small retailers does not amount to an injury to competition as a whole. *See* *Floors-N-More, Inv. v. Freight Liquidators, 142 F. Supp. 2d 496, 502 (S.D.N.Y. 2001)* ("The fact that customers can no longer purchase Ashley furniture products (or products from Hickory or Stanley) at Floors-N-

---

[3] Citing *Geneva Pharms., 386 F.3d 485*, the Circuit noted that it has "never held that all exclusive arrangements are reasonable as a matter of law." *472 F.3d at 30*. However, plaintiff has not argued, nor could it, that *Geneva Pharms*. is applicable to its case. *See id*. (distinguishing *Geneva Pharms*. as a case involving "an allegation of two temporary, related monopolies in different products, a drug and its active ingredient[;] Moreover, the two firms, which had overlapping ownership, were jointly involved in predatory practices designed to extend their respective temporary monopolies by deterring entry by competitors.").

[4] Although Plaintiff's Complaint can be construed as alleging the relevant market to be both the faux antique furniture market in Suffolk County as well as only Oly furniture in Suffolk County, in its opposition papers, Plaintiff limits the relevant market to the latter. In essence, Plaintiff argues that Oly furniture is a market in and of itself due to its uniqueness. In moving to dismiss, Defendants argue that not only does the Complaint fail to allege an adverse effect on competition in the relevant market, but that it also fails to adequately define the relevant market. Because the Court finds the Complaint deficient with respect to the former argument, it need not, and does not, address whether Plaintiff's market allegations are sufficient.

More does not mean that competition has been harmed. For instance, plaintiffs have not alleged that Freight Liquidators is now the only store in the geographic market where customers can purchase products made by the manufacturers, or that prices for the manufacturers' furniture have been affected.").

In its opposition papers, Plaintiff attempts to distinguish *E & L Consulting* as follows:

> While it may be true that there is no additional profit in creating a monopoly in the retail distribution of a product in said restricted market, if **[*25]** a manufacturer agrees to the request of a retailer that has retail stores nationwide to stop the sale of the manufacturers' product to the competitor of the national retailer in a specific geographic market in exchange for the national retailer's promise to increase its purchase of the manufacturer's products at its other locations in its several geographic markets, then the manufacturer could receive an additional profit -- an increase in the sale of its product nationally over and above any losses it incurred by restricting the sale of its product in one geographic market -- in creating a monopoly for the retail distribution of its product by restricting certain geographic market.

(Pl.'s Mem. of Law in Opp'n to Oly's Mot. at 10-11.) Although Plaintiff concedes that "this situation has not to Plaintiff's knowledge been brought before this Court," Plaintiff urges that the *E & L Consulting* decision be limited so as not to apply to this case. (*Id*. at 11.)

The Court finds that Plaintiff's attempt to distinguish *E & L Consulting* is unavailing. Applying Plaintiff's hypothetical example, which is not pled in the Complaint, to the facts of this case, Plaintiff essentially argues that the agreement **[*26]** between Oly and Mecox harms competition as a whole in the Oly furniture market in Suffolk County because Mecox, a national distributor, agreed to purchase more Oly furniture for distribution at its other locations nationwide in exchange for Oly's promise to terminate its agreement with Plaintiff, a local Suffolk County distributor. In other words, consumers in Suffolk County are injured because the sale of Oly furniture in that locale is limited, presumably because Plaintiff is no longer able to sell Oly furniture there. The Court fails to see how Plaintiff's hypothetical removes Plaintiff's claim from the purview of *E & L Consulting*. The scenario proposed by Plaintiff -- manufacturer terminates agreement with local distributor and enters into exclusive relationship with nationwide retailer to ensure broad distribution of its product -- is exactly what the *E & L Consulting* case, as well as the *Elecs. Commc'ns. Corp*. decision, contemplated as an acceptable, legal business relationship. At the end of the day, Plaintiff's proposed hypothetical boils down to the same claim rejected repeatedly in the governing case law, to wit, simply because Suffolk County consumers can no longer purchase **[*27]** Oly furniture from Plaintiff does not mean that competition as a whole has been adversely affected. Moreover, as noted in *E & L Consulting*, there is no anticompetitive incentive for a manufacturer to create a monopoly in retail distribution of its product. *472 F.3d at 30* (noting that "[t]here is no additional monopoly profit to be made [for a monopolist manufacturer] by creating a monopoly in the retail distribution of the product").

In sum, the court finds that Plaintiff's allegations do not satisfy the requirement that Plaintiff demonstrate market-wide injury to competition. As in *Elecs. Commc'ns. Corp*. and *E & L Consulting*, Plaintiff's allegations are "a run-of-the-mill exclusive distributorship controversy, where a former . . . distributor is attempting to protect its competitive position vis a vis its supplier." *E & L Consulting, 472 F.3d at 31*; *Elecs. Commc'ns. Corp., 129 F.3d at 245*. Since "exclusive distributorship arrangements are presumptively legal," *Elecs. Commc'ns. Corp., 129 F.3d at 245*, it was incumbent on Plaintiff to plead further facts plausibly suggesting an adverse effect on competition in the relevant market. Plaintiff has failed to do so. Accordingly, Plaintiff's **[*28]** First and Second Causes of Action alleging violations of Section 1 of the Sherman Act are dismissed.

III. *Plaintiff's Claim Under Section 2 of the Sherman Act (the Third Cause of Action) is Dismissed*

Plaintiff's third cause of action asserts a violation of *Section 2* of the Sherman Act against Mecox only. *Section 2* provides that a person shall not "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize . . . ." *15 U.S.C. § 2*. "A viable claim under *Section 2* challenging a distributorship agreement must, like a Section 1 claim, show a harm to competition." *E & L Consulting, 472 F.3d at 31*; *see also Elecs. Commc'ns. Corp., 129 F.3d at 246* ("The agreement between Audiovox and Toshiba cannot harm competition, and therefore cannot serve to further an alleged monopolization scheme."). Because Plaintiff has failed to allege a harm to competition, its *Section 2* claims are dismissed as well.

IV. *Leave to Amend is Denied*

Plaintiff does not move for leave to amend, either formally or informally, with regard to its federal antitrust claims. In fact, its brief makes no mention of it. Although this Court would well be within its discretion to deny **[*29]** leave to amend on that ground alone, *see* *Shields v. Citytrust Bancorp., Inc., 25 F.3d 1124, 1132 (2d Cir. 1994)* [5] ("Although federal courts are inclined to grant leave to amend following a dismissal order, we do not deem it an abuse of the district court's discretion to order a case closed when leave to amend has not been sought."), the Court notes that leave to amend is also not warranted in this case because any amendment would be futile. *See* *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)* (futility of amendment ground for denial of motion). Here, Plaintiff has not provided the Court with, or suggested the existence of, any new facts which could cure its pleading deficiencies. *Compare* *In re Tamoxifen Citrate Antitrust Litig., 466 F.3d 187, 220 (2d Cir. 2006)* ("It is within the court's discretion to deny leave to amend implicitly by not addressing the request when leave is requested informally in a brief filed in opposition to a motion to dismiss. . . . Furthermore, where amendment would be futile, denial of leave to amend is proper.") (citation omitted); *Porat v. Lincoln Towers Community Assoc., 464 F.3d 274, 276 (2d Cir. 2006)* ("A counseled plaintiff is not necessarily entitled to a remand **[*30]** for repleading whenever he has indicated a desire to amend his complaint, notwithstanding the failure of plaintiff's counsel to make a showing that the complaint's defects can be cured."). As discussed more fully above, Plaintiff's allegations -- which arise solely out of Oly's termination of its distribution agreement with Plaintiff -- fail to allege harm to competition in a manner that the antitrust laws were meant to guard against. Accordingly, although no applications have been made, the Court declines to grant Plaintiff leave to amend its federal antitrust claims.

V. *Plaintiff's State Law Claims are Dismissed Without Prejudice*

Having found that Plaintiff's federal claims fail as a matter of law, there is no longer any independent basis for federal jurisdiction. Although the Court has the discretion to exercise supplemental jurisdiction over Plaintiff's remaining state law claims, *see* *29 U.S.C. § 1367(a)*, it declines to do so as resolution of the state claims would **[*31]** require the determination of additional factual and legal issues. *See* *28 U.S.C. § 1367(c)(3)* ("The district court may decline to exercise supplemental jurisdiction over a claim . . . if . . . the district court has dismissed all claims over which it has original jurisdiction . . . ."); *N.Y. Mercantile Exch., Inc. v. Intercontinental Exchange, Inc., 497 F.3d 109, 119 (2d Cir. 2007)* (holding that dismissal of remaining state claims after the dismissal of federal claims is particularly appropriate where the resolution of the state law claims entails resolving additional legal and factual issues), *cert. denied*, *128 S. Ct. 1669, 170 L. Ed. 2d 357 (2008)*. "Since [*New York CPLR § 205*] allows a plaintiff to recommence a dismissed suit within six months without regard to the statute of limitations, plaintiff[] will not be prejudiced by the dismissal of [its state law] claims." *Tishman v. The Associated Press, 2007 U.S. Dist. LEXIS 85588, 2007 WL 4145556, at *9 (S.D.N.Y. Nov. 19, 2007)* (citations and internal quotation marks omitted). Accordingly, Plaintiff's state law claims are dismissed without prejudice.

CONCLUSION

For the foregoing reasons, Defendants' motions to dismiss the Complaint are GRANTED. The First, Second, and Third Causes of **[*32]** Action are hereby dismissed WITH PREJUDICE. The remaining state law claims are dismissed WITHOUT PREJUDICE. Oly's motion for a more definitive statement and to strike Plaintiff's demand for exemplary damages and attorneys' fees under Plaintiff's state law causes of action is dismissed without prejudice to renew in state court. The Clerk of the Court is directed to close this case.

---

[5] The *Shields* decision was superseded by statute on other grounds, Private Securities Litigation Reform Act, *15 U.S.C. § 78u-4*, as recognized in *In re Paracelsus Corp. Sec. Litig., 61 F. Supp. 2d 591, 595 (S.D. Tex. 1998)*.

Opinion

OPINION AND ORDER

This case concerns a pet store franchise. Plaintiffs bring this action under the Section 1 of the Sherman Act, *15 U.S.C. § 1*, and the Racketeer Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. § 1962(c)*. Plaintiffs also assert state law claims for violation of Ohio's statutory antitrust laws, fraud, breach of contract, breach of implied contract, negligent misrepresentation, and breach of implied **[*2]** and express warranties.

This matter is before the Court on defendants' motion to dismiss for failure to state a claim upon which relief can be granted and for lack of subject matter jurisdiction pursuant to *Fed. R. Civ. P. 12(b)(6)* and *(1)*. (Doc. 14). For the following reasons, the Court grants defendants' motion to dismiss in part and denies it in part.

I. Facts

The Court derives the following facts from plaintiffs' amended complaint. The Court accepts these facts as true for purposes of ruling on defendants' motion to dismiss.

Plaintiffs Lucinda S. Arnold and Fred J. Arnold (collectively "Arnolds" or "plaintiffs") are individual citizens of the State of Ohio. The Arnolds had a partnership in Marietta, Ohio for the purpose of opening and operating a Petland franchise.

Defendant Petland, Inc. ("Petland") is an Ohio corporation with its principal place of business in Chillicothe, Ohio. Petland is a franchisor in the pet and pet supply industry.

Defendants Hunte Kennell Systems & Animal Care, Inc. and Hunte Delivery System, Inc. (collectively, "Hunte") are in the business of supplying puppies to pet stores, and have their principal place of business in Missouri. Hunte is a preffered supplier **[*3]** of puppies to Petland, and supplied puppies to the Arnold's Petland franchise.

In about 2004, the Arnolds noticed an advertisement in a local newspaper concerning the opening of a Petland franchise in Marietta. The Arnolds responded to the advertisement and spoke with Petland representatives about purchasing the franchise. The franchise would have required an initial capital investment of $ 750,000 to $ 850,000, and the Arnolds decided not to pursue the matter further at that time. Petland built the Marieta store, however, and ran it as a corporate store until it found a franchisee to take over the operation.

Some time later, Petland contacted the Arnolds and offered to sell them the Marietta store for over $ 400,000. The Arnolds made a counteroffer, which Petland refused. In November 2006, the Marietta Petland closed for business. About a month later, Petland representative Jimmy Taylor contacted the Arnolds, offering to sell them the Marietta franchise as an existing, turn-key business. Petland represented to the Arnolds that the store was ready to open, requiring only a $ 20,000 to $ 25,000 investment in inventory.

The Arnolds investigated the offer, negotiated with Petland, and on **[*4]** February 28, 2007 entered into a franchise agreement with Petland. Under the franchise agreement, the Arnolds paid Petland an initial franchise fee of $ 12,500. Under a separate asset purchase agreement, the Arnolds bought the store's fixtures, equipment, inventory, and related assets for $ 110,000. The Arnolds paid another $ 50,000 to open the store, and spent an additional $ 50,000 to keep the store open for just over six months.

Responding to pressure from Petland, the Arnolds held the grand opening for the Marietta store on March 31, 2007. Prior to the opening, Petland placed an order for puppies for the grand opening through it's preferred supplier, Hunte. The puppies were sick from the very outset. Customers who purchased these puppies returned them within days. Two of the first puppies sold during the grand opening died from parvo and/or viral enteritis within days of sale. A third puppy from the initial Hunte order also died. The remaining puppies all showed symptoms of illness, requiring the Arnolds to obtain veterinary care for them at the Arnold's substantial expense. Customers also purchased pet food from the store's existing inventory. The customers soon began returning **[*5]** the pet food for full refunds because the expiration date for the food had passed. Other pet food was returned because it contained maggots. The Arnolds aver the problems with the sick puppies and expired food significantly harmed the store's bottom line as well as its reputation in the community. The Arnolds also faced problems with the store's Point-of-Sale ("POS") register system, which malfunctioned during the entire six-plus months the store was open. The system apparently crashed at times and would not accept credit card transactions after 8:00 p.m. Finally, the store's air conditioning and ventilation system was defective, which exacerbated the problems with the sick Hunte puppies.

The Arnolds allege that as a result of the aforementioned problems, by September 2007, the Marietta franchise was in deep financial trouble. For this reason, the Arnolds contacted Petland in an effort to obtain financial assistance from Petland's preferred lenders. Petland COO Greg Hudson informed the Arnolds that no financial help would be forthcoming from Petland. Instead, Hudson advised the Arnolds to stop paying their vendors, and to pay only the bank, the landlord, and Petland. Hudson warned the **[*6]** Arnolds that if they stopped paying franchise fees, Petland would "eat them for lunch." The Arnolds say that financial difficulties forced them to close the Marietta store on October 13, 2007.

The Arnolds maintain that Petland knowingly and deliberately made numerous misrepresentations to them in order to induce them to purchase the Marietta franchise. Specifically, Petland represented that it would cost the Arnolds only $ 20,000 to $ 25,000 for additional inventory to open the store, when in fact Petland knew the Arnolds would also have to spend an additional $ 25,000 to purchase animals. In addition, Petland repeatedly told the Arnolds the financials for the last two months of the prior franchisee's operation of the store were "very strong," but the Arnolds later discovered that the actual performance of the store during that period was well below what Petland had represented. Furthermore, Petland provided the Arnolds false and misleading information regarding the store's then-current inventory by failing to inform them that thousands of dollars worth of pet food on the shelves had expired, with some infested with maggots, making the inventory unmerchantable and worthless. Moreover, **[*7]** Petland mislead the Arnolds by telling them that the prior Marietta franchisee failed due to poor management, when in fact Petland knew the earlier franchise failed because of problems with sick puppies, inadequate air conditioning and ventilation, and the defective POS system.

The Arnolds filed the instant lawsuit on December 31, 2007. Their first complaint asserted only state law claims. Given that the Arnolds are Ohio citizens, and that Petland is an Ohio corporation, January 30, 2008, defendants moved to dismiss the action for lack of diversity of citizenship. (Doc. 5). The Arnolds responded on April 25, 2008 by filing an amended complaint, in which they assert the following claims:

Count I -- illegal tying under *§ 1* if the Sherman Act (*15 U.S.C. § 1*) as to defendant Petland

Count II -- conspiracy to commit illegal tying under *§ 1* of the Sherman Act (*15 U.S.C. § 1*) as to defendants Petland and Hunte

Count III -- civil RICO (*18 U.S.C. § 1962(c)*) as to defendant Petland

Count IV -- violation of Ohio ***antitrust law***, *Ohio Rev. Code § 1331.01 et seq*. As to defendants Petland and Hunte
Count V -- fraud as to defendant Petland
Count VI -- fraud in the inducement as to defendant Petland

Count VII **[*8]** -- breach of express contract as to defendant Petland
Count VIII -- breach of implied contract as to defendant Petland
Count IX -- negligent misrepresentation as to defendant Petland
Count X -- violation of implied and express warranties of merchanability as to defendant Hunte
(Doc. 10). Defendants thereafter filed a second motion to dismiss in which they argue that plaintiffs' federal antitrust and RICO claims fail to state a claim upon which relief can be granted, and that the Court should decline to exercise supplemental jurisdiction over plaintiffs' state law claims. (Doc. 14).

II. Motion to Dismiss

Defendants move in part to dismiss plaintiffs' complaint under *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim upon which relief can be granted. The Supreme Court has explained that "a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do . . . . Factual allegations must be enough to raise a right to relief above the speculative level . . . ." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 1964-65, 167 L. Ed. 2d 929 (2007)* (internal citations omitted). Nonetheless, **[*9]** the Supreme Court has also made clear that "*Federal Rule of Civil Procedure 8(a)(2)* requires only 'a short and plain statement of the claim showing that the pleader is entitled to relief.' Specific facts are not necessary; the statement need only 'give the defendant fair notice of what the … claim is and the grounds upon which it rests.'" *Erickson v. Pardus, 551 U.S. 89, 127 S.Ct. 2197, 2200, 167 L. Ed. 2d 1081*

(2007) (quoting Twombly, 127 S.Ct. at 1964). Moreover "when ruling on a defendant's motion to dismiss, a judge must accept as true all of the factual allegations contained in the complaint." *Id*. (citing Twombly, 127 S.Ct. at 1965).

Additional considerations apply in antitrust cases. On the one hand, the Court must be cautious in dismissing an antitrust claim prior to discovery. Twombly, 127 S.Ct. at 1966-67. On the other hand, the Court must be mindful that discovery in an antitrust action can be expensive." Id. at 1967.

Furthermore, plaintiffs assert mail and wire fraud as the predicate acts for their RICO claim. The claim is therefore subject to the heightened pleading requirements of Fed. R. Civ. P. 9(b). *See* Brown v. Cassens Trans. Co., 546 F.3d 347, 356 n.4 (6th Cir. 2008). Rule 9(b) provides: "In alleging **[*10]** fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake. Malice, intent, knowledge, and other conditions of a person's mind may be alleged generally." Fed. R. Civ. P.9(b). A complaint satisfies Rule 9(b) particularity requirement for fraud if it alleges: the time, place, and content of the alleged misrepresentation; the fraudulent scheme; the fraudulent intent of the defendant; and the injury resulting from the fraud. U.S. ex rel. Poteet v. Medtronic, Inc., 552 F.3d 503, 518 (6th Cir. 2009). In addition, even when a plaintiff's RICO allegations fail to satisfy the particularity requirement, the Court may allow discovery to proceed under Fed. R. Civ. P. 11 (b)(3). *See* Brown, 546 F.3d at 356 n.4; Rotella v. Wood, 528 U.S. 549, 560, 120 S. Ct. 1075, 145 L. Ed. 2d 1047 (2000) (In RICO action Rule 11(b)(3) provides "flexibility to allow pleadings based on evidence reasonably anticipated after further discovery."); *accord* Michaels Building Co. v. Ameritrust Co., 848 F.2d 674, 679-81 (6th Cir. 1988).

III. Discussion

Defendants seek dismissal of plaintiffs' antitrust and RICO claims, arguing plaintiffs have failed to state a claim upon which relief can be granted. Furthermore, defendants **[*11]** contend that since plaintiffs' federal claims must be dismissed the Court should decline to exercise supplemental jurisdiction over plaintiffs' state law claims.

A. Antitrust

Section 1 of the Sherman Act provides: "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." 15 U.S.C. § 1. Plaintiffs in the instant case assert a type of antitrust violation known as "tying." The U.S. Supreme Court has defined a tying arrangement as "an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier." Eastman Kodak Co. v. Image Tech. Servs., 504 U.S. 451, 461, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992). For example, "[a] supermarket that will sell flour to consumers only if they will also buy sugar is engaged in tying. Flour is referred to as the *tying* product, sugar as the *tied* product." Jefferson Parish Hosp. Dist No. 2 v. Hyde, 466 U.S. 2, 33, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984) (O'Connor, J., concurring) (emphasis in original), *abrogated on other grounds,* Illinois Tool Works, Inc. v. Independent Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006).

A **[*12]** plaintiff asserting a claim of illegal tying must allege: (1) the seller has appreciable economic power in the tying product market; (2) the tying arrangement affects a substantial volume of commerce in the tied market; (3) the seller has a direct economic interest in the sale of the tied product; and (4) the plaintiff has suffered antitrust injury as a result of the tying arrangement. CTUnify, Inc. v. Nortel Networks, Inc., 115 Fed. Appx. 831, 834 (6th Cir. 2004).

Defendants advance three grounds for dismissal of plaintiffs' tying claims: (1) plaintiffs have incorrectly defined the relevant product market; (2) plaintiffs have not and cannot allege that defendant Petland has sufficient market power; and (3) plaintiffs have not and cannot allege that Petland has a direct economic interest in the alleged tied products. The Court finds it unnecessary to address the third argument, as the first two are clearly dispositive.

1. Relevant product market

Defendants first argue that the Court must dismiss plaintiffs' antitrust claims because plaintiffs have improperly defined the relevant tying product market. Plaintiffs aver that the relevant product market is the market for pet store franchises.

For **[*13]** the proposition that plaintiffs have failed to plead the relevant product market, defendants' rely upon the decision of the district court in *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 922 F.Supp. 1055, 1064 (E.D. Pa. 1996)*, *aff'd*, *124 F.3d 430 (3d Cir. 1997)*. The plaintiffs in *Queen City* were individual franchisees of Domino's pizza stores as well as an organization formed to represent franchisees. The plaintiffs alleged that Domino's used provisions of the franchise agreements to force the franchisees to purchase pizza ingredients and supplies, such as dough, at inflated prices from a Domino's subsidiary, thereby preventing the franchisees from obtaining ingredients at competitive prices from other sources. The plaintiffs asserted this conduct amounted to an illegal tying arrangement in violation of *§ 1* of the Sherman Act.

The defendant in *Queen City* moved to dismiss under *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim, arguing that the plaintiffs failed to allege a relevant product market, and that to the extent the plaintiffs maintained the relevant product market was the market for ingredients and supplies among Domino's franchisees, the market definition was incorrect **[*14]** as a matter of law. The district court granted the motion to dismiss, holding that the market the plaintiffs identified arose from the contractual power Dominos exercised under the franchise agreement, and therefore did not support an antitrust claim. *Queen City, 922 F.Supp. at 1062*.

The district court in *Queen City* recognized that the relevant market is determined by examining the cross-elasticity of demand, or, the degree to which a rise in the price of the product creates a rise in the demand for like products in that market. *Id. at 1061*. It drew a sharp distinction between a franchisor's pre-contractual market power versus the post-contractual power the franchisor possesses under the franchise agreement. *Id. at 1061*. The district court embraced the concept, posited by two commentators, that the post-contractual power a franchisor derives from a franchise agreement "has nothing to do with market power, ultimate consumers' welfare, or antitrust." *Id. at 1062* (quoting Benjamin Klien & Lester Saft, *The Law and Economics of Franchise Tying Contracts*, 28 J.Law & Econ. 345, 356 (1985)). Applying this principle, the district court held that "antitrust claims predicated upon a 'relevant **[*15]** market' defined by the bounds of a franchise agreement are not cognizable." *Id. at 1063*. The district court further rejected the plaintiffs' contention that a contrary result was required under the U.S. Supreme Court's decision in *Eastman Kodak.* .*Id at 1062-63*. The district court distinguished *Eastman Kodak* on the ground that *Eastman Kodak* turned upon the unique nature of Kodak's copy equipment. *Id*. On appeal, the Third Circuit affirmed the judgment of the district court. *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 444 (3d Cir. 1997)*.

The *Queen City* decisions rest on the principle that a product market cannot be defined by contractual restraints on the plaintiff franchisee. In *Queen City*, the plaintiffs ostensibly defined the relevant market as the market for ingredients and supplies among Domino's franchisees, which they were obligated to purchase under the terms of the franchise agreements. Here, in contrast, plaintiffs do not restrict their relevant market allegations to the market for goods and services associated with the operation of a Petland Franchise. Rather, plaintiffs identify the relevant tying product market as the market for pet store franchises. Dicta **[*16]** aside, neither *Queen City* decision compels the conclusion that the market for pet store franchises is not the relevant market in the instant case.

Defendants nonetheless argue that the relevant market in this case is, at the narrowest, the market for retail franchises. They maintain the market for pet store franchises is fatally narrow because it fails to include all equivalent investment opportunities. In support of these arguments, defendants cite *Westerfield v. Quizno's Franchise Co., 527 F. Supp. 2d 840, 857 (E.D. Wis. 2007)*, *vacated in part on other grounds*, *No. 06-C-1210, 2008 U.S. Dist. LEXIS 74398, 2008 WL 2512467 (E.D. Wis. Apr. 16, 2008)*. The court in *Westerfield* observed that the relevant product market includes "'all products that have reasonable interchangeability for the purposes for which they are produced -- price, use, and qualities considered.'" *Id. at 857* (quoting *United States v. E.I. Dupont de*

Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)). It further concluded that "[i]n the area of franchises such as Quiznos, the relevant product market would include equivalent investment opportunities." *Id*.

> From the perspective of sound analysis and consistency with the fundamental legal principle, it is patent **[*17]** that-at the minimum-a franchisor market power assessment requires reference to all alternatives available to the potential consumer in a broad line of business endeavors. In many cases this will extend to the market for franchises of all types or the employment of capital. For market power to exist there must be something that shows that, pre-contract, the seller had the power to force a potential franchisee to purchase something that would not have occurred in a competitive market-a requirement drawn directly from *Jefferson Parish*.

Id. (quoting Alan Silberman, *Myths of Franchise "Market Power*", 65 Antitrust L.J. 181, 206 (1996)). The plaintiff franchisees in *Westerfield* asserted that the relevant product market was the market for "Quick Service Toasted Sandwich Restaurant Franchise[s]" *Id. at 858*. The *Westerfield* court found this assertion to be "patently absurd," explaining:

> It may well be that Quiznos holds substantial market power for those investors who wish to purchase a fast food franchise that sells toasted submarine sandwiches. But that's like saying that the seller of any franchise known for a particular product has market power over investors who are already determined to **[*18]** sell such a product. That cannot be the test. The mere fact that a particular franchise is known for a unique product and way of doing business does not show market power over investors.

Id. The Court agrees with this analysis. The purpose of a Petland franchise, as a product, is not to have a retail store with goldfish and puppies. Rather, its purpose, as well as that of any franchise, is to make money for the franchisee. It is, in the final analysis, an investment opportunity. Any number of other products created for the same purpose would be reasonably interchangeable. Plaintiffs confirm this when they allege that some time in 2004 they "first became aware of an *investment opportunity* in Petland . . . . (Am. Compl. (Doc. 10) P 8) (emphasis added). A Petland franchise is but one of many investment opportunities plaintiffs could have pursued. Equivalent investment opportunities would at least include other retail store franchises, and perhaps non-franchise retail stores. As the courts in *Queen City* and *Westerfield* suggest, plaintiffs need not have become Petland franchisees because a myriad of other equivalent opportunities were available. For these reasons, the Court finds that plaintiffs **[*19]** have failed to allege the relevant product market. Consequently, plaintiffs' antitrust claims are subject to dismissal under *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim upon which relief can be granted.

2. Market power

Defendants next contend that plaintiffs' antitrust claims are subject to dismissal because plaintiffs have not and cannot allege that Petland has sufficient market power to force the tying of other products to the purchase of a franchise. Plaintiffs argue that they adequately pleaded market power by alleging that Petland is the only full-service pet store franchise listed among Entrepreneur's Franchise 500 top retail pet franchises in 2007, and that Petland ranked number 182 in the annual "Top 200" franchisors in the United States as determined by Franchise Times magazine. (Am. Compl. (Doc. 10) P 36).

Not every instance of tying constitutes an antitrust violation. *Jefferson Parish, 466 U.S. at 11*. For example, "'if one of a dozen food stores in a community were to refuse to sell flour unless the buyer also took sugar it would hardly tend to restrain competition if its competitors were ready and able to sell flour by itself.'" *Id. at 12* (quoting *Northern Pac. R. Co. v. United States, 356 U.S. 1, 7, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958))*. **[*20]** For this reason, a tying arrangement is not illegal unless the seller has "some special ability -- usually called 'market power' -- to force a purchaser to do something that he would not do in a competitive market." *Id. at 13-14*.

Jefferson Parish involved an action by a plaintiff anesthesiologist against a hospital which had an exclusive relationship with an anesthesiologist group to which the plaintiff did not belong. The defendant hospital had a thirty percent share of the relevant market. The Court held that such a market share was insufficient to show the kind of market power required to make a tying arrangement unlawful. *Id. at 26-27*.

Here, the Court has concluded that the relevant market encompasses at least the market for franchises in general, and perhaps even similar non-franchise investment opportunities. The food store example from *Jefferson Parish* is apt -- Petland clearly lacks the requisite market power because plaintiffs were free to invest in any number of other franchises or even to choose among many available non-franchise investments. Petland's position in the relevant market is similar to that of the one store out of a dozen that sold flour only to buyers who would **[*21]** also purchase sugar. The Court finds that plaintiffs have not, and cannot, plead that Petland has sufficient market power in the relevant tying product market to force plaintiffs to purchase the tied products.

As an alternative basis for its ruling, however, the Court will also analyze market power assuming, *arguendo*, that the relevant market is the market for pet store franchises. Plaintiffs' allegations of market power fail even under this assumption. Plaintiffs assert that Petland is the only full-service pet store franchise listed among Entrepreneur's Franchise 500 top retail pet franchises in 2007. Even viewed in the light most favorable to plaintiffs, this assertion falls far short of establishing the kind of market power that renders tying an antitrust violation. The statement indicates that Petland is the only "full-service" pet store on the list of top retail pet franchises. This statement unmistakably implies that other pet store franchises which are not "full-service" are also on the list. If the relevant market is the market consisting of all pet store franchises, then Petland is only one of several or many competing pet store franchises available to investors.

Plaintiffs **[*22]** also allege that Petland ranked number 182 in the annual "Top 200" franchisors in the United States as determined by Franchise Times magazine. This allegation is so abstract as to be meaningless. Even viewed in the most favorable light, there is simply no basis to equate a ranking of 182 out of 200 with dominant market power.

Based on the above discussion, the Court concludes that plaintiffs have failed to adequately plead that Petland has dominant market power in the relevant product market. For this additional reason, defendants are entitled to dismissal of plaintiffs' antitrust claims.

B. RICO

Plaintiffs bring their civil RICO claim under *18 U.S.C. § 1962(c)*, which provides:

> It shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt.

Id. Any person injured by a violation of *§ 1962(c)* may bring a civil action under that section to recover treble damages, attorney's fees, and costs. *18 U.S.C. § 1964(c)*.

Defendants contend **[*23]** the Court must dismiss plaintiffs' RICO claim, Count III, because plaintiffs have not and cannot plead any specific instances of misrepresentations made through mail or wire, and because plaintiffs cannot plead a pattern of racketeering.

1. Predicate offenses: mail and wire fraud

Defendants argue that plaintiffs' RICO claim fails because plaintiffs have not pleaded the predicate acts with requisite particularity, and because plaintiffs have not pleaded specific misrepresentations that were made by mail or wire. Plaintiffs maintain they have pleaded numerous specific instances of misrepresentations, and that they need not plead that the misrepresentations were made by mail or wire, but only that the scheme to defraud involved the use of mail or wire.

The amended complaint is replete with allegations of specific misrepresentations made with knowledge of their falsity and with fraudulent intent. (Am. Compl. (Doc. 10) PP 11, 25-33, 58-66, 69-75). Defendants appear to suggest that allegations appearing in the complaint after the RICO claim (PP 47-53) should not be considered. This argument lacks substance. The later allegations incorporate the earlier ones by reference. Hence, the RICO claim **[*24]** itself is incorporated in the later allegations. In any event, the Court would not dismiss plaintiffs' RICO claim with prejudice on the basis of such a trivial defect, which could readily be cured by amendment.

Plaintiffs are also correct in asserting that the mail and wire fraud statutes do not require them to plead instances of misrepresentations made via mail or wire.

> The upshot is that RICO provides a private right of action for treble damages to any person injured in his business or property by reason of the conduct of a qualifying enterprise's affairs through a pattern of acts indictable as mail fraud. Mail fraud, in turn, occurs whenever a person, "having devised or intending to devise any scheme or artifice to defraud," uses the mail "for the purpose of executing such scheme or artifice or attempting so to do." *§ 1341*. The gravamen of the offense is the scheme to defraud, and any "mailing that is incident to an essential part of the scheme satisfies the mailing element," *Schmuck v. United States, 489 U.S. 705, 712, 109 S.Ct. 1443, 103 L.Ed.2d 734 (1989)* (citation and internal quotation marks omitted), even if the mailing itself "contain[s] no false information," *id., at 715, 109 S.Ct. 1443*.

Bridge v. Phoenix Bond & Indem. Co., 128 S.Ct. 2131, 2138, 170 L. Ed. 2d 1012 (2008). **[*25]** Thus, whether plaintiffs have alleged specific instances of mail and wire communications which contain misrepresentations is of no consequence.

For the above reasons, the Court declines to dismiss plaintiffs' RICO claim on the ground that plaintiffs have not pleaded the underlying scheme to defraud with particularity or on the ground that plaintiffs have failed to plead any specific instances of misrepresentations made through mail or wire.

2. RICO pattern requirement

Defendants also assert that plaintiffs' RICO claim must be dismissed because plaintiffs have failed to plead a pattern of racketeering activity. Specifically, defendants contend that plaintiffs have, at most, pleaded a single scheme to defraud which took place over an eleven month period. Plaintiffs argue they have sufficiently pleaded the pattern element by alleging multiple instances of mail and wire fraud. Plaintiffs also point out that they allege, based upon information and belief, that Petland has used the same scheme against other past and present franchisees. (Am. Compl. (Doc. 10) P 52).

RICO requires proof of a "pattern of racketeering activity." *18 U.S.C. § 1962*; *H.J., Inc. v. Nw Bell Tel. Co., 492 U.S. 229, 232, 109 S. Ct. 2893, 106 L. Ed. 2d 195 (1989)*; **[*26]** *Brown v. Cassens Trans. Co., 546 F.3d 347, 353 (6th Cir. 2008)*. RICO provides that "'a pattern of racketeering activity' requires at least two acts of racketeering activity, one of which occurred after the effective date of this chapter and the last of which occurred within ten years (excluding any period of imprisonment) after the commission of a prior act of racketeering activity." *18 U.S.C. § 1961(5)*. Although two predicate acts are required, they do not necessarily establish a pattern. *H.J., Inc., 492 U.S. at 237*. Rather, to demonstrate a pattern, a plaintiff must show "that the racketeering predicates are related, *and* that they amount to or pose a threat of continued criminal activity." *Id. at 239* (emphasis in original). The relatedness component is satisfied if the predicate criminal acts "'have the same or similar purposes, results, participants, victims, or methods of commission, or otherwise are interrelated by distinguishing characteristics and are not isolated events.'" *Id. at 240* (quoting 18 U.S.C. § 3575(e)). To prove a pattern a plaintiff must, in addition to relatedness, show continuity:

> "Continuity" is both a closed- and open-ended concept, referring either to a closed **[*27]** period of repeated conduct, or to past conduct that by its nature projects into the future with a threat of repetition. See *Barticheck v. Fidelity Union Bank/First National State, 832 F.2d 36, 39 (CA3 1987)*. It is, in either case, centrally a temporal concept-and particularly so in the RICO context, where *what* must be continuous, RICO's predicate

> acts or offenses, and the *relationship* these predicates must bear one to another, are distinct requirements. A party alleging a RICO violation may demonstrate continuity over a closed period by proving a series of related predicates extending over a substantial period of time. Predicate acts extending over a few weeks or months and threatening no future criminal conduct do not satisfy this requirement: Congress was concerned in RICO with long-term criminal conduct. Often a RICO action will be brought before continuity can be established in this way. In such cases, liability depends on whether the *threat* of continuity is demonstrated. See S.Rep. No. 91-617, at 158.

Id. at 241-42 (emphasis in original).

Defendants assert that plaintiffs have failed to plead a pattern of racketeering activity because plaintiffs have, at most, pleaded a single scheme **[*28]** to defraud which took place over an eleven month period. In part, plaintiffs plead a closed period that lasted only about eleven months. By itself, the predicate acts taken against plaintiffs over an eleven month period do not constitute a "series of related predicates extending over a *substantial period of time*." *Id. at 242* (emphasis added); *Vemco, Inc. v. Camardella, 23 F.3d 129, 133-34 (6th Cir. 1994)* (single scheme spanning seventeen months did not satisfy continuity requirement).

But plaintiffs' pleading is not limited to a single scheme. Rather, plaintiffs also allege that Petland has used the same scheme to victimize other past and present Petland franchisees. Defendants contend, without citation to authority, that such an allegation "is far too weak to establish a RICO pattern." (Reply (Doc. 25) at 6). The Court disagrees. At this point, the Court may take judicial notice that other franchisees have brought actions in this Court against the same defendants, asserting similar factual allegations and claims. The Court finds that these related cases support plaintiffs' assertion that Petland has employed the same scheme against multiple franchisees over a substantial period of **[*29]** time. Stated another way, the existence of the other cases bolsters the plausibility of plaintiffs' allegations pertaining to relatedness and continuity. The Court holds that plaintiff has alleged sufficient facts to satisfy both the relatedness and continuity components of the RICO pattern requirement.

For the above reasons, the Court declines to dismiss plaintiffs' RICO claim against Petland.

C. State law claims

Lastly, defendants argue that because plaintiffs' federal claims must be dismissed, the Court should decline to exercise supplemental jurisdiction over plaintiffs' state law claims. Since the Court has determined that plaintiffs' RICO claim is not subject to dismissal under *Fed. R. Civ. P. 12(b)(6)*, the Court will continue to exercise supplemental jurisdiction over plaintiffs' state law claims.

IV. Disposition

For the above reasons, the Court **GRANTS** defendants' motion to dismiss in part and **DENIES** it in part. (Doc. 14). The Court dismisses plaintiffs' antitrust claims with prejudice. All other claims remain pending.

IT IS SO ORDERED.

Opinion

MEMORANDUM [*2] AND ORDER ON CLAIMS OF PATENT MISUSE

Plaintiff Hearing Components, Inc. filed suit against Defendant Shure, Inc. claiming infringement of United States Patent Nos. 4,880,076; 5,002,151; and 5,401,920. The '076 and '151 patents are directed toward a hearing aid ear piece or other sound transmission device connected to a disposable compressible foam sleeve. A bench trial was held on the equitable issues of laches and patent misuse on January 20, 2009. The court denied Shure's laches claims on the record, but reserved the issue of patent misuse at that time. [1]

Because Shure has not established that any of the complained-of limitations in HCI's licensing agreements constitute patent misuse, either per se or under a "rule of reason" analysis, the court will deny Shure's claims.

I. Applicable Law

The doctrine of patent misuse "relates generally to the use of patent rights to obtain or to coerce an unfair commercial advantage. Patent misuse relates primarily to a patentee's actions that affect competition in unpatented goods or **[*3]** that otherwise extend the economic effect beyond the scope of the patent grant." *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1372 (Fed. Cir. 1998)*.

> The patent misuse doctrine is an extension of the equitable doctrine of unclean hands, whereby a court of equity will not lend its support to enforcement of a patent that has been misused. Patent misuse arose, as an equitable defense available to the accused infringer, from the desire to restrain practices that did not in themselves violate any law, but that drew anticompetitive strength from the patent right, and thus were deemed to be contrary to public policy. When used successfully, this defense results in rendering the patent unenforceable until the misuse is purged.

Qualcomm Inc. v. Broadcom Corp., 548 F.3d 1004, 1025 (Fed. Cir. 2008) (internal citation excluded); *see also* *Bard, 157 F.3d at 1372* ("Patent misuse arises in equity, and a holding of misuse renders the patent unenforceable until the misuse is purged; it does not, of itself, invalidate the patent.").

While patent misuse is viewed as a "broader wrong" than an antitrust violation, the key inquiry will be whether the patentee has "impermissibly broadened the scope of the **[*4]** patent grant with anti[-]competitive effect" by "imposing conditions that derive their force from the patent." *Bard, 157 F.3d at 1372*. The activities characterized as "patent misuse" do not include a "general notion of 'wrongful' use"; rather, the doctrine has for the most part been confined to a few specific practices, such as enforced package licensing, price restraints, or extended royalty terms. *Id. at 1373*. The Federal Circuit has cautioned that the doctrine should be construed fairly narrowly. *Id.* ("the body of misuse law and precedent need not be enlarged into an open-ended pitfall for patent-supported commerce.").

To successfully assert a patent misuse defense, Shure must demonstrate that HCI has "impermissibly broadened the physical or temporal scope of the patent grant with anticompetitive effect." *Virginia Panel Corp. v. Mac Panel Co., 133 F.3d 860, 868 (Fed. Cir. 1997)*. Certain practices constitute patent misuse per se, "including so-called 'tying' arrangements in which a patentee conditions a license under the patent on the purchase of a separable, staple good, and arrangements in which a patentee effectively extends the term of the patent by requiring post-expiration royalties." **[*5]** *Id. at 869* (internal citations omitted). At the same time, *35 U.S.C. § 271(d)* provides that certain enumerated actions or tying arrangements, in the absence of market power, do not constitute patent misuse. [2]

---

[1] Having received proposed findings of fact from both parties, the court will not enter separate findings of fact, but will incorporate its findings in this memorandum.

[2] *Section 271(d)* states that:

In the situation where a practice alleged to constitute patent misuse is neither per se patent misuse nor specifically excluded from a misuse analysis by *Section 271(d)*, "a court must determine if that practice is reasonably within the patent grant, *i.e.,* that it relates to subject matter within the scope of the patent claims." *Virginia Panel, 133 F.3d at 869* (internal quotation omitted). If the practice's effect is to extend the patentee's statutory rights and does so with an anti-competitive effect, that practice must be analyzed in accordance with the "rule of reason." *Id.* Under the rule of reason, the fact finder decides whether the questioned practice imposes an "unreasonable restraint on competition," taking into account a number of factors, including (1) specific information about the relevant business; (2) the business's condition before and after the restraint was imposed, and (3) the restraint's history, nature, and effect. *Id.*

It is somewhat unclear whether false marking is patent misuse at all, much less patent misuse per se. However, this practice "clearly injures" the "important public **[*7]** interest in permitting full and free competition in the use of ideas which are in reality a part of the public domain" because

> the act of false marking misleads the public into believing that a patentee controls the article in question (as well as like articles), externalizes the risk of error in the determination, placing it on the public rather than the manufacturer or seller of the article, and increases the cost to the public of ascertaining whether a patentee in fact controls the intellectual property embodied in an article.

Clontech Labs., Inc. v. Invitrogen Corp., 406 F.3d 1347, 1356-57 (Fed. Cir. 2005). False marking under *35 U.S.C. § 292(a)* requires proof of four elements: (1) a marking importing that an object is patented; (2) falsely affixed to; (3) an unpatented article; (4) with intent to deceive the public. *Id. at 1351*.

"Intent to deceive, while subjective in nature, is established in law by objective criteria. . . Thus, objective standards' control and the fact of misrepresentation coupled with proof that the party making it had knowledge of its falsity is enough to warrant drawing the inference that there was a fraudulent intent." *Id. at 1352* (internal quotation omitted). **[*8]** To establish knowledge of falsity, Shure must show by a preponderance of the evidence that HCI did not have a reasonable belief that the articles were properly marked (i.e., covered by a patent). Absent such proof of lack of reasonable belief, no liability under the rises to the level of statutory deception is a question of fact. *Id. at 1353*.

II. Analysis

Shure alleges that HCI entered into sixteen licenses [3] in the period between July 1, 2004 and May 15, 2008, and that the licensing agreements contain provisions that constitute patent misuse in one or more of the following four ways: (1) providing for a post-expiration marking requirement (i.e., requiring licensees to mark expired patent numbers on their products); (2) requiring post-expiration supply obligations (i.e., requiring the licensees to buy HCI products after the patents-in-suit expired); (3) providing for an undiminishing royalty rate (i.e., not decreasing the royalty rate the licensee paid for licensing both patents in suit after the '076 patent expired on December 5, 2006); and (4) including a potential retroactive royalty increase (i.e., the royalty rate paid by the licensee could increase

---

> (d) No patent owner otherwise entitled to relief for infringement or contributory infringement of a patent shall be denied relief or deemed guilty of misuse or illegal extension of the patent right by reason of his having done one or more of the following: (1) derived revenue from acts which if performed by another without his consent would constitute contributory infringement of the patent; (2) licensed or authorized another to perform acts which if performed without his consent would constitute contributory infringement of the patent; (3) sought to enforce his patent rights against infringement or contributory infringement; (4) refused to license or use any rights to the patent; or (5) conditioned the license of any rights to the patent or the sale of the patented product on the acquisition of a license to rights in another patent or purchase of a separate product, unless, in view of the circumstances, the patent owner has market power in the relevant **[*6]** market for the patent or patented product on which the license or sale is conditioned.

[3] Although **[*10]** there are sixteen different licensees, Shure's claims actually encompass nineteen license agreements. Two of the licensees -- Aloft Technologies, Inc. and Antonio Precise Products Manufactory, Ltd. -- entered into multiple license agreements with HCI.

from 3% to 5% after expiration **[*9]** of the patents, depending on what happened up to five years after the '151 patent expired on March 26, 2008). The following chart is drawn from Shure's Proposed Findings of Fact and Conclusions of Law [Doc. # 129], and summarizes Shure's allegations:

[4] The '076 patent expired in December 2006. Shure alleges that the license agreements HCI entered into after that date with six new licensees -- all licensees with an "N/A" in this column except Aloft Technologies, Inc. and Antonio Precise Products Manufactory, Ltd. -- licensed the '076 patent after it had expired.

A. Providing for a post-expiration marking requirement

Shure's first argument is that by requiring licensees to mark expired patent numbers on their products, HCI has engaged in patent misuse. Specifically, Shure suggests that because the license agreements do not provide for the removal of expired patent numbers, continued marking of a licensee's products after expiration of the '076 and/or '151 patents is patent misuse due to false marking. The court makes the following findings with respect to this claim:

1. Eleven agreements require post-expiration marking, and contain a provision similar to the following:

> MARKINGS ON LICENSED **[*11]** PRODUCTS:
>
> Patent Notice -- The following wording will be on each Licensed Product package and replacement tip package. "Manufactured under Hearing Components' U.S. Patent Numbers 4,880,076 and 5,002,151 *and International Equivalents.* Other patents pending."

See DX 110, at P 6.0 (emphasis added).

2. The court finds specific evidence that only two licensees, Blue Ant and Ultimate Ears, ever actually sold any products in the United States. Tr. at p.1543, ll. 15-21 (Blue Ant); Tr. at p. 1555, ll. 5-21 (Ultimate Ears).

3. HCI had foreign equivalents of the patents-in-suit in Australia, Canada, Denmark, France, Germany, Japan, Korea, and the United Kingdom, and these equivalents do not expire until 2010 (all but Korea) or 2011 (Korea). DX 316, at p. 16, n.35; *see also* Tr. at p. 1565, ll. 15-17; p. 1538, l. 7 - p. 1539, l. 2. (Shure did not dispute either of these assertions during the bench trial.)

4. Shenzhen Grandsun Electric Co.'s license was limited to the "Chinese market." Because HCI was not exactly sure what that meant, this license was never actually enforced. Tr. at p. 1564, l. 9 - p. 1565, l. 14. Although there was no foreign equivalent to the '076 and '151 patents in China, DX 316 **[*12]** at p. 16 and n.35, there was no evidence that Shenzhen ever sold products in the United States, marked with the '076 and '151 patent numbers or otherwise.

5. Regardless of the wording of the license agreements, there was no evidence that any item marked with an expired patent number was actually imported into, made in, sold in, or used in the United States. (At best, Shure elicited testimony from HCI's in-house general counsel, David Crompton, that Blue Ant and Ultimate Ears both entered into licensing agreements after the '076 and '151 patents had expired in the United States; that both sold products in the United States; and that under the licensing agreements, any covered products would be marked with the '076 and '151 patent numbers. Tr. at p.1543, ll. 15-21 [Blue Ant]; Tr. at p. 1555, ll. 5-21 [Ultimate Ears]. However, no samples of actual Blue Ant or Ultimate Ears products with the patent numbers on them were submitted to the court.)

6. The court finds credible the testimony of Dr. Olivera that HCI was a "small business" that was always "looking for new customers." Tr. at p. 1635, ll. 10-19.

7. There is no evidence that would suggest that HCI's licenses were coerced or not entered **[*13]** into voluntarily.

8. HCI did not have the requisite intent to deceive under the false marking statute. Shure presented insufficient evidence that HCI lacked a reasonable belief that its licensees' products were properly marked.

I. Patent misuse per se and exclusion under *Section 271(d)*

Shure points to, and the court has found, no case which terms the marking provisions included in HCI's license agreements patent misuse per se. False marking is not mentioned in *Section 271(d)*, so it is not excluded from patent misuse under that statutory provision.

II. Extending patent rights through anti-competitive effect

If a certain practice is not patent misuse *per se* and is not specifically excluded under *Section 271(d)*, a court must then determine if that practice has the effect of extending the patentee's statutory rights and does so with an anti-competitive effect. If so, that practice must be analyzed in accordance with the "rule of reason." *Id.* Under this analysis, the court will determine whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including (1) specific information about the relevant business; (2) the business's **[*14]** condition before and after the restraint was imposed, and (3) the restraint's history, nature, and effect. *Id.*

There are several problems with any argument that HCI's actions extended its patent rights with an anti-competitive effect. First, HCI asserted, and Shure did not dispute, that the '076 and/or '151 patents have foreign equivalents which do not expire until 2010, 2011, or 2013 [5]. The licensing agreements require that the phrase "and International Equivalents" be included in the marking licensees place on their products. The false marking statute, *Section 292*, "only prohibits the marking of articles that are not subject to either foreign or domestic patent protection." *Kor-CT, LLC v. Savvier, Inc., 344 F. Supp. 2d 847, 857 (D. Conn. 2004)*; *see also* *Project Strategies Corp. v. National Communications Corp., 948 F. Supp. 218, 225-27 (E.D.N.Y. 1996)*. While it is true that marking products with expired patent numbers can be false marking under *Section 292*, *Pequignot v. Solo Cup Co., 540 F. Supp. 2d 649, 654 (E.D. Va. 2008)*, Shure does not dispute that foreign equivalents of the '076 and/or '151 patents remain in force for several more years.

Section 292 is also penal in nature, providing a civil fine to the party mismarking the product for each violation. *Clontech Labs., Inc. v. Invitrogen Corp., 406 F.3d 1347, 1353 (Fed. Cir. 2005)*. Shure cites, and the court has

[5] Mr. Crompton testified during the bench **[*15]** trial that the Korean equivalent does not expire until 2013. This may have been a misstatement, as Dr. Ugone cites earlier testimony and e-mails from Mr. Crompton in which he states that the foreign equivalents expire in 2010 or 2011, depending on the country. No matter which date is used, the point is that Shure does not dispute that the foreign equivalents of the patents-in-suit have not yet expired.

found, no case or statute which even suggests that the false marking statute to be the basis for a patent misuse claim.

It is also somewhat unclear whether a patent holder can even be liable for patent misuse if the licensing provisions complained of were not enforced in the United States. If one analogizes licensing agreements and tying arrangements in ***antitrust law*** to patent law [6], several early cases might imply that it is immaterial whether a contract provision purporting to increase a patent monopoly was ever actually enforced in the United States, because the **[*16]** key is that the patent holder had the power to do so under the contract. *See, e.g., United Shoe Machinery Corp. v. United States, 258 U.S. 451, 458, 42 S. Ct. 363, 365, 66 L. Ed. 708 (1922)* ("The power to enforce them [tying restrictions] is omnipresent, and their restraining influence constantly operates upon competitors and lessees. The fact that the lessor in many instances forbore to enforce these provisions does not make them any less agreements within the condemnation of the Clayton Act."); *F.C. Russell Co. v. Consumers Insulation Co., 226 F.2d 373, 376 (3d Cir. 1955)*; *Krampe v. Ideal Indus., Inc., 347 F. Supp. 1384, 1387 (D.C. Ill. 1972)*.

However, in both *United Shoe* and *F.C. Russell*, the licensees were domestic United States corporations. In contrast, many of the licensing agreements HCI entered into were with foreign companies. While most of the contracts may have permitted world-wide sales, Shure failed to present a single example of an allegedly mismarked product actually imported into, or made, used, offered for sale, or sold in, the United States, either by a foreign company (e.g., Blue Ant) or a domestic company (e.g., Ultimate Ears).

It is black letter law that a Defendant can only be liable for importing into, making, using, offering to sell, or selling a patented invention "within the United States." *35 U.S.C. § 271(a)*; *see also Aluminum Co. of America v. Sperry Prods., Inc., 285 F.2d 911, 925 (6th Cir. 1960)* ("Foreign patents grant no monopolies in the United States, nor do United States patents grant any monopolies in foreign countries. A patent is granted by a sovereign power and its rights, privileges, and obligations begin and end with the country that issues it."). [7] And although patent misuse is typically viewed as a "broader wrong" than an anti-trust violation, the Sherman Act was amended in **[*18]** 1982 to restrict the jurisdiction of an American court over alleged anti-trust violations based on foreign activities. *15 U.S.C. § 6a*; *see also Akzona Inc. v. E.I. Du Pont De Nemours & Co., 607 F. Supp. 227, 234-35 (D. Del. 1984)*. It would make little sense to restrict a patent holder to enforcement of its rights in the United States, while simultaneously permitting an accused infringer to use the patent holder's foreign activities as the basis for a patent misuse claim.

There was insufficient evidence to support a finding that HCI required a licensee to mark products to be sold in the United States under the licensing agreements after the '076 and '151 patents have expired. While Shure did elicit some testimony that two licensees, Blue Ant and Ultimate Ears, entered into licensing agreements after the '076 and '151 patents had expired in the United States with a provision that **[*19]** any covered products would be marked with the '076 and '151 patent numbers, Shure provided no samples of actual Blue Ant or Ultimate Ears products with the patent numbers on them to the court. In other words, there was little to no evidence presented regarding the first three elements of any false marking cause of action -- namely, that any licensee's product had a marking stating that it was patented, which was falsely affixed to an unpatented article.

The fourth element Shure is required to demonstrate under a false marking theory is that HCI had the intent to deceive the public. To do so, Shure must show that HCI did not have a reasonable belief that the articles were

---

[6] The analogy is apt, since patent misuse and antitrust violations, while not identical, are related causes of action. *See, e.g., Bard, 157 F.3d at 1372* ("Patent misuse is viewed as a broader wrong than antitrust violation because of the economic power that may be derived from the patentee's right to exclude. Thus, misuse may arise when the conditions of antitrust violation are not met. . .The key inquiry is whether, by imposing conditions that derive their force from the patent, the patentee has impermissibly broadened the scope of the patent grant with anticompetitive **[*17]** effect.")

[7] Perhaps marking a product with United States patent numbers gives a certain cachet in some foreign countries, just as the word "French" seems to increase sales of perfume here. It is up to that country, rather than this court, to decide whether using an expired United States patent number harms its citizens.

properly marked -- i.e., that they were covered by a valid patent or patents. The court is not persuaded by the limited evidence available that HCI did not have such a reasonable belief. There was testimony during the bench trial, which Shure did not dispute, that HCI had foreign equivalents of the patents-in-suit in other countries which do not expire until 2010 or 2011. HCI's purpose in requiring licensees to mark their products with the '076 and '151 patent numbers was to direct an interested party to the foreign **[*20]** equivalents of these patents, making it easier for a company or individual to find out what the patent protection on a given device is. The court finds the evidence does not show that HCI had the requisite intent to deceive.

III. Rule of reason analysis

As discussed above, it is unclear that HCI's actions in this case with respect to marking have the effect of extending its statutory rights with anti-competitive effect. Even assuming they do, Shure has put forth insufficient evidence on the *Virginia Panel* factors to permit the court to find patent misuse under a "rule of reason" analysis. Dr. Olivera testified that HCI was a "small business" that was always "looking for new customers." Tr. at p. 1635, ll. 10-19. The court does not find that HCI's condition changed after the licensing agreements with the marking provisions were entered into. The court finds there is insufficient evidence to make a determination regarding the restraint's history, nature, and effect.

The court also notes that "[v]oluntariness of the licensee's agreement to the royalty provisions is a key consideration" when analyzing potential patent misuse. *Engel Industries, Inc. v. Lockformer Co., 96 F.3d 1398, 1408 (Fed. Cir. 1996)*; **[*21]** *see also* *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1372 (Fed. Cir. 1998)* (patent misuse "relates generally to the use of patent rights to obtain *or to coerce* an unfair commercial advantage") (emphasis added); *Trading Techs. Int'l, Inc. v. eSpeed, Inc., 2008 U.S. Dist. LEXIS 4627, 2008 WL 203385 (N.D. Ill. Jan. 18, 2008)*. Shure has not produced any evidence that would so much as hint that HCI's licensees were anything but willing to enter into agreements with this clause. Even assuming that this provision has anti-competitive effect, Shure has put forth little to no specific evidence on the *Virginia Panel* factors that would permit the court to conclude that this practice is patent misuse.

While the court recognizes that false marking has the potential to injure the strong public interest in full and free competition by indicating that something is protected under a patent when it is, in fact, part of the public domain, it is a stretch to conclude that HCI's practice of including a marking provision in its licensing agreements has the effect of extending its statutory rights with an anti-competitive effect. The Federal Circuit has cautioned that the doctrine of patent misuse should be construed fairly narrowly, **[*22]** *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1373 (Fed. Cir. 1998)*, and Shure's theory would run contrary to that end.

B. Post-expiration supply obligations

Shure next alleges that ten of the nineteen license agreements required the licensees to buy HCI products after the patents-in-suit expired. The court makes the following findings regarding Shure's claim:

1. Ten agreements contain a provision similar to the clause found in the agreement between HCI and A Power Limited:

> SUBLICENSED PRODUCTS means hearing-in-noise devices that are covered by a claim of a PATENT and include means for releasably securing LICENSOR'S [HCI] disposable foam sleeves, with such means manufactured to LICENSOR'S specifications. SUBLICENSEE [A Power Limited] agrees that all foam sleeves to be used with Sublicensed products will be supplied by LICENSOR to assure proper coupling to LICENSOR'S specified means.

DX 193, at P 9.2.

2. Later agreements are more specific:

> LICENSEE [Nacre AS] agrees to exclusively buy special made for LICENSEE Comply TM Canal Tips from LICENSOR [HCI] for a period of 5 years after the last US patent ['076 and '151] expires for LICENSEE'S products that use polymeric foam tips.

DX 103, at P **[*23]** 5.2; *see also* DX 104 ("Licensee [Aloft Technologies, Inc.] agrees to exclusively buy Comply TM Canal Tips from Licensor [HCI] for a period of five (5) years, after the last patent expires, for use on Licensee's products that can utilize foam tips."); DX 110 (same); DX 107 ("Skullcandy will agree to use Comply TM Foam Tips for all foam tip needs for two years from the start of retail launch [dated 11/15/07]).

3. Four of the ten agreements were entered into before the '076 patent expired; four were entered into after the '076 patent expired in the United States December 2006 but while the '151 patent was still in force; and two were entered into after the '151 patent expired in the United States in March 2008.

4. There is insufficient evidence to find that HCI had the type of market power envisioned under *Section 271(d)(5)* that would make a tying agreement of this nature statutory patent misuse. To the contrary, the court finds credible the testimony of Dr. Olivera that HCI was a "small business" that was always "looking for new customers." Tr. at p. 1635, ll. 10-19. HCI's market power was not discussed during the bench trial, or in Dr. Ugone's expert report (DX 316).

5. There is no evidence **[*24]** that would suggest that HCI's licenses were coerced or not entered into voluntarily.

I. Patent misuse per se or under *Section 271(d)*

"[A] patentee's use of a royalty agreement that projects beyond the expiration date of the patent is unlawful per se," *Brulotte v. Thys Co., 379 U.S. 29, 32, 85 S. Ct. 176, 13 L. Ed. 2d 99 (1964)*. However, the Court in *Brulotte* was largely concerned with royalties paid to patentees after a patent has expired; here, HCI has instead conditioned grant of a license on the licensor's continued purchase of HCI's foam tips for five years after the patents-in-suit have expired. Shure has not cited, and the court has not found, any case in which a post-expiration supply obligation was found to be patent misuse per se.

Tying agreements such as this one are also not patent misuse under *35 U.S.C. § 271(d)(5)* "unless, in view of the circumstances, the patent owner had market power in the relevant market for the patent or patented product on which the license or sale is conditioned." However, Shure also put forth little, if any, evidence that HCI had the type of market power envisioned under *Section 271(d)(5)* that would make a tying agreement of this nature statutory patent misuse. In short, there is **[*25]** insufficient evidence that these practices extended HCI's patent rights with anti-competitive effect.

II. Extension of patent rights with anti-competitive effect and rule of reason analysis

Assuming, for the sake of argument, that Shure has demonstrated that HCI's tying arrangements extended its patent rights with anti-competitive effect, none of the post-expiration supply obligations appear to be patent misuse under a "rule of reason" analysis.

Shure has presented insufficient evidence on the *Virginia Panel* factors to permit the court to find patent misuse under a "rule of reason" analysis. As already discussed, Dr. Olivera testified that HCI was a small business. Tr. at p. 1635, ll. 10-19. The court is not persuaded that HCI's condition changed after the license agreements with the marking provisions were entered into. There was little, if any, information presented regarding the restraint's history, nature, and effect, and not even a suggestion that HCI's licensees were anything other than willing to enter into agreements with this clause. The court finds that Shure has failed to prove patent misuse.

C. Providing for an undiminishing royalty rate

Shure's third argument is that HCI's **[*26]** practice of not decreasing the royalty rate the licensee paid for licensing both patents in suit after the '076 patent expired is patent misuse. Shure's allegations on this point are actually two-fold: (1) with respect to the license agreements entered into before the '076 patent expired in December 2006, the agreements failed to decrease the royalty rate after the '076 patent expired; and (2) after December 2006, HCI licensed the '076 patent and/or the '151 patent after they had expired.

I. Pre-December 2006 agreements

The court makes the following findings with respect to this claim:

1. There is no evidence that the licenses were not entered into voluntarily or were coerced.

2. The court finds credible the testimony of Dr. Olivera that HCI was a "small business" that was always "looking for new customers." Tr. at p. 1635, ll. 10-19.

As with post-expiration supply obligations, Shure has pointed to no case that terms the first practice patent misuse per se. The practice is not exempted under *Section 271(d)*, and Shure puts forth little to no evidence that this practice extended HCI's patent rights with any anticompetitive effect.

Even assuming there was an anti-competitive effect, consideration **[*27]** of the "rule of reason" analysis discussed above does not favor terming this practice patent misuse under these facts. Again, HCI is a small business. The court does not find that HCI's condition changed after the license agreements with the marking provisions were entered into. The court finds there is insufficient evidence to make a determination regarding the restraint's history, nature, and effect. The license agreements appear to be entered into voluntarily.

The court also notes the Federal Circuit has stated in a different context that:

> A licensee which has taken a license under both patents, choosing to use the inventions claimed in both patents in the same commercial process, must know that, in the absence of some agreement to the contrary, it is not excused from paying royalty after one of the patents expires while the other is still in force and the invention it claims is being used.

General Foods Corp. v. Studiengesellschaft Kohle mbH, 972 F.2d 1272, 1279 (Fed. Cir. 1992) (discussing double patenting). In other words, after the '076 patent expired, the licensees knew they still had to pay a royalty to continue to use the '151 patent. While decreasing the royalty rate the licensees **[*28]** paid on the remaining patent is one option that parties voluntarily entering into a license agreement can utilize, Shure has pointed to no case supporting the theory that failing to do so, without coercion, is patent misuse. [8] The court finds there is insufficient evidence to conclude that this practice is patent misuse.

II. Post December 2006 agreements

Shure's second argument is, at first blush, more compelling. The court makes the following findings with regards to this claim:

1. The February 2007 agreement entered into with Shenzhen Grandsun Electronics Co. licensed the '076 patent. DX 110, at P 9.1 ("PATENT or PATENTS means the following listed patents and all divisions, continuations, reissues, foreign equivalents, substitutes, and extensions thereof" and listing both the '076 and '151 patents).

---

[8] *Brulotte,* which only states that requiring payment of royalties after the last of the licensed patents expired is patent misuse, is not to the contrary and in fact specifically distinguishes the situation where only some of the licensed patents have expired. *Brulotte, 379 U.S. at 33, 85 S. Ct. at 179*; *see also* *Hull v. Brunswick Corp., 704 F.2d 1195 (10th Cir. 1983)* ("Although the royalty rate does not change, the base for that rate changes. . .The lack of diminution in royalty rate for the use of one patent without another and the provisions for termination do not of themselves establish coercion.") (internal quotation omitted); ***In re Yarn Processing Patent Validity Litigation, 541 F.2d 1127, 1141-42 (5th Cir. 1979)***, *cert. denied,* **433 U.S. 910, 97 S. Ct. 2976, 53 L. Ed. 2d 1094 (1977)** (provision that escalated royalties for one patent in package after expiration of another patent did **[*29]** not illegally extend life of first patent); ***Sunrise Medical HHG, Inc. v. AirSep Corp., 95 F. Supp. 2d 348, 458 (W.D. Pa. 2000)*** ("the royalty rate need not diminish as patents included in a package license expire, as long as the licensee is not coerced."); *Lightwave Techs., Inc. v. Corning Glass Works, 1991 U.S. Dist. LEXIS 543, 1991 WL 4737 at *2 (S.D.N.Y. Jan. 18, 1991)* ("Coercion, or attempted coercion, is an essential element of patent misuse by improper patent packaging.").

2. The '076 patent expired on December 5, 2006, and the '151 patent expired on March 26, 2008. Doc. # 139, at p. 10.

3. In addition to the agreement with Shenzhen, HCI entered into seven other license agreements -- five of which, like Shenzhen, were with new **[*30]** licensees and two of which were continuations of prior agreements -- which also licensed the '076 patent after December 5, 2006. *See* DX 104; 110; 195; 95; 107; 200; 108; and 197. Two of these agreements were entered into after the '151 patent expired in March 2008. DX 108 and 197.

4. HCI's license agreements that require post-expiration marking contain a provision similar to the following:

> MARKINGS ON LICENSED PRODUCTS:
>
> Patent Notice -- The following wording will be on each Licensed Product package and replacement tip package. "Manufactured under Hearing Components' U.S. Patent Numbers 4,880,076 and 5,002,151 *and International Equivalents.* Other patents pending."

See DX 110, at P 6.0 (emphasis added).

5. The court finds credible the testimony of Dr. Olivera that HCI was a "small business" that was always "looking for new customers." Tr. at p. 1635, ll. 10-19.

6. There is no evidence that the licenses were not entered into voluntarily or were coerced.

a. *Patent misuse per se or exemption under Section 271(d)*

Shure points to no case that terms this practice patent misuse per se, and it is not specifically exempted under Section 271(d).

b. *Extension of patent rights with anti-competitive effect*

There **[*31]** is some support for the position that licensing an expired patent can still extend the patentee's rights with anti-competitive effect, even when the general public is not prohibited from using the device covered under the patent. *Prestole Corp. v. Tinnerman Prods., Inc., 271 F.2d 146, 155 (6th Cir. 1959)*. In *Prestole,* the license specifically excluded a device covered by a series of patents, one of which had already expired when the agreement was signed. The Sixth Circuit stated that the condition extended a monopoly in an expired patent, and

> [t]he fact that the general public, other than [the licensee] was not thereby forbidden the use of this then unpatented device and that [the licensee] might employ it in manufacturing equipment not containing the invention of the licensed patents does not, in our opinion, exonerate [the licensor] from a charge of attempting to extend, for its own purposes, a monopoly in an expired patent.

Id.

Here, the court has found that HCI has licensed one or both of the patents-in-suit after their expiration in the United States. However, as already discussed, HCI asserts, and Shure does not dispute, that foreign equivalents of the '076 and '151 patents remain **[*32]** in effect in Australia, Canada, Denmark, France, Germany, Japan, Korea, and the United Kingdom until 2010 or 2011. By including the language "and International Equivalents," HCI is licensing patents that, while possibly expired in the United States, have equivalents which remain valid in a number of foreign countries.

Additionally, the royalty ends with the expiration of the last patent. *See, e.g.,* DX 110, at P 5.1. Unlike the license agreement in *Prestole,* HCI does not extend its monopoly beyond the expiration of the patents because it receives nothing in return -- i.e., no royalty at all after the foreign equivalents of the last patent expires. While there is a provision requiring the licensee to purchase HCI's foam tips for five years after expiration of the patents, the court has already found that neither the tying provision, or the failure to include a retroactive royalty decrease after expiration of the '076 patent, is patent misuse.

c. *Rule of reason analysis*

Even assuming HCI's actions extended its patent rights with an anti-competitive effect, consideration of the "rule of reason" analysis discussed above does not favor terming this practice patent misuse under these facts. **[*33]** HCI is a small business. The court does not find that HCI's condition changed after the license agreements with the marking provisions were entered into. The court finds there is insufficient evidence to make a determination regarding the restraint's history, nature, and effect. Shure has neither presented any evidence that any of these agreements were coerced, nor that any mismarked item was ever imported into, made in, sold in, or used in the United States. The court does not find that HCI has engaged in patent misuse.

D. Including a potential retroactive royalty increase

Shure's final argument is that HCI's practice of permitting the royalty rate paid by the licensee to increase from 3% to 5% after expiration of the patents, depending on what happened up to five years after the '151 patent expired, is patent misuse. The court makes the following findings of fact with respect to this claim:

1. This provision is found in only two of the license agreements, namely those HCI entered into with Shenzhen Grandsun Electronics (DX 110, P 5.2.4) and Nacre AS (DX 103, P 5.3.3). The following clause is found in the Shenzhen agreement:

> If 5.2.1 or 5.2.2 or 5.2.3 are not met, the Royalty will retroactively **[*34]** revert to 5% applied to all products sold on or after the date of this agreement until expiration of the last patent.

2. Section 5.2.1 in the Shenzhen agreement states that the licensee agrees to exclusively purchase HCI's foam tips for a period of five years after the last patent expires for all of the licensee's products which use foam tips. *Id.*

3. There is no evidence that the licenses were not entered into voluntarily or were coerced.

4. The Shenzhen agreement applied only to the China market and was never actually enforced.

5. There is no evidence that retroactive royalties were ever demanded or paid based on any products that were imported into, made in, sold in, or used in the United States by Nacre. Defense counsel's entire discussion of this agreement was couched in the hypothetical and does not provide any specific facts regarding enforcement or sales. Tr. at p. 1527, ll. 4-18; p. 1531, l. 5 - 1535, l. 9.

6. The court finds credible the testimony of Dr. Olivera that HCI was a "small business" that was always "looking for new customers." Tr. at p. 1635, ll. 10-19.

Again, Shure has pointed to no case that terms this practice patent misuse per se. The practice does not seem to be **[*35]** explicitly prohibited by *Section 271(d)*, and that court has already found that the tying arrangement itself is not patent misuse under the facts of this case. There is insufficient evidence that the practice extended HCI's patent rights with any anti-competitive effect in any other way.

Even assuming there was an anti-competitive effect, consideration of the "rule of reason" analysis does not favor, under these facts, terming this practice patent misuse. HCI is a small business. HCI is a small business. The court does not find that HCI's condition changed after the license agreements with the marking provisions were entered into. The court finds there is insufficient evidence to make a determination regarding the restraint's history, nature, and effect. Shure has neither presented any evidence that any of these agreements were coerced, nor that any mismarked item was ever imported into, made in, sold in, or used in the United States. The court has already found that the Shenzhen agreement applied only to the China market and was never actually enforced. Similarly, Shure pointed to no evidence that any products were ever sold in the United States by Nacre, or that the retroactive royalty **[*36]** provision was ever enforced. The court does not find that HCI has engaged in patent misuse.

III. Conclusion

For the reasons discussed above, the court will deny Shure's claims of patent misuse based on certain provisions included in HCI's licensing agreements, namely (1) providing for a post-expiration marking requirement; (2) requiring post-expiration supply obligations; (3) providing for an undiminishing royalty rate; and (4) including a potential retroactive royalty increase.

So **ORDERED** and **SIGNED** this **26** day of **March, 2009.**

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN1[] **Summary Judgment, Entitlement as Matter of Law**

Fed. R. Civ. P. 56(c) provides that summary judgment is proper if the pleadings, the discovery and disclosure materials on file, and any affidavits show that there is no genuine issue as to any material fact and that the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. An issue of material fact is genuine if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. Summary judgment will be granted against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Scintilla Rule

HN2[] **Summary Judgment, Burdens of Proof**

The party moving for summary judgment has the burden of demonstrating that there are no genuine issues of material fact. If the moving party sustains the burden, the nonmoving party must set forth facts demonstrating the existence of a genuine issue for trial. *Fed. R. Civ. P. 56(e)* provides that when a properly supported motion for summary judgment is made, an adverse party may not rest upon the mere allegations or denials of the adverse party's pleading, but the adverse party's response, by affidavits or as otherwise provided in this rule, must set forth specific facts showing that there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*. The adverse party therefore must raise more than a mere scintilla of evidence in its favor in order to overcome a summary judgment motion, and cannot survive by relying on unsupported assertions, conclusory allegations, or mere suspicions. However, the existence of disputed issues of material fact should be ascertained by resolving all inferences, doubts and issues of credibility against the moving party.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN3[] **Antitrust & Trade Law, Sherman Act**

Summary disposition of antitrust cases is difficult because of their inherent factual complexity and because motive and intent are paramount considerations. However, complexity does not mean that summary disposition is thereby precluded or even disfavored in ***antitrust law***. Rather, summary judgment may be particularly important in antitrust cases to prevent lengthy and drawn-out litigation that has a chilling effect on competitive market forces.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

HN4[] **Sherman Act, Claims**

Section 1 of the Sherman Act provides that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. *15 U.S.C.S. § 1*. *Section 2* of the Sherman Act provides that every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony. *15 U.S.C.S. § 2*. A related statute, the Clayton Act, provides plaintiffs with the right of private action to vindicate violations of the Sherman Act. *15 U.S.C.S. §§ 4* and *16*.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

HN5[] **Collectives & Cooperatives, Capper-Volstead Act**

The Capper-Volstead Act, *7 U.S.C.S. § 291*, provides agricultural cooperatives a limited exemption from antitrust laws. The Capper-Volstead Act clarified and expanded the antitrust exemption for cooperatives found in Section 6 of the Clayton Act, *15 U.S.C.S. § 17*.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

HN6[] **Collectives & Cooperatives, Capper-Volstead Act**

See *7 U.S.C.S. § 291*.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Clayton Act

HN7[] **Collectives & Cooperatives, Clayton Act**

See *15 U.S.C.S. § 17*.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

HN8[] **Collectives & Cooperatives, Capper-Volstead Act**

As the Supreme Court has made clear, for defendants to be exempt from antitrust liability under the Capper-Volstead Act, *7 U.S.C.S. § 291*, they must establish not only that the cooperative was entitled to the Act's protection but also that all of the entities that were members of the cooperative were likewise qualified under the Act. Even one non-farmer member in a cooperative disqualifies a cooperative from claiming the Capper-Volstead exemption. Thus, if non-producers participate as members in an agricultural cooperative, that cooperative is not entitled to avail itself of the Capper-Volstead exemption.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

HN9[] **Collectives & Cooperatives, Capper-Volstead Act**

A defendant cooperative claiming immunity from antitrust laws under the Capper-Volstead Act, *7 U.S.C.S. § 291*, must establish that the cooperative is a valid Capper-Volstead cooperative by showing all of the following: 1) all of the members of the cooperative are producers of agricultural products; 2) each member of the cooperative only gets one vote regardless of its size; 3) the cooperative does not pay dividends on stock or membership capital in excess of 8 per centum per annum; and 4) at least 50 percent of the products dealt with by the cooperative are products of its members. *7 U.S.C.S. § 291*. The last element is commonly referred to as the 50 percent rule.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

HN10[] **Collectives & Cooperatives, Capper-Volstead Act**

When agricultural industries vertically integrate, including non-farmer middlemen such as processors, the economic role of these middlemen exceeds the conduct Congress intended to permit through the Capper-Volstead exemption, *7 U.S.C.S. § 291*. Courts have held that inclusion of a wholly-owned subsidiary which is a processor as a member of an agricultural cooperative destroys Capper-Volstead immunity.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

HN11[] **Collectives & Cooperatives, Capper-Volstead Act**

For purposes of the Capper-Volstead anti-trust exemption for agricultural cooperatives, *7 U.S.C.S. § 291*, a member has been held to be a person with voting rights in the association. That is, a member, for purposes of the Capper-Volstead Act, is someone with the power to participate in the control and policy making of the association through voting or some equivalent form of power. Simply put, if a member does not have any input into the affairs of the association, surely such member should not be able to destroy the immunity which the association would otherwise enjoy.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

HN12[] **Collectives & Cooperatives, Capper-Volstead Act**

A cooperative made of fully integrated producers of agricultural products performing its own processing and which hence does not associate for purposes of common handling, processing, and marketing is nevertheless engaged in the production of agricultural products as a farmer for purposes of *15 U.S.C.S. § 1*'s exemption under Capper-Volstead, *7 U.S.C.S. § 291*, if the cooperative is also engaged in traditional farming activity.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

HN13[] **Collectives & Cooperatives, Capper-Volstead Act**

The existence of even one non-farmer member in an agricultural cooperative is sufficient to destroy Capper-Volstead immunity under *7 U.S.C.S. § 291*.

Antitrust & Trade Law > Exemptions & Immunities > Collectives & Cooperatives > Capper-Volstead Act

HN14[] **Collectives & Cooperatives, Capper-Volstead Act**

The Capper-Volstead Act, *7 U.S.C.S. § 291*, was not intended to create an absolute shield from antitrust liability for agricultural cooperatives. Courts have held that where an agricultural cooperative acts in concert or enters into an agreement with persons or entities not engaged in agricultural production the Capper-Volstead exemption does not apply. Cooperatives cannot, for example, conspire or combine with nonexempt entities to fix prices or control supply, even though such activities are lawful when engaged in by cooperatives alone. Additionally, a cooperative cannot enter into agreements with persons not engaged in agricultural production for the purpose of acquiring monopoly power.

Antitrust & Trade Law > Sherman Act > Claims

HN15[] **Sherman Act, Claims**

To establish a conspiracy in violation of the Sherman Act under *Section 1* and *Section 2*, *15 U.S.C.S. §§ 1*, *2*, plaintiffs must allege and eventually prove: (1) concerted action by defendants; (2) that produced anti-competitive effects within the relevant product and geographic markets; (3) that involved illegal conduct or purpose and (4) that proximately caused injury to plaintiffs. Claims for conspiracy to monopolize under *Section 2* of the Sherman Act also require evidence of a conspiracy.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN16[] **Per Se Rule & Rule of Reason, Per Se Violations**

Horizontal price fixing is per se illegal. When an action engaged in is per se illegal, further examination of the practice's impact on the market is unnecessary to find that it produced adverse, anticompetitive effects within relevant product and geographic markets.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN17[] **Conspiracy to Monopolize, Elements**

The essence of concerted action is the existence of an agreement. Unilateral action simply does not support antitrust liability; there must be a unity of purpose or a common design and understanding or a meeting of the minds in an unlawful arrangement. Concerted action is established where two or more distinct entities have agreed to take action against the plaintiff. The Supreme Court has determined that agricultural cooperatives, like corporations, do not have the plurality of actors necessary for a conspiracy.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN18[] **Conspiracy to Monopolize, Sherman Act**

For purposes of determining whether certain entities are capable of conspiring in violation of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, the involvement of family relationships in varying ownerships is immaterial to determining common ownership and control. That partners in a company or between companies are related by blood or marriage--no matter how closely--does not ensure that they will uniformly agree on how to control the companies. Merely because two people are related does not mean that they have the same views and interests in their family businesses.

Opinion by: THOMAS N. O'NEILL, JR.

Opinion

[*277] O'NEILL, J.

MEMORANDUM

This is an antitrust case involving the applicability of the Capper-Volstead exemption for agricultural cooperatives. Discovery was phased with Phase One concerning the Capper-Volstead issue. Presently before me are the motions for summary judgment filed by defendant Mushroom Alliance, Inc., defendant Kitchen Pride Mushrooms, defendant M.D. Basciani & Sons, Inc., defendant Eastern Mushroom Marketing Cooperative, Inc. ("EMMC") [1] and certain defendants, [2] defendant **[*278]** JM Farms and defendant Franklin Farms, plaintiffs' omnibus response, and

---

[1] The EMMC's motion is one for partial summary judgment as it does not seek summary judgment at this time on plaintiffs' claims for monopolization, attempted monopolization or claims under *Section 7* of the Clayton Act.

[2] The following defendants are included as "certain defendants" in the EMMC's motion: Eastern Mushroom Marketing Cooperative, Inc.; Kaolin Mushroom Farms, Inc.; To-Jo Fresh Mushrooms, Inc.; Cardile Mushrooms, Inc.; Mario Cutone Mushroom Co., Inc.; Cardile Bros. Mushrooms, Packaging; Monterey Mushrooms, Inc.; Phillips Mushrooms Farms, LP; Modern Mushroom Farms, Inc.; Sher-Rockee Mushroom Farm; C&C Carriage Mushroom Co.; John Pia; Michael Pia; Brownstone Mushroom Farms, Inc.; Robert A. Ferato T/A Bella Mushroom; Farms, Inc.; Forest Mushroom, Inc.; Gaspari Bros. Inc.; Gino Gaspari & Sons, Inc.; Giorgi Mushroom Company; Giorgio Foods, Inc.; Harvest Fresh Farms, Inc.; Leone Pizzini and Son, Inc.;

some defendants' replies thereto; [3] the motion for summary judgment filed by consolidated plaintiffs, responses by some defendants and plaintiffs' omnibus reply; and the motion to strike filed by plaintiffs All American Mushroom, Inc., Robert Altman and Associate Grocers, Inc., [4] responses by some defendants and plaintiffs' reply thereto. The parties have submitted voluminous exhibits including witness depositions from **[**25]** the various entities involved in this litigation.

BACKGROUND

The history between the parties to this antitrust lawsuit is lengthy, convoluted and contentious; thus, I will begin by identifying some of the relevant entities at issue in the current motions and the undisputed facts regarding their structure and provide a limited recitation of the relevant procedural history.

I. Factual History

Incorporated in the Commonwealth of Pennsylvania and headquartered in Kennett Square, Pennsylvania, the EMMC is a large mushroom cooperative comprised of entities that grow, buy, sell, package and ship mushrooms to retail and food service outlets across the United States. The list of defendants includes mushroom growers, packagers, sellers, distributors and other related entities that were either members or affiliates of members of the EMMC.

It is **[**27]** undisputed that from 2001 to 2005, the EMMC adapted and amended various minimum pricing policies for mushrooms sold to the fresh market. Defendants assert that these policies had exceptions, were not enforced by the EMMC and were routinely not followed by members. It is undisputed that member dues were based on the number of pounds of mushrooms that were sold to the fresh market by the distributor operations and not the amount grown by the growing operations.

According to the undisputed facts, M. Cutone Mushroom Co., Inc., joined the EMMC on January 20, 2001. M. Cutone is one of several mushroom related companies owned by the Cutone family that defendants allege are commonly owned, controlled and operated by Mario Cutone, his wife and their three adult sons. M&V Enterprises is also owned by the Cutone family and grows mushrooms and sells or transfers 100% of the mushrooms it grows to M. Cutone Avondale which transfers them to M. Cutone Chelsea along with other mushrooms it purchases. The address on Cutone's EMMC membership agreement bears the M. Cutone Chelsea address and the letterhead describes M. Cutone as "Receivers and Commission Merchants Fruits, Vegetables and Flowers." **[*279]** M. Cutone **[**28]** does not grow mushrooms. The EMMC minimum pricing applied to M. Cutone's sales to its wholesale and retail customers.

Kaolin Mushroom Farms, Inc. joined the EMMC on January 9, 2001. South Mill Mushroom Sales Inc. is a mushroom marketer, packer and shipper. Both Kaolin and South Mill are jointly owned and operated by John and Michael Pia, each of whom have a 50% interest in each company. John and Michael Pia, through 100% ownership in two companies, Pennsylvania Mushroom Distribution, Inc. and Mushroom Substrate Technologies, Inc., held a 50% ownership interest in four companies that operated mushroom distribution centers in Dallas, Houston, New Orleans and Atlanta. The remaining 50% ownership interest in the distribution centers was held by Stuart Thomas through his ownership of Thomas Mushroom Distribution Inc. and Dallas South Mill Inc. The Kaolin/South Mill distribution centers were not EMMC members, did not grow mushrooms but sold mushrooms grown by defendant

---

Louis M. Marson, Jr., Inc.; LRP Mushrooms, Inc.; LRP-M Mushrooms LLC; Oakshire Mushroom Farm, Inc.; South Mill Mushroom Sales, Inc.; United Mushroom Farms Cooperative, Inc.; and Country Fresh Farms, Inc.

The following defendants joined **[**26]** in the motion filed by the EMMC defendants: M.D. Basciani & Sons, Inc.; Mushroom Alliance, Inc.; Kitchen Pride Mushrooms; JM Farms; and Franklin Farms.

[3] Defendants Masha & Toto, Inc., T/A M&T Mushrooms and W&P Mushroom Inc. have not joined in or filed separate motions for summary judgment.

[4] The motion to strike is to exclude the portions of defendants' motions that are beyond the scope of Phase One discovery.

Kaolin. The Kaolin/South Mill distribution centers adhered to EMMC minimums in their mushroom sales. Defendants assert that the distribution centers were contractually obligated to price mushrooms at prices specified by Kaolin/South **[**29]** Mill.

LRP-M Mushrooms LLC joined the EMMC on January 9, 2001. The Articles of Incorporation for LRP-M were filed in January 2001. Dominic Manfredini and his nephew Lucio Pizzini each have a 50% ownership interest in LRP-M. Lucio Pizzini also owns LRP Mushrooms. LRP grows mushrooms on land leased to him by Dominic Manfredini. Both LRP-M and LRP sell 100% of their mushrooms to Manfredini Enterprises, Inc., which buys, packages and markets produce including mushrooms. Manfredini Enterprises is owned by the wife of Dominic Manfredini and Dominic Manfredini serves as its president and operator. Manfredini Enterprises does not grow mushrooms. The mushrooms that Manfredini Enterprises acquired from LRP-M account for 20-25% of the mushrooms that Manfredini Enterprises resold to its customers. EMMC minimum pricing applied to sales by Manfredini Enterprises.

Although it will not be addressed in this opinion because the only issue upon which discovery was conducted was the EMMC's Capper-Volstead immunity, as background, plaintiffs assert that defendants allegedly launched a "supply control" campaign by using membership funds collected during 2001 and 2002 to acquire and subsequently dismantle non-EMMC **[**30]** mushroom growing operations in order to support and maintain artificial price increases. Plaintiffs allege that the EMMC repeatedly would purchase a mushroom farm or a parcel of farmland and then sell or exchange that farm or parcel at a loss, attaching a permanent or long-term deed restriction to the land prohibiting the conduct of any business related to the growing of mushrooms. Plaintiffs cite several specific examples of this alleged practice during 2001 and 2002.

Plaintiffs further allege that defendants collectively interfered with non-EMMC growers that sought to sell at prices below those set by the EMMC and pressured independent growers to join the EMMC. The pressure and coercion tactics alleged include threatening and/or implementing a group boycott in which EMMC members would not sell mushrooms to assist independent growers in satisfying their short-term supply needs and/or selling mushrooms to independent growers at inflated prices.

[*280] II. Procedural History

On December 16, 2004, the United States Department of Justice filed an antitrust complaint against the EMMC after an eighteen-month investigation of the EMMC's membership activities, qualifications as a cooperative and marketing **[**31]** practices. United States v. E. Mushroom Mktg. Coop., Inc., Civil Action No. 04-CV-5829 (E.D. Pa. Dec. 16, 2004). On September 9, 2005, final judgment was entered, pursuant to which the United States and the EMMC agreed to file documents nullifying deed restrictions placed on six parcels sold or transferred by the EMMC and to impose no similar deed restrictions on other properties for the next ten years. [5]

On June 26, 2006, plaintiffs, direct purchasers of mushrooms, filed a consolidated amended antitrust class action under federal law against defendants, the EMMC, thirty-seven members, officers and affiliates of members, and unidentified members and/or co-conspirators during the class period (collectively, "defendants"), alleging that defendants engaged in an illegal scheme and conspiracy to cause plaintiffs to pay artificially inflated prices for mushrooms from January 2001 **[**32]** to date of filing. Plaintiffs filed their consolidated amended antitrust class action complaint pursuant to my June 5, 2006 Order consolidating seven class actions and one non-class action previously filed against defendants to promote judicial economy and avoid duplication. The consolidated actions include the Class Action Complaint, the Giant Eagle Amended Complaint and the Publix Amended Complaint.

Specifically, plaintiffs brought this action to recover treble damages, equitable relief, costs of suit and reasonable attorneys' fees pursuant to the Clayton Act, *15 U.S.C. §§ 15(a)* and *26 (2007)*, for defendants' alleged violations of

---

[5] Some defendants rely on the final judgment of the DOJ in asserting that the EMMC is properly formed under the Capper-Volstead Act. However, the Competitive Impact Statement specifically states that "the Final Judgment has no prima facie effect in any subsequent lawsuits that may be brought against the Defendants."

the anti-competitive conspiracy, monopolization and attempted monopolization provisions of the Sherman Act, *15 U.S.C. §§ 1* and *2*, and the unlawful acquisition provision of the Clayton Act, *15 U.S.C. § 18*.

On April 25, 2007, I granted defendants' motions to dismiss Count II of plaintiffs' consolidated amended complaint for monopolization and attempted monopolization under *Section 2* of the Sherman Act as to all defendants other than defendant EMMC and denied defendants' motion to dismiss in all other respects.

On August 8, 2007, I ordered phased discovery with **[**33]** Phase One discovery limited to: (1) whether all members of the EMMC are mushroom growers; (2) facts regarding the vertical integration of EMMC members; (3) whether any third parties conspired with the EMMC or any of its members to violate the antitrust laws; and (4) whether any parties were coerced, threatened or pressured by defendants to participate, join or conspire with the EMMC or any of its members to violate the antitrust laws. In my Order of April 17, 2008, I stated that "[t]he purpose of phasing discovery was to facilitate a determination on the issue of Capper-Volstead immunity at the earliest possible stage in the litigation." My January 8, 2008 Order stated that "Phase One must encroach upon the merits of plaintiffs' claims to some extent and achieving an impermeable divide between Phase One and the merits was never the goal of phased discovery in this case." In my February 12, 2008 Order, I allowed discovery **[*281]** under Phase One of "all communications between [defendants] and any members of the EMMC and/or the EMMCGA . . . ." and "all documents concerning the 'supply control' campaign . . . ."

STANDARD OF REVIEW

HN1[] *Rule 56(c) of the Federal Rules of Civil Procedure* provides, in **[**34]** relevant part, that summary judgment is proper "if the pleadings, the discovery and disclosure materials on file, and any affidavits show that there is no genuine issue as to any material fact and that the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. An issue of material fact is genuine if "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. Summary judgment will be granted "against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*.

HN2[] The party moving for summary judgment has the burden of demonstrating that there are no genuine issues of material fact. *Id. at 322-23*. If the moving party sustains the burden, the nonmoving party must set forth facts demonstrating the existence of a genuine issue for trial. See *Anderson, 477 U.S. at 255*. *Rule 56(e)* provides that when a properly supported motion for summary judgment is made, "an adverse party may not rest upon the mere allegations **[**35]** or denials of the adverse party's pleading, but the adverse party's response, by affidavits or as otherwise provided in this rule, must set forth specific facts showing that there is a genuine issue for trial." *Fed. R. Civ. P. 56(e)*. The adverse party therefore must raise "more than a mere scintilla of evidence in its favor" in order to overcome a summary judgment motion, and cannot survive by relying on unsupported assertions, conclusory allegations, or mere suspicions. *Williams v. Borough of W. Chester, 891 F.2d 458, 460 (3d Cir. 1989)*. However, the "existence of disputed issues of material fact should be ascertained by resolving 'all inferences, doubts and issues of credibility against'" the moving party. *Ely v. Hall's Motor Transit Co., 590 F.2d 62, 66 (3d Cir. 1978)*, quoting *Smith v. Pittsburgh Gage & Supply Co., 464 F.2d 870, 874 (3d Cir. 1972)*.

HN3[] Several courts have noted that summary disposition of antitrust cases is difficult because of their inherent factual complexity and because motive and intent are paramount considerations. See e.g., *Poller v. Columbia Broadcasting Sys., Inc., 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*; *Hayden Publishing Co. v. Cox Broadcasting Corp., 730 F.2d 64, 68 (2d Cir. 1984)*. **[**36]** However, complexity does not mean that summary disposition is thereby precluded or even disfavored in ***antitrust law***. *Capital Imaging Assocs., P.C. v. Mohawk Valley Medical Assocs.., 996 F.2d 537, 541 (2d Cir. 1993)*. Rather, summary judgment may be particularly important in antitrust cases to prevent lengthy and drawn-out litigation that has a chilling effect on competitive market forces. Id. The present motions will be considered in light of these standards.

Defendants are moving for summary judgment with respect to plaintiffs' claims under *Section 1* and the conspiracy claims under *Section 2* on the ground that they are exempt under the Capper-Volstead Act. Thus, defendants have the burden of proof to show that EMMC qualifies as a Capper-Volstead cooperative. See *El v. Southeastern Penn. Trans. Auth., 479 F.3d 232, 237 **[*282]** (3d Cir. 2007)*. Plaintiffs filed cross motions for summary judgment and have the burden of proving their allegations that vitiate the EMMC's alleged immunity as well as their ultimate claims of conspiracy under *Section 1* and *2*. See *Cosmetic Gallery, Inc. v. Schoeneman Corp., 495 F.3d 46, 55 (3d Cir. 2007)*.

DISCUSSION

Plaintiffs allege that defendants violated *Sections 1* **[**37]** and *2* of the Sherman Act as well as *Section 7* of the Clayton Act. Phase One discovery was limited to determining the issue of whether defendants are entitled to Capper-Volstead exemption for plaintiffs' conspiracy claims under *Sections 1* and *2* of the Sherman Act. Defendants' motions for summary judgment claim that they are entitled to summary judgment because they are exempt and, even if they were not immune, some defendants claim that plaintiffs have failed to assert any basis for holding them specifically liable. [6] Plaintiffs have filed a cross motion for summary judgment on defendants' affirmative defense of Capper-Volstead exemption.

HN4[] *Section 1* of the Sherman Act provides: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. *Section 2* of the Sherman Act provides: "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony." *15 U.S.C. § 2*. A related statute, the Clayton Act, provides plaintiffs with the right of private action to vindicate violations of the Sherman Act. *15 U.S.C. §§ 4* and *16*.

HN5[] The Capper-Volstead Act provides agricultural cooperatives a limited exemption from antitrust laws. See *Nat'l Broiler Mktg. Ass'n v. United States, 436 U.S. 816, 822, 98 S. Ct. 2122, 56 L. Ed. 2d 728 (1977)*; **[**39]** *Md. & Va. Milk Producers Ass'n, Inc. v. United States, 362 U.S. 458, 466-67, 80 S. Ct. 847, 4 L. Ed. 2d 880 (1960)*. The Act states, in relevant part:

> ***HN6***[] Persons engaged in the production of agricultural products as farmers, planters, ranchmen, dairymen, nut or fruit growers may act together in associations, corporate or otherwise, with or without capital stock, in collectively processing, preparing for market, handling, and marketing in interstate and foreign commerce, such products of persons so engaged. Such associations may have marketing agencies in common; and such associations and their members may make the necessary contracts and agreements to effect such purposes: Provided, however, That such associations are operated for the mutual benefit of the members thereof . . . .

[*283] *7 U.S.C. § 291*. The Capper-Volstead Act clarified and expanded the antitrust exemption for cooperatives found in *Section 6* of the Clayton Act, which states, in relevant part:

> ***HN7***[] Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor, agricultural or horticultural organizations instituted for the purposes of mutual help . . . or forbid or restrain individual members of such organizations from lawfully **[**40]** carrying out the legitimate objects thereof; nor shall such organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade under the antitrust laws.

---

[6] Defendants Mushroom Alliance, Kitchen Pride, Basciani & Sons, Inc., JM Farms, Michael Pia, John Pia, Giorgio Foods Inc., Gaspari Bros. Inc., and LRP Mushroom Inc. claim that regardless of the exemption determination their motions for summary judgment on plaintiffs' claims against them should be granted. Because Phase One discovery was narrowly focused on facts implicating the Capper-Volstead exception, I will dismiss without prejudice all of defendants' arguments not pertaining to Capper-Volstead because resolution at this stage would be premature. **[**38]** While some of the discovery may have allowed for plaintiffs to discover facts relating to defendants' individualized arguments, the nature of the Capper-Volstead exemption did not require plaintiffs to do so at this stage and I find sufficient their *Rule 56(f)* affidavit stating that discovery on such issues is still necessary.

15. U.S.C. § 17. In Maryland & Virginia Milk Producers, the Supreme Court recognized that the Act and its legislative history "indicate[] a purpose to make it possible for farmer-producers to organize together, set association policy, fix prices at which their cooperative will sell their produce, and otherwise carry on like a business corporation without thereby violating the antitrust laws." *362 U.S. at 466*. Defendants argue that no genuine issues of material fact exist regarding their qualification for the Capper-Volstead exemption. However, plaintiffs argue that defendants are not entitled to the Capper-Volstead exemption because non-growers are members of the cooperative and that the EMMC and its members conspired with non-members to fix prices. [7]

I. Non-Grower Members

HN8[] As the Supreme Court has made clear, for defendants to be exempt from antitrust liability under the Capper-Volstead Act, they must establish not only that the EMMC was entitled to the Act's protection but also that all of the entities that were members of the EMMC were likewise qualified under the Act. [8] *Nat'l Broiler, 436 U.S. at 822-23*. The Supreme Court held that even one non-farmer member in a cooperative disqualifies a cooperative from claiming the Capper-Volstead exemption. [9] *Id. at 826-828*. This decision was consistent with the Court's previous holding in *Case-Swayne Co., Inc. v. Sunkist Growers, Inc. (Sunkist II), 389 U.S. 384, 88 S. Ct. 528, 19 L. Ed. 2d 621 (1967)*, **[**42]** in which it denied the Capper-Volstead exemption to a citrus growers association because approximately 15% of its members were non-farmer producers. Both cases held that even one "middleman" infiltrated into an **[*284]** otherwise exempt cooperative destroys Capper-Volstead immunity. *Sunkist II, 389 U.S. at 395-96*. Accordingly, if non-producers participate as members in an agricultural cooperative, that cooperative is not entitled to avail itself of the Capper-Volstead exemption. Id.

HN10[] "[W]hen agricultural industries vertically integrate, including non-farmer **[**43]** middlemen such as processors, the economic role of these middlemen exceeds the conduct Congress intended to permit through the Capper-Volstead exemption. *Ripplemeyer v. Nat'l Grape Co-op. Ass'n, Inc., 807 F. Supp. 1439, 1457 (W.D. Ark. 1992)*. In Ripplemeyer, the court held that inclusion of a wholly-owned subsidiary which was a processor as a member of an agricultural cooperative destroyed Capper-Volstead immunity. *Id.* [10]

Thus, while the exemption provides a limited immunity to farm **[**44]** cooperatives from antitrust litigation, the uncontested nature of M. Cutone forecloses application of the Capper-Volstead exemption. In this case, there is no

[7] Plaintiffs also argue that the Capper-Volstead immunity is destroyed because (1) defendants fail to satisfy the 50% rule to qualify as a valid cooperative for Capper-Volstead exemption; (2) defendants entered into multiple agreements **[**41]** with persons or entities not engaged in agricultural production in addition to their actions of fixing prices; and (3) defendants engaged in the types of anticompetitive and predatory practices that fall outside the legitimate objects of an agricultural cooperative. As plaintiffs need only prove one defect that deprives defendant of exemption under Capper-Volstead and genuine issues of material fact exist as to many of these arguments, I need not address each argument and the legal issues they raise if I find one sufficient to destroy the exemption.

[8] ***HN9***[] Specifically, defendants must establish that the EMMC is a valid Capper-Volstead cooperative by showing all of the following: 1) all of the members of the cooperative are producers of agricultural products; 2) each member of the cooperative only gets one vote regardless of its size; 3) the cooperative "does not pay dividends on stock or membership capital in excess of 8 per centum per annum;" and 4) at least 50% of the products dealt with by the cooperative are products of its members. *7 U.S.C. § 291*. The last element is commonly referred to as the 50% Rule.

[9] Thus, some defendants' arguments that they are proper members of the EMMC are irrelevant.

[10] Defendants claims that Ripplemeyer should be read in full. In Ripplemeyer, both the parent and subsidiary were members of the agricultural cooperative and the court found that inclusion of the non-grower processor as a member destroyed Capper-Volstead immunity but that the two entities could not conspire because their parent-subsidiary relationship meant that they were not separate entities capable of conspiring. *Ripplemeyer, 807 F. Supp. at 1459*. I find M. Cutone to be an improper member of the EMMC for the same reason that the processor in *Ripplemeyer* destroyed immunity. And here, unlike in *Ripplemeyer,* the grower entity affiliated with M. Cutone, M & V Enterprises, was not a member of the cooperative.

dispute that M. Cutone Chelsea, an EMMC member, is a non-farmer processor. As such, its presence as a member of the agricultural cooperative destroys Capper-Volstead immunity.

While defendants concede in their reply to plaintiffs' motion for summary judgment that EMMC member M. Cutone is a mushroom distributor and not a grower, they argue that this is a technical, de minimis violation that should not act to destroy the cooperative's Capper-Volstead immunity. Defendants argue that, because there is complete identity of ownership between M. Cutone, which is not a grower, and M & V, which is a grower, M. Cutone is properly a member of the EMMC and that the cooperative should not lose immunity because M. Cutone registered the wrong company owned by his family. Defendants cite *Alexander v. National Farmers Organization, 687 F.2d 1173, 1186 (8th Cir. 1982)*, for the proposition that a technical, de minimis error in record keeping should not preclude application of the Capper-Volstead exemption to an otherwise exempt cooperative organized **[**45]** for the benefit of true agricultural producers. However, this case is distinguishable. In *Alexander*, the court held that a cooperative operating for the protection of dairymen whose bylaws prohibited non-farmers from voting was entitled to Capper-Volstead Act protection though it had received $ 25 membership donations, not fees or dues, from a small number of non-farmers with no connection to the dairy industry, had never been to a meeting and had not exerted any control over the cooperative as the result of careless record keeping. *Id. at 1185-87*. In this context, then, ***HN11***[] a "member" has been held to be a person with voting rights in the association. See also *Agritronics Corp. v. Nat'l Dairy Herd Ass'n, 1994 U.S. Dist. LEXIS 14168, 1994 WL 542203, at *4 (N.D. N.Y. Sept. 22, 1994)*, holding that a "member," for purposes of the Capper-Volstead Act, is someone with the power to participate in the control and policy making of the association through voting or some equivalent form of power **[*285]** and that, "[s]imply put, if a member does not have any input into the affairs of the association, surely, such member should not be able to destroy the immunity which the association would otherwise enjoy."

Though M. Cutone is affiliated **[**46]** with M & V Enterprises, a grower of mushrooms which defendants claim has the same owners as M. Cutone, this cannot be considered a de minimis exception because it is undisputed that M. Cutone was a non-grower member who had the power to participate in the control and policy making of the association through voting. Notably, in Alexander there was no suggestion "that dairy industry processors were members of NFO." *Alexander, 687 F.2d at 1186*. [11] Here, M. Cutone is a mushroom distributor and a middleman, the very type of entity from which Capper-Volstead was designed to protect the interests of farmer/producers. [12]

---

[11] The Alexander Court noted that the NFO was exactly the kind of "populist farm organization contemplated by the Capper Volstead Act." *Alexander, 687 F.2d at 1186-87*. The court cited Justice Brennan's concurrence in Nat'l Broiler, noting that the Capper-Volstead Act was designed to allow farmers to band together "in order to survive against the economically dominant manufacturing, supplier, and purchasing interests with which they had to interrelate" *Nat'l Broiler, 436 U.S. at 830*, and that it would be "cruelly ironic to exempt large co-ops [that are] professionally managed **[**47]** and operated by many non-farmers-while denying exemption to the farmers who banded together in NFO." *Alexander, 687 F.2d at 1186-87*.

However, the EMMC appears to be exactly the kind of cooperative foreseen in Justice Brennan's concurrence and discussed in *United States v. Hinote, 823 F. Supp. 1350, 1358 (S.D. Miss. 1993)*: ***HN12***[] a cooperative made of "fully integrated producer[s] of agricultural products performing its own processing . . . and which hence does not associate for purposes of common handling, processing, and marketing is nevertheless 'engaged in the production of agricultural products as [a] farme (r]' for purposes of *§ 1*'s exemption . . . if also engaged in traditional farming activity." *Nat'l Broiler, 436 U.S. at 834*. I will discuss below whether members of the EMMC are properly integrated so as to be considered a single entity that produces and distributes.

It is troubling that the EMMC appears to have been organized for the benefit of mushroom distributors, whether fully integrated or whether affiliated, rather than for the benefit of the grower members. This is demonstrated by the fact that dues were based not on the pounds grown by the member growers but by the total number **[**48]** of pounds sold by the affiliated or integrated distributors. Under this system, some small growers contributing under 25% of the total pounds of mushrooms sold by their affiliated distributor paid dues based on the distributors' sales, not their own. This cannot but harm growers. Additionally, the price fixing in which the EMMC admits it participated was applied to integrated and affiliated distributors' sales and not at the growers level. Additionally, the EMMC did not have pure growers unaffiliated with a distributor as members; instead, it helped them to organize the EMMCGA which was to benefit pure growers. In combination, these undisputed facts show that protecting true growers was not the purpose of the organization. While the cooperative "give[s] the set-up the color of a producer rather

[*286] As previously noted, ***HN13***[] the existence of even one non-farmer member in an agricultural cooperative is sufficient to destroy Capper-Volstead immunity. *Nat'l Broiler, 436 U.S. at 826-29*. Registering a non-grower as a member of the EMMC is an indication of the EMMC's true purpose: to benefit distributors rather than growers. Thus, I cannot excuse the inclusion of M. Cutone as a participating member of the EMMC as a de minimis technicality. [13]

II. Conspiracy with Non-Members

Even if all EMMC members satisfied the requirements to qualify the cooperative for the Capper-Volstead exemption, the exemption does not extend to protect cooperatives that conspire with non-cooperatives. ***HN14***[] The Capper-Volstead Act was not intended to create an absolute shield from antitrust liability for agricultural cooperatives. Courts have held that where an agricultural cooperative acts in concert or enters into an agreement with persons or entities not engaged in agricultural production the Capper-Volstead exemption does not apply. See e.g., *Nat'l Broiler, 436 U.S. at 827-28*; *United States v. Borden Co., 308 U.S. 188, 204-05, 60 S. Ct. 182, 84 L. Ed. 181 (1939)*, holding that "[t]he right of these agricultural producers thus to unite in preparing for market and in marketing their products, and **[**51]** to make the contracts which are necessary for that collaboration, cannot be deemed to authorize any combination or conspiracy with other persons in restraint of trade that these producers may see fit to devise." Cooperatives cannot, for example, conspire or combine with nonexempt entities to fix prices or control supply, even though such activities are lawful when engaged in by cooperatives alone. *Alexander, 687 F.2d at 1182 (8th Cir. 1982)*, citing *Borden, 308 U.S. at 207-208*. Additionally, a cooperative "cannot enter into agreements with persons not engaged in agricultural production [] for the purpose of acquiring monopoly power." *Holly Sugar Corp. v. Goshen County Coop. Beet Growers Ass'n, 725 F.2d 564, 569 (10th Cir. 1984)*.

HN15[] To establish a conspiracy in violation of the Sherman Act under *Section 1* and *Section 2*, plaintiffs must allege and eventually prove: (1) concerted action by defendants; (2) that produced anti-competitive effects within the relevant product and geographic markets; (3) that involved illegal conduct or purpose and (4) that proximately caused injury to plaintiffs. See *Gordon v. Lewistown Hosp., 423 F.3d 184, 207, 207 n.16 (3d Cir. 2005)*, stating that "[c]laims for **[**52]** conspiracy to monopolize under *Section 2* of the Sherman Act also require evidence of a conspiracy"; *Mathews v. Lancaster Gen. Hosp., 87 F.3d 624, 639 (3d Cir. 1996)*.

Plaintiffs argue that defendants engaged in price fixing with affliated distributors Kaolin/South Mill distribution centers and Manfredini. [14] These affliated distributors **[*287]** are affiliated with member growers Kaolin and LRP-M, respectively.

---

than a handler[,] [t]he plan adopted was ingenious but transparent." See ***United States v. Elm Spring Farm, Inc., 38 F. Supp. 508, 511 (D. Mass. 1941)***.

[12] Defendants also suggest that the Nat'l Broiler line of cases does not apply to distributors like M. Cutone but merely to processors. However, Nat'l Broiler includes both processors and distributors in its conception of the middlemen from whom **[**49]** Capper-Volstead and related exemptions to anti-trust laws were created to protect farmers and producers. *Nat'l Broiler, 436 U.S. at 825-826*, noting that the Capper-Volstead Act was passed because "[f]armers were seen as being caught in the hands of *processors and distributors* who, because of their position in the market and their relative economic strength, were able to take from the farmer a good share of whatever profits might be available from agricultural production. By allowing farmers to join together in cooperatives, Congress hoped to bolster their market strength and to improve their ability to weather adverse economic periods and to deal with processors and distributors," emphasis added.

[13] As I have found that the EMMC is not exempt under Capper-Volstead **[**50]** by including M. Cutone as a member when it is not a grower, it was not necessary that I extend my analysis to other members of the EMMC which plaintiffs allege have problematic memberships including Leone Pizzini and Son, Inc., Brownstone Mushroom Farms, Inc., and LRP-M Mushrooms LLC, I make no determination at this time as to whether genuine issues of material fact exist as to these members

[14] Plaintiffs also argue that defendants engaged in price fixing with affliated distributors Masha and Buona. I will not consider the issue of whether a conspiracy exists with these entities because it appears that genuine issues of material fact may exist. I need

HN16[] Horizontal price fixing is per se illegal. See e.g., U.S. v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 60 S. Ct. 811, 84 L. Ed. 1129 (1940), declaring per se illegal any agreement "formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce;" Alexander, 687 F.2d at 1183. When an action **[**53]** engaged in is per se illegal, further examination of the practice's impact on the market is unnecessary to find that it produced adverse, anticompetitive effects within relevant product and geographic markets. See Pace Elecs., Inc. v. Canon Computer Sys., Inc., 213 F.3d 118, 123 (3d Cir. 2000), stating that "[the per se] standard, which is based on considerations of 'business certainty and litigation efficiency,' allows a court to presume that certain limited classes of conduct have an anticompetitive effect without engaging in the type of involved, market-specific analysis ordinarily necessary to reach such a conclusion."

It is undisputed that from 2001 through 2005, the EMMC adopted and amended various minimum pricing polices and that these prices applied to the sales of mushrooms of the distributors at issue. Because price fixing is per se illegal, whether a conspiracy exists to destroy the EMMC's exemption depends on whether the entities that plaintiffs allege engaged in the conspiracy with the EMMC and its members can be co-conspirators.

HN17[] The essence of concerted action is the existence of an agreement. Gordon, 423 F.3d at 207, citing Mathews, 87 F.3d at 639. "Unilateral action simply **[**54]** does not support liability; there must be a 'unity of purpose or a common design and understanding or a meeting of the minds in an unlawful arrangement.'" Id., quoting Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984), internal citations omitted. Concerted action is established where two or more distinct entities have agreed to take action against the plaintiff. See Weiss v. York Hosp., 745 F.2d 786, 812 (3d Cir. 1984). The Supreme Court has determined that agricultural cooperatives, like corporations, do not have the plurality of actors necessary for a conspiracy. See Sunkist Growers, Inc. v. Winckler & Smith Citrus Prods. Co. (Sunkist I), 370 U.S. 19, 27-29, 82 S. Ct. 1130, 8 L. Ed. 2d 305 (1962).

Defendants argue that there is no unlawful conspiracy between the EMMC and its members and Kaolin/South Mill distribution centers and Manfrendini even though these distributors sold at EMMC prices. They assert that Copperweld and Sunkist I support that these distributors were a single economic entity with an EMMC grower because each EMMC member and its affiliated distributors are commonly owned and operated. [15] Thus, defendants **[*288]** argue that if the alleged distributor co-conspirators and their affiliated **[**55]** member growers are a single economic unit then price fixing with the EMMC at the distribution level is permissible because as a cooperative the plurality of actors required for a conspiracy is absent.

---

not make such a determination at this time, however, because the relevant facts with regard to with Kaolin/South Mill distribution centers and Manfredini Enterprises are undisputed.

[15] Defendants also claim that they are a proper cooperative because they are set up to allow some of their growers to have the packaging and sale of their produce done through wholly-owned affiliates as was the case in the re-organized Sunkist cooperative examined in Case--Swayne Co. v. Sunkist Growers, Inc.., 355 F. Supp. 408 (C.D. Cal. 1971) and the lettuce producer cooperative in N. Cal. Supermarkets Inc. v. Cent. Cal. Lettuce Producers' Coop., 413 F. Supp. 984 (N.D. Cal. 1976). However, these cases are distinguishable.

First, the reorganized Sunkist cooperative's structure eliminated the non-grower members that were at issue in Sunkist II. Sunkist, 355 F. Supp. at 413, 415. Instead these entities became licensed packing houses with contracts with the growers or local cooperative to provide packaging services. Id. Some growers had their own packaging facilities. Id. However, the licensed packing houses had no vote, control or property rights in Sunkist. Id. at 415. While mushroom **[**56]** growers sold their mushrooms to the distributors who resold them at the cooperative's fixed price, the growers in Sunkist did not sell their product to these packagers. The growers in Sunkist sold their produce through the cooperative. Id. at 412.

Additionally, in N. Cal. Supermarkets Inc. the facts provide no indication that varying ownerships existed in the case and the analysis did not involve the issue of conspiracy and status as a single entity; thus the case was not helpful in my analysis of the organizational structures in this case. N. Cal. Supermarkets Inc., 413 F. Supp. at 985-94. Instead, it appears the member defendants involved were all "growershippers." Id. at 986.

In Sunkist I, the Court held that 12,000 growers organized into three legal entities constituted in practical effect and in the contemplation of the statutory exemption one organization or association incapable of conspiracy under the antitrust laws. *Sunkist I, 370 U.S. at 29*. Unlike *Sunkist I*, the facts here do not involve whether cooperatives in which all the members are growers can conspire with each other. Instead, defendants are arguing the alleged co-conspirators are a single economic unit with member growers **[**57]** being a part of the EMMC. Therefore, Sunkist I is not applicable.

In Copperweld, the Supreme Court held that a firm and its wholly-owned subsidiary are not capable of conspiring in violation of *§ 1* of the Sherman Act. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. The fundamental question was whether the parent and its wholly-owned subsidiary constituted one economic actor or two. *Siegel Transfer, Inc. v. Carrier Exp., Inc., 54 F.3d 1125, 1132 (3d Cir. 1995)*. The Supreme Court held in Copperweld that:

> there can be little doubt that the operations of a corporate enterprise organized into divisions must be judged as the conduct of a single actor . . . . A division within a corporate structure pursues the common interests of the whole rather than interests separate from those of the corporation itself . . . . Because coordination between a corporation and its division does not represent a sudden joining of two independent sources of economic power previously pursuing separate interests, it is not an activity that warrants *§ 1* scrutiny.

Copperweld, 467 U.S. at 770-71 (footnote omitted). Similarly, the Court concluded that the control a parent wields over its wholly-owned **[**58]** subsidiary supports their shared "unity of purpose or a common design" that prevents them from being able to conspire together. *Siegel Transfer, Inc., 54 F.3d at 1132*, quoting *Copperweld, 467 U.S. at 771-72*. The Court stated

> [a] parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but one . . . . If a parent and a wholly owned subsidiary do "agree" to a course of action, there is no sudden joining of economic resources that had previously served different interests, and there is **[*289]** no justification for *§ 1* scrutiny. . . . [A] parent and a wholly owned subsidiary always have a "unity of purpose or a common design." They share a common purpose whether or not the parent keeps a tight rein over the subsidiary; the parent may assert full control at any moment if the subsidiary fails to act in the parent's best interests.

Copperweld, 467 U.S. at 771-72, internal citations omitted. The *Copperweld* Court limited its holding to a parent and its wholly-owned subsidiary but encouraged courts to analyze the substance, not the form, of **[**59]** economic arrangements when determining whether a separately incorporated entity is cable of conspiring. *Siegel Transfer, Inc., 54 F.3d at 1132*; *Copperweld, 467 U.S. at 773 n.21*.

Courts have extended Copperweld to situations involving sibling-subsidiaries of the same parent corporation, see e.g., *Eichorn v. AT & T Corp., 248 F.3d 131, 139 (3d Cir. 2001)*, and franchisors and franchisees because the plenary control of the franchisor and the common economic goals [16] makes them a single entity, see *Williams v. I.B. Fischer Nevada, 999 F.2d 445 (9th Cir. 1993)*, referencing the application of the facts in *Williams v. Nevada, 794 F. Supp. 1026, 1032 (D. Nev. 1992)*. The Court of Appeals for the Fifth Circuit extended Copperweld to find that separate corporations commonly owned by three men, two of whom owned 30% of each corporation and one of whom owned the remaining 40% of each corporation were incapable of conspiring because each co-owner maintained equal control over each corporation and had an equal interest in their success. *Century Oil Tool, Inc. v. Production Specialties, Inc.., 737 F.2d 1316, 1317 (5th Cir. 1984)*.

---

[16] The common economic goals included the franchisor acting to minimize **[**60]** competition and promote uniformity between franchises, each franchise benefitting from an enhanced reputation for uniformity in quality results and economic unity of interest continuing beyond the payment by the franchisee of the licensing fee to the franchisor receiving a royalty fee and a marketing fee based upon a percentage of the restaurants' gross sales. *Williams, 794 F. Supp. at 1032*.

The Court of Appeals for the Third Circuit extended Copperweld to permit a de minimis deviation of 99.92% ownership from 100% ownership and recognized that courts have deviated in situations where parental ownership was in the 80% to 91.9% range. *Siegel, 54 F.3d at 1133, 1133 n.7*. The Court of Appeals also extended Copperweld to find that a corporation and its agents and two corporations with different ownership could not conspire because they had a unity of interest. *Id. at 1135*. The Court found that a corporation and its agents could not conspire when their economic interests were entirely congruent because the agents received a commission from the corporation and therefore did not compete with it. Id. Additionally, the Court found that the two corporations operated as a single economic unit unable **[**61]** to conspire because the one was contractually obligated to manage the others' affairs and received a percentage of the revenues as its fee for this management so that their economic success was directly congruent and they were not competitors. Id. None of these decisions extend Copperweld "to shelter independent actors having diverse economic interests acting jointly." *Fishman v. Estate of Wirtz, 807 F.2d 520, 541 (7th Cir. 1986)*. I will evaluate the facts of this case as to the substance of the entities to see if they are one economic unit.

Kaolin/South Mill was owned by two men each with a 50% ownership interest. Those two men had a 50% interest in the distribution centers during the relevant **[*290]** period with another man who also had a 50% interest in the distribution centers. This 50% deviation in complete ownership and control is too significant to call de minimis. Moreover, the individuals do not have equal control over each corporation. See *Century Oil Tool, 737 F.2d at 1317*. The lack of unity of interest is particularly evident with this affiliation as a lawsuit ensued between Kaolin/South Mill and a distribution center. It is hard to imagine how interests could have been congruent **[**62]** and control exercised to constitute "one consciousness" when litigation occurred between the entities.

LRP-M was also owned by two men each with a 50% ownership interest, Dominic Mandfredini and his nephew Lucio Pizzini. The affiliated distributor, Manfredini Enterprises, was owned by Dominic Manfredini's wife and Dominic Manfredini served as president and operator. As with Kaolin/South Mill, even if Dominic Manfredini's role as president and operator is sufficient to demonstrate 100% control over Manfredini Enterprises, his 50% interest in LRP-M shows a lack of equal control over both entities. See id.

While some overlap existed in ownership between the affiliated distributors and the member growers, they were not under common control in the same sense as is a corporation and its wholly-owned subsidiary, a corporation and its divisions or as are two corporations owned in identical proportions by the same set of investors. See *Copperweld, 467 U.S. at 770-72*; *Century Oil Tool, 737 F.2d at 1317*. The affiliated distributors do not have 100% ownership or a de minimis deviation from complete ownership and there is no indication that the overlapping owners would have control independent of **[**63]** their co-owners. The varying ownership between the affiliated entities shows they are not controlled by a single decision-maker. See *Healthamerica Pa., Inc., v. Susquehanna Health Sys., 278 F. Supp. 2d 423 (M.D. Pa. 2003)*, holding that the hospitals could not conspire because they were controlled by a single decision-maker, the Alliance.

HN18[] The involvement of family relationships in these varying ownerships is immaterial to determining common ownership and control. That partners in a company or between companies are related by blood or marriage--no matter how closely--does not ensure that they will uniformly agree on how to control the companies. Merely because two people are related does not mean that they have the same views and interests in their family businesses. See e.g., *Doeblers' Pennsylvania Hybrids, Inc. v. Doebler, 442 F.3d 812, 814 (3d Cir. 2006)*; *E. & J. Gallo Winery v. Gallo Cattle Co., 967 F.2d 1280, 1297 (9th Cir. 1992)*; *Zen Investments, LLC v. Unbreakable Lock Co., 2006 U.S. Dist. LEXIS 37171, 2006 WL 1582333, *4 (E.D. Pa. June 2, 2006)*; *Levy v. Levy, 1992 U.S. Dist. LEXIS 9725, 1992 WL 151779, at *1 (E.D. Pa. June 23, 1992)*; *Platt v. Richardson, 1989 U.S. Dist. LEXIS 7933, 1989 WL 159584, at *5 (M.D. Pa. June 6, 1989)*. To hold otherwise would be to create **[**64]** an untenably blurry test in which courts must investigate the degree of the entities' family connections to determine whether they qualify as a single entity unable to engage in conspiracies.

Further, since ownership is neither complete nor a de minimis deviation from 100%, there can be no unity of interest between the growers and distributors in this case. Unlike the entities in *Siegel* that had separate ownership but shared unity of interest, there is no commission or percentage of revenue fee to make the economic success of either corporation dependent upon the other. Here, the growers are selling to distributors who sell at **[*291]** EMMC prices. The undisputed facts are that LRP-M sells all of its mushrooms to Manfredini, and that Kaolin sells its mushrooms to the distributions centers. [17] In this relationship, the price fixing does not protect the economic interests of the grower and therefore the entities' interests are not congruent. Moreover, the undisputed fact that dues were based on the total sales of the affiliated distributors rather than the mushrooms grown by the member grower shows that the growers were not the focus of the EMMC; the Capper-Volstead Act sought to protect growers. **[**65]** See *Agritronics Corp. v. Nat'l Dairy Herd Ass'n, Inc., 914 F. Supp. 814, 826 (N.D. N.Y. 1996)*. To agree with defendants would be to hold that the Capper-Volstead Act is not designed to protect growers from middlemen. [18] The entities lacked the "complete unity of interest" necessary to find them a "single enterprise." *Copperweld, 467 U.S. at 771*. No case law has been provided to the contrary. Thus, for the EMMC and its members to fix prices with affiliated distributors when the distributors are not a single economic unit with their affiliated member grower constitutes a conspiracy that destroys the EMMC's Capper-Volstead exemption. For the above reasons, I conclude that defendants are not entitled to the Capper-Volstead exemption.

An appropriate Order follows.

ORDER

AND NOW, on this 26th day of March 2009, upon consideration of the motions for summary judgment on the issue of Capper-Volstead exemption filed by the EMMC (Doc. No. 245), the Mushroom Alliance, Inc. (Doc. No. 239), Kitchen Pride Mushrooms (Doc. No. 243 and 251), M.D. Basciani & Sons, Inc. (Doc. No. 244), JM Farms (Doc. No. 246), Franklin Farms, Inc. (Doc. No. 247), plaintiffs' response, and defendants' replies, it is hereby ORDERED that said motions are DENIED. Upon consideration of plaintiffs' cross motion for summary judgment on the issue of Capper-Volstead immunity (Doc. No. 250), defendants **[**67]** responses, and plaintiffs reply, it is hereby ORDERED that such motion is GRANTED. All other motions to dismiss claims against individual defendants unrelated to Capper-Volstead immunity are denied without prejudice. Plaintiffs motion to strike (Doc. No. 270) is DISMISSED as moot.

/s/ THOMAS N. O'NEILL, JR.

THOMAS N. O'NEILL, JR., J.

End of Document

[17] The argument that Kaolin contracted with the distribution centers to sell at EMMC prices does not change the facts that these entities were selling at EMMC prices and that the owners of the member grower were advocating for the benefit of the distribution centers they also partly owned instead of at a level that benefitted their grower entity.

[18] Although I do not so conclude, holding that these entities are a single entity would permit cooperatives to avoid **[**66]** the 50 % rule by counting only the mushrooms of the member growers in the calculations rather than using the affiliated distributors' mushrooms. This would create a loophole to benefit distributors contrary to the Capper-Volstead exemption's stated purpose of benefitting growers. Although in this case the defendants appear to have included affiliated distributor sales in their 50% calculation, the treatment of these entities as a single unit with the member grower for purposes of the 50% rule does not alter the analysis of whether they legally are a single unit.

Opinion

DECISION AND ORDER

On January 29, 2008, Flying J, Inc. ("Flying J") brought the instant lawsuit to enjoin the defendants, J.B. Van Hollen, Attorney General of Wisconsin, and Rod Nilsestuen, Secretary of the Wisconsin Department of Agriculture (collectively the "State"), from enforcing the motor vehicle fuel provisions of Wisconsin's Unfair Sales Act, *Wis. Stat. § 100.30*. In **[*2]** pertinent part, the Act forbids retailers from selling motor vehicle fuel below cost, which is based on the average posted terminal price plus a minimum markup of 9.18%. *See* *Wis. Stat. §§ 100.30(2)(am)(1m)(c)*; *100.30(2)(a)*; *100.30(3)*.

On February 11, 2009, upon consideration of cross-motions for summary judgment, the Court held that the Act's motor vehicle fuel provisions create an illegal restraint of trade in violation of the Sherman Act, *15 U.S.C. § 1*. The Court also held that this illegal restraint did not meet the active supervision requirement for antitrust immunity under *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. Accordingly, the Court issued an order declaring the motor vehicle fuel provisions of the Act unconstitutional. The Court also enjoined the State from further enforcement of those provisions. On March 10, the State announced that it would not appeal the Court's ruling.

Now before the Court is Wisconsin Petroleum Marketers & Convenience Store Association's ("WPMCA") post-judgment motion to intervene. WPMCA moves to intervene for three purposes. First, WPMCA filed a conditional motion to reconsider the Court's final judgment and permanent injunction. Second, WPMCA filed a conditional **[*3]** motion to stay the Court's judgment pending appeal. Third, WPMCA hopes to pursue a direct appeal of the Court's judgment.

WPMCA lacks a sufficient interest in the outcome of this case to allow intervention. WPMCA's post-judgment application is also untimely. Therefore, WPMCA's motion to intervene is denied in its entirety.

I. WPMCA

WPMCA is an organization consisting of approximately 500 independent businesses. As a group, WPMCA members employ more than 10,000 people, operate more than 2,000 stations and stores and account for more than one-half the entire volume of motor fuel sold in Wisconsin. In addition to convenience stores, truck stops and service stations, WPMCA members own and operate related businesses such as rapid oil change facilities, car washes and card lock fueling outlets.

WPMCA claims that without the threat of enforcement of the Act, predatory pricing will result in lost profits and possibly force many of its members out of business. According to WPMCA president Matthew Hauser ("Hauser"), a "significant number of WPMCA's members do not have the ability that a fully integrated retailer has to offer cost or below-cost prices for the sale of motor vehicle fuel, nor can these **[*4]** WPMCA members realistically compete with retailers who can use lower prices as a loss leader to attract sales to large retail store operations, or other ventures."

II. Intervention as of right

WPMCA moves to intervene as of right. *See* *Fed. R. Civ. P. 24(a)(2)*. In the absence of a statutory right to intervene, a proposed intervenor must claim "an interest relating to the property or transaction that is the subject of the action, and [be] so situated that disposing of the action may as a practical matter impair or impede the movant's ability to protect its interest, unless existing parties adequately represent that interest." *Rule 24(a)(2)*; *see also* *Heartwood, Inc. v. U.S. Forest Serv., Inc., 316 F.3d 694, 700 (7th Cir. 2003)*. This language boils down to three basic requirements: interest, impairment, and inadequate representation.

A. Interest

"The 'interest' required by *Rule 24(a)(2)* has never been defined with particular precision." *Sec. Ins. Co. of Hartford v. Schipporeit, Inc., 69 F.3d 1377, 1380 (7th Cir. 1995)*. The baseline requirement is that the interest must be a "direct, significant, legally protectable" one. *American Nat'l Bank v. City of Chicago, 865 F.2d 144, 146 (7th Cir. 1989)*. **[*5]** It is "something more than a mere 'betting' interest, but less than a property right." *Schipporeit, 69 F.3d at 1380-81* (internal citations omitted). For example, "an intervenor's interest in a specific fund is sufficient to entitle intervention in a case affecting the fund." _Mountain Top Condo. Ass'n v. Dave Stabbert Master Builder, Inc., 72 F.3d 361, 366, 33 V.I. 311 (3d Cir. 1995)_.

To establish their interest in this lawsuit, WPMCA submitted declarations from various members who are "concerned that without this law, we may and probably will see predatory pricing of motor vehicle fuels by new competitors that will use this method to eliminate competition." D. 52-5, Declaration of Randy Meffert, P 3. Some WPMCA members are unsure whether their businesses are "strong enough to stay in business and compete effectively during the time the order granting the injunction is considered on appeal." D. 52-7, Declaration of Linda Kaplan, P 12. Others note that predatory pricing has already started in the wake of the Court's decision. *See, e.g.,* D. 52-8, Declaration of Denise Thomas, P 4 ("I am concerned that the ability of Renew, and other similarly situated operators, to offer discounted prices will result **[*6]** in my Mobil stations incurring significant loss of sales").

An "economic interest that might be adversely affected by the outcome of the case alone is insufficient to warrant intervention under _Rule 24(a)(2)_." _NBD Bank, N.A. v. Bennett, 159 F.R.D. 505, 506 (S.D. Ind. 1994)_ (quoting _Getty Oil Co. v. Department of Energy, 865 F.2d 270, 276 (Tem. Em. Ct. App. 1988))_. By "requiring that the applicant's interest be . . . 'legally protectable,' it is plain that something more than an economic interest is necessary. What is required is that the interest be one which the *substantive* law recognizes as belonging to or being owned by the applicant." _United States v. South Fla. Water Mgt. Dist., 922 F.2d 704, 710 (11th Cir. 1991)_ (emphasis in original); *see also* _Mountain Top, 72 F.3d at 366_ ("[i]n general, a mere economic interest in the outcome of the litigation is insufficient to support a motion to intervene"). [1]

WPMCA members are concerned that other gasoline retailers will use predatory pricing to steal business from them. This economic interest in the future loss of business is contingent on the hypothetical actions of third parties. In fact, it is contingent on market forces beyond those that are influenced by the Court's injunction. If the loss of business did occur, inefficient business practices would theoretically be as much to blame as would the use of loss leaders by third parties. WPMCA members are also protected by federal ***antitrust law*** which prohibits predatory pricing. *See, e.g.,* _Bathke v. Casey's General Stores, Inc., 64 F.3d 340, 343-44 (8th Cir. 1995)_ (describing the contours of a predatory pricing claim for gasoline retailers under the Sherman Act [_15 U.S.C. § 2_] and the Robinson-Patman Act [_15 U.S.C. § 13(a)_]). WPMCA's speculative interest in the outcome of this lawsuit is not enough to establish a legally protectable interest for mandatory intervention. *See, e.g.,* _Standard Heating and Air Conditioning Co. v. City of Minneapolis, 137 F.3d 567, 571 (8th Cir. 1998)_ **[*8]** (interests asserted by proposed intervenors are "too speculative to be 'direct, substantial and legally protectable'" because a "sequence of events would have to occur for the interests of the associations to be impacted by a successful challenge to the rules"); _Washington Elec. Co-op, Inc. v. Massachusetts Mun. Wholesale Elec. Co., 922 F.2d 92, 97 (2d Cir. 1990)_ (interest based on double contingency is not sufficiently direct or substantial); _City of Stilwell v. Ozarks Rural Elec. Co-op. Corp., 79 F.3d 1038, 1042 (10th Cir. 1996)_ (contingent financial interest in subject of action was too attenuated to justify intervention).

Even to the extent that WPMCA members are currently losing sales or are likely to lose sales in the near future because competitors are allowed to charge lower prices, WPMCA's interest in this lawsuit is still insufficient to allow intervention. "A claim based only on an indirect economic effect of some action is rarely considered the same as a protectable right or interest sufficient to justify intervention." MOORE'S FED. PRACTICE 3D 24.03[2][b]; *see also* _American Maritime Transport, Inc. v. United States, 15 Cl. Ct. 29, 30 (Cl. Ct. 1988)_ (applicants "have alleged **[*9]** nothing more than an indirect and contingent economic interest in this suit based upon the possibility of increased competition"); _Curry v. Regents of Univ. of Minn., 167 F.3d 420, 422 (8th Cir. 1999)_ ("economic interest in upholding the current fee system simply does not rise to the level of a legally protectable interest necessary for mandatory intervention"). While the Court is "mindful that its decision in the underlying lawsuit may have a

[1] WPMCA cites _Baude v. Heath, 538 F.3d 608 (7th Cir. 2008)_ for the proposition that "an economic interest is by itself enough to allow a trade association to intervene." *Baude* contains no discussion of the interest required for mandatory intervention under _Rule 24(a)(2)_. Judge Easterbrook **[*7]** merely mentioned in passing that a trade association "intervened to protect its economic interest." _Id. at 612_.

significant effect on petitioners' members' livelihoods, they are not entitled to intervention as of right based on this economic interest." *NBD Bank, 159 F.R.D. at 507*. [2]

B. Timeliness

Even if WPMCA had an interest sufficient to support intervention as of right, its motion to intervene is untimely. *See Rule 24(a)*. Courts generally apply a four-factor test to determine whether an application to intervene is timely: (1) the length of time during which the would-be intervenor actually or reasonably should have known of his interest in the case before he petitioned for leave to intervene; (2) the extent of prejudice that the existing parties to the litigation may suffer as a result of the would-be intervenor's failure to apply for intervention as soon as he actually knew or reasonably should have known of his interest in the case; (3) the extent of the prejudice that the would-be intervenor may suffer if his petition for leave to intervene is denied; and (4) the existence of unusual circumstances militating either for or against a determination that the application is timely. *See Stallworth v. Monsanto Co., 558 F.2d 257, 264-66 (5th Cir. 1977)*; *see also Heartwood, 316 F.3d at 701*.

An attempt to intervene "after final judgment is ordinarily looked upon with a jaundiced eye." *McDonald v. E.J. Lavino, 430 F.2d 1065, 1072 (5th Cir. 1970)*. **[*11]** "The rationale which seems to underlie this general principle . . . is the assumption that allowing intervention after judgment will either (1) prejudice the rights of the existing parties to the litigation or (2) substantially interfere with the orderly processes of the court." *Id.* However, the Fifth Circuit later clarified that there are no "absolute measures of timeliness." *Sierra Club v. Espy, 18 F.3d 1202, 1205 (5th Cir. 1994)*. "'[W]hether the request for intervention came before or after the entry of judgment [is] of limited significance,' . . . intervention could be allowed post-judgment provided that the rights of existing parties were not prejudiced and intervention did not interfere with the orderly processes of the court." *Ross v. Marshall, 426 F.3d 745, 754 (5th Cir. 2005)* (quoting *Stallworth, 558 F.2d at 266*).

1. Awareness of interest

There can be no doubt that WPMCA was aware of the instant litigation from the very outset of the case. WPMCA does not argue to the contrary. Rather, WPMCA argues that it simply never thought that Flying J would be victorious. The Court finds this hard to believe, especially in light of Judge Callahan's ruling that preceded this lawsuit. *See* ***[*12]*** *Lotus Business Group LLC v. Flying J, Inc., 532 F. Supp. 2d 1011 (E.D. Wis. 2007)*. WPMCA feigns surprise because the Act withstood numerous constitutional challenges in the past, but the Act never withstood the challenge brought against it by Flying J in this case and in *Lotus Business Group.* Even if WPMCA's surprise were justified, "a failure of imagination is not germane to the law governing intervention." *Staley v. Harris County, Tex., 223 F.R.D. 458, 462 (S.D. Tex. 2004)*.

Of course, this discussion slightly misstates the relevant inquiry -- namely, the length of time WPMCA knew or reasonably should have known that its interests were jeopardized by the instant lawsuit. "A prospective intervenor must move promptly to intervene as soon as it knows or has reason to know that its interests *might* be adversely affected by the outcome of the litigation." *Heartwood, 316 F.3d at 701*. WPMCA takes particular issue with the nature and scope of the injunction entered by the Court. Once again, this argument rings hollow because WPMCA was actively monitoring this litigation. Therefore, WPMCA was aware that the State of Wisconsin could be enjoined from enforcing the Act when this lawsuit was filed. **[*13]** It should have intervened earlier if it was so concerned that an injunction could be entered.

---

[2] Because WPMCA does not have a an interest sufficient to allow intervention as of right, it is unnecessary to consider whether WPMCA has standing to intervene in this case. "Some disagreement remains among the circuits about how Article III standing rules intersect with the requirements for *Rule 24* intervention. . . . From a pragmatic standpoint, this court has observed that '[a]ny interest of such magnitude [as to support *Rule 24(a)* intervention of right] is sufficient to satisfy the Article III standing requirement as well.'" *Sokaogon Chippewa Community v. Babbitt, 214 F.3d 941, 946 (7th Cir. 2000)* **[*10]** (internal citations omitted).

2. Prejudice to Flying J

Prejudice to existing parties is the "most important consideration" in determining the timeliness of an application for intervention. *See* *Nissei Sangyo America, Ltd. v. United States, 31 F.3d 435, 439 (7th Cir. 1994)*. "This factor is concerned only with the prejudice caused by the applicants' delay, not that prejudice which may result if intervention is allowed." *Edwards v. City of Houston, 78 F.3d 983, 1002 (5th Cir. 1996)*; *People Who Care v. Rockford Bd. of Educ., 68 F.3d 172, 176 (7th Cir. 1995)*. In other words, the only relevant prejudice is that which "would result from the would-be intervenor's failure to request intervention as soon as he knew or reasonably should have known about his interest in the action." *Schultz v. Connery, 863 F.2d 551, 554 (7th Cir. 1988)* (quoting *Stallworth, 558 F.2d at 265*).

WPMCA argues that there would be no prejudice to Flying J because the State itself could have appealed and moved for reconsideration and to stay the judgment pending appeal. However, this argument conveniently ignores that WPMCA seeks to inject additional evidence **[*14]** and arguments that were not presented by the State in the original litigation of this matter. As discussed above, WPMCA offers numerous declarations from its members regarding the irreparable harm they will allegedly suffer if the Court's injunction is not reversed or stayed pending an appeal. *See* D. 52. WPMCA also provides extensive evidence regarding the mechanics of the minimum markup law as it relates to gasoline in support of its motion for reconsideration. *See* D. 53, 55. Finally, WPMCA argues that the State (and Flying J) failed to cite supposedly controlling Seventh Circuit law in the course of summary judgment briefing. [3]

Therefore, the prejudice to Flying J is not simply the result of the fact that it would have to defend against these motions. WPMCA's proposed intervention is prejudicial because Flying J would be forced to defend against arguments and evidence that it is seeing for the very first time *after* the Court entered its final judgment. For whatever reason, WPMCA waited until now to intervene and to bring this evidence before the Court **[*15]** and Flying J. Assuming that WPMCA's interest was sufficient to intervene as of right (which it wasn't), the foregoing evidence should have been presented much earlier in the normal course of this litigation. *See, e.g.,* *People Who Care, 68 F.3d at 176* (proposed intervenor "is correct that prejudice resulting from delay is the operative issue. However, the prejudice here *does* result from delay") (emphasis in original) (internal citations omitted).

WPMCA's untimely, post-judgment attempt to intervene and completely shift the focus of this lawsuit is prejudicial to Flying J. *See* *Sokaogon Chippewa Community v. Babbitt, 214 F.3d 941, 949 (7th Cir. 2000)* ("The purpose of the [timeliness] requirement is to prevent a tardy intervenor from derailing a lawsuit within sight of the terminal"); *see also* *Sierra Club, 18 F.3d at 1206 n.3* (intervenor must "accept the proceedings as he finds them" and "has no right to relitigate issues already decided"); *Massachusetts Mun. Wholesale Elec. Co., 922 F.2d at 97* (intervenors must take the pleadings in a case as they find them).

3. Prejudice to WPMCA; Unusual Circumstances

WPMCA argues that it will be prejudiced because of the ongoing irreparable harm caused **[*16]** by the Court's injunction. Even taking WPMCA's claims of prejudice at face value, the lateness of WPMCA's request to intervene combined with the prejudice to Flying J outweigh the potential prejudice to WPMCA. "Neither the Federal Rules of Civil Procedure nor the law of equity rewards those who slumber on their rights . . ." *Staley, 223 F.R.D. at 463*.

Moreover, as noted above, WPMCA made a strategic decision to rely upon the State's defense of the Act. When the "representative party is a governmental body charged by law with protecting the interests of the proposed intervenors, the representative is presumed to adequately represent their interests unless there is a showing of gross negligence or bad faith." *Ligas v. Maram, 478 F.3d 771, 774 (7th Cir. 2007)*. WPMCA even participated

[3] *See* *Fuchs v. Rural Electric Convenience Cooperative, 858 F.2d 1210 (7th Cir. 1988)*. The Court does not agree that *Fuchs* is controlling.

behind the scenes and made suggestions on how to attack the arguments presented by Flying J's motion papers. *See, e.g.,* D. 59, Ex. H (17-page advocacy memorandum describing what WPMCA "believe[s] to be the problems and weaknesses underlying Flying J's arguments"). Finally, WPMCA affirmatively applauded the State's efforts after the conclusion of this litigation. *See, e.g.,* D. 59, Ex. J ("We appreciate your **[*17]** efforts to defend the constitutionality of this long-standing Wisconsin law as well as the unique role you hold as Attorney General and the defender of state law"). Under these circumstances, WPMCA's interests were adequately represented by the State, and it cannot now complain about the effects of the Court's judgment.

III. Permissive intervention

Permissive intervention is allowed when the application is timely and the applicant "has a claim or defense that shares with the main action a common question of law or fact." *Rule 24(b)*. In exercising its discretion, the Court "must consider whether the intervention will unduly delay or prejudice the adjudication of the original parties' rights." *Rule 24(b)(3)*. The Court considers "any prejudice that the existing parties may incur if intervention is allowed," not the prejudice resulting from the delay in requesting intervention. *See South Dakota ex rel Barnett v. U.S. Dept. of Interior, 317 F.3d 783, 787 (8th Cir. 2003)* (the "principal consideration" in ruling on a *Rule 24(b)* motion is whether the proposed intervention would unduly delay or prejudice the adjudication of the parties' rights); *see also Stallworth, 558 F.2d at 265* (noting the **[*18]** distinction between prejudice for purposes of permissive intervention and prejudice in the timeliness inquiry).

As discussed above, WPMCA's post-judgment motion to intervene is in many respects untimely. However, post-judgment intervention is normally allowed when the existing parties indicate that they will not pursue an appeal. *See, e.g., Ross, 426 F.3d at 755* (a "common example of post-judgment intervention that satisfies [the timeliness] criteria is intervention for purposes of appealing a decision that the existing parties to a suit have decided not to pursue") (citing *United States v. McDonald, 432 U.S. 385, 395-96, 97 S. Ct. 2464, 53 L. Ed. 2d 423 (1977))*. In these circumstances, "a post-judgment motion to intervene in order to prosecute an appeal is timely (if filed within the time period for appeal) because 'the potential inadequacy of representation came into existence only at the appellate stage.'" *Smoke v. Norton, 346 U.S. App. D.C. 277, 252 F.3d 468, 471 (D.C. Cir. 2001)* (quoting *Dimond v. District of Columbia, 253 U.S. App. D.C. 111, 792 F.2d 179, 193 (D.C. Cir. 1986))*.

If this theory of timeliness applies to an application for permissive intervention, WPMCA's post-judgment motion to intervene for purposes of pursuing an appeal could be considered timely. **[*19]** However, the Court will not allow permissive intervention because it would result in an appeal that is otherwise not forthcoming. Therefore, permissive intervention would cause further delay in the adjudication of Flying J's rights. *See, e.g., Daggett v. Commission on Governmental Ethics & Election Practices, 172 F.3d 104, 113 (1st Cir. 1999)* (relevant factor militating against addition of intervenors was need to expedite resolution of case); *United States v. 36.96 Acres of Land, 754 F.2d 855, 860 (7th Cir. 1985)* (intervention properly denied to avoid prolonging an already lengthy lawsuit). Flying J is also subject to heightened prejudice because it already shouldered the burden of two lawsuits which litigated essentially the same issues pertaining to the constitutionality of the Act. *See, e.g., United States v. Texas Educ. Agency (Lubbock Independent Sch. Dist.), 138 F.R.D. 503, 518 (N.D. Tex. 1991)* (denying intervention where it would require party to incur additional legal fees).

NOW, THEREFORE, BASED ON THE FOREGOING, IT IS HEREBY ORDERED THAT WPMCA's motion to intervene [D. 52] is **DENIED.**

Dated at Milwaukee, Wisconsin, this 27th day of March, 2009.

SO ORDERED,

/s/ Rudolph T. Randa

HON. [*20] RUDOLPH T. RANDA

Opinion

MEMORANDUM OPINION AND ORDER

This case arises out of a three-count complaint [1] filed by Plaintiff, Packaging Supplies, Inc. ("PSI"), against Defendant, Harley-Davidson, Inc. ("Harley-Davidson"), for violations of state tort law and federal ***antitrust law***. Before the Court is Defendant's motion to dismiss Plaintiffs' complaint [9] for failure to state a claim, pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. For the reasons stated below, Defendant's motion to dismiss is denied.

I. Background [1]

PSI's business is plastic merchandise bags. These bags are not sold **[*2]** in stores; rather they are used by consumers for carrying away their purchases after transactions with PSI's clients. The bags are custom printed, and

[1] For purposes of Defendants' motion to dismiss, the Court assumes as true all well-pleaded allegations set forth in the complaint. See, *e.g.*, *Killingsworth v. HSBC Bank Nevada, N.A., 507 F.3d 614, 618 (7th Cir. 2007)*.

since 1964 PSI has been selling them to "retailers, manufacturers and franchise operators" throughout the United States. Compl. P 6. Beginning around 2002, numerous Harley-Davidson motorcycle dealerships (125 out of 679) were among PSI's clients. These dealerships are independently owned and licensed, and the bags that PSI made were customized for each dealer-client (a process which, PSI states, could take months). *Id.* at PP 7, 10-12.

PSI alleges that Harley-Davidson sent an "edict" to its dealers directing them not to purchase their bags from PSI and instead to purchase their bags only from Harley-Davidson's merchandising division ("the Notice"). *Id.* at P 1. Plaintiff does not allege when the Notice was distributed, but states that it became aware of the Notice in or around June 2007. *Id.* at P 13. A copy of the Notice was affixed to the complaint and therefore "is a part of the pleading for all purposes." *Fed. R. Civ. P. 10(c)*. Because of its centrality to the case, the pertinent text of the Notice - styled "Notice Regarding PSI Merchandise **[*3]** Bags and That's a Wrap Headwear" - is set out below:

> It has come to our attention recently that numerous dealers have been ordering dealer-customized merchandise bags from Packaging Supplies, Inc. (PSI), in Scottsdale, AZ. Dealers are reminded that all merchandise bags bearing Harley-Davidson's name and/or logo must be obtained through General Merchandise. PSI has received a cease and desist notice requiring them to stop providing these bags.
>
> We have also learned that many dealers are ordering dealer-customized head wraps from That's a Wrap in Madison, WI. As dealers are aware, goods of any nature bearing Harley-Davidson's trademarks, **including as they are incorporated in dealer business names and/or logos,** may be obtained only from sources approved in advance by Harley-Davidson. **This is true whether the goods are sold or given away as a promotion.** That's a wrap has also received a cease and desist letter advising them that dealers do not have the right to authorize the application of our trademarks to That's A Wrap's products.
>
> Harley-Davidson invests considerable resources in exercising quality control measures imposed on it under trademark law. If we fail to exercise these controls, **[*4]** we run the risk of losing our trademark rights. Dealers are asked to respect those rights and assist Harley-Davidson in protecting its most valuable assets for our mutual benefit.

Compl., Ex. A (emphasis in original).

PSI alleges that the letter mandates that the "dealers's (sic) merchandise bags 'must be obtained through [Harley-Davidson.]'" *Id.* at P 14. PSI further alleges that, contrary to the assertion in the Notice, PSI never received a cease and desist notice and that Harley-Davidson had not had contact with PSI for several years. After the Notice was circulated, PSI began losing substantial sums of money, experiencing a more than $ 100,000 decline in revenues from 2006 to 2007. The dealers, many of whom liked PSI bags for their low cost and high quality, "feared repercussions from [Harley-Davidson] if they continued to do business with PSI." *Id.* at PP 15-17.

PSI alleges that "as a direct and proximate result" of the "improper and inaccurate" Notice, PSI has "suffered substantial financial damage." *Id.* at 18. In addition, Harley-Davidson contacted certain dealers to ask them if they bought from PSI. Harley-Davidson informed those dealers "that PSI was not going to take any more **[*5]** orders, or will not be shipping any more current orders to [Harley-Davidson] dealers." *Id.* at P 27. Those statements were false, according to PSI, and intended to interfere with the relationship between PSI and its dealer-customers.

PSI's complaint comprises three counts. Counts I and II are, respectively, state law claims for (i) tortious interference with business relationships and for (ii) tortious interference with prospective business advantage. Count III alleges an illegal tying arrangement in violation of Section 1 of the Sherman Act (*15 U.S.C. § 1*). [2]

II. Legal standard on motion to dismiss

---

[2] Tying claims typically are brought under Section 3 of the Clayton Act (*15 U.S.C. § 14*), whose language explicitly deals with tying, but also may be brought under *Section 1* of the Sherman Act. *Will v. Comprehensive Accounting Corp., 776 F.2d 665, 669 (7th Cir. 1985)*.

A motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* tests the sufficiency of the complaint, not the merits of the case. See *Gibson v. City of Chicago, 910 F.2d 1510, 1520 (7th Cir. 1990)*. To survive a *Rule 12(b)(6)* motion to dismiss, the complaint first must comply with *Rule 8(a)* by providing "a short and plain **[*6]** statement of the claim showing that the pleader is entitled to relief" (*Fed. R. Civ. P. 8(a)(2)*), such that the defendant is given "fair notice of what the * * * claim is and the grounds upon which it rests." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 1964, 167 L. Ed. 2d 929 (2007)* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*. Second, the factual allegations in the complaint must be sufficient to raise the possibility of relief above the "speculative level," assuming that all of the allegations in the complaint are true. *E.E.O.C. v. Concentra Health Svcs., Inc., 496 F.3d 773, 776 (7th Cir. 2007)* (quoting *Twombly, 127 S.Ct. at 1965, 1973 n.14*). "[O]nce a claim has been stated adequately, it may be supported by showing any set of facts consistent with the allegations in the complaint." *Twombly, 127 S.Ct. at 1969*. The Court accepts as true all of the well-pleaded facts alleged by the plaintiff and all reasonable inferences that can be drawn therefrom. See *Barnes v. Briley, 420 F.3d 673, 677 (7th Cir. 2005)*.

III. Analysis

A. State Law Tortious Interference Claims (Counts I and II)

At least for purposes of the motion to dismiss, both PSI and Harley-Davidson assume that Illinois law will govern with **[*7]** respect to PSI's claims for tortious interference with business relationships and for tortious interference with prospective business advantage. Harley-Davidson makes two principal arguments with respect to PSI's state law claims. Harley-Davidson alleges that PSI's complaint is deficient as a matter of law because (i) the complaint fails to allege *improper and unjustified* interference as required under Illinois law and (ii) PSI "pleaded itself out of court" by establishing Harley-Davidson's privilege defenses. In executing these arguments, Harley-Davidson actually makes what merges into a single argument: that, by basing its tortious interference claims on the Notice, PSI has not alleged that any alleged "interference" was "improper" because Harley-Davidson merely was making others aware of its trademark rights.

Harley-Davidson cites several district court cases from this circuit in support of the proposition that an intellectual property rights holder has the right to defend itself against infringement and to warn purchasers that they, too, might be liable. See, *e.g., Am. Broadcasting Co. v. Maljack Productions,, Inc., 34 F. Supp. 2d 665, 675-76 (N.D. Ill. 1998)*. PSI responds that **[*8]** the privilege cited by Defendants is not without limits. See, *e,g., HPI Health Care Svcs, Inc. v. Mt. Vernon Hosp., Inc., 131 Ill. 2d 145, 545 N.E.2d 672, 677, 137 Ill. Dec. 19 (Ill. 1989)* (unjustified and malicious exception to a privilege in an interference with contract action).

The Court need not weigh the extent to which Plaintiff has pleaded itself out of Court, however, because PSI's complaint comprises more than the Notice. A fair reading of PSI's complaint includes allegations that, regardless of the Notice, state a claim for relief - one to which Harley-Davidson's privilege arguments do not apply. First, PSI does not allege that any or all of the bags it designed for Harley-Davidson dealers contained trademarked content. [3] See Compl. P 7. Second, Plaintiff alleges that, in addition to the Notice, Harley-Davidson contacted certain dealers, asked if those dealers purchased bags through PSI, and (if they answered in the affirmative) told those dealers that PSI would not be fulfilling their orders - apparently regardless of whether or not the bags contained trademarked content. Compl. P 27. In short, PSI has made allegations to which Harley-Davidson's arguments do not apply (at least given that no factual development **[*9]** has taken place). For that reason, the motion to dismiss with respect to PSI's state law claims is denied.

---

[3] Indeed, it is far from clear, for instance, that Harley-Davidson dealers sell only Harley-Davidson motorcycles, have "Harley-Davidson" in their names, or use Harley-Davidson logos. See, *e.g.,* Compl. P 11 (describing the custom-printed bags as containing the *dealership's* logo).

B. Illegal Tying Claim (Count III)

A "tying" agreement is an agreement in which "a seller conditions the sale of a product or service on the buyer's buying another product or service from or * * * by direction of the seller." *Sheridan v. Marathon Petroleum Co. LLC, 530 F.3d 590, 592 (7th Cir. 2008)* (explaining the "traditional antitrust concern" with such agreements). The Supreme Court has explained that "the essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or would have preferred to purchase elsewhere on different terms." *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* (examining the validity of an exclusive contract **[*10]** between a hospital and a firm of anesthesiologists). Such coercion restrains "competition on the merits in the tied market" and violates the Sherman Act. *Id.*

Of course, not every tie constitutes an antitrust violation. To successfully bring a tying claim, the Seventh Circuit requires a plaintiff to prove four elements: (1) the tying arrangement is between two distinct products or services; (2) the defendant has sufficient economic power in the tying market to appreciably restrain free competition in the market for the tied product; (3) a not insubstantial amount of interstate commerce is affected; and (4) the alleged tying company must have at least some economic interest in the sales of the tied seller (whose products are favored by the tie-in). *Reifert v. S. Cent. Wisc. MLS Corp., 450 F.3d. 312, 316-17 (7th Cir. 2006)*.

In support of its motion to dismiss, Harley-Davidson argues that PSI failed sufficiently to allege both (i) a tying arrangement and (ii) that Harley-Davidson will acquire market power in the *tied* market. See Def.'s Mem. at 6-10. The crux of Harley-Davidson's first argument is that PSI pleaded itself out of court by attaching the Notice to its complaint. Focusing on the **[*11]** plain language of the Notice, Harley-Davidson argues that "the Notice not only fails to support, but expressly contradicts, any notion that Harley-Davidson tied the sale of motorcycles to its dealers' purchase of merchandise bags." Def.'s Mem. at 6. PSI responds that the first paragraph of the complaint specifically alleges a tie between sales of Harley-Davidson motorcycles (the tying product) and sales of plastic merchandise bags (the tied product). PSI further asserts that dealers feared repercussions from Harley-Davidson if the dealers bought bags from PSI and that the dealers would have preferred to purchase PSI's bags. Pl.'s Mem. at 8; Compl. PP 1, 17. As part of PSI's state law claims, PSI asserts that Harley-Davidson contacted dealers and told them that PSI would not be taking any more orders from dealers for merchandise bags. Compl. P 27.

As a general matter, an antitrust plaintiff need not present direct evidence of an agreement in order successfully to bring an antitrust suit. See, e,g., *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 654-55* (price-fixing). And an express, written agreement is not a prerequisite of an illegal tie. For instance, in *Jefferson* ***[*12]*** *Parish* - the seminal Supreme Court tying case - the hospital-defendant was accused of tying surgical services to a particular firm of anesthesiologists. Although the hospital's contract with the anesthesiology firm at one time contained an exclusivity provision, the clause had been deleted by the time of the facts that gave rise to the case. *Jefferson Parish, 466 U.S. at 5* (noting that despite the absence of an exclusivity provision "the hospital nevertheless continued to regard itself as committed to a closed anesthesiology department"). What matters for purposes of the sufficiency of PSI's complaint is that PSI allege that the dealers were coerced. The accompanying analysis, the Seventh Circuit teaches, may "require[] exceeding subtlety" in a tying case. *Will v. Comprehensive Accounting Corp., 776 F.2d 665, 669 (7th Cir. 1985)*. "A tie within the meaning of ***antitrust law*** depends on showing that the buyer did not *want* to take both products from the same vendor." *Id.* (emphasis altered).

Of course, were Plaintiff's complaint predicated solely on the text of the Notice, the case would be a prime candidate for dismissal. The Court agrees that, on its face, the Notice appears to apply only **[*13]** to the use of Harley-Davidson's trademark. And courts have granted motions to dismiss in tying cases where the sole basis for the alleged tie was a deficient document. For example, in *RX Sys., Inc. v. Med. Tech. Sys., Inc.,* the plaintiff's allegations were based on a warranty provision in which a 90-day warranty would be forfeited if purchasers of a machine altered those machines to accept unauthorized parts or accessories. See *1995 U.S. Dist. LEXIS 14214, 1995 WL 577659, at * 5 (N.D. Ill. Sept. 29, 1995)*. Critically, although the document was found insufficient to establish a tie, the plaintiff in that case failed to allege a source of coercion that was extrinsic to the warranty. See

1995 U.S. Dist. LEXIS 14214, [WL] at *6 (explaining that a threat of lawsuits are not ordinarily a basis for antitrust liability unless the threat is a sham). See also Sheridan v. Marathon Petroleum Co. LLC, 2007 U.S. Dist. LEXIS 74022, 2007 WL 2900556, at *6 (S.D. Ind. Sept. 28, 2007) ("Plaintiffs do not allege implicit coercion by Defendants to force lessee-dealers to use particular credit card processing services."), aff'd, 530 F.3d 590 (7th Cir. 2008). PSI's complaint, by contrast, alleges that many of Harley-Davidson's dealers would have preferred to buy bags from PSI but "feared repercussions **[*14]** * * * if they continued to do business with PSI." Compl. P 17. And while a plaintiff at the pleading stage must allege plausible facts, it need not marshal all of its evidence. Sanjuan v. Am. Bd. of Psychiatry and Neurology, Inc., 40 F.3d 247, 251 (7th Cir. 1994) ("[T]he plaintiff receives the benefit of imagination [at the pleading stage], so long as the hypotheses are consistent with the complaint"). At least at this early stage of the litigation, Plaintiff sufficiently has alleged the existence of a tie. Whether PSI can do so at the summary judgment phase is, of course, a separate question.

Defendant's second argument - that PSI failed to allege that Harley-Davidson will acquire market power in the tied market - fails as well. The parties' dispute on this point centers on whether acquisition of market power in the market for the tied product is an element of a tying claim. Harley-Davidson, citing Carl Sandburg Village Condo. Ass'n v. First Condo. Dev. Co. (758 F.2d 203, 210 (7th Cir. 1985)), argues that market power in the tied good is an element of a tying claim. Def.'s Mem. at 9. PSI points to *Reifert v. S. Cent. Wisc. MLS Corp.,* a more recent Seventh Circuit case whose tying framework **[*15]** is discussed above, to argue that PSI need only present allegations that the tying seller has sufficient economic power in the *tying* market to appreciably restrain free competition in the market for the tied product. Pl.'s Mem. at 10; see also Reifert, 450 F.3d at 316-17. The Court concludes that PSI's allegations suffice under either formulation.

Because not all ties constitute antitrust violations, [4] both parties agree that there must be some effect on the tied product market. Yet, the Seventh Circuit has not spoken with one voice as to what that requisite effect must be. In *Carl Sandburg,* the Seventh Circuit required a showing of substantial danger that the seller will acquire market power over the tied product. 758 F.2d at 210. More recently, in *Reifert,* the Seventh Circuit stated that the requisite effect on the tied market is appreciable restraint on free competition. [5] Either formulation can be viewed as a corollary to the Supreme Court's holding in *Jefferson Parish* that "forcing," or coercion, is an essential characteristic of a tying claim. 466 U.S. at 12. Where "forcing" is present "competition on the merits in the market for the *tied* item is restrained." *Id.* (emphasis added). **[*16]** Courts will "condemn[] tying arrangements when the seller has some special ability * * * to force a purchaser to do something that that he would not do in a competitive market." Id. at 13-14.

To understand why any differences in the parties' formulations do not matter - for present purposes, at least - one need only understand what "market power" means. Market power is the "power to raise prices significantly above the competitive level without losing all of one's business." Valley Liquors, Inc. v. Renfield Importers, Ltd., 678 F.2d 742, 745 (7th Cir. 1982); see also Sheridan, 530 F.3d at 594 (market power is "significant unilateral power over the market price"); Fishman v. Estate of Wirtz, 807 F.2d 520, 568 (7th Cir. 1986) (Easterbrook, J., dissenting in part) ("Market power means the ability to injure consumers by curtailing output and raising price."). One thus can see why the focus in tying cases generally falls on the market for the tying product: [6] it is only by dint of the market

---

[4] For example, tying sales of right shoes to left shoes generally cannot be said to reduce consumer welfare or restrain trade. See, e.g., HERBERT HOVENKAMP, FEDERAL ANTITRUST POLICY: THE LAW OF COMPETITION AND ITS PRACTICE § 10.2 at 399 (West Publishing Co. 2005) (describing the role of judicial tests as devices for producing "an inference that a particular tying arrangement injures consumers as a group"); see also Jefferson Parish, 466 U.S. at 25 (observing that "there is nothing inherently anticompetitive about packaged sales").

[5] The tying formulation in *Reifert* might be viewed as retrenching from the earlier formulation in *Carl Sandburg,* which some commentators have questioned. See HOVENKAMP § 10.4a at 412 & nn.14-16 (concluding that requiring proof of market power in the tied market "seems to be a castoff of [a] generally discredited" economic theory of tying harm). But see Sheridan, 530 F.3d at 592 ("The traditional antitrust concern with [tying] is that * * * the result [of the tie] will be **[*17]** a second monopoly"); A.O. Smith Corp. v. Lewis, Overbeck & Furman, 979 F.2d 546, 549 (7th Cir. 1992) (per *Carl Sandburg,* substantial danger of acquisition of market power over the tied product must be proved in a tying case).

power over the tying product that a seller could have any chance of restraining free competition in the tied product market (*such as* by unilaterally raising the price **[*18]** for the tied good above marginal-cost pricing). If the seller does not have market power over the tying product, consumers may readily substitute away from the seller's goods, ultimately returning prices of the tying product to a competitive level. *Cf.* *Sheridan, 530 F.3d at 594*. By contrast, where a seller has market power over the tying product, other sellers "cannot take up enough of the slack" (*id.*) and return prices to competitive levels.

Yet, the allegations of the complaint combined with the definition of market power show that any distinctions between PSI's formulation and Harley-Davidson's formulation of the elements of a tying claim do not matter. The distinctions, as applied to this case, do not matter because the restraint on free competition in the market for the tied product that PSI alleges (the *Reifert* formulation of the required tied-market effect) is that buyers of plastic merchandise bags are forced to pay above-market prices (the *Carl Sandburg* formulation of the required tied-market effect). In other words, reading the allegations in **[*19]** PSI's complaint (see Compl. PP 1, 17; *cf. id.* at P 27) in the light of the definition of market power shows that PSI has alleged precisely that which Harley-Davidson argues PSI has omitted. [7] See also *Parts and Elec. Motors, Inc. v. Sterling Elec., Inc., 826 F.2d 712, 720 n.7 (7th Cir. 1987)* (the "best way" to show market power "is to establish directly that the price of the tied package is higher than the price of the components sold in competitive markets").

* * * * *

It may be that Harley-Davidson merely was protecting its intellectual **[*20]** property rights; if that is so, this case might easily be resolved at the summary judgment phase. "[I]t is well-established in this circuit that a trademark holder has the right to defend himself against infringement by sending trademark policing letters to alleged infringers." *Thermos Co. v. Igloo Products Corp., 1995 U.S. Dist. LEXIS 18382, 1995 WL 745832, at *5 (N.D. Ill. Dec. 13, 1995)* (internal quotation marks omitted) (listing cases). Yet, because it is not proper to examine the merits of the case on a motion to dismiss, the Court denies Defendant's motion [9].

III. Conclusion

For the reasons stated above, Defendant's motion to dismiss [9] is respectfully denied.

Dated: March 30, 2009

Robert M. Dow, Jr.

United States District Judge

End of Document

[6] See *Illinois Tool Works Inc. v. Independent Ink, 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)* (plaintiff must demonstrate market power over the tying product).

[7] Defendant also argues that Plaintiff has failed to allege what the "tied market" is. Def.'s Mem. at 9. It is true that "any inquiry into the validity of a tying arrangement must focus on the market or markets in which the two products are sold." *Jefferson Parish, 466 U.S. at 18*. However, Harley-Davidson has presented no authority for the proposition that Plaintiff's *complaint* must define the market. Part of the confusion on the matter, and accompanying lack of precision in Plaintiff's complaint, seemingly stems from the fact that Plaintiff does not know whether Harley-Davidson makes customized merchandise bags or only non-customized merchandise bags.

LexisNexis® Headnotes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN1[ ] **Entitlement as Matter of Law, Appropriateness**

Under *Fed. R. Civ. P. 56*, summary judgment is appropriate when the evidence shows that there is no genuine issue of material fact and that the moving party is entitled to a judgment as a matter of law.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[ ] **Entitlement as Matter of Law, Materiality of Facts**

On summary judgment, a fact is material if it might affect the outcome of the suit under the governing law.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN3[ ] **Entitlement as Matter of Law, Genuine Disputes**

On summary judgment, a factual dispute is genuine when the evidence is such that a reasonable jury could return a verdict for the non-moving party.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN4[] **Summary Judgment, Evidentiary Considerations**

The role of a court in ruling on a summary judgment motion is not to resolve disputed issues of fact but to assess whether there are any factual issues to be tried, while resolving ambiguities and drawing reasonable inferences against the moving party.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Need for Trial

HN5[] **Entitlement as Matter of Law, Need for Trial**

The moving party bears the burden of proving that no genuine issue of material fact exists, or that because of the paucity of evidence presented by the nonmovant, no rational jury could find in favor of the non-moving party.

Contracts Law > Contract Interpretation > General Overview

HN6[] **Contracts Law, Contract Interpretation**

A contract must be construed as a whole and the intention of the parties is to be collected from the entire instrument and not from detached portions.

Contracts Law > Defenses > Public Policy Violations

HN7[] **Defenses, Public Policy Violations**

When a court is asked to strike down on grounds of public policy a contractual arrangement on its face consensual cases are not decided, nor the law appropriately understood apart from an informed and particularized insight into the factual circumstances of the case. There is no absolute rule by which to determine what contracts are against public policy, but each case must be determined from all the circumstances thereof, the courts declaring a contract void for such reason only where it is clearly contrary to the public interests.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > Settlements > Releases From Liability > General Overview

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Arbitration Clauses

HN8[] **Regulated Practices, Private Actions**

Courts have refused to enforce general releases and arbitration agreements that they have found act to waive or immunize parties from liability for future antitrust violations.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > Settlements > Releases From Liability > General Releases

HN9[] Regulated Practices, Private Actions

Although there is an unquestioned public interest in the vigilant enforcement of the antitrust laws through the instrumentality of the private treble-damage action, this public interest does not prevent an injured party from releasing his claim and foregoing the burden of litigation. And, courts have enforced even general releases to bar antitrust claims predicated on continuing violations of prerelease conduct.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN10[] Regulated Practices, Private Actions

Public policy favors the settlement of disputes. Repose is especially valuable in antitrust, where tests of legality are often rather vague, where many business practices can be simultaneously efficient and beneficial to consumers but also challengeable as antitrust violations.

Civil Procedure > ... > Alternative Dispute Resolution > Arbitration > General Overview

HN11[] Alternative Dispute Resolution, Arbitration

There is a federal policy favoring arbitration.

Opinion

[*320] MEMORANDUM OPINION AND ORDER

Richard J. Holwell, District Judge:

On September 14, 2007, this Court denied in part Plaintiff-Counterclaim Defendant **[*321]** Xerox Corporation's ("Xerox") motion pursuant to *Federal Rule of Civil Procedure 12(b)(6)* to dismiss Defendant-Counterclaimant Media Sciences, Inc.'s ("Media **[**4]** Sciences" or "MS") counterclaims alleging monopolization and attempted monopolization in violation of § 2 of the Sherman Antitrust Act, *15 U.S.C. § 2 (2006)* (the "Sherman Act"), holding that Media Sciences pleaded facts sufficient to state antitrust claims on its theories challenging: (1) Xerox's redesigning and patenting of its solid ink sticks for use in its phase change color printers, and (2) its loyalty rebate program. See *Xerox Corp. v. Media Sciences, Inc., 511 F. Supp. 2d 372, 387-90 (S.D.N.Y. 2007)*.

Now before the Court is Xerox's motion for partial summary judgment on its first affirmative defense to Media Sciences's antitrust counterclaims as alleged in its Third Amended Answer, Affirmative Defenses, and Counterclaims. For the following reasons, Xerox's motion is GRANTED.

I. BACKGROUND

Years before this lawsuit was filed, these same parties and their predecessors were involved in a series of lawsuits involving similar patent and antitrust issues. (Xerox Mem. Supp. Mot. S.J. at 2.) On May 4, 2001, the parties entered into a Settlement Agreement and Release (the "Settlement Agreement") terminating the litigation in the earlier cases. (Id.; see UltraHue, Inc. v. Tektronix, Inc., **[**5]** No. 99-1664 (W.D. Wash. May 11, 2001); Cadapult Graphic Svs., Inc. v. Tektronix, Inc., No. 00-732 (D. Or. May 14, 2001); and Xerox Corp. v. Media Sciences, Inc., No. 01-0487 (W.D. Wash. July 20, 2001)). A final judgment was entered upon the Settlement Agreement in each case. (Ko Decl. Exh. A:1, 2, & 3.)

Five years later, on June 23, 2006, Xerox filed the complaint in this case, alleging that Media Sciences's manufacture, use, and sale of solid ink sticks for use in Xerox phase change color printers infringes several Xerox patents. *Xerox, 511 F. Supp. 2d at 378*. On January 16, 2007, Media Sciences filed its Second Amended Answer in which it raised for the first time counterclaims alleging antitrust violations under § 2 of the Sherman Act. (Xerox Mem. Supp. Mot. S.J. at 3.) Xerox filed a motion to dismiss Media Sciences's antitrust counterclaims on January 30, 2007, (Docket No. 29), which the Court denied in part, as noted above, on September 14, 2007, *Xerox, 511 F. Supp. 2d 372*. In its September 14 Order, the Court also granted Media Sciences's motion to file a Third Amended Answer that more fully pleaded its antitrust counterclaims, *id. at 390*, which Media Sciences filed on September **[**6]** 19, 2007 (Docket No. 44). On October 3, 2007, Xerox filed its Amended Reply and Affirmative Defense to Media Sciences's counterclaims. (Docket No. 48.) And, on June 20, 2008, Xerox filed the instant motion for partial summary judgment on its first affirmative defense to Media Sciences's antitrust counterclaims as well as a motion for summary judgment on the merits of Media Sciences's monopolization counterclaims. (Docket Nos. 99 & 101.) Only Xerox's motion for partial summary judgment on its first affirmative defense is addressed in this decision. (Docket No. 99.)

A. Media Sciences's Antitrust Allegations Based on Xerox's Rebate Program and Xerox's Affirmative Defense Thereto

In its Third Amended Answer, Affirmative Defenses, and Counterclaims, Media Sciences alleges that Xerox is maintaining an illegal monopoly by engaging in "restrictive and exclusionary conduct, without any legitimate business justification" in violation of § 2 of the Sherman **[*322]** Act, in part through its loyalty rebate program. (MS 3d Amend. Ans. at P 47.) Specifically, Media Sciences contends:

> Xerox has offered loyalty rebates to its resellers, distributors, and wholesalers who agree not to sell [Media Sciences's] replacement **[**7]** solid color ink sticks, which has the purpose and effect of reducing the supply of lower-price [sic] competing products in the relevant market. Because Xerox is the dominant supplier of replacement solid ink sticks with a large and widespread reseller network, these loyalty rebates are coercive and exclusionary. Unlike conventional volume discounts that manufacturers offer to resellers from which consumers benefit by lowering the price and increasing product supply, Xerox's loyalty rebates have the effect of excluding from much of the market the supply of [Media Sciences's] lower-priced replacement solid color ink sticks.

(Id. at P47 (c).)

In its Amended Reply and Affirmative Defense, Xerox raises a provision of the Settlement Agreement as an affirmative defense to Media Sciences's antitrust counterclaims. Xerox alleges:

> Under paragraph eighteen (18) of the Settlement Agreement and Release entered into on May 4, 2001 to conclude litigations between the parties and their predecessors in interest, Media Sciences covenanted that it would not assert or pursue a claim, or offer evidence, under any legal or factual theory that Xerox has engaged in or is engaging in any improper or illegal conduct **[**8]** by conditioning rebates, discounts, or marketing support or benefits on a reseller or distributor not selling solid ink manufactured or sold for Media Sciences, so long as Xerox has a good faith belief that Media Sciences' ink is continuing to cause failures or mechanical problems in Xerox solid printers. Because Xerox has had and continues to have such a good faith belief, Media Sciences cannot bring an antitrust claim based on conditioning rebates, discounts, or marketing support.

(Xerox Amend. Reply at P 57.)

B. The Settlement Agreement

Essentially, Xerox alleges that the provision in P 18 of the Settlement Agreement precludes Media Sciences from relying on its theory that Xerox is maintaining an unlawful monopoly through the loyalty rebate program, without first submitting to arbitration as provided in P 25 of the mutually agreed upon Settlement Agreement. Paragraph 18 of the Settlement Agreement provides:

> 18. [Media Sciences] covenants that subsequent to this Agreement it will not assert or pursue a claim, or offer evidence, under any legal or factual theory that XEROX . . . has engaged or is then engaging in any improper or illegal conduct by conditioning rebates, discounts, or marketing **[**9]** support or benefits on a reseller or distributor not selling solid ink manufactured or sold by or for [Media Sciences] so long as XEROX has a good faith belief that such ink is continuing to cause failures or material problems in XEROX solid ink printers. [Media Sciences] specifically releases any claims it may have against XEROX in any way arising out of or related to . . . XEROX's Peak marketing programs as currently written.

(Ko Decl. Exh. A at P 18.)

Reading the Settlement Agreement as a whole, see *United States v. Hamdi, 432 F.3d 115, 125 (2d Cir. 2005)* (quoting 11 WILLISTON ON CONTRACTS § 32:11), the Court must also consider P 25 of the Settlement Agreement. That paragraph defines the procedure and sets the standard by which Media Sciences may show that Xerox no longer has a good faith belief **[*323]** that Media Sciences's ink sticks "cause failures or material problems in Xerox solid ink printers." (Ko Decl. Exh. A at P 18.) Paragraph 25 provides in relevant part:

> 25. XEROX . . . agree[s] that beginning one year from the anniversary of this Agreement, and not more frequently than once every nine months after the conclusion of any arbitration under this paragraph [Media Sciences] may demand **[**10]** arbitration over whether XEROX continues to have a good faith belief that solid ink sold or manufactured by [Media Sciences] causes problems or failures in XEROX solid ink printers. Arbitration of the issue described in subparagraph 25.1 below shall be [Media Sciences's] exclusive remedy for any claim that XEROX does not have a good faith belief that solid ink sold or manufactured by [Media Sciences] causes problems or failures in XEROX solid ink printers.
>
> 25.1 The only issue to be resolved in any such arbitration is whether during the six month period prior to the date of the arbitration demand, and taking into account the proportionate volume of ink sold, such ink has caused failures or material problems if XEROX solid ink [sic] at a materially higher proportionate rate than such problems or failures were caused, if at all, by use of XEROX solid ink in the applicable models of printers at issue. The factual determination of the arbitration shall be final and binding on the parties and the party demanding arbitration shall have the burden of proof.

(Ko Decl. Exh. A at P 25, 25.1.) Whether PP 18 and 25 of the Settlement Agreement operate to preclude Media Sciences from pursuing its antitrust **[**11]** counterclaims based upon Xerox's rebate program at this time is the subject of the instant motion.

II. DISCUSSION

A. Legal Standard

HN1[] Under *Rule 56 of the Federal Rules of Civil Procedure*, summary judgment is appropriate when the evidence "show[s] that there is no genuine issue of material fact and that the moving party is entitled to a judgment as a matter of law." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. ***HN2***[] A fact is material if it "might affect the outcome of the suit under the governing law." *Id. at 248*. ***HN3***[] A factual dispute is genuine when "the evidence is such that a reasonable jury could return a verdict for the non-moving party." Id. ***HN4***[] The role of a court in ruling on such a motion "is not to resolve disputed issues of fact but to assess whether there are any factual issues to be tried, while resolving ambiguities and drawing reasonable inferences against the moving party." *Knight v. U.S. Fire Ins. Co., 804 F.2d 9, 11 (2d Cir. 1986)*. ***HN5***[] The moving party bears the burden of proving that no genuine issue of material fact exists, or that because of the paucity of evidence presented by the non-movant, no rational jury could find in favor of the non-moving party. See *Gallo v. Prudential Residential Servs., L.P., 22 F.3d 1219, 1223-24 (2d Cir. 1994)*.

B. [**12] Application of the Settlement Agreement

Xerox contends that to the extent that Media Sciences's antitrust counterclaims rely on allegations that Xerox's loyalty rebate program violates § 2 of the Sherman Act, those allegations are presently precluded because Media Sciences has not yet met the agreed upon condition to pursuing a claim or offering evidence based on Xerox's rebate program. (Xerox Mem. Supp. Mot. S.J. at 5-6; Ko Decl. Exh. A at P 25.1.) [1] Paragraph 18 of the Settlement **[*324]** Agreement provides that such a claim may not be initiated provided that Xerox has a good faith belief that Media Sciences's ink sticks are causing failures or other significant problems in Xerox printers. (See Ko Decl. Exh. A at P 18.) Paragraph 25 of the Settlement Agreement then explicitly provides for arbitration as the "exclusive remedy," (Id. at P 25), to resolve any dispute as to Xerox's continued good faith belief. Paragraph 25 and the subparagraphs thereunder also set out an objective standard by which the arbitrator is to conclusively determine whether Xerox continues to have such a good faith belief [2] as well as the consequences of the arbitrator's factual findings. (See id. at PP 25.1-25.3.) Specifically, **[**13]** if Media Sciences prevails, Xerox must: (1) promptly cease distributing communications warning purchasers that Media Sciences's ink causes failures or material problems when used in the Xerox solid ink printers at issue, and (2) "rescind or terminate any condition to benefits or qualification in any marketing incentive program . . . ." (Id. at P 25.2.)

Media Sciences contends that: (1) what it aptly characterizes as an arbitration clause, (see MS Opp. at 2), in PP 18 and 25 of the Settlement Agreement does not apply to its counterclaims because it only applies if Media Sciences challenges Xerox's good faith belief **[**15]** that Media Sciences's ink sticks continue to cause failures and material problems in Xerox printers, which Media Sciences has admittedly not done (id. at 7-8), or (2) to the extent that it applies, the Settlement Agreement is void as against public policy as a "release of prospective antitrust claims." (Id. at 2-7.)

1. Whether the language of the Settlement Agreement applies to Media Sciences's counterclaims

Media Sciences's contention that the arbitration provision of P 25 is inapplicable to the counterclaims because Media Sciences has not specifically sought to litigate the issue of whether Xerox's actions have been taken in good faith ignores the basic tenant of contract law that ***HN6***[] a "contract must be construed as a whole and the intention of the parties is to be collected from the entire instrument and not from detached portions." See *Hamdi, 432 F.3d at 125* (quoting 11 WILLISTON ON CONTRACTS § 32:11). The plain language of P 18 of the Settlement Agreement conditions the pursuit **[*325]** of a claim or the offering of evidence that challenges Xerox's loyalty rebate program under any legal or factual theory on Xerox's continued "good faith belief that . . . [Media Sciences's] ink is continuing **[**16]** to cause failures or material problems in XEROX solid ink printers." (Ko Decl. Exh. A at P 18.) Paragraph 25 then provides arbitration as Media Sciences's exclusive means to challenge Xerox's continued good faith belief as referenced in P 18 and sets out a procedure and a substantive standard by which the arbitrator must make her factual determination. (Id. at P 25.)

---

[1] Xerox also argues that Media Sciences's antitrust counterclaims are barred by the specific release provision also contained in P 18 of the Settlement Agreement, which provides: "[Media Sciences] specifically releases any claims it may have against XEROX . . . in any way arising out of or related to . . . XEROX's Peak marketing program[] as currently written." (Xerox Mem. Supp. Mot. S.J. at 7; Ko Decl. Exh. A at P 18.) However, in its Amended Reply and Affirmative Defense, Xerox alleges only that Media Sciences's cannot bring its antitrust counterclaims under P 18 of the Settlement Agreement so long as Xerox continues to have a good faith belief that Media Sciences's ink causes failures and material problems in Xerox solid ink printers. (Xerox Amend. Reply at P 57.) Because the Court decides Xerox's motion on the only ground alleged in **[**14]** its Amended Reply, the Court does not further address the specific release provision of P 18.

[2] As noted above, P 25.1 provides:

> The only issue to be resolved in any such arbitration is whether during the six months period prior to the date of the arbitration demand, and taking into account the proportionate volume of ink sold, such ink has caused failures or material problems in XEROX solid ink [printers] at a materially higher proportionate rate than such problems or failures were caused, if at all, by use of XEROX solid ink in the applicable models of printers at issue. The factual determination of the arbitration shall be final and binding on the parties and thepparty demanding the arbitration shall have the burden of proof.

(Ko Decl. Exh. A at P 25.1.) Thus, contrary to Media Sciences's suggestion, the arbitration does not concern Xerox's subjective state of mind, but rather an objective determination of product performance.

Construing these provisions together to ascertain the intention of the parties, it is clear that the parties intended the arbitration of Xerox's good faith belief that Media Sciences's ink sticks continue to cause failures or material problems in Xerox solid ink printers to act as a precondition to asserting a claim or offering evidence challenging Xerox's loyalty rebate program. Read together, PP 18 and 25 create a conditional covenant-not-to-sue in P 18 coupled with a mandatory arbitration clause in P 25 and its subparagraphs. [3] The Court readily concludes that the provisions of the Settlement Agreement apply to Media Sciences counterclaims at issue.

2. Whether enforcement of the Settlement Agreement violates public policy

Alternatively, Media Sciences argues that even if PP 18 and 25 of the Settlement Agreement apply to its antitrust counterclaims the Court should refuse to enforce the Settlement Agreement because it is void as against public policy.

To begin, at this intersection of contract law and public policy, the Court is mindful that ***HN7***[] "when [a] court[ ] [is] asked to strike down on grounds of public policy a contractual arrangement on its face consensual . . . [c]ases are not decided, nor the law appropriately understood apart from an informed and particularized insight into the **[**18]** factual circumstances of the" case. *Southwestern Sugar & Molasses Co. v. River Terminals Corp., 360 U.S. 411, 421, 79 S. Ct. 1210, 3 L. Ed. 2d 1334 (1959)* (citation omitted); see *Madison Square Garden, L.P. v. NHL, 2008 U.S. Dist. LEXIS 80475, at 21(S.D.N.Y. Oct. 10, 2008)* ("MSG v. NHL") (quoting 17A C.J.S. Contracts § 218 (2008) ("There is no absolute rule by which to determine what contracts are against public policy, but each case must be determined from all the circumstances thereof, the courts declaring a contract void for such reason only where it is clearly contrary to the public interests . . . .")). In making such a determination in this case, the Court must consider competing public policy concerns.

First, Media Sciences is correct in asserting that the Supreme Court has suggested, albeit in dicta, that it would not hesitate to condemn a tandem of a forum-selection clause and a choice-of-law provision that operated "as a *prospective* waiver of a party's right to pursue statutory remedies for antitrust violations." *Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth,* ***[*326]*** *Inc., 473 U.S. 614, 637 n.19, 105 S. Ct. 3346, 87 L. Ed. 2d 444 (1985)* (emphasis supplied). Following this suggestion, other ***HN8***[] courts have refused to enforce general releases and arbitration **[**19]** agreements that they have found act to waive or immunize parties from liability for future antitrust violations. See, e.g., *Lawlor v. Nat'l Screen Serv. Corp., 349 U.S. 322, 324-328, 75 S. Ct. 865, 99 L. Ed. 1122 (1955)* (holding that a prior settlement of an antitrust conspiracy case and the resulting judgment dismissing the suit with prejudice could not have res judicata effect in a later suit against additional parties in which the plaintiffs alleged claims based on new types of antitrust violations that were not contemplated by the earlier settlement when it would have the effect of conferring on defendants partial immunity from civil liability for distinct future antitrust violations); *In re Amer. Express. Merchs.' Litig., 554 F.3d 300, 319-20 (2d Cir. 2009)* (refusing to enforce a class action waiver in an arbitration agreement as against public policy "because to . . . [enforce it] would grant [the defendant] de facto immunity from antitrust liability by removing plaintiffs' only reasonably feasible means of recovery," while affirming the arbitrability of antitrust claims more widely); *Redel's Inc., v. Gen. Elec. Co., 498 F.2d 95, 98-99 (5th Cir. 1974)* (holding that a general release of all claims did not operate, **[**20]** by its terms, to bar prospective antitrust claims, nor could it in view of public policy); *Fox Midwest Theatres, Inc. v. Means, 221 F.2d 173, 179-80 (8th Cir. 1955)* (explaining that claims for new antitrust violations that arise subsequent to a general release of all claims needed no express protection in the release agreement because any "contractual provision which could be argued to absolve one party from liability for future violations of the anti-trust statutes against another would be to that extent void as against public policy").

---

[3] Citing *In re Currency Conversion Fee Antitrust Litig., 361 F. Supp. 2d 237, 258 (S.D.N. Y. 2005)*, Media Sciences also argues in one paragraph that "if Xerox truly believed **[**17]** that an arbitration of its good faith belief was a precondition to any suit, Xerox was required to demand such an arbitration," and request a stay in the current litigation to do so. (MS Opp. at 9.) Because the plain language of the Settlement Agreement does not permit Xerox to demand arbitration until nine months after Media Sciences prevailed in a previous arbitration initiated by Media Sciences as provided in P 25, (see Ko Decl. Exh. A at P 25, 25.3), which Media Sciences has admittedly not done, (see MS Opp. at 8), the Court rejects this argument.

But,*HN9*[] "[a]lthough there is an unquestioned public interest in the 'vigilant enforcement of the antitrust laws through the instrumentality of the private treble-damage action,' this public interest does not prevent the injured party from releasing his claim and foregoing the burden of litigation." *Three Rivers Motors Co. v. Ford Motor Co., 522 F.2d 885, 891-92 (3rd Cir. 1975)* (quoting *Lawlor, 349 U.S. at 329*). And, courts have enforced even general releases to bar antitrust claims predicated on *continuing violations of pre-release* conduct, such as "conspiracies alleged to continue post-release." *VKK Corp. v. NFL, 244 F.3d 114, 126 (2d Cir. 2001)*; see *MSG v. NHL, 2008 U.S. Dist. LEXIS 80475 at 23-25, 30-31*.

Further, **[**21]** the Court is also cognizant of the competing policies favoring settlement and the enforcement of arbitration clauses. In general, *HN10*[] public policy favors the settlement of disputes. See *MSG v. NHL, 2008 U.S. Dist. LEXIS 80475 at *24* (citing *Bano v. Union Carbide Corp., 273 F.3d 120, 129-30 (2d Cir. 2001))*; *In re Tamoxifen Citrate Antitrust Litig., 466 F.3d 187, 202 (2d Cir. 2006)*. This fact has been specifically noted by a leading antitrust treatise: "Repose is especially valuable in antitrust, where tests of legality are often rather vague, where many business practices can be simultaneously efficient and beneficial to consumers but also challengeable as antitrust violations . . . ." II Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 320a, at 282 (3d ed. 2007). Also, reading PP 18 and 25 together as a mandatory arbitration clause, see *Hamdi, 432 F.3d at 125*, the Court recognizes "a healthy regard for *HN11*[] the federal policy favoring arbitration . . . ." *Mitsubishi Motors Corp., 473 U.S. at 626* **[*327]** (internal quotation marks and citation omitted).

It is against this backdrop that the Court considers whether the Settlement Agreement is enforceable to preclude Media Sciences's antitrust challenge **[**22]** to Xerox's loyalty rebate program at this point in the litigation and concludes, for the following reasons, that its enforcement would not be "clearly contrary to the public interest." *MSG v. NHL, 2008 U.S. Dist. LEXIS 80475 at *21, 30*) (quoting 17A C.J.S. Contracts § 218).

Considering the facts and circumstances particular to this case, see *Southwestern Sugar & Molasses Co., 360 U.S. at 421*, and construing the language of the Settlement Agreement to ascertain "the intentions of the parties . . . in light of the business purposes sought to be achieved," *Newmont Mines Ltd. v. Hanover Ins. Co., 784 F. 2d 127, 135 (2d Cir. 1986)*, the Court observes that the provision in P 18 of the Settlement Agreement is not a general release or waiver of antitrust liability or even a blanket covenant-not-to-sue. Rather, in substance, the provision is a conditional covenant-not-to-sue, conditioned on Media Sciences's ability to establish through the arbitral process a fact that would likely be relevant under § 2 of the Sherman Act, whether Xerox has a legitimate business justification for continuing to condition its rebates on resellers or distributors not selling Media Sciences's solid ink sticks. See, **[**23]** e.g., *Trans Sport, Inc. v. Starter Sportswear, Inc., 964 F.2d 186, 189-90 (2d Cir. 1992)* (granting summary judgment based on a defendant's uncontroverted assertion of quality control and maintaining a company's goodwill as legitimate business concerns).

It is also clear from the express language of the Settlement Agreement that the parties agreed that, at the time of the settlement, Media Sciences's replacement solid ink sticks had "caused failures or problems in XEROX solid ink printers." (Ko Decl. Exh. A at P 14 & Exh. A:4.) As such, the parties agreed that Xerox could continue distributing notices to that effect to its customers "so long as XEROX continues to have a good faith belief that . . . [Media Sciences's] ink is continuing to cause failures or material problems in XEROX solid ink printers," (id.), as to be determined under P 25 (see id. at P 25). Because of the failures and material problems that Media Sciences's ink had caused in Xerox printers, it is clear from the language of P 18 that the parties also intended to permit Xerox to continue "conditioning rebates, discounts, or marketing support or benefits on a reseller or distributor not selling solid ink manufactured or **[**24]** sold by" Media Sciences as long as it continued to cause such acknowledged failures or material problems in Xerox printers, again as to be determined under P 25 of the Settlement Agreement. (Id. at PP 18, 25.) It is the substance of the conditional covenant-not-to-sue in P 18 read with the arbitration provisions of P 25 that distinguishes this case from those in which courts have refused to enforce releases in the antitrust context for public policy reasons.

For example, in Lawlor, the Court refused to give a previous settlement agreement res judicator effect when it would have forever extinguished the plaintiffs' future antitrust claims alleging disparate types of anti-competitive conduct that was not contemplated by the parties' settlement in the earlier antitrust litigation. *349 U.S. at 324-28*.

Similarly, in In re American Express Merchants' Litigation, the court refused to enforce a class action waiver which, if enforced, would have conferred upon the defendants "de facto immunity from antitrust liability by removing plaintiffs' only reasonably feasible means of recovery." *554 F.3d at* ***[*328]*** *319-20*. And, in Redel's Inc., the court refused to enforce a general release which would have forever **[**25]** waived any liability of the defendant for alleged post-release unlawful price discrimination claims. *498 F.2d at 98-99*.

In contrast, the conditional covenant-not-to-sue in P 18 of the Settlement Agreement does not waive or release any future liability of Xerox, not even liability arising out of its continuing to condition rebates on distributors not selling Media Sciences's ink sticks; nor does it provide Xerox with "de facto immunity" from suit, *In re Am. Express Merchs.' Litig., 554 F.3d at 320*.

The Settlement Agreement merely conditions Media Sciences's asserting such claims based on Xerox's loyalty rebate program, or offering evidence in support thereof, on Media Sciences's first availing itself of the arbitration provisions in P 25. Also, as previously stated, it is not lost on the Court that the mutually-agreed upon arbitration establishes a fact--whether Media Sciences's ink sticks continue to cause "failures or material problems" in Xerox printers--that would likely be of central importance in a future antitrust suit alleging that Xerox's loyalty rebate program constitutes anti-competitive conduct lacking any legitimate business justification. See *Trans Sport, Inc., 964 F.2d at 189-90*. **[**26]** The requirement of submitting a material fact issue to arbitration hardly raises any policy considerations in light of the recognized use of arbitration to resolve antitrust claims. *Mitsubishi Motors Corp., 473 U.S. at 637* (permitting an antitrust to proceed via arbitration in the international commercial context); *In re Am. Express Merchs.' Litig., 554 F.3d at 321* (permitting plaintiffs to pursue their class action antitrust claims in arbitration in the domestic commercial context); *Kristian v. Comcast Corp., 446 F.3d 25, 48 (1st Cir. 2006)* (enforcing a mandatory arbitration clause in the antitrust context in a domestic dispute).

Further, the competing policies favoring settlement, see *MSG v. NHL, 2008 U.S. Dist. LEXIS 80475 at *24* (citing *Bano, 273 F.3d at 129-30*); *In re Tamoxifen Citrate Antitrust Litig., 466 F.3d at 202*, especially in the antitrust context, II Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 320a, at 282, and the enforcement of arbitration agreements, *Mitsubishi Motors Corp., 473 U.S. at 626*, also support the Court's analysis. Weighing the competing policy considerations in light of the specific facts presented in this motion, the Court finds no difficulty **[**27]** in concluding that conditioning suit on the successful arbitration of a relevant fact is not the type of "prospective waiver of a party's right to pursue statutory remedies for antitrust violations," that the Supreme Court contemplated in *Mitsubishi Motors Corp., 473 U.S. at 637 n.19*. Therefore, the Court finds that the provision in P 18 of the Settlement Agreement that conditions Media Sciences's pursuit of its currently pending antitrust counterclaims on arbitration under P 25 is valid and enforceable.

III. CONCLUSION

For the foregoing reasons, Xerox's Motion for Partial Summary Judgment on its First Affirmative Defense is GRANTED. While Xerox requested in its Amended Reply and Affirmative Defense that the Court dismiss with prejudice Media Sciences's antitrust counterclaims to the extent that they challenge Xerox's loyalty rebate program, considering the plain language of PP 18 and 25 of the Settlement Agreement and the policy favoring the availability of a judicial forum for antitrust claims, the motion is GRANTED without prejudice.

SO ORDERED.

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN1[] Scope, Monopolization Offenses

Section 2 of the Sherman Act makes it unlawful to monopolize or attempt or conspire to monopolize any part of the trade or commerce among the several states, or with foreign nations. 15 U.S.C.S. § 2.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN2[] Actual Monopolization, Claims

In order to establish monopolization, a plaintiff must prove that the defendant (1) possesses monopoly power in the relevant market, and (2) has wilfully acquired or maintained that power. Monopoly power is the power to control prices or exclude competition. A plaintiff claiming monopolization therefore is obligated to establish the relevant market because the power to control prices or exclude competition only makes sense with reference to a particular market. This requirement applies also to attempts to monopolize, as that offence requires proof of a dangerous probability of achieving monopoly power, which cannot be evaluated without consideration of the relevant market. And while rigorous proof of a relevant market and of a dangerous probability of achieving monopoly power are not, in the United States Court of Appeals for the Second Circuit, essential elements of conspiracy to monopolize, the relevant market and the likelihood of its monopolization may have a significant bearing on whether the requisite specific intent to monopolize is present.

Antitrust & Trade Law > Sherman Act > Claims

HN3[] **Sherman Act, Claims**

The costs of modern federal antitrust litigation and the increasing caseload of federal courts counsel against sending the parties into discovery when there is no reasonable likelihood that the plaintiffs can construct a claim from the events related in the complaint.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN4[] **Entitlement as Matter of Law, Appropriateness**

In the context of antitrust cases, summary judgment is particularly favored because of the concern that protracted litigation will chill pro-competitive market forces.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN5[] **Burdens of Proof, Movant Persuasion & Proof**

On a motion for summary judgment, the movant does not have the burden of proving the negative of matters as to which the non-moving party would have the burden of proof at trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN6[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate if there is no genuine issue of material fact and the moving party is entitled to judgment as a matter of law.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN7[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment must be entered against a nonmoving party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial. Indeed, the moving party's burden is only to inform the district court of the basis for its motion and regardless of whether the moving party accompanies its summary judgment motion with affidavits, the motion may, and should, be granted so long as whatever is before the district court demonstrates that the standard for the entry of summary judgment is satisfied.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN8[] **Burdens of Proof, Movant Persuasion & Proof**

On a motion for summary judgment, the non-movant has the burden of coming forward with admissible evidence sufficient to raise a genuine issue of fact on a matter as to which non-movant would have the burden of proof at trial, regardless of the existence or adequacy of evidence submitted by the movant.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Discovery & Disclosure > General Overview

HN9[] **Sherman Act, Claims**

Antitrust cases may be dismissed under *Fed. R. Civ. P. 12(b)(6)* on the face of the complaint, without any opportunity for discovery. A Sherman Act *§ 1* complaint will be dismissed absent allegations plausibly suggesting (not merely consistent with) the requisite agreement in restraint of trade. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN10[] **Sherman Act, Claims**

An antitrust complaint may be dismissed pursuant to *Fed. R. Civ. P. 12(b)(6)* for failure to allege a relevant product market, where the plaintiff fails to define its proposed relevant market with a reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor.

Civil Procedure > ... > Summary Judgment > Supporting Materials > Discovery Materials

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN11[] **Supporting Materials, Discovery Materials**

While it is true that summary judgment is not often granted prior to discovery, there is nothing in the Federal Rules of Civil Procedure precluding summary judgment -- in an appropriate case -- prior to discovery. To the contrary, *Fed. R. Civ. P. 56* makes clear that a defendant may move at any time, with or without supporting affidavits, for summary judgment on all or part of the claim.

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

HN12[] **Summary Judgment, Motions for Summary Judgment**

There are circumstances in which a non-moving party that has not completed discovery has a legitimate need for discovery to meet a motion for summary judgment. But *Fed. R. Civ. P. 56(f)* is the mechanism for addressing that need. If the non-moving party makes a sufficient showing by affidavit, a motion for summary judgment will be denied or delayed to permit discovery that is reasonably expected to create a genuine issue of material fact.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN13[] **Sherman Act, Claims**

An antitrust case in which proof of a relevant market is an element of the plaintiff's claim will be dismissed unless the complaint alleges facts that properly define the proposed relevant market by reference to the rule of reasonable interchangeability and cross-elasticity of demand. By parity of reasoning, the same is true of a complaint that alleges market or monopoly power in conclusory terms unless the complaint alleges facts that properly give rise to an inference that such power exists. Even if such a complaint is not attacked on its face, a plaintiff whose proposed relevant market or allegation of market power is challenged by a motion for summary judgment must come forward with admissible evidence sufficient to raise a genuine issue of fact for trial as to the market definition or the existence of market power, as the case may be, or a sufficient *Fed. R. Civ. P. 56(f)* affidavit demonstrating, among other things, the need for specific discovery to raise such an issue.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Memoranda in Opposition

HN14[] **Opposing Materials, Memoranda in Opposition**

See S.D.N.Y. & E.D.N.Y. Civ. R. 56.1.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Memoranda in Opposition

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

HN15[] **Opposing Materials, Memoranda in Opposition**

A proper S.D.N.Y. & E.D.N.Y. Civ. R. 56.1 statement submitted by a non-movant should consist of a paragraph-by-paragraph response to the movant's S.D.N.Y. & E.D.N.Y. Civ. R. 56.1 statement, much like an answer to a complaint. It must cite admissible evidence in support of the non-movant's contention that there is admissible evidence creating a genuine issue for trial or, where the non-movant contends that further discovery is required to enable it to raise a genuine issue with admissible evidence, must be accompanied by a *Fed. R. Civ. P. 56(f)* affidavit that demonstrates such a need with respect to each relevant averment in the movant's S.D.N.Y. & E.D.N.Y. Civ. R. 56.1 statement.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Memoranda in Opposition

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

HN16[] **Opposing Materials, Memoranda in Opposition**

For purposes of S.D.N.Y. & E.D.N.Y. Civ. R. 56.1, a party's failure to admit or deny a particular averment -- to the extent its *Fed. R. Civ. P. 56(f)* affidavit sufficiently shows a justified failure to come forward with admissible evidence on the point in question -- cannot result in its being deemed to have admitted the averment. In those instances, however, in which the *Fed. R. Civ. P. 56(f)* affidavit makes no such showing, the failure to admit or deny is not justified by a general claim that the party has not had discovery. To that extent, it is deemed to have admitted the averments in question.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

HN17[] **Opposing Materials, Motions for Additional Discovery**

A *Fed. R. Civ. P. 56(f)* affidavit must show (1) what facts are sought to resist the motion and how they are to be obtained, (2) how those facts are reasonably expected to create a genuine issue of material fact, (3) what effort affiant has made to obtain them, and (4) why the affiant was unsuccessful in those efforts.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Memoranda in Opposition

HN18[] **Opposing Materials, Memoranda in Opposition**

Just as a moving party will not be heard to advance a new argument for the first time in its reply brief on a motion for summary judgment, a non-moving party should not be heard to advance a new argument in opposition to a motion after the close of briefing and oral argument.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN19[] **Price Fixing & Restraints of Trade, Vertical Restraints**

To establish an unlawful vertical agreement, a plaintiff must show (1) a combination or some form of concerted action between at least two legally distinct economic entities; and (2) that such combination or conduct constituted an unreasonable restraint of trade either per se or under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN20[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Non-price vertical restraints are subject to rule of reason analysis.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN21[] **Actual Monopolization, Claims**

Proof of the relevant product market is a necessary element of a cause of action for monopolization or attempted monopolization. Similarly, sufficient proof of a relevant market and of a risk of its monopolization is pertinent to permit an inference of the specific intent to monopolize that is essential to a conspiracy to monopolize claim.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN22[] **Market Definition, Relevant Market**

The definition of a relevant market in a Sherman Act *§ 2*, *15 U.S.C.S. § 2*, case serves to identify the area of effective competition in order determine whether a defendant has or threatens to obtain monopoly power. A product market is composed of products that have reasonable interchangeability. Its outer boundaries are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN23[] **Market Definition, Relevant Market**

The Federal Trade Commission Horizontal Merger Guidelines recognize buyer substitution as the underlying principle for defining relevant markets. Accordingly, the Guidelines delineate a relevant market as a product or group of products such that a hypothetical profit-maximizing firm that was the only present and future seller of those products (monopolist) likely would impose at least a 'small but significant and nontransitory increase in price. That is, assuming that buyers likely would respond to an increase in price for a tentatively identified product group only by shifting to other products, what would happen? If the alternatives were, in the aggregate, sufficiently attractive at their existing terms of sale, an attempt to raise prices would result in a reduction of sales large enough that the price increase would not prove profitable, and the tentatively identified product group would prove to be too narrow.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN24[] **Market Definition, Relevant Market**

A market is properly defined under the Federal Trade Commission Horizontal Merger Guidelines when a hypothetical profit-maximizing firm selling all of the product in that market could charge significantly more than a competitive price, i.e., without losing so many sales to other products that its price became unprofitable.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN25[] **Market Definition, Relevant Market**

In determining a relevant market, direct evidence of cross-elasticity of demand is rare. In consequence, courts often look to a number of criteria designed to focus, directly or indirectly, on cross-elasticity.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN26[] **Market Definition, Relevant Market**

Any definition of a cluster market must be responsive to the purpose of the market definition process - identification of an area of competition in which variations in price will affect the demand for alternative products. The cluster market approach is inappropriate for market definition because clusters include products and services that are not demand substitutes (or supply substitutes). It can be defended as a matter of analytical convenience: there is no need to define separate markets for a large number of individual hospital services, for example, when market shares and entry conditions are similar for each, or when data limitations will effectively require that the same proxy (such as the number of hospital beds) be employed to estimate the market share for each individual service. Or it could be understood as a way of looking to what the allegedly harmed buyers purchase as a basis for specifying the products and locations in the narrowly defined candidate market with which the market definition algorithm begins. But cluster markets may mislead as to competitive effects when competition from sellers of a partial line of products or services constrains the pricing of the full-line sellers offering the cluster.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN27[] **Market Definition, Relevant Market**

Buyer substitution is a fundamental consideration in evaluating a proposed cluster market. If the nature of competition is such that a full line seller would not be constrained in raising prices by competition from partial line or single product sellers, then a cluster market could be appropriate. If, however, buyers could and would respond to a price increase by a full line seller by shifting all or part of their business to partial line or single product sellers, or by making or providing the product or service themselves, then a cluster market would not be appropriate.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN28[] **Market Definition, Relevant Market**

The existence of one-stop shopping, and a group of customers with a preference or even demand for it, is insufficient to define a relevant market.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN29[] **Market Definition, Relevant Market**

Within the broad market determined by interchangeability of use and cross-elasticity of demand well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes. The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN30[] **Market Definition, Relevant Market**

The Brown Shoe factors are pertinent to the definition of relevant markets in antitrust cases, regardless of whether they are termed markets or submarkets.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN31[] **Market Definition, Relevant Market**

Evidence of 'industry or public recognition of a proposed market or submarket as a separate economic unit is important in determining its relevance for antitrust purposes because we assume that economic actors usually have accurate perceptions of economic realities.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN32[] **Market Definition, Relevant Market**

Under the Brown Shoe factors, the special characteristics and uses of a product or service can serve as another indicium of the existence of a relevant market.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN33[] **Market Definition, Relevant Market**

Courts consistently find sensitivity to price changes to be a critical factor in evaluating an alleged market.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN34[] **Market Definition, Relevant Market**

In a case that requires proof of a relevant market, it is not enough to survive even a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss to make bald assertions as to its existence or definition. Such a complaint must define its proposed relevant market with a reference to the rule of reasonable interchangeability and cross-elasticity of demand, or allege a proposed relevant market that encompasses all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor. Where a defendant puts the existence of a plaintiff's alleged market at issue on a motion for summary judgment, the plaintiff must come forward with admissible evidence that, construed in the plaintiff's favor, raises a genuine issue of material fact on the market definition issue or suffer an adverse judgment.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN35[] **Market Definition, Relevant Market**

The Brown Shoe indicia are not to be used in a talismanic fashion whereby their presence or absence are regarded as mechanically dispositive of the issue of market definition. Rather, the object is to use them in a pragmatic fashion with a keen eye on economic reality.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN36[] Actual Monopolization, Monopoly Power

Monopoly power, also referred to as market power, is the power to control prices or exclude competition. It may be proven directly by evidence of control of prices or the exclusion of competition or, as is more common, may be inferred from one firm's large percentage share of the relevant market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN37[] Actual Monopolization, Monopoly Power

Market power can persist only when entry barriers -- market circumstances, governments, or the defendants -- block rivals' entry or expansion. And the lack of significant entry barriers can defeat a monopolization claim, even in the fact of a defendant's high market share.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN38[] Conspiracy to Monopolize, Elements

A claim of conspiracy to monopolize requires proof of (1) concerted action, (2) overt acts in furtherance of the conspiracy, and (3) specific intent to monopolize. And while rigorous proof of a relevant market and the likelihood of monopolization is not required in the United States Court of Appeals for the Second Circuit on a conspiracy to monopolize claim, the relevant market and the likelihood of its monopolization may have a significant bearing on whether the requisite specific intent to monopolize is present.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

HN39[] Opposing Materials, Motions for Additional Discovery

Fed. R. Civ. P. 56(f) is the safety valve that, when satisfied, prevents the entry of summary judgment against a party where there is good reason to believe that evidence sufficient to defeat the motion for summary judgment exists, but the non-moving party legitimately needs discovery to get that evidence. But *Fed. R. Civ. P. 56(f)* requires far more than simply a claim that the non-moving party has not had or wants more discovery.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

HN40[] Opposing Materials, Motions for Additional Discovery

See *Fed. R. Civ. P. 56(f)*.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

HN41[] Opposing Materials, Motions for Additional Discovery

One seeking *Fed. R. Civ. P. 56(f)* discovery must demonstrate a reasonable expectation that the discovery sought would raise a genuine issue of material fact.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Motions for Additional Discovery

HN42[] **Opposing Materials, Motions for Additional Discovery**

Among the requirements of *Fed. R. Civ. P. 56(f)* is a showing by affidavit not only that the information one seeks would be pertinent, but also of what effort affiant has made to obtain it, and why the affiant was unsuccessful in those efforts.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN43[] **Burdens of Proof, Nonmovant Persuasion & Proof**

A motion for summary judgment places the burden of coming forward on the non-moving party on those issues as to which it would have the burden of proof at trial.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

HN44[] **Supplemental Jurisdiction, Pendent Claims**

Where a district court has dismissed before trial all claims over which it has original jurisdiction, the district court ordinarily should decline to exercise its supplemental jurisdiction and therefore dismiss pendent state claims without prejudice.

Opinion by: Lewis A. Kaplan

Opinion

[*336] Table of Contents

LEWIS A. KAPLAN, **[**2]** *District Judge*.

[*337] This is a dispute over the hiring by one competitor of an employee of another that has been dressed in the raiment of an antitrust case. The antitrust claims are the only basis of federal subject matter jurisdiction. The matter is before the Court on the defendants' motion for summary judgment dismissing the antitrust claims on the merits, thus sending the state law tort claims to state court.

Plaintiff has offered very little evidence in support of its allegations. It resists dismissal chiefly by contending that it is entitled to discover defendants' sensitive business information, purportedly to test the reliability of defendants' declarations.

Plaintiff's opposition to the motion rests on at least two fundamental misconceptions. First, it mistakenly asserts that it is defendants' burden to prove conclusively the negative of the allegations of the complaint. Second, it supposes, again wrongly. that summary judgment is categorically improper prior to discovery rather than something that is permissible in the perhaps rare appropriate case. After stripping away these mistaken views and carefully considering both the evidence of record and plaintiff's proposed **[**3]** discovery, the Court has concluded that there is no genuine issue of material fact, that plaintiff has not satisfied the requirements of *Fed. R. Civ. P. 56(f)* and therefore is not entitled to discovery, and that defendants are entitled to judgment as a matter of law. In other words, this is one of those unusual cases in which summary judgment prior to discovery is warranted.

Facts

The Parties

Plaintiff Emigra Group LLC ("Emigra") is a provider of business-related immigration services. It claims to offer a wide range of consultation in immigration matters, document procurement, consular processing, and related services to assist corporations in their movement of employees across national borders. Its business plan is to be a single source provider of immigration services for large corporations around the world.

The defendants are Fragomen, Del Rey, Bernsen & Loewy, LLP ("Fragomen LLP"), Fragomen, Del Rey, Bernsen & Loewy, LLP ("Fragomen II"), Fragomen Global LLP ("Fragomen Global"), Fragomen Global Immigration Services, LLC ("FGIS") (collectively, the "Fragomen Organization"), and Ryan Freel.

Fragomen LLP is a law firm headquartered in New York that specializes in providing legal advice **[**4]** and services concerning U.S. immigration laws to domestic and foreign clients, typically companies seeking to relocate foreign employees to the United States. [1] Fragomen Global is an intermediate holding company owned by the Class A equity partners of Fragomen LLP. It owns 93 percent of FGIS, which is a vehicle for providing information, guidance, and assistance to clients concerning the immigration requirements and procedures of various foreign countries. Thus, the Fragomen Organization offers immigration services with respect to persons seeking to enter the United States from abroad (inbound work) and to persons seeking to enter foreign countries (outbound work), the former principally through Fragomen LLP and the latter principally through FGIS. Defendants say that inbound work accounts for 80 to 85 percent of the revenues of the Fragomen Organization as a whole.

Immigration Services

Within the United States, immigration services generally are considered the practice of law and may be provided only by **[*338]** licensed attorneys or people working under their supervision. Outside the United States, some categories of **[**5]** immigration services are provided by non-lawyers, presumably in competition with lawyers.

There is no internationally uniform set of immigration laws and procedures. Even where regional or supra-national immigration arrangements exist, local implementation varies among member states. However, U.S. firms wishing to meet the outbound immigration needs of corporate clients need not maintain an office in every country where its clients might need to send employees. They can form alliances or working relationships with local firms in relevant foreign countries, enabling them to provide outbound services abroad without maintaining a physical presence in every potential foreign jurisdiction.

The Background of the Dispute

Defendant Ryan Freel is a lawyer who first worked for Fragomen LLP from August 1999, following his graduation from law school, until January 2005. On August 16, 2005, however, he began work at Emigra as its vice president of operations.

---

[1] It is also the successor by merger of Fragomen II, which no longer exists.

During his tenure at Emigra, Freel allegedly was a member of Emigra's highest management team. He reported to the chief executive officer and allegedly had access to all aspects of its business, trade secrets, and confidential information including, **[**6]** among other things, its strategies, customer lists, pricing, profit and loss data, and the like.

Freel resigned from Emigra on or about September 19, 2007, and returned to Fragomen on October 1, 2007. Emigra claims -- on "information and belief" -- that Freel disclosed Emigra confidential information to Fragomen and, after beginning work at Fragomen, began contacting certain Emigra customers on Fragomen's behalf.

This Lawsuit

Companies who feel that their trade secrets and confidential information are being betrayed by former employees hired by competitors typically file suit and promptly seek preliminary injunctions. Such controversies often are quickly resolved, at least on a preliminary injunction basis and often by accelerated plenary trial. [2] Emigra, however, did not follow that path.

It filed this action on November 29, 2007, about two months after Freel began work at Fragomen, and asserted the usual state law claims for misappropriation of trade secrets, unfair competition, and the like. But it did not seek a preliminary injunction. Rather, its complaint asserts also five antitrust claims relating principally to what Emigra claims are relevant markets **[**7]** for immigration services. As will appear, there is reason to believe that Emigra adopted this strategy at least in part to gain access through pretrial discovery to precisely the sort of competitively sensitive information about Fragomen's business that Emigra claims Freel improperly disclosed to Fragomen about Emigra's business. Defendants' motion therefore poses, among other questions to be sure, the issue whether Emigra should be permitted to gain that access by asserting antitrust claims rather than being remitted to state court to pursue its trade secret and unfair competition claims, matters as to which this Court lacks subject matter jurisdiction if there is no substantial federal question.

The Antitrust Claims

The amended complaint contains five antitrust claims:

> . Count I alleges that the Fragomen Organization monopolized an alleged market for immigration services provided **[*339]** to corporations who are employers of U.S. citizens and/or foreign nationals (the so-called "Service Market") and an alleged submarket for business-related immigration services provided by single-source providers to large multinational corporations who are major employers of U.S. citizens and foreign nationals **[**8]** (the so-called "Service Submarket") [3] in violation of *Section 2* of the Sherman Act. [4]
>
> . Count II alleges that two or more of the defendants have conspired to monopolize the Service Market and the Service Submarket, [5] also in violation of *Section 2*.
>
> . Count III asserts that the Fragomen Organization has attempted to monopolize the Service Market and the Service Submarket, [6] also in violation of *Section 2*.

---

[2] *Cf. FED. R. CIV. P. 65(a)(2)*.

[3] Am Cpt PP 10-11, 97-112.

[4] *15 U.S.C. § 2*.

[5] Am Cpt PP 10-11, 114-23.

[6] *Id*. PP10-11, 125-36.

. Count IV contends that "[t]wo or more of the Defendants, not having complete common ownership (upon information and belief)," conspired to restrain trade and commerce in the Service Market and Service Submarket [7] in violation of *Section 1* of the Sherman Act. [8]

. Finally, Count V asserts that the Fragomen Organization violated *Section 1* of the Sherman Act by entering into a vertical arrangement with Emigra's former vendor in Japan. [9]

The Motion for Summary Judgment

At the initial Rule 16 conference, defendants asserted that Emigra's antitrust claims -- the only basis of federal subject matter jurisdiction -- are not viable and indicated a desire to **[**9]** move for summary judgment dismissing those claims. The Court concluded that there was substantial doubt as to whether the case could survive such a motion and that full blown antitrust discovery perhaps would serve only to increase the cost of litigation without any benefit. Accordingly, it stayed discovery pending the filing and disposition of defendants' motion. [10]

1. The Theory of the Motion

(a) The Section 2 Claims

HN1[] *Section 2* of the Sherman Act makes it unlawful to monopolize or attempt or conspire to monopolize "any part of the trade or commerce among the several States, or with foreign nations . . ." [11]

HN2[] In order to establish monopolization, a plaintiff must prove that the defendant (1) possesses monopoly power in the relevant market, and (2) has wilfully acquired or maintained that power. [12] Monopoly power is the power to control prices or exclude competition. [13] "[A] plaintiff claiming monopolization [therefore] is obligated to establish the relevant market because the power to control prices or exclude competition only makes sense with reference **[**10]** to a particular market." [14] This **[*340]** requirement applies also to attempts to monopolize, as that offence requires proof of a "dangerous probability of achieving monopoly power," [15] which cannot be evaluated without consideration of the relevant market. [16] And while rigorous proof of a relevant market and of a dangerous probability of achieving monopoly power are not, in this Circuit, essential elements of conspiracy to monopolize, the

[7] *Id*. PP 10-11, 138-48.

[8] *15 U.S.C. § 1*.

[9] Am Cpt PP 150-60.

[10] Plaintiff never sought to proceed with respect to its state law unfair competition, trade secrets, and other claims.

[11] *15 U.S.C. § 2*.

[12] *Verizon Communs. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*.

[13] *United States v. E. I. Du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*.

[14] *Heerwagen v. Clear Channel Communs., 435 F.3d 219, 229 (2d Cir. 2006)*.

[15] *Spectrum Sports v. McQuillan, 506 U.S. 447, 459, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*.

[16] *Tops Markets., Inc. v. Quality Markets., Inc., 142 F.3d 90, 100 (2d Cir. 1998)* ("Critical to deciding the dangerous probability prong of plaintiff's attempted monopolization claim is defendant's economic power in the relevant market.") (citing *Spectrum Sports, 506 U.S. at 458-59*).

relevant market and the likelihood of its monopolization may have a significant bearing on whether the requisite specific intent to monopolize is present. [17]

Defendants seek summary judgment dismissing the *Section 2* claims. They tacitly accept for purposes of the motion the existence of a market for immigration services provided to corporations, but dispute that Emigra's alleged Service Submarket is a relevant market for antitrust purposes. They maintain also that the Fragomen Organization **[**12]** manifestly lacks anything approaching monopoly power, or a dangerous probability of acquiring it, in either the alleged Service Market or Service Submarket.

(b) The Section 1 Claims

Count IV of the complaint purports to allege a classic conspiracy in restraint of trade among "[t]wo or more of the Defendants, not having complete common ownership." Defendants seek summary judgment of dismissal on the ground that the Fragomen Organization is incapable as a matter of law of conspiring with itself in light of the intra-enterprise conspiracy doctrine.

Finally, defendants seek dismissal of Count V, which purports to allege an unlawful vertical agreement with one local service provider in Japan not to do business with Emigra, on the ground that Emigra cannot establish the requisite adverse effect on competition.

2. The Evidence

Defendants' motion is supported by two declarations, one by Fragomen partner Lance Kaplan and the other by Darryl Buffenstein, a partner in a large law firm with broad experience in the practice of immigration law and a past president of the American Immigration Lawyers Association.

Mr. Kaplan's declaration sets out the structure of the Fragomen Organization, which is pertinent **[**13]** to the intra-enterprise conspiracy claim in Count IV, and describes its immigration practice. It contains **[*341]** also a description, in broad terms, of competition and pricing in the provision of global immigration services.

Mr. Buffenstein's declaration describes the business of providing business-related immigration services, including the roles of Fragomen and Emigra. His declaration also denies the existence of the Service Submarket alleged by Emigra.

Defendants' motion is accompanied by a detailed Rule 56.1 Statement setting forth the material facts that defendants maintain are undisputed and citing the evidence that they maintain support those facts, all as required by the local rules. [18]

3. Emigra's Response

Emigra's response to the motion includes declarations of Emigra's president, A. Pendleton DePuis, and a retained expert, economist Fredrick A. Flyer, Ph.D. It is accompanied by a purportedly responsive Rule 56.1 Statement. The

---

[17] *E.g., Hudson Valley Asbestos Corp. v. Tougher Heating & Plumbing Co., 510 F.2d 1140, 1144 (2d Cir. 1975)*.

There **[**11]** is a circuit split on the necessity of rigorous proof of a relevant market on a conspiracy to monopolize claim. Some circuits hold that it is required. *Compare Doctor's Hosp. of Jefferson, Inc. v. S. E. Medical Alliance, 123 F.3d 301, 311 (5th Cir. 1997)* ("To establish *Section 2* violations premised on attempt and conspiracy to monopolize, a plaintiff must define the relevant market."); *Bill Beasley Farms, Inc. v. Hubbard Farms, 695 F.2d 1341, 1343 (11th Cir. 1983)* ("In this circuit it is clear that relevant market is a necessary element of a conspiracy to monopolize."), *with Salco Corp. v. General Motors Corp., Buick Motor Div., 517 F.2d 567, 576 (10th Cir. 1975)* ("Specific intent to monopolize is the heart of a conspiracy charge, and a plaintiff is not required to prove what is the relevant market."). The Second Circuit's position falls between these positions.

[18] *S.D.N.Y. CIV. R. 56.1*.

response as whole is notable for the extent to which it fails to engage defendants as to the facts that are material to the motion, largely resting instead on the propositions that (1) Emigra should not be required to respond to the motion **[**14]** without extensive discovery, and (2) defendants have not conclusively proved their contentions.

(a) The DuPuis Declaration

Mr. DuPuis's declaration begins with the statement that his primary areas of disagreement with defendants' declarations include (a) the nature of relevant services offered by the two firms, (b) customer requirements for single-source services and competitors of the two firms for their provision -- i.e., whether there is a relevant Service Submarket, and (c) barriers to entry thereto. [19] He states that his disagreement is based on an alleged lack of factual basis for defendants' declarations which, he says, "is made more difficult to expose because of Emigra's inability to complete, or even commence, discovery." [20] This is followed by a list, based on the Flyer declaration, of "[e]videntiary matters requiring Fragomen disclosure" including:

> "a. Information regarding Fragomen competition for work, including content of request for proposals from potential customers, identities of competing bidders and their characteristics as service providers, specific services required by potential customers, specific services offered to customers in proposals from competing vendors, **[**15]** identity of winning bidders, prices in winning bids, margins earned on winning bids, Fragomen internal documents regarding competitors and market share and pricing policies, and related information (Flyer Decl. P 11-17);
> "b. Information regarding Fragomen customers, including customer lists, annual revenue per customer, customer size, number of customer employees serviced annually, and related information (Flyer Decl. P 18);
> "c. Information regarding Fragomen sales, including aggregate sales revenue, aggregative volume of transactions, sales by location, market share, and comparable data regarding competitor sales (Flyer Decl. P 19);
>
> "d. Information regarding Fragomen vendor relationships and dealings, including whether any such relationships are exclusive and whether vendor alternatives are available to **[*342]** Emigra if Fragomen requires exclusivity (Flyer Decl. P 22)." [21]

According to Mr. DuPuis, Emigra sought "many" of these facts from public record sources and says that "[c]ertain" of them formed the basis for its complaint, [22] although he does not tell us what those are. He claims that these efforts were largely unsuccessful, in part because some are **[**16]** "within Fragomen's sole knowledge," including information regarding Fragomen's (a) ownership, structure and staffing, (b) contractual relationships, (c) revenues and market share, and (d) bidding activity and resultant contracts. [23]

Having thus begun with an attempt to make a case for discovery of commercially sensitive material from Fragomen, Mr. DuPuis's declaration proceeds briefly to the merits. He begins with the assertion that Emigra's strategy "is to be a single-source provider for large corporations . . . for . . . global immigration services," [24] a goal it seeks to achieve without primary reliance on U.S. in-bound immigration work and without lawyers. [25] Mr. DuPuis asserts that Fragomen offers similar services "with the additional ability, unlike Emigra, to provide legal services in house." [26]

---

[19] DuPuis Decl. P 6.

[20] *Id*. P 7.

[21] *Id*. P 9.

[22] *Id*. P 12.

[23] *Id*. P 15.

[24] *Id*. PP 20-21.

[25] *Id*. P 23.

The DuPuis declaration then asserts that only Fragomen, Emigra and the Littler Mendelson law firm, much of the immigration practice of which recently was acquired by Fragomen, have provided a similar range of immigration services worldwide and argues, based on a Fragomen press release, that the alleged Service Submarket is a **[**17]** relevant market for antitrust purposes. [27] It passes then to a contention that there are substantial barriers to entry into that market. [28]

(b) The Flyer Declaration

The Flyer declaration states that Dr. Flyer was retained "to assess (1) whether Emigra's allegations . . . , if supported, would result in harm to competition; and (2) whether the evidence put forth by . . . Fragomen . . . constitutes a reliable evidentiary basis to dismiss Emigra's claims. [29] On the latter point, it purports to assess whether the evidence "contradicts Emigra's claims that: (1) the competitors in their relevant market are geographically dispersed 'single-source' providers of business related immigration services, (2) the customers in this market are major employers with workforces comprised of citizens of many countries; (3) Fragomen possesses monopoly power in the market for immigration services; and (4) Fragomen used this monopoly power to diminish competition in this market." [30] The first two of these claims are said to be significant because, if they are correct, "they would indicate that the relevant market for the services provided by Fragomen and Emigra is limited **[**18]** to geographically dispersed providers of services," i.e., to firms with large multi-region services networks with clients consisting of large corporations with diverse work forces. [31] The declaration then goes on to say that it is impossible to evaluate **[*343]** Fragomen's claim that there are not significant barriers to entry absent "information on the ease with which firms have been able to enter the market for immigration services and quickly establish geographically dispersed network[s] in a short period of time." [32] With this prelude, the declaration lays out a detailed list of information that Dr. Flyer claims would be necessary to answer the questions he raises. [33]

Plaintiff's memorandum asserts that Dr. Flyer's declaration "opines that Emigra has alleged valid antitrust claims" and that defendants' position "at its very best, . . . presents only a clash of expert opinion regarding market definition and dominance, and thus cannot possibly justify summary judgment." [34] In fact, however, this assertion takes significant liberties because Dr. Flyer in fact said no such thing. Rather than offering expert opinion that supports **[**19]** Emigra's allegations, he expresses only the view that the allegations of the complaint, *if true*, would result in harm to competition and that defendants' evidence, in his view, is not a reliable basis for rejecting those allegations. [35] So what Dr. Flyer in fact said -- as opposed to the spin Emigra's memorandum places on it -- proceeds from the assumption that defendants have the burden of negating plaintiff's allegations, an assumption that is incorrect for reasons shown below -- and adds nothing of an evidentiary nature to plaintiff's opposition to the motion.

[34] Pl. Mem. 2.

[35] Flyer Decl. PP 4, 10 ("insufficient evidence to . . . dismiss the allegations made by Emigra"), 17 (insufficient "evidence to refute Emigra's claim of a geographically dispersed relevant market served by 'single-source' providers"), 20 (defendants' measure of market share "unreliable"), 24.

Discussion

Emigra maintains that summary judgment rarely, if ever, should be granted in an antitrust case before extensive discovery. But "rarely" does not mean "never." And, as discussed below, this case arises in a singular posture for several reasons that, both individually and collectively, counsel careful consideration **[**20]** of granting summary judgment in this case.

First, there is reason to suppose that the antitrust claims are insubstantial. The Court assumes that Fragomen and Emigra have built networks of subcontractors in foreign nations and, in the case of Emigra, perhaps outside lawyers in the United States -- through which both offer immigration services across broad geographical areas. It assumes further that some corporate clients use one or the other organization, rather than dealing directly with several individual service providers, for the convenience of "one-stop shopping." But thousands of American lawyers provide in-bound immigration services, and thousands of foreign nationals doubtless provide immigration services for those seeking to enter their countries. The likelihood that any one provider or provider network has or threatens to have market power seems remote.

Second, the genesis and conduct of this lawsuit suggests that Emigra's purpose is at least as much to use the discovery process to get at Fragomen's competitively sensitive information for business reasons as to litigate the antitrust claims on their merits.

Third, a great deal of information that Emigra claims it needs to meet **[**21]** Fragomen's motion is in Emigra's hands. Emigra, after all, claims to be the only other single-source provider in the business. It therefore must know who the customers **[*344]** are. It must have copies of their requests for proposals or comparable evidence It must know at least most of the instances in which it or Fragomen obtained the business. It must know the identities of any local service providers who have declined to serve it as a result of relationships with Fragomen. And it must have a host of other information pertinent to the present motion. Indeed, it must have each of the items on Mr. DuPuis's list of discovery that Emigra wants from Fragomen save that it presumably lacks details concerning Fragomen's profit margins and similar matters confidential to Fragomen. Yet it has come forward with none of that data on this motion.

As the Supreme Court said only recently in *Bell Atlantic*, ***HN3***[] "the costs of modern federal antitrust litigation and the increasing caseload of federal courts counsel against sending the parties into discovery when there is no reasonable likelihood that the plaintiffs can construct a claim from the events related in the complaint." [36] And while *Bell Atlantic* was a **[**22]** pleading case, the concern it expressed is at least as applicable here as on a motion to dismiss. As the Second Circuit said in *PepsiCo, Inc. v. Coca-Cola Co*., [37] ***HN4***[] "[i]n the context of antitrust cases, . . . summary judgment is particularly favored because of the concern that protracted litigation will chill pro-competitive market forces." [38]

> *Celotex, PepsiCo*, and *Tops Markets*, among other cases, effectively have overruled a large number of earlier cases that indicated that summary judgment was disfavored, especially in antitrust cases. *See, e.g., Poller v. Columbia Broadcasting Sys., 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458(1962)* ("Summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot."); *George C. Frey Ready-Mixed Concrete, Inc. v. Pine Hill Concrete Mix Corp., 554 F.2d 551, 555 (2d Cir. 1977)* **[**23]** ("[b]ecause antitrust actions so integrally involve motive and intent to conspire and injure, they have been said to be particularly inappropriate for summary judgment treatment.").

I. The Law Governing Summary Judgment

A. General Principles

Plaintiff's brief begins with the proposition that "[t]he movant has the burden of adducing proof sufficient to show its entitlement to judgment as a matter of law, even assuming all factual disputes and inferences in favor of the party opposing the motion." [39] That assertion, which underlies plaintiff's entire position, is wrong in one critical respect. ***HN5***[] The movant does not have the burden of proving the negative of matters as to which the non-moving party would have the burden of proof at trial. Indeed, the Supreme Court rejected precisely the argument plaintiff makes here in *Celotex Corp. v. Catrett*. [40]

The basic principle, of course, is uncontroversial. ***HN6***[] Summary judgment is appropriate if there is no genuine issue of material fact and the moving party is entitled to judgment as a matter of law. [41] **[*345]** Plaintiff's assertion, however, goes to a different question, viz. the allocation of the burdens of coming forward **[**24]** with evidence on a motion for summary judgment.

In *Celotex Corp*., the D.C. Circuit had held, as plaintiff contends is the rule, that "the party opposing the motion . . . bears the burden of responding *only after* the moving party has met its burden of coming forward with proof of the absence of any genuine issues of material fact." [42] The Supreme Court, however, reversed. It held that ***HN7***[] summary judgment must be entered against a nonmoving party "who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." [43] Indeed, it went on to say quite explicitly that the moving party's burden is only to "inform[] the district court of the basis for its motion" and that "regardless of whether the moving party accompanies its summary judgment motion with affidavits, the motion may, and should, be granted so long as whatever is before the district court demonstrates that the standard for the entry of summary judgment . . . is satisfied." **[**25]** [44]

The fact that ***HN8***[] the non-movant has the burden of coming forward with admissible evidence sufficient to raise a genuine issue of fact on a matter as to which non-movant would have the burden of proof at trial, regardless of the existence or adequacy of evidence submitted by the movant, has important consequences for Emigra's reliance on Dr. Flyer's declaration. It proceeds from the premise that the movant is obliged to put forward "a reliable evidentiary basis to dismiss Emigra's claims." [45] In other words, he proceeds on the assumption that defendants are not entitled to summary judgment unless their evidence "contradicts Emigra's claims." [46] But that premise is incorrect. Once defendants put in issue Emigra's ability to get to the jury on essential elements of its claims, the

[45] Flyer Decl. PP 4, 7, 10.

[46] *Id*. P 7.

burden fell on Emigra to produce admissible evidence to meet that burden. In consequence, much of Dr. Flyer's declaration **[**26]** has little if any significance on this motion.

Emigra then makes the assertion that "a party must be afforded reasonable opportunity for discovery before judgment can be imposed." [47] That proposition is incorrect as well.

First, ***HN9***[] antitrust cases may be dismissed under *Rule 12(b)(6)* on the face of the complaint, without any opportunity for discovery. In *Bell Atlantic*, for example, the Supreme Court held that a Sherman Act Section 1 complaint will be dismissed absent "allegations plausibly suggesting (not merely consistent with) [the requisite] agreement" in restraint of trade. [48] Nor is *Bell Atlantic* limited to allegations of conspiracy. [49] Indeed, just a few months ago, our Circuit held that ***HN10***[] an antitrust complaint **[*346]** may be dismissed pursuant to *Rule 12(b)(6)* for failure to allege a relevant product market, most notably "[w]here the plaintiff fails to define its proposed relevant market with a reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's **[**27]** favor.'" [50]

Second, ***HN11***[] while it is true that summary judgment is not often granted prior to discovery, there is nothing in the Federal Rules of Civil Procedure precluding summary judgment -- in an appropriate case -- prior to discovery. [51] To the contrary, *Rule 56* makes clear that a defendant "may move at any time, with or without supporting affidavits, for summary judgment on all or part of the claim." [52] District courts in our Circuit have recognized this, granting summary judgment prior to discovery in a few appropriate cases. [53]

To be sure, ***HN12***[] there are circumstances in which a non-moving party that has not completed discovery has a legitimate need for discovery to meet a motion for summary judgment. But *Rule 56(f)* is the mechanism for

Co., 901 F.2d 1281, 1285 (5th Cir. 1991)* ("*Rule 56* does not require that any discovery take place before summary judgment can be granted.").

[52] *FED. R. CIV. P. 56(b)* **[**29]** (emphasis added). *Accord,* ***Schwartz v. Compagnie General Transatlantique, 405 F.2d 270, 274 (2d Cir. 1968)***; *Aniero Concrete Co. v. New York City Constr. Auth., Nos. 94 Civ. 9111, 95 Civ. 3506, 1997 U.S. Dist. LEXIS 22, 1997 WL 3268, at *17 (S.D.N.Y. Jan. 3, 1997)* ("Summary judgment may be sought at any time after a pleading is served."), *aff'd sub nom.,* *Aetna Cas. & Sur. Co. v. Aniero Concrete Co., 404 F.3d 566 (2d Cir. 2005)*.

[53] E.g., *Gray v. Garlock Sealing Technologies, LLC, No. 06-CV-6028 (CJS), 2006 U.S. Dist. LEXIS 89233, 2006 WL 3680567, *8-10 (W.D.N.Y. Dec. 11, 2006)*; *Natsource LLC v. GFI Group, Inc., 332 F. Supp.2d 626, 637-38 (S.D.N.Y. 2004)*.

addressing that need. [54] If the non-moving party makes a sufficient showing by affidavit, a motion for summary judgment will be denied or delayed **[*347]** to permit discovery that is reasonably expected to create a genuine issue of material fact. [55]

The structure of *Rule 56* therefore is clear. A defendant may move for summary judgment of dismissal at any time. In many cases, the need for discovery will be evident and a defendant will await the discovery process before doing so. But where a defendant elects to seek summary judgment, even at an early stage, on the ground that the plaintiff cannot get to a jury on an essential element as to which the plaintiff would have the burden of proof at trial, the plaintiff should suffer dismissal unless it comes forward with either (1) admissible evidence sufficient to raise a genuine issue of fact for trial, or (2) a *Rule 56(f)* affidavit sufficient to warrant denial **[**31]** or deferral of the motion pending necessary discovery.

* * *

In sum, then, ***HN13***[] an antitrust case in which proof of a relevant market is an element of the plaintiff's claim will be dismissed under *Bell Atlantic and Chapman* unless the complaint alleges facts that properly define the proposed relevant market by "reference to the rule of reasonable interchangeability and cross-elasticity of demand." By parity of reasoning, the same is true of a complaint that alleges market or monopoly power in conclusory terms unless the complaint alleges facts that properly give rise to an inference that such power exists. Even if such a complaint is not attacked on its face, a plaintiff whose proposed relevant market or allegation of market power is challenged by a motion for summary judgment must come forward with admissible evidence sufficient to raise a genuine issue of fact for trial as to the market definition or the existence of market power, as the case may be, or a sufficient *Rule 56(f)* affidavit demonstrating, among other things, the need for specific discovery to raise such an issue.

B. S.D.N.Y. CIV. R. 56.1

There is another factor relevant to the proper disposition of this motion. It is well to state **[**32]** it specifically.

Local Civil Rule 56.1 of this Court, which is substantially similar to antecedents that have been in effect for many years, provides in relevant part as follows:

> ***HN14***[] "(a) Upon any motion for summary judgment . . . , there shall be annexed to the notice of motion a separate, short and concise statement of the material facts as to which the moving party contends there is no genuine issue to be tried. Failure to submit such a statement may constitute grounds for denial of the motion.
> "(b) The papers opposing a motion for summary judgment shall include a separate, short and concise statement of the material facts as to which it is contended that there exists a genuine issue to be tried.
> "(c) All material facts set forth in the statement required to be served by the moving party will be deemed to be admitted unless controverted by the statement required to be served by the opposing party.
>
> "(d) Each statement of material fact by a movant or opponent must be followed by citation to evidence which would be admissible, set forth as required by *Federal Rule of Civil Procedure 56(e)*."

The purpose of the rule "is to assist the Court in understanding the scope of the summary judgment motion **[**33]** by highlighting those facts which the parties contend are in dispute." [56]

---

[54] *E.g., Allstate Ins. Co., 901 F.2d at 1285* ("*Rule 56* does not require that any discovery take place before summary judgment can be granted; if a party **[**30]** cannot adequately defend such a motion, *Rule 56(f)* is his remedy."); *Avia Group Int'l, Inc. v. L.A. Gear Calif., Inc., 853 F.2d 1557, 1561 (Fed. Cir. 1998)* ("A litigant's right to discovery is fully protected by *Fed.R.Civ.P. 56(f)*, which allows a court to refuse summary judgment if a litigant shows, 'by affidavit,' that additional discovery is necessary to uncover 'facts essential to justify his position.'"), *abrogated on other grounds, Egyptian Goddess, Inc. v. Swisa, Inc., 543 F.3d 665 (Fed. Cir. 2008)*.

[55] *See infra*, page 22-23.

[*348] In order for a Rule 56.1 statement in opposition to a motion for summary judgment to serve this purpose, it must respond appropriately to the movant's statement. Thus, ***HN15***[] "[a] proper Rule 56.1 statement submitted by a non-movant should consist of a paragraph-by-paragraph response to the movant's 56.1 statement, much like an answer to a complaint." [57] It must cite admissible evidence in support of the non-movant's contention that there is admissible evidence creating a genuine issue for trial [58] or, where the non-movant contends that further discovery is required to enable it to raise a genuine issue with admissible evidence, must be accompanied by a *Rule 56(f)* affidavit that demonstrates such a need with respect to each relevant averment in the movant's **[**34]** Rule 56.1 Statement.

In this case, both sides have submitted Rule 56.1 Statements. Emigra's responses to defendants' averments, however, frequently do not simply admit or deny defendants' averments. Many fall instead into two categories that bear preliminary consideration.

First, Emigra in many instances neither admits nor denies defendants' averment. It responds instead by saying that Emigra does not dispute a proposition that is not fully responsive to the averment in question. [59] To the extent that the defendants' averments go beyond these partially responsive answers and are supported by evidence, defendants' averments are deemed admitted in light of Emigra's failure explicitly to deny them and to adduce admissible evidence in support of the contrary proposition. [60]

Second, Emigra in many cases has responded that it is without sufficient knowledge to admit or deny defendants' averment because it has not had discovery. Of course, ***HN16***[] its failure to admit or deny a particular averment -- to the extent its *Rule 56(f)* affidavit sufficiently shows a justified failure **[**35]** to come forward with admissible evidence on the point in question -- cannot result in its being deemed to have admitted the averment. In those instances, however, in which the *Rule 56(f)* affidavit makes no such showing, the failure to admit or deny is not justified by a general claim that Emigra has not had discovery. To that extent, it is deemed to have admitted the averments in question. [61]

II. The Section 1 Claims

A. Intra-enterprise Conspiracy

Count IV alleges a conspiracy in restraint of trade among "[t]wo or more of the Defendants, not having complete common ownership." Defendants seek summary judgment on the ground that the Fragomen Organization is incapable, under the intra-enterprise conspiracy doctrine, of conspiring with itself. They principally rely on *Copperweld Corp. v. Independence Tube Corp*. [62] and its progeny. [63]

---

[56] *Archie Comic Publ'ns, Inc. v. DeCarlo, 258 F. Supp. 2d 315, 317 (S.D.N.Y. 2003)* (citing *Rodriguez v. Schneider, No. 95 Civ. 4083 (RPP), 1999 U.S. Dist. LEXIS 9741, 1999 WL 459813, at *1 n.3 (S.D.N.Y. June 29, 1999)*. *Accord, e.g., Goldstick v. The Hartford, Inc., No. 00 Civ. 8577 (LAK), 2002 U.S. Dist. LEXIS 15247, 2002 WL 1906029, at *1 (S.D.N.Y. [57] *Archie Comics, 258 F. Supp. 2d at 317-18*.

[58] *Id*.

[59] *See, e.g.*, Pl. Rule 56.1 St. PP 20, 26, 27, 31.

[60] Pl. Rule 56.1 St. PP 3, 5,11, 36.

[61] Pl. 56.1 St. PP 6-7, 12-19, 25, 37, 57-60, 62, 64, 66-68,70.

[62] *467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*.

Emigra's memorandum in opposition to the motion did not contest the propriety of **[*349]** dismissal of Count IV. At oral argument, it explicitly conceded the point. [64] Nevertheless, in a letter submitted following oral argument, plaintiff's counsel sought to "clarify" **[**36]** that concession by contending that (1) defendants' allegations of common ownership among the constituents of the Fragomen Organization have not been tested by discovery and (2) Count IV in any event states a sufficient claim on the theory that it alleges a conspiracy between Mr. Freel and the Fragomen Organization during the period prior to the commencement of Mr. Freel's employment at Fragomen. These belated contentions are without merit.

First, Emigra's *Rule 56(f)* submission, whatever its other merits, is of no avail with respect to the defendants' claim of common ownership. This is a matter on which the Fragomen Organization plainly is competent to testify. Emigra has not shown that discovery is "reasonably expected to create a genuine issue of material fact" on this point. It therefore has failed **[**37]** to satisfy at least one element of the standard articulated in *Concourse Rehab. & Nursing Ctr. Inc. v. Whalen*, [65] *Gurary v. Winehouse* [66] and other cases. [67]

Second, the contention that Count IV alleges an actionable horizontal conspiracy between Mr. Freel and the Fragomen Organization was not advanced by Emigra in its memorandum in opposition to this motion. [68] ***HN18***[] Just as a moving party will not be heard to advance a new argument for the first time in its reply brief, [69] a non-moving party should not be heard to advance a new argument in opposition to a motion after the close of briefing and oral argument. In any case, the Court sees no reason to relieve Emigra of the consequences of its express concession that **[*350]** Count IV fails in light of *Copperweld* and its progeny.

Accordingly, defendants are entitled to summary judgment dismissing Count IV.

B. Vertical Restraint

---

63 Def. Mem. 29-30.

64 Tr., Nov. 19, 2008, at 13:11-17 ("THE COURT: Your Count Four alleges a Section 1 claim, based on the allegation that two or more of the defendants entered into a contract[,] combination or agreement to damage your client. Now, that alleged conspiracy is said to be only among defendants. And do you agree that that count has to be dismissed on its face under Copperweld? MR. PINNISI: Yes.")

65 *249 F.3d 136, 146 n.3, (2d Cir. 2001)*.

66 *190 F. 3d 37, 44 (2d Cir. 1999)* (***HN17***[] *Rule 56(f)* affidavit must show "(1) what facts are sought [to resist the motion] and how they are to be obtained, (2) *how those facts are reasonably expected to create a genuine issue of material fact*, (3) what effort affiant has made to obtain them, and (4) why the affiant was unsuccessful in those efforts) (emphasis added)).

67 Any suggestion that Emigra is entitled to discovery for the purpose of attempting to challenge the credibility of defendants' statements concerning the legal structure of their intra-enterprise relationship would be without merit because there is no basis here for suggesting any substantial question as to their veracity on this point. *See, e.g., Wyler v. United States, 725 F.2d 156, 160 (2d Cir. 1983)*; *Desia v. GE Life & Annuity Assur. Co., No. 3:05 CV 1395 (MRK), 2008 U.S. Dist. LEXIS 86407, 2008 WL 4724080, at *10 (D. Conn. Oct. 24, 2008)*; *Wantanabe v. City of New York, 315 F.Supp.2d 375, 393 n.110 (S.D.N.Y. 2003)* (citing 10A CHARLES ALAN WRIGHT, ARTHUR R. **[**38]** MILLER &MARY KAY KANE, FEDERAL PRACTICE AND PROCEDURE: CIVIL 3D § 2726, at 445-47 (1998)), *aff'd*, *159 Fed. Appx. 235 (2d Cir. 2005)*.

68 Nor does the amended complaint properly allege such a conspiracy. Count II, the conspiracy to monopolize claim, specifically alleges that Mr. Freel and the Fragomen Organization conspired to monopolize the Service Market and the Service Submarket. Am Cpt P 117. But Count IV, in contrast, alleges only that "[t]wo or more of the Defendants, not having complete common ownership (upon information and belief)" entered into a horizontal agreement in restraint **[**39]** of trade and makes no reference to Mr. Freel. *Id*. P 138.

69 *See, e.g., Ernst Haas Studio, Inc. v. Palm Press, Inc., 164 F.3d 110, 112 (2d Cir. 1999)*; *Playboy Enters. v. Dumas, 960 F. Supp. 710, 720 (S.D.N.Y. 1997)*.

Count V asserts that the Fragomen Organization violated *Section 1 of the Sherman Act* by entering into an unspecified vertical arrangement with Emigra's former vendor in Japan, whom the parties agree is a firm called ILS Shimoda ("Shimoda"). [70]

HN19[] To establish an unlawful vertical agreement, a plaintiff must show "(1) a combination or some form of concerted action between at least two legally distinct economic entities; and (2) [that] such combination or conduct constituted an unreasonable restraint of trade either *per se* or under the rule of reason." [71] ***HN20***[] Non-price vertical restraints are subject to rule of reason analysis. [72]

Here, Emigra claims that there is some unspecified but nonetheless anticompetitive arrangement between the Fragomen Organization **[**40]** and Shimoda. But it has offered no evidence to support that claim. Defendants, moreover, although it was not their burden to do so, have come forward with competent evidence that FGIS's relationship with Shimoda is non-exclusive and that Shimoda is only one of three local providers with which FGIS does business. [73] They have shown also that Shimoda in fact provides services to other customers, including at least one other U.S. immigration law firm. [74] Finally, they have pointed to a significant number of other Japanese entities that are available to provide local immigration services to foreign firms such as Emigra. [75] Thus, there is no reason to suppose that there is any anticompetitive arrangement between FGIS and Shimoda, much less an arrangement that violates the rule of reason.

Emigra's response is deficient. It has offered no evidence of the substance of (1) the Fragomen Organization's relationship with Shimoda, let alone that it is an exclusive relationship, (2) that Shimoda does not provide services to others, including at least one competing **[**41]** U.S. law firm, or (3) that there are not many other Japanese firms available to provide the local immigration services in question. Its conclusory contention that defendants have not shown that the many other Japanese providers that they have identified "could undertake the same services and pricing and relationship that Emigra obtained from [] Shimoda" [76] misses the mark because, as we have seen, that was not defendants' burden. Rather, as plaintiff would bear the burden at trial of proving that any arrangement between FGIS and Shimoda is an unreasonable restraint of trade, it is plaintiff's burden to come forward with admissible evidence that the Fragomen Organization has foreclosed Shimoda as a provider to Emigra and that there are not sufficient alternatives to Shimoda for foreign firms seeking local immigration services in Japan. They have not done so. In any case, even if the burden were on defendants on this point, their evidence, **[*351]** which Emigra has not undermined in this respect, would have satisfied that burden. Emigra therefore has not raised a genuine issue of material fact as to whether the Fragomen Organization's relationship with Shimoda, whatever it may be, unreasonably **[**42]** restrains trade in immigration services in Japan. *A fortiori* it has not done so with respect to either of the alleged markets at issue in this case. Accordingly, defendants are entitled to summary judgment dismissing Count V unless Emigra has shown an adequate basis for discovery on this point under *Rule 56(f)*, a matter discussed below.

III. Monopolization and Attempted Monopolization -- Relevant Markets

---

[70] Pl. 56.1 St. P 55.

[71] *Tops Markets, 142 F.3d at 95-96*.

[72] *K.M.B. Warehouse Distribs., Inc. v. Walker Mfg. Co., 61 F.3d 123, 129 (2d Cir. 1995)*.

[73] Kaplan Decl. PP 18-20.; Def. 56.1 St. PP 57-59.

[74] Buffenstein Decl. P 50; Def. 56.1 St. P 60.

[75] Buffenstein Decl. P 51; Def. 56.1 St. P 61.

[76] Pl. 56.1 St. P 61.

HN21[] "Proof of the relevant product market is a necessary element of a cause of action for monopolization or attempted monopolization." [77] Similarly, sufficient proof of a relevant market and of a risk of its monopolization is pertinent to permit an inference of the specific intent to monopolize that is essential to a conspiracy to monopolize claim. [78]

In **[**43]** this case, the amended complaint alleges the existence of (1) a Service Market, consisting of "immigration services provided to corporations who are employers of U.S. citizens and/or foreign nationals," [79] and (2) a Service Submarket, consisting of "business-related immigration services provided by single-source providers to larger multinational corporations who are major employers of U.S. citizens and foreign nationals." [80] A heading in defendants' memorandum contends that Emigra has not properly defined the relevant market. [81] In fact, however, the memorandum argues only that alleged Service Submarket is not a relevant market for antitrust purposes. Accordingly, the Court assumes for purposes of this motion that the so-called Service Market is a relevant market. It therefore passes to defendants' contention that the alleged Service Submarket is not.

HN22[] The definition of a relevant market in a *Section 2* case serves to identify the area of effective competition in order determine whether a defendant has or threatens to obtain monopoly power. [82] As the Supreme Court said in a classic definition, a product "market is composed of products that have **[**44]** reasonable interchangeability." [83] Its "outer boundaries. . .are determined by the reasonable interchangeability of use or the cross-elasticity **[*352]** of demand between the product itself and substitutes for it." [84]

HN23[] The same fundamental principle is recognized in the Justice Department -- Federal Trade Commission Horizontal Merger Guidelines [85] (the "Guidelines"), another tool used to define a relevant market. [86] The Guidelines

[80] *Id*. P 11.

[81] Def. Mem. 17.

[82] Defining the relevant market serves essentially the same purpose in cases brought under *§ 7 of the Clayton Act*. *See, e.g.,* *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)* ("[d]etermination of the relevant market is a necessary predicate to a finding of a violation of the Clayton Act . . . because the threatened monopoly must be one which will substantially lessen competition within the area of effective competition. Substantiality can be determined only in terms of the market affected. The area of effective competition must be determined by reference to a product market and a geographic market").

[83] *E.I. du Pont de Nemours & Co., 351 U.S. at 404*.

[84] *Brown Shoe, 370 U.S. at 325* (footnote omitted).

[85] *See* *United States Dep't. of Justice & Federal Trade Comm'n, HORIZONTAL MERGER GUIDELINES, 57 Fed. Reg. 41,552 (Sept. 10, 1992)* **[**46]** (hereinafter "MERGER GUIDELINES").

[86] *See, e.g.,* *United States v. Visa U.S.A., Inc., 163 F. Supp.2d 322, 336 (S.D.N.Y. 2001)* (applying Merger Guidelines to find that a five percent price increase by a hypothetical monopolist of "general purpose" credit cards would be profitable and that such cards therefore constitute a relevant product market), *aff'd*, *344 F.3d 229 (2d Cir. 2003)*.

recognize "buyer substitution as the underlying principle for **[**45]** defining relevant markets." [87] Accordingly, the Guidelines delineate a relevant market as:

> "a product or group of products such that a hypothetical profit-maximizing firm that was the only present and future seller of those products ('monopolist') likely would impose at least a 'small but significant and nontransitory' increase in price. That is, assuming that buyers likely would respond to an increase in price for a tentatively identified product group only by shifting to other products, what would happen? If the alternatives were, in the aggregate, sufficiently attractive at their existing terms of sale, an attempt to raise prices would result in a reduction of sales large enough that the price increase would not prove profitable, and the tentatively identified product group would prove to be too narrow." [88]

Thus, ***HN24***[] a market is properly defined under the Guidelines "when a hypothetical profit-maximizing firm selling all of the product in that market could charge significantly more than a competitive price, *i.e*., without losing so many sales to other products that its price became unprofitable." [89]

HN25[] Direct evidence of cross-elasticity of demand is rare. [90] In consequence, courts often look to a number of "criteria designed to focus, directly or indirectly, on cross-elasticity." [91] And the problem is more complex in this case because Emigra alleges a submarket consisting of a cluster of different services, few if any of which are interchangeable. As the propriety of this aggregation is a logical antecedent of any discussion of the sufficiency of its evidence of market **[**47]** definition, the Court begins with that question.

A. Cluster Markets

The Supreme Court's statement that the outer boundaries of a product market are fixed by interchangeability of use or cross-elasticity of demand implied that a market invariably consists of a single product or service. But that conclusion has proved unwarranted.

In a long line of cases dating back to 1960"s and 1970"s challenges to bank mergers, courts in appropriate cases have defined relevant markets of clusters of non-interchangeable goods and services. Accordingly, it is necessary first to explore **[*353]** the boundaries of this cluster market concept beginning analysis of the alleged Service Submarket.

Certainly it is possible to describe any number of related and even unrelated products or services as a single line of business provided only that one adopts a sufficiently high level of generality. The term "transportation vehicles" for example, reasonably might include such diverse products as planes, automobiles, golf carts, locomotives, horse-drawn carts, submarines, and other conveyances. But the fact that our language permits such generalization does not justify the uncritical **[**48]** aggregation of distinct products and services into relevant markets for antitrust purposes. Someone interested in an automobile to run local errands and drive four miles to work will not buy an airplane instead, no matter how high the price of automobiles. So ***HN26***[] any definition of a cluster market must

---

[87] 1 ABA SECTION OF ***ANTITRUST LAW***, ***ANTITRUST LAW*** DEVELOPMENTS: SIXTH 593(6th ed. 2007) ("***ANTITRUST LAW*** DEVELOPMENTS").

[88] MERGER GUIDELINES at §1.11.

[89] *Visa U.S.A., Inc., 163 F. Supp. 2d at 335-336*.

The Guidelines state that a "small but significant and non-transitory" price increase generally is assumed to be five percent. MERGER GUIDELINES at §1.11.

[90] *See* ***ANTITRUST LAW*** DEVELOPMENTS at 566.

[91] *Id*.

be responsive to the purpose of the market definition process - identification of an area of competition in which variations in price will affect the demand for alternative products. [92] As one commentator recently put it:

> "The cluster market approach is inappropriate for market definition because clusters include products and services that are not demand substitutes (or supply substitutes). It can be defended as a matter of analytical convenience: there is no need to define separate markets for a large number of individual hospital services, for example, when market shares and entry conditions are similar for each, or when data limitations will effectively require that the same proxy (such as the number of hospital beds) be employed to estimate the market share for each individual service. Or it could be understood as a way of looking to what the allegedly harmed buyers purchase as a basis **[**49]** for specifying the products and locations in the narrowly defined candidate market with which the market definition algorithm begins. *But cluster markets may mislead as to competitive effects when competition from sellers of a partial line of products or services constrains the pricing of the full-line sellers offering the cluster*.
>
> "A similar type of market definition problem could arise when sellers produce both bundled and unbundled products, for example, if software firms sell suites of products (such as an office productivity suite that includes a word processor, spreadsheet, and presentation program) and also sell the individual component programs on a standalone basis. Suppose suites sell for less than the sum of the prices of the components. If two suite suppliers merge, should the product market for analyzing it be limited to suites?
>
> "The answer to this question, as always with market definition issues, turns on the economic force of buyer substitution. If at current prices, one group of buyers (e.g., corporate) purchases office software only as a bundle, and would not consider components, while other buyers (mass market) seek selected software products, the merger might reasonably **[**50]** be analyzed in both a suite market and in markets for the individual components. *But if enough suite buyers would respond to a higher suite price by purchasing instead some components individually, thereby making it unprofitable for a hypothetical suite monopolist to raise price, then the competitive effect of the merger would not be captured by defining a suite market* ***[*354]*** *and the transaction should be analyzed in individual component markets only. Here a competitive effects analysis limited to a suites market could mislead by ignoring the competitive constraint imposed by sellers of individual components, particularly if some sellers offer only some components and not suites*." [93]

Thus, ***HN27***[] buyer substitution is a fundamental consideration in evaluating a proposed cluster market. If the nature of competition is such that a full line seller would not be constrained in raising prices by competition from partial line or single product sellers, then a cluster market could be appropriate. If, however, buyers could and would respond to a price increase by a full line seller by shifting all or part of their business to partial line or single product sellers, or by making or providing the product or **[**51]** service themselves, then a cluster market would not be appropriate. [94]

This is the approach taken by the Ninth Circuit in *Lucas Automotive Engineering, Inc. v. Bridgestone/Firestone, Inc*. [95] The plaintiff there argued for markets consisting of (a) original equipment major brand vintage tires, and (b) a range of different sizes of vintage tires. The Court of Appeals held that there was an issue of fact as to the existence of the alleged original equipment vintage tire market in light of evidence that a significant fraction of the purchasers **[**52]** of tires for vintage vehicles "insists on replacement tires which are duplicative of the tires that

[94] *See* IIB PHILLIP AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** PP 560 ("A product grouping constitutes a market if a hypothetical defendant controlling its output could maximize profits by charging significantly more than the competitive price for a significant period."), P 530a ("[A] market is the arena within which significant substitution in consumption or production occurs.") (2007) (hereinafter "AREEDA & HOVENKAMP").

[95] *275 F.3d 762*.

were originally on their particular vehicle[s]" and "is generally not concerned with price." [96] On the other hand, it upheld summary judgment dismissing the plaintiff's claim with respect to the proposed cluster market of a range of different sizes of vintage tires because there was no evidence that "the product package is significantly different from, and appeals to buyers on a different basis from, the individual products considered separately." [97]

In this case, Emigra aspires to provide one-stop shopping for large corporations for immigration services all over the world. It attempts to define a relevant market in identical terms. But the fact that **[**53]** Emigra seeks to provide a broad array of immigration services does not mean that the market necessarily or even probably is limited to similar providers. The fundamental question is whether Emigra has offered any admissible evidence that demand by large corporations for immigration services provided by firms that offer one-stop shopping for services all over the world is sufficiently inelastic to make that a distinct market. In other words, assuming for the sake of argument that there are some buyers of immigration services that buy all or most of their global needs from full line providers like Emigra, **[*355]** would those buyers continue to do so in the face of price increases by such providers - or would they instead shift their purchases to the broad array of providers of particular kinds of services or of services in particular countries and areas?

Emigra has offered no proof that defendants could charge significantly more than a competitive price for any or all of its immigrations services without losing too many sales to other service providers to make its price unprofitable. For that matter, it has offered no evidence that Emigra itself charges more for immigration services than providers **[**54]** who do not offer one-stop shopping. Indeed, as discussed in more detail below, Emigra has produced no evidence whatsoever regarding pricing. Nor has Emigra made any showing regarding the cost of switching services from a single-source to individual providers or any other measure typically used to define a market under Guidelines. [98] Hence, while some customers might prefer a single source provider, Emigra has failed to adduce proof that such customers would not surrender that preference rather than pay a significantly higher price. ***HN28***[] The existence of one-stop shopping, and a group of customers with a preference or even demand for it, is insufficient to define a relevant market.

B. The Brown Shoe *Criteria*

Hard data concerning cross-elasticity is not the only means of proving a relevant market. In *Brown Shoe Co. v. United States*, [99] the Supreme Court famously observed that, ***HN29***[] within the broad market determined by interchangeability of use and cross-elasticity of demand:

> "well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes. [citation omitted] The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." [100]

---

[96] *Id. at 767-68*.

[97] *Id. at 768* (quoting *J.B.L. Enterprises, Inc. v. Jhirmack Enterprises, Inc., 698 F.2d 1011, 1016-17 (9th Cir.)*, *cert. denied*, ***464 U.S. 829, 104 S. Ct. 106, 78 L. Ed. 2d 109 (1983)*** (internal quotation marks omitted)). *See also* *Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1204-05 (9th Cir. 1997)*, *cert. denied*, ***523 U.S. 1094, 118 S. Ct. 1560, 140 L. Ed. 2d 792 (1998)***; *Westman Commission Co. v. Hobart International, Inc., 796 F.2d 1216, 1220-21 (10th Cir. 1986)*.

[98] *See* MERGER GUIDELINES at § 1.1. The Guidelines use the following factors: (1) evidence that buyers have shifted or have considered shifting purchases between products in response to relative changes in price or other competitive variables;(2) evidence that sellers base business decisions on the prospect of buyer substitution between products in response to relative changes in price or other competitive variables; (3) the influence of downstream competition faced by buyers in their output markets; and (4) the **[**55]** timing and costs of switching products.

[99] *370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510*.

[100] *Id. at 325*.

As a preliminary matter, it is relevant to note that the Supreme Court's use of the submarket terminology does not make its criteria irrelevant here. In the years since *Brown Shoe*, the Department of Justice, the Federal Trade Commission, and many courts have come to recognize that the distinction between markets and submarkets is confusing and unhelpful because it obscures **[**56]** the real inquiry. [101] Indeed, the Second Circuit has observed that "[t]he term 'submarket' is somewhat of a misnomer, since the 'submarket' analysis simply clarifies whether two products are in fact 'reasonable' substitutes and are therefore part of the same market." [102] Hence, ***HN30***[] the *Brown Shoe* factors are pertinent to the definition of relevant markets in antitrust **[*356]** cases, regardless of whether they are termed markets or submarkets. The Court therefore turns to the evidence pertaining to these considerations.

1. Industry or Public Recognition

HN31[] "[E]vidence of 'industry or public recognition of [a proposed market or] submarket as a separate economic unit'" is important in determining its relevance for antitrust purposes 'because we assume that economic actors usually have accurate perceptions of economic realities.'" [103] In *Brown Shoe*, for example, the Supreme Court upheld the lower court's finding that men's, women's, and children's shoes were separate submarkets based in part on the public's clear recognition of these categories as individual submarkets. [104]

Emigra has adduced no evidence suggesting industry or public recognition of a distinct market consisting of large multinational corporations that insist upon or prefer providers offering one-stop shopping for immigration services. The only arrow in its quiver is a press release statement by Fragomen founder Austin Fragomen, Jr., in which Mr. Fragomen, in announcing the Fragomen Organization's acquisition of another immigration practice, said that the organization could provide "comprehensive world-wide immigration services to large clients with complex needs who benefit from the delivery of consolidated global immigration services across multiple regions." [105] The Fragomen statement suggests that the Fragomen Organization seeks to sell its services on the basis, perhaps among others, that its global capabilities **[**59]** offer a benefit to certain large clients, a proposition that some prospective clients may find convincing. But it does not support the notion that there is industry or public recognition of a distinct market for a broad line of immigration services provided by single firms to large corporations. It thus falls considerably short of raising a genuine issue of material fact with respect to this *Brown Shoe* criterion.

2. Special Characteristics and Uses

---

[101] *See, e.g.*, *Allen-Myland v. IBM Corp., 33 F.3d 194, 208 n. 16 (3rd Cir. 1994)*, *cert denied*, ***513 U.S. 1066, 115 S. Ct. 684, 130 L. Ed. 2d 615 (1994)***; *FTC v. Staples, 970 F. Supp. 1066, 1080 n. 11 (D.D.C. 1997)*.

[102] *Geneva Pharmaceuticals Tech. Corp. v. Barr Labs. Inc., 386 F.3d 485, 496 (2d Cir. 2004)*. *See also, e.g.*, *United States Anchor Mfg. Co. v. Rule Indus., 7 F.3d 986, 995 (11th Cir. 1993)* ("As the Supreme Court's language [in *Brown Shoe*] itself suggests, defining a 'submarket' is the equivalent of defining a relevant product market for antitrust purposes."), *cert. denied*, ***512 U.S. 1221, 114 S. Ct. 2710, 129 L. Ed. 2d 837 (1994)***; *AD/SAT v. Assoc. Press, 920 F. Supp. 1287, 1296 n.6 (S.D.N.Y. 1996)* ("The required analysis does not change whether a **[**57]** particular product market is deemed a market or a submarket."), *aff'd*, *181 F.3d 216 (2d Cir. 1999)*.

[103] ***FTC v. Whole Foods Market., Inc., 548 F.3d 1028, 1045, 383 U.S. App. D.C. 341 (D.C. Cir. 2008)*** (quoting *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 253 U.S. App. D.C. 142, 792 F.2d 210, 218 n.4 (D.C. Cir. 1986))*.

[104] *Brown Shoe, 370 U.S. at 326*.

Whole Foods Market, Inc. is instructive. There, the D.C. Circuit focused on the "enormous amount" of evidence adduced by the Federal Trade Commission ("FTC") showing industry or public recognition of the natural and organic markets as a distinct economic entity. The evidence included "dozens of record studies" - including some prepared **[**58]** by Whole Foods and Wild Oats, the companies proposing to merge - that distinguished between "conventional" grocery stores and "natural food" or "organic" stores. The Court relied also on clear statements from the parties to the proposed merger indicating that "both believed that their companies occupied a market separate from the conventional grocery store industry." *Id. at 1045*.

[105] Flyer Decl. P 8 n.6.

HN32[] Under *Brown Shoe* and its progeny, the special characteristics and uses of a product or service can serve as another indicium of the existence of a relevant market. Indeed, the district court in *FTC v. Staples* credited the FTC's evidence of special characteristics of office superstores that **[*357]** distinguish them from other purveyors of office supplies, including the superstores' significant differences in appearance, physical size, format, the variety of products they offered, and the type of customers they targeted and served. [106] The proof, which included the court's own visits to several superstores and other office supply sellers, led the court to conclude, "You certainly know an office superstore when you see one." [107] **[**60]**

Emigra's main evidence on this point is Mr. DuPuis's declaration regarding what Emigra calls its "Global Case Management," which includes "document gathering assistance, document conditioning, consular processing, and internet status monitoring." [108] According to Mr. DePuis, Emigra's "intention is to provide a complete immigration services solution . . . with end-toend case management, home country support, and host country services." [109] The shortcoming of this evidence, however, is that it does no more than restate as a proposed market Emigra's own business plan without addressing the question whether that business plan reflects competitive realities in the marketplace. This is an important distinction.

By way of illustration, consider the automobile industry of years gone by. General Motors sold five different car lines, Ford three and Chrysler two, all attempting in varying degrees to offer brands that would appeal to different groups of consumers at different **[**61]** but overlapping price points. But to define the market, for antitrust purposes, as consisting only of multi-brand automobile manufacturers would have ignored the reality that single brand suppliers -- think Toyota, Honda, Nissan, Volvo and others -- could and did provide very meaningful competition. Similarly, Emigra's attempt to define the market by reference only to a description of the activities in which it and the Fragomen Organization engage ignores the pivotal question -- whether the activities of providers who offer narrower ranges of services offer meaningful competition to the full line providers.

Emigra attempts to deal with this problem by asserting that "local and regional providers cannot meet the service needs of major international customers due to their limitations of range and reach and capacity." [110] But there is no admissible evidence to support that contention. To be sure, Mr. DePuis states his *belief* "that small departments of large global firms can [not] compete effectively for such work, as they have not developed global networks or combinations of local expertise necessary to provide geographically diverse services." [111] He maintains also that smaller providers **[**62]** of immigration services, including those identified by defendants as existing within accounting firms, relocation firms, and law firms, cannot compete in the single source market because they lack "global reach in the provision of single-source immigration services." [112] And he would conclude, therefore, that the potential competitors identified by Fragomen "simply are not competition for single-source work provided by Fragomen and Emigra." [113] But **[*358]** these statements of belief and conclusory statements are not supported by admissible evidence.

3. Distinct Customers

Emigra asserts that its "prime customers" -- in other words, some unspecified subset of its entire customer base -- "have needs for placement throughout the world, in sufficient volume that internal management or even monitoring is impractical for the customer" and that "such customers want a single-source option, which currently is provided primarily, if not solely, by Emigra and Fragomen." [114] This statement thus has three elements -- claims that (1) *some* of Emigra's customers have needs "throughout the world," and (2) those customers (a) have such needs in sufficient **[**63]** volume that internal management and monitoring, presumably of multiple outside providers, is impractical, and (b) therefore "want a single-source option." As each of these elements is essential to Emigra's argument, it is important to look at each.

Mr. DuPuis, giving him the benefit of the doubt to which a non-movant is entitled, presumably is in a position to know that some of his customers have global needs for the simple reason that Emigra fills at least some of them, so the Court assumes the accuracy of that statement. But the assertion that it is impractical for those customers to satisfy their needs either internally, or by hiring, managing and monitoring multiple outside providers, is an *ipse dixit*, unsupported by any competent evidence. And the claim that such customers -- that is to say, some undefined portion of Emigra's business -- "want a single-source provider" -- is a matter as to which Mr. DuPuis lacks personal knowledge and thus is not competent to testify. Conspicuously absent, it bears noting, is even a single affidavit from a single Emigra customer supporting this assertion.

4. Distinct Prices

Emigra likewise has provided no evidence whatsoever **[**64]** regarding prices for immigration services generally or in its alleged Service Submarket in particular. There is, then, no basis for concluding that there is any price differential between the single-source providers and those who offer narrower lines of services. This cuts against Emigra's position. [115]

5. Sensitivity to Price Changes

HN33[] Courts consistently find sensitivity to price changes to be a critical factor in evaluating an alleged market. [116] In *FTC v. Staples*, for example, the FTC successfully established a narrow submarket for office superstores (as opposed to sellers of office supplies generally) based largely on a "compelling showing that a small but significant increase in Staples' prices will not cause a significant number of consumers to turn to non-superstore alternatives for purchasing their consumable office supplies." [117] In other words, the pricing evidence led the court to conclude **[**65]** that "office superstore prices are affected primarily by other office superstores and not by non-superstore competitors." [118]

Emigra has provided no evidence regarding sensitivity to price changes in its alleged Services Submarket. Indeed, Emigra's **[*359]** position resembles that of the plaintiff in *Thurman Industries, Inc. v. Pay 'N Pak Stores Inc*. [119] The plaintiff there alleged a narrow cluster market of home center stores that offered one-stop shopping for home

---

Fotomat Corp., 606 F.2d 704, 713 (7th Cir. 1979) ("[o]ne of the most important indicia suggested in Brown Shoe is whether drive-thru photo processing is offered at prices distinct from other methods of photo processing"), *cert. denied*, ***445 U.S. 917, 100 S. Ct. 1278, 63 L. Ed. 2d 601 (1980)***.

[116] *See, e.g.,* *Staples, 970 F. Supp. at 1078*.

[117] *Id. at 1078*.

[118] *Id. at 1077*.

[119] *875 F.2d 1369 (9th Cir. 1989)*.

improvement tools in which only it and a handful of other stores competed. It asserted that "the convenience of one-stop shopping and the presence of trained sales staffs at home centers appeal to consumers on a different level than the products individually." [120] In upholding the district court's grant of summary judgment dismissing the complaint, the Ninth Circuit rejected the plaintiff's narrow market definition, focusing on the lack of evidence of price differentials between the "home center stores" that offered one-stop-shopping and other retailers that offered narrower ranges of the same products. [121] The court held that the factors identified by Thurman **[**66]** -- that home centers are perceived as distinguishable from other stores by their variety of products and trained sales staff, and that customers engaged in home repairs/remodeling patronize home centers because of this distinction --

> "are wholly inadequate to allow a finding that specialty stores selling house paint are unable through price reductions or other marketing strategies to lure significant numbers of do-it-yourself builders into buying paint at a specialty store even if they purchase all their other supplies at a home center." [122]

Emigra suffers from a similar lack of evidence.

6. Specialized Vendors

Emigra's central claim in this case is that itself and Fragomen are specialized vendors offering one-stop shopping for global immigration services to large corporations that seek such one-stop shopping. The fact that such vendors exist lends some support to its position. As will appear, however, it is not controlling.

C. Conclusion - Market Definition

As noted above, ***HN34***[] in a case that requires proof of a relevant market, it is not enough to survive even a Rule 12(b)(6) motion to dismiss to make bald assertions as to **[**67]** its existence or definition. Such a complaint must "define its proposed relevant market with a reference to the rule of reasonable interchangeability and cross-elasticity of demand, or allege[] a proposed relevant market that . . . encompass[es] all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor.'" [123] Where a defendant puts the existence of a plaintiff's alleged market at issue on a motion for summary judgment, the plaintiff must come forward with admissible evidence that, construed in the plaintiff's favor, raises a genuine issue of material fact on the market definition issue or suffer an adverse judgment. Indeed, our Circuit and other courts have approved summary judgment dismissing antitrust cases for failure to come forward with sufficient evidence to define and raise a genuine issue of fact material to the definition of a relevant market. [124] Emigra has not satisfied **[*360]** that requirement by any applicable standard.

Emigra has not defined with any specificity what particular services it contends make up its proposed Service Submarket. Nor has it has offered any admissible evidence to support the view that full line sellers of whatever bundle of services it has in mind would be unconstrained in raising prices by competition from partial line or single product sellers.

Nor has Emigra raised a genuine issue of fact even under the more generous *Brown Shoe* criteria. There is no admissible evidence of (1) industry or public recognition of a distinct market for providers of one-stop shopping for immigration services sought by large multinational corporations, (2) distinct pricing, or (3) sensitivity to price changes. There is no evidence that the end result of the efforts of both providers of one-stop shopping and providers of more limited ranges of services is different in any way -- a work or residence permit or entry visa procured by either necessarily is identical, affording **[**70]** the holder no greater or lesser privileges. The most that can be said for Emigra's evidentiary showing is that there is some evidence that (1) both Emigra and the Fragomen Organization seek to offer a broad array of immigration services to big companies and that some big companies patronize them. This perhaps gives rise to inferences that Emigra and the Fragomen Organization in a sense are specialized vendors and that there may be distinct customers, although the latter inference is questionable and in any case weak because there is no evidence that even the companies that patronize Emigra or defendants do so to the exclusion of other, narrower-gauged vendors.

In the last analysis, ***HN35***[] "the *Brown Shoe* indicia are not to be used in a 'talismanic fashion' whereby their presence or absence are regarded as mechanically dispositive of the issue" of market definition. [125] Rather, the object is to use them in a pragmatic fashion with a keen eye on economic reality. [126] So the ultimate question here is whether the mere existence of two full line sellers of immigration services to large multinational corporations would permit a rational jury to find that Emigra's Service Submarket is a relevant **[**71]** market, consistent with economic reality, for antitrust purposes in the absence of any evidence of industry or public recognition of such a market, of distinct pricing, of sensitivity to price changes, or of any of the other indicia of a relevant market. To state the **[*361]** question is to answer it in the negative. Emigra has offered insufficient evidence to create a genuine issue of material fact as to the definition or existence of the proposed Service Submarket. The monopolization and attempted monopolization claims with respect to it therefore must be dismissed.

IV. Monopolization and Attempted Monopolization -- Monopoly Power

In view of the dismissal of the monopolization and attempted monopolization claims as to the Service Submarket, it is unnecessary to consider whether Emigra has offered sufficient evidence as to the existence or dangerous probability of monopoly power in that area of business. As defendants have not challenged the existence of a Service Market, consisting of "immigration **[**72]** services provided to corporations who are employers of U.S. citizens and/or foreign nationals," however, the Court must determine whether Emigra has raised a genuine issue of material fact as to whether the Fragomen Organization has monopoly power, or a dangerous probability of acquiring monopoly power, in that alleged market.

HN36[] Monopoly power, also referred to as market power, is the power to control prices or exclude competition. [127] It may be proven directly by evidence of control of prices or the exclusion of competition or, as is more common, may be inferred from one firm's large percentage share of the relevant market. [128]

(summary judgment affirmed and plaintiffs' narrowly defined market rejected on grounds that the definition was "implausible" and "an awkward attempt to conform their theory to the facts they allege").

[125] *Kaplan v. Burroughs Corp., 611 F.2d 286, 292 (9th Cir. 1979)* (quoting *Int'l Tel. & Tel. Corp. v. Gen. Tel. & Elec. Co., 518 F.2d 913, 932 (9th Cir. 1975))*, *cert. denied* ***447 U.S. 924, 100 S. Ct. 3016, 65 L. Ed. 2d 1116 (1980)***.

[126] *Id*.

[127] *E. I. Du Pont de Nemours & Co., 351 U.S. at 396*.

Emigra has offered no evidence of control of prices or the exclusion of competition. The fact that the Fragomen Organization hired Mr. Freel from Emigra and through him allegedly gained access to Emigra commercially sensitive information falls far short of raising a genuine issue of fact as to the exclusion of competition both because (a) Emigra has not been excluded, and (b) a contrary conclusion would turn many disputes over the hiring by one competitor of an employee of another, **[**73]** the stuff of everyday commercial tort claims, into monopolization or attempted monopolization cases. Nor do Emigra's allegations regarding Shimoda fill the gap, either standing alone or in combination with the Freel hiring. Emigra has not even alleged, let alone provided evidence, of anything that the Fragomen Organization did in relation to Shimoda that disadvantaged Emigra. And it has offered no admissible evidence that it lacks an abundance of alternatives in Japan to using Shimoda.

Emigra fares no better with respect to market share. It has offered no evidence of the total sales of "immigration services provided [by all providers] to corporations who are employers of U.S. citizens and/or foreign nationals" or any basis for concluding that the share of those services provided by the Fragomen Organization approaches the levels necessary to permit an inference of monopoly power or a dangerous probability thereof. Indeed, it has not even tried. Mr. Depuis' declaration focuses almost exclusively on attempting to create a material issue of fact regarding the alleged single source Submarket. [129] The broader Service Market is barely mentioned.

Emigra's **[**74]** silence on the issue of monopoly power in the broader Service Market is particularly striking in the face of the Fragomen Organization's identification of a host of competitors and potential competitors in the provision of immigration services to large companies, including accounting firms, relocation service firms, **[*362]** immigration consulting firms, and in-house legal and human resource departments of large corporations. [130] Although defendants discussed these other providers mainly in response to Emigra's alleged single source Service Submarket, the existence of these competitors and potential competitors certainly is relevant to question of Fragomen market power -- or lack thereof -- in the overall Service Market for immigration services, which is not confined to single source providers. And while Emigra challenges whether these firms can compete within the alleged single-source Service Submarket, it says nothing about their ability to compete in the broader market for immigration services. [131]

Emigra has failed also to confront Fragomen's assertions regarding the lack of significant entry barriers in the **[**75]** Service Market. [132] ***HN37***[] Market power can persist only when entry barriers -- market circumstances, governments, or the defendants -- block rivals' entry or expansion. [133] And the lack of significant entry barriers can defeat a monopolization claim, even in the fact of a defendant's high market share. [134] Emigra's only arguments regarding entry barriers focus on alleged barriers to the Service Submarket -- not to the broader Service Market. [135]

Emigra has offered no admissible evidence that the defendants enjoy power over prices, have excluded of competitors, or have the market share necessary to give rise to an inference of market power, actual or dangerously probable, in the alleged Service Market. Even if it had done so, the abundant, unrebutted evidence of lack of barriers to **[**76]** entry and additional potential competition would require the conclusion that it had failed to

[135] *See, e.g.*, Pl. 56.1 St. PP 32, 33.

raise a genuine issue of material fact as to this indispensable element of a monopolization or attempted monopolization claim. Accordingly, the monopolization and attempted monopolization claims relating to the alleged Service Market will be dismissed unless Emigra's *Rule 56(f)* application is sufficient to warrant discovery prior to a final disposition of these claims.

V. The Conspiracy to Monopolize Claim

Emigra alleges in conclusory terms that Mr. Freel and the Fragomen Organization conspired to monopolize the Service Market and Service Submarket. [136] It goes on to claim that Mr. Freel, while still employed by Emigra, negotiated for a new job with the Fragomen Organization and, in the course of those negotiations, disclosed Emigra trade secrets and confidential information. [137] This disclosure during the pre-employment stage is specifically said to have been in furtherance of the alleged conspiracy to monopolize. [138]

Defendants seek summary judgment on this claim on the ground that Mr. Freel, under *Copperweld*, was incapable as a matter **[**77]** of law of conspiring with his employer, the Fragomen Organization. To the extent the complaint purports to allege that the alleged conspiracy hatched during the **[*363]** pre-employment negotiations continued once Mr. Freel became a Fragomen employee, they are unmistakably correct for the reasons stated above. But the complaint is not so limited, as it implicitly contends that the conspiracy to monopolize began before Mr. Freel was hired by the Fragomen Organization and that the pre-employment trade secret disclosures were acts in furtherance of the conspiracy. *Copperweld* does not dispose of that aspect of the conspiracy claim. But that does not mean that even this narrow aspect of Emigra's claim survives summary judgment.

The alleged conspiracy is one to monopolize the Service Market and Submarket. The Court already has held that the record does not raise a genuine issue of material fact as to (1) the existence of the alleged Service Submarket, or (2) the existence, or dangerous probability of, market power in the alleged Service Market.

HN38[] A claim of conspiracy to monopolize requires proof of (1) concerted action, (2) overt acts in furtherance of the conspiracy, and (3) specific intent to monopolize. **[**78]** [139] And while rigorous proof of a relevant market and the likelihood of monopolization is not required in this Circuit on a conspiracy to monopolize claim, the relevant market and the likelihood of its monopolization may have a significant bearing on whether the requisite specific intent to monopolize is present.

Given the record before this Court, no reasonable jury could find that Mr. Freel's alleged disclosure of Emigra's confidential information during his pre-employment negotiations with the Fragomen Organization, assuming that occurred, was undertaken with the requisite specific intent to monopolize. There quite plainly is no admissible evidence supporting the existence of the alleged Service Submarket, so the very notion of a conspiracy to monopolize it is an oxymoron -- one cannot monopolize something that does not exist. Likewise, the fact that there is no admissible evidence to suggest that the Fragomen Organization enjoys, or has any realistic hope of gaining, monopoly power in the far broader Service Market is fatal to the conspiracy to monopolize that alleged market for a **[**79]** similar reason. It makes little sense to say that the Fragomen Organization pried Emigra's confidential information out of Mr. Freel before hiring him with the specific intent to monopolize the Service Market -- as opposed to doing so, if it did, for the simple purpose of competing more effectively, if perhaps tortiously.

VI. The Rule 56(f) Application

---

[136] Am Cpt P 117.

[137] *Id*. PP 49, see PP 113-23.

[138] *Id*. P 49.

[139] *Volvo North America Corp. v. Men's Int'l Prof. Tennis Council, 857 F.2d 55, 58-59 (2d Cir. 1988)*.

This brings us to Emigra's *Rule 56(f)* contentions.

As noted above, ***HN39***[] *Rule 56(f)* is the safety valve that, when satisfied, prevents the entry of summary judgment against a party where there is good reason to believe that evidence sufficient to defeat the motion for summary judgment exists, but the non-moving party legitimately needs discovery to get that evidence. But *Rule 56(f)* requires far more than simply a claim that the non-moving party has not had or wants more discovery. Our Circuit has made clear what is necessary to open the door in such circumstances:

> "*Rule 56(f)* provides:
>
> ***HN40***[] "Should it appear from the affidavits of a party opposing the motion that the party cannot for reasons stated present by affidavit facts essential to justify the party's opposition [to a motion for summary judgment], the court may refuse the application for judgment **[**80]** or may order a continuance to permit affidavits to **[*364]** be obtained or depositions to be taken or discovery to be had or may make such other order as is just.'
>
> "Thus, as we often have said, a party resisting summary judgment on the ground that it needs discovery in order to defeat the motion must submit an affidavit showing (1) what facts are sought [to resist the motion] and how they are to be obtained, (2) how those facts are reasonably expected to create a genuine issue of material fact, (3) what effort affiant has made to obtain them, and (4) why the affiant was unsuccessful in those efforts. *Meloff v. New York Life Ins. Co., 51 F.3d 372, 375 (2d Cir.1995)* (quoting *Hudson River Sloop Clearwater, Inc. v. Department of Navy, 891 F.2d 414, 422 (2d Cir.1989))*; *accord, Paddington Partners v. Bouchard, 34 F.3d 1132, 1137-38 (2d Cir.1994)*; *Burlington Coat Factory Warehouse Corp. v. Esprit De Corp., 769 F.2d 919, 926 (2d Cir.1985)*." [140]

Thus, the Court must determine whether Emigra's declarations satisfy each of these criteria with respect to two questions: (1) the existence and relevance of the alleged Service Submarket, and (2) whether the Fragomen Organization enjoys, or is dangerously likely **[**81]** to procure, market power in the Service Market. Moreover, it is quite important to understand at the outset exactly why Emigra claims it needs discovery to resist this motion, apart from its incorrect assertion that summary judgment never is appropriate before at least some discovery.

Emigra relies on the declarations of Dr. Flyer and Mr. DuPuis. The premise of Dr. Flyer's declaration is that it is defendants' burden to prove that Emigra's allegations. [141] He claims that it is impossible to tell whether they have done so without discovery. [142] This premise is the basis also of Mr. DuPuis's argument in support of discovery. [143] And it is quite explicit in Emigra's memorandum in opposition to the motion for summary judgment, which asserts that "[d]efendants' papers are insufficient to permit adequate economic analysis of their contentions, **[**82]** much less to justify dismissal of Emigra's claims as a matter of law." [144]

As discussed above, this premise, which underlies Emigra's opposition to defendants' motion and its *Rule 56(f)* arguments, is incorrect. Defendants were not obliged to come forward with any evidence on those matters. As these were matters as to which plaintiff would have the burden of proof at trial, they were entitled to seek summary judgment merely by contending that plaintiff cannot prove its allegations. By doing so, with or without supporting

[143] DuPuis Decl. PP 6-8 and *passim*.

[144] Pl. Mem. 2.

evidence, they shifted the burden to Emigra to come forward with admissible evidence in support of *Emigra's* allegations. In consequence, it does not matter whether discovery might yield a basis for questioning defendants' factual assertions concerning the definition of the relevant market(s) or the existence of market power. What matters is whether Emigra has satisfied [Rule 56(f)]() with respect to **[*365]** its **[**83]** ability to support *its own allegations* with admissible evidence, not with respect to challenging defendants' contentions. With that in mind, the Court proceeds to whether there is anything in plaintiff's papers that satisfies [Rule 56(f)]() and therefore warrants discovery before a definitive ruling on defendants' motion.

A. Section 1 Claims

The bases for the proposed dismissal of the Section 1 claims are that (1) *Copperweld* requires the rejection of the intra-enterprise conspiracy claim as a matter of law and (2) Emigra has offered no admissible evidence of any anticompetitive arrangement between FGIS and Shimoda, much less an arrangement that violates the rule of reason. Emigra has offered no reason to question defendants' assertions as to their corporate interrelationships and thus no basis for discovery as to whether *Copperweld* applies to require dismissal of the conspiracy claim. [145] And while it makes a *pro forma* assertion that it cannot admit defendants' averments with respect to the alleged arrangement with Shimoda absent discovery, [146] the contention is unpersuasive.

Emigra has an office and offers services in Japan. It formerly used **[**84]** Shimoda to assist it in providing those services. It therefore has knowledge of the Japanese marketplace, knowledge of which in any case is not peculiar to the defendants. There is no reason to suppose that it is unable to procure evidence concerning the availability in Japan of providers other than Shimoda or, indeed, that it made any effort to do so. Nor has it demonstrated that discovery would be likely to demonstrate that there are not sufficient alternatives.

Accordingly, there is nothing in Emigra's papers that warrants discovery prior to dismissal of its Section 1 claims.

B. The Service Submarket -- Market Definition

On the present state of the record, Emigra has failed to raise a genuine issue of material fact as to the definition and existence of its alleged Service Submarket because it has failed to offer admissible evidence that (a) the customers of single-source providers buyers would not shift their business to others offering narrower lines in the face of price increases by such providers, or (b) a consideration of the *Brown Shoe* factors could justify a conclusion that the Service Submarket is a relevant market for antitrust purposes.

Most of the discovery proposed in Emigra's **[**85]** declarations would be directed at obtaining confidential Fragomen information such as customer lists, vendor relationships, revenues per customer, internal strategic documents, bid documents, and pricing. [147] None addresses the first of these questions.

Some of the proposed discovery might yield information relevant to some of the *Brown Shoe* criteria. For example, it contends, quite reasonably, that defendants' internal strategic documents might identify the firms that defendants regard as their main competitors. [148] This in fact would be pertinent to the existence, or lack thereof, of industry recognition of single-source providers as a market distinct from other providers. [149] Similarly, internal **[*366]**

[147] *E.g.*, DuPuis Decl. P 9; Flyer Decl. P 11, 14, 18.

[148] *Id*. P 14.

Fragomen Organization documents might reveal information showing "that Fragoment's competitors for pertinent work are primarily single-source providers" [150] and that its major customers are large corporations that buy coordinated and geographically diverse services. [151] Such evidence could support an argument that Emigra and the Fragomen Organization are, as plaintiff claims, specialized vendors of immigration services, which would be a **[**86]** consideration relevant under *Brown Shoe*. Whether these and any other examples of discovery from defendants might yield evidence relevant to one or more of the *Brown Shoe* criteria, however, is not the only consideration in determining whether Emigra has satisfied Rule 56(f).

As an initial matter, ***HN41***[] one seeking Rule 56(f) discovery must demonstrate a reasonable expectation that the discovery sought would raise a genuine issue of material fact, in this case as to the existence of the Service Submarket alleged by Emigra. Evidence that defendants regard single-source providers as their primary competition, for example, would not carry the day in the absence of proof that single-source providers have the ability to raise prices without losing sufficient business to others to make price increases unprofitable. But the Court does not rely on this concern alone, as there is a more compelling basis for rejecting Emigra's **[**87]** position.

Emigra claims to be one of only two competitors in its alleged Service Submarket. It therefore necessarily knows with whom it competes, whether it is able to price materially higher than providers who offer only a narrower line of services, whether it and others in the industry recognize single-source providers as a distinct market, its own profit margins, the nature of its own customer base, the details of its own vendor relationships, the details of bidding on requests for proposals, and the like. In other words, it knows whatever is public information about those who buy and sell in this line of endeavor, and it knows about its own operations, everything that it seeks to learn about defendants' operations. [152] Every bit of that information, whether public or internal to Emigra, is just as relevant to determining whether the Service Submarket indeed is a relevant market for antitrust purposes as the same information that is in defendants' hands. Thus, by way of example, if it would be important to know from defendants' internal documents that the Fragomen Organization regards Emigra as its only or principal competitor, it would be equally important to know that Emigra's **[**88]** internal documents, created *ante litem modem*, show that Emigra regarded the Fragomen Organization is its only or principal competitor. Likewise, if it would be relevant to know that a high proportion of defendants' revenues come from large corporations who regularly use defendants in many countries rather than using many local providers, it would be equally relevant to know that this is true of Emigra's customers. Yet the singular fact about this motion is that Emigra has come forward with *none* of the information concerning its own operations that might be expected either to support or to undercut its allegations concerning the relevant market.

This failure is telling. As the Court of Appeals has said, ***HN42***[] among the requirements of Rule 56(f) is a showing by affidavit not only that the information one seeks would be pertinent, but also of "what effort affiant has made to obtain [it], and . . . why the affiant was unsuccessful in those efforts." [153] **[*367]** Here, Emigra has offered no explanation for why its failure to come forward with the relevant information so obviously residing in its own files. This not only casts doubt on its *bona fides* in seeking this information **[**89]** from defendants and suggests an inference (which, given that this is a motion for summary judgment, this Court does not draw) that Emigra's files would not help its position, but demonstrates that it has failed to satisfy the Rule 56(f) requirements because it has not shown a sufficient effort to offer the evidence that it does have. Similarly, it has not claimed that it has sought any information whatever from buyers of immigration services -- all of whom are in a position to say whether they regard single-source providers as a distinct market, whether those that use single-source providers would shift to

---

[149] Indeed, the D.C. Circuit in *Whole Foods* cited emails from Whole Foods and Wild Oats officials as significant proof of industry recognition of a distinct organic food submarket. ***Whole Foods Market, Inc. 548 F.3d at 1045***.

[150] Flyer Decl. PP 11, 16-17.

[151] *See id*. at 18.

[152] *See* DuPuis Decl. P 11.

[153] *See supra* note 131 and accompanying text.

other providers in the face of price increases by single-source providers, and to provide a host of other relevant data -- let alone indicated that efforts to obtain information from buyers had been unsuccessful.

In short, what Emigra seeks to do here is akin to engaging in a game of stud poker in which it would require its adversary disclose its hole card before Emigra places its bet. The problem with that gambit is the rules. The rules -- *Celotex* and its progeny -- say that ***HN43***[] a motion for summary judgment places the burden of coming forward **[**90]** on the non-moving party on those issues as to which it would have the burden of proof at trial. Emigra, for whatever reason, has elected to withhold the evidence in its possession concerning whether its alleged Service Submarket is a relevant market for antitrust purposes. Having done so, it cannot insist on its competitor revealing its competitively sensitive information. That would put Emigra in a "heads-I-win, tails-you-lose." *Rule 56(f)* does not countenance such gamesmanship.

C. The Service Market -- Monopoly Power

On the present state of the record, defendants appear to be entitled to summary judgment dismissing the monopolization and attempted monopolization claims on the ground that there is no evidence that they have, or are likely to attain, market or monopoly power. The remaining question is whether Emigra has satisfied the requirements of *Rule 56(f)* in respect of proposed discovery addressed to that question.

Nothing in Emigra's proposed discovery is directed at obtaining evidence likely to raise a genuine issue of material fact as to whether defendants have the power to control prices or exclude competition. That leaves the matter of market share.

Market share typically is **[**91]** the proportion of the total dollar sales in a particular market accounted for by one competitor. [154] In other words, it is a fraction of which the numerator would be the sales of the competitor in question and the denominator would be the total of all sales by all competitors.

A very small aspect of the discovery proposed by Emigra might, and probably would, elicit the numerator of this fraction -- defendants' revenues from the sale of immigration services. [155] But the numerator **[*368]** alone would be meaningless without the denominator, and Emigra has not proposed any discovery of other industry participants, providers or customers, that would be necessary to establish the denominator -- total sales in the Service Market. Thus, the proposed discovery can not reasonably be expected to yield evidence sufficient to create a material issue of fact even as to defendants' market share. But there is a more basic problem.

Defendants have placed in issue Emigra's ability to prove that its market share in the alleged Service Market -- which includes all sales of immigration services provided to all corporations who are employers of U.S. citizens and/or foreign nationals -- is sufficient to give rise to an inference of actual or dangerously probable market power, i.e., a share certainly no lower than 20 percent and probably no lower than 30 percent. [156] Emigra thus has the

[154] On occasion, it is determined by other measures such as production capacity, none of which is pertinent here. *See generally* HERBERT HOVENKAMP, ECONOMICS AND FEDERAL ***ANTITRUST LAW*** § 6.10, at 182-83. (1985).

[155] Emigra seeks a list of customers with total revenue by customer by year. **[**92]** Flyer Decl. P 18. This might prove to be the numerator of the market share fraction. The qualification inherent in the use of the word "might," however, reflects the fact that revenues by customer by year could include payment for services that do not fall within the proposed Service Market.

[156] Judge Learned Hand famously said in *United States v. Alum. Co. of Am., 148 F.2d 416, 424 (2d Cir. 1945)* (sitting as a court of last resort pursuant to *15 U.S.C. § 29*, which at the time authorized the designation of a court of appeal as the final stop in certain antitrust actions), that market share of 90 percent "is enough to constitute a monopoly; it is doubtful whether sixty or sixty-four percent would be enough; and certainly thirty-three per cent is not." Our Circuit subsequently held that a market share of 20 percent, standing alone, is presumptively inadequate to permit a finding of dangerous probability of success and that even a share of 30 percent might be insufficient. *H.L. Hayden Co. of N.Y. v. Siemens Med. Systs., Inc., 879 F.2d 1005, 1018 (2d Cir. 1989)*.

burden of showing, for Rule 56(f) purposes, among other things, that there is a reasonable expectation that its proposed discovery would show that defendants' share of the alleged Service Market -- that is, its share of all revenues from provision of immigration services to corporations who are employers of U.S. citizens and/or foreign nationals *by all providers, all over the world* -- exceeds 20 percent. Emigra has not even attempted to do so, even **[**93]** for the United States. It therefore has failed to show a reasonable expectation that the proposed discovery would raise a genuine issue of material fact as to the existence of a market share that might, if all other considerations favored Emigra, give rise to an inference of market or monopoly power.

VII. The Pendent State Law Claims

HN44[] Where a district court has dismissed before trial all claims over which it has original **[**94]** jurisdiction, the district court ordinarily should decline to exercise its supplemental jurisdiction and therefore dismiss pendent state claims without prejudice. [157] All that remains of this case are Emigra's state law claims arising from the defendant's hiring of Ryan Freel. As there is no independent basis of federal jurisdiction over those claims, the proper place for their adjudication is in state court. Accordingly, those claims will be dismissed without prejudice.

Conclusion

For the foregoing reasons, defendants' motion for summary judgment dismissing the complaint [Docket Item 19] is granted. The federal claims are dismissed on the merits and with prejudice. The state law claims are dismissed for lack of subject matter jurisdiction.

SO ORDERED.

Opinion by: Freda L. Wolfson

Opinion

WOLFSON, [*2] United States District Judge:

Presently before the Court is a motion by Defendants PMC Global, Inc. (" PMC Global"), PMC Inc. ("PMC"), PMC Europe Investments ("PMC Europe"), S.L., Denis S. Commette ("Commette"), and Gama Machinery USA, Inc. ("Gama") (collectively "PMC Defendants"), to dismiss Plaintiffs', Graco Inc. and Graco Minnesota Inc. (collectively "Plaintiffs" or "Graco"), Complaint pursuant to *Fed. R. Civ. P. 19* and *12(b)(6)*. Defendant Garraf Maquinaria S.A. ("Garraf") joins in that Motion and asserts additional reasons to dismiss Plaintiffs' Complaint. Finally, Graco filed a motion to dismiss or, in the alternative, stay the counterclaims of Defendants Commette and Gama.

This case has its genesis in Graco's purchase of Gusmer Corporation and Gusmer Europe S.L. (collectively "Gusmer"), from Defendants PMC Global and PMC Europe for $ 65 million. Thereafter, former Gusmer (then Graco) employees ceased working for Graco, and started working for Gama and Garraf, which compete in the same in-plant polyurethane processing equipment ("IPPE") industry. Graco claims that Gama is owned by PMC, a subsidiary of PMC Global and Garraf is owned, at least in part, by PMC Europe, and that, these **[*3]** Defendants, acting individually or in concert, are, *inter alia,* breaching their contractual duties of the sale by promoting a new competitor company, Gama. Graco sues Defendants to recoup what it argues is the full benefit of the contracts and damages arising from the loss of value of the Gusmer trade name, technology, customer relationships, and goodwill, resulting from Defendants having hired former Gusmer and Graco employees, using Graco trade secrets, and misleading customers as to the identities of the companies. Defendants argue that there is no agency relationship between their companies, that they are entitled to compete in the IPPE industry because Plaintiffs did not contract for a non-compete agreement, the former employees are not using trade secrets, but rather knowledge and skill they developed throughout their careers, and neither Defendant companies nor their employees are misleading customers. Defendants Gama and Commette have also filed counterclaims against Graco for antitrust and tort violations. This Court has jurisdiction over this action pursuant to *28 U.S.C. §§ 1331*, *1332*, *1367* and *1338*.

For the reasons that follow, Defendants' Motions are granted in part and **[*4]** denied in part, and Plaintiffs' Motion is granted in part and denied in part. Specifically, the Court grants Defendants' requests to dismiss Count Three of Plaintiffs' Complaint without prejudice and Graco's Motion to dismiss Counts One and Two of Commette and Gama's Counterclaims without prejudice, and grants Defendants' requests to dismiss Count Nine of the Complaint. The Court denies Defendants' requests to dismiss Count Six and Graco is directed to re-plead its Lanham Act claims under *15 U.S.C. § 1125(a)(1)* within ten (10) days. Further, the Court denies the parties' Motions with respect to all remaining claims.

I. Background and Procedural History

Since PMC Defendants and Garraf move to dismiss Plaintiffs' claims pursuant to *Fed. R. Civ. P. 12(b)(6)*, the following version of events assumes Plaintiffs' allegations to be true. Similarly, Defendants Gama and Commette's allegations will be taken as true on their counterclaims. The Court will only recount facts that are relevant for the purposes of deciding these Motions.

The Parties

Graco Inc., a Minnesota corporation, manufactures and distributes industrial equipment, including fluid-handling systems and components that move, measure, **[*5]** control, dispense, and apply fluids and viscous materials used in vehicle lubrication and commercial and industrial settings. Compl. P 1. Graco Minnesota Inc. ("Graco Minnesota"), also a Minnesota corporation, is a wholly-owned subsidiary of Graco, Inc. *Id.* P 2.

PMC Global, a Delaware corporation, has its principal place of business in California. *Id.* P 3. PMC Global's founder and Chief Executive Officer is Philip E. Kamins ("Philip Kamins"), its President is Mr. Kamins's son Gary E. Kamins ("Gary Kamins"), and its Executive Vice President is T.C. Cheong ("Cheong"). *Id.* PMC Europe, a Spanish corporation, is an affiliate of PMC Global. *Id.* P 4. Philip Kamins is the President of PMC Europe, and Gary Kamins and Cheong sit on PMC Europe's Board of Directors. *Id.* Philip Kamins is an executive of PMC, which is incorporated in Delaware and has its principal place of business is in California. *Id.* P 5. PMC is allegedly a subsidiary of PMC Global. *Id.*

Gama, incorporated in Delaware on July 12, 2007, has its principal place of business in New Jersey. *Id.* P 6. Gama allegedly has acted as an agent for, an instrumentality of, or in active concert and participation with Defendants PMC Global, PMC **[*6]** Europe, PMC, and Garraf. *Id.* Gary Kamins is Gama's President. *Id.* Gama allegedly does business as Gama-Europe and Garraf. *Id.* Gama is owned by PMC Global's subsidiary, PMC. *See* Commette & Gama Disclosure Statement. According to PMC Defendants, Gama was created by Commette, a former employee of Gusmer (later Graco), in October 2006 and incorporated in July 2007. PMC Dfs. Mot. at 2; Compl. P 6.

Garraf, incorporated in Spain in August 2007, is an affiliate of Gama; PMC Europe has an ownership or financial interest in Gama. Compl. P 7. Garraf allegedly "acted as an agent for, an instrumentality of, or in active concert and participation with" PMC Global, PMC Europe, PMC, and Gama. *Id.* Garraf manufactures and sells spare parts for Gusmer products, as well as spray and pour equipment for the applications of polyurethane foam and polyurea. *Id.* P 54.

Commette, a New Jersey citizen, was formerly employed by Graco's subsidiary, Gusmer, and worked for Graco under an employment and consulting agreement. *Id.* P 8. Thereafter, Commette commenced work with Gama and Garraf. *Id.* Charles Royo ("Royo") is alleged to have also signed an employment contract while working as a Gusmer and Graco employee. *Id.* P 26. **[*7]** After Royo's employment with Gusmer ended, he too was retained by Gama and Garraf as an employee or consultant. *Id.* P 58. [1]

Sale of Gusmer

PMC Global, through its wholly-owned subsidiary, Gusmer Machinery Group, Inc. ("GMG"), owned Gusmer. *Id.* P 19. PMC Europe owned Gusmer Europe, S.L. ("Gusmer Europe"), an affiliate of Gusmer. *Id.* P 20. Gusmer Corporation and Gusmer Europe (collectively "Gusmer") were two businesses involved in the manufacturing and sale of polyurethane and polyurea handling equipment. *Id.* P 21.

In 2004, PMC Global and its affiliate entities, GMG and PMC Europe ("affiliate entities"), offered Gusmer for sale. *Id.* P 24. "Gusmer was at the time the world's leading designer and manufacturer of specialized two-component dispensing equipment systems." Counterclaim P 10. In June 2004, the investment bank Greif & Co., representing PMC Global and its affiliate entities, provided a Confidential Memorandum to Graco that highlighted Gusmer's "Key Investments Considerations," which included information about Gusmer's revenue model, superior customer **[*8]** service, experienced management team, and strong relationships with customers. Compl. P 24. Gusmer Corporation had employment contracts with certain key employees that prohibited the employees from disclosing its trade secrets and confidential business information, and Commette allegedly signed such a contract on September 2, 2003. *Id.* P 25. Similarly, Gusmer Europe had employment contracts with certain key employees, which prohibited them from competing with Gusmer Europe or disclosing its trade secrets and confidential business information. *Id.* P 26. Royo allegedly signed an employment contract with Gusmer Europe on September 1, 2004. *Id.*

On February 4, 2005, Graco acquired Gusmer Corporation from PMC Global, pursuant to a Stock Purchase Agreement ("Agreement 1"), for $ 45 million in cash; Graco also acquired Gusmer Europe from PMC Global's

[1] According to PMC Defendants, Royo co-founded Garraf.. PMC Dfs. Mot. at 2. Garraf disputes this allegation. *See* Garraf Reply at 6 n. 1.

subsidiary, PMC Europe, pursuant to a Stock Purchase Agreement ("Agreement 2"), for $ 20 million in cash. Compl. PP 28-29, Exs. A & B; Dfs. Disclosure Statement. In Agreement 1, PMC Global "absolutely and unconditionally" guaranteed all of PMC Europe's obligations to Graco in Agreement 2, including the "timely observance and performance of covenants **[*9]** and agreements of such parties herein and therein" ("PMC Guaranty"). Compl. P 30, Ex. A, 10.20. Both Agreements allegedly contained a provision in which New Jersey law would apply. *Id.* PP 31-32, Exs. A & B, 10.13. [2] Pursuant to the Agreements, Graco allegedly "acquired all of Gusmer's tangible assets and all of its intangible assets, including without limitation: (a) all of the Gusmer's trade names, trademarks and copyrights identified in Section 4.14 of the Disclosure Schedules attached to and incorporated in Agreements 1 and 2 ('the Disclosure Schedules'); (b) all of the Gusmer patents, patent rights, and trade secrets identified in Section 4.15 of the Disclosure Schedules; (c) the employment agreements and confidentiality agreements identified in Section 4.15 and 4.19 of the Disclosure Statements; and (d) the goodwill of Gusmer." *Id.* P 33.

PMC Global and PMC Europe allegedly warranted that they had taken precautions to preserve Gusmer trade secrets, that Gusmer's proprietary rights "are valid and enforceable," and that Gusmer obtained confidentiality **[*10]** agreements from all persons who had access to material proprietary rights, including any trade secrets. *Id.* PP 35-36, Exs. A & B, 4.16A. Allegedly, PMC Global and its affiliates represented in their Disclosure Schedule 4.15 that all but two Gusmer employees (neither of whom is at issue here) had signed agreements to comply with company policies regarding these trade secrets. Compl. P 37. Royo had signed a Confidentiality Agreement, and pursuant to Article 4.19 of both Agreements, Graco allegedly acquired certain employment contracts, Royo's included. *Id.* PP 38-39. The assets at the heart of the transaction included Gusmer's goodwill, customer and distributor relationships, trade names and trademarks, and intellectual property. *Id.* PP 33-41. According to Graco, the parties assigned a sum certain to specific assets, including (1) $ 6,500,000 to customer relationships, (2) $ 2,740,000 to trademarks and trade names, and (3) $ 6,130,000 to proprietary technology and engineering drawings. *Id.* P 41. PMC Global and PMC Europe allegedly warranted that "no customers, distributors, sales representatives or vendors intend to cease doing business with [Gusmer] or materially alter the amount of **[*11]** the business that they are presently doing with [Gusmer]," *Id.* P 40, Exs. A & B, and Gusmer's trade names and trademarks were "valid and in full force and effect." *Id.* Exs. A & B, 4.14.

Post-Acquisition of Gusmer

Following Graco's acquisition of Gusmer in February 2005, many of Gusmer's former employees began working for Graco, including Commette and Royo. Compl. P 43. Commette and Royo became important members of Graco's management team and thus allegedly participated in and received confidential communications relating to Graco's confidential strategy, planning meetings and conversations, which were designed to transform and integrate Gusmer operations into Graco's existing business. *Id.* Commette and Royo also allegedly had access to highly sensitive, confidential, non-public, proprietary information belonging to Graco and its subsidiaries, including information regarding customers, prospective customers, business relations with customers, sales reports, strategic plans, marketing plans, product information and designs, pricing information, customer discounts and rebates, profit margins, financial reports and data, sales programs, and product engineering and design plans ("Graco Trade **[*12]** Secrets and Confidential Business Information"). *Id.* P 44. Graco "exerted considerable effort and expended significant money" to develop this information -- all of which gave Graco "an opportunity to obtain an advantage over competitors who do not know or use [it]." *Id.* P 45. This information was allegedly not well known outside of or even within Graco's businesses and Graco took steps to guard its trade secrets and confidential business information by requiring employees like Commette to confirm their confidentiality obligations by signing non-disclosure agreements. *Id.* PP 46-47. Commette allegedly signed a Non-Disclosure Agreement with Graco on May 16, 2006. *Id.* P 47. His employment and/or consulting relationships with Graco and Gusmer Corporation ended on October 20, 2006. *Id.* P 49. Royo allegedly stopped working with Graco's subsidiary, Gusmer Europe, on February

---

[2] For the purposes of this Motion, Garraf does not dispute the application of federal and New Jersey law. *See* Garraf Mot. at 2 n. 1.

9, 2006. *Id.* P 48. Royo allegedly signed an agreement not to compete with Gusmer Europe until February 9, 2008. *Id.* P 72.

Gama and Garraf Enter the Marketplace

After Commette's employment with Graco and Gusmer ended, Commette allegedly headed up Gama, the principal distributor for equipment and spare parts manufactured by **[*13]** Garraf. Compl. PP 53-54, 60. PMC Global, PMC Europe, and PMC allegedly have ownership, financial and/or business relationships with Gama and Garraf. *Id.* PP 55-56. Graco alleges that PMC Global, PMC Europe, PMC, Gama, and Garraf all knew or should have known that Commette has contractual and common-law obligations to maintain the confidentiality of the Graco Trade Secrets and Confidential Business Information, but that Defendants, through their agent, Commette, are misusing the Graco Trade Secrets and Confidential Business Information to solicit and obtain customers, some of whom were Gusmer's customers. *Id.* PP 64, 82. The same claims are made against Defendants with regard to Garraf's employment of Royo. *Id.* PP 65, 72-74. Graco, however, does not sue Royo directly in this action, and does not contend that the Court has jurisdiction over Royo, a foreign citizen.

Gama and Garraf allegedly manufacture spare parts for Gusmer products, which requires highly specialized knowledge relating to Gusmer's products' engineering and design. *Id.* P 75. Graco alleges that Gama and Garraf are using the Graco Trade Secrets and Confidential Business Information to market and sell these spare parts, and **[*14]** are directly soliciting the trade of current Graco customers, some of whom were doing business with Gusmer at the time Graco acquired Gusmer from PMC Global and its affiliates. *Id.* PP 59, 61-62, 65-71, 75, 80-83. Graco also alleges that Defendants are attempting to recapture former Gusmer business by representing that Gama and its products are the "successors" to Gusmer and the "real Gusmer," and claiming a false affiliation with the Gusmer brand, goodwill, and legacy, which belongs to Graco. *Id.* PP 84-85.

Plaintiffs' Claims

On March 14, 2008, Plaintiffs filed their Complaint. On July 24, 2008, Plaintiffs filed an Amended Complaint ("Complaint") alleging: (1) PMC Global and PMC Europe breached their contractual and related duties; (2) Commette breached his non-disclosure agreement; (3) Commette breached his duty of loyalty; (4) Defendants PMC Global, PMC Europe, PMC, Gama, and Garraf engaged in tortious inference with a prospective economic advantage and with a contract, namely Commette's alleged non-disclosure agreement; (5) PMC Global, PMC Europe, PMC, Gama and Garraf misappropriated trade secrets and misused confidential business information; (6) Defendants directly made or acted **[*15]** in concert with those making directly false or misleading statements that are likely to cause confusion as to the affiliation of Gusmer with Gama and Garraf in violation Section 43(a) of the Lanham Act, *15 U.S.C. § 1125(a)(1)*; (7) Defendants directly made, or acted in concert with those making, false or misleading statements that are likely to cause confusion as to the affiliation of Gusmer with Gama and Garraf in violation the New Jersey Fair Trade Act, *N.J.S.A. § 56:4-1*; (8) Defendants engaged in unfair competition; and (9) Defendants have been unjustly enriched from their breach of their contractual and legal obligations to Graco. *Id.* at 19-26.

Plaintiffs seek, *inter alia,* damages, an injunction, return of documents and records and forensic examination of Defendants' computers, an accounting to determine profits and damages caused by unlawful conduct, exemplary and punitive damages, costs and disbursements for this action, attorneys fees pursuant to the Agreements and the Lanham Act, treble damages, and prejudgment and post-judgment interest. *Id.* at 26-29.

On June 30, 2008, PMC Defendants filed a motion to dismiss Plaintiffs' Complaint pursuant to *Fed. R. Civ. P. 19* and *12(b)(6)*. **[*16]** On July 25, 2008, Defendant Garraf filed a motion to dismiss Plaintiffs' Complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*, joining in with PMC Defendants' Motion and supplementing it.

Counterclaims

On June 30, 2008, Defendants Commette and Gama ("Counterclaimants") filed an Answer and Counterclaims against Plaintiffs. The Counterclaimants allege that Graco, founded in 1926, is the "world leader" in fluid handling systems and components for use in vehicle lubrication and commercial and industrial settings. Counterclaim P 8; Ex. 1. In December 2004, Graco allegedly acquired Liquid Control Corporation and its subsidiary Decker Industries, a leader in lubricants and lubricant dispensing equipment. Counterclaim P 9. At the time Graco acquired Gusmer Corporation, in February 2005, Gusmer was allegedly the world's leading designer and manufacturer of specialized two-component dispensing equipment systems. *Id.* P 10. In December 2007, Graco allegedly acquired Glas-Craft, an internationally-recognized manufacturer of mixing, metering, and proportioning equipment for dispensing coating, foam, and composite materials. *Id.* P 11. Counterclaimants allege that Plaintiff, through its acquisition of these **[*17]** companies, has built a monopoly position in the IPPE market. *Id.* P 12. Counterclaimants allege that although there is a distinct market for IPPE materials and equipment, with substantial technical barriers to entry, Graco has a nearly 100% market share, with annual revenues of approximately $ 100 million per year, and no significant competitors in the IPPE space. *Id.* PP 12-14. Counterclaimants allege that Graco's conduct has had a substantial effect upon interstate trade and commerce. *Id.* P 14.

Garraf, the only other company operating within the IPPE area, asked Gama, in 2007, to assist with the distribution of Garraf's products in the United States. *Id.* PP 15-16, 18. Thereafter, Gama hired Commette, who had not received a severance package from Graco nor had he agreed that he would stay out of the IPPE market. *Id.* P 17. In October 2007, Graco allegedly sent a letter ("Letter") to all IPPE distributors carrying Graco products, which Counterclaimants claim are all IPPE product distributors nationwide, announcing a pre-emptive unilateral refusal by Graco to deal with any distributor that considers carrying Garraf products as well as its own. *Id.* P 20. Graco allegedly intended this Letter **[*18]** to deter distributors from carrying Garraf products or from doing business with Gama or Garraf. *Id.* P 21. Counterclaimants allege that since the Letter was sent, even though Garraf allegedly has a high quality product line, it has been nearly impossible for Garraf to identify distributors for its products, and existing Gama customers have stopped buying from it. *Id.* P 22. Counterclaimants aver that distributors said that they would have carried or continued to carry Garraf products but for Graco's refusal to deal with any distributor carrying competing products. *Id.* P 23. Counterclaimants allege that this Letter has directly affected Garraf's ability to distribute its products in the United States because "no IPPE distributor could risk losing the ability to sell Graco products unless the distributor intended to exit the market altogether." *Id.* P 24.

Counterclaimants further allege that Graco has engaged in other false and predatory communications intended to block Garraf products from being distributed in the United States and to destroy Gama's business, including statements questioning the viability of Gama's continued existence and the quality of Gama's product line, specifically **[*19]** that "Gama's products are based on 'old' or outmodeled Gusmer technology." *Id.* PP 26-27. In June 2008, Graco allegedly told current Gama customers and individuals within the trade that it was going to close Gama down by the end of 2008, and, as a result, if customers buy anything from Gama, they would be "stuck with it." *Id.* PP 29-31. A Graco manager allegedly contacted at least one distributor that sold both Graco and Gama products demanding that the distributor elect between the two lines, claiming that Graco does not permit its current distributors to also sell Gama's line of products; as a result, at least one distributor has dropped Gama's products. *Id.* PP 32-33. Thus, Counterclaimants allege that Graco has abused its monopoly position in the IPPE market by, *inter alia,* sending this Letter, which allegedly constitutes an illegal unilateral refusal to deal because it was sent to Graco's prospective and current customers, "including customers who were, at the time, carrying both Graco and Garraf products." *Id.* P 36. Commette and Gama allege that Graco is preventing them from competing in the IPPE market, and that consumers will be forced to pay monopoly prices because Graco is preventing **[*20]** competitors from entering the IPPE marketplace. *Id.* PP 39-40.

Commette and Gama claim that Plaintiffs (1) violated *§ 2* of the Sherman Act, *15 U.S.C. § 2*; (2) attempted and conspired to monopolize the market place; (3) engaged in tortious interference with Commette's livelihood and Gama's business; and (4) violated the New Jersey Fair Trade Act, *N.J.S.A. § 56:4-1*; (5) engaged in unfair competition; and (6) committed trade libel and disparagement. *Id.* at 53-56. Commette and Gama seek, *inter alia,* an injunction from the anticompetitive behavior and ***antitrust law*** violations, and damages, including treble actual damages under *§ 4* of the Clayton Act, *15 U.S.C. § 15*. *Id.* at 57.

On August 19, 2008, Plaintiffs filed a Motion to Dismiss the Counterclaims on the grounds that Commette and Gama do not have standing and have not adequately plead their antitrust counterclaims under *§ 2* of the Sherman Act, *15 U.S.C. § 2*. In addition, Plaintiffs move to dismiss all of the remaining state law claims pursuant to *Rule 12(b)(6)*. In the alternative, Plaintiffs move to bifurcate and stay the Counterclaim.

II. Standard of Review

When reviewing a motion to dismiss on the pleadings, courts "accept all factual allegations **[*21]** as true, construe the complaint in the light most favorable to the plaintiff, and determine whether, under any reasonable reading of the complaint, the plaintiff may be entitled to relief." *Phillips v. County of Allegheny, 515 F.3d 224, 233 (3d Cir. 2008)* (citation and quotations omitted). Recently, in *Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 167 L. Ed. 2d 929 (2007)*, the Supreme Court clarified the 12(b)(6) standard. Specifically, the Court "retired" the language contained in *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*, that "a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Id. at 1968* (quoting *Conley, 355 U.S. at 45-46*). Instead, the factual allegations set forth in a complaint "must be enough to raise a right to relief above the speculative level." *Id. at 1965*. As the Third Circuit has stated, "[t]he Supreme Court's *Twombly* formulation of the pleading standard can be summed up thus: 'stating . . . a claim requires a complaint with enough factual matter (taken as true) to suggest' the required element. This 'does not impose a probability **[*22]** requirement at the pleading stage,' but instead 'simply calls for enough facts to raise a reasonable expectation that discovery will reveal evidence of' the necessary element." *Phillips, 515 F.3d at 234* (quoting *Twombly, 127 S.Ct. at 1965*).

III. Discussion

A. Defendants' Motion to Dismiss Plaintiffs' Claims

1. Rule 19 Analysis

As a preliminary matter, PMC Defendants argue that Plaintiffs' Complaint must be dismissed in its entirety, pursuant to *Fed. R. Civ. P. 19*, for failure to join Royo as a party. PMC Defendants claim Royo is necessary and indispensable, because "[e]ach cause of action focuses on Mr. Royo's alleged misappropriation and sharing of trade secrets in active concert with other defendants" and "Royo is named directly in 20 separate paragraphs and referenced indirectly throughout the Complaint." PMC. Dfs. Br. at 3. Royo, a Spanish citizen, is not subject to personal jurisdiction in New Jersey.

Fed. R. Civ. P. 19 involves a two-step process to determine when joinder of a particular party is compulsory. *See Janney Montgomery Scott, Inc. v. Shepard Niles, Inc., 11 F.3d 399, 404 (3d Cir. 1993)*. First, a court must "determine whether a party should be joined if 'feasible' under *Rule 19(a)*." **[*23]** *Id.* If the party should be joined, but joinder is not feasible because it would destroy diversity, or the court lacks personal jurisdiction over the absentee, then the court must "determine whether the absent party is 'indispensable' under *Rule 19(b)*." *Id.* If the party is "indispensable," the action cannot proceed. *Id.; see also Wilson v. Canada Life Assurance Co., No. 08-1258, 2009 U.S. Dist. LEXIS 16714, at *7 (E.D. Pa. Mar. 3, 2009)*.

The Court must first determine whether Royo, a former Gusmer and Graco employee and current Garraf employee is a "necessary" party who must be joined under *Rule 19(a)*, if joinder is feasible. [3] *Rule 19(a)* provides that:

---

[3] *Rule 19* no longer uses the word "necessary," but rather refers to parties who should be joined if feasible. *See Provident Tradesmens Bank & Trust Co. v. Patterson, 390 U.S. 102, 116 n. 12, 88 S. Ct. 733, 19 L. Ed. 2d 936 (1968)* ("Where the new

> A person who is subject to service of process and whose joinder will not deprive the court of subject-matter jurisdiction must be joined as a party if: (A) in that person's absence, the court cannot accord complete relief among existing parties; or (B) that person claims an interest relating to the subject of the action and is so situated that disposing of the action in the person's absence may: (i) as a practical matter impair or impede the person's ability to protect the interest; or (ii) leave an existing party subject to a substantial **[*24]** risk of incurring double, multiple, or otherwise inconsistent obligations because of the interest.

Fed. R. Civ. P. 19(a)(1). Under *Rule 19(a)*, the Court determines whether its can provide complete relief to the parties to the action in the absence of the party not joined. *Fed. R. Civ. P. 19(a)(1)*. "Under *Rule 19(a)(1)*, the Court must consider whether--in the absence of an un-joined party--complete relief can be granted to the persons already parties to the lawsuit. The effect that a decision may have on an absent party is immaterial." *Huber v. Taylor, 532 F.3d 237, 248 (3d Cir. 2008)*.

PMC Defendants argue that complete relief cannot be afforded because Royo, who is not a party to this action, could continue to use Graco's trade secrets by "simply seek[ing] another distributor or import his products into the United States directly." PMC Dfs. Mot. at 5. In addition, PMC Defendants argue that the requested injunction will not stop the continued use of alleged trade secrets by Royo. *Id.* at 3-6 (relying largely on *Synygy, Inc. v. ZS Associates, Inc., No. 07-3536, 2008 U.S. Dist. LEXIS 33285, 2008 WL 1820936, at *2 (E.D. Pa. Apr. 23, 2008)*, *appeal docketed,* No. 08-2355 (3d Cir. May 22, 2008), and *Torrington C. v. Yost, 139 F.R.D. 91 (D.S.C. 1991))*. Plaintiffs, however, argue that their current claim is not that Royo is *personally* manufacturing or distributing any products, but that Garraf and Gama are engaging in such activity. Pl. Opp. at 48. Thus, whether Graco can get relief against Royo if he ever personally engages in future conduct that would give rise to a new and independent claim is not at issue here. *Cf. Huber, 532 F.3d at 251* (holding that concern about **[*26]** possible issue preclusion in a potential future lawsuit against joint tortfeasor was "too speculative"). Moreover, because Royo is not a party, the "complete relief" inquiry must focus exclusively on those who are parties to the action. *Id. at 248*.

Plaintiffs argue that they can obtain complete relief against the current parties because only one of their nine claims is for misappropriation of trade secrets and most claims focus on Defendants' alleged violations of their obligations to Plaintiffs, such as breach of contract and misrepresentation, and do not depend on Royo's actions. Pl. Opp. at 49. Graco further claims that Royo's future conduct is irrelevant to whether complete relief may be afforded based on Defendants' use of its trade secrets because, if Graco wins, then it can be granted an injunction and damages against Royo's employer, Garraf, and other Defendants, thereby enjoining these Defendants' employees, including Royo, from further divulging and exploiting Graco's trade secrets. *See* Pl. Opp. at 49; *Huber, 532 F.3d at 248*. Because Plaintiffs can get complete relief for their claims against the named Defendants in this action, Royo is not a necessary party under *Rule 19(a)(1)(A)*. **[*27]** *Cf. Rosenzweig v. Brunswick Corp., No. 08-807, 2008 U.S. Dist. LEXIS 63655, 2008 WL 3895485, at *6 (Aug. 20, 2008)* (finding that the absent party -- a party to the disputed contract -- was necessary, and ultimately, indispensable because the court could not provide complete relief in the signatory's absence).

The Court must then consider the effect, if any, that resolution of the dispute among the named parties may have on an absent party, in this case Royo, under *Rule 19(a)(1)(B)*. *Huber, 532 F.3d at 248*. Plaintiffs assert, and Defendants do not dispute, that Defendants are liable individually and as principals under *respondeat superior* for their agents' misconduct within the course and scope of the agents' employment. Courts have determined that under a theory of *respondeat superior,* "there is no requirement that the plaintiff join as a defendant the individual upon whose act or failure to act vicarious liability is predicated. Indeed, the plaintiff has the option to sue the party vicariously liable for the conduct of an agent in one lawsuit and thereafter, pursue the agent in a separate suit. In such cases, the concept of mandatory joinder does not apply." *Marion v. Borough of Manasquan, 231 N.J. Super.*

---

version (of the Rule) emphasizes the pragmatic consideration of the effects of the alternatives of proceeding or dismissing, the older version tended to emphasize classification of parties as 'necessary' or 'indispensable.'"'); *Janney, 11 F.3d at 404 n. 4* ("The term necessary in referring to a *Rule 19(a)* analysis harks back to an earlier version of *Rule 19*. It survives in case law at the price of **[*25]** some confusion."). The parties, however, discuss Royo's joinder in this action in terms of whether he is "necessary" and "indispensable."

320, 327-28, 555 A.2d 699 (App. Div. 1989). **[*28]** Moreover, in their reply, Defendants do not dispute that Royo is not necessary where there is *respondeat superior* liability. Therefore, Plaintiffs argue, Royo need not be joined with regard to Plaintiffs' claims grounded in vicarious liability.

The inquiry for the Court focuses on Rule 19(a)(1)(B)(i), whether a decision in this case will, as a practical matter, impair or impede Royo's ability to protect his interest. Plaintiffs argue that Royo lacks sufficient interest in this litigation that would require him to be joined if feasible under Rule 19(a)(1)(B)(i). Plaintiffs state that any frustration of Royo's personal business expectations based on an agreement to which his company (Garraf) is a party, is not enough to satisfy this prong of Rule 19. *See* Pl. Opp. at 50 (citing to Mastercard Int'l Inc. v. Visa Int'l Serv. Ass'n, Inc., 471 F.3d 377, 387 (2d Cir. 2006) ("It is not enough under [Rule 19(a)(1)(B)(i)] for a third party to have an interest, even a very strong interest, in the litigation."); Janney Montgomery Scott, Inc., 11 F.3d at 407). PMC Defendants argue that Royo is necessary because he maintains an interest that would not be represented in this action, and his ability **[*29]** to protect his interest would be impaired or impeded if he is not joined here. PMC Dfs. Mot. at 5. Specifically, PMC Defendants argue that for a finding of liability against them, the Court first will need to assess the validity and enforceability of Royo's employment agreements and then determine whether Royo is guilty of trade secret theft. PMC Dfs. Mot. at 5 (citing to Synygy, 2008 U.S. Dist. LEXIS 63655, 2008 WL 1820936, at *2).

Similar to this case, where Plaintiff, in addition to this action, has separately sued Royo in Spain, in the *Synygy* case, Synygy sued a former employee's U.S.-based employer, claiming misappropriation of Synygy trade secrets, and also sued the employee in India. There, the court dismissed the action for failure to add an indispensable party citing the possibility of inconsistent or double obligations. PMC Defendants argue that Graco's claims implicate Royo and that absent Royo's participation in this case, there is a significant possibility that his acts will be construed differently in U.S. and Spanish courts and "a judgment against his U.S. distributor would brand him an 'infringer' without ever affording him his day in court." PMC Dfs. Mot. at 5-6. In addition, Defendants claim that **[*30]** a resolution of the Spanish case in favor of Royo could be dispositive here, eviscerating Graco's theft allegations and granting Garraf freedom to operate. Defendants also rely on *Torrington,* where the court dismissed the action in which the plaintiff sued the ex-employee and not his new company on a trade secret dispute because both were necessary parties to the resolution. Torrington, 139 F.R.D. at 92-93. Defendants argue that the distribution agreement between Royo's company and Gama is similar to the agreement in dispute in *Torrington;* however, in this case, Royo's company, Garraf, is a named defendant and will have the opportunity to defend the case.

In sum, PMC Defendants assert that Royo would be unable to protect his "employment with defendants in its current form and [his] interest in the resolution of the charges that [he] allegedly removed and converted trade secrets." Home Am. Credit, Inc. v. Vermillion, No. 97-2139, 1997 U.S. Dist. LEXIS 19561, 1997 WL 793047, at *4 (E.D. Pa. Dec. 10, 1997) (dismissing the complaint on the grounds that employees alleged to have misappropriated trade secrets are necessary parties so they may protect their interests). Similarly, in this case, Royo's conduct will be at **[*31]** issue because Graco's trade secret claims against Defendants are based, at least in part, on Royo's actions.

However, the Third Circuit, in *Huber,* has already determined that it is inappropriate for a court to look at privity, for issue preclusion purposes, and the collateral estoppel effect on, or of, a potential future action when making a determination of the necessity of a party that is based on the absent party's interest, under Rule 19(a)(1)(B)(i). Huber, 532 F.3d at 250-51 ("[T]he *Janney* court noted that, given the highly factual nature of a privity analysis, courts engaging in Rule 19 analysis should not 'theorize' as to whether an absent party is in privity with a party to an action because such an analysis would be premature."). Moreover, in *Huber,* the Third Circuit emphasized that as it had already held in *Janney,* where the preclusive effect of an action on any related litigation is speculative -- as it is in the instant case -- joinder of an absent party is not compulsory under this provision of Rule 19. *Id.* Thus, this Court cannot speculate on the preclusive effect this litigation might have on an action in Spain. In addition, Royo's employment itself would not necessarily **[*32]** be jeopardized based on an outcome of this action. [4] Therefore, Royo does not have an interest that will be impaired or impeded requiring him to be joined, if feasible, in this case.

Further, Plaintiffs argue that Defendants cannot demonstrate that any of the current parties will be subject to inconsistent obligations if Royo is not joined. *Fed. R. Civ. P. 19(a)(1)(B)(ii)*. Defendants do not argue that resolution of this action could subject them to double, inconsistent, or multiple legal obligations. Defendants, relying on *Torrington* and *Synygy,* assert that Royo could be subject to a substantial risk of inconsistent obligations given Graco's suit against Royo in Spain. PMC Dfs. Mot. at 5. However, this misconstrues *Rule 19(a)(1)(B)(ii)*, which considers the risk to the "*existing part[ies]*" of "incurring double, multiple, or otherwise inconsistent obligations because of the [absent person's] interest", **[*33]** not the risk to the absent party. *See also* *Am. Home Mortgage Corp. v. First Am. Title Ins. Co., No. 07-1257, 2007 U.S. Dist. LEXIS 83337, 2007 WL 3349320, at *7 (D.N.J. Nov. 9, 2007)* (explaining that "*Rule 19(a)(2)(ii)* [now *Rule 19(a)(1)(B)(ii)*] calls for the Court to examine whether proceeding without joining the absent parties will leave *the parties* 'subject to a substantial risk of incurring double, multiple, or otherwise inconsistent obligations.'"). There is no contention that any Defendants would be subject to inconsistent obligations in this case. Indeed Defendants would not. Therefore, the Court finds that Royo is not a necessary party under *Rule 19(a)*, and the Court need not conduct a *Rule 19(b)* inquiry to determine if Royo is indispensable. [5] Accordingly, the Court denies PMC Defendants' request to dismiss Plaintiffs' Complaint pursuant to *Rule 19*.

---

[4] Royo's non-compete agreement with Graco ended on February 9, 2008. Compl. P 72. Thus, there is no current bar to his employment in the IPPE group of products. Hence, Garraf may continue to employ Royo so long as he works in a lawful manner, and does not disclose Graco trade secrets, if any.

[5] However, even if Royo is necessary under *Rule 19(a)*, he is not indispensable under *Rule 19(b)*. In this case, the parties agree that there is no personal jurisdiction over Spanish employee Royo, *see* Pl. Opp. at 52-54; therefore, joinder is not feasible and the Court "determine[s] whether, in equity and good conscience, the action should proceed among the existing **[*34]** parties or should be dismissed" pursuant to *Rule 19(b)*. *Fed. R. Civ. P. 19(b)*. The Rule lists four non-exhaustive factors that the Court should weigh, including: "(1) the extent to which a judgment rendered in the person's absence might prejudice that person or the existing parties; (2) the extent to which any prejudice could be lessened or avoided by: (A) protective provisions in the judgment; (B) shaping the relief; or (C) other measures; (3) whether a judgment rendered in the person's absence would be adequate; and (4) whether the plaintiff would have an adequate remedy if the action were dismissed for nonjoinder." *Fed. R. Civ. P. 19(b)*; *see* *Gardiner v. Virgin Islands Water & Power Authority, 145 F.3d 635, 640, 39 V.I. 519 (3d Cir. 1998)*.

With respect to the first factor, PMC Defendants claim that Royo would be prejudiced by exposure to inconsistent obligations if judgment were rendered in his absence. Plaintiffs, however, contend that resolution of "this action would not subject Royo to inconsistent obligations due to the action pending in Spain against him[because: (1)] the Spanish action deals only with Royo's obligations under his severance agreement with Graco/Gusmer and not whether his **[*35]** company used Graco's trade secrets or violated the rights at issue in this lawsuit[; and (2)] *Rule 19* is simply not supported by 'the real possibility that one court could find [Defendants] liable while another court was finding [the absent party] not liable in separate proceedings to which the rules of claim or issue preclusion do not apply.'" Pl. Opp. at 52-53 (quoting *General Refractories Co. v. First State Ins. Co., 500 F.3d 306, 318 (3d Cir. 2007)* (internal quotations and citations omitted)). Plaintiffs, however, do not provide the Court with a copy of the Complaint or Certification with regard to the subject matter of the Spanish action. The Court cannot rely on Plaintiffs' limited allegations in its Opposition. Therefore, the Court is unaware of what the implications are of the Spanish action.

In addition, PMC Defendants contend that Royo's and Garraf's interests may or may not align, so "there is no certainty that the interests of [Royo] will be adequately represented" if this litigation proceeds. *See* *Home Am. Credit, 1997 U.S. Dist. LEXIS 19561, 1997 WL 793047, at *4*. However, if a potential defendant does not wish to intervene and be a party to the suit, this fact "strongly suggest[s] that its interests **[*36]** will not be impeded if the suit goes forward without [him]." *Gardiner, 145 F.3d at 641*. Royo has not sought to intervene here. Accordingly, "there is little danger of prejudice to [Royo]." *Id.* Thus, the first factor weighs against indispensability.

With respect to the second and third factors, Graco asserts that it is interested in obtaining relief against the named parties, including "Royo's company" in the form of an injunction and monetary relief. Graco contends this remedy will be adequate. PMC Defendants, however, argue that an injunction against Garraf would similarly enjoin Royo, without providing him the opportunity to defend himself with regard to any disclosed trade secrets. Defendants rely on *Home Am. Credit* for support. If, however, Royo

2. Agency Relationship: PMC as a Party & Non-Contract Claims Against Defendants PMC Global and PMC Europe

PMC Defendants move to dismiss PMC as a party in this suit because: PMC is not a party to any of the allegedly breached contracts, it is not in privity with Commette or Royo, and Plaintiffs do not allege any acts or omissions by PMC. *See* PMC Dfs. Mot. at 9; Compl. PP 28-29. PMC Defendants argue that although Graco attempts to implicate PMC by claiming Royo, Commette, Gama, or Garraf acted as PMC's agents, Graco fails to allege any facts that suggest PMC "control[led] the day-to-day time, manner, and method of executing the work" of any other Defendant. *Seltzer v. I.C. Optics, Ltd., 339 F. Supp. 2d 601, 610 (D.N.J. 2004)*. PMC Defendants contend that unless an agency relationship is established, PMC cannot be held liable for the tortious acts of any parent corporation, subsidiary, sister corporation, or person. *Id. at 609-610*.

Similarly, PMC Defendants argue that Graco has not alleged any acts or omissions directly committed by PMC Global or PMC Europe that are unrelated to the breach of contract claim, (Counts Four-Nine), nor has Graco alleged **[*39]** any facts suggesting an agency relationship between Royo, Commette, Gama and/or Garraf and PMC Global. *See* PMC Dfs. Mot. at 10. In its Reply, Garraf also complains that Graco has failed to allege any facts to support its conclusory allegations that Garraf is working in "active concert and participation" with the other defendants. Garraf Reply at 15. [6]

An agency relationship exists when one party consents to have another act on its behalf, with the principal or master controlling and directing the acts of the agent. *Seltzer, 339 F. Supp. 2d at 609*; *Sears Mortgage Corp. v. Rose, 134 N.J. 326, 634 A.2d 74 (1993)*. The Third Circuit has recognized that a "servant" and an "independent contractor" are distinct under the agency doctrine. *AT & T v. Winback and Conserve Program, Inc., 42 F.3d 1421, 1435 (3d Cir. 1994)*. "A master-servant relationship is created if the employer assumes the right to control **[*40]** the time, manner, and method of executing the work, as distinguished from the right merely to require certain definite results in conformity to the contract. On the other hand, an independent contractor is not subject to that degree of physical control, but is only subject to the general control and direction by the principal . . . ." *Id.* (internal citations and quotations omitted). A principal is vicariously liable for the tortious acts of the servant, but is not similarly liable for those of the independent contractor. *See Id.*

"To hold a principal liable for the acts of its subsidiaries under general agency law, total domination over the subsidiary need not be proven." *Expediters Int'l of Washington, Inc. v. Direct Line Cargo Mgmt. Servs., Inc., 995 F.*

---

finds that he needs to "defend himself" in this action with respect to disclosing any alleged trade secrets, he may intervene. *Gardiner, 145 F.3d at 641*. Otherwise, the Court can shape the relief here, because Royo's agreement not to compete ended on February 9, 2008. Compl. P 72. Therefore, proceeding here will not affect Royo's employment on these grounds. Therefore, the second and third factors weigh against indispensability.

With respect **[*37]** to the fourth factor, the Plaintiff argues that when there is a lack of a practical "assurance that the plaintiff, if dismissed, could sue effectively in another forum where better joinder would be possible," this consideration "counsels strongly against dismissal." *Gen. Refractories Co. v. First State Ins. Co., 500 F.3d at 306, 321 (3d Cir. 2007)* (citing *Gardiner, 145 F.3d at 642*). In this case, there are multiple parties domestic and foreign, who have contracted to apply New Jersey law, and thus, it appears that there is not another more effective, appropriate, or practical forum where better joinder would be possible. This factor weighs strongly against dismissal and against indispensability. *See Id.*

Moreover, PMC Defendants fail to put forth any persuasive arguments for a finding that Royo is indispensable. In light of Third Circuit precedent, the Court agrees that the indispensability factors pursuant to *Rule 19(b)* weigh against dismissal for failure to join an indispensable party. Accordingly, because the action can proceed in equity and good conscience, Royo is not necessary or indispensable under *Rule 19(a)* or *19(b)*, respectively, the Court denies PMC Defendants' motion to dismiss **[*38]** Plaintiffs' Complaint pursuant to *Rule 19*.

[6] Garraf asserts that allegations that Garraf is an "affiliate" of Gama, that PMC Europe has an ownership or other financial interest in Garraf, or that PMC Europe is a partial owner of the real estate where Garraf's headquarters is located, insufficient to establish an agency relationship. Compl. PP 7, 57.

Supp. 468, 481-82 (D.N.J. 1998) (citing *Phoenix Canada Oil Co. v. Texaco, Inc., 842 F.2d 1466, 1477 (3d Cir. 1988))*. However, there must be "a relationship between the corporations and the cause of action. Not only must an arrangement exist between the two corporations so that one acts on behalf of the other and within usual agency principles, but the arrangement must be relevant to the plaintiff's claim of wrongdoing." *Phoenix Canada Oil Co., 842 F.2d at 1477*. **[*41]** Whether there are sufficient relationships with and control over affiliates for the purposes of proving agency is a question of fact. *Expediters Int'l, 995 F. Supp. at 481-82* (denying summary judgment on misappropriation of trade secret claims where the defendant argued it should not be held liable for actions of its related company, because the court could not decide, as a matter of law, that the defendant did not act as a principal to influence or control the business practices of its affiliates, where the "self-characterized 'family of companies,' jointly participated in freight dealings and shared both stock ownership and employees").

In this case, Plaintiffs allege that Gama, Garraf, and Commette are acting as agents for, instrumentalities of, or in active concert and participation with PMC Global, PMC Europe, and PMC. Compl. PP 6, 7, *see also Id.* PP 58, 59-65, 74, 82, 85, 102. Plaintiffs allege that PMC Global, PMC Europe, and PMC are directly related or affiliated with Gama, Garraf, and Commette. *Id.* PP 3-7, 55-57. Graco has alleged facts to show that PMC Global, PMC Europe, and PMC dominate the activities of their subsidiaries or affiliate companies, Garraf and Gama. *See, e.g.,* ***[*42]*** *Id.* PP 3-7 (detailing overlapping officers and financial interests and alleging that Gama and Garraf are instrumentalities of PMC Global, PMC Europe, and PMC); *Id.* PP 55-57 (explaining that PMC Europe is the owner of the real estate where Garraf is located and that PMC Global or PMC own the real estate where Gama is located). Plaintiffs argue that "reasonable inferences lead to the conclusion that PMC Global's use of its subsidiaries and affiliates is integral to its scheme to inappropriately take back what it has sold." Pl. Opp. at 43. On a motion pursuant to Rule 12(b)(6), the Court must accept the allegations in Plaintiffs' Complaint as true. Throughout their Complaint, Plaintiffs describe a scheme in which these related corporate defendants allegedly worked closely with one another to accomplish a common goal of promoting a new business called "Gama." Plaintiffs argue that Gama represents a contraction of the first two letter of Garraf Maquinaria, which manufactures Gama products in Spain. *Id.* at 41. Because the determination of whether there is a sufficient relationship with or control over affiliates for the purposes of proving agency is a question of fact, the Court must deny **[*43]** Defendants' request to dismiss PMC as a Defendant and the non-contractual claims, Counts Four-Nine, against PMC Global and PMC Europe. *See Expediters Int'l, 995 F. Supp. at 481-82*. Moreover, it would be inappropriate for the Court to make a finding regarding the agency relationship, or lack there of, with respect to any of the defendants on this motion based on Plaintiffs' allegations.

In their Opposition, Plaintiffs further claim that they have sufficiently alleged a scheme in which PMC Global, PMC Europe, and PMC may also be liable under the doctrine of alter ego and civil conspiracy, in addition to agency principles. *See* Pl. Opp. at 42. Plaintiffs, however, did not plead theories of alter ego or conspiracy in their Complaint. Thus, they are not bases for liability in this case and the Court need not address them further.

3. Count One: Breach of Contract and Related Duties Against PMC Global and PMC Europe

Defendants move to dismiss Plaintiffs' claims that Defendants PMC Global and PMC Europe breached their contractual obligations and related duties on the grounds that Defendants' alleged acts did not violate the PMC Guaranty or covenants of the Stock Purchase Agreements ("SPAs"). PMC **[*44]** Defendants argue that Graco's claims are based on SPAs that are fully integrated and their "terms relate to the transfers of assets; real property leases; intercompany accounts; employee benefit plans; access to records; domain name; transition services in China; and management agreements." PMC Dfs. Mot. at 11. Defendants assert that the SPAs do not mention anything about the right of PMC Global or PMC Europe to re-enter the IPPE business. Therefore, Defendants posit that even if Graco's allegations that PMC Global or PMC Europe solicited customers, retained former Gusmer employees, and used trade secrets and other proprietary information, Compl. P 88, were true, nothing in the SPAs prevent such behavior. Instead, Defendants argue that Graco is unable to identify how the PMC Guaranty or covenants of the SPAs were allegedly breached.

Plaintiffs complain that Defendants launched Gama, with the explicit objective of recapturing Gusmer's brand identity and trade, which Graco had purchased from PMC Global and PMC Europe for $ 65 million. In so doing, Plaintiffs contend that PMC Global and PMC Europe failed to perform material obligations required under the contracts, and thus, they breached **[*45]** the SPAs. Specifically, Plaintiffs also argue that Defendants breached New Jersey's implicit contractual obligation of good faith and fair dealing.

To state a claim for breach of contract, the plaintiff must allege (1) a contract between the parties; (2) a breach of that contract; (3) damages flowing therefrom; and (4) that the party stating the claim performed its own contractual obligations. *Frederico v. Home Depot, 507 F.3d 188, 203 (3d Cir. 2007)*. Furthermore, "every contract imposes on each party the duty of good faith and fair dealing in its performance and its enforcement." *Pickett v. Lloyd's & Peerless Ins. Agency, Inc., 131 N.J. 457, 467, 621 A.2d 445 (1993)*. This implicit duty requires that "neither party shall do anything which will have the effect of destroying or injuring the right of the other party to receive the fruits of the contract." *Sons of Thunder, Inc. v. Borden, Inc., 148 N.J. 396, 420, 690 A.2d 575 (1997)* (internal citations and quotations omitted). A defendant who acts with improper purpose or ill motive may be found liable for breaching the implied covenant if the breach upsets the plaintiff's reasonable expectations under the agreement. *See Intarome Fragrance & Flavor Corp. v. Zarkades, No. 07-873, 2008 U.S. Dist. LEXIS 97631, 2008 WL 5109501, at *6 (D.N.J. Dec. 2, 2008)* **[*46]** (citing *DiCarlo v. St. Mary Hosp., 530 F.3d 255, 267 (3d Cir. 2008))*. The defendant need not violate an express term of a contract to be held liable for a breach of the covenant of good faith and fair dealing. *See DiCarlo, 530 F.3d at 267*.

In this claim, Plaintiffs allege that Defendants PMC Global and PMC Europe continued to use Gusmer's assets that should have been transferred to Graco, such as Gusmer's customer relationships, goodwill, trade names, trade secrets, and key employment agreements, which Defendants allegedly now use to promote Gama. Compl. PP 8, 33-41, 47, 64-65, 75, 77, 79, 80-85, 88. Defendants do not contest the validity of the underlying contract. Rather, PMC Defendants argue that the Sale Agreements are silent as to the right of PMC Global and PMC Europe's to re-enter the IPPE business. Graco responds that Defendants create a straw man that the Court should reject because, simply put, Defendants cannot use assets for Gama that they previously sold to Graco. Plaintiffs contend that Defendants' conduct violates their implied contractual duties as sellers by soliciting former Gusmer distributors and customers, and deceiving customers by asserting an affiliation with **[*47]** Gusmer. Plaintiffs rely on *Reardon Laundry Co. v. Reardon, 97 N.J. Eq. 356, 357-58, 2 N.J. Misc. 550, 128 A. 482 (E. & A. 1925)* and *Hilton v. Hilton, 89 N.J. Eq. 182, 186-87, 104 A. 375 (E. & A. 1918)* for the proposition that New Jersey has long prohibited the seller of a business from soliciting the trade of previous customers.

Defendants counter that these cases actually reject overly broad and unreasonably implied restrictions on competition; *Hilton* and *Reardon* only addressed a seller's duty not to solicit former customers when the goodwill of a business is sold. PMC Defendants argue that a seller has no non-compete obligation unless the buyer bargained for one and that Graco did not bargain for one here. PMC Dfs. Reply 1-2. [7] Defendants claim that PMC Global and PMC Europe, the "sellers" in the Graco-Gusmer acquisition, are not soliciting former Gusmer customers, but rather the seller about which Graco complains is Gama. Defendants contend that Gama is a distinct legal entity that had nothing to do with the Graco-Gusmer acquisition. Nonetheless, Plaintiffs assert that Gama is an agent for or works in active concert and participation with PMC Global, PMC Europe, and PMC. *See* Part III.A.2., *supra.* Whether Gama was or is working **[*48]** as an agent for PMC Global and PMC Europe or independently from them is a question of fact, which the Court will not address on a motion to dismiss. *See Id.*

First, Plaintiff alleges a breach of contract because Defendants, individually or through their agents, are re-entering the IPPE business. Defendants correctly argue that even if they were engaged in such behavior, Plaintiffs did not contract for a non-compete agreement and the SPAs are fully integrated. *See* Ex. A, 10.7 & Ex. B, 10.7 ("10.7 Entire Agreement. This Agreement, including the Disclosure Schedule and Exhibits hereto, contains the sole, only, and entire agreement of the parties hereto relating to the subject matter hereof and correctly sets forth the rights,

[7] Defendants also argue that any attempt to restrain Commette should be summarily rejected because a "former employee cannot be enjoined from using his or her experience in the industry as a basis for earning a living." *Subcarrier Communications, Inc. v. Day, 299 N.J. Super. 634, 643, 691 A.2d 876 (App. Div. 1997)*. This argument, however, is irrelevant to Count One of Plaintiff's Complaint.

duties, and obligations of each to the other of this date. Any prior agreements, promises, **[*49]** negotiations, practices, or representations not expressly set forth in this Agreement are of no force or effect."). [8] Therefore, Plaintiffs cannot allege a breach of contract claim based solely on Defendants' alleged re-entering of the IPPE market.

Second, Plaintiffs allege that Defendants breached their Guaranty by soliciting customers, retaining former Gusmer employees, and using trade secrets and other proprietary information. Defendants argue that even if these contentions were true, this does not violate their SPAs. The Court agrees. The representations in the SPAs in that regard were made by Defendants PMC Global and PMC Europe at the time the contract was signed. *See, e.g.,* Ex. A 4.14-4.16A, 4.18-4.20. Plaintiffs do not allege or even argue that at the time Defendants PMC Global and PMC Europe entered into the Agreements with Plaintiffs, that **[*50]** Defendants knew of any customers that intended to cease doing business with Gusmer, that any employees intended to leave Gusmer, that the Gusmer name would have in any way been devalued, or that Defendants intended to compete with Graco. Therefore, Plaintiffs cannot allege a breach of contract claim based on the PMC Guaranty.

Third, Plaintiffs' breach of contract claim is based on whether Plaintiffs contracted with Defendants for the sale of Gusmer's "goodwill." Specifically, Plaintiffs argue Defendants failed to transfer Gusmer's goodwill because Defendants are riding on the coattails of the Gusmer name. However, the SPAs are silent as to goodwill. The Supreme Court has defined goodwill as "the expectancy of continued patronage." *Newark v. Morning Ledger Co. v. United States, 507 U.S. 546, 555, 113 S. Ct. 1670, 123 L. Ed. 2d 288 (1993)* (citations omitted). In addition, the Supreme Court of New Jersey has stated that goodwill consists of:

> . . . the right to continue the business at the same place in which it has been established and where its reputation has been made, carrying with it the probability that old customers will continue to resort to the old place for the purpose of making their purchases, notwithstanding the **[*51]** change in the name under which the business has been carried on, so long as the service remains satisfactory and the standard of the goods sold is maintained . . .

Dugan v. Dugan, 92 N.J. 423, 430, 457 A.2d 1 (1983). Recently, in *Gettinger v. Magnetic Services, Inc., No. 07-3015, 2008 U.S. Dist. LEXIS 80055, 2008 WL 4559758, at *2-3 (D.N.J. Oct. 8, 2008)*, another court in this District found that summary judgment was inappropriate because there was a genuine issue of material fact as to whether goodwill existed or had value where the agreement was silent on the issue. In *Gettinger,* the court held that whether or not goodwill existed was fact specific, and based on the pleadings, a reasonable jury could find that the purchaser, who provided the same services as the seller, at the same location, to the same customer, had an expectation of continued patronage from that customer. *See Id.* (relying on the stated elements of the *Dugan* court). Thus, the court determined that goodwill could exist even where a contract is silent on the issue.

Similarly, in the instant case, Graco has pled that it purchased the goodwill of Gusmer in its Agreements with PMC Global and PMC Europe. Compl. P 33. PMC Defendants, however, argue that goodwill **[*52]** was not part of the fully integrated contract and thus Plaintiffs are unable to make out a breach of contract claim here. However, the Agreements include provisions that no customers, distributors, sales representatives or venders intend to cease doing business with Gusmer, that all of the Gusmer's trade names, trademarks and copyrights are in full force and effect with no pending or threatened lawsuits, that all of the Gusmer patents, patent rights, and trade secrets are protected and that employees have signed agreements and confidentiality agreements and that none intend to leave. Complaint P 33; Exs. A & B, Disclosure Schedules 4.14-4.15, 4.18-4.20. Taking Plaintiffs' allegations as true,

---

[8] When a plaintiff's claims are based upon documents that are expressly relied upon or integral to the complaint, the court may consider such documents on a motion to dismiss. *See Adamson v. Ortho-McNeil Pharm., Inc., 463 F. Supp. 2d 496, 500 (D.N.J. 2006)* (citing *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1426 (3d Cir. 1997))*.

Plaintiffs allege the expectancy of continued patronage with Gusmer customers and thus, state a claim for breach of contract based on goodwill here. [9]

The only remaining issue with respect to this count is whether the manner in which Defendants competed can constitute a violation by PMC Global and PMC Europe of their implied duties of good faith and **[*53]** fair dealing. Plaintiffs argue that "it is reasonable to infer that one who buys a business for $ 65 million (including its protected trade secrets, a product line, a distribution network, a customer base, and the right to control a well-known brand) would reasonably expect the seller not to devalue the acquisition (by utilizing trade secrets in order to launch a competitive business that features a knock-off product line with a claimed affiliation to the sold company's brand and by targeting the sold company's customer base)." Pl. Opp. at 17-18. Plaintiffs plead that "the Sale Agreements expressly transferred to Graco the following assets of that company, among others: (1) Gusmer's customer relationships; (2) Gusmer's employment agreements; and (3) Gusmer's intellectual property and proprietary information." Compl. PP 33-41. Graco alleges that Defendants are now soliciting Gusmer's customers, *see Id.* PP 80-83; employing persons bound by non-disclosure agreements, *see Id.* PP 8, 47, 64; and using Gusmer's intellectual property and proprietary information to produce and distribute competing products. *See Id.* PP 75, 77, 79, 82.

Plaintiffs argue that they have adequately pled a claim for **[*54]** violating the implied contractual obligation of good faith and fair dealing because PMC Global and PMC Europe deny Graco the value of its purchase, by "keep[ing] for [themselves] the essential thing [they] sold, and also keep the price [they] got for it . . ." *Levitt Corp. v. Levitt, 593 F.2d 463, 468 (2d Cir. 1979)*. While the duty of good faith and fair dealing cannot alter the clear terms of an agreement, *see* *DiCarlo, 530 F.3d at 267*, defendants who act with improper purpose or ill motive may be found liable for breaching the implied covenant if the breach upsets the plaintiff's reasonable expectations under the agreement. *See* *Intarome, 2008 U.S. Dist. LEXIS 97631, 2008 WL 5109501, at *6*. Mere competition alone, however, cannot constitute improper purpose or ill motive.

In this case, Plaintiffs plead that Defendants Gama and Garraf are "marketing their products to customers in a manner that is intended to lead customers to believe that Defendants Gama and Garraf are the successors to Gusmer or that they are the real Gusmer." Compl. P 84. In addition, Plaintiffs allege that Commette, as an agent for and in concert with other Defendants, is erroneously "informing customers that Plaintiff Graco did not purchase **[*55]** Gusmer Europe." *Id.* P 85. Thus, Plaintiffs' allegations of Defendants' breach of good faith and fair dealing stems from Defendants' alleged trading off on the Gusmer name and product affiliation, which sufficiently constitutes improper purpose or ill motive for purposes of this motion. Therefore, Plaintiffs have stated a claim for breach of implied duty of good faith and fair dealing on this basis. Accordingly, the Court denies PMC Defendants' request to dismiss this claim.

4. Count Two: Breach of Non-Disclosure Agreement

PMC Defendants argue that because Plaintiffs failed to allege facts sufficient to establish an enforceable employment contract, Plaintiffs' allegations that Defendant Commette breached his non-disclosure agreement should be dismissed pursuant to *Fed. R. Civ. P. 12(b)(6)*. PMC Defendants argue that Graco cannot allege that Graco had a non-disclosure agreement with Commette based on a provision in an employee handbook in this case. Graco, however, contends that its claim is not based on a provision in an employee handbook. Rather, Plaintiffs allege that Commette breached a written "Non-Disclosure Agreement" that he entered into with Graco, dated May 16, 2006. Compl. PP **[*56]** 47, 95.

To state a claim for breach of contract, the plaintiff must allege (1) a contract between the parties; (2) a breach of that contract; (3) damages flowing therefrom; and (4) that the party stating the claim performed its own contractual obligations. *Frederico v. Home Depot, 507 F.3d 188, 203 (3d Cir. 2007)*. Graco, here, alleges: (1) it had a valid,

[9] PMC Defendants' arguments that goodwill was not part of the contract is a defense that will not be entertained by the Court on a motion to dismiss.

existing contract with Commette, *see* Compl. P 47; (2) Commette breached his obligations under that contract by disclosing Graco's and Gusmer's confidential information to Gama, *see Id.* P 82; and (3) that Graco had been damaged as a result of Commette's defective performance. *See Id.* P 96. Commette allegedly signed an agreement on May 16, 2006 that prohibits him from using or disclosing "Confidential Information of Graco Inc., Gusmer Corp., their subsidiaries or others to whom members of Graco/Gusmer owe an obligation of confidentiality, to any person not authorized to receive such Confidential Information" either "during [his] employment with Graco/Gusmer or after such employment is terminated." *Id.* P 47.

PMC Defendants do not argue that Plaintiffs fail to state a claim based on this Non-Disclosure Agreement. Rather, they complain that **[*57]** they did not receive fair notice of this claim because Graco did not attach a copy of the agreement to its Complaint or Opposition. Citing *Adamson v. Ortho-McNeil Pharm., Inc., 463 F. Supp. 2d 496, 500 (D.N.J. 2006)*, PMC Defendants argue that the Court need not credit Plaintiffs' conclusory allegations and bald assertions about this alleged contract, which Plaintiffs failed to attach. [10] PMC Defendants inappropriately cite to *Adamson.* In that case, this Court found that if documents relied on in the complaint are attached, the Court may review them. Indeed, this Court did not require the plaintiff to attach proofs for all its allegations, which Defendants contend is necessary here. Graco correctly argues that it was not required to attach the Non-Disclosure Agreement to its Complaint. Pl. Opp. at 19 n. 5 (citing *In re Prudential Ins. Co. of Am. Sales Practices Litig., 975 F. Supp. 584, 596 (D.N.J. 1996)* ("failure to attach specific documents to which the complaint refers, or to quote from them verbatim, [was not] fatal to their claims")). Plaintiffs have alleged sufficient facts to raise a reasonable expectation that discovery will reveal evidence of the nondisclosure agreement. *See* ***[*58]*** *Phillips, 515 F.3d at 234* (citing *Twombly, 127 S.Ct. at 1965*). Accordingly, the Court denies Defendants' request to dismiss this claim. [11]

5. Count Three: Duty of Loyalty Claim

Defendants move to dismiss Plaintiffs' duty of loyalty claim against Commette **[*60]** pursuant to *Rule 12(b)(6)* on the ground that Graco failed to allege any misconduct by Commette during his employment. PMC Defendants point out that according to Graco's own allegations, Commette, a former Graco employee, began doing business with Gama "after [his] employment and consulting relationships with [Plaintiffs] ended." Compl. PP 50, 53. Defendants claim that all of Commette and Royo's alleged misconduct and breach of duty of loyalty occurred after they were fired by Graco and such post-employment conduct cannot support Graco's claim.

---

[10] Defendants also claim that the Court is not "constrained to accept the allegations of the complaint in respect of the construction of the Agreement." *Int. Audiotext Network, Inc. v. AT&T Co., 62 F.3d 69, 72 (2d Cir. 1995)*. Plaintiffs correctly argue, however, that *Int. Audiotext Network* holds only that a court has the ability to review a document mentioned in -- but not attached to -- the complaint, without converting the motion to dismiss into a summary judgment action. *Id.*

[11] Because the Court does not dismiss this claim, PMC Defendants request a more definite statement pursuant to *Rule 12(e)*. PMC Defendants claim that the documents Plaintiffs expressly rely on are integral to their claims, and without these documents, Plaintiffs' allegations are too vague and ambiguous for Commette and other PMC Defendants to respond. Defendants request that Plaintiffs clearly state which contracts are valid or in effect, which contracts have been superseded or void, and which contracts it is seeking to enforce because in their Complaint, Plaintiffs allege that **[*59]** there were contracts with Commette and Royo from 2003 and 2004, and a subsequent contract with Commette in 2006. PMC Dfs. Mot. at 9; Compl. PP 26, 47. In their Opposition, Plaintiffs make clear that their claim against Commette for breach of his nondisclosure agreement is based on the May 16, 2006 Non-Disclosure Agreement. *See* Pl. Opp. at 18.

The Court denies PMC Defendants' request at this time because these records can be provided in discovery. "It is not the function of *12(e)* to provide greater particularization of information alleged in the complaint or which presents a proper subject for discovery. The basis for granting such a motion is unintelligibility, not lack of detail." *MK Strategies, LLC v. Ann Taylor Stores Corp., 567 F. Supp. 2d 729, 737 (D.N.J. 2008)* (internal citations and quotations omitted). In this case, Graco sufficiently alleges a claim of breach of a non-disclosure agreement and its allegations are not so vague, ambiguous or unintelligible that PMC Defendants cannot respond in good faith. Accordingly, Defendants' request pursuant to *Rule 12(e)* is denied.

The duty of loyalty owed by "an employee to an employer consists of certain very basic and common sense obligations. An employee must not *while employed* act contrary to the employer's interest." *Lamorte Burns & Co., Inc. v. Walters, 167 N.J. 285, 302, 770 A.2d 1158 (2001)* (citations omitted) (emphasis added). Specifically, during the period of employment, an employee has a duty not to compete with his employer. *Id.* (citations omitted). "[A]n employer may prove a *prima facie* case of an employee's breach of the duty of loyalty not only by showing that the employee directly competed with the employer while employed, but also by showing that the employee while employed **[*61]** assisted the employer's competitor." *Id.* (citations omitted). In addition, an employee who takes legally protected information from his employer to seek a competitive advantage upon resignation also breaches his duty of loyalty. *Id. at 304*. However, "later competition with a current employer may eventually prove harmful to the former employer. That sort of harm is not actionable; it is called free enterprise." *Subcarrier Communications, Inc. v. Day, 299 N.J. Super. 634, 645, 691 A.2d 876 (App. Div. 1997)* (internal quotations and citations omitted).

Graco contends that it sufficiently alleges that Commette breached his duty of loyalty based on its allegations that Commette had an undisclosed arrangement with PMC Global regarding the disposition of unsold inventory "that was contrary to Graco's interests during the time he was employed by, and providing consulting services to Plaintiff Graco . . .". Compl. P 99. Plaintiffs, however, do not allege in their Complaint that Commette had this undisclosed arrangement with PMC Global *while he was employed* with Graco. [12] In addition, Plaintiffs do not dispute Defendants' assertions that Graco fired Commette nor does Graco accuse Commette of taking legally **[*62]** protected information from Graco while an employee of Graco for the purpose of seeking a competitive advantage upon resignation or even in anticipation of his termination by Graco. *See Lamorte Burns, 167 N.J. at 304*.

Graco also argues that Commette gained access to trade secret information while employed at Graco that he "inevitably has or will have to disclose." Compl. PP 44, 63-64. This allegation alone, however, is not actionable and insufficient to establish a *prima facie* claim of an employer's breach of duty of loyalty, since Plaintiffs have not alleged that Commette took such protected information for the purposes of seeking a competitive edge upon his leaving Graco's employ. *See Lamorte Burns, 167 N.J. at 303*; *Subcarrier, 299 N.J. Super. at 645*. Because Plaintiffs have failed to allege sufficient facts that Commette breached his duty of loyalty because either he directly competed with his employer or he assisted the employer's competitor *while employed* by Graco or that he took trade secrets from Graco in order to seek a competitive advantage upon his separation from Graco, the Court grants Defendants' Motion to dismiss with respect to this claim without prejudice.

6. Count Four: Tortious Interference

Defendants argue that Graco has failed to state a claim based on tortious interference with a prospective **[*64]** economic advantage [13] because Graco does not allege that Defendants interfered with any of Graco's customers, solicited any of its current customers, or that Graco suffered a loss. PMC Dfs. Mot. at 13-14.

---

[12] Graco asserts that after Commette's employment with it ended in March 2007, Commette visited Gusmer's Lakewood, New Jersey facility and asked a Graco employee about the status of the inventory of Gusmer's "Mighty Mite" products, which Graco had acquired from PMC Global. *Id.* P 50. PMC Global and Graco allegedly had an agreement in which PMC Global was to reimburse Graco for any inventory not sold in three years. *Id.* P 51. Commette allegedly told a Graco employee that he was interested in the status of this inventory because PMC Global owed him compensation for it. *Id.* P 52. Graco asserts that any agreement by Commette to sell the Mighty-Mite inventory was 'contrary to the interests of Graco.'" Pl. Opp. at 20-21 (quoting Compl. P 99). Plaintiffs do not allege that Commette actually had an agreement with anyone during his employment with Graco nor that he intended to purchase this inventory while he was employed. Rather its allegations that Commette was acting as a speculator **[*63]** for this inventory in March 2007 was well after he stopped working for Graco on October 20, 2006.

[13] Graco argues that PMC Defendants do not dispute its tortious interference with contract claim, specifically, Commette's alleged non-disclosure agreement, and therefore it should be deemed admitted. Pl. Opp. at 21 n. 6. Thereafter, however, in their Reply, PMC Defendants clearly dispute the sufficiency of the allegations for this claim. They do not request dismissal of this claim on its own. Rather they dispute that Graco sufficiently pled the existence of the underlying agreement with which they allegedly interfered. PMC Dfs. Reply at 8 n. 3.

New Jersey recognizes tortious interference with a prospective economic advantage as separate and distinct from tortious interference with an existing contract. *Printing Mart-Morristown v. Sharp Electronics Corp., 116 N.J. 739, 751-52, 563 A.2d 31 (1989)*. To prevail on a claim for tortious interference with a prospective economic advantage, a plaintiff must demonstrate (1) that it had a reasonable expectation of an economic advantage; (2) that was lost as a direct result of Defendants' malicious interference; and (3) that it suffered losses thereby. *See Pinnacle Choice, Inc. v. Silverstein, No. 07-1379, 2007 U.S. Dist. LEXIS 55291, 2007 WL 2212861, at *3 (D.N.J. July 31, 2007)* (citing *Lamorte Burns, 167 N.J. at 305-06*). "When a business targets its competitor's customers, it exercises a valid business judgment and that alone does not constitute tortious interference with prospective economic advantage." *Foxtons, Inc. v. Cirri Germain Realty, 2008 N.J. Super. Unpub. LEXIS 189, 2008 WL 465653, at *7 (App. Div. 2008)* (internal quotations and citations omitted). A plaintiff must set forth facts surrounding Defendants' intentional conduct that goes beyond healthy competition. *Id.* Interference must be done intentionally and **[*66]** with malice, such that the harm was inflicted intentionally and without justification or excuse. *Id.*

Plaintiffs allege that Graco had a "reasonable expectation of economic advantage derived from the tangible and intangible assets of the Gusmer businesses that [they] purchased from Defendant PMC and its Affiliated Entities", Compl. P 108, including their customer relationships, intellectual property, proprietary technology, trademarks, and trade names. *Id.* P 41. Graco alleges that "Defendants' conduct, practices, and activities have intentionally and unjustifiably interfered with the reasonable expectation of advantage [Graco] derived from the[se] tangible and intangible assets . . . ." *Id.* P 109. Graco further alleges that it would have received the benefit of these assets if Defendants had not engaged in the conduct described throughout the Complaint, *Id.* P 110, and that it suffered injuries as a result. *Id.* P 111.

Defendants do not dispute that Plaintiffs had a reasonable expectation of economic advantage. Garraf, however, unpersuasively argues that the allegations of interference with a prospective economic advantage are only against Commette and Royo, and not Garraf, *see* Garraf Mot. **[*67]** at 7, and thus, this claim against them should be dismissed. Taking the allegations as a whole, Plaintiffs do allege that Garraf, either individually or acting in concert with PMC Defendants, intentionally interfered with its reasonable expectation of advantage. *See, e.g.,* Compl. P 109. PMC Defendants, citing to *Foxtons,* dispute that Plaintiffs sufficiently allege that Defendants intentionally interfered with or solicited any of Graco's current customers. Rather, PMC Defendants argue that Graco's allegation that they solicited business from customers in the trade is insufficient to plead the intentional or malice element of the claim. *Foxtons, 2008 N.J. Super. Unpub. LEXIS 189, 2008 WL 465653, at *7*. However, because Plaintiffs' claim that Defendants solicited Graco customers by casting doubt on the origin of Graco-Gusmer products, Compl. PP 84-85, Plaintiffs allege sufficient facts surrounding Defendants' conduct that demonstrate intentional interference with an economic advantage. *See Foxtons, 2008 N.J. Super. Unpub. LEXIS 189, 2008 WL 465653, at *7*.

In addition, Plaintiffs assert that they "need not allege specific lost business opportunities in support of [their] tortious interference claim." *D&D Assocs. Inc. v. Bd. of Ed. Of N. Plainfield, No. 03-1026, 2007 U.S. Dist. LEXIS 93867, 2007 WL 4554208, at *22 n. 15 (D.N.J. Dec. 21, 2007)* **[*68]** (citing *Floorgraphics, Inc. v. News Am. Marketing In-Store Servs., Inc., No. 04-3500, 2006 U.S. Dist. LEXIS 70834, 2006 WL 2836268, at *6 (D.N.J. Sept. 29, 2006))*. Rather, Plaintiffs claim that they "adequately alleged that [the unlawful conduct] caused consumers, distributors and other customers to stop purchasing its products." *Proctor & Gamble Co. v. Haugen, 222 F.3d 1262, 1279 (10th Cir. 2000)* (citing *Cook v. Winfrey, 141 F.3d 322, 327-28 (7th Cir. 1998))*. Plaintiffs claim that their general factual allegations regarding causation, which state the injury resulting from Defendant's conduct, are sufficient pursuant to *Rule 8*, and Defendants seek to impose a heightened pleading standard that is not required here. Pl. Opp. at 23. [14] Moreover, they argue that they have adequately alleged Defendants' efforts to divert

---

On the other hand, Garraf outrightly disputes that Plaintiffs have sufficiently pled a claim for tortious interference with a contract. Garraf Mot. at 7-8. However, Garraf contends that Plaintiffs do not address why this claim should be dismissed with respect to Garraf. *See* Garraf Reply at 8 n. 3. The Court will address the sufficiency of Plaintiffs' tortious interference claims, with respect to both a contractual relationship and prospective **[*65]** economic advantage, as to all Defendants.

[14] The Court notes that the Third Circuit has rejected a heightened evidentiary requirement for tortious interference claims, and it follows that there would be no heightened pleading standard for such claims. *See* ***Fineman, 980 F.2d at 186-87***.

business from Graco to "Gama" by interfering with Graco's then-existing customers or distributors. Compl. PP 67, 69.

Plaintiffs argue that they have sufficiently **[*69]** pled that Defendants' misconduct has interfered with specific prospective economic opportunities, *see Id.* PP 108-110, including the opportunity to sell replacement parts or new equipment to former Gusmer (now Graco) customers whose trade had been solicited and obtained by Defendants. *Id.* PP 65, 80-82. Plaintiffs state that they would have realized their reasonable expectation of economic benefit absent Defendant's conduct, and argue that they are not further required to identify and allege lost sales or damages more specifically. Pl. Opp. at 24. Defendants maintain that Plaintiff has not alleged any actual losses, as required for a tortious interference claim. *See Matrix Essentials, Inc. v. Cosmetic Gallery, Inc., 870 F. Supp. 1237, 1249 (D.N.J. 1994)*. Defendants assert that Graco has not alleged that any of its current customers stopped doing business with it or that there were any lost sales as a consequence of Gama's alleged misconduct. However, even in *Matrix,* the case cited by Defendants, the court noted that Plaintiffs must allege that the injury caused damages to plead a claim for tortious interference; Plaintiffs need not specify what the actual damages were at this stage of **[*70]** litigation. *Id.* While Plaintiffs will have to prove damages to succeed on this claim, they have sufficiently alleged that Defendants' actions injured them, causing damages here. Therefore, Graco has sufficiently plead the elements of a claim of tortious interference with a prospective economic advantage, including that it had reasonable expectation of economic benefit that was lost as a direct result of Defendants' malicious interference and damages.

Plaintiffs also allege that Defendants engaged in tortious interference with a contract, specifically, Commette's Non-Disclosure Agreement. Compl. PP 102-104. To sufficiently pled a claim of tortious interference with a contract, Plaintiffs must allege the same elements as a claim for tortious interference with a prospective business advantage plus the additional element of a contract. *Med Alert Ambulance, Inc. v. Atlantic Health System, Inc., 2007 U.S. Dist. LEXIS 57083, 2007 WL 2297335, at *14 (D.N.J. 2007)*. A tortious interference with contract claim cannot be directed at a person or entity that is a party to the contract. *See Emerson Radio Corp. v. Orion Sales, Inc., 253 F.3d 159, 173 (3d Cir. 2001)*.

PMC Defendants argue, taking as true all factual allegations in **[*71]** Plaintiffs' Complaint, Graco has failed to allege tortious interference with a contract. Rather, they argue that "Graco asserts only that Gama and Commette solicited business from customers 'in the trade' who previously had done business with Gusmer three years earlier, 'at the time Plaintiff Graco acquired Gusmer.'" PMC Reply at 8; Pl. Opp. at 23. Plaintiffs, however, do allege that Defendants PMC Global, PMC Europe, PMC, Gama, and Garraf are intentionally and unjustifiably interfering with Commette's non-disclosure agreement. Compl. P 102. The Court has already determined that Plaintiffs have sufficiently pled a non-disclosure agreement existed. *See* Part III.A.4., *supra.* Because the Court has determined herein that Plaintiffs adequately pled a claim for tortious interference with a prospective economic advantage and the additional element of Commette's non-disclosure agreement, Plaintiffs have sufficiently pled a tortious interference with a contract claim. Accordingly, Defendants' request to dismiss Plaintiffs' tortious interference claims are denied.

7. Count Five: Misappropriation of Trade Secrets & Misuse of Confidential Business Information

Pursuant to *Rule 12(b)(6)*, Defendants **[*72]** move to dismiss Plaintiffs' trade secret claims because Graco has not alleged the existence of actual trade secrets or that Defendants used such secrets to Graco's detriment. PMC Dfs. Mot. at 12-13; Garraf Mot. at 2-3.

"A trade secret claim in the federal courts is governed not by federal common law but by state law." *Rohm & Haas Co. v. Adco Chem. Co., 689 F.2d 424, 429 (3d Cir. 1982)*. "To prevail in New Jersey upon a claim for misappropriation of a trade secret, a trade secret owner must establish that: (1) a trade secret exists; (2) the information comprising the trade secret was communicated in confidence by plaintiff to the employee; (3) the secret information was disclosed by that employee and in breach of that confidence; (4) the secret information was acquired by a competitor with knowledge of the employee's breach of confidence; (5) the secret information was used by the competitor to the detriment of plaintiff; and (6) the plaintiff took precautions to maintain the secrecy of the trade secret." *Rycoline Prods., Inc. v. Walsh, 334 N.J. Super. 62, 71, 756 A.2d 1047 (App. Div. 2000)* (citing *Rohm, 689 F.2d at 429-30*; *Stone v. Goss, 65 N.J. Eq. 756, 759-60, 55 A. 736 (E. & A. 1903))*.

Significantly, information **[*73]** need not rise to the level of a trade secret to be protected. *See* *Lamorte Burns, 167 N.J. at 299*. Rather, the Supreme Court of New Jersey has held that, to be legally protected, the information may even be otherwise publicly available because it is the relationship of the parties at the time of disclosure and the intended use of the information that controls whether there has been a misuse of confidential business information. *See* *Id. at 299-301* ("specific information provided to defendants by their employer, in the course of employment, and for the sole purpose of servicing plaintiff's customers, is legally protectable as confidential and proprietary information").

Plaintiffs allege that when selling Gusmer, Defendants PMC Global and PMC Europe expressly transferred Gusmer trade secrets and confidential business information to Graco and represented to Graco that they had taken steps to protect these trade secrets, Compl. PP 34-36, including requiring employees to sign confidentiality agreements. *Id.* PP 37-39. The parties allegedly allocated over $ 4 million to the transfer of Gusmer "proprietary technology." *Id.* P 41. After the sale, former Gusmer employees, including Commette, joined **[*74]** Graco and had access to Graco's own trade secrets, and confidential business and technical information. *Id.* PP 43-44. Plaintiffs allege that Gama and Garraf have improperly accessed and are now using the Graco and/or Gusmer trade secrets and confidential business information to to manufacture, market and sell spare parts for Gusmer equipment and new equipment to solicit former Gusmer customers and others. *Id.* PP 58-62, 65-71, 75-79. Thus, Plaintiffs argue, they have sufficiently stated cognizable claims for misappropriation of trade secrets and misuse of confidential business information.

Garraf argues that "Graco fails to allege any facts supporting their claim that any trade secrets were ever taken, used or disclosed by Garraf." Garraf Reply at 6. [15] Rather Garraf states that Graco's allegations are conclusory and nonsensical. Moreover, Garraf complains that Graco fails to allege that "any defendant actually took any corporate material or data," and that Plaintiffs' allegation that Defendants had access to and then used Graco Trade Secrets and Confidential Business Information to manufacture spare parts for Gusmer's products is insufficient. The Court disagrees. [16]

Garraf contends that Plaintiffs rely on the "inevitable disclosure" theory because Garraf was "founded by a group of former Gusmer employees (none of whom are Royo), most of whom have over 20 years of experience in the industry and were dismissed by Graco shortly after the acquisition," and that Graco does not allege any facts to show why these people could not make and sell products using their own and public information. Garraf Mot. at 6. But "[u]nder the inevitable disclosure doctrine, a former employer is entitled to enjoin even *anticipated* employment

---

[15] Garraf disputes **[*75]** Graco's assertion that Royo, former Gusmer employee, co-founded Gama. Further Garraf asserts the PMC Defendants' statement to that effect in their brief, PMC Dfs. Mot. at 2, is inaccurate and is not binding on it. *See* Garraf Reply at 2 n. 1.

Garraf also contends that Graco's claim that Royo and Commette's attendance at trade shows was improper does not support Graco's claims against them. Garraf Reply at 6 n. 2; Compl. PP 61-62, 66-71.

[16] Citing *Sun Dial Corp. v. Rideout, 25 N.J. Super. 591, 598, 96 A.2d 788 (N.J. Super. Ch. 1953)*, *rev'd,* *29 N.J. Super. 361, 365, 102 A.2d 90 (App. Div. 1954)*, *aff'd,* *16 N.J. 252, 108 A.2d 442 (1954)*, Garraf argues that the "knowledge and skill which is obtained through experience is not a trade secret, that sound public policy favors employees bettering themselves, and that employees may carry away and use the skill acquired during the course of an employment either in business for themselves or in the service of other employers." Plaintiffs, however, contend that its "desire to protect its trade secrets and confidential information is not an attempt to hold its former employees 'hostage' because they are 'cursed' with the skill and knowledge of being competent at their chosen profession." Pl. **[*76]** Opp. at 28 (quoting Garraf Mot. at 6). Rather, Graco's claims against Commette (and other employees working for Defendants) are based on more than disclosure of "mere skill and knowledge of the trade generally, but technical and business trade secrets imparted to them in confidence," which Defendants are obliged to honor. Pl. Opp. at 28-29 (citing *Sun Dial Corp., 16 N.J. at 260-61*). Because these arguments go beyond sufficiency of the pleadings and are not appropriately addressed on a motion to dismiss, the Court will not consider them here.

or other business activity that would result in inevitable disclosure in order to protect the **[*77]** former employer's confidential and proprietary information from disclosure." *Orthovita, Inc. v. Erbe, No. 07-2395, 2008 U.S. Dist. LEXIS 11088, 2008 WL 423446, at *10 (E.D. Pa. Feb. 14, 2008)* (emphasis in original). Graco argues that it has gone further and is not bringing this action to prevent a "mere plan," but to enjoin Defendants' previous actions and actual disclosures evidenced by "Defendants' ongoing solicitation of its customers and the marketing, production and sale of spare parts for its products," including the use of Graco's pricing information. Pl. Opp. at 29-30. [17]

First, PMC Defendants argue that any alleged use of Graco's trade secrets by incorporating features claimed in one of Graco's patent applications are matters of public record, and thus, defeat Graco's claim to trade secrets. *See On-Line Techs., Inc. v. Bodenseewerk Perkin-Elmer GmbH, 386 F.3d 1133, 1141 (Fed. Cir. 2004)* ("information that is disclosed in a patent or contained in published materials reasonably accessible to competitors does not qualify for protection (as a trade secret)") (internal quotation marks and citations omitted); Compl. PP 75-79. Second, PMC Defendants argue that the two-year-old customer and distributor information that had been publicly disclosed by Graco cannot be considered secret. PMC Dfs. Mot. at 13. Third, PMC Defendants argue that Commette's use of his own knowledge with his new employer, Gama, is not a misappropriation of trade secrets because "[t]o catalogue the employee's own knowledge of his employer's [costs and profit margins] . . . as a 'trade secret' or 'confidential information' and thus perpetually enjoin the employee from thereafter honestly soliciting business . . . [is] an unreasonable restraint **[*79]** on trade unsupported by any dominant social or economic justification." *Abalene Exterminating Co. v. Egles,* 36 Backes 1, 3 (N.J. Ch. 1945). Therefore, PMC Defendants assert that "Graco has not alleged any other misuse of any other trade secret." PMC Dfs. Reply at 7.

Graco, however, asserts that its trade secret claims are based on the "confidential, nonpublic, propriety information regarding customers, sales reports, strategic marketing plans, product information and designs, pricing information, customer discounts and rebates, profit margins, financial reports and data, sales programs, and product engineering and design plans." Pl. Opp. at 17; Compl. P 44. [18] Garraf argues that Plaintiffs' "litany is wholly insufficient under *Twombly* and *Phillips* to provide fair notice to Garraf of what the purported trade secrets it is accused of misappropriating are." Garraf Reply at 4. However, other courts in this circuit have previously found that a "plaintiff alleging misappropriation of trade secrets need not plead the details of its trade secrets in a publicly filed complaint, inasmuch as such disclosure would destroy the essential 'secrecy' of the claimed trade secret." *Orthovita, 2008 U.S. Dist. LEXIS 11088, 2008 WL 423446, at *9*. **[*80]** Because Plaintiffs have met the "minimal standard" required for pleading misappropriation of trade secrets and misuse of confidential business information here, the Court denies Defendants' request to dismiss these claims. *See Oswell v. Morgan Stanley Dean Witter & Co., Inc., No. 06-5814, 2007 U.S. Dist. LEXIS 44315, 2007 WL 1756-027, at *7 (D.N.J. June 18, 2007)* (stating that the defendant will have the opportunity to argue that "no genuine issue of material fact exists regarding whether the information was publicly known or readily available and therefore not protectible as a trade secret" at the summary judgment phase, *Id.* n. 7). [19]

---

[17] Plaintiffs contend that despite Garraf's suggestion that a preliminary injunction may not be available to Plaintiffs because they did not move for such relief at the outset of the case, *see* Garraf Mot. at 3, this should not be addressed at this time because it is not currently moving for that relief. *See* Pl. Opp. at 29-30. The Court agrees and will not address this issue at this time.

Further, Garraf discusses the relief available when relying on the inevitable disclosure doctrine. *See* Garraf Reply at 7. In this case, Graco does not assert or plead reliance on a theory of inevitable discovery to satisfy its pleading requirement, *see* Pl. **[*78]** Opp. at 29, and thus, such a discussion is unnecessary.

[18] Graco states that despite Defendants' allegations, it does not claim that the price of steel, *see* Garraf Mot. at 5, the pending patent on the Hybrid Heater, *see Id.* at 3-4; PMC Dfs. Mot. at 12, or customer information posted on the Internet, *see* PMC Dfs. Mot. at 13, are trade secrets or the bases of Plaintiffs' trade secret claim. Pl. Opp. at 27.

[19] Moreover, at least one court in this District has held that "[i]n appropriate circumstances, information on pricing, discounts and other relevant customer data may enable an agent to take unfair advantage of its principal and therefore **[*81]** constitute protectible trade secrets." *See Apollo Techs. Corp. v. Centrosphere Indus. Corp., 805 F. Supp. 1157, 1204 (D.N.J. 1992)* (internal citations omitted). In addition, in *Global Transp. Logistics, Inc. v. Dov Transp.,* the court denied summary judgment where the facts were "hotly controverted" and the plaintiff claimed that its "pricing, customer preferences, customer contacts,

8. Counts Six-Eight: Violations of the Lanham Act, the New Jersey Fair Trade Act, and New Jersey's Prohibition Against Unfair Competition

In its Opposition, Graco appears to argue that in Count Six of its Complaint it sufficiently alleges two claims against Defendants under the Lanham Act, specifically false advertising under *15 U.S.C. § 1125(a)(1)(B)* and false designations of origin under *15 U.S.C. § 1125(a)(1)(A)*. [20] Plaintiffs assert that Defendants' conduct violates the Lanham Act's prohibition of unfair competition by way of false advertisements, false designation of origin, and misleading representations or descriptions of fact in an effort **[*82]** to unlawfully capitalize on Gusmer's reputation for which Plaintiffs paid millions of dollars for exclusive ownership and control. Further, Plaintiffs argue that they have sufficiently plead that Defendants' misrepresentations and other unfair acts violate the New Jersey Fair Trade Act and amount to unfair competition in Counts Seven and Eight, respectively.

Defendants move to dismiss all three of these counts on the grounds that Plaintiffs have failed to allege sufficient facts to support any of these claims. PMC Defendants argue Graco's pleading with respect to these three Counts, which PMC Defendants group together as Graco's "unfair competition claims," is insufficient because Graco fails to allege that Defendants used Graco's marks or otherwise suggested an affiliation sufficient to create a likelihood of consumer confusion. PMC Dfs. Mot. at 14-15. Garraf contends that **[*83]** an intermediate standard of pleading is required for Plaintiffs' Lanham Act claims and Plaintiffs' "unidentified statements" are inadequate to meet the requisite specificity. [21] Garraf Reply at 11-13.

a. False Advertising Claims

To state a claim for false advertising under *§ 1125(a)(1)(B)*, a plaintiff must allege that: (1) the defendant made false or misleading statements about the nature, characteristics, qualities, geographic origins of his or another's goods, services, or commercial activities in commercial advertising or promotion; (2) there is actual deception or a tendency to deceive a substantial portion of the intended audience; (3) the deception is material in that it is likely to influence purchasing decisions; (4) the advertised goods traveled in interstate commerce; and (5) there **[*84]** is a likelihood of injury to the plaintiff. *15 U.S.C. § 1125(a)(1)(B)*; *United States Healthcare, Inc. v. Blue Cross of Greater Philadelphia, 898 F.2d 914, 922-23 (3d Cir. 1990)*.

Garraf argues that the Court should apply an "intermediate" standard of pleading for Plaintiffs' Lanham Act claims because they require more specificity than the traditional notice pleading under *Rule 8*. *See* *Fed. R. Civ. P. 8(a)*; Garraf Reply at 11-13. Some district courts in the Third Circuit have recognized that pleading false advertising under the Lanham Act requires an intermediate pleading standard, which strikes a balance "between application and outright rejection of *Rule 9(b)*." *See* *Wellness Publ'g v. Barefoot, No. 02-3773, 2008 U.S. Dist. LEXIS 1514, 2008 WL 108889, at *15 (D.N.J. Jan. 8, 2008)* (quoting *EVCO Tech. & Dev. Co., LLC v. Buck Knives, Inc., No. 05-6198, 2006 U.S. Dist. LEXIS 68549, 2006 WL 2773421, at *15 (E.D. Pa. Sept. 22, 2006))*; *see also* *Trans USA Products, Inc. v. Howard Berger Co., No. 07-5924, 2008 U.S. Dist. LEXIS 25370, 2008 WL 852324, at *5 (D.N.J. Mar. 28, 2008)*. In *Max Daetwyler Corp. v. Input Graphics, Inc., 608 F. Supp. 1549 (E.D. Pa. 1985)*, where this intermediate approach was first applied, the court required more particularity than traditional notice pleading **[*85]** under *Rule 8*, but something less than the specificity required under *Rule 9*, because the claim involved the

---

profit margin, vendors and 'methods of operation' [we]re proprietary and confidential." No. BER-C-79-05, 2005 WL 1017602, at *1-5 (N.J. Super. Ct. Apr. 5, 2005).

[20] Problematically, Plaintiffs do not clearly allege pursuant to which provisions of the Lanham Act they are suing citing generally to *15 U.S.C. § 1125(a)(1)*. *See* Compl. PP 118-123. The Court looks to its Opposition for clarity, but relies on Plaintiffs' Complaint to determine the sufficiency of Graco's allegations.

[21] Garraf states that it does not analyze Plaintiffs' claims under the New Jersey Fair Trade Act and common law unfair competition separately because under New Jersey law the pleading requirements for these claims are the same as the analysis for unfair competition under the Lanham Act. *See* Garraf Mot. at 8 n. 3 (citing *Primepoint, L.L.C. v. PrimePay, Inc., 545 F. Supp. 2d 426, 431-32 (D.N.J. 2008))*.

making of false statements even though it was not a "pure 'fraud' claim." *Max Daetwyler, 608 F. Supp. at 1556*. "In litigation in which one party is charged with making false statements, it is important that the party charged be provided with sufficiently detailed allegations regarding the nature of the alleged falsehoods to allow him to make a proper defense." *Id.* The Court finds that this intermediate standard should be applied in this case, where Plaintiffs charge Defendants with making false statements about Defendants' products; Plaintiffs meet this requirement.

Plaintiffs argue that they have sufficiently plead a claim under *Rule 8(a)* [22] that Gama and Garraf are making false or misleading representations when marketing their products to customers because they are "marketing their products to customers in a manner that is intended to lead customers to believe that Defendants Gama and Garraf are the successors to Gusmer or that they are the real Gusmer." Compl. P 84. Plaintiffs allege that Commette, as an agent for and in concert with other Defendants, is erroneously "informing **[*86]** customers that Plaintiff Graco did not purchase Gusmer Europe." *Id.* P 85. [23] Plaintiffs allege that these statements are "likely [or intended] to cause confusion or mistake or to deceive" and "have influenced and [are] likely to continue to influence customers' purchasing decisions." *Id.* PP 84-86, 119-120. Further, Plaintiffs allege that the products have traveled in interstate commerce, *Id.* P 121, and that there is a likelihood of injury to the Gusmer goodwill that it purchased and damages from the name's dilution. *Id.* PP 33, 41, 122.

Taking Plaintiffs' allegations as a whole, they do identify Defendants' allegedly false statements **[*88]** with enough specificity to satisfy even the intermediate pleading requirement. Compl. PP 84-85. Similarly, even though Garraf argues that Plaintiffs only allege that the statements were "intended" to deceive, not that the supposed misstatements actually caused any deception or there was a tendency to deceive, the Court disagrees. *See Id.* PP 84-86, 119-120. Rather, Plaintiffs identify the allegedly false and misleading statements Defendants made and plead that customers were deceived. However, the Court will grant Graco leave to amend its Complaint to state clearly which provisions of the Lanham Act Defendants allegedly violated. *See* n. 20, *supra.* Accordingly, the Court denies Defendants' motion to dismiss with respect to Plaintiffs' false advertising claim.

b. Claims of False Designations of Origin

Plaintiffs also claim that Defendants' marketing statements amount to false and misleading designations of origin and affiliation and false descriptions of fact under the Lanham Act. *15 U.S.C. § 1125(a)(1)(A)*. PMC Defendants move to dismiss these claims, pursuant to *Rule 12(b)(6)*, for the same reasons they move to dismiss Plaintiffs' false advertising claims. Garraf argues that these claims **[*89]** are based on the same unidentified statements as Plaintiffs' claims of false advertising and Plaintiffs' allegations here merely recite the language of the elements in the statute, which are "wholly insufficient to provide Garraf with sufficiently detailed allegations regarding the nature of the alleged falsehoods to allow it to make a proper defense." Garraf Reply at 13-14.

---

[22] Plaintiffs argue that the Honorable Joel A. Pisano, U.S.D.J., in *Wellness* and *Trans USA* incorrectly required an intermediate standard for allegations of false statements under the Lanham Act and, for support, cites to district court cases outside of the Third Circuit. Pl. Opp. 36-38. Plaintiffs also contend that Garraf cites to "unreported decisions [that] are at odds with contemporaneous published opinions [from district courts in other circuits] that categorically reject the suggestion that Lanham Act claims must contain more detail than would be required by *Fed. R. Civ. P. 8(a)*." Pl. Opp. at 36-37. This distinction, however, is irrelevant. None of **[*87]** these decisions, cited by Plaintiffs or Defendants, are binding on this Court. Thus, in conducting its own analysis, the Court finds the decisions in the district courts within the Third Circuit, which are post-Twombly, are persuasive, and the Court applies an intermediate pleading standard here.

[23] Plaintiffs argue that a liberal interpretation of the "commercial advertising or promotion" requirement applies under *Rule 12(b)(6)*, and therefore, their pleadings regarding Defendants' concerted, intentional, and false marketing communications is sufficient "advertising." Pl. Opp. at 32-33 & n. 9 (citing to cases which found that even a single promotional statement suffices as an advertisement for purposes of the Lanham Act). The crux of Defendants' argument, however, is not that Plaintiffs have insufficiently plead an advertisement, but that Plaintiffs fail to sufficiently allege that any false or misleading statements were ever made by Defendants. And even if there were such statements, there are no allegations that they caused deception or had a tendency to deceive. *See, e.g.,* Garraf Reply at 13.

To prevail on such a claim, a plaintiff must prove that: (1) the defendant uses a false designation of origin, false or misleading description of fact, or false or misleading representation; (2) such improper use occurs in interstate commerce in connection with goods and services; (3) such improper use is likely to cause confusion, mistake, or deception as to origin, sponsorship, or approval of defendant's goods or services by another person; and (4) that plaintiff has been or is likely to be damaged. *15 U.S.C. § 1125(a)(1)(A)*.

In arguing that it has adequately alleged that Defendants misrepresented the origin of Gama's products to consumers and created the likelihood that consumers will be confused about the origin of Gama's products, Graco cites to the same statements it offers to support its false advertising **[*90]** claim. *See* Part III.A.8.a., *supra.* Plaintiffs allege that Defendants' misleading statements also constitute false or misleading statements of fact made in conjunction with efforts to sell Garraf and Gama's products in interstate commerce. Compl. P 121. Plaintiffs argue that a false designation of origin claim is properly stated where a competitor seeks to "instill the impression that its line is the same as, or a continuation of the [Plaintiffs'] line." *777388 Ontario Ltd. v. Lencore Acoustics Corp., 105 F. Supp. 2d 56, 63 (E.D.N.Y. 2000)*. Finally, Plaintiffs contend that they have suffered damages because they are losing control of "the Gusmer name" and the associated goodwill that they purchased. *Id.* PP 33, 41, 122.

Thus, much like Plaintiffs' false advertising claim, Plaintiffs set forth adequate facts to show a reasonable expectation that discovery will reveal evidence that Graco uses a false designation of origin, false or misleading description of fact, or false or misleading representation. Although Gama's allegations that Graco made false or misleading statements of fact are adequately plead, the specific provisions of the Lanham Act upon which Plaintiffs are suing are not and **[*91]** the Court directs Graco to amend its Complaint with respect to this allegation. *See* n. 20, *supra.* Accordingly, the Court denies Defendants' Motions to dismiss Plaintiffs' claims of false designations of origin.

c. Claims under the New Jersey Fair Trade Act and New Jersey's Prohibition on Unfair Competition

Plaintiffs allege that Defendants' violated the New Jersey Fair Trade Act and New Jersey common law of unfair competition. *See* *N.J.S.A. § 56:4-1*; *Ryan v. Carmona Bolen Home for Funerals, 341 N.J. Super. 87, 92, 775 A.2d 92 (App. Div. 2001)*. Graco argues that it has adequately plead these claims because it alleges that Defendants breached their duties of good faith and fair dealing, *see* Compl. PP 87-93, and engaged in false advertising and false designation of product origin. *Id.* PP 118-123.

PMC Defendants argue that their alleged actions do not amount to unfair competition and thus Plaintiffs do not sufficiently plead these claims. PMC Defendants argue that Royo's alleged use of "a product comparison sheet that focused exclusively on head-to-head comparisons between Plaintiff Graco's and Defendants Gama and Garraf's products," Compl. P 69, suggests no more than ordinary comparative advertising, **[*92]** which is not unfair competition. PMC Dfs. Mot. at 15. PMC Defendants also argue that Plaintiffs fail to allege any confusion, actual or likely. PMC Reply at 9. They argue that even if Commette told "customers that Plaintiff Graco did not purchase Gusmer Europe," Compl. P 85, it would "not have the reasonable likelihood of confusing sophisticated consumers concerning the 'affiliation, connection, and/or association of Gusmer with Defendants Gama and Garraf' or 'the origin, sponsorship, and/or approval of Defendants Gama and Garraf's products.' Compl. PP 119, 120, 125[-26]." PMC Dfs. Mot. at 15.

New Jersey's prohibition against unfair competition provides relief for a breach of the duty of good faith and fair dealing and violations of the Lanham Act. "A *prima facie* case of unfair competition . . . requires evidence of bad faith or malicious conduct." *Wellness, 2008 U.S. Dist. LEXIS 1514, 2008 WL 108889, at *20*. In *Versa Prods. Co., Inc. v. Bifold Co. (Mfg.) Ltd., 50 F.3d 189, 207 (3d Cir. 1995)*, the Third Circuit found that unfair competition exists where there is an effort to "deceive consumers as to the origin of one's goods and thereby trade off the good will of a prior producer." The test of unfair competition **[*93]** under New Jersey law is identical to the test for unfair competition under *§ 1125* of the Lanham Act. *See* *AT&T Co., 42 F.3d at 1433*. Therefore, because the Court already determined that Plaintiffs' claims, as alleged, are adequately plead for the purpose of this motion, the Court need not conduct a separate analysis here. *See* Part III.A.8.a. & b., *supra.* Accordingly, the Court denies Defendants' motion to dismiss these claims.

9. Count Nine: Unjust Enrichment

Defendants move to dismiss Plaintiffs' claim for unjust enrichment. PMC Defendants contend that Plaintiffs fail to state a claim because (1) unjust enrichment is not an independent tort and is only "quantum recovery for breach of a quasi-contact properly pled under New Jersey law" and (2) Plaintiffs do not allege any quasi-contract nor that Defendants have been unjustly enriched or received any illegitimate benefit. PMC Dfs. Mot. at 15-16. Garraf argues that Plaintiffs' claim for unjust enrichment is inadequately plead because Graco fails to allege "(i) any direct relationship between it and Garraf or (ii) that [Graco] conferred any benefit to, or reasonably expected any remuneration from Garraf." Garraf Mot. at 11. Plaintiffs allege **[*94]** that "Defendants have been unjustly enriched by reason of their foregoing breach of their contractual and legal obligations to Plaintiff Graco." Compl. P 134.

As a preliminary matter, this Court has previously held that an unjust enrichment claim may be sustained independently as an alternative theory of recovery. *Torres-Hernandez v. CVT Prepaid Solutions, Inc., No. 08-1057, 2008 U.S. Dist. LEXIS 105413, 2008 WL 5381227, at *9 (D.N.J. Dec. 17, 2008)* (citing *In re K-Dur Antitrust Litigation, 338 F. Supp. 2d 517, 544 (D.N.J. 2004)* (finding defendant's motion to dismiss plaintiff's unjust enrichment claim as premature even where other remedies at law were available to plaintiff); *United States v. Kensington Hosp., 760 F. Supp. 1120, 1135 (E.D. Pa. 1991)* (allowing plaintiff to assert an unjust enrichment claim as an alternative theory of recovery when plaintiff had asserted a cognizable contract claim in the same complaint)). An unjust enrichment claim requires plaintiff to allege "(1) at plaintiff's expense (2) defendant received benefit (3) under circumstances that would make it unjust for defendant to retain benefit without paying for it." *In re K-Dur Antitrust Litigation, 338 F. Supp. 2d at 544* (quoting *Restatement of Restitution 1* **[*95]** (1937)). Further, "[t]he unjust enrichment doctrine requires that plaintiff show that it expected remuneration from the defendant at the time it performed or conferred a benefit on defendant and that the failure of remuneration enriched defendant beyond its contractual rights." *VRG Corp. v. GKN Realty Corp., 135 N.J. 539, 554, 641 A.2d 519 (1994)*. While New Jersey law does not recognize unjust enrichment as an independent *tort* cause of action, it does sound in quasi-contract. *Cafaro v. HMC, No. 07-2793, 2008 U.S. Dist. LEXIS 71724, 2008 WL 4224801, at *12 (D.N.J. Sept. 8, 2008)* (finding that the plaintiffs' unjust enrichment claim should be dismissed because the allegations sounded in tort and not in quasi-contract). Thus, where Plaintiffs' unjust enrichment claim is based on a quasi-contractual or implied contractual relationship with the expectation of remuneration, the Court must determine whether the claim is adequately plead.

The doctrine of unjust enrichment is "typically invoked . . . when [the] plaintiff seeks to recover from [the] defendant for a benefit conferred under an unconsummated or void contract." *Steamfitters Local Union No. 420 Welfare Fund v. Phillip Morris, Inc., 171 F.3d 912, 936 (3d Cir. 1999)* (internal **[*96]** citations omitted). In such an instance, the law implies a quasi-contract and requires that the defendant compensate the plaintiff in quantum meruit for the value of the benefit conferred. *See* *Hershey Foods Corp. v. Ralph Chapek, Inc., 828 F.2d 989, 998 (3d Cir. 1987)*. "To establish unjust enrichment, a plaintiff must show both that defendant received a benefit and that retention of that benefit without payment would be unjust . . . . [and the plaintiff] expected remuneration from the defendant at the time it performed or conferred a benefit on defendant and that the failure of remuneration enriched defendant beyond its contractual rights." *VRG Corp., 135 N.J. at 554* (internal citations omitted).

Garraf argues that Graco fails to allege any direct relationship between the parties or that Garraf conferred any benefit to, or reasonably expected any remuneration from Garraf. Graco does not argue that it adequately plead these two elements. Rather, it says "[i]t would be inappropriate, or premature at best, to resolve this unjust enrichment claim against Garraf before Graco has had the benefit of discovery to fully understand and prove the relationship between Garraf, which manufactures **[*97]** and markets 'Gama' products, and its co-defendants." Pl. Opp. at 40 n. 11. By Graco's own admission, it fails to adequately plead this claim.

More fundamentally, however, Graco does not allege recovery for a benefit conferred under an unconsummated or void contract. Instead, Graco alleges Defendants, acting in active concert with one another, have been unjustly enriched as a result of their violations of the obligations they owe to Graco, after PMC Global and PMC Europe sold Gusmer and its intangible assets to Graco for $ 65 million. Compl. PP 28-29, 33, 134. Graco further alleges that

Defendants are now interfering with the previously sold assets by soliciting Gusmer's customers, retaining employees bound by non-disclosure and non-competition agreements with Gusmer, using Gusmer's intellectual property and proprietary information, while retaining the full $ 65 million purchase price, and thus, causing damage to Graco. *Id.* PP 7, 88, 135. The entire thrust of Graco's allegations is that Defendants, working in concert, are retaining or seeking to recapture the intangible assets that comprised a substantial portion of Gusmer's value. There is, therefore, no basis for applying a quasi-contractual **[*98]** remedy and Plaintiffs' claims for unjust enrichment cannot stand. Accordingly, the Court grants Defendants' request to dismiss Graco's unjust enrichment claim.

B. Plaintiffs' Motion to Dismiss Defendants Gama and Commette's Counterclaims

1. Antitrust Counterclaims

Defendants Gama and Commette (collectively Gama or "Counterclaimants") [24] plead violations of *Section 2* of the Sherman Act for monopolization (Count 1) or attempted monopolization (Count 2), based on allegations of "unlawful acquisition and maintenance of monopoly power in the [in-plant polyurethane processing equipment and materials ("IPPE")] market," through Graco's purported "unilateral[] refus[al] to deal with distributors that carry products from competing manufacturers." Counterclaim PP 42, 44. [25]

Graco moves to dismiss Gama's antitrust claims on the grounds that Counterclaimants do not have antitrust standing because Gama is only a distributor and not a participant, *i.e.* a competitor or consumer, in the market. Thus, Graco argues, since Gama does not directly compete against Graco in the relevant market, it cannot suffer injury of the type the antitrust laws were designed to prevent. [26] Graco also argues that Gama is neither an efficient nor proper enforcer of the antitrust laws.

Gama alleges that "Graco has a nearly 100% market share and no significant competitors" in the "distinct market for plural component pump and spray and in-plant polyurethane processing equipment market ('IPPE') materials

---

[24] As both parties refer to Commette and Gama as Gama on this motion, the Court does the same.

[25] Counterclaimants also allege conspiracy to monopolize the IPPE market, however, the Supreme Court has clearly held that under the Sherman Act, *15 U.S.C. § 1*, a parent company and its wholly owned subsidiary are incapable of conspiring with each other. *See* *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 776-77, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. In *Copperweld,* **[*99]** the Court determined that "[a] parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but one." *Id. at 771*. As the parent and subsidiary always have a "unity of purpose or a common design," *Id.,* the Court held that a parent corporation and its wholly owned subsidiary are incapable of conspiring with each other for purposes of *§ 1* of the Sherman Act. *Id. at 777*. Similarly, Counterclaimants fail to state a claim of conspiracy because Graco Inc. and its wholly-owned subsidiary Graco Minnesota cannot conspire with each other because they too have a unity of purpose or a common design. *See Id.*

Gama, however, argues that it did adequately plead a conspiracy claim under the Sherman Act because Graco's boycott conspiracy implicates both Graco and its top-tier American distributors who effectively became coerced coconspirators against Gama. *Otto, 388 F.2d at 797*. However, I find that Gama's allegations that "Graco and Graco Minnesota and/or others . . . conspired to monopolize the IPPE market" are too vague under *Twombly*. Counterclaim **[*100]** P 50. Because counterclaimants fail to allege with specificity that any other conspirator was involved, the Court dismisses Gama's claims of conspiracy to violate antitrust laws. Moreover, Gama lacks standing to bring its antitrust claims. *See* Part III.B.1., *infra.*

[26] Graco argues that as an agent of Gama, Commette's injury and standing are necessarily derivative of Gama's. Thus, if Gama lacks antitrust standing, then Commette also lacks standing. *See* *Sw. Suburban Bd. of Realtors, Inc. v. Beverly Area Planning Ass'n, 830 F.2d 1374, 1378 (7th Cir. 1987)* (denying a corporate officer of the plaintiff company challenging anticompetitive conduct standing); *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 710-711 (11th Cir. 1984)*. **[*101]** Gama does not dispute this.

and equipment, with substantial technical barriers to entry". Counterclaim PP 12-13. Gama's counterclaims refer only to "IPPE;" however, according to Gama, IPPE encompasses the "plural component pump and stay and in-plant polyurethane processing equipment market in which Gama and Graco compete." Gama Opp. at 1 n. 2. Gama claims that it intends to amend its counterclaims to more clearly describe the pump and spray industry, but this change will be explanatory and not substantive. *See Id.* Gama, however, has not plead this definition at this time. The Court must consider Gama's allegations as plead. *Id.* Graco argues that due to this admission, Gama concedes that its pleading of market definition is insufficient, but asserts that even if Gama amended its Counterclaims, Gama would not have standing.

Gama alleges that Garraf, located in Spain, is the only company that makes competing products and that as Garraf's sole manufacturer's representative **[*102]** and exclusive distributor in the United States, Gama is the only link in commerce between Garraf and the American market. Counterclaim PP 15-16, 18; Gama Opp. at 1. According to Gama, Graco threatened all of its IPPE product distributors with the loss of the right to sell Graco products if those distributors were also to sell competing products distributed by Gama. Further, those distributors are the only realistic conduit for Gama to sell Garraf products in the United States, and Graco's threats have proved successful in cutting off Gama's sales, as distributors are refusing to carry Gama's Garraf product line. Counterclaim PP 20, 24.

"Because of the infinite variety of claims that arise under the antitrust statutes, [the Supreme Court] has refused to fashion a black-letter rule for determining standing in every case." *Steamfitters Local Union No. 420 Welfare Fund v. Philip Morris, Inc., 171 F.3d 912, 922 (3d Cir. 1999)* (quoting *Merican, Inc. v. Caterpillar Tractor Co., 713 F.2d 958, 964 (3d Cir. 1983))*. When assessing a Plaintiff's standing to bring antitrust claims, "[t]he [Supreme] Court has emphasized that lower courts should avoid applying bright-line rules and instead should **[*103]** analyze the circumstance of each case, focusing on certain key factors." *Id. at 922*. In *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 545, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*, the Supreme Court articulated a five-factor balancing test for antitrust standing. The Third Circuit has expressed these factors as follows:

> (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; (3) the directness of the injury, which addresses the concerns that liberal application of standing principles might produce speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages.

Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 320 (3d Cir. 2007).

Gama analyzes these five factors, arguing that it does meet the standing requirements. Graco contends that only a narrow class of persons and injuries have antitrust standing **[*104]** and *Associated General Contractors* requires more than a but-for theory of harm. First, Graco argues that its alleged monopolization of IPPE manufacturing does not directly harm Gama because Gama does not manufacture such products or buy Graco's products. Gama, however, asserts that there is a causal connection between the antitrust violation, the harm to Gama, and Graco's intent because Graco sought to prevent "all IPPE product distributors nationwide" from purchasing Garraf products from Gama and that these IPPE distributors are "the only realistic conduit for Garraf products in the United States." Counterclaim PP 20, 24. In addition, Gama alleges that Graco sent a Letter to all IPPE distributors nationwide that unilaterally threatened Graco's refusal to deal, which had its intended effect because "existing Gama customers have stopped buying." *Id.* P 22. According to Gama, distributors "would have carried or continued to carry Garraf products but for Graco's refusal to deal with any distributor carrying competing products." *Id.* P 23. Thus, there appears to be a causal connection between Graco's intent to harm competition by sending its Letter and Gama's injury from the loss of sales **[*105]** and potential sales.

In its Motion, Graco focuses heavily on the second factor, which deals with the concept of antitrust injury. "If the injury is not of the requisite type, even though the would-be plaintiff may have suffered an injury as a result of conduct that violated the antitrust laws, he or she has no standing to bring a private action under the antitrust laws to recover for it." Barton & Pittinos, Inc. v. SmithKline Beecham Corp., 118 F.3d 178, 181 (3d Cir. 1997). "Antitrust injury is a necessary but not insufficient condition of antitrust standing." Id. at 182 (citation omitted). "Even a plaintiff who can show antitrust injury may lack antitrust standing, because the remaining . . . factors may weigh against allowing him or her to sue under the antitrust laws." *Id.*

Graco argues that Gama is not a competing manufacturer in the alleged market and therefore cannot suffer an antitrust injury. Pl. Mot. at 9-13. In Schuylkill Energy Resources, Inc. v. Pennsylvania Power & Light Co., 113 F.3d 405 (3d Cir. 1997), the Third Circuit explained that plaintiffs "must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from **[*106]** that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." 113 F.3d at 413 (quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)). Further, in *Schuylkill,* the court stated:

> The antitrust laws are intended to preserve competition for the benefit of consumers in the market in which competition occurs . . . . The requirement that the alleged injury be related to anti-competitive behavior requires, as a corollary, that the injured party be a participant in the same market as the alleged malefactors . . . . A plaintiff who is neither a competitor nor a consumer in the relevant market does not suffer antitrust injury.

Id. at 415 (quoting Vinci v. Waste Management, Inc., 80 F.3d 1372, 1376 (9th Cir. 1996)). An antitrust injury reflects an activity's anti-competitive effect on the competitive market. Casper v. SMG, No. 00-3465, 2006 U.S. Dist. LEXIS 79267, 2006 WL 3111132, at *4 (D.N.J. Oct. 31, 2006). "The **[*107]** requirement that the alleged injury be related to anti-competitive behavior requires . . . that the injured party be a participant in the same market as the alleged malefactors." Schuylkill Energy Resources, 113 F.3d at 415.

In order for a reasonable factfinder to determine if Gama competed in the market in which trade was allegedly restrained -- the alleged antitrust injury -- the answer depends on how that market is defined. Barton, 118 F.3d at 182. In Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430 (3d Cir. 1997), the Third Circuit discussed the definition and boundaries of the relevant market in antitrust actions. It wrote:

> Plaintiffs have the burden of defining the relevant market. The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted **[*108]** in plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted.

Queen City Pizza, 124 F.3d at 436 (internal citations and quotations omitted). Further, the court stated:

> Interchangeability implies that one product is roughly equivalent to another for the use to which it is put; while there may be some degree of preference for the one over the other, either would work effectively. . . . When assessing reasonable interchangeability, (f)actors to be considered include price, use, and qualities. Reasonable interchangeability is also indicated by cross-elasticity of demand between the product itself and substitutes for it. As we explained in Tunis Brothers Co., Inc. v. Ford Motor Co., 952 F.2d 715, 722 (3d Cir. 1991), products in a relevant market are characterized by a cross-elasticity of demand, in other words, the rise in the price of a good within a relevant product market would tend to create a greater demand for other like goods in that market.

Id. at 437-38 (internal citations and quotations omitted).

Gama contends that the relevant product market is a "distinct market for IPPE materials and equipment." Counterclaim PP 1, 7. "Graco denies that **[*109]** 'the IPPE space,' Counterclaim P 12, defines a relevant product market under ***antitrust law***." Pl. Mot. at 10 n. 7. Graco asserts that Gama's claims should be dismissed because it has failed to identify any product in the alleged market and its interchangeability with other products. *Id.* It is unclear what exactly defines the IPPE market "materials and equipment" or the "pump and spray industry." As pled, Gama does not define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand nor does it allege a proposed relevant market, as pled, that clearly encompasses all interchangeable substitute products. *See* Queen City Pizza, 124 F.3d at 437-38. Despite granting all factual inferences in Gama's favor, the relevant market is legally insufficient, and Gama cannot demonstrate that its alleged injury is of the type for which the antitrust laws were intended to provide redress. *See* Barton, 118 F.3d at 182. Thus, the Court dismisses Gama's antitrust claims. *See Id.* (citing numerous cases that dismissed the plaintiff's antitrust claims for failure to sufficiently plead a relevant market). [27]

Because Gama fails to sufficiently define the relevant market and thus lacks **[*111]** standing, the Court need not address the individual arguments the parties raise with regard to the sufficiency of Graco's pleading regarding its monopolization and attempted monopolization claims. Accordingly, the Court grants Graco's request to dismiss Gama's antitrust claims without prejudice.

2. Gama' State Law Claims

a. Tortious Interference with Business Advantage

The Court has already determined that to state claim for tortious interference with prospective economic advantage, a plaintiff must establish (1) that it had a reasonable expectation of an economic advantage; (2) that was lost as a direct result of Defendants' malicious interference; and (3) that it suffered losses thereby. *See* Part III.A.6., *supra.* Graco argues that Gama fails to allege that it had a reasonable expectation of business advantage or that Graco acted intentionally and with malice. Graco also contends that because Gama is only a start-up with no established customers, it cannot plead generic expectations of business advantage. [28]

Gama, however, argues that it has a reasonable expectation to continue its sales of Garraf products to its existing customers and distributors, and to sell its products to other members of the trade. Counterclaim PP 22-24. Gama contends that Graco knew of Gama's business expectations when it took deliberate steps to wrongfully undermine those expectations by allegedly sending a Letter to "all IPPE distributors carrying Graco products -- which is to say, all IPPE product distributors nationwide[,] . . . announc[ing] a pre-emptive unilateral refusal by Graco to deal with any distributor . . . that considers carrying Garraf products as well." Counterclaim PP 20-21. Gama alleges that Graco knowingly made false and disparaging comments about Gama's business and products to customers in the trade and gave its customers ultimatums not to carry Gama's products. *Id.* PP 25-27, 29-33. Due to Graco's conduct, Gama's customers stopped buying products and dropped the Gama line. *Id.* PP 23, 32. Thus, Gama argues, it sufficiently pleads that "but for [Graco's] interference, there was a reasonable probability that [it] **[*113]** would have received the anticipated economic benefit." *Slim CD, Inc. v. Heartland Payment Sys., Inc., No. 06-2256, 2007 U.S. Dist. LEXIS 62536, 2007 WL 2459349, at *3 (D.N.J. Aug. 24, 2007)*. [29] The Court agrees.

---

[27] With regard to Gama's alleged antitrust **[*110]** injury, depending on how Gama defines the relevant market, Gama may be able to demonstrate that it, at least at times, directly competes with Graco, as Graco admits that sometimes it acts as a distributor selling to end-users. In addition, Gama may be able to show that it forges the link between Garraf and the top-tier American distributors and competes directly with Graco, which sells its products directly to the same distributors, and thus Gama's harm is inextricably intertwined with Graco's alleged refusal to deal and its forced group boycott. *See Carpet Group Int'l v. Oriental Rug Importers Ass'n Inc., 227 F.3d 62, 77 (3d Cir. 2000)*. Even if, however, Gama adequately defines the relevant market and demonstrates Gama's alleged injury is of the type for which the antitrust laws were intended to provide redress, balancing the five factors in *Associated General Contractors,* Gama will have to demonstrate that it has standing with regard to the factors of directness of the injury, the existence of more direct victims, and, most troubling, the potential for duplicative recovery or complex apportionment of damages.

[28] The Court notes that this argument contradicts Graco's claim that Gama has successfully entered the market as evident from "Gama's own website [that] identifies at least 12 distributors **[*112]** for Garraf products, acquired in Gama's one year of business." Pl. Mot. at 25 n. 12.

Accepting all of Gama's allegations as true, Gama alleges a reasonable expectation of an economic benefit from selling products to customers in the trade with which Graco intentionally and wrongfully interfered. *See* Id., 116 N.J. at 753-51 (finding that courts easily find a reasonable expectation of economic benefit even where the sale is to the public at large).

Graco also argues that Gama fails to allege any action constituting malice because **[*114]** nothing about its Letter or actions was "wrongful" and Gama fails to plead any factual allegations to support its claim that Graco "intentionally and unjustifiably interfer[ed] with Gama's business." Pl. Mot. at 29-32; Counterclaim P 53. Graco asserts that exercising control over one's own distribution network cannot constitute tortious interference. For support, Graco relies on Frank Brunckhorst Co., L.L.C. v. Coastal Atlantic, Inc., 542 F. Supp. 2d 452 (E.D. Va. 2008). In that case, after the termination of its contract with Brunckhorst, Coastal alleged it had a business expectancy to sell competitive products to its former customers, but "Brunckhorst interfered with that expectancy by 'threatening' Coastal's former customers in order to prevent them from buying [a competing product line] from Coastal." Frank Brunckhorst, 542 F. Supp. 2d at 464. Under Virginia law, the court dismissed the claim because "[even though] perhaps unsavory, Brunckhorst tactics in threatening to withdraw supplies of Boar's Head products to those retailers who decided to purchase [the competiting] products from Coastal were within its legal rights." *Id.* The court further found that apart from Coastal's conclusory **[*115]** allegation the counterclaim did not allege any reference to "illegal or independently tortious" means or methods that "violate an established standard of a trade or profession, or involve unethical conduct." *Id.* Thus, Graco argues that its Letter simply informed its distributors that it preferred that they carry only Graco products because taking on an additional competitive product line may significantly reduce the best efforts of a Graco distributor to sell Graco products. Thus, Graco contends that its conduct was a justifiable method of protecting its business interests, and not "transgressive of generally accepted standards of common morality." Lamorte Burns, 167 N.J. at 306. Graco also asserts that Gama failed to sufficiently allege malice because Gama merely recited that Graco "acted intentionally and without justification." Foxtons, 2008 N.J. Super. Unpub. LEXIS 189, 2008 WL 465653, at *7. The Court disagrees.

Gama argues that sending such a Letter or literature is not simply dismissed as "a lawful method of competition" or "at most mere puffing." Buono Sales, Inc. v. Chrysler Motors Corp., 363 F.2d 43, 49 (3d Cir. 1966). Rather, the Third Circuit has found that, under New Jersey law, a "defendant's carefully planned **[*116]** method of enticing" a plaintiff's customers away from plaintiff and to defendant constitutes tortious interference with plaintiff's business. *Id.* Similarly, Gama argues and the Court agrees that Gama has sufficiently pled a claim of tortious interference here.

Moreover, Gama contends that it sufficiently stated a claim even without the Letter because Graco does not contest that it has knowingly made false and disparaging comments about Gama's businesses and products to customers in the trade. Counterclaim PP 26, 30-31. In addition, Graco allegedly gave its customers ultimatums not to carry Gama's products. *Id.* P 32. Courts applying New Jersey law have permitted claims of such "sharp dealing", where neither the normal nor the expected course of practice is followed and a defendant strays from "the rules of the game." Print Mart-Morristown, 116 N.J. at 757-58. [30] Gama alleges a similar type of activity to that held actionable in *Print Mart-Morristown,* **[*117]** and thus, accepting all of Gama's allegations as true, Gama alleges the malice

---

[29] Graco argues that Gama "implicitly conceded that it has failed to 'establish with reasonable certainty a prospective economic relation." Pl. Reply at 8-9. However, Gama states that it intends to amend its counterclaims with the actual dollar amount it allegedly lost due to Graco's conduct. Gama Opp. at 23 & n. 4. Because a plaintiff must only allege that the injury caused damages to state a tortious interference cause of action, and need not specify what the actual damages were at this stage of litigation, Graco's argument is unavailing. Matrix, 870 F. Supp. at 1249.

[30] Citing, e.g., Harris v. Perl, 41 N.J. 455, 461, 197 A.2d 359 (1964); Buono Sales, Inc. v. Chrysler Motors Corp., 363 F.2d 43, 49 (3d Cir. 1966) (holding that under New Jersey law an automobile manufacturer could be held liable for tortious interference with prospective economic relations, where an auto maker wrote to DeSoto purchasers and recommended that buyers have their cars serviced at dealerships that did not handle DeSoto in an effort to phase out dealerships of discontinued DeSoto model), *cert. denied,* ***385 U.S. 971, 87 S. Ct. 510, 17 L. Ed. 2d 435 (1966)***, appeal after remand, 449 F.2d 715 (1971); Somers Constr. Co. v. Bd. of Ed., 198 F. Supp. 732 (D.N.J. 1961) (permitting a tortious interference claim where the complaint alleged that architects had maliciously advised board of education to accept a higher bid for construction of new high school).

element. Accordingly, Gama has stated a claim for tortious interference with business advantage and thus the Court denies Graco's request to dismiss this claim.

b. Trade Libel Claim

To assert a claim of trade libel or disparagement, the plaintiff must demonstrate (1) publication, **[*118]** (2) with malice, such as knowingly making false statements or with reckless disregard for their falsity, (3) of false allegations concerning its property, product or business, and (4) special damages. *See* *Floorgraphics, Inc. v. News America Marketing in-Store Services, Inc., No. 04-3500, 2008 U.S. Dist. LEXIS 34143, 2008 WL 1901107, at *3 (D.N.J. Apr. 24, 2008)*; *Mayflower Transit, LLC v. Prince, 314 F. Supp. 2d 362, 378 (D.N.J. 2004)* (citing *Sys. Operations Inc. v. Scientific Games Dev. Corp., 555 F.2d 1131, 1140 (3d Cir. 1997))*.

Graco argues that Gama fails to state a claim for trade libel and product disparagement because it does not identify any publication that could be verified and proven false nor has it plead special damages. First, Graco contends that Gama fails to identify an actionable statement and specifically, the following allegations in Gama's Counterclaim are not actionable: Graco's Letter to distributors informing them of Graco's intention to review their business relationship should they add a competing product line, Counterclaim P 20; Graco's statements that Gama is selling "old" or "outmodeled" Gusmer technology, *Id.* P 26; and Graco personnel's false statements concerning Gama's continued viability **[*119]** and the quality of Gama's product line. *Id.* P 27. Graco argues that each of these statements either do not contain false statements or cannot be proven false. Graco further contends that Gama's allegations that Graco representatives falsely claimed to customers that Gama would cease to be in operation by the end of 2008 and that the customers would be "stuck with [Garraf products] when Graco forces Gama out of business," *Id.* PP 29-31, are merely predictions about future market conditions and not actionable statements of fact. Pl. Mot. at 37. Graco argues that these statements are merely an expression of Graco's business opinion and intentions and truth is a defense; thus, Gama fails to plead an actionable statement. [31] Second, Graco argues that Gama fails to plead special damages with particularity, as required by New Jersey law.

Gama, however, argues that it did adequately plead trade libel, and more specifically actionable statements. Gama asserts that Graco's false statements are sufficient allegations of trade libel because **[*120]** the statements are "publication[s] of [] matter[s] derogatory to the plaintiff's property or business, of a kind designed to prevent others from dealing with him or otherwise to interfere with plaintiff's relations with others." *Patel v. Soriano, 369 N.J. Super. 192, 246-47, 848 A.2d 803 (App. Div. 2004)*. Much like the parties here dispute every claim and allegation, the parties also argue about one another's reliance on specific case law relating to trade libel and defamation claims and whether Gama's allegations constitute actionable statements under trade libel. Specifically, Gama argues that Graco relies on cases that focus on defamation rather than trade libel. *See* Gama Opp. at 26. On the other hand, Graco argues that Gama never actually contends that it pleads actionable statements of fact, but rather only disputes the law. Pl. Reply at 10. Although there are some significant differences between trade libel and defamation claims, "[m]any statements effectuate both harms." *Patel, 369 N.J. Super. at 247*. "[O]ne may disparage plaintiff's business by reflecting upon its character, the manner in which it is conducted, or its popularity or danger, and not affect any property." *Id. at 248* (internal **[*121]** citations omitted). Further, in a disparagement action, the plaintiff must show "proof of publication of material derogatory to the quality of a plaintiff's business, or to his business in general, of a kind calculated to prevent others from dealing with him, or otherwise to interfere adversely with his relations with others." *Id.*

In the instant case, Gama alleges that Graco knowingly made false statements to the public and members of the trade about Gama's business and product lines, including statements about its business, products, product offerings, technology, operations, and business plans. Counterclaim PP 25-27, 29-33. Thus, Gama alleges that Graco made false statements derogatory to Gama's property or business, of a kind designed to prevent others from dealing with Gama or otherwise to interfere with Grama's relations with others. *See* *Patel, 369 N.J. Super. at 246-47*. Accordingly, Gama has properly plead a claim for trade libel.

---

[31] The Court notes that such defenses are inappropriate at this stage of litigation -- on a motion to dismiss when all factual allegation are accepted as true.

A trade libel or disparagement claim also requires that a prevailing plaintiff prove special damages by establishing pecuniary loss that has been realized or liquidated, such as lost sales, or the loss of prospective contracts with customers. *See* Patel, 369 N.J. Super. at 248 **[*122]** (noting that traditionally a plaintiff was required to identify particular business interests who have refrained from dealing with him, or explain the impossibility of doing so, but where requiring such identification is unreasonable, proof of lost profits resulting from breach of contract may suffice, particularly where the loss is shown with reasonable certainty and where the possibility that other factors caused the loss is satisfactorily excluded. Id. at 248-49). At this stage of the litigation, however, Gama adequately pleads special damages. Gama alleges that it was damaged by Graco's conduct because it lost sales to established customers, existing distributors dropped its product lines, and it was prevented from acquiring new customers that were also recipients of the Letter. Counterclaim PP 24, 32-33. While these allegations are sufficient here, to ultimately prevail on this claim, Gama must identify the businesses who stopped dealing with it, or explain why it cannot prove lost profits with reasonable certainty while excluding the other factors that could cause the loss. *See* Patel, 369 N.J. Super. at 248-49. Accordingly, the Court denies Graco's request to dismiss this claim **[*123]** pursuant to Rule 12(b)(6).

c. New Jersey Fair Trade Act & Unfair Competition Claims

Graco contends that Gama fails to state a claim under the New Jersey Fair Trade Act, N.J. Stat. Ann. § 56:4-1, and for unfair competition, and thus, the Court should dismiss these claims. Courts have repeatedly held that § 56:4-1 is the state statutory equivalent of Section 43(a) of the Lanham Act, 15 U.S.C. § 1125(a), and thus the same pleading standard is required. *See, e.g.,* SK & F, Co. v. Premo Pharm. Labs., Inc., 625 F.2d 1055, 1066 (3d Cir. 1980). Graco argues that Gama does not provide any facts or explanation as to how it violated the New Jersey Fair Trade Act, allege any practices that constitute false advertising or misdesignation of origin, nor plead the elements of a claim.

In addition, New Jersey and federal unfair competition claims are measured by identical standards. *See* Primepoint, L.L.C. v. PrimePay, Inc., 545 F. Supp. 2d 426, 431-32 (D.N.J. 2008) (citing A&H Sportswear, Inc. v. Victoria's Secret Stores, Inc., (" A&H V"), 237 F.3d 198, 210 (3d Cir. 2000)). Graco argues that Gama has failed to adequately allege a claim for unfair competition or provide any explanation regarding the grounds **[*124]** of its claim.

Gama, however, contends that it has adequately pled these claims because Graco's conduct "falls below any standards of fair play or business fairness." Gama Opp. at 28. Gama argues that Graco has employed improper tactics to stifle competition in the IPPE industry, has monopolized the IPPE market, and has exerted its influence to exclude Gama from competing against it. For support that it has adequately pled these claims, Gama argues that it adequately pled trade libel and disparagement under Section 43(a) of the Lanham Act, and "Graco does not dispute that its other conduct supports the unfair competition claims." Gama Opp. at 28-29. Because Gama has pled actionable conduct under Section 43(a) of the Lanham Act, *see* Part III.B.2.b., *supra.,* and thus, the elements of a New Jersey Fair Trade Act or unfair competition claim, Gama has sufficiently alleged these claims. Accordingly, the Court denies Graco's request to dismiss these claims.

3. Graco's Request to Stay Claim

If the Court denies Graco's motion to dismiss Gama's counterclaims, Graco requests, in the alternative, that the Court bifurcate Gama's claims. Gama argues that Graco has made such a request to keep competition **[*125]** out of the domestic market as long as possible and tie Gama in round after round of trials and discovery. Courts may bifurcate trials for "convenience, to avoid prejudice, or to expedite and economize." Fed. R. Civ. P. 42(b). Moreover, bifurcation "remains the exception rather than the rule" even though "courts have generally been more willing to bifurcate patent trials than other types of cases." Innovative Office Prods. v. SpaceCo, Inc., No. 05-4037, 2006 U.S. Dist. LEXIS 29439, 2006 WL 1340865, at *1 (E.D. Pa. May 15, 2006) (citation omitted). In this case, however, Graco's contract and tort claims are not dispositive of Gama's remaining counterclaims and all of the claims focus on the business practices and conduct of all the parties. It is senseless to try Graco's claims first and Gama's thereafter. The Court does not see a need to bifurcate the Counterclaim. Accordingly, the Court denies Graco's request.

IV. Conclusion

For the foregoing reasons, Defendants' Motions are granted in part and denied in part, and Plaintiffs' Motion is granted in part and denied in part. Specifically, the Court grants Defendants' requests to dismiss Count Three of Plaintiffs' Complaint without prejudice and Graco's Motion **[*126]** to dismiss Counts One and Two of Commette and Gama's Counterclaims without prejudice, and grants Defendants' requests to dismiss Count Nine of the Complaint. The Court denies Defendants' requests to dismiss Count Six and Graco is directed to re-plead its Lanham Act claims under *15 U.S.C. § 1125(a)(1)* within ten (10) days. Further, the Court denies the parties' Motions with respect to all remaining claims.

2009 U.S. Dist. LEXIS 28758 *; 2009 WL 918933

GUIMERFE, INC., Plaintiff vs ROSA PEREZ-PERDOMO in her official capacity as Secretary of the Puerto Rico Health Department, RYDER MEMORIAL HOSPITAL and HOSPICIO SAN LUCAS, Defendants

Core Terms

dormant, docket entry, abstention, antitrust, motion to dismiss, home care, competitor, facilities, Movants

Counsel: **[*1]** For Guimerfe, Inc., Plaintiff: Miguel Oppenheimer, LEAD ATTORNEY, Oppenheimer Rios & Assoc, Carolina, PR.

For Rosa Perez-Perdomo, in her official capacity Secretary of the Puerto Rico Health Department, Defendant: Anabelle Quinones-Rodriguez, Department of Justice, San Juan, PR.

For Ryder Memorial Hospital, Hospicio San Lucas, Defendants: Lee Sepulvado-Ramos, LEAD ATTORNEY, Sepulvado & Maldonado, PSC, San Juan, PR; Leila S. Castro-Moya, LEAD ATTORNEY, Rovira-Rodriguez Attorneys and Counsellors at Law, Hato Rey, PR.

Judges: CARMEN CONSUELO CEREZO, United States District Judge.

Opinion by: CARMEN CONSUELO CEREZO

Opinion

OPINION AND ORDER

Now before the Court is a challenge to the constitutionality of Puerto Rico's regulatory scheme regarding the establishment and relocation of home health care facilities, created pursuant to *24 L.P.R.A. §334, et. seq.,* which requires the issuance of Certificates of Necessity and Convenience [1] (CNC) by the Puerto Rico Department of Health.

According to the allegations of the complaint, in March, 2004, plaintiff Guimerfe, Inc. (Guimerfe) applied for a CNC to establish a pediatric home care facility to serve the eastern region of Puerto Rico (P3). The application for the

---

[1] Title ***24 L.P.R.A. §334(e)*** defines a Certificate of Necessity and Convenience as:

> A document issued by the Secretary of Health authorizing a person to carry out any of the activities covered by *§§334-334j* of this title, certifying that the same is necessary **[*2]** for the population it is to serve and that it will not unduly affect the existing services, thus contributing to the orderly and adequate development of health services in Puerto Rico.

certificate, the issuance of which was opposed by defendants Ryder Memorial Hospital (Ryder) and Hospicio San Lucas (San Lucas), was denied in July, 2007.

Guimerfe in this suit alleges that the application of the CNC requirement to home care facilities in Puerto Rico violates the *Supremacy Clause*, the dormant *Commerce Clause* and its substantive due process. Plaintiff further alleges that Ryder and San Lucas "have entered into a common collusive agreement to utilize the CNC certification system to prevent newcomers from entry into the home care market in Puerto Rico and perpetuate a market monopoly," (P51) in violation of the Sherman Act, *15 U.S.C. §1, et seq.*, and the Clayton Act, *15 U.S.C. §§12-27*.

The action is now before us on Ryder and San Lucas' Motion to Dismiss and/or **[*3]** for Abstention filed May 1, 2008 (**docket entry 19**) [2] , which plaintiff opposed (docket entries 23 and 24), and to which movants replied (docket entry 27). Defendant Secretary of Health Rosa Perez-Perdomo (Perez-Perdomo) joined the motion (**docket entry 28**). [3] Defendants seek dismissal or abstention on the basis of a myriad of reasons, of which they discuss the following:

(1) This court should abstain from entertaining this case under the Burford Abstention Doctrine or dismiss it in deference to the expertise of the Department of Health;

(2) There is no dormant *Commerce Clause* claim because all parties are local entities and it is not a protectionist measure; and

(3) There is no Sherman Act claim because movants are protected by the Noerr-Pennington Immunity Doctrine for actions taken to further their business interests.

The Burford Abstention

Movants provide a considerable discourse on the factual and procedural administrative agency proceedings leading up to this suit. Flowing from that history, they request that we dismiss the action pursuant to the abstention doctrine developed in *Burford v. Sun Oil Co., 319 U.S. 315, 333-34, 63 S. Ct. 1098, 87 L. Ed. 1424 (1943)*, and its progeny, by which the United States Supreme Court set forth the policy that a federal court sitting in equity must decline to interfere with the proceedings or orders of state administrative agencies when: 1) there are difficult policy problems of substantial public import whose importance transcends the result in the case at bar; or 2) where the exercise of federal review of the question in a case and in similar cases would be disruptive of state efforts to establish a coherent policy with respect to a matter of substantial state concern. Defendants state that the Burford abstention seeks to prevent federal courts from bypassing a state administrative scheme and resolving issues of state law and policy that **[*5]** are committed, in the first instance, to expert administrative solution. (Memorandum of law, docket entry 21, page 8). That is, federal courts should not intervene with cases when a party has a judicial review remedy available in order to seek revision of a determination by a state administrative agency.

A review of Guimerfe's complaint, however, demonstrates that it is not challenging in this Court the specifics of the denial of its application for a CNC or asking that we intervene in the proceedings. Rather, it is challenging the constitutionality of the entire regulatory scheme of the CNC Act and its regulations for implementation, on its face and as it is applied to home healthcare facilities. It claims that the requirement violates the *Supremacy Clause*, Sec I, p. 5; the dormant *Commerce Clause*, Sec. II, p.6; and Substantive Due Process, Sec. III, p.10.

---

[2] The memorandum of law was filed separately (docket entry 21). In support of its motion, defendants have also included as exhibits the Department of Health's Notice of Resolution, Resolution, and the Report from Hearing Examiner (docket entry 20). (*See, also,* English translation (docket entry 26)). Inasmuch as the motion is one for dismissal and not summary judgment, only **[*4]** their existence, and not the specific content, has been considered.

[3] The Motion Joining and Supplementing Request for Dismissal (**docket entry 28**) is NOTED.

Therefore, a *Burford* abstention is inappropriate in this case.

The Dormant *Commerce Clause*

Many of the same issues were raised in a similar challenge to the CNC Act and were was addressed by the Court of Appeals for the First Circuit in *Walgreen Co. v. Rullan, 405 F.3d. 50, (1st Cir. 2005)*. That case focused on the law's application **[*6]** to pharmacies. Plaintiff Walgreen Co., an out of state retail pharmacy chain, asserted that the statute impermissibly discriminates against or excessively burdens interstate commerce and violates due process.

In its opinion in *Walgreen,* the Court stated:

> Under the dormant *Commerce Clause*, if a state law has either the purpose or effect of significantly favoring in-state commercial interests over out-of-state commercial interests, the law will "routinely" be invalidated "unless the discrimination is demonstrably justified by a valid factor unrelated to economic protectionism." If the state law regulates in state and out-of -state interests evenhandedly, the statute will be upheld "unless the burden imposed on [interstate] commerce is clearly excessive in relation to the putative local benefits."

Id., p.55 (citations omitted).

The dormant *Commerce Clause* prohibits protectionist state regulation designed to benefit in-state interests by burdening out-of-state competitors. *Grant's Dairy--Maine, LLC v. Commissioner of Maine Dept. of Agriculture, 232 F.3d. 8, 18-19 (1st Cir. 2000)*.

While the possibility for a dormant *Commerce Clause* conflict such as the one present in *Walgreen* exists, the controversy **[*7]** is not now before us. As stated in the complaint at P12: "Plaintiff, Guimerfe, Inc., is a corporation duly incorporated under the laws of the Commonwealth of Puerto Rico with its principal place of business at . . . Caguas, Puerto Rico?." Plaintiff is not an out-of-state competitor. Inasmuch as the Constitution confines the jurisdiction of the federal courts to actual cases and controversies, *U.S. Const. Art. III, §2, cl.1*. *Connectu LLC v. Zuckerberg, 522 F.3d. 82, 88 (1st Cir. 2008)*, the unconstitutionality of the CNC Act, in its application to home healthcare facilities, as violating the dormant *Commerce Clause* would have to be raised by an out-of-state entity. [4]

The Antitrust Claims

Plaintiff seeks actual and treble damages as well as other relief from **[*8]** Ryder and San Lucas for their allegedly unlawful efforts to exclude Guimerfe from entering the home care market (P9). It alleges that these defendant have consciously committed to a common and collusive scheme of opposing every CNC application for the establishment of home care facilities in order to exclude competition and perpetuate its market monopoly (P12), in violation of the Sherman and Clayton Acts, *15 U.S.C. §§1-27*.

In their motion to dismiss, defendants contend that there is no Sherman Act claim because their actions are "protected by the Noerr-Pennington Immunity Doctrine and/or are not an attempt to monopolize since they were sought in order to further their business interests." Defendants' Memorandum of Law, Docket entry 21-2, page 24. Movants cite *Great Escape, Inc. v. Union City Body Co., 791 F.2d 532, 541 (7th Cir. 1986)*, for their argument that the mere intention to exclude competition and to expand one's business are not sufficient to show specific intent to monopolize, an essential element in private, antitrust litigation. That is, to present a prima facie case of attempt tp monopolize, plaintiff must show evidence of a specific intent to monopolize any part of commerce, **[*9]** plus

---

[4] Guimerfe, in its memorandum in opposition, refers to the spirit of *Clarke v. Securities Industry Ass'n, 479 U.S. 388, 107 S. Ct. 750, 93 L. Ed. 2d 757 (1987)* to convince us that intrastate players are reliable plaintiff that may raise dormant *Commerce Clause* challenges where there the discriminatory ordinance harms both intrastate and interstate commerce. This argument, however, still fails to overcome the absence of a case or controversy that is ripe for adjudication.

anticompetitive conduct directed to the accomplishment of that unlawful purpose. *Greyhound Computer Corp. v. International Business Machines Corp., 559 F.2d 488, 504 (9th Cir. 1977)*.

Movants further rely on the *Noerr Pennington* antitrust immunity doctrine, which evolved from two Supreme Court cases, *United Mine Workers v. Pennington, 381 U.S. 657, 670, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*, and *Eastern R.R. Conference v. Noerr Motor Freight, 365 U.S. 127, 135-38, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*.

> That doctrine, which derives from the *First Amendment's* guarantee of "the right . . . to petition the government for redress of grievances," *U.S.Const. Amend. I*, shields from antitrust liability entities who join together to influence government action --even if they seek to restrain competition or to damage competitors. The doctrine applies to "petitions" before legislatures, administrative agencies and courts. Even false statements presented to support such statements are protected.

Davric Maine Corporation v. Rancourt, 216 F.3d. 143, 147 (1st Cir. 2000)(citations omitted).

> The federal antitrust laws [ ] do not regulate the conduct of private individuals in seeking anticompetitive action from the government. This doctrine . . . rests ultimately **[*10]** upon a recognition that the ***antitrust law***, "tailored as they are for the business world, are not at all appropriate for application in the political arena." That a private party's political motives are selfish is irrelevant:"*Noerr* shields from the Sherman Act a concerted effort to influence public officials regardless of intent or purpose."

City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S.365, 379-80, 111 S. Ct. 1344, 113 L. Ed. 2d 382(1991). (Citations omitted.)

The *Noerr-Pennington* immunity doctrine, however, does have a "sham" exception, which withholds immunity when a party's resort to governmental process from antitrust immunity when such resort is objectively baseless and intended only to burden a rival with the governmental-decision making process itself. *Davric Maine Corporation, 216 F.3d. at 147*.

> The "sham" except encompasses situation in which persons use the governmental process--as opposed to the outcome of that process--as an anticompetitive weapon. A classic example is the filing of frivolous objections to the license application of a competitor, with no expectation of achieving denial of the license but simply in order to impose expense and delay. A "sham" situation involves a defendant whose activities **[*11]** are not genuinely aimed at procuring favorable government action at all, not one genuinely seeks to achieve his governmental result, but does so through improper means.

City of Columbia, 499 U.S. at 380 (citations omitted).

It is exactly the type of conduct in the above-cited example--preventing a competitor from entering the market by barricading the way with an expensive, time-consuming web of unwarranted, governmental processing--which Guimerfe avers. Whether this is, in fact, the case, and whether or not defendant fall within the immunity provided by the *Noerr-Pennington* doctrine, are highly factual determinations inappropriate for a dismissal motion.

For the above-stated reasons, defendants' Motion to Dismiss and/or for Abstention (**docket entry 19**) is GRANTED in part and DENIED in part. The motion to dismiss is GRANTED as to the claim under the dormant *Commerce Clause*, which is DISMISSED. The remainder of the motion to dismiss or abstain, is DENIED in all respects.

SO ORDERED.

At San Juan, Puerto Rico, on March 31, 2009.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

Under *Fed. R. Civ. P. 12(b)(6)*, a district court must dismiss a complaint if it fails to state a claim upon which relief can be granted. To survive a motion to dismiss for failure to state a claim, the plaintiff must allege enough facts to state a claim to relief that is plausible on its face. Specific facts are not necessary; the statement need only give the defendants fair notice of what the claim is and the grounds upon which it rests. In general, the inquiry is limited to the allegations in the complaint, which are accepted as true and construed in the light most favorable to the plaintiff.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Complaints, Requirements for Complaint**

Under *Fed. R. Civ. P. 8* specific facts are not necessary; the statement need only give the defendant fair notice of what the claim is and the grounds upon which it rests.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Judicial Notice > General Overview

HN3[] **Motions to Dismiss, Failure to State Claim**

If dismissal under *Fed. R. Civ. P. 12(b)(6)* is warranted, it is generally without prejudice, unless it is clear the complaint cannot be saved by any amendment. In resolving a motion to dismiss, a court may take judicial notice, upon request, as provided by *Fed. R. Evid. 201*, without transforming a motion to dismiss into one for summary judgment.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN4[] **Sherman Act, Scope**

See *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > Claims

HN5[] **Sherman Act, Claims**

A *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, claim requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made. That is, there must be enough facts presented to raise a reasonable expectation that discovery will reveal evidence of illegal agreement. Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement. And, of course, a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely.

Antitrust & Trade Law > Sherman Act > Claims

HN6[] **Sherman Act, Claims**

For pleading purposes, allegations of antitrust conspiracy need not be detailed on a defendant by defendant basis.

Antitrust & Trade Law > Sherman Act > Claims

HN7[] **Sherman Act, Claims**

Information exchanges help to establish an antitrust violation only when either (1) the exchange indicates the existence of an express or tacit agreement to fix or stabilize prices, or (2) the exchange is made pursuant to an express or tacit agreement that is itself a violation of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, under a rule of reason analysis.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN8[] **Sherman Act, Scope**

Market concentration and market shares are insufficient, standing alone, to establish a Sherman Act violation.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN9[] **Sherman Act, Claims**

Rising prices do not themselves permit an inference of a collusive market dynamic. Even in a concentrated market, the occurrence of a price increase does not in itself permit a rational inference of conscious parallelism or supracompetitive pricing. Prices may rise due to market forces, and that it is entirely possible that increases in price and output could occur simultaneously where there is growing product demand. Under these conditions, a jury may not infer competitive injury from price and output data absent some evidence that tends to prove that output was restricted or prices were above a competitive level.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN10[] **Cartels & Horizontal Restraints, Price Fixing**

As a general proposition, it is true that agreements between competitors may be entirely benign.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Evidence > Admissibility > Circumstantial & Direct Evidence

HN11[] **Cartels & Horizontal Restraints, Price Fixing**

Direct evidence will rarely be available to prove the existence of a price fixing conspiracy. It is for that reason that circumstantial evidence is the lifeblood of ***antitrust law***.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Admissibility > Circumstantial & Direct Evidence

HN12[] **Sherman Act, Claims**

Ambiguous evidence should be considered in antitrust claims because most cases are constructed out of a tissue of such statements and other circumstantial evidence.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN13[] **Sherman Act, Claims**

Generally, there is nothing particularly nefarious in attending industry functions. Nor is there anything necessarily improper with their participation or membership in industry trade associations. Indeed, trade associations serve a beneficial and legitimate function. That notwithstanding, courts have recognized that trade association affiliations and attendance at industry events may be alleged to show that putative conspirators had the opportunity and means to develop and/or further their alleged collusive scheme. And while such allegations cannot alone support price fixing conspiracy claims, such participation demonstrates how and when defendants had opportunities to exchange information or make agreements.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN14[] **Sherman Act, Claims**

Evidence concerning a prior conspiracy may be relevant and admissible to show the background and development of a current conspiracy.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN15[] **Remedies, Damages**

The U.S. Supreme Court has held that indirect purchasers generally may not sue for money damages under § 4 of the Clayton Act, *15 U.S.C.S. § 15*. In response to that holding, a number of states passed "repealer" statutes which expressly allow indirect purchasers to recover money damages for antitrust violations under state law.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN16[] **Standing, Requirements**

Certain factors for determining whether a plaintiff who has borne an injury has antitrust standing include: (1) the nature of the plaintiff's alleged injury; that is, whether it was the type the antitrust laws were intended to forestall; (2) the directness of the injury; (3) the speculative measure of the harm; (4) the risk of duplicative recovery; and (5) the complexity in apportioning damages. To conclude that there is antitrust standing, a court need not find in favor of the plaintiff on each factor. Instead, courts are to balance the factors, giving great weight to the nature of the plaintiff's alleged injury.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

Governments > Courts > Judicial Precedent

HN17[] **Preliminary Considerations, Federal & State Interrelationships**

In analyzing questions of state law, federal courts are bound by the decisions of the state's highest court. It is settled that where the state's highest court has not decided an issue, the task of the federal courts is to predict how the state high court would resolve it. If there is relevant precedent from the state's intermediate appellate court, the federal court must follow the state intermediate appellate court decision unless the federal court finds convincing evidence that the state's supreme court likely would not follow it. Relevant decisions of courts in other jurisdictions also should be considered.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN18[] **Standing, Requirements**

The first factor for determining whether a plaintiff who has borne an injury has antitrust standing is whether the injury alleged by plaintiffs is the type the antitrust laws are intended to prevent. A plaintiff may only pursue an antitrust action if it can show antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The requirement that the alleged injury be related to anti-competitive behavior requires, as a corollary, that the injured party be a participant in the same market as the alleged malefactors. The anticompetitive effects must be felt in the relevant market. To determine whether an injured plaintiff is indeed a market participant, the focus is upon the reasonable interchangeability of use or the cross-elasticity of demand between the product or services involved.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN19[] **Standing, Requirements**

The second factor for determining whether a plaintiff who has borne an injury has antitrust standing looks to whether the alleged injury was the direct result of defendants' allegedly anticompetitive conduct. To assess the directness of this injury, courts look to the chain of causation between the injury and the alleged restraint in the market.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN20[] **Standing, Requirements**

The final third and fifth factors for determining whether a plaintiff who has borne an injury has antitrust standing--the speculative nature of the harm and the complexity in apportioning damages--may be considered together.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN21[] **Standing, Requirements**

The risk to be avoided under the duplicative recovery factor for determining whether a plaintiff who has borne an injury has antitrust standing is that potential plaintiffs may be in a position to assert conflicting claims to a common fund thereby creating the danger of multiple liability for the fund. Such a concern, however, generally is inapposite in the context of indirect purchaser state law antitrust claims.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN22[] **Trade Practices & Unfair Competition, State Regulation**

The Arkansas Deceptive Trade Practices Act (ADTPA), Ark. Code Ann. § 4-88-101 et seq., prohibits deceptive and unconscionable trade practices, including engaging in any other unconscionable, false, or deceptive act or practice in business, commerce, or trade. Ark. Code Ann. § 4-88-107(a)(10); Ark. Code Ann. § 4-88-108 prohibits deception, fraud, and false pretense. Arkansas courts have construed the statute broadly. In addition, several district courts interpreting the ADTPA have found that the term "unconscionable trade practices" is sufficiently broad to encompass price fixing.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN23[] Trade Practices & Unfair Competition, State Regulation

The Arkansas Supreme Court's view is that an unconscionable act is one that is an act that affronts the sense of justice, decency, or reasonableness, including acts violative of public policy or a statute.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN24[] Trade Practices & Unfair Competition, State Regulation

The District of Columbia's Consumer Protection Practices Act, D.C. Code § 28-3901, is intended to assure that a just mechanism exists to remedy all improper trade practices and deter the continuing use of such practices. D.C. Code § 28-3901(b)(1). The Act defines its terms comprehensively so that it can provide a remedy for all improper trade practices.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN25[] Trade Practices & Unfair Competition, State Regulation

The District of Columbia's Consumer Protection Practices Act (DCCPPA), D.C. Code § 28-3901, proscribes the imposition of prices that are unconscionably high, i.e., prices that are unreasonably favorable to the seller, where the buyer did not have a meaningful choice of alternatives under the circumstances. The DCCPPA subsumes a Sherman Act claim and creates an indirect purchaser cause of action for conspiratorial price fixing regardless of whether defendants have engaged in deceptive conduct.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > General Overview

HN26[] Trade Practices & Unfair Competition, State Regulation

Haw. Rev. Stat. § 480-2 prohibits (1) unfair methods of competition and (2) unfair or deceptive acts or practices. Haw. Rev. Stat. § 480-2(a), (d) and (e). Under Haw. Rev. Stat. § 480-13.3(a)(1), a class action for claims for a violation of chapter 480 other than claims for unfair or deceptive acts or practices may be filed, and may be prosecuted on behalf of indirect purchasers by a person other than the attorney general, provided that the class plaintiffs first serve a copy of the complaint on the attorney general. The attorney general has sole discretion as to whether the state will proceed with the action or file its own action. § 480-13.3(a)(4). If the attorney general declines to so proceed, the class plaintiff shall have the right to proceed with the action. § 480-13.3(a)(5)(C). Subdivision (b) states that § 480-13.3 shall not limit the rights of consumers to bring class actions against any person based on unfair or deceptive acts or practices declared unlawful by section 480-2.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN27[] **Trade Practices & Unfair Competition, State Regulation**

The Maine Unfair Trade Practices Act prohibits unfair methods of competition as well as unfair or deceptive conduct of any trade. *Me. Rev. Stat. Ann. tit. 5, § 207* (2008). The Maine Supreme Court has held that in pricing cases under the Act the inquiry is whether the price has the effect of deceiving the consumer, or inducing her to purchase something that she would not otherwise purchase.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN28[] **Trade Practices & Unfair Competition, State Regulation**

The New Mexico Unfair Practices Act, *N.M. Stat. Ann. § 57-12-1 et seq.*, prohibits both unfair deceptive trade practices and unconscionable trade practices in the conduct of any trade or commerce. *N.M. Stat. Ann. § 57-12-3*. Under New Mexico law, an unconscionable trade practice is an act or practice which to a person's detriment: (1) takes advantage of the lack of knowledge, ability, experience or capacity of a person to a grossly unfair degree; or (2) results in a gross disparity between the value received by a person and the price paid. *N.M. Stat. § 57-12-2(E)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN29[] **State Regulation, Claims**

Federal courts generally permit actions under the New Mexico Unfair Practices Act, *N.M. Stat. Ann. § 57-12-1 et seq.*, in price-fixing cases provided that the plaintiff alleges a gross disparity between the price paid for a product and the value received.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN30[] **Trade Practices & Unfair Competition, State Regulation**

See *N.Y. Gen. Bus. Law § 349*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN31[] **State Regulation, Claims**

N.Y. Gen. Bus. Law § 349 is directed at wrongs against the consuming public. A plaintiff asserting a *§ 349* claim must prove three elements: first, that the challenged act or practice was consumer-oriented; second, that it was misleading in a material way; and third, that the plaintiff suffered injury as a result of the deceptive act.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN32[] **Trade Practices & Unfair Competition, State Regulation**

R.I. Gen. Laws § 6-13.1-2 provides that unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are unlawful. To determine whether a practice is "unfair" under the statute, the court is to consider: (1) Whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise-whether, in other words, it is within at least the penumbra of some common-law, statutory, or other established concept of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; (3) whether it causes substantial injury to consumers (or competitors or other businessmen).

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN33[] **Cartels & Horizontal Restraints, Price Fixing**

Price fixing is not within the ambit of the Unfair Trade Practices and Consumer Protection Act, *R.I. Gen. Laws § 6-13.1-1 et seq.* The statute defines "unfair methods of competition and unfair or deceptive acts or practices" to consist of 19 separately enumerated practices, none of which includes price fixing. *R.I. Gen. Laws § 6-13.1-1(6)(i)-(xix)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN34[] **Trade Practices & Unfair Competition, State Regulation**

See *W. Va. Code § 46A-6-101(1)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN35[] **Trade Practices & Unfair Competition, State Regulation**

Price fixing is not among the 16 enumerated definitions of unfair methods of competition and unfair or deceptive acts or practices. *W. Va. Code § 46A-6-102*. Rather, on their face, each of these definitions pertains to misrepresentations or deceptive practices relating to goods and services. For example, the statute prohibits acts such as passing off goods or services as those of another; using deceptive representations or designations of geographic origin in connection with goods or services; making false or misleading statements of fact concerning the reasons for, existence of or amounts of price reductions; and engaging in any other conduct which similarly creates a likelihood of confusion or of misunderstanding. *W. Va. Code § 46A-6-102*. In short, price fixing or similar anticompetitive conduct cannot be reasonably construed to fall within the scope of the West Virginia Consumer Credit and Protection Act, *W.V. Code § 46A-6-101 et seq.*

Civil Procedure > ... > Class Actions > Class Members > General Overview

HN36[] **Class Actions, Class Members**

A class cannot assert a claim on behalf of an individual that they do not represent. Where a representative plaintiff is lacking for a particular state, all claims based on that state's laws are subject to dismissal.

Opinion

[*1138] ORDER DENYING DEFENDANTS' MOTION TO DISMISS DIRECT PURCHASER COMPLAINT AND GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS INDIRECT PURCHASER COMPLAINT

[Docket 370-374, 376, 379, 382, 454]

This consolidated antitrust class action arises from an alleged horizontal price fixing conspiracy between various manufacturers, sellers and distributors of flash memory. Flash memory is a type of electronic memory chip that has become commonplace in a variety of electronic products, such as USB drives, digital cameras, iPhones and similar products. Two separate civil Complaints are pending. The first is the Consolidated Direct Purchaser Class Action Complaint ("Direct Purchaser Complaint"), brought by those who purchased flash memory directly **[**21]** from Defendants. The second is the Indirect-Purchaser Plaintiffs' Consolidated Class Action Complaint ("Indirect Purchaser Complaint"), filed by individuals and entities who purchased both stand-alone flash memory products and products that contain flash memory as a component. Both Complaints allege violations of section 1 of the Sherman Act, *15 U.S.C. § 1*. The Indirect Purchaser Complaint also includes antitrust, consumer protection and equitable claims under the laws of various states.

The parties now are before the Court on: (1) the Motion by All Defendants to Dismiss Direct Purchasers' Sherman Act Claims (Docket 371); and (2) the Motion to Dismiss Indirect Purchaser Plaintiffs' Consolidated Class Action Complaint (Docket 374). [1] Having read and considered the papers submitted, and being fully informed, the Court DENIES Defendants' motion to dismiss the Direct Purchaser Complaint and GRANTS IN PART and DENIES IN PART Defendants' motion to dismiss the Indirect Purchaser Complaint.

I. BACKGROUND

[1] Although Defendants have filed joint motions to dismiss, the following Defendants have filed their own motions to dismiss: Sandisk (Docket 370); Hitachi (Docket 372); Renesas (373); Hynix (Docket 376); and **[**22]** Toshiba (Docket 382).

A. OVERVIEW OF THE DEVELOPMENT OF THE FLASH MEMORY MARKET

There are several types of memory used in or with electronic devices; most notably, **[*1139]** flash memory, dynamic random access memory ("DRAM") and static random access memory ("SRAM"). Flash memory was initially developed in the 1980s by Defendant Toshiba. (Direct Purchaser ("DP") Compl. P 40.) [2] Unlike DRAM and SRAM, flash memory is "non-volatile," meaning that no power is needed to maintain the information stored in the chip. (Id. P 39.) The first generation of flash memory was known as NOR flash memory. (Id.) In 1987, Toshiba developed a second type of flash memory -- NAND flash memory -- which provided greater functionality at a lower cost. (Id. PP 41-43.) NAND flash memory is sold and marketed as a memory device, i.e., flash memory cards, USB drives, etc., and as a component part in other electronic devices, like Apple iPods or iPhones. (Id.)

According to Plaintiffs, the NAND flash **[**23]** memory industry exhibits a number of characteristics that have facilitated the alleged conspiracy to control pricing. (Id. P 44.) The NAND flash memory market is highly concentrated and is dominated by a "handful" of suppliers, i.e., Samsung, Toshiba, Renesas, Hynix and Micron. (Id. P 45.) Over 90 percent of the worldwide market for flash memory is controlled by three companies, Samsung, Toshiba and Hynix. (Id. P 46.) In addition, there are significant barriers to entry, as the cost to develop a modern NAND flash memory production facility can range from $ 4 to $ 5 billion. (Id. P 48.) The flash memory industry also is notable for its numerous cross-licensing and joint venture agreements that have spanned from the mid-1990s at least through the end of 2007. (Id. P 49.) These agreements, along with the Defendants' participation in various trade associations and meetings, ostensibly have facilitated their ability to collude and control flash memory prices. (Id. P 50-59.)

B. COLLUSION IN THE MARKET FOR ELECTRONIC MEMORY

Apparent price fixing in the memory market has caught the attention of the United States Department of Justice ("DOJ") which has launched investigations into the DRAM and **[**24]** SRAM markets. (Id. PP 60-65.) In the DRAM matter, Hynix and Samsung, who also are Defendants in this case, have pleaded guilty to price fixing, and have paid fines in the amount of $ 300 million and $ 185 million, respectively. (Id. P 60.) Defendants Hynix, Mitsubishi, Renesas, Samsung and Toshiba also are under investigation by the DOJ and/or are the subject of civil lawsuits relating to SRAM. (Id. P 62.)

Plaintiffs allege that the illegal pricing activity with respect to DRAM and SRAM is probative of and intertwined with Defendants' allegedly illegal activities in the market for NAND flash memory. (Id. PP 65, 78.) Like the DRAM/SRAM schemes, the purpose and goal of the conspiracy was to (a) coordinate pricing among competitors, (b) stabilize prices to ensure that they did not fall too low, and (c) raise prices when opportunities arose. (Id. PP 72-74.) In terms of its impact, the alleged conspiracy has artificially impacted prices for both NAND flash memory and products using such technology. (Id. PP 75-77.) As a commodity item, NAND flash memory is "highly price elastic" and subject to steep price declines as technology continues to advance. (Id.) Despite these market forces, manufacturers **[**25]** have been able to maintain their margins through artificially controlling the market. (Id.)

[*1140] In terms of overlap, Plaintiffs aver, *inter alia,* that the same employees of the Defendant companies (including those who pleaded guilty to criminal felonies in the DOJ's DRAM investigation) were responsible for pricing DRAM, SRAM and flash memory sold in the United States. (Id. PP 67-69.) These persons allegedly communicated with one another on a regular basis, which helped them to coordinate and control pricing across memory product lines. (Id. PP 79-81.) For instance, in 2001, the price for NAND flash memory, like DRAM pricing, experienced a decline in demand. (Id. P 86.) But through their continuing communications and contacts, in the next quarter Defendants were able to increase DRAM and NAND flash memory prices. (Id.) These "intercompetitor contacts" continued during the 2002 to 2006 time period, as evidenced by a number of emails from Samsung and

[2] These facts are taken from both the Direct Purchaser Complaint and Indirect Purchaser Complaint filed on February 7, 2008. For purposes of the Background section, the references are to the Direct Purchaser Complaint only.

other Defendants suggesting ways to maintain pricing. (Id. PP 89, 91-95.) Defendants allegedly continued their practice of entering into joint venture and cross-licensing agreements as yet another means to control the market. (Id. PP 106-108.)

In **[**26]** or about September 2007, the DOJ confirmed that it was investigating potential antitrust violations with respect to the NAND flash memory market. (Id. P 116.) Toshiba, Renesas and Samsung are among the entities that have received grand jury subpoenas in connection with the investigation. (Id. P 117.)

C. PROCEDURAL SUMMARY

Plaintiffs are individuals and entities who purchased NAND flash memory directly or indirectly from one or more Defendants from 1999 to the present (the "Class Period"). Defendants are alleged to have manufactured, sold, or distributed flash memory to customers throughout the United States during the Class Period. (Id. PP 3-20.) Plaintiffs allege Defendants and unnamed "coconspirators conspired to fix, raise, maintain and stabilize the price of NAND flash memory sold in the United States." (Id. P 1.) [3]

On February 7, 2008, Plaintiff Timothy Chanda filed a Consolidated Direct Purchaser Class Action Complaint ("Direct Purchaser Complaint") against the following Defendants: Samsung Electronics Company Ltd.; Samsung Semiconductor, Inc.; Hitachi, Ltd.; Renensas Technology Corporation; Renesas Technology America, Inc. (formerly known as Hitachi Semiconductor (America) Inc.; Hynix Semiconductor, Inc.; Hynix Semiconductor America, Inc.; Mitsubishi Electric Corporation; Mitsubishi Electric and Electronics USA, Inc.; SanDisk Corporation; Toshiba Corporation; Toshiba America, Inc.; and Toshiba America Electronic Components, Inc. (Id. PP 3-20.) Plaintiffs allege that they purchased NAND flash memory from one or more of the Defendants. (Id. P 2.) The Direct Purchaser Complaint alleges a single claim under *section 1 of the Sherman Act*. (Id. PP 130-135.)

On the same date, Plaintiffs filed their Indirect Purchaser Complaint against essentially the same Defendants named in the Direct Purchaser Complaint. (Docket 310, Indirect Purchaser ("IP") Compl. PP 50-66.) [4] Indirect Purchasers are 33 individuals and entities who claim they purchased stand-alone NAND flash memory **[*1141]** products **[**28]** (i.e., CompactFlash, SmartMedia, MultiMedia Card, Secure Digital Card, Memory Stick and USB flash drives) and products in which NAND flash memory is a substantial component. (Id. PP 48-49.)

The Indirect Purchaser Complaint alleges four claims for relief:

(1) Violation of Section 1 of the Sherman Act, *15 U.S.C. § 1*;

(2) Unjust Enrichment and Disgorgement of Profits under the laws of Arizona, Arkansas, California, the District of Columbia, Florida, Hawaii, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, Rhode Island, South Dakota, Tennessee, West Virginia and Wisconsin;

(3) Violation of State Antitrust and Unfair Competition Laws of Alabama, Arizona, California, the District of Columbia, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Mexico, North Carolina, South Dakota, Tennessee, West Virginia and Wisconsin; and

---

[3] On January 5, 2007, Plaintiff Trong Nguyen, on behalf of himself and others similarly situated, sued Defendants for violating section 1 of the Sherman Act, *15 U.S.C. § 1*. The Court later related and consolidated 23 cases with the Nguyen action. The Court appointed interim lead counsel for the Direct Purchaser Plaintiffs and Indirect Purchaser Plaintiffs on November 15, **[**27]** 2007. (Docket 256, 257.)

[4] The Indirect Purchaser Complaint adds Hitachi America, Ltd. and Hitachi Semiconductor America as defendants. (Indirect Purchaser ("IP") Compl. PP 60-61.)

(4) Violation of State Consumer Protection and Unfair Competition Laws of Arkansas, California, the District **[**29]** of Columbia, Florida, Hawaii, Kansas, Maine, Massachusetts, Nebraska, New Hampshire, Nevada, New Mexico, New York, North Carolina, Rhode Island and West Virginia. (Id. PP 176-222.)

II. LEGAL STANDARD

HN1[] Under *Federal Rule of Civil Procedure 12(b)(6)*, a district court must dismiss a complaint if it fails to state a claim upon which relief can be granted. To survive a motion to dismiss for failure to state a claim, the plaintiff must allege "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "Specific facts are not necessary; the statement need only give the defendant[s] fair notice of what … the claim is and the grounds upon which it rests." *Erickson v. Pardus, 551 U.S. 89, 127 S.Ct. 2197, 2200, 167 L. Ed. 2d 1081 (2007)* (internal quotation marks omitted); *Johnson v. Riverside Healthcare System, LP, 534 F.3d 1116, 1122 (9th Cir. 2008)*. [5] "In general, the inquiry is limited to the allegations in the complaint, which are accepted as true and construed in the light most favorable to the plaintiff." *Lazy Y Ranch Ltd. v. Behrens, 546 F.3d 580, 588 (9th Cir. 2008)*.

HN3[] If dismissal is warranted, it is generally without prejudice, unless it is clear the complaint cannot be saved by any amendment. See *Sparling v. Daou, 411 F.3d 1006, 1013 (9th Cir. 2005)*; *Gompper v. VISX, Inc., 298 F.3d 893, 898 (9th Cir. 2002)*. In resolving a motion to dismiss, a Court may take judicial notice, upon request, as provided by *Federal Rule of Evidence 201*, without transforming a motion to dismiss into one for summary judgment. See *MGIC Indem. Corp. v. Weisman, 803 F.2d 500, 503 (9th Cir. 1986)*.

[*1142] III. [**31] DIRECT PURCHASER COMPLAINT

A. SUFFICIENCY OF THE CONSPIRACY ALLEGATIONS

The Sherman Act, section 1, states in part that, ***HN4***[] "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. In Twombly, the Supreme Court held that ***HN5***[] a section 1 claim "requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made." *550 U.S. at 556*. That is, there must be enough facts presented "to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." Id. "Asking for *plausible grounds* to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement. And, of course, a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and 'that a recovery is very remote and unlikely.'" Id. (emphasis added, footnote and citations omitted).

Defendants assert that allegations in the Direct Purchaser Complaint are **[**32]** too vague and conclusory to comport with the pleading requirements of Twombly. As an initial matter, Defendants complain that the pleadings fail to allege the specific time, place, or person who had any meetings or communications regarding flash memory pricing or output. (Docket 371, Mot. at 11.) The Court disagrees. Among other things, the pleadings identify the companies and/or individuals who were directly involved in setting prices for NAND flash memory. (E.g., DP Compl.

---

[5] Two weeks after issuing Twombly, the Supreme Court clarified in Erickson that **[**30]** Twombly did not signal a switch to fact-pleading in the federal courts. Erickson reaffirmed that ***HN2***[] under *Rule 8* "[s]pecific facts are not necessary; the statement need only 'give the defendant fair notice of what the … claim is and the grounds upon which it rests.'" *127 S.Ct. at 2200* (quoting *Twombly, 550 U.S. at 555*); see also *Airborne Beepers & Video, Inc. v. AT&T Mobility LLC, 499 F.3d 663, 667-668 (7th Cir. 2007)* ("[t]aking Erickson and Twombly together, we understand the Court to be saying only that at some point the factual detail in a complaint may be so sketchy that the complaint does not provide the type of notice of the claim to which the defendant is entitled under *Rule 8*.").

PP 68, 69, 81-85, 88-93, 103, 106.) In particular, the Complaint alleges that many of the same employees in various companies (some of whom have pled guilty to price fixing in the DOJ's DRAM investigation) were responsible for setting prices for different types of memory, including DRAM/SRAM and flash memory. (See id.)

In addition, the Complaint alleges the time frame of such alleged conduct, along with facts pertaining to the coordination of production as a means to control pricing. (E.g, id. PP 86-88, 94, 96, 98, 101-105). [6] For example, there are allegations of specific instances where output was reduced following meetings by Defendants - that, in turn, led to "implausible" price increases. (Id.) Similarly, the **[**33]** marketplace is alleged to have been conducive to coordinated pricing, as demonstrated by the existence of a concentrated market dominated by a few entities, with significant barriers to entry. (See id. PP 45-59.) Courts addressing analogous pleadings have concluded that these types of conspiracy allegations are sufficient to meet the pleading standards of Twombly. E.g., *In re Static Random Access Memory (SRAM) Antitrust Litig., 580 F. Supp. 2d 896, 901-02 (N.D. Cal. 2008)* ("SRAM") ("general allegations of a conspiracy, price fixing and the susceptibility of the SRAM market to such violations" sufficient under Twombly); *In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d 1109, 1115 (N.D. Cal. 2008)* ("TFT-LCD") (finding that allegations that price stability in flat panel market was inconsistent with natural market forces were sufficient to survive a motion to dismiss). The Court finds that the facts alleged by Plaintiffs are sufficient to give rise to "a plausible suggestion of conspiracy." *Twombly, 550 U.S. at 566*. [7]

[*1143] B. EXCHANGE OF INFORMATION BETWEEN COMPETITORS

The Supreme Court has recognized the danger of collusion posed by the exchange of pricing information. *Great Atlantic & Pacific Tea Co., Inc. v. F.T.C., 440 U.S. 69, 80, 99 S. Ct. 925, 59 L. Ed. 2d 153 (1979)*; see also *United States v. U.S. Gypsum Co., 438 U.S. 422, 457, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)* **[**35]** ("the most likely consequence of any such agreement to exchange price information would be the stabilization of industry prices"); *United States v. Container Corp., 393 U.S. 333, 337, 89 S. Ct. 510, 21 L. Ed. 2d 526 (1969)* ("[t]he inferences are irresistible that the exchange of price information has had an anticompetitive effect in the industry, chilling the vigor of price competition."). Nevertheless, there is nothing inherently improper with competitors communicating with one another. See *In re Baby Food Antitrust Litig., 166 F.3d 112, 126 (3d Cir. 1999)* ("communications between competitors do not permit an inference of an agreement to fix prices unless 'those communications rise to the level of an agreement, tacit or otherwise.'"). "Accordingly, ***HN7***[] information exchanges help to establish an antitrust violation only when either (1) the exchange indicates the existence of an express or tacit agreement to fix or stabilize prices, or (2) the exchange is made pursuant to an express or tacit agreement that is itself a violation of § 1 under a rule of reason analysis." *In re Coordinated Pretrial Proceedings in Petroleum Prods. Antitrust Litig., 906 F.2d 432, 447 n.13 (9th Cir. 1990)* ("Petroleum Prods.").

Here, Defendants **[**36]** contend that the Plaintiffs' allegations concerning the exchange of information are too "ambiguous" and "sporadic" to suggest the existence of an agreement to fix prices. They claim that the pleadings allege only "three discrete episodes over an eight-year period in which a non-defendant shared an unspecified snippet of 'flash' information…." (Mot. at 12.) That is not accurate. The Complaint specifically alleges that Defendants routinely exchanged highly sensitive competitive information, including pricing and production data, to

---

[6] The references to "Complaint" and "Plaintiffs" in this section refer to the Direct Purchaser Complaint and the Direct Purchaser Plaintiffs, respectively.

[7] In addition **[**34]** to the joint motion to dismiss, Toshiba, Mitsubishi, Hitachi, SanDisk and Hynix filed their own, separate motions to dismiss. The arguments adduced in those motions overlap with those presented in the joint submission. Their central point of contention appears to be the lack of specific allegations directed at their particular company. This argument fails. ***HN6***[] For pleading purposes, allegations of antitrust conspiracy need not be detailed on a "defendant by defendant" basis. See *SRAM, 580 F. Supp. 2d at 903-907* (rejecting argument plaintiffs must allege each defendant's specific role in an antitrust conspiracy); accord *In re Fine Paper Antitrust Litig., 685 F.2d 810, 822 (3rd Cir. 1982)*; *In re Market-Makers Antitrust Litig., 894 F. Supp. 703, 712 (S.D.N.Y. 1995)*. Defendant Hitachi America Ltd.'s separate argument that Plaintiff's claims are time-barred is unsupported by any evidence which, in any event, would be impermissible on a *Rule 12(b)(6)* motion.

facilitate and monitor their price fixing conspiracy. For example, the Complaint alleges that in August 1998, Samsung advised Hynix (both of which are alleged to be key market players) "that it would be attempting to raise memory prices 'across the board in September.'" (Id. PP 46, 80). Samsung also "reportedly told Hynix that it would '*coordinate with Japanese suppliers, asking them to raise, or at least not to lower from August prices.*'" (Id. (emphasis added).) Similarly, there are allegations that Micron and Samsung communicated with one another to discuss pricing and inventory on their respective products. (Id. P 82.)

More recent communications also support **[**37]** a plausible inference of an ongoing pattern of collusion. In late 2001, Samsung's Vice President of Marketing sent an internal email to the various heads of the company's regional memory sales groups. **[*1144]** (Id. P 86.) The email instructed the recipients to contact their *competitors* to urge them that they "*must not retreat from the last quoted price.*" (Id. (emphasis added).) Separately, in 2001, officials from Hynix and Samsung met in Korea to ensure that they were "in the same boat with pricing." (Id. P 88.) These types of contacts continued in the years that followed. For instance, in early 2007, as prices for NAND memory continued to decline, Defendants were making efforts "to reduce NAND supply relative to expected demand growth." (Id. P 101.) Thus, in March 2007, Samsung announced to industry analysts that it had stabilized "price erosion" as a result of "[s]upply constraints due to cautious supply[.]" (Id. P 102.) Notably, Samsung emphasized its expectation that there would continue to be a "severe shortage" with inventories that, in turn, would bolster its margins. (Id.) In the absence of insider knowledge gleaned from communications with its competitors, Samsung allegedly "would **[**38]** have no way of making such a confident prediction." (Id.)

Taken as a whole, these and similar allegations in the pleadings are sufficient to suggest that Defendants routinely exchanged highly sensitive competitive information, including pricing and production data, to facilitate and monitor their alleged price fixing conspiracy. See *SRAM, 580 F. Supp. 2d at 902* (allegations regarding internal emails that discussed competitor's pricing were germane in terms of meeting the Twombly standard); see also *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 662 (7th Cir. 2002)* ("High Fructose") (documents discussing coordination of pricing with competitors probative of price fixing); *Flying J Inc. v. TA Operating Corp., 2007 U.S. Dist. LEXIS 85613, 2007 WL 3254765, *1 (D. Utah 2007)* (price fixing agreement could be inferred from email between competitors even if such an agreement was not discussed expressly).

C. MARKET CONCENTRATION

"[T]he Sherman Act reflects an important federal policy in preventing excessive concentration in relevant markets." *Gilmer v. Interstate/Johnson Lane Corp., 895 F.2d 195, 202 (4th Cir. 1990)*; *Les Shockley Racing, Inc. v. National Hot Rod Ass'n, 884 F.2d 504, 510 (9th Cir. 1989)*. "Significant **[**39]** market concentration makes it easier for firms in the market to collude, expressly or tacitly, and thereby force price above or farther above the competitive level." *FTC v. H.J. Heinz Co., 345 U.S. App. D.C. 364, 246 F.3d 708, 724 (D.C. Cir. 2001)* (internal quotation marks omitted); *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* ("Tacit collusion … describes the process, not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a profit-maximizing, supracompetitive level by recognizing their shared economic interests and their interdependence with respect to price and output decisions."). On the other hand, ***HN8***[] market concentration and market shares are insufficient, standing alone, to establish a Sherman Act violation. See *In re Late Fee and Over-Limit Fee Litig., 528 F. Supp. 2d 953, 964 (N.D. Cal. 2007)* ("Late Fee").

Defendants argue that "plaintiffs' market concentration allegations demonstrate that any alleged 'parallel' conduct is at least as consistent with independent decision-making and vigorous competition as with conspiracy." (Id.) Irrespective of whether that is correct, Defendants ignore that Plaintiffs **[**40]** rely on more than mere allegations of high market concentration to show that the flash memory market is prone to collusion. Rather, in addition to market concentration, they allege the existence of multiple and on-going business relationships, cross-licensing and joint venture **[*1145]** agreements, high barriers to entry, and homogeneity in products. (E.g., DP Compl. P 43, 44, 48, 49, 93, 106-107.) When these allegations are considered in tandem, allegations of high market concentration can appropriately be relied upon as a factor to suggest price collusion. *SRAM, 580 F. Supp. 2d at 903* (denying motion to dismiss where market concentration allegations accompanied by allegations concerning an ongoing agreement to exchange price information for the purpose of stabilizing or increasing prices). While Defendants' assertion that high market concentration was attributable to "independent decision-making and vigorous competition" ultimately may prove to be valid, the Court cannot resolve this issue on the merits at this juncture.

Defendants' secondary contention is that "rapidly shifting market shares" of the various Defendants exemplifies "vigorous competition." (Mot. at 14.) [8] In support, Defendants **[**41]** cite *Williamson Oil Co., Inc. v. Philip Morris USA, 346 F.3d 1287, 1318 (11th Cir. 2003)*, where the court noted that shifts in market share between competitors undermined a showing of collusion. In reaching that conclusion, the court focused on the fact that "[t]hese sharp market share shifts were at least as great as those that occurred between 1980 and 1991, *an unquestionably competitive period.*" Id. (emphasis added). This case is distinguishable, however. Unlike Williamson, there is nothing in the pleadings that would enable the Court to make such comparisons. Perhaps more fundamentally, Defendants' argument relies on inferences being drawn in *their* favor which, of course, is the antithesis of the standard of review applicable to a motion to dismiss. Indeed, Williamson involved the review of a motion for summary judgment, not a motion to dismiss.

D. SUPPLY SHORTAGES

Defendants next contend that the Complaint fails to allege any facts supporting an inference of an express agreement **[**42]** to limit the supply of NAND flash memory, and that the market forces of supply and demand -- not collusion -- explain the alleged supply shortages. (Mot. at 14-16.) In support of its argument, Defendants rely on *In re Citric Acid Litig., 191 F.3d 1090, 1100-101 (9th Cir. 1999)* ("Citric Acid"), where the court held that the defendant's failure to increase production more rapidly did not establish a price fixing conspiracy because "[t]he timing of this decision … does not fit with [plaintiff]'s theory of the conspiracy." Unlike Citric Acid, the Complaint in this case alleges that the supply shortage was orchestrated by Samsung which, in turn, had the effect of controlling prices in the time period that followed. (See DP Compl. PP 94-98.) Defendants also overlook that Citric Acid involved a motion for summary judgment, not a motion to dismiss, where Plaintiffs' allegations must be taken as true. Thus, while the evidence adduced in the action ultimately may support such a defense, the Court finds, as above, that such a determination is premature at this juncture.

E. PRICE STABILITY

HN9[↑] "[R]ising prices do not themselves permit an inference of a collusive market dynamic. Even in a concentrated **[**43]** market, the occurrence of a price increase does not in itself permit a rational inference of conscious parallelism or supracompetitive pricing." See *Brooke, 509 U.S. at 237*. Brooke recognized that prices may rise due to market forces, and that it **[*1146]** is entirely possible that increases in price and output could occur simultaneously where there is "growing product demand." Id. The Supreme Court noted that "[u]nder these conditions, a jury may not infer competitive injury from price *and* output data absent some evidence that tends to prove that output was restricted or prices were above a competitive level." Id.

Defendants argue that "prices were not rising, but falling 'rapidly' as suppliers reduced their costs and competition led those cost savings to be passed through to consumers, even as demand for NAND flash memory experienced 'huge increases.'" (Mot. at 17 (citing DP Compl. PP 75-76.) That is not an accurate characterization of the DP Complaint. Plaintiffs allege that, historically, memory manufacturers have been able to maintain their profit margins even as the price of memory (on a per gigabit basis) declines. (DP Compl. P 76.) They allege that such "unnatural price stability" was **[**44]** the result of Defendants' "collusively agreeing to reduce or limit capacity for the purpose of stabilizing or increasing prices." (Id.) Thus, even in times where there was an oversupply of NAND flash memory,

---

[8] The Court notes that the Complaint does not allege that market shares among the Defendants were "rapidly shifting." That simply is Defendants' characterization of some of the data alleged in the pleadings.

Defendants' conspiratorial conduct "caused those prices to *decrease at a lesser rate* than would have been the case under competitive conditions. (Id. P 77.) Given these allegations, Brooke is inapposite.

Separately, Defendants maintain that any fluctuations and or stability in the price for NAND flash memory is attributable to competitive market forces, as opposed to a collusive agreement among the Defendants to control the market. (Mot. at 17.) The authorities cited by Defendants, however, are inapposite. In *In re Elevator Antitrust Litig., 502 F.3d 47 (2d Cir. 2007)*, the district court dismissed an antitrust complaint which relied entirely on parallel conduct, conclusory averments of conspiracy and references to a European investigation into price fixing. In affirming the dismissal, the Second Circuit focused on (1) the failure to specify "any particular activities by any particular defendant," (2) non-specific allegations of parallel conduct, and (3) the lack of any facts establishing **[**45]** any possible nexus between the European conspiracy and any conduct in the United States. *Id. at 50*. In contrast, the pleadings herein provide much more detail regarding the intracompetitor communications directed at coordinating flash memory pricing and facts regarding the flash memory market structure showing its conduciveness towards collusive pricing schemes. Likewise, facts are alleged regarding the overlap between the companion antitrust investigations in the DRAM/SRAM markets *and* the NAND flash memory market.

Defendants' reliance on Late Fee fares no better. In that case, credit cardholders who paid excessive late fees and/or over-limit fees brought a class action against credit card issuers under *section 1 of the Sherman Act*. The centerpiece of plaintiffs' claims was set forth in a single paragraph of the complaint which was comprised of a chart showing that several of the defendants charged the same or similar late fees. *Late Fee, 528 F. Supp. 2d at 962*. This Court concluded that the complaint was devoid of facts suggesting a preceding agreement, and the scant allegations showed nothing more than parallel conduct. Id. In contrast, the Complaint is far more detailed. Here, Plaintiffs **[**46]** allege facts that the flash memory market is a highly concentrated with high barriers to entry -- conditions that are conducive to a price fixing conspiracy. (DP Compl. PP 44-48.) In addition, it is alleged that Defendants exchanged highly sensitive competitive information (id. PP 78-114), and openly communicated with one another to "coordinate" pricing (e.g., id. PP 80, **[*1147]** 87, 88, 104.) Lastly, unlike the allegations made in Late Fee, the Complaint in this case contains extensive, detailed allegations as to when, where and who engaged in at least some of the meetings that gave rise to the alleged conspiracy. (See id. PP 66-114.) These allegations easily satisfy the notice pleading requirements of the Federal Rules and readily distinguish this case from the conclusory allegations described in Late Fee.

F. **JOINT VENTURES AND CROSS-LICENSING AGREEMENTS**

Plaintiffs allege that various Defendants entered into a "web" of cross-licensing and joint venture agreements as a means to facilitate collusive behavior. (DP Compl. P 49.) In their motion to dismiss, Defendants contend that their joint ventures and cross-licenses are "unambiguously procompetitive," especially given the high entry barriers **[**47]** to the flash memory market. (Mot. at 18-19.) They further argue that the Plaintiffs fail to temporally link any joint ventures or cross-licenses to any price changes and that, at most, they show nothing more than an "opportunity" to conspire, and do not by themselves support an inference of collusion. (Id.) ***HN10***[] As a general proposition, it is true that agreements between competitors may be entirely benign. See *Texaco Inc. v. Dagher, 547 U.S. 1, 7, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*. That, however, does not necessarily support Defendants' conclusion that the joint venture and cross-licensing agreements, as alleged in the pleadings, are irrelevant for purposes of the instant motions to dismiss.

The Ninth Circuit has aptly observed that ***HN11***[] "direct evidence will rarely be available" to prove the existence of a price fixing conspiracy. See *Petroleum Prods., 906 F.2d at 439*. It is for that reason that "circumstantial evidence is the lifeblood of ***antitrust law***." *U.S. v. Falstaff Brewing Corp., 410 U.S. 526, 534 n.13, 93 S. Ct. 1096, 35 L. Ed. 2d 475 (1973)*. In this case, the allegations regarding Defendants' participation and use of joint venture and cross-licensing agreements go beyond merely alleging that Defendants' joint ventures, licensing agreements and **[**48]** other business affiliations simply fostered an "opportunity" to collude. To the contrary, Plaintiffs alleged that such agreements were used as the means to maintain and achieve the end result of the conspiracy by controlling the supply, and thereby permitting increases in the price for the products. (DP Compl. PP 49-59, 93-94, 106-07.) [9] While these allegations may not expressly state that the agreements themselves were illegal, they nonetheless may be considered with the pleadings as a whole in determining the existence of a "plausible" conspiracy. See *High Fructose, 295 F.3d at 662* (noting that ***HN12***[] "ambiguous" evidence should be considered in antitrust claims because "most cases are constructed out of a tissue of such statements and other circumstantial evidence").

[*1148] G. TRADE SHOWS AND TRADE ASSOCIATION MEETINGS

The Complaint alleges that "Defendants belong to a web of different trade associations and participate in various industry trade shows, all of which provide forums at which they can collude to fix prices and limit capacity for NAND flash memory." (DP Compl. P 50.) One such association is the Compact Flash Association ("CFA"), in which Defendants Samsung, Toshiba, Hitachi, Mitsubishi and SanDisk all are members. (Id. P 51.) The CFA allegedly holds regular meetings and participates in trade shows throughout the world. (Id. P 52.) Plaintiffs assert **[**50]** that these meetings and trade shows provide a vehicle for the "cartel's members" to communicate regularly to "facilitate the development of a conspiracy." (Id. P 59.) In response, Defendants claim that their membership in a trade association is presumptively legitimate and that their attendance at such industry meetings and events generally does not establish illegal collusion.

HN13[] Generally, there is nothing particularly nefarious in attending industry functions. See *In re Graphics Processing Units Antitrust Litig., 527 F. Supp. 2d 1011, 1023 (N.D. Cal. 2007)* ("GPU I"). Nor is there anything necessarily improper with their participation or membership in industry trade associations. See *Citric Acid, 191 F.3d at 1098*. Indeed, trade associations serve a beneficial and legitimate function. See *McDaniel v. Appraisal Institute, 117 F.3d 421, 424 (9th Cir. 1997)*. That notwithstanding, courts have recognized that trade association affiliations and attendance at industry events may be alleged to show that putative conspirators had the opportunity and means to develop and/or further their alleged collusive scheme. See *Todd v. Exxon Corp., 275 F.3d 191, 213 (2d Cir. 2001)* ("the frequency of the meetings **[**51]** is itself problematic for the same reason that the exchange of current price data is suspect: It tends to facilitate the policing of price conspiracies."). And while "these allegations cannot alone support Plaintiffs' claims, [] such participation demonstrates *how and when* Defendants had opportunities to exchange information or make agreements." *SRAM, 580 F. Supp. 2d at 903* (emphasis added).

The Court also disagrees with Defendants that dismissal is warranted on the ground that Plaintiffs fail to identify "who attended these meetings, what was discussed at them, or how they purportedly related to the conspiracy other than providing an opportunity for the parties to talk to one another…." (Mot. at 20.) Not only do Defendants fail to assert any authority in support of their contention that this level of specificity - akin to *Rule 9(b)* - is required, their argument is inconsistent with the Supreme Court's holding that "[s]pecific facts are not necessary" at the pleading stage. See *Erickson, 127 S.Ct. at 2200*. Twombly merely requires enough facts in the complaint as a whole to "nudge [plaintiffs'] claims across the line from conceivable to plausible." *550 U.S. at 570*. Thus, while Plaintiffs' **[**52]** allegations regarding trade organizations and trade meetings, *standing alone,* may not state a claim under the Sherman Act, they may properly be considered along with the other allegations in the Complaint as discussed above for purposes of the assessing the sufficiency of the Complaint. See *SRAM, 580 F. Supp. 2d at 903*.

---

[9] For example, the Complaint alleges that as early as 2002, industry participants called for cooperation among competitors to "prevent a price war," and that Defendants heeded these suggestions. (DP Compl. PP 91-92.) It further is alleged that consistent with this strategy, Renesas was created in 2003 as a joint venture by Defendants Hitachi, Ltd. and Mitsubishi. (Id. P 64.) It thus is plausible to conclude that the formation **[**49]** of Renesas was itself a conspiratorial act to control prices and supply. See *Petruzzi's IGA Supermarkets, Inc. v. Darling-Delaware Co., Inc., 998 F.2d 1224 (3rd Cir. 1993)* (noting that a range of circumstantial evidence can show collusion; "'[f]or example, have they attended meetings or *conducted discussions at which they had the opportunity to conspire;* have they acted against their own economic best interests; have they engaged in parallel behavior that is economically irrational unless an agreement exists; *has at least one participant expressly invited common action by the other*'") (emphasis added).

H. RELATIONSHIP BETWEEN DRAM/SRAM AND FLASH MEMORY CONSPIRACIES

Plaintiffs posit that the Defendants' alleged conspiracy to manipulate pricing for NAND flash memory was modeled after their pricing schemes in the markets for DRAM and SRAM memory, which are the subject of DOJ investigations. (DP Compl. P 71.) According to Defendants, **[*1149]** the DRAM/SRAM investigations are irrelevant for purposes of establishing a conspiracy regarding NAND flash memory on the ground that Plaintiffs have failed to establish a nexus between the DRAM/SRAM pricing schemes and the alleged conspiracy to control the price of NAND flash memory. (Mot. at 21.)

In *United States v. Andreas, 216 F.3d 645 (7th Cir. 2000)*, the court recognized that ***HN14***[] evidence concerning a prior conspiracy may be relevant and admissible to show the background and development of a current conspiracy. In Andreas, the court addressed **[**53]** a claim that there was a conspiracy to fix prices and control the output of Lysine, an amino acid. On appeal, the court rejected defendants challenge to the admissibility of evidence concerning a similar scheme involving the related market for citric acid. The court found that there was evidence that the citric acid scheme "provided the blueprint for and motivating force behind the nascent lysine scheme," and thus, was admissible to provide context as to how the lysine conspiracy operated. *Id. at 665*; see also *High Fructose, 295 F.3d at 661* (same). Likewise, in SRAM, the district court acknowledged that "[a]lthough the DRAM guilty pleas are not sufficient to support Plaintiffs' clams standing on their own, *they do support an inference of a conspiracy in the SRAM industry.*" *580 F. Supp. 2d at 903* (emphasis added).

Defendants ignore the above authority, and instead, focus on the fact that the employees who pleaded guilty to price fixing in the DRAM investigation worked for only *two* of the Defendant companies. (Mot. at 21-22, Reply at 12-13.) While that may be so, the Court notes that the two companies involved, Samsung and Hynix, collectively controlled the *majority* of the flash memory **[**54]** market *and* together paid fines approaching half a billion dollars. (DP. Compl. PP 68, 69, 46.) In addition, at least seven of the employees involved are alleged to have had responsibility for NAND flash memory pricing, sales, marketing and operations in the United States. (Id. P 67-69.) [10] Given these employees' overlapping involvement in controlling DRAM and flash memory pricing, coupled with the significant market power wielded by their employers, it is reasonable to infer that their involvement in the DRAM conspiracy had at least some connection to the alleged conspiracy in this case.

Defendants also attempt to distinguish the two conspiracies by claiming, inaccurately, that the DRAM case involved raising prices, while this case involves restricting supplies. (Mot. at 22.) In fact, the Complaint expressly alleges that "Defendants and their co-conspirators conspired to *fix, raise, maintain and stabilize the price of NAND flash memory sold in the United States*…." (DP Compl. PP 1, 33 (emphasis added).) Similarly, Plaintiffs allege that Defendants specifically discussed **[**55]** controlling prices with regard to all memory products. (Id. PP 79-80, 82, 84-85, 87-88, 102.) But even if the flash memory scheme focused more on affecting output, the fact remains that the purpose of both conspiracies was to artificially control and impact the memory market in order to generate or preserve profits. At bottom, while these facts may not *prove* the existence of a conspiracy with respect to NAND flash memory, they are properly pleaded for the purpose of establishing the plausibility that such a conspiracy existed. [11]

---

[10] It also is noteworthy that nearly all of the Defendants in this case sell DRAM and NAND flash memory. (DP Compl. P 66-69.)

[11] In their Complaint, Plaintiffs allege that the Department of Justice ("DOJ") has begun investigating Defendants for price-fixing *flash* memory. (DP Compl. PP 115-118.) Plaintiffs suggest that this development may be used to create an inference of anti-competitive activity. However, as noted by Defendants, the mere fact that an investigation is under way is not by itself an appropriate consideration for purposes of determining the adequacy of the pleadings. See *SRAM, 580 F. Supp. 2d at 903* ("The Court agrees that the existence of the investigation [regarding SRAM] does not support Plaintiffs' antitrust conspiracy claims"); *GPU, 527 F. Supp. 2d at 1024* (finding **[**56]** that it would be sheer speculation to infer anti-competitive behavior from a mere investigation, as opposed to a proceeding which results in charges or civil or criminal penalties).

[*1150] I. SUMMARY

The Court concludes that the Complaint alleges "enough facts to state a claim to relief that is plausible on its face." *Twombly, 550 U.S. at 576*. Defendants' motion to dismiss the Direct Purchaser Complaint is therefore DENIED.

IV. INDIRECT PURCHASER COMPLAINT

A. OVERVIEW

Separate and apart from the Direct Purchaser Complaint, 33 individuals and entities have filed an Indirect Purchaser Complaint, which also is the subject of a joint motion to dismiss. Unlike the Direct Purchasers, the Indirect Purchasers' claims are "limited in scope to NAND Flash Memory purchased indirectly where NAND Flash Memory is entirely a stand-alone product or a substantial component of another product...." (IP Compl. P 12.) Examples of such products include flash memory cards, USB flash drives, flash-based digital music players (i.e., iPods, etc.) and higher end mobile telephones and computing devices. (Id.)

Defendants' motion to dismiss presents five central arguments: (1) Plaintiffs fail to satisfy pleading requirements of **[**57]** Twombly; (2) Plaintiffs lack standing to assert state law antitrust claims; (3) Plaintiffs' consumer protection claims fail as a matter of law; (4) Plaintiffs cannot plead a claim for unjust enrichment alongside claims that seek a remedy at law; and (5) Plaintiffs lack standing to assert claims under the laws of states where none of them resides. Defendants' arguments regarding Twombly fail for the reasons discussed *supra* in the section of this Order analyzing the motion to dismiss the Direct Purchaser Complaint. As to the remaining four grounds for dismissal, the Court discusses them seriatim. [12]

B. STANDING TO PURSUE STATE ANTITRUST CLAIMS

1. Applicability of the AGC Standard

In *Illinois Brick Company v. Illinois, 431 U.S. 720, 730, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, ***HN15***[] the Supreme Court held that indirect purchasers generally may not sue for money damages under *Section 4 of the Clayton Act*. In response to Illinois Brick, a number of states passed "repealer" statutes which expressly allow indirect purchasers to recover money **[**58]** damages for antitrust violations under state law. See *California v. ARC Am. Corp., 490 U.S. 93, 97-98, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*. In the present case, Plaintiffs' third claim for relief for state antitrust violations is predicated on the repealer statutes of Alabama, Arizona, California, the District of Columbia, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Mexico, North Carolina, South Dakota, Tennessee, West Virginia and Wisconsin. (IP Compl. PP 187-205.)

In their motion to dismiss, Defendants contend that Plaintiffs lack standing **[*1151]** to bring state antitrust claims on the ground that they cannot meet the requirements set forth in *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* ("AGC"). [13] "[T]he Supreme Court in [AGC] identified ***HN16***[] certain factors for determining whether a plaintiff who has borne an injury has antitrust standing. These factors include: (1) the nature of the plaintiff's alleged injury; that is, whether it was the type the antitrust laws were intended to forestall; (2) the directness of the injury; (3) the speculative

---

[12] All references to "Plaintiffs" and "Complaint" in this section are to the Indirect Purchaser Plaintiffs and the Indirect-Purchaser Plaintiffs' Consolidated Class Action Complaint, respectively.

[13] It bears noting that the Indirect Purchasers Plaintiffs are comprised of those who purchased (1) flash memory as a "stand-alone product' and (2) products where flash memory is a "substantial component" of a finished product. (IP Compl. P 12.) Defendants' motion to dismiss is limited specifically to the latter category, i.e., "Flash Memory-based products." (Mot. at 12.)

measure of the harm; (4) the risk of duplicative recovery; and (5) the complexity **[**59]** in apportioning damages." *American Ad Mgmt., Inc. v. General Tel. Co. of Cal., 190 F.3d 1051, 1054 (9th Cir. 1999)* (citing *AGC, 459 U.S. at 535*). "To conclude that there is antitrust standing, a court need not find in favor of the plaintiff on each factor." Id. Instead, courts are to balance the factors, "giving great weight to the nature of the plaintiff's alleged injury." Id.

The threshold question presented with regard to the issue of standing is whether *AGC*, the standard for determining standing under federal antitrust claims also applies to antitrust claims predicated on state law. Resolution of that question is predicated on state law. ***HN17***[] In analyzing questions of state law, federal courts are bound by the decisions of the state's highest court. See *United Broth. of Carpenters and Joiners of America Local 586 v. N.L.R., 540 F.3d 957, 963 (9th Cir. 2008)* **[**60]** ("Carpenters"). It is settled that "[w]here the state's highest court has not decided an issue, the task of the federal courts is to predict how the state high court would resolve it." *Dimidowich v. Bell & Howell, 803 F.2d 1473, 1482 (9th Cir. 1986)* (as amended). If "there is relevant precedent from the state's intermediate appellate court, the federal court must follow the state intermediate appellate court decision unless the federal court finds convincing evidence that the state's supreme court likely would not follow it." *Ryman v. Sears, Roebuck and Co., 505 F.3d 993, 994 (9th Cir. 2007)* (emphasis omitted). Relevant decisions of courts in other jurisdictions also should be considered. See *Giles v. General Motors Acceptance Corp., 494 F.3d 865, 872 (9th Cir. 2007)*.

Defendants summarily argue that AGC governs the standing inquiry to Plaintiff's state antitrust claims under Arizona, California, Iowa, Kansas, Maine, Michigan, Nebraska, North Carolina, South Dakota, Mississippi, Nevada, New Mexico, West Virginia, Wisconsin law. (Mot. at 17.) The Court concurs with Defendants only with respect to Iowa, Nebraska and California. The highest courts in both Iowa and Nebraska have held that **[**61]** the AGC factors apply to their antitrust laws. *Southard v. Visa USA, Inc., 734 N.W.2d 192, 198-99 (Iowa 2007)*; *Kanne v. Visa U.S.A., Inc., 272 Neb. 489, 723 N.W.2d 293, 302-03 (2006)*. As such, the Court is compelled to find that AGC applies to Indirect Plaintiffs' antitrust claims based on Iowa and Nebraska law. See *Carpenters, 540 F.3d at 963*. As to California, its Supreme Court has not reached this issue, but at least one of its intermediate appellate courts has applied these factors to its ***antitrust law***, the Cartwright **[*1152]** Act, *Cal. Bus. & Prof. Code § 16720 et seq.* See *Vinci v. Waste Mgmt., Inc., 36 Cal.App.4th 1811, 43 Cal. Rptr. 2d 337, (1995)*; *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 987 (9th Cir. 2000)*. Accordingly, the Court finds that AGC applies to Plaintiffs' California law antitrust claims as well. See *Ryman, 505 F.3d at 994* (holding that intermediate appellate court decisions generally are binding).

The Court disagrees that AGC applies to any of remaining states in dispute. With respect to Arizona, Nebraska, Nevada, New Mexico, South Dakota and West Virginia, there are no state court appellate decisions or compelling decisions from other jurisdictions to provide this Court with guidance on how **[**62]** to "predict" how the highest court of each state would rule on this issue. See *Dimidowich, 803 F.2d at 1482*. However, Defendants note that each of these states has harmonization provisions calling for their respective statutes to be construed in accordance with federal law. See *Ariz.Rev.Stat. Ann. § 44-1412* ("in construing this article, the courts may use as a guide interpretations given by the federal courts to comparable federal antitrust statutes"); *Neb.Rev.Stat. § 59-829* ("the courts of this state in construing [Nebraska's antitrust statute] shall follow the construction given to the federal law by the federal courts"); *Nev.Rev.Stat. § 598A.050* ("The provisions of this chapter [under Nevada law] shall be construed in harmony with prevailing judicial interpretations of the federal antitrust statutes"); *N.M. Stat. Ann. § 57-1-15* ("the [New Mexico] Antitrust Act shall be construed in harmony with judicial interpretations of the federal antitrust laws"); *S.D. Codified Laws § 37-1-22* ("It is the intent of the [South Dakota] Legislature that in construing this chapter, the courts may use as a guide interpretations given by the federal or state courts to comparable antitrust statutes."); **[**63]** *W.Va. Code § 47-18-16* ("This [West Virginia] article shall be construed liberally and in harmony with ruling judicial interpretations of comparable federal statutes").

As to Kansas, Maine, Michigan, Mississippi, North Carolina, South Dakota and Wisconsin, the Court has not been directed to any pertinent court decisions or any harmonization provisions, as in the case of the other states at issue. However, Defendants focus the Court's attention on cases purporting to demonstrate that states interpreting their antitrust laws look to federal antitrust precedents for guidance. See *Orr v. Beamon, 77 F. Supp. 2d 1208, 1212 (D. Kan. 1999)* ("standing under the Kansas antitrust statutes requires an antitrust injury similar to that required under the Sherman and Clayton Acts"); *Davric Maine Corp. v. Rancourt, 216 F.3d 143, 149 (1st Cir. 2000)* ("We have noted that the 'Maine antitrust statutes parallel the Sherman Act,' and thus have analyzed claims thereunder according to the doctrines developed in relation to federal law."); *First Med Representatives, LLC v. Futura Med. Corp., 195 F. Supp. 2d 917, 922 (E.D. Mich. 2002)* ("Michigan courts apply Sherman Act analysis to the [Michigan Antitrust Reform **[**64]** Act]"); *Pope v. Mississippi Real Estate Com'm, 872 F.2d 127, 129 (5th Cir. 1989)* (combining analysis of Mississippi and federal antitrust claims); *Rose v. Vulcan Materials Co., 282 N.C. 643, 194 S.E.2d 521, 530 (1973)* ("the body of law applying the Sherman Act, although not binding upon this Court in applying [North Carolina's ***antitrust law***], is nonetheless instructive in determining the full reach of that statute."); *State v. Waste Mgmt. of Wis., Inc., 81 Wis. 2d 555, 261 N.W.2d 147, 155 (1978)* ("Except for the fact that the state act applies to intrastate commerce while the federal act applies to interstate commerce, what amounts to a conspiracy in restraint of trade under the Sherman Act amounts **[*1153]** to a conspiracy in restraint of trade under the Wisconsin antitrust act.").

With little reasoning or analysis, Defendants urge the Court to follow DRAM I, where the court found the existence of harmonization provisions and/or judicial reference to federal antitrust precedents to interpret state antitrust statutes as a sufficient basis on which to trigger application of AGC. (Mot. at 8.) This Court, however, is reticent to adopt an across-the-board rule that a state's harmonization provision, whether created by statute **[**65]** or common law, is an appropriate means of predicting how a state's highest court would rule regarding the applicability of AGC to state law antitrust claims. Neither party has provided the Court with the requisite, individualized analysis on a per state basis to enable the Court to render such a determination. As a consequence, "this order declines to undertake the back-breaking labor involved in deciphering the state of antitrust standing in each of those states on this motion - particularly since, as shown below, indirect purchasers have shown standing under AGC for consumers who bought finished [flash memory products]." See *GPU II, 540 F. Supp. 2d at 1097*. Thus, the Court concludes that AGC's standing analysis applies only to Plaintiffs' state antitrust claims based on California, Iowa and Nebraska law.

2. Application of the AGC Factors to Plaintiffs' Antitrust Claims Under California, Iowa and Nebraska Law

a) Nature of the Injury

HN18[] The first factor under AGC is whether the injury alleged by Plaintiffs is the type the antitrust laws are intended to prevent. See *American Ad Mgt., 190 F.3d at 1055*. "A plaintiff may only pursue an antitrust action if it can show antitrust injury, which is **[**66]** to say 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *DRAM II, 516 F. Supp. 2d at 1089* (quoting *American Ad Mgmt., 190 F.3d at 1055*). "The requirement that the alleged injury be related to anti-competitive behavior requires, *as a corollary,* that the injured party be a participant in the same market as the alleged malefactors." *Bhan v. NME Hosps., Inc., 772 F.2d 1467, 1470 (9th Cir. 1985)* (emphasis added); see also *Tanaka v. University of Southern Calif., 252 F.3d 1059, 1063 (9th Cir. 2001)* (the anticompetitive effects must be felt in the "relevant market"). To determine whether an injured plaintiff is indeed a market participant, "the focus is upon the reasonable interchangeability of use or the cross-elasticity of demand" between the product or services involved. *Bhan, 772 F.2d at 1470-71*.

In this case, Plaintiffs contend that they were injured by "paying higher prices for products containing NAND Flash Memory than they would have in the absence of Defendants' conspiracy." (IP Compl. P 148; Opp'n at 23.) Defendants do not dispute that this is the type of injury that antitrust laws were intended to protect **[**67]** against. See *American Ad Mgt., 190 F.3d at 1055*. Rather, Defendants' central contention is that Plaintiffs cannot show that they are "participants" in the restrained market. (Mot. at 9-10.) More specifically, Defendants assert that the alleged anticompetitive conduct occurred only in the market for *direct* purchasers of NAND flash memory, which is different than for *indirect* purchasers where the relevant market ostensibly is defined by where the particular product containing flash memory is sold. (Mot. at 9-10.)

The argument posited by Defendants was rejected in *GPU II, 540 F. Supp. 2d at* ***[*1154]*** *1098*. In that case, direct and indirect purchasers brought federal and state antitrust claims against producers of graphics processing units ("GPUs"). GPUs are devices used in computers, servers, work stations, gaming consoles and mobile communication devices. Direct purchasers alleged that they purchased GPUs directly from manufacturers, while indirect purchasers alleged they purchased finished products that contained GPUs. Defendants moved to dismiss the indirect purchasers' claims on the ground that they were not participants in the relevant market because they "participated" in the market for the finished **[**68]** product containing GPUs, as opposed to the market for GPUs themselves. Id. The court rejected that distinction, however, noting that GPUs "are separate components of a computer and that any costs attributable to them are traceable through the chain of distribution." Id.

The court in TFT-LCD applied similar reasoning in a class action involving thin film transfer liquid crystal display ("LCD") panels and products. *586 F. Supp. 2d at 1123*. As in GPU I, the defendant manufactures argued that the indirect plaintiffs could not be considered participants in the relevant market for LCDs, since they purchased finished products containing LCD panels. The court found the alleged distinction to be uncompelling in view of the plaintiffs' allegations that the market for LCD panels and the market for the products into which the panels are placed are "inextricably linked and intertwined," and as a result, the demand for LCD panels directly derives from the demand for such products in which it is used as a component. Id. The court added that "there are factual questions about the relevant market," such as whether the indirect purchaser plaintiffs actually participated in the market for LCD panels through **[**69]** their purchases of products containing such panels or whether that market was "analytically distinct" from the market for LCD panels. Id. In either event, the court concluded that "plaintiffs' allegations are sufficient at this stage to weigh in favor of standing under the first factor of AGC." Id.

As in GPU I and TFT-LCD, Plaintiffs have alleged sufficient facts that they, as Indirect Purchasers of NAND flash memory-based products, are in the "same market" as Direct Purchasers, at least as far as antitrust standing is concerned at this stage of the proceedings. The Complaint alleges that NAND flash memory has a variety of applications. It can be purchased as a stand-alone item or incorporated as a central component of finished products, such as digital music players, USB drives, and so on. (IP Compl. P 73.) Regardless of how it is sold, however, NAND flash memory provides essentially the same functionality; that is, versatile, digital storage that is *not* dependent on the presence of power to maintain its memory. (Id. PP 71-72.) Thus, while the markets for NAND flash memory and products that contain NAND flash memory technically may be different, in practice, both markets are inextricably **[**70]** intertwined and there is inherent cross-elasticity of demand between the two. (Id. P 73.) For purposes of the instant motion to dismiss, Plaintiffs have alleged sufficient facts to show that they are market participants for purposes of AGC. However, it bears noting that the actual determination of whether indirect purchasers are "participants" in the same "relevant market" for purposes of antitrust standing is better suited to resolution upon a fuller record. See *TFT-LCD, 586 F. Supp. 2d at 1123*.

b) The Directness of the Injury

HN19[] "The second [AGC] factor looks to whether [the] alleged injury was the direct result of [defendants'] allegedly anticompetitive conduct.... To assess the directness **[*1155]** of this injury, we look to the chain of causation between [the] injury and the alleged restraint in the market[.]" *Am. Ad Mgt., 190 F.3d at 1058*. Defendants contend that there is no direct injury because NAND flash memory is merely a component of the finished product, and is but one of many variables affecting its price. (Mot. at 13.) They also claim that the distribution channels for finished products differ from those for NAND flash memory. (Id.)

In TFT-LCD and GPU I, the courts found that indirect **[**71]** purchasers of components had satisfied their burden of pleading directness of injury by alleging that the cost of the component was traceable through the product distribution chain. Compare *TFT-LCD, 586 F. Supp. 2d at 1123* (directness requirement met based on allegations that cost of component part comprised a substantial amount of the finished product cost and could be traced through the distribution chain); *GPU II, 540 F. Supp. 2d at 1098* (same) with *DRAM II, 516 F. Supp. 2d at 1092* (directness requirement not met where the "complaint sets forth no allegations that, within the final purchase price of a given product purchased by plaintiffs for 'end use,' the ultimate cost of DRAM is somehow directly traceable or distinguishable").

In this case, the Complaint expressly alleges that "[w]hen NAND Flash Memory is purchased by consumer as part of an electronic device, it is a distinct, physically-discrete hardware element of the end-use product and is identifiable by a specific, discrete part or model number that permits tracing. NAND Flash Memory is identifiable and traceable throughout the chain of the distribution to the end user. It does not undergo any alterations as it moves through **[**72]** the chain of distribution." (IP Compl. P 152.) The pleadings further allege that "[t]racing can help show that changes in the prices paid by direct purchasers of NAND Flash Memory affect prices paid indirect-purchasers of the Flash Memory itself or products containing Flash Memory." (Id. P 154.) In addition, NAND Flash Memory allegedly "makes up an overwhelming majority of the cost of NAND flash-based memory devices and a substantial portion of the consumer devices in which NAND Flash Memory is packaged to be sold as a component." (Id. P 157.) These allegations are adequate to show that there is a chain of causation between Defendants' allegedly anticompetitive conduct and Plaintiffs' injury, which is the overpayment for flash memory products and finished products containing NAND flash memory.

c) Speculative Nature of Harm and Complexity in Apportioning Damages

HN20[] The final third and fifth AGC factors - the speculative nature of the harm and the complexity in apportioning damages - may be considered together. See *DRAM II, 516 F. Supp. 2d at 1092* (citing *American Ad Mgmt, 190 F.3d at 1054-55*). As to these factors, Defendants make essentially the same arguments that they raised regarding AGC's **[**73]** second factor; namely, that NAND flash memory is just one of many components of a finished product, and as such, any attempt to distinguish the impact of its allegedly inflated price on the purchase price of a retail product would be speculative and excessively complex. (Mot. at 13-15.) As discussed above, Plaintiffs have alleged that the NAND flash memory, whether in the form of a product or as a component of a finished product, remains discrete and traceable to its manufacturer. This is sufficient for purposes of avoid dismissal. See *DRAM II, 516 F. Supp. 2d at 1092-93*.

d) Duplicative Recovery

HN21[] "The risk to be avoided under [the duplicative recovery factor] is that potential **[*1156]** plaintiffs may be in a 'position to assert conflicting claims to a common fund . . . thereby creating the danger of multiple liability for the fund.'" *American Ad Mgmt., 190 F.3d at 1059* (quoting *Eagle v. Star-Kist Foods, Inc., 812 F.2d 538, 542 (9th Cir. 1987))*. Defendants briefly assert that a duplicative recovery "is a near certainty" given that the Direct Purchasers' claims also are before the Court. (Mot. at 16.) Such a concern, however, generally is inapposite in the context of indirect purchaser state law **[**74]** antitrust claims. "States … which have repealed Illinois Brick and allowed indirect purchasers to sue for antitrust violations, have necessarily made the policy decision that duplicative recovery may permissibly occur. Duplicative recovery is, in many if not all cases alleging a nationwide conspiracy with both direct and indirect purchaser classes, a necessary consequence that flows from indirect purchaser recovery. Accordingly, it is no bar against standing, and this factor does not weigh against standing." *DRAM II, 516 F. Supp. 2d at 1094*. In any event, the Court notes that Plaintiffs have alleged that the alleged overcharges by Defendants are distinct and traceable. (IP Compl. PP 152-57.) In such instances, courts have acknowledged that the risk of duplicative recovery is less of a concern. *TFT-LCD, 586 F.Supp.2d at 1124*; *GPU II, 540 F. Supp. 2d at 1098*.

At bottom, the Court concludes that Plaintiffs' allegations are sufficient to establish standing at this stage of the pleadings for the California, Iowa and Nebraska Plaintiffs to pursue their antitrust claims. [14]

C. CONSUMER PROTECTION CLAIMS

The next issue for the Court's consideration is Defendants' contention that Plaintiffs have failed to a state claim based on the consumer protection statutes of Arkansas, the District of Columbia, Hawaii, Kansas, Maine, New Hampshire, New Mexico, New York, Rhode Island and West Virginia. (Mot. at 17.) As will be discussed below, the Court agrees with Defendants' motion, in part, and dismisses with prejudice Plaintiffs' claims under the laws of

---

[14] As noted, Defendants have not demonstrated that AGC applies to Plaintiffs' antitrust claims based on the laws of Arizona, **[**75]** Kansas, Maine, Michigan, North Carolina, South Dakota, Mississippi, Nevada, New Mexico, West Virginia and Wisconsin, and they have not advanced any other ground for dismissing these particular claims at this time.

Kansas, Maine, Rhode Island and West Virginia. The Court also dismisses Plaintiffs' claims under the laws of the District of Columbia, Hawaii, New Hampshire, New Mexico and New York, but grants leave to amend to correct the deficiencies, as explained below. The motion to dismiss is denied as to Plaintiffs' consumer protection claims based on the law of Arkansas.

1. Arkansas [15]

HN22[] The Arkansas Deceptive Trade Practices Act ("ADTPA"), *Arkansas Code §§ 4-88-101, et seq.*, prohibits "[d]eceptive and unconscionable trade practices," including "[e]ngaging in any other *unconscionable,* false, or deceptive act or practice in business, commerce, or trade…." Id. *§ 4-88-107(a)(10)* (emphasis added); see also id., *§ 4-88-108* (prohibiting deception, fraud and false pretense). While there appear to be no published state appellate rulings directly on point, Arkansas courts have construed the statute broadly. E.g., *State ex rel Bryant v. R & A Inv. Co., 336 Ark. 289, 985 S.W.2d 299, 302-303 (Ark. 1999)* (usury scheme constituted "unconscionable" **[*1157]** conduct). In addition, several district courts interpreting the ADTPA have found that the term "unconscionable trade practices" is sufficiently broad to encompass price fixing. See *In re Chocolate Confectionary Antitrust Litig., 602 F. Supp. 2d 538, 2009 U.S. Dist. LEXIS 20975, 2009 WL 560601 at *27 (M.D. Pa. March 4, 2009)* ("Chocolate Confectionary") (conspiracy **[**77]** to fix and stabilize chocolate confectionary prices); *In re New Motor Vehicles Canadian Export Antitrust Litig., 350 F. Supp. 2d 160, 178 (D. Me. 2004)* ("NMV") (conspiracy to keep Canadian-manufactured vehicles from entering the U.S. automobile market).

Relying on a footnote in *NMV, 350 F. Supp. 2d at 178 n.22*, Defendants contend that the district court rejected "the very same theory of deception -- the failure to disclose an alleged conspiracy -- that Plaintiffs espouse in this case." (Reply at 17.) That contention lacks merit. Though the Complaint alleges that Defendants acted in a "deceptive" manner "to cover up their illegal acts," the pleadings also allege that Defendants engaged in "unconscionable conduct" by misleading the public into believing that the prices they were paying for NAND flash memory were set by the free market when, in fact, they were not. (IP Compl. P 208e.) Moreover, the footnote cited by Defendants does not pertain to the ADTPA, but rather, refers generally to state consumer protection statutes that prohibit only "fraudulent or deceptive conduct." *NMV, 350 F. Supp. 2d at 177 n. 22*.

Defendants also urge the Court to follow Judge Alsup's ruling in GPU I where **[**78]** he found that plaintiffs' failure to plead "grossly unequal bargaining power" was fatal to their claims based on the consumer protection laws of Arkansas, among other states. *527 F. Supp. 2d at 1029-1030*. This Court does not find the analysis set forth in GPU I to be pertinent to the issue presented herein, particularly in light of **HN23**[] the Arkansas Supreme Court's view that an unconscionable act is one that is "an act that 'affronts the sense of justice, decency, or reasonableness,'" including acts "*violative of public policy or a statute.*" *Baptist Health v. Murphy, 365 Ark. 115, 226 S.W.3d 800, 810-11 (Ark. 2006)* (emphasis added). Here, Plaintiffs allege specifically that "Defendants' conduct with regard to the sales of NAND Flash Memory, including their illegal conspiracy to secretly fix the price of NAND Flash Memory at supracompetitive levels and overcharge customers, was substantively unconscionable because it was one-sided and unfairly benefitted Defendants at the expense of Plaintiffs and the public." (IP Compl. P 208f.) Such allegations, construed in favor of Plaintiffs, can be considered to constitute a violation of public policy. For these reasons, Defendants' motion to dismiss Plaintiffs' **[**79]** ADTPA claim is DENIED.

2. District of Columbia

HN24[] The District of Columbia's Consumer Protection Practices Act ("DCCPPA"), *D.C. Code § 28-3901*, is intended to "assure that a just mechanism exists to remedy all improper trade practices and deter the continuing use of such practices…." *D.C. Code § 28-3901(b)(1)*. The Act "defines its terms comprehensively so that it can provide a remedy for all improper trade practices." *Cooper v. First Government Mortg. & Investors Corp., 206 F.*

[15] Defendants do not specifically address the consumer protection laws of Arkansas, the District of Columbia or New Mexico, but present **[**76]** a single argument that each of these three jurisdictions requires a showing of unequal bargaining power. (Mot. at 17; Reply at 17.) Because the statutes of each of these jurisdictions differ, the Court addresses each separately.

Supp. 2d 33, 35 (D. D.C. 2002); *Dist. Cablevision Ltd. v. Bassin, 828 A.2d 714, 723 (D.C. 2003)* (purpose of DCCPPA is "to remedy all improper trade practices").

Without citing any case law specifically interpreting the DCCPPA, Defendants posit that price-fixing is not the type of conduct within the reach of the statute. (Mot. at 18.) In fact, District of Columbia courts have held that ***HN25***[] the DCCPPA proscribes the imposition of prices that are **[*1158]** "unconscionably high," i.e., prices that are "unreasonably favorable" to the seller, where "the buyer did not have a meaningful choice of alternatives under the circumstances." *Ford v. Chartone, Inc., 908 A.2d 72, 90 (D.C. 2006)*; *Chocolate Confectionary, 2009 U.S. Dist. LEXIS 20975, 2009 WL 560601 at *28* ("the **[**80]** DCCPPA subsumes a Sherman Act claim and creates an indirect purchaser cause of action for conspiratorial price fixing regardless of whether defendants have engaged in deceptive conduct.") (citing D.C. state case law).

With respect to their claims under the DCCPPA, Plaintiffs alleges that they paid "artificially inflated prices" for NAND flash memory as a result of Defendants' alleged suppression and elimination of price competition. (IP Compl. P 210e.) Absent, however, are allegations that Plaintiffs were charged "unconscionably high" prices that were unreasonably favorable to the seller, resulting from a lack of meaningful choice of alternatives under the circumstances. *Ford, 908 A.2d at 90*. As a result, the Court finds that Plaintiffs' claims under the DCCPPA are deficient and GRANTS Defendants' motion to dismiss Plaintiffs' claims under the DCCPPA. Because this deficiency could be cured by amendment, Plaintiffs will be granted leave to amend to include the requisite factual allegations as discussed above.

3. Hawaii

Plaintiffs bring a consumer protection claim under Hawaii's Antitrust Act, *Hawaii Rev. Stat. §§ 480 et seq.* (Compl. P 212e). Citing Hawaii Rev. Stat. § 480.13-3, Defendants **[**81]** argue that such a claim is not ripe given the requirement that Plaintiffs must first provide the state attorney general the opportunity to prosecute the claim on their behalf. (Mot. at 19.)

HN26[] *Section 480-2* prohibits (1) "unfair methods of competition" and (2) "unfair or deceptive acts or practices." *Hawaii Rev. Stat. § 480-2(a)*, *(d)* and *(e)*. Under *section 480.13-3(a)(1)*, "[a] class action for claims for a violation of this chapter *other than claims for unfair or deceptive acts or practices* may be filed, and may be prosecuted on behalf of indirect purchasers by a person other than the attorney general," provided that the class plaintiffs first serve a copy of the complaint on the attorney general. The attorney general has sole discretion as to whether the state will proceed with the action or file its own action. Id., *§ 480.13(a)(4)*. If the attorney general declines to so proceed, the class plaintiff shall have the right to proceed with the action. Id., *§ 480.13(a)(5)(C)*. *Subdivision (b)* states that "[t]his section shall not limit the rights of consumers to bring class actions against any person based on unfair or deceptive acts or practices declared unlawful by *section 480-2*."

Plaintiffs **[**82]** acknowledge that *unfair competition* claims *are* subject to the attorney general notification requirement, but contend that their claim for *unfair or deceptive acts* should be allowed to proceed. (Opp. at 43.) As Defendants point out, the flaw in that argument is that the Complaint alleges *both* grounds as a basis for recovery in a single claim. (IP Compl. P 212(e).) To the extent Indirect Plaintiffs desire to pursue a claim under Hawaii law, they will need to expressly limit their claim to the unfair and deceptive acts aspect of the Hawaii Antitrust Act. Consequently, Defendants' motion to dismiss as to Plaintiffs' claim based on *section 480-2* is GRANTED. Plaintiffs will be allowed leave to amend to allege a claim for unfair or deceptive acts or practices only.

4. Kansas

Plaintiffs do not oppose dismissal of their claims under the Kansas Consumer Protection Act, *Kan. Stat. §§ 50-623, et seq.* (Opp'n at 40 n.43.) Therefore, Defendants' **[*1159]** motion to dismiss Plaintiffs' claim under Kansas law is GRANTED, which is dismissed without leave to amend.

5. Maine

HN27[] The Maine Unfair Trade Practices Act ("MUTPA") prohibits "unfair methods of competition" as well as "unfair or deceptive ... **[**83]** conduct of any trade." *Me. Rev. Stat. Ann. tit. 5 §207* (Me. 2008). The Maine Supreme Court has held that "[i]n pricing cases under the Act the inquiry is whether the price has the effect of deceiving the consumer, or inducing her to purchase something that she would not otherwise purchase." *Tungate v. MacLean-Stevens Studios, Inc., 1998 ME 162, 714 A.2d 792, 797 (Me. 1998)*. Applying this standard, the Court concurs with Defendants that the MUTPA does not create a cognizable claim for collusive pricing. Logically, charging *higher* prices would not deceive or induce a consumer to purchase an item he or she would not otherwise purchase. See *GPU I, 527 F. Supp. 2d at 1031* ("[a]rguing that higher prices induced consumers to make purchases simply does not make sense."); accord *Chocolate Confectionary, 2009 U.S. Dist. LEXIS 20975, 2009 WL 560601 at *29*; *TFT-LCD, 586 F. Supp. 2d at 1126*.

In an attempt to distinguish Tungate, Plaintiffs argue that its holding applies *only* to the portion of the MUTPA that pertains to claims based on "unfair and deceptive acts," and does not address the standard for claims based on "unfair methods of competition." (Opp'n at 44.) In support of their position, Plaintiffs cite NMV, where the court narrowly **[**84]** construed the Tungate court's holding as applying only to the MUTPA's restriction on "unfair or deceptive acts." *NMV, 350 F. Supp. 2d at 187 n.40*. The Court disagrees with the NMV court's restrictive reading of Tungate. By its own terms, the Tungate standard applies broadly to "pricing cases *under the Act.*" *714 A.2d at 797* (emphasis added). There is nothing in Tungate to support the purported distinction advocated by Plaintiffs. As a decision of Maine's highest court, the Court is bound to follow the holding in Tungate. See *Carpenter, 540 F.3d at 963*. In accordance with Tungate, the Court GRANTS Defendants' motion to dismiss Plaintiff's claim under the MUPTA. Because any amendment would be futile, said dismissal is without leave to amend.

6. New Hampshire

Defendants move to dismiss Plaintiffs' claim under New Hampshire Consumer Protection Act ("CPA"), *N.H. Rev. Stat. § 358-A:2*, on the ground that Plaintiffs have not alleged that any unfair or deceptive acts took place *within* New Hampshire. See *Pacamor Bearings, Inc. v. Minebea Co., Ltd., 918 F. Supp. 491, 504 (D.N.H. 1996)* (CPA requires that "offending conduct" occur within the state's borders). Though Plaintiffs acknowledge that their **[**85]** Complaint lacks such allegations, they briefly contend that the CPA should be read broadly in light of *LaChance v. U.S. Smokeless Tobacco Co., 156 N.H. 88, 931 A.2d 571, 580 (N.H. 2007)*. (Opp'n at 44.) LaChance merely states that "indirect purchasers may bring claims under the CPA." *Id. at 575*. It does not, as Plaintiffs suggest, address the requirement that the offending conduct occur within the state. Given Plaintiffs' failure to state a cognizable claim under the CPA, the Court GRANTS Defendants' motion to dismiss this claim, with leave to amend to cure the deficiency if Plaintiffs are able to do so in good faith.

7. New Mexico

HN28[] The New Mexico Unfair Practices Act ("NMUPA"), *New Mexico Stat. §§ 57-12-1, et seq.*, prohibits both "unfair deceptive trade practices" and "unconscionable trade practices in the conduct of any trade or **[*1160]** commerce." *N.M. Stat. Ann. § 57-12-3*. Under New Mexico law, an unconscionable trade practice is "an act or practice . . . which to a person's detriment: (1) takes advantage of the lack of knowledge, ability, experience or capacity of a person to a grossly unfair degree; or (2) results in a gross disparity between the value received by a person and the price paid." N.M.Rev.Stat. **[**86]** *§ 57-12-2(E)*; *NMV, 350 F. Supp. 2d at 195-96*.

Defendants contend, without citation to relevant authority, that "unconscionable trade practices" is limited to cases where "grossly unequal bargaining power" is alleged. (Mot. at 17.) Courts have taken a broader view of the NMUPA, however. ***HN29***[] "Federal courts generally permit NMUPA actions in price-fixing cases provided that the plaintiff alleges a 'gross disparity' between the price paid for a product and the value received." *Chocolate*

Confectionary, 602 F. Supp. 2d at 585, 2009 U.S. Dist. LEXIS 20975 at *143, 2009 WL 560601 at *29 (citing cases); TFT-LCD, 586 F. Supp. 2d at 1127. Nevertheless, Plaintiffs' Complaint does not contain the requisite allegations, even under a more expansive reading of the statute. The Complaint simply alleges that "[t]here was a gross disparity of *bargaining power* between the parties with respect to the price charged by Defendants and NAND flash memory," (IP Compl. P 218(c) (emphasis added).) "Gross disparity" between the *price paid for a product and the value received* is *not* alleged. Given the absence of the requisite allegations, the Court GRANTS Defendants' motion to dismiss Plaintiffs' NMUPA claim. Plaintiffs will be allowed leave to amend to cure **[**87]** this deficiency.

8. New York

Section 349 of New York's General Business Law provides, in relevant part, that: **HN30**[] "Deceptive acts or practices in the conduct of any business, trade or commerce or in the furnishing of any service in this state are hereby declared unlawful." **HN31**[] "[S]ection 349 is directed at wrongs against the consuming public." See In re Rezulin Prods. Liab. Litig., 392 F. Supp. 2d 597, 614 (S.D.N.Y. 2005) ("Rezulin"); e.g., New York v. Feldman, 210 F. Supp. 2d 294, 302 (S.D.N.Y. 2002) ("The antitrust violations alleged in the Complaint constitute the kind of deceptive acts and practices contemplated by section 349."). A plaintiff asserting a section 349 claim "must prove three elements: first, that the challenged act or practice was consumer-oriented; second, that it was misleading in a material way; and third, that the plaintiff suffered injury as a result of the deceptive act." See Stutman v. Chem. Bank, 95 N.Y.2d 24, 29, 731 N.E.2d 608, 709 N.Y.S.2d 892 (2000).

Defendants contend that Plaintiffs' cause of action under section 349 fails on the ground that there is no particular conduct directed specifically *at the Indirect Purchasers.* (Mot. at 20.) In Paltre v. General Motors Corp., the court held that consumers **[**88]** who purchased or leased vehicles "failed to set forth a viable cause of action to recover damages for deceptive business practices" based on allegations of price-fixing among automobile manufacturers "because the alleged misrepresentations were either not *directed at consumers* or were not materially deceptive." See Paltre v. General Motors Corp., 26 A.D.3d 481, 810 N.Y.S.2d 496, 498 (N.Y. App. Div. 2006) (emphasis added); accord Rezulin, 392 F. Supp. 2d at 614. Here, the Complaint only avers that Defendants "publicly provided pretextual and false justifications" for their price increases and made "public announcements concerning the changes in the prices of NAND Flash Memory." (IP Compl. P 219c.) Other than the supposed statements made to the "public," there are no specific allegations that the misconduct **[*1161]** was directed *at* any particular group, let alone Indirect Purchasers in New York.

Plaintiffs fail to address Paltre. Instead, they simply assert that a section 349 claim is sustainable where the deceptive conduct is directed at a "broad group of individuals." (Opp'n at 45.) That argument misses the mark. The question presented is not whether anticompetitive conduct falls within the purview of section 349. **[**89]** Rather, the issue framed by Defendants' motion is whether the misrepresentations were directed *at* Indirect Purchasers of NAND flash memory. Such allegations are absent from the pleadings, which aver only that Defendants made "public announcements" intended to create the illusion of free market pricing. (IP Compl. P 219c.) [16] As such, the Court GRANTS Defendants' motion to dismiss. Plaintiffs are granted leave to amend to cure this deficiency.

9. Rhode Island

Defendants move to dismiss Plaintiffs' claim under Rhode Island's Unfair Trade Practices and Consumer Protection Act ("UTPCPA"), R.I. Gen. Laws § 6-13.1-1, et seq,. on the ground that price fixing does not constitute "[u]nfair methods of competition and unfair or deceptive acts or practices" as defined by the UTPCPA. (Mot. at 22.) **HN32**[] Section 6-13.1-2 provides that "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful." To determine whether a practice **[**90]** is "unfair" under the statute, the court is to consider: "(1) Whether the practice, without necessarily having been

---

[16] Although Plaintiffs contend that they, in fact, have made the requisite allegations, the cited paragraphs of the Complaint do not support their assertion. (Opp'n at 46 (citing Compl. PP 174, 219.)

previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise-whether, in other words, it is within at least the penumbra of some common-law, statutory, or other established concept of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; (3) whether it causes substantial injury to consumers (or competitors or other businessmen)." See *Ames v. Oceanside Welding and Towing Co., Inc., 767 A.2d 677, 681 (R.I. 2001)* (internal quotation and citations omitted).

The Court concurs with Defendants that ***HN33***[] price fixing is not within the ambit of the UTPCPA. The statute defines "unfair methods of competition and unfair or deceptive acts or practices" to consist of 19 separately enumerated practices, *none of which includes price fixing. R.I. Gen. Laws §§ 6-13.1-1(6)(i)-(xix)*. In *ERI Max Entertainment, Inc. v. Streisand, 690 A.2d 1351, 1354 (R.I. 1997)*, a video store owner sued Blockbuster Video ("Blockbuster") and Barbra Streisand (among others) for violating the state's antitrust and unfair practices **[**91]** statutes. The store's claim was based on an agreement in which Blockbuster was granted exclusive access to a Streisand concert video containing an extra song not found on versions of the videotape distributed elsewhere. In rejecting plaintiff's unfair competition claims, the Rhode Island Supreme Court explained that "a finding of unfair competition must be predicated upon conduct on the part of the respondent that reasonably tended to confuse and mislead the general public into purchasing his product when the actual intent of the purchaser was to buy the product of the complainant." *Id. at 1353-54*. The court then concluded that the defendants' exclusive distribution agreement was not the type of "unfair conduct" that the Act was intended to encompass. Id. It is clear under the foregoing authority, which is binding on **[*1162]** this court, the "price fixing conspiracy" alleged in this case (IP Compl. P 221c) is not governed by the UTPCPA. [17] For these reasons, the Court GRANTS Defendants' motion to dismiss. Because any amendment to this claim would be futile, such dismissal is without leave to amend.

10. West Virginia

Defendants argue that Plaintiffs' claim under the West Virginia Consumer Credit and Protection Act (the "WVCCPA"), *W.V. Code § 46A-6-101, et seq.*, should be dismissed because the statute does not encompass price fixing. (Mot. at 23.) The WVCCPA states, in part, that: ***HN34***[] "The legislature hereby declares that the purpose of this article is to complement the body of federal law governing unfair competition and unfair, deceptive and fraudulent acts or practices in order to protect the public and foster fair and honest competition. It is the intent of the legislature that, in construing this article, the courts be guided by the interpretation given by the federal courts to the various federal statutes dealing with the same or similar matters. To this end, this article shall be **[**93]** liberally construed so that its beneficial purposes may be served." *W. Va.Code § 46A-6-101(1)*.

Seizing upon the state legislature's directive that the WVCCPA be "liberally construed," Plaintiffs contend that the statute should be read to encompass price fixing. (Opp. at 47.) The Court disagrees. ***HN35***[] Price fixing is not among the 16 enumerated definitions of "[u]nfair methods of competition and unfair or deceptive acts or practices[.]" *W. Va. Code, § 46A-6-102*. Rather, on their face, each of these definitions pertains to misrepresentations or deceptive practices relating to goods and services. For example, the statute prohibits acts such as "[p]assing off goods or services as those of another"; "[u]sing deceptive representations or designations of geographic origin in connection with goods or services"; "[m]aking false or misleading statements of fact concerning the reasons for, existence of or amounts of price reductions"; and "[e]ngaging in any other conduct which similarly creates a likelihood of confusion or of misunderstanding." Id. In short, price fixing or similar anticompetitive conduct cannot be reasonably construed to fall within the scope of the WVCCPA. See *TFT-LCD, 586 F. Supp. 2d at 1130 (WVCCPA does not include price fixing schemes)*; **[**94]** *GPU, 527 F. Supp. 2d at 1030* (same); *DRAM II, 516 F. Supp. 2d at 1119* (same).

Plaintiffs' reliance on *Federal Trade Comm'n v. Mylan Labs, Inc., 62 F. Supp. 2d 25 (D.D.C.)*, *on recons., 99 F. Supp. 2d 10 (D.D.C. 1999)* and *In re Pharmaceutical Industry Average Wholesale Price Litig., 233 F.R.D. 229, 231*

---

[17] Aggrieved purchasers are not without a remedy, as the Defendants' actions may be subject to **[**92]** the state's antitrust provisions. R.I. Gen. Laws § 6-36.2(b). However, indirect purchasers lack standing to bring a private claim under that statute. See *Siena v. Microsoft Corp., 796 A.2d 461, 464-65 (2002)* (holding that the state attorney general has standing as *parens patriae* to protect the rights of indirect purchasers in antitrust matters since they cannot bring such actions themselves directly).

(D. Mass. 2006) is misplaced. (Opp'n at 47.) While both cases support the general notion that indirect purchaser cases may be brought under the WVCCPA, neither stands for the proposition that the provision of the WVCCP at issue "justifies allowing allegations of antitrust price-fixing brought by indirect purchasers to go forward." Id. Accordingly, the Court GRANTS Defendants' motion to dismiss Plaintiffs' WVCCPA claim. Since amendment to this claim would be futile, said dismissal is without leave to amend.

[*1163] D. UNJUST ENRICHMENT CLAIMS

Finally, Defendants move to dismiss Plaintiffs' unjust enrichment claims under the laws of Arizona, Florida, Massachusetts, Minnesota, New Hampshire, North Carolina and Tennessee. They argue that the laws of each of these states "bar an action for unjust enrichment where the plaintiff has an adequate remedy at law." (Mot. at 24.) As a general principle, Defendants **[**95]** are correct that "[i]t is a basic doctrine of equity jurisprudence that courts of equity should not act … when the moving party has an adequate remedy at law …." *Mort v. United States, 86 F.3d 890, 892 (9th Cir. 1996)*; see also *Franklin v. Gwinnett County Public Schools, 503 U.S. 60, 75-76, 112 S. Ct. 1028, 117 L. Ed. 2d 208 (1992)* ("it is axiomatic that a court should determine the adequacy of a remedy in law before resorting to equitable relief"). In response, Plaintiffs contend that they are allowed under the Federal Rules to allege claims in the alternative, even if they are inconsistent with one another. See *Fed. R. Civ. Pro. 8(d)(3)* ("A party may state as many separate claims or defenses as it has, regardless of consistency.").

The difficulty for the Court is that neither party focuses on the appropriate issue. The laws governing claims for unjust enrichment vary from state to state. "[S]ome states recognize unjust enrichment as a separate free-standing claim, while others do not." *GPU II, 540 F. Supp. 2d at 1100*. Instead of analyzing the laws of each state separately, Defendants relegate their discussion to a string cite contained in a footnote in their moving papers. (Mot. at 24 n.9.) [18] The lack of individualized **[**96]** analysis by the parties is unhelpful. For example, Defendants cite *Community Guardian Bank v. Hamlin, 182 Ariz. 627, 630, 898 P.2d 1005 (Ariz. Ct. App. 1995)* for the proposition that an unjust enrichment claim "requires that there be no remedy provided at law." (Mot. at 24 n.9.) More recent Arizona authority, on the other hand, suggests that the "adequate remedy at law" requirement turns not on whether the plaintiff has a remedy "providing all the relief the party desires," but rather, on "whether there is a contract which governs the relationship between the parties." *Trustmark Ins. Co. v. Bank One, Arizona, NA, 202 Ariz. 535, 541 n.5, 48 P.3d 485 (2002)*.

The Court declines to independently address the viability of Plaintiffs' unjust enrichment claims with respect to the aforementioned states. In the event Defendants desire to seek a judicial resolution of this issue, they should discuss the laws of each state separately. Such analysis should be supported with citations to relevant authorities demonstrating that Plaintiffs cannot, as a matter of law, maintain a separate claim for unjust enrichment where **[**97]** they, at the same time, are pursuing claims based on state antitrust and consumer protection statutes. For these reasons, Defendants' motion to dismiss Plaintiffs' unjust enrichment claims under the laws of Arizona, Florida, Massachusetts, Minnesota, New Hampshire, North Carolina and Tennessee is DENIED without prejudice.

E. LACK OF A REPRESENTATIVE PLAINTIFF

Defendants move to dismiss Plaintiffs' second, third and fourth claims for relief to the extent that such claims are based on the laws of a state where no representative has been named; to wit, Alabama, Arizona, Mississippi, Nebraska, Nevada, Hawaii and New Hampshire. **[*1164]** (Mot. at 16.) ***HN36***[] "A class cannot assert a claim on behalf of an individual that they do not represent." *GPU I, 527 F. Supp. 2d at 1026*; accord *In re Ditropan XL Antitrust Litig., 529 F. Supp. 2d 1098, 1106-107 (N.D. Cal. 2007)*. Where, as here, a representative plaintiff is lacking for a particular state, all claims based on *that* state's laws are subject to dismissal. Id.

---

[18] The bulk of Plaintiffs' argument also is set forth in a lengthy string cite in a footnote. (Opp'n at 48 n.47.)

Plaintiffs concede that they lack representatives for claims predicated on the laws of each of the aforementioned states. However, they request leave to amend to join a class representative for each of **[**98]** those states, except as to Alabama. Defendants argue that allowing the joinder of additional plaintiffs should be disallowed as futile on the ground that Plaintiffs lack standing. As discussed, the Court has concluded that Plaintiffs have alleged sufficient facts to establish standing with respect to their state law antitrust claims, and certain of their consumer protection claims may be viable upon proper amendment. The proposed amendment to join the missing representatives, therefore, would not be entirely futile. The Court thus GRANTS Defendants' motion to dismiss as to Plaintiffs' second, third and fourth claims under the laws of Alabama, Arizona, Mississippi, Nebraska, Nevada, Hawaii and New Hampshire. Plaintiffs are granted leave to amend to join representative class members to the extent their joinder is consistent with this Order.

F. MISCELLANEOUS REQUESTS

Several of the parties have filed requests for judicial notice ("RJN"). (Docket 399, 448, 419, 377.) All requests are unopposed, except for the RJN filed by Hynix Semiconductor America, Inc. ("Hynix") (Docket 377), to which the Indirect Purchaser Plaintiffs have filed an objection (Docket 400). The unopposed RJNs are GRANTED. **[**99]** As to Hynix's RJN, the Court's ruling does not rely on any of the materials submitted therein. Therefore, Hynix's RJN is DENIED AS MOOT and Indirect Purchaser Plaintiffs' objections are OVERRULED AS MOOT.

Direct and Indirect Purchaser Plaintiffs also filed a motion for administrative relief in which they submit copies of three district court decisions that were rendered following the scheduled hearing date on the motions to dismiss. (Docket 454). The Court finds that under the circumstances, the submission of these authorities is authorized and appropriate under Local Rules 7-3(d) and *7-11*, and as such, the motion is GRANTED.

Finally, Defendants filed a motion for a protective order to stay discovery during the pendency of the above-discussed motions to dismiss. (Docket 379). As the Court has now resolved the motions, this motion is DENIED AS MOOT.

V. CONCLUSION

For the reasons stated above,

IT IS HEREBY ORDERED THAT:

1. Defendants' motion to dismiss (Docket 370, 371, 372, 373, 376, 382) the Direct Purchasers' Complaint is DENIED.

2. Defendants' motion to dismiss the Indirect Purchasers' Complaint (Docket 374) is GRANTED IN PART and DENIED IN PART, as follows:

a. The motion to dismiss is DENIED **[**100]** as to Plaintiffs' state antitrust claims.

b. The motion to dismiss is DENIED as to Plaintiffs' claims under the consumer protection laws of Arkansas, and GRANTED as to Plaintiffs' claims under the consumer protection laws of the District of Columbia, Hawaii, Kansas, Maine, New Hampshire, New Mexico, New York, Rhode Island and West Virginia. Plaintiffs are GRANTED LEAVE TO AMEND as to their claims under the laws of the District of Columbia, Hawaii, New Hampshire, New Mexico and New York. Plaintiffs' **[*1165]** consumer protection claims under the laws of Kansas, Maine, Rhode Island and West Virginia are DISMISSED WITH PREJUDICE.

d. The motion to dismiss is DENIED as to Plaintiffs' claim for unjust enrichment.

e. The motion to dismiss is GRANTED as to the Second, Third and Fourth Claims for Relief to the extent that Plaintiffs' claims are based on the laws of Alabama, Arizona, Mississippi, Nebraska, Nevada, Hawaii and New

Hampshire, on the ground that Plaintiffs have failed to name a representative plaintiff. Such claims are DISMISSED WITH LEAVE TO AMEND to join a proper representative plaintiff for each of those states (except Alabama), but only to the extent their joinder is consistent with this **[**101]** Order.

f. Plaintiffs shall have up to and including May 1, 2009 to file an amended complaint that corrects the deficiencies described in this Order. Plaintiffs may not amend their Indirect Purchaser Complaint in any manner than specified herein.

3. All unopposed requests for judicial notice (Docket 399, 448, 419) are GRANTED. Hynix's request for judicial notice (Docket 377) is DENIED AS MOOT and Indirect Purchaser Plaintiffs' objections thereto (Docket 400) are OVERRULED AS MOOT.

4. Plaintiffs' motion for administrative relief to consider additional district court authorities (Docket 454) is GRANTED.

5. Defendants' motion for a protective order staying discovery (Docket 379) pending the disposition of their motions to dismiss is DENIED AS MOOT.

6. A Case Management Conference is scheduled for **May 20, 2009 at 3:00 p.m.** The parties shall meet and confer prior to the conference and shall prepare a joint Case Management Conference Statement which shall be filed no later than ten (10) days prior to the Case Management Conference that complies with the Standing Order for All Judges of the Northern District of California and the Standing Order of this Court. Plaintiffs shall be responsible for **[**102]** filing the statement as well as for arranging the conference call. All parties shall be on the line and shall call (510) 637-3559 at the above indicated date and time.

IT IS SO ORDERED.

Dated: March 31, 2009

LexisNexis® Headnotes

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN1[] **Summary Judgment, Supporting Materials**

S.D.N.Y. Civ. R. 56.1 provides that upon motions for summary judgment the moving party shall submit a separate, short and concise statement, in numbered paragraphs, of the material facts as to which the moving party contends there is no genuine issue to be tried.

Civil Procedure > ... > Summary Judgment > Opposing Materials > Accompanying Documentation

HN2[] **Opposing Materials, Accompanying Documentation**

S.D.N.Y. Civ. R. 56.1 provides that the papers opposing a motion for summary judgment shall include a correspondingly numbered paragraph responding to each numbered paragraph in the statement of the moving party, and if necessary, additional paragraphs containing a separate, short and concise statement of additional material facts.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN3[] **Summary Judgment, Entitlement as Matter of Law**

Summary judgment may be granted where there are no genuine issues of material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN4[] **Entitlement as Matter of Law, Materiality of Facts**

In the context of a motion for summary judgment, a fact is material only if, based on that fact, a reasonable jury could find in favor of the nonmoving party.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN5[] **Burdens of Proof, Movant Persuasion & Proof**

On a motion for summary judgment, the burden rests on the movant to demonstrate the absence of a genuine issue of material fact.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN6[] **Summary Judgment, Evidentiary Considerations**

In deciding whether summary judgment is appropriate, the court resolves all ambiguities and draws all permissible factual inferences against the movant.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN7[] **Burdens of Proof, Nonmovant Persuasion & Proof**

To defeat summary judgment, a nonmovant must go beyond the pleadings and do more than simply show that there is some metaphysical doubt as to the material facts.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN8[] **Summary Judgment, Entitlement as Matter of Law**

The court's role at the summary judgment stage of the litigation is not to decide issues of material fact, but to discern whether any exist.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Absence of Essential Element

HN9[] **Burdens of Proof, Absence of Essential Element**

Summary judgment must be granted against a party in instances when such party fails to adequately establish an essential element on which it bears the burden of proof.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Scintilla Rule

HN10[] **Burdens of Proof, Nonmovant Persuasion & Proof**

A non-moving party may not rest upon unsubstantiated allegations, conclusory assertions or mere denials of the adverse party's pleading, but must set forth and establish specific facts showing that there is a genuine issue for trial. A metaphysical or other whimsical doubt concerning a material fact does not establish a genuine issue necessitating a trial. The mere existence of a scintilla of evidence supporting the nonmovant's case is insufficient to defeat a motion for summary judgment.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

Summary judgment remains a vital procedure tool to avoid wasteful trials and may be particularly important in antitrust litigation to prevent lengthy and drawn-out litigation that has a chilling effect on competitive market forces. ***Antitrust law*** limits the range of permissible inferences from ambiguous evidence in a case brought under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*. Specifically, conduct as consistent with permissible conduct as with an illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN12[] **Sherman Act, Scope**

See *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN13[] **Regulated Practices, Price Fixing & Restraints of Trade**

Only unreasonable restraints are actionable under the antitrust laws.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN14[] **Regulated Practices, Monopolies & Monopolization**

Section 2 of the Sherman Act imposes liability on any person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of trade or commerce. *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Sherman Act > Remedies > Injunctions

HN15[] **Remedies, Damages**

Sections 4 and 16 of the Clayton Act, *15 U.S.C.S. §§ 15* and *26*, permit a private party to recover damages and seek injunctive relief for any violation of the Sherman Act, *15 U.S.C.S. § 1 et seq.*

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN16[] **Sherman Act, Claims**

To prevail on a Sherman Act claim, under either *15 U.S.C.S. § 1* or *15 U.S.C.S. § 2*, a plaintiff must prove an antitrust injury. To prove an antitrust injury, the plaintiff must show that the defendants' actions caused an injury to competition; demonstrating injury only to individual competitors is insufficient. Insisting on proof of harm to the whole market fulfills the broad purpose of the ***antitrust law*** that was enacted to ensure competition in general, not narrowly focused to protect individual competitors. To that end, the court must assess the impact of the defendants' actions upon the plaintiff's market, which requires some factual submission as to that market's structure and the services offered therein. The plaintiff bears the burden of establishing and proving the relevant market. The relevant market is defined as all products reasonably interchangeable by consumers for the same purposes.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

HN17[] **Summary Judgment, Entitlement as Matter of Law**

Generally, courts will not consider, on a motion for summary judgment, allegations that were not pled in the complaint and raised for the first time in opposition to a motion for summary judgment.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN18[] **Burdens of Proof, Nonmovant Persuasion & Proof**

On a motion for summary judgment, the nonmoving party may not rely on mere conclusory allegations or speculation, but instead must offer some hard evidence in support of its factual assertions.

Torts > ... > Business Relationships > Intentional Interference > Elements

HN19[] Intentional Interference, Elements

To maintain an action for tortious interference with a plaintiff's business relations under New York law, the plaintiff must demonstrate that: (1) there is a business relationship between the plaintiff and a third party; (2) the defendant, knowing of that relationship, intentionally interferes with it; (3) the defendant acts with the sole purpose of harming the plaintiff, or, failing that level of malice, uses dishonest, unfair, or improper means; and (4) the relationship is injured.

Torts > ... > Business Relationships > Intentional Interference > Elements

HN20[] Intentional Interference, Elements

To claim tortious interference with a prospective business relationship, a plaintiff must specify some particular, existing relationship through which the plaintiff would have done business but for the allegedly tortious behavior. Furthermore, the defendant must direct some activities toward the party and convince the third party not to enter into the business relationship with the plaintiff.

Torts > ... > Commercial Interference > Employment Relationships > General Overview

HN21[] Commercial Interference, Employment Relationships

A plaintiff cannot maintain a tortious interference claim against her employer. An employer cannot be liable for interfering with its own relationship with its employee. Furthermore, a tortious interference claim may not lie against agents of the employer absent a showing that they acted outside the scope of their authority.

Counsel: [1]** For Plaintiff: CARL E. PERSON, ESQ., Of Counsel, LAW OFFICE OF CARL E. PERSON, New York, New York.

For Defendants: S. ALLAN ADELMAN, ESQ., MICHAEL I. JOSEPH, ESQ., Of Counsel, ADELMAN, SHEFF & SMITH, LLC, Annapolis, Maryland; STEPHEN M. COWHERD, ESQ., Of Counsel, JEFFERS & IRELAND, P.C., Fairfield, Connecticut.

Judges: William C. Conner, Senior United States District Judge.

Opinion by: William C. Conner

Opinion

[*543] OPINION AND ORDER

CONNER, Senior D.J.

Plaintiff Saeeda A. Mahmud, M.D., brings this action against defendants Walter Kaufmann, M.D. ("Kaufmann"), Jeff Auerbach, M.D. ("Auerbach"), Jane Brooks, M.D. ("Brooks"), Gopal Shah, M.D. ("Shah") and David Brody, M.D. ("Brody" and together with Kaufmann, Auerbach, Brooks and Shah, collectively "defendants") arising out of the denial of her medical staff privileges at Bon Secours Community Hospital (the "Hospital" or "BSCH") and Orange Regional Medical Center ("ORMC"). Plaintiff alleges that defendants failed to renew her contract with the Hospital and thwarted her efforts to contract with ORMC for admitting privileges, both on the basis of her race and in an effort to limit competition in the market for certain specialized medical services in the area of Port Jervis, New **[**2]** York. Plaintiff brings claims pursuant to *42 U.S.C. § 1981*, the New York Human Rights Law, *New York Executive Law §§ 290, et seq*. (the "NYSHRL"), the Sherman Act, *15 U.S.C. §§ 1, et seq.*, and *New York General Business Law § 340* (the "NYGBL"), as well as common law claims for interference with prospective economic advantage and *prima facie* tort.

[*544] Following a series of opinions and communications with the Court, plaintiff's only remaining causes of action are her fifth and sixth causes of action, for interference with plaintiff's prospective economic advantage and violation of the Sherman Act. [1] Defendants now move for summary judgment on both of these claims. For the reasons stated herein, defendants' motion is granted in its entirety.

BACKGROUND

Plaintiff, a licensed **[**4]** physician, is board certified in internal medicine and specializes in cardiology. (Mahmud Decl. PP 3, 6-7.) Defendants are all doctors affiliated with the Hospital. (*Id*. P26.) In or about 1996, a representative from Mercy Hospital [2] offered to sell to plaintiff a pulmonary and internal medicine practice, encouraging her to open a cardiology practice because there was only one other cardiologist in the Port Jervis area, Kaufmann. (*Id*. PP 10-11.) Before she accepted the offer, plaintiff learned that Kaufmann had an exclusive arrangement for interpreting all cardiology tests (or "echo tests") administered at the Hospital, but plaintiff was told by representatives of Mercy Hospital that "something will be done about the exclusivity of cardiology tests." (*Id*. P 13.) These representatives assured plaintiff that, as she expanded her cardiology practice, she would be permitted to interpret her own patients' cardiology tests administered at the Hospital. (*Id*.) "[A] few weeks later, Kaufmann stated to [plaintiff] that he agreed to this." (*Id*.) Plaintiff ultimately accepted Mercy Hospital's offer to sell the practice. (*Id*. P 12.)

However, once plaintiff began working, Kaufmann "rescinded his earlier assurance and made a unilateral decision to read the [cardiology tests] of the . . . patients for which [plaintiff] had consulted." (*Id*. P 15.) According to plaintiff, "[t]his created quality of care issues for [her] patients because of the delay in getting the tests to [her] for her (unpaid) review, and cost [her] about $ 1,312,500 in lost fees." (Pl. R. 56.1 Stmt. P22.) [3] Plaintiff sent letters to the

---

[1] Defendants moved to dismiss plaintiff's ten-count Complaint in its entirety pursuant to *FED. R. CIV. P. 12(b)(6)* for failure to state a claim upon which relief can be granted and in an Opinion and Order dated September 27, 2006, ("*Mahmud I*") the Court dismissed plaintiff's third cause of action under NYSHRL and her eighth and tenth causes of action for *prima facie* tort. *Mahmud v. Kaufmann, 454 F. Supp. 2d 150, 164 (S.D.N.Y. 2006)* (Conner, J.). Defendants **[**3]** then moved for reconsideration of the First Opinion, and in an Opinion and Order dated June 27, 2007, ("*Mahmud II*") the Court dismissed plaintiff's first cause of action under *42 U.S.C. § 1981*, her fourth cause of action under NYSHRL, and her seventh cause of action under the NYGBL. *Mahmud v. Kaufmann, 496 F. Supp. 2d 266, 278 (S.D.N.Y. 2007)* (Conner, J.). During a telephone conference before this Court on October 15, 2008, plaintiff withdrew her second cause of action under *42 U.S.C. § 1981* and her ninth cause of action for interference with prospective economic advantage. (Pl. Mem. Opp. Summ. J. at 2.)

Plaintiff's ninth cause of action for interference with prospective economic advantage was based on defendants' alleged intentional disruption of plaintiff's relationships with her patients by making certain comments to those patients. Plaintiff's fifth cause of action, also for interference with prospective economic advantage, is based on defendants' alleged "actions . . . toward[] [p]laintiff" in "driving away [her] patients, or forcing patients to consult other doctors with Hospital privileges, through unlawful and/or improper means." (Am. Complt. P 51.)

[2] Mercy Hospital was later renamed Bon Secours Community Hospital. **[**5]** *Mahmud I, 454 F. Supp. 2d at 153 n.2*.

[3] ***HN1***[] *Local Rule 56.1* provides that upon motions for summary judgment the moving party shall submit "a separate, short and concise statement, ***in numbered paragraphs***, of the material facts as to which the moving party contends there is no genuine issue to be tried." (alteration in original). Although it appears that defendants' initial Rule 56.1 Statement meets these

Hospital's administration "seeking to rectify this **[*545]** inappropriate poaching of [her] patients' tests . . . but this effort failed to bring about any changes." (Mahmud Decl. P 15.) At least one of the defendants "was heading the doctors' committee whose consent would be needed to make the desired change." (*Id*.)

During a period of time spanning from some point in 2000 through June 2001, plaintiff was "often critical of [H]ospital management, and the level and quality of care provided by [the Hospital] and by various doctors on staff at the [H]ospital." [4] (*Id*. P 34.) She often communicated her criticisms orally, "through appropriate channels . . . but without result." (*Id*. P 35.) According to plaintiff, despite her complaints, "the quality of care remained **[**8]** the same." (Pl. R. 56.1 Stmt. P 6 (citing Mahmud Decl. P 75).) She then resorted to putting her concerns regarding "inadequate care" in her patients' medical charts, for which she was criticized by the Hospital's administration and her peers. [5] (Mahmud Decl. P 35.) Plaintiff contends that her concerns were "well founded under medical practices." [6] (Pl. R. 56.1 Stmt. P 4.)

[*546] In the Spring of 2001, the Hospital was evaluated by the Joint Accreditation Hospital Commission ("JAHCO") for purposes of its re-accreditation. (Mahmud Decl. P 37.) Plaintiff made an appointment to meet with the JAHCO to report her concerns about "the level and quality of care provided by the [H]ospital." (*Id*. P37.) She cancelled the appointment after certain employees [7] of the Hospital told her to not express her criticisms about the Hospital to JAHCO and threatened her. (*Id*. P 38.)

In July 2001, Thomas Brunelle ("Brunelle"), Executive Vice President/Administrator of the Hospital, notified plaintiff that, at the request of the Hospital's Physician Quality Assurance Committee, he would arrange for an independent

---

requirements, **[**6]** defendants' Supplemental Rule 56.1 Statement does not contain any numbered paragraphs. Therefore, the Court's citations to this Statement include only the relevant page number.

HN2[] *Local Rule 56.1* also provides that the papers opposing a motion for summary judgment "shall include ***a correspondingly numbered paragraph responding to each numbered paragraph in the statement of the moving party, and if necessary, additional paragraphs containing*** a separate, short and concise statement of ***additional*** material facts." (alterations in original). Plaintiff has not provided any statement corresponding to either of defendants' Rule 56.1 Statements. Instead, plaintiff directs the Court to her 84-paragraph declaration, to her own Rule 56.1 Statement, which, according to plaintiff, "is also a brief summary of the material facts," and to two exhibits which, together, contain approximately 185 documents. (Pl. Mem. Opp. Summ. J. at 3.) Plaintiff also includes a seven-page "Partial Statement of Facts" in her Memorandum of Law in Opposition to Defendants' Motion for Summary Judgment. (*Id*. at 4-12.) Plaintiff's counsel explains: "Instead of attempting to summarize this substantial body of evidence, I have arranged **[**7]** the documents . . . so that they tell the story." (*Id*. at 3.) The Court notes that not only is it an attorney's job to *attempt* to summarize the evidence, but it is the attorney's job to actually do so. By barraging the Court with documents in this manner, plaintiff not only fails to comply with Rule 56.1's requirements of "short and concise" statements, but also undermines the purpose of *Rule 56.1* "to streamline the consideration of summary judgment motions by freeing the district courts from the need to hunt through voluminous records without guidance from the parties." *Rodriguez v. Morton, 2009 U.S. Dist. LEXIS 12470, 2009 WL 414033, at *6 (S.D.N.Y. Feb. 13, 2009)* (citing *Holtz v. Rockefeller & Co., 258 F.3d 62, 74 (2d Cir. 2001)* (internal quotation marks omitted)).

[4] Plaintiff does not specify the nature of her complaints with particularity, although she states that she was concerned about "the level and quality of care provided by the [Hospital]," that "[p]atients' lives were at stake and too many deaths were happening without accountability" and that her complaints concerned "deficiencies [she] saw in BSCH conditions, nursing services and even practices by some doctors." (Mahmud Decl. PP 34, 35, 75.)

[5] Plaintiff avers that she started recording her concerns in the charts because her oral complaints did not result in any remedy of the complained-of deficiencies. (Mahmud Decl. P 75.) By recording the deficiencies in the patients' charts, she would "force [them] to be addressed and corrected" and she also would be protecting herself from blame for "unacceptable quality of care." **[**9]** (*Id*.)

[6] The documents plaintiff cites in support of this proposition concern plaintiff's qualifications, conduct and medical care; they do not corroborate or address the validity of plaintiff's complaints about hospital conditions. (*See* Mahmud Decl. PP 84A-84N; Person Decl., Ex. P at 11, 76.)

[7] None of these employees are named defendants in the instant litigation.

medical review of her charts to investigate her concerns about the level of care that was being rendered to her patients. **[**10]** (Defs. Suppl. R. 56.1 Stmt. at 1.)

Dr. Ronald Tatelbaum ("Tatelbaum") conducted the review of plaintiff's charts (the "charts") and by letter, dated October 15, 2001, (the "Tatelbaum Report") reported that there were "'serious medical issues and understandings of the basic physiology and pathology which . . . need to be addressed'" regarding plaintiff's *own* patient care. (*Id*.) Tatelbaum also noted his impression, based on the charts, that "'[plaintiff] has little respect for [H]ospital rules and regulations and little understanding of the value of a [H]ospital chart and documentation therein'" and he suggested that plaintiff be referred to the Committee for Physicians Health ("CPH"). [8] (*Id*. at 1-2.)

Brunelle sent the Tatelbaum Report to the Hospital's Medical Executive Committee ("MEC") and requested that "'corrective action'" be taken with regard to plaintiff, in accordance with Article VIII of the Medical Staff Bylaws (the "Bylaws"). (Defs. Suppl. R. 56.1 Stmt. at 2.) Pursuant to Section 8.1.2 of the Bylaws, the MEC referred the matter to Brooks, the Chief of the Department of Medicine, for further investigation. (*Id*.) Brooks, pursuant to the Bylaws, appointed an ad hoc committee (the "Ad Hoc Committee") to investigate the matter. (*Id*.) By letter, dated November 6, 2001, Brooks informed plaintiff that the Ad Hoc Committee had been appointed and that plaintiff could submit written materials to and had a right to an interview with this committee "to discuss, explain or refute the charges which have been made." (*Id*.; Lasch Decl., Ex. A at 162.) Brooks also sent plaintiff a copy of the Tatelbaum Report. (Defs. Suppl. R. 56.1 Stmt. at 2.)

On November 27, **[**12]** 2001, the Ad Hoc Committee informed Brooks that it had reviewed plaintiff's charts and "agree[d] 'in general with the majority of the issues raised by . . . Tatelbaum.'" (*Id*.) Brooks notified the MEC of the Ad Hoc Committee's findings and that she had been in touch with the CPH, which had recommended that plaintiff undergo a complete physical and psychiatric evaluation at Massachusetts General Hospital. (*Id*.) Brooks **[*547]** also recommended that plaintiff undergo the evaluation before the Ad Hoc Committee made its final recommendations to the MEC. (*Id*.) Brooks then sent a letter to plaintiff, wherein she urged plaintiff to take advantage of the opportunity to meet with the Ad Hoc Committee. (*Id*. at 3.)

According to plaintiff, the Ad Hoc Committee was comprised of the defendants and "several other doctors under their control." (Mahmud Decl. P 40.) Plaintiff also contends that Tatelbaum, a cardiologist, "had a relationship with" Bon Secours Charity Health System [9] "through his referral[s] of patients from his office," and that his recommendation "went beyond [the] scope of cardiology to suggest that [she] be sent for psychiatric evaluation." (*Id*. P 42.) Plaintiff had the charts reviewed by another **[**13]** physician, Dr. Janet Strain ("Strain"), "an interventional cardiologist," who concluded that plaintiff's care, as reflected in the charts, "has been without reproach" and was "appropriate and expeditious." (*Id*. P 43; Person Decl., Ex. P at 11.) Plaintiff sent a copy of Strain's report to Brooks and Auerbach. [10] (Defs. Suppl. R. 56.1 Stmt. at 3.)

On December 11, 2001, Brooks notified the MEC that the Ad Hoc Committee had met with plaintiff and still believed that plaintiff had "'an apparent lack of knowledge of current practice standards'" and that she had made "'inappropriate and incriminating statements in medical charts against colleagues and [the Hospital].'" (*Id*.) Brooks

---

[8] The CPH, a division of the Medical Society of the State of New York, provides "non-disciplinary, confidential assistance to physicians . . . experiencing problems from stress and difficult adjustment, emotional, substance abuse and other psychiatric disorders." (Defs. Suppl. R. 56.1 Stmt. at 2 n.2.)

Plaintiff contends that defendants "communicated with the Physicians Health Committee and induced them to request that [plaintiff] undergo psychiatric evaluation, when in fact she was functioning **[**11]** properly and in no need of treatment, evaluation or diagnosis." (Pl. R. 56.1 Stmt. P 9.) It appears plaintiff relies on her own sworn statements to support the proposition that defendants "induced" the CPH to request her evaluation.

[9] Plaintiff does not identify what relationship, if any, exists between Bon Secours Charity Health System and BSCH. (*See, e.g.*, Mahmud Decl. P 9.)

[10] At some point, Dr. Smits Kittur ("Kittur"), a neurologist, performed a neurological examination of plaintiff. (Mahmud Decl. P 43; Lasch Decl., Ex. A at 256.) Kittur also reviewed the charts and concurred in Strain's conclusion. (Mahmud Decl. P 43.)

recommended that the MEC consider suspending plaintiff until she completed the physical and psychiatric evaluation recommended **[**14]** by the CPH. (*Id*.; Lasch Decl., Ex. A at 174.) Brooks also sent a letter to plaintiff, urging her to contact Massachusetts General Hospital to schedule the evaluation. She told plaintiff:

> "This evaluation and our contact with the [CPH] was done for your protection. I sincerely hope that you will avail yourself of this opportunity. I have been informed . . . by the [CPH], that if you have not scheduled this appointment on or before December 14, 2001, your case will be dropped by the [CPH]."

(Defs. Suppl. R. 56.1 Stmt. at 3.) On December 12, 2001, plaintiff informed Brooks that she had contacted the hospital administration to inquire about monetary reimbursement pertaining to her evaluation at Massachusetts General Hospital. (*Id*.) Brooks then reported to the MEC that plaintiff had been in touch with the CPH and that plaintiff would be undergoing an evaluation by Dr. Julia Reade ("Reade"). (*Id*.) Brooks also forwarded to the MEC summaries of chart reviews made by the Ad Hoc Committee. (*Id*.)

The MEC reviewed Tatelbaum's findings, the Ad Hoc Committee's reports, Brooks's recommendation and charts prepared by plaintiff and concluded that plaintiff's "'patient care and charting have been inappropriate **[**15]** in a number of instances.'" (*Id*. at 4.) The MEC notified plaintiff of its findings and informed her that it would defer any further action until after she had been evaluated by Reade. (*Id*.) The MEC also recommended to plaintiff that she take a leave of absence until the evaluation was complete and a determination was made regarding whether it was appropriate for her to resume her practice. (*Id*.; Lasch Decl., Ex. A at 190.) By letter dated December 21, 2001, plaintiff's attorney **[*548]** notified the MEC that plaintiff was making arrangements for the evaluation by Reade but would not take a leave of absence. (Defs. Suppl. R. 56.1 Stmt. at 4.) Plaintiff was subsequently evaluated by Dr. Jhaveri of Middletown, New York. (*Id*.)

On February 14, 2002, the Ad Hoc Committee issued a report to Brooks stating that, after reviewing the charts that plaintiff prepared, it concluded that "there were multiple instances where [plaintiff's] care was inappropriate, unnecessary, and did not meet the standards of care of current medical practice." (*Id*. at 4; Lasch Decl., Ex. A at 202.) By letter dated February 21, 2002, Kaufmann, Chief of Staff of the Hospital, informed plaintiff that the MEC held a special meeting **[**16]** about her on February 19, 2002 because of her failure to be examined by Reade and her "'ongoing patient care issues.'" (Defs. Suppl. R. 56.1 Stmt. at 4.) Kaufmann also told plaintiff that the MEC, after considering her "'refusal to be evaluated as [she] had initially agreed, as well as all of the information which has been presented about [her] clinical activities and charting,'" had decided to recommend to the Board of Directors that her medical staff membership and clinical privileges be terminated, but that before making such a recommendation, the MEC would provide plaintiff with a final opportunity "'to obtain an appropriate evaluation, and, if indicated, obtain counseling or therapy.'" (*Id*. at 4-5.) Kaufmann also informed plaintiff that the MEC would consider the matter again at its next meeting, on March 11, 2002, at which meeting she would have the opportunity to appear. (*Id*. at 5.)

Plaintiff appeared at the meeting on March 11, 2002, "and that portion of the meeting [for which she was present] was recorded and transcribed." (*Id*.) The MEC voted that plaintiff must be evaluated at Massachusetts General Hospital at the Medical Staff's expense. (*Id*.) On March 12, 2002, Kaufmann **[**17]** reported to the Hospital Board of Directors the history and present status of the review concerning plaintiff and, on March 13, 2002, he notified plaintiff of the MEC's recommendation that she undergo an evaluation. (*Id*.)

On March 28, 2002, plaintiff was evaluated by Reade. (*Id*.) In a report to the CPH, dated April 12, 2002, Reade stated, *inter alia*, that plaintiff "'suffers from a severe personality disorder, and functions in the narcissistic realm'"; that she "'becomes enraged and attacking when criticized or frustrated'"; and that she "'attributes her difficulties to the envy and malign actions of others and takes no responsibility for her own bad behavior.'" (*Id*. at 5-6.) Reade concluded:

> "Given [plaintiff's] erratic behavior, the incidents of her reportedly inadequate patient care, her possible seizure history and her poor performance on various psychological tests . . ., we have serious concerns about [plaintiff]'s current fitness to practice medicine. Until her neuropsychological status has been fully evaluated, her clinical patient care should be closely supervised."

(*Id*. at 6.)

In mid-April, 2002, the CPH forwarded Reade's report to Auerbach, the Medical Director of the Hospital, **[**18]** with a recommendation that plaintiff undergo further evaluation by a behavioral neurologist and a neuropsychologist and that the hospital "'continue to provide oversight'" of her care. (*Id*.) In a letter to plaintiff dated April 22, 2002, Auerbach expressed concern that plaintiff had not agreed to participate in the CPH's evaluation of her. (*Id*.) He noted that her medical staff membership and clinical privileges had been extended to April 12, 2002 and again to May 12, 2002 "'based on the expectation that **[*549]** [she] would be actively participating in the evaluation of the [CPH].'" (*Id*. at 6-7.) Auerbach informed plaintiff that if the Hospital did not receive written confirmation by April 26, 2002 that she had agreed to cooperate with the CPH, the MEC would recommend that the Board of Directors allow plaintiff's medical staff membership and clinical privileges to expire. (*Id*. at 7.)

In a letter to the Hospital's counsel, dated April 24, 2002, the CPH reported that plaintiff was "eligible under law to join this [c]ommittee" but that her compliance would be "crucial to her success," noting Reade's assessment of plaintiff's "lack of motivation to change, absence of insight and specific hostility **[**19]** to psychological inquiry." (Lasch Decl., Ex. A at 247.) In that letter, the CPH informed that it was "'possible that [plaintiff] would respond to firm, clear, external limits,'" which the CPH would be "'prepared to set up and assist her with.'" (Defs. Suppl. R. 56.1 Stmt. at 7.)

On May 6, 2002, the MEC met and considered the CPH's recommendation that, for plaintiff to continue practicing medicine at the Hospital, direct, concurrent monitoring and supervision of her care would be required. (*Id*.) By letter dated May 7, 2002, the CPH informed plaintiff that, as plaintiff did not reach a monitoring agreement with the Hospital, effective May 5, 2002, at 5:00 p.m., plaintiff must "'cease the practice of medicine'" at the Hospital. (*Id*.) According to the letter, this meant that plaintiff could not "'perform any duties that require a medical license at the [H]ospital or in [her] office until [she has] been cleared for duty by an approved behavioral neurologist and [the CPH].'" (*Id*.)

By letter dated May 9, 2002, Brunelle notified plaintiff that it was the unanimous consensus of the MEC that the Hospital did not have the resources to provide the level of review and supervision recommended by the **[**20]** CPH for plaintiff to continue practicing there. (*Id*.) Brunelle informed plaintiff that the Board of Directors would meet on May 14, 2002 to consider the recommendations of the MEC and the CPH and that plaintiff could submit written information for the Board of Directors to consider at that meeting. (*Id*. at 7-8.)

On or about May 14, 2002, plaintiff requested a leave of absence, citing health reasons. (*Id*. at 8.) Plaintiff states that she requested the leave because she was "[a]fraid of [defendants'] apparent power and influence with the medical establishment." (Mahmud Decl. P 46.) Brunelle notified her that her request was granted and that further action on her application for reappointment to the Medical Staff was deferred indefinitely. (Defs. Suppl. R. 56.1 Stmt. at 8.)

By letter dated August 1, 2002, the CPH informed plaintiff that, although Kittur and Dr. Charles Bradshaw had concluded that it did not appear that she had any neurological organic disease and that her psychological testing results "did not contraindicate [her] return to work," neither evaluator had formulated a diagnosis on her behalf and because she had "not been given a diagnosis by the most recent evaluators, [she **[**21]** was] not eligible to join [the CPH] at [that] time." (*Id*. at 8.; Lasch Decl., Ex. A at 256.)

By letter dated November 25, 2002, Brunelle asked plaintiff whether she wanted to pursue her application for reappointment at the Hospital, which application, according to the letter, was pending at the time plaintiff took a medical leave of absence. (Defs. Suppl. R. 56.1 Stmt. at 8; Lasch. Decl., Ex. A at 30.) Plaintiff responded by letter dated December 3, 2002, wherein she informed Brunelle that she would not reapply for privileges because she had been "so traumatized by [Brunelle's] behavior **[*550]** and that of the seven doctors on the [MEC] that it appears impossible for [her] to reapply." (Defs. Suppl. R. 56.1 Stmt. at 8; Lasch Decl., Ex. A at 260.) Brunelle then advised plaintiff that her pending application, which had been on hold, was deemed to have been withdrawn. (Defs. Suppl. R. 56.1 Stmt. at 8.)

In a letter dated December 16, 2002 to the Office of Professional Medical Conduct ("OPMC"), Brunelle, without referring to plaintiff by name, described the circumstances of plaintiff's withdrawal of her application and inquired whether it was necessary to report her withdrawal pursuant to the New **[**22]** York Public Health Law. (*Id*.; Lasch Decl., Ex. A at 313-15.) He enclosed with the letter redacted copies of the reports made by Tatelbaum and Strain. (Defs. Suppl. R. 56.1 Stmt. at 8.) The OPMC informed Brunelle that his letter had been forwarded to Brian M. Murphy ("Murphy"), the OPMC's Chief Counsel. (*Id*.) In March 2003, Murphy informed Brunelle that the withdrawal of an application for privileges under the circumstances described in Brunelle's letter required reporting under state law. (*Id*.) Brunelle then informed the OPMC that the physician at issue was plaintiff. (*Id*.)

In May 2003, plaintiff "applied for affiliation" with ORMC. (Mahmud Decl. P 52.) In June 2003, Auerbach provided information to ORMC in response to its request for information about plaintiff pursuant to state law. (Defs. Suppl. R. 56.1 Stmt. at 9.) In a letter to Auerbach dated August 14, 2003, plaintiff requested that he forward to Dr. Mark Tuckfelt ("Tuckfelt") at ORMC "'all documentation associated with the review process related to my performance at [BSCH], including [Auerbach's] letter to . . . [the OPMC].'" (*Id*.) Auerbach responded that he would comply with her request and sent to the OPMC any and all documents **[**23]** associated with plaintiff's review process not already provided. (*Id*.; Lasch Decl., Ex. A at 283.) In a letter to Brunelle dated March 22, 2004, plaintiff requested that certain additional documents be sent to Tuckfelt at ORMC. (Defs. Suppl. R. 56.1 Stmt. at 9.) By letter dated April 20, 2004, Brunelle sent Tuckfelt the documents requested by plaintiff, to the extent that those documents existed. (*Id*.)

In December 2002, Tuckfelt notified plaintiff that, for her application to ORMC to proceed, ORMC needed explanations from both plaintiff and B SCH of the circumstances leading to her leave of absence from BSCH. (Person Decl., Ex. P at 41.) According to Tuckfelt, staff members at BSCH were reluctant to discuss these circumstances and he asked plaintiff to provide BSCH with a release of the information to ORMC. (*Id*.)

In a letter to plaintiff dated October 28, 2003, Tuckfelt informed her that after reviewing the reports and correspondence relating to plaintiff's work experience at BSCH, and in light of ORMC's Medical Staff Bylaws, which require that physicians adhere to the ethics of their profession and be capable of working with others and delivering patient care, there was "sufficient **[**24]** evidence to question whether [she] qualified under [the terms of the Bylaws] especially character and ability to work with others." (*Id*. at 70.) Tuckfelt suggested that she consider withdrawing her application to ORMC. (*Id*.) Plaintiff "persisted in [her] application for privileges at ORMC." (Mahmud Decl. P 55.)

Tuckfelt then contacted the OPMC, stating that, although it appeared that BSCH had reported plaintiff to the OPMC, she claimed that she never received any correspondence from the OPMC, thereby "essentially denying any knowledge of having been reported to [the] OPMC." (Person Decl., Ex. P at 72.) Tuckfelt stated that it seems "unlikely" that plaintiff would have been unaware that BSCH reported her to **[*551]** the OPMC and, therefore, he requested assistance in evaluating plaintiff's character. (*Id*.) In a letter dated December 23, 2003, the OPMC informed Tuckfelt that, after interviewing him and plaintiff, the OPMC had concluded its investigation of plaintiff and determined that there was no evidence to support a charge of misconduct under state law. (*Id*. at 76.)

From October 2003 to April 2004, the OPMC investigated plaintiff's conduct at BSCH. (Mahmud Decl. P 49.) The case was then closed. **[**25]** (*Id*.) In a letter dated July 26, 2004, the New York Department of Health informed plaintiff that, after considering her complaint against BSCH for improper failure to renew her privileges, and after reviewing and considering information relevant to the matter, it found that the Hospital's reasons for suspending her privileges were consistent with the New York Public Health Law. (Lasch Decl., Ex. C.)

On June 28, 2004, the Medical Executive Committee at ORMC "acted to deny privileges to [plaintiff]." (Mahmud Decl. P 57.) Plaintiff contends that ORMC "relied upon the documents created by [defendants] to deny [her] admitting privileges at ORMC . . ., which result was predictable as well as desired by [defendants]." [11] (Pl. R. 56.1 Stmt. P 17.) She admits that there is no evidence that any of the defendants spoke to anyone at ORMC about her or her application. (Mahmud Decl. P 69.)

---

[11] To support the proposition that defendants desired that ORMC rely on the documents "created" by them to deny admitting privileges to plaintiff, plaintiff relies only upon her own declaration. (*See* Pl. R. 56.1 Stmt. P 17 (citing Mahmud Decl. PP 50, 53).)

Plaintiff contends that defendants and other doctors at the **[**26]** BSCH "directed their attention to sham, ill-founded activities intended to create an injurious written record . . ., force [her] to withdraw from BSCH under threat of making unfounded charges of unprofessional conduct against [her] . . ., and to prevent her from obtaining admitting privileges at other hospitals." [12] (Pl. R. 56.1 Stmt. P 8 (internal citations omitted).) She asserts that they "deviated from their custom and practice of dealing with physician issues in executive session without any writings to record the events . . . so that there would be documents making [plaintiff] look bad, [13] which documents were required to be sent to the NYS regulatory agencies upon request or to any hospital at which [she] may seek admitting privileges." (*Id*. P 11.) [14] Plaintiff asserts that the Tatelbaum Report "was specifically requested by [defendants] to be adverse" [15] so that defendants **[*552]** could use it "as part of their activities directed against [p]laintiff and her career as a doctor and cardiologist." (Pl. R. 56.1 Stmt. P 19 (citing Mahmud Decl. PP 45, 53, 67-68).)

Plaintiff currently practices medicine and has admitting privileges at St. Anthony Community Hospital, a sister hospital to BSCH, and "work[s] closely with" Good Samaritan Hospital, also a sister hospital to BSCH, where she has been encouraged to apply for admitting and consulting privileges. (Mahmud Decl. P 17.) She was appointed Director of Cardiology at Ellenville Regional Hospital in November 2007, and has had admitting and consulting privileges at Catskill Regional Hospital, in Sullivan County, since 2006. (*Id*.) In June 2008, Tatelbaum offered to plaintiff a position as a physician in his medical group and, at least as of October 2008, the offer remains open. (*Id*. P 42A.)

BSCH is located 17 miles away from ORMC, which is located in Middletown, New York and is the hospital in closest proximity to BSCH. (*Id*. P 27.) The Horton Medical Center, one of two ORMC facilities in Middletown, is the hospital in closest proximity to BSCH that provides cardiac care. (*Id*.) According to plaintiff, the "main hospitals for cardiac care" are: Vassar Hospital in Poughkeepsie, New York (about 45 minutes from BSCH); Good Samaritan Hospital in Suffern, New York (about 45 minutes from BSCH); **[**29]** a hospital that is not specified by name in plaintiff's declaration, but which is located in Kingston, New York; and Newton Hospital in New Jersey. (*Id*.) Plaintiff's cardiac patients live in Port Jervis "and a 5-mile surrounding area." (*Id*. P 28.) According to plaintiff, "BSCH is the nearest hospital for all of these patients." (*Id*.)

Plaintiff now maintains a professional practice in Port Jervis and her office is equipped with "modern cardiac-care equipment," however, her practice "is not an adequate substitute for a fully-staffed hospital, especially one with a coronary care unit and an intensive care unit." (*Id*. P 30.) For plaintiff to treat patients in a hospital setting, they must be transported or transport themselves to one of the hospitals at which she has admitting privileges, [16] involving "about 30 to 45 minutes of . . . travel time [beyond that which would be required to the Hospital]," and such a length of travel time can be "dangerous for certain cardiac patients." (*Id*.) Many of plaintiff's patients are "very sick, elderly

---

[12] To support this proposition, plaintiff cites her own declaration and directs the Court to over 100 "ORMC documents," without **[**27]** providing any citations to page numbers. She also provides the citation "Ex. R, PX B-E in depositions of Defendants" however it is unclear to which parts of defendants' deposition testimony she intends to refer. (Pl. R. 56.1 Stmt. P 8.)

[13] Although plaintiff cites Auerbach's deposition testimony, nothing in that testimony indicates any intent on the part of defendants to cast plaintiff in a bad light.

[14] However, the record reflects that, while the MEC typically kept written minutes of regular meetings, it did not keep such minutes at executive sessions in the interest of maintaining the confidentiality of those meetings, "[s]o that things that are being discussed [are] not [] used to harm any individual or part of the hospital as it's being processed." (Person Decl., Ex. H (Kaufmann Dep. at 16:6-17:17).)

[15] In support of this proposition, plaintiff explains that defendants requested that the report be adverse "through failure to confront [Tatelbaum] with Strain letter . . . or the report of nuerologist Dr. Kitur [sic] who concurred with [] Strain." (Pl. R. 56.1 Stmt. P 19.) Her citations to the record do not indicate whether defendants shared the reports prepared by Strain and Kittur with **[**28]** Tatelbaum.

[16] As noted above, plaintiff has admitting privileges at Ellenville Regional Hospital, Catskill Regional Medical Center and St. Anthony Community Hospital. (Mahmud Decl. P 30.)

and poor," and "[d]ue to their medical condition as well as financial situation . . . are unable to travel [away] from the immediate area." (*Id*. P 31.) **[**30]** When they are admitted to BSCH, plaintiff has no input in their treatment and is "never called to . . . give their recent test results or medication." (*Id*. P 32.)

Plaintiff avers that, as a result of "losing" admitting privileges at BSCH and failing to obtain such privileges at ORMC, she has incurred attorneys' fees, loss of revenues, excessive travel charges and loss of "time spent in the office because of the need to travel to distant hospitals." (*Id*. P 18.) Her work schedule, which involves significant travel and long hours, has caused her personal life to suffer and has prevented her from performing "income producing speaking engagements." (*Id*.) She also "lost many cardiac patients." (*Id*. P 58.)

Plaintiff contends that "[t]he activities of [defendants] put patients at risk because they had to choose between the cardiologist they wanted as their doctor ([plaintiff]) **[*553]** and the nearest hospital for cardiac care in the event of a cardiac emergency." (Pl. R. 56.1 Stmt. P 16 (citing Mahmud Decl. PP 28, 32).) When plaintiff **[**31]** no longer had admitting privileges at BSCH, some of her patients sought and received cardiac treatment from Kaufman, a physician named Dr. Singh and "other cardiologists with admitting privileges at BSCH." (Mahmud Decl. P 50.) Plaintiff also contends that patients specifically in "the geographic market of Port Jervis and surrounding area (8-10 mile radius)" have been damaged, citing the declarations of 35 former and current patients of plaintiff, each of whom states that the patient would like plaintiff to be able to treat him or her at BSCH and some of whom also provide anecdotes about positive experiences while being treated by plaintiff. (Pl. R. 56.1 Stmt. P 20; Person Decl., Ex. O.)

Plaintiff states that "[d]efendants have *de facto* control of who is permitted to admit patients at BSCH through their mutually consensual rotation of positions of influence, such as Chief of Staff, Medical Director and Chief of Medicine in addition to chairing the Credentials, Medical Examinations and Quality Assurance Committees." (Mahmud Decl. P 33.) Plaintiff states further that "[t]hrough their ability to influence and/or control the allocation of admitting privileges . . . [and] consulting privileges **[**32]** at the Hospital and through the use of referrals, they control or at least have undue and disproportionate influence over a majority of the other physicians who can vote on such matters at BSCH." (*Id*.)

According to Kaufman, since 1982, no cardiologist who has applied for privileges to BSCH has been denied; there were six cardiologists on staff on September 30, 2008, the date of his deposition; and since 2002, four new cardiologists have joined the staff. (Person Decl., Ex. H (Kaufman Dep. at 37:4-17).)

DISCUSSION

I. Legal Standard

HN3[] Summary judgment may be granted where there are no genuine issues of material fact and the movant is entitled to judgment as a matter of law. *See FED. R. CIV. P. 56(c)*; *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247-50, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. ***HN4***[] A fact is material only if, based on that fact, a reasonable jury could find in favor of the nonmoving party. *Anderson, 477 U.S. at 248*. ***HN5***[] The burden rests on the movant to demonstrate the absence of a genuine issue of material fact. *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. ***HN6***[] In deciding whether summary judgment is appropriate, the court resolves all ambiguities and draws all permissible factual inferences against the movant. **[**33]** *See Anderson, 477 U.S. at 255*. ***HN7***[] To defeat summary judgment, the nonmovant must go beyond the pleadings and "do more than simply show that there is some metaphysical doubt as to the material facts." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. ***HN8***[] The Court's role at this stage of the litigation is not to decide issues of material fact, but to discern whether any exist. *See Gallo v. Prudential Residential Servs., L.P., 22 F. 3d 1219, 1224 (2d Cir. 1994)*. Nevertheless, as one court explained:

> ***HN9***[] [S]ummary **[**34]** judgment must be granted against a party in instances when such party fails to adequately establish an essential element on which it bears the burden of proof. . . . ***HN10***[] The non-moving

> party may not rest upon unsubstantiated allegations, conclusory assertions or mere denials of the adverse party's pleading, but must set forth and establish specific facts showing that there is a genuine issue for trial. . . . A metaphysical **[*554]** or other whimsical doubt concerning a material fact does not establish a genuine issue necessitating a trial. . . . The mere existence of a scintilla of evidence supporting the non-movant's case is insufficient to defeat a motion for summary judgment.

*Brooks v. Di Fasi, 1997 U.S. Dist. LEXIS 11162, 1997 WL 436750, at *2 (W.D.N.Y. July 30, 1997)* (internal quotation marks and citations omitted).

Furthermore, "as the Supreme Court observed . . . ***HN11***[] summary judgment remains a vital procedure tool to avoid wasteful trials and may be particularly important in antitrust litigation to prevent lengthy and drawn-out litigation that has a chilling effect on competitive market forces." *Bogan v. Nw. Mut. Life Ins. Co., 953 F. Supp. 532, 537-38 (S.D.N.Y. 1997)* (Conner, J.), *aff'd*, *166 F.3d 509 (2d Cir. 1999)*. "[A]ntitrust **[**35]** law limits the range of permissible inferences from ambiguous evidence in a § 1 case." *Matsushita Elec., 475 U.S. at 588*. Specifically, "conduct as consistent with permissible conduct as with an illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Id*.

II. Antitrust Claim

Plaintiff contends that defendants violated the Sherman Act by conspiring to create a monopoly over specialized medical services in the Port Jervis area. [17] (Am. Complt. PP 56-57.) *Section 1* of the Sherman Act provides, in pertinent part, that ***HN12***[] "[e]very contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. ***HN13***[] Only unreasonable restraints are actionable under the antitrust laws. *See* *New York ex rel. Spritzer v. Saint Francis Hosp., 94 F. Supp. 2d 399, 411 (S.D.N.Y. 2000)* (Conner, J.) (citing *Nw. Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 289, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985))*. ***HN14***[] *Section 2* imposes liability on any person "who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize **[**36]** any part of… trade or commerce." *15 U.S.C. § 2*. [18]

HN16[] To prevail on a Sherman Act claim, under either section, the plaintiff must prove an antitrust injury. *Ezekwo v. Am. Bd. of Internal Med., 18 F. Supp. 2d 271, 278-79 (S.D.N.Y. 1998)*, **[**37]** *aff'd*, *173 F.3d 844 (2d Cir. 1999)*. To prove an antitrust injury, the plaintiff must show that the defendants' actions caused an injury to competition; demonstrating injury only to individual competitors is insufficient. *Ezekwo, 18 F. Supp. 2d at 278*. "Insisting on proof of harm to the whole market fulfills the broad purpose of the ***antitrust law*** that was enacted to ensure competition in general, not narrowly focused to protect individual competitors." *Capital Imaging Assocs., P. C. v. Mohawk Valley Med.* ***[*555]*** *Assocs., Inc., 996 F.2d 537, 543 (2d Cir. 1993)*.

To that end, the Court must assess the impact of the defendants' actions upon the plaintiff's market, which requires "some factual submission as to that market's structure and the services offered therein." *Ezekwo, 18 F. Supp. 2d at 278*. The plaintiff bears the burden of establishing and proving the relevant market. *Tunis Bros. Co. v. Ford Motor*

---

[17] As noted in *Mahmud I*, "[a]lthough plaintiff does not specifically allege a claim under the Clayton Act, ***HN15***[] sections 4 and 16 of that Act, *15 U.S.C. §§ 15*, *26*, permit a private party to recover damages and seek injunctive relief for any violation of the Sherman Act. . . . As plaintiff is seeking damages and injunctive relief, we therefore treat plaintiff's suit as seeking recovery under the Sherman Act through the private right of action provided for in the Clayton Act." *454 F. Supp. 2d at 159 n.13* (internal citations omitted).

[18] It is not clear from the Amended Complaint whether plaintiff intends to assert her antitrust claim under *section 1*, *section 2* or both sections of the Sherman Act. She states that defendants' conduct was "contrary to *15 USC 1 et seq.*" (Am. Complt. P 57.) Her opposition papers cite both *section 1* and *section 2*. (*See, e.g.*, Pl. Mem. Opp. Summ. J. at 13, 17.) However, it is not necessary to determine this issue for the discussion below as the analyses is applicable to both sections.

Co., 952 F.2d 715, 724, 726 (3d Cir. 1991). "The relevant market is defined as all products reasonably interchangeable by consumers for the same purposes." Geneva Pharms. Tech. Corp. v. Barr Labs. Inc., 386 F.3d 485, 496 (2d Cir. 2004) (internal quotation marks and citation omitted). It is "the **[**38]** geographic and product/service area that is affected by the questioned activity or operation," Ginzburg v. Mem'l Healthcare Sys., Inc., 993 F. Supp. 998, 1011 (S.D. Tex. 1997) (internal quotation marks and citation omitted), and it "provides the context against which to measure the competitive effects" of the defendants' alleged anticompetitive conduct. Geneva Pharms. Tech., 386 F.3d at 496.

Plaintiff alleges in her Amended Complaint that the relevant services market is the "market for certain specialized medical services, such as cardiology, oncology and gastroenterology" and that the relevant geographic area is "the tri[-]state area, centered in Port Jervis, New York and extending north to Monticello, New York[,] west to Milford, Pennsylvania[,] [s]outh to Newton, New Jersey and east to Middletown and Warwick, New York." (Am. Complt. PP 55-56.) In her opposition papers to the instant motion, plaintiff attempts to present a new, smaller geographic market, consisting of "Port Jervis, New York, and stretching outward to a distance halfway between the nearest hospital in any direction," which consists of an 8-10 mile radius around Port Jervis. (Pl. Mem. Opp. Summ. J. at 15-16.) Plaintiff's **[**39]** new description of the relevant geographic market contradicts the allegations in the Amended Complaint. At least three of the bordering locations in the Amended Complaint are greater than 10 miles away from Port Jervis. Plaintiff also argues in her opposition papers that the relevant service market is "cardiac medical services coupled with hospital admitting privileges." (Pl. Mem. Opp. Summ. J. at 16.) This description also contradicts the allegations in the Amended Complaint, which defines the relevant market as simply the "market for specialized medical services" without any mention of "admitting privileges." (Am. Complt. P 56.)

HN17[] Generally, courts will not consider, on a motion for summary judgment, allegations that were not pled in the complaint and raised for the first time in opposition to a motion for summary judgment. Alali v. DeBara, 2008 U.S. Dist. LEXIS 86760, 2008 WL 4700431, *3 n.6 (S.D.N.Y. Oct. 24, 2008). *See also* Southwick Clothing LLC v. GFT (USA) Corp., 2004 U.S. Dist. LEXIS 25336, 2004 WL 2914093, at *6 (S.D.N.Y. Dec. 15, 2004) ("A complaint cannot be amended merely by raising new facts and theories in plaintiffs' opposition papers, and hence such new allegations and claims should not be considered in resolving the motion.") **[**40]** Therefore, the allegations in the Amended Complaint govern the description of the relevant market for purposes of this motion. Plaintiff has not submitted any evidence to support the relevancy of the geographic market that she alleges in her Amended Complaint - *i.e.*, that those boundaries border an area in which specialized medical services are "reasonably interchangeable" - and, therefore, she fails to carry her burden to establish that this is the relevant market. Geneva Pharms. Tech., 386 F.3d at 496.

However, even if we did accept, as the relevant market, the market that plaintiff espouses in her opposition papers, plaintiff's **[*556]** antitrust claims would still fail because she has not established any antitrust injury within this market. In the context of this case, an antitrust injury in this market would be an injury to individuals seeking emergency cardiac services [19] for whom BSCH is the nearest hospital. *See* Ginzburg, 993 F. Supp. at 1015

[19] We presume that plaintiff intends to define the relevant service market as *emergency* cardiac services. She has presented no evidence to indicate that individuals **[**42]** within her defined geographic market would not travel to a hospital other than BSCH for non-emergency cardiac services and, thus, she has not demonstrated that the provision of such services at BSCH are not reasonably interchangeable with similar services provided at other hospitals. Rather, plaintiff argues that the relevant market is Port Jervis and the surrounding geographic area "stretching outward to a distance halfway between the nearest hospital in any direction," because "obtaining medical care within the first 10 minutes of a life-threatening event is critical for the recovery prospects" and because when an individual suffers a stroke, he or she is taken to the nearest hospital. (Pl. Mem. Opp. Summ. J. at 15-16.) Thus, it appears that she intends to argue that, because of the need for expediency, emergency cardiac services at BSCH are not reasonably interchangeable with similar services at a hospital located farther away.

To the extent that plaintiff argues that individuals that are taken to the nearest hospital for emergency services are entitled to be seen by their physician of choice (in this case, plaintiff), we reject this proposition. A contrary finding would lead to **[**43]** the absurd result that any physician would be entitled to admitting privileges at any hospital located anywhere merely because that physician's patients *may* require emergency services at that hospital at some point in the future.

("[B]ecause the purpose of ***antitrust law*** is the promotion of consumer welfare, the court must analyze the antitrust injury from the perspective of the consumer") (internal quotation marks and citation omitted). Plaintiff has not directed the Court **[**41]** to any competent evidence indicating that patients at B SCH received inferior emergency cardiac care because of defendants' actions. Nor has she demonstrated that, due to defendants' actions, the price of emergency cardiac care services has increased or that, other than patients' inability to select plaintiff at BSCH, the choice of physicians in the market has changed. *See* *Korshin v. Benedictine Hosp., 34 F. Supp. 2d 133, 138 (N.D.N.Y. 1999)* (That court, finding that plaintiff-anesthesiologist failed to allege antitrust injury, noted that plaintiff did not allege "any change in the price of anesthesiology services, a decrease in the quality or efficiency of care, or that consumers of anesthesiology services . . . have less of a market choice, other than their [in]ability to select [plaintiff], as a result of defendants' actions"); *Ginzburg, 993 F. Supp. at 1017* ("[Plaintiff] . . . fails to produce evidence that competition has been threatened or that patient choice options have diminished due to [d]efendants' conduct.").

To support her proposition that defendants' actions injured patients, plaintiff cites her own sworn declaration, which contains only her own conclusory and unsupported allegations, and the declarations of 35 patients, each stating that the patient would like plaintiff to be able to treat him or her at BSCH. (*See* Pl. R. 56.1 Stmt. PP 16, 20.) Plaintiff cannot rely on her own conclusory allegations to prove factual matters on summary judgment. *See* *Stroud v. New York City, 374 F. Supp. 2d 341, 349 (S.D.N.Y. 2005)* (quoting *Patterson v. County of Oneida, 375 F.3d 206, 219 (2d Cir. 2004))* (***HN18***[] On a motion for summary judgment "the nonmoving party 'may not rely on mere conclusory allegations or speculation, but instead must offer some hard evidence' in support of its factual assertions."). Furthermore, the stated preference for plaintiff of 35 patients is not probative as to whether patients have received inferior emergency cardiology services because plaintiff no **[*557]** longer **[**44]** has admitting privileges at BSCH. Although some of plaintiff's patients may be upset that they cannot see plaintiff as their cardiologist when, in the event of an emergency, they are taken to their local hospital, plaintiff has not demonstrated that they are denied specialized medical services or that they receive inferior medical services because plaintiff does not have admitting privileges at BSCH.

Plaintiff also argues that "patients at BSCH are being deprived of . . . quality of care . . . by reason of the [d]efendants' activities in silencing . . . [p]laintiff . . . and not doing anything to correct the adverse conditions observed by . . . [p]laintiff." (Pl. Sur-Reply Mem. Opp. Summ. J. at 8.) She fails to adequately support these propositions. She has not submitted any evidence, beyond her own conclusory allegations, that her complaints about quality of care were valid or that defendants failed to take any action in response to her complaints. Rather, the undisputed facts indicate that the Hospital did take action in response to her complaints, though not the action that plaintiff desired: the Hospital's Physician Quality Assurance Committee initiated an investigation and reviewed **[**45]** patient charts wherein she had documented her complaints. Moreover, even if plaintiff had proffered evidence to support her propositions, her concerns regarding conditions at BSCH are irrelevant to the question of whether the quality of care at BSCH diminished because of plaintiff's alleged exclusion from competition. *See* *Ginzburg, 993 F. Supp. at 1019* (Rejecting a similar argument and noting that "according to [plaintiff], the level of care . . . did not improve even in spite of her efforts. In fact, [plaintiff] claims that most of her verbal complaints were ignored and her formal written complaints were whitewashed, announced to be without merit, and used to trigger a peer review action against her.") (internal quotation marks and citation omitted).

Plaintiff also argues that patients have suffered "lower quality of medical care" because Kaufmann, and not plaintiff, read the echo tests of plaintiff's patients and that Kaufmann is "destroying competition . . . through his monopolization of echo[] test revenues." (Pl. Sur-Reply Mem. Opp. Summ. J. at 9.) Plaintiff has not submitted any competent evidence to support these arguments. She has not introduced any evidence that Kaufmann is **[**46]** less capable than she is with respect to reading of echo tests. Nor has she directed the Court to any evidence, beyond her own conclusory allegations, that any of her patients suffered as a result of the fact that Kaufmann read their echo tests. [20] (*See* Pl. R. 56.1 Stmt. PP 21-22.)

---

[20] Plaintiff also submits her own sworn statement that Kaufmann ignored her suggestions to upgrade the "equipment and cardiology services at BSCH" and that after she left, "various specialized equipment for cardiac patients remains unused, to the detriment of the cardiac patients at BSCH." (Mahmud Decl. P 80.) Plaintiff's own speculation as to the impact of the level of

In addition to an absence of any evidence that any patient suffered inferior care because of defendants' allegedly anticompetitive conduct, plaintiff also has not demonstrated that consumer choice - in this context, patients' choice of physician - has diminished due to that conduct. [21] **[*558]** Rather, the record reflects that B SCH has employed four new cardiologists **[**47]** since 2002 [22] and, since 1982, no cardiologist who has applied for privileges to BSCH has been denied. *See* *Ginzburg, 993 F. Supp. at 1017* ("Even absent . . . [the plaintiff]'s options to practice at other hospitals, [the plaintiff] still fails to produce evidence that competition has been threatened or that patient choice options have diminished due to [the d]efendants' conduct," noting that the defendants have "expanded their practices . . . by hiring associates."); *Robles v. Humana Hosp. Cartersville, 785 F. Supp. 989, 998 (N.D. Ga. 1992)* (Although the plaintiff was no longer able to practice at the defendant's hospital, the evidence showed that the hospital added more doctors to its staff after the plaintiff left, thus proving that "patients have more of a choice concerning which doctor to visit and that [the hospital] is a more competitive hospital with the addition of the new doctors"). The evidence also indicates that plaintiff has admitting privileges at three other hospitals, that she continues to maintain a cardiology practice in Port Jervis and that Tatelbaum has offered her a position with his practice group. [23] Therefore, to the extent that physician choice has been reduced **[**48]** for those patients that wish to see plaintiff as their cardiologist, those patients may still be able to see her, to the extent that they can travel and do not require emergency services.

Finally, although plaintiff may have established that defendants' conduct caused various injuries to herself personally, such as loss of patients' business and potential revenues from reading echo tests, this is insufficient to demonstrate that competition as a whole was harmed. *See* *Capital Imaging Assocs., 996 F.2d at 547* (Affirming that summary judgment **[**49]** was warranted on Sherman Act claim brought by plaintiff, a radiology practice that had been excluded from providing services to patients of defendants' health care provider, noting that "[plaintiff]'s position is simply that it has been harmed as an individual competitor. It has not shown that defendants' activities have had any adverse impact on price, quality, or output of medical services offered to consumers in the relevant market."); *Purgess v. Sharrock, 1992 U.S. Dist. LEXIS 17057, 1992 WL 349683, at *2 (S.D.N.Y. Nov. 9, 1992)* (finding no antitrust injury where plaintiff, an anesthesiologist who was fired by a hospital, "merely asserts injury to himself as a competitor of [the hospital] and its anesthesiologists"); *Ginzburg, 993 F. Supp. at 1019* ("Antitrust concerns . . . are not implicated by an individual physician's loss of income or patient referrals.").

Therefore, summary judgment is granted with respect to plaintiff's antitrust claims because plaintiff has failed to proffer any evidence of the relevant market alleged in her Amended Complaint and because, even if she had established the relevant market, she has failed to raise a genuine issue of material fact as to the existence of any antitrust injury.

III. [**50] Interference With a Prospective Economic Advantage Claim

HN19[] To maintain an action for tortious interference with a plaintiff's business relations under New York law, the plaintiff must demonstrate that: "(1) there is a business relationship between the plaintiff and a third party; (2) the defendant, knowing of that relationship, intentionally interferes with it; (3) the defendant acts with the sole purpose of harming the plaintiff, **[*559]** or, failing that level of malice, uses dishonest, unfair, or improper means; and (4) the relationship is injured." *Goldhirsh Group, Inc. v. Alpert, 107 F.3d 105, 108-09 (2d Cir. 1997)*; *see* *Scutti Enters., LLC v. Park Place Entm't Corp., 322 F.3d 211, 215 (2d Cir. 2003)*.

---

equipment and cardiology services on patient care after she left BSCH is insufficient to create a genuine issue of fact as to whether patients were harmed by defendants' alleged actions.

[21] Plaintiff provides her sworn statement that "[t]he ability of . . . patients [] in the market area to select from competing providers of . . . specialized services has been severely limited, if not eliminated, by [defendants'] alleged activities." (Mahmud Decl. P 62.) This general conclusory allegation is insufficient to create a genuine issue of fact as to whether patient choice was in fact reduced.

[22] It appears from the record that plaintiff last worked at BSCH in May 2002, at which point she requested a leave of absence.

[23] We note that these positions may not permit plaintiff to render emergency cardiac services in the relevant geographic market.

Plaintiff alleged in her original Complaint that defendants' actions "were malicious and were solely intended to harm her by interfering with her prospective economic advantage and business relationships, by driving away patients, or forcing patients to consult other doctors with Hospital privileges, through unlawful and/or improper means." (Compl. P 51.) After defendants moved to dismiss this claim, in part on the ground that plaintiff had failed to allege some particular, existing business **[**51]** relationship with which the defendants interfered, (Defs. Mem. Supp. Mot. Dismiss (Document # 9) at 16-18), plaintiff amended her Complaint to add the names of seven patients with whom she had a relationship and with which relationships defendants allegedly interfered, (Am. Compl. P51). [24] In her motion papers, plaintiff now contends that defendants' activities constituted an unlawful interference with plaintiff's relationship with ORMC, with the OPMC and CPH, with BSCH, and with "all hospitals to which [plaintiff] may apply for admitting privileges for the rest of her professional life." (Pl. Mem. Opp. Summ. J. at 18-19.) Thus, it appears that plaintiff has abandoned her prior theory of liability - that defendants interfered with her relationships with patients - and now attempts to base her claim on defendants' alleged interference with her relationships with the two medical committees and various identified and unidentified hospitals. As discussed above, we will not consider, on a motion for summary judgment, allegations that were not pled in the Complaint and are raised for the first time in opposition to a motion for summary judgment. *Alali, 2008 U.S. Dist. LEXIS 86760, 2008 WL 4700431, *3 n.6*. Therefore, **[**52]** the allegations in the Amended Complaint govern for purposes of this analysis.

As set forth in *Mahmud I*, ***HN20***[] "[t]o claim tort[i]ous interference with a prospective business relationship . . . a plaintiff must specify some particular, existing relationship through which plaintiff would have done business but for the allegedly tort[i]ous behavior." *454 F. Supp. 2d at 162* (internal quotation marks and citation omitted). Furthermore, "[t]o satisfy the second requirement, . . . the defendant must direct some activities toward the party and convince the third party not to enter into the business relationship with plaintiff." *Id*. (internal quotation marks and citation omitted). Defendants contend that "[w]hile certain of the [d]efendants had limited contact with or provided professional services to some of [plaintiff]'s patients, those contacts in no way involved any conversations regarding [plaintiff], **[**53]** and . . . [d]efendants made no statements to any patient about [plaintiff], derogatory or otherwise." (Defs. Mem. Supp. Summ. J. at 18.) In support of this statement, defendants introduce the declarations of each of the defendants: Kaufmann, Auerbach, Brooks, Shah and Brody. (*See generally*, Defs. R. 56.1 Stmt.)

Plaintiff has not submitted any evidence that any of the defendants directed any activity toward any of her patients, which activity would constitute an attempt to convince the patients not to continue a particular, existing relationship with plaintiff - not even toward the patients **[*560]** named in her Amended Complaint. [25] She offers her own conclusory allegation that defendants "influenced the [H]ospital to fail and refuse to make a new contract with [her] . . . as seen from documents produced by ORMC and . . . [d]efendants, which . . . caused some of [her] patients to seek and receive cardiac treatment from . . . Kaufmann and other cardiologists with admitting privileges at BSCH." (Mahmud Decl. P 50.) Even leaving aside plaintiff's lack of personal knowledge about these events and the validity of her inferences regarding the documents produced by ORMC and defendants, any indirect **[**54]** activity on the part of defendants directed toward the Hospital that resulted in any of plaintiff's patients seeking care from other physicians does not satisfy the second requirement of a tortious interference with business relations claim, that is, that the defendant "direct some activities toward the [patient] and convince the [patient] not to enter the business relationship with plaintiff." *Mahmud I, 454 F. Supp. 2d at 162* (internal quotation marks and citation omitted). The undisputed facts indicate that none of the defendants interfered with any of plaintiff's relationships with her patients in this manner. On this basis alone, defendants are entitled to summary judgment on plaintiff's tortious interference claim. *See* *Franzon v. Massena Mem'l Hosp., 89 F. Supp. 2d 270, 281 (N.D.N.Y. 2000)* (Granting summary judgment on plaintiff-physician's tortious interference with business relations claim where, although plaintiff alleged

---

[24] Plaintiff explained in her papers opposing defendants' motion to dismiss that "[r]ather than debate the necessity of so pleading, [p]laintiff has, in her Amended Complaint . . ., identified half-a-dozen patients with whom [d]efendants interfered." (Pl. Mem. Opp. Mot. Dismiss (Document # 12).)

[25] Plaintiff states that her claims that defendants made derogatory statements about her to her patients "are no longer part of the case." (Pl. Mem. Opp. Summ. J. at 12.) She does not argue that defendants interfered with her relationships with patients in some other manner. Thus, it appears that she has abandoned entirely this theory of liability and has not submitted any evidence in support of the claim as alleged in her Amended Complaint.

that defendant "made defamatory statements to [p]laintiff's patients, prospective patients, and the community at large regarding [plaintiff's] ability to practice medicine," plaintiff failed "to point **[**55]** to any business relationships with which [defendant] interfered.").

Even if we did accept the theory of liability that plaintiff improperly attempts to set forth in her opposition papers, defendants would still be entitled to summary judgment on plaintiff's claim of tortious interference with prospective economic advantage. First, defendants' interference with "all hospitals to which [plaintiff] may apply for admitting privileges for the rest of her professional life," (Pl. Mem. Opp. Summ. J. at 18), cannot be the grounds for liability under this cause of action because such potential relationships are neither "particular" nor "existing." *Mahmud I, 454 F. Supp. 2d at 162*. Furthermore, that plaintiff has obtained admitting privileges at three other **[**56]** hospitals since she left BSCH undermines her claim that her ability to obtain such privileges has been injured. (Mahmud Decl. P 30.)

Second, plaintiff's claim that defendants somehow tortiously interfered with her relationship with BSCH, setting aside the fact that plaintiff does not make this allegation in her Amended Complaint, must fail as well. She has not submitted any evidence that any defendant directed any activity toward the Board of Directors, which evidently makes determinations regarding admitting privileges, in an effort to interfere with plaintiff's relationship with BSCH. [26] However, she does contend, **[*561]** relying on her own sworn statements, that defendants had "*de facto* control of who is permitted to admit patients at BSCH." (*Id*. P 33.) ***HN21***[] "[A] plaintiff cannot maintain a tortious interference [claim] against her employer . . . . An employer cannot be liable for interfering with its own relationship with its employee." *Malec v. Metro. Life Ins. Co., 2007 U.S. Dist. LEXIS 23777, 2007 WL 969086, at *25 (W.D.N.Y. Mar. 30, 2007)*. Furthermore, "[a] tortious interference claim may not lie against agents of the employer absent a showing that they acted outside the scope of their authority." *Id*. Plaintiff neither **[**57]** has introduced any evidence, nor has she argued, that any defendant acted outside the scope of his or her authority. [27] Therefore, whether defendants were acting as BSCH, plaintiff's "employer," through their alleged "*de facto* control" of the Hospital, or whether they were acting as agents of BSCH, plaintiff's claim must fail.

Third, plaintiff's claim that defendants tortiously interfered with her relationship with ORMC also fails. Plaintiff does not introduce any evidence, beyond her own conclusory allegations, that any of the defendants, knowing of her application for privileges at ORMC, *intentionally* interfered with it, either by reviewing her performance at BSCH and thereby creating a "paper trail" or by contacting ORMC directly. On the contrary, the record reflects that defendants took precautions to protect plaintiff. For example, during the review of plaintiff at BSCH, defendants gave her opportunities to explain herself and encouraged her to do so (*see, e.g.*, Lasch Decl., Ex. A at 167 (11/30/01 Brooks Ltr.)); they gave her a second chance to undergo the evaluation recommended by the CPH **[**59]** after she first refused to undergo the same evaluation (Person Decl., Ex. P at 20 (2/21/02 Kaufmann Ltr.)); and they did not provide ORMC with any information about plaintiff's tenure at BSCH except in response to a request for information made pursuant to state law and after plaintiff specifically requested that the information be disclosed (Lasch Decl., Ex. A at 270 (6/6/2003 Ltr.), 281 (8/14/03 Mahmud Ltr.); Person Decl., Ex. P at 67 (8/27/2003 Auerbach Ltr.)).

---

[26] We note that, although BSCH suspended plaintiff's admitting privileges, nothing in the record indicates that it even rejected an application by plaintiff to renew her privileges. Rather, the record indicates that plaintiff took a leave of absence in May 2002, during which time her application to renew her privileges was deferred indefinitely. Brunelle contacted her in November 2002 to inquire as to whether she wanted to pursue her application, to which plaintiff responded that she did not. However, plaintiff states that her reason for not renewing her privileges was that she felt "traumatized" by the physicians that comprise the MEC. Although plaintiff technically was not denied privileges, she claims that defendants' activities prohibited her from seeking to renew them. We need not decide here whether this distinction has significance for a tortious interference **[**58]** claim.

[27] Although plaintiff contends that defendants "deviated from their custom and practice of dealing with physician issues in executive session without any writings to record the events," (Pl. R. 56.1 Stmt. at 11), this proposition is not supported by the record. Even if we accept the proposition as true, it would not establish that defendants were acting outside the scope of their authority as agents for BSCH.

Plaintiff has not created a genuine issue of fact as to the third and fourth elements of a tortious interference claim. [28]

In conclusion, defendants are entitled to summary judgment on plaintiff's claim for **[*562]** tortious interference with prospective economic advantage because plaintiff has submitted no evidence that any of the defendants directed any activity toward her patients in order to convince them to discontinue their relationships with her. Nor has plaintiff proffered sufficient evidence to indicate that defendants tortiously interfered with her relationship with any hospital or committee, to the extent that plaintiff makes this claim.

CONCLUSION

For all of the foregoing reasons, defendants' motion for summary judgment (Doc. # 29) is granted in its entirety. The Clerk of the Court is directed to enter judgment in favor of defendants. This action is dismissed with prejudice and without costs or attorneys' fees.

SO ORDERED.

Dated: White Plains, New York

End of Document

[28] Plaintiff argues that defendants interfered with her relationship with the OPMC and the CPH. Plaintiff has not identified any "business relationship" with the CPH or the OPMC that was injured. These two entities are committees and plaintiff has not demonstrated any potential for economic advantage with either. Furthermore, neither party addresses whether plaintiff's relationship with either of these committees has been injured by any action by defendants. Rather, it appears that the OPMC closed its investigation of plaintiff's case without any adverse finding and the CPH "found no basis to take or recommend **[**60]** any action against [plaintiff]." (Mahmud Decl. P 47.)

Opinion

ORDER

Presently pending before the Court are Defendants Phoebe Putney Memorial Hospital, Inc. (hereinafter, "Phoebe") and Phoebe Putney Health System, Inc.'s (hereinafter, "PPHS") Motion to Dismiss and **[*2]** Defendant Hospital Authority of Albany/Dougherty County's (hereinafter, "Authority") Motion to Dismiss. (Docs. 10, 13). For the reasons below, Defendants' Motions to Dimiss (Docs. 10, 13) are **GRANTED**.

Also pending before the Court is Defendant Authority's Motion for Hearing on its Motion to Dismiss. (Doc. 15). Upon review of the parties' filings in connection with the instant Motions to Dismiss (Docs. 10, 13), the Court finds that the parties have adequately briefed the issues such that a hearing on the same is not necessary at this time. Accordingly, Defendant Authority's Motion for Hearing (Doc. 15) is **DENIED**.

BACKGROUND

Based upon the facts alleged in the Complaint (Doc. 1), as set forth in relevant part below, Plaintiff filed this suit against Defendants for violations of the Sherman Act, *Section 1*, the Georgia Constitution, and *O.C.G.A. § 13-8-2*.

FACTS[1]

Plaintiff owns and operates a 248-bed acute-care hospital in Albany, Georgia that it built in 1971 in response to requests by local physicians and community leaders to broaden the healthcare options open to residents of Dougherty and the surrounding counties. Plaintiff provides primary and secondary acute-care services, including but not limited to services **[*3]** in cardiology, gastroenterology, general surgery, gynecology, medicine, oncology, pulmonary care, and urology.

Defendant Phoebe operates Phoebe Putney Memorial Hospital, a 443-bed acute-care hospital also located in Albany. Founded in 1911, Phoebe is by far the largest hospital in southwest Georgia. Among other services, Phoebe offers acute-care obstetrics, neonatology, and cardiovascular services, for which it is practically the only provider in the geographic market. In addition, Phoebe provides other acute-care services, many of which Palmyra is prepared to compete with in the geographic market. Phoebe Putney Health System, Inc. ("PPHS") is the corporate parent of Phoebe and a number of affiliated organizations. PPHS exerts *de facto* control over and provides overall guidance, direction and resource allocation to Phoebe and its affiliate organizations

Defendant Authority, a creation of Georgia's Hospital Authorities Law, *O.C.G.A. §§ 31-7-70 et seq.*, owns Phoebe Putney's assets, but leases them to Phoebe under a long-term Lease and Transfer Agreement dated December 11, 1990. Under the lease agreement, Phoebe has controlled the assets of, and operations at, Phoebe Putney for over 15 years. Phoebe pays for the **[*4]** maintenance required at Phoebe Putney; hires and fires all employees; establishes procedures to appoint, reappoint, suspend or terminate medical staff privileges; and on its own or through agents negotiates all relationships with managed-care organizations. The Hospital Authority cannot countermand, approve or revise Phoebe's decisions in these and other management areas during the term of the lease agreement. Phoebe, in short, controls all assets and operations at Phoebe Putney.

Although the lease agreement does not expire until 2042, the Hospital Authority retains the right to terminate the lease agreement and to reassert control over Phoebe Putney's operations before then, under certain designated circumstances. Despite Plaintiff's allegations of anticompetitive behavior by Defendants Phoebe and PPHS, the Hospital Authority has not exercised its right to terminate the Lease or otherwise take over Phoebe Putney's management.

Plaintiff alleges that Defendants Phoebe and PPHS have used their market power in certain "tying markets" to: a) exclude Plaintiff from the tied markets, and b) extend Defendants' dominance across a variety of product lines to capture a market share for all acute-care **[*5]** services exceeding 70%. Plaintiff further alleges that Defendants have exploited the Phoebe Putney's must-have status in the tying markets in multiple ways to foreclose competition in the "tied markets." First, since 2000, Defendants have demanded and achieved *de facto* managed-care contracting exclusivity with Blue Cross & Blue Shield of Georgia (hereinafter, "BCBSGA"), which Plaintiff contends is by far the largest commercial insurer and claim administrator in the geographic market. Defendants have

[1] The facts set forth below are gleaned from Plaintiff's Complaint (Doc. 1), because in consideration of a motion to dismiss, the Court must accept all of Plaintiff's well pleaded allegations as true. *See infra* pp. 6-7.

accomplished this *de facto* exclusivity by requiring even more generous reimbursement rates from BCBSGA if it enters into a managed-care contract with Plaintiff. Phoebe Putney's must have status has allowed Defendants to re-impose these restrictions each time the BCBSGA contract comes up for renewal, including within the last four years.

The tying-product markets for Palmyra's claims are the markets for acute-care obstetrics, neonatology, and cardiovascular services provided to commercially insured patients. The tying-product market for acute-care obstetrics services provided to commercially insured patients includes comprehensive pregnancy and childbirth services, including treatment of **[*6]** postpartum conditions. Georgia law has long required a state-issued Certificate of Need ("CON") to provide these services. Phoebe Putney has held the requisite CON for these services, while Palmyra has not. Similarly, the tying-product market for acute-care neonatology services for commercially insured patients includes comprehensive care for high-risk pregnant women, premature infants and infants born with major complications. Georgia law has long required a state-issued CON to provide these services. Phoebe Putney has held the requisite CON for these services, while Palmyra has not. The tying-product market for acute-care cardiovascular services for commercially insured patients includes cardiac catheterization and catheterization-based cardiovascular procedures, as well as coronary bypass surgery and other cardiothoracic procedures. Cardiac catheterization involves inserting a catheter into a patient's vein or artery to perform angiographic, physiologic and, as appropriate, therapeutic procedures. Georgia law has long required a CON to operate a cardiac catheterization laboratory, which is essential to provide commercially competitive cardiovascular services in general. Phoebe Putney **[*7]** has held the requisite CON for these services, while Palmyra has not.

Plaintiff alleges that Defendants have used Phoebe Putney's market power in the tying markets to hinder competition in the separate product markets for certain other acute-care services provided to commercially insured patients (the "tied-product markets"). The tied-product markets include those for acute-care cardiology, gastroenterology, general surgery, gynecology, medicine, oncology, pulmonary care, and urology services sold to commercially insured patients.

Although commercially insured patients are usually free to seek treatment wherever they choose, managed-care contracts between commercial insurers or claim administrators and hospitals provide insured patients with significant financial incentives to seek services from a hospital under contract with their insurer or employer (an "in-network provider"). These incentives include lower co-payments and insurance premiums, and better coverage. A hospital's designation as an in-network provider also tends to steer commercially insured patients to that hospital. Employees covered by commercial insurance typically receive information from the insurer about which local **[*8]** hospitals have in-network status. Absent extraordinary circumstances, these employees tend to seek treatment where they are directed. When a hospital gains in-network status under a particular insurance plan, it therefore tends to experience an increase in the number of patients covered by that plan who seek services at that hospital. Hospitals without such contracts, or "out-of-network providers," must usually rely more heavily on revenue from government insurers such as Medicare, Medicaid, and the Veterans Administration, which typically reimburse hospitals at lower, non-negotiable rates. To serve the community and compete in their respective markets, hospitals therefore seek in-network status with commercial insurers and claim administrators.

Palmyra's experiences with commercial insurers and claim administrators mirror these general tendencies. In 1999, the last full year that Palmyra enjoyed in-network status with BCBSGA, Palmyra realized more than $24 million in gross revenues from BCBSGA-insured and -administered patients. By 2001, Palmyra's gross revenues from the same patient pool had fallen to less than $6 million.

Since 2000, Plaintiff has approached BCBSGA several times -- **[*9]** including in the last four years -- to negotiate a managed-care contract that would grant Plaintiff in-network status to provide the tied products and other services to BCBSGA-insured Georgians. Each and every time, BCBSGA has told Plaintiff that BCBSGA's managed-care contract with Defendants precludes it from contracting with Plaintiff. Defendants' insistence on a *de facto* exclusive contract in the tied markets as well as the tying markets denies BCBSGA the ability to add Plaintiff to its panel of in-network providers. Plaintiff also alleges that Defendants have similarly used Phoebes market power to coerce other insurance providers to agree to exclusive managed-care contracts.

DISCUSSION

Each Defendant, through the two motions to dismiss pending before the Court, moves to dismiss Plaintiff's Complaint as to all counts. Defendants rely on *Federal Rule of Civil Procedure 12*, which provides in pertinent part:

> Every defense, in law or fact, to a claim for relief in any pleading, whether a claim, counterclaim, cross-claim, or third-party claim, shall be asserted in the responsive pleading thereto if one is required, except that the following defenses may at the option of the pleader be made by motion . . . (6) failure to **[*10]** state a claim upon which relief can be granted . . . .

Fed. R. Civ. P. 12(b)(6). A motion to dismiss a plaintiff's complaint, or a portion thereof, under *Federal Rule of Civil Procedure 12(b)(6)* should not be granted unless Plaintiff fails to plead enough facts to state a claim to relief that is plausible[, and not merely just conceivable,] on its face. *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1974, 167 L. Ed. 2d 929 (2007)*. "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." (citation omitted). *Id. at 1964-65* (citing *Sanjuan v. American Bd. of Psychiatry and Neurology, Inc., 40 F.3d 247, 251 (7th Cir. 1994))*. Accordingly, "[a]t the motion to dismiss stage, all well-pleaded facts are accepted as true, and the reasonable inferences therefrom are construed in the light most favorable to the plaintiff." *Bryant v. Avado Brands, Inc., 187 F.3d 1271, 1274 n.1 (11th Cir. 1999)*. Finally, the "threshold of sufficiency that a complaint must meet to survive a motion to dismiss for failure to state a claim is . . . exceedingly low." *Ancata v. Prison Health Servs. Inc., 769 F.2d 700, 703 (11th Cir. 1985)* (quotation and citation omitted). The Court will address each motion to dismiss in turn.

I. DEFENDANT AUTHORITY'S MOTION TO DISMISS (Doc. 13)

Defendant Authority moves to dismiss Plaintiff's Complaint on two grounds. First, Defendant **[*11]** argues that it is immune as a matter of law from antitrust liability under the "state action immunity" doctrine. Alternatively, Authority argues that Plaintiff's Complaint should be dismissed in its entirety for failure to allege facts sufficient to support the federal antitrust claims and pendent state law claims. Because the Court finds that Defendant Authority is entitled to protection under the state action immunity doctrine, only the parties' arguments concerning the same are addressed below.

A. State Action Immunity Doctrine

The state action immunity doctrine, also known as the Parker doctrine, protects states from liability under federal ***antitrust law*** for their actions as sovereigns. *Crosby v. Hospital Authority of Valdosta and Lowndes County, 93 F.3d 1515, 1521 (11th Cir. 1996)*. Political subdivisions, such as hospital authorities, are not themselves sovereigns, therefore the state action immunity doctrine does not apply to them directly. *Id.* (citing *FTC v. Hospital Board of Directors of Lee County, 38 F.3d 1184, 1187 (11th Cir. 1994))*. However, the state action immunity doctrine was ultimately extended to cover political subdivisions because "[m]unicipal corporations[2] are instrumentalities of the State for the convenient administration of government within their limits, . . . [therefore] the actions of municipalities may reflect state policy." *Crosby, 93 F.3d at 1521* (quoting **[*12]** *City of Lafayette, La. v. Louisiana Power & Light Co., 435 U.S. 389, 412, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)* (Brennan, J., plurality opinion)). "Accordingly, the Court has made clear that a [political subdivision] is entitled to state action immunity if it acted pursuant to 'clearly articulated and affirmatively expressed state policy.'" *Id. at 1521-22* (citing *Town of Hallie*

---

[2] The Crosby Court noted that the terms "municipality" and "political subdivision" were used interchangeably within the opinion. *Crosby, 93 F.3d at 1522 n. 10*.

v. City of Eau Claire, 471 U.S. 34, 46-47, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)). The Eleventh Circuit has held that a hospital authority established pursuant to O.C.G.A. § 31-7-72 "is an instrumentality, agency, or 'political subdivision' of Georgia for purposes of state action immunity . . ." Id. at 1525.

To determine if an entity acted pursuant to a "clearly articulated and affirmatively expressed state policy," and is thus entitled to immunity, a three part test is employed within the Eleventh Circuit. Crosby, 93 F.3d at 1532 (citing FTC, 38 F.3d at 1187-88). The entity, here the Authority, must show: 1) that it is a political subdivision of the state; 2) that, through statutes, the state generally authorizes the political subdivision to perform the challenged action; and (3) that, through statutes, the state has clearly articulated a state policy authorizing anticompetitive conduct. Id. Since the Eleventh Circuit has clearly established that hospital authorities created pursuant to O.C.G.A. 31-7-72 are political subdivisions of the state, and Plaintiff does not challenge Defendant Authority's authority to perform **[*13]** the challenged action[3] , the Court will only address the third prong articulated by the court in FTC, and reiterated in Crosby.

Under the third prong of the test from Crosby, Defendant Authority must show that Georgia has "clearly articulated" a state policy authorizing anticompetitive conduct. 93 F.3d at 1532. Despite the use of the term "clearly," it is not necessary that a defendant show an explicit statement by the legislature that it anticipates anticompetitive effects. *See id.* Instead, it is only necessary for a defendant to show that anticompetitive conduct was a "foreseeable result" of the powers granted to the political subdivision. *See id.* More specifically, "[t]his circuit requires only that the anticompetitive conduct be reasonably anticipated, rather than the inevitable, ordinary, or routine outcome of a statute." *Id.* (citing Lee County, 38 F.3d at 1189-91).

Defendant contends that O.C.G.A § 31-7-70, et seq., grants it the authority to enter into a lease for the operation of a hospital and delegate the day-to-day management of the hospital to the hospital and its officers, including the decision to enter into exclusive contract arrangements. Therefore, as Defendant sees it, it is foreseeable or reasonable to anticipate that hospitals **[*14]** will seek to enter into exclusive contracts with insurance providers.

In response, Plaintiff argues that it "does not allege that the [] Authority's initial decision to lease the hospital to Phoebe Putney in 1990, . . . about 10 years before the allegedly illegal behavior began, furthered the anticompetitive scheme." Instead, Plaintiff contends that it "alleges specific conduct violating the Sherman Act: Phoebe Putney's pursuit and enforcement of exclusive contracts for the tied products, and the Hospital Authority's refusal to terminate the lease and reassume control over the hospital because of the illegal behavior that began in 2000 and continues to this day." Plaintiff cites the Georgia Constitution and Georgia caselaw to support the proposition that there is a "general public policy" in favor of competition.

The arguments regarding the state action immunity doctrine are novel and amount to an issue of first impression for this Court.[4] Based on the clarification of Plaintiff's position in its response to Defendants' motions, it appears that Plaintiff contends that the "anticompetitive conduct" to be considered under the third prong from Crosby, are the allegedly illegal actions of **[*15]** Phoebe and PPHS ***and*** Defendant Authority's failure to revoke the lease agreement. The issue as it is raised here is novel because in most cases, and certainly all of those found by the Court, the state action immunity issue is raised as the state, a municipality, or one of the state's political subdivisions seeks protection for allegedly illegal conduct committed by that entity directly. *See, e.g.*, Crosby, 93 F.3d 1515; FTC, 38 F.3d 1184. Contrarily, in this case, despite the nuanced nature of Plaintiff's arguments before the Court, Plaintiff essentially argues that Phoebe and PPHS violated the Sherman Act and Georgia antitrust laws by entering into the exclusivity contracts with certain insurance providers for the tied services and the Authority

[3] Here, OCGA § 31-7-75(7) authorizes Defendant Authority to lease hospitals to others and the lease agreement at issue here authorizes Authority to revoke the lease for certain enumerated reasons. It appears from Plaintiff's complaint and argument in response to Defendant Authority's Motion to Dismiss that the challenged conduct in this case is Defendant Authority's "refusal to terminate the lease and reassume control over the hospital because of the illegal behavior that began in 2000 and continues to this day." (Docs. 1, 17).

[4] It is likely that this would be an issue of first impression for the Eleventh Circuit as well, as the Court cannot find any caselaw from this circuit that is directly on point.

failed to intervene by terminating its contract with Phoebe. Rightfully, Plaintiff does not challenge the Authority's 1990 decision to enter into the leasing agreement with Phoebe; instead, Plaintiff's only gripe with Defendant Authority is that the Authority failed to terminate the lease in 2000, when Phoebe's allegedly illegal conduct began. Therefore, the legal issue presently before the Court is whether the state action immunity doctrine protects a political subdivision of **[*16]** the state where it is alleged that the subdivision's failure to act aided a third party's anticompetitive conduct.

Alternatively, the Court could address the novel issue above from the opposite perspective and determine whether Plaintiff can establish a violation of the Sherman Act and Georgia Antitrust Laws based upon an alleged failure to act by the Authority. The Court is well aware that where a party asserts an immunity defense, it is typically best to address such a defense first. However, the Court thinks it is a better approach to save the novel issue presented to the Court for a later day with a more complete record, especially considering the present status of this litigation and the low burden necessary to survive a motion to dismiss. Unfortunately for Plaintiff the Court's reluctance to address the issue of first impression concerning the state action immunity doctrine does little more than postpone the ultimate dismissal of its claims against Defendant Authority for a few paragraphs. For the reasons addressed fully below, the Court finds that Plaintiff's Complaint fails to state a plausible claim for relief against Defendant Authority.

B. Federal Antitrust Claims

Plaintiff's **[*17]** Complaint includes four separate federal claims: (I) *per se* violation of *section 1* of the Sherman Act; (II) rule of reason violation of *section 1* of the Sherman Act; (III) violation of *section 2* of the Sherman Act - monopolization; (IV) violation of *section 2* of the Sherman Act - Attempted monopolization. (Doc. 1).

1. Counts I and II

Section 1 of the Sherman Act provides:

> Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding $100,000,000 if a corporation, or, if any other person, $1,000,000, or by imprisonment not exceeding 10 years, or by both said punishments, in the discretion of the court. *15 U.S.C. § 1*.

Section 1 does not prohibit all unreasonable restraints of trade, but only restraints effected by a contract, combination, or conspiracy. *Twombly, 127 S. Ct. at 1964* (citing *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 775, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))*. The crucial question is whether anticompetive conduct stems from independent decision or from an agreement, tacit or express. *Twombly, 127 S. Ct. at 1964* (citing *Theatre Enterprises, Inc. v Paramount Film Distributing Corp., 346 U.S. 537, 540, 74 S. Ct. 257, 98 L. Ed. 273 (1954))*.

Although *Fed. R. Civ. P. 8(a)(2)* only requires **[*18]** a "short and plain statement" of the claims showing that a pleader is entitled to relief, a pleader must provide more than "labels and conclusions, and a formulaic recitation of the elements of a cause of action." *Twombly, 127 S. Ct. at 1965*. Additionally, factual allegations must be enough to raise a right to relief above the speculative level. The Supreme Court has held that when applying the general standards from *Fed. R. Civ. P. 8(a)(2)* to a *Section 1* claim, "such a claim requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made." *Id.* Furthermore, "a bare assertion of conspiracy will not suffice . . . and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality." *Id. at 1966*. Such a "naked assertion of conspiracy . . . gets the complaint close to stating a claim, but without some further factual enhancement it stops short of the line between possibility and plausibility of entitlement to relief." *Id.* (citing *DM Research, Inc. v. College of Am. Pathologists, 170 F.3d 53, 56 (1st Cir. 1999))*.

Defendant Authority contends that Plaintiff's Complaint must fail as to Counts I and II because the only allegation of anticompetitive conduct by the Authority is "purely passive." Defendant argues that this purely passive action cannot form **[*19]** the basis of liability under *Section 1* of the Sherman Act. Furthermore, Defendant contends that the Complaint fails to allege that the Authority "had any independent interest in participating in the alleged anticompetitive activities or that it benefitted from these alleged anticompetitive activities." Finally, Defendant articulates a three-part test from *Harold Friedman, Inc. v. Kroger Co., 581 F.2d 1068 (3d Cir. 1978)*, which is apparently applied in the Third Circuit to determine whether alleged conspirators were part of a combination in restraint of trade.

In response, Plaintiff argues that the Authority is indeed a co-conspirator of Defendant Phoebe. Initially, Plaintiff contends that the test from Freidman is not applicable to this situation because the same has not been adopted by the Eleventh Circuit. Nevertheless, Plaintiff proffers arguments to satisfy the three-part test. The remainder of Plaintiff's response appears to center on the argument that Defendant Authority qualifies as a co-conspirator because it "knew" that the other defendants engaged in anticompetitive behavior in violation of the Sherman Act, and that the Authority "acquiesced in and furthered the anticompetitive scheme." Plaintiff contends that these allegations are sufficient under **[*20]** *Rule 8(a)(2)* and the Twombly decision.

The only portions from Plaintiff's Complaint directly addressing the allegations of wrongful conduct by Defendant Authority are as follows:

> 7. A creation of Georgia's Hospital Authorities Law, *O.C.G.A. §§ 31-7-70 et seq.*, the Hospital Authority of Albany/Dougherty County maintains its principal place of business in Albany, Georgia. The Hospital Authority owns the Phoebe Putney's assets, but leases them to PPMH under a long-term Lease and Transfer Agreement (the "Lease") dated December 11, 1990. Under the Lease, PPMH has controlled the assets of, and operations at, Phoebe Putney for over 15 years. PPMH pays for the maintenance required at Phoebe Putney; hires and fires all employees; establishes procedures to appoint, reappoint, suspend or terminate medical staff privileges; and on its own or through agents negotiates all relationships with managed-care organizations. The Hospital Authority cannot countermand, approve or revise PPMH's decisions in these and other management areas during the term of the Lease. PPMH, in short, controls all assets and operations at Phoebe Putney.
>
> 8. Although the Lease does not expire until 2042, the Hospital Authority retains the right to terminate the Lease **[*21]** and to reassert control over the Phoebe Putney's operations before then, under certain designated circumstances. Despite knowing that the other Defendants have engaged in anticompetitive behavior in violation of the antitrust laws, and on that basis having the right under the Lease to reassert control over Phoebe Putney's operations and end the anticompetitive behavior, the Hospital Authority has not exercised its right to terminate the Lease or otherwise take over Phoebe Putney's management. In this way the Hospital Authority has furthered the anticompetitive scheme described below. (Doc.1).

The Court declines to adopt or apply the Third Circuit test articulated in *Freidman*. As noted by Plaintiff this test has not been adopted in the Eleventh Circuit. Furthermore, the Court finds the guidance from the Supreme Court's decision in *Twombly* applicable authority and easy enough to apply to the instant case. It is clear from the language above that Plaintiff has failed to allege that Defendant Authority either contracted or combined with Defendants Phoebe and PPHS in violation of *Section 1*. Plaintiff also does not proffer such arguments in response to Defendant Authority's Motion to Dismiss. Instead **[*22]** Plaintiff contends that the allegations in the Complaint put forth a plausible claim of conspiracy against Defendant Authority. It is curious that Plaintiff alleges that Defendant Authority was/is engaged in such a conspiracy but expressly refuses to argue in favor of any such conspiracy against Defendants Phoebe and PPHS. *See* (Doc. 17, Part II.A.). Of course, the Court is aware that it is Plaintiff's prerogative, at this stage in the litigation, to put forth inconsistent theories of relief. Notwithstanding Plaintiff's prerogative, the Court finds that Plaintiff failed to plead enough facts to state a claim to relief that is plausible.

The Twombly Court made clear that a pleader must allege enough facts to suggest that "an agreement was made" and that "a bare assertion of conspiracy will not suffice." *Twombly, 127 S. Ct. at 1966*. The only allegations against Defendant Authority, as noted multiple times above, are that Plaintiff believes that Defendant Authority failed to take an action it was permitted to and such a failure, coupled with knowledge of an anticompetitive scheme, made the Authority complicit in Defendant Phoebe's alleged violations of the antitrust laws. Even when Plaintiff's allegations are taken **[*23]** as true, the conduct complained of does not rise to the level of a conspiracy to commit antitrust violations. Plaintiff fails to allege any facts to show that there was an agreement, "tacit or express," between the Authority and either of the other two defendants. Furthermore, it is well settled that mere knowledge of an illegal plan or scheme, or acquiescence to the same, is not sufficient to establish the acquiescing party as a co-conspirator. *See* *United States v. Mendez, 496 F.2d 128, 150 (5th 1974)*[5] . Accordingly, Defendant Authority's Motion to Dismiss (Doc. 14) is **GRANTED** as it relates to Counts I and II of Plaintiff's Complaint.

2. counts III and IV

Section 2 of the Sherman Act makes it unlawful to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 2*. Plaintiff clearly has not alleged any facts that would plausibly establish relief under *Section 2* of the Sherman Act against Defendant Authority[6] . Therefore Defendant Authority's Motion to Dismiss (Doc. 14) is also **GRANTED** as it relates to Counts III and IV of Plaintiff's Complaint.

C. State Law Claims

Plaintiff's Complaint includes two claims for relief **[*24]** under Georgia state law: (V) tortious interference with business relations; (VI) violations of the Georgia Constitution and Georgia state law. Since the Court has dismissed all of Plaintiff's federal claims, it is no longer appropriate for the Court to exercise pendent jurisdiction over Plaintiff's state law claims for tortious interference (Count V) and under the Georgia Constitution (Count VI). *See* *Roper v. Edwards, 815 F.2d 1474, 1477-78 (11th Cir.1987)*. Accordingly, Defendants' Motion to Dismiss (Doc. 14) is **GRANTED** as it relates to Plaintiff's state law claims (Counts V and VI). The Court has not reached a decision on the merits of Plaintiff's state law claims against Defendant Authority, therefore dismissal of Plaintiff's state law claims is **without prejudice**.

II. DEFENDANTS PHOEBE AND PPHS'S MOTION TO DISMISS

Defendants Phoebe and PPHS move to dismiss Plaintiff's Complaint in its entirety. (Doc. 12). Defendants Phoebe and PPHS challenge Plaintiff's standing to bring the antitrust claims alleged; contend that the applicable statute of limitations has passed; and in the alternative, argue that Plaintiff has failed to state a plausible claim under *15 U.S.C. § 1*. Because the Court finds that Plaintiff lacks antitrust standing to bring this action, only **[*25]** Defendants' standing challenge will be addressed below.

A. Antitrust Standing on Federal Claims

In addition to establishing Article III standing, which is required of all federal litigants, plaintiffs allegations of antitrust violations must also show antitrust standing. *Todorov v. DCH Healthcare Authority, 921 F.2d 1438, 1448 (11th Cir.*

---

[5] Decisions of the Fifth Circuit rendered on or before September 30, 1981, are binding precedent in the *Eleventh Circuit. Bonner v. City of Prichard, 661 F.2d 1206, 1209 (11th Cir. 1981)* (en banc).

[6] To the extent that Plaintiff alleges Defendant Authority also conspired with the other defendants under Counts III and IV, the Court's discussion *supra* Part I.A.1 is applicable here as well.

1991) (citing Flast v. Cohen, 392 U.S. 83, 94-101, 88 S. Ct. 1942, 20 L. Ed. 2d 947 (1968)). Section 4 of the Clayton Act provides a private right of action for injury caused by a violation of the antitrust laws:

> Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit including a reasonable attorney's fee.

15 U.S.C.A. § 15 (supp 1990). The statute read literally establishes a cause of action for any harm which can be attributed to an antitrust violation, no matter how indirect. Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 529, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983). To prevent such an overly broad reading of the statute, federal courts have required that a Plaintiff have antitrust standing to maintain an antitrust suit. Id. at 534.; Todorov, 921 F.2d at 1449.

Whether antitrust standing exists is a question of law, and is therefore appropriate **[*26]** for consideration on a motion to dismiss under Fed. R. Civ. P. 12(b)(6). *See*Austin v. Blue Cross & Blue Shield, 903 F.2d 1385, 1387 (11th Cir. 1990). "Antitrust standing is best understood in a general sense as a search for the proper plaintiff to enforce the antitrust laws." Todorov, 921 F.2d at 1448 (citing Cargill, Inc. v. Monfort, Inc., 479 U.S. 104, 110 n. 5, 107 S. Ct. 484, 93 L. Ed. 2d 427, (1986)). Therefore, to establish antitrust standing a plaintiff must show: (1) antitrust injury and (2) that the plaintiff is an efficient enforcer of the antitrust laws, which requires some analysis of the directness or remoteness of the plaintiff's injury. Id. To determine whether antitrust standing exists the Court must accept Plaintiff's well pleaded allegations as true, Bryant, 187 F.3d at 1274 n.1, and assume that an antitrust violation was committed by Defendants, Todorov, 921 F.2d at 1450.

1. antitrust injury

An antitrust injury is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be the type of loss that the claimed violations would be likely to cause." Todorov, 921 F.2d at 1449 (citing Brunswick Corp. v. Pueblo Bowl-O-Matic, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)). More simply, plaintiffs must prove that the injury they allege is the result of anticompetitive conduct, which is the type of conduct the antitrust laws **[*27]** were intended to prevent. *See id.* "This limitation is essential because it requires the private antitrust plaintiff to show that his own injury coincides with the public detriment tending to result from the alleged violation increasing the likelihood that public and private enforcement of the antitrust laws will further the same goal of increased competition." Id. at 1450 (citing Austin, 903 F.2d at 1389-90).

Defendants Phoebe and PPHS argue that Plaintiff has failed to show antitrust injury for several reasons. First, Defendants contend that Plaintiff's Complaint includes conclusory allegations without plausible grounds to support the same. Second, despite these conclusory allegations, there is no basis in the Complaint to assume that if the contracts were not exclusive, that Plaintiff would be able to offer the insurance providers with comparable services and patient care—Plaintiff concedes that it cannot offer all of the services offered by Defendant Phoebe. Therefore, Defendants argue that an antitrust plaintiff cannot recover damages where the alleged damages were caused by the plaintiffs "own business shortcomings and failure to compete effectively." Defendants also note that the antitrust laws are intended to protect **[*28]** competition, not competitors. In the instant case, Defendants argue that their exclusive contracts with Blue Cross & Blue Shield, and potential contracts with other providers, do not dictate who the insurance providers can contract with for hospital services. Finally, Defendants contend that patients are still free to choose to use Plaintiff's services and facilities, notwithstanding the exclusivity contracts.[7]

[7] This includes patients insured by any of the insurance providers who have exclusivity contracts with Phoebe; in that instance, Plaintiff would merely be an "out-of-network" provider.

In response, Plaintiff alleges that "its injury flows from actual or imminent exclusion from the tied product markets, and that as a consequence of Palmyra's injury, competition has diminished." (Doc. 17). Plaintiff also "reminds" the Court that the following allegations from its Complaint must be assumed to be true:(1) Phoebe has coerced the insurers into accepting exclusive contracts; (2) that the exclusive contracts reduced competition in the tied markets by excluding Palmyra from various managed-care networks; (3) that Plaintiff could otherwise compete effectively in the tied product markets; (4) the exclusive contracts give no discounts to insurers; and (5) that healthcare costs have risen as a result. Based on these allegations, Plaintiff contends that its injury "flows **[*29]** not from too much competition, but from too little." (Doc. 17).

To determine whether the first prong of antitrust standing, "antitrust injury," is present, the Court must assume that Defendants have committed the alleged anticompetitive conduct[8] , *Todorov, 921 F.2d at 1450*; here, coercing insurers to enter into exclusive contracts and thereby excluding Plaintiff from competition. Defendants contend that this case is analogous to, and should be governed by, *Austin, 903 F.2d 1385*; however, the Austin decision does not support a finding that Plaintiff has failed to show antitrust injury. In Austin, the Court held that the Appellants lacked antitrust standing because, *inter alia*, they failed to allege antitrust injury. *903 F.2d at 1393*. However, the Court specifically noted in its discussion of whether such an allegation had been made that:

> The Complaint does not allege, however, the contracts between Blue Cross and the hospitals say anything at all as to the rates the hospitals charge to other purchasers. There is no claim that Blue Cross plays any role in the decisions of the hospitals to set various rates for others. Indeed, there is no claim that Blue Cross in any way coerced the hospitals to charge non-Blue Cross customers higher rates than those **[*30]** charged to Blue Cross customers.

Unlike the complaint in Austin, Plaintiff's Complaint includes allegations of coercion and conduct aimed at affecting the negotiations between the insurers and other healthcare providers. *See, e.g.*, (Doc. 1; ¶¶ 54, 56, 60). Accordingly, the Court cannot at this juncture, while under the duty to accept Plaintiff's well pleaded allegations as true, find as a matter of law that Plaintiff has failed to plead enough facts to adequately establish an ***allegation***[9] of antitrust injury.

2. efficient enforcement

In addition to showing an antitrust injury, Plaintiff must also show that it is an efficient enforcer of the antitrust laws in order to establish antitrust standing. *Todorov, 921 F.2d at 1448*. To determine whether a plaintiff will be an efficient enforcer of the antitrust laws courts consider the following factors: (1) the directness or indirectness of the asserted injury; (2) whether there exist an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (3) whether damages claims are highly speculative; (4) importance of avoiding duplicative recoveries and the danger of complex apportionment of damages; **[*31]** (5) whether the plaintiff can efficiently and effectively enforce an antitrust judgment; and (6) any other factors that may be relevant to the issue. *Id. at 1451-52*.

Initially, Defendants argued that Plaintiff is not an efficient enforcer because it "is not a patient/consumer of medical services, and its first interest is its profitability rather than vindicating the public interest in antitrust enforcement." (Doc. 12)

---

[8] This requirement makes this issue particularly well suited for consideration on a motion to dismiss, as the Court must accept a plaintiff's well pleaded allegations as true anyway.

[9] The Court notes here that at this point in the present litigation, Plaintiff is required to do no more than put forth well pleaded allegations. The Court's decision at this stage, on the existence of the necessary antitrust injury, therefore does not preclude a different decision if the Court reviews this matter under a more developed record—for example, upon consideration of a motion for summary judgment.

In response, Plaintiff argues that there may be more than one efficient enforcer in a particular case. Additionally, Plaintiff contends that its self-interest does not necessarily preclude it from being an efficient enforcer. Instead, Plaintiff notes that its self-interest must merely align with the public interest in greater competition. Plaintiff contends that such alignment exists here, as Defendants have excluded it from competition in the relevant market. Plaintiff alleges that Defendants' actions decrease competition "without any offsetting procompetitive benefit." Therefore, as Plaintiff sees it, "[t]hese allegations more than state a basis for antitrust standing."

The Court must disagree with Plaintiff's conclusion. As noted above, Plaintiff's allegations at a minimum establish **[*32]** a plausible antitrust injury. Additionally, there is no doubt that Plaintiff has alleged that Defendants are the cause of said injury. However, such allegations merely bring Plaintiffs claims within the purview of the Clayton Act and a "more extensive inquiry" is necessary to determine whether Plaintiff has antitrust standing. *Todorov, 921 F.2d at 1451* (citing *Associated Gen., 459 U.S. at 540*). Plaintiff fails to address the factors articulated above and highlighted by the United States Supreme Court in *Associated Gen*. and the Eleventh Circuit in Todorov—yet, Plaintiff still concludes that it "easily satisfies the test for antitrust standing."

Upon consideration of the relevant factors highlighted by the Supreme Court and Eleventh Circuit, this Court holds that Plaintiff is not an efficient enforcer of the antitrust laws with respect to the alleged anticompetitive effect on insurers and insureds, and thus cannot establish antitrust standing. First, the Court finds that Plaintiff's injury, the alleged exclusion from certain managed-care markets, from the allegedly anitcompetitive conduct of Defendants is reletively indirect and remote. The most direct affect of Defendants' alleged anticompetitive conduct would be felt by the allegedly coerced **[*33]** insurers who pay higher reimbursement rates and the patients who ultimately pay higher premiums and co-pays for medical services. *See* *Associated Gen., 459 U.S. 541-42*; *Todorov, 921 F.2d at 1453-54*; *Robles, 785 F. Supp. 989, 999 (N.D. Ga. 1992)*. Plaintiff's alleged injury is peripheral to the harm allegedly done to these groups because Plaintiff merely seeks the opportunity to increases its profits. *Id.*

In light of the indirectness of Plaintiff's alleged injury, any claim to damages based upon such injury is highly speculative. *See* *Todorov, 921 F.2d at 1451*. Plaintiff makes much of the fact that it has alleged that absent Defendants' alleged anticompetive conduct, it would be able to compete effectively. While the Court must accept this allegation as true at the motion to dismiss stage, the Court is also charged with determining whether the claim to damages is too speculative. Consistent with this requirement the Court notes the following. Plaintiff alleges that absent Defendants' anticompetive conduct, competition would increase thereby resulting in more business at its hospital. Plaintiff's claim to damages is highly speculative because even if the alleged coercion of the insurers were removed, Plaintiff would still be charged with being able to offer services adequate enough to entice the insurers to offer it **[*34]** in-network status.[10] This would require that Plaintiff be able to offer comparable quantity and quality of services to Defendant Phoebe's and the ability to challenge any pricing structure adopted by Defendant Phoebe. The highly speculative nature of Plaintiff's damages "weighs against affording [P]laintiff antitrust standing." *Id.*

The above considerations also highlight two "identifiable classes of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement." The allegedly coerced insurers fall within this group because they act on their own behalf and on behalf of their customers, the patients.[11] And patients of the allegedly coerced insurers fall within this group because they represent the "public interest," as they are in fact "the public." Additionally, the Government would fall into this category because the Government is charged with the ultimate duty to vindicate the public interest in most matters, alleged antitrust violations are no different. *See* *Robles, 785 F. Supp. at 999*. Because there are at least three more efficient enforcers of the antitrust laws in this case, it is

---

[10] This only references the tied-product services and does not account for the fact that Phoebe is the only area hospital with the requisite C.O.N. for the alleged tying-products. Therefore, Palmyra could not offer these serves unless and until it is able to gain a C.O.N. for acute-care obstetrics, neonatology, and cardiovascular services.

[11] The Court notes here that despite Plaintiff's contention on the one hand that BCBSGA, and other insurers, are the party whom Defendant Phoebe contracted with to violate *Section 1* of the Sherman Act and that BCBSGA is one of the entities/persons injured by Defendant's illegal conduct, Plaintiff has made no attempt to name BCBSGA as either a defendant or enlist them as a plaintiff (which appears to violate *Fed. R. Civ. P. 19(a)*).

likely that allowing Plaintiff's claims to proceed would result in duplicative **[*35]** recoveries; if Plaintiff's case is successful, the Government and/or the allegedly coerced insurers and/or patients will undoubtedly file suits seeking relief. It is of course true, as Plaintiff notes, that a pleader need not be ***the most*** efficient enforcer of the antitrust laws in a particular case. However, where a plaintiff's alleged injury is indirect or remote and there exists the above mentioned "identifiable class," the "justification for allowing a more remote party (i.e., one who suffered an indirect injury) privately to enforce the antitrust laws [is] diminished." *Todorov, 921 F.2d at 1451* (quoting *Associated Gen., 459 U.S. at 542*).

3. *section 16* antitrust standing

The relevant portion of *Section 16* of the Clayton Act provides that "[a]ny person, firm, corporation, or association shall be entitled to sue for and have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws...." *15 U.S.C. § 26*. *Sections 4* and *16* provide different forms of relief; treble damages under *Section 4* and injunctive relief under *Section 16*. *15 U.S.C. § 15*; *15 U.S.C. § 26*. Essentially, *Sections 4* and *16* provide "complementary remedies for a single set of injuries." *Cargill, 479 U.S. at 113 (1986)*. Although *Sections 4* and *16* provide for different forms of relief, pleaders must have antitrust standing to bring claims under either section. *Id. at 111*. To establish antitrust standing **[*36]** under either *Section 4* or *16* a pleader must show antitrust injury[12] ; however, unlike a pleader bringing a *Section 4* claim, a *Section 16* pleader need not make as strong a showing that it is an efficient enforcer of the antitrust laws. *Id.*; *Todorov, 921 F.2d at 1452*. The *Section 16* standing requirement is less demanding because "the dangers of mismanaging the antitrust laws are less pervasive" when an equitable remedy is requested. *Todorov, 921 F.2d at 1452*. Accordingly, the Cargill Court held that "some of the factors other than antitrust injury that are appropriate to a determination of standing under *§ 4* are not relevant under *§ 16*." *479 U.S. at 111 n. 6*.

As held above, Plaintiff has plead enough plausible facts to establish antitrust injury. *Supra* Part II.A.1. Therefore, Plaintiff also satisfies the requirement of showing antitrust injury under *Section 16*. *See**Todorov, 921 F.2d at 1452*. In discussion of the Cargill decision, the Todorov Court held that "a plaintiff, in order to have standing under *section 16*, must allege threatened injury that would constitute antitrust injury if inflicted upon plaintiff and the defendant's causal responsibility for such threatened injury." *Todorov, 921 F.2d at 1452* (citing *Cargill, 479 U.S. at 113*). The current issue before the Court is what, if anything, must a pleader show in addition to antitrust injury in order to establish antitrust standing under *Section 16*. **[*37]** The *Cargill* and Todorov decisions are applicable for their discussions of the requirements for *Sections 4* and *16*; however, the usefulness of these cases in deciding this issue is limited because the pleaders from both cases were found not to have antitrust standing for failure to show the necessary antitrust injury. *See**Cargill, 479 U.S. at 122*; *Todorov, 921 F.2d at 1454*.

This Court finds that a *Section 16* pleader must show more to establish antitrust standing than a mere allegation of a causal connection between the alleged threatened injury and conduct by the defendants. Although the Todorov Court held that a *Section 16* pleader must show "the defendant's causal responsibility for such threatened injury," in addition to antitrust injury, it was surely not meant to limit the pleading requirement to a mere allegation of causal connection. The Todorov Court specifically noted that an allegation of causal connection between a defendants' alleged conduct and the alleged antitrust injury does nothing more than bring the pleaders claim within the purview of the Clayton Act. *921 F.3d at 1451*. Such allegations would typically be sufficient for a plaintiff's substantive claims to survive a motion to dismiss. However, as discussed in depth above, plaintiff's allegation of antitrust violations must satisfy **[*38]** the additional step of showing antitrust standing. Due to this additional requirement the Supreme Court has held that a "more extensive inquiry" into the alleged causal connection is necessary. *Id.* (citing *Associated Gen., 459 U.S. at 537*). The Todorov Court directly held that the fourth factor listed above is not relevant when considering antitrust standing; however, the Court finds that the other factors considered above weigh against

[12] Under *Section 4*, a pleader must show actual injury to business or property, however, under *Section 16* a pleader need only show a "threat" of loss or damage.

Plaintiff's antitrust standing to bring even a claim for injunctive relief. Accordingly, Defendants' Motion to Dismiss (Doc. 10) is **GRANTED** as it relates to any claim for injunctive relief under Counts I-IV of Plaintiff's Complaint.

B. Pendent Jurisdiction Over State Law Claims

Since the Court has dismissed all of Plaintiff's federal claims, it is no longer appropriate for the Court to exercise pendent jurisdiction over Plaintiff's state law claims for tortious interference (Count V) and under the Georgia Constitution (Count VI). *See**Roper, 815 F.2d at 1477-78*. Accordingly, Defendants' Motion to Dismiss (Doc. 10) is **GRANTED** as it relates to Plaintiff's state law claims (Counts V and VI). The Court has not reached a decision on the merits of Plaintiff's state law claims against Defendants Phoebe and PPHS, therefore **[*39]** dismissal of Plaintiff's state law claims is **without prejudice**.

CONCLUSION

For the aforementioned reasons, Defendants Phoebe Putney Memorial Hospital, Inc. and Phoebe Putney Health System, Inc.'s Motion to Dismiss (Doc. 10) is **GRANTED**; Defendant Hospital Authority of Albany/Dougherty County's Motion to Dismiss (Doc. 13) is **GRANTED**; and Defendant Hospital Authority of Albany/Dougherty County's Motion for Hearing on its Motion to Dismiss (Doc. 15) is **DENIED**.

SO ORDERED, this 31st day of March, 2009.

/s/ W. Louis Sands

THE HONORABLE W. LOUIS SANDS,

UNITED STATES DISTRICT JUDGE

Sun Microsystems, Inc. v. Hynix Semiconductor, Inc.

United States District Court for the Northern District of California

March 31, 2009, Decided; March 31, 2009, Filed

No. C 06-1665 PJH

Reporter
608 F. Supp. 2d 1166 *; 2009 U.S. Dist. LEXIS 27567 **; 2009-1 Trade Cas. (CCH) P76,621

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN1[] **Summary Judgment, Evidentiary Considerations**

As a general matter, summary judgment shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. A court must view the facts in the light most favorable to the non-moving party and give it the benefit of all reasonable inferences to be drawn from those facts.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN2[] **Regulated Practices, Price Fixing & Restraints of Trade**

Where concerted price-fixing is alleged, plaintiffs bear the ultimate burden of presenting sufficient evidence to prove that an agreement to fix prices existed. In order for them to survive defendants' motion for summary judgment, therefore, the plaintiffs must establish that there is a genuine issue of material fact as to whether the defendants entered into an illegal conspiracy that caused the plaintiffs to suffer a cognizable injury. The plaintiffs can establish a genuine issue of material fact by producing either direct evidence that defendants participated in an agreement to fix prices, or circumstantial evidence from which a reasonable fact finder could conclude the same.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN3[] **Conspiracy to Monopolize, Sherman Act**

Antitrust law limits the range of permissible inferences from ambiguous evidence in a case under *15 U.S.C.S. § 1*. With regard to a plaintiff's burden in proving that an issue of material fact exists on the conspiracy question, conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. In sum, to survive a motion for summary judgment, the plaintiff seeking damages for a violation of *§ 1* must present evidence that tends to exclude the possibility that the alleged conspirators acted independently.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN4[] **Conspiracy to Monopolize, Sherman Act**

A two-part test is applied whenever a plaintiff rests its case for an anticompetitive conspiracy entirely on circumstantial evidence. First, a defendant can rebut the allegation of conspiracy by showing a plausible and justifiable reason for its conduct that is consistent with proper business practice. Second, the burden then shifts back to the plaintiff to provide specific evidence tending to show that the defendant was not engaging in permissible competitive behavior.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN5[] **Motions to Dismiss, Failure to State Claim**

In evaluating a motion to dismiss for failure to state a claim, all allegations of material fact are taken as true and construed in the light most favorable to the nonmoving party. In order to survive a dismissal motion, however, a plaintiff must allege facts that are enough to raise his/her right to relief above the speculative level. While the complaint does not need detailed factual allegations, it is nonetheless a plaintiff's obligation to provide the grounds of his entitlement to relief which requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. In short, the plaintiff must allege enough facts to state a claim to relief that is plausible on its face, not just conceivable.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] **Purchasers, Indirect Purchasers**

Indirect purchasers are too remote to suffer true antitrust injury, and therefore do not have standing under federal ***antitrust law*** to pursue claims.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN7[] **Purchasers, Indirect Purchasers**

The ownership or control exception to the direct purchaser rule of antitrust standing permits offensive use of the pass-on theory in situations where market forces have been superseded. One example of such a situation occurs when the direct purchaser is owned or controlled by a member of an alleged conspiracy. As a general matter, the ownership and control exception has been construed to encompass relationships involving such functional economic or other unity between the direct purchaser and either a defendant or the indirect purchaser, that there effectively has been only one sale. Some examples of the types of facts that would satisfy the control exception are furthermore defined as interlocking directorates, minority stock ownership, loan agreements that subject the wholesalers to the manufacturers' operating control, trust agreements, or other modes of control separate from ownership of a majority of the wholesalers' common stock.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > Sherman Act > Jurisdiction

HN8[] **International Aspects, Foreign Trade Antitrust Improvements Act**

A court's assertion of subject matter jurisdiction over a plaintiff's antitrust claims based on foreign subsidiaries' purchases--notwithstanding the general proscriptions of the Foreign Trade Antitrust Improvement Act--generally requires a showing that defendants' foreign conduct (1) had a direct, substantial, and reasonably foreseeable effect on domestic commerce, which (2) gave rise to a Sherman Act claim.

Business & Corporate Law > Agency Relationships > Establishment > General Overview

HN9[] **Agency Relationships, Establishment**

The representative services doctrine asks whether a subsidiary functions as a parent corporation's representative in performing services that are sufficiently important that if it did not have a representative to perform them, the parent would undertake to perform similar services on its own.

Business & Corporate Law > Agency Relationships > Establishment > Consent

Business & Corporate Law > ... > Establishment > Elements > Manifestation by Principal

Business & Corporate Law > ... > Establishment > Elements > Right to Control by Principal

HN10[] **Establishment, Consent**

The traditional common law agency doctrine is based on analysis of three factors: (1) manifestation by a principal that the agent would act on its behalf; (2) the agent's acceptance or consent to act on the principal's behalf; and (3) the understanding that the principal would be in control of the agent's undertaking on its behalf.

Business & Corporate Law > Agency Relationships > Establishment > Consent

Business & Corporate Law > ... > Establishment > Elements > Manifestation by Principal

Business & Corporate Law > ... > Establishment > Elements > Right to Control by Principal

HN11[] **Establishment, Consent**

The foundation for a traditional agency test requires a plaintiff to demonstrate: (1) a manifestation by a principal that an agent shall act for him; (2) that the agent has accepted the undertaking; and (3) that there is an understanding between the parties that the principal is to be in control of the undertaking.

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

HN12[] **International Aspects, Foreign Trade Antitrust Improvements Act**

The Foreign Trade Antitrust Improvement Act requires that a plaintiff demonstrate that the higher prices caused by defendants' antitrust conduct proximately caused the plaintiff to pay higher prices abroad.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN13[] **Conspiracy to Monopolize, Elements**

In order to establish a violation of *15 U.S.C.S. § 1*, a plaintiff must prove three elements: the existence of an agreement or conspiracy among two or more separate entities; that unreasonably restrains trade; and which affects commerce.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN14[] **Conspiracy to Monopolize, Elements**

With respect to the requirement that an antitrust plaintiff establish a contract, combination, or conspiracy--also referred to as concerted action--the legal standards are well established. All that is required for proof of concerted action is that the alleged parties share a commitment to a common scheme that has an anticompetitive objective or effect. The parties' motives need not be identical.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN15[] **Conspiracy to Monopolize, Elements**

One way of proving concerted action for an anticompetitive objective is by express agreement. However, a formal contract is not necessary to establish collective action. Rather, conspiracies can be shown either by direct or circumstantial evidence. Indeed, only rarely will there be direct evidence of an express agreement in conspiracy cases. Circumstantial evidence as to this element of the offense is, therefor, not only admissible, but often dispositive. It is not necessary for a plaintiff to show an explicit agreement among defendants in support of a Sherman Act conspiracy, and concerted action may be inferred from circumstantial evidence of a defendant's conduct and course of dealings.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN16[] **Conspiracy to Monopolize, Elements**

Antitrust law limits the range of permissible inferences from ambiguous evidence in a case under *15 U.S.C.S. § 1*. Conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. To survive a motion for summary judgment or for a directed verdict, a plaintiff seeking damages for a violation of *§ 1* must present evidence that tends to exclude the possibility that the alleged conspirators acted independently. The plaintiff, in other words, must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed it. Two separate inquiries are relevant to the above issue on summary judgment motions: (1) whether a defendant had any rational motive to join the alleged conspiracy, and (2) whether the defendant's conduct was consistent with the defendant's independent interest. If defendants had no rational motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN17[] **Conspiracy to Monopolize, Elements**

A two-part test is applied whenever an antitrust plaintiff rests its case entirely on circumstantial evidence. First, a defendant can rebut an allegation of conspiracy by showing a plausible and justifiable reason for its conduct that is consistent with proper business practice. Second, the burden then shifts back to the plaintiff to provide specific evidence tending to show that the defendant was not engaging in permissible competitive behavior.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN18[] **Conspiracy to Monopolize, Elements**

Where the evidence tends to support an inference of non-conspiratorial conduct, an antitrust plaintiff must, in order to defeat summary judgment, come forward with evidence that shows that a defendant was not engaging in permissible competitive behavior. In other words, the plaintiff must introduce evidence that tends to overcome the defendant's plausible explanation and exclude the possibility of independent conduct by the defendant, such that an inference of collusion is reasonable.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN19[] **Conspiracy to Monopolize, Elements**

Litigation of a successful antitrust claim requires more than proof of a defendant's antitrust violation. It requires, among other things, that a plaintiff prove what is known as injury in fact--i.e., the fact of harm to the plaintiff caused by the defendant's conduct. To demonstrate injury in fact, it is generally sufficient to show with reasonable probability some causal connection between the antitrust violation and the plaintiff's alleged injury. Significantly, however, in establishing the fact of injury, the antitrust violation need not be the sole cause of the injury, though it must be a material and a substantial cause of the injury. Where the antitrust plaintiff alleges a price-fixing conspiracy claim, proof of causal injury therefore requires a showing that the plaintiff paid higher prices than it would have paid absent the conspiracy, and that defendants' allegedly anticompetitive conduct was a material cause of the plaintiff's higher payments.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Expert Witnesses

HN20[] **Expert Witnesses, Daubert Standard**

Fed. R. Evid. 702 governs the admission of expert opinion testimony and provides that, where scientific, technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, an expert witness may be called upon to testify accordingly. *Rule 702*. Expert testimony must be both relevant and reliable to be admissible. Expert opinion testimony is relevant if the knowledge underlying it has a valid connection to the pertinent inquiry, and it is reliable if the knowledge underlying it has a reliable basis in the knowledge and experience of the relevant discipline. Trial courts must exercise reasonable discretion in evaluating and in determining how to evaluate the relevance and reliability of expert opinion testimony.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN21[] **Remedies, Damages**

Where the before-and-after approach is undertaken in an antitrust case, an expert must account for differences in market conditions when measuring damages across benchmark and conspiracy periods.

Opinion

[*1169] ORDER GRANTING MOTION TO DISMISS; DENYING MOTION TO EXCLUDE; AND GRANTING SUMMARY JUDGMENT IN PART AND DENYING SUMMARY JUDGMENT IN PART

Defendants' motion to dismiss, motion to exclude expert testimony, and motions for summary judgment came on for hearing on December 17, 2008 and January 21, 2009 before this court. Plaintiff Sun Microsystems, Inc. ("Sun" or "plaintiff"), appeared through its counsel, Kathyryn D. Kirmayer, Jerome A. Murphy, David D. Cross, and Jeffrey Howard. Defendants [1] appeared through their counsel, Paul Salvaty, Steven H. Bergman, Kenneth **[*1170]** O'Rourke, Michael Tubach, Tim Martin, Julian Brew, Harrison Frahn, Howard Ullman, Catherine Lui, Jonathan Swartz, Robert Pringle, Joel Sanders, Joshua Hess, and Robert E. Freitas. Having read all the papers submitted and carefully considered the relevant legal authority, the court hereby GRANTS defendants' motion to dismiss, DENIES defendants' motion to exclude, and GRANTS the motions for summary judgment in part and DENIES the motions for summary judgment in part, for the reasons stated at the **[**4]** hearing, and as follows.

---

[1] Although this action was originally brought against numerous defendant entities, several of the defendants have since been dismissed, or filed withdrawals. Those defendant entities who currently remain in the case and bring the current motions are: Hynix Semiconductor, Inc., and Hynix Semiconductor America, Inc. (collectively "Hynix"); Nanya Technology Corporation, and Nanya Technology Corporation USA ("NTC" and "NTC USA," respectively).

BACKGROUND

Plaintiff is part of the general opt-out category of cases that is related to In re Dynamic Random Access Memory (DRAM) Antitrust Litigation, Case No. M 02-1486 PJH -- a multidistrict litigation ("MDL") action currently pending before the court. Both the MDL action and the opt-out cases generally allege a horizontal price-fixing conspiracy carried out by numerous DRAM manufacturer defendants, in violation of federal and state antitrust laws. While there are a total of six different individual cases that form a part of the opt-out category of cases, only Sun Microsystems, Inc. v. Hynix Semiconductor, et. al. is currently at issue.

A. General Background

Sun is an original equipment manufacturer ("OEM") involved in the **[**5]** technology field. It is a leading maker of computer servers and workstations, among other items. In the operative amended consolidated complaint ("ACC"), Sun alleges that from 1997 through 2002 several manufacturer defendants ("defendants") engaged in a conspiracy to control DRAM production capacity, raise DRAM prices, allocate customers, and otherwise unlawfully overcharge their DRAM customers. See, e.g., ACC PP 21, 23, 25, 27, 29, 31, & 34 (alleging that foreign defendants "manipulated the price of DRAM charged around the globe"). As a result, plaintiff alleges that, as a large purchaser of defendants' DRAM, it suffered injury in that it paid more for DRAM than it otherwise would have in the absence of defendants' conspiracy.

To that end, Sun asserts three causes of action against defendants: (1) violation of the Sherman Act pursuant to *15 U.S.C. § 1*; (2) violation of California's Cartwright Act pursuant to *§§ 16700 et seq.* of the Cal. Bus. & Prof. Code; and (3) violation of California's Unfair Competition Act pursuant to *§§ 17200 et seq.* of the Cal. Bus. & Prof. Code. See ACC, PP 79-106. Sun seeks damages as a result of the artificially inflated prices it allegedly paid for DRAM **[**6]** as a consequence of defendants' alleged price-fixing activity.

B. Facts Regarding Sun's DRAM Procurement

Sun manufactures and sells its servers and workstations both domestically and abroad. To aid in this process, Sun outsources a portion of its server and workstation assembly to a network of domestic and foreign entities comprised of (1) third-party external manufacturers and (2) Sun's corporate subsidiaries. Of particular relevance here is Sun's relationship with these two entity groups vis-a-vis a critical component of the manufacturing process -- the purchase of DRAM on Sun's behalf, for incorporation into final Sun products.

1. Third-party External Manufacturers

The ACC alleges that approximately 34% of the DRAM purchases at issue here were made by third-party external manufacturers ("EM"s). [2] See ACC P 13b. The **[*1171]** EMs were and are independent business entities located both domestically and abroad. See id. Sun does not share common ownership with any of the EMs; it does not own any controlling share of any EM, has none of the same board of directors or officers as any EM, and does not commingle funds or share corporate books and records with any EM. See Declaration of Angela M. Moore **[**7]** ISO MSJ re External Manuf. Purch. ("Moore Decl. Re EMs"), Ex. 5 at 10; Bergman Decl., Ex. 2 at Response 5, Ex. 3 at Response 50, Ex. 4 at Responses 42-45. The EMs at issue in this case include, for example, Celestica, Solectron Corporation, MiTac International Corporation, Smart Modular Technologies, Inc., Benchmark Electronics, Inc., and Expansion Electronics, Inc. See, e.g., Declaration of Steven Bergman ISO Mot. Dismiss ("Bergman Decl."), Exs. 18-21. Sun charged the EMs, in part, with purchasing DRAM directly from defendants and other

---

[2] Notwithstanding the ACC's allegation, there is a dispute between the parties as to the actual amount and percentage of DRAM purchases made by third-party external manufacturers. Using the 34% alleged in the complaint and plaintiff's own expert report as to damages, defendants contend that there are $ 1.05 billion in DRAM purchases made by external manufacturers at issue in the case. See Def. MSJ re Ext. Manuf. Purch. at 4:8-11. Plaintiff, however, contends in their opposition that external **[**8]** manufacturer purchases amount to approximately $ 179 million worth of DRAM purchases, or around 6% of Sun's total DRAM purchases. See Pl. Opp. Re MSJ re Ext. Manuf. Purch. at 1:5-6.

suppliers, in order to incorporate that DRAM into the manufacture of Sun-designed and Sun-branded products that were to be sold back to Sun (for retail sale by Sun).

Sun's relationship with the relevant EMS was formalized in Master External Manufacturing Agreements ("MEMAs"). All the MEMAs at issue here have effective dates that post-date 1997. See Declaration of Jason M. Bussey ("Bussey Decl. Re. EMs"), Ex. A; Moore Decl. Re EMs, Exs. 24-26; see also Bergman Decl., Exs. 18-21. Pursuant to the terms of the MEMAs, the EMs were considered "independent contractors" and were expressly prohibited from "act[ing] in a manner which expresses or implies a relationship other than that of independent contractor, [or] bind[s] the other party." Moore Decl. Re EMs, Exs. 24, P 8.5; Ex. 25, P 8.5; Ex. 26, P 26.3; Bussey Decl. Re. EMs, Ex. A, P 28.4.

Sun's relationship with its EMs was multi-tiered. As an initial matter, once an EM executed a MEMA with Sun, Sun's practice was to issue an award letter to the EM. See Moore Decl. Re EMs, Ex. 7 at 61, 76-77. The award letter set the price at which Sun would buy a particular DRAM-containing product from the EM, and identified quality standards **[**9]** for the product. See id. Subsequently, Sun also communicated its supply plan to the EM, informing the EM how much demand for DRAM-containing products Sun forecasted in the coming quarters. See Moore Decl. Re EMs, Ex. 7 at 76. Notably, however, Sun's forecast was fluid and was frequently updated. Sun also did not commit to actually purchasing a set quantity of DRAM-containing products in its forecasts, nor did it always end up purchasing all products forecasted. See id. at 82-83.

After receiving Sun's supply forecasts, EMs then purchased DRAM from suppliers in order to meet the demand forecasted in the supply plan. Id. at 76-77. As part of this process, Sun would preliminarily generally determine which DRAM suppliers were qualified to sell DRAM to the EMs for use in Sun products, and would furthermore generally negotiate DRAM pricing between the EMs and DRAM suppliers. See Declaration of David C. Cross ISO EM Opp. ("Cross EM Opp. Decl."), Ex. 26 at 160; Ex. 27 at 128-29; Ex. 22 at 82-83, 613; Ex. 28 at 62-64; Ex. 29 at 119-122, 124 (generally discussing Sun's creation of an approved vendor list for use **[*1172]** by the EMs). Sun's global memory procurement team in California, for example, dictated **[**10]** a single worldwide price at which the EMs were permitted to order DRAM from DRAM suppliers for incorporation into Sun products, and further awarded a specific share of business to each DRAM supplier. See Cross EM Opp. Decl., Ex 29 at 28-29, 134-35; Ex. 30 at 125-26; Ex. 28 at 71-72; Ex. 31 at 57-58. Each EM would then be told from whom, at what price, and at which percentage of business they should issue purchase orders for the DRAM to be used in Sun products. See, e.g., Cross EM Opp. Decl., Ex. 32 at 45-50; Ex. 29 at 28-29, 134-45; Ex. 30 at 125-26. In some instances, Sun even required the EMs to purchase DRAM from Sun's own inventory. See Cross EM Opp. Decl., Exs. 37-39. Either way, however, the EMs were expected to, and generally did, execute purchase orders for DRAM pursuant to the directions provided by Sun. See, e.g., id. at Ex. 24 at 61; Ex. 53; Ex. 54 at 111-112.

Nonetheless, there is evidence that at times, some of the EMs independently selected DRAM suppliers from whom to purchase DRAM, and independently negotiated DRAM pricing with those DRAM suppliers. See, e.g., Moore Decl. Re EMs, Ex. 7 at 206-09 (MiTac); Ex. 13 at 116-18 (Celestica); Ex. 21 (MiTac); see also Bergman Decl., **[**11]** Ex. 9 at 216-21; Ex. 21 at SUN001236; Ex. 31.

After DRAM pricing and suppliers were determined -- either by Sun, or the EMs acting independently -- the EMs procured the DRAM. The EMs did so by: issuing purchase orders; receiving invoices issued by the DRAM suppliers; paying the invoices sent to them by the DRAM suppliers; and taking receipt of the actual DRAM purchased from the suppliers. See Moore Decl. Re EMs, Ex. 7 at 87; Ex. 13 at 45-46; Ex. 8 at 60-62; Ex. 5 at 10:22-13:1. After accepting delivery of the DRAM from the defendant suppliers, the EMs took title to it. See id. at Ex. 9 at 610-11; Ex. 8 at 66, 72; Ex. 13 at 47; Ex. 14 at 114; Ex. 12 at 32-33, 55-56. The EMs generally retained title until Sun accepted an assembled DRAM-containing product from the EMs. As some of the EMs testified, as a result of taking title, the EMs accepted the risk of loss and damage to the DRAM, and would bear the cost of replacement for damaged DRAM. See id. at Ex. 7 at 117; Ex. 9 at 610-11; Ex. 13 at 69-74, 77-78. [3]

As for the DRAM that was delivered to, but not ultimately used by the EMs (as a result of a change in Sun's forecasts or the end of life of a particular Sun product, for example), the EMs often made efforts to return the excess to DRAM suppliers or to transfer it to another of Sun's EMs at Sun's direction. However, if these efforts were unsuccessful, Sun generally bore the cost of this DRAM and bought it back from the EMs. See id. at Ex. 28 at 53-54; Ex. 29 at 74, 94; Ex. 65 at 38-39; Ex. 30 at 34-35, 79-80, 90-94. The EMs were not permitted to sell excess DRAM to third parties without prior approval from Sun. Id. at Ex. 28 at 54; Ex. 29 at 76-77, 191-92.

Finally, having purchased DRAM from DRAM suppliers for use in the manufacture of DRAM-containing products on Sun's behalf, the last step of the distribution chain involved a downstream transaction in which Sun purchased the finished DRAM-containing products from the EMs. To do so, Sun issued purchase orders for products on a quarterly or semi-quarterly basis. Sun purchased DRAM-containing **[*1173]** products from the EMs at cost plus a percentage markup. See id. at Ex. 7 at 217-18; **[**13]** see also ACC PP 13a-b.

2. Sun's Foreign Subsidiaries

The ACC alleges that approximately 66% of the DRAM used by Sun in its finished products was purchased by and delivered to Sun's own manufacturing facilities located in the United States and abroad. See ACC P 13a. Sun further alleges that 25% of this DRAM was delivered to and purchased specifically by Sun's foreign manufacturing facilities located in Europe -- primarily Sun Microsystems Scotland ("Sun Scotland"), which manufactures servers and workstations in Linlithgow, Scotland, and Sun Microsystems International B.V. ("Sun Netherlands"), which distributes and markets Sun servers and workstations in Europe and other foreign markets. See id.

Sun Scotland and Sun Netherlands are indirect, wholly owned subsidiaries of Sun. The subsidiaries do not share the identical board of directors and officers with Sun, although they do have some common directors and officers. See Bergman Decl., Ex. 4 at Responses 4-5, 23-25. Nor do Sun's directors form a majority of the subsidiaries' boards of directors. See id. at Responses 6, 26.

The procurement process vis-a-vis Sun's foreign subsidiaries largely paralleled that of the third-party external manufacturers. **[**14]** As with the external manufacturers, for example, Sun's global procurement team based in California established a single worldwide price at which the subsidiaries were permitted to order DRAM from DRAM suppliers, for delivery in turn to Sun's subsidiaries. See generally Declaration of David C. Cross ISO FTAIA Opp. ("Cross FTAIA Opp. Decl."), Ex. 3. [4] Specifically, Sun's global procurement team utilized face-to-face negotiations, live auctions called Dynamic Bidding Events ("DBE"s), and sealed bidding events in order to establish the worldwide DRAM price and choose those DRAM suppliers from whom Sun's subsidiaries then purchased DRAM for use in manufacturing Sun products. See Cross FTAIA Opp. Decl., Ex. 5 at 21-23, 28-29, 31, 47-48, 50.

After DRAM pricing and supplier determinations had been made, and in purchasing DRAM from approved suppliers (many of whom were European entities) pursuant to the worldwide price, Sun Scotland and Sun Netherlands also issued their own purchase orders to **[**15]** suppliers; took delivery of DRAM from the suppliers; were directly invoiced for the DRAM; and settled and/or paid the invoices from the suppliers. See Bergman Decl., Ex. 4 at Responses 16, 35; Ex. 5 at Responses 17-19, 36-38. However, when issues arose with DRAM purchased by Sun's foreign subsidiaries or with respect to the subsidiaries' relationships with suppliers, the California-based global procurement team generally addressed those issues. See, e.g., Cross FTAIA Opp. Decl., Exs. 10-11; see also id., Ex. 3 at P 8.

---

[3] On many occasions, the DRAM suppliers kept track of which DRAM delivered to the EMs was intended for use in Sun products. In these instances, the suppliers' sales records identified **[**12]** Sun as the end-purchaser. See, e.g., Cross EM Opp. Decl., Exs. 1-19.

[4] The "single worldwide DRAM price" established by Sun's California-based global procurement team applied equally to Sun's foreign subsidiaries and its third-party external manufacturers. See id. at P 5.

There is evidence that the DRAM purchases made by Sun's foreign subsidiaries were used in the manufacture of finished Sun products at Sun's foreign facilities, which products were in turn sold to customers in Europe and elsewhere. See, e.g., Bergman Decl., Ex. 7 at 23-24 (discussing manufacture and sale of DRAM-containing Sun products at Sun Scotland).

C. Procedural Case History

To date, the court has had occasion to rule on two separate motions to dismiss in **[*1174]** this case. First, on March 7, 2007, the court heard defendants' motion to dismiss certain claims asserted in the original consolidated complaint in the Sun action, on grounds that the court lacked subject matter jurisdiction. **[**16]** Specifically, defendants had moved to dismiss plaintiff's claims to the extent they were based on foreign DRAM purchases made by Sun's external manufacturers and foreign affiliates on Sun's behalf, arguing that such claims were premised on unrecoverable foreign injury only. The court granted defendants' motion to dismiss, but because of the complaint's lack of clarity with respect to the nature of any claims based on foreign DRAM purchases, granted Sun leave to amend in order to set forth allegations that provided greater clarity and specificity with respect to that portion of plaintiffs' claims allegedly based on foreign harm, as distinct from that portion based on domestic harm.

Plaintiff filed the amended consolidated complaint on May 4, 2007, and subsequent to that filing, defendants moved a second time to dismiss plaintiff Sun's claims to the extent based on foreign DRAM purchases. On October 15, 2007, the court denied defendants' motion without prejudice. The court found that the Foreign Trade Antitrust Improvement Act ("FTAIA"), which precludes application of the Sherman Act to wholly foreign conduct, was applicable to defendants' foreign price-fixing conduct, as alleged. See **[**17]** Order Denying Two Motions to Dismiss and Deferring Ruling on One Motion to Dismiss ("Dismissal Order") at 12. Having so found, however, the court noted that the relevant question in this case was not really whether the general rule excluding the Sherman Act's reach over wholly foreign conduct applies, but rather whether the foreign conduct falls within the domestic injury exception to the general rule, such that subject matter jurisdiction may be properly exercised under the FTAIA. See id. This question in turn depended upon whether defendants' foreign conduct (1) had a direct, substantial and reasonably foreseeable effect on domestic commerce; and (2) whether that effect gave rise to a Sherman Act claim. Id.

The court found that plaintiff had sufficiently established the first of these two elements, by virtue of the ACC's allegations that defendants' foreign price-fixing activity led to "higher prices for DRAM in the United States, which in turn formed the predicate for plaintiffs' domestic agreements to pay higher prices for DRAM." See Dismissal Order at 16. As to the second and final element, however, the court was unpersuaded. After noting that plaintiff was required to allege proximate **[**18]** causation in order to establish the requisite nexus between domestic effect and foreign injury in order to satisfy the second domestic injury exception prong, the court found plaintiff fell short of the mark by arguing that its global procurement strategy (which set a single global price for DRAM) satisfied the proximate cause test.

Instead of dismissing plaintiff's claims outright for lack of subject matter jurisdiction, however, the court noted that plaintiff had made an alternative argument that warranted further development. Specifically, Sun had argued that, to the extent some of its own foreign facilities, subsidiaries and affiliates had made the foreign DRAM purchases at issue, such purchases were tantamount to Sun's own purchases under a "single enterprise" or agency theory, and Sun stood in those subsidiaries' shoes for purposes of raising their claims. While the court was unable to determine the validity of any such theory on the motion before it, the court stated that "if plaintiffs can articulate and prove a legal theory that would permit the court to find **[*1175]** that they stand in the shoes of or are the alter ego of their foreign affiliates as well as a factual basis for such **[**19]** a claim, the court would be permitted to find that proximate cause under the FTAIA is necessarily satisfied, and that jurisdiction exists." See id. at 22. To that end, the court denied defendants' motion to dismiss without prejudice to defendants' ability to raise the same arguments again "after an appropriate amount of discovery" had been taken to enable both sides to fully develop their arguments. Id.

D. The Instant Motions

Now several months later, discovery has closed and defendants are back before the court having filed seven different motions for resolution, the majority of them dispositive: (1) a motion for partial summary judgment as to Sun's claims based on purchases made by Sun's external manufacturers; (2) a renewed motion to dismiss certain of Sun's claims for lack of subject matter jurisdiction, to the extent based on foreign DRAM purchases; (3) a motion for summary judgment as to Sun's claims based on purchases of DRAM from defendant Mitsubishi entities; (4) an omnibus motion for summary judgment or in the alternative, for summary adjudication; (5) a motion to exclude the expert testimony of plaintiff's expert, Dr. Halbert White; (6) defendant Nanya Technology Corporation's **[**20]** ("NTC") motion for summary judgment on the basis that plaintiff cannot establish a triable issue of fact as to the entities' participation in any overarching price-fixing conspiracy; and (7) defendant Nanya Technology Corporation USA's ("NTC USA") analogous motion on the basis that plaintiff cannot establish a triable issue of fact as to NTC USA's participation in any overarching price-fixing conspiracy. [5] The parties have also filed numerous evidentiary objections, and requests for judicial notice.

Each of the relevant motions is dealt with in turn below.

DISCUSSION

A. Legal Standards

1. Summary Judgment

HN1[] As a general matter, summary judgment "shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." See *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. The court must view the facts in the light most **[**21]** favorable to the non-moving party and give it the benefit of all reasonable inferences to be drawn from those facts. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

HN2[] Where, as here, concerted price-fixing is alleged, the plaintiffs bear the ultimate burden of presenting sufficient evidence to prove that an agreement to fix prices existed. See, e.g., *In re Citric Acid Litig., 191 F.3d 1090, 1093 (9th Cir. 1999)*(noting that price-fixing is a per se violation of *section 1* of the Sherman Act). In order for them to survive defendants' motion for summary judgment, therefore, plaintiffs must establish that there is a genuine issue of material fact as to whether defendants entered into an illegal conspiracy that caused respondents to suffer a cognizable injury. See *Matsushita, 475 U.S. at 585-86*. Plaintiffs can establish a genuine issue of material **[*1176]** fact by producing either direct evidence that defendants participated in an agreement to fix prices, or circumstantial evidence from which a reasonable fact finder could conclude the same. See, e.g.,*Movie 1 & 2 v. United Artists Commc'ns, 909 F.2d 1245, 1251-52 (9th Cir. 1990)*; *United States v. Gen. Motors Corp., 384 U.S. 127, 142-43, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*.

With **[**22]** respect to proof by way of circumstantial evidence in *section 1* cases, special rules apply. In Matsushita Elec. Indus. Co., the Supreme Court noted that ***HN3***[] "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *[section 1*] case…". See *475 U.S. at 588*. In addressing plaintiff's burden in proving that an issue of material fact exists on the conspiracy question, the court stated, "conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy…". See id. In sum, to survive a motion for summary judgment, "a plaintiff seeking damages for a violation of *[section] 1* must present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently …." Id.

[5] The first five of these motions are addressed herein, while the latter two motions filed by NTC and NTC USA are addressed via separate order, to be filed by the court.

The Ninth Circuit has embraced Matsushita and has outlined HN4[] a two-part test to be applied whenever a plaintiff rests its case entirely on circumstantial evidence. First, the defendant can rebut an allegation of conspiracy by showing a plausible and justifiable reason for its conduct that is consistent with proper business practice. Second, the burden then "shifts back to the plaintiff to provide specific **[**23]** evidence tending to show that the defendant was not engaging in permissible competitive behavior." See, e.g., *In re Citric Acid Litig., 191 F.3d at 1094*.

These standards apply here, to the extent that plaintiffs seek to defeat summary judgment as to liability for conspiratorial conduct on the basis of circumstantial evidence, whether in whole or in part.

2. Motion to Dismiss

HN5[] In evaluating a motion to dismiss, all allegations of material fact are taken as true and construed in the light most favorable to the nonmoving party. See, e.g., *Burgert v. Lokelani Bernice Pauahi Bishop Trust, 200 F.3d 661, 663 (9th Cir. 2000)*(citations omitted). In order to survive a dismissal motion, however, a plaintiff must allege facts that are enough to raise his/her right to relief "above the speculative level." See *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1964-65, 167 L. Ed. 2d 929 (2007)*. While the complaint "does not need detailed factual allegations," it is nonetheless "a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief' [which] requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." Id. In short, a plaintiff **[**24]** must allege "enough facts to state a claim to relief that is plausible on its face," not just conceivable. *Twombly, 127 S. Ct. at 1974*.

With the above collective standards in mind, the court now turns to the numerous motions before it, and addresses each in turn.

B. Motion for Summary Judgment re External Manufacturer Purchases

Generally, Sun seeks recovery for defendants' alleged Sherman Act violations based not only on the DRAM it purchased and had delivered, but also based on the DRAM delivered to and purchased in the first instance by its foreign subsidiaries and third-party external manufacturers. By way of the instant motion, defendants challenge only those claims based on the external manufacturers' DRAM purchases. Defendants note that the external manufacturers **[*1177]** initially paid defendant suppliers directly for their DRAM purchases, and argue that this made plaintiff an indirect purchaser of DRAM vis-a-vis those purchases. Thus, plaintiff's claims for recovery, to the extent based on the external manufacturers' DRAM purchases, are barred by the direct purchaser rule of *Illinois Brick v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*.

Sun defends its ability to assert such claims on grounds that it **[**25]** has established an agency relationship with the external manufacturers that gives Sun direct purchaser status in connection with all external manufacturer DRAM purchases, notwithstanding the external manufacturers' actual payment of DRAM prices to the defendants. Even if the court does not deem Sun a direct purchaser by virtue of the agency relationship between Sun and its external manufacturers, plaintiff maintains that it nonetheless satisfies the 'control' exception to the direct purchaser rule recognized in Illinois Brick, thus warranting denial of defendants' motion.

The issues for the court to decide are accordingly two-fold: first, whether Sun qualifies as a direct purchaser of the DRAM purchased from defendants by the external manufacturers, such that its claims based on those purchases may go forward under *Illinois Brick*. Second, and in the event Sun does not qualify as a direct purchaser, whether Sun's claims may nonetheless go forward pursuant to the 'control exception' recognized under Illinois Brick.

1. Whether Sun Qualifies as a Direct Purchaser

The direct purchaser rule is well-established. See, e.g., *Illinois Brick, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707*. In Illinois Brick, plaintiffs were indirect **[**26]** purchasers who sought to convince the court that they had antitrust standing to sue under federal antitrust laws because the illegal overcharge that resulted from defendants' antitrust conspiracy had been passed on to the indirect purchaser plaintiffs by middlemen further upstream. The

Supreme Court, however, consistent with its earlier holding in Hanover Shoe, [6] held that ***HN6***[] indirect purchasers are too remote to suffer true "antitrust injury," and therefore do not have standing under federal ***antitrust law*** to pursue claims. In reaching its conclusion, the court expressed concerns with the complexity of proof involved in any contrary rule, the purpose of the antitrust laws, and risk of multiple liability for defendants if such a rule were not adopted. See *id. at 731-35*.

Defendants' first and primary argument urges a straightforward application of the direct purchaser rule to the case at bar. They argue that, since the DRAM delivered to the external manufacturers -- both domestically and abroad -- was paid for in the first instance by the external manufacturers, even if on Sun's ultimate behalf, it is the external manufacturers rather than Sun who qualify as true direct purchasers capable of asserting claims premised on those purchases. For support, they rely on the Ninth Circuit's recent decision in Delaware Valley Surgical Supply Inc. v. **[*1178]** Johnson & Johnson, asserting that it firmly rejects any contrary argument.

Defendants' position on this point is well taken, and their reliance on Delaware Valley warranted. In Delaware Valley, the Ninth Circuit considered whether a plaintiff hospital had standing to bring a Sherman Act claim against a defendant manufacturer engaged in the provision of sutures and endomechanical products for use in laparoscopic surgery. See *523 F.3d 1116, 1118 (9th Cir. 2008)*. **[**28]** The pertinent facts of the case are as follows: plaintiff was a member of a group purchasing organization ("GPO") that negotiated a master agreement with defendant on plaintiff's behalf that set fixed pricing options for all sutures and endomechanical products. See id. Plaintiff then executed its own contract with defendant pursuant to the terms of the master agreement, which individual contract allowed plaintiff to purchase products either directly from defendant, or else from an authorized distributor of defendant's products. *Id. at 1119*. Plaintiff chose the latter option, and entered into yet another contract with a distributor, pursuant to which plaintiff procured defendant's products under the specified terms. Plaintiff purchased defendant's products directly from the distributor; it did not pay defendant directly for any products, nor did defendant ship any goods directly to plaintiff. Id.

In considering the same direct purchaser rule at issue here, the Ninth Circuit there squarely rejected plaintiff's argument that it could be classified as a direct purchaser of goods from defendant, instead finding plaintiff to be an *indirect* purchaser that lacked standing to sue under the federal **[**29]** antitrust laws. See *Delaware Valley, 523 F.3d at 1122*. The Ninth Circuit reasoned: "It is undisputed that [the distributor] was the immediate purchaser of sutures and endo products from [defendant]. [Distributor] paid [defendant] directly for its inventory and took title in the products before selling them to [plaintiff]. [Plaintiff] directly paid [distributor], not [defendant], for its orders. [Distributor] is not an agent or subsidiary of [defendant], but rather an independently owned and managed company. Following the clear rule set forth in Illinois Brick, [plaintiff] lacks standing because the hospital is not a direct purchaser of products from [defendant]." See id. Although the Ninth Circuit noted that plaintiff had an independent contractual relationship with the defendant, and that the actual price that plaintiff paid for defendant's products was set by "an agreement negotiated [with defendant] by a GPO on behalf of plaintiff," it also noted that plaintiff additionally "had a contract with [the distributor], and it was that contract that ultimately effectuated the transfer of these goods." See id.

Notably, the Ninth Circuit observed that its conclusion was dictated in part by **[**30]** the Supreme Court's post Illinois Brick precedent, which clarified the Court's intention to establish a "bright line rule" by means of the direct purchaser rule, and had already "closed the door on the theory that an end user who buys from an independent distributor, rather than the manufacturer, should have standing because it may be the most efficient enforcer of antitrust laws." *Id. at 1122-1123* ("Illinois Brick is not a policy holding, but rather a case of statutory construction").

---

[6] In Hanover Shoe, Inc., v. United Machinery Corp., the Supreme Court generally held that a pass-on defense cannot be relied on by defendants who seek to prove that a direct purchaser plaintiff was not actually injured by a violation of the antitrust laws, if the plaintiff has passed on some or all of the illegal overcharge to other subsequent purchasers. See *392 U.S. 481, 491-493, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*. The court adhered there to the "general **[**27]** principle" that the victim of an overcharge "is damaged within the meaning of [the antitrust standing statute] to the extent of the overcharge" only. *Id. at 491*.

Delaware Valley is controlling. Plaintiff does not dispute that its external manufacturers initially paid for the DRAM that was delivered to them for incorporation into Sun products, which products would in turn be delivered and sold to Sun at cost, plus an agreed upon mark-up. Nor does plaintiff dispute that the external manufacturers took title to the DRAM initially purchased from the suppliers, or that the external manufacturers were independently **[*1179]** owned and managed corporate entities. Thus, this case is directly in line with Delaware Valley, and compels the conclusion that it is the external manufacturers, and not plaintiff, who must be deemed the "immediate purchasers" of DRAM. This is so, despite **[**31]** the existence of an overarching independent pricing strategy maintained and operated by Sun in connection with purchases of DRAM from defendants. After all, and notwithstanding plaintiff's protestations to the contrary, the same reasons articulated by the Delaware Valley court in rejecting the plaintiff hospital's direct purchaser claim on the basis of its independent contractual relationship with the defendant, apply here, too.

Plaintiff's agency argument that the external manufacturers acted as mere "purchasing agents" for Sun, does not change this analysis. As articulated by plaintiff's counsel at the hearing on the instant motion, a finding that the external manufacturers acted as Sun's purchasing agents would allow the external manufacturers' direct payments to defendant DRAM suppliers to be legally attributed to Sun, thereby cloaking Sun with the necessary authority to assert claims based on external manufacturer DRAM purchases. Application of this purchasing agency theory would also allow plaintiff to proceed "outside the scope of Illinois Brick," in counsel's words, thereby obviating any objections based on Delaware Valley. For support for the purchasing agency theory, plaintiff **[**32]** relies on *In re Coupon Clearing Service, Inc., 113 F.3d 1091 (9th Cir. 1997)*, and *E.&J. Gallo Winery v. Encana Energy Servs., Inc., 2008 U.S. Dist. LEXIS 46927, 2008 WL 2220396 (E.D. Cal. May 27, 2008)*. See Pl. Opp. Re EM Purch. at 9:11-12:19.

These cases, however, are neither persuasive nor controlling. *In re Coupon Clearing Serv*. is a bankruptcy decision and did not address federal ***antitrust law*** at all, let alone did it consider the availability of an agency theory as an alternative theory available in the direct/indirect purchaser context. As for *E.&J. Gallo Winery*, it does address the availability of a general agency theory in the federal antitrust context. However -- and putting aside the decision's non-binding status upon this court -- *E.&J. Gallo Winery* only considered the availability of a general agency theory to a plaintiff seeking to impose antitrust *liability* on parent-subsidiary corporations. This is, in the court's view, a distinct question from the issue urged by plaintiff upon the court here -- i.e., whether a plaintiff can invoke a purchasing agency theory as an alternative means of establishing direct purchaser standing for purposes of asserting federal antitrust claims. In contrast to the agency **[**33]** theory discussed by the district court in *E.&J. Gallo Winery*, the present inquiry precedes the question of antitrust liability entirely, and instead deals with a plaintiff's legal ability to assert antitrust claims in the first instance.

Aside from the lack of convincing legal support for plaintiff's purchasing agency theory, moreover, the real problem with plaintiff's argument is that it requires the court to turn its back on what it views as the clear governing framework of *Illinois Brick*. As the Ninth Circuit has made clear, that framework set forth a "bright line rule" that prohibits all but direct purchasers from bringing suit under the federal antitrust laws -- adherence to which is required under the undisputed factual scenario advanced here. See *Delaware Valley, 523 F.3d at 1122-23*. Thus, and without clear legal authority to the contrary, no justification for departing from this well-recognized framework exists. And while plaintiff correctly notes that Delaware Valley did not have occasion to examine the precise purchasing agency argument advanced here, the factual similarities in the case at bar to Delaware Valley persuade this court that any such **[*1180]** argument would have been discredited **[**34]** by the Ninth Circuit as yet another misguided attempt to fashion a "new formulation of the

Illinois Brick rule." See *id. at 1123, 1124* (the Supreme Court's "firm [direct purchaser] rule does not provide us the leeway to make a policy determination on a case-by-case basis as to whether standing should be recognized when there are special business arrangements").

In sum, therefore, fidelity to controlling precedent requires the conclusion that for all claims based on DRAM purchases made by external manufacturers, it is those external manufacturers and not Sun who qualify as direct purchasers capable of bringing suit, pursuant to the direct purchaser rule of *Illinois Brick*.

2. Control Exception to Illinois Brick Direct Purchaser Rule

Sun asserts, however, that even if the court concludes that Sun does not qualify as a direct purchaser under Illinois Brick, it is nonetheless qualified to assert claims based on external manufacturer DRAM purchases, by virtue of the 'control' exception recognized in Illinois Brick.

HN7[] The 'ownership' or 'control' exception permits offensive use of the pass-on theory in situations where "market forces have been superseded." One example of such a situation occurs **[**35]** when the direct purchaser is owned or controlled by a member of an alleged conspiracy. See, e.g., *Illinois Brick, 431 U.S. at 736 n.16* ("Another situation in which market forces have been superseded and the pass-on defense might be permitted is where the direct purchaser is owned or controlled by its customer"); cf. *Perkins v. Standard Oil Co., 395 U.S. 642, 648, 89 S. Ct. 1871, 23 L. Ed. 2d 599 (1969)*; *In re Western Liquid Asphalt Cases, 487 F.2d, at 197, 199*. While long-recognized, however, there are few authoritative cases that clearly define the legal showing required to justify application of the control exception, and no Ninth Circuit authority that provides affirmative guidance on the issue. As a general matter, the ownership and control exception has been construed to encompass relationships involving such functional economic or other unity between the direct purchaser and either the defendant or the indirect purchaser, that there effectively has been only one sale. See, e.g., *Jewish Hosp. Ass'n v. Stewart Mech. Enters., 628 F.2d 971, 975 (6th Cir. 1980)*; *Royal Printing Co. v. Kimberly-Clark Corp., 621 F.2d 323, 326-27 (9th Cir. 1980)*; see also, e.g., *In re Mercedez-Benz Antitrust Litig., 157 F. Supp. 2d 355, 355 (D. N.J. 2001)*("[T]he **[**36]** rationale of Illinois Brick's bar to indirect purchaser suits does not apply where the supposed intermediary is controlled by one or the other of the parties"). Some examples of the types of facts that would satisfy the control exception have furthermore been defined as: "interlocking directorates, minority stock ownership, loan agreements that subject the wholesalers to the manufacturers' operating control, trust agreements, or other modes of control separate from ownership of a majority of the wholesalers' common stock." *In re Brand Name Prescription Drugs Antitrust Litig., 123 F.3d 599, 606 (7th Cir.1997)*.

Here, plaintiff concedes that it and the external manufacturers were separate legal entities, lacked interlocking directorates and officers, did not own each other's stock, and did not enter into loan agreements, trust agreements, or extensions of credit on behalf of one another. See, e.g., Pl. Opp. Br. at 15:20-26; see also, e.g., Moore Decl., Ex. 5, Responses 48, 58; Ex. 8 at 68-76; Ex. 15 at P 18; Ex. 13 at 50-52, 118. Plaintiff contends, however, that these facts are not determinative of the control question, since application of the exception depends upon the narrower issue **[**37]** whether sufficient control is exercised in connection with the actual procurement **[*1181]** of DRAM for incorporation into Sun products *only* -- not whether it is exercised in connection with structural day to day control of an entity. And this, says plaintiff, it has indisputably demonstrated based on the uncontested evidence showing that Sun determined from whom, at what price, and at which percentage of business the external manufacturers would order DRAM; that Sun provided forecasts to determine the quantities of DRAM ordered by the external manufacturers; and that Sun bore the cost of the DRAM that was ordered by the external manufacturers on its behalf (by paying for the DRAM at cost plus a percentage mark-up). See, e.g., Moore Decl. Re EMs, Ex. 7 at 76; see also, e.g., Cross EM Opp. Decl., Ex. 22 at 82-83, 613; Ex. 26 at 160; Ex. 27 at 128-29; Ex. 28 at 62-64; Ex. 29 at 28-29, 119-122, 124, 134-45; Ex. 30 at 125-26; Ex. 32 at 45-50.

For support of its argument that it is only control over the external manufacturers' DRAM procurement activities that counts for purposes of the control exception (rather than the presence of structural control), plaintiff relies primarily on *In re Toilet Seat Antitrust Litig., 1977 U.S. Dist. LEXIS 14311, 1977 WL 1453 (E.D. Mich. Aug. 24, 1977)*. **[**38]** As plaintiff notes, In re Toilet Seat found that a plaintiff lumber company could allege class action antitrust claims against defendant manufacturers of toilet seats, notwithstanding that plaintiff did not "purchase directly from" the manufacturers but rather relied on a midstream purchasing agent to make purchases on plaintiff's behalf. See *1977 U.S. Dist. LEXIS 14311, [WL] at *2*. The court found that plaintiff's relationship with the purchasing agent was one of "principal and agent" rather than buyer and seller, and that the relationship fell within the control exception of Illinois Brick. Id. The evidence that the court relied on in coming to this conclusion demonstrated: that the middle agent with whom plaintiff dealt was a "purchasing concern;" that plaintiff engaged the agent for "a flat monthly fee;" that the fee paid to the agent "bore no relation to the quantity of goods obtained;" and that billing arrangements varied with different transactions, although in some circumstances, the agent would be billed first and in turn would bill plaintiff. Id.

Putting aside for the moment the fact that *In re Toilet Seat* constitutes (as so many of the cases cited herein by the parties do) non-binding authority, it is **[**39]** not altogether persuasive. *In re Toilet Seat* teaches that the control exception may be satisfied when the plaintiff employs an independent broker or purchasing agent as middle man whose sole function is to act as a mere conduit for the procurement of goods. This, however, is different from the case at bar. Here, plaintiff does not dispute that it employed external manufacturers for assistance in the actual manufacture of Sun products -- *not* simply as brokers to act as conduits for the procurement of DRAM. This broader relationship triggers additional complexities that are highlighted by the different billing arrangements evidenced in both cases. In re Toilet Seat notes, for example, that plaintiff's purchasing agent was paid a flat monthly fee for its services that bore no relationship to the quantity of goods obtained. Here, by contrast, Sun's payments to external manufacturers are directly proportional to the amount of Sun-finished products that Sun purchases, since all products are paid for on a cost basis, plus an additional percentage mark-up. These differences serve to highlight a larger disparity: whereas *In re Toilet Seat* is characterized by facts indicating that market forces **[**40]** have been suspended (e.g., flat fee payment that is resistant to supply and demand forces), the present case is characterized by a relationship in which traditional market forces remain in play. As such, the fundamental premise upon which the control exception is to be applied -- i.e., in situations in which market forces are **[*1182]** suspended -- is not evident here, even if evident under the facts of *In re Toilet Seat.*

This conclusion is consistent with Jewish Hosp. Ass'n, a Sixth Circuit case that both sides agree is instructive. See *628 F.2d at 975*. In listing there the "examples of situations where an ownership or control relationship between an indirect purchaser and a direct purchaser might make the passing-on bar inapplicable," the Sixth Circuit noted situations involving parent-subsidiary relationships, or one company's stock ownership of another, as the paradigmatic examples. Id. Significantly, however, the court also noted that, while a relationship with an independent broker or purchasing agent such as that described in In re Toilet Seat could also satisfy the exception, this rule only applies where market forces are truly superseded. Id.; see also *Howard Hess Dental Lab. v. Dentsply Intern., 424 F.3d 363, 372 (3d Cir. 2005)*("modes **[**41]** of control that might qualify for the control exception include 'interlocking directorates, minority stock ownership, loan agreements that subject the wholesalers to the manufacturers' operating control, [or] trust agreements").

Since there is no evidence that plaintiff's external manufacturers were independent purchasing agents of the type contemplated by *In re Toilet Seat* and *Jewish Hosp. Ass'n*, application of the control exception is therefore inappropriate here, unless plaintiff can demonstrate other recognized modes of control that might suggest that market forces have been superseded -- e.g., interlocking directorates, minority stock ownership, loan agreements that subject the wholesalers to the manufacturers' operating control, etc. As noted, however, it is undisputed that this is not the case.

It is worth noting, furthermore, that to the extent that the external manufacturers retain, and have exercised, their right to sue defendants, this further confirms that market forces have not been superseded in the traditional sense contemplated by the control exception, and that the policy reasons behind the *Illinois Brick* decision remain intact. Indeed, as defendants point out, at least **[**42]** two external manufacturers -- Celestica and Solectron -- have submitted direct purchaser claim forms as part of the direct purchaser MDL proceedings in the In re DRAM litigation before the court. See Moore Decl. Re EMs, Ex. 13 at 41-43; Exs. 17-19.

In sum, therefore, the court concludes that plaintiff has failed to introduce a material dispute of fact as to whether market forces here have been superseded in the manner contemplated for the control exception to apply.

* * *

Based on all the foregoing, the court agrees with defendants that Sun does not qualify as a true direct purchaser for those claims based on DRAM purchases made by external manufacturers, and has furthermore failed to established a material dispute of fact as to application of the control exception to *Illinois Brick*. Defendants' motion for summary judgment is accordingly GRANTED.

C. Motion to Dismiss Claims Based on Foreign DRAM Purchases

Defendants' motion to dismiss seeks a ruling that the court lacks subject matter jurisdiction over plaintiff's claims, to the extent based on purchases made by Sun's foreign subsidiaries. [7] As noted, the **[*1183]** motion is defendants' third attempt to persuade the court to dismiss plaintiff's claims **[**43]** based on foreign DRAM purchases, and "addresses the narrow jurisdictional question remaining after the court's October 2007 ruling on defendants' motion to dismiss" -- i.e., whether plaintiff can articulate and prove a legal theory that would satisfy proximate causation under the FTAIA. According to defendants, the completion of discovery has now sufficiently developed the factual record to make clear "that Sun cannot carry its jurisdictional burden" under the statute.

As discussed ad nauseam in the court's prior dismissal orders, ***HN8***[] the court's assertion of subject matter jurisdiction **[**44]** over plaintiff's claims based on foreign subsidiaries' DRAM purchases -- notwithstanding the general proscriptions of the FTAIA -- generally requires a showing that defendants' foreign conduct (1) had a direct, substantial and reasonably foreseeable effect on domestic commerce; which (2) gave rise to a Sherman Act claim. See *15 U.S.C. § 6a*.; see also *F. Hoffman-La Roche Ltd. v. Empagran S.A., 542 U.S. 155, 158, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)*; *In re Dynamic Random Access Memory (DRAM) Antitrust Litig., 546 F.3d 981, 987-88 (9th Cir. 2008)*. Having already found that plaintiff has shown the former, the court now limits its inquiry to the latter, and examines whether plaintiff can demonstrate proximate causation between the recognized domestic effect of defendants' conduct (i.e., the setting of higher prices for DRAM in the United States) and plaintiff's foreign injury (i.e., the payment of higher DRAM prices abroad). See discussion, supra at 8-10; Dismissal Order at 20-21; see also *In re Dynamic Random Access Memory (DRAM) Antitrust Litig., 546 F.3d at 987-88*. Resolution of this inquiry depends upon resolution of plaintiff's two alternative theories: (1) the single enterprise theory; and (2) the agency theory. **[**45]** [8]

Before getting to the merits of these theories, however, there are two preliminary issues raised by the parties that require resolution. [9] First, plaintiff contends, as it has previously, that it is legally improper in the first instance to sever for the court's consideration any portion of claims based on foreign DRAM purchases, since those claims are also based on domestic DRAM purchases -- the court's jurisdiction over which no one disputes. Second, and assuming severance of the foregoing claims for the court's consideration is permissible, the parties dispute whether the proper legal standard to be applied in evaluating the instant motion is that provided **[**46]** **[*1184]** by *Federal Rule of Civil Procedure 12(b)(1)*, or alternatively, *Federal Rule of Civil Procedure 56*.

As to the first preliminary issue, plaintiff contends that since it is undisputed that the court has jurisdiction over Sun's claims premised on *domestic* deliveries of DRAM, the court cannot arbitrarily carve out from these claims the portion that are based on foreign deliveries, and dismiss them. This argument is unpersuasive, however, for as

---

[7] Defendants' motion also targets all claims based on purchases made by Sun's foreign external manufacturers. Thus, defendants seek dismissal of claims based on an aggregate total purchase amount of "more than $ 762 million between August 1998 and June 2002 and more than $ 732 million between April 1999 and June 2002." See Cross FTAIA Opp. Decl., Ex. 1 at P 4. However, in view of the court's grant of summary judgment with respect to all claims based on DRAM purchases made by external manufacturers -- both domestic *and* foreign -- this additional ground is now moot for purposes of the instant motion to dismiss.

[8] It should be noted that defendants' moving papers also seek dismissal based on Sun's inability to demonstrate subject matter jurisdiction over the claims at issue pursuant to an alter ego theory. However, as Sun states in its opposition brief and conceded at the hearing, it is not pursuing an alter ego theory in arguing for subject matter jurisdiction. See MTD Opp. Br. at 10:15-11:3 (the "alter ego and veil piercing analyses addressed by defendants are materially different" from the single enterprise theory being argued by Sun).

[9] Plaintiff also initially contends "[a]s a threshold matter," that defendants have stipulated that the only transactions at issue in this motion are deliveries of DRAM to Sun's foreign facilities, and not deliveries of DRAM to Sun's external manufacturers. The court has already decided that the latter issue is moot for purposes of this motion. Even if it had not so decided, however, the court would nonetheless find that the stipulation at issue lends no support for plaintiff's argument. See Cross FTAIA Opp. Decl., Ex. 1.

defendants point out, the court already considered and ruled upon the issue in its October 2007 order. Specifically, the court there said: "as to whether plaintiffs' claims based on foreign injury are severable from their claims based **[**47]** on domestic injury (which defendants have not moved to dismiss), the court agrees with a number of courts who have employed sound analysis in determining that such claims are severable." Dismissal Order at 22 (citing *In re Rubber Chemicals, 504 F. Supp. 2d 777, 2007 U.S. Dist. LEXIS 62734, at *13-22)*. Plaintiff presents no compelling reason for departure from this earlier holding. To the extent, moreover, that plaintiff rests its renewed argument against severance on the court's corollary statement that it "need not decide the issue definitively" on the prior dismissal motion, the court takes the opportunity now to definitively decide the issue in favor of severance.

As to the parties' second preliminary dispute over the proper legal standard applicable to the present motion, the court concludes that defendants have correctly argued in favor of application of a *12(b)(1)* standard, rather than a *Rule 56* standard.

Both parties rely on *Thornhill Publ'g Co. v. Gen. Tel. & Elec., 594 F.2d 730 (9th Cir. 1979)* in their competing approaches to this issue. In Thornhill, the Ninth Circuit affirmed the lower court's grant of defendant's summary judgment motion seeking dismissal of plaintiff's complaint on grounds that **[**48]** the complaint's alleged conduct was outside the jurisdictional reach of the Sherman Act. The trial court had applied the *Rule 56* summary judgment standards in deciding the motion, rather than the *12(b)(1)* standard usually applied to motions to dismiss for lack of subject matter jurisdiction. While noting that it need not definitively resolve the question whether the *Rule 56* standard or a *12(b)(1)* standard should have been applied by the district court, the Thornhill court made several observations about the use of these standards in the antitrust context.

The Ninth Circuit noted that where, as here, a motion attacking jurisdiction is made on the basis of facts in the record, such a motion is commonly labeled a "speaking motion," which is subject to analysis pursuant to *12(b)(1)* standards, and which allows the court to resolve disputed facts in evaluating the jurisdictional claims. See *594 F.2d at 733*. However, the court went on to note that, where the jurisdictional issues in an antitrust case are not separable from the merits of a case (e.g., where an element required to state a Sherman Act claim "is an element of the substantive offense as well as a jurisdictional requirement"), then **[**49]** a motion going to the jurisdictional issue should be accorded *Rule 56* treatment. See id.

The Thornhill court also took specific note of a prior recent case in which the Ninth Circuit considered the jurisdictional and substantive issues presented in a Sherman Act case specifically, found them to be legally distinct, and applied a *12(b)(1)* legal standard. The Thornhill court quoted language from that prior case as follows: "[t]he jurisdictional issue under the Sherman Act is distinct from the substantive issue of whether a given defendant's conduct was of the kind prohibited by the Act'… Specifically, 'the jurisdictional question . . . is whether defendants' conduct **[*1185]** had a sufficient relationship to interstate commerce to be subject to regulation by Congress… (while) the substantive issue… is whether defendants participated in anti-competitive conduct." *Id. at 735*. The Thornhill court cautioned, however, that this earlier observation had been reached in a case where the opposing party had conceded that the jurisdictional and substantive issues were separable. To that end, and notwithstanding the reasoning of this earlier case, the Thornhill court concluded that in a case "where the jurisdictional **[**50]** issue and the substantive issues are so intermeshed that the question of jurisdiction is dependent on decision of the merits," the *Rule 56* standard still applies. See id.

Thornhill's discussion is complicated and not altogether clear. Nonetheless, as applied here, *Thornhill* is best read as suggesting that the *12(b)(1)* standard, rather than a *Rule 56* standard, is appropriate. The jurisdictional issues in the case -- while factual in nature -- do not appear to be so "enmeshed" with the substantive issues of plaintiff's Sherman Act claim such as to require *Rule 56* treatment. As the Thornhill court contemplated, the jurisdictional issue in Sun's Sherman Act and Cartwright Act claims (insofar as the foreign purchase based claims are concerned) is whether defendants' conduct had a sufficient relationship with the domestic effects of that conduct and plaintiff's injury, so as to be subject to regulation under the FTAIA. The substantive issues of plaintiff's claims, however, are whether defendants participated in anti-competitive conduct by conspiring to fix prices. Since the two issues are distinct, analysis pursuant to *12(b)(1)* standards is appropriate. Accordingly, the court shall consider **[**51]** the factual evidence presented and resolve factual disputes as necessary to determine the existence of jurisdiction as a matter of law.

Having disposed of the preliminary issues, the court now turns to the two theories advanced by plaintiff.

1. Single Enterprise Theory

Plaintiff asserts that it stands in the shoes of its wholly owned foreign subsidiaries -- and thus that those subsidiaries' DRAM purchases at artificially high levels were proximately caused by the setting of a single inflated DRAM price in the U.S. -- because it, Sun Scotland and Sun Netherlands collectively "operated as a single enterprise with a unified purpose in the production and sale of Sun products and the procurement of components, such as DRAM, needed to assemble those products." See Pl. Opp. Br. at 10:2-4. As evidence of this single enterprise theory, Sun points to the global DRAM procurement strategy instituted and managed by Sun's global memory procurement team headquartered in California. Plaintiff also relies on several district court cases, including, primarily, *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*, and *Aventis Envtl. Sci. USA LP v. Scotts Co., 383 F. Supp. 2d 488, 499-500 (S.D. N.Y. 2005)*. **[**52]** Ultimately, however, neither plaintiff's reliance on the evidence nor its reliance on the case law withstands scrutiny.

To begin with, plaintiff's legal authority is less than compelling. While true that a single entity doctrine was announced in *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*, that case held that parent and subsidiary corporations are to be considered a single collective entity for purposes of conspiracy liability under *section 1* of the Sherman Act, and cannot be found liable for conspiracy with each other under the Act. The doctrine therefore expressly deals with the question whether a parent and subsidiary corporation may be charged with conspiring with each other, **[*1186]** and not, as is the case here, with the question whether those two entities may collectively be treated as a single entity for purposes of jurisdictional antitrust standing. Nor has any other case relied on by plaintiff so extended the single entity doctrine announced in Copperweld.

Plaintiff is closer to the mark in citing Aventis, an antitrust case allowing a U.S. affiliate plaintiff to assert antitrust claims based on the harm done to its foreign affiliate. See *Aventis, 383 F. Supp. 2d at 499-500*. **[**53]** Aventis noted that plaintiffs had "proffered evidence which, if believed, would demonstrate that all three [affiliate plaintiff] entities were acting as a single enterprise and shared a complete unity of interests." Id. Nonetheless, *Aventis* is distinguishable. First, and as defendants point out, it did not deal with the FTAIA specifically. Putting this concern aside, however, the court finds it significant that the foreign affiliates in Aventis had assigned their antitrust claims to the plaintiff affiliate corporation. Id. This fact alone strongly suggests a plaintiff's entitlement to assert claims on behalf of its foreign affiliates. Here, however, this critical fact is lacking. Furthermore, the Aventis court provided no analysis supporting its conclusion; thus, it is impossible for this court to meaningfully evaluate the contours of any single entity doctrine applied by that court. And while Aventis did note that two other district court cases had affirmed the existence of the single entity doctrine, neither of those cases dealt with a similar FTAIA context. See, e.g., *In re Vitamins Antitrust Litig., 2001 U.S. Dist. LEXIS 8903, 2001 WL 755852, at *3 (D.D.C. June 7, 2001)* and Farmland Dairies, Inc. v. New York Farm Bureau, Inc., 1996 WL 191971, at *4 (N.D.N.Y. Apr.15, 1996) **[**54]** (holding without meaningful discussion that a parent could bring antitrust claims on behalf of its subsidiary when their interests were the same and they were treated as the same entity). In sum, therefore, plaintiff's legal authorities -- the majority of which are non-binding -- have not convinced the court that the single entity doctrine should be applied in the manner advanced by plaintiff here.

Second, defendants correctly point out that plaintiff rests its evidence in support of its single enterprise theory in part on a global procurement strategy that has already been discredited. See Opp. Br. at 10:2-5 (Sun and its subsidiaries "operated as a single enterprise with a unified purpose in the production and sale of Sun products and the procurement of components, such as DRAM, needed to assemble those products"); see also Cross FTAIA Opp. Decl., Ex. 3 at P 4. Both this court and the Ninth Circuit have held that, to the extent plaintiff's proximate causation theory rests on proof of a global procurement strategy, this is not a viable legal theory. See, e.g., *In re Dynamic Random Access Memory (DRAM) Antitrust Litig., 546 F.3d at 989-90* (rejecting plaintiff's attempt to argue "a direct **[**55]** correlation between the U.S. price and the prices abroad" and fact "that the [d]efendants' activities resulted in the U.S. prices directly setting the worldwide price," and noting prior rejections of "single global price" theories of proximate causation). Thus, plaintiff's reliance on its global procurement strategy as evidence in support of its proximate causation argument -- if made via a single enterprise theory -- must be rejected.

In sum, the court finds that plaintiff has failed to sufficiently demonstrate that application of a single entity doctrine is appropriate in the manner urged by plaintiff here as to the foreign subsidiaries.

2. Agency Theory

This leaves plaintiff with its second, and alternative, theory -- that of agency. Plaintiff argues that agency principles are satisfied under one of two different, but equally applicable, agency doctrines: the representative **[*1187]** services doctrine, and the traditional common law doctrine of agency. Defendants, for their part, assert that Sun cannot satisfy either.

Preliminarily, an overview of the relevant agency doctrines is appropriate. ***HN9***[] The representative services doctrine, which the Ninth Circuit has acknowledged in the personal jurisdiction **[**56]** context, asks whether the subsidiary functions as the parent corporation's representative in performing services that are sufficiently important that if it did not have a representative to perform them, the parent would undertake to perform similar services on its own. See *Harris Rutsky & Co. Ins. Services, Inc. v. Bell & Clements Ltd., 328 F.3d 1122, 1134-35 (9th Cir. 2003)*(representative agency test permits the imputation of contacts where the subsidiary was "either established for, or is engaged in, activities that, but for the existence of the subsidiary, the parent would have to undertake itself"); *Doe v. Unocal, 248 F.3d 915, 925, 928 (9th Cir. 2000)*("the question to ask is… whether, in the truest sense, the subsidiaries' presence substitutes for the presence of the parent").

HN10[] The traditional common law agency doctrine -- for which both parties cite federal district court authorities -- is based on analysis of three factors: (1) manifestation by a principal that the agent would act on its behalf; (2) the agent's acceptance or consent to act on the principal's behalf; and (3) the understanding that the principal would be in control of the agent's undertaking on its behalf. See *Bowoto v. Chevron Texaco Corp., 312 F. Supp. 2d 1229, 1241-42 (N.D. Cal. 2004)*; **[**57]** *E&J Gallo Winery v. EnCana Energy Servs., Inc., 2008 U.S. Dist. LEXIS 46927, 2008 WL 2220396, *11 (E.D. Cal. 2008)*. Whereas the representative services doctrine acknowledged in Doe considers the agency question in light of the parent-subsidiary relationship in the jurisdiction context, both Bowoto and E&J Gallo consider the agency question in light of the parent-subsidiary relationship in the liability context.

In determining which legal standard to apply in order to determine the existence of an agency relationship for FTAIA jurisdiction purposes, the court notes that neither of the alternatives presented by the parties is, strictly speaking, persuasive. Neither the personal jurisdiction context nor the liability context discussed in the cited cases, for example, is directly on point with the FTAIA scenario. Moreover, after review of the cited case law, the court finds that the scope of the agency test laid out therein is less than clear. Thus, it is not immediately apparent to the court that either of the two formulations discussed by the parties should be given immediate effect, their contrary arguments notwithstanding.

This is not to say that the cases are not helpful, however. Bowoto and E&J Gallo, for example, **[**58]** both correctly note that the traditional common law of agency provides the basis for the guiding principles that should be given effect in this case. And as both district courts acknowledge, in the area of agency, it is federal common law that controls with respect to federal claims like the Sherman Act. See *Bowoto, 312 F. Supp. 2d 1229*; *E&J Gallo, 2008 U.S. Dist. LEXIS 46927, 2008 WL 2220396 at *5*. In turn, federal common law is guided by those principles set forth in the Restatement of Agency. Turning, then, to the operative Restatement Third, it lays ***HN11***[] the foundation for a traditional agency test that requires a plaintiff to demonstrate: (1) a manifestation by the principal that the agent shall act for him; (2) that the agent has accepted the undertaking; and (3) that there is an understanding between the parties that the principal is to be in control [10] of the **[*1188]** undertaking. See *Restatement (Third) of Agency, §*

---

[10] The court observes that the concept of 'control,' as employed for purposes of the traditional agency test, is distinct from the legal test **[**59]** for 'control' that applies in connection with the well-recognized control exception to Illinois Brick (discussed supra in connection with defendants' motion challenging external manufacturer purposes). This is so even if, as defendants pointed out at the hearing, the underlying arguments going to both are similar.

1.01; see also *Transamerica Leasing, Inc. v. La Republica de Venezuela, 339 U.S. App. D.C. 385, 200 F.3d 843, 849 (D.C. Cir.2000)*. This, therefore, is the test that the court employs here.

Applying this test here, the ultimate question is therefore whether plaintiff can point to facts that establish (1) Sun's intent to have its foreign subsidiaries act on Sun's behalf in purchasing DRAM; (2) that the foreign subsidiaries accepted and/or understood their role in purchasing DRAM on Sun's behalf; and (3) that there is an understanding between Sun and its foreign subsidiaries that Sun is to be in control of the subsidiaries' procurement of DRAM. To that end, plaintiff submits the following facts: Sun's foreign facilities purchased DRAM at prices set, from vendors chosen, and amounts determined by a global memory procurement team based as Sun headquarters in California; and the DRAM suppliers' own records demonstrate that Sun was a single customer, without distinction between Sun and its foreign subsidiaries. See Cross FTAIA Opp. Decl., Ex. 3 at PP 4-8; [11] id. at **[**60]** Exs. 12-16.

While defendants do not dispute these facts, they point out that Sun's subsidiaries -- specifically, Sun Scotland and Sun Netherlands -- issued their own purchase orders to primarily European entities of defendant DRAM manufacturers; had their own equitable ownership different than Sun's; were sufficiently capitalized to satisfy their own debts and liabilities; did not maintain common funds or commingle assets with Sun; used their own accounts to settle the invoices issued to them by their European DRAM suppliers; took delivery of the DRAM they purchased and used that DRAM to manufacture finished products; and sold those products through their own European sales offices. See Declaration of Steven Bergman ISO FTAIA Dismissal **[**61]** ("Bergman FTAIA Decl."), Ex. 4 at Responses 2, 6-8, 10, 12, 20, 25-27, 29, 31; id., Ex. 11 at 63:16-64:17; see also Cross FTAIA Opp. Decl., Ex. 1 at PP 4,6. Based on these facts, defendants contend that the subsidiaries themselves controlled their purchases of DRAM, and there is no basis for concluding that they acted as Sun's agent with respect to the procurement of DRAM overseas.

Ultimately, the court agrees with defendants. As an initial matter, the undisputed facts fairly demonstrate, as plaintiff submits, that plaintiff intended to have its foreign subsidiaries purchase DRAM under terms and conditions, and from DRAM suppliers, established by Sun's global procurement team in California; that the foreign subsidiaries did, in fact, purchase their DRAM from DRAM suppliers pursuant to Sun's global procurement strategy; and that, to the extent Sun's global procurement team established and enforced its DRAM procurement strategy -- via its communications with DRAM suppliers and the foreign subsidiaries -- Sun was in control **[*1189]** of its procurement strategy. Critically, however, and notwithstanding this showing, the undisputed facts do *not* demonstrate that Sun intended, or that the foreign subsidiaries **[**62]** understood, that any DRAM purchases were being made on *Sun's* behalf, as opposed to on behalf of the foreign subsidiaries. In fact, and as defendants note, the facts demonstrate that the subsidiaries purchased DRAM from primarily European entities of defendant DRAM manufacturers, took delivery of the DRAM they purchased, and used that DRAM to manufacture finished Sun products that were sold through the subsidiaries' own European sales offices. All of which suggests that, although Sun may have established and controlled the applicable DRAM pricing strategy pursuant to which the subsidiaries purchased DRAM, it is the subsidiaries who then took charge of their own DRAM purchases, for their own eventual use. Significantly, plaintiff has submitted no evidence disputing these facts.

Moreover, to the extent that plaintiff seeks to transform Sun's undisputed control over its global procurement strategy into a finding that Sun's subsidiaries are but agent actors whose every move in furtherance of Sun's global strategy should be imputed to Sun, the court is mindful that some degree of control is usually, even if not necessarily, implicit in the parent subsidiary relationship. Thus, the degree **[**63]** of control exercised by the parent in order for the subsidiary to qualify as an agent must therefore exceed that which is to be expected in the normal scope of any such relationship. Furthermore, defendants' point that, having availed itself of the advantages of the parent subsidiary relationship under corporate law, Sun cannot now easily disavow itself of such to suit its purposes, is well taken. See, e.g., *Disenos Artisticos, E Industriales, S.A. v. Costco Wholesale Corp., 97 F.3d 377,*

---

[11] Defendants have objected to the Declaration of Peter Wilson, on grounds that the information contained therein constitutes "new" evidence not previously disclosed, and that its disclosure now violates Sun's earlier obligation to supplement all discovery responses by June 30, 2008. The court overrules this objection, however, in light of defendants' failure to set forth an adequate showing as to what evidence contained in the declaration is actually "new."

380 (9th Cir. 1996)(noting that a corporation is not entitled to establish and use its affiliates' separate legal existence for some purposes, yet have their separate corporate existence disregarded for its own benefit against third parties)("[g]enerally, the corporate veil can be pierced only by an adversary of the corporation, not by the corporation itself for its own benefit").

In sum, the court finds that, notwithstanding Sun's acknowledged control with respect to its global procurement *strategy*, the undisputed evidence demonstrates that Sun Scotland and Sun Netherlands controlled, in large part, their own purchases of DRAM for their own use and sale. As such, plaintiff's effort to demonstrate that **[**64]** the subsidiaries were acting on Sun's behalf, or that Sun maintained the requisite level of control over the subsidiaries' actual purchases, fails. The foreign subsidiaries cannot therefore be deemed Sun's agents for purposes of the foreign DRAM purchases made by them.

Having failed to persuade the court that application of either a single enterprise or agency theory is appropriate, plaintiff has exhausted the avenues available to it to show that the foreign DRAM purchases made by its foreign subsidiaries should in effect be considered purchases made by Sun itself. Without a valid theory to show that it stands in the shoes of its subsidiaries for purposes of those DRAM purchases, the purchases themselves must be viewed as foreign transactions made by independent subsidiary entities, albeit pursuant to a global pricing strategy instituted by its parent corporation, Sun.

Under these facts, the court cannot find jurisdiction under the FTAIA for any claims premised on such purchases. As noted time and again by this court, ***HN12***[] the FTAIA requires that plaintiff demonstrate that the higher U.S. DRAM prices caused by defendants' conduct proximately caused *plaintiff* to pay higher DRAM prices **[*1190]** abroad. **[**65]** However, as has just been determined, it is plaintiff's subsidiaries, rather than plaintiff itself, who actually paid any higher DRAM prices abroad. To the extent Sun suffered any injury as a result of its subsidiaries' higher DRAM payments, those injuries are derivative of those suffered by the foreign subsidiaries. Thus, no proximate cause link has been established. See, e.g., *In re Dynamic Random Access Memory Antitrust Litig., 546 F.3d at 988* ("The defendants' conspiracy may have fixed prices in the United States and abroad, and maintaining higher U.S. prices might have been necessary to sustain the higher prices globally, but [plaintiff] has not shown that the higher U.S. prices proximately caused *its* foreign injury of having to pay higher prices abroad. Other actors or forces may have affected the foreign prices.")(emphasis added).

In so ruling, the court declines plaintiff's invitation to re-examine the boundaries of its earlier proximate cause holding. As the court stated in its most recent dismissal order, the only question for resolution at this stage is the existence of proximate cause vis-a-vis the two theories highlighted and discussed herein. Moreover, while plaintiff's **[**66]** counsel's desire to revisit the issue is understandable, the court disagrees at the outset with counsel's characterization of the court's earlier proximate cause inquiry. Contrary to counsel's statement at the hearing that the court's earlier discussion of the issue focused on whether a higher negotiated U.S. DRAM price "cause[d] Sun to go out and purchase a lot of DRAM," the court's actual proximate cause analysis was squarely focused on whether a higher negotiated U.S. DRAM price caused "Sun to pay that price for all the DRAM that it purchased." See Dismissal Order at 20-22. As the court finds herein, however, the answer to this inquiry is no. This is so, despite plaintiff's accurate observation that there is a single global price for artificially inflated DRAM that was negotiated as a result of defendants' conduct.

* * *

In sum, and for all the foregoing reasons, jurisdiction under the FTAIA is lacking over plaintiff's claims, to the extent premised on foreign DRAM purchases made by Sun's foreign subsidiaries. The court accordingly GRANTS defendants' motion to dismiss such claims. [12]

D. Motion for Summary Judgment Re Purchases from Mitsubishi Entities

---

[12] To the extent defendants also seek dismissal of plaintiff's state claims in addition to the Sherman **[**67]** Act claim, the court declines to reach this issue based on nothing more than defendants' cursory footnote (citing two out-of-circuit district cases) suggesting that plaintiff's state law claims are subject to the same FTAIA analysis as is undertaken here.

Defendants also move for summary adjudication of all plaintiff's claims, to the extent based on purchases from the former defendant Mitsubishi entities [13] worth $ 420 million. Defendants note that any recovery premised on these purchases first requires proof that Mitsubishi is liable for participating in an anticompetitive conspiracy -- something that plaintiff cannot demonstrate. See *Bhan v. NME Hosps., Inc., 929 F.2d 1404, 1410 (9th Cir. 1991)*(to prove *section 1* violation, plaintiff must prove the existence of a contract, combination, or conspiracy, among other elements). Specifically, defendants challenge plaintiff's ability to prove either (1) that Mitsubishi itself is guilty of any anticompetitive activity; or (2) that the remaining defendants' **[*1191]** unlawful conspiratorial conduct should otherwise be imputed to Mitsubishi. Not only does this justify summary judgment **[**68]** with respect to plaintiffs federal and state antitrust claims, but defendants also argue that plaintiff's inability to recover from the remaining defendants those overcharges it paid to Mitsubishi, justifies summary judgment with respect to plaintiff's UCL claim as well.

Plaintiff, naturally, resists, responding that not only is there direct evidence of a conspiracy to fix prices by several of the other defendants in the case, but that the circumstantial proof overwhelmingly establishes that it is more likely than not that Mitsubishi participated in the price-fixing conspiracy. Thus, the federal and state antitrust claims must be allowed to proceed. As for plaintiff's UCL claim, plaintiff contends that principles of joint and several liability apply, and save the claim.

Preliminarily, an overview of plaintiff's allegations against defendants **[**69]** -- and Mitsubishi specifically -- is appropriate. Plaintiff's consolidated complaint alleges that the defendant Mitsubishi entities, along with the other co-defendants in this case, participated in a conspiracy to unreasonably restrain trade, in violation of *section 1* of the Sherman Act. See ACC, P 80. Plaintiff also alleges that the conspiracy specifically "consisted of a continuing agreement, understanding and concert of action among defendants and their coconspirators, the substantial terms of which were to fix, raise maintain and stabilize the prices of, and/or allocate the market for, DRAM sold throughout the world, including the United States." See id. at P 82. As part of the conspiracy, plaintiff contends that defendants participated in meetings and conversations to discuss the price of DRAM; agreed to manipulate prices and supply so as to boost sagging DRAM sales; issued price announcements and price quotations in accordance with the agreements reached by defendants; and sold DRAM to customers throughout the world, including the United States, at non-competitive prices. See id. at P 83.

Turning to the parties' arguments, the court resolves them via consideration of the following: **[**70]** (1) an overview of the legal standards applicable to antitrust conspiracy challenges on summary judgment; (2) the evidence of Mitsubishi's liability for the alleged anticompetitive conduct; and (3) whether, under California's UCL, plaintiff may legally seek recovery against defendants on the basis of DRAM purchases made from Mitsubishi. [14]

1. Relevant Section 1 Legal Standards

HN13[] In order to establish a *section 1* violation, **[**71]** plaintiff must prove three elements: the existence of an agreement or conspiracy among two or more separate entities; that unreasonably restrains trade; and which affects commerce. See, e.g., *American Ad Mgmt., Inc. v. GTE Corp., 92 F.3d 781, 788 (9th Cir. 1996)*. Plaintiff alleges that Mitsubishi participated in a horizontal price-fixing conspiracy by entering into an agreement with the other defendants to fix the prices and supply for DRAM. It is well established that **[*1192]** such an agreement, if proven, is per se unreasonable. See, e.g., *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed.*

[13] There were originally three defendant Mitsubishi entities named as defendants in the present action: Mitsubishi Electric Corporation, Mitsubishi Electric and Electronics USA, Inc., and Mitsubishi Electric Europe B.V. All, however, were dismissed from the action with prejudice on November 21, 2008, pursuant to a stipulation entered by the parties.

[14] Defendants also make the argument that, to the extent plaintiff's evidence of Mitsubishi's participation in the conspiracy relies on conduct committed at a time that plaintiff's experts finds no damages to plaintiff, defendants cannot be liable. This is similar to the argument made by the direct purchaser defendants on summary judgment, which the court rejected. For similar reasons, the court also rejects the argument here. In sum, there is no support for the principle that particular activities of a conspiracy can be excluded from consideration simply because they do not lead to actual damages. Rather, the question in regards to the conspiracy is simply whether plaintiff suffered some damage flowing from the unlawful conspiracy throughout the overall conspiracy period.

1129 (1940); see also In re Flat Glass Antitrust Litig., 385 F. 3d 350 (3d Cir. 2004). As noted, the only issue argued by defendants on this motion is the existence of an actual agreement or conspiracy to restrain trade, that includes Mitsubishi.

HN14[] With respect to the requirement that plaintiff establish a "contract, combination, or conspiracy" -- also referred to as "concerted action" -- the legal standards are well-established. All that is required for proof of concerted action is that the alleged parties share a "commitment to a common scheme that has an anticompetitive objective or effect." See, e.g., Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984); **[**72]** United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960). The parties' motives need not be identical. Id.

HN15[] One way of proving concerted action is by express agreement. However, a formal contract is not *necessary* to establish collective action. See, e.g., United States v. Gen. Motors Corp., 384 U.S. 127, 142-43, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966). Rather, conspiracies can be shown either by direct *or* circumstantial evidence. Indeed, courts recognize that only "rarely will there be direct evidence of an express agreement" in conspiracy cases. Local Union No. 189, Amalgamated Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 720, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965). Circumstantial evidence as to this element of the offense is, therefor, not only admissible, but often dispositive. The Ninth Circuit has long recognized that "it is not necessary for a plaintiff to show an explicit agreement among defendants in support of a Sherman Act conspiracy," and that concerted action may be inferred "from circumstantial evidence of [a] defendant's conduct and course of dealings." See, e.g., Movie 1 & 2, 909 F.2d 1245, 1251-52 (9th Cir. 1990). Here, neither party disputes that plaintiff seeks to prove Mitsubishi's conspiratorial activity only through circumstantial **[**73]** evidence.

As noted, with respect to proof of conspiracy by circumstantial evidence, the Supreme Court has expressly considered this issue in the summary judgment motion context, specifically in the landmark antitrust case, Matsushita Electric Indus. Co., 475 U.S. 574. There, the court noted that **HN16**[] "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a [section 1] case.... [C]onduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy ... To survive a motion for summary judgment or for a directed verdict, a plaintiff seeking damages for a violation of [section] 1 must present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently [A plaintiff], in other words, must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed [it]." See 475 U.S. at 588.

The Matsushita court identified two separate inquiries that are relevant to the above issue on summary judgment motions: (1) whether the defendant had "any rational motive" to join the **[**74]** alleged conspiracy, and (2) whether the defendant's conduct "was consistent with the defendant's independent interest." See Matsushita, 475 U.S. at 587. The court stated that, "if [the defendants] had no rational motive to conspire, and if [their] conduct is consistent with other, equally plausible explanations, the conduct **[*1193]** does not give rise to an inference of conspiracy." Id. at 596-97.

The Ninth Circuit, once again, has framed this issue in terms of burdens of proof. It has outlined **HN17**[] a two-part test to be applied "whenever a plaintiff rests its case entirely on circumstantial evidence. First, the defendant can 'rebut an allegation of conspiracy by showing a plausible and justifiable reason for its conduct that is consistent with proper business practice." Second, the burden then "shifts back to the plaintiff to provide specific evidence tending to show that the defendant was not engaging in permissible competitive behavior." See, e.g., In re Citric Acid Litig., 191 F.3d 1090, 1094 (9th Cir. 1999).

The above standards apply as follows here: if defendants come forward with evidence supporting a lack of any agreement or conspiracy to commit unlawful activity by Mitsubishi, they shift **[**75]** the burden to plaintiff to introduce sufficient evidence to warrant the inference of conspiratorial conduct on Mitsubishi's part. With respect to circumstantial evidence, however, the court must consider such evidence in light of the above two-part burden-shifting test espoused by the Ninth Circuit pursuant to Matsushita -- i.e., if defendants are able to show a plausible and justifiable reason for Mitsubishi's conduct that is consistent with competitive behavior, plaintiff must then provide specific evidence that tends to exclude the possibility of competitive behavior.

2. Evidence of Mitsubishi's Conspiratorial Conduct

As a general preliminary matter, the court finds that defendants' showing is sufficient to shift the burden to plaintiff to introduce evidence that warrants the inference of conspiratorial conduct on Mitsubishi's part. Defendants have pointed, for example, to several of the purported pricing communications in evidence, and noted that many on their face suggest that Mitsubishi did not provide pricing information to any of the defendants; rather, the defendants' OEM customers provided Mitsubishi pricing information -- which is perfectly legal. See, e.g., Declaration of **[**76]** Timothy Martin ISO MSJ re Mitsubishi Purchases ("Martin Decl."), Exs. 27, 39, 44. Similarly, defendants note that plaintiff relies on several emails from DRAM suppliers that allegedly include Mitsubishi pricing information, but that the emails never actually state whether Mitsubishi was the source for any pricing information. See Martin Decl. at Exs. 17-21, 26, 30-33. Plaintiff also relies on emails that suggest the possibility of past or future exchanges without any indication of when, or whether the past or future exchanges actually occurred. See id. at Exs. 16, 25. This, say defendants, cannot demonstrate Mitsubishi's participation in any actual conspiracy. Finally, defendants also comment that the numerous instances of communications about generic market conditions in the DRAM industry -- i.e., the general "shop talk" about the industry -- also fail to indicate any conspiratorial conduct. Id. at Ex. 47; Ex. 49 at 44, 69. See *In re Citric Acid Antitrust Litig., 191 F.3d 1090, 1094 (9th Cir. 1999)*(general shop talk not actionable as conspiratorial conduct).

HN18[] Having thus demonstrated that the evidence tends to support an inference of non-conspiratorial conduct, plaintiff must now, in **[**77]** order to defeat summary judgment, come forward with evidence that shows that Mitsubishi was *not* engaging in permissible competitive behavior. See *In re Citric Acid, 191 F.3d at 1094*. In other words, plaintiff must introduce evidence that tends to overcome defendants' plausible explanation and *exclude* the possibility of independent conduct by Mitsubishi, such that an inference of collusion is reasonable. **[*1194]** See *id. at 1096*. Generally, the evidence plaintiff relies on falls into two broad categories of evidence: the factual evidence, and the economic evidence.

Unfortunately for plaintiff, however, this evidentiary showing fails before it even begins. For as defendants correctly note, plaintiff's showing suffers from a fundamental flaw: its inability to distinguish between any of the Mitsubishi entities. Despite having sued three different Mitsubishi entities, for example, plaintiff fails to credit any of the evidence disclosing purportedly anticompetitive communications, actions, or activity by those entities, to any particular entity. This omission is significant. As the court pointed out with respect to the Nanya defendant entities' summary judgment motions in the related In re DRAM litigation **[**78]** (and elsewhere herein), it is generally true that a corporate entity's actions cannot be imputed to another corporate entity. Thus, although plaintiff presents circumstantial evidence that may very well suggest conspiratorial activity on the Mitsubishi entities' part, without knowing which to which entity the evidence refers, the court cannot fully evaluate the strength of the evidence as to any particular entity. See, e.g., Declaration of David Cross re Mitsubishi MSJ Opp. ("Cross Mitsubishi Opp. Decl."), Ex. 8 at 73-74; Ex. 13 (communications between and among employees of admitted co-conspirators indicating these defendants had direct communications with Mitsubishi employees about market share and other "competitive inputs."); Ex. 9 at 138-42 (high level employee testimony of meetings with Mitsubishi representatives and other DRAM defendants to discuss general market conditions); Ex. 11 (NEC employee email reporting discussion with Infineon contact, noting that Infineon contact "knows production figures" for Mitsubishi); Ex. 12 (Hynix employee's internal email discussion rumored meeting at which Mitsubishi and other defendants "probably discussed product cut back or something related **[**79]** issues"). Nor, more specifically, can plaintiff raise a disputed issue of fact as to any specific Mitsubishi entity's participation in any allegedly anticompetitive conspiracy.

It should be noted, furthermore, that plaintiff had ample opportunity, through discovery, to legally distinguish each Mitsubishi entity from the other and develop a full record of conduct pertaining to each. Having had this rather obvious opportunity but having failed to avail itself of it, the court can only suppose that plaintiff made a strategic and voluntary decision to blur the corporate lines between the entities -- possibly in the hopes that an undifferentiated showing of purportedly actionable conduct might serve to create a picture of culpability greater than the sum of each entity's individual part in the matter.

Whatever the reason, however, the court ultimately concludes that plaintiff cannot meet its burden to defeat summary judgment, since it cannot preliminarily tell the court which entity is responsible for which communication or act. Accordingly, the court hereby GRANTS defendants' motion for summary judgment on the grounds presented herein. In view of this holding, it is unnecessary for the court **[**80]** to consider defendants' arguments with respect to plaintiff's UCL claim.

E. Defendants' Omnibus Motion for Summary Judgment

HN19[] Litigation of a successful antitrust claim requires more than proof of a defendant's antitrust violation. It requires, among other things, that a plaintiff prove what is known as 'injury in fact' -- i.e., the fact of harm to plaintiff, caused by the defendant's conduct. See, e.g., *Northwest Publ'ns, Inc. v. Crumb, 752 F.2d 473, 476 (9th Cir. 1985)*("[c]ausal antitrust injury is an essential element of any remedy under **[*1195]** the Sherman Act"). To demonstrate injury in fact, it is "generally sufficient to show with reasonable probability some causal connection between the antitrust violation and [plaintiff's alleged injury]." *Northwest Publ'ns, 752 F.2d at 476*. Significantly, however, in establishing the fact of injury, the antitrust violation need not be the sole cause of the injury, though it must be a material and a substantial cause of the injury. See *Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*("It is enough that the illegality is shown to be a material cause of the injury; a plaintiff need not exhaust all possible alternative sources of injury **[**81]** in fulfilling his burden of proving compensable injury under *§ 4*"); *Glen Holly Entm't v. Tektronix Inc., 343 F.3d 1000 (9th Cir. 2003)*(plaintiff, who was driven out of the market as a result of defendants' anticompetitive behavior, sufficiently alleged antitrust injury in fact). Where, as here, an antitrust plaintiff alleges a price-fixing conspiracy claim, proof of causal injury therefore requires a showing that plaintiff paid higher prices than it would have paid absent the conspiracy, and that defendants' allegedly anticompetitive conduct was a material cause of plaintiff's higher payments.

It is plaintiff's ability to make this showing that defendants challenge. Generally, plaintiff's causation theory is that certain defendants' admittedly unlawful conduct in fixing DRAM prices with respect to six individual OEMs ("Target OEMs") was not only limited to the Target OEMs, but also targeted plaintiff and/or resulted in higher DRAM prices on a market-wide basis, thus injuring plaintiff. For proof of this theory, plaintiff relies on the guilty pleas entered by several co-defendants in a separate criminal DRAM price-fixing case, [15] the expert testimonies of Drs. Marshall and White, and **[**82]** the factual evidence in the record. Defendants do not dispute the viability of plaintiff's causation theory per se, but contend that plaintiff's causation showing falls short of creating a genuine issue of material fact as to whether defendants' alleged conduct actually resulted in the sale of artificially inflated DRAM to plaintiff. Specifically, defendants argue: that neither the pleas nor the factual evidence establishes either that plaintiff was a target of any unlawful price-fixing conspiracy carried out by the defendants during the relevant time frame alleged, or that the conspiracy had market-wide effects; that plaintiff fails to introduce any evidence of an output restraint, the fixing of benchmark prices, or any other mechanism by which defendants' alleged conduct vis-a-vis the Target OEMs could affect market-wide prices; and that, to the extent plaintiff relies on expert testimony to establish causation, that testimony impermissibly substitutes opinion for facts, since it eschews factual analysis of the relationship between defendants' conduct and higher prices market-wide, in favor of unsupported assumptions and observations regarding the DRAM market that only superficially **[**83]** support a finding of impact. Even if plaintiff's causation showing is deemed sufficient, defendants argue that it is nonetheless too remote to allow recovery.

The court's primary mission is relatively straightforward: to determine whether plaintiff has made an adequate showing, for purposes of summary judgment, that defendants' allegedly anticompetitive conduct caused plaintiff to pay artificially high prices for DRAM. Answering this overarching **[*1196]** question, however, depends upon evaluation of what the court views as the parties' core underlying sub-theories and arguments: (1) plaintiff's theory that certain defendants' admitted conspiracy to fix the Target OEMs' DRAM prices also directly targeted and raised prices paid by plaintiff; (2) plaintiff's corresponding theory that the admitted conspiracy to fix the Target OEMs'

---

[15] Specifically, defendants Infineon, Hynix, Samsung and Elpida, as well as certain of their employees, pled guilty to participation in a DRAM price-fixing conspiracy that targeted numerous large original equipment manufacturers. See, e.g., Cross Omnibus Opp. Decl., Exs. 1-19.

DRAM prices had a market-wide impact on all direct customers' DRAM prices, including those paid **[**84]** by plaintiff; and (3) whether plaintiff's causation arguments are nonetheless too remote to defeat summary judgment.

The court addresses each of the foregoing in turn.

1. Evidence that Defendants Directly Targeted Sun

Plaintiff asserts that the factual evidence establishes not only the existence of a price-fixing conspiracy with respect to the Target OEMs, but also that defendants more broadly targeted and raised prices directed at plaintiff. For proof, plaintiff points out among other things: that the guilty pleas of Elpida and one of its high level employees, along with that of a high level Samsung employee, expressly identified Sun as a target of the acknowledged conspiracy to fix Target OEM prices; that Samsung (also an acknowledged co-conspirator vis-a-vis the Target OEMs), identified Sun as "Public Enemy Number 1" in 2001; that Samsung's account manager for Sun testified that between 2000 and 2002, he communicated about pricing and price strategy with Sun account managers for Elpida, Hynix and Infineon (again, all of which also pleaded guilty to price-fixing vis-a-vis the Target OEMs) at least once quarterly; and that certain defendants' account managers openly discussed plans to **[**85]** boycott Sun's dynamic bidding events ("DBE"s) in December 2001, before ultimately coordinating their bids in advance of Sun's DBE. See Declaration of David Cross re Omnibus Opp. ("Cross Omnibus Opp. Decl."), Ex. 1 at PP 2, 4(e); Ex. 16 at PP 2, 4(d); Ex. 18 at PP 2, 4(d); see also Exs. 41, 62, 64, 67-71; Ex. 120 at P 11. Plaintiff also submits evidence that the same sales representatives and managers responsible for Target OEM accounts and pricing, were also responsible for Sun pricing. See id. at Exs. 23, 38, 51-56, 81-83. This evidence, says plaintiff -- which is also cited by the expert testimony -- establishes the likelihood that a reasonable juror would find that defendants' unlawful actions vis-a-vis the Target OEMs targeted as well, and furthermore caused plaintiff to pay higher DRAM prices.

Defendants contest this conclusion, asserting that while this evidence may relate to the presence or absence of a conspiratorial agreement with respect to Sun specifically, it does nothing to actually establish a causal injury -- i.e., it does not actually link defendants' conduct to the actual prices paid by plaintiff. Moreover, defendants note that plaintiff's factual evidence all post-dates **[**86]** June 2001 -- well after the start of the alleged conspiracy periods at issue. Thus, the existence of any impact to plaintiff caused by defendants' allegedly anticompetitive conduct is contradicted by the testimony of plaintiff's own expert, Dr. White, who finds that plaintiff had no damages at all for the vast majority of time beginning June 2001 and ending December 2002, and only limited damages for the small amount of time in which any effect was noted. See, e.g., Supplemental Declaration of Paul Salvaty re Def. Omnibus MSJ ("Salvaty Reply Decl."), Exs. 16-17.

On the whole, the court finds that plaintiff has come forward with sufficient evidence to establish a triable issue of material fact as to whether defendants' allegedly anticompetitive conduct was targeted directly at plaintiff, and caused plaintiff to pay higher prices for DRAM. Defendants **[*1197]** do not dispute, for example, that the guilty pleas in evidence by certain defendants concede both the existence of a conspiracy to fix the price of DRAM with respect to the Target OEMs, and its effectiveness in raising DRAM prices. See, e.g., Cross Omnibus Opp. Decl., Ex. 1 at P 4(d) (admission that Elpida and certain other defendants "reached **[**87]** agreements on price increases and were able to institute price increases on DRAM sales to certain OEMs"). Nor do they dispute, although they seek to lessen the impact of, Elpida's admission that its employees conspired with certain defendants to allocate and divide a bid offered by plaintiff in an auction in March 2002, or that rigged bids were in fact, submitted at plaintiff's auction. See id. at P 4(e). Thus there is at least some evidence of a conspiracy by certain defendants to target the price that Sun was to pay for DRAM purchased from defendants during the relevant time period. Furthermore, there is no dispute that some of the same sales representatives and managers who pled guilty to conspiring to raise DRAM prices to Target OEM accounts were also responsible for Sun pricing, and that certain defendants' employees exchanged pricing information relating to DRAM sold to Sun, including the markup over cost amounts. See, e.g., id., Ex. 20 at 83-84; Ex. 38 at 52-54. Nor is there a dispute that Dr. White found that Sun suffered at least *some* overcharges during the alleged conspiracy period. See Salvaty Reply Decl., Exs. 16-17. This evidence, combined with Dr. Marshall's testimony **[**88]** comparing and correlating the relationship between Target OEM prices and plaintiff prices (including Sun), creates a plausible inference that defendants' conduct directly targeted Sun in addition to conspiring against the Target OEMs, and was a material cause of higher DRAM prices paid by Sun. See Cross Omnibus Opp. Decl, Ex. 24 at 2-6.

To be sure, defendants appropriately emphasized that vagaries and ambiguity exist with respect to plaintiff's evidence, as much of the factual evidence is based on correspondence and deposition testimony that falls short of establishing a firm direct link between defendants' conduct vis-a-vis plaintiff, and higher DRAM prices actually paid by Sun as a result of a particular type of conduct. Defendants also correctly invoke the truism that correlation is not causation, fidelity to which limits the extent to which Dr. Marshall's correlation analysis may, standing alone, satisfy plaintiff's burden. However, to the extent defendants contend that plaintiff's evidence of communications between the parties goes only to the existence of a conspiracy and not to causation, defendants are mistaken. It is true enough that the evidence may come in as part of plaintiff's **[**89]** attempt to prove a conspiracy. Defendants have presented neither persuasive reasoning nor authority, however, as to why this same evidence may not also be submitted to prove that any underlying conspiracy also had an effect on plaintiff.

Moreover, it must be remembered that causation may be demonstrated with circumstantial evidence just as easily as with direct evidence. See *Zenith, 395 U.S. at 125* (fact of injury may also be established by inference or circumstantial evidence); *William Inglis & Sons Baking Co. v. ITT Cont'l Baking Co., 668 F.2d 1014, 1051 (9th Cir. 1981)*. To that end, the court concludes plaintiff has introduced sufficient evidence, albeit of a circumstantial nature, that would allow a reasonable juror to conclude that defendants' allegedly anticompetitive conduct, if proven, resulted in the payment of higher DRAM prices by plaintiff. The issue and the evidence must therefore be presented to the trier of fact.

[*1198] 2. Evidence that Defendants' Conduct led to Market-wide Price Increases

In addition to arguing that defendants caused plaintiff to pay higher DRAM prices by directly targeting it as part of defendants' acknowledged conspiracy to fix DRAM prices to Target OEMs, **[**90]** plaintiff also argues that defendants caused plaintiff to pay higher DRAM prices because the Target OEM conspiracy had a market-wide impact on all DRAM purchasers' prices. The foundation for plaintiff's causation arguments is rooted in the expert testimony of plaintiff's causation expert Dr. Marshall, and to a lesser extent, Dr. White, plaintiff's primary damages expert. As a corollary argument, plaintiff notes, however, that the factual evidence also supports Drs. Marshall and White's expert testimony.

The bulk of defendants' motion challenges this expert testimony. Defendants assert that, in order for plaintiff to create a genuine issue of material fact that would allow a jury to determine that defendants' conduct increased DRAM prices on a market-wide basis between August 1998 and June 2002, plaintiff must establish either that defendants restrained DRAM production and output, or that defendants fixed benchmark prices for DRAM. Defendants point out, however, that neither Dr. Marshall's nor Dr. White's testimony analyzes, let alone opines on, the existence of any DRAM output restraints or any agreement to fix benchmark prices for DRAM. Furthermore, their testimony -- which defendants **[**91]** claim improperly rests on the guilty pleas instead of any analysis of the factual evidence -- is based on broader assumptions than what the evidence can support, and relies on correlation analysis as an improper substitute for actual causation.

Before turning to the sufficiency of plaintiff's evidence, however, the court notes that the parties preliminarily dispute the appropriate legal standard that governs plaintiff's causation showing. Specifically, defendants contend that plaintiff's proof of an industry-wide price impact is legally dependent upon proof of the mechanism through which industry-wide prices can be affected -- i.e., evidence of a supply restraint, or evidence that defendants fixed benchmark prices for DRAM. Plaintiff, while not disagreeing that it must link defendants' conduct with an industry-wide impact on DRAM prices, contends that defendants are nonetheless wrong in arguing that the precise mechanism through which such industry-wide impact can be shown is a legal requirement. Thus, while neither party effectively disputes that it is plaintiff's burden to demonstrate that defendants' price-fixing conspiracy actually caused plaintiff to pay higher prices, they do **[**92]** dispute the level of particularity that plaintiff must meet in demonstrating that a causal link is present between defendants' conduct and higher industry-wide DRAM prices paid by plaintiff.

For support of the proposition that plaintiff is legally required to establish a DRAM output reduction or the fixing of benchmark prices, defendants rely on *Gen. Leaseways, Inc. v. Nat'l Truck Leasing Ass'n, 744 F.2d 588 (7th Cir.*

1984), and Nat'l Collegiate Athletic Ass'n v. Bd. of Regents, 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984). None of these cases, however, stands for the proposition that plaintiff must, as part of its legal burden, prove an output restriction or a conspiracy to fix benchmark prices as a necessary prerequisite for demonstrating that defendants' alleged conspiracy had the market-wide effect of raising DRAM prices. Indeed, one of the cases -- Nat'l Collegiate Athletic Ass'n -- suggests the opposite, as it expressly notes in dicta that: "Restrictions on price and output are the paradigmatic *examples* of restraints of trade that the Sherman Act was intended to prohibit." *National Collegiate Athletic Ass'n v.* ***[*1199]*** *Board of Regents of University of Oklahoma, 468 U.S. 85, 107, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*(emphasis added).

This is not **[**93]** to say that defendants' arguments miss the mark entirely. For, as their cited cases do show, it is the norm that a price-fixing conspiracy with industry-wide impact would be expected to employ output reductions or benchmark price manipulation as a means for carrying out the overarching conspiracy. This reflects economic truisms, however -- the proof of which may or may not help plaintiff establish causation in this case -- as opposed to legal requirements. Thus, plaintiff's burden in demonstrating causation continues to be limited to the burden thus far defined by the courts: that of establishing, "with reasonable probability some causal connection between the antitrust violation and [plaintiff's alleged injury]." *Northwest Publ'ns, 752 F.2d at 476*. This is so, even though plaintiff has attempted, as discussed below, to establish defendants' output reduction and/or fixing of benchmark prices at any rate.

The court now turns to the parties' substantive arguments regarding plaintiff's showing. As noted, plaintiff's causation showing rests primarily on the expert testimonies of Drs. Marshall and White, as well as certain factual evidence in the record. A brief summary of both the expert **[**94]** testimony and the evidence is therefore in order, prior to evaluation of both.

Dr. Marshall. Dr. Marshall was asked to assume that the defendants engaged in a conspiracy to fix the price of DRAM sold to the Target OEMs, and then to undertake an economic analysis to determine whether the defendants' conspiracy had an effect on the prices of DRAM sold to the plaintiffs. See Declaration of Paul B. Salvaty Re Omnibus MSJ ("Salvaty Omnibus Decl."), Ex. 25 at P 12. After reviewing numerous documents and deposition testimony produced in the case, Dr. Marshall opined that the prices paid by the Target OEMs and the plaintiffs moved closely together before, during, and after the defendants' admitted conspiracy, and that four characteristics of the DRAM industry led the Target OEMs' prices, other purchasers' prices, and market-wide prices to move together. See id. at PP 31-32. Those four characteristics are: (a) the standardized nature of DRAM products, (b) the existence of well-established sales channels outside of the defendants' contractual relationships with the Target OEMs (i.e., the spot market for DRAM), (c) the transparency of DRAM prices in the industry (as seen in the multiple public **[**95]** pricing reports frequently published during the relevant time period), and (d) the presence of most favored customer (MFC) clauses that prevented defendants from offering lower DRAM prices to any non-Target OEMs.

Dr. Marshall further opines that the close relationship between the Target OEMs' prices, market-wide prices, and plaintiff's prices is suggested and confirmed by: the evidence of pricing communications amongst the defendants demonstrating the participants' understanding that the Target OEM prices, other firms' prices, and market-wide prices moved together; visual inspection of the prices paid by the Target OEMs and plaintiff (i.e., on a graph); and standard regression analyses which tested the relationship between prices paid by the Target OEMs and prices paid by plaintiff. See id. at PP 33-35; see also generally Cross Omnibus Opp. Decl., Ex. 24. Dr. Marshall also opines that, given the foregoing DRAM industry characteristics as a whole, it would have been contrary to defendants' economic incentives to prevent the admitted price increases to the Target OEMs from affecting the plaintiff (else, the Target OEMs could have simply bought cheaper DRAM through the same mechanisms **[**96]** used by **[*1200]** plaintiff to purchase DRAM). Id. at PP 36-37. Based on all this, Dr. Marshall concludes that the defendants' conspiracy affirmatively affected the price of DRAM sold to plaintiff. Id.

Dr. White. Dr. White was asked to assume that the defendants engaged in a conspiracy to fix the price of DRAM sold to the Target OEMs, and then to undertake an economic analysis to determine the extent to which plaintiffs were overcharged as a result of defendants' conspiracy during two time periods -- the period April 1, 1999 through

June 15, 2002 (the "plea period") and the period August 1, 1998 through June 15, 2002 (the "conspiracy period") [16]. See Salvaty Omnibus Decl., Ex. 2 at P 2. Generally, an overcharge corresponds to the difference between the price purchasers actually paid during a conspiracy period, and the prices they would have paid but for the existence of the conspiracy (i.e., the "but for" prices). Thus, to determine the extent of the plaintiff overcharges here, Dr. White estimated plaintiff's but for prices during the relevant conduct period, and then calculated the plaintiff's damages using the difference between the actual prices paid by plaintiff, and the but for prices that **[**97]** plaintiff would have paid. See id. at P 16.

To estimate plaintiff's but for prices, Dr. White performed regression analysis. He used the before and after approach, described as follows. Dr. White analyzed the statistical relationship between actual DRAM prices on the one hand, and real supply/demand and market factors on the other hand that were present in the DRAM industry. Id. at P 17. The statistical data were taken from two benchmark periods before and after the conspiracy period. Dr. White then used the statistical relationship between DRAM price and relevant market factors to estimate what the but for **[**98]** prices would have been during the conspiracy period, had DRAM pricing and relevant market factors followed the same relationship during the conspiracy period that they had in the benchmark periods. Id. By accounting for the relevant market factors during the alleged conspiracy period, Dr. White opines that any difference between the actual prices during the conspiracy period and the but for prices for the conspiracy period can be directly attributed to the effects of defendants' conduct. Id.

Specifically, this before and after approach can be broken down into "three stages." Salvaty Omnibus Decl., Ex. 2 at P 19. First, Dr. White had to determine the impact of the defendants' admitted conspiracy on the prices paid for DRAM chips and modules by the Target OEMs. Id. at P 20. To do so, Dr. White used regression analysis to obtain a prediction equation -- based on data from the outside benchmark periods only -- for the Target OEMs' but for prices during the conspiracy period. The prediction equation allowed Dr. White to arrive at a price index of the Target OEMs' but for prices. Id. In the second stage of his analysis, Dr. White estimated the statistical relationship between the DRAM prices **[**99]** actually paid by the plaintiff, and the DRAM prices actually paid by the Target OEMs. Id. at P 33. He then used regression analysis to create a price index for the plaintiff that relates the plaintiff's DRAM prices in each month **[*1201]** to the Target OEMs' DRAM prices in the same and nearby months. Id. Finally, in the third stage, Dr. White applied the estimated statistical relationship between the Target OEMs' prices and plaintiff's prices (from stage 2) to the Target OEMs' but for price index (from stage 1), in order to obtain plaintiff-specific but for price indexes. See Salvaty Omnibus Decl., Ex. 2 at P 34. The resulting difference between the plaintiff's specific but for price, and the actual price paid by plaintiff during the conspiracy period, is the amount of the overcharge caused by defendants' anticompetitive activity (i.e., plaintiff's damage amount). Id. at P 35.

For Sun, the results of Dr. White's analysis indicate that Sun's total weighted average overcharge percentage during the conspiracy period was 50%. Id. at P 39. This weighted average percentage takes into account the fact that Sun's purchases from the defendants were relatively larger during the months with the highest **[**100]** overcharges. Id. Sun's simple non-weighted average overcharge percentage during the conspiracy period was 31%. Id.

As noted at the outset, defendants attack this expert testimony on three fronts, arguing (1) that neither expert analyzes or even opines whether defendants actually restrained output during the conspiracy period on a market-wide basis; (2) that neither expert analyzes or opines whether defendants fixed benchmark prices so as to affect price on a market-wide basis; and (3) that Dr. Marshall bases his testimony on unfounded assumptions, fails to establish that the market characteristics he identifies actually functioned the way he claims, and that even if Dr. Marshall's theory is credited, it only explains that there is a relationship between the Target OEMs' DRAM prices and plaintiff's DRAM prices -- not that defendants' conduct actually caused an increase in plaintiff's DRAM prices.

---

[16] The primary difference between Dr. Marshall's testimony and Dr. White's testimony is that, while Dr. Marshall was asked to determine *whether* defendants' unlawful conduct had an effect on plaintiff's purchase of DRAM (i.e., caused an injury to plaintiff), Dr. White was asked to determine the actual *extent* of that effect (i.e., the amount of damage). Thus, Dr. Marshall's testimony goes purely to the causation issue, while Dr. White's testimony is primarily directed at the damages issue, but is nonetheless relevant to causation to the extent it necessarily proves the fact of injury.

See, e.g., Def. Omnibus MSJ Br. at 13:22-23; 14:9-18 (conspiracy to reduce output necessary to raise market-wide prices); id. at 17:8-15; 17:21-23 (alternatively, plaintiff's injury depends on existence of successful conspiracy to raise benchmark prices). For the following reasons, however, **[**101]** the court finds that these arguments fall short of demonstrating plaintiff's inability to establish a genuine dispute of material fact as to causation.

As to defendants' first argument, the court has already noted that plaintiff is not legally required to prove defendants' participation in a supply reduction as an element of causation. As such, and as plaintiff points out, plaintiff's experts cannot be faulted for failing to demonstrate that a supply reduction was the actual mechanism by which industry-wide prices were raised (provided, however, that the experts demonstrate that defendants' conduct was a material cause of plaintiff's injury). Notwithstanding this observation, however, the court finds that plaintiff has, in fact, introduced evidence in support of a supply reduction. Dr. Marshall, for example, does actually opine that, based on his review of the documents and deposition testimony in the case, "defendants engaged in a variety of supply restrictions." See Salvaty Omnibus Decl., Ex. 25 at PP 123-24. Such supply restrictions "include temporary reductions in production and the withholding of inventory from customers." Id. In support thereof, Dr. Marshall relies on several **[**102]** email communications among the various defendants purportedly indicating defendants' decisions to reduce output. See id. at fn. 155. Furthermore, plaintiff also independently points to the factual evidence in the case, asserting that it corroborates the expert testimony. See Cross Omnibus Opp. Decl., Ex. 180 (internal Hynix email); Ex. 176 (handwritten Hynix notes); Ex. 172 (internal Elpida presentation noting that "supply has been reduced"); **[*1202]** Ex. 174 (Micron email acknowledging "current shortage" due primarily to "capacity utilization in the industry"); Ex. 50 (De Dios testimony noting there are "numerous different ways of adjusting supply to influence price").

Defendants respond to plaintiff's showing by pointing out Dr. Marshall's contradictory testimony stating that he did "not have an opinion regarding the existence of an output restraint in the marketplace." See Salvaty Omnibus Decl., Ex. 26 at 200:14-16. They also look to the factual evidence for support, arguing that no supply reduction took place because the defendants expanded output and were operating at 100% of capacity. See id. at Exs. 42-43 at 147:1-4, Ex. 45 at 138:17-39:5; Ex. 46 at 136:16-18, Ex. 48 at 74:4-5; see also **[**103]** (Samsung plea). Their expert testimony, too, concludes that no supply restriction took place. See, e.g., id., Ex. 12 at 61-62.

These contrasting views and evidence constitute a disputed issue of fact as to the presence of a supply restriction in the DRAM market carried out by defendants during the alleged time frame. Although defendants take issue with the nature of the documentary evidence cited by Dr. Marshall in his report and point out Dr. Marshall's failure to consider all "other evidence" supporting the lack of a supply restriction in the DRAM marketplace (e.g., actual production data or production decisions), see Def. Omnibus MSJ Br. at 14, n. 13, these are challenges that must ultimately be decided by the trier of fact. Notably, defendants have not argued any manifest failure in Dr. Marshall's methodology, or otherwise attacked the admissibility of his opinion.

A similar analysis also applies to defendants' second argument -- i.e., that the expert testimony fails to establish causation because it does not opine whether defendants fixed benchmark prices so as to affect a market-wide price increase that injured plaintiff. As a preliminary matter, the court again notes that plaintiff **[**104]** is not, in the first instance, necessarily required to prove the existence of defendants' efforts to fix benchmark prices as a legal element of their claim. However, as is the case with the supply restriction argument, plaintiff nonetheless targets as much. Specifically, Dr. Marshall opines that defendants were able to institute industry-wide price increases by conspiring to raise "spot prices" as a precursor to contract prices, and that combined with the observable characteristics of the DRAM industry (e.g., standardized nature of DRAM, price transparency, well-established sales channels, and the use of most favored customer clauses), it would have been difficult for defendants to raise prices to one set of buyers without raising prices industry-wide -- recognition of which in fact led defendants to fix industry-wide prices. See Salvaty Omnibus Decl., Ex. 25 at PP 14-15, 150; id. at P 121 (defendants "discussed market-wide prices" and "recognized that they needed to increase spot market prices in order to increase contract prices, and numerous documents also indicate that the defendants coordinated on spot market pricing"); see also, e.g., id., Ex. 25 at PP 134-165 (discussing characteristics **[**105]** of DRAM industry allowing for spot prices and contract prices to influence industry prices); see also Cross Omnibus Opp. Decl., Ex. 120 at P 6; Ex. 133. Plaintiff also argued in its opposition and at the hearing on the motion that the Target OEM prices themselves constituted a "benchmark" price from which plaintiff's prices were derived, a fact further corroborated by the factual evidence, and Dr. Marshall's analysis correlating plaintiff's prices with Target OEM prices. See, e.g., Cross Omnibus Opp. Decl., Ex. 56 at 169:23-170:1 (Hynix admission that "Apple was a benchmark price for [pricing] information for Sun"); Ex. 24 at 64 n. 129; Ex. **[*1203]** 25 ("Let's make every effort to make Sun price to be in line with the current price for other MNA customers"); Ex. 38 (admitting that a price increase to IBM would also raise the price at Sun); Ex. 80 ("we are raising sync DRAM price per the changes in price to PC OEM customers").

Defendants respond that Dr. Marshall's testimony that defendants "could not raise the named OEMs' prices without also raising spot market prices" is based on pure conjecture, as it is unsupported by any affirmative evidence of that spot market prices were actually fixed. **[**106]** See, e.g., Salvaty Omnibus Decl., Ex. 25 at P 150. Moreover, to the extent that Sun contends that the Target OEM prices were benchmark prices, defendants note that Dr. Marshall himself expressly disavowed this very theory in his reports. Id., Ex. 24 at PP 28, 127. As to his views on the characteristics of the DRAM market, defendants also dispute the conclusions he reaches regarding the effect those characteristics had on industry-wide prices. Salvaty Omnibus Decl., Ex. 25 at P 157, Ex. 26 at 221:5-224:22. Dr. Marshall ignores, for example, the fact that most favored customer clauses only required the matching of lower prices for purchases of "like quantities of substantially comparable products." See Def. Omnibus MSJ Br. at 24:21-25:6. Sun, however, purchased DRAM that was entirely distinct from the DRAM purchased by the Target OEMs, thereby making it impossible for plaintiff to demonstrate any link between the DRAM prices paid by the Target OEMs and those paid by plaintiff. Salvaty Omnibus Decl., Ex. 10 at Ex. 27; Ex. 12 at PP 17-19.

As with the supply reduction issue, the court finds that the parties' contrasting arguments and evidence constitute disputed issues of material fact. **[**107]** Although defendants may raise valid challenges to the nature of the evidence underlying the expert opinions regarding the existence of a conspiracy to fix benchmark prices, the jury must have the final say over the weight to be given each party's showing. For purposes of summary judgment, plaintiff has come forward with sufficient circumstantial and expert evidence to create a triable issue of fact as to whether defendants' conduct affected benchmark prices for DRAM which in turn raised prices industry-wide.

Finally, defendants' third argument -- i.e., that Dr. Marshall's testimony rests on unfounded assumptions and even if credited, only explains that there is a relationship between the Target OEMs' DRAM prices and plaintiff's DRAM prices, not that defendants' conduct actually caused an increase in plaintiff's DRAM prices -- also fails. First, to the extent defendants take issue with the experts' reliance on the conduct admitted by certain defendants in their guilty pleas in 'assuming' the existence of a price-fixing conspiracy aimed at the Target OEMs, rather than independently proving such conduct, the court finds this objection meritless. The guilty pleas are properly in evidence, **[**108]** and the experts are entitled to base their opinions on the facts established therein. To the extent defendants take issue with those facts, they are entitled to dispute them at trial. However, the experts' reliance thereon does not render their testimony objectionable as a matter of law.

Second, defendants' argument fails because, properly read, Dr. Marshall's testimony *does* undertake an explanation for whether and how defendants' price-fixing conspiracy with respect to the Target OEMs could have artificially raised prices on an industry-wide basis. Specifically, Dr. Marshall's testimony opines: that based on a visual understanding of the relationship between DRAM pricing for Target OEMs and plaintiff, and furthermore on the results of regression analyses **[*1204]** that confirm a closely correlated relationship between Target OEM pricing and plaintiff's pricing, and based further on the documents in evidence demonstrating a conspiracy that extended beyond simply the Target OEMs, that DRAM pricing for Target OEMs moved together with plaintiff's DRAM prices; and that, when the nature of the DRAM industry is considered together in conjunction with this closely correlated relationship, it would not **[**109]** have been economically plausible for defendants to restrict their DRAM price-fixing conspiracy to the Target OEMs. Rather, defendants' conspiracy would have affected the entire industry.

This expert testimony warrants presentation to a jury. While defendants correctly note that correlation testimony -- relied on heavily by Dr. Marshall -- does not equal causation, the court is not persuaded that Dr. Marshall's correlation analysis is employed as a catch-all substitute for causation here. For when taken in conjunction with the totality of all the other evidence submitted by plaintiff, Dr. Marshall's causation theory is supported by more than just the correlation analysis. Defendants, of course, are entitled to cast doubt on the quantity and quality of the testimony and evidence at trial. As a matter of law, however, plaintiff's showing as to causation is not so insufficient as to justify a grant of summary judgment. See, e.g., *Hasbrouck v. Texaco, Inc., 842 F.2d 1034, 1042 (9th Cir. 1987)*("If there is sufficient evidence in the record to support an inference of causation, the ultimate conclusion as to what the evidence proves is for the jury"); *Perkins v. Standard Oil, 395 U.S. 642, 648, 89 S. Ct. 1871, 23 L. Ed. 2d 599 (1969)*.

In **[**110]** sum, and although defendants have made a valiant showing to the contrary, the court concludes that plaintiff has come forward with a sufficiently plausible theory -- by way of the expert testimony and the circumstantial evidence -- to create a triable issue of fact as to whether defendants' conduct vis-a-vis plaintiff and/or the Target OEMs could have raised prices to plaintiff directly or through industry-wide effect.

3. Proximate Cause

Finally, defendants contend that, even if the court finds that plaintiff has adequately presented a material issue of fact as to causation, plaintiff's theory of causation (and the proof going to it) should still be considered too remote, as a matter of law. After all, defendants note that courts have generally held that not just causation, but proximate causation, is necessary to state a claim for antitrust damages. See, e.g., *Or. Laborers-Employers Health & Welfare Trust Fund v. Philip Morris, Inc., 185 F.3d 957, 963 (9th Cir. 1999)*. Thus, a direct relationship between the injury and the alleged wrongdoing is required. See, e.g., *Ass'n of Wash. Pub. Hosp. Dists. v. Philip Morris, Inc., 241 F.3d 696, 701 (9th Cir. 2001)*. To that end, the basic problem **[**111]** with plaintiff's theory, say defendants, is that causation here is not based on any price-fixing activity aimed directly at plaintiff but rather is based on the fact that defendants' conspiracy to fix prices to Target OEMs *in turn* caused an increase to plaintiff's prices, which increase was due *in turn* to the market forces affecting prices and the characteristics of the DRAM market. See Def. Omnibus MSJ Br. at 29:18-21. This theory depends on the operation of generic market forces rather than defendants' conduct, and furthermore fails to articulate any chain of causation between defendants' conspiracy and plaintiff's injury vis-a-vis these market features. See id. at 29:22-27.

Plaintiff, in opposition, does not dispute the proximate causation requirement, but states that proximate causation is satisfied **[*1205]** in price-fixing cases by proof that a plaintiff's prices are affected by a conspiracy, regardless whether the defendants' conduct is directed primarily at a different set of products or customers. This is the case here: plaintiff has demonstrated, through its expert testimony and the evidence, that defendants intentionally communicated with each other in order to artificially inflate **[**112]** plaintiff's prices, kept plaintiff's prices in line with Target OEM prices, and used Target OEM prices either to negotiate higher prices with plaintiff when Target OEM prices increased, or to resist plaintiff's attempts to secure lower prices. Moreover, plaintiff's note that there is nothing in Dr. Marshall's testimony or analysis that suggests that plaintiff's injuries were derivative of the Target OEMs' injuries, or even that plaintiff's pricing was entirely dependent on the pricing decisions for the Target OEMs. Furthermore, plaintiff has submitted evidence demonstrating that it *has* been individually targeted.

Plaintiff has the better argument here. Preliminarily, it is true that proximate causation is required for plaintiff's state antitrust claim under the Cartwright Act (even if not explicitly required as such for plaintiff's Sherman Act claim). Even if proximate causation must be shown, however, plaintiff's causation theory satisfies this standard. Dr. Marshall does not opine, as defendants suggest, that plaintiff's increased price was caused by the Target OEMs' increased price and generic market forces. Rather, Dr. Marshall's testimony is (as noted above) that defendants' conspiracy **[**113]** to raise prices to the Target OEMs actually reached farther than the Target OEMs and encompassed plaintiff, and that proof of the conspiracy's effect on plaintiff is corroborated by the relationship between Target OEM pricing and plaintiff's DRAM pricing over time, as well as the presence of certain factors in the DRAM industry that would have made it economically implausible for the defendants to limit their price-fixing conspiracy solely to the Target OEMs. While the distinction between defendants' characterization of Dr. Marshall's testimony and Dr. Marshall's actual testimony is a subtle one, this does not make it insignificant. It is the difference between a theory that hinges plaintiff's pricing primarily on factors outside defendants' control, and a theory that properly hinges plaintiff's pricing on defendants' actual conduct. Thus, the court views plaintiff's causation theory as one that presents a sufficiently direct causal link between defendants' conduct and plaintiff's injury to pass the proximate cause hurdle.

Furthermore, to the extent that defendants make the passing argument that plaintiff's causation theory is really an impermissible umbrella theory in disguise, the **[**114]** court rejects this contention. The umbrella theory of liability is essentially a "consequential damages theory." See *In re Petroleum Prods. Antitrust Litig., 691 F.2d 1335, 1339 (9th Cir. 1982)*. This theory is implicated when a plaintiff seeks recovery from price-fixing defendants, on the basis of purchases that the plaintiff made from *non-conspiring competitors* of the defendants. In essence, the plaintiff pursuing this theory contends that defendants' successful price-fixing conspiracy created a "price umbrella" under which non-conspiring competitors of defendants raise their prices to a level at or near the fixed price set by the conspiring defendants. A successful umbrella liability theory thus seeks to hold price-fixers liable for harm allegedly flowing from their illegal conduct even though the price-fixing defendants received none of the illegal gains and were uninvolved in their competitors' pricing decisions. See id.

Many courts, including the Ninth Circuit, have rejected umbrella liability theories. Indeed, in In re Petroleum Prods. **[*1206]** Antitrust Litig, the Ninth Circuit held that it had "little hesitance in concluding that the limitations recognized in Illinois Brick bar umbrella **[**115]** claims in the context of the multi-tiered distribution chain alleged" in the case. *Id. at 1340*. The court explicitly reserved judgment, however, as to whether "in a situation involving a single level of distribution, a single class of direct purchasers from non-conspiring competitors of the defendants can assert claims for damages against price-fixing defendants under an umbrella theory." See *id. at 1340*.

Defendants would now have the court step into the opening created by the Ninth Circuit's refusal to consider the umbrella liability theory in situations involving a single level of distribution and a single class of direct purchasers (as is the scenario here), and conclusively decide its legal impropriety. However, aside from the fact that prudence counsels restraint, there is also the fact that defendants' invitation presupposes that an umbrella theory of liability is, in fact, actually being asserted. Yet, as plaintiff points out, this is not the case. Plaintiff is seeking damages based on purchases made from the allegedly conspiring defendants in this case only -- *not* based on purchases made from any non-conspiring competitors of defendants. While true that several of the defendants **[**116]** named in Sun's lawsuit were not named in the guilty pleas that affirmatively establish the existence of a price-fixing conspiracy as to the Target OEMs, this has no bearing on the instant action. Plaintiff has sued *all* the named defendants here as co-conspirators who *each* participated in an alleged conspiracy to fix DRAM prices, which conspiracy injured plaintiff. It is up to plaintiff to demonstrate that each defendant did, in fact, participate in such a conspiracy. Nonetheless, plaintiff has not moved on this issue, and it must be reserved for trial. Assuming this conspiracy among each and every named defendant, however, no umbrella theory of liability is even implicated.

Finally, the court disposes of defendants' argument that analysis of certain AGC factors also demonstrates that plaintiff's claims are too remote. See *Associated Gen. Contractors v. Cal. State Council of Carpenters, 459 U.S. 519, 534-35, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*("AGC") (establishing multi-factor test for use in determining antitrust standing). While not totally clear, defendants appear to imply that the AGC factors are equivalent to the Ninth Circuit's proximate cause requirement, since they guarantee that an antitrust plaintiff's **[**117]** injuries may not be too remote from defendants' conduct. For reasons already discussed, however, plaintiff raises a material dispute of fact regarding causation and in doing so, also raises a material dispute of fact regarding the directness of plaintiff's injury.

Accordingly, for all the above reasons, the court rejects defendants' arguments that plaintiff's theory of causation fails on remoteness grounds.

* * *

In sum, defendants have failed to persuade the court that summary judgment as to plaintiff's Sherman Act claim is warranted for lack of causation. As such, defendants' summary judgment motion on this ground is DENIED. Since the analysis for injury and causation is similar for plaintiff's Cartwright Act and Unfair Competition Law claims, and in view of the court's conclusions regarding defendants' proximate causation arguments, defendants' motion is also DENIED with respect to these additional claims. In so ruling, the court also denies defendants' alternative motion for summary adjudication as to limited issues encompassed herein.

[*1207] F. Motion to Exclude the Testimony of Dr. Halbert White

HN20[] *FRE 702* governs the admission of expert opinion testimony. It provides that, where "scientific, **[**118]** technical, or other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue," an expert witness may be called upon to testify accordingly. See *Fed. R. Evid. 702*. Pursuant to the Supreme Court's interpretation of the rule, expert testimony must be both relevant and reliable to be admissible. See, e.g., *Daubert v. Merrell Dow Pharm., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*; *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*. Expert opinion testimony is relevant if the knowledge underlying it has a "valid … connection to the pertinent inquiry," and it is reliable if the knowledge underlying it "has a reliable basis in the knowledge and experience of [the relevant] discipline." *Daubert, 509 U.S. at 592*; *Kumho Tire Co., 526 U.S. at 149*. Trial courts must exercise reasonable discretion in evaluating and in determining how to evaluate the relevance and reliability of expert opinion testimony.

Defendants here seek to exclude the testimony of plaintiff's damages expert, Dr. White, claiming that Dr. White's testimony falls short of the relevant standard. They make three arguments in this regard: (1) Dr. White's analysis fails to demonstrate that market conditions **[**119]** were the same in the benchmark and cartel periods; (2) Dr. White improperly excludes from consideration any factors that were under defendants' control (e.g., supply and demand factors, capacity utilization); and (3) Dr. White's methodology is unreliable.

Preliminarily, a brief review of Dr. White's testimony is in order. As noted in connection with defendants' omnibus motion for summary judgment regarding causation, Dr. White is charged by plaintiff with establishing the extent to which all the opt-out plaintiffs were overcharged as a result of defendants' conspiracy. Generally, Dr. White opines that a market-wide conspiracy resulted in overcharges as high as 50% to plaintiffs, between August 1998 and June 2002. To do this, he first assumes the existence of the conspiracy set forth in the plea agreements, with the exception of the conspiracy's start date, which Dr. White assumes was either April 1, 1999 or August 1, 1998. Then he employs a three step process. First, Dr. White measures the impact of the alleged conspiracy on the prices paid for DRAM chips and modules by the Target OEMs. To do so, Dr. White uses regression analysis to obtain a prediction equation (based on DRAM sales **[**120]** and price data during the benchmark periods) for the Target OEMs' but for prices during the conspiracy period. The prediction equation is what allows Dr. White to arrive at a price index of the Target OEMs' but for prices. Second, Dr. White estimates the statistical relationship between the DRAM prices actually paid by the plaintiff, and the DRAM prices actually paid by the Target OEMs. Specifically, he uses regression analysis to create a price index for the plaintiff that relates the plaintiff's DRAM prices in each month to the Target OEMs' DRAM prices in the same and nearby months. Finally, Dr. White applies this estimated statistical relationship between the Target OEMs' prices and plaintiff's prices to the Target OEMs' but for price index (from step 1), in order to obtain plaintiff-specific but for prices.

Defendants first contend that Dr. White's analysis fails to demonstrate that market conditions were the same in the benchmark and cartel periods. Defendants' argument is premised on Ninth Circuit authority, which defendants claim **[*1208]** holds that use of a "before and after" approach to determining damages requires "some showing that the market conditions in the two periods were similar **[**121]** but for the impact of the violation." See, e.g., *Pacific Coast Agricultural Expert Ass'n v. Sunkist Growers, Inc., 526 F.2d 1196 (9th Cir. 1975)*("Plaintiffs' method of measuring damages, known as the 'before and after' theory, may be used only where there has been some showing that the market conditions in the two periods were similar but for the impact of the violation"); see also Areeda & Hovenkamp, ***Antitrust Law*** at 384-85 (requiring that changes in market conditions between the benchmark and conspiracy periods must be "taken into account in estimating the 'but for' prices during the conspiracy period'"). In contravention of this requirement, argue defendants, Dr. White assumes rather than proves that market conditions were comparable during the benchmark and conspiracy periods, despite the fact that Dr. White himself concedes that the DRAM industry was more competitive and less competitive at times. See Declaration of Joshua Stambaugh re Motion to Exclude ("Stambaugh Decl."), Ex. 8 at PP 272-73; Ex. 21 at 78-79.

Generally, defendants have correctly cited Ninth Circuit authority holding that, ***HN21***[] where the before and after approach is undertaken, an expert must account for differences **[**122]** in market conditions when measuring damages across benchmark and conspiracy periods. See *Pacific Coast, 526 F. 2d 1196*. However, plaintiff has also correctly noted that neither the cases relied on by defendants, nor Areeda & Hovenkamp, stated as much in connection with a "reduced form price equation" specifically -- which is what Dr. White employs here through use of his "prediction equation." In a reduced form price equation, price is "expressed as a function of supply and demand variables." And as plaintiff points out, where this type of multiple regression analysis is used, "plaintiff has controlled for changes in demand and supply determinants of price, and the resulting prediction on price during the conspiracy period takes into account influences other than the conspiracy that could serve to increase the … prices." See Areeda & Hovenkamp at 386. Thus, to the extent Dr. White's prediction equation takes supply and demand variables into account as a function of price, it is acceptable.

More importantly, plaintiff correctly points to several examples in which Dr. White's testimony does, in fact, take market conditions between the benchmark and conspiracy periods into account. Dr. **[**123]** White's analysis uses several production indices related to end products for DRAM (e.g., end products reflect production issues), and furthermore includes several variables related to the underlying costs of manufacturing DRAM. See Stambaugh Decl., Ex. 1 at PP 216-17; Ex. 2, Appendix E. In addition, Dr. White undertook a separate study of exogenous factors -- e.g., boom and bust cycles, earthquakes, other production influences -- in his rebuttal report, precisely in order to answer defendants' criticisms on this point. Even after undertaking this alternative analysis, Dr. White found that the alternative analysis verified his own initial results. See id. at Ex. 1 at P 218; Ex. 1 at Appendix G at PP 355-81.

In sum, the law suggests that it is permissible for Dr. White to use a reduced form price equation, which expresses price as a function of supply and demand, in order to control for changes in market conditions. And significantly, Dr. White's initial analysis and the rebuttal analysis both indicate that Dr. White has actually attempted to control for certain changes in market conditions. Thus, to the extent that defendants challenge the accuracy or propriety of these variables, it **[**124]** is an issue **[*1209]** that goes to the weight, rather than the admissibility, of Dr. White's testimony.

Defendants' second argument in support of exclusion centers on Dr. White's purported failure to consider any factors that were under defendants' control. According to defendants, Dr. White assumes the conspiracy admitted by certain defendants, and leaps from there to a model in which *all* of defendants' conduct -- including unilateral decisions related to output, for example -- is presumed to be tainted by the conspiracy. In doing so, say defendants, Dr. White erroneously lumps together legal and illegal conduct. See *Vernon v. Southern Cal. Edison Co., 955 F.2d 1361, 1371 (9th Cir. 1992)*(exclusion appropriate where damages study fails to distinguish between legal and illegal conduct). Indeed, defendants note that their own experts and witnesses have introduced testimony that numerous changes in capacity, yield and market conditions arising during the conduct period were responsible for any restrictions in output -- not any conspiratorial conduct. Yet, Dr. White admits that he attributes any impact or changes in output to the conspiracy, and not to any other sources. This failure to make allowance **[**125]** for unilateral decisions affecting DRAM supply and prices, warrants exclusion.

Without challenging the legal principle that legal and illegal conduct should not be lumped together, plaintiff responds that defendants' criticisms do not go to the admissibility of Dr. White's testimony, merely the weight. After all, the court in In re Linerboard considered and rejected the very same argument that defendants are making here, and admitted Dr. White's same methodology. See *In re Linerboard Antitrust Litig., 497 F. Supp. 2d 666 (E.D. Pa. 2007)*.

The court agrees with plaintiff on this point. Several economic studies support the argument that, in order to generate a reliable set of plaintiff but for prices, experts should not include any factors that were themselves tainted by the conspiracy. See Pl. Opp. BR. Re Dr. White's Testimony at 12:4-8. Hence, Dr. White purported to omit the factors under the conspirators' control, so as to exclude any effects of the conspiracy itself in generating plaintiff's but for prices. This seems reasonable. It is also not the same as improperly *including* both legal and illegal conduct. Rather, Dr. White's analysis simply takes out all of defendants' conduct altogether. **[**126]** Moreover, while not controlling, it is at least instructive that the *In re Linerboard* court allowed Dr. White's testimony to come in over the precise same argument that defendants are making here. And finally, while defendants may have very valid points regarding the importance of outside influences -- like changes in capacity and market conditions -- in raising prices (thereby leading to the conclusion that defendants have not caused an industry-wide conspiracy at all), these are points that go to the weight, and not the admissibility of Dr. White's testimony. Accordingly, the court rejects defendants' second argument in support of exclusion.

Finally, the court reaches the same conclusion with respect to defendants' third and final argument in support of exclusion -- i.e., that Dr. White's second step, in which he uses the Target OEM but for prices to predict plaintiff's but for prices, is unreliable and inadmissible. Defendants' primary objection to the reliability of Dr. White's analysis seems to be that Dr. White's second step generates huge damages to plaintiff even when the conspiracy had no effect on the Target OEMs' prices. This is nonsensical enough, say defendants, to lead **[**127]** to exclusion. Moreover, defendants note that Dr. White's second step finds no support among accepted methodologies and conflicts with what Dr. **[*1210]** White himself states is the generally accepted approach.

Defendants' arguments are interesting, but not necessarily grounds for exclusion. The gist of their argument is that Dr. White should have predicted plaintiff's but for prices directly, rather than using the Target OEMs' but for prices to generate the plaintiff's but for prices (based on his analysis of the relationship between Target OEM prices and plaintiff prices). If Dr. White had simply repeated his first step -- which *is* generally accepted -- in order to directly estimate plaintiff's but for prices, defendants note that plaintiff would have ended up with huge undercharges for plaintiff, not overcharges. Even if defendants are right, however, this is the type of criticism that goes to the weight of Dr. White's testimony. This is because defendants do not do enough to demonstrate that Dr. White's second step is unreliable, or otherwise totally at odds with the scientific literature. Plaintiff submits, for example, citations to several instances in which a two step forecasting method **[**128]** has been used, even when a single step approach was available. According to these citations, the two step forecasting method has been used to predict international countries' growth rates, real interest rates, GDP rates, as well as other economic factors. See Declaration of David Cross re Dr. White Opp. ("Cross Exclusion Opp. Decl."), Exs. 20-24. Furthermore, plaintiff has also pointed to case law where similar two-step forecasting methods in the antitrust context specifically was admitted -- the *In re Linerboard* and *In re Vitamins Antitrust Litig*. cases. See id. at Exs. 25, 34. While these cases, as noted before, are not controlling, they are instructive.

Moreover, there is the additional point that Dr. White's use of the two step method was undertaken with the specific intent and belief that this method, under the facts of this case, is "the most reliable way to obtain the but-for price estimates" for plaintiff. See id. at Ex. 4 at 64. Thus, Dr. White's use of the second step, far from being undertaken in some unscientific manner, is explained as a means of *increasing* reliability. While defendants may understandably attack this method as one that decreases reliability, such an attack **[**129]** goes to the weight, and not the admissibility of the approach.

It should also be noted that those cases that *do* hold experts' econometrics analyses inadmissible are limited to cases in which the expert had blatant failures in methodology -- e.g., they ran only simple regressions rather than complex regressions, or totally omitted to include supply and demand factors as part of the methodology. See, e.g., *In re Methionine Antitrust Litig., 2003 U.S. Dist. LEXIS 14828, 2003 WL 22048232 (N.D. Cal. 2003)*(expert failed to run multiple regressions). None of these deficiencies is evident here.

Finally, it is also worth mentioning, as plaintiff points out, that Dr. White conducted ten alternative methods of analysis, in response to defendants' criticisms of Dr. White's initial analysis. All of them corroborate Dr. White's initial analysis. Defendants' challenges to these are fairly generic, and generally are predicated upon the principle that Dr. White's recourse to alternative analyses still does not demonstrate that his initial analysis is valid. However, to the extent these additional analyses tend to corroborate Dr. White's initial testimony, they support a finding of reliability.

In sum, defendants have presented no **[**130]** arguments that establish sufficient grounds for outright exclusion of Dr. White's testimony. While they may have raised valid criticisms and concerns with respect to Dr. White's analysis, these are all criticisms and concerns that go to the **[*1211]** testimony's weight and not its admissibility. Plaintiff, moreover, has done an acceptable job of demonstrating that Dr. White's analysis is based on reliable principles and methodologies.

Defendants' motion to exclude the expert testimony of Dr. White is accordingly DENIED.

G. Evidentiary Objections

Defendants have filed numerous evidentiary objections in connection with each motion discussed herein, asserting several conceivable grounds (hearsay, lack of foundation and/or authentication, relevance, etc.) for objection wherever possible. In addition, defendants filed a motion to strike in response to *plaintiff's* response to defendants' evidentiary objections regarding their motion to exclude the testimony of Dr. Halbert White. In view of the sheer number of objections at issue, the court declines to review each and every exhibit as a matter of course. Rather, the court has reviewed defendants' objections -- and plaintiff's response thereto -- in connection **[**131]** with those exhibits that the court has actually relied upon in its analysis and decision.

As a preliminary matter, the court notes that many of defendants' objections are overly broad. In particular, while having objected to a majority of exhibits on hearsay grounds, defendants have largely failed to detail the actual statements that purportedly qualify as hearsay. As plaintiff points out, this is a deficiency that makes it difficult, if not impossible, for the court to assess defendants' hearsay objections -- and any potential hearsay objections -- at this stage. To the extent that defendants have also objected to plaintiff's exhibits on grounds of relevance and lack of foundation and/or authentication, the court has also found the objections unpersuasive with respect to the exhibits relied on by the court for the purposes of this order.

With this in mind, the court hereby OVERRULES defendants' objections to certain exhibits, as follows:

(a) defendants' objections to Exhibits 12-13, 18-19, 28, 37-39, 53, and 74 of the Cross Declaration, submitted in support of Sun's opposition to defendants' motion for partial summary judgment as to external manufacturer purchases, are OVERRULED;

(b) **[**132]** defendants' objections to Exhibits 3, 5, and 10-11 of the Cross Declaration submitted in support of plaintiff's opposition to the motion to dismiss certain claims for lack of subject matter jurisdiction under the FTAIA, are OVERRULED;

(c) defendants' objections to Exhibits 11-3 of the Cross Declaration submitted in opposition to defendants' motion for summary judgment based on purchases from Mitsubishi entities, are OVERRULED;

(d) defendants' objections to Exhibits 1-19, 20, 23-25, 38, 41, 5-56, 62, 64, 67-71, 80-83, 120, 172, 174, 176, and 180 of the Cross Declaration in support of Sun's opposition to defendants' motion for summary judgment and, in the alternative, summary adjudication, are OVERRULED; and

(e) defendants' objections to Exhibits 8-25 and 26-34 of the Cross Declaration submitted in opposition to defendants' motion to exclude the testimony of Dr. Halbert White are OVERRULED.

To the extent, however, that defendants have additionally filed a motion to strike the supplemental declaration of Dr. White that was submitted in connection with plaintiff's response to defendants' evidentiary objections, the motion to strike is GRANTED, as the filing of that supplemental declaration **[**133]** violates the deadline for **[*1212]** completing expert discovery that was imposed in this case.

Finally, as intimated above, to the extent defendants have made evidentiary objections to exhibits not relied on by the court herein, the court declines to rule on the admissibility of those exhibits. The parties remain free to raise any objections thereto at trial, if necessary.

H. Requests for Judicial Notice

Both sides have filed requests for judicial notice of various unrelated court decisions. <u>See</u> Plaintiffs' Request for Judicial Notice Regarding Case Materials from in re Vitamins and In re Linerboard; <u>see also</u> Defendants' Request for Judicial Notice ISO Motion to Exclude the Testimony of Plaintiffs' Expert Witness Halbert White.

The court hereby GRANTS both sides' requests for judicial notice, as it finds that the documents for which each party seeks judicial notice present a proper basis for such a request, pursuant to *Federal Rule of Evidence 201*.

I. Conclusion

For all the foregoing reasons, the court hereby GRANTS summary judgment in part and DENIES summary judgment in part, as follows: (1) defendants' motion for partial summary judgment as to Sun's claims based on purchases made by Sun's external **[**134]** manufacturers is GRANTED; (2) defendants' motion for summary judgment as to Sun's claims based on purchases of DRAM from defendant Mitsubishi entities is GRANTED; and (3) defendants' omnibus motion for summary judgment or in the alternative, for summary adjudication, is DENIED. The court furthermore GRANTS defendants' renewed motion to dismiss certain of Sun's claims for lack of subject matter jurisdiction, to the extent based on foreign DRAM purchases, and DENIES defendants' motion to exclude the expert testimony of plaintiff's expert, Dr. Halbert White.

IT IS SO ORDERED.

Dated: March 31, 2009

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Entitlement as Matter of Law, Genuine Disputes**

Summary judgment is appropriate when the pleadings, the discovery and disclosure materials on file, and any affidavits show that there is no genuine issue as to any material fact and that the movant is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. A fact's materiality is determined by the controlling substantive law. An issue is genuine when the evidence is such that a reasonable jury could return a verdict for the nonmovant.

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] Summary Judgment, Burdens of Proof

Summary judgment is not properly viewed as a device that the trial court may, in its discretion, implement in lieu of a trial on the merits. Instead, *Fed. R. Civ. P. 56* mandates the entry of summary judgment against a party who fails to make a showing sufficient to establish the existence of every element essential to that party's case on which that party will bear the burden of proof at trial. *Fed. R. Civ. P. 56(c)*. In such a situation, there can be no genuine issue as to any material fact, as a complete failure of proof concerning an essential element of the nonmoving party's case necessarily renders all other facts immaterial. *Fed. R. Civ. P. 56(c)*).

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN3[] Burdens of Proof, Movant Persuasion & Proof

The movant bears the initial responsibility of asserting, the basis for his summary judgment motion. However, the movant is not required to negate his opponent's claim. The movant may discharge his burden by merely showing--that is, pointing out to the district court--that there is an absence of evidence to support the nonmoving party's case.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN4[] Entitlement as Matter of Law, Appropriateness

After the movant has carried his burden, the party opposing summary judgment is then required to go beyond the pleadings and present competent evidence designating specific facts showing that there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*. While the court is to view all evidence and factual inferences in a light most favorable to the nonmoving party, the mere existence of some alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no genuine issue of material fact.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN5[] Contract Interpretation, Good Faith & Fair Dealing

Under Georgia law, every contract contains an implied duty of good faith and fair dealing. However, breach of this covenant does not give rise to an independent cause of action under Georgia law. A covenant of good faith is not an independent contract term that can be breached.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > Material Misrepresentations

HN6[] Burdens of Proof, Movant Persuasion & Proof

Under Georgia law, a party asserting fraud must show five elements: (1) a false representation or omission by defendant, (2) scienter, (3) intention to induce plaintiff to act or refrain from acting, (4) justifiable reliance, and (5) damage to plaintiff. A party challenging an assertion of fraud on a motion for summary judgment will succeed if it shows a lack of evidence as to only one of those elements.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Integration Clauses

HN7[] **Contract Conditions & Provisions, Integration Clauses**

In Georgia, a valid merger clause precludes any subsequent claim of deceit based upon pre-contractual representations. A merger clause operates as a disclaimer, establishing that the written contract completely and comprehensively represents all of the parties' agreement and therefore bars plaintiffs from asserting reliance on the alleged misrepresentation not contained within the contract.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Integration Clauses

HN8[] **Contract Conditions & Provisions, Integration Clauses**

Where the allegedly defrauded party affirms a contract which contains a merger or disclaimer provision and retains the benefits, he is estopped from asserting that he has relied upon the other party's misrepresentation and his action for fraud must fail.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Integration Clauses

HN9[] **Contract Conditions & Provisions, Integration Clauses**

A merger clause bars a fraud claim for contradictory prior or contemporaneous statements.

Contracts Law > Defenses > Affirmative Defenses > Fraud & Misrepresentation

HN10[] **Affirmative Defenses, Fraud & Misrepresentation**

Fraud must relate to an existing fact or a past event, not mere broken promises, unfulfilled predictions or erroneous conjecture as to future events.

Business & Corporate Law > Distributorships & Franchises > Disclosure & Registration > Requirements

HN11[] **Disclosure & Registration, Requirements**

A uniform franchise offering circular only required to disclose bankruptcies that were filed or discharged within the ten-year period preceding the disclosure document. *16 C.F.R. § 436.5(d)(1) (2007)*.

Business & Corporate Compliance > ... > Distributorships & Franchises > Business & Corporate Law > Distributorships & Franchises

Governments > Legislation > Statute of Limitations > Time Limitations

HN12[] **Businesses & Corporations, Distributorships & Franchises**

Under *Cal. Corp. Code §§ 31303* and *31304*, there is a one-year statute of limitations that requires a plaintiff to bring an action within one year of the discovery by the plaintiff of the violation.

Business & Corporate Compliance > ... > Business & Corporate Law > Distributorships & Franchises > Disclosure & Registration

Governments > Legislation > Statute of Limitations > Time Limitations

HN13[] **Distributorships & Franchises, Disclosure & Registration**

Claims must be brought before the expiration of one year after the discovery by the plaintiff of the plaintiff of the facts constituting such violation, not after the plaintiffs' knowledge of the violation. *Cal. Corp. Code § 31304*.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > Judgments > Summary Judgment > Opposing Materials

HN14[] **Burdens of Proof, Nonmovant Persuasion & Proof**

Conclusory allegations without specific supporting facts have no probative value and are not sufficient to defeat summary judgment.

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Fraud & Misrepresentation

HN15[] **Causes of Action, Fraud & Misrepresentation**

A defendant's statements about support cannot rise to the level of an untrue statement under the California Franchise Investment Law. A statement must relate to an existing fact or a past event, not mere broken promises, unfulfilled predictions or erroneous conjecture as to future events. Furthermore, descriptions of a level of support cannot amount to an actionable representation of fact because they are inherently subjective and vague.

Business & Corporate Law > Distributorships & Franchises > Termination > Good Cause

Business & Corporate Law > Distributorships & Franchises > Termination > Notice Requirements

HN16[] **Termination, Good Cause**

The California Franchise Relations Act provides that no franchisor may terminate a franchise prior to the expiration of its term, except for good cause. *Cal. Bus. & Prof. Code § 20020* (1980). Good cause includes the failure of the franchisee to comply with any lawful requirement of the franchise agreement after being given notice thereof and a reasonable opportunity, which in no event need be more than 30 days, to cure the failure.

Business & Corporate Compliance > ... > Distributorships & Franchises > Business & Corporate Law > Distributorships & Franchises

Governments > Legislation > Statute of Limitations > Time Limitations

HN17[] **Businesses & Corporations, Distributorships & Franchises**

The statute of limitations for the Illinois Franchise Disclosure Act (IFDA) precludes a party from bringing an action to enforce any liability, unless it is brought within one year after the franchisee becomes aware of the facts or circumstances that give rise to the IFDA claim. *815 Ill. Comp. Stat. Ann. 705/27*.

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > Material Misrepresentations

HN18[] **Fraud & Misrepresentation, Material Misrepresentations**

Because the false statements must relate to an offer or sale, no statement made after an agreement is signed can be considered.

Antitrust & Trade Law > Robinson-Patman Act

Evidence > Burdens of Proof > Allocation

HN19[] **Antitrust & Trade Law, Robinson-Patman Act**

To establish an action for price discrimination under the Robinson-Patman Act, a plaintiff must allege and prove that there were two actual sales at two different prices made by the same seller to at least two different purchasers.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Evidence > Burdens of Proof > Allocation

HN20[] **Tying Arrangements, Sherman Act Violations**

A *15 U.S.C.S. § 1* claim has five elements: (1) a tying and a tied product, (2) evidence of actual coercion by the seller that in fact forced the buyer to purchase the tied product, (3) that the seller have sufficient market power in the tying product market to force the buyer to accept the tied product, (4) anticompetitive effects in the tied market, and (5) involvement of a not insubstantial amount of interstate commerce in the tied product market. the first inquiry in any Sherman Act *§ 1* tying case is whether the defendant has sufficient market power over the tying product. Therefore, a plaintiff would have to establish that defendant had sufficient market power in the tying product to force the plaintiff to accept the tied product.

Antitrust & Trade Law > Business & Corporate Compliance > Antitrust

Evidence > Burdens of Proof > Allocation

HN21[] **Antitrust & Trade Law**

In addition to establishing liability, plaintiffs challenging violations of the antitrust laws must also show that they have suffered antitrust injury, that is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Plaintiffs must show both an injury to themselves as a competitor and an injury to competition in general.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Tying Arrangements

HN22[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The United States Court of Appeals for the Eleventh Circuit has held that an injury resulting from a tie-in must be shown by establishing that payments for both the tied and tying products exceeded their combined fair market value.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Evidence > Burdens of Proof > Allocation

HN23[] **Actual Monopolization, Monopoly Power**

To establish monopolization, a plaintiff must show both possession of monopoly power in the relevant market, and the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Civil Procedure > Remedies > Costs & Attorney Fees

Civil Procedure > Sanctions

HN24[] **Remedies, Costs & Attorney Fees**

A party can recover expenses of litigation where the evidence reveals no bona fide controversy or dispute with regard to the defendant's liability.

Civil Procedure > Remedies > Costs & Attorney Fees

Civil Procedure > Sanctions

HN25[] **Remedies, Costs & Attorney Fees**

In he context of an award of litigation expenses, bad faith is more than bad judgment or negligence it requires a dishonest purpose and conscious doing of wrong.

Civil Procedure > Remedies > Costs & Attorney Fees

HN26[] **Remedies, Costs & Attorney Fees**

A recovery of expenses of litigation must be based upon evidence which shows more than a mere breach of contract.

Civil Procedure > Remedies > Costs & Attorney Fees

HN27[] **Remedies, Costs & Attorney Fees**

Expenses of litigation relate only to the transaction upon which the underlying action is based and refers to a time prior to the institution of suit, not defendant's conduct in defending the case.

Civil Procedure > Sanctions > Baseless Filings

HN28[] **Sanctions, Baseless Filings**

Fed. R. Civ. P. 11 sanctions are appropriate: (1) when a party files a pleading that has no reasonable factual basis, (2) when the party files a pleading that is based on a legal theory that has no reasonable chance of success and that cannot be advanced as a reasonable argument to change existing law, or (3) when the party files a pleading in bad faith for an improper purpose. *Fed. R. Civ. P. 11(b)*.

Civil Procedure > Sanctions > Baseless Filings

HN29[] **Sanctions, Baseless Filings**

Fed. R. Civ. P. 11(b) sets forth the underpinning standard upon which a motion for sanctions should be judged: by presenting to the court a pleading an attorney certifies that to the best of his knowledge, information, and belief, formed after an inquiry reasonable under the circumstances: (1) it is not being presented for any improper purpose, such as to harass, cause unnecessary delay, or needlessly increase the cost of litigation; (2) the claims, defenses, and other legal contentions are warranted by existing law or by a nonfrivolous argument for extending, modifying, or reversing existing law or for establishing new law; (3) the factual contentions have evidentiary support or, if specifically so identified, will likely have evidentiary support after a reasonable opportunity for further investigation or discovery; and (4) the denials of factual contentions are warranted on the evidence or, if specifically so identified, are reasonably based on belief or a lack of information. In short, *Rule 11* requires an attorney to make a reasonable investigation to determine whether his claims are viable. *Fed. R. Civ. P. 11(b)(2)-(4)*

Civil Procedure > Sanctions > Baseless Filings > Frivolous Lawsuits

HN30[] **Baseless Filings, Frivolous Lawsuits**

The United States Court of Appeals for the Eleventh Circuit has noted that, before imposing sanctions, a court must determine whether the claims are frivolous and, if so, whether the person who signed the pleadings made a reasonable inquiry that would have revealed their frivolity. To satisfy that reasonable inquiry standard, an attorney must investigate both the facts and the law to determine if there is a reasonable basis for maintaining the action or position taken in the papers. An attorney acts in bad faith if he pursues claims that a reasonably careful attorney would have known, after appropriate inquiry, to be unsound. If an attorney does not make a reasonable inquiry, the court must impose sanctions even if the attorney has a good faith belief that the claims were sound.

Opinion

ORDER

This case is presently before the Court on defendants' **[*2]** Motion for Summary Judgment [232] and plaintiffs' Motions for Summary Judgment ([236], [237]). Defendants also have filed a Motion for Clarification [229] and a Motion for Sanctions [233]. The. Court has reviewed the record and the arguments of the parties and for the reasons set out below, concludes that defendants' Motion for Summary Judgment [232] should be **GRANTED**, defendants' Motion for Clarification [229] should be **DENIED**, defendants' Motion for Sanctions [233] should be **GRANTED**, and plaintiffs' Motions for Summary Judgment ([236], [237]) should be **DENIED** on Count One and **DENIED as moot** on Counts Two, Three, Four, Five, Six, and Ten.

BACKGROUND

This case arises out of a franchise dispute between plaintiffs Trident Holdings, LLC ("Trident") and American Consulting Corporation ("American"), developers of franchise areas ("area developers"), and defendant Great Wraps, restaurant franchisor. Trident is California corporation; American is an Illinois corporation; and Great Wraps is a Georgia corporation. (Am. Compi. [11] at ¶¶ 2-4.)

Great Wraps' relationship with American began in February 2004 when Kevin Parker ("Parker"), Great Wraps' Vice President of Operations, sent information **[*3]** to American about opening a franchise. (*Id.* at ¶¶ 8, 22-23.) On October 20, 2004, American and Great Wraps executed an Area Development Agreement ("Agreement") in which Great Wraps sold a Great Wraps franchise to American and required the latter to open stores and find franchisees to open additional stores. (*Id.* at ¶ 20; Solomon Aff. [191-6], Ex. A at ¶ 1.1.)[1]

Great Wraps' relationship with Trident began in June 2005, when Parker sent information to Trident about opening a franchise. (Am. Compl. [11] at ¶¶ 28-29.) On August 17, 2005, Trident and Great Wraps executed an Agreement

[1] Both parties frequently reference documents without providing a citation to the record or even making clear what document is being referenced. This sloppy citing makes it even more time-consuming for the Court to review the record. If the parties wish the Court to review the documents in future briefings, they must take the time to ensure that their citations are correct.

that sold a Great Wraps franchise to Trident and required Trident to open stores and find franchisees to open additional stores.[2] (*Id.* at ¶¶ 25--26; Solomon Aff. [191-6], Ex C at ¶ 1.1.)

American's Agreement required it to build stores within eight months of signing the Agreement. (Solomon Aff. [191-6], Ex. A at 1 2.1.) Trident's Agreement required it to build stores within ten months of signing the Agreement. (*Id.*, Ex. C at 9C 2.2.) Neither American nor Trident opened franchises within the required amount of time and they therefore violated the Agreements. (Defs.' Mot. for Summ. J. [232] at 1.) Both plaintiffs **[*4]** did, however, sell franchises to other parties and collect fees and royalties from Great Wraps for selling those franchises. (Solomon Aff. [191-6] at ¶¶ 14--16.) Though they were required to have their third-party franchisees open stores, their franchisees also failed to open stores during that time. (Defs.' Mot. for Summ. J. [232] at 1.) Trident and American both allege that many of defendants' actions and false representations caused them to be unable to open any stores within the specified amount of time. (*See generally* Am. Compl. [11].)

In April and September 2006, American was notified in writing of its breaches of its Agreement, and, in November 2006, Trident was likewise notified. (Solomon Aff. [191-6] at ¶¶ 10-11.) Great Wraps invited American and Trident to discuss changes to their Agreements. (*Id.* at ¶ 12.)

Rather than meeting with Great Wraps, plaintiffs filed Complaint [1] on December 29, 2006. (Defs.' Mot. for Summ. J. [232] at 3.) They sought damages against Great Wraps and several of its employees: Kenneth Chambers, former Director of Procurement and Logistics; Mark Kaplan, former Chairman of the Board of Directors; Christina Koestner, former Director of Franchise Development; **[*5]** Parker, Vice President of Operations; Jonathan Randel, former Director of Procurement and Logistics; Dan Reed, former Director of Franchise Development; Michael Rotondo, Vice President of Operations; Robert Solomon, President;-and Henry Strauss, a member of the Board of Directors.[3] (Am. Compl. [11] at ¶¶ 5-13.)

Plaintiffs alleged breach of contract; breach of'the covenant of good faith; fraud; violations of the California Franchise Investment Law ("CFIL"), California Franchise Relations Act ("CFRA"), and Illinois Franchise Disclosure Act ("IFDA"); antitrust violations of the Sherman Antitrust Act, Clayton Act, and Robinson-Patman Act; and expenses of litigation. (*See* Am. Compl. ¶¶ 176-294.)

In January 2007, Great Wraps terminated the Agreements. (Solomon Aff. [191-6] at ¶ 13.) Defendants filed a Motion for Summary Judgment [232], and plaintiffs filed Motions for Partial Summary Judgment ([236], [237]).

DISCUSSION

I. **Defendants' Motion for Clarification**

One of the motions pending is defendants' Motion for Clarification [229]. In February 2008, defendants filed Motions for Summary Judgment ([186], [191]) and Motions for Sanctions ([187], [192]). On May 15, 2008, plaintiffs filed a Motion to **[*6]** Reset the Time. Period for the Parties to File Motions for Summary Judgment [227] because defendants had just provided new documentary evidence ordered by the Magistrate Judge. The Court granted the motion [228] to extend the time frame and denied without prejudice defendants' pending summary judgment and sanctions motions ([186], [187], [191], [192]).

---

[2] The two Agreements are essentially identical in all material ways, except as noted in the Order.

[3] The Court approved the dismissal of Rotondo on May 21, 2007 (Order [66]) and of Chambers, Koestner, Parker, Reed, and Randel on June 18, 2008 (Stipulation of Dismissal [231]). Therefore, the remaining individual defendants are Kaplan, Solomon, and Strauss.

Defendants then filed a Motion Seeking Clarification [229] of the Court's Order [228]. Defendants said that they planned to file identical summary judgment motions and reply briefs and sought clarification that the plaintiffs had to file response briefs identical to their previous ones ([199], [200]).

As the entire purpose of the extension was to allow plaintiffs to address the new evidence in their briefs, it would have made no sense to require plaintiffs to refile the same briefs that had been earlier submitted. If defendants chose to file an identical brief, that was their prerogative. Therefore, the Court **DENIES** defendants' Motion for Clarification [229].

II. Defendants' Motion for Summary Judgment

Defendants have filed a Motion for Summary Judgment [232] in which they argue they are entitled to summary judgment on plaintiffs' claims **[*7]** for breach of the covenant of good faith; fraud; violations of the CFIL, CFRA, and IFDA; violations of the Sherman Antitrust Act, Clayton Act, and Robinson-Patman Act; and expenses of litigation. (*See* Am. Compl. [11] at ¶¶ 176-294.)

A. Standard for Summary Judgment

HN1[] Summary judgment is appropriate when "the pleadings, the discovery and disclosure materials on file, and any affidavits show that there is no genuine issue as to any material fact and that the movant is entitled to a judgment as a matter of law." *FED. R. Civ. P. 56(c)*. A fact's materiality is determined by the controlling substantive law. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. . An issue is genuine when the evidence is such that a reasonable jury could return a verdict for the nonmovant. *Id.*

HN2[] Summary judgment is not properly viewed as a device that the trial court may, in its discretion, implement in lieu of a trial on the merits. Instead, *Rule 56* mandates the entry of summary judgment against a party who fails to make a showing sufficient to establish the existence of every element essential to that party's case on which that party will bear the burden of proof at trial. *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*; *FED. R. Civ. P. 56(c)*. In such a situation, there can be "'no genuine issue as to any material fact,'" as "a complete failure of proof concerning **[*8]** an essential element of the nonmoving party's case necessarily renders all other facts immaterial." *Celotex Corp., 477 U.S. at 323* (quoting *FED. CIv. P. 56(c)*).

HN3[] The movant bears the initial responsibility of asserting, the basis for his motion. *Id. at 323*. However, the movant is not required to negate his opponent's claim. The movant may discharge his burden by merely "'showing'--that is, pointing out to the district court--that there is an absence of evidence to support the nonmoving party's case." *Id.* at 325. *HN4*[] After the movant has carried his burden, the nonmoving party is then required to "go beyond the pleadings" and present competent evidence designating "'specific facts showing that there is a genuine issue for trial.' *Id at 324* (quoting *Fed. R. Civ. P. 56(e)*). While the court is to view all evidence and factual inferences in a light most favorable to the nonmoving party, *Samples v. City of Atlanta, 846 F.2d 1328, 1330* (11th dir. 1988), "the mere existence of *some* alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no *genuine* issue of *material* fact." *Anderson, 477 U.S. at 247-48*.

B. Count One: Breach of Contract

Count One of Plaintiff's Amended Complaint asserts a cause of action against Great Wraps for breach of the Agreement. **[*9]** (Am. Compl. [11] at 5T 177-93.) Defendants do not seek summary judgment regarding this claim because they concede. that parties "nearly always [have] factual disputes regarding such claims." (Defs.' Mot. for Summ. J. [232] at 3.)

C. Count Two: Breach of the Covenant of Good Faith

Count Two of plaintiffs' Amended Complaint asserts a cause of action against Great Wraps for the breach of the covenant of good faith and fair dealing. (Am. Compl. [11] at ¶ 195.) Defendants claim that they are entitled to summary judgment on this claim because Georgia law does not recognize this claim as an independent cause of action. (Defs.' Mot. for Summ. J. [232] at 4.) The Court agrees.

Before addressing the substance of plaintiffs' claims, the Court determines, as an initial matter, that Georgia law applies to the controversies that arise from the parties' Agreements. In their Opposition to Defendants' Motion for Summary Judgment ([235] at 4), plaintiffs claim it "is disputed" that Georgia law applies to this claim, but completely fail to support this assertion.[4] According to the Agreements, however, Georgia law governs the claims arising from the Agreements. (*See* Solomon Aff. [191-6], Ex. A at § 10.14; id., Ex. **[*10]** C at § 10.14 ("This Agreement . shall be governed by [sic] construed and enforced in accordance within, the laws of the State of Georgia, USA.").)

HN5[] Under Georgia law, every contract contains an implied duty of good faith and fair dealing. *E.g., Quantum Trading Corp. v. Forum Realty Corp., 278 Ga. App. 485, 489, 629 S.E.2d 420 (2006)*. However, breach of this covenant does not give rise to an independent cause of action under Georgia law. *Alan's of Atlanta, Inc. v. Minolta Corp., 903 F.2d 1414, 1429 (11th Cir. 1990)* (a "'covenant [of good faith]' is not an independent contract term" that can be breached) (citations omitted); *Stuart Enters. Int'l, Inc. v. Peykan, Inc., 252 Ga. App. 231, 235, 555 S.E.2d 881 (2001)* ("[T]he Eleventh Circuit Court of Appeals has . . ruled that Georgia law would not recognize such an independent cause of action. . . We agree."). Thus, any breach of the implied covenant of good faith would be subsumed by plaintiffs' claim for breach of contract for defendants' alleged breach of the Agreements.

Because Georgia law governs, plaintiffs cannot maintain a claim for breach of the covenant of good faith. Therefore, the Court **GRANTS** defendants' Motion for Summary Judgment [232] on Count Two.

D. Count Three: Fraud

Plaintiffs allege that Great Wraps made "material misrepresentations" to plaintiffs on which plaintiffs "reasonably relied" when they signed their Agreements. (Am. Compl. [11] at ¶¶ 198-99.) This allegation forms **[*11]** the basis for plaintiffs' fraud claim against Great Wraps.[5] With only a two-page response to defendants' arguments in support of summary judgment, plaintiffs have mustered only the puniest of efforts to support their fraud claim. *See* Pls.' Opp'n to Defs.' Mot. for Summ. J. [235] at 14-16. Plaintiffs' response consists of little more than a listing of paragraphs in the Amended Complaint that purportedly alleged the acts of fraud. There is virtually no effort to rebut defendants' legal arguments.

That said, the Court has attempted to discern the gist of plaintiffs' contentions. Plaintiffs appear to claim that Great Wraps made material misrepresentations (1) in prior and contemporaneous statements and (2) in Uniform Franchise Offering Circulars ("UFOC"), which franchisors distribute to potential franchisees to provide information.

HN6[] Under Georgia law,[6] a party asserting fraud must show five elements: (1) a false representation or omission by defendant; (2) scienter; (3) intention to induce plaintiff to act or refrain from acting; (4) justifiable

---

[4] (*See also* Pls.' Opp'n to Defs.' Mot. for Summ. J. [235] at 14 ("[T]he franchises in issue were sold and operated in California and Illinois, which law applies.").)

[5] Plaintiffs do not assert claims of fraud against any of the individual defendants.

[6] In their response brief concerning the fraud claim, plaintiffs again observe that California and Illinois law apply, but they don't explain why that is so, given a contrary provision in the contract that provides that Georgia law applies. Likewise, they cite no cases to help the Court understand why they believe that California or Illinois law applies to the fraud claim, or why, even if those

reliance;. and (5) damage to plaintiff. Adkins v. Cagle Foods JV, LLC, 411 F.3d 1320, 1325 (11th Cir. 2005) (quoting Pro-Fab v. Vipa, Inc., 772 F.2d.847, 851 (11th Cir. 1985)); Collins v. Regions Bank, 282 Ga. App. 725, 727, 639 S.E.2d 626 (2006). A party challenging an assertion of fraud on a motion for summary judgment will succeed if it **[*12]** shows a lack of evidence as to only one of these elements. Collins, 282 Ga. App. at 727.

1. The Merger Clause Bars Plaintiffs from Claiming They Relied on Prior Representations that Contradict the Written Agreements.

Plaintiff American signed its agreement with Great Wraps on October 20, 2004; plaintiff Trident's signed its agreement on August 17, 2005. As to misstatements made to American, see Amended Complaint [11] at ¶ 136 (Great Wraps provided "positive earnings claims" to American in March .2004); ¶ 137 (alleging the March 2004 statement was untrue); ¶ 147 ("Great Wraps did not disclose to American that one of Great Wraps' franchisees was incurring heavy financial losses"); ¶ 156, (Great Wraps misrepresented to American that "it was growing very rapidly and had a history of '20 Years Proven Success'").

A review of the above listing suggests that American's 'fraud claim relies primarily on statements made before the respective agreements were signed. As to misstatements allegedly made to Trident, *see id.* at ¶ 27 (Great Wraps provided Kapur (Trident's principle) with "positive earnings claims" in June 2005); ¶ 39 (Great Wraps gave incorrect information to Trident about "'Real Estate Criteria'" in June 2005); ¶ 40 (in July 2005, Great Wraps **[*13]** misrepresented to Trident the number of franchises that Great Wraps had sold); ¶ 41 (referring to alleged misrepresentations Great Wraps made to Trident in July 2005).

Plaintiffs' fraud claims based on these statements, which were made prior to the execution of the written agreement, are barred because the agreement contained a merger clause. ***HN7***[] In Georgia, a valid merger clause "precludes any subsequent claim of deceit based upon pre-contractual representations." *E.g.,* Mims v. Cagle Foods JV, LLC, 148 Fed.Appx. 762 (11th Cir. 2005) (quoting First Data POS, Inc. Willis, 273 Ga. 792, 795, 546 S.E.2d 781 (2001)) (internal quotation marks omitted). A merger clause "operates as a disclaimer, establishing that the written contract completely and comprehensively represents all of the parties' agreement" and therefore "bars [plaintiffs] from asserting reliance on the alleged misrepresentation not contained within the contract"; Kobatake v. E.I. DuPont De Nemours & Co., 162 F.3d 619, 625 (11th Cir. 1998) (quoting Pennington v. Braxley, 224 Ga. App. 344, 346, 480 S.E.2d 357 (1997)) (internal quotation marks omitted).

This is so "because ***HN8***[] where the allegedly defrauded party affirms a contract which contains a merger or disclaimer provision and retains the benefits, he is estopped from asserting that he has relied upon the other party's misrepresentation and his action for fraud must fail." Kobatake, 162 F.3d at 626 (quoting Am. Demolition, Inc. v. Hapeville Hotel Ltd. P'ship, 202 Ga. App. 107, 109, 413 S.E.2d 749 (1991) **[*14]**) (internal quotation marks omitted).

Indeed, courts in the Eleventh Circuit have repeatedly ruled that ***HN9***[] a merger clause bars a fraud claim for contradictory prior or contemporaneous statements. *See, e.g.,* Wholesale Telecom Corp. v. ITC Deltaoom Commc'ns, Inc., 176 Fed.Appx. 76, 79 (11th Cir. 2006) (no fraud occurred when merger clause disclaimed representations made before contract was executed); Mergens v. Dreyfoos, 166 F.3d 1114, 1119 (11th Cir. 1999) (fraud claims barred by general release and merger clause); *Johnson Enters. of Jacksonville, Inc. v. FPL Group, Inc., 162 F.3d 1290, 1315 (11th Cir. 1998)* (finding it was "unreasonable" as a matter of law for plaintiff to rely on alleged guarantee that was not in contract when contract contained merger clause); Kobatake, 162 F.3d at 625 (merger clause in releases barred plaintiffs from voiding releases based on fraud); Hall v. Coram Healthcare Corp., 157 F.3d 1286, 1287 (11th Cir. 1998) (Georgia law states that when an injured party seeks damages rather than rescission, "a merger clause prevent[s] recovery by estopping the claimant from asserting reliance on any misrepresentations or omissions made outside of the four corners of the contract."); Rayle Tech, Inc. v. DEKALB Swine Breeders, Inc., 133 F.3d 1405, 1411 (11th Cir. 1998) (By signing an invoice, a party "reaffirmed the sales

states' laws apply, plaintiffs could withstand a motion for summary judgment. *See* Pls.' Opp'n to Defs.' Mot. for Summa J. [235] at 14("[T]he franchises in issue were sold and operated in California and Illinois, which law applies.")

contract and all of its provisions, including the merger clause. As such, [plaintiff] could not justifiably rely" on another party's representation.).[7]

The Agreements here contained merger clauses. Specifically, each Agreement provided that it "supersede[d] all **[*15]** prior discussions, understandings and agreements between the parties with respect to the matters contained herein, and contain[ed] the sole and entire agreement between the parties hereto with respect to the transactions contemplated herein." (Solomon Aff. [191-6], Ex. A at § 10.2; *id.*, Ex. C at § 10.2.)

Because plaintiffs signed Agreements with merger clauses, Georgia law provides that they necessarily could not have relied on alleged prior misrepresentations that contradicted the provisions of these contracts. In addition, plaintiffs also signed Developer Compliance Checklists, in which they admitted that "Great Wraps did not give me (directly or indirectly, or my Corporation), nor have relied on any representations, warranties, inducements, pro formas, forecasts, estimates, or any other statements regarding net profits, gross profits, net sales, gross sales, financing, costs or expenses related to the operation of my Great Wraps" and "that there [were] no oral agreements or inducements claimed by Franchisee that are binding on Franchisor unless they [were] written into this Agreement." (Solomon Aff. [191-6], Ex. B at 1 (emphasis omitted).)[8] American's president even acknowledged that he did not **[*16]** rely on any prior representations of cost or sales and therefore could not make any fraud claims based on prior and contemporaneous statements. (*See* Prathipati Dep. [184] at 44.25, 54.22-55.6.)

2. Plaintiffs Have Not Proven Fraud as a Result of Uniform Franchise Offering Circulars (UFOCs) Disseminated by Defendants

As noted, plaintiffs have filed to prove fraud in connection with prior oral representations by defendants. Plaintiffs also claim that defendants issued Uniform Franchise Offering Circulars (UFOCs) in connection with their promotion to plaintiffs and that these UFOCs contained material misrepresentations. As defendants have noted, it is extremely difficult to analyze this contention by plaintiffs as the latter never adequately specify the UFOC to which they refer; do not adequately give dates for the particular UFOC; and, as to some allegations, it appears that plaintiffs are relying on a UFOC that was issued after plaintiffs entered into their agreements with the defendants. Obviously, a misrepresentation made after the agreement could not have been a representation on which the plaintiffs relied.

Another difficulty in analyzing this claim is plaintiffs' failure to adequately **[*17]** identify specific misrepresentations, thereby forcing the Court to scour the record. That effort, which has been burdensome to the Court, reveals only a few arguable false representations. None of them would be sufficient to prove a claim of fraud.

a. Brand Consistency

First, Kapur alleged that the UFOC stated that Great Wraps has "brand consistency, a uniform menu" and a "standardized" look. (Kapur Dep. [185] at 106.12-13.) Kapur said that statement was untrue because "names [of menu items] are different" between stores and that one store contained different "decor," "colorings," and "window signs." (Kapur. Dep. [185] at 107.19-21; 108.18-20). The Court finds that these statements are too vague, subjective, and insignificant to be considered material facts. Different decor at one store does not negate "brand consistency" or a "standardized look," and variations among menus do not preclude a "uniform menu." *See also* *Am. Casual Dining, L.P. v. Moe's Sw. Grill, L.L.C., 426 F.Supp.2d 1356, 1364 (N.D. Ga. 2006)* (***HN10***[] fraud "must relate to an existing fact or a past event," not "mere broken promises, unfulfilled predictions or erroneous conjecture as to future events") (citations and internal quotation marks omitted).

---

[7] A merger clause is only insufficient to defeat a fraud claim when the party has sought to rescind the contract. *City Dodge, Inc. v. Gardner, 232 Ga. 766, 770, 208 S.E.2d 794 (1974)*. Plaintiff has not sought rescission of the agreement.

[8] The language in Trident's Compliance Checklist has a few insignificant differences, but it is essentially the same. (*See* Solomon Aff. [191-6], Ex. D at 1-2.)

Plaintiffs have not sought rescission of the agreements, and instead **[*18]** sue only for damages. As neither plaintiff ever even opened a store, it is difficult to understand how inconsistent decor or menu among Great Wraps' stores would have given rise to any damages on their part.

b. Bankruptcies

According to defendants, "the only remotely significant false statement by Great Wraps in its [UFOC] was its failure to disclose the 1996 and 1997 bankruptcy filings of Robert Saade, a former employee." (Defs.' Mot. for Summ. J. [232] at 19.) The Court concludes that the above were not material omissions and cannot form the basis of a fraud claim.

First, the drafters of the specific UFOC, Kaplan and Solomon, were unaware of Saade's bankruptcy. (Kaplan Aff. [191-5] at ¶¶ 7-9; Solomon Aff. [191-6] at ¶¶ 27-29.) In addition, as Saade was not involved in the sales or contract negotiations with either plaintiff, his bankruptcy filing almost a decade before is not material. (Solomon Aff. [191-6] at ¶ 26.)

Kapur also alleges that the non-disclosure of the 1991 bankruptcy of Parker, Great Wraps' Vice President of Operations, was a material omission. (Kapur Aff. [199-1] at ¶ 10.) ***HN11***[] A UFOC is only required to disclose bankruptcies that were filed or discharged within the ten-year **[*19]** period preceding the disclosure document. *16 C.F.R. § 436.5(d)(1) (2007)* .

c. Omission of the Conviction of an Employee

Finally, Kapur complains that the UFOC omitted the felony conviction of Randel, another Great Wraps employee. (Kapur. Aff. [199-1] at ¶ 17.) Though Kapur's affidavit does not provide the date of the referenced UFOC, Kapur cannot be referring to the 2004 and 2005 UFOCs that plaintiffs initially received, as Randel did not work in the corporate offices until March 2006. (Randel Aff. [188-4] at ¶ 3.) Necessarily, a UFOC provided after plaintiffs had signed their Agreements cannot support a fraud claim.

Additionally, as Randel was never an officer, principal, executive officer, or director of Great Wraps (*id.* at ¶ 4), he was not required to be listed in the UFOC. Kapur also alleges that Randel "was engaged in the selling of franchises," but in 2005, Randel was manager of a corporate store and not selling franchises. (Kapur Aff. [199-1] at ¶ 15; Randel Aff. [188-4] at ¶ 3.) Accordingly, the omission of a reference to Randel's prior conviction cannot support plaintiffs' fraud claim.

d. Other Representations

Plaintiffs further allege false representations or omissions by referring to paragraphs **[*20]** in the Amended Complaint [11], though they fail to give any factual detail or legal support for these claims. (Pls.' Opp'n to Defs.' Mot. for Summ. J. [235] at 15.) In plaintiffs' own motions for summary judgment (Pl.'s Mot. for Summ. J. [236]. at 24; Pl.'s Mot. for Summ. J. [237] at 25), plaintiffs' arguments regarding the fraud count are only that the allegations "have been proven by the facts stated in Plaintiff's Statement of Material and Undisputed Facts and [d]efendants' admissions." Surely, even the most inexperienced attorney could not credibly contend that he had proved a fact merely by alleging the fact in the complaint.

Plaintiffs also introduce another irrelevant statement. In ¶ 146 of the Amended Complaint [11], plaintiffs state that "Great Wraps did not disclose to American that it was being investigated by the Office' of the Attorney General of the State of Illinois." According to defendants, however, this problem "arose in the last quarter of 2006," well after the Agreements were signed, and "was resolved amicably with the franchisee and no action was taken against Great Wraps by the Illinois Attorney General." (Second Solomon Aff. [238-2] at ¶ 18.)

In short, plaintiffs **[*21]** have failed to sufficiently identify and explain, much less prove, the particular misrepresentations that they allege as supporting their fraud claim.. This failure, by itself, justifies summary judgment for defendants on the fraud claim. Plaintiffs, however, also fail to show other required elements of a fraud claim.

3. Plaintiffs Have Not Proved Scienter, Justifiable Reliance, and Damages

Even if plaintiffs had proven material misrepresentations, they have failed to show scienter by the defendants. Scienter is defined as "[a] degree of knowledge that makes a person legally responsible for the consequences of his or her act or omission." Black's Law Dictionary 1373 (8th ed. 2004.) Plaintiffs' allegations of scienter mainly concerns defendants' purported knowledge that it was impossible to open a franchise within the time period set out in the agreement.[9] The president of Great Wraps, however, states that

> other franchisees have been able to sign a lease, construct a space, and open a Great Wraps[] restaurant within one year or less from the date of a franchise agreement. For example, in American's territory, three of eight stores were open within eight months or less after signing their **[*22]** franchise agreements. In Trident's territory, one store opened in seven months, with a second store opened in nine months after signing their franchise agreements.

(Second Solomon Aff. [238-2] at ¶ 17.)

Solomon also testified that both plaintiffs had many opportunities to lease spaces, but they never did. (*Id.* at ¶ 12.) In addition, Prathipati, the principal for plaintiff American, owned a Quizno's store in the area, so he should have been familiar with franchising opportunities there. (Prathipati Aff. [199-1] at ¶ 26.)

As to Saade's bankruptcy, the individuals who put together the UFOC did not have knowledge of that fact and, hence, did not have scienter. (Kaplan Aff. [191-5] at ¶¶ 7-9; Solomon Aff. [191-6] at ¶¶ 27-29.)

Plaintiffs have also failed to show justifiable reliance on any alleged misrepresentations by defendants. Plaintiffs refer to several paragraphs in the Amended Complaint [11] that allegedly prove justifiable reliance.[10] (Pls.' Opp'n to Defs.' Mot. for Summ. J. [235] at 15.) All these paragraphs, however, refer to representations made before the contracts were signed and on which defendants could not have reasonably relied because of the merger clause. *See* *supra at 11-14*. *See* *Prince Heaton Enters., Inc. v Buffalo's Franchise Concepts, Inc., 117 F.Supp.2d 1357, 1361 (N.D. Ga. 2000)* '(Thrash, **[*23]** J.) ("Plaintiffs [could not] prove justifiable reliance on misrepresentations about the projected financial success of their franchises" because they "expressly agreed they would not rely on

---

[9] *See* ¶ 45 ("Great Wraps knew that it was virtually impossible to build a store within ten months of signing of [Trident's] Area Development Agreement"); ¶ 53 ("Great Wraps knew it would take much longer to find potentially good sites in Southern California because its commercial real estate market was in huge demand and competition for food locations among various brands trying to gain a footprint in Southern California was very intense"); ¶ 54 ("Great Wraps knew that almost any good site would not be available for months if not years out into the future"); ¶ 55 ("Great Wraps knew that Trident could not meet the stipulated store opening schedule in any territory"); ¶ 57 ("Great Wraps knew about the nature of the commercial real estate market as they had had an [a]rea [d]eveloper in Los Angeles and Ventura Counties for over two years"); ¶ 159 ("Great Wraps knew it was virtually impossible to build a viable store within eight months of the signing of [American's] Area Development Agreement").

[10] *See* ¶ 22 (Great Wraps provided costs to American in February 2004); ¶ 23 (Great Wraps sent a letter to American with costs in February 2004); ¶ 24 (Great Wraps confirmed costs for a Great Wraps store in October 2004); ¶ 27 (Great Wraps provided "incorrect positive earnings claims" to Trident in June 2005); ¶ 28 (Great Wraps sent a letter to Trident with information about opening a store in June 2005); ¶ 29 (Parker sent a letter with the cost of a store in June 2005); ¶ 30 (Great Wraps sent costs to Trident in June 2005); ¶ 39 (Great Wraps "provided incorrect information" about Great Wraps "'Real' Estate Criteria'" in June 2005); ¶ 41 (misrepresentations made to Trident in July 2005); ¶ 44 (Agreement specified that Trident build a store within ten months of the signing of the Agreement). Paragraph 199 states merely that "[p]laintiffs reasonably relied on the misrepresentations made by Great Wraps."

representations made by [d]efendants and are bound by their agreement.") (citations omitted). *See also Am. Casual Dining, L.P., 426 F.Supp.2d at 1364* ("[f]raud cannot be based on misrepresentations" upon which the plaintiff could not "justifiably rely") (citation omitted).

Further, each Agreement contained a section wherein plaintiffs acknowledged numerous risks, further underscoring the point that they could not have justifiably relied on defendants' projections. (Solomon Aff. [191-6], Ex. A at § 10.17; *id.*, Ex. C at § 10.17.)

Finally, plaintiffs have failed to show any damages. Plaintiffs allege several different types of damages, but most of these relate to their franchisees, who are not plaintiffs.[11] Plaintiffs, themselves, never opened any stores, and their allegations about damages therefore fail. Because plaintiffs have not proven false representations, scienter, justifiable reliance, or damages, they cannot succeed on a fraud claim. The Court therefore **GRANTS** defendants' Motion for Summary Judgment [232] on Count Three.

E. Count Four: Violation [*24] of California Franchise Investment Law ("CFIL")[12]

Plaintiff Trident alleges in the Amended Complaint ([11] at ¶¶ 203-213) that Great Wraps and the individual defendants violated the California Franchise Investment Law (CFIL), which applies to all franchisees in California and their franchisors. *Cal Corp. Code § 31005* (1971). Under the agreement, Trident agreed to open its own store and sell franchises to others in California.

Plaintiffs allege that defendants violated *Cal Corp. Code § 31200* by making an untrue statement of a material fact in their UFOC. Plaintiffs also allege that defendants violated *Cal. Corp. Code § 31201* by making an untrue statement of a material fact in their dealings with Trident. Many of these alleged misstatements duplicate the allegations in the fraud claim.

1. Plaintiffs' Claims Are Barred by the Statute of Limitations.

Even if Trident could show false statements, its claims are time-barred by the statute of limitations. ***HN12***[] Under *Cal. Corp. Code §§ 31303* and *31304*, there is a one-year statute of limitations that requires a plaintiff to bring an action within one year of the discovery by the plaintiff of the violation.[13] Trident executed its Agreement on August 17, 2005. (Solomon Aff. [191-6] at Ex. C.) Plaintiffs filed this action on December 29, 2006. (Compl. **[*25]** [1].)

---

[11] *See* ¶ 33 (plaintiffs' "loss of profits"); ¶ 36 ("high cost of construction and store operations" "prevented [p]laintiffs from selling additional franchises"); ¶ 78 (plaintiffs' franchisees have had "to borrow more and pay higher loan payments"); ¶ 80 (have had to spend more time with franchisees, "reducing their profits"); ¶ 142 (plaintiffs' "ability to sell additional franchises" has been "hurt"); ¶ 143 ("[o]ne store shut down in September 2006"); ¶ 152 (franchise "unprofitable"); ¶ 153 (American's franchisees "refused to open additional stores"); ¶ 154 ("high cost of construction and store operations" "have prevented American from selling additional franchises"); ¶ 166 ("franchisee's losses were never recovered"); ¶ 201 (requesting "compensatory and punitive damages in an amount in excess of $75,000").

[12] Defendants do not address Counts Four or Six in their Motion for Summary Judgment [232], but rather refer the Court to the arguments in the February 11, 2008 Brief of [Previous] Defendants Kevin Parker, Dan Reed, Kenneth Chambers, Jonathan Randel and Christina [Koestner] in Support of Summary Judgment [186].

[13] *See Cal. Corp. Code § 31303* ("No action shall be maintained to enforce any liability created under *Section 31300* [which allows a person to sue for a violation of *Cal. Corp. Code § 31200* if the offer or sale of a franchise contains misleading or untrue required statements] unless brought before . . . the expiration of one year after the discovery by the plaintiff of the fact constituting the violation"); *Cal. Corp. Code § 31304* ("No action shall be maintained to enforce any liability created under *Section 31301* [which allows a person to sue for a violation of *Cal. Corp. Code § 31201* if a person purchases a franchise while relying on the false or misleading statements] unless brought before the . . . expiration of one year after the discovery by the plaintiff of the facts constituting such violation").

Therefore, if Trident knew of any facts allegedly constituting a violation before December 29, 2005, the statute of limitations would bar a claim against such violations.

In his deposition, Kapur, the principal of Trident, alleged that the following statements constituted untrue statements in violation of the CFIL:

> The level of support [defendants] promised, the mentioning of food costs at the corporate training store, the number of stores they were going to open the following year. The store buildout cost. There could have been more.

(Kapur Dep. [185] at 110.23-111.2.)

Even if any of these statements were actionable as misrepresentations, Trident will be time-barred if it learned of any of these facts before December 29, 2005.

Kapur began visiting Great Wraps stores in September 2005, having signed its Agreement in August 2005. (*Id.* at 135.12-15.) Trident also started receiving monthly sales reports, franchise fees, and royalties for stores in its area within a few weeks after signing the Area Development Agreement. (*Id.* at 136.3-24.) Therefore, Kapur soon learned about the level of support Great Wraps was providing, the food costs, and the number of stores in his area, as well **[*26]** as the number of stores that would be opening. Trident would have also learned the actual store buildout costs for a store in California in November 2005 when he visited another area developer's opening of a Great Wraps store. (*Id.* at 36.3-24; Der Dep. [183] at 60.23-24.) Therefore, any allegations relating to these claims are barred by *Cal. Corp. Code §§ 31303* and *31304*.

Kapur also alleged that the UFOC contained untrue statements about Great Wraps' "brand consistency." *See supra* II.D.2.a.(1) (Kapur Dep. [185] at 106.11-13.) Trident also would have been able to form its opinion about brand consistency, uniformity of menu, and standardized look soon after beginning work as an area developer, well before December 29, 2005. Therefore, assuming these statements could constitute false statements within the meaning of the Act, these claims are also barred by *Cal. Corp. Code §§ 31303* and *31304*.

In short, the statute of limitations bars plaintiffs' claims.[14]

2. Even if Trident's Claims Were Not Barred by the Statute of Limitations, Trident Cannot Maintain a Claim Under the California Franchise Investment Law.

a. Trident Makes Only Conclusory Allegations Without Any Supporting Facts.

Even if the claims were not barred by the statute of limitations, **[*27]** Trident still could not maintain a claim under the CFIL because it cannot point to any untrue statements. As a preliminary matter, ***HN14***[] "conclusory allegations without specific supporting facts have no probative value" and are not sufficient to defeat summary judgment. *See, e.g., Evers v. Gen. Motors Corp., 770 F.2d 984, 986 (11th Cir. 1985)* (citations omitted). The vast majority of plaintiffs' claims are conclusory allegations with no specific supporting facts. Nevertheless, the Court will address the allegations briefly.

b. Trident Does Not State a Claim Under *§ 31200*.

[14] Plaintiffs state that they "did not know they possessed claims against the defendants until they consulted with counsel." (Pls.' Opp'n to Defs.' Mot. for Summ. J. [200] at 8.) Unfortunately for plaintiffs, the ***HN13***[] claims must be brought before the "expiration of one year after the discovery by the plaintiff of the **facts** constituting such violation," not after the plaintiffs' knowledge of the violation. *Cal. Corp. Code § 31304* (emphasis added).

Trident alleges that defendants violated *Cal. Corp. Code § 31200*, which states that "[i]t is unlawful for any person willfully to make any untrue statement of a material fact [or omit to state a material fact] in any application, notice or report filed with the commissioner under this law." Therefore, Trident must prove that defendants (a) willfully (b) made an untrue statement of, or omitted (c) a material fact in the UFOC. Furthermore, Trident has to prove causation and damages to recover for a violation of this section. *Cal. Corp. Code § 31301*.

The Court has already determined that the statements about brand consistency, bankruptcies, and Randel's conviction are not material, see *supra* II.2.a.(1)-(3), and therefore cannot constitute **[*28]** a violation of *§ 31200*.[15] Plaintiffs also state in their response to the Statement of Undisputed Facts (235-6 at ¶ 32) that Great Wraps erred in listing Randel as Director of Procurement and Logistics in 2007 because he left Great Wraps in February 2007. (See Defs.' Reply in Supp. of Mot. for Summ. J. [222] at 6.) This error is irrelevant because the 2005 UFOC is the only material one that deals with the "[o]ffer" or "sale" of a franchise, see *Cal. Corp. Code § 31300*.

Kapur also alleges that Great Wraps failed to identify Reed in its filings. (Kapur Aff. [199-1] at ¶ 11.) This omission cannot be a misrepresentation because Reed did not join Great Wraps until June 2005 and was not employed with Great Wraps when the UFOC was delivered to Trident. (Reed Dep. [188-2] at ¶¶ 5.)

Kapur alleges in his affidavit that the UFOC listed Koestner as the Director of Franchise Development, even though Reed was the Director of Franchise Development. (Koestner Aff. [199-1] at ¶ 14.) The UFOC to which Kapur refers is the 2006 UFOC, so it is clearly not relevant, as Trident had already signed its Agreement when this UFOC was issued. Further, this type of error is not material. Accordingly, Trident does not state a claim under *§ 31200*.

c. Trident [*29] Does Not State a Claim Under *§ 31201*.

Cal. Corp. Code § 31201 states:

> It is unlawful for any person to offer or sell a franchise in this state by means of any written or oral communication not enumerated in *Section 31200* which includes an untrue statement of a material fact or omits to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading.

Because the false statements must relate to an "offer" or "sale," no statement made after the Agreement was signed can be considered.

(1) Level of Support

Trident has alleged that it received a poor level of support from Great Wraps. However, Kapur testified that he got a "good" and "appropriate" level of support his first six months and that at one point, his "opinion even improved." (Kapur Dep. [185] at 112.25, 114.2-3.) Though he says that he later felt the support was "substandard," he did not explain in the deposition specifically why his opinion changed. (*Id.* at 113.2.) ***HN15***[] Defendants' statements about support cannot rise to the level of an "untrue statement" under the CFIL. See also *Am. Casual Dining, L.P., 426 F.Supp.2d at 1364* (statement "must relate to an existing fact or a past event," not "mere broken promises, unfulfilled predictions or erroneous **[*30]** conjecture as to future events") (citations and internal quotation marks omitted).

---

[15] Additionally, the Cal. Corp. Code provides a defense if the "defendant exercised reasonable care and did not know" of the untruth "or, if he or she had exercised reasonable care, would not have known." *Cal. Corp. Code § 31300*. At the time they prepared the UFOCs for Trident and American, neither Solomon nor Kaplan, who wrote the UFOCs, had any knowledge or reasonable grounds to believe the UFOCs had incorrect information. They were specifically unaware of Saade's filing for bankruptcy when they prepared the UFOC. (Kaplan Aff. [191-5] at ¶¶ 7-9; Solomon Aff. [191-6] at ¶¶ 27-29.) Therefore, even if the statements were material, defendants would have a defense under *Cal. Corp. Code § 31300*.

Furthermore, descriptions of a level of support cannot amount to an actionable representation of fact because they are inherently subjective and vague. *Ferreira v. Quik Stop Mkts., Inc., 141 Cal.App.3d 1023, 1030, 190 Cal. Rptr. 778 (1983)* ("the description of a business as a 'success' or 'failure' was highly subjective and did not amount to an actionable representation of fact").

(2) Food Costs

Kapur also alleged that defendants gave an untrue statement that food costs at the training store were "around 30 percent." (Kapur Dep. [185] at 114.24.) However, Kapur has admitted he has no evidence that this alleged statement was untrue. (*See id.* at 115.6, 115.9.)[16] In addition, the quoted costs were estimates and thus cannot be considered to be untrue statements of material fact.

Further, the UFOC that Great Wraps provided to Trident stated that it

> [did] not furnish or authorize our salespersons to furnish any oral or written information concerning the actual or potential sales, *costs*, income or profits of a Great Wraps Restaurant. *Actual results vary from unit to unit and we cannot estimate the results of any particular franchise*.

(Kapur Dep. [185], Ex. 4 at 23 (emphasis added).) Trident **[*31]** also signed two documents in which it affirmed that it had not relied on any statement regarding costs: first, in the Agreement (Solomon Aff. [191-6], Ex. C at 1 10.16), and second, in a Developer Compliance Checklist signed contemporaneously with the Agreement (*Id.*, Ex. D at 1).

(3) Number of Stores

Kapur alleged in his deposition that Great Wraps had been untruthful about the number of stores they were going to open the following year. (Kapur Dep. [185] at 110.25-111.1.) Kapur said that three employees of Great Wraps said that Great Wraps would open "in the range of 60, 70, 80 stores," though Kapur admitted that the employees did not disclose any potential locations. (*Id.* at 115.19-117.10.) These statements, however, are clearly estimates and expressions of hope, which are not representations of fact. *See* *Next Century Communs. Corp., 318 F.3d at 1028*.

(4) Store Buildout Costs

Kapur also alleged that Great Wraps' statements about "buildout cost[s]" were untrue. (Kapur Dep. [185] at 111.1.) However, like the projected number of stores, these representations were clearly an estimate and were not a statement of fact. When Great Wraps sent the estimate of $228,725 to Kapur on June 22, 2005, the letter stated that "while costs may vary **[*32]** by market and market conditions, the attached will give you a *general idea."* (Original Dep. Exs. [217], Ex. 89 at 1 (emphasis added).) (*See also* Parker Dep. [188-1] at 1 10 ("With regard to build-out, store development and operations, I provided estimated costs which were clearly expressed as estimates only, and I, also, informed [p]laintiffs that the costs may vary by market and market conditions.").)

In addition, Kapur admitted that he did not know what the estimated costs should have been and that he did not have any evidence that the estimate was wrong, particularly because no other strip center store had been built in that location at that time. (Kapur Dep. [185] at 120.23, 125.20-127.21.)

---

[16] *See also* *Am.'s Favorite Chicken Co. v. Cajun Enters., Inc., 130 F.3d 180, 183 (5th Cir. 1997)* ("the disclaimer clause in the franchise agreements states that [plaintiff] was not induced to execute the agreements by any extra-contractual representations" and that therefore "'[t]he misrepresentations and omissions upon which [plaintiff] bases its CFIL claims thus could not have been 'material'").

(5) Other Misrepresentations

Kapur also alleges other misrepresentations; however, none amount to false statements under the Act. For example, Kapur stated that Great Wraps said that it "was doing very well, it was growing very rapidly, people were very happy, they had sold many stores, they were opening many stores and were experiencing explosive growth." (Kapur Dep. [185] at 97.24-98.1.) Kapur, however, gave no evidence that these statements were untrue, and courts have determined that this language **[*33]** is puffery and therefore not actionable. See *Next Century Communs. Corp., 318 F.3d at 1028*.

In short, because the statute of limitations bars any claims and because Trident could not maintain a claim even if its claims were not time-barred, the Court **GRANTS** defendants' Motion for Summary Judgment [232] on Count Four as to all defendants.

F. Count Five: Violation of California Franchise Relations Act ("CFRA")

Trident alleges that, by terminating the Trident Agreement, Great Wraps and the individual defendants violated *Section 20020* of the California Franchise Relations Act (CFRA). ***HN16***[] CFRA provides that "no franchisor may terminate a franchise prior to the expiration of its term, except for good cause." *Cal. Bus. & Prof. Code § 20020* '(1980). (See Am. Compl. [11] at ¶ 216-218.) Good cause includes "the failure of the franchisee to comply with any lawful requirement of the franchise agreement after being given notice thereof and a reasonable opportunity, which in no event need be more than 30 days, to cure the failure." *Id.*

Defendants had good cause to terminate the Agreement. Great Wraps had given Trident notice in the form of a letter of default on November 10, 2006. (Solomon Aff. [191-6] at ¶ 11.) When the Agreement was terminated on January 10, 2007, Trident had not cured the **[*34]** failure. (*Id.* at ¶ 13.) Accordingly, Trident had been given a "reasonable opportunity"--over twice the specified time period--to cure the failure, and Great Wraps therefore as a matter of law did not violate the CFRA.

Furthermore, defendants can have no remedy under this Act. The only remedy CFRA provides is the repurchase of inventory. *Cal. Bus. & Prof. Code § 20035*. See *also* *Boat & Motor Mart v. Sea Ray Boats, Inc., 825 F.2d 1285, 1291 (9th Cir. 1987)* ("We conclude that [CFRA] itself provides no remedy . . . except repurchase."). Because Trident never opened a restaurant, it did not have any inventory to repurchase. Accordingly, even assuming plaintiff had a claim, the statutory remedy would be useless. Therefore, the Court **GRANTS** defendants' Motion for Summary Judgment [232] on Count Five as to all defendants.

G. Count Six: Violation of the Illinois Franchise Disclosure Act ("IFDA")

Plaintiff American, which operated in Illinois, alleges that Great Wraps and the individual defendants violated the *Illinois Franchise Disclosure Act (IFDA) of 1987, 815 Ill. Comp. Stat. Ann. 705/1 et seq. (1988)* (Am. Compl. [11] at If 220-227.) Plaintiff American, however, has failed to state any claims under this Act.

1. American's Claims Are Barred by the Statute of Limitations.

HN17[] The statute of limitations for **[*35]** the IFDA precludes a party from bringing an action to enforce any liability, unless it is brought within one year after the franchisee becomes aware of the facts or circumstances that give rise to the IFDA claim. *815 Ill. Comp. Stat. Ann. 705/27*.

American executed its Agreement on October 20, 2004. (See Solomon Aff. [191-6] at Ex. A.) The case was not filed until December 29, 2006. (Compl. [1].) Therefore, if American knew of any facts allegedly constituting a violation before December 29, 2005., the statute of limitations would bar a claim against such violations.

Prathipati, the principal of American, alleges that Great Wraps made untrue statements about construction costs, average gross sales, and training. (Prathipati Aff. [199-1] at ¶¶ 9, 16, 21). American began working as an area developer in October 2004 and began learning about construction costs by March 2005. (Prathipati Dep. [184] at 67.19; 71.11.) Prathipati received information about the approximate average gross sales for a store every month in 2005. (*Id.* at 78.4.) As for training, he complained that he had thought he would have received training within a few months of October 2004. (*Id.* at 90.18.) Therefore, he would have known about all these issues **[*36]** before December 2005, and the one-year statute of limitations thus bars American's claims.

2. Even if American's Claims Were Not Barred by the Statute of Limitations, American Cannot Maintain a Claim Under the Illinois Franchise Disclosure Act.

a. Defendants Did Not Violate *§ 705/5*.

American alleges that defendants violated *§ 705/5* of the IFDA by making an untrue statement of material fact in its UFOC. (Am. Compl. [11] at ¶ 222.) This section states that "[i]t is unlawful for any person to make or cause to be made any untrue statement of a material fact in any application, notice, or report filed with the Administrator, or to omit to state in any application, notice, or report any material fact." *815 Ill. Comp. Stat. Ann. 705/5(4)*.

Defendants allege that the UFOC in effect in 2004 did not disclose Chambers' position or role with Great Wraps. (Prathipati Aff. [199-1] at ¶ 25.) Chambers was a Director of Operations at this time. (Chambers Dep. [188-3] at ¶ 3.) Because Chambers was not involved in the offer or sale of the franchise to American and had no involvement in the preparation or delivery of the UFOC, the Court concludes that this fact is not material. (*Id.* at ¶ 6-7, 9-10.)

b. Defendants Did Not Violate *§ 705/6*.

American alleges that defendants **[*37]** violated *§ 705/6* of the I FDA by making untrue statements of material fact. This section states:

> [i]n connection with the offer or sale of any franchise made in this State, it is unlawful for any person, directly or indirectly, to . . . (b) make any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading.

815 Ill. Comp. Stat. Ann. 705/6(b).

HN18[] Because the false statements must relate to an "offer" or "sale," no statement made after the Agreement was signed can be considered. *Id.*

(1) Cost Estimates

First, American alleges that Great Wraps provided incorrect build-out information for Illinois. (Prathipati Aff. [199-1] at ¶ 16.) The statement American points to, however, is simply not false. The March 31, 2004 UFOC estimated costs at $260,300. (Prathipati Dep. [184] at Ex. 4.) Prathipati acknowledged in his deposition, however, that Koestner provided him with a range of $194,000 to $280,000 in March 2005, which is well within the range of the previous estimate. (Prathipati Dep. [184] at 71.25.) (*See also* Parker Dep. [188-1] at ¶ 10 ("With regard to build-out, store development and operations, I provided **[*38]** estimated costs which were clearly expressed as estimates only, and I, also, informed [p]laintiffs that the costs may vary by market and market conditions.")) Therefore, the cost estimate was not an untrue statement of material fact.

(2) Gross Sales

Prathipati alleged that he was told in March 2004 that the average sales of a store were over $400,000. (Prathipati Dep. [184] at 74.12-13, 74.22.) He had no evidence that average sales were less than $400,000, and he did not know what the average sales were for a Great Wraps store for any time in 2004. (*Id.* at 80.6.) Thus, again, plaintiff has failed to prove the statement was false.

(3) Training

Prathipati alleges that American did not receive the two-week training it had been promised. (*Id.* at 101.1.) He claims that he got one day of training one time and one week of training another time. (*Id.* at 101.6-10.) He also admitted, however, that he never sent his vice president for training in Atlanta, which he could have done, because his vice president had worked at Great Wraps before. (*Id.* at 107.9-23.) The Court concludes that the difference between eight days and fourteen days is not enough to constitute a material fact, particularly in light **[*39]** of the fact that American did not avail itself of all the training to which it was entitled. No employees of American or Trident ever went to Atlanta for multiple-week detailed operations training, and both plaintiffs "consistently ignored [defendants'] repeated oral and written requests to come to Atlanta to train." (Second Solomon Aff. [238-2] at ¶ 19.) Furthermore, neither plaintiff complained about training until well after filing suit and only after Great Wraps first raised the issue. (*Id.*)

(4) Registration

Prathipati alleges that Great Wraps failed to disclose that American would have to be registered with the State of Illinois, and it took Great Wraps almost three months to register American. (Prathipati Aff. [199-2] at ¶¶ 11-12.) However, defendants note that the delay was attributable, in large part, to Prathipati's taking one month to return information. (Second Solomon Aff. [238-2] at ¶ 9.) Additionally, Illinois took longer to process the information because of the holidays. (*Id.*) The Court does not find defendants' omission concerning the need to register was material and finds that plaintiff's actions contributed to any delay.

(5) Kickbacks

Prathipati alleges that Great Wraps **[*40]** received "kickbacks," (Second Prathipati Aff. [200-2] at ¶ 49-50), but in his deposition acknowledged no knowledge of such "kickbacks." (Prathipati Dep. [184] at 119.2.) Kapur likewise acknowledged no knowledge of kickbacks. (Kapur Dep. [185] at 133.21-134.5.)

(6) Additional Misrepresentations

In plaintiffs' interrogatory responses, American claimed several additional untrue statements of material fact. (*See* Prathipati Dep. [185], Ex. 5.) For example, American alleges that Koestner painted a "very rosy picture of Great Wraps growth," promised success, said that Chicago could handle fifty Great Wraps stores in the next five years, and assured Prathipati that Great Wraps gave excellent support. (*Id.* at 3.) Prathipati alleged all these statements to be untrue. The Court finds that these statements are puffery and are therefore not actionable. *See, e.g.,* *Next Century Communs. v. Ellis, 318 F.3d 1023, 1028*. *See also* *San Leandro Emergency Med. Group Profit Sharing Plan v. Philip Morris Cos., Inc., 75 F.3d 801, 807, 811 (2d Cir. 1996)* (the statement "[w]e expect 1993 to mark another year of strong growth in earnings per share" constituted non-actionable puffery, reasoning that a rational investor would not have relied thereon) (internal quotation marks omitted); *Lasker v. N.Y. State Elec. & Gas Corp., 85 F.3d 55, 59 (2d Cir. 1996)* ("by proffering its conviction that [its] 'business strategies [would] lead to continued prosperity,' **[*41]** [defendant] was in no way insuring that dividend rates would remain constant, or that the stock price would not decline. These statements consist of precisely the type of 'puffery' that this and other circuits have consistently held to be inactionable.") (citations omitted).

American also referenced Koestner's comment that there were no non-compete issues between Great Wraps and Quizno's and that Great Wraps did not return American's franchise fee after it terminated the agreement.[17] (*Id.* at 3, 10.) American did not provide any evidence for these unsubstantiated claims, and, therefore, they cannot be the basis for a claim.

c. Defendants Did Not Violate *§ 705/19*.

Finally, American alleges that defendants violated *§ 705/19* of the IFDA by improperly terminating American's franchise and the Franchise Agreement. This section states that "[i]t shall be a violation of this Act for a franchisor to terminate a franchise of a franchised business located in this State prior to the expiration of its term except for 'good cause.'" *815 Ill. Comp. Stat. Ann. 705/19*.

American claims that defendants terminated the Agreement in retaliation for the fact that plaintiffs filed an Amended Complaint [11]. (Pls.' Opp'n to Defs.' Mot. for Summ. J. [200] at 15.) Defendants, **[*42]** however, were entitled to terminate the Agreement because American did not open any stores, in violation of the plain terms of the Agreement, and because it did not cure its default within thirty days after receiving notice. (*See* Solomon Aff. [191-6], Ex. A at ¶ 2.1; *id.*, Ex. C at 2.1; *id.* at ¶ 11.) American admits this fact. (*See* Pls.' Resp. to Defs.' Statement of Material Facts [235-6] at ¶ 4.) Therefore, defendants could not have violated this Act.

Accordingly, the Court **GRANTS** defendants' Motion for Summary Judgment [232] on Count Six as to all defendants.

H. Counts Seven, Eight, and Nine: Violations of the Sherman Antitrust Act, the Clayton Act, and the Robinson-Patman Act

Plaintiffs allege that Great Wraps violated the Sherman Antitrust Act, the Clayton Act, and the Robinson-Patman Act by exercising monopoly power, discriminating in price, and illegally restraining trade through a tying arrangement. (Am. Compl. [11] at ¶¶ 229-271, 273-282, 284-292.) A "tying arrangement" is "[a] seller's agreement to sell one product or service only if the buyer also buys a different product or service." Black's Law Dictionary 1557 (8th ed. 2004). The "tying product" is "[t]he product or service **[*43]** that the buyer wants to buy," and the "tied product" is "the different product or service that the seller insists on selling." *Id.*

The Clayton Act states that "[i]t shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of goods . . . where the effect . . . may be to substantially lessen competition or tend to create a monopoly in any line of commerce." *15 U.S.C.A. § 14*. The "theories of liability are substantively synonymous" between the Sherman Act and the Clayton Act. *Bob Maxfield, Inc. v. Am. Motors Corp., 637 F.2d 1033, 1037 (5th Cir. 1981)* (citations omitted).[18] Therefore, courts generally analyze Sherman Act and Clayton Act claims together. *See, e.g.,* *S. Card & Novelty, Inc. v. Lawson Mardon Label, Inc., 138 F.3d 869, 874 (11th Cir. 1998)*.

Plaintiffs allege that defendants' "tying" arrangement violated the Robinson-Patman Act, which states that "[i]t shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality." *15 U.S.C.A. § 13*. (Am. Compl. [11] at ¶ 290.) Plaintiffs allege that price discrimination occurred because defendants' "actions required [p]laintiffs to charge higher prices for [their] services to the public in order to cover [the] **[*44]** higher costs due to the forced purchase [of] the tied products." (Am. Compl. [11] at ¶ 288.)

---

[17] Plaintiffs have not returned any money either, and neither Trident nor American ever asked for the return of their money prior to filing suit against Great Wraps. (Solomon Aff. [191-6] at ¶ 25; Second Solomon Aff. [238-2] at ¶ 13.)

[18] Decisions of the former Fifth Circuit filed prior to October 1, 1981 constitute binding precedent in the Eleventh Circuit. *Bonner v. City of Prichard, Ala., 661 F.2d 1206, 1207 (11th Cir. 1981)* (*en banc*).

HN19[] To establish an action for price discrimination under the Robinson-Patman Act, a plaintiff must allege and prove that there were two actual sales at two different prices made by the same seller to at least two different purchasers. *S. Bus. Communs., Inc. v. Matsushita Elec. Corp. of Am., 806 F. Supp. 950, 959 (N.D. Ga. 1992)*. Because there were no sales made in this case, there can be no violation of the Robinson-Patman Act. Further, as to plaintiffs' allegations of illegal tying, they have failed to establish that a tying arrangement existed. Thus, plaintiffs cannot make any viable antitrust claims under any of these Acts.

1. Sherman Act, *Section 1*

Plaintiffs allege a violation of *Section 1* of the Sherman Antitrust Act, which states that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C.A. § 1*. (Am. Compl. [11] at ¶ 234.)[19]

a. Plaintiffs Cannot Prove a Tying Violation.

Plaintiffs allege an illegal tying arrangement, under *Section 1*. **HN20**[] Such a claim has five elements:

> (1) "a tying and a tied product"; (2) "evidence of actual coercion by the seller that in fact forced the buyer to [purchase] **[*45]** the tied product"; (3) that the seller have sufficient market power in the tying product market to force the buyer to accept the tied product; (4) "anticompetitive effects in the tied market"; and (5) "involvement of a 'not insubstantial' amount of interstate commerce in the tied product market."

Amey, Inc. v. Gulf Abstract & Title, Inc., 758 F.2d 1486, 1502-03 (11th Cir. 1985) (citing *Yentsch. v. Texaco, Inc., 630 F.2d 46, 56-57 (2d Cir. 1980))*.

Courts have recognized that "[t]he first inquiry in any [Sherman Act] *§ 1* tying case is whether the defendant has sufficient market power over the tying product." *Allen-Myland, Inc. v. Int'l Bus. Machs. Corp., 33 F.3d 194, 200 (3d Cir. 1994)*. Therefore, plaintiffs would have to establish that Great Wraps had sufficient market power in the tying product to force the plaintiffs to accept the tied product.

Plaintiffs confuse "contract power" with "market power." Plaintiffs cite *Collins v. Int'l Dairy Queen, 980 F. Supp. 1252, 1260-61 (M.D. Ga. 1997)*, a case with similar facts, in which the court denied defendants' motion for summary judgment because it found that the franchisee was locked in to the agreement to buy tied products. (Pls.' Opp'n to Defs.' Mot. for Summ. J. [235] at 9-10.) However, in *Maris Distrib. Co. v. Anheuser-Busch, Inc., 302 F.3d 1207, 1224 n.11 (11th Cir. 2002)*, the Eleventh Circuit effectively overturned *Collins*: "we reject [*Collins*] in favor of what we consider to be the more persuasive rationale of *Queen City* and its progeny;" *Queen City* distinguished economic power and market power.[20] *Maris* held that **[*46]** "contract power is [not] equated to market power for antitrust purposes," *id.*, and that "the mere existence and exercise of contract power does not show that a defendant had market power or violated the law." *Id. at 1219*. A court therefore has to "attempt to ascertain a defendant's economic position in the relevant market, rather than its power pursuant to a particular contract, when considering whether a defendant has market power." *Id. See also United Farmers Agents Ass'n, Inc. v. Farmers Ins. Exch., 89 F.3d 233, 236-37 (5th Cir. 1996)* ("Economic power derived from contractual agreements such as franchises . . . 'has nothing to do with market power . . . or antitrust.'") (citation omitted).

---

[19] Defendants incorrectly argue that ***antitrust law*** does not apply to private disputes over a franchise contract (Defs.' Mot. for Summ. J. [232] at 5), and in fact cites several cases where courts do apply ***antitrust law*** in such instances.

[20] In *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 443 (3d Cir. 1997)*, the court concluded that the franchisee plaintiffs had to purchase products from Domino's not because of Domino's market power, but because they were contractually bound to do so.

Courts have recognized that it is difficult to prove market power in fast-food franchise cases: the "importance of proving that the owner of the tying product has real market power may doom the franchise trademark cases, as they mostly involve highly competitive retail industries, such as the fast-food business." *Jack Walters & Sons Corp. v. Morton Bldg., Inc., 737 F.2d 698, 705 (7th Cir. 1984)*. Such is the case here.

In addition, after the Supreme Court ruled in *Jefferson Parish* that a market share of thirty percent was not sufficient to establish an unlawful tie, courts have been reluctant to infer market power from a lower percentage.[21] *See, e.g., Brokerage Concepts, Inc. v. U.S. Healthcare, Inc., 140 F.3d 494, 517 (3d Cir. 1998)* ("since *Jefferson Parish*, no **[*47]** court has inferred substantial market power from a market share below [thirty] percent"); *Town Sound & Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 481 (3d Cir. 1992)* (defendant's ten to twelve percent share of the car market "provides unrefuted evidence that it lacks power in the tying product market"); *Marts v. Xerox, Inc., 77 F.3d 1109, 1113 n.6 (8th Cir. 1996)* (eighteen percent of photocopier market is insufficient to support antitrust tying).

In this case, plaintiffs allege that the relevant market is the "wrapped sandwich market" and that Great Wraps has "100%" of the market share for this product. (Am. Compl. [11] at ¶¶ 229-30; Pls.' Opp'n to Defs.' Mot. for Summ. J. [235] at 5.) The claim that Great Wraps does not compete against any other company defies this Court's own experience as a fast-food consumer. It is disingenuous for plaintiffs to use an artificially narrow definition of market power to claim Great Wraps has 100% of the market for wrapped sandwiches when it is clear that the relevant market is much broader.

First, a "market" is defined by "reasonably interchangeable" substitutes. *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. Courts have recognized that in franchise cases, the relevant market is not only a market for the specific type of food, but is "the fast food franchising market, or perhaps more generally, **[*48]** the franchising market." *Tominaga v. Shepherd, 682 F. Supp. 1489, 1494 (CD. Cal. 1988)* (referring to *Siegel v. Chicken Delight Inc., 448 F.2d 43, 50 (9th Cir. 1971))*.[22]

In *Tominaga*, the plaintiff franchisee implicitly argued that his restaurant, "Pizza Man," did not compete against any restaurants besides other "Pizza Man" restaurants. The district court concluded that the argument "that the relevant [tying] market is the 'Pizza Man franchising' market. . . . is erroneous as a matter of law." *Tominaga, 682 F. Supp. at 1494*. Therefore, Great Wraps' market is the franchise market, and Great Wraps must compete against all types of franchises, including, to name just a few, McDonald's, Chick-Fil-A, Burger King, Wendy's, Kentucky Fried Chicken, Arby's, Quizno's, Subway, Hardee's, Pizza Hut, and Taco Bell. (Solomon Aff. [191-6] at ¶ 19; Kaplan Aff. [191-5] at ¶ 3.)

Furthermore, Great Wraps is not the only restaurant that offers wrapped sandwiches. After Long John Silvers introduced wrapped sandwiches in 1996, at least thirty-two restaurants have added wrapped sandwiches to their menus, including Blimpie, Panera, Waffle House, Tropical Smoothie Cafe, and Steak Escape. (Kaplan Aff. [191-5] at ¶ 5.)

---

[21] *See Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 7, 27, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, *abrogated on other grounds by Ill. Tool Works, Inc. v. Indep. Ink, Inc., 547 U.S. 28, 31, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)* (defendant hospital's thirty percent share of market showed that it lacked the "kind of dominant market position that obviates the need for further inquiry into competitive conditions").

[22] Plaintiffs argue that *Chicken Delight* supports the proposition that a trademark gives a franchisor sufficient market power to violate antitrust laws, but this position has been strongly criticized and rejected. *See Tominaga, 682 F. Supp. at 1494* (stating that *Chicken Delight*'s analysis has been under "crippling attack" because "[i]t makes no economic sense to attribute significant market power to the Chicken Delight trademark"); *Principe v. McDonald's Corp., 631 F.2d 303, 309 (4th Cir. 1980)* (stating that "[f]ranchising has come a long way" since *Chicken Delight* and concluding that emphasis "upon the trademark as the essence of a franchise is too restrictive").

In the overall franchising market, Great Wraps possesses very little market power. **[*49]** In 2006, Great Wraps' market share was .04%.[23] (Solomon Aff. [191-6] at ¶ 21.) At the end of 2006, Great Wraps had only twelve stores in California, in a market with 60,761 eating establishments, and only seven stores in Illinois, in a market of 22,480 eating establishments. With these numbers, it is absurd to argue that Great Wraps possessed 100% market power.

Because plaintiffs cannot prove "sufficient market power" (and provide no evidence of market share or market power), their tying claim fails. Additionally, they do not meet any of the other prongs of the test. Because they never bought any supplies, there were no "tied products," so they do not meet the first prong. *See, e.g., Amey, Inc., 758 F.2d at 1503*. Because they never even bought an allegedly tied product, they cannot meet the second prong of the test, which requires actual coercion to buy the tied products. *See, e.g., Ungar v. Dunkin' Donuts of Am., Inc., 531 F.2d 1211, 1218 (3d Cir. 1976)* ("coercion is implicit . . . in the concept of leverage upon which the illegality of tying is premised"). Plaintiffs offer no evidence to support their claims that there were "anticompetitive effects in the tied product market" or "involvement of a 'not insubstantial' amount of interstate commerce in the tied product market," so they **[*50]** cannot meet the fourth and fifth prongs of the test. *See, e.g., Amey, Inc., 758 F.2d at 1503*.

b. Plaintiffs Cannot Show an Antitrust Injury.

HN21[] In addition to establishing liability, plaintiffs challenging violations of the antitrust laws must also show that they have suffered "antitrust injury," that is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Plaintiffs must show both an injury to themselves as a competitor and an injury to competition in general. *L.A. Draper & Son v. Wheelabrator-Frye, Inc., 735 F.2d 414, 421 (11th Cir. 1984)*.

Plaintiffs allege that defendants have violated the antitrust laws "by the illegal 'tying arrangement' of Great Wraps exploiting its control over" the franchise, which was the "'tying product.'" (Am. Compl. [11] at ¶ 246.) Plaintiffs claim that they were required to purchase "tied product[s]," items such as food and uniforms, from Great Wraps and its approved suppliers and contractors. (*Id.* at ¶ 247.)

HN22[] The Eleventh Circuit has held that an "injury resulting from a tie-in must be shown by establishing that payments for both the tied and tying products exceeded their combined fair market value." *Kypta v. McDonald's Corp., 671 F.2d 1282, 1285 (11th Cir. 1982)*. *See also Olmstead v. Amoco Oil Co., 725 F.2d 627, 630-31 (11th Cir. 1984)* (applying *Kypta* to find directed verdict for defendant on tying claim); *Midw. Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 718-19 (11th Cir. 1984)* (applying **[*51]** *Kypta* to endorse the district court's grant of summary judgment for defendants on tying claims).

Though plaintiffs claim that they were charged "higher prices" for the tied items (Am. Compl. [11] at ¶ 234), they have not provided any evidence that the tied and tying products exceeded their combined fair market value. *See Burden v. Int'l Longshoremen's Ass'n, Local No. 1410, 510 F.Supp.2d 618, 628 n.9 (S.D. Ala. 2007)* (citation omitted) (an "assertion in the unverified amended complaint . . . is not evidence for purposes of a motion for summary judgment.") American's owner said that he had no evidence that he could have bought any other food for a lower price. (Prathipati Dep. [184] at 120.7-9.) He also said that he had not investigated other vendors' prices, did not know if other vendors carried all the products, and admitted that franchisees saved money and time to have "one-stop shopping." (*Id.* at 120.10-124.2.)

Similarly, Trident's owner admitted that some of the prices from Great Wraps' vendors were lower than he could have gotten from other vendors. (Kapur Dep. [185] at 204-25.) Additionally, plaintiffs have provided no evidence that they purchased or even attempted to purchase any of the tied products. (Solomon Aff. [191-6] at ¶¶ 8-9, 18.)

[23] The top eighteen sandwich chains had sales of over $92 billion in 2005. Quizno's, another sandwich shop, had sales of over $1.7 billion, but a market share of only 2.29% of the top 100 restaurant chains. Great Wraps had sales of approximately $32 million, meaning that its market share was less than .04%. (Solomon Aff. [191-6] at ¶¶ 21-22.)

Also, the Agreement had a provision **[*52]** that allowed plaintiffs to purchase from other vendors with Great Wraps' permission, but plaintiffs never requested such approval in writing, as required by the Agreements. (Solomon Aff. [191-6] at ¶¶ 17-18; Prathipati Dep. [184] at 122.17-123.11.)[24]

Accordingly, plaintiffs cannot show any type of injury, much less one "of the type the antitrust laws were intended to prevent." *Brunswick Corp., 429 U.S. at 489*. Furthermore, if there had been antitrust violations, plaintiffs would have been an active participant in them, as they received a portion of franchise fees and royalties from franchisees who opened up Great Wraps franchises in their territories. (*See* Solomon Aff. [191-6] at ¶¶ 14-16.)

Therefore, because plaintiffs cannot prove a tying violation or establish an antitrust injury, the Court **GRANTS** defendants' Motion for Summary Judgment [232] on Section l of the Sherman Act.

2. *Section 2* of the Sherman Act

Plaintiffs also allege a violation under *Section 2* of the Sherman Act, which holds liable "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C.A. § 2*.

HN23[] To establish monopolization, **[*53]** a plaintiff must show both "possession of monopoly power in the relevant market, and the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Ad-Vantage Tel. Dir. Consultants, Inc. v. GTE Directories Corp., 849 F.2d 1336, 1341 (11th Cir. 1987)* (citations omitted). As with *Section 1* of the Sherman Act, plaintiffs cannot prove that Great Wraps had monopoly power. See supra II.H.1.a Also as with *Section 1*, plaintiffs cannot prove that an antitrust injury occurred because they never opened any store. *See supra* II.H.1.b.

Accordingly, because plaintiffs cannot prove that defendants had monopoly power or that plaintiffs suffered an antitrust injury, the Court **GRANTS** defendants' Motion for Summary Judgment [232] on *Section 2* of the Sherman Act. Moreover, because plaintiffs cannot establish a tying arrangement or antitrust injury, their antitrust claims fail under the Sherman Act, Clayton Act, and Robinson-Patman Act. The Court therefore **GRANTS** defendants' Motion for Summary Judgment [232] on Counts Seven, Eight, and Nine.

I. Count Ten: Expenses of Litigation

Plaintiffs allege that "[d]efendants have acted in bad faith, been stubbornly litigious and/or caused Plaintiffs unnecessary trouble and expenses," **[*54]** therefore entitling plaintiffs to recover their litigation expenses, including attorneys' fees, pursuant to *O.C.G.A. § 13-6-11*.[25] (Am. Compl. [11] at ¶ 294.)

HN24[] A party can recover expenses of litigation "where the evidence reveals no bona fide controversy or dispute with regard to the defendant's Liability." *Steel Magnolias Realty, LLC v. Bleakley, 276 Ga. App. 155, 157, 622 S.E.2d 481 (2005)* (citations omitted). In this case, defendants have been granted summary judgment on each

[24] Prathipati claimed that he asked Great Wraps for a food vendor in Chicago, but he never put the request in writing and has no evidence for that claim. (Prathipati Dep. [184] at 123.3-11.) Kapur also stated that he was "forbidden to look for alternate sources of supplies," but he likewise gave no evidence to support that claim. (Kapur Dep. [185] at 204.20-22.)

[25] *O.C.G.A. § 13-6-11* states in relevant part:

> The expenses of litigation generally shall not be allowed as a part of the damages; but where the plaintiff has specially pleaded and has made prayer therefor and where the defendant has acted in bad faith, has been stubbornly litigious, or has caused the plaintiff unnecessary trouble and expense, the jury may allow them.

claim, except the breach of contract claim. Therefore, defendants have done better than show a bona fide controversy; they have prevailed on these claims.

As to the one claim that remains to be tried--the breach of contract claim--plaintiffs have not rebutted defendants' arguments that a bona fide dispute exists on this claim. If a bona fide controversy does exist, "a recovery under this Code section is impermissible unless there is evidence that the defendant has acted in bad faith in the underlying **[*55]** transaction." Id. (Citation and internal quotation marks omitted.) ***HN25***[] Bad faith is more than "bad judgment or negligence" it requires a "dishonest purpose" and "conscious doing of wrong." *Rapid Group, Inc. v. Yellow Cab of Columbus, Inc., 253 Ga. App. 43, 49, 557 S.E.2d 420 (2001)* (citation and internal quotation marks omitted). *See* *Pulte Home Corp. v. Woodland Nursery & Landscapes, Inc., 230 Ga. App. 455, 457, 496 S.E.2d 546 (1998)* (finding insufficient evidence of bad faith because no showing that developer "acted through ill will or furtive design" or "sinister motive"). Here, plaintiffs have offered no evidence that the defendants acted in bad faith with a "dishonest purpose" or "conscious doing of wrong." *Rapid Group, Inc., 253 Ga. App. at 49* (internal quotation marks omitted); *see supra* II.D.2.b.

In fact, defendants offered to discuss the situation, rather than terminate the Agreements, when they sent plaintiffs notices that the latter had breached the Agreements. (*See* Solomon Aff. [191-6] at ¶ 12 ("[I]n September and November of 2006, we invited both to contact us and to discuss changes to their respective Agreements so that our relationships could continue. Neither ever responded in a meaningful fashion.").) Accordingly, the Court concludes that defendants did not act in bad faith.

Additionally, ***HN26***[] a recovery of expenses of litigation "must be based upon evidence which shows more than a mere breach of contract." **[*56]** *Pulte Home Corp., 230 Ga. App. at 457* (citation and internal quotation marks omitted). Because the court is granting summary judgment as to the other claims, it concludes that the case can, at best, be nothing more than a breach of contract suit.[26] Therefore, the Court **GRANTS** defendants' Motion for Summary Judgment [232] on Count Ten.

III. Plaintiffs' Motions for Summary Judgment

Because the Court has granted Defendants' Motion for Summary Judgment [232] on Counts Two-Ten, Plaintiffs' Motions for Summary Judgment ([236], [237]) are **DENIED as moot** on Counts Two, Three, Four, Five, Six, and Ten.[27]

Though defendants did not move for summary judgment on Count One--breach of contract--plaintiffs did. (Pl.'s Mot. for Summ. J. [236] at 25; Pl.'s Mot. for Summ. J. [237] at 24.) Yet, as has become their trademark, plaintiffs did not make any legal arguments, but simply stated that breach of contract had "been proven" by the facts alleged in Plaintiff's Statement of Material and Undisputed Facts and defendants' admissions. Of course, as is their practice, plaintiffs did not specify any admissions. (*Id.*) Defendants responded in their Opposition to American's Motion for Summary Judgment ([240] at 23) to the arguments that they believed **[*57]** American might have made, had plaintiffs chosen to actually brief their own motion: (1) that Great Wraps did not register American promptly in Illinois; (2) that Great Wraps did not account for regional advertising funds collected from area franchisees; (3) that Great Wraps did not provide training; and (4) that Great Wraps improperly terminated the agreement.

---

[26] While plaintiffs say that defendants admitted "to their knowing violation of the law" (Pls.' Opp'n to Defs.' Mot. for Summ. J. [235] at 18), they provide no citation to the record alleging where defendants made this admission. Plaintiffs also say that they are entitled to expenses of litigation because defendants "engaged in a series of improper actions in refusing to provide proper discovery." *Id.* Regardless of whether this statement is true, ***HN27***[] expenses of litigation relate only "to the transaction upon which the underlying action is based and refers to a time prior to the institution of suit, not defendant's conduct in defending the case." *M & H Constr. Co., Inc. v. N. Fulton Dev. Corp., 238 Ga. App. 713, 715, 519 S.E.2d 287 (1999)*' (citations omitted). Therefore, actions during discovery are irrelevant to a court's determination of expenses of litigation.

[27] Plaintiffs did not move for summary judgment on Counts Seven, Eight, or Nine. (*See* (Pl.'s Mot. for Summ. J. [236]; Pl.'s Mot. for Summ. J. [237].)

Defendants state that their delay in registering American was due to American's delay in providing the necessary paperwork and that American has not shown how it was damaged by the delay. (Second Solomon Aff. [238-2] at ¶ 9.) Defendants also state that the defendants never collected any regional advertising. (*Id.* at ¶ 11.) Defendants state that American never sent designees to Atlanta for training, so American cannot argue that Great Wraps did not provide training. (*Id.* at ¶ 19.) Finally, defendants contend that Great Wraps appropriately terminated the contract under the Agreement, which stated that Great Wraps could "declare this Agreement immediately terminated" in the event of default. (Solomon Aff. [191-6], Ex. A at § 8) Plaintiffs admitted that they had defaulted and did not cure the default in the appropriate thirty-.day period. **[*58]** (Pls.' Resp. to Great Wraps' Statement of Material Facts [235-6] at ¶ 4.)

The Court therefore concludes that defendants have shown "genuine issues of material fact," and it **DENIES** Plaintiffs' Motions for Summary Judgment ([2361, [2371) on Count One.

IV. Defendants' Motion for Sanctions

A. Standard for Sanctions

Defendants filed a Motion for Sanctions [233] against Trident and American, alleging that their claims "violate[d] *Rule 11* because they were made for an improper purpose and have needlessly increased the costs and scope of litigation." (Defs.' Mot. for Sanctions [233] at 2.)

HN28[] *Rule 11* Sanctions are appropriate

> (1) when a party files a pleading that has no reasonable factual basis; (2) when the party files a pleading that is based on a legal theory that has no reasonable chance of success and that cannot be advanced as a reasonable argument to change existing law; or (3) when the party files a pleading in bad faith for an improper purpose.

Worldwide Primates, Inc. v. McGreal, 87 F.3d 1252, 1254 (11th Cir. 1996) (quoting *Jones v. Int'l Riding Helmets, Ltd., 49 F. 3d 692, 694 (11th Cir. 1995))*; *Fed. R. Civ. P. 11 (b)*.

HN29[] *Rule 11*.(b) sets forth the underpinning standard upon which a motion for sanctions should be judged:

> [b]y presenting to the court a pleading . . . an attorney . . . certifies that to the best of [his] knowledge, information, and belief, formed after an inquiry **[*59]** reasonable under the circumstances (1) it is not being presented for any improper purpose, such as to harass, cause unnecessary delay, or needlessly increase the cost of litigation; (2) the claims, defenses, and other legal contentions are warranted by existing law or by a nonfrivolous argument for extending, modifying, or reversing existing law or for establishing new law; (3) the factual contentions have evidentiary support or, if specifically so identified, will likely have evidentiary support after a reasonable opportunity for further investigation or discovery; and (4) the denials of factual contentions are warranted on the evidence or, if specifically so identified, are reasonably based on belief or a lack of information.

In short, *Rule 11* requires an attorney to make a reasonable investigation to determine whether his claims are viable. *See**Fed. R. Civ. P. 11(b) (2)-(4)*. ***HN30***[] The Eleventh Circuit has noted that, before imposing sanctions, a court must determine whether the claims are frivolous and, if so, whether the person who signed the pleadings made a reasonable inquiry that would have revealed their frivolity. *Int'l Riding Helmets, Ltd., 49 F.3d at 695* (citing *McGuire Oil Co., Inc. v. Mapco, 958 F. 2d 1552, 1563 (11th Cir. 1992))*. To satisfy this reasonable inquiry" standard, an attorney must investigate both the facts and **[*60]** the law to determine if "there is a reasonable basis for maintaining the action or position taken in the papers. *Patterson v. Aiken, 111 F.R.D. 354, 355 (N.D. Ga. 1986)*, *aff'd*, *841 F.2d 386 (11th Cir. 1988)*. An attorney acts in bad faith if he pursues claims "that a reasonably careful attorney would have known, after appropriate inquiry, to be unsound." *In re TCI Ltd., 769 F.2d 441, 445 (7th Cir.*

1985). If an attorney does not make a reasonable inquiry, the court must impose sanctions even if the attorney has a good faith belief that the claims were sound. *Int'l Riding Helmets, Ltd., 49 F.3d at 695*.

B. Plaintiffs Have Filed Numerous Claims That Lack Reasonable Factual Basis or Are Based on Legal Theories with No Reasonable Chance of Success.

Plaintiffs have filed numerous claims that lack a reasonable factual basis or are based on legal theories that have no reasonable chance of success. *See Worldwide Primates, Inc., 87 F.3d at 1254*. As the Court has illustrated, *supra*, plaintiffs' claims were all meritless. Indeed, plaintiff mustered only the puniest of efforts to defend these claims.

Plaintiffs' Count Two--breach of the covenant of good faith--is not an independent contract term under Georgia law. *See supra at 8-10*. Any reasonable research effort would have uncovered that fact Plaintiffs also assert that Georgia law does not apply, but provide no legal support or other explanation for that assertion. *Id.*

For **[*61]** Count Three-the fraud claim--plaintiffs failed to show any actual or actionable misrepresentations made by defendants. *See supra at 10-23*.

Plaintiffs' claims under the CFIL and IFDA--Counts Four and Six--are barred by the statute of limitations *See supra at 24, 35* A reasonable inquiry into the law would have revealed this fact Plaintiffs are also without any legal support to argue that the statute of limitations should not apply because they did not know about the claims until they were told by counsel. (Pls.' Opp'n to Defs.' Mot. for Summ. J. [200] at 8.) Furthermore, plaintiffs' claims under these laws are frivolous, even if the statute of limitations did not apply. *See, e.g., supra at 27 et seq.*, 36 *et seq.*

Plaintiffs' claim for violation of the California Franchise Relations Act--Count Five--is also frivolous, as the only remedy the Act provides for is a repurchase of a franchisee's inventory, of which plaintiffs had none. *See supra at 33-34*. Additionally, CRFA allows a defendant to terminate a contract for good cause, which Great Wraps clearly had in this situation. *Id.* Indeed, defendants offered to try to work the matter out with plaintiffs, and it was plaintiffs who sued.

Plaintiffs' antitrust claims--Counts Seven, Eight, and Nine--are **[*62]** particularly frivolous. *See supra at 42 et seq.* Plaintiffs do not cite any evidence in their briefs for these claims other than restating the conclusory allegations in their unverified Amended Complaint [11]. Plaintiffs' contention that Great Wraps possesses 1000 of the market share for its "Unique Services" is absurd and insulting to the intelligence of the reader. (Am. Compl. [11] at ¶¶ 229-30.) Plaintiffs never purchased any tied products anyway, and they never presented any evidence about market share or market power. (Solomon Aff. [191-6] at ¶¶ 8-9, 18.)

Plaintiffs also offer no support or evidence to explain how 3 defendants have exhibited "bad faith," which showing is required to hold them liable for the expenses of litigation, set out in Count Ten. *See Rapid Group, Inc., 253 Ga. App. at 49*. Plaintiffs also argue that defendants should pay expenses of litigation because of defendants' improper actions during discovery, even though Georgia law only allows recovery for actions instituted prior to a suit. *See M & H Constr. Co., Inc., 238 Ga. App. at 715*. Again, a reasonable inquiry of the applicable law should have made plaintiffs aware of that fact.

Also egregious is plaintiffs' suit against a Board member, Mr. Strauss, against whom plaintiffs have no evidence Plaintiffs **[*63]** admit they "do not have information"[28] to contradict Strauss's testimony that he was a "passive investor, was a Board member who did not prepare any information for plaintiffs, had no dealings with plaintiffs, and

[28] (*See* Pls.' Resp. to Defs.' Great Wraps, Mark Kaplan, Robert Solomon and Henry Strauss' Statement of Undisputed Facts [200-4] at ¶ 17.)

had no knowledge of any incorrect information. (Strauss Aff. [191-7] at ¶¶ 91 4-10.) Plaintiffs have no reasonable factual basis to sue Strauss.[29]

With each of their frivolous claims, plaintiffs have clouded the record with irrelevant and incorrect law, unsubstantiated facts, and conclusory allegations, thus wasting a great deal of the defendants' and the Court's time. Accordingly, defendants ' Motion for Sanctions is **GRANTED**. The Court assesses against plaintiffs' counsel fees and expenses in an amount to be shown at either a hearing or subsequent filing by defendants, as set out below.

CONCLUSION

For the foregoing reasons, the Court **DENIES** defendants f Motion for Clarification [229], **GRANTS** defendants' Motion for Summary Judgment [232], **DENIES** plaintiffs' Motions for Summary Judgment ([236], [237]), and **GRANTS** defendants ' Motion for Sanctions [233].

Defendants shall set out in a memorandum, to be filed within **sixty (60) days**, the fees and expenses it seeks as sanctions. Defendants **[*64]** shall properly document and explain its basis for the amounts sought. Plaintiffs may respond within **thirty (30) days** after the filing of defendants' response.

The consolidated joint pretrial order will also be due within **sixty (60) days**. The parties shall comply with all requirements for that document as set out by local rule. Given plaintiffs' counsel's difficulty in understanding how a claim should be prosecuted, the Court directs plaintiffs to also set out in the pretrial order each particular breach of contract that it alleges. Plaintiffs shall also cite to the particular section of the agreement on which they rely. Plaintiffs should provide a brief statement of why they contend a breach occurred. Defendants, in turn, should provide a brief explanation of its position as to each alleged breach.

SO ORDERED, this 31 day of March, 2009

/s/ Julie E. Carnes

JULIE E. CARNES

CHIEF UNITED STATES DISTRICT JUDGE

End of Document

[29] Though he is no longer a defendant, plaintiffs also sued Rotondo, who did not begin working for Great Wraps until over fourteen months after Trident signed its Agreement. (Rotondo Dep. [211] at 33.20) This sloppy and promiscuous naming of uninvolved defendants provides another reason to sanction plaintiffs' behavior.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Sherman Act, Claims**

The appellate court reviews de novo a district court's decision to dismiss a complaint for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*. In its review, the appellate court accepts a plaintiff's factual allegations as long as they raise a right to relief above the speculative level. Particularly in the antitrust context, the Supreme Court cautions that a district court must retain the power to insist on some specificity in pleading before allowing a potentially massive factual controversy to proceed.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Sherman Act, Claims**

To prove antitrust injury, the key inquiry is whether competition--not necessarily a competitor--suffered as a result of the challenged business practice. Unless an antitrust plaintiff alleges an injury that arises from an anticompetitive aspect of the practice under scrutiny, the complaint will not survive *Fed. R. Civ. P. 12(b)(6)* scrutiny.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

A naked assertion gets the complaint close to stating a claim, but without some further factual enhancement it stops short of the line between possibility and plausibility.

Antitrust & Trade Law > Sherman Act > Claims

HN4[] **Sherman Act, Claims**

But even where a business carries a significant portion of the market share, ***antitrust law*** is not a negotiating tool for a plaintiff seeking better contract terms.

Antitrust & Trade Law > Sherman Act > Claims

HN5[] **Sherman Act, Claims**

No cognizable antitrust injury exists where the alleged injury is a byproduct of the regulatory scheme or federal law rather than of the defendant's business practices.

Opinion by: COOK

Opinion

[*570] **[***1]** COOK, Circuit Judge. The Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac") regulate the residential-mortgage-loan industry by requiring mortgage brokers and lenders to consider a consumer's credit information before approving loans. Specifically, federal regulations require brokers **[***2]** and lenders to purchase data from each of the three nationwide consumer reporting agencies ("NCRAs")--Experian, Ltd., TransUnion LLC, and Equifax, Inc. Plaintiffs **[**2]** CBC Companies, Inc. and CBC Innovis, Inc. (collectively, "CBC") are resellers--companies that purchase consumer credit information from all three NCRAs and consolidate the data into a "tri-merged report." As a cheaper alternative, some resellers also sell copies of tri-merged reports, or "reissues." CBC filed this antitrust lawsuit against Equifax, Inc. and its reseller subsidiary, Equifax Information Services LLC (collectively, "Equifax"), after Equifax implemented a contractual fee that CBC alleges will restrict the ability of resellers to offer reissues. Equifax moved to dismiss the case, and CBC now appeals the district court's **[*571]** grant of that motion. Because CBC failed to allege an antitrust injury and thus lacks standing, we affirm.

I.

After conducting business absent a contract for two years, Equifax demanded that CBC sign an agreement (the "Reseller Agreement") as part of a new policy that allegedly required resellers to pay a fee--comparable to the price of an original tri-merged report--each time a reseller sold a reissue. CBC responded by filing this lawsuit on July 31, 2006, citing violations of *Sections 1* and *2 of the Sherman Act*. [1] *15 U.S.C. §§ 1*, *2*. Alleging that Equifax **[**3]** threatened to terminate its status as a reseller, CBC signed the Reseller Agreement a few months later. After CBC filed suit, Equifax changed the fee terms pertaining to reissues multiple times. Equifax first announced a decrease in the fee to $ 1.05 per reissue, then switched to an algorithm-based penalty, and finally, declared that an "explicit per-transaction formula" would determine a fee based on each reseller's volume of sales.

CBC contends that by requiring resellers to pay a fee upon selling each reissue--despite not purchasing new data--Equifax harnesses the "monopoly power" it shares with other NCRAs in the market of providing credit data (the "Mortgage Reseller Market") in order to monopolize and attempt to monopolize the service of providing consumer credit information to mortgage lenders (the "Mortgage Lender **[***3]** Market") in violation of *Sections 1* and *2 of the Sherman Act*. *15 U.S.C. §§ 1*, *2*. Because only lenders (not brokers) have the option of purchasing reissues as opposed to original tri-merged reports, the Mortgage Lender Market is at issue here. Concluding that CBC's complaint **[**4]** amounted to a mere contract dispute over price terms, the district court held that CBC failed to allege any antitrust injury and lacked antitrust standing as a result. The court dismissed the case, and CBC timely appealed.

II.

HN1[] We review de novo a district court's decision to dismiss a complaint for failure to state a claim under *Federal Rule of Civil Procedure 12(b)(6)*. *J&R Mktg., SEP v. Gen. Motors Corp., 549 F.3d 384, 389 (6th Cir. 2008)*. In our review, we accept a plaintiff's factual allegations as long as they "raise a right to relief above the speculative level." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Particularly in the antitrust context, the Supreme Court cautions that "a district court must retain the power to insist on some specificity in pleading before allowing a potentially massive factual controversy to proceed." *Mich. Division-Monument Builders of N. Am. v. Mich. Cemetery Ass'n, 524 F.3d 726, 731-32 (6th Cir. 2008)* (quoting *Twombly, 550 U.S. at 558*).

The district court dismissed CBC's complaint because it failed to allege any antitrust injury--a "necessary, but not always sufficient," component of antitrust standing. *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 110 n.5, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*; **[**5]** *see* *NicSand, Inc. v. 3M NicSand, Inc.., 507 F.3d 442, 450 (6th Cir. 2007)* (en banc) ("[A]ntitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement we must dismiss it as a matter of law."). ***HN2***[] To prove **[*572]** antitrust injury, the key inquiry is whether *competition*--not necessarily a competitor--suffered as a result of the challenged business practice. *See* *NicSand, 507 F.3d at 450* ("[O]ne competitor may not use the antitrust laws to sue a rival merely for vigorous or intensified competition."); *see also* *J.B.D.L. Corp. v. Wyeth-Ayerst Labs., Inc., 485 F.3d 880, 887 (6th Cir. 2007)* (requiring an antitrust plaintiff to demonstrate that "the alleged violation tended to reduce competition overall" and that "the plaintiff's injury was a consequence of the resulting diminished competition" (citation omitted)). Unless an antitrust plaintiff **[***4]** alleges an injury that arises from "an anticompetitive aspect of the practice under scrutiny," the complaint will not survive *Rule 12(b)(6)* scrutiny. *See* *NicSand, 507 F.3d at 451* (quoting *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*). CBC contends that it established the requisite injury **[**6]** for antitrust standing by alleging that Equifax is leveraging its "monopoly power" in the Mortgage Reseller Market to restrain competition in the Mortgage Lender Market by "imposing and

[1] The complaint at issue here is the First Amended Complaint, which CBC filed in August 2007.

threatening to impose financial penalties on Resellers that sell Reissues, and by diminishing and threatening to diminish the competitive advantage Reissues enjoy over [tri-merged] reports." This argument is meritless.

First, CBC's complaint contains only conclusory allegations, and not facts sufficient to support more than a speculative injury to competition. *See* *Twombly, 550 U.S. at 555*. CBC suggests that Equifax is: (1) diminishing the competitive advantage of reissues over tri-merged reports; (2) restricting competition between its own reseller subsidiary, Equifax Mortgage, and other resellers; and (3) increasing reissue costs and decreasing options for mortgage lenders. In effect, CBC argues injury in the form of "higher costs [for reissues] and loss of market share in the Mortgage Lender Market."

But CBC's complaint fails to allege key facts to substantiate an antitrust injury--that is, that competition in the Mortgage Lender Market decreased due to Equifax's Reseller Agreement. Although the complaint **[**7]** contends that "CBC Innovis and other Resellers are the principal victims of Equifax's unlawful actions," CBC never identifies any of these other resellers, and never establishes whether any of these resellers signed a contract similar to the Reseller Agreement. *See* *Total Benefits Planning Agency, Inc. v. Anthem Blue Cross & Blue Shield, 552 F.3d 430, 437 (6th Cir. 2008)* ("Without an explanation of the other insurance companies involved, and their products and services, the court cannot determine the boundaries of the relevant product market and must dismiss the case for failure to state a claim."). Moreover, although CBC filed its amended complaint in August 2007, several months after signing the Reseller Agreement, the complaint fails to allege any specific increases in costs for its reissues or lost market sales in the Mortgage Lender Market. CBC's complaint offers **[***5]** generalized allegations of antitrust injury, but the Supreme Court requires more than "naked assertion[s]" to establish antitrust standing. *See* *NicSand, 507 F.3d at 451* (quoting *Twombly, 550 U.S. at 557*). As the *Twombly* Court pronounced, ***HN3***[] "a naked assertion . . . gets the complaint close to stating a claim, but without **[**8]** some further factual enhancement it stops short of the line between possibility and plausibility." *550 U.S. at 557*.

Second, the facts alleged in CBC's complaint suggest that CBC's fundamental frustration is with the price **[*573]** terms of the Reseller Agreement, rather than specific anticompetitive behavior. Summarizing its own complaint, CBC argues that because it "pleaded that Equifax's unilaterally imposed contractual restrictions impair resellers' ability to compete and that Equifax is the only source of a necessary input, the Amended Complaint presents triable issues of fact." Essentially, CBC disagrees with the price terms of the contract that Equifax proposed and CBC later signed. ***HN4***[] But even where a business carries a significant portion of the market share, ***antitrust law*** is not a negotiating tool for a plaintiff seeking better contract terms. *See* *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, L.L.P., 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*; *Arthur S. Langenderfer, Inc. v. S.E. Johnson Co., 917 F.2d 1413, 1428 (6th Cir. 1990)* ("'*Section 2 of the Sherman Act* does not give [plaintiffs] the exclusive right to dictate the terms on which they will deal,' nor does it require [the defendant] to accede **[**9]** to every demand of [the plaintiffs].") (quoting *Trace X Chem., Inc. v. Canadian Indus., Ltd., 738 F.2d 261, 266-67 (8th Cir. 1984))*.

Third, to the extent that CBC alleges an impact on the Mortgage Lender Market, the federal regulations are the more likely basis for any putative injury, and not any specifically anticompetitive conduct on the part of Equifax. ***HN5***[] No cognizable antitrust injury exists where the alleged injury is a "byproduct of the regulatory scheme" or federal law rather than of the defendant's business practices. *RSA Media, Inc. v. AK Media Group, Inc., 260 F.3d 10, 13, 15 (1st Cir. 2001)*; *see* *Standfacts Credit Servs. v. Experian Info. Solutions, Inc., 294 F. App'x 271, 272 (9th Cir. 2008)* (holding that even where the NCRA defendants held "monopoly power in the wholesale market," plaintiff **[***6]** resellers could not succeed on their antitrust claims where the monopoly power derived from federal requirements and not anticompetitive conduct). The district court properly concluded that CBC's complaint failed to allege facts sufficient to support an antitrust injury, and thus rightly dismissed the complaint for failure to establish antitrust standing.

III.

We affirm the district court's **[**10]** decision dismissing CBC's complaint.

CIVIL MINUTES — GENERAL

PROCEEDING (IN CHAMBERS): GRANTING COUNTERCLAIM DEFENDANT'S MOTION TO DISMISS THE FOURTH CAUSE OF ACTION TO THE AMENDED COUNTERCLAIM

Before the Court is Counterclaim Defendants CWIE, LLC's and Ira Ronald Cadwell's Motion to Dismiss Counterclaim for Failure to State a Claim under *Federal Rule of Civil Procedure 12(b)(6)*. The Court finds the matter appropriate for **[*2]** decision without oral argument. *Fed. R. Civ. P. 78*; *Local R. 7-15*. After considering the moving, opposing, and replying papers thereon, and for the reasons set forth below, the Court hereby GRANTS WITH PREJUDICE the Motion to Dismiss the fourth cause of action to the amended counterclaim.

I. BACKGROUND

CWIE, LLC and its principal, Ira Ronald Cadwell, (collectively, the "Counterclaim Defendants") are in competition in the Internet networking business with Bandwidth Consulting, Inc. and Ari Benowitz (collectively, the "Counterclaimants"). Counterclaim Defendants operate a wholesale Internet access and website hosting business and serve Internet based businesses with bandwidth and hosting requirements. In 2002, Counterclaim Defendants provided cash, computer equipment, training, technical support, and a customer call center to help with the launch of Bandwidth Consulting, Inc. ("BandCon"). BandCon was also included on an already existing contract between CWIE, LLC ("CWIE") and a third party to obtain bandwidth. In exchange for Counterclaim Defendant's support, Counterclaimants agreed to grant Counterclaim Defendants a 10 percent interest in the company and promised Counterclaim Defendants its interest would never be **[*3]** diluted. Counterclaimants also promised to pay Counterclaim Defendants 10 percent of its annual net income.

CWIE sued Counterclaimants for failing to abide by this written agreement when Counterclaimants failed to pay 10 percent of its annual income and diluted CWIE's interest in the company to between 7 and 8 percent. Counterclaimants counterclaimed and asserted eleven causes of action arising from breaches of fiduciary duty, breach of contract, unfair competition, and other related wrongs. Counterclaimants amended their counterclaim to include only ten causes of action. The Counterclaim Defendants have filed this Motion to Dismiss for Failure to State a Claim (the "Motion") as to the fourth cause of action in Counterclaimants' amended counterclaim (the "Fourth Cause of Action") only. Counterclaimants' Fourth Cause of Action alleges violation of the California Unfair Competition Laws as outlined by the *California Business and Professions Code § 17200, et seq.*[1]

II. LEGAL STANDARD

Under *Federal Rule of Civil Procedure 12(b)(6)*, a complaint must be dismissed when a plaintiff's allegations fail to state a claim upon which relief can be granted. Once it has adequately stated a claim, a plaintiff may support the allegations in its complaint with any set of facts consistent with those allegations. **[*4]** *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1969, 167 L. Ed. 2d 929 (2007)*; see *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1990)* (stating that a complaint should be dismissed only when it lacks a "cognizable legal theory" or sufficient facts to support a cognizable legal theory). Dismissal for failure to state a claim does not require the appearance, beyond a doubt, that the plaintiff can prove "no set of facts" in support of its claim that would entitle it to relief. *Bell Atlantic, 127 S. Ct. at 1968* (abrogating *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*.

The Court must accept as true all factual allegations in the complaint and must draw all reasonable inferences from those allegations, construing the complaint in the light most favorable to the plaintiff. *Guerrero v. Gates, 442 F.3d 697, 703 (9th Cir. 2006)*; *Balistreri, 901 F.2d at 699*. Dismissal without leave to amend is appropriate only when the Court is satisfied that the deficiencies in the complaint could not possibly be cured by amendment. *Jackson v. Carey, 353 F.3d 750, 758 (9th Cir. 2003)* (citing *Chang v. Chen, 80 F.3d 1293, 1296 (9th Cir. 1996))*; *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)*.

III. DISCUSSION

Counterclaimants' Fourth Cause of Action alleges Counterclaim Defendants violated *§17200* when (1) Ira Ronald Cadwell ("Cadwell") held himself out to be the owner of BandCon and advised a customer to transfer its internet structure needs to a BandCon competitor and discontinue payments to BandCon; (2) Cadwell instructed BandCon competitors to "watch what BandCon does, and when they do it, do it," indicating that competitors should imitate **[*5]** BandCon; (3) Cadwell negotiated with a BandCon customer, Alpha Red's, accounts payable and debts

---

[1] All further statutory citations are to the Business and Professions Code unless otherwise indicated.

directly with Alpha Red's various vendors and creditors, stating that he was overriding the management of Alpha Red and dictating which vendors Alpha Red would pay; and (4) Counterclaim Defendants' misrepresentations that it was in control of Alpha Red caused other customers to become suspicious that BandCon was no longer financially sound because its accounts receivable from Alpha Red were in jeopardy.

§ 17200 states in part, "unfair competition shall mean and include any unlawful, unfair or fraudulent business act or practice..." Its coverage is "sweeping, embracing 'anything that can properly be called a business practice and that at the same time is forbidden by law. '" (*Rubin v. Green (1993) 4 Cal.4th 1187, 1200, 17 Cal.Rptr.2d 828, 847 P.2d 1044*, quoting *Barquis v. Merchants Collection Assn. (1972) 7 Cal.3d 94, 113, 101 Cal.Rptr. 745, 496 P.2d 817*). However, the statutory language referring to "any unlawful, unfair or fraudulent" practice makes clear that a practice may be deemed unfair even if not specifically proscribed by some other law. *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal.4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (Cal. 1999)*.

Unfair competition includes any unlawful, unfair, or fraudulent business act or practice. In order to limit broad and general claims of "unfair business acts or practices" under *§ 17200*, the Supreme Court of California found **[*6]** it necessary to narrow the definition of "unfair" as it is applied to claims alleged against business competitors:

> To guide courts and the business community adequately and to promote consumer protection, we must require that any finding of unfairness to competitors under *[§] 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition. We thus adopt the following test: When a plaintiff who claims to have suffered injury from a direct competitor's "unfair" act or practice invokes *[§] 17200*, the word "unfair" in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.
>
> *Id. at 186-187*.

Counterclaim Defendants argue that the Fourth Cause of Action has not been tethered to any legislative or declared policy and, therefore, must be dismissed for failure to state a claim.

Counterclaimants argue that the Fourth Cause of Action is valid because it does not allege that Counterclaim Defendants' conduct was "unfair," but rather that the conduct was "fraudulent." **[*7]** A business practice is fraudulent under *§ 17200* if members of the public are likely to be deceived. *See* *Comm. On Children's Television v. General Foods. Corp., 35 Cal. 3d 197, 211, 197 Cal. Rptr. 783, 673 P.2d 660 (1983)*; *see also,* *Schnall v. Hertz Corp., 78 Cal. App. 4th 1144, 93 Cal. Rptr. 2d 439 (2000)* (business practice was fraudulent where customers of defendant car rental provider were likely to be deceived). The only element required to prove a fraudulent act is the likelihood of deception. *Children's Television, 35 Cal. 3d at 211*; *accord,* *Schnall, 78 Cal. App 4th at 1167*; *People v. Orange County Charitable Servs., 73 Cal. App. 4th 1054, 1076, 87 Cal. Rptr. 2d 253 (1999)*.

The parties in this case dispute whether the Fourth Cause of Action alleges "fraudulent acts" or "unfair acts" within the definition of "unfair competition" as outlined in *§17200*. In their Opposition, Counterclaimants allege several "fraudulent acts" including: (1) deception by Cadwell which caused a customer to transfer its business from BandCon to a competitor; (2) imitating and inducing others to imitate BandCon's business practices causing a competitor to mirror their website; (3) overriding management of a customer's accounts payable; and (4) causing other BandCon customers to become suspicious of BandCon's financial viability.

A problem arises as this Court interprets the Supreme Court of California's decisions in *Children's Television*, which broadened *§ 17200* to include more than anti-competitive business practice and include "the right of the public to protection from fraud **[*8]** and deceit." *Children's Television, 35 Cal. 3d at 209*. Counterclaimants argue that their claim is "fraudulent" and thus gives them the liberty to simply allege that "customers have been deceived." However, *Children's Television* requires that claims for "fraudulent acts" allege that the general public was deceived. *Id.* Therefore, Counterclaimants must allege in its pleading deception beyond those misrepresentations to its customers, and more specifically, must plead misrepresentations made to the general public which are likely to deceive the general public.

Counterclaim Defendants have cited federal decisions dismissing state claims for violation of unfair competition laws when fraudulent conduct is alleged. In *Sybersound Records, Inc. V. UAV Corp., 517 F. 3d 1137 (9th Cir. 2008)*, the Ninth Circuit dismissed Sybersound's claim under *§ 17200* because it failed to state a claim and did not plead that UAV's "misrepresentations [were] likely to deceive members of the general public." *Sybersound, 517 F. 3d at 1153*. Sybersound and UAV are competitors that produce and sell karaoke records. *Id. at 1141*. UAV falsely told customers that Sybersound's karaoke recordings infringed on copyrights. *Id.* UAV also made misrepresentations to customers that they had all of the necessary licences when they held only compulsory licenses or no licenses at all. **[*9]** *Id.* These facts are similar to the facts in the instant case, in which Counterclaim Defendants allegedly made misrepresentations to Counterclaimants' customers.

Because the Ninth Circuit held that UAV's misrepresentations to customers were not likely to deceive the general public in *Sybersound*, this Court finds that Counterclaim Defendant's misrepresentations to Counterclaimants' customers, sophisticated companies, were also not likely to deceive members of the general public, and therefore, are not "fraudulent acts" under *§ 17200*. *See also National Rural Telecommunications Co-op. v. DIRECTV, Inc., 319 F.Supp.2d 1059, 1078 (C.D. Cal. 2003)*; *Watson Labs. Inc. v. Rhone-Poulenc Rorer, Inc., 178 F.Supp.2d 1099, 1121 (C.D. Cal. 2001)* (it is necessary under the "fraudulent" prong [of *§ 17200*] to show deception to some members of the public, or harm to the public interest, and not merely to the direct competitor or other non-consumer party to a contract). Sophisticated companies, like Defendant BanCon here and its corporate clients, are not members of the "general public." *See* *Rosenbluth Int'l., Inc. v. Superior Court, 101 Cal.App.4th 1073, 1078, 124 Cal.Rptr.2d 844, 847 (2002)*.

The deficiency in Counterclaimants' counterclaim cannot be cured and the claim under *§ 17200* fails as a matter of law. Accordingly, the Court hereby GRANTS WITH PREJUDICE Counterclaim Defendant's Motion to Dismiss the fourth cause of action to the counterclaim.

IV. DISPOSITION

For the reasons set forth above, Counterclaim Defendants **[*10]** Motion to Dismiss the Fourth Cause of Action to the Amended Counterclaim is hereby GRANTED WITH PREJUDICE.

The Clerk shall serve this minute order on all parties to the action.

Nichols v. Mahoney

United States District Court for the Southern District of New York

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) provides for dismissal of a complaint that fails to state a claim upon which relief can be granted. The standard of review on a motion to dismiss is heavily weighted in favor of the plaintiff. In ruling on a motion to dismiss for failure to state a claim upon which relief may be granted, the court is required to accept the material facts alleged in the complaint as true. The court is also required to read a complaint generously, drawing all reasonable inferences from its allegations in favor of the plaintiff.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN2[] **Motions to Dismiss, Failure to State Claim**

While a complaint attacked by a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Indeed, a plaintiff must assert enough facts to state a claim to relief that is plausible on its face. This "plausibility standard" is a flexible one, obliging a pleader to amplify a claim with some factual allegations in those contexts where such amplification is needed to render the claim plausible.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN3[] Motions to Dismiss, Failure to State Claim

In assessing whether a proposed amendment to a complaint is futile, a court uses the standard for a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN4[] Racketeer Influenced & Corrupt Organizations, Claims

To establish a Racketeer Influenced and Corrupt Organizations Act (RICO) violation under *18 U.S.C.S. § 1962(c)*, a plaintiff must allege and prove four elements: (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity. These requirements apply whether the RICO claim is civil or criminal in nature. In addition, a civil RICO claimant must show: (1) a violation of the RICO statute, *18 U.S.C.S. § 1962*; (2) an injury to business or property; and (3) that the injury was caused by the violation of *§ 1962*.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN5[] Racketeer Influenced & Corrupt Organizations, Claims

18 U.S.C.S. § 1962(c) of the Racketeer Influenced and Corrupt Organizations Act (RICO) statute makes it unlawful for any person employed by or associated with any enterprise to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity. To plead a RICO violation, a plaintiff must allege the existence of two distinct entities: (1) a person; and (2) an enterprise that is not simply the same person referred to by a different name. *Section 1961(3)* defines a person as any individual or entity capable of holding a legal or beneficial interest in property. *18 U.S.C.S. § 1961(3)*. An "enterprise" is defined as any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity. *18 U.S.C.S. § 1961(4)*. The enterprise requirement is most easily satisfied when the enterprise is a formal legal entity. However, an association-in-fact may also be a RICO enterprise.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN6[] Racketeer Influenced & Corrupt Organizations, Claims

The corporate owner/employee, a natural person, is distinct from the corporation itself, a legally different entity with different rights and responsibilities due to its different legal status. Nothing in the Racketeer Influenced and Corrupt Organizations Act statute requires more separateness than that.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN7[] Racketeer Influenced & Corrupt Organizations, Claims

An association-in-fact theory is a group of persons associated together for a common purpose of engaging in a course of conduct which is proved by evidence of an ongoing organization, formal or informal, and by evidence that the various associates function as a continuing unit. Common sense suggests that the existence of an association-in-fact is oftentimes more readily proven by what it does, rather than by abstract analysis of its structure. Thus, proof of various racketeering acts may be relied on to establish the existence of the charged enterprise. While the question of whether a group of individuals or corporations exhibit such organization and common purpose is ordinarily one of fact, the complaint must allege facts that permit an inference that such an association exists.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN8[] **Racketeer Influenced & Corrupt Organizations, Claims**

The distinctness requirement of Racketeer Influenced and Corrupt Organizations Act (RICO) helps a court determine whether an association-in-fact exists: In practice, the dual requirements of (1) distinctness and (2) the proof needed to demonstrate an association-in-fact, work in tandem to weed out claims dressed up as RICO violations but which are not in fact. Specifically, the distinctness doctrine requires a plaintiff to demonstrate that the RICO person is legally separate from the RICO enterprise, while the association-in-fact requirement helps ensure that distinctness is not achieved by simply tacking on entities to the enterprise which do not in fact operate as a "continuing unit" or share a "common purpose."

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN9[] **Racketeer Influenced & Corrupt Organizations, Claims**

The distinctness requirement and proof of an association-in-fact are met by showing that the third party added to the enterprise shares a common purpose with the enterprise.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN10[] **Racketeer Influenced & Corrupt Organizations, Claims**

For a plaintiff to plead a substantive violation of the Racketeer Influenced and Corrupt Organizations Act (RICO) statute, he must allege a pattern of racketeering activity, and to establish a RICO conspiracy, a plaintiff must show a conspiracy to commit a substantive RICO violation. Thus, claims under both *18 U.S.C.S. § 1962(c)* and *(d)* require that a plaintiff allege a pattern of racketeering activity. To survive a motion to dismiss, this pattern must be adequately alleged in the complaint.

Immigration Law > Enforcement of Immigration Laws > Employer Liabilities & Obligations > General Overview

HN11[] **Enforcement of Immigration Laws, Employer Liabilities & Obligations**

See *8 U.S.C.S. § 1324(a)(3)*.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Immigration Law > Enforcement of Immigration Laws > Employer Liabilities & Obligations > General Overview

HN12[] Racketeer Influenced & Corrupt Organizations, Claims

In the U.S. Court of Appeals for the Second Circuit, it has long been that law that a plaintiff relying on *§ 273(a)(3) of the Immigration and Nationality Act* (INA) as a predicate act must allege both that the defendant knowingly hired illegal aliens and that the defendant had actual knowledge that the illegal aliens it hired were brought into the country in violation of the statute in order to plead a violation of *§ 274(a)(3) of the INA.*

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Immigration Law > Enforcement of Immigration Laws > Employer Liabilities & Obligations > General Overview

HN13[] Racketeer Influenced & Corrupt Organizations, Claims

Congress wrote two different statutes addressing the hiring of illegal aliens, One entitled "Unlawful employment of aliens" makes it illegal to hire illegal aliens knowing that the aliens are not authorized to work. *8 U.S.C.S. § 1324a*. A violation of this statute is not a Racketeer Influenced and Corrupt Organizations Act (RICO) predicate act. The other makes it illegal knowingly to hire illegal aliens who are known to have been smuggled ("brought") into the United States. *8 U.S.C.S. § 1324*. A violation of that statute is a RICO predicate act. The key difference between the two statutes is the employer's knowledge of how the illegal alien arrived in the United States. If the employer does not know that at least 10 of its illegal hires were "brought into" the country by some third party (as opposed to walking across the border themselves, or arriving on a visitor's or student visa and overstaying their welcome), then it has not committed a RICO predicate act by hiring them--even though it has committed a federal crime by knowingly hiring the aliens without regard to how they entered the country.

Immigration Law > Enforcement of Immigration Laws > Employer Liabilities & Obligations > General Overview

HN14[] Enforcement of Immigration Laws, Employer Liabilities & Obligations

See *8 U.S.C.S. § 1324a(a)(1)-(2)*.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Immigration Law > Enforcement of Immigration Laws > Employer Liabilities & Obligations > General Overview

HN15[] Racketeer Influenced & Corrupt Organizations, Claims

It is not enough for a plaintiff to allege that the defendants hired illegal aliens--or even that they did so knowingly. Rather, a plaintiff must allege that the defendant knew both that at least 10 of its employees were undocumented aliens and that those 10 employees arrived in the United States in a manner that qualifies as being "brought" here. Moreover, the plaintiff must plead facts tending to show that the statute specified by Congress as a predicate act was violated.

Immigration Law > Enforcement of Immigration Laws > Employer Liabilities & Obligations > General Overview

HN16[] Enforcement of Immigration Laws, Employer Liabilities & Obligations

Purely conclusory allegations about defendants' knowledge of the means by which their employees entered the United States is insufficient.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN17[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The Twombly case applies in more than antitrust cases. Indeed, the U.S. Court of Appeals for the Second Circuit has indicated that there are certain types of cases where Twombly obliges a pleader to amplify a claim with some factual allegations in those contexts where such amplification is needed to render the claim plausible. A civil Racketeer Influenced and Corrupt Organizations Act case is just such a case.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN18[] **Racketeer Influenced & Corrupt Organizations, Claims**

If Twombly means anything, it means that, bald assertions and conclusions of law will not suffice. The pleadings must create the possibility of a right to relief that is more than speculative. Therefore, after Twombly, a plaintiff in a civil Racketeer Influenced and Corrupt Organizations Act lawsuit must plead some facts tending to show that his ultimate conclusion is "plausible."

Immigration Law > Enforcement of Immigration Laws > Employer Liabilities & Obligations > General Overview

HN19[] **Enforcement of Immigration Laws, Employer Liabilities & Obligations**

See *8 U.S.C.S. § 1324(a)(1)(A)(iii)*.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Immigration Law > Enforcement of Immigration Laws > Employer Liabilities & Obligations > General Overview

HN20[] **Racketeer Influenced & Corrupt Organizations, Claims**

To plead a violation of *§ 274(a)(1)(A)(iii) of the Immigration and Nationality Act*, *8 U.S.C.S. § 1324(a)(1)(A)(iii)*, a plaintiff must allege both that (1) the "person" knew or recklessly disregarded the alien's unlawful status, and (2) the "person" took steps that were intended to help the illegal alien remain undetected. Violation of *§ 274(a)(1)(A)(iii) of the Immigration and Nationality Act* is a predicate act under the Racketeer Influenced and Corrupt Organizations Act.

Immigration Law > Enforcement of Immigration Laws > Employer Liabilities & Obligations > General Overview

HN21[] Enforcement of Immigration Laws, Employer Liabilities & Obligations

Within the meaning of § 274(a)(1)(A)(iii) of the Immigration and Naturalization Act, *8 U.S.C.S. § 1324(a)(1)(A)(iii)*, harboring encompasses conduct tending substantially to facilitate an alien's remaining in the United States illegally and to prevent government authorities from detecting his unlawful presence. Harboring comprises a wide range of conduct, including providing illegal aliens housing, transportation, arranging sham marriages, assisting them in getting employment, teaching them to hide their illegal identity, and sheltering illegal aliens from the immigration authorities and shielding them from observation to prevent their discovery.

Immigration Law > Enforcement of Immigration Laws > Employer Liabilities & Obligations > General Overview

HN22[] Enforcement of Immigration Laws, Employer Liabilities & Obligations

Hiding aliens from immigration authorities violates the statute. Installing a security system designed to alert illegal aliens of an impending governmental raid or inspection to help the illegal aliens escape detection constitutes harboring. Shutting down a jobsite to prevent a detection is no different than putting an alarm bell on a site to tell the illegal aliens to run away.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN23[] Racketeer Influenced & Corrupt Organizations, Claims

A plaintiff only has standing to sue under *18 U.S.C.S. § 1964(c)* if the alleged violation under the Racketeer Influenced and Corrupt Organizations Act (RICO) was the proximate cause of the plaintiff's injury. To allege proximate cause, a plaintiff must show some direct relation between the injury asserted and injurious conduct alleged. In other words, when a court evaluates a RICO claim for proximate causation, the central question it must ask is whether the alleged violation led directly to the plaintiff's injuries. In evaluating whether the plaintiff's alleged violation meets this "directness" requirement, courts should consider the policy reasons behind it. The U.S. Supreme Court has identified three reasons for requiring a direct connection between the alleged RICO violation and the plaintiff's injury: (1) the factual difficulty of measuring indirect damages and distinguishing among distinct independent causal factors; (2) the complexity of apportioning damages among plaintiffs to obviate the risk of multiple recoveries; and (3) the fact that the need to grapple with these problems is simply unjustified by the general interest in deterring injurious conduct, since directly injured victims can generally be counted on to vindicate the law.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

HN24[] Racketeer Influenced & Corrupt Organizations, Claims

The plaintiff must show that the defendant's violation not only was "but for" cause of his injury, but was the proximate cause as well. The U.S. Court of Appeals for the Second Circuit has equated "but for" and "proximate" cause with "transaction" and "loss" causation.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN25[] Sherman Act, Scope

Section 1 of the Sherman Act prohibits, every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States. 15 U.S.C.S. § 1. To establish a § 1 violation, a plaintiff must produce evidence sufficient to show: (1) a combination or some form of concerted action between at least two legally distinct economic entities; and (2) such combination or conduct constituted an unreasonable restraint of trade either per se or under the rule of reason. Thus, a § 1 plaintiff must allege that the defendants entered into some type of an agreement (tacit or express) with a separate entity. This is because it is perfectly plain that an internal "agreement" to implement a single, unitary firm's policies does not raise the antitrust dangers that § 1 was designed to police.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN26[] Private Actions, Standing

A private plaintiff may not recover damages under the antitrust laws unless it demonstrates that it has suffered an "antitrust injury." Courts colloquially refer to this requirement as "antitrust standing." It is entirely distinct from standing under Article III of the Constitution. An "antitrust injury" is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. To demonstrate antitrust injury, a plaintiff must show (1) an injury-in-fact; (2) that has been caused by the violation; and (3) that is the type of injury contemplated by the statute. Thus, the antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior. Antitrust standing serves the same function as proximate cause under the Racketeer Influenced and Corrupt Organizations Act (which derives from antitrust standing).

Antitrust & Trade Law > Sherman Act > Claims

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN27[] Sherman Act, Claims

Even if a plaintiff adequately alleges an antitrust injury, he may lack standing for other reasons. These include: (1) the directness or indirectness of the asserted injury; (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (3) the speculativeness of the alleged injury; and (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries.

Antitrust & Trade Law > Sherman Act > Claims

HN28[] Sherman Act, Claims

Plaintiff bears the initial burden of showing that the challenged action has had an actual adverse effect on competition as a whole in the relevant market.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN29[] Public Enforcement, State Civil Actions

See *N.Y. Gen. Bus. Law § 340*.

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN30[] Standing, Sherman Act

The Donnelly Act, *N.Y. Gen. Bus. Law § 340*, was modeled after the Sherman Act. In fact, it is often called the "Little Sherman Act," and courts are instructed that Donnelly should generally be construed in light of federal precedent and given a different interpretation only where state policy, differences in the statutory language or the legislative history justify such a result. Thus, if the plaintiffs do not have standing to assert a federal antitrust claim, they do no have standing to bring a Donnelly Act claim.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN31[] Antitrust & Trade Law, Sherman Act

Although undoubtedly the sweep of Donnelly Act may be broader than that of Sherman Act, under the familiar canon of statutory construction, noscitur a sociis, the term, "arrangement", takes on a connotation similar to that of the other terms with which it is found in company, and thus must be interpreted as contemplating a reciprocal relationship of commitment between two or more legal or economic entities similar to but not embraced within the more exacting terms, "contract", "combination" or "conspiracy."

Business & Corporate Compliance > ... > Wage & Hour Laws > Scope & Definitions > Minimum Wage

Business & Corporate Compliance > ... > Wage & Hour Laws > Scope & Definitions > Overtime & Work Periods

HN32[] Scope & Coverage, Minimum Wage

Section 216(b) of the Fair Labor Standards Act provides a right of action to any employee whose employer violates the provisions of *29 U.S.C.S. § 206* or *29 U.S.C.S. § 207*, which govern wages and hours, respectively. *Section 206(a)* requires "Every employer" to pay a minimum wage to each of his employees. *29 U.S.C.S. § 206*. *Section 207(a)(1)* requires an employer to pay its employees overtime wages. *29 U.S.C.S. § 207*. Under that section, employers must pay employees at a rate of not less than one and one-half times the employee's regular rate for hours worked in excess of forty per week. *29 U.S.C.S. § 207(a)*. The type of "work" covered by this section is defined as physical or mental exertion (whether burdensome or not) controlled or required by the employer and pursued necessarily for the benefit of the employer and his business.

Business & Corporate Compliance > ... > Wage & Hour Laws > Scope & Definitions > Minimum Wage

Labor & Employment Law > Wage & Hour Laws > Scope & Definitions > Enterprise Coverage

HN33[] **Scope & Coverage, Minimum Wage**

The minimum wage and maximum hour requirements of the Fair Labor Standards Act apply only to employees who are engaged in commerce or in the production of goods for commerce, or who are employed in an enterprise engaged in commerce or in the production of goods for commerce. *29 U.S.C.S. §§ 206(a)*, *207(a)*. *29 U.S.C.S. § 203(s)(1)* defines an "Enterprise engaged in commerce," to include any enterprise that has employees engaged in commerce or that has employees handling, selling, or otherwise working on goods or materials that have been moved in or produced for commerce by any person, and that has gross annual revenues of $ 500,000 or more.

Labor & Employment Law > Wage & Hour Laws > Scope & Definitions > General Overview

HN34[] **Wage & Hour Laws, Scope & Definitions**

Where a plaintiff alleges violations of the Fair Labor Standards Act's minimum and overtime wage provisions, the complaint should, at least approximately, allege the hours worked, for which wages were not received.

Labor & Employment Law > Wage & Hour Laws > Scope & Definitions > Definition of Employers

Labor & Employment Law > Wage & Hour Laws > Scope & Definitions > Enterprise Coverage

HN35[] **Scope & Definitions, Definition of Employers**

Under *29 U.S.C.S. § 203(s)(1)*, there are two ways in which an employer is considered to have "engaged in commerce:" by pleading individual or enterprise coverage. First, for an employee to qualify for individual coverage under the Fair Labor Standards Act (FLSA), he must have personally performed work involving or related to the movement of persons or things between states. *29 C.F.R. § 779.103*. Second, for enterprise coverage, the plaintiffs' employer must have engaged in interstate commerce. Courts have noted that virtually every enterprise in the nation doing the requisite dollar volume of business is covered by the FLSA.

Labor & Employment Law > Wage & Hour Laws > Scope & Definitions > Definition of Employers

HN36[] **Scope & Definitions, Definition of Employers**

Individuals with significant decision-making authority over a company may be liable as employers under the Fair Labor Standards Act.

Labor & Employment Law > Wage & Hour Laws > Statute of Limitations

HN37[] **Wage & Hour Laws, Statute of Limitations**

Generally, the Fair Labor Standards Act has a two-year statute of limitations, except in the case of willful violations, for which the statute of limitations is three years. *29 U.S.C.S. § 255(a)*. A violation is willful, if the employer knew or showed reckless disregard for the matter of whether its conduct was prohibited by the statute.

Labor & Employment Law > Wage & Hour Laws > Scope & Definitions > General Overview

HN38[] **Wage & Hour Laws, Scope & Definitions**

The relevant portions of the New York State Labor Law, *N.Y. Lab. Law §§ 190 et seq.*, do not diverge from the Fair Labor Standards Act.

Opinion by: Colleen McMahon

Opinion

[*529] DECISION GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS THE COMPLAINT AND GRANTING PLAINTIFFS' CROSS MOTION FOR LEAVE TO AMEND

McMahon, J.:

Defendants move to dismiss plaintiffs' complaint. Plaintiffs oppose the motion, and cross-move for leave to amend, attaching a proposed amended complaint.

An order disposing of these motions issued on March 31. Plaintiffs' motion for leave to amend was granted. However, because both their original and amended pleadings failed to state claims under the civil RICO statute or antitrust laws, defendants' motion to dismiss Counts I, II and III (RICO Claims), IV (violation of the Sherman Act, *15 U.S.C. § 1*) and V (violation of the Donnelly Act, *N.Y. Gen. Law. § 340 et seq*.) of the plaintiffs' complaint was granted and the claims were dismissed with prejudice. Defendants' motion **[**2]** to dismiss Counts VI (violation of the Fair Labor Standards Act) and Count VII (violation of New York Labor Law) was denied.

This opinion explains the reasons for the court's ruling.

The Gravamen of this Action

This is the latest in a series of civil RICO actions that have been filed in various federal courts across the nation, capitalizing on the popular outcry against undocumented aliens who are working openly in the United States. Plaintiffs, Andrew Nichols and Daniel Moraes, are construction workers who were formerly employed by the defendant corporations and their owner, Michael T. Mahoney. They allege that their wages were depressed because the defendants knowingly hired undocumented aliens, in violation of *Section 274 of the Immigration and Nationality Act*, *8 U.S.C. § 1324(a)*. Plaintiffs also contend that defendants' actions constituted an illegal "scheme" to restrain free competition within the construction industry, by giving defendants an unfair advantage over employers who do not employ illegal workers.

Plaintiffs also allege that they were not properly compensated for overtime hours worked or paid minimum wage, in violation of the Fair Labor Standards Act, *29 U.S.C. § 201 et seq.* **[**3]** and *New York Labor Law §§ 190 et seq*., *650 et seq*.

Discussion

I. Standard of Review

A. Motion to Dismiss

HN1[] *Rule 12(b)(6) of the Federal Rules of Civil Procedure* provides for dismissal of a complaint that fails to state a claim upon which relief can be granted. The standard of review on a motion to dismiss is heavily weighted in favor of the plaintiff. "In ruling on a motion to dismiss for failure to state a claim upon which relief may be granted, the court is required to accept the material facts alleged in the complaint as true." *Frasier v. Gen. Elec. Co., 930 F.2d 1004, 1007 (2d Cir. 1991)*. The court is also required to read a complaint generously, drawing all reasonable inferences from its allegations in favor of the plaintiff. *California Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 515, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*.

[*530] ***HN2***[] "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 1964, 167 L. Ed. 2d 929 (2007)* (quotations, **[**4]** citations and alterations omitted). Indeed, a plaintiff must assert "enough facts to state a claim to relief that is plausible on its face." *Id. at 1974*. This "plausibility standard" is a flexible one, "oblig[ing] a pleader to amplify a claim with some factual allegations in those contexts where such amplification is needed to render the claim plausible." *Iqbal v. Hasty, 490 F.3d 143, 157-58 (2d Cir. 2007)*, cert. granted, *128 S. Ct. 2931, 171 L. Ed. 2d 863 (2008)*.

B. Leave to Amend

HN3[] In assessing whether a proposed amendment to a complaint is futile, a court uses the standard for a motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*. *Esposito v. Deutsche Bank AG, 07 civ. 6722, 2008 U.S. Dist. LEXIS 101460, 2008 WL 5233590 at *3 (S.D.N.Y. Dec. 16, 2008)* (citing *Dougherty v. Town of N. Hempstead Bd. of Zoning Appeals, 282 F.3d 83, 88 (2d. Cir. 2002))*. The court has granted plaintiffs' leave to amend and will evaluate both the original and the proposed amended complaints in this decision.

II. Plaintiff Fails to State Any Viable Civil RICO Claim

Pursuant to *18 U.S.C. § 1964(c)*, the plaintiffs allege violations under *sections 1962(c)* and *(d)* (RICO conspiracy) of the RICO statute.

HN4[] To establish a RICO violation under *section 1962(c)*, **[**5]** a plaintiff must allege and prove four elements: "'(1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity.' These requirements apply whether the RICO claim is civil or criminal in nature." *City of New York v. Smokes-Spirits.Com, Inc., 541 F.3d 425, 439 (2d Cir. 2008)* (quoting *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 496, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985))*.

In addition, a civil RICO claimant must show: "(1) a violation of the RICO statute, *18 U.S.C. § 1962*; (2) an injury to business or property; and (3) that the injury was caused by the violation of *Section 1962*." *Spool v. World Child Int'l Adoption Agency, 520 F.3d 178, 183 (2d Cir. 2008)* (quotation and citation omitted).

Defendants contend that the plaintiffs fail to plead sufficiently (1) the existence of an enterprise; (2) a substantive violation of *section 1962*; and (3) proximate cause. Plaintiffs' original complaint does not adequately plead a substantive violation (predicate act). They try to cure that defect in two different ways in their amended complaint; one way works, and one does not. However, the amended pleading fails to plead proximate cause between the predicate acts and plaintiffs' injury. Therefore, the RICO claims **[**6]** must be dismissed.

A. Both the Original Complaint and The Proposed Amended Complaint Adequately Plead Conduct of An "Enterprise"

HN5[] *Section 1962(c)* of the RICO statute makes it "unlawful for any person employed by or associated with any enterprise . . . to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity . . . ." *18 U.S.C. § 1962(c)*. To plead a RICO violation, a plaintiff "must allege….the existence of two distinct entities: (1) a 'person'; and (2) an 'enterprise' that is not simply the same 'person' referred to by a different name." *Cedric Kushner Promotions, Ltd. v. King, 533 U.S. 158, 161-62, 121 S. Ct. 2087, 150 L. Ed. 2d 198 (2001)*; *Smokes-Spirits, 541* **[*531]** *F.3d at 446*. *Section 1961(3)* defines a person as "any individual or entity capable of holding a legal or beneficial interest in property." *18 U.S.C. § 1961(3)*. An "enterprise" is defined as "any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity." *18 U.S.C. § 1961(4)*; *Smokes-Spirits, 541 F.3d at 447*; *Kottler v. Deutsche Bank AG, 607 F. Supp. 2d 447, 2009 WL 55885, at *5 (S.D.N.Y. 2009)*.

The **[**7]** enterprise requirement is most easily satisfied "when the enterprise is a formal legal entity." *First Capital Asset Mgmt., Inc. v. Satinwood, Inc., 385 F.3d 159, 173 (2d Cir. 2004)*. However, an association-in-fact may also be a RICO enterprise. Id.

In this case, the plaintiffs allege the existence of both a formal legal entity enterprise (Count I) and an association-in-fact enterprise (Count II). The defendants contend that neither enterprise pleading satisfies the requirements of RICO. They are wrong on both accounts.

In Count I, the plaintiffs allege that Mahoney, the principal of the EMC entities, is the "person," and that the EMC entities are the enterprise. These allegations are sufficient to plead the existence of two distinct entities. *Cedric Kushner, 533 U.S. at 166*. In Cedric Kushner, the Supreme Court reversed and remanded the Second Circuit's decision affirming the dismissal of the plaintiff's complaint. The plaintiff sued Don King, the president and sole shareholder of Don King Productions, alleging violations of the RICO statute. The district court dismissed the complaint because it found that King was not a "person" who was distinct from "the enterprise," but rather was **[**8]** part of the enterprise. For many years, it was the law in this Circuit that a corporation and its employees could not constitute an "enterprise." However, in an unanimous decision, the Supreme Court undid that precedent, holding, *HN6*[] "The corporate owner/employee, a natural person, is distinct from the corporation itself, a legally different entity with different rights and responsibilities due to its different legal status. And we can find nothing in the statute that requires more 'separateness' than that." *Id. at 163*.

The allegations of Count I meet the distinctness requirement, because Mahoney--a natural person--is distinct from EMC--the enterprise--even though he is also the principal of the EMC entities. The defendants' argument otherwise is based on a misreading of the plaintiffs' complaint. Defendants mistakenly assert that the plaintiffs' complaint alleged, "EMC is the enterprise and the corporate entity conducting the affairs of the enterprise" (i.e., the person). (Def. Mem. at 14.) However, the complaint actually says, "At all times relevant to this action, defendant Mahoney was a "person" as defined in *18 U.S.C. § 1961(3)*. Defendants EMC constitute the enterprise as defined in **[**9]** *18 U.S.C. § 1961(4)*." (Compl. PP 90-91; Am. Compl. PP 114-15.)

In Count II, the plaintiffs allege that the defendants are part of an enterprise composed of entities associated-in-fact, which consists of the EMC entities, Mahoney, and American Latin. They allege that, under the direction of EMC and Mahoney, the association-in-fact worked together to obtain "illegal workers for employment by EMC." (Compl. P 69; Am. Compl. P 92.) By doing so, all three hoped to make large sums of money--EMC and Mahoney by depressing wages, and American Latin by receiving a fee for each worker it provided EMC. (See Compl. PP 70-71; Am. Compl. PP 93-94.)

HN7[] An association-in-fact theory is "a group of persons associated together for a common purpose of engaging in a course **[*532]** of conduct. . . . [which is] proved by evidence of an ongoing organization, formal or informal, and by evidence that the various associates function as a continuing unit." *United States v. Turkette, 452 U.S. 576, 583, 101 S. Ct. 2524, 69 L. Ed. 2d 246 (1981)*. "Common sense suggests that the existence of an association-in-fact is oftentimes more readily proven by what it does, rather than by abstract analysis of its structure. Thus, . . . proof of various racketeering acts may **[**10]** be relied on to establish the existence of the charged enterprise." United States v. Coonan, 938 F.2d 1553, 1559-60 (2d Cir. 1991). "While the question of whether a group of individuals or corporations exhibit such organization and common purpose is ordinarily one of fact, the complaint must allege facts that permit an inference that such an association exists." Zito v. Leasecomm Corp., 02 Civ. 8074, 2004 U.S. Dist. LEXIS 19778, 2004 WL 2211650, at *7 (S.D.N.Y. Sept. 30, 2004).

In addition, **HN8**[] the distinctness requirement of RICO helps a court determine whether an association-in-fact exists:

> In practice, the dual requirements of (1) distinctness and (2) the proof needed to demonstrate an association-in-fact, work in tandem to weed out claims dressed up as RICO violations but which are not in fact. Specifically, the distinctness doctrine requires a plaintiff to demonstrate that the RICO person is legally separate from the RICO enterprise, while the association-in-fact requirement helps ensure that distinctness is not achieved by simply tacking on entities to the enterprise which do not in fact operate as a "continuing unit" or share a "common purpose."

Smokes-Spirits, 541 F.3d at 447.

Defendants contend that plaintiffs' **[**11]** associate-in-fact theory in Count II is deficient. They cite Baker v. IBP, Inc., 357 F.3d 685, 691 (7th Cir. 2004), in support of their argument.

In Baker, the plaintiffs argued that defendant violated section 274(a)(3), and derivatively RICO, by bringing in and employing illegal aliens "for financial gain (a reduction in the wages it must pay). . . ." Id. at 687. The plaintiffs alleged that the enterprise--based on an association-in-fact theory--consisted of the defendant plus "the persons and organization who help it find aliens to hire." Id. at 691. The plaintiffs' RICO complaint was dismissed because the plaintiffs failed to allege a distinction between the defendant and the enterprise. Id. at 692. The Seventh Circuit found the plaintiffs' pleading lacking in two respects. First, the plaintiffs' complaint failed to allege how the alleged association-in-fact shared a common purpose, which is an "essential ingredient" of a RICO claim. Id. The court reasoned that the alleged association could not have a common purpose because each member of the associated group had different goals: defendant wanted to pay lower wages, the recruiter organization wanted to be paid for more services rendered, **[**12]** and the Chinese Mutual Aid Association wanted to help members of its ethnic group get jobs. Id. Second, even if the plaintiffs' adequately pled the existence of an enterprise, their pleading failed to allege that any defendant operated the association-in-fact. Id.

Baker, while interesting, is not the law of this Circuit, and would likely not be good law in this Circuit. In Commercial Cleaning Servs., L.L.C. v. Colin Serv. Sys., Inc., 271 F.3d 374 (2d Cir. 2001), the Second Circuit concluded that pleading the existence of an association-in-fact consisting of employment placement services, labor contractors, newspapers, and "various immigrant networks" that help illegal aliens obtain employment was sufficient to withstand a motion to dismiss. Id. at 379.

Moreover, even if Baker were the law here, the plaintiffs' allegations sufficiently plead an association-in-fact. Both the **[*533]** original and the amended complaints allege that the association-in-fact operated under the direction of defendants, so that the enterprise could procure illegal aliens for employment by EMC. All three entities--EMC, Mahoney and American Latin--entered into this association to make money. EMC and Mahoney would make **[**13]** money by depressing wages, and American Latin would profit by receiving a fee for each worker it provided the defendants. All "therefore had a stake in the success of the other," Zito, 2004 U.S. Dist. LEXIS 19778, 2004 WL 2211650, at *8, because their ability to make money depended on the efforts of each party. These allegations are enough to satisfy the "common purpose" requirement. See id.

The plaintiffs' complaint also sufficiently alleges an entity that is distinct from its members. In Baker, the court found the plaintiffs' failed to allege a distinct entity because the plaintiffs alleged that the named defendant "operates *itself* unlawfully . . . [by] hir[ing], harbor[ing] and pay[ing] the unlawful workers." Baker, 357 F.3d at 691. Here, the plaintiffs' allegations, taken as true, are different. They allege that EMC and Mahoney direct American Latin to find illegal aliens for EMC job sites, and once found, American Latin's pool of illegal workers "take direction from EMC's foremen and supervisors, but are paid [the reduced wage] by American Latin." (Compl. P 26; Am. Compl. P 27.)

Thus, the complaints allege RICO persons (Mahoney and EMC) who are legally separate from the RICO enterprise (EMC-Mahoney-American **[**14]** Latin association-in-fact), which operates for a common purpose. See *Smokes-Spirits, 541 F.3d at 447* (noting ***HN9***[] the distinctness requirement and proof of an association-in-fact are met by showing that the third party added to the enterprise shares a common purpose with the enterprise).

B. The Original Complaint Fails To Plead That The Members of The Enterprise Committed A Predicate Act Through A Pattern of Racketeering Activity

HN10[] For a plaintiff to plead a substantive violation of the RICO statute, he "must [allege] a pattern of racketeering activity, and to establish a RICO conspiracy, a plaintiff must show a conspiracy to commit a substantive RICO violation. *Spool, 520 F.3d at 183*. Thus, claims under both *section 1962(c)* and *(d)* require that a plaintiff allege a pattern of racketeering activity. "To survive a motion to dismiss, this pattern must be adequately alleged in the complaint." Id. (quotation and citation omitted).

The plaintiffs' original complaint alleges that defendants engaged in a "pattern of racketeering activity" by knowingly hiring numerous illegal aliens in violation of *Section 274(a)(3) of the Immigration and Nationality Act*, 18 U.S.C. § 1324(a), a RICO predicate offense. **[**15]** *18 U.S.C. § 1961(1)(F)* ("any act which is indictable under the Immigration and Nationality Act, section 274 (relating to bringing in and harboring certain aliens)").

Section 274(a)(3) provides:

> ***HN11***[] (A) Any person who, during any 12-month period, knowingly hires for employment at least *10 individuals with actual knowledge that the individuals are aliens described in subparagraph (B)* shall be fined under title 18 or imprisoned for not more than 5 years, or both.
> (B) An alien described in this subparagraph is an alien who--
>
> (i) is an unauthorized alien (as defined in *section 1324a (h)(3)* of this title), [1] and
>
> **[*534]** (ii) *has been brought into the United States* in violation of this subsection.

8 U.S.C. § 1324(a)(3) (emphasis added). ***HN12***[] In this Circuit, it has long been that law that a plaintiff relying on section 273(a)(3) as a predicate act must allege both that the defendant knowingly hired illegal aliens and that the defendant "had actual knowledge that the illegal aliens it hired were *brought into the country in violation of the statute*" *Commercial Cleaning, 271 F.3d at 387* (citing *Sys. Mgmt., Inc. v. Loiselle, 91 F. Supp. 2d 401, 408 (D. Mass. 2000)* (emphasis added), in order to plead a violation of section 274(a)(3).

The plaintiffs' original complaint fails to allege a violation of section 274(a)(3). The original complaint does not contain the necessary allegation that defendants knew that at least 10 of the aliens they hired were brought into the country by someone else (as opposed to getting here on their own).

HN13[] Congress wrote two different statutes addressing the hiring of illegal aliens, One entitled "Unlawful employment of aliens" makes it illegal to hire illegal aliens knowing that the aliens are not authorized to work. *8 U.S.C. § 1324a*. [2] A violation of this statute is not a RICO predicate act. The other makes it illegal knowingly to hire

---

[1] *Section 1324a(h)(3)* **[**16]** defines an unauthorized alien as, "with respect to the employment of an alien at a particular time, that the alien is not at that time either (A) an alien lawfully admitted for permanent residence, or (B) authorized to be so employed by this chapter or by the Attorney General." *8 U.S.C. 1324a(h)(3)*.

[2] The relevant section of the statute provides:

> ***HN14***[] It is unlawful for a person or other entity--

illegal aliens who are known to have been smuggled ("brought") into the United States. *8 U.S.C. § 1324*. A violation of that statute is a RICO predicate act.

The key difference between the two statutes is the employer's knowledge of how the illegal alien arrived in the United States. If the employer does not know that at least 10 of its illegal hires were "brought into" the country by some third party **[**18]** (as opposed to walking across the border themselves, or arriving on a visitor's or student visa and overstaying their welcome), then it has not committed a RICO predicate act by hiring them--even though it has committed a federal crime by knowingly hiring the aliens without regard to how they entered the country.

In Commercial Cleaning, the Second Circuit discussed this critical distinction. Although sustaining most of the allegations of a complaint remarkably similar to this one, it held that a district court had properly dismissed the complaint because the plaintiffs failed to allege that the defendants knew when they hired the aliens that at least 10 of them had been "brought into" the United States. *Commercial Cleaning, 271 F.3d at 387*. After Commercial Cleaning, ***HN15***[] it is not enough for a plaintiff to allege that the defendants hired **[*535]** illegal aliens--or even that they did so knowingly. Rather, a plaintiff must allege that the defendant knew *both* that at least 10 of its employees were undocumented aliens *and* that those 10 employees arrived in the United States in a manner that qualifies as being "brought" here. Moreover, the plaintiffs must plead facts tending to show that the statute **[**19]** specified by Congress as a predicate act was violated. See id.

The original complaint in this case says not a word about the defendants' knowledge of how any of their illegal alien employees entered the United States. *Commercial Cleaning*, which is binding on this Court, thus compels dismissal of the original complaint.

Because the original complaint must be dismissed, the Court will not here discuss whether it pleads proximate cause--the third and final pleading requirement under RICO. The Court reserves that discussion for the amended complaint.

After dismissing the Commercial Cleaning complaint on the technical ground discussed above, the Second Circuit determined that the case should be remanded to give the plaintiff the chance to add the missing allegations to their complaint. *Id. at 387 n.5*. Knowing this, the plaintiffs have cross-moved for leave to amend the complaint and have proffered a proposed amended pleading that purports to cure the deficiencies of the original.

The proposed amended complaint does two things. First, it includes several conclusory allegations that are obviously intended to allege that defendants knew some of their illegal alien employees had been smuggled into **[**20]** the country by third parties. Those allegations are factually insufficient to allege the requisite knowledge

Second, the proposed amended complaint adds a wholly new predicate act allegation. It charges that the defendants violated a different law, *8 U.S.C. § 1324(a)(1)(A)(iii)* (also known as *section 274(a)(1)(A)(iii) of the*

(A) to hire, or **[**17]** to recruit or refer for a fee, for employment in the United States an alien knowing the alien is an unauthorized alien (as defined in subsection (h)(3) of this section) with respect to such employment, or (B)

(i) to hire for employment in the United States an individual without complying with the requirements of subsection (b) of this section or

(ii) if the person or entity is an agricultural association, agricultural employer, or farm labor contractor (as defined in *section 1802* of title 29), to hire, or to recruit or refer for a fee, for employment in the United States an individual without complying with the requirements of subsection (b) of this section.

(2) It is unlawful for a person or other entity, after hiring an alien for employment in accordance with paragraph (1), to continue to employ the alien in the United States knowing the alien is (or has become) an unauthorized alien with respect to such employment.

8 U.S.C. § 1324a(a)(1)-(2).

Immigration and Nationality Act), by harboring the illegal aliens who they employ on multiple occasions. *18 U.S.C. § 1961(1)(F)*. This proposed amendment fails to state a RICO claim, because it fails to allege proximate cause.

C. The Proposed Amended Complaint Still Fails to Plead a Violation of Section 274(a)(3)

As far as the alleged section 274(a)(3) predicate act allegations are concerned, the plaintiffs' proposed amended pleading fails to cure the deficiencies of the original complaint.

The recent Supreme Court decision of *Bell Atlantic v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, makes it clear that ***HN16***[] purely conclusory allegations about defendants' knowledge of the means by which their employees entered the United States insufficient. In Twombly, the Supreme Court reversed and remanded a decision denying a motion to dismiss a complaint for failure to state a **[**21]** claim. The plaintiffs brought a putative class action against major telecommunications providers, alleging an antitrust conspiracy in violation of the Sherman Act, *15 U.S.C. § 1*, The question presented was whether the complaint should be dismissed because the plaintiffs failed to allege any facts tending to show that two or more parties had entered into an agreement to violate the antitrust laws. The pleading alleged no more than parallel conduct, together with a conclusory claim that the defendants conspired to violate the antitrust laws.

The Supreme Court, reversing the Second Circuit, held the pleading failed to state a claim. *Twombly, 550 U.S. 544, 557, 127 S. Ct. at 1966*. In its ruling, the Supreme **[*536]** Court announced that the standard applied to pleadings on *Rule 12(b)(6)* motions to dismiss for half a century--that a complaint should be dismissed only if "it appears beyond doubt that the plaintiff can prove *no set of facts* in support of his claim," *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)* (emphasis added)--had "earned its retirement." *Twombly, 550 U.S. at 563, 127 S. Ct. at 1969*.

The Supreme Court justified the imposition of a somewhat more stringent test at the pleading stage by **[**22]** noting the toll that civil litigation takes on defendants. *Id. at 1967*. In some cases, allowing a plaintiff's threadbare claim to proceed gives rise to an "in terrorem" effect where, "the threat of discovery expense will push cost-conscious defendants to settle even anemic cases . . . ." Id. The Court's solution to this problem was simple: "It is only be taking care to require allegations that reach the level suggesting conspiracy that we can hope to avoid the potentially enormous expense of discovery in cases with no reasonably founded hope that the discovery process will reveal relevant evidence." Id. (quotation and citation omitted).

While the scope of Twombly was initially murky, see, e.g., McMahon, The Law of Unintended Consequences: Shockwaves in the Lower Courts, *41 Suffolk U. L. Rev. 851, 852-53 (2008)*, it is by now clear that ***HN17***[] the case applies in more than antitrust cases. *ATSI Commc'ns, Inc. v. Shaar Fund, Ltd., 493 F.3d 87, 98 n.2 (2d Cir. 2007)*; Iqbal, *490 F.3d at 157*. Indeed, the Second Circuit has indicated that there are certain types of cases where Twombly "obliges a pleader to amplify a claim with some factual allegations in those contexts where such amplification is **[**23]** needed to render the claim *plausible*." *Iqbal, 490 F.3d at 157-58* (emphasis in original). A civil RICO case is just such a case.

A civil RICO lawsuit has vast implications for the defendants because of the specter of treble damages and the possibility of permanent reputational injury to defendants from the allegation that they are "racketeers." Courts have frequently commented on the "in terrorem" settlement value that a threat of a civil RICO claim creates. See, e.g., *Tamayo v. Blagojevich, 526 F.3d 1074, 1083 (7th Cir. 2008)*; *Nakahara v. Bal, 97 Civ. 2027, 1998 U.S. Dist. LEXIS 825, 1998 WL 35123, at *9 (S.D.N.Y. Jan. 30, 1998)*. The concerns about the impact of civil antitrust litigation that were articulated by the Supreme Court in Twombly (see above) are equally, if not moreso, applicable to civil RICO claims. That should not be surprising, since the civil RICO statute was modeled on the Sherman Act. See *Anza v. Ideal Steel Supply Corp., 547 U.S. 451, 457, 126 S. Ct. 1991, 164 L. Ed. 2d 720 (2006)* (discussing same).

HN18[] If Twombly means anything, it means that, "Bald assertions and conclusions of law will not suffice. The pleadings must create the possibility of a right to relief that is more than speculative." *Spool, 520 F.3d at 183*. (quotations **[**24]** and citations omitted). Therefore, after Twombly, a plaintiff in a civil RICO lawsuit must plead some facts tending to show that his ultimate conclusion is "plausible." In connection with the allegation that defendants violated the section 274(a)(3)--the alleged predicate act that gives rise to a purported "pattern of racketeering activity"-- Twombly means that the plaintiffs must plead some facts tending to show that these particular defendants actually knew that at least 10 of the illegal aliens they knowingly hired were brought into this country by some third party (or, as some courts have phrased it, were smuggled in) so that they could work illegally in the United States.

The Court has carefully reviewed the proposed amended pleading. It does not **[*537]** contain any factual allegation tending to make plausible their ultimate (and wholly conclusory) contention that the defendant knew that they were hiring 10 illegal aliens who had been "brought" into this country.

The amended complaint alleges:

> 66. Upon information and belief, defendants EMC and Mahoney have knowingly hired 10 or more individuals each calendar year since 2004 with actual knowledge that the workers were not authorized to work **[**25]** in the U.S. and had been brought into the U.S. in violation of *§ 1324*.

(Am. Compl. P 66.) That is a purely conclusory allegation, pleaded on information and belief. However, it is not supported with any factual allegations tending to show that defendants in fact had such knowledge. Neither is there any disclosure of the basis for plaintiffs' "belief" that defendants knew that at least 10 of the aliens they hired each year "ha[d] been brought into the United States." *8 U.S.C. § 1324(a)(3)(B)(ii)*. Undocumented workers arrive in this country in many ways. Nothing in the proposed amended complaint suggests why these defendants knew, or should have known, that any of the people they hired arrived in the United States in any particular way.

The amended pleading contains a number of new allegations (again, nearly all of which are pleaded on information and belief) that did not appear in the original complaint and that 1 presume are intended to bolster the conclusory allegation that defendants knew how their illegal employees got into the country:

> 1. As many as 7.2 million unauthorized migrants are employed in the United States, and as many as 14% of all workers in the construction industry are **[**26]** illegal aliens.
> 2. Neither defendants nor American Latin Services Enterprises Corp., the business that supplied many of their workers, (a) complied with their legal obligations to obtain proof of identity from the workers they hired/supplied; (b) asked employees to sign Form W-4 so that taxes and other deductions could be withheld from their wages; (c) carried out the necessary withholdings.
> 3. The reason they did not do these things was that they well knew the persons who were being hired/supplied were illegal aliens--indeed, it was "common knowledge" within the company.
> 4. Defendants hired illegal workers in order to drive wages down.

(Am. Compl. PP 1-4.) Unfortunately for the plaintiffs, none of these factual allegations tends to show that the defendants named in the caption knew how their undocumented alien employees arrived in this country. They tend only to show the defendants knew they were hiring illegal aliens--which, while a violation of federal law (*8 U.S.C. § 1324a*), is not a RICO predicate act.

Finally, plaintiffs assert, in paragraph 74:

> At a minimum, given the highly publicized and comprehensive measures undertaken by the federal government, especially since 2001, to safeguard **[**27]** our borders and prevent unauthorized entry into the U.S. and to criminal [sic] employers who hire illegal workers, defendants knew or should have known that the illegal workers they hired were brought into the U.S. in violation of *§ 1324*.

(Am. Compl. P 74.) Again, not a single fact is pleaded that gives rise to the conclusion articulated in this paragraph. While the Court has no way of knowing for sure what proportion of illegal workers were *not* smuggled in by a third party, it is clear from the Court's criminal docket that many undocumented aliens who are working in this country arrived on their own **[*538]** and were not "brought into" the country. Plaintiffs allege no fact tending to show that the Government's "highly publicized and comprehensive measures" are limited to those aliens who were smuggled into the country. Rather, they have been addressed to any and all undocumented workers. Without pleading any facts tending to show that *these* defendants knew that they were hiring aliens who had been smuggled in--for example, an allegation that defendants hired workers directly from persons who brought aliens into the United States, or from persons who were known to work with smugglers--plaintiffs **[**28]** fall short of what the law requires. See *Twombly, 550 U.S. 544, 557, 127 S. Ct. at 1966*. No such allegations are made here.

The Court recognizes that there are other, earlier cases, in which conclusory allegations of the sort plaintiffs here plead have survived a *Rule 12(b)(6)* motion to dismiss on the ground that section 274(a)(3) violations were not sufficiently pled. *Williams v. Mohawk Indus., Inc., 465 F.3d 1277 (11th Cir. 2006)*; *Mendoza v. Zirkle Fruit Co., 301 F.3d 1163 (9th Cir. 2002)*. [3] Their precedential value is limited, however, because they precede Twombly, and so were being judged under the now-retired "no set of facts" standard.

D. The Proposed Amended [29] Complaint Sufficiently Alleges A Violation of Section 274(a)(1)(A)(iii)**

The plaintiffs also try to cure the defect in their original complaint by adding an entirely new RICO predicate act allegation. They allege that defendants "harbored" illegal aliens in violation of section 274(a)(1)(A)(iii), which provides:

> ***HN19***[] Any person who knowing or in reckless disregard of the fact that an alien has come to, entered, or remains in the United States in violation of law, conceals, harbors, or shields from detection, or attempts to conceal, harbor, or shield from detection, such alien in any place, including any building or any means of transportation

8 U.S.C. § 1324(a)(1)(A)(iii). ***HN20***[] To plead a violation of this statute, a plaintiff must allege both that (1) the "person" knew or recklessly disregarded the alien's unlawful status, and (2) the "person" took steps that were intended to help the illegal alien remain undetected. See *United States v. Kim, 193 F.3d 567, 574-75 (2d Cir. 1999)*. Violation of section 274(a)(1)(A)(iii) is a RICO predicate act.

HN21[] Within the meaning of this statute, harboring "encompasses conduct tending substantially to facilitate an alien's remaining in the United States illegally and **[**30]** to prevent government authorities from detecting his unlawful presence." *Id. at 574* (citation omitted). Harboring comprises a wide range of conduct, including providing illegal aliens housing, transportation, arranging sham marriages, assisting them in getting employment, teaching them to hide their illegal identity, and "*shelter[ing] [illegal aliens] from the immigration authorities and shield[ing] [them] from observation to prevent their discovery*." Id. (citations omitted) (emphasis added).

Plaintiffs' proposed amended pleading sufficiently alleges that, on at least two occasions in the last ten years, the defendants harbored the illegal aliens they had **[*539]** hired. The amended complaint alleges that defendants knew (or recklessly disregarded) their employees' undocumented status.

> 67. Upon information and belief, it was common knowledge within EMC that their workers were not authorized to work in the U.S. In fact, EMC's own supervisors and/or foremen were illegal aliens. Many of EMC's workers sought out employment with EMC, because they knew that EMC hired illegal workers, and therefore they would not be required to show proof of employment eligibility.

(Am. Compl. P 67.)

It also alleges that **[**31]** defendants attempted to hide their undocumented workers from the government:

---

[3] If Commercial Cleaning had reached such a result, this Court would be bound by the Circuit's decision. However, Commercial Cleaning reached the opposite result--the Circuit ruled that the plaintiffs had not alleged a violation of section 273(a)(3). I suspect that, in 2002 or 2003, the Second Circuit, confronted by a pleading like plaintiffs' here, might well have concluded that it was sufficient at the motion to dismiss stage. But no such ruling was ever made, to my knowledge, and Twombly changes the landscape considerably.

> 68. In an effort to shield their illegal workers from detection, EMC, and American Latin intentionally did not complete 1-9 forms or asked their employees to complete W-4 forms.
> ***
> 70. In an further effort to conceal, shield, and/or harbor their illegal workers, EMC would shut down the jobsite if they thought government authorities would be conducting a raid.
> ***

(Am. Compl. PP 68, 70.) These allegations of actions and omissions by defendants--failing to complete forms, shutting down job sites when inspections were anticipated--are sufficient to state a claim for violation of section 274(a)(1)(A)(iii). See *Kim, 193 F.3d at 574-75*.

Moreover, plaintiffs allege that defendants hired numerous undocumented aliens during a four year period, so the complaint satisfies the requirement that there be more than one predicate act of harboring during a 10 year period. *18 U.S.C. § 1961(5)*; *Spool, 520 F.3d at 183*.

The defendants contend that these allegations do not show that the defendants "substantially" facilitated the illegal aliens' unlawful stay in the United States. However, the Second Circuit has already decided that ***HN22***[↑] hiding **[**32]** aliens from immigration authorities violates the statute. *Kim, 193 F.3d. at 574* (citing *United States v. Herrera, 584 F.2d 1137, 1145 (2d Cir. 1978))*. In Herrera, this Circuit held that installing a security system designed to alert illegal aliens of an impending governmental raid or inspection to help the illegal aliens escape detection constitutes harboring. *584 F.2d at 1145*. The allegations here are that the defendants (1) failed to complete legally required paperwork in order to conceal the presence of aliens on their payroll, and (2) shut down job sites when they thought the government would conduct a raid. [4] Shutting down a jobsite to prevent a detection is no different than putting an alarm bell on a site to tell the illegal aliens to run away; and both of the activities alleged are designed to prevent the government from finding people who would be subject to deportation.

Therefore, the amended pleading cures the original complaint's failure to plead a "pattern of racketeering activity" by pleading a "pattern" of harboring illegal alien workers.

E. The Proposed [**33] Amended Complaint Does Not Plead Racketeering Injury/Proximate Cause

HN23[↑] A plaintiff only has standing to sue under *section 1964(c)* if the alleged RICO violation was the proximate cause of the plaintiff's injury. *Anza v. Ideal Steel Supply Corp., 547 U.S. 451, 453, 126 S. Ct. **[*540]** 1991, 164 L. Ed. 2d 720 (2006)* (citing *Holmes v. Sec. Investor Prot. Corp., 503 U.S. 258, 268, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)*; see also *Commercial Cleaning, 271 F.3d at 380*. To allege proximate cause, a plaintiff must show, "some direct relation between the injury asserted and injurious conduct alleged." *Smokes-Spirits, 541 F.3d at 440* (quoting *Holmes, 503 U.S. at 268*). In other words, "When a court evaluates a RICO claim for proximate causation, the central question it must ask is whether the alleged violation led directly to the plaintiff's injuries." *Anza, 547 U.S. at 461*.

In evaluating whether the plaintiff's alleged violation meets this "directness" requirement, courts should consider the policy reasons behind it. See *Id. at 458-60*. The Supreme Court has identified three reasons for requiring a direct connection between the alleged RICO violation and the plaintiff's injury:

> (1) the factual difficulty of measuring indirect damages and distinguishing among distinct independent **[**34]** causal factors; (2) the complexity of apportioning damages among plaintiffs to obviate the risk of multiple recoveries; and (3) the fact that the need to grapple with these problems is simply unjustified by the general interest in deterring injurious conduct, since directly injured victims can generally be counted on to vindicate the law.

---

[4] The amended complaint would be improved if defendants were able to allege that this occurred on more than one occasion.

Smokes-Spirit, 541 F.3d at 440 (citing Holmes, 503 U.S. at 269) (quotations omitted).

In Holmes, supra, Securities Investor Protection Corporation ("SIPC") claimed that one Robert Holmes conspired with others to manipulate stock prices. SIPC asserted that Holmes and others had conducted an enterprise through a pattern of racketeering activity consisting of multiple stock manipulations in violation of the federal securities laws--which are predicate acts. Nonetheless, the Supreme Court held that SIPC lacked standing to maintain a RICO claim against Holmes, because SIPC's injury--which derived from its subrogation to the claims of Holmes' defrauded customers--was not proximately caused by Holmes' conduct. Id. at 276. The Court--applying settled principles of causation under the antitrust laws to civil RICO claims--announced that there had to be some direct **[**35]** relationship between the injury asserted and the injurious conduct alleged. Id. at 265-68. In a much-quoted passage, the Court announced that **HN24**[] the plaintiff must show that the defendant's violation "not only was 'but for' cause of his injury, but was the *proximate cause* as well." Id. at 268 (emphasis added). In subsequent cases, the Second Circuit has equated "but for" and "proximate" cause with "transaction" and "loss" causation. See, e.g., McLaughlin v. Am. Tobacco Co., 522 F.3d 215, 222 (2d Cir. 2008).

In Anza, supra, the Supreme Court applied the rationale of Holmes to a civil RICO case where the plaintiff (Ideal) was the principal competitor of the defendants' alleged enterprise (National). Ideal alleged that National and its principals injured it by failing to charge New York sales tax to cash-paying customers, which allowed defendants to reduced National's prices without affecting its profit margins. Id. at 453-54. National concealed its conduct by submitting fraudulent tax returns to the New York State Department of Taxation, sending them by mail (mail fraud) and electronically (wire fraud). Id. at 454.

Overturning the Second Circuit's decision sustaining the pleading under Rule 12(b)(6), **[**36]** the Supreme Court described Ideal's theory in the following terms: "Ideal's **[*541]** theory is that Joseph and Vincent Anza harmed it by defrauding the New York tax authority and using the proceeds from the fraud to offer lower prices designed to attract more customers." Id. at 457-58. But it then went on to say, "The cause of Ideal's asserted harms, however, is a set of actions (offering lower prices) entirely distinct from the alleged RICO violation (defrauding the State)." Id. at 458. The Court concluded that this ran afoul of the proximate cause requirement of Section 1962(c). Id.

The Supreme Court observed that the directness requirement announced in Holmes was designed in part to mitigate "the difficulty that can arise when a court attempts to ascertain the damages caused by some remote action . . . the less direct an injury is, the more difficult it becomes to ascertain the amount of a plaintiff's damages attributable to the violation, as distinct from other, independent factors." Id. at 458 (quoting Holmes, at 269). It noted both that National could have lowered its prices for any number of reasons--or not lowered its prices even though it was committing tax fraud--and that Ideal might **[**37]** well have lost sales for reasons other than National's alleged acts of fraud. All of this rendered damages to Ideal "speculative" while failing to avoid the "types of intricate, uncertain inquiries" that a proximate cause requirement "is meant to prevent." Id. at 460. The Court also concluded that a direct causal connection was imperative in a case where some more immediate victim of an alleged RICO violation--in Anza, the State of New York--could be expected to vindicate the law by pursuing its own claim, a claim that would (unlike Ideal's injury) be easy to prove.

In evaluating whether the plaintiffs have adequately alleged proximate cause in this case, the Court focuses on the proposed amended complaint, because it adequately alleges the commission of a pattern of racketeering activity, to wit: two or more violations of the harboring statute. The question to be answered is whether the plaintiffs' injury--the depression of their wages--was proximately cause by defendants' hiding their illegal alien employees from the Government. The answer to that question is no.

There is no direct relationship between the harboring of illegal aliens and the plaintiffs' depressed wages. Indeed, plaintiffs **[**38]** do not so allege. Rather, they contend that they were paid below-market wages because the defendants knowingly hired undocumented workers, who would and did work for wages that were lower than the prevailing rate. That act--the knowing hiring of illegal aliens--is specifically alleged to be the proximate cause of plaintiffs' lower wages. (Am. Compl. PP 45, 94, 109, 119, 128, 132.) As explained above, that act is not a RICO predicate act.

If plaintiffs had managed to plead that defendants knowingly hired 10 or more illegal aliens who defendants knew had been "brought into" the country--that is, if plaintiffs had successfully pled a violation of section 274(a)(3), which is a RICO predicate act--their proposed amended complaint might well plead proximate cause, as the Second Circuit found in analogous circumstances in Commercial Cleaning, 271 F.3d at 381-385. Of course, Commercial Cleaning is a pre-Anza case, so if plaintiffs had managed to plead that defendants knew some of their illegal employees had been "brought into" the country by others, this Court would have to consider whether Commercial Cleaning remains good law on this point. But plaintiffs' failure to allege the requisite specific **[**39]** facts moots any such inquiry.

[*542] Because hiring illegal aliens without knowing they were "brought in" is not racketeering activity, plaintiffs' allegation that hiring illegal aliens depressed wages--a correlation long recognized by courts, including the Supreme Court, see, e.g., DeCanas v. Bica, 424 U.S. 351, 356-357, 96 S. Ct. 933, 47 L. Ed. 2d 43 (1976)--does not satisfy the requirement that plaintiffs plead injury caused by a pattern of racketeering activity. To clear that hurdle, plaintiffs need to plead facts tending to show that defendants' harboring of illegal aliens proximately caused the drop in their wages. This they have not done.

Reading the plaintiffs' proposed amended complaint in the most favorable light, they do allege that the defendants were able to keep their "scheme" to employ illegal aliens going by hiding the aliens from the Government--by "harboring" them. (See Am. Compl. PP 25-45, 64, 67-73, 76.) But the fact that harboring may have allowed the alleged injury to persist for a longer period does not mean that harboring caused the injury.

Furthermore, that the only allegation in the amended complaint connecting harboring and wages concerns the duration of the harm rather than its cause underscores **[**40]** another critical point. "The key reasons for requiring direct causation include avoiding unworkable difficulties in ascertaining what amount of the plaintiff's injury was caused by the defendant's wrongful action as opposed to other external factors." First Nationwide Bank v. Gelt Funding Corp., 27 F.3d 763, 770 (2d Cir. 1994). Any effort to quantify how much of plaintiffs' depressed wages was caused by the harboring of illegal aliens, as opposed to hiring them or some other factor at work in the marketplace, would be even more inherently speculative than the proceeding anticipated (and condemned) by the Supreme Court in Anza.

Finally, because harboring is a direct affront to the Government, there is no need for private attorneys general like plaintiffs to bring damages actions in order to redress it. Just as the State of New York could be expected to pursue a corporation that was failing to pay state income tax, the Government can be expected to vindicate the laws against hiding aliens from the Government. This is not to say that proximate cause will be lacking every time a governmental entity has an interest in vindicating its laws. Indeed, any such result would effectively wipe the **[**41]** civil RICO statute off the books, since every RICO violation is predicated on a violation of some federal criminal statute--a violation that the United States, a "victim" whenever its laws are violated, has an incentive to remedy. However, in this case, where there is no direct or obvious connection between the racketeering activity alleged (harboring) and the harm to the plaintiffs (depressed wages), the fact that the direct victim of the harboring has the incentive to redress the harm (by capturing and deporting the aliens and by prosecuting the harboring employer) fatally undermines any contention that these plaintiffs have suffered injury *by virtue of* the alleged racketeering activity.

The amended complaint thus fails to state a claim under 18 U.S.C. § 1962(c). Because plaintiffs fails to plead any RICO violation, they also fail to plead any violation of 18 U.S.C. § 1962(d), the RICO conspiracy statute. All three RICO counts--Counts I, II and III -- are dismissed.

F. Further Leave to Replead the Civil RICO Claims is Denied

In Commercial Cleaning, 271 F.3d at 387, after concluding that the predicate act allegations were deficient, the Second Circuit remanded so that plaintiffs who **[**42]** failed **[*543]** to allege that defendants knew that at least 10 illegal aliens they had hired were "brought into" the country could insert that allegation into their pleading. Here, there is no need to grant leave to amend for that purpose, because plaintiffs have already proffered a proposed amended pleading to the Court and it has been accepted and examined. Despite knowing how defendants were attacking their original pleading, plaintiffs failed to plead all the necessary elements of a violation of section 274(a)(3). Furthermore, plaintiffs cannot possibly allege that defendants' harboring of illegal aliens in violation of section 274(a)(1)(A)(iii) proximately caused their injury. Therefore, Counts I, II and III of the amended complaint are dismissed with prejudice.

IV. Plaintiffs' Antitrust Claims are Dismissed

A. Plaintiffs' Sherman Act Claims

HN25[] *Section 1* of the Sherman Act prohibits, "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States . . . ." *15 U.S.C. § 1*. "To establish a *§ 1* violation, a plaintiff must produce evidence sufficient to show: (1) a combination or some form of concerted action between *at least* ***[**43]*** *two legally distinct economic entities*; and (2) such combination or conduct constituted an unreasonable restraint of trade either per se or under the rule of reason." *Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 95-96 (2d Cir. 1998)* (emphasis added). Thus, a § I plaintiff must allege that the defendants entered into some type of an agreement (tacit or express) with a separate entity. Id.; see also *Twombly, 550 U.S. at 553, 127 S. Ct. at 1964* ("the crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express") (quotation and citation omitted). This is because "it is perfectly plain that an internal 'agreement' to implement a single, unitary firm's policies does not raise the antitrust dangers that *§ 1* was designed to police." *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 769, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*.

In this case, the original pleading failed to allege an agreement. All the allegedly anticompetitive activity was committed by defendants in the course of running their own business. (See Compl. P 77 ("defendants Mahoney, EMC Contracting, Inc., EMC New York Contracting, and EMC of New York, Inc., have willingly **[**44]** conspired to depress the wages of all its hourly workers in order to underbid competitors for projects, and thereby make substantial profits.") Thus, the plaintiffs fail to plead that two separate entities entered into an agreement.

The amended complaint alleges that the defendants had an agreement with American Latin to depress wages. However, the Court need not decide whether this contention solves the problem, because there is a more fundamental problem: plaintiffs have not suffered any antitrust injury and lack standing to sue under the antitrust laws.

HN26[] A private plaintiff may not recover damages under the antitrust laws unless it demonstrates that it has suffered an "antitrust injury." *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. Courts colloquially refer to this requirement as "antitrust standing." It is entirely distinct from standing under Article III of the Constitution. An "antitrust injury" is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. "To **[*544]** demonstrate antitrust injury, a plaintiff must show (1) **[**45]** an injury-in-fact; (2) that has been caused by the violation; and (3) that is the type of injury contemplated by the statute." *Arista Records LLC v. Lime Group LLC, 532 F. Supp. 2d 556, 568* (quotation and citation omitted). "Thus, the antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior." *Paycom Billing Servs., Inc. v. Mastercard Int'l, Inc. 467 F.3d 283, 290 (2d Cir. 2006)* (quotation and citation omitted). Antitrust standing serves the same function as RICO proximate cause (which, as noted above, derives from antitrust standing).

In addition, ***HN27***[] even if a plaintiff adequately alleges an antitrust injury, he may lack standing for other reasons. These include:

> (1) the directness or indirectness of the asserted injury; (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (3)

> the speculativeness of the alleged injury; and (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries.

Id. at 291.

Plaintiffs **[**46]** here allege that defendants committed an antitrust violation by hiring illegal workers to depress wages. Their alleged "antitrust injuries" are that 1) defendants' actions harmed competition by allowing them to underbid competitors for jobs by using cheap labor, and 2) defendants illegally inflated the labor pool of available workers by hiring workers based on the wages they would accept, instead of the workers' skill.

These conclusory allegations do not plead an antitrust injury.

Plaintiffs fail to allege how the use of illegal labor caused harm to competition in the market, rather than the competitors themselves or the workers. See *Mathias v. Daily News, L.P., 152 F. Supp. 2d 465, 479 (S.D.N.Y. 2001)* (citing *Brunswick, 429 U.S. at 488*); see also *Capital Imaging Assocs., P.C. v. Mohawk Valley Medical Assocs., Inc., 996 F.2d 537, 543 (2d Cir. 1993)* (***HN28***[] "Plaintiff bears the initial burden of showing that the challenged action has had an actual *adverse effect on competition as a whole in the relevant market*.") (emphasis added). If defendants are able to underbid their competitors for jobs, plaintiffs are not the parties who are directly injured--defendants' competitors are.

Moreover, the second **[**47]** alleged antitrust injury--that defendants inflated the size of the labor pool--is the antithesis of an injury to competition, which is the type of injury the antitrust laws are intended to prevent. Defendants' complaint is not about too little competition in the market for construction labor, but too much. It is plaintiffs who are trying to "suppress competition" here, by decreasing the number of available construction workers and so driving up the price for their services. The idea that it harms competition to have more people competing for jobs, or if there are workers in the market who will compete for jobs by cutting the price (i.e., by accepting a lower wage), is ludicrous. Defendants are trying to use the antitrust laws to redress a violation of the immigration laws. It simply does not work.

Accordingly, the defendants' motion to dismiss plaintiffs' federal antitrust claim is dismissed with prejudice.

B. Plaintiffs' Donnelly Act Claim

In addition to bringing a federal antitrust claim, the plaintiffs assert New York's counterpart to the Sherman Act, the Donnelly Act, *N.Y. Gen. Bus. Law. § 340 et seq*. The Donnelly Act provides:

> **[*545]** ***HN29***[] *Every contract, agreement, arrangement or combination* **[**48]** whereby
> A monopoly in the conduct of any business, trade or commerce or in the furnishing of any service in this state, is or may be established or maintained, or whereby
> Competition or the free exercise of any activity in the conduct of any business, trade or commerce or in the furnishing of any service in this state is or may be restrained or whereby
> For the purpose of establishing or maintaining any such monopoly or unlawfully interfering with the free exercise of any activity in the conduct of any business, trade or commerce or in the furnishing of any service in this state any business, trade or commerce or the furnishing of any service is or may be restrained, is hereby declared to be against public policy, illegal and void.

N.Y. Gen. Bus. Law. § 340 (emphasis added). ***HN30***[] The Donnelly Act was modeled after the Sherman Act. *State v. Mobil Oil Corp., 38 N.Y.2d 460, 463, 344 N.E.2d 357, 381 N.Y.S.2d 426 (1976)*. In fact, it is often called the "Little Sherman Act" *Anheuser-Busch v. Abrams, 71 N.Y.2d 327, 335, 520 N.E.2d 535, 525 N.Y.S.2d 816 (1988)*, and courts are instructed that Donnelly should generally "be construed in light of Federal precedent and given a different interpretation *only where State policy, differences in the statutory language or the* ***[**49]*** *legislative history justify such a result*." Id. (emphasis added). Thus, if the plaintiffs do not have standing to assert a federal antitrust claim, they do no have standing to bring a Donnelly Act claim. See, e.g., *G.K.A. Beverage Corp. v. Honickman, 55*

F.3d 762, 766 (2d Cir. 1995) (dismissing federal and state antitrust claims for failure to allege an antitrust injury); Bio-Technology Gen. Corp. v. Genentech, Inc., 886 F. Supp. 377, 383 (S.D.N.Y. 1995) (applying federal standard to Donnelly Act claim); Ho v. Visa U.S.A., Inc., *16 A.D.3d 256, 257, 793 N.Y.S.2d 8 (1st Dep't 2005)* (same); Friedman v. E.R. Squibb & Sons, Inc., *125 A.D.2d 539, 509 N.Y.S.2d 616 (2d Dep't 1986)* (same); Lerner Stores Corp. v. Parklane Hosiery Co., Inc., 86 Misc. 2d 215, 381 N.Y.S.2d 968, 969-70 (N.Y. Sup. Ct. 1976), aff'd, *54 A.D.2d 1072, 388 N.Y.S.2d 760 (4th Dep't 1976)* (same).

The plaintiffs argue that the addition of the word "arrangements," which does not appear in the Sherman Act, broadens the scope of the State's ***antitrust law*** and gives them standing. They are wrong. In State v. Mobil Oil Corp, 38 N.Y.2d 460, 344 N.E.2d 357, 381 N.Y.S.2d 426 (1976), the New York Court of Appeals affirmed the dismissal of the plaintiff's complaint. Id. at 461-62. The Attorney General of New York claimed the defendant **[**50]** violated the Donnelly Act by engaging in unilateral price discrimination. He argued that the addition of the word "arrangements" to the Donnelly Act made the state ***antitrust law*** broader than the federal law, in that the state law prohibited any "practice" effecting restraint of trade. Id. at 464.

The New York Court of Appeals soundly rejected this argument:

> ***HN31***[] Although undoubtedly the sweep of Donnelly may be broader than that of Sherman, we conclude that under the familiar canon of statutory construction, noscitur a sociis, the term, "arrangement", *takes on a connotation similar to that of the other terms with which it is found in company, and thus must be interpreted as contemplating a reciprocal relationship of commitment between two or more legal or economic entities similar to but not embraced within the more exacting terms*, "contract", "combination" or "conspiracy". . . . To interpret the word "arrangement" as embracing any "practice", as the Attorney-General **[*546]** urges us to do, would be unwarranted as a matter of lexicology and, more significant, unjustified in the historical context of the statute. The addition of a conclusory allegation as to the effect of a described practice (here **[**51]** effecting restraint of trade) cannot operate, of course, to bring a one-sided practice which is outside the scope of the statute within its proscription.

Id. at 464 (emphasis added).

Therefore, the plaintiffs' Donnelly Act claim (Count V) is also dismissed with prejudice.

V. The Plaintiffs' Labor Law Claims

Plaintiffs' proposed amended complaint also added new allegations about defendants' failure to comply with applicable labor laws.

A. Plaintiffs Adequately Allege Fair Labor Standards Act Claims

Plaintiffs' Sixth Cause of Action alleges that defendants violated the Fair Labor Standards Act ("FLSA"), 29 U.S.C. §§ 201-219, by intentionally refusing to pay them overtime wages and the legally required minimum wage.

Plaintiffs' federal labor and wage claims arise under ***HN32***[] section 216(b) of the FLSA, which provides a right of action to any employee whose employer violates the provisions of sections 206 or 207, which govern wages and hours, respectively. See 29 U.S.C. §§ 206, 207. Section 206(a) requires "Every employer" to pay a minimum wage to "each of his employees . . . ." 29 U.S.C. § 206. Section 207(a)(1) requires an employer to pay its employees overtime wages. 29 U.S.C. § 207. Under that **[**52]** section, employers must pay employees at a rate of not less than one and one-half times the employee's regular rate for hours worked in excess of forty per week. 29 U.S.C. § 207(a). The type of "work" covered by this section is defined as "physical or mental exertion (whether burdensome or not) controlled or required by the employer and pursued necessarily for the benefit of the employer and his business." Holzapfel v. Newburgh, 145 F.3d 516, 522 (2d Cir. 1998) (quoting Tennessee Coal, Iron & R.R. Co. v. Muscoda Local No. 123, 321 U.S. 590, 598, 64 S. Ct. 698, 88 L. Ed. 949 (1944).

However, ***HN33***[] the minimum wage and maximum hour requirements of the FLSA apply only to employees who are "engaged in commerce or in the production of goods for commerce," or who are "employed in an enterprise engaged in commerce or in the production of goods for commerce." *29 U.S.C. §§ 206(a)*, *207(a)*; *Boekemeier v. Fourth Universalist Soc'y, 86 F. Supp. 2d 280, 285 (S.D.N.Y. 2000)*. *Section 203(s)(1)* defines an "Enterprise engaged in commerce," to include any enterprise that has employees "engaged in commerce . . . , or that has employees handling, selling, or otherwise working on goods or materials that have been moved in or produced for commerce **[**53]** by any person," and that has gross annual revenues of $ 500,000 or more. See *Velez v. Vassallo, 203 F. Supp. 2d 312, 327-28 (S.D.N.Y. 2002)*.

Plaintiffs allege that, while working for the defendants, the defendants intentionally did not pay them overtime wages. (Am. Compl. P 50.) During this time, plaintiffs Moraes and Nichols worked an average of fifty and sixty-five hours per week, respectively, yet were never paid overtime for the extra hours that they worked. (Id. PP 51-52.) Plaintiffs also allege that defendants sometimes paid them by checks, which routinely bounced. (Id. P 55.) When their checks bounced, the plaintiffs allege that the defendants failed to pay them altogether, depriving them of the legally required minimum wage. (Id. P 147.)

[*547] Defendants argue that plaintiffs' complaint, even as amended, fails to adequately allege the elements of their FLSA claims under *Federal Rule of Civil Procedure 8(a)*. (Def. Reply at 15.)

Plaintiffs have sufficiently alleged that they were former employees of defendants EMC. *Zhong v. August August Corp., 498 F. Supp. 2d 625, 628-29 (S.D.N.Y. 2007)*. In this case, plaintiffs have expressly alleged an employer-employee relationship with the defendants. **[**54]** (See, e.g., Am. Compl. PP 46-48.) This is more than enough for *Rule 8* purposes.

Plaintiffs' allegations about defendants' purported violations of minimum wage and overtime provisions satisfy the requirements of *Rule 8*.***HN34***[] "[W]here a plaintiff alleges violations of the FLSA's minimum and overtime wage provisions, the complaint should, at least approximately, allege the hours worked, for which wages were not received." *Zhong, 498 F. Supp. 2d at 628*. First, defendants have notice of plaintiffs' legal theory since the complaint expressly references the FLSA. (See Am. Compl. Count VI;) see *Gordon v. Kaleida Health, No. 08 Civ. 378S, 2008 U.S. Dist. LEXIS 96144, 2008 WL 5114217, at *3 (W.D.N.Y. Nov. 25, 2008)*. Second, the pleading provides the factual grounds supporting their claims. As to the overtime claims, plaintiffs have specified the approximate time period they were employed by defendants EMC and the approximate number of overtime hours they each worked per week without receiving overtime pay. (Am. Compl. PP 50-52.) As to the minimum wage violations, plaintiffs allege that, beginning in 2006, defendants gave them bad checks, which deprived them of their earned wages. (Id. PP 53-55.) Although plaintiffs have not alleged **[**55]** how many bad check they each received, such information should be readily available to defendants from their own business records. Thus, plaintiffs' amended pleading "give[s] the defendant[s] fair notice of the [plaintiffs'] claim[s] and the grounds upon which [they] rest[]." *Twombly, 550 U.S. at 555, 127 S. Ct. at 1964*; see also *Gordon, 2008 U.S. Dist. LEXIS 96144, 2008 WL 5114217, at *4*.

The case that defendants cite in support of their argument to the contrary is distinguishable. In *Zhong, 498 F. Supp. 2d at 628*, the court dismissed plaintiff's claim that he was denied overtime compensation in violation of *section 207*. Although the plaintiff alleged that he worked beyond forty hours a week, his pleading only indicated that he worked twenty hours per week. Because the plaintiff's pleading was internally inconsistent, the court held that it failed to state a violation of *section 207*. *Id. at 630*. Here, plaintiffs' complaint is not inconsistent. They allege that they were not paid overtime and that, on average, they worked over forty hours per week. (Am. Compl. PP 50-52.)

The plaintiffs' amended pleading sufficiently alleges that the defendants "engaged in commerce" under *29 U.S.C. § 203(s)(1)*. ***HN35***[] Under this section, **[**56]** there are two ways in which an employer is considered to have "engaged in commerce:" by pleading individual or enterprise coverage. First, for an employee to qualify for individual coverage under the FLSA, he must have personally "perform[ed] work involving or related to the movement of persons or things . . . between states." *29 C.F.R. § 779.103*. The plaintiffs do not allege that they personally performed such work. Second, for enterprise coverage, the plaintiffs' employer must have engaged in interstate commerce. Plaintiffs satisfy this requirement by alleging that "the monies, supplies, equipment, and illegal workers employed by defendants EMC and provided by American Latin travel in interstate commerce." (Am. Compl. P 95); see, e.g., *Shim v. Millennium Group, No. 08 Civ. 4022, 2009 U.S. Dist. LEXIS 6014, 2009 WL 211367, at *2-3 (E.D.N.Y. January 28, 2009)*. Courts have noted that **[*548]** "virtually every enterprise in the nation doing the requisite dollar volume of business is covered by the FLSA." *Archie v. Grand Cent. P'ship, Inc., 997 F. Supp. 504, 530 (S.D.N.Y. 1998)* (quoting *Dunlop v. Indus. Am. Corp., 516 F.2d 498, 501-02 (5th Cir. 1975))*.

The plaintiffs' complaint also states a claim for FLSA violations against **[**57]** individual defendant Mahoney. ***HN36***[] "Individuals with significant decision-making authority over a company may be liable as employers under the FLSA." *Gordon, 2008 U.S. Dist. LEXIS 96144, 2008 WL 5114217, at *4 (W.D.N.Y. Nov. 25, 2008)* (citing *Herman v. RSR Sec. Servs. Ltd., 172 F.3d 132, 140 (2d Cir. 1999)*. Plaintiffs allege that "defendant Mahoney is the President of EMC Contracting, Inc., EMC New York Contracting, and EMC of New York, Inc. and as such, is involved in ever aspect of the business of EMC, including, but not limited to, the hiring of its workers." (Am. Compl. P 19.) As such, plaintiffs' complaint states an FLSA claim against Mahoney.

In this case, the FLSA's three year statute of limitations applies. ***HN37***[] Generally, the FLSA has a two-year statute of limitations, except in the case of willful violations, for which the statute of limitations is three years. See *29 U.S.C. § 255(a)*. Plaintiffs allege that defendants' violations of the FLSA "were willful and intentional," because the defendants consistently failed to pay any overtime wages and gave their employees bad checks. (Am. Compl. P 148.) A violation is willful, if the employer "knew or showed reckless disregard for the matter of whether its conduct was **[**58]** prohibited by the statute." *Frasier v. Gen. Elec. Co., 930 F.2d 1004, 1008 (2d Cir. 1991)* (quoting *McLaughlin v. Richland Shoe Co., 486 U.S. 128, 133, 108 S. Ct. 1677, 100 L. Ed. 2d 115 (1988))*. Thus, the three-year statute of limitations presumptively applies to plaintiffs' FLSA claims, which means that Nichols' claims for willful violations of the FLSA, filed on April 2, 2008, as pled, is timely.

B. Pendent State Law Claims

In addition, to their federal law claims, plaintiffs also allege that defendants violated *New York State Labor Law §§ 190* et seq. ("Article 6") and *§§ 650 et seq*., the state law provisions governing overtime and minimum wage compensation. ***HN38***[] The relevant portions of the Labor Law do not diverge from the FLSA. *Whalen v. J.P. Morgan Chase & Co., 569 F. Supp. 2d 327, 329-330 (W.D.N.Y. 2008)*; *Perez v. Jasper Trading, Inc., No. 05 Civ. 1725, 2007 U.S. Dist. LEXIS 92375, 2007 WL 4441062, at *2 (E.D.N.Y. Dec. 17, 2007)*. See *N.Y. Comp. Codes R. & Regs. Tit. 12, § 142-2.1* and *2.2*. Therefore, plaintiffs have also stated a claim under New York Labor Law. it is appropriate for this court to resolve the federal and state claims in one proceeding.

Conclusion

For the reasons stated above, the plaintiffs' motion for leave to amend is granted (Docket **[**59]** No. 16). The defendants' motion to dismiss (Docket No. 11) is granted in part and denied in part. Counts I, II, III (the RICO claims), IV and V (the antitrust claims) of plaintiffs' amended complaint are dismissed with prejudice.

This constitutes the decision and order of the Court.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN1[] **Entitlement as Matter of Law, Appropriateness**

Generally speaking, summary judgment shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. The court must view the facts in the light most favorable to the non-moving party and give it the benefit of all reasonable inferences to be drawn from those facts.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN2[] **Sherman Act, Claims**

Where concerted price-fixing is alleged, the plaintiff bears the ultimate burden of presenting sufficient evidence to prove that an agreement to fix prices existed. Price-fixing is a per se violation of *15 U.S.C.S. § 1* of the Sherman

Act. In order for a plaintiff to survive defendants' motions for summary judgment, a plaintiff must establish that there is a genuine issue of material fact as to whether the defendants entered into an illegal conspiracy that caused respondents to suffer a cognizable injury. The plaintiff can establish a genuine issue of material fact by producing either direct evidence that the defendants participated in an agreement to fix prices, or circumstantial evidence from which a reasonable fact finder could conclude the same.

Antitrust & Trade Law > Sherman Act > Claims

HN3[] **Sherman Act, Claims**

With respect to proof by way of circumstantial evidence in *15 U.S.C.S. § 1* cases, special rules apply. ***Antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case. Conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. To survive a motion for summary judgment, a plaintiff seeking damages for a violation of *§ 1* must present evidence that tends to exclude the possibility that the alleged conspirators acted independently.

Antitrust & Trade Law > Sherman Act > Claims

HN4[] **Sherman Act, Claims**

With regard to summary judgment in an antitrust action, the United States Court of Appeals for the Ninth Circuit has outlined a two-part test to be applied whenever a plaintiff rests its case entirely on circumstantial evidence. First, the defendant can rebut an allegation of conspiracy by showing a plausible and justifiable reason for its conduct that is consistent with proper business practice. Second, the burden then shifts back to the plaintiff to provide specific evidence tending to show that the defendant was not engaging in permissible competitive behavior.

Business & Corporate Law > Corporations > General Overview

HN5[] **Business & Corporate Law, Corporations**

As a general matter, corporate law prohibits a parent corporation from being held liable on the basis of its subsidiary's actions. It is a general principle of corporate law deeply ingrained in our economic and legal systems that a parent corporation (so-called because of control through ownership of another corporation's stock) is not liable for the acts of its subsidiaries. However, a parent corporation may be held liable for the acts of its subsidiary where stock ownership has been resorted to, not for the purpose of participating in the affairs of a corporation in the normal and usual manner, but for the purpose of controlling a subsidiary company so that it may be used as a mere agency or instrumentality of the owning company.

Business & Corporate Law > ... > Establishment > Proof of Agency > General Overview

HN6[] **Establishment, Proof of Agency**

There are two applicable agency doctrines: the representative services doctrine, and/or the traditional common law doctrine of agency. The representative services doctrine, which the United States Court of Appeals for the Ninth Circuit has acknowledged in the personal jurisdiction context, asks whether the subsidiary functions as the parent corporation's representative in performing services that are sufficiently important that if it did not have a representative to perform them, the parent would undertake to perform similar services on its own. The representative agency test permits the imputation of contacts where the subsidiary was either established for, or is engaged in, activities that, but for the existence of the subsidiary, the parent would have to undertake itself. The question to ask is whether, in the truest sense, the subsidiaries' presence substitutes for the presence of the parent. By contrast, the traditional common law agency doctrine is based on analysis of three factors: (1) manifestation by a principal that the agent would act on its behalf; (2) the agent's acceptance or consent to act on the principal's behalf; and (3) the understanding that the principal would be in control of the agent's undertaking on its behalf.

Business & Corporate Law > ... > Establishment > Proof of Agency > General Overview

HN7[] **Establishment, Proof of Agency**

The foundation for a traditional agency test requires a plaintiff to demonstrate: (1) a manifestation by the principal that the agent shall act for him; (2) that the agent has accepted the undertaking; and (3) that there is an understanding between the parties that the principal is to be in control of the undertaking.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > ... > Establishment > Proof of Agency > General Overview

HN8[] **Antitrust & Trade Law, Sherman Act**

With regard to an antitrust action and the relationship between a parent company and a subsidiary, in applying the traditional common law agency test because one of the touchstones of the test is the corporation's control over the subsidiary for purposes of a defined "undertaking," this agency test shares similar concerns with many of the other tests formulated by various courts to determine agency -- all of which also use concepts of day to day control as a touchstone. Critically, however, it is to be remembered that the majority of decisions require more than mere ownership of stock, and more than the supervision of finance and capital budget decisions, or shared directorships, in order for a finding of agency to issue. The question of agency is also highly fact specific.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > ... > Establishment > Proof of Agency > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

With regard to an antitrust action and the relationship between a parent company and a subsidiary, the degree of control exercised by the parent in order for the subsidiary to qualify as an agent must therefore exceed that which is to be expected in the normal scope of any such relationship.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

With regard to an antitrust action and summary judgment, the court must consider the circumstantial evidence in the aggregate, in determining the existence of conspiratorial conduct on the part of a defendant. The critical question in evaluating circumstantial evidence is whether all the evidence considered as a whole can reasonably support the inference that the defendant conspired with the admitted conspirators to fix prices.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] Antitrust & Trade Law, Sherman Act

With regard to an antitrust action, once a defendant rebuts an allegation of conspiracy by showing a plausible and justifiable reason for its conduct that is consistent with proper business practice, the burden then shifts back to the plaintiff to provide specific evidence tending to show that the defendant was not engaging in permissible competitive behavior. If the defendants had no rational motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN12[] Summary Judgment, Evidentiary Considerations

Only admissible evidence may be considered by the trial court in ruling on a motion for summary judgment.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN13[] Summary Judgment, Evidentiary Considerations

At the summary judgment stage, courts do not focus on the admissibility of the evidence's form. Courts instead focus on the admissibility of its content. The nonmoving party need not produce evidence in a form that would be admissible at trial in order to avoid summary judgment.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN14[] Regulated Practices, Price Fixing & Restraints of Trade

With regard to an antitrust action, communications between competitors do not permit an inference of an agreement to fix prices unless those communications rise to the level of an agreement, tacit or otherwise. Absent an agreement to fix prices, there is nothing unlawful about competitors meeting and exchanging price information or discussing problems common in their industry, or even exchanging information as to the cost of their product.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN15[] Conspiracy to Monopolize, Elements

With regard to an antitrust action, specific discussions between competitors regarding price may give rise to inference of conspiracy.

Criminal Law & Procedure > ... > Jury Instructions > Particular Instructions > Adverse Inferences

HN16[] Particular Instructions, Adverse Inferences

Adverse inferences based on a party's invocation of the *Fifth Amendment* are permissible in certain situations. Such adverse inferences may only be drawn when independent evidence exists of the fact to which the party refuses to answer. Thus, an adverse inference can be drawn when silence is countered by independent evidence of the fact being questioned, but that same inference cannot be drawn when, for example, silence is the answer to an allegation contained in a complaint.

Opinion

[*892] ORDER DENYING MOTIONS FOR SUMMARY JUDGMENT

Defendants' motions for summary judgment came on for hearing before this court on January 21, 2009. Plaintiff Sun Microsystems, Inc. ("Sun" or "plaintiff"), appeared through its counsel, Jerome A. Murphy, and David D. Cross. Defendants Nanya Technology Corporation ("NTC") and Nanya Technology Corporation USA ("NTC USA")(collectively "Nanya") appeared through their counsel, Howard Ullman, Robert E. Freitas, and Catherine Lui. Having read all the papers submitted and carefully considered the relevant legal authority, the court hereby DENIES the motions for summary judgment, for the reasons stated at the hearing and as follows.

BACKGROUND

The instant action is part of the general opt-out category **[**4]** of cases related to In re Dynamic Random Access Memory (DRAM) Antitrust Litigation, Case No. M 02-1486 PJH -- a multidistrict litigation ("MDL") action currently pending before the court. Both the MDL action and the opt-out cases generally allege a horizontal price-fixing conspiracy carried out by numerous DRAM manufacturer defendants, in violation of federal and state antitrust laws. While there are a total of six different individual cases that form a part of the opt-out category of cases, only Sun Microsystems, Inc. v. Hynix Semiconductor, et. al. is currently at issue.

A. Background Allegations

Sun is an original equipment manufacturer ("OEM") involved in the technology field. It is a leading maker of computer servers and workstations, among other items. In the operative amended consolidated complaint ("ACC"), Sun alleges that from 1997 through 2002 several manufacturer defendants ("defendants") [1] engaged **[*893]** in a conspiracy to control DRAM production capacity, raise DRAM prices, allocate customers, and otherwise unlawfully overcharge their DRAM customers. See, e.g., ACC PP 21, 23, 25, 27, 29, 31, & 34 (alleging that foreign defendants "manipulated the price of DRAM charged around the **[**5]** globe"). The defendants allegedly did so by participating in meetings and conversations to discuss the price of DRAM; agreeing to manipulate prices and supply so as to boost sagging DRAM sales; issuing price announcements and price quotations in accordance with the agreements reached by defendants; and selling DRAM to customers in the United States at non-competitive prices. Id. at P 83.

Sun's complaint also alleges that several defendants have already admitted both the existence of an unlawful conspiracy in the DRAM industry and their participation in it as part of a criminal investigation undertaken by the Antitrust Division of the Department of Justice ("DOJ") in 2002. The DOJ's investigation probed the existence of a conspiracy to restrict supply and raise prices for DRAM among the largest makers and sellers of DRAM globally. As a result of that investigation, four manufacturers (three of which are named defendants here) -- Infineon, Hynix, Samsung, and Elpida -- pled guilty to participation in a price-fixing conspiracy in violation of federal ***antitrust law***. See ACC PP 71-78. In addition, several of their employees and agents have also pled guilty to criminal antitrust violations, and have been sentenced accordingly.

As a result of the foregoing, Sun alleges that it suffered injury in that it paid more for DRAM than it otherwise would have in the absence of defendants' conspiracy. Sun asserts three causes of action against defendants: (1) violation of the Sherman Act **[**7]** pursuant to *15 U.S.C. § 1*; (2) violation of California's Cartwright Act pursuant to *§§ 16700 et seq of the Cal. Bus. & Prof. Code.*; and (3) violation of California's Unfair Competition Act pursuant to *§§ 17200 et seq. of the Cal. Bus. & Prof. Code*. See ACC, PP 79-106. Sun seeks treble damages as a result of the artificially inflated prices it allegedly paid for DRAM.

---

[1] Defendants are: Infineon Technologies AG, and Infineon Technologies North America Corp. (collectively "Infineon"); Hynix Semiconductor, Inc., and Hynix Semiconductor America, Inc. (collectively "Hynix"); Mosel-Vitelic Inc., and Mosel-Vitelic Corporation (collectively "Mosel-Vitelic"); Nanya Technology Corporation, and Nanya Technology Corporation USA ("NTC" and "NTC USA," respectively); Winbond Electronics Corporation, and Winbond Electronics Corporation America (collectively "Winbond"); Elpida Memory, Inc., and Elpida Memory (USA) Inc. (collectively "Elpida"); Mitsubishi Electric Corporation, Mitsubishi Electric and Electronics USA, Inc., and Mitsubishi Electric Europe B.V. (collectively "Mitsubishi"). Since the filing of the complaint, however, several of these defendant entities have been dismissed. **[**6]** Accordingly, only two sets of defendant entities remain in the case: the Hynix and Nanya entities.

Discovery in the case is now closed, and the Nanya defendants -- NTC and NTC USA -- have filed two dispositive motions for the court's resolution. [2] First, NTC has filed a motion for summary judgment on grounds that plaintiff cannot establish a triable issue of fact as to its participation in any unlawful price-fixing or other anticompetitive activity, and therefore, as to liability. Second, NTC USA -- NTC's wholly owned subsidiary -- has filed an analogous motion, similarly arguing that plaintiff's evidence fails to raise a triable issue of fact as to liability for any alleged anticompetitive conduct.

B. Related Procedural History

Of particular relevance here are **[**8]** two summary judgment motions previously filed by NTC and NTC USA in the related In re DRAM MDL litigation. [3] Their motions in the MDL proceedings, similar to their motions here, generally challenged **[*894]** the direct purchaser plaintiffs' ability to establish the Nanya entities' liability for unlawful conspiratorial conduct under the Sherman Act, although the issues with respect to each entity were distinct.

1. NTC's Previous Motion for Summary Judgment

Beginning first with NTC's motion, the court considered and ruled upon three distinct issues in the MDL case: (1) whether NTC could be held liable for NTC USA's allegedly conspiratorial actions on the basis of its parent-subsidiary relationship with NTC USA; (2) the direct evidence of NTC's independent participation in the alleged conspiracy; and (3) the circumstantial evidence of NTC's independent **[**9]** participation in the same. See MDL Direct Purchaser Order Granting Summary Judgment in Part and Denying Summary Judgment in Part ("Direct Purchaser MSJ Order") at 6. The court answered the first question in the negative, holding that plaintiff's attempt to establish NTC's liability by virtue of the alter ego doctrine failed, because the evidence as a whole did not sufficiently speak to NTC's actual day to day control over the operations and internal affairs of NTC USA, nor did the evidence demonstrate that NTC dictates "every facet of NTC USA's business." See id. at 8. The court also found that plaintiff could not demonstrate NTC's liability vis-a-vis NTC USA based on application of the single entity doctrine. See id. at 9.

As to the second issue, the court considered the direct evidence advanced in support of the charge that NTC independently participated in any of: (a) a price-fixing agreement with the other defendants; (b) an output reduction in connection with the other defendants; or (c) an unlawful exchange of price information with any other defendants. See Direct Purchaser MSJ Order at 10. After consideration of certain emails, Mr. Kau's deposition testimony, and certain industry **[**10]** news and articles, the court found that plaintiffs failed to present any direct evidence of NTC's independent participation in any of the foregoing conspiratorial conduct. Id. at 15.

As to the third and final issue -- i.e., the sufficiency of the circumstantial evidence regarding NTC's participation in the same three types of foregoing conduct -- the court once again concluded that the evidence relied on by plaintiffs failed to support an inference of collusive activity on NTC's part. See Direct Purchaser MSJ Order at 25-26. In arriving at this ultimate conclusion, the court considered and disposed of (a) the economic evidence (including evidence relating to the structure of the DRAM market, and evidence of NTC's purportedly anticompetitive conduct); (b) evidence of NTC's "frequent, high-level communications" correlated to specific collusive behavior; and (c) evidence of NTC USA employees' guilty pleas in the DOJ's related criminal antitrust proceedings. Id. at 17-25.

2. NTC USA's Previous Motion for Summary Judgment

With respect to the related dispositive motion filed by defendant NTC USA, the court came to a different conclusion and denied summary judgment. In coming to its decision, **[**11]** the court considered both the direct and indirect evidence of conspiracy against NTC USA, as it had with NTC. Regarding the direct evidence of conspiracy, the

---

[2] There are also five additional motions filed by defendants in the Sun case, all of which are addressed via separate order filed by the court on March 31, 2009.

[3] Several of the named defendants in this Sun action were also named as defendants in the related MDL litigation pending before the court, including the Nanya defendants. As part of those MDL proceedings, the court had occasion to hear and decide several defendants' dispositive motions addressing issues raised by the direct purchaser plaintiffs' claims.

court found insufficient evidence of NTC USA's participation in any underlying conspiracy, noting that plaintiffs there were relying for the most part on the same evidence they had submitted in connection with NTC -- i.e., Micron emails, and news articles in which NTC's president, Mr. Kau, is quoted. See Direct Purchaser MSJ Order at 29. The court concluded that, substantively, this evidence failed for the same reasons discussed in connection **[*895]** with NTC's motion -- i.e., the inadmissibility of certain hearsay documents, and mischaracterization of the evidence. See id. In addition, however, the court held that the evidence failed because it related to the actions of NTC and NTC's President, and *not* directly to NTC USA, or NTC USA's president, Kenneth Hurley. Id. Finally, the court noted that although plaintiffs had come forward with an additional email particular to NTC USA itself regarding a November 2001 meeting that had been scheduled between Mr. Kau, Mr. Hurley, and Mike Sadler, the email did not constitute direct evidence of **[**12]** conspiratorial conduct, because the email only indicated that such a meeting was scheduled, not that it actually took place. Id.

In analyzing the circumstantial evidence of conspiracy, the court preliminarily noted that NTC USA had come forward with evidence that its participation in any alleged conspiracy would be economically implausible, given its small market share; the expert testimony explaining that price collusion was not possible unless a seller involved in the collusion represents a significant portion of the market share; and the evidence that NTC USA was pricing aggressively during the time period in question. See Direct Purchaser MSJ Order at 30. The court found this evidence sufficient to shift the burden to plaintiffs, who were then required to come forward with evidence tending to exclude the possibility that NTC USA was engaging in permissible competitive behavior, pursuant to Matsushita standards. See id.

The court then turned to plaintiffs' circumstantial evidence, which consisted of (a) economic evidence; (b) evidence of NTC USA's "frequent, high-level communications" correlated to specific collusive behavior; and (c) evidence of co-defendants' guilty pleas in the **[**13]** DOJ's related criminal antitrust proceedings. Id. at 30-31. As to the economic evidence -- which included evidence relating to market share, and NTC USA's purportedly anticompetitive conduct in Compaq actions and its pricing policies -- the court found it insufficient to support an inference of conspiracy. Id. at 33. With respect to the numerous email communications, however, the court noted that the volume of this evidence was much higher than with NTC, and demonstrated that numerous contacts and communications took place during the relevant period between NTC USA executives -- namely, Mr. Hurley and North American Sales Director Mike Walsh -- and other defendants. Id. at 34. The court acknowledged that some of the evidence, when viewed for its substance, conveyed only innocent information, but noted that it was equally apparent that some of the evidence conveyed actions taken by NTC USA executives that may, in fact, be suggestive of collusive behavior. Id. Ultimately, therefore, given the volume of communications present, the court found that plaintiffs had successfully met their burden in arguing that the evidence, considered as a whole, might reasonably support the inference that **[**14]** NTC USA conspired with the admitted conspirators in the action. See Direct Purchaser MSJ Order at 35.

Finally, regarding the other defendants' guilty pleas and the *Fifth Amendment* invocations of certain NTC USA employees, the court found that the guilty pleas were not admissible as to NTC USA, and furthermore, that although adverse inferences based on *Fifth Amendment* invocations are permissible in certain circumstances, plaintiffs there had not made a sufficient foundational showing regarding the specific questions and facts upon which they would like adverse inferences to be drawn. See id. at 35-36. On balance, however, the evidence warranted denial of NTC USA's motion.

* * *

[*896] With this overview in mind, the court now turns to the two motions at issue.

DISCUSSION

A. Summary Judgment Standard

HN1[] Generally speaking, summary judgment "shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." See *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. The court must view the facts **[**15]** in the light most favorable to the non-moving party and give it the benefit of all reasonable inferences to be drawn from those facts. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

HN2[] Where, as here, concerted price-fixing is alleged, the plaintiff bears the ultimate burden of presenting sufficient evidence to prove that an agreement to fix prices existed. See, e.g., *In re Citric Acid Litig., 191 F.3d 1090, 1093 (9th Cir. 1999)*(noting that price-fixing is a per se violation of *section 1 of the Sherman Act*). In order for plaintiff to survive defendants' motions for summary judgment, therefore, plaintiff must establish that there is a genuine issue of material fact as to whether defendants entered into an illegal conspiracy that caused respondents to suffer a cognizable injury. See *Matsushita, 475 U.S. at 585-86*. Plaintiff can establish a genuine issue of material fact by producing either direct evidence that defendants participated in an agreement to fix prices, or circumstantial evidence from which a reasonable fact finder could conclude the same. See, e.g., *Movie 1 & 2 v. United Artists Commc'ns, 909 F.2d 1245, 1251-52 (9th Cir. 1990)*; *United States v. Gen. Motors Corp., 384 U.S. 127, 142-43, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*.

HN3[] With **[**16]** respect to proof by way of circumstantial evidence in section 1 cases, special rules apply. In Matsushita Elec. Indus. Co., the Supreme Court noted that "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a [section 1] case…". See *475 U.S. at 588*. In addressing plaintiff's burden in proving that an issue of material fact exists on the conspiracy question, the court stated, "conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy…". See id. In sum, to survive a motion for summary judgment, "a plaintiff seeking damages for a violation of *[section] 1* must present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently …." Id.

HN4[] The Ninth Circuit has embraced Matsushita and has outlined a two-part test to be applied whenever a plaintiff rests its case entirely on circumstantial evidence. First, the defendant can rebut an allegation of conspiracy by showing a plausible and justifiable reason for its conduct that is consistent with proper business practice. Second, the burden then "shifts back to the plaintiff to provide specific **[**17]** evidence tending to show that the defendant was not engaging in permissible competitive behavior." See, e.g., *In re Citric Acid Litig., 191 F.3d at 1094*.

These standards apply here to the extent that plaintiff seeks to defeat summary judgment as to *section 1* liability on the basis of circumstantial evidence, whether in whole or in part.

B. NTC's Motion for Summary Judgment

NTC's motion generally targets plaintiff's ability to raise triable issues of material fact as to defendant's liability for **[*897]** price-fixing, or for any other unlawful activity. In service of this larger point, NTC argues that it cannot preliminarily be held liable on the basis of NTC USA's conduct, and furthermore, that plaintiff has insufficient evidence that NTC *itself* is guilty of any unlawful activity, or that NTC is guilty as a passive co-conspirator by virtue of its participation in other defendants' unlawful activities. In response, plaintiff argues that an agency theory allows the actions of NTC USA to be imputed to NTC, and furthermore, that "new" evidence combined with already existing evidence suggests NTC's direct and/or indirect participation in the alleged underlying conspiracy.

All told, the issues for the **[**18]** court's consideration can therefore be broken down into two overriding issues: (1) whether NTC may be held liable under the Sherman Act for the actions of NTC USA by virtue of its parent subsidiary relationship with NTC USA; and (2) whether any "new" evidence independently establishes NTC's participation in any unlawful price-fixing or other anticompetitive conspiracy.

1. NTC's Antitrust Liability Vis-a-Vis NTC USA

NTC claims that it has a separate legal existence from its wholly owned subsidiary, NTC USA, and that NTC itself has not engaged in any direct sales of DRAM within the United States since NTC USA's incorporation in 1998. See Declaration of Kenneth Hurley ISO NTC and NTC USA's Motions for Summary Judgment ("Hurley Decl."), Ex. A at P 2. Pursuant to basic principles of corporate law, defendant contends that plaintiff cannot therefore introduce evidence of NTC USA's conduct in attempting to create a material factual dispute with respect to NTC's antitrust liability.

Defendant is correct that, ***HN5***[] as a general matter, corporate law prohibits a parent corporation from being held liable on the basis of its subsidiary's actions. See, e.g., *United States v. Bestfoods, 524 U.S. 51, 118 S. Ct. 1876, 141 L. Ed. 2d 43 (1998)*("It is **[**19]** a general principle of corporate law deeply 'ingrained in our economic and legal systems' that a parent corporation (so-called because of control through ownership of another corporation's stock) is not liable for the acts of its subsidiaries."). However, a parent corporation *may* be held liable for the acts of its subsidiary "where stock ownership has been resorted to, not for the purpose of participating in the affairs of a corporation in the normal and usual manner, but for the purpose of controlling a subsidiary company so that it may be used as a mere agency or instrumentality of the owning company." See *id. at 62-63*. It is this exception upon which plaintiff relies here, in arguing that the imposition of vicarious liability is appropriate pursuant to an agency theory.

Preliminarily, it should be noted that plaintiff's reliance on an agency theory with respect to NTC's liability is distinct from the approach taken by the direct purchaser plaintiffs in the MDL proceedings. The direct purchaser plaintiffs in the MDL relied on the alter ego theory and the single entity doctrine as a means of demonstrating NTC's liability -- not the agency theory. While they also tangentially raised **[**20]** the agency theory argument in a cursory footnote in their briefs and with a casual remark at the hearing, the court declined "to find an agency theory of liability applicable to NTC on the record before it," in view of the fact that plaintiffs had only raised the issue in passing and had furthermore failed to submit any evidence on the issue. See Direct Purchaser MSJ Order at 9, fn. 2. The court's MDL ruling presents no bar to plaintiff's presentation of the same theory here, therefore, since Sun has squarely focused on the agency theory argument and has attempted **[*898]** to make a full evidentiary showing on the issue -- making the topic ripe for consideration in a way that it was not previously.

Turning to the parties' agency arguments, plaintiff first contends that NTC may be held liable for NTC USA's actions because NTC USA can be deemed NTC's agent for liability purposes, under either of***HN6***[] two applicable agency doctrines: the representative services doctrine, and/or the traditional common law doctrine of agency. The representative services doctrine, which the Ninth Circuit has acknowledged in the personal jurisdiction context, asks whether the subsidiary functions as the parent corporation's **[**21]** representative in performing services that are sufficiently important that if it did not have a representative to perform them, the parent would undertake to perform similar services on its own. See *Harris Rutsky & Co. Ins. Services, Inc. v. Bell & Clements Ltd., 328 F.3d 1122, 1134-35 (9th Cir. 2003)*(representative agency test permits the imputation of contacts where the subsidiary was "either established for, or is engaged in, activities that, but for the existence of the subsidiary, the parent would have to undertake itself"); *Doe v. Unocal, 248 F.3d 915, 925, 928 (9th Cir. 2000)*("the question to ask is… whether, in the truest sense, the subsidiaries' presence substitutes for the presence of the parent"). By contrast, the traditional common law agency doctrine -- for which both parties cite federal district court authorities -- is based on analysis of three factors: (1) manifestation by a principal that the agent would act on its behalf; (2) the agent's acceptance or consent to act on the principal's behalf; and (3) the understanding that the principal would be in control of the agent's undertaking on its behalf. See *Bowoto v. Chevron Texaco Corp., 312 F. Supp. 2d 1229, 1241-42 (N.D. Cal. 2004)*; **[**22]** *E&J Gallo Winery v. EnCana Energy Servs., Inc., 2008 U.S. Dist. LEXIS 46927, 2008 WL 2220396, *11 (E.D. Cal. 2008)*.

NTC initially disputes that application of the representative services doctrine to the present liability context is appropriate, arguing that the Ninth Circuit has limited the doctrine to the personal jurisdiction context. NTC does not, by contrast, object to application of the traditional common law agency doctrine; however, it argues that plaintiff cannot establish the viability of the doctrine here, since there is no evidence of an express or implied agency agreement between NTC and NTC USA, nor is there evidence that NTC USA accepted appointment as an agent, or that NTC controlled NTC USA's day to day activities

As the parties' differing takes on the matter intimate, the initial question of which agency test to apply for liability purposes in the parent-subsidiary context is not a simple choice between two alternatives. As defendant correctly observes, the representative services doctrine acknowledged by the Ninth Circuit in *Doe* did consider the agency question in light of the parent-subsidiary relationship, but only in the personal jurisdiction context. And while both *Bowoto* and *E&J Gallo* do acknowledge **[**23]** that the common law agency test is more appropriate in light of the parent-subsidiary relationship in the liability context, both cases are district court opinions that lack precedential authority. Moreover, the scope of the agency test laid out therein is less than clear. In sum, there is no Ninth Circuit authority cited by the parties, or discovered by this court, that expressly addresses the question of agency in the parent-subsidiary context for purposes of liability (let alone is there a case that deals with this question in the antitrust context specifically). [4]

[*899] While neither the **[**24]** personal jurisdiction context in Doe nor the liability context discussed in the parties' cited district court cases is directly on point or controlling, however, this is not to say that the cases are not helpful -- particularly the latter. *Bowoto* and *E&J Gallo*, for example, both correctly note that the traditional common law of agency does, in fact, provide the basis for the guiding principles that should be given effect in this case. And as both district courts acknowledge, in the area of agency, it is federal common law that controls with respect to federal claims like the Sherman Act. See *Bowoto, 312 F. Supp. 2d 1229*; *E&J Gallo, 2008 U.S. Dist. LEXIS 46927, 2008 WL 2220396 at *5*. Federal common law is in turn guided by those principles set forth in the Restatement of Agency. Turning, then, to the operative Restatement Third, it lays ***HN7***[] the foundation for a traditional agency test that requires a plaintiff to demonstrate: (1) a manifestation by the principal that the agent shall act for him; (2) that the agent has accepted the undertaking; and (3) that there is an understanding between the parties that the principal is to be in control of the undertaking. See *Restatement (Third) of Agency, § 1.01*; see also *Transamerica Leasing, Inc. v. La Republica de Venezuela, 339 U.S. App. D.C. 385, 200 F.3d 843, 849 (D.C. Cir.2000)*. **[**25]** This, therefore, is the test that the court employs here. [5]

HN8[] In applying this traditional common law agency test, the court furthermore notes that, because one of the touchstones of the test is the corporation's control over the subsidiary for purposes of a defined "undertaking," this agency test shares similar concerns with many of the other tests formulated by various courts to determine agency -- all of which also use concepts of day to day control as a touchstone. See, e.g., *Phoenix Canada Oil Co. Ltd. v. Texaco, Inc., 658 F. Supp. 1061, 1084-85 (D. Del.1987)*(antitrust case holding that parent is liable for acts **[**26]** of subsidiary under agency theory only if parent "dominates" subsidiary; parent of wholly-owned subsidiary that had seats on board, took part in financing, and approved major policy decisions was not liable because parent did not have day-to-day control); *Frank v. U.S. West, Inc., 3 F.3d 1357, 1362, fn. 2 (10th Cir. 1993)*(acknowledging agency theory as possible basis for holding parent corporation liable for acts of its subsidiary in employment context; describing relevant agency test as whether "the parent exercised a significant degree of control over the subsidiary's decision-making"). Critically, however, it is to be remembered that the majority of decisions require more than mere ownership of stock, and more than the supervision of finance and capital budget decisions, or shared directorships, in order for a finding of agency to issue. See, e.g., *United States v. Bestfoods, 524* ***[*900]*** *U.S. at 72*; *Phoenix Canada Oil Co. Ltd. v. Texaco, Inc., 658 F. Supp. 1061, 1084-85 (D. Del.1987)*(parent of wholly-owned subsidiary that had seats on board, took part in financing, and approved major policy decisions was not liable because parent did not have day-to-day control); *H.J., Inc. v. International Tel. & Tel. Corp., 867 F.2d*

[4] This absence of authority on the precise question before the court reflects the generally confusing state of the law on this point. As the Supreme Court itself has noted: "The whole problem of the relation between parent and subsidiary corporations is one that is still enveloped in the mists of metaphor. Metaphors in law are to be narrowly watched, for starting as devices to liberate thought, they end often by enslaving it." *First Nat'l Bank v. Banco Para El Comercio Exterior de Cuba, 462 U.S. 611, 623, 103 S. Ct. 2591, 77 L. Ed. 2d 46 (1983)*(considering analogous questions of liability among differing foreign governmental entities).

[5] This ruling is consistent with the conclusion reached by the court in its March 31, 2009 order granting defendants' motion to dismiss certain of plaintiff's claims for lack of subject matter jurisdiction under the FTAIA (among other motions). Plaintiff there made the same agency arguments as here, but for the purpose of seeking a ruling that *its* third party relationships supported an agency finding for purposes of jurisdiction under the FTAIA. Here, as noted, plaintiff seeks an agency finding with respect to defendant's relationship with a subsidiary for liability purposes.

1531, 1549 (8th Cir. 1989)(briefly **[**27]** considering alternate theory of agency in antitrust context for liability purposes, and holding that any finding that subsidiary was agent of principal for purposes of liability was in error, despite evidence indicating that both companies acted jointly in several aspects). The question of agency is also highly fact specific.

Applying the traditional agency test pursuant to these standards here, the ultimate question on summary judgment is whether plaintiff can point to facts that create a triable issue of fact as to: (1) NTC's intent to have NTC USA act on NTC's behalf with regard to the pricing and sale of DRAM; (2) NTC USA's acceptance and/or understanding of its role in DRAM pricing and sales on NTC USA's behalf; and (3) an understanding between NTC and NTC USA that NTC is to be in control of NTC USA's DRAM pricing and sales activity.

Arguing that all three elements are satisfied, plaintiff submits the following purportedly undisputed facts: that NTC formed NTC USA for the very purpose of acting as its sales and marketing arm in the United States; that communications between NTC and NTC USA were regular and extensive; that NTC set and regulated NTC USA pricing policy; that the companies **[**28]** shared two directors; that NTC USA's employee, Ms. Chen, testified that NTC USA's sole purpose was to conduct NTC's DRAM sales; that NTC's audit committee performed internal audits of various functions at NTC USA; that Mr. Hurley, who is an executive for NTC USA, helped negotiate NTC's strategic alliances with Dell regarding DRAM, and was instructed by NTC to negotiate with IBM on NTC's behalf in connection with certain DRAM payments; and that NTC designated Mr. Hurley to testify as NTC's corporate representative about the authority of officers, employees and managers at NTC USA. See, e.g., Declaration of David Cross ISO MSJ Opp. ("Cross Opp. Decl."), Ex. 14 at 39-41, 170-72; Ex. 72 at PP 1-2; Ex. 76 at 177, 214-15; Ex. 77 at 60; Ex. 75 at 22-27; Declaration of David Cross ISO Plaintiffs' Submission of Newly Discovered Evidence ("Cross New Evidence Decl."), Exs. A-C.

In response, defendant contends that plaintiff has distorted these facts beyond what examination of the record actually supports, and that even as to their substance, the evidence does not rise to the level of establishing an agency relationship. Defendants note, for example: that the deposition testimony relied on by plaintiff **[**29]** as proof that NTC USA is there simply to "sell and market [NTC] product" is taken out of context and ascribed to a different question altogether; that the testimony by Mssrs. Hsu and Wang, relied on for proof of NTC's control over NTC USA's prices, is deficient and issues from employees with no actual pricing responsibility; that NTC USA had the ability to approach multinational OEMs without NTC's consent; that NTC USA's submission of audit-related paper work regarding new hires to NTC is not synonymous with NTC's approval over hiring and salaries at NTC USA; and that any contacts between NTC and NTC USA were minimal and not substantive. See Cross Opp. Decl., Ex. 73; Ex. 74 at 33; Ex. 82; Exs. 81-83; see also Reply Declaration of Michael J. O'Hara ISO Nanya's MSJ ("O'Hara Reply Decl."), Ex. C; Ex. D; Reply Declaration of Kenneth M. Hurley ISO Nanya's MSJ ("Hurley Reply Decl."), P 11.

[*901] On balance, the court concludes that the parties' competing positions highlight the existence of materially disputed facts on the question of agency. To be sure, some of plaintiff's undisputed facts -- e.g., the fact that NTC and NTC USA shared two board members, or that NTC shared some supervision of finance **[**30]** and pricing decisions -- do not justify any inference of agency as a matter of law. See, e.g., *United States v. Bestfoods, 524 U.S. at 72*; *H.J., Inc., 867 F.2d at 1549*. Notwithstanding, however, there are sufficient other facts introduced by plaintiff that raise a triable dispute of fact, in the court's view, as to whether NTC expressed a desire that NTC USA undertake certain pricing and sales on NTC's behalf, whether NTC USA agreed to do so, and whether NTC had sufficient control over pricing and sales of NTC USA. Defendant's competing view of these facts -- and the evidence marshaled by defendant in support thereof -- only serve to confirm, rather than undercut, this point.

In short, it is impossible for the court to conclude with certainty that all facts presented here cut decisively against a finding of agency as a matter of law. It is the trier of fact who must resolve the underlying questions of fact as to the relationship existing between NTC and NTC USA, so that a conclusion of law as to agency may be made.

In so ruling, the court is also mindful that, as defendant points out, some degree of control is usually even if not necessarily implicit in the parent subsidiary relationship. **[**31]** Thus, ***HN9***[] the degree of control exercised by the parent in order for the subsidiary to qualify as an agent must therefore exceed that which is to be expected in the normal scope of any such relationship.

In sum, however, the court concludes that there are disputed issues of material fact as to NTC's desire that NTC USA undertake DRAM pricing on NTC's behalf, that NTC USA viewed its role as such, and/or that NTC controlled NTC USA with respect to DRAM pricing, such that a reasonable juror could find an agency relationship satisfied. As such, plaintiff has created a triable issue of material fact with respect to NTC's vicarious liability for the overarching conspiracy alleged by plaintiff, on the basis of its relationship with NTC USA. Summary judgment in defendant's favor on this issue is accordingly DENIED.

2. Independent Evidence of NTC's Participation in Alleged DRAM Conspiracy

This brings the court to the second issue under consideration: whether, as an alternative to establishing NTC's liability via its relationship and contacts with NTC USA, plaintiff has sufficient evidence to suggest that NTC independently participated in any alleged DRAM conspiracy.

In its summary judgment order in **[**32]** the related MDL action, the court previously considered all direct and indirect evidence of NTC's participation in a conspiracy to fix DRAM prices, reduce DRAM supply, or unlawfully exchange price information, and concluded that plaintiff could not raise a triable issue of fact as to NTC's participation in any of the foregoing. To the extent plaintiff would base its present case upon the identical evidence, the court's reasoning and holding apply with equal force.

Plaintiff, however, asserts that "new" evidence demonstrates the existence of sufficient facts to support an inference that NTC itself was an active participant in the conspiracy: namely, the recent deposition testimonies of Il Ung Kim, senior vice president at Samsung, and Mike Sadler, vice president of worldwide sales for Micron. See generally, e.g., Cross MSJ Opp. Decl., Ex. 84; Ex 36. When considered in **[*902]** combination with the existing evidence in the record, plaintiff continues, the evidence collectively creates a triable issue of fact regarding NTC's participation in unlawful conspiratorial activity. Defendant, naturally, disputes that plaintiff's new evidence supports a legitimate inference of NTC's participation in any **[**33]** conspiracy, and further notes that to the extent plaintiff relies on evidence already considered and rejected by the court, the court need not reconsider such evidence here.

The court must decline, however, to pass upon the viability of plaintiff's new evidence here, in view of its finding that there are disputed issues of material fact with respect to agency. As the court has stated previously, and most recently in its March 31, 2009 order in connection with the remaining summary judgment motions pending in the current case, ***HN10***[] the court must consider the circumstantial evidence in the aggregate, in determining the existence of conspiratorial conduct on the part of a defendant. See, e.g., *In re Citric Acid Antitrust Litig., 191 F.3d 1090, 1097 (9th Cir. 1999)*(critical question in evaluating circumstantial evidence is "whether all the evidence considered as a whole can reasonably support the inference that [defendant] conspired with the admitted conspirators to fix prices"). In the event that a finding of agency -- and therefore, NTC's vicarious liability -- is ultimately deemed proper, the trier of fact will assess NTC USA's actions in addition to those of NTC itself, on the question **[**34]** of conspiratorial conduct.

Since any affirmative conspiracy finding will therefore be based on the assessment of all these facts in the aggregate, the present evidentiary record as to NTC is, in essence, incomplete. As such, and without knowing whether plaintiff has come forward with the sum total of the evidence admissible against NTC, the court is not in a position to affirmatively determine as a matter of law whether plaintiff's "new" evidence, standing on its own, is sufficient to raise a triable issue of material fact as to NTC's conspiratorial conduct. Rather, the trier of fact must consider all the evidence presented at trial, determine the underlying facts going to the question of agency, and based upon a corresponding finding, determine whether the evidence as to NTC collectively supports a finding of conspiratorial conduct.

* * *

In sum, and based on all the foregoing, the court hereby DENIES summary judgment in NTC's favor.

C. NTC USA's Motion for Summary Judgment

NTC USA also moves for summary judgment, making the same larger point that NTC made -- that there is insufficient evidence that NTC USA (as distinct from NTC) participated in any unlawful conspiracy. Thus, the same **[**35]** general framework and standards apply, and the question for the court remains: whether the evidence independently establishes NTC USA's participation in any conspiracy to fix prices, or other unlawful collusive activity.

This is the same question that NTC USA raised before the court in the MDL proceedings, and many of the arguments duplicate those made in the MDL proceedings. As a preliminary matter, however, the court is mindful that although the nature of the alleged conspiracy here is fundamentally the same as that alleged in the MDL proceedings, the focus of the parties' arguments here is somewhat different than in the MDL summary judgment motions. Sun's case, for example, focuses more particularly on defendants' participation in an underlying conspiracy to raise prices to the Target OEMs, which in turn raised prices to plaintiff, via an industry-wide price increase. In recognition of this shift **[*903]** in emphasis, NTC USA therefore takes a slightly different approach than it did in the related MDL case, proceeding along two different but parallel tracks: first, NTC USA argues that there is insufficient evidence that it participated in a Target OEM conspiracy. Second, NTC USA argues that **[**36]** there is insufficient evidence that it *otherwise* participated in any other type of unlawful conspiracy to fix DRAM prices or exchange price information. [6]

The court's inquiry, therefore, considers not only whether there is any direct or circumstantial evidence of NTC USA's participation in any unlawful conspiracy generally aimed at the DRAM industry (and by **[**37]** extension, plaintiff) but also aimed at the Target OEMs.

Turning to the evidence, NTC USA has -- as it did in the direct purchaser litigation -- initially come forward with evidence that its participation in any alleged conspiracy would be economically implausible, in view of the following: NTC USA made no sales of DRAM to Sun during the damage periods identified by plaintiff's experts; NTC USA had a small market share for worldwide DRAM sales, ranging from 1.4% to 5.5%, for the plea period in question; Dr. Alan Cox, NTC USA's expert, has opined that price collusion is not possible unless a seller involved in the collusion represents a significant portion of the market; and throughout the alleged conspiracy time frame, NTC USA priced aggressively and expanded its DRAM sales dramatically. See generally Declaration of Alan Cox ISO MSJ; Declaration of Kenneth Hurley ISO MSJ ("Hurley Decl."), PP 3-4, 8-9; Declaration of Na'il Benjamin ISO Nanya's MSJ ("Benjamin Decl."), Ex. CC at 19:15-21:12; Ex. DD, Response No. 7. NTC USA has also relied on the factual evidence to establish NTC USA's lack of participation in any underlying DRAM conspiracy: Kenneth Hurley, NTC USA's president and the senior **[**38]** NTC USA employee responsible for all sales and pricing activities during the relevant time frame, also testified that NTC USA was never aware of the existence of any industry wide conspiracy, was never told that any other DRAM manufacturers were engaged in any conspiracy, and did not itself engage in any such conspiracy. See, e.g., Hurley Decl., P 9.

All of which, combined with the lack of any direct evidence demonstrating NTC USA's participation in any collusive activity, is sufficient to shift the burden to plaintiff, who is required to come forward with evidence tending to *exclude* the possibility that NTC USA was engaging in permissible competitive behavior. See, e.g., *In re Citric Acid Litig., 191 F.3d 1090, 1094 (9th Cir. 1999)*(***HN11***[]) once defendant rebuts an allegation of conspiracy by showing a "plausible and justifiable reason for its conduct that is consistent with proper business practice," the burden then "shifts back to the plaintiff to provide specific evidence tending to show that the defendant was not engaging in

[6] The court also notes that, as was the case in connection with the direct purchaser motions, NTC USA declines here to focus on any evidence of a supply reduction. This makes sense, as NTC USA did not manufacture DRAM; it simply sold the DRAM manufactured by NTC. It bears repeating, however, that even if NTC USA did not itself engage in a reduction in DRAM output, it may nonetheless be held liable for the actions of other co-defendants in reducing their DRAM output, if it is proven that NTC USA otherwise participated in an unlawful conspiracy with those defendants. See, e.g., *BBD Transp. Co., Inc. v. Southern Pac. Transp. Co., 627 F.2d 170, 173 (9th Cir. 1980)*("To be liable as a co-conspirator for the anticompetitive acts of [other co-conspirators], the railroads need not have known of or participated in those acts themselves.").

permissible competitive behavior"); see also *Matsushita Electric Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 596-97, 106 S. Ct. 1348, 89 L. Ed. 2d 538* ***[*904]*** *(1986)*("if [the defendants] had no rational **[**39]** motive to conspire, and if [their] conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy").

To make this showing, plaintiff relies on circumstantial evidence that overlaps in large part with the circumstantial evidence submitted by direct purchaser plaintiffs in the MDL proceedings. That evidence primarily consists of: (1) email communications; and (2) inferences drawn from *Fifth Amendment* invocations by three senior employees of NTC USA. [7]

1. Email Communications

As the direct purchaser plaintiffs did previously, plaintiff here relies on a voluminous record of email correspondence in its effort to establish an inference of conspiracy. Generally, this email correspondence can be broken down into two general categories: communications from or to NTC USA regarding NTC USA's contacts with defendants; and communications from or to non-NTC USA sources regarding NTC USA's contacts with defendants. All of these email communications contain some reference to pricing, or reference different defendant competitors, or contain statements as to what some defendant competitors knew of NTC USA's pricing. According to Sun, these communications prove the existence of detailed exchanges of pricing information and meetings between defendants, all of which purportedly track alleged coordinated production cuts and price increases, thereby demonstrating NTC USA's participation in collusive conduct.

As noted, plaintiff first relies on communications **[**41]** that come "from NTC USA's own mouth" -- the majority of which involve senior NTC USA executives Kenneth Hurley (President) and Mike Walsh (North American Sales Director). See, e.g., Cross MSJ Opp. Decl., Exs. 2-7, 13, 16, 19; id., Ex. 14 at 64-71, 90-91, 98-100, 111, 163. These communications establish: the fact that NTC USA sent spreadsheets to the VP of Sales at Elpida, which spreadsheets contained "Nanya" price targets, including detailed information about part numbers and associated pricing; that Mr. Hurley and Mr. Walsh communicated with each other about "checking with [their] competitors to see where [they] were in relation to their quotes;" that Mr. Walsh regularly exchanged information related to DRAM price forecasts with an Elpida contact; that Mr. Hurley regularly spoke and communicated with senior executives of NTC USA's competitors about the DRAM business; and that on occasion, when Dell would give NTC USA "competitive feedback on pricing that major suppliers had been providing to [Dell]," Mr. Hurley would contact Mr. Sadler of Micron to ask him "if he had heard the same ranges of prices that Dell was providing to Nanya." See id.

The second group of email correspondence **[**42]** that plaintiff relies on includes those communication exchanges that stem from **[*905]** other competitors' employees, and which purportedly implicate NTC USA. See, e.g., Cross MSJ Opp. Decl., Exs. 37 (Kevin Chen of Mosel "directly checked with the marketing people of Nanyan [sic]" who "told [him] that they had stopped 128MB SD and the inventory level is very small, so they insist price at $ 1.75"); 38 ("Nanaya [sic] told me their lowest price on last Friday was $ 2.5 but they quoted and keep price $ 2.6 today"); 39 (Mr. Liu of Mosel knew in advance that "Nanya … will try to quote $ 4.0 next Monday"); id. at Exs. 41-44, 45-55.

As a preliminary matter, NTC USA has filed numerous objections to the admissibility of this evidence on hearsay grounds, relying on the well-settled rule that ***HN12***[] "only admissible evidence may be considered by the trial court in ruling on a motion for summary judgment." See, e.g., *Beyene v. Coleman Sec. Servs., Inc., 854 F.2d 1179, 1181-82 (9th Cir. 1988)*. As the parties undoubtedly recall, it was in service of this rule that the court previously

---

[7] As did the direct purchaser plaintiffs, Sun also relies on economic evidence relating to the structure of the DRAM market for proof that it makes economic sense for NTC USA to have participated in the alleged conspiracy. Specifically, plaintiff relies on the report by its expert, Dr. Robert Marshall. See Cross MSJ Opp. Decl., Ex. 96 at 71. However, even assuming that Dr. Marshall's testimony is capable of successfully refuting defendants' evidence as to whether the DRAM market would be receptive to a defendant's participation in the underlying conspiracy, the testimony does not opine that the market would have been receptive to *NTC USA itself* (as opposed to the defendants collectively) **[**40]** engaging in a conspiracy, as NTC USA points out. For that reason, this type of economic evidence, standing alone, cannot support an inference of NTC USA's participation in any underlying conspiracy.

excluded several of plaintiffs' similar exhibits containing email correspondence and industry news bulletins, holding that the documents **[**43]** constituted inadmissible hearsay and failed to qualify for the co-conspirator exception advanced by defendant. See Direct Purchaser MSJ Order at 11-12.

A similar ruling is not warranted here, however. First, both the parties' arguments and the showing made as to this issue here are distinct. Defendants' objections, for example, respond to each exhibit in boiler plate fashion, without distinguishing the excerpt of each exhibit that purportedly constitutes hearsay. See generally Nanya's Objections to Plaintiffs' Exhibits ISO MSJ Opp. ("Nanya Objections"). This makes it difficult if not impossible for the court to determine -- as it was able to do in the MDL proceedings -- whether a given statement in an exhibit is being offered for the truth of the matter asserted therein or, as plaintiff urges, as evidence of conduct from which the trier of fact is to infer something else. Only the former constitutes hearsay. To that end, and for the same reasons, the court is also hard pressed on the record of objections before it to determine the viability of the various exceptions to hearsay that plaintiff asserts apply. This evaluation is a necessary component to determining admissibility of the **[**44]** exhibits in the event the exhibits do, in fact, constitute hearsay.

Second, and moreover, the court is also mindful that with respect to many of the exhibits that constitute communications from or to NTC USA, the content contained therein would likely be authenticated and admissible at trial via the testimony of the out of court declarants themselves, thus suggesting that their submission and the court's reliance thereon at the summary judgment stage is proper. See, e.g., *Fraser v. Goodale, 342 F.3d 1032, 1036-37 (9th Cir. 2003)*("***HN13***[] At the summary judgment stage, we do not focus on the admissibility of the evidence's form. We instead focus on the admissibility of its contents"); *Fed. Deposit Ins. Corp. v. N.H. Ins. Co., 953 F.2d 478, 485 (9th Cir. 1991)* ("the nonmoving party need not produce evidence in a form that would be admissible at trial in order to avoid summary judgment."). Indeed, this is the same observation made by the court in the MDL proceedings with respect to similar evidence. See Direct Purchaser MSJ Order at 34 n.7. All of which compels the court to overrule defendant's inadmissibility objections to the above exhibits. [8]

[*906] Putting aside defendant's admissibility objections, defendant more fundamentally disputes the weight that should be given the substance of the above exhibits. Defendant argues, for example, that while the emails may suggest the possibility of competitor contacts or meetings, they do not actually demonstrate that any such contact or meeting took place. See, e.g., Cross MSJ Opp. Decl., Ex. 2. Similarly, they point out that some of the emails do not discuss DRAM pricing at all, but rather reflect innocuous discussions and meetings about generic industry information, or events like employee interviews. See, e.g., id., Ex. 6; Ex. 7. And still other exhibits, continues defendant, do not establish a NTC USA contact at all, but merely reflect undifferentiated Nanya pricing from potentially unreliable sources. See, e.g., id., Ex. 39; Ex. 40. Plaintiff cannot withstand its summary judgment burden, asserts defendant, in light of these seemingly innocent explanations and/or unreliable communications.

Defendant's position is not without some merit. It seems apparent, for example, that some of the communications relied **[**46]** upon by plaintiff convey only innocent information, standing alone. Furthermore, as the court has previously held, to the extent that some of plaintiff's cited communications discuss generic pricing or industry information, there is nothing inherently wrong with the exchange of such information among competitors in the same industry. See *In re Citric Acid, 191 F.3d at 1103*, citing *In re Baby Food Antitrust Litig., 166 F.3d 112, 126 (3d Cir. 1999)*("***HN14***[] [C]ommunications between competitors do not permit an inference of an agreement to fix prices unless 'those communications rise to the level of an agreement, tacit or otherwise.'"); *Rutledge v. Elec. Hose & Rubber Co., 327 F. Supp. 1267, 1271 (C.D. Cal. 1971)*("Absent an agreement to fix prices, there is nothing unlawful about competitors meeting and exchanging price information or discussing problems common in their industry, or even exchanging information as to the cost of their product."). [9]

---

[8] Defendant is, of course, free to renew its hearsay **[**45]** objections at trial, to the extent such exhibits are relied upon in the future.

[9] The court also notes that certain of the email correspondence relied on by plaintiff fails to distinguish between NTC and NTC USA, referring only generically to "Nanya." This is problematic, since it makes it impossible for the court to determine which **[**47]** of the Nanya entities the information contained therein should be deemed admissible against. However, many of these

It is in the aggregate, however, that the court must ultimately judge the relevant evidence. And taken in the aggregate, the evidence -- much of which is the same as was before the court in the MDL proceedings -- demonstrates that numerous contact and communications that took place between NTC USA executives and other defendants during the relevant time period, of varying degrees and kind. It is undisputed that at least some of the discussion therein concerned DRAM pricing, even if some can be classified as generic shop talk. See, e.g., *In re Citric Acid, 191 F.3d at 1103* (***HN15***[] Specific discussions between competitors regarding price may give rise to inference of conspiracy). The court is ultimately persuaded, as it was by the direct purchaser plaintiffs in the MDL proceedings, that on balance, the volume of contact **[**48]** and communications (and considering the fact that some of the defendants and individuals with whom NTC USA was communicating are admitted conspirators), might reasonably support the inference that NTC USA conspired with the admitted conspirators in this action to engage in **[*907]** collusive activity regarding the industry-wide sale of DRAM at artificial prices.

2. *Fifth Amendment* Invocations and Possibility of Adverse Inferences

In attempting to overcome NTC USA's initial showing that any conspiracy defies plausible economic justification, plaintiff also argues that adverse inferences of conspiracy should be made against three of NTC USA's employees -- Mr. Walsh, Mr. Donahue, and Mr. Dwyer -- all of whom invoked the *Fifth Amendment* at their depositions in response to certain relevant questions.

The court previously denied a similar request made by the direct purchasers in the MDL proceedings to draw adverse inferences. As the court noted there, the seminal case on this issue, *Baxter v. Palmigiano, 425 U.S. 308, 96 S. Ct. 1551, 47 L. Ed. 2d 810 (1976)*, holds that ***HN16***[] adverse inferences based on a party's invocation of the *Fifth Amendment* are permissible in certain situations. Lower courts interpreting Baxter, however, have been uniform **[**49]** in suggesting that the key to the Baxter holding is that such adverse inferences may only be drawn when independent evidence exists of the fact to which the party refuses to answer. See, e.g., *LaSalle Bank Lake View v. Seguban, 54 F.3d 387, 391 (7th Cir. 1995)*; *Peiffer v. Lebanon Sch. Dist., 848 F.2d 44, 46 (3d Cir.1988)*. Thus, an adverse inference can be drawn when silence is countered by independent evidence of the fact being questioned, but that same inference cannot be drawn when, for example, silence is the answer to an allegation contained in a complaint. See *Nat'l Acceptance Co. v. Bathalter, 705 F.2d 924, 930 (7th Cir. 1983)*.

The court denied the direct purchasers' request for adverse inferences, because plaintiffs there had not made a sufficient foundational showing regarding the specific questions and facts upon which they were requesting that adverse inferences be drawn. Here, plaintiff has sought to distinguish its attempt from the direct purchasers' previous attempt by setting forth the specific grounds upon which it requests an adverse inference, as well as the evidence that independently supports the answers to the questions that the three deponents at issue refused to **[**50]** answer.

Specifically, plaintiff requests that the court make the following adverse inference with respect to all three NTC USA witnesses at issue: that each NTC USA employee "exchanged DRAM pricing or other competitive information" with NTC USA's rivals. See, e.g., Pl. Opp. Br. at 33:5-34:2. Plaintiff bases this request on each employee's *Fifth Amendment* invocation taken in response to the question whether the employee had exchanged pricing or other competitive information with NTC USA's competitors. See id. As independent evidence supporting the requested inference, plaintiff points to testimony by employees and executives of the various competitor defendants that purportedly reveal that all three NTC USA employees *did*, in fact, exchange DRAM pricing or other competitive information with them. See id.

The court concludes that plaintiff has laid a sufficient foundation for its request. First, with respect to Mr. Walsh, plaintiff has correctly pointed out that Mr. Donabedian of Elpida and Mr. Elliot of Samsung both testified that they had communications with Mr. Walsh regarding DRAM pricing. See Cross MSJ Opp Decl., Ex. 30, PP 2, 4; Ex. 31 at 78, 82-83, 166. Thus, an adverse inference **[**51]** that Mr. Walsh exchanged DRAM pricing information with Elpida

---

emails can readily be sourced to an NTC USA employee or origin. Moreover, when viewed in the aggregate with the totality of the evidence submitted by plaintiff, the affected emails do not justify the court's wholesale rejection of plaintiff's evidence or arguments.

and Samsung, to the extent detailed by Mssrs. Donabedian and Elliot, is appropriate. Similarly, and with respect to Mr. Donahue, plaintiff has noted that Mr. Elliot also testified that he had communications with Mr. Donahue regarding **[*908]** "market trends and general price information." See id. at Ex. 31 at 80-81. Thus, an inference that Mr. Donahue exchanged market trend and general price information with Mr. Elliot is also proper. Finally, with respect to Mr. Dwyer, plaintiff has pointed out that Mr. Grifo of Samsung testified that he had communications with Mr. Dwyer regarding DRAM pricing, and furthermore, that email correspondence between Mr. Dwyer and Mr. Hurley independently establishes that Mr. Dwyer had asked Mr. Grifo for Samsung's DRAM pricing on at least one occasion. Id., Ex. 34 at 17-18, Ex. 35. Thus, an inference that Mr. Dwyer exchanged DRAM pricing information, to the extent detailed by Mr. Grifo and set forth in the email communication in evidence, is also appropriate.

In sum, to the extent plaintiff has relied on independent evidence establishing that Samsung employees (plus Elpida, in the case of Mr. Walsh) had **[**52]** discussions with each NTC USA employee regarding DRAM pricing, an adverse inference is proper. In granting plaintiff's request for such adverse inferences, however, the court notes that any adverse inferences are limited to what the independent evidence actually corroborates. Thus, the court does not sanction the use of adverse inferences against the three NTC USA employees to the extent plaintiff seeks inferences as to competitors whose corroborative testimony or evidence has not been submitted.

Even after making these inferences, the court is mindful that, standing alone, a single inference is insufficient to establish NTC USA's participation in any conspiracy to fix prices, either to the Target OEMs, or within the industry at large. Moreover, as already noted, "shop talk" is not actionable. Again, however, the question is whether the inferences, together with the aggregate evidence, can support an inference of collusive activity. The court answers this question in the affirmative, for the reasons discussed herein.

* * *

Accordingly, as it found previously in connection with the MDL proceedings, the court once again concludes that plaintiff has presented disputed issues of material **[**53]** fact as to proof of NTC USA's involvement in the overarching conspiracy alleged by plaintiff. Summary judgment is therefore DENIED.

D. Conclusion

For all the foregoing reasons, the court hereby DENIES both NTC's motion for summary judgment, and NTC USA's corresponding motion for summary judgment.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Standards of Review, De Novo Review**

An appellate court reviews de novo a dismissal for failure to state a claim pursuant to *Fed. R. Civ. P. 12(b)(6)*. All allegations of material fact are taken as true and construed in the light most favorable to the non-party.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN2[] **Estoppel, Collateral Estoppel**

Issue preclusion is decided under the law of the state where judgment was entered. Under California law, issue preclusion applies only if a number of conditions are satisfied. Among those conditions are the issue must have been actually litigated in the former proceeding and the decision in the former proceeding must be final and on the merits.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN3[] **Regulated Practices, Price Fixing & Restraints of Trade**

Aguilar v. Atlantic Richfield Co., precludes a claim that depends upon proof of collusion by defendants to use exchange agreements to control supply and prices, notably in the form of a per se claim of a horizontal price-fixing conspiracy, but it does not preclude a claim that the bilateral exchange agreements have an anticompetitive effect on competition, despite the absence of collusion, under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN4[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

With regard to an antitrust action, the determination of whether an agreement unreasonably restrains trade can be based upon per se condemnation or under a rule of reason analysis. A per se claim and a rule of reason claim are distinct. Courts will condemn as per se illegal only those agreements that are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality. For example, price-fixing agreements between two or more competitors, otherwise known as horizontal price-fixing agreements, are condemned as per se illegal.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN5[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

With regard to an antitrust action, for a rule of reason claim, the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN6[] **Regulated Practices, Private Actions**

Fed. R. Civ. P. 8(a)(2) requires a short and plain statement of the claim showing that the pleader is entitled to relief, in order to give the defendant fair notice of what the claim is and the grounds upon which it rests. *Fed. R. Civ. P. 8(a)(2)*. A well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely. Dismissals for failure to state a claim are disfavored in antitrust actions.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN7[] **Per Se Rule & Rule of Reason, Sherman Act**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states. However, it has long been recognized that Congress did not intend to give literal meaning to those words, but instead only intended to make unlawful unreasonable restraints on trade. Therefore, to establish a claim under *§ 1* of the Sherman Act, the plaintiff must show (1) that there was a contract, combination, or conspiracy; (2) that unreasonably restrained trade under either a per se rule of illegality or a rule of reason analysis; and (3) that the restraint affected interstate commerce.

Antitrust & Trade Law > Sherman Act > Claims

HN8[] **Sherman Act, Claims**

Under the first element of a *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, claim, a plaintiff must plead the existence of a contract, combination, or conspiracy, meaning a defendant did not operate unilaterally, but instead, at least two entities acted in concert.

Antitrust & Trade Law > Sherman Act > Claims

HN9[] **Sherman Act, Claims**

Antitrust law is clear that a plaintiff need not prove intent to control prices or destroy competition to demonstrate the element of an agreement among two or more entities. The intent of the parties is to be evaluated under the second element of the *15 U.S.C.S. § 1* analysis.

Antitrust & Trade Law > Sherman Act > Claims

HN10[] **Sherman Act, Claims**

Under the second element of a *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, claim, a plaintiff must show the challenged agreement unreasonably restrains trade by establishing anticompetitive effects. To make this showing under the rule of reason analysis, a plaintiff generally must establish market power. Market power is the ability to raise prices above those that would be charged in a competitive market.

Antitrust & Trade Law > Sherman Act > Claims

HN11[] **Sherman Act, Claims**

With regard to an antitrust action, an aggregation of claims may produce sufficient proof of violation or injury where violation requires that a certain legal threshold be met and no claim standing alone is sufficient to meet the threshold.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN12[] **Regulated Practices, Price Fixing & Restraints of Trade**

With regard to an antitrust action, a defendant who restrains trade by an obvious pattern and practice of entering into individual contracts should not be allowed to do piecemeal what he would be prohibited from doing all at once. Creating such a distinction will require courts to enforce arguably innocuous single contracts that belong to a pattern of contractual relations that significantly restrain trade in a relevant market.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN13[] **Motions to Dismiss, Failure to State Claim**

At the stage of a motion to dismiss for failure to state a claim, it is not a court's role to determine the soundness of a plaintiff's economic theory.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN14[] **Regulated Practices, Price Fixing & Restraints of Trade**

That exchange agreements like "exclusive dealing" and "tying" arrangements, may be efficiency-enhancing and thus procompetitive does not necessarily mean that the anticompetitive effects of those types of arrangements or agreements are always outweighed by procompetitive justifications.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN15[] **Regulated Practices, Price Fixing & Restraints of Trade**

With regard to an antitrust action, the true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN16[] **Sherman Act, Scope**

Section 1 of the Sherman Act, 15 U.S.C.S. § 1, liability is directed not only at inherent anticompetitive conduct, but also at conduct that has anticompetitive effects.

Opinion

[*1006] TROTT, Circuit Judge:

The district court granted Defendants' motion to dismiss Plaintiffs' antitrust claim founded on *§ 1 of the Sherman Act*, holding that 1) *Aguilar v. Atlantic Richfield Co., 25 Cal. 4th 826, 107 Cal. Rptr. 2d 841, 24 P.3d 493 (Cal. 2001)*, precludes the allegations made in the operative pleading; 2) Defendants' exchange agreements can not be aggregated to establish market power and anticompetitive effect; and 3) even **[**2]** if the exchange agreements could be aggregated, the absence of a conspiracy to limit supply and raise prices eliminates a causal connection between the exchange agreements and anticompetitive effect. We have jurisdiction pursuant to *28 U.S.C. § 1291*, and we reverse and remand.

I

BACKGROUND

Plaintiff-Appellant William O. Gilley filed this class-action lawsuit in 1998 on behalf of himself and other wholesale purchasers of CARB gasoline in the state of California. CARB gas is a cleaner-burning fuel, and since 1996 it is the only type of gas that can be sold in California. The complaint alleged that Defendants-Appellees, major oil producers, violated *§ 1 of the Sherman Act* by entering into a conspiracy to limit the supply of CARB gasoline and to raise prices.

The allegations of the complaint were similar to those alleged in *Aguilar*, a class-action suit filed in California Superior Court in 1996. That suit was brought under the Cartwright Act, *CAL. BUS. & PROF. CODE § 16720 et seq.*, California's equivalent to the Sherman Act. *Aguilar, 24 P.3d at 502*. The plaintiff in *Aguilar* was a retail purchaser and consumer of gasoline and sought to represent a class of retail purchasers. The plaintiff in **[**3]** this action was a wholesale purchaser and retail dealer of gasoline and sought to represent a class of wholesale purchasers. Both plaintiffs were represented by the same attorneys, and both actions targeted the same defendants for essentially the same allegedly unlawful conduct. Because of the similarity in the cases, the district court hearing this case stayed the suit pending the outcome of *Aguilar*.

In *Aguliar*, the state superior court granted summary judgment to the defendants, concluding that there was insufficient evidence presented by the plaintiffs to allow a reasonable juror to find a conspiracy to limit supply and raise prices among the several gasoline companies. *Id. at 503*. The California Supreme Court affirmed. *Id. at 521*. As a result, Defendants in this case brought a motion for summary judgment arguing that Gilley's claims were barred by collateral estoppel. In response, Gilley offered a **[*1007]** proposed amended complaint, which the court found insufficient. The district court, however, granted Gilley leave to provide another proposed amended complaint, which he did.

On May 6, 2002, the district court granted Defendants' motion for summary judgment on that complaint, holding that **[**4]** Gilley was precluded by *Aguilar* from relitigating whether a conspiracy existed to limit supply and raise prices. However, the court granted Gilley further leave to amend the complaint to allege that "each of the bilateral agreements, entered into independently between various defendant gasoline companies, ha[s] anti-competitive effects and therefore violate[s] the Sherman Act."

On May 24, 2002, Gilley filed the third *post-Aguilar* complaint, alleging that forty-four bilateral exchange agreements had the effect of unreasonably restraining trade in violation of *§ 1 of the Sherman Act* and in violation of *CAL. BUS. & PROF. CODE § 17200*. On March 27, 2003, the district court granted Defendants' motion to dismiss that complaint with prejudice. With respect to the § 1 claim, the court explained that Gilley had not alleged any theory as to how any individual exchange agreement, which accounts for a small percentage of the relevant market, is able to inflate the price of CARB gasoline. The district court rejected Gilley's argument that the court could consider the aggregate effects of the individual bilateral agreements to allege an anticompetitive effect--namely higher gas prices.

Gilley appealed **[**5]** to this Court, which reversed and remanded, holding that the district court erred in not giving Gilley an opportunity to correct the newly identified deficiencies. After the remand, the second amended complaint ("SAC") was filed. Most of the allegations of anticompetitive conduct and effect are stated in the following terms:

> [Defendant] entered into the following sales/ exchange agreements for delivery of CARB gas in [geographic market]: [list of exchange agreements.]
>
> [Defendant's] intent and purpose in entering into these sales/exchange agreements was to limit refining capacity for CARB gas and/or to keep CARB gas out of the spot market and away from unbranded marketers.
>
> These agreements have had the effect of raising CARB gas prices in [geographic market] above competitive levels, without any countervailing procompetitive benefit.

The district court granted Defendants' motion to dismiss the SAC, holding that Plaintiffs failed to allege that the exchange agreements, when considered individually, would be capable of producing significant anticompetitive effects. We now review the district court's summary dismissal of the SAC.

II

DISCUSSION

A. Standard of Review

HN1[] We review de novo a dismissal **[**6]** for failure to state a claim pursuant to *Rule 12(b)(6)*. *Knievel v. ESPN, 393 F.3d 1068, 1072 (9th Cir. 2005)*. All allegations of material fact are taken as true and construed in the light most favorable to the non-party. *Id*.

B. Analysis

We address the following issues in this appeal: 1) the preclusive effect of the California Supreme Court's decision in *Aguilar*; 2) the pleading standard for § 1 claims; 3) the sufficiency of Plaintiffs' SAC; 4) Plaintiffs' standing to add Tesoro as a Defendant in the SAC; and 5) the state law claim under *CAL. BUS. & PROF. CODE § 17200*.

1. The Preclusive Effect of the California Supreme Court's *Aguilar* Decision.

Gilley does not dispute that the decision in *Aguilar* has some preclusive effect in **[*1008]** the current lawsuit, but he contends that his current claim is not entirely extinguished by *Aguilar*. In contrast, Defendants argue that all of the allegations in the SAC are precluded by *Aguilar*. We conclude that Gilley has stated a claim that is not precluded by the California Supreme Court's decision.

The critical determination in *Aguilar* was that the plaintiff failed to provide sufficient proof of a fact necessary for the claim she had pled, specifically that Defendants **[**7]** conspired and acted collectively through exchange agreements to fix prices and/or control supply. As the California Supreme Court explained: "Aguilar had to present evidence that tended to exclude the possibility that the petroleum companies acted independently rather than collusively. This she did not do." *Aguilar, 24 P.3d at 518*. In the order granting Defendants' motion to dismiss, the district court in this case summarized its understanding of that finding: "With respect to exchange agreements specifically, the court found that the evidence showed independent action on the part of the petroleum companies rather than a collusive web of bilateral exchange agreements to control supply and prices." The district court, applying the doctrine of issue preclusion (or collateral estoppel), accepted as an established fact the finding that the defendants did not collude to control supply and prices through the exchange agreements.

The California Supreme Court was clear in *Aguilar*, however, that the failure to prove that fact did not necessarily mean that plaintiff did not have a legally viable claim against Defendants:

> In alleging facts for her Cartwright Act cause of action, Aguilar proceeded **[**8]** on a theory, which was legally sound, that the assertedly unlawful conspiracy consisted of an agreement among the petroleum companies as competitors to restrict the output of CARB gasoline and to raise its price, and was unlawful per se without regard to any of its effects. In granting the petroleum companies summary judgment, the superior court did so on that theory. On appeal, Aguilar apparently attempted to introduce an alternative theory, which was also legally sound, that the assertedly unlawful conspiracy consisted of the various exchange agreements entered into by the various petroleum companies, and was unlawful because of its effects. The Court of Appeal rejected any such attempt as too late. To the extent that Aguilar makes the same attempt on review, we reject it for the same reason.

Id. at 521, n. 35 (citations omitted). Plaintiff was not allowed to proceed with the alternative theory based on the effects of the exchange agreements, without proof of collusion, because the theory had not been timely pleaded, not because it was held to be defective, either legally or factually.

The *Aguilar* decision does not preclude the latter theory in subsequent litigation.***HN2***[] Issue preclusion **[**9]** is decided under the law of the state where judgment was entered. *Ross v. Alaska, 189 F.3d 1107, 1110 (9th Cir. 1999)*. Under California law, issue preclusion applies only if a number of conditions are satisfied. *Calvert v. Huckins, 109 F.3d 636, 638 (9th Cir. 1997)*. Among those conditions are "[the] issue must have been actually litigated in the former proceeding" and "the decision in the former proceeding must be final and on the merits." *Id*.

HN3[] *Aguilar* precludes a claim that depends upon proof of collusion by Defendants to use exchange agreements to control supply **[*1009]** and prices, notably in the form of a per se claim of a horizontal price-fixing conspiracy, [1] but it does not preclude a claim that the bilateral exchange agreements have an anticompetitive effect on competition, despite the absence of collusion, under the rule of reason. [2]

---

[1] ***HN4***[] The determination of whether an agreement unreasonably restrains trade can be based upon per se condemnation or under a rule of reason analysis. *See Texaco Inc. v. Dagher, 547 U.S. 1, 5-7, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* (noting that a per se claim and a rule of reason claim are distinct). Courts will condemn as per se illegal only those agreements that are "so plainly anticompetitive **[**10]** that no elaborate study of the industry is needed to establish their illegality." *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. For example, "[p]rice-fixing agreements between two or more competitors, otherwise known as horizontal price-fixing agreements," are condemned as per se illegal. *Dagher, 547 U.S. at 5*.

[2] ***HN5***[] For a rule of reason claim, "the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its

The SAC may include allegations which are precluded by *Aguilar*, but not of all of what the SAC alleges is precluded. To the extent that the SAC alleges a claim that Defendants have entered into exchange agreements, without a conspiracy to control supply or to set prices, and that those agreements aggregated together have an anticompetitive effect on competition in the relevant market, it has stated a claim that is not precluded by *Aguilar*.

2. The Pleading Standard [11] for § 1 Claims**.

To successfully state a claim under *§ 1 of the Sherman Act*, a plaintiff need only meet the notice pleading standard articulated in *Fed. R. Civ. P. 8(a)(2)*. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. at 1964 (2007)*. ***HN6***[] *Rule 8(a)(2)* requires "'a short and plain statement of the claim showing that the pleader is entitled to relief,' in order to 'give the defendant fair notice of what the . . . claim is and the grounds upon which it rests.'" *Id*. (quoting *Fed. R. Civ. P. 8(a)(2)*). "[A] well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and 'that a recovery is very remote and unlikely.'" *Id. at 1965*. Additionally, dismissals for failure to state a claim are disfavored in antitrust actions. *Hosp. Bldg. Co. v. Trs. of Rex Hosp., 425 U.S. 738, 746, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*; *Clayco Petroleum Corp. v. Occidental Petroleum Corp., 712 F.2d 404, 406 (9th Cir. 1983)*.

3. The SAC is a Sufficient Pleading.

HN7[] *Section 1 of the Sherman Act* prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. However, it has long been recognized **[**12]** that Congress did not intend to give literal meaning to those words, but instead only intended to make unlawful *unreasonable* restraints on trade. *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Therefore, "to establish a claim under *§ 1 of the Sherman Act*, the plaintiff must show 1) that there was a contract, combination, or conspiracy; 2) that . . . unreasonably restrained trade under either a per se rule of illegality or a rule of reason analysis; and 3) that the restraint affected interstate commerce." [3] *Bhan, 929 F.2d at 1410*.

[*1010] a. The First Element--Existence of an Agreement.

HN8[] Under the first element of a § 1 claim, a plaintiff must plead the existence of a contract, combination, or conspiracy, meaning a defendant did not operate unilaterally, but instead, at least two entities acted in concert. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. Defendants argue that the exchange agreements are not concerted action.

"Our ***HN9***[] ***antitrust law*** is clear that [a plaintiff] need not prove intent to control prices or destroy competition to demonstrate the element of an agreement . . . among two or more **[**13]** entities." *Paladin Assocs., Inc. v. Mont. Power Co., 328 F.3d 1145, 1153-54 (9th Cir. 2003)* (internal quotation marks omitted) (noting that intent of the parties is to be evaluated under the second element of the § 1 analysis). The exchange agreements are "contracts." As a result, each bilateral exchange agreement, even without intent to control prices, provides an agreement that meets the first element of a § 1 Sherman Act claim.

b. The Second Element--When Aggregated, the Exchange Agreements Unreasonably Restrain Trade.

HN10[] Under the second element of a § 1 claim, a plaintiff must show the challenged agreement unreasonably restrains trade by establishing anticompetitive effects. *Bhan, 929 F.2d at 1410*. To make this showing under the rule of reason analysis, a plaintiff generally must establish market power. *Adaptive Power Solutions, LLC v. Hughes Missile Sys. Co., 141 F.3d 947, 951 (9th Cir. 1998)*. "Market power is the ability to raise prices above those that would be charged in a competitive market." *NCAA v. Bd. of Regents, 468 U.S. 85, 109 n.38, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*.

---

condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*.

[3] Neither party disputes that the exchange agreements affect interstate commerce.

Because each of the exchange agreements arguably affects only a small amount of CARB gas, Plaintiffs pleaded the cumulative effect of **[**14]** a single Defendant's exchange agreements to show market power and anticompetitive effect.

Plaintiffs argue correctly that the district court erred in not allowing them to allege the cumulative effects of a single Defendant's exchange agreements. They find support in Ninth Circuit and United States Supreme Court precedent, which has allowed the aggregation of multiple contracts when evaluating the legality of an individual contract. *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 676 F.2d 1291 (9th Cir. 1982)*; *Fortner Enters. v. United States Steel Corp., 394 U.S. 495, 89 S. Ct. 1252, 22 L. Ed. 2d 495 (1969)*; *Standard Oil Co. of Cal. & Standard Stations, Inc., v. United States, 337 U.S. 293, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949)*; *cf*. 2 AREEDA & HOVENKAMP P 310c1, p. 201 ("***HN11***[] An aggregation of claims may produce sufficient proof of violation or injury where violation requires that a certain legal threshold be met and no claim standing alone is sufficient to meet the threshold.").

In *Twin City*, we were presented with the issue of "whether a district court, in assessing the antitrust liability of a defendant, may look to the overall effects of a defendant's conduct in the relevant market, or is limited to looking at the market implications of the **[**15]** one contract between the antitrust plaintiff and defendant." *676 F.2d at 1302*. We allowed aggregation, reasoning that a***HN12***[] defendant who restrains trade by an obvious pattern and practice of entering into individual contracts should not be allowed to do piecemeal what he would be prohibited from doing all at once. *Id*. We held that, "[c]reating such a distinction would require courts to enforce arguably innocuous single contracts that belong to a pattern of contractual relations that significantly restrain trade in a relevant market." *Id. at 1303*.

[*1011] The district court and Defendants concede that aggregation of agreements is appropriate in some cases. Both, however, contend that aggregation should be allowed only in the context of "exclusive dealing" and "tying" cases because of the predictably anticompetitive effect of those practices--market foreclosure to competitors. The district court reasoned that only those types of contracts can be aggregated because they have "a clear purpose and an identifiable effect" and because "[d]etermining the cumulative effect of such contracts can be done with relative ease." We disagree, as no general rule requires that only the easiest cases may be aggregated. **[**16]** As noted by the California Supreme Court, plaintiffs have a viable legal theory. *See Aguilar, 24 P.3d at 521 n.35* (noting an "alternative theory, which [is] also legally sound, that the assertedly unlawful conspiracy consisted of the various exchange agreements entered into by the various petroleum companies, and was unlawful because of its effects") (citation omitted).

HN13[] At the stage of a motion to dismiss for failure to state a claim, it is not our role to determine the soundness of Plaintiffs' economic theory. Even if we, as a savvy court, view actual proof of the facts pleaded in the SAC as improbable and conclude that a recovery is remote and unlikely, the complaint should still proceed. *Bell Atl. Corp., 127 S. Ct. at 1965*. The analysis we would have to undertake to dismiss the complaint here is not appropriate at the Rule 12 stage. [4]

Defendants also argue that bilateral exchange agreements, in general, are an efficiency-enhancing distribution practice that promotes, not hinders, competition. The allegations contained in the SAC, however, are that *these exchange agreements* ***[**17]*** *have anticompetitive effects*.

HN14[] That exchange agreements like "exclusive dealing" and "tying" arrangements, may be efficiency-enhancing and thus procompetitive does not necessarily mean that the anticompetitive effects of those types of arrangements or agreements are *always outweighed* by procompetitive justifications. *See* *Brown v. Hansen Publ'ns, Inc., 556 F.2d 969, 971 (9th Cir. 1977)* (noting that "exclusive dealing" contracts may be procompetitive); *NCAA, 468 U.S. at 104 n.26* (noting that "tying" arrangements may be procompetitive).

This loggerhead is precisely what a rule of reason analysis would address. The formulation of the dispute at issue was long ago laid out. "***HN15***[] The true test of legality is whether the restraint imposed is such as merely

[4] We note that the decision in *Aguilar* concerned a summary judgment, not a dismissal for failure to state a claim.

regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." *Bd. of Trade of Chicago v. United States, 246 U.S. 231, 38 S. Ct. 242, 244, 62 L. Ed. 683 (1918)*. This point of contention is yet another reason to allow the complaint to proceed.

Defendants offer a number of other arguments against aggregation. None of the arguments, however, can sidestep our precedent.

Defendants argue that Plaintiffs waived the aggregation **[**18]** argument by not challenging the district court's Order Granting Leave to Amend in their first appeal to the Ninth Circuit. That order reads, "The court GRANTS leave to amend plaintiff's complaint only to the extent that it alleges that each of the bilateral agreements, entered into independently between various **[*1012]** defendant gasoline companies, have unreasonable anti-competitive effects and therefore violate the Sherman Act." The purpose behind the district court's decision to grant leave to amend was so Plaintiffs could plead a claim different than the per se violation pled in *Aguilar*. Plaintiffs complied by pleading a rule of reason claim based on the aggregate effects of the exchange agreements.

Defendants also argue also that *Dickson v. Microsoft Corp., 309 F.3d 193 (4th Cir. 2002)*, forecloses aggregation of the bilateral exchange agreements to establish a violation of *§ 1*. In that case the plaintiff "alleged discrete conspiracies between Microsoft and two original equipment manufactures (OEMs): Dell and Compaq. *Id. at 210*." The Fourth Circuit affirmed the district court's determination "that it could not consider the cumulative harm of Microsoft's agreements with *all OEMs* but instead **[**19]** was required to consider--individually--Microsoft's agreements with Compaq and Dell" because the complaint "did not allege a conspiracy among Microsoft and *all OEMs*; it alleged discrete conspiracies between Microsoft and Compaq and Microsoft and Dell." *Id*. (emphases added). In other words, because the plaintiff did not allege the cumulative effect of Microsoft's agreements with "all OEMs" in the complaint, the Fourth Circuit declined considering their aggregate effects. *Dickson* is distinguishable from the present case, as the plaintiffs here do expressly allege that each Defendant's agreements considered in the aggregate have anticompetitive effects.

Defendants also contend that aggregation would subject firms to unwarranted liability and great uncertainty regarding the validity of independent business dealings that do not carry inherent anticompetitive potential. ***HN16***[] Section 1 liability, however, is directed not only at inherent anticompetitive conduct, but also at conduct that has *anticompetitive effects. Khan, 522 U.S. at 10*. Furthermore, aggregation of the agreements does not lessen a plaintiff's burden of demonstrating anticompetitive effects of a given agreement.

Because the district **[**20]** court's application of the law was incorrect, and because we reject Defendants' arguments against aggregation, we conclude that the district court erred in not allowing Plaintiffs to aggregate the agreements to demonstrate their anticompetitive effects.

c. The Allegations in the SAC Are Not Necessarily Premised on a Conspiracy to Limit Supply and Raise Prices.

The district court concluded that, even if aggregation were proper, the complaint alleges the existence of a network of exchange agreements that allow Defendants to limit supply and raise the price of CARB gas. The district court based that conclusion on language of the complaint stating that each Defendant obtained market power "through the use of [the Defendant's] exchange agreements, coupled with its own refining capacity and that of its contracting partners." However, that language says nothing more than the exchange agreements provide access to refining capacity of Defendant's competitors through the exchange agreements themselves. Furthermore, that language, read in the light most favorable to Plaintiffs, *Knievel, 393 F.3d at 1072*, certainly does not plead a "network", a "precise dance of give-and-take", or any other nomenclature **[**21]** for the operation of a conspiracy to limit supply or raise prices.

The district court concluded also that "Plaintiffs cannot avoid the fact that their Sherman Act claim is, at its core, a conspiracy claim." To come to that conclusion, the district court did not rely on the allegations made in the SAC. Instead, the **[*1013]** court, in effect, probed the soundness of Gilley's economic theory, concluding that the alleged anticompetitive effects could not result without the intentional collusion precluded, as a factual allegation, by *Aguilar*. The district court illustrated its analysis with a hypothetical:

> Defendant A enters into separate exchange agreements with B, C, D, E, and F. If B overproduces CARB gasoline at some point in time, A may be able to take the excess amount and adjust its production accordingly. However, in the absence of a conspiracy, C, D, E, and F may also produce excess CARB gasoline which cannot be absorbed by A because A has already taken the overproduction from B.

The district court may be correct in its understanding of how the economy or the oil business works, but that is a factual assessment, not left to the court, even a savvy judge, to decide on a Rule 12 motion. The **[**22]** hypothetical is not what has been pled in the SAC. The SAC alleges that anticompetitive effects have resulted from the exchange agreement, even in the absence of collusion, and under *Rule 12(b)(6)*, allegations of material fact are taken as true and construed in the light most favorable to the plaintiff. *Knievel, 393 F.3d at 1072*.

A review of the SAC shows that it alleged that the existence of the exchange agreements allows a given Defendant in a given geographic market control of enough refining capacity of CARB gas to keep CARB gas out of the spot market and away from unbranded marketers, with the overall *effect* of creating supracompetitive prices. Plaintiffs did not allege that Defendants entered into a conspiracy to limit supply or raise prices, and did not assert a conspiracy to enter into the exchange agreements. That the district court believes that the allegedly anticompetitive effects would not actually occur without a conspiracy does not justify dismissal of the SAC for failure to state a claim.

Furthermore, the absence of a conspiracy to limit supply and raise prices does not eliminate a causal connection between the exchange agreements and anticompetitive effect. As discussed **[**23]** above, Plaintiffs must first identify an agreement that unreasonably restrains trade. Here, the SAC properly identifies a number of agreements satisfying the contract, combination, or conspiracy requirement of *§ 1*. Next, Plaintiffs must plead facts that if taken as true would allow Plaintiffs to recover for an antitrust injury. Here, Plaintiffs' SAC, construed in the light most favorable to them, alleges that each Defendant's control of its refining capacity, coupled with that of its contracting partners, establishes requisite market power in the relevant geographic market sufficient to establish anticompetitive effects.

We conclude that the SAC is a sufficient pleading to move beyond *Rule 12(b)(6)*.

4. Plaintiffs Have Standing Against Tesoro.

Although a plaintiff must directly purchase from a defendant to have standing to recover damages, *Ill. Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, an indirect purchaser may nevertheless have standing to seek injunctive relief. *Lucas Auto. Eng'g, Inc. v. Bridgestone/Firestone, Inc., 140 F.3d 1228, 1235 (9th Cir. 1998)*.

Taking Plaintiffs' allegations as true, and construing them in the light most favorable to Plaintiffs, at least an indirect purchaser **[**24]** scenario exists in the SAC. In addition to Plaintiffs' allegations that they are "direct purchaser[s] from [D]efendants," the allegation that Tesoro acquired the Avon refinery from UDS, and that "Tesoro entered into the same sales and/or exchange agreements that UDS had formerly **[*1014]** entered into with other refiners . . . in connection with the ownership and operation of the Avon refinery" provides sufficient pleading to conclude that Plaintiffs have standing to include Tesoro in the SAC.

5. We Remand the State Law Claim.

The district court dismissed Plaintiffs' claim under *CAL. BUS. & PROF. CODE § 17200* as follows:

> Plaintiffs' state unfair competition claim rests on the same facts as their Sherman Act claim. Because the Sherman Act claim is being dismissed at an early stage of litigation, the Court finds that the factors underlying the assertion of supplemental jurisdiction . . . weigh against retention of jurisdiction over the remaining state law claim.

Because we reverse the dismissal of the Sherman Act claims, we also reverse the district court's dismissal of the state law claim.

III

CONCLUSION

We agree with the California Supreme Court that the *Aguilar* trial court only adjudicated a per se **[**25]** claim of horizontal price fixing. Therefore, Plaintiffs' rule of reason claim alleging that the bilateral exchange agreements have anticompetitive effects is not precluded. In addition, Ninth Circuit and Supreme Court precedent allow for aggregation of the individual exchange agreements to demonstrate market power and anticompetitive effect in a given market. Though the district court may think the prospects of Gilley actually proving the allegations contained in the SAC to be highly improbable--and may be correct in that assessment--that is not a valid basis for Rule 12 dismissal.

REVERSED and **REMANDED**.

Dissent by: CALLAHAN

Dissent

CALLAHAN, Circuit Judge, dissenting:

I write separately because I think that the majority reads the California Supreme Court's opinion in *Aguilar v. Atl. Richfield Co., 25 Cal. 4th 826, 107 Cal. Rptr. 2d 841, 24 P.3d 493 (Cal. 2001)*, too narrowly and fails to appreciate the pleading standard set forth in *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. When Gilley's Second Amended Complaint (sometimes referred to as "SAC") is viewed in light of these cases, it is too broad and amorphous and fails to limit his claims to those that are not precluded by *Aguilar*. Furthermore, because Gilley has been on **[**26]** notice since 2002 that his complaint must be limited to those claims not precluded by *Aguilar*, has had several opportunities to submit a properly circumscribed amended complaint, and has failed to do so, I would affirm the district court's dismissal of the Second Amended Complaint.

I

Section 1 of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. The Supreme Court has clearly established that the section is limited to prohibiting unreasonable restraints of trade. *See Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*. Whether a plaintiff pursues a per se claim or a rule of reason claim under *§ 1*, the first requirement is to allege a "contract, combination in the form of trust or otherwise, or conspiracy."

I agree with the majority that the core of the plaintiff's claims in *Aguilar* was a per se claim based on an alleged unlawful conspiracy among petroleum companies. I also agree that the California Supreme Court in *Aguilar* recognized that plaintiffs **[*1015]** "attempted to introduce an alternative theory, which was also legally sound [ ], that the assertedly unlawful conspiracy **[**27]** consisted of the various exchange agreements entered into by the various petroleum companies, and was unlawful because of its effects." *Aguilar, 24 P.3d at 521, n.35*. The California Supreme Court agreed with the Court of Appeal that this attempt came too late and rejected it for that reason. *Id*.

The California Supreme Court's opinion in *Aguilar*, however, is broader than the footnote referenced by the majority. The *Aguilar* opinion goes on to state:

> Just as the superior court's order granting the petroleum companies summary judgment was not erroneous as to Aguilar's primary cause of action for an unlawful conspiracy under section 1 of the Cartwright Act to restrict the output of CARB gasoline and to raise its price, neither was it erroneous as to her derivative cause of action, which was for an unlawful conspiracy under the unfair competition law for the same purpose.
>
> . . .
>
> The petroleum companies carried their burden of persuasion to show that there was no triable issue of material fact and that they were entitled to judgment as a matter of law as to Aguilar's unfair competition law cause of action. They did so by doing so as to her Cartwright Act cause of action. Again, they carried their **[**28]** burden of production to make a prima facie showing of the absence of any conspiracy, but she did not carry her shifted burden of production to make a prima facie showing of the presence of an unlawful one.
>
> It is true, as Aguilar argues, that her unfair competition law cause of action is not based on allegations asserting a conspiracy *unlawful under the Cartwright Act*. But it is indeed based on allegations asserting a *conspiracy*, specifically, one unlawful at least under the unfair competition law itself. As stated, the petroleum companies showed that there was no triable issue of the material fact of conspiracy. Aguilar claims that conspiracy is not an element of an unfair competition law cause of action in the abstract as a matter of law. Correctly so. (See *Bus. & Prof. Code, § 17200*). But she simply cannot deny that conspiracy is indeed a component of the unfair competition law cause of action *in this case as a matter of fact*.

Id. at 521 (emphasis in original).

This portion of *Aguilar* holds that the plaintiffs had failed to demonstrate the existence of a conspiracy that was per se illegal or otherwise illegal under the Sherman Act. With this understanding, if Gilley were not asserting **[**29]** that the defendants entered into a conspiracy in violation of the Sherman Act, I could agree with the majority that "a claim that Defendants have entered into exchange agreements, without a conspiracy to control supply or to set prices," would state a claim that is not precluded by *Aguilar*. However, even assuming that in the abstract the Second Amended Complaint can be interpreted as alleging such a limited claim, it clearly alleges much more than that and it is far too late in the litigation process to presume that this is anything but intentional.

II

The preclusive effect of *Aguilar* is woven through the numerous court decisions in Gilley's federal action. Gilley filed this class action in 1998, and its proceedings were stayed pending the outcome of *Aguilar*. After the California Supreme Court issued its opinion in *Aguilar*, the defendants filed a motion for summary judgment. Gilley opposed the motion and also offered to file an amended complaint. The district court granted the motion for summary **[*1016]** judgment. The district court held that pursuant to the doctrine of issue preclusion, Gilley was barred from relitigating the conspiracy alleged in *Aguilar*. The court denied Gilley's request to **[**30]** amend the complaint to allege continuing violations of antitrust laws subsequent to the time period involved in *Aguilar*, reasoning:

> The exchange agreements were already judged by the California Supreme Court not to be evidence of a conspiracy. The court finds that the proposed amended complaint merely alleges the ongoing use of these supply agreements and not any new conduct. Issue preclusion therefore bars Gilley from relitigating whether use of the ongoing agreements constitute an illegal conspiracy under the Sherman Act.

The district court, however, agreed with Gilley that "his rule-of-reason claim has not been litigated to the extent that he is alleging that the individual bilateral exchange agreements violate the anti-trust laws due to their anti-competitive effect." Accordingly, it granted Gilley leave to file an amended complaint "only to the extent that it alleges that each of the bilateral agreements, entered into independently between various defendant gasoline companies, have unreasonable anti-competitive effects and therefore violate the Sherman Act."

Gilley amended his complaint. Defendants responded by filing a motion to dismiss the First Amended Complaint ("FAC"). The district **[**31]** court granted the motion, explaining:

> After careful scrutiny of the FAC, the court has been unable to discern any allegation that any of the parties in any of the bilateral agreements entered these agreements with an unlawful intent or purpose to restrain competition. In the few instances that Plaintiff does allege an improper purpose, he does so by alleging joint action among all, or substantially all of the defendants. As discussed below, Plaintiff's pleading of such joint purpose or action regarding the various defendants is improper and will not be considered by the court. Therefore, Plaintiff has failed to properly allege "concerted action" regarding any individual bilateral exchange agreement.

The district court dismissed the case with prejudice, commenting that because "Plaintiff was already granted leave to amend his complaint previously, and at this late date was unable to set forth a valid anti-trust claim, it appears that Plaintiff cannot allege sufficient facts constituting a valid § 1 claim."

Gilley appealed, and we reversed and remanded to allow Gilley an opportunity to file a further amended complaint. We held that the district court had abused its discretion by denying **[**32]** Gilley an opportunity to amend his complaint.

When Gilley filed a Second Amended Complaint, defendants again moved to dismiss, and the district court granted the motion. It explained:

> Plaintiffs do not allege that each exchange agreement has a discrete effect on competition which can be viewed together with the separate effects of the other exchange agreements. Instead, Plaintiffs allege the existence of a network of exchange agreements that allow Defendants to coordinate their production and output, thereby limiting the amount of CARB gasoline on the rack or spot market and allowing Defendants to raise prices to branded dealers.
>
> Even if a single defendant and all of the defendants who contracted with that defendant cumulatively had sufficient market power to substantially impair competition, Plaintiffs would need to make the further showing that all of these defendants worked together through the use **[*1017]** of the exchange agreements and strategic shutdowns or decreased production to stabilize the spot market and avoid the depression of gasoline prices. . . .
>
> Plaintiffs cannot avoid the fact that their Sherman Act claim is, at its core, a conspiracy claim. Plaintiffs' theory of recovery rests **[**33]** upon the existence of a web of exchange agreements that allegedly allows all of the Defendants to engage in a precise dance of give-and-take with the goal of maintaining the delicate balance of CARB production. Coordinated action is essential to Plaintiffs' claim.
>
> After four attempts to plead around a conspiracy claim, Plaintiffs still fail to allege that the bilateral exchange agreements, *viewed independently*, constitute an unreasonable restraint on trade. Plaintiffs' inability to establish a causal connection between the individual exchange agreements, and anticompetitive harm is fatal to Plaintiffs' Sherman Act claim.

A critical aspect of the district court's perspective is its determination that the SAC does not allege "that each exchange agreement has a discrete effect on competition which can be viewed together with the separate effects of other exchange agreements." Rather, the district court sees the SAC as alleging "a network of exchange agreements" that "allow Defendants to coordinate their production and output." In essence, the district court reads the SAC as not alleging that the bilateral agreements "violate the anti-trust laws due to their anti competitive effect," but **[**34]** rather that the agreements facilitate coordinated action by the defendants that unlawfully restrains trade.

This distinction is critical. If the bilateral agreements in themselves have an illegal effect on competition (when aggregated), then the bilateral agreements constitute the "contract, combination or conspiracy" required for a claim under *§ 1* of the Sherman Act. If, however, the bilateral agreements only facilitate coordinated activity, then to maintain a claim under *§ 1* of the Sherman Act, Gilley must show some meeting of the minds, some "contract, combination or conspiracy," between those defendants whom Gilley alleges coordinated their actions. Although a plaintiff might well be able to do so in the abstract, here, Gilley is precluded by *Aguilar* from asserting that the defendants so conspired.

III

The Second Amended Complaint implicitly, if not explicitly, asserts a conspiracy. The charging paragraphs of the SAC describe the defendants' parallel actions and imply the existence of a conspiracy. The SAC asserts:

> California's CARB gas supply is generally manufactured primarily by defendants, California branded refiners, who are engaged in the business of refining, distributing and **[**35]** selling almost 100% of the CARB gas in the state of California during the class period. California remains largely isolated from external sources of supply.
> All California refiners, now also major retail marketers, control supply and pricing from production to distribution, in part, through supply agreements that require dealers to purchase gasoline exclusively at each branded refiner's present DTW price, a price that is always greater than the rack price and cost of distribution.
> California refiners' weekly refinery production decisions are influenced by, among other things, spot price impact, refiner margins, bilateral exchange partners' market needs, ability to draw inventory from bilateral exchange partners, and overall market supply.
>
> With the impending introduction of CARB gasoline in 1996, each of the **[*1018]** defendants or their predecessors in interest, entered into new sales and/or exchange agreements with other defendants, many of which provided for the provision of CARB gas "as mutually agreed" (AMA) with no minimum or maximum.

The determination that these paragraphs assert a conspiracy is reinforced by the next paragraph of the SAC which reads:

> The sales and exchange agreements known **[**36]** to plaintiffs that are subject of this action are listed on the attached Exhibit . . . . On information and belief, plaintiffs allege that defendants have entered into other sales and exchange agreements, presently unknown to plaintiffs, with similar intent and effect.

Certainly the tenor of this paragraph is that the "similar intent and effect" violates antitrust laws. Moreover, in light of the preceding paragraphs and the failure to assert any other specific violation of the Sherman Act, the alleged violation must be one of conspiracy or collusion.

This allegation of conspiracy is carried forward in the SAC's allegations against particular defendants, starting with Chevron. [1] It lists three exchange agreements that Chevron entered into with Exxon, Shell, and Tosco Refining Co., and alleges, on information and belief, that Chevron has entered similar agreements "for the delivery of CARB in Northern California." The SAC then alleges:

> Chevron's intent and purpose in entering into these exchange agreements was to limit refining capacity for CARB gas and/or to keep CARB gas out of the spot market and away from unbranded marketers.
>
> Through the use of these exchange agreements, **coupled with [**37] its own refining capacity and that of its contracting partners**, Chevron has obtained sufficient market power to limit the supply of CARB gas to unbranded marketers and to raise the price at which it sells CARB gas in Northern California to supracompetitive levels. These agreements have had the effect of raising CARB gas prices in Northern California above competitive levels, without any countervailing procompetitive benefit.

(Emphasis added).

These paragraphs reveal, as the majority notes, how Gilley proposes to meet the market power requirement for a claim under *§ 1* of the Sherman Act, but they leave the reader uninformed as to how the individual exchange agreements allegedly violated the Sherman Act "without a conspiracy to control supply or to set prices." In his brief, Gilley responds by pointing to the paragraphs concerning the relationship between Chevron and Tosco. These paragraphs set forth various reasons for why the defendants purportedly entered into particular agreements, [2]

---

[1] The allegations against the other defendants are similar to the allegations against Chevron.

[2] For example, the SAC sets forth a 1994 individual exchange agreement between Chevron and Tosco and alleges:

suggest an industry-wide **[*1019]** conspiracy, [3] and assert that the individual agreements facilitated a combination or **[**38]** conspiracy. [4] Again, the paragraphs seem to allege a conspiracy. They certainly do not clearly allege that the exchange agreements themselves constitute a restraint of trade or suggest why the defendants' actions were "collusive, rather than independent, action." *See Aguilar, 24 P.3d at 519*.

In sum, the SAC, fairly read, is not limited to alleging that the bilateral exchange agreements are themselves restraints of trade. Instead, its broad allegations encompass conspiracy claims that are precluded by *Aguilar*. Indeed, the **[**40]** majority so concludes when it states "[t]he SAC may include allegations which are precluded by *Aguilar*, but not of all of what the SAC alleges is precluded."

IV

It is this breadth of the SAC that concerns me as it is inconsistent with the spirit of *Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929*. Although *Twombly* involved an alleged conspiracy based on parallel conduct and this case is ostensibly not a conspiracy case, nonetheless the Supreme Court's concerns reverberate in this case. The Supreme Court reiterated that *Federal Rule of Civil Procedure 8(a)(2)* requires "'a short and plain statement of the claim showing that the pleader is entitled to relief,' in order to 'give the defendant fair notice of what the . . . claim is and the grounds upon which it rests.'" *Twombly, 127 S. Ct. at 1964* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*. [5] It commented that a plaintiff's obligation "requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action" and that "[f]actual allegations must be enough to raise a right to relief above the speculative level." *Id. at 1965* (internal citations omitted). The Supreme Court reaffirmed its earlier decisions holding that "something **[**41]** beyond the mere possibility of loss causation must be alleged, lest a plaintiff with a largely groundless claim be allowed to take up the time of a number of other people with the right to do so representing an *in terrorem* increment of the settlement value," and that "when the allegations in a complaint, however true, could not raise a claim of entitlement to relief, **[*1020]** this basic

---

> Chevron's intent and purpose in entering into this agreement with Tosco was to place its surplus CARB gas with other branded refiners to maximize returns. Chevron intended to and did rearrange its CARB gas supply to avoid a market imbalance caused by CARB gas flowing to independent marketers.

If Chevron and Tosco agreed to restrain the production of gas, the individual exchange agreement might well be a contract to restrain trade pursuant to *§ 1* of the Sherman Act. The paragraph, however, does not say that the parties agreed. Instead, it only addresses Chevron's intent and purpose. This purpose and intent would presumably motivate Chevron to act independently or interdependently without any agreement as to purpose or intent with Tosco.

[3] For example, the SAC alleges that "[t]hrough the use of **[**39]** these exchange agreements, coupled with its own refining capacity and that of its contracting partners, Chevron has obtained sufficient market power to limit the supply of CARB gas to unbranded marketers and to raise the price at which it sells CARB gas." This implies a conspiracy and does not allege that there was a meeting of the minds of the parties to any of the individual exchange agreements to raise the price of gasoline.

[4] For example, the SAC alleges that "Tosco's intent and purpose in entering into this agreement with Chevron was [to] join the 'club' of major branded refiners and to give Chevron the opportunity to place its surplus CARB gas with other branded refiners to maximize returns." This is confusing, as it indicates that Tosco's intent was to give Chevron "the opportunity" to maximize its return. This seems to suggest that the individual exchange agreement facilitated, but did not in itself provide for, the maximization of Chevron's return.

[5] The Court went on to disapprove the language in *Conley* that "a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Twombly, 127 S. Ct. at 1968* (quoting *Conley, 355 U.S. at 45-46*). The Court held that:

> [t]he phrase is best forgotten as an incomplete, negative gloss on an accepted pleading standard: once a claim has been stated adequately, it may be supported **[**42]** by showing any set of facts consistent with the allegations in the complaint.

Twombly, 127 S. Ct. at 1969.

deficiency should . . . be exposed at the point of minimum expenditure of time and money by the parties and the court." *Id. at 1966* (internal quotation marks and citations omitted). The Court concluded that allegations of parallel conduct in themselves do not provide a sufficient basis to sustain a conspiracy claim. [6]

Similarly, in this case the district court read the complaint as not stating a viable cause of action. It determined that the SAC did not allege that "each exchange agreement has a discrete effect on competition which can be viewed together with the separate effects of other exchange agreements," but rather as alleging "the existence of a network of exchange agreements that allow Defendants to coordinate their production and output." I agree with the district court. I read the SAC as not asserting that the bilateral agreements, in themselves, restrain trade, but that they facilitate or make it easier for the defendants to coordinate their actions to restrain trade. [7] The majority seems to admit that the SAC includes allegations of conspiracy, but contends that the SAC must be allowed because it can also be read to allege only that each exchange agreement has a discrete effect on competition. This is the type of "*in terrorem* increment of the settlement value" that the Supreme Court mentioned in *Twombly. Id. at 1966*. Moreover, when viewed in the light of the preclusive effect of *Aguilar*, the SAC "does not raise **[**44]** a claim of entitlement to relief." *Id*.

Furthermore, there can be little doubt that the broad scope of the SAC was intentional. Gilley has known since 2002 that following *Aguilar*, he was precluded from alleging a conspiracy. Nonetheless, he has thrice been given the opportunity to amend his complaint to limit it to a claim based solely on the alleged anti-competitive effect of the individual exchange agreements absent a conspiracy, and has thrice proffered amended complaints that continue to assert, albeit ever more subtly, the existence of a conspiracy. I do not necessarily quarrel with the majority that it might be possible for Gilley to allege an antitrust claim limited to issues that are not precluded by *Aguilar*, but he has declined **[**45]** to do so. Accordingly, the district court properly struck the SAC. Furthermore, **[*1021]** the district court's denial of leave to amend does not appear to me to have been an abuse of discretion. [8]

---

[6] The Court noted:

> We think that nothing contained in the complaint invests either the action or inaction alleged with a plausible suggestion of conspiracy. As to the ILECs' supposed agreement to disobey the 1996 Act and thwart the CLECs' attempts to compete, we agree with the District Court that nothing in the complaint intimates that the resistance to the upstarts was anything more than the natural, unilateral reaction of each ILEC intent on keeping its regional dominance. The 1996 Act did more than just subject the ILECs to competition; it obliged them to subsidize their competitors with their own equipment at wholesale rates. The economic incentive to resist was powerful, but resisting competition is routine market conduct, and even if the ILECs flouted the 1996 Act in all the ways the plaintiffs allege, . . . there is no reason to infer that the companies had agreed among themselves to do what was only natural anyway; so natural, in fact, that if alleging parallel decisions to resist competition were enough to imply an antitrust conspiracy, pleading a § 1 violation against almost **[**43]** any group of competing businesses would be a sure thing.

127 S. Ct. at 1971.

[7] The district court explained:

> Even if a single defendant and all of the defendants who contracted with that defendant cumulatively had sufficient market power to substantially impair competition, Plaintiffs would need to make the further showing that all of these defendants worked together through the use of the exchange agreements and strategic shutdowns or decreased production to stabilize the spot market and avoid the depression of gasoline prices. . . .

[8] In *Griggs v. Pace Amn. Group, Inc., 170 F.3d 877, 880 (9th Cir. 1999)*, we held that the "district court determines the propriety of a motion to amend by ascertaining the presence of any of four factors: bad faith, undue delay, prejudice to the opposing party, and/or futility." Generally, "this determination should be performed with all inferences in favor of granting the motion." *Id*. Nonetheless, "we have noted that a district court does not abuse its discretion in denying a motion to amend a complaint . . . when the movant presented no new facts but only new theories and provided no satisfactory explanation for his failure to fully develop his contentions originally." *Nunes v. Ashcroft, 375 F.3d 805, 808 (9th Cir. 2004)* (quoting *Vincent v. Trend W. Technical Corp., 828 F.2d 563, 570-71 (9th Cir.1987))* (internal quotation marks omitted). Here, assuming that Gilley could, in the abstract, amend his complaint to state a claim that is not precluded by *Aguilar*, his repeated failure to do just that suggests **[**46]** that it would be futile to offer him another chance to do so.

V

Although much of what the majority has to say about aggregation may be correct, I do not think that aggregation cures the defects in the SAC. Initially, I note that in an oligopoly, aggregation cannot be as broad as alleged in the SAC. More importantly, aggregation, which addresses the second prong of a § 1 claim, cannot overcome the SAC's failure to adequately identify the agreements that allegedly violate the Sherman Act.

In *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 676 F.2d 1291, 1302 (9th Cir. 1982)*, we addressed the question of aggregation on a claim for an unreasonable restraint of trade under *§ 1* of the Sherman Act. We held:

> the issue is whether a district court, in assessing the antitrust liability of a defendant, may look to the overall effects of a defendant's conduct in the relevant market, or is limited to looking at the market implications of the one contract between the antitrust plaintiff and defendant. At least in the factual context of the instant litigation, we think the district court correctly assessed Sportservice's aggregate pattern of conduct in the relevant market.

I agree with the majority **[**47]** that pursuant to *Twin City*, Gilley may aggregate the contracts entered into by each defendant in determining that defendant's marketpower. The allegations in the SAC, however, are not so limited. Rather, they appear to allow the aggregation of all the bilateral agreements by all of the defendants. I know of no authority or reason that would allow such an aggregation, as it would include the entire market. Accordingly, I think that Gilley is limited to aggregating, for example, Chevron's contracts with Exxon, Shell and Tosco, in asserting that Chevron has sufficient market power to effect the price of CARB gasoline, and may not include in the calculation of Chevron's alleged market share any bilateral agreements entered into by Exxon, Shell or Tosco with any party other than Chevron.

Whatever the proper scope of aggregation, and accepting that the aggregation of each defendant's bilateral agreements gave each defendant sufficient market power to affect the price of gasoline, the SAC still fails to meet the first requirement for a § 1 claim -- an allegation of a meeting of the defendants' minds. *See Twombly, 127 S. Ct. at 1965*. *Twin City* does not help Gilley on this issue. There, Sportservice **[**48]** had a practice of entering into exclusive concessionaire contracts, which were in themselves agreements to restrain trade. The only question was whether Sportservice had sufficient market power. Here, because the SAC does not clearly allege that the individual exchange agreements **[*1022]** inherently restrain trade, the aggregation of Chevron's individual agreements might show market power, but it would not meet the requirement that Gilley assert an agreement to restrain trade.

The majority's over-reliance on aggregation may be seen in its conclusion that the SAC alleges "that the existence of the exchange agreements allows a given Defendant in a given geographic market control of enough refining capacity of CARB gas to keep CARB gas out of the spot market and away from unbranded marketers, with the overall *effect* of creating supracompetitive prices." This conclusion allows effect to take the place of intent in precisely the way that the Supreme Court criticized in *Twombly, 127 S. Ct. at 1971*.

"Spot market" is defined in the SAC as "a market for short-term bulk gasoline purchases," and "unbranded marketers" refer to "jobbers and dealers who sell unbranded product not associated with the name brand **[**49]** of a branded refiner such as the defendants herein." These definitions indicate that "spot markets" exist only when a refiner produces more gasoline than can be sold by its "branded dealers." It follows that because "spot markets" produce a lower return to the refiner of gasoline than the refiner obtains through branded dealers, spot markets are a result of inefficiencies on the part of refiners. Accordingly, even without any collusion, a refiner is strongly motivated to avoid having to sell gasoline in the spot markets. Thus, a narrow focus on effect as a result of aggregation would convert self-interest parallel action, similar to that found to be legal in *Twombly*, into an antitrust violation, even when the plaintiff is precluded from showing any agreement between the competing businesses.

VI. Conclusion

We recently reiterated in *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)*, that "[t]o state a claim under *Section 1* of the Sherman Act, *15 U.S.C. § 1*, claimants must plead not just ultimate facts (such as a conspiracy), but evidentiary facts which, if true, will prove: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; **[**50]** (2) by which the persons or entities intended to harm or restrain trade or commerce . . . (3) which actually injures competition." Gilley, in order to state a § 1 claim, must plead "a contract . . . by which the persons or entities intended to harm or restrain trade." Despite its length and detail, the SAC does not clearly assert which individual agreement or agreements constitute in themselves a "contract . . . by which the persons or entities intended to harm or restrain trade." Rather, the SAC is fairly read as alleging the existence of a network of exchange agreements that arguably allowed the defendants to unlawfully coordinate their production and output. But given the preclusive effect of *Aguilar*, Gilley cannot show such coordination. The SAC is not saved by the argument that it could be read to encompass a claim that the individual agreements in themselves constitute a restraint of trade because the SAC does not provide the defendants fair notice of such a claim and the grounds upon which it rests. *See* *Twombly, 127 S. Ct. at 1964*. Moreover, aggregation does not save the SAC because it does not show that the defendants' adjustments of CARB production were part of any agreement **[**51]** or conspiracy, rather than independent efforts to maximize profits. *See* *Twombly, 127 S. Ct. at 1971*. Finally, I note that, as written, the SAC might allow Gilley to seek discovery on, and to assert, allegations of conspiracy that Gilley concedes he is precluded by *Aguilar* from asserting as a cause of action. For these reasons, I would affirm the district court's dismissal of the Second **[*1023]** Amended Complaint without leave to amend.

Judges: T. JOHN WARD, UNITED STATES DISTRICT JUDGE.

Opinion by: T. JOHN WARD

Opinion

MEMORANDUM OPINION AND ORDER

Before the court is Leegin Creative Leather Products, Inc.'s ("Leegin") Motion to Dismiss (Dkt. No. 152). On March 12, 2009, the court heard oral arguments on the Motion. The court has carefully considered the parties' submissions and arguments of counsel. The court GRANTS Leegin's Motion for the following reasons.

I. BACKGROUND

In *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 127 S.Ct. 2705, 168 L. Ed. 2d 623 (2007)*, the Supreme Court reversed the jury verdict in plaintiff's favor in this case. In doing so, the Supreme Court changed the standard by which to judge price fixing agreements between manufacturers and the entities to whom they sell (vertical price fixing agreements). The Supreme Court announced that a "rule of reason" standard should apply to vertical price fixing agreements, rather than the *per se* standard that was applied by this court. The Supreme Court remanded the case to this court to apply the "rule of reason" at retrial. This court granted the PSKS leave **[*3]** to file a second amended complaint (SAC) and gave the parties a briefing schedule for any Motion to Dismiss. The plaintiff has filed its amended complaint, and Leegin has filed its Motion to Dismiss.

II. LEGAL STANDARD

The legal standard for dismissing claims under *FED. R. CIV. P. 12* ("*Rule 12*") is well established. *Rule 8(a)* requires that a complaint contain a "short and plain statement of the claim showing that the pleader is entitled to relief." *FED. R. CIV. P. 8(a)(2)*. The Supreme Court has held that a complaint does not need detailed factual allegations to survive a *Rule 12(b)(6)* motion to dismiss, but the plaintiff's obligation to state the grounds of entitlement to relief requires "more than labels and conclusions." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 1964-65, 167 L. Ed. 2d 929 (2007)*. The factual allegations must be sufficient to raise a "right to relief above the speculative level." *Id. at 1965*. The Court must assume that the allegations in the complaint are true. *See id; Neitzke v. Williams, 490 U.S. 319, 109 S. Ct. 1827, 104 L. Ed. 2d 338 (1989)*. "What *Rule 12(b)(6)* does not countenance are dismissals based on a judge's disbelief of a complaint's factual allegations." *Id. at 328*. The "issue is not whether [the plaintiffs] **[*4]** will ultimately prevail, but whether [they are] entitled to offer evidence to support [their] claim." *Jones v. Greninger, 188 F.3d 322, 324 (5th Cir. 1999)*.

III. ANALYSIS

Leegin challenges PSKS's allegations as being insufficient to allege a rule of reason antitrust case. Leegin argues that the two relevant product markets PSKS attempts to define in its SAC are untenable under ***antitrust law***. Further, Leegin argues PSKS has not alleged facts demonstrating that Brighton has market power in the purported relevant product markets. Brighton's market power in the relevant product markets is necessary for the alleged price fixing agreement to have the requisite anticompetitive effect to be illegal in a rule of reason case. PSKS responds that it has in fact pleaded sufficiently, and the Supreme Court's opinion in *Leegin* did not require market power for a showing of an anticompetitive effect in a rule of reason analysis for vertical price fixing agreements.

In an attempt to bootstrap its case into a *per se* illegality case, PSKS added allegations in its SAC to support horizontal price-fixing and a retailer cartel. PSKS alleges that because the manufacturer in this case is also a distributor and **[*5]** retailer, the pricing agreement is horizontal as well as vertical. Additionally, PSKS alleges the conduct amounts to a classic hub and spoke conspiracy. Leegin makes two arguments for dismissing PSKS's horizontal allegations from its SAC. First, Leegin argues that because PSKS did not originally proceed on a horizontal theory, it is precluded from doing so now. Second, Leegin argues, PSKS's horizontal restraints theories fail as a matter of law.

A. Relevant Product and Geographic Market

The first step in a rule of reason analysis is determining the relevant market. *Apani Southwest Inc. v. Coca-Cola Enterprises Inc., 300 F.3d 620, 627 (5th Cir. 2002)*. "Proof that the defendant's activities, on balance, adversely affected competition in the appropriate product and geographic markets is essential to recovery under the rule of reason." *Hornsby Oil Co. V. Champion Spark Plug Co., 714 F.2d 1384, 1392 (5th Cir. 1983)*. A relevant product market includes the line of goods or services reasonably interchangeable in use. *United States v. E.I. Du Pont de Nemours & Co., 351 U.S. 377, 396, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. The relevant geographic market "is the area of effective competition . . . in which the seller operates, **[*6]** and to which the purchaser can practicably turn for supplies." *Tampa Elect. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*. The Fifth Circuit requires plaintiffs to define their market with reference to the rule of reasonable interchangeability. *Apani, 300 F.3d at 628*. Where "the relevant market is legally insufficient . . . a motion to dismiss may be granted." *Id. at 627*.

1. Relevant Product market

A relevant product market includes the line of goods or services reasonably interchangeable in use. *United States v. E.I. Du Pont de Nemours & Co., 351 U.S. at 393*. "Determination of the competitive market for commodities depends on how different from one another are the offered commodities in character or use, how far buyers will go to substitute one commodity for one another." *Id.* "[I]t is the use or uses to which the commodity is put that control." *Id. at 396*.

PSKS alleges two product markets in its SAC. The first is "retail market for Brighton's women's accessories." SAC P 24. The second is the "wholesale sale of brand-name women's accessories to independent retailers." SAC P 24. Leegin argues that neither market is tenable under current law.

i. "Retail market for Brighton's women's **[*7]** accessories"

Leegin first argues that the market definition "retail market for Brighton's women's accessories" fails because countless brands are "reasonably interchangeable in use" with Brighton's products. Dfts. MTD at 7. Indeed, courts have regularly held that a single brand, no matter how distinctive or unique, cannot be its own market. *Little Ceasar Enterprises, Inc. v. Smith, 34 F.Supp. 2d 459, 477 n.30 (E.D. Mich. 1998)* (collecting cases). "Even where brand loyalty is intense, courts reject the argument that a single branded product constitutes a relevant market." *Green Country Food Market, Inc. v. Bottling Group, LLC, 371 F.3d 1275, 1282 (10th Cir. 2004)*. The Fifth Circuit has held that "absent exceptional market conditions, one brand in a market of competing brands cannot constitute a relevant product market. *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d. 480, 488 (5th Cir. 1984)*

PSKS attempts to circumvent the law by arguing that the SAC alleges special factors that could make the "retail market for Brighton's women's accessories" a unique submarket that should be considered separately for antitrust purposes. Pls. Reply at 8. Indeed, "***antitrust law*** recognizes . **[*8]** . . economically significant submarkets . . . which themselves constitute relevant product markets." *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc. 732 F.2d 480, 487-88 (5th Cir. 1984)*. PSKS points out that "[t]he fact finder may determine a submarket exists by 'examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Id.* (citing *Brown Shoe v. U.S., 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*.

PSKS, however, has failed to allege a tenable dominant market to its alleged submarket. PSKS attempts to argue there can be some submarket without a tenable dominant market. Further, PSKS ignores that a submarket is still a "market." While PSKS may have pleaded facts sufficient to define a submarket, that alone will not get PSKS past the clear law that a single brand cannot be its own market. *See id.* There is no law supporting PSKS's apparent position that submarkets are exempt from the law requiring a market to constitute more than a single brand. "Retail market for Brighton's women's **[*9]** accessories," therefore, is not a tenable product market under the law.

ii. "Wholesale sale of brand-name women's accessories to independent retailers"

Next, PSKS argues that "wholesale sale of brand-name women's accessories to independent retailers" is a relevant product market. Leegin argues that this alternative product market fails because it excludes products reasonably interchangeable with Brighton's products. Leegin breaks down into different components what it calls the "gerrymandered" product market: 1) wholesale sale, 2) brand-name 3) women's accessories, and 4) independent retailers.

First, as Leegin points out, "wholesale sale" is inappropriate because it does not focus on how any agreement impacts consumers. Relevant markets must be defined in terms of the product itself without regard to the distribution level. *See, e.g., Assam Drug Co. Inc. v. Miller Brewing Co., Inc., 798 F.2d 311 (8th Cir. 1986)* (relevant market was the "interbrand beer market" not limited to the wholesale market); *R.D. Imports Ryno Indus. v. Mazda Distribs. 807 F.2d 1222, 1225 (5th Cir. 1987)* (relevant market was cars, foreign and domestic, that consumers viewed as substitutes with no limitation to wholesale **[*10]** market).

PSKS attempts to circumvent this law by arguing the Supreme Court distinguished the "effect that this type of constraint poses for manufacturer cartels." For example, PSKS argues "by imposing a fixed margin, manufacturers can easily police competing manufacturer sales and more easily fix wholesale prices. . . The economic injury of this activity falls not only on the consumer, who is charged more than a competitive price for the goods, but also on those dealers purchasing their goods at wholesale." Dfts. Resp. at 5. However, PSKS has failed to define the relevant *market* in terms of the product itself and not the distribution level of the product. This must be done without regard to how the wholesale market is affected. Therefore, "wholesale market," adds nothing to PSKS's alternative product market.

Second, Leegin argues that including "brand name" in the product market definition is wrong, because it is consclusory and unsupported by any facts. Leegin cites to *Star Tobacco, Inc. v. Darilek, 298 F.Supp 2d 436, 446 (E.D. Tex 2003)* granting a Motion to Dismiss because the plaintiff had failed to allege facts supporting "brand name" and "discount" or "generic" cigarettes were not **[*11]** interchangeable. The *Star Tabacco* court held "[b]ecause Defendant's counterclaim fail[ed] to make any factual allegations to the effect that discount cigarettes and branded cigarettes are not interchangeable, Defendants have submitted an inadequate pleading." *Id.*

PSKS responds that including "brand name" does add something to the purported product market. *See Babyage.com Inc. v. Toys "R" Us, Inc., 558 F.Supp.2d 575 (E.D.Pa. 2008)* (allowing products to be defined by "*high-end* baby and juvenile strollers"). *Babyage* is distinguishable from the case at bar, however. In *Babyage,* the plaintiff had pleaded why "*high-end*" baby strollers were not interchangeable with other types of strollers. *Id.* Here, PSKS fails to allege facts that support "brand names" are important to interchangeability in this case. PSKS fails to allege facts that would support a showing that consumers in the market for "brand name" women's accessories, whatever those accessories are, may only turn to other brand-name products. All of PSKS's facts are couched in terms of why the "Brighton" brand is unique and high end. As already discussed, a single brand can not be its own market. *See Domed Stadium, 732 F.2d at 487-88*. **[*12]** It is plausible that PSKS would be able to amend its complaint to allege facts necessary to support an allegation that "brand name" accessories are important to its product definition. However, granting leave to do so would be in vain, because alleging such facts would not be enough to salvage the case in light of the its other deficiencies.

"Women's Accessories," Leegin argues, is not an appropriate product market because it groups together products that are not interchangeable with each other. In a sister case to this one, Judge Greer in the Eastern District of Tennessee held "picture frames do not compete with women's handbags and shoes do not compete with jewelry." *Spahr v. Leegin, 2008 U.S. Dist. LEXIS 90079, 2008 WL 3914461, at *9 n.3*. This court agrees. "Women's accessories" is too broad and vague to constitute a market.

Lastly, Leegin argues, including "independent retailers" is in error, because it inappropriately limits the relevant market to a subset of retailers. Leegin argues that "independent retailers" lacks specificity, therefore, leaves the relevant market too vague to be a tenable definition. Further, Leegin argues, to the extent "independent retailers" is intended to describe some subset of retailers, **[*13]** such as stores like PSKS, the complaint fails to allege why it should be so limited. The court agrees. PSKS has cited no law or support as to how defining the market in the bounds of "independent retailers," no matter what they are, makes the alternative product market tenable. Relevant product markets include goods that are reasonably interchangeable in use. *E.I. Du Pont de Nemours & Co., 351 U.S. at 393*. PSKS has failed to allege the interchangeability, or lack thereof, between one subset of retailers and other retailers selling exactly the same products. *See Apani, 300 F.3d at 628*.

2. Geographic Market

The relevant geographic market "is the area of effective competition . . . in which the seller operates, and to which the purchaser can practicably turn for supplies." *Tampa Elect. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*. PSKS alleges that it purchases most of its products from the Dallas Market (SAC P7) and alleges a product market of the greater Dallas area. SAC P24. Because, as discussed above, the wholesale market cannot be the relevant product market, the geographic area where PSKS purchases its products is irrelevant. Leegin does not "concede that [the Greater Dallas **[*14]** Area] is appropriate for the retail sale market; however, it is not moving to dismiss on these grounds." Dfts. MTD at 11 n. 4. "The Greater Dallas area" may be a tenable geographic market for the retail sales of Brighton Products. However, that matters little in that PSKS has not pleaded a tenable product market.

B. Anticompetitive Effect

Leegin also argues that PSKS's failure to allege anticompetitive effects provides further reason for dismissing the case. The parties dispute whether the Supreme Court intended that a showing of a defendant's market power is a requisite for finding that a vertical price fixing agreement has an anticompetitive effect. The court need to reach this issue, however. Because PSKS has not defined a relevant market, the court cannot assess the alleged price fixing agreement's anticompetitive effect.

C. Addition of Horizontal Restraint Theories

PSKS attempts to allege facts supporting a horizontal price fixing agreement and a horizontal hub and spoke conspiracy, both of which are illegal *per se.* PSKS's horizontal theories are based on the fact that Leegin is also a distributor of its own products. Leegin argues these new theories are barred because they were not **[*15]** raised in the original jury trial, the facts PSKS allege are still analyzed under the rule of reason, and the alleged facts fall short of supporting a cartel.

1. The Mandate Rule

PSKS cannot now plead a horizontal restraint case that it failed to raise in the original trial. The Mandate Rule "bars litigation of issues decided by the district court but foregone on appeal or otherwise waived, for example because they were not raised in the district court." *U.S. v. Lee, 358 F.3d 315, 321 (5th Cir. 2004)*.

PSKS cites to *Castellano v. Fragozo, 352 F.3d 939 (5th Cir. 2003)* for the proposition that when a higher court changes well established precedent, a party may pursue a claim it did not raise in the lower court out of non-necessity. In *Castellano,* the Fifth Circuit changed the law regarding the elements of a number of the plaintiff's federal claims such that a malicious prosecution claim previously asserted by the plaintiff was no longer redundant of his federal claims. On remand, the Fifth Circuit ordered that the plaintiff could re-file and pursue his malicious prosecution claim, despite the fact that he had previously voluntarily dismissed the claim. *Id.*

The case at bar is different from **[*16]** *Castellano,* however. Here, the Supreme Court did not specifically allow PSKS to re-plead allegations it had previously abandoned. First, the horizontal allegations were never raised in the original trial. Second, the Supreme Court did not mention what PSKS could plead on remand. More analogous to this case is *Continental TV, Inc. v. GTE Sylvania Inc., 461 F.Supp. 1046 (N.D. Cal. 1978)*, *aff'd* *694 F.2d 1132 (9th Cir. 1982)*. In *Continental,* the district court did not allow the plaintiff to plead horizontal allegations after the Supreme Court overruled *per se* illegality for the restraint at issue, and remanded the case to be tried under the rule of reason. *Id. at 1051-52*. In this case, nothing prevented PSKS from raising its horizontal agreement and conspiracy allegations in the original trial, and it cannot do so now.

2. Dual Distributorship Situations

Even if the court were to allow PSKS to plead it its horizontal restraint allegations, those allegations fail as a matter of law. Where a manufacturer is both a wholesale distributor and retail distributor it is called a "dual distribution system." *Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001, 1004-1007 (5th Cir. 1981)*. **[*17]** Restraints in "dual distribution systems" are analyzed under the rule of reason. *Id.* The Fifth Circuit has held that in situations like Leegin's, where the manufacturer also distributes some of its own goods, restraints are properly analyzed under the rule of reason. *Id.* Eight other circuits have reached the same result. [1] PSKS argues that those cases are distinguishable because they did not deal with price fixing agreements, but instead dealt with other types of restraints.

PSKS urges that in *this type* of "dual distribution setting," where the restraints are price fixing agreements, "the natural checks and balances provided by the countervailing interests of manufacturer/consumer against those of the retailer as to retail and retail margins simply are not present." Pls. Response at 16. PSKS relies on *United States v. McKesson & Robbins, Inc., 351 U.S. 305, 76 S. Ct. 937, 100 L. Ed. 1209 (1956)* to support its position. In *McKesson,* the defendant, a manufacturer and wholesale distributor, had entered price fixing agreements with other competing wholesale distributors of products manufactured by the defendants. Because the defendant participated as a wholesaler and manufacturer in the market, the court held the agreements in question were between "firms [or] corporations in competition with each other." As the Tennessee court pointed out, however, PSKS's reliance on *McKesson* is misplaced. *Spahr, 2008 U.S. Dist. LEXIS 90079, [WL] at *6*. "The issue before the Supreme Court was one of statutory interpretation . . . [it] did not address or discuss wether the restraints at issue were horizontal or vertical for Sherman Act purposes **[*19]** and its analysis has little, if any, application to the issue before the Court." *Id.*

The law in the Fifth Circuit is that these types of arrangements are dual distributorships and should be analyzed under the rule of reason. *Red Diamond Supply 637 F.2d at 1004-1007*. The *Red Diamond* court did not distinguish between price fixing and other types of restraints. Therefore, the same deficiencies in the rule of reason analysis above are present in PSKS's dual distributorship case.

3. Hub and Spoke Conspiracy

PSKS next attempts to have its case fit into a *per se* analysis by arguing it has pleaded facts showing that Leegin's price fixing activities are in furtherance of a "hub and spoke" retailer cartel.

---

[1] *See, e.g., AT & T Corp. v. JMC Telecom, LLC, 470 F.3d 525, 531 (3d Cir. 2006)* (agreement involving dual distributor arrangement remained "vertical" and analyzed under the rule of reason); *Electronics Communications Corp. v. Toshiba America Consumer Products, Inc., 129 F.3d 240, 243 (2d Cir. 1997)* (same); ***Glacier Optical, Inc. v. Optique du Monde, 46 F.3d 1141 (9th Cir. 1995)*** (not for publication) (same); *Smalley & Co. v. Emerson & Cuming, Inc., 13 F.3d 366, 368 (10th Cir. 1993)* (same); ***Hampton Audio Electronics, Inc. v. Contel Cellular, Inc., 966 F.2d 1442 (4th Cir. 1992)***, as amended, (Aug. 6, 1992) (same); *Ill. Corporate Travel, Inc. v. Am. Airlines, Inc., 889 F.2d 751, 753 (7th Cir. 1989)* (same); *International Logistics Group, Ltd. v. Chrysler Corp., 884 F.2d 904, 906 (6th Cir. 1989)*; **[*18]** *Ryko Mfg. Co. v. Eden Services, 823 F.2d 1215, 1230, 92 A.L.R. Fed. 387 (8th Cir. 1987)*, (same).

> "A hub and spoke conspiracy involves a hub, generally the dominant purchaser or supplier in the relevant market, and the spokes, made up of the distributors involved in the conspiracy. The rim of the wheel is the connecting agreements among the horizontal competitors (distributors) that form the spokes. Each of the three parts is integral in establishing a *per se* violation under the hub and spoke theory."

Total Benefits Planning Agency, Inc. v. Anthem Blue Cross and Blue Shield, 552 F.3d 430, 435 n.3. **[*20]** "The critical issue for establishing a *per se* violation with the hub and spoke system is how the spokes are connected to each other . . ." *Id. at 436*. PSKS argues it "intends to prove that there are a series of agreements between Leegin and independent retailers to fix prices of Brighton goods (spoke); that Leegin's independent retailers have formed a cartel with each other and with Leegin as a retailer to prevent discounting and price competition (wheel); that in response to pressure from retailers involved in the cartel, Leegin has enforced its price fixing agreements against discounters to stamp-out price competition (hub); that retailers have discussed and indeed come to agreements as to the terms of the price fixing agreements and exceptions thereto (wheel)." Pls. Response at 12-13. In analyzing the complaint in *Spahr,* the court explained:

> There is no allegation by plaintiffs here that retailers have agreed to fix prices and then compelled the manufacturer, Leegin, to utilize resale price maintenance. In fact, plaintiffs have affirmatively alleged the opposite, *i.e.,* that Leegin coerced retailers and forced upon retailers the resale price maintenance agreements.

*Spahr, 2008 U.S. Dist. LEXIS 90079, [WL] at *12*.

It **[*21]** appears that PSKS has attempted to resolve this deficiency in its SAC in this case by adding the following paragraph (14):

> Brighton would, following the suggestion and concurrence of retail dealers, from time to time amend the Policy. One such instance occurred in January 2003, when Brighton invited some of its most successful retail dealers to Hawaii. One topic discussed at this conclave of retailers was the Brighton pricing policy. **A consensus of the retailers was reached, and the result of that meeting resulted in a policy being announced:** "What we have decided is OK after talking to more than 100 retailers is a birthday Club that on your birthday (or within a short time of your birthday) a consumer can get a discount on 1 piece of merchandise in your store (everything not only Brighton)."

This addition, however, is insufficient to properly plead a hub and spoke conspiracy. There is no allegation that retailers agreed to the alleged RPM among themselves. The allegations suggest not a retailer cartel, but that Leegin's interests were the driving force behind the program. PSKS argues that a jury could infer that because these retailers arrived at a consensus as to an exception to the **[*22]** pricing policy, they discussed the pricing policy in more detail, discarded various other proposals for exceptions to the policy, and agreed to maintain the policy as a whole. This argument is unpersuasive, however.

PSKS must ***allege*** an agreement among the retailers. *Rule 8* "requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 127 S.Ct. at 1965*. In *Twombly,* the Supreme Court rejected an antitrust claim because the horizontal conspiracy was alleged without the level of detail--the who, what, when, where, and how. Here, PSKS has likewise failed to allege what is necessary, and there is no evidence that there are facts that would support such a claim. Without those facts, PSKS is missing the requisite wheel in the classic hub and spoke arrangement.

D. State Law Claims

PSKS alleges that Brighton also violated *Texas Business and Commerce Code § 15.05 et seq.* SAC P 34. Leegin argues that PSKS cannot now bring this cause of action because it already abandoned those claims before the previous trial. PSKS does not respond to Leegin's argument. PSKS's state law claims, therefore, are dismissed.

IV. CONCLUSION

PSKS has not **[*23]** pleaded a tenable product market for a rule of reason analysis. PSKS cannot now bring horizontal restraint claims it never brought in the original trial in this case. Regardless of whether the court allows PSKS to add allegations to its SAC which support its horizontal restraints theories, those theories also fail as a matter of law. PSKS has likewise abandoned its state law claims in this case. Leegin's Motion to Dismiss is GRANTED.

SIGNED this 6th day of April, 2009.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN1[ ] **Judges, Discretionary Powers**

Denials of *Fed. R. Civ. P. 12(b)(6)* motions to dismiss are not final orders, and a losing party may not ordinarily pursue an immediate appeal from them. Nevertheless, a court may certify a nonfinal order for interlocutory appeal under *28 U.S.C.S. § 1292(b)* if: (1) the order involves a controlling question of law; (2) a substantial ground for difference of opinion exists with regard to the issue involved; and (3) an immediate appeal may materially advance the ultimate termination of the litigation. *28 U.S.C.S. § 1292(b)*. The certification decision rests with the discretion of a district court, and the court may decline to certify an order even if the parties have satisfied all elements enumerated in the statute.

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN2[ ] **Appellate Jurisdiction, Interlocutory Orders**

An order involves a controlling question of law for *28 U.S.C.S. § 1292(b)* purposes if either: (1) an incorrect disposition would constitute reversible error if presented on final appeal; or (2) the question is serious to the conduct of the litigation, either practically or legally.

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN3[] **Appellate Jurisdiction, Interlocutory Orders**

A substantial ground for difference of opinion exists for *28 U.S.C.S. § 1292(b)* purposes when controlling authority fails to resolve a pivotal matter. A genuine doubt must exist about the legal standard governing a particular case. The existence of conflicting judicial opinions provides support for certification of an interlocutory appeal, as does a lack of binding precedent. However, a court should not certify questions of relatively clear law merely because the losing party disagrees with the court's analysis.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN4[] **Motions to Dismiss, Failure to State Claim**

Twombly communicates multiple linguistic signals about the standard of review that a court must apply on a *Fed. R. Civ. P. 12(b)(6)* motion. On one hand, Twombly has superseded the pleading standard of Conley v. Gibson, under which a complaint was not to be dismissed unless it appeared beyond doubt that the plaintiff could prove no set of facts in support of his claim which would entitle him to relief. Twombly has concluded that this standard is an incomplete, negative gloss on pleading practice and instead requires complaints to set forth plausible averments that possess enough heft to show that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)(2)* At the same time, however, Twombly expressly rejects a requirement of heightened fact pleading of specifics. Since Twombly's issuance, the U.S. Supreme Court has reaffirmed that a complaint must simply give a defendant fair notice of what the claim is and the grounds upon which it rests. Several courts have observed that Twombly's varied analytical cues expose it to multiple interpretations.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN5[] **Motions to Dismiss, Failure to State Claim**

A narrow reading of Twombly construes it as a formalistic change, designed to give voice to a pleading standard that was already commonplace in many courts. Under a robust interpretation, however, Twombly requires a court to scrutinize the plausibility of a complaint's allegations and dismiss claims that lack sufficient factual underpinning for the relief requested. The United States Court of Appeals for the Third Circuit has recognized that Twombly's exact location on the continuum between these interpretations is unclear. The court has concluded that Twombly does not institute a new pleading regime, but requires a plaintiff to describe enough facts to raise a reasonable expectation that discovery will reveal evidence of the claims alleged in the complaint. The plaintiff must allege facts that justify moving the case beyond the pleadings to the next stage of litigation. However, the precise quorum of facts necessary to reach this point remains uncertain, causing the Third Circuit to prognosticate that the issues raised by Twombly are not easily resolved and likely will be a source of controversy for years to come.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN6[] **Sherman Act, Claims**

The issues regarding pleading requirements under Twombly hold particular significance in the antitrust arena, where plaintiffs often lack direct evidence of a conspiratorial agreement and must rely upon circumstantial allegations to surmount a *Fed. R. Civ. P. 12(b)(6)* challenge. The United States District Court for the Middle District of Pennsylvania has concluded that a *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, plaintiff may satisfy Twombly by describing parallel price increases, clear opportunity for collusion, anti-competitive activity in foreign markets intertwined with those in the U.S., transnational management of corporate subsidiaries, and allegations of anti-competitive conduct that are economically sensible in light of mature market characteristics. The court remains convinced of the propriety of this conclusion. Nevertheless, the Twombly standard is in its infancy, and capable jurists may disagree about its effect on such plaintiffs' pleading obligations. Such disagreement could lead to differing outcomes, sufficient to satisfy the second criterion of *28 U.S.C.S. § 1292(b)*.

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN7[] **Appellate Jurisdiction, Interlocutory Orders**

Any question certified for appeal must materially advance the ultimate termination of the litigation. *28 U.S.C.S. § 1292(b)*. A court must evaluate whether an appeal could eliminate the need for a trial, simplify a case by foreclosing complex issues, or enable the parties to complete discovery more quickly or at less expense. Cases in which discovery has closed are generally inappropriate for interlocutory appeal because they are rapidly approaching conclusion under their own momentum.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > Appeals > Appellate Jurisdiction > Interlocutory Orders

HN8[] **Judges, Discretionary Powers**

A district court possesses discretion to deny certification of an appeal even if the parties satisfy the statutory criteria of *28 U.S.C.S. § 1292(b)*. A district court should exercise this discretion and certify issues for interlocutory appeal only sparingly and in exceptional circumstances.

Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Ruthanne Gordon, Berger & Montague, PC, Philadelphia, PA.

For Thomas Rode, on behalf of himself and all others similarly situated, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Ronald J. Aranoff, Bernstein Liebhard & Lifshitz, LLP, New York, NY.

For CVS Pharmacy, **[**13]** Inc., Rite Aid Corporation, Rite Aid Hdqtrs. Corp., Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Joseph T. Lukens, Steven D. Shadowen, LEAD ATTORNEYS; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA.

For Donald Webster, on behalf of himself and on behalf of all others similarly situated, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Joshua D. Snyder, Kohn Swift & Graf PC, Philadelphia, PA; Marc H. Edelson, Edelson & Associates, LLC, Doylestown, PA; Michael J. Boni, Theresa J. Henson, Boni & Zack LLC, Bala Cynwyd, PA.

For Giant Eagle, Inc., a Pennsylvania Corporation, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Joseph T. Lukens, Steven D. Shadowen, LEAD ATTORNEYS; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Bernard D. Marcus, Marcus & Shapira, Pittsburgh, PA; Moira Cain-Mannix, Marcus & Shapira LLP, Pittsburgh, PA.

For Debra L. Damaske, Plaintiff: Daniel A. Small, LEAD ATTORNEY, **[**14]** Cohen Milstein Sellers & Toll PLLC, Washington, DC; James J. McCarthy, Jr., LEAD ATTORNEY, McCarthy Weisberg Cummings, P.C., Harrisburg, PA; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA.

For Isabelle Dikland, on behalf of themselves and all others similarly situated, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Elizabeth K. Tripodi, Richard M. Volin, Finkelstein Thomspon LLP, Washington, DC.

For Ben Lee Distributors, Inc., on behalf of itself and all others similarly situated, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; David S. Stellings, New York, NY.

For Seth E. Ellis, P.A., on behalf of itself and all others similarly situated, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Kevin B. Love, Criden & Love, P.A., South Miami, FL.

For Cindy **[**15]** Elan-Mangano, on behalf of herself and all others similarly situated, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Aaron M. McParlan, Michael E. Jacobs, Richard M. Hagstrom, Zelle, Hofmann, Voelbel, Mason & Getter LLP, Minneapolis, MN; James S. Reece, Zelle Hofmann Voelbel & Mason LLP, Minneapolis, MN.

For John Candido, on behalf of himself & all others similarly situated, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Joseph M. Patane, Law Office of Joseph M. Patane, San Francisco, CA; Lauren Clare Russell, Trump Alioto Trump & Prescott, LLP, San Francisco, CA; Mario N. Alioto.

For Marcy Linder, on behalf of herself and all others similarly situated, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Amber M. Nesbitt, Edward A. Wallace, Kenneth A. Wexler, Wexler Wallace LLP, Chicago, **[**16]** IL; Mark J. Tamblyn, Wexler Toriseva Wallace LLP, Sacramento, CA.

For NMJ Consultant Group, Inc., individually and on behalf of a class of all those similarly situated, Plaintiff: Christopher J. Cormier, LEAD ATTORNEY, Cohen, Milstein, Hausfeld & Toll, P.L.L.C., Washington, DC; Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Hilary K. Ratway, Michael D. Hausfeld, LEAD ATTORNEYS, Hausfeld LLP, Washington, DC; Seth R Gassman, LEAD ATTORNEY, Cohen, Milstein, Hausfeld & Toll, PLLC, New York, NY; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Jayne A. Goldstein, LEAD ATTORNEY, Shepherd, Finkelman, Miller & Shah, LLP, Media, PA.

For Canteen Vending Company, individually and on behalf of a class of all those similarly situated, Plaintiff: Arthur N. Bailey, Arthur N. Bailey & Associates, LEAD ATTORNEY, Jamestown, NY; Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Tanya S Chutkan, William A. Isaacson, LEAD ATTORNEYS, Boies, Schiller & Flexner LLP, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA.

For Jones Vend and OCS Distributing, **[**17]** Inc., on behalf of itself and all others similarly situated, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Bruce L. Simon, Pearson, Soter, Warshaw & Penny, LLP, San Francisco, CA; Jane Gowen Penny, Killian & Gephart, LLP, Harrisburg, PA.

For Russell Traub, individually and on behalf of all others similarly situated, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Bonny E. Sweeney, Katherine A Morgan, Coughlin Stoia Geller Rudman & Robbins LLP, San Diego, CA.

For C.W. Brower, Inc., on behalf of itself and all others similarly situated, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA; Clinton P Walker, Fred A Silva, Kathy L Monday, Roger M. Shrimp, Damrell, Nelson, Schrimp, Pallios, Pacher & Silva, Modesto, CA.

For Treat America Limited, on behalf of itself and all others similarly situated, **[**18]** Plaintiff: Bernice Conn, LEAD ATTORNEY, PRO HAC VICE, Los Angeles, CA. Daniel A. Judges: CHRISTOPHER C. CONNER, United States District Judge.

Opinion by: CHRISTOPHER C. CONNER

Opinion

[*703] **MEMORANDUM**

Presently **[**26]** before the court is defendants' motion (Doc. 588) to certify an interlocutory appeal from the memorandum and order of court (Doc. 582) dated March 4, 2009 (hereinafter "the March 4 Memorandum"). For the reasons that follow, the motion will be granted.

I. Procedural History and Background [1]

---

[1] The March 4 Memorandum provides a comprehensive description of plaintiffs' averments. The court recounts only those allegations necessary to facilitate disposition of the instant motion.

Plaintiffs in the above-captioned matters allege that defendants conspired to fix prices **[*704]** in the United States market for chocolate candy in violation of § 1 of the Sherman Act, *15 U.S.C. § 1*. Defendants allegedly implemented three coordinated prices increases from 2002 to 2007, raising prices in nearly identical proportion to one another on each occasion. During the same period, formidable barriers to entry protected the chocolate candy market, defendants' raw material costs remained stable, and consumer demand waned, thereby providing defendants with the market power and motive to act in an anticompetitive manner.

Defendants also allegedly engaged in price fixing in Canada. In mid-2007, Canadian antitrust authorities **[**27]** released documents depicting an orchestrated conspiracy by defendants' Canadian subsidiaries to exchange pricing information, control retail promotion costs, and implement price increases in the Canadian chocolate market. Defendants have allegedly integrated their American and Canadian operations through, *inter alia*, coordinated manufacturing and distribution systems, cross-border licensing agreements, and fusion of corporate oversight. Plaintiffs contend that, in light of this market integration, evidence of defendants' Canadian conduct lends plausibility to the alleged pricing conspiracy in the United States.

All defendants filed motions to dismiss the amended complaints pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. On March 4, 2009, the court denied the motions of certain defendants [2] under the Supreme Court's recent decision in *Bell Atlantic Co. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. (See Doc. 582, Part III.B.1.) Defendants presently move to certify an interlocutory appeal of the court's application of Twombly. The parties have fully briefed the motion, which is now ripe for disposition.

II. Discussion

HN1[] Denials of motions to dismiss are not final orders, and a losing party may not ordinarily pursue an immediate appeal from them. Nevertheless, a court may certify a non-final order for interlocutory appeal under *28 U.S.C. § 1292(b)* if (1) the order "involves a controlling question of law," (2) "a substantial ground for difference of opinion" exists with regard to the issue involved, and (3) an immediate appeal "may materially advance the ultimate termination of the litigation." *28 U.S.C. § 1292(b)*; *Simon v. United States, 341 F.3d 193, 199 (3d Cir. 2003)*. The certification decision rests with the discretion of the district court, and the court may decline to certify an order even if the parties have satisfied all elements enumerated in the statute. *Knipe v. SmithKline Beecham, 583 F. Supp. 2d 553, 599 (E.D. Pa. 2008)*; *L.R. v. Manheim Twp. Sch. Dist, 540 F. Supp. 2d 603, 608 (E.D. Pa. 2008)*.

A. [**29] Criteria for Certification under *28 U.S.C. § 1292(b)*

Defendants in the present matter request certification of the following two issues for interlocutory appeal:

> (1) [W]hether Twombly, as a matter of ***antitrust law***, allows a court on a motion to dismiss to draw an inference of conspiracy in a parallel pricing case based on market characteristics, **[*705]** absent any direct allegations of actual agreement; and
>
> (2) [W]hether allegations stemming from a foreign antitrust investigation can lend "plausibility" under Twombly to state a claim of U.S. conspiracy.

(Doc. 589 at 4.) The court will evaluate these questions to determine whether they satisfy the interlocutory appeal standard under *§ 1292(b)*.

1. Controlling Question of Law

---

[2] These defendants include Cadbury Adams Canada, The Hershey Company, Hershey **[**28]** Canada, Mars, Mars Snackfood U.S., and Nestle U.S.A. The remaining defendants filed simultaneous motions contesting personal jurisdiction, and the court deferred their *Rule 12(b)(6)* motions pending a period of jurisdictional discovery and resolution of threshold jurisdictional issues. (See Doc. 582 at 54.)

HN2[] An order involves a controlling question of law if either (1) an incorrect disposition would constitute reversible error if presented on final appeal or (2) the question is "serious to the conduct of the litigation either practically or legally." *Katz v. Carte Blanche Corp, 496 F.2d 747, 755 (3d Cir. 1974)*; see also *Knipe, 583 F. Supp. 2d at 599*. In the matter *sub judice*, the parties dispute whether defendants' proposed questions accurately describe the foundation of the March **[**30]** 4 Memorandum. Defendants posit that the memorandum relied primarily upon domestic market characteristics and foreign anticompetitive conduct when denying the motions to dismiss. (Doc. 589 at 4.) Plaintiffs contend that defendants unduly confine the court's holding and fail to acknowledge the significance of additional factual context alleged in the amended complaints, such as market integration between the United States and Canada and other "indicia of collusion." (Doc. 596 at 7.)

The court concludes that defendants' proposed questions paint the amended complaints and the March 4 Memorandum with too fine a stroke. The pertinent issue is not whether *either* characteristics of a mature market *or* anticompetitive foreign conduct satisfy Twombly when placed alongside allegations of parallel conduct. The more befitting inquiry is whether the *totality of the amended complaints* raise a plausible inference of price fixing. Any question certified for appeal must account not merely for market characteristics and foreign conduct, but also for the affinity between the U.S. and Canadian chocolate markets, the economic reasonableness of the alleged conspiracy, and defendants' opportunity for consultation. **[**31]** Defendants' success in effectuating three separate, uniform price increases and the allegedly overlapping management of their Canadian and American subsidiaries also influence the Twombly analysis. Therefore, the following single question more accurately encapsulates the gravamen of the court's ruling on the *Rule 12(b)(6)* motions:

> Does Twombly, as a matter of law, authorize a court in a § 1 case to draw an inference of conspiracy from the collective effect of repeated parallel price increases, averments of anticompetitive activity in closely related foreign markets, transnational management of corporate subsidiaries, opportunity for collusion, and descriptions of anti-competitive conduct that are economically sensible in light of mature market characteristics? [3]

The March 4 Memorandum provided an affirmative response to this question. Disposition of the motions would unquestionably change were this question answered in the negative. Accordingly, this question presents a controlling issue of law appropriate for appellate **[**32]** certification.

2. Substantial Ground for Difference of Opinion

HN3[] A substantial ground for difference of opinion exists when controlling authority fails to resolve a pivotal matter. *Knipe, 583 F. Supp. 2d at 599*; *EBC, Inc. v. [*706] Clark Bldg. Sys., No. Civ.A. 05-01549, 2008 U.S. Dist. LEXIS 21018, 2008 WL 728541, at *2 (W.D. Pa. Mar. 17, 2008)*. A genuine doubt must exist about the legal standard governing a particular case. *Knipe, 583 F. Supp. 2d at 600*. The existence of conflicting judicial opinions provides support for certification of an appeal, as does a lack of binding precedent. See id.; *Morgan v. Ford Motor Co., No. Civ.A. 06-1080, 2007 U.S. Dist. LEXIS 5455, 2007 WL 269806, at *3 (D.N.J. Jan. 25, 2007)*; *Chase Manhattan Bank v. Iridium Africa Corp., 324 F. Supp. 2d 540, 545 (D. Del. 2004)*. However, the court should not certify questions of relatively clear law merely because the losing party disagrees with the court's analysis. *Elec. Mobility Corp. v. Bourns Sensors/Controls, 87 F. Supp. 2d 394, 398 (D.N.J. 2000)*.

In the present matter, defendants observe that HN4[] Twombly communicates "multiple linguistic signals" about the standard of review that a court must apply on a *Rule 12(b)(6)* motion. (Doc. 589 at 9 (quoting *City of Moundridge v. Exxon Mobil Corp., 250 F.R.D. 1, 6 n.5 (D.D.C. 2008)*). **[**33]** On one hand, Twombly superceded the pleading standard of Conley v. Gibson, under which "a complaint [was] not [to be] . . . dismissed . . . unless it appear[ed] beyond doubt that the plaintiff c[ould] prove no set of facts in support of his claim which would entitle him to relief." *355 U.S. 41, 46-47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*. Twombly concluded that this standard was "an incomplete, negative gloss" on pleading practice, *550 U.S. at 563*, and instead required complaints to set forth

[3] This question effectively merges the two issues identified by defendants into a single inquiry and reflects the court's duty to evaluate the amended complaints *in toto*.

plausible averments that possess "enough heft to 'sho[w] that the pleader is entitled to relief.'" *Twombly, 550 U.S. at 557* (quoting *FED. R. CIV. P. 8(a)(2)* (alteration in original)). At the same time, however, Twombly expressly rejected a requirement of "heightened fact pleading of specifics." *Id. at 570*. Since Twombly's issuance, the Supreme Court has reaffirmed that a complaint must simply "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Erickson v. Pardus, 551 U.S. 89, ___, 127 S. Ct. 2197, 2200, 167 L. Ed. 2d 1081 (2007)* (quoting *Twombly, 550 U.S. at 555*).

Several courts have observed that Twombly's varied analytical cues expose it to multiple interpretations. See, e.g., *Iqbal v. Hasty, 490 F.3d 143, 155-57 (2d Cir. 2007)*; **[**34]** *Weisbarth v. Geauga Park Dist., 499 F.3d 538, 541-42 (6th Cir. 2007)*; *Moundridge, 250 F.R.D. at 6 n.5*; *Arista Records LLC v. Doe, 584 F. Supp. 2d 240, 244 & n.6, 245 & n.7, 246-47 (D. Me. 2008)*; *Accenture Global Servs. GMBH v. Guidewire Software, Inc., 581 F. Supp. 2d 654, 661 & n.5 (D. Del. 2008)*. Prior to Twombly, courts and commentators had maligned the Conley standard for many years, and complaints infrequently received the absolute deference required by a literal reading of the decision. See, e.g., *McGregor v. Indus. Excess Landfill, Inc., 856 F.2d 39, 43 (6th Cir. 1988)*; *Sutliff, Inc. v. Donovan Cos., 727 F.2d 648, 654 (7th Cir. 1984)*; *O'Brien v. Di Grazia, 544 F.2d 543, 546 n.3 (1st Cir. 1976)*; Christopher M. Fairman, The Myth of Notice Pleading, *45 ARIZ. L. REV. 987, 1014-21 (2003)*; Yoichiro Hamabe, Functions of Rule 12(b)(6) in the Federal Rules of Civil Procedure: A Categorization Approach, 15 CAMPBELL L. REV. 119, 130-34 (1993); Richard L. Marcus, The Revival of Fact Pleading under the Federal Rules of Civil Procedure, *86 COLUM. L. REV. 433, 463-65 (1986)*. Hence, ***HN5***[🡅] a narrow reading of Twombly construes it as a formalistic change designed to give voice to a pleading standard **[**35]** that was already commonplace in many courts. Under a robust interpretation, however, Twombly requires a court to scrutinize the plausibility of a complaint's allegations and dismiss claims that lack sufficient factual underpinning for the relief requested.

[*707] The United States Court of Appeals for the Third Circuit's decision in *Phillips v. County of Allegheny, 515 F.3d 224 (3d Cir. 2008)*, recognized that Twombly's exact location on the continuum between these interpretations is unclear. Phillips concluded that Twombly did not institute a new pleading regime but required the plaintiff to describe "enough facts to raise a reasonable expectation that discovery will reveal evidence of" the claims alleged in the complaints. *Id. at 234* (quoting *Twombly, 550 U.S. at 556*). The plaintiff must allege facts that "justify moving the case beyond the pleadings to the next stage of litigation." *Id. at 234-35*. However, the precise quorum of facts necessary to reach this point remains uncertain, causing the Third Circuit to prognosticate that "[t]he issues raised by Twombly are not easily resolved, and likely will be a source of controversy for years to come." *Id. at 234*.

HN6[🡅] These issues hold particular significance **[**36]** in the antitrust arena, where plaintiffs often lack direct evidence of a conspiratorial agreement and must rely upon circumstantial allegations to surmount a *Rule 12(b)(6)* challenge. The March 4 Memorandum concluded that a § 1 plaintiff may satisfy Twombly by describing parallel price increases, clear opportunity for collusion, anticompetitive activity in foreign markets intertwined with those in the U.S., transnational management of corporate subsidiaries, and allegations of anti-competitive conduct that are economically sensible in light of mature market characteristics. (Doc. 582 at 59-62.) The court remains convinced of the propriety of this conclusion. Nevertheless, the court recognizes that the Twombly standard is in its infancy and that capable jurists may disagree about its effect on plaintiffs' pleading obligations. Such disagreement could lead to differing outcomes between this matter and analogous cases addressing motions similar to those raised by defendants. Hence, the question of controlling law formulated by the court satisfies the second criterion of *§ 1292(b)*.

3. Materially Advances the Termination of the Litigation

Finally, ***HN7***[🡅] any question certified for appeal must "materially **[**37]** advance the ultimate termination of the litigation." *28 U.S.C. § 1292(b)*. The court must evaluate whether an appeal could eliminate the need for a trial, simplify a case by foreclosing complex issues, or enable the parties to complete discovery more quickly or at less expense. *Knipe, 583 F. Supp. 2d at 599*; *Patrick v. Dell Fin. Servs., 366 B.R. 378, 387 (M.D. Pa. 2007)*. Cases in which discovery has closed are generally inappropriate for interlocutory appeal because they are rapidly approaching conclusion under their own momentum. *Patrick, 366 B.R. at 387*; *FDIC v. Parkway Executive Office Ctr., No. Civ.A. 96-121, 1997 U.S. Dist. LEXIS 14939, 1997 WL 611674, at *3 (E.D. Pa. Sept. 24, 1997)*.

Certifying an interlocutory appeal could significantly advance the termination of the instant matter. Discovery on class and merits issues has not yet commenced [4] and will likely implicate reams of documents, weeks of depositions, and a battery of interrogatories and requests for admissions. [5] Expenses in the form of attorney **[*708]** time, document storage, and parties' involvement will likely mount as discovery progresses. The parties' proposed class certification schedules provide stark portraits of the time and expense associated with **[**38]** this process: Defendants allot 370 days for discovery. Plaintiffs request at least 500. [6] Appellate review of the motions to dismiss could eliminate the need for this period of prolonged and costly discovery. Alternatively, affirmance of the March 4 Memorandum would validate these significant expenditures. The court therefore concludes that the March 4 Memorandum satisfies the criteria for certification of an interlocutory appeal under *§ 1292(b)*.

B. Discretionary Certification

The***HN8***[] court possesses discretion to deny certification of an appeal **[**39]** even if the parties satisfy the statutory criteria of *§ 1292(b)*. *Bachowski v. Usery, 545 F.2d 363, 368 (3d Cir. 1976)*. "[A] district court should exercise this discretion and certify issues for interlocutory appeal only sparingly and in exceptional circumstances." *Sabree v. Williams, No. Civ.A. 06-2164, 2008 U.S. Dist. LEXIS 78255, 2008 WL 4534076, at *1 (D.N.J. Oct. 2, 2008)*; see also *Knipe, 583 F. Supp. 2d at 599*.

In the instant matter, the Twombly issues associated with the March 4 Memorandum will effectively pass beyond the reach of appellate review unless the court certifies an interlocutory appeal. These issues directly confront Twombly's effect on the law of pleading and its application to antitrust complaints subject to a *Rule 12(b)(6)* motion. Although the Third Circuit has applied Twombly outside of the antitrust context, see *Phillips, 515 F.3d at 234*, it has yet to consider Twombly's application to a § 1 claim based upon allegations of parallel conduct. Therefore, the court's certification will materially advance the instant matter and bring clarity to a still-developing area of law.

III. Conclusion

The court will certify for appeal Part III.B.1 of the March 4 Memorandum along with the question formulated **[**40]** in Part II.A.1 above. [7]

An appropriate order is attached.

/s/ Christopher C. Conner

CHRISTOPHER C. CONNER

United States District Judge

Dated: April 8, 2009

---

[4] The parties are currently engaged in a period of limited jurisdictional discovery to facilitate disposition of certain defendants' challenges to personal jurisdiction. See supra note 2; (Doc. 582 at 50-53).

[5] The parties dispute the need to separate discovery into class certification and merits phases. The identification of these two forms of discovery does not constitute the court's endorsement of a bifurcated discovery schedule. The court has separately identified these types of discovery to illustrate the incipient nature of this matter.

[6] The parties submitted proposed schedules for class certification discovery via facsimile on January 14, 2009.

[7] Defendant Cadbury Adams Canada has filed a motion for reconsideration (Doc. 590) of the March 4 Memorandum on Twombly grounds. The motion will be denied as moot pending the outcome of proceedings under *§ 1292(b)*. Cadbury Adams Canada will be permitted to reassert the motion in the event that the Third Circuit declines an appeal or that an appellate decision fails to resolve the issues raised therein.

ORDER

AND NOW, this 8th day of April, 2009, upon consideration of defendants' motion to certify an interlocutory appeal (Doc. 588), and of defendant Cadbury Adams Canada's motion for reconsideration (Doc. 590) of the memorandum and order of court (Doc. 582) dated March 4, 2009, and for the reasons set forth in the accompanying memorandum, it is hereby ORDERED that:

1. The motion to certify an interlocutory appeal (Doc. 588) is GRANTED. Part III.B.1 of the memorandum and order of court (Doc. 582) dated March 4, 2009 is CERTIFIED for interlocutory appeal pursuant to *28 U.S.C. § 1292(b)*. The following question is further CERTIFIED pursuant to **[**41]** *28 U.S.C. § 1292(b)*:

> Does Twombly, as a matter of law, authorize a court in a § 1 case to draw an inference of conspiracy from the collective effect of repeated **[*709]** parallel price increases, averments of anticompetitive activity in closely related foreign markets, transnational management of corporate subsidiaries, opportunity for collusion, and descriptions of anti-competitive conduct that are economically sensible in light of mature market characteristics?

2. The appellate certification granted in the preceding paragraph shall have no effect on the provisions of Case Management Order No. 9 (Doc. 583). Jurisdictional discovery shall continue during the pendency of any appeal accepted by the United States Court of Appeals for the Third Circuit.

3. The motion for reconsideration (Doc. 591) is DENIED as moot in light of the certification of an interlocutory appeal. Cadbury Adams Canada may reassert the motion in the event that the Third Circuit declines to accept an appeal or that an appellate decision fails to resolve the issues raised therein. Any renewed motion for reconsideration shall be filed within five days of the conclusion of appellate proceedings under *28 U.S.C. § 1292(b)*.

LexisNexis® Headnotes

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN1[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

Under the Federal Food, Drug and Cosmetic Act, drug manufacturers must receive Food and Drug Administration (FDA) approval before selling a new drug. A prospective manufacturer of a generic drug must demonstrate to the FDA that the generic version is the "bioequivalent" of the brand name drug before the generic version is approved for sale. In other words, the generic version must contain the same active ingredient(s), dosage form, route of administration, and strength. Once a generic drug enters the market, the price of the name-brand drug and the sales volume typically drop. While the approval of a generic version is pending, "citizens petitions" may be filed with the FDA to express legitimate concerns regarding a product and request that the FDA take, or refrain from taking, administrative action. Because citizens petitions can delay a generic drug's approval, they are often abused by pharmaceutical companies attempting to prolong their monopoly in the market.

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN2[] Justiciability, Standing

Under *Fed. R. Civ. P. 12(b)(1)*, a court must grant a motion to dismiss if it lacks subject matter jurisdiction to hear a claim. A motion to dismiss for want of standing is also properly brought pursuant to R. 12(b)(1), because standing is a jurisdictional matter.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] Motions to Dismiss, Failure to State Claim

Under *Fed. R. Civ. P. 12(b)(6)*, a court must grant a motion to dismiss if the plaintiff fails to state a claim upon which relief can be granted. In deciding a motion to dismiss pursuant to R. 12(b)(6), a court must accept, as true, the well-pleaded allegations of the complaint and draw all reasonable inferences in the plaintiff's favor. While a complaint attacked by a R. 12(b)(6) motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do.

Civil Procedure > Special Proceedings > Class Actions > Class Action Fairness Act

HN4[] Class Actions, Class Action Fairness Act

The Class Action Fairness Act of 2005 grants district courts original jurisdiction over any civil action in which the matter in controversy exceeds the sum or value of $ 5,000,000, exclusive of interests and costs, and is a class action in which any member of a class of plaintiffs is a citizen of a state different from any defendant. *28 U.S.C.S. § 1332(d)(2)*.

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN5[] Justiciability, Standing

Unless at least one named plaintiff can state a claim for relief under each count of a complaint, plaintiffs do not have standing to bring claims as part of a putative class action.

Constitutional Law > ... > Case or Controversy > Standing > Elements

Constitutional Law > The Judiciary > Case or Controversy > General Overview

HN6[] Standing, Elements

U.S. Const. art. III limits the power of federal courts to resolving cases or controversies. The case or controversy requirement is met when there is a substantial controversy between parties having adverse legal interests of sufficient immediacy and reality to warrant the issuance of a declaratory judgment. The doctrine of standing helps identify which disputes are justiciable under the case or controversy requirement. At a minimum, there are three elements needed to establish constitutional standing under *U.S. Const. art. III: 1*) injury-in-fact; 2) causation (or traceability); and 3) redressability.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

***HN7*[]** **Prerequisites for Class Action, Adequacy of Representation**

In some situations it is appropriate for a court to decide whether or not to certify a class before addressing U.S. Const. art. III standing. Class certification may be decided first if that issue is logically antecedent to U.S. Const. art. III concerns. It is unchallenged, however, that to be a class representative on a particular claim, a plaintiff himself must have a cause of action on that claim.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Class Members > Named Members

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

***HN8*[]** **Prerequisites for Class Action, Adequacy of Representation**

The claims of the representative party must be typical of the claims of the class. *Fed. R. Civ. P. 23(a)*. Adequacy of representation must be established before an action may proceed on behalf of a class. *Fed. R. Civ. P. 23(a)* Therefore there is no abuse of discretion in a district court's refusal to consider certification of a class before determining whether a named plaintiff, and a fortiori any putative class which the named plaintiff might properly seek to represent, has a federal cause of action.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Class Actions > Class Members > Named Members

***HN9*[]** **Class Actions, Certification of Classes**

Even if class certification is logically antecedent to analyzing the plaintiffs' standing to bring claims under the laws of states where the named plaintiffs have not suffered any injury, it is still appropriate to analyze whether a named plaintiff has a cause of action under each claim in a complaint before deciding whether to certify a class. At least one named plaintiff must have a cause of action on a claim for each claim to survive a motion to dismiss.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Constitutional Law > Supremacy Clause > Federal Preemption

Governments > Courts > Judicial Precedent

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN10[] **State Regulation, Claims**

In Illinois Brick Co. v. Illinois, the U.S. Supreme Court determined that indirect purchasers do not have standing to bring a cause of action under the federal antitrust statute. Illinois Brick, however, does not preempt state law, and states may provide antitrust remedies to indirect purchasers under their own law. Some states follow the logic of Illinois Brick and bar indirect purchasers from bringing antitrust claims. Cases from Texas, Colorado, Washington, Louisiana, Iowa, Kentucky, Connecticut, Arizona, Massachusetts, Florida, Oklahoma, and New Hampshire hold that indirect purchasers do not have standing to bring antitrust claims. Conversely, many states have authorized antitrust suits by indirect purchasers. Nineteen states, the District of Columbia, and Puerto Rico have statutes authorizing indirect purchasers to bring an antitrust suit. To further complicate the issue, some states that do not allow indirect purchasers to bring antitrust claims allow them to bring suit under state consumer protection laws or unfair trade practices statutes. State laws clearly conflict over whether indirect purchasers can bring antitrust claims.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN11[] **Federal & State Interrelationships, Choice of Law**

The U.S. Supreme Court has held that it is unconstitutional to apply one state's laws over a nationwide class action, even if a class is to be certified, if that state does not have significant contact or significant aggregation of contacts to the claims asserted by the class members.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN12[] **Motions to Dismiss, Failure to State Claim**

Generally, in ruling on a motion to dismiss, a district court relies on the complaint, attached exhibits, and matters of public record. The United States Court of Appeals for the Third Circuit has also held that in deciding a motion to dismiss, courts can consider documents integral to or explicitly relied upon in the complaint. A court may consider undisputable authentic documents on which the plaintiffs have based their complaint.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN13[] **Trade Practices & Unfair Competition, State Regulation**

The Tennessee Trade Practices Act, *Tenn. Code. Ann § 47-25-101 et seq.*, has a plurality requirement and does not cover unilateral monopolization claims.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN14[] **Motions to Dismiss, Failure to State Claim**

As a case comes to a court, for purposes of a dismissal motion, the court must assume that the plaintiff can prove the facts alleged in its complaint. It is not, however, proper to assume that the plaintiff can prove facts that it has not alleged or that the defendants have violated laws in ways that have not been alleged.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN15[] **State Regulation, Claims**

Where a complaint does not allege that the defendant acted in concert with any other party, plaintiffs fail to state a claim of monopolization against the defendant under the Tennessee Trade Practices Act, *Tenn. Code. Ann § 47-25-101 et seq.*

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN16[] **State Regulation, Claims**

An allegation that the anticompetitive conduct had a substantial effect on Tennessee commerce is required under the Tennessee Trade Practices Act, *Tenn. Code. Ann § 47-25-101 et seq.*

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN17[] **Trade Practices & Unfair Competition, State Regulation**

The Illinois Consumer Fraud and Deceptive Business Practices Act, *815 ILCS 505/1 et seq.*, prohibits unfair methods of competition and unfair or deceptive acts or practices, including, but not limited to, the use or employment of any deception, fraud, false pretense, false promise, misrepresentation or the concealment, suppression or omission of any material fact, with intent that others rely upon the concealment, suppression, or omission of such material fact, in the conduct of any trade or commerce, whether or not any person has in fact been misled, deceived or damaged thereby. *815 ILCS 505/2*.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN18[] **Regulated Practices, Price Fixing & Restraints of Trade**

Under Illinois law, classic antitrust claims, such as price-fixing allegations, cannot be brought under the Illinois Consumer Fraud and Deceptive Business Practices Act (ILCFA), *815 ILCS 505/1 et seq.* The ILCFA is limited to conduct that defrauds or deceives consumers or others, and to construe the ILCFA to give a cause of action for discriminatory pricing that the legislature has refused to give under the Illinois Antitrust Act would be incongruous. Allegations that defendants conspired to fix, maintain, or stabilize prices are classic examples of price-fixing and must be brought under the Antitrust Act, not the IlCFA.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN19[] **Regulated Practices, Price Fixing & Restraints of Trade**

Under Illinois law, indirect purchasers cannot bring a claim under the Illinois Antitrust Act. *740 ILCS 10/7(2)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Constitutional Law > Supremacy Clause > Federal Preemption

Governments > Courts > Judicial Precedent

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN20[] **State Regulation, Claims**

While Illinois Brick does not preempt state ***antitrust law***, some states, including Illinois, have followed the U.S. Supreme Court's lead in denying indirect purchasers standing to bring antitrust claims. Because indirect purchasers do not have standing to bring antitrust claims, these jurisdictions have further established that indirect purchasers cannot bring state consumer protection claims based on allegations of antitrust violations.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN21[] **Regulated Practices, Price Fixing & Restraints of Trade**

The prototypical example of antitrust injury is an allegation by consumers that they have to pay higher prices as a result of a defendant's anticompetitive conduct.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN22[] **Regulated Practices, Price Fixing & Restraints of Trade**

The Illinois Court of Appeals (pursuant to the Supreme Court of Illinois' holding in Laughlin) has held that claims that are covered by the Antitrust Act must be brought under the Antitrust Act and not the Illinois Consumer Fraud and Deceptive Business Practices Act, *815 ILCS 505/1 et seq.*

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN23[] **Motions to Dismiss, Failure to State Claim**

In a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss, a court can consider the complaint, attached exhibits, public records, and authentic documents relied on in the complaint.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN24[] **Motions to Dismiss, Failure to State Claim**

A district court ruling on a motion to dismiss is not permitted to go beyond the facts alleged in the complaint and the documents on which the claims made therein are based.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN25[] **Motions to Dismiss, Failure to State Claim**

There is no law stating that, in ruling on a *Fed. R. Civ. P. 12(b)(6)* motion, a district court can consider allegations only mentioned in a party's memorandum of law.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

HN26[] **Types of Contracts, Quasi Contracts**

States analyze unjust enrichment claims differently.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Civil Procedure > ... > Justiciability > Standing > Personal Stake

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN27[] **Standing, Injury in Fact**

Named plaintiffs cannot establish standing merely by relying on claims of putative class members and must establish their own standing to assert each claim. In order to have standing, the named plaintiffs must allege personal and particularized injury.

Opinion

[*411] **MEMORANDUM**

I. Introduction

On September 3, 2008, Plaintiffs A.F. of L.- A.G.C. Building Trades Welfare Plan ("AFL"), International Association of Bridge, Structural, Ornamental and Reinforcing Ironworkers Local No. 79 Health Fund ("IABORI"), IBEW-NECA Local 505 Health and Welfare Plan ("IBEW"), MC-UA Local 119 Health and Welfare Plan ("UA"), Painters District Council No. 30 Health & Welfare Fund ("Painters"), **[**3]** and Sheet Metal Workers Local 441 Health and Welfare Plan ("Sheet Metal"), collectively "Plaintiffs," filed an amended class action complaint against Defendant SmithKline Beecham Corporation, doing **[*412]** business as GlaxoSmithKline, Inc. ("GSK"). Plaintiffs are all indirect purchasers of the prescription drug Flonase (i.e. they did not purchase the drug for resale) who allege that GSK filed sham citizens petitions with the Food and Drug Administration ("FDA") in order to delay the entry of generic Flonase into the market. Plaintiffs bring three counts against GSK under numerous states' laws: 1) Monopolization, 2) Unfair and Deceptive Practices, and 3) Unjust Enrichment. On October 17, 2008, GSK filed a Motion to Dismiss the amended complaint. That motion will be granted without prejudice because none of the named Plaintiffs have stated a claim under the laws of the states in which they reside or do business.

II. Background [1]

HN1[] Under the Federal Food, Drug and Cosmetic **[**4]** Act ("FDCA"), drug manufacturers must receive FDA approval before selling a new drug. A prospective manufacturer of a generic drug must demonstrate to the FDA that the generic version is the "bioequivalent" of the brand name drug before the generic version is approved for sale. In other words, the generic version must contain the same active ingredient(s), dosage form, route of administration, and strength. Once a generic drug enters the market, the price of the name-brand drug and the sales volume typically drop. While the approval of a generic version is pending, "citizens petitions" may be filed with the FDA to express legitimate concerns regarding a product and request that the FDA take, or refrain from taking, administrative action. Because citizens petitions could delay a generic drug's approval, [2] they were often abused by pharmaceutical companies attempting to prolong their monopoly in the market. Plaintiffs contend that in 2004, as the end of GSK's exclusivity period for the drug Flonase approached, GSK filed four successive sham citizens petitions solely to delay generic approval of the drug and with no reasonable basis for objecting to the approval. Because of this unlawful **[**5]** behavior, Plaintiffs' ability to purchase lower-priced generic versions of Flonase was delayed and they were denied the benefits of unrestrained competition.

III. Standard of Review and Jurisdiction

HN2[] Under *Federal Rule of Civil Procedure 12(b)(1)*, a court must grant a motion to dismiss if it lacks subject matter jurisdiction to hear a claim. "A motion to dismiss for want of standing is also properly brought pursuant to *Rule 12(b)(1)*, because standing is a jurisdictional matter." *Ballentine v. U.S., 486 F.3d 806, 810, 48 V.I. 1059 (3d Cir. 2007)*. ***HN3***[] Under *Federal Rule of Civil Procedure 12(b)(6)*, a court must grant a motion to dismiss if the plaintiff fails "to state a claim upon which relief can be granted." In deciding a motion to dismiss pursuant to *Rule 12(b)(6)*, the court must accept as true the well-pleaded allegations of the complaint and draw all reasonable inferences in the plaintiff's favor. *Brown v. Card Serv. Ctr., 464 F.3d 450, 452 (3d Cir. 2006)*. **[**6]** "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more **[*413]** than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 1964-65, 167 L. Ed. 2d 929 (2007)* (internal quotations omitted). Jurisdiction over this action is proper under ***HN4***[] the Class Action Fairness Act of 2005, which grants district courts original jurisdiction over "any civil action in which the matter in controversy exceeds the sum or value of $ 5,000,000, exclusive of interests and costs, and is a class action in which … any member of a class of plaintiffs is a citizen of a State different from any defendant." *28 U.S.C. § 1332(d)(2)*); *Kaufman v. Allstate N.J. Ins. Co., Nos. 08-4911, 08-4912, 08-4913, 561 F.3d 144, 2009 U.S. App. LEXIS 6429, 2009 WL 779759 at *1 (3d Cir. March 26, 2009)*.

IV. Discussion

In the amended complaint, Plaintiffs assert that GSK's actions denied them (1) the benefits of free and unrestrained competition, and (2) the opportunity to purchase lower-priced generic versions of Flonase. GSK contends that because Plaintiffs do not assert **[**7]** in which state(s) they suffered injury they do not have standing to bring any state law claims, and even if the Court infers that named Plaintiffs have standing to assert claims under the laws of the states in which they reside or have a principal place of business, the entire complaint must be dismissed because the named Plaintiffs have failed to state claims under those laws. ***HN5***[] Unless at least one named Plaintiff can state a claim for relief under each count Plaintiffs do not have standing to bring claims as part of a putative class action. GSK further contends that even if the named Plaintiffs themselves have standing under the

[1] All facts were considered in the light most favorable to Plaintiffs, the non-moving parties. Additionally, all facts in this section were taken from Plaintiffs' opposition to defendant's motion to dismiss, unless stated otherwise.

[2] In 2007, after the citizens petitions in this case were filed, Congress passed a law that allows the FDA to dismiss citizens petitions summarily in order to prevent pharmaceutical companies from using this process to unlawfully extend their monopolies.

laws of states where they were injured, they do not have standing to assert claims on behalf of putative class members under the laws of states where no named Plaintiff was injured. Plaintiffs respond that the named Plaintiffs have stated claims under the laws of Tennessee, Illinois and Florida, states in which named Plaintiffs suffered injury. Furthermore, Plaintiffs assert that it would be "premature to rule on defendant's argument that named Plaintiffs cannot state antitrust claims in jurisdictions where they do not reside or do business" because class certification **[**8]** should be decided prior to analyzing standing. (Plaintiffs' Opposition to Motion to Dismiss, p. 10). Plaintiffs request that should the Court decide GSK's Motion is timely, that the Plaintiffs be allowed to amend their complaint or, alternatively, that the Court dismiss any claims for lack of standing without prejudice so that named Plaintiffs from additional states could join the case.

Article III of the Constitution ***HN6***[] limits the power of federal courts to resolving cases or controversies. The case or controversy requirement is met when "there is a substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment." Id. (citations omitted). The doctrine of standing helps identify which disputes are justiciable under the case or controversy requirement. At a minimum, there are three elements needed to establish constitutional standing under Article III: 1) injury-in-fact, 2) causation (or traceability), and 3) redressability. *Lujan v. Defenders of Wildlife, 504 U.S. 555, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*.

The Supreme Court has held that ***HN7***[] in some situations it is appropriate for a court to decide whether or not to certify a **[**9]** class before addressing Article III standing. See *Ortiz v. Fibreboard Corp., 527 U.S. 815, 831, 119 S. Ct. 2295, 144 L. Ed. 2d 715 (1999)* (holding that class certification may be decided first if that issue is "logically antecedent" to Article III concerns). **[*414]** It is unchallenged, however, that "to be a class representative on a particular claim, the plaintiff himself must have a cause of action on that claim." *Zimmerman v. HBO Affiliate Group, 834 F.2d 1163, 1169 (3d Cir. 1987)*. The Zimmerman court held that the district court did not err in dismissing plaintiff's claim for failure to state a claim before considering class certification, even though the plaintiff argued that other class members might be able to make the necessary allegations needed to state a claim:

> ***HN8***[] The claims of the representative party must be typical of the claims of the class. *Fed.R.Civ.P. 23(a)*. Adequacy of representation must be established before an action may proceed on behalf of a class. *Id*. Therefore we find no abuse of discretion in the district court's refusal to consider certification of a class before determining whether the named plaintiff, and *a fortiori* any putative class which the named plaintiff might properly seek to represent, had a **[**10]** federal cause of action.

Id.

HN9[] Even if class certification is "logically antecedent" to analyzing Plaintiffs' standing to bring claims under the laws of states where the named Plaintiffs did not suffer injury, it is still appropriate to analyze whether a named plaintiff has a cause of action under each claim before deciding whether to certify a class. It would not be premature, therefore, to first determine if Plaintiffs have stated a claim under the laws of jurisdictions where they reside or do business, because at least one named Plaintiff must have a cause of action on a claim for that claim to survive a motion to dismiss.

A. State Law Governing Plaintiffs' Claims

HN10[] In Illinois Brick Co. v. Illinois, the Supreme Court determined that indirect purchasers do not have standing to bring a cause of action under the federal antitrust statute. *431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Illinois Brick, however, does not preempt state law and states may provide antitrust remedies to indirect purchasers under their own law. *California v. ARC America Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*. Some states follow the logic of Illinois Brick and bar indirect purchasers from bringing antitrust claims. See William H. Page, The Limits Of State **[**11]** Indirect Purchaser Suits: Class Certification in the Shadow of Illinois Brick, 67 Antitrust L.J. 1, note 7 (1999) (citing cases from Texas, Colorado, Washington, Louisiana, Iowa, Kentucky, Connecticut, Arizona, Massachusetts, Florida, Oklahoma, and New Hampshire holding that indirect purchasers do not have standing to bring antitrust claims). Conversely, many states have authorized antitrust suits by indirect purchasers. See *Comes v. Microsoft Corp., 646 N.W.2d 440 (Iowa Dist. Ct. 2002)* (stating that nineteen states, the District of Columbia, and Puerto Rico have statutes authorizing indirect purchasers to bring an antitrust suit). To further complicate the issue, some states that do not allow indirect purchasers to bring antitrust claims allow them to bring suit under state consumer protection laws or unfair trade practices statutes. *Ciardi v. F. Hoffmann-La Roche, Ltd., 436 Mass. 53, 762 N.E.2d 303 (2002)*; *Minuteman, LLC v. Microsoft Corp., 147 N.H. 634, 795 A.2d 833 (N.H. 2002)*; *Mack v. Bristol-Myers Squibb Co.., 673 So. 2d 100 (Fla. App. 1996)*.

State laws clearly conflict over whether indirect purchasers can bring antitrust claims. Furthermore, ***HN11***[] the Supreme Court has held that it is unconstitutional to apply one **[**12]** state's laws over a nationwide class action, even if the class were to be certified, **[*415]** if that state does not have "significant contact or significant aggregation of contacts" to the claims asserted by the class members. *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 821, 105 S. Ct. 2965, 86 L. Ed. 2d 628 (1985)*. The Plaintiffs have alleged injury, but have not tied this injury to any particular state(s). At this stage, I will infer that each named Plaintiff can establish enough contacts in the state where they reside or have a principal place of business to allege injury under that state's law. In other words, I will infer that the named Plaintiffs have alleged particularized and personal injury under the laws of the states where they have a principal place of business.

There are six named Plaintiffs in this action. IBEW, AFL, UA, and Sheet Metal are welfare funds with principal places of business in Alabama. Painters is an employee welfare benefit plan located in Illinois. IABORI is a welfare fund administered in Tennessee. Plaintiffs contend that they have stated a claim on Count I (Monopolization under State Law) under Tennessee law and that they have stated a claim on Count II (Unfair and Deceptive Trade Practices **[**13]** Under State Law) under Illinois law and Florida law. Although Plaintiffs do not bring any claims under Alabama law, they contend in their Opposition to Defendant's Motion to Dismiss that the Plaintiffs who have principal places of business in Alabama traveled to Florida and made purchases there.

B. Count I: Monopolization Under State Law

i. Claims under Tennessee Law

The complaint alleges that GSK violated the Tennessee Trade Practices Act ("TTPA"), *Tenn. Code. Ann §§ 47-25-101, et seq*., with respect to purchases of Flonase in Tennessee. GSK responds that Plaintiffs have not stated a claim under Tennessee law because the TTPA only prohibits antitrust conspiracies and because Plaintiffs have not alleged any nexus between the alleged antitrust violation and intrastate commerce.

HN12[] "Generally, in ruling on a motion to dismiss, a district court relies on the complaint, attached exhibits, and matters of public record." *Sands v. McCormick, 502 F.3d 263, 268 (3d Cir. 2007)*. The Third Circuit has also held that in deciding a motion to dismiss courts can consider documents "integral to or explicitly relied upon in the complaint." *In re Burlington Coat Factory Securities Litigation, 114 F.3d 1410, 1426 (3d Cir. 1997)* **[**14]** (internal citations omitted); see *Pension Benefit Guar. Corp. v. White Consol. Indus., Inc., 998 F.2d 1192, 1196 (3d Cir. 1993)* (holding that a court may also consider undisputable authentic documents on which the plaintiffs have based their complaint).

Plaintiffs concede that ***HN13***[] the TTPA has a "plurality requirement" and does not cover unilateral monopolization claims. (Plaintiff's Opposition to Motion to Dismiss pp. 30-31). Plaintiffs allege that they satisfy this pleading requirement by listing numerous individuals possessing discoverable information in their initial disclosures under *Federal Rule of Civil Procedure 26* and because in GSK's Motion to Bifurcate Discovery GSK claimed that two law firms filed petitions on behalf of an "unidentified client." In essence, Plaintiffs claim, and ask the Court to infer from the above documents, that GSK conspired with one or more law firms in filing the alleged sham petitions. The Plaintiffs point to no allegations in the complaint, however, indicating that GSK acted in concert with any law firms or other parties. Even if this court could consider the Rule 26 disclosures in a Motion to Dismiss as authentic documents, these are not documents on **[**15]** **[*416]** which the Plaintiffs have based their complaint, nor does listing individuals with discoverable information indicate that GSK acted in concert with another party in an alleged monopoly. Nor can Plaintiffs rely on GSK's Motion to Bifurcate discovery to satisfy this pleading requirement under the TTPA. At this stage the Court will interpret all facts in Plaintiffs' favor, however, for this claim to survive a motion to dismiss, the Plaintiffs must at least include allegations in their complaint that, if true, would satisfy the elements of a cause of action under the TTPA. As the Supreme Court said, **HN14**[] "[a]s the case comes to us, we must assume that the [plaintiff] can prove the facts alleged in its amended complaint. It is not, however, proper to assume that the [plaintiff] can prove facts that it has not alleged or that the defendants have violated the antitrust laws in ways that have not been alleged." *Associated Gen. Contractors of Cal., Inc. v. Cal. State, 459 U.S. 519, 526, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. Because Plaintiffs' **HN15**[] complaint did not allege that GSK acted in concert with any other party, Plaintiffs have failed to state a claim of monopolization against GSK under the TTPA.

Even if Plaintiffs' complaint **[**16]** had **HN16**[] sufficiently alleged that GSK acted in concert with another party, they failed to allege that the anticompetitive conduct had a substantial effect on Tennessee commerce, as required under the TTPA. *Freeman Indus., LLC v. Eastman Chem. Co., 172 S.W.3d 512, 524 (Tenn. 2005)*. All claims against GSK under the TTPA are dismissed without prejudice to amend.

C. Count II: Unfair and Deceptive Trade Practices Under State Law

i. Claims under Illinois Law

Plaintiffs assert a claim under the Illinois Consumer Fraud and Deceptive Business Practices Act, *815 ILCS 505/1, et seq*. ("ILCFA"). Defendant responds that this claim is essentially an antitrust claim under the guise of a consumer protection claim, and that Illinois law bars indirect purchasers from bringing antitrust claims. Defendants further assert that Plaintiffs have not stated a claim under the ILCFA because they have not alleged deceptive practices, as required by the statute, nor have they alleged that the conduct occurred primarily and substantially in Illinois. **HN17**[] The ILCFA prohibits:

> [u]nfair methods of competition and unfair or deceptive acts or practices, including but not limited to the use or employment of any deception, fraud, **[**17]** false pretense, false promise, misrepresentation or the concealment, suppression or omission of any material fact, with intent that others rely upon the concealment, suppression or omission of such material fact … in the conduct of any trade or commerce … whether [or not] any person has in fact been misled, deceived or damaged thereby.

815 ILCS 505/2

HN18[] Under Illinois law, classic antitrust claims, such as price-fixing allegations, cannot be brought under the ILCFA. See *Laughlin v. Evanston Hosp., 133 Ill. 2d 374, 550 N.E. 2d 986, 140 Ill. Dec. 861 (Ill. 1990)* (holding that the Consumer Fraud Act is limited to conduct that defrauds or deceives consumers or others and that "[t]o construe the Consumer Fraud Act to give a cause of action for discriminatory pricing that the legislature refused to give under the Antitrust Act would be incongruous."); *Gaebler v. N.M. Potash Corp., 285 Ill. App. 3d 542, 676 N.E.2d 228, 221 Ill. Dec. 707 (Ill. App. Ct. 1997)* (holding that allegations that defendants conspired to 'fix,' 'maintain,' or 'stabilize' prices are classic examples of price-fixing and must be brought under the Antitrust Act and not the Consumer Fraud Act). Furthermore, **[*417]** **HN19**[] under Illinois law, indirect purchasers cannot bring a claim under the Antitrust Act. *Gaebler, 676 N.E.2d at 230* **[**18]** (citing *740 ILCS 10/7(2)*).

HN20[] While Illinois Brick does not preempt state ***antitrust law***, some states, including Illinois, have followed the Supreme Court's lead in denying indirect purchasers standing to bring antitrust claims. Because indirect purchasers do not have standing to bring antitrust claims, these jurisdictions have further established that indirect purchasers cannot bring state consumer-protection claims based on allegations of antitrust violations. For example, the Supreme Court of Ohio held that:

> The defendants' attempt to control the supply and to charge excessive prices for the prescription drugs is typical anticompetitive conduct, for which a remedy is provided in the antitrust statutes. . . . Thus, a complaint that alleges a violation of the Ohio Consumer Sales Practices Act predicated upon monopolistic pricing practices does not state a claim upon which relief can be granted because the Valentine Act, not the CSPA,

> provides the exclusive remedy for engaging in such conduct . . . . [A]n indirect purchaser of goods may not file a Valentine Act claim for violations of Ohio ***antitrust law***.

Johnson v. Microsoft Corp., 106 Ohio St. 3d 278, 2005 Ohio 4985, 834 N.E.2d 791, 801 (Ohio 2005); see also *Blewett v. Abbott Lab.., 86 Wn. App. 782, 938 P.2d 842, 846 (Wash. Ct. App. 1997)* **[**19]** (holding in a case alleging that drug manufacturers conspired to overcharge for drugs that indirect purchasers lack standing to sue under Washington state ***antitrust law*** and that an unfair trade practices claim is the "same claim with a different label."); *Vacco v. Microsoft Corp., 260 Conn. 59, 793 A.2d 1048 (Conn. 2002)* (holding that indirect purchasers lacked standing to sue under Connecticut ***antitrust law*** and could not recover under the Connecticut Unfair Trade Practices Act for the same anticompetitive conduct); *Abbott Lab. (Ross Lab. Div.) v. Segura 907 S.W.2d 503, 505-6 (Tex. 1995)* (holding that indirect purchaser intervenors could not seek damages under the Deceptive Trade Practices-Consumer Protection Act because "[a]llowing the intervenors to sue under the DTPA on allegations that are virtually identical to the antitrust allegations made by both the Texas Attorney General and the multi-district litigation plaintiffs in Florida would essentially permit an end run around the policies allowing only direct purchasers to recover under the Antitrust Act.). Even in Tennessee, where indirect purchasers are able to bring antitrust claims under the Tennessee Trade Practice Act, plaintiffs cannot bring claims **[**20]** based on anticompetitive conduct under the Tennessee Consumer Protection Act. *Sherwood v. Microsoft Corp., No. M2000-01850-COA-R9-CV 2003 Tenn. App LEXIS 539, at *110 (Tenn. Ct. App. July 31, 2003)* ("[a]ccordingly, we must presume that the legislature intended that antitrust actions, those involving harm to competition, continue to be brought under the existing antitrust statute, the TTPA [Tennessee Trade Practice Act]. Consequently, we conclude that claims based upon anticompetitive conduct are not cognizable under the TCPA [Tennessee Consumer Protection Act]. Plaintiffs' TCPA claims based on allegations of anticompetitive conduct must be dismissed.")

Plaintiffs acknowledge that GSK's alleged wrongdoing in this case was motivated by desire to preserve a monopoly and that the result of this alleged illegal behavior was higher prices for the indirect purchasers. Plaintiffs claim that GSK filed sham petitions to "unlawfully extend the company's monopoly," "den[y] plaintiffs the benefits of free and unrestrained **[*418]** competition," "den[y] plaintiffs the opportunity to purchase lower-priced . . . generic versions of Flonase, and thus force[] Plaintiff and members of the Class to pay supra-competitive **[**21]** prices for fluticasone propionate." Complaint PP 64-66. All of Plaintiffs claims allege anticompetitive, monopolistic behavior resulting in illegal overcharging for a drug. Plaintiffs themselves cite a case in which the court stated that ***HN21***[] "the prototypical example of antitrust injury is an allegation by consumers that they have had to pay higher prices . . . as a result of defendant's anticompetitive conduct." *Mathias v. Daily News, L.P., 152 F.Supp. 2d 465, 478 (S.D.N.Y. 2001)*. Plaintiffs contend that their claims are not inconsistent with the Illinois Antitrust Act (under which indirect purchasers do not have standing) because that Act also prohibits the monopolization alleged here. (Plaintiffs Opposition to Motion to Dismiss, p. 15). ***HN22***[] The Illinois Court of Appeals (pursuant to the Supreme Court of Illinois' holding in Laughlin) has held that claims that are covered by the Antitrust Act "must be brought under the Antitrust Act and not the Consumer Fraud [and Deceptive Business Practices] Act." *Gaebler, 676 N.E.2d at 230 (Ill. App. Ct. 1997)*. Plaintiffs do not state how their allegations are different from classic antitrust allegations that are covered by the Antitrust Act and cannot **[**22]** be brought under ILCFA, therefore, Plaintiffs' claim under the ILCFA is dismissed without prejudice to amend the complaint.

ii. Claims under Florida Law

Plaintiffs assert that the Alabama Plaintiffs' claims are not defeated simply because Plaintiffs do not allege any claims under Alabama law. The Alabama Plaintiffs are welfare funds with principal places of business in Alabama. Plaintiffs assert, however, that the Alabama Plaintiffs can bring claims under Florida's consumer protection statute because they "are journeymen who purchased Flonase in various states, including Florida." (Plaintiffs Opposition to Motion to Dismiss, p. 18). Plaintiffs concede that they cannot bring claims under Florida's antitrust statute (Plaintiffs Opposition to Motion to Dismiss, p. 20). Plaintiffs do not, however, point to any instance in the complaint where they stated, or inferred, that the Alabama Plaintiffs had purchased Flonase in Florida.

As cited above,***HN23***[] in a 12(b)(6) motion to dismiss, a court can consider the complaint, attached exhibits, public records and authentic documents relief on in the complaint. In Burlington Coat Factory, the Third Circuit said:

> As far as we can see, the only source of information **[**23]** before the district court that could have provided a basis for the conclusion it reached was defendants' brief in support of their motion to dismiss. Indeed, the district court's opinion specifically cites to an affidavit proffered by defendants on this point. [Citation omitted]. However, since the ***HN24***[] district court was ruling on a motion to dismiss, it was not permitted to go beyond the facts alleged in the Complaint and the documents on which the claims made therein were based.

114 F.3d at 1424-25.

Not only do the Plaintiffs cite no instance in their complaint in which they alleged that the Alabama Plaintiffs purchased Flonase in Florida, but they cite ***HN25***[] no law stating that this Court can consider allegations only mentioned in a party's memorandum of law. Because no named Plaintiff has alleged injury in Florida or sufficient contact with Florida, the named Plaintiffs have not stated a claim under Florida's consumer protection statute. The claim **[*419]** brought under Florida's consumer protection statute is dismissed without prejudice.

C. Count III: Unjust Enrichment

Plaintiffs contend that they are bringing an unjust enrichment claim under state common law, and because the elements of an unjust enrichment **[**24]** claim are materially the same nationwide, they do not need to specify under which states' laws they bring this claim. Defendants respond that the Court cannot proceed without knowing which states' laws to apply, and therefore should dismiss this claim. Because ***HN26***[] states analyze unjust enrichment claims differently [3], I will allow Plaintiffs to amend their complaint to state the laws under which they are bringing an unjust enrichment claim.

V. Conclusion

HN27[] Named Plaintiffs cannot establish standing merely by relying on claims of putative class members and must establish their own standing to assert each claim. *Zimmerman, 834 F.2d at 1169*. In order to have standing, the named Plaintiffs must allege personal and particularized injury. In the case at hand, I inferred that the named Plaintiffs **[**25]** alleged injury in the states where they reside or have a principal place of business. Because none of the named Plaintiffs in this action have sufficiently stated a claim under the laws of the states where they reside or do business, the entire complaint is dismissed without prejudice.

End of Document

[3] For example, the Supreme Court of Tennessee held that to maintain an unjust enrichment claim under Tennessee law, the plaintiffs must provide more than a bare assertion that attempting to exhaust their remedies against the party with whom they are in privity would be futile (in the case at hand this would be the direct purchasers). *Freeman Indus., LLC v. Eastman Chem. Co., 172 S.W.3d 512, 525-26 (Tenn. 2005)*.

Where a case arises from a district court's denial of a defendant's motion on the pleadings, under *Minn. R. Civ. P. 12.03*, the factual allegations in the complaint are accepted as true and an appellate court construes those allegations in the light most favorable to the appellants.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Energy & Utilities Law > ... > Rates > Ratemaking Factors > General Overview

HN5[] **Exemptions & Immunities, Filed Rate Doctrine**

The filed rate doctrine is grounded in justiciability and separation of powers concerns and non-discrimination principles. With regard to separation of powers and justiciability concerns, the doctrine recognizes that rate-setting is a legislative function and that courts are ill-suited to determine the reasonableness of rates established by the agency. As compared with the expertise of regulating agencies, courts do not approach the same level of institutional competence to ascertain reasonable rates. Regarding non-discrimination, the doctrine recognizes that a judicial damages award based on a speculative rate that might have been set absent the violation at issue in the case would create discrimination in the rate schedule by compensating some customers but not others. Because Congress delegated ratemaking authority to the Interstate Commerce Commission for the purpose of preventing discriminatory rate schedules, courts lack the power to order refunds to customers who allege that they have paid an unjust price for the services provided by the regulated entity.

Energy & Utilities Law > Utility Companies > General Overview

HN6[] **Energy & Utilities Law, Utility Companies**

The public regulation of utilities as an intricate, ongoing process subject to an ever-widening set of consequences and adjustments.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Energy & Utilities Law > ... > Rates > Ratemaking Factors > General Overview

HN7[] **Exemptions & Immunities, Filed Rate Doctrine**

In Chapter 216B the Minnesota Legislature vested extensive power in the Minnesota Public Utilities Commission (MPUC) to set and prospectively regulate rates for Minnesota's public utility companies. For example, the electrical utility regulatory scheme requires all public utilities to file schedules showing all rates, tolls, tariffs and charges, as well as all rules and contracts relating to rates and services, with the MPUC. *Minn. Stat. § 216B.05*. The MPUC further enjoys broad power to ascertain and fix just and reasonable policies for all public utilities. *Minn. Stat. § 216B.09, subds. 1*, *2* (2008). The MPUC actively regulates rate reasonableness, *Minn. Stat. § 216B.16* (2008), and may adjust rates according to its own investigations and judgment, *Minn. Stat. § 216B.23* (2008). Allowing courts to examine a utility rate structure that has been approved by the MPUC would infringe upon the authority delegated by the legislature to the MPUC, and would therefore run afoul of the filed rate doctrine.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN8[] **Exemptions & Immunities, Filed Rate Doctrine**

The filed rate doctrine applies to challenges that require courts to evaluate the reasonableness of an Minnesota Public Utilities Commission-approved tariff.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN9[] **Exemptions & Immunities, Filed Rate Doctrine**

A determination as to the manner in which the filed rate doctrine impacts upon plaintiff's complaint requires an examination of the asserted causes of action.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN10[] **Exemptions & Immunities, Filed Rate Doctrine**

At least in the absence of a legislative decision to vest exclusive jurisdiction in an agency, the filed rate doctrine does not bar a court from considering a request to enforce the clear terms of an agency-approved tariff. Judicial enforcement of the clear terms of a tariff cannot be said to infringe on discretionary authority vested in the agency or lead to discriminatory rate-making. The judiciary is simply asked to enforce the terms of a tariff as written, just as it would in an ordinary contract action.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN11[] **Exemptions & Immunities, Filed Rate Doctrine**

Claims that merely seek enforcement of an existing tariff do not question the reasonableness of rates charged under the tariff or require courts to determine the services to be provided by the regulated entity in exchange for those rates. Judicial enforcement of the clear terms of a tariff, therefore, cannot be said to infringe on discretionary authority vested in the agency or lead to discriminatory rate-making. The judiciary is simply asked to enforce the terms of a tariff as written, just as it would in an ordinary contract action.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN12[] **Exemptions & Immunities, Filed Rate Doctrine**

Claims that seek to expand services beyond what is provided for in the tariff indirectly challenge the reasonableness of the filed rates, and the filed rate doctrine bars the judiciary from considering such claims. The filed rate doctrine barred a state law breach of contract claim because the relief sought in the plaintiff's state-law claims would conflict with the provisions of the filed tariff. Rates do not exist in isolation. They have meaning only when one knows the services to which they are attached. Any claim for excessive rates can be couched as a claim for inadequate services and vice versa. Claims based in breach of contract for a regulated entity's misrepresentation of the services promised in exchange for payment of the filed rate cannot be enforced through the courts. If the services requested in the litigation are not part of the original tariff obligations, the courts cannot, consistent with the filed rate doctrine, require performance of those services.

Civil Procedure > Judgments > Pretrial Judgments > Judgment on Pleadings

HN13[] **Pretrial Judgments, Judgment on Pleadings**

When reviewing a *Minn. R. Civ. P. 12.03* motion for judgment on the pleadings, an appellate court accepts the factual allegations in the pleading under attack as true and the appellate court liberally construes the complaint and draws all inferences and assumptions in favor of the nonmoving party. A motion for judgment on the pleadings will not be sustained if by a liberal construction the pleading can be held sufficient.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN14[] **Exemptions & Immunities, Filed Rate Doctrine**

If a complainant has paid a filed tariff rate, courts do not have power to order a refund of any portion of that rate. Such an attempt to measure damages with reference to the filed rate would interfere with the schedule of rates approved by the agency and would constitute a retroactive rate adjustment contrary to the separation of powers principles that underlie the filed rate doctrine. In addition, judicial interference with approved rates would create a discriminatory rate schedule among customers, with customers who receive damages effectively paying less than those who do not. For both of these reasons, courts have recognized that the filed rate doctrine bars claims for money damages to remedy breach of a provision in an agency-approved tariff.

Energy & Utilities Law > ... > Rates > Ratemaking Factors > General Overview

HN15[] **Rates, Ratemaking Factors**

The rate-setting process is an intricate proceeding by which the agency takes into account many aspects of cost and capital. The costs incurred by a utility to render its services necessarily are accounted for when the agency engages in the procedure to set the rate. *Minn. Stat. § 216B.16, subd. 6* (2008) explains that the commission considers the consumer's need and cost for providing adequate, efficient, and reasonable services when exercising authority to set just and reasonable rates. The judiciary is not competent to engage in rate analysis, nor, consistent with separation of powers principles, should the courts encroach on this legislative function.

Energy & Utilities Law > Utility Companies > Rates > General Overview

HN16[] **Exemptions & Immunities, Filed Rate Doctrine**

The filed rate doctrine is designed to protect against such discrimination between ratepayers.

Civil Procedure > Appeals > Appellate Jurisdiction > Certified Questions

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN17[] **Appellate Jurisdiction, Certified Questions**

Where a jurisdictional question comes to an appellate court within the context of a certified question, the appellate court reviews the application of the primary jurisdiction doctrine using a de novo standard.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

HN18[] **Reviewability, Jurisdiction & Venue**

The primary jurisdiction doctrine is a judicially-created doctrine that is concerned with the orderly and sensible coordination of the work of agencies and courts. The doctrine seeks to strike a proper relationship between courts and agencies, especially if an issue before the court requires the particular competence and expertise of the agency. The primary jurisdiction doctrine promotes regulatory uniformity.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN19[] **Exemptions & Immunities, Filed Rate Doctrine**

Courts recognize several factors in assessing whether to apply the filed rate doctrine. The Supreme Court of Minnesota has acknowledged at least two factors: (1) whether the legislature explicitly granted the agency exclusive jurisdiction; and (2) whether the issues raised are inherently judicial.

Syllabus

1. The filed rate doctrine applies to private claims challenging the reasonableness of a rate established for an electrical utility under the administration of the Minnesota Public Utilities Commission.

2. The filed rate doctrine bars appellants' breach of contract claim for compensatory damages, but it does not bar appellants' claim for injunctive relief.

3. The district court should have referred resolution of appellants' claim for injunctive relief to the Minnesota Public Utilities Commission under the primary jurisdiction doctrine.

4. The district court's jurisdiction over claims by North Dakota and South Dakota residents was not properly before the court of appeals.

Counsel: Vincent J. Esades, Lori A. Johnson, Scott W. Carlson, Heins Mills & Olson, P.L.C., Minneapolis, Minnesota; and C. Andrews Waters, Charles S. Siegel, Waters & Kraus, LLP, Dallas, Texas; and Mark R. Stanley, Roger L. Mandel, Martin Woodward, Stanley, Mandel & Iola, L.L.P., Dallas, Texas; and Jay E. Stuemke, Simon Eddins & Greenstone LLP, Dallas, Texas, for appellants.

Timothy Thornton, Kevin M. Decker, Jonathan P. Schmidt, Briggs and Morgan, P.A., Minneapolis, **[**2]** Minnesota, for respondent.

Lori Swanson, Attorney General, Karen D. Olson, Ronald M. Giteck, William T. Stamets, Assistant Attorneys General, St. Paul, Minnesota, for amicus curiae Office of the Minnesota Attorney General--Residential and Small Business Utilities Division.

Lori Swanson, Attorney General, Alison C. Archer, Assistant Attorney General, St. Paul, Minnesota, for amicus curiae Minnesota Public Utilities Commission.

David M. Cialkowski, Zimmerman Reed P.L.L.P., Minneapolis, Minnesota; and Hart L. Rabinovitch, Zimmerman Reed P.L.L.P., Scottsdale, Arizona; and Stephen Gardner, National Consumer Law Center, Dallas, Texas, for amicus curiae National Association of Consumer Advocates.

Opinion by: GILDEA

Opinion

[*38] GILDEA, Justice.

Respondent Northern States Power Company ("NSP") supplies appellants Irene and David Hoffman (Minnesota), Jerry Ustanko (North Dakota), and Mulugeta Endayehu (South Dakota) with electrical power. [1] Appellants initiated a breach of contract action against NSP alleging that NSP failed to inspect and maintain the point of connection between NSP's service facilities and each customer's electrical equipment. Appellants argued **[**3]** that the filed tariff required the inspection and maintenance. Appellants demanded relief in the form of compensatory damages and either specific performance or an injunction to require NSP to perform what they alleged to be its tariff obligations. The district court denied NSP's motion for judgment on the pleadings and certified two questions to the court of appeals regarding whether the filed rate doctrine or the primary jurisdiction doctrine precluded the district court from adjudicating the action. The court of appeals held that the filed rate doctrine barred all of appellants' claims, *Hoffman v. N. States Power Co., 743 N.W.2d 751, 756 (Minn. App. 2008)*, and we **[*39]** granted appellants' petition for further review.

We conclude that the filed rate doctrine applies to claims challenging the reasonableness of a rate the Minnesota Public Utilities Commission ("MPUC") has established for an electrical utility, and that the doctrine does not bar the claim for injunctive relief, but it does bar appellants' claim for compensatory **[**4]** damages. We further conclude that under the doctrine of primary jurisdiction, the district court should have referred appellants' claim for injunctive relief to the MPUC. Finally, we reverse the court of appeals' dismissal of claims brought by non-Minnesota residents and remand those claims for proceedings consistent with this opinion.

---

[1] The appellants seek to represent a class of plaintiffs. No action has been taken on class certification, and this appeal does not involve any class certification issues.

According to the complaint, NSP's wires connect to each customer's wires within a meter box, usually attached to the side of the customer's home. NSP sets up the meter box by attaching the utility's wires to grooved channels with brass lugs, which allows electricity to flow through the meter to the customer's wires. NSP then seals or locks the meter box, preventing customers from gaining access to its contents. The complaint alleges that the brass lugs within the box loosen and may corrode over time. These changes, according to the complaint, increase the electrical resistance at the connection site, generate heat, and create a fire hazard. Appellants contend that inspections, along with cleaning and tightening the connection sites as needed, would prevent the dangerous condition. The complaint does not allege that any of customers in the proposed class **[**5]** have been the victim of any particular fire. Nor does the complaint allege that any NSP customer has engaged a third party to perform the inspection and maintenance services.

HN1[] The services that NSP is obligated to perform for Minnesota customers are set forth under the tariff that NSP files with the MPUC. [2] As a public utility, NSP is a regulated monopoly under Minn. Stat. ch. 216B (2008). Thus, NSP files its tariffs with regulatory agencies in each state in which it operates, and the tariffs govern the terms of the legal relationship between NSP and its customers. *See, e.g., Minn. Stat. § 216B.05* (2008).

The complaint alleges that two separate provisions of the NSP tariff require NSP to inspect and maintain "the point of connection" between the company's wires and the customer's wires. The complaint first points to the tariff section titled "Service **[*40]** Connections," which provides for maintenance of NSP's equipment:

> The customer, without expense to the Company, will grant the Company right-of-way on his premises for **[**7]** the installation and maintenance of the necessary distribution lines, service conductors, and appurtenances, and will provide and maintain on the premises, at a location satisfactory to the company, proper space for the Company's transformers, metering equipment, and appurtenances.
> The service conductors as installed by the company from the distribution line to the point of connection with the customer's service entrance conductors will be the Company's property and will be maintained by the Company at its own expense.
> The customer will provide for the safekeeping of the Company's meters and other facilities and reimburse the Company for the cost of any alterations to the Company's lines, meters, or other facilities necessitated by customer and for any loss or damage to the Company's property located on the premises. The exception is when such loss or damage is occasioned by the Company's negligence or causes beyond control of the customer.

Northern States Power Company Tariff, General Rules and Regulations § 5.5 (1998) [NSP Tariff].

---

[2] The Minnesota Legislature has provided that all public utility schedules, rules, and service agreements will be filed with the MPUC:

> ***HN2***[] Subdivision 1. **Public rate filing.** Every public utility shall file with the commission schedules showing all rates, tolls, tariffs, and charges which it has established and which are in force at the time for any service performed by it within the state, or for any service in connection therewith or performed by any public utility controlled or operated by it.
>
> Subd. 2. **Schedule and rules filing.** Every public utility shall file with and as a part of the filings **[**6]** under subdivision 1, all rules that, in the judgment of the commission, in any manner affect the service or product, or the rates charged or to be charged for any service or product, as well as any contracts, agreements, or arrangements relating to the service or product or the rates to be charged for any service or product to which the schedule is applicable as the commission may by general or special order direct; provided that contracts and agreements for electric service must be filed as required by subdivision 2a.
>
> Subd. 2a. **Electric service contract.** A contract for electric service entered into between a public utility and one of its customers, . . . must be filed for approval by the commission pursuant to the commission's rules of practice.

Minn. Stat. § 216B.05 (2008).

The complaint further points to the tariff provision governing the "Customer's Wiring, Equipment, and Property." This provision makes the customer responsible **[**8]** for maintaining certain pieces of equipment but exempts the customer from responsibility for maintaining "metering equipment":

> All wiring and equipment on customer's side of the point of connection, except metering equipment, will be furnished, installed, and maintained at the customer's expense in a manner approved by the public authorities having jurisdiction over the same.
> Customer will protect all electrical equipment and systems with devices that conform to the industry accepted standard for the various classes of electrical equipment and systems to prevent fire or damage to equipment from electrical disturbances or fault occurring in the customer's system or in the supplying system. The "industry accepted standard" will be as required in the National Electric Code and such additional devices as are prescribed by any public authority with jurisdiction over the installation of all electrical facilities.
>
> Any inspection of a customer's wiring and equipment by the Company is for the purpose of avoiding unnecessary interruptions of service to its customers or damage to its property and for no other purpose, and will not be construed to impose any liability upon the Company to a customer **[**9]** or any other person by reason thereof. In addition, the Company will not be liable or responsible for any loss, injury, or damage that may result from the use of or defects in a customer's wiring or equipment.
>
> The Company may, however, at any time require a customer to make such changes in his electrical or nonelectrical property or use thereof as may be necessary to eliminate any hazardous condition or any adverse effect which the operation of the customer's property or equipment may have on said customer, other customers of the Company, the public, or the Company's employees, equipment or service. In lieu of changes by the customer, the Company may require reimbursement from the customer for the cost incurred by the Company in alleviating an adverse effect **[*41]** on the Company's facilities caused by the customer's property.
> The transformers, service conductors, meters, and appurtenances used in furnishing electric service to a customer have a definite capacity. Therefore, no material increase in load or equipment will be made without first making arrangements with the Company for the additional electrical supply.

Id. § 4.2.

Based on these tariff provisions, the complaint alleges a general **[**10]** obligation for NSP to inspect and maintain "points of connection." The tariff does not otherwise define a point of connection, but the complaint provides a varied list of equipment that might comprise the components of a point of connection. Specifically, the complaint states that NSP is to inspect and maintain: "its electrical wiring and equipment up through and including the connection between its wires and the customer's wires located within the meter box"; "its service facilities"; "the actual point of connection of its facilities to customers' equipment"; and "the connections which comprise the point of connection between its and its customers' service conductors." Appellants allege that NSP is in material breach of its inspection and maintenance obligations, and that the breach caused them damages in the amount of the fair market value for services not received over a six-year period. Because the tariff remains in effect, the complaint also demands specific performance and injunctive relief to cause NSP to comply with the tariff.

NSP moved the district court for judgment on the pleadings under *Minn. R. Civ. P. 12.03*. NSP argued that the filed rate doctrine bars appellants' claims, **[**11]** or, in the alternative, that the claims should be referred to the MPUC under the primary jurisdiction doctrine. NSP additionally argued that Minnesota courts lack jurisdiction over the out-of-state claimants and that the tariff does not mandate the services that appellants allege NSP must perform under the tariff. The district court denied the motion, holding that: (1) the filed rate doctrine does not bar appellants' claims, (2) the primary jurisdiction doctrine did not require the court to refer appellants' claims to the responsible agency, and (3) the language of the tariff is ambiguous and does not clearly support NSP's interpretation that appellants sought to impose additional inspection and maintenance obligations beyond those set forth in the tariff.

NSP then moved the district court under *Minn. R. Gen. Pract. 115.04* and *Minn. R. Civ. App. P. 103.03(i)* to certify three issues for immediate appellate review. The district court certified two questions to the court of appeals: (1) "Does the filed rate doctrine bar [appellants'] claims?" and (2) "Does the primary jurisdiction doctrine require the court to [refer] resolution of the services required by the applicable tariffs to the **[**12]** responsible administrative agency?" [3] Concluding that the filed rate doctrine bars all of the claims, the court of appeals reversed the district court. *Hoffman, 743 N.W.2d at 757*. Because of its ruling on the filed rate doctrine, the court of appeals did not reach the primary jurisdiction issue. *Id. at 752*. The court also separately dismissed claims against NSP presented by North Dakota and South Dakota residents. *Id.* We granted appellants' petition to review the questions certified to the court of appeals.

[*42] This case comes to us within the context of the two questions the district court certified. ***HN3***[] On petition for review, the question originally certified is a question of law that we review de novo. *Watson by Hanson v. Metropolitan Transit Comm'n, 553 N.W.2d 406, 411 (Minn. 1996)*. In addition, ***HN4***[] because the case arises from the district court's denial of NSP's motion on the pleadings, the factual allegations in the complaint are accepted as true and we construe those allegations in the light most favorable to appellants. *Stephenson v. Plastics Corp. of Am., 276 Minn. 400, 150 N.W.2d 668 (1976)*. **[**13]** As noted above, NSP moved for judgment on the pleadings on the basis of both the filed rate doctrine and the primary jurisdiction doctrine. We examine each doctrine in turn.

I.

We consider first the filed rate doctrine. The United States Supreme Court provided one of the earliest articulations of the filed rate doctrine in *Keogh v. Chicago & N. W. Ry. Co., 260 U.S. 156, 43 S. Ct. 47, 67 L. Ed. 183 (1922)*. The *Keogh* Court determined that the federal courts did not have jurisdiction to adjudicate an antitrust claim brought by a manufacturer against several carriers whose shipping rates were set and regulated by the Interstate Commerce Commission. *Id. at 159-60*. Jurisdiction did not exist in the federal court on an otherwise cognizable antitrust claim in that case because an award of damages would have caused the court to interfere with the Commission's rate-making function. *Id. at 162*.

Courts have recognized that ***HN5***[] the filed rate doctrine as applied in *Keogh* is grounded in justiciability and separation of powers concerns and non-discrimination principles. *Schermer v. State Farm Fire & Cas. Co., 721 N.W.2d 307, 312-313 (Minn. 2006)* (discussing rationale for doctrine as reflected in several cases). With regard to separation **[**14]** of powers and justiciability concerns, the doctrine recognizes that rate-setting is a legislative function and that courts are "ill-suited" to determine the reasonableness of rates established by the agency. *Id. at 312*; *see also* *Wegoland Ltd. v. Nynex Corp., 27 F.3d 17, 21 (2d Cir. 1994)* ("As compared with the expertise of regulating agencies, courts do not approach the same level of institutional competence to ascertain reasonable rates."). Regarding non-discrimination, the doctrine recognizes that a judicial damages award based on a speculative rate that might have been set absent the violation at issue in the case would create discrimination in the rate schedule by compensating some customers but not others. *Schermer, 721 N.W.2d at 311*; *see also* *Keogh, 260 U.S. at 163-64* (finding that because Congress delegated ratemaking authority to the Interstate Commerce Commission for the purpose of preventing discriminatory rate schedules, courts lack the power to order refunds to customers who allege that they have paid an unjust price for the services provided by the regulated entity).

We first expressly recognized the filed rate doctrine in *Schermer, 721 N.W.2d at 317*. We held in *Schermer* **[**15]** that "the filed rate doctrine applie[d] generally to rates filed with and approved by" the Minnesota Department of Commerce (DOC) and therefore barred a class action brought against an insurance company to recover a surcharge on homeowner's insurance rates. *Id.* The insurance company based the surcharge on the age of the insured dwellings' electrical systems. *Id. at 310*. Customers complained that the surcharge created a discriminatory rate schedule based on race, in violation of a Minnesota statute prohibiting unfair discrimination for insurance rates. *Id. at 309-10*. **[*43]** We pointed to the special expertise of agencies--their investigative capacities and experience with the insurance industry--to support the conclusion that "courts are ill-suited to second-guess" agency decisions regarding rate reasonableness. *Id. at 312*. We also acknowledged that the non-discrimination principle of the filed rate doctrine precluded relief for the *Schermer* plaintiffs because courts do not have power to retroactively reallocate rates. *Id. at 315* ("Even though the amount of the surcharges actually paid by class members can be calculated, an award of that amount as damages would require the court to speculate **[**16]** about whether the

[3] The district court declined to certify the third issue regarding whether the tariff is ambiguous.

DOC would have approved this lower, nonsurcharge rate as the reasonable and lawful rate."). Ultimately, we denied relief to the *Schermer* plaintiffs based on the comprehensive powers delegated from the legislature to the DOC to determine the reasonableness of insurance rates. *Id. at 317*.

Our analysis of the filed rate doctrine in *Schermer* applies with equal force to private claims challenging the reasonableness of a rate established for an electrical utility under the administration of the MPUC. We have described **HN6**[] the public regulation of utilities as "an intricate, ongoing process" subject to "an ever-widening set of consequences and adjustments." *Peoples Natural Gas Co. v. Minn. P.U.C., 369 N.W.2d 530, 535 (Minn. 1985)*. In *Schermer,* we concluded that the filed rate doctrine applies to the insurance industry even though "the insurance regulatory scheme is less stringent than, for example, the scheme for electrical, gas, and telephone utilities." *Schermer, 721 N.W.2d at 318*.

The legislature's broad grant of authority to the MPUC confirms what we implied in *Schermer* about the nature of the regulatory scheme for electrical utilities. **HN7**[] In Chapter 216B the Minnesota Legislature **[**17]** vested extensive power in the MPUC to set and prospectively regulate rates for Minnesota's public utility companies. For example, the electrical utility regulatory scheme requires all public utilities to file "schedules showing all rates, tolls, tariffs and charges," as well as all rules and contracts relating to rates and services, with the MPUC. *Minn. Stat. § 216B.05*. The MPUC further enjoys broad power to "ascertain and fix just and reasonable" policies for all public utilities. *Minn. Stat. § 216B.09, subds. 1* & *2* (2008). The MPUC actively regulates rate reasonableness, *Minn. Stat. § 216B.16* (2008), and may adjust rates according to its own investigations and judgment, *Minn. Stat. § 216B.23* (2008). Allowing courts to examine a utility rate structure that has been approved by the MPUC would infringe upon the authority delegated by the legislature to the MPUC, and would therefore run afoul of the filed rate doctrine.

Our decision that **HN8**[] the filed rate doctrine applies to challenges that require courts to evaluate the reasonableness of an MPUC-approved tariff does not answer the question, however, of whether the doctrine operates to bar the claims appellants bring in this case. In order **[**18]** to make that determination, we must examine the nature of appellants' claims. *See Richardson v. Standard Guar. Ins. Co., 371 N.J. Super. 449, 853 A.2d 955, 965 (N.J. Super. Ct. App. Div. 2004)* (noting that **HN9**[] "a determination as to the manner in which the filed rate doctrine impacts upon plaintiff's complaint requires an examination of the asserted causes of action"). For NSP's alleged breach of contract, the complaint seeks both injunctive relief (count II) and compensatory damages (count I). We turn next to an examination of whether the filed rate doctrine bars either or both of these claims.

A.

We look first at appellants' request for **[*44]** injunctive relief. [4] Appellants argue that they are not questioning the reasonableness of the filed rate; they are simply asking the court to enforce the clear terms of the tariff. NSP, in essence, argues that the filed rate doctrine bars even judicial enforcement of clear tariff language. NSP also argues that even if the court could, consistent with the filed rate doctrine, enforce clear language in the tariff, appellants' claim would still be barred because appellants are not seeking to enforce terms in the tariff, but are seeking to add terms to the tariff.

We agree with appellants that, **HN10**[] at least in the absence of a legislative decision to vest exclusive jurisdiction in the agency, the filed rate doctrine does not bar a court from considering a request to enforce the clear terms of an agency-approved tariff. [5] *See Brown v. MCI Worldcom Network Servs., Inc., 277 F.3d 1166, 1171-72 (9th Cir. 2002)* (holding that the filed rate doctrine did not bar a class action suit against a telephone company for a faulty system of account-number assignments that resulted in charging customers for more accounts than actual

---

[4] Our discussion **[**19]** of appellants' claim for injunctive relief applies equally to the claim for specific performance of tariff obligations.

[5] Where the legislature provides for exclusive agency jurisdiction, the separation of powers principles that underlie the filed rate doctrine may bar the judiciary from acting. But we need not resolve that question in this case because, as discussed below, the legislature did not provide for exclusive jurisdiction in the MPUC.

phone lines because enforcement of the per-phone-line charge did not challenge the rate per phone line directly or indirectly); *Lipton v. MCI Worldcom, Inc., 135 F. Supp. 2d 182, 189 (D.D.C. 2001)* (holding that the filed rate doctrine did not bar the plaintiff's challenge to the telephone company's compliance with a tariff because the plaintiff did not seek to "alter the terms and conditions" or enforce an agreement separate from the tariff); *see also Richardson, 853 A.2d at 967* (holding that the filed rate doctrine **[**20]** did not bar a claim "that the insurer breached the policy as written"). The judiciary may act in such a case because ***HN11***[] claims that merely seek enforcement of an existing tariff do not question the reasonableness of rates charged under the tariff or require courts to determine the services to be provided by the regulated entity in exchange for those rates. Judicial enforcement of the clear terms of a tariff, therefore, cannot be said to infringe on discretionary authority vested in the agency or lead to discriminatory rate-making. The judiciary is simply asked to enforce the terms of a tariff as written, just as it would in an ordinary contract action. *See Penn Cent. Co. v. General Mills, Inc., 439 F.2d 1338, 1340 (8th Cir. 1971)* (applying principles of contract construction to tariff).

HN12[] Claims that seek to expand services beyond what is provided for in the tariff, **[**21]** on the other hand, indirectly challenge the reasonableness of the filed rates, and the filed rate doctrine bars the judiciary from considering such claims. *See, e.g., ICOM Holding, Inc. v. MCI Worldcom, Inc., 238 F.3d 219, 222-23 (2d Cir. 2001)* (holding that the filed rate doctrine barred a state law breach of contract claim because "the relief sought in the plaintiff's state-law claims would conflict with the provisions of the filed tariff"). The United States Supreme Court has noted that "[r]ates . . . do not exist in isolation. They have meaning only when one knows the services to which they are attached. Any claim for excessive rates can be couched as a claim for inadequate services and vice versa." *Am. Tel. & Tel. Co. v. Cent. Off.* ***[*45]*** *Tel., 524 U.S. 214, 223, 118 S. Ct. 1956, 141 L. Ed. 2d 222 (1998)* (holding that claims based in breach of contract for a regulated entity's misrepresentation of the services promised in exchange for payment of the filed rate cannot be enforced through the courts). If the services requested in the litigation are not part of the original tariff obligations, the courts cannot, consistent with the filed rate doctrine, require performance of those services.

Whether the filed rate doctrine **[**22]** bars appellants' claim for injunctive relief therefore depends on whether appellants seek to enforce the language of the tariff, as appellants contend, or whether they seek to add to the terms of the tariff, as NSP contends. The procedural posture of this case requires that we construe the complaint in favor of appellants and leads us to conclude that the filed rate doctrine does not bar appellants' claim for injunctive relief.

NSP moved the district court to enter judgment on the pleadings under *Minn. R. Civ. P. 12.03*, asserting that the plaintiffs' complaint failed to state a claim upon which relief can be granted. ***HN13***[] When reviewing a *Rule 12.03* motion for judgment on the pleadings, we accept the factual allegations in the pleading under attack (here, the complaint) as true and we liberally construe the complaint and draw all inferences and assumptions in favor of the nonmoving party (appellants). *Lorix v. Crompton Corp., 736 N.W.2d 619, 623 (Minn. 2007)*; *see also State ex rel. City of Minneapolis, 238 Minn. 218, 223, 56 N.W.2d 564, 567 (1953)*; *Gostomezik v. Gostomezik, 191 Minn. 119, 120, 253 N.W. 376, 377 (1934)* (noting that a motion for judgment on the pleadings "will not be sustained **[**23]** if by a liberal construction the pleading can be held sufficient").

We have examined the tariff sections at issue in the complaint. These sections, especially when construed in the light most favorable to appellants, establish that NSP must maintain certain equipment. For example, the tariff requires that customers give NSP access to their premises "for the installation and *maintenance* of the necessary distribution lines, service conductors, and appurtenances." NSP Tariff § 5.5 (emphasis added). In addition, the service conductors that NSP installs, being the company's property that runs "from the distribution line to the point of connection with the customer's service entrance conductors . . . *will be maintained* by [NSP] at its own expense." *Id.* (emphasis added). Finally, the tariff provides under section 4.2, "[a]ll wiring and equipment on customer's side of the point of connection, *except metering equipment,* will be furnished, installed, and *maintained* at the customer's expense." NSP Tariff § 4.2 (emphasis added).

Appellants allege that NSP has breached its maintenance obligation. We cannot completely define the scope of NSP's maintenance obligation at this early stage of the litigation. **[**24]** But, as set forth above, when the tariff is construed in the light most favorable to appellants, NSP bears a duty to maintain some "metering equipment," and "service conductors," as well as "distribution lines" and components constituting "appurtenances." Construing the complaint liberally and making assumptions in favor of appellants' contentions, that equipment may include components found at points of connection. Given that the tariff requires that NSP maintain some equipment, we cannot conclude that there is no set of facts under which appellants could prevail on their claim that they are simply seeking to enforce the tariff as approved by MPUC. We therefore hold that the filed rate doctrine does not bar **[*46]** the district court from proceeding with appellants' claim for injunctive relief. [6]

B.

We turn next to consider appellants' claim for compensatory damages. ***HN14***[] If a complainant has paid the filed tariff rate, courts do not have power to order a refund of any portion of that rate. *Keogh, 260 U.S. at 163*. Such **[**27]** an attempt to measure damages with reference to the filed rate would interfere with the schedule of rates approved by the agency and would constitute a retroactive rate adjustment contrary to the separation of powers principles that underlie the filed rate doctrine. In addition, judicial interference with approved rates would create a discriminatory rate schedule among customers, with customers who receive damages effectively paying less than those who do not. For both of these reasons, courts have recognized that the filed rate doctrine bars claims for money damages to remedy breach of a provision in an agency-approved tariff. *Ark. La. Gas Co. v. Hall (Arkla), 453 U.S. 571, 577, 101 S. Ct. 2925, 69 L. Ed. 2d 856 (1981)* (holding that filed rate doctrine bars a consumer of a regulated product from paying any rate other than the filed rate); *see also Crumley v. Time Warner Cable, Inc., 554 F. Supp. 2d 933, 936-37 (D. Minn. 2008)* (concluding that the filed rate doctrine barred claim for damages and declaratory relief based on services not performed under settlement agreement because claim challenged rate reasonableness); *Rios v. State Farm Fire & Cas. Co., 469 F. Supp. 2d 727, 739 (S.D. Iowa 2007)* (concluding that the **[**28]** filed rate doctrine barred claim for rescission on insurance policy because return for full amount of paid premiums would challenge the agency-approved rates).

[*47] We recognized these dual reasons for barring the claim for damages in *Schermer.* In that case, we determined that plaintiffs' claim that a surcharge on insurance rates for homes older than 39 years was unlawful would have caused the court to "necessarily interfere with the function delegated by the legislature to the [agency, without] the expertise [or] the mechanisms to deal with the entire rate structure or the adequacy of the return to the regulated entity." *721 N.W.2d at 315*. Our decision in *Schermer* also recognizes the potential for discriminatory rates in the event that courts assess damages for breach of agency-approved tariff provisions. We recognized that "if the court were to retroactively adjust the rates of only the Class members, it would inevitably disrupt the

---

[6] The concurrence contends that we should decline to answer the certified question as to the claim for injunctive relief because "[u]nder appellants' interpretation of the tariff, the claim for injunctive relief can go forward; [but] under NSP's interpretation of the tariff, the claim is barred by the filed rate doctrine." The question certified, however, assumes precisely the conflicting interpretations **[**25]** the concurrence cites, and asks whether the filed rate doctrine bars the court from proceeding when the tariff is open to those conflicting interpretations. This case therefore presents a situation appropriate for certification because "the record is developed to the point where the question is relevant and presents a substantive issue." *Thompson v. State, 284 Minn. 274, 277, 170 N.W.2d 101, 103 (1969)*. The certified question presented here is not similar to the question certified in the cases the concurrence cites where we determined that the question posed was not appropriate for certification. The result in *Staples v. Zinn, 302 Minn. 149, 152-53, 223 N.W.2d 415, 416-17 n.2 (1974)*, illustrates this difference. The question certified there was whether res judicata applies to a judgment entered in conciliation court. Because the judgments that had been entered in conciliation court had been vacated, the question certified was merely hypothetical and thus not appropriate for certification. *See also F. & H. Invest. Co. v. Sackman-Gilliland Corp., 305 Minn. 155, 158, 232 N.W.2d 769, 772 (1975)* ("[T]he question [of the constitutionality of the foreclosure by advertisement statute as applied] **[**26]** is not appropriate for certification because of the outstanding issues of fact which must necessarily be determined and, as well, because certified questions of law must be brought to this court after having been decided by the lower court. The mere denial of a motion for judgment because of a broad allegation of unconstitutionality is not the kind of question contemplated for certification within the rule."); *Thompson, 284 Minn. at 277, 170 N.W.2d at 103* (holding that certification was not appropriate because question presented was "abstract [and] unnecessarily general"); *Rude v. Rude, 283 Minn. 524, 525, 166 N.W.2d 719, 719 (1969)* (per curiam) (holding that question as to "the 'standard of care required by a plaintiff in the act of rescuing personal property'" would not be considered under appellate rule allowing for certified questions because the standard of care "has already been fully stated" (quoting *Henjum v. Bok, 261 Minn. 74, 77, 110 N.W.2d 461, 463 (1961))*).

balancing of interests achieved by the [agency] . . . because the court has no jurisdiction to reallocate rates among other customer classes . . . ." *Id.*

Appellants, in essence, argue that the rule we applied in *Schermer* does not control here because they are **[**29]** not seeking a "refund of approved rates." Rather, they are seeking compensatory damages based on the amount of the fair market value of inspection and maintenance services. The complaint seeks damages that would give appellants the benefit of their bargain and put them in the same position as they would have been if NSP had performed the inspection and maintenance services that the appellants claim NSP is obligated to perform under the tariff. Appellants allege that this measure of damages would not require calculation of damages based on rates, but based on the market value of the services not performed, and therefore would not create an effective rate refund.

But appellants essentially claim an overcharge for services actually performed under the tariff, compared to the services appellants claim the tariff required to be performed. These damages are measured as the difference between what the appellants actually paid for the performance of the service not received and the presumably lesser amount they would have paid had the services not been required in the tariff. *See, e.g.,* *Marcus v. AT&T Corp., 138 F.3d 46, 60-61 (2d Cir. 1998)* (stating that compensatory damages for fraud have **[**30]** the effect of creating a discounted rate where appellants based measure of damages on "best alternative rate available"); *H.J., Inc. v. Nw. Bell. Tel. Co., 954 F.2d 485, 492 (8th Cir. 1992)* (holding that damages for telephone company's wrongdoing challenge rate reasonableness and "fall[] squarely within the filed rate doctrine"). The measure of damages in this case is therefore inextricably linked to the filed rate. ***HN15***[] The rate-setting process is an intricate proceeding by which the agency takes into account many aspects of cost and capital. *Peoples Natural Gas Co., 369 N.W.2d at 535*. The costs incurred by NSP to render its services necessarily are accounted for when the agency engages in the procedure to set the rate. *Minn. Stat. § 216B.16, subd. 6* (2008) (explaining that the commission considers the consumer's need and cost for providing adequate, efficient, and reasonable services when exercising authority to set just and reasonable rates). The judiciary is not competent to engage in rate analysis, nor, consistent with separation of powers principles, should the courts encroach on this legislative function. [7]

[*48] Finally, awarding appellants money damages for services they claim NSP was required to perform, but that they did not receive, would result in appellants paying less for the electrical services than non-class members. As we recognized in *Schermer,* ***HN16***[] the filed rate doctrine is designed to protect against such discrimination between ratepayers. *721 N.W.2d at 315*.

Because appellants' claim for compensatory damages implicates the reasonableness of the agency-approved rate and would lead to discrimination between ratepayers, we hold that the filed rate doctrine bars this claim.

II.

---

[7] Some courts have recognized that the filed rate doctrine does not bar every **[**31]** claim for damages that must be measured with respect to the filed rate. For example, in *Brown v. MCI Worldcom Network Servs., Inc., 277 F.3d 1166, 1171-72 (9th Cir. 2002)*, the Ninth Circuit concluded that the filed rate doctrine would not bar an award of damages in the amount that the customer was overcharged above the enforceable rate. *Brown* is distinguishable from this case because appellants do not allege that they paid more than the specific rate set forth in the tariff. Instead, appellants allege that their damages arise from a deficiency of services. Appellants' claim suggests that the filed rate is too high if, in fact, NSP did not perform the services that the tariff prescribes. A court may not entertain such a claim without implicating rate reasonableness under the filed rate doctrine. *See, e.g.,* *Wegoland Ltd., 27 F.3d at 21-22* (filed rate doctrine barred RICO action that would require the court to determine a reasonable rate absent the fraud because court was incompetent to evaluate rate reasonableness); *H.J., Inc., 954 F.2d at 493* (dismissing RICO action because damages sought to compensate for excessive service charges constituted a retroactive rate adjustment); *Taffet v. Southern Co., 967 F.2d 1483, 1491-92 (11th Cir. 1992)* **[**32]** (same); *Gulf States Utilities Co. v. Alabama Power Co., 824 F.2d 1465, 1472 (5th Cir. 1987)* (en banc) (filed rate doctrine barred breach of contract claims seeking "relief based on a rate different from the filed rate," but did not bar fact question about the quantity of electrical power sold, where contract was between two utilities and not filed with agency).

Because of its conclusion that the filed rate doctrine bars both of appellants' claims, the court of appeals did not reach the primary jurisdiction doctrine question certified by the district court. As set forth above, we have concluded that the filed rate doctrine **[**33]** does not bar appellants' claim for injunctive relief. Accordingly, NSP's contention that the primary jurisdiction doctrine bars the claim for injunctive relief must be addressed.

Although we could remand consideration of the primary jurisdiction question to the court of appeals, the interests of judicial economy counsel that we address the question here. We thus turn to consider whether the district court should have referred appellants' injunctive relief claim to the MPUC under the primary jurisdiction doctrine. ***HN17***[] Because this question comes to us within the context of a certified question, we review the application of the primary jurisdiction doctrine using a de novo standard. *Watson by Hanson v. Metro. Transit Comm'n, 553 N.W.2d 406, 411 (Minn. 1996)*.

HN18[] The primary jurisdiction doctrine "is a judicially-created doctrine [that] is concerned with the orderly and sensible coordination of the work of agencies and courts." *State, by Pollution Control Agency v. United States Steel Corp., 307 Minn. 374, 380, 240 N.W.2d 316, 319 (1976)*. The doctrine seeks to strike a proper relationship between courts and agencies, especially if an issue before the court requires the particular competence and **[**34]** expertise of the agency. *City of Rochester v. People's Co-op. Power Ass'n, 483 N.W.2d 477, 480 (Minn. 1992)* (citing *United States v. W. Pac. R.R. Co., 352 U.S. 59, 63-64, 77 S. Ct. 161, 1 L. Ed. 2d 126, 135 Ct. Cl. 997 (1956))*; *see also S. Utah Wilderness Alliance v. Bureau of Land Mgmt., 425 F.3d 735, 751 (10th Cir. 2005)* (noting that primary **[*49]** jurisdiction doctrine promotes regulatory uniformity).

The United States Supreme Court recognizes the primary jurisdiction doctrine as a prudential measure under which a court acknowledges that, even if the court may review the claims before it, the claims involve some issues that are better suited to the special competence and expertise of a regulating agency. *Reiter v. Cooper, 507 U.S. 258, 268, 113 S. Ct. 1213, 122 L. Ed. 2d 604 (1993)*. Putting off the judicial proceedings for a time allows the parties to seek resolution of those issues in the agency before resuming litigation in court. *Id.* In such a situation, the district court has discretion to determine whether to stay the proceeding or dismiss the claims without prejudice. Dismissal may be appropriate if the parties would not be unfairly disadvantaged. *Id.*

HN19[] Courts have recognized several factors in assessing whether to apply the doctrine. We have acknowledged at least two **[**35]** factors: (1) whether the legislature explicitly granted the agency exclusive jurisdiction; and (2) whether the issues raised are "inherently judicial." *City of Rochester, 483 N.W.2d at 480*. [8] The district court applied these two factors in determining that the primary jurisdiction doctrine did not "bar[]" appellants' action.

Turning to the exclusive jurisdiction question, NSP argues that the comprehensive powers for ratemaking and regulation delegated to the MPUC under Minn. Stat. ch. 216B amount to exclusive jurisdiction in the agency. *See Subaru of Am., Inc. v. David McDavid Nissan, Inc., 84 S.W.3d 212, 222-23 (Tex. 2002)* **[**36]** (noting that a "pervasive regulatory scheme" can create exclusive jurisdiction, but finding that the statute at issue explicitly provided for "exclusive, original jurisdiction" in the agency). But NSP points to no statutory provision, nor do we find one, that explicitly confers exclusive jurisdiction on the agency over tariff interpretation and enforcement. This silence weighs in favor of judicial jurisdiction. *See Abraham v. County of Hennepin, 639 N.W.2d 342, 346-47 (Minn. 2004)* ("Ordinarily, unless a statute provides that its remedy is exclusive, a party should not be prevented from bringing concurrent claims."); *City of Rochester, 483 N.W.2d at 480* ("The [primary jurisdiction] doctrine is inapplicable if the issues raised are 'inherently judicial,' unless the legislature has *explicitly granted* exclusive jurisdiction to the administrative body.'" (quoting *Manchester Terminal Corp. v. Tex. TX TX Marine Transp., Inc.,*

---

[8] Other courts have examined the doctrine using these factors: (1) the traditional experience of judges; (2) agency expertise and prerogative for discretion; (3) the likelihood that the court's ruling will differ from the agency and erode uniformity; and (4) whether the parties have already applied for agency adjudication. *AT&T v. MCI Commc'ns Corp., 837 F. Supp. 13, 16 (D.D.C. 1993)*; *see also MCI Commc'ns Corp. v. AT&T, 496 F.2d 214, 223 (3d Cir. 1974)* (assuming that questions raised were "within the ordinary experience of the judiciary," but staying the action under the primary jurisdiction doctrine for additional prudential considerations).

781 S.W.2d 646, 649 (Tex. Ct. App. 1989) (emphasis added))). We agree with the district court that the Minnesota Legislature has not vested in the MPUC exclusive jurisdiction over claims related to the tariffs of regulated utilities.

But this determination is not dispositive **[**37]** for purposes of the primary jurisdiction doctrine. We must still examine whether issues raised in the case are "inherently judicial." In making this determination, we look to whether the case "'rais[es] issues of fact not within the conventional experience of judges," or whether the case "'require[s] the exercise of administrative **[*50]** discretion.'" *State, by Pollution Control Agency, 307 Minn. at 380, 240 N.W.2d at 319* (quoting *Far E. Conference v. United States, 342 U.S. 570, 574-75, 72 S. Ct. 492, 96 L. Ed. 576 (1952))*. Apparently because this case sounded in breach of contract, the district court concluded that the issues raised in the case did not "require any 'special competence,'" and therefore were inherently judicial. We disagree.

Appellants contend that tariff interpretation is as inherently judicial as contract interpretation because the tariff language plainly and unambiguously creates a duty for NSP to inspect and maintain "the point of connection." *See* *Minn.-Iowa Television Co. v. Watonwan T.V. Improvement Ass'n, 294 N.W.2d 297, 303 (Minn. 1980)* (concluding that the court is competent to adjudicate whether a contract between a regulated TV station and a nonprofit organization violates state ***antitrust law***). **[**38]** We agree that the court is competent to enforce duties plainly described in the tariff. But in this action, as the district court found, the tariff is open to interpretation. To interpret the tariff and therefore define NSP's obligations, the court must construe technical terms relating to particular electrical utility equipment, such as "point of connection," "appurtenances," "meter box," and "service conductors." Where, as in this case, the judiciary's role in construing the tariff is complicated because the dispositive terms "are used in a peculiar or technical sense," and "extrinsic evidence is necessary to determine their meaning or proper application," the primary jurisdiction doctrine counsels referral to the agency. *W. Pac. R.R. Co., 352 U.S. at 66*.

Several courts have referred matters to administrative agencies in precisely such a circumstance. For example, in *Western Pacific,* the Supreme Court was presented with a tariff that would have required the Court to determine whether the railroad shipping rates for "incendiary bombs" included steel casings filled with napalm gel. *Id. at 60-61*. The Court acknowledged that tariff construction is appropriate in some cases, but nevertheless **[**39]** referred the matter to the agency for a definition of "incendiary bombs." *Id. at 66*. The rate set for shipping the "incendiary bombs," according to the Court, had been determined after a cost-allocation analysis that considered safety measures for "handling, supervising, and insuring an inherently dangerous cargo." *Id.* Because the agency was familiar with the factors that informed the decision to create the particular rate for shipping the particular freight in question, the Court concluded that the agency would be better suited to rule on the applicable rate. *Id. at 67*. The Court explained that, "where . . . the problem of cost-allocation is relevant, and where therefore the questions of construction and reasonableness are so intertwined that the same factors are determinative on both issues, then it is the Commission which must first pass on them." *Id. at 69*.

The Eighth Circuit similarly applied the primary jurisdiction doctrine to invoke agency expertise for construction of a telephone company tariff. *Access Telecomm. v. Sw. Bell Tel. Co., 137 F.3d 605, 608 (8th Cir. 1998)*. The company argued that when more than 6,000 feet of wire were required to provide the requested service, the **[**40]** company had to use a different set of wires with the result of bumping the customer into a more costly category of rates. *Id.* The tariff, however, did not provide for a length of the wire that would limit the application of the less-expensive-rate category. *Id.* To determine whether the 6,000-foot limitation was reasonable, the court referred the matter to the agency under the primary jurisdiction doctrine in order to take advantage of agency expertise **[*51]** and experience with such technical items as "circuit designs, signal transmissions, noise attenuation, and echo return loss." *Id. at 609*. This deference was appropriate, the court held, even though the claim alleged mere violation of the tariff as written, because of the technical nature of the questions before the court. *Id. at 608-09*.

The Third Circuit considered an action brought by MCI Communications Corporation against AT&T Company in which MCI alleged that AT&T was responsible for providing certain connection services mandated by the Federal Communications Commission pursuant to the filed tariff. *MCI Commc'ns Corp. v. AT&T, 496 F.2d 214, 215-16 (3d Cir. 1974)*. The court of appeals vacated the preliminary injunction issued by the **[**41]** district court that ordered AT&T to provide these services because agency expertise was needed to interpret precisely which interconnection services were owed under the FCC order and because an action to resolve the same issues was pending before the agency. *Id. at 221*. The court found that, in addition to uncertainty about the scope of the duties, the nature of the issue involved a "comparative evaluation of complex technical, economic, and policy factors, as well as a consideration of the public interest" that the agency was in the best position to handle. *Id. at 222*.

Like the claims in all of these cases, appellants' claim for injunctive relief requires technical knowledge and experience that makes the tariff construction issue in this case best suited for a first consideration by the MPUC. Because the scope of NSP's services is dependent upon technical, undefined terms in the tariff, agency expertise will provide much-needed perspective for the construction of the NSP tariff. Moreover, the MPUC is in the best position to consider these questions, as the legislature entrusted the commission with setting the rates based on the scope of the services NSP was to perform. We therefore **[**42]** hold that the injunctive relief claim should be referred first to the agency under the primary jurisdiction doctrine.

Upon referral of this claim to the agency, the court has discretion to dismiss the action or simply stay it. *See* *Reiter, 507 U.S. at 268-69*. A stay is warranted where, after appropriate issues have been referred to the proper agency, claims remain over which the court retains jurisdiction. *Ricci v. Chicago Mercantile Exch., 409 U.S. 289, 302, 305-06, 93 S. Ct. 573, 34 L. Ed. 2d 525 (1973)* (affirming court of appeal's stay of antitrust action predicated on violation of a Commodity Exchange Commission rule so that the commission could first decide whether its rule was violated before the court would address the immunity question raised under the antitrust statute). Courts may also stay litigation where a party would find great difficulty in resurrecting a valid claim on account of a statute of limitations that might expire while the parties pursue proceedings in the agency. *Carnation Co. v. Pac. Westbound Conference, 383 U.S. 213, 222-23, 383 U.S. 932, 86 S. Ct. 781, 15 L. Ed. 2d 709 (1966)* (reversing the court of appeal's dismissal of the action and ordering a stay because the treble damages sought under the antitrust statute would likely be barred **[**43]** by the statute of limitations before the commission resolved the referred issue and distinguishing a claim seeking injunctive relief based on continuing conduct that would not be barred); *Laveson v. Trans World Airlines, 471 F.2d 76, 83 (3d Cir. 1972)* (vacating district court dismissal and ordering stay of proceedings because the antitrust cause of action seeking treble damages would be subject to a four-year statute of **[*52]** limitations which could expire before the agency acted on the claim).

By contrast, courts may dismiss the litigation without prejudice if all claims turn on one central claim that will be resolved by the agency. *Total Telecomm. Servs. v. AT&T Co., 919 F. Supp. 472, 483-84 (D.D.C.)*, *aff'd, 321 U.S. App. D.C. 309, 99 F.3d 448 (D.C. Cir. 1996)* (finding dismissal proper where central claims alleging violation of the Communications Act now referred to the agency would be dispositive of other claims based in breach of contract, intentional interference with business relations, and quantum meruit). Likewise, a court will not abuse its discretion by dismissing litigation that would not be barred from future judicial consideration by a statute of limitations. *Far E. Conference v. United States, 342 U.S. 570, 577, 72 S. Ct. 492, 96 L. Ed. 576 (1952)* **[**44]** (concluding that dismissal was proper and a stay was not necessary for a claim seeking to enjoin violations of ***antitrust law*** because the claim could be appealed to the courts after the agency proceeding and any future claim could be "easily initiated later"); *Access Telecomm., 137 F.3d at 609* (affirming district court's dismissal of suit because the statute of limitations that would have applied to the action in the district court was not implicated in light of the agency's statutory timeline for addressing the complaint).

The decision to stay or dismiss without prejudice, however, is at the discretion of the district court. *See* *Access Telecomm., 137 F.3d at 609*. The parties did not argue this issue to the district court, nor was the issue briefed to the court of appeals or to this court. We therefore remand the question of whether the injunctive relief claim should be dismissed without prejudice or stayed to the district court for a disposition consistent with this opinion.

IV.

We turn finally to consider the court of appeals' dismissal of claims asserted on behalf of North Dakota and South Dakota residents. *Hoffman, 743 N.W.2d at 757*. The district court in this case did not certify **[**45]** to the court of appeals the question of whether to dismiss the out-of-state claims. This issue therefore was not properly before the court of appeals. We reverse the court of appeals ruling and reinstate the claims of the North Dakota and South Dakota residents. We remand those claims to the district court for disposition consistent with this opinion.

Affirmed in part, reversed in part, and remanded.

Concur by: DIETZEN

Concur

DIETZEN, Justice (concurring).

I agree with the majority's conclusion that appellants' claim for compensatory damages is barred under the filed rate doctrine, but I disagree that appellants' claim for injunctive relief is not barred under the filed rate doctrine. Because I conclude that the relevant provisions of the tariff are ambiguous, I would decline to answer the certified question as to whether the filed rate doctrine bars the claim for injunctive relief. I would simply refer appellants' claim for injunctive relief to the Minnesota Public Utilities Commission (MPUC) to resolve the ambiguity in the tariff.

Like the majority, I conclude that the filed rate doctrine does not bar a claim for injunctive relief that merely seeks to enforce the terms of an existing tariff. *See, e.g.,* ***[**46]*** *Brown v. MCI Worldcom Network Servs., Inc., 277 F.3d 1166, 1171-72 (9th Cir. 2002)*; *Lipton v. MCI Worldcom, Inc., 135 F. Supp. 2d 182, 189 (D.D.C. 2001)*. **[*53]** Therefore, the dispositive issue here is whether appellants merely are seeking to enforce the terms of the tariff or whether they are seeking to add obligations to the tariff. The resolution of this issue depends on the scope of NSP's maintenance obligation as set forth in the tariff, which requires interpretation of the tariff.

Courts typically interpret tariffs using the same principles as contract interpretation. *See* *Carrier Serv., Inc. v. Boise Cascade Corp., 795 F.2d 640, 642 (8th Cir. 1986)*. Unless ambiguous, the construction and effect of a contract constitutes a question of law. *Denelsbeck v. Wells Fargo & Co., 666 N.W.2d 339, 346 (Minn. 2003)*. The determination of whether a contract is ambiguous also constitutes a question of law. *Id.* "A contract is ambiguous if its language is reasonably susceptible to more than one interpretation." *Brookfield Trade Ctr., Inc. v. County of Ramsey, 584 N.W.2d 390, 394 (Minn. 1998)*. When material contractual provisions are ambiguous, judgment on the pleadings is improper. *See, e.g.,* *Eternity Global Master Fund Ltd. v. Morgan Guar. Trust Co. of N.Y., 375 F.3d 168, 178 (2d Cir. 2004)*; **[**47]** *cf.* *In re Turners Crossroad Dev. Co., 277 N.W.2d 364, 368 (Minn. 1979)* (stating that if contractual terms at issue are ambiguous or uncertain, summary judgment is not appropriate).

The purpose of certification is to provide answers to important and doubtful legal questions. *See* *Hawkins v. Thorp Credit & Thrift Co., 441 N.W.2d 470, 472 (Minn. 1989)* (explaining that the district court "must specify the precise legal question certified and make specific findings of fact" relevant to the certified question). Certification should not be used "to secure an advisory opinion." *Rude v. Rude, 283 Minn. 524, 525, 166 N.W.2d 719, 719 (1969)* (per curiam). We consistently have declined to answer certified questions that are hypothetical or based on insufficient facts. *Zobel & Dahl Constr. v. Crotty, 356 N.W.2d 42, 47 (Minn. 1984)*; *see, e.g.,* *F. & H. Inv. Co. v. Sackman-Gilliland Corp., 305 Minn. 155, 158, 232 N.W.2d 769, 772 (1975)*; *Staples v. Zinn, 302 Minn. 149, 152-53, 223 N.W.2d 415, 417-18 (1974)*.

The certified question here is: "Does the filed rate doctrine bar [appellants'] claims?" In considering whether the filed rate doctrine bars appellants' claim for injunctive relief, the majority does **[**48]** not consider the threshold question of whether the tariff is ambiguous. Instead, the majority focuses on the standard of review for judgment on the pleadings. Construing the tariff provisions "in the light most favorable to appellants," the majority concludes that "NSP must maintain certain equipment" and, therefore, that the filed rate doctrine does not bar the claim for injunctive relief. [9]

---

[9] In reviewing a ruling on a motion for judgment on the pleadings, we accept appellants' *factual* allegations in the pleading as true. *Lorix v. Crompton Corp., 736 N.W.2d 619, 623 (Minn. 2007)*. We are not required to accept appellants' allegations with respect to the construction of the tariff. *See* *Int'l Audiotext Network, Inc. v. Am. Tel. & Tel. Co., 62 F.3d 69, 72 (2d Cir. 1995)* (but

I disagree with the analysis of the majority. At this preliminary stage of the proceedings, appellants' allegations in the complaint are only allegations. Because appellants and NSP offer different, reasonable interpretations of the tariff, I conclude that the tariff is ambiguous. **[**49]** In fact, in the section on primary jurisdiction, the majority agrees that the tariff is ambiguous and determines that the scope of NSP's obligations under the tariff "is best suited for a first consideration by the MPUC." As a result of the ambiguity, the **[*54]** certified question of whether the claim for injunctive relief is barred by the filed rate doctrine is not ripe for determination by this court. I agree with the majority that the ambiguity in the tariff must first be resolved by the MPUC.

Under appellants' interpretation of the tariff, the claim for injunctive relief can go forward; under NSP's interpretation, the claim is barred by the filed rate doctrine. Consequently, the answer to the certified question depends on which of the two reasonable interpretations of the tariff will prevail. The majority attempts to side-step this problem by assuming the allegations in the complaint are true. But appellants' allegations ask this court to assume not only that the facts of the complaint are true, but also that the proposed interpretation of the ambiguous tariff will be the one adopted by the MPUC. Essentially, appellants seek an advisory opinion on whether the claim is barred by the filed **[**50]** rate doctrine if the MPUC accepts appellants' proposed interpretation of the tariff. In short, the majority goes too far in answering the certified question based on appellants' allegations in the complaint. *See* *F. & H. Inv. Co., 305 Minn. at 158, 232 N.W.2d at 772* (stating that the court will not consider a certified question that "'might result in one answer to one set of circumstances but another answer to a different set of circumstances.'" (quoting *Thompson v. State, 284 Minn. 274, 277, 170 N.W.2d 101, 103 (1969))*). Because the tariff is ambiguous, I would decline to answer the certified question and refer the interpretation of the tariff to the MPUC.

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > General Overview

HN1[] **Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

The Unfair Practices Act (Utah Act), codified in *Utah Code Ann. §§ 13-5-1 to -18* (2005), safeguards the public against the creation or perpetuation of monopolies and to foster and encourage competition, by prohibiting unfair and discriminatory practices by which fair and honest competition is destroyed or prevented. *Utah Code Ann. § 13-5-17* (2005). Similarly, the Federal Trade Commission Act (federal Act) declares unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce unlawful. *15 U.S.C.S. § 45(a)(1)*. To determine whether an act is unfair or deceptive under the federal Act, the Cigarette Rule provides a three-part test that considers whether the act is unlawful or violates public policy, whether it is immoral or unethical, and whether it injures consumers. The Utah Act is unambiguous in its focus on competition and monopolistic behavior; therefore, the Supreme Court of Utah does not look to outside sources to define the practices the Utah Act would deem unfair or deceptive.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN3[] Trade Practices & Unfair Competition, State Regulation

The Utah Unfair Practice Act (Act), *Utah Code Ann. §§ 13-5-1 to -18* (2005), makes unlawful unfair methods of competition in commerce or trade. *Utah Code Ann. § 13-5-2.5(1)* (2005). Specifically, the Act prohibits anticompetitive discriminatory pricing and advertising goods the retailer is not prepared to supply. *Utah Code Ann. §§ 13-5-3*, -8 (2005). Additionally, the Act gives the Utah Division of Consumer Protection authority to prevent the use of unfair methods of competition and to enforce the prohibitions of the chapter through agency adjudications. *Utah Code Ann. § 13-5-2.5(2)-(3)* (2005).

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

HN4[] Deceptive & Unfair Trade Practices, Federal Trade Commission Act

The Federal Trade Commission uses the Cigarette Rule, which was originally adopted to regulate unfair or deceptive advertising or labeling of cigarettes, to determine whether an act is unfair under the Federal Trade Commission Act. Under the rule, the federal agency considers three factors in determining whether an act is unfair or discriminatory: (1) whether the act offends public policy as established by statute, common law, or otherwise; (2) whether the act is immoral, unethical, oppressive, or unscrupulous; and (3) whether it causes substantial injury to consumers or competitors.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Federal Trade Commission Act > Scope

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN5[] **Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

The Federal Trade Commission Act (federal Act) is broad in scope and can allow the Federal Trade Commission to prohibit practices that are not per se ***antitrust law*** violations. There is a critical difference, however, between the language in the Federal Trade Commission Act and Utah's Unfair Practices Act, *Utah Code Ann. §§ 13-5-1 to -18* (2005). The federal Act makes unlawful unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce. *15 U.S.C.S. § 45(a)(1)*. The addition of this language indicates that the scope of the federal Act extends beyond anticompetitive practices.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN6[] **Trade Practices & Unfair Competition, State Regulation**

In contrast to the Federal Trade Commission Act, Utah's Unfair Practices Act (Act), *Utah Code Ann. §§ 13-5-1 to -18* (2005), makes unlawful only unfair methods of competition in commerce. *Utah Code Ann. § 13-5-2.5(1)* (2005). Lacking an independent reference to unfair acts or practices, there is no indication that the Utah Legislature intended the Act to reach any practices beyond anticompetitive behavior.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN7[] **Trade Practices & Unfair Competition, State Regulation**

See *Utah Code Ann. § 13-5-17* (2005).

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN8[] **Trade Practices & Unfair Competition, State Regulation**

While *Utah Code Ann. § 13-5-17* (2005) does indicate the Utah Division of Consumer Protection may prohibit unfair and discriminatory practices, the phrase is modified by a reference to preserving competition. Thus, it is unambiguous that the Utah Legislature intended the Utah Unfair Practices Act, *Utah Code Ann. §§ 13-5-1 to -18* (2005), to apply only to anticompetitive behavior.

Governments > Legislation > Interpretation

HN9[] **Legislation, Interpretation**

Where statutory language is plain and unambiguous, the Supreme Court of Utah will not look beyond the same to divine legislative intent. Rather, the Supreme Court of Utah is guided by the rule that a statute should generally be construed according to its plain language.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN10[] **Trade Practices & Unfair Competition, State Regulation**

The Unfair Practices Act (Act), *Utah Code Ann. §§ 13-5-1 to -18* (2005), makes unlawful only unfair methods of competition. The Act contains no language prohibiting unfair or deceptive practices in commerce.

Counsel: James E. Magleby, Jason A. McNeill, Christopher M. Von Maack, Salt Lake City, for plaintiff.

Reed R. Braithwaite, St. George,John D. Richards, Salt Lake City, for defendant.

Judges: DURHAM, Chief Justice. Associate Chief Justice Durrant, Justice Wilkins, Justice Parrish, and Justice Nehring concur in Chief Justice Durham's opinion.

Opinion by: DURHAM

Opinion

[*1228] *DURHAM, Chief Justice*:

INTRODUCTION

The Utah Legislature enacted ***HN1***[] the Unfair Practices Act, codified in *Utah Code sections 13-5-1 to -18*, to "safeguard the public against the creation or perpetuation of monopolies and to foster and encourage competition, by prohibiting unfair and discriminatory practices by which fair and honest competition is destroyed or prevented." *Utah Code Ann. § 13-5-17* (2005). Similarly, the Federal Trade Commission Act declares "unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce" unlawful. *15 U.S.C. § 45(a)(1) (2006)*. To determine whether an act is unfair or deceptive under the federal Act, the United States Supreme Court adopted what is now known as the Cigarette Rule--a three-part test that considers **[**2]** whether the act is unlawful or violates public policy, whether it is immoral or unethical, and whether it injures consumers. Ray Garrard, the appellant in this matter, asks us to incorporate this test into the Utah Unfair Practices Act. We decline to do so. The Utah Act is unambiguous in its focus on competition and monopolistic behavior; therefore, we do not look to outside sources to define the practices the Utah Act would deem unfair or deceptive.

BACKGROUND

HN2[] In reviewing the district court's grant of a directed verdict, we review the facts in the light most favorable to the losing party. *Goebel v. Salt Lake City S. R.R. Co., 2004 UT 80, P 10, 104 P.3d 1185*.

In July 1999, Ray and Marva Garrard purchased a bedroom set for $ 2,419.95 from Granite Furniture Company. On the advice of a sales associate, they agreed to a six-month financing agreement. The Garrards understood this financing agreement to waive any finance charges if the balance of the account was paid within six months. However, the contract required monthly minimum payments, which the Garrards failed to make. Instead, the Garrards made two sporadic payments and then paid the remaining amount due on January 11, 2000, believing **[**3]** the six-month financing period to expire on January 24.

On March 5, 2004, the Garrards received a letter with an enclosed copy of a default judgment of $ 897.52 for unpaid interest and finance charges from Gateway Financial Services, Inc. (Gateway), a collection agency. Prior to this letter, the Garrards were unaware that any legal action had been taken against them. The Garrards immediately contacted legal counsel to resolve the matter. A few days later, the Garrards' legal counsel requested that Gateway provide proof of service for a small claims affidavit delivered to the Garrards. Gateway responded the same day by faxing a proof of service, which indicated that a service processor from Civil Process Services & Investigations, **[*1229]** LLC (Civil Process Services) had personally served Marva Garrard on November 28, 2003 at 12:10 p.m. This was impossible; Marva Garrard passed away November 13, 2002, over a year before the reported date of service. In response to Mr. Garrard's challenge to the proof of service, on March 26, 2004, Gateway produced another proof of service. This second proof of service indicated that a service processor had instead personally served Ray Garrard on November 28, **[**4]** 2003 at 12:10 p.m. Again, this was impossible; Mr. Garrard was not home at that time. Gateway eventually agreed to remove the judgment and an order vacating the judgment was entered on September 30, 2004.

Garrard sued Civil Process Services [1] to recover treble damages under the Unfair Practices Act arguing that falsifying the civil process documents constituted unfair competition because it violated public policy, was unethical and immoral, and caused substantial injury to consumers. *See* *Utah Code Ann. § 13-5-14* (2005). Garrard also sued Granite Furniture Company for violating the Unfair Practices Act. The matter was tried to a jury. Following the close of evidence, Civil Process Services and Granite Furniture Company moved for a directed verdict on the basis that Garrard failed to prove that they had violated the Unfair Practices Act. The district court granted the motion for directed verdict, and Garrard now appeals. [2] We have jurisdiction pursuant to *Utah Code section 78A-3-102(3)(j)*. We review the trial court's grant of a directed verdict for correctness. *Goebel, 2004 UT 80, P 10, 104 P.3d 1185*.

ANALYSIS

HN3[] The Utah Unfair Practice Act makes unlawful "[u]nfair methods of competition in commerce or trade." *Utah Code Ann. § 13-5-2.5(1)* (2005). Specifically, the Act prohibits anticompetitive discriminatory pricing and advertising goods the retailer is not prepared to supply. *See id*. *§§ 13-5-3*, *-8*. Additionally, the Act gives the Division of Consumer Protection authority to prevent the use of unfair methods of competition and to enforce the prohibitions of the chapter through agency adjudications. *Id*. *§ 13-5-2.5(2)-(3)*.

Mr. Garrard urges us to expand the reach of the Unfair Practice Act beyond anticompetitive methods to unfair and discriminatory practices as defined by the federal Cigarette Rule. ***HN4***[] The Federal Trade Commission uses the Cigarette Rule, which was originally adopted to regulate unfair or deceptive advertising or labeling of cigarettes, to determine whether an act is unfair under the federal Act. *FTC v. Sperry & Hutchinson Co., 405 U.S. 233, 244 n.5, 92 S. Ct. 898, 31 L. Ed. 2d 170 (1972)* [hereinafter *Sperry*]. Under the rule, the federal agency considers three factors in determining whether an act is unfair or discriminatory: (1) whether the act offends public **[**6]** policy as established by statute, common law, or otherwise; (2) whether the act is immoral, unethical, oppressive, or unscrupulous; and (3) whether it causes substantial injury to consumers or competitors. *Id*. The United States Supreme Court acknowledged and implicitly approved of the Cigarette Rule in *Sperry. Id. at 244*.

Utah's Unfair Practices Act, Garrard argues, is so similar to the Federal Trade Commission Act that this court should interpret it in the same manner as the United States Supreme Court interpreted the federal Act in *Sperry*. In *Sperry*, the Court found that ***HN5***[] the Federal Trade Commission Act was broad in scope and could allow the Federal Trade Commission to prohibit practices that are not per se ***antitrust law*** violations. *See id*. There is a critical difference, however, between the language in the Federal Trade Commission Act, as interpreted by *Sperry*, and Utah's Unfair Practices Act. The federal Act makes unlawful "[u]nfair methods of competition in or affecting commerce, *and unfair or deceptive acts or practices in or affecting commerce*." *15 U.S.C. § 45(a)(1) (2006)*(emphasis added). In reviewing the scope of the Federal Trade Commission Act, the *Sperry* court found that **[**7]** the addition of this language indicated that the scope of the Act extended beyond anticompetitive practices. **[*1230]** *Sperry, 405 U.S. at 244*. In fact, the Court noted, the House Report for the amendment explicitly said so.

[1] Garrard also sued Gateway. Gateway settled and was dismissed as a party to the suit.

[2] Granite Furniture **[**5]** Company did not participate in this appeal.

Id. The Report summarized Congress's purpose for the amendment as "mak[ing] the consumer, who may be injured by an unfair trade practice, of equal concern, before the law, with the merchant or manufacturer injured by the unfair methods of a dishonest competitor." *Id*.

HN6[] In contrast to the Federal Trade Commission Act, Utah's Unfair Practices Act makes unlawful only "[u]nfair methods of competition in commerce." *Utah Code Ann. § 13-5-2.5(1)*. Lacking an independent reference to unfair acts or practices, there is no indication that the Utah Legislature intended the Act to reach any practices beyond anticompetitive behavior.

Garrard argues that the legislature did intend the Act to have a broader scope and points to the purpose stated in *Utah Code section 13-5-17* as proof. This section states:

> ***HN7***[] The Legislature declared that the purpose of this act is to safeguard the public against the creation or perpetuation of monopolies and to foster and encourage competition, *by prohibiting unfair* ***[**8]*** *and discriminatory practices by which fair and honest competition is destroyed or prevented*. This act shall be liberally construed that its beneficial purposes may be subserved.

Utah Code Ann. § 13-5-17 (emphasis added).

HN8[] While this section does indicate the Division of Consumer Protection may prohibit unfair and discriminatory practices, the phrase is modified by a reference to preserving competition. Thus, we find it unambiguous that the legislature intended the Act to apply only to anticompetitive behavior. Garrard urges us to look to the authority of our sister states on this subject, some of whom have adopted the Cigarette Rule under their statutes, usually in reliance on expansive language similar to that contained in the Federal Trade Commission Act. Because the language of this statute is unambiguous, we will not do so. *Brinkerhoff v. Forsyth, 779 P.2d 685, 686 (Utah 1989)* (***HN9***[] "Where statutory language is plain and unambiguous, this Court will not look beyond the same to divine legislative intent. Rather, we are guided by the rule that a statute should generally be construed according to its plain language."). For this same reason, we do not look to the language of other Acts under **[**9]** the same title, such as the Consumer Sales Practices Act, or administrative rules adopted pursuant to these additional Acts to interpret the plain language of the Unfair Practices Act.

Accordingly, we hold that ***HN10***[] the Unfair Practices Act makes unlawful only unfair methods of competition. The Act contains no language prohibiting unfair or deceptive practices in commerce, and therefore we decline to adopt the reasoning of the Supreme Court in *Sperry*. Further, because the language of the Act unambiguously addresses unfair methods that impact fair competition, we do not look to the jurisprudence of our sister states to interpret the statute. The district court's decision is affirmed.

We note that in interpreting the current statute, we make no judgment on the wisdom of a legislative expansion of the Unfair Practices Act to protect consumers as well as commercial competitors. The legislature has already adopted an extensive framework of consumer protection laws in other areas, and there are numerous public policy reasons for extending the Unfair Practices Act to also protect consumers. We leave it to the legislature to consider those policy concerns.

Associate Chief Justice Durrant, Justice **[**10]** Wilkins, Justice Parrish, and Justice Nehring concur in Chief Justice Durham's opinion.

LexisNexis® Headnotes

Civil Procedure > Parties > General Overview

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN1[ ] **Civil Procedure, Parties**

Typically, named parties conduct litigation on behalf of themselves; a class action is an exception to this rule.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN2[] **Class Actions, Certification of Classes**

Fed. R. Civ. P. 23 governs class certification and district courts have discretion to certify or deny certification of a class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN3[] **Class Actions, Certification of Classes**

In order to certify a class, the class proponent must clearly satisfy four prerequisites contained in *Rule 23(a)*: (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Burdens of Proof > Allocation

HN4[] **Class Actions, Prerequisites for Class Action**

Only if a class proponent can satisfy the prerequisites of *Fed. R. Civ. P. 23(a)*, does the court need to determine if the matter falls within one of the categories identified in *Rule 23(b)*. *Fed. R. Civ. P. 23(b)*. Courts have held that the same rigorous analysis under *Rule 23(a)* also applies under the *Rule 23(b)* categories.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN5[] **Class Actions, Certification of Classes**

In ruling on class certification, district courts should not delve deeply into the merits of the parties' claims or defenses. Thus, courts should analyze whether the class proponent has met its burden based on the substantive allegations in the complaint and evidence submitted along with the motion for class certification.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN6[] **Class Actions, Certification of Classes**

As to *Fed. R. Civ. P. 23*, the Tenth Circuit Court of Appeals falls into the liberal interpretation camp and has held that courts in the Tenth Circuit should err in favor of certifying a class.

Civil Procedure > Special Proceedings > Class Actions > General Overview

Governments > Courts > Rule Application & Interpretation

HN7[] Special Proceedings, Class Actions

Fed. R. Civ. P. 23 clearly remains a procedural tool, not a substantive or jurisdictional right.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Contracts Law > Contract Conditions & Provisions > General Overview

HN8[] Class Actions, Certification of Classes

Class certification is a procedural mechanism, not a substantive right. As such, the United States District Court for the District of Colorado believes that a lesser level of scrutiny is applicable to an agreement by a party not to proceed as a class, as compared to the level of scrutiny that the court would apply to a similar agreement purporting to waive a substantive right, such as the constitutional right to a jury trial.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

Contracts Law > Contract Conditions & Provisions > General Overview

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN9[] Class Actions, Certification of Classes

The ability to proceed as a class is not akin to the right to a jury trial (or any other substantive or Constitutional right, for that matter). Because a jury trial is guaranteed by the Constitution, courts do not have discretion with respect to deciding whether or not to allow a trial by jury--that is a decision made by the parties. Notably, the history of class litigation reflects that the courts, not the parties, determine whether a suit should proceed on a class basis. Courts make this decision as a matter of judicial efficiency, not out of an obligation to uphold the parties' substantive rights, a fact that the U.S. Supreme Court continues to reiterate. In short, plaintiffs do not have a substantive "right" to proceed as a class. Thus, a jury trial waiver provision is not analogous to a class action bar provision.

Contracts Law > Defenses > Unconscionability > General Overview

Evidence > Burdens of Proof > Allocation

HN10[] Defenses, Unconscionability

The party challenging a contract provision as unconscionable generally bears the burden of proving unconscionability.

Contracts Law > Contract Conditions & Provisions > General Overview

Evidence > Burdens of Proof > Allocation

Contracts Law > Defenses > Unconscionability > General Overview

Evidence > Inferences & Presumptions > Presumptions

HN11[ ] **Contracts Law, Contract Conditions & Provisions**

Courts applying Colorado law start with the presumption that a contract clause is enforceable. The fact that the contract benefits one party more than the other does not alter the presumption of enforceabilty. As such, the party seeking to avoid application of a contractual provision bears the burden of showing that it is unconscionable.

Contracts Law > Defenses > Unconscionability > General Overview

HN12[ ] **Defenses, Unconscionability**

The Colorado Supreme Court has adopted a seven factor test to determine whether a particular contractual provision is unconscionable. The Colorado Supreme Court has listed seven non-exclusive factors that courts can consider in determining whether to enforce a contract provision: (1) Is the agreement a standardized/form agreement made by parties with unequal bargaining power? (2) Did the parties have an opportunity read and become familiar with the document before signing it? (3) Did the document bury the provision in fine print? (4) Is the provision commercially reasonable?(5) Is the provision substantively unfair? (6) What is the relationship between the parties? Was there notice or surprise? (7) What are the remaining circumstances surrounding the formation of the contract, including its commercial setting, purpose and effect? No one factor predominates and courts should examine each of the factors in conjunction with the entirety of the circumstances surrounding the transaction. If the entirety of the circumstances discloses evidence of "overreaching" by one party that causes a contract provision to unreasonably favor that party to the detriment of the other party, a court should decline to enforce the provision.

Contracts Law > Contract Conditions & Provisions > General Overview

Contracts Law > Defenses > Unconscionability > General Overview

HN13[ ] **Contracts Law, Contract Conditions & Provisions**

Regardless of the test used, the question of unconscionability is a matter of law, and the results obtained by any formulation of the test are the same; if a contract clause is unconscionable, a court should not enforce it. On the other hand, if a party cannot meet its burden to show that the contract clause is unconscionable, the court will enforce it.

Contracts Law > Defenses > Unconscionability > Adhesion Contracts

HN14[ ] **Unconscionability, Adhesion Contracts**

Under Colorado law, a take-it-or-leave-it contract does not automatically render the agreement unconscionable.

Contracts Law > Defenses > Unconscionability > Adhesion Contracts

Contracts Law > ... > Negotiable Instruments > Enforcement > General Overview

HN15[] Unconscionability, Adhesion Contracts

Colorado does not require bilaterality for a contract to be enforceable.

Antitrust & Trade Law > Consumer Protection > General Overview

Business & Corporate Law > Distributorships & Franchises > General Overview

HN16[] Antitrust & Trade Law, Consumer Protection

Colorado law does not automatically afford special protection to franchisees in the same manner that it protects consumers.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Governments > Courts > Rule Application & Interpretation

Civil Procedure > ... > Pleadings > Counterclaims > Compulsory Counterclaims

Civil Procedure > Parties > Joinder of Parties > Compulsory Joinder

HN17[] Class Actions, Certification of Classes

Despite the fact that *Fed. R. Civ. P. 23* is, first and foremost, a tool intended to enhance economy and management, modern district courts cannot certify a class under *Rule 23* on their own initiative without a request from one or both of the parties. Indeed, unlike other federal rules, e.g., *Fed. R. Civ. P. 13* and *19*, there is nothing compulsory about bringing a claim under *Rule 23*; thus, there is nothing jurisdictional about *Rule 23*.

Opinion

ORDER DENYING MOTION FOR CLASS CERTIFICATION

This matter is before the Court on Plaintiffs' Motion for Class Certification. (Doc. # 212). For the following reasons, the Motion is DENIED.

INTRODUCTION

This is a franchise dispute. Plaintiffs claim that defendants (referred to collectively as "Quiznos") misled prospective franchisees with sparkling promises of exclusive restaurant market areas and expert assistance to help them locate real estate for their restaurants. Plaintiffs allege that after they signed the thirty-plus-page franchise agreement, Quiznos revealed that the market **[*5]** areas were not as profitable as Quiznos had promised. Further, Quiznos left Plaintiffs without any of the promised expert help. Despite allegedly leaving Plaintiffs in the lurch, Quiznos still required Plaintiffs to open a restaurant within the one-year deadline required by the franchise agreement. If a franchisee failed to open his or her restaurant, as often happened, Quiznos would terminate the franchise agreement or otherwise alienate the franchisee from the organization and keep the franchise fee.

Plaintiffs filed this suit on behalf of themselves and two classes of these "sold-but-not-opened-franchisees" ("SNOs"). The first class is comprised a group of SNOs that Quiznos has elected to terminate for failing to open their restaurant within one year of signing the franchise agreement. The second class is generally comprised of a smaller group of SNOs that also failed to open a restaurant, but that Quiznos has elected not to terminate. Pursuant to Federal *Rule 23*, Plaintiffs seek to certify these two classes for resolution of their claims.

Quiznos opposes class certification and generally denies that its sales pitch misled franchisees about the franchise requirements. Relying on a **[*6]** class action bar contained in the relevant franchise agreement, Quiznos contends that Plaintiffs agreed not to proceed as a class. [1] Section 21.4 of the franchise agreement states in part:

> The parties agree that any proceeding will be conducted on an individual, not a class-wide, basis, and that any proceeding between Franchisor and Franchisee or the Bound Parties may not be consolidated with another proceeding between Franchisor and any other entity or person.

Quiznos argues that this provision is enforceable and precludes class certification. Alternatively, Quiznos argues that Plaintiffs cannot satisfy the elements of class certification under Federal *Rule 23*.

Given the class action bar provision, Plaintiffs' Motion nicely frames the question this Court must answer in deciding the Motion for Class Certification: "The most significant issue . . . is whether, in light of the provision of the franchise agreements that purports **[*7]** to bar class actions, this case can be maintained as a class action in the first instance." To answer this question, the Court held a hearing specifically on the issue of the enforceability of the class action bar and invited supplemental briefing on the issue. On the basis of the facts and argument developed during the hearing and in the various briefs and supplements, the Court answers Plaintiffs' question in the negative, this case cannot be maintained as a class action.

BACKGROUND

I. FACTS

A detailed description of the facts will help elucidate the Court's decision to enforce the class action bar.

A. A Brief History of Quiznos and the SNOs

Quiznos sells submarine sandwiches at franchised restaurants across the country and internationally. The chain started with a single restaurant in Denver in 1981 and soon began to franchise itself. (Doc. # 259 at 3.) In 1991, Defendant Schaden and his father purchased the entire operation, which consisted of 18 restaurants. *(Id.)* The company grew rapidly, and by the end of the millennium, Quiznos had opened over 1,100 restaurants. *(Id.)* That growth continues through today: at the time Quiznos filed its Response to Plaintiff's Motion for Class Certification, **[*8]** it had over 4,440 restaurants in the United States and an additional 600 stores in twenty-three foreign countries. *(Id.)*

However, as this lawsuit makes clear, not every signed franchise agreement results in a functioning restaurant. In fact, Plaintiffs allege that more than 3,200 so-called SNOs exist in the Quiznos system. In most instances, Quiznos terminates the franchise agreement if a franchisee fails to open a restaurant within the one-year deadline. However, Quiznos does not terminate all of the SNOs that fail to open. In many other instances, Quiznos has pledged to continue working with the SNOs to open a restaurant. Around the same time that Plaintiffs filed this lawsuit, Quiznos began to recognize that the SNO backlog presented a business problem and, potentially, a legal problem. Thus, as the number of SNOs continued to grow, Quiznos reorganized itself to change the way it sold franchises and to "instill some integrity into the development process." (Doc. # 235 at 8.)

---

[1] Plaintiffs refer to the clause as a "waiver," but the Court believes that it is more properly labeled a class action "bar" because, as shown below, Plaintiffs do not have a substantive right to proceed as a class, and, therefore, have not really "waived" anything.

B. Plaintiffs' Theory of Fraud and the Franchise Sales Pitch

Plaintiffs' theory is essentially that Quiznos operated a type of quasi-Ponzi scheme by fraudulently selling franchises, accepting the franchise fee, **[*9]** terminating the franchise when the franchisee could not open a restaurant within the deadline because Quiznos failed to assist the franchisee, and then re-selling the same franchise.

1. *Quiznos' Alleged Misrepresentations Regarding Franchise Ownership*

Plaintiffs highlight Quiznos' overhaul of the SNO system as evidence that Quiznos knew of a problem. They also attempt to spin Quiznos' growth in their favor. (Doc. # 89, PP 25, 26.) According to Plaintiffs, Quiznos developed its franchise sales "script" with the goal of simply selling as many franchises (Plaintiffs call them "pieces of paper") as possible, without regard for whether a franchisee ever opened a restaurant or whether a restaurant would ever turn a profit. *(See, e.g.,* Doc. # 235 at 6-7; Doc. # 299 at 3.)

Plaintiffs' allegations focus on Quiznos' dealings with prospective franchisees on the topics of "target areas" [2] and restaurant location assistance and approval. Plaintiffs claim that Quiznos routinely inflated the economic potential of particular targets areas, even though Quiznos knew that the areas had little or no likelihood of sustaining a viable restaurant. (Doc. # 89 PP 34-36.) When a target area proved unworkable for **[*10]** a franchisee (sometimes because of Quiznos' refusal to approve a restaurant site), Quiznos terminated the franchise, kept the franchise fee, and resold the target area to a new franchisee. *(Id.)* Plaintiffs also claim that Quiznos promoted target areas as being "exclusive" *(i.e.,* limited to one franchisee) even though those "exclusive" target areas already contained another Quiznos franchise. *(Id.)*

As this lawsuit has progressed, Plaintiffs have moved away from their target area allegations and focused more on their claim that Quiznos made misrepresentations regarding real estate assistance. [3] Plaintiffs allege that Quiznos promised that it would assist franchisees in locating and securing real estate for their new restaurants. *(Id.* P 41; Doc. # 235 at 8-9.) Plaintiffs allege that Quiznos touted its "real estate experts" and that potential franchisees could expect hands-on assistance with real estate and business matters after signing onto the Quiznos team. (Doc. # 235 at 9.) But, Plaintiffs allege, after the franchisee had signed the agreement and committed to opening a restaurant, Quiznos **[*11]** provided none of the expert assistance it previously pledged to provide. *(Id.* at 12-13) Plaintiffs further contend that any "assistance" Quiznos provided actually impeded the franchisee's ability to open a restaurant on time. For example, Plaintiffs claim that Quiznos directed franchisees to unworkable restaurant sites and unreasonably denied corporate approval of sites based on constantly changing approval criteria. *(Id.)* Plaintiffs allege that Quiznos' goal was simply to sabotage the franchisee's ability to open a restaurant on time. *(Id.)* The crux in Plaintiffs' theory is that while Quiznos trumpeted these allegedly non-existent benefits of franchise ownership to potential franchisees, Quiznos also concealed the growing list of SNOs and the restrictive one-year deadline during which the franchisees had to open their restaurants. (Doc. # 89 P 42; Doc. # 235 at 10-11.)

2. *Quiznos' Franchise Sales Script*

To support their Motion for Class Certification, Plaintiffs provide declarations from the named Plaintiffs and various Quiznos documents produced in discovery. [4] The record discloses that Quiznos' franchise marketing followed a

---

[2] A "target area" is Quiznos' slang for a franchisee's particular geographic area of responsibility.

[3] This lawsuit is not the first time Quiznos has dealt with this type of allegation in court. *See, e.g., RHC, LLC v. Quizno's Franchising, LLC,* No. 04CV985, 2005 WL 1799536 (Dist. **[*12]** Ct., City and County of Denver July 19, 2005) (lawsuit by former Quiznos franchisee against Quiznos for failure to provide real estate assistance).

[4] Plaintiffs also requested an evidentiary hearing, but to their credit, between Plaintiffs' personal declarations and the Quiznos documents, Plaintiffs describe the Quiznos franchise sales program with reasonable particularity.

fairly uniform "script" [5] around the country. (Doc. # 235 at 4-5.) Indeed, the common theme in Quiznos' franchise marketing was the chain's rapid growth and high rankings among various trade groups and publications.

Plaintiffs discovered Quiznos through various channels. Multiple named Plaintiffs describe how they initially learned about Quiznos on the internet. Potential franchisees could also learn about franchise opportunities from direct mailings and newspaper advertisements. But, this being the internet age, even Quiznos' printed materials directed interested parties to check out Quiznos' website for more information. The materials invited potential franchisees to visit Quiznos' website with snazzy phrases like, "If you love our subs, try a whole store!" *(See, e.g.,* Doc. # 218, Ex. B at Bates No. Q-REF 006694.) Some of Quiznos' direct mailings even promoted franchise sales with a sweepstakes to "Win a Franchise Fee!" by attending a Quiznos' sales seminar. (Doc. # 218, Ex. B at Bates No. Q-REF 006672.)

The printed materials provided very little substantive information regarding franchise ownership. Thus, Plaintiffs claim that they relied largely on Quiznos' website for franchisee information after learning about Quiznos from other sources. Plaintiffs submit internet screen-shots of Quiznos' website. The screen-shots disclose a basic financial survey **[*14]** that, when completed, will answer the question everybody wants to know, "Are you ready for the toasty taste of success?" *(See, e.g.,* Doc. # 218, Ex. A at Bates No. Q-REF 006996.) The survey first probes prospective franchisees with questions about their net worth (greater than $ 125,000?) and liquid cash assets (greater than $ 70,000?). *(Id.)* It then moves on to rather generic personality-type questions, *e.g.,* "Do you usually, finish what you start [or s]tart more projects than you complete?" and "Do you [a]void situations involving risk [or f]eel reasonably comfortable with risk?" *(Id.)* The survey then returns to the money issue, asking about a prospective franchisee's liquid assets and total net worth with more specific questions, *(id.* at Bates No. Q-REF 007000-01.) including other financial and legal issues like prior bankruptcy and non-competition agreements.

Plaintiffs point out that the screen-shots boast that "Quiznos has a proven economic model which has brought more than 3000 stores worldwide into business" and that Quiznos offers "[o]ngoing local support once your store is open." *(Id.* at Bates No. Q-REF 007008.) Notably, Quiznos' website also indicated that Quiznos has "an **[*15]** experienced real estate team who will help you with site selection and lease negotiation" and that it will take "[a]pproximately 4 months from securing a site" to open a restaurant. *(Id.* at Bates No. Q-REF 007009.) Quiznos' website also stated that franchisees would find a restaurant location by "[w]orking with [Quiznos'] network of brokers" who would "help [franchisees] select a location within Quiznos Sub stringent site criteria." *(Id.)* However, like the printed advertising materials, the screen-shots submitted by Plaintiffs contain very little substantive information regarding the franchise agreement or franchisee duties.

In addition to written materials and the internet, Quiznos put on live shows, or "open houses" to sell restaurants. The open houses typically took place in local hotels or conference centers and apparently focused on coordinated Power Point presentations given by trained Quiznos sales representatives. (Doc. # 232.) To provide a behind-the-scenes view of the open houses, Plaintiffs submit a declaration from a former Quiznos sales person, Dave Sharma, whom Quiznos allegedly fired for failing to meet his sales goals. (Doc. # 217.) Mr. Sharma declares that Quiznos required **[*16]** presenters like himself to attend sales training in Denver and that Quiznos' corporate office provided all of the materials used during the seminars. *(Id.* P 14.) According to Mr. Sharma, Quiznos' open houses informed prospective franchisees that Quiznos would help them with real estate matters at each step of the sales process. *(Id.)* He also stated that Quiznos used printed advertisements and materials at the open houses to promote franchise sales. *(Id.* PP 12-14.)

3. *The Plaintiffs' Experiences*

Each named Plaintiff purchased the right to open a Quiznos franchise in 2003 or 2004, but none of them opened a restaurant. *(See, e.g.,* Doc. # 89, PP 3-13.) Some Plaintiffs have had their franchise agreements terminated, others

[5] At various points in their briefing, Plaintiffs resort to rhetorical and inflammatory language to describe Quiznos' sales practices, *e.g.,* "charade," "dupe," calling Quiznos personnel "hucksters," etc. These discretions from legal civility do not help Plaintiffs' case and the Court encourages counsel to pause a moment before resorting to the computer **[*13]** thesaurus tool when writing their briefs.

have signed release agreements, and others remain as SNOs within the Quiznos system. Their stories demonstrate how Quiznos put its multifaceted marketing campaign to work. Although mailings, internet research, and seminars often began the franchisee sales process, in each case, a prospective franchisee met with a Quiznos representative face-to-face before signing a franchise agreement. Plaintiffs allege that these representatives simply parroted Quiznos' misleading marketing **[*17]** materials. Notably, Plaintiffs allege that Quiznos' representatives told them that Quiznos would provide expert assistance in locating real estate and opening the store. But, when it came time to sign the franchise agreement, instead of providing assistance or answering questions, the Quiznos representative would sit them down and quickly and forcefully guide them through the thirty-plus page contract and addendums. Plaintiffs claim the representatives simply told them where to sign and deflected any questions regarding the terms of the agreement.

For example, Plaintiff Anthony Bonanno went to Quiznos' website, filled out the financial survey application and began to receive mailings from Quiznos inviting him to attend an open house. (Doc. # 214 P 2.) In response to the mailings, Plaintiff Anthony Bonanno's father, Plaintiff Raymond Bonanno, attended an open house at a local hotel. The older Bonanno must have liked the presentation because the younger Bonanno then set up a face-to-face meeting with a Quiznos representative who had presented at the open house. *(Id.* P 6.) The Bonannos allege that the Quiznos representative then pressured them into purchasing a particular target area by **[*18]** saying that all of the good areas would be sold quickly. *(Id.)*

Like the Bonannos, Plaintiff Sliwowski also met with a Quiznos representative, this time at a Quiznos store in Connecticut. (Doc. # 213 P 4.) He alleges that the Quiznos representative pressured him into purchasing a franchise by telling him that all of the good locations were "going fast." *(Id.)* Plaintiff Klatt [6] learned about a Quiznos open house from advertisements in the local paper. (Doc. # 215 P 2.) At the time he first learned about Quiznos, Plaintiff Klatt lived in Washington state but wanted to move back to California. He states that Quiznos representatives encouraged him to move by promoting target areas in and around San Diego. [7] *(Id.* PP 5-6.)

Regardless of how they learned about Quiznos, Plaintiffs never opened a restaurant. [8] Some named Plaintiffs sought legal advice regarding the return of their franchise fee, but claim to have been repelled by the cost of individual case litigation. Interestingly, given that this is a Motion for Class Certification, Plaintiffs never specifically address how the class action bar or any other term of the Franchise Contract relating to dispute resolution played into Quiznos' allegedly deceptive scheme. Nor do Plaintiffs mention any efforts by Quiznos representatives to discuss and explain, on one hand, or hide or conceal, on the other, the class action bar provision or any other particular provision in Section 21.4.

C. <u>Quiznos' Side of the Story: The Uniform Franchise Offering Circular and the Franchise Agreement Terms</u>

Quiznos concedes that it used a number of channels to sell its franchises, including the internet, print media, radio and television, and live seminars. (Doc. # 259 at 5.) Quiznos states that it has taken "great care" to ensure that its marketing materials provide the correct information regarding its franchises and that the materials conform with the terms of the franchise agreement. Quiznos also states that the degree of assistance Quiznos provided to named Plaintiffs varied, but that it provided such assistance in a manner consistent with the marketing materials and represen-tations made by its sales people. Quiznos also points out that it was required by law to provide a Uniform

---

[6] In his declaration, Plaintiff Klatt's last name is spelled "Klatt." (Doc. # 152.) However, the case caption refers to Plaintiff "Clatt." The Court assumes this the same person and will refer to Plaintiff Klatt as his named is spelled in his declaration.

[7] Plaintiffs have submitted numerous additional descriptions of how they came to sign a Quiznos franchise agreement, but none of them differ in any meaningful way from the Bonannos, Mr. Sliwowski or Mr. Klatt's experience -- **[*19]** each allege that Quiznos pressured them into purchasing a franchise without properly explaining the duties that accompanied franchise ownership or the one-year deadline. *(See, e.g.,* Docs. # 223, 224, 225 & 226.)

[8] Quiznos argues that failure of Plaintiffs to open a restaurant was not a result of any fraud, but because Plaintiffs failed to propose suitable restaurant sites pursuant to the terms of the franchise agreement or, as in the case of Plaintiff Whitehall, they failed to **[*20]** propose any site at all. (Doc. # 259 at 14.)

Franchise Offering Circular (now known as the "Uniform Franchise Disclosure Document," and referred to herein as "UFOC") to each franchisee and that the marketing materials conform to the UFOC. *(Id.* at 6.)

Quiznos contends that, although the marketing materials are accurate, the UFOC and franchise agreement clearly set forth the rights and obligations of the **[*21]** franchisees and the one-year deadline. Quiznos points out that the UFOC states in all capital, bold letters that:

> WE MAY TERMINATE YOUR FRANCHISE AGREEMENT IF YOU DO NOT OPEN YOUR RESTAURANT WITHIN 12 MONTHS AFTER YOU SIGN THE FRANCHISE AGREEMENT. THE FRANCHISE FEE IS NONREFUNDABLE.

(Id. at 8.) Additionally, Quiznos argues that the UFOC makes clear that it is the franchisee's obligation to "propose the location" for Quiznos' approval. Furthermore, Quiznos asserts that, in UFOCs used since 2001, it has disclosed the number of purchased franchises that failed to open a restaurant, *i.e.,* the number of SNOs. *(Id.* at 7-8.) Notably, Plaintiffs do not deny that Quiznos provided them with the UFOCs at least ten days prior to their signing of their respective franchise agreements, although they argue that they did not necessarily read them.

Quiznos also identifies a number of terms in the franchise agreement that it believes refutes Plaintiffs' claims. These terms often mimic the disclosures in the UFOC, *e.g.,* Franchise Agreement § 3.1 states, "Franchisee shall choose and acquire a location for its Restaurant within the nonexclusive Target Area set for in Exhibit 1;" § 9.1(a) states, "Franchisee **[*22]** acknowledges that Franchisor has no obligation to select or acquire a site on behalf of Franchisee;" and § 23.2 states, "Franchisee further acknowledges and agrees that no representations have been made to it by Franchisor or its affiliates regarding projected sales volumes, market potential, revenues, profits of Franchisee's Restaurant, or operational assistance provided by Franchisor or its representatives." (Doc. # 259 at 10.) The franchise agreements also contain a choice of law and choice of venue clause that mandates the application of Colorado law and requires a franchisee to file a claim in Colorado, either in the District Court for the City and County of Denver or this Court. *(See* Doc. # 1-4 § 21.1.)

In essence, Quiznos does not seriously refute the facts alleged by Plaintiff, but instead challenges the conclusions that Plaintiffs reach regarding the franchise sales script. Quiznos contends that Plaintiffs' fraud theory defies logic and business sense because Quiznos and its representatives had a financial incentive, in the form of sales royalties and bonuses, to open the restaurants they sold.

However, despite all of the parties' factual allegations and arguments on the merits **[*23]** of the case, the critical issue before the Court is the enforceability of Section 21.4, which contains the class action bar.

II. PROCEDURAL HISTORY

Turning now to the history of this case, Plaintiffs originally filed suit in New Jersey state court in February 2006. (Doc. # 1-2.) In March 2006, Quiznos removed the case to the U.S. District Court for the District of New Jersey pursuant to the Class Action Fairness Act. *(See* Doc. # 1-1.) Quiznos then quickly moved to dismiss the case based on the venue selection clause in the franchise agreement. [9] However, instead of dismissing the case, the District Court in New Jersey transferred the matter to this Court pursuant to *28 U.S.C. § 1404(a)*. (Doc. # 24.)

---

[9] Plaintiffs made similar arguments against enforcement of the venue selection clause that they make here against enforcement of the class action bar. However, Judge Cavanaugh rejected each of Plaintiffs' arguments. First, he found that Quiznos had not fraudulently induced Plaintiffs into agreeing to the venue selection clause. (Doc. # 23 at 5-6.) He held that to avoid application of the clause Plaintiffs must show that the venue selection clause itself, as opposed to the entire contract, had **[*24]** been fraudulently induced and Plaintiffs failed to meet that burden. *(Id.)* Judge Cavanaugh further rejected Plaintiffs' contention that the unequal bargaining power between Quiznos and prospective franchisees rendered the venue selection clause unenforceable. *(Id.* at 6-7.) Judge Cavanaugh also rejected Plaintiffs' claim that the franchise agreement was unreasonable or unconscionable because Quiznos presented it on a "take-it-or-leave-it" basis. *(Id.* at 9-10.)

This Court received the case in December 2006, at which time Quiznos filed a motion to dismiss pursuant to Federal *Rule 12(b)(6)*. (Doc. # 41.) Before the Court could rule on that motion, Plaintiffs amended their Complaint. (Doc. # 89.) In August 2007, Quiznos filed a second Rule 12(b)(6) motion to dismiss (Doc. # 103), which the Court denied. (Doc. # 174.) Because the parties had agreed to attempt mediation, Quiznos sought numerous extensions of time to respond to the Amended Complaint. When mediation proved unsuccessful, the parties proceeded with discovery. Quiznos eventually filed an answer to the amended complaint and a counterclaim, which Plaintiffs have moved to dismiss. (Doc. ## 229 and 249.) Quiznos amended the counterclaim **[*25]** in November 2008. [10] (Doc. # 255.)

On the issue of class certification, Plaintiffs first moved for class certification in January 2008. (Doc. # 140.) The Court denied that motion as premature, but indicated that Plaintiffs could re-file after they had completed discovery. (Doc. # 197.) In September 2008, Plaintiffs re-filed their Motion for Class Certification (Doc. # 212) and requested a hearing on the issue. (Doc. # 282.) The Court granted the request for a hearing, which it scheduled for April 23-24, 2009, but it also held oral argument on the distinct issue of the enforceability of class action bar on March 2, 2009. The Court invited the parties to submit supplemental briefing solely on the class action bar issue, and both parties have submitted such briefing. (Doc. ## 299 and 301.) [11]

III. STANDARD OF REVIEW

HN1[] Typically, named parties conduct litigation on behalf of themselves; a class action is an exception to this rule. *See General Tel. Co. of S.W. v. Falcon, 457 U.S. 147, 155, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)* (citing *Califano v. Yamasaki, 442 U.S. 682, 700-701, 99 S. Ct. 2545, 61 L. Ed. 2d 176 (1979))*. ***HN2***[] Federal *Rule 23* governs class certification and district courts have discretion to certify or deny certification of a class. *Shook v. El Paso County, 386 F.3d 963, 968 (10th Cir. 2004)*; *Paton v. New Mexico Highlands Univ., 275 F.3d 1274, 1278 (10th Cir. 2002)*. ***HN3***[] In order to certify a class, the class proponent must clearly satisfy four prerequisites contained in *Rule 23(a)*:

> (1) the class is so numerous that joinder of all members is impracticable;
> (2) there are questions of law or fact common to the class;
> (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and
> (4) the representative parties will fairly and adequately protect the interests of the class.

Fed. R. Civ. P. 23(a); *Shook, 386 F.3d at 968* (noting that district court should perform **[*27]** "rigorous analysis of whether the prerequisites of *Rule 23(a)* have been satisfied") (internal quotations and citations omitted); *Clark v. State Farm Mut. Auto. Ins. Co., 245 F.R.D. 478, 481 (D. Colo. 2007)* (noting the "strict burden of proof" under *Rule 23(a)*).

HN4[] Only if the class proponent can satisfy the prerequisites of *Rule 23(a)*, does the court need to determine if the matter falls within one of the categories identified in *Rule 23(b)*. *See Fed. R. Civ. P. 23(b)* ("A class action may be maintained if *Rule 23(a)* is satisfied); *see also Moore's Federal Practice § 23.40[1]* (3d. ed. 2007). Courts have held that the same rigorous analysis under *Rule 23(a)* also applies under the *Rule 23(b)* categories. *See In re Initial Pub. Offering Sec. Litig., 471 F.3d 24, 33 n.3 (2d Cir. 2006)*.

HN5[] In ruling on class certification, district courts should not delve deeply into the merits of the parties' claims or defenses. *See J.B. v. Valdez, 186 F.3d 1280, 1290 n.7 (10th Cir. 1999)* ("We recognize that, when deciding a

---

[10] The Counterclaim pleads a breach of contract claim against Plaintiffs for failing to open their restaurants within one-year. (Doc. # 255.)

[11] The parties have filed other motions since the Motion for Class Certification, including Plaintiffs' Motion for a Protective Order to Enjoin Improper Communications with the Putative Class (Doc. # 268), Plaintiffs' Motion for Rule 11 Sanctions (Doc. # 270), and, **[*26]** most recently, Quiznos' Motion for Summary Judgment. (Doc. # 312.) The Court will address the other outstanding motions in separate orders.

motion for class certification, the district court should accept the allegations contained in the complaint as true."); *see also* Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 177-78, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974) ("We **[*28]** find nothing in either the language or history of Rule 23 that gives a court any authority to conduct a preliminary inquiry into the merits of a suit in order to determine whether it may be maintained as a class action."); Cook v. Rockwell Int'l Corp., 151 F.R.D. 378, 380-81 (D. Colo. 1993) (noting that inquiry into the merits is "inappropriate" when determining whether action meets the requirements of Rule 23). Thus, courts should analyze whether the class proponent has met its burden based on the substantive allegations in the complaint and evidence submitted along with the motion for class certification.

Courts disagree on whether they should interpret Rule 23 liberally or strictly. *See* Moore's Federal Practice § 23.03 (3d ed. 2007) (arguing for "flexible approach" to Rule 23); *see also* Roby v. St. Louis S.W. Ry. Co., 775 F.2d 959, 961 (8th Cir. 1985) (noting that Rule 23 should be strictly applied). However, **HN6**[] the Tenth Circuit Court of Appeals falls into the liberal interpretation camp and has held that courts in this Circuit should err in favor of certifying a class. *See* Esplin v. Hirschi, 402 F.2d 94, 99 (10th Cir. 1968) ("any error, if there is to be one, should be committed in **[*29]** favor of allowing the class action"); *see also* Clark, 245 F.R.D. at 481 ("where the case is close, I will err in favor of allowing maintenance of the class action").

While the Court is cognizant of this standard of review, as discussed below, this standard is only tangentially relevant to the Court's analysis because the real issue at this point is not whether Plaintiffs can comply with Rule 23, but whether the Court should enforce the class action bar.

DISCUSSION AND ANALYSIS

As Plaintiffs note in their Motion, the "most significant issue" at this point is whether this Court should enforce the class action bar in the franchise agreements. Plaintiffs argue that the class action bar is unenforceable because (1) it is unconscionable, and (2) Quiznos cannot demonstrate the Plaintiffs knowingly and voluntarily "waived" their "right" to proceed as a class. Quiznos responds that Plaintiffs cannot prove that the bar is unconscionable and that, like any "right," Plaintiffs can "waive" their "right" to proceed as a class. Alternatively, Quiznos argues that Plaintiffs cannot satisfy Rule 23. The Court need not address the merits under Rule 23 because it finds the class action bar enforceable and, **[*30]** therefore, it concludes that the franchise agreement precludes class certification in this matter.

The Court first discusses the history and evolution of class action litigation, which leads the Court to conclude that Plaintiffs can preclude themselves from proceeding as a class. After that, the Court discusses which party bears the burden to show that the class action bar is enforceable or unenforceable, as the case may be. The Court then reviews previous treatment of class action bars and/or waivers. Finding little guidance in the case law treatment of class action bars, the Court turns to an analysis of the class action bar under the law of unconscionability in Colorado. Finally, the Court will briefly address its own jurisdictional and prudential concerns regarding enforcement of the class action bar.

IV. THE HISTORY AND EVOLUTION OF CLASS ACTION LITIGATION

The historic origin and modern evolution of class action lawsuits offer insight into the elements the Court should consider when deciding whether to enforce the class action bar.

A. Evolution of Class Actions as a Procedural Tool

Class actions grew out of the English common law. *See* 1 Newberg on Class Actions § 1:9 (4th ed. 2008) **[*31]** (hereafter "Newberg"). Under the old divided law and chancery court system, English chancery courts developed the "Necessary Parties Rule." *Id.* The Rule mandated the joinder of all interested persons in one suit, so as to avoid multiplicative litigation. *Id.; See* Geoffrey C. Hazard, John L. Gedid & Stephen Sowle, *A Historical Analysis of the Binding Effect of Class Suits,* 146 U. Pa. L. Rev. 1849, 1858-59 (1998).

As was the case with many English legal doctrines, the Necessary Parties Rule was incorporated into the United States' legal system. *See* Hazard, Gedid & Sowle, *146 U. Pa. L. Rev. at 1858-59*. As early as the 1840s, the Federal Equity Rules, a precursor to the modern Federal Rules of Civil Procedure, had codified the mandatory joinder concept. *See* Newberg § 1:9. By 1912, the Equity Rules contained two provisions, Rules 27 (stockholders' bill) and 38 (representative of a class) that allowed absent parties to be bound by a judgment obtained by a representative member. *Id.; see also Hartford Life Ins. Co. v. Ibs, 237 U.S. 662, 35 S. Ct. 692, 59 L. Ed. 1165 (1915)* (group of plaintiffs brought suit against insurer "in their own behalf and on behalf of all others similarly situated").

In the 1930s, upon the merger **[*32]** of law and chancery, the first version of the Federal Rules of Civil Procedure contained Federal *Rule 23*, an offshoot of the Equity Rules and the Necessary Parties Rule that had preceded it, but which was far more flexible than its predecessors. According to some commentators, the new Federal *Rule 23* was adopted as a result of difficulty in joining the increasing numbers of litigants under the older equity rules. *See* Hazard, Gedid & Sowle, *146 U. Pa. L. Rev. at 1878*. *Rule 23* substantially revised former Equity Rules 27 and 38 by expanding the reach of class litigation outside the equity courts to allow representative suits, wherein a select group of litigants enforced or defended the rights of a larger class of parties, even if members of the class had not been joined. *See* Newberg § 1.9. Thus, although equity jurisprudence had allowed class-like suits in the past, the Federal Rules now allowed, for the first time, class suits for damages in the United States. *See* Newberg § 1.9.

Early opposition to class actions came largely from prospective class plaintiffs who resisted the possibility of being bound by a judgment obtained without their participation in the litigation. *See* Abram Chayes, **[*33]** *Public Law Litigation and the Burger Court, 96 Harv. L. Rev. 4, 26 (1982)*. Perhaps because of this resistance, the early class action rule required a more concrete "jural" relationship between the proposed class members and the subject of the litigation than do modern class actions. *See Ortiz v. Fibreboard Corp., 527 U.S. 815, 823, 119 S. Ct. 2295, 144 L. Ed. 2d 715 (1999)*; Stephen C. Yeazell, *Group Litigation and Social Context: Toward a History of the Class Action,* 77 Colum. L. Rev. 866, 877 (1977). Each member of the class had to have an interest in the subject matter before the court, such that any member of the class could proceed in her own right. Chayes, *96 Harv. L. Rev. at 26*. However, as litigation evolved, the depth of personal interest in the subject of the litigation that a prospective class member needed to have to sustain membership in the class began to erode and the role of the class action began to change.

The most critical step in the evolution of class litigation came in 1966, when the Advisory Committee adopted a substantial revision of the much-maligned original Federal *Rule 23* and brought class actions into the modern era. *See Amendments to Rules of Civil Procedure, Supplemental Rules for Certain Admiralty & Maritime Claims Rules of Criminal Procedure,* 39 F.R.D. 69, 97 (1966). **[*34]** The Advisory Committee acknowledged that the rather arcane definitions used in the previous version of Federal *Rule 23* and the uncertainty regarding the "proper extent of the judgments in class actions" impeded the usefulness of *Rule 23*. 39 F.R.D. at 99; *see also Ortiz, 527 U.S. at 842*. Thus, the Committee sought to make the class action rule more "practical" for courts and parties. *Id.* at 99-100. By doing so, it ushered in the era of widespread use of class actions in American courts.

The new Federal *Rule 23* accompanied (and likely helped to precipitate) the paradigm shift towards the use of class actions for so-called "impact litigation." Milton Handler, *The Shift from Substantive to Procedural Innovations in Antitrust Suits - The Twenty-Third Annual Antitrust Review,* 71 Colum. L. Rev. 1, 5-6 (1971) ("The impact [of the 1966 revisions to *Rule 23*] has been due not so much to the literal text of the new rule as to the broad and far-reaching use to which it has been put by the attorneys representing treble damage claimants."). Substantively, the 1966 revision broadened Federal Rule 23's scope by eliminating the previous rule's requirement of a strict "jural relationship" among putative **[*35]** class members. *See* Newberg § 1:10. The new rule also proved far more flexible from a procedural aspect, and, as the American economy and consumer culture grew more widespread, class actions under the revised Federal *Rule 23* became an important procedural stick for marginalized plaintiffs to wield against powerful defendants. *See Amchem Prods. v. Windsor, 521 U.S. 591, 617, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* ("The policy at the very core of the class action mechanism is to overcome the problem that small recoveries do not provide the incentive for any individual to bring a solo action prosecuting his or her rights.") (quotations and citations omitted); *Discover Bank v. Superior Court, 36 Cal. 4th 148, 30 Cal. Rptr. 3d 76, 113 P.3d*

1100, 1109 (Cal. 2005); *cf. generally* Handler, 71 Colum. L. Rev. 1 (arguing that "blockbuster" class actions in treble damages antitrust suits shift focus away from substantive law by adding "needlessly to the scope and complexity of litigation").

B. Class Actions Remain a Procedural Tool, Not a Substantive Right

There is no question that class actions serve the goals of judicial efficiency and practicality by making multi-party litigation more expeditious and economical. *See* Califano, 442 U.S. at 701 ("[T]he class-action **[*36]** device saves the resources of both the courts and the parties by permitting an issue potentially affecting every [class member] to be litigated in an economical fashion under Rule 23."); Gottlieb v. Wiles, 11 F.3d 1004, 1007 (10th Cir. 1993) ("Rule 23 was intended to promote the efficient resolution of claims in cases involving multiple parties with similar claims, to eliminate repetitious litigation, and to avoid inconsistent judgments.") *overruled in part on other grounds by* Devlin v. Scardelletti, 536 U.S. 1, 122 S. Ct. 2005, 153 L. Ed. 2d 27 (2002). Nonetheless, ***HN7***[] Federal Rule 23 clearly remains a procedural tool, not a substantive or jurisdictional right. *See* Ortiz, 527 U.S. at 846 ("The Rules Enabling Act [for the 1966 revisions to the Federal Rules] underscores the need for caution. As we said in *Amchem,* no reading of the Rule can ignore the Act's mandate that rules of procedure 'shall not abridge, enlarge or modify any substantive right.'") (quotations omitted); Deposit Guar. Nat'l Bank v. Roper, 445 U.S. 326, 332, 100 S. Ct. 1166, 63 L. Ed. 2d 427 (1980) ("[T]he right of a litigant to employ Rule 23 is a procedural right only, ancillary to the litigation of substantive claims.").

Thus, the history and evolution of class action litigation demonstrates **[*37]** that ***HN8***[] class certification is a procedural mechanism, not a substantive right. As such, this Court believes that a lesser level of scrutiny is applicable to an agreement by a party not to proceed as a class, as compared to the level of scrutiny that the Court would apply to a similar agreement purporting to waive a substantive right, such as the constitutional right to a jury trial. *See, e.g.,* Dreiling v. Peugeot Motors of Amer., Inc., 539 F. Supp. 402, 403 (D. Colo. 1982) (discussing contractual waiver of jury trial right). With the theoretical and historical considerations of class litigation in mind, the Court now turns to the initial step in its analysis of whether the class action bar provision should be enforced in this case, *i.e.,* which party bears the burden regarding its enforceability or unconscionability.

V. PLAINTIFFS BEAR THE BURDEN OF SHOWING THE CLASS ACTION BAR IS UNENFORCEABLE OR UNCONSCIONABLE

Plaintiffs analogize the class action bar provision of Section 21.4 to a jury trial waiver provision. Based on this analogy, Plaintiffs argue that Quiznos bears the burden to show that Plaintiffs voluntarily and knowingly relinquished their "right" [12] to proceed as a class. *(See,* ***[*38]*** *e.g.,* Doc. # 296 at 11.) In support of their argument, Plaintiffs rely heavily on *Dreiling,* which involved a jury trial waiver in a contract between an auto manufacturer and its dealership. 539 F. Supp. at 403. According to Plaintiffs, *Dreiling* supports the idea that a powerful franchisor like Quiznos cannot enforce a class action "waiver" contained in a take-it-or-leave-it franchise agreement.

Quiznos responds that the right to proceed in a class action is procedural only and is distinct from a Constitutional right like a the right to a jury trial. Quiznos contends that the clause is not a waiver in the true sense of that term and, therefore, Plaintiffs, as the parties seeking to avoid application of a contractual term, bear the burden of showing that the class action bar is unconscionable. Thus, Quiznos contends that it does not have to make the same showing that would be required if dealing with a jury trial waiver. Alternatively, Quiznos **[*39]** contends that Plaintiffs have knowingly waived their "right" to proceed as a class.

The Court finds that ***HN9***[] the ability to proceed as a class is not akin to the right to a jury trial (or any other substantive or Constitutional right, for that matter). Because a jury trial is guaranteed by the Constitution, courts do not have discretion with respect to deciding whether or not to allow a trial by jury - that is a decision made by the parties. Notably, the history of class litigation reflects that the courts, not the parties, determine whether a suit

[12] The parties refer to class certification as a "right," so the Court will use this terminology as well. However, as discussed below, this terminology is questionable. At most, the "right" to proceed as a class is procedural rather than substantive.

should proceed on a class basis. Courts make this decision as a matter of judicial efficiency, not out of an obligation to uphold the parties' substantive rights, a fact that the Supreme Court continues to reiterate. *See Califano, 442 U.S. at 701*. In short, Plaintiffs do not have a substantive "right" to proceed as a class. *See, e.g., Ortiz, 527 U.S. at 846*; *Amchem, 521 U.S. at 617*; *Roper 445 U.S. at 332*. Thus, a jury trial waiver provision is not analogous to a class action bar provision.

This distinction leads the Court to conclude that *Dreiling* is inapposite to the facts of this case. As the parties seeking to escape application of an unambiguous **[*40]** contractual provision, the burden rests on Plaintiffs to show that the Court should not enforce the class action bar provision. *See, e.g., Harris v. Green Tree Fin. Corp., 183 F.3d 173, 182 (3d Cir. 1999)* (***HN10***[] "The party challenging a contract provision as unconscionable generally bears the burden of proving unconscionability."). As shown below, Plaintiffs have not satisfied that burden in this case. [13]

VI. PREVIOUS OPINIONS REGARDING CLASS ACTION BAR PROVISIONS OFFER LITTLE GUIDANCE

Numerous earlier cases have addressed class action and/or class arbitration bars, usually in the context of mandatory arbitration clauses. Unfortunately, these cases offer little precedential value because, in most instances, they rely on wholly inapplicable legal standards or specific state laws that do not translate well to Colorado law. Even the one case the Court has located that deals specifically with a non-arbitration class action bar provision provides very little guidance. Regardless, because the parties have raised these cases in their briefs and at oral argument, the Court will address them and note any applicable holdings.

A. The *Kristian* and *American Express* Decisions Do Not Apply

Plaintiffs devote much of their argument to **[*42]** the First Circuit Court of Appeals' decision in *Kristian v. Comcast Corp., 446 F.3d 25 (1st Cir. 2006)*, and the Second Circuit Court of Appeals' decision in *In re Amer. Express Merchs. Litig., 554 F.3d 300 (2d Cir. 2009)*. In both cases, the respective appellate courts declined to enforce arbitration clauses that would have precluded the plaintiffs from pursuing their antitrust claims in a class context.

In *Kristian,* the class of plaintiffs consisted of cable television customers who claimed that the defendants, a group of cable television providers, had violated antitrust laws by unlawfully attempting to consolidate the market for cable television. *446 F.3d at 30*. Defendants moved to compel arbitration under a provision in their consumer contract. *Id. at 31*. Notably, the contract also precluded class or consolidated arbitration. *Id.* The plaintiffs opposed enforcement of the arbitration provision because they said it would prevent them from "vindicating their statutory rights." *Id. at 37*. [14] The *Kristian* plaintiffs also argued that the arbitration clause/class action bar was unconscionable under state law. *446 F.3d at 63*. However, the First Circuit Court of Appeals did not perform an **[*43]** unconscionability analysis

---

[13] Alternatively, if Quiznos did have to show that Plaintiffs knowingly and voluntarily waived their ability to proceed as a class, Quiznos has met that burden for many of the same reasons the Court finds that the waiver is not unconscionable under Colorado law. *See infra.* For example, the following facts indicate that Plaintiffs knowingly and voluntarily agreed to "waive" their right to proceed as a class: Plaintiffs understood what the language in Section 21.4 meant, Quiznos allowed and encouraged prospective franchisees to consult with an attorney before signing the franchise agreement, and many Plaintiffs had previous business experience, if not previous franchise experience. Moreover, as noted below in the discussion on unconscionability, the waiver was printed in normal typeface, and **[*41]** was not hidden from other contract terms. Contrary to Plaintiffs' position that prospective franchisees should be treated with deference because Quiznos offered them the franchise agreement on a take-it-or-leave-it basis, this fact alone does not render a waiver unenforceable. *See Postnet Int'l Franchise Corp. v. Amercis Int'l, Inc. 2006 U.S. Dist. LEXIS 42794, 2006 WL 1775599 (D. Colo. June 26, 2006)*.

[14] The "vindication of statutory rights" argument stems from the Supreme Court case of *Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 637, 105 S. Ct. 3346, 87 L. Ed. 2d 444 (1985)*. In *Mitsubishi,* the Supreme Court enforced a contractual arbitration provision and forced the counterclaimant to arbitrate its antitrust claims. *See generally id.* The Court held that a clause requiring arbitration of statutory claims was valid "so long as the prospective litigant effectively may **vindicate its statutory cause of action** in the arbitral forum." *Id.* (emphasis added).

because it concluded that the federal substantive law of arbitrability *(i.e., Mitsubishi* and the Federal Arbitration Act) supplied the more appropriate rule of decision. *Id.*

In arriving at its decision, the *Kristian* court acknowledged that the balance of other circuits favored enforcement of the class action bar, but only slightly. *See* *id. at 55* (noting that decisions from the Third, Seventh, and Eleventh Circuits have upheld consumer class action bars). However, *Kristian* distinguished the applicability of these cases largely on the ground that each of the previous circuit court decisions enforcing class arbitration **[*44]** bars involved claims against financial lenders under the Truth In Lending Act ("TILA"), whereas the claims in *Kristian* involved the Sherman Act and other antitrust laws. *Id. at 56-57*. The *Kristian* court found that the "sheer complexity" of an antitrust claim required an intensive factual analysis and prohibitively expensive expert testimony that a TILA claim did not. *Id. at 59*. Because of the costs and legal intricacy involved in the claims at issue, *Kristian* concluded that the plaintiffs could not enforce their rights, except on a class basis. *Id. at 59-61*. Thus, the *Kristian* court concluded that the class arbitration bar ran afoul of the economic and social goals contemplated by ***antitrust law***. *Id. at 61* ("[T]he social goals of federal and state antitrust laws will be frustrated because of the 'enforcement gap' created by the *de facto* liability shield."). The court, therefore, refused to enforce the class-precluding arbitration provision. *Id.*

Similarly, *American Express* involved a motion to compel arbitration of claims under ***antitrust law***. *554 F.3d at 307-08*. The *American Express* plaintiffs, a group of merchants that had contracted with American Express for credit card services, alleged **[*45]** that American Express had forced them to accept supracompetitive billing rates for credit card services in violation of *Section 1* of the Sherman Act. *Id. at 308*. American Express moved to compel arbitration pursuant to the applicable contracts, which also contained a provision barring class or representative arbitration. *Id.* The district court granted American Express' motion and left the question of enforceability of the class arbitration bar for the arbitrator to decide. *See* *In re Amer. Express Merchs. Litig., 2006 U.S. Dist. LEXIS 11742, 2006 WL 662341, at *4-*5 (S.D.N.Y. Mar. 16, 2006)*. The plaintiffs appealed, arguing that the district court had erred in referring the enforceability of the class arbitration bar to the arbitrator and that enforcement of the class bar precluded them from vindicating their rights under the Sherman Act. The Second Circuit Court of Appeals agreed with the plaintiffs and reversed.

The Second Circuit found that enforceability of the class arbitration bar was a question for the court, not the arbitrator. *554 F.3d at 310-11*. Then, like the *Kristian* court, the Second Circuit found that the unique and prohibitively expensive aspects of antitrust litigation precluded the plaintiffs from **[*46]** pursuing their claims on an individual basis:

> Concluding that Amex has brought no serious challenge to the plaintiffs' demonstration that their claims cannot reasonably be pursued as individual actions, whether in federal court or in arbitration, we find ourselves in agreement with the plaintiffs' contention that enforcement of the class action bar in the Card Acceptance Agreement 'flatly ensures that no small merchant may challenge American Express's tying arrangements under the federal antitrust laws.'

Id. at 319.

As with *Kristian,* the impetus behind the decision in *American Express* was the "public interest in vigilant enforcement of the **antitrust laws** through the instrumentality of the private treble-damage action," which could not be squared with an agreement that conferred *de facto* immunity from civil liability to American Express. *Id.* (quotations omitted and emphasis added) (citing *Lawlor v. National Screen Serv. Corp., 349 U.S. 322, 329, 75 S. Ct. 865, 99 L. Ed. 1122 (1955)*. Significantly, *American Express* did not address whether the class waiver was enforceable under the state law of unconscionability. *See* *id. at 320* (citing cases decided under state unconscionability laws and noting that "We do not follow **[*47]** these cases because they all rely on findings of unconscionability under state law, while we have relied here on a vindication of statutory rights analysis, which is party of the federal substantive law of abitrability.")

In addressing *Kristian* and *American Express,* Quiznos argues that this Court should follow *Ornelas v. Sonic-Denver T, Inc., 2007 U.S. Dist. LEXIS 6214, 2007 WL 274738 (D. Colo. Jan. 29, 2007)*, a previous decision from this district that declined to follow *Kristian (American Express* had not been decided). In *Ornelas,* the plaintiff sought to bring a class action against a local Toyota dealership because of alleged discrimination against non-English speakers in its leasing practices. *2007 U.S. Dist. LEXIS 6214, [WL] at *1*. The dealership moved to compel arbitration and the plaintiff resisted claiming that the arbitration clause was unenforceable. *2007 U.S. Dist. LEXIS 6214, [WL] at *3*. Like *Kristian* and *American Express,* the arbitration clause in *Ornelas* precluded class arbitration. *2007 U.S. Dist. LEXIS 6214, [WL] at *5*. Judge Figa rejected the plaintiff's argument that *Kristian* should apply because he found that *Kristian* was limited to antitrust cases. *2007 U.S. Dist. LEXIS 6214, [WL] at * 6*. Although Judge Figa did not go into great depth on the issue, he also found that at least one other court in the Tenth **[*48]** Circuit had upheld a consumer arbitration agreement precluding class arbitration and he saw no reason why such a provision would be automatically unconscionable or unenforceable. *See id.; see also Edwards v. Blockbuster, Inc., 400 F. Supp. 2d 1305 (E.D. Okla. 2005)*.

Ornelas, *Kristian* and *American Express* are all distinguishable from the instant case because this case does not involve an arbitration clause that also contains a class arbitration bar. The franchise agreement in the case at hand does not mandate arbitration; rather it precludes class or consolidated actions in this Court. Thus, the vindication of statutory rights analysis applied in *Kristian* and *American Express* is not directly applicable here because the enforceability question is not one of arbitrability, but of unconscionability under Colorado law. [15]

The arbitration distinction notwithstanding, this Court agrees with Judge Figa's decision in *Ornelas* **[*49]** and finds that this case is distinguishable from *Kristian* and *American Express.* As Judge Figa noted in *Ornelas,* the critical distinction between *Kristian* or *American Express* and this case is the nature of the claims at issue: antitrust versus what is essentially common law fraud. In *Kristian* and *American Express,* the courts relied on the unique, *i.e.,* complicated and expensive, aspects of ***antitrust law*** to support their refusal to enforce the arbitration clauses/class arbitration bars at issue. In both cases, the plaintiffs had presented evidence that their claims would require intricate legal analysis and expert testimony that might cost the plaintiffs upwards of one million dollars in expert fees alone. *See, e.g., 554 F.3d at 317*. When the appellate courts weighed this massive initial expense with the relatively small amount of individual monetary damages, both courts concluded that no plaintiff could or would pursue an individual antitrust claim against the defendants. Thus, under the circumstances of those antitrust cases, the class arbitration bars provided *de facto* immunity to the defendants.

In this case, by contrast, Plaintiffs' claims involve comparatively simple fraud and consumer **[*50]** protection-type claims. The majority of Plaintiffs' evidence will come from the plaintiffs themselves, rather than paid experts. Indeed, this evidentiary distinction is borne out by the number of personal declarations that Plaintiffs have submitted with their class certification briefs (over a dozen) versus the number of expert declarations (one). In other words, although Plaintiffs may hire an expert to support their case, the nature of their claims does not require the massive investment of resources that was required in *Kristian* or *American Express.*

This case also differs from *Kristian* and *American Express* in terms of the amount of Plaintiffs' prospective individual monetary recovery. In *Kristian,* the court found that recovery would likely be limited to hundreds or perhaps several thousand dollars per plaintiff. In *American Express,* the median individual recovery, **after trebling,** was just over $ 5,000. In the instant case, both parties agree that Plaintiffs typically paid between $ 20,000 and $ 25,000 for their initial franchise fee. [16] Thus, if they prevail, Plaintiffs in the instant case stand to receive an average of $ 60,000 to $ 75,000 after trebling, *i.e.,* significantly more **[*51]** damages than either the *American Express* or the *Kristian* plaintiffs. [17] This larger potential for individual recovery cuts against Plaintiffs' argument that the class action bar in this case is analogous to the provisions at issue in *Kristian* or *American Express.*

---

[15] *Kristian* acknowledged that "there are striking similarities between the vindication of statutory rights analysis and the unconscionability analysis." *446 F.3d at 63*. However, this similarity notwithstanding, *Kristian* explicitly declined to analyze state unconscionability law.

[16] Although, in some cases, the amount was lower and, in some cases, Plaintiffs paid multiple fees, by far the most common amounts were either $ 20,000 or $ 25,000.

[17] Moreover, Plaintiffs can recover the attorneys fees pursuant to the CCPA and they can recover their costs pursuant to Federal *Rule 54(d)*.

The vindication of statutory rights analysis upon which the decisions in *American Express* and *Kristian* were based, does not apply to Plaintiffs' claims in the instant case. Moreover, this case lacks the massive cost and the *de minimus* individual recovery that lead the *Kristian* and *American Express* courts to strike down the class arbitration bars at issue in those cases. Therefore, the Court concludes that *Kristian* and *American Express* are not applicable to the enforceability of the class action bar in this case.

B. Previous Decisions Based on State Unconscionabilty Law Provide Little Guidance

Aside from antitrust cases, a handful **[*52]** of federal courts applying a state law unconscionability analysis have also refused to enforce arbitration clauses that preclude class actions. *See, e.g., Douglas v. United States Dist. Court, 495 F.3d 1062 (9th Cir. 2007)* (applying California law); *Ting v. AT&T, 319 F.3d 1126 (9th Cir. 2003)* (same); *Luna v. Household Finance Corp. III, 236 F. Supp. 2d 1166 (W.D. Wash. 2002)* (applying Washington law). Likewise, a few state courts applying state unconscionability law have also declined to enforce provisions that precluded class arbitration. *See, e.g., Cohen v. DirecTV, Inc., 142 Cal. App. 4th 1442, 48 Cal. Rptr. 3d 813 (Cal. Ct. App. 2006)* (applying California law); *Powertel, Inc. v. Bexley, 743 So. 2d 570 (Fla. Dist. Ct. App. 1999)* (applying Florida law). On the other hand, at least one state court in New York has enforced an arbitration provision that would have precluded class arbitration. *See Hayes v. County Bank, 26 A.D.3d 465, 811 N.Y.S.2d 741 (N.Y. App. Div. 2006)* (enforcing class arbitration bar under New York law).

Unfortunately, these cases offer only marginal guidance because, in most instances, they involved critically different factual and legal circumstances and unique contractual provisions that render them inapplicable **[*53]** to the instant case. For example, most of the cases cited by the parties and those discovered by the Court's own research focused on whether an *arbitration* clause that barred class actions should be enforced. However, that issue does not arise in this case since there is no arbitration provision. Moreover, with the exception of California, which has radically different consumer protection laws than Colorado, there is no clear trend among the states on this issue. *Compare, e.g., Hayes, 811 N.Y.S. 2d at 743* (applying New York law and finding that "the fact that the arbitration agreements effectively preclude [plaintiff] from pursuing a class action does not alone render them substantively unconscionable") *with Cohen, 48 Cal. Rptr. 3d at 822-23* (applying California law and noting that "class action waivers may be found unconscionable in a variety of circumstances"). Due to the varied nature of the decisions and the critical factual and legal distinctions, the Court can draw little guidance from these previous decisions.

Even the lone case that contains a non-arbitration class action bar provides almost no guiding precedent. *See In re Yahoo! Litig., 251 F.R.D. 459 (C.D. Cal. 2008)* (withholding **[*54]** judgment on enforceability of class action bar under California law). [18] A purported class of Yahoo advertisers sued the internet search engine company alleging that Yahoo had failed to properly place advertisements in a "targeted" manner. *251 F.R.D. at 461-62*. Yahoo moved to dismiss the complaint pursuant to Federal *Rule 12(b)(6)* on the basis that the advertisers were precluded from suing as a class because of a class action bar provision in the Yahoo advertising contract they had signed. *Id. at 463*. In addressing Yahoo's motion, the Central District of California reviewed California law on the topic and found that a class action "waiver" was neither *per se* enforceable (as Yahoo argued) or *per se* unconscionable (as the plaintiffs argued). *Id. at 468-69*. In so holding, Judge Snyder found that the question of enforceability of a class action bar should be based on a well-developed factual record and that no hard-and-fast rules should apply. *Id.* The court then denied the motion to dismiss without prejudice, thus allowing Yahoo to reassert the issue after discovery. *Id.*

Thus, even *Yahoo*, which is analogous to this case, provides this Court with no clear direction regarding class action bars. However, this Court agrees with Judge Snyder that no bright line tests should apply and, in fact, Judge Snyder's pronouncement falls right in line with Colorado law on unconscionability, to which the Court now turns.

---

[18] The contract clause in *Yahoo!* was a pure class action bar, similar to the clause in Section 21.4 of the franchise agreement **[*55]** in this case, as distinguished from the arbitration provisions at issue in nearly all of the other cases that have addressed the class action bar. *See 251 F.R.D. at 468-69*.

VII. UNCONSCIONABILITY UNDER COLORADO LAW

Although the instant case began in New Jersey, the parties now agree that, pursuant to the choice of law clause in the franchise agreement, Colorado law (as well as federal law, when appropriate) will apply.

A. Applicable Law

HN11[] Courts applying Colorado law start with the presumption that a contract clause is enforceable. *See Allen v. Pacheco, 71 P.3d 375, 378 (Colo. 2003)* ("We will enforce the agreement as written unless there is an ambiguity in the language; courts should neither rewrite the agreement nor limit its effect by a strained construction."); *see also State Farm Mut. Auto. Ins. Co. v. Stein, 940 P.2d 384, 387 (Colo. 1997)* (same). The **[*56]** fact that the contract benefits one party more than the other does not alter the presumption of enforceabilty. *See, e.g., Thurmon v. Skipton, 157 Colo. 423, 403 P.2d 211, 214 (Colo. 1965)* ("Courts will enforce a contract as made, regardless of whether it is an improvident one from the standpoint of one of the parties."); *Roberts v. Adams, 47 P.3d 690, 696 (Colo. Ct. App. 2001)* (same); *Sedalia Land Co. v. Robinson Brick & Tile Co., 28 Colo. App. 550, 475 P.2d 351, 354 (Colo. Ct. App. 1970)* ("The general rule is that, if a party enters into a contract or any other legal transaction with sufficient mental capacity to understand it, and not under the influence of fraud, coercion or imposition, the courts will not relieve him of the consequences of his act on the sole ground that the bargain is improvident as to him."). As such, and as noted above, the party seeking to avoid application of a contractual provision bears the burden of showing that it is unconscionable. *See, e.g., Kerr-McGee Corp. v. Northern Utils., Inc., 673 F.2d 323, 329 (10th Cir. 1982)* (applying Wyoming law); *ADT Sec. Servs., Inc. v. Envision Telephone, Inc., 2008 U.S. Dist. LEXIS 100729, 2008 WL 5064268, at *5 (D. Colo. Nov. 21, 2008)* (applying Washington law).

Notably, none of the **[*57]** cases disclosed by the parties (and none found by the Court) involve the application of Colorado law to an unconscionability challenge to a class action bar provision identical to the one at issue in this case. [19] However, ***HN12***[] the Colorado Supreme Court has adopted a seven factor test to determine whether a particular contractual provision is unconscionable. *See Davis v. M.L.G. Corp., 712 P.2d 985, 991 (Colo. 1986)* (discussing unconscionability in context of an automobile rental contract).

In *Davis,* the Colorado Supreme Court listed seven non-exclusive factors that courts can consider in determining whether to enforce a contract provision:

(1) Is the agreement a standardized/form agreement made by parties with unequal bargaining power?
(2) Did the parties have an opportunity read and become familiar with the document before signing it?
(3) Did the document bury the provision in fine print?
(4) Is the provision commercially reasonable?
(5) Is the provision substantively unfair?
(6) What is the relationship between the parties? Was there notice or surprise?

(7) **[*58]** What are the remaining circumstances surrounding the formation of the contract, including its commercial setting, purpose and effect?

Davis, 712 P.2d 985 at 991.

Davis advises that no one factor predominates and courts should examine each of the factors in conjunction with the entirety of the circumstances surrounding the transaction. *Id.* If the entirety of the circumstances discloses evidence of "overreaching" by one party that causes a contract provision to unreasonably favor that party to the detriment of the other party, a court should decline to enforce the provision. [20] *See id.; see also Leprino v.*

---

[19] Nor does it appear that a court applying Colorado law has addressed the issue of unconscionability in the franchisor/franchisee context.

Intermountain Brick Co., 759 P.2d 835, 836-37 (Colo. Ct. App. 1988) (unconscionability under UCC sale of goods contract); *McMillion v. McMillion, 522 P.2d 125, 129 (Colo. Ct. App. 1974)* (unconscionability under dissolution of marriage contract) (unpublished opinion).

HN13[] Regardless of the test used, the question of unconscionability is a **[*59]** matter of law, *Leprino, 759 P.2d at 836*, and the results obtained by any formulation of the test are the same; if a contract clause is unconscionable, a court should not enforce it. *See, e.g., Davis, 712 P.2d at 991* (declining to enforce unconscionable provision). On the other hand, if a party cannot meet its burden to show that the contract clause is unconscionable, the court will enforce it. *Jones v. Dressel, 623 P.2d 370, 374-75 (Colo. 1981)* (enforcing exculpatory clause in non-adhesionary contract).

B. Enforceability of the Class Action Bar Under Colorado Law

With the above-discussion of Colorado law in mind, the Court now reaches the crux of the issue of this Motion: Is the class action bar enforceable? Or, more specifically, is the class action bar unconscionable under Colorado law?

Plaintiffs assert two primary arguments against enforcement of the class action bar: (1) that Quiznos' sales process infected the entire franchise agreement with fraud, thereby rendering the bar unconscionable, and (2) that enforcement of the class action bar is substantively unfair.

1. *The Franchise Agreement is a Standard Form Contract*

Plaintiffs contend that the first *Davis* factor, whether the contract **[*60]** was a standard form or negotiated, favors their position. The Court agrees, but Plaintiffs' advantage on this issue is slight.

It is undisputed that Quiznos offered franchisees a standard form franchise agreement on a take-it-or-leave-it basis. This fact suggests the potential for unconscionability and overreaching by Quiznos. However, unlike the California cases upon which Plaintiffs rely, ***HN14***[] under Colorado law, a take-it-or-leave-it contract does not automatically render the agreement unconscionable. *See Batterman v. Wells Fargo Ag Credit Corp., 802 P.2d 1112, 1116 (Colo. Ct. App. 1990)* (holding that lender could use superior bargaining position and require "protective terms in the contract" without rendering the contract adhesory); *Clinic Masters, Inc. v. District Court for County of El Paso, 192 Colo. 120, 556 P.2d 473, 475-76 (Colo. 1976)* (holding that form contract offered on a take-it-or-leave it basis does not render a contract unconscionable). Moreover, the parties in this case did not have an ongoing relationship prior to executing the franchise agreement. Thus, Plaintiffs were not faced with the Faustian decision of terminating their pre-existing contract or accepting a newly-added class action **[*61]** bar they did not want. *Cf. Discover Bank v. Superior Court, 36 Cal. 4th 148, 30 Cal. Rptr. 3d 76, 113 P.3d 1100, 1103-04 (Cal. 2005)* (declining to enforce class arbitration bar when credit card issuer added bar in a take-it-or-leave-it change of terms provision to existing agreement). Moreover, Plaintiffs did not have to enter in the franchise agreement with Quiznos. They were free to purchase a different franchise or invest their money elsewhere without any financial repercussions to themselves or Quiznos. *See Jones, 623 P.2d at 375* (no adhesion contract when services provided by defendant could be obtained elsewhere); *Clinic Masters, 556 P.2d at 476* (fact that services could be purchased elsewhere militates against finding of unconscionability).

However, the fact remains that Plaintiffs could not truly negotiate or re-write any provisions of the franchise agreement, including the class action bar. Therefore, because the class action bar is undeniably part of a form agreement signed by parties with unequal bargaining strength, the first *Davis* factor cuts mildly in Plaintiffs' favor.

2. *Plaintiffs Had Ample Opportunity to Read the Franchise Agreement Before Signing It*

The second *Davis* factor, whether the prospective franchisees **[*62]** had a chance to read and become familiar with the document before signing it, favors enforcement of the class action bar.

---

[20] Likewise, although it is not directly applicable to the facts of this case, the U.C.C. recognizes that a contract term's "commercial setting, purpose, and effect" may aid the court in determining whether a term is unconscionable. *See C.R.S. § 4-2-302(2)*.

Quiznos provided a copy of the franchise agreement with the UFOC ten days prior to allowing a potential franchisee to sign the contract. Moreover, Quiznos encouraged franchisees to consult with a lawyer. Plaintiffs contend that this was insufficient because Quiznos did not tell the potential franchisees that "there was only one acceptable way to complete the Disclosure Acknowledgment Statement [21] ("DAS") until the day the DAS was to be signed." (Doc. # 296 at 10.) However, the defect in disclosure that Plaintiffs identify does not relate to the class action bar and the alleged infirmity with the UFOC does not reduce the amount of time that franchisees had to read the franchise agreement. Thus, Plaintiffs cannot deny that they had at least ten days to review a copy of the franchise agreement before they signed it. In fact, most of the Plaintiffs admit that they read some or all of the agreement before signing it. Regarding those franchisees who chose not to read the franchise agreement (or chose not to read all of it), the decision not to read the agreement before **[*63]** signing does not change the fact that Quiznos gave franchisees **the opportunity** to read the agreement.

Given the ten-day disclosure and the ability of the Plaintiffs to procure legal counsel, this factor cuts squarely in Quiznos' favor.

3. *Section 21.4 Does Not Use Fine Print*

The third *Davis* factor, the use of fine print or other typographical trickery, also favors enforcement of the provision.

Plaintiffs argue that Quiznos strategically placed the class action bar in the middle of a paragraph near the end of the forty-page agreement and this placement suggests unconscionability. The Court disagrees. The provision containing the class action bar is written in the same typeface, using the same font size as the remainder of the franchise agreement. The fact that it comes towards the end of the agreement does not make it any more difficult to see or understand than a provision placed **[*64]** on the third or thirteenth page of the franchise agreement. With certain exceptions, courts should not be in the business of telling parties how to style their contracts and this case is no exception. Therefore, this factor also favors enforcement of the class action bar.

4. *The Waiver Serves a Commercial Purpose*

The fourth *Davis* factor, the absence of a commercially reasonable justification for the class action bar, is almost even between the parties. But, on the evidence before it, the Court concludes that it tips slightly in favor of enforceability.

Undoubtedly, the class action bar makes mass litigation more difficult for Quiznos' franchisees. Thus, the waiver potentially reduces the number of large lawsuits that Quiznos faces from disgruntled franchisees. This reduction in litigation could plausibly serve a commercial purpose, at least from Quiznos' perspective. Like other provisions that discourage litigation, even meritorious litigation, *e.g.,* exculpatory clauses, contractual statutes of limitations, limitations on punitive damages, etc., the class action bar likely benefits Quiznos' bottom line. Quiznos attempts to phrase it in somewhat more favorable terms and contends that the **[*65]** class action bar reduces dispute resolution costs and affords "greater predictability in decision-making, budgeting and planning" for Quiznos and its franchisees. (Doc. # 301 at 9.) Although the Court questions whether Quiznos really wants to open up the possibility of thousands of individual lawsuits by disgruntled SNOs, and whether such a result would be commercially beneficial, it is not this Court's responsibility to question the seemingly rational, somewhat heavy-handed business choices made by private parties in their contractual dealings.

Plaintiffs do little to refute Quiznos' position on this factor, but instead try to spin it in their favor in other portions of the *Davis* analysis, mainly the substantive unfairness factor. They contend that a reduction in litigation serves no commercial purpose from their point of view. But, the fact that the class action bar discourages litigation, even if it is a somewhat nefarious goal from Plaintiffs' perspective, does serve a commercial purpose from Quiznos' perspective.

---

[21] The DAS was a form that each franchisee signed to acknowledge Quiznos' compliance with federal franchise law. By signing the DAS, each franchisee theoretically verified that Quiznos made the appropriate disclosures and allowed the franchisees to review those disclosures prior to executing the franchise agreement.

Thus, if Quiznos' business theories are to be believed, and Plaintiffs offer this Court no reason not to believe them, this factor favors enforcement of the class action **[*66]** bar, if only slightly.

5. *The Class Action Bar is Not Substantively Unfair*

The fifth factor is perhaps the most important to the discussion on unconscion-ability: whether the class action bar is substantively unfair. The Court finds that it is not.

Plaintiffs essentially adopt the balancing test -- cost to bring individual lawsuits versus amount of individual recovery -- used in *Kristian* and *American Express* to strike down class action/class arbitration bars. They argue that because of the large number of SNOs and the small amount of money at stake for each individual SNO, only a class action will provide a fair forum for their complaints. Conversely, if the Court enforces the class action bar, Plaintiffs argue that they would be left without a way to vindicate their legal rights. Thus, they contend that the class action bar is substantively unfair. However, as noted above in the section dealing with earlier judicial treatment of class action bars, a number of factors in this case reveal that individual actions, although perhaps more costly in the aggregate, are not unfathomable or unfair.

First and foremost, the SNOs could bring individual lawsuits. In this case, the SNOs typically spent **[*67]** between $ 20,000 and $ 25,000 for their franchises. This amount of money is a far cry from the three-- and four-figure-per-plaintiff amounts in cases like *Kristian* or *American Express.* Further, when trebled, the per-SNO damages figure rises solidly into mid-- or upper-five figure recoveries per franchisee. Plaintiffs have submitted a few affidavits from attorneys who stated that they would not take a SNO's case because of the small amount of money involved. But, these proud attorneys notwithstanding, the Court cannot say that a franchisee who stands to recover $ 60,000 to $ 75,000 **plus attorneys fees** will be left wanting for competent legal representation. [22]

Moreover, an individual case would not require a large up-front investment of resources. The legal issues in this case, unlike those in *Kristian* **[*68]** or *American Express,* do not require expensive expert analysis or massive, widespread discovery. Because the amount of available damages is sufficient and the cost to bring an individual lawsuit is not overwhelming, individual franchisees would not experience the same type of economic roadblocks that the plaintiffs in *Kristian* or *American Express* would have experienced.

Second, the fact that the provision may benefit Quiznos more than the franchisees is not enough to render it substantively unfair. Admittedly, the class action bar benefits Quiznos, potentially at the franchisees' expense. But, Colorado contains important distinctions in this area of law from other states on which Plaintiffs rely *(i.e.,* California). Significantly, ***HN15***[] Colorado does not require bilaterality for a contract to be enforceable. *Compare Morris v. Belfor USA Group, Inc., 201 P.3d 1253, 1260 (Colo. Ct. App. 2008)* ("[I]n Colorado, a fee-shifting provision need not be mutual to be enforceable.") *with Ting, 319 F.3d at 1150* ("'bilaterality' is a requirement in all California arbitration agreements"). Thus, the fact that the class action bar works solely or primarily to Quiznos' advantage does not render the provision **[*69]** substantively unfair. *See, e.g., Rains v. Foundation Health Sys. Life & Health, 23 P.3d 1249, 1255 (Colo. Ct. App. 2001)* ("Under Colorado law, every contractual obligation need not be mutual as long as each party has provided some consideration for the contract.").

Therefore, because Plaintiffs have not shown that the class action bar would preclude them from obtaining legal redress, and because bilaterality of contractual terms is not required under Colorado law, Plaintiffs have not shown that the class action bar is substantively unfair.

6. *The Parties' Relationship Does Not Render the Waiver Unconscionable*

The sixth *Davis* factor, the nature of the parties' relationship, supports Plaintiffs' position, but again, only slightly. Plaintiffs argue that franchisees stand at a unique power disadvantage when dealing with franchisors. Quiznos

[22] Other individual Quiznos franchisees have brought at least thirty lawsuits against Quiznos for the return of the franchise fee after they failed to open a restaurant within one year. (Doc. # 259 at 18.) Interestingly, counsel for Plaintiffs has represented at least some of the previous franchisee litigants in individual suits against Quiznos for the return of the franchisee fee. *(Id.)*

attempts to paint potential franchisees as savvy business investors capable of asserting their own interests. Against these competing visions, the Court that finds neither side has portrayed a completely accurate picture of the parties' relationship, but that Plaintiffs' characterization is the more accurate of the two.

Quiznos contends that the relationship **[*70]** between it and its franchisees is an entirely equal, arms-length situation. Moreover, unlike many of the cases cited by Plaintiffs, ***HN16***[] Colorado law does not automatically afford special protection to franchisees in the same manner that it protects consumers. Compare *ILJ Dominicana S.A. v. It's Just Lunch Int'l, LLC, 2009 U.S. Dist. LEXIS 13689, 2009 WL 305187, *3 (C.D. Cal. Feb. 6, 2009)* (noting that, under California law, franchise agreements "share common aspects of consumer contracts") with *RHC, LLC v. Quizno's Franchising, LLC,* 2005 WL 1799536, *8 (Colo. Dist. Ct. July 19, 2005) (noting in case involving Quiznos franchisee that franchisor-franchisee is an arms-length commercial relationship). Further, in contrast to uninitiated consumers purchasing a cell phone or signing up for a credit card, the purchasers of these franchises were making a major investment involving tens of thousands of dollars in up-front fees and even more than that amount of money over the prospective life of their franchise. Thus, one would expect that plaintiffs entering into such a relationship would do so with a bit more cognizance than a teenager purchasing a phone at the mall.

Nonetheless, it is clear that Quiznos retains far greater **[*71]** power in the parties' relationship than any one franchisee, as Plaintiffs' expert, Professor Resenbloom, points out. Indeed, there would be no reason for the franchisees to form the owners' groups that they have formed if they had a truly equal relationship with Quiznos. Additionally, as noted above, Quiznos relied on a form contract that the franchisees could not negotiate or re-write in any way.

Thus, when the Court views the competing versions of the parties' relationship, it finds that Quiznos retained the bulk of the bargaining power. However, this is only one factor of seven, and, as noted, Colorado law does not provide *per se* protection to franchisees. Therefore, the Court finds that this factor alone does not render the class action bar unconscionable.

7. *Other Circumstances Surrounding Formation of the Agreement*

Plaintiffs contend that the fraudulent nature of the Quiznos' franchise sales pitch infects the enforceability of the class action bar. The Court disagrees.

Many of the facts that Plaintiffs rely on to support this argument are subsumed elsewhere in the Court's analysis of the *Davis* factors and they fail to support Plaintiffs' argument, *e.g.,* the typeface and location **[*72]** of the class action bar and the ten-day waiting period between Quiznos' disclosure of the franchise agreement and a franchisee's execution of the contract. However, even if the Court were to accept Plaintiffs' allegations regarding the questionable nature of Quiznos' scripted franchise marketing pitch, Plaintiffs have pointed to nothing in that pitch that goes directly to enforceability of the class action bar. [23] Plaintiffs' assertions that Quiznos fraudulently induced them into signing the franchise agreement with representations regarding real estate assistance do not affect the enforceability of the dispute resolution clause, which is a completely unrelated and severable provision. Indeed, not once in their declarations or supporting documents do Plaintiffs identify an alleged misrepresentation concerning the dispute resolution clause in the franchise agreement. The Court views the class action bar as akin to other types of dispute resolution clauses, which require targeted allegations of fraud to be rendered unenforceable. [24] *See, e.g., Ornelas, 2007 U.S. Dist. LEXIS 6214, 2007 WL 274738 at *5* ("Because plaintiff challenges the validity of the Lease Agreement, but not specifically its Arbitration Provision, **[*73]** the provision may be enforceable even apart from the remainder of the contract."). Therefore, this factor does not support a finding of unconscionability.

8. *The* Davis *Factors Reflect That the Class Action Bar Should Be Enforced*

---

[23] Plaintiffs repeatedly characterize Quiznos' sales strategy as "aggressive," as if repeating the word enough times and adding emphasis in their briefs somehow equates it with "fraudulent." *(See, e.g.,* Docs. # 235 at 2; 299 at 2.)

[24] In so holding, the Court echoes Judge Cavanaugh's analysis of the venue selection provision. *See supra.*

Plaintiffs have not demonstrated any unreasonable "overreaching" by Quiznos that would render the class action bar provision unconscionable. The most important *Davis* factors -- substantive fairness and commercial purpose -- favor enforcement of the class action bar. Thus, the Court concludes that the class action bar is not unconscionable under Colorado law. The Court will now turn to a brief discussion of its own concerns with potential jurisdictional and prudential problems that may arise when dealing with class action bars.

VIII. PRUDENTIAL CONSIDERATIONS DO NOT RENDER THE CLASS ACTION BAR UNENFORCEABLE

Having addressed the parties' **[*74]** arguments regarding enforceability and unconscionability of the class action bar, the Court will finally address its own concern with the bar, namely, whether such a clause improperly intrudes upon the Court's ability to manage its cases pursuant to the Federal Rules of Civil Procedure. The Court notes that previous opinions addressing class action and/or class arbitration bars have not addressed the concept that a class action bar (or similar agreement by the parties) might impugn the Court's ability to properly regulate litigation before it. Perhaps the Court is answering a question that need not be asked, but the Court feels that it needs to provide some cautionary advice on the topic of waivers. In addition to unconscionability concerns, with respect to the many different waiver provisions being inserted into contractual agreements, at some point parties are going to overstep their bounds and intrude into the province of the Court's by waiving procedural matters that affect case management and judicial economy. *See Evergreen Nat'l Corp. v. Killian Constr. Co., 876 S.W.2d 633, 635 (Mo. Ct. App. 1994)* (allowing party to waive objection to personal jurisdiction and permit variances **[*75]** in the method of service or notice but finding that "there is no authority for the proposition that parties may waive . . . other procedural matters which affect judicial economy rather than the parties' due process rights").

The fact that class actions are judicially created tools of litigation management caused this Court to give serious consideration to whether or not it should sanction the parties' agreement to deviate from the Federal Rules of Civil Procedure. However, ***HN17***[] despite the fact that *Rule 23* is, first and foremost, a tool intended to enhance economy and management, modern district courts cannot certify a class under *Rule 23* on their own initiative without a request from one or both of the parties. *See* *Newsom v. Norris, 888 F.2d 371, 381-82 (6th Cir. 1989)* ("Although a trial 'court may suggest that relief to a definable class would be appropriate, . . . it cannot convert an individual action into a class action on its own motion.'") (quoting 7B Charles A. Wright, Arthur R. Miller & Mary K. Kane, Federal Practice and Procedure § 1785) (omission in original). Indeed, unlike other Federal Rules, *e.g.,* *Rules 13* and *19*, there is nothing compulsory about bringing a claim under *Rule 23*; **[*76]** thus, there is nothing jurisdictional about *Rule 23*. This fact gives the Court some comfort that, by enforcing the class action bar at issue, the Court will not improperly alter other procedural mandates, as would be the case if, for example, the question before the Court was the enforceability of a contractual bar on compulsory counterclaims. *See, e.g.,* *Loader Leasing Corp. v. Kearns, 83 F.R.D. 202, 203-04 (W.D. Penn. 1979)* (declining to enforce waiver of compulsory counterclaim because to do so would "unreasonably restrict the privilege of litigating a claim and limit the jurisdiction of the district courts"). Further, the Court emphasizes that its enforcement of the class action bar in this case is limited to the facts and circumstances of this case. The Court cautions parties that other contractual deviations from the Federal Rules of Civil Procedure may be unconscionable or stricken if they intrude on the Court's ability to manage litigation.

CONCLUSION

Plaintiffs bear the burden of showing why the class action bar should not be enforced in this case. For the above-described reasons, the Court concludes that Plaintiffs have not met their burden. The facts of this case do not support **[*77]** a finding under Colorado law that the class action bar is unconscionable or otherwise unenforceable.

Accordingly, Plaintiffs' Motion for Class Certification (Doc. # 212) is DENIED.

IT IS FURTHER ORDERED that the hearing on the Motion currently scheduled for April 23-24 is VACATED.

DATED: April 20, 2009

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN1[] **Defenses, Misuse**

Patent misuse is an equitable defense to patent infringement. It restrains practices that do not in themselves violate any law, but that draw anticompetitive strength from the patent right, and thus are deemed to be contrary to public policy. The key inquiry in determining whether a patentee's conduct constitutes misuse is whether, by imposing conditions that derive their force from the patent, the patentee has impermissibly broadened the scope of the patent grant with anticompetitive effect. Experience teaches that some practices, such as when a patentee having market power conditions a license upon the purchase of a separate, staple good, are sufficiently anticompetitive so as to warrant condemnation on their face. Other allegedly-anticompetitive practices beyond the few specific practices identified by the courts as constituting misuse per se are evaluated under the rule of reason to determine whether they impose an unreasonable restraint on competition.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN2[] **Defenses, Misuse**

Perfect certainty is not required to avoid a charge of patent misuse through unlawful tying. Rather, in this context a blocking patent is one that at the time of the license an objective manufacturer would believe reasonably might be necessary to practice the technology at issue.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN3[] **Regulated Practices, Price Fixing & Restraints of Trade**

Agreements between competitors not to compete are classic antitrust violations. Agreements preventing patent licensing of competing technologies also can constitute such violations.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN4[] **Defenses, Misuse**

The fact that a patent's disclosed embodiments may not be commercially viable is not dispositive to preclude a finding of patent misuse. Technology disclosed in a patent typically needs to be further developed before a viable commercial embodiment is possible. Indeed, one way the patent laws encourage the development of new products is by securing an inventor's rights during the time between patenting of an immature technology and commercialization.

Judges: Before BRYSON, GAJARSA, and DYK, Circuit Judges. Opinion concurring in the result in part and dissenting in part filed by Circuit Judge BRYSON.

Opinion by: DYK

Opinion

[*1674] [*1302]** DYK, *Circuit Judge*.

Princo Corporation and Princo America Corporation (collectively "Princo") appeal from a final order of the United States International Trade Commission ("Commission"). The Commission found that compact discs imported by Princo infringed **[**2]** claims of six patents asserted by U.S. Philips Corporation ("Philips") and rejected Princo's patent misuse **[***1675]** defense. *In re Certain Recordable Compact Discs & Rewritable Compact Discs, No. 337-TA-474, 2007 ITC LEXIS 185, *10 (Int'l Trade Comm'n Feb. 5, 2007) ("Final Determination"), available at 2007 WL 1256290* (public version).

On appeal, Princo contends that the Commission erred by failing to find misuse with respect to two aspects of Philips's licensing practices: first, that Philips conditioned the license of Philips patents essential to the production of Orange Book compliant recordable compact discs upon the purchase of a license to an allegedly-nonessential Sony patent (the Lagadec patent), and second, that Philips allegedly agreed with Sony not to license the Lagadec patent as competing technology to the Orange Book. We affirm the Commission's rejection of Princo's misuse argument based on the first practice; we vacate and remand for further proceedings with regard to the second.

I

This is the second time that this case has come before us. *See* *U.S. Philips* ***[*1303]*** *Corp. v. Int'l Trade Comm'n, 424 F.3d 1179 (Fed. Cir. 2005)* ("*Philips I*") (remanding case to Commission); *see also* *U.S. Philips Corp. v. Princo Corp., 173 F. App'x 832 (Fed. Cir. 2006)* **[**3]** ("*Philips II*") (appeal in related infringement action filed by Philips against Princo in federal district court); *In re Princo Corp., 478 F.3d 1345 (Fed. Cir. 2007)* ("*Philips III*") (same).

The central issue is again whether Princo's admitted infringement of Philips's patents is subject to a patent misuse defense. The background on the parties' dispute is as follows.

Philips and three other companies (Sony, Taiyo Yuden, and Ricoh) own patents relevant to the manufacture of recordable compact discs ("CD-Rs") and rewritable compact discs ("CD-RWs"). Some of those patents cover features of discs necessary to comply with the "Orange Book," a technical standard jointly developed by Philips and Sony in the late 1980s and early 1990s. Manufacturers produce CD-R and CD-RW discs in accordance with the Orange Book technical standard in order for the discs to be compatible with CD players and CD-ROM drives installed in computers and home entertainment systems, which are also manufactured in accordance with the corresponding Orange Book specifications.

In the early 1990s, the companies agreed to pool their Orange Book-related CD-R and CD-RW patents. In return for a share of royalties from the pool, **[**4]** Sony, Taiyo Yuden, and Ricoh authorized Philips to administer the pool and to grant package licenses of their pooled patents to manufacturers interested in producing Orange Book compliant compact discs. Philips made available a joint license to the pooled CD-R patents held by Philips, Sony, and Taiyo Yuden and a joint license to the pooled CD-RW patents held by Philips, Sony, and Ricoh. [1] Licensees desiring to produce Orange Book discs could choose one of the packages offered by Philips; licenses to individual patents were not offered. The package licenses required a manufacturer to pay a per-disc royalty on each compact disc produced using at least one licensed patent. The per-disc royalty did not vary depending on which or how many features covered by licensed patents were actually used to produce the disc, "meaning that licensees must pay a royalty based on the number of discs manufactured regardless of how many of the patents are actually used in the manufacturing." *Philips III, 478 F.3d at 1348*.

Princo took a package license from Philips in 1997, but like several other manufacturers of CD-Rs and CD-RWs, ceased paying royalties soon thereafter. Philips filed a complaint with the International Trade Commission, contending that some of the manufacturers were violating *19 U.S.C. § 1337(a)(1)(B)* by importing compact discs

---

[1] Philips contends that in addition to the joint licenses, it also offered a package consisting of only the Philips patents. The Commission found otherwise, however, determining as a factual **[**5]** matter that Philips-only package licenses did not become available until 2000. In addition, in 2001 Philips added additional options by offering packages including only patents that Philips deemed "essential" to the manufacture of Orange Book compliant compact discs.

that infringed Philips's patents. There was no allegation that the manufacturers had infringed patents owned by other pool participants. On July 26, 2002, the Commission instituted an investigation and named nineteen respondents, not including Princo. *In re Certain Recordable Compact **[*1304]** Discs & Rewritable Compact Discs, 67 Fed. Reg. 48,948 (Int'l Trade Comm'n July 26, **[***1676]** 2002)*. Princo thereafter moved to intervene and was added as a respondent.

Although it initially contested the issue of infringement, Princo now admits that its products are within the scope of Philips's patents. Instead, Princo asserts patent **[**6]** misuse by Philips as a defense. Before the Commission, Princo argued that Philips improperly expanded the scope of its statutory patent rights through price fixing, price discrimination, and the use of mandatory package licensing to force manufacturers to take licenses to "nonessential" pool patents in order to obtain licenses to pool patents that were in fact essential to the manufacture of CD-Rs or CD-RWs. The administrative law judge ("ALJ") agreed, ruling that the Philips patents were unenforceable due to patent misuse per se and under the rule of reason. *See In re Certain Recordable Compact Discs & Rewritable Compact Discs*, No. 337-TA-474, slip op. at 219-20 (Int'l Trade Comm'n Oct. 24, 2003) ("*Initial Determination*"). With regard to per se misuse, the ALJ determined that Philips and other pool members fixed prices at higher than competitive levels and charged excessive royalties that would drive manufacturers out of the market, and that Philips committed improper price discrimination by exempting favored disc manufacturers from paying royalties. With regard to misuse under the rule of reason, the ALJ found that anticompetitive effects flowed from the inclusion of nonessential **[**7]** patents in the mandatory package licenses and from the excessive fixed royalty rates set by the pool.

On review, the Commission affirmed the ALJ's misuse determination, but on narrower grounds. *In re Certain Recordable Compact Discs & Rewriteable Compact Discs*, No. 337-TA-474, USITC Pub. No. 3686, slip op. at 4-5 (Apr. 11, 2004). The Commission took no position on the ALJ's ruling of patent misuse per se based on theories other than tying, and no position on eight of the twelve pool patents the ALJ found to be nonessential for the manufacture of Orange Book compliant CD-R/RWs and hence improperly tied to the essential patents. *Id*. at 5 n.3, 50-51. Focusing its analysis on the four remaining allegedly-nonessential patents, the Commission concluded that Philips's "practice of mandatory package licensing constitute[d] patent misuse per se as a tying arrangement between (1) licenses to patents that are essential to manufacture CD-Rs or CD-RWs according to Orange Book standards and (2) licenses to [the four] other patents that are not essential to that activity." *Id*. at 4-5. It agreed with the ALJ that the four patents were not actually essential because for the technology covered by each **[**8]** patent a non-infringing, "economically viable[] alternative technology existed" that could be used to create an Orange Book compliant disc. *Id*. at 61. It also adopted the ALJ's conclusion that the tying arrangement constituted misuse under the rule of reason. *Id*. at 50.

On appeal, we reversed and remanded. *Philips I, 424 F.3d at 1198-99*. We explained that offering the package licenses at issue did not constitute a per se violation "[i]n light of the efficiencies of package patent licensing and the important differences between product-to-patent tying arrangements and arrangements involving group licensing of patents." *Id. at 1193*. In addition, we concluded that Philips's inclusion of the four allegedly-nonessential patents in the package licenses did not constitute misuse under the rule of reason because those patents were essential rather **[*1305]** than nonessential. The patents were essential because they covered features necessary for Orange Book compliance, and the record did not disclose that "any commercially viable alternative actually existed" to those patents. *Id. at 1197-98*. However, because the Commission's relatively narrow decision based on tying of the four patents "did not address **[**9]** all of the issues presented by the administrative law judge's decision under both the per se and rule of reason analysis," we remanded for further proceedings concerning Princo's remaining theories of misuse. *Id. at 1198*.

II

Among Princo's arguments on remand were issues concerning misuse relating to one particular pool patent, Sony's U.S. Patent No. 4,942,565 (the "Lagadec patent" or "'565 Patent"), and those are the sole issues on appeal. A brief description of the development of the Orange Book standard and the relationship of the Lagadec patent to other pool patents is necessary to an understanding of Princo's arguments.

Both the Lagadec patent and Philips's U.S. Patent Nos. 4,999,825 and 5,023,856 (collectively the "Raaymakers patents") were included in the CD-R/RW patent pools. The **[***1677]** Raaymakers patents are undeniably essential to the manufacture of Orange Book compliant discs. The present dispute (as to the tying issue) centers on whether the Lagadec patent is also essential. The Lagadec and Raaymakers patents stem from the joint efforts of Philips and Sony engineers to develop recordable CDs in the late 1980s. The CD-R/RW discs that were eventually developed contain a highly accurate **[**10]** spiral-shaped "pregroove" track that provides a guide for the recording laser to follow when writing data to an unrecorded CD-R/RW. The pregroove is not a perfect spiral, but is slightly "wobbled" at regular intervals. *E.g*. U.S. Patent No. 5,023,856 fig. 4a. The undulating wobble is used by the recorder as a clock signal to control the CD-R/RW's rotation speed, ensuring that the disc rotates at the correct velocity during recording.

During the course of developing the recordable compact disc standard, Philips and Sony engineers exchanged proposals concerning different ways of implementing particular product features. One such feature was the encoding of position data on the "blank" or unrecorded CD-R/RW disc. Sony and Philips found that it was necessary to develop means for a CD-R/RW recorder to determine where along the spiral pregroove track the recorder's laser was positioned at any given time, or "absolute time" position data. [2]

After identifying the need for position data, Philips and Sony separately **[**11]** developed solutions that built upon the wobble signal on the compact discs that was already used to provide velocity control. Philips proposed an *analog* solution, encoding the absolute time position data by frequency modulating the wobble signal. In contrast, Sony proposed a *digital* modulation method to encode position data using the wobble signal. The analog Philips method, known as "Absolute Time in Pregroove" or "ATIP," was covered by the Raaymakers patents, while the digital Sony solution was covered by the Lagadec **[*1306]** patent. [3] Although the two methods solve the same basic problem (the encoding of position data on recordable CDs using the existing wobbled pregroove, and doing so in a manner backwards-compatible with existing CD players), they are fundamentally incompatible, and there is no dispute that a disc made using one technological approach would not work in an CD recorder designed to read position data using the other.

Philips and Sony ultimately chose to define the Orange Book standard using the analog Raaymakers ATIP approach, **[**12]** not the digital Lagadec method. Nevertheless, a license to the Lagadec patent was included along with the Raaymakers patents in the standard CD-RW joint license and perhaps in the CD-R joint license as well. [4] The joint licenses only allowed use of pool patents, including Lagadec, to produce Orange Book compliant discs. They did not allow use of Lagadec to produce a disc using the digital method for encoding position data taught by Lagadec.

On remand, the Commission did not hold hearings or remand to the ALJ. It confined itself to new arguments before the full Commission concerning the previously unaddressed portion of the ALJ's initial decision. Princo advanced, *inter alia*, two misuse theories concerning the Lagadec patent. First, Princo pursued a tying theory, arguing that the Lagadec patent was not essential to the production of Orange Book compliant discs and was unlawfully tied to patents that were actually essential to the manufacture of Orange Book compact discs, including **[**13]** the Raaymakers patents. Second, Princo alleged that the Lagadec and Raaymakers patents covered potentially competing technologies, and that by agreeing with Sony that the Lagadec patent would not be available except

---

[2] "Absolute time" refers to the fact that the laser's location is expressed in terms of the time required to scan the spiral groove from the start of the disc to the current position.

[3] Although the Lagadec patent primarily describes a digital solution, as will be seen, Claim 6 of that patent is arguably not limited to digital modulation.

[4] The record on appeal is unclear as to whether the Lagadec patent was included in the standard CD-R joint license before 2001, when it was expressly listed by Philips in the package of "essential" CD-R patents.

through a package license that also included the Raaymakers patents, Philips engaged in a form of price fixing, i.e., foreclosing potential competition between the technologies of the Lagadec and Raaymakers patents. [5]

On February 5, 2007, the Commission issued a final determination. *Final Determination at 1, 2007 ITC LEXIS 185*. For the reasons discussed below, the Commission reversed the ALJ's previously unaddressed rulings that Philips **[**14]** committed patent misuse. Having determined that Princo's accused compact discs infringed the claims of the six patents asserted by Philips, that the asserted claims were enforceable and not invalid, and that the domestic industry requirement of *section 337* was satisfied, the Commission issued remedial orders.

Princo timely appealed from the final determination of the Commission, and we have jurisdiction under *28 U.S.C. § 1295(a)(6)*.

[*1307] DISCUSSION

HN1[] Patent misuse is an equitable defense to patent infringement. It was designed "'to restrain practices that did not in themselves violate any law, but that drew anticompetitive strength from the patent right, and thus were deemed to be contrary to public policy.'" *Philips I, 424 F.3d at 1184* (quoting *Mallinckrodt, Inc. v. Medipart, Inc., 976 F.2d 700, 704 (Fed. Cir. 1992))*. The key inquiry in determining whether a patentee's conduct constitutes misuse "'is whether, by imposing conditions that derive their force from the patent, the patentee has impermissibly broadened the scope of the patent grant with anticompetitive effect.'" *Id*. (quoting *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1372 (Fed. Cir. 1998))*. Experience has taught that some practices, **[**15]** such as when a patentee having market power conditions a license upon the purchase of a separate, staple good, are sufficiently anticompetitive so as to warrant condemnation on their face. *Va. Panel Corp. v. MAC Panel Co., 133 F.3d 860, 869 (Fed. Cir. 1997)* (discussing examples of per se misuse). [6] Other allegedly-anticompetitive practices beyond the few specific practices identified by the courts as constituting misuse per se are evaluated under the rule of reason to determine whether they "impose[] an unreasonable restraint on competition." *Id.; see also* *Philips I, 424 F.3d at 1185*.

Against this background, Princo contends that the Commission erred by failing to find patent misuse by Philips either as a result of tying or as a result of an agreement between Sony and Philips concerning the availability of the Lagadec **[**16]** patent. We address these arguments in turn.

I

A

Princo first argues that "Philips has engaged in patent misuse by tying the Lagadec patent to the essential Orange Book patents in a manner prohibited under *Philips I*." Appellants' Br. 48. Princo's primary contention is that through mandatory package licensing, Philips improperly used its market power to force manufacturers seeking patents essential to the production of Orange Book compliant discs to also take a license to Lagadec, an allegedly-nonessential Sony patent.

Tying arrangements have a long history in both the patent misuse and antitrust contexts. Much of the Supreme Court's early patent misuse doctrine was developed in cases involving a challenge to some form of tying

---

[5] The Commission's independent Investigative Attorney ("IA"), whose role as defined in *19 C.F.R. § 210.3* is to "engage in investigatory activities in an investigation or a related proceeding," did not support any of Princo's per se misuse theories below. The IA agreed, however, that inclusion of Lagadec supported a finding of patent misuse under the rule of reason. The IA argued, *inter alia*, that "Philips included the Lagadec patent" to "secure[] Sony's adherence to the . . . Orange Book standard" and to "forestall competition from Sony." *Final Determination at 96, 2007 ITC LEXIS 185*. **[***1678]**

[6] Congress has created a safe harbor in *35 U.S.C. § 271(d)(5)* for certain types of conduct by patentees lacking market power. *See* *Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 41-42, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. In the present case, "the Commission found that Philips has market power in the relevant market and that *section 271(d)(5)* is therefore inapplicable." *Philips I, 424 F.3d at 1186*.

arrangement. In Morton Salt Co. v. G.S. Suppiger Co., 314 U.S. 488, 490-91, 62 S. Ct. 402, 86 L. Ed. 363, 1942 Dec. Comm'r Pat. 733 (1942), for example, the Court held that a tying arrangement where the patent license was conditioned upon the purchase of a separate, staple product amounted to patent misuse, because in such a case "the patent is used as a means of restraining competition with the patentee's sale of an unpatented product." Id. at 493; *see also* Ill. Tool Works, 547 U.S. at 45-46 (holding that a patent alone **[**17]** does not confer market power necessary to show unlawful tying). Likewise, the early antitrust cases found that various tying **[*1308]** arrangements violated the antitrust laws. *See, e.g.,* N. Pac. Ry. Co. v. United States, 356 U.S. 1, 10-11, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958); *see also* United States v. Loew's Inc., 371 U.S. 38, 44-45, 83 S. Ct. 97, 9 L. Ed. 2d 11 (1962); United States v. Paramount Pictures, Inc., 334 U.S. 131, 156-59, 68 S. Ct. 915, 92 L. Ed. 1260 (1948).

Although tying in many of its varied forms has potential to inflict anticompetitive harms, in more recent times it has been recognized that tying also has potential to create substantial **[***1679]** procompetitive efficiencies. *See, e.g.,* Ill. Tool Works, 547 U.S. at 36 ("The assumption that '[t]ying arrangements serve hardly any purpose beyond the suppression of competition,' rejected in [U.S. Steel Corp. v. Fortner Enters., Inc., 429 U.S. 610 (1977)], 97 S. Ct. 861, 51 L. Ed. 2d 80, has not been endorsed in any opinion since."); Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 40-44, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984) (O'Connor, J., concurring in judgment) ("Tie-ins may entail economic benefits as well as economic harms, and . . . these benefits should enter the rule-of-reason balance."); *see also* Herbert Hovenkamp, Mark. D. Janis & Mark A. Lemley, *IP and Antitrust* § 34.4, at **[**18]** 34-20.1 (2009) ("Typical procompetitive benefits [of patent pools] include the clearing of blocking positions, the advantages flowing from integration of complementary technologies, and the cost savings from avoiding litigation.").

In *Philips I*, we considered one particular form of patent-to-patent tying, where patents essential to the practice of a standardized technology (the Orange Book standard) were licensed together as a package. We concluded that "[i]n light of the efficiencies of package patent licensing and the important differences between product-to-patent tying arrangements and arrangements involving group licensing of patents," Philips's practice of package licensing essential patents together could not be condemned as misuse per se but instead should be evaluated under the rule of reason. Philips I, 424 F.3d at 1193. As we explained, the group of patents essential to practice a particular technology or standard generally may be viewed as a unified product:

> If a patentholder has a package of patents, all of which are necessary to enable a licensee to practice particular technology, it is well established that the [patentholder] may lawfully insist on licensing the patents **[**19]** as a package and may refuse to license them individually, since the group of patents could not reasonably be viewed as distinct products.

Id. at 1196; *see* Hovenkamp, Janis & Lemley, *supra*, § 22.3 at 22-13, 14. Inclusion in a package license of essential patents to enable the practice of the particular technology by clearing blocking positions is not tying of the type that patent misuse doctrine seeks to prevent. *See* Philips I, 424 F.3d at 1196; Int'l Mfg. Co. v. Landon, Inc., 336 F.2d 723, 729 (9th Cir. 1964).

Moreover, we concluded that Philips's practice of offering essential patents as a package survived under the rule of reason. There, the allegation was that four Orange Book pool patents were not actually essential because alternative technologies existed that could be used in their place to produce Orange Book compatible compact discs without infringing the four patents. Philips I, 424 F.3d at 1194-95. We rejected the argument that the four patents were not essential, as the record showed that those patents in fact had "no practical or realistic alternative." Id. at 1194, 1198. **[*1309]** As a result, the tying of those four patents to so-called essential patents would have no anticompetitive **[**20]** effect "because no competition for a viable alternative product is foreclosed." Id. at 1194.

On remand, the Commission rejected Princo's Lagadec tying claim under the framework of *Philips I*, stating that "[Princo]'s argument is fundamentally flawed because the [Raaymakers] patents are inside, not outside, the package." Final Determination at 80, 2007 ITC LEXIS 185. The Commission similarly rejected the IA's Lagadec tying claim, stating that "the premise of the IA's argument . . . that the Lagadec '565 patent cannot be used to make an Orange Book compliant CD, is fatal to his rule of reason tying claim." *Id*. at 94. Elsewhere in its opinion, the Commission declined to decide whether Lagadec was a blocking patent, i.e., a patent that covered the Orange

Book standard and was therefore essential to the production of Orange Book compliant discs. Final Determination at 23, 2007 ITC LEXIS 185.

On appeal, Princo contends that the Commission erred in rejecting its misuse claim under *Philips I*, arguing that the Lagadec patent is not an "essential patent" for purposes of the Orange Book standard. It maintains that requiring licensees to purchase Lagadec, a nonessential patent, in order to obtain licenses to truly essential patents therefore **[**21]** constitutes misuse. We need not parse the Commission's somewhat opaque decision as to the tying claim for, like Philips, we believe that this issue can be resolved by focusing on the issue not decided by the Commission--namely, the scope of Claim 6 of the Lagadec patent.

Philips contends that Lagadec is essential as a blocking patent because at least one patent claim, Claim 6, reads on every Orange Book compliant disc. Claim 6 provides: "A disc-shaped recording medium . . . having formed **[***1680]** thereon a substantially spiral pregroove which is wobbled . . . and formed by . . . a first signal . . . that has been modulated by a second signal . . . ." '565 Patent col. 10 ll.14-24. [7] Philips maintains that Claim 6 is broadly written to cover recordable compact discs containing a wobbled pregroove formed by "a first signal . . . that has been modulated by a second signal that contains coded information," and does not require the use of any particular type of modulation (for example, digital modulation). '565 Patent col.10 ll.22-25. Although it acknowledges that Lagadec "generally teaches a digital method of encoding position data not used by the Orange Book," it contends that the specification **[**22]** cannot be used to read a "digital" limitation into Claim 6 where such a **[*1310]** limitation is absent from the language of the claim. *See* *Phillips v. AWH Corp., 415 F.3d 1303, 1323-24 (Fed. Cir. 2005)* (en banc).

In contrast, Princo argues that Lagadec is not in fact a blocking patent because Claim **[**23]** 6 must be read in light of the specification, which discloses primarily a digital encoding scheme. Princo does not identify any individual claim limitation of Claim 6 that is absent from the Orange Book compact discs; rather, it argues that because the Lagadec specification must be understood as teaching away from analog methods, the patent must be read as claiming only a digital encoding scheme. Princo contends that Lagadec therefore is not an essential patent, because Claim 6 cannot be construed as blocking a recordable compact disc using the analog encoding method required by the Orange Book standard.

The Commission did not decide this question, nor do we need to do so. We conclude that Lagadec can qualify as an essential Orange Book patent if a license to practice Claim 6 of the Lagadec patent could be viewed as reasonably necessary to practice the Orange Book standard. We further conclude that it would have been reasonable for a manufacturer to believe a license under Claim 6 was necessary at the time the licenses were executed.

Philips I recognized that patent pools could generate procompetitive efficiencies in the form of reduced transaction costs, reduced litigation expenses, **[**24]** and most importantly the overall "procompetitive effect of reducing the

---

[7] In full, Claim 6 of the Lagadec patent is as follows:

> 6. A disc-shaped recording medium capable of having a data signal optically recorded thereon and optically reproduced therefrom, said recording medium comprising:
>
> > a substrate layer having first and second surfaces, said first surface having formed thereon a substantially spiral pregroove which is wobbled in a radial direction of said disc-shaped recording medium and formed by a control signal consisting of a first signal that has a predetermined frequency and that has been modulated by a second signal that contains coded information and that has a frequency at least an order of magnitude lower than said predetermined frequency;
> >
> > a recording layer formed on the first surface of said substrate layer and adapted for subsequent optically recording the data signal thereon; and
> >
> > a protective layer formed on said recording layer.

'565 Patent col. 10 ll.14-31.

degree of uncertainty associated with investment decisions." Philips I, 424 F.3d at 1192-93. These efficiencies are not limited to situations in which a potential pool patent is, in fact, a blocking patent. As we noted in *Philips I*, one of the major potential efficiencies of package licensing in the context of innovative technology is the avoidance of "uncertainty that could only be resolved through expensive litigation." Id. at 1198; *see also* id. at 1192 ("Package licensing can also obviate any potential patent disputes . . . and thus reduce the likelihood that a licensee will find itself involved in costly litigation."). Prohibiting the inclusion in a package license of a patent that is arguably essential, merely because it ultimately proved not to be essential would undercut, even eliminate, this potential procompetitive efficiency.

We thus think that **HN2**[] perfect certainty is not required to avoid a charge of misuse through unlawful tying. Rather, in this context a blocking patent is one that at the time of the license an objective manufacturer would believe reasonably might be necessary to practice the technology **[**25]** at issue. A leading treatise has made a similar observation in the context of patent pools and cross-licensing agreements:

> Indeed, *even if the patents are only arguably conflicting*, there are strong reasons to permit the settlement of patent disputes by means of a cross-licensing agreement. Not only will judicial economy be served and litigation costs reduced by settling such disputes, but the delay and uncertainty associated with blocking patent disputes may prevent **[***1681]** either party from going forward with a commercial product for years while litigation is pending. Where two or more patents are arguably blocking, therefore, settling the dispute by means of cross-licensing is likely to be procompetitive.

Hovenkamp, Janis & Lemley, *supra*, § 3.3, at 3-36 (emphasis added); *see also* Roger B. Andewelt, *Analysis of Patent Pools Under* ***[*1311]*** *the Antitrust Laws*, 53 Antitrust L.J. 611, 616 (1985) ("[T]he line between competitive patents and blocking or complementary patents is frequently very difficult to draw. Obtaining access to patents that appear competitive would provide assurance of access to the needed technology if a court later determines that the patents are blocking.").

Our understanding of the **[**26]** likely procompetitive benefits of package licensing patents which reasonably might be necessary to practice a given technology is further informed by industry practice in the analogous area of standards-setting organizations. Such organizations typically seek to reduce the uncertainty involved in developing a technological standard by requiring of their members disclosure of patents that might cover aspects of the standard being developed, because "nondisclosure . . . could put the [patentee member] in a position in which it could literally block the use of the published [standard] by any company unless the company obtained a separate license from the [patentee]." Qualcomm Inc. v. Broadcom Corp.., 548 F.3d 1004, 1013 (Fed. Cir. 2008). The standard-setting industry organization in *Qualcomm* did not require its members to disclose only patents *actually* blocking practice of the standard, however; rather, members understood the duty to require disclosure of those patents that "*reasonably might be necessary* to practice the [standard]." Id. at 1018 (emphasis added); *see also* Rambus Inc. v. Infineon Techs. AG, 318 F.3d 1081, 1100 (Fed. Cir. 2003). In the package licensing context, it may be **[**27]** similarly the case that a given patent that appears to be necessary ultimately may prove not to be so. But including the patent within the package license nevertheless may be procompetitive; for example, doing so may beneficially avoid "continuing disputes over whether the licensee's technology infringes certain ancillary patents owned by the licensor that are not part of the group elected by the licensee." Philips I, 424 F.3d at 1198. Indeed, as with disclosure in the standard-setting context, a major goal of package licensing is this type of avoidance of uncertainty and costly litigation.

Here, we agree with Philips that inclusion of the Lagadec patent in the patent pool did not give rise to an illegal tying arrangement, because Claim 6 reasonably might be necessary as a blocking patent to the Orange Book standard. [8]

---

[8] In its reply brief, Princo argues that because the Commission did not determine whether Lagadec is a blocking patent, we may not uphold its decision on this alternative legal ground. This argument misunderstands the holding of S.E.C. v. Chenery Corp., 318 U.S. 80, 87, 63 S. Ct. 454, 87 L. Ed. 626 (1943). The relevant facts concerning the underlying Orange Book technology are undisputed, and whether the patent claims could reasonably be construed to cover that technology is a legal matter well within **[**29]** the competence of an appellate tribunal to decide. *See* id. at 88.

Claim 6, on its face, would have presented an obvious source of concern for an Orange Book manufacturer. Princo does not appear to contend that a recordable disc produced according to Orange Book standards lacks "a substantially spiral pregroove which is wobbled in a radial direction of said disc-shaped recording medium," where that wobbled pregroove is "formed by a control **[**28]** signal consisting of a first signal that has a predetermined frequency and that has been modulated by a second signal that contains coded information." '565 Patent col.10 ll.23-28. As Philips points out, the Lagadec patent contains no express or indisputable disclaimer limiting the scope of the claims, and our attention is not drawn **[*1312]** to any prosecution history that would support such a limitation. Princo contends only that the scope of the claim must be limited by the primarily digital disclosure of the patent's specification. A manufacturer evaluating the patent would thus be left gambling on the uncertain proposition of whether the specification was sufficiently narrow that Claim 6 would be correspondingly limited.

This is especially true in light of the fact that the law of claim construction was unsettled in the late 1990s, when the licenses of which Princo complains were executed. *See* *Philips I, 424 F.3d at 1198* (explaining that the propriety of a license generally must be evaluated as of the time when it is issued). While some cases at that time were perceived by litigants as suggesting, as Princo now argues, that broad claims might be limited to the disclosed **[***1682]** embodiments, [9] other cases continued to caution against improperly importing limitations into otherwise broad claims. [10] Further, several of the core cases of our modern claim construction jurisprudence (including those clarifying the proper role of the specification in construing claim language) were relatively recent or had not yet been decided. *E.g.,* *Phillips v. AWH Corp., 415 F.3d 1303 (Fed. Cir. 2005)* (en banc). Against this background, legitimate questions could have existed as to the scope of the Lagadec patent.

We thus conclude that Princo has failed to meet its burden of demonstrating that at the time the Lagadec patent was included in the package licenses, an objective manufacturer, faced with the patent and the plain language of Claim 6, would not have believed that a license reasonably might be necessary to manufacture Orange Book compact discs. Lagadec qualified as an "essential" patent for purposes of the Orange Book pool. *See* *Philips I, 424 F.3d at 1196*. We affirm the Commission's determination that Princo's misuse claim based on tying is without merit.

B

In a related argument, Princo contends that Philips has violated the Supreme Court's teaching in *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 135, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*, that "conditioning the grant of a patent license upon payment of royalties on products which do not use the teaching of the patent [is] misuse." In short, Princo contends Philips's licensing practice at issue violates *Zenith* because under the joint license royalties from the manufacture of compact **[**31]** discs are paid to Sony because of Lagadec even though "the Lagadec patent cannot be used in an Orange Book compliant disc." Appellants' Br. 43-45. Philips and the Commission reply that Princo has waived this per se misuse argument by failing to raise it below. However, even if we were to assume (without deciding) that Princo is correct about *Zenith's* scope and the argument was not waived--an assumption about which we have considerable doubt--Princo's argument is not persuasive. As previously discussed, at the time the package licenses at issue were executed it appeared that Lagadec reasonably might be necessary to manufacture Orange Book compact discs. Manufacturers taking a package license including Lagadec **[*1313]** eliminated the uncertainty of potentially infringing Claim 6 of that patent when they manufacture Orange Book compliant discs. Because the blocking aspect of the patent is, or reasonably might be, necessary to Orange Book manufacturers, it cannot fairly be said on these facts that a royalty is paid on products which do not use the teaching of the Lagadec patent.

II

---

[9] *See, e.g., Toro Co. v. White Consol. Indus., Inc., 199 F.3d 1295 (Fed. Cir. 1999)*; *Wang Labs., Inc. v. Am. Online, Inc., 197 F.3d 1377 (Fed. Cir. 1999)*

[10] *See,* ***[**30]*** *e.g., Comark Commc'ns, Inc. v. Harris Corp., 156 F.3d 1182, 1186 (Fed. Cir. 1998)*; *Electro Med. Sys., S.A. v. Cooper Life Scis., Inc., 34 F.3d 1048, 1054 (Fed. Cir. 1994)*.

In addition to challenging the practice of requiring manufacturers who sought licenses to essential Orange Book patents **[**32]** to also take a license to Lagadec, Princo challenges a second aspect of Philips's conduct involving Lagadec. Although Princo presents variations of its argument under different names, including price fixing, we understand the essence of its claim to be that, as discussed earlier, Lagadec represented an alternative technological solution to the Raaymakers patents with respect to encoding position data using the preexisting wobble signal. Princo argues that Philips and Sony agreed not to license Lagadec in a way that would allow a competitor "to develop, use or license the [Lagadec] technology to create a competing product." Appellants' Reply Br. 1; *see also* Intervenor's Br. 33-34 ("What Princo calls its principal price-fixing argument . . . thus really amounts to the accusation that Philips bribed Sony not to use . . . Lagadec to compete against the Orange Book."). Thus, Princo contends, even if Lagadec properly may be included in the package licenses, Philips committed patent misuse by agreeing with Sony to not license Lagadec in a manner allowing "the further development of the Lagadec technology and the possibility of competition between that technology and its own [Raaymakers technology]." **[**33]** Appellants' Reply Br. 3.

The Commission rejected Princo's argument under both a per se analysis and under the rule of reason, relying in both cases on substantially the same reasoning. The Commission did not directly address whether there was an agreement to prevent Lagadec from being licensed as a competing technology, apparently **[***1683]** concluding instead that no misuse could exist regardless of any such agreement:

> If Philips is correct that the Lagadec '565 patent is a "technically blocking patent," then no misuse flows from including the patent in the joint licenses. On the other hand, [if Lagadec is not blocking], we reject respondents' and the IA's various theories of patent misuse because there has been no showing that the Lagadec '565 patent competes with another patent in the pool [and] no showing that the pool licensors would have competed in the technology licensing market absent the pooling arrangement, and no showing of the anti-competitive effect required under a rule of reason analysis.
>
> . . .
>
> Notably, even if Lagadec is a substitute technology for the ATIP standard, it is not a substitute technology that can be used to manufacture Orange Book compliant CD-R/RW discs. Consequently, **[**34]** the record in this investigation does not support a finding that the Lagadec '565 patent competes with the '825 or '856 patents.

Final Determination at 23-24, 2007 ITC LEXIS 185 (footnote omitted); *see Id*. at 80-81. We conclude that the Commission erred in holding that these grounds would be sufficient to defeat a claim of misuse even if such an agreement **[*1314]** existed. [11]

The first ground relied upon by the Commission in rejecting Princo's argument was that if "the Lagadec '565 patent is a 'technically blocking patent,' then no misuse flows from including the patent in the joint licenses." *Final Determination at 23, 2007 ITC LEXIS 185*. This conclusion rested on our statement in *Philips I, 424 F.3d at 1196*, that a patentee holding blocking patents may "lawfully insist on licensing the patents as a package and may refuse to license them individually, since the group of patents could not reasonably be viewed as distinct products."

We believe, however, that the Commission read our decision in *Philips I* too broadly if it meant to suggest that Lagadec's **[**35]** status as a blocking patent could immunize an agreement not to compete. While our decision in *Philips I* confirmed that the package licensing of blocking patents is not patent misuse as a form of tying, we did not there consider whether an agreement that would prevent the development of alternatives would constitute misuse under a theory of elimination of competition or price fixing. That poses a different question, and not one foreclosed by our decision in *Philips I*.

Philips I involved a tying claim based on Philips's practice of requiring manufacturers to license four allegedly non-essential patents in order to obtain licenses to truly essential pool patents. The Commission had determined that the four allegedly-nonessential patents were separate products from the package of "essential" Orange Book

---

[11] Because we conclude that the licensing practice alleged by Princo would, if proven, violate the rule of reason, we need not determine whether it should be evaluated under a per se rule.

patents, because the Orange Book features covered by those four patents could be achieved equally well through the use of alternative non-pool technologies *not* covered by those patents. *Id. at 1194-96*. Thus, the Commission reasoned, "the package licensing agreements adversely affected competition in the market for the nonessential technology," because no Orange Book disc manufacturer would **[**36]** have incentive to license and use any of the alternative technologies if they had already been forced to take a license to the equivalent pool patents as part of the package license. *Id. at 1194* (describing findings).

On appeal, we determined that the Commission's findings were unsupported by substantial evidence, as the record did not actually show market foreclosure with regard to alternative technologies. The record did not show that "any commercially viable alternative actually existed" to the allegedly-nonessential patents. *Id. at 1198*. Any potential market foreclosure in that case was simply too speculative to support a finding of misuse, as "the mere possibility that alternative technology might at some point become available is not sufficient to support a finding that at the time the Philips licenses were executed, there was actually a commercially available alternative to the technology." *Id. at 1196*. In contrast, the potential efficiencies we identified from packaging the patents at issue included the integration of complementary technologies, reduced transaction costs, reduced litigation expenses, and most importantly the overall "procompetitive effect of reducing the degree **[**37]** of uncertainty associated with investment decisions." *Id. at 1192-93*. **[***1684]** Because the package licenses had significant potential **[*1315]** to generate procompetitive efficiencies, and the risk of future anticompetitive harm was at best speculative, we concluded that the Commission's analysis finding the licensing agreements unlawful per se and under the rule of reason was in error.

Philips I thus foreclosed arguments that a patent is non-essential because of a supposed alternative where the claimed alternative is not commercially viable; market foreclosure in such a case is typically too speculative to justify a finding of misuse. *See* *424 F.3d 1194, 1198*. But it is also clear that *Philips I* did not consider, let alone foreclose, arguments based on alleged agreements to prevent the development of a competing alternative technology. Notably, in *Philips I*, the pool did not include the allegedly competing alternatives to the four challenged pool patents. There was no agreement not to license those competing technologies, and no allegation that the package licenses directly restrained licensing of the alternative technologies that disc manufacturers might desire to use in place of pool technology. Rather, **[**38]** the market remained free to develop such alternative technologies.

In contrast, here Princo contends that Philips and Sony agreed from the outset to license Lagadec, a potential competitor to the Raaymakers pool patents, in a way that would necessarily prevent it from ever becoming a commercially viable alternative technology that might compete with the Orange Book standard. The essential nature of the Lagadec patent to the Orange Book standard cannot justify the refusal to allow it to be licensed for non-Orange Book purposes. It is one thing to offer a pooled license to competing technologies; [12] it is quite another to refuse to license the competing technologies on any other basis. In contrast to tying arrangements, there are no benefits to be obtained from an agreement between patent holders to forego separate licensing of competing technologies, as counsel for Philips conceded at oral argument. Oral Arg. 26:10-26:25, available at *http://oralarguments.cafc.uscourts.gov/mp3/2007-1386.mp3* (Oct. 6, 2008).

HN3[] Agreements between competitors not to compete are classic antitrust violations. *See, e.g.,* *Palmer v. BRG of Ga., Inc., 498 U.S. 46, 49, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)*; *Otter Tail Power Co. v. United States, 410 U.S. 366, 377, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*; *United States v. Topco Assocs., Inc., 405 U.S. 596, 608, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*. Agreements preventing patent licensing of competing technologies also can constitute such violations. *Standard Oil Co., Ind. v. United States, 283 U.S. 163, 174, 51 S. Ct. 421, 75 L. Ed. 926 (1931)* ("Where domination exists, a pooling of competing process patents . . . is beyond the privileges conferred by the patents and constitutes a violation of the Sherman Act."); *Id. at 175* ("In the case at bar, the primary defendants own competing patented processes for manufacturing an unpatented product . . .; and agreements concerning such processes are likely to engender the evils to which the Sherman Act was directed."); *United States v. New Wrinkle,*

[12] As noted by Philips, even when blocking patents are not involved, pooling may in some cases have procompetitive benefits, such as enabling licensees to obtain access to alternative **[**39]** technologies through one negotiation without determining at the outset which technology is the most efficient. Intervenor's Br. 36-37 (citing Andewelt, supra, at 616).

Inc., 342 U.S. 371, 380, 72 S. Ct. 350, 96 L. Ed. 417, 1952 Dec. Comm'r Pat. 411 (1952) ("An arrangement was made between patent holders to pool **[*1316]** their [competing] patents and fix prices on the products **[**40]** for themselves and their licensees. The purpose and result plainly violate the Sherman Act."); *cf*. U.S. Dep't of Justice & Fed. Trade Comm'n, *Antitrust Guidelines for the Licensing of Intellectual Property* § 5.1 ex. 9 (Apr. 6, 1995) ("In the absence of evidence establishing efficiency-enhancing integration from the joint assignment of patent rights, the Agency may conclude that the joint marketing of competing patent rights constitutes horizontal price fixing and could be challenged as a per se unlawful horizontal restraint of trade."). Such agreements are not within the rights granted to a patent holder.

Second, the Commission rejected the misuse defense on the ground that there has been "no showing that the pool licensors [Sony and Philips] would have competed in the technology licensing market absent the pooling arrangement." *Final Determination at 23-24, 96, 2007 ITC LEXIS 185*. Treating this argument as "viewing the licensing arrangement as tantamount to a merger that eliminates Sony as a potential competitor," the Commission found no harm to future competition because there had been no showing that Sony "would probably have entered the market within a reasonable period of time" and "would have entered **[**41]** and survived **[***1685]** to become a significant competitive force." *Id*. at 97-98.

The analogy of a merger of two companies offered by Philips and accepted by the Commission is not an accurate one. The Commission found that there had been no showing, as might be necessary in the case of a challenged merger, that Sony and Philips "would have competed in the technology licensing market" absent the pooling arrangement or that a standard based on Lagadec would have entered the market soon and survived to become a competitive force. *Final Determination at 26, 98, 2007 ITC LEXIS 185* (citing 5 Phillip E. Areeda & Herbert Hovencamp, ***Antitrust Law*** P 1121b at 53, P 1128a at 94 (2d ed. 2003)). But unlike the alleged agreement not to compete at issue here, a merger of two companies has potential countervailing efficiencies that offset potential harms to future competition. For example, mergers have the potential to create socially desirable resource savings through improved economies of scale and improved allocation of capital, to name just a few. *See* 5 Areeda & Hovenkamp, *supra*, PP 1103-1107 at 12-49. In contrast, an agreement of the sort alleged by Princo is unlikely to have any efficiencies that could not be achieved equally **[**42]** well through a non-exclusive agreement that would have left open the possibility that the Lagadec technology could have been further developed. Indeed, as noted earlier, at oral argument counsel for Philips was able to identify no efficiencies flowing from such an agreement.

Third, the Commission rejected Princo's misuse argument on the ground that "even if Lagadec is a substitute technology for the ATIP standard, it is not a substitute technology that can be used to manufacture Orange Book compliant CD-R/RW discs." *Final Determination at 24, 2007 ITC LEXIS 185*. The Commission's analysis was flawed in this respect as well.

While the Commission's observation that the Lagadec patent could not be used in place of the Raaymakers patents to manufacture Orange Book CD-R/RWs is supported by substantial evidence, that observation is irrelevant. The very thrust of Princo's misuse argument is that the alleged agreement to offer Lagadec only through the joint licenses harms competition *because* Lagadec is non-Orange Book **[*1317]** technology and could have been a competitive alternative to Orange Book technology. Thus, the fact that Lagadec is not an "Orange Book compliant" substitute for the Raaymakers ATIP technology does **[**43]** not answer Princo's defense of misuse.

Directing this court's attention to footnote 20 of the Commission's determination, Philips argues that the Commission correctly rejected Princo's argument on the basis that there had been no showing that the Lagadec was in fact a "commercially viable" technology. *Final Determination at 24 n.20, 2007 ITC LEXIS 185*. The Commission's footnote, however, must be understood within the context of the surrounding text, which focuses on whether Lagadec was a commercially viable technology for purposes of the *Orange Book*:

> "[T]he Lagadec '565 patent constitutes *completely different technology* that does not work well *according to the Orange Book Standards*. This testimony renders Lagadec *extraneous to the Orange Book*." . . . [fn 19]
>
> > [fn19] The ALJ credited testimony that the Lagadec approach is prone to errors and "did not provide a scheme that would work and was reliable."

> The ALJ concluded that "Lagadec constitutes, at best, a substitute technology for the ATIP standard, and at worst, an extraneous, non-working add-on *to the patent pool*." Notably, even if Lagadec is a substitute technology for the ATIP standard, it is not a substitute technology that can be used to *manufacture* ***[**44]*** *Orange Book compliant* CD-R/RW discs. [fn20]
>
> [fn20] Respondents have pointed to no evidence that the Lagadec approach is a commercially viable technological alternative to the technology of Philips' '825 or '856 patents. Moreover, the commercial viability of a method that is prone to errors, unreliable, and unworkable is doubtful.

Final Determination at 23-24, 2007 ITC LEXIS 185 (emphases altered, internal citations omitted). [13] The Commission did not determine that Lagadec was **[***1686]** fundamentally incapable of being commercialized as part of an alternative standard, but merely that it was not workable within the context of existing Orange Book technology. The Commission's determination thus does not include findings of fact directed to the question of whether, absent agreement to the contrary, Lagadec could have been developed as part of an alternative technological platform.

To the extent that Philips contends that the Lagadec technology must already have been developed to the point of commercial viability before misuse could be found, it is incorrect. *See* Intervenor's Br. 36 (noting that no evidence showed that Lagadec "was" a commercially viable alternative and therefore "an actual" competitor). The thrust of Princo's argument is that by agreement Lagadec was effectively suppressed; the result of that suppression was that the technology could not become a viable competitor. It cannot be the case that horizontal competitors can insulate themselves from misuse liability simply by agreeing to suppress competing technologies before they are fully developed. If that were the rule, then patentees engaging in such suppression of potential alternative technologies could never be called **[*1318]** to account. In short, because standardization of technology and the development of patent pools are likely to occur early in the development of a given technology market, requiring stringent proof of the destruction of **[**46]** future competition, with its accompanying imponderables, would effectively immunize from misuse manufacturers who agree to suppress competition from alternative technologies.

In determining the appropriate standard under the rule of reason, it is important to bear in mind several pertinent considerations. First, ***HN4***[] the fact that a patent's disclosed embodiments may not be commercially viable cannot be dispositive. Technology disclosed in a patent typically needs to be further developed before a viable commercial embodiment is possible. Indeed, our cases have recognized that one way the patent laws encourage the development of new products is by securing an inventor's rights during the time between patenting of an immature technology and commercialization. *Rite-Hite Corp. v. Kelley Co., 56 F.3d 1538, 1547 (1995)* (en banc) ("The patent laws promote the progress in different ways, prominent among which are by protecting the investment of capital in the development and working of a new invention from ruinous competition till the investment becomes remunerative." (quotation marks omitted)). The efforts required to commercialize an invention disclosed by a patent can be considerable. For example, **[**47]** in *CFMT, Inc. v. Yieldup International Corp., 349 F.3d 1333, 1338 (Fed. Cir. 2003)*, we noted that the invention, while enabled by the issued patent, nevertheless required "hundreds of modifications" and months of experimentation by the inventors to achieve a suitable commercial implementation. In doing so, we observed that issuance of a patent "does not require an inventor to meet lofty standards for success in the commercial marketplace." *Id. at 1338*.

Second, it may be difficult to show that the patented technology would or would not be commercially viable in the absence of market incentives to commercialize the technology.

Third, even a faulty technology may provide some meaningful competition. As a leading commentator has suggested in the analogous context of *Section 2* of the Sherman Act:

---

[13] The Commission based its statement that Lagadec's commercial potential was "doubtful" on the testimony of a Philips expert that the Lagadec method was "prone to errors," "unreliable," and "unworkable." *Final Determination at 24 n.20, 2007 ITC LEXIS 185*. These statements, however, appear to have been volunteered by the expert during testimony related to the **[**45]** validity of the Raaymakers '825 and '856 patents, not in the context of whether Lagadec could have been a competitive alternative to the Orange Book technologies.

> Even the acquisition of one out of several equivalent patents might have exclusionary effects. The acquired patent might, with further advances in the art, turn out to have been the most promising. . . . Further, the inquiry [into whether a given patent is superior or inferior] is rarely worthwhile, for even inferior technologies can provide some, even if not perfect, competition to the patentee.

3 Areeda & Hovenkamp, *supra*, **[**48]** P 707d at 203-04.

Fourth, as discussed above, there are no benefits to be achieved from suppression of potentially competing technology, suggesting that there would be no harm to competition from adopting a protective rule.

While we reject the suggestion that a showing of misuse in these circumstances requires proof that an allegedly-suppressed technology was already commercially viable, the question remains as to what showing must be made to invoke the patent misuse defense. On the one hand, evidence that a suppressed technology would have been viable would be sufficient; on the other, proof that a suppressed technology **[*1319]** could not have been viable would be sufficient to negate a charge of misuse. We need not determine at this time where on the continuum **[***1687]** between "certainly would have been viable" and "certainly could not have been viable" the appropriate standard lies. We leave that issue for consideration in the first instance by the Commission, together with the question of whether the evidence here satisfies the standard. [14]

III

We turn then to the final question--whether there was in fact an agreement between Philips and Sony to prevent the licensing of Lagadec as a competitor to the Orange Book. Philips maintains that Princo has made no showing that Sony agreed with Philips that Lagadec would be unavailable. The Commission did not reach this issue in rejecting Princo's argument. *Final Decision* at 23-26, 80-81, 96-98. There is sufficient evidence supporting Princo's theory that we conclude that further Commission proceedings are necessary.

First, it is undisputed that the Orange Book joint licenses that included Lagadec only permitted the use of the Lagadec license to produce Orange Book compliant discs. As the ALJ noted, "All of Philips' CD-R and CD-RW licenses contain a field of use provision limiting the license grant to use of the patents to manufacture . . . discs that comply with either the CD-R or CD-RW 'Standard Specifications.'" *Initial Determination* at 370. The licenses did not allow the use of Lagadec to produce discs competitive with the Orange Book standard.

Second, there is evidence that could support a finding that Sony granted Philips an exclusive license to Lagadec **[**51]** for CD-R purposes, and that Philips agreed not to license the patent (absent "exceptional" circumstances) except for the manufacture of Orange Book compliant discs.

The parties appear to agree that a 1993 agreement between Philips and Sony "granted exclusive right[s] to license Sony's CD-R patents for purposes of manufacturing CD-R discs and recorders." Intervenor's Br. 40 n.17; *see also id*. at 36 n.13. While it may be that the 1993 agreement did not initially list Lagadec as an included patent, that agreement was not limited to listed patents. It stated that it pertained to "Patent Rights . . . **[*1320]** including but

---

[14] The record appears to contain competing evidence as to Lagadec's potential. On the one hand, both the Commission and Philips recognize that Lagadec provided **[**49]** an alternative to the Orange Book method. *See* [Final Determination at 24, 2007 ITC LEXIS 185]() ("Lagadec constitutes, at best, a substitute technology. . . ."); Intervenor's Br. 35 (noting that Princo had "point[ed] to evidence suggesting that the digital modulation method taught by the Lagadec patent was a technological alternative to the analog method of the [Raaymakers] patents"). On the other, Philips's witness suggested that commercial development might be difficult. However, the record contains a 1986 Sony memorandum describing the Lagadec proposal that suggests potential solutions existed to some of the problems identified by Philips's expert even at that early date. For example, the expert stated that the Lagadec encoding method would cause unwanted interference at the low and high ends of the frequency spectrum. The memorandum indicates that interference caused by the Lagadec method at high frequencies could be reduced by "simple audio oversampling" and that interference at low frequencies could be reduced with "[a] simple digital highpass filter." The patent as issued reflects these solutions. *E.g*. '565 Patent col.6 ll.47-52; *id*. col.7 ll.54-58 (discussing band-limitation to eliminate disturbance **[**50]** at high and low frequencies).

not limited to" the listed patents. J.A. 3319. The parties appear to differ as to whether Lagadec was subject to the 1993 agreement before 2001. Princo points to evidence that Lagadec was, in fact, licensed by Philips for CD-R purposes before 2001. *See* J.A. 3506, 3532 (1999 CD-R joint license and accompanying exhibit of patents listing Lagadec). It is also unclear whether the 1993 agreement was extended to cover Sony's patents for purposes of CD-RW licensing before a separate agreement to that effect was executed in 2000, though Philips admits that it somehow had the authority **[**52]** to license Lagadec for CD-RW purposes before that time. Intervenor's Br. 12; J.A. 3534, 3561 (1999 CD-RW joint license and accompanying exhibit of patents listing Lagadec).

There is also a question as to how to interpret the 1993 agreement. Princo contends that in the agreement Philips agreed not to license Sony patents for non-Orange Book purposes absent "exceptional" circumstances. Appellants' Reply Br. 12-13. Princo urges that the evidence shows that Philips did not, in fact, license Sony patents for any other purposes, again supporting an inference that it agreed not to do so. [15]

The 1993 agreement gave Philips an "exclusive right to license such Patent Rights . . . for use in Articles listed in Appendix **[**53]** 2." J.A. 3319. Appendix 2 lists "CD-WO" (i.e., CD-R) "Disc" and "Recorder." J.A. 3321. The agreement is unclear as to whether Appendix 2 is referring only to Orange Book compliant products. Other portions of the 1993 agreement, however, arguably tend to suggest both that the license was broader than for Orange Book uses and that Philips was to license for non-Orange Book purposes only in "exceptional" circumstances. That agreement went on to state that "it is expressly understood . . . that in licensing . . . any Patent Rights relative to Articles . . . both our companies shall give at all times due regard to our joint efforts to promote the standardization of optical recording and retrieval systems." J.A. 3320. It further noted that "we confirm with respect to the aforementioned Patent Rights . . . that we will license such Patent Rights outside the jointly agreed upon system standards only in cases which can reasonably be considered exceptional." *Id*.

Third, there is evidence that, if the 1993 agreement applied to Lagadec, Sony itself may have agreed with Philips not to license the Lagadec patent for non-Orange Book purposes. Again the agreement stated "we confirm with respect to the **[**54]** aforementioned Patent Rights on joint inventions that we will license such Patent Rights outside the jointly agreed upon system standards only in cases which can reasonably be considered exceptional." J.A. 3320. There is a question as to whether the word "we" refers only to Philips, or to Sony as well. Again, we think the agreement is unclear, and on remand the Commission should consider its proper interpretation.

The portions of the record before us in the joint appendix are thus unclear as to whether the 1993 agreement became applicable to Lagadec, whether Philips received **[*1321]** an exclusive license to Lagadec for all purposes, and whether Philips and Sony agreed generally not to license Lagadec outside the Orange Book standard. On remand, the Commission should determine which interpretation is correct, taking into account any other relevant evidence pertinent to the agreement above.

In summary, the Commission did not determine whether the parties agreed not to license Lagadec outside the Orange Book context. Because we lack the Commission's familiarity with the full record, a remand is appropriate so that the factfinder may make that determination in the first instance. In doing so, we **[**55]** emphasize that the burden of proving misuse, and the corresponding risk of having made an insufficient record, lies with Princo. If the Commission determines on remand that the record contains insufficient evidence to justify a finding that Sony and Philips agreed that Lagadec would not be licensed as competitive technology, then there would be no misuse under Princo's theory.

CONCLUSION

---

[15] Princo points out that when asked if he was "aware of any separate license agreements between a licensee and Philips whereby only certain patents that are identified in the CD-R disc license were licensed," a Philips witness testified "I'm not aware of any such license agreements." J.A. 1934. Such "business behavior is admissible circumstantial evidence from which the fact finder may infer agreement." *Theatre Enters., Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 541, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*. **[***1688]**

In summary, we affirm the Commission's determination that Princo failed to meet its burden of demonstrating that Philips's patents are unenforceable due to patent misuse on the grounds of unlawful tying.

However, we conclude that the Commission's analysis of the agreement issue was predicated on legal errors in several respects, and that the Commission erred in failing to determine whether Princo established that such an agreement existed. We vacate and remand for the limited purposes of determining (1) whether Lagadec was a potentially workable alternative to the Orange Book technology and (2) whether Princo has established that Sony and Philips agreed that Lagadec would not be licensed in a manner allowing its development as competitive technology.

Dissent by: BRYSON (In Part)

Dissent

BRYSON, *Circuit Judge*, concurring in the result in part and dissenting in part.

I would affirm the Commission's final determination and would not remand for further findings.

1. The majority rejects Princo's tying claim on a ground not adopted by the Commission, concluding that the Commission's decision on that issue is "somewhat opaque." I find the Commission's decision on that issue to be both clear and sufficient to reject Princo's argument of patent misuse based on tying. I agree, however, that the majority's ground for **[***1689]** decision is also correct and offers a satisfactory alternative rationale for affirming the Commission's determination on that issue.

The tying argument is based on the contention that the Lagadec patent is not among those "essential" to the manufacture of an Orange Book compliant disc. Tying that non-essential patent to the package of essential Orange Book patents, according to the argument, was anticompetitive and unjustified, and thus constituted patent misuse.

As the Commission explained, the premise of that argument--that the Lagadec patent cannot be used to make an Orange Book compliant disc--is fatal to the tying claim. That **[**57]** is because prospective manufacturers **[*1322]** of Orange Book compliant discs would be interested in obtaining a license for the essential patents in the patent pool; they would not be interested in a patent that could not be used to make an Orange Book compliant disc. For that reason, the requirement that purchasers take a license to a pool of patents that included the Lagadec patent could not have adversely affected competition, because at most the licensees were required to accept something they did not want and would not have tried to obtain by other means and from other sellers. *See Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 16, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* ("When a purchaser is 'forced' to buy a product he would not have otherwise bought even from another seller in the tied product market, there can be no adverse impact on competition because no portion of the market which would otherwise have been available to other sellers has been foreclosed.").

Princo seeks to dress up its tying claim by referring to Philips's conduct as "sequestering substitute patents within a pool." But the tying of the Lagadec patent to the other patents in the pool, without more, cannot in any reasonable sense be characterized **[**58]** as "sequestering." Princo's real argument on this point, made elsewhere in its brief, is that the Lagadec patent "couldn't be used and that some of the pool cost, must be attributed to its inclusion." That argument, however, is contrary to the Commission's findings and to simple economic analysis. As the Commission found, if the Lagadec patent, as Princo asserts, could not be used to make Orange Book compliant discs, there is no economic reason to conclude that the price of a license to the Orange Book pool of patents would be lower if the Lagadec patent were excluded. The licensees were interested in producing discs, not in counting the number of patents covered by the license. The Commission explained that the profit-maximizing price for the license would be the same regardless of whether it included no unwanted patents or dozens of them, as long as it contained all the patents needed to make Orange Book compliant discs.

2. That reasoning likewise disposes of Princo's argument that Philips has engaged in conduct that constitutes unlawful tying under the Supreme Court's decision in *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. Once again, I agree that the majority's **[**59]** ground for deciding this issue is valid, but it is unnecessary to invoke that ground of decision because this case plainly does not involve unlawful tying under the *Zenith* standard. [1] In *Zenith*, the Supreme Court found misuse where a patent holder licensed a package of some 500 patents involving radio and television technologies and set royalties based on the licensees' total radio and television sales--even if some of those sales were of products that used none of the licensed patents. *Id. at 134-35*. Here, in contrast, it is undisputed that many of the patents included in the joint license are necessary to manufacture Orange Book compliant discs, and the licensees were obligated to pay royalties only on discs **[*1323]** that used at least one patent in the package. That difference is a significant one because, as discussed above, as long as some of the patents included in the license are used to manufacture Orange Book compliant discs (and all such necessary patents are included in the license), then the price of the license does not depend on whether the package also includes unwanted patents. Unlike in *Zenith*, Philips was not using the leverage of the Orange Book licenses to increase revenues **[**60]** unrelated to its patent rights, such as by "garner[ing] as royalties a percentage share of the licensee's receipts from sales of other products." *Zenith, 395 U.S. at 135*. **[***1690]**

3. As for Princo's argument that Philips committed patent misuse by "conspiring to include in a mandatory patent pool their competing patents and thereby engag[ing] in prohibited price fixing," the majority holds that the Commission's decision on that issue cannot be sustained and that the case must be remanded to the Commission for further proceedings. I disagree. In my view, the Commission's findings of fact and legal conclusions provide a sufficient ground for upholding the Commission's ruling that Princo has failed to satisfy its burden of showing patent misuse **[**61]** through a horizontal price-fixing agreement.

Princo begins by attacking the Commission's finding that there is no evidence that the patents in the joint package licenses "cover technologies that are close substitutes." Princo contends that the evidence shows that the Lagadec patent and the Raaymakers patents "are substitutes for one another," and that the "Commission's conclusion that there has been no showing that the Lagadec patent was a potential competitor of the Philips Raaymakers patents or that Sony and Philips acted with the purpose of avoiding potential competition with each other" is unsupported by substantial evidence.

The Commission found that the evidence failed to show that the Lagadec and Raaymakers technologies were substitutable. In particular, the Commission stated that the respondents "have not identified, nor are we aware of, evidence in the record that the patents in the joint package licenses 'cover technologies that are close substitutes.'" *Final Determination 22, 2007 ITC LEXIS 185* (citing U.S. Dep't of Justice & FTC, *Antitrust Guidelines for the Licensing of Intellectual Property* § 5.1 (1995)). For that reason, the Commission concluded, the joint package licenses "have not been **[**62]** shown to be 'the joint marketing of *competing* patent rights.'" *Id*. (emphasis in original). Because "the patents have not been shown to be competing," the Commission ruled, the pool royalty rate set by Philips and its co-licensors was not "a pricing agreement between competing entities with respect to their competing products." *Id*. (citing *Texaco, Inc. v. Dagher, 547 U.S. 1, 6, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006))*.

---

[1] The parties spend some time debating whether Princo has waived this argument. The Commission and the intervenor contend that the "*Zenith*" argument has been waived because neither Princo nor the Investigative Attorney argued that the tying arrangement in this case constituted per se patent misuse. Because the Supreme Court's analysis in *Zenith* is inapplicable here in any event, I agree with the majority that it is unnecessary to resolve the waiver question.

There is no force to Princo's contention that the Commission's finding on that issue is unsupported by substantial evidence. Because the Commission found that no evidence was introduced on that issue, it fell to Princo on appeal to point to the evidence that would support its contention that the Lagadec patent was a viable potential competitor for the Raaymakers patents. It has not done so. Instead, Princo has relied entirely on an inference that the Lagadec patent must have been a potential competitor for Philips's Orange Book patents because otherwise Philips would not have allowed Sony to share in the patent pool licensing royalties. Princo contends **[*1324]** that the agreement can be explained only as a naked conspiracy to suppress competition or, as Princo puts it, that "Sony was paid not to compete" with Philips. **[**63]** Not only does that argument not constitute evidence of the viability of the Lagadec technology as a potential basis for a system that would compete with the Orange Book system, but it ignores ample record evidence of other reasons that Sony shared in the royalties from the Orange Book licensing agreements.

The Commission rejected, as unsupported by the evidence, the argument made by the Investigative Attorney that "Philips included Sony in the pool not because Sony brought anything necessary to CD-R/RW technology, but rather because Sony is a major player in the industry, whose cooperation Philips wanted." *See Final Determination 97, 2007 ITC LEXIS 185* & n.63. The Commission likewise rejected as unsupported the administrative law judge's remark that the inclusion of Lagadec in the patent pool "appears to be an attempt to forestall digital approaches to achieving what the Philips analog technology has achieved." *Final Determination 23 n.18, 2007 ITC LEXIS 185*.

Not only was there no evidence to support those assertions, but the evidence affirmatively showed that there were other reasons for Sony's receiving a share of the royalties of the Orange Book patent pool, including the evidence that Sony had contributed substantial resources **[**64]** to the project to develop the Orange Book standard, and that the royalty division reflected a rough assessment of the value of each party's portfolio of worldwide patent rights. Because Princo did not persuade the Commission that those justifications for Sony's royalty share in the proceeds of the licensing pool were pretextual, the Commission properly rejected Princo's argument that the only possible reason for Sony's receiving a portion of the proceeds of the agreement is that it had engaged in a horizontal agreement with Philips to fix prices. **[***1691]**

Significantly, the Commission's finding regarding the potential for the Lagadec technology to generate a competing system was not limited to the state of the technology at the time the patent pool was put into place. The Commission found that no evidence had been introduced suggesting that there was any prospect of competition between the Lagadec patent and other patents in the pool. As the Commission put it, "there has been no showing that the Lagadec '565 patent competes with another patent in the pool, no showing that the pool licensors would have competed in the technology licensing market absent the pooling arrangement, and no showing **[**65]** of anti-competitive effect" from the inclusion of the Lagadec patent in the patent pool. *Final Determination 23, 2007 ITC LEXIS 185*; *see also id*. at 26 (Princo has "not pointed to evidence that establishes that, absent the pooling arrangements, the pool licenses would have competed in the technology licensing market"). The Commission noted that the administrative law judge had credited testimony that the Lagadec approach "is prone to errors and 'did not provide a scheme that would work and was reliable.'" *Id*. at 24 n.19. [2] Because "there has been no showing that the patents **[*1325]** in the pool are substitutable," the Commission concluded, "the agreement between the licensors

[2] The majority asserts that the Commission "did not determine that Lagadec was fundamentally incapable of being commercialized as part of an alternative standard, but merely that it was not workable within the context of existing Orange Book technology." I do not interpret the Commission's statements to be so limited. The expert who testified that the Lagadec approach was "prone to errors" **[**66]** (and whose testimony was credited by the administrative law judge) identified several problems with Lagadec's approach that were not restricted to the viability of Lagadec as a component of the Orange Book platform. For example, the expert noted that "from basic physics, you can just see that [Lagadec's approach] is not a good solution, and it really wouldn't work well." Thus, while the Commission noted that Lagadec "does not work well according to the Orange Book standards," it added, separately, that Princo had "pointed to no evidence that the Lagadec approach is a commercially viable technological alternative to the technology of Philips's '825 or '856 patents," and that "the commercial viability of a method that is prone to errors, unreliable, and unworkable is doubtful." *Final Determination 24, 2007 ITC LEXIS 185*. Moreover, the burden was on Princo to show that pool licensors would have competed in the technology licensing market, and the Commission found that Princo did not point to any evidence that Lagadec represented a commercially viable approach, either inside or outside the context of the Orange Book standards.

to set a fixed royalty for the joint licenses under the pool is not price fixing per se in the market for licensing CD-R/RW patents." *Final Determination 26, 2007 ITC LEXIS 185*.

Although the majority suggests that Philips contended that the Lagadec technology **[**67]** "must already have been developed to the point of commercial viability before misuse could be found," I read the Commission's observations about the absence of evidence of substitutability to apply not only to the present but to the future as well. To the extent that the Commission did not deal in detail with the question whether there was a realistic possibility that the Lagadec technology could have been developed into a viable competing system, the fault for any such shortfall rests with Princo, which did not offer any evidence, or even argument, to that effect.

Princo was free to offer evidence that Lagadec was substitutable technology and that there was a realistic prospect that the invention of Lagadec could be refined in the future to the point that it could be used as a platform for technology that would compete with the technology used in the Orange Book compliant discs. But Princo did not offer any such evidence. The Commission did not require a showing that Lagadec could have been used without further development to create a commercially successful technology. To the contrary, even though Princo did not point to any evidence of a realistic possibility that the Lagadec invention **[**68]** could be developed into competing technology in the foreseeable future, the Commission's analysis encompassed the possibility of future developments. Nonetheless, the Commission found no evidence that Lagadec would have been likely to lead to competing technology but for the pooling arrangements. Princo failed to show a likelihood that the digital method of encoding position data recited in the Lagadec patent would lead to the development of discs that would use that technology instead of the Orange Book analog method of encoding position data, and that the digital encoding technology would be used in discs and disc readers that would compete with Orange Book compatible systems. As the Commission explained, unless the competing technology would have entered the market "to become a significant competitive force," it could not have augmented future competition in an important way. Yet the Commission found that the record contained **[***1692]** no evidence that Sony would have entered the market and become a significant competitive force. *Final Determination 98, 2007 ITC LEXIS 185*. Moreover, Princo offered no evidence that any potential licensee ever expressed an **[*1326]** interest in licensing Lagadec for use in technology that **[**69]** would compete with the Orange Book compliant discs. Any suggestion that the Lagadec patent could have provided the basis for a competing system is thus entirely speculative and unsupported by argument or evidence before the Commission.

Finally, the majority's conclusion with respect to Princo's tying argument (with which I agree), that "Lagadec qualified as an 'essential' patent for purposes of the Orange Book pool," undermines Princo's price-fixing argument. Princo sets forth the legal rule that it contends governs this case: "the pooling of non-blocking, substitute patents [is] universally recognized as highly anticompetitive" and is unlawful. If the Lagadec patent is an "essential," or "blocking" patent, that rule by its own terms does not apply. The majority's conclusion that the Lagadec patent was "essential" because claim 6 of that patent "reasonably might be necessary as a blocking patent to the Orange Book standard" thus takes this case outside of the legal rule on which Princo relies. *See* *Standard Oil Co. v. United States, 283 U.S. 163, 171, 51 S. Ct. 421, 75 L. Ed. 926 & n.5 (1931)* (recognizing that the pooling of blocking patents serves a legitimate purpose); Dep't of Justice & FTC, *Antitrust Guidelines for the Licensing of Intellectual Property* § 5.5, **[**70]** ex. 10 (1995) (noting that where manufacturers pool blocking patents, "the manufacturers are not in a horizontal relationship with respect to those patents").

Although the majority correctly notes that the Commission did not address the question whether Philips and Sony agreed not to license Lagadec as a competitor to the Orange Book, it is not clear that Princo squarely presented that argument to the Commission. In its briefing before the Commission, Princo argued that Orange Book licensees were not permitted to use the package patents for products outside the scope of the Orange Book, but it did not point to evidence that Sony was precluded from licensing Lagadec for non-Orange-Book uses. In any event, Princo still needed to show that any agreement not to allow Lagadec to be licensed outside the Orange Book would have had some anticompetitive effect in order for the agreement to constitute a form of horizontal price fixing. The Commission's finding that Princo failed to demonstrate that absent the patent pool agreement Sony would have competed with the Orange Book technology--either directly or by licensing the Lagadec patent--was sufficient to support the Commission's conclusion **[**71]** that the patent pool was not shown to have any such anticompetitive effect.

I would therefore affirm the Commission's final determination.

LexisNexis® Headnotes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN1[] **Summary Judgment, Entitlement as Matter of Law**

To obtain summary judgment, the moving party must show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. In considering a motion for summary judgment, the court will not weigh the evidence and determine the truth of the matter. Instead, the court will draw any permissible inference from the underlying facts in the light most favorable to the nonmoving party.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN2[] **Summary Judgment, Burdens of Proof**

With regard to a motion for summary judgment, although the court will view all underlying facts and inferences in the light most favorable to the nonmoving party, the nonmoving party nonetheless must offer some concrete evidence from which a reasonable juror could return a verdict in his or her favor. Summary judgment is appropriate when the nonmoving party has the burden of proof on an essential element of his or her case and does not make, after adequate time for discovery, a showing sufficient to establish that element. The nonmoving party must satisfy this burden of proof by offering more than a mere "scintilla of evidence" in support of his or her position.

Antitrust & Trade Law > General Overview

HN3[] **Antitrust & Trade Law**

Where regulatory statutes are silent in respect to antitrust, courts must determine whether, and in what respects, they implicitly preclude application of the antitrust laws. Those determinations may vary from statute to statute, depending upon the relation between the antitrust laws and the regulatory program set forth in the particular statute, and the relation of the specific conduct at issue to both sets of laws.

Antitrust & Trade Law > General Overview

Securities Law > General Overview

HN4[] **Antitrust & Trade Law**

To determine clear incompatibility between securities and antitrust laws, the United States Supreme Court has employed the factors it deemed "critical." These included: (1) the existence of regulatory authority under the securities law to supervise the activities in question; (2) evidence that the responsible regulatory entities exercise that authority; and (3) a resulting risk that the securities and antitrust laws, if both applicable, would produce conflicting guidance, requirements, duties, privileges, or standards of conduct.

Antitrust & Trade Law > General Overview

Securities Law > General Overview

HN5[] **Antitrust & Trade Law**

To determine incompatibility between securities and antitrust laws courts consider: where conduct at the core of the marketing of new securities is at issue; where securities regulators proceed with great care to distinguish the encouraged and permissible from the forbidden; where the threat of antitrust lawsuits, through error and disincentive, could seriously alter underwriter conduct in undesirable ways, to allow an antitrust lawsuit would threaten serious harm to the efficient functioning of the securities market.

Antitrust & Trade Law > General Overview

Securities Law > General Overview

HN6[] **Antitrust & Trade Law**

With regard to incompatibility between securities and antitrust laws, any enforcement-related need for an antitrust lawsuit is unusually small in the securities context because: (1) the Securities and Exchange Commission (SEC) actively enforces the rules and regulations that forbid the conduct in question; (2) investors harmed by underwriters' unlawful practices may bring lawsuits and obtain damages under the securities law; and (3) the SEC is itself required to take account of competitive considerations when it creates securities-related policy and embodies it in rules and regulations.

Antitrust & Trade Law > General Overview

Securities Law > General Overview

HN7[] **Antitrust & Trade Law**

With regard to incompatibility between securities and antitrust laws, in the securities market, joint action is integral to the activity which the Securities and Exchange Commission (SEC) both encourages and regulates. That joint action necessarily exposes the participants to antitrust complaints because they engage in sophisticated financial arrangements in concert.

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > Authorities & Powers

HN8[] **US Federal Energy Regulatory Commission, Authorities & Powers**

The Federal Energy Regulatory Commission (FERC) regulates the rates for transporting and selling natural gas in interstate commerce. It also facilitates price transparency for the sale or transportation of physical natural gas in interstate commerce, out of a due regard for fair competition. *15 U.S.C.S. § 717t-2(a)(1)*.

Securities Law > Civil Liability Considerations > General Overview

HN9[] **Securities Law, Civil Liability Considerations**

Private individuals who suffer harm as a result of a violation of pertinent statutes and regulations may recover damages under the Securities Exchange Act. *15 U.S.C.S. §§ 78bb*, *78u-4*, *77k*. These carefully crafted provisions seek to regulate the coexistence of the Securities and Exchange Commission (SEC) enforcement and private litigation.

Energy & Utilities Law > Antitrust Issues > General Overview

HN10[] **Energy & Utilities Law, Antitrust Issues**

In the natural gas context, there is an enforcement-related need for antitrust lawsuits.

Opinion by: ROBERT C. CHAMBERS

Opinion

[*644] MEMORANDUM OPINION AND ORDER

Pending before the Court are the Renewed and Incorporated Motions for Summary **[*645]** Judgment (doc. 148, Ex. 2, in each of the above-captioned matters) of Defendant Columbia Gas Transmission Corporation (TCO). For the following reasons, the Court **GRANTS in part** and **DENIES in part** these motions.

I. FACTS

On August 19, 2008, the Court denied Plaintiffs' renewed motion for class certification. In that order, the Court discussed the underlying facts of this case in considerable detail. Accordingly, the Court will not repeat those facts here. Rather, the Court adopts and refers to the factual summary as laid forth in the August 19 Memorandum Opinion and Order.

Since the Court's entry of that opinion and order, the Federal Energy Regulatory Commission (FERC) approved a stipulation and consent agreement between its Office of Enforcement and TCO. *November 6, 2008 Order Approving Stipulation and Consent Agreement,* 2:04-cv-869, doc. 163-3. This order was the second of two events that prompted TCO to file the instant renewed and incorporated summary judgment motions. *TCO's* ***[**6]*** *Memorandum in Support,* at p. 1. The first event was the United States Supreme Court's decision in *Credit Suisse Sec. (USA) LLC v. Billing, 551 U.S. 264, 127 S. Ct. 2383, 168 L. Ed. 2d 145 (2007)*. According to TCO, *Credit Suisse* stands for the proposition "that conduct subject to comprehensive oversight by a federal regulatory agency can be 'clearly incompatible' with, and hence immune from, the antitrust laws." *TCO's Memorandum in Support,* at p. 1 (quoting *Credit Suisse, 127 S. Ct. at 2397*). TCO argues that because the November 6, 2008 FERC Order "condones and approves the practice upon which Plaintiffs' entire theory of damage causation here is premised . . . , then surely the *Credit Suisse* rule applies," and Plaintiffs cannot end-run FERC oversight through the application of other laws. *Id.* at p. 2.

However, whether the recent FERC order actually "condones and approves the practice upon which Plaintiffs' entire theory of damage causation here is premised" is itself a subject of a contentious factual dispute between the parties. *Id.* TCO argues that Plaintiffs' theory consists of the following:

> TCO entered into long-term PAL [parking and lending] transactions with specific beginning and ending dates, that **[**7]** TCO failed to *recall (i.e.* demand back) outstanding PAL balances when PAL (and other transportation services) were interrupted. Plaintiffs contend that these outstanding and unresolved long-term PAL balances led to the nomination "cuts" upon which they would base their accusations of "illegality" and from which they would calculate all of their asserted damages.

TCO's Memorandum in Support, at p. 2-3 (emphasis in original) (internal citations omitted). In TCO's view, "FERC condone[d] and approve[d] [these] practice[s]" when, in the November 6 Order:

> FERC found no irregularity in long-term PAL transactions, or in specific commencement and termination dates. Moreover, it expressly and affirmatively [concluded that] . . . TCO is *not* required to recall outstanding balances

> during the duration of a PAL service agreement, notwithstanding intervening interruptions of PAL or other, higher-priority services.

TCO's Memorandum in Support, at p. 3 (emphasis in original).

TCO further claims that "[f]or IPP [interruptible paper pool] imbalances to have had anticompetitive *effects* and to have caused antitrust injury under the Sherman Act, it must have been improper for TCO to maintain the imbalance at **[**8]** the time of **[*646]** the supposed harm to each plaintiff." *TCO's Reply,* at p. 8-9 (emphasis in original). TCO believes that damages based on IPP imbalances fail for the same reason as those based on PAL imbalances: "Without the premise that TCO was obligated to recall PAL volumes when the pipeline became tight, the assertion that harm was caused by TCO on days when plaintiffs' nominations were not accepted simply evaporates." *TCO's Reply,* at p. 9. In any event, TCO notes that "Plaintiffs do not even attempt any damages calculation based on IPP imbalances." *Id.*

Plaintiffs dispute the notion that either the November 6, 2008 Order, or the earlier October 23, 2008 Stipulation and Consent Agreement which it approved, "condones [or] approves" the practices upon which they base their causation and damages theory. *Plaintiffs' Response,* at p. 18 (quoting *TCO's Memorandum in Support,* at p. 2). As an initial matter, they point out that FERC's "Second Disgorgement Order [the November 6, 2008 Order] certainly does not condone (or even address) the illegal park and loan transactions during the period covered by the First Disgorgement Order [entered October 25, 2000]." *Id.* They also characterize their causation **[**9]** and damages theory in regards to the conduct covered by the November 6, 2008 Order differently than Defendants. They state that:

> [Their] complaint as to that conduct is that TCO utilized PAL and IPP services to illegally convert its PAL service, the lowest priority and most interruptible of all TCO services, into a "firm" long term service for an expanded group of select shippers by allowing them to maintain IPP imbalances (positive imbalances for the parks and negative imbalances for the loans).

Id. at p. 18-19. They further state that this conduct "is precisely what the FERC found to be illegal in the Second Disgorgement Order." *Id.* at p. 19 (citing *November 6, 2008 Order Approving Stipulation and Consent Agreement,* 2:04-cv-869, doc. 163-3, at p. 3).

Plaintiffs argue that TCO's focus on the fact that FERC concluded that TCO need not recall PAL imbalances when PAL services are posted as "not available" ignores their "underlying point . . . that the PAL imbalances recorded as IPP imbalances never should have been permitted in the first place, and that the existence of these imbalances caused constraints in the system that resulted in cuts to plaintiffs' nominations and other commercial **[**10]** harm." *Id.* Plaintiffs insist that "[i]t is the existence of the imbalances that is at the core of all of plaintiffs' damage claims, and the FERC agrees in the Second Disgorgement Order that the existence of those imbalances was illegal." *Id.*

II. SUMMARY JUDGMENT STANDARD

HN1[] To obtain summary judgment, the moving party must show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. In considering a motion for summary judgment, the Court will not "weigh the evidence and determine the truth of the matter." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. Instead, the Court will draw any permissible inference from the underlying facts in the light most favorable to the nonmoving party. *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587-88, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

HN2[] Although the Court will view all underlying facts and inferences in the light most favorable to the nonmoving party, the nonmoving party nonetheless must offer some "concrete evidence from which a reasonable **[*647]** juror could return a verdict in his [or her] favor." *Anderson, 477 U.S. at 256*. Summary judgment is appropriate when **[**11]** the nonmoving party has the burden of proof on an essential element of his or her case and does not make, after adequate time for discovery, a showing sufficient to establish that element. *Celotex Corp. v. Catrett, 477 U.S.*

317, 322-23, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986). The nonmoving party must satisfy this burden of proof by offering more than a mere "scintilla of evidence" in support of his or her position. Anderson, 477 U.S. at 252.

III. DISCUSSION

[1]

A. Federal and State Antitrust Claims

TCO claims that Plaintiffs' antitrust claims are precluded by *Credit Suisse.* [2] In that **[**12]** case, a group of investors filed two antitrust class-action lawsuits against several investment banks that "had acted as underwriters, forming syndicates that helped execute the IPOs [initial public offerings] of several hundred technology-related companies." *Credit Suisse, 127 S. Ct. at 2388*. The investors alleged that the underwriters (banks) had violated antitrust laws "by agreeing among themselves to impose harmful conditions upon potential investors." *Id.* The alleged harmful conditions consisted of various "'additional anticompetitive charges over and above the agreed-upon IPO share price plus underwriting commission." *Id. at 2389*. "The underwriters moved to dismiss the investors' complaints on the ground that federal securities law impliedly precludes application of antitrust laws to the conduct in question." *Id.* The District Court for the Southern District of New York dismissed the complaints, the Court of Appeals for the Second Circuit reversed the district court, and the Supreme Court in turn reversed the circuit court. *Id.*

The Supreme Court framed the issue before it as "whether there was a 'plain repugnancy' between the[] antitrust claims and the federal securities law." *Id.* (quoting *Gordon v. New York Stock Exch., Inc., 422 U.S. 659, 682, 95 S. Ct. 2598, 45 L. Ed. 2d 463 (1975))*. The Court noted that ***HN3***[] "[w]here regulatory statutes are silent in respect to antitrust, . . . courts must determine whether, and **[**14]** in what respects, they implicitly preclude application of the antitrust laws." *Id.* It further observed **[*648]** that "[t]hose determinations may vary from statute to statute, depending upon the relation between the antitrust laws and the regulatory program set forth in the particular statute, and the relation of the specific conduct at issue to both sets of laws." *Id.* The Court then reviewed, in detail, "three [of its] decisions . . . [that] specifically address the relation of securities law to ***antitrust law***." *Id.* After completing its review, the Court concluded that these securities/antitrust cases "make clear that, when a court decides whether securities law precludes ***antitrust law***, it is deciding whether, given context and likely consequences, there is a 'clear repugnancy' between the securities law and the antitrust complaint--or as we shall subsequently describe the matter, whether the two are 'clearly incompatible.'" *Id. at 2392*.

[1] In the instant motions, TCO argues that Plaintiffs' unjust enrichment claims "are untenable for the same reasons that the antitrust claims are untenable, *i.e.* the rule of *Credit Suisse." TCO's Memorandum in Support,* at p. 14. In light of the Court's findings regarding the antitrust claims and *Credit Suisse,* discussed below, this argument does not behoove TCO. However, because the Court finds Plaintiffs' unjust enrichment claims untenable for reasons more fully discussed in the Court's order addressing Defendants' comprehensive motions for summary judgment, the Court grants summary judgment to TCO as to Plaintiffs' unjust enrichment claims.

[2] TCO also claims that *Verizon Communications, Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, precludes Plaintiffs' antitrust claims **[**13]** because that case "showed that violations of a regulatory regime aimed at promoting competition cannot also transgress ***antitrust law*** unless they would have done so in the absence of the regulatory regime." *TCO's Memorandum in Support,* at p. 8. However, the Court continues to believe, as it explained in its denial of Defendants' motion to dismiss, that "Defendants [including TCO] have not demonstrated that this case involves the same level of regulatory overlay and unique market found in *Trinko." June 14, 2005 Memorandum Opinion and Order,* 2:04-cv-867, doc. 371, at p. 16. Thus the Court rejects TCO's contention that *Trinko* compels summary judgment as to Plaintiffs' antitrust claims. To the contrary, the Court continues to "find[] *Otter Tail [Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*,] more closely on point." *See id.* at p. 16-17.

HN4[] To determine clear incompatibility, the Court employed the factors it deemed "critical" in two of the three securities/antitrust cases that it had reviewed: *Gordon, 422 U.S. 659, 95 S. Ct. 2598, 45 L. Ed. 2d 463*, and *United States v. National Ass'n of Securities Dealers [NASD], 422 U.S. 694, 95 S. Ct. 2427, 45 L. Ed. 2d 486 (1975)*. **[**15]** These included:

> (1) the existence of regulatory authority under the securities law to supervise the activities in question; (2) evidence that the responsible regulatory entities exercise that authority; and (3) a resulting risk that the securities and antitrust laws, if both applicable, would produce conflicting guidance, requirements, duties, privileges, or standards of conduct.

Credit Suisse, 127 S. Ct. at 2392. It "also note[d] (4) that in *Gordon* and *NASD* the possible conflict affected practices that lie squarely within an area of financial market activity that the securities law seeks to regulate." *Id.*

The Court found, with little difficulty, that the first, second, and fourth factors had been met. *Id. at 2393*. It therefore turned its focus to the third factor, the risk of conflict between the securities and antitrust laws. The investors argued that the relevant regulatory authority, the Securities and Exchange Commission (SEC), had disapproved of the additional charges imposed by the underwriters, and therefore there was little or no risk of conflict with the antitrust laws. *Id. at 2394*. However, the Court rejected this claim, even assuming that the SEC would continue to disapprove **[**16]** of the charges in the future. Rather, the Court found that "securities law and ***antitrust law*** are clearly incompatible." *Id.*

Analysis of the third factor, risk of conflict, itself involves two elements. First, the Court considered whether antitrust actions could harm the securities market. On this point, the Court concluded that, even if the SEC were likely to disapprove of the conduct attacked in antitrust actions, "permit[ting] antitrust actions . . . *still* threatens serious securities-related harm" because the securities context presents "an unusually serious legal line-drawing problem." *Id.* (emphasis in original). The Court continued: "In the present context only a fine, complex, detailed line separates activity that the SEC permits or encourages (for which [the investors] must concede antitrust immunity) from activity that the SEC must (and inevitably will) forbid (and which, on [the investors'] theory, should be open to antitrust attack)." *Id.* This observation led the Court to express doubt that anyone "but a securities expert" could perform the necessary line-drawing. *Id.* Another potential problem was the fact that "evidence tending to show unlawful antitrust activity and evidence **[**17]** tending to show lawful securities marketing activity may overlap, or prove identical." *Id. at 2395*. Consequently, the same evidence might be used to demonstrate both SEC compliance and violation **[*649]** of antitrust laws. *Id.* Finally, the Court expressed concern over different, nonexpert judges and juries evaluating antitrust claims in the securities market throughout the country, particularly in light of the "unusually high risk that different courts will evaluate similar factual circumstances differently." *Id.*

These concerns led the Court to conclude that "there is no practical way to confine antitrust suits so that they challenge only activity of the kind the investors seek to target, activity that is presently unlawful and will likely remain unlawful under the securities law." *Id.* Therefore, "antitrust courts are likely to make unusually serious mistakes" in the securities context. *Id. at 2396*. The result of these mistakes would be that:

> underwriters [would have to] act in ways that will avoid not simply conduct that the securities law forbids (and will likely continue to forbid), but also a wide range of joint conduct that the securities law permits or encourages (but which they fear could **[**18]** lead to an antitrust lawsuit and the risk of treble damages).

Id.

The Court acknowledged that "[t]his kind of problem exists to some degree in respect to other antitrust lawsuits." *Id.* However, the Court also concluded that in the case before it "the factors . . . mentioned [above] make mistakes unusually likely" and "the securities-related costs of mistakes unusually high." *Id.* These considerations led the Court to a rather circumscribed finding regarding the first element of the conflict analysis:

> ***HN5***[] [W]here conduct at the core of the marketing of new securities is at issue; where securities regulators proceed with great care to distinguish the encouraged and permissible from the forbidden; where the threat of

> antitrust lawsuits, through error and disincentive, could seriously alter underwriter conduct in undesirable ways, to allow an antitrust lawsuit would threaten serious harm to the efficient functioning of the securities market.

Id.

Next, the Court considered the second element of the conflict analysis, the need for enforcement of ***antitrust law***. The Court found that ***HN6***[] "any enforcement-related need for an antitrust lawsuit is unusually small" in the securities context because: (1) "the **[**19]** SEC actively enforces the rules and regulations that forbid the conduct in question[;]" (2) "investors harmed by underwriters' unlawful practices may bring lawsuits and obtain damages under the securities law[;]" and (3) "the SEC is itself required to take account of competitive considerations when it creates securities-related policy and embodies it in rules and regulations." *Id.*

The parties in this case argue over the existence of all four *Credit Suisse* factors, including the dual considerations that comprise the third factor, the risk of conflict between industry-specific regulatory laws and the more general antitrust laws. However, because this Court agrees with Plaintiffs that FERC's regulatory oversight does not involve the same level of risk of conflict with antitrust laws as the SEC's regulatory oversight did in *Credit Suisse,* and thus the vital third factor is not present in this case, the Court need not address the existence of the first, second, and fourth factors discussed in *Credit Suisse.*

In regards to this third factor, TCO argues that "if the complex and heavily nuanced line-drawing that FERC and its regulated entities must undertake is second-guessed by non-expert courts **[**20]** and juries applying antitrust laws, there is a great danger of conflicting and erroneous results." *TCO's Memorandum in Support,* at p. 10. TCO believes this danger **[*650]** persists "even if given conduct [is] currently condemned by both antitrust verdicts and FERC [because] independent application of ***antitrust law*** could tie FERC's hands as regards future adjustments--or even wholesale changes--to its regulatory regime." *Id.* According to TCO:

> FERC has crafted the current competitive environment to maximize the efficiency of the nation's gas transportation system, and fears of unpredictable antitrust liability could cause pipelines to shrink from offering services--yes, like parking and lending--that FERC has approved and that benefit the public through optimal use of pipelines' existing plant and equipment.

Id.

Plaintiffs respond that neither of the risk of conflict factor's twin requirements are present here. "First, the coexistence of FERC oversight and the antitrust laws creates no risk that TCO would [sic] on the receiving end of 'conflicting guidance, requirements, duties, privileges, or standards of conduct'" because, "[b]y contrast [to *Credit Suisse*], the circumstances and regulatory environment **[**21]** in this case bear no resemblance whatsoever to the finely tuned regulation of 'conduct at the core of marketing new securities' that the Court felt the need to insulate from ***antitrust law*** in *Credit Suisse." Plaintiff's Response,* at p. 11-13 (quoting *Credit Suisse, 127 S. Ct. at 2392, 2396)*. Plaintiffs also observe that the Supreme Court found *Credit Suisse* to be an "unusual" case. It involved "an unusually serious legal line-drawing problem," "an unusually high risk that different courts will evaluate similar factual circumstances differently," and an "unusual[] likel[ihood]" of "unusually serious mistakes" with "unusually high" costs. *Credit Suisse, 127 S. Ct. at 2395, 2396*. Furthermore, Plaintiffs argue that TCO's conduct was "patently illegal," and thus there is "no danger that TCO could be found liable for conduct that the FERC permits." *Plaintiffs' Response,* at p. 13.

Second, Plaintiffs maintain that, unlike in *Credit Suisse,* the natural gas industry does not have an "unusually small" "enforcement-related need for . . . antitrust lawsuit[s]." *Credit Suisse, 127 S. Ct. at 2395, 2396*. Plaintiffs observe that the Court in *Credit Suisse* found a limited need for antitrust suits, in **[**22]** part, because "the SEC is required to take into account competitive considerations when it creates securities related policy," thus "mak[ing] it somewhat less necessary to rely on antitrust actions to deter anticompetitive behavior." *Plaintiffs' Response,* at p. 13. They point out that this Court, in denying Defendants' motions to dismiss, already has found "that the FERC's authority to remedy anticompetitive behavior is limited." *Id.* Therefore, Plaintiffs argue that the second factor under the risk of conflict analysis is also missing from this case.

The Court finds that TCO has not made a strong case for the potential applicability of *Credit Suisse* to this case. *Credit Suisse* dealt with the intersection of securities law and ***antitrust law***. Its four-factor test was derived from cases that "address[ed] the relation of securities law to ***antitrust law***." *Credit Suisse, 127 S. Ct. at 2389*. The Supreme Court in *Credit Suisse* suggested that that case shared similarities with other antitrust cases, but it also highlighted that the securities context -- or, at a minimum, the facts of *Credit Suisse* -- presented a variety of "unusual[]" concerns. *See id. at 2396* ("This kind of problem [as existed **[**23]** in *Credit Suisse*] exists to some degree in respect to other antitrust lawsuits. But here the factors we have mentioned make mistakes unusually likely . . . ."). The Court makes no finding as to the scope of *Credit Suisse,* other than to say that the facts of this case do not place it under *Credit Suisse.* The **[*651]** Court also notes that TCO has failed to cite any case applying the *Credit Suisse* framework outside of the securities context.

In any event, assuming *Credit Suisse*'s potential applicability, the Court agrees with Plaintiffs that the third portion of the case's four-part analysis, the risk of conflict between the regulatory laws and the antitrust laws, is not present in this case. First, permitting the antitrust claims at issue does not "threaten[] serious . . . harm" to the relevant market as in *Credit Suisse*. *Id. at 2394*. The unique workings of the securities industry create an "unusually high risk" of "unusually serious mistakes" resulting in "unusually high" "costs," or harm, that is simply not present here. *Id. at 2395-96*.

HN7[] In the securities market, joint action is integral to the activity which the SEC both encourages and regulates. That joint action necessarily exposes the participants **[**24]** to antitrust complaints because they engage in sophisticated financial arrangements in concert. Here, the relationship between an interstate natural gas pipeline and shippers of natural gas on the pipeline conforms to a more traditional business model. Although the natural gas industry is undoubtedly complex, the roles of the pipeline and the shippers are fundamentally common -- the pipeline is the seller of transportation and storage services and the shippers are purchasers of those services. Shippers and the pipeline do not act "jointly" in the way described in *Credit Suisse. See id. at 2392* ("[T]he activities in question here -- the underwriters' efforts jointly to promote and to sell newly issued securities -- is central to the proper functioning of well-regulated capital markets.") Finding the joint activity central to the market and noting the SEC's "considerable power to forbid, permit, encourage, discourage, tolerate, limit, and otherwise regulate virtually every aspect of the practices in which underwriters engage," the Court observed the "unusually serious legal line-drawing problem" which antitrust claims would complicate. *See id. at 2394* ("[T]o permit antitrust actions **[**25]** such as the present one *still* threatens securities-related harm. . . . In the present context only a fine, complex, detailed line separates activity that the SEC permits or encourages . . . from activity that the SEC must (and inevitably will) forbid . . . .").

Second, and also contrary to *Credit Suisse,* there is a considerable "enforcement-related need for . . . antitrust lawsuit[s]" in the natural gas context. *Id. at 2396*. In its reply, TCO denies this fact, arguing that "Congress has given [FERC] broad authority to regulate fraudulent or anticompetitive conduct in the natural gas market," including "extensive authority to promulgate (and enforce) rules promoting transparency in natural gas markets, *15 U.S.C. § 717t-2*, which rules take into account 'fair competition.'" *TCO's Reply,* at p. 6. In TCO's view, "FERC has fashioned the relevant playing field precisely as it likes, and it can tinker and reform as it likes, when it likes." *Id.* at p. 5.

Undoubtedly, as this Court has previously found, ***HN8***[] "FERC regulates the rates for transporting and selling natural gas in interstate commerce." *June 14, 2005 Memorandum Opinion and Order,* 2:04-cv-867, doc. 371, at p. 16. It also "facilitate[s] price **[**26]** transparency for the sale or transportation of physical natural gas in interstate commerce," out of a "due regard for . . . fair competition." *15 U.S.C. § 717t-2(a)(1)*. Plaintiffs attempt to convince the Court that "FERC certainly does not actively enforce the rules and regulations forbidding the challenged conduct." *Plaintiffs' Response,* at p. 16. While the Court has considerable difficulty accepting Plaintiffs' assertions, the Court does believe that, unlike the securities industry, **[*652]** the natural gas industry does not have an "unusually small" "enforcement-related need for . . . antitrust lawsuit[s]." *Credit Suisse, 127 S. Ct. at 2396*.

Importantly, as the *Credit Suisse* Court observed, "***HN9***[] [p]rivate individuals who suffer harm as a result of a violation of pertinent statutes and regulations may also recover damages" under the Securities Exchange Act. *Id. at 2393* (citing *15 U.S.C. §§ 78bb*, *78u-4*, *77k*). These carefully crafted provisions seek to regulate the coexistence of

SEC enforcement and private litigation. *See* *15 U.S.C. §§ 78bb(a)*, *78u-4*, *77k(a)*. Traditional antitrust suits might conflict with this regulation. This fact contributes to the unusual lack of a need for antitrust suits in **[**27]** the securities context. No similar special private actions, which might be compromised by antitrust claims, accompany FERC's regulatory scheme.

Further, the Court also believes that the natural gas industry is distinguishable from the securities industry because FERC appears to wield somewhat less authority to remedy anticompetitive behavior than the SEC. As the Court has already stated, "FERC's [first] order provided relief limited to disgorging the Pipeline Defendants' [including TCO's] ill-gotten profits and a small rebate of SIT fees, neither of which purported to address any anticompetitive results of the scheme." *June 14, 2005 Memorandum Opinion and Order,* 2:04-cv-867, doc. 371, at p. 17. FERC's second order only required TCO to disgorge profits and agree not to provide park or loan services to any customer when that service is posted as "not available." *November 6, 2008 Order Approving Stipulation and Consent Agreement,* 2:04-cv-869, doc. 163-3, at p. 4-5. It therefore also did little "to address any anticompetitive results of the scheme." *June 14, 2005 Memorandum Opinion and Order,* 2:04-cv-867, doc. 371, at p. 17. Both of these disgorgements resulted from negotiations between **[**28]** FERC and TCO. In relation to both disgorgements, Plaintiffs claim damages in a far larger amount and of a different type than that which was disgorged. Prior to *Credit Suisse,* the Court found that "FERC's authority to remedy anti-competitive behavior is decidedly less than the regulatory authority in *Trinko,*" *535 U.S. 467, 122 S. Ct. 1646, 152 L. Ed. 2d 701*, and refused to find that case controlling. Now the Court makes a similar finding in regards to *Credit Suisse.* FERC lacks the authority to remedy anticompetitive behavior that the SEC wielded in *Credit Suisse.* ***HN10***[] In the natural gas context, there is an "enforcement-related need for . . . antitrust lawsuit[s]." *Credit Suisse, 127 S. Ct. at 2396*. Summary judgment as to Plaintiffs' antitrust claims would be improper.

B. Contract Claims

TCO contends that Plaintiffs' contract claims "are untenable for the same reasons that the antitrust claims are untenable, *i.e.* the rule of *Credit Suisse." TCO's Memorandum in Support,* at p. 14. According to TCO, "[t]his case is no commonplace contract enforcement action. The line-drawing that Plaintiffs here would ask a jury to perform in finding that TCO failed to comply with its tariff and General Terms obligations would . . . disrupt[] **[**29]** . . . the finely tuned FERC regulatory balance," by permitting the contract claims to "turn on vagaries in the laws of different states, and in the *ad hoc* decisions of judges and juries within a state." *Id.* at p. 15. Moreover, TCO argues that if *Credit Suisse* renders FERC's "finely tuned agency line drawing . . . off-limits for claims brought under *state* law," then FERC's "careful . . . scrutiny must then surely be off-limits for claims brought under *state* law." *Id.* at p. 16 (emphasis in original).

[*653] In response, Plaintiffs point to the West Virginia choice of law provision that appears in TCO's tariff and is incorporated by reference into the service agreements. They argue that "[t]he choice of law provision applies to disputes over service agreements between TCO customers and TCO, the only parties to the agreements." *Plaintiffs' Response,* at p. 22-23. They note that "[t]here would be no purpose for the choice of law provision in TCO's FERC approved Tariff if, as TCO contends, TCO's customers cannot invoke state remedies," and that "TCO's customers are entitled to rely on the choice of law provision in TCO's Tariff in deciding whether to transact business on the TCO pipeline system." **[**30]** *Id.* at p. 23. For these reasons, they believe that they may maintain their state contract claims against TCO.

The provision provides:

> Choice of Law. Unless otherwise specifically stated in the Service Agreement, interpretation of all Service Agreements or other agreements entered into between Shipper and Transporter, including any provisions of this Tariff related to such agreements, and any disputes arising from such agreements, shall be governed by the law of the State of West Virginia.

General Terms and Conditions, 2:04-cv-869, doc. 183-9, at p. 2. In its reply, TCO dismisses this provision as an "obscure piece of boilerplate" that fails to "create or promise any type of remedy." *TCO's Reply,* at p. 10. However, TCO's argument is unconvincing. Under its view, it is difficult to see what the purpose of the choice of law provision would be. Contrary to TCO's arguments regarding the inapplicability of state law, the choice of law provision demonstrates that the parties have contemplated a place for state law all along. Moreover, the provision should allay TCO's concerns about disputes "turn[ing] on vagaries in the laws of different states." *TCO's Memorandum in Support,* at p. 15. The Court **[**31]** agrees with Plaintiffs that the choice of law provision should be enforced:

> TCO customers are entitled to rely on the choice of law provision in TCO's Tariff in deciding whether to transact business on the TCO pipeline system. TCO cannot lull customers into transacting business on its system by assuring them that they have state law remedies . . . , only to claim that those state law remedies are unavailable when a customer invokes them.

Plaintiffs' Response, at p. 23.

Notwithstanding TCO's fears, this finding does not "overturn the *Supremacy Clause* [or] *Credit Suisse." TCO's Reply,* at p. 10. West Virginia contract law is not "clearly incompatible" with FERC's regulatory oversight. *Credit Suisse, 127 S. Ct. at 2392*. In fact, it appears to the Court that TCO's contention that Plaintiffs' contract claims are precluded by *Credit Suisse* is even weaker than its rejected argument that that case precludes Plaintiffs' antitrust claims. *Credit Suisse* at least dealt with antitrust claims; it did not involve a contract claim. Accordingly, to read into *Credit Suisse* the authority to preclude such a claim would be an expansive interpretation indeed.

C. State Antitrust Claims Only

TCO's only other unaddressed **[**32]** challenge to Plaintiffs' state antitrust claims, set forth in a footnote, is that the West Virginia Antitrust Act, *W. Va. Code §§ 47-18-1 et seq,* "cannot regulate competition in markets outside of West Virginia." *TCO's Memorandum in Support,* at p. 14 n.15. TCO maintains that its assertion is correct because "[a] basic principle of the federal union is that states may govern themselves, but not one another." *Id.* In support of this proposition, TCO selectively **[*654]** cites to a single sentence in *BMW of North America v. Gore,* without offering any explication of that case: "[N]o single state . . . [may] impose its own policy choice on neighboring States." *517 U.S. 559, 571, 116 S. Ct. 1589, 134 L. Ed. 2d 809 (1996)*. However, even a passing glance at *BMW of North America* reveals that this authority offers little guidance regarding whether Plaintiffs may maintain a claim under the West Virginia Antitrust Act. The truism cited by TCO references a hypothetical situation in which one state requires automobile manufacturers, distributors, and dealers in other states to disclose fully every presale repair performed on an automobile. *Id. at 570*. In the instant case, West Virginia is not attempting to regulate activities occurring wholly **[**33]** outside of its borders. *BMW of North America* simply has nothing to do with the antitrust matter at hand.

On the contrary, it is clear to the Court that Plaintiffs' claims should survive. As already discussed, Plaintiffs and TCO executed a choice of law provision settling upon West Virginia law, therefore West Virginia ***antitrust law***. TCO's pipeline network encompasses various states, including West Virginia. *Second Amended Complaint,* 2:04-cv-867, doc. 58, at p. 4. Accordingly, the illegal scheme, if it occurred, resulted "in restraint of trade or commerce in this State." *W. Va. Code § 47-18-13*. Moreover, the Court notes that TCO's operational headquarters are in West Virginia, and one of the two remaining select shipper Defendants, Defendant Base Petroleum, is incorporated under West Virginia law and has its principal place of business in West Virginia. *Second Amended Complaint,* 2:04-cv-867, doc. 58, at p. 4, 6. Contrary to TCO's implied assertions, there is no requirement that an antitrust violation occur entirely within the state of West Virginia before West Virginia ***antitrust law*** will apply. It is sufficient that a portion of the affected market is in West Virginia. *See, e.g., Precision Piping & Instruments, Inc. v. E. I. duPont de Nemours & Co., 707 F.Supp. 225, 226, 231 (W. Va. S.D. 1989)* **[**34]** (denying the defendants' motion for summary judgment on the plaintiff's *W. Va. Code § 47-18-13* antitrust claim, despite the fact that the market at issue encompassed portions of both West Virginia and Ohio). Therefore, the Court denies TCO's summary judgment motion as to Plaintiffs' state antitrust claims.

IV. CONCLUSION

Pending before the Court are the Renewed Motions for Summary Judgment (doc. 148, Ex. 2, in each of the above-captioned matters) of Defendant Columbia Gas Transmission Corporation (TCO). For the foregoing reasons, the Court **GRANTS in part** and **DENIES in part** these motions.

The Court **DIRECTS** the Clerk to send a copy of this written Order and Opinion to counsel of record and any unrepresented parties.

Modl, Axley Brynelson, LLP, Madison, WI

Judges: BARBARA B. CRABB, District Judge.

Opinion by: BARBARA B. CRABB

---

[1] The parties have declined the jurisdiction of the magistrate judge. Because no Article III judge has been assigned to this case, I have assumed jurisdiction over the case temporarily to resolve the parties' current disputes.

Opinion

OPINION and ORDER

Plaintiffs D&G Inc. and Robert Warren Wentworth Jr., Inc. have filed this proposed antitrust class action, alleging that defendants SuperValu, Inc. and C&S Wholesale Grocers, Inc. entered into an unlawful agreement to allocate the Midwest and New England markets for the supply of wholesale groceries. Now before the court is defendants' joint motion to transfer venue to the District of Minnesota pursuant to *28 U.S.C. § 1404(a)*.

I will grant defendants' motion because I am persuaded that the transferee district is "clearly more convenient" to the parties. One of the two defendants has its principal place of business in the transferee district, no party has any ties to this district and **[*3]** the only connection plaintiffs can identify between this case and this district is the fact that the alleged antitrust violations resulted in the closure of a distribution center in La Crosse, Wisconsin, a fact that does not appear to be relevant or disputed. As for plaintiffs' contention that the motion should be denied because transfer is likely to cause delay, I am not persuaded that this concern is realistic or that plaintiffs have a special need to achieve speedy resolution of their case.

From the complaint and the parties' submissions related to defendants' motion to transfer, I draw the following facts for the purpose of addressing defendants' motion.

FACTS

A. Parties

Plaintiff D&G is an Iowa corporation with its principal place of business in Mount Vernon, Iowa. Plaintiff Robert Warren Wentworth Jr., Inc. is a Maine corporation with its principal place of business in Rangeley, Maine. Defendant SuperValu is a Delaware corporation with its principal place of business in Eden Prairie, Minnesota. Defendant C&S is a Vermont corporation with its principal place of business in Keene, New Hampshire. Defendants are wholesale grocery providers that supply products and services to retail **[*4]** grocery stores. Plaintiffs own and operate retail grocery stores.

B. The Lawsuit

In 2003, defendant C&S entered the Midwest wholesale grocery distribution market by acquiring three large distribution facilities from a distressed wholesaler named Fleming. The facilities were located in Waukesha, Wisconsin; La Crosse, Wisconsin; and Massillon, Ohio. In September 2003, defendants entered into an "Asset Exchange Agreement" in which defendant C&S agreed to assign to defendant SuperValu its right to acquire the three distribution centers and other Fleming assets and defendant SuperValu agreed to sell C&S its New England distribution centers and other operations. Defendants' representatives negotiated the terms of this agreement at defendant SuperValu's headquarters in Minnesota and at defendant C&S's former headquarters in Vermont. Defendant C&S met with individuals in and around La Crosse to discuss competing against SuperValu. Shortly after the parties entered into the asset exchange agreement in September 2003, both C&S and SuperValu closed the distribution centers that each received as part of the agreement.

On December 31, 2008, plaintiffs filed this lawsuit, alleging that the parties **[*5]** agreed to exchange the distribution centers to allocate the market and that this agreement caused them to pay "charges for grocery wholesale goods and services to Defendants that were higher than they would have been but for Defendants' unlawful agreements." In addition, plaintiffs allege that "through various devices and techniques of secrecy," defendants "fraudulently concealed the existence of the unlawful contracts, combinations and conspiracies alleged herein," concealed the "anticompetitive terms" of the asset exchange agreement and "misled Plaintiffs and [potential class] members . . . as to the true, collusive and coordinated nature of their market and customer allocation and other illegal anticompetitive activities. " Cpt., dkt. # 17, at 13-14.

Plaintiffs ask for both monetary and injunctive relief. Their request for injunctive relief is simply that they receive "such injunctive relief as they may be entitled to by law." Id. at 24. Plaintiff D&G has not bought wholesale goods or services from either defendant since 2005 and plaintiff Robert Warren Wentworth has not bought wholesale goods or services from either defendant since 2004.

C. Local Effect of Alleged Antitrust Violations

According **[*6]** to plaintiffs, as a result of the parties' agreement, grocery wholesale prices increased for retailers that could have obtained products from the La Crosse distribution centers, which would include retailers located in this district and retailers located in Iowa, such as plaintiff D&G. At the time of the asset exchange and subsequent closure of the facilities, plaintiff D&G obtained products from two SuperValu distribution facilities located more than 250 miles away. If SuperValu had decided not to close the just-purchased La Crosse facilities, plaintiff D&G may have obtained products from this closer facility. Or, if C&S had not assigned the facilities in the first place, plaintiff D&G may have had a viable competitive alternative to obtaining products from SuperValu. Aside from its impact on retailers, closure of the La Crosse facility caused employees at the facility to lose their jobs, which plaintiffs allege caused a notable economic impact throughout this district.

D. Witnesses

Nearly all the SuperValu personnel involved with the asset exhange with C&S are located in Minnesota and work out of its headquarters. The "vast majority" of other personnel that SuperValu has identified **[*7]** to date as having personal knowledge regarding the parties' dispute are located in Minnesota. Approximately three dozen Minnesota-based employees were involved in the due diligence, negotiation and execution of the asset exchange agreement.

At least seven of those three dozen are no longer employees of SuperValu. Of those seven, former senior corporate counsel Sheila Hagen and former Vice President of Financial Planning James Stoffel were "central" to the negotiations and the decision to enter into the agreement, although all seven are believed to have knowledge related to the due diligence, negotiation or execution of the asset exchange agreement. Hagen was SuperValu's "lead negotiator" and Stoffel was responsible for financial investigation of the asset exchange. Both Hagen and Stoffel reside in Minnesota.

Defendant C&S **[*8]** has identified Mark Gross, its former Chief Financial Officer, as the key employee involved in the asset exchange agreement that plaintiffs allege violated antitrust laws. He resides in New Hampshire. Most of the paper and electronic documents pertaining to the asset exchange transaction are stored at defendants' respective headquarters in Minnesota and New Hampshire.

E. Expected Time to Trial

In the present case, trial is set for August 23, 2010. However, this trial date is tentative because no Article III judge has been assigned to this case. Currently, one of the two district judges in this district is on medical leave and has taken senior status. To insure that cases are addressed as efficiently as possible, half of the incoming cases are assigned randomly to Magistrate Judge Stephen Crocker. In the event that the parties in those cases decline his jurisdiction (such as in this case), the court assumes that a new district judge will be appointed in time to try the cases. As of 2007, the median time from filing to trial in this district was 10.4 months and the median time from filing to trial in the District of Minnesota was 29 months.

OPINION

Defendants have moved to transfer this **[*9]** case to the District of Minnesota pursuant to *28 U.S.C. § 1404(a)*. (Although defendants have moved in the alternative for transfer to the District of New Hampshire, I need not consider their arguments in favor of transfer to that venue because I conclude that transfer to the District of Minnesota is proper.) Transfer under *§ 1404(a)* is proper when (1) venue is proper in the transferor district; (2) the transferee district is one in which the action could have been brought; and (3) the transferee court is "clearly more convenient." *Coffey v. Van Dorn Iron Works, 796 F.2d 217, 219 (7th Cir. 1986)*. The parties do not dispute that venue is proper here and that the action could have been brought in the District of Minnesota; the only issue is whether that district is "clearly more convenient" for the parties than this one.

In deciding whether a transferee district is "clearly more convenient" than the transferor district, a court considers the relative convenience of the districts for the parties and witnesses and whether transfer will promote the interest of justice. Issues such as the situs of material events, ease of access to sources of proof, plaintiffs' choice of forum and relative **[*10]** docket speed are all relevant to this decision. *Id. at 219 n.3, 221*; *Harley-Davidson, Inc. v. Columbia Tristar Home Video, Inc., 851 F. Supp. 1265, 1269 (E.D. Wis. 1994)*; *Kinney v. Anchorlock Corp., 736 F. Supp. 818, 829 (N.D. Ill. 1990)*.

A. Choice of Forum

Plaintiffs contend that their choice of forum should be afforded deference. Generally, a plaintiff's choice of forum deserves less deference when a plaintiff chooses to litigate outside his home forum because it is less reasonable to assume that a plaintiff is choosing such a forum for convenience. *Piper Aircraft Co. v. Reyno, 454 U.S. 235, 255-56, 102 S. Ct. 252, 70 L. Ed. 2d 419 (1981)*.

Plaintiffs do not deny that this district is not their home forum. Nonetheless, they contend that their choice of forum should be given deference because this district is the "situs of material events." It may be reasonable to assume that a plaintiff would choose a forum that is the situs of material events for its convenience, in which case deference would be proper. Cf. *Chicago, Rock Island & Pacific Railroad Co. v. Igoe, 220 F.2d 299, 304 (7th Cir. 1955)* (suggesting choice of forum may be given deference if material events occur in district). However, plaintiffs fail to make a **[*11]** persuasive showing of the materiality of events that occurred in this district. The only event that occurred in this district is the closing of the La Crosse distribution center. Defendants' alleged market allocation agreement happened elsewhere, as did the impact on plaintiffs, whose retail stores are all located outside this district.

Plaintiffs point out that retailers in Wisconsin were likely affected by the closure as well and that the closure had a general economic impact in the district, causing a mass layoff of workers. Unfortunately for plaintiffs, neither of those points is relevant. The general economic impact of the distribution centers' closure is not at issue; this antitrust lawsuit involves the specific economic impact on grocery retailers. As for the effect of the closure on retailers in Wisconsin, none of them have joined the case as parties. In other words, at this stage, the case involves only the economic impact on *plaintiffs,* which occurred outside this district. If the case is certified as a class action, it may include Wisconsin retailers, but such a possibility is too speculative to warrant special deference to plaintiffs' choice of forum.

At any rate, even if **[*12]** the closing of the La Crosse distribution center could be said to be "material," this would not help plaintiffs because nothing about the closure appears to be in dispute. Plaintiffs' choice to litigate in a forum in which certain events occurred deserves no special deference when it is undisputed that these events took place, regardless whether the events are "material" to the lawsuit. *Chicago, Rock Island, 220 F.2d at 304* (no deference for choice of forum when "no controverted question depends on any event occurring" in district).

B. Convenience of Parties

The District of Minnesota is clearly more convenient for defendant SuperValu. Its headquarters and principal place of business are located in that district, as are dozens of employees who worked on the allegedly illegal asset exchange agreement. (It is irrelevant that electronic and paper documents are located in Minnesota , given the portability of such documents.) As for the other parties, there appears to be no identifiable difference in convenience between districts. Plaintiffs and defendant C&S are located elsewhere and do not say they have documents or employees located in this district or in the District of Minnesota.

Plaintiffs **[*13]** contend that the employee witnesses located in the District of Minnesota would be testifying to establish a "business excuse," a point they argue is irrelevant in this case because plaintiffs contend that defendants' agreement amounts to a "naked restraint of trade," for which business excuses are no defense. *United States v. Topco Associates, Inc., 405 U.S. 596, 610, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*. However, plaintiffs do not argue that this is their *only* theory; they assert a rule-of-reason theory for their Sherman Act § 1 claims, cf. *Polk Bros., Inc. v. Forest City Enterprises, Inc., 776 F.2d 185, 189 (7th Cir. 1985)* (explaining difference between "naked restraints" and restraints analyzed under rule of reason) and they allege that there are no legitimate business justifications for defendants' actions in alleged violation *§ 2* of the Sherman Act. Defendants' evidence of a "business excuse" is relevant to either of these theories and therefore cannot be disregarded.

C. Convenience of Witnesses

The District of Minnesota would be more convenient for some witnesses. In particular, dozens of defendant SuperValu's employees have information about the asset exchange agreement and at least two non-party witnesses **[*14]** located in Minnesota were key in negotiating and executing the agreement. Against this, plaintiffs state vaguely that there are "likely numerous non-party witnesses" in this district because defendants met with individuals in La Crosse to discuss competing against SuperValu. However, plaintiffs do not explain who these individuals might be or where they are located.

As plaintiffs point out, the number of non-party witnesses specified by name (two) is almost insubstantial. However, this evidence is but one piece of the larger analysis; it must be considered in light of the evidence that dozens of employee witnesses located in Minnesota are expected to have information relevant to the asset exchange and that one of the two defendants has its principal place of business and headquarters there. Together, these things establish that the District of Minnesota is "clearly more convenient" for defendant SuperValu and for the witnesses.

I **[*15]** agree with plaintiffs that the relative convenience of litigating in the District of Minnesota is lessened in light of technological advances, but I am still persuaded that the convenience of the parties and witnesses weighs in favor of the District of Minnesota.

D. Interest of Justice

Plaintiffs have one more string to their bow. They contend that the case should not be transferred for the reason that many advance when facing a motion to transfer venue in this district: speed. Speed is a valid concern, *Coffey, 796 F.2d at 221* ("Factors traditionally considered in an 'interest of justice' analysis relate to the efficient administration of the court system."); *In re National Presto Industries, Inc., 347 F.3d 662, 664 (7th Cir. 2003)* (lighter docket speed of proposed transferee district relevant to interest of justice analysis), one that may even be dispositive, *Coffey, 796 F.2d at 219-20* (interest of justice may be determinative factor); *Roberts & Schaefer Co. v. Merit Contracting, Inc., 99 F.3d 248, 254 (7th Cir. 1996)*.

Plaintiffs contends that transfer would not further the interest of justice because plaintiffs could expect substantial delay in the District of Minnesota, pointing out **[*16]** that the median time to trial in that district is 29 months, substantially longer than the median time to trial in this district. However, the unusual circumstances of this case make those 2007 statistical estimates of median time to trial as uncertain as the actual trial date set in this case. Because this case has not yet been assigned to an Article III judge and is not likely to be so assigned until a new judge has been appointed, it is difficult to say how quickly the parties may expect a trial. Although plaintiffs are correct that some delay is likely to occur if this case is transferred, I am less certain that the delay is substantial given the current circumstances of this district.

This is not plaintiffs' only problem. As defendants point out, it is not clear how plaintiffs expect to obtain injunctive relief. If, as defendants contend, plaintiffs may be compensated with money damages, there is less need for speedy resolution. Although plaintiffs seek injunctive relief in their complaint, they do not explain how they might be entitled to such relief. The alleged antitrust violations arise from an agreement defendants entered into in 2003.

Plaintiffs assert that defendants' unlawful **[*17]** agreement is ongoing, that plaintiffs and potential class members continue to suffer substantial harm and that defendant SuperValu has stated that it "is hoping to enter similar agreements." Plts.' Br., dkt. # 29, at 9. However, plaintiffs' only alleged injury is that of having paid more for goods purchased from defendants, and neither plaintiff has purchased any goods from defendants since 2005 at the latest. The allegations provide little basis to draw an inference that injunctive relief might be available to plaintiffs. *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1974, 167 L. Ed. 2d 929 (2007)* (*Rule 8* requires request for relief to be "plausible on its face"); see also *Limestone Development Corp. v. Village of Lemont, 520 F.3d 797, 803 (7th Cir. 2008)* (under Twombly, plaintiff must plead a "a fuller set of factual allegations" to show his claim is not "largely groundless" in complex cases such as those arising under ***antitrust law***).

As for the possibility that potential class members may have better grounds for injunctive relief than plaintiffs, it is too speculative. No potential class member is identified. Moreover, to the extent plaintiffs have no viable basis for injunctive relief, it may be **[*18]** difficult to certify a class including those seeking injunctive relief, in light of class certification requirements such as typicality and adequate representation. *Fed. R. Civ. P. 23(a)(3)-(4)*).

Finally, defendants raise the possibility that plaintiffs delayed filing suit, another reason to afford less weight to their request for speed. Plaintiffs contend that they did not delay filing suit, pointing out that they have alleged that defendants concealed their antitrust violations. If that is the case, plaintiffs' delay could not be held against them. However, it is curious that plaintiffs decided to say so little about how or when they discovered the antitrust violation or why they did not discover it until more than five years had passed. After all, defendants argued in their initial brief that the original exchange agreement was widely publicized. Dfts.' Br., dkt. # 22, at 14. If plaintiffs hoped to rely on their need for speed, they should have explained why the public nature of the exchange agreement did not give them notice of their current cause of action. They did not.

I am not persuaded that the interest of justice weighs against transfer. Because plaintiffs have failed to set **[*19]** out plausible grounds for the injunctive relief they seek or explain their five-year delay in bringing this suit, I am not persuaded that speed is crucial in this case or that plaintiffs have an interest in speedy resolution of the case. Moreover, because there is no Article III judge assigned to this case, it is unlikely that the case could be resolved more quickly here than in Minnesota.

In sum, the factors weigh in favor of transfer. The District of Minnesota is "clearly more convenient" for the parties and witnesses. It would not further the interest of justice to stand in the way of such transfer. I will grant defendants' motion to transfer to the District of Minnesota under *28 U.S.C. § 1404(a)* .

One final matter requires attention. After defendant filed their motion to dismiss, several other motions are ready to be decided. In particular, defendants have moved to dismiss the case as time-barred and pursuant to *Fed. R. Civ. P. 8*. Dkt. # 33. In connection with that motion, they have moved for leave to submit materials outside the pleadings, dkt. # 37, and for leave to stay discovery until the motion to dismiss is resolved, dkt. # 35. In addition, because Magistrate Judge Crocker **[*20]** granted a limited stay of discovery on March 4, 2009, plaintiffs have filed a motion for early, limited discovery. Dkt. # 51. Because I have decided that the case should be transferred pursuant to *28 U.S.C. § 1404(a)*, it would not be proper to consider the merits of the motion to dismiss or make decisions about the scope of allowable discovery while the motion to dismiss remains pending or about what materials may be considered in the context of the motion to dismiss. Therefore, I will decline to rule on these issues.

ORDER

IT IS ORDERED that the motion to transfer venue filed by defendants SuperValu, Inc. and C&S Wholesale Grocers, Inc. pursuant to *28 U.S.C. § 1404(a)*, dkt. # 21, is GRANTED. The clerk of court is directed to transmit the case file to the United States District Court for the District of Minnesota.

Entered this 23rd day of April, 2009.

Opinion by: Barbara S. Jones

Opinion

Opinion & Order

BARBARA S. JONES

UNITED STATES DISTRICT JUDGE

Plaintiff Amy Gurvey brings claims of misappropriation (trade secrets; ideas, labor or skill), Sherman Act and state antitrust violations, Lanham Act violations, interference with prospective economic relations, tortious interference with contract, legal malpractice, breach of fiduciary duty, and unjust enrichment against her former employer, Cowan, Liebowitz & Latman, P.C. ("CLL"), named CLL partners ("CLL Partners"), and various entities affiliated with Clear **[*2]** Channel Communications ("CCC Defendants") [1].

BACKGROUND [2]

Plaintiff was employed as Of Counsel to CLL pursuant to an employment agreement dated January 15, 2002. (Third Amended Complaint ("TAC") P19). At that time, CLL agreed to represent the Plaintiff before the US Patent and Trademark office ("USPTO") to file Provisional Patent Applications ("PPA"s) for inventions developed by Plaintiff prior to joining CLL. (TAC PP28, 33).

Plaintiff's inventions included business plans to edit, package and distribute live recordings of live music events, as well as electronic ticketing methods related to these recordings. (TAC PP 28, 33.)

Shortly after beginning at CLL, Plaintiff presented her projects, business plans, and inventions at the firm's monthly partners' conference. (TAC P34).

After the meeting a CLL **[*3]** Partner told Plaintiff that the her business plans would be of significant interest to the firm's client CCC. (TAC P36). This same CLL Partner also told Plaintiff that he preferred to have her as a client of CLL rather than as Of Counsel. (TAC P37.)

In early May 2002, Plaintiff was notified that she would no longer be employed Of Counsel, but that CLL continued to have interest in the subject matter of her patents and would file the Plaintiff's PPA's before the USPTO. (TAC P43). On May 22, 2002 and May 24, 2002, CLL filed two patents with the USPTO naming the plaintiff as sole inventor and CLL as attorneys of record. (TAC P44).

In August 2002, Plaintiff returned from a business trip to find that she had been locked out of her office. (TAC P47)

On or about February 16, 2003, the Plaintiff received notification from the USPTO that CLL had withdrawn as the attorney on one of her patents because of a conflict of interest. (TAC P50).

In March 2003, the CCC affiliated entity InstantLive posted ads/statements on their website announcing a new program that would allow concert-goers to purchase its recordings. (TAC P55). On May 5, 2003, *The New York Times* published an article describing InstantLive. **[*4]** Plaintiff alleges that this description mirrored her business models for the onsite distribution of live recordings at concerts. (Band members of Phish were also interviewed for the article and identified their interest in this new product. (TAC P52). A member of Phish is married to a CLL attorney.)

In Fall 2005, CCC formed defendant LiveNation, which acquired defendant InstantLive. (TAC P57).

On June 5, 2006, Plaintiff filed an Amended Complaint, which was served on the CLL law firm and the CCC Defendants on June 16, 2006. [3] The named CLL partners were added as parties to the TAC, filed on March 4, 2008. [4]

---

[1] Although two entities affiliated with the Clear Channel family have been released from this case after personal jurisdiction was found lacking, two other affiliated entities, InstantLive and NextTicketing, remain. They will continue to be referred to as the CCD Defendants.

[2] The facts described are taken from Plaintiffs' Complaint and are assumed to be true for the purposes of this motion only.

[3] An earlier Complaint was filed on February 15, 2006, but was never served.

STANDARD OF REVIEW

Rule 12(b)(6) of the Federal Rules of Civil Procedure provides for dismissal **[*5]** of a complaint that fails to state a claim upon which relief may be granted. "In ruling on a motion to dismiss for failure to state a claim upon which relief may be granted, the court is required to accept the material facts alleged in the complaint as true." *Frasier v. General Elec. Co., 930 F.2d 1004, 1007 (2d Cir. 1991)*. The court is also required to read a complaint generously, drawing all reasonable inferences from its allegations in favor of the plaintiff. *California Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 515, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*.

"While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 1964, 167 L. Ed. 2d 929 (2007)* (internal quotation marks, citations, and alterations omitted). A plaintiff must assert "enough facts to state a claim to relief that is plausible on its face." *Id. at 1974*. This "plausibility standard" is a flexible one, "oblig[ing] a pleader to amplify a claim with some **[*6]** factual allegations in those contexts where such amplification is needed to render the claim plausible." *Iqbal v. Hasty, 490 F.3d 143, 157-58 (2d Cir. 2007)*, *cert. granted*, *128 S. Ct. 2931, 171 L. Ed. 2d 863 (2008)*.

DISCUSSION

A. Misappropriation Claims

i. Misappropriation of Trade Secrets

The date upon which a cause of action for misappropriation of trade secrets begins to accrue depends on the nature of the misappropriation alleged: "If a defendant misappropriates and discloses a trade secret, he becomes liable to plaintiff upon disclosure. On the other hand, if the defendant keeps the secret confidential, yet makes use of it to his own commercial advantage, each successive use constitutes a new, actionable tort for the purpose of the running of the Statute of Limitations." *Architectronics, Inc. v. Control Systems, Inc., 935 F.Supp. 425, 433 (S.D.N.Y. 1996)* (citing *Lemelson v. Carolina Enterprises, Inc., 541 F.Supp. 645, 659 (D.C.N.Y. 1982)*. Plaintiff here has alleged the former. The TAC describes a misappropriation that occurred and was disclosed some time between Plaintiff's CLL presentation in early 2002 and the May 5, 2003 *New York Times* article that allegedly revealed (in the guise of CCC's own venture) **[*7]** Plaintiff's "entire confidential business models for the onsite distribution of live music at concerts" (TAC PP34, 52). [5] The statute of limitations for this cause of action is three years. Plaintiff's Amended Complaint (the first to be served on Defendants) was not filed until June 5, 2006. [6] The claim was therefore brought more than three years subsequent to the disclosure of the allegedly misappropriated trade secret. Plaintiff's claim is time-barred and is DISMISSED as against all Defendants.

ii. Unfair Competition/Misappropriation of Ideas, Labor, or Skill

---

[4] It is unclear whether the individual partners were ever served with the Third Amended Complaint. Plaintiff appears to argue that constructive notice was sufficient, since the CLL firm was itself served with the Amended Complaint on June 5, 2006. The Court need not, however, reach the constructive notice argument, since the relevant claims are time-barred whether they are measured from the Amended Complaint or the TAC.

[5] Plaintiff argues that the May 5 article did not "disclose" the misappropriated trade secret, but only "addressed its practical application." (Opp'n at 11.) However, the TAC itself is clear in stating that disclosure of Plaintiff's "entire confidential business models" occurred on in that article, on that date.

[6] Plaintiff has failed to establish that the earlier Complaint should operate to bring these claims against these Defendants within the applicable period.

Under New York law, a claim for unfair competition claim premised on misappropriation and unauthorized use is subject to a three-year statute of limitations under *N.Y. C.P.L.R. § 214*. **[*8]** *Sporn v. MCA Records, Inc., 58 N.Y.2d 482, 488, 448 N.E.2d 1324, 462 N.Y.S.2d 413 (1983)*. In a case such as this, where the unfair competition claim is identical to a misappropriation claim and where the extent of the misappropriation alleged is more akin to a wholesale conversion rather than a mere interference with Plaintiff's alleged property interest, the statute of limitations period is identical to that of a claim for misappropriation of trade secrets. See *Greenlight Capital, Inc. v. GreenLight (Switzerland) S.A., No. 04-cv-3136, 2005 U.S. Dist. LEXIS 2, 2005 WL 13682, at*7 (S.D.N.Y. 2005)*; *Opals on Ice Lingerie v. BodyLines, Inc., 425 F.Supp.2d 286, 296-297 (E.D.N.Y. 2004)* ("Defendant's unlawful actions culminated in numerous products it designed, sold and manufactured that are 'substantially similar' to those of [Plaintiff],… which were 'generally unavailable in the marketplace' during the time period in which [Plaintiff] shared samples with [Defendant]…As in Sporn, these allegations of misappropriation amount to more than mere interference with [Plaintiff's] designs and, as such, constitute a "taking" or conversion of plaintiff's property."); *LinkCo, Inc. v. Fujitsu Ltd., 230 F.Supp.2d 492, 501 (S.D.N.Y. 2002)*.

Therefore, Plaintiff's **[*9]** claim began to run on than May 5, 2003. Defendants were not notified of her claims until the filing of the Amended Complaint on June 5, 2006, and its service on June 16, 2006. This claim is therefore time-barred and DISMISSED as against all Defendants.

B. Sherman Act and State Antitrust

Plaintiff claims that the CCC Defendants violated federal and state antitrust laws, and that CLL and its partners aided and abetted those antitrust violations. Plaintiff has failed to adequately plead these causes of action.

In order to state a claim under *Section Two of the Sherman Act*, [7] Plaintiff must allege: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (internal quotation marks and citation omitted).

The TAC describes various business practices implemented by the CCC Defendants, speculating as to various concert recording arrangements, describing corporate structures, and referring vaguely to supposed admissions of "monopoly" control. (TAC PP128-130.) These practices, as alleged, do not describe the holding or wielding of monopoly power--"the power to control prices in the relevant market or to exclude competitors," *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 596, n. 20, 105 S.Ct. 2847, 86 L.Ed.2d 467 (1985)*--and so do not provide a basis for Plaintiff's conclusory pleadings of antitrust violations. .

Similarly, Plaintiff has made little attempt to define the market within which CCC's monopoly supposedly exists, alleging only that Defendants have made certain efforts to operate within "the relevant live concert venue market in the United States" (TAC para. 128) or the "US pop concert venues and radio markets." (TAC P129.). The relevant market on **[*11]** claims of antitrust violation involves the specification of its dimensions, its product, geographic and time dimensions. *Yankees Entertainment and Sports Network, LLC v. Cablevision Systems Corp., 224 F.Supp.2d 657, 666 (S.D.N.Y. 2002)* (citing 2 Earl W. Kintner, *Federal* ***Antitrust Law*** § 12.2 (1980), and must provide a factual basis for the Court's evaluation of the marketplace in light of "the realities of competition" *Balaklaw v. Lovell, 14 F.3d 793, 797 n. 9 (2d Cir. 1994)* (quotation omitted); see *United States v. E.I, du Pont de Nemours & Co., 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*; *Yellow Page Solutions, Inc. v. Bell Atlantic Yellow Pages Co., No. 00-cv-5563, 2001 U.S. Dist. LEXIS 18831, 2001 WL 1468168, at *12 (S.D.N.Y. Nov. 19, 2001)*.

---

[7] The TAC attempts to state claims under both *section 2* of the Sherman Act and "the antitrust laws of the states of New York, Texas, and California." (TAC para. 140.) It is unclear from the TAC precisely which state antitrust statutes and **[*10]** provisions Plaintiff refers to. Based on the TAC and the parties' papers pursuant to this motion, however, there do not appear to be any substantive differences amongst the various antitrust claims brought by Plaintiff.

Plaintiff has failed to adequately plead these elements and her claims of antitrust violations, federal and state, are hereby DISMISSED as against all Defendants.

C. Lanham Act

Section 43(a) of the Lanham Act provides two grounds upon which a plaintiff may assert a claim: false designation and false advertising. *15 U.S.C. § 1125(a)(1)*. Plaintiff alleges that Defendant misrepresented various products or services as their own and argues that such misrepresentations constitute false advertising.

Plaintiff's **[*12]** claim, however, is more accurately described as one for "passing off," as her allegations make clear. The TAC identifies the May 3, 2003 *New York Times* article (TAC P52), as well as various website advertisements and press releases (TAC PP55-59) that describe technology and a business plan allegedly similar to those developed by Plaintiff. While Plaintiff attempts to label this as "false and misleading statements of fact in advertising" (TAC P83.), the pleadings make clear that Plaintiff's claim is aimed at Defendants' holding out as their own that which is allegedly Plaintiff's. [8]

Plaintiff's claim of "passing off" is not properly brought under the Lanham Act, as it disputes the "origin" of an idea. "[A]s used in the Lanham Act, the phrase 'origin of goods' is…incapable of connoting the person or entity that originated the ideas or communications that 'goods' embody or contain. Such an extension would not only stretch the text, but it would be out of accord with the history and purpose of the **[*13]** Lanham Act and inconsistent with precedent." *Dastar Corp. v. Twentieth Century Fox Film Corp., 539 U.S. 23, 32, 123 S.Ct. 2041, 2047, 156 L. Ed. 2d 18 (U.S. 2003)*.

A failure to attribute the authorship of an idea simply does not amount to the misrepresentation of the "nature characteristics, qualities, or geographic origin of…goods, services, or commercial activities" as required under section 43(a) of the Lanham Act. See *Antidote International Films, Inc. v. Bloomsbury Publishing, PLC, 467 F.Supp.2d 394 (S.D.N.Y. 2006)* (dismissing false advertising claim alleging misrepresentations relating to authorship of a novel); see also *Thomas Publishing Co., LLC v. Technology Evaluation Centers, Inc., No. 06 Cv 14212(RMB), 2007 U.S. Dist. LEXIS 55086, 2007 WL 2193964 (S.D.N.Y. July 27, 2007)* (dismissing false advertising claim "premised upon the assertion that Defendant passed off Plaintiff's work as its own," where defendant misrepresented itself as the developer, creator or owner of materials comprising a software directory, because "a failure to attribute authorship to Plaintiff does not amount to misrepresentation of 'the nature, characteristics, qualities or geographic origin' of … [Defendant's] goods.").

Plaintiff's allegations do not **[*14]** describe a violation of the Lanham Act and this claim is therefore DISMISSED as against all Defendants.

D. Tortious Interference with Prospective Economic Relations

In order to state a claim for tortious interference with prospective economic relations under New York law, a plaintiff must allege: "(1) that [she] had a business relationship with a third party; (2) the defendant knew of that relationship and intentionally interfered with it; (3) the defendant acted solely out of malice, or used dishonest, unfair, or improper means; and (4) the defendant's interference caused injury to the relationship." *Friedman v. Coldwater Creek, Inc., No. 08-cv-979, 321 Fed. Appx. 58, 2009 U.S. App. LEXIS 7514, 2009 WL 932546, at * 1 (2d Cir. April 8, 2009)*; *Kirch v. Liberty Media Corp., 449 F.3d 388, 400 (2d Cir. 2006)*. The New York Court of Appeals has explained that, "as a general rule, a defendant's conduct must amount to a crime or an independent tort" in order to amount to tortious interference with a prospective economic advantage. *Carvel Corp. v. Noonan, 3 N.Y.3d 182, 190, 818 N.E.2d 1100, 785 N.Y.S.2d 359 (2004)*. A defendant who has not committed a crime or independent tort

---

[8] One particularly relevant section of the TAC is in fact entitled "Defendants Live Nation and Clear Channel Pass Off as Their Own The Trade Secrets Misappropriated from Plaintiff." (TAC s.H.)

or acted solely out of malice may nevertheless be liable if he has employed "wrongful means." "'Wrongful **[*15]** means' include physical violence, fraud or misrepresentation, civil suits and criminal prosecutions," *Guard-Life Corp. v. S. Parker Hardware Mfg. Corp., 50 N.Y.2d 183, 406 N.E.2d 445, 428 N.Y.S.2d 628 (1980)* (quotation and citation omitted) and "'extreme and unfair' economic pressure." *Carvel, 3 N.Y.3d at 190*.

Here, Plaintiff has alleged that she "lost the opportunity to complete a private placement offering of securities to be issued by her own company which was to have served as seed money for the development of technologies utilizing her trade secrets and inventions." (Compl. para. 146.) In addition to the evident vagueness of this pleading, Plaintiff neglects to allege that Defendants knew of this private placement opportunity and wrongfully interfered with it. [9] The allegations therefore do not state a claim for tortious interference with prospective economic relations and must be DISMISSED as against all Defendants.

E. Tortious Interference with Contract (against the CLL Defendants)

In New York, the statute of limitations for a tortious interference with contract claim is three years. See *N.Y. C.P.L.R. § 214(4)*; *Norris v. Grosvenor Marketing Ltd., 803 F.2d 1281, 1287 (2d Cir. 1986)*. The TAC describes a series of events occurring in early 2002, culminating in the alleged usurpation of Plaintiff as counsel to Legend Films. (TAC P29(f).) Defendants were made aware of this claim for the first time in the Amended Complaint filed on June 5, 2006 and served on June 16, 2006. The three year statute of limitations on this claim has therefore lapsed, and the claim is hereby DISMISSED.

Moreover, even if the claim were not time-barred, it would be subject to dismissal pursuant to *Rule 12(b)(6)*, for failure to state a claim.

To state a claim for tortious interference with contract under New York law, a plaintiff must allege: (1) "the existence of a valid contract between the plaintiff and a third party"; (2) the "defendant's knowledge of the contract"; (3) the "defendant's intentional procurement of the **[*17]** third-party's breach of the contract without justification"; (4) "actual breach of the contract"; and (5) damages. *Kirch v. Liberty Media Corp., 449 F.3d 388, 401-02 (2d Cir. 2006)* (quoting *Lama Holding Co. v. Smith Barney Inc., 88 N.Y.2d 413, 646 N.Y.S.2d 76, 668 N.E.2d 1370, 1375 (N.Y. 1996))*. FN21 In addition, a plaintiff must assert, with respect to each defendant, that the defendant's actions were the "but for" cause of the alleged breach-in other words, that there would not have been a breach but for the activities of the defendant. *Sharma v. Skaarup Ship Mgmt. Corp., 916 F.2d 820, 828 (2d Cir. 1990)* (citing *Special Event Entm't v. Rockefeller Ctr., Inc., 458 F.Supp. 72, 78 (S.D.N.Y. 1978))*.

Plaintiff has alleged that "shortly after [she] became 'of counsel' to CLL, CLL attorney Mark Montague was introduced to plaintiff's client, Legend Films, whom plaintiff had also served as General Counsel up to 2002. CLL orchestrated plaintiff's ouster from Legend and induced Legend to renege on its obligation to pay plaintiff for her services." (TAC para. 29(f).) It is insufficient to merely state, without more, that Defendants "orchestrated" Plaintiff's ouster. "[T]he law requires some factual **[*18]** specificity in pleading tortious interference." *World Wide Commc'ns, Inc. v. Rozar, No. 96 Civ. 1056, 1997 U.S. Dist. LEXIS 20596, at *7, 1997 WL 795750, (S.D.N.Y. December 30, 1997)* (citation omitted). As such, Plaintiff has failed to adequately plead that the Defendants intentionally procured, without justification, the breach in question, and Plaintiff's claim on this issue is DISMISSED.

F. Legal Malpractice (against the CLL Defendants)

---

[9] Although the parties further submit arguments concerning the statute of limitations applicable to this cause of action, the TAC's allegations on this cause are too vague to determine when, precisely, Plaintiff alleges that the tortious interference occurred. Because this same vagueness disposes of Plaintiff's **[*16]** claim under the *Rule 12(b)(6)* motion, the Court need not make a final conclusion on the issue of timeliness.

"To state a claim for legal malpractice under New York law, a plaintiff must allege: (1) attorney negligence; (2) which is the proximate cause of a loss; and (3) actual damages." *Achtman v. Kirby, McInerney & Squire, LLP, 464 F.3d 328, 337 (2d Cir. 2006)* (citing *Prudential Ins. Co. of Am. v. Dewey, Ballantine, Bushby, Palmer & Wood, 170 A.D.2d 108, 573 N.Y.S.2d 981, 986 (App.Div. 1991))*.

In order to establish negligence in a legal malpractice case, a plaintiff must allege that the attorney's conduct "fell below the ordinary and reasonable skill and knowledge commonly possessed by a member of the profession." *Achtman, 464 F.3d at 337* (quoting *Grago v. Robertson, 49 A.D.2d 645, 370 N.Y.S.2d 255 (N.Y.App.Div. 1975))*. "A complaint that essentially alleges either an error of **[*19]** judgment or a selection of one among several reasonable courses of action fails to state a claim for malpractice…Generally, an attorney may only be held liable for ignorance of the rules of practice, failure to comply with conditions precedent to suit, or for his neglect to prosecute or defend an action." *Achtman, 464 F.3d at 337* (quotations omitted) (citing *Rosner v. Paley, 65 N.Y.2d at 738, 492 N.Y.S.2d 13, 481 N.E.2d 553 (NY 1985)*; *Bernstein v. Oppenheim & Co., 160 A.D.2d 428, 430, 554 N.Y.S.2d 487 (1990))*.

Here, Plaintiff offers only vague and non-actionable challenges to CLL's legal representation. Plaintiff first pleads that CLL "failed to protect and safeguard her trade secrets." TAC P120(1). This allegation appears to refer either to the presence of non-attorney CLL employees at the initial presentation of Plaintiff's inventions or to the misappropriation at the heart of Plaintiff's TAC. However, neither instance is premised on anything more than speculation, and neither presents a challenge to the actual quality of CLL's legal representation Plaintiff also alleges that CLL "fail[ed] to properly advise [her] with respect to the opportunities for commercial exploitation of [her] **[*20]** inventions and trade secrets" (TAC P120(2)). This allegation again does not address CLL's legal representation and merely challenges the "selection of one among several reasonable courses." Finally, Plaintiff alleges that CLL failed to eliminate a conflict of interest to its representation of Plaintiff TAC PP120(3) and (4). Because this allegation includes no detail, even in speculation, as to the supposed conflict, the allegation does not provide a basis for a malpractice claim.

Moreover, the TAC fails to identify the precise damages suffered or how the Defendant's legal representation of her actually caused these damages. A plaintiff must properly plead that, "'but for' the attorney's conduct the client would have prevailed in the underlying matter or would not have sustained any ascertainable damages." *Trautenberg v. Paul, Weiss, Rifkind, Wharton & Garrison, LLP, No. 06 Civ. 14211(GBD), 629 F. Supp. 2d 259, 2007 U.S. Dist. LEXIS 56222, 2007 WL 2219485, *3 (S.D.N.Y. Aug. 2, 2007)* (citing *Weil Gotshal & Manges v. Fashion Boutique of Short Hills, 10 A.D.3d 267, 780 N.Y.S.2d 593, 596 (2004))*. "Notwithstanding counsel's purported negligence, the client must demonstrate his or her own likelihood of success; absent such a showing, counsel's conduct is **[*21]** not the proximate cause of the injury. Nor may speculative damages or conclusory claims of damage be a basis for legal malpractice." *Russo v. Feder, Kaszovitz, Isaacson, Weber, Skala & Bass, LLP, 301 A.D.2d 63, 67, 750 N.Y.S.2d 277 (N.Y.App.Div. 2002)*. See also *Morgan, Lewis & Bockius, LLP v. IBuyDigital.com, Inc., 14 Misc. 3d 1224A, 836 N.Y.S.2d 486, 2007 N.Y. Slip Op 50149U, at 6 (N.Y.Misc. 2007)*. The TAC fails to allege that CLL's legal representation constitutes 'but for' causation of some ascertainable and actionable damage.

For these reasons, Plaintiff's claim of legal malpractice against the CLL Defendants is DISMISSED.

G. Breach of Fiduciary Duty (against the CLL Defendants)

To state a claim for breach of fiduciary duty in New York, "plaintiff must allege three elements: (1) the existence of fiduciary relationship; (2) knowing breach of a duty that relationship imposes; and (3) damages suffered." *Nay ex. rel. Thiele v. Merrill Lynch, Pierce, Fenner & Smith, Inc., No. 05 Civ. 10264, 2006 U.S. Dist. LEXIS 52074, 2006 WL 2109467, at *6 (S.D.N.Y. July 25, 2006)* (quoting *Carruthers v. Flaum, 388 F. Supp. 2d 360, 380 (S.D.N.Y. 2005))* (internal quotation marks omitted).

Here, it appears that the same set of speculative allegations that comprised the legal malpractice **[*22]** claim is also relied upon for Plaintiff's fiduciary duty claim. As discussed above, the TAC does not identify with any more than broadly-worded speculations what duty was breached or what damage was caused by that breach.

This claim is hereby DISMISSED.

H. Unjust Enrichment

In order to state a claim for unjust enrichment, "plaintiff must establish 1) that the defendant benefited; 2) at plaintiff's expense; and 3) that 'equity and good conscience' require restitution." *Kaye v. Grossman, 202 F.3d 611, 616 (2d Cir. 2000)*. (citing *Dolmetta v. Uintah Nat'l Corp., 712 F.2d 15, 20 (2d Cir. 1983))*. As with her other claims, Plaintiff has provided only assertion and speculation as to the benefit that was taken from her by Defendants. Even under the low threshold that plaintiffs must meet under *Rule 12(b)(6)*, the unjust enrichment claim must be DISMISSED as against all Defendants.

H. Accounting

Plaintiff attempts to state a claim for "accounting." "Accounting" is a remedy available in certain circumstances, not a claim in itself. That cause of action is therefore DISMISSED as against all Defendants.

CONCLUSION

Plaintiff's claims against all Defendants are hereby DISMISSED. The Clerk of Court is hereby **[*23]** directed to close this case.

SO ORDERED:

Dated: New York, New York

April 23, 2009
