Further, the CTAC sufficiently alleges Hellmann to have imposed the CAF Surcharge. It names Hellmann as belonging to a cohort referred to as the "CAF Surcharge Defendants," *see id.* at p. 109, which is alleged to have "combined, conspired and agreed to fix and maintain . . . the [CAF] Surcharge," *see id.* at ¶ 380, and to have taken **[*68]** a number of collusive actions in furtherance of the CAF Conspiracy. *See id.* at ¶ 405 [TEXT REDACTED BY THE COURT]; *id.* at ¶¶ 412-14 (CAF Surcharge Defendants "sen[t] letters to their customers with the exact or substantively identical language and in this way, among others, implemented their CAF Surcharge agreement"); *id.* at ¶ 416 (CAF Surcharge Defendants took "actions to ensure customers could not negotiate paying the CAF Surcharge."). Most significantly, the CTAC expressly states that "the CAF Defendants . . . did impose artificially fixed and inflated CAF fees." *Id.* at ¶ 443. Thus, although the Fifth Claim makes scant *explicit* reference to Hellmann's participation in the CAF Conspiracy, it does plausibly connect Hellmann with the conspiracy by way of Hellmann's inclusion among the parties collectively alleged to have formulated the CAF Conspiracy and imposed the CAF Surcharge.[19]

In sum, the combination of the CTAC's detailed description of the CAF Surcharge and Hellmann's inclusion among the group of defendants alleged to have imposed the surcharge (as well as the CTAC's allegation that Hellmann was contacted by a codefendant in connection with the alleged **[*69]** conspiracy) suffice to plausibly connect Hellmann to the CAF Conspiracy. This principle has justified the survival of claims against several similarly situated defendants, and Hellmann has not demonstrated, nor does the court believe, that departure from these prior

---

[18] The court reached a similar conclusion regarding defendant Geodis' motion to dismiss. *See* Second R&R at pp. 57-58 ("Although the plaintiffs may have barely alleged Geodis' participation in this conspiracy by only alleging that it imposed the collusive surcharges," in light of details as to formation and execution of AMS Conspiracy, plaintiffs' allegations were "enough at this stage to assert a claim against Geodis.") (citing Dkt. No. 628 at p. 3 and n.4).

[19] Although, as noted above, the CAF allegations lodged against Hellmann are not particularly robust, it bears restating that they consist of more than a mere reference to Hellmann as one of the CAF Defendants. Thus, the allegation that Hellmann was contacted by a co-defendant in connection with the CAF Conspiracy—coupled with the factors described above—further supports tying Hellmann to the CAF Conspiracy. *See* Second R&R at p. 61 (connecting defendants Kintetsu and Nippon to Peak Season Surcharge Conspiracy on the strength of similar allegations).

Nor is the court's conclusion undermined by the fact that the CTAC fails to establish that a Hellmann representative participated in the CAF meetings and conference call, since the CTAC makes clear that the lists of defendants involved in these proceedings is not exhaustive. *See* CTAC at ¶ 388 (meeting attended by "representatives of *at least*" defendants named therein) (emphasis added); *id.* at ¶¶ 424, 426, 429 (same); *id.* at ¶ 419 (listing, "among others," attendees at August 12, 2005 meeting); *see also* Second R&R at p. 55 (failure to name specific defendant as attending conspiratorial meeting not fatal because defendant was alleged to have imposed surcharge, and list of meeting attendees not exhaustive); First R&R at pp. 48-49 (same); First R&R at pp. 45-46 (allegation that participants in meetings and conference call included "at least" specified defendants indicates that others may have been present).

conclusions is warranted. Accordingly, the court recommends denying Hellmann's motion for dismissal of the Fifth Claim.

4. Ninth Claim - U.S. Customs Ocean "AMS" Charge Agreement

Hellmann similarly seeks dismissal of the CTAC's Ninth Claim, which concerns the U.S. Customs Ocean AMS Charge Agreement (the "Ocean AMS Claim"). Both Hellmann's and the plaintiffs' respective arguments center on the court's prior discussion of defendant Geodis. In the Second R&R, the court upheld the Ocean AMS Claim as against Geodis—notwithstanding the fact that Geodis is only mentioned in the Ocean AMS Claim's caption—because

> the plaintiffs here have alleged more than parallel conduct by [Geodis]. In the Ocean AMS claim the plaintiffs go through great detail as to the formation and execution of this conspiracy, providing specific dates, locations of meetings, and the names of participants and the defendants who they represented. The plaintiffs **[*70]** have done more than allege "conscious parallelism," or even "allegations of parallel conduct . . . in a context that raises a suggestion of a preceding agreement[.]" They have sufficiently and plausibly alleged the conspiratorial agreement between the Ocean AMS defendants who are alleged to have participated in the conspiratorial meetings and communications. Although the plaintiffs may have barely alleged Geodis' participation in this conspiracy by only alleging that it imposed the collusive surcharges,[20] that is enough at this stage to assert a claim against Geodis.

Second R&R at p. 57 (quoting *Twombly, 550 U.S. at 553*; *Starr v. Sony BMG Music Entm't, 592 F.3d 314, 322 (2d Cir. 2010)* and citing Dkt. No. 628 at p. 3 & n.4) (internal citations omitted).

The court finds that plaintiffs have likewise sufficiently alleged the Ocean AMS Claim as against Hellmann. As noted above, once an antitrust conspiracy has been established, "only 'slight evidence' is necessary to connect a defendant" to it. *See* Dkt. No. 628 at p. 3 and n.4 (citing *Vandervelde v. Put & Call Brokers & Dealers Ass'n, 344 F. Supp. 118, 154-55 (S.D.N.Y. 1972)*, *opinion supplemented*, *344 F.Supp. 157 (S.D.N.Y. 1972)*; *Safeway Stores, Inc. v. F.T.C., 366 F.2d 795, 801 (9th Cir. 1966)*. Thus, as was the case with Geodis, "[a]lthough the plaintiffs may have barely alleged [Hellmann's] participation in this conspiracy by only alleging that it imposed the collusive surcharges, that is enough at this stage to assert a claim **[*71]** against" Hellmann. *See* Second R&R at p. 57 (citing Dkt. No. 628 at p. 3 and n.4).

Hellmann's argument for dismissal rests upon the court's recommendation to dismiss the Tenth Claim as against Geodis because "Geodis is not mentioned at all in Claim 10 except in the Caption." *See* Motion to Dismiss at p. 15 (quoting Second R&R at p. 36). Hellmann argues that it, too, should be dismissed from the Ninth Claim, in which it similarly is named only in the caption. *See id.*

The above discussion demonstrates, however, that the fact that a defendant is mentioned only in a claim's caption does not vitiate the prospect of liability. Instead, the court must analyze the caption's reference to that defendant—a fleeting one, to be sure—against the backdrop of the claim's substantive allegations.

So viewed, Hellmann's argument for dismissal of the Ninth Claim is unconvincing. The Global Agreement (along with the Japanese Regional Conspiracy) is *sui generis* in that, unlike the individual conspiracies, it comprises several component agreements. Liability for the Global Agreement, therefore, entails a different (and indeed, higher) standard than that for the individual conspiracies. *See* Second R&R at p. 36 (dismissing Tenth Claim because "the only factual allegations **[*72]** connecting these defendants to the global conspiracy are the defendants' imposition of some, but not all, of the surcharges at issue in the global conspiracy claim. . . . [T]he naked allegation that a defendant joined a conspiracy whose goal was to pass on all future surcharges without at

[20] Plaintiffs impliedly made this allegation by writing that the Ocean AMS Defendants—a group which Geodis (and Hellmann, for that matter) is alleged to have belonged—imposed the Ocean AMS surcharge. *See* CTAC at p. 148 and ¶ 558.

least the allegation that it imposed those surcharges is implausible.") (citing *Standard Iron Works v. ArcelorMittal, 639 F. Supp. 2d 877, 895 (N.D. Ill. 2009))*. Accordingly, the logic underlying the court's decision to dismiss the Tenth Claim as against Geodis is unique to that cause of action, and as such has little conceptual bearing on the Ocean AMS Claim.

Thus, although the court previously dismissed the Tenth Claim against Geodis in part because Geodis is only mentioned in the claim's caption, the logic behind that determination is peculiar to that claim. By contrast, the rationale underlying the court's recommendation to uphold the Ocean AMS Claim against Geodis—despite the fact that Geodis likewise is mentioned only in that claim's caption—applies with equal force to Hellmann, which is situated identically to Geodis *viz-a-viz* the Ninth Claim. Accordingly, the court finds that the plaintiffs have adequately pled the Ocean AMS Conspiracy as against Hellmann, and therefore **[*73]** recommends denying Hellmann's motion to dismiss the Ninth Claim.

5. Tenth Claim - Global Agreement

Hellmann also seeks dismissal of the Global Agreement asserted in the CTAC's Tenth Claim. The court has previously addressed head-on the prospect of dismissal of this claim as against Hellmann Inc. It concluded in the Second R&R that

> [t]he plaintiffs have also presented sufficient allegations that the defendant Hellman [Inc.] joined the global conspiracy. Hellman [Inc.] is alleged to have joined the global conspiracy at a "later date." While this sentence alone is conclusory, Hellman [Inc.] is also alleged to have imposed all of the collusive surcharges that formed the global conspiracy other than the security surcharge in Claim 1. That Hellman [Inc.] imposed all of the surcharges at issue in the global conspiracy after a certain date makes the plaintiffs' allegation that Hellman [Inc.] "later" joined the conspiracy plausible at this stage.

Second R&R at p. 35 (quoting CTAC ¶ 571 and citing Dec. & Order, at 3 & n.4 that only "slight evidence" is necessary to join a defendant to an established conspiracy) (internal citation omitted).

The court explicitly distinguished the CTAC's allegations against Hellmann from **[*74]** those concerning defendants Dachser, UPS, BAX Global, and Geodis, against which the Tenth Claim was dismissed (the "dismissed defendants"), writing that "[u]nlike Hellman, these defendants are not alleged to have consistently imposed all of the surcharges at issue after a certain date. The lack of concerted action on their part undermines the inference that they joined a global conspiracy to fix all surcharges." *Id.* at p. 36 (citing *Standard Iron Works, 639 F. Supp. 2d at 895*).

While the Second R&R's conclusion concerning Hellmann Inc. may rightly be applied to the each of the Hellmann entities, the arguments in the instant motion merit further discussion. First, Hellmann notes the court's finding that the allegations tying Dachser and UPS to the Global Agreement consisted of nothing more than a "conclusory statement that at an unspecified 'later date, [they] joined the Global Agreement to pass on surcharges to their customers,'" and argues that "[t]hat is all that is pleaded as to Hellmann GmbH and Hellmann HK as well." *See* Motion to Dismiss at p. 16 (quoting Second R&R at p. 35).

While not incorrect that the Tenth Claim's allegations connecting Hellmann to the Global Agreement are somewhat sparse, Hellmann's argument overlooks the above passage's broader **[*75]** context. The court's decision to uphold the Tenth Claim against Hellmann did not rest upon the foregoing allegation; to the contrary, regarding both the dismissed defendants *as well as* Hellmann, the court found this allegation to be conclusory and therefore insufficient to establish a plausible claim. *See* Second R&R at p. 35. Instead, it was the fact that the CTAC alleged Hellmann to have "imposed all of the collusive surcharges that formed the global conspiracy other than the security surcharge in Claim 1" that rendered plausible the allegation that Hellmann later joined the Global Agreement, *see id.*, and conversely, that the same did not hold true with regard to the dismissed defendants that led the court to dismiss the Tenth Claim as against them. *See id.* at p. 36 ("[T]he only factual allegations connecting these defendants to the global conspiracy are the defendants' imposition of some, but not all, of the surcharges at issue in the global conspiracy claim. Unlike Hellman, these defendants are not alleged to have consistently imposed all of the surcharges at issue . . . .").

Hellmann nonetheless disputes the Second R&R's conclusion, arguing that since Hellmann (1) is not alleged to have participated in the Security **[*76]** Surcharge Agreement; and (2) is only mentioned in the caption of the Ninth Claim, it follows that "Hellmann is not alleged to have been part of at least two agreements that form part of the purported Global Agreement," and is therefore similarly situated to the dismissed defendants for purposes of the Tenth Claim. *See* Motion to Dismiss at pp. 16-17. However, as the court has found the Ninth Claim to state a claim as against Hellmann, *see* Section III.C.4, *supra*, there remains only one claim within the Global Agreement (*i.e.* the Security Surcharge Claim) that does not implicate Hellmann. Thus, for purposes of comparison with the dismissed defendants, Dachser is alleged to have joined three of the six conspiracies underlying the Global Agreement (Claims No. 1, 5, and 8); UPS is alleged to have joined four of the six (Claims No. 3, 5, 6, and 8), and Hellmann is alleged to have joined all but the Security Surcharge.[21]

To be sure, then, the distinction between the *number* of conspiracies Hellmann is alleged to have joined (five) and those Dachser and UPS are alleged to have joined (three and four, respectively) is not terribly vast. But a careful review of the chronology of the CTAC's allegations **[*77]** places Hellmann and Dachser/UPS on categorically distinct footing for purposes of the Global Agreement. Significantly, the only conspiracy within the Global Agreement that does not implicate Hellmann, *i.e.* the Security Surcharge Conspiracy, predates each of the other underlying conspiracies. *See* CTAC at ¶¶ 307-14 (referencing October 2001 Security Surcharge meetings). Thus, it is entirely plausible to read the CTAC as alleging that Hellmann, although not getting in on the Global Agreement's ground floor, "*[a]t a later date*, . . . joined the Global Agreement to pass on surcharges to their customers," *see* CTAC at ¶ 571 (emphasis added), and was a full-fledged participant in the overarching conspiracy from that point forward. *See* Second R&R at p. 35 ("That Hellman imposed all of the surcharges at issue in the global conspiracy after a certain date makes the plaintiffs' allegation that Hellman 'later' joined the conspiracy plausible at this stage.") (citing Dkt. No. 628 at p. 3 and n.4). In light of its alleged participation in each of the subsequent component conspiracies, Hellmann's absence from the initial stages of the Global Agreement is not indicative, let alone dispositive, of the notion that it did **[*78]** not join in the Global Agreement.

Such a reading, however, does not extend to Dachser and UPS, both of which are absent from the CTAC's allegations concerning multiple component conspiracies arising at various times from 2001 through 2007. Accordingly, Dachser's and UPS's imposition of some of the surcharges falling under the Global Agreement is more plausibly read as incidental to the overarching conspiracy, rather than indicative of their participation in it. Accordingly, Hellmann's contention that it is on similar footing as Dachser and UPS for purposes of the Global Agreement is incorrect. As the court found in the Second R&R, the CTAC has plausibly alleged Hellmann's involvement in the Global Agreement, despite the fact that Hellmann is not alleged to have joined in the Security Surcharge Conspiracy. The court therefore recommends denying Hellmann's argument for dismissal of the Tenth Claim.[22]

CONCLUSION

The plaintiffs' allegations against Hellmann GmbH and Hellmann HK do not improperly group these entities with Hellmann, Inc., and satisfy the minimum pleading standards necessary to avoid dismissal at the *Rule 12(b)(6)* stage. However, because the CTAC was filed outside the applicable limitations **[*79]** period and is not salvaged on either fraudulent concealment or relation-back grounds, the claims against Hellmann GmbH and Hellmann HK are time-barred. I therefore recommend that the court grant the motion to dismiss the claims against Hellmann GmbH and Hellmann HK with prejudice.

---

[21] Because the CTAC alleges that Dachser and UPS, like Hellmann, joined the global conspiracy, but makes no similar reference to BAX and Geodis, *see* CTAC at ¶ 571, the court's analysis will center on Dachser and UPS, rather than BAX and Geodis, since the allegations against the latter are facially distinguishable from those against Hellmann.

[22] It bears mention that the court's finding that the CTAC plausibly alleges the Global Conspiracy as against Hellmann lends credence to the plausibility of the component conspiracies as alleged against Hellmann.

Copies of this sealed opinion will be provided only to the parties. The plaintiffs shall provide the court with a redacted copy of this opinion that complies with the protective order applicable to this action for public filing within ten days, and with three days notice to the defendants. The plaintiffs should contact the court by telephone for further instructions on how to submit the redacted document.

Opinion

ORDER

BE IT REMEMBERED on this day the Court reviewed the file in the above-styled cause, and specifically Defendant KLA-Tencor Corporation's Motion to Dismiss [#5], Plaintiff Xitronix Corporation's Response [#7], and KLA-Tencor Corporation's Reply [#9], Having reviewed the documents, the relevant law, and the file as a whole, the Court now enters the following opinion and orders DENYING the motion.

Background

Reading the allegations in Plaintiff Xitronix Corporation (Xitronix)'s favor, this lawsuit involves Xitronix's attempt to compete in the dopant activation metrology marketplace and Defendant KLA-Tencor Corporation (KLA)'s repeated and sustained attempts to illegally prohibit Xitronix from competing with KLA through the use of patent **[*2]** law. KLA is the assignee of the following related patents: (1) United States Patent No. 8,817,260 (the '260 Patent); (2) U.S. Patent No. 7,646,486 (the '486 Patent); and (3) United States Patent No. 7,362,441 (the '441 Patent). The '260 Patent is a continuation of the '486 Patent, which is a continuation of the '441 Patent, which itself was a continuation of an earlier patent, United States Patent No. 7,126,690 (the '690 Patent). The patented technology involves, in general terms, a system which provides high resolution, non-destructive evaluation of semiconductor wafers as they pass through various semiconductor manufacturing stages. More specifically, the patent claims the parties have disputed deal with the wavelength of the probe beam used in this system. According to Xitronix, KLA prosecuted these patents "with the central aim of capturing Xitronix's technology within the scope of their respective claims." Compl. [#1] ¶ 7.

In the current lawsuit, Xitronix has brought a *Walker Process* antitrust claim against KLA based on KLA's allegedly fraudulent procurement of the '260 Patent, and KLA has filed a motion to dismiss for failure to state a claim upon which relief can be granted. In order to assess whether Xitronix's allegations satisfy *Rule 12*, the Court must first describe the litigation history between these two parties, as the instant case is the third installment in a trilogy of lawsuits.

I. The First Two Lawsuits

First, in **[*3]** September 2008, Xitronix sued KLA, asserting a declaratory judgment of non-infringement with respect to the '441 Patent and its parent, the '690 Patent. *See* Compl. [#1] at 2, *Xitronix Corp. v. KLA-Tencor Corp.*, No. l:08-CV-723-SS (W.D. Tex. Jan. 31, 2011) (the First Lawsuit). KLA had apparently informed Xitronix through numerous letters of its belief Xitronix was engaged in ongoing infringement of KLA's patents, prompting Xitronix to respond with its non-infringement suit. *Id.* at 4-9. In November 2010, the parties tried the case to a jury, which returned a verdict finding Xitronix had infringed claim 7 of the '441 Patent but had not infringed any other claims. Order of Jan. 31, 2011 [#210] at 1, the First Lawsuit. The jury also found, however, that claim 7 of the '441 Patent was invalid as anticipated by prior art. *Id.* at 1-2. The jury further found all of the asserted claims—claims 7, 9, 11, and 12—of the '441 Patent were invalid due to obviousness. *Id.* at 2. Post-trial, the Court ordered the parties to brief whether the claims at issue were also invalid due to indefiniteness, and the Court ultimately held the claims were indefinite. *Id.* at 3, 5-9. Additionally, the Court held there was ample evidence to support the jury's verdict of invalidity based on anticipation and obviousness. **[*4]** *Id.* at 10-12. KLA did not appeal the case.

Second, in March 2011, Xitronix filed a lawsuit against KLA in Texas state court, alleging state law causes of action for business disparagement, tortious interference, and unlawful restraint of trade, which was subsequently removed by KLA to this Court. See Notice Removal [#1], Xitronix Corporation v. KLA-Tencor Corporation, No. L11-CV-358-SS (W.D. Tex. July 7, 2011) (the Second Lawsuit). Xitronix's state law claims were based on KLA's conduct in and surrounding the First Lawsuit, including: "(1) KLA's alleged knowing false statements of infringement of the '441 Patent by Xitronix; and (2) KLA's alleged bad faith use of litigation to impair Xitronix's business operations." Order of July 7, 2011 [#16] at 2, the Second Lawsuit. Xitronix moved to remand, and the Court granted the motion because the only substantial question of patent law (which supposedly provided the basis for removal) was already decided in the First Lawsuit. *Id.* On remand, the state court, according to Xitronix's allegations, granted summary judgment in favor of KLA for unspecified reasons, and on appeal, the Third District Court of Appeals of Austin affirmed the summary judgment on res judicata **[*5]** grounds, holding Xitronix's antitrust claims arose out of the same nucleus of operative facts underlying its claims in the First Lawsuit. Compl. [#1] ¶ 34. Xitronix has a petition for review of that decision pending before the Supreme Court of Texas. *Id.*

II. The Current Lawsuit

As previously stated, Xitronix has now filed a third lawsuit, asserting a *Walker Process* antitrust claim based on KLA's alleged fraudulent procurement of the '260 Patent. KLA obtained the '260 Patent over a period of years involving back-and-forth exchanges with the PTO. KLA filed its patent application for the '260 Patent on November 11, 2009, and on February 2, 2011, just two days after the Court's entry of the final judgment in the First Lawsuit, the PTO examiner allowed KLA's pending claims in the '260 Patent, claims which Xitronix contends are essentially identical to the invalidated patent claims of the '441 Patent. Compl. [#1] ¶ 28. On February 10, 2011, KLA's patent prosecution attorney, Michael Stallman, submitted a request for a continued examination of the '260 Patent, and he concurrently submitted an information disclosure statement listing an "Executed ORDER from the United States District Court for the Western District of Texas, Austin Division, Case no. A-08-CA-723-SS, **[*6]** dated January 31, 2011, 13 pages in length." *Id.* ¶ 29. Xitronix, however, alleges Stallman did not explain to the patent examiner how this Court's January 31, 2011 Order related to the then-pending '260 Patent; how the pending claims were identical to, or broadened from, claims in the '441 Patent held in valid as a final judgment in the First Lawsuit; and how, as a result, the pending claims were unpatentable. *Id.* ¶ 30.

On July 25,2013, the PTO examiner issued an initial rejection of the claims in the continuing '260 Patent application, but, according to Xitronix, the examiner had still missed the significance of the First Lawsuit. *Id.* ¶ 37. In response to the initial rejection, Xitronix contends Stallman repeatedly submitted arguments for patentability which directly contradicted the final judgment in the First Lawsuit. *Id.* The '260 Patent ultimately issued August 26, 2014, and Xitronix alleges that but for Stallman's fraudulent omissions and affirmative misrepresentations, the PTO would not have issued the patent. *Id.* ¶¶ 35, 37.

Xitronix contends the '260 Patent has created artificial impediments to Xitronix's ability to obtain the financing necessary to compete in the market and to the market's adoption of Xitronix's technology. *Id.* ¶ **[*7]** 11. Through the '260 Patent, Xitronix alleges KLA has "obtained the illegitimate power to exclude its competitor Xitronix from the relevant market. *Id.* According to Xitronix, KLA has engaged in exclusionary conduct through its fraudulent procurement of the '260 Patent, and this conduct "was, and is, specifically intended to monopolize and destroy competition in the market for dopant activiation metrology, a market currently valued at approximately $650 million." *Id.* ¶ 12. Xitronix represents KLA's Therma-Probe 680 and Xitronix's XP700 system are the only two products in the market, and KLA has now obtained the power to exclude Xitronix from manufacturing or selling its product. *Id.* ¶ 13.

In response to these allegations, KLA has filed a motion to dismiss under *Rule 12(b)(6)*, arguing (1) it has never "enforced" the '260 Patent for purposes of a *Walker Process* claim, and (2) it disclosed all relevant material to the PTO in prosecuting the '260 Patent, including this Court's final order and judgment from the First Lawsuit. The parties fully briefed the motion, which is now ripe for the Court's consideration.

Analysis

I. *Rule 12(b)(6)*—Legal Standard

Federal Rule of Civil Procedure 8(a)(2) requires a complaint contain "a short and plain statement of the claim showing that the pleader is entitled to **[*8]** relief." *Fed. R. Civ. P. 8(a)(2)*. A motion under *Federal Rule of Civil Procedure 12(b)(6)* asks a court to dismiss a complaint for "failure to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. In deciding a motion to dismiss under *12(b)(6)*, a court generally accepts as true all factual allegations contained within the complaint. *Leatherman v. Tarrant Cnty. Narcotics Intelligence & Coordination Unit, 507 U.S. 163, 164, 113 S. Ct. 1160, 122 L. Ed. 2d 517 (1993)*. However, a court is not bound to accept legal conclusions couched as factual allegations. *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)*. Although all reasonable inferences will be resolved in favor of the plaintiff, the plaintiff must plead "specific facts, not mere conclusory allegations." *Tuchman v. DSC Commc'ns Corp., 14 F.3d 1061, 1067 (5th Cir. 1994)*. The plaintiff must plead sufficient facts to state a claim for relief that is facially plausible. *Ashcroft v.*

Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009); *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. Although a plaintiff's factual allegations need not establish the defendant is probably liable, they must establish more than a "sheer possibility" that a defendant has acted unlawfully. *Id.* Determining plausibility is a "context-specific task," that must be performed in light of a court's "judicial experience and common sense." *Id. at 679*. In deciding a motion to **[*9]** dismiss, courts may consider the complaint, as well as other sources courts ordinarily examine when ruling on *Rule 12(b)(6)* motions to dismiss, such as documents incorporated into the complaint by reference, and matters of which a court may take judicial notice. *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)*.

II. Application

A. *Walker Process* Antitrust Claim and the Requisite Level of Enforcement

1. Dispute Over Applicable Legal Standard

Xitronix has asserted only one claim in its complaint: a *Walker Process* antitrust claim, which finds its origin in the Supreme Court opinion *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. In that case, the Supreme Court held:

> The enforcement of a patent procured by fraud on the Patent Office may be violative of *§ 2* of the Sherman Act provided the other elements necessary to a *§ 2* case are present. In such event the treble damage provisions of *§ 4* of the Clayton Act would be available to an injured party.

Id. at 174. *Section 2* of the Sherman Antitrust Act provides that a "person who shall monopolize, or attempt to monopolize, or combine with any other person, to monopolize any part of the trade or commerce ... shall be deemed guilty of a felony." *15 U.S.C. § 2*. Xitronix has asserted "attempted monopolization" against KLA. *See* Compl. [#1] ¶¶ 144-48.

KLA's first argument for dismissal centers on a **[*10]** *Walker Process* claim's requirement for *enforcement* of the patent. The parties agree KLA has not taken any affirmative action with respect to the '260 Patent. For instance, KLA has not sent Xitronix a cease-and-desist letter charging Xitronix with infringement of the '260 Patent nor has KLA filed an infringement lawsuit against Xitronix concerning the '260 Patent. According to KLA, there must be an overt act of enforcement before a plaintiff has standing to bring a *Walker Process* claim, and KLA cites cases holding mere procurement of a patent, even if by fraud, cannot in itself violate antitrust laws. *See* Mot. Dismiss [#5] at 7 (citing cases).

The Court agrees with KLA that there is an "enforcement" element to a *Walker Process* claim, and mere procurement of the patent by fraud is insufficient to state a claim for antitrust violations. KLA oversimplifies the matter, however, when it takes these two principles and leaps to the assumption that "enforcement" must entail an overt act such as a cease-and-desist letter or an infringement action. Notably, KLA cites no case holding the "enforcement" requirement can only be satisfied by an overt action. The critical question then emerges: what level of "enforcement" is required? **[*11]** Unfortunately, what is meant by "enforcement" has rarely been an issue in the case law because a *Walker Process* claim is typically asserted as a counterclaim to an infringement lawsuit. *See* *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1068 (Fed. Cir. 1998)* (An antitrust claim premised on stripping a patentee of its immunity from the antitrust laws is typically raised as a counterclaim by a defendant in a patent infringement lawsuit."). In other words, the "enforcement" element is usually taken for granted.

The Federal Circuit, however, has addressed the "enforcement" requirement and made clear the inquiry does not turn on the existence of an overt act. In *Unitherm Food Systems, Inc. v. Swift-Eckrich, Inc., 375 F.3d 1341 (Fed. Cir. 2004)*, the plaintiff sought a declaration that the defendant-competitor's patent was invalid and asserted an ancillary *Walker Process* claim. *Id. at 1345*. The defendant moved to dismiss the antitrust claim for lack of standing. *Id. at 1347*. In considering the meaning of "enforcement," the Federal Circuit compared the standard for standing under a Walker Process cause of action to the standard in a Declaratory Judgment Action. *Id. at 1357-58*. The court observed that "[s]trictly speaking, a *Walker Process* claim is premised upon 'the enforcement of a patent procured by fraud on the Patent Office.'" *Id.* (quoting *Walker Process, 382 U.S. at 174*). In comparison, "[a] plaintiff **[*12]** may bring a Declaratory Judgment Action of patent invalidity . . . even in the absence of overt enforcement actions." *Id. at 1358*. To the extent there was any tension between these two standards, the Federal Circuit clarified the law.

> We therefore hold that, as a matter of Federal Circuit ***antitrust law***, the standards that we have developed for determining jurisdiction in a Declaratory Judgment Action of patent invalidity also define the minimum level of ' enforcement' necessary to expose the patentee to a Walker Process claim for attempted monopolization.

Id. This holding is critical to the issue presently before this Court, as it lies at the heart of the parties' dispute, and therefore bears repeating: for *Walker Process* claims, "enforcement does not mean active, overt enforcement and instead refers to whatever is necessary to establish jurisdiction in a Declaratory Judgment Action.

Having pegged the standard for *Walker Process* claim standing to the standard for Declaratory Judgment Actions, the next question becomes: what is the applicable standard for determining jurisdiction in a Declaratory Judgment Action? At the time of the *Unitherm* decision, the prevailing standard in the Federal Circuit **[*13]** was "a two-part test that first consider[ed] whether conduct by the patentee create[d] a reasonable apprehension on the part of the declaratory judgment plaintiff that it will face an infringement suit, and second examine[d] whether conduct by the declaratory judgment plaintiff amount[ed] to infringing activity or demonstrate[d] concrete steps taken with the intent to conduct such activity." *SanDisk Corp. v. STMicroelectronics, Inc., 480 F.3d 1372, 1379 (Fed. Cir. 2007)* (citing *Arrowhead Indus. Water, Inc. v. Ecolochem, Inc., 846 F.2d 731, 736 (Fed. Cir. 1988))*. In 2007, however, the Supreme Court in *MedImmune, Inc. v. Genentech, Inc., 549 U.S. 118, 127 S. Ct. 764, 166 L. Ed. 2d 604 (2007)*, rejected the "reasonable apprehension of suit" aspect of the two-part test, and instead held the proper test is whether "there is a substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment." *Id. at 127*; *see also* *SanDisk Corp., 480 F.3d at 1380* ("The Supreme Court's opinion in *MedImmune* represents a rejection of our reasonable apprehension of suit test.").

KLA suggests that since *Unitherm* was decided before *MedImmune* and since the Federal Circuit has not specifically adopted the standard for Declaratory Judgment Action standing announced in *MedImmune* in the *Walker Process* context, then *Unitherm*'s status as currently viable law is in doubt. See Reply [#9] at 3 n.3. The Court disagrees. First, *Unitherm* attached the *Walker Process* standard **[*14]** to the Declaratory Judgment standard as a general principle and not to the specific standard for Declaratory Judgment that existed at the time. KLA cites no reason, much less a case since *MedImmune*, indicating the courts should not continue matching the *Walker Process* standard to the Declaratory Judgment standard as held in *Unitherm*, even as the standard changes.

Second, KLA's argument is immaterial because neither the Declaratory Judgment standard in existence pre-*MedImmune* nor the standard established in *MedImmune* include overt enforcement of the patent as a requirement. In *Unitherm*, the court described the then-prevailing "reasonable apprehension of suit" test for the specific purpose of explaining that overt enforcement actions are unnecessary to establish Declaratory Judgment jurisdiction. *See* *Unitherm, 375 F.3d at 1358* (citing *Arrowhead, 846 F.2d at 736*).[1] The test announced in *MedImmune* is an even more relaxed standard which eliminated the "reasonable apprehension of suit" concept in favor of the more general

---

[1] In *Arrowhead*, the court made clear that "[w]hen the defendant's conduct, including its statements, falls **[*15]** short of an express charge [of infringement], one must consider the 'totality of the circumstances' in determining whether that conduct meets the first prong of the test." *Arrowhead, 846 F.2d at 736*. The court continued: "If the circumstances warrant, a reasonable apprehension may be found in the absence of *any* communication from defendant to plaintiff" *Id.* (citation omitted) (emphasis in original).

idea of a "substantial controversy." Either way, overt enforcement actions are not required as suggested by KLA's arguments.

In sum, Federal Circuit ***antitrust law*** equates the standards for determining jurisdiction in a Declaratory Judgment Action with those for defining the minimum level of "enforcement" necessary to state a *Walker Process* claim, and the standard for determining Declaratory Judgment jurisdiction is a flexible totality-of-the-circumstances approach focused on whether "there is a substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment." *MedImmune, 549 U.S. at 127*.

2. Sufficiency of Xitronix's Pleadings

With the legal standard in place, the Court turns its attention to Xitronix's allegations and considers whether they satisfy the "substantial controversy" standard for Declaratory Judgments. Xitronix's complaint is lengthy and details the history between **[*16]** the parties and how the issuance of the '260 Patent has, in its view, created a substantial controversy. *See* Compl. [#1] ¶¶ 15-143. In its response, Xitronix summarizes the allegations it contends support a finding of standing [sic throughout]:

- The entirety of the six-plus year history of KLA's attempts to capture Xitronix's technology within its patents. Compl.[#1] at 5, ¶¶ 19-20;

- KLA's historic threats against Xitronix, including its expression of its intent to enforce the '441 patent it obtained incorporating elements of Xitronix's technology *id.* at 5, ¶ 21;

- KLA's knowledge that, as long as it maintained artificial "intellectual property issues" surrounding Xitronix's technology, the market would not adopt Xitronix's technology, *id.*; and

- KLA's ongoing efforts, during the [First Lawsuit] and after, to do whatever it could to obtain patent claims covering Xitronix's technology, including pursuing the '260 patent claim that embedded this Court's claim construction from, and carried forward claims that had been litigated essentially verbatim in, the '441 litigation, *id.* at 6, ¶ 24; and

- The exclusionary consequences of KLA's procurement of the '260 patent on Xitronix's ability to enter the market, *id.* at 28-30, ¶¶ 120-25.

Resp. [#7] at 11-12 (footnote **[*17]** omitted).

Taking these specific citations and the complaint as a whole, the Court agrees with Xitronix that its allegations support a finding of a substantial controversy between these two parties with adverse legal interests as described in *MedImmune*. In short, Xitronix alleges KLA purchased a company active in the semiconductor optical inspection market for $75 million. When Xitronix introduced a supposedly superior competing product with more advanced technology, KLA modified an already-existing patent application with the express purpose of capturing Xitronix's technology, and that application ultimately resulted in the '441 Patent. KLA actively asserted the '441 Patent against Xitronix, which caused Xitronix to file a declaratory judgment of non-infringement. A jury eventually found the asserted claims of the '441 Patent invalid on anticipation and obviousness grounds, and the Court additionally found the claims invalid for indefiniteness. Undeterred, KLA went back to the PTO and was able, through fraud, to obtain a new patent, the '260 Patent, which is essentially identical to the '441 Patent. While KLA has taken no action with respect to the '260 Patent, the effect of its existence—within the context of these two parties' history—is a variety **[*18]** of exclusionary consequences for Xitronix in the marketplace. The Court finds these allegations sufficient to survive *Rule 12* scrutiny.

Additionally, the Court notes KLA has not actually disputed the sufficiency of Xitronix's allegations with respect to the "substantial controversy" standard from *MedImmune*. Instead, KLA has only argued the "enforcement" requirement necessarily means an overt act—an argument rejected by the Court. As such, KLA has not actually moved to dismiss on the ground Xitronix does not adequately plead a "substantial controversy."

3. Policy

By concluding Xitronix satisfies the "enforcement" requirement despite the fact KLA has apparently done nothing with the '260 Patent since its issuance, the Court wants to be clear it is not holding mere procurement of a patent can support a *Walker Process* claim. To the contrary, the Court agrees with KLA and the cases it cites that a patentee should not be subject to a *Walker Process* claim simply because it obtains a patent. What makes this case unique are Xitronix's allegations, in addition to KLA's simple procurement of the '260 Patent, about the history of litigation between these parties and the connection between the '441 Patent and the '260 Patent. Here, taking Xitronix's **[*19]** allegations as true, KLA actively enforced the '441 Patent before it was ruled invalid through a final judgment in this Court. KLA, however, has since obtained the exact same patent, only now it has a different number. Faced with an antitrust claim, KLA seeks to have the claim dismissed because it has not technically taken any overt actions concerning the '260 Patent, even though it did take such action with the '441 Patent. The resulting conundrum is that KLA is actually best served by not actively asserting the patent at all. Put differently, KLA can benefit from merely owning an invalid patent while also remaining immune from any *Walker Process* antitrust claims as long as it never takes any action concerning the '260 Patent. In the Court's view, such an outcome undermines both patent and ***antitrust law***.

Relatedly, the Court's decision does not pose a danger of broadening *Walker Process* claims beyond their intended scope. In *Unitherm,* the Federal Circuit made clear there are circumstances under which a plaintiff may assert a *Walker Process* claim despite the absence of any overt enforcement by the patent owner. This case presents the sort of unique allegations contemplated by the Federal Circuit's holding and is the sort of case **[*20]** that, in the Court's view, occurs infrequently. Moreover, declaratory judgment jurisdiction is discretionary with the courts, and each case requires careful analysis of the specific allegations present in the complaint. *See* MedImmune, 549 U.S. at 127 ("The Declaratory Judgment Act provides that a court may declare the rights and other legal relations of any interested party, not that it *must* do so.") (emphasis in original); Wilton v. Seven Falls Co., 515 U.S. 277, 286, 115 S. Ct. 2137, 132 L. Ed. 2d 214 (1995) (nothing the federal courts have "unique and substantial discretion in deciding whether to declare the rights of the litigants"). The Court's decision is limited to the circumstances of this case, and the Court rejects any notion its decision could open the floodgates of Walker Process litigation or expose patentees to such claims simply based on their procurement of a patent.[2]

---

[2] The Court notes the scholarship of Professor Christopher R. Leslie who has advocated for the abolishment of the "enforcement" requirement altogether. In a law review article directly on point to the issue before the Court, Professor Leslie has challenged the notion that mere procurement of a patent, no matter the conduct of the patentee in obtaining the patent, cannot—without more—affect the welfare of the consumer **[*21]** and in itself violate the antitrust laws. *See* Christopher R. Leslie, *The Anticompetitive Effects of Unenforced Invalid Patents*, 91 Minn. L. Rev. 101 (2006). Instead, Professor Leslie contends "mere procurement and possession of an invalid patent can, in fact, injure competition and reduce consumer welfare." *Id. at 113*. Professor Leslie persuasively documents the variety of ways simple possession of an invalid patent can help maintain an illegitimate monopoly, including (1) how the "[t]he fear of infringement can deter entry into the monopolist's market, even if the potential competitor strongly believes that the patent at issue is invalid"; (2) the "increase[d] entry costs by compelling rivals to research the patent's validity, to attempt to design around the patent, or to pay (unnecessary) licensing fees"; (3) how "a monopolist's suspect patents can deter its competitor's customers, business partners, and venture capitalists from doing business with them"; and (4) how "firms may avoid entire fields of research out of fear of infringement litigation, a phenomenon that can distort innovation and reduce long term competition even further." *Id. at 104, 114-39*. Many of these factors are present in Xitronix's allegations, and Professor Leslie's **[*22]** research supports Xitronix's claims of antitrust injury despite the fact KLA has not overtly enforced the '260 Patent.

While Professor Leslie argued for elimination of the "enforcement" requirement in his article, which, notably, he wrote prior to *MedImmune* and the adoption of an even more adaptable standard for Declaratory Judgment jurisdiction, such a decision is beyond this Court's limited function. Interestingly, however, in subsequent papers, Professor Leslie has noted how *MedImmune* "has important implications for ***antitrust law***" and that it has the potential to move courts away from rigid applications of the "enforcement" requirement. *See* Christopher R. Leslie, *New Possibilities for Asserting Walker Process Claims*, 21-SUM ANTITRUST 48, 50-51 (2007).

B. Fraud on the PTO

KLA's second ground for dismissal is the failure to allege fraud. Specifically, KLA argues that, according to Xitronix's own pleadings, KLA provided all of the relevant material, including the Court's final order and judgment from the First Lawsuit, to the PTO, and therefore it complied with its duty to disclose. In order to prevail on the fraud components of its antitrust claim, Xitronix must show either that "the patentee 'obtained **[*23]** the patent by knowingly and willfully misrepresenting facts' to the [PTO]" or that it made a fraudulent omission. *Nobelpharma, 141 F.3d at 1068-71*. Xitronix presents both an affirmative misrepresentation theory and a fraud-by-omission theory.

First, Xitronix argues KLA' s patent attorney, Stallman, made affirmative misrepresentations regarding the status of relevant prior art. In the Court's post-trial final order in the First Lawsuit, it discussed the ample evidence that existed to support the jury's finding of invalidity of the '441 Patent based on anticipation and obviousness. *See* Order of Jan. 31, 2011 [#210] at 10-12, the First Lawsuit. In particular, the Court discussed to two specific examples of prior art, Batista and Mansanares, and the probe beam wavelength they taught, which was a range of 355 to 410 nanometers (nm):

> The inventors and the experts testified that it was known by persons of ordinary skill that overcoming noise problems would improve the commercial embodiment of the prior art Therma-Probe device, and this problem was overcome by increasing the strength of the output signal. Batista and Mansanares each individually taught that changing the probe beam wavelength from 670 to a particular wavelengths [sic] **[*24]** in the range of 355 to 410 would increase the output signal by a factor of ten. This was strong motivation for a person of ordinary skill to change the wavelengths [sic] of the prior art Therma-Probe device and method using the teachings of Batista or Mansanares. Thus, a reason existed at the time of the effective filing date of the '441 Patent that prompted a person of ordinary skill to change the wavelength of the probe beam in the prior art Therma-Probe device to a wavelength that increased the strength of the output signal, which reflects the obviousness of the claims.

Id. at 12 (citations to the trial record omitted).

Soon after entrance of the January 31, 2011 Order, KLA submitted the final order and final judgment to the PTO in February 2011. In 2013 and 2014, however, when a new patent examiner had taken over the ongoing '260 Patent application, Stallman made representations to the new examiner regarding the prior art, which Xitronix alleges contradict the actual state of the prior art and this Court's statements about the prior art. For example, Stallman claimed on March 12, 2014:

> [N]one of the prior art related to measuring modulated reflectivity on silicon semiconductor samples taught the claimed probe beam wavelength **[*25]** of 360 to 410 nm.

Compl. [#1] ¶ 72.

Similarly, in October 2013, Stallman represented:

> [T]he prior art fails to teach [the 360 to 410 nm] wavelength range for use in semiconductor samples when performing modulated optical reflectivity measurement.

Id. ¶ 73.

On April 17, 2014, the examiner allowed claim 1 of the '260 Patent, and Xitronix argues the examiner's stated rationale reflects his acceptance of KLA's fraudulent misrepresentations of the prior art:

> Regarding claim [1], the prior art of record fails to anticipate or render obvious a method for evaluating a silicon semiconductor sample comprising, among other essential features, focusing a fixed wavelength prove [sic] beam generated by a laser onto the sample within the region that has been excited, wherein the wavelength of the probe beam is between 360 and 410 nm; monitoring the changes in the power of the reflected beam induced by the pump beam; and generating output signals in response thereto, said output signals

> corresponding to the changes in the optical reflectivity of the sample the output signals containing information which is used to evaluate the sample, in combination with the rest of the limitations of claim [1].

Id. ¶ 78.

In the Court's **[*26]** view, these allegations are sufficient to satisfy the fraudulent misrepresentation element of a fraud-on-the-PTO claim. While Stallman was certainly free to present argument in favor of patentability, he was not free to misrepresent the state of the prior art as alleged by Xitronix. Moreover, the disclosure of all of the relevant prior art does not permit Stallman to make representations about that prior art that are false. Xitronix's allegations support a theory whereby Stallman told the PTO there was no prior art teaching a probe beam wavelength of 360 to 410 nm when he was fully aware of the Batista and Mansanares references that taught those wavelength ranges and this Court's final judgment that the '441 Patent was invalid as obvious due to those references.

Xitronix's second theory for fraud-on-the-PTO, which is related to its first, is that KLA had more than a duty merely to disclose all material information but also a duty to explicitly inform the examiner of the relationship between the pending claims of the '260 Patent and the invalid claims of the '441 Patent. When KLA failed to do so, Xitronix argues KLA fraudulently omitted material information.

"A patent applicant's duty to disclose material information **[*27]** to the PTO arises under the general duty of candor, good faith, and honesty embodied in *37 C.F.R. § 1.56(a) (1996)*." *Critikon, Inc. v. Becton Dickinson Vascular Access, Inc., 120 F.3d 1253, 1256 (Fed. Cir. 1997)*. Materiality embraces "any information that a reasonable examiner would substantially consider important in deciding whether to allow an application to issue as a patent." *Akron Polymer Container Corp. v. Exxel Container, Inc., 148 F.3d 1380, 1382 (Fed. Cir. 1998)* (quotation omitted).

As an example of KLA's alleged fraudulent omissions and its failure to uphold its duty of candor, good faith, and honesty, Xitronix points to the fact the Court held the '441 Patent invalid for indefiniteness because of its use of the term "substantially maximize" to describe the patented wavelengths at issue. *See* Order of Jan. 31, 2011 [#210] at 5-9, the First Lawsuit. During prosecution of the '260 Patent, the examiner recommended KLA incorporate the same "substantially maximize" language. Instead of pointing out to the examiner that the Court had held this same language indefinite, Stallman accepted the examiner's recommendation. According to Xitronix, this failure to inform the examiner of the contradiction between his suggestion and the final judgment of the First Lawsuit amounts to a breach of KLA's duty of candor, honesty, and good faith.

Again, the Court finds these allegations sufficient to state a claim for **[*28]** fraud. To remain silent and not inform the examiner that his suggested language had been previously ruled invalid for indefiniteness in a final judgment states a claim that Stallman fraudulently omitted material information and did not comply with his duties of candor, honesty, and good faith.

Conclusion

After careful review of the applicable legal standards and the allegations in the complaint, the Court concludes Xitronix has adequately pleaded "enforcement" for purposes of a *Walker Process* antitrust claim and fraud in procuring the '260 Patent.

Accordingly,

IT IS ORDERED that Defendant KLA-Tencor Corporation's Motion to Dismiss [#5] is DENIED.

SIGNED this the 24th day of June 2015.

HN1[] **Actual Monopolization, Anticompetitive & Predatory Practices**

In Actavis, the Supreme Court held that unexplained large payments from the holder of a patent on a drug to an alleged infringer to settle litigation of the validity or infringement of the patent (reverse payment) can sometimes violate the antitrust laws. The Court rejected the near-irrebuttable presumption, known as the scope of the patent test, that a patentee can make such reverse payments so long as it is paying potential competitors not to challenge its patent within the patent's lifetime.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Standards of Review, De Novo Review**

Plenary review is exercised over a district court's ruling on a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN3[] **Per Se Rule & Rule of Reason, Sherman Act**

The Supreme Court's holding in Actavis is not limited to reverse payments of cash. A no-authorized generic agreement, when it represents an unexplained large transfer of value from the patent holder to the alleged infringer, may be subject to antitrust scrutiny under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN4[] **Per Se Rule & Rule of Reason, Sherman Act**

In Actavis, the Supreme Court found that reverse payments are problematic because of their potential to negatively impact consumer welfare by preventing the risk of competition, which arises from expected litigation outcomes. The Court's reasoning was not that reverse payments per se violate the antitrust laws, or are per se anticompetitive. Instead, the Court focused on whether a reverse payment could have an anticompetitive effect or, alternatively, whether it was reasonable compensation for litigation costs or the value of services. In other words, the Court reasoned that even a small risk of invalidity may not justify a large payment (presumably enabled by patent-generated monopoly profits) that likely seeks to prevent the risk of competition. It is the prevention of that risk of competition—eliminating the risk of patent invalidation or a finding of noninfringement by paying the challenger to stay out of the market (for longer than the patent's strength would otherwise allow)—that constitutes the relevant anticompetitive harm, which must then be analyzed under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN5[] **Per Se Rule & Rule of Reason, Sherman Act**

Antitrust law is designed to protect consumers from arrangements that prevent competition in the marketplace. A no-authorized generic agreement could prevent the risk of competition. The Actavis Court did not intend to draw a formal line applying only to a reverse payment involving a payment of money. Nor did the Actavis Court limit its reasoning or holding to cash payments only.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN6[] **Inequitable Conduct, Anticompetitive Conduct**

The fact that the Patent Act expressly authorizes licensing does not necessarily mean it also authorizes reverse payments to prevent generic competition.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN7[] **Inequitable Conduct, Anticompetitive Conduct**

The United States Court of Appeals for the Third Circuit does not read the Supreme Court's Actavis decision to require allegations that defendants could in fact have reached another, more competitive settlement. Actavis embraces the concept that a patent may or may not be valid, and may or may not be infringed, and holds that the anticompetitive harm from a settlement is not certain consumer loss through higher prices, but rather the patentee's avoidance of the risk of patent invalidation or a finding of noninfringement—that is, prevention of the risk of competition beyond what the patent's strength would otherwise allow—and, thus, consumer harm. In other words, under the substantive standard, the question is not whether the defendants have only possibly acted unlawfully, but whether they have acted unlawfully by seeking to prevent competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The rule-of-reason analysis is for the finder of fact, not the court as a matter of law.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Burdens of Proof > Allocation

HN9[] **Per Se Rule & Rule of Reason, Sherman Act**

Under the traditional rule-of-reason analysis, the factfinder must weigh all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. The plaintiff bears an initial burden under the rule of reason of showing that the alleged combination or agreement produced adverse, anti-competitive effects within the relevant product and geographic markets. The plaintiff may satisfy this burden by proving the existence of actual anticompetitive effects, such as reduction of output, increase in price, or deterioration in quality of goods or services. Such proof is often impossible to make, however, due to the difficulty of isolating the market effects of challenged conduct. Accordingly, courts typically allow proof of the defendant's market power instead. Market power, the ability to raise prices above those that would prevail in a competitive market, is essentially a surrogate for detrimental effects. If a plaintiff meets his initial burden of adducing adequate evidence of market power or actual anti-competitive effects, the burden shifts to the defendant to show that the challenged conduct promotes a sufficiently pro-competitive objective. To rebut, the plaintiff must demonstrate that the restraint is not reasonably necessary to achieve the stated objective.

Counsel: Bruce E. Gerstein, Esq. [ARGUED], Kimberly Hennings, Esq., Joseph Opper, Esq., Garwin Gerstein & Fisher, New York, NY; Peter S. Pearlman, Esq., Cohn, Lifland, Pearlman, Herrmann & Knopf, Saddle Brook, NJ, for Appellants.

Judges: Before: AMBRO, SCIRICA, and ROTH, Circuit Judges.

Opinion by: SCIRICA

Opinion

[*392] OPINION OF THE COURT

SCIRICA, *Circuit Judge*.

In this appeal from the grant of a motion to dismiss for failure to state a rule-of-reason **[*393]** claim under *Sections 1* and *2* of the Sherman Act under *Federal Rule of Civil Procedure 12(b)(6)*, we are asked to determine whether *FTC v. Actavis, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*, covers, in addition to reverse **[**4]** cash payments, a settlement in which the patentee drug manufacturer agrees to relinquish its right to produce an "authorized generic" of the drug ("no-AG agreement") to compete with a first-filing generic's drug during the generic's statutorily guaranteed 180 days of market exclusivity under the Hatch-Waxman Act[1] as against the rest of the world.

HN1[] In *Actavis*, the Supreme Court held that unexplained large payments from the holder of a patent on a drug to an alleged infringer to settle litigation of the validity or infringement of the patent ("reverse payment") "can sometimes violate the antitrust laws." *Id. at 2227*. The Court rejected the near-irrebuttable presumption, known as the "scope of the patent" test, that a patentee can make such reverse payments so long as it is paying potential competitors not to challenge its patent within the patent's lifetime.

Plaintiffs here, direct purchasers of the brand-name drug Lamictal, sued Lamictal's producer, Smithkline Beecham Corporation, d/b/a GlaxoSmithKline ("GSK"), and Teva Pharmaceutical Industries Ltd. ("Teva"),[2] a manufacturer of generic Lamictal, **[**5]** for violation of Sections 1 and 2 of the Sherman Act, *15 U.S.C. §§ 1* & *2*.[3] In earlier litigation, Teva had challenged the validity and enforceability of GSK's patents on lamotrigine, Lamictal's active ingredient. Teva was also first to file an application with the FDA alleging patent invalidity or nonenforceability and seeking approval to produce generic lamotrigine tablets and chewable tablets for markets alleged to be annually worth $2 billion and $50 million, respectively. If the patent suit resulted in a judicial determination of invalidity or nonenforceability—or a settlement incorporating such terms—Teva would be statutorily entitled to a valuable 180-day period of market exclusivity, during which time only it and GSK could produce generic lamotrigine tablets. (The relevant statute permits the brand to produce an "authorized generic" during the exclusivity period. *Mylan Pharms., Inc. v. United States FDA, 454 F.3d 270, 276-77 (4th Cir. 2006)*; *Teva Pharm. Indus. Ltd. v. Crawford, 410 F.3d 51, 55, 366 U.S. App. D.C. 203 (D.C. Cir. 2005)*; *see also* *Sanofi-Aventis v. Apotex Inc., 659 F.3d 1171, 1175 (Fed. Cir. 2011)*.)

After the judge presiding over the patent litigation ruled the patent's main claim invalid, GSK and Teva settled. They **[*394]** agreed Teva would end its challenge to GSK's patent in exchange for early entry into the $50 million annual lamotrigine chewables market and GSK's commitment not to produce its own, "authorized generic" version of Lamictal tablets for the market alleged to be worth $2 billion annually. Plaintiffs contend that this "no-AG agreement" qualifies as a "reverse payment" under *Actavis* because, like the cash reverse payments the Court there warned could face antitrust scrutiny, GSK's no-AG commitment was designed to induce Teva to abandon the patent **[**7]** fight and thereby agree to eliminate the risk of competition in the $2 billion lamotrigine tablet market for longer than the patent's strength would otherwise permit.

---

[1] Hatch-Waxman is the short name for the Drug Price Competition and Patent Term Restoration Act of 1984, *Pub. L. No. 98-417, 98 Stat. 1585*.

[2] "Teva" refers collectively to Teva Pharmaceutical Industries Ltd. and its subsidiary Teva Pharmaceuticals USA, Inc.

[3] Plaintiffs bring their Sherman Act claims under Sections 4 (damages) and 16 (injunctive relief) of the Clayton Act, *15 U.S.C. §§ 15* & *26*, respectively. The Clayton Act requires "a plaintiff to have standing to bring an antitrust claim." *Angelico v. Lehigh Valley Hosp., Inc., 184 F.3d 268, 273 (3d Cir. 1999)*. At **[**6]** the motion-to-dismiss stage, "a plaintiff must allege more than that it has suffered an injury causally linked to a violation of the antitrust laws." *Pace Elecs., Inc. v. Canon Computer Sys., Inc., 213 F.3d 118, 120 (3d Cir. 2000)*. The plaintiff must also "allege antitrust injury, 'which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Id.* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*). As noted below, we do not here address the issue of antitrust injury, nor do we preclude consideration of the issue on remand. *See infra* notes 20 & 35 and accompanying text.

We believe this no-AG agreement falls under *Actavis's* rule because it may represent an unusual, unexplained reverse transfer of considerable value from the patentee to the alleged infringer and may therefore give rise to the inference that it is a payment to eliminate the risk of competition. As the Court noted, these kinds of settlements are subject to the rule of reason.

I.

"A patent . . . is an exception to the general rule against monopolies and to the right to access to a free and open market." *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)* (quoting *Precision Instrument Mfg. Co. v. Auto. Maint. Mach. Co., 324 U.S. 806, 816, 65 S. Ct. 993, 89 L. Ed. 1381, 1945 Dec. Comm'r Pat. 582 (1945))*. The Constitution's "*Patent Clause* itself reflects a balance between the need to encourage innovation and the avoidance of monopolies which stifle competition without any concomitant advance in the 'Progress of Science and useful Arts.'" *Bonito Boats, Inc. v. Thunder Craft Boats, Inc., 489 U.S. 141, 146, 109 S. Ct. 971, 103 L. Ed. 2d 118 (1989)* (quoting *U.S. Const. art. I., § 8, cl. 8*). In turn, "[f]rom their inception, the federal patent laws have embodied a careful balance between the need to promote innovation and the recognition that imitation and refinement through imitation are both necessary to invention itself and the very lifeblood of a competitive economy." *Id.;* ***[**8]*** *see* X Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1780a (3d ed. 2011) ("Patent law . . . serves the interests of consumers by protecting invention against prompt imitation in order to encourage more innovation than would otherwise occur."). A patent, consequently, "is a special privilege designed to serve the public purpose of promoting the 'Progress of Science and useful Arts.'" *Precision Instrument Mfg. Co., 324 U.S. at 816*.

With the Drug Price Competition and Patent Term Restoration Act of 1984, *Pub. L. No. 98-417, 98 Stat. 1585*, commonly known as the Hatch-Waxman Act, Congress attempted to balance the goal of "mak[ing] available more low cost generic drugs," H.R. Rep. No. 98-857, pt. 1, at 14-15 (1984), *reprinted in* 1984 U.S.C.C.A.N. 2647, 2647-48, with the value of patent monopolies in incentivizing beneficial pharmaceutical advancement, *see* H.R. Rep. No. 98-857, pt. 2, at 30 (1984), *reprinted in* 1984 U.S.C.C.A.N. 2686, 2714. The Act seeks to accomplish this purpose, in part, by encouraging "manufacturers of generic drugs . . . to challenge weak or invalid patents on brand name drugs so consumers can enjoy lower drug prices." S. Rep. No. 107-167, at 4 (2002). The resulting regulatory framework has the following four relevant features identified by the **[**9]** Supreme Court in *Actavis, 133 S. Ct. at 2227-29*.

First, a new drug—that is, a pioneer, "brand-name" drug—cannot be introduced **[*395]** until it is approved by the Food and Drug Administration ("FDA"). *21 U.S.C. § 355(a)*. A New Drug Application ("NDA") requires the applicant to submit, among other things, "full reports of investigations which have been made to show whether or not such drug is safe for use and whether such drug is effective in use," *id. § 355(b)(1)(A)*, as well as comprehensive information about the drug, *id. § 355(b)(1)*. This reporting requirement entails "a long, comprehensive, and costly testing process." *Actavis, 133 S. Ct. at 2228*.

Second, the Hatch-Waxman Act facilitates the development of generic drugs by allowing an applicant to file, for new drugs shown to be "bioequivalent" to a drug previously approved by the FDA, *21 U.S.C. § 355(j)(2)(A)(iv)*, a less onerous and less costly "Abbreviated New Drug Application" ("ANDA") in lieu of an NDA. *See id. § 355(j)*; *Actavis, 133 S. Ct. at 2228*. The ANDA process "allow[s] the generic to piggy-back on the pioneer's approval efforts . . . , thereby furthering drug competition." *Actavis, 133 S. Ct. at 2228* (citing *Caraco Pharm. Labs., Ltd. v. Novo Nordisk A/S, 132 S. Ct. 1670, 1676, 182 L. Ed. 2d 678 (2012))*.[4]

---

[4] "Rather than providing independent evidence of safety and efficacy, the typical ANDA shows that the generic drug has the same active ingredients as, and is biologically equivalent to, the brand-name drug." *Caraco, 132 S. Ct. at 1676*; *see* *21 U.S.C. § 355(j)* (ANDA **[**10]** requirements). Before Hatch-Waxman, a company desiring to produce a generic version of a drug approved after 1962 had to conduct its own testing and trials to show that its generic version was safe and effective for human use. H.R. Rep. No. 98-857, pt. 1, at 16-17.

Third, Hatch-Waxman "sets forth special procedures for identifying, and resolving, related patent disputes." *Id.* A new drug applicant must list information on any patents issued on the drug's composition or methods of use. *See* 21 U.S.C. § 355(b)(1); *Caraco, 132 S. Ct. at 1676*. If the FDA approves the new drug, it publishes this information, without verification, in its Orange Book.[5] *Caraco, 132 S. Ct. at 1676*. In turn, any manufacturer filing an ANDA to produce a generic version of that pioneer drug must consult the *Orange Book* and "assure the FDA that [the] proposed generic drug will not infringe the brand's patents." *Id.*[6] As relevant here, the manufacturer may tender that assurance with a "paragraph IV" certification that the relevant listed patents are "invalid or will not be infringed by the manufacture, use, or sale of the [generic] drug." 21 U.S.C. § 355(j)(2)(A)(vii)(IV). But "[f]iling a paragraph IV certification means provoking litigation," *Caraco, 132 S. Ct. at 1677*, because the patent statute treats paragraph IV certification as a per se act of infringement, *see* **[**11]** 35 U.S.C. § 271(e)(2)(A).[7] The patentee then has an incentive to sue within 45 days in order to trigger a 30-month stay of the FDA's potential **[*396]** approval of the generic "while the parties litigate patent validity (or infringement) in court. If the courts decide the matter within that period, the FDA follows that determination; if they do not, the FDA may go forward and give approval to market the generic product." *Actavis, 133 S. Ct. at 2228* (citing 21 U.S.C. § 355(j)(5)(B)(iii)).[8]

"Fourth, Hatch-Waxman provides a special incentive for a generic to be the first to file an Abbreviated New Drug Application taking the paragraph IV route." *Id. at 2228-29*. From when it first begins marketing its drug or when a court enters judgment finding the challenged patent invalid or unenforceable, the first-filing generic enjoys a 180-day period of exclusivity during which no other generic manufacturer can enter the market. *See* 21 U.S.C. § 355(j)(5)(B)(iii), (iv).[9] This exclusivity period belongs to first-filing ANDA applicants[10] alone and is nontransferable. *See id.* § 355(j)(5)(D); *Actavis, 133 S. Ct. at 2229*. The period does not, however, prevent the brand-patentee from marketing its own "authorized generic." *Mylan Pharms., 454 F.3d at 276-77*; *Teva Pharm. Indus., 410 F.3d at 55*; *see also* Sanofi-Aventis, 659 F.3d at 1175.

---

[5] The volume, officially known as *Approved Drug Products with Therapeutic Equivalence Evaluations*, is available at http://www.fda.gov/cder/ob/ . *See generally, e.g.*, 21 U.S.C. § 355(b)(1) ("Upon approval of the application, the Secretary shall publish information submitted . . . ."); *Caraco, 132 S. Ct. at 1676*.

[6] Although the FDA performs no independent patent review, it cannot approve an ANDA if the proposed generic would infringe any of the brand's asserted patents. *See Caraco, 132 S. Ct. at 1676*.

[7] Further, an ANDA applicant making a paragraph IV certification must notify any patent holder within twenty days of the FDA's confirmation of its ANDA filing, 21 U.S.C. § 355(j)(2)(B)(ii), (iii), "of the factual and legal basis of [its] opinion . . . that the patent is invalid or will not be infringed," *id.* § 355(j)(2)(B)(iv)(II). *See also* 21 C.F.R. § 314.52 ("Notice of certification of invalidity or noninfringement of a patent").

[8] Hatch-Waxman "allows competitors, prior to the expiration of a patent, to engage in otherwise infringing activities necessary to obtain regulatory approval." *Eli Lilly & Co. v. Medtronic, Inc., 496 U.S. 661, 671, 110 S. Ct. 2683, 110 L. Ed. 2d 605 (1990)*; *see* 35 U.S.C. § 271(e)(1). As long as a generic applicant does not launch its generic "at risk" (i.e., after FDA approval after 30 months but before a determination of patent validity), it will not be forced to pay money damages. *See* 35 U.S.C. § 271(e)(4)(C). This feature also explains "the creation of a highly artificial act **[**12]** of infringement"—the paragraph IV certification—to permit the brand and generic to litigate patent validity. *Eli Lilly, 496 U.S. at 678*.

[9] Under current law, the specific mechanism is that an application by a non-first filer "shall be made effective on the date that is 180 days after the date of the first commercial marketing of the drug . . . by any first applicant." 21 U.S.C. § 355(j)(5)(B)(iv)(I). But the parties appear to agree that because the Medicare Prescription Drug, Improvement, and Modernization Act of 2003, ***Pub. L. No. 108-173, § 1102(b)(1)***, amended Hatch-Waxman's exclusivity provisions only for subsequent ANDAs, the exclusivity **[**13]** rules in place in 2002 control. *See* Teva Br. 8 & n.1. Under those rules, the 180-day period begins from the earlier of a generic's launching "at risk" or a court's finding the patent invalid or unenforceable. *See* 21 U.S.C. § 355(j)(5)(B)(iv) (2002).

[10] "[A]ccording to the Food and Drug Administration, all manufacturers who file on the first day are considered 'first applicants' who share the exclusivity period. Thus, if ten generics file an application to market a generic drug on the first day, all will be considered 'first applicants.'" *Actavis, 133 S. Ct. at 2246* (Roberts, C.J., dissenting) (citing 21 U.S.C. § 355(j)(5)(B)(iv)(II)(bb)).

II.

A.[11]

Plaintiffs, a putative class represented by King Drug Company of Florence, Inc., and Louisiana Wholesale Drug Co., Inc., are direct purchasers of Lamictal from Defendant GSK. GSK pioneered Lamictal, a brand-name drug used to treat epilepsy and bipolar disorder, and secured U.S. Patent No. 4,602,017 ("the '017 patent") on lamotrigine, Lamictal's active ingredient. The patent expired on July 22, 2008. GSK sells both Lamictal tablets and Lamictal chewable tablets, although most Lamictal prescriptions **[**14]** are for the nonchewable tablets **[*397]** (most relevant here). Lamictal tablet sales exceeded $2 billion between March 2007 and 2008, while chewable sales measured about $50 million over a yearlong span around 2005.

In April 2002, Defendant Teva filed the first paragraph IV ANDAs to market generic lamotrigine tablets and chewables. Teva certified that its proposed generics did not infringe the '017 patent and/or that the '017 patent was unenforceable. GSK soon sued in federal court, *see* Complaint, *Smithkline Beecham Corp. v. Teva Pharm. USA, Inc.*, No. 02-3779 (D.N.J. Aug. 5, 2002) (ECF No. 1), staying the FDA's approval of Teva's ANDAs for 30 months. In late January 2005, the parties tried the patent case before Judge Bissell, who ruled that the patent's main claim, for the invention of lamotrigine, was invalid. Plaintiffs allege that "it was highly likely that Teva would prevail with respect to the remaining patent claims," which "were extremely weak in view of Judge Bissell's ruling that claim 1 was invalid."

In February 2005, the parties settled their dispute before Judge Bissell could rule on the validity of the '017 patent's remaining claims. GSK agreed to allow Teva to market generic lamotrigine chewables by no later than **[**15]** June 1, 2005, or 37 months before the patent was to expire on July 22, 2008.[12] GSK further agreed to permit Teva to sell generic lamotrigine tablets on July 21, 2008, if GSK received a "pediatric exclusivity" extension,[13] or March 1, 2008, if GSK did not. (With a pediatric exclusivity extension, the patent would still have expired on July 22, 2008, but the FDA would have been foreclosed from approving ANDAs filed by competing generics until January 22, 2009. *See generally* AstraZeneca AB v. Apotex Corp., 782 F.3d 1324, 1341, 1343 (Fed. Cir. 2015).)

Most relevant here, GSK also agreed not to market an authorized generic until January 2009, after Teva's 180-day market exclusivity period was to expire (the "no-AG agreement" component of the settlement). In fact, plaintiffs allege, Teva "had an interest in delaying a final court decision finding the '017 patent invalid" because the FDA had not yet approved Teva's ANDAs, and Teva **[**16]** therefore wanted time to secure FDA approval so it could "take advantage of its valuable 180-day period," which would have begun to run with a final judgment finding the patent invalid or noninfringed.

In exchange, Teva agreed to drop its litigation challenging GSK's patent and, plaintiffs allege, delay its entry into the lamotrigine tablet market. If not for the consideration it received, plaintiffs allege, Teva would have launched its generic lamotrigine tablet "at risk" after receiving FDA approval (which occurred later, in August 2006), even if Judge Bissell had not yet ruled the patent invalid (as, they allege, he was likely to do). Indeed, Teva was later to assert, in other litigation against GSK, that GSK's no-AG agreement was "an important component of the settlement between the parties and formed part of the inducement to Teva to relinquish the rights and defenses it was

[11] The facts recounted in this opinion are taken from the well-pleaded, nonconclusory factual allegations in plaintiffs' Amended Complaint and all reasonable inferences to be drawn therefrom. *See* Ashcroft v. Iqbal, 556 U.S. 662, 678-79, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009).

[12] Because Teva's ANDAs had not yet been approved, GSK also agreed to supply Teva with lamotrigine chewables.

[13] *See generally* 21 U.S.C. § 355a(c)(2)(B) (2002) (then in effect) (providing for situations in which the FDA may not approve ANDAs for an additional six months if the patent holder completes certain studies "relating to the use of [the] drug in the pediatric population").

asserting against GSK in the Patent Litigation." JA 76 (alteration and emphases omitted).[14] **[*398]** Judge Bissell approved the parties' settlement and dismissed the case on April 4, 2005.

B.

Plaintiffs here, direct purchasers of Lamictal from GSK, sued GSK and Teva in federal court in February 2012 and filed their Consolidated Amended Class Action Complaint the following June. They allege that defendants, by their no-AG agreement—in effect, a "reverse payment" from GSK to Teva—violated *section 1* of the Sherman Act by conspiring to delay generic competition for Lamictal tablets and *section 2* by conspiring to monopolize the lamotrigine tablet market. GSK and Teva moved to dismiss, countering that, under our decision in *In re K-Dur Antitrust Litigation, 686 F.3d 197 (3d Cir. 2012)*,[15] only cash payments constitute actionable "reverse payments."

In *K-Dur*, we charted a course different from that set by several other courts of appeals by rejecting the "scope of the patent" test, under which "a reverse payment settlement is immune from antitrust attack so long as its anticompetitive effects fall within the scope of the exclusionary potential of the patent," *Actavis, 133 S. Ct. at 2230* (citation omitted). We reasoned that the scope-of-the-patent test "is contrary to the policies underlying the Hatch-Waxman Act and a long line of Supreme Court precedent on patent litigation and competition." *K-Dur, 686 F.3d at 214*. Patents, we noted, are simply legal conclusions of the Patent Office. They should not be irrebuttably presumed valid, we said, especially given "the public interest support[ing] judicial testing and elimination of weak patents," *id. at 215-16*, and "[t]he line that Congress drew [in Hatch-Waxman specifically] between the[] competing objectives" of promoting innovation and advancing the public interest, *id. at 217*. For these reasons, we held that rule of reason scrutiny is proper for reverse payment settlements. *Id. at 218*.[16]

The District Court here focused on our limitation of *KDur* to the pharmaceutical context, **[**19]** *see id. at 216-18*, and statements approving "settlements based on a negotiated entry date for marketing of the generic drug," *id. at 217-18*, to restrict *K-Dur*'s reach to "settlements when a generic manufacturer is paid off with money, which is not the case here," *In re Lamictal Direct Purchaser Antitrust Litig., No. 12-0995, 2012 U.S. Dist. LEXIS 183627, 2012 WL 6725580, at *6 (D.N.J. Dec. 6, 2012)*. The court observed that Teva surely "received consideration," or otherwise would have had "no incentive to settle," but it viewed the parties' settlement as "based on negotiated entry dates" rather than money. *Id.* Concluding the settlement **[*399]** was "not subject to antitrust scrutiny" under *K-Dur, id.*, and that, "from a policy perspective, this settlement did introduce generic products onto the market sooner than what would have occurred had GSK's patent not been challenged," *2012 U.S. Dist. LEXIS 183627, [WL] at *7*, the court granted the defendants' motion to dismiss for failure to state a claim.

Plaintiffs appealed and we stayed proceedings pending the Supreme Court's decision in *Actavis*. After the Court's decision, we remanded for further consideration in light of *Actavis*. In January 2014, the District Court "affirm[ed] its

---

[14] In July 2008, "[j]ust prior to Teva launching its generic, GSK approached various pharmacies, group purchasing organizations, and long-term **[**17]** care facilities and proposed that they purchase and distribute GSK's Lamictal at a generic product price." *Teva Pharm. Indus. v. SmithKline Beecham Corp., No. 08-3706, 2009 U.S. Dist. LEXIS 50499, 2009 WL 1687457, at *2 (D.N.J. June 16, 2009)*. Teva sued GSK to attempt to prevent GSK from "develop[ing] a generic of lamotrigine" because the parties' settlement agreement "made clear that [Teva's] right [to sell generic lamotrigine] was exclusive—including as to GSK and its affiliates." *2009 U.S. Dist. LEXIS 50499, [WL] at *1, *4*.

[15] The Supreme Court later vacated *K-Dur* and remanded for reconsideration in light of *Actavis, see* ***Merck & Co. v. La. Wholesale Drug Co., 133 S. Ct. 2849, 186 L. Ed. 2d 904 (2013)***; ***Upsher-Smith Labs., Inc. v. La. Wholesale Drug Co., 133 S. Ct. 2849, 186 L. Ed. 2d 904 (2013)***. *K-Dur* was inconsistent with *Actavis* in that we had directed application of "quick look rule of reason analysis," *K-Dur, 686 F.3d at 218*, rather than the traditional, full-fledged rule of reason standard that the Supreme **[**18]** Court subsequently decided is proper for reverse payment settlement agreements, *see Actavis, 133 S. Ct. at 2237-38*.

[16] *See supra* note 15.

order of dismissal." *In re Lamictal Direct Purchaser Antitrust Litig., 18 F. Supp. 3d 560, 561 (D.N.J. 2014)*. Although conceding that "there is some very broad language in the [*Actavis]* opinion regarding patent settlements of all kinds," *id. at 566*, the court read ***[**20]*** *Actavis*, as it had *K-Dur* before, as requiring antitrust scrutiny only of reverse payment patent settlements that "involve an exchange of money" rather than some other type of valuable consideration, *id. at 568*. In the alternative, the court stated, it "considered the settlement under the 'five considerations'" of *Actavis*'s rule of reason and concluded that the settlement "would survive." *Id. at 570*.

III.[17]

Plaintiffs contend that under *Actavis* antitrust scrutiny is not limited to reverse payments of cash. They assert the antitrust laws may be violated when a brand-name drug manufacturer induces a would-be generic competitor to delay market entry by agreeing not to launch an authorized generic to compete with the generic. Further, they argue, the District Court usurped the jury's role in purporting to conduct a rule of reason analysis by applying the five considerations the *Actavis* Court discussed to justify, not redefine, use of the already well-established rule of reason analysis. We will vacate and remand.

[21] A**.

As noted, in *Actavis*, the Supreme Court rejected the "scope of the patent" test, a categorical rule that reverse payment patent settlements in the Hatch-Waxman context were immune from antitrust scrutiny so long as the asserted anticompetitive effects fell within the scope of the patent. The Court held that "reverse payment settlements . . . can sometimes violate the antitrust laws," *Actavis, 133 S. Ct. at 2227*, because "[a]n unexplained large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival," thereby "suggest[ing] that the payment's objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market," *id. at 2236*. Consequently, the Court held, plaintiffs should be able to prove "[t]he existence and degree of any anticompetitive consequence" of such an agreement under the traditional rule-of-reason test. *Id. at 2237*.

Justice Breyer framed the issue of reverse payments then before the Court as follows:

> Company A sues Company B for patent infringement. The two companies settle under terms that require (1) Company **[*400]** B, the claimed infringer, not to produce the patented product until the patent's term **[**22]** expires, and (2) Company A, the patentee, to pay B many millions of dollars. Because the settlement requires the patentee to pay the alleged infringer, rather than the other way around, this kind of settlement agreement is often called a "reverse payment" settlement agreement. And the basic question here is whether such an agreement can sometimes unreasonably diminish competition in violation of the antitrust laws. See, *e.g.*, *15 U.S.C. § 1* (Sherman Act prohibition of "restraint[s] of trade or commerce"). Cf. *Palmer v. BRG of Ga., Inc., 498 U.S. 46, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)* (*per curiam)* (invalidating agreement not to compete).

Actavis, 133 S. Ct. at 2227.

The Court of Appeals for the Eleventh Circuit had applied its scope-of-the-patent test to the following facts. *See id. at 2227*; *FTC v. Watson Pharms., Inc., 677 F.3d 1298 (11th Cir. 2012)*, *rev'd sub nom.* *Actavis, 133 S. Ct. 2223, 186 L. Ed. 2d 343*. Solvay Pharmaceuticals developed a brand-name drug called AndroGel in 1999 and obtained a relevant patent in 2003. Later in 2003, three would-be generic AndroGel manufacturers, Actavis first (soon followed by Paddock Laboratories and Par Pharmaceutical), filed ANDAs with paragraph IV certifications. Solvay sued. Thirty months into the litigation, the FDA approved Actavis's first-filed ANDA. *Actavis, 133 S. Ct. at 2229*.

---

[17] The District Court had jurisdiction under section 4(a) of the Clayton Act, *15 U.S.C. § 15(a)*, and *28 U.S.C. §§ 1331* and *1337*. We have jurisdiction under *28 U.S.C. § 1291*. ***HN2***[] We exercise plenary review over a district court's ruling on a *Federal Rule of Civil Procedure 12(b)(6)* motion to dismiss. *E.g., Byers v. Intuit, Inc., 600 F.3d 286, 291 (3d Cir. 2010)*.

The parties settled in 2006. Under the terms of the settlement,

> Actavis agreed that it would not bring its generic to market **[**23]** until August 31, 2015, 65 months before Solvay's patent expired (unless someone else marketed a generic sooner). Actavis also agreed to promote AndroGel to urologists. The other generic manufacturers made roughly similar promises. And Solvay agreed to pay millions of dollars to each generic—$12 million in total to Paddock; $60 million in total to Par; and an estimated $19-$30 million annually, for nine years, to Actavis. The companies described these payments as compensation for other services the generics promised to perform, but the FTC contends the other services had little value.

Id. (citations omitted).

The FTC sued the settling manufacturers for violating the antitrust laws by agreeing to share Solvay's monopoly profits. *Id. at 2229-30*. The FTC contended Solvay's reverse payments to the generic manufacturers were compensation for the generics' agreements not to compete with AndroGel. *Id. at 2229*. The Court of Appeals for the Eleventh Circuit disagreed, and affirmed the dismissal of the FTC's complaint, on the ground "that, absent sham litigation or fraud in obtaining the patent, a reverse payment settlement is immune from antitrust attack so long as its anticompetitive effects fall within the scope **[**24]** of the exclusionary potential of the patent." *Watson Pharms., 677 F.3d at 1312*. In its view, "patent holder[s] had a lawful right to exclude others from the market." *Id. at 1307* (internal quotation marks omitted). Even though a patent might be found invalid if litigated, the court thought "the FTC's approach would put that burden back on the parties and the court, undo much of the benefit of settling patent litigation, and discourage settlements," in derogation of the important public policy interests served by settlement. *Id. at 1313-14*.

The Supreme Court disagreed. It began with the premise that an asserted patent "may or may not be valid, and may or may not be infringed." *Actavis, 133 S. Ct. at 2231*. Although a valid patent gives its holder the right to "'exclude[] all . . . **[*401]** from the use of the protected process or product'" and charge prices of its choosing, including supracompetitive prices, "an *invalidated* patent carries with it no such right. And even a valid patent confers no right to exclude products or processes that do not actually infringe." *Id.* (emphasis in original) (quoting *United States v. Line Material Co., 333 U.S. 287, 308, 68 S. Ct. 550, 92 L. Ed. 701 (1948))*. And from the time of their paragraph IV certification, the generics in *Actavis* had challenged both the validity and the scope of the AndroGel patent. *Id.* The Court observed that, as **[**25]** alleged by the FTC, Solvay had "agreed to pay the [generics] many millions of dollars to stay out of its market, even though the [generics] did not have any claim that [Solvay] was liable to them for damages." *Id.* The Court was concerned that this "unusual" "form of settlement" could "have significant adverse effects on competition" and thought, accordingly, "that patent and antitrust policies are both relevant in determining the 'scope of the patent monopoly'—and consequently ***antitrust law*** immunity—that is conferred by a patent." *Id.*

The Court cited several of its earlier cases for this proposition that courts must balance "the lawful restraint on trade of the patent monopoly and the illegal restraint prohibited broadly by the Sherman Act." *Id.* (quoting *Line Material, 333 U.S. at 310*); *see also United States v. United States Gypsum Co., 333 U.S. 364, 390-91, 68 S. Ct. 525, 92 L. Ed. 746 (1948)*. The antitrust question, it reasoned, must be answered "by considering traditional antitrust factors such as likely anticompetitive effects, redeeming virtues, market power, and potentially offsetting legal considerations present in the circumstances, such as here those related to patents." *Actavis, 133 S. Ct. at 2231*. Only then can a court conclude "[w]hether a particular restraint lies 'beyond the limits of the patent monopoly.'" *Id. at 2231-32* (quoting *id. at 2241-42* (Roberts, **[**26]** C.J., dissenting)). By contrast, Chief Justice Roberts, joined in dissent by Justices Scalia and Thomas, would have held that "the scope of the patent—*i.e.*, the rights conferred by the patent—forms the zone within which the patent holder may operate without facing antitrust liability." *Id. at 2238* (Roberts, C.J., dissenting). In the dissenters' view, "a patent holder acting within the scope of its patent does not engage in any unlawful anticompetitive behavior; it is simply exercising the monopoly rights granted to it by the Government." *Id. at 2240*. And, they maintained, the patent's scope "should be determined by reference to *patent law." Id.* (emphasis in original).

As noted, the Court explained that its "precedents make clear that patent-related settlement agreements can sometimes violate the antitrust laws." *Id. at 2232* (majority opinion) (citing *United States v. Singer Mfg. Co., 374 U.S. 174, 83 S. Ct. 1773, 10 L. Ed. 2d 823, 1963 Dec. Comm'r Pat. 547 (1963)*; *Line Material, 333 U.S. at 310-11*; *United States v. New Wrinkle, Inc., 342 U.S. 371, 378-80, 72 S. Ct. 350, 96 L. Ed. 417, 1952 Dec. Comm'r Pat. 411 (1952))*. The Court viewed these prior cases as "seek[ing] to accommodate patent and antitrust policies, finding challenged terms and conditions unlawful unless patent law policy offsets the ***antitrust law*** policy strongly favoring competition," notwithstanding the possible validity or infringement of the patent in question. *Id. at 2233*; *see id. at 2244* (Roberts, C.J., dissenting) ("The majority **[**27]** seems to think that *even if* the patent is valid, a patent holder violates the antitrust laws merely because the settlement took away some chance that his patent would be declared invalid by a court." (emphasis in original)). Rejecting the dissent's view "that a patent holder may simply 'pa[y] a competitor to respect its patent' and quit its patent invalidity **[*402]** or noninfringement claim without any antitrust scrutiny whatever," *id. at 2233* (majority opinion) (alteration in original) (quoting *id. at 2239* (Roberts, C.J., dissenting)), the Court reasoned that "[t]he dissent does not identify any patent statute that it understands to grant such a right to a patentee, whether expressly or by fair implication," *id.* Such a right, the Court thought, "would be difficult to reconcile . . . with the patent-related policy of eliminating unwarranted patent grants so the public will not 'continually be required to pay tribute to would-be monopolists without need or justification.'" *Id.* (quoting *Lear, Inc. v. Adkins, 395 U.S. 653, 670, 89 S. Ct. 1902, 23 L. Ed. 2d 610 (1969))*.[18]

The Court further explained that its holding should not be read to subject to antitrust scrutiny "commonplace forms" of settlement, such as tender by an infringer of less than the patentee's full demand. *See id.* But reverse payments, it said, are not such "familiar settlement forms." *Id.* In a reverse payment settlement, the patentee "pays money . . . purely so [the alleged infringer] will give up the patent fight." *Id.* These payments are said to flow in "reverse" because "a party with no claim for damages (something that is usually true of a paragraph IV **[**29]** litigation defendant) walks away with money simply so it will stay away from the patentee's market. That," the Court thought, "is something quite different," and something that falls outside accepted "traditional examples" of settlement. *Id.*

Notwithstanding the potential concern "that antitrust scrutiny of a reverse payment agreement would require the parties to litigate the validity of the patent in order to demonstrate what would have happened to competition in the absence of the settlement," the Court identified "five sets of considerations" militating in favor of permitting antitrust scrutiny. *Id. at 2234*. First, the Court saw in reverse payments the "potential for genuine adverse effects on competition." *Id.* (quoting *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 460-61, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986))*. The inference may be drawn from a reverse payment that the patent holder is paying the alleged infringer to defend "a right it already claims but would lose if the patent litigation were to continue and the patent were held invalid or not infringed by the generic product." *Id.* Even though other settlement terms might allow a generic challenger to enter the market prior to patent expiration, and thus permit some competition benefiting consumers, a reverse payment inducing **[**30]** delay—i.e., a "payment in return for staying out of the market—simply keeps prices at patentee-set [supracompetitive] levels . . . while dividing that return between the challenged patentee and the patent challenger." *Id. at 2234-35*.

Second, the Court thought "these anticompetitive consequences will at least sometimes prove unjustified." *Id. at 2235-36*. Although a payment may be justified **[*403]** if, for example, it approximates litigation expenses saved by the settlement or is true "compensation for other services that the generic has promised to perform," it may not be justified when used "to prevent the risk of competition" by eliminating "the risk of patent invalidation or a finding of noninfringement." *Id. at 2236*; *see also, e.g., id.* (noting that the antitrust harm occurs when "the payment's

[18] Unlike the majority, the dissenters read the Court's precedents to stand for the proposition that a patentee's actions are subject to antitrust scrutiny only when they "go beyond the monopoly powers conferred by the patent," with just **[**28]** two exceptions—settlement of sham litigation and litigation involving patents obtained by fraud on the Patent and Trademark Office. *Actavis, 133 S. Ct. at 2239* (Roberts, C.J., dissenting); *see also id. at 2241-42*. No case cited by the majority, they said, subjected a patent settlement "to antitrust scrutiny merely because the validity of the patent was uncertain," and no reference to "a 'general procompetitive thrust'" of the Hatch-Waxman Act should be interpreted "to unsettle the established relationship between patent and ***antitrust law***," especially when "Congress has repeatedly declined to enact legislation addressing the issue." *Id. at 2242* (quoting *id. at 2234* (majority opinion)).

objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market—the very anticompetitive consequence that underlies the claim of antitrust unlawfulness"). At the same time, the Court did not rule out other justifications.

Third, the Court reasoned, in reverse payment situations "the patentee likely possesses the power to bring" about **[**31]** this anticompetitive harm. *Id.* Not only does a patent protect such market power, but the size of a reverse payment may serve as a proxy for this power because a firm without such power (and the supracompetitive profits that power enables) is unlikely to buy off potential competitors. *Id.*

Fourth, "the size of the unexplained reverse payment can provide a workable surrogate for a patent's weakness, all without forcing a court to conduct a detailed exploration of the validity of the patent itself." *Id. at 2236-37*. Instead, the anticompetitive harm from such a payment appears not to be that the patentee is reaping supracompetitive monopoly profits from a decidedly invalid or noninfringed patent, but rather that there is a risk that the patent-enabled monopoly is unwarranted, and foreclosing such a challenge harms consumers. *See id. at 2236* ("[T]he payment (if otherwise unexplained) likely seeks to prevent the risk of competition. And, as we have said, that consequence constitutes the relevant anticompetitive harm.").[19]

Fifth, parties may still find other ways to settle, such as "by allowing the generic manufacturer to enter the patentee's market prior to the patent's expiration, without the patentee paying the challenger to stay out prior to that point." *Id. at 2237*. The Court emphasized, however, that "[i]f the basic reason [for the reverse payment] is a desire to maintain and to share patent-generated monopoly profits, then, in the absence of some other justification, the antitrust laws are likely to forbid the arrangement." *Id.*

The Court concluded that, because of the fact-specific nature and the complexity of reverse payment agreements, courts should apply the traditional rule-of-reason analysis. *See id. at 2237-38*.

B.

HN3[] We do not believe *Actavis's* holding can be limited to reverse payments of cash. For the following reasons, we think that a no-AG agreement, when it represents an unexplained large transfer of value from the patent holder to the alleged infringer, may be subject to antitrust scrutiny under the rule of reason. We find the allegations here sufficient to state such a claim under the Sherman Act.[20]

1.

HN4[] In the *Actavis* Court's view, reverse payments are problematic because of **[*404]** their potential to negatively impact consumer welfare by preventing the risk of competition, which arises from expected litigation outcomes. *See Actavis, 133 S. Ct. at 2236*. The Court's reasoning was not that reverse payments per se violate the antitrust laws, or are per se anticompetitive. To the contrary, the Court declined to "abandon[] . . . the 'rule of reason' in favor of presumptive rules (or a 'quick-look' approach)," which are "appropriate only where an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets." *Id. at 2237* (internal quotation marks omitted). Instead, the Court focused on whether a reverse payment could have an anticompetitive effect or, alternatively, whether it was reasonable compensation for litigation costs or the value of services. In other words, the Court reasoned that "even a small risk of invalidity" may not justify a "large payment" (presumably enabled by "patent-generated monopoly

[19] *See also, e.g., Actavis, 133 S. Ct. at 2244* (Roberts, C.J., dissenting) ("The majority seems to think that *even if* the patent is valid, a patent holder violates the antitrust laws merely because the settlement took away some **[**32]** chance that his patent would be declared invalid by a court." (emphasis in original)).

[20] *See supra* note 3; *infra* note **[**33]** 35.

profits") that "likely seeks to prevent the risk of competition." *Id. at 2236*. And, the Court reiterated, it is the prevention **[**34]** of that risk of competition—eliminating "the risk of patent invalidation or a finding of noninfringement" by "paying the challenger to stay out" of the market (for longer than the patent's strength would otherwise allow)—that "constitutes the relevant anticompetitive harm," which must then be analyzed under the rule of reason. *Id. at 2236-37*.

It seems to us that no-AG agreements are likely to present the same types of problems as reverse payments of cash. The no-AG agreement here may be of great monetary value to Teva as the first-filing generic. In *Actavis*, the Supreme Court recognized generally that the 180-day exclusivity period is "possibly 'worth several hundred million dollars,'" and may be where the bulk of the first-filer's profits lie. *Id. at 2229* (quoting C. Scott Hemphill, *Paying for Delay: Pharmaceutical Patent Settlement as a Regulatory Design Problem*, *81 N.Y.U. L. Rev. 1553, 1579 (2006)*).[21] There are also plausible indicia that this pattern held true here: The Amici States point out that "[p]ublic records show that generic sales of Lamictal in 2008 were some 671 million dollars," so the no-AG agreement "was clearly worth millions of dollars, if not hundreds of millions of dollars[,] to the generic." Amici States' Br. 16. And the FTC **[**35]** suggests, using sales of the drug Paxil as a yardstick, that GSK's no-AG agreement would have been worth hundreds of millions of dollars to Teva. Appellants' Br. 24.[22]

[*405] At the same time, a brand's commitment not to produce an authorized generic means that it must give up the valuable right to capture profits in the new two-tiered market. The no-AG agreement transfers the profits the patentee would have made from its authorized generic to the settling generic—plus potentially more, in the form of higher prices, because there will now be a generic monopoly instead of a generic duopoly. Thus, "the source of the benefit to the claimed infringer is something costly to the patentee." Aaron Edlin et al., *Activating* Actavis, Antitrust, Fall 2013, at 16, 22 n.22. Absent a no-AG promise, launching an authorized generic would seem to be economically rational for the brand. For this reason, the fact that the brand promises not to launch an authorized generic (thereby giving up considerable value to the settling generic) makes the settlement something more than just an agreed-upon early entry: it "may instead provide strong evidence that the patentee seeks to induce **[**37]** the generic challenger to abandon its claim with a share of its monopoly profits that would otherwise be lost in the competitive market." *Actavis, 133 S. Ct. at 2235*.

The anticompetitive consequences of this pay-for-delay may be as harmful as those resulting from reverse payments of cash. If the brand uses a no-AG agreement to induce the generic to abandon the patent fight, the chance of dissolving a questionable patent vanishes (and along with it, the prospects of a more competitive market). As with a reverse payment of cash, a brand agreeing not to produce an authorized generic may thereby have "avoid[ed] the risk of patent invalidation or a finding of noninfringement." *Id. at 2236*. In addition, when the parties' settlement includes a no-AG agreement, the generic also presumably agrees to an early entry date that is

---

[21] In addition, a comprehensive FTC study suggests that having to compete with an authorized generic will likely both cut the generic's sales and force down its price: "the presence of authorized generic competition reduces the first-filer generic's revenues by 40 to 52 percent, on average." FTC, *Authorized Generic Drugs: Short-Term Effects and Long-Term Impact* iii (2011), *available at* *http://www.ftc.gov/os/2011/08/2011genericdrugreport.pdf* ; *see* FTC Amicus Br. 8 ("Prices fall further when additional generic competitors enter . . . ." (citing FTC, *Pay-for-Delay: How Drug Company Pay-Offs Cost Consumers Billions* 8 (2010), *available at* *http://www.ftc.gov/os/2010/01/100112payfordelayrpt.pdf);* FTC Amicus Br. 12 ("[G]eneric wholesale prices average 70 percent of the pre-entry brand-name drug price when the firstfiler faces an AG, compared to 80 percent of the brand price when it does not." (citing FTC, *Authorized Generic Drugs*, *supra*, at iii)).

[22] "The U.S. sales of Paxil were roughly equivalent to those of Lamictal in the year before each product faced generic competition ($2.3 billion and $2.2 billion, respectively)." Appellants' Br. 24 (quoting FTC Br. as *Amicus Curiae* at 8, *Lamictal, 18 F. Supp. 3d. 560* **[**36]** (ECF No. 89-3)). The magnitude of these figures is proportionate to the estimated $2.6 billion average cost of developing a new brand-name drug. *See* Tufts Ctr. for the Study of Drug Dev., *Briefing: Cost of Developing a New Drug* (Nov. 18, 2014), *available at* *http://csdd.tufts.edu/files/uploads/Tufts_CSDD_briefing_on_RD_cost_study_-_Nov_18,_2014..pdf* .

later than it would have otherwise accepted.[23] And during this time, the brand's monopoly remains in force. Once the generic enters, moreover, it faces no competition with other generics at all.

HN5[] ***Antitrust law*** is designed to protect consumers from arrangements that prevent competition in the marketplace. *See, e.g., Actavis, 133 S. Ct. at 2234-35*; *id. at 2238* (Roberts, C.J., dissenting); *accord* XII Areeda & Hovenkamp, *supra*, ¶ 2046c (2014 Supp.). The District Court here held that "the Supreme Court considered a reverse payment to involve an exchange of money" because "when the Supreme Court said 'payment' it meant a payment of money." *Lamictal, 18 F. Supp. 3d at 568*. But, we think, a no-AG agreement could likewise "prevent the risk of competition." *Actavis, 133 S. Ct. at 2236*; *cf.* XII Areeda & Hovenkamp, *supra*, ¶ 2046c1 (2014 Supp.) (explaining that under a "pay-for-delay settlement . . . consumer welfare remains the same as it would be under continued monopoly production by a single firm"); FTC Amicus Br. 22 ("It is not the transfer of cash or the form of reverse payment that triggers antitrust concern; it is the impact of that payment on consumer welfare."). We do not believe the Court **[*406]** intended to draw such a formal line.[24] Nor did the *Actavis* Court limit its reasoning or holding to cash **[**39]** payments only.[25]

2.

Defendants contend that no-AG agreements are distinguishable from reverse payments because they are in essence "exclusive licenses" and patent law expressly contemplates exclusive licenses.[26] They argue the *Actavis* Court rejected **[**40]** the dissent's arguments in part because the dissent could "not identify any patent statute that it understands to grant such a right to a patentee, whether expressly or by fair implication." *Actavis, 133 S. Ct. at 2233*; *see* GSK Br. 22-23, 34; Teva Br. 22-26. They suggest that if "the patent statute specifically gives a right to restrain competition in the manner challenged," *Actavis, 133 S. Ct. at 2231* (internal quotation marks omitted), such conduct is immune from antitrust scrutiny. *See* GSK Br. 22-23; Teva Br. 22-26, 34. In short, defendants argue GSK's concession not to produce an authorized generic during Teva's 180-day exclusivity period is an "exclusive license" exempt from antitrust scrutiny.

But the "right" defendants seek is not in fact a patentee's right to grant licenses, exclusive or otherwise.[27] **[*407]** Instead, it is a right to use valuable licensing in such a way as to induce a patent challenger's delay. The *Actavis*

---

[23] When parties compromise on an early-entry date alone—rather than an early-entry date plus valuable consideration—it is possible that they may compromise on an early-entry date reflecting their assessment of the strength of **[**38]** the patent. The concern with combining an early-entry date with the valuable consideration of a no-AG agreement is that the generic manufacturer may be willing to accept a later early-entry date without any corresponding benefit to consumers.

[24] *Cf., e.g., Cont'l T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 58-59, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)* ("[D]eparture from the rule-of-reason standard must be based upon demonstrable economic effect rather than . . . upon formalistic line drawing."); *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 189 (3d Cir. 2005)* ("The Supreme Court on more than one occasion has emphasized that economic realities rather than a formalistic approach must govern review of antitrust activity." (citing *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 466-67, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992))*); Michael A. Carrier, *Payment After* Actavis, *100 Iowa L. Rev. 7, 41-44 (2014)*.

[25] The dissent recognized the majority's reasoning could reach noncash transactions. *See Actavis, 133 S. Ct. at 2239* (Roberts, C.J., dissenting) ("As in any settlement, Solvay gave its competitors something of value (money) and, in exchange, its competitors gave it something of value (dropping their legal claims)."); *id. at 2245* ("[The majority's] logic . . . cannot possibly be limited to reverse-payment agreements . . . . The Government's brief acknowledges as much, suggesting that if antitrust scrutiny is invited for such cash payments, it may also be required for 'other consideration' and 'alternative arrangements.'").

[26] *See 35 U.S.C. § 261* ("The . . . patentee, or his assigns or legal representatives may in like manner grant and convey an exclusive right under his application for patent, or patents, to the whole or any specified part of the United States.").

[27] We do not believe the no-AG agreement was in fact an "exclusive" license. **[**43]** However, since the issue of whether such agreement is an exclusive license is not necessary for our decision here, we will leave its determination for another day.

Court rejected the latter. The thrust of the Court's reasoning is not that it is problematic **[**41]** that money is used to effect an end to the patent challenge, but rather that the patentee leverages some part of its patent power (in *Actavis*, its supracompetitive profits) to cause anticompetitive harm—namely, elimination of the risk of competition. There, the patentee gave the challenger a license to enter 65 months before patent expiration, *plus* a reverse payment of "millions of dollars." *Actavis, 133 S. Ct. at 2229*. This reverse payment was not immunized, of course, simply because of that early-entry "license." Similarly, the fact that a patent holder may generally have the right to grant licenses, exclusive or otherwise, does not mean it also has the right to give a challenger a license along with a promise not to produce an authorized generic—i.e., a promise not to compete—in order to induce the challenger "to respect its patent and quit [the competitor's] patent invalidity or noninfringement claim without any antitrust scrutiny." *Id. at 2233* (internal quotation marks omitted). In the *Actavis* Court's view, the question is not one of patent law, but of ***antitrust law***, the latter of which invalidates "the improper use of [a patent] monopoly." *Id. at 2231* (alteration in original) (quoting *Line Material, 333 U.S. at 310*). *But see id. at 2243* (Roberts, C.J., dissenting). **[**42]** And as we read the Court's opinion, even exclusive licenses cannot avoid antitrust scrutiny where they are used in anticompetitive ways. *See id. at 2227* (citing *Palmer, 498 U.S. 46, 111 S. Ct. 401, 112 L. Ed. 2d 349*); *Palmer, 498 U.S. at 50* (holding an agreement not to compete based on an exclusive copyright license[28] "unlawful on its face"). We make no statement about patent licensing more generally. But in this context we believe ***HN6***[] the fact that the Patent Act expressly authorizes licensing does not necessarily mean it also authorizes reverse payments to prevent generic competition.[29]

We also disagree with defendants' attempt to recharacterize Teva's gain as resulting **[*408]** from its early entry alone. First, that characterization is inaccurate as a descriptive matter: What GSK gave Teva was a 180-day monopoly over the generic market. The first-filing generic cannot capture this value by early entry alone. It can only hope to obtain this value with the brand's self-restraint, and here, without GSK's no-AG commitment, GSK allegedly would have introduced an AG. Second, although we agree that the *Actavis* "Court expressly identified early-entry licensing as a traditional form of settlement whose legality the opinion took pains not to disturb," Teva Br. 25-26,[30] a no-AG agreement is no more solely an early-entry licensing agreement than the settlement in *Actavis* itself, where entry was permitted 65 months before patent expiration. *Actavis, 133 S. Ct. at 2229*. Notwithstanding such "early entry," the antitrust problem was that, as the Court inferred, entry might have been earlier, and/or the risk of competition not eliminated, had the reverse payment not been tendered. *See Actavis, 133 S. Ct. at 2237* ("They may, as in other industries, settle in other ways, for example, by allowing the generic manufacturer to enter the patentee's **[**46]** market prior to the patent's expiration, without the patentee paying the challenger to stay out prior to that point."); *see also* FTC Amicus Br. 21-22 ("[C]ompetitors do not normally raise antitrust concerns if they agree on a date for generic entry but do *not* simultaneously agree that the brand-name manufacturer will compensate the

---

[28] The Supreme Court opinion does not say what kind of "exclusive license" it is referring to, but the Eleventh Circuit's opinion states, "BRG and HBJ disavow any intent to restrain trade and claim that their agreement is nothing more than an ordinary copyright royalty arrangement which courts have routinely sustained." *Palmer v. BRG of Ga., Inc., 874 F.2d 1417, 1434 (11th Cir. 1989)* (internal quotation **[**44]** marks omitted), *rev'd*, *498 U.S. 46, 111 S. Ct. 401, 112 L. Ed. 2d 349*.

[29] The defendants' arguments are much like those rejected by the majority in *Actavis.* The disagreement in the Court was fundamental. In the dissenters' view, "a patent claim *cannot possibly* impose unlawful anticompetitive harm if the patent holder is acting within the scope of a valid patent and therefore permitted to do precisely what the antitrust suit claims is unlawful." *133 S. Ct. at 2244* (Roberts, C.J., dissenting) (emphasis in original). The dissenters viewed the majority as "impos[ing] antitrust liability based on the parties' subjective uncertainty about [a] legal conclusion," namely, whether a patent is valid (and it is one or the other), because "[t]he majority seems to think that *even if* the patent is valid, a patent holder violates the antitrust laws merely because the settlement took away some chance that his patent would be declared invalid by a court." *Id.* (emphasis in original). In fact, the dissenters perceived a slippery slope in that the majority's "logic—that taking away any *chance* that a patent will be invalidated is itself an antitrust problem—cannot possibly be limited to reverse-payment agreements, or those that are 'large.'" *Id. at 2245* (emphasis in original) (quoting *id. at 2236* (majority **[**45]** opinion)).

[30] *See Actavis, 133 S. Ct. at 2237*; *cf. K-Dur, 686 F.3d at 217-18* ("[N]othing in the rule of reason test that we adopt here limits the ability of the parties to reach settlements based on a negotiated entry date for marketing of the generic drug . . . .").

generic company for staying out of the market until that date, thereby sharing (while enlarging) their aggregate pool of monopoly profits.").

3.

Defendants present additional arguments as to why no-AG agreements, as "exclusive licenses," should not be subjected to antitrust scrutiny. Noting that public policy favors settlements, they contend that subjecting such agreements to scrutiny will discourage settlements. GSK Br. 37. Furthermore, they contend that "courts should not review pro-competitive conduct to determine whether an even more pro-competitive transaction exists." GSK Br. 37 (citing *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 415-16, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* ("The Sherman Act . . . does not give judges *carte blanche* to insist that a monopolist alter **[**47]** its way of doing business whenever some other approach might yield greater competition." (citation omitted))); *see* Teva Br. 32.

But *Actavis* addressed and rejected these arguments. First, the Court thought the possible discouragement of settlements was "outweigh[ed]" by other considerations and stated that "parties may well find ways to settle patent disputes without the use of reverse payments." *Actavis, 133 S. Ct. at 2237*.[31] But **[*409]** whatever the effect on settlements, we do not perceive how the noncash nature of no-AG agreements alters that balance. Second, we think *Trinko* inapposite. *Actavis* does not stand for the proposition that parties must reach the most procompetitive settlements possible. Instead, we read *Actavis* to hold that ***antitrust law*** may prohibit settlements that are anticompetitive because, without justification, they delay competition for longer than the patent's strength would otherwise permit.[32]

4.

For the reasons we have explained, we think this no-AG agreement, because it may represent an unusual, unexplained transfer of value from the patent holder to the alleged infringer that cannot be adequately justified—whether as compensation for litigation expenses or services, or otherwise[33]—is subject to antitrust scrutiny under the rule of reason. But even if that is the rule, defendants contend, plaintiffs fail to state a claim under *Bell Atlantic*

---

[31] The Court was unpersuaded by the dissenters' arguments in this vein. The dissenters contended there was no empirical evidence that most reverse payment settlements occur in the Hatch-Waxman context, and that payments from patentee to alleged infringer "are a well-known feature of intellectual property litigation, and reflect **[**48]** an intuitive way to settle such disputes." *Actavis, 133 S. Ct. at 2242-43* (Roberts, C.J., dissenting). The Court, however, thought that "[a]pparently most if not all reverse payment settlement agreements arise in the context of pharmaceutical drug regulation, and specifically in the context of suits brought under statutory provisions allowing a generic drug manufacturer (seeking speedy marketing approval) to challenge the validity of a patent owned by an already approved brand-name drug owner." *Id. at 2227* (majority opinion). Similarly, although the dissenters contended that "[w]hile the alleged infringer may not be suing for the patent holder's *money*, it is suing for the right to use and market the (intellectual) property, which is worth money," *id. at 2243* (Roberts, C.J., dissenting) (emphasis in original), the Court thought reverse payments "unusual," *id. at 2231* (majority opinion). The dissenters also thought that the Court's holding would discourage settlement even though "the right to settle generally accompanies the right to litigate in the first place." *Id. at 2243* (Roberts, C.J., dissenting). They postulated that "the majority's decision may very well discourage generics from challenging pharmaceutical patents in the first place" by "[t]aking the prospect of settlements **[**49]** off the table—or limiting settlements to an earlier entry date for the generic, which may still be many years in the future." *Id. at 2247*.

[32] In addition, *Trinko* dealt with different questions regarding unlawful monopolization and the refusal to deal—set against the background of "the long recognized right of [a] trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal," *540 U.S. at 408* (alteration in original) (quoting *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919))*—and the role of the Telecommunications Act of 1996, which focuses on a different goal of eliminating certain monopolies, *id. at 415*.

[33] *See* *Actavis, 133 S. Ct. at 2236* ("There may be other justifications.").

Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007), and Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009), because their "allegations are far too speculative to satisfy their burden of plausibly alleging that the settlement was anticompetitive." **[**50]** *See* GSK Br. 44-45. In particular, defendants argue that "[p]laintiffs fail to plausibly allege that in this but-for world, the parties would have successfully negotiated an alternative, competition-maximizing agreement," Teva Br. 44; that continued litigation in favor of settlement "would have yielded a more competitive result," Teva Br. 45; or that Teva would have launched their generics "at risk," Teva Br. 46.

We believe plaintiffs' allegations, and the plausible inferences that can be drawn from them, are sufficient to state a rule-of-reason claim under *Twombly* and *Iqbal* for violation of the Sherman Act on the ground that GSK sought to induce Teva to delay its entry into the lamotrigine tablet market by way of an unjustified no-AG agreement. As recited earlier, plaintiffs alleged that GSK agreed not to launch a competing authorized generic during Teva's 180-day exclusivity period, which was to begin near the expiration of the **[*410]** '017 patent; that such promises can be worth "many millions of dollars of additional revenue"; that "GSK had an incentive to launch its own authorized generic versions of tablets"; that Teva had a history of launching "at risk"; and that **[**51]** the '017 patent was likely to be invalidated—as, in fact, its main claim had been. Because marketing an authorized generic was allegedly in GSK's economic interest, its agreement not to launch an authorized generic was an inducement—valuable to both it and Teva—to ensure a longer period of supracompetitive monopoly profits based on a patent at risk of being found invalid or not infringed. (Indeed, Teva asserted in other litigation that the no-AG agreement "formed part of the inducement to Teva to relinquish the rights and defenses it was asserting against GSK in the Patent Litigation." JA 76 (alteration and emphases omitted).) And although plaintiffs concede that Teva entered the lamotrigine chewables market about 37 months early, *see, e.g.*, GSK Br. 7, the chewables market, allegedly worth only $50 million annually, was orders of magnitude smaller than the alleged $2 billion tablet market the agreement is said to have protected. Accordingly, at the pleading stage plaintiffs have sufficiently alleged that any procompetitive aspects of the chewables arrangement were outweighed by the anticompetitive harm from the no-AG agreement.[34]

Moreover, ***HN7***[] we do not read *Actavis* to require allegations that defendants could in fact have reached another, more competitive settlement. *Actavis* embraces the concept that a patent "may or may not be valid, and may or may not be infringed," *133 S. Ct. at 2231*, and holds that the anticompetitive harm is not *certain* consumer loss through higher prices, but rather the patentee's "avoid[ance of] the risk of patent invalidation or a finding of noninfringement"—that is, "prevent[ion **[**53]** of] the risk of competition," *id. at 2236*, beyond what the patent's strength would otherwise allow—and, thus, consumer harm. In other words, under the substantive standard, the question is not whether the defendants have only possibly acted unlawfully, *but see* Teva Br. 43, but whether they have acted unlawfully by seeking to prevent competition. Plaintiffs have sufficiently pleaded as much.[35]

C.

---

[34] It may also be (though we do not decide) that "procompetitive effects **[**52]** in one market cannot justify anticompetitive effects in a separate market" (i.e., the lamotrigine tablet market). Amicus Br. Nat'l Ass'n Chain Drug Stores in Support of Appellants 27-28 (citing, inter alia, *Paladin Assocs., Inc. v. Mont. Power Co., 328 F.3d 1145, 1157 n.11 (9th Cir. 2003))*; *see* *Paladin Assocs., 328 F.3d at 1157 n.11* ("It may be . . . that this procompetitive effect should not be considered in our rule of reason analysis, based on the theory that procompetitive effects in a separate market cannot justify anti-competitive effects in the market for pipeline transportation under analysis.") (citing *United States v. Topco Assocs., 405 U.S. 596, 610, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*; *see also* *Topco, 405 U.S. at 610* ("[Competition] cannot be foreclosed with respect to one sector of the economy because certain private citizens or groups believe that such foreclosure might promote greater competition in a more important sector of the economy.").

[35] We do not decide the question of antitrust injury in private actions such as this litigation, *see generally, e.g.*, Ian Simmons et al., *Viewing* FTC v. Actavis *Through the Lens of Clayton Act Section 4*, Antitrust, Fall 2013, at 24; *In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 755-57 (E.D. Pa. 2014)*, nor do we preclude the parties from raising the issue on remand.

1.

In the alternative, the District Court stated that "[i]t finds that the settlement . . . **[*411]** would survive *Actavis* scrutiny and is reasonable." *18 F. Supp. 3d at 570*. This was error. As explained above, plaintiffs have sufficiently pleaded violation of the antitrust laws so as to overcome defendants' motion to dismiss. If genuine issues of material fact remain after discovery, ***HN8***[] the rule-of-reason analysis is for the finder of fact, not the court as a matter of law.[36]

In addition, the District Court mistook the "five sets of considerations" that persuaded the *Actavis* Court "to conclude that the FTC should have been given the opportunity to prove its antitrust claim" under the rule of reason, *133 S. Ct. at 2234*, as a redefinition of the "rule of reason" itself. But the general contours of the rule of reason are well-mapped. *See generally, e.g., id. at 2236* (citing *Ind. Fed'n of Dentists, 476 U.S. at 459*); *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820, 829-30 (3d Cir. 2010)*. We recognize the *Actavis* Court "le[ft] to the lower courts the structuring of [this type of] rule-of-reason antitrust litigation," *133 S. Ct. at 2238*, and that there may be some uncertainty as to how, exactly, a "defendant may show in the antitrust proceeding that legitimate justifications are present, thereby explaining the presence of the challenged term and showing the lawfulness of that term under the rule of reason," *id. at 2236* (citing *Ind. Fed'n of Dentists, 476 U.S. at 459*). But the Court noted that justifications might include "litigation expenses saved through the **[**55]** settlement" or "compensation for other services that the generic has promised to perform." *Id.* And although the Court left such details of how to apply the proper antitrust theories to "the basic question—that of the presence of significant unjustified anticompetitive consequences," *id. at 2238*—it suggested "the antitrust laws are likely to forbid" payment *for delay* (or, that is, to eliminate risk of patent invalidity or noninfringement), *id. at 2237*.

Here, the District Court thought the no-AG agreement was "justified" because, although the settlement amount was likely greater than litigation costs, "the consideration which the parties exchanged in the settlement [wa]s reasonably related to the removal of the uncertainty created by the dispute." *Lamictal, 18 F. Supp. 3d at 570*. That conclusion is in tension with *Actavis* in that, without proper justification, the brand cannot pay the generic simply to eliminate the risk of competition. Nor did the court properly conclude "that the potential for adverse effects on competition [wa]s minimal," or that the settlement was reasonable, because "the duration of the No-AG Agreement was a relatively brief six months." *Id.* The anticompetitive harm plaintiffs allege—consistent with *Actavis—* is that the **[**56]** promise of no authorized-generic competition during those six months induced Teva to quit its patent challenge. As discussed above, plaintiffs plausibly allege this no-AG promise was of considerable value and thus designed to protect GSK's patents against the risk of invalidation or noninfringement, rather than reimburse litigation costs or compensate for services. Accordingly, the District Court should have permitted the litigation to proceed under the traditional rule-of-reason approach.

[*412] 2.

HN9[] Under the traditional rule-of-reason analysis, the factfinder must

> weigh all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. The plaintiff bears an initial burden under the rule of reason of showing that the alleged combination or agreement produced adverse, anti-competitive effects within the relevant product and geographic markets. The plaintiff may satisfy this burden by proving the existence of actual anticompetitive effects, such as reduction of output, increase in price, or deterioration in quality of goods

[36] *See, e.g., Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 343, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)* ("[T]he rule of reason requires the factfinder to decide whether under all the **[**54]** circumstances of the case the restrictive practice imposes an unreasonable restraint on competition."); *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 316 & n.12 (3d Cir. 2010)* (discussing the fact-bound, burden-shifting standard and noting that "[i]n the event a genuinely disputed issue of fact exists regarding the reasonableness of the restraint, the determination is for the jury").

> or services. Such proof is often impossible to make, however, due to the difficulty of **[**57]** isolating the market effects of challenged conduct. Accordingly, courts typically allow proof of the defendant's market power instead. Market power, the ability to raise prices above those that would prevail in a competitive market, is essentially a surrogate for detrimental effects.
> If a plaintiff meets his initial burden of adducing adequate evidence of market power or actual anti-competitive effects, the burden shifts to the defendant to show that the challenged conduct promotes a sufficiently pro-competitive objective. . . . To rebut, the plaintiff must demonstrate that the restraint is not reasonably necessary to achieve the stated objective.

United States v. Brown Univ., 5 F.3d 658, 668-69 (3d Cir. 1993) (alteration, citations, internal quotation marks, and footnotes omitted).

The *Actavis* Court provided initial guidance on how to structure rule-of-reason litigation in the reverse payment context. The Court explained that such antitrust questions must be answered "by considering traditional antitrust factors such as likely anticompetitive effects, redeeming virtues, market power, and potentially offsetting legal considerations present in the circumstances, such as here those related to patents." Actavis, 133 S. Ct. at 2231.

First, to prove anticompetitive effects, the **[**58]** plaintiff must prove payment for delay, or, in other words, payment to prevent the risk of competition. *See* id. at 2235-36. "[T]he likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification." Id. at 2237.

Second, the burden then shifts to the defendant to show "that legitimate justifications are present, thereby explaining the presence of the challenged term and showing the lawfulness of that term under the rule of reason." Id. at 2235-36.

> The reverse payment, for example, may amount to no more than a rough approximation of the litigation expenses saved through the settlement. That payment may reflect compensation for other services that the generic has promised to perform—such as distributing the patented item or helping to develop a market for that item. There may be other justifications.

Id. at 2236. The Court does not foreclose other justifications, and we need not decide today what those other justifications might be.

Finally, the plaintiff will have the opportunity to rebut the defendant's explanation. **[**59]** [37]

[*413] On remand, we invite the District Court to proceed with the litigation under the traditional rule of reason, tailored, as necessary, to the circumstances of this case.[38]

IV.

---

[37] *See generally, e.g.,* King Drug Co. of Florence v. Cephalon, Inc., 88 F. Supp. 3d 402, 412, 2015 U.S. Dist. LEXIS 9545, 2015 WL 356913, at *7-16 (E.D. Pa. 2015).

[38] We note that the rule of reason allows the court, depending on the circumstances, to

> structure antitrust litigation so as to avoid, on the one hand, the use of antitrust theories too abbreviated to permit proper analysis, and, on the other, consideration of every possible fact or theory irrespective of the minimal light it may shed on the basic question—that of the presence of significant unjustified anticompetitive consequences.

Actavis, 133 S. Ct. at 2238. In addition, nothing in this opinion precludes a defendant from prevailing on a motion to dismiss or motion for summary judgment if, for example, there is no dispute that, under the rule of reason, the procompetitive benefits of a reverse payment outweigh the payment's alleged anticompetitive harm.

For the foregoing reasons, we vacate the judgment of the District Court and remand for further proceedings consistent with this opinion.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

The purpose of a *Fed. R. Civ. P. 12(b)* motion to dismiss is not to decide the merits of the case, but rather to test the sufficiency of the complaint. In the context of a motion to dismiss, the Court takes as true the facts as set forth in the complaint along with all reasonable inferences. To survive a *Rule 12(b)(6)* motion to dismiss, the claim first must comply with *Fed. R. Civ. P. 8(a)* by providing a short and plain statement of the claim showing that the pleader is entitled to relief, *Fed. R. Civ. P. 8(a)(2)*, such that the defendant is given fair notice of what the claim is and the grounds upon which it rests. Second, the factual allegations in the claim must be sufficient to raise the possibility of relief above the speculative level, assuming that all of the allegations in the complaint are true. A pleading that offers labels and conclusions or a formulaic recitation of the elements of a cause of action will not do. However, specific facts are not necessary; the statement need only give the defendant fair notice of what the claim is and the grounds upon which it rests.

Governments > Courts > Judicial Precedent

HN2[] **Courts, Judicial Precedent**

In the absence of guiding decisions by the state's highest court, federal courts consult and follow the decisions of intermediate state appellate courts unless there is a convincing reason to predict that the state's highest court would disagree.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN3[] **Private Actions, State Regulation**

A harmonization provision—which can either be statutory or derived from the common law—says that a state's antitrust laws should be read in harmony with federal antitrust laws.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN4[] **Private Actions, State Regulation**

Some states have interpreted harmonization provisions narrowly, excluding the incorporation of federal law regarding antitrust standing. other courts have applied Associated General Contractors to state ***antitrust law*** based solely on harmonization provisions. Still other courts have played it safe, punting the issue absent clear guidance from the state in question.

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN5[] **Private Actions, Standing**

The presence of a statutory harmonization provision (either statutory or common law), absent any countervailing statutory law or case law from a state appellate court, is sufficient to permit a district court to apply federal antitrust-standing law—including Associated General Contractors—to claims brought under that state's antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Constitutional Law > The Judiciary > Case or Controversy > Standing

HN6[] **Standing, Clayton Act**

Antitrust standing is not Article III standing; the very concept of antitrust standing, which exists in addition to Article III standing, is so intertwined with substantive antitrust principles that it would be counterintuitive to assume that states would not read this body of law in harmony with the remainder of the Supreme Court's substantive antitrust opinions. Indeed, the entire premise of the judicially-created antitrust standing inquiry stems from the fact that the plain language of the *Clayton Act's* standing provision is exceedingly broad, and so the Supreme Court derived a set of narrowing factors influenced by the same policies that gave birth to the antitrust laws in the first place.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN7[] **Private Actions, State Regulation**

A harmonization provision does not guarantee that a state will apply Associated General Contractors. Even states with a harmonization provision have the authority to reject the application of Associated General Contractors if Associated General Contractors conflicts with existing state law (statutory or common law).

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN8[] **Standing, Clayton Act**

Although the standing provision in *§ 4 of the Clayton Act* is broad—permitting civil suits by any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws, *15 U.S.C.S. § 15*—the Supreme Court has endorsed several limiting principles such that not every person, however tangentially injured by an antitrust violator, has standing to sue. One such limiting principle comes from Illinois Brick, where the Court found unacceptable the risk of duplicative recovery engendered by allowing both direct and indirect purchasers to claim damages resulting from a single overcharge by the antitrust defendant. The splintered recoveries and litigative burdens that would result from a rule requiring that the impact of an overcharge be apportioned between direct and indirect purchasers could undermine the active enforcement of the antitrust laws by private actions.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN9[] **Standing, Clayton Act**

Illinois Brick holds that the direct purchaser from the alleged antitrust violator(s) is the one with the right of action; those further removed from the illegal arrangement may not, under the federal antitrust laws, bring their own actions. Only the immediate purchaser of goods may sue under the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN10[] **Standing, Clayton Act**

The chain-of-distribution inquiry in Illinois Brick was meant only to preclude duplicate recovery.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN11[] **Standing, Requirements**

Associated General Contractors provides a six-factor test for examining the link between a plaintiff's harm and a defendant's wrongdoing: (1) the causal connection between the violation and the harm; (2) the presence of improper motive; (3) the type of injury and whether it was one Congress sought to redress; (4) the directness of the injury; (5) the speculative nature of the damages; and (6) the risk of duplicate recovery or complex damage apportionment. The broad proposition emanating from Associated General Contractors is that a party cannot recover when others more directly injured are better able to state a claim.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN12[] **Private Actions, State Regulation**

By enacting a repealer statute, each state has taken some action to differentiate its antitrust-standing law from the federal landscape.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN13[] **Standing, Clayton Act**

Much like the standing provision in the Clayton Act, California's Cartwright Act is broad in scope, permitting any person who is injured in his or her business or property by reason of anything forbidden or declared unlawful by this chapter to bring an antitrust action. *Cal. Bus. & Prof. Code § 16750(a)*. The California Supreme Court has rejected arguments that judicial interpretations of the Sherman and Clayton Acts apply fully to California's antitrust laws, noting that interpretations of federal ***antitrust law*** are at most instructive, not conclusive, when construing the Cartwright Act.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN14[] **Private Actions, State Regulation**

A person injured by an antitrust violator may bring suit regardless of whether such injured person dealt directly or indirectly with the defendant. *Cal. Bus. & Prof. Code § 16750(a)*.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN15[] **Standing, Requirements**

California's intermediate appellate court has endorsed the application of the Associated General Contractors factors in interpreting California's antitrust laws, despite the state's Illinois Brick repealer statute.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN16[] **Standing, Requirements**

California's antitrust-standing provision is broader in some respects than federal antitrust-standing law because of California's repealer statute, but California's repealer statute applies only to Illinois Brick, and Illinois Brick and Associated General Contractors are separate inquiries. Absent any binding California law to the contrary, the appellate court decision in Vinci and the moderately-deferential harmonization provision remain the best indicators of how the California Supreme Court would address the issue, and both lean in favor of applying Associated General Contractors to claims brought under the Cartwright Act.

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN17[] **Private Actions, Standing**

Kansas has a broadly-worded antitrust-standing provision, stating that a cause of action may be brought by any person who is injured in such person's business or property by reason of an antitrust violation. *Kan. Stat. Ann. § 50-161(b)*.

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN18[] **Private Actions, Standing**

See *Kan. Stat. Ann. § 50-163(b)*.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Governments > Courts > Judicial Precedent

HN19[] **Private Actions, State Regulation**

The Supreme Court of Kansas has noted that while it is certainly foreseeable that it would apply federal ***antitrust law*** in interpreting Kansas's antitrust laws and that such law would be persuasive authority, ultimately federal ***antitrust law*** is not binding upon any court in Kansas interpreting Kansas ***antitrust law***.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN20[] **Standing, Requirements**

Kansas's repealer statute provides that an antitrust cause of action may be brought regardless of whether such injured person dealt directly or indirectly with the defendant. *Kan. Stat. Ann. § 50-161(b)*.

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN21[] **Private Actions, Standing**

The Kansas legislature has amended the Kansas Restraint of Trade Act (KRTA) to provide that it shall be construed in harmony with ruling judicial interpretations of federal ***antitrust law*** by the United States supreme court. *Kan. Stat. Ann. § 50-163(b)*. Accordingly, and absent any binding authority to the contrary, the Court is persuaded that the

Kansas Supreme Court would apply Associated General Contractors in interpreting antitrust standing under the KRTA.

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN22[] Private Actions, Standing

Michigan affords a right to sue under its antitrust reform act to any person threatened with injury or injured directly or indirectly in his or her business or property by a violation of the act. *Mich. Comp. Laws § 445.778(2)*.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN23[] Standing, Requirements

See *Mich. Comp. Laws § 445.784(2)*.

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN24[] Standing, Sherman Act

Because Michigan's antitrust legislation is patterned after federal antitrust legislation, federal court decisions applying the *Sherman Act* are persuasive authority in interpreting the Michigan Antitrust Reform Act.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN25[] Standing, Requirements

Michigan's repealer statute extended antitrust standing to any person threatened with injury or injured directly or indirectly. *Mich. Comp. Laws § 445.778(2)*

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN26[] Private Actions, Standing

While Michigan appellate courts have not developed a test for determining when a plaintiff's injury is too remote to permit suit under the Michigan Antitrust Reform Act, the Act requires courts to give due deference to interpretations given by the federal courts to comparable antitrust statutes. *Mich. Comp. Laws § 445.784(2)*.

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN27[] **Private Actions, Standing**

The Michigan Supreme Court would apply the Associated General Contractors factors to assess antitrust standing, and the Court sees no evidence to the contrary, binding or otherwise.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN28[] **Standing, Requirements**

Any person injured by an antitrust violation may sue under Minnesota's ***antitrust law***. *Minn. Stat. § 325D.57*.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN29[] **Private Actions, State Regulation**

Minnesota law is generally interpreted consistently with federal ***antitrust law***.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN30[] **Standing, Requirements**

In 1984, the Minnesota legislature added the words "directly or indirectly" to *Minn. Stat. § 325D.57* to make clear that, contrary to Illinois Brick, Minnesota ***antitrust law*** permits indirect purchasers to recover. The Associated General Contractors factors do not provide the benchmark for standing under Minnesota ***antitrust law***.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN31[] **Standing, Requirements**

While Minnesota courts should analyze an alleged injury's relation to the goals of ***antitrust law*** by identifying the markets involved, the market analysis is not the focus of the standing inquiry. Whether damages are speculative is relevant to standing under the Minnesota ***antitrust law***. Despite the broad language of its antitrust provision, there are injuries so remotely related to antitrust violations that courts simply cannot provide relief, such that standing under Minnesota ***antitrust law*** must be defined by some prudential limits informed by foreseeability, proximate cause, remoteness, and relation of the injury to the purposes of the ***antitrust law***; otherwise, almost any antitrust violation would provide almost any citizen with a cause of action arising from the resulting ripples of harm throughout the state's economy.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN32[] **Standing, Requirements**

Any assessment of antitrust standing must be informed by foreseeability, proximate cause, remoteness, and relation of the injury to the purposes of the ***antitrust law*** in holding that injuries are too remote and speculative to afford standing under Minnesota ***antitrust law***.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN33[] **Standing, Requirements**

New York law extends standing to any person who shall sustain damages by reason of any violation of the state's antitrust act, called the Donnelly Act, *N.Y. Gen. Bus. Law § 340*.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN34[] **Private Actions, State Regulation**

While New York courts generally construe the Donnelly Act, *N.Y. Gen. Bus. Law § 340*, in harmony with federal antitrust case law, it is well settled that New York courts interpret the Donnelly Act differently where State policy, differences in the statutory language, or the legislative history justify such a result.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN35[] **Standing, Requirements**

New York's repealer statute specifies that a person who sustains damages as a result of an antitrust violation shall not have his or her recovery limited due to the fact that the person has not dealt directly with the defendant. *N.Y. Gen. Bus. Law § 340*.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN36[] **Standing, Requirements**

Where state courts and legislatures have indicated that they would look to federal antitrust precedent in applying their ***antitrust law***, it seems that at the very least courts would require plaintiffs in antitrust actions to plausibly allege that they were participants in the relevant product market where the alleged anti-competitive activity took place. If the plaintiffs do not have standing to assert a federal antitrust claim, they do not have standing to bring a claim under the Donnelly Act, *N.Y. Gen. Bus. Law § 340*.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN37[] **Standing, Requirements**

North Carolina grants standing to any person injured by an antitrust violation. *N.C. Gen. Stat. § 75-16*.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN38[] **Private Actions, Sherman Act**

North Carolina's harmonization provision, arising from common law, is similar to the New York provision, which recognizes the federal opinions interpreting the *Sherman Act* are instructive, but not binding, when interpreting its antitrust statute.

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN39[] **Private Actions, Standing**

North Carolina does not have a repealer statute, although the North Carolina Court of Appeals deemed such a provision unnecessary, claiming that North Carolina's standing provision is broad enough to incorporate indirect purchasers. A slight risk of multiple liability is greatly outweighed by the benefit of advancing the aforementioned policies of North Carolina's Antitrust Act. In addition, the legislative history also leads to the conclusion that the General Assembly intended to create indirect purchaser standing to sue under the state antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN40[] **Standing, Requirements**

It is likely that North Carolina's highest court would follow Crouch and Associated General Contractors in determining whether indirect purchasers lack antitrust standing under North Carolina ***antitrust law***.

Antitrust & Trade Law > Consumer Protection

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN41[] **Antitrust & Trade Law, Consumer Protection**

There is no legal principle saying that a finding of remoteness in the antitrust context functions, as a matter of law, as a bar to any related consumer-protection claims. However, the directness inquiry in antitrust-standing law is predicated on the well-known concept of proximate causation.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN42[] **Deceptive & Unfair Trade Practices, State Regulation**

The Arkansas Deceptive Trade Practices Act (ADTPA), *Ark. Code Ann. § 4-88-101 et seq.*, provides a private right of action to any person who suffers actual damage or injury as a result of a violation of the Act. *Ark. Code Ann. § 4-88-113(f)*. And based on the language of *§ 4-88-113(f)*, there must be a causal connection between the violation of the ADTPA and the injury. Separate from the causation requirement, Arkansas law recognizes the remoteness doctrine as applied to claims under the ADTPA, favoring suits by those directly injured over more-indirect victims. Directly injured victims can generally be counted on to vindicate the law as private attorneys general, without any of the problems attendant upon suits by plaintiffs injured more remotely.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN43[] **Private Actions, State Regulation**

Ark. Code Ann. § 4-88-107 lists ten examples of actionable violations under the Arkansas Deceptive Trade Practices Act, none of which is recognizable as an antitrust violation (e.g., price fixing or monopolization). However, the statute does contain a catch-all provision that proscribes engaging in any other unconscionable, false, or deceptive act or practice in business, commerce, or trade, *Ark. Code Ann. § 4-88-107(a)*, and courts have interpreted this catch-all broadly so as to include antitrust claims.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Torts > Negligence > Elements > Causation

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN44[] **State Regulation, Claims**

The causation element makes its way into the California Unfair Competition Law (UCL) through the standing requirement, whereby a private person has standing to assert a UCL claim only if he or she (1) has suffered injury in fact, and (2) has lost money or property as a result of the unfair competition. The second prong of the standing test imposes a causation requirement. The phrase as a result of in its plain and ordinary sense means caused by and requires a showing of a causal connection or reliance on the alleged misrepresentation. Courts use the word "causation" to refer both to the causation element of a negligence cause of action and to the justifiable reliance element of a fraud cause of action. A private person has standing to sue only if he or she has suffered injury in fact and has lost money or property as a result of such unfair competition.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN45[] State Regulation, Claims

There are three varieties of unfair competition: practices which are unlawful, unfair or fraudulent. A showing of actual reliance is required for a fraud-based California Unfair Competition Law claim.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN46[] Standing, Requirements

Indirect antitrust plaintiffs who have had business dealings with a defendant and lost money or property as a result of the defendant's unfair business practices have standing under the California Unfair Competition Law. But the intent of Proposition 64 was to confine standing to those actually injured by a defendant's business practices and to curtail the prior practice of filing suits on behalf of clients who have not used the defendant's product or service, viewed the defendant's advertising, or had any other business dealing with the defendant.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN47[] State Regulation, Claims

The breadth of *Cal. Bus. & Prof. Code § 17200* does not give a plaintiff license to plead around the absolute bars to relief contained in other possible causes of action by recasting those causes of action as ones for unfair competition.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN48[] State Regulation, Claims

Where a plaintiff fails to state an antitrust claim, and where an unfair competition claim is based upon the same allegations, such state claims are properly dismissed.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN49[] Deceptive & Unfair Trade Practices, State Regulation

A consumer claim for damages under Florida Deceptive and Unfair Trade Practices Act, *Fla. Stat. § 501.201 et seq.*, has three elements: (1) a deceptive act or unfair practice; (2) causation; and (3) actual damages.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN50[] **Private Actions, State Regulation**

When a plaintiff's claim under the Florida Deceptive and Unfair Trade Practices Act (FDUTPA), *Fla. Stat. § 501.201 et seq.*, is based on the same allegations as its antitrust claim, failure to establish a violation of the ***antitrust law*** is sufficient to conclude that the plaintiff has also failed to state a FDUTPA claim.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN51[] **Standing, Requirements**

Florida adheres to the direct purchaser rule articulated in Illinois Brick.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN52[] **Deceptive & Unfair Trade Practices, State Regulation**

The North Carolina Unfair and Deceptive Trade Practices Act (NCUDTPA), *N.C. Gen. Stat. § 75-1 et seq.*, declares unlawful unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce. *N.C. Gen. Stat. § 75-1.1*. To state a claim under NCUDTPA, a plaintiff must show: (1) an unfair or deceptive act or practice, or an unfair method of competition, (2) in or affecting commerce, (3) which proximately caused injury to the plaintiff or to his business.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN53[] **Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

The Fourth Circuit has construed the North Carolina Unfair and Deceptive Trade Practices Act (NCUDTPA), *N.C. Gen. Stat. § 75-1 et seq.*,—a statute modeled (verbatim) after § 5 of the Federal Trade Commission Act (FTC Act)—consistently with the *Sherman Act* in assessing the merits of an antitrust claim brought under the guise of a consumer-protection claim. The FTC Act sweeps within its prohibitory scope conduct also condemned by *§ 1 of the Sherman Act*, ultimately finding no reason to conclude that, given the opportunity, North Carolina's Supreme Court would construe its state's act any differently.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN54[] Types of Contracts, Quasi Contracts

There is no cause of action in California for unjust enrichment. Unjust enrichment is not a cause of action, just a restitution claim.

Antitrust & Trade Law > Regulated Practices > Private Actions > Standing

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN55[] Private Actions, Standing

A failure to state an antitrust claim does not categorically preclude a plaintiff from succeeding on a related unjust enrichment claim. No reason or logic supports a conclusion that a state's adherence to the rule of Illinois Brick dispossesses a person not only of a statutory legal remedy for an antitrust violation, but also dispossess the same person of his right to pursue a common law equitable remedy. The viability of an unjust enrichment claim does not hinge upon the success of the state statutory antitrust claims. Unjust enrichment claims are viable regardless of the applicable state antitrust laws.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN56[] Types of Contracts, Quasi Contracts

The elements for unjust enrichment claims under Arkansas, Florida, Kansas, Michigan, Minnesota, New York, and North Carolina are essentially the same: plaintiff must establish that (1) plaintiff conferred a benefit on the defendant; (2) defendant knew and received a benefit; and (3) defendant retained the benefit under circumstances that make it unjust.

HN61[] **Affirmative Defenses, Statute of Limitations**

Ark. Code Ann. § 16-56-105(3) states that all actions founded on any contract or liability, expressed or implied are subject to a three-year statute of limitations.

Contracts Law > Defenses > Affirmative Defenses > Statute of Limitations

Governments > Legislation > Statute of Limitations > Time Limitations

HN62[] **Affirmative Defenses, Statute of Limitations**

N.C. Gen. Stat. § 1-52(1) states that an action upon a contract, obligation or liability arising out of a contract, express or implied, is subject to a three-year statute of limitations.

Contracts Law > Defenses > Affirmative Defenses > Statute of Limitations

Governments > Legislation > Statute of Limitations > Time Limitations

HN63[] **Affirmative Defenses, Statute of Limitations**

Fla. Stat. § 95.11(3)(k) sets a three-year statute of limitations for a legal or equitable action on a contract, obligation, or liability not founded on a written instrument.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

HN64[] **Federal & State Interrelationships, Choice of Law**

In an MDL, a court must apply the choice-of-law rules of the transferor forum.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

HN65[] **Federal & State Interrelationships, Choice of Law**

Where there is a conflict between the laws of Vermont and other jurisdictions, a court must ascertain whether a specific section of the Restatement (Second) of Conflict of Laws governs what law should ordinarily apply to the particular action or legal issue. If such a section exists, generally the law of a particular state is presumed to be the correct forum unless another state has a more significant interest in the litigation.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

Civil Procedure > ... > Affirmative Defenses > Statute of Limitations > Tolling of Statute of Limitations

HN66[] **Federal & State Interrelationships, Choice of Law**

Regarding Vermont law, whether a claim will be maintained against the defense of the statute of limitations is determined under the principles stated in *§ 6 of the Restatement (Second) of Conflict of Laws*. In general, unless the exceptional circumstances of the case make such a result unreasonable: (1) the forum will apply its own statute of limitations barring the claim. (2) The forum will apply its own statute of limitations permitting the claim unless: (a) maintenance of the claim would serve no substantial interest of the forum; and (b) the claim would be barred under the statute of limitations of a state having a more significant relationship to the parties and the occurrence.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Relation Back

HN67[] **Amendment of Pleadings, Relation Back**

See *Fed. R. Civ. P. 15(c)(1)(B)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Statute of Limitations

Governments > Legislation > Statute of Limitations > Time Limitations

HN68[] **Affirmative Defenses, Statute of Limitations**

To determine which statute of limitations to apply in an MDL action, (1) the Court must first determine which state's choice-of-law rules to apply in these cases, (2) then, pursuant to those rules, it must choose the applicable statute of limitations, and (3) lastly, the Court must determine when each limitations period began to run and whether or not the applicable statutes of limitations have been tolled, either by the pendency of class actions or otherwise.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Class Actions

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN69[] **Tolling of Statute of Limitations, Class Actions**

Where a district court has denied class certification—at least where class action status has been denied solely because of failure to demonstrate that the class is so numerous that joinder of all members is impracticable—the commencement of the original class suit tolls the running of the statute of limitations for all purported members of the class who make timely motions to intervene after the court has found the suit inappropriate for class action status. The rule most consistent with federal class action procedure must be that the commencement of a class action suspends the applicable statute of limitations as to all asserted members of the class who would have been parties had the suit been permitted to continue as a class action.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN70[] **Class Actions, Certification of Classes**

Class certification issues are not always appropriate for a pre-standing evaluation.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN71[] **Class Actions, Certification of Classes**

Unlike *Fed. R. Civ. P. 23* deficiencies, standing deficiencies are inexplicably linked to a court's jurisdiction. Plaintiffs can exploit standing deficiencies (especially where the deficiency is obvious) to their benefit, whereas a *Rule 23* deficiency is an unlikely vehicle for abuse. Also, from a practical perspective, standing deficiencies are often apparent from the face of the complaints, whereas *Rule 23* deficiencies are often not so obvious.

Civil Procedure > Special Proceedings > Class Actions

Civil Procedure > Preliminary Considerations > Justiciability > Standing

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Class Actions

HN72[] **Special Proceedings, Class Actions**

The filing of a purported class-action complaint by a plaintiff who lacks standing does not toll the statute of limitations for those who later seek to intervene as plaintiffs. Jurisdiction cannot be preserved if the named plaintiffs lacked standing when the suit was filed.

Judges: Robert M. Dow, Jr., United States District Judge.

Opinion by: Robert M. Dow, Jr.

Opinion

MEMORANDUM OPINION AND ORDER

Before the Court is Defendants' motion to dismiss Indirect Purchaser Plaintiffs' Consolidated Class Action Complaint [497]. For the reasons state below, the Court grants Defendants' motion. In addition, putative Intervenors' motion to intervene [723] is denied.

I. [*5] Background

This multi-district litigation—composed of separate consolidated actions by both Direct Purchaser Plaintiffs and Indirect Purchaser Plaintiffs—has been pending for approximately six years now. Detailed descriptions of the underlying facts of the case can be found in Judge Hibbler's opinion on Defendants' motion to dismiss the Direct Purchaser Plaintiffs' complaint, *In re Dairy Farmers of Am., Inc. Cheese Antitrust Litig., 767 F. Supp. 2d 880, 885-90 (N.D. Ill. 2011)* (hereinafter "*DFA I*"), and in this Court's opinion on Defendants' motion to dismiss Indirect Purchaser Plaintiffs' federal claims, *In re Dairy Farmers of Am., Inc. Cheese Antitrust Litig., 2013 U.S. Dist. LEXIS 119962, 2013 WL 4506000, at *1-4 (N.D. Ill. Aug. 23, 2013)* (hereinafter "*DFA II*").

This opinion is closely related to the Court's *DFA II* opinion, as it concerns Defendants' motion to dismiss the Indirect Plaintiffs' state-law claims as raised in their Consolidated Class Action Complaint [483]. The Court adopts the detailed factual history of the case as set forth in *DFA I* and *DFA II*, and highlights only those facts necessary to address the present motion.

A. Factual Background

Indirect Plaintiffs allege that Defendants and Schreiber Foods, Inc. conspired to fix, stabilize, raise, and maintain the prices of Class I & III milk and products containing Class I & III milk. The basic allegation is that Defendants bought all of the Class III milk futures **[*6]** on the Chicago Mercantile Exchange ("CME") covering a certain period of time. Defendants then monopolized the CME's Cheese Spot market (*i.e.*, the only commodity exchange market for cheddar cheese in the United States), which allegedly caused an increase in the USDA's milk rate, which in turn increased the price of Defendants' milk futures and the nationwide price for finished dairy products sold to consumers. This chain of events allowed Defendants to profit from both (a) the artificially high price of milk futures and (b) the artificially high price of finished dairy products. Indirect Plaintiffs contend that Defendants' scheme injured them by forcing them to overpay for finished dairy products, namely various types of cheese. The named Plaintiffs are citizens of eight states (Arkansas, California, Florida, Kansas, Michigan, Minnesota, North Carolina, and New York) who allegedly purchased Defendants' finished dairy products during the relevant time periods in their respective states.

B. Procedural Background

The "indirect" component of this MDL, as currently set forth in Indirect Plaintiffs' Consolidated Class Action Complaint [483 (under seal)], is composed of four class-action lawsuits **[*7]** brought by and on behalf of so-called indirect-purchaser Plaintiffs, filed at various times in various courts: *Rudman v. DFA*, No. 2:09-cv-00134 (D. Vt. May 29, 2009); *Waun v. DFA*, No. 2:11-cv-00219 (D. Vt. Sept. 13, 2011); *Asmann v. DFA*, No. 11-cv-4428 (Kan. Dist. Ct. Dec. 15, 2011); and *Rogers v. DFA*, No. 5:13-cv-00034 (D. Vt. Feb. 19, 2013).

In *DFA II*, the Court addressed Defendants' motions to dismiss three of these class-action complaints [160, 197, 287], granting the motions as they related to Indirect Plaintiffs' federal antitrust claims, but leaving open the question of whether the Court would exercise jurisdiction over Indirect Plaintiffs' related state-law claims. [365.]

Approximately six months later, the Court granted Indirect Plaintiffs' request to file a Consolidated Class Action Complaint to present their remaining state-law allegations to the Court. [476.] Indirect Plaintiffs filed their Consolidated Class Action Complaint under seal on February 25, 2014, invoking various antitrust, consumer-protection, and unjust-enrichment laws from the eight states at issue. [483.]

C. Indirect Purchaser Plaintiffs' Consolidated Class Action Complaint

Indirect Plaintiffs' Consolidated **[*8]** Class Action Complaint wends its way through the antitrust laws of eight states, picking up related consumer-protection and unjust-enrichment claims along the way. All said, Indirect Plaintiffs raise three counts, which they label (1) State Statutes, (2) Violation of State Statutes, and (3) Unjust Enrichment. Decoded, these counts are best read as (1) Price-Fixing and Conspiracy, (2) Monopolization, and (3) Unjust Enrichment.

1. Counts I and II: Antitrust and Consumer-Protection Claims

While Counts I and II of Indirect Plaintiffs' Consolidated Class Action Complaint sound in ***antitrust law***, for various reasons, Indirect Plaintiffs were unable to bring claims under the antitrust statutes of two of the eight states at issue: Arkansas and Florida. For those two states, Indirect Plaintiffs brought their antitrust claims under the states' consumer-protection statutes instead. See *Ark. Code § 4-88-107*; *Fla. Stat. § 501.204*. Indirect Plaintiffs also invoked the consumer-protection laws of California (*Cal. Bus. & Prof. Code § 17200*) and North Carolina (*N.C. Gen. Stat. § 75-1.1*) *in addition to* their invocation of the antitrust statutes of those states.

Although Indirect Plaintiffs have alleged violations of a mix of both state antitrust and consumer-protection laws in Counts I and II, they **[*9]** do not distinguish between the two. For purposes of this opinion, however, delineation is imperative. Accordingly, the following chart provides a breakdown of Counts I and II, distinguishing Indirect Plaintiffs' antitrust claims from their consumer-protection claims.

State	Count I: Price Fixing and Conspiracy	
	Antitrust	**Consumer Protection**
Arkansas		Ark. Code *§ 4-88-107*
California	Cal. Bus. & Prof. Code *§ 16726*	Cal. Bus. & Prof. Code *§ 17200*
Florida		*Fla. Stat. § 501.204*
Kansas	Kan. Stat. Ann. *§ 50-112*	
Michigan	Mich. Comp. Laws *§ 445.772*	
Minnesota	Minn. Stat. *§§ 325D.51* & *325D.53*	
New York	N.Y. Gen. Bus.	

State	Count I: Price Fixing and Conspiracy	
	Antitrust	**Consumer Protection**
	Law *§ 340*	
North Carolina	N.C. Gen. Stat. *§ 75-1*	N.C. Gen. Stat. *§ 75-1.1*

State	Count II: Monopolization	
	Antitrust	**Consumer Protection**
Arkansas		Ark. Code *§ 4-88-107*
California		Cal. Bus. & Prof. Code *§ 17200*
Florida		*Fla. Stat. § 501.204*
Kansas		
Michigan	Mich. Comp. Laws *§ 445.773*	
Minnesota	Minn. Stat. *§ 325D.52*	
New York		
North Carolina	N.C. Gen. Stat. *§ 75-2.1*	

2. Count III: Unjust Enrichment Claims

Without specifying the laws of any particular state, Indirect Plaintiffs allege in Count III that Defendants were unjustly enriched by the Indirect Plaintiffs' overpayments for Defendants' finished dairy products. Indirect Plaintiffs ask the Court to disgorge **[*10]** Defendants of their unjust profits and return the overpayments to them in restitution.

II. Legal Standard on Motion to Dismiss

HN1[] The purpose of a *Rule 12(b)* motion to dismiss is not to decide the merits of the case, but rather to test the sufficiency of the complaint. *Gibson v. City of Chicago, 910 F.2d 1510, 1520 (7th Cir. 1990)*. In the context of a motion to dismiss, the Court takes as true the facts as set forth in the complaint along with all reasonable inferences. *Thulin v. Shopko Stores Operating Co., LLC, 771 F.3d 994, 995 (7th Cir. 2014)*. To survive a *Rule*

12(b)(6) motion to dismiss, the claim first must comply with Rule 8(a) by providing "a short and plain statement of the claim showing that the pleader is entitled to relief," Fed. R. Civ. P. 8(a)(2), such that the defendant is given "fair notice of what the * * * claim is and the grounds upon which it rests." Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007) (quoting Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)). Second, the factual allegations in the claim must be sufficient to raise the possibility of relief above the "speculative level," assuming that all of the allegations in the complaint are true. E.E.O.C. v. Concentra Health Servs., Inc., 496 F.3d 773, 776 (7th Cir. 2007) (quoting Twombly, 550 U.S. at 555). "A pleading that offers 'labels and conclusions' or a 'formulaic recitation of the elements of a cause of action will not do.'" Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (quoting Twombly, 550 U.S. at 555). However, "[s]pecific facts are not necessary; the statement need only give the defendant fair notice of what the * * * claim is and the grounds upon which it rests." **[*11]** Erickson v. Pardus, 551 U.S. 89, 93, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007) (citing Twombly, 550 U.S. at 555).

III. Antitrust Standing

In granting Defendants' prior motion to dismiss the federal antitrust claims raised by Indirect Plaintiffs in their (then three separate) class-action complaints, the Court held that Plaintiffs lacked antitrust standing to bring those claims under the "directness inquiry" set forth in Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983) (hereinafter "*AGC*"). DFA II, 2013 U.S. Dist. LEXIS 119962, 2013 WL 4506000, at *9-14. But the Court left open the questions of "whether and how the *AGC* factors apply to each of the various *state* antitrust claims that Plaintiffs seek to bring." 2013 U.S. Dist. LEXIS 119962, [WL] at *15 (emphasis added). Those questions are now before the Court.

Defendants argue that (1) the Court should apply *AGC* to the state-law claims, dismissing them for lack of antitrust standing, (2) even if the Court does not apply *AGC* to the state-law claims, the Court should still dismiss those claims under state-law remoteness principles, and (3) the dismissal (under either theory) should apply to all of Plaintiffs' claims (*i.e.*, antitrust, consumer protection, and unjust enrichment), not just the antitrust claims.

In deciding whether to apply *AGC* to state-law antitrust claims, the Court looks to whether the relevant state supreme court or state legislature has spoken to the issue. See Erie R.R. Co. v. Tompkins, 304 U.S. 64, 78, 58 S. Ct. 817, 82 L. Ed. 1188 (1938); Jean v. Dugan, 20 F.3d 255, 260 (7th Cir. 1994). ***HN2***[] "In the **[*12]** absence of guiding decisions by the state's highest court, [federal courts] consult and follow the decisions of intermediate [state] appellate courts unless there is a convincing reason to predict [that] the state's highest court would disagree." ADT Sec. Servs., Inc. v. Lisle-Woodridge Fire Prot. Dist., 672 F.3d 492, 498 (7th Cir. 2012).

Indirect Plaintiffs allege that Defendants have violated the antitrust laws of six states: California, Kansas, Michigan, Minnesota, New York, and North Carolina. Defendants argue that the state legislatures or the highest courts in each of these six states have issued clear directives that courts interpreting their state's antitrust statutes should follow federal law, and Indirect Plaintiffs (predictably) disagree. But before beginning a state-by-state analysis, the Court notes two general topics that are relevant in all six states: (1) harmonization provisions and (2) *Illinois Brick* repealer statutes.

A. Harmonization Provisions

HN3[] A harmonization provision—which can either be statutory or derived from the common law—says that a state's antitrust laws should be read in harmony with federal antitrust laws. All six of the states at issue have such provisions. Defendants point to these provisions as proof that the states would apply *AGC*. Indirect **[*13]** Plaintiffs disagree, arguing that (1) harmonization provisions apply to determine what qualifies as prohibited conduct, not who has standing to sue, and (2) even if a state has a harmonization provision, there nonetheless must be clear guidance under the state's law for applying *AGC*.

Both parties are correct, depending on where you look. ***HN4***[] Some states have interpreted harmonization provisions narrowly, excluding the incorporation of federal law regarding antitrust standing. See *Lorix v. Crompton Corp., 736 N.W.2d 619, 626 (Minn. 2007)* (noting that "[t]he desire for harmony between federal and state ***antitrust law*** relates more to prohibited conduct than to who can bring a lawsuit," such that state courts are "not required * * * to abide by federal antitrust standing limitations" (citing *Comes v. Microsoft Corp., 646 N.W.2d 440, 446 (Iowa 2002)* (noting that the purpose of Iowa's antitrust harmonization statute was to "achieve uniform application of the state and federal laws prohibiting monopolistic practices," not to define who can sue under ***antitrust law***))).

That being said, other courts have applied *AGC* to state ***antitrust law*** based solely on harmonization provisions. See, *e.g., In re Refrigerant Compressors Antitrust Litig., 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *10 (E.D. Mich. Apr. 9, 2013)* ("This Court shall also apply the *AGC* test to the claims asserted under the laws of the three relevant states with harmonization **[*14]** provisions * * *."); *In re Dynamic Random Access Memory Antitrust Litig., 516 F. Supp. 2d 1072, 1095 (N.D. Cal. 2007)* (hereinafter "*DRAM*").

Still other courts have played it safe, punting the issue absent clear guidance from the state in question. See, *e.g., In re Potash Antitrust Litig., 667 F. Supp. 2d 907, 943-44 (N.D. Ill. 2009)* ("[T]his Court is hesitant to decide who may be a proper plaintiff under Michigan's antitrust laws without any signal from an authoritative judicial or legislative source."), *vacated and remanded on other grounds, sub nom. Minn-Chem, Inc. v. Agrium Inc., 657 F.3d 650 (7th Cir. 2011)*; *In re Flash Memory Antitrust Litig., 643 F. Supp. 2d 1133, 1153 (N.D. Cal. 2009)* ("This Court, however, is reticent to adopt an across-the-board rule that a state's harmonization provision, whether created by statute or common law, is an appropriate means of predicting how a state's highest court would rule regarding the applicability of *AGC* to state law antitrust claims. Neither party has provided the Court with the requisite, individualized analysis on a per state basis to enable the Court to render such a determination."); *In re Pool Prods. Distrib. Mktg. Antitrust Litig., 946 F. Supp. 2d 554, 564 (E.D. La. 2012)* ("The *AGC* factors apply to standing inquires under state antitrust laws only to the extent that a state has adopted them.").

The Court is persuaded that ***HN5***[] the presence of a statutory harmonization provision (either statutory or common law), *absent any countervailing statutory law or case law from a state appellate court*, is sufficient to permit a district court to apply **[*15]** federal antitrust-standing law—including *AGC*—to claims brought under that state's antitrust laws.

First, the plain language of the harmonization statutes at issue—disseminated by the states' supreme courts and/or legislatures—offers no such limitation, instructing instead that each respective state's antitrust laws be read in harmony with federal antitrust laws, absent contradictory state law or policy. See, *e.g., Mailand v. Burckle, 20 Cal. 3d 367, 143 Cal. Rptr. 1, 572 P.2d 1142, 1147 (Cal. 1978)* (California); *Kan. Stat. Ann. § 50-163(b)* (Kansas); *Mich. Comp. Laws § 445.784(2)* (Michigan); *Minn. Twins P'ship v. State, 592 N.W.2d 847, 851 (Minn. 1999)* (Minnesota); *Sperry v. Crompton Corp., 8 N.Y.3d 204, 863 N.E.2d 1012, 1018, 831 N.Y.S.2d 760 (N.Y. 2007)* (New York); *Madison Cablevision, Inc. v. Morganton, 325 N.C. 634, 386 S.E.2d 200, 213 (N.C. 1989)* (North Carolina). It seems odd, then, that a district court would read a non-existent exception into a state's harmonization provision as its prediction of how the state's highest court would rule on the issue. The safer prediction is to assume that the state court would apply the plain language of the provision.

Second, (as discussed in more detail below), the fact that many state legislatures found it necessary to repeal the Supreme Court's *Illinois Brick* decision—a federal antitrust-standing opinion—implies that absent the repeal, the *Illinois Brick* antitrust-standing rule *would have* applied to the states' laws under their respective harmonization provisions (*i.e.*, if the states' harmonization provisions **[*16]** didn't incorporate federal antitrust-standing law, *Illinois Brick* repealer statutes wouldn't have been necessary).

Third, ***HN6***[] antitrust standing is not Article III standing; the very concept of antitrust standing, which exists *in addition to* Article III standing,[1] is so intertwined with substantive antitrust principles that it would be counterintuitive to assume that states would not read this body of law in harmony with the remainder of the Supreme Court's

[1] See, *e.g., Loeb Indus., Inc. v. Sumitomo Corp., 306 F.3d 469, 480-81 (7th Cir. 2002)*.

substantive antitrust opinions. Indeed, the entire premise of the judicially-created "antitrust standing" inquiry stems from the fact that the plain language of the *Clayton Act's* standing provision is exceedingly broad, and so the Supreme Court derived a set of narrowing factors influenced by the same policies that gave birth to the antitrust laws in the first place. See *AGC, 459 U.S. at 536-38*. Thus, as a threshold matter, the Court will follow the plain language of the states' harmonization provisions and adopt federal antitrust-standing law in applying the states' antitrust laws absent contrary authority.

But to be clear,***HN7***[] a harmonization provision does not guarantee that a state will apply *AGC*. Even states with a harmonization provision have the **[*17]** authority to reject the application of *AGC* if *AGC* conflicts with existing state law (statutory or common law). For example, in *Lorix*, the Minnesota Supreme Court first rejected the broader notion that its common-law harmonization provision automatically incorporated federal antitrust-standing law, and then, in a separate analysis, specifically rejected the application of *AGC* under Minnesota ***antitrust law***. *Lorix, 736 N.W.2d at 626-29* ("Even viewed as guideposts rather than requirements, the *AGC* factors are not harmonious with our ***antitrust law***."). It is this sort of analysis that makes the Court's decision more academic than effectual, since the identification of a harmonization provision is only the first step in deciding whether a state supreme court would apply the *AGC* factors, with an assessment of the state's extant antitrust-standing law a necessary follow-up.

B. *Illinois Brick* Repealer Statutes

HN8[] Although the standing provision in *§ 4* of the Clayton Act is broad—permitting civil suits by "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws," *15 U.S.C. § 15*—the Supreme Court has endorsed several limiting principles such that not every person, however tangentially **[*18]** injured by an antitrust violator, has standing to sue. See *Blue Shield of Virginia v. McCready, 457 U.S. 465, 472-75, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*; *Hawaii v. Standard Oil Co., 405 U.S. 251, 263 n.3, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)* (observing that the lower federal courts were "virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation").

One such limiting principle (of particular relevance here) came from the Supreme Court's *Illinois Brick* decision, where the Court held that indirect purchasers of bricks lacked antitrust standing where their alleged damages were measured by the amount of overcharge passed onto them from the direct purchasers. *Illinois Brick, 431 U.S. at 730-31*; *McCready, 457 U.S. at 474* ("[T]he Court found unacceptable the risk of duplicative recovery engendered by allowing both direct and indirect purchasers to claim damages resulting from a single overcharge by the antitrust defendant. The Court found that the splintered recoveries and litigative burdens that would result from a rule requiring that the impact of an overcharge be apportioned between direct and indirect purchasers could undermine the active enforcement of the antitrust laws by private actions." (citations omitted)); *AGC, 459 U.S. at 544* ("We observed that potential plaintiffs at each level in the distribution chain would **[*19]** be in a position to assert conflicting claims to a common fund, the amount of the alleged overcharge, thereby creating the danger of multiple liability for the fund and prejudice to absent plaintiffs."); see also *Loeb, 306 F.3d at 481* (***HN9***[] "*Illinois Brick* holds that the direct purchaser from the alleged antitrust violator(s) is the one with the right of action; those further removed from the illegal arrangement may not (under the federal antitrust laws, at least) bring their own actions."); *Int'l Bhd. of Teamsters, Local 734 Health & Welfare Trust Fund v. Philip Morris Inc., 196 F.3d 818, 825 (7th Cir. 1999)* ("[O]nly the immediate purchaser of goods may sue under the antitrust laws.").

Since *Illinois Brick* came down in 1977, antitrust defendants have tried to stretch its application to stand for the proposition that "a defendant cannot be sued under the antitrust laws by any plaintiff to whom it does not sell (or from whom it does not purchase)," but, as the Seventh Circuit has noted, "[s]uch a rule would eliminate in one fell swoop all competitor suits based on exclusionary practices," which is "a step that the Supreme Court has never taken." *Loeb, 306 F.3d at 481*. And the Supreme Court subsequently clarified that ***HN10***[] "the chain-of-distribution inquiry in *Illinois Brick* was meant only to preclude duplicate recovery." *Id.* (citing **[*20]** *McCready, 457 U.S. at 468-70*); see also *id. at 482* ("The reason the plaintiffs' suit in *Illinois Brick* failed was not because the defendants did *not* sell to them. Rather, it was because the defendants *did* sell to a third party who * * * could recover for any injury they claimed.").

Six years later, in 1983, the Supreme Court issued another opinion on antitrust standing—**HN11**[] *AGC*—providing a six-factor test for examining the link between a plaintiff's harm and a defendant's wrongdoing: (1) the causal connection between the violation and the harm; (2) the presence of improper motive; (3) the type of injury and whether it was one Congress sought to redress; (4) the directness of the injury; (5) the speculative nature of the damages; and (6) the risk of duplicate recovery or complex damage apportionment. *Loeb, 306 F.3d at 484* (citing *AGC, 459 U.S. at 537-45*). The "broad proposition" emanating from *AGC* is that "a party cannot recover when others more directly injured are better able to state a claim." *Id. at 489*.

At first glance, there appears to be some overlap between the *Illinois Brick* doctrine and the *AGC* six-factor test. In general, both tests relate to the directness of a plaintiff's injury. And specifically, several of the *AGC* factors—especially factor number six—echo the **[*21]** Court's ruling in *Illinois Brick*. See *Lorix, 736 N.W.2d at 628* (holding that the "complexity of apportionment and risk of duplicative recoveries" factor "was at the heart of *Illinois Brick*'s bar to indirect purchaser suits"). However, other courts have been quite clear in holding that *Illinois Brick* and *AGC* present separate, distinct inquiries. See *Int'l Bhd. of Teamsters, Local 734 Health & Welfare Trust Fund v. Philip Morris Inc., 196 F.3d 818, 825 (7th Cir. 1999)* (noting that the "direct-purchaser doctrine of *Illinois Brick* and the direct-injury doctrine of *Associated General Contractors* are analytically distinct" and are "independent obstacle[s] to recovery"); *Loeb, 306 F.3d at 475* ("We find that *Illinois Brick* presents no obstacle to any of the plaintiffs' claims but that the claims of the scrap copper dealers are precluded under *AGC*."); *DFA II, 2013 U.S. Dist. LEXIS 119962, 2013 WL 4506000, at *14* (noting that *AGC*, and specifically its "directness inquiry," "presents a separate hurdle to Indirect Purchasers' claims"); see also *Southard v. Visa USA Inc., 734 N.W.2d 192, 198-99 (Iowa 2007)* (adopting *AGC* despite its repealer statute); *Kanne v. Visa USA Inc., 272 Neb. 489, 723 N.W.2d 293, 298-300 (Neb. 2006)* (same).

This delineation between *Illinois Brick* and *AGC* is important because in reaction to *Illinois Brick*, multiple state legislatures—including the legislatures of all but one of the states at issue here—passed "repealer statutes" abrogating the Supreme Court's prohibition of indirect-purchaser actions as articulated **[*22]** in *Illinois Brick*. The key question is how, if at all, these repealer statutes impact the Court's application of *AGC* under each state's law.

To answer that question fully, the Court must (and will) review the language of the repealer statutes at issue, as well as the relevant case law interpreting those statutes. But the Court notes that while at least 25 states enacted repealer statutes in response to *Illinois Brick* (see *Lorix, 736 N.W.2d at 627*), the Court is not aware of any legislative action by any state expressly rejecting *AGC*. The fact that so many states took action in response to *Illinois Brick* shows that states are quite capable of rejecting federal ***antitrust law*** when they see fit to do so. *Illinois Brick* was decided in 1977 and *AGC* in 1983, so state legislatures have had ample time to pass equivalent "repealer statutes" regarding *AGC*. On the other hand, the Court recognizes that **HN12**[] by enacting a repealer statute, each state has taken some action to differentiate its antitrust-standing law from the federal landscape. In addition, despite the Seventh Circuit's recognition that *Illinois Brick* and *AGC* represent separate and distinct hurdles, this Court cannot overlook the overlap between some of the *AGC* ***[*23]*** factors and the *Illinois Brick* inquiry, which is not surprising since the *AGC* test was, at least in some ways, influenced by *Illinois Brick*. See, *e.g., Wrobel v. Avery Dennison Corp.*, No. 05-cv-1296, 2006 WL 7130617 (Kan. Dist. Ct., Feb. 1, 2006) (state court opinion), available at [574-1, at 6] ("Because '*AGC* incorporates, rather that repudiates, the principles of *Illinois Brick*,' one could argue that jurisdictions rejecting *Illinois Brick* would also reject the *AGC* standing test since its broad application would preclude most, if not all, indirect purchaser suits. In other words, applying *AGC* in a jurisdiction that recognizes indirect purchaser suits could effectively negate the legislative or judicial rejection of *Illinois Brick*." (quoting *McCarthy v. Recordex Serv., 80 F.3d 842, 851 (3d Cir. 1996)))*. But see *id.* ("Although this argument has some intuitive appeal, it fails to consider that '*AGC* and *Illinois Brick* address two analytically distinct aspects of antitrust standing." (quoting *McCarthy, 80 F.3d at 851*)). Ultimately, while the Court recognizes that similar policy concerns may have motivated both *Illinois Brick* and *AGC*, they remain separate and distinct tests. Accordingly, to determine whether a state's repealer statute has any impact on the state's willingness to apply *AGC*, the Court must review the **[*24]** specific language of the repealer statute and any associated case law.

C. State-by-State Analysis

With assistance from the parties, the Court now "undertake[s] the back-breaking labor involved in deciphering the state of antitrust standing in each of th[e] states on this motion" to determine whether to apply the *AGC* factors that the Court applied in dismissing Indirect Plaintiffs' federal antitrust claims. *In re Flash Memory Antitrust Litig., 643 F. Supp. 2d at 1153*.

1. California

Standing Provision:

HN13[] Much like the standing provision in the Clayton Act, California's Cartwright Act is broad in scope, permitting "[a]ny person who is injured in his or her business or property by reason of anything forbidden or declared unlawful by this chapter" to bring an antitrust action. *Calif. Bus. & Prof. Code § 16750 subd. (a)*.

Harmonization Provision:

California's harmonization provision is based in common law, and is well-recognized in the California Supreme Court. *Clayworth v. Pfizer, Inc., 49 Cal. 4th 758, 111 Cal. Rptr. 3d 666, 233 P.3d 1066, 1082 n.18 (Cal. 2010)* (explaining that the *Illinois Brick* repealer statute was necessary because federal antitrust cases are otherwise treated as applicable and authoritative on Cartwright Act questions); *Mailand v. Burckle, 20 Cal. 3d 367, 143 Cal. Rptr. 1, 572 P.2d 1142, 1147 (Cal. 1978)*; *Marin Cty. Bd. of Realtors, Inc. v. Palsson, 16 Cal. 3d 920, 130 Cal. Rptr. 1, 549 P.2d 833, 835 (Cal. 1976)* (noting that a "long line of California cases" has recognized that federal cases interpreting the *Sherman Act* are applicable to state antitrust cases because "both statutes have **[*25]** their roots in the common law"); *Cnty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)* ("[T]he Cartwright Act, *Cal. Bus. & Prof. Code § 16700 et seq.*, was modeled after the *Sherman Act*."). The California Supreme Court has rejected arguments that judicial interpretations of the Sherman and Clayton Acts "apply fully" to California's antitrust laws, noting that "[i]nterpretations of federal ***antitrust law*** are at most instructive, not conclusive, when construing the Cartwright Act." *Aryeh v. Canon Business Solutions, Inc., 55 Cal. 4th 1185, 151 Cal. Rptr. 3d 827, 292 P.3d 871, 877 (2013)*; see also *Samsun Electronics Co., Ltd. v. Panasonic Corp., 747 F.3d 1199, 1205 n.4 (9th Cir. 2014)*.

Illinois Brick Repealer Statute:

The California legislature took action "[w]ithin months of the decision," (*i.e.*, prior to the *AGC* decision), introducing Assembly Bill No. 3222 (1977-1978 Reg. Sess.) to prevent *Illinois Brick* "from having any effect on judicial interpretation of the Cartwright Act." *Clayworth, 233 P.3d at 1082*. The bill passed unanimously, and added a provision to the Act's standing provision stating that ***HN14***[] a person injured by an antitrust violator may bring suit "regardless of whether such injured person dealt directly or indirectly with the defendant." *Calif. Bus. & Prof. Code § 16750 subd. (a)*, added by Stats. 1978, ch. 536, § 1, p. 1693; see also *Clayworth, 233 P.3d at 1082* (citing *Union Carbide Corp. v. Superior Court, 36 Cal. 3d 15, 201 Cal. Rptr. 580, 679 P.2d 14, 19-20 (Cal. 1984))*.

Supreme Court/Appellate Court Law:

HN15[] California's intermediate appellate court has endorsed the application of the *AGC* factors in interpreting California's antitrust laws, despite the state's *Illinois Brick* repealer **[*26]** statute. See *In re Flash Memory Antitrust Litig., 643 F. Supp. 2d at 1151-52* (applying *AGC* under California law, noting that while the California Supreme

Court has not reached the issue, at least one of its intermediate appellate courts has applied *AGC* to its antitrust laws (citing *Vinci v. Waste Mgmt., Inc., 36 Cal. App. 4th 1811, 43 Cal. Rptr. 2d 337, 338-39 (Cal. 1995)))*. But see *In re Capacitors Antitrust Litig., 2015 U.S. Dist. LEXIS 68615, 2015 WL 3398199, at *13 (N.D. Cal. May 26, 2015)* ("The application of *AGC* to California state antitrust claims has recently become murky, and that murkiness persuades the Court *AGC* should not be applied."). The Ninth Circuit has also applied the *AGC* factors to assess standing under California ***antitrust law*** (albeit "more liberally"), noting only that the scope of the directness inquiry is broader under California law based on the state's repeal of *Illinois Brick*. See *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 987-91 (9th Cir. 2000)*; see also *Clayworth, 233 P.3d at 1077* (citing *AGC* and *Vinci* as cases that dealt with antitrust causation, and then noting that these cases have "nothing to say on the general topic that concerns us: when (as here) causation *has* been properly alleged, how are antitrust damages to be measured?").

Analysis:

The Court agrees with the *In re Flash Memory Antitrust Litigation* court, which followed *Vinci* in applying the *AGC* factors to antitrust claims brought under the Cartwright Act. The Court is mindful that, as the Ninth Circuit mentioned, ***HN16***[] California's antitrust-standing provision **[*27]** is broader in some respects than federal antitrust-standing law because of California's repealer statute, but the Court also recognizes that California's repealer statute applied only to *Illinois Brick*, and *Illinois Brick* and *AGC* are separate inquiries. See *In re Refrigerant Compressors Antitrust Litig., 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *10*. Absent any binding California law to the contrary, the appellate court decision in *Vinci* and the moderately-deferential harmonization provision remain the best indicators of how the California Supreme Court would address the issue, and both lean in favor of applying *AGC* to claims brought under the Cartwright Act.

2. Kansas

Standing Provision:

HN17[] Kansas also has a broadly-worded antitrust-standing provision, stating that a cause of action "may be brought by any person who is injured in such person's business or property by reason of" an antitrust violation. *Kan. Stat. Ann. § 50-161(b)*.

Harmonization Provision:

Kansas is one of the two states at issue with a statutory harmonization provision. See *Kan. Stat. Ann. § 50-163(b)* (***HN18***[] "Except as otherwise provided in subsections (d) and (e), the Kansas restraint of trade act shall be construed in harmony with ruling judicial interpretations of federal ***antitrust law*** by the United States [S]upreme [C]ourt. If such judicial interpretations are in conflict with or inconsistent with the **[*28]** express provisions of subsection (c), the provisions of subsection (c) shall control."). The harmonization provision also is echoed in Kansas's case law. See *O'Brien v. Leegin Creative Leather Prods., Inc., 321 P.3d 799, 2014 Kan. App. Unpub. LEXIS 221, *13, at *5 (Kan. Ct. App. 2014)* (noting the Kansas legislature's recent amendment of the Kansas Restraint of Trade Act, and the legislature's instruction that "its provisions will be 'construed in harmony' with the United States Supreme Court's antitrust decisions" (citing *Kan. State. Ann. 2013 Supp. 50-163(b)*, *(c)*)); *Smith v. Philip Morris Cos., Inc., 50 Kan. App. 2d 535, 335 P.3d 644, 652 (Kan. Ct. App. 2014)* (same). ***HN19***[] The Supreme Court of Kansas has noted that while it is "certainly foreseeable" that it would apply federal ***antitrust law*** in interpreting Kansas's antitrust laws and that such law would be "persuasive authority," ultimately federal ***antitrust law*** "is not binding upon any court in Kansas interpreting Kansas ***antitrust law***." *Bergstrom v. Noah, 266 Kan. 829, 974 P.2d 520, 531 (Kan. 1999)*.

Illinois Brick Repealer Statute:

Similar to other states, ***HN20***[] Kansas's repealer statute provides that a cause of action may be brought "regardless of whether such injured person dealt directly or indirectly with the defendant." *Kan. Stat. Ann. § 50-161(b)*.

Supreme Court/Appellate Court Law:

Neither the parties nor the Court have located any appellate court decisions in Kansas discussing antitrust standing. At least one Kansas district court (*i.e.*, Kansas's trial court) has addressed the issue, concluding **[*29]** that Kansas courts should apply *AGC* despite its repealer statute:

> Because "*AGC* incorporates, rather than repudiates, the principles of *Illinois Brick*," one could argue that jurisdictions rejecting Illinois Brick would also reject the AGC standing test since its broad application would preclude most, if not all, indirect purchaser suits. In other words, applying *AGC* in a jurisdiction that recognizes indirect purchaser suits could effectively negate the legislative or judicial rejection of *Illinois Brick*.
>
> Although this argument has some intuitive appeal, it fails to consider that "*AGC* and *Illinois Brick* address two analytically distinct aspects of antitrust standing." In *AGC*, the Court was primarily concerned with the remoteness of the plaintiff's injury and whether it was too far removed from the antitrust injury to warrant a section 4 remedy. "This inquiry, akin to the determination of 'proximate cause' in the negligence context, is subtle and resists the use of hard-and-fast 'black letter' rules." In *Illinois Brick*, however, the Court created a bright-line rule that focused "exclusively on the risk of duplicative recovery and potential for overly-complex damages and apportionment calculations." **[*30]** Viewed in this context, the Court finds that the *AGC* standing test may be applied to this action even though the KRTA specifically contemplates indirect purchaser suits. The Court, therefore, agrees with Defendants that "the KRTA does not implicitly grant standing to every antitrust plaintiff who characterizes himself as an 'indirect purchaser.'"

Wrobel, No. 05-cv-1296, 2006 WL 7130617, available at [574-1, at 6-7] (internal citations omitted). Several federal courts have also applied *AGC* to antitrust-standing questions under Kansas law. See, *e.g., Orr v. Beamon, 77 F. Supp. 2d 1208, 1212 (D. Kan. 1999)*; *DRAM, 516 F. Supp. 2d at 1094*; *Sahagian v. Genera Corp., 2009 U.S. Dist. LEXIS 132583, 2009 WL 9504039, at *6 (C.D. Cal. July 6, 2009)*; *In re Refrigerant Compressors Antitrust Litig., 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *10*.

Analysis:

In Kansas, the only known state court to cite to *AGC* elected to adopt and apply the *AGC* test, despite the state's repeal of *Illinois Brick*. See *Wrobel*, No. 05-cv-1296, 2006 WL 7130617, available at [574-1, at 6] ("[T]he Court finds that the *AGC* standing test may be applied to this action even though the KRTA specifically contemplates indirect purchaser suits."); see also *Orr, 77 F. Supp. 2d at 1211* ("In finding no Kansas cases to the contrary, the court concludes that standing under the Kansas antitrust statutes requires an antitrust injury similar to that required under the Sherman and Clayton Acts."); *DRAM, 516 F. Supp. 2d at 1093-94* (holding that Kansas courts "would support application of the *AGC* test in assessing **[*31]** antitrust standing").

Although the court in *In re Potash Antitrust Litigation* elected not to follow *Wrobel, Orr*, or *DRAM* in its decision not to apply *AGC* in interpreting Kansas's antitrust laws, see *667 F. Supp. 2d at 944*, the court did not cite any authority contradicting those cases, and simply found the supporting authority to be insufficient. This Court is not persuaded by the *Potash* analysis, and instead finds the well-reasoned *Wrobel* opinion to be more indicative of how the Kansas Supreme Court would address the application of *AGC.*

Nor is the Court persuaded by the Kansas cases that mention the fact that federal ***antitrust law*** is not binding on Kansas courts. See, *e.g., Bergstrom, 974 P.2d at 531*; *O'Brien v. Leegin Creative Leather Prods., Inc., 294 Kan. 318, 277 P.3d 1062, 1068 (Kan. 2012)*. First off, these are not antitrust-standing cases, and they do not address *AGC.* But perhaps more persuasively, since the *Bergstrom* and *O'Brien* decisions,***HN21***[] the Kansas legislature has amended KRTA to provide that it "shall be construed in harmony with ruling judicial interpretations of federal ***antitrust law*** by the United States supreme court." *Kan. Stat. Ann. § 50-163(b)*. Accordingly, and absent any binding authority to the contrary, the Court is persuaded that the Kansas Supreme Court would apply *AGC* in interpreting antitrust standing under KRTA.

3. Michigan

Standing **[*32]** Provision:

HN22[] Michigan affords a right to sue under its antitrust reform act to "[a]ny * * * person threatened with injury or injured directly or indirectly in his or her business or property by a violation of th[e] act." *Mich. Comp. Laws § 445.778(2)*.

Harmonization Provision:

Michigan is the other state at issue with a statutory harmonization provision. See *Mich. Comp. Laws § 445.784(2)* (***HN23***[] "It is the intent of the legislature that in construing all sections of this act, the courts shall give due deference to interpretations given by the federal courts to comparable antitrust statutes, including, without limitation, the doctrine of per se violations and the rule of reason."); *Salmon v. City of Cadillac, 2005 Mich. App. LEXIS 3117, 2005 WL 3416119, at *5 (Mich. Ct. App. Dec. 13, 2005)* (***HN24***[] "[B]ecause Michigan's antitrust legislation is patterned after federal antitrust legislation, federal court decisions applying the *Sherman Act* are persuasive authority in interpreting the [Michigan Antitrust Reform Act]."); *Mercy Mem'l Hosp. v. Porter, 1999 Mich. App. LEXIS 2243, 1999 WL 33326821, at *3 (Mich. Ct. App. Dec. 21, 1999)* (same); *Elias v. Fed. Home Loan Mortg. Corp., 581 F. App'x 461, 468-69 (6th Cir. 2014)*.

Illinois Brick Repealer Statute:

HN25[] Michigan's repealer statute extended antitrust standing to any person "threatened with injury or injured directly or indirectly." *Mich. Comp. Laws § 445.778(2)*.

Supreme Court/Appellate Court Law:

The only opinion from a Michigan court citing *AGC* is a circuit court opinion (*i.e.*, not an appellate-court decision), where the court applied *AGC* despite Michigan's repealer **[*33]** statute:

> [T]his Court agrees with Defendants that it does not necessarily follow that Michigan's repeal of the *Illinois Brick* rule also eliminated the *Associated General Contractors* standing requirements. The Supreme Court in *Illinois Brick* made clear that its decision addressed only whether there should be a bar on "indirect purchaser" suits. It expressly "d[id] not address the standing issue," explaining that the "indirect purchaser" question is "analytically distinct from the question of which persons have sustained injuries too remote to give them standing to sue."

Stark v. Visa U.S.A. Inc., 2004 Extra LEXIS 214, 2004 WL 1879003, at *4 (Mich. Cir. Ct. July 23, 2004) (citing *Illinois Brick, 431 U.S. at 728 n.7*.). The *Stark* court also noted that ***HN26***[] "while Michigan appellate courts have not developed a test for determining when a plaintiff's injury is too remote to permit suit under [the Michigan Antitrust Reform Act], the Act requires courts to give 'due deference to interpretations given by the federal courts to comparable antitrust statutes.'" *Id.* (citing *Mich. Comp. Laws § 445.784(2)*). This nuanced understanding of the distinction between *Illinois Brick* and *AGC*, coupled with this application of the plain language of Michigan's harmonization provision, have inspired other courts to apply *AGC* to questions of antitrust standing under Michigan law. See, *e.g.,* ***[*34]*** *In re Ductile Iron Pipe Fittings Indirect Purchaser Antitrust Litig., 2013 U.S. Dist. LEXIS 142466, 2013 WL 5503308, at *15 (D.N.J. Oct. 2, 2013)*; *In re Cathode Ray Tube Antitrust Litig., 2013 U.S. Dist. LEXIS 119598, 2013 WL 4505701, at *9 (N.D. Cal. Aug. 21, 2013)*; *In re Refrigerant Compressors Antitrust Litig., 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *10*; *Sahagian, 2009 U.S. Dist. LEXIS 132583, 2009 WL 9504039, at *6*; *DRAM, 516 F. Supp. 2d at 1094*.

Analysis:

The combination of the *Stark* decision and Michigan's harmonization provision persuades the Court that ***HN27***[] the Michigan Supreme Court would apply the *AGC* factors to assess antitrust standing, and the Court sees no evidence to the contrary, binding or otherwise.

4. Minnesota

The Court need not delve heavily into Minnesota law, as the Minnesota Supreme Court has already made clear that the *AGC* factors conflict with Minnesota ***antitrust law***.

Standing Provision:

HN28[] "Any person" injured by an antitrust violation may sue under Minnesota's ***antitrust law***. *Minn. Stat. § 325D.57*.

Harmonization Provision:

HN29[] "Minnesota law is generally interpreted consistently with federal ***antitrust law***." *Lorix, 736 N.W.2d at 626* (citing *Minn. Twins P'ship v. State, 592 N.W.2d 847, 851 (Minn. 1999))*.

Illinois Brick Repealer Statute:

HN30[] "In 1984, our legislature added the words 'directly or indirectly' to *Minn. Stat. § 325D.57* to make clear that, contrary to *Illinois Brick*, Minnesota ***antitrust law*** permits indirect purchasers to recover." *Lorix, 736 N.W.2d at 626-27*.

Supreme Court/Appellate Court Law:

The Minnesota Supreme Court is the only known state supreme court to reject (in most part, at least) the adoption of the *AGC* factors. *Lorix, 736 N.W.2d at 632* ("The *AGC* factors * * * do not provide the benchmark for standing under Minnesota ***antitrust law***.").

Analysis:

In light of *Lorix*, the Court will **[*35]** not apply the *AGC* factors to Plaintiffs' claims under Minnesota law.

Importantly, though, despite holding that the lower courts "erred in applying *AGC*," the *Lorix* court nonetheless noted that its rejection of *AGC* "d[id] not necessarily mean that Lorix ha[d] standing." *Lorix, 736 N.W.2d at 630*. Thus—although the Court is jumping the gun a bit by addressing this here—it is relevant to understand what antitrust-standing rules Minnesota does apply before deciding whether Plaintiffs' claims would pass muster in that court.

In spite of its refusal to adopt *AGC*, the *Lorix* court still acknowledged that some of the *AGC* factors overlap with Minnesota's antitrust-standing inquiry. Specifically, the court noted that ***HN31***[] "[w]hile Minnesota courts should analyze an alleged injury's relation to the goals of ***antitrust law*** by identifying the markets involved, the market analysis is not the focus of the standing inquiry." *Lorix, 736 N.W.2d at 628*. The court also noted that "whether the damages are speculative[] is relevant to standing under the Minnesota ***antitrust law***." *Id.* And most importantly here, the court conceded that despite the broad language of its antitrust provision, "there are injuries so remotely related to antitrust violations that courts simply cannot provide **[*36]** relief," such that "[s]tanding under Minnesota ***antitrust law*** must be defined by some prudential limits informed by foreseeability, proximate cause, remoteness, and relation of the injury to the purposes of the ***antitrust law***; otherwise, almost any antitrust violation would provide almost any citizen with a cause of action arising from the resulting ripples of harm throughout the state's economy." *Id. at 631*.

Lorix (the indirect purchaser) bought tires that were manufactured with price-fixed chemicals. *Lorix, 736 N.W.2d at 622-23*. Refusing to define the outer limits of standing under Minnesota law, the court held that Lorix had standing because "she is an end user of a consumer good whose price was inflated by anticompetitive conduct earlier in the chain of manufacture," and that "as an end user, Lorix is the party most likely to be injured by an anticompetitive overcharge because she is the only party in the chain of purchase who cannot pass on part or all of that overcharge." *Id. at 631*. The court affirmatively rejected any "market-participant requirement," and held that "indirect purchasers of goods manufactured with price-fixed components" had standing to sue under Minnesota law. *Id. at 628*. However, the court did give one example of an **[*37]** indirect-purchaser injury that would be too remote to establish standing: namely, the Visa/Mastercard litigation cases where consumers alleged that they paid more for consumer goods due to Visa and Mastercard's illegal tying of debit card services with credit card services. *Id. at 632* (citing *Gutzwiller v. Visa USA, Inc., 2004 Minn. Dist. LEXIS 19, 2004 WL 2114991 (Minn. Dist. Ct. Sept. 15, 2004)*). It was the fact that the overcharges stemming from these violations "were passed on to consumers in the form of higher prices on essentially every good sold in the state of Minnesota" that led the *Lorix* court to declare that consumer standing should not "allow[] every person in the state to sue for an antitrust violation simply by virtue of his or her status as a consumer." *Id.*

To round out this analysis, the Court must predict whether the Minnesota Supreme Court would find that Indirect Plaintiffs have antitrust standing under Minnesota law without relying on the *AGC* factors. As a starting point, the injury here is certainly more remote than the injury in *Lorix*. In *Lorix*, the alleged antitrust-violators (*i.e.*, the chemical manufacturers) sold chemicals to tire manufacturers, who produced tires that were eventually sold to consumers. The path from the price-fixed thing (*i.e.*, tire chemicals) to the **[*38]** end product (*i.e.*, consumer tires) was short and narrow (or, as the *Lorix* court described it, "relatively focused"), and the list of affected individuals and entities (*e.g.*, tire manufacturers, tire wholesalers/distributors/retailers, and tire consumers) was small. Here, the alleged antitrust-violators dealt in spot cheese and milk futures bought and sold on a commodities exchange, which allegedly translated to higher prices in the physical markets of milk and cheese products (finished dairy products) across the country. The leap from the commodities exchange to the vast end-user market here is sizeable, and making that leap would result in a grant of standing to any individual who purchased any product containing milk or cheese in the United States. To be clear, the ubiquity of the end-user product is not the problem (*i.e.*, there is no too-big-to-sue doctrine), but such a scenario presents a red flag as to the potential remoteness of the alleged injury. For example, while the chain in *Lorix* could be described as pyramidal (increasing in size from the original violators to the secondary and tertiary markets), the chain that Indirect Plaintiffs present begins with a similar pyramid **[*39]** but adds an exponentially larger tier to the bottom that overshadows the actual offense. In other words, by extending the alleged antitrust violation across markets and then further extending it to include all consumers of finished dairy products, Indirect Plaintiffs have transformed a "relatively focused" antitrust scheme into a distorted and overly broad arrangement that masks the underlying violation and highlights the remoteness of Indirect Plaintiffs' injury.

In addition, *Lorix* was a "component" case, where the price-fixed product was a component of the end-user product. *Id. at 633* ("Antitrust laws * * * provide a remedy for consumers who have purchased goods manufactured with price-fixed components."). But here, the spot cheese and milk futures are not components of finished milk products. See *DFA II, 2013 U.S. Dist. LEXIS 119962, 2013 WL 4506000, at *14 n.13* (noting that "the causal connection is even more attenuated and complicated here * * * because the allegedly price-fixed products are not components of the finished goods."). Further, in addition to conceding that it would still consider certain of the *AGC* factors, the Minnesota Supreme Court favorably cited the Minnesota district court's *Gutzwiller* decision, which denied standing to a plaintiff **[*40]** who was "not a consumer * * * in the allegedly restrained market." *Gutzwiller, 2004 Minn. Dist. LEXIS 19, 2004 WL 2114991, at *6*; see also *Lorix, 736 N.W.2d at 628* (noting that while it's not "the focus of the standing inquiry," "courts should analyze an alleged injury's relation to the goals of ***antitrust law*** by identifying the markets involved"); *id. at 626* (noting that "the purposes of Minnesota and federal ***antitrust law*** are the same," and that "[t]he primary purpose of antitrust laws is to protect interbrand competition" (citing *State Oil Co. v. Khan, 522 U.S. 3, 14, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*). And regarding *Lorix*'s instruction that the court focus on the purpose of the antitrust laws in assessing standing, as the *Gutzwiller* court noted, "this is obviously not a situation where the [alleged] antitrust violators will go unpunished," *2004 Minn. Dist. LEXIS 19, 2004 WL 2114991, at *9*, which is a sentiment that this Court has already articulated. See *DFA II, 2013 U.S. Dist. LEXIS 119962, 2013 WL 4506000, at *14* ("[B]y denying Indirect Plaintiffs leave to proceed with their * * * antitrust claims, the Court would not 'leave a significant antitrust violation undetected or unremedied.'" (quoting *Kochert v. Greater Lafayette Health Servs., 463 F.3d 710, 718-19 (7th Cir. 2006))*).

The facts here align more with the facts in the Visa/Mastercard cases (including *Gutzwiller*) than the facts in *Lorix*, implying that even the Minnesota Supreme Court would draw a line somewhere along this extended, mixed-market chain. Ultimately, despite the *Lorix* **[*41]** court's refusal to adopt *AGC*, the Court is nonetheless persuaded by the court's citation to *Gutzwiller* as well as its concession that ***HN32***[] any assessment of antitrust standing must be "informed by foreseeability, proximate cause, remoteness, and relation of the injury to the purposes of the ***antitrust law***" in holding that the Indirect Plaintiffs' injuries are too remote and speculative to afford standing under Minnesota ***antitrust law***. *Lorix, 736 N.W.2d at 629*.

5. New York

Standing Provision:

Similar to the other standing provisions reviewed herein, ***HN33***[] New York law extends standing to "any person who shall sustain damages by reason of any violation" of the state's antitrust act (called the Donnelly Act). *N.Y. Gen. Bus. Law § 340*.

Harmonization Provision:

New York's top court recently clarified that ***HN34***[] while New York courts generally construe the Donnelly Act in harmony with federal antitrust case law, it is "well settled" that New York courts interpret the Donnelly Act differently "where State policy, differences in the statutory language or the legislative history justify such a result." *Sperry v. Crompton Corp., 8 N.Y.3d 204, 863 N.E.2d 1012, 1018, 831 N.Y.S.2d 760 (N.Y. 2007)*; see also *Anheuser-Busch, Inc. v. Abrams, 71 N.Y.2d 327, 520 N.E.2d 535, 539, 525 N.Y.S.2d 816 (N.Y. 1988)* ("Although we do not move in lockstep with the Federal courts in our interpretation of ***antitrust law***, the Donnelly Act—often called a 'Little *Sherman Act*'—should generally be construed in light of Federal precedent and given a different interpretation only where State policy, differences in the statutory language or the legislative history justify such a result." (internal citations omitted)).

Illinois Brick Repealer Statute:

HN35[] New York's repealer statute specifies that a person who sustains damages as a result of an antitrust violation shall **[*42]** not have his or her recovery limited due to the fact that the person "has not dealt directly with the defendant." See *N.Y. Gen. Bus. Law § 340*.

Supreme Court/Appellate Court Law:

New York's Court of Appeals, its highest court, has not weighed in on the application of the *AGC* factors under the Donnelly Act. New York's Appellate Division, its second-highest court, has endorsed the lower court's application of the *AGC* factors in two indirect-purchaser cases. See *Ho v. Visa USA, Inc., 16 A.D.3d 256, 793 N.Y.S.2d 8, 8-9 (N.Y. App. Div. 2005)* (affirming the dismissal of plaintiffs' antitrust claims due to "the remoteness of their damages from the alleged injurious activity"), *aff'g*, *3 Misc. 3d 1105[A], 787 N.Y.S.2d 677, 2004 NY Slip Op 50415[U] (N.Y. Sup. Ct. 2004)* (applying the *AGC* factors in determining that "plaintiffs' alleged injury is far too remote to provide antitrust standing under the Donnelly Act"); *State ex rel. Spitzer v. Daicel Chem. Indus., Ltd., 42 A.D.3d 301, 840 N.Y.S.2d 8, 12 (N.Y. App. Div. 2007)* (affirming the dismissal of claims where the plaintiff's injury was "too remote" from the alleged wrongdoing), *aff'g in relevant part, sub nom. State v. Daicel Chem. Indus., Ltd., 2005 N.Y. Misc. LEXIS 8435, 2005 WL 6056054 (Sup. Ct. Aug. 9, 2005)*; see also *Williams v. Citigroup, Inc., 36 Misc. 3d 1201[A], 954 N.Y.S.2d 762, 2012 NY Slip Op 51145[U], at *4 (N.Y. Sup. Ct. 2012)* (finding that plaintiffs "damages [we]re too remote 'from the alleged injurious activity' to confer standing," citing *Ho*).

Other courts have followed suit in finding that New York's highest court would likewise apply the *AGC* factors to issues of antitrust standing under the Donnelly Act. See, *e.g., In re Refrigerant Compressors Antitrust Litig., 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *10*; *Sahagian v. Genera Corp., 2009 U.S. Dist. LEXIS 132583, 2009 WL 9504039, at *6 (C.D. Cal. July 6, 2009)* (applying *AGC* under **[*43]** New York law, noting that *HN36*[] "where state courts and legislatures have indicated that they would look to federal antitrust precedent in applying [their ***antitrust law***], it seems that at the very least courts would require plaintiffs in antitrust actions to plausibly allege that they were participants in the relevant product market where the alleged anti-competitive activity took place."); *Nichols v. Mahoney, 608 F. Supp. 2d 526, 545 (S.D.N.Y. 2009)* ("[I]f the plaintiffs do not have standing to assert a federal antitrust claim, they do not have standing to bring a Donnelly Act claim."). But see *In re Ductile Iron Pipe Fittings Indirect Purchaser Antitrust Litig., 2013 U.S. Dist. LEXIS 142466, 2013 WL 5503308, at *16* ("The Court is not persuaded that the *AGC* test applies to New York * * * ***antitrust law***. In reaching this conclusion, the Court notes that Defendants have not cited any state appellate cases to show that the highest court in [New York] would apply the *AGC* factors in th[at] state[].")

Analysis:

New York's lower- and mid-level courts have consistently endorsed the application of the *AGC* factors in assessing antitrust standing, in accordance with the state's harmonization provision. The Court has no reason to believe that New York's highest court would not do the same. Accordingly, the Court will apply the *AGC* factors in determining whether Indirect Plaintiffs have standing **[*44]** under New York's Donnelly Act.

6. North Carolina

Standing Provision:

HN37[] North Carolina grants standing to "any person" injured by an antitrust violation. *N.C. Gen. Stat. § 75-16*.

Harmonization Provision:

HN38[] North Carolina's harmonization provision, arising from common law, is similar to the New York provision, which recognizes the federal opinions interpreting the *Sherman Act* are instructive, but not binding, when interpreting its antitrust statute. *Madison Cablevision, Inc. v. Morganton, 325 N.C. 634, 386 S.E.2d 200, 213 (N.C. 1989)* (citing *Rose v. Vulcan Materials Co., 282 N.C. 643, 194 S.E.2d 521, 530 (N.C. 1973))*.

Illinois Brick Repealer Statute:

HN39[] North Carolina does not have a repealer statute, although the North Carolina Court of Appeals deemed such a provision unnecessary, claiming that North Carolina's standing provision is broad enough to incorporate indirect purchasers. See *Hyde v. Abbott Lab., Inc., 123 N.C. App. 572, 473 S.E.2d 680, 684-87 (N.C. Ct. App. 1996)* ("We find that a slight risk of multiple liability is greatly outweighed by the benefit of advancing the aforementioned policies of [North Carolina's Antitrust Act]."). In addition, the "legislative history also leads to the conclusion that the General Assembly intended to create indirect purchaser standing to sue under the state antitrust laws." *Crouch v. Crompton Corp., 2004 NCBC LEXIS 6, 2004 WL 2414027, at *11 (N.C. Super. Ct. Oct. 28, 2004)*. The *Crouch* court nonetheless realized that this broad reading of North Carolina's standing provision conflicts with the states harmonization provision, **[*45]** resolving that "unless and until *Hyde* is overruled by the Supreme Court or new legislation is passed, this Court is bound by the decision in *Hyde* to the extent that it holds that indirect purchasers have standing under the North Carolina antitrust laws."

Supreme Court/Appellate Court Law:

There are two North Carolina cases that discuss the application of *AGC.* First is the appellate court case of *Teague v. Bayer AG, 195 N.C. App. 18, 671 S.E.2d 550 (N.C. Ct. App. 2009)*. While *Teague* did not reject the application of *AGC* in general, it did reject its application to the facts of that case.[2] *Id. at 556-57*. The court (somewhat questionably) distinguished the facts of its case from those in *AGC* "in several relevant ways," noting that "the plaintiff in *AGC* was not an indirect purchaser, * * * was not a person injured by reason of an antitrust violation * * * [and] alleged breach of a collective-bargaining agreement and not antitrust violations." *Id. at 556*. Because the court viewed its case as one that involved indirect-purchaser standing, it applied its reasoning in *Hyde* in holding that allowing indirect-purchaser standing would "best advance the legislative intent that such violations be deterred, and that aggrieved consumers have a private cause of action to redress [antitrust] **[*46]** violations." *Id. at 558*.

Despite its sometimes-dubious and often-difficult-to-follow analysis, *Teague* cannot be interpreted as a wholesale rejection of *AGC.* The indirect plaintiffs in *Teague* alleged that defendants engaged in a price fixing scheme over a synthetic rubber product called EPDM, which was a key component in many rubber-based products that defendants manufactured, marketed, sold, and/or distributed to plaintiffs, including certain roofing materials. *Id. at 553*. At a minimum, *Teague* is distinguishable as a single-market component case involving indirect purchasers, as opposed to a mixed-market case where the price-fixed thing is not a component of end-user product and the Indirect Purchaser Plaintiffs are not—at least under the *Teague* standard—indirect purchasers. See, *e.g., Teague, 671 S.E.2d at 556-57* (distinguishing several cases that applied the *AGC* factors, noting that the **[*47]** plaintiffs in those cases were not indirect purchasers because "plaintiffs did not end up with a product supplied by the defendants").

More persuasive is the North Carolina Superior Court's decision in *Crouch v. Crompton Corp., 2004 NCBC LEXIS 6, 2004 WL 2414027*. Although a lower-court decision, this densely-packed and well-supported opinion reconciles *Hyde* and the legislative history of the North Carolina Antitrust Act with the *Illinois Brick* and *AGC* opinions, resolving to apply a modified version of the *AGC* test to determine antitrust standing that retains the proximate-

---

[2] *Teague* relied on an Iowa district court decision that rejected the *AGC* factors in determining an indirect purchaser's standing because "*AGC* did not involve price fixing and because the plaintiffs in *AGC* were competitors rather than purchasers." *671 S.E.2d at 557* (citing *Anderson Contracting, Inc. v. Bayer AG*, 2005 WL 6939352 (Iowa Dist. Ct. May 31, 2005)). Two years later, the Iowa Supreme Court made clear that *AGC* applies under Iowa law. *Southard, 734 N.W.2d at 198-99*.

cause inquiry inherent in *AGC* while still respecting *Illinois Brick*'s ban on indirect-purchaser actions. 2004 NCBC LEXIS 6, [WL] at *19 (discussing the modified five-factor inquiry in detail). The facts of *Crouch* mirror those of the *Lorix* case from Minnesota, where the indirect plaintiffs were purchasers of tires made with an allegedly price-fixed rubber component (*i.e.*, a mixed-market scheme involving both the chemicals market and the rubber market). Recognizing that "[t]here is no bright line test" and that "each situation must be considered on its facts and the factors applied" where "[d]ifferent factors might be important in different cases," 2004 NCBC LEXIS 6, [WL] at *20, the court ultimately found that the indirect purchasers lacked antitrust **[*48]** standing based on a combination of all five *AGC* factors, all of which weighed against standing to some extent. 2004 NCBC LEXIS 6, [WL] at *24-25.

Other courts have reviewed North Carolina's case law and statutory provisions in determining that North Carolina's highest court would apply the *AGC* factors, including at least one case decided after *Teague*. See, *e.g.,* Sahagian, 2009 U.S. Dist. LEXIS 132583, 2009 WL 9504039, at *6; DRAM, 516 F. Supp. 2d at 1087-89.

Analysis:

Based predominantly on *Crouch* and the distinguishing facts of *Teague*, the Court is persuaded that the North Carolina Supreme Court would adopt and apply the *AGC* factors, at least in modified form. Despite its precedential value, the Court finds that the *Teague* opinion—which rejects a strict application of the *AGC* factors—is both distinguishable on its facts and questionable in its failure to recognize the analytical distinction between the *Illinois Brick* and *AGC* inquiries. While casting *Crouch* in a negative light, *Teague* did not expressly overrule that opinion, and because *Crouch* is both the better-reasoned of the two opinions and the case most factually-similar to Indirect Plaintiffs' position, ***HN40***[] it is likely that North Carolina's highest court would follow *Crouch* and *AGC* in determining whether Indirect Plaintiffs lack antitrust standing under **[*49]** North Carolina ***antitrust law***.

D. Antitrust Standing Analysis

To recap, the Court has concluded that the highest courts in five of the six states at issue (California, Kansas, Michigan, New York, and North Carolina) would apply *AGC*, with Minnesota being the one outlier. But the Court also determined that despite its rejection of *AGC*, the Minnesota Supreme Court nonetheless recognizes prudential limits to antitrust standing such that it would likely find Indirect Plaintiffs' injuries too remote and speculative to award standing.

With regard to the five *AGC*-applying states, the Court reaffirms its prior reasoning with regards to Indirect Plaintiffs' federal antitrust claims in holding that Indirect Plaintiffs lack antitrust standing under *AGC.* See DFA II, 2013 U.S. Dist. LEXIS 119962, 2013 WL 4506000, at *9-14. This remains true even under a modified *AGC* test that takes into account the many repealer statutes at play in the states at issue, as well as any common-law protections afforded to indirect purchasers. This decision is driven by several key factors, including (1) that this is a mixed-market case, where damages inflicted on the physical commodity market are not derivative of injuries in the futures market and the price-fixed products are not **[*50]** components of the finished goods, (2) the remoteness of Plaintiffs' injuries, highlighted by the long chain of more-immediate victims that precede Plaintiffs, and (3) the rapid and over-inclusive expansion of the causal chain required to reach Plaintiffs. And while the Direct Purchasers here were in a better position to remedy the alleged antitrust violation (and likewise to ensure that an alleged antitrust violation will not go undetected), the Court does not hold that Direct Purchasers are necessarily the only actors in the causal chain who have antitrust standing to sue; rather, the Court holds only that Indirect Plaintiffs' injuries are too remote and speculative to afford them antitrust standing.

E. Remoteness Doctrine in Monopolization Claims

Indirect Plaintiffs alleged both price-fixing and monopolization claims under various states' antitrust laws. Although the parties do not directly address the issue, the Court must decide whether its antitrust-standing analysis applies equally to both types of antitrust claims.

Judge Hibbler touched on this issue in *DFA I*, concluding that there was no precedent "suggest[ing] that the standing analysis should differ between claims under *§ 1* and *§ 2* simply because **[*51]** monopolization plaintiffs must prove the existence of a relevant market." *DFA I, 767 F. Supp. 2d at 907*. And other courts have applied the *AGC* antitrust-standing test to claims under *§ 2* of the Sherman Act (*i.e.*, the monopolization provision) without alteration. See, *e.g.*, *In re DDAVP Direct Purchaser Antitrust Litig., 585 F.3d 677, 687-92 (2d Cir. 2009)*; *NicSand, Inc. v. 3M Co., 507 F.3d 442, 449-50 (6th Cir. 2007)* (en banc); *Angelico v. Lehigh Valley Hosp., Inc., 784 F.3d 273-75 (3d Cir. 1999)*; see also *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 416-18, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (Stevens, J., dissenting) (endorsing the dismissal of a monopolization claim for lack of antitrust standing, citing *AGC*).

The Court sees no reason why Indirect Plaintiffs' shortcomings in failing to establish antitrust standing for their price-fixing claims should not preclude them from raising their monopolization claims as well. Accordingly, because Indirect Plaintiffs lack antitrust standing, their price-fixing claims brought under state antitrust laws (*i.e.*, *Cal Bus. & Prof. Code § 16726*, *Kan. Stat. Ann. § 50-112*, *Mich. Comp. Laws § 445.772*, *Minn. Stat. §§ 325D.51* and *325D.53*, *N.Y. Gen Bus. Law § 340*, and *N.C. Gen Stat. § 75-1*), and their monopolization claims brought under state antitrust laws (*Mich. Comp. Laws § 445.773*, *Minn. Stat. § 325D.52*, and *N.C. Gen. Stat. § 75-2.1*) [see 483, ¶¶ 103(b), (d)-(h), 104(d)-(f)] are dismissed.

F. Remoteness Doctrine in Consumer-Protection Claims

Because of variances in the relevant states' price-fixing and monopolization laws, in addition to invoking claims under various state antitrust statutes, Indirect Plaintiffs also raised price-fixing and monopolization claims under several **[*52]** states' consumer-protection statutes. Specifically, Indirect Plaintiffs have raised price-fixing claims under four consumer-protection statutes (*Ark. Code § 4-88-107* (Arkansas Deceptive Trade Practices Act), *Cal. Bus. & Prof. Code § 17200* (California Unfair Competition Law), *Fla. Stat. § 501.204* (Florida Deceptive and Unfair Trade Practices Act), and *N.C. Gen Stat. § 75-1.1* (North Carolina Unfair and Deceptive Trade Practices Act) and monopolization claims under three consumer-protection statutes (*Ark. Code § 4-88-107*, *Cal. Bus. & Prof. Code § 17200*, and *Fla. Stat. § 501.204*). [See 483, ¶¶ 103(a)-(c), (h), 113(a)-(c).] In two instances, Indirect Plaintiffs raised price-fixing claims in the alternative, invoking both the states' antitrust and consumer-protection provisions (*i.e.*, California and North Carolina). [See 483, ¶ 103(b), (f), (h).]

The question is whether Indirect Plaintiffs' lack of antitrust standing also disposes of their price-fixing and monopolization claims brought under the states' consumer-protection statutes. In short, ***HN41***[] there is no legal principle saying that a finding of remoteness in the antitrust context functions, as a matter of law, as a bar to any related consumer-protection claims. However, the directness inquiry in antitrust-standing law is predicated on the well-known concept of proximate causation. See *McCready, 457 U.S. at 477* ("In the absence **[*53]** of direct guidance from Congress, and faced with the claim that a particular injury is too remote from the alleged violation to warrant § 4 standing, the courts are thus forced to resort to an analysis no less elusive than that employed traditionally by courts at common law with respect to the matter of 'proximate cause.'"); *DFA II, 2013 U.S. Dist. LEXIS 119962, 2013 WL 4506000, at *12* ("Because the concept of antitrust standing was developed with common law proximate causation standards in mind, directness is a particularly important factor in the Court's analysis."). Because causation also plays a role in consumer-protection claims, the Court must assess each state's consumer-protection laws to determine if the remoteness of Indirect Plaintiffs' injury precludes their ability to raise such claims.

1. Arkansas

Indirect Plaintiffs allege both price-fixing and monopolization claims under *§ 4-88-107* of the Arkansas Deceptive Trade Practices Act.[3] ***HN42***[] The Act "provides a private right of action to 'any person' who suffers actual damage or injury as a result of a violation of the Act." *Forever Green Athletic Fields, Inc. v. Lasiter Const., Inc., 2011 Ark. App. 347, 384 S.W.3d 540, 552 (Ark. Ct. App. 2011)* (quoting *Ark. Code Ann. § 4-88-113(f)*). And "[b]ased on the language of *section 4-88-113(f)*, there must be a causal connection between the violation of the Deceptive Trade Practices Act and the injury." *Id.*; see also *Independence Cnty. v. Pfizer, Inc., 534 F. Supp. 2d 882, 888 (E.D. Ark. 2008)* (dismissing a claim **[*54]** under the ADTPA based on causation issues and the overall remoteness of the injury). Separate from the causation requirement, "Arkansas law recognizes the remoteness doctrine" as applied to claims under the ADTPA, favoring suits by those directly injured over more-indirect victims. See *Independence Cnty., 534 F. Supp. 2d at 888* ("'[D]irectly injured victims can generally be counted on to vindicate the law as private attorneys general, without any of the problems attendant upon suits by plaintiffs injured more remotely.'" (quoting *Holmes v. Sec. Investor Prot. Corp., 503 U.S. 258, 269-70, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992))*).

In light of the importance of causation under Arkansas law, Indirect Plaintiffs' remoteness problems in the antitrust context also preclude their rebranded antitrust claims brought under the Arkansas Deceptive Trade Practices Act, requiring dismissal of those claims. **[*55]**

2. California

Indirect Plaintiffs allege price-fixing and monopolization claims under *§ 17200* of the California Unfair Competition Law.***HN44***[] The causation element makes its way into the UCL through the standing requirement, whereby "[a] private person * * * has standing to assert a UCL claim only if he or she (1) 'has suffered injury in fact,' and (2) 'has lost money or property as a result of the unfair competition.'" *Hall v. Time, 158 Cal. App. 4th 847, 70 Cal. Rptr. 3d 466, 469 (Cal. Ct. App. 2008)*. The second prong of the standing test "imposes a causation requirement. The phrase 'as a result of' in its plain and ordinary sense means 'caused by' and requires a showing of a causal connection or reliance on the alleged misrepresentation."[4] *Id.*; see *id. at 471 n.2* ("We use the word 'causation' to refer both to the causation element of a negligence cause of action * * * and to the justifiable reliance element of a fraud cause of action."). This causation requirement was refined in 2004 by the passage of Proposition 64, which made it so that "a private person has standing to sue only if he or she 'has suffered injury in fact and has lost money or property as a result of such unfair competition.'" *In re Tobacco II Cases, 46 Cal. 4th 298, 93 Cal. Rptr. 3d 559,*

[3] ***HN43***[] *Section 4-88-107* lists ten examples of actionable violations under the ADTPA, none of which is recognizable as an antitrust violation (*e.g.*, price fixing or monopolization). However, the statute does contain a catch-all provision that proscribes "[e]ngaging in any other unconscionable, false, or deceptive act or practice in business, commerce, or trade," *Ark. Code Ann. § 4-88-107(a)*, and courts have interpreted this catch-all broadly so as to include antitrust claims. See, *e.g.*, *Independence Cnty. v. Pfizer, Inc., 534 F. Supp. 2d 882, 888 (E.D. Ark. 2008)*, *aff'd, sub nom.* *Ashley Cnty. v. Pfizer, Inc., 552 F.3d 659 (8th Cir. 2009)*.

[4] The parties dispute whether Indirect Plaintiffs **[*56]** must allege reliance to state a claim under the UCL. In *Kwikset Corp. v. Superior Court*, the Supreme Court of California addressed a claim "based on a fraud theory involving false advertising and misrepresentations to consumers," and noted that "in accordance with well-settled principles regarding the element of reliance in ordinary fraud actions," plaintiffs were required to "demonstrate actual reliance on the allegedly deceptive or misleading statements." *246 P.3d at 888* (citations omitted); see also *Hall, 70 Cal. Rptr. 3d at 471 n.2* ("In a fraud case, justifiable reliance is the same as causation * * *."). Here, however, Indirect Plaintiffs' UCL claim is based on an "unlawful" or "unfair" antitrust violation, not a "fraudulent" misrepresentation. *In re Tobacco II Cases, 46 Cal. 4th 298, 93 Cal. Rptr. 3d 559, 207 P.3d 20, 29-30, 38 (Cal. 2009)* (noting that ***HN45***[] "there are three varieties of unfair competition: practices which are unlawful, unfair or fraudulent," and requiring a showing of actual reliance for a fraud-based UCL claim). Accordingly, the Court is not persuaded that Indirect Plaintiffs must allege reliance on an alleged misrepresentation. But see *Lorenzo v. Qualcomm Inc., 603 F. Supp. 2d 1291, 1303-04 (S.D. Cal. 2009)* (dismissing UCL claims for lack of standing where the antitrust plaintiff did not allege that he relied on any misrepresentations made by defendant (citing *Laster v. T-Mobile USA, Inc., 407 F. Supp. 2d 1181, 1183 (S.D. Cal. 2005)*)).

571, 207 P.3d 20 (citing UCL *§ 17203*); see also *Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 120 Cal. Rptr. 3d 741, 246 P.3d 877, 887-88* (explaining the causation element).

Noting that "the **[*57]** voters clearly intended to restrict UCL standing," the Supreme Court of California nonetheless found that ***HN46***[] indirect antitrust plaintiffs "who *had* had business dealings with a defendant and had lost money or property as a result of the defendant's unfair business practices" had standing under the UCL. *Clayworth v. Pfizer, Inc., 49 Cal. 4th 758, 111 Cal. Rptr. 3d 666, 233 P.3d 1066, 1087 (Cal. 2010)* (noting that "indirect purchases may support UCL standing"). But despite its liberal approach to standing, the *Clayworth* court noted that the intent of Proposition 64 "was to confine standing to those actually injured by a defendant's business practices and to curtail the prior practice of filing suits on behalf of clients who have not used the defendant's product or service, viewed the defendant's advertising, or had any other business dealing with the defendant." *Id. at 1086-87* (internal citations omitted). In *Clayworth*, the price-fixing manufacturers sold the price-fixed medications to wholesalers, who then sold them to the plaintiff pharmacies. Thus, plaintiffs—one step removed from the alleged price-fixers—actually used defendants' products and had indirect dealings with defendants. Here, Indirect Purchasers did not use the allegedly price-fixed commodities and had no business dealings with **[*58]** defendants in the relevant markets. See, *e.g., Troyk v. Farmers Grp., Inc., 171 Cal. App. 4th 1305, 90 Cal. Rptr. 3d 589, 626 n.33 (Cal. Ct. App. 2009)* (refusing to define the extent of the UCL's causation requirement, but noting that defendant's conduct "must be more than a *remote* or trivial factor" in causing the injury (emphasis added)). These facts counsel against a broad application of *Clayworth* and Proposition 64.

In addition, the Court is also mindful of the fact that "***HN47***[] the breadth of *§ 17200* does not give a plaintiff license to 'plead around' the absolute bars to relief contained in other possible causes of action by recasting those causes of action as ones for unfair competition," as Indirect Plaintiffs have done here. *Glenn K. Jackson Inc. v. Roe, 273 F.3d 1192, 1203 (9th Cir. 2001)* (citing *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 541 (Cal. 1999))*.

Somewhat related, Indirect Plaintiffs based their price-fixing and monopolization claims—regardless of whether those claims were brought under state antitrust laws, consumer-protection provisions, or both—on the same set of facts, theories, and allegations. In other words, Indirect Plaintiffs made no attempts to distinguish their antitrust claims from their consumer-protection claims. And under California law, because Indirect Plaintiffs failed to adequately plead their antitrust claims, their state claims must also fail. See *Formula One Licensing, B.V. v. Purple Interactive Ltd., 2001 U.S. Dist. LEXIS 2968, 2001 WL 34792530, at *4 (N.D. Cal. Feb. 6, 2001)* (***HN48***[] "Where a plaintiff fails to state **[*59]** an antitrust claim, and where an unfair competition claim is based upon the same allegations, such state claims are properly dismissed." (citing *Kentmaster Mfg. Co. v. Jarvis Prods. Corp., 146 F.3d 691, 695 (9th Cir. 1998)))*; see also *In re Wellpoint, Inc., Out-of-Network UCR Rates Litig., 903 F. Supp. 2d 880, 927-28 (C.D. Cal. 2012)* (dismissing UCL claims based on a lack of antitrust standing for plaintiffs' *Sherman Act* claims).

For all of these reasons, the Court finds that Indirect Plaintiffs lack standing to bring their claims under the UCL.

3. Florida

Indirect Plaintiffs allege price-fixing and monopolization claims under *§ 501.204* of the Florida Deceptive and Unfair Trade Practices Act. ***HN49***[] A consumer claim for damages under FDUTPA has three elements: "(1) a deceptive act or unfair practice; (2) causation; and (3) actual damages." *Soper v. Tire Kingdom, Inc., 124 So.3d 804, 806 (Fla. 2013)* (citing *Rollins, Inc. v. Butland, 951 So. 2d 860, 869 (Fla. Dist. Ct. App. 2006))*.

Although causation is a necessary element of a FDUTPA claim, Defendants do not press the expected argument, which is that the remoteness of Indirect Plaintiffs' injuries is insufficient to satisfy the FDUTPA causation requirement. See, *e.g., 2P Commercial Agency S.R.O. v. SRT USA, Inc., 2013 U.S. Dist. LEXIS 9186, 2013 WL 246650, at *4 (M.D. Fla. Jan. 23, 2013)* (noting that causation under FDUTPA "must be direct, rather than remote or speculative").

Instead, Defendants approach this issue indirectly, arguing that Florida courts regularly dismiss FDUTPA claims that are "merely a repackaging of the allegations offered for [failed] antitrust claims." **[*60]** *QSGI, Inc. v. IBM Global Fin., 2012 U.S. Dist. LEXIS 49601, 2012 WL 1150402, at *4 (S.D. Fla. Mar. 14, 2012)* (***HN50***[] "When * * * a plaintiff's FDUTPA claim is based on the same allegations as its antitrust claim, failure to establish a violation of the ***antitrust law*** is sufficient to conclude that the plaintiff has also failed to state a FDUTPA claim."); *JES Props., Inc. v. USA Equestrian, Inc., 2005 U.S. Dist. LEXIS 43122, 2005 WL 1126665, at *19 & n.23 (M.D. Fla. May 9, 2005)* ("Plaintiffs concede that their FDUTPA claims 'survive' or 'fall' with their antitrust claims."); *Hunter v. Bev Smith Ford, LLC, 2008 U.S. Dist. LEXIS 34982, 2008 WL 1925265, at *9 (S.D. Fla. Apr. 29, 2008)*; *Natural Answers, Inc. v. SmithKline Beecham Corp., 529 F.3d 1325, 1332-33 (11th Cir. 2008)* (dismissing a *Lanham Act* claim because, *inter alia*, "the injury claims [wa]s far more remote" than what the statute requires, and then dismissing a related FDUTPA claim on the same grounds).

But Defendants' "repackaging" theory has only been applied where the underlying antitrust claims were rejected for substantive reasons, not simply due to a lack of standing. Indirect Plaintiffs' argument, then, is that a state consumer-protection claim should not be automatically rejected because the plaintiff lacked standing to bring a corresponding federal antitrust claim. While this argument has facial appeal, it fails to appreciate (a) the importance of antitrust standing, and (b) the nuances of Florida's antitrust laws. To the former, this Court has already distinguished antitrust standing from Article III standing by noting that **[*61]** antitrust standing is intertwined with substantive antitrust principles, thus requiring the importation of federal antitrust-standing law into state antitrust-standing law where the state has a harmonization provision. And to the latter, the reason why Indirect Plaintiffs brought their claims under FDUTPA is because ***HN51***[] Florida still adheres to the "direct purchaser" rule articulated in *Illinois Brick*. See *Mack v. Bristol-Myers Squibb Co., 673 So.2d 100, 102 (Fla. Dist. Ct. App. 1996)*. In other words, Indirect Plaintiffs avoided bringing their antitrust claim under Florida's antitrust laws knowing that such a claim would be doomed. The contours of Florida's antitrust laws would be rendered moot were the Court to allow Indirect Plaintiffs to repackage their dead-on-arrival antitrust claims as FDUTPA claims.

In light of these concerns, the Court is persuaded that the Florida Supreme Court would either adopt the federal court's repackaging theory or read FDUTPA's causation requirement narrowly so as to preclude injuries that are too remote from the alleged antitrust violation. See, *e.g., In re Wellpoint, Inc., Out-of-Network UCR Rates Litig., 903 F. Supp. 2d at 927-28* (dismissing a California consumer-protection claim where plaintiffs lacked antitrust standing to raise *Sherman Act* claims). Either way, Indirect Plaintiffs' FDUTPA claims must be dismissed. **[*62]**

4. North Carolina

In addition to its antitrust claim under *§ 75-1* of the North Carolina Unfair and Deceptive Trade Practices Act, Indirect Plaintiffs also allege a price-fixing claim under *§ 75-1.1* of the Act. ***HN52***[] The Act declares unlawful "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce." *N.C. Gen. Stat. § 75-1.1*. To state a claim under NCUDTPA, a plaintiff must show: "(1) an unfair or deceptive act or practice, or an unfair method of competition, (2) in or affecting commerce, (3) which proximately caused injury to the plaintiff or to his business." *Furr v. Fonville Morisey Realty, Inc., 130 N.C. App. 541, 503 S.E.2d 401, 408 (N.C. 1998)*; *Dalton v. Camp, 353 N.C. 647, 548 S.E.2d 704, 711 (N.C. 2001)*; *Stetser v. TAP Pharm. Prods. Inc., 165 N.C. App. 1, 598 S.E.2d 570, 583-84 (N.C. Ct. App. 2004)* (applying the same *prima facie* case to an antitrust claim brought under the consumer-protection statute). Again, the obvious (and perhaps most persuasive) argument is that Indirect Plaintiffs' alleged injuries are too remote to satisfy NCUDTPA's proximate-causation requirement.

But similar to their arguments regarding Indirect Plaintiffs' claims under FDUTPA, Defendants instead argue that Indirect Plaintiffs' claim under NCUDTPA should be dismissed because it is premised on the same allegations as Plaintiffs' insufficiently-pled price-fixing claims (both state and federal). See, *e.g., In re Digital Music Antitrust Litig., 592 F. Supp. 2d 435, 450-51 (S.D.N.Y. 2008)* (dismissing consumer **[*63]** protection claims under, *inter alia*, California, Florida, and North Carolina law, noting that "[the courts] conclusion that Plaintiffs have not adequately alleged [a federal antitrust] violation necessarily precludes their attempt to recast that violation as an unfair business practice"), *vacated and remanded on other grounds, sub nom.* Starr v. Sony BMG Music Entm't, 592 F.3d 314 (2d Cir. 2010); see also R.J. Reynolds Tobacco Co. v. Philip Morris Inc., 199 F. Supp. 2d 362, 396 (N.D.N.C. 2002) ("Because Plaintiffs do not allege any facts that suggest that Defendant's conduct is unlawful beyond the conduct that is the basis for their failed federal [antitrust] claims, Plaintiffs' state common law and statutory claims fail as well."). This argument is also persuasive, although rather broad in application.

Interestingly though, **HN53**[] the Fourth Circuit has construed NCUDTPA—a statute modeled (verbatim) after § 5 of the FTC Act—consistently with the Sherman Act in assessing the merits of an antitrust claim brought under the guise on a consumer-protection claim, noting that the FTC Act "sweeps within its prohibitory scope conduct also condemned by § 1 of the Sherman Act," ultimately finding "no reason to conclude that, given the opportunity, North Carolina's Supreme Court would construe its state's act any differently." ITCO Corp. v. Michelin Tire Corp., Commercial Div., 722 F.2d 42, 48 (4th Cir. 1983). True, "the Federal Trade Commission Act was designed to supplement and bolster **[*64]** the Sherman Act and the Clayton Act" such that the FTC has the power "to arrest trade restraints in their incipiency without proof that amount to an outright violation" of the federal antitrust laws, see FTC v. Brown Shoe Co., 384 U.S. 316, 321, 86 S. Ct. 1501, 16 L. Ed. 2d 587 (1966) (citations omitted), but this is not one of those cases that would evade regulation but for the breadth of the FTC Act and its related state provisions.

The Fourth Circuit's rationale in *ITCO* adds credence to the broad-sweeping rule articulated in *In re Digital Music Antitrust Litigation* and *R.J. Reynolds Tobacco Co. v. Philip Morris Inc.*, and counsels in favor of reading NCUDTPA's causation requirement narrowly so as to preclude Indirect Plaintiffs from repackaging their failed antitrust claim as an unfair-competition claim. See, *e.g.,* Miller v. W.H. Bristow, Inc., 739 F. Supp. 1044, 1055 (D.S.C. 1990) (noting that "[w]hile it is true that an anticompetitive practice falling short of a Sherman Act or Clayton Act violation may nonetheless violate the FTC Act, the scope of the FTC Act is directly linked to the antitrust laws," and holding that because "the relationship between the parties does not violate the Sherman Act * * * plaintiff has failed to show how the circumstances of this case bring it within the reach of the FTC Act"). For these reasons, the **[*65]** Court dismisses Indirect Plaintiffs' price-fixing claim under § 75-1.1 of NCUDTPA.

In summary, the same causation issue that plagued Indirect Plaintiffs' state-law antitrust claims also provides grounds for dismissal for Indirect Plaintiffs' state-law consumer-protection claims under Arkansas, California, Florida, and North Carolina law.

G. Remoteness Doctrine in Unjust Enrichment Claims

Defendants next argue that the same "remoteness" issue troubling Indirect Plaintiffs' antitrust and consumer-protection claims also precludes Indirect Plaintiffs from raising their related state-law unjust enrichment claims. Indirect Plaintiffs raised their unjust enrichment claims generally without reference to the unjust enrichment law of any particular state, and thus the Court will review the law under all eight states.

As an initial matter, although there is some dispute on this issue, the general consensus is that California law does not recognize a cause of action for unjust enrichment. See Melchior v. New Line Prods., Inc., 106 Cal. App. 4th 779, 131 Cal. Rptr. 2d 347, 357 (Cal. Ct. App. 2003) (**HN54**[] "[T]here is no cause of action in California for unjust enrichment."); Hill v. Roll Int'l Corp., 195 Cal. App. 4th 1295, 128 Cal. Rptr. 3d 109, 118 (Cal. Ct. App. 2011) ("Unjust enrichment is not a cause of action, just a restitution claim.").

With regard to the remaining states, the Court notes at the outset that **HN55**[] a failure to state **[*66]** an antitrust claim does not categorically preclude a plaintiff from succeeding on a related unjust enrichment claim. See, *e.g.,* In re G-Fees Antitrust Litig., 584 F. Supp. 2d 26, 46 (D.D.C. 2008) ("No reason or logic supports a conclusion that a state's adherence to the rule of *Illinois Brick* dispossesses a person not only of a statutory legal remedy for an antitrust violation, but also dispossess the same person of his right to pursue a common law equitable remedy."); D.R. Ward Constr. Co. v. Rohm & Hass Co., 470 F. Supp. 2d 485, 506-07 (E.D. Pa. 2006) (stating that the viability of an unjust enrichment claim "does not hinge upon the success of the state statutory antitrust claims"); King Drug Co. of Florence v. Cephalon, Inc., 702 F. Supp. 2d 514, 540 (E.D. Pa. 2010) ("Unjust enrichment claims * * * are viable regardless of the applicable state antitrust laws."). But see *In re Flonase Antitrust Litig., 692 F. Supp. 2d 524, 542 (E.D. Pa. 2010)* ("[W]here an antitrust defendant's conduct cannot give rise to liability under state antitrust and consumer protection laws, [p]laintiffs should be prohibited from recovery under a claim for unjust enrichment.").

However, because state antitrust claims and unjust-enrichment claims have similar elements, it may be that a fatal flaw in a plaintiff's antitrust claim will also seal the fate of the plaintiff's corresponding unjust enrichment claim (as was the case with Indirect Plaintiffs' consumer-protection claims). ***HN56***[] The elements for unjust enrichment claims under Arkansas, **[*67]** Florida, Kansas, Michigan, Minnesota, New York, and North Carolina are essentially the same: "plaintiff must establish that (1) plaintiff conferred a benefit on the defendant; (2) defendant knew and received a benefit; and (3) defendant retained the benefit under circumstances that make it unjust." *In re Potash Antitrust Litig., 667 F. Supp. 2d at 948* (summarizing the unjust enrichment law of Michigan, Florida, and Kansas); see *Dews v. Halliburton Indus., Inc., 288 Ark. 532, 708 S.W.2d 67, 69 (Ark. 1986)*; *Fla. Power Corp. v. City of Winter Park, 887 So.2d 1237, 1242 n.4 (Fla. 2004)*; *In re Estate of Sauder, 283 Kan. 694, 156 P.3d 1204, 1220 (Kan. 2007)*; *Hudson v. Mathers, 283 Mich. App. 91, 770 N.W.2d 883, 887 (Mich. Ct. App. 2009)*; *Caldas v. Affordable Granite & Stone, Inc., 820 N.W.2d 826, 838 (Minn. 2012)*; *Corsello v. Verizon N.Y., Inc., 18 N.Y.3d 777, 967 N.E.2d 1177, 1185, 944 N.Y.S.2d 732 (N.Y. 2012)*; *Booe v. Shadrick, 322 N.C. 567, 369 S.E.2d 554, 555-56 (N.C. 1988)*.

Akin to the remoteness inquiry in the antitrust and consumer-protection contexts, five of the seven states (all but Arkansas and Minnesota) require that the plaintiff confer a direct benefit on the defendant in order to state a claim for unjust enrichment. See *Extraordinary Title Servs. v. Fla. Power & Light Co., 1 So.3d 400, 404 (Fla. Dist. Ct. App. 2009)* (affirming dismissal of unjust enrichment claim where plaintiff could not "allege or establish that it conferred a direct benefit" upon defendant); *Spires v. Hosp. Corp. of Am., 289 F. App'x 269, 273 (10th Cir. 2008)* (noting that Kansas law does not support an "indirect unjust enrichment claim"); *A&M Supply v. Microsoft Corp., 2008 Mich. App. LEXIS 433, 2008 WL 540883, *2-3, (Mich. App. Ct. 2008)* (concluding that the unjust enrichment doctrine requires "direct receipt" of a benefit, and was therefore inapplicable to "indirect purchasers"); *New Dimension Dev., Inc. v. Orchard, Hiltz & McCliment, Inc., 2005 Mich. App. LEXIS 2667, 2005 WL 2806234, at *6 (Mich. App. Ct. Oct. 27, 2005)* ("[A]ny indirect benefit defendant derived from plaintiffs was too attenuated to warrant imposing the equitable doctrine of unjust enrichment, which must be 'employed * * * **[*68]** with caution,' because it 'vitiates normal contract principles.'" (quoting *Kammer Asphalt Paving Co., Inc. v. East China Twp. Schs., 443 Mich. 176, 504 N.W.2d 635 (Mich. 1993)))*; *Sperry v. Crompton Corp., 8 N.Y.3d 204, 863 N.E.2d 1012, 1018, 831 N.Y.S.2d 760 (N.Y. 2007)* (holding that the connection between the indirect plaintiffs and defendants in an antitrust action was "simply too attenuated" to support a claim for unjust enrichment); *Laydon v. Mizuho Bank, Ltd., 2014 U.S. Dist. LEXIS 46368, 2014 WL 1280464, at * (S.D.N.Y. Mar. 28, 2014)* (noting that under New York law, an unjust enrichment claim "requires some type of direct dealing or actual, substantive relationship with a Defendant," citing relevant cases); *Effler v. Pyles, 94 N.C. App. 349, 380 S.E.2d 149, 152 (N.C. Ct. App. 1989)* (dismissing an unjust enrichment claim where plaintiff failed to satisfy her "burden of showing that she conferred a benefit directly on defendant"); see also *In re Aftermarket Filters Antitrust Litig., 2010 U.S. Dist. LEXIS 32652, 2010 WL 1416259, at *2-3 (N.D. Ill. Apr. 1, 2010)* (dismissing unjust enrichment claims under the laws of Kansas, Michigan, and North Carolina because "plaintiffs [we]re unable to allege that they have conferred a benefit on defendants except to argue that they are the ultimate end users").

Here, Indirect Plaintiffs argue that Defendants were unjustly enriched because, "[a]s a result of the wrongful conduct, defendants charged *resellers* more for Finished Dairy Products," forcing Indirect Plaintiffs to "pay[] more for Finished Dairy Products" from the so-called resellers. [483, ¶¶ 116-17 (emphasis added).] In other words, Indirect Plaintiffs **[*69]** did not themselves confer any benefit directly on Defendants, and for that reason, they have failed to state a claim for unjust enrichment under the laws of Florida, Kansas,[5] Michigan, New York, and North Carolina.

---

[5] But see *Wrobel*, No. 05-cv-1296, 2006 WL 7130617, available at [574-1, at 9] (allowing indirect plaintiff's unjust enrichment claim to survive a motion to dismiss based on the fact that "Kansas specifically allows indirect-purchaser claims," but nonetheless noting that "there may be some limits that would apply," but that the court "d[id] not know, on the present pleadings,

That leaves Indirect Plaintiffs' unjust enrichment claims under Arkansas and Minnesota law. Because those states do not require direct dealing between the plaintiff and defendant, and because the Court has not adopted a categorical rule prohibiting unjust enrichment claims that are modeled after failed antitrust and consumer-protection claims—see, **[*70]** *e.g., In re Flonase Antitrust Litig., 692 F. Supp. 2d at 542*—the Court will not dismiss Indirect Plaintiffs' Arkansas and Minnesota unjust enrichment claims on causation/remoteness grounds.[6]

IV. Statute of Limitations

Defendants argue that Indirect Plaintiffs' statutory claims under California, Florida, Minnesota, and North Carolina law are barred by those states' four-year statutes of limitation.[7] See *Cal. Bus. & Prof. Code § 16750.1* (***HN57***[] "Any civil action to enforce any cause of action for a violation of this chapter shall be commenced within four years after the cause of action accrued.); ***HN58***[] *Fla. Stat. § 95.11(3)(f)* (setting a four-year statute of limitations for "[a]n action founded on a statutory liability"); *Minn. Stat. § 325D.64* (***HN59***[] "An action under *sections 325D.49 to 325D.66* shall be forever barred unless commenced within four years of the date upon which the cause of action arose."); *N.C. Gen Stat. § 75-16.2* (***HN60***[] "Any civil action brought under this Chapter to enforce the provisions thereof shall be barred unless commenced within four years after the cause of action accrues."). Defendants further argue that Indirect Plaintiffs' unjust enrichment claims under Arkansas and North Carolina law are **[*71]** barred by those states' three-year statutes of limitations, see ***HN61***[] *Ark. Code Ann. § 16-56-105(3)* (stating that "[a]ll actions founded on any contract or liability, expressed or implied" are subject to a three-year statute of limitations); ***HN62***[] *N.C. Gen. Stat. § 1-52(1)* (stating that an action "[u]pon a contract, obligation or liability arising out of a contract, express or implied," is subject to a three-year statute of limitations), and their Florida unjust enrichment claim is barred by that state's four-year statute of limitations, see ***HN63***[] *Fla. Stat. § 95.11(3)(k)* (setting a three-year statute of limitations for "[a] legal or equitable action on a contract, obligation, or liability not founded on a written instrument").

To assess this argument, the Court must first determine the date of accrual for the claims **[*72]** at issue. Defendants argue that all of these claims accrued—at the latest—on December 16, 2008, when the Commodity Futures Trading Commission issued a publicly-available consent decree announcing its findings regarding its investigation of DFA's allegedly-manipulative trading activities. [483, ¶ 91.] Indirect Plaintiffs do not object to this assertion, and thus the Court will adopt December 16, 2008 as the date of accrual. Accordingly, absent any tolling (and assuming that the various states' statutes of limitations apply here), the filing deadlines at issue under the relevant three- and four-year statutes of limitations are December 16, 2011 and 2012, respectively.

Next, the Court must review when Indirect Plaintiffs filed their claims. As a reminder, Indirect Plaintiffs' Consolidated Class Action Compliant "consolidate[d] four already-pending actions into one complaint." [476, at 3.] Indirect Plaintiffs' first-filed complaint, *Rudman v. DFA*, originally filed on May 29, 2009 in the federal district court in Vermont, included claims invoking the antitrust and unjust-enrichment laws of 25 states, including all of the states at issue here. But the *Rudman* complaint was brought by a single named Plaintiff—Jacqueline **[*73]** Rudman, a New York citizen—and did not include named plaintiffs from any of the other states whose laws Ms. Rudman invoked in her complaint. Instead, it wasn't until the fourth-filed complaint, *Rogers v. DFA*, originally filed on February 19, 2013

---

how far removed from direct-purchaser status Plaintiff may be"). Here, six years into this MDL litigation, the Court has a much better grasp on the extent of the remoteness between Indirect Plaintiffs and Defendants, and thus finds dismissal appropriate at the motion-to-dismiss phase.

[6] To avoid confusion, the Court notes that dismissal of Indirect Plaintiffs' unjust enrichment claims under Arkansas and Minnesota law is appropriate on other grounds, as discussed below.

[7] Indirect Plaintiffs' claims under Arkansas law as raised in the *Rogers* complaint were timely filed because Arkansas law provides a five-year statute of limitations. See *Ark. Code Ann. § 4-88-115*. Indirect Plaintiffs' claims under New York, Michigan, and Kansas law—as raised in the *Rudman, Waun*, and *Asmann* lawsuits—are not time barred because those named Plaintiffs had standing to raise those claims when their respective suits were filed, which in each case was within the relevant limitations period.

in federal district court in Vermont, that Indirect Plaintiffs included claims on behalf of actual citizens of the states at issue here: Arkansas (Brian Rogers), California (Constantin Yiannacopoulos), Florida (Ann Miller), Minnesota (Mike Jackson), and North Carolina (Cravon Williams). Thus, for purposes of this analysis, December 16, 2008 is the date of accrual and February 19, 2013 is the date of filing, leaving a gap of approximately four years and two months.

To be clear, Indirect Plaintiffs do not argue that they validly stated claims on May 29, 2009 (*i.e.*, upon filing the *Rudman* complaint). Instead, they argue that Vermont's (the forum state's) choice-of-law provisions require the application of Vermont's six-year statute of limitations to many of the claims at issue, making the *Rogers* complaint timely without reference to the earlier-filed *Rudman* complaint. Alternatively, Indirect Plaintiffs argue that even if Vermont's six-year statute **[*74]** doesn't apply, their May 29, 2009 filing established placeholders for the claims at issue that were later filled by the filing of the *Rogers* complaint (either via the relation-back doctrine or a theory of tolling). The Court addresses each theory in turn.

A. Choice of Law

Indirect Plaintiffs argue that their claims under Florida law and their unjust-enrichment claims under all states' laws are governed by Vermont's six-year statute of limitations,[8] making the 2013 *Rogers* complaint timely as to those claims.

HN64[] In an MDL, a court must apply the choice-of-law rules of the transferor forum. See, *e.g., Ferens v. John Deere Co., 494 U.S. 516, 523, 110 S. Ct. 1274, 108 L. Ed. 2d 443 (1990)*; *In re Air Crash Disaster Near Chicago, Ill. on May 25, 1979, 644 F.2d 594, 610 (7th Cir. 1981)* (holding that in MDL's "the choice-of-law rules to be used are those choice-of-law rules of the states where the actions were originally filed"); see also **[*75]** *In re Welding Fume Prods. Liability Litig., at 2010 U.S. Dist. LEXIS 146067, 2010 WL 7699456, at *12-13 (N.D. Ohio June 4, 2010)* (explaining choice-of-law principles for MDLs). Here, both *Rudman* and *Rogers* originated in Vermont's federal district court (invoking the court's diversity jurisdiction under *28 U.S.C. § 1332(d)*), and "[a] federal court sitting in diversity jurisdiction applies the choice of law rules of the forum state." *Forest Park Pictures v. Universal Television Network, Inc., 683 F.3d 424, 433 (2d Cir. 2012)*.

Vermont follows the Restatement (Second) of Conflict of Laws for claims that sound in contract (*e.g.*, unjust enrichment) and claims invoking consumer-protection laws. See *Long v. Parry, 921 F. Supp. 2d 269, 274 (D. Vt. 2013)* (citing *McKinnon v. F.H. Morgan & Co., 170 Vt. 422, 750 A.2d 1026, 1028 (2000))*. While Vermont courts have not yet addressed whether they would apply the Restatement to choice-of-law questions in antitrust actions, this seems to be the trend. See *Seidman v. Killington Ltd., 1990 U.S. Dist. LEXIS 2636, 1990 WL 26680, at *4 (E.D. Pa. 1990)* (debating which choice-of-law rule to apply under Vermont law and resolving to apply the Restatement based on "the overall trend of Vermont choice of law doctrine"); *Bryant v. Braithwaite, 2013 U.S. Dist. LEXIS 32338, 2013 WL 877107, at *4 (D. Vt. Mar. 8, 2013)* (stating generally that Vermont "has adopted the Second Restatement of Conflicts of Laws"). The alternative would likely be the *lex loci delicti* rule that Vermont previously applied in tort and contract cases, which requires the court to apply the law of the state where the injury occurred. See, *e.g., Goldman v. Beaudry, 122 Vt. 299, 170 A.2d 636, 638 (1961)*. And not to spoil the ending, but because Vermont has no interest in **[*76]** adjudicating cases that neither involve any Vermont citizens nor invoke any Vermont laws, both approaches produce the same result, meaning that the selection of which choice-of-law rule to follow is inconsequential. The Court will nonetheless follow the Restatement's choice-of-law approach to all claims.

HN65[] Where, as here, there is a conflict between the laws of Vermont and other jurisdictions, a court must "ascertain whether a specific section of the Restatement governs what law should ordinarily apply to the particular action or legal issue." *Martineau v. Guertin, 170 Vt. 415, 751 A.2d 776, 778 (2000)*. "If such a section exists,

---

[8] The rationale behind Indirect Plaintiffs' selection of these particular claims is based on their allegation that these claims are governed by "general state statutes of limitations," and Vermont's so-called "general statute of limitations" is six years. *Vt. Stat. Ann. tit. 12, § 511*. Assumedly Vermont would apply a shorter statute of limitations to Indirect Plaintiffs' other claims.

generally the law of a particular state is presumed to be the correct forum unless another state has a more significant interest in the litigation." *Id*. *Section 142 of the Restatement* is on point:

> *HN66*[] [W]hether a claim will be maintained against the defense of the statute of limitations is determined under the principles stated in *§ 6*. In general, unless the exceptional circumstances of the case make such a result unreasonable:
> (1) the forum will apply its own statute of limitations barring the claim.
> (2) The forum will apply its own statute of limitations permitting the claim unless:
> (a) maintenance of the claim would serve no substantial interest of the forum; and
>
> **[*77]** (b) the claim would be barred under the statute of limitations of a state having a more significant relationship to the parties and the occurrence.

Restatement (Second) of Conflicts § 142 (1988 revision). Here, the Court need not review the *§ 6* factors, as it is clear that the states at issue have a far-more significant relationship to the parties and the occurrence than does Vermont. Juxtaposed against Vermont's total lack of interest in this lawsuit (Indirect Plaintiffs do not even mention the word "Vermont" in their Consolidated Class Action Complaint) is the fact that the named Plaintiffs are citizens of the states at issue who purchased allegedly price-fixed products in those states. And Indirect Plaintiffs enlisted named Plaintiffs from the various states at issue solely to take advantage of the laws of those states. It would be a sure misfire to allow Indirect Plaintiffs to benefit from the favorable aspects of certain states' laws and then scurry off to disinterested Vermont to avoid the less-favorable aspects of those states' laws. That would be an exercise in Forum Shopping 101, and neither this Court nor a Vermont court would allow it. Thus, the applicable statutes of limitations are those prescribed by the various **[*78]** states at issue, not Vermont.

B. Relation-Back Doctrine

Indirect Plaintiffs argue in the alternative that the claims raised in the 2013 *Rogers* complaint relate back to the 2009 *Rudman* complaint. *HN67*[] "An amendment to a pleading relates back to the date of the original pleading when the amendment asserts a claim or defense that arose out of the conduct, transaction, or occurrence set out—or attempted to be set out—in the original pleading." *Fed. R. Civ. P. 15(c)(1)(B)*.

Simply put, the *Rogers* complaint was filed as a stand-alone complaint, not as an amendment to the *Rudman* complaint, and therefore the claims raised in the *Rogers* complaint cannot relate back to the *Rudman* complaint. The consolidation of the four stand-alone complaints does not reclassify the complaints as amendments of their earlier-filed companions so as to justify a relation back.

Indirect Plaintiffs argue that a refusal to permit relating back in this instance would mean that "many class actions would effectively be barred from substituting named plaintiffs." [521, at 18 (citing *Phillips v. Ford Motor Co., 435 F.3d 785, 787 (7th Cir. 2006))*.] But *Phillips* doesn't apply here. The point in *Phillips* was that without allowing substitute-named-plaintiffs' claims to relate back to original-named-plaintiffs' claims, a **[*79]** defendant could settle with a named plaintiff after the statute of limitations runs and effectively bar the class from relief. But Indirect Plaintiffs have not attempted to substitute the *Rogers* Plaintiffs for the *Rudman* Plaintiff, and even if they did, they would face other insurmountable hurdles not addressed in *Phillips* (*e.g.*, the Article III standing issue discussed below). Indirect Plaintiffs cannot benefit from the relation-back doctrine.

What Indirect Plaintiffs are seeking to invoke here is not the relation-back rule, but rather a form of equitable tolling that would allow the state-law claims of named Plaintiffs in a later-filed federal class action to take advantage of "placeholder" state-law claims in an earlier-filed federal class action, which segues the Court to its next topic of discussion.

C. Equitable Tolling

As one court put it, ***HN68***[] to determine which statute of limitations to apply in an MDL action, (1) "the Court must first determine which state's choice-of-law rules to apply in these cases," (2) "[t]hen, pursuant to those rules, it must choose the applicable statute of limitations," and (3) [l]astly, the Court must determine when each limitations period began to run and whether or **[*80]** not the applicable statutes of limitations have been tolled, either by the pendency of class actions or otherwise." *In re Vioxx Prods. Liability Litig., 2007 U.S. Dist. LEXIS 83710, 2007 WL 3334339, at *2 (E.D. La. Nov. 8, 2007)*. The Court has now reached the final part of the last step in this analysis, where it must determine whether the filing of the *Rudman* class-action complaint tolled the statute of limitations for the claims raised in the later-filed *Rogers* class-action complaint.

Indirect Plaintiffs invoke "the doctrine of class-action tolling," citing the Supreme Court's *American Pipe* decision in support of their argument that the first-filed class action tolled the statute of limitations for any later-filed class actions where the plaintiffs in the later-filed class actions fall within the class definition of the first-filed class action. See *Am. Pipe & Constr. Co. v. Utah, 414 U.S. 538, 554, 94 S. Ct. 756, 38 L. Ed. 2d 713 (1974)*.

In *American Pipe*, the Supreme Court held that ***HN69***[] where a district court has denied class certification—"at least where class action status has been denied solely because of failure to demonstrate that the class is so numerous that joinder of all members is impracticable"—"the commencement of the original class suit tolls the running of the statute [of limitations] for all purported member of the class who make timely motions to intervene after the **[*81]** court has found the suit inappropriate for class action status." *414 U.S. at 553*. The Supreme Court was concerned that a contrary rule would "deprive *Rule 23* class actions of the efficiency and economy of litigation which is a principal purpose of the procedure" because "[p]otential class members would be induced to file protective motions to intervene or to join in the event that a class was later found unsuitable." *Id.*; see also *id. at 554* ("We are convinced that the rule most consistent with federal class action procedure must be that the commencement of a class action suspends the applicable statute of limitations as to all asserted members of the class who would have been parties had the suit been permitted to continue as a class action."). The Supreme Court subsequently extended the doctrine to all putative class members, rather than solely intervenors. *Crown, Cork, & Seal Co. v. Parker, 462 U.S. 345, 350, 103 S. Ct. 2392, 76 L. Ed. 2d 628 (1983)*.

But Indirect Plaintiffs face several sizable speedbumps in their attempt to extend *American Pipe* to the facts at hand. First, there is a threshold issue as to whether Ms. Rudman's lack of standing to raise claims under the laws of any states but New York precludes her ability to "place hold" on behalf of out-of-state plaintiffs. Second, the posture of this case is **[*82]** unlike that of *American Pipe* and *Crown, Cork & Seal* because the *Rogers* Plaintiffs filed their successive class action prior to any determination regarding the viability of Ms. Rudman's first-filed class action, making their suit a potentially-inappropriate "piggyback" class action. Third, *American Pipe* applies only to claims under federal law for which the period of limitations is also federal, whereas "[w]hen state law supplies the period of limitations, it also supplies the tolling rules." *Hemenway v. Peabody Coal Co., 159 F.3d 255, 265 (7th Cir. 1998)*; *Bd. of Regents of Tomanio, 446 U.S. 478, 485, 100 S. Ct. 1790, 64 L. Ed. 2d 440 (1980)*. Thus, the Court must look to the laws of the various states at issue to determine whether those states recognize class-action tolling during the pendency of a federally-filed action (*i.e.*, whether the filing of a putative class action in federal court tolls the statutes of limitation applicable to state law claims asserted by new plaintiffs in a subsequent putative class action in federal court). See *In re Linerboard Antitrust Litig., 223 F.R.D. 335, 345 (E.D. Pa. 2004)* (referring to this as "cross-jurisdictional class action tolling"). The Court addresses each issue in turn.

1. Article III Standing

Defendants argue that the filing of the *Rudman* complaint only tolled the statute for New York claimants because the only named Plaintiff in that action, Ms. Rudman, was a **[*83]** citizen of New York who purchased allegedly price-fixed products in New York, and thus only had Article III standing to raise claims under New York law, not the laws of any of the other states named in her class action complaint. See, *e.g., In re Carrier IQ, Inc., 78 F. Supp. 3d 1051, 2015 U.S. Dist. LEXIS 7123, 2015 WL 274054, at *10 (N.D. Cal. Jan. 21, 2015)* ("[W]here a complaint includes multiple claims[,] 'at least one named class representative must have Article III standing to raise each claim' and * * * in a class action[,] 'each claim must be analyzed separately, and a claim cannot be asserted on behalf of a class unless at least one named plaintiff has suffered the injury that gives rise to that claim.'" (quoting *Los Gatos Mercantile, Inc. v. E.I. DuPont De Nemours & Co., 2014 U.S. Dist. LEXIS 133540, 2014 WL 4774611, at *4 (N.D. Cal. Sept. 22, 2014)))*; *In re Flash Memory Antitrust Litig., 643 F. Supp. 2d 1133, 1164 (N.D. Cal. 2009)* ("A class cannot assert a claim on behalf of an individual that they do not represent. Where * * * a representative plaintiff is lacking for a particular state, all claims based on *that* state's laws are subject to dismissal."); *In re Countrywide Fin. Corp. Mortg.-Backed Sec. Litig., 934 F. Supp. 2d 1219, 1230 (C.D. Cal. 2013)* ("[A] class action only tolls the statute of limitation for a claim when the name plaintiff had Article III standing with respect to that claim." (citing *Walters v. Edgar, 163 F.3d 430, 432 (7th Cir. 1998)))*.

Before assessing this argument, there is a threshold question as to whether the Court can consider the issue of standing before addressing class certification. While the Supreme Court has deemed the resolution **[*84]** of class certification to be "logically antecedent" to Article III concerns, see *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 612, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*; *Ortiz v. Fibreboard Corp., 527 U.S. 815, 831, 119 S. Ct. 2295, 144 L. Ed. 2d 715 (1999)*, "'[t]here is currently a split among federal courts as to * * * the question of whether standing can be considered prior to class certification in class action lawsuits.'" *In re Carrier IQ, Inc., 2015 U.S. Dist. LEXIS 7123, 2015 WL 274054, at *9* (quoting *In re Refrigerant Compressors Antitrust Litig., 2012 U.S. Dist. LEXIS 98827, 2012 WL 2917365, at *5 (E.D. Mich. July 17, 2012))*. The Seventh Circuit has referred to the Supreme Court's language as a "directive" regarding order of operations, but that was based on the larger concern that "[t]he certification of a class changes the standing aspects of a suit, because '[a] properly certified class has a legal status separate from and independent of the interest asserted by the named plaintiff.'" *Payton v. Cnty. of Kane, 308 F.3d 673, 680 (7th Cir. 2002)* (citation omitted). In other instances, though, the Seventh Circuit has deemed standing "an antecedent legal issue" and thus considered it prior to evaluating class certification. *Arreola v. Godinez, 546 F.3d 788, 794 (7th Cir. 2008)*. Much like the Seventh Circuit and other courts in this district, this Court concludes that ***HN70***[] "class certification issues are not always appropriate for a pre-standing evaluation." *In re Plasma-Derivative Protein Therapies Antitrust Litig., 2012 U.S. Dist. LEXIS 2501, 2012 WL 39766, at *4-5 (N.D. Ill. Jan. 9, 2012)*. Here, the class-certification issue is not logically antecedent to the Article III issue because "[a] ruling as to [Ms. Rudman's] standing depends in no way upon the standing of proposed class members," *In re Wellbutrin XL Antitrust Litig., 260 F.R.D. 143, 155 (E.D. Pa. 2009)*, and thus **[*85]** the Court will proceed to assess whether Ms. Rudman's lack of standing to raise non-New York claims also bars her ability to create tolled placeholders for those claims.

Indirect Plaintiffs argue that it would be unrealistic to charge class members with the task of assessing whether the named plaintiffs in a putative class have Article III standing to raise claims on their behalf, and any rule requiring such an undertaking would likely result in the filing of additional (and potentially unnecessary) lawsuits. See, *e.g., In re Wachovia Equity Sec. Litig., 753 F. Supp. 2d 326, 372 (S.D.N.Y. 2011)* (noting that withholding *American Pipe* tolling where a named plaintiff was found to lack standing would "punish class members for relying on the very thing *Rule 23* is intended to provide: an efficient method for resolving class claims common to a class of individuals without the need for wasteful and duplicative litigation" (quotation omitted)). Indirect Plaintiffs also argue that if the goal of statutes of limitations is to put defendants on notice (see, *e.g., Crown, Cork & Seal, 462 U.S. at 355*), then Ms. Rudman's allegations of a nationwide price-fixing conspiracy accomplished that feat, regardless of whether she personally had standing to raise each and every claim stated in her class-action complaint.

[*86] In addition, Indirect Plaintiffs cite a string of cases allegedly endorsing these (and other) pro-plaintiff policy positions. See, *e.g., Haas v. Pittsburgh Nat'l Bank, 526 F.2d 1083, 1097 (3d Cir. 1975)*; *Griffin v. Singletary, 17 F.3d 356, 360 (11th Cir. 1994)* (finding that *American Pipe* tolls the statute of limitations for putative class members where the plaintiff lacks standing, and noting that a contrary rule "'would produce the very evil which the [Supreme] Court sought to avoid in *American Pipe* and *Crown, Cork & Seal*'" because "class members uncertain of the district court's standing analysis * * * 'would have every incentive to file a separate action prior to the expiration of his own period of limitations'" (quoting *Edwards v. Boeing Vertol Co., 717 F.2d 761, 766 (3d Cir. 1983)))*; *Genesee Cnty. Emps.' Ret. Sys. v. Thornburg Mortg. Sec. Trust 2006-3, 825 F. Supp. 2d 1082, 1132 (D.N.M. 2011)* (adopting *Griffin*); *Rose v. Ark. Valley Envtl. & Util. Auth., 562 F. Supp. 1180, 1192-93 (W.D. Mo. 1983)* ("I can see no more reason, as a general matter, to require a passive class member to anticipate the existence of and ultimate ruling upon [whether the plaintiff has standing] than to require him to do so with respect to questions of 'numerosity,' 'commonality' or 'typicality.'"); Popoola v. Md-Individual Practice Ass'n, 230 F.R.D. 424, 430 (D. Md. 2005) (adopting *Haas* and *Rose*, noting that a contrary rule would force individual class members to seek to intervene prior to the running of the statute to preserve their rights); In re IndyMac Mortgage-Backed Sec. Litig., 793 F. Supp. 2d 637, 645-47 (S.D.N.Y. 2011); see also W. & S. Life Ins. Co. v. JPMorgan Chase Bank, N.A., 54 F. Supp. 3d 888, 2014 WL 5308422, at *17-18 (S.D. Ohio 2014) ("The *American Pipe* tolling analysis can be extended to cases where the class action claims are dismissed for lack of standing."); In re Wachovia Equity Sec. Litig., 753 F. Supp. 2d 326, 371-72 (S.D.N.Y. 2011) ("Although the law of the Second Circuit is far from settled on this issue, the failure to apply *American Pipe* tolling to this case would undermine the policies of 'efficiency and economy of litigation' that underlie Rule 23."). The Court addresses each of Indirect Plaintiffs' arguments in turn.

The Third Circuit's Haas opinion is the most on point, but is nonetheless unpersuasive. In that case, a Pennsylvania citizen brought class claims against three banks, although she only held accounts with two of them. The court's basis for tolling claims against the third bank (Equibank) rested almost exclusively on the fact that defendants received adequate notice of the relevant claim despite plaintiff's lack of standing to bring it. The court observed that the missing plaintiffs "were in existence at the time the action was originally brought and were described as claimants in the complaint," such that all that was needed to remedy the issue "was the prompt addition of a nominal plaintiff who held an Equibank card." 526 F.2d at 1097. The court's analysis was brief, and said nothing of the policy considerations on the other side of the coin **[*87]** (discussed below) or Article III standing principles generally. While this decision was likely the most practical decision for this case—*i.e.*, triggering the "prompt addition of a nominal plaintiff" such that the case could continue—it seems unlikely that the court would have reached the same conclusion had Ms. Haas filed placeholder claims with respect to 50 banks instead of just one.

The most thought-provoking issue raised in the cases cited by Indirect Plaintiffs is whether there is anything special or unique about a named plaintiff's lack of standing that would differentiate such a shortcoming from a named plaintiff's failure to satisfy one of the Rule 23 categories (*i.e.*, numerosity, commonality, and typicality), so as to justify requiring putative class members to identify one but not the other in order to take advantage of *American Pipe* tolling. See Rose, 562 F. Supp. at 1192-93 ("I can see no more reason, as a general matter, to require a passive class member to anticipate the existence of and ultimate ruling upon [whether the plaintiff has standing] than to require him to do so with respect to questions of 'numerosity,' 'commonality' or 'typicality.'"). One potential difference is that from a legal perspective, **[*88]** **HN71**[] unlike Rule 23 deficiencies, standing deficiencies are inexplicably linked to a court's jurisdiction. Another notable difference is that plaintiffs can exploit standing deficiencies (especially where, like here, the deficiency is obvious) to their benefit, whereas a Rule 23 deficiency is an unlikely vehicle for abuse. See Me. State Ret. Sys. v. Countrywide Fin. Corp., 722 F. Supp. 2d 1157, 1166-67 (C.D. Cal. 2010) (refusing to extend *American Pipe* tolling where the plaintiff lacked standing because such a rule would "encourage filings made merely to extend the period in which to find a class representative"). Also, from a practical perspective, standing deficiencies such as these are often "apparent from the face of the complaints," In re TFT-LCD (Flat Panel) Antitrust Litig., 2012 U.S. Dist. LEXIS 6394, 2012 WL 149637, at *2 n.3 (N.D. Cal. Jan. 18, 2012), whereas Rule 23 deficiencies are often not so obvious. At a minimum, standing deficiencies and Rule 23 deficiencies make unexpected bedfellows (at least in this context), and the Court is not convinced that the *American Pipe* rule should transfer so easily from one category to the other absent express authority to the contrary.

Regarding the argument that Ms. Rudman's complaint sufficiently put Defendants on notice of the *Rogers* claims—thus satisfying the core concern behind the existence of statutes of limitations—were this the proper logic, then there would be nothing stopping **[*89]** plaintiffs from raising claims under the laws of all 50 states at the time of filing, keeping the door open for any plaintiffs that might filter in at any given time. Crown, Cork & Seal, 462 U.S. at 354-55 (noting that "[t]he tolling rule of *American Pipe* is a generous one, inviting abuse," and that "[i]t is important to make certain, however, that *American Pipe* is not abused by the assertion of claims that differ from those raised in the original class suit."). The Court is concerned that these out-of-state placeholder suits might qualify as the type of abuse that the Supreme Court presaged.

Next, several of the cases cited by Indirect Plaintiffs argue that a refusal to extend *American Pipe* tolling to instances where the named plaintiffs lack of standing would incentivize putative class members—unsure of whether the named plaintiff has standing to bring claims on their behalf—to file duplicative and unnecessary suits prior to the expiration of the statute of limitations in order to preserve their rights. See, *e.g.,* Griffin, 17 F.3d at 360. While this is a possibility, it requires little legal acumen (at least in this instance) to determine that Ms. Rudman—a New York citizen who purchased allegedly price-fixed products in New York—lacks standing to bring **[*90]** claims under the laws of other states. See In re TFT-LCD (Flat Panel) Antitrust Litig., 2012 U.S. Dist. LEXIS 6394, 2012 WL 149637, at *2 n.3. More relevant here, however, is the flipside of Indirect Plaintiffs' argument, which is that "extending *American Pipe* tolling to class action claims the original named plaintiffs had no standing to bring will encourage filings made merely to extend the period in which to find a class representative." Me. State Ret. Sys. v. Countrywide Fin. Corp., 722 F. Supp. 2d at 1166-67; accord FDIC v. Countrywide Fin. Corp., 2012 U.S. Dist. LEXIS 167696, 2012 WL 5900973, at *9 (C.D. Cal. Nov. 21, 2012); *cf.* In re Crazy Eddie Sec. Litig., 747 F. Supp. 850, 856 (E.D.N.Y. 1990) (refusing to extend *American Pipe* tolling to successive class actions following the dismissal of the original suit for lack of standing, noting that "[t]here appears to be no good reason to encourage bringing of a suit merely to extend the period in which to find a class representative"). And to further allay the fear that putative class members, unsure of the named plaintiffs' standing, might file duplicative lawsuits to protect their rights, courts should maintain "scrupulous adherence to the requirement that the determination whether to certify a suit as a class action be made 'as soon as practicable after the commencement of the action.'" Walters, 163 F.3d at 433 (quoting Fed. R. Civ. P. 23(c)(1)).

Most importantly, though, "[t]he Seventh Circuit has [already] decided the issue, holding that ***HN72***[] the filing of a purported class-action complaint by a plaintiff who lacks standing does not **[*91]** toll the statute of limitations for those who later seek to intervene as plaintiffs." Palmer v. Stassinos, 236 F.R.D. 460, 465 (N.D. Cal. 2006) (citing Walters, 163 F.3d at 432). In Walters, a 14-year-old class action brought by a number of Illinois inmates was suddenly dismissed after the Supreme Court issued an opinion in an unrelated case that led to a finding that the named plaintiffs in Walters lacked standing to sue. The named plaintiffs argued that rather than dismissing the case, other class members should have been substituted as class representatives. But the reality was that, in light of the Supreme Court's ruling, the named plaintiffs lacked standing from day one. The Seventh Circuit held that "if the named plaintiffs lacked standing when they filed the suit, there were no other party plaintiffs to step into the breach created by the named plaintiffs' lack of standing," thus dismissing the argument that "jurisdiction can be preserved even though the named plaintiffs lacked standing when the suit was filed." Id. at 432-33.

Additionally, from a defense perspective, requiring the named plaintiffs to have standing in order to activate *American Pipe* tolling would eliminate the concern over so-called placeholder actions, which arguably give plaintiffs unearned leverage **[*92]** over defendants by artificially raising the stakes while simultaneously buying time to piece together a more formidable lawsuit. As one court put it:

> The alternative proposed by the plaintiffs would allow named plaintiffs in a proposed class action, with no injuries in relation to the laws of certain states referenced in their complaint, to embark on lengthy class discovery with respect to injuries in potentially every state in the Union. At the conclusion of discovery, the plaintiffs would apply for class certification, proposing to represent the claims of parties whose injuries and modes of redress they would not share. That would present the precise problem that the limitations of standing seek to avoid. The Court will not indulge in the prolonged and expensive implications of the plaintiffs' position only to be faced with the same problem months down the road.

In re Packaged Ice Antitrust Litig., 779 F. Supp. 2d 642, 654 (E.D. Mich. 2011) (quoting In re Wellbutrin XL Antitrust Litig., 260 F.R.D. at 155); see also Crown, Cork & Seal, 462 U.S. at 354 (Powell, J., concurring) (reiterating that *American Pipe* "must not be regarded as encouragement to lawyers * * * to frame their pleadings as a class action, intentionally, to attract and save members of the purported class who have slept on their rights" (quoting Am. Pipe, 414 U.S. at 561)); see also In re Elscint, Ltd. Sec. Litig., 674 F. Supp. 374, 377-78 (D. Mass. 1987).

Because Ms. Rudman lacked **[*93]** standing to raise claims under the laws of any states other than New York, her class action did not toll the statute of limitations for any such claims, making the *Rogers* claims at issue untimely. While this finding is dispositive as to Indirect Plaintiffs' claims, the Court will nonetheless address the remaining arguments regarding the alleged untimeliness of certain of Indirect Plaintiffs' claims for the sake of completeness.

2. Successive ("Piggyback") Class Actions

According to most courts that have addressed the issue, plaintiffs may not "piggyback one class action onto another," Salazar—Calderon v. Presidio Valley Farmers Ass'n, 765 F.2d 1334, 1351 (5th Cir. 1985), "and thereby engage in endless rounds of litigation in the district court." Griffin, 17 F.3d at 359 (affirming that "Plaintiffs may not piggyback one class action onto another and thus toll the statute of limitations indefinitely"); see also Andrews v. Orr, 851 F.2d 146, 149 (6th Cir. 1988) ("The courts of appeals that have dealt with the issue appear to be in unanimous agreement that the pendency of a previously filed class action does not toll the limitations period for additional class actions by putative members of the original asserted class." (citing cases)), *overruled on other grounds*, Hall v. Warden, Lebanon Corr. Inst., 662 F.3d 745, 749-50 (6th Cir. 2011).

There are really two legal concerns subsumed in these cases. The first, **[*94]** as the Seventh Circuit has pointed out, is a concern regarding "the preclusive effect of a judicial decision in the initial suit applying the criteria of Rule 23." Sawyer v. Atlas Heating & Sheet Metal Works, Inc., 642 F.3d 560, 563 (7th Cir. 2011). This concern applies to successive class actions (as opposed to individual lawsuits) filed *after* the denial of class certification, where the concern is that the new class may get an unwarranted second bite at the class-certification apple (depending, of course, on the reason for denial of class certification the first go-round). See, *e.g.,* McKowan Lowe & Co. v. Jasmine, Ltd., 295 F.3d 380, 386 (3d Cir. 2002) (noting that "application of *American Pipe* tolling to successive attempts to certify *a previously rejected class* would sanction an endless succession of class filings" (emphasis added)). This concern has nothing to do with *American Pipe* or tolling principles generally, and has no direct application here.

The second concern—which is relevant here—relates to the difference between the tolling effect of a successive class-action complaint that is filed *prior to* any ruling on the viability of the initial class-action complaint as opposed to one filed *after* a class-certification ruling (as contemplated by *American Pipe*). Compare Wyser—Pratte Mgmt. Co. v. Telxon Corp., 413 F.3d 553, 568-69 (6th Cir. 2005) ("[A] plaintiff who chooses to file an independent action without **[*95]** waiting for a determination on the class certification issue may not rely on the *American Pipe* tolling doctrine."), with In re Vertrue Inc. Marketing & Sales Practices Litig., 719 F.3d 474, 480 (6th Cir. 2013) (distinguishing *Wyser—Pratte* as a case where "a putative class member who initiated a lawsuit four months before a lead plaintiff's motion for certification was granted," where tolling did not occur, from a case where "the district court had confirmed that it would not address the class certification issue," where tolling did occur).

The first appellate courts to address the issue found that *American Pipe* tolling does not apply to successive individual actions filed prior to class certification. According to the Sixth Circuit, "[t]he purposes of *American Pipe* tolling are not furthered when plaintiffs file independent actions before decision on the issue of class certification" because the secondary filing creates duplicative litigation. Wyser—Pratte, 413 F.3d at 569; see also Glater v. Eli Lilly & Co., 712 F.2d 735, 739 (1st Cir. 1983) ("The policies behind Rule 23 and *American Pipe* would not be served, in fact would be disserved, by guaranteeing a separate suit at the same time that a class action is ongoing."); In re Enron Corp. Sec., 465 F. Supp. 2d 687, 715-16 (S.D. Tex. 2006) (collecting cases on both sides, and concluding that "the *American Pipe* tolling doctrine applies only to opt-out plaintiffs **[*96]** after the district court makes the class certification determination, regardless of whether it denies or grants certification").

However, three recent appellate-court decisions have gone against the First and Sixth Circuits in finding that *American Pipe* tolling can be invoked in cases filed prior to a ruling on class certification, albeit only in successive *individual* suits (*i.e.*, not class actions). See In re WorldCom Sec. Litig., 496 F.3d 245, 254-56 (2d Cir. 2007) (noting that while the *American Pipe* Court had the benefits of judicial efficiency and economy on its mind, the case "was not meant to induce class members to forgo their right to sue individually); *In re Hanford Nuclear Reservation Litig., 534 F.3d 986, 1009 (9th Cir. 2008)* (echoing *In re WorldCom* and noting that plaintiffs "have a right to file at the time of their choosing"); State Farm Mut. Auto. Ins. Co. v. Boellstoff, 540 F.3d 1223, 1230-31 (10th Cir. 2008) (relying heavily on the *Crown, Cork & Seal* rule that "[o]nce the statute of limitations has been tolled, it remains tolled for all members of the putative class until class certification is denied" (quoting Crown, Cork & Seal, 414 U.S. at 554)); see also Rochford v. Joyce, 755 F. Supp. 1423, 1428 (N.D. Ill. 1990) (disagreeing with the First Circuit's Glater opinion based on the "clear" directive in *Crown, Cork & Seal*).

While the Court sees the appeal of the *Wyser-Pratte* and *Glater* decisions, it finds the more-recent opinions on the matter to be more persuasive. That being said, the **[*97]** Court questions whether the "plain language" of *Crown, Cork & Seal* that these more-recent decisions relied upon is as plain as the courts suggest: "Once the statute of limitations has been tolled, it remains tolled for all members of the putative class until class certification is denied. *At that point*, class members may choose to file their own suits or to intervene as plaintiffs in the pending action." *462 U.S. at 354* (emphasis added). To be sure, we are not "at that point" yet. But such an interpretation of *Crown, Cork & Seal* would require the Court to hold that the statute *is* currently tolled, but that plaintiffs cannot take advantage of this tolling unless and until the Court makes a class-certification ruling. While there is an economic allure to such a rule, it comes at the cost of sacrificing individual choice. As one district court put it, it would run contrary to any known principle governing statutes of limitations "to say that [a successive plaintiff] must wait until the dispute is more stale before he can file his individual case." *Lehman v. United Parcel Serv., Inc., 443 F. Supp. 2d 1146, 1151 (W.D. Miss. 2006)*.

There is an ancillary issue as to whether successive *class actions* (as opposed to individual suits) may proceed prior to a certification ruling in a preceding **[*98]** class action and still take advantage of *American Pipe*'s tolling principle. As the Seventh Circuit noted, the factor that distinguishes post-certification *class* actions from post-certification *individual* actions is the potential for issue preclusion in successive class actions based on the court's *Rule 23* findings in the initial class action. See *Sawyer, 642 F.3d 560*. But if a successive class action is filed before any *Rule 23* decision in the initial suit, then this concern over issue preclusion disappears (at least until one of the cases reaches the class-certification stage). The Court sees no reason why *American Pipe*'s tolling principle should apply only to successive individual actions, and not to successive class actions.

Absent guidance to the contrary from the Seventh Circuit or the Supreme Court, this Court is inclined to extend *American Pipe* tolling to successive class-action plaintiffs who choose to file suit before a decision is rendered on class certification in the initial action. See, *e.g., McKowan, 295 F.3d at 389* ("[W]e see no good reason why class claims should not be tolled where the district court had not yet reached the issue of the validity of the class."). To be clear, this sub-holding (a) ignores the dispositive effect **[*99]** of Ms. Rudman's lack of Article III standing, as discussed above, and (b) assumes that *American Pipe* tolling applies in the cross-jurisdiction setting in the first place, which the Court addresses (and rejects) in the following section.

3. Cross-Jurisdictional Tolling

The elephant in the room here is that both *American Pipe* and *Crown, Cork & Seal* involve the tolling of *federal* statutes of limitations in class actions filed in federal courts, not the tolling of *state* statutes of limitations in class actions filed in federal courts. As mentioned above, "[w]hen state law supplies the period of limitations, it also supplies the tolling rules," *Hemenway, 159 F.3d at 265*, and thus the Court must look to the laws of the various states at issue to determine whether those states recognize cross-jurisdictional class-action tolling. See *In re Linerboard Antitrust Litig., 223 F.R.D. at 345*.

Relevant here are the tolling laws of Arkansas, California, Florida, Minnesota, and North Carolina. Before reviewing those states' laws, there is some low-hanging fruit to tend to. Specifically, Indirect Plaintiffs raised claims under *Cal. Bus. & Prof. Code § 17200*, *Minn. Stat. § 325D.53*, and N.C. Gen. State. *§ 75-1.1* for the first time in their Consolidated Class Action Complaint. But *American Pipe* does not apply to toll new claims. *Crown, Cork & Seal, 462 U.S. at 355* (Powell, J., concurring) **[*100]** ("It is important to make certain * * * that *American Pipe* is not abused by the assertion of claims that differ from those raised in the original class suit."); *Spann v. Cmty. Bank of N. Va., 2004 U.S. Dist. LEXIS 5148, 2004 WL 691785, at *6 (N.D. Ill. Mar. 30, 2004)* ("[T]he [first-filed] complaint only tolled the statute of limitations as to those claims actually alleged against [defendant] in the [first-filed] action."). Because these three claims did not appear in the *Rudman* complaint, they are time barred, and *American Pipe* tolling cannot save them.

As to the remaining states' laws at issue (addressed in alphabetical order), the Ninth Circuit has refused to import cross-jurisdictional tolling into California law. *Clemens v. DaimlerChrysler Corp., 534 F.3d 1017, 1025 (9th Cir. 2008)* ("[T]he weight of authority and California's interest in managing its own judicial system counsel us not to import the doctrine of cross-jurisdictional tolling into California law."). Florida does not allow *American Pipe* tolling at all, let alone in a cross-jurisdictional setting. See *Becnel v. Deutsche Bank, AG, 507 F. App'x 71, 73 (2d Cir. 2013)* ("Florida does not allow tolling during the pendency of class action lawsuits no matter where they are filed." (citing *Fla. Stat. § 95.051(2)*)). Neither Minnesota nor North Carolina has considered the issue of cross-jurisdictional tolling, and as the Ninth Circuit noted in *Clemens*, "several federal courts have declined to **[*101]** import the doctrine into state law where it did not previously exist." *534 F.3d at 1025*; *In re Urethane Antitrust Litig., 663 F. Supp. 2d 1067, 1082 n.10 (D. Kan. 2009)* ("Plaintiffs (and the *Linerboard* court) were able to identify courts in only two states that have adopted cross-jurisdictional tolling.").[9] This Court likewise refuses to import cross-jurisdictional tolling into the laws of a state that has not addressed the issue.

Because the states at issue do not apply cross-jurisdictional tolling, the federally-filed *Rudman* class-action complaint did not toll the statute of limitations for statutory state-law claims brought under the laws of California, Florida, Minnesota, or North Carolina or for unjust enrichment claims brought under the laws of Arkansas, North Carolina, and Florida. This bar exists independently of Indirect Plaintiffs' Article III issues in bringing these claims, and moots the Court's decision to extend *American Pipe* tolling to successive class-action plaintiffs who choose to file suit before a decision is rendered on class certification in the initial action.

V. Filed-Rate Doctrine

In ruling on Defendants' motion to dismiss Direct Purchaser Plaintiffs' Corrected Consolidated Class Action Complaint, Judge Hibbler assessed the application of the filed-rate doctrine to the case, and held that plaintiffs were barred from raising claims based on the purchase of "products whose value is determined, at least in part, by the government minimum rate" for milk, and thus dismissed Direct Plaintiffs' "claims for damages stemming from the purchase **[*103]** of products priced on the basis of the government minimum milk prices." *DFA I, 767 F. Supp. 2d at 894, 897*. The filed-rate doctrine did not bar claims based on the purchase of "products whose price was based on CME prices." *Id. at 896*. This ruling is the law of the case.

Indirect Plaintiffs do not dispute the filed-rate doctrine's applicability to state-law claims. See, *e.g., AT&T Co. v. Cent. Office Tel., Inc., 524 U.S. 214, 228, 118 S. Ct. 1956, 141 L. Ed. 2d 222 (1998)*. Instead, they attempt to avoid Judge Hibbler's ruling altogether by arguing that "the price of the products Plaintiffs purchased (*i.e.*, cheese) was determined solely by reference to the CME cheese spot market price totally independent of the price set by any government entity," and that "[t]he price of cheese was set by adding a margin to the CME cheese spot market prices and nothing else is involved." [521, at 12 (citing Consol. Class Action Compl., 483, ¶ 75).] If this were true, then Indirect Plaintiffs could potentially[10] have positioned themselves outside of realm of forbidden claims as explained in *DFA I.* But this is not what Indirect Plaintiffs' alleged in their complaint. Instead, paragraph 75 says that "[t]he price of Finished Dairy Products *sold to resellers* depends in whole or large part on the Cheese Spot price, without reference to, and independent **[*104]** of, prices set by any government agency." [Consol. Class Action Compl., 483, ¶ 75 (emphasis added).] While the Court must make reasonable inferences in Indirect Plaintiffs' favor,

---

[9] The Illinois Supreme Court laid the foundation for why states should not adopt cross-jurisdictional tolling, reasoning that "[u]nless all states simultaneously adopt the rule of cross-jurisdictional class action tolling, any state which independently does so will invite into its courts a disproportionate share of suits which the federal courts have refused to certify as class actions after the statute of limitations has run." *Portwood v. Ford Motor Co., 183 Ill. 2d 459, 701 N.E.2d 1102, 1103-05, 233 Ill. Dec. 828 (1998)* ("[B]ecause state courts have no control over the work of the federal judiciary, we believe it would be unwise to adopt a policy basing the length of Illinois limitation periods on the federal courts' disposition of suits seeking class certification."). But see *In re Linerboard Antitrust Litig., 223 F.R.D. at 346* ("[D]eclining to adopt cross-jurisdictional class action tolling will invite the filing of numerous protective, duplicative and in many cases, unnecessary, suits by class members that want to consider **[*102]** filing claims under state ***antitrust law*** not included in a federal class action complaint.").

[10] The reason that such an allegation would only *potentially* save Indirect Plaintiffs' claims is because the claim is still dependent on the assumption that the entire class of indirect plaintiffs purchased finished dairy products made exclusively out of the cheese that Defendants purchased on the CME cheese spot market.

it would be pure speculation to infer that the price of finished dairy products *sold to consumers* is not determined, even in part, by government minimum milk prices.

Approaching this argument from a different angle, Indirect Plaintiffs divide the world of finished dairy products into two categories—those that include milk that was priced based on a government rate and those that do not—and argue that because Defendants produce their own milk (at least in part), it is *possible* that the finished dairy products that Indirect Plaintiffs purchased fall entirely into the latter (non-barred) category. But whether the finished dairy products at issue *contain* government-priced milk is not the same inquiry **[*105]** as whether their prices were *determined*, at least in part, by the government minimum rate. And Indirect Plaintiffs repeatedly highlight the influence that the USDA rate had on finished dairy products nationwide, noting that "minimum prices for raw farm milk bought by many cheese manufacturers are set using a [USDA] pricing formula," that "Cheese Spot prices are also used as a component for the pricing of Class I Milk by, *inter alia*, the USDA and State of California," that "[p]rivate industry participants throughout the nation use the prices set by the USDA and State of California for Class I Milk as the mechanism for pricing in their contracts for the sale/purchase of Class I Milk and products containing Class I Milk," and that Defendants' "manipulation of the Cheese Spot market or the Milk Futures market caused an artificial and unlawful increase in the prices of Dairy Products including, but not limited to, Class I and III Milk prices set by the USDA and the California Department of Food and Agriculture, throughout the United States." [Consol. Class Action Compl., 483, ¶¶ 77-78, 81.]

If the USDA pricing did not determine (at least in part) the price of Defendants' finished dairy products, **[*106]** it is curious why Indirect Plaintiffs put such an emphasis on this element of the story in their complaint (especially in light of Judge Hibbler's filed-rate ruling). This mystery quickly unravels when one considers the core allegation in Indirect Plaintiffs' complaint, which is that Defendants' actions in the commodities markets artificially raised the governmental price for milk, which in turn artificially raised the national price of milk and cheese, which ultimately allowed Indirect Plaintiffs to reap the benefit of the nationwide price increase in finished diary products. Regardless of what inferences the Court may make in Indirect Plaintiffs' favor, the Court cannot ignore Indirect Plaintiffs' allegation that Defendants' activities raised the governmental price of milk, and that governmental pricing in turn influenced the price of finished dairy products nationwide; inferences do not overcome the big picture.

This holding also comports with the policies underpinning the filed-rate doctrine. The theory behind the doctrine is that "any 'filed rate'—that is, one approved by [a] governing regulatory agency—is per se reasonable and unassailable in judicial proceedings brought by ratepayers." **[*107]** *DFA I, 767 F. Supp. 2d at 893* (quoting *Wegoland Ltd. v. NYNEX Corp., 27 F.3d 17, 18 (2d Cir. 1994))*. The concern is that if an allegedly price-fixed product is priced based (even in part) on a government rate, then "determining a hypothetically reasonable rate for the purposes of calculating damages * * * would interfere with the regulatory agency's ratemaking authority." *Id.* Indirect Plaintiffs argue that the Court will not have to involve itself with any government rates in order to calculate damages in this case because the retailers that sold products to Indirect Plaintiffs "are in a fiercely competitive market and pass on the price increases incurred from the increases that defendants orchestrated on the CME cheese spot market." [521, at 12.] But this argument is belied by Indirect Plaintiffs' statements regarding the nationwide impact that governmental milk prices have on finished dairy products; Defendants' ability to impact governmental milk pricing defines the nature of the scheme. See *DFA I, 767 F. Supp. 2d at 896-97* (citing *Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1157 (3d Cir. 1993))*. As such, any calculation of damages resulting from the price of finished dairy products would inevitably include, at least in part, an assessment of what governmental milk prices would have been absent Defendants' actions.[11] Accordingly, Indirect Plaintiffs' claims for **[*108]** damages are barred by the filed-rate doctrine.[12]

[11] Indirect Plaintiffs argue that a damages calculation will require them "to establish [1] what the price on the CME cheese spot market would have been in the absence of the wrongful conduct; [2] how much that caused the price Defendants charged for their branded cheese products to retailers or wholesalers to increase; and [3] how much of that increase was passed on to Plaintiffs and other consumers." [521, at 12.] It is the second step that necessarily involves a calculation of the government rate because Defendants' sale price was based on the going rate in the national market, which in turn was based, at least in part, on government milk prices.

VI. Failure to State a Claim: Monopolization

Invoking the antitrust laws of Michigan, Minnesota, and North Carolina, and the consumer-protection laws of Arkansas, California, and Florida, Indirect Plaintiffs allege that Defendants wrongfully acquired and maintained monopoly power in the Cheese Spot market. In response—and in addition to their arguments regarding Indirect Plaintiffs' lack of standing to raise these claims, as discussed above—Defendants argue that Indirect Plaintiffs failed to state a claim for monopolization under each state's law because (1) the purportedly monopolized market—the Cheese Spot market—does not encompass all interchangeable substitute products, and (2) Plaintiffs failed to allege that DFA had sufficient market power or excluded others from participating in **[*110]** the CME cheese spot call. The Court addresses each argument in turn.

A. Legal Standard

To state a claim for monopolization under *federal* law, Plaintiffs must plead "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power." *DFA I, 767 F. Supp. 2d at 901*. Michigan, Minnesota, and North Carolina interpret their antitrust statutes in harmony with federal law, and the parties do not dispute the applicability of this two-part test under those states' laws.

However, Defendants *do not* allege that this two-part test applies to Indirect Plaintiffs' monopolization claims brought under the consumer-protection laws of Arkansas, California, and Florida, nor do they explain what the monopolization standards are in those states. Instead, Defendants claim that Indirect Plaintiffs raised monopolization claims under these states' consumer-protection statutes only because they are barred from bringing monopolization claims under those states' antitrust statutes. Defendants then argue that Indirect Plaintiffs should be forbidden from circumventing those states' legislatures' limitations on antitrust recovery by repackaging their antitrust claims as "ill-fitting" consumer **[*111]** protection claims. Even though this is not a "failure to state a claim" argument (thus making it "ill-fitting" in regard to this section of the Court's opinion), the Court can dispose if it efficiently here.

Addressing the three states alphabetically, courts have interpreted the catchall provision of the Arkansas Deceptive Trade Practices Act—which prohibits any "unconscionable, false, or deceptive act or practice in business, commerce, or trade," *Ark. Code § 4-88-107(a)(10)*—broadly so as to encompass monopolization claims. See *Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, 737 F. Supp. 2d 380, 404-05 (E.D. Pa. 2010)*. Similarly, individual plaintiffs can bring monopolization claims under California's Unfair Competition Law ("CUCL")—which prohibits "unlawful, unfair, or fraudulent business practice[s]," *Cal. Bus. & Prof. Code § 17200*—such that a "decision to grand [defendants'] motion to dismiss plaintiffs' Cartwright Act monopolization claims does not in any way prevent [a court] from allowing their CUCL claim to proceed." *Sheet Metal Workers, 737 F. Supp. 2d at 406*. And plaintiffs have also been successful in bringing monopolization claims under the Florida Deceptive and Unfair Trade Practices Act, which prohibits "[u]nfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce," **[*112]** *Fla. Stat. § 501.204(1)*. *Sheet Metal Workers, 737 F. Supp. 2d at 408-09*. In summation, Indirect Plaintiffs' consumer-protection claims

---

[12] Indirect Plaintiffs argue that California's Cartwright Act does not recognize the filed-rate doctrine for rates set by state rate-making agencies. See *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 992 (9th Cir. 2000))*. Defendants disagree, arguing that since *Knevelbaard*, the tide has changed in California. See *MacKay v. Superior Court, 188 Cal. App. 4th 1427, 115 Cal. Rptr. 3d 893, 910 (Cal Ct. App. 2010)*. The Court is not convinced that *MacKay*—an insurance-rate case where the court noted "the limited nature of [its] holding"—expressly overruled what was otherwise established California law. See *In re Conseco Life Ins. Co. Life Trend Ins. Marketing & Sales Practice Litig., 2012 U.S. Dist. LEXIS 99859, 2012 WL 2917227, at *9-10 (N.D. Cal. July 17, 2012)* (noting disagreement amongst California courts regarding the **[*109]** filed-rate doctrine and refusing to apply it). As such, the Court will not apply the filed-rate doctrine to dismiss Indirect Plaintiffs' damages claims based on California law regarding rates set by the California Department of Food and Agriculture. This is somewhat of a moot point, as the Court has already found dismissal of Indirect Plaintiffs' California-law claims to be appropriate on other grounds.

under the laws of Arkansas, California, and Florida are not dismissible simply because those states do not provide a private right of action for monopolization claims under their respective antitrust statutes.

Accordingly, the Court will apply the two-part test to Indirect Plaintiffs' monopolization claims under Michigan, Minnesota, and North Carolina ***antitrust law***, but because Defendants do not allege that Indirect Plaintiffs failed to state a claim under the Arkansas, California, and Florida consumer-protection statutes (or at least Defendants failed to provide the relevant legal standards under those states' laws), the Court will not address such arguments.

B. Relevant Market

Under federal law, "[t]he outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. "In other words, the products in a market must have unique attributes that allow them to be substituted for one another, but make them difficult to replace with substitute products from outside the market." *DFA I, 767 F. Supp. 2d at 901*. In most cases, proper market definition **[*113]** is a factintensive inquiry that is not suited for resolution on a motion to dismiss. *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*.

Indirect Plaintiffs allege in their Consolidated Class Action Complaint that DFA wrongfully acquired and maintained monopoly power in the Cheese Spot market. [483, ¶ 108.] Indirect Plaintiffs define this market as the only commodities exchange for cheddar cheese in the United States [*id. ¶ 30*], explaining that the market provides a reference point for pricing for the USDA and for many cheese manufacturers nationwide [*id. ¶¶ 32*, 75-78]. Indirect Plaintiffs also note that the CME sets detailed trading rules for the Cheese Spot market that govern the quality and color of the cheese, freight charges, packaging requirements, inspection specifications, penalties for non-compliance, etc. [*id. ¶¶ 31-34*].

In response, Defendants highlight Plaintiffs' concession that the cheese traded on the CME Cheese Spot call market accounts for less than 2% of the annual supply of cheddar cheese, and argue that Plaintiffs' recounting of the characteristics of the CME does not refute that interchangeable substitute products—let alone the other 98% of the annual supply of cheddar cheese—should also be included in the relevant **[*114]** market.

At this stage, Indirect Plaintiffs have adequately pled a relevant market. The key factor in this decision relates to Plaintiffs' claims that (a) the Cheese Spot market is the only cheddar cheese market in the United States, and (b) purchases made on the Cheese Spot market are highly influential in setting the national price for finished dairy products. This aspect of the market makes it distinct from cheddar cheese purchases made outside of the Cheese Spot market, and is enough to satisfy the pleading standard.

C. Market Power / Exclusionary Conduct

In addition to establishing a relevant market, Indirect Plaintiffs must also plead that DFA possessed monopoly power in the Cheese Spot market—*i.e.*, that DFA possessed "the power to control prices or exclude competition." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. There are two methods for proving that a defendant possessed monopoly power: (1) "through direct evidence of anticompetitive effects," or (2) "by proving relevant product and geographic markets and by showing that the defendant's share exceeds whatever threshold is important for the practice in that case." *Toys "R" Us, Inc. v. FTC, 221 F.3d 928, 937 (7th Cir. 2000)*. While "[t]he existence of [monopoly] power ordinarily may be inferred from the predominant share of **[*115]** the market," *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*, "in markets with low barriers to entry, a large market share does not necessarily translate into power over the prices in a market." *DFA I, 767 F. Supp. 2d at 902* (citing *Ball Mem'l Hosp., Inc. v. Mut. Hosp. Ins., Inc., 784 F.2d 1325, 1336 (7th Cir. 1986)*).

The Cheese Spot market is an open market, although one where the buyer agrees to take delivery of an actual product (*i.e.*, cheese). In their Consolidated Class Action Complaint, Indirect Plaintiffs describe it as a "thin market," meaning it is one in which there are a small number of traders and very few transactions, making it vulnerable to monopolization. [483, ¶ 37.] Indirect Plaintiffs allege that Defendants acquired every single contract for cheddar cheese on the Cheese Spot market, paying artificially high prices for these contracts (and assuming a loss in the process) with the goal of raising the national price on milk and cheese, thus allowing them to recoup their losses on the milk futures market and in the sale of its finished dairy products. [483, ¶¶ 38-39, 48-49, 75-82.] Defendants counter by arguing that Plaintiffs' Consolidated Class Action Complaint does not contain a single allegation that DFA excluded anyone from buying or selling cheese on the Cheese Spot market. The Court disagrees with Defendants, and finds **[*116]** that Indirect Plaintiffs adequately alleged market power.[13]

VII. Failure to State a Claim: Consumer "Fraud"

In addition to the arguments addressed above, Defendants also seek to dismiss Indirect Plaintiffs' consumer-protection claims (which Defendants refer to as "consumer fraud" claims), arguing that Indirect Plaintiffs failed to allege unconscionable or deceptive conduct, and thus failed to state a claim under each relevant state's law. Defendants' argument is, for the most part, flawed.

As the Court already alluded to (see footnote 4, *supra*), three of the four state consumer-protection statutes at issue here (California, Florida, and North Carolina) proscribe not only deceptive, fraudulent, and unconscionable business practices, but also *unfair* business practices. See *Cal. Bus & Prof. Code § 17200* (proscribing any "unlawful, unfair or fraudulent business act or practice"); *Fla. Stat. § 501.204(1)* (proscribing "[u]nfair methods of competition, unconscionable acts or practices, **[*117]** and unfair or deceptive acts or practices"); *N.C. Gen. Stat. § 75-1.1* (proscribing "[u]nfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce"). And the *prima facie* requirements for stating a claim under these provisions change depending on whether the plaintiff is alleging fraudulent conduct or unfair conduct. See, *e.g., In re Tobacco II Cases, 207 P.3d at 29-30* (differentiating between the "three varieties of unfair competition [under the UCL]: practices which are unlawful, unfair or fraudulent"); *Wrestlereunion, LLC v. Live Nation Television Holdings, Inc., 2008 U.S. Dist. LEXIS 61428, 2008 WL 3048859, at *3 (M.D. Fla. 2008)* (noting that claims under the Florida Act require plaintiffs to allege that defendants "engaged in unfair methods of competition, unconscionable acts or practices, *or* unfair or deceptive acts or practices" (emphasis added)); *Dalton v. Camp, 353 N.C. 647, 548 S.E.2d 704, 711 (N.C. 2001)* ("In order to establish a *prima facie* claim for unfair trade practices, a plaintiff must show: (1) defendant committed an unfair *or* deceptive act or practice" where "[a] practice is *unfair* if it is unethical or unscrupulous, and it is *deceptive* if it has a tendency to deceive." (emphasis added)). Here, Indirect Plaintiffs do not allege fraud or deception [see 521, at 21 ("[T]he CCAC does not allege any fraud on the part of defendants * * *.")], and thus need not plead deceptive **[*118]** or unconscionable conduct to state a claim under the consumer-protection laws of California, Florida, or North Carolina.

The outlier is the Arkansas Deceptive Trade Practices Act ("ADTPA"), which proscribes "unconscionable, false, or deceptive" business practices without reference to "unfair" business practices. See *Ark. Code § 4-88-107(a)(10)*. The ADTPA further notes that "[t]he deceptive and unconscionable trade practices listed in this section are in addition to and do not limit the types of *unfair* trade practices at common law or under *other statutes* of this state." *Id. § 4-88-107(b)* (emphasis added). Thus, claims under the ADTPA are limited to "instances of false representation, fraud, or the improper use of economic leverage in a trade transaction." *Universal Coops., Inc. v. AAC Flying Serv., Inc., 710 F.3d 790, 795-96 (8th Cir. 2013)*. The "improper use of economic leverage" prohibition is animated by the statute's proscription of "unconscionable" business practices, *id. at 795*, such that "allegations of price fixing * * * are not the kind of conduct prohibited under the[] statute[]." *In re Graphics Processing Units Antitrust Litig., 527 F. Supp. 2d 1011, 1030 (N.D. Cal. 2007)* (dismissing indirect purchasers' claims under the

---

[13] Because the Court has already deemed Indirect Plaintiffs' monopolization claims dismissible on other grounds, the Court's finding regarding their ability to state a claim for monopolization is inconsequential, and the Court provides this ruling only for the sake of completeness.

ADTPA); see also *Universal Coops., 710 F.3d at 795* ("An 'unconscionable' act is an act that 'affront[s] the sense of justice, decency, or reasonableness." (citation omitted)). In other words, the Arkansas legislature has distanced **[*119]** the ADTPA from other state laws prohibiting unfair trade practices, reserving the ADTPA for fraudulent and unconscionable acts. Upon review of Indirect Plaintiffs' Consolidated Class Action Complaint, the Court agrees with Defendants that Indirect Plaintiffs failed to allege that Defendants' conduct "affronts the sense of justice, decency, or reasonableness" so as to rise to the level necessary to state a claim under the ADTPA.

Accordingly, Indirect Plaintiffs' failure to state price-fixing or monopolization claims under *Ark. Code § 4-88-107* provides an alternative ground for dismissal of those claims. And while Indirect Plaintiffs did state consumer-protection claims under California, Florida, and North Carolina law, this discussion is presented only in the interest of completeness as the Court has already dismissed those claims on other grounds.

VIII. Failure to State a Claim: Unjust Enrichment

The Court already concluded that all but two (Arkansas and Minnesota) of Plaintiffs' unjust enrichment claims are untenable in light of the Court's dismissal of the related antitrust claims on remoteness grounds, and the Court also found dismissal of all unjust enrichment claims appropriate under the filed-rate **[*120]** doctrine. The Court further noted that California law does not recognize a cause of action for unjust enrichment. See *Melchior, 131 Cal. Rptr. 2d at 357*. In addition to these grounds for dismissal, Plaintiffs fail to specify which states' laws, if any, give rise to their unjust enrichment claims, which presents another viable ground for dismissal. See, *e.g.,* *In re Refrigerant Compressors Antitrust Litig., 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *23* (citing cases).

Defendants' two remaining alternative arguments for dismissal of Indirect Plaintiffs' unjust enrichment claims are less persuasive. First, Defendants argue that under Florida, Minnesota, New York, and North Carolina law, unjust enrichment is not available as an independent claim to a party with an adequate remedy at law.[14] Indirect Plaintiffs contend that they are entitled to plead in the alternative, see *Fed. R. Civ. P. 8(d)(2)*, and Defendants counter that "where the unjust enrichment claim relies upon the same factual predicates as a plaintiff's legal causes of action, it is not a true alternative theory of relief but rather is duplicative of those legal causes of action." *In re Ford Tailgate Litig., 2014 U.S. Dist. LEXIS 32287, 2014 WL 1007066, at *5 (N.D. Cal. Mar. 12, 2014)* (quoting *Licul v. Volkswagen Grp. of Am., Inc., 2013 U.S. Dist. LEXIS 171627, 2013 WL 6328734, at *7 (S.D. Fla. Dec. 5, 2013))*. While Defendants' argument shows promise, it is not a widely-accepted theory for dismissal at the motion-to-dismiss stage, and Defendants provide no support for its application under the **[*121]** states' laws at issue. Accordingly, the Court finds this argument to be premature at the pleading stage. See, *e.g.,* *In re Light Cigarettes Mktg. Sales Practices Litig., 751 F. Supp. 2d 183, 191-93 (D. Me. 2010)*.[15]

Second, Defendants argue that the antitrust statutes in Minnesota, New York, and North Carolina and the consumer-protection statutes in Arkansas and North Carolina limit a plaintiff's potential recovery to compensatory damages, making equitable relief unavailable. Although the parties' arguments lack depth and clarity on this issue, because Indirect Plaintiffs raised unjust enrichment as an independent claim (and not merely as a remedy), the Court interprets Defendants' argument as saying that Indirect Plaintiffs' unjust enrichment *claims* are barred based on the *remedies* available under certain state statutes. But as with Defendants' first argument, this argument **[*122]**

---

[14] See, *e.g.,* *Bowleg v. Bowe, 502 So.2d 71, 72 (Fla. Dist. Ct. App. 1987)*; *ServiceMaster of St. Cloud v. GAB Business Servs., Inc., 544 N.W.2d 302, 305 (Minn. 1996)*; *Samiento v. World Yacht Inc., 10 N.Y.3d 70, 883 N.E.2d 990, 996, 854 N.Y.S.2d 83 (N.Y. 2008)*; *Jefferson Standard Life Ins. Co. v. Guilford Cnty., 225 N.C. 293, 34 S.E.2d 430, 434 (N.C. 1945)*.

[15] "Should plaintiffs ultimately be unable to recover under [an antitrust claim], it does not mean [that] a legal remedy was unavailable (thereby justifying an equitable remedy of unjust enrichment), but only that their claim lacks merit." *In re Ford Tailgate Litig., 2014 U.S. Dist. LEXIS 32287, 2014 WL 1007066, at *5*; see also *United States v. Bame, 721 F.3d 1025, 1030-32 (8th Cir. 2013)* (noting how Minnesota courts regularly dismiss unjust enrichment claims even where plaintiffs pursue legal and equitable claims in the alternative).

is also premature at the pleading stage, as Indirect Plaintiffs are entitled to plead in the alternative. See, *e.g., In re Chocolate Confectionary Antitrust Litig., 749 F. Supp. 2d 224, 237-42 (M.D. Pa. 2010)* (covering Minnesota, New York, and North Carolina law); see also *In re Cardizem CD Antitrust Litig., 105 F. Supp. 2d 618, 669 (E.D. Mich. 2000)* ("[C]ourts often award equitable remedies under common law claims for unjust enrichment in circumstances where claims based upon contract or other state law violations prove unsuccessful.").

IX. Schreiber Foods, Inc.

In their Consolidated Class Action Complaint, Indirect Plaintiffs (for the first time) inculpate Schreiber Foods, Inc. into their allegations, listing Schreiber as a "co-conspirator" in the price-fixing scheme. As a point of reference, Indirect Plaintiffs filed their Consolidated Class Action Complaint [483 (Feb. 25, 2014)] approximately six months before the Court granted Schreiber's motion for summary judgment [652 (Aug. 18, 2014)], dismissing Schreiber as a defendant in the Direct Purchaser action. Regardless, Indirect Plaintiffs have not sought to add Schreiber as an actual defendant in their action, and thus there is no need for the Court to address Indirect Plaintiffs' allegations against non-party Schreiber.

X. State Statutory Exemptions

Defendants argue that Indirect Plaintiffs' antitrust claims **[*123]** under New York and Kansas law are barred by express statutory exemptions. Again, the Court addresses these arguments only in the interest of completeness, having already dismissed these claims on other grounds.

A. New York Dairymen Exemption

The provision of New York's Donnelly Act that proscribes anticompetitive conduct contains an exemption for "cooperative associations, corporate or otherwise, of * * * dairymen * * * [and] to contracts, agreements or arrangements made by such associations," *N.Y. Gen. Bus. Law § 340(3)*, referred to as the "dairymen exemption." Defendants argue that they are a cooperative association of dairymen, and thus fall within the statute's exemption.

In crafting the dairymen exemption, the New York legislature "intended to duplicate Congress'[s] agricultural exemptions to the *Capper-Volstead Act* * * *, intend[ing] to exempt from the operation of the antitrust laws only legitimate activities and agreements." *Agritronics Corp. v. Nat'l Dairy Herd Ass'n, Inc., 914 F. Supp. 814, 827 (N.D.N.Y. 1996)*; see also *People v. Dairylea Coop., Inc., 114 Misc. 2d 421, 452 N.Y.S.2d 282, 286 (N.Y. Sup. Ct. 1982)* ("The exemption was intended to protect and permit dairy cooperative associations * * * to function as such without fear that doing so might be viewed as violating the statute * * * [and] was not intended to protect *carte blanche* an act otherwise criminal and outside of that limited **[*124]** area of exemption.").

In interpreting the exemption, New York's highest court deemed "[t]he language of the statutory exemption [to be] broad and unambiguous," affirming the dismissal of a complaint alleging "a violation of the Donnelly Act by means of an agreement or arrangement among dairymen's co-operatives and others involving the purchase and distribution of milk." *State v. Glen & Mohawk Milk Ass'n, Inc., 61 N.Y.2d 705, 460 N.E.2d 1091, 1093, 472 N.Y.S.2d 606 (N.Y. 1984)*. The court went on to say that this "legislative declaration, clear on its face, cannot be ignored." *Id.* Because of this exemption, "dairymen's co-operatives and those with whom they contract or agree [are] free from regulation under the Donnelly Act," and instead are subject to the "pervasive" regulatory scheme set forth in New York's Agriculture and Markets Law. *Id.*; see also *Margrove Inc. v. Upstate Milk Coop., Inc., 79 Misc. 2d 309, 357 N.Y.S.2d 392 (N.Y. Sup. Ct. 1974)*, *aff'd, sub nom. Margrove Inc. v. Wegman's Food Markets, Inc., 49 A.D.2d 669, 373 N.Y.S.2d 1014 (N.Y. App. Div. 1975)*.

While the Court finds the binding precedent from New York's highest court persuasive, the parties have not provided the Court with enough information to determine whether Defendants are, in whole or in part, members of a qualifying cooperative.[16] Moreover, the New York exemption is modeled after the federal *Capper-Volstead Act*,[17] but the parties have not provided any information about this Act or how interpretations of the Act impact **[*125]** Indirect Plaintiffs' claims here. While Defendants could ultimately prevail on this argument, the Court cannot resolve this issue at the motion-to-dismiss stage.

B. Kansas Dairymen Exemption

Similar to the New York exemption, the Kansas Restraint of Trade Act contains a dairymen exemption, stating that the Act "shall not be construed to apply to [a]ny association" organized under the state "cooperative marketing act" or "any association * * * governed by * * * the *Capper-Volstead act*." *Kan. Stat. Ann. §§ 50-163(e)(1)—(2)*.

First, Indirect Plaintiffs argue that this provision, which took effect in April 2013, does not apply retroactively to reach Defendants' 2004 through 2006 conduct. But the statute says that "*K.S.A. 2014 Supp. 50-163* * * * shall be applied retroactively to any choses in action premised on any provision of the Kansas restraint of trade **[*126]** act." *Kan. Stat. Ann. § 50-164*.

Second, Indirect Plaintiffs argue that the exemption should be read narrowly to avoid giving cooperatives a "free pass" when they engage in behavior that has nothing to do with the cooperative. Unlike its New York counterpart, however, the Kansas dairymen exemption is relatively new, and thus there is no case law interpreting the breadth of the exemption. Because of Kansas's harmonization provision, it would not be inappropriate for the Court to review federal case law interpreting the *Capper-Volstead Act* to determine the boundaries of the exemption. But again, the parties have not provided the Court with sufficient information regarding the contours of the *Capper-Volstead Act* or whether Defendants are a qualifying cooperative, making any attempt to undertake this analysis premature.

Finally, Defendants remark in a footnote that Indirect Plaintiffs failed to allege that Ms. Asmann purchased "articles imported into th[e] state" of Kansas, as required by the Kansas Restraint of Trade Act. *Kan. Stat. Ann. § 50-112*. Indirect Plaintiffs do not dispute this, but instead argue that they are entitled to discovery to determine the state of origin for Ms. Asmann's finished dairy products. Defendants disagree, arguing **[*127]** that because this is an affirmative element of the claim, Indirect Plaintiffs must allege it in their complaint. But at the pleading stage, "[s]pecific facts are not necessary; the statement need only give the defendant fair notice of what the * * * claim is and the grounds upon which it rests." *Erickson, 551 U.S. at 93*. Ms. Asmann accomplished that feat, and thus her claim is not dismissible on this ground.

XI. Motion to Intervene

Movants Timmy P. Tholp, Wayde R. Alright, Chelsey M. Penix, Amber Lambert, Lisa R. Murphy, and Toni O'Dell filed a motion to intervene [723], although without specifying whether the motion refers to the Direct Purchaser action (which has already settled) or the Indirect Purchaser action (which is now dismissed). Regardless, Movants' motion is denied.

First, Movants failed to meet the intervention standards in either *Rule 24(a)* (intervention of right) or *Rule 24(b)* (permissive intervention). To the former, Movants have no statutory right to intervention, and have not claimed an interest relating to the property or transaction that is the subject of either the direct or indirect action. To the latter, Movants have no conditional right to intervene by a federal statute, and do not share a claim or defense with

---

[16] Indirect Plaintiffs admit in their complaint that DFA is a "vertically integrated cooperative of * * * raw milk producers," [483, ¶ 18], but this statement, standing alone, is insufficient to bring Defendants within the scope of the dairymen exemption.

[17] The *Capper-Volstead Act* provides protection for certain agricultural cooperatives, including dairymen, from federal ***antitrust law***. See, *e.g., Case-Swayne Co. v. Sunkist Growers, Inc., 389 U.S. 384, 389, 88 S. Ct. 528, 19 L. Ed. 2d 621 (1967)*.

either **[*128]** the direct or indirect action. In short, Movants' motion lacks sufficient detail to apprise the Court of Movants' interest, or how it relates to this litigation.

Second, Movants fail to comply with *Federal Rule of Civil Procedure 24(c)*, which requires prospective intervenors to "state the grounds for intervention" in their motion, and to provide "a pleading that sets out the claim or defense for which intervention is sought." *Fed. R. Civ. P. 24(c)*. Movants fail on both accounts, stating no grounds (other than conclusory ones) for their intervention, and failing to attach the required pleading.

Third, to the extent that Movants were direct purchasers (which seems unlikely), their claims would be governed by the approved settlement in that action, to which Movants did not object. To the extent that Movants were indirect purchasers, their motion is moot in light of this opinion dismissing the Indirect Purchaser action.

Vague statements that potential intervenors "have a common vested interest" in the litigation or that they "will provide questions of laws [sic] and facts that are common" are insufficient to trigger intervention. [723.] Defendant Dairy Farmers of America refers to Movants as "serial filers of similar motions lacking merit," and **[*129]** cites to several cases across the country highlighting their "long and litigious history filing frivolous lawsuits in courts across the country," and other similar observations. [724 (citations omitted).] Based on the brevity and lack of substance in Movants' motion, it appears as though this may be another example of their infamous work. Regardless, their motion [723] fails to meet the criteria for intervention as laid out in the Federal Rules for Civil Procedure, and must be denied.

XII. Conclusion

The Court finds dismissal of each of Indirect Plaintiffs' claims to be appropriate on at least two separate grounds. Accordingly, and for the reasons stated herein, the Court grants Defendants' motion to dismiss Indirect Purchaser Plaintiffs' Consolidated Class Action Complaint [497]. In addition, putative Intervenors' motion to intervene [723] is denied.

ORDER GRANTING PLAINTIFFS' MOTION FOR PRELIMINARY INJUNCTION

Re: Dkt. No. 12

Before the Court is a motion for temporary restraining order and preliminary injunction filed by Plaintiffs InterDigital Technology Corporation, IPR Licensing, Inc., and InterDigital, **[*2]** Inc. (collectively, "Plaintiffs" or "InterDigital"). ECF No. 12 ("Motion"). InterDigital requests that the Court issue an anti-suit injunction prohibiting Defendant Pegatron Corporation ("Pegatron") from prosecuting or pursuing an action filed by Pegatron in Taiwan's Intellectual Property Court. *See* ECF No. 12; ECF No. 12-13 ("Proposed Order"). Having considered the submissions of the parties, the record in this case, and the relevant law, the Court hereby GRANTS InterDigital's Motion, for the reasons stated below.

I. BACKGROUND

A. Factual Background

Plaintiff InterDigital, Inc. is a Pennsylvania corporation having its principal place of business in Delaware. ECF No. 1 ("Compl.") ¶ 7. Plaintiffs InterDigital Technology Corporation and IPR Licensing, Inc. are both Delaware corporations having their principal place of business in Delaware, and each is a subsidiary of Plaintiff InterDigital, Inc. *Id.* ¶¶ 5-6; *id.*at 2 n.4. InterDigital contends it "develops fundamental wireless technologies that are at the core of mobile devices, networks, and services worldwide." *Id.* ¶ 1.

Defendant Pegatron is an electronics company based in Taipei, Taiwan "dedicated to the development and manufacture of computing devices, **[*3]** computer peripherals and components, and communications and consumer electronics." ECF No. 33 at 3. According to the Complaint, "Pegatron develops and manufactures various wireless communication devices, including certain smartphones for Apple, Inc., such as the iPhone 6." Compl. ¶ 8.

1. Patent License Agreement

In 2008, InterDigital and Pegatron signed a Patent License Agreement ("PLA").[1] ECF No. 10-2. Pursuant to the terms of the PLA, InterDigital granted Pegatron a worldwide license to a large portfolio of patents relating to wireless telecommunications technology. *See id.* The Vice President of InterDigital, Mr. Donald Boles, signed the agreement on behalf of the InterDigital entities on April 18, 2008. *Id.* at 17. The CEO and President of Pegatron, Mr. Jason Cheng, signed the agreement on behalf of Pegatron on April 30, 2008. *Id.*

The PLA contained two provisions relevant to the instant dispute: (1) **[*4]** a dispute resolution provision, and (2) a governing law and venue provision. Each is addressed in turn.

a. Dispute Resolution

Article VI of the PLA is titled "Dispute Resolution" and contains sections 5.1 and 5.2 which outline dispute resolution procedures for disputes arising under the PLA. Specifically, in the event of "a dispute arising under this Agreement," senior-level executives of each party shall meet in Wilmington, Delaware or another location to which the parties agree within sixty days after receiving written notice of the dispute. PLA at § 5.1. The parties are then to enter into "good faith" negotiations aimed at resolving the dispute. *Id.* If the parties are unable to resolve the dispute in a mutually satisfactory manner within sixty days following the meeting, then either party may submit the dispute to arbitration. *Id.* Under the arbitration provision, the arbitration is to occur in Washington, D.C., in English, before a panel of three arbitrators. *Id.* § 5.2. The parties have submitted prior disputes to arbitration pursuant to these provisions. *See, e.g., InterDigital Tech. Corp. v. Pegatron Corp.*, No. 13-MC-80087-EJD (N.D. Cal. June 24, 2013), ECF No. 9 (order confirming Arbitration Award in favor **[*5]** of InterDigital).

---

[1] Much of the parties' briefing and accompanying exhibits was filed under seal. The Court will rule on the parties' administrative sealing motions by separate order. However, the facts revealed in the instant order, despite citing to documents the parties filed entirely under seal, are not sealable.

b. Governing Law and Venue

Section 6.10 of the PLA, titled "Governing Law/Venue," also provides that "[t]he validity and interpretation of this Agreement shall be governed by Delaware law, without regard to conflict of laws principles." PLA § 6.10. The section further provides that "[t]he Parties irrevocably consent to exclusive jurisdiction and venue of the state and federal courts in the San Jose Division of the United States District Court for the Northern District of California." *Id.*

2. Taiwan Proceedings

On February 3, 2015, Pegatron filed a lawsuit against InterDigital in Taiwan Intellectual Property Court. *Pegatron Corp. v. InterDigital Tech. Corp.*, 104-Min-Pu-Tze-No. 17. *See, e.g.*, ECF No. 10-6 ("Taiwan Action"). In the Taiwan Action, Pegatron alleged that the royalty rates and terms of the PLA violate the Taiwan Fair Trade Act. Specifically, Pegatron alleged that certain terms of the PLA were unlawful under Taiwanese law and identified the following obligations pursuant to the PLA as unlawful:

> [InterDigital] granting a license to Pegatron but refusing to even provide a full list of the Licensed Patents; and even if the Licensed Patents include the standard essential patents, as claimed by the defendants, **[*6]** the validity of such patents is doubtful, but [InterDigital] restricted Pegatron from challenging the patents' validity; there is no way to distinguish the standard essential patents from the non-standard essential patents; the scope and term of the Licensed Patents are unclear; [InterDigital] licensed standard essential patents with non-standard essential patents, which involving [sic] mandatory package licensing; [InterDigital] deprived Pegatron its basic right to terminate the PLA and to seek a reasonable legal remedy; and [InterDigital] refused to provide transparent transaction information.

Taiwan Action at 4. For relief, Pegatron sought to enjoin InterDigital from enforcing the terms of the PLA and, additionally, sought damages in excess of $52 million. *Id.* at 1.

On May 26, 2015, InterDigital was served with a copy of the Complaint in the Taiwan Action. ECF No. 10-13 ¶ 24. At that time, InterDigital first became aware that the Taiwan Court had already scheduled a hearing for the Taiwan Action two weeks later, on June 9, 2015. *Id.* ¶ 25. On the evening of May 26, InterDigital called the Taiwan Court, seeking an extension of the June 9 hearing. *Id.* The Taiwan Court agreed to reschedule the hearing from June **[*7]** 9, 2015 to July 7, 2015, even though InterDigital sought a longer extension.

The next day, on May 27, 2015, InterDigital sent a letter to Pegatron providing a Notice of Dispute under the PLA, demanding that Pegatron withdraw the Taiwan Action and initiate the senior-level meetings required pursuant to the dispute resolution provisions in the PLA. *Id.* ¶ 26. On June 1, 2015, Pegatron responded, refusing to withdraw the Taiwan Action and, similarly, refusing to engage in the protocol for dispute resolution outlined in the PLA. *Id.* ¶ 27. On June 5, 2015, InterDigital filed a demand for arbitration pursuant to the procedures outlined in the PLA. *Id.* ¶ 28.

B. Procedural History

On June 10, 2015, InterDigital filed its Complaint in the instant action. Compl. The gravamen of InterDigital's Complaint is that Pegatron's filing of the Taiwan Action constitutes a breach of the PLA. *See id.* For relief, InterDigital seeks (1) an anti-suit injunction, enjoining Pegatron from prosecuting the Taiwan Action, (2) specific performance requiring Pegatron to comply with the dispute resolution procedures outlined in the PLA, and (3) and order compelling arbitration of the parties' dispute pursuant to the provisions **[*8]** outlined in the PLA. *See id.*

On June 11, 2015, InterDigital filed the instant Motion seeking a temporary restraining order and the issuance of a preliminary anti-suit injunction, enjoining Pegatron from further prosecution of the Taiwan Action. ECF No. 12. Also on June 11, 2015, InterDigital filed an administrative motion to relate the instant case with either (a) the prior proceeding in this district before Judge Davila that had confirmed the award from the parties' prior arbitration or (b) a pending proceeding in this district before Judge Freeman where Asus and Asustek[2] sued InterDigital over a nearly identical license agreement. *See InterDigital Tech. Corp. v. Pegatron Corp.*, No. 13-MC-80087-EJD (N.D. Cal. June 11, 2015), ECF No. 17. On June 15, 2015, Judge Davila denied InterDigital's motion to relate the instant case to the case over which he previously presided. *See InterDigital Tech. Corp. v. Pegatron Corp.*, No. 13-MC-80087-EJD (N.D. Cal. June 15, 2015), ECF No. 19. Later that day, Judge Freeman also denied InterDigital's motion to relate the instant case to the case pending before her and involving a similar dispute between Asus, Asustek, and InterDigital. *Asus Computer Int'l* ***[*9]*** *v. InterDigital, Inc.*, No. 15-CV-1716-BLF (N.D. Cal. June 15, 2015), ECF No. 43. Accordingly, on June 15, 2015, this Court set a briefing schedule for the instant Motion. ECF No. 27. On June 22, 2015, Pegatron filed an opposition (ECF No. 33), and on June 24, 2015, InterDigital filed a reply (ECF No. 36).

II. LEGAL STANDARD

Preliminary relief is an "extraordinary remedy that may only be awarded upon a clear showing that the plaintiff is entitled to such relief." *Winter v. NRDC, Inc., 555 U.S. 7, 22, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008)*. "A plaintiff seeking a preliminary injunction must establish [1] that he is likely to succeed on the merits, [2] that he is likely to suffer irreparable harm in the absence of preliminary relief, [3] that the balance of equities tips in his favor, and [4] that an injunction is in the public interest." *Id. at 20*. The plaintiff bears the burden of proof on each element. *Klein v. San Clemente, 584 F.3d 1196, 1201 (9th Cir. 2009)*. "[T]he decision whether to grant or deny injunctive relief rests within the equitable discretion of the district courts," and "such discretion must be exercised consistent with traditional principles of equity." **[*10]** *eBay Inc. v. MercExchange, LLC, 547 U.S. 388, 394, 126 S. Ct. 1837, 164 L. Ed. 2d 641 (2006)*.

However, the Ninth Circuit does not require a party to meet the "likelihood of success on the merits of the underlying claim to obtain an anti-suit injunction." *E&J Gallo Winery v. Andina Licores S.A., 446 F.3d 984, 991 (9th Cir. 2006)*. Rather, a party "need only demonstrate that the factors specific to an anti-suit injunction weigh in favor of granting the injunction." *Id.* Specifically, "a district court, in evaluating a request for an anti-suit injunction, must determine (1) whether or not the parties and the issues are the same, and whether or not the first action is dispositive of the action to be enjoined; (2) whether the foreign litigation would frustrate a policy of the forum issuing the injunction; and (3) whether the impact on comity would be tolerable." *Applied Med. Distrib. Corp. v. Surgical Co. BV, 587 F.3d 909, 913 (9th Cir. 2009)* (citing *Gallo, 446 F.3d at 991, 994)*. "The [anti-suit] injunction operates in personam: the American court enjoins the claimant, not the foreign court." *Gallo, 446 F.3d at 989*.

III. DISCUSSION

A. Anti-Suit Injunction Factors

InterDigital argues that each of the anti-suit injunction factors weighs in favor of an anti-suit injunction in this case. ECF No. 12 at 10-14. Pegatron argues that each weighs against an anti-suit injunction in this case. ECF No. 33 at 7-13. Each of the factors is addressed in turn.

1. Similarity of the issues[3]

[2] In 2008, Asustek was the parent company of Pegatron. *See InterDigital Tech. Corp. v. Pegatron Corp.*, No. 13-MC-80087-EJD (N.D. Cal. June 11, 2015), ECF No. 17 at 1.

[3] Neither party **[*11]** disputes that the parties in the instant case are identical to the parties in the Taiwan Action. *See* ECF No. 12 at 10; ECF No. 33 at 8. In the instant case, the plaintiffs are three InterDigital entities, and the defendant is Pegatron. *See*

InterDigital argues that the issues in the instant case are the same as those in the Taiwan Action. ECF No. 13 at 10-11. Specifically, InterDigital contends that Pegatron's Taiwan Action seeks (a) to enjoin InterDigital from enforcing the terms of the PLA and (b) a refund of past royalty payments made by Pegatron to InterDigital pursuant to the PLA. *Id.* Because the dispute arises under obligations imposed by the PLA, InterDigital contends the dispute should be handled by the dispute resolution mechanisms in the PLA or by this Court pursuant to the forum selection clause. *Id.* Pegatron responds that the issues are different because the Taiwan Action "presents the question of whether InterDigital's market position and conduct amount to a violation . . . under **[*12]** Taiwanese law." ECF No. 33 at 9. The Taiwan Action therefore arises under Taiwanese law, argues Pegatron, and does not arise under the PLA for purposes of the arbitration provision. *Id.* Pegatron also argues that the instant case, involving the enforcement of the venue and arbitration clauses of the PLA, is not dispositive of any issue, let alone all issues, raised in the Taiwan Action. *Id.* at 10. For the reasons explained below, this Court agrees with InterDigital.

"In cases like this where the parties are the same, whether [1] the issues are the same and [2] the first action [is] dispositive of the action to be enjoined are interrelated requirements; that is, to the extent the domestic action is capable of disposing of all the issues in the foreign action and all the issues in the foreign action fall under the forum selection clause, the issues are meaningfully 'the same.'" *Applied, 587 F.3d at 915*. The issues need not be "precisely and verbally identical," and instead "the crux of the functional inquiry . . . is to determine whether the issues are the same in the sense that all the issues in the foreign action fall under the forum selection clause and can be resolved in the local action." *Id.* The Court finds the **[*13]** Ninth Circuit's decisions in *Gallo* and *Applied* instructive. In both cases, the district court had denied an anti-suit injunction, and in both cases, the Ninth Circuit reversed the district court for an abuse of discretion.

In *Gallo*, California winemaker Gallo entered a distribution agreement with Ecuadorian alcohol distributor Andina Licores. *446 F.3d at 987*. The distribution agreement contained forum selection and choice-of-law clauses in favor of California. *Id.* Andina filed suit in Ecuador under an Ecuadorian law that was intended to protect Ecuadorians who entered into distribution agreements with foreign entities. *Id.* Gallo then filed suit in California and sought an anti-suit injunction restraining Andina from pursuing the action in Ecuador. *Id. at 987-88*. The district court denied Gallo's request for an anti-suit injunction primarily because the claims arose under different laws—one under California law and the other under Ecuadorian law. *Id. at 991*. In reversing, the Ninth Circuit determined (1) the issues were the same because both arose out of the parties' obligations under the distribution agreement, (2) the parties' agreement provided that such disputes were to be exclusively resolved in California, and (3) California courts **[*14]** could resolve any lingering issues of Ecuadorian law. *See id.* The Ninth Circuit rejected Andina's argument that the issues were not the same, holding: "First, it is not clear that Andina has claims under Ecuadorian law, as the contract contains a choice-of-law clause in favor of California. Second, to the degree that Ecuadorian law does apply, federal courts are capable of applying it to Andina's claims." *Id.*

Similarly, in *Applied*, Applied entered a distribution agreement with BV ("Surgical"), a Netherlands company. *587 F.3d at 911*. The distribution agreement contained forum selection and choice-of-law clauses in favor of California. *Id.* ("This Agreement shall be governed by and construed under the laws of the State of California. The federal and state courts within the State of California shall have exclusive jurisdiction to adjudicate any dispute arising out of this Agreement."). A dispute arose between Applied and Surgical when Applied sought to terminate the distribution agreement pursuant to the terms of the agreement. *Id. at 912*. Applied filed a declaratory judgment action in the Central District of California, while Surgical filed suit in Belgium seeking protection and compensation under Belgian law. **[*15]** *Id.* Applied sought an anti-suit injunction from the California court enjoining Surgical from pursuing relief in Belgium or any other non-California forum. *Id.* The district court denied Applied's request for an anti-suit injunction, determining that the Belgium claims were "potentially broader" than the claims under consideration by the district court. *Id. at 913*. The Ninth Circuit reversed and held that the district court action "is dispositive of the Belgian action because all of the claims in the Belgian action arise out of the Agreement, are subject to the forum selection clause, and therefore must be disposed of in the California forum if at all." *Id. at 916* (internal quotation omitted). The Ninth Circuit rejected Surgical's argument that the Belgian claims were broader than the claims at

---

Compl. In the Taiwan Action, Pegatron is the plaintiff, and the same three InterDigital entities are defendants. *See* Taiwan Action at 1. The Court, therefore, focuses its analysis on the similarity of the issues.

issue in federal district court because Surgical's Belgian claims sought damages that occur only as a result of obligations imposed upon the parties by the distribution agreement. *Id. at 916-17* (finding none of Surgical's Belgian claims "could arise but for the termination of the agreement."). As discussed below, the Court finds the instant case analogous to *Gallo* and *Applied*.

a. Taiwan Action arises under the PLA

In the **[*16]** instant case, Pegatron's Taiwan Action arises solely because of the parties' obligations pursuant to the PLA. The Taiwan Action alleges that the terms of the PLA and the obligations imposed therefrom violate the antitrust laws of Taiwan. Specifically, the Taiwan Action alleges that the terms of the PLA impose the following, allegedly unlawful, obligations:

> [InterDigital] granting a license to Pegatron but refusing to even provide a full list of the Licensed Patents; and even if the Licensed Patents include the standard essential patents, as claimed by the defendants, the validity of such patents is doubtful, but [InterDigital] restricted Pegatron from challenging the patents' validity; there is no way to distinguish the standard essential patents from the non-standard essential patents; the scope and term of the Licensed Patents are unclear; [InterDigital] licensed standard essential patents with non-standard essential patents, which involving [sic] mandatory package licensing; [InterDigital] deprived Pegatron its basic right to terminate the PLA and to seek a reasonable legal remedy; and [InterDigital] refused to provide transparent transaction information.

Taiwan Action at 1, 4. In the Taiwan Action, Pegatron **[*17]** seeks (a) to enjoin InterDigital from "enforcing Article 3.1 of the [PLA] which was entered into with Pegatron in April 2008" and (b) to recover damages in excess of $52 million because Pegatron alleges to have "paid exorbitant royalties for more than 100,000,000 units of its Licensed Products" "[a]fter Pegatron entered into the PLA in 2008 and performed its obligation in accordance with the PLA until the end of 2014." *Id.* at 1-2, 5. The causes of action alleged in the Taiwan Action arise out of the parties' obligations pursuant to the PLA, refer to specific provisions of the PLA, attach as an exhibit to the complaint a copy of the PLA, and involve a dispute over the alleged illegality under Taiwanese law of various provisions of the PLA. *See generally id.* Accordingly, the Court determines that the Taiwan Action arises under the PLA.

b. The dispute resolution, governing law, and forum selection provisions of the PLA govern

The dispute resolution, governing law, and forum selection provisions outlined in the PLA govern disputes arising under the PLA, such as this one, and vest this Court with exclusive jurisdiction over disputes arising under the PLA. The dispute resolution provisions[4] of the PLA provide **[*18]** that: "In the event of a dispute arising under [the PLA]," the terms of the PLA require that the parties first attempt to negotiate the dispute. PLA § 5.1. InterDigital sought to do that here (ECF No. 10-10), and Pegatron refused (ECF No. 10-11). If negotiation fails, the dispute resolution provisions of the PLA further provide that either party may then choose to submit the dispute to binding arbitration. *Id.* § 5.2. Again, InterDigital sought to do that here. ECF No. 10-12.

Further, the forum selection clause[5] of the PLA provides that the parties have "irrevocably consent[ed] to exclusive jurisdiction and venue of the state and federal courts in the San Jose Division of the United States District Court for the Northern District of California." *Id.* § 6.10. Although the governing law provision contained within § 6.10 expressly provides that disputes about the "validity and interpretation" of the PLA are governed by Delaware law, the forum selection clause is not expressly limited to disputes about the "validity and interpretation" of the PLA. *See id.* Instead, the forum selection clause vests the federal and state courts in San Jose, **[*19]** California with "exclusive jurisdiction" over the parties. Nor is the forum selection clause expressly limited to disputes arising under

---

[4] By referring to "dispute resolution provisions," the Court is referring to Sections 5.1 and 5.2 of the PLA.

[5] The forum selection clause of the PLA is contained within section 6.10 and provides: "The Parties irrevocably consent to exclusive jurisdiction and venue of the state and federal courts in the San Jose Division of the United States District Court for the Northern District of California." PLA § 6.10.

the PLA, unlike the dispute resolution provisions. Compare PLA §§ 5.1, 5.2 with § 6.10. The Court does not, and need not, decide the outer bounds of the parties' forum selection clause at this juncture because the Court's determination that the Taiwan Action "arises under" the PLA and concerns the validity and interpretation of the PLA sufficiently resolves the issue of whether the Taiwan Action was filed in violation of the dispute resolution and forum selection provisions of the PLA.

Moreover, the governing law provision[6] of the PLA provides that "[t]he validity and interpretation of [the PLA] shall be governed by Delaware law." PLA § 6.10. Here, as was the case with the Andina's foreign claims in *Gallo*, it is not clear that Pegatron even has claims under Taiwanese law, because the contract contains a choice-of-law **[*20]** clause in favor of Delaware. *See* Gallo, 446 F.3d at 991. If Pegatron does have such claims, however, either an arbitration panel or a court in San Jose is capable of applying Taiwanese law to Pegatron's claims. *See id.* Accordingly, the issues before the Taiwan Court and this Court are the same, and the parties have agreed to the exclusive jurisdiction of state and federal courts in San Jose.

c. Pegatron's remaining arguments

Pegatron offers two remaining arguments as to why the issues in the Taiwan Action are not similar to those in the instant action: (1) the term "arising under" in the arbitration provision of the PLA should be construed narrowly, and (2) the dispute resolution and forum selection provisions were drafted by, and should be construed against, InterDigital. Each is addressed in turn.

Pegatron's first argument is that the language "arising under" in the dispute resolution provisions of the PLA should be construed pursuant to federal law, which construes this term narrowly. ECF No. 33 at **[*21]** 8-9 (citing Mediterranean Enterprises, Inc. v. Ssangyong Corp., 708 F.2d 1458, 1464 (9th Cir. 1983), and Tracer Research Corp. v. National Envtl. Servs. Co., 42 F.3d 1292, 1295 (9th Cir. 1994)). The authority relied upon by Pegatron provides that the scope of mandatory arbitration provisions are governed by federal law, even if the remainder of the contract is governed by state law. When so construed, argues Pegatron, its claims under Taiwanese law are not claims "arising under" the PLA and therefore are not subject to mandatory arbitration. InterDigital responds that the interpretation of the PLA is governed by Delaware law, which gives "arising under" a broad scope. ECF No. 34 at 2-3 (citing BAYPO Ltd. P'ship v. Tech. JV, LP, 940 A.2d 20, 21, 23 (Del. Ch. 2007) (finding "arising under" language to be "broadly worded")). The Court agrees with InterDigital for the reasons explained below.

Even if Pegatron were correct[7] that "arising under" should be construed narrowly for purposes of the arbitration provision, it would not change this Court's conclusion that the forum selection clause, independently, vests this Court with "exclusive jurisdiction" over the parties' dispute, and as such, warrants an anti-suit injunction in this case. First, Pegatron's cited authorities only hold that federal law governs the interpretation of the scope of arbitration provisions. *See* Tracer, 42 F.3d at 1295; Mediterranean, 708 F.2d at 1464. Pegatron's cited authorities do not

---

[6] The governing law provision of the PLA is contained within section 6.10 and provides: "The validity and interpretation of this Agreement shall be governed by Delaware law, without regard to conflict of laws principles." PLA § 6.10.

[7] The Federal Arbitration Act "creates a body of federal substantive law of arbitrability that requires a healthy regard for the federal policy favoring arbitration and preempts state law to the contrary." Farrow v. Fujitsu Am., Inc., 37 F. Supp. 3d 1115, 1119 (N.D. Cal. 2014) (citing Volt Information Sciences v. Board of Trustees,489 U.S. 468, 475-79, 109 S. Ct. 1248, 103 L. Ed. 2d 488 (1989). Less clear is whether the interpretation of the arbitration provision is subject to interpretation under state or federal law. "When deciding whether the parties agreed to arbitrate a certain **[*23]** matter, courts generally apply ordinary state law principles of contract interpretation." Farrow, 37 F. Supp. 3d at 1119 (citing First Options of Chicago, Inc. v. Kaplan, 514 U.S. 938, 944, 115 S. Ct. 1920, 131 L. Ed. 2d 985 (1995)). Thus, in determining whether parties have agreed to arbitrate a dispute, the court applies "general state-law principles of contract interpretation, while giving due regard to the federal policy in favor of arbitration by resolving ambiguities as to the scope of arbitration in favor of arbitration." Mundi v. Union Sec. Life Ins. Co., 555 F.3d 1042, 1044 (9th Cir. 2009) (quoting Wagner v. Stratton Oakmont, Inc., 83 F.3d 1046, 1049 (9th Cir. 1996)). The Court does not, and need not, decide at this juncture whether the Taiwanese claims are subject to mandatory arbitration pursuant to the arbitration provision of the PLA.

address forum selection **[*22]** clauses. Moreover, Pegatron's argument ignores the fact that the PLA's governing law provision expressly provides that the validity and interpretation of the PLA, which includes the forum selection clause, shall be governed by Delaware law. *See* PLA § 6.10. The validity and interpretation of the PLA is exactly what Pegatron seeks to challenge in the Taiwan Action. *See* Taiwan Action. Thus, Pegatron may not have claims under Taiwanese ***antitrust law*** in light of the PLA's Delaware governing law provision. *See* PLA § 6.10. Finally, even if federal law interprets "arising under" narrowly, that term appears nowhere in the forum selection clause. *Id.* The forum selection clause is not limited to disputes "arising under" the PLA and broadly vests courts in San Jose with "exclusive jurisdiction" over the parties. *See id.*

Pegatron's second argument is that InterDigital drafted the dispute resolution provisions and that Pegatron did not believe these provisions would apply to disputes arising under Taiwanese law. *See* ECF No. 33 at 9. InterDigital responds that the PLA was heavily negotiated, not unilaterally drafted by one side, and that it was Pegatron who insisted that the courts in San Jose, California, rather than Delaware, have exclusive jurisdiction over disputes concerning the validity and interpretation of the PLA. ECF No. 36 at 4. The Court finds Pegatron's argument unpersuasive. Pegatron was neither forced to license **[*24]** InterDigital's patents, nor was Pegatron required to agree to the terms contained in the PLA. Furthermore, Pegatron insisted that the courts of San Jose, California, not Delaware, have "exclusive jurisdiction" over disputes arising under the agreement. *See* ECF No. 32-6 ¶ 14. That Pegatron was able to negotiate changes in the forum selection clause demonstrates that the PLA was the result of arms-length negotiations and was not a contract of adhesion. Moreover, Pegatron's CEO and President executed the PLA, assenting to the terms contained therein, which included the dispute resolution, governing law, and forum selection provisions. PLA at 17.

d. Summary

For the reasons stated above, the Court determines that the Taiwan Action involves a dispute arising under the PLA and, therefore, is subject to the dispute resolution and forum selection provisions vesting this Court with "exclusive jurisdiction" over such disputes. Therefore, the present action is dispositive of the Taiwan Action because all the claims in the Taiwan Action arise out of the PLA, are subject to the dispute resolution and forum selection provisions of the PLA, and therefore must be disposed of in accordance with the terms of the **[*25]** PLA—which does not permit litigating the validity of the PLA under Taiwanese ***antitrust law*** in a Taiwanese court. Thus, the first prong of the anti-suit injunction factors has been satisfied, and the Court will now turn to the next factor.

2. Frustration of this forum's policy

The second anti-suit injunction factor is "whether the foreign litigation would frustrate a policy of the forum issuing the injunction." *Applied, 587 F.3d at 913*. The Ninth Circuit has repeatedly stressed the "strong policy favoring robust forum selection clauses." *Id. at 918-19*; *Gallo, 446 F.3d at 992-93*. This is because "[f]orum selection clauses are increasingly used in international business." *Gallo, 446 F.3d at 992*. "When included in freely negotiated commercial contracts, they enhance certainty, allow parties to choose the regulation of their contract, and enable transaction costs to be reflected accurately in the transaction price." *Id.* The primacy of forum selection clauses requires this Court to enforce such provisions "absent strong reasons to set them aside." *Id.* "Although a foreign court might eventually agree that a forum selection clause controls, there is no guarantee that such a resolution would be reached in a timely fashion or at all, and this uncertainty would impair the parties' **[*26]** ability to enforce a forum selection clause." *Applied, 587 F.3d at 919*. Thus, "[a]nti-suit injunctions may be the only viable way to effectuate valid forum selection clauses." *Id.*

Pegatron argues that the Taiwan Action does not "arise under" the PLA because the Taiwan Action arises under Taiwanese law and therefore is not subject to the dispute resolution, governing law, or forum selection provisions of the PLA. ECF No. 33 at 11-12. The Ninth Circuit has previously rejected similar arguments. For example, in *Applied*, Surgical "argue[d] that the Belgian action does not frustrate California policy to enforce forum selection clauses because the Belgian claims arise out of the Belgian Act, not out of the Agreement, and therefore are not subject to the Agreement's forum selection clause." *587 F.3d at 919*. As explained above, however, this Court has determined that Pegatron's Taiwan Action arises under the PLA. Accordingly, here, as in *Applied*, "[a]ny continuation of the [foreign] action denigrates the integrity of the parties' prior written commitment that disputes concerning the Agreement would be litigated in California." *Id. at 919*. Accordingly, the Court concludes that this forum's strong policy in favor of enforcing forum selection clauses would **[*27]** be frustrated absent an anti-suit injunction.

3. Impact on comity

The third, and final, anti-suit injunction factor requires "determining 'whether the impact on comity would be tolerable.'" *Id. at 919* (quoting *Gallo, 446 F.3d at 994*).

The Court determines that an anti-suit injunction in the instant case would not have an intolerable impact on comity. In the instant case, there is no public international issue raised in this case. The Taiwan Action is a civil action between two private parties, Pegatron and InterDigital, involving a dispute concerning their obligations arising under their private agreement. The facts of this case are analogous with the facts in *Gallo* and *Applied*. "[W]here there is no public international issue raised, a foreign government is not involved in the litigation, and the litigation involves private parties concerning disputes arising out of a contract, not only would an anti-suit injunction not have an intolerable impact on comity, but allowing foreign suits to proceed in such circumstances would seriously *harm* international comity." *Applied, 587 F.3d at 921* (citing *Gallo, 446 F.3d at 994*). Here, as in *Gallo* and *Applied*, an anti-suit injunction would not have an intolerable impact on comity.

B. Remaining Preliminary Injunction Factors

The law **[*28]** in the Ninth Circuit is unclear whether a movant seeking an anti-suit injunction must only establish the presence of the three anti-suit injunction factors addressed above, or whether the movant must also establish the remaining traditional factors for a preliminary injunction. For example, in each of the Ninth Circuit's recent anti-suit injunction decisions, the Ninth Circuit *only* addressed the three anti-suit injunction factors. *See Microsoft Corp. v. Motorola, Inc., 696 F.3d 872, 881 (9th Cir. 2012)*; *Applied, 587 F.3d at 913*; *Gallo, 446 F.3d at 990-91*. In each, upon finding that the anti-suit injunction factors were satisfied, the Ninth Circuit either affirmed an anti-suit injunction or reversed the denial of an anti-suit injunction without addressing any of the remaining preliminary injunction factors. *See Microsoft, 696 F.3d at 889* (affirming issuance of anti-suit injunction); *Applied, 587 F.3d at 921* (holding that the anti-suit injunction factors were met and reversing and remanding to the district court "to order an anti-suit injunction"); *Gallo, 446 F.3d at 990-91* (holding that anti-suit injunction factors were met and reversing and remanding "to the district court with instructions to enter a preliminary injunction barring Andina from proceeding with litigation in Ecuador"). This Court is not the only court to recognize the uncertainty in the Ninth Circuit's case **[*29]** law. *See, e.g., Zynga, Inc. v. Vostu USA, Inc., 816 F. Supp. 2d 824, 828 n.4 (N.D. Cal. 2011)* ("It is arguably unclear from the Ninth Circuit case law whether the three anti-suit injunction factors replace all four *Winter* preliminary injunction factors, or whether they replace only the requirement that the movant show a likelihood of success on the merits on the underlying claim."). Moreover, courts in this district have imposed anti-suit injunctions without finding the remaining *Winter* factors to have been satisfied. *See, e.g., Gilbane Federal v. United Infrastructure Projects FZCO, No. 14-CV-3254-VC, 2014 U.S. Dist. LEXIS 135841, 2014 WL 4950011 (N.D. Cal. Sept. 24, 2014)*; *Oracle Am., Inc. v. Myriad Grp. AG, No. 10-CV-5604-SBA, 2012 U.S. Dist. LEXIS 5050, 2012 WL 146364 (N.D. Cal. Jan. 17, 2012)*. Regardless, in the instant case, the remaining preliminary injunction factors weigh in favor of an anti-suit injunction. Each is addressed in turn.

1. Irreparable harm

InterDigital argues that it will be irreparably harmed if forced to litigate the Taiwan Action because InterDigital will be (a) foreclosed from enforcing its contractual rights, (b) saddled with legal fees and potential damage to its reputation, and (c) forced to quickly litigate the Taiwan Action based on Pegatron's refusal to permit reasonable extension requests. ECF No. 13 at 14-15; ECF No. 36 at 1-2. Pegatron responds that economic injuries, such as legal fees, are not traditionally considered irreparable and that **[*30]** InterDigital's conclusory allegation that it "may" suffer reputational damages is also insufficient to establish irreparable harm. ECF No. 33 at 14-15. The Court agrees with InterDigital, for the reasons explained below.

The Court is persuaded that InterDigital would be irreparably harmed if foreclosed from enforcing a valid forum selection clause and that there is an absence of a legal remedy for such harm. As the Ninth Circuit has held: "Anti-suit injunctions *may be the only viable way* to effectuate valid forum selection clauses." *Applied, 587 F.3d at 919* (emphasis added). This is because "[a]lthough a forum court might eventually agree that a forum selection clause controls, there is no guarantee that such a resolution would be reached in a timely fashion or at all, and this uncertainty would impair the parties' ability to enforce a forum selection clause." *Id.* Were this Court to conclude otherwise, cautioned the Ninth Circuit, "[t]he potential implications for international commerce are considerable." *Id.* (quoting *Gallo, 446 F.3d at 992*). Similarly, "allowing simultaneous prosecution of the same action in a foreign forum thousands of miles away would result in 'inequitable hardship.'" *Seattle Totems Hockey Club, Inc. v. Nat'l Hockey League, 652 F.2d 852, 855 (9th Cir. 1981)* (quoting *In re Unterweser Reederei Gmbh, 428 F.2d 888, 896 (5th Cir. 1970))*. Because the Court concludes that the inability **[*31]** to enforce a valid forum selection clause constitutes irreparable harm in this case, the Court need not consider whether InterDigital's other alleged harms, independently, constitute irreparable harm sufficient to warrant the issuance of a preliminary injunction.

2. Balance of the equities

The balance of the equities weighs in favor of InterDigital, and accordingly, in favor of an anti-suit injunction. In 2008, InterDigital negotiated and entered into a contract with Pegatron. *See generally* PLA. This contract imposed obligations upon the parties including the licensing of patents and the payments of royalties. *Id.* at §§ 2.1, 3.1. For disputes arising under the agreement, the parties expressly agreed to submit disputes arising under the agreement first to mandatory negotiation, then optional arbitration, and finally to the "exclusive jurisdiction" of the state and federal courts in San Jose, California. *Id.* at § 6.10. The parties further agreed that Delaware law shall be the "governing law" of the contract. *Id.*

Fast-forward seven years, to 2015, and Pegatron files suit in Taiwan arguing that, under Taiwanese ***antitrust law***, the terms of the PLA (to which Pegatron voluntarily agreed in 2008) are invalid **[*32]** and unenforceable, and that Pegatron is entitled to recover damages from InterDigital. *See generally* Taiwan Action. Further, Pegatron waits until May 26, 2015 to serve the Taiwanese complaint on InterDigital, even though the complaint was filed in February 2015 and a preliminary hearing was set for June 9, 2015. ECF No. 10-13 ¶¶ 24, 25. When InterDigital sought to negotiate the dispute with Pegatron, pursuant to the terms of the PLA, Pegatron refused and insisted on proceeding in the Taiwan Action, notwithstanding the provisions of the PLA requiring mandatory negotiation and vesting the San Jose courts with exclusive jurisdiction over the PLA. ECF Nos. 10-10, 10-11, 10-13 ¶ 27; PLA §§ 5.1, 5.2, 6.10.

Moreover, were the Court to impose an anti-suit injunction it would not work any hardship on Pegatron. Taiwanese law would allow Pegatron to seek a dismissal of the Taiwan Action without prejudice. See ECF No. 36-1 at ¶¶ 8-9. Therefore, Pegatron would not be required to simply default and accept an adverse determination on the merits in Taiwanese court. *See id.*

In sum, the balance of the equities weighs in InterDigital's favor, and the Court will now address the public interest factor.

3. Public interest [*33]

When an injunction will impact non-parties and has the potential to impact the public, the public interest is relevant. *See Stormans, Inc. v. Selecky, 586 F.3d 1109, 1139 (9th Cir. 2009)*. By contrast, "[w]hen the reach of an injunction is narrow, limited only to the parties, and has no impact on non-parties, the public interest will be at most a neutral factor in the analysis rather than one that favors granting or denying the preliminary injunction." *Id. at 1138-39* (quoting *Bernhardt v. L.A. Cnty., 339 F.3d 920, 931 (9th Cir. 2003))* (internal quotations marks and brackets omitted). The Court finds that, under the circumstances presented, the reach of the injunction is narrow and limited to the parties. Therefore, the public interest is at most a neutral factor.

4. Summary

For the reasons explained above, InterDigital has satisfied its burden to establish the three *Gallo* factors for an anti-suit injunction. The Court further determines that the remaining *Winter* factors support preliminary injunctive relief in this case.

C. Relief

Having determined that an anti-suit injunction is warranted in this case, the Court will now address the proper remedy.

1. Temporary Restraining Order vs. Preliminary Injunction

InterDigital originally sought an *ex parte* temporary restraining order and an order to show cause why a preliminary injunction **[*34]** should not issue. *See* ECF No. 12. Applications for a temporary restraining order may be issued without notice to the opposing party. *See* *Fed. R. Civ. P. 65(b)(1)*. Because InterDigital filed its application on June 11, 2015, and the first hearing in the Taiwan Action is scheduled for July 7, 2015, the Court declined to issue an *ex parte* TRO without providing notice to Pegatron and instead allowed Pegatron an opportunity to respond. ECF No. 27. Accordingly, the Court set a briefing schedule and set the matter for hearing on June 30, 2015. *Id.*

When an adverse party has been served with an application for a temporary restraining order, and has been provided an opportunity to respond, this Court has discretion to treat the motion for temporary restraining order as a motion for a preliminary injunction. "When the opposing party actually receives notice of the application for a restraining order, the procedure that is followed does not differ functionally from that on an application for a preliminary injunction and the proceeding is not subject to any special requirements." *See, e.g.*, Wright & Miller, *Federal Practice and Procedure* § 2951 (3d ed.). "[I]t is appropriate to treat a non-ex parte motion for a temporary restraining **[*35]** order and preliminary injunction as a motion for a preliminary injunction." *Klinke v. Bannister, No. 12-CV-00032, 2013 U.S. Dist. LEXIS 165156 at *11, 2013 WL 6120437, at *4 (D. Nev. Nov. 20, 2013)*. This is because the standards for a temporary restraining order mirror that for a preliminary injunction. *See* *Stuhlbarg Int'l Sales Co., Inc. v. John D. Brush & Co., Inc., 240 F.3d 832, 839 n. 7 (9th Cir. 2001)*.

In the instant case, the Court exercises its discretion to conclude that a preliminary injunction, as opposed to a temporary restraining order followed by additional briefing regarding the propriety of a preliminary injunction, is the proper course. Further factual development is unnecessary. The Court has before it the PLA, the Taiwan Action, and the parties' arguments regarding each of the preliminary injunction factors. Accordingly, the Court will grant a preliminary anit-suit injunction.

2. Bond

The Court may issue a preliminary injunction or a temporary restraining order only if the movant gives security in an amount that the Court considers proper to pay the costs and damages sustained by any party found to have been wrongfully enjoined or restrained. *Fed. R. Civ. P. 65(c)*. Notwithstanding the seemingly mandatory language, "the district court may dispense with the filing of a bond when it concludes there is no realistic likelihood of harm to the defendant from enjoining his or her conduct." *Johnson v. Couturier, 572 F.3d 1067, 1086 (9th Cir. 2009)*.

Pegatron argues, in a **[*36]** footnote, that "Pegatron would be damaged as a result of a TRO" and that InterDigital should be required to give security "in an amount that the court considers proper to pay the costs and damages sustained by Pegatron if the TRO is later found to have wrongly issued." ECF No. 33 at 16 n.9. However, Pegatron has identified no harm it will suffer as a result of a TRO, and has neither quantified nor articulated any damages. The Court is not convinced that any damages exist for the following two reasons. First, as explained above, the governing law provision in the PLA casts doubt on whether Pegatron has any rights under Taiwanese law regarding the validity of the PLA. Second, if the Court were to order Pegatron to dismiss the Taiwan Action, Pegatron may seek a voluntary dismissal that will have no res judicata effect. *See* ECF No. 36-1. Even if this Court's order granting a preliminary anti-suit injunction was later reversed, Pegatron has identified no negative consequences to its ability to reinstitute its Taiwan Action. Accordingly, the Court finds there is no likelihood of harm to Pegatron should the preliminary injunction be later found to have issued in error. Thus, the Court will **[*37]** not impose a bond.

IV. CONCLUSION

For the foregoing reasons, it is hereby ORDERED that Plaintiffs' motion for an anti-suit injunction is GRANTED pursuant to *Federal Rule of Civil Procedure 65*. It is hereby ORDERED that Pegatron shall:

1. immediately take steps to dismiss the Taiwan Action;
2. provide Plaintiffs with written notice of each step taken to carry out this order, as well as notice of any action taken by the court in Taiwan, within twenty-four hours of such steps or notice; and
3. not, directly or indirectly, initiate any other action or proceeding that arises under the parties' PLA, except those permitted by Sections 5.1, 5.2, and 6.10 of the PLA.

IT IS SO ORDERED.

Dated: June 29, 2015

LexisNexis® Headnotes

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

HN1[] **Appellate Jurisdiction, Final Judgment Rule**

A court of appeals has appellate jurisdiction under *28 U.S.C.S. § 1291* over an appeal from a final decision of the district court.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Adverse Determinations

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

Civil Procedure > ... > Voluntary Dismissals > Court Order > Dismissal With Prejudice

Civil Procedure > Dismissal > Voluntary Dismissals > Appellate Review

Civil Procedure > Settlements > Effect of Agreements

HN2[] **Reviewability of Lower Court Decisions, Adverse Determinations**

Voluntary dismissals with prejudice that produce an adverse final judgment may be appealed. It is true that the U.S. Court of Appeals for the Ninth Circuit's decision in Seidman v. City of Beverly Hills contains broad language stating that a plaintiff may not appeal a voluntary dismissal because it is not an involuntary adverse judgment against him. However, the Ninth Circuit's decision in Concha v. London clarifies that a plaintiff may appeal from a voluntary dismissal with prejudice, at least where the plaintiff is not acting pursuant to a settlement agreement intended to terminate the litigation. In doing so, Concha specifically interprets Seidman to stand for the narrower principle that a plaintiff may not appeal from a joint stipulation to voluntary dismissal, entered unconditionally by the court pursuant to a settlement agreement. And absent a settlement, a stipulation alone does not destroy the adversity required for appellate jurisdiction.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Adverse Determinations

Civil Procedure > Appeals > Appellate Jurisdiction > Final Judgment Rule

Civil Procedure > ... > Voluntary Dismissals > Court Order > Dismissal With Prejudice

Civil Procedure > Dismissal > Voluntary Dismissals > Appellate Review

Civil Procedure > ... > Voluntary Dismissals > Court Order > Dismissal Without Prejudice

HN3[] **Reviewability of Lower Court Decisions, Adverse Determinations**

In construing its statutory jurisdiction, the U.S. Court of Appeals for the Ninth Circuit has consistently used the term "adverse" to refer to whether a judgment was prejudicial to a party, not whether the parties took sufficiently adverse positions. The appealability of a voluntary dismissal ordinarily depends on whether the action was dismissed with or without prejudice. The basic principle is that the plaintiff may appeal a voluntary dismissal only when it is with prejudice to his right to commence another action for the same cause or otherwise subjects him to prejudicial terms or conditions. A voluntary dismissal without prejudice is not adverse to the plaintiff's interests because the plaintiff is free to seek an adjudication of the same issue at another time in the same or another forum. By contrast, a voluntary dismissal with prejudice is adverse to the plaintiff's interests because the plaintiff submits to a judgment that serves to bar his claims forever.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN4[] **Reviewability of Lower Court Decisions, Preservation for Review**

A party who fails to assert a waiver argument on appeal forfeits—and therefore implicitly waives—that argument.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

HN5[] **Standards of Review, Abuse of Discretion**

A court of appeals reviews a district court's decision to dismiss for failure to join an indispensable party for abuse of discretion. However, to the extent that the district court's determination whether a party's interest is impaired involves a question of law, the court of appeals reviews de novo.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN6[] **Compulsory Joinder, Necessary Parties**

Under *Fed. R. Civ. P. 19*, a "required party" must be joined as a party in an action if doing so is "feasible." *Fed. R. Civ. P. 19*. *Rule 19(a)(1)* defines "required party," and establishes two broad categories of required parties. First, under *Rule 19(a)(1)(A)*, a party is required if in that person's absence, the court cannot accord complete relief among existing parties. Second, under *Rule 19(a)(1)(B)*, a party is required if that person claims an interest relating to the subject of the action and is so situated that disposing of the action in the person's absence may: (i) as a practical matter impair or impede the person's ability to protect the interest; or (ii) leave an existing party subject to a substantial risk of incurring double, multiple, or otherwise inconsistent obligations because of the interest.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN7[] **Compulsory Joinder, Necessary Parties**

According to *Fed. R. Civ. P. 19*'s text, two conditions must be satisfied for a party to qualify as a "required party" under *Rule 19(a)(1)(B)*. First, the party must claim an interest relating to the subject of the action. *Fed. R. Civ. P. 19(a)(1)(B)*. Second, the party must be so situated that disposing of the action in the person's absence may have one of the two consequences enumerated in *Rule 19(a)(1)(B)(i)* and *(a)(1)(B)(ii)*. There must either be a possibility that disposing of the action in the person's absence will as a practical matter impair or impede the person's ability to protect the interest, or a possibility that doing so will leave an existing party subject to a substantial risk of incurring double, multiple, or otherwise inconsistent obligations because of the interest.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

Torts > Procedural Matters > Multiple Defendants > General Overview

Torts > Procedural Matters > Commencement & Prosecution > General Overview

HN8[] **Compulsory Joinder, Necessary Parties**

Although the allegation that an entity is a joint tortfeasor with the defendant does not mean the entity must be joined in one action under *Fed. R. Civ. P. 19(a)(1)(A)*, there may be circumstances in which an alleged joint tortfeasor has particular interests that cannot be protected in a legal action unless it is joined under *Rule 19(a)(1)(B)*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Torts > Procedural Matters > Commencement & Prosecution > General Overview

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

Torts > Procedural Matters > Multiple Defendants > Joint & Several Liability

Antitrust & Trade Law > Procedural Matters

HN9[] **Monopolies & Monopolization, Conspiracy to Monopolize**

It is not necessary for all joint tortfeasors to be named as defendants in a single lawsuit. A tortfeasor with the usual "joint-and-several" liability is merely a permissive party to an action against another with like liability. Antitrust conspirators are liable for the acts of their co-conspirators. It therefore follows that a plaintiff is not required to sue all of the alleged conspirators inasmuch as antitrust co-conspirators are jointly and severally liable for all damages caused by the conspiracy. In a suit to enjoin a conspiracy not all the conspirators are necessary parties.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

Antitrust & Trade Law > Procedural Matters

HN10[] **Monopolies & Monopolization, Conspiracy to Monopolize**

An absent antitrust co-conspirator generally will not be a required party under *Fed. R. Civ. P. 19(a)(1)(A)*, which applies only when a party's absence prevents the court from according complete relief among existing parties. It does not follow, however, that an absent antitrust co-conspirator cannot be a required party under *Rule 19(a)(1)(B)(i)*, the purpose of which is to protect the interests of absent parties. Stated differently, an absent party's role as a joint tortfeasor does not preclude it from having an interest in the action that warrants protection. Under some circumstances, the equitable relief sought in an action may make an absent party required under *Rule 19(a)(1)(B)(i)*. All parties who may be affected by a suit to set aside a contract must be present.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

Torts > Procedural Matters > Commencement & Prosecution > General Overview

HN11[] **Compulsory Joinder, Necessary Parties**

In any *Fed. R Civ. P. 19(a)(1)(B)* case, deciding whether an absent joint tortfeasor is a required party requires identifying the specific interest the absent party claims and determining whether the party's ability to protect that interest may be impaired despite the fact that it has not been named as a party in the action.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

Antitrust & Trade Law > Procedural Matters

HN12[] Monopolies & Monopolization, Conspiracy to Monopolize

In many cases, an absent antitrust co-conspirator will not have interests that warrant protection under Fed. R. Civ. P. 19(a)(1)(B)(i), even if it is alleged to have played a central role in the conspiracy, and even if resolution of the action will require the court to evaluate the absent party's conduct. Therefore, it is essential that courts identify the specific legally protected interests an absent joint tortfeasor claims, and assess how those interests may be impaired when, as a non-party, the outcome of the action will not bind the absent party in future proceedings.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN13[] Compulsory Joinder, Necessary Parties

Joinder is contingent upon an initial requirement that the absent party claim a legally protected interest relating to the subject matter of the action.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN14[] Compulsory Joinder, Necessary Parties

Only "legally protected" interests warrant protection under Fed. R. Civ. P. 19. A crucial premise of mandatory joinder is that the absent party possesses an interest in the pending litigation that is "legally protected." The U.S. Court of Appeals for the Ninth Circuit has offered little guidance regarding which interests warrant legal protection under Rule 19. The interest at stake need not be property in the sense of the Due Process Clause. And the court of appeals has required that the interest be more than a financial stake, and more than speculation about a future event. Within the wide boundaries set by these general principles, the court of appeals has emphasized the "practical" and "fact-specific" nature of the inquiry.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN15[] Compulsory Joinder, Indispensable Parties

The U.S. Court of Appeals for the Ninth Circuit has been reluctant to recognize legally protected interests for purposes of Fed. R. Civ. P. 19 based solely on speculation about the occurrence of a future event. Speculation about the occurrence of a future event ordinarily does not render all parties potentially affected by that future event necessary or indispensable parties under Rule 19.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN16[] Compulsory Joinder, Necessary Parties

The U.S. Court of Appeals for the Ninth Circuit is aware of no cases holding that a joint tortfeasor's reputational interests alone may make it a required party under Fed. R. Civ. P. 19(a). A joint tortfeasor's reputation generally will be adversely impacted in any case accusing it of wrongdoing. For this reason, recognizing a protected interest in business reputation would significantly erode the general rule that a plaintiff need not join all joint tortfeasors in one action. Recognizing such an interest would also conflict with the court's precedents holding that a protected interest under Rule 19 must be more than a financial stake.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Contracts Law > Procedural Matters

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN17[] **Compulsory Joinder, Indispensable Parties**

For purposes of *Fed. R. Civ. P. 19*, under some circumstances, an absent party's contract rights may give it a legally protected interest in an action. For instance, it is well established that all parties to a contract are necessary in an action to set aside the contract. Also, an absent party may be required in an action seeking equitable relief that would prevent a defendant from fulfilling "substantial" contractual obligations to the absent party. It is a fundamental principle that a party to a contract is necessary, and if not susceptible to joinder, indispensable to litigation seeking to decimate that contract. The U.S. Court of Appeals for the Ninth Circuit has not, however, held that an absent party is always required when the relief sought in an action merely implicates an absent party's contract rights. An interest that arises from terms in bargained contracts may be protected.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

HN18[] **Estoppel, Collateral Estoppel**

Some litigants—those who never appeared in a prior action—may not be collaterally estopped without litigating the issue. They have never had a chance to present their evidence and arguments on the claim. Due process prohibits estopping them despite one or more existing adjudications of the identical issue which stand squarely against their position.

Summary:

SUMMARY*

Antitrust/Appellate Jurisdiction

The panel reversed the district court's dismissal of an antitrust action for failure to join an alleged co-conspirator as a defendant.

Plaintiffs filed a putative class action against Apple, Inc., alleging that Apple conspired with AT&T Mobility (ATTM) to violate federal ***antitrust law*** in connection with Apple's agreement with ATTM that ATTM would be the exclusive provider of voice and data services for Apple's iPhone. The district court dismissed plaintiffs' claims under *Federal Rule of Civil Procedure 19* for failure to join ATTM as a defendant.

The panel held that it had jurisdiction under *28 U.S.C. § 1291* over plaintiffs' appeal from a final decision of the district court even though the current case, *Apple III*, had been consolidated with another case, *Apple II*, in which the district court had dismissed a voice and data aftermarket monopolization claim for failure to join ATTM as a **[**2]** party. The panel held that even though the parties in *Apple III* had stipulated to submit the *Apple II* briefs on

* This summary constitutes no part of the opinion of the court. It has been prepared by court staff for the convenience of the reader.

the *Rule 19* issue and had agreed that the district court should grant Apple's motion to dismiss if it decided to follow the decision in *Apple II*, the district court's judgment was adverse to plaintiffs and thus appealable.

On the merits, the panel held that the district court abused its discretion in finding that ATTM, an alleged antitrust coconspirator, was a necessary party under *Rule 19*. The panel held that although the allegation that an entity is a joint tortfeasor with the defendant does not mean the entity must be joined in one action under *Rule 19(a)(1)(A)*, there may be circumstances in which an alleged joint tortfeasor has particular interests that cannot be protected in a legal action unless it is joined under *Rule 19(a)(1)(B)*. The panel concluded that ATTM was not a required party under *Rule 19(a)(1)(A)*, but the district court abused its discretion by failing to identify ATTM's interests in this action, or address how those interests, if any, might be impaired if this action were resolved in its absence, as required by *Rule 19(a)(1)(B)*. In addition, the record did not disclose whether ATTM had an interest that was entitled to protection under **[**3]** *Rule 19*. The panel remanded the case to the district court for further proceedings.

Dissenting, Judge Wallace wrote that the court of appeals lacked statutory appellate jurisdiction because the district court's decision was not involuntary or adverse to plaintiffs. He wrote that even if the court had statutory jurisdiction, he would conclude that plaintiffs waived the *Rule 19* issue by inviting the district court to adopt the very analysis they argued against on appeal.

Opinion by: Milan D. Smith, Jr.

Opinion

[*1043] **M. SMITH**, Circuit Judge:

Zack Ward and Thomas Buchar (Plaintiffs) filed a putative class action against Apple Inc. (Apple), alleging that Apple conspired with AT&T Mobility (ATTM) to violate federal antitrust laws. The Plaintiffs' claims relate to Apple's exclusivity agreement with ATTM that ATTM would be the exclusive provider of voice and data services for Apple's iPhone. The Plaintiffs appeal from the district court's order dismissing their claims under *Federal Rule of Civil Procedure 19* for failure to join ATTM as a defendant.

In this opinion, we consider the contours of the general rule that antitrust co-conspirators need not be joined in one action. The Plaintiffs argue that the district court's determination that ATTM was a required party under *Rule 19* runs counter to this rule. The Plaintiffs also contend that, even if ATTM could otherwise qualify as a required party, Apple has not shown that ATTM actually asserts any interests in this action, or that its interests warrant protection under *Rule 19*.

We reverse the district court's judgment, and remand for further proceedings.

FACTUAL AND PROCEDURAL BACKGROUND

This appeal is from the third of three related putative **[**5]** class actions asserting antitrust claims against Apple in connection with its exclusivity agreement (Exclusivity Agreement) with ATTM.

I. Antitrust Allegations

Apple began selling the iPhone in June of 2007. Apple entered into an agreement with ATTM that ATTM would be the exclusive provider of voice and data services for the iPhone for five years. The Plaintiffs allege that Apple installed "software **[*1044]** locks" on each iPhone it sold in order to enforce ATTM's exclusivity. These locks prevented ATTM customers who used iPhones from switching to voice and data services providers who competed with ATTM. The Plaintiffs allege that they were not informed that they would be locked into ATTM's services for five years. They further allege that the Exclusivity Agreement enabled ATTM to charge supra-competitive prices for wireless services, and that Apple shared in ATTM's revenues pursuant to the Exclusivity Agreement.

II. *Apple I*

Nine Apple customers filed putative class actions against Apple and ATTM in the Northern District of California in the summer and fall of 2007. These actions were consolidated before Judge Ware as *In re Apple AT&TM Anti-Trust Litigation*, No. 5:07-cv-05152-JW (N.D. Cal.) (*Apple* ***[**6]*** *I*). The plaintiffs in *Apple I* asserted claims under *§ 2* of the Sherman Act, *15 U.S.C. § 2*, among other claims.

In 2008 and 2009, the district court denied motions by Apple and ATTM to dismiss the plaintiffs' antitrust claims. The district court certified a class on July 8, 2010.

ATTM sought to compel arbitration pursuant to an agreement it entered into with its wireless customers. The district court denied the motion, citing the then-applicable *Discover Bank* rule. *596 F. Supp. 2d 1288, 1297-99 (N.D. Cal. 2008)* (citing *Discover Bank v. Superior Court, 36 Cal. 4th 148, 30 Cal. Rptr. 3d 76, 113 P.3d 1100 (2005)* (holding that, under some circumstances, class action waivers in consumer arbitration agreements are unconscionable)). In 2011, following the Supreme Court's decision in *AT&T Mobility LLC v. Concepcion, 563 U.S. 333, 131 S. Ct. 1740, 179 L. Ed. 2d 742 (2011)*, which abrogated *Discover Bank,* ATTM renewed its motion to compel arbitration. Apple also moved to compel arbitration under ATTM's agreement.

The district court granted both ATTM's and Apple's motions to compel arbitration. *826 F. Supp. 2d 1168, 1179 (N.D. Cal. 2011)*. It held that because the plaintiffs asserted claims arising out of their agreements with ATTM, which contained arbitration clauses, the plaintiffs were "equitably estopped" from refusing to arbitrate "jointly" against ATTM and Apple. *Id. at 1178-79*.

III. *Apple II*

In 2011 and 2012, two new groups of Apple customers filed class action complaints in the Northern **[**7]** District of California. These actions were consolidated by Judge Ware as *In re Apple iPhone Antitrust Litigation*, No. 4:11-cv-06714-YGR (N.D. Cal.) (*Apple II*). The consolidated complaint in *Apple II* alleged antitrust claims that were similar to the claims in *Apple I*. However, unlike in *Apple I*, ATTM was not named as a defendant in *Apple II*. Apple moved to compel arbitration on the same grounds it asserted in *Apple I*. The district court denied Apple's motion, finding that the plaintiffs were not equitably estopped from refusing to arbitrate their claims against Apple. Unlike the *Apple I* plaintiffs, the court reasoned, the *Apple II* plaintiffs had pled their claims against Apple alone, without "intertwining" them with ATTM's wireless service agreement. *874 F. Supp. 2d 889, 898-99 (N.D. Cal. 2012)*.

Apple also sought dismissal under *Rule 12(b)(7)*, arguing that ATTM was a required party under *Rule 19*. *Id. at 899*. In support of its motion, Apple submitted a declaration from ATTM's counsel from the *Apple I* litigation. The declaration stated, in pertinent part:

> ATTM is aware of this litigation . . . . ATTM has an interest in this case, since **[*1045]** the Consolidated Complaint alleges that ATTM is a monopolist and makes various allegations regarding the service ATTM provides **[**8]** to ATTM customers using iPhones . . . . However, ATTM has not intervened in this suit because, given the ruling in [*Apple I*], any such claims must be arbitrated. If ATTM were to be joined to this litigation, ATTM would move to compel arbitration . . . .

In response, the district court held that ATTM was a necessary party. The court reasoned:

> [I]n order to evaluate Plaintiffs' antitrust claims in regard to the alleged conspiracy to monopolize the alleged iPhone Voice and Data Services Aftermarket, the Court will be required to evaluate ATTM's conduct, insofar as Plaintiffs allege, *inter alia*, that ATTM unlawfully achieved market power in that Aftermarket due to the conspiracy and thereby foreclosed other companies from entering the market. . . . Such an evaluation of ATTM's conduct would necessarily implicate the interests of ATTM, which means that ATTM is a necessary party pursuant to *Rule 19(a)*.

Id. at 900 (citing *Laker Airways, Inc. v. British Airways, PLC, 182 F.3d 843, 847-48 (11th Cir. 1999))*. The district court ordered that the claim relating to monopolization of the voice and data aftermarket be dropped if ATTM was not joined. *See id. at 902 n.29*. Shortly thereafter, *Apple II* was reassigned to Judge Yvonne Gonzalez Rogers. The plaintiffs declined to join ATTM as a party in their amended complaint, **[**9]** which resulted in the dismissal of their voice and data aftermarket monopolization claim.

IV. *Apple III*

On October 19, 2012, the present Plaintiffs initiated this putative class action against Apple in *Ward v. Apple Inc.*, 4:12-cv-05404-YGR (N.D. Cal.) (*Apple III*), asserting a single claim that Apple conspired to monopolize the aftermarket for iPhone voice and data services. ATTM was not named as a defendant. The case was consolidated with *Apple II*. The parties in *Apple III* stipulated to submit the *Apple II* briefs on the *Rule 19* issue, and agreed that the district court should grant Apple's motion to dismiss under *Rule 12(b)(7)* if the court decided to follow Judge Ware's decision in *Apple II*. The district court granted the motion "for the reasons set forth in Judge Ware's July 11, 2012 Order," and entered judgment in favor of Apple. The Plaintiffs filed a timely notice of appeal.

JURISDICTION AND STANDARD OF REVIEW

HN1[] We have appellate jurisdiction under *28 U.S.C. § 1291* because this is an appeal from a final decision of the district court. We respectfully disagree with the dissent's conclusion that the judgment below was not "adverse" to the Plaintiffs, as our case law has defined that term.

The dissent contends that we "only" **[**10]** have jurisdiction over appeals from final decisions of the district court that are "involuntary and adverse to the appellant." This statement of our law is too broad. We have repeatedly recognized that ***HN2***[] voluntary dismissals with prejudice that produce an adverse final judgment may be appealed. *See Berger v. Home Depot USA, Inc., 741 F.3d 1061, 1065 (9th Cir. 2014)*; *Concha v. London, 62 F.3d 1493, 1506-09 (9th Cir. 1995)*; *Unioil, Inc. v. E.F. Hutton & Co., 809 F.2d 548, 556 (9th Cir. 1986)*; *Coursen v. A.H. Robins Co., 764 F.2d 1329, 1342*, *corrected*, *773 F.2d 1049 (9th Cir. 1985)*. It is true that our decision in *Seidman v. City of Beverly Hills, 785 F.2d 1447, 1448 (9th Cir. 1986)*, contained broad language stating that "[a] plaintiff may not appeal a voluntary dismissal because it is not an involuntary **[*1046]** adverse judgment against him." However, our decision in *Concha v. London* clarified that a plaintiff "may appeal from a voluntary dismissal with prejudice, at least where the plaintiff is not acting pursuant to a settlement agreement intended to terminate the litigation." *62 F.3d at 1507* (emphasis omitted). In doing so, *Concha* specifically interpreted *Seidman* to stand for the narrower principle that a plaintiff may not "appeal from a joint stipulation to voluntary dismissal, entered unconditionally by the court *pursuant to a settlement agreement." Id.* (emphasis added). And, as the dissent acknowledges, we held in *Berger v. Home Depot USA, Inc.* that "absent a settlement, a stipulation alone does not destroy [the] adversity" required **[**11]** for appellate jurisdiction. *741 F.3d at 1065*.

The dissent's conclusion that this judgment was not adverse to the Plaintiffs appears to be based, in part, on a definition of "adverse" that is without basis in our case law concerning statutory appellate jurisdiction. The dissent contends that a judgment is not adverse if "no adverse positions were taken by the parties" or if the issue was not "actually litigated." The dissent appears to understand "adverse" to refer to whether the proceedings were sufficiently adversarial. Of course, parties must be sufficiently adverse to one another for a justiciable controversy to exist, *see, e.g., United States v. Johnson, 319 U.S. 302, 304-05, 63 S. Ct. 1075, 87 L. Ed. 1413 (1943)*, but we do not understand the dissent to argue that this appeal is non-justiciable because it lacks sufficient adversity for Article III purposes, but rather only that we lack statutory appellate jurisdiction. ***HN3***[] In construing our statutory jurisdiction, we have consistently used the term "adverse" to refer to whether a judgment was prejudicial to a party, not whether the parties took sufficiently adverse positions. For example, in *Concha v. London* we explained that

> [u]nder *Coursen* and *Unioil*, the appealability of a voluntary dismissal ordinarily depends on whether the action was **[**12]** dismissed with or without prejudice. The basic principle we follow is that the plaintiff may appeal a voluntary dismissal only when it is with prejudice to his right to commence another action for the same cause or otherwise subjects him to prejudicial terms or conditions.

62 F.3d at 1507. We went on to explain that "[a] voluntary dismissal without prejudice is not adverse to the plaintiff's interests . . . [because] [t]he plaintiff is free to seek an adjudication of the same issue at another time in the same or another forum." *Id.* By contrast, a voluntary dismissal with prejudice is adverse to the plaintiff's interests because "the plaintiff submits to a judgment that serves to bar his claims forever." *Id.* The judgment in this case is adverse to the Plaintiffs because it bars their claims in future proceedings. The requirement of an adverse judgment is therefore not a barrier to appellate jurisdiction in this case.

Reading between the lines, the dissent appears to be concerned that the parties effectively agreed with Judge Rogers to manufacture appellate jurisdiction without presenting the *Rule 19* issue to her for an independent decision. But the record simply does not compel the conclusion that Judge Rogers **[**13]** did not make an independent decision here. The dissent infers from the record that Judge Rogers "understood that the Plaintiffs were not asking her to rule on the merits of the *Rule 19* issue, but rather were attempting only to create a vehicle for appellate review of Judge Ware's order . . . ." (emphasis omitted). However, the Amended Joint Case Management Statement clearly presented the *Rule 19* issue as a decision for Judge Rogers to make:

> **[*1047]** For the sake of efficiency, Plaintiffs have proposed submitting to the Court the prior briefing on Apple's Motion to Dismiss Plaintiffs' Consolidated Complaint in the related case, *In re Apple iPhone Antitrust Litigation* . . . . Should the Court decide to issue the same ruling in this case . . . . Plaintiffs will stand on their existing complaint and not add ATTM as a party. Therefore any such dismissal will become final and immediately appealable to the Ninth Circuit Court of Appeals.

At the subsequent case management conference, Judge Rogers stated:

> [I]t sounds like the issues that you're asking me to decide on both sides have already been decided, so I don't know why we're going through this process again. I don't know why we have another complaint that doesn't include **[**14]** as a defendant AT&T, which . . . Judge Ware told you you needed to have as a . . . party to the litigation.

The dissent interprets these comments to mean that Judge Rogers was "confused" initially about the "unusual procedure" proposed by the parties. But Judge Rogers's comments could also be interpreted to mean that she had analyzed the issue and was inclined to issue the same ruling as Judge Ware. In deciding whether to dismiss the case, Judge Rogers had the benefit of the *Apple II* briefing. By signing the order dismissing the case with prejudice "for the reasons set forth in Judge Ware's July 12, 2012 Order," Judge Rogers issued a final decision on the merits. This was sufficient to give us appellate jurisdiction to review the decision.[1]

---

[1] As for the dissent's conclusion that the Plaintiffs waived the *Rule 19* issue by "inviting Judge Rogers to adopt the very analysis that they now allege on appeal was erroneous," we note that Apple has not asserted a waiver argument. *See United States v.*

In sum, because we find that the judgment below was the product of a final decision of the district court and was adverse **[**15]** to the Plaintiffs, we are satisfied that we have statutory jurisdiction.

HN5[] We review the district court's decision to dismiss for failure to join an indispensable party for abuse of discretion. *Dawavendewa v. Salt River Project Agric. Improvement & Power Dist., 276 F.3d 1150, 1154 (9th Cir. 2002)*. However, "[t]o the extent that the district court's determination whether a party's interest is impaired involves a question of law, we review de novo." *Id.* (quoting *Pit River Home & Agric. Coop. Ass'n v. United States, 30 F.3d 1088, 1098 (9th Cir. 1994))*.

DISCUSSION

The Plaintiffs argue, on several grounds, that the district court abused its discretion in finding that ATTM was a necessary party under *Rule 19*. The Plaintiffs contend that the district court's decision runs counter to the general rule that joint tortfeasors need not be joined in one action. The Plaintiffs also assert that Apple has not shown that ATTM claims any interest in this action because ATTM has stated that it would seek to compel arbitration if joined, and because ATTM has no contracts with Apple that might be affected by this litigation. The Plaintiffs further argue that, even if ATTM has claimed an interest in this action, Apple has not shown that ATTM's interests are "legally protected," or that they may be impaired by resolution of this action in ATTM's absence. Therefore, the Plaintiffs contend, it was error for the **[**16]** district court to find that ATTM was a necessary party based on its alleged role in the conspiracy without first specifying which legally protected interests **[*1048]** ATTM had in the action. We address these arguments in turn.

I. Joinder of Joint Tortfeasors under Rule 19

HN6[] Under *Rule 19*, a "required party" must be joined as a party in an action if doing so is "feasible." *Fed. R. Civ. P. 19*. *Rule 19(a)(1)* defines "required party," and establishes two broad categories of required parties. First, under *Rule 19(a)(1)(A)*, a party is required if "in that person's absence, the court cannot accord complete relief among existing parties." Second, under *Rule 19(a)(1)(B)*, a party is required if:

> that person claims an interest relating to the subject of the action and is so situated that disposing of the action in the person's absence may: (i) as a practical matter impair or impede the person's ability to protect the interest; or (ii) leave an existing party subject to a substantial risk of incurring double, multiple, or otherwise inconsistent obligations because of the interest.

HN7[] According to *Rule 19*'s text, two conditions must be satisfied for a party to qualify as a "required party" under *Rule 19(a)(1)(B)*. First, the party must "claim[] an interest relating to the subject of the action." *Fed. R. Civ. P. 19(a)(1)(B)*. Second, the party **[**17]** must be "so situated that disposing of the action in the person's absence" may have one of the two consequences enumerated in *Rule 19(a)(1)(B)(i)* and *(a)(1)(B)(ii)*. There must either be a possibility that disposing of the action in the person's absence will "as a practical matter impair or impede the person's ability to protect the interest," or a possibility that doing so will "leave an existing party subject to a substantial risk of incurring double, multiple, or otherwise inconsistent obligations because of the interest."

The Plaintiffs argue that the district court's decision runs counter to the longstanding principle that joint tortfeasors need not be joined in one action. For the reasons that follow, we conclude that ***HN8***[] although the allegation that an entity is a joint tortfeasor with the defendant does not mean the entity must be joined in one action under *Rule 19(a)(1)(A)*, there may be circumstances in which an alleged joint tortfeasor has particular interests that cannot be protected in a legal action unless it is joined under *Rule 19(a)(1)(B)*. We therefore need to analyze the facts of this case to determine whether ATTM is a required party in this action under *Rule 19(a)(1)(B)*.

Scott, 705 F.3d 410, 415 (9th Cir. 2012) (***HN4***[] "A party who fails to assert a waiver argument forfeits—and therefore implicitly waives—that argument.").

"It has long been the rule that ***HN9***[] it is not necessary for all joint tortfeasors **[**18]** to be named as defendants in a single lawsuit." *Temple v. Synthes Corp., 498 U.S. 5, 7, 111 S. Ct. 315, 112 L. Ed. 2d 263 (1990)* (per curiam); *see also* *Fed. R. Civ. P. 19* advisory committee's note to 1966 amend. (noting that "a tortfeasor with the usual 'joint-and-several' liability is merely a permissive party to an action against another with like liability"). Antitrust conspirators are liable for the acts of their co-conspirators. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 253-54, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*; *Beltz Travel Serv., Inc. v. Int'l Air Transp. Ass'n, 620 F.2d 1360, 1367 (9th Cir. 1980)*. It therefore follows that a plaintiff is "not required to sue all of the alleged conspirators inasmuch as antitrust co-conspirators are jointly and severally liable for all damages caused by the conspiracy." *William Inglis & Sons Baking Co. v. ITT Cont'l Baking Co., Inc., 668 F.2d 1014, 1053 (9th Cir. 1982)*; *see also* *Lawlor v. Nat'l Screen Serv. Corp., 349 U.S. 322, 330, 75 S. Ct. 865, 99 L. Ed. 1122 (1955)* (holding that joinder of alleged antitrust co-conspirators was not mandatory "since as joint tort-feasors they were not indispensable parties"); *Georgia v. Penn. R.R., 324 U.S. 439, 463, 65 S. Ct.* **[*1049]** *716, 89 L. Ed. 1051 (1945)* ("In a suit to enjoin a conspiracy not all the conspirators are necessary parties . . . .").

For this reason, ***HN10***[] an absent antitrust co-conspirator generally will not be a required party under *Rule 19(a)(1)(A)*, which applies only when a party's absence prevents the court from "accord[ing] complete relief among existing parties." This case, for example, illustrates why according complete relief will usually be possible without joining an absent co-conspirator like ATTM. If the Plaintiffs prevail, they will be able to **[**19]** recover all of their damages from Apple alone, *see* *Socony-Vacuum, 310 U.S. at 253-54*, without naming ATTM as a party. Accordingly, ATTM is not a required party under *Rule 19(a)(1)(A)*.

It does not follow, however, that an absent antitrust co-conspirator like ATTM cannot be a required party under *Rule 19(a)(1)(B)(i)*, the purpose of which is to protect the interests of absent parties. Stated differently, an absent party's role as a joint tortfeasor does not preclude it from having an interest in the action that warrants protection. *See* *Home Buyers Warranty Corp. v. Hanna, 750 F.3d 427, 433-34 (4th Cir. 2014)*; *Occidental Petroleum Corp. v. Buttes Gas & Oil Co., 331 F. Supp. 92, 105-06 (C.D. Cal. 1971)* (acknowledging the general rule that "antitrust co-conspirators need not be joined," but observing that "[i]n the present case, [the co-conspirator's] status as a joint tortfeasor would not as a practical matter negate its status as a contractual party, with interests that are covered by *Rule 19(a)*"), *aff'd*, *461 F.2d 1261 (9th Cir. 1972)* (per curiam). It is true that ATTM does not face any damages exposure in this action. But our cases have made it clear that, under some circumstances, the equitable relief sought in an action may make an absent party required under *Rule 19(a)(1)(B)(i)*. *See, e.g.,* *Wilbur v. Locke, 423 F.3d 1101, 1111-14 (9th Cir. 2005)* (holding that an Indian tribe was a necessary party to a suit seeking to invalidate a contract to which it was a party), *abrogated on other grounds by* *Levin v. Commerce Energy, Inc., 560 U.S. 413, 130 S. Ct. 2323, 176 L. Ed. 2d 1131 (2010)*; *Manybeads v. United States, 209 F.3d 1164, 1166 (9th Cir. 2000)*; *Northrop Corp. v. McDonnell Douglas Corp., 705 F.2d 1030, 1044 (9th Cir. 1983)* ("[A]ll parties who may be affected **[**20]** by a suit to set aside a contract must be present."). For this reason, ATTM's role as an antitrust co-conspirator is not alone dispositive of whether it has interests that warrant protection under *Rule 19(a)(1)(B)(i)*. Therefore, we must analyze the particular facts here to determine whether ATTM is a required party under *Rule 19(a)(1)(B)*.

II. The District Court Erred by Failing to Specify the Interests ATTM Claimed

The Plaintiffs next contend that the district court erred by holding that ATTM was a required party without specifically identifying ATTM's interests or addressing how those interests might be impaired if the action were resolved in its absence. We agree, and conclude that the district court abused its discretion by failing to identify ATTM's interests in this action, or address how those interests, if any, might be impaired if this action were resolved in its absence, as required by *Rule 19(a)(1)(B)*.

HN11[] As with any *Rule 19(a)(1)(B)* case, deciding whether an absent joint tortfeasor is a required party requires identifying the specific interest the absent party claims and determining whether the party's ability to protect that interest may be impaired despite the fact that it has not been named as a party in the action. *Compare* *Wilbur, 423 F.3d at 1111-14* (holding that **[**21]** an absent **[*1050]** Indian tribe was a required party in an action to invalidate a contract between the state and the tribe, and finding that the state could not adequately protect the tribe's interests in the litigation), *with Cachil Dehe Band of Wintun Indians v. California, 547 F.3d 962, 970-72 (9th Cir. 2008)* (holding that absent Indian tribes were not required parties in an action asserting that the state breached a tribal-gaming compact, in part because the absent tribes' interest did not "arise[] from terms in bargained contracts" (quoting *Am. Greyhound Racing, Inc. v. Hull, 305 F.3d 1015, 1023 (9th Cir. 2002)))*.

We cannot discern whether the district court in *Apple II* applied the requirements of *Rule 19(a)(1)(B)* when it determined that ATTM was a required party. The court did not identify any specific interest ATTM claimed in the action or explain how ATTM's ability to protect that interest might be impaired by resolution of the action in its absence. Instead, the district court held that "if a plaintiff's antitrust claims require a court to evaluate the conduct of an absent party that is alleged to be an antitrust co-conspirator with a defendant, thereby substantially implicating [the] interests of that party, the absent party is necessary pursuant to *Rule 19(a)*." *In re Apple iPhone Antitrust Litig., 874 F. Supp. 2d 889, 899 (N.D. Cal. 2012)* (alteration in original) (internal quotation marks omitted). The court reasoned that **[**22]** it would be "required to evaluate ATTM's conduct," and that "[s]uch an evaluation . . . would necessarily implicate the interests of ATTM, which means that ATTM is a necessary party pursuant to *Rule 19(a)*." *Id. at 900* (citing *Laker Airways, Inc. v. British Airways, PLC, 182 F.3d 843, 847-48 (11th Cir. 1999))*. Thus, the court concluded, "because the alleged conspiracy is with ATTM to monopolize or attempt to monopolize the aftermarket for voice and data services, . . . ATTM is a necessary party." *Id. at 901*.

However, the fact that the complaint portrayed ATTM as the central player in the alleged antitrust conspiracy does not demonstrate that ATTM is a required party. Instead, whether ATTM is a required party depends on whether ATTM's interests qualify for protection under *Rule 19(a)(1)(B)(i)*. ***HN12***[] In many cases, an absent antitrust co-conspirator will not have interests that warrant protection under *Rule 19(a)(1)(B)(i)*, even if it is alleged to have played a central role in the conspiracy, and even if resolution of the action will require the court to evaluate the absent party's conduct. Therefore, it is essential that courts identify the specific legally protected interests an absent joint tortfeasor claims, and assess how those interests may be impaired when, as a non-party, the outcome of the action will not bind the absent party in **[**23]** future proceedings. *See Blonder-Tongue Lab. v. University of Illinois Found., 402 U.S. 313, 329, 91 S. Ct. 1434, 28 L. Ed. 2d 788 (1971)*. The district court abused its discretion by failing to undertake this inquiry.

III. Whether the Record Supports a Finding That ATTM Is a Required Party

Apple contends that, notwithstanding the district court's failure to specifically enumerate ATTM's interests, the record supports a finding that ATTM is a required party under *Rule 19(a)(1)(B)*. For the reasons that follow, we conclude that the record does not disclose whether ATTM had an interest in this action that was entitled to protection under *Rule 19*.

A. Whether ATTM Claims an Interest

The Plaintiffs contend that ATTM is not a required party because it has not asserted **[*1051]** any interest in this action. In *Bowen v. United States, 172 F.3d 682 (9th Cir. 1999)*, we observed that ***HN13***[] "[j]oinder is 'contingent . . . upon an initial requirement that the absent party *claim* a legally protected interest relating to the subject matter of the action,'" *id. at 689* (quoting *Northrop Corp. v. McDonnell Douglas Corp., 705 F.2d 1030, 1043 (9th Cir.1983))*. As evidence that ATTM has claimed an interest in this action, Apple cites a declaration from ATTM's counsel from *Apple I*, filed in support of Apple's motion in *Apple II*.[2] The declaration states: "ATTM is aware of this litigation" and

---

[2] This declaration was again submitted in support of Apple's motion to dismiss in *Apple III*, and the parties stipulated that it referred to the complaint in *Apple III*. Specifically, the parties stipulated that the "supporting documents submitted by Apple in [*Apple II]* . . . shall be deemed to refer to the *Ward* complaint and are properly before the Court in connection with Apple's motion to dismiss the *Ward* complaint."

"ATTM has an interest in these claims . . . ." The declaration does not indicate whether ATTM's counsel from *Apple* ***[**24]*** *I* was authorized to state ATTM's position in *Apple II* or *Apple III*. Therefore, it is not perfectly clear whether ATTM has, in fact, asserted an interest in this action.

We need not resolve whether the declaration satisfies *Bowen'*s requirement that ATTM claim an interest. Even if we assume that ATTM's attorney from *Apple I* was authorized to assert ATTM's interests in this litigation, Apple has not shown that the interests ATTM has purportedly claimed are legally protected under *Rule 19*.

B. Whether There is Record Evidence that ATTM Has Legally Protectable Interests under Rule 19

We turn now to Apple's contention that ATTM has a number of interests in this action that, assuming they were claimed by ATTM, qualify for protection under *Rule 19(a)(1)(B)*.

We have consistently held that ***HN14***[] only "legally protected" **[**25]** interests warrant protection under *Rule 19*. *See, e.g., Cachil Dehe Band, 547 F.3d at 970* (observing that a "crucial premise of mandatory joinder . . . is that the absent [party] possess[es] an interest in the pending litigation that is 'legally protected'"); *Wilbur, 423 F.3d at 1112*. We have offered little guidance regarding which interests warrant legal protection under *Rule 19*. We have clarified that "the interest at stake need not be 'property in the sense of the *due process clause*.'" *Cachil Dehe Band, 547 F.3d at 970* (quoting *Am. Greyhound Racing, 305 F.3d at 1023*). And we have required that the interest "be more than a financial stake, and more than speculation about a future event." *Id.* (internal quotation marks omitted). "Within the wide boundaries set by these general principles, we have emphasized the 'practical' and 'fact-specific' nature of the inquiry." *Id.*

Apple has cited several interests of ATTM it contends qualify as cognizable interests under *Rule 19*. Apple first contends that ATTM faces a risk of collateral consequences as a result of this litigation, including a risk of regulatory scrutiny and harms to its reputation. Apple also contends that ATTM has a number of contractual rights that may be impaired if this action is resolved in its absence.

1. Risk of Regulatory Scrutiny

We have not had occasion to decide whether the risk that an action **[**26]** will trigger regulatory scrutiny may give an absent antitrust co-conspirator a legally protected interest under *Rule 19(a)*. Without deciding whether such a risk might give an **[*1052]** absent party an interest under different circumstances, we hold that Apple has not shown that the risk of regulatory scrutiny ATTM faces as a result of this action gives ATTM a legally protected interest.

Apple relies heavily on the Eleventh Circuit's decision in *Laker Airways, Inc. v. British Airways PLC, 182 F.3d 843 (11th Cir. 1999)*. In *Laker Airways,* the court considered whether a private corporation appointed by the government of the United Kingdom to coordinate airlines' requests for landing and take-off times was a necessary party to an action alleging that the corporation conspired with an airline to monopolize the market for passenger air service between two cities. *Id. at 845*. The Eleventh Circuit held that the district court had not abused its discretion when it found that the coordinating corporation was a required party under *Rule 19(a)*. *Id.*

In finding that the specific circumstances of the case made the corporation's interests "more significant than those of a routine joint tortfeasor," *id. at 847-48*, the court cited the regulatory scrutiny the corporation could face as a result of the litigation. Under the **[**27]** regulations of the United Kingdom, the coordinating corporation was required to be "independent," and was to act in a "neutral, non-discriminatory and transparent way." *Id. at 846*. United Kingdom law further provided that the corporation's appointment as coordinator would be withdrawn if the corporation failed to act in an independent manner. *Id.* The court reasoned:

> [i]n order to prove its antitrust claims, [the plaintiff] would be required to show that [the defendant] acted in other "than an independent manner." Such a ruling would surely implicate the interests of [the absent corporation]

> because the United Kingdom's enabling legislation . . . requires that the Secretary of State for Transport withdraw its approval of an appointed coordinator if its behavior is not neutral.

Id. at 848.

Laker Airways is inapposite. There the relevant agency was affirmatively required to withdraw approval of the absent coordinator if its behavior was not neutral. *See id.* By contrast, there is no suggestion in this case that the collateral regulatory consequences ATTM might face as a result of this action would be any more severe, or likely to occur, than in a typical case alleging an antitrust conspiracy. If the vague **[**28]** risk of increased regulatory scrutiny in this case made ATTM a required party, absent antitrust co-conspirators would, almost always, be required parties in a broad range of antitrust cases. Such a result would eviscerate the general rule that absent antitrust co-conspirators need not be joined in one action. *See Lawlor, 349 U.S. at 329*; *Georgia v. Penn. R.R., 324 U.S. at 463*. Moreover, ***HN15***[] we have been reluctant to recognize legally protected interests based solely on "[s]peculation about the occurrence of a future event." *See Northrop Corp. v. McDonnell Douglas Corp., 705 F.2d 1030, 1046 (9th Cir. 1983)* ("Speculation about the occurrence of a future event ordinarily does not render all parties potentially affected by that future event necessary or indispensable parties under *Rule 19*."); *Cachil Dehe Band, 547 F.3d at 973* (holding that absent Indian tribes' opportunity to obtain licenses under gaming compact was not a legally protected interest where the "likelihood of obtaining future licenses [was] attenuated"). In the absence of any evidence that law-enforcement or regulatory agencies are presently scrutinizing the Exclusivity Agreement, we decline to speculate whether the outcome of this case will impact agencies' enforcement decisions. For these reasons, we find that Apple has not demonstrated that the risk of regulatory scrutiny gives **[*1053]** ATTM a legally protected interest **[**29]** in this action.

2. Reputational Interests

Apple next argues that ATTM is a required party because this action may affect ATTM's business or reputational interests. This argument is similarly without merit.

HN16[] We are aware of no cases holding that a joint tortfeasor's reputational interests alone may make it a required party under *Rule 19(a)*. A joint tortfeasor's reputation generally will be adversely impacted in any case accusing it of wrongdoing. For this reason, recognizing a protected interest in business reputation would significantly erode the general rule that a plaintiff need not join all joint tortfeasors in one action. Recognizing such an interest would also conflict with our precedents holding that a protected interest under *Rule 19* "must be more than a financial stake," *Cachil Dehe Band, 547 F.3d at 970* (quoting *Makah, 910 F.2d at 558*). We conclude that ATTM's reputational interests in this action are not legally protected under *Rule 19*.

3. Contract Interests

Apple also asserts that ATTM's contract rights give it a legally protected interest in this action. For the reasons that follow, we find that Apple has not demonstrated that ATTM currently has any substantial contract rights that may be impaired by resolution of this action.

HN17[] Under some circumstances, an **[**30]** absent party's contract rights may give it a legally protected interest in an action. *See, e.g., Wilbur, 423 F.3d 1101*; *Am. Greyhound Racing, Inc. v. Hull, 305 F.3d 1015, 1022-24 (9th Cir. 2002)*; *Manybeads v. United States, 209 F.3d 1164, 1166 (9th Cir. 2000)*. For instance, it is well established that all parties to a contract are necessary in an action to set aside the contract. *See Wilbur, 423 F.3d at 1113* (citing cases). Our cases also establish that an absent party may be required in an action seeking equitable relief that would prevent a defendant from fulfilling "substantial" contractual obligations to the absent party. *See Am. Greyhound Racing, 305 F.3d at 1023* (holding that absent Indian tribes were necessary parties where "the interest of the tribes arises from terms in bargained contracts, and the interest is substantial"); *Cachil Dehe Band, 547 F.3d at 970* (interpreting *American Greyhound Racing, Inc. v. Hull* to "require[]" that the interest arising from terms in bargained contracts be "substantial" to be legally protected). *Cf. Wilbur, 423 F.3d at 1113* ("[I]t is a fundamental principle that a party to a contract is necessary, and if not susceptible to joinder, indispensable to litigation seeking to decimate that contract." (internal quotation marks omitted)). We have not, however, held that an absent party is always required when the relief sought in an action merely implicates an absent party's contract rights. *See Cachil Dehe Band, 547 F.3d at 970* ("[A]n interest that 'arises from **[**31]** terms in bargained contracts' *may* be protected . . . ." (emphasis added)).

Apple cites three contract interests of ATTM it contends may be impaired if the action is resolved in ATTM's absence: (1) ATTM's right to control unlock codes; (2) rights arising from ATTM's Wireless Service Agreement (WSA) with customers; and (3) ATTM's arbitration provisions in the WSA.

a. Right to Control Unlock Codes

The Plaintiffs seek a judgment "[o]rdering Apple to provide the unlock code upon request to all members of the Class . . . ." Apple contends that this injunctive relief would conflict with ATTM's purported contractual right to prevent Apple from unlocking ATTM customers' iPhones. As a **[*1054]** threshold matter, we must determine whether the record supports a finding that ATTM currently has such a right. The only possible sources of this right in the record are brief excerpts of agreements between Apple and ATTM from 2006 and 2011, and the right is not embodied therein.

We begin with the excerpt from the 2006 agreement. The limited excerpt in the record clearly states that any right of ATTM to control unlock codes was only to last during the "Term and the Wind-Down Period." As Apple's counsel conceded at oral argument, **[**32]** there is nothing in the record defining the term or wind-down period. Without a definition of the term or wind-down period, we cannot determine whether ATTM still has the right Apple claims it has. We therefore find that the excerpt of the 2006 agreement does not demonstrate that ATTM has any existing right to control unlock codes.

We next turn to the excerpt of the 2011 agreement. The first clause of this excerpt appears to condition Apple's obligation not to unlock iPhones on its use of a SIM solution not offered by AT&T's SIM suppliers. There is no evidence in the record that Apple ever employed such a solution. In the absence of such evidence, we cannot determine whether ATTM currently has a right to control unlock codes, and cannot find that injunctive relief ordering Apple to disclose unlock codes would impair ATTM's rights under its contracts with Apple.[3]

b. Interests Arising from Wireless Service Agreements with Customers

Apple **[**33]** next contends that "the District Court will . . . inevitably have to interpret the terms of ATTM's WSA with consumers, in ways that could affect and impair ATTM's rights under that contract." We reject this argument.

The district court's decision in *Apple II* undercuts Apple's contention that interpretation of ATTM's WSA is "inevitable." The district court explicitly noted that "[the] Plaintiffs have not contended that any of their claims arise from ATTM service contracts," *874 F. Supp. 2d at 899*, and declined to "reach the question of whether [the] Plaintiffs must rely upon the WSA to advance any or all of their claims," *id.* at n.21.

Moreover, even if the district court ultimately interprets these WSAs, ATTM, as a non-party, will not be bound by the district court's interpretation in subsequent proceedings. *See Blonder-Tongue Lab. v. University of Illinois Found., 402 U.S. 313, 329, 91 S. Ct. 1434, 28 L. Ed. 2d 788 (1971)* (***HN18***[] "Some litigants—those who never appeared in a prior action—may not be collaterally estopped without litigating the issue. They have never had a chance to

[3] Even if ATTM has some lingering contract interests, it may be appropriate for the district court to exercise its discretion to fashion the equitable relief in a way that avoids interfering with those interests, instead of dismissing the entire action. *See Occidental Petroleum Corp. v. Buttes Gas & Oil Co., 331 F. Supp. 92, 105-06 (C.D. Cal. 1971)*.

present their evidence and arguments on the claim. Due process prohibits estopping them despite one or more existing adjudications of the identical issue which stand squarely against their position.").

Lastly, we note that there is no copy of ATTM's **[**34]** WSA in the record. It is therefore unclear what rights ATTM had under the WSA that might be affected by this action. Nor is there any evidence in the record suggesting that class members are still bound by the WSAs they signed during the class period. The complaint seeks certification of a class of consumers who "purchased wireless voice and data services for the iPhone from October 19, 2008, through **[*1055]** February 3, 2011." It is plausible that, more than four years after the last WSA in the class period was signed, many class members have entered into new WSAs with ATTM or other carriers.

In sum, the record does not disclose whether ATTM's WSAs with customers give it a legally protected interest in this action.

c. ATTM's Arbitration Agreement

Apple also contends that ATTM has an interest in this action because the district court will have to construe the arbitration provisions in the WSA. This argument is likewise without merit.

As long as ATTM is not a party, any construction of the arbitration clause will likely focus on whether Apple may use ATTM's arbitration clause for Apple's benefit. *See* *874 F. Supp. 2d at 898-99* (holding that Apple, as a non-signatory to the arbitration agreement, did not satisfy the requirements **[**35]** to invoke the doctrine of equitable estoppel, and declining to compel the plaintiffs to arbitrate their claims against Apple). ATTM does not have a legally protected interest in whether Apple may compel arbitration. Nor will the district court's construction of the arbitration clause bind ATTM, a nonparty, in future actions. *See* *Blonder-Tongue, 402 U.S. at 329*.

For the above reasons, we hold that Apple has not demonstrated that ATTM has a legally protected interest in this action.

IV. Motion to Dismiss for Failure to State a Claim

Apple also contends that dismissal is appropriate because the Plaintiffs have failed to adequately plead a claim that ATTM had monopoly power in a relevant market. We decline to decide this issue.

The parties stipulated that the district court could enter an order dismissing the case with prejudice for failure to join a necessary party. The district court entered the parties' stipulated order "grant[ing], with prejudice, Apple's motion to dismiss [the] Plaintiffs' Complaint pursuant to *Rule 12(b)(7) of the Federal Rules of Civil Procedure*." The stipulated order did not address Apple's *Rule 12(b)(6)* argument, or even acknowledge that Apple sought dismissal in *Apple III* on this ground. Because the district court in *Apple III* has not ruled on Apple's *Rule 12(b)(6)* motion, we decline **[**36]** to consider whether the Plaintiffs' complaint pleads a claim.

CONCLUSION

For the above reasons, we reverse the judgment of the district court, and remand to the district court for further proceedings.

REVERSED AND REMANDED.

Dissent by: J. Clifford Wallace

Dissent

WALLACE, Circuit Judge, dissenting:

I respectfully dissent. I would not reach the merits of this appeal because, in my view, we lack jurisdiction to do so. Even if we had jurisdiction, however, I would still decline to reach the merits because the plaintiffs waived any challenge to the errors they now allege on appeal.

I.

This case comes to us in a unique procedural posture. For context, I begin with some background on an earlier case, referenced by the majority as "*Apple II." Apple II* involved a different set of plaintiffs and a broader set of claims before Judge Ware than those in *Apple III*, which were before Judge Rogers, and are now before us on appeal.

The *Apple II* Plaintiffs were the first to raise the *Rule 19* arguments we now see in the present appeal. But Judge Ware was unpersuaded and ruled against the *Apple* ***[*1056]*** *II* Plaintiffs. The record indicates that Judge Ware's July 11 order did not address at least some of the arguments made in the *Apple II* Plaintiffs' **[**37]** opposition (and which the *Apple III* Plaintiffs raise here on appeal), including the argument that ATTM itself failed to claim an interest in the litigation, and that any claimed interest was not "cognizable" under *Rule 19*. Instead of addressing those arguments, Judge Ware's order relied heavily on the Eleventh Circuit's *Laker Airways* case in holding that ATTM was a necessary party under *Rule 19* because "the Court will be required to evaluate ATTM's conduct."

The *Apple II* Plaintiffs disagreed with Judge Ware's *Rule 19* order. They wanted to appeal from it. But given the interlocutory nature of Judge Ware's ruling, they were required to wait for a final judgment. The *Apple II* Plaintiffs did not want to wait, however. In fact, waiting would have been pointless because the *Apple II* Plaintiffs' entire litigation hinged on whether ATTM was a necessary party: if ATTM was required to be joined as a necessary party, individual arbitration was almost inevitable; but if ATTM was not required to be joined, Plaintiffs' case would likely proceed through financially feasible class-action litigation. So, Plaintiffs needed a way to (1) sever any claims that could possibly implicate ATTM (to avoid arbitration), and (2) obtain **[**38]** immediate appellate review of Judge Ware's *Rule 19* analysis for the claims that could implicate ATTM. In the words of Plaintiffs' counsel, "by keeping the [voice and data] claims together [with the apps claims], we couldn't get the appellate review of the voice and data dismissal until we finish the apps case."

Accordingly, Plaintiffs' counsel devised a strategy: a new set of Plaintiffs (*Apple III* Plaintiffs) would bring a separate action (*Apple III)* to "segregate the voice and data claims into *Apple III* and have only the apps claims left in *Apple II."* The premise behind creating the new action, rather than appealing directly from Judge Ware's ruling in *Apple II*, was to enhance the *Apple II* Plaintiffs' litigation position on appeal. This was done by excising from *Apple II* any claims that arguably implicated ATTM's interests. The *Apple III* Plaintiffs believed that by removing the voice and data claims—which arguably implicated ATTM's wireless service—from *Apple II*, "*Apple II* [could] now proceed strictly as an apps case [without implicating ATTM] and . . . *Apple III* [could] go ahead and be dismissed so that [the *Apple III* Plaintiffs could] take [Judge Ware's] *Rule 19* ruling up to the Ninth Circuit." **[**39]**

But the *Apple III* Plaintiffs encountered a problem with this strategy. Because they were not the parties aggrieved by Judge Ware's *Apple II* order, they could not appeal from it. They needed Judge Rogers to issue an adverse ruling against *them*—in *Apple III—f*rom which they could appeal. In an attempt to obtain such a ruling expeditiously (that is, without litigating the issue before Judge Rogers) both parties stipulated to import from *Apple II* all of their respective pleadings and motions, and asked Judge Rogers to rule on them as if they had been brought in the first instance in *Apple III*. Understandably confused by this rather unusual procedure, Judge Rogers told the parties that

> it sounds like the issues that you're asking me to decide . . . have already been decided, so I don't know why we're going through this process again. I don't know why we have another complaint that doesn't include as a defendant [ATTM], which . . . Judge Ware told you you needed to have as a . . . party to the litigation. And if a

> judge in these [previous] cases has ruled [on that issue] . . . then the law says you don't get a second bite at the apple . . . .[1]

[*1057] Counsel for the *Apple III* Plaintiffs responded that they had proceeded in this fashion "to limit . . . the amount of work the court has to do, [and] to streamline things." After explaining in detail the procedural history from *Apple I* and *Apple II*, counsel for the *Apple III* Plaintiffs told Judge Rogers that **[**41]** the point of the new *Apple III* litigation was to "create . . . a device" to achieve appellate review of Judge Ware's interlocutory order. That device, counsel explained, was a stipulation to dismiss the *Apple III* Plaintiffs' claims with prejudice, but based on *Judge Ware's* reasoning from the prior case, without having Judge Rogers make that determination anew as applied to them. In other words, Plaintiffs' counsel said that the *Apple III* Plaintiffs were "willing to stipulate with Apple . . . that the complaint ought to be dismissed based on Judge Ware's . . . ruling in *Apple II"* because they *assumed* "the court would issue the same ruling it issued last time, which is that [ATTM] is a necessary and indispensable party in *Apple III."*

Once Judge Rogers understood that the Plaintiffs were not asking her to rule on the merits of the *Rule 19* issue, but rather were attempting only to create a vehicle for appellate review of *Judge Ware's* order, Judge Rogers directed the parties to "come up with a plan" and to submit a stipulation that they believed would achieve their goals. Counsel for the *Apple III* Plaintiffs asked Judge Rogers if she would "prefer a form of order that essentially grants the 12(b)(7) **[**42]** motion," but Judge Rogers, having earlier emphasized that the court was "overwhelmed right now" and that she was "not interested in doing busy work," said that "[i]f the two of you can work it out so that you both have what you need in the record and all you really need is my signature," "I would like to just (indicating) . . . stamp something." She concluded, "unless there's some dispute . . . then I don't need to be involved, [except] to just put my signature."

The *Apple III* Plaintiffs later submitted a joint stipulation to dismiss their claims under *Rule 19* "[f]or the reasons set forth in Judge Ware's . . . Order" from *Apple II*. Judge Rogers—as she had promised—then signed the proposed order granting the dismissal "PURSUANT TO THE PARTIES' STIPULATION," and "for the reasons set forth in Judge Ware's . . . Order." This appeal followed.

II.

In my view, Plaintiffs' stipulation strategy produced a "final decision" that fails to invoke our statutory appellate jurisdiction because it was not involuntary or adverse to the Plaintiffs. We have statutory jurisdiction only over "appeals from . . . final decisions of the district courts," *28 U.S.C. § 1291*, that are both involuntary and adverse to the appellant. *See* *Seidman v. City of Beverly Hills, 785 F.2d 1447, 1448 (9th Cir. 1986)*; *Unioil, Inc. v. E.F. Hutton & Co., 809 F.2d 548, 555 (9th Cir. 1986)* ("To be **[**43]** appealable, an order must be adverse to the appealing party. As a general **[*1058]** rule, a plaintiff may not appeal a voluntary dismissal because it is not an involuntary adverse judgement against him."), *abrogated on other grounds by* *Townsend v. Holman Consulting Corp., 929 F.2d 1358 (9th Cir. 1990)* (en banc).

We recently stated in *Berger v. Home Depot USA, Inc., 741 F.3d 1061, 1065 (9th Cir. 2014)*, that "absent a settlement, a stipulation alone does not destroy th[e] adversity" required for appellate jurisdiction. *Id. at 1065*. *See also* *Concha v. London, 62 F.3d 1493, 1507 (9th Cir. 1995)*. Relying on *Berger* and *Concha*, the majority concludes that the parties' stipulation to dismiss their claims produced a sufficiently "adverse" judgment because it was not "pursuant to a settlement," and was "plainly adverse to the Plaintiffs' interests."

---

[1] The majority apparently believes these particular **[**40]** comments do not show that Judge Rogers was confused about why Plaintiffs were bringing these issues again after Judge Ware had already ruled on them (demonstrating a concern about claim and issue preclusion). The majority thinks they "could also be interpreted to mean that she had analyzed the issue and was inclined to issue the same ruling as Judge Ware." With due respect, nothing in these statements can plausibly be construed as indicating that Judge Rogers had at this point deliberately analyzed the *Rule 19* issue, and they certainly cannot be construed as her inclination to "issue the same ruling as Judge Ware." Although our jurisdiction does not depend on what is said in the give-and-take between counsel and judge at an oral hearing, the transcript in this case, as will become apparent below, strongly suggests that Judge Rogers never in fact made an independent decision on the *Rule 19* issue.

Berger is inapposite, however, because it presupposes procedural facts that do not exist in the present case. *Berger* involved a single action in which a party argued its case to one judge, the judge considered the argument and ruled against that party, and then the two opposing parties stipulated to dismissal for the sole purpose of obtaining a final appealable judgment. *Berger* governs *that* type of case, in which an involuntary, adverse interlocutory ruling merges into a final appealable judgment, *see Balla v. Idaho State Bd. Of Corr., 869 F.2d 461, 468 (9th Cir. 1989)*, which is then entered pursuant to a stipulation. **[**44]** For example, had the *Apple II* Plaintiffs stipulated to dismissal in *their* case, in order to achieve a final appealable ruling, that stipulation would have fallen squarely within *Berger'*s holding, and there would be no "adverseness" problem. But this case—*Apple III*—is different. Here, there was never an involuntary, adverse ruling against the *Apple III* Plaintiffs because they *asked* Judge Rogers to adopt Judge Ware's reasoning against them. *See* Apple III Dkt. (4:12-cv-05404) No. 24, p. 10-11 (Plaintiffs' counsel arguing to Judge Rogers that "the complaint [in *Apple III] ought to* be dismissed based on Judge Ware's . . . ruling in *Apple II."*).

Concha is likewise inapposite. *Concha* says that a stipulated final judgment "with prejudice" is adverse to the plaintiffs' interests—i.e., it has "sufficient prejudice in a legal sense"—because it "serves to bar his claims forever." *Concha v. London, 62 F.3d 1493, 1507 (9th Cir. 1995)*. But *Concha* answered in the negative only the question whether a voluntary dismissal "without prejudice" would also be adverse to the Plaintiffs for purposes of statutory jurisdiction. It did not address the question presented in this case: whether a final decision of a district judge is involuntary and adverse to a party **[**45]** who stipulated to a particular analysis against it, and then asked the district judge to order final judgment, in order to argue on appeal that such analysis was actually incorrect.

Because the claims and parties in *Apple III* were different from those in *Apple II*, Judge Ware's order from *Apple II* did not preclude Judge Rogers from deciding the *Rule 19* issue in *Apple III*. Consequently, the *Apple III* Plaintiffs were required to argue their position independently in *Apple III* and to obtain an involuntary and adverse ruling against them in order to have an adverse decision from which to appeal. But they failed to do so. They said that they *assumed* Judge Rogers "would" rule consistently with Judge Ware, but they never in fact argued to Judge Rogers that Judge Ware's analysis in *Apple II* was wrong, or that she should rule in their favor on the *Rule 19* issue. Rather, they stipulated that Judge Rogers rule *against* them on the *Rule 19* issue for reasons with which they ostensibly disagreed.

No case in our circuit stands for the proposition that a non-party to a case can disagree with a judge's ruling then institute **[*1059]** a new action, before a new judge, alleging a narrower set of claims, in which they *urge* their judge **[**46]** to adopt the prior judge's analysis, and still have an involuntary and adverse ruling required for appellate jurisdiction when the new judge signs a stipulated final judgment. No adverseness exists in the *new* action where the issue was never actually litigated and no adverse positions were taken by the parties.

That the purpose of Plaintiffs' strategy was to fast-track appellate review does not give us license to dispense with the requirement that in every separate action, the parties must take adverse positions on an issue and give the judge an opportunity to rule independently on their claims. Otherwise, parties could manipulate our appellate jurisdiction under the guise of efficiency, in order to circumvent the general rule that the district court be the first to pass judgment by applying a legal rule to a set of claims. *Cf. Am. States Ins. Co. v. Dastar Corp., 318 F.3d 881, 885-86 (9th Cir. 2003)* ("A significant concern in assessing finality is whether the parties have attempted to manipulate our appellate jurisdiction. A party may not engage in manipulation either to create appellate jurisdiction or prevent it." (citations omitted)).

In sum, because the final judgment below was not involuntary and adverse to the *Apple III* Plaintiffs, I am persuaded that **[**47]** we lack statutory jurisdiction over this appeal.

III.

Even if we had statutory jurisdiction, I would conclude that the *Apple III* Plaintiffs waived the *Rule 19* issue by inviting Judge Rogers to adopt the very analysis that they now allege on appeal was erroneous. "'[O]ne may not complain on review of errors below for which he is responsible.'" *Deland v. Old Republic Life Ins. Co., 758 F.2d*

1331, 1336-37 (9th Cir.1985), quoting Hudson v. Wylie, 242 F.2d 435, 448 (9th Cir. 1957). *See also* Portland GE v. United States Bank Trust N.A., 218 F.3d 1085, 1089 (9th Cir. 2000).

Although the *Apple III* Plaintiffs stipulated to incorporate both parties' motions from *Apple II*, they ultimately drafted a stipulation dismissing their claims "for the reasons set forth in Judge Ware's July 11, 2012 Order," instead of first asking Judge Rogers either to revisit Judge Ware's Rule 19 analysis in *Apple II*, or to perform her own Rule 19 analysis in which she could embrace their arguments. In fact, counsel for the *Apple III* Plaintiffs invited Judge Rogers to adopt Judge Ware's alleged error, arguing that "the complaint [in *Apple III] ought to* be dismissed based on Judge Ware's . . . ruling in *Apple II."* At bottom, the *Apple III* Plaintiffs invited Judge Rogers to sign on to an analysis from a different case with the specific intent to argue on appeal that the analysis was erroneous. In doing so, the *Apple III* Plaintiffs sought improperly **[**48]** to skip over the district court to have us decide the Rule 19 issue in the first instance. They have thereby waived any challenge to the error they invited.

Subsequent History: As corrected July 2, 2015.

US Supreme Court certiorari denied by *Apple, Inc. v. United States, 2016 U.S. LEXIS 1750 (U.S., Mar. 7, 2016)*

Prior History: Defendants Apple, Macmillan, and Simon & Schuster appeal from a judgment of the United States District Court for the Southern District of New York (Cote, J.), entered on September 5, 2013. After a bench trial, the district court concluded that Apple violated § 1 of the Sherman Antitrust Act, *15 U.S.C. § 1 et seq.*, by orchestrating a conspiracy among five major publishing companies to raise the retail prices of digital books, known as "ebooks." The court then issued an injunctive order, which, inter alia, prevents Apple from signing agreements with those five publishers that restrict its ability to set, alter, or reduce the price of ebooks, and requires Apple to apply the same terms and conditions to ebook applications sold on its devices as it does to other applications. We conclude that the district court correctly decided that Apple orchestrated a conspiracy among the publishers to raise ebook prices, that the conspiracy unreasonably restrained trade in violation of *§ 1* **[**1]** of the Sherman Act, and that the injunction is properly calibrated to protect the public from future anticompetitive harms. In addition, we reject the argument that the portion of the injunctive order preventing Apple from agreeing to restrict **[**2]** its pricing authority modifies Macmillan and Simon & Schuster's consent decrees or should be judicially estopped. Accordingly, the judgment of the district court is AFFIRMED.

HN3[] **Standards of Review, Abuse of Discretion**

Following a bench trial, the court reviews the district court's findings of fact for clear error and its conclusions of law and mixed questions de novo. *Fed. R. Civ. P. 52(a)*. The district court's evidentiary rulings and its fashioning of equitable relief are reviewed for abuse of discretion.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN4[] **Price Fixing & Restraints of Trade, Vertical Restraints**

There is an important distinction between horizontal agreements to set prices, which involve coordination between competitors at the same level of a market structure, and vertical agreements on pricing, which are created between parties at different levels of a market structure. Under *§ 1* of the Sherman Act, the former are, with limited exceptions, per se unlawful, while the latter are unlawful only if an assessment of market effects, known as a rule-of-reason analysis, reveals that they unreasonably restrain trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN5[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Courts have long recognized the existence of hub-and-spoke conspiracies in which an entity at one level of the market structure, the hub, coordinates an agreement among competitors at a different level, the spokes. These arrangements consist of both vertical agreements between the hub and each spoke and a horizontal agreement among the spokes to adhere to the hub's terms, often because the spokes would not have gone along with the vertical agreements except on the understanding that the other spokes were agreeing to the same thing.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN6[] **Regulated Practices, Monopolies & Monopolization**

Section 1 of the Sherman Act bans restraints on trade effected by a contract, combination, or conspiracy. The first crucial question in a *§ 1* case is therefore whether the challenged conduct stems from independent decision or from an agreement, tacit or express.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN7[] **Conspiracy to Monopolize, Elements**

Identifying the existence and nature of a conspiracy requires determining whether the evidence reasonably tends to prove that the defendant and others had a conscious commitment to a common scheme designed to achieve an unlawful objective. Parallel action is not, by itself, sufficient to prove the existence of a conspiracy; such behavior could be the result of coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties. Indeed, parallel behavior that does not result from an agreement is not unlawful even if it is anticompetitive. Accordingly, to prove an antitrust conspiracy, a plaintiff must show the existence of additional circumstances, often referred to as plus factors, which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN8[] **Monopolies & Monopolization, Conspiracy to Monopolize**

The additional circumstances needed to prove an antitrust conspiracy can consist of direct evidence that the defendants entered into an agreement like a recorded phone call in which two competitors agreed to fix prices. But plaintiffs may also present circumstantial facts supporting the inference that a conspiracy existed. Circumstances that may raise an inference of conspiracy include a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, and evidence of a high level of interfirm communications. Parallel conduct alone may support an inference of conspiracy, moreover, if it consists of complex and historically unprecedented changes in pricing structure made at the very same time by multiple competitors, and made for no other discernible reason.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN9[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Because of the risk of condemning parallel conduct that results from independent action and not from an actual unlawful agreement, the United States Supreme Court has cautioned against drawing an inference of conspiracy from evidence that is equally consistent with independent conduct as with illegal conspiracy, or ambiguous evidence. Thus, a finding of conspiracy requires evidence that tends to exclude the possibility that the defendant was acting independently. This requirement, however, does not mean that the plaintiff must disprove all nonconspiratorial explanations for the defendants' conduct; rather, the evidence need only be sufficient to allow a reasonable fact finder to infer that the conspiratorial explanation is more likely than not.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN10[] **Monopolies & Monopolization, Conspiracy to Monopolize**

The United States Supreme Court has defined an agreement for Sherman Act *§ 1* purposes as a conscious commitment to a common scheme designed to achieve an unlawful objective.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN11[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Antitrust law has never required identical motives among conspirators when their independent reasons for joining together lead to collusive action.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN12[] Monopolies & Monopolization, Conspiracy to Monopolize

Conduct resulting solely from competitors' independent business decisions, and not from any agreement, is not unlawful under § 1 of the Sherman Act, even if it is anticompetitive. But to generate a permissible inference of agreement, a plaintiff need only present sufficient evidence that such agreement was more likely than not.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN13[] Exclusive & Reciprocal Dealing, Exclusive Dealing

Exclusive-dealing agreements between a retailer and manufacturers that are contrary to the manufacturers' individual self-interest but consistent with their collective interest support the inference of a horizontal conspiracy in which the retailer participated.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN14[] Monopolies & Monopolization, Conspiracy to Monopolize

A conspiracy may be inferred if a defendant's action would have been contrary to its self-interest in the absence of advance agreement.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN15[] Regulated Practices, Price Fixing & Restraints of Trade

In antitrust cases, the character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN16[] Price Fixing & Restraints of Trade, Vertical Restraints

Vertical agreements, lawful in the abstract, can in context be useful evidence for a plaintiff attempting to prove the existence of a horizontal cartel, particularly where multiple competitors sign vertical agreements that would be against their own interests were they acting independently.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN17[] Regulated Practices, Price Fixing & Restraints of Trade

Although the Sherman Act, by its terms, prohibits every agreement in restraint of trade, the United States Supreme Court has long recognized that Congress intended to outlaw only unreasonable restraints. Thus, to succeed on an antitrust claim, a plaintiff must prove that the common scheme designed by the conspirators constituted an unreasonable restraint of trade either per se or under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN18[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In antitrust cases, per se and rule-of-reason analysis are two methods of determining whether a restraint is unreasonable, i.e., whether its anticompetitive effects outweigh its procompetitive effects. Because this balancing typically requires case-by-case analysis, most antitrust claims are analyzed under the rule of reason, according to which the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition. However, some restraints have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful per se. This rule reflects a long-standing judgment that case-by-case analysis is unnecessary for certain practices that, by their nature, have a substantial potential to unreasonably restrain competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN19[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Horizontal price-fixing conspiracies traditionally have been, and remain, the archetypal example of a per se unlawful restraint on trade. By contrast, the United States Supreme Court has clarified that vertical restraints, including those that restrict prices, should generally be subject to the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN20[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

The true test of legality under § 1 of the Sherman Act is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. By agreeing to orchestrate a horizontal price-fixing conspiracy, a conspirator commits itself to achieving that unlawful objective: namely, collusion with and among coconspirators to set prices. This type of agreement, moreover, is a restraint that would always or almost always tend to restrict competition and decrease output.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN21[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The per se rule and the rule of reason are means of evaluating whether a restraint is unreasonable, not the reasonableness of a particular defendant's role in the scheme. Both per se rules and the rule of reason are employed to form a judgment about the competitive significance of the restraint.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN22[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The rule of reason is unquestionably appropriate to analyze an agreement between a manufacturer and its distributors to, for instance, limit the price at which the distributors sell the manufacturer's goods or the locations at which they sell them. These vertical restrictions are widely used in our free market economy, can enhance interbrand competition, and do not inevitably have a pernicious effect on competition.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN23[] Scope, Monopolization Offenses

Horizontal agreements with the purpose and effect of raising prices are per se unreasonable because they pose a threat to the central nervous system of the economy; that threat is just as significant when a vertical market participant organizes the conspiracy.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN24[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Vertical price restraints are to be judged by the rule of reason. Vertical price restraints are unfit for the per se rule because they can be used to encourage retailers to invest in promoting a product by ensuring that other retailers will not undercut their prices for that good. However, vertical price restraints can also be used to organize horizontal cartels to increase prices, which are, and ought to be, per se unlawful. When used for such a purpose, the vertical agreement may be useful evidence to prove the existence of a horizontal cartel.

Governments > Courts > Judicial Precedent

HN25[] **Courts, Judicial Precedent**

The United States Supreme Court does not normally overturn, or so dramatically limit, earlier authority sub silentio.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN26[] **Scope, Monopolization Offenses**

Horizontal collusion to raise prices is the archetypal example of a per se unlawful restraint of trade. If successful, these conspiracies concentrate the power to set prices among the conspirators, including the power to control the market and to fix arbitrary and unreasonable prices. And even if unsuccessful or not aimed at complete elimination of price competition, the conspiracies pose a threat to the central nervous system of the economy by creating a dangerously attractive opportunity for competitors to enhance their power at the expense of others.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN27[] **Scope, Monopolization Offenses**

Price-fixing cartels are condemned per se because the conduct is tempting to businessmen but very dangerous to society. The conceivable social benefits are few in principle, small in magnitude, speculative in occurrence, and always premised on the existence of price-fixing power which is likely to be exercised adversely to the public. And even if power is usually established while any defenses are not, litigation will be complicated, condemnation delayed, would be price-fixers encouraged to hope for escape, and criminal punishment less justified. Deterrence of a generally pernicious practice would be weakened.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN28[] **Regulated Practices, Price Fixing & Restraints of Trade**

Per se condemnation is not limited to agreements that literally set or restrict prices. Instead, any conspiracy formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity is illegal per se, and the precise machinery employed is immaterial.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN29[] **Regulated Practices, Price Fixing & Restraints of Trade**

Courts need not even conduct an extensive analysis of market power or a detailed market analysis to demonstrate its anticompetitive character.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN30[] **Regulated Practices, Price Fixing & Restraints of Trade**

Any combination which tampers with price structures would be directly interfering with the free play of market forces.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN31[] **Regulated Practices, Price Fixing & Restraints of Trade**

The key inquiry in a market power analysis is whether the defendant has the ability to raise prices without losing its business.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN32[] **Sherman Act, Scope**

Under a prototypically robust rule-of-reason analysis, the plaintiff must demonstrate an actual adverse effect on competition in the relevant market before the burden shifts to the defendants to offer evidence of the pro-competitive effects of their agreement. The factfinder then weighs the competing evidence to determine if the effects of the challenged restraint tend to promote or destroy competition. But not every case that requires rule of reason analysis is a candidate for plenary market examination. What is required, rather, is an enquiry meet for the case, looking to the circumstances, details, and logic of a restraint.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN33[] **Sherman Act, Scope**

The United States Supreme Court has applied an abbreviated version of the rule of reason, otherwise known as quick look review, to agreements whose anticompetitive effects are easily ascertained. This quick look effectively relieves the plaintiff of its burden of providing a robust market analysis by shifting the inquiry directly to a consideration of the defendant's procompetitive justifications. When the restraint appears on its face to be one that tends to increase price, an abbreviated rule-of-reason analysis operates to shift the burden of proof rather than to cut off the inquiry, as is usually true in a per se case.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

***HN34*[]** **Scope, Monopolization Offenses**

In any case in which competitors are able to increase the price level or to curtail production by agreement, it could be argued that the agreement has the effect of making the market more attractive to potential new entrants. If that potential justifies horizontal agreements among competitors imposing one kind of voluntary restraint or another on their competitive freedom, it would seem to follow that the more successful an agreement is in raising the price level, the safer it is from antitrust attack. Nothing could be more inconsistent with judicial precedent.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

***HN35*[]** **Regulated Practices, Monopolies & Monopolization**

Market dominance may arise as a consequence of a superior product, business acumen, or historic accident, and is not only not unlawful, it is an important element of the free market system.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

***HN36*[]** **Scope, Monopolization Offenses**

That below-cost pricing may impose painful losses on its target is of no moment to the antitrust laws if competition is not injured: It is axiomatic that the antitrust laws were passed for the protection of competition, not competitors. Because lower prices improve consumer welfare (all else being equal), below-cost pricing is unlawfully anticompetitive only if there is a dangerous probability that the firm engaging in it will later recoup its losses by raising prices to monopoly levels after driving its rivals out of the market.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

***HN37*[]** **Sherman Act, Scope**

Because of the long-term threat to competition, the Sherman Act does not authorize horizontal price conspiracies as a form of marketplace vigilantism to eliminate perceived ruinous competition or other competitive evils. Indeed, the attempt to justify a conspiracy to raise prices on the basis of the potential threat that competition poses is nothing less than a frontal assault on the basic policy of the Sherman Act.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN38[] Actual Monopolization, Claims

While merely possessing monopoly power is not itself an antitrust violation, it is a necessary element of a monopolization charge.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN39[] Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing

A firm that lacks dominant market power can unilaterally choose with whom they deal without fear of antitrust liability.

Antitrust & Trade Law > Sherman Act > Claims

HN40[] Sherman Act, Claims

Under certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate § 2 of the Sherman Act. Courts have been very cautious in recognizing such exceptions, because of the uncertain virtue of forced sharing and the difficulty of identifying and remedying anticompetitive conduct by a single firm.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN41[] Expert Witnesses, Daubert Standard

The proponent of expert testimony has the burden of establishing by a preponderance of the evidence that the expert's opinion is based on sufficient facts, is the product of reliable principles and methods, and applies those principles and methods reliably to the facts at hand. *Fed. R. Evid. 702*.

Civil Procedure > Judgments > Relief From Judgments > General Overview

HN42[] Judgments, Relief From Judgments

Fed. R. Civ. P. 60(b) establishes the grounds for seeking relief from a final judgment, order, or proceeding, including modifications of consent decrees. The rule adopts a flexible approach, enumerating specific reasons for modification while also allowing alterations for any other reason that justifies relief. *Rule 60(b)*. A party seeking an alteration under this catch-all provision bears the burden of establishing that a significant change in circumstances warrants the modification.

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Civil Procedure > Judgments > Relief From Judgments > General Overview

Civil Procedure > Remedies > Injunctions > General Overview

HN43[] **Entry of Judgments, Consent Decrees**

A consent decree is enforced as an order, but construed largely as a contract. Its scope must be discerned within its four corners, and not by reference to what might satisfy the purposes of one of the parties to it. An injunctive order against an entity that is not party to the consent decree and neither changes the terms of nor interprets the decree does not modify the contract and therefore does not require a *Fed. R. Civ. P. 60(b)* motion. Indeed, as a practical matter, injunctions often alter the options available to other parties. *Rule 60(b)* does not hold district courts issuing injunctions to a higher standard simply because the injunction may affect rights addressed in a different party's consent decree.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Judicial Estoppel

HN44[] **Estoppel, Judicial Estoppel**

Judicial estoppel is invoked by a court at its discretion, and is designed to protect the integrity of the judicial process by prohibiting parties from deliberately changing positions according to the exigencies of the moment. While the propriety of applying estoppel depends heavily on the specific factual context before the court, we typically consider whether the party's argument is clearly inconsistent with its earlier position, whether the party succeeded in persuading a court to accept that earlier position, and whether the party seeking to assert an inconsistent position would derive an unfair advantage or impose an unfair detriment on the opposing party if not estopped. Relief is granted only when the impact on judicial integrity is certain.

Evidence > Types of Evidence > Testimony > General Overview

HN45[] **Types of Evidence, Testimony**

Courts need to carefully consider the contexts in which apparently contradictory statements are made to determine if there is, in fact, direct and irreconcilable contradiction.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN46[] **Reviewability of Lower Court Decisions, Preservation for Review**

Issues not sufficiently argued are in general deemed waived and will not be considered on appeal.

Civil Procedure > Judicial Officers > Masters > Appointment of Masters

HN47[] **Masters, Appointment of Masters**

Reliance on a master appointed under *Fed. R. Civ. P. 53* is appropriate when a complex decree requires complex policing, particularly when a party has proved resistant or intransigent, and that both the United States Supreme Court and the court have approved such appointments. *Rule 53* advisory committee's note.

Antitrust & Trade Law > ... > US Department of Justice Actions > Civil Actions > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

HN48[] **US Department of Justice Actions, Civil Actions**

A Government plaintiff, unlike a private plaintiff, must seek to obtain relief necessary to protect the public from further anticompetitive conduct and to redress anticompetitive harm. Thus, when the purpose to restrain trade appears from a clear violation of law, it is not necessary that all untraveled roads to that end be left open and that only the worn one be closed. The district court has large discretion to model its judgments to fit the exigencies of the particular case, and all doubts about the remedy are to be resolved in the Government's favor.

Opinion by: DEBRA ANN LIVINGSTON

Opinion

[*296] DEBRA ANN LIVINGSTON, *Circuit Judge*:

Since the invention of the printing press, the distribution of books has involved **[**4]** a fundamentally consistent process: compose a manuscript, print and bind it into physical volumes, and then ship and sell the volumes to the public. In late 2007, Amazon.com, Inc. ("Amazon") introduced the Kindle, a portable device that carries digital copies of books, known as "ebooks." This innovation had the potential to change the centuries-old process for producing books by eliminating the need to print, bind, ship, and store them. Amazon began to popularize the new way to read, and encouraged consumers to buy the Kindle by offering desirable books — new releases and *New York Times* bestsellers — for $9.99. Publishing companies, which have traditionally stood at the center of the multi-billion dollar book-producing industry, saw Amazon's ebooks, and particularly its $9.99 pricing, as a threat to their way of doing business.

By November 2009, Apple, Inc. ("Apple") had plans to release a new tablet computer, the iPad. Executives at the company saw an opportunity to sell ebooks on the iPad by creating a virtual marketplace on the device, which came to be known as the "iBookstore." Working within a tight timeframe, Apple went directly into negotiations with six of the major publishing **[**5]** companies in the United States. In two months, it announced that five of those companies — Hachette, Harpercollins, Macmillan, Penguin, and Simon & Schuster (collectively, the "Publisher Defendants") — had agreed to sell ebooks on the iPad under arrangements whereby the publishers had the authority to set prices, and could set the prices of new releases and *New York Times* bestsellers as high as $19.99 and $14.99, respectively. Each of these agreements, by virtue of its terms, resulted in each Publisher Defendant receiving *less* per ebook sold via Apple as opposed to Amazon, even given the higher consumer prices. Just a few months after the iBookstore opened, however, every one of the Publisher Defendants had taken control over pricing from Amazon and had raised the prices on many of their ebooks, most notably new releases and bestsellers.

The United States Department of Justice ("DOJ" or "Justice Department") and 33 states and territories (collectively, "Plaintiffs") filed suit in the United States District Court for the Southern District of New York, alleging that Apple, in launching the iBookstore, had conspired with the Publisher Defendants to raise prices across the nascent ebook **[**6]** market. This agreement, they argued, violated § 1 of the Sherman Antitrust Act, *15 U.S.C. § 1 et seq.* ("Sherman Act"), and state antitrust laws. All five Publisher Defendants **[*297]** settled and signed consent decrees, which prohibited them, for a period, from restricting ebook retailers' ability to set prices. Then, after a three-week bench trial, the district court (Cote, *J.*) concluded that, in order to induce the Publisher Defendants to participate in the iBookstore and to avoid the necessity of itself competing with Amazon over the retail price of ebooks, Apple orchestrated a conspiracy among the Publisher Defendants to raise the price of ebooks — particularly new releases and *New York Times* bestsellers. *United States v. Apple Inc., 952 F. Supp. 2d 638, 647 (S.D.N.Y. 2013)*. The district court found that the agreement constituted a *per se* violation of the Sherman Act and, in the alternative, unreasonably restrained trade under the rule of reason. *See id. at 694*. On September 5, 2013, the district court entered final judgment on the liability finding and issued an injunctive order that, *inter alia*, prevents Apple from entering into agreements with the Publisher Defendants that restrict its ability to set, alter, or reduce the price of ebooks, and requires Apple to apply the same **[**7]** terms and conditions to ebook applications sold on its devices as it does to other applications.

On appeal, Apple contends that the district court's liability finding was erroneous and that the provisions of the injunction related to its pricing authority and ebook applications are not necessary to protect the public. Two of the Publisher Defendants — Macmillan and Simon & Schuster — join the appeal, arguing that the portion of the injunction related to Apple's pricing authority either unlawfully modifies their consent decrees or should be judicially estopped. We conclude that the district court's decision that Apple orchestrated a horizontal conspiracy among the Publisher Defendants to raise ebook prices is amply supported and well-reasoned, and that the agreement unreasonably restrained trade in violation of *§ 1 of the Sherman Act*. We also conclude that the district court's injunction is lawful and consistent with preventing future anticompetitive harms.

Significantly, the dissent *agrees* that Apple intentionally organized a conspiracy among the Publisher Defendants to raise ebook prices. Nonetheless, it contends that Apple was entitled to do so because the conspiracy helped it become **[**8]** an ebook retailer. In arriving at this startling conclusion — based in large measure on an argument that Apple itself did not assert — the dissent makes two fundamental errors. The first is to insist that the vertical organizer of a horizontal price-fixing conspiracy may escape application of the *per se* rule. This conclusion is based on a misreading of Supreme Court precedent, which establishes precisely the opposite. The dissent fails to apprehend that the Sherman Act outlaws *agreements* that unreasonably restrain trade and therefore requires evaluating the nature of the restraint, rather than the identity of each party who joins in to impose it, in determining whether the *per se* rule is properly invoked. Finally (and most fundamentally) the dissent's conclusion rests on an erroneous premise: that one who organizes a horizontal price-fixing conspiracy — the "supreme evil of antitrust," *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408 (2004), 124 S. Ct. 872, 157 L. Ed. 2d 823* — among those competing at a different level of the market has somehow done less damage to competition than its co-conspirators.

The dissent's second error is to assume, in effect, that Apple was entitled to enter the ebook retail market on its own terms, even if these terms could be achieved only via **[**9]** its orchestration of and entry into a price-fixing agreement with the Publisher Defendants. The dissent tells a story of **[*298]** Apple organizing this price-fixing conspiracy to rescue ebook retailers from a monopolist with insurmountable retail power. But this tale is not spun from any factual findings of the district court. And the dissent's armchair analysis wrongly treats the number of ebook retailers at any moment in the emergence of a new and transformative technology for book distribution as the *sine qua non* of competition in the market for trade ebooks.

More fundamentally, the dissent's theory — that the presence of a strong competitor justifies a horizontal price-fixing conspiracy — endorses a concept of marketplace vigilantism that is wholly foreign to the antitrust laws. By organizing a price-fixing conspiracy, Apple found an easy path to opening its iBookstore, but it did so by ensuring that market-wide ebook prices would rise to a level that it, and the Publisher Defendants, had jointly agreed upon. Plainly, competition is not served by permitting a market entrant to *eliminate price competition* as a condition of entry, and it is cold comfort to consumers that they gained a new **[**10]** ebook retailer at the expense of passing control over all ebook prices to a cartel of book publishers — publishers who, with Apple's help, collectively agreed on a new pricing model precisely to *raise* the price of ebooks and thus protect their profit margins and their very existence in the marketplace in the face of the admittedly strong headwinds created by the new technology.

Because we conclude that the district court did not err in deciding that Apple violated *§ 1 of the Sherman Act*, and because we also conclude that the district court's injunction was lawful and consistent with preventing future anticompetitive harms, we affirm.

BACKGROUND

I. Factual Background[1]

We begin not with Kindles and iPads, but with printed "trade books," which are "general interest fiction and non-fiction" books intended for a broad readership. *Apple, 952 F. Supp. 2d at 648 n.4*. In the United States, the six largest publishers of trade books, known in the publishing world as the "Big Six," are Hachette, HarperCollins, Macmillan, Penguin, Random House, and Simon & Schuster. Together, the Big Six publish many of the biggest names in fiction and non-fiction; during 2010, their titles accounted for over 90% of the *New York Times* bestsellers in the United States. *Id. at 648 n.5*.

For decades, trade book publishers operated under a fairly consistent business model. When a new book was ready for release to the public, the publisher would sell hardcover copies to retailers at a "wholesale" price and recommend resale to consumers at a markup, known as the "list" price. After the hardcover spent enough time on the shelves — often a year — publishers would release a paperback copy at lower "list" and "wholesale" prices. In

---

[1] The factual background presented here is drawn from the district court's factual findings or from undisputed material in the record before the district court. ***HN1***[] Because this Court reviews the district court's factual findings for "clear error," we must assess whether "its view of the evidence is plausible in light of the entire record." *Cosme v. Henderson, 287 F.3d 152, 158 (2d Cir. 2002)*. In light of this obligation, the dissent is wrong to suggest that citations to the record are inappropriate or misleading. When a fact comes from the district court's opinion, we cite that opinion; **[**11]** when one comes from the record, we cite the joint appendix ("J.A.").

theory, devoted readers would pay the higher hardcover price to read the book when it first came out, while more casual fans would wait **[**12]** for the paperback.

[*299] A. Amazon's Kindle

On November 19, 2007, Amazon released the Kindle: a portable electronic device that allows consumers to purchase, download, and read ebooks. At the time, there was only one other ereader available in the emerging ebook market, and Amazon's Kindle quickly gained traction. In 2007, ebook revenue in North America was only $70 million, a tiny amount relative to the approximately $30 billion market for physical trade books. The market was growing, however; in 2008 ebook revenue was roughly $140 million and, by the time Barnes & Noble, Inc. (Barnes & Noble) launched its Nook ereader in November 2009, Amazon was responsible for 90% of all ebook sales. *Apple, 952 F. Supp. 2d at 648-49*.

Amazon followed a "wholesale" business model similar to the one used with print books: publishers recommended a digital list price and received a wholesale price for each ebook that Amazon sold. In exchange, Amazon could sell the publishers' ebooks on the Kindle and determine the retail price. At least early on, publishers tended to recommend a digital list price that was about 20% lower than the print list price to reflect the fact that, with an ebook, there is no cost for printing, storing, packaging, shipping, **[**13]** or returning the books.

Where Amazon departed from the publishers' traditional business model was in the sale of new releases and *New York Times* bestsellers. Rather than selling more expensive versions of these books upon initial release (as publishers encouraged by producing hardcover books before paperback copies), Amazon set the Kindle price at one, stable figure — $9.99. At this price, Amazon was selling "certain" new releases and bestsellers at a price that "roughly matched," or was slightly lower than, the wholesale price it paid to the publishers. *Apple, 952 F. Supp. 2d at 649*. David Naggar, a Vice President in charge of Amazon's Kindle content, described this as a "classic loss-leading strategy" designed to encourage consumers to adopt the Kindle by discounting new releases and *New York Times* bestsellers and selling other ebooks without the discount. J.A. 1485. The district court also referred to this as a "loss leader[]" strategy, *Apple, 952 F. Supp. 2d at 650, 657, 708*, and explained that Amazon "believed [the $9.99] pricing would have long-term benefits for its consumers," *id. at 649*. Contrary to the dissent's portrayal of the opinion, the district court did *not* find that Amazon used the $9.99 price point to "assure[] its domination" in the ebook **[**14]** market, or that its pricing strategy acted as a "barrier to entry" for other retailers. Dissenting Op. at 6-7. Indeed, in November 2009 — just a few months before Apple's launch of the iBookstore — Barnes & Noble entered the ebook retail market by launching the Nook, *Apple, 952 F. Supp. 2d at 649 n.6*, and as early as 2007 Google Inc. ("Google") had been planning to enter the market using a wholesale model, *id. at 686*.

B. The Publishers' Reactions

Despite the small number of ebook sales compared to the overall market for trade books, top executives in the Big Six saw Amazon's $9.99 pricing strategy as a threat to their established way of doing business. Those executives included: Hachette and Hachette Livre Chief Executive Officers ("CEOs") David Young and Arnaud Nourry; HarperCollins CEO Brian Murray; Macmillan CEO John Sargent; Penguin USA CEO David Shanks; Random House Chief Operating Officer Madeline McIntosh; and Simon & Schuster President and CEO Carolyn Reidy. In the short term, these members of the Big Six thought that Amazon's lower-priced **[*300]** ebooks would make it more difficult for them to sell hardcover copies of new releases, "which were often priced," as the district court noted, "at thirty dollars or more," *Apple, 952 F. Supp. 2d at 649*, as well **[**15]** as *New York Times* bestsellers. Further down the road, the publishers feared that consumers would become accustomed to the uniform $9.99 price point for these ebooks, permanently driving down the price they could charge for print versions of the books. Moreover, if Amazon became powerful enough, it could demand lower wholesale prices from the Big Six or allow authors to publish directly with Amazon, cutting out the publishers entirely. As Hachette's Young put it, the idea of the "wretched $9.99 price point becoming a de facto standard" for ebooks "sickened" him. J.A. 289.

The executives of the Big Six also recognized that their problem was a collective one. Thus, an August 2009 Penguin strategy report (concluded only a few months before Apple commenced its efforts to launch the iBookstore) noted that "[c]ompetition for the attention of readers will be most intense from digital companies whose objective may be to [cut out] traditional publishers altogether. . . . It will not be possible for any individual publisher to mount an effective response, because of both the resources necessary and the risk of retribution, so the industry needs to develop a common strategy." J.A. 287. Similarly, Reidy from **[**16]** Simon & Schuster opined in September 2009 that the publishers had "no chance of success in getting Amazon to change its pricing practices" unless they acted with a "critical mass," and expressed the "need to gather more troops and ammunition" before implementing a move against Amazon. J.A. 290 (internal quotation marks omitted).

Conveniently, the Big Six operated in a close-knit industry and had no qualms communicating about the need to act together. As the district court found (based on the Publisher Defendants' own testimony), "[o]n a fairly regular basis, roughly once a quarter, the CEOs of the [Big Six] held dinners in the private dining rooms of New York restaurants, without counsel or assistants present, in order to discuss the common challenges they faced." *Apple, 952 F. Supp. 2d at 651*. Because they "did not compete with each other on price," but over authors and agents, the publishers "felt no hesitation in freely discussing Amazon's prices with each other and their joint strategies for raising those prices." *Id.* Those strategies included eliminating the discounted wholesale price for ebooks and possibly creating an alternative ebook platform.

The most significant attack that the publishers considered and then **[**17]** undertook, however, was to withhold new and bestselling books from Amazon until the hardcover version had spent several months in stores, a practice known as "windowing." Members of the Big Six both kept one another abreast of their plans to window, and actively pushed others toward the strategy.[2] By December 2009, the *Wall Street Journal* and *New York Times* were **[*301]** reporting that four of the Big Six had announced plans to delay ebook releases until after the print release, and the two holdouts — Penguin and Random House — faced pressure from their peers.

Ultimately, however, the publishers viewed even this strategy to save their business model as self-destructive. Employees inside the publishing companies noted that windowing encouraged piracy, punished ebook consumers, and harmed long-term sales. One author wrote to Sargent in December 2009 that the "old model has to change" and that it would be better to "embrace e-books," publish them at the same time as the hardcovers, "and pray to God they both sell like crazy." J.A. 325. Sargent agreed, but expressed the hope that ebooks could eventually be sold for between $12.95 and $14.95. "The question is," he mused, "how to get there?" J.A. 325.

C. Apple's Entry into the Ebook Market

Apple is one of the world's most innovative and successful technology companies. Its hardware sells worldwide and supports major software marketplaces like iTunes and the App Store. But in 2009, Apple lacked a dedicated marketplace for ebooks or a hardware device that could offer an outstanding reading experience. The pending release of the iPad, which Apple intended to announce on January 27, 2010, promised to solve that hardware deficiency. **[**19]**

Eddy Cue, Apple's Senior Vice President of Internet Software and Services and the director of Apple's digital content stores, saw the opportunity for an ebook marketplace on the iPad. By February 2009, Cue and two colleagues — Kevin Saul and Keith Moerer — had researched the ebook market and concluded that it was poised

---

[2] Citing one example, the district court referenced a fall 2009 email in which Hachette's Young informed his colleague Nourry of Simon & Schuster's windowing plans, advising "[c]ompletely confidentially, Carolyn [Reidy] has told me that they [Simon & Schuster] are delaying the new Stephen King, with his full support, but will not be announcing this until the day after Labor Day." *Apple, 952 F. Supp. 2d at 652* (first and second alterations in original) (internal quotation marks omitted). The district court went on to observe that Young, "[u]nderstanding the impropriety of this exchange of confidential information with a competitor, . . . advised Nourry that 'it would be prudent for you to double **[**18]** delete this from your email files when you return to your office.'" *Id.*

for rapid expansion in 2010 and beyond. While Amazon had an estimated 90% market share in trade ebooks, Cue believed that Apple could become a powerful player in the market in large part because consumers would be able to do many tasks on the iPad, and would not want to carry a separate Kindle for reading alone. In an email to Apple's then-CEO, Steve Jobs, he discussed the possibility of Amazon selling ebooks through an application on the iPad, but felt that "it would be very easy for [Apple] to compete with and . . . trounce Amazon by opening up our own ebook store" because "[t]he book publishers would do almost anything for [Apple] to get into the ebook business." J.A. 282.

Jobs approved Cue's plan for an ebook marketplace — which came to be known as the iBookstore — in November 2009. Although the iPad would go to market with or without the iBookstore, Apple hoped to announce **[**20]** the ebook marketplace at the January 27, 2010 iPad launch to "ensure maximum consumer exposure" and add another "dramatic component" to the event. *Apple, 952 F. Supp. 2d at 655*. This left Cue and his team only two months amidst the holiday season both to create a business model for the iBookstore and to assemble a group of publishers to participate. Cue also had personal reasons to work quickly. He knew that Jobs was seriously ill, and that, by making the iBookstore a success, he could help Jobs achieve a longstanding goal of creating a device that provides a superior reading experience.

Operating under a tight timeframe, Cue, Saul, and Moerer streamlined their efforts by focusing on the Big Six publishers. They began by arming themselves with some important information about the state of affairs within the publishing industry. In particular, they learned that the publishers feared that Amazon's pricing model **[*302]** could change their industry, that several publishers had engaged in simultaneous windowing efforts to thwart Amazon, and that the industry as a whole was in a state of turmoil. "Apple understood," as the district court put it, "that the Publishers wanted to pressure Amazon to raise the $9.99 price point for **[**21]** e-books, that the Publishers were searching for ways to do that, and that they were willing to coordinate their efforts to achieve that goal." *Id. at 656*. For its part, as the district court found, Apple was willing to sell ebooks at higher prices, but "had decided that it would not open the iBookstore if it could not make money on the store and compete effectively with Amazon." *Id.*

D. Apple's Negotiations with the Publishers

1. Initial Meetings

Apple held its first meetings with each of the Big Six between December 15 and 16. The meetings quickly confirmed Cue's suspicions about the industry. As he wrote to Jobs after speaking with three of the publishers, "[c]learly, the biggest issue is new release pricing" and "Amazon is definitely not liked much because of selling below cost for NYT Best Sellers." J.A. 326-27. Many publishers also emphasized that they were searching for a strategy to regain control over pricing. Apple informed each of the Big Six that it was negotiating with the other major publishers, that it hoped to begin selling ebooks within the next 90 days, and that it was seeking a critical mass of participants in the iBookstore and would launch only if successful in reaching this goal. **[**22]** Apple informed the publishers that it did not believe the iBookstore would succeed unless publishers agreed both not to window books and to sell ebooks at a discount relative to their physical counterparts. Apple noted that ebook prices in the iBookstore needed to be comparable to those on the Kindle, expressing the view, as Reidy recorded, that it could not "tolerate a market where the product is sold significantly more cheaply elsewhere." *Apple, 952 F. Supp. 2d at 657* (internal quotation marks omitted). Most importantly for the publishers, however, Cue's team also expressed Apple's belief that Amazon's $9.99 price point was not ingrained in consumers' minds, and that Apple could sell new releases and *New York Times* bestsellers for somewhere between $12.99 and $14.99. In return, Apple requested that the publishers decrease their wholesale prices so that the company could make a small profit on each sale.

These meetings spurred a flurry of communications reporting on the "[t]errific news[,]" as Reidy put it in an email to Leslie Moonves, her superior at parent company CBS Corporation ("CBS"), that Apple "was not interested in a low price point for digital books" and didn't want "Amazon's $9.95 [sic] to continue." *Apple, 952 F. Supp. 2d at 658* (first **[**23]** alteration in original) (internal quotation marks omitted). Significantly, these communications included numerous exchanges *between* executives at different Big Six publishers who, the district court found, "hashed over their meetings with Apple with one another." *Id.* The district court found that the frequent telephone calls among the Publisher Defendants during the period of their negotiations with Apple "represented a departure from the ordinary pattern of calls among them." *Id. at 655 n.14*.

2. The Agency Model

Meanwhile, Cue, Moerer, and Saul returned to Apple's headquarters to develop a business model for the iBookstore. Although the team was optimistic about the initial meetings, they remained concerned **[*303]** about whether the publishers would reduce wholesale prices on new releases and bestsellers by a large enough margin to allow Apple to offer competitive prices and still make a profit. One strategy that the team considered was to ask publishers for a 25% wholesale discount on all of these titles, so if a physical book sold at $12 wholesale (the going rate for the majority of *New York Times* bestsellers) Apple could purchase the ebook version for $9 and offer it on the iBookstore at a small markup. **[**24]** But Cue was aware that some publishers had increased Amazon's digital wholesale prices in 2009 in an unsuccessful effort to convince Amazon to change its pricing. *Id. at 650*; J.A. 1771. Cue felt it would be difficult to negotiate wholesale prices down far enough "for [Apple] to generally compete profitably with Amazon's below-cost pricing on the most popular e-books." J.A. 1772. As Cue saw it, Apple's most valuable bargaining chip came from the fact that the publishers were desperate "for an alternative to Amazon's pricing policies and excited about . . . the prospect that [Apple's] entry [into the ebook market] would give them leverage in their negotiations with Amazon." *Apple, 952 F. Supp. 2d at 659*.

It was at this point that Cue's team, recognizing its opportunity, abandoned the wholesale business model for a new, agency model.[3] Unlike a wholesale model, in an agency relationship the *publisher* sets the price that consumers will pay for each ebook. Then, rather than the retailer paying the publisher for each ebook that it sells, the publisher pays the retailer a fixed percentage of each sale. In essence, the retailer receives a commission for distributing the publisher's ebooks. Under the system Apple devised, publishers **[**25]** would have the freedom to set ebook prices in the iBookstore, and would keep 70% of each sale. The remaining 30% would go to Apple as a commission.

This switch to an agency model obviated Apple's concerns about negotiating wholesale prices with the Big Six while ensuring that Apple profited on every sale. It did not, however, solve all of the company's problems. Because the agency model handed the publishers control over pricing, it created the risk that the Big Six would sell ebooks in the iBookstore at far higher prices than Kindle's $9.99 offering. If the prices were too high, Apple could be left with a brand new marketplace brimming with titles, but devoid of customers.

To solve this pricing problem, Cue's team initially devised two strategies. First, they realized that they could maintain "realistic prices" by establishing price caps for different types of books. J.A. 359. Of course, these caps would need to be *higher* than Amazon's $9.99 price point, or Apple would face the same difficult price negotiations that it sought to avoid by switching **[**26]** away from the wholesale model. But at this point Apple was not content to open its iBookstore offering prices higher than the competition. For as the district court found, if the Publisher Defendants "wanted to end Amazon's $9.99 pricing," Apple similarly desired "that there be no price competition at the retail level." *Apple, 952 F. Supp. 2d at 647*.

Apple next concluded, then, as the district court found, that "[t]o ensure that the iBookstore would be competitive at higher prices, Apple . . . needed to eliminate all retail price competition." *Id. at 659*. Thus, rather than simply agreeing to price caps above Amazon's $9.99 price point, Apple created a second requirement: publishers must switch all of their other ebook **[*304]** retailers — including Amazon — to an agency pricing model. The result would be that Apple would not need to compete with Amazon on price, and publishers would be able to eliminate Amazon's $9.99 pricing. Or, as Cue would later describe the plan to executives at Simon & Schuster, Macmillan,

---

[3] Notably, the possibility of an agency arrangement was first mentioned by Hachette and HarperCollins as a way "to fix Amazon pricing." J.A. 346.

and Random House, the plan "solve[d] [the] Amazon issue" by allowing the publishers to wrest control over pricing from Amazon.[4] *Id. at 661* (internal quotation marks omitted).

On January 4 and 5, Apple sent essentially identical emails to each member of the Big Six to explain its agency model proposal. Each email described the commission split between Apple and the publishers and recommended three price caps: $14.99 for hardcover books with list prices above $35; $12.99 for hardcover books with list prices below $35; and $9.99 for all other trade books. The emails also explained that, "to sell ebooks at realistic prices . . . all [other] resellers of new titles need to be in [the] agency model" as well. J.A. 360. Or, as Cue told Reidy, "all publishers" would need to move "all retailers" to an agency model. J.A. 2060.

3. The "Most-Favored-Nation" Clause

Cue's thoughts **[**28]** on the agency model continued to evolve after the emails on January 4 and 5. Most significantly, Saul — Cue's in-house counsel — devised an alternative to explicitly requiring publishers to switch other retailers to agency. This alternative involved the use of a "most-favored nation" clause ("MFN Clause" or "MFN"). In general, an MFN Clause is a contractual provision that requires one party to give the other the best terms that it makes available to any competitor. In the context of Apple's negotiations, the MFN Clause mandated that, "[i]f, for any particular New Release in hardcover format, the . . . Customer Price [in the iBookstore] at any time is or becomes higher than a customer price offered by any other reseller . . . , then [the] Publisher shall designate a new, lower Customer Price [in the iBookstore] to meet such lower [customer price]." J.A. 559. Put differently, the MFN would require the publisher to offer any ebook in Apple's iBookstore for no more than what the same ebook was offered elsewhere, such as from Amazon.

On January 11, Apple sent each of the Big Six a proposed eBook Agency Distribution Agreement (the "Contracts"). As described in the January 4 and 5 emails, these Contracts would split the proceeds **[**29]** from each ebook sale between the publisher and Apple, with the publisher receiving 70%, and would set price caps on ebooks at $14.99, $12.99, and $9.99 depending on the book's hardcover price. But unlike the initial emails, the Contracts contained MFN Clauses in place of the requirement that publishers move all other retailers to an agency model. Apple then assured each member of the Big Six that it was being offered the same terms as the others.

The Big Six understood the economic incentives that the MFN Clause created. Suppose a new hardcover release sells at a list price of $25, and a wholesale price of $12.50. With Amazon, the publishers had been receiving the wholesale price (or a **[*305]** slightly lower digital wholesale price) for every ebook copy of the volume sold on Kindle, even if Amazon ultimately sold the ebook for less than that wholesale price. Under Apple's initial agency model — with price caps but no MFN Clause — the publishers already stood to make *less* money per ebook with Apple. Because Apple capped the ebook price of a $25 hardcover at $12.99 and took 30% of that price, publishers could only expect to make $8.75 per sale. But what the publishers sacrificed in short-term revenue, they hoped to gain in long-term **[**30]** stability by acquiring more control over pricing and, accordingly, the ability to protect their hardcover sales.

The MFN Clause changed the situation by making it imperative, not merely desirable, that the publishers wrest control over pricing from ebook retailers generally. Under the MFN, if Amazon stayed at a wholesale model and continued to sell ebooks at $9.99, the publishers would be forced to sell in the iBookstore, too, at that same $9.99 price point. The result would be the worst of both worlds: *lower* short-term revenue and *no* control over pricing. The publishers recognized that, as a practical matter, this meant that the MFN Clause would force them to move Amazon to an agency relationship. As Reidy put it, her company would need to move all its other ebook retailers to

[4] Cue testified at trial that his reference to "solv[ing] the Amazon issue" denoted **[**27]** the proposal to price ebooks in the iBookstore above $9.99, and was not a reference to raising prices across the industry or wresting control over pricing from Amazon. In this and other respects, the district court found Cue's testimony to be "not credible" — a determination that, on this record, is in no manner erroneous, much less clearly so. *Id. at 661 n.19*. As the district court put it, "Apple's pitch to the Publishers was — from beginning to end — a vision for a new industry-wide price schedule." *Id.*

agency "unless we wanted to make even less money" in this growing market. *Apple, 952 F. Supp. 2d at 666* (internal quotation marks omitted). This situation also gave each of the publishers a stake in Apple's quest to have a critical mass of publishers join the iBookstore because, "[w]hile no one Publisher could effect an industry-wide shift in prices or change the public's perception of a book's value, if they moved together they could." *Id. at 665*; *see also* J.A. 1981.

Apple understood **[**31]** this dynamic as well. As the district court found, "Apple did not change its thinking" when it replaced the explicit requirement that the publishers move other retailers to an agency model with the MFN. Indeed, in the following weeks, Apple assiduously worked to make sure that the shift to agency occurred. *Apple, 952 F. Supp. 2d at 663*. But Apple also understood that, as Cue bluntly put it, "any decent MFN forces the model" away from wholesale and to agency. *Id.* (internal quotation marks omitted). Or as the district court found, "the MFN protected Apple from retail price competition as it punished a Publisher if it failed to impose agency terms on other e-tailers." *Id. at 665*.

Thus, the terms of the negotiation between Apple and the publishers became clear: Apple wanted quick and successful entry into the ebook market and to eliminate retail price competition with Amazon. In exchange, it offered the publishers an opportunity "to confront Amazon as one of an organized group . . . united in an effort to eradicate the $9.99 price point." *Id. at 664*. Both sides needed a critical mass of publishers to achieve their goals. The MFN played a pivotal role in this *quid pro quo* by "stiffen[ing] the spines of the [publishers] to ensure that they would **[**32]** demand new terms from Amazon," and protecting Apple from retail price competition. *Id. at 665*.

4. Final Negotiations

The proposed Contracts sparked intense negotiations as Cue's team raced to assemble enough publishers to announce the iBookstore by January 27. The publishers' first volley was to push back on Apple's price caps, which they recognized would become the "standard across the industry" for pricing.[5] J.A. 571. In a set **[*306]** of meetings between January 13 and 14, the majority of the Big Six expressed a general willingness to adopt an agency model, but refused to do so with the price limits Apple demanded. Cue responded by asking Jobs for permission to create a more lenient price cap system. Under this new regime, *New York Times* bestsellers could sell for $14.99 if the hardcover was listed above $30, and for $12.99 if listed below that price. As for new releases, a $12.99 cap would apply to hardcovers priced between $25 and $27.50; a $14.99 cap would apply to hardcovers selling for up to $30; and, if the hardcover sold for over $30, publishers could sell the ebook for between $16.99 and $19.99. Jobs responded that he could "live with" the pricing "as long as [the publishers] move Amazon to **[**33]** the agen[cy] model too." J.A. 499.

Cue proposed this new pricing regime to the Big Six on January 16 and, with only 11 days remaining before the iPad launch, turned up the pressure. In each email conveying the new prices, Cue reminded the publishers that, if they did not agree to the iBookstore by the 27th, other companies, including Amazon and Barnes & Noble, would certainly build their own book store apps for the iPad. Correspondence from within the publishing companies also shows that Cue promoted the proposal as the "best chance for publishers to challenge the 9.99 price point," and emphasized that Apple would "not move forward with the store [unless] 5 of the 6 [major publishers] signed the agreement." J.A. 522-23. As Cue said at trial, he attempted to "assure [the publishers] that they weren't going to be alone, so that [he] would take the fear awa[y] of the Amazon retribution that they were all afraid of." J.A. 2068 (internal quotation marks omitted). "The Apple **[**34]** team reminded the Publishers," as the district court found, "that this was a rare opportunity for them to achieve control over pricing." *Apple, 952 F. Supp. 2d at 664*.

---

[5] As one HarperCollins executive put it, the "upshot" of moving to the agency model and adopting price caps was that "Apple would control price and that price would be standard across the industry." *Apple, 952 F. Supp. 2d at 670* (internal quotation marks omitted).

By January 22, two publishers — Simon & Schuster and Hachette — had verbally committed to join the iBookstore, while a third, Penguin, had agreed to Apple's terms in principle. As for the others, Cue was frustrated that they kept "chickening out" because of the "dramatic business change" that Apple was proposing. J.A. 547. To make matters worse, "[p]ress reports on January 18 and 19 alerted the publishing world and Amazon to the Publishers' negotiations with Apple," *Apple, 952 F. Supp. 2d at 670-71*, and Amazon learned from Random House that it was facing "pressure from other publishers . . . to move to [the] agency model because Apple had made it clear that unless all of the Big Six participated, they wouldn't bother with building a bookstore," J.A. 1520. Representatives from Amazon descended on New York for a set of long-scheduled meetings with the publishers. As the district court found, "[i]n separate conversations on January 20 and over the next few days, the Publisher Defendants all told Amazon that they wanted to change to an agency distribution model with Amazon." *Apple, 952 F. Supp. 2d at 672*.

Macmillan, however, **[**35]** presented an issue for Apple. The district court found that at a January 20 lunch between John Sargent and Amazon, Sargent "announced that Macmillan was planning to offer Amazon the option to choose either an agency [or wholesale] model." *Id.* But at dinner with Cue that night, according to the district court, Cue made sure that Sargent understood **[*307]** the consequences of the MFN, explaining "that Macmillan had no choice but to move Amazon to an agency model if it wanted 1 to sign an agency agreement with Apple."[6] *Id.* The next day, Sargent emailed Cue to express his continued reservations about switching Macmillan's other retailers to an agency relationship.

With the iPad launch fast approaching, Cue enlisted the help of others. Cue had received an email from Simon & Schuster's Carolyn Reidy, who had already verbally committed to Apple's terms and whom Cue would later call **[**36]** the "real leader of the book industry," moments after hearing from Sargent. J.A. 621. Cue then spoke with Reidy for twenty minutes before reaching out to Brian Murray, who, as the district court found, "was fully supportive of the requirement that all e-tailers be moved to an agency model." *Apple, 952 F. Supp. 2d at 673 n.39*. After the discussions, Cue asked Sargent to speak with both Reidy and Murray. Sargent complied, and "spoke to both Murray and Reidy by telephone for eight and fifteen minutes, respectively." *Id. at 673*. Minutes later, Sargent called the Amazon representative to inform him that Macmillan planned to sign an agreement that "required" the company to conduct business with Amazon through an agency model. *Id.* By January 23, Macmillan had verbally agreed to join the iBookstore.

Cue followed a similar strategy with Penguin. While Penguin's CEO David Shanks agreed to Apple's terms on January 22, he informed Cue that he would join the iBookstore only if four other publishers agreed to participate. By January 25, Apple had signatures from three publishers but Penguin was still noncommittal. Cue called Shanks, and the two spoke for twenty minutes. "Less than an hour [later], Shanks called Reidy to discuss Penguin's **[**37]** status in its negotiations with Apple." *Id. at 675*. Penguin signed the Contract that afternoon.

HarperCollins was the fifth, and final, publisher to agree in principle to Apple's proposal. Murray, its CEO, "remained unhappy over the size of Apple's commission and the existence of price caps." *Id. at 673 n.39*. Unable to negotiate successfully with Murray, Cue asked Jobs to contact James Murdoch, the CEO of the publisher's parent company, and "tell him we have 3 signed so there is no leap of faith here." *Id. at 675* (internal quotation marks omitted). After a series of emails, Jobs summarized Apple's position to Murdoch:

> [W]e simply don't think the ebook market can be successful with pricing higher than $12.99 or $14.99. Heck, Amazon is selling these books at $9.99, and who knows, maybe they are right and we will fail even at $12.99. But we're willing to try at the prices we've proposed. . . . As 1 I see it, [HarperCollins] has the following choices: (1) Throw in with [A]pple and see if we can all make a go of this to create a real mainstream ebooks market at $12.99 and $14.99. (2) Keep going with Amazon at $9.99. You will make a bit more money in the short term, but in the medium term Amazon will tell you they will be paying **[**38]** you 70% of $9.99. They have

[6] Although Cue denied discussing the MFN that night, the district court found this testimony not credible in light of Cue's deposition testimony and his contemporaneous email to Jobs that Sargent had "legal concerns over the price-matching." *Apple, 952 F. Supp. 2d at 672 n.38* (internal quotation marks omitted). This determination was not clearly erroneous.

> shareholders too. (3) Hold back your books from Amazon. Without a way for customers to buy your ebooks, they will steal them.

[*308] *Id. at 677*. Cue also emailed Murray to inform him that four other publishers had signed their agreements. Murray then called executives at both Hachette and Macmillan before agreeing to Apple's terms.

As the district court found, during the period in January during which Apple concluded its agreements with the Publisher Defendants, "Apple kept the Publisher Defendants apprised about who was in and how many were on board."[7] *Id. at 673*. The Publisher Defendants also kept in close communication. As the district court noted, "[i]n the critical negotiation period, over the three days between January 19 and 21, Murray, Reidy, Shanks, Young, and Sargeant called one another 34 times, with 27 calls exchanged on January 21 alone." *Id. at 674*.

By the January 27 iPad launch, five of the Big Six — Hachette, HarperCollins, Macmillan, Penguin, and Simon & Schuster — had agreed **[**39]** to participate in the iBookstore. The lone holdout, Random House, did not join because its executives believed it would fare better under a wholesale pricing model and were unwilling to make a complete switch to agency pricing. Steve Jobs announced the iBookstore as part of his presentation introducing the iPad. When asked after the presentation why someone should purchase an ebook from Apple for $14.99 as opposed to $9.99 with Amazon or Barnes & Noble, Jobs confidently replied, "[t]hat won't be the case . . . the price will be the same. . . . [P]ublishers will actually withhold their [e]books from Amazon . . . because they are not happy with the price."[8] A day later, Jobs told his biographer the publishers' position with Amazon: "[y]ou're going to sign an agency contract or we're not going to give you the books." J.A. 891 (internal quotation marks omitted).

E. Negotiations with Amazon

Jobs's boast proved to be prophetic. While the Publisher Defendants were signing Apple's Contracts, they were also informing Amazon that they planned on changing the **[**40]** terms of their agreements with it to an agency model. However, their move against Amazon began in earnest on January 28, the day after the iPad launch. That afternoon, John Sargent flew to Seattle to deliver an ultimatum on behalf of Macmillan: that Amazon would switch its ebook sales agreement with Macmillan to an agency model or suffer a seven-month delay in its receipt of Macmillan's new releases.[9] Amazon responded by removing the option to purchase Macmillan's print and ebook titles from its website.

Sargent, as the district court found, had informed Cue of his intention to confront Amazon before ever leaving for *Seattle.*[10] ***[*309]*** *Apple, 952 F. Supp. 2d at 678*. On his return, he emailed Cue to inform him about Amazon's decision to remove Macmillan ebooks from Kindle, adding a note to say that he wanted to "make sure you are in the loop." J.A. 640. Sargent also wrote a public letter to Macmillan's authors and agents, describing the Amazon negotiations. Hachette's Arnaud Nourry emailed the CEO of Macmillan's parent **[**41]** company to express his

---

[7] Indeed, on the morning of January 21, Apple's initial deadline for the publishers to commit to agency, Simon & Schuster's Reidy emailed Cue to get "an update on your progress in herding us cats." J.A. 543.

[8] On January 29, Simon & Schuster's general counsel wrote to Reidy that she "[could not] believe that Jobs made [this] statement," which she considered "[i]ncredibly stupid." J.A. 638.

[9] As the district court found, "[s]even months was no random period — it was the number of months for which titles were designated New Release titles under the Apple Agreement and restrained by the Apple price caps and MFN." *Apple, 952 F. Supp. 2d at 679*.

[10] At trial, Cue claimed he had no advance knowledge of Sargent's plan to go to Seattle, but the district court found this testimony to be incredible. Sargent had emailed Cue about his trip days before the meeting took place. Moreover, on January 28, the day of the meeting, Jobs told his biographer that the Publisher Defendants "went to Amazon and said, 'You're going to sign an agency contract or we're not going to give you the books.'" *Apple*, 952 F. Supp. 2d at 678 n.47. The district court's assessment of Cue's credibility was not clearly erroneous.

"personal support" for Macmillan's actions and to "ensure [him] that [he was] not going to find [his] company alone in the battle." J.A. 643. A Penguin executive wrote to express similar support for Macmillan's position.

The district court found that while Amazon was "opposed to adoption of the agency model and did not want to cede pricing authority to the Publishers," it knew that it could not prevail in this position against five of the Big Six. Apple, 952 F. Supp. 2d at 671, 680. When Amazon told Macmillan that it would be willing to negotiate agency terms, Sargent sent Cue an email titled "URGENT!!" that read: "Hi Eddy, I am gonna need to figure out our final agency terms of sale **[**42]** tonight. Can you call me please?" J.A. 642. Cue and Sargent spoke that night and, while Cue denied at trial that the conversation concerned Macmillan's negotiations with Amazon, the district court found that "his denial was not credible."[11] Apple, 952 F. Supp. 2d at 681 n.52. By February 5, Amazon had agreed to agency terms with Macmillan.

The other publishers who had joined the iBookstore quickly followed Macmillan's lead. On February 11, Reidy wrote to the head of CBS that Simon & Schuster was beginning agency negotiations with Amazon. She informed him that she was trying to "delay" negotiations because it was "imperative . . . that the other publishers with whom Apple has announced deals push for resolution on their term changes" at the same time, "thus not leaving us out there alone." J.A. 701. Each of the Publisher Defendants then informed Amazon that they were under tight deadlines to negotiate new agency agreements, and kept one another informed about the details of their negotiations. As David Naggar, one of Amazon's negotiators, testified, **[**43]** whenever Amazon "would make a concession on an important deal point," it would "come back to us from another publisher asking for the same thing or proposing similar language." J.A. 1491.

Once again, Apple closely monitored the negotiations with Amazon. The Publisher Defendants would inform Cue when they had completed agency agreements, and his team monitored price changes on the Kindle. When Penguin languished 1 behind the others, Cue informed Jobs that Apple was "changing a bunch of Penguin titles to 9.99" in the iBookstore "because they didn't get their Amazon deal done." Apple, 952 F. Supp. 2d at 682 (internal quotation marks omitted). By March 2010, Macmillan, HarperCollins, Hachette, and Simon & Schuster had completed agency agreements with Amazon. When Penguin completed its deal in June, the company's executive proudly announced to Cue that "[t]he playing field is now level." *Id.* (internal quotation marks omitted).[12]

[*310] F. Effect on Ebook Prices

As Apple and the Publisher Defendants expected, the iBookstore price caps quickly became **[**44]** the benchmark for ebook versions of new releases and *New York Times* bestsellers. In the five months following the launch of the iBookstore, the publishers who joined the marketplace and switched Amazon to an agency model priced 85.7% of new releases on Kindle and 92.1% of new releases on the iBookstore at, or just below, the price caps. Apple, 952 F. Supp. 2d at 682. Prices for *New York Times* bestsellers took a similar leap as publishers began to sell 96.8% of their bestsellers on Kindle and 99.4% of their bestsellers on the iBookstore at, or just below, the Apple price caps. *Id.* During that same time period, Random House, which had not switched to an agency model, saw virtually no change in the prices for its new releases or *New York Times* bestsellers.

The Apple price caps also had a ripple effect on the rest of the Publisher Defendants' catalogues. Recognizing that Apple's price caps were tied to the price of hardcover books, many of these publishers increased the prices of their newly released *hardcover* books to shift the ebook version into a higher price category. Id. at 683. Furthermore, because the Publisher Defendants who switched to the agency model expected to make less money per sale than under the wholesale **[**45]** model, they also increased the prices on their ebooks that were *not* new releases or

[11] As the district court noted, Macmillan had executed its Contract with Apple a week earlier, so that "the only final agency terms still under discussion were with Amazon." Apple, 952 F. Supp. 2d at 681 n.52.

[12] Eventually, the Publisher Defendants negotiated agency agreements with Barnes & Noble, and later Google. Random House also adopted the agency model, and joined the iBookstore, in early 2011.

bestsellers to make up for the expected loss of revenue.[13] Based on data from February 2010 — just before the Publisher Defendants switched Amazon to agency pricing — to February 2011, an expert retained by the Justice Department observed that the weighted average price of the Publisher Defendants' new releases increased by 24.2%, while bestsellers increased by 40.4%, and other ebooks increased by 27.5%, for a total weighted average ebook price increase of 23.9%.[14] Indeed, even Apple's expert agreed, noting that, over a two-year period, the Publisher Defendants increased their average prices for hardcovers, new releases, and other ebooks.

Increasing prices reduced demand for the Publisher Defendants' ebooks. According to one of Plaintiffs' experts, the publishers who switched to agency **[**46]** sold 77,307 fewer ebooks over a two-week period after the switch to agency than in a comparable two-week period before the switch, which amounted to selling 12.9% fewer units. *Id. at 684*. Another expert relied on data from Random House to estimate how many ebooks the Publisher Defendants who switched Amazon to agency would have sold had they stayed with the wholesale model, and concluded that the agency switch and price increases led to 14.5% fewer sales. *Id.*

Significantly, these changes took place against the backdrop of a rapidly changing ebook market. Amazon introduced the Kindle in November 2007, just over two years before Apple launched the iPad in January 2010. During that short period, Apple estimated that the market grew from $70 million in ebook sales in 2007 to $280 million in 2009, and the company projected those figures to grow significantly in following years. Apple's expert witnesses argued that overall ebook sales continued to grow in the two years after the **[*311]** creation of the iBookstore and that the average ebook price fell during those years. But as Plaintiffs' experts pointed out, the ebook market had been expanding rapidly even before Apple's entry and average prices had been **[**47]** falling as lower-end publishers entered the market and larger numbers of old books became available in digital form. "Apple's experts did not present any analysis that attempted to control for the many changes that the e-book market was experiencing during these early years of its growth," *Apple, 952 F. Supp. 2d at 685*, nor did they estimate how the market would have grown *but for* Apple's agreement with the Publisher Defendants to switch to an agency model and raise prices. To the contrary, the undisputed fact that the Publisher Defendants raised prices on their ebooks, which accounted for roughly 50% of the trade ebook market in the first quarter of 2010, necessitated "a finding that the actions taken by Apple and the Publisher Defendants led to an increase in the price of e-books." *Id.*

Finally, in response to the dissent's claim that Apple's conduct "deconcentrat[ed] . . . the e-book retail market" and thus was "pro-competitive," Dissenting Op. at 31, it is worth noting that the district court's economic analysis and the parties' submissions at trial focused entirely on the price and sales figures for trade ebooks. This is because both parties agreed that the relevant market in this case is "the trade e-books market, not the **[**48]** e-reader market or the 'e-books system' market." *United States v. Apple, Inc., 889 F. Supp. 2d 623, 642 (S.D.N.Y. 2012)*; *Apple, 952 F. Supp. 2d at 694 n.60*. The district court did not analyze the state of competition between ebook *retailers* or determine that Amazon's pricing policy acted, as the dissent accuses, as a "barrier[] to entry" for other potential retailers. Dissenting Op. at 24, 30.

II. Procedural History

On April 11, 2012, Plaintiffs filed a pair of civil antitrust actions in the United States District Court for the Southern District of New York. The complaints alleged that Apple and the Publisher Defendants — Hachette, HarperCollins, Macmillan, Penguin, and Simon & Schuster — conspired to raise, fix, and stabilize the retail price for newly released and bestselling trade ebooks in violation of *§ 1 of the Sherman Act* and various state laws. The litigation then proceeded along two separate trajectories, one for the Publisher Defendants and the other for Apple.

---

[13] The five Publisher Defendants accounted for 48.8% of all retail trade ebook sales in the United States during the first quarter of 2010.

[14] A weighted average price controls for the fact that different ebooks sell in different quantities by dividing the total price that consumers paid for ebooks by the total number of ebooks sold.

A. Publisher Defendants

Hachette, HarperCollins, and Simon & Schuster agreed to settle with DOJ by signing consent decrees on the same day that the Justice Department filed its complaint. Pursuant to the Tunney Act, *15 U.S.C. § 16 et seq.*, "at least 60 days prior to the effective date" of a consent judgment, the United States must file a "competitive **[**49]** impact statement," which includes, *inter alia*, "the nature and purpose of the proceeding," "a description of the practices or events giving rise to the alleged violation of the antitrust laws," and an explanation of the relief obtained by the consent judgment "and the anticipated effects on competition of such relief." *Id. § 16(b)*. In compliance with these requirements, DOJ issued a competitive impact statement that outlined the remedies it planned to impose on Hachette, HarperCollins, and Simon & Schuster. Two of those proposed remedies required that, for two years, the three publishers "not restrict, limit, or impede an E-book Retailer's ability to set, alter, or reduce the Retail Price of any E-book or to offer price discounts or any other form of promotions," and that they not "enter into any agreement" with retailers **[*312]** that limit such practices. J.A. 1126-27.

After the 60-day comment period, the Justice Department moved in the district court for a decision that "the entry of the judgment is in the public interest," *15 U.S.C. § 16(e)*, and for approval of the consent decree. In defense of the two-year limitations provisions, DOJ explained that the Publisher Defendants had used retail price restrictions to **[**50]** "effectuat[e] the conspiracy" and that two years was sufficient to "allow movement in the marketplace away from collusive conditions" without "alter[ing] the ultimate development of the competitive landscape in the still-evolving e-books industry." J.A. 1054-55. On September 5, 2012, the district court approved the consent decree and found the two-year ban on retail-price restrictions "wholly appropriate given the Settling Defendants' alleged abuse of such provisions . . . , the Government's recognition that such terms are not intrinsically unlawful, and the nascent state of competition in the e-books industry." J.A. 1088.

The remaining Publisher Defendants, Penguin and Macmillan, settled in quick succession. On December 18, 2012, Penguin agreed to a consent decree with essentially the same terms that Hachette, HarperCollins, and Simon & Schuster received. A few months later, in February 2013, Macmillan also agreed to settle. The terms of Macmillan's consent decree contained slight modifications. Rather than delaying the prohibition on retail discounts until the court approved the decree, DOJ required Macmillan to begin compliance within three days of signing the decree. In exchange, the Justice Department **[**51]** agreed to back-date the beginning of the limitations period to December 18, 2012 and to reduce its length from two years to 23 months, explaining that "[c]onsumers are better served by bringing more immediate retail price competition to the market" and that a "23-month cooling-off period is sufficient" to restore competition. J.A. 1162-63. The district court approved Penguin's consent decree on May 17, 2013, and Macmillan's on August 12, 2013.

B. Apple

Unlike the Publisher Defendants, Apple opted to take the case to trial. Fact and expert discovery concluded on March 22, 2013 and, after filing pretrial motions, the parties agreed to a bench trial on Apple's liability and injunctive relief, to be followed by a separate trial on damages on the state claims if the states prevailed.

On July 10, 2013, after conducting a three-week bench trial, the district court concluded that Apple had violated *§ 1 of the Sherman Act* and various state antitrust laws. In brief, the court found that Apple "orchestrat[ed]" a conspiracy among the Publisher Defendants to "eliminate retail price competition [in the e-book market] in order to raise the retail prices of e-books." *Apple, 952 F. Supp. 2d at 697*. Because this conspiracy consisted of a group of competitors **[**52]** — the Publisher Defendants — assembled by Apple to increase prices, it constituted a "horizontal price-fixing conspiracy" and was a *per se* violation of the Sherman Act. *Id. at 694*. It concluded, moreover, that even if the agreement to raise prices and eliminate retail price competition were analyzed under the rule of reason, it would still constitute an unreasonable restraint of trade in violation of *§ 1*. *Id.* In the district court's view, Plaintiffs' experts persuasively demonstrated that the agreement facilitated an "across-the board price increase in e-books sold by the Publisher Defendants" and a corresponding drop in sales. *Id.* Apple, on the other hand, failed to show that "the execution of the Agreements," as opposed to the launch of the iPad and "evolution of

[*313] digital publishing more generally" (which were independent of the Agreements), "had any pro-competitive effects." *Id.*

After the district court issued its liability decision, the parties submitted briefing on injunctive relief. The court conducted a hearing on the issue and, on September 5, 2013, issued a final injunctive order against Apple and entered final judgment. The injunctive order consists of four categories of relief: (1) "Prohibited **[**53]** Conduct," which prevents Apple from enforcing MFNs with ebook publishers, retaliating against publishers for signing agreements with other retailers, or agreeing with any of the Publisher Defendants to restrict, limit, or impede Apple's ability to set ebook retail prices; (2) "Required Conduct," which, among other things, forces Apple to modify its agency agreements with the Publisher Defendants and to treat ebook apps sold in the iTunes store like any other app sold there; (3) "Antitrust Compliance," which requires Apple to improve its internal system for preventing antitrust violations; and (4) "External Compliance Monitor[ing]," which allows the court to appoint an external monitor to ensure Apple's compliance with the injunctive order.

After the entry of the district court's injunctive order, Apple, Macmillan, and Simon & Schuster filed this appeal. The parties have not yet conducted a trial to assess the damages stemming from the state antitrust claims.

DISCUSSION

HN2[] To hold a defendant liable for violating *§ 1* of the Sherman Act, a district court must find "a combination or some form of concerted action between at least two legally distinct economic entities" that "constituted an unreasonable restraint **[**54]** of trade." *Capital Imaging Assocs. v. Mohawk Valley Med. Assocs., 996 F.2d 537, 542 (2d Cir. 1993)*; *see* *15 U.S.C. § 1*. On appeal, Apple challenges numerous aspects of the district court's *§ 1* analysis and also contends that the injunctive order that the district court imposed on the company is unlawful. Macmillan and Simon & Schuster have joined Apple's challenge to the injunction, arguing that it impermissibly interferes with their consent decrees and is barred by the doctrine of judicial estoppel. We conclude that the district court's liability determination was sound and its injunctive order lawful. We therefore affirm the judgment of the district court.

I. Standard of Review

HN3[] Following a bench trial, this Court reviews the "district court's findings of fact for clear error" and its "conclusions of law and mixed questions *de novo*." *Connors v. Conn. Gen. Life Ins. Co., 272 F.3d 127, 135 (2d Cir. 2001)*; *see* *Fed. R. Civ. P. 52(a)*. The district court's evidentiary rulings and its fashioning of equitable relief are reviewed for abuse of discretion. *See* *Zerega Ave. Realty Corp. v. Hornbeck Offshore Transp., LLC, 571 F.3d 206, 212-13 (2d Cir. 2009)* (evidentiary rulings); *Abrahamson v. Bd. of Educ. Of the Wappingers Falls Cent. Sch. Dist., 374 F.3d 66, 76 (2d Cir. 2004)* (equitable relief).

II. Apple's Liability Under § 1

This appeal requires us to address ***HN4***[] the important distinction between "horizontal" agreements to set prices, which involve coordination "between competitors at the same level of [a] market structure," and "vertical" agreements on pricing, which are created between **[**55]** parties "at different levels of [a] market structure." *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 182 (2d Cir. 2012)* (internal quotation marks omitted). Under *§ 1* of the Sherman Act, the former are, with limited exceptions, *per se* unlawful, while the latter are unlawful only if an assessment of market effects, known as a rule-of-reason **[*314]** analysis, reveals that they unreasonably restrain trade. *See* *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 893, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*.

Although this distinction is sharp in theory, determining the orientation of an agreement can be difficult as a matter of fact and turns on more than simply identifying whether the participants are at the same level of the market structure. For instance, HN5[] courts have long recognized the existence of "hub-and-spoke" conspiracies in which an entity at one level of the market structure, the "hub," coordinates an agreement among competitors at a different level, the "spokes." Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 255 (3d Cir. 2010); *see also* Toys "R" Us, Inc. v. FTC, 221 F.3d 928, 932-34 (7th Cir. 2000). These arrangements consist of *both* vertical agreements between the hub and each spoke and a horizontal agreement among the spokes "to adhere to the [hub's] terms," often because the spokes "would not have gone along with [the vertical agreements] except on the understanding that the other [spokes] were agreeing to the same thing." VI Phillip E. Areeda & Herbert Hovenkamp, **[**56]** ***Antitrust Law*** ¶ 1402c (3d ed. 2010) (citing PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101 (2d Cir. 2002)); *see also* Am. Bar Ass'n, ***Antitrust Law*** *Developments* 24-26 (6th ed. 2007); XII Areeda & Hovenkamp, *supra*, ¶ 2004c.[15]

Apple characterizes its Contracts with the Publisher Defendants as a series of parallel but independent vertical agreements, a characterization that forms the basis for its two primary arguments against the district court's decision. First, Apple argues that the district court impermissibly inferred its involvement in a horizontal price-fixing conspiracy from the Contracts themselves. Because (in Apple's view) the Contracts were vertical, lawful, and in Apple's independent economic interest, the mere fact that Apple agreed to the same terms with multiple publishers cannot establish that Apple consciously organized a conspiracy among the Publisher Defendants to raise consumer-facing ebook prices — even if the *effect* of its Contracts was to raise those prices. Second, Apple argues that, even if it did orchestrate a horizontal price-fixing conspiracy, its conduct **[**57]** should not be subject to *per se* condemnation. According to Apple, proper application of the rule of reason reveals that its conduct was not unlawful.

For the reasons set forth below, we reject these arguments. On this record, the district court did not err in determining that Apple orchestrated an agreement with and among the Publisher Defendants, in characterizing this agreement as a horizontal price fixing-conspiracy, or in holding that the conspiracy unreasonably restrained trade in violation of § 1 of the Sherman Act.

A. The Conspiracy with the Publisher Defendants

HN6[] Section 1 of the Sherman Act bans restraints on trade "effected by a contract, combination, or conspiracy." Bell Atl. Corp. v. Twombly, 550 U.S. 544, 553, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007) (internal quotation marks omitted). The first "crucial question in a Section 1 case is therefore whether the challenged conduct 'stem[s] from independent decision or from **[*315]** an agreement, tacit or express.'" Starr v. Sony BMG Music Entm't, 592 F.3d 314, 321 (2d Cir. 2010) (alteration in original) (quoting Theatre Enters., Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 540, 74 S. Ct. 257, 98 L. Ed. 273 (1954)).

HN7[] Identifying the existence and nature of a conspiracy requires determining whether the evidence "reasonably tends to prove that the [defendant] and others had a conscious commitment to a common scheme designed to achieve an unlawful objective." Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984) (internal quotation marks omitted). Parallel action is not, **[**58]** by itself, sufficient to prove the existence of a conspiracy; such behavior could be the result of "coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties." Twombly, 550 U.S. at 556 n.4 (internal quotation marks omitted). Indeed, parallel behavior that does not result from an agreement is not unlawful even if it is anticompetitive. *See* In re Text Messaging Antitrust Litig., 782 F.3d 867, 873-79 (7th Cir. 2015); In re Flat Glass Antitrust Litig., 385 F.3d 350, 360-61 (3d Cir. 2004). Accordingly, to prove an antitrust conspiracy, "a plaintiff must show the existence of additional circumstances, often referred to as 'plus'

---

[15] In this sense, the "hub-and-spoke" metaphor is somewhat inaccurate — the plaintiff must also prove the existence of a "rim" to the wheel in the form of an agreement among the horizontal competitors. *See* Dickson v. Microsoft Corp., 309 F.3d 193, 203-04 (4th Cir. 2002).

factors, which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy." *Apex Oil Co. v. DiMauro, 822 F.2d 246, 253 (2d Cir. 1987)*.

HN8[] These additional circumstances can, of course, consist of "direct evidence that the defendants entered into an agreement" like "a recorded phone call in which two competitors agreed to fix prices." *Mayor & City Council of Baltimore, Md. v. Citigroup, Inc., 709 F.3d 129, 136 (2d Cir. 2013)*. But plaintiffs may also "present circumstantial facts supporting the *inference* that a conspiracy existed." *Id.* Circumstances that may raise an inference of conspiracy include "a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, and evidence **[**59]** of a high level of interfirm communications." *Id.* (internal quotation marks omitted). Parallel conduct alone may support an inference of conspiracy, moreover, if it consists of "complex and historically unprecedented changes in pricing structure made at the very same time by multiple competitors, and made for no other discernible reason." *Id. at 137* (internal quotation marks omitted).

HN9[] Because of the risk of condemning parallel conduct that results from independent action and not from an actual unlawful agreement, the Supreme Court has cautioned against drawing an inference of conspiracy from evidence that is equally consistent with independent conduct as with illegal conspiracy — or, as the Court has called it, "ambiguous" evidence. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 597 n.21, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. Thus, a finding of conspiracy requires "evidence that tends to exclude the possibility" that the defendant was "acting independently." *Monsanto, 465 U.S. at 764*. This requirement, however, "[does] not mean that the plaintiff must disprove all nonconspiratorial explanations for the defendants' conduct"; rather, the evidence need only be sufficient "to allow a reasonable fact finder to infer that the conspiratorial explanation is more likely than not." *In re Publ'n Paper Antitrust Litig., 690 F.3d 51, 63 (2d Cir. 2012)* (quoting Phillip E. Areeda & Herbert **[**60]** Hovenkamp, *Fundamentals of* ***Antitrust Law*** § 14.03(b), at 14-25 (4th ed. 2011)); *accord* *Matsushita,* ***[*316]*** *475 U.S. at 588* (requiring that "the inference of conspiracy is reasonable in light of the competing inferences of independent action"); *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 655-56 (7th Cir. 2002)*.

Apple portrays its Contracts with the Publisher Defendants as, at worst, "unwittingly facilitat[ing]" their joint conduct. Apple Br. at 23. All Apple did, it claims, was attempt to enter the market on profitable terms by offering contractual provisions — an agency model, the MFN Clause, and tiered price caps — which ensured the company a small profit on each ebook sale and insulated it from retail price competition. This had the *effect* of raising prices because it created an incentive for the Publisher Defendants to demand that Amazon adopt an agency model and to seize control over consumer-facing ebook prices industry-wide. But although Apple knew that its contractual terms would entice the Publisher Defendants (who wanted to do away with Amazon's $9.99 pricing) to seek control over prices from Amazon and other ebook retailers, Apple's success in capitalizing on the Publisher Defendants' preexisting incentives, it contends, does not suggest that it joined a *conspiracy* among the Publisher Defendants to raise prices. **[**61]** In sum, Apple's basic argument is that because its Contracts with the Publisher Defendants were fully consistent with its independent business interests, those agreements provide only "ambiguous" evidence of a § 1 conspiracy, and the district court therefore erred under *Matsushita* and *Monsanto* in inferring such a conspiracy.

We disagree. At the start, Apple's benign portrayal of its Contracts with the Publisher Defendants is not persuasive — not because those Contracts themselves were independently unlawful, but because, in context, they provide strong evidence that Apple consciously orchestrated a conspiracy among the Publisher Defendants. As explained below, and as the district court concluded, Apple understood that its proposed Contracts were attractive to the Publisher Defendants *only* if they collectively shifted their relationships with Amazon to an agency model — which Apple knew would result in higher consumer-facing ebook prices. In addition to these Contracts, moreover, ample additional evidence identified by the district court established both that the Publisher Defendants' shifting to an agency model with Amazon was the result of express collusion among them and that Apple consciously **[**62]** played a key role in organizing that collusion. The district court did not err in concluding that Apple was more than an innocent bystander.

Apple offered each Big Six publisher a proposed Contract that would be attractive only if the publishers acted collectively. Under Apple's proposed agency model, the publishers stood to make less money per sale than under their wholesale agreements with Amazon, but the Publisher Defendants were willing to stomach this loss because the model allowed them to sell new releases and bestsellers for more than $9.99. Because of the MFN Clause, however, each new release and bestseller sold in the iBookstore would cost only $9.99 as long as Amazon continued to sell ebooks at that price. So in order to receive the perceived benefit of Apple's proposed Contracts, the Publisher Defendants had to switch *Amazon* to an agency model as well — something no individual publisher had sufficient leverage to do on its own. Thus, each Publisher Defendant would be able to accomplish the shift to agency — and therefore have an incentive to sign Apple's proposed Contracts — *only* if it acted in tandem with its competitors. *See* Starr, 592 F.3d at 324; Flat Glass, 385 **[*317]** F.3d at 360-61; *see also* J.A. 1974 (noting that the agreements would "not fix the **[**63]** publishers' problems" if they could not move Amazon to an agency model). By the very act of signing a Contract with Apple containing an MFN Clause, then, each of the Publisher Defendants signaled a clear commitment to move against Amazon, thereby facilitating their collective action. As the district court explained, the MFNs "stiffened the spines" of the Publisher Defendants. Apple, 952 F. Supp. 2d at 665.

As a sophisticated negotiator, Apple was fully aware that its proposed Contracts would entice a critical mass of publishers only if these publishers perceived an opportunity collectively to shift Amazon to agency.[16] In fact, this was the very purpose of the MFN, which Apple's Saul devised as an elegant alternative to a provision that would have explicitly *required* the publishers to adopt an agency model with other retailers. As Cue put it, the MFN "force[d] the model" from wholesale to agency. J.A. 865. Indeed, the MFN's capacity for forcing collective action by the publishers was precisely what enabled Jobs to predict with confidence that "the price will be the same" on the iBookstore and the Kindle when he announced the launch of the iPad — the same, Jobs said, because the publishers would make Amazon "sign . . . agency contract[s]" by threatening **[**64]** to withhold their ebooks. J.A. 891. Apple was also fully aware that once the Publisher Defendants seized control over consumer-facing ebook prices, those prices would rise. It knew from the outset that the publishers hated Amazon's $9.99 price point, and it put price caps in its agreements because it specifically anticipated that once the publishers gained control over prices, they would push them higher than $9.99, higher than Apple itself deemed "realistic." Apple, 952 F. Supp. 2d at 692 (internal quotation marks omitted).

On appeal, Apple nonetheless defends the Contracts that it proposed to the publishers as an "aikido move" that shrewdly leveraged market conditions to its own advantage. **[**65]** Apple Br. at 17. "[A]ikido move" or not, the attractiveness of Apple's offer to the Publisher Defendants hinged on whether it could successfully help organize them to force Amazon to an agency model and then to use their newfound collective control to raise ebook prices. ***HN10***[] The Supreme Court has defined an agreement for Sherman Act § 1 purposes as "a conscious commitment to a common scheme designed to achieve an unlawful objective." Monsanto, 465 U.S. at 764 (internal quotation marks omitted). Plainly, this use of the promise of higher prices as a bargaining chip to induce the Publisher Defendants to participate in the iBookstore constituted a conscious commitment to the goal of raising ebook prices. ***HN11***[] "***Antitrust law*** has never required identical *motives* among conspirators" when their independent reasons for joining together lead to collusive action. Spectators' Commc'n Network Inc. v. Colonial Country Club, 253 F.3d 215, 220 (5th Cir. 2001) (emphasis added). Put differently, "independent reasons" can also be "interdependent," and the fact that Apple's conduct was in its own economic interest in **[*318]** no way undermines the inference that it entered an agreement to raise ebook prices. VI Areeda & Hovenkamp, supra, ¶ 1413a (internal quotation marks omitted).

Nor was the Publisher Defendants' joint action against Amazon a result of parallel decisionmaking. **[**66]** As we have explained, ***HN12***[] conduct resulting solely from competitors' independent business decisions — and not from any "agreement" — is not unlawful under § 1 of the Sherman Act, even if it is anticompetitive. *See* Text

---

[16] Apple's argument on appeal that it did not have sufficient market power to coordinate the Publisher Defendants is beside the point. Market power may afford one means by which a company can coerce others to comply with its wishes, but brute force is not the only way to foster an agreement. Here, both Apple and the Publisher Defendants understood that Apple was in a position to "solve" the publishers' "Amazon problem" by helping them eliminate what they saw as a mortal threat to their businesses — namely, the $9.99 price point.

Messaging, 782 F.3d at 873-79. But to generate a permissible inference of agreement, a plaintiff need only present sufficient evidence that such agreement was more likely than not. On this record, the district court had ample basis to conclude that it was not equally likely that the near-simultaneous signing of Apple's Contracts by multiple publishers — which led to all of the Publisher Defendants moving against Amazon — resulted from the parties' independent decisions, as opposed to a "meeting of [the] minds." Monsanto, 465 U.S. at 765; *see Toys "R"* Us, 221 F.3d at 935-36 (holding that **HN13**[] exclusive-dealing agreements between a retailer and manufacturers that were contrary to the manufacturers' individual self-interest but consistent with their collective interest supported the inference of a horizontal conspiracy in which the retailer participated); VI Areeda & Hovenkamp, *supra*, ¶ 1425a, d (**HN14**[] "[A] conspiracy may be inferred if a defendant's action would have been contrary to its self-interest in the absence of advance agreement." *Id.* ¶ 1425a). That the Publisher Defendants were in constant **[**67]** communication regarding their negotiations with both Apple and Amazon can hardly be disputed. Indeed, Apple never seriously argues that the Publisher Defendants were not acting in concert.

Even so, Apple claims, it cannot have organized the conspiracy among the Publisher Defendants if it merely "unwittingly facilitated [their] joint conduct." Apple Br. at 23. But this argument founders — and dramatically so — on the factual findings of the district court. As the district court explained, Apple's Contracts with the publishers "must be considered in the context of the entire record." Apple, 952 F. Supp. 2d at 699. Even if Apple was unaware of the extent of the Publisher Defendants' coordination when it first approached them,[17] its subsequent communications with them as negotiations progressed show that Apple consciously played a key role in organizing their express collusion. From the outset, Cue told the publishers that Apple would launch its iBookstore only if a sufficient number of them agreed to participate and that each publisher would receive identical terms, assuring them that a critical mass of major publishers would be prepared to move against Amazon. Later on, Cue and his team kept the publishers updated **[**68]** about how many of their peers signed Apple's Contracts, and reminded them that it was offering "the best chance for publishers **[*319]** to challenge the 9.99 price point" before it became "cement[ed]" in "consumer expectations." J.A. 522. When time ran short, Apple coordinated phone calls between the publishers who had agreed and those who remained on the fence.[18] As Cue said at trial, Apple endeavored to "assure [the publishers] that they weren't going to be alone, so that [Apple] would take the fear awa[y] of the Amazon retribution that they were all afraid of." J.A. 2068.

Apple's involvement in the conspiracy continued even past the signing of its agency agreements. Before **[**70]** Sargent flew to Seattle to meet with Amazon, he told Cue. Apple stayed abreast of the Publisher Defendants' progress as they set coordinated deadlines with Amazon and shared information with one another during negotiations. Apple's communications with the Publisher Defendants thus went well beyond legitimately "exchang[ing] information" within "the normal course of business," Monsanto, 465 U.S. at 762-63 (internal quotation marks omitted), or "friendly banter among business partners," Apple Br. at 38; *see* Monsanto, 465 U.S. at 765-66

---

[17] Apple endeavors to draw the district court's factfinding into doubt by asserting, erroneously, that the "bedrock of the court's entire decision" hinges on its supposed determination that Apple, knowing that the publishers had been coordinating beforehand, joined a preexisting conspiracy to raise prices at its initial meetings with the Publisher Defendants — a proposition that, it says, is unsupported by the record. The district court, however, did *not* find that Apple joined an ongoing conspiracy in late 2009, but merely observed that Apple went into its initial meetings with the understanding that the Publisher Defendants disliked, and were **[**69]** trying to fight, Amazon's $9.99 pricing, and so would be receptive to the news that Apple was open to higher prices. *See* Apple, 952 F. Supp. 2d at 703. These findings were amply supported and help explain how the agreement among Apple and the Publisher Defendants thereafter emerged.

[18] Apple takes issue with the district court's conclusion that Apple was aware of, and facilitated, communication between the Publisher Defendants. But the district court found that Cue believed Reidy was a "leader" in the publishing industry and that, on at least two occasions toward the end of the negotiating period, Cue called a recalcitrant executive, who then spoke to Reidy before agreeing to Apple's terms. *See* Apple, 952 F. Supp. 2d at 659-60; J.A. 2019-20. Reidy herself adverted to Cue's role in "herding us cats." J.A. 543. Moreover, the publishing executives frequently denied having *any* conversations about Apple during this period, despite strong documentary and phone record evidence to the contrary. The district court found that these denials lacked credibility and "strongly support[ed] a finding of consciousness of guilt." Apple, 952 F. Supp. 2d at 693 n.59. This view of the facts is not clearly erroneous.

(concluding that message about getting "the market place in order" could lead to inference of conspiracy (internal quotation marks omitted)); *see also* Starr, 592 F.3d at 324; Apex Oil, 822 F.2d at 255-57.

Apple responds to this evidence — which the experienced judge who oversaw the trial characterized repeatedly as "overwhelming" — by explaining how each piece of evidence standing alone is "ambiguous" and therefore insufficient to support an inference of conspiracy. We are not persuaded. **HN15**[] In antitrust cases, "[t]he character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole." Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962). Combined with the unmistakable purpose of the Contracts that Apple proposed to the publishers, and with the collective **[**71]** move against Amazon that inevitably followed the signing of those Contracts, the emails and phone records demonstrate that Apple *agreed* with the Publisher Defendants, within the meaning of the Sherman Act, to raise consumer-facing ebook prices by eliminating retail price competition. The district court did not err in rejecting Apple's argument that the evidence of its orchestration of the Publisher Defendants' conspiracy was "ambiguous."

Given the record and the district court's factual findings, we do not share Apple and its amici's concern that we will stifle productive enterprise by inferring an agreement among Apple and the Publisher Defendants on the basis of otherwise lawful contract terms, such as an agency model and MFNs. To begin with, it is well established that **HN16**[] vertical agreements, lawful in the abstract, can in context "be useful evidence for a plaintiff attempting **[*320]** to prove the existence of a horizontal cartel," Leegin, 551 U.S. at 893, particularly where multiple competitors sign vertical agreements that would be against their own interests were they acting independently, *see, e.g.,* Interstate Circuit v. United States, 306 U.S. 208, 222, 59 S. Ct. 467, 83 L. Ed. 610 (1939); Toys "R" Us, 221 F.3d at 935-36. The MFNs in Apple's Contracts created a set of economic incentives pursuant to which the Contracts **[**72]** were only attractive to the Publisher Defendants to the extent they acted collectively. That these contract terms had such an effect under the particular circumstances of this case — and therefore furnish part of the evidence of Apple's agreement with the Publisher Defendants — says nothing about their broader legality. It should be self-evident that our analysis is informed by the particular context in which Apple's contract terms were deployed. In any event, we are breaking no new ground in concluding that MFNs, though surely proper in many contexts, can be "misused to anticompetitive ends in some cases." Blue Cross & Blue Shield United of Wis. v. Marshfield Clinic, 65 F.3d 1406, 1415 (7th Cir. 1995); *see* Starr, 592 F.3d at 324 (finding MFN evidence of conspiracy). Under the right circumstances, an MFN can "facilitate anticompetitive horizontal coordination" by "reduc[ing] [a company's] incentive to deviate from a coordinated horizontal arrangement." Jonathan B. Baker, *Vertical Restraints with Horizontal Consequences: Competitive Effects of "Most-Favored-Customer" Clauses*, 64 Antitrust L.J. 517, 520-21 (1996); *see also* Jonathan B. Baker & Judith A. Chevalier, *The Competitive Consequences of Most-Favored-Nation Provisions*, Antitrust, Spring 2013, at 20-26, *available at* http://digitalcommons.wcl.american.edu/cgi/viewcontent.cgi?article=1280&context=facsch_lawrev.[19]

In short, we have no difficulty on this record rejecting Apple's argument that the district court erred in concluding that Apple "conspir[ed] with the Publisher Defendants to eliminate retail price competition and to raise e-book prices." Apple, 952 F. Supp. 2d at 691. Having concluded that the district court correctly identified an agreement between Apple and the Publisher **[**74]** Defendants to raise consumer-facing ebook prices, we turn to Apple's and the dissent's arguments that this agreement did not violate § 1 of the Sherman Act.

---

[19] Nor does our holding remotely suggest that price caps are always unlawful, **[**73]** which they are not. *See* State Oil Co. v. Khan, 522 U.S. 3, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997) (holding that vertical maximum price-fixing agreements should be analyzed under the rule of reason). Apple required price caps because it knew that once the Publisher Defendants moved on Amazon to seize control over ebook prices, they would raise them. Apple wanted to ensure that the Publisher Defendants set "realistic prices" that reflected the lower costs of producing ebooks. J.A. 359. The Publisher Defendants and Apple understood that these caps would become the "standard across the industry." J.A. 573. The price negotiations therefore reflected a common understanding that prices would rise, but a difference of opinion among the co-conspirators over *how high* they could reasonably go. *See* United States v. Andreas, 216 F.3d 645, 680 (7th Cir. 2000) ("The need to negotiate some details of the conspiracy with the cartel members . . . does not strip a defendant of the organizer role.").

B. Unreasonable Restraint of Trade

HN17[] "Although the Sherman Act, by its terms, prohibits every agreement 'in restraint of trade,' [the Supreme] Court has long recognized that Congress intended to outlaw only unreasonable restraints." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Thus, to succeed on an antitrust claim, a plaintiff must prove that the common scheme designed **[*321]** by the conspirators "constituted an unreasonable restraint of trade either per se or under the rule of reason." *Capital Imaging, 996 F.2d at 542*.

HN18[] In antitrust cases, "[*p*]*er se* and rule-of-reason analysis are . . . two methods of determining whether a restraint is 'unreasonable,' *i.e.*, whether its anticompetitive effects outweigh its procompetitive effects." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. Because this balancing typically requires case-by-case analysis, "most antitrust claims are analyzed under [the] 'rule of reason,' according to which the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition." *Khan, 522 U.S. at 10*; *see also* *Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 75 n.8 (2d Cir. 2013)*. However, some restraints "have such predictable and pernicious anticompetitive effect, and such limited potential **[**75]** for procompetitive benefit, that they are deemed unlawful *per se*." *Khan, 522 U.S. at 10*. This rule "reflect[s] a longstanding judgment" that case-by-case analysis is unnecessary for certain practices that, "by their nature[,] have a substantial potential" to unreasonably restrain competition. *FTC v. Sup. Ct. Trial Lawyers Ass'n, 493 U.S. 411, 433, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)* (internal quotation marks omitted).

HN19[] Horizontal price-fixing conspiracies traditionally have been, and remain, the "archetypal example" of a *per se* unlawful restraint on trade. *Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 647, 100 S. Ct. 1925, 64 L. Ed. 2d 580 (1980)*. By contrast, the Supreme Court in recent years has clarified that vertical restraints — including those that restrict prices — should generally be subject to the rule of reason. *See* *Leegin, 551 U.S. at 882* (holding that the rule of reason applies to vertical minimum price-fixing); *Khan, 522 U.S. at 7* (holding that the rule of reason applies to vertical maximum price-fixing).

In this case, the district court held that the agreement between Apple and the Publisher Defendants was unlawful under the *per se* rule; in the alternative, even assuming that a rule-of-reason analysis was required, the district court concluded that the agreement was still unlawful. *See* *Apple, 952 F. Supp. 2d at 694*. On appeal, we consider three primary arguments against application of the *per se* rule. First, Apple and our dissenting colleague argue **[**76]** that the *per se* rule is inappropriate in this case because Apple's Contracts with the Publisher Defendants were vertical, not horizontal. Even if the challenged agreement here was horizontal, Apple argues next, it promoted "enterprise and productivity." Finally, Apple contends that even if the agreement was horizontal, it was not, in fact, a "price-fixing" conspiracy of the kind that deserves *per se* condemnation. We address, and reject, these arguments in turn. Because the ebook industry, however, is new and at least arguably involves some new ways of doing business, I also consider, writing only for myself, Apple's rule-of-reason argument.

1. Whether the *Per Se* Rule Applies

a. Horizontal Agreement

In light of our conclusion that the district court did not err in determining that Apple organized a price-fixing conspiracy among the Publisher Defendants, Apple and the dissent's initial argument against the *per se* rule — that Apple's conduct must be subject to rule-of-reason analysis because it involved merely multiple independent, vertical agreements with the Publisher Defendants — cannot succeed.

[*322] ***HN20***[] "The true test of legality" under *§ 1* of the Sherman Act "is whether the *restraint imposed* is **[**77]** such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." *Bd. of Trade of City of Chi. v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683*

(1918) (emphasis added). By agreeing to orchestrate a horizontal price-fixing conspiracy, Apple committed itself to "achiev[ing] [that] unlawful objective," Monsanto, 465 U.S. at 764 (internal quotation marks omitted): namely, collusion with and among the Publisher Defendants to set ebook prices. This type of agreement, moreover, is a restraint "that would always or almost always tend to restrict competition and decrease output." Leegin, 551 U.S. at 886 (internal quotation marks omitted).

The response, raised by Apple and our dissenting colleague, that Apple engaged in "vertical conduct" that is unfit for *per se* condemnation therefore misconstrues the Sherman Act analysis. It is the type of restraint Apple agreed to impose that determines whether the *per se* rule or the rule of reason is appropriate. ***HN21***[] These rules are means of evaluating "whether [a] *restraint* is unreasonable," not the reasonableness of a particular defendant's role in the scheme. Atl. Richfield, 495 U.S. at 342 (emphasis added) (internal quotation marks omitted); *see also* Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of the Univ. of Okla., 468 U.S. 85, 103, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984) ("Both per se rules and the Rule of Reason are employed to form a judgment about the competitive significance **[**78]** of the restraint." (internal quotation marks omitted)).

Consistent with this principle, the Supreme Court and our Sister Circuits have held all participants in "hub-and-spoke" conspiracies liable when the objective of the conspiracy was a *per se* unreasonable restraint of trade. *See* Richard A. Posner, *The Next Step in the Antitrust Treatment of Restricted Distribution: Per Se Legality*, 48 U. Chi. L. Rev. 6, 22 (1981) ("[C]ases in which dealers or distributors collude . . . among themselves and bring in the manufacturer to enforce their cartel, . . . can be dealt with under the conventional rules applicable to horizontal price-fixing conspiracies."). In *Klor's, Inc. v. Broadway-Hale Stores, Inc.*, for example, the Supreme Court considered whether a prominent retailer of electronic appliances could be held liable under § 1 of the Sherman Act for fostering an agreement with and among its distributors to have those companies boycott a competing retailer. 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959). The Court characterized this arrangement as a "[g]roup boycott[]" supported by a "wide combination consisting of manufacturers, distributors and a retailer." Id. at 212-13. It then decided that, if the combination were proved at trial, holding the retailer liable would be appropriate because "[g]roup **[**79]** boycotts, or concerted refusals by traders to deal with other traders," are *per se* unreasonable restraints of trade. Id. at 212.

The Supreme Court followed a similar approach in United States v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966), when it considered whether § 1 prohibited a car manufacturer, General Motors, from coordinating a group of dealerships to prevent other dealers from selling cars at discount prices. The majority called this arrangement a "classic conspiracy in restraint of trade" and refused to entertain General Motors' request to consider the company's reasons for creating the conspiracy. Id. at 140. The Court explained that "[t]here can be no doubt that the effect of **[*323]** the combination . . . here was to restrain trade and commerce within the meaning of the Sherman Act" because "[e]limination, by joint collaborative action, of discounters from access to the market is a per se violation of the Act." Id. at 145; *see, e.g.,* Toys "R" Us, 221 F.3d at 936; Denny's Marina, Inc. v. Renfro Prods., Inc., 8 F.3d 1217, 1220-21 (7th Cir. 1993); United States v. MMR Corp. (LA), 907 F.2d 489, 498 (5th Cir. 1990); *see also* Albert Foer & Randy Stutz, *Private Enforcement of* ***Antitrust Law*** *in the United States* 29 (2012).

Because the reasonableness of a restraint turns on its anticompetitive effects, and not the identity of each actor who participates in imposing it, Apple and the dissent's observation that the Supreme Court has refused to apply the *per se* rule to certain vertical agreements **[**80]** is inapposite. ***HN22***[] The rule of reason is unquestionably appropriate to analyze an agreement between a manufacturer and its distributors to, for instance, limit the price at which the distributors sell the manufacturer's goods or the locations at which they sell them. *See* Leegin, 551 U.S. at 881; Cont'l T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 57, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977). These vertical restrictions "are widely used in our free market economy," can enhance interbrand competition, and do not inevitably have a "pernicious effect on competition." Cont'l T.V., 433 U.S. at 57-58 (internal quotation marks omitted). But the relevant "agreement in restraint of trade" in this case is not Apple's vertical Contracts with the Publisher Defendants (which might well, if challenged, have to be evaluated under the rule of reason); it is the horizontal agreement that Apple organized among the Publisher Defendants to raise ebook prices. As explained below, ***HN23***[] horizontal agreements with the purpose and effect of raising prices are *per se* unreasonable because they pose a "threat to the central nervous system of the economy," United States v. Socony-Vacuum Oil

Co., 310 U.S. 150, 224 n.59, 60 S. Ct. 811, 84 L. Ed. 1129 (1940); that threat is just as significant when a vertical market participant organizes the conspiracy. Indeed, as the dissent notes, the Publisher Defendants' coordination to fix prices is uncontested on appeal. *See* Dissenting **[**81]** Op. at 23. The competitive effects of that *same restraint* are no different merely because a different conspirator is the defendant.

Accordingly, when the Supreme Court has applied the rule of reason to vertical agreements, it has explicitly distinguished situations in which a vertical player organizes a horizontal cartel. For instance, in *Business Electronics Corp. v. Sharp Electronics Corp.*, the Court concluded that an agreement "between a manufacturer and a dealer to terminate" another dealer is a "vertical nonprice restraint" that should be evaluated under the rule of reason. 485 U.S. 717, 726, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988). The Court distinguished *General Motors* and *Klor's* on the grounds that "both cases involved horizontal combinations," *id. at 734*, and noted that "a facially vertical restraint imposed by a manufacturer only because it has been coerced by a 'horizontal carte[l]' . . . is in reality a horizontal restraint," *id. at 730 n.4* (alteration in original). More recently, in *NYNEX Corp. v. Discon, Inc.*, the Court ruled that "a buyer's decision to buy from one seller rather than another" is subject to analysis under the rule of reason. 525 U.S. 128, 130, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998). In arriving at this conclusion, the Court took care to distinguish, rather than overturn, *Klor's*, noting that **[**82]** *per se* liability was appropriate for the organizer of the conspiracy in that case because the agreement at **[*324]** issue was not "simply a 'vertical' agreement between supplier and customer, but [also] a 'horizontal' agreement among competitors." *Id. at 136* (citing Bus. Elecs. Corp., 485 U.S. at 734).

The Court's decision in *Leegin Creative Leather Products, Inc. v. PSKS, Inc.*, is no different. 551 U.S. 877, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007). In *Leegin*, a leather manufacturer entered into separate agreements with each of its retailers, which required them to sell its goods at certain prices. The plaintiff — a retailer who refused to comply with the requirement — argued that these resale price maintenance agreements constituted *per se* violations of the Sherman Act. The Supreme Court disagreed, concluding that ***HN24***[] "vertical price restraints are to be judged by the rule of reason." *Id. at 882*. Its analysis was careful to distinguish between vertical restraints and horizontal ones. Vertical price restraints are unfit for the *per se* rule because they can be used to encourage retailers to invest in promoting a product by ensuring that other retailers will not undercut their prices for that good. *See id. at 890-92*. However, vertical price restraints can also be used to organize horizontal cartels to increase **[**83]** prices, which are, "and ought to be, *per se* unlawful." *Id. at 893*. When used for such a purpose, the vertical agreement may be "useful evidence . . . to prove the existence of a horizontal cartel." *Id.*; *see also* VI Areeda & Hovenkamp, *supra*, ¶ 1402c. The Court made clear that it was addressing only the lawfulness of the manufacturer's vertical agreements and not the plaintiff's claim that the manufacturer also "participated in an unlawful horizontal cartel with competing retailers." *Id. at 907-08*; *see also* PSKS, Inc. v. Leegin Creative Leather Prods., Inc., 615 F.3d 412 (5th Cir. 2010) (considering plaintiff's "hub-and-spoke" theory on remand).

Our dissenting colleague suggests that *Leegin* also "rejected *per se* liability for hub-and-spokes agreements." Dissenting Op. at 18. This position relies on a single sentence from the opinion's analysis of how vertical resale price restraints can harm competition, which states that, if a "vertical agreement setting minimum resale prices is entered upon to facilitate" a horizontal cartel, it "would need to be held unlawful under the rule of reason." Leegin, 551 U.S. at 893. If the Supreme Court meant to overturn *General Motors* and *Klor's* — precedents that it has consistently reaffirmed — this cryptic sentence was certainly an odd way to accomplish that result. ***HN25***[] The Supreme Court "does not normally **[**84]** overturn, or so dramatically limit, earlier authority *sub silentio*." Shalala v. Ill. Council on Long Term Care, Inc., 529 U.S. 1, 18, 120 S. Ct. 1084, 146 L. Ed. 2d 1 (2000); *see also, e.g.,* Nestor v. Pratt & Whitney, 466 F.3d 65, 72 n.8 (2d Cir. 2006) ("It is not within our purview to anticipate whether the Supreme Court may one day overrule its existing precedent." (quoting United States v. Santiago, 268 F.3d 151, 155 n.6 (2d Cir. 2001) (internal quotation marks omitted))).

We need not worry about the possibility that Leegin covertly changed the law governing hub-and-spoke conspiracies, however, because the passage relied upon by the dissent is entirely consistent with holding the "hub" in such a conspiracy liable for the horizontal agreement that it joins. A horizontal conspiracy can use vertical agreements to facilitate coordination without the other parties to those agreements knowing about, or agreeing to, the horizontal conspiracy's goals. For example, a cartel of manufacturers could ensure compliance with a scheme to fix prices by having every member "require its dealers to adhere **[*325]** to specified resale prices." VIII Areeda & Hovenkamp, *supra*, ¶ 1606b. Because it may be difficult to distinguish such facilitating practices from procompetitive vertical resale price agreements, the quoted passage from *Leegin* notes that those "vertical agreement[s] . . . would need to be held unlawful under the rule of reason." *551 U.S. at 893*. But there is no such possibility **[**85]** for confusion in the hub-and-spoke context, where the vertical organizer has not only committed to vertical agreements, but has also agreed to participate in the horizontal conspiracy. In that situation, the court need not consider whether the vertical agreements restrained trade because all participants agreed to the horizontal restraint, which is "and ought to be, *per se* unlawful." *Id.*[20]

In short, the relevant "agreement in restraint of trade" in this case is the price-fixing conspiracy identified by the district court, not Apple's vertical contracts with the Publisher Defendants. How the law might treat Apple's vertical agreements in the absence of a finding that Apple agreed to create the horizontal restraint is irrelevant. Instead, the question is whether the vertical organizer of a horizontal conspiracy designed to raise prices has agreed to a restraint that is any less anticompetitive than its co-conspirators, and can therefore escape *per se* liability. We think not. Even in light of this conclusion, however, we must address two additional arguments that Apple raises against application of the *per se* rule.

b. "Enterprise and Productivity"

Apple seeks refuge from the *per se* rule **[**87]** by invoking a line of cases in which courts have permitted defendants to introduce procompetitive justifications for horizontal price-fixing arrangements that would ordinarily be condemned *per se* if those agreements "when adopted could reasonably have been believed to promote 'enterprise and productivity.'" Apple Br. at 50 (quoting *In re Sulfuric Acid Antitrust Litig., 703 F.3d 1004, 1011 (7th Cir. 2012))* (internal quotation mark omitted). The decisions falling in this line are narrow, and they do not support Apple's position. In *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc.* ("*BMI*"), the defendants were corporations formed by copyright owners to negotiate "blanket licenses" allowing licensees to perform any of the licensed works for a flat fee. *441 U.S. 1, 4-6, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*. Although this scheme literally amounted to "price fixing" by the defendants' members, the Court upheld it under **[*326]** the rule of reason because blanket licenses were the only way to eliminate the "prohibitive" cost of each copyright owner's individually negotiating licenses, monitoring licensees' use of their work, and enforcing the licenses' terms. *Id. at 20-21*. In *National Collegiate Athletic Ass'n v. Board of Regents of the University of Oklahoma ("NCAA")*, the Court relied on *BMI* in applying the rule of reason **[**88]** to (but ultimately striking down) restrictions placed by the National Collegiate Athletic Association ("NCAA") on the number of football games that its members could agree with television networks to broadcast. *468 U.S. 85, 103, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. Many of the NCAA's restrictions on its members were "essential if the product [amateur athletics] is to be available at all," so a "fair evaluation" of the broadcast restrictions' "competitive character require[d] consideration of the NCAA's justifications for the restraints." *Id. at 101, 103*.

---

[20] Since *Leegin*, the Sixth Circuit has acknowledged that plaintiffs can "establish[] a *per se* violation [of the Sherman Act] under the hub and spoke theory." *Total Benefits Planning Agency, Inc. v. Anthem Blue Cross & Blue Shield, 552 F.3d 430, 435 n.3 (6th Cir. 2008)*. To the extent that the Third Circuit decided otherwise in *Toledo Mack Sales & Serv., Inc. v. Mack Trucks, Inc., 530 F.3d 204, 225 (3d Cir. 2008)*, its more recent opinions cast doubt on that decision. In *In re Insurance Brokerage Antitrust Litigation*, for example, the court noted that "hub-and-spoke conspiracies" have "a long history in antitrust jurisprudence," and cited *Total Benefits* for the position that "[t]he critical issue for establishing a *per se* violation with the hub and spoke system is how the spokes are connected to each other." *618 F.3d 300, 327 (3d Cir. 2010)* (internal quotation marks omitted). The court also acknowledged that "[t]he anticompetitive danger inherent" in alleged horizontal collusion "is not necessarily mitigated by the fact that" a broker at **[**86]** a different level of the market structure "managed the details of each bid, nor by the likelihood that the horizontal collusion would not have occurred without the broker's involvement." *Id. at 338*. The panel in *Insurance Brokerage*, however, had no occasion to revisit *Toledo Mack* because the plaintiffs had failed to establish a horizontal agreement — the "rim" in the hub-and-spokes conspiracy. *Id. at 362*.

The Supreme Court has characterized these decisions as limited to situations where the "restraints on competition are essential if the product is to be available at all." *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 203, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (quoting *NCAA, 468 U.S. at 101*) (internal quotation marks omitted). But even if read broadly, these cases, and others in this category, apply the rule of reason only when the restraint at issue was imposed in connection with some kind of potentially efficient joint venture. XI Areeda & Hovenkamp, *supra*, ¶ 1908b; *see, e.g., Sulfuric Acid, 703 F.3d at 1013* (describing joint venture formed by defendants). Put differently, a participant in a price-fixing agreement may invoke only certain, limited *kinds* of "enterprise and productivity" to receive the rule of reason's advantages. As the Supreme Court has explained — including **[**89]** in *BMI* itself, *see 441 U.S. at 8 & n.11* — the *per se* rule would lose all the benefits of being "*per se*" if conspirators could seek to justify their conduct on the basis of its purported competitive benefits in every case. Here, there was no joint venture or other similar productive relationship between any of the participants in the conspiracy that Apple joined. Apple also does not claim, nor could it, that creating an ebook retail market is possible only if the participating publishers coordinate with one another on price.

c. Price-Fixing Conspiracy

As noted, the Supreme Court has for nearly 100 years held that ***HN26***[] horizontal collusion to raise prices is the "archetypal example" of a *per se* unlawful restraint of trade. *Catalano, 446 U.S. at 647*. If successful, these conspiracies concentrate the power to set prices among the conspirators, including the "power to control the market and to fix arbitrary and unreasonable prices." *United States v. Trenton Potteries Co., 273 U.S. 392, 397, 47 S. Ct. 377, 71 L. Ed. 700 (1927)*. And even if unsuccessful or "not . . . aimed at complete elimination of price competition," the conspiracies pose a "threat to the central nervous system of the economy" by creating a dangerously attractive opportunity for competitors to enhance their power at the expense of others. *Socony-Vacuum Oil, 310 U.S. at 224 n.59 (1940)*. Thus:

> ***HN27***[] [P]rice-fixing cartels **[**90]** are condemned per se because the conduct is tempting to businessmen but very dangerous to society. The conceivable social benefits are few in principle, small in magnitude, speculative in occurrence, and always premised on the existence of price-fixing power which is likely to be exercised adversely to the public. . . . And even if **[*327]** power is usually established while any defenses are not, litigation will be complicated, condemnation delayed, would be price-fixers encouraged to hope for escape, and criminal punishment less justified. Deterrence of a generally pernicious practice would be weakened.

Trial Lawyers Ass'n, 493 U.S. at 434 n.16 (quoting 7 Philip Areeda, ***Antitrust Law*** ¶ 1509, at 412-13 (1986)).

Apple and its amici argue that the horizontal agreement among the publishers was not actually a "price-fixing" conspiracy that deserves *per se* treatment in the first place. But it is well established that ***HN28***[] *per se* condemnation is not limited to agreements that literally set or restrict prices. Instead, any conspiracy "formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity . . . is illegal per se," and the precise "machinery employed . . . is immaterial." *Socony-Vacuum Oil, 310 U.S. at 223*; *see* ***[**91]*** *also Catalano, 446 U.S. at 647-48* (collecting cases); XII Areeda & Hovenkamp, *supra*, ¶ 2022a, d. The conspiracy among Apple and the Publisher Defendants comfortably qualifies as a horizontal price-fixing conspiracy.

As we have already explained, the Publisher Defendants' primary objective in expressly colluding to shift the entire ebook industry to an agency model (with Apple's help) was to eliminate Amazon's $9.99 pricing for new releases and bestsellers, which the publishers believed threatened their short-term ability to sell hardcovers at higher prices and the long-term consumer perception of the price of a new book. They had grown accustomed to a business in which they rarely competed with one another on price and could, at least partially, control the price of new releases and bestsellers by releasing hardcover copies before paperbacks. Amazon, and the ebook, upset that model, and reduced prices to consumers by eliminating the need to print, store, and ship physical volumes. Its $9.99 price point for new releases and bestsellers represented a small loss on a small percentage of its sales designed to encourage consumers to adopt the new technology.

Faced with downward pressure on prices but unconvinced that withholding books from Amazon **[**92]** was a viable strategy, the Publisher Defendants — their coordination orchestrated by Apple — combined forces to grab control over price. Collectively, the Publisher Defendants accounted for 48.8% of ebook sales in 2010. J.A. 1571. Once organized, they had sufficient clout to demand control over pricing, in the form of agency agreements, from Amazon and other ebook distributors. This control over pricing facilitated their ultimate goal of raising ebook prices to the price caps. *See* VIII Areeda & Hovenkamp, *supra*, ¶ 1606b ("Even when specific prices are not agreed upon, an express horizontal agreement that each manufacturer will use resale price maintenance or other distribution restraints should be illegal. Its only business function is to facilitate price coordination among manufacturers."). In other words, the Publisher Defendants took by collusion what they could not win by competition. And Apple used the publishers' frustration with Amazon's $9.99 pricing as a bargaining chip in its negotiations and structured its Contracts to coordinate their push to raise prices throughout the industry. A coordinated effort to raise prices across the relevant market was present in every chapter of this story.

This conspiracy **[**93]** to raise prices also had its intended effect. Immediately after the Publisher Defendants switched Amazon to an agency model, they increased the Kindle prices of 85.7% of their new releases **[*328]** and 96.8% of their *New York Times* bestsellers to within 1% of the Apple price caps. They also increased the prices of their other ebook offerings. Within two weeks of the move to agency, the weighted average price of the Publisher Defendants' ebooks — which accounted for just under half of all ebook sales in 2010 — had increased by 18.6%, while the prices for Random House and other publishers remained relatively stable.

This sudden increase in prices reduced ebook sales by the Publisher Defendants and proved to be durable. One analysis compared two-week periods before and after the Publisher Defendants took control over pricing and found that they sold 12.9% fewer ebooks after the switch. Another expert for Plaintiffs conducted a regression analysis, which showed that, over a six-month period following the switch, the Publisher Defendants sold 14.5% fewer ebooks than they would have had the price increases not occurred. Nonetheless, ebook prices for the Publisher Defendants over those six months, **[**94]** controlling for other factors, remained 16.8% higher than before the switch. And even Apple's expert produced a chart showing that the Publisher Defendants' prices for new releases, bestsellers, and other offerings remained elevated a full two years after they took control over pricing.

Apple points out that, in the two years following the conspiracy, prices across the ebook market as a whole fell slightly and total output increased. However, when the agreement at issue involves price fixing, the Supreme Court has consistently held that ***HN29***[] courts need not even conduct an extensive analysis of "market power" or a "detailed market analysis" to demonstrate its anticompetitive character. *FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 460, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*; *see also* *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 692-93, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. The district court's assessment of Apple's and the Publisher Defendants' motives, coupled with the unambiguous increase in the prices of their ebooks, was sufficient to confirm that price fixing was the goal, and the result, of the conspiracy. *See* *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 779-80, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*.

Moreover, Apple's evidence regarding long-term growth and prices in the ebook industry is not inconsistent with the conclusion that the price-fixing conspiracy succeeded in actually raising prices. The popularization of ebooks fundamentally altered **[**95]** the publishing industry by eliminating many of the marginal costs associated with selling books. When Apple launched the iBookstore just two years after Amazon introduced the Kindle, the ebook market was *already* experiencing rapid growth and falling prices, and those trends were expected to continue. J.A. 1630, 1647. The district court found that the Publisher Defendants' collective move to retake control of prices — and to eliminate Amazon's $9.99 price point for new releases and *New York Times* bestsellers — tapped the brakes on those trends, causing prices to rise across their offerings and slowing their sales growth relative to other publishers.[21] No court can presume to know **[*329]** the proper price of an ebook, but the long judicial experience

---

[21] Significantly, the Publisher Defendants are all major producers of new releases and *New York Times* bestsellers, and they collectively increased prices in those categories. Those prices remained high notwithstanding the influx of new publishers and low-cost ebooks, to the detriment of consumers interested in that segment of the market. *See 42nd* *Parallel N. v. E St. Denim Co., 286 F.3d 401, 405-06 (7th Cir. 2002)* (***HN31***[] "The key inquiry in a market power analysis is whether the defendant has

applying the Sherman Act has shown that ***HN30***[] "[a]ny combination which tampers with price structures . . . would be directly interfering with the free play of market forces." *Socony-Vacuum Oil, 310 U.S. at 221*; *see also* *Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 346, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. By setting new, durable prices through collusion rather than competition, Apple and the Publisher Defendants imposed their view of proper pricing, supplanting the market's free play. This evidence, viewed in conjunction with the district court's findings as to and analysis **[**96]** of the conspiracy's history and purpose, is sufficient to support the conclusion that the agreement to raise ebook prices was a *per se* unlawful price-fixing conspiracy.

2. Rule of Reason

As explained above, neither Apple nor the dissent has presented any particularly strong reason to think that the conspiracy we have identified should be spared *per se* condemnation. My concurring colleague would therefore affirm the district court's decision on **[**97]** that basis alone. I, too, believe that *per se* condemnation is appropriate in this case and view Apple's sloganeering references to "innovation" as a distraction from the straightforward nature of the conspiracy proven at trial. Nonetheless, I am mindful of Apple's argument that the nascent ebook industry has some new and unusual features and that the *per se* rule is not fit for "business relationships where the economic impact of certain practices is not immediately obvious." *Leegin, 551 U.S. at 887* (internal quotation marks omitted); *accord* *Major League Baseball Props., Inc. v. Salvino, Inc., 542 F.3d 290, 316 (2d Cir. 2008)* ("*Per se* treatment is not appropriate . . . where the economic and competitive effects of the challenged practice are unclear."); *Sulfuric Acid, 703 F.3d at 1011* ("It is a bad idea to subject a novel way of doing business . . . to per se treatment under ***antitrust law***."). I therefore assume, for the sake of argument, that it is appropriate to apply the rule of reason and to analyze the competitive effects of Apple's horizontal agreement with the Publisher Defendants.

Notably, however, the ample evidence here concerning the purpose and effects of Apple's agreement with the Publisher Defendants affects the scope of the rule-of-reason analysis called for in this case. ***HN32***[] Under a prototypically robust rule-of-reason **[**98]** analysis, the plaintiff must demonstrate an "*actual* adverse effect" on competition in the relevant market before the "burden shifts to the defendants to offer evidence of the pro-competitive effects of their agreement." *Geneva Pharms. Tech. Corp. v. Barr Labs. Inc., 386 F.3d 485, 506-07 (2d Cir. 2004)* (internal quotation marks omitted). The factfinder then weighs the competing evidence "to determine if the effects of the challenged restraint tend to promote or destroy competition." *Id. at 507*. But not every case that requires rule of reason analysis "is a candidate for plenary market examination." *Cal. Dental Ass'n, 526 U.S. at 779*. "What is required, rather, is an enquiry meet for the case, looking to the circumstances, details, and logic of a restraint." *Id. at 781*.

To that end, ***HN33***[] the Supreme Court has applied an abbreviated version of the rule **[*330]** of reason — otherwise known as "quick look" review — to agreements whose anticompetitive effects are easily ascertained. *See* *id. at 779*. This "quick look" effectively relieves the plaintiff of its burden of providing a robust market analysis, *see* *id.*, by shifting the inquiry directly to a consideration of the defendant's procompetitive justifications. *See* XI Areeda & Hovenkamp, *supra*, ¶ 1914d ("[W]hen the restraint appears 'on its face' to be one that tends to . . . increase price," an abbreviated rule-of-reason **[**99]** analysis "operates to shift the burden of proof rather than to cut off the inquiry, as is usually true in a per se case."). Thus, in *NCAA*, the Supreme Court refrained from applying the *per se* rule to the challenged television broadcast restrictions, but it did not require an "elaborate industry analysis . . . to demonstrate [their] anticompetitive character." *468 U.S. at 109* (internal quotation marks omitted). And in *Indiana Federation of Dentists*, the Court did not apply the *per se* rule to a group boycott when, in the relevant market, the economic impact was "not immediately obvious," but it nonetheless dispensed with a full analysis of the

---

the ability to raise prices without losing its business." (internal quotation marks omitted)); *K.M.B. Warehouse Distribs., Inc. v. Walker Mfg. Co., 61 F.3d 123, 128-29 (2d Cir. 1995)*; *cf.* U.S. Dep't of Justice & Fed. Trade Comm'n, *Horizontal Merger Guidelines* § 6.1 (2010) (noting that, "[i]n differentiated product industries, some products can be very close substitutes . . . while other products are more distant substitutes").

agreement's anticompetitive character. *476 U.S. at 459*; *see also* *Major League Baseball, 542 F.3d at 317*; *United States v. Brown Univ., 5 F.3d 658, 669 (3d Cir. 1993)*.

Here, the same evidence supporting our determination that *per se* condemnation is the correct way to dispose of this appeal also supports at most a "quick look" inquiry under the rule of reason. Contrary to the dissent's suggestion, this approach does not somehow "taint" the rule-of-reason analysis. The dissent concedes that the conscious object of Apple's signing its Contracts with the Publisher Defendants was to organize a horizontal conspiracy among them to raise consumer-facing ebook prices. *See* Dissenting **[**100]** Op. at 26 (noting that "price increases" were "the expected result" of the defendants' agreement). It is unsurprising in these circumstances that we are easily able to discern the anticompetitive effects of that horizontal conspiracy. A quick-look approach operates only to shift the rule-of-reason analysis directly to Apple's procompetitive justifications for organizing the conspiracy; I do not give those defenses any shorter shrift than I otherwise would under a more robust analysis. My rejection of Apple's defenses thus has nothing to do with my application of the quick-look approach and everything to do with how unpersuasive those defenses are.

a. Market Entry

Apple's initial argument that its agreement with the Publisher Defendants was procompetitive (an argument presented principally in an amicus brief adopted wholeheartedly by the dissent) is that by eliminating Amazon's $9.99 price point, the agreement enabled Apple and other ebook retailers to enter the market and challenge Amazon's dominance. But this defense — that higher prices enable more competitors to enter a market — is no justification for a horizontal price-fixing conspiracy. As the Supreme Court has cogently explained: **[**101]**

> ***HN34***[] [I]n any case in which competitors are able to increase the price level or to curtail production by agreement, it could be argued that the agreement has the effect of making the market more attractive to potential new entrants. If that potential justifies horizontal agreements among competitors imposing one kind of voluntary restraint or another on their competitive freedom, it would seem to follow that the more successful an agreement is in raising the price level, the safer it is from antitrust attack. **[*331]** Nothing could be more inconsistent with our cases.

Catalano, 446 U.S. at 649.

Nor does this argument become stronger when it is asserted, as here, that a horizontal cartel at one level of the market promoted market entry at another, enhancing competition. My dissenting colleague's view that "deconcentrating," Dissenting Op. at 27, Amazon's share of retail ebook sales justifies *concentrating* power over pricing in the hands of the Publisher Defendants reflects a basic misunderstanding of the nature of the competition that ***antitrust law*** protects. New entrants to a market are desirable to the extent that consumers would choose to buy their products at the price offered. When a market is concentrated and an incumbent **[**102]** firm is charging supracompetitive prices, a new entrant can benefit consumers by undercutting the incumbent's prices, thus offering better value for the same goods. Dominant firms who want to deter competition — so that they can keep charging supracompetitive prices — may erect barriers to entry to keep these new competitors out, and the dissent is quite right that these barriers are generally undesirable.

HN35[] Market dominance may, however, arise "as a consequence of a superior product, business acumen, or historic accident," and is "not only not unlawful; it is an important element of the free market system." *Trinko, 540 U.S. at 407* (internal quotation marks omitted). The ability to provide goods at particularly low prices is one way that a firm can gain such an edge in the marketplace. Competitors are, of course, entitled to challenge dominant firms by offering, among other things, superior products and lower prices. But success is not guaranteed. A dominant firm charging low prices may have proven itself more efficient than its competitors, such that a potential new entrant's inability to earn a profit would result not from any artificial "barriers to entry," but rather from the fact that, in light of the **[**103]** value proposition offered by the dominant firm, consumers would not choose to buy the new entrant's products at the price it is willing and able to offer. *See* Einer Elhauge, *United States **Antitrust Law** and Economics*

2 (2d ed. 2011) ("If a firm makes a better mousetrap, and the world beats a path to its door, it may drive out all rivals and establish a monopoly; but that is a good result, not a bad one.").

From this perspective, the dissent's contention that Apple could not have entered the ebook retail market without the price-fixing conspiracy, because it could not have profited either by charging more than Amazon or by following Amazon's pricing, is a complete non sequitur. The posited dilemma is the whole point of competition: if Apple could not turn a profit by selling new releases and bestsellers at $9.99, or if it could not make the iBookstore and iPad so attractive that consumers would pay *more* than $9.99 to buy and read those ebooks on its platform, then there was no place for its platform in the ebook retail market. Neither the district court nor Plaintiffs had an obligation to identify a "viable alternative" for Apple's profitable entry because Apple had no entitlement to **[**104]** enter the market on its preferred terms. Dissenting Op. at 35.

Although low prices that deter new entry may simply reflect the dominant firm's efficiency, it is true that below-cost pricing can, under certain circumstances, be anticompetitive. The dissent suggests that Amazon's pricing gave it an unfair advantage, so that even if Apple had priced ebooks at an efficient level (whatever that might have been), it still would not have been able to enter the market on a profitable **[*332]** basis. But Amazon was taking a risk by engaging in loss-leader pricing, losing money on some sales in order to encourage readers to adopt the Kindle. ***HN36***[] "That below-cost pricing may impose painful losses on its target is of no moment to the antitrust laws if competition is not injured: It is axiomatic that the antitrust laws were passed for 'the protection of *competition*, not *competitors*.'" *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*. Because lower prices improve consumer welfare (all else being equal), below-cost pricing is unlawfully anticompetitive only if there is a "dangerous probability" that the firm engaging in it will later recoup its losses by raising prices to monopoly levels after driving its rivals out of the market. *Id.* If Apple and **[**105]** the Publisher Defendants thought that Amazon's conduct was anticompetitive under this standard, they could have sued under *§ 2* of Sherman Act. (Whether DOJ would have pursued its own enforcement action of unclear relevance given the availability of a private remedy.) Failing Amazon's pricing was part of the competitive landscape that competing ebook retailers had to accept.[22]

Instead, the dissent invites conduct that is strictly prohibited by Sherman Act — horizontal collusion to fix prices — to cure a perceived abuse market power. Whatever its merit in the abstract, that preference for collusion over dominance is wholly foreign to ***antitrust law***. *See* *Trinko, 540 U.S. at* (referring to collusion as the "supreme evil of antitrust"). ***HN37***[] Because of the long-term threat to competition, the Sherman Act does not authorize horizontal price conspiracies as a form of marketplace vigilantism **[**106]** to eliminate perceived "ruinous competition" or other "competitive evils." *Maricopa Cnty. Med. Soc'y, 457 U.S. at 346* (quoting *Socony-Vacuum Oil, 310 U.S. at 221*). Indeed, the attempt to justify a conspiracy to raise prices "on the basis of the potential threat that competition poses . . . is nothing less than a frontal assault on the basic policy of the Sherman Act." *Nat'l Soc'y of Prof'l Eng'rs, 435 U.S. at 695*. And it is particularly ironic that the "terms" that Apple was able to insist upon by organizing a cartel of Publisher Defendants to move against Amazon — namely, the elimination of retail price competition — accomplished the precise opposite of what new entrants to concentrated markets are ordinarily supposed to provide. In short, Apple and the dissent err first in equating a symptom (a single-retailer market) with a disease (a lack of competition), and then err again by prescribing the disease itself as the cure.

The dissent's "frontal assault" on competition law is not only wrong as a legal matter for all the reasons just given; it is also, despite its professed fidelity to the district court's view of the facts, premised on various mischaracterizations of the record. Put simply, it is far from clear that either Apple itself or other ebook retailers could not have entered the ebook retail **[**107]** market without Apple's efforts with the Publisher Defendants to eliminate price competition. As the district court noted, "[Apple] did not attempt to argue or show at trial that the price of admission to new markets must be or is participation in illegal price-fixing schemes" and did not "suggest[]

---

[22] While the dissent accuses us of supposing that "competition should be genteel, lawyer-designed, and fair under sporting rules," Dissenting Op. at 5, it is the dissent's position that would have ebook consumers subsidize Apple's entry into the market by paying more for ebooks so that Apple would not have to compete on price.

[*333] that the only way it could have entered the e-book market was to agree with the Publisher Defendants to raise e-book prices." *Apple, 952 F. Supp. 2d at 708*.

The district court's statement that Apple feared "losing money if it tried or was forced to match Amazon's pricing," *Id. at 658* — the peg on which the dissent largely hangs its argument — is hardly a conclusive finding that Apple would have lost money had it entered a market that featured retail price competition. Barnes & Noble, for its part, had chosen to enter and stay in the market in the face of Amazon's pricing. Google, too, had plans to enter the ebook market before Apple launched the iBookstore. Moreover, the district court never found that Apple could not have entered the market on a wholesale model while charging *more* than Amazon for new releases and bestsellers. To fill this hole in its theory, the dissent suggests that Apple would have "impair[ed] its brand" by charging **[**108]** more than Amazon. Dissenting Op. at 34 (internal quotation marks omitted). But putting aside the fact that Apple's perception of its brand value is irrelevant — does the dissent really think it is desirable to require more efficient competitors to charge the same as their less efficient rivals solely so the latter will be spared the indignity of not charging the best price? — the district court actually found that Apple believed it would have been "unrealistic[]" to charge more than its *price caps* after switching to an agency model, *Apple, 952 F. Supp. 2d at 692*, a finding that says nothing about what Apple would have been willing to charge under a wholesale model.

The record makes clear the flaws in the dissent's argument. When Cue was still contemplating a wholesale model, his objective was not for Apple's pricing to match Amazon's precisely, but rather for that pricing to be "generally competitive." J.A. 1758. And had Apple opted to compete on both price and platform but concluded that it could not match Amazon's $9.99 pricing, some consumers might well have paid somewhat more to read new releases and bestsellers on the iPad, a revolutionary ereader boasting many more features than the Kindle.[23] The iPad was coming **[**109]** to market with or without a price-fixing conspiracy, and some iPad owners who wanted to read ebooks surely would not have wanted to buy a separate Kindle solely to benefit from Amazon's $9.99 pricing for new releases and bestsellers. (Whether Apple would have viewed its profits under that scenario as large enough to justify entry is not an antitrust concern.)

[*334] In actuality, the district court's fact-finding illustrates that Apple organized the Publisher Defendants' price-fixing conspiracy not because it was a necessary precondition to market entry, but because it was a convenient bargaining chip. Apple was operating under a looming deadline and recognized that, by aligning its interests with those of the Publisher Defendants and offering them a way to raise prices across the ebook market, it could gain quick entry into the market on extremely favorable terms, including the elimination of retail price competition from Amazon. But the offer to orchestrate a horizontal conspiracy to raise prices is not a legitimate way to sweeten a deal.

The facts also do not support the conclusion that Amazon's market position would have discouraged **[**111]** other ebook retailers from entering the market absent the price-fixing conspiracy orchestrated by Apple. Amazon popularized ebooks with the launch of the Kindle in late 2007, and enjoyed a strong market position because of its innovation. *Cf. Trinko, 540 U.S. at 407* (noting that the opportunity to gain market power "induces risk taking that produces innovation and economic growth"). Barnes & Noble was Amazon's first major competitor, and when it

---

[23] A prediction that consumers would have paid more to read ebooks on the iPad than on the Kindle because of the iPad's improved reading experience or other attractive features does not somehow suggest that ebooks are "Veblen goods [or] Giffen goods." Dissenting Op. at 33 n.7. The dissent also suggests that Apple could not have depended on the iPad's hardware advantages as part of a strategy to charge more than Amazon because ***antitrust law*** would have required it to open up the iPad to a Kindle app. *Id. at 34*. But for a unilateral refusal to deal to be unlawful, the defendant must have monopoly power, which Apple plainly did not. *See, e.g., United States v. Microsoft Corp., 253 F.3d 34, 51, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (en banc) (***HN38***[ ] "While merely possessing monopoly power is not itself an antitrust violation, it is a necessary element of a monopolization charge." (citation omitted)); Elhauge, *supra*, at 268 (***HN39***[ ] "A firm that lacks dominant market **[**110]** power . . . can unilaterally choose with whom they deal without fear of antitrust liability."); *see also Trinko, 540 U.S. at 408* (***HN40***[ ] "Under certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate *§ 2*. We have been very cautious in recognizing such exceptions, because of the uncertain virtue of forced sharing and the difficulty of identifying and remedying anticompetitive conduct by a single firm.").

entered the market — on a wholesale model — with the introduction of the Nook in 2009, it began to erode Amazon's market share. The iPad itself also promised to introduce more competition with or without Apple's iBookstore by providing a platform for companies to build ebook marketplaces without investing in tablet development. These new entrants gave publishers more leverage to negotiate for alternative sales models or different pricing. Indeed, publishers were already in separate discussions about an agency model with Barnes & Noble before Apple offered a way to swap the rigors of competition for the comfort of collusion.

To summarize, the district court made no finding that a horizontal conspiracy to eliminate price competition in the ebook retail market was necessary **[**112]** to bring more retailers into the market to challenge Amazon, nor does the record evidence support this conclusion. More importantly, even if there *were* such evidence, the fact that a competitor's entry into the market is contingent on a horizontal conspiracy to raise prices only means (absent monopolistic conduct by the market's dominant firm, which cannot lawfully be challenged by collusion) that the competitor is inefficient, *i.e.*, that its entry will not enhance consumer welfare. For these reasons, I would reject the argument that Apple's entry into the market represented an important procompetitive benefit of the horizontal price-fixing conspiracy it orchestrated.

b. Other Justifications

Apart from its and other retailers' entry into the market, Apple points to other purported procompetitive benefits of its agreement with the Publisher Defendants, namely, eventual price decreases in the ebook industry and the various technological innovations embedded in the iPad. The district court correctly concluded that Apple failed to establish a connection between these benefits and the conspiracy among Apple and the Publisher Defendants. *Apple, 952 F. Supp. 2d at 694*; *see* *NCAA, 468 U.S. at 113-15* (concluding that the need to coordinate to produce **[**113]** intercollegiate athletics was not related to coordination on television rights); XI Areeda & Hovenkamp, *supra*, ¶ 1908b.

While it may be true that ebook prices eventually declined industry-wide, new publishers were adopting the digital format and prices were falling even before Apple's entry into the market. Apple did not introduce any admissible evidence linking **[*335]** the continued influx of new titles into the ebook market to its agreement with the Publisher Defendants.[24] Nor did it provide an explanation for how this price-fixing agreement altered the business and pricing decisions of other publishers in a procompetitive direction. The district court's refusal to give Apple credit for these trends was therefore proper.

The technological innovations embedded in the iPad are similarly unrelated to Apple's agreement with the Publisher Defendants. The iPad's backlit touchscreen, audio and video capabilities, and ability to offer consumers a number of services on a single device revolutionized tablet computing. But, as Apple's witnesses testified, the company had every intention of bringing the iPad to market with or without the iBookstore. Moreover, Apple was not the only entity that could use the iPad's new features to enhance the ebook experience—other **[**115]** retailers, or the publishers themselves, could have designed and launched ebook applications on the platform. The district court

---

[24] Apple sought to introduce expert testimony from Dr. Michelle Burtis, which it believed would link continued long-term growth and price changes to its launch of the iBookstore. However, the district court excluded this testimony on the grounds that Dr. Burtis "did not offer any scientifically sound analysis of the cause for this purported price decline or seek to control for the factors that may have led to it." *Apple, 952 F. Supp. 2d at 694 n.61*. This was no abuse of discretion. *See* *Zerega Ave. Realty, 571 F.3d at 212-13*. ***HN41***[] "[T]he proponent of expert testimony has the burden of establishing **[**114]** by a preponderance of the evidence" that the expert's opinion is based on sufficient facts, is the product of reliable principles and methods, and applies those principles and methods reliably to the facts at hand. *United States v. Williams, 506 F.3d 151, 160 (2d Cir. 2007)*; *see* *Fed. R. Evid. 702*. Dr. Burtis merely compared the average ebook prices from the two years before Apple's entry into the market with the average prices two years after. She did not account for the rapid growth and change in that industry or explain the process she used to determine whether Apple's agency agreements were responsible for lower prices. *See* *Gen. Elec. Co. v. Joiner, 522 U.S. 136, 146, 118 S. Ct. 512, 139 L. Ed. 2d 508 (1997)*; *United States v. Dukagjini, 326 F.3d 45, 54 (2d Cir. 2003)*. The district court therefore acted well within its discretion in excluding Dr. Burtis's testimony.

was correct not to score these hardware innovations as procompetitive benefits of the agreement between Apple and the Publisher Defendants to raise prices.

Accordingly, I agree with the district court's decision that, under the rule of reason, the horizontal agreement to raise consumer-facing ebook prices that Apple orchestrated unreasonably restrained trade. But given the clear applicability of the *per se* rule in this context, the analysis here is largely offered in response to the dissent. I also confidently join with my concurring colleague in affirming the district court's conclusion that Apple committed a *per se* violation of *§ 1* of the Sherman Act.

III. The Injunctive Order

Next, Apple and two of the Publisher Defendants — Macmillan and Simon & Schuster — challenge specific portions of the district court's September 5, 2013 injunctive order. In particular, Macmillan and Simon & Schuster ask us to vacate the provision which prohibits Apple, for a period of time, from entering agreements with the Publisher Defendants that restrict its ability to set ebook prices. **[**116]** S.P.A. 205. Apple separately seeks vacatur of a provision requiring it to apply the same terms and conditions to ebook applications in its App Store as it does to other applications, and of the district court's decision to appoint a compliance monitor. We address each of the parties' arguments in turn.

[*336] A. Macmillan and Simon & Schuster

In the September 5, 2013 injunctive order, the district court mandated that "Apple shall not enter into or maintain any agreement with a Publisher Defendant that restricts, limits, or impedes Apple's ability to set, alter, or reduce the Retail Price of any E-book or to offer price discounts or any other form of promotions." S.P.A. 205. This prohibition began upon entry of the order and expires at different times for each of the Publisher Defendants. The earliest expiration date lifts the ban for agreements between Apple and Hachette beginning 24 months after entry of the injunctive order. Expiration dates for agreements with each of the other Publisher Defendants are then set in six-month intervals, with Simon & Schuster's ban expiring 36 months after entry of the final judgment and Macmillan's ban ending after 48 months.

Macmillan and Simon & Schuster **[**117]** seek vacatur of this prohibition. Both publishers are subject to separate consent decrees, which prohibit them from signing agreements with *any* ebook retailers which restrict the retailer's ability to "set, alter, or reduce" ebook prices, "or to offer price discounts." J.A. 1126; J.A. 1148. The prohibition lasts two years for Simon & Schuster and 23 months for Macmillan. According to both Publisher Defendants, the district court's injunctive order against Apple, in light of these consent decrees, is unlawful for two reasons. First, they contend that the injunctive order impermissibly *modifies* their consent decrees by extending the time during which they cannot negotiate to restrict the price at which Apple sells ebooks.[25] Second, they argue that DOJ should have been judicially estopped from seeking a prohibition on agreements limiting Apple's discounting authority that lasts longer than two years because, in the filings in support of the consent decrees, it argued that two years was a sufficient amount of time to restore competition in the ebook market. Neither objection is persuasive.

We begin with the argument that the injunctive order impermissibly amended the Publisher Defendants' consent decrees. ***HN42***[] *Federal Rule of Civil Procedure 60(b)* establishes the grounds for seeking "relief from a final judgment, order, or proceeding," *Fed. R. Civ. P. 60(b)*, including modifications of consent decrees. *Rufo v. Inmates of Suffolk Cnty. Jail, 502 U.S. 367, 378-79, 112 S. Ct. 748, 116 L. Ed. 2d 867 (1992)*; *United States v. Eastman Kodak Co., 63 F.3d 95, 101 (2d Cir. 1995)*. The rule adopts a flexible approach, enumerating specific reasons for modification while also allowing alterations for "any other reason that justifies relief." *Fed. R. Civ. P. 60(b)*. "[A] party seeking an alteration" under this catch-all provision bears the "burden of establishing that a significant change in

[25] Macmillan also contends that the injunctive order broadens the restrictions imposed by its consent decree **[**118]** because the decree allows the company to set certain limits on price discounts, which it can no longer set for ebooks sold by Apple.

circumstances warrants the modification." *United States v. Sec'y of Hous. & Urban Dev., 239 F.3d 211, 217 (2d Cir. 2001)*.

The Publisher Defendants' argument rests on the premise that the district court's injunctive order modified their consent decrees and therefore should have complied with *Rule 60(b)*'s requirements. The premise is incorrect. Macmillan's and Simon & Schuster's consent decrees prohibit them from restricting any retailer's authority to set prices. The injunctive order does not alter the terms of those decrees. Instead, it provides relief against a *different* party by limiting Apple's authority **[**119]** **[*337]** to negotiate away its ability to set prices in agreements with any of the Publisher Defendants. The fact that the order also has the effect of preventing the Publisher Defendants from restricting Apple's pricing authority does not render it "[r]elief from a final judgment, order, or proceeding" requiring a motion under *Rule 60(b)*. *Fed. R. Civ. P. 60(b)*. ***HN43***[] A consent decree is "enforced as [an] order[]," but "construed largely as [a] contract[]." *SEC v. Citigroup Global Mkts., Inc., 752 F.3d 285, 297 (2d Cir. 2014)* (internal quotation marks omitted). Its scope must be discerned within its "four corners, and not by reference to what might satisfy the purposes of one of the parties to it." *United States v. Armour & Co., 402 U.S. 673, 682, 91 S. Ct. 1752, 29 L. Ed. 2d 256 (1971)*; *see also* *Perez v. Danbury Hosp., 347 F.3d 419, 424 (2d Cir. 2003)*. An injunctive order against an entity that is not party to the consent decree and neither changes the terms of nor interprets the decree does not modify the contract and therefore does not require a *Rule 60(b)* motion. Indeed, as a practical matter, injunctions often alter the options available to other parties. *Rule 60(b)* does not hold district courts issuing injunctions to a higher standard simply because the injunction may affect rights addressed in a different party's consent decree.

Macmillan and Simon & Schuster's judicial estoppel argument fares no better. ***HN44***[] Judicial estoppel is "invoked by a court at its discretion," **[**120]** and is designed to "protect the integrity of the judicial process by prohibiting parties from deliberately changing positions according to the exigencies of the moment." *New Hampshire v. Maine, 532 U.S. 742, 749-50, 121 S. Ct. 1808, 149 L. Ed. 2d 968 (2001)* (citation omitted) (internal quotation marks omitted). While the propriety of applying estoppel depends heavily on the "specific factual context[]" before the court, we typically consider whether the party's argument is "clearly inconsistent with its earlier position," whether the party "succeeded in persuading a court to accept" that earlier position, and whether the "party seeking to assert an inconsistent position would derive an unfair advantage or impose an unfair detriment on the opposing party if not estopped."*Id. at 750-51* (internal quotation marks omitted); *see also* *Adelphia Recovery Trust v. Goldman, Sachs & Co., 748 F.3d 110, 116 (2d Cir. 2014)*. "[R]elief is granted only when the . . . impact on judicial integrity is certain." *Republic of Ecuador v. Chevron Corp., 638 F.3d 384, 397 (2d Cir. 2011)* (internal quotation marks omitted).

We conclude that DOJ's arguments in support of the injunctive order were neither so clearly inconsistent with its earlier arguments nor so unfairly detrimental to the Publisher Defendants as to warrant judicial estoppel. In support of the consent decrees, the Justice Department argued that a two-year ban on restricting retailers' abilities to **[**121]** set prices was sufficient to "allow movement in the marketplace away from collusive conditions." J.A. 1055. It then pushed for a longer, five-year restriction on agreements specifically with Apple. While facially inconsistent, we have emphasized ***HN45***[] the need to "carefully consider the contexts in which apparently contradictory statements are made to determine if there is, in fact, direct and irreconcilable contradiction." *Rodal v. Anesthesia Grp. of Onondaga, P.C., 369 F.3d 113, 119 (2d Cir. 2004)*. And here, context is particularly important. The consent decrees ban certain agreements between the Publisher Defendants and *any* retailers. The injunctive order, on the other hand, pertained only to the Publisher Defendants' agreements with Apple. Given the extensive factfinding at **[*338]** trial about the relationship that Apple developed with the Publisher Defendants and its willingness to coordinate their conspiracy, DOJ had a basis for distinguishing the length of the restrictions in the consent decrees from those in the injunctive order. This was not a case of a party reversing courses, to the detriment of the legal system, "simply because his interests have changed." *New Hampshire, 532 U.S. at 749*.

Furthermore, the district court did not approve the Justice Department's request for a five-year ban on **[**122]** all discounting restrictions between Apple and the Publisher Defendants. Instead, the injunctive order adopts an interval-based system, which prevents Apple from agreeing to limit its pricing authority for between 24 and 48 months depending on the Publisher Defendant. The district court imposed this interval system so "there would be no point in time when Apple would be renegotiating with all of the publisher defendants at once[, and] no one point in time when [a] publisher defendant[] could be assured that it was taking the same bargaining position as its peers vis-à-vis Apple." J.A. 2376. This independent rationale for the injunctive order ensures that DOJ's argument did not produce "inconsistent results" or compromise the integrity of the judicial process. *Simon v. Safelite Glass Corp., 128 F.3d 68, 72 (2d Cir. 1997)*.

B. Apple

Apple, like Macmillan and Simon & Schuster, objects to the portion of the injunctive order preventing it from agreeing to limit its pricing authority. In addition, the company asks us to vacate another provision, which requires it to "apply the same terms and conditions to the sale or distribution of an E-book App through Apple's App Store as [it] applies to all other apps sold or distributed through [the] App Store." **[**123]** S.P.A. 207. Apple contends that neither provision is necessary to protect the public.[26] We disagree.

[*339] ***HN48***[] "A Government plaintiff, unlike a private plaintiff, must seek to obtain relief necessary to protect the public from *further* anticompetitive conduct and to redress anticompetitive harm." *F. Hoffmann-La Roche Ltd. v. Empagran S.A., 542 U.S. 155, 170, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)* (emphasis added). Thus, "[w]hen the purpose **[**125]** to restrain trade appears from a clear violation of law, it is not necessary that all untraveled roads to that end be left open and that only the worn one be closed." *Int'l Salt Co. v. United States, 332 U.S. 392, 400, 68 S. Ct. 12, 92 L. Ed. 20 (1947)*, *abrogated on other grounds by* *Ill. Tool Works Inc. v. Independent Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. The district court has "large discretion to model [its] judgments to fit the exigencies of the particular case," *id.*, and "all doubts" about the remedy are to be "resolved in [the Government's] favor," *United States v. E.I. du Pont de Nemours & Co., 366 U.S. 316, 334, 81 S. Ct. 1243, 6 L. Ed. 2d 318 (1961)*.

The district court was well within its discretion to restrict Apple's ability to give up its pricing authority and to require that Apple treat ebook applications the same way that it treats other applications. Apple relinquished its authority to set prices as part of its conspiracy with the Publisher Defendants. By delaying Apple's ability to renegotiate similar restrictions and arranging for the restrictions to expire at different times for each Publisher Defendant, the injunctive

[26] Apple also argues that the district court's decision to appoint a monitor to supervise the company's compliance with the injunction went beyond its powers under the Sherman Act and violated both *Federal Rule of Civil Procedure 53* and separation-of-powers principles. Apple devoted only two conclusory sentences to these three separate facial challenges to the district court's authority. We therefore deem the arguments forfeited and do not consider them. *Frank v. United States, 78 F.3d 815, 833 (2d Cir. 1996)* (***HN46***[] "Issues not sufficiently argued are in general deemed waived and will not be considered on appeal."), *vacated on other grounds*, ***521 U.S. 1114, 117 S. Ct. 2501, 138 L. Ed. 2d 1007 (1997)***; *Zhang v. Gonzales, 426 F.3d 540, 545 n.7 (2d Cir. 2005)*. We also note that, following *Rule 53*'s amendment in 2003, the Advisory Committee stated that ***HN47***[] "[r]eliance on a master" appointed under that Rule "is appropriate when a complex decree requires complex policing, particularly when a party has proved resistant or intransigent," and that both the Supreme Court and this Court have approved such appointments. *Fed. R. Civ. P. 53* advisory committee's note (2003 Amendments) (citing *Local 38 of the* *Sheet Metal Workers' Int'l Ass'n v. E.E.O.C., 478 U.S. 421, 481-82, 106 S. Ct. 3019, 92 L. Ed. 2d 344 (1986))*; *see also* *Republic of the Philippines v. N.Y. Land Co., 852 F.2d 33, 36-37 (2d Cir. 1988)* (collecting cases). In light of this background, it would be inappropriate to excuse Apple's failure to argue and for this panel **[**124]** to entertain its facial challenges to the district court's authority on the scant briefing before us.

Judge Jacobs, who sat on a separate panel of this Court that considered an as-applied challenge to the monitor's conduct, contends that "the injunction warps the role of a neutral, court-appointed referee into that of an adversary party." Dissenting Op. at 36. Whatever the merits of this argument, it is not properly before us on this appeal. Here, Apple has asserted only (and without argumentation of any sort) that appointing a monitor, *in general*, violates the Sherman Act, *Rule 53*, and separation-of-powers principles. The dissent's position eschews that broad facial challenge and instead focuses on the conduct of the monitor in this *particular* case, drawing entirely on a record not before this panel, but presented to a *separate* panel in another appeal. *See* *United States v. Apple Inc., 787 F.3d 131, 2015 U.S. App. LEXIS 8854, 2015 WL 3405534 (2d Cir. 2015)*. We do not believe it is proper to resolve this appeal with reference to arguments that Apple has failed to make.

order ensured that Apple and the Publisher Defendants would not be able to use that same strategy as part of a new conspiracy. The provision requiring ebook applications in the App Store to receive the same terms and conditions as other applications furthers that goal. The district court expressed concern that **[**126]** Apple and the Publisher Defendants may use ebook applications to circumvent the injunction's rules about Apple's pricing authority, or that Apple may impose restrictions on ebook applications to punish publishers who refused to act in concert with their competitors. For instance, the court found evidence that Random House eventually joined the iBookstore on Apple's desired terms in part because Apple prevented the company from launching an ebook application in the App Store. The district court was therefore correct to decide that these provisions of the injunctive order were "necessary to protect the public from further anticompetitive conduct." *F. Hoffmann-La Roche, 542 U.S. at 170*.

CONCLUSION

We have considered the appellants' remaining arguments and find them to be without merit. Because we conclude that Apple violated *§ 1* of the Sherman Act by orchestrating a horizontal conspiracy among the Publisher Defendants to raise ebook prices, and that the injunctive relief ordered by the district court is appropriately designed to guard against future anticompetitive conduct, the judgment of the district court is **AFFIRMED**.

Concur by: Raymond J. Lohier (In Part)

Concur

Lohier, *Circuit Judge*, concurring in part and concurring in the judgment:

I join **[**127]** in the majority opinion except for part II.B.2 relating to the application of the rule of reason. In my view, Apple's appeal rises or falls based on the application of the per se rule. That rule clearly applies to the central agreement in this case (and the only agreement alleged to be unlawful): the publishers' horizontal **[*340]** agreement to fix ebook prices. Cf. *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 893, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* (vertical agreements "may . . . be useful evidence for a plaintiff attempting to prove the existence of a horizontal cartel"). I would affirm on that basis alone.

That said, I recognize that the publisher defendants, who used Apple both as powerful leverage against Amazon and to keep each other in collusive check, may appear to be more culpable than Apple. And there is also some surface appeal to Apple's argument that the ebook market, in light of Amazon's virtually uncontested dominance, needed more competition. But more corporate bullying is not an appropriate antidote to corporate bullying. It cannot have been lawful for Apple to respond to a competitor's dominant market power by helping rival corporations (the publishers) fix prices, as the District Court found happened here. However sympathetic Apple's plight and the publishers' **[**128]** predicament may have been, I am persuaded that permitting "marketplace vigilantism," Majority Op. at 9, would do far more harm to competition than good, would be disastrous as a policy matter, and is in any event not sanctioned by the Sherman Act.

Dissent by: DENNIS JACOBS

Dissent

DENNIS JACOBS, Circuit Judge, dissenting:

I respectfully dissent.

This appeal is taken by Apple Inc. from a judgment in the United States District Court for the Southern District of New York (Cote, J.), awarding an antitrust injunction in favor of the United States, 31 states, the District of Columbia, and the Commonwealth of Puerto Rico. The plaintiffs' claims are premised on Apple's conduct as a prospective retailer of e-books. I vote to reverse.

* * *

I have no quarrel with the district court's conscientious findings of fact; I affirmatively rely on them, and cite them throughout. The 156 pages of findings track communications and interactions that happened over the 48-day course of events, detail by detail. See *United States v. Apple Inc., 952 F. Supp. 2d 638, 655-81 (S.D.N.Y. 2013)* ("Apple I"). All that is needed to decide the case, however, are the schematic facts that show the architecture of the horizontal and vertical arrangements and the dynamics of the competitive forces. They are set out in **[**129]** a nutshell in the following paragraphs, and at somewhat greater length in the Background section of this opinion.

As Apple was preparing the launch of its first iPad tablet in 2009, the company recognized that the device could support e-books, and gave consideration to including an e-book retail platform. However, Amazon had preceded Apple in the market, had established a 90 percent ascendency in sales of e-books, and was effectively excluding new entrants by offering bestsellers at a price ($9.99) that for many books was below the prices Amazon was paying publishers.

Although Apple was positioned to enter the retail market, it was unwilling to do so on terms that would incur a loss on e-book sales (as would happen if it met Amazon's below-cost price), or that would impair its brand and likely fail (as would happen if it charged more than Amazon). So, as a condition to its entry as a competing buyer for the publishers' wares, Apple insisted that the publishers agree to a distribution model that would lower that barrier to retail entry.

The new distribution model was implemented by several terms in Apple's contracts **[*341]** with publishers: agency pricing, tiered price caps, and a most-favored-nation **[**130]** clause. It is conceded that none of those terms is, standing alone, illegal. Apple also encouraged publishers to implement agency pricing in their contracts with other retailers. Although publishers were unhappy about Amazon's below-cost price for e-books (which eroded the publishers' hardcover sales) no one publisher alone could counter Amazon. In short order, five of the country's six largest publishers agreed to Apple's terms and jointly pressured Amazon to adopt agency pricing. The publishers thereby prevailed in what the district court found to be a horizontal price-fixing conspiracy. The barrier to entry thus removed, Apple entered the retail market as a formidable competitor. In the deconcentrated market, Amazon's 90 percent market share is now 60 percent.

(I acknowledge that, in adducing facts found by the district court, this opinion unavoidably casts imputations on Amazon. Fairness requires acknowledgment that Amazon has not appeared in this litigation and has not had a full opportunity to dispute the district court's findings or characterizations. Moreover, the fact of Amazon's monopoly alone would not support an inference that Amazon's behavior was in any way unlawful.)

[131]** The Department of Justice, 31 states, the District of Columbia, and the Commonwealth of Puerto Rico sued Apple and the five publishers for conspiracy in unreasonable restraint of trade, in violation of *§ 1* of the Sherman Antitrust Act, *15 U.S.C. § 1*. The publishers settled, and Apple proceeded to a bench trial. The district court ruled that Apple's conduct as a vertical enabler of the publishers' horizontal price conspiracy constituted a violation *per se* of *§ 1*, and that (in any event) Apple's conduct would also violate *§ 1* under the rule of reason. On this appeal, a majority affirms only on the ground of liability *per se*. See Op. of Judge Lohier, ante, at 1. Since I would reverse, I consider as well the rule of reason. Judge Livingston's opinion argues (for herself alone) that the judgment could be affirmed on that alternative ground.

The district court committed three decisive errors:

- The district court ruled (and the majority affirms) that a vertical enabler of a horizontal price-fixing conspiracy is in *per se* violation of the antitrust laws. However, the Supreme Court teaches that a vertical agreement designed to facilitate a horizontal cartel "would need to be held unlawful *under the rule of reason*." *Leegin*

Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 893, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007) (emphasis added). **(POINT I)**

• The district court's alternative ruling under the rule of reason was predetermined by its (erroneous) *per se* ruling. Thus the district court assessed impacts on competition without recognizing that Apple's role as a vertical player differentiated it from the publishers. The court should instead have considered Apple as a competitor on the distinct horizontal plane of retailers, where **[**132]** Apple competed with Amazon (and smaller players such as Barnes & Noble). **(POINT II)**

• Apple's conduct, assessed under the rule of reason on the horizontal plane of retail competition, was unambiguously and overwhelmingly pro-competitive. Apple was a major potential competitor in a market dominated by a 90 percent monopoly, and was justifiably unwilling to enter a market on terms that would assure a loss on sales or exact a toll on its reputation. In that connection, the district court erroneously **[*342]** deemed the monopolist's $9.99 price as categorically good for competition because it was lower than cost, and because e-book prices rose after the monopoly was broken. **(POINT III)**

A further and pervasive error (by the district court and by my colleagues on this appeal) is the implicit assumption that competition should be genteel, lawyer-designed, and fair under sporting rules, and that ***antitrust law*** is offended by gloves-off competition.

BACKGROUND

From the 2007 inception of the U.S. retail market for e-books through 2009, Amazon "dominated the e-book retail market, selling nearly 90% of all e-books." *Apple I, 952 F. Supp. 2d at 649*. It assured its domination by charging its retail customers $9.99 for new releases and bestsellers, **[**133]** below the wholesale price that Amazon was paying to publishers. *Id. at 649-50, 708*. The popular media reported that Amazon "takes a loss on the sale of the most popular e-books." *Id. at 652*. That pricing deterred potential retail competitors from entering the relevant market--"trade e-books in the United States"[1]--because an entrant "would run the risk of losing money if it tried or was forced to match Amazon's pricing to remain competitive." *Id. at 658*.

Amazon's below-cost pricing was also a threat to publishers, because at a $9.99 price point, e-books cannibalized sales of (more profitable) hardcover editions. *Id. at 649*. Although the major publishers believed Amazon's below-cost pricing was "predatory," *id. at 653*, each publisher understood that it was powerless to take on Amazon, *id. at 650*. Publishers feared that Amazon might "compete directly with publishers by negotiating directly with authors and literary agents for rights," *id. at 649*, and might "retaliate" against insubordinate publishers "by removing the 'buy buttons' on the Amazon site that allow customers to purchase books . . . or by eliminating [a publisher's] products from its site altogether," *id. at 679*. One publisher, Macmillan, suffered **[**134]** such retaliation when Amazon removed the "buy buttons" for print and e-book versions of Macmillan titles. Id.

Amazon's 90 percent market share constituted a monopoly under ***antitrust law***. See, e.g., *Am. Tobacco Co. v. United States, 328 U.S. 781, 797, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)* (characterizing as "a substantial monopoly" a market share of "over 80% of the field"); 3B Areeda & Hovenkamp, ***Antitrust Law*** ¶ 801 (3d ed. 2008). Amazon's below-cost pricing was a barrier to entry by Apple in 2009, when it contemplated entry into the e-book retail market via the iPad.[2] *Apple I, 952* ***[*343]*** *F. Supp. 2d at 654, 658*. Apple nevertheless undertook to develop an e-book

---

[1] The parties did not dispute this market definition. *Apple I, 952 F. Supp. 2d at 694 n.60*.

[2] While the district court did not use the label "barrier to entry," its findings of fact made the point clearly. In finding that a new entrant to e-book retail in 2009 "would run the risk of losing money if it tried or was forced to match Amazon's pricing to **[**135]** remain competitive," *Apple I, 952 F. Supp. 2d at 658*, the district court left no doubt that the effect of Amazon's below-cost pricing regime was to "impede entry and protect existing market power"--the basic operation of a barrier to entry, 2B Areeda & Hovenkamp, supra, ¶ 420c, at 78.

retail platform in time for the iPad's launch, scheduled for January 27, 2010. *Id. at 654-55*. However, "Apple did not have to open an e-bookstore when it launched the iPad"; and it was willing to enter the market only on the condition that its e-book retail business would be profitable, such that Apple could "compete effectively with Amazon" without adopting a loss-leadership and below-cost pricing strategy. *Id. at 656-59*.

Apple opened extensive negotiations with publishers to determine how if at all it could enter the e-book retail market. *Id. at 655-57*. Apple met with the leaders of the six largest publishing houses in the United States: Hachette, HarperCollins, Macmillan, Penguin, Random House, and Simon & Schuster. *Id. at 647, 655*. At the outset, Apple understood that the publishers were unhappy with Amazon's below-cost pricing of e-books; **[**136]** so Apple knew that the publishers "were willing to coordinate their efforts" to combat the $9.99 price point. *Id. at 656*.

After some weeks, Apple and several publishers devised a new model for e-book distribution. Amazon had been paying a wholesale price for each e-book, and reselling (often at a loss) for a retail price of its choosing. Apple's distribution contracts would adopt an agency system: publishers would set the retail prices of e-books sold through Apple's platform and Apple would take a fixed-percent commission on each sale. *Id. at 659*. However, the agency model would expose Apple (or any retailer) to risk, because publishers might protect hardcover sales by setting retail prices for e-books so high that Apple would appear out of touch with consumers aware of Amazon's $9.99 price. Id. Apple's solution was twofold. First, the proposed agency contract included a most favored nation ("MFN") clause, under which publishers must price their new releases in Apple's store at or below the lowest price offered by any other e-book retailer. *Id. at 662*. The district court found that the MFN clause "effectively forced" each publisher that signed Apple's agency contract to move its other retailers onto the **[**137]** agency model. *Id. at 664*. That is because, once Apple's cost was set as a percentage of the retail price, the publishers would suffer if Apple matched Amazon's $9.99 retail price. Second, the proposed contract included maximum prices for various categories of e-books. *Id. at 661-62*. The district court found that these tiered price caps had the effect of setting anchor prices across the e-book industry. *Id. at 670*. Nonetheless, as the district court observed, these terms are *not* inherently illegal, and "entirely lawful contracts may include an MFN, price caps, or pricing tiers." *Id. at 698*.

As Apple negotiated with publishers to sign the agency contract, it told each major publisher that all signing publishers would receive the same terms. *Id. at 667*. In the end, five of the six largest publishers signed Apple's agency contract. *Id. at 673*. (Only Random House, the country's largest, did not. Id.) As the district court found, the five signatories represented "over 48% of all e-books in the United States" when they signed Apple's agency contract. *Id. at 648*. Apple unveiled its e-book retail platform--the "iBookstore"--at the first public demonstration of the iPad on January 27, 2010. *Id. at 678-79*.

After the publishers signed on to Apple's agency **[**138]** contract, they had to focus on Amazon's adoption of the agency model because otherwise (as explained above) the MFN clause would allow Apple to match Amazon's price for bestsellers, and pay the publishers no more than a percentage **[*344]** commission on $9.99. However, "the [p]ublishers feared retaliation from Amazon unless they acted in unison," *id. at 670*, and "needed reassurance that they would not be alone," *id. at 674*. An Apple executive liaised with each of the five signatory publishers, to encourage a "united front" in their negotiations with Amazon, and to keep the publishers "apprised about who was in and how many were on board." *Id. at 673*. The publishers also communicated directly with each other. *Id. at 674-77*. When Amazon realized that the five publishers were acting in concert, it acceded and signed the agency contracts. *Id. at 680-82*.

Those are the findings on which Apple was adjudged to have committed an antitrust violation. The putative violation amounted to: (a) embedding the agency model (complete with MFN clauses and price caps) in Apple's own

---

The majority disputes whether there was any barrier to entry under Amazon's below-cost pricing regime, because at least one competitor attempted to join the market. See Op. of Judge Livingston, ante, at 13 (for the Court), 100. Even if that entrant had any chance of success (nobody contends that it sold a meaningful number of e-books, or made any money, or reduced Amazon's mammoth market share to less than 90 percent), that fact need not imply ease of entry because "a barrier may protect a market incumbent without completely excluding entry." 2B Areeda & Hovenkamp, supra, ¶ 420a, at 73.

contracts with publishers and (b) encouraging the publishers to coordinate horizontally in their efforts to push the industry-wide adoption of the agency model. Apple and the publishers **[**139]** shared the motive to increase the publishers' pricing power in order to deprive Amazon of its monopoly. They succeeded: as the district court noted earlier in this litigation, "Amazon's market share in e-books decreased from 90 to 60 percent in the two years following the introduction of agency pricing." *United States v. Apple, Inc., 889 F. Supp. 2d 623, 640 (S.D.N.Y. 2012)*.

*** * ***

The foregoing Background accepts and relies upon the district court's findings of fact. One cannot say the same of Judge Livingston's opinion, which supports its legal conclusions and its market analysis with novel findings made now on appeal, i.e., remand by other means. A few examples:

- The notion that Amazon's below-cost pricing was loss-leadership "designed to encourage consumers to adopt the Kindle," Op. of Judge Livingston, ante, at 13 (for the Court), is a novelty, supported by neither the fact findings nor the record. At any rate, the effect of e-book pricing outside of the relevant market is irrelevant.

- The majority asserts that Amazon's below-cost pricing was limited to only "a small loss" on only "a small percentage of its sales." Id. at 85 (for the Court). These observations are apparently drawn from a submission by Amazon, downplaying the anti-competitive effects of its **[**140]** monopoly-protective pricing. The district court did not rely on these statistics, presumably because they are misleading and self-serving: they ignore that the minority of titles comprising new releases and bestsellers naturally have an outsize impact on the industry. Accordingly, the district court found that the below-cost pricing had consequences on the market, namely that a new entrant "would run the risk of losing money if it tried or was forced to match Amazon's pricing to remain competitive." *Apple I, 952 F. Supp. 2d at 658*.

- I can find no record support for the narrative that Amazon's market share was eroding before Apple's entry, that the iPad "promised to introduce more competition with or without Apple's iBookstore," and that the publishers thereby enjoyed increased negotiating leverage. Op. of Judge Livingston, ante, at 103-04. Similarly, the assertion that Barnes & Noble disrupted Amazon's dominance in the e-book market, see id. at 103, is supported neither by the district court's findings nor by the record.

[*345] By contrast, my antitrust analysis relies on the findings made by the district court, and incorporates no others, in order (a) to avoid factual disputes with my colleagues, (b) to defer to the district **[**141]** court's thorough fact findings in arriving at my legal conclusions, and (c) to respect the limited role of appellate courts.

DISCUSSION

I

The district court's principal legal error, from which other errors flow, is its conclusion that Apple violated *§ 1* under the *per se* rule. Having found that the publishers' coordinated strategy was a horizontal price-fixing conspiracy, and that Apple had facilitated that conspiracy in its vertical relationship with the publishers, see *Apple I, 952 F. Supp. 2d at 691*, the district court drew the legal conclusion that these facts established a *per se* violation of the Sherman Act by Apple. This appeal turns on whether purely vertical participation in and facilitation of a horizontal price-fixing conspiracy gives rise to *per se* liability.

Section 1 of the Sherman Act "outlaw[s] only *unreasonable* restraints"; so a court weighing an alleged violation "presumptively applies rule of reason analysis, under which antitrust plaintiffs must demonstrate that a particular contract or combination is in fact unreasonable and anticompetitive before it will be found unlawful." *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* (quoting *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*. The exception, liability *per se*, is reserved for those categories of behavior so definitively and universally anti-competitive that **[**142]** a court's consideration of market forces and reasonableness would be pointless. Id. Traditionally, restraints that are *per se* unlawful take the form of horizontal agreements "raising, depressing, fixing, pegging, or stabilizing the price of a commodity." *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*.

Among modern cases, the *per se* rule takes aim exclusively at *horizontal* agreements, because "competition among the manufacturers of the same [product] . . . is the primary concern of ***antitrust law***." *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 52 n.19, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. Accordingly, the trend of ***antitrust law*** has been a steady constriction of the *per se* rule in the context of vertical relationships. See, e.g., *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 901, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* (holding that vertical agreements for minimum prices are not *per se* violations); *State Oil Co., 522 U.S. at 7* (holding that vertical agreements for maximum prices are not *per se* violations); *Continental T.V., 433 U.S. at 59* (holding that vertical non-price restraints are not *per se* violations); *White Motor Co. v. United States, 372 U.S. 253, 261-64, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1963)* (holding that vertical territorial restraints are not *per se* violations). The cases have "continued to temper, limit, or overrule once strict prohibitions on vertical restraints." *Leegin, 551 U.S. at 901*.

A vertical relationship that facilitates a horizontal price conspiracy does not amount to a *per se* violation. In another age, the Supreme Court treated such a hub-and-spokes conspiracy **[**143]** as a *per se* violation. See *Interstate Circuit, Inc. v. Paramount Pictures Distrib. Co., 306 U.S. 208, 226-27, 59 S. Ct. 467, 83 L. Ed. 610 (1939)*. But the *per se* rule has been in steady retreat.

The most recent and explicit signal is given in Leegin, which explains that "the **[*346]** Sherman Act's prohibition on 'restraints of trade' evolves to meet the dynamics of present economic conditions," such that "the boundaries of the doctrine of *per se* illegality should not be immovable." *551 U.S. at 899-900* (alterations omitted). Leegin held that a manufacturer did not commit a *per se* violation of *§ 1* when it agreed with several retailers on a minimum price that the retailers could charge--a holding that overruled a century-old principle articulated in *Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 31 S. Ct. 376, 55 L. Ed. 502 (1911)*. See *Leegin, 551 U.S. at 881*. Leegin reasoned that Dr. Miles had "treated vertical agreements a manufacturer makes with its distributors as analogous to a horizontal combination among competing distributors," but that, "[i]n later cases, . . . the Court rejected the approach of reliance on rules governing horizontal restraints when defining rules applicable to vertical ones." *Leegin, 551 U.S. at 888*. Dr. Miles was held to be inconsistent with "[o]ur recent cases[,] [which] formulate antitrust principles in accordance with the appreciated differences in economic effect between vertical and horizontal agreements, differences the Dr. Miles Court **[**144]** failed to consider." Id.

Although the express holding of Leegin does not extend beyond the overruling of Dr. Miles, the Court's analysis reinforces the doctrinal shift that subjects an ever-broader category of vertical agreements to review under the rule of reason. The Court first stated the subsisting scope of *per se* liability:

> A horizontal cartel among competing manufacturers or competing retailers that decreases output or reduces competition in order to increase price is, and ought to be, *per se* unlawful.

Leegin, 551 U.S. at 893. The Court then rejected *per se* liability for hub-and-spokes agreements, in wording that prescribes rule-of-reason review of vertical dealings that facilitate *per se* unlawful horizontal agreements (the type of agreement that the district court found Apple had undertaken):

> To the extent a vertical agreement setting minimum resale prices is entered upon to *facilitate* either type of cartel [among manufacturers or among retailers], it, too, *would need to be held unlawful under the rule of reason*.

Id. (emphasis added). After Leegin, we cannot apply the *per se* rule to a vertical facilitator of a horizontal price-fixing conspiracy; such an actor must be held liable, if at all, "under the **[**145]** rule of reason." Id.

Leegin is animated by the "appreciated differences in economic effect between vertical and horizontal agreements." *Id. at 888*. Since every challenged restraint is thus classified as either horizontal or vertical, one may draw certain reliable inferences: vertical agreements are not presumptively subject to *per se* liability; the vertical nature of the agreement is its salient feature; the influence of a vertical arrangement on a horizontal cartel (on another plane of competition) does not render the vertical arrangement *per se* unlawful.

Our only sister circuit to have considered this wording from Leegin arrived at the conclusion I draw. In *Toledo Mack Sales & Service, Inc. v. Mack Trucks, Inc., 530 F.3d 204, 225 (3d Cir. 2008)*, a manufacturer used its contracts with distributors to facilitate and enforce a horizontal conspiracy (among the distributors) that was itself illegal *per se*. See *id. at 210*. The Third Circuit held that Leegin's instruction--that the vertical arrangement "would need to be held unlawful under the rule of reason"--prescribed the rule of reason as **[*347]** the proper analysis for whether the vertical conduct violated *§ 1*. See *id. at 225*.

Taking the opposite tack, the majority opinion on this appeal insists that a vertical facilitator of a horizontal conspiracy is **[**146]** liable *per se*, even after Leegin. In support of that argument, the majority cites seven cases that pre-date Leegin.[3] Op. of Judge Livingston, ante, at 73-77 (for the Court). The majority cites only one post-Leegin case that considers this question: namely, the Third Circuit's analysis of a conspiracy that involved both vertical *and* horizontal relationships, concluding that the horizontal relationships violated *§ 1* *per se* and that pursuant to Leegin the vertical relationships "would have to be analyzed under the traditional rule of reason."[4] *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 318 (3d Cir. 2010)*.

The majority's holding in this case therefore creates a circuit split, and puts us on the wrong side of it.

"[H]orizontal agreements *as a class* deserve stricter scrutiny than . . . vertical agreements," because horizontal agreements "pose the most significant dangers of competitive harm." 11 Areeda & Hovenkamp, supra, ¶ 1902a, at 232. Horizontal price conspiracies are illegal *per se* because motives of horizontal players are aligned and dominant and create irresistible temptations. See, e.g., Adam Smith, The Wealth of Nations 207 (Collier 1902) (1776) ("People **[**148]** of the same trade seldom meet together . . . , but the conversation ends in a conspiracy against the public, or in some contrivance to raise prices.").

Collusion among competitors does not describe Apple's conduct or account for its motive. Apple's conduct had no element of collusion with a horizontal rival. Its own rival in competition was (and presumably is) Amazon; and that competition takes place on a horizontal plane distinct from the plane of the horizontal conspiracy among the publishers. All Apple's energy **[*348]** --all it did that has been condemned in this case--was directed to weakening

---

[3] The cases are cited by the majority in this order: *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*; *United States v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; Toys "R" *Us, Inc. v. FTC, 221 F.3d 928 (7th Cir. 2000)*; *Denny's Marina, Inc. v. Renfro Productions, Inc., 8 F.3d 1217 (7th Cir. 1993)*; *United States v. MMR Corp., 907 F.2d 489 (5th Cir. 1990)*; *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*; *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*.

Just as unhelpfully, the majority cites dicta from a Sixth Circuit case affirming the dismissal of a lawsuit that alleged a hub-and-spokes conspiracy. See *Total Benefits Planning Agency, Inc. v. Anthem Blue Cross & Blue Shield, 552 F.3d 430 (6th Cir. 2008)*. The majority cites the case as if its holding supports the continued legitimacy of the hub-and-spokes theory after Leegin, a flawed interpretation given the Sixth Circuit's disposition on the hub-and-spokes claim. *Id. at 435* (holding that plaintiffs inadequately alleged a *horizontal* conspiracy and that, after Leegin, "all *vertical* price restraints are to be judged under the rule-of-reason standard" (emphasis added)).

[4] The Third Circuit **[**147]** analyzed a network of restraints, including a conspiracy among insurance brokers, a conspiracy among insurers, and agreements that connected the brokers and insurers. The court explained Leegin's impact this way:

> Under the Supreme Court's jurisprudence, virtually all vertical agreements now receive a traditional rule-of-reason analysis. See *Leegin, 551 U.S. 877, 127 S. Ct. 2705, 168 L. Ed. 2d 623*. In the factual context of this case, a horizontal agreement means . . . an agreement among either the brokers or the insurers in the global conspiracy. Agreements between brokers and insurers, on the other hand, are vertical and would have to be analyzed under the traditional rule of reason.

In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 318-19 (3d Cir. 2010) (internal citation and footnote omitted).

its competitive rival, and pushing it aside to make room for Apple's entry. On the only horizontal plane that matters to Apple's e-book business, Apple was in competition and never in collusion. So it does not do to deem Apple's conduct anti-competitive just because the publishers' horizontal conspiracy was found to be illegal *per se*.

"[V]ertical agreements are a customary and even indispensable part of the market system" and so do not represent the same presumptive threat to competition. 11 Areeda & Hovenkamp, supra, ¶ 1902d, at 240. Even a vertical agreement designed to decrease competition among competitors does not pose the threat to **[**149]** market competition that is posed by a horizontal agreement, for two reasons: (1) market forces (such as countervailing measures by competitors) are categorically more effective in countering anti-competitive vertical agreements, and (2) vertical agreements are so fundamental to the operation of the market that uncertainty about the legality of vertical arrangements would impose vast costs on markets. Id. at 240-41. Such market realities are driving the evolution of ***antitrust law***, which has "rejected the approach of reliance on rules governing horizontal restraints when defining rules applicable to vertical ones." *Leegin, 551 U.S. at 888*.

The present case illustrates why *per se* treatment is not given to vertical agreements that facilitate horizontal conspiracies. Assuming (as is uncontested on appeal) that the publishers violated *§ 1* *per se* through their coordination, Apple's promotion of that horizontal conspiracy was limited to vertical dealings.

The *per se* rule is inapplicable here for another independent reason: The *per se* rule does not apply to arrangements with which the courts are not already well-experienced. *Leegin, 551 U.S. at 887*. As the government conceded at oral argument, no court has previously considered a restraint of this kind. **[**150]** Several features make it sui generis: (a) a vertical relationship (b) facilitating a horizontal conspiracy (c) to overcome barriers to entry in a market dominated by a single firm (d) in an industry created by an emergent technology.

As I undertake to show in my analysis under the rule of reason, below, the restrictive market conditions Apple faced and the pro-competitive results of Apple's conduct make its vertical dealings categorically reasonable. Even if one tests that conclusion under the rule of reason, the analysis is sufficiently complex and yields such substantial pro-competitive results that *per se* liability is an abdication of the duty to distinguish reasonable restraints from those that are unreasonable.

II

Having concluded first that Apple's conduct was anti-competitive *per se*, corollary errors followed when the district court turned to the rule of reason. Once a court finds that a party acted unreasonably *per se* in a set of transactions, an epiphany is required for the court to conclude that the same party acted reasonably doing the same acts in the same role at the same time. The influence arising from the district court's *per se* accusation of wrongdoing infected all analysis **[**151]** that followed. Once Apple was deemed to have joined a conspiracy that was illegal *per se*, its goal, motive, and conduct seemingly needed (and got) no additional scrutiny--legal or moral or economic.

Having confirmed Apple's *per se* liability by conflating the horizontal plane of competition among publishers with the horizontal plane of competition among retailers, **[*349]** the district court committed the same error in its rule of reason analysis. Thus the district court (as explained below) overstated the anti-competitive nature of Apple's vertical dealings and overlooked the pro-competitive effects on retail competition--the horizontal plane on which Apple does e-book business. "The district court did not analyze the state of competition between ebook retailers," as the majority concedes. Op. of Judge Livingston, ante, at 44 (for the Court) (emphasis omitted). Exactly.

Judge Livingston's opinion succumbs to the same fallacy by declaring the majority's own *per se* analysis so overwhelming that full rule-of-reason scrutiny requires no more than a "quick look." Quick-look analysis is an appropriate tool only when "an observer with even a rudimentary understanding of economics could conclude that **[**152]** the arrangements in question would have an anticompetitive effect." *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*. Quick-look analysis is not a tool for cutting corners. Judge Livingston's opinion justifies quick-look analysis by referring to e-book price increases that form the majority's earlier argument for the application of the *per se* rule, see Op. of Judge Livingston, ante, at 93--price increases that, at any rate, are the expected result when monopolistic below-cost pricing dissipates.

In form and substance, Judge Livingston's analysis demonstrates that when one starts with a finding of unreasonableness *per se*, the rule of reason analysis is tainted. It is called confirmation bias. The characterization of Apple's conduct as "vigilantism" is telling. Op. of Judge Livingston, ante, at 9 (for the Court), 98. Use of that word either assumes the conclusion that the conduct is illegal, or else confuses it with self-help (which used to be a virtue).

III

On this appeal, we have reached no majority as to the rule of reason. Judge Livingston writes for herself alone that, as an alternative to the *per se* rule, she would also affirm under the rule of reason; without a second judge supporting this conclusion, it is dicta, because our **[**153]** affirmance is based on the *per se* theory adopted by two judges. Unlike my colleagues, I must address the rule of reason, because my vote to reverse depends on my conclusion that this alternative theory of liability is every bit as untenable as liability *per se*.

Analysis under the rule of reason--whether conducted in full or by an *untainted* quick look--compels the conclusion that Apple did not violate *§ 1* of the Sherman Act. The issue is decided by comparing (a) the restrictive effect of Apple's dealings with (b) the pro-competitive result of deconcentrating a market that had been dominated by a monopolist and insulated from competition through below-cost pricing.

Under the rule of reason, the initial burden rests with the plaintiffs "to demonstrate the defendants' challenged behavior had an *actual* adverse effect on competition as a whole in the relevant market." *Geneva Pharms. Tech. Corp. v. Barr Labs. Inc., 386 F.3d 485, 506-07 (2d Cir. 2004)* (internal quotation marks omitted). Upon plaintiffs' showing of such an effect, "the burden shifts to the defendants to offer evidence of the pro-competitive effects of their agreement," and then "the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved **[**154]** through less restrictive means." Id. The reasonableness of the restraint then boils down to whether the dominant effect of the agreement is to promote competition or restrain it. Id.

[*350] Analysis begins with an accounting of anti-competitive effects. Apple's vertical conduct consisted of negotiating the terms of its own contracts. Of course, every contract is a restraint of trade to some extent, see *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 98, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*; so this fact alone is neither here nor there.

The agency agreement that Apple signed with each publisher was innocuous: as the parties agree, each term--including the agency structure, MFN clause, and price caps--is absolutely legal. The district court so found expressly:

> The Plaintiffs do not argue, and this Court has not found, that the agency model for distribution of content, or any one of the clauses included in the Agreements, or any of the identified negotiation tactics is inherently illegal. Indeed, entirely lawful contracts may include an MFN, price caps, or pricing tiers.

Apple I, 952 F. Supp. 2d at 698. The main restraint resulting from Apple's vertical conduct was the shifting of pricing power from e-book retailers to e-book publishers. And this effect operated as a restraint only in the sense that Amazon faced **[**155]** pressure to adopt an agency model and to charge prices set by the five publishers, which of course remained in competition with each other, and with the publishers who account for the remaining 52 percent of the industry.

The district court opinion and the plaintiffs' briefs fixate on the idea that Apple ended Amazon's $9.99 price for most new releases and bestsellers, and that consumers would have preferred a lower price. But the consumer's near-term preference for low prices is not an object of ***antitrust law***. See *Brooke Grp. Ltd. v. Brown & Williamson*

Tobacco Corp., 509 U.S. 209, 237, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993). The district court charts the short-term price developments, treating the end of below-cost pricing as anti-competitive and observing with disapproval the natural tendency for prices to rise to competitive levels. The rule of reason promotes competition; it can be safely assumed that if competition sharpens, prices will take care of themselves.

As to the pro-competitive effects, the rule of reason must take account primarily of the deconcentrating of the e-book retail market. The benefit of increasing the number of firms in a market derives from the "inverse correlation between concentration and competition." Eleanor M. Fox, Economic Concentration, Efficiencies and Competition: **[**156]** Social Goals and Political Choices, in Industrial Concentration and the Market System 137, 149 (Eleanor M. Fox & James T. Halverson eds., 1979). As the district court found, Apple was weighing its entry into the retail e-book market, and the agency structure was the only way Apple would enter the market. Nobody has proposed--before *or* since Apple's entry--any "less restrictive means" by which Apple could have achieved the same competitive benefits. See *Geneva Pharms., 386 F.3d at 507* (plaintiffs' burden to prove viable and less restrictive alternative). Apple's challenged conduct broke Amazon's monopoly, immediately deconcentrated the e-book retail market, added a platform for reading e-books, and removed barriers to entry by others. And removal of a barrier to entry reduces for the long term a market's vulnerability to monopolization.[5] These effects sound in the basic **[*351]** goals of ***antitrust law***. Even if only quick-look analysis were appropriate in this case, these effects would vindicate Apple's conduct. (Judge Livingston's opinion discounts this pro-competitive effect by noting the open question whether "below-cost pricing is unlawfully anti-competitive," thereby suggesting that Apple's dismantling of the entry barrier **[**157]** could be pro-competitive only if the barrier was itself a Sherman Act violation. Op. of Judge Livingston, ante, at 97. But it is no matter whether the insuperable barrier that Apple tore down had been raised lawfully or not.)

Another pro-competitive effect is the encouragement of innovation, a hallmark and benefit of competition. Apple began retailing e-books in conjunction with its release of the iPad, a device that integrated cutting-edge functions and applications, just one of which was the capacity for users to buy and read e-books. It is impossible to know the likely course of innovation, and pro-competitive effects of innovation cannot be measured; nevertheless, the encouragement of innovation must be afforded considerable weight under the rule of reason. See generally 2B Areeda & Hovenkamp, supra, ¶ 407. Apple's business is not the technology of the clothespin.

The restraint of Apple's vertical conduct was no more than a slight offset to the competitive benefits that now pervade the relevant **[**158]** market.[6]

How else could the competitive benefits have been realized in this market? In the course of this litigation, three theories have been offered for how Apple could have entered the e-book market on less restrictive terms. Each theory misapprehends the market or the law, or both. The absence of alternative means bespeaks the reasonableness of the measures Apple took.

Theory 1: Apple could have competed with Amazon on Amazon's terms, using wholesale contracts and below-cost pricing. This was never an option. The district court found as fact that: a new entrant into the e-book retail market "would run the risk of losing money if it tried or was forced to match Amazon's pricing to remain competitive," *Apple I, 952 F. Supp. 2d at 658*; Apple was "not willing" to engage in below-cost pricing, *id. at 657*; and Apple could have avoided this money-losing price structure simply by forgoing entry to the market, see *id. at 659*. Even if Apple had been willing to adopt below-cost pricing, the result at best would have been duopoly, and the hardening of the

---

[5] Generally speaking, entry barriers permit monopolization and monopoly power allows a firm to erect entry barriers. See, e.g., *Port Dock & Stone Corp. v. Oldcastle Ne., Inc., 507 F.3d 117, 125 (2d Cir. 2007)*; *United States v. Microsoft Corp., 253 F.3d 34, 82, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (en banc); see also *Mobil Oil Corp. v. Fed. Power Comm'n, 417 U.S. 283, 302 n.23, 94 S. Ct. 2328, 41 L. Ed. 2d 72 (1974)*. Each is less likely to arise when the other is absent from a market.

[6] Amazons's below-cost prices also threatened the market for hard-copy books, see *Apple I, 952 F. Supp. 2d at 649*, and thus the royalties of authors, who may well consider that they have some role in this industry.

existing **[**159]** barrier to entry. ***Antitrust law*** disfavors a durable duopoly nearly as much as monopoly itself. See 6 Areeda & Hovenkamp, supra, ¶ 1429.

Theory 2: Apple could have entered the e-book retail market using the wholesale model and charged higher prices than Amazon's. The district court foreclosed this theory as well; it found that Apple refused to impair its brand by charging "what it considered unrealistically high prices." *Apple I, 952 F. Supp. 2d at 659*. Even if Apple had been willing to tarnish its brand by offering bad value for money, the notion that customers would actually have bought e-books from Apple at the higher price defies the law of demand. **[*352]** Higher prices may stimulate sales of certain wines and perfumes--not e-books.[7]

Nor could Apple justify higher prices for the e-books by competing on the basis of its new hardware, the iPad, because there is inter-operability among platforms. And if Apple had attempted to pursue this hardware-based competition **[**160]** by programming its iPad to run the iBookstore but to reject Amazon's Kindle application, Apple might have been exposed to an entirely different antitrust peril. See *United States v. Microsoft Corp., 253 F.3d 34, 50-80, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (en banc); Google Android, No. 40099 (Eur. Comm'n Apr. 15, 2015) (antitrust proceedings brought by European Commissioner for Competition against Google for favoring Google's own applications on mobile devices that use Google's operating system).

Theory 3: Apple could have asked the Department of Justice to act against Amazon's monopoly. Counsel for the United States actually proposed this at oral argument. At the same time, however, he conceded that the Department of Justice had already "noticed" Amazon's e-book pricing and had chosen not to challenge it because the government "regarded it as good for consumers." Any request from Apple would therefore have been futile. True, Apple could not have known that the Antitrust Division would have adopted the position that below-cost pricing is not a concern of antitrust policy: who could have guessed that the government would adopt a policy that is primitive as a matter of antitrust doctrine and illiterate as a matter of economics? Nevertheless, hindsight reveals that government **[**161]** antitrust enforcement against Amazon was not an option.

More fundamentally, litigation is not a *market* alternative. This observation has especial force in markets that are undergoing rapid technological advance, where the competitive half-life of a product is considerably more brief than the span of antitrust litigation. A requirement that potential market entrants litigate instead of enter the market on restrictive (but legal and reasonable) terms, would license monopoly for the duration.

* * *

Apple took steps to compete with a monopolist and open the market to more entrants, generating only minor competitive restraints in the process. Its conduct was eminently reasonable; no one has suggested a viable alternative. "What could be more perverse than an antitrust doctrine that discouraged new entry into highly concentrated markets?" *In re Text Messaging Antitrust Litig., 782 F.3d 867, 874 (7th Cir. 2015)*.

Application of the rule of reason easily absolves Apple of antitrust liability. That is why at oral argument the government analogized this case to a drug conspiracy, in which every player is a criminal--at every level, on every axis, whether big or small, whether new entrant or recidivist. The government found the analogy useful--and necessary--because in **[**162]** an all-criminal industry there is no justification or harbor under a rule of reason.

IV

Because I see no antitrust violation, I need not consider Apple's separate challenge to the injunction itself. My colleagues, **[*353]** for their own good reasons, do not reach that challenge either. Yet the injunction and its

---

[7] In economic terms, e-books are subject to the law of demand and therefore have negative price elasticity of demand. See generally N. Gregory Mankiw, Principles of Economics 67 (6th ed. 2012). E-books are neither Veblen goods nor Giffen goods, nor do they have perfectly inelastic demand. See id. at 92-93, 453-54, 835; Laurie Simon Bagwell & B. Douglas Bernheim, Veblen Effects in a Theory of Conspicuous Consumption, 86 Am. Econ. Rev. 349 (1996).

shortcomings bear upon the institutional interest of the courts; and Apple's challenge deserves some response. In my view, the injunction warps the role of a neutral, court-appointed referee into that of an adversary party, with predictable consequences.

The monitor is an arm of the district court, and owes loyalty in that direction only. See *Fed. R. Civ. P. 53(a)*. But the injunction redirects the loyalty of the monitor to Apple's chief adversary in the litigation, the Department of Justice. Under the injunction, the DOJ recommends the monitor (Injunction ¶ VI(A)), approves the monitor's fees (id. ¶ VI(I)), and mediates disputes between the monitor and Apple (id. ¶¶ VI(E), (H)). Thus the injunction first creates a neutral fact-finding office, and then gives an adversary the ability to decide who holds the office, how much he gets paid (out of the other side's pocket), and how broadly he may reach and inquire. **[**163]** Reciprocally, the monitor is directed to inform the government if he "discovers or receives evidence that suggests" further antitrust violations, whether or not related to this litigation. (Id. ¶ VI(F).) This is a device that must misfire.

As events have happened (and were seemingly fore-ordained) the monitor has reason to look to the DOJ with gratitude and loyalty. The DOJ recommended Michael Bromwich as monitor, and the district court appointed him. *United States v. Apple Inc., __ F.3d __, 2015 U.S. App. LEXIS 8854, 2015 WL 3405534, at *2 (2d Cir. May 28, 2015)*. Without a meaningful cap on his fee, Bromwich proposed that defendant Apple compensate him at $1,265 per hour--an eye-popping rate for service as an agent of a court. *2015 U.S. App. LEXIS 8854, [WL] at *3*. (Because Bromwich lacks antitrust expertise, he proposed to add an actual antitrust lawyer to the team at $1,025 an hour. Id.) When Apple challenged that tariff as unreasonable, Bromwich explained that the injunction gave Apple no standing to object: "the fees and expenses to be paid to the monitor and his team are not set by Apple; they are set by the monitor, with approval reserved for the DOJ and the Plaintiff States." Id. (quoting Bromwich). Bromwich was right, which is telling: the injunction contemplated no role for the judge.

Once the Department of Justice selected **[**164]** him and approved his hourly fee, Bromwich drew up his own mandate. Although the injunction contemplated that the monitor would check sufficiency of an antitrust policy that Apple was to prepare in 90 days (and Apple's compliance with it), Bromwich started his inquiry immediately on his appointment; he multiplied interviews, document inspections, and discontents; he demanded to interview Apple executives without the presence of Apple's chosen counsel; and he took aim at the competitive culture of the corporation generally--a culture that is obviously aggressive, but just as obviously no business of the courts. See *2015 U.S. App. LEXIS 8854, [WL] at *2-3, *7*.

Having thus been selected by an adversary party, paid at a rate approved by the adversary party, and directed to look to the adversary party for the mediation of disputes, Bromwich was (in every respect important to a lawyer) retained and run by the adversary. Apple had an unenviable choice: it could accept scrutiny by a lawyer whose incentives were corrupted by the injunction that created his office, or attack the fee and the widening scope of inquiry, thereby sharpening the confrontations created by the mechanics of the injunction

A magistrate judge has cut Bromwich's **[**165]** hourly fee. *2015 U.S. App. LEXIS 8854, [WL]* ***[*354]*** *at *6 n.4*. And a panel of this Court has construed narrowly the scope of the monitor's inquiries. *2015 U.S. App. LEXIS 8854, [WL] at *4*. But the structural defect of the injunction remains: allowing an arm of the court to serve as agent of an adversary party. It would take strong stuff for a lawyer to transcend the worldly incentives of this injunction: unlimited work at the (now cut) rate of $1,000 an hour, paid by a solvent party that may expect retaliation for protesting, in order to perform a monitorship subject to extension by the court for reasons that will be influenced by input from the monitor himself.

An injunction that thus blurs the lines of the adversary system does no good for the reputation of the courts.

HN1[] **Opposing Materials, Memoranda in Opposition**

N.D. Ill. Loc. R. 56.1 (*Local Rule 56.1*) is designed, in part, to aid the district court, which does not have the advantage of the parties' familiarity with the record and often cannot afford to spend the time combing the record to locate the relevant information, in determining whether a trial is necessary. *Local Rule 56.1(a)(3)* requires the moving party to provide a statement of material facts as to which the moving party contends there is no genuine issue. The non-moving party must file a response to the moving party's statement, and, in the case of any disagreement, cite specific references to the affidavits, parts of the record, and other supporting materials relied upon. *Local Rule 56.1(b)(3)(B)*. The nonmoving party also may submit a separate statement of additional facts that require the denial of summary judgment, including references to the affidavits, parts of the record, and other supporting materials relied upon to support those facts. *Local Rule 56.1(b)(3)(C)*.

Civil Procedure > Judgments > Summary Judgment > Opposing Materials

Civil Procedure > Judgments > Summary Judgment > Supporting Materials

HN2[] Summary Judgment, Opposing Materials

District courts have broad discretion to enforce *N.D. Ill. Loc. R. 56.1*.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN3[] Entitlement as Matter of Law, Appropriateness

On a motion for summary judgment, the court views the facts in the light most favorable to the non-movant and draws all reasonable inferences in its favor.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN4[] Entitlement as Matter of Law, Appropriateness

Summary judgment is appropriate if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. In determining summary judgment motions, courts are required to view the facts and draw reasonable inferences in the light most favorable to the party opposing the summary judgment motion. The party seeking summary judgment has the burden of establishing that there is no genuine dispute as to any material fact. Once the moving party meets this burden, the opposing party must establish some genuine issue for trial such that a reasonable jury could return a verdict in their favor.

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Sherman Act > Scope

HN5[] Antitrust & Trade Law, Clayton Act

Section 1 of the Sherman Act provides in part that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce is declared to be illegal. *15 U.S.C.S. § 1*. *Section 3 of the Clayton Act* makes it unlawful for an entity to make a sale or contract for sale of goods on the condition, agreement, or understanding that the lessee or purchaser thereof shall not use or deal in the goods of a competitor, where the effect may be to substantially lessen competition or tend to create a monopoly. *15 U.S.C.S. § 14*.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

HN6[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The per se rule is appropriate only after courts have had considerable experience with the type of restraint at issue, and only if courts can predict with confidence that it would be invalidated in all or almost all instances under the rule of reason. Indeed, the rule of reason is the standard framework for analyzing an action's anticompetitive effects on the market. The U.S. Supreme Court has held, for example, that the rule of reason applies to allegations that a defendant entered into vertical agreements setting minimum resale prices.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Evidence > Admissibility > Circumstantial & Direct Evidence

HN7[] **Cartels & Horizontal Restraints, Sherman Act**

A plaintiff may prove a horizontal agreement by either direct or circumstantial evidence. When circumstantial evidence is used, there must be some evidence that tends to exclude the possibility that the alleged conspirators acted independently. A plaintiff does not, however, have to exclude all possibility that the alleged conspirators acted independently.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN8[] **Price Fixing & Restraints of Trade, Vertical Restraints**

The typical story of a legitimate vertical transaction would have the supplier going to the retailer and asking it to be the exclusive carrier of the manufacturer's goods; in exchange for that exclusivity, the manufacturer would hope to receive more effective promotion of its goods, and the retailer would have a large enough profit margin to do the job well.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN9[] **Regulated Practices, Price Fixing & Restraints of Trade**

On summary judgment, ***antitrust law*** limits the range of permissible inferences from ambiguous evidence. A plaintiff must present some evidence that "tends to exclude the possibility" that the alleged conspirators acted independently.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN10[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The U.S. Supreme Court in Leegin Creative overturned its Dr. Miles decision, and held that the rule of reason, not the per se standard, is the applicable standard by which courts should judge whether vertical price restraints are lawful.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN11[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

As the U.S. Supreme Court explained in detail in Leegin Creative, vertical restraints, including vertical agreements setting minimum resale prices, can have both pro-competitive and anti-competitive justifications. Thus, courts must evaluate them using the "rule of reason." When anticompetitive effects are shown to result from particular vertical restrictions they can be adequately policed under the rule of reason.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

HN12[] **Regulated Practices, Monopolies & Monopolization**

A party can prove market power through two separate ways. The more conventional way is by proving relevant product and geographic markets and by showing that the defendant's share exceeds whatever threshold is important for the practice in the case. Under this method, the plaintiff must precisely establish both the relevant product and geographic dimensions of the relevant market. A plaintiff also may establish market power through direct evidence of anticompetitive effects.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization

HN13[] **Regulated Practices, Monopolies & Monopolization**

For a plaintiff to use direct evidence of anticompetitive effects to establish that defendants possessed market power, the controlling Seventh Circuit law requires the plaintiff to show both the "rough contours" of the relevant market, and that defendants possessed "substantial market share." In order for a plaintiff to establish market power using direct effects, the plaintiff must show the rough contours of a relevant market, and show that the defendant commands a substantial share of the market. As the court noted, economic analysis is virtually meaningless if it is entirely unmoored from at least a rough definition of a product and geographic market. To ensure that the direct effects analysis is meaningful, a plaintiff needs to make a minimum initial showing that the defendant possesses a substantial market share in a roughly-defined relevant market.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN14[] **Regulated Practices, Price Fixing & Restraints of Trade**

A plaintiff may prove market power in one of two ways. The more conventional way is by proving relevant product and geographic markets and by showing that the defendant's share exceeds whatever threshold is important for the practice in the case. The Seventh Circuit has held that in cases alleging a violation of *§ 1 of the Sherman Act*, a 20 percent-25 percent market share or less does not constitute market power. With respect to *§ 2 of the Sherman Act*, the required market share showing is even higher. Without a showing of special market conditions or other compelling evidence of market power, the lowest possible market share legally sufficient to sustain a finding of monopolization is between 17 percent and 25 percent.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Supplemental Jurisdiction

HN15[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

A district court may decline to exercise supplemental jurisdiction over a claim if, among other reasons, the district court has dismissed all claims over which it has original jurisdiction. *28 U.S.C.S. § 1367(c)(3)*. In addition to that statutory factor, the court should consider and weigh in each case, and at every stage of the litigation, the values of judicial economy, convenience, fairness, and comity. It is the well-established law of the Seventh Circuit, however, that the usual practice is to dismiss without prejudice state supplemental claims whenever all federal claims have been dismissed prior to trial.

Opinion

[*762] MEMORANDUM OPINION AND ORDER

AMY J. ST. EVE, District Court Judge:

Plaintiff Hannah's Boutique, Inc. ("Hannah's") filed suit against Defendants Barbara Ann Surdej, Roy Surdej, and Jeffrey Surdej d/b/a Peaches Boutique (collectively "Peaches") under *Section 2* of the Sherman Act, *15 U.S.C. § 2*, for attempted monopolization (Count I), conspiracy to monopolize (Count II), and monopolization (Count III); under *Section 1 of the Sherman Act*, *15 U.S.C. § 1*, for concerted refusal to deal (Count IV) and unreasonable restraint of trade (Count V); under *Section 3 of the Clayton Act* **[**2]** , *15 U.S.C. § 14*, for exclusive dealing (Count VI); and under the Illinois Antitrust Act for illegal monopolization and unreasonable restraint of trade (Count VII) (the "Antitrust Claims"). Hannah's also asserts a variety of non-antitrust Illinois state law claims against Peaches. Peaches has moved for summary judgment on the Antitrust Claims, arguing that Hannah's cannot show that Peaches possessed "market power," which Peaches contends is required for each of those claims. For the following reasons, the Court grants Defendants' motion.

BACKGROUND

I. *Northern District of Illinois Local Rule 56.1*

HN1[] Northern District of Illinois *Local Rule 56.1* "is designed, in part, to aid the district court, 'which does not have the advantage of the parties' familiarity with the record and often cannot afford to spend the time combing the record to locate the relevant information,' in determining whether a trial is necessary." *Delapaz v. Richardson, 634 F.3d 895, 899 (7th Cir. 2011)* (quoting *Waldridge v. Am. Hoechst Corp., 24 F.3d 918, 924 (7th Cir. 1994))*. *Local Rule 56.1(a)(3)* requires the moving party to provide "a statement of material facts as to which the moving party contends there is no genuine issue ..." *Petty v. City of Chicago, 754 F.3d 416, 420 (7th Cir. 2014)* (quoting *L.R. 56.1(a)(3)*). "The non-moving party must file a response to the moving party's statement, and, in the case of any disagreement, cite 'specific references to **[**3]** the affidavits, parts of the record, and other supporting materials relied upon.'" *Id.* (quoting *L.R. 56.1(b)(3)(B)*). The nonmoving party also may submit a separate statement of additional facts that require the denial of summary judgment, including references to the affidavits, parts of the record, and other supporting materials relied upon to support those facts. *See L.R. 56.1(b)(3)(C)*; *see also Ciomber v. Coop. Plus, Inc., 527 F.3d 635, 643-44 (7th Cir. 2008)*.

As an initial matter, Plaintiff moves to strike Defendants' Statement of Additional Undisputed Material Facts. (*See* R. 311, Pl.'s Mot. to Strike.) Plaintiff also objects to certain statements in Defendants' *Local Rule 56.1* Statement of Facts. With respect to Plaintiff's motion to strike, the Court denies it as moot as the Court does not rely on facts contained in the Defendants' Statement of Additional Undisputed Material Facts in its Opinion. To the extent the Court relies on facts contained in the Defendants' *Local Rule 56.1* Statement to which Plaintiff objects, the Court takes up Plaintiff's objections where it relies on those facts in the Opinion. *See Benuzzi v. Bd. of Educ. of City of Chicago, 647 F.3d 652, 655 (7th Cir. 2011)* (holding that ***HN2***[] district courts have broad discretion to enforce *Local Rule 56.1*).

[*763] II. Relevant Facts

As Peaches is moving for summary judgment, ***HN3***[] the Court views the facts in the light most favorable to Hannah's and draws **[**4]** all reasonable inferences in its favor.[1] *See Scott v. Harris, 550 U.S. 372, 378, 127 S.Ct. 1769, 167 L.Ed.2d 686 (2007)*. Hannah's is a specialty boutique located in Palos Park, Illinois that sells prom and homecoming dresses. (R. 270, Pl.'s Resp. to Defs.' SOF ¶ 2.) Peaches Boutique also sells prom and homecoming dresses, and is the largest specialty boutique retailer in the Chicago area. (*Id.*, Pl.'s Stmt. of Add'l Facts ¶¶ 3, 7, 16, 17.) Defendants Roy and Barbara Surdej opened Peaches in 1985, and Defendant Jeffrey Surdej is their son. (*Id.*, Pl.'s Resp. to Defs.' SOF ¶ 3.) When Defendants opened Peaches, the store was approximately 2,400 square feet. (*Id. ¶ 49*.) They have expanded the store over the years, first to 4,400 square feet, then to 8,400 square feet in 2003, and finally in 2011 to its current size of 25,000 square feet. (*Id. ¶ 53*.) Peaches' store has over 20,000 dresses in stock and advertises to its customers "that they will not find anyone else out there that carries that much stock." (*Id.*, Pl.'s Stmt. of Add'l Facts ¶ 1.) Peaches also sells dresses online through multiple websites that it controls. (*Id.*, Pl.'s Resp. to Defs.' SOF ¶¶ 73-75.) Susan Shaban opened Hannah's in May of 2009, with the intent of focusing on the sale of prom and homecoming **[**5]** dresses. (*Id.*, Pl.'s Stmt. of Add'l Facts ¶¶ 23-24.) In 2012, Hannah's moved to its current location, a 2,600 square foot store with five dressing rooms. (*Id.*, Pl.'s Resp. to Defs.' SOF ¶¶ 102-103.)

Plaintiff argues that the relevant product market for antitrust purposes consists of high-end prom and homecoming dresses manufactured by sixteen designers (the "Designers") that are sold through specialty retail boutiques.[2] (*Id.*, Pl.'s Resp. to Defs.' SOF ¶ 7.) The Designers sell their dresses to the public through a network of authorized retailers, including specialty boutiques, department stores, and internet sites, although not all of the Designers sell through department stores.[3] (*Id. ¶ 21*.) There are 42 department stores within 30 miles of Peaches, and another 12 between 30 and 50 miles of Peaches. (*Id. ¶ 118*.) In the Chicago Market,[4] there are 56 specialty retailers other than Hannah's and Peaches that sell prom dresses.[5] (*Id. ¶ 149*.) Within 30 miles of Peaches, there are 70 specialty

[1] The controlling ***antitrust law***, however, limits the Court from drawing certain inferences. *See* Analysis Section I(A)(1) below.

[2] The Designers are: Allure, Blush, House of Wu, Jasz Couture, Jovani, La Femme, Mac Duggal, Flirt (aka Maggie Sottero, Mori Lee, Party Time, Riva Designs, Scala, Sherri Hill, Tarik Ediz, Terani, and Tony Bowls. (R. 270, Pl.'s Resp. to Defs.' SOF ¶ 7.)

[3] To the extent Plaintiff disputes only a portion of a statement of fact, the Court deems the remaining portion admitted. *See N.D. Ill. L.R. 56.1(b)(3)(C)* ("All material facts set forth in the statement required of the moving party will be deemed to be admitted unless controverted by the statement of the opposing party.")

[4] Plaintiff argues that the relevant geographic market for antitrust purposes is the "Chicago Market," which it defines as encompassing area codes 630/331, 847/224, 708, 312/872, and 773. (R. 250-1, Schafer Rep. ¶ 12.)

retailers other than Hannah's and Peaches that sell prom dresses, and within 50 **[**6]** miles of Peaches, there are approximately 89. (*Id. ¶¶ 150-51*.) The 56, 70, and 89 specialty retailers have a combined retail space of 304,606 square **[*764]** feet, 323,945 square feet, and 402,713 square feet, respectively, although the parties dispute how much of that square footage is dedicated to prom and homecoming dresses. (*Id. ¶¶ 149-151*.) Consumers also purchase prom and homecoming dresses on internet websites. (*Id. ¶ 122*.)

Between 2009 and 2012, Defendants repeatedly requested to certain Designers by telephone and e-mail that they not supply their dresses to specific specialty boutiques within the Chicago Market, including Hannah's. (*Id.*, Pl.'s Resp. to Defs.' SOF ¶ 58; Pl.'s Stmt. of Add'l Facts ¶¶ 28-29, 34, 36, 38, 41, 43-46, 49-50, 102.) Several of the Designers agreed to Peaches' requests and agreed to not sell to certain of Peaches' competitors within the Chicago Market.[6] (*See Id.*, Pl.'s Resp. to Defs.' SOF ¶ 58; Pl.'s Stmt. of Add'l Facts ¶¶ 31, 45, 74, 79, 84.)

In August 2012, Peaches organized a meeting of prom and homecoming dress designers at the 2012 Atlanta Prom Market. (*Id.*, Pl.'s Stmt. of Add'l Facts ¶¶ 55-56.) Peaches invited a number of the Designers, but did not invite any other Chicago-area retail boutiques. (*Id.*, Pl.'s Resp. to Defs.' SOF ¶ 34.) At the meeting, Defendants distributed a handout titled "Prom Industry Concerns" that addressed the following **[**8]** "items of interest for discussion":

1) No opening of internet sites without a legitimate brick and mortar store ...
2) No advertising a product without purchasing the minimums ...
3) Stopping discounting on current products before 5/15 date ...
4) MSIRP-manufacturer suggested internet retail price ...
5) Counterfeiting ...
6) Manufacturers should not own retail internet websites ...

(*Id.*, Pl.'s Stmt. of Add'l Facts ¶ 61.) Under item number four, the handout stated in part, "[m]any manufacturers are starting to enforce a 2.2 markup on internet pricing." (*Id.*) Defendant Jeffrey Surdej spoke at the meeting, and his notes indicate that he discussed that Defendants are part of a "very unique industry" due to seasonality, and that he discouraged the dress designers from opening new accounts because the teenage population is decreasing and the opening of new accounts would cut into Peaches' profit margin. (*Id. ¶ 65*, Ex. 102.)

Shortly after the meeting, two Designers, Jovani and Terani, implemented a higher internet pricing policy, mandating a markup on their dresses of 2.2 times the wholesale cost. (*Id. ¶¶ 72-73*.) This was the first time that Terani implemented this higher online pricing policy. (*Id.*, **[**9]** Pl.'s Resp. to Defs.' SOF ¶ 34.) Further, in the several months following the 2012 Atlanta Prom Market meeting, Hannah's attempted to place or placed orders for prom and homecoming dresses with the following Designers, all of which were rejected or cancelled after only partial fulfillment: Allure, Jovani, House of Wu, Party Time, Riva Designs, Terani, La Femme, Mori Lee, Mac Duggal, Scala, Sherri Hill, Tarik Ediz, Jasz Couture, Mon Cheri, and Blush. (*Id. ¶77*.) Prior to September of 2012, Peaches had been able to purchase dresses from seven of the Designers: Jovani, Mon Cheri, Terani, House of Wu, Tarik Ediz, Riva Designs, and Party Time. (*Id. ¶ 54*.)

Based in part on these allegations, Hannah's filed suit against Peaches. Peaches has moved for summary judgment solely on the Antitrust Claims, arguing that Hannah's cannot show that Peaches possessed **[*765]** "market power," which Peaches contends is required for each of those claims.

SUMMARY JUDGMENT STANDARD

HN4[] Summary judgment is appropriate "if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. In determining summary

---

[5] Plaintiff **[**7]** objects to several of Defendants' statements of fact based on its *Daubert* motion. The Court denied that motion, however, in its June 19, 2015 Opinion. (R. 329, Kneuper Opinion.)

[6] Plaintiff's Statement of Facts does not provide an exact number.

judgment motions, "courts are required to view **[**10]** the facts and draw reasonable inferences 'in the light most favorable to the party opposing the [summary judgment] motion.'" *Scott v. Harris, 550 U.S. at 378, 127 S.Ct. 1769* (quoting *United States v. Diebold, Inc., 369 U.S. 654, 655, 82 S.Ct. 993, 8 L.Ed.2d 176 (1962))*; *see* *Kvapil v. Chippewa County, Wis., 752 F.3d 708, 712 (7th Cir. 2014)*. "The party seeking summary judgment has the burden of establishing that there is no genuine dispute as to any material fact." *Kvapil v. Chippewa County, Wis., 752 F.3d at 712* (citing *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S.Ct. 2548, 91 L.Ed.2d 265 (1986))*. Once the moving party meets this burden, the opposing party "must establish some genuine issue for trial such that a reasonable jury could return a verdict in [their] favor." *United States v. King-Vassel, 728 F.3d 707, 711 (7th Cir. 2013)* (quoting *Gordon v. FedEx Freight, Inc., 674 F.3d 769, 772-73 (7th Cir. 2012))*.

ANALYSIS

I. Legal Standard

Plaintiff alleges claims under *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*, and *Section 3 of the Clayton Act*, *15 U.S.C. § 14*. As an initial matter, Defendants argue that each of these claims requires proof that Peaches possessed either monopoly power or substantial market power.[7] With respect to Plaintiff's claims under *Section 1 of the Sherman Act* and *Section 3 of the Clayton Act*, Defendants contend that because Plaintiff submits evidence of vertical rather than horizontal restraints, the "rule of reason" legal standard, which requires an initial showing that Defendants possessed market power, applies to Plaintiff's allegations. Plaintiff disagrees. It argues that the Court should instead apply either the "*per se*" or "quick look" legal standard. With respect **[**11]** to Plaintiff's *Section 2* claims, Plaintiff does not dispute that its claims for attempted monopolization and monopolization require a showing of monopoly power. It argues only that its third *Section 2* claim, conspiracy to monopolize, does not require it to show that Peaches possessed monopoly power. The Court addresses each of these issues in turn.

A. Restraints on Trade

With respect to Plaintiff's **[**12]** claims under *Section 1 of the Sherman Act* and *Section 3 of the Clayton Act* **[*766]** , Plaintiff argues that its two theories of liability both require that the Court apply either the "*per se"* or "quick look" legal standards. ***HN5***[] *Section 1 of the Sherman Act* provides in relevant part that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce ... is declared to be illegal." *15 U.S.C. § 1*. *Section 3 of the Clayton Act* makes it unlawful for an entity to "make a sale or contract for sale of goods ... on the condition, agreement, or understanding that the lessee or purchaser thereof shall not use or deal in the goods ... of a competitor ..., where the effect ... may be to substantially lessen competition or tend to create a monopoly ..." *15 U.S.C. § 14*. Hannah's alleges that Peaches caused the Designers: 1) to agree to a group boycott of Hannah's and other retail boutique competitors of Peaches; and 2) to impose a vertical restraint on the internet retail price of the Designers' prom and homecoming dresses. The Court examines the legal standard that applies to each theory of liability.

[7] Plaintiff also alleges that Peaches' conduct constitutes illegal monopolization and unreasonable restraint of trade under the Illinois Antitrust Act, *740 ILCS 10/3*. (R. 188, Am. Compl. ¶ 262.) Plaintiff does not dispute that those sections of the Illinois Antitrust Act are based on *Sections 1* and *2* of the Sherman Act, and therefore the applicable legal standards are the same. *See* *740 ILCS 10/11* ("When the wording of this Act is identical or similar to that of a federal ***antitrust law***, the courts of this State shall use the construction of the federal law by the federal courts as a guide in construing this Act."); *Laughlin v. Evanston Hosp., 133 Ill.2d 374, 383-84, 140 Ill.Dec. 861, 550 N.E.2d 986 (1990)* (applying decisions construing *Section 1 of Sherman Act* to claim for unreasonable restraint of trade brought under the Illinois Antitrust Act); *Int'l Equip. Trading, Ltd. v. AB SCIEX, LLC, No. 13-C-1129, 2013 U.S. Dist. LEXIS 123109, 2013 WL 4599903, at *3 n.1 (Aug. 29, 2013)* (applying Sherman Act *Section 2* analysis to attempted monopolization claim brought under the Illinois Antitrust Act).

1. Group Boycott

Plaintiff's main claim is that between 2009 and 2012, Defendants repeatedly requested to the Designers that they **[**13]** not sell to specific retail boutiques in the Chicago Market, including Hannah's. (R. 270, Pl.'s Resp. to Defs.' SOF at ¶ 58; Pl.'s Stmt. of Add'l Facts at ¶¶ 28-29, 34, 36, 38, 41, 43-46, 49-50, 102.) In response to Peaches' requests, certain of the Designers agreed to Peaches' demands and agreed to not sell to its competitors within the Chicago Market. (*Id.*, Pl.'s Resp. to Defs.' SOF at ¶ 58; Pl.'s Stmt. of Add'l Facts at ¶¶ 31-33, 42, 45, 76-77, 79, 82, 84-85, 86, 88, 89-91, 94-100.) With respect to Hannah's specifically, in the months following the 2012 Atlanta Prom Market Meeting it attempted to place or placed orders for prom and homecoming dresses with the following Designers, all of which these Designers rejected or cancelled after only partial fulfillment: Allure, Jovani, House of Wu, Party Time, Riva Designs, Terani, La Femme, Mori Lee, Mac Duggal, Scala, Sherri Hill, Tarik Ediz, Jasz Couture, Mon Cheri, and Blush. (*Id.*, Pl.'s Stmt. of Add'l Facts ¶ 77.) Based on these facts, Hannah's argues that Peaches induced certain of the Designers to enter into a horizontal agreement to boycott Hannah's—*i.e.*, they agreed among each other to refuse to supply Hannah's with their prom and **[**14]** homecoming dresses. *See* *Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 730, 108 S.Ct. 1515, 99 L.Ed.2d 808 (1988)* ("[r]estraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints, and those imposed by agreement between firms at different levels of distribution as vertical restraints.")

Plaintiff argues that in analyzing Peaches' conduct the Court should apply the *per se* standard. "The *per se* rule, treating categories of restraints as necessarily illegal, eliminates the need to study the reasonableness of an individual restraint in light of the real market forces at work ... Restraints that are *per se* unlawful include horizontal agreements among competitors to fix prices, or to divide markets." *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S.Ct. 2705, 168 L.Ed.2d 623 (2007)* (citations omitted). Group boycotts are *per se* illegal if they involve "joint efforts by a firm or firms to disadvantage competitors by either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle." *Toys "R" Us, Inc. v. FTC, 221 F.3d 928, 936 (7th Cir. 2000)* (quoting *Northwest Wholesale Stationers, Inc., v. Pacific Stationery and Printing Co., 472 U.S. 284, 294, 105 S.Ct. 2613, 86 L.Ed.2d 202 (1985))*.

[*767] On the other hand, ***HN6***[] "the *per se* rule is appropriate only after courts have had considerable experience with the type of restraint at issue, and only if courts can predict with confidence that it would be invalidated in all or almost all instances **[**15]** under the rule of reason." *Leegin Creative, 551 U.S. at 886-87, 127 S.Ct. 2705* (citations omitted). Indeed, the rule of reason is "[t]he standard framework for analyzing an action's anticompetitive effects on the market." *Agnew v. NCAA, 683 F.3d 328, 335 (7th Cir. 2012)*. The Supreme Court has held, for example, that the rule of reason applies to allegations that a defendant entered into vertical agreements setting minimum resale prices. *Leegin Creative, 551 U.S. at 907, 127 S.Ct. 2705*.

In making its argument that the Court should apply the *per se* rule, Plaintiff relies heavily on *Toys "R" Us, Inc., 221 F.3d 928*. In that case, the Seventh Circuit affirmed a decision of the FTC finding that Toys "R" Us had induced at least seven of its toy manufacturer suppliers to enter into a horizontal agreement to boycott certain of Toys "R" Us's competitors. *Id. at 935-36*. The Seventh Circuit rejected Toys "R" Us's argument that it had merely entered into a series of independent vertical agreements with each of the manufacturers. *Id.* Instead, the Seventh Circuit held that Toys "R" Us had also induced a horizontal agreement among the manufacturers to limit their sales, and applied the *per se* standard to Toys "R" Us's conduct. *Id.* Here, Plaintiff analogizes the facts to the *Toys "R" Us* decision, and requests that the Court similarly find a horizontal agreement among the Designers **[**16]** and apply the *per se* standard to Defendants' actions.

HN7[] A plaintiff may prove a horizontal agreement "by either direct or circumstantial evidence." *Toys "R" Us, 221 F.3d at 934*. "When circumstantial evidence is used, there must be some evidence that 'tends to exclude the possibility' that the alleged conspirators acted independently." *Id.* (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S.Ct. 1464, 79 L.Ed.2d 775 (1984))*; *see also* *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S.Ct. 1348, 89 L.Ed.2d 538 (1986)* (holding that even on summary judgment, "***antitrust law*** limits the range of permissible inferences from ambiguous evidence" in a case involving *Section 1 of* the Sherman Act). A plaintiff does not, however, have to exclude all possibility that the alleged conspirators acted independently. *Toys "R" Us, 221 F.3d at 934-35*; *In re Brand Name Prescription Drugs Antitrust Litig., 186 F.3d 781, 787 (7th Cir. 1999)*.

Here, even reviewing the evidence in the light most favorable to Plaintiff, the Court agrees with Defendants that there is simply no evidence of a horizontal agreement between the Designers (or a smaller number of the Designers) to boycott Hannah's. First, Plaintiff does not present any direct evidence that the Designers reached an agreement among themselves. Second, with respect to Plaintiff's circumstantial evidence, it submits that from 2009 through 2012, Peaches contacted many of the Designers via telephone or e-mail and requested that they not supply competing **[**17]** retail boutiques with their dresses. Some of those communications specifically reference Hannah's, although many do not. (*See* R. 270, Pl.'s Stmt. of Add'l Facts ¶¶ 28-29, 34, 36, 38, 41, 43-44, 46, 49-50.) In response to those requests, Peaches received a variety of responses. Some of the suppliers appear to not have responded at all. (*See Id.*, ¶ 34, Ex. 45) (Peaches e-mail to a number of Designers). Several responded positively, reassuring Peaches that it would be "taken care of," or that the Designer would "make a note in [its] system and inform [its] staff" of any orders **[*768]** from Hannah's. (*See Id.* ¶¶ 33, 85.) Some Designers responded explicitly that they were willing to protect Peaches' sales territory, or were willing to block Peaches' competitors, including Hannah's, from purchasing dresses. (*See e.g., Id.* ¶¶ 31, 45, 74, 79, 84.) These varying responses do not indicate that all sixteen Designers (or even a smaller subset of them) reached an agreement among each other.

Importantly, Plaintiff also does not present evidence that any of the Designers sought assurances that the other Designers also agreed to limit their sales to Peaches. In *Toys "R" Us*, for example, the Seventh Circuit **[**18]** considered such evidence central to its holding that the suppliers reached a horizontal agreement:

> If there was no evidence in the record tending to support concerted behavior, then we agree that [the controlling law] would require a ruling in [Toys "R" Us's] favor. But there is. The evidence showed that the companies wanted to diversify from [Toys "R" Us], not to become more dependent upon it; it showed that each manufacturer was afraid to curb its sales to the warehouse clubs alone, because it was afraid its rivals would cheat and gain a special advantage in that popular new market niche. The [FTC] was not required to disbelieve the testimony of the different toy company executives and [Toys "R" Us] itself to the effect that the only condition on which each toy manufacturer would agree to [Toys "R" Us's] demands was if it could be sure its competitors were doing the same thing.

Toys "R" Us, Inc., 221 F.3d at 935-36. Here, there is no such evidence. Peaches had many communications with different Designers about limiting the supply of dresses to its competitors. There is no indication though that any of the Designers sought to expand their sales beyond Peaches, and were willing to agree to exclusively supply Peaches **[**19]** only if the other Designers agreed to the same deal. Instead, the evidence shows that the Designers that were communicating with Peaches individually evaluated the decision of whether or not to grant Peaches some measure of exclusivity. *See Toys "R" Us, Inc, 221 F.3d at 937* ***HN8***[] ("[t]he typical story of a legitimate vertical transaction would have the [supplier] going to [the retailer] and asking it to be the exclusive carrier of the manufacturer's goods; in exchange for that exclusivity, the manufacturer would hope to receive more effective promotion of its goods, and [the retailer] would have a large enough profit margin to do the job well.")

Plaintiff also argues that the Designers reached a horizontal agreement during the 2012 Atlanta Prom Market Meeting. Viewing the evidence in the light most favorable to Plaintiff, Peaches organized the meeting and invited a number of the Designers, but did not invite any other Chicago-area boutiques. (R. 270, Pl.'s Resp. to Defs.' SOF ¶ 34.) Defendant Jeffrey Surdej spoke at the meeting, and his notes indicate that he spoke of how Defendants are part of a "very unique industry" due to seasonality, and that he discouraged the Designers from opening new accounts because the teenage **[**20]** population is decreasing and the opening of new accounts would cut into Peaches' profits. (R. 270, Pl.'s Stmt. of Add'l Facts ¶ 65, Ex. 102.) In the months following the meeting, a number of the Designers rejected or cancelled orders from Hannah's, seven of whom Hannah's had been able to purchase dresses from in the past. (*Id. ¶¶ 54, 77*.)

As Plaintiff acknowledges in its brief, ***HN9***[] on summary judgment "***antitrust law*** limits the range of permissible inferences from ambiguous evidence." *Matsushita, 475 U.S. at 588, 106 S.Ct. 1348*. Plaintiff must present some evidence that "tends to exclude **[*769]** the possibility" that the alleged conspirators acted independently. *Toys "R" Us, 221 F.3d at 934*. Here, there is no such evidence. First, there is no direct evidence that shows Peaches and certain of the Designers agreed to a group boycott of Hannah's at the 2012 Atlanta Prom Market Meeting. To the contrary, the available evidence does not show that the market participants even discussed Hannah's. Second, there is no evidence to exclude the possibility that the Designers acted independently in not selling to Hannah's. As discussed above, individual Designers may have been responding to Peaches' requests, but there is no indication that the Designers acted in concert **[**21]** with each other.

For these reasons, the rule of reason is the appropriate standard for evaluating any vertical agreements that may have existed between Peaches and the Designers to limit sales of the Designers' dresses to Hannah's.

2. Vertical Price Fixing

Plaintiff's second theory is that Defendants' requests caused two of the Designers to increase the minimum prices they required for prom and homecoming dresses sold on the internet to a level above their minimum prices for dresses sold in brick and mortar stores. As an initial matter, Plaintiff in its Amended Complaint overwhelmingly focuses on its first theory that Peaches induced the Designers to boycott Hannah's. Nevertheless, Plaintiff does make several allegations of price fixing with respect to internet sales, and thus the Court will address that theory here. (*See, e.g.*, R. 188, Am. Compl. ¶¶ 16, 60, 92.) Plaintiff argues that Terani and Jovani raised their minimum price for internet sales to 2.2 times the wholesale price, up from 2 times the wholesale price for sales of their dresses at brick and mortar stores. Plaintiff contends that the Court should apply the per se standard to this theory, arguing that a vertical restraint **[**22]** is *per se* illegal when it includes an agreement on price or price levels.

In support of its argument, Plaintiff cites *Business Elecs. Corp, 485 U.S. 717, 108 S. Ct. 1515, 99 L. Ed. 2d 808*. In that case, the Supreme Court held "that a vertical restraint is not illegal *per se* unless it includes some agreement on price or price levels." *Id., 485 U.S. at 735-36, 108 S.Ct. 1515*. In reaching its holding, the Court noted that "[a]lthough vertical agreements on resale prices have been illegal *per se* since *Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 31 S.Ct. 376, 55 L.Ed. 502 (1911)* ... the scope of *per se* illegality should be narrow in the context of vertical restraints." *Id., 485 U.S. at 724, 108 S.Ct. 1515*. Twenty years later, however, ***HN10***[] the Supreme Court in *Leegin Creative* overturned its *Dr. Miles* decision, and held that the rule of reason, not the *per se* standard, is the applicable standard by which courts should judge whether vertical price restraints are lawful. *Leegin Creative, 551 U.S. at 907, 127 S.Ct. 2705*. Thus, to the extent Plaintiff's evidence establishes vertical agreements to impose a minimum price for internet retail sales between Terani and their retailers or Jovani and their retailers, the Court must evaluate those restraints under the rule of reason, not the *per se* standard.

Plaintiff also argues that the Court should apply the *per se* standard because Terani and Jovani raised their minimum prices for internet retail sales nearly simultaneously following **[**23]** the Atlanta 2012 Prom Meeting. Plaintiff's argument appears to be that Terani and Jovani entered into a horizontal agreement with each other to raise prices. As discussed above with respect to the group boycott theory, however, there is no evidence to infer that Terani and Jovani reached an agreement **[*770]** with each other. Plaintiff's evidence shows that Peaches presented the increased minimum internet retail pricing as an "item of interest" to a number of the Designers, and two of the sixteen later responded by raising their prices. A reasonable fact finder could not infer a horizontal agreement from these facts. *See also* *Leegin Creative, 551 U.S. at 897, 127 S.Ct. 2705* ("When only a few manufacturers lacking market power adopt [resale price maintenance], there is little likelihood it is facilitating a manufacturer cartel, for a cartel then can be undercut by rival manufacturers.") Thus, the rule of reason applies.

3. Quick Look Standard

As a final matter on the applicable legal standard, the Court also agrees with Defendants that the "quick look" standard does not apply to Plaintiff's Antitrust Claims. The "quick look" standard applies where "the per se framework is inappropriate, but where 'no elaborate industry analysis is required **[**24]** to demonstrate the anticompetitive character of ... an agreement.'" *Agnew v. NCAA, 683 F.3d at 336* (quoting *NCAA v. Bd. of Regents of Univ. of Oklahoma, 468 U.S. 85, 109, 104 S.Ct. 2948, 82 L.Ed.2d 70 (1984))*. Courts use it "when 'an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets,' but there are nonetheless reasons to examine potential procompetitive justifications.'" *Id.* (quoting *California Dental Ass'n v. FTC, 526 U.S. 756, 770 119 S.Ct. 1604, 143 L.Ed.2d 935 (1999))*. In *Agnew*, the Seventh Circuit explained that the "quick look" standard applied, among other situations, "when a restraint would normally be considered illegal per se, but 'a certain degree of cooperation is necessary if the [product at issue] is to be preserved.'" *Id.* (quoting *NCAA v. Bd. of Regents of Univ. of Oklahoma, 468 U.S. at 117, 104 S.Ct. 2948*).

The vertical agreements here are not obviously anti-competitive and courts would not normally consider them to be illegal *per se*. ***HN11***[] As the Supreme Court explained in detail in *Leegin Creative*, vertical restraints, including vertical agreements setting minimum resale prices, can have both pro-competitive and anti-competitive justifications. *Leegin Creative, 551 U.S. at 889-894, 127 S.Ct. 2705*. Thus, courts must evaluate them using the "rule of reason." *Id. at 907, 127 S.Ct. 2705*; *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 59, 97 S.Ct. 2549, 53 L.Ed.2d 568 (1977)* ("When anticompetitive effects are shown to result from particular vertical restrictions they can be adequately policed under the rule **[**25]** of reason.")

For these reasons, the Court applies the "rule of reason" standard to Plaintiff's claims under *Section 1 of the Sherman Act* and *Section 3 of the Clayton Act*.

B. Conspiracy to Monopolize

With respect to Plaintiff's *Section 2* claims, Plaintiff does not dispute that its claims for attempted monopolization and monopolization require a showing of monopoly power.[8] It argues only that its third *Section 2* claim, conspiracy to monopolize, does not require it to show that Peaches possessed monopoly power. In making its argument, Hannah's cites the Seventh Circuit's 1951 decision, *United **[*771]** States v. National City Lines, 186 F.2d 562 (7th Cir. 1951)*. In that case, the defendants challenged the sufficiency of the indictment against them following their convictions for conspiring to monopolize in a criminal antitrust case. *Id. at 564, 567-68*. They contended, among other arguments, that the indictment was insufficient because it did not charge them with the monopolization of a specific geographic market. *Id. at 567-68*. The Seventh Circuit denied their challenge, however, in part because the defendants' conduct alleged in the indictment affected "a very substantial segment of interstate commerce." *Id.* The court noted that the indictment charged the defendants with conspiracy to monopolize "all the busses, all the tires **[**26]** and tubes and all the gas, oil and grease, used by the public transportation systems of some 45 cities owned or controlled by [certain of the defendants]." *Id. at 567*. Thus, although *National City* did not require the government to show market power in order to prove a conspiracy to monopolize, the court still based its holding on the indictment containing "a charge of elimination of competition, of monopolization, as to a substantial portion of interstate commerce." *Id.*

As Defendants point out, courts in this district have criticized the holding of *National City*, and several other circuits now hold that market power is a required element of a conspiracy to monopolize claim under *Section 2*. *See Appraisers Coal. v. Appraisal Inst., 845 F.Supp. 592, 603 n.7 (N.D. Ill. 1994)* (compiling cases criticizing *National City)*; *Fraser v. Major League Soccer, LLC, 284 F.3d 47, 67 (1st Cir. 2002)* (holding that allowing a jury to "condemn" an exclusive dealing contract as a conspiracy to monopolize would "invite an end run around ... the **[**27]** case law for exclusive dealing under both *section 1* and the attempt and monopolization requirements of *section 2* [of the *Sherman Act*]"); *Dickson v. Microsoft Corp., 309 F.3d 193, 211 (4th Cir. 2002)*. To the extent

---

[8] *See, e.g., Endsley v. City of Chicago, 230 F.3d 276, 282 (7th Cir. 2000)* ("The offense of monopoly under *§ 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.")

National City remains good law in the Seventh Circuit, however, here Plaintiff does not raise an issue of fact as to whether any claimed conspiracy to monopolize affected a substantial amount of interstate commerce. As discussed above, there is no evidence that Peaches induced the Designers to enter into a horizontal conspiracy. Thus, to the extent they reached agreements, they were separate agreements between Peaches and the individual Designers. Assuming for the purposes of summary judgment that Plaintiff's product market is accurate and only includes the sixteen Designers, Plaintiff does not submit any evidence that any of the individual agreements substantially affected that market. Plaintiff, for example, does not show that any of the Designers themselves had market power, and it is undisputed that there are 56 other specialty retailers in the Chicago Market that sell prom dresses. (R. 270, Pl.'s Resp. to Defs.' SOF ¶ 149.) For these reasons, the Court grants Defendants' motion for summary judgment on the conspiracy to monopolize claim.

II. Market [28] Power**

As Plaintiff's *Section 2* claims for monopolization and attempted monopolization require a showing of monopoly power, and its remaining Antitrust Claims require market power under the rule of reason, the Court analyzes whether Plaintiff can make that showing.

A. Requirements for Direct Effects Evidence

HN12[] A party can prove market power through two separate ways. *Toys "R" Us, Inc., 221 F.3d at 937*. The more conventional way "is by proving relevant product and geographic markets and by showing that the defendant's share exceeds whatever threshold is important for the practice **[*772]** in the case." *Id.* Under this method, the plaintiff "must precisely establish" both the relevant product and geographic dimensions of the relevant market. *Republic Tobacco Co., 381 F.3d at 738*. A plaintiff also may establish market power through "direct evidence of anticompetitive effects." *Toys "R" Us, Inc., 221 F.3d at 937*. Here, Plaintiff only attempts to establish that Defendants possessed market power through direct evidence of anticompetitive effects. It does not try to show that Defendants had a substantial share of the relevant market. (*See* R. 250-1, Schafer Rep.)

Defendants argue that under the applicable Seventh Circuit law, for Plaintiff to use evidence of direct anti-competitive effects to establish **[**29]** that Defendants possessed market power, Plaintiff must first establish both the "rough contours of a relevant market and [] that the defendant commands a substantial share of the market." *Republic Tobacco Co., 381 F.3d at 737*. Plaintiff disagrees. It argues that the controlling law does not require Plaintiff to prove that Defendants possessed a substantial market share where direct, anti-competitive effects are present. Plaintiff does agree with Peaches, however, that it must show the "rough contours of a relevant market."

The Court agrees with Defendants that ***HN13***[] for Plaintiff to use direct evidence of anticompetitive effects to establish that Defendants possessed market power, the controlling Seventh Circuit law requires Plaintiff to show both the "rough contours" of the relevant market, and that Defendants possessed "substantial market share." In *Republic Tobacco*, the plaintiff argued that it should not have to establish the relevant geographic market because it had evidence of direct, anticompetitive effects. *Republic Tobacco, 381 F.3d at 736-37*. The Seventh Circuit disagreed. After analyzing the Supreme Court and Seventh Circuit precedent on the issue, it specifically held that in order for a plaintiff to establish market power using direct effects, the **[**30]** plaintiff must "show the rough contours of a relevant market, *and* show that the defendant commands a substantial share of the market." *Id. at 737* (emphasis added). As the court noted, "[e]conomic analysis is virtually meaningless if it is entirely unmoored from at least a rough definition of a product and geographic market." *Id.* To ensure that the direct effects analysis is meaningful, a plaintiff needs to make a minimum initial showing that the defendant possesses a substantial market share in a roughly-defined relevant market.

Plaintiff attempts to draw support for its argument from the Seventh Circuit's earlier decision in *Toys "R" Us, Inc.* In that case, the Seventh Circuit held that the Federal Trade Commission could use evidence of direct anti-competitive effects to establish that Toys 'R Us possessed market power. In reaching its decision, the court stated the following:

> [The defendant] seems to think that anticompetitive effects in a market cannot be shown unless the plaintiff, or here the Commission, first proves that it has a large market share. This, however, has things backwards. As we have explained elsewhere, the share a firm has in a properly defined relevant market is only a way of estimating **[**31]** market power, which is the ultimate consideration.

Id., 221 F.3d at 937. Plaintiff pounces on this passage to argue that the controlling law does not require it to prove that Defendants possessed a large market share. Later in the *Toys "R" Us* opinion, however, the court emphasized that the defendant "had 20% of the national wholesale market and up to 49% of some local wholesale markets." *Id. at 937*. Indeed, in **[*773]** reaching its holding, the *Republic Tobacco* court specifically relied on that passage in the *Toys "R" Us* decision. It held that the FTC was only able to use direct effects evidence because it first showed that Toys "R" Us possessed a substantial share of the market. *Republic Tobacco, 381 F.3d at 737*. Thus, Plaintiff's argument fails.

Plaintiff concedes that it cannot show that Defendants possessed a substantial share of the market because it cannot calculate Defendants' market share. Plaintiff also argues, however, that in the absence of publicly available data to calculate Peaches' market share, the Court should find that Peaches' possessed substantial market share because "[t]here is no dispute that Defendants control the largest and most substantial share of the Chicago Market for the Designers' prom and homecoming dresses." (R. 292, Pl.'s Resp., **[**32]** at 55.) With respect to the data, Defendants' expert Dr. Robert Kneuper estimated Peaches' market share using several different methods that relied on publicly available data. (*See* R. 241-1, Kneuper Rep., at 25-26, 29.) Although Plaintiff filed a *Daubert* motion challenging the methodology that Dr. Kneuper employed in reaching his market share opinions, the Court denied Plaintiff's motion. (R. 329, Kneuper Opinion.) Second, although there is not a dispute that Peaches is a large store that encompasses over 25,000 square feet and carries approximately 20,000 dresses in inventory, that does not mean that Peaches "commands a substantial share of the market" under *Republic Tobacco*. (*See* R. 270, Pl.'s Resp. to Defs.' SOF ¶ 54.) Indeed, there are 56 specialty retailers other than Hannah's and Peaches that sell prom dresses in the Chicago Market. (*Id. ¶ 149*.) Although Peaches may be a large store, that fact on its own does not establish that it has significant market share.

For these reasons, under *Republic Tobacco*, the Court cannot allow Plaintiff to present direct evidence of anti-competitive effects to meet its burden to establish that Peaches possessed market power. As Plaintiff cannot show that Peaches possessed **[**33]** market power, the Court must grant Defendants' motion for summary judgment on the Antitrust Claims.

B. Defendants' Evidence of Lack of Market Power

Additionally, Defendants submit expert evidence through Dr. Kneuper that Peaches did not possess market power. As discussed above, ***HN14***[↑] a plaintiff may prove market power in one of two ways. The more conventional way "is by proving relevant product and geographic markets and by showing that the defendant's share exceeds whatever threshold is important for the practice in the case." *Toys "R" Us, Inc., 221 F.3d at 937*. The Seventh Circuit has held that in cases alleging a violation of *Section 1 of the Sherman Act*, "a 20%-25% market share or less does not constitute market power." *Valley Liquors, Inc. v. Renfield Imps., Ltd., 822 F.2d 656, 666 (7th Cir. 1987)*. With respect to *Section 2* of the Sherman Act, the required market share showing is even higher. *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481, 112 S.Ct. 2072, 119 L.Ed.2d 265 (1992)* ("Monopoly power under *§ 2* requires, of course, something greater than market power under *§ 1*"). "Without a showing of special market conditions or other compelling evidence of market power, the lowest possible market share legally sufficient to sustain a finding of monopolization is between 17% and 25%." *Valley Liquors, 822 F.2d at 667*.

Here, Defendants submit the expert testimony of Dr. Kneuper. As mentioned above, in his expert report he calculated **[**34]** Defendants' market share using several different data sources and methodologies. His calculation of Peaches' market share **[*774]** ranged from 2.89% to 9% based on his estimates of the number of prom and homecoming dresses sold in the market claimed by Hannah's, and from 6.32% to 7.53% based on his estimates of Peaches' share of the available retail space. (R. 241-1, Kneuper Rep., at 25-27, 29.) These market share figures are far too small for Peaches to possess market power. Dr. Kneuper also notes in his report that Peaches' lack of market power makes sense given the low barriers to entry in the market for prom and homecoming dresses, and the number of competing specialty retail boutiques. (R. 241-1, Kneuper Rep., at 9-11.) Although Plaintiff contests Dr. Kneuper's market share opinions, they are evidence that Peaches does not possess market power. As the Court struck the opinions of Plaintiff's expert Dr. Schafer on legal grounds, Plaintiff has no expert evidence to affirmatively establish that Peaches does possess market power.

III. State Law Claims

As a final matter, Plaintiff also pleads Illinois common law claims for tortious interference with contract (Count VIII), tortious interference with prospective economic advantage (Count IX), **[**35]** and civil conspiracy (Count X), as well as a claim for a violation of the Illinois Consumer Fraud and Deceptive Practices Act (Count XI). (R. 188, Am. Compl.) Plaintiff asserts that the Court has supplemental jurisdiction over these state law claims under *28 U.S.C. § 1367*, and does not argue that the Court has original subject matter jurisdiction over them. (*Id. ¶¶ 52-55*.) As the Court grants Defendants' motion for summary judgment on the Antitrust Claims, it must decide whether to exercise supplemental jurisdiction over these remaining claims. ***HN15***[] A district court "may decline to exercise supplemental jurisdiction over a claim" if, among other reasons, "the district court has dismissed all claims over which it has original jurisdiction." *28 U.S.C. § 1367(c)(3)*; *In re Repository Techs., Inc., 601 F.3d 710, 724 (7th Cir. 2010)*. In addition to that statutory factor, the court "should consider and weigh in each case, and at every stage of the litigation, the values of judicial economy, convenience, fairness, and comity." *In re Repository Techs., Inc., 601 F.3d at 724* (quoting *City of Chicago v. Int'l Coll. of Surgeons, 522 U.S. 156, 173, 118 S.Ct. 523, 139 L.Ed.2d 525 (1997))*. "It is the well-established law of this circuit," however, "that the usual practice is to dismiss without prejudice state supplemental claims whenever all federal claims have been dismissed prior to trial." *Harvey v. Town of Merrillville, 649 F.3d 526, 533 (7th Cir. 2011)* (quoting *Groce v. Eli Lilly & Co., 193 F.3d 496, 501 (7th Cir. 1999))*.

Here, the Court declines to exercise jurisdiction **[**36]** over the remaining non-federal claims.[9] Plaintiff's directs its four state law claims at Defendants' alleged interference with Hannah's business and for using unfair methods of competition. (*See generally* R. 188, Am. Compl. ¶¶ 267-298.) Although the Court reviews Defendants' actions towards Hannah's in finding that any agreements between Peaches and the Designers were vertical and did not include a horizontal agreement among the Designers, the Court's ruling only addresses Defendants' actions from the perspective **[*775]** of federal ***antitrust law***. Whether Plaintiff has valid business tort claims under Illinois state law for Defendants' alleged interference with its commercial relationships or for unfair competition is a different question. As Defendants themselves note in their summary judgment briefing, "If Peaches has committed a business wrong against Hannah's (which Peaches denies), Hannah's may have a business tort claim against Peaches, but it does not have an antitrust claim." (R. 260, Defs.' Memo, at 10.) For this reason, the Court dismisses Plaintiff's remaining claims without prejudice.

CONCLUSION

For the foregoing reasons, the Court grants Defendants' motion for summary judgment on Counts I — VII, dismisses Counts VIII - XI without prejudice, and dismisses Count XII with prejudice in part and without prejudice in part.

DATED: July 2, 2015

---

[9] Although the parties do not discuss it, Plantiff also pleads a Count XII which seeks a declaratory **[**37]** judgment under *28 U.S.C. § 2201* that the exclusive agreements between Peaches and the Designers are illegal under the *Sherman Act* and unenforceable under Illinois law. (R. 188, Am. Compl. ¶¶ 299-305.) Given the Court's summary judgment ruling, the Court dismisses Count XII with prejudice to the extent it seeks a declaratory judgment with respect to the Antitrust Claims, and without prejudice to the extent it seeks a declaratory judgment with respect to the remaining Illinois state law claims.

Opinion by: GARY A. FENNER

Opinion

ORDER

Presently **[*19]** before the Court is Defendants Ferrellgas Partners, L.P.; Ferrellgas, L.P.[1]; UGI Corporation; AmeriGas Partners, LP; AmeriGas Propane, Inc.; and AmeriGas Propane, LP's[2] (collectively "Defendants") Motion to Dismiss the Indirect Purchaser Plaintiffs' Consolidated Class Action Complaint (the "Indirect Purchaser Plaintiffs' CAC"). (Doc. # 135). Plaintiffs Mario Ortiz, Steven Tseffos, Stephen Morrison, Michael S. Harvey, Arthur Hull, Gregory Ludvigsen, Alan Rockwell, Alex Chernavsky, James Halgerson, Thomas R. Clark, Bryce Mander, and Sean Venezia (collectively the "Indirect Purchaser Plaintiffs") oppose. (Doc. # 149).

Also before the Court is Defendants' Motion to Dismiss the Direct Purchaser Plaintiffs' CAC. (Doc. # 137). Plaintiffs Hartig Drug Company, Inc.; Jason Moore's Texaco, L.L.C.; Glenville Shell LLC; AQ Investments, LLC; LJax Enterprises, Inc.; J & V Management, LLC; Butch's Central Coastal, Inc.; Zerka's Party Store, Inc.; OM Commercial Neenah Oil, Inc.; CCLAS, Inc.; Hopewell Exxon, LLC; Tuban Petroleum LLC; 33 and a Third, LLC; Tuban 610 LLC; Highway 182 LLC; West Main Street LLC; Roth's Country Corner, Inc; 1919 Airline Hwy LLC; East Airline LLC;

---

[1] Ferrellgas Partners, L.P. and Ferrellgas, L.P. will be collectively referred to as "Ferrellgas." Ferrellgas does business under the name Blue Rhino. (Direct Purchaser Plaintiffs' Consolidated Class Action Complaint ("Direct Purchaser Plaintiffs' CAC") ¶ 1).

[2] AmeriGas Partners, LP; AmeriGas Propane, Inc.; and AmeriGas Propane, LP will be collectively referred to as "AmeriGas."

Gramercy Cheap Smokes LLC; Conti's **[*20]** Service Center, Inc.; Route 49 Gas & Go, Inc.; Morgan-Larson, LLC; Surinder Kaur, Inc.; Ashville General Store, Inc.; Birdie's, Inc.; Lochraven Sunoco, Inc.; Arrow Hardware, LLC; American Auto Repair; Johnson Auto Electric, Inc.; Cedar Holly Investments, LLC; CEFO Enterprise Corp.; Tuckerton Lumber Company; Ace High Auto Repair & Propane; JonWall, Inc.; RC Gasoline, Speed Stop 32; Inc., Zarco USA, Inc.; Dunmore Oil Co., Inc.; JoJo Oil Co., Inc.; Ekonomy Enterprises, Inc.; and Yocum Oil Company, Inc. (collectively the "Direct Purchaser Plaintiffs") oppose.[3] (Doc. # 148). For the reasons stated below, Defendants' Motion to Dismiss the Indirect Purchaser Plaintiffs' CAC is GRANTED in part and DENIED in part and Defendants' Motion to Dismiss the Direct Purchaser Plaintiffs' CAC is GRANTED.

DISCUSSION

I. FACTS

Defendants are the largest distributors of pre-filled propane exchange tanks. (Direct Purchaser Plaintiffs' CAC ¶ 1). Pre-filled propane exchange tanks are portable steel cylinders containing propane; they are used primarily to power outdoor grills and heaters. (*Id.* ¶ 2). The tanks come in a standard size and can be filled with up to twenty pounds of propane. (*Id.* ¶ 3). Before 2008, **[*21]** the tanks were filled with seventeen pounds of propane. (*Id.*). From 2006 to 2008 the cost of propane rose. (*Id.* ¶¶ 4-5). In 2008, Defendants reduced the fill level of the tanks from seventeen to fifteen pounds of propane per tank while maintaining the same price per tank. (*Id.* ¶ 7).

In 2009, a group of plaintiffs filed suit against Ferrellgas and AmeriGas alleging that they had acted in concert to reduce the amount of propane contained within the tanks and thus, artificially increase the price of the tanks[4]. (Case No. 09-02086-MD-W-GAF, Amended Complaint ¶¶ 1-4). The 2009 plaintiffs alleged that the actions of Ferrellgas and AmeriGas were in violation of *Section 1 of the Sherman Act* and state antitrust and consumer protection laws. (*Id.*). The named plaintiffs in *In re Propane I* were all indirect purchasers, individuals who purchased the pre-filled propane exchange tanks from companies to which Ferrellgas or AmeriGas initially sold them. (*Id.* ¶¶ 10-29). However, the Amended Complaint in *In re Propane I* defined their class as "[a]ll persons who purchased a Propane Tank sold, marketed, or distributed by any Defendant during the applicable limitations periods." (*Id.* ¶ 77).

On December **[*22]** 8, 2009, the plaintiffs moved for preliminary approval of settlement agreements which included only indirect purchasers. (*Id.*, Doc. # 37). The settlement agreements were granted final approval on October 6, 2010. (*Id.*, Doc. # 166). The settlement agreements contained a release provision. (*Id.*, Docs. ## 114, 250). The release provision in the settlement with AmeriGas released AmeriGas from "any and all liabilities, claims, rights, suits, and causes of action, of any kind whatsoever, that [the plaintiffs] may have or may have had . . . whether known or unknown . . . that could have been alleged." (*Id.*, Doc. # 114-4, p. 24). The release provision in the settlement with Ferrellgas released Ferrellgas from "any and all liabilities, claims, rights, suits, and causes of action, of any kind whatsoever, that [the plaintiffs] may have or may have had . . . whether known or unknown . . . that were or could have been sought or alleged." (*Id.*, Doc. # 250-1, p. 20).

On March 27, 2014, the Federal Trade Commission issued a complaint against Defendants alleging that Defendants had restrained price competition because of their 2008 decision to decrease the fill level of the propane tanks. (Direct Purchaser **[*23]** Plaintiffs' CAC ¶ 16). Shortly thereafter, Plaintiffs filed the present suit. (*See id.*). Plaintiffs allege that the 2008 reduction in fill level was due to improper collusion between Defendants who conspired to force Direct Purchaser Plaintiffs to accept the fill reduction and agreed not to compete with one another. (*Id.* ¶¶ 8-11). Plaintiffs allege that this was a violation of *Section 1 of the Sherman Act*. (*Id.*). Plaintiffs in

---

[3] The Direct and Indirect Purchaser Plaintiffs are referred to collectively as "Plaintiffs."

[4] This 2009 action will be referred to as *In re Propane I*.

this action include both direct purchasers, those that purchased the tanks directly from Defendants for resale, and indirect purchasers. (*See* Docket Sheet).

II. LEGAL STANDARD

Under *Federal Rule of Civil Procedure 12(b)(6)*, a court may dismiss a complaint that fails to state a claim upon which relief may be granted. When considering a *Rule 12(b)(6)* motion to dismiss, a court treats all well-pleaded facts as true and grants the non-moving party all reasonable inferences from the facts. *Westcott v. City of Omaha, 901 F.2d 1486, 1488 (8th Cir. 1990)*. However, courts are "not bound to accept as true a legal conclusion couched as a factual allegation" and such "labels and conclusions" or "formulaic recitation[s] of the elements of a cause of action will not do." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))* (internal quotation marks omitted). A *Rule 12(b)(6)* motion should be granted only if the non-moving party fails to plead facts sufficient **[*24]** to state a claim "that is plausible on its face" and would entitle the party to the relief requested. *Twombly, 550 U.S. at 570*.

III. ANALYSIS

A. Release Provision

Defendants first argue that the Indirect Purchaser Plaintiffs' CAC should be dismissed because the settlement agreements in *In re Propane I* released these claims. (Doc. # 136, p. 8). "Plaintiffs in a class action may release claims that were or could have been pled in exchange for settlement relief." *Wal-Mart Stores, Inc. v. Visa U.S.A., Inc., 396 F.3d 96, 106 (2d Cir. 2005)*. "Settlement agreements . . . are viewed in light of governing contract principles." *Harris v. Brownlee, 477 F.3d 1043, 1047 (8th Cir. 2007)*. "[T]he basic rule of the law of contracts [is] that the purpose of every contract is to bind *the parties* to performance." *Pac. Trading Co. v. Mouton Rice Milling Co., 184 F.2d 141, 147 (8th Cir. 1950)* (emphasis added). "Parties to a contract are ordinarily bound by its terms; strangers are not." *Davidson v. Enstar Corp., 848 F.2d 574, 578-79 (5th Cir. 1988)*. Thus, the release provisions from the *In re Propane I* settlement agreements bind only those individuals who were parties to the settlement agreements.

The AmeriGas settlement agreement defined the settlement class as "all people who purchased or exchanged one or more of AmeriGas's pre-filled propane gas cylinders in the United States not for resale, between June 15, 2005 and November 30, 2009." (Case No. 09-02086-MD-W-GAF, Doc. # 114-4, p. 12). The Ferrellgas **[*25]** settlement agreement defined the settlement class as "all people who purchased or exchanged one or more of Ferrellgas's pre-filled propane gas cylinders in the United States not for resale, between June 15 2005 and the date of Preliminary Approval." (*Id.*, Doc. # 250-1, p. 9). The date of preliminary approval was October 13, 2011. (*Id.*, Doc. # 254). Thus, to have been a party to the *In re Propane I* AmeriGas settlement agreement, an individual must have purchased a pre-filled propane tank before November 30, 2009, and to have been a party to the Ferrellgas settlement agreement a purchase must have been made before October 13, 2011.

"When considering a motion to dismiss for failure to state a claim, a court must accept the factual allegations in the complaint as true, and may not consider evidence outside the complaint." *Penn v. Iowa State Bd. of Regents, 999 F.2d 305, 307 (8th Cir. 1993)*. The Indirect Purchasers' Plaintiffs CAC defines the class as individuals who purchased pre-filled propane tanks from AmeriGas after December 1, 2009 and from Ferrellgas after October 14, 2011. (Indirect Purchaser Plaintiffs' CAC ¶ 99). Further, the named Indirect Purchaser Plaintiffs do not allege that they made any purchases before December 1, 2009. (*Id.* ¶¶ 93-98). **[*26]** Defendants allege that this group "almost certainly includes indirect purchasers who were" parties to the *In re Propane I* settlements. (Doc. # 136, p. 9). However, Defendants point to nothing in the Indirect Purchaser Plaintiffs' CAC, or elsewhere, that indicates this is so. (*See* Docs. ## 136, 158). Accordingly, at this point the Court is unable to conclude that any members of the current case were included in the *In re Propane I* settlement agreement and thus bound by its release provision. Therefore, the Court believes it would be premature to examine the validity and scope of the release provision at this time.

B. Statute of Limitations

Defendants next assert that Plaintiffs' claims should be dismissed because they are barred by the statute of limitations. (Doc. # 138, p. 11). "[A] motion to dismiss may be granted when a claim is barred under a statute of limitations." *Varner v. Peterson Farms, 371 F.3d 1011, 1016 (8th Cir. 2004)*. Plaintiffs raise claims under *Section 1 of the Sherman Act*.[5] (Direct Purchaser Plaintiffs' CAC ¶ 134; Indirect Purchaser Plaintiffs' CAC ¶ 147). Claims under the *Sherman Act* have a four year statute of limitations. *15 U.S.C. § 15b*. "Generally, a cause of action accrues and the statute begins to run when a defendant commits an act that injures **[*27]** a plaintiff's business." *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*. Plaintiffs allege that Defendants agreed to reduce the fill level in the pre-filled propane tanks no later than June of 2008 and all Defendants began selling fifteen pound tanks by August 1, 2008. (Direct Purchaser Plaintiffs' CAC ¶ 66; Indirect Purchaser Plaintiffs' CAC ¶ 60). Thus, absent any tolling theories, the statute of limitations expired on August 1, 2012, almost two years before the first claim was filed in this case.

1. Administrative Complaint Theory

Plaintiffs first allege that the FTC's March 27, 2014 filing of an administrative complaint against Defendants suspended the statute of limitations. (Doc. # 149, p. 25).

> Whenever any civil or criminal proceeding is instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws . . . the running of the statute of limitations in respect to every private or State right of action arising under said laws and based in whole or in part on any matter complained of in said proceeding shall be suspended during the pendency thereof and for one year thereafter.

15 U.S.C. § 16(i). The FTC instituted a proceeding against Defendants that challenged the same conduct Plaintiffs challenge in **[*28]** this matter. (Indirect Purchaser Plaintiffs' CAC ¶ 136). The action was filed on March 27, 2014. (*Id.*). Thus, the filing of the administrative complaint moved the statute of limitations period back to March 27, 2010; four years prior to the administrative complaint. *See* *City of Detroit v. Grinnell Corp., 495 F.2d 448, 460 (2d Cir. 1974)* ("[T]he statute of limitations in private antitrust suits generally cuts off claims that arise more than four years before the inception of the government enforcement action."). However, the challenged conduct occurred in the summer of 2008. (Direct Purchaser Plaintiffs' CAC ¶ 66; Indirect Purchaser Plaintiffs' CAC ¶ 60). Thus, the challenged conduct does not fall within the adjusted limitations period. Accordingly, this theory alone does not save Plaintiffs' claims from being barred by the statute of limitations.

2. Continuing Violation Theory

Plaintiffs next argue that the statute of limitations should be tolled pursuant to the continuing violations theory. (Doc. # 148, p. 6). "Under the so-called continuing-violation theory, each overt act that is part of the violation and that injures the plaintiff . . . starts the statutory period running again." *Midwestern Mach. Co. v. Nw. Airlines, Inc., 392 F.3d 265, 269 (8th Cir. 2004)* (omission in original) (quoting *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997))* (internal quotation marks omitted). **[*29]** "An overt act has two elements: (1) it must be a new and independent act that is not merely a reaffirmation of a previous act, and (2) it must inflict new

[5] The Indirect Purchaser Plaintiffs also raise a claim for injunctive relief under *Section 1 of the Sherman Act*. (Indirect Purchaser Plaintiffs' CAC ¶ 139). The timeliness of this claim will be addressed separately below. Additionally, the Indirect Purchaser Plaintiffs assert claims for violation of state antitrust laws. (*Id.* ¶¶ 156, 164-185).

and accumulating injury on the plaintiff. Acts that are merely 'unabated inertial consequences' of a single act do not restart the statute of limitations." *Varner, 371 F.3d at 1019* (internal citations omitted). "[T]he statute runs from the last overt act." *Varner, 371 F.3d at 1019* (quoting *Peck v. General Motors Corp., 894 F.2d 844, 849 (6th Cir. 1990))* (internal quotation marks omitted). Thus, for the continuing violations theory to apply, an overt act must have occurred after March 27, 2010, the beginning of the adjusted limitations period.

Plaintiffs first argue that each time Defendants sold the propane exchange tanks filled with only fifteen pounds of propane, an overt act was committed that satisfied the continuing violations theory. (Doc. # 148, p. 8). Plaintiffs rely primarily on *Klehr* and *In re Wholesale Grocery Products Antitrust Litigation, 752 F.3d 728 (8th Cir. 2014)* to support their contention. (*See* Doc. # 148). In *Klehr*, the Supreme Court stated that "in the case of a 'continuing violation,' say, a price—fixing conspiracy that brings about a series of unlawfully high priced sales over a period of years, 'each overt act that is part of the violation and that injures the plaintiff,' *e.g.*, each sale to the plaintiff, 'starts **[*30]** the statutory period running again.'" *521 U.S. at 189* (quoting P. Areeda & H. Hovenkamp, ***Antitrust Law*** ¶ 338b, p. 145 (rev. ed. 1995)). However, in *Klehr*, the plaintiffs alleged that the defendants had engaged in mail and wire fraud in violation of RICO and sought damages twenty years after the alleged violations occurred. *Id. at 183-84*. The plaintiffs contended that the last predicate act rule saved their claim from being barred by the statute of limitations and the Court was evaluating the rule's lawfulness. *Id. at 186*. The rule allowed a plaintiff to recover, "as long as [a defendant] committed one predicate act within the limitations period . . . not just for any added harm caused them by that late-committed act, but for all the harm caused them by all the acts that make up the total pattern." *Id. at 186-86*. In analyzing the law, the Court turned to the statute of limitations in the context of the *Clayton Act* as a useful analogy. *Id. at 188*. It was in that context that the aforementioned quote occurred. Further, the primary purpose of that language was to explain that, unlike with the last predicate act rule, "the commission of a separate new overt act generally does not permit the plaintiff to recover for the injury caused by old overt **[*31]** acts outside the limitations period." *Id. at 189*. Thus, *Klehr* never ruled that each time a sale is made at a steady supra-competitive price, the overt act requirement of the continuing violations theory in the context of an alleged price fixing conspiracy is met.

This becomes even clearer when considered in conjunction with *Wholesale Grocery Products*. In *Wholesale Grocery Products*, two grocery wholesalers agreed in 2003 to divide the market leaving each with a monopoly in their territories. *752 F.3d at 730*. The plaintiffs filed their claim in 2008. *Id.* The Eighth Circuit evaluated whether the four year statute of limitations barred the plaintiffs' claim and found that the case was controlled by *Klehr. Id. at 736*. The Eighth Circuit reaffirmed the need for a "'separate new overt act'" to satisfy the continuing violation theory. *Id.* (quoting *Klehr, 521 U.S. at 189-90*). The court determined that "the anticompetitive nature of the wholesalers' agreement was not revealed until several years" later, when, during the four years preceding suit, the wholesalers increased their fees. *Id.* The Eighth Circuit stated that "a monopolist commits an overt act each time he uses unlawfully acquired market power to charge an *elevated* price." *Id.* (emphasis added). The **[*32]** Eighth Circuit reasoned that without such a rule, "two parties could agree to divide markets for the purpose of raising prices, wait four years to raise prices, then reap the profits of their illegal agreement with impunity because any antitrust claims would be time barred." *Id.* Thus, the key fact in *Wholesale Grocery Products* was that a price elevation occurred within the limitations period.

Unlike in *Wholesale Grocery Products*, the anticompetitive nature of Defendants' agreement was not revealed years later, during the limitations period. Instead, Plaintiffs allege that the anticompetitive nature of Defendants' agreement was apparent in 2008 when Defendants decreased the amount of propane in the exchange tanks without a corresponding decrease in price. (Direct Purchaser Plaintiffs' CAC ¶ 7). Further, unlike in *Wholesale Grocery Products*, there has been no allegation of a new, separate overt act during the limitations period because there has not been any allegation that Defendants further elevated the relative price of the exchange tanks by further decreasing the fill level. (*See id.*). Because no such price elevation occurred within the limitations period, the overt act requirement **[*33]** is not met.

The plaintiffs in *Insulate SB, Inc. v. Advanced Finishing Systems, Inc., Civil No. 13-2664 ADM/SER, 2014 U.S. Dist. LEXIS 31188, 2014 WL 943224 (D. Minn. Mar. 11, 2014)* attempted to use the same argument that Plaintiffs are alleging in this case. In *Insulate SB*, the plaintiffs alleged that the defendants bought out their existing competitors and conspired to exclude new competitors which allowed them to raise prices. *2014 U.S. Dist. LEXIS 31188, 2014 WL 943224, at *1*. The plaintiffs argued that their claim was not barred by the statute of limitations because, the defendants "committed an overt act each time a supra-competitive price was changed." *2014 U.S. Dist. LEXIS 31188, [WL] at *7*. In rejecting their argument, the court looked to *Klehr* and *Wholesale Grocery Products* and determined that "[w]here a defendant's continued sales under an anticompetitive arrangement merely enforce the initial, unabated arrangement, the sales do not constitute a continuing violation." *Id.* Because there were no allegations that "the initial price-fixing agreement was abated" the court determined that continuing to charge a stable supra-competitive price was insufficient to constitute an overt act. *Id.*

Plaintiffs' argument was also contemplated and rejected in *Southeast Missouri Hospital v. C.R. Bard, Inc., No. 1:07CV0031 TCM, 2008 U.S. Dist. LEXIS 65926, 2008 WL 4104534 (E.D. Mo. Aug. 27, 2008)*. In *Southeast Missouri Hospital*, the **[*34]** plaintiffs alleged that the defendants developed an anticompetitive scheme using exclusionary and market share maintenance contracts in the sale of urological catheters to prevent competition. *2008 U.S. Dist. LEXIS 65926, 2008 WL 4104534, at *1*. The plaintiffs alleged that their claims were not barred by the statute of limitations because "each sale of the urological catheters at unlawful prices and each unknowing remittance for payment [we]re continuing violations." *2008 U.S. Dist. LEXIS 65926, [WL] at *3*. The court rejected the argument and stated that "[s]ales of a product pursuant to an allegedly illegal arrangement are not new, overt acts." *Id.*

Accordingly, it is not the law that each time a sale is made at a stable supra-competitive price the overt act requirement is met. "To hold otherwise would effectively abrogate the statute of limitations in situations such as the one now at issue because each sale of a product pursuant to the underlying agreement would start the statu[t]e of limitations running anew." *Id.* This would make such a defendant indefinitely subject to suit and would undermine the policies behind the statutes of limitation which insure "the defense is [not] hampered by lost evidence, faded memories, . . . disappearing witnesses, and . . . unfair surprise." **[*35]** *Johnson v. Ry. Express Agency, Inc., 421 U.S. 454, 473, 95 S. Ct. 1716, 44 L. Ed. 2d 295 (1975)*. Thus, each time Defendants sold the propane exchange tanks filled with only fifteen pounds of propane, an overt act was not committed that satisfied the continuing violations theory.

Plaintiffs next argue that they sufficiently alleged that Defendants committed other overt acts sufficient to satisfy the continuing violations theory. (Doc. # 148, p. 17). In their complaint, Plaintiffs alleged that "as late as 2010, [Ken] Janish[6] repeatedly dismissed concerns that Blue Rhino might undercut AmeriGas on price or fill levels with words to the effect of, 'I talked to Blue Rhino, and that's not going to happen.' AmeriGas and Blue Rhino continued to have discussions regarding pricing for contracts at least through 2010." (Direct Purchaser Plaintiffs' CAC ¶ 13). Plaintiffs further alleged that "[e]mployees from Blue Rhino and AmeriGas participated in regular calls to discuss their co-packing agreements, presenting ample opportunities for conspiratorial communications." (*Id.* ¶ 47). Plaintiffs additionally alleged that "Janish had similar conversations with employees of Blue Rhino on numerous occasions . . . until at least late 2010" and that "[t]hrough at least the end of 2010, Defendants regularly **[*36]** communicated to assure compliance with the conspiracy . . . Defendants communicated with each other to reassure each other of their compliance." (*Id.* ¶¶ 60, 92, 125).

"The typical antitrust continuing violation occurs in a price-fixing conspiracy . . . when conspirators continue to meet to fine-tune their cartel agreement." *Midwestern Mach. Co., 392 F.3d at 269*. "These meetings are overt acts that begin a new statute of limitations because they serve to further the objectives of the conspiracy." *Id.* In contrast, mere reaffirmations of a previous act are not overt acts that restart the statute of limitations. *See* *Varner, 371 F.3d at 1019*. Thus, the operative question is whether Plaintiffs sufficiently alleged that these phone calls fine-tuned or furthered the conspiracy, or whether their allegations amounted to mere reaffirmations of Defendants' previous decision to collectively reduce fill levels in their propane tanks.

In *Insulate SB*, the plaintiffs alleged that a "letter from [one defendant] to [another defendant] 'reminding them' they were not to carry the Gama product line [as agreed to under their conspiracy] was an overt act in furtherance of the

[6] Ken Janish is AmeriGas's Director of National Accounts. (Direct Purchaser Plaintiffs' CAC ¶ 9).

conspiracy that started the limitations period running anew." *2014 U.S. Dist. LEXIS 31188, 2014 WL 943224, at *7*. The court rejected this argument **[*37]** stating that the "letter merely reflected and reaffirmed the alleged prior agreement . . . and therefore did not restart the limitations period." *Id.* The court in *Insulate SB* additionally concluded that even providing further instructions on how to carry out the conspiracy amounted to a "reflection and reaffirmation of the alleged prior refusal to deal" and thus was not an overt act. *2014 U.S. Dist. LEXIS 31188, [WL] at *7 n.5*.

Like in *Insulate SB*, Plaintiffs allege that Defendants communicated to assure that each party was complying with the conspiracy. (*See* Direct Purchaser Plaintiffs' CAC ¶¶ 13, 47, 60, 92, 125). Also like in *Insulate SB*, Plaintiffs make no allegations that Defendants ever made any changes or modifications to their agreement during the limitations period. (*See id.*). Thus, these communications were mere reaffirmations of the prior agreement and are insufficient to constitute overt acts.

Plaintiffs cite to a number of cases from outside of the Eighth Circuit to support their argument that the alleged communications were overt acts. Plaintiffs cite to *United States v. Hayter Oil Co. of Greeneville, Tennessee, 51 F.3d 1265 (6th Cir. 1995)* for the proposition that "evidence of telephone calls between defendants with conspiratorial subject matter [was] sufficient to find existence of [a] continuing **[*38]** conspiracy." (Doc. # 148, p. 18 n.16). However, this Sixth Circuit case involved a criminal conspiracy action under the Sherman Act where "[p]roof of an overt act is not required." *Hayter Oil, 51 F.3d at 1270*. Thus, "the government [wa]s only required to prove that the agreement existed during the statute of limitations." *Id.* The court found only that telephone calls between the defendants were sufficient to prove that the conspiracy was still in place. *Id. at 1271*. Accordingly, *Hayter Oil* does nothing to establish that confirmation phone calls constitute overt acts.

Plaintiffs also cite to *West Penn Allegheny Health System, Inc. v. UPMC, 627 F.3d 85 (3d Cir. 2010)* for the proposition that the court "reject[ed the] argument [that the] continuing violation doctrine did not apply because injurious acts occurring during limitations were merely 'reaffirmations.'" (Doc. # 148, p. 19 n.17). However, in *West Penn*, the Third Circuit rejected the proposition that a mere reaffirmation of the injurious conduct did not meet the overt act requirement. *627 F.3d at 106*. Therefore, the court made no finding on whether the alleged acts were mere reaffirmations. *See id.* Unlike the Third Circuit, the Eighth Circuit has unequivocally held that mere reaffirmations are not overt acts. *See* *Varner, 371 F.3d at 1019*. Thus, *West Penn* does not support Plaintiffs' **[*39]** argument. Accordingly, Plaintiffs have failed to allege any overt act during the limitations period sufficient to support the continuing violations theory. Therefore, the continuing violations theory does not prevent Plaintiffs' claims from being time barred in this case.

3. American Pipe Tolling

Plaintiffs finally allege that the statute of limitations should be tolled pursuant to the tolling theory from *American Pipe & Construction Co. v. Utah, 414 U.S. 538, 94 S. Ct. 756, 38 L. Ed. 2d 713 (1974)*.[7] (Doc. # 148, p. 21). The Supreme Court in *American Pipe* held that "the commencement of a class action suspends the applicable statute of limitations as to all asserted members of the class who would have been parties had the suit been permitted to continue as a class action." *414 U.S. at 554*. "The *American Pipe* rule is designed to protect the federal procedural interest by preventing duplicative litigation from purported class members during the period that certification is pending." *Great Plains Trust Co. v. Union Pac. R.R. Co., 492 F.3d 986, 997 (8th Cir. 2007)*. The Supreme Court noted that such a tolling rule is not inconsistent with the statutes of limitation, which are meant "to put defendants on notice of adverse claims and to prevent plaintiffs from sleeping on their rights." *Crown, Cork & Seal Co. v. Parker, 462 U.S. 345, 352, 103 S. Ct. 2392, 76 L. Ed. 2d 628 (1983)*. "[T]hese ends are met when a class action is commenced. . . . [A] class complaint 'notifies **[*40]** the defendants not only of the substantive claims being brought against them, but also of the number and generic identities of the potential plaintiffs who may participate in the

[7] Plaintiffs however, admit that this tolling theory is inapplicable to Defendant UGI Corporation. (Doc. # 148, p. 12 n.8; Doc. # 149, p. 26 n.30). Accordingly, no tolling theory is sufficient to prevent Plaintiffs' claims against UGI Corporation from being barred by the statute of limitations. Thus, Plaintiffs claims against UGI Corporation are DISMISSED.

judgment.'" *Id. at 352-53* (quoting *Am. Pipe, 414 U.S. at 555*). The overarching question in determining whether *American Pipe* tolling applies is whether the previous "class action claims and the accompanying class description were sufficient to put each defendant on notice of the substantive . . . claims brought in [the present case] and to inform each defendant of the 'generic identities of [the present] plaintiffs." *In re Gen. Am. Life Ins. Co. Sales Practices Litig., 391 F.3d 907, 915 (8th Cir. 2004)*.

Defendants first allege that *American Pipe* tolling is inapplicable in this case because *American Pipe* tolling cannot be used to toll the statute of limitations for a subsequent class action. (Doc. # 138, p. 13). While Defendants may be correct that other circuits do not allow *American Pipe* tolling for subsequent class actions, the Eighth Circuit has applied *American Pipe* tolling in such a situation. *See Great Plains Trust, 492 F.3d at 997*. "Whether the *American Pipe* rule applies to subsequent class actions, however, depends on the reasons for the denial of certification of the predecessor action." *Id.* The Eighth Circuit in *Great Plains Trust* stated that *American Pipe* ***[*41]*** tolling would apply to subsequent class actions when "'class certification [in the previous action was] denied solely on the basis of the lead plaintiffs' deficiencies'" and when "the later action was not an attempt to relitigate the denial of certification or correct a procedural deficiency." *Id.* (quoting *Yang v. Odom, 392 F.3d 97, 111 (3d Cir. 2004)*. In *Great Plains Trust*, the prior class action was voluntarily dismissed before a certification hearing was held, thus there was no denial of certification. *Id. at 997 n.3*. The Eighth Circuit "decline[d] to determine whether this fact [wa]s material . . . [and] assume[d], for the sake of discussion, that the previous class actions warrant application of the *American Pipe* rule." *Id.*

Like in *Great Plains Trust, In re Propane I* did not involve a denial of certification, instead the settlement classes were granted certification by this Court. (Case No. 09-02086-MDW-GAF, Docs. ## 253, 289). Although the Eighth Circuit has not spoken specifically about whether *American Pipe* tolling applies in such a circumstance, this Court believes that the language of *Great Plains Trust* indicates that it should apply. Specifically, the Eighth Circuit stated that *American Pipe* tolling applies when the subsequent class **[*42]** action is not an attempt to relitigate the denial of class certification. *Great Plains Trust, 492 F.3d at 997*; *See also Berry v. Volkswagen of Am., Inc., No. 09-0484-CV-W-ODS, 2009 U.S. Dist. LEXIS 65624, *6 (W.D. Mo. July 28, 2009)* ("The tolling rule, however, cannot be used by plaintiffs to sequentially relitigate a denial of class certification."). As this Court has previously stated, the concern with the application of *American Pipe* to subsequent class actions is that plaintiffs would be allowed infinite "bites at the apple" to relitigate the same issues while "toll[ing] the statute of limitations indefinitely." *Farthing v. United Healthcare of the Midwest, Inc., No. 2:98-4262-CV-C-4-ECF, 2000 U.S. Dist. LEXIS 21995, *26 (W.D. Mo. Oct. 24, 2000)*. In this case, Plaintiffs are not seeking a second bite at the apple or attempting to relitigate certification issues that were not previously decided in their favor. Thus, this Court believes that *American Pipe* tolling applies in this type of subsequent class action.

Just because *American Pipe* tolling applies to this type of subsequent class action does not mean that all of the other requirements for *American Pipe* tolling are met in this case. Defendants allege that *American Pipe* tolling is not available to the Direct Purchaser Plaintiffs because their current claims were not asserted in *In re Propane I* ***[*43]*** . (Doc. # 138, p. 17). The theory behind *American Pipe* tolling is that the previous class action "notifies the defendants not only of the substantive claims being brought against them, but also of the number and generic identities of the potential plaintiffs." *Am. Pipe, 414 U.S. at 555*. In his concurring opinion in *Crown, Cork & Seal*, Justice Powell reflected on this rationale and stated "[w]hen thus notified, the defendant normally is not prejudiced by tolling of the statute of limitations. It is important to make certain, however, that *American Pipe* is not abused by the assertion of claims that differ from those raised in the original class suit." *462 U.S. at 355* (Powell, J., concurring). The Supreme Court has further stated that "the tolling effect given to the timely prior filings in *American Pipe* and in *Burnett [v. New York Central R.R. Co., 380 U.S. 424, 85 S. Ct. 1050, 13 L. Ed. 2d 941 (1965)]* depended heavily on the fact that those filings involved exactly the same cause of action subsequently asserted." *Johnson, 421 U.S. at 467*.

District Courts within the Eighth Circuit have used this language to determine that *American Pipe* tolling does not apply to the assertion of claims different from those asserted in the previous action. *See Zarecor v. Morgan Keegan & Co., No. 4:11CV00824 BSM, 2013 U.S. Dist. LEXIS 152993, 2013 WL 5687618, at *2 (E.D. Ark. Oct. 15, 2013)* ("[T]olling is not extended to those circumstances **[*44]** where the later causes of action are not identical to those originally brought in the class action."); *Wells v. FedEx Ground Package Sys., Inc., No. 4:10CV2080 JCH, 2011 U.S. Dist. LEXIS 49485, 2011 WL 1769665, at *6 (E.D. Mo. May 9, 2011)* (finding that *American Pipe* tolling "does not leave[ ] a plaintiff free to raise different or peripheral claims following denial of class status.") (alteration in original) (quoting *Williams v. Boeing Co., 517 F.3d 1120, 1136 (9th Cir. 2008))* (internal quotation marks omitted); *Burns v. Ersek, 591 F. Supp. 837, 843 (D. Minn. 1984)* ("[T]he weight of authority is that [*American Pipe*] tolling applies only to causes of action raised in the first suit."). In this case, the Direct Purchaser Plaintiffs assert only one cause of action, violation of *Section 1 of the Sherman Act*, and seek compensatory and treble damages. (Direct Purchaser Plaintiffs' CAC ¶ 137). However, this cause of action was not asserted in *In re Propane I* or any of its underlying complaints. (*See* Case No. 09-02086-MD-W-GAF). Thus, *American Pipe* tolling does not apply to the Direct Purchaser Plaintiffs' claims.

Plaintiffs encourage this Court to ignore these district court cases and the language from the Supreme Court and instead look to precedent from the Sixth and Second Circuits that stand for the proposition that *American Pipe* tolling only requires that a subsequent claim could have **[*45]** been asserted in the prior action. (Doc. # 148, p. 27). However, this Court has reviewed those cases and does not find them to be persuasive in light of the statements from the Supreme Court on the issue. Further this Court finds the reasoning of the Seventh Circuit persuasive when it critiqued the ruling of the Sixth Circuit stating that it, "push[ed] *American Pipe* beyond its own rationale." *In re Copper Antitrust Litig., 436 F.3d 782, 796 (7th Cir. 2006)*. Additionally, Defendants fail to cite to any precedent within this Circuit that supports their proposition. (*See* Doc. # 148). Accordingly, the Direct Purchaser Plaintiffs have failed to establish any tolling theory sufficient to prevent their claim from being barred by the statute of limitations.

Defendants next argue that *American Pipe* tolling is insufficient to support the Indirect Purchaser Plaintiffs' claims[8] because, any *American Pipe* tolling ended on December 8, 2009, when the plaintiffs in *In re Propane I* moved for preliminary approval of their class settlement and defined the class of persons as individuals who purchased or exchanged the tanks "between August 1, 2008 and November 30, 2009." (Doc. # 136, p. 19). Thus, according to Defendants, tolling ended over three months before the adjusted **[*46]** limitations period began on March 27, 2010. (*See* Doc. # 138, p. 27). The Indirect Purchaser Plaintiffs agree that the current class of plaintiffs was excluded from the class definition in the *In re Propane I* settlement; however, they argue that for tolling purposes they were not excluded until the class settlement was granted final approval by this Court on October 6, 2010, which is within the adjusted limitations period. (Doc. # 149, p. 27). Thus, the key question is at what point *American Pipe* tolling ended.

The United States Supreme Court determined that once the statute of limitations is tolled under *American Pipe*, "it remains tolled for all members of the putative class until class certification is denied." *Crown, Cork & Seal, 462 U.S. at 354*. For cases not involving a denial of class certification, *American Pipe* tolling ends when individuals are "notified that they [a]re no longer parties to the suit and they should have realized that they were obliged to file individual suits or intervene in the class action." *Taylor v. United Parcel Serv., Inc., 554 F.3d 510, 520 (5th Cir. 2008)*. *See also* *Choquette v. City of N.Y., 839 F. Supp. 2d 692, 699 (S.D.N.Y. 2012)* ("[C]lass members are treated as parties to the class action 'until and unless they received notice thereof and chose not to continue.") **[*47]**

---

[8] The Indirect Purchaser Plaintiffs' state law antitrust claims are governed by the same *American Pipe* standards as their Sherman Act claim. The Indirect Purchaser Plaintiffs' bring state law claims under the antitrust laws of Kansas, Arizona, California, the District of Columbia, Florida, Iowa, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Mexico, New York, North Carolina, North Dakota, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin. (Indirect Purchaser Plaintiffs' CAC ¶¶ 156, 164-185). Many of these states have explicitly adopted *American Pipe. See e.g.* *Great Plains Trust Co., 492 F.3d at 997* ("Kansas has accordingly adopted the *American Pipe* rule."); *Albano v. Shea Homes Ltd. P'ship, 227 Ariz. 121, 254 P.3d 360, 364 (Ariz. 2011)* (en banc); *Am. Tierra Corp. v. City of W. Jordan, 840 P.2d 757, 762 (Utah 1992)*; *Lucas v. Pioneer, Inc., 256 N.W.2d 167, 180 (Iowa 1977)*; *Maestas v. Sofamor Danek Grp., Inc., No. 02A01-9804-CV-00099, 1999 Tenn. App. LEXIS 97, 1999 WL 74212, at *5 (Tenn. Ct. App. Feb. 16, 1999)*; *Lee v. Grand Rapids Bd. of Educ., 148 Mich. App. 364, 384 N.W.2d 165, 168 (Mich. Ct. App. 1986)*. Even for those states that have not explicitly adopted *American Pipe*, the Eighth Circuit has held that "the federal interest in 'the efficiency and economy of the class-action procedure' outweighs any state interest and therefore justifies tolling in diversity cases where the otherwise-applicable state law provides no relief." *In re Gen. Am. Life Ins. Co. Sales Practices Litig., 391 F.3d at 915* (quoting *Adams Pub. Sch. Dist. v. Asbestos Corp., Ltd., 7 F.3d 717, 718-19 (8th Cir. 1993))*.

(quoting *In re Worldcom Sec. Litig., 496 F.3d 245, 255 (2d Cir. 2007)* (internal quotation marks omitted); *Apsley v. Boeing Co., No. 05-1368, 2013 U.S. Dist. LEXIS 172613, 2013 WL 6440229, at *2 (D. Kan. Dec. 9, 2013)* ("The filing limitations period recommences once it is no longer reasonable for plaintiffs to rely on the class to protect their rights."); *Ganousis v. E.I. du Pont de Nemours & Co., 803 F. Supp. 149, 155 (N.D. Ill. 1992)* ("[T]he limitations clock stops ticking for the individual when the defendant is put on notice by the filing of the class action, and then it resumes ticking when the prospective plaintiff is put on notice of noncoverage in the class action."). Therefore, the appropriate inquiry is determining when the Indirect Purchaser Plaintiffs in the present case sufficiently notified that they were no longer parties to *In re Propane I*.

The Fourth Circuit has concluded that sufficient notice occurs "when a plaintiff moves for class certification by asserting an unambiguous definition of his desired class that is more narrow than is arguably dictated by his complaint." *Smith v. Pennington, 352 F.3d 884, 894 (4th Cir. 2003)*. The Tenth Circuit in *Sawtell v. E.I. du Pont de Nemours & Co., Inc., 22 F.3d 248 (10th Cir. 1994)* also determined that when a group of plaintiffs move to certify a class based on a more narrow definition than what was asserted in the complaint, *American Pipe* no longer tolls the statute of limitations. *22 F.3d at 253-54*. District courts within the Second and Seventh Circuit similarly agree. *See In re New Oriental Educ. & Tech. Grp. Sec. Litig., 293 F.R.D. 483, 487 (S.D.N.Y. 2013)* (holding that when a class is redefined "more **[*48]** narrowly than [in] the prior individual complaints, and no longer asserts claims on behalf of a portion of the consolidated class, the statute of limitations is no longer tolled under *American Pipe* for that 'abandoned' subclass"); *Ganousis, 803 F. Supp. at 155-56 (N.D. Ill. 1992)*.

The first filed complaint in *In re Propane I* defined the class as "[a]ll persons who purchased one or more of Defendants' pre-filled 20-pound capacity Propane Gas Tanks, during the applicable limitations period that contained under 17 pounds of propane." (Case No. 09-00924-CV-W-GAF, Complaint, ¶ 27). This definition could be construed to include the Indirect Purchaser Plaintiff class from this case which is defined as "[a]ll persons who, in the United States, purchased a filled propane exchange tank, and whose tank was provided by [Defendants after December 1, 2009]." (Indirect Purchaser Plaintiffs' CAC ¶ 99). However, on December 8, 2009, the plaintiffs in *In re Propane I* moved for class certification using a more narrow class definition which limited the class of plaintiffs to individuals who purchased the tanks before November 30, 2009. (Case No. 09-02086-MD-W-GAF, Doc. # 37). Thus, according to precedent from the Fourth, Tenth, Second, and Seventh Circuits, **[*49]** *American Pipe* tolling ended at that point.

Indirect Purchaser Plaintiffs urge this Court to ignore this precedent and instead look to *Choquette* a case from the same district and the same judge, Judge Koeltl, as *Oriental Education* but decided one year previously. (Doc. # 148, p. 29). In *Choquette*, the plaintiffs were members of a previous class action involving prisoners who were strip searched and subjected to nonconsensual gynecological examinations. *839 F. Supp. 2d at 694, 698*. The class that was ultimately certified and settled included their claims for unlawful strip searching but not for forced gynecological examinations. *Id. at 694-95*. The parties disagreed about when *American Pipe* tolling ended as to the claims of nonconsensual gynecological examinations. *Id. at 698*. The defendants argued that it ended when the parties in the previous action entered into a settlement agreement which failed to mention any class claims for the forced gynecological examinations, while the plaintiffs alleged that the tolling did not end until the settlement agreement was preliminarily or finally approved by the court. *Id.* Judge Koeltl ultimately determined that the proposed settlement agreement did not trigger an end to *American Pipe* tolling. *Id. at 703*.

[*50] As an initial matter, this case is more factually similar to *Oriental Education* than it is to *Choquette*. Like in *Oriental Education*, the plaintiffs in *In re Propane I* moved to certify a settlement class using a more narrow definition than was asserted in the individual complaints. (Case No. 09-02086-MD-W-GAF, Doc. # 37). No such motion was mentioned in *Choquette*. *See 839 F. Supp. 2d 692*. Further, in *Choquette*, Judge Koeltl took issue with the fact that the position advocated by the defendants would have allowed "actions by class counsel [to] trigger an end to tolling." *Id. at 701*. Instead, Judge Koeltl believed a decision from a court was needed. *Id. at 699* ("*American Pipe* tolling continues until a class certification decision of the court excludes the claims of the plaintiff."), *700-01, 703*. This Court granted the *In re Propane I* plaintiffs' Motion for Preliminary Approval of Class Settlement and approved certification of the narrowed settlement class on March 11, 2010. (Case No. 09-02086-MD-W-GAF, Doc. # 88). Thus, even if a court order is needed to end *American Pipe* tolling, such an order came from this Court almost two weeks before the beginning of the adjusted limitations period. Accordingly, *American Pipe* tolling does not save the Indirect Purchaser Plaintiffs' claims from being barred by the statute of limitations. Therefore, the Indirect Purchaser Plaintiffs have failed to establish any tolling theory sufficient to prevent their state or federal law antitrust claims from being barred by the statute of limitations.

4. Indirect Purchaser Plaintiffs' Injunctive Relief Claim

The Indirect Purchaser Plaintiffs' final remaining claim is a claim for injunctive relief under *Section 1 of the Sherman Act*. (Indirect Purchaser Plaintiffs' CAC Count I). While some circuit courts have indicated that the Sherman Act's four year statute of limitations applies to claims for injunctive relief,[9] the Eighth Circuit has analyzed a federal antitrust action for injunctive relief's timeliness under the doctrine of laches. *See Midwestern Mach., 392 F.3d at 277*. "The doctrine of laches is an equitable defense . . . . For the application of the doctrine of laches to bar a lawsuit, the plaintiff must be guilty of unreasonable and inexcusable delay that has resulted **[*51]** in prejudice to the defendant." *Goodman v. McDonnell Douglas Corp., 606 F.2d 800, 804 (8th Cir. 1979)*. The running of an analogous statute of limitation is "merely one element in the congeries of factors to be considered in determining whether the length of delay was unreasonable and whether the potential for prejudice was great." *Id. at 805*. "A court should focus upon the length of the delay, the reasons therefor, how the delay affected the defendant, and the overall fairness of permitting the assertion of the claim." *Id. at 806*. Further, "[l]aches is considered an affirmative defense, and generally the burden of persuasion on an affirmative defense rests with the defendant." *Id.* (internal citation omitted).

In this case, the analogous statute of limitations has run, which weighs against Plaintiffs. However, the Indirect Purchaser Plaintiffs missed the limitations period by only three months, which weighs in their favor. Additionally, Defendants have made only conclusory allegations that they "will be prejudiced if required to expend further time and resources defending stale claims." (Doc. # 136, p. 16). "Not all prejudice to a defendant will be recognized as supporting a defense of laches." *Goodman, 606 F.2d at 809 n.17*. "There are two kinds of prejudice which might support a defense of laches: **[*52]** (1) the delay has resulted in the loss of the evidence . . .; or (2) the defendant has changed his position in a way that would not have occurred if the plaintiff had not delayed." *Id.* (quoting *Tobacco Workers Int'l Union Local 317 v. Lorillard Corp., 448 F.2d 949, 958 (4th Cir. 1971))* (internal citations omitted)). Defendants' conclusory allegations are insufficient to establish the existence of either of these types of prejudice. Although the Indirect Purchaser Plaintiffs have not alleged any excuses or reasons to defend their delay, this Court does not believe that Defendants have met their burden to establish the existence of laches as an affirmative defense.

CONCLUSION

Defendants moved to dismiss both the Direct Purchaser Plaintiffs' and the Indirect Purchaser Plaintiffs' Consolidated Class Action Complaints. Against the Indirect Purchaser Plaintiffs, Defendants first argue that their current claims were barred by the release provisions from *In re Propane I*. However, for the release provision to apply to them, the Indirect Purchaser Plaintiffs must have been a part of the class definition in *In re Propane I* and, taking the allegations of the pleadings as true and without further evidence, it cannot be said that the Indirect Purchaser Plaintiffs in this case were parties **[*53]** in *In re Propane I*. Thus, at this point the release provision does not bar their claims.

Next, Defendants argue that Plaintiffs' claims are barred by the statute of limitations. Because of the administrative action, the adjusted limitations period in this case began on March 27, 2010. Neither of Plaintiffs' tolling theories were sufficient to meet the adjusted limitations period. Under the continuing violations theory, Plaintiffs needed to

[9] For example, the Third Circuit in *Pennsylvania Dental Association v. Med. Service Association of Pennsylvania, 815 F.2d 270 (3d Cir. 1987)* assumed that the statute of limitations applied.

establish the existence of an overt act that occurred within the adjusted limitations period. However, Plaintiffs failed to allege that a sufficient overt act occurred during the limitations period. Further, *American Pipe* tolling is insufficient to save the Direct Purchaser Plaintiffs' CAC because their current claims were not alleged in *In re Propane I. American Pipe* tolling is also insufficient to save the Indirect Purchaser Plaintiffs' state law and federal damages claims because *American Pipe* tolling expired on December 8, 2009 when the plaintiffs in *In re Propane I* moved for class certification using a more narrow class definition that limited the class of plaintiffs to individuals who purchased the tanks before November 30, 2009. Accordingly, **[*54]** for these reasons and the reasons set forth above, Defendants' Motions to Dismiss the Direct Purchaser Plaintiffs' CAC and the Indirect Purchaser Plaintiffs' Counts II-IV are GRANTED.

However, the Indirect Purchaser Plaintiffs' Count I claim for injunctive relief is governed by the doctrine of laches, not the statute of limitations. Defendants have failed to meet their burden to establish the affirmative defense of the doctrine of laches against that claim. Accordingly, for these reasons and the reasons set forth above, Defendants' Motion to Dismiss Count I of the Indirect Purchaser Plaintiffs' CAC is DENIED.

IT IS SO ORDERED.

/s/ Gary A. Fenner

United States District Court

DATED: July 2, 2015

Lupin Pharms., Inc. v. Richards

United States District Court for the District of Maryland

July 2, 2015, Decided; July 2, 2015, Filed

Civil Action No. RDB-15-1281

Reporter
2015 U.S. Dist. LEXIS 86208 *; 2015 WL 4068818

LUPIN PHARMACEUTICALS, INC., et al., Plaintiffs, v. CRAIG RICHARDS, Defendant.

Core Terms

attorney general, abstention, motion to dismiss, superior court, subpoena, preliminary injunction, district court, proceedings, abstain, patent, drugs, subject matter jurisdiction, federal court, contempt, criminal prosecution, Pharmaceuticals, requesting, antitrust, documents, demands, cases

Counsel: For Lupin Pharmaceuticals, Inc., Lupin Ltd., Plaintiffs: Anthony R Van Vuren, LEAD ATTORNEY, Morgan, Lewis & Bockius LLP, Washington, DC; Bryan M Killian, PRO HAC VICE, Conrad W Bolston, PRO HAC VICE, Leiv Hamilton Blad **[*1]** , PRO HAC VICE, Morgan Lewis and Bockius LLP, Washington, DC.

For Craig W. Richards, in his individual and official capacity as Attorney General of Alaska, Defendant: Clyde E Sniffen, Jr, PRO HAC VICE, Alaska Dept Law, Achorage, AK; Robert S Libman, PRO HAC VICE, David P Baltmanis, Miner, Barnhill & Galland P.C., Chicago, IL.

Judges: Richard D. Bennett, United States District Judge.

Opinion by: Richard D. Bennett

Opinion

MEMORANDUM OPINION

In this case, Plaintiffs Lupin Pharmaceuticals, Inc.[1] ("Lupin Pharmaceuticals") and Lupin, Ltd. ("Lupin India") (collectively, "the Lupin Plaintiffs") seek to enjoin Defendant Craig Richards, the Attorney General of Alaska, ("the Attorney General") from issuing a civil investigative demand ("CID") to the Lupin Plaintiffs and from applying Alaskan ***antitrust law*** to the Lupin Plaintiffs. The Attorney General has moved to dismiss this action, arguing that this Court should abstain from exercising its jurisdiction under the abstention doctrine established in *Younger v. Harris, 401 U.S. 37, 91 S. Ct. 746, 27 L. Ed. 2d 669 (1971)*. The parties' **[*2]** submissions have been reviewed, and this Court held a hearing on June 26, 2015 on the Motion. *See* Local Rule 105.6 (D. Md. 2014). For the reasons that follow, Defendants Craig Richards' Motion to Dismiss (ECF No. 23) is GRANTED, and this case is DISMISSED.

---

[1] Lupin Pharmaceuticals, Inc is a Virginia corporation with its headquarters and principal place of business located in Baltimore, Maryland. Pls.' Comp. ¶ 10. Lupin Pharmaceuticals distributes prescription medications to American customers and is a wholly owned subsidiary of co-Plaintiff Lupin, Ltd. ("Lupin India"). *Id.*

BACKGROUND

This Court accepts as true the facts alleged in plaintiff's complaint. *See* *Aziz v. Alcolac, Inc., 658 F.3d 388, 390 (4th Cir. 2011)*. This dispute arose out of issues pertaining to two drugs, Loestrin FE 24 and Effexor XR. These drugs are manufactured and sold by Warner-Chilcott and Wyeth, respectively, and those companies hold patents on the drugs. *See* Compl., ¶ 16. The Lupin Plaintiffs allege that neither Lupin Pharmaceuticals, Inc. nor Lupin, Ltd.[2] ("Lupin India") had rights to sell the drugs or approval to sell generic versions. *Id.* The Lupin Plaintiffs had filed applications with the Food & Drug Administration ("FDA") in 2006 and 2009 to sell generic versions of the respective **[*3]** drugs, but the brand manufacturers sued the Lupin Plaintiffs for declaratory judgments stating that the sale of such generics would violate their patents.[3] *Id.* at ¶ 17. The Lupin Plaintiffs settled the patent claims in 2009 and 2010 respectively. *Id.* at ¶¶ 17-18.

On February 3, 2015, pursuant to *Alaska Stats. §§45.50.592*[4] and *45.50.495*, Attorney General Richards issued separate civil investigative demands (CIDs) to Lupin Pharmaceuticals, Inc., and Lupin, Ltd., demanding production

---

[2] Lupin India is incorporated in India and has its headquarters and principal place of business in Mumbai, India. Pls.' Compl. ¶ 11. Lupin India develops and manufactures branded and generic drugs in India.

[3] Specifically, the Lupin Plaintiffs alleged:

> Neither LPI nor Lupin India has ever sold Loestrin or Effexor nor have they ever obtained approval from the Food and Drug Administration ("FDA") to sell generic versions of those products. On September 30, 2006, Plaintiffs filed with the FDA an Abbreviated New Drug Application ("ANDA") seeking FDA approval of a generic version of Effexor. On March 13, 2007, Wyeth, the branded manufacturer of Effexor, sued SPI for a declaratory judgment that LPI's generic version of Effexnor would infringe Wyeth's patent. Wyeth and LPI settled the litigation on May 11, 2009.
>
> . . . On July 30, 2009, LPI filed an ANDA seeking FDA approval of a generic version of Loestrin. On September 9, 2009, Warner-Chilcott, **[*4]** the branded manufacturer of Loestrin, sued LPI for a declaratory judgment that LPI's generic version of Loestrin would infringe Warner Chilcott's patent. Warner-Chilcott and LPI settled the litigation on October 10, 2010.

Pls.' Compl. ¶¶ 17-18.

[4] *Section 45.50.592* states in full:

> (a) If the attorney general determines that a person is in possession, custody, or control of documentary evidence, wherever situated, that the attorney general believes to be relevant to an investigation authorized in AS 45.50.590, the attorney general may execute in writing and cause to be served on that person an investigative demand requiring the person to produce the documentary material, and permit inspection and copying.
>
> (b) Each demand must
>
> > (1) state the specific statute the alleged violation of which is under investigation, and the general subject matter of the investigation;
> >
> > (2) describe, with reasonable specificity so as fairly to indicate the material demanded, the documentary material to be produced;
> >
> > (3) prescribe a return date within which the documentary material is to be produced; and
> >
> > (4) identify the state employees or representatives to whom the documentary material is to be made available for inspection and copying.
>
> (c) A demand may not
>
> > (1) require the production of documentary material that would **[*6]** be privileged from disclosure if demanded by a subpoena duces tecum issued by a court of the state; or
> >
> > (2) contain a requirement that would be unreasonable or improper if contained in a subpoena duces tecum issued by a court of the state; however, this does not limit the power of the attorney general to require production of documents located outside the state that pertain to matters affecting the state.

of three categories of documents related to the two drugs. *Id.* at ¶ 21. The CIDs state that "[t]he Attorney General seeks to determine whether the pharmaceutical manufacturers subject to [the CID] violated Alaska state law by entering into a settlement agreement that terminated ongoing patent litigation regarding the brand name drug listed herein, and thereby delaying generic entry into the marketplace," in potential violation of Alaska antitrust and consumer protection statutes. *See* Mem. Supp. Mot. Dismiss 1-2, ECF No. 23-1. The CIDs originally required production of responsive documents within sixty days. *Id.* at 2. The Lupin Plaintiffs allege that the scope of the CIDs included filings with the Federal Trade Commission ("FTC") and Department of Justice ("DOJ"), documents **[*5]** produced in the patent litigations, documents discussing the validity of the patents, and agreements between Lupin and the branded manufacturers. Pls.' Compl. ¶ 21.

Alaska law provides that the subject of a CID may within 20 days of service file a petition in Alaska Superior Court stating good cause why the CID should be modified or set aside. *Alaska Stat. §45.50.592(f)*. The Lupin Plaintiffs declined to file any petition requesting modification of the CID. It is undisputed, however, that the Lupin Plaintiffs requested to extend the time for compliance with the CIDs; the Attorney General granted those requests. Thus, the deadline to produce documents responsive to the CIDs was May 4, 2015. Pls.' Compl. ¶23.

(d) The demand may be served by the attorney general or the designee of the attorney general by

(1) delivering a copy of it to the person to be served or, if the person is not a natural person, to an officer of the person to be served;

(2) delivering a copy of it to a place of business in the state of the person to be served; or

(3) mailing by registered or certified mail a copy of it addressed to the person to be served at a place of business in the state or, if the person has no place of business in the state, to the principal office or place of business of the person.

(e) Documentary material produced pursuant to a demand, or copies of it, unless otherwise ordered by a superior court for good cause shown, may not be produced for inspection or copying by, nor may its contents be disclosed **[*7]** to, anyone other than an authorized employee of the state without the consent of the person who produced the material. However, under those reasonable terms and conditions the attorney general prescribes, copies of the documentary material shall be available for inspection and copying by the person who produced the material or an authorized representative of that person. The attorney general, or a designee, may use copies of the documentary material as the attorney general or designee considers necessary in the enforcement of AS 45.50.562-45.50.598, including presentation before a court; however, material that contains trade secrets may not be presented except with the approval of the court in which the action is pending after adequate notice to the person furnishing the material.

(f) At any time before the return date specified in the demand, or within 20 days after the demand has been served, whichever period is shorter, a petition to extend the return date for, or to modify or set aside a demand issued under (a) of this section, stating good cause, may be filed in the superior court for the judicial district where the parties reside. A petition by a person on whom a demand is served, **[*8]** stating good cause, to require the attorney general or another person to act in accordance with the requirements of (e) of this section, and all other petitions in connection with a demand, may be filed in the superior court for the judicial district in which the person on whom the demand is served resides.

(g) A person on whom a demand is served under this section shall comply with the terms of the demand unless otherwise provided by an order of court issued in response to a petition filed under (f) of this section. A person who, with intent to avoid, prevent, or obstruct compliance, in whole or in part, with an investigative demand under this section, removes from any place, conceals, withholds, or destroys, mutilates, alters, or by any other means falsifies, documentary material in the possession, custody, or control of a person that is the subject of a demand duly served on any person, or who otherwise wilfully disobeys any such demand, is guilty of a misdemeanor, and is punishable upon conviction by a fine of not more than $5,000, or by imprisonment for a term of not more than one year, or by both. Failure of the state to serve the demand properly under (d) of this section is a **[*9]** defense to prosecution under this subsection, but invalidity of the demand under (b) or (c) of this section is not a defense, and that invalidity may be tested only in an action under (f) of this section to modify or set aside the demand.

(h) Nothing in this section impairs the authority of the attorney general or a designee to lay before a grand jury of this state evidence concerning a violation of AS 45.50.562 - 45.50.596, to invoke the power of a court to compel the production of evidence before a grand jury, or to file a civil complaint or criminal information alleging a violation of AS 45.50.562 - 45.50.596.

Instead of complying with or objecting to the CIDs, the Lupin **[*10]** Plaintiffs filed the present action on the May 4 deadline, and filed the Motion for Preliminary Injunction (ECF No. 4) on the following day. The Complaint requests that this Court immediately issue a permanent injunction restraining Defendant from issuing civil investigative demands (CIDs) to Plaintiffs in connection with the Attorney General's investigation of Plaintiffs' compliance with Alaskan Antitrust laws, and from applying those state laws to Plaintiffs. Plaintiffs also request a declaratory judgment that Defendant's issuance of CIDs to Plaintiffs in connection with the Attorney General's investigation of Plaintiffs' compliance with Alaskan antitrust laws regarding the drugs was unconstitutional. The Plaintiffs also seek attorneys' fees and damages.

On May 22, 2015, the Attorney General filed a motion for extension of time to respond, noting that the assistant attorney general assigned to the case (Clyde Sniffen, Jr.) was on vacation when this case was filed and that an extension was needed to allow time for Sniffen to "return from vacation on May 27, 2015 to review the pleadings in this case, confer with Attorney General Richards, and prepare a response to the motion for preliminary **[*11]** injunction." The motion was opposed by the Plaintiffs but was granted by this Court.

On June 1, 2015, the Attorney General filed a petition in Alaska Superior Court for an order to show cause why the Lupin Plaintiffs should not be held in contempt for failure to respond to the CIDs pursuant to *Alaska Stat. § 45.50.592(g)*.[5] On June 1, 2015, the Attorney General also filed the subject Motion to Dismiss (ECF No. 23) and a Motion to Stay the Motion for Preliminary Injunction (ECF No. 24) in this Court.

This Court held a teleconference on June 3, 2015. As a result of that call, the Motion to Stay the Motion for Preliminary Injunction was granted, and this Court established a briefing schedule for the motion to dismiss. This Court held a hearing on the Motion to Dismiss on June 26, 2015.

STANDARD OF REVIEW

A motion to dismiss under *Rule 12(b)(1) of the Federal Rules of Civil Procedure* for lack of subject matter jurisdiction challenges a court's authority to hear the matter brought by a complaint. *See Davis v. Thompson, 367 F. Supp. 2d 792, 799 (D. Md. 2005)*. This challenge under *Rule 12(b)(1)* may proceed either as a facial challenge, asserting that the allegations in the complaint are insufficient to establish subject matter jurisdiction, or a factual challenge, asserting "that the jurisdictional **[*12]** allegations of the complaint [are] not true." *Kerns v. United States, 585 F.3d 187, 192 (4th Cir. 2009)* (citation omitted). With respect to a facial challenge, a court will grant a motion to dismiss for lack of subject matter jurisdiction "where a claim fails to allege facts upon which the court may base jurisdiction." *Davis, 367 F. Supp. 2d at 799*.

Where the challenge is factual, "the district court is entitled to decide disputed issues of fact with respect to subject matter jurisdiction." *Kerns, 585 F.3d at 192*. "[T]he court may look beyond the pleadings and 'the jurisdictional allegations of the complaint and view whatever evidence has been submitted on the issue to determine whether in fact subject matter jurisdiction exists.'" *Khoury v. Meserve, 268 F. Supp. 2d 600, 606 (D. Md. 2003)* (citation omitted). The court "may regard the pleadings as mere evidence on the issue and may consider evidence outside the pleadings without converting the proceeding to one for summary judgment." *Velasco v. Gov't of Indon., 370 F.3d 392, 398 (4th Cir. 2004)*; *see also Sharafeldin v. Maryland, 94 F. Supp. 2d 680, 684-85 (D. Md. 2000)*. A plaintiff carries the burden of establishing subject matter jurisdiction. *Lovern v. Edwards, 190 F.3d 648, 654 (4th Cir. 1999)*.

ANALYSIS

---

[5] The Court refers to this case as "the Alaska Proceeding."

The main issue before this Court is whether this Court should abstain from exercising its jurisdiction over this case under the doctrine of *Younger v. Harris, 401 U.S. 37, 91 S. Ct. 746, 27 L. Ed. 2d 669 (1971)*.[6] Of course, federal courts have a "virtually unflagging" obligation to hear and decide those cases for which they have jurisdiction. *Sprint Communs., Inc. v. Jacobs, 134 S. Ct. 584, 591, 187 L. Ed. 2d 505 (2013)* **[*13]** (citing *Colorado River Water Conservation Dist. V. United States, 424 U.S. 800, 96 S. Ct. 1236, 47 L. Ed. 2d 483 (1976))*. Certain "exceptional circumstances," however, "justify a federal court's refusal to decide a case in deference to the States." *Id.* (quoting *New Orleans Pub. Serv., Inc. v. Council of City of New Orleans, 491 U.S. 350, 109 S. Ct. 2506, 105 L. Ed. 2d 298 (1989))*. The first case involving such an "exceptional circumstance" was *Younger*, where the United States Supreme Court held that considerations of federalism and comity required federal courts to abstain from exercising their equity jurisdiction to enjoin ongoing state criminal prosecutions. Subsequently, the Supreme Court found that such considerations also justified abstention where there were "state civil proceedings that [were] akin to criminal prosecutions" or state proceedings "that implicate[d] a State's interest in enforcing the orders and judgments of its courts." *Sprint Communs., Inc. v. Jacobs, 134 S. Ct. 584, 588, 187 L. Ed. 2d 505 (2013)*. The Supreme Court's most recent opinion addressing *Younger* abstention—*Sprint Communications, Inc. v. Jacobs*—does not purport to diverge from the Court's previous *Younger* jurisprudence; however, the Court noted that its decision was intended "to guide other federal courts" and to "clarify and affirm that *Younger* extends to the three exceptional circumstances identified in [*New Orleans Pub. Serv., Inc. v. Council of City of New Orleans, 491 U.S. 350, 109 S. Ct. 2506, 105 L. Ed. 2d 298 (1989)]*, but no further." *Sprint, 134 S. Ct. at 593-94* (internal quotation marks omitted).

The Attorney General asserts that the Alaska Proceeding warrants *Younger* abstention because it is both a civil enforcement proceeding akin to a criminal prosecution (i.e., the second *Younger* category) and a state proceeding that implicates the State's interest in enforcing the orders and judgments of its courts (i.e., the third *Younger* category). The Lupin Plaintiffs characterize the Alaska Proceeding as a discovery dispute that does not qualify under either the second or third **[*14]** *Younger* categories. Because this Court finds that this case clearly qualifies for the third category of *Younger* abstention, this Court need not reach the issue of whether this case also satisfies *Younger*'s second category.

A) The Alaska Proceeding Implicates the State's Interest in Enforcing the Orders and Judgments of its Courts

In *Juidice v. Vail, 430 U.S. 327, 97 S. Ct. 1211, 51 L. Ed. 2d 376 (1977)*, the Supreme Court found that abstention under *Younger* was appropriate in a federal class action suit brought by individuals who had been found in contempt by state court judges for disobeying subpoenas. The Court recognized that the same principles of federalism and comity that were emphasized in *Younger* also applied to cases involving a State's contempt process because "federal-court interference with the State's contempt process is an offense to the State's interest . . . likely to be every bit as great as it would be were [it] a criminal proceeding." *Juidice, 430 U.S. at 335-36* (internal quotation marks omitted).

The Lupin Plaintiffs attempt to distinguish this case from *Juidice* on the basis of the type of subpoena at issue. In *Juidice*, the Supreme Court was faced with contempt proceedings arising out of an individual's failure to respond to a subpoena in a civil action between **[*15]** private parties. In this case, the civil investigative demands—essentially subpoenas—are administrative in nature. Specifically, AS *§ 45.50.592* authorizes the Attorney General to issue CIDs when the Attorney General believes a party may have documentary evidence believed to be relevant to an authorized antitrust investigation. Petitions pertaining to such demands "may be filed in the superior court for the judicial district in which the person on whom the demand is served resides." AS *§ 45.50.592(f)*.

---

[6] This Court recognizes that the Defendant Attorney General raised several other issues in its motion to dismiss, including arguments pertaining to failure to state a claim under *Rule 12(b)(6)* under the Dormant *Commerce Clause of the United States Constitution*, *see* *U.S. Const. art. 1, § 8, cl.3*, ripeness doctrine, absolute prosecutorial immunity, and qualified immunity. These issues were fully briefed, although the majority of the parties' papers focused on the abstention issue, and argument at the June 26, 2015 hearing was limited to the abstention issue as well. Because this Court finds that *Younger* abstention is proper, this Court does not reach these other issues raised by the parties.

The Lupin Plaintiffs acknowledge that courts have found that *Younger* abstention is appropriate in the face of similar civil investigative demands,[7] but argue that those cases were "eviscerate[d]" by the Supreme Court's opinion in *Sprint*. Pls.' Resp. at 8. The Lupin Plaintiffs argue that this case is instead analogous to *Google v. Hood, 96 F. Supp. 3d 584, 2015 U.S. Dist. LEXIS 49310, 2015 WL 1546160 (S.D. Miss. Mar. 27, 2015)*, and that *Younger* abstention does not apply. In the *Google* case, the district court found that a subpoena issued under the Mississippi Consumer Protection Act by a state's attorney general did not fit into any of the three *Younger* types of cases. In reaching that conclusion, however, the district court noted that there was no pending attempt to enforce the subpoena.[8] *2015 U.S. Dist. LEXIS 49310, [WL] at *6* ("At this time, there is no ongoing state **[*16]** criminal prosecution relating to this matter, nor are there civil proceedings involving certain orders uniquely in furtherance of the state courts' ability to perform their judicial functions."). Thus, the *Google* case is immediately distinguishable because the attorney general in that case never sought to enforce the subpoena through an action in the state court. In this case, the Attorney General has already filed a proceeding in Alaska Superior Court, thereby triggering judicial oversight of the CIDs. In this respect, therefore, the Lupin Plaintiffs' argument reveals itself as a mere distinction without a difference. The subpoenas at issue in *Juidice* were not issued by a court itself; instead, they were issued by a private party's attorney acting "as an officer of the court." *430 U.S. at 329 n2*. Similarly, the CIDs in this case are issued by the Attorney General, but like in *Juidice*, can only be enforced after involving a state court. Accordingly, this Court finds that *Juidice* requires this Court to abstain under the third category of the *Younger* Doctrine.[9]

B) The Alaska Proceeding as a Parallel Action

The Lupin Plaintiffs next argue that "this Court should not abstain in favor of the show cause petition because it is not a truly parallel state proceeding that raises the constitutional questions that Plaintiffs have presented in their federal complaint."[10] Pl.'s Resp. 12-13, ECF No. 32. The Lupin Plaintiffs argue that the proceeding will be restricted to whether the Lupin Plaintiffs willfully disobeyed the CIDs and that "it appears unlikely that the Alaska superior court will decide the *defense* that the AG lacked constitutional authority to issue the CIDs to Plaintiffs." *Id.* at 13. The Lupin Plaintiffs assert that the Alaska statute only expressly allows improper service of the CID to be raised and prohibits defenses going to a CID's validity; thus, the Lupin Plaintiffs argue that **[*18]** their challenge to the Attorney General's jurisdictional authority to even issue the CIDs to the Lupin Plaintiffs is an issue that will not be reached.

The Lupin Plaintiffs' speculation about the purported inadequacy of the Alaska proceeding fails to prevent the application of *Younger* abstention in this case. The Supreme Court has explained that "the burden . . . rests on the federal plaintiff to show that state procedural law bar[s] presentation of its claims." *Pennzoil Co. v. Texaco, Inc., 481 U.S. 1, 14, 107 S. Ct. 1519, 95 L. Ed. 2d 1 (1987)* (internal quotation marks omitted). "[W]hen a litigant has not attempted to present his federal claims in related state-court proceedings, a federal court should assume that state

---

[7] These cases include *Temple of the Lost Sheep, Inc. v. Abrams, 761 F. Supp. 237, 242-43 (E.D.N.Y. 1989)*, and *Cuomo v. Dreamland Amusements, Inc., 2008 U.S. Dist. LEXIS 71432, 2008 WL 4369270, at *10 (S.D.N.Y. Sept. 22, 2008)*.

[8] Notably, the district court also found that the subpoena had been issued in bad faith by the attorney general in response to **[*17]** Google's refusal to comply with certain requests made by the attorney general concerning Google's services.

[9] In light of this Court's holding with respect to the third *Younger* category, this Court sees no need to address the issue whether the Alaska Proceeding qualifies as a civil enforcement action akin to a criminal prosecution under the second *Younger* category.

[10] The Lupin Plaintiffs' argument on this point refers to three factors recognized in *Middlesex County Ethics Committee v. Garden State Bar Association, 457 U.S. 423, 102 S. Ct. 2515, 73 L. Ed. 2d 116 (1982)*: (1) whether there is an ongoing state judicial proceeding; (2) whether the proceedings implicate important state interest; and (3) whether there is an adequate opportunity in the state proceedings to raise constitutional challenges. *See id. at 432*. In *Sprint*, the Supreme Court clarified that these factors were "*additional* factors appropriated considered by the federal court before invoking *Younger*" rather than "dispositive" conditions. *See 134 S. Ct. at 593*.

procedures will afford an adequate remedy, **[*19]** in the absence of unambiguous authority to the contrary." *Id. at 15*. The Lupin Plaintiffs have not cited to any case authority from Alaska that suggests constitutional or jurisdictional challenges cannot be raised in response to the show cause petition. Indeed, such limitations is unlikely because the Alaska Superior Court is the court of general jurisdiction in the State. Accordingly, while the statute is somewhat ambiguous as to the full gambit of defenses that may be raised during a show cause petition arising out of a CID, the Lupin Plaintiffs have failed to present unambiguous authority that would justify a conclusion by this Court that an Alaskan state judge would "interpret ambiguities in state procedural law to bar presentation of federal claims." *Id.*

C) The Timing of the State and Federal Actions

The Lupin Plaintiffs next argue that abstention is inappropriate because, in its view, there have been proceedings on the merits in this case, and the Attorney General did not file the Alaska Proceeding until after the Lupin Plaintiffs filed their Motion for Preliminary Injunction in this Court. Citing to *Hawaii Housing Authority v. Midkiff, 467 U.S. 229, 238, 104 S. Ct. 2321, 81 L. Ed. 2d 186 (1984)*, the Lupin Plaintiffs argue that their motion for preliminary injunction "put the merits **[*20]** of the Plaintiffs' case in play." Pl.'s Resp. at 15. However, in *Midkiff*, the district court had granted an injunction—i.e., there was a ruling on the issues raised by the parties. In this case, however, the Court has not made any substantive rulings to date; therefore, there is no basis for this Court to refuse to abstain based upon proceedings on the merits in federal court.

D) Exceptions to the *Younger* Doctrine

The Lupin Plaintiffs also argue that several of the exceptions to the *Younger* Doctrine apply to this case. Indeed, the Supreme Court has recognized a few exceptions to *Younger* abstention. These exceptions include state proceedings initiated in bad faith or for purposes of harassment. Additionally, an exception exists where a statute is "flagrantly and patently violative of express constitutional prohibitions in every clause, sentence and paragraph, and in whatever manner and against whomever an effort might be made to apply it." *Younger, 401 U.S. at 53-54*.

1) The Lupin Plaintiffs' Alleged Irreparable Loss of Constitutional Claims

The Lupin Plaintiffs assert that, through this action, they seek to "vindicate their constitutional right to structure their primary conduct with some minimum assurance as to **[*21]** where that conduct will and will not render them liable to suit." Pls.' Resp. at 16 (internal marks omitted). In *Younger*, the Court alluded to the possibility of an exception for irreparable injury that is "both great and immediate." *See 401 U.S. at 46*. The Court clarified, however, that such a threat of injury to federally protected rights "must be one that cannot be eliminated by [the] defense against a single criminal prosecution," and that "the cost, anxiety, and inconvenience" of responding to a proceeding were insufficiently severe to prevent abstention. *Id.*

In this case, the concerns raised by the Lupin Plaintiffs—although undoubtedly relating to jurisdictional issues—boil down to harms arising from responding to the Alaska Proceeding itself. As discussed above, the Lupin Plaintiffs have failed to demonstrate that they have no way of vindicating their rights through the Alaska Proceeding and, thus, they have failed to show that the threatened harm constitutes an irreparable injury for purposes of *Younger*.

2) The Alleged Retaliatory Nature of the Alaskan Proceeding

The Lupin Plaintiffs argue that the Attorney General's show-cause petition is retaliatory because such a petition is warranted under **[*22]** Alaska law only when a recipient "willfully disobeys" a CID, but not when a recipient merely "challenges" a CID. *See* Mot. in Opposition, ECF No. 32. The question then becomes whether filing the present motion for injunctive relief constitutes a response to the CID under § 44.62.590(a)(2).

Plaintiffs argue that *§ 45.50.592(f)*, the provision outlining how a recipient may challenge a CID without being in contempt, could be interpreted to permit the present motion as a "response" for the purposes of § 44.62.590(a)(2). The statute reads in relevant part "a petition to extend the return date for, or to modify or set aside a demand issued under (a) of this section, stating good cause, *may be filed in the superior court for the judicial district where the parties reside*." *Alaska Stat. Ann. § 45.50.592(f)* (emphasis added). The Lupin Plaintiffs contend that because the statute does not expressly foreclose the possibility of filing a challenge to a CID in a federal district court of a different state, the present action must be construed as a valid "response," and not a refusal that would justify the Attorney General's show-cause petition. This argument is unpersuasive, as the context of the statute indicates contemplation of a "superior court," the common denomination of **[*23]** an intermediate court in Alaska, not a federal court established under Article III of the U.S. Constitution. At best, such interpretive creativity hardly reveals the show-cause petition to be "bad faith" or "retaliatory" as alleged by the Lupin Plaintiffs.

3) The Alleged Waiver of the Abstention Issue

Plaintiffs next contend that by virtue of the Attorney General's motion for an extension to respond to Plaintiffs' motion for preliminary injunction, the Attorney General waived any claim for *Younger* abstention. In support, Plaintiffs cite to *Ohio Civil Rights Comm'n v. Dayton Christian Schools, Inc., 477 U.S. 619, 106 S. Ct. 2718, 91 L. Ed. 2d 512 (1986)*. In *Ohio Civil Rights Comm'n*, the Supreme Court held that the United States District Court for the Southern District of Ohio properly abstained under *Younger* from enjoining the Ohio Civil Rights Commission from exercising jurisdiction over a sex discrimination complaint brought by a discharged teacher. *Id.* In dicta, the Supreme Court explained that a State may "voluntarily submit to federal jurisdiction even though it might have had a tenable claim for abstention," but noted that these were cases where "the State expressly urged this Court or the District Court to proceed to an adjudication of the constitutional merits." *Id. at 626*. Requesting adjudication is hardly analogous to filing a motion **[*24]** for an extension to respond to a Complaint. Quite simply, the Attorney General did not forfeit any argument under *Younger* by merely requesting an extension of time to respond.

CONCLUSION

For the reasons stated above, Defendant Craig Richards' Motion to Dismiss (ECF No. 23) is GRANTED, and this case is DISMISSED.

A separate Order follows.

Dated: July 2, 2015

/s/ Richard D. BennettRichard D. Bennett

United States District Judge

ORDER

For the reasons stated in the foregoing Memorandum Opinion, it is this 2nd day of July, 2015, ORDERED that:

1. Defendant Craig Richards' Motion to Dismiss (ECF No. 23) is GRANTED, and this case is DISMISSED;
2. The Clerk of the Court transmit copies of this Order and accompanying Memorandum Opinion to Counsel; and
3. The Clerk of the Court CLOSE THIS CASE.

/s/ Richard D. BennettRichard D. Bennett

United States District Judge

Opinion

MEMORANDUM OPINION

Presently pending and ready for resolution in this copyright infringement and antitrust case are: (1) a motion for summary judgment filed by Counterclaim Defendant the National Association of Realtors ("NAR") (ECF No. 410); and (2) three motions to seal filings in connection with the motion for summary judgment (ECF Nos. 412, 424, 430). The issues have been fully briefed and the court now rules, and no hearing is necessary. Local Rule 105.6. For the following reasons, NAR's motion for summary judgment will be granted. The three motions to seal will be denied without prejudice to renewal within fourteen (14) days.

I. Background

The factual and procedural background of this action has been extensively documented in previous opinions, thus only a brief summary of those facts relevant to the instant motion for summary judgment is necessary. (*See* ECF Nos. 34, 64, 159, 180-1, 239, 351). The Metropolitan Regional Information Systems, Inc. ("MRIS") brought a copyright infringement action against American Home Realty Network, Inc. ("AHRN") and Jonathan J. Cardella, **[*3]** AHRN's Chief Executive Officer, on March 28, 2012.[1] (ECF No. 1). MRIS offers an online fee-based "multiple listing service" (MLS) to real estate brokers and agents. Subscribers upload their real estate listings to the MRIS Database and agree to assign to MRIS the copyrights in each photograph included in those listings.

AHRN is a "San Francisco real estate brokerage referral services and technology startup that provides information to home buyers and sellers, identifying the real estate agents best suited to assist them in purchasing or selling properties in their local market on a nationwide basis." (ECF No. 167 ¶ 6). AHRN takes listing data from online database compilers like MRIS and makes it directly available to consumers on its "real estate referral" website. Specifically, AHRN owns and operates *www.neighborcity.com* ("NeighborCity"), which connects potential buyers with real estate agents based on the types of properties in which a buyer is interested. Jonathan Cardella declared:

> Although AHRN is a licensed real estate broker in the State of California, it does not actively engage in providing brokerage **[*4]** services for either the sale or purchase of any real property, and displays the property images and listing data for the sole purpose of attracting customers to use our AgentMatch services in order for AHRN to earn referral fees from third party recipient brokers.

(ECF No. 410-6 ¶ 9). Mr. Cardella described the AgentMatch service as follows:

> AHRN is compensated by matching and referring prospective customers from its website to local real estate agents and brokers most relevant to the property actively being viewed or searched on its website. AHRN does this through its website where it provides AgentMatch[,] its patent pending technology, designed to measure and publish the relative performance of the majority of U.S. professional Realtors, with respect to their peers, and uses this information *to match interested customers with the most qualified agents available to assist them, at the time of their request*. AgentMatch does this specifically by using the property criteria for the property being viewed on its website, e.g. latitude, longitude, price, bedrooms, etc. and then matches that against its database of real estate agents and their relative performance history selling similar **[*5]** homes.

(*Id.* ¶ 4) (emphasis added). If a consumer becomes interested in a property displayed on NeighborCity and requests additional information, AHRN seeks to arrange a referral of that customer to a real estate agent. (ECF No. 411-3, at 9). If the referral results in a closed transaction, AHRN seeks a thirty (30) percent referral fee. (ECF No. 411-1, at 9, Cardella, depo). MRIS claimed that AHRN had displayed on its website real estate listings containing copyrighted photographs taken from the MRIS Database.

After MRIS brought its complaint against AHRN for copyright violations, AHRN brought counterclaims against MRIS, Does # 1-25, and the National Association of Realtors ("NAR"), alleging, *inter alia*, violations of the Sherman Act, *15 U.S.C. § 1 et seq.* Ralph Holmen, Associate General Counsel of the NAR, provided the following description of NAR:

---

[1] The lawsuit was dismissed against Mr. Cardella for lack of personal jurisdiction.

> NAR is the largest professional association in America, with over one million members who are involved in all aspects of the brokerage of residential and commercial real estate. NAR provides for its members a facility for professional development and exchange of information related to topics of interest to the real estate profession, such as the setting **[*6]** of ethical standards for real estate professionals, the efficient and lawful operation of a Multiple Listing Service ("MLS"), and the protection of MLS listing content.

(ECF No. 410-2 ¶ 2). In addition to NAR, there are 54 state and territorial associations, as well as approximately 1,400 local associations consisting of real estate professionals. (*Id.* ¶ 4). NAR publishes a Handbook on Multiple Listing Policy, which serves as a guide for member associations of realtors in their operation of MLSs. (*Id.* ¶ 6). The Handbook includes model rules, policies, and best practices established by NAR's Board of Directors. According to Mr. Holmen, MLSs choose whether to adopt NAR's model rules and policies. (*Id.*). MLSs that adopt and conform to all mandatory rules and policies are entitled to coverage under NAR's errors and omissions professional liability insurance policy. Additional facts will be presented in the analysis section below.

AHRN filed first amended counterclaims against MRIS and NAR, and they both moved to dismiss. After Judge Williams issued several opinions (ECF Nos. 159 & 239), and AHRN was granted leave to file second amended counterclaims (ECF No. 167),[2] counts I (Maryland unfair **[*7]** competition) and III (Sherman Act *§ 1*) against MRIS and NAR remained the only counterclaims. The remaining counterclaims against MRIS were dismissed by memorandum opinion and order issued on March 10, 2014. (ECF Nos. 351, 352, 355). On September 12, 2014, MRIS and AHRN filed a proposed permanent injunction and final order, which reflects, *inter alia*, that MRIS and AHRN have agreed to dismiss with prejudice all pending claims between them. The permanent injunction and final order was entered on September 15, 2014. (ECF No. 420). Consequently, what remains in the case are two counterclaims against NAR: (1) unfair competition in violation of Maryland law (count I); and (2) violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1* (count III).

NAR moved for summary judgment on September 5, 2014. (ECF No. 410. AHRN opposed the motion (ECF No. 422), and NAR replied (ECF No. 429). The parties also filed motions to seal filings in connection with the summary judgment motion. (ECF **[*8]** Nos. 412, 424, 430). On November 24, 2014, NAR filed a notice of supplemental authority, which, among other things, informed the court that a district court in Minnesota granted the motion for summary judgment on AHRN's antitrust counterclaim against the Regional Multiple Listing Service of Minnesota ("RMLS") (Case No. 12-0965, D.Minn.). (*See* ECF No. 432). As NAR acknowledges in the notice, however, the memorandum opinion granting summary judgment was filed under seal, and NAR indicates that it does not have it. It would be up to NAR to intervene in the case in Minnesota to try to attempt to access the sealed memorandum opinion and there is no indication that it has done so.[3]

II. Standard of Review

A motion for summary judgment will be granted only if there exists no genuine dispute as to any material fact and the moving party is entitled to judgment as a matter of law. *See Fed.R.Civ.P. 56(a)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*; *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 250, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. Once a properly supported motion for summary judgment is **[*9]** filed, the nonmoving party is required to make a sufficient showing on an essential element of that party's claim as to which that party would have the burden of proof to avoid summary judgment. *Celotex, 477 U.S. at 322-23*.

---

[2] The second amended counterclaims asserted the following causes of action against MRIS and NAR: (1) unfair competition under Maryland law; (2) unfair competition under California law; and (3) violation of the *Sherman Act § 1*. (*See* ECF No. 167).

[3] NAR filed a second notice of supplemental authority on February 17, 2015, stating that AHRN had appealed the summary judgment order to the United States Court of Appeals for the Eighth Circuit, but subsequently sought to dismiss the appeal. (ECF No. 433).

Summary judgment is appropriate under *Federal Rule of Civil Procedure Rule 56(a)* when there is no genuine dispute as to any material fact, and the moving party is plainly entitled to judgment in its favor as a matter of law. In *Anderson, 477 U.S. at 249 (1986)*, the Supreme Court explained that, in considering a motion for summary judgment, the "judge's function is not himself to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial." A dispute about a material fact is genuine "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Id. at 248*. Thus, "the judge must ask himself not whether he thinks the evidence unmistakably favors one side or the other but whether a fair-minded jury could return a verdict for the [nonmoving party] on the evidence presented." *Id. at 252*.

In undertaking this inquiry, a court must view the facts and the reasonable inferences drawn therefrom "in the light most favorable to the party opposing the motion." *Matsushita Elec. Indus. Co. Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (*quoting* *United States v. Diebold, Inc., 369 U.S. 654, 655, 82 S. Ct. 993, 8 L. Ed. 2d 176 (1962))*; *see also* *EEOC v. Navy Fed. Credit Union, 424 F.3d 397, 405 (4th Cir. 2005)*. The mere existence **[*10]** of a "scintilla" of evidence in support of the non-moving party's case is not sufficient to preclude an order granting summary judgment. *See* *Anderson, 477 U.S. at 252*.

A "party cannot create a genuine dispute of material fact through mere speculation or compilation of inferences." *Shin v. Shalala, 166 F.Supp.2d 373, 375 (D.Md. 2001)* (citation omitted). Indeed, this court has an affirmative obligation to prevent factually unsupported claims and defenses from going to trial. *See* *Drewitt v. Pratt, 999 F.2d 774, 778-79 (4th Cir. 1993)* (*quoting* *Felty v. Graves—Humphreys Co., 818 F.2d 1126, 1128 (4th Cir. 1987))*.

III. Analysis

A. NAR's Motion for Summary Judgment

Count III of the second amended counterclaims alleges a violation of Section 1 of the Sherman Act, *15 U.S.C. § 1*. *Section 1* prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." "This provision has been interpreted to preclude only restraints that are 'unreasonably restrictive of competitive conditions.'" *Imaging Center, Inc. v. Western Maryland Health Systems, Inc., 158 F.App'x 413, 418 (4th Cir. 2005)* (*quoting* *Cont'l Airlines, Inc. v. United Airlines, Inc., 277 F.3d 499, 508 (4th Cir. 2002))*. To establish a violation of *Section 1* of the Sherman Act, a plaintiff must prove two elements: (1) a contract, combination, or conspiracy; (2) that imposed an unreasonable restraint of trade.[4] *Dickson v. Microsoft Corp., 309 F.3d 193, 202 (4th Cir. 2002)*.

The Fourth Circuit elaborated on the two elements in *Imaging Center, Inc., 158 F.App'x at 418*:

> The first element requires a concerted action by two or more persons. *Laurel Sand & Gravel, Inc. v. CSX Transp., Inc., 924 F.2d 539, 542 (4th Cir. 1991)*. This element is satisfied even where "one or more of the co-conspirators acted unwillingly, reluctantly, or only in response to coercion." *Dickson, 309 F.3d at 205* (*quoting* *MCM Partners, Inc. v. Andrews-Bartlett & Assocs., 62 F.3d 967, 973 (7th Cir. 1995))*. Trade-restraining concerted action may be inferred from conduct. *Laurel Sand & Gravel, 924 F.2d at 542*. However, when these actions could be consistent with either (1) independent conduct or a legitimate business purpose or (2) an illegal agreement, "proof must be offered that tends to exclude the first interpretation" in order to avoid summary judgment. *Id.* This is because "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

---

[4] As Judge Williams stated in his earlier opinion, "the viability of AHRN's unfair competition claim under Maryland law [] relies on the **[*11]** same set of facts as the Sherman Act § 1 claim" and the parties do not dispute this point. (ECF No. 239, at 12 n.7).

> The second element of any § 1 claim requires a showing that the restraint on competition is unreasonable. *Cont'l Airlines, 277 F.3d at 508*. In order to evaluate this second element, courts use one of three methods, depending on the restraint alleged: "(1) *per se* analysis for obviously anticompetitive restraints, (2) quick[-]look analysis, for those with some procompetitive justification, and (3) the full 'rule **[*12]** of reason,' for restraints whose net impact on competition is particularly difficult to determine." *Id. at 508-09*.

The Supreme Court has long held that "certain concerted refusals to deal or group boycotts are so likely to restrict competition without any offsetting efficiency gains that they should be condemned as per se violations of *§ 1* of the Sherman Act." *Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 290, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)* (citing cases). Group boycott cases to which the Supreme Court has applied this approach typically involve joint efforts to disadvantage competitors by '"either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle."' *Id. at 294* (*quoting* L. Sullivan, Law of Antitrust 261-62 (1977)).

The parties disagree about the appropriate standard of review in antitrust cases. The Supreme Court of the United States has specified what a plaintiff must show to avoid summary judgment on a Sherman Act § 1 claim:

> To survive a motion for summary judgment . . . a plaintiff seeking damages for a violation of *§ 1* must present evidence "that tends to exclude the possibility" that the alleged conspirators acted independently. Respondents . . . must show that the inference of conspiracy is reasonable **[*13]** in light of the competing inferences of independent action or collusive action that could not have harmed respondents.

Matsushita Elec. Indus. Co., 475 U.S. at 587-88. Although the court reviews the facts and all reasonable inferences in the light most favorable to the nonmoving party, ***antitrust law*** "limits the range of permissible inferences from ambiguous evidence," such that "conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Id. at 588*. The *Matsushita* standard has been applied in cases alleging price-fixing and illegal restraints of trade such as the alleged agreement to boycott at issue here. *See, e.g., In re Titanium Dioxide Antitrust Litigation, 959 F.Supp.2d 799, 820 (D.Md. 2013)* (applying *Matsushita* standard on summary judgment to allegations of price-fixing); *Merck-Medco Managed Care, LLC v. Rite Aid Corp., 201 F.3d 436* [published in full-text format at *1999 U.S. App. LEXIS 21487], 1999 WL 691840 (4th Cir. 1999)* (unpublished table opinion) (applying *Matsushita* standard on summary judgment to group boycott allegations). "Although it is clear that the *Matsushita* standard governs whether granting summary judgment is proper, it is equally clear that the particular facts of each case determine how high a burden that standard imposes." *In Re Titanium Dioxide Antitrust Litigation, 959 F.Supp.2d at 821*. Judge Bennett's explanation of the appropriate standard of review in antitrust cases is instructive:[5]

> Plaintiffs alleging an implausible **[*14]** conspiracy face a high burden to show evidence that tends to exclude inferences of legitimate competitive behavior. By contrast, where plaintiffs allege a plausible conspiracy — one that makes economic sense — a lower "tends to exclude" standard applies. [] Accordingly, when a plausible conspiracy has been alleged, a plaintiff need not "disprove all nonconspiratorial explanations for the defendants' conduct" to prevail at summary judgment. [] Especially relevant to this case, the United States Court of Appeals for the Second Circuit has held that where "a plaintiff relies on ambiguous evidence to prove its claim, the existence of a conspiracy must be a reasonable inference that the jury could draw from that evidence; it need not be the *sole* inference." [*In re Publ'n Paper Antitrust Litig., 690 F.3d 51, 62 (2d Cir. 2012)*] (emphasis in original). When determining whether a jury could reasonably infer that there was a conspiracy, this Court must view the totality of the evidence. *See* [*In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 655-56 (7th Cir. 2002)*] (cautioning against the supposition that "if no single item of evidence presented by the plaintiff points unequivocally to conspiracy, the evidence as a whole cannot defeat summary judgment.").

In re Titanium Dioxide Antitrust Litig., 959 F.Supp.2d at 821.

---

[5] *In Re Titanium Dioxide Antitrust Litigation* did not involve allegations of group **[*15]** boycott, however, as is the case here.

1. Concerted Action

The Fourth Circuit explained in *North Carolina State Bd. of Dental Examiners v. F.T.C., 717 F.3d 359, 372 (4th Cir. 2013)*:

> [T]o be concerted action, the parties must have "a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. We have indicated there must be "something more" than independent action, such as "a unity of purpose or a common design and understanding, or a meeting of the minds." *Parkway Gallery Furniture, Inc. v. Kittinger/Pennsylvania House Group, Inc., 878 F.2d 801, 805-06 (4th Cir. 1989)*. Concerted action may be proven by "direct or circumstantial evidence." *Monsanto, 465 U.S. at 768*.

A party may demonstrate an agreement by direct evidence or circumstantial evidence, or a combination of the two. *West Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 99-100 (3d Cir. 2010)*; *Merck-Medco Managed Care, LLC, 1999 U.S. App. LEXIS 21487, 1999 WL 691840, at *5*; *Laurel Sand & Gravel, Inc., 924 F.2d at 542* (noting that when there is no direct evidence of antitrust activity, "[a]n agreement to restrain trade may be inferred from other conduct.").

AHRN argues that together with brokers and agents around the country, NAR engaged in a group boycott in violation of *Section 1* of the Sherman Act. As will be seen, none of the evidence — even when viewed in the aggregate - support group boycott or concerted action.

a. Litigation-Related Activity

First, in support of its group boycott theory, AHRN references litigation-related activity purportedly spearheaded by NAR, including a multitude of cease and desist letters that it received from **[*16]** MLSs around the country beginning in November 2011 around the time of the Anaheim meeting when NAR purportedly first became aware of AHRN and NeighborCity. (ECF No. 422, at 12; *see also* ECF Nos. 422-2 through 422-18, cease and desist letters). The gist of the letters is that AHRN has been reproducing and distributing copyrighted works relating to real estate listings on its website, NeighborCity.com , without authorization; the letters request that AHRN immediately remove copyrighted information from its website or risk legal action. AHRN cites multiple email exchanges between Laurie Janik and MLSs and their legal counsel regarding an appropriate course of action against AHRN. (*See* ECF No. 422, at 10-11; ECF Nos. 423-4 through 423-8; ECF No. 422-33, at 5, email from John Mosey of Northstar MLS, ("[Y]es it is Laurie [Janik] he refers to. I spoke with her last week and she is very interested in having the NAR take a lead role in a filing again [AHRN.]"). AHRN states:

> Janik was also in constant communication with MLSs and their legal counsel about AHRN. [] As she coordinated the litigation Janik took steps to prevent the coordinated actions from appearing to be an illegal group boycott. [] **[*17]** Additionally, NAR not only orchestrated this agreed upon litigation plan against AHRN, it funded it. [] NAR contributed $35,000.00 to the legal action brought by Northstar MLS in Minnesota.

(ECF No. 422, at 10-11). Ms. Janik provided deposition testimony to explain the rationale for NAR providing funding to support a lawsuit against AHRN in January 2012:[6]

> Q: How was that decision made, to make an initial commitment of $35,000?
>
> A: Well, that decision, actually, was a little irregular. The decision was made by my boss. I recommended it to him to use some funds that were left over from an industry settlement of a patent infringement case that involved patent licenses and the Association received more money than we needed to spend for the patent license for the industry because payments were received late. And, in my view, those payments had come in

[6] Laurene Janik testified that although NAR allocated certain funds to support the lawsuit instituted by MRIS, the funds were *not* actually paid from NAR to MRIS. (ECF No. 410-4, at 11). She did not know why MRIS did not accept the funds.

> from MLSs, and NAR shouldn't just put it to the bottom line; that the money came from MLSs, it was related to MLS issues, and, therefore, it should be used on [] some industry-wide issue that affected MLSs.
>
> And at this point in time, I had concluded that [] the NeighborCity concern was an industry-wide issue that affected MLSs, and it would be a **[*18]** good place to use the excess funds that had been paid by the MLSs in the CIVIX case. So I went to Dale Stinton, suggested this use of those funds to him, and he approved it.

(ECF No. 422-1, at 11-12).

NAR asserts that "the Court has already held that activity relating to incidents of litigation such as cease and desist letters [is] immune from liability." (ECF No. 411, at 37). In the June 10, 2013 opinion adjudicating NAR's and MRIS's motions to dismiss the first amended counterclaims filed by AHRN, Judge Williams held that "Counterclaim-*Defendants* are [] entitled to *Noerr-Pennington* immunity from AHRN's § 1 claims to the extent they are based on the filing of this litigation and the incidents of that litigation."[7] (ECF No. 159, at 28) (emphasis added). Later in the opinion, Judge Williams specified: "[i]t is not sufficient to allege that Counterclaim-Defendants agreed to enforce their copyrights against AHRN; MRIS and NAR are immunized from such a claim for the **[*19]** reasons discussed above." (*Id.* at 30). AHRN argues that *Noerr-Pennington* immunity protects parties from litigation based on *their* petitioning the court for redress, and that the court's prior ruling that AHRN could not assert antitrust claims against *MRIS* for having instituted this lawsuit is inapplicable to NAR, who did *not* institute a copyright infringement lawsuit. (ECF No. 422, at 24). AHRN contends that "[h]ad AHRN's claims against NAR rested on incidents of litigation *by NAR against AHRN* in an attempt to petition the government, then the Court no doubt would have stated that NAR was due *Noerr-Pennington* immunity." (*Id.*) (emphasis added).

The Fourth Circuit rejected a similar argument to the one AHRN lodges **[*20]** here in *Balt. Scrap Corp. v. David J. Joseph Co., 237 F.3d 394, 400 (4th Cir. 2001)*. Plaintiff in that case argued that "*Noerr-Pennington* protects litigants only, not third parties who covertly funded the lawsuit." *Id.* The Fourth Circuit remarked that "*PRE* is not so restrictive as to protect only the litigant from later antitrust liability."[8] *See also* *Hosp. Building Co. v. Rex Hospital, 691 F.2d 678 (4th Cir. 1982)* (non-litigants who caused a government entity to file litigation entitled to jury charge of *Noerr-Pennington* immunity). The Fourth Circuit further reasoned:

> Indeed, non-parties often provide aid to litigants, whether through financial backing, legal assistance, amicus briefs, or moral support. The fact that an amicus brief, for example, might be filed by a non-party with some anti-competitive aim does not strip from the amicus its *Noerr-Pennington* right to petition the courts. The realities often are that litigation cannot be entirely financed out of the pocket of the party bringing suit. And the costs of supporting a party's right of access to public bodies need not entail the defense of a collateral antitrust suit. To hold that only parties who have standing in their own right to receive the protection of *Noerr-Pennington* immunity is to artificially restrict that doctrine by penalizing even the lawful support **[*21]** of objectively meritorious actions. . . . *Accordingly, because the litigation was not objectively baseless, and because the source of funding this lawsuit in no way affected the legitimacy of the claims advanced, the district court correctly held that the lawsuit was not sham litigation*.

Balt. Scrap Corp., 237 F.3d at 401 (emphasis added).

Here, too, any support received by MRIS from NAR to institute the lawsuit against AHRN to protect copyrighted materials in no way affected the legitimacy of the copyright claims. In any event, regardless of the applicability of

---

[7] Judge Williams later reconsidered the June 10, 2013 opinion insofar as it dismissed the claims for violations of *Section 1* of the Sherman Act and unfair competition under Maryland law as to *MRIS* because he had to rely on materials outside the four corners of the complaint in determining the application of *Noerr-Pennington* immunity. (*See* ECF No. 239, at 2). Summary judgment was granted on both counterclaims as to MRIS by memorandum opinion and order issued on March 10, 2014. (ECF Nos. 351, 352, 355).

[8] In *Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., 508 U.S. 49, 60, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* ("PRE"), the Supreme Court of the United States fashioned a two-part sham-litigation test as an exception to *Noerr-Pennington* immunity.

Noerr-Pennington immunity to NAR, AHRN's reliance on any litigation-related activity by NAR to support the group boycott theory is misplaced. There is nothing unlawful about NAR supporting MLSs in considering legal action against AHRN, who it believed was unlawfully misappropriating information related to real estate listing on its own website without a license authorizing access to such information. As NAR argues, "[t]hat NAR communicated with representatives of MLSs about AHRN has never been in dispute. That fact does not, however, **[*22]** create a triable issue as to whether NAR orchestrated a conspiracy to boycott AHRN." (ECF No. 411, at 35); *see, e.g.,* Am. Chiropractic Ass'n v. Trigon Healthcare, Inc., 367 F.3d 212, 227 (4th Cir. 2004) ("At most, the MCAP meeting shows contact between two independent economic actors, but 'mere contacts and communications, or the mere opportunity to conspire, among antitrust defendants is insufficient evidence [of] an anticompetitive conspiracy.'" (*quoting* Cooper v. Forsyth County Hosp. Authority, Inc., 789 F.2d 278, 281 (4th Cir. 1986))).[9]

b. Direct Evidence

AHRN argues that it has raised a genuine dispute of material fact as to direct evidence of a group boycott, relying on a single conversation between Paulette Carroll, a broker, and a representative of NeighborCity. "Direct evidence is extremely rare in antitrust cases and is usually referred to as the 'smoking gun.'" Trigon Healthcare, Inc., 367 F.3d at 226. Direct evidence in the § 1 antitrust context is "explicit and requires no inferences to establish the proposition or conclusion being asserted." *Id.* The "direct evidence" AHRN offers to show group boycott is by no measure **[*24]** a "smoking gun" and is ambiguous at best. Specifically, AHRN relies on the following exchange between Ms. Carroll and Alex Gilbert, an AHRN representative, as direct evidence:

> Alex Gilbert: . . . I was actually reaching out because I wanted to discuss a broker-to-broker referral with you.
> Paulette Carroll: Yeah. Um, you know what? I've been advised not to take any from Neighborhood City.
> Alex Gilbert: Oh really? And, and why is that?
>
> Paulette Carroll: *Because of the lawsuit that's going on with Neighborhood City*.
> Alex Gilbert: Ok. And who was it that had advised you not to take out referrals?
>
> Paulette Carroll: Just out of our — *out of our office*.
> Alex Gilbert: Out of — OK. Like the national association?
> Paulette Carroll: Yeah. Mmmhmmm.
> Alex Gilbert: Oh. Alright. That's very strange. Have they sent off and mailed to you or something like that?
> Paulette Carroll: No. It's brought up in our team meeting every week.
> Alex Gilbert: Oh — every week, really?
> Paulette Carroll: Because of the lawsuit.
> . . .

---

[9] AHRN contends that "[t]he letters pouring into AHRN's office in the wake of the November 2011 NAR annual meetings is evidence of NAR's discouraging local associations, boards, brokers and agents from dealing with AHRN." (ECF No. 422, at 25). NAR provides evidence, however, that even *before* the Anaheim meeting in November 2011 when NAR purportedly became aware of AHRN's website, an attorney representing an MLS in Wisconsin, and *not* NAR, sent an email to a group of MLSs (and their attorneys) informing them about the operations of NeighborCity:

> It appears that there is a website (neighborcity.com) which is displaying some of the copyrighted data of my client. A[] quick check of this site reveals that they are not limited to Wisconsin but also display some but not all other areas (Chicago [49,000 listings], Minneapolis **[*23]** [5000 listings], Detroit [726 listings], Denver [10877 listings]) in which I would strongly suspect they do not have consent to do so.
>
> My clients in Wisconsin are proceeding with the proper ways to protect ourselves and hold them accountable, but the people involved make me suspect that this is not a fly-by-night operation. Accordingly, I would like to know if any of you have had any contact or interaction with either neighborcity.com or the company American Home Realty Network, Inc. or it[s] CEO Jonathan Cardella.

(ECF No. 410-27, at 2; *see also* ECF No. 410-21 (Aug. 27, 2010 cease and desist letter); 410-22 (Mar. 22, 2011 cease and desist letter).

> Alex Gilbert: So, is the broker the one who's kind [of] been in contact with the national association and now they're just telling him not to work with us?
>
> Paulette Carroll: I'm not sure what the — *I'm not* ***[*25]*** *sure what the connection is*.
> Alex Gilbert: Gotcha, but they just kind [of] passed down the message?
> Paulette Carroll: Yup. Mmmhmmm.
> . . .
> Alex Gilbert: . . . I'm not fully apprised of what the whole lawsuit entails, but I've actually never heard anybody been advised by the national association to not take referrals from us.
> Paulette Carroll: Yeah. Yeah. So, I don't know. I mean, it's our option. It's our option in the end.
> Alex Gilbert: Uh-huh.
> Paulette Carroll: It is our option, but they've put it out there, definitely.
> Alex Gilbert: Gotcha. And . . .
> Paulette Carroll: With the lawsuit, it's conflict of interest or whatever, you know.

(ECF No. 423-13, at 2-3) (emphases added).

The above phone conversation that AHRN relies on as direct evidence of concerted action falls far short of the standard that it be "explicit and require no inferences." *See* *Golden Bridge Technology, Inc. v. Motorola, Inc., 547 F.3d 266, 271 (5th Cir. 2008)* ("Direct evidence explicitly refers to an understanding between the alleged conspirators, while circumstantial evidence requires additional inferences in order to support a conspiracy claim."). Nowhere in the call does Ms. Carroll identify an explicit agreement orchestrated by NAR to encourage brokers and/or agents not to deal with AHRN. Indeed, as **[*26]** NAR argues, the NeighborCity representative — and not Ms. Carroll — mentioned the national association — and Ms. Carroll stated that they were advised ou*t of their office* not to take referrals from AHRN. (*See* ECF No. 429, at 14). Indeed, when asked whether the national association was in contact with the broker and advised it not to work with AHRN, Ms. Carroll stated that she was "not sure what the connection is." She also stated that *the broker* had the option not to take referrals from AHRN considering the copyright infringement lawsuit. *See, e.g., Golden Bridge Technology, Inc., 547 F.3d at 272* ("Viewing the evidence favorably to GBT, the emails do reveal a common dislike for CPCH among some of the Appellees and other companies. However, common dislike is not the same as an explicit understanding to conspire, so we accordingly review GBT's claim under the stricter standard required for circumstantial evidence."); *cf.* *Tunica Web Advertising v. Tunica Casino Operators Ass'n, Inc., 496 F.3d 403, 410 (5th Cir. 2007)* (finding that email communications show conspiracy because they contain direct evidence stating that the parties entered into a "gentlemen's agreement" not to deal with another company).

Moreover, Ms. Carroll gave deposition testimony stating that NAR never advised her not to accept referrals from AHRN. Specifically, **[*27]** she stated that her husband, a real estate agent and business partner, advised her to stop working with NeighborCity. (ECF No. 410-51, at 3). She stated: "We felt it was not in our best interest to work with Neighborhood City because of a potential lawsuit. We decided that we did not want to jeopardize our career, our license or be involved in any type of legal matter." (*Id.*). Ms. Carroll stated during her deposition that she has "never had contact with NAR at any level," only with NAR's lawyers in the instant litigation. (*Id.* at 4). Ms. Carroll explained the phone call with the AHRN representative:

> A: The phone call was very off the cuff. I was busy, I wasn't expecting to have a lengthy phone call with anybody from Neighborhood City. I have -- I've answered the questions as well as I could, many of them. If you listen to the recording you can hear the little bit of chaos going on in the background. I was in an office situation. And had they asked me for a time to have a conversation with them, if it was an appropriate time if I had time for them, I would have gone to my office where it was a closed door, and I did not do that because I did not realize where this was going. *I have never had* ***[*28]*** *any conversation from NAR, I've never had any e-mails, phone calls, other than a monthly newsletter, which I never read*.
> Q: And you indicated that the only discussion you had at these team meetings about NeighborCity was after that one meeting?
>
> A: The *only discussion that I have ever had about Neighboorhood City with the other agents was after the team meeting*.

> Q: That one time?
> A: One time.

(ECF No. 410-51, at 5) (emphases added). Consistent with her deposition testimony, Ms. Carroll submitted a declaration stating that "[n]o one in my brokerage has ever told me that [NAR] advised the brokerage not to do business with AHRN. I was never instructed by NAR, NorthstarMLS, or my broker that I was not to enter into referral agreements with AHRN. The decision not to accept additional referrals from AHRN was entirely my own and based on my disapproval of AHRN's use of agent listings without permission." (ECF No. 410-52 ¶ 4).

Based on the foregoing, the telephone recording on which AHRN relies as direct evidence of concerted action is ambiguous, relies on inferences of a conspiracy orchestrated by NAR, and does not establish direct evidence of a group boycott. *See, e.g.,* *Hyland v. HomeServices of America, Inc., 771 F.3d 310, 319 (6th Cir. 2014)* ("Like the district court, **[*29]** we view Jerry McMahan's statements at the hearing as ambiguous at best and they therefore do not establish direct evidence of a conspiracy.").

c. Circumstantial Evidence

AHRN also relies on circumstantial evidence to show concerted action. To show concerted action, AHRN asserts that "NAR has encouraged regional boards of realtors to step up their efforts (1) to keep their member agents from entering into referral agreements with AHRN; [(2)] to breach or repudiate referral agreements agents have entered with AHRN; and (3) to pressure agents into demanding that their names be stricken from AHRN's list of potential referral agents." (ECF No. 167 ¶ 112). AHRN also cites an excerpt from the NAR Handbook and the Realtor Excellence Program developed by NAR as further establishing a plausible inference of a group boycott. As will be seen, none of the circumstantial evidence purporting to show concerted action establishes a plausible conspiracy and does not tend to exclude the possibility that MLSs acted independently in deciding not to deal with AHRN, motivated by their desire not to associate with a company embroiled in litigation for copyright infringement and whose business model was unappealing. **[*30]**

AHRN contends that it received formulaic letters from brokers repudiating previous agreements and requesting not be contacted by AHRN, purportedly at the behest of NAR. For instance, one such letter stated:

> It has come to my attention that American Home Realty Network, Inc. d/b/a NeighborCity ("NeighborCity") has been soliciting or may intend in the future to solicit agents of Champion Realty, Inc. to ask them to execute referral agreements that purport to bind Champion Realty, Inc. Please be advised that Champion Realty, Inc. has no interest in entering into any referral or other agreements with NeighborCity, and Champion Realty, Inc. has not authorized any of its agents to execute any such agreement with NeighborCity on its behalf.
>
> Accordingly, to the extent any agent has executed an agreement with NeighborCity that purports to bind Champion Realty, Inc., that agreement is void and of no legal effect. Alternatively, Champion Realty, Inc. hereby terminates any such agreement.

(ECF No. 422-22, at 2; *see also* ECF Nos. 422-23 through 422-25). AHRN essentially asks the court to infer concerted action at NAR's direction from, among other things, the fact that it received a plethora of similar **[*31]** correspondence from real estate professionals around the country either repudiating referral agreements or refusing to accept referrals from AHRN. AHRN does not present sufficient evidence, however, to show "that the inference of conspiracy is reasonable" in light of NAR's competing inference of independent action. *Matsushita, 475 U.S. at 588*. Moreover, parallel behavior alone is not enough to prove a conspiracy. *See* *Theatre Enterprises v. Paramount Film Distributing Corp., 346 U.S. 537, 541, 74 S. Ct. 257, 98 L. Ed. 273 (1954)* ("[T]his Court has never held that proof of parallel business behavior conclusively establishes agreement or, phrased differently, that such behavior itself constitutes a Sherman Act offense."). NAR has produced evidence that agents and brokers acted independently in refusing to deal with AHRN and for a variety of reasons. *See, e.g.,* *Golden Bridge Technology, Inc., 547 F.3d at 271* ("Independent parallel conduct, or even conduct among competitors that is consciously parallel, does not alone establish the contract, combination, or conspiracy required by *§ 1*"); *Twombly, 550 U.S. at 554* ("[A]t the summary judgment stage a *§ 1* plaintiff's offer of conspiracy evidence must tend to rule out the possibility that the defendants were acting independently.").

Specifically, NAR provides declarations from MLS representatives stating that they have not entered into any kind of agreement with any **[*32]** other MLS or NAR or any other party not to deal with AHRN and NAR has not instructed or encouraged them not to deal with or license data to AHRN. (*See* ECF Nos. 410-53 through 410-65). One such MLS representative declares that he "reached out directly *and only to AHRN* when [he] learned that NeighborCity was displaying FMLS listing content without authorization." (ECF No. 410-54 ¶ 8) (emphasis added). The declarations reflect that MLSs and other real estate professionals decided not to deal with AHRN for a multitude of independent reasons, including the fact that AHRN voluntarily relinquished its membership in MLSs around the country, yet continued to display MLS data on the NeighborCity website. (*See, e.g.*, ECF No. 410-56 ¶ 3 ("Around the beginning of 2011, CREN continued an audit of all IDX feeds and determined that AHRN was still displaying CREN listings, even though it was no longer a member. I continued to monitor the site and discovered th[at] AHRN was continuing to post new CREN listings even though CREN was no longer sending AHRN an IDX feed."); *see also* ECF No. 411-19 ("I have no desire to work with neighborhood city. As long as you[']r[e] stealing data from MLS[s] around the country[,] I have **[*33]** no intention of paying you for a referral, why should I? You don't pay my MLS [] that brings you the leads in the first place. Remove me from your mailing list immediately.")). Many real estate professionals chose not to deal with AHRN because they found the terms of the proposed referral agreement unacceptable. (*See* ECF No. 410-64 ¶ 6 ("On February 28, 2012, I sent Mr. Miller an email, declining AHRN's proposal for a custom license, as we found the terms proposed by AHRN to be unacceptable, particularly given the broad rights to use MLSLI's data that the proposed license would grant AHRN."); ECF No. 411-22, at 2 ("After reviewing your agreement (which is not available until you agree to accept it), I have many issues with the terms and will not allow my agents to participate."); ECF No. 411-23, at 2 ("Please remove me from your referral list. I was not able to read the terms and conditions before I signed up. I don't agree with them."); ECF No. 411-24 ("I do not pay ANYONE 30% and the property is sold! I am in business to make money not support you!") (emphasis in original)). Other MLSs found the information on the NeighborCity website misleading or inaccurate and refused to deal **[*34]** with AHRN for that reason. (*See* ECF No. 411-26, at 2 ("Remove all profiles from agents affiliated to Huntley Estates. The one you have of me specifically is GROSSLY incorrect! . . . Your site is deceitful to say the least."); ECF No. 411-27 ("I have some huge concerns over the misrepresentation, lies, and slander I've seen regarding your profile you have set up for me on neighborcity."); ECF No. 411-28 ("Your website is very out of date. You have people listed as being with my firm who are not even licensed anymore.")); *see also* ECF Nos. 411-29 through 411-31).

AHRN also references a purported conversation between a real estate agent and an AHRN representative as also evidencing a conspiracy when examined in conjunction with the other evidence cited. Specifically, AHRN relies on notes taken by an AHRN employee, Shannon Burns, which purport to reflect a telephone exchange with Kent Meister, a real estate agent from Minnesota. Her notes indicate:

> Kent Meister, an agent with Keller Williams Classic Realty in Minnesota called NeighborCity on Friday afternoon, May 3rd, 2013 asking to speak with Devon, one of the Company's Client Advocates, regarding a referral invitation sent to him on May **[*35]** 2nd for Joseph & Mimi Toto. Shannon at NeighborCity answered the call[] and Mr. Meister asked, "I'm just curious, are you guys aware of the local lawsuit against you?" Further, he said "We've been *contacted by our Board about it*, so word of caution, you're peppering our agents with these emails and I'm sure they're getting logged and will be used in a court of law against you." He asked to be removed from our system until the lawsuits are resolved. He says there are "many people in the area who are going to use this all against you." I asked if he had a question I could help him with and he said no and the conversation ended.

(ECF No. 422-27, at 2) (emphasis added). Even assuming this transcription purporting to show what Mr. Meister expressed on the call were admissible, all this transcription indicates is that a real estate agent did not want to be contacted by AHRN until the lawsuits were resolved and that *some Board* contacted his firm about AHRN's lawsuit and/or persistent communications regarding referrals. Whether the reference to *the Board* means NAR also is ambiguous, and the court cannot extrapolate as much from the above transcription. Even assuming NAR contacted Mr. Meister **[*36]** or his agency about AHRN, there is nothing unlawful about sharing information regarding the lawsuit against AHRN. *See, e.g.,* *Cooper, 789 F.2d at 281* ("Indeed, the federal courts consistently have recognized that mere contacts and communications, or the mere opportunity to conspire, among antitrust defendants is insufficient evidence from which to infer an anticompetitive conspiracy."); *see also* Consol. Metal Prods., Inc. v. Am. Petroleum Inst., 846 F.2d 284, 295 n.30 (5th Cir. 1988) (noting that "a trade association is not by its nature a 'walking conspiracy[,]' its every denial of some benefit amounting to an unreasonable restraint of trade" and that the mere exchange of information, or even consciously parallel action, is insufficient to establish a conspiracy under *§ 1*).

Any reliance by AHRN on excerpts from the NAR handbook to show group boycott also is misplaced. The portion of the NAR handbook relied upon by AHRN states:

> In states other than California, Georgia, Alabama, and Florida, whenever an association is confronted with a request or demand by an individual for access to the association's multiple listing service without membership in the association, membership associations are advised that the association should immediately advise both the state association and the Member Policy Department **[*37]** of the National Association, and the recommended procedures will be provided to the member association with any other pertinent information or assistance. It is important that the state association and National Association be advised immediately if such request or demand for access to the association MLS as described is received.

(ECF NO. 167 ¶ 117; ECF No. 423-3, at 19, NAR Handbook). As NAR argues, this provision "addresses only demands by someone who is not an MLS participant for direct access to the MLS data. It has nothing to do with whether an MLS may license data to third-parties, like AHRN, who are not members of the MLS." (ECF No. 411, at 31). Thus, this excerpt from the NAR Handbook, even when considered in conjunction with all of the other evidence that AHRN offers, does not establish a common scheme designed to achieve an unlawful objective. Indeed, it is uncontested that AHRN voluntarily surrendered its participation in various MLSs for financial reasons, losing the right to obtain MLS data. (*See* ECF No. 410-11, at 3, Cardella depo.).

Finally, AHRN contends that "[t]he course of discovery has produced evidence that suggests that NAR created a program, named the Realtor Excellence **[*38]** Program (REP), to compete directly with AHRN. Given the identical purpose of the two agent rating systems, a reasonable jury could find that the creation of REP was designed to push AHRN out of the market in furtherance of the NAR led boycott." (ECF No. 422, at 37). Through its AgentMatch software system, AHRN offers performance metrics, rankings, and statistics regarding real estate agents to match consumers to the "best agent" for their needs. (*See* ECF No. 422-31, at 4-15, Cardella depo). AHRN's evidence purporting to show that the Realtor Excellence Program, a pilot program, was created by NAR as part of the group boycott to compete with AHRN's AgentMatch program is ephemeral. AHRN relies primarily on an email from Gregg Larson, the CEO of Clareity Consulting, in which he summarized his communications with Jonathan Cardella, CEO of AHRN, and referenced the AgentMatch program:

> NeighhborCity is "going for it" — making the case that anyone should be allowed to display the listing data and their agent performance rankings *and unique consumer matching will have great value to buyers and sellers (I think this is his jewel* — Realtor.com might want to look into it — maybe license or buy **[*39]** it? I can explain more about how it works — it's the best I've heard of so far).

(ECF No. 423-4, at 3) (emphasis added). Nothing about this correspondence suggests that NAR created the Realtor Excellence Program to compete with AHRN; if anything, the email shows that Gregg Larson thought that licensing or buying AgentMatch was worth considering.

Laurene Janik provided the following deposition testimony regarding how the Realtor Excellence Program came into existence:

> A: [] Mr. Romito, if I recall correctly, called me in Chicago shortly after the Anaheim meeting because he became aware of the NAR strategic plan, which was [ap]proved, I believe, at that meeting and talked about increasing the professionalism of agents. He contacted me immediately after the meeting to talk about ways that . . . NAR could perhaps, *use his program* to help achieve that objective.
>
> Q: And what was his program?

A: His program is a survey. It originally started out 12, 13 years ago where a broker, brokerage would send out — or QSC [Quality Service Certification] would send out a paper survey to a home buyer or a home seller, whoever the brokerage represented in a particular transaction; the consumer would complete that paper **[*40]** survey; send it to QSC; QSC, then, would share the results of those surveys with the broker. And the survey told the broker how well their agent performed in that particular transaction, how satisfied the consumer was with the services provided by that broker's agent in that transaction.

It has since been put online, provided there's an e-mail address provided to QSC so that QSC can e-mail the customer satisfaction survey to the buyer or the seller, whoever it was, or both, if the brokerage represented both in the transaction; the buyers and sellers complete the survey; it goes back to QSC; and, then, QSC shares those results with the brokers.

Q: Prior to 2011, November of 2011, had you had any discussions with Mr. Romito or is this the first time you had —

A: Oh, no. I've known Larry. Larry started this company, it says, 13 years ago. . . . *And Larry made me familiar with his QSC certification when he created it*. . . . So, he had all of that bundled together. He was, at least at this point in his conversation with me, willing to unbundle it and make a deal. So if the cost had come down, it was something that I was interested in. Because, based on his statistics, it showed agent behavior **[*41]** modification; it showed increase in client satisfaction on the buy and the sell side, a jump in highly satisfied consumers; and a decrease in highly dissatisfied consumers, which, to me, meant a decrease in litigation against our members and a bump in professionalism, both areas that I was responsible for as general counsel.

(ECF No. 410-4, at 13) (emphases added). This deposition testimony suggests that the idea for REP as a pilot program had nothing to do with AHRN. Indeed, Ms. Janik further testified that in her mind, there was "[n]o connection whatsoever" between the implementation of REP and the communications she was having with various individuals regarding NeighborCity. (*Id.* at 16). She stated that NeighborCity did not come up in any of her discussions with representatives of associations or brokers or agents when discussing REP.

AHRN argues in its opposition that "REP was designed to replicate the features of AgentMatch, but was marketed through NAR and as a way for members of NAR to protect their reputation." (ECF No. 422, at 38). AHRN provides no evidentiary support for this assertion, which is wholly speculative. Aside from the single email from Gregg Larson discussed above, AHRN has **[*42]** not identified anything else on the record establishing that NAR created REP as part of the group boycott to compete directly with AgentMatch. AHRN cites emails between Ms. Janik and others showing regular communications about REP, but the emails show that NAR was taking certain steps to roll out this pilot program, not that it was designed to compete with AgentMatch. (*See* ECF Nos. 422-28 through 422-30); *see, e.g., Matsushita, 475 U.S. at 588* ("[C]onduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." (*citing Monsanto, 465 U.S. at 764*)). Indeed, in one such email, Ms. Janik informs the group of a meeting time to discuss the quality service certification program and references Larry Romito, whom she credited in her deposition as having developed the program which became of interest to NAR. (*See* ECF No. 423-16); *see, e.g., Merck-Medco, 1999 U.S. App. LEXIS 21487, 1999 WL 691840, at *15* ("We must avoid the danger of an inevitable competition chilling result that would occur should a low quantum of proof be required before a party may harness the power of the Sherman Antitrust Act against facially, legitimate, procompetitive business practices.").

Based on the foregoing, all of the evidence viewed together does not **[*43]** create a reasonable inference of concerted action and group boycott. Thus, judgment will be entered in favor of NAR on the only two remaining counterclaims for violation of *Section 1* of the Sherman Act and unfair competition under Maryland law.[10]

[10] AHRN also relies on the "group boycott" theory to show an unreasonable restraint of trade by way of a "per se" violation of *Section 1* of the Sherman Act. For the reasons explained above, it has not established a group boycott, thus its antitrust claim cannot survive summary judgment.

B. Motions to Seal

The parties filed three motions to seal concerning their filings related to the motion for summary judgment. (*See* ECF Nos. 412, 424, 430). The motions are insufficient and will be denied without prejudice to the filing of properly supported motions.

The Fourth Circuit recently reminded us that:

> It is well settled that the public and press have a qualified right of access to judicial documents and records filed in civil and criminal proceedings. *See* *Richmond Newspapers, Inc. v. Virginia, 448 U.S. 555, 580 n. 17, 100 S.Ct. 2814, 65 L.Ed.2d 973 (1980)*; *Nixon v. Warner Communications, Inc., 435 U.S. 589, 597, 98 S.Ct. 1306, 55 L.Ed.2d 570 (1978)*; *Media Gen. Operations, Inc. v. Buchanan, 417 F.3d 424, 428 (4th Cir. 2005)*. The right of public access springs from the *First Amendment* and the common-law tradition that court proceedings are presumptively open to public scrutiny. *Va. Dep't of State Police v. Wash. Post, 386 F.3d 567, 575 (4th Cir. 2004)*. "The distinction between the rights of access afforded by the common law **[*44]** and the *First Amendment* is significant, because the common law does not afford as much substantive protection to the interests of the press and the public as does the *First Amendment*." *In re United States for an Order Pursuant to 18 U.S.C. Section 2703, 707 F.3d 283, 290 (4th Cir. 2013)* (*quoting* *Va. Dep't of State Police, 386 F.3d at 575*) (internal quotation marks omitted). The common-law presumptive right of access extends to all judicial documents and records, and the presumption can be rebutted only by showing that "countervailing interests heavily outweigh the public interests in access." *Rushford [v. New Yorker]*, 846 F.2d [249,] 253 [4th Cir. 1988]. By contrast, the *First Amendment* secures a right of access "only to particular judicial records and documents," *Stone [v. Univ. of Md. Med. Sys. Corp.]*, 855 F.2d [178,] 180 [4th Cir. 1988], and, when it applies, access may be restricted only if closure is "necessitated by a compelling government interest" and the denial of access is "narrowly tailored to serve that interest," *In re Wash. Post Co., 807 F.2d 383, 390 (4th Cir. 1986)* (*quoting* *Press—Enter. Co. v. Superior Court, 464 U.S. 501, 510, 104 S.Ct. 819, 78 L.Ed.2d 629 (1984)* (internal quotation marks omitted)).

Doe v. Public Citizen, 749 F.3d 246, 265-66 (4th Cir. 2014). In addition, Local Rule 105.11 requires the party seeking sealing to include "(a) proposed reasons supported by specific factual representations to justify the sealing and (b) an explanation why alternatives to sealing would not provide sufficient protection."

The parties in this case were advised at least once before that "[t]he burden is on the party seeking confidential treatment **[*45]** to justify it" and that the party seeking to seal documents must justify the motion, provide redacted portions of documents that can be filed if that is possible, and consider alternatives to sealing. (*See* ECF No. 355, at 41, March 10, 2014 memorandum opinion). Nevertheless, the motions to seal contain only boilerplate recitations, citing the Protective Order and the "attorney's eyes only" designations on the applicable documents. The submissions indicate that the parties seek to seal in their entirety their memoranda in connection with the motion for summary judgment and multiple exhibits. The parties have made no attempt to redact portions of the filings as opposed to sealing the documents in their entirety. *See* *Visual Mining, Inc. v. Ziegler, No. PWG 12-3227, 2014 U.S. Dist. LEXIS 21839, 2014 WL 690905, at *5 (D.Md. Feb. 21, 2014)* (denying motion to seal when the only justification was that the documents are "confidential" under a court-approved Protective Order); *Under Armour, Inc. v. Body Armor Nutrition, LLC, No. JKB-12-1283, 2013 U.S. Dist. LEXIS 157073, 2013 WL 5375444, at *9 (D.Md. Aug. 23, 2013)* (denying motions to seal where "[t]he parties . . . provided only the barest support for the motions, usually relying on the protective order issued in th[e] case" and failed to "provide 'specific factual representations' to justify **[*46]** their argument"); *Butler v. DirectSAT USA, LLC, 876 F.Supp.2d 560, 577 n.18 (D.Md. 2012)* ("In their motion to seal, Plaintiffs state only that they seek to seal the exhibits pursuant to the confidentiality order, an explanation insufficient to satisfy the 'specific factual representations' that Local Rule 105.11 requires."). Indeed, it is not at all clear why all of the memoranda and many exhibits should be sealed in their entirety from the public.

For its part, NAR states it does not necessarily agree with all of the documents it has submitted for sealing, but has moved to seal nonetheless because of *AHRN's* confidentiality designations. (*See* ECF No. 412, at 4). In response to AHRN's motion to seal - which also erroneously relies exclusively on the confidentiality and "attorney's eyes only" designations as justifications for sealing — NAR states that it agrees with AHRN's motion only insofar as it seals to keep sealed Exhibits PP, QQ, and RR (ECF Nos. 422-28 through 422-30). Citing ECF No. 405, NAR submits that "[t]he Court already has determined that Exhibits PP, QQ, and RR contain confidential information that support sealing, having previously granted NAR's motion to seal those documents." (ECF No. 425, at 2). ECF No. 405 is a paperless order approving a motion to seal, **[*47]** but it is not clear at all why Exhibits PP, QQ, and RR need to be sealed in their entirety. Based on the foregoing, the parties may resubmit their motions to seal, justifying any sealing or proposed redactions. In the meantime, the summary judgment submissions will remain temporarily under seal. If the parties do not timely renew their motions, the sealed filings will be unsealed.

Finally, the court will not undertake to determine whether any portion of this Memorandum Opinion will be filed under seal. Accordingly, the Memorandum Opinion will be filed under seal temporarily, and the parties are directed to review it and request *jointly* within fourteen (14) days from this memorandum opinion any necessary redactions that should be made before it is released to the public docket.

IV. Conclusion

For the foregoing reasons, NAR's motion for summary judgment will be granted. The three motions to seal will be denied.

A separate order will follow.

/s/ Deborah K. Chasanow

United States District Judge

ORDER

For the reasons stated in the foregoing Memorandum Opinion, it is this 6th day of July, 2015, by the United States District Court for the District of Maryland, ORDERED that:

1. The motion for summary **[*48]** judgment filed by National Association of Realtors (ECF No. 410), BE, and the same hereby IS, GRANTED;

2. Judgment BE, and the same hereby IS, ENTERED in favor of Counterclaim Defendant National Association of Realtors and against Defendant and Counterclaim Plaintiff American Home Realty Network, Inc. on counts I (Maryland unfair competition) and count III (Sherman Act *§ 1*) of the second amended counterclaims;

3. The motions to seal filed by NAR (ECF Nos. 412 & 430) BE, and the same hereby ARE, DENIED;

4. The motion to seal filed by AHRN (ECF No. 424) BE, and the same hereby IS, DENIED;

5. The parties may renew their motions to seal within fourteen (14) days in accordance with the memorandum opinion;

6. The Clerk is directed to file this Memorandum Opinion temporarily under seal and the parties will notify the court jointly within fourteen (14) days of any requested redactions from the version to be released to the public docket; and

7. The clerk will transmit copies of the Memorandum Opinion and this Order to counsel for the parties.

Opinion

OPINION AND ORDER

RONNIE ABRAMS, United States District Judge:

Plaintiff Preetpal Grewal, a licensed attorney, brings this *pro se* action against her former employer, Cuneo Gilbert & LaDuca LLP ("CGL"), its three named partners, Jonathan W. Cuneo, Pamela Gilbert, and Charles J. LaDuca (collectively, the "Cuneo Defendants"), as well as nine other purported partners of the firm, Michael J. Flannery, Joel Davidow, Robert J. Cynkar, Sandra Cuneo, Daniel M. Cohen, and Matthew E. Miller (collectively, the "Flannery Defendants"). In her Second Amended Complaint, Plaintiff alleges she was improperly induced to join CGL, purportedly as a partner, that Defendants systematically denied her the opportunity **[*2]** to realize the benefits promised in her employment contract, and that she was improperly and unfairly terminated from the firm in 2012. She brings claims under Title VII of the Civil Rights Act of 1964 ("Title VII"), *42 U.S.C. § 2000e, et seq.*, the Racketeer Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. § 1961, et seq.*, as well as a variety of state-law contract, tort, and anti-discrimination causes of action.

Before the Court is Defendants' motion to dismiss Plaintiff's Second Amended Complaint. Defendants seek dismissal of the Flannery Defendants for lack of personal jurisdiction pursuant to *Fed. R. Civ. P. 12(b)(2)*, and dismissal of all but Plaintiff's breach of contract cause of action for failure to state a claim pursuant to *Fed R. Civ. P. 12(b)(6)*. For the reasons that follow, Defendants' motion to dismiss is granted in part and denied in part.

BACKGROUND

Plaintiff, an Indian national, alleges that Jonathan Cuneo, a named partner at CGL, contacted her on March 20, 2008, to express interest in Plaintiff joining CGL, a law firm based in the District of Columbia. Second Am. Compl. ("SAC") (Dkt. 44) ¶ 21. At the time, Plaintiff was considering opening her own law practice. *Id.* ¶ 22. Several weeks later, Cuneo and Plaintiff met in New York City, where **[*3]** they discussed in more detail the possibility of Plaintiff joining CGL. *Id.* Plaintiff alleges that at that meeting Cuneo "boasted about CGL's law practice, the nature of its activities, and how successful and profitable the firm was." *Id.* ¶ 23. Cuneo allegedly "touted how much money he and his partners were making and indicated that if Plaintiff were to join the firm she, too, would enjoy a lucrative practice." *Id.*

Cuneo further "informed Plaintiff that if she joined the firm, she would be entitled to a share in the profits of any case she worked on, with an extra share for cases that she brought into the office." *Id.* ¶ 24. Following this meeting, Plaintiff was invited to CGL's District of Columbia office to meet a second time with Cuneo as well as several of the firm's partners. *Id.* ¶¶ 25-26. On the basis of this meeting, CGL extended a formal offer for Plaintiff to join the firm "on a 'trial basis' for several months, at which time '[CGL's] standard deal kicks in.'" *Id.* ¶¶ 27-28. After Plaintiff requested further information, *id.* ¶ 29, Cuneo e-mailed Plaintiff on June 18, 2008 to explain that under the "standard deal," Plaintiff "would be compensated for [client development activities] **[*4]** hourly, plus ten percent of work [she] originate[d], plus twelve percent of [her] lodestar contribution," *id.* ¶ 30. Any amounts beyond the hourly rate for client development activities were to be considered an entitlement—and not a bonus—based on the "relative value" of Plaintiff's contribution to a case. *Id.*

Plaintiff accepted Cuneo's offer by e-mail that same day, *id.* ¶ 31, and on June 30, 2008, Plaintiff began working at CGL from its New York City office, as CGL's sole New York presence, *id.* ¶ 32. Upon starting, Plaintiff was informed "she would not in fact have to complete a trial period but rather would work full time under the 'standard deal' immediately." *Id.*

According to Plaintiff, she was treated as a partner at CGL "from the beginning of her affiliation with that firm." *Id.* ¶ 33. She alleges she "regularly attended partnership lunches . . . where issues of strategy were discussed" with the Cuneo Defendants, *id.* ¶ 34, and that CGL "regularly represented to others, including multiple courts, that Plaintiff was a partner at the firm and Plaintiff believed these representations to be true." *Id.* ¶¶ 3543. Plaintiff asserts the Flannery Defendants were similarly represented as partners, *id.* ¶¶ **[*5]** 11-16, although these Defendants, in affidavits attached to Plaintiff's Second Amended Complaint, have since disavowed their status as partners, *see id.* Ex. 11.

Plaintiff nevertheless alleges that CGL—and Jonathan Cuneo in particular—"sought to nullify the promises made under" Plaintiff's employment contract with CGL. *Id.* ¶ 44. In her Second Amended Complaint, Plaintiff recounts a litany of instances in which Cuneo first encouraged Plaintiff to develop clients and cases, only to "subvert" Plaintiff's work and "expropriate" it for himself and other members of CGL. *See id.* ¶¶ 44-98. Plaintiff alleges that Cuneo repeatedly assured her "that no one at CGL would work on another attorney's idea/lead for a case without consent of the other attorney," *id.* ¶ 59, but that Cuneo frequently gave cases and clients developed by Plaintiff to other CGL attorneys, minimized the credit she received for her work, offered to pay only a small fraction of the origination and lodestar profits to which she was entitled, and refused to use clients developed by Plaintiff despite adopting her legal theories. *Id.* ¶¶ 44-98. As is necessary, the Court will address specific allegations of expropriation and subversion **[*6]** in the Discussion, *infra*.

Plaintiff also alleges that Cuneo, in addition to subverting and expropriating her case origination efforts, "repeatedly threatened and humiliated Plaintiff on the basis of her Indian nationality." *Id.* ¶ 99. For instance, she claims that Cuneo repeatedly, and in the presence of others, "mocked and denigrated Plaintiff's accent, claiming that he 'could not understand' her . . . even though Plaintiff is a native English speaker," and told her that "'we treat you like a foreigner' and that 'we never take you seriously,'" despite never making such statements to others. *Id.* ¶¶ 100-101. At one firm meeting in the summer of 2011, Plaintiff asserts that Cuneo remarked, "'we don't take this girl seriously' and 'we just treat her as a foreigner,'" admitting openly that "'we should be ashamed of ourselves' for how the firm treated Plaintiff." *Id.* ¶ 102. Similarly, in September of 2011, after Plaintiff "told Cuneo that she felt she was often treated as a foreigner and not given proper respect for that reason," Cuneo purportedly "responded, 'I have repeatedly told you that you are treated as a foreigner and that nobody takes you seriously.'" *Id.* ¶ 103. Plaintiff alleges **[*7]** that another attorney "stopped Cuneo from making any further discriminatory comments" during this meeting, and then "instructed Plaintiff to leave the room." *Id.*

By this conduct, Plaintiff claims "Cuneo created a hostile work environment by depriving Plaintiff of her opportunities and giving her work opportunities/credit of her work to other attorneys at CGL, and deliberately leaving Plaintiff out of meetings and conferences." *Id.* ¶ 104. Plaintiff further alleges that Cuneo, "with the intent to demoralize and harass Plaintiff, deliberately and intentionally ordered repeated investigations and Plaintiff was issued numerous threats," *id.* ¶ 105, including repeated threats to "Plaintiff's status as a resident of the United States as well as standing as an attorney qualified to practice in the State of New York," *id.* ¶ 106. These threats included a conversation with Cuneo in which he "implied to Plaintiff that Cuneo himself [had] gotten [an] attorney disbarred and implied that anyone who fought with Cuneo could expect a similar fate," *id.* ¶ 108, and a purportedly improper demand to see Plaintiff's Green Card, despite CGL having "no valid reason to have this information and no legal basis **[*8]** to demand it," *id.* ¶ 110. Plaintiff also alleges that CGL launched a "bogus" investigation into expenses from a client recruitment trip to India that Plaintiff took at Cuneo's request, *id.* ¶ 107, and that Davidow at one point "threatened Plaintiff that all of the antitrust clients that Plaintiff had brought into the firm were 'the firm's clients' and that if she left and took the clients with her, she would be prosecuted for ethical violations and disbarred," *id.* ¶ 109.

Plaintiff alleges that on May 7, 2012, she received a telephone call from Gilbert, who instructed Plaintiff "not to come to her office in New York." *Id.* ¶ 112. Plaintiff was informed "her office had been sealed and office equipment confiscated, and if she came to the office she would be barred from entering." *Id.* Plaintiff was then "summoned to attend a meeting" with LaDuca and Gilbert at the office of a third-party attorney, where she was told she was under investigation for purportedly ghost-writing a brief for a *pro se* litigant, Elizabeth Thomas. *Id.* ¶¶ 114, 125-26.[1] When Plaintiff asked for further information, she was told she "had better talk with" her lawyer. *Id.* ¶ 114.

At the same meeting, Plaintiff was informed she had been placed on administrative leave, and was instructed "not to have any contact with anyone at the firm, or any of the firm's clients other than the administrator," *id.* ¶ 115, and that she could not "claim any affiliation with CGL from this point forward," *id.* ¶ 116. Plaintiff alleges she was "given no rights to explain herself and no say in the decision to terminate her affiliation with the firm." *Id.* ¶ 117. Nor, Plaintiff contends, was she "given any warning," or represented by counsel. *Id.* ¶ 118. Later that day, "Plaintiff called Gilbert to confirm that her position had been terminated. Gilbert confirmed that Plaintiff no longer had a position at the firm." *Id.* ¶ 120.

According to Plaintiff, upon her dismissal from CGL, the firm launched a "groundless" investigation of her conduct and then attempted to recoup the costs of this investigation from her. *Id.* ¶¶ 124-131. Defendants' investigation "uncovered no evidence of misconduct," as, Plaintiff alleges, even "a cursory review of the case law would have established." *Id.* ¶¶ 129-130. Plaintiff contends the investigation was "simply an **[*10]** opportunity to intimidate and frighten Plaintiff in order to induce her not to vindicate her rights, and an excuse for dismissing her from the firm on a basis that would make Plaintiff, rather than CGL, appear to be at fault." *Id.* ¶ 131.

---

[1] Thomas' attempts to intervene in this action **[*9]** were denied by Magistrate Judge Pitman. Dkt. 93.

In sum, Plaintiff alleges that Defendants "illegally squeezed [her] out" of CGL after inducing her to "become a partner in their firm, for the purpose of expropriating the substantial value of her interest in the firm." *Id.* ¶ 1. She contends that "Defendants illegally threatened and intimidated [her], engaged in gross acts of discrimination, violated her rights as a partner in the firm, interfered with her opportunities to obtain other work, deprived her of her means of livelihood, and unjustly enriched themselves at her expense." *Id.* Plaintiff seeks $6,000,000 in compensatory damages, as well as punitive and treble damages, an array of injunctive and equitable relief, and an accounting to determine the value of her partnership interest in CGL. *Id.* ¶ 239.

After Defendants filed the instant motion to dismiss and for partial summary judgment, Dkt. 51, Magistrate Judge Pitman issued an order indicating that Plaintiff had withdrawn the cause of action on **[*11]** which Defendants sought summary judgment and that all remaining claims were to be assessed under the motion to dismiss standard, Dkt. 89. The Court now addresses these claims.

DISCUSSION

I. Motion to Dismiss for Lack of Personal Jurisdiction

A. Legal Standard

Defendants seek dismissal of the Flannery Defendants for lack of personal jurisdiction pursuant to *Fed. R. Civ. P. 12(b)(2)*. "When responding to a *Rule 12(b)(2)* motion to dismiss for lack of personal jurisdiction, the plaintiff bears the burden of establishing that the court has jurisdiction over the defendant." *Bank Brussels Lambert v. Fiddler Gonzalez & Rodriguez, 171 F.3d 779, 784 (2d Cir. 1999)*. Prior to discovery, this burden is met "by pleading in good faith, legally sufficient allegations of jurisdiction," a showing that "may be established solely by allegations." *Dorchester Fin. Sec., Inc. v. Banco BRJ, S.A., 722 F.3d 81, 84-85 (2d Cir. 2013)* (citation omitted). Importantly, however, a "plaintiff must plead personal jurisdiction with respect to each claim asserted." *Hanly v. Powell Goldstein, L.L.P., 290 F. App'x 435, 437 (2d Cir. 2008)* (summary order).

Because this is a federal question case in which those defendants seeking dismissal for lack of personal jurisdiction reside outside of New York, the Court must look to New York's jurisdictional rules. *Fed. R. Civ. P. 4(k)(1)*.[2] *See also* *Daimler AG v. Bauman, 134 S. Ct. 746, 753, 187 L. Ed. 2d 624 (2014)* ("Federal courts ordinarily follow state law in determining the bounds of their jurisdiction over persons."). "First, we determine whether **[*12]** the defendant is subject to jurisdiction under the law of the forum state—here, New York. Second, we consider whether the exercise of personal jurisdiction over the defendant comports with the *Due Process Clause of the United States Constitution*." *Sonera Holding B.V. v. Cukurova Holding A.S., 750 F.3d 221, 224 (2d Cir.)*, *cert. denied*, *134 S. Ct. 2888, 189 L. Ed. 2d 837 (2014)*.

B. Legal Analysis

Defendants appear to concede that jurisdiction is proper over CGL and the Cuneo Defendants, but contend that the exercise of personal jurisdiction is improper as to the Flannery Defendants.

There are two possible statutory bases for the exercise of personal jurisdiction over the Flannery Defendants under New York law: *N.Y. C.P.L.R. 301*, New York's general jurisdiction statute, and *N.Y. C.P.L.R. 302*, New York's long-arm statute. Although Defendants address—at some length—whether jurisdiction is proper under *Rule 301*, Plaintiff

---

[2] As to subject matter jurisdiction, federal question jurisdiction is proper under *28 U.S.C. § 1331* on the basis of Plaintiff's Title VII and RICO claims. The parties also do not dispute that diversity jurisdiction exists pursuant to *28 U.S.C. § 1332*.

contends only that jurisdiction is proper under *Rule 302*. The Court will thus address personal jurisdiction under *Rule 302* only.

Plaintiff argues that the exercise of personal jurisdiction over the Flannery Defendants is proper under *Rule 302(a)(1)*, which provides, in relevant part:

> As to a cause **[*13]** of action arising from any of the acts enumerated in this section, a court may exercise personal jurisdiction over any non-domiciliary . . . who in person or through an agent:
>
> 1. transacts any business within the state or contracts anywhere to supply goods or services in the state . . . .

Plaintiff contends that personal jurisdiction over the Flannery Defendants is proper pursuant to this subsection under two distinct theories: an agency theory and an individual—or personal—theory. Pl.'s Opp. 3-8. Both theories fail as to each of the Flannery Defendants, except for Davidow, over whom jurisdiction is proper on an individual theory.

First, there is no basis for the Court's exercise of personal jurisdiction over the Flannery Defendants on an agency theory. Plaintiff argues that the Flannery Defendants are partners of CGL by estoppel, and that because CGL and "certain of its partners are concededly subject to this Court's jurisdiction, and because partners are agents of one another, the Flannery Defendants are subject to New York jurisdiction also." *Id.* 3-5.

As an initial matter, it is unclear whether the exercise of jurisdiction over a partnership establishes jurisdiction over all of its partners **[*14]** under New York law. *Compare* *Somer & Wand, P.C. v. Rotondi, 219 A.D.2d 340, 642 N.Y.S.2d 937, 939 (N.Y. App. Div. 1996)* ("[J]urisdiction over a professional corporation does not result in personal jurisdiction over the shareholders thereof, any more than does jurisdiction over a partnership result in personal jurisdiction over its partners.") *with* *Friedson v. Lesnick, No. 91 Civ. 2133 (JSM), 1992 U.S. Dist. LEXIS 2773, 1992 WL 51543, at *2 (S.D.N.Y. Mar. 9, 1992)* ("[C]ourts have personal jurisdiction over general partners if the court has jurisdiction over the partnership itself, and the lawsuit arises out of partnership affairs.") *and* *Wichita Fed. Say. and Loan Ass'n v. Comark, 586 F. Supp. 940, 943 (S.D.N.Y. 1984)* ("New York case law establishes that non-resident general partners may properly be sued in the courts of this state as a result of forum activities of a partnership.").

Ultimately, it is unnecessary to reach this question, as Plaintiff has not properly alleged that the Flannery Defendants are partners of CGL. In affidavits submitted by the Flannery Defendants and attached to Plaintiff's Second Amended Complaint, they expressly deny that they are partners. *See* SAC Ex. 11. In response, Plaintiff does not appear to contest this assertion, arguing only that the Flannery Defendants are partners by estoppel. Pl.'s Opp. 3. Under District of Columbia law, partnership by estoppel is a statutory matter. *See* *D.C. Code § 29-603.08*.[3] *Section 29-603.08* provides as follows:

> If a person, by words or conduct, purports to be a partner, **[*15]** or consents to being represented by another as a partner, in a partnership or with one or more persons not partners, the purported partner shall be liable to a person to whom the representation is made, if that person, relying on the representation, enters into a transaction with the actual or purported partnership.

---

[3] The parties have not briefed choice of law as to the preliminary question of whether the Flannery Defendants and Plaintiff were CGL partners. Ordinarily, this choice of law question is resolved by reference to the partnership agreement, which typically contains a choice-of-law provision. In the absence of such an agreement, New York law provides that "the laws of the jurisdiction that govern a foreign limited liability partnership shall determine its internal affairs and the liability of partners for debts, obligations and liabilities of, or chargeable to, the foreign limited liability partnership." *N.Y. P'ship Law § 121-1502(l)*. Because CGL is a partnership organized under District **[*16]** of Columbia law, the Court will apply District of Columbia law to those questions that concern partnership affairs. The Court will apply New York law as to Plaintiff's state-law contract and tort claims, however. In their motion papers, the parties have assumed that New York law applies, which is sufficient to resolve the choice of law question in favor of New York for these claims. *See* *Krumme v. WestPoint Stevens Inc., 238 F.3d 133, 138 (2d Cir. 2000)*.

D.C. Code § 29-603.08(a). *See also* *Geier v. Conway, Homer & Chin-Caplan, P.C., 983 F. Supp. 2d 22, 35 n.7 (D.D.C. 2013)*. Thus, an injured party asserting partnership by estoppel must, in addition to showing that the other party was actually represented as a partner, demonstrate that they relied on such representations.

Plaintiff has alleged that the Flannery Defendants were represented as CGL partners. SAC ¶¶ 11-16. She also argues, in her opposition papers, that "she relied on these representations to her detriment because she believed . . . that she and others like her would be treated with the fair dealing that partners owe to one another." Pl.'s Opp. 5. This argument is unavailing. In her Second Amended Complaint, Plaintiff alleges only that she relied on the representations of CGL and the Cuneo Defendants that she was a partner, *see, e.g.*, SAC ¶¶ 35-43, not that she relied on such representations as to the Flannery Defendants. Because Plaintiff has not alleged that she relied on representations that they were partners, the Flannery Defendants are not partners by estoppel under District of Columbia law. This **[*17]** outcome would be no different under New York partnership law, which contains a nearly identical estoppel provision. *See* *N.Y. P'ship Law § 27*.

The Flannery Defendants, as employees of CGL, were indisputably agents of the firm, and their litigation work in New York is thus imputed to CGL under the clear language of *Rule 302(a)*. But because the partnership by estoppel theory does not apply to the Flannery Defendants given that they were not partners, the jurisdictional status of CGL and the Cuneo Defendants cannot be imputed to them. Jurisdiction over the Flannery Defendants is thus proper under *Rule 302(a)* only if it can be exercised on an individual basis.

The individual theory similarly provides no ground for personal jurisdiction over the Flannery Defendants—except as to Davidow. Plaintiff sufficiently alleges that each Defendant transacted business in New York through their work litigating a number of matters in Federal and State court, SAC ¶¶ 11-16, but she has not alleged—except as to Davidow—that her causes of action arise from these transactions.

Under *Rule 302(a)*, a "claim 'arises out of a defendant's transaction of business in New York when there exists 'a substantial nexus' between the business transacted and the **[*18]** cause of action sued upon." *Agency Rent A Car Sys., Inc. v. Grand Rent A Car Corp., 98 F.3d 25, 31 (2d Cir. 1996)* (quotation omitted). Unlike with the other Flannery Defendants, Plaintiff has alleged such a substantial nexus between Davidow's work in New York and her causes of action.

Plaintiff alleges "Cuneo and CGL sought to squeeze Plaintiff out of any involvement in antitrust cases" after hiring Davidow, an expert in ***antitrust law***, in March of 2011. SAC ¶ 61. According to Plaintiff, Davidow, in his role as one of the firm's lead antitrust lawyers, "deliberately excluded Plaintiff from the conference calls and meetings" regarding the so-called Auto Parts case—even though Plaintiff first developed the theory on which CGL sued. *Id.* ¶¶ 67, 69. The Auto Parts case, moreover, is among those matters litigated by Davidow in New York. *Id.* ¶ 11. Because Plaintiff has alleged that Davidow was directly involved in excluding Plaintiff from a case on which she may have been entitled to fees, the exercise of personal jurisdiction over Davidow is proper.

Otherwise, Plaintiff fails to allege a substantial nexus between the New York work of the other Flannery Defendants and her causes of action. Her Second Amended Complaint recounts decisions undertaken by the Cuneo Defendants in **[*19]** the District of Columbia, but she has not alleged any specific facts from which the Court can impute these decisions to the Flannery Defendants individually, or establish a New York nexus. Plaintiff claims only that these Defendants worked on litigation matters and attended meetings in New York. Although some of these New York litigation matters are the subject of the current litigation, nowhere does Plaintiff allege that these individual Defendants expropriated her work or otherwise engaged in the tortious conduct on which she has sued.

Because Plaintiff has not alleged that her causes of action arose out of the individual work of the Flannery Defendants in New York, excluding Davidow, the Court cannot exercise personal jurisdiction on this basis.[4] There is

---

[4] Even if the Court could exercise personal jurisdiction over these Flannery Defendants on an individual basis, Plaintiffs' claims against them fail for the same reasons they ultimately fail against Davidow. *See* Discussion, *infra* Part II.

thus no statutory basis for the exercise of personal jurisdiction over these Defendants. Defendants' *Fed. R. Civ. P. 12(b)(2)* motion is denied as to Davidow, and granted as to the remaining Flannery Defendants.

II. Motion [*20] to Dismiss for Failure to State a Claim

A. Legal Standard

To survive a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a pleading must contain "a short and plain statement of the claim showing that the pleader is entitled to relief," *Fed. R. Civ. P. 8(a)(2)*, and be "plausible on its face," *Bell Atl. Corp v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. In ruling on a motion to dismiss, a Court may look at any document attached to the complaint as an exhibit, as well as the allegations of the complaint itself. *See* *Fed. R. Civ. P. 10(c)*; *Dangler v. M'tr York City Off Track Betting Corp., 193 F.3d 130, 138 (2d Cir. 1999)*. Plaintiff is *pro se*, but because she is also "an experienced attorney . . . the Court is not obligated to read [her] pleadings liberally," as would otherwise be required. *Chira v. Columbia Univ. in New York City, 289 F. Supp. 2d 477, 482 (S.D.N.Y. 2003)*.

B. Legal Analysis

In her Second Amended Complaint, Plaintiff brings thirteen separate causes of action, including federal Title VII and RICO claims, as well as a variety of state-law contract and torts claims. In her opposition papers, however, Plaintiff has indicated she no longer intends to pursue her Title VII claim, or those for infliction of emotional distress, unlawful threats, and interference with contractual relations. **[*21]** Pl.'s Opp. 14 n.7. *See also* Dkt. 89.

Remaining in this action are Plaintiff's state-law claims for breach of contract (Count One), breach of the implied covenant of good faith and fair dealing (Count Two), breach of fiduciary duty (Count Three), unjust enrichment (Count Four), fraudulent inducement (Count Six), violations of state and city human rights law (Count Eight), and unfair competition (Count Ten), as well as her RICO claims (Count Thirteen). The Court will first address whether Plaintiff's state-law claims can properly be maintained against the Cuneo Defendants, before turning to the merits of these claims. It will then address Plaintiff's RICO claims.

1. Personal Liability of the Cuneo Defendants

Defendants argue that Plaintiff cannot maintain her state-law tort and contract claims against the Cuneo Defendants,[5] as they are shielded from personal liability for such claims by *District of Columbia ("D.C.") Code § 29-603.06(c)*, which provides:

> An obligation of a partnership incurred while the partnership is a limited liability partnership, whether arising in contract, tort, or otherwise, shall be solely the debt, obligation, or other liability of the partnership. A partner shall not be personally **[*22]** liable, directly or indirectly, by way of contribution or otherwise, for such a debt, obligation, or other liability solely by reason of being or so acting as a partner.

---

[5] In her Second Amended Complaint, Plaintiff asserts state-law contract claims (Counts One and Two) against CGL only. SAC 34-35. In her opposition papers, however, she indicates that the Second Amended Complaint "erroneously limits" those counts to CGL, and that she intended to assert these claims against the Cuneo Defendants as well. Pl.'s Opp. 28. It is ultimately unnecessary for the Court to address this purported error, as District of Columbia partnership law bars Plaintiff from asserting either claim against the Cuneo Defendants individually, for the reasons explained below.

Plaintiff correctly notes, however, that D.C. Code § 29-604.08(b) permits actions by a partner against the partnership or another partner, including actions to enforce any rights arising under the partnership agreement. Thus, if Plaintiff was a CGL partner, she can maintain her state-law claims against the Cuneo Defendants, but if she was not, she cannot.

Under District of Columbia law, "[a] partnership is frequently described as a contract of two or more competent persons **[*23]** to place their money, effects, labor, and skill, or some or all of them, in lawful commerce or business, and to divide the profit *and bear the loss* in certain proportions." Georgia Cas. Co. v. Hoage, 59 F.2d 870, 872 (D.C. Cir. 1932) (emphasis added). *See also* D.C. Code § 29-604.01 (b) ("Each partner shall be entitled to an equal share of the partnership profits and *shall be chargeable with a share of the partnership losses* in proportion to the partner's share of the profits.") (emphasis added). Similarly, while a "person that receives a share of the profits of a business shall be presumed to be a partner in the business," this presumption does not apply where the profits were received as "wages or other compensation to an employee." D.C. Code § 29-602.02(c)(3).

Plaintiff has properly alleged that she shared in the profits of CGL. She asserts that her initial conversations with Jonathan Cuneo about joining CGL led her to believe she "would be entitled to a share in the profits of any case she worked on, with an extra share for cases that she brought into the office." SAC ¶ 24. The purported employment offer Cuneo sent Plaintiff by e-mail on June 18, 2008 reflects this understanding, promising Plaintiff an hourly wage for client development activities, plus "ten percent of work [she] originate[d], plus twelve **[*24]** percent of [her] lodestar contribution." *Id.* ¶ 30.

Plaintiff has not properly alleged, however, that she shared in the losses of the firm, or that she had any equity at stake such that she could plausibly bear any loss. Georgia Cas. Co., 59 F.2d at 872. *Accord* Kidz Cloz, Inc. v. Officially For Kids, Inc., 320 F. Supp. 2d 164, 171 (S.D.N.Y. 2004) ("To demonstrate the existence of a partnership, a plaintiff must prove four elements: (1) the parties' sharing of profits *and losses*; (2) the parties' joint control and management of the business; (3) the contribution by each party of property, financial resources, effort, skill, or knowledge to the business; and (4) the parties' intention to be partners.") (emphasis added); Zeising v. Kelly, 152 F. Supp. 2d 335, 348 (S.D.N.Y. 2001) (finding "the requirement that there be a provision in the agreement for the sharing of profits *and losses* . . . [a]n indispensable essential of a contract of partnership.") (quotation omitted) (alterations in original) (emphasis added); Steinbeck v. Gerosa, 4 N.Y.2d 302, 151 N.E.2d 170, 178, 175 N.Y.S.2d 1 (N.Y. 1958) ("An indispensable essential of a contract of partnership or joint venture, both under common law and statutory law, is a mutual promise or undertaking of the parties to share in the profits of the business and submit to the burden of making good the losses.") (emphasis added).[6]

Indeed, that Plaintiff was paid an hourly wage for aspects of her work suggests just the opposite: she was at least partially insulated from downside risk, such that the profits promised her in good times—even if considered an entitlement and not a bonus, *id.* ¶ 30—are best classified as profits received "as wages or other compensation to an employee." D.C. Code § 29-602.02(c)(3). *Accord* N.Y. P'ship Law § 11 ("The receipt by a person of a share of the profits of a business is prima facie evidence that he is a partner in the business, but no such inference shall be drawn if such profits were received in payment: . . . (b) As wages of an employee."). Plaintiff has thus not plausibly alleged she was a partner at CGL.

Plaintiff has also not plausibly alleged she was a CGL partner by estoppel. *See* D.C. Code § 29-603.08(a). Although she has asserted both that she was represented as a partner and that she relied on those representations, *see, e.g.* SAC ¶¶ 35-43, by its plain language, the District of Columbia's estoppel provision applies only as between a person represented as a partner and a person relying on this representation. **[*26]** *See* D.C. Code § 29-603.08(a). Here, because Plaintiff is both the purported partner and the person claiming reliance, the District of Columbia's estoppel provision cannot apply. Nor can it estop the Cuneo Defendants from claiming that Plaintiff was not a partner. The District of Columbia's estoppel provision requires that the person to whom the partnership representation is made

[6] As noted in footnote 3, *supra*, the Court applies District of Columbia law to the **[*25]** internal affairs of CGL, although, as the above citations make clear, the result would remain the same under New York law.

rely on that representation when entering "into a transaction with the . . . purported partnership." *See* *D.C. Code § 29-603.08(a)*. Plaintiff, however, has not alleged that she was led to believe she would become a partner upon joining the firm, instead claiming only that she was represented as a partner once at CGL.

Because Plaintiff has not properly alleged that she was a CGL partner, she cannot bring suit against the Cuneo Defendants individually. Her state-law claims are dismissed as to each of these three Defendants, and remain only as against CGL and, where applicable, Davidow.

2. Plaintiff's Breach of Contract Claim

In Count One of her Second Amended Complaint, Plaintiff alleges that Defendants' conduct breached her employment agreement with CGL and deprived her of the benefits of that bargain. SAC ¶¶ 140-145. Defendants concede that Plaintiff has stated **[*27]** a viable claim for breach of contract as to CGL, Defs.' Mem. 3, the only party Plaintiff names in this cause of action, *see* SAC 34.

In light of the Court's finding that the Cuneo Defendants are insulated from suit and that it lacks jurisdiction over all of the Flannery Defendants but for Davidow, Davidow is the only remaining individual Defendant against whom Plaintiff could possibly assert her breach of contract claim. Plaintiff has not named Davidow in this cause of action, however, and even if she had, because her employment contract was with CGL, *Id.* ¶ 31, and because Davidow is not a CGL partner, he was not a party to the contract and cannot be held personally liable for its breach. *See Blank v. Noumair, 239 A.D.2d 534, 658 N.Y.S.2d 88, 88 (N.Y. App. Div. 1997)*. Plaintiff's breach of contract claim is dismissed as to Davidow, and remains only as to CGL.

3. Plaintiff's Breach of the Implied Covenant of Good Faith and Fair Dealing Claim

In Count Two, Plaintiff alleges that Defendants' conduct breached the implied covenant of good faith and fair dealing. (SAC ¶¶ 146-51.) This count, as with Count One, names only CGL as a Defendant.

"In New York, all contracts imply a covenant of good faith and fair dealing in the course of performance." *511 W. 232nd Owners Corp. v. Jennifer Realty Co., 98 N.Y.2d 144, 773 N.E.2d 496, 500, 746 N.Y.S.2d 131 (N.Y. 2002)*. This covenant "embraces **[*28]** a pledge that neither party shall do anything which will have the effect of destroying or injuring the right of the other party to receive the fruits of the contract." *Dalton v. Educ. Testing Serv., 87 N.Y.2d 384, 663 N.E.2d 289, 291, 639 N.Y.S.2d 977 (N.Y. 1995)* (quotation omitted).

The implied covenant "does no more" than this, however; "it works only to ensure that a party with whom discretion is vested does not act arbitrarily or irrationally." *Id. at 296*. "For this to occur, a party's action must directly violate an obligation that may be presumed to have been intended by the parties." *Thyroff v. Nationwide Mut. Ins. Co., 460 F.3d 400, 407-08 (2d Cir. 2006) certified question accepted, 7 N.Y.3d 837, 857 N.E.2d 528, 824 N.Y.S.2d 207 (N.Y. 2006)* and *certified question answered*, *8 N.Y.3d 283, 864 N.E.2d 1272, 832 N.Y.S.2d 873 (N.Y. 2007)* (quotation omitted). The covenant "does not extend so far as to undermine a party's general right to act on its own interests in a way that may incidentally lessen the other party's anticipated fruits from the contract." *Id. at 408*.

Indeed, "New York law is clear that the implied covenant cannot be used to create independent obligations beyond the contract." *ARI & Co. v. Regent Int'l Corp., 273 F. Supp. 2d 518, 523 (S.D.N.Y. 2003)*. Nor does "New York law . . . recognize a separate cause of action for breach of the implied covenant . . . when it is based on the same facts as the breach of contract claim," or where "the relief sought . . . is intrinsically tied to the damages allegedly resulting from the breach of **[*29]** contract." *Goldblatt v. Englander Commc'ns, L.L.C., No. 06 Civ. 3208 (RWS), 2007 U.S. Dist. LEXIS 4278, 2007 WL 148699, at *5 (S.D.N.Y. Jan. 22, 2007)*. *See also* Nat'l Gear & Piston, Inc. v. Cummins Power Sys., LLC, 861 F. Supp. 2d 344, 365 (S.D.N.Y. 2012).

Despite the limited availability of claims for breach of the implied covenant under New York law, Plaintiff has sufficiently alleged such a claim here. As alleged, Plaintiff's implied covenant claim depends on facts distinct from those underlying her claim for breach of contract. To prove the latter, Plaintiff will need to demonstrate that the cases she originated and those to which she contributed generated actual fees, and that CGL failed to pay Plaintiff a percentage of any such fees as required pursuant to the plain terms of her employment agreement. To prove the former, Plaintiff will need to demonstrate that Defendants sought to subvert and expropriate her work, that they did so in bad faith, and that—but for this subversion and expropriation—her work would have resulted in fees. Thus, the damages stemming from Plaintiff's implied covenant claim would not be "intrinsically tied to the damages allegedly resulting from the breach of contract," *Goldblatt, 2007 U.S. Dist. LEXIS 4278, 2007 WL 148699, at *5*.

Plaintiff has sufficiently alleged multiple instances of CGL partners and other attorneys acting in less than good faith, whether by taking credit themselves for clients and cases Plaintiff brought to the firm, interfering **[*30]** with Plaintiff's ability to work on key cases, or assigning other attorneys to lead litigation initially developed by Plaintiff. SAC ¶¶ 44-98. In short, she portrays CGL as a firm designed to maximize the narrow self-interest of the three named partners, and few others. Plaintiff is correct, moreover, that in similar circumstances such conduct has amounted to a viable claim for breach of the implied covenant. *See* Pl.'s Opp. 29; *Kapsis v. American Home Mortg. Servicing Inc., 923 F. Supp. 2d 430, 452 (E.D.N.Y. 2013)* ("[The implied] covenant is violated when a party promises commissions or profits and then does not act in good faith to permit such commissions or profits to be earned, thereby depriving the other party of the benefit of the bargain.").

Plaintiff has thus stated a claim for breach of the implied covenant, and Defendants' motion to dismiss this claim is denied.

4. Plaintiff's Breach of Fiduciary Duty Claim

In Count Three, Plaintiff alleges that, as partners, "Defendants owed fiduciary obligations" to her, and that they violated these obligations by "depriving her of the opportunity to develop her career . . . while expropriating [the cases she brought to CGL] for themselves." SAC ¶¶ 152-57. Under New York law, "[b]reach of fiduciary duty is a tort that arises from a violation **[*31]** of a relationship of trust and confidence." *Vione v. Tewell, 12 Misc. 3d 973, 820 N.Y.S.2d 682, 686 (N.Y. Sup. Ct. 2006)*. "In order to succeed on a cause of action to recover damages for breach of fiduciary duty, a plaintiff must do more than make allegations of unscrupulous acts." *Robert I. Gluck, M.D., LLC v. Kenneth M. Kamler, M.D., LLC, 74 A.D.3d 1167, 904 N.Y.S.2d 151, 152 (N.Y. App. Div. 2010)*. Instead, a plaintiff "must prove the existence of a fiduciary relationship, misconduct by the defendant, and damages directly caused by the defendant's misconduct." *Id.*

Here, Plaintiff cannot show that CGL owed her a fiduciary obligation. District of Columbia partnership law does provide for a limited fiduciary relationship between and among partners, *see* *D.C. Code § 29-604.07*, but because Plaintiff was not a CGL partner, *see* Discussion, *supra*, 14-17, no such relationship was formed. New York law is no different. *See, e.g.,* *Orderline Wholesale Distribs., Inc. v. Gibbons, Green, van Amerongen, Ltd., 675 F. Supp. 122, 128 (S.D.N.Y. 1987)* ("Since . . . plaintiffs fail to make a showing sufficient to establish the existence of an enforceable . . . partnership agreement with [defendant], they also fail to make a showing sufficient to establish the existence of a fiduciary obligation to them by [defendant].").

Instead, Plaintiff was a CGL employee, and under New York law mere "employment relationships do not create fiduciary relationships." *Rather v. CBS Corp., 68 A.D.3d 49, 886 N.Y.S.2d 121, 125 (N.Y. App. Div. 2009)*. *See also* *Mendelsohn v. Ferber, 26 Misc. 3d 190, 887 N.Y.S.2d 494, 498 (N.Y. Sup. Ct. 2009)*, *aff'd*, *73 A.D.3d 1139, 903 N.Y.S.2d 427 (N.Y. App. Div. 2010)* ("Even an employer-employee **[*32]** relationship providing for the division of profits will not give rise to a fiduciary duty on the part of the employer without an agreement to also share losses.").[7] For similar reasons, there was also no fiduciary relationship between Plaintiff and Davidow, another CGL employee, as a matter of law.

---

[7] Whereas the existence of a fiduciary relationship between CGL partners is a matter of internal affairs and thus a question of District of Columbia law, the existence of a fiduciary relationship between employers and employees is a question of New York law. *See* Discussion *infra* n.3.

Because even taking Plaintiff's allegations as true, no fiduciary obligation was owed to her by CGL or Davidow, Defendants' motion to dismiss this claim is granted.

5. Plaintiff's Unjust Enrichment Claim

In Count Four, Plaintiff alleges that Defendants unjustly enriched themselves at her expense. SAC ¶¶ 158-162. "The theory of unjust enrichment lies as a quasi-contract claim. It is an obligation the law creates in the absence of any agreement." *Goldman v. Metro. Life Ins. Co., 5 N.Y.3d 561, 841 N.E.2d 742, 746, 807 N.Y.S.2d 583 (N.Y. 2005)*. *See also* *Clark-Fitzpatrick, Inc. v. Long Island R.R. Co., 70 N.Y.2d 382, 516 N.E.2d 190, 193, 521 N.Y.S.2d 653 (N.Y. 1987)* ("The existence of a valid and enforceable written contract governing a particular subject matter ordinarily precludes recovery in quasi contract for events arising **[*33]** out of the same subject matter. A 'quasi contract' only applies in the absence of an express agreement.") Plaintiff contends her unjust enrichment claim is nonetheless viable, arguing that it does not merely duplicate her contract claims. Pl.'s Opp. 32. This argument is unavailing.

Here, there is a written contract—a contract that expressly concerns the terms of Plaintiff's employment relationship with CGL. Because there is a contract concerning the terms of her employment, Plaintiff is not entitled to quasi-contractual relief for injuries that arose as a consequence of her employment. Plaintiff may not bring a claim for unjust enrichment, and Defendants' motion to dismiss is granted as to this claim.

6. Plaintiff's Fraudulent Inducement Claim

In Count Six, Plaintiff alleges she was fraudulently induced to join CGL—and then to remain with the firm—by repeated promises of success, but that "Defendants never intended to provide Plaintiff with the compensation to which she was entitled." SAC ¶¶ 169-74.

"[U]nder New York law [i]t is elementary that where a contract or transaction was induced by false representations, the representations and the contract are distinct and separable . . . . Thus, fraud **[*34]** in the inducement of a written contract is not merged therein so as to preclude an action for fraud." *Stewart v. Jackson & Nash, 976 F.2d 86, 88-89 (2d Cir. 1992)* (quotation omitted). In general, promissory statements as to what will be done in the future give rise only to a claim for breach of contract, whereas false representations of present fact are what give rise to a separate claim for fraudulent inducement. *See* *id. at 89* (citing *Deerfield Commc'ns Corp. v. Chesebrough-Ponds, Inc., 68 N.Y.2d 954, 502 N.E.2d 1003, 1004, 510 N.Y.S.2d 88 (N.Y. 1986))*. There is at least one exception to this rule, however: even where representations relate "to something which was to occur in the future," they may constitute false representations of present fact if the defendant "has fraudulently and positively as with personal knowledge stated that something was to be done when he knew all the time it was not to be done and that his representations were false." *Sabo v. Delman, 3 N.Y.2d 155, 143 N.E.2d 906, 908, 164 N.Y.S.2d 714 (N.Y. 1957)*; *see also* *Deerfield, 502 N.E.2d at 1004*.

Plaintiffs bear a high burden as to fraudulent inducement claims, as they are subject to the strict pleading standards of *Fed. R. Civ. P. 9(b)*. *See* *Eaves v. Designs for Fin., Inc., 785 F. Supp. 2d 229, 246 (S.D.N.Y. 2011)*. Thus, the complaint "must specify the time, place, speaker, and content of the alleged misrepresentations, explain how the misrepresentations were fraudulent and plead those events which give rise to a strong inference that the defendant[ ] had an intent to defraud, knowledge of the **[*35]** falsity, or a reckless disregard for the truth." *Cohen v. S.A.C. Trading Corp., 711 F.3d 353, 359 (2d Cir. 2013)* (alteration in original).

Plaintiff asserts that after joining CGL, Jonathan Cuneo and other Defendants induced her to remain at the firm "for more than four years . . . by repeatedly indicating how successful the firm was, how wealthy the senior partners were, and how much money Plaintiff could expect when her cases paid off." *Id.* ¶¶ 171-72. But because Plaintiff entered into only one agreement with Defendants—her initial employment agreement—these allegations add little, except insofar as they provide context for statements made prior to her joining CGL. Later actions by Defendants could not have unlawfully induced her to join the firm.

Regarding her decision to join CGL, Plaintiff alleges that Jonathan "Cuneo boasted about CGL's law practice, the nature of its activities, and how successful and profitable the firm was. Cuneo touted how much money he and his partners were making and indicated that if Plaintiff were to join the firm she, too, would enjoy a lucrative practice." SAC ¶ 23. Cuneo, she alleges, also told her that if she joined the firm, her compensation would "exceed what she could earn at a conventional firm." *Id.* ¶ 24. **[*36]** In sum, Plaintiff claims that Cuneo and other Defendants induced her to "forego other potentially lucrative opportunities by promising that she could achieve a significantly higher income doing interesting, socially valuable work at CGL. *Id.* ¶ 170. Importantly, Plaintiff also alleges that "Defendants never intended to provide Plaintiff with the compensation to which she was entitled." *Id.* ¶ 173.

Many of these statements—those relating to CGL's profitability and the lucrativeness of Cuneo's practice, for instance—are representations of present fact and thus relevant to Plaintiff's fraudulent inducement claim. Nevertheless, as Defendants contend, they are best characterized as inactionable puffery. *See, e.g., Rombach v. Chang, 355 F.3d 164, 174-75 (2d Cir. 2004)* ("'[P]uffery' or 'misguided optimism' is not actionable as fraud."); *Cellular S. Inc. v. Merrill, Lynch, Pierce, Fenner & Smith, Inc., 516 F. App'x 30, 33 (2d Cir. 2013)* (citing same and affirming dismissal) (summary order).

Cuneo's comments regarding how much money Plaintiff would make if she worked at CGL, though also relevant to Plaintiff's fraudulent inducement claim, may similarly amount to mere puffery. *Sabo, 143 N.E.2d at 908*. Even if they do not, Plaintiff's allegations, while more particularized, nevertheless do not support an inference that Cuneo never intended to deliver on these promises or that he **[*37]** had a "reckless disregard for the truth" at the time of their making. *Cohen, 711 F.3d at 359*. Plaintiff thus cannot satisfy *Fed. R. Civ. P. 9(b)*'s heightened pleading standard.

It is true that Plaintiff alleges a systematic and purposeful effort to subvert and expropriate her work recruiting clients to CGL and developing novel legal theories on which to sue. She has alleged that on multiple occasions Defendants promised her work, but then cut deals that would assign the value of this work to others, unbeknownst to her, SAC ¶4 44-57; assigned other attorneys to manage cases she developed, *id.* 44 62-65; refused to give her credit for developing actionable legal theories, *id.* 4¶ 67-90; and filed lawsuits on the basis of theories she developed shortly after her termination from CGL, *id.* ¶¶ 95-98. Plaintiff, moreover, has alleged that it was Defendants—particularly the Cuneo Defendants—who benefitted from this subversion and expropriation. *Id.* 4¶ 44-98. These allegations, taken on their own, might suggest that Defendants never intended to deliver on those promises made to Plaintiff prior to her joining CGL.

But many of Plaintiff's other allegations evince no such ill intent, particularly those regarding her initial time at CGL. On her first day of work, **[*38]** for instance, Plaintiff was informed that she "would not in fact have to complete a trial period but rather would work full time under the 'standard deal' immediately," *id.* 4 32; she was "treated as a partner at CGL from the beginning," including regularly attending "partnership lunches," *id.* ¶¶ 33-34; and she was represented as a partner, and received at least some compensation as a consequence of these representations, from the beginning of her time at the firm until her termination on May 7, 2012, *see id.* 11 35-43, 217-226. Plaintiff, moreover, remained at CGL for nearly four years and departed, not over CGL's failure to fulfill Cuneo's promises to her, but because she was terminated. These allegations at least undermine Plaintiff's contention that Cuneo never intended to deliver on his promises to her.

When considered in their totality, Plaintiff's allegations do not sufficiently bolster her otherwise conclusory contention that "Defendants never intended to provide Plaintiff with the compensation to which she was entitled," *id.* 1 173, and thus do not satisfy the strict pleading standards of *Fed. R. Civ. P. 9(b)*. Defendants' motion to dismiss this claim is granted as to CGL. It is also granted as to Davidow, as Plaintiff has not alleged **[*39]** his involvement in inducing her to join the firm.

7. Plaintiff's State and City Human Rights Law Claims

Plaintiff alleges in Count Eight that Defendants discriminated against her on the basis of national origin and race in violation of New York State Human Rights Law, *N.Y. Exec. Law § 290, et seq.*, and New York City Human Rights Law, N.Y.C. Admin. Code *N.Y.C. Admin. Code § 8-101, et seq.* SAC 11 178-81. Plaintiff claims that Defendants violated each of these statutory provisions in two ways: by discharging her from CGL on the basis of her status as a member of a protected class, and by creating a hostile work environment. *Id.*

A plaintiff claiming employment discrimination need not "allege facts establishing each element of a prima facie case of discrimination to survive a motion to dismiss," and such claims are subject only to the pleading standards of *Fed. R. Civ. P. 8*. *E.E.O.C. v. Port Auth. of New York & New Jersey, 768 F.3d 247, 254 (2d Cir. 2014)*. Courts, however, look to the elements of a prima facie case for guidance in evaluating discrimination claims.

To establish a prima facie case of employment discrimination, a plaintiff must allege: "(1) [she] is a member of a protected class; (2) [she] was qualified for the position [she] held; (3) [she] suffered an adverse employment action; and (4) the adverse action took place under circumstances **[*40]** giving rise to [an] inference of discrimination." *Reynolds v. Barrett, 685 F.3d 193, 202 (2d Cir. 2012)* (setting out the framework first established by the Supreme Court in *McDonnell Douglas Corp. v. Green, 411 U.S. 792, 93 S. Ct. 1817, 36 L. Ed. 2d 668 (1973))*.[8]

Similarly, to establish a hostile work environment claim, a plaintiff "must show that the workplace is permeated with discriminatory intimidation, ridicule, and insult that is sufficiently severe or pervasive to alter the conditions of the victim's employment and create an abusive working environment." *Raspardo v. Carlone, 770 F.3d 97, 114 (2d Cir. 2014)* (quotation omitted) (citing *Harris v. Forklift Sys., Inc., 510 U.S. 17, 21, 114 S. Ct. 367, 126 L. Ed. 2d 295 (1993))*. Because "[i]solated instances of harassment ordinarily do not rise to this level," a plaintiff must "demonstrate either that a single incident was extraordinarily severe, or that a series of incidents were sufficiently continuous and concerted to have altered the conditions of her working environment." *Cruz v. Coach Stores, Inc., 202 F.3d 560, 570 (2d Cir. 2000)*. This is a totality of the circumstances inquiry. *Raspardo, 770 F.3d at 114*.

Defendants first argue that Plaintiff's claims under State and City Human Rights Law are **[*41]** statutorily precluded, as CGL at no time had more than four employees in New York State or New York City, as is required for an employer to fall within the ambit of these laws. Defs.' Mem. 25 (citing *N.Y. Exec. Law § 292(5)*; *N.Y.C. Admin. Code §8-102(5)*). Neither of the provisions cited by Defendants indicate that they are limited to employees within New York State or New York City, however, nor have Defendants identified any cases that stand for this proposition. Because Plaintiff has clearly alleged that she worked at CGL in New York and that CGL employed more than four employees in its interstate operations, CGL is subject to State and City Human Rights Law. Similarly, because Plaintiff has not properly alleged that she was a partner of CGL, the Court rejects Defendants' contention that Plaintiff cannot avail herself of the protection of these laws. *See* Defs.' Mem. 24. Nevertheless, Plaintiff has not met her burden as to her claim of discriminatory termination under State or City Human Rights Law.

As to her State Human Rights Law claims, Plaintiff has alleged she was a member of a protected class, that she was qualified for the position she held, and that she suffered an adverse employment action, namely, her termination **[*42]** from CGL. She has not properly alleged, however, that her termination took place under circumstances giving rise to an inference of discrimination. Her allegations, if true, suggest that Jonathan Cuneo made reprehensibly discriminatory comments related to Plaintiff's national origin, but not that discrimination played a role in her termination. Rather, as to her termination, her Second Amended Complaint mentions only that she was terminated for alleged misconduct in connection with her representation of a *pro se* litigant. SAC ¶¶ 112-31.

Plaintiff's claim of discriminatory termination is also barred under New York City Human Rights Law. Although New York City Human Rights Law is to be "construed liberally for the accomplishment of [its] uniquely broad and remedial purposes," *N.Y.C. Admin. Code §8-130*, a plaintiff must still allege that a defendant's "conduct is caused at least in part by discriminatory or retaliatory motives." *Mihalik, 715 F.3d at 113*. Because Plaintiff has not in any way linked her termination to Cuneo's discriminatory comments, she cannot satisfy even this more liberal pleading standard.

---

[8] "[C]ourts in this Circuit analyze discrimination claims brought under Title VII, [and] the New York Human Rights Law . . . in the same manner." *Tappe v. Alliance Capital Mgmt., L.P., 198 F. Supp. 2d 368, 372 (S.D.N.Y. 2001)*. Since a 2005 statutory revision, however, "courts must analyze [New York City Human Rights Law] claims separately and independently from any federal and state law claims." *Mihalik v. Credit Agricole Cheuvreux N. Am., Inc., 715 F.3d 102, 109 (2d Cir. 2013)*.

Plaintiff has, however, met her burden as to her hostile work environment claim under both State and City Human **[*43]** Rights Law. She alleges that Cuneo "repeatedly" insulted and harassed her on the basis of her national origin. SAC ¶¶ 99-104. The frequency with which these comments were made and the context in which they were delivered—in large, firm-wide meetings—support an inference that they were calculated to shame and embarrass Plaintiff, and that they altered the conditions of her work environment. The purported hostility of Plaintiff's work environment is exacerbated by CGL's alleged efforts to subvert and expropriate her work, as well as the many threats Plaintiff claims she received—including a June 27, 2012 request for her Green Card that Plaintiff claims was without "legal basis" or "valid reason." *Id.* ¶ 110.

Defendants' motion is granted as to Plaintiff's discriminatory termination claims, but denied as to Plaintiff's hostile work environment claims. Both claims are dismissed as to Davidow, however, as Plaintiff has not alleged that he made any discriminatory comments on the basis of national origin, or that any of his threats toward Plaintiff were motivated by such bias.

8. Plaintiff's Unfair Competition Claims

In Count Ten, Plaintiff alleges that Defendants unfairly competed with her by **[*44]** routinely expropriating her "hardwork/ideas/leads" for themselves, or by giving them to other CGL attorneys; by "deliberately and intentionally" filing cases on the basis of legal theories developed by Plaintiff after dismissing her from the firm; by doing so despite assurances that "no one [would] use her ideas/leads without her consent"; and by improperly keeping Plaintiff's e-mail account open, "with intent to contact potential clients and unfairly compete" after her termination. SAC ¶¶ 187-198.

"The essence of an unfair competition claim under New York law is that the defendant has misappropriated the labors and expenditures of another." *Saratoga Vichy Spring Co. v. Lehman, 625 F.2d 1037, 1044 (2d Cir. 1980)*. *See also Dior v. Milton, 9 Misc. 2d 425, 155 N.Y.S.2d 443, 451 (N.Y. Sup. Ct.) aff'd, 2 A.D.2d 878, 156 N.Y.S.2d 996 (N.Y. App. Div. 1956)* ("The general principle . . . is that commercial unfairness will be restrained when it appears that there has been a misappropriation, for the commercial advantage of one person, of a benefit or property right belonging to another.") "Central to this notion is some element of bad faith." *Saratoga Vichy Spring Co., 625 F.2d at 1044*. Courts also require that the commercial advantage or property that is misappropriated belong exclusively to the plaintiff. *See Bongo Apparel, Inc. v. Iconix Brand Grp., Inc., 18 Misc. 3d 1108(A), 856 N.Y.S.2d 22 (N.Y. Sup. Ct. 2008)*; *Miller v. Walters, 46 Misc. 3d 417, 997 N.Y.S.2d 237, 246 (N.Y. Sup. Ct. 2014)* (dismissing unfair competition claim where plaintiff sports management firm could not allege that misappropriated **[*45]** client was its property).

It is not clear, however, that the doctrine of unfair competition applies in the circumstances alleged here. Although the parties to an unfair competition claim need not be in direct competition with one another, *Dior, 155 N.Y.S.2d at 454*, Plaintiff has not cited any cases in which a viable claim has arisen between two agents of a single partnership, nor has the Court identified any such cases. Instead, the tort appears to be limited to conflicts between distinct commercial entities—two separate businesses in direct or indirect competition with one another. *See id.* (collecting cases). Even if it were possible to state a claim for unfair competition between two agents of a partnership, moreover, Plaintiff has not satisfied her burden here.

Plaintiff's Second Amended Complaint does allege considerable bad faith by CGL in the pervasive efforts by Jonathan Cuneo and other Defendants to subvert and expropriate Plaintiff's work. *See* SAC ¶¶ 44-98. She has also alleged that it was Defendants—particularly the Cuneo Defendants—who benefitted from this subversion and expropriation. *Id.* ¶¶ 44-98. Nevertheless, Plaintiff has not plausibly alleged that the clients and theories she brought to the **[*46]** firm were her property, and certainly not that these clients and theories were her *exclusive* property. Plaintiff's employment contract entitled her only to a percentage of those profits generated by the cases she originated or to which she otherwise contributed. The profits were to accrue to CGL and then be distributed to Plaintiff according to the precise terms of her employment agreement. In other words, Plaintiff was entitled—at most—to a contingent property interest in a fixed percentage of partnership profits. Thus, while CGL may have failed to pay Plaintiff the share of partnership profits to which she was entitled, it did not misappropriate property that was exclusively hers.

Defendants' motion to dismiss is thus granted as to Plaintiff's claim for unfair competition.

9. The RICO Claims

Lastly, in Count Thirteen, Plaintiff alleges that the Cuneo Defendans violated the RICO statute, and conspired to do the same. *See* 18 U.S.C. §§ 1962(a), (b) and (c), and 2. They did so, she alleges, by "falsely represent[ing] in numerous courts around the country that attorneys associated with CGL were 'partners' when the RICO Defendants and the involved attorneys knew that they were not in fact partners or members of CGL." SAC ¶ 216. **[*47]** Plaintiff also claims that the Cuneo Defendants invested the income they received from this scheme back into CGL, and that they "acquired and maintained an interest in CGL." *Id.* ¶ 235.

Plaintiff's RICO allegations fail to state a claim upon which relief can be granted. Defendants' motion to dismiss is therefore granted as to these claims.

Congress has provided a private right of action to "[a]ny person injured in his business or property by reason of a violation of section 1962." 18 U.S.C. § 1964. "To establish a RICO claim, a plaintiff must show: (1) a violation of the RICO statute, 18 U.S.C. § 1962; (2) an injury to business or property; and (3) that the injury was caused by the violation of Section 1962." De Falco v. Bernas, 244 F.3d 286, 305 (2d Cir. 2001) (quotation omitted). At bottom, however, all RICO claims—whether premised on a violation of Section 1962(a), (b), or (c)—require a showing that each defendant was engaged in a "pattern of racketeering activity." *See* Cruz v. FXDirectDealer, LLC, 720 F.3d 115, 120 (2d Cir. 2013) (reciting elements of a Section 1962(c) claim); Ouaknine v. MacFarlane, 897 F.2d 75, 83 (2d Cir. 1990) (reciting elements of a Section 1962(a) claim); Wood v. Inc. Vill. of Patchogue of New York, 311 F. Supp. 2d 344, 355 (E.D.N.Y. 2004) (reciting elements of a Section 1962(b) claim).

"Racketeering activity" encompasses a variety of state and federal offenses, enumerated in 18 U.S.C. § 1961(1), while a "pattern" of such activity requires at least two such predicate acts or offenses, 18 U.S.C. § 1961(5). Here, Plaintiff alleges that each of the Cuneo Defendants committed **[*48]** the following predicate acts in connection with the filing of fee applications in seven different federal court actions: obstruction of justice in violation of 18 U.S.C. § 1503; wire fraud in violation of 18 U.S.C. § 1341; and mail fraud in violation of 18 U.S.C. § 1333. Specifically, Plaintiff alleges certain CGL attorneys were represented as partners in fee applications submitted by the Cuneo Defendants, even though these attorneys were not actually partners. SAC ¶¶ 211-238. Plaintiff's allegations are insufficient.

To make out violations of the mail and wire fraud statutes, a plaintiff must allege: "(1) the existence of a scheme to defraud, (2) defendants' knowing participation in such a scheme, and (3) the use of wire or mail communications in interstate commerce in furtherance of that scheme." MLSMK Invs. Co. v. JP Morgan Chase & Co., 737 F. Supp. 2d 137, 142 (S.D.N.Y. 2010), *aff'd in part*, 431 F. App'x 17 (2d Cir. 2011), and *aff'd*, 651 F.3d 268 (2d Cir. 2011). The elements of a scheme to defraud, in turn, are: "(1) the existence of a scheme to defraud; (2) fraudulent intent on the part of the defendant; and (3) the materiality of the representations." Boritzer v. Calloway, No. 10 CIV. 6264 (JPO), 2013 U.S. Dist. LEXIS 11119, 2013 WL 311013, at *6 (S.D.N.Y. Jan. 24, 2013). Similarly, a plaintiff alleging obstruction of justice must allege, in part, "that the defendant acted with the wrongful intent or improper purpose to influence the judicial or grand jury proceeding, whether or **[*49]** not the defendant is successful in doing so—that is, that the defendant corruptly intended to impede the administration of that judicial proceeding." United States v. Quattrone, 441 F.3d 153, 170 (2d Cir. 2006) (quotation omitted).

Allegations of mail and wire fraud are subject to heightened pleading standards. *See* Fed. R. Civ. P. 9(b); Cruz, 720 F.3d at 120 n.2. Plaintiff has not met this standard. She has not properly alleged fraudulent intent on behalf of the Cuneo Defendants, nor has she properly alleged the "scheme to defraud" prerequisite to violations of the mail and wire fraud statutes, or the wrongful intent prerequisite to obstruction of justice.

Taken in its entirety, Plaintiff's Second Amended Complaint alleges only that CGL, like many firms, was comprised of what modern lawyers would refer to as equity partners—partners as defined under state partnership law—and non-equity partners, who possess the skills and qualifications necessary to command high billing rates, but who are not "partners" under state partnership law. *See, e.g.,* *In re GSC Grp., Inc., 502 B.R. 673, 735 n. 227 (Bankr. S.D.N.Y. 2013)* ("[T]wenty-first century law firms include equity partners, non-equity partners, contract partners, shareholders, associates, contract associates, counsel, of counsel, senior counsel, and the list goes on."). The Court simply cannot infer intent to defraud—or **[*50]** corrupt intent to impede judicial administration—from the disjuncture between the Flannery Defendants' disavowal of their status as partners, *see* SAC Ex. 11, and the fee applications filed by the Cuneo Defendants indicating that Plaintiff and the Flannery Defendants were partners.

In any event, Plaintiff has not properly alleged that she was injured by Defendants' purported racketeering conduct. *See* *28 U.S.C. § 1964(c)* (requiring personal injury to "business or property" as a prerequisite to a proper civil RICO action). *See also* *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 496, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985)* ("[P]laintiff only has standing if, and can only recover to the extent that, he has been injured in his business or property by the conduct constituting the violation."). Thus, Plaintiff's allegation that the courts approving Defendants' fee applications were injured is insufficient. And although Plaintiff has also asserted that, "[a]s a result of" these fee applications, Defendants "expropriated for themselves fees and other economic benefits properly belonging" to her, SAC ¶ 231, these injuries were not proximately caused by Defendants' alleged violations of the RICO statute. *See* *Anza v. Ideal Steel Supply Corp., 547 U.S. 451, 462, 126 S. Ct. 1991, 164 L. Ed. 2d 720 (2006)*. ("[A] claim is cognizable under *§ 1964(c)* only if the defendant's alleged violation proximately caused the plaintiff's **[*51]** injury."); *Holmes v. Sec. Investor Prot. Corp., 503 U.S. 258, 268, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)*.

Here, the economic benefits to which Plaintiff was entitled under her employment contract did not turn on her classification in fee applications; Defendants could just as easily have expropriated those benefits had they classified her as an associate or counsel. Thus, although her classification as partner may have enabled the Defendants to garner fees higher than they may otherwise have been entitled to, Plaintiff has not alleged the direct relationship between Defendants' fee applications and her conduct that RICO's proximate causation requirement demands. *Anza, 547 U.S. at 461* ("When a court evaluates a RICO claim for proximate causation, the central question it must ask is whether the alleged violation led directly to the plaintiff's injuries.").

Because Plaintiff has not plausibly alleged that Defendants engaged in the racketeering activity prerequisite to any violation of the RICO statute, or that she was harmed within the meaning of this statute, her RICO claims are dismissed. As Plaintiff's RICO claims were the sole remaining claims pending against the Cuneo Defendants, these Defendants are now dismissed from this action.

CONCLUSION

For the reasons stated, Defendants' motion to dismiss **[*52]** is granted in part and denied in part, as follows:

- Plaintiff's RICO claims are dismissed, as are her state-law claims for breach of fiduciary duty, unjust enrichment, unfair competition, fraudulent inducement, and discriminatory termination under State and City Human Rights Law.
- Plaintiff's breach of contract, breach of the implied covenant, and hostile work environment claims under State and City Human Rights Law survive.
- Because none of these remaining claims are properly asserted against Davidow, however, he is dismissed from this action, as are the Cuneo Defendants, and the remaining Flannery Defendants.

The Clerk of Court is requested to close the motion pending at Dkt. 51, and to terminate all parties from the case but for Cuneo Gilbert & LaDuca LLP. The Court will hold a status conference in this matter on Thursday, July 30, 2015 at 10:00 a.m. No later than July 23, 2015, the parties shall submit to the Court a revised case management plan and a joint letter as to the status of discovery.

SO ORDERED.

Opinion

Appeal by Plaintiff from order entered 30 June 2014 by Judge James M. Webb in Moore County Superior Court. Heard in the Court of Appeals 22 April 2015.

STEPHENS, Judge.

Plaintiff Harvey D. Kohn, M.D., ("Dr. Kohn") appeals from the trial court's order granting summary judgment to Defendant FirstHealth of the Carolinas, Inc., ("FirstHealth") on Dr. Kohn's claim that FirstHealth acted arbitrarily and capriciously in denying his application for staff privileges at Moore Regional Hospital. Dr. Kohn also argues that the trial court erred in granting FirstHealth's motion to dismiss his claims for monopolization, attempted monopolization, and discrimination on the basis of national origin and ethnicity. After thorough review, we hold that the trial court did not err and we consequently affirm its orders.

I. Facts and Procedural History

Dr. Kohn is a medical **[*2]** doctor specializing in obstetrics and gynecology ("OB/GYN"). He is a native of Canada, and he earned his medical degree from the University of Toronto Faculty of Medicine in 1972 before completing his internship and residency in OB/GYN at McMaster University in Hamilton, Ontario in 1977 and becoming a Fellow of the Royal College of Surgeons of Canada in 1978. Dr. Kohn has been continually licensed by the North Carolina State Medical Board since 31 July 1993, and he obtained his board certification from the American Board of Obstetrics and Gynecology in 2006. Dr. Kohn is an official visiting clinician at the University of North Carolina Memorial Hospital and currently holds staff privileges at Scotland Memorial Hospital in Laurinburg. Many of Dr. Kohn's patients reside in Moore County and other nearby communities, and Defendant FirstHealth's Moore Regional Hospital, which is the only secondary care hospital with full surgical specialty facilities in Moore County, is their hospital of choice.

In 1999, Dr. Kohn applied for staff privileges at Moore Regional Hospital. However, in a letter dated 3 November 1999, FirstHealth notified Dr. Kohn that it could not accept his application because **[*3]** the pre-application screening it conducted revealed that Dr. Kohn did not satisfy the provision in FirstHealth's Medical Staff Bylaws that requires all members of its medical staff to have successfully completed "a residency program in the planned practice specialty, approved by the Accreditation Council for Graduate Medical Education (ACGME)."[1] The ACGME was established in 1981 and is a "private professional organization with the responsibility for ensuring the quality of approximately 8,400 accredited residency and fellowship programs in 121 specialty and subspecialty areas of medicine" in the United States and Puerto Rico. Prior to 1981, the ACGME performed essentially the same function but was known as the Liaison Committee for Graduate Medical Education ("LCGME").[2] The Joint Commission for

---

[1] We note here that there is some conflict between the record in the present case and the procedural history given in this Court's prior opinion addressing Dr. Kohn's earlier lawsuit against FirstHealth. As discussed *infra*, in *Kohn v. FirstHealth of the Carolinas, Inc., 229 N.C. App. 19, 747 S.E.2d 395 (2013)* ("*Kohn I*"), we rejected Dr. Kohn's argument that the trial court had erred in dismissing his claim that FirstHealth violated our State's public utility doctrine in denying his application for staff privilges. Our opinion in that case stated that FirstHealth "did not accept [Dr. Kohn's 1999 application for staff privileges] because he lacked certification by the American Board of Obstetrics and Gynecology." *Id. at 20, 747 S.E.2d at 396*. In the present case, although Dr. Kohn reiterates this claim, the only evidence in the record to support it is his own deposition testimony that after FirstHealth returned his 1999 application, an unidentified female employee in the hospital's medical staff office told him that the reason for his rejection was his lack of board certification. On the other hand, the record in this case does include a copy of the 3 November 1999 letter **[*5]** that FirstHealth sent Dr. Kohn which makes no reference whatsoever to board certification but instead explicitly states that his application was denied because his McMaster University residency was not accredited by the ACGME.

[2] According to FirstHealth's Medical Staff Services and Regulatory Director Jeanenne Watters, FirstHealth recognizes LCGME approval as the functional equivalent to ACGME approval, and thus "[f]or physicians who completed residency training prior to 1981 [when LCGME was renamed ACGME], our office confirms whether residency training was approved by the same body." Watters conducted a review of every physician who completed their residency before 31 December 1981 and joined Moore Regional Hospital's medical staff after the ACGME requirement was adopted in 1995. Watters found that there were a total of

Accreditation of Hospitals requires that each hospital's bylaws include qualifications for appointment to its medical staff, and for approximately 20 years, FirstHealth has relied on its ACGME requirement for granting staff privileges because, according to Moore Regional Hospital's Chief Medical Officer John F. Krahnert, Jr., it provides "an objective, neutral, and uniform measure of a physician's **[*4]** education and training and serves an important quality-assurance process by helping to ensure safe and effective patient care."

On 16 November 2010, Dr. Kohn resubmitted his hospital staff privileges application to FirstHealth. Upon receiving it, FirstHealth's Medical Staff Coordinator Fay C. Meginnis contacted McMaster University and confirmed that its **[*6]** OB/GYN residency program is not accredited by the ACGME but is instead certified by the Royal College of Canada. On 9 December 2010, Meginnis sent Dr. Kohn a letter stating that his staff privileges application had been denied because he did not "meet the minimum qualifications as stipulated in the Medical Staff Bylaws of having completed a residency program in the planned practice specialty, approved by the [ACGME]." On 11 January 2011, Dr. Kohn sent a letter protesting the denial of his application, arguing that his McMaster University residency program was equivalent to a residency approved by the ACGME, and that his residency program had been "recognized" by the ACGME so FirstHealth should consider it sufficient to satisfy its bylaws. In a letter dated 25 January 2011, Watters informed Dr. Kohn that FirstHealth interpreted the word "approved" in its bylaws to mean "accredited," rather than merely "recognized." Watters subsequently confirmed with the ACGME that it "does not accredit[,] nor has it ever accredited" McMaster University's OB/GYN residency program because "[t]he ACGME solely accredits residency programs within the United States and Puerto Rico." Additional complaints Dr. **[*7]** Kohn filed with FirstHealth led to a review of the decision to deny his application by the hospital's Credentials Committee and its Medical Executive Committee, which both agreed that Dr. Kohn did not meet the minimum standards set forth in the Medical Staff Bylaws. Moreover, the hospital's Medical Staff Bylaws Committee, Medical Executive Committee, and Board of Trustees each considered whether to amend the Medical Staff Bylaws but ultimately declined to do so.

On 19 January 2012, Dr. Kohn and two of his patients filed a complaint against FirstHealth in Moore County Superior Court asserting six causes of action, including monopolization, attempted monopolization, violation of North Carolina's public utility doctrine, combination in restraint of trade, violation of NAFTA, and arbitrary and capricious conduct. When the trial court granted FirstHealth's motion to dismiss Dr. Kohn's claims under NAFTA and North Carolina's public utility doctrine by written order entered 27 July 2012, Dr. Kohn voluntarily dismissed all remaining claims and appealed the dismissal of his public utility claim to this Court. In *Kohn I*, we affirmed the trial court's decision, reasoning that even taking Dr. Kohn's **[*8]** allegations as true, "nothing in either our General Statutes or the decisions of our Courts support[s] classifying [FirstHealth] as a public utility." 229 N.C. App. at 22, 747 S.E.2d at 397.

On 27 September 2013, Dr. Kohn filed a second complaint in Moore County Superior Court in which he reasserted his claims against FirstHealth for monopolization, attempted monopolization, and arbitrary and capricious conduct, and also added a new claim for discrimination based on national origin and ethnicity. On 18 November 2013, FirstHealth answered and moved to dismiss Dr. Kohn's second complaint. By order entered 11 February 2014, the trial court granted this motion as to the claims for monopolization, attempted monopolization, and discrimination, but denied FirstHealth's motion to dismiss Dr. Kohn's claim for arbitrary and capricious conduct. The parties filed cross-motions for summary judgment on the arbitrary and capricious conduct claim and, after a hearing held on 23 June 2014, the trial court entered an order on 30 June 2014 granting FirstHealth's motion for summary judgment and denying Dr. Kohn's motion. On 14 July 2014, Dr. Kohn gave notice of appeal to this Court. On 12 February 2015, FirstHealth filed a motion to dismiss Dr. Kohn's **[*9]** appeal as moot, which we address *infra*.

II. Analysis

---

seven such physicians, each of whom "completed a residency training program approved by the ACGME, even if that was prior to the 1981 name change."

A. Arbitrary and capricious conduct

(1) FirstHealth's motion to dismiss

Before reaching the substance of Dr. Kohn's claims, we must first address FirstHealth's motion to dismiss this appeal as moot. Specifically, FirstHealth contends that Dr. Kohn has already received the only relief he is entitled to under North Carolina law. We disagree.

Section 131E-85 of our General Statues provides that

> [t]he granting or denial of privileges to practice in hospitals to physicians . . . and the scope and delineation of such privileges shall be determined by the governing body of the hospital on a non-discriminatory basis. Such determinations shall be based upon the applicant's education, training, experience, demonstrated competence and ability, and judgment and character of the applicant, and the reasonable objectives and regulations of the hospital, including, but not limited to appropriate utilization of hospital facilities, in which privileges are sought. Nothing in this Part shall be deemed to mandate hospitals to grant or deny to any such individuals or others privileges to practice in hospitals, or to offer or provide any type of care.

N.C. Gen. Stat. § 131E-85(a) (2013).

This Court has recognized that "the **[*10]** operation of a hospital, whether publicly or privately owned, is subject to State regulation." *Claycomb v. HCA-Raleigh Cmty. Hosp., 76 N.C. App. 382, 385, 333 S.E.2d 333, 335 (1985)*, *disc. review denied*, *315 N.C. 586, 341 S.E.2d 23 (1986)*. However, "the State's involvement in the operation of a hospital should extend only to the point of insuring that the community's medical needs are met." *Id. at 385, 333 S.E.2d at 335-36*. Thus, we held in *Claycomb* that because "the right to enjoy staff privileges is not absolute, but is subject to the standards and objectives set by the hospital's governing body," section 131E-85 allows for judicial review on the narrow question of whether the hospital's decision to deny staff privileges was reasonable. *Id. at 385, 333 S.E.2d at 336*; *see also* *Cameron v. New Hanover Memorial Hosp., Inc., 58 N.C. App. 414, 449, 293 S.E.2d 901, 922* (recognizing that "[n]o court should substitute its [judgment] for that of the [h]ospital [b]oard . . . which is charged with the responsibility of providing a competent staff of doctors . . . so long as staff selections are administered with fairness, geared by a rationale compatible with hospital responsibility, and unencumbered with irrelevant considerations") (citation omitted), *appeal dismissed and disc. review denied*, *307 N.C. 127, 297 S.E.2d 399 (1982)*. Accordingly, this Court's review of whether a denial of staff privileges was arbitrary, capricious or discriminatory is based on our determination of whether the hospital's decision "was: (1) not reasonably **[*11]** related to the operation of the hospital; (2) not rationally compatible with the hospital's responsibility; or (3) based on irrelevant considerations." *Claycomb, 76 N.C. App. at 386, 333 S.E.2d at 336*. If a reviewing court determines that a hospital's decision to deny an application for staff privileges was unreasonable, section 131E-85 entitles the applicant "to have his application for staff privileges reviewed and a decision, granting or denying him staff privileges, based on the other criteria provided in the statute such as his education, training, experience, demonstrated competence and . . . character." *Id.* (citation and internal quotation marks omitted).

In support of its motion to dismiss Dr. Kohn's appeal as moot, FirstHealth argues that it has already reviewed Dr. Kohn's application and rejected it twice due to his not having completed a residency accredited by the ACGME—which, as the statute requires, relates to his "education, training, [and] experience." Thus, FirstHealth contends that even if this Court were to determine that the denial of Dr. Kohn's staff privileges application was arbitrary and capricious, the terms of section 131E-85 make clear that the appropriate remedy would be for FirstHealth to review Dr. Kohn's application again, which **[*12]** FirstHealth implies would not impact the ultimate result here because FirstHealth has no intention of amending its bylaws or making an exception to them for Dr. Kohn's benefit. In short, FirstHealth argues that there is simply nothing this Court could order that would have any practical effect on Dr. Kohn's application for staff privileges, therefore rendering this appeal moot. This argument fundamentally misapprehends the function of judicial review under section 131E-85 and is wholly devoid of merit. Put simply, if this Court were to determine that FirstHealth used its ACGME-accredited residency requirement to arbitrarily and capriciously deny staff privileges to Dr. Kohn, then Dr. Kohn would be entitled to have FirstHealth reassess his application based on the terms of the statute, rather than on the basis of a requirement that this Court would have already declared unreasonable. Consequently, FirstHealth's motion to dismiss is denied.

(2) Dr. Kohn's appeal

Dr. Kohn argues first that the trial court erred in granting FirstHealth's motion for summary judgment because the denial of his application for staff privileges based on his lack of a residency accredited by the ACGME constituted arbitrary and **[*13]** capricious conduct in violation of *section 131E-85*. We disagree.

We review *de novo* a trial court's decision to grant or deny a motion for summary judgment, focusing on

> whether there is any genuine issue of material fact and whether the moving party is entitled to a judgment as a matter of law. Summary judgment is proper if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that any party is entitled to a judgment as a matter of law.

Hyatt v. Mini Storage on Green, 236 N.C. App. 278, 281, 763 S.E.2d 166, 169 (2014) (citations and internal quotation marks omitted).

Dr. Kohn offers several related arguments in support of his position and their primary thrust is that FirstHealth's requirement that applicants complete a residency accredited by the ACGME is not reasonably related to the operation of the hospital and is instead based on irrelevant considerations. However, many of Dr. Kohn's arguments revolve around misstatements of fact, or law, or both, and we do not find any of them persuasive.

On the one hand, Dr. Kohn relies heavily on this Court's prior decision in *Cameron*. There, we reviewed claims by two podiatrists that the defendant hospital's decision **[*14]** to deny their applications for full staff privileges based on their inability to satisfy the requirements in the hospital's bylaws that applicants complete a one-year residency and be Fellows in the American College of Foot Surgeons, as well as board-eligible pursuant to certification from the American Board of Podiatric Surgery, was arbitrary and capricious. *58 N.C. App. at 448, 293 S.E.2d at 921*. Dr. Kohn contends that *Cameron* established that "a requirement of certification by any particular society as a mandatory prerequisite for the right of a duly licensed physician to practice his profession in a public hospital is illegal, arbitrary, capricious and beyond the jurisdiction of the governing body of the hospital." *Id. at 450, 293 S.E.2d at 922* (citation omitted). Thus, Dr. Kohn argues that FirstHealth's use of the ACGME as the basis for granting or denying staff privileges flatly violates our existing case law and ignores the *Cameron* Court's recognition that "specialty board certification or eligibility is an excellent benchmark to serve as the basis for [staff] privilege delineation." *Id. at 449-50, 293 S.E.2d at 922* (citation, internal quotation marks, and ellipsis omitted). However, Dr. Kohn's argument is fatally undermined by the fact that it utilizes selective quotations **[*15]** out of context in order to wholly mischaracterize *Cameron*'s reasoning and result. Indeed, while the quoted language Dr. Kohn emphasizes comes from a portion of the opinion that surveyed approaches adopted by other courts in different states, his argument ignores the fact that we ultimately ruled in favor of the defendant hospital based on our holding that "[i]t is not arbitrary, capricious, and discriminatory to [deny staff privileges to physicians who] have been unable to comply with the standards properly established by the [hospital]." *Id. at 452, 293 S.E.2d at 923*. This argument is without merit.

Dr. Kohn also argues that FirstHealth's ACGME-based standard is being unfairly applied to him. Specifically, Dr. Kohn complains that FirstHealth has previously made exceptions to its residency requirement but has refused to do so in his case because its accreditation committee is chaired by the head of an OB/GYN practice that competes against Dr. Kohn for patients in Moore County. In support of this argument, Dr. Kohn cites *Cowan v. Gibson, 392 S.W.2d 307 (Mo. 1965)*, *receded from by* *Egan v. St. Anthony's Med. Ctr., 244 S.W.3d 169 (Mo. 2008)*, which he contends establishes that a physician's rights are violated when he is denied staff privileges by a committee dominated by a competitor. Here again, Dr. Kohn's argument **[*16]** relies on distortions of the legal authority he cites. First, Dr. Kohn makes no mention of the fact that, until recently, *Cowan*'s holding was widely construed to stand for the proposition that, under Missouri law, "there may be no judicial review of the staffing decisions of private hospitals," *see Egan, 244 S.W.3d at 169*. Moreover, although Missouri's Supreme Court did hold that the plaintiff doctor in *Cowan* whose staff privileges were revoked due to what he alleged was a conspiracy could state a cause of action for relief, the Court made clear that the action would not be against the hospital itself but instead against individual physicians on its medical staff who, acting in their own personal professional capacities and "outside the operation and government of the hospital," undertook deliberate acts to interfere with the plaintiff's business and livelihood for their own financial gain. *392 S.W.2d at 309*. Dr. Kohn makes no similar allegations, and our review of the record compels our conclusion that *Cowan* is inapposite to the present facts.

While Dr. Kohn complains that FirstHealth has previously made exceptions and granted staff privileges to several other physicians who completed their residencies prior to 1981 when **[*17]** the ACGME was formally established, his argument overlooks the fact that in all but two of those cases, the applicant had completed a residency accredited by the ACGME's predecessor organization, the LCGME. Further, while Dr. Kohn appears to be correct in claiming that FirstHealth granted staff privileges on two occasions to physicians whose residencies were neither ACGME- nor LCGME-accredited, the record indicates that these actions resulted from inadvertent oversights that occurred in the mid-1990s and that since then, FirstHealth has consistently applied its ACGME-based requirement to all applicants for staff privileges. Finally, despite his protests that his application was rejected due to a conflict of interest with the chair of FirstHealth's accreditation committee, Dr. Kohn cites no evidence or authority to support the notion that FirstHealth's bylaws provide any degree of discretion in applying the ACGME requirement. Indeed, as already noted, the record indicates the ACGME requirement has been consistently applied to every applicant for staff privileges since before Dr. Kohn first applied for privileges in 1999.

Dr. Kohn argues further that FirstHealth's decision to deny him **[*18]** staff privileges was arbitrary and capricious because his Canadian residency is functionally equivalent to a residency accredited by the ACGME, and because many prominent American hospitals regularly grant staff privileges to Canadian-trained physicians. This argument fails because it ignores both the plain language of *section 131E-85* and the broad deference this Court affords to hospital boards in making staff privileges determinations. As our decisions in *Cameron* and *Claycomb* made clear, *section 131E-85* requires that such decisions be (1) reasonably related to the hospital's operation; (2) rationally compatible with the hospital's responsibility; and (3) not based on irrelevant considerations. We are not persuaded by Dr. Kohn's insistence that FirstHealth is basing its determinations on irrelevant considerations because a requirement that residencies be accredited by the ACGME effectively bars physicians not trained in the U.S. or Puerto Rico from obtaining staff privileges. The plain language of *section 131E-85* provides that "education, training, [and] experience" are relevant considerations in these determinations, and our review of the record confirms that the ACGME functions as an objective measure of those statutorily **[*19]** enumerated criteria that FirstHealth relies on to assure its hospital is staffed with well-trained, high-quality physicians. The gravamen of Dr. Kohn's complaint is that he would prefer that FirstHealth apply a different standard to his application, but that is not what our law requires. Therefore, because FirstHealth's residency requirement is reasonably related to the hospital's operation, rationally compatible with the hospital's responsibilities, and consistently applied based on considerations made relevant by the plain language of *section 131E-85*, we hold that the trial court did not err in granting FirstHealth's motion for summary judgment.

B. Monopolization and attempted monopolization

Dr. Kohn argues next that the trial court erred in granting FirstHealth's motion to dismiss his second complaint's claims for monopolization and attempted monopolization. We disagree.

When considering a motion to dismiss under *Rule 12(b)(6) of the Rules of Civil Procedure*,

> [t]he question for the court is whether, as a matter of law, the allegations of the complaint, treated as true, are sufficient to state a claim upon which relief may be granted under some legal theory, whether properly labeled or not. The court must construe the complaint liberally and should **[*20]** not dismiss the complaint unless it appears beyond a doubt that the plaintiff could not prove any set of facts to support his claim which would

> entitle him to relief. This Court must conduct a *de novo* review of the pleadings to determine their legal sufficiency and to determine whether the trial court's ruling on the motion to dismiss was correct.

Leary v. N.C. Forest Prods., Inc., 157 N.C. App. 396, 400, 580 S.E.2d 1, 4 (citations and internal quotation marks omitted), *affirmed*, *357 N.C. 567, 597 S.E.2d 673 (2003)*.

Here, Dr. Kohn argues that his complaint stated a valid claim for violation of *section 75-2.1 of our General Statutes*, which makes it unlawful "for any person to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons to monopolize, any part of trade or commerce in the State of North Carolina." *N.C. Gen. Stat. § 75-2.1* (2013). Specifically, in both of his complaints, Dr. Kohn has contended that FirstHealth

> has a monopoly on the provision of surgical care and other care requiring hospitalizations that extends to the entirety of Moore County, North Carolina, and beyond, on the basis of the essential facility doctrine, in that its hospital has a natural monopoly and its hospital facilities are essential for the practice of physicians and surgeons who perform medical procedures that are required to be performed **[*21]** in hospitals.

In his appellant brief, Dr. Kohn suggests that the essential facility doctrine creates an automatic and absolute duty that prohibits FirstHealth from denying admission to competitors of its existing staff members on a discriminatory basis. In support of this argument, Dr. Kohn relies heavily on an ***antitrust law*** treatise and also cites the United States Supreme Court's prior holdings in *United States v. Terminal R.R. Ass'n of St. Louis, 224 U.S. 383, 32 S. Ct. 507, 56 L.Ed. 810 (1912)* and *Associated Press v. United States, 326 U.S. 1, 65 S. Ct. 1416, 89 L.Ed. 2013 (1945)*.

However, this argument is without merit insofar as it fails to cite any controlling or relevant authority to support Dr. Kohn's claim that the essential facility doctrine applies in this case or even exists as a distinct legal concept under North Carolina law. Indeed, Dr. Kohn appears to borrow the term "essential facility" from Chapter 62 of our General Statutes, which governs public utilities. *See* *N.C. Gen. Stat. § 62-110(f1)* (2013). However, this Court's prior holding in *Kohn I* made absolutely clear that FirstHealth is not a public utility. *See* *229 N.C. App. at 21, 747 S.E.2d at 397*. Consequently, the essential facility doctrine cannot apply to the present facts. We therefore hold that the trial court did not err in dismissing Dr. Kohn's claims for monopolization and attempted monopolization.

C. Discrimination on the basis of national origin and ethnicity

Finally, Dr. Kohn argues **[*22]** that the trial court erred in granting FirstHealth's motion to dismiss his second complaint's claim for discrimination on the basis of national origin and ethnicity. We disagree.

It is well established under North Carolina law that the doctrine of *res judicata* precludes a litigant from bringing a second lawsuit in order to re-litigate issues "that were or should have been adjudicated in the prior action." *Whitacre P'ship v. Biosignia, Inc., 358 N.C. 1, 15, 591 S.E.2d 870, 880 (2004)* (citation omitted). The doctrine applies when there is: "(1) a final judgment on the merits in an earlier suit, (2) an identity of the causes of action in both the earlier and the later suit, and (3) an identity of the parties or their privies in the two suits." *Moody v. Able Outdoor, Inc., 169 N.C. App. 80, 84, 609 S.E.2d 259, 262 (2005)*. Under *res judicata*, "all matters, either fact or law, that were or should have been adjudicated in the prior action are deemed concluded." *Thomas M. McInnis & Assocs., Inc. v. Hall, 318 N.C. 421, 428, 349 S.E.2d 552, 556 (1986)* (citations omitted). "[S]ubsequent actions which attempt to proceed by asserting a new legal theory or by seeking a different remedy are prohibited under the principles of *res judicata,"* *Bockweg v. Anderson, 333 N.C. 486, 494, 428 S.E.2d 157, 163 (1993)*, because "the judgment in the former action or proceeding is conclusive in the latter not only as to all matters actually litigated and determined, but also as to all matters which could properly have been litigated **[*23]** and determined in the former action or proceeding." *Fickley v. Greystone Enters., Inc., 140 N.C. App. 258, 260, 536 S.E.2d 331, 333 (2000)* (citation omitted). Therefore, "[a] party is required to bring forth the whole case at one time and will not be permitted to split the claim or divide the grounds for recovery[.]" *Rodgers Builders, Inc. v. McQueen, 76 N.C. App. 16, 23, 331 S.E.2d 726, 730 (1985)*, *disc. review denied*, *315 N.C. 590, 341 S.E.2d 29 (1986)*.

In the present case, we easily conclude that all three of the elements required to trigger the application of *res judicata* are satisfied. As to the first element, our opinion in *Kohn I* constituted a final judgment on the merits of Dr. Kohn's claim against FirstHealth under the public utility doctrine, as well as his claim for violation of NAFTA, which Dr. Kohn did not appeal after the trial court dismissed it with prejudice. As to the third element, there is an identity of parties here because both Dr. Kohn's first complaint and his present lawsuit were brought against FirstHealth.[3] The second element is also satisfied, given that Dr. Kohn's claim for discrimination on the basis of national origin and ethnicity was not included in his first action but arises from the same facts and circumstances—*i.e.*, FirstHealth's denial of his application for staff privileges—that all the claims in his first action were predicated upon. Thus, unlike **[*24]** his claims for monopolization, attempted monopolization, and arbitrary and capricious conduct, which were brought in Dr. Kohn's first action against FirstHealth but were voluntarily dismissed before the case reached a final judgment on the merits, Dr. Kohn's claim for discrimination in the present case is barred by *res judicata. See, e.g., Rodgers Builders, Inc., 76 N.C. App. at 23, 331 S.E.2d at 730*. Accordingly, we hold that the trial court did not err in granting FirstHealth's motion to dismiss Dr. Kohn's claim for discrimination on the basis of national origin and ethnicity.

AFFIRMED.

Judges STEELMAN and MCCULLOUGH concur.

Report per Rule 30(e).

Judge Steelman concurred in this opinion prior to 30 June 2015.

End of Document

[3] We note that although *Kohn I* also involved claims by two of Dr. Kohn's patients who do not appear as parties in this case, for purposes of *res judicata*, "[i]t is not necessary that precisely the same parties were plaintiffs and defendants in the two suits; provided the same subject in controversy, between two or more of the parties has been directly in issue in the former suit." *Green v. Dixon, 137 N.C. App. 305, 309, 528 S.E.2d 51, 55* (citation and internal quotation marks omitted), *affirmed per curiam*, *352 N.C. 666, 535 S.E.2d 356 (2000)*.

Opinion

MEMORANDUM AND ORDER

This matter is before the Court on the following motions: Defendant Express Scripts' Motion to Dismiss Plaintiffs' First Amended Complaint ("FAC") (Doc. No. 129); Defendant Express Scripts' Motion to Dissolve the Temporary Restraining Order (Doc. No. 153); Defendant Express Scripts' Motion for Temporary Stay of Discovery and Protective Order (Doc. No. 157); and Plaintiffs' Motion for Civil Contempt. (Doc. No. 169) The motions are fully briefed and ready for disposition. The Court held a hearing on the motions on April 22, 2015.

I. Background

Plaintiff HM Compounding Services, LLC, is an independent compounding pharmacy that provides customized medications to patients. Plaintiff HMX Services, LLC, is HM Compounding Services, LLC's New Jersey affiliated pharmacy. (Plaintiffs are collectively referred to herein as "HMC"). Defendant Express Scripts, Inc. ("ESI") is a prescription benefit manager ("PBM"). PBMs administer the prescription pharmaceutical portion of health care benefit programs, which are typically purchased by a **[*3]** plan sponsor. The parties' relationship is governed by a Pharmacy Provider Agreement entered into by and between ESI and Wholesale Alliance, LLC d/b/a Third Party Station on behalf of HMC (the "Provider Agreement"), pursuant to which HMC agreed to provide certain pharmacy services to ESI members in exchange for ESI's agreement to compensate HMC for those pharmacy services.

By letter dated July 22, 2014, HMC informed ESI it had become aware that ESI was directly notifying providers that they were not to continue prescribing compounded medications even if it was in the patient's best interest to receive them. Seven days later, on July 31, 2014, ESI sent HMC a "notice of immediate termination" of the Provider Agreement, effective September 1, 2014, based on alleged misrepresentations made by HMC to ESI regarding "waiver/reduction" of patients' copayments. By letter dated August 1, 2014, ESI responded to HMC's July 22, 2014 letter. In that letter, ESI did not deny making such statements to prescribing physicians; rather, it took the position that ESI "has a legal right to communicate with providers regarding benefit coverage issues." (FAC, Doc. No. 126 at ¶ 110)

HMC brought this action on **[*4]** September 10, 2014 in the Supreme Court of the State of New York, County of Nassau.[1] On September 11, 2014, the New York State Court entered a temporary restraining order (the "State Court TRO") ordering ESI to "reinstate in full force and effect nunc pro tunc" "the Network Pharmacy Agreement dated September 5, 2012, entered into by and between HMC and Wholesale Alliance TPS, LLC d/b/a/ Third Party Station on behalf of Third Party Payer ESI" (see Doc. No. 23-2 at 4 ¶ (e)), and enjoining ESI from, among other things, "refusing to process and pay claims for payment submitted by HMC for compounded medications prescribed by physicians for their patients who have prescription drug benefits administered by [ESI]." (Id. at 3 ¶ (b))

The next day ESI removed the case to the United States District Court for the Eastern District of New York. The parties consented to extend the State Court TRO until a determination of pending motions to transfer venue. On October 3, 2014, the New York District Court vacated the State Court TRO and entered a second temporary restraining order (the **[*5]** "Federal Court TRO") enjoining Express Scripts from "refusing to process and/or pay claims submitted by [HMC] for the payment of prescriptions dated on or after September 11, 2014, or for the refill of an existing refillable prescription after September 11, 2014, for compounded medications prescribed by licensed physicians for their patients, which had heretofore been covered by their insurance." (Doc. No. 70 at 3 ¶ (b)) The District Court further ordered upon agreement of the parties that the TRO remain in full force and effect until a hearing on the preliminary injunction. (Id. at 4)

On October 27, 2014, the New York District Court severed HMC's claims against ESI and transferred them to this Court. (Doc. No. 108 at 54) The New York Court ruled that that part of the Federal TRO applicable to HMC is extended until such time as the respective arbitrator hears and determines any application for injunctive relief and that any requests to revisit the terms should be directed to the appropriate arbitrator, or, with respect to ESI, the federal district court in Missouri. (Id. at 59)

On December 1, 2014, HMC filed its FAC asserting eleven causes of action against ESI:

i) a violation of the Sherman Act, *15 U.S.C. § 1*;

ii) **[*6]** a violation of New York ***Antitrust Law***, New York General Business Law § 340.1 (Donnelly Act);

iii) a claim for benefits under *ERISA § 502(a)(1)(B)*, *29 U.S.C. § 1132(a)(1)(B)*;

iv) a claim for injunctive relief under *ERISA § 502(a)(3)*, *29 U.S.C. § 1132(a)(3)*;

v) a claim for deceptive trade practices, in violation of *New York General Business Law § 349*;

vi) a claim for violation of New Jersey's "Any Willing Provider" Laws, *N.J.S.A. §§ 17B:26-2.1i*, *17B:27-46.1i*;
vii) a claim for breach of contract;
viii) a claim for breach of the implied covenant of good faith and fair dealing;
ix) a claim for tortious interference with a business expectancy;
x) a claim for declaratory relief; and
xi) a claim for preliminary and permanent injunction.

II. Discussion

---

[1] The procedural history of the case is set out in the transferring court's October 27, 2014 Memorandum of Decision and Order in *Paduano v. Express Scripts, Inc., 55 F. Supp. 3d 400 (E.D.N.Y. 2014)*.

A. Motion to dismiss

ESI moves to dismiss the FAC for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*. In considering a motion to dismiss under *Rule 12(b)(6)*, the Court must assume all the facts alleged in the complaint are true, and liberally construe the complaint in the light most favorable to the plaintiff. *Foster v. Deutsche Bank Nat'l Trust Co., 2012 U.S. Dist. LEXIS 153267, 2012 WL 5285887, at *2 (E.D. Mo. Oct. 25, 2012)* (citing *Eckert v. Titan Tire Corp., 514 F.3d 801, 806 (8th Cir. 2008))*. The allegations must be sufficient "to raise a right to relief above the speculative level," however, and the motion to dismiss must be granted if the complaint does not contain "enough facts to state a claim to relief that is plausible on its face." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Thus, a dismissal under *Rule 12(b)(6)* should be granted "only in the unusual case in which a plaintiff includes allegations **[*7]** that show, on the face of the complaint, that there is some insuperable bar to relief." *Strand v. Diversified Collection Serv., Inc., 380 F.3d 316, 317 (8th Cir. 2004)* (quoting *Frey v. Herculaneum, 44 F.3d 667, 671 (8th Cir. 1995)* (internal quotation marks omitted)).

1. Antitrust claims[2] (Counts I-II)

Section 1 of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade." *15 U.S.C. § 1*.[3] Not every agreement that restrains competition violates the Sherman Act. See *Craftsmen Limousine, Inc. v. Ford Motor Co., 491 F.3d 380, 386 (8th Cir. 2007)*. Rather, the Sherman Act prohibits "only those practices that impose an unreasonable restraint on competition." Id. (quoting *Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 342-43, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)* (internal quotation marks omitted).

To establish a claim under *Section 1* of the Sherman Act, a plaintiff must demonstrate "(1) that there was a contract, combination, or conspiracy; (2) that the agreement unreasonably restrained trade under either a *per se* rule of illegality or a rule of reason analysis; and (3) that the restraint affected interstate commerce." *Reg'l Multiple Listing Serv. of Minnesota, Inc. v. Am. Home Realty Network, Inc., 9 F. Supp. 3d 1032, 1039 (D. Minn. 2014)* (quoting *Insignia Sys., Inc. v. News Am. Mktg. In-Store, Inc., 661 F. Supp. 2d 1039, 1062 (D. Minn. 2009)* (internal quotation marks omitted)). Courts are generally hesitant to dismiss antitrust actions before the parties have had an opportunity for discovery, "because the proof of illegal conduct lies largely in the hands of the alleged antitrust conspirators." *Double D Spotting Serv., Inc. v. Supervalu, Inc., 136 F.3d 554, 560 (8th Cir. 1998)* (citing *Huelsman v. Civic Ctr. Corp., 873 F.2d 1171, 1174 (8th Cir.1989))*. Nevertheless, "[t]he essential elements of a private antitrust claim must be alleged in more than vague and conclusory terms to prevent dismissal of the complaint on a defendant's *Rule 12(b)(6)* motion." *Id. at 558* (quoting *Crane & Shovel Sales Corp. v. Bucyrus-Erie Co., 854 F.2d 802, 805 (6th Cir. 1988)* (internal quotation marks omitted).

---

[2] The Court notes similar claims under *sections 1* and *2* of the Sherman Act have been filed in federal district courts by independent pharmacies against various PBMs, including Medco, Caremark and ESI. See *N. Jackson Pharmacy v. Express Scripts Inc., 345 F. Supp. 2d 1279 (N.D. Ala. 2004)*; *N. Jackson Pharmacy, Inc. v. Medco Health Solutions, Inc., 345 F. Supp. 2d 1279, 2004 WL 3372978 (N.D. Ala. 2004)*; *N. Jackson Pharmacy, Inc. v. Caremark RX, Inc., 385 F. Supp. 2d 740 (N.D. Ill. 2005)*; Mike's Med. Ctr. Pharmacy v. Medco Health Solutions, Inc., No. 3:05-5108 (N.D. Cal.); Brady Enters., Inc. v. Medco Health Solutions, Inc., 2003 WL 23902806 (E.D. Pa. 2003); *Bellevue Drug Co. v. Advance PCS, 333 F. Supp. 2d 318 (E.D. Pa. 2004)*. The Judicial Panel on Multidistrict Litigation consolidated these cases and transferred them to the Eastern District of Pennsylvania in 2006. See *In re Pharm. Benefit Managers Antitrust Litig., 452 F. Supp. 2d 1352 (J.P.M.L. 2006)*.

[3] The Donnelly Act, N.Y. Gen. Bus. L. § 340, is modeled on the Sherman Act and generally construed in accordance with federal precedent. See *Menkes v. St. Lawrence Seaway Pilots' Ass'n, 269 Fed. Appx. 54, 55 n.3 (2d Cir. 2008)* (citing cases). The Court will therefore evaluate HMC's claims under the Sherman Act and the Donnelly Act together. **[*8]**

Here, HMC alleges ESI conspired "to end all coverage for compound prescription medications, and eliminate HMC and other independent compounding pharmacies as competitors in the Relevant Market" (FAC at ¶¶ 48, 124), and that this conduct constitutes both a per se and rule of reason claim under the Sherman Act. (Id. at ¶¶ 126-27)

Most antitrust claims are evaluated under **[*9]** the rule of reason. *Craftsmen Limousine, 491 F.3d at 387*; *Minnesota Ass'n of Nurse Anesthetists v. Unity Hosp., 208 F.3d 655, 659 (8th Cir. 2000)*. Under this approach, an antitrust plaintiff must show an anticompetitive effect on the relevant market. *Flegel v. Christian Hosp., Northeast-Northwest, 4 F.3d 682, 688 (8th Cir. 1993)*. Under the *per se* rule, certain types of restraints are so inherently anticompetitive that they are illegal per se, without inquiry into the reasonableness of the restraint or the harm caused. *Double D Spotting Serv., 136 F.3d at 558* (citing *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))*. Per se treatment is applied only when the adverse impact on competition is "obvious and substantial." *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of Rhode Island, 239 F. Supp. 2d 180, 189 (D.R.I. 2003)*. ESI argues the per se rule should not be applied to HMC's antitrust claims because the conduct asserted, i.e., refusal to deal and/or boycott, is not the type with "immediately obvious" economic impacts. (Doc. No. 130 at 8-9)

A group boycott is "a narrow category of per se violation, limited to cases in which firms with market power boycott suppliers or customers in order to discourage them from doing business with a competitor." *Minn. Nurse Anesthetists, 208 F.3d at 659* (quoting *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 458, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986))*. HMC alleges the agreement to boycott HMC is a horizontal agreement between ESI and its co-conspirators, CVS Caremark Corporation ("CVS"), Optum Rx ("ORx") and Prime Therapeutics, LLC ("Prime") (collectively referred to as the co-conspirators)[4], all of which are PBMs and operate at the same level of the market. (FAC at **[*10]** ¶¶ 16-22, 124) In addition, ESI, CVSC, and Prime own and operate specialty pharmacies that compete with HMC and ESI and each of the co-conspirators operate mail-order pharmacies that also compete with HMC. (Id. at ¶¶ 13-19) Because PBMs manage 95 percent of all prescription drugs covered by insurance, and because ESI and the co-conspirators exercise control over more than 80 percent of the PBM market, HMC argues these firms occupy a dominant position in the prescription drug benefit market. ESI and the co-conspirators have used that power to preclude HMC from obtaining access to reimbursements from health plans and insurance for prescription medications—a supply necessary for HMC to compete. (Id. at ¶¶ 22, 115, 126(b)) Without access to insurance plans for prescription medications, HMC alleges that it and other independent compounding pharmacies will be driven out of business. (Id. at ¶ 115) HMC further alleges on information and belief that ESI and its co-conspirators' boycott is intended to channel patients to their own competing pharmacies and has resulted in anticompetitive effects in the market, including decreased output of prescription drugs, reduced consumer choice, and a decline **[*11]** in the quality of prescription drugs available to patients. (Id. at ¶ 121)

Although the question whether HMC's allegations "comprise a per se claim is normally a question of legal characterization that can often be resolved ... on a motion to dismiss or for summary judgment[,]" see *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 61 (1st Cir. 2004)*, the Court will not dismiss HMC's pro se claim at this time. See *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Oklahoma, 468 U.S. 85, 104 n. 26, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)* ("Indeed, there is often no bright line separating per se from rule of reason analysis. Per se rules may require considerable inquiry into market conditions before the evidence justifies a presumption of anticompetitive conduct."). Even if HMC fails to establish a per se violation of the Sherman Act, the question remains whether the allegedly unreasonable restraint of trade comports with the rule of reason, discussed below.

ESI raises three specific challenges to HMC's antitrust claims: (1) HMC fails to allege an unlawful agreement or conspiracy between ESI and its co-conspirators; (2) HMC fails to adequately plead injury to competition in a relevant market; and (3) HMC has not alleged **[*12]** an antitrust injury sufficient for standing. The Court will address each of these in turn.

---

[4] HMC alleges ESI conspired with CVS, ORx and Prime, as well as "other individuals and entities, known and unknown," not named in the complaint. (FAC at ¶¶ 16-18, 20)

Contract, combination or conspiracy

In order to allege a conspiracy under *§ 1* of the Sherman Act, HMC must show there was concerted, as opposed to unilateral, action. *Willman v. Heartland Hosp. E., 34 F.3d 605, 610 (8th Cir. 1994)*. "The antitrust plaintiff should present direct or circumstantial evidence that reasonably tends to prove that [the defendant] and others had a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)* (internal citation and quotation marks omitted). Mere allegations of parallel conduct will not suffice. *Twombly, 550 U.S. at 556-67* ("Without more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality. Hence, when allegations of parallel conduct are set out in order to make a § 1 claim, they must be placed in a context that raises a suggestion of a preceding agreement[.]").

In support of its motion, ESI argues HMC has not alleged a plausible agreement or conspiracy among ESI and its purported co-conspirators. (Doc. No. 130 at 6-8) Citing Twombly, ESI contends HMC has alleged "merely parallel conduct" that could just as well be independent action. HMC responds **[*13]** that read as a whole, the FAC alleges more than enough factual matters to suggest an agreement was made to satisfy Twombly's pleading standard. (Doc. No. 142 at 5-9) The Court agrees.

Here, HMC alleges ESI and each of the co-conspirators are active members of the Pharmaceutical Care Management Association ("PCMA"), the national association that "represent[s] America's pharmacy benefit managers (PBMs)." (FAC at ¶ 56) The PCMA "facilitates communication and collaboration among leaders in the PBM industry to shape the industry's direction and explore collaborative solutions to industry issues." (Id. at ¶ 58) (internal quotation marks omitted). Executives from ESI and each of the co-conspirators serve on the PCMA's Board of Directors, and regularly met in 2013 to discuss the PBM industry and explore collaborative "solutions" to industry "issues." (Id. at ¶¶ 57-59) Membership and participation in a trade group facilitates collusion. See *Evergreen Partnering Grp. v. Pactiv Corp., 720 F.3d 33, 49 (1st Cir. 2013)*; *In re Text Messaging Antitrust Litig., 630 F.3d 622, 628 (7th Cir. 2010)*.

HMC further alleges ESI is the nation's largest PBM; CVS and ORx are the second and third largest respectively. (FAC at ¶¶ 13, 16-17) PBMs manage 95 percent of all prescription drugs covered by insurance, and ESI and the co-conspirators dominate the PBM market with **[*14]** a market share of over 80 percent. (Id. at 22) The highly concentrated nature of the PBM industry also supports an inference of conspiracy. See *Evergreen Partnering Grp., 720 F.3d at 48* (complaint adequately alleged Section 1 boycott violation with allegations that five defendants controlled 90 percent of the market and participation of at least one defendant was necessary for plaintiff to enter the market); *In re Text Messaging Antitrust Litig., 630 F.3d at 628* ("[T]he complaint in this case alleges that the four defendants sell 90 percent of U.S. text messaging services, and it would not be difficult for such a small group to agree on prices and to be able to detect 'cheating' (underselling the agreed price by a member of the group) . . . ."). See also *Starr v. Sony BMG Music Entm't, 592 F.3d 314, 323-24 (2d Cir. 2010)* (citing 7 Phillip E. Areeda and Hebert Hovenkamp, ***Antitrust Law*** at § 1431a (2d ed. 2003) (allegation that "defendants control over 80%" of the market supported inference of conspiracy); *Todd v. Exxon Corp., 275 F.3d 191, 208 (2d Cir. 2001)* ("Generally speaking, the possibility of anticompetitive collusive practices is most realistic in concentrated industries.").

In this context, HMC alleges that in 2013, ESI and its co-conspirators joined together to study the market for compound prescriptions and collectively determine how to exclude compound medicines in 2014. (FAC at ¶ 60) In 2014, ESI and the co-conspirators **[*15]** are alleged to have sent letters to prescribing physicians containing false and misleading information regarding compound medications and contacted prescribing physicians by telephone to impliedly threaten them with retaliation if they continued to prescribe compound medicines. (Id. at ¶¶ 68-69) Similar letters were sent to patients advising them that compound medications are not FDA-approved. (Id. at ¶¶ 71-72, 76) HMC further alleges ESI and the co-conspirators each required prior authorizations from physicians for compound medications that exceeded a threshold dollar amount, intentionally set to be an amount too low to cover most, if not all, compound medication claims, and then each adjusted that threshold amount to ensure that compound medication claims would categorically be denied. (Id. at ¶¶ 83-84)

Then, CVS and ESI announced new policies regarding copayments allegedly aimed at excluding compound medications within days of each other in late May and early June of 2014. (Id. at ¶¶ 87-88, 91) For example, on May 30, 2014, CVS announced that compounders must include at least two scientifically valid studies in peer-reviewed journals supporting the clinical efficacy of the additional **[*16]** ingredients, despite the lack of peer-reviewed medical literature on compound preparation and individual ingredients. (Id. at ¶ 88) On or about June 3, 2014, ESI launched its "Compound Management Solution" and a formal campaign to inform providers that it would not pay claims for compound medications. HMC alleges ESI's "Solution" will eliminate the prior authorization option for compound medications and instead "automatically reject" any claim for such medications. In addition, effective September 15, 2014, ESI eliminated coverage for 1,000 compound ingredients. (Id. at ¶¶ 90-91) Likewise, ORx informed HMC that URAC accreditation was required to provide network compounding services, despite the fact that URAC does not have an accreditation program for compounding pharmacies. (Id. at ¶ 95) These policy changes, made at or around the same time by multiple competitors, are also indicative of conspiracy. See *In re Text Messaging Antitrust Litig., 630 F.3d at 628* ("[C]omplex and historically unprecedented changes in pricing structure made at the very same time by multiple competitors, and made for no other discernible reason would support a plausible inference of conspiracy.") (citing *Twombly, 550 U.S. at 557 n. 4*) (internal quotation marks omitted)).

Further, CVS suspended HMC **[*17]** on June 30, 2014 — five days after ORx terminated HMC and within one month of ESI's issuance of its notice of termination to HMC. (FAC at ¶ 107-110) The timing of, and similarity between, ESI and the co-conspirators' actions following their PCMA meeting in 2013, provides a plausible relationship between the PCMA meeting and these actions.

For these reasons, the Court finds HMC has sufficiently alleged a preceding agreement to engage in concerted action. See *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 184 (2d Cir. 2012)* ("[T]o present a plausible claim at the pleading stage, the plaintiff need not show that its allegations suggesting an agreement are more likely than not true or that they rule out the possibility of independent action, as would be required at later litigation stages such as a defense motion for summary judgment[.]").

Injury to competition in a relevant market

It is HMC's burden to define the relevant market. *Double D Spotting Serv., 136 F.3d at 560*. "The definition of the relevant market has two components—a product market and a geographic market." Id. (quoting *Bathke v. Casey's Gen. Stores, Inc., 64 F.3d 340, 345 (8th Cir. 1995)* (internal quotation marks omitted)). "The relevant product market includes all reasonably interchangeable products." Id. (citing *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997))*. The geographic market is defined by considering the "commercial realities" faced by **[*18]** consumers. Id. (citing *Bathke, 64 F.3d at 345*). "It includes the geographic area in which consumers can practically seek alternative sources of the product, and it can be defined as the market area in which the seller operates." Id. (quoting *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)* (internal quotation marks omitted)).

HMC alleges the relevant service market affected by ESI and the co-conspirator's conduct is "pharmacy services that are reimbursed by insurance, including, but not limited to, the compounding, filling, and dispensing of prescription medications." (FAC at ¶ 52) The relevant product market "is prescription drugs that are reimbursed by insurance, including, but not limited to, compounded prescription drugs" (Id.), and the relevant geographic market for activity that affects HMC is the Eastern United States, including, but not limited to, New York and New Jersey. (Id. at ¶ 53) HMC further alleges the conduct of ESI and the co-conspirators has had the effect of "unreasonably restraining, suppressing, and eliminating competition in the provision of pharmacy services and the dispensation of prescription drugs covered by insurance in all markets in which HMC did and could operate in interstate commerce." (Id. at ¶ 54)

ESI argues HMC's proposed **[*19]** relevant market fails to adequately account for comparable substitutes in the marketplace. (Doc. No. 130 at 10-11) Specifically, HMC limits the market to "prescription drugs that are reimbursed by insurance," when the reality of the marketplace is that some consumers are insured, some are not, and different consumers' insurance coverage differs depending on their health plans. (Id. at 11) ESI further argues that in an attempt to give the appearance of broader harm to the market, HMC aligns itself with unnamed "other independent compounding pharmacies." As a result, the boundaries of the relevant product market cannot be determined. (Id.)

In response, HMC argues there are material distinctions between insured and uninsured patients, including quantity and ability to pay. In other words, there are not enough uninsured patients capable of purchasing prescription medications to constitute an interchangeable source of demand. (Doc. No. 142 at 14-15) Indeed, in Stop & Shop, the court acknowledged the number of retail customers whose purchases of prescription drugs are not reimbursed by insurance "could be so small a group that foreclosure of a large percentage of reimbursed customers would still be **[*20]** fatal," but stated this would have to be proved. *373 F.3d at 67*.

There is no requirement that market definition be pled with specificity. *Cost Mgmt. Servs., Inc. v. Washington Natural Gas Co., 99 F.3d 937, 950 (9th Cir. 1996)*. An antitrust complaint therefore survives a *Rule 12(b)(6)* motion unless it is apparent from the face of the complaint that the alleged market suffers a fatal legal defect. And since the validity of the relevant market is typically a factual element rather than a legal element, alleged markets may survive scrutiny under *Rule 12(b)(6)* subject to factual testing on summary judgment or at trial. See *High Technology Careers v. San Jose Mercury News, 996 F.2d 987, 990 (9th Cir. 1993)* (holding that the market definition depends on "a factual inquiry into the commercial realities faced by consumers") (internal quotation marks omitted)). Accordingly, granting all factual inferences in HMC's favor, the Court finds HMC has sufficiently pled a relevant market.

ESI also argues HMC has not adequately pled facts explaining how ESI's allegedly anticompetitive conduct actually restrained trade or harmed consumers. In other words, HMC has not pled a market injury — only injury to itself. (Doc. No. 130 at 9-10)

The FAC alleges the conduct of ESI and the co-conspirators has had a "substantial and continuing anticompetitive effect on the Relevant Market" in the following ways:

> a) eliminating **[*21]** compounding pharmacy services and compound medications from the Relevant Market;
> b) substantially decreasing the output and/or supply of pharmaceutical services and prescription drugs in the Relevant Market;
> c) depriving patients of meaningful choice in and access to pharmaceutical services and prescription drugs in the Relevant Market;
> d) depriving patients of medically-necessary pharmaceutical services and prescription drugs in the Relevant Market;
> e) reducing or eliminating the prescription of compound medications by physicians in the Relevant Market;
> f) diverting patients away from Plaintiff HMC and other independent compounding pharmacies to Defendant ESI and the Co-conspirators' various mail-order and specialty pharmacies that are in competition with Plaintiff HMC and other independent compounding pharmacies in the Relevant Market, including, but not limited to, Accredo, Freedom Fertility Pharmacy, and Express Scripts Pharmacy, among others; and
> g) hindering innovation, price-competition, and patient choice in the delivery of pharmaceutical services and prescription drugs in the Relevant Market by imposing and maintaining high barriers to entry and participation therein.

(FAC at ¶127) **[*22]**

Allegations of anti-competitive effects sufficient to state a claim under *§ 1* of the Sherman Act include the elimination of a market competitor, a decrease in output, reduced consumer choice, and a decline in the quality of goods. See *Full Draw Prods. v. Easton Sports, Inc., 182 F.3d 745, 755 (10th Cir. 1999)* (identifying "the elimination of a competitor" as the "anticompetitive effect of the boycott" in a group boycott claim under *Section 1*); *Reg'l Multiple Listing Serv. of Minnesota, Inc. v. Am. Home Realty Network, Inc., 960 F. Supp. 2d 958, 985 (D. Minn. 2013)* ("Significant anti-competitive effects may include . . . a decrease in output, or a decline in quality.") (internal quotation marks omitted)). See also N. Jackson Pharmacy v. Express Scripts, where the court found allegations that defendants' "practices harms consumers . . . by eliminating independent pharmacists nationwide"; "defendants' anticompetitive conduct is done with the purpose and specific intent to expand . . . their stranglehold on the market of insurance reimbursed prescription drug sales"; defendants' "practices will ultimately drive independent pharmacists out of business," which will "harm competition in the marketplace," all adequately alleged anti-competitive effects under the Federal Rules' "simplified pleading standard." *345 F. Supp. 2d at 1291* (internal quotation marks omitted).

Antitrust injury

Finally, to have standing to assert **[*23]** a private damages action under federal antitrust laws, a plaintiff must allege it has suffered an antitrust injury. *Lovett v. Gen. Motors Corp., 975 F.2d 518, 520 (8th Cir. 1992)* (citations omitted). An antitrust injury is "a loss that Congress intended to prevent with the antitrust laws and that flows from the unlawfulness of the defendant's acts." Id. (citing *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*.

In its amended complaint, HMC alleges that "[a]s a direct and proximate result of Defendant ESI and the Co-conspirators' concerted conduct, ... HMC has been and will continue to be irreparably injured and financially damaged in its business and property in that, among other things, ... HMC has suffered and will continue to suffer significant lost revenue and net profits from the substantial decrease in reimbursements from compound medicines covered by health insurance policies and plans. In addition, [HMC] has not received reimbursements for thousands of prescriptions already filled and submitted to Defendant ESI." (FAC at ¶ 128) ESI asserts this is insufficient to establish an antitrust injury required for standing. ESI argues that reimbursements for covered medications were a benefit of membership in its pharmacy provider network and that its termination of the provider agreement — not **[*24]** any alleged anticompetitive conduct — is the proximate cause of HMC's claimed injuries. (Doc. No. 130 at 13-14)

Relying on *Doctor's Hosp. of Jefferson, Inc. v. Se. Med. Alliance, Inc., 123 F.3d 301 (5th Cir. 1997)*, HMC responds that its alleged injury — financial loss caused by its exclusion from the market by group boycott — is precisely the type of injury the antitrust laws were intended to prevent. (Doc. No. 142 at 16) In Doctor's Hosp., a hospital which had been replaced by a health care plan as a provider sued the plan and the replacement hospital, alleging violations of federal and state antitrust laws. The court held the hospital established antitrust standing because standing did not require a showing of injury to competition in the marketplace. *Id. at 304-06*.

ESI replies that while injury to competition is not an element of antitrust injury in the Fifth Circuit, in the Eighth Circuit, "the requisite antitrust injury must reflect the anticompetitive effect either of the violation or of the anticompetitive acts made possible by the violation." See *In re Canadian Import Antitrust Litig., 470 F.3d 785, 791 (8th Cir. 2006)*; *Steele v. City of Bemidji, 257 F.3d 902, 906 (8th Cir. 2001)*. (Doc. No. 146 at 10) The Eighth Circuit went on to state, however, that "we also consider the causal connection between the alleged antitrust violation and harm to the plaintiff [and] the directness or indirectness of the asserted **[*25]** injury ..." *Canadian Import, 470 F.3d at 791*. Thus for purposes of a motion to dismiss, HMC has sufficiently pled an antitrust injury by asserting that ESI excluded it as a competitor from the marketplace.

In sum, after construing the allegations in the light most favorable to HMC, the Court finds HMC's amended complaint adequately alleges violations of Sherman Act. The Court likewise concludes HMC has adequately alleged claims against ESI under New York ***antitrust law***. Accordingly, ESI's motion to dismiss HMC's antitrust claims will be denied.

2. ERISA claims (Counts III-IV)

HMC asserts claims as an ERISA beneficiary for benefits under *ERISA § 502(a)(1)(B)*, *29 U.S.C. § 1132(a)(1)(B)* and for injunctive relief under *ERISA § 502(a)(3)*, *29 U.S.C. § 1132(a)(3)*. (FAC at ¶¶ 141-167) In relevant part, ERISA allows a plan participant or beneficiary to file a civil action "to recover benefits due to him under the terms of his plan, to enforce his rights under the terms of the plan, or to clarify his rights to future benefits under the terms of the plan." *§ 1132(a)(1)(B)*. An insured may seek an injunction or other appropriate equitable relief to enforce ERISA or the plan's provisions. See *§ 1132(a)(3)*.

ESI argues these claims should be dismissed because HMC fails to allege any terms of any ERISA plans requiring approval of payment for compound **[*26]** medications, citing *Midwest Special Surgery, P.C. v. Anthem Ins. Co., 2010 U.S. Dist. LEXIS 16403, 2010 WL 716105 (E.D. Mo. Feb. 24, 2010)*. (Doc. No. 130 at 16-18) ESI further argues that even if the health plans are ERISA plans, HMC does not have standing to assert an ERISA claim because it is neither a "participant" nor a "beneficiary" under any ERISA plan at issue, citing *Pascock Valley Hosp. v. Local 464A UFCW Welfare Reimbursement Plan, 388 F.3d 393, 400 (3d Cir. 2004)*; *Dallas Cnty. Hosp. Dist. v. Assocs. Health & Welfare Plan, 293 F.3d 282, 289 (5th Cir. 2002)*. (Id. at 20) Finally, ESI argues it is not a named plan administrator and thus not a proper ERISA defendant. (Id. at 18 n.7)

HMC responds that its claims are based on ESI's violation of ERISA claim procedures and thus does not require citation to specific plan provisions. (Doc. No. 142 at 18-20) To state a claim for violation of ERISA claim procedures, a beneficiary need only plead facts showing an ERISA administrator denied benefits in violation of the procedures set forth in *§ 1133* and 29 C.F.R. 2560.501(1)(g) governing notification of an adverse benefit determination. (Id. at 18) In addition, HMC asserts it has standing as an ERISA "beneficiary" because its patients, who are ERISA Plan participants, or the ERISA Plans themselves, designated HMC to receive benefits under the ERISA plans. (Doc. No. 142 at 21)

To establish the application of ERISA claim procedures, HMC alleges ESI "administers and manages the prescription drug benefit components" of various **[*27]** "employer and employee-organization sponsored plans that provide participants with medical benefits" and "group health plans." HMC alleges on information and belief that these plans are Employee Welfare Benefit Plans under ERISA and/or are covered by ERISA claims procedures under the Affordable Care Act, *42 U.S.C. § 300gg-19(a)(2)(A)* ("the ERISA plans"). (FAC at ¶ 142) HMC further alleges, on information and belief, that it was and is an ERISA "beneficiary" because it has the right to directly receive the benefits of its patients who are participants in the ERISA plans pursuant to the terms of those plans. (Id. at ¶ 143) Lastly, HMC alleges, on information and belief, that ESI was the plan and/or claims administrator for the prescription drug components of the ERISA Plans, either because the plan documents designated ESI as such or because ESI in fact exercised its discretion in adjudicating individual claims for prescription drug benefits under the ERISA Plans. (Id. at ¶ 147)

Allegations made "upon information and belief" may state a claim after Iqbal and Twombly; however, the claim must still be based on factual content that makes liability plausible. See *Klohs v. Wells Fargo Bank, N.A., 901 F. Supp. 2d 1253, 1259 n. 2 (D. Haw. 2012)*. Here, HMC fails to state any factual allegations which **[*28]** would clarify the grounds on which its ERISA claims are based. HMC has not identified any ERISA plan(s) or plan term(s) entitling it to payment for compound medications. See *Midwest Special Surgery, P.C. v. Anthem Ins. Cos., 2010 U.S. Dist. LEXIS 16403, 2010 WL 716105, at *3 (E.D. Mo. Feb. 24, 2010)*, where the court found plaintiff failed to allege a specific plan term conferring a benefit when the complaint sought general "reimbursement for medical services provided to Defendants' plan participants under numerous health plans which qualify as employee welfare benefit plans as defined by ERISA." *2010 U.S. Dist. LEXIS 16403, [WL] at *2*.

Further, HMC has not alleged sufficient facts regarding an assignment of benefits from either the participants or the applicable ERISA Plans to create derivative standing. HMC alleges ESI reimbursed it directly for the prescriptions it filled for patients who were ERISA Plan participants (see FAC at ¶ 144), and contends this direct payment was only possible because either the participants or the applicable ERISA Plans designated it to receive such payments in place of the plan participants themselves. (Doc. No. 142 at 21) Cf. *In re Wellpoint, Inc. Out-Of-Network "UCR" Rates Litig., 865 F. Supp. 2d 1002, 1042 (C.D. Cal. 2011)* (where the court found provider plaintiffs had ERISA standing based on allegations that "[t]o facilitate direct payments from insurers, Dr. Henry's patients **[*29]** sign a form assigning their health benefits to him before treatment[,]" and that "Dr. Peck ... obtained assignments from his patients, through which he was paid directly by WellPoint for Providing Healthcare to its insureds.") (internal quotation marks omitted).

Because HMC fails to state any factual allegations which would clarify the grounds on which its ERISA claims are based, these claims will be dismissed without prejudice.

3. New York Deceptive Trade Practices Act (Count V)

New York's General Business Law § 349 is a consumer protection statute making deceptive acts or practices in the conduct of business unlawful. To state a claim under § 349, a plaintiff must allege: (1) the act or practice was consumer-oriented; (2) the act or practice was misleading in a material way; and (3) the plaintiff was injured as a result. *Pelman ex rel. Pelman v. McDonald's Corp., 396 F. Supp. 2d 439, 444 (S.D.N.Y. 2005)* (internal citations omitted). Further, where there is a simultaneous claim for breach of contract, a plaintiff must plead losses "independent of the loss caused by the alleged breach of contract." *Spagnola v. Chubb Corp., 574 F.3d 64, 74 (2d Cir. 2009)*.

ESI argues this claim must be dismissed because HMC does not plead materially misleading conduct or significant public harm. (Doc. No. 130 at 21-24) After drawing all reasonable inferences in HMC's favor, the Court **[*30]** finds HMC has presented a sufficient factual basis to state a claim for violation of GBL § 349.

First, HMC sufficiently alleges the act or practice was consumer-oriented. HMC alleges ESI and its co-conspirators contacted patients directly by letter to inform them that their compound medicines would no longer be covered by their prescription benefit policies and included misleading statements about those medications in those letters, namely that such medications were not FDA-approved for a specific condition. (FAC at ¶¶ 70-71, 73-78) Second, HMC sufficiently alleges this action was misleading in a material respect in that ESI misled patients and doctors into believing that compound drugs are unsafe and not medically necessary or appropriate treatments, while omitting the fact that compound drugs are specifically exempt from the FDA approval process and appropriate when prescribed a doctor. (Id.) Finally, HMC alleges it has suffered injury including, "inter alia, payments for prescription drugs that should be covered under patients' health insurance policies and/or plans." (Id. at ¶ 174) HMC has also pled ESI's violation of § GBL 349 "deprived patients — including New York residents/consumers **[*31]** — of access to medically necessary compound medications," a loss independent of the loss caused by the alleged breach of contract. Accordingly, ESI's motion to dismiss this claim will be denied.

4. New Jersey "Any Willing Provider" Laws (Count VI)

Generally, any willing provider ("AWP") laws provide a legal recourse to excluded providers and provide people with more selection and freedom to choose their health provider. *Am. Drug Stores, Inc. v. Harvard Pilgrim Health Care, Inc., 973 F. Supp. 60, 62 (D. Mass. 1997)* (citing William J. Bahr, Comment, Although Offering More Freedom to Choose, "Any Willing Provider" Legislation is the Wrong Choice, *45 U. Kan. L. Rev. 557, 570 (1997)*).

In 1994, New Jersey enacted an AWP law which provides that a pharmacy cannot be excluded from an HMO if it "accepts the terms" of the HMO. "[N]o pharmacy or pharmacist shall be denied the right to participate as a preferred provider or as a contracting provider under the same terms and conditions currently applicable to all other preferred or contracting providers . . . provided the pharmacy or pharmacist is registered . . . and accepts the terms and conditions of the policy." See *N.J.S.A. §§ 17B:26-2.1i*, *17B:27-46.1i*.

HMC alleges ESI's improper termination of HMC from its networks without cause, and the provisions of the Agreement providing for such termination without cause, **[*32]** violate New Jersey's AWP law. (FAC at ¶¶ 178, 183) ESI argues this claim should be dismissed because the law does not give rise to a private right of action. (Doc. No. 130 at 24-26)

The precedent concerning AWP laws is limited. However, in *Trilogy Health Care, LLC v. Medco Health Solutions, Inc., 2013 U.S. Dist. LEXIS 129385, 2013 WL 4832708, at *2 (D.N.J. Sept. 10, 2013)*, the court was not persuaded by a pharmacy's argument that a pharmacy benefits manager's discretion to terminate it under a Provider Agreement was limited by AWP laws in the various states in which the pharmacy was licensed. The court in Trilogy went on to find the pharmacy had not offered "even a colorable argument" that a particular AWP statute gives rise to a private right of action against a PBM rather than an insurer. Id. Accordingly, the Court will dismiss this claim.

5. Breach of contract (Count VII)

To state a claim for breach of contract, a plaintiff must plead the traditional elements of formation, performance, breach and damages. See *Gen. Mills Operations, LLC v. Five Star Custom Foods, Ltd., 789 F. Supp. 2d 1148, 1155 (D. Minn. 2011)*. Here, HMC alleges ESI breached the Provider Agreement by terminating it without cause and failing to provide it with proper notice or opportunity to cure pursuant to Appendix A of the Provider Manual. (FAC at ¶¶ 186-189) HMC further alleges that as a result of ESI's termination without cause, proper notice **[*33]** or opportunity to cure, HMC has suffered damages, including "lost revenue and net profits from the substantial decrease in reimbursements for compound prescription medications covered by health insurance policies and/or plans, the inability to locate alternative revenue sources to replace (or partially replace) the substantial revenue lost from ESI's improper termination of the Agreement, and inability to recover reimbursements for thousands of prescriptions already filled and submitted to [ ] ESI." (Id. at ¶ 190)

ESI argues this claim should be dismissed because it rests on a provision of the Provider Agreement not at issue in this dispute. Specifically, HMC is taking the position that ESI breached a provision of the Provider Agreement, which, according to HMC's allegations, does not apply to ESI's termination of HMC because the Agreement allows for termination without cause on 30 days' notice, which ESI provided. (Doc. No. 130 at 27; Doc. No. 146 at 15) The Court is not reviewing the merits of the claim at this stage of the proceedings. These are matters to be determined by the evidence. The Court finds Count VII is sufficiently pled.

6. Breach of the implied covenant of good faith [*34] and fair dealing (Count VIII)

Related to the breach of contract claim is the claim that ESI breached the implied covenants of good faith and fair dealing. (See FAC at ¶ 193) ESI argues this claim must be dismissed because like the claim for breach of contract, HMC fails to identify an operative provision in the Provider Agreement. (Doc. No. 130 at 28-29) Again, the Court is not reviewing the merits of the claim at this stage of the proceedings. The Court finds Count VIII is sufficiently pled.

7. Tortious interference with a business expectancy (Count IX)

To state a claim for tortious interference with a business expectancy under Missouri law, the following elements must be pled and proved: "(1) a contract or valid business expectancy, (2) defendant's knowledge of the contract or relationship, (3) an intentional interference by the defendant inducing or causing a breach of the contract or relationship, (4) absence of justification and (5) damages." *Wash Solutions, Inc. v. PDQ Manuf., Inc., 395 F.3d 888, 895 (8th Cir. 2005)* (citing Serv. Vending Co. v. Wal—Mart Stores, Inc., *93 S.W.3d 764, 769 (Mo. Ct. App. 2002))*.[5] "In general, conduct lacks justification when a defendant has employed 'improper means' to further the defendant's interests to the detriment of the plaintiff." *Ozark Emp't Specialists, Inc. v. Beeman, 80 S.W.3d 882, 896 (Mo. Ct. App. 2002)* (citation omitted). Improper means are those **[*35]** that are independently wrongful, such as threats, misrepresentation of fact, restraint of trade, "or any other wrongful act recognized by statute or the common law." *Nitro Distrib., Inc. v. Alticor, Inc., 565 F.3d 417, 428 (8th Cir. 2009)* (citing *Nazeri v. Missouri Valley College, 860 S.W.2d 303, 317 (Mo. 1993))*. Conversely, no liability arises if the defendant had an unqualified legal right to do the act complained of. Id.

---

[5] ESI concedes "the requisite elements" of a tortious interference claim are "substantively identical" under Missouri, New York, and New Jersey Law (See Doc. No. 30 at 29, n.12). HMC does not waive its right to later move for application of New York or New Jersey law. (See Doc. No. 142 at 31 n. 24)

HMC alleges ESI intentionally interfered with its business expectancy in the "continued sale of compound medications to patients in the Eastern United States," by, inter alia, coercing physicians to stop prescribing compound medicines, attempting to induce patients to cease purchasing compound medicines, and precluding HMC from filling prescriptions for its patients covered by insurance. (FAC at ¶¶ 198 (a)-(f), 199) As a result, HMC alleges it has suffered and will continue to suffer significant damages, including lost revenue and profits caused by the decrease in reimbursements for compound medications covered **[*36]** by health insurance policies and/or plans. (Id. at ¶ 201) ESI moves to dismiss this count on the grounds that HMC has not sufficiently alleged facts regarding its business expectancy or ESI's "improper means." (Doc. No. 130 at 29-30)

To prevail on a tortious interference with business expectancy claim, the business expectancy must be valid or reasonable and cannot be too indefinite or remote. *Ozark, 80 S.W.3d at 893* (citing *Bell v. May Dep't Stores Co., 6 S.W.3d 871, 876 (Mo. banc 1999))*. Here, HMC alleges a business expectancy in the continued sale of compound medications to patients in the Eastern United States, including but not limited to, New York and New Jersey. (FAC at ¶ 196; see also id. at ¶¶ 10-12, 23-33 (describing HMC's business and sale of compounded medications to patients)). HMC also alleges ESI used improper means, specifically, threats, misleading letters, and improper termination of HMC, to interfere with its expectancy, resulting in a substantial decrease in revenues and net profits. (FAC at ¶¶ 115-116, 201) The Court finds this count is sufficiently pled.

8. Declaratory judgment (Count X)

HMC seeks a judgment declaring that any termination without cause provisions contained in the Provider Agreement between HMC and ESI are severable from the remainder **[*37]** of the Agreement and void as unconscionable with respect to HMC's termination. (FAC at ¶ 208) ESI argues there is no contract in existence because the Provider Agreement was terminated and thus no controversy ripe for determination. (Doc. No. 130 at 31-32) HMC responds that the validity of the without cause provisions is ripe because ESI has announced its intention to rely on them to limit HMC's damages to the 30-day notice period contained therein. (Doc. No. 142 at 33-34) In reply, ESI argues HMC's argument demonstrates it has an adequate remedy at law. (Doc. No. 146 at 18)

The Declaratory Judgment Act provides that any federal court, "[i]n a case of actual controversy within its jurisdiction ... may declare the rights and other legal relations of any interested party seeking such declaration, whether or not further relief is or could be sought." *28 U.S.C. § 2201(a)*. The phrase "case of actual controversy" refers to the type of "cases" and "controversies" justiciable under Article III. See *MedImmune, Inc. v. Genentech, Inc., 549 U.S. 118, 126, 127 S. Ct. 764, 166 L. Ed. 2d 604 (2007)*. Courts have acknowledged the difficulty in setting out a precise test for determining whether there is such a controversy. "Basically, the question in each case is whether the facts alleged, under all the circumstances, **[*38]** show that there is a substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment." *Maytag Corp. v. Int'l Union, United Auto., Aerospace & Agric. Implement Workers of Am., 687 F.3d 1076, 1081 (8th Cir. 2012)* (citing *Maryland Cas. Co. v. Pac. Coal & Oil Co., 312 U.S. 270, 273, 61 S. Ct. 510, 85 L. Ed. 826, (1941))*.

Courts have considerable discretion in determining whether or not a declaratory judgment action should be entertained. *Medimmune, 549 U.S. at 136*. If a petition for declaratory relief contains facts supporting its allegations and those facts demonstrate a justiciable controversy, the petition is sufficient and cannot be dismissed. Clearly, HMC is a party whose rights are affected by an Agreement which sets out, among other things, the terms for claims reimbursement — the sole foundation of the parties' business relationship. As such, HMC is entitled to a declaration of those rights under that Agreement, whether ESI's attempt to terminate it was valid and effectual or not. The legal consequences and rights ensuing from the termination, if valid, or the attempt to terminate it, if invalid, must be determined, and may be declared. See *Hyatt Int'l Corp. v. Coco, 302 F.3d 707, 712 (7th Cir. 2002)* (relevant Article III considerations include whether the contractual dispute is real, in the sense that it is not factually hypothetical; whether it can be immediately resolved by a judicial **[*39]** declaration of the parties' contractual rights and duties; and whether "the declaration of rights is a bona fide necessity for the natural defendant/declaratory judgment plaintiff to carry on with its business.").

9. Injunctive relief (Count XI)

Lastly, ESI argues that dismissal of HMC's substantive counts renders its claim for preliminary and permanent injunctive relief moot. (Doc. No. 130 at 32-33) Because the majority of HMC's alleged claims are sufficient to withstand a motion to dismiss, ESI's motion to dismiss HMC's injunctive relief claim will be denied.

Conclusion

In sum, HMC's complaint satisfies the requirements of *Rule 12(b)(6)* with respect to Counts I and II (antitrust claims), Count V (deceptive trade practices), Count VII (breach of contract), Count VIII (breach of the implied covenant of good faith and fair dealing), Count IX (tortious interference with a business expectancy), Count X (declaratory relief), and Count XI (injunctive relief). The complaint fails to allege claims under Counts III and IV (ERISA claims) and those counts will, therefore, be dismissed without prejudice. Count VI (violation of AWP law) will be dismissed on the grounds that the statute does not give rise to a **[*40]** private right of action against a PBM.

B. Motion to dissolve TRO

ESI moves for an order dissolving the Federal TRO as it relates to HMC. As discussed above, the State Court TRO entered on September 11, 2014 ordered ESI to "reinstate in full force and effect nunc pro tunc" "the Network Pharmacy Agreement dated September 5, 2012, entered into by and between HMC and Wholesale Alliance TPS, LLC d/b/a/ Third Party Station on behalf of Third Party Payer ESI" (see Doc. No. 23-2 at 4 ¶ (e)), and enjoined ESI from, among other things, "refusing to process and pay claims for payment submitted by HMC for compounded medications prescribed by physicians for their patients who have prescription drug benefits administered by [ESI]." (Id. at 3 ¶ (b)) Following removal to the New York District Court, the parties consented to extend the State Court TRO until a determination of pending motions to transfer venue.

On October 3, 2014, the New York District Court vacated the State Court TRO and entered the Federal Court TRO enjoining Express Scripts from "refusing to process and/or pay claims submitted by [HMC] for the payment of prescriptions dated on or after September 11, 2014, or for the refill of an existing refillable **[*41]** prescription after September 11, 2014, for compounded medications prescribed by licensed physicians for their patients, which had heretofore been covered by their insurance." (Doc. No. 70 at 3 ¶ (b)) The District Court further ordered upon agreement of the parties that the TRO remain in full force and effect until a hearing on the preliminary injunction. (Id. at 4) On October 27, 2014, the transferring court instructed that, with respect to ESI, "[a]ny requests to revisit the terms [of the Federal TRO] should be directed to the ... federal district court in Missouri."

In support of its motion to dissolve, ESI argues the Federal TRO has extended beyond the 14 days prescribed in *Rule 65(b)(2)* and must, therefore, be treated as a preliminary injunction. (Doc. No. 154 at 2) ESI further argues HMC cannot meet its burden of showing that continued injunctive relief is warranted, noting that HMC has assigned a specific dollar amount to each reimbursement claim it contends ESI has denied. Because these damages can be remedied if HMC prevails on the merits of its breach of contract claim, HMC has an adequate remedy at law and cannot demonstrate irreparable harm. (Id. at 5-6)

The TRO, by its express terms and by agreement of the **[*42]** parties, is to remain in full force and effect until a hearing on the preliminary injunction, a situation clearly contemplated by *Rule 65*. See *Rule 65(b)(2)* ("The order expires at the time after entry — not to exceed 14 days — that the court sets, unless before that time the court, for good cause, extends it for a like period or the adverse party consents to a longer extension."). Moreover, a hearing on a motion to dissolve a TRO "cannot be considered to be a hearing on a preliminary injunction," where neither the parties nor the court "treated the ... hearing as a hearing on an application for a preliminary injunction," the plaintiffs "made no attempt at that time to present their case for a preliminary injunction[,]" and "[t]he court itself did not indicate that it was undertaking a hearing on a preliminary injunction." *Granny Goose Foods, Inc. v. Bhd. of*

Teamsters and Auto Truck Drivers Local No. 70, 415 U.S. 423, 442, 94 S. Ct. 1113, 39 L. Ed. 2d 435 (1974). Finding no changed circumstances, the motion to dissolve the TRO will be denied.

C. Motion for temporary stay of discovery and protective order

ESI moved for an order staying all discovery in this action pending the Court's ruling on its motion to dismiss and for protective order precluding HMC's Rule 30(b)(6) deposition in its entirety. The Court resolved this motion in its ruling on HMC's motion to **[*43]** compel Rule 30(b)(6) deposition. HMC served a Rule 30(b)(6) notice of deposition on ESI calling for the production of a corporate representative to testify regarding ESI's compliance with the TRO issued by the New York District Court. (Doc. No. 149) The Court granted HMC's motion to compel in part and directed HMC to clarify the topics to be covered in the deposition. (Doc. No. 168) The Court also deferred entering a scheduling order in this case, effectively staying discovery. (Id.) Only after a scheduling order has been entered by this Court may discovery proceed. See *Fed.R.Civ.P. 26(d)*. Accordingly, ESI's motion for temporary stay of discovery and protective order will be denied as moot.

D. Motion for civil contempt

HMC's motion for contempt is based on an alleged violation of the Federal TRO, specifically paragraph (b), which enjoins ESI:

> From refusing to process and/or pay claims submitted by ... HMC for the payment of prescriptions dated on or after September 11, 2014, or for the refill of an existing refillable prescription after September 11, 2014, for compounded medications prescribed by licensed physicians for their patients, which had heretofore been covered by their insurance.

(Doc. No. 70 at ¶ (b)) HMC argues that since the entry **[*44]** of the TRO, ESI has refused to process and/or pay a single claim submitted by the New Jersey Pharmacy on or after September 11, 2014 — a direct violation of the TRO. (Doc. No. 169 at ¶¶ 4-5) In response, ESI argues it has paid all valid claims submitted through HMC's in-network pharmacy, i.e., claims submitted to ESI pursuant to the terms of the contract between its affiliate Medco Health Solutions and HMC's Brooklyn, New York pharmacy. (Doc. No. 174 at 11-12)

"The party moving for contempt sanctions bears the burden of proving facts warranting a civil contempt order by clear and convincing evidence." Chicago Truck Drivers v. Bhd. Labor Leasing, 207 F.3d 500, 504 (8th Cir. 2000). That burden is met if the party is able to demonstrate: "(1) that a court order was in effect; (2) that the order required certain conduct by the respondent; and (3) that the respondent failed to comply with the court's order." Piggly Wiggly Clarksville, Inc. v. Mrs. Baird's Bakeries, 177 F.3d 380, 382 (5th Cir. 1999). "A contempt order must be based on a party's failure to comply with a 'clear and specific' underlying order." Chaganti & Assocs., P.C. v. Nowotny, 470 F.3d 1215, 1223 (8th Cir. 2006) (quoting Int'l Bhd. of Elec. Workers, Local Union No. 545 v. Hope Elec. Corp., 293 F.3d 409, 418 (8th Cir. 2002)). However, "[i]f the acts done are clearly in contravention of the court's decree, the intention is of no consequence. The absence of willfulness does not relieve an individual from civil contempt[.]" N.L.R.B. v. Ralph Printing & Lithographing Co., 433 F.2d 1058, 1062 (8th Cir. 1970).

The parties have widely disparate views of **[*45]** what the New York District Court meant when it enjoined ESI from refusing to process and/or pay claims submitted by HMC for compounded medications if those claims were covered by a patient's insurance prior to September 11, 2014. ESI contends it terminated its contract with HMC effective September 1, 2014, and was not required to reinstate that contract in order to maintain the status quo. (Doc. No. 174 at 1-2) HMC argues the plain terms of the Federal TRO require ESI to reimburse claims submitted by HMC irrespective of the existence of a contract. (Doc. No. 171 at 7) Both in briefing and at the hearing, there was much discussion about off the record conversations with the New York District Court judge seeking clarification of the TRO as it applied to ESI.

Given the lack of clarity around the intent of the Federal TRO, the Court cannot conclude there was a clear violation of the order sufficient to warrant a finding of contempt. See Imageware, Inc. v. U.S. West Communs., 219 F.3d 793, *797 (8th Cir. 2000)* ("No one should be held in contempt for violating an ambiguous order . . . A contempt should be clear and certain."); *Chicago Truck Drivers v. Bhd. Labor Leasing, 207 F.3d 500, 504 (8th Cir.2000)* ("The party moving for contempt sanctions bears the burden of proving facts warranting a civil contempt order by clear and convincing **[*46]** evidence."). Based on the facts presented and under the law, HMC's motion for contempt will be denied.

Accordingly,

IT IS HEREBY ORDERED that Defendant Express Scripts' Motion to Dismiss Plaintiffs' First Amended Complaint [129] is **GRANTED** in part. Counts III, IV and VI are dismissed. In all other respects the motion is **DENIED. IT IS FURTHER ORDERED** that Defendant Express Scripts' Motion to Dissolve the Temporary Restraining Order [153] is **DENIED**.

IT IS FURTHER ORDERED that Defendant Express Scripts' Motion for Temporary Stay of Discovery and Protective Order [157] is **DENIED** as moot.

IT IS FURTHER ORDERED that Plaintiffs' Motion for Civil Contempt [169] is **DENIED**.

IT IS FURTHER ORDERED that a *Rule 16* conference will be set by separate order.

Dated this 9th day of July, 2015.

JOHN A. ROSS

UNITED STATES DISTRICT JUDGE

ORDER SETTING *RULE 16* CONFERENCE

IT IS HEREBY ORDERED that:

1. **Scheduling Conference**: The Scheduling Conference pursuant to *Fed.R.Civ.P. 16* is set for **Wednesday, August 12, 2015 at 10:00 a.m. in my chambers**. At the scheduling conference counsel will be expected to discuss in detail all matters covered by *Fed.R.Civ.P. 16*, as well as all matters set forth in their joint proposed scheduling plan described in paragraph **[*47]** 3, and a firm and realistic trial setting will be established at or shortly after the conference.

2. **Meeting of Counsel**: Prior to the date for submission of the joint proposed scheduling plan set forth in paragraph 3 below, counsel for the parties shall meet to discuss the following:

• the nature and basis of the parties' claims and defenses,

• the possibilities for a prompt settlement or resolution of the case,

• the formulation of a discovery plan,

• any issues relating to preserving discoverable information,

• any issues relating to disclosure or discovery of electronically stored information, including—

(i) the form or forms in which it should be produced,

(ii) the topics for such discovery and the time period for which such discovery will be sought,

(iii) the various sources of such information within a party's control that should be searched for electronically stored information,

(iv) whether the information is reasonably accessible to the party that has it, in terms of the burden and cost of retrieving and reviewing the information,

(v) the parties must ensure that their clients preserve electronic discovery materials prior to the Rule 16 Conference, and

(vi) counsel shall address at the **[*48]** Rule 16 Conference potential electronic discovery and whether a specific agreement or order must be entered on that issue.

• any issues relating to claims of privilege or of protection as trial-preparation material, including - if the parties agree on a procedure to assert such claims after production - whether to ask the Court to include their agreement in an order, and

• other topics listed below or in *Fed.R.Civ.P. 16* and *26(f)*.

Counsel will be asked to report orally on the matters discussed at this meeting when they appear before the undersigned for the scheduling conference, and will specifically be asked to report on the potential for settlement; whether settlement demands or offers have been exchanged, without revealing the content of any offers or demands; and, suitability for Alternative Dispute Resolution. This meeting is expected to result in the parties reaching agreement on the form and content of a joint proposed scheduling plan as described in paragraph 3 below.

Only one proposed scheduling plan may be submitted in any case, and it must be signed by counsel for all parties. It will be the responsibility of counsel for the plaintiff to actually submit the joint proposed scheduling plan to the **[*49]** Court. If the parties cannot agree as to any matter required to be contained in the joint plan, the disagreement must be set out clearly in the joint proposal, and the Court will resolve the dispute at or shortly after the scheduling conference.

3. **Joint Proposed Scheduling Plan**: No later than **August 5, 2015**, counsel shall file with the Clerk of the Court a joint proposed scheduling plan. **All dates required to be set forth in the plan shall be within the ranges set forth below for the applicable track**:

Track 1: Expedited	**Track 2: Standard**	**Track 3: Complex**
***Disposition w/i 12 mos of filing**	***Disposition w/i 18 mos of filing**	***Disposition w/i 24 mos of filing**
***120 days for discovery**	***180-240 days from R16 Conf. for discovery/ dispositive motions**	***240-360 days from R16 Conf for discovery/ dispositive motions**

The parties' joint proposed scheduling plan shall include:

(a) whether the Track Assignment is appropriate; **NOTE: This case has been assigned to Track 2: (Standard).**

(b) dates for joinder of additional parties or amendment of pleadings;

(c) a discovery plan including:

(i) any agreed-upon provisions for disclosure or discovery of electronically stored information,

(ii) any agreements the parties reach for **[*50]** asserting claims of privilege or of protection as trial-preparation material after production,

(iii) a date or dates by which the parties will disclose information and exchange documents pursuant to *Fed.R.Civ.P. 26(a)(1)*,

(iv) whether discovery should be conducted in phases or limited to certain issues,

(v) dates by which each party shall disclose its expert witnesses' identities and reports, and dates by which each party shall make its expert witnesses available for deposition, giving consideration to whether serial or simultaneous disclosure is appropriate in the case,

(vi) whether the presumptive limits of ten (10) depositions per side as set forth in *Fed.R.Civ.P. 30(a)(2)(A)*, and twenty-five (25) interrogatories per party as set forth in *Fed.R.Civ.P. 33(a)*, should apply in this case, and if not, the reasons for the variance from the rules,

(vii) whether any physical or mental examinations of parties will be requested pursuant to *Fed.R.Civ.P. 35*, and if so, by what date that request will be made and the date the examination will be completed,

(viii) a date by which all discovery will be completed **(see applicable track range, Section 3. above)**;

(ix) any other matters pertinent to the completion of discovery in this case,

(d) the parties' positions concerning the referral **[*51]** of the action to mediation or early neutral evaluation, and when such a referral would be most productive;

(e) dates for the filing of any dispositive motions **(see applicable track range, Section 3. above)**;

(f) the earliest date by which this case should reasonably be expected to be ready for trial **(see applicable track range, Section 3. above)**;

(g) an estimate of the length of time expected to try the case to verdict; and

(h) any other matters counsel deem appropriate for inclusion in the Joint Scheduling Plan.

4. **Disclosure of Corporate Interests**: All non-governmental corporate parties are reminded to comply with Disclosure of Corporate Interests by filing a Certificate of Interest with the Court pursuant to *E.D.Mo. L.R. 2.09*.

5. **Pro Se Parties**: If any party appears in this action pro se, such party shall meet with all other parties or counsel, participate in the preparation and filing of a joint proposed scheduling plan, and appear for the scheduling conference, all in the same manner as otherwise required by this order.

Opinion

ORDER

AND NOW, this 9th day of July, 2015, upon consideration of a letter/brief filed by defendants (Document No. 158, filed February 6, 2015), in which they seek the Court's assistance in resolving a series of discovery disputes with Direct Purchaser Plaintiffs ("DPPs") and End-Payor Plaintiffs ("EPPs");[1] a letter/brief in opposition to defendants' discovery requests filed by Direct Purchaser Plaintiffs and End-Payor Plaintiffs (Document No. 161, filed February 13, 2015); a supplemental letter/brief filed by defendants (Document No. 228, filed June 18, 2015); a supplemental letter/brief filed by Retailer Plaintiffs (Document No. 230, filed June 25, 2015); a supplemental letter/brief filed by Direct Purchaser Plaintiffs (Document No. 231, filed June 25, 2015); and a second supplemental letter/brief filed by defendants (Document No. 232, filed July 6, 2015), following **[*2]** oral argument on June 4, 2015, **IT IS ORDERED** that defendants' discovery requests are **GRANTED IN PART AND DENIED IN PART**, as follows:

A. Defendants' Requests for Discovery from Direct Purchaser Plaintiffs

---

[1] The discovery disputes presently before the Court arise out of the objections of Direct Purchaser Plaintiffs and End-Payor Plaintiffs to certain of the Requests for Production ("RFP") served on them by defendants on November 21, 2014.

1. Defendants' request that DPPs respond to RFP Nos. 1 and 6-11 by producing information concerning their sales, revenues, and profits arising out of their resale of Niaspan is **DENIED**.

Defendants contend that the discovery requested in RFP Nos. 1 and 6-11 is relevant to the question of damages,[2] and is needed in order to calculate the extent of "generic bypass"[3] in this case. The premise of defendants' argument is that the amount of damages sustained by DPPs must be offset by the amount of any purchases of Niaspan that would not have been made in a "but for" world in which generic competition existed. In response, DPPs argue that defendants' request for discovery should be denied because the information sought is improper "downstream discovery" that is irrelevant **[*3]** as a matter of law under *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 489, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*, and its progeny.[4] The Court agrees.

In *In re Skelaxin (Metaxalone) Antitrust Litig.*, a similar pay-for-delay case, Judge Curtis L. Collier rejected the same generic bypass theory relied upon by defendants as a basis for their **[*4]** discovery request. *No. 12-MD-2343, 2014 U.S. Dist. LEXIS 66707, 2014 WL 2002887, at *5 (E.D. Tenn. May 15, 2014)*. In doing so, Judge Collier stated the following:

> Defendant ignores the fundamental import of Hanover Shoe and its progeny: a direct purchaser may recover the full amount of the overcharge, even if he is otherwise benefitted, because the antitrust injury occurs and is complete when the defendant sells at the illegally high price. . . . That is, the focus of the antitrust laws is limited to the anticompetitive sale. When Defendant sold the [drug at issue] to the wholesalers at an allegedly anticompetitive price, the injury was complete. The jury need not hear any more. True, to calculate damages the jury must consider what the cost of the drug would have been in the absence of an antitrust violation. But Hanover Shoe and *Illinois Brick [v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)]* make clear that courts and juries will not be forced down the rabbit hole of hypothetical issues antitrust violators may raise to minimize their liability.

(internal quotation marks omitted) (citations omitted).

Other courts that have considered the issue have reached the same conclusion. See, e.g., *In re Prograf Antitrust Litig., No. 11-2242, 2014 U.S. Dist. LEXIS 180899, 2014 WL 7641156, at *4 (D. Mass. Dec. 23, 2014)* ("[R]educing damages to plaintiff wholesalers under a bypass defense is inconsistent with Hanover Shoe . . . .") (citations omitted); **[*5]** *In re Relafen Antitrust Litig., 346 F. Supp. 2d 349, 369 (D. Mass. 2004)* ("Hanover Shoe precludes not only the 'passing on' defense, but also the subtle variation asserted here, which might be termed the 'otherwise benefiting' defense. . . . [N]ational wholesalers could seek to recover the 'full amount of the overcharge' — that is, the overcharges paid on all purchases of Relafen, including bypassed units.") (emphasis added).

This Court agrees with those courts that have rejected the generic bypass theory relied upon by defendants as inconsistent with *Hanover Shoe* and its progeny. Thus, the Court concludes that the information sought by

---

[2] The Court previously ruled at defendants' request that, before class certification briefing was complete, discovery into the merits could proceed only insofar as it related to class certification. At oral argument, however, the parties agreed that discovery could proceed on all issues.

[3] "Generic bypass refers to the situation whereby direct purchasers may lose sales volume because end purchasers often buy generics directly from the generic manufacturer and 'cut out the middle man' or 'bypass' the wholesaler." *In re Wellbutrin XL Antitrust Litig., No. 08-2431, 2011 U.S. Dist. LEXIS 90075, 2011 WL 3563385, at *15 (E.D. Pa. Aug. 11, 2011)*.

[4] In *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*, the Supreme Court of the United States held that "a party may recover for an antitrust overcharge whether or not the party experienced a net loss or a net gain (i.e., by passing on the overcharge to other parties)." *In re Wellbutrin Sr Direct Purchaser Antitrust Litig., No. 04-5525, 2008 U.S. Dist. LEXIS 36719, 2008 WL 1946848, at *6 (E.D. Pa. May 2, 2008)*. That is, under federal ***antitrust law***, a defendant "cannot assert as a defense against direct purchasers that the alleged victims 'passed-on' the overcharge to the indirect purchasers with whom they transacted." *In re Auto. Refinishing Paint Antitrust Litig., No. MDL 1426, 2006 U.S. Dist. LEXIS 34129, 2006 WL 1479819, at *8 (E.D. Pa. May 26, 2006)*.

defendants regarding DPPs' sales, profits, and revenues is not relevant under *Federal Rule of Civil Procedure 26(b)(1)*. Defendants' discovery request relating to RFP Nos. 1 and 6-11 is therefore denied.

B. Defendants' Requests for Discovery from End-Payor Plaintiffs

2. Defendants' request that EPPs respond to RFP Nos. 12-20 by producing information concerning the effect of pharmaceutical prices on their profits, insurance premiums, or contribution rates is **DENIED WITHOUT PREJUDICE**.

Defendants argue that the discovery requested in RFP Nos. 12-20 is relevant to the issue of whether EPPs "are limited by relevant state laws to recovering their actual damages, as opposed to the **[*6]** artificial 'overcharge' measure of damages that is permitted for direct purchasers under federal ***antitrust law***." (Defs.' Letter/Brief, Document No. 158, at 6) (emphasis deleted). In response, EPPs assert that "all of the relevant state laws in this case follow federal ***antitrust law***," and thus that the information sought by defendants is irrelevant under Hanover Shoe and its progeny because an EPP, like a DPP, may recover the full amount of the alleged overcharge on every unit of Niaspan it purchased regardless of whether that overcharge was offset by some other factor. (Pls.' Letter/Brief, Document No. 161, at 6 n.21.)

The parties did not brief these issues, and the Court declines to embark upon an analysis of each of the relevant state laws to determine whether they foreclose the discovery requested by defendants at this stage of the proceedings. To the extent that EPPs are correct in their assertion that the state laws involved in this case follow federal ***antitrust law***, the discovery requested is irrelevant under Hanover Shoe and its progeny for the same reasons discussed above with respect to defendants' request for downstream discovery from DPPs. The Court does not rule on the propriety **[*7]** of the requested discovery in the event that applicable state law does not follow federal ***antitrust law***. Accordingly, defendants' discovery request relating to RFP Nos. 12-20 is denied without prejudice;

3. Defendants' request that EPPs respond to RFP No. 2 by producing information regarding rebates received in connection with their purchases of Niaspan is **DENIED WITHOUT PREJUDICE**.

Defendants contend that rebate information is relevant to determining the net price that EPPs paid for Niaspan, and to support, inter alia, an argument at class certification that many members of the EPP class did not suffer any actual economic injury. EPPs oppose defendants' discovery request on the ground that the net price paid for Niaspan is irrelevant in view of the fact that "[a]ntitrust impact is not . . . proven by reference to a purchaser's net damages," but rather "occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset." (Pls.' Letter/Brief, Document No. 161, at 7) (citation and internal quotation marks omitted).

As above, the resolution of this question depends upon whether the relevant state laws follow federal ***antitrust law***. If they do, the requested discovery is **[*8]** irrelevant under Hanover Shoe and its progeny because an EPP would be able to recover the full amount of the alleged overcharge on its purchases of Niaspan regardless of whether the price paid at the point of sale was subsequently offset by a rebate. For the same reasons stated previously, the Court declines to rule on the propriety of the requested discovery in the event that applicable state law does not follow federal ***antitrust law***. Accordingly, defendants' discovery request relating to RFP No. 2 is denied without prejudice; and

4. Defendants' request that EPPs respond to RFP No. 23 by producing documents in their possession which discuss or analyze the role of pharmacy benefit managers ("PBMs") is **GRANTED**. To the extent they have not already done so,[5] EPPs shall produce the requested discovery within twenty (20) days of this Order.

---

[5] In their letter/brief, End-Payor Plaintiffs report that they "have already produced their PBM contracts, which include the terms and conditions governing 'the role' of their PBMs," and further state that they will produce all documents responsive to defendants' RFP No. 23 which refer to Niaspan or niacin. (Pls.' Letter/Brief, Document No. 161, at 9.) To **[*9]** the extent that a dispute remains about what PBM information End-Payor Plaintiffs possess, the Court directs that the parties meet and confer in an effort to reach agreement.

Defendants assert that information relating to PBMs is relevant to arguments they intend to make at class certification relating to the ascertainability of the putative EPP class. See *Vista Healthplan, Inc. v. Cephalon, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *5 (E.D. Pa. June 10, 2015)* ("The United States Court of Appeals for the Third Circuit has recently identified ascertainability as an important prerequisite for class treatment.") (citing *Byrd v. Aaron's Inc., 784 F.3d 154 (3d Cir. 2015)*, as amended (Apr. 28, 2015)). In response, EPPs argue that the requested discovery is irrelevant because, unlike in other pay-for-delay cases, there are no ascertainability problems in this case in view of the fact that the proposed class definition expressly excludes PBMs that do not undertake risk and do not act as insurers, e.g., PBMs with capitation agreements.

The Court agrees with defendants that discovery relating to PBMs is relevant, at the very least, to the issue of ascertainability — an issue that is properly addressed at the class certification stage, not in the context of the discovery disputes presently before the Court. The relevance of the discovery requested **[*10]** by defendants is underscored by recent decisions of courts in other pay-for delay cases in which PBMs factored into the analysis of whether the ascertainability requirement had been satisfied. See *In re Wellbutrin XL Antitrust Litig., No. 08 2433, 308 F.R.D. 134, 2015 U.S. Dist. LEXIS 84444, 2015 WL 3970858, at *14-18 (E.D. Pa. June 30, 2015)*; *Vista Healthplan, Inc. v. Cephalon, Inc., No. 06-1833, 2015 U.S. Dist. LEXIS 74846, 2015 WL 3623005, at *9 (E.D. Pa. June 10, 2015)*; *In re Skelaxin (Metaxalone) Antitrust Litig., 299 F.R.D. 555, 568-69 (E.D. Tenn. 2014)*, reconsideration denied, *No. 12-MD-2343, 2014 U.S. Dist. LEXIS 58359, 2014 WL 1623705 (E.D. Tenn. Apr. 23, 2014)*. As EPPs have not raised any other objections to this discovery, and the Court concludes that none of the limitations on discovery imposed by *Rule 26(b)(2)(C)* apply,[6] defendants' discovery request relating to RFP No. 23 is granted.

IT IS FURTHER [*11] ORDERED that the parties shall meet and confer in an effort to resolve any remaining discovery disputes, including disputes over ESI search terms and custodians, and shall jointly report to the Court, on or before August 3, 2015, with respect to a resolution of any such issues.

IT IS FURTHER ORDERED that, upon consideration of a letter from plaintiffs (Document No. 224, filed June 15, 2015), and a letter from defendants (Document No. 225, filed June 15, 2015), the Court noting several disputes between the parties over a proposed schedule governing further proceedings in this case, the parties shall meet and confer and submit to the Court for approval, on or before August 3, 2015, a joint proposed scheduling order that, inter alia:

1. Sets interim deadlines for the production of the Kos computer tapes;
2. Provides for a thirty (30) day gap between the close of fact discovery and the service of expert reports;
3. Does not combine class certification and summary judgment briefing; and
4. Does not set a trial date. A trial date will be set in due course.

IT IS FURTHER ORDERED that a telephone status conference with liaison counsel is **SCHEDULED** for Thursday, August 6, 2015, at 4:30 P.M. The purpose **[*12]** of the telephone conference is to address the status of any unresolved discovery disputes or scheduling issues referenced in the above required joint reports, and any other issues ripe for discussion which shall be summarized in a joint report submitted to the Court on or before August 3, 2015.

Liaison counsel for Abbvie defendants shall initiate the telephone status conference. Any other attorneys who have appeared in the case may participate in the conference.

---

[6] ***Rule 26(b)(2)(C)*** provides that:

> On motion or on its own, the court must limit the frequency or extent of discovery otherwise allowed by these rules or by local rule if it determines that: (i) the discovery sought is unreasonably cumulative or duplicative, or can be obtained from some other source that is more convenient, less burdensome, or less expensive; (ii) the party seeking discovery has had ample opportunity to obtain the information by discovery in the action; or (iii) the burden or expense of the proposed discovery outweighs its likely benefit, considering the needs of the case, the amount in controversy, the parties' resources, the importance of the issues at stake in the action, and the importance of the discovery in resolving the issues.

LexisNexis® Headnotes

Evidence > ... > Lay Witnesses > Opinion Testimony > Personal Perceptions

Evidence > Weight & Sufficiency

HN1[] **Opinion Testimony, Personal Perceptions**

Under the Federal Rules of Evidence, a business owner is generally permitted to offer an opinion as to his business's value or its future profitability. The admissibility of the opinion and the weight it is to be given are, however, separate issues.

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

HN2[] **Summary Judgment, Entitlement as Matter of Law**

Summary judgment acts to pierce the boilerplate of the pleadings and assay the parties' proof in order to determine whether trial is actually required. It is appropriate when the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. In this context, "genuine" means that the evidence is such that a reasonable jury could resolve the point in favor of the nonmoving party.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN3[] **Burdens of Proof, Movant Persuasion & Proof**

To succeed on a motion for summary judgment, the moving party must show that there is an absence of evidence to support the nonmoving party's position. If this is accomplished, the burden then shifts to the nonmoving party to establish the existence of an issue of fact that could affect the outcome of the litigation and from which a reasonable jury could find for the nonmoving party. The nonmoving party must adduce specific, provable facts demonstrating that there is a triable issue. The mere existence of some alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no genuine issue of material fact.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN4[] **Sherman Act, Claims**

As a general rule, on summary judgment the inferences to be drawn from the underlying facts must be viewed in the light most favorable to the party opposing the motion. But the rule is different in an antitrust context. ***Antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, case. In particular, conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. To survive a motion for summary judgment, a plaintiff seeking damages for a violation of *§ 1* must present evidence that tends to exclude the possibility that the alleged conspirators acted independently.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN5[] **Sherman Act, Claims**

In order to demonstrate a factual basis for an assertion that there was a combination or conspiracy, in restraint of trade or commerce that involved the defendants, under *15 U.S.C.S. § 1*, the antitrust plaintiff should present direct or circumstantial evidence that reasonably tends to prove that the defendants had a conscious commitment to a common scheme designed to achieve an unlawful objective.

Civil Procedure > Judgments > Summary Judgment > Opposing Materials

Evidence > Authentication

Civil Procedure > Judgments > Summary Judgment > Supporting Materials

HN6[] **Summary Judgment, Opposing Materials**

Documents supporting or opposing summary judgment must be properly authenticated.

Antitrust & Trade Law > Regulated Practices

HN7[] **Antitrust & Trade Law, Regulated Practices**

The antitrust laws do not require a company to compete with other actors in its market. A company is perfectly free under the antitrust laws to concentrate on its own chosen niche, leaving the broader market for others to exploit.

Antitrust & Trade Law > Regulated Practices

HN8[] **Antitrust & Trade Law, Regulated Practices**

Conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy.

Opinion

[*3] MEMORANDUM AND ORDER ON DEFENDANTS' MOTIONS FOR SUMMARY JUDGMENT

STEARNS, J.

In this antitrust case, plaintiff Evergreen Partnering Group, Inc., seeks to prove that its business failed because of a conspiracy orchestrated by the defendant polystyrene **[**3]** converters and their trade association, the American Chemistry Council. This court granted a motion to dismiss Evergreen's Complaint on June 7, 2012. *Evergreen Partnering Grp., Inc. v. Pactiv Corp., 865 F. Supp. 2d 133 (D. Mass. 2012)*. The First Circuit reversed and remanded the case. *Evergreen Partnering Grp., Inc. v. Pactiv Corp., 720 F.3d 33 (1st Cir. 2013)*.[1] Discovery now complete, before the court are defendants' motions for summary judgment.[2]

BACKGROUND[3]

Evergreen was the brainchild of Michael Forrest. He envisioned a profitable business **[*4]** model based on the conversion of polystyrene lunch trays into raw, food-grade resin, which could be used in the manufacture of "green" polystyrene products.[4] To succeed, the model required a partnership between Evergreen and at least one established polystyrene converter.

Evergreen's Founding

---

[1] More specifically, the First Circuit reversed this court's dismissal of Evergreen's Sherman Act claim, and ordered that discovery be taken. The Court of Appeals also remanded a claim brought under the Massachusetts Unfair Trade Practices Act, Mass. Gen. Laws ch. 93A, for further consideration. This court dismissed the Chapter 93A claim on January 28, 2014 (Dkt #174).

[2] Also before the court are motions filed by defendants to strike: (1) the report and testimony of plaintiff's expert, Francesca Scarito (Dkt #218); and (2) portions of the affidavit of Michael Forrest, certain exhibits, various deposition excerpts, and portions of Evergreen's statement of material facts (Dkt #248). These motions will be discussed where relevant in this memorandum.

[3] Three statements of undisputed material facts have been submitted by the parties. The first was filed jointly by defendants (DSOF, Dkt #239). The second **[**4]** was filed by Evergreen and is not, strictly speaking, a response to the DSOF; rather, it states additional facts that Evergreen proffers as having a material bearing on the litigation (ESOF, Dkt #241). Finally, the defendants have filed a joint response to Evergreen's filing (RSOF, Dkt #250). The pertinent Local Rule provides that "[m]aterial facts of record set forth in the statement required to be served by the moving party will be deemed for purposes of the motion to be admitted by opposing parties unless controverted by the statement required to be served by opposing parties." *D. Mass. L.R. 56.1*.

[4] Polystyrene is a polymer plastic formed from styrene, a liquefied hydrocarbon (petroleum). Often confused with Styrofoam, a Dow Chemical Company brand of insulation, polystyrene's principal commercial use is in the manufacture of food containers and protective **[**5]** packaging. Because it is biodegradation resistant, it is an environmentally controversial packaging medium. "Green" polystyrene is, in the industry's phrase, simply "Post-Consumer Recycled Content." It has the same chemical composition as polystyrene in its processed form and has no greater degradability. There is no formal industry or regulatory standard governing the percentage of recycled content a polystyrene product must contain to be labeled "green."

In the early 1990s, Nova Chemicals began an experimental program in the Boston Public Schools (BPS), collecting polystyrene waste and converting it into recycled resin. DSOF ¶ 8; ESOF ¶¶ 7-8; Defs.' Ex. 41 at 10779 (*TAP in Action* article, no date). Nova used the recycled resin itself or sold it to manufacturers of non-food related products. DSOF ¶ 8. Forrest arranged with Nova to purchase its excess recycled resin. *Id.* ¶ 9; Defs.' Ex. A at 48-49 (Forrest Dep.). By 2000, Nova had lost interest in the experiment and made a gift of the recycling equipment to BPS. DSOF ¶ 10. Nova also gave Forrest an exclusive license to purchase the recycled resin produced by BPS with the gifted equipment. *Id.;* ESOF ¶ 9; Defs.' Ex. **[**6]** A at 45 (Forrest Dep.).

Evergreen was incorporated by Forrest in 2000. Forrest Aff. ¶ 9.[5] Evergreen's mission was to develop new product lines using the BPS resin, while promoting recycling in other school districts.[6] In 2001, Evergreen received a "Non-Objection" letter from the Food and Drug Administration (FDA) sanctioning the use of "food-grade" recycled resin harvested through "controlled source collection." Defs.' Ex. 5 (FDA Non-Objection letter). From 2003 to 2005, Evergreen paid Commodore Plastics to manufacture food trays from the BPS recycled resin, which it then sold **[*5]** back to BPS.[7] DSOF ¶ 16; ESOF ¶ 10; Defs.' Ex. A at 77-78 (Forrest Dep.). The recycling program was later expanded to public schools in Providence, Rhode Island. DSOF ¶ 17; Defs.' Ex. A at 75 (Forrest Dep.).

Evergreen's Business Model

The experience in Boston and Providence led Forrest to reimagine his business on a national scale. The national business model envisioned three revenue streams for Evergreen. First, the institution contributing polystyrene waste would pay Evergreen **[**8]** an "environmental fee" for recycling the waste lunch trays.[8] Second, the polystyrene converter would pay for the recycled resin Evergreen produced. And third, the converter would pay a commission or royalty to Evergreen on every sale of a product containing Evergreen's resin.[9] DSOF ¶ 13; Defs.' Ex. A at 56 (Forrest Dep.). According to Evergreen's expert witness, Francesca Scarito, without all three of these revenue streams, "[Evergreen] could not generate sufficient cash to meet ongoing capital requirements or scale the business." Scarito Rep. (Dkt #221, Ex. B) at 3.

Although not explicitly stated by Evergreen, there were other contingencies that also had to be met for the business model to succeed. First, school districts had to agree to the model, which required a pairing of waste haulage costs with supply contracts. Second, because Evergreen did not have the capacity or ability to manufacture and distribute

---

[5] Defendants move to strike those portions of Forrest's affidavit that express an opinion as to the viability of Evergreen's business model, arguing that such statements are inadmissible as Forrest has not been qualified to offer an expert opinion on the polystyrene market. ***HN1***[] Under the Federal Rules of Evidence, a business owner is generally permitted to offer an opinion as to his business' value or its future profitability. **[**7]** *See* *Fed. R. Evid. 701* (advisory committee notes) ("[M]ost courts have permitted the owner or officer of a business to testify to the value or projected profits of the business, without the necessity of qualifying the witness as an accountant, appraiser, or similar expert.") (citing as an example, *Lightning Lube, Inc. v. Witco Corp., 4 F.3d 1153 (3d Cir. 1993))*. The admissibility of the opinion and the weight it is to be given are, however, separate issues.

[6] At the time he incorporated Evergreen, Forrest believed that it was only a matter of time until "the market would require that PS [polystyrene] food service products contain recycled content or be banned from the marketplace." Forrest Aff. ¶ 13. The only school system that came to require recycled content in food service products was BPS. Other school systems that considered the requirement rejected it because of the cost. *See, e.g.*, Defs.' Ex. G at 39 (Coury Dep.).

[7] Evergreen sold the trays to a distributor, Eastern Bag, which in turn sold them to BPS.

[8] Although Evergreen does not explicitly state why schools would be willing to pay this fee, the supposition is that the school would rebate the savings gained through lower drayage fees because of the diversion of some of the waste to Evergreen.

[9] In 2003, Evergreen attempted unsuccessfully to obtain a method patent for aspects of its business model. Defs.' Ex. 833 (Feb. 3, 2005 Patent Application Publication No. US 2005/0027555 A1 (showing a provisional application date of July 30, 2003)). The patent was rejected for a final time in 2011. Defs.' Ex. A at 1734 (Forrest Dep.). Prior to the final rejection, Forrest kept the application **[**9]** alive for purposes of this lawsuit. Defs.' Ex. 40 (July 11, 2011 e-mail from George McCormack to Forrest).

a final polystyrene product, it would have to successfully partner with one or more of the established polystyrene converters. That in turn depended on the ability of Evergreen to produce recycled resin at a price competitive with that of virgin resin.[10] DSOF ¶ 15. Finally, the converter would have to agree to pay a commission or royalty to Evergreen on the sale of "green" polystyrene products containing Evergreen's resin.

Early attempts to put together deals

Between 2002 and 2005, Evergreen attempted to partner with several established converters in order to fund the expansion of its business. In particular, Forrest solicited the aluminum giants, Alcoa and Reynolds, both of which had a small presence in the polystyrene foodservice products market. DSOF ¶¶ 21-22. Neither company expressed an interest in Evergreen's business model. In 2005, Forrest approached two small polystyrene converters, Fabri-Kal and Placon. They **[*6]** too declined to partner with Evergreen. DSOF ¶¶ 24-25.

In 2005, there were five polystyrene converters with a national market presence: Pactiv Corporation, Dolco Packing, Solo Cup Company, and Dart Container Corporation (collectively the producer defendants), and Genpak, LLC (which settled with Evergreen after the Court of Appeals issued its decision, Dkt #207). Forrest Aff. ¶ 15. Insofar as Forrest was concerned, Evergreen's ultimate success depended on its **[**11]** ability to partner with one of these "big five" polystyrene producers. *Id.* ¶ 14. However, Forrest came to believe by early 2005 that the big five were implacably opposed to recycling. He reports being told by Sodexo, "a food service facility management and procurement group," that Dart and Pactiv in particular had zero interest in producing a "green" polystyrene line using Evergreen's recycled resin. *Id.* ¶ 17.

In 2005, Evergreen came up with sufficient financing to open a facility in Norcross, Georgia, to recycle food trays collected from the Gwinnett County School System (Gwinnett Schools). *Id.* ¶ 20; ESOF ¶ 20.[11] Simultaneous with the opening of the Norcross facility, Evergreen agreed with Sysco, a distributor of food service polystyrene, to jointly produce "green" polystyrene food containers (among other items) to be marketed as part of Sysco's projected "Earth Plus" product line. Forrest Aff. ¶ 21; Pl.'s Ex. 1034 (Aug. 23, 2005 letter from Maurice Malone of Sysco to Forrest).

In July of 2005, Forrest pitched the Sysco venture to Norm Patterson, the General Manager of the Midwest Division of Dolco.[12] Forrest Aff. ¶ 22; DSOF ¶ 185. Forrest, Patterson, and a Sysco representative met in November of 2005 and made progress towards reaching an agreement. Forrest Aff. ¶ 23. According to Forrest, Sysco believed that a deal might result in sales of upwards of $50 million in "green" polystyrene products. *Id.* Despite the promising start, Forrest says that he was later told by Patterson that the heads of Dolco and Dart had opposed the recycling effort at a meeting of the Plastics Food Packaging Group (Plastics Group). *Id.* ¶ 24. Patterson also allegedly said that Dolco was unwilling to compete with Pactiv. *Id.*

---

[10] Scarito, Evergreen's expert, posited that Evergreen's resin could turn a profit at a price point of $0.60 per pound, assuming that the other contingencies were also met. Scarito Rep. at 3. The expert report does not take into account fluctuations in the world price of oil. (The price of polystyrene moves in tandem with the oil market, **[**10]** that is, the lower the price of oil, the cheaper virgin resin is to manufacture). It is undisputed that Evergreen was never able to produce recycled resin at a price lower than $2.00 per pound. DSOF ¶ 35; Defs.' Ex. I at 384 (LoRe Dep.).

[11] The BPS facility was owned and operated by BPS, with Evergreen having the exclusive right to purchase the recycled resin. The Georgia facility was the first recycling plant actually owned and operated by Evergreen. **[**12]** DSOF ¶ 27.

[12] At about the same time, Evergreen obtained a commitment from Patterson for the purchase of $75,000 worth of Evergreen recycled resin at $0.45 per pound. DSOF ¶¶ 196-197; Defs.' Exs. 651 (July 13, 2005 e-mail from Forrest to Patterson) and 652 (Aug. 9, 2005 e-mail from Patterson to Forrest). Dolco never actually received the resin. DSOF ¶ 198; Defs.' Ex. 653 (Evergreen invoices).

Despite Patterson's misgivings, in early December of 2005, Dolco extended a formal **[**13]** offer to Sysco.[13] DSOF ¶ 206; Defs.' Ex. 657 (Dec. 6, 2005 Dolco proposal to Sysco). However, no final agreement was ever forged. According to Forrest, "it became clear that Patterson would not do a 'green' foam deal with Sysco, although Patterson was eager to purchase recycled resin made by [Evergreen]." Forrest Aff. ¶ 26. Dolco places the blame for the collapse of the deal on Sysco, stating that Sysco had backed away from producing a **[*7]** line of recycled content products.[14] DSOF ¶ 213.

Although Evergreen's Norcross facility had begun processing polystyrene trays from the Gwinnett Schools in 2005, **[**14]** [15] it was not able to convert the recovered resin into usable pellets until 2006 when Dolco agreed to sell it an extruder. DSOF ¶ 29; Defs.' Ex. B at 365-366 (Patterson Dep.). In November of that year, Forrest contacted Genpak's president, Jim Reilly, with a proposal that Genpak manufacture a product for Sysco's proposed Earth Plus line using Evergreen's recycled resin. Forrest Aff. ¶ 31. According to Forrest, Reilly (like Patterson before him), expressed initial interest in partnering with Evergreen, as well as a willingness to pay Evergreen the stipulated royalty. *Id.* However, no firm commitment or further negotiations among Evergreen, Genpak, and Sysco followed.

In January of 2007, Evergreen and Genpak began negotiations over a deal to produce lunch trays for the Gwinnett Schools.[16] *Id.* ¶ 34. (The trays had previously been manufactured by Pactiv. DSOF **[**15]** ¶ 32; Pl.'s Ex. 906 at 439 (Coury Dep.)). Genpak submitted a bid for a tray made with virgin resin and another for a tray incorporating Evergreen's recycled resin. Forrest alleges that Reilly sought to pull the rug out from under the deal by withdrawing Genpak's bid at the last minute.[17] Forrest Aff. ¶ 34. Despite the attempt, Genpak and Evergreen won the bidding.[18]

The Plastics Group

The Plastics Group had been established by the ACC to act as the industry's spokesperson in countering negative publicity **[*8]** about the environmental impact of polystyrene. DSOF ¶¶ 347-348; Defs.' Ex. M at 15-19 (Levy Dep.).

---

[13] The proposal incorporated the most controversial aspect of Evergreen's business model, that is, Dolco offered to pay Evergreen a royalty for the use of its recycled resin. Forrest Aff. ¶ 23; DSOF ¶ 207; Defs.' Ex. 658 (Nov. 30, 2005 e-mail from Patterson to Forrest).

[14] Patterson reported that Sysco had hit a "bump in the road" in unveiling an environmental line of polystyrene containers. Namely, Sysco had backed away from "green activities" because of a controversy about a misleading claim that it had made regarding the content of one its products. DSOF ¶ 213; Defs.' Ex. B at 105-107 (Patterson Dep.).

[15] Before its demise, the Norcross facility also processed polystyrene waste collected from the Pasco County Schools, Florida, and occasional loads from the DeKalb County Schools, Rockdale Schools, and Newton County Schools, all in Georgia. DSOF ¶ 31. The facility also processed some waste from Publix, a large, Southern-based grocery chain. *Id.*

[16] As with the aborted Dolco deal, the proposal included an agreement by Genpak to pay Evergreen a royalty for the use of Evergreen's recycled resin in the lunch trays. Pl.'s Ex. 1029 (January 17, 2007 e-mail exchange between Reilly and Forrest); Pl.'s Ex. 1036 (no date e-mail from Jeff [LNU] to Reilly and Tim O'Connor of Genpak).

[17] Forrest alleges that Reilly's conduct was "directly correlated to the March 6/7, 2007 group meeting," although he offers no particulars about the alleged meeting. Forrest Aff. ¶ 34. Evergreen's own exhibits indicate that the attempted bid retraction in fact occurred a month later in mid-April 2007. Pl.'s Ex. 1035 (April 16, 2007 e-mail chain between Forrest and unidentified individuals at Southeastern Paper Group).

[18] The Evergreen/Genpak bid was identical in price to Pactiv's bid. DSOF ¶ 32; Defs.' Ex. G **[**16]** at 235 (Coury Dep.). The Gwinnett Schools, however, refused to accede to Evergreen's demands that it require all trays purchased contain recycled content, and that it rebate any savings on waste haulage to Evergreen. DSOF ¶ 33; Pl.'s Ex. 906 at 445 (Coury Dep.). Ultimately, apart from BPS, none of the schools that Evergreen approached was willing to require that purchased trays contain recycled content. DSOF P 34 (citing refusals by the Atlanta Public Schools, Cobb County Public Schools, DeKalb County Public Schools, New York Public Schools and Orange County Public Schools). Similarly, Evergreen was unable to extract an environmental fee (one of its three essential revenue streams) from any school. *Id.;* Defs.' Ex. 39 (Aug. 1, 2009 e-mail from Scarito to Forrest).

It described itself as being "dedicated to educating the public about the importance and benefits of plastic foodservice packaging." DSOF ¶ 348. Its day-to-day activities were overseen by **[**17]** Senior Director Michael Levy and focused on lobbying against efforts to ban polystyrene products. *Id.* ¶¶ 348-349. One of the talking points in these lobbying efforts was polystyrene's recycling potential. *Id.* ¶ 350. The Plastics Group stated a willingness to engage with recyclers in the effort to defeat the polystyrene prohibitionists, so long as any entity it enlisted for this purpose "was actually recycling." DSOF ¶ 369; Defs.' Ex. M at 95-96 (Levy Dep.).

In May of 2007, the Plastics Group formed a subgroup called the Recycling Task Force (Task Force). Forrest Aff. ¶ 38; DSOF ¶ 353. The Task Force was composed of four of the national converters, Pactiv, Solo, Dolco, and Genpak, with Dow Chemical Company as a fifth member.[19] *See* Pl.'s Ex. 1014 (July 10, 2007 [Plastics Group] Recycling Task Force Update). According to defendants, the Task Force was created because "political pressure to enact polystyrene bans was on the upswing in places like California." Joint Defs.' Mem. at 17. The mission of the Task Force was "specifically to identify and report back to the [Plastics Group] on examples of viable polystyrene recyclers that could be helpful in the effort to defeat proposed bans." *Id.* ***[**18]***

Shortly before the Task Force was created, Reilly suggested that Evergreen seek financial support from the members of the Plastics Group to open a recycling facility in California. Forrest Aff. ¶ 35. On March 28, 2007, Forrest made a presentation to the Plastics Group describing in detail Evergreen's business model. DSOF ¶ 371; Defs.' Ex. A at 1395 (Forrest Dep.). On May 21, 2007, Forrest submitted a formal proposal to the Plastics Group. Defs.' Ex. 212 (May 21, 2007 Evergreen proposal to Plastics Group). It laid out two options, both of which depended on a financial subsidy. The first — and leanest — alternative required a $500,000 payment upfront to Evergreen by the Plastics Group and a promise that its members would pay "green commissions [to Evergreen] from environmentally friendly products [produced] by the member converters." *Id.* at 4. The second option required Plastic Group members to "provide the upfront capital to set up the recycling facilities" (in exchange for dropping the royalty payments provision). *Id.* This latter option contemplated a down payment of $500,000, and over time, the infusion of $2.6 million in additional funds **[**19]** into the California facility. *Id.* at 5. Forrest revised the proposal on May 30, 2007, to include a third option that called for a $500,000 initial subsidy and a commitment that each converter purchase a set amount of resin from Evergreen over the life of the plant. DSOF ¶¶ 384-385; Defs.' Ex. 214 (May 30, 2007 e-mail from Levy to Plastics Group senior executives).

On May 31, 2007, the Plastics Group met in a conference call to discuss Forrest's various proposals. Levy opined that Forrest's request that the Plastics Group subsidize his business model rendered the proposals "non-starters." DSOF ¶ 386; Defs.' Ex. 200 at ¶ 29 (Levy Decl.). The members of the Group concurred. Levy conveyed the Plastic Group's negative reaction to Forrest, who responded with another proposal that proved as heavily dependent on subsidies as the earlier ones. DSOF ¶¶ 387-388; Defs.' Ex. 215 (June 15, **[*9]** 2007 e-mail from Forrest to Levy). On June 20, 2007, the Task Force held a conference call to discuss Forrest's latest proposal. DSOF ¶ 389. The members proved no more amenable, prompting Levy to inform Forrest that the Plastics Group was unwilling to go forward with any one of his alternative proposals. DSOF ¶ 390; Defs.' **[**20]** Ex. 217 (June 20, 2007 letter from Levy to Forrest).

Packaging Development Resources

Around this time, Evergreen became aware of a potential competitor, Packaging Development Resources (PDR). Tom Preston and Tom Cantwell, the founders of PDR, had, in 2005, approached Forrest offering to assist Evergreen's efforts to expand its fledgling recycling business to other city school systems. The discussions ended without any agreement. Forrest Aff. ¶ 18; DSOF ¶ 26. Preston and Cantwell believed that Evergreen's business model would not work outside of Boston and Providence because, in most localities, schools "were constrained by law to select the cheapest product for each type of product they purchased," and could not pay Evergreen a premium for recycled content. DSOF ¶ 26. Nor were they permitted to offset the price for products containing recycled resin with projected savings on waste haulage. *Id.* Preston and Cantwell proposed as an alternative that

---

[19] Dart, for some reason, was not named to the Task Force.

Evergreen simply sell its recycled content resin directly to converters for general use (which would have eliminated the revenue stream that Evergreen hoped to derive from royalties paid on finished "green" products). Although Forrest rejected **[**21]** this pared-down strategy, it became the business model for PDR. DSOF ¶ 26 and 65.

PDR was incorporated in California in 2006. DSOF ¶ 57. Preston and Cantwell compared PDR's business model to that of the national resin producers, stating that, like them, PDR did not tax its customers with "any type of license fee or royalty, or payback of a certain amount of sales." DSOF ¶ 65; Defs.' Ex. E at 195 (Preston Dep.); Defs.' Ex. L at 173-174 (Cantwell Dep.). PDR in short order won contracts in California with the San Diego, Long Beach, Burbank, Torrance, Chula Vista, Orange, and San Ysidro school systems to collect and recycle their polystyrene waste during the 2006-2007 school year. DSOF ¶ 69.

On May 21, 2007, an industry publication, *Plastics News*, published an article praising PDR for its successes in diverting polystyrene school lunch trays from landfills by recycling their resin content. Forrest Aff. ¶ 43; Defs.' Ex. 219 (May 21, 2007, *Plastics News*, "PDR Finds Uses for Difficult to Recycle PS"); *see also* DSOF ¶¶ 400-406. Forrest stated that he was "shocked" by the article because he was unaware of any prior industry recognition of PDR, and that prior to the article, Evergreen had been **[**22]** acknowledged as operating the only going facility producing food-grade recycled resin. Forrest Aff. ¶ 44.

Forrest decided to conduct his own investigation of PDR. He paid a visit to the site of PDR's facility in Santa Ana, California, where he claims to have spoken with truck drivers delivering trays collected from the San Diego schools. *Id.* ¶ 45.[20] The drivers told him that the trays were not being recycled by PDR, but were instead being dumped into landfills. *Id.* Forrest relayed his findings to Levy, who made a site visit of his own on June 18, 2007. *Id.* ¶ 46. Levy found the PDR facility locked with no one present. Defs.' Ex. 221 (June 18, 2007 memo to file from Levy). Levy reported the results of his **[*10]** visit to the Task Force. *Id.* Despite his and Levy's "findings," Forrest alleges that the Plastics Group continued to promote PDR at Evergreen's expense and assisted PDR in landing accounts with additional school districts in California, Philadelphia, and New York City. Forrest Aff. ¶ 48.

Activities post the May 31, 2007 Plastics Group meeting

Later that same **[**23]** year, in August of 2007, Dolco and Genpak entered into a funding agreement with Evergreen under which each advanced Evergreen $75,000 and committed to sustained purchases of recycled resin from Evergreen's Georgia facility. DSOF ¶¶ 29 and 120; Defs.' Ex. 43 (July 27, 2007 Dolco-Genpak-[Evergreen] funding agreement). Between 2006 and 2008, Dolco purchased 250,000 pounds of Evergreen's resin. Forrest Aff. ¶ 28. Similarly, between 2007 and 2008, Genpak purchased 300,000 pounds. *Id.* ¶ 36. During this same period, Pactiv tested a sample of Evergreen's resin and began negotiating a contract, but could not come to terms with Evergreen's demand for a royalty or licensing fee on all sales of Pactiv's finished "green" products using Evergreen's resin.[21] DSOF ¶¶ 137-149.

Between May and November of 2008, Forrest entered into negotiations with Solo. Evergreen provided 20,000 pounds of recycled resin to Solo for testing. Forrest Aff. ¶ 51. Forrest alleges that Solo's president later informed

---

[20] None of the drivers are listed by name, nor are dates given when the alleged interviews took place, or whether anyone else was present.

[21] Demonstrating the value that Forrest placed on the royalty component of Evergreen's business model, he estimates that every $10 million in "green" sales would have resulted in $400,000 in royalty payments to Evergreen. Forrest Aff. ¶ 29. Pactiv, for its part, had told Forrest that, "[g]iven [the] narrow margins on this product [school lunch trays]," it would be "unable to absorb any additional costs," which "would have to be passed on **[**24]** to the school district." Defs.' Ex. 835 (May 28, 2008, e-mail from Terry Coyne of Pactiv to Forrest). Because of the narrow margins on lunch trays, neither Solo nor Dart manufactured them. DSOF ¶¶ 247 and 297.

him that Solo had been told by an unnamed person, presumably someone from the Plastics Group, not to do business with Evergreen. *Id.*[22]

PDR was also actively soliciting business from Plastics Group members during this same time period. Dart entered into a letter of intent with PDR in December of 2007 to purchase PDR's recycled resin. DSOF ¶ 75. Dart, however, rescinded the contract with PDR in June of 2008, after determining that PDR's resin did **[**25]** not meet its quality standards. *Id.* ¶ 76. In August of 2008, PDR entered into "a loan and materials purchase agreement with Pactiv," under which Pactiv extended PDR a loan of $415,000, in exchange for a right of first refusal to purchase PDR's resin. *Id.* ¶¶ 78-79 and 135. PDR underwent a "stewardship" program with Pactiv to bring its resin into compliance with Pactiv's quality standards. *Id.* ¶ 80. PDR sold "tens of thousands of pounds of resin to Pactiv," and by October of 2008, PDR was producing 15,000 pounds of recycled resin a month. *Id.* ¶ 81. Pactiv was able to produce products containing high percentages of PDR resin, some with a recycled content approaching 100%. *Id.* ¶ 82. Solo also purchased 1,000 pounds of PDR resin for quality testing, but by the time the testing was complete, PDR was no longer in business. *Id.* ¶¶ 256-258.

Despite the dealings with PDR, the Plastics Group continued to promote Evergreen as a recycler, inviting it to make a **[*11]** presentation at a Group executive session on March 19, 2008. *Id.* ¶¶ 421-424. In April of 2008, it recommended Evergreen to Dolco as a recycling partner in New York.[23] *Id.* ¶ 425. In October of 2008, Levy sent Evergreen a letter of recommendation **[**26]** at Forrest's request "recognizing the success of [Evergreen's] closed-loop recycling system for polystyrene in New England and the Atlantic Coast Region." DSOF ¶ 432; Defs.' Ex. 232 (Oct. 7, 2008 letter from Levy to Forrest).

Failure of Evergreen and PDR

In 2008, Evergreen and Genpak lost the Gwinnett Schools lunch tray account to Pactiv. Evergreen blames Genpak for submitting a bid above market (while Pactiv's bid was below market). Opp'n at 29; DSOF ¶ 129. As a result, Evergreen was forced to close the Norcross facility in May of 2008. DSOF ¶ 53. Although it opened a smaller facility in Lawrenceville, Georgia, by November of 2008 this facility was also no longer economically viable. *Id.* Despite Evergreen's loss of any actual production capacity, in February of 2009, Genpak's President Reilly wrote to Evergreen with the assurance that: "At Genpak we understand [Evergreen's] need to make ["Green Products"] a revenue stream and are willing to pay this additional fee." Forrest Aff. ¶ 32. The following month, Pactiv presented Evergreen with a letter **[**27]** of intent to purchase a minimum of 300,000 pounds of its recycled resin yearly, although Evergreen never signed the letter. DSOF ¶ 142; Defs.' Ex. 840 (March 28, 2008 letter from Terry Coyne of Pactiv to Forrest).

PDR was also forced out of business in the first quarter of 2009 as virgin resin prices continued to plummet (to $0.50 per pound as of October 2008)[24] while the production costs of PDR's recycled resin were many multiples higher ($8.10 per pound as of October 2008), a price well above what any converter was willing to pay. DSOF ¶¶ 85-88.[25]

Procedural Background

---

[22] Like Pactiv, Solo contends that it was unable to come to terms with Evergreen because it found Evergreen's proposed pricing "confusing," and that based on the price of Evergreen's resin alone, before any royalty or commission was paid, Solo would face a 5% increase in its production costs. DSOF ¶¶ 265, 270-274, 277 and 289.

[23] At least one member (Dart), recommended Evergreen to a client, Publix, when the grocery chain was seeking a polystyrene recycler. DSOF ¶ 332.

[24] The world price of oil dropped precipitously in the second half of 2008. DSOF ¶ 84.

[25] It will be recalled that Evergreen was never able to produce recycled resin at a cost of less than $2 per pound. *See* n.10, *supra*.

Evergreen filed suit in the federal district court on May 9, 2011, alleging violations of the antitrust laws. On June 7, 2013, this court granted defendants' motions to dismiss, after determining that the factual allegations contained in the Complaint did not "possess enough heft" to amount to "a plausible entitlement to relief" under the holding of *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. *Evergreen, 865 F. Supp. 2d at 138*.

In reversing this court's dismissal, the First Circuit did not **[**28]** suggest a misapplication of the ***antitrust law***. Rather, the First Circuit faulted the court's decision for importing summary judgment standards into the pleading stage. In sum, the First Circuit found that the facts alleged in the Complaint, viewed holistically in Evergreen's favor, made out a potential claim of an antitrust violation.

More specifically, the First Circuit identified the following facts, that when "taken together" provided "a sufficient basis to plausibly contextualize the agreement necessary for pleading a *§ 1* [Sherman Act] claim." *Evergreen, 720 F.3d at 47*. The First Circuit focused on the allegation that **[*12]** a meeting of the Plastics Group, said to have taken place in 2005 or 2006, established the "locus of agreement" among its members. *Id.* Moreover, the participation of all of the named defendants in the Plastics Group allegedly served to facilitate anticompetitive scheming. *Id. at 47 and 49*. The First Circuit also dwelt on allegations that two of the major polystyrene producers — Pactiv and Dart — made no secret of their antipathy to recycling, and together paid the bulk of the dues collected by the Plastics Group. This dues dominance, the First Circuit speculated, might have enabled Pactiv and Dart to **[**29]** exert undue pressure on the weaker members of the Group. *Id. at 47*. The First Circuit found further support for this inference in the defendants' alleged "parallel conduct" following the "locus of agreement" meeting, which culminated in a "global failure" to embrace Evergreen's business model. According to the First Circuit's reading of the Complaint: "Dolco abruptly withdrew its interest in producing for Evergreen's closed-loop system after the meeting," while Genpak, Pactiv, and Solo refused to work with Evergreen despite being asked by their distributors to do so; Pactiv induced Sodexo to cancel its contract with Evergreen; Pactiv, Dart, and ACC instructed their customers that recycling was not feasible; and the Plastics Group and its members connived to deny Evergreen funds for expansion into California. *Id. at 47-48*. The First Circuit found particularly persuasive Evergreen's allegation that the Plastics Group had promoted a "sham" competitor, that is, PDR, at Evergreen's expense. *Id. at 48*. Finally, the First Circuit pointed to allegations that the defendants were undermining their own economic self-interest by refusing to embrace Evergreen's business model. *Id. at 50*.

The First Circuit faulted this court's opinion **[**30]** for drawing impermissible inferences in the defendants' favor. In particular, it held that the district court "either credited as true or inferred the truth of defendants' bases for rejecting dealings with Evergreen," including the assertions: "that while several of the producer defendants tested or purchased Evergreen's resin, they 'found the results disappointing for various and often different reasons'"; "that partnering with Evergreen would have 'significantly increased [defendants'] costs'"; "that Evergreen's [recycled resin] was, in fact, more expensive than virgin resin"; "that Evergreen's business plan stood to raise costs for the producer defendants and their consumers"; "that [Evergreen's plan] required the producer defendants to expand beyond their established market niches and disrupt a profitable status quo"; and finally, "that it would have undermined the producer defendants' existing and even more profitable environmentally conscious products." *Id. at 42 and 50* (internal citations removed). As the discussion below will demonstrate, all of the district court's inferences were borne out during discovery.

DISCUSSION

HN2[] Summary judgment "acts 'to pierce the boilerplate of the pleadings **[**31]** and assay the parties' proof in order to determine whether trial is actually required.'" *Rodriguez-Pinto v. Tirado-Delgado, 982 F.2d 34, 38 (1st Cir. 1993)* (internal citation removed). It is appropriate when "the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. "In this context, 'genuine' means that the evidence is such that a reasonable jury could resolve the point in favor of the nonmoving party." *Rodriguez-Pinto, 982 F.2d at 38* (internal quotation marks and citation removed). ***HN3***[] "To succeed, the moving party must show that **[*13]** there is an absence of evidence to support the nonmoving party's position." *Rogers v. Fair, 902 F.2d 140, 143 (1st Cir. 1990)*. If this is accomplished, the burden then "shifts to the nonmoving party to establish the existence of an issue of fact that could affect the outcome of the litigation and from which a reasonable jury could find for the [nonmoving party]." *Id.* The nonmoving party "must adduce specific, provable facts demonstrating that there is a triable issue." *Id.* (internal quotation marks and citation omitted); *see also* *Lujan v. Nat'l Wildlife Fed'n, 497 U.S. 871, 888, 110 S. Ct. 3177, 111 L. Ed. 2d 695 (1990)*. "[T]he mere existence of *some* alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no *genuine* issue **[**32]** of *material* fact." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247-248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)* (emphases in original).

HN4[] As a general rule, on summary judgment "'the inferences to be drawn from the underlying facts . . . must be viewed in the light most favorable to the party opposing the motion.'" *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1985)*, quoting *United States v. Diebold, Inc., 369 U.S. 654, 655, 82 S. Ct. 993, 8 L. Ed. 2d 176 (1962)*. But the rule is different in an antitrust context. "[A]ntitrust law limits the range of permissible inferences from ambiguous evidence in a *§ 1* [Sherman Act] case." *Id. at 588*. In particular, "conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy . . . To survive a motion for summary judgment . . . a plaintiff seeking damages for a violation of *§ 1* must present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently." *Id.*, citing *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)* (internal citations removed).

Combination or Conspiracy

The challenge now faced by Evergreen is to demonstrate a factual basis for its assertion that there was a "combination . . . or conspiracy, in restraint of trade or commerce" that involved the producer defendants. *15 U.S.C. § 1*. ***HN5***[] In order to do so, "the antitrust plaintiff should present direct or circumstantial evidence that reasonably tends to prove that the [defendants] 'had **[**33]** a conscious commitment to a common scheme designed to achieve an unlawful objective.'" *Monsanto, 465 U.S. at 764* (citations removed); *cf.* *Am. Tobacco Co. v. United States, 328 U.S. 781, 810, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)* (the plaintiff must present evidence that proves "a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.").

It is on this crucial first element that Evergreen falters. In its attempt summon the specter of a conspiracy, Evergreen surmises: (1) that three of the defendants refused over time to deal with it out of fear of retribution by the fourth (Pactiv); (2) that the defendants took a unified position, instigated by Pactiv and Dart, against recycling in general and Evergreen's approach to recycling polystyrene waste in particular; and (3) that defendants promoted PDR as a competitor to Evergreen when they knew full well that PDR's business plan could not compete with Evergreen's superior business model. Opp'n at 3.

Refusals to deal with Evergreen

Evergreen suggests that the conspiracy sprung to life from the moment it **[*14]** sought to enter the national polystyrene market, that is, in 2005.[26] In attempting to marshal support for this theory, Evergreen cites the history of

---

[26] Defendants argue that a number of Evergreen's allegations fail on statute of limitations grounds. The Sherman Act has a four-year statute of limitations. *15 U.S.C. § 15b*. This limitation period begins to run "when a defendant commits an act that injures a plaintiff's business," *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*, although "each overt act that is part of the violation and that injures the plaintiff . . . starts the statutory period running again." *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* (internal quotation marks and citation removed). This becomes relevant only if a combination or conspiracy in fact formed in 2005. Because I find that there was no illegal combination, there is no need to determine whether later alleged overt acts may have retriggered the limitations period.

its failed business negotiations between 2005 and 2007. These, **[**34]** according to Evergreen, demonstrate a unity of opposition to recycling among Plastics Group members.[27] None of this survives scrutiny.

Evergreen **[**35]** first contends that its attempt to enter a joint venture with Dolco and Sysco in 2005 collapsed under pressure exerted by Pactiv. Evergreen argues that from the outset, Pactiv opposed recycling as a threat to the converters' economic interests.[28] In its Complaint, Evergreen alleges that a meeting took place "in or around late 2005 or early 2006," and that at the meeting, "John McGrath of Pactiv announced to the members of [the Plastics Group] that recycling polystyrene products was not an option in the industry's battle with polystyrene's critics. A representative from Dart agreed." Sec. Am. Compl. ¶ 39. Unable to produce any evidence that such a meeting in fact occurred "in or around late 2005 or early 2006," Evergreen now dates the opening manifesto of the anti-recycling campaign to a March 18, 2005 conference call that included the defendants. *See* DSOF ¶¶ 359-361 (only two Plastics Group meetings took place in the period between late 2005 and the early spring of 2006; McGrath was not present at either; and the minutes do not reflect any discussion of recycling at either meeting). The only evidence pertaining to this March 18, 2005 conference call is an unattributed draft of notes **[**36]** entitled "CA Strategy Call — PS Foodservice Bans." Pl.'s Ex. 1025.[29] According **[*15]** to the notes, the call was joined by representatives of Pactiv, Dart, and Dolco, as well as a lawyer from ACC. *Id.* at 1. Evergreen relies on the notes to support not only the proposition that the defendants shared an antipathy to recycling, but that they also resolved among themselves to choke off any tentative movement by the polystyrene industry in a "green" direction, with Dart and Pactiv acting as enforcers should any of the smaller defendants dare to break ranks.

The notes do not bear the load that Evergreen assigns them. Although the notes record comments that can be taken as critical of the costs of recycling,[30] there is nothing in the notes that lends itself to a plausible inference that the anonymous note taker witnessed the formation of a conspiracy targeting Evergreen. At most, the notes reflect **[**38]** a reluctance, as one speaker phrased it, "to pick up [the] tab to subsidize [a] costly limited [polystyrene] foodservice recycling program."[31] *Id.* at 1.

It was shortly after this conference call, in the fall of 2005, that Forrest approached Patterson of Dolco about working with Sysco to develop a "green" product line. Forrest alleges that the prospective deal fell through because "it became clear that Patterson would not do a 'green' foam deal with Sysco, although Patterson was eager to

[27] Evergreen focuses on the failure of its prospective business partners to agree to pay it a royalty or commission for the use of its recycled resin (the third essential revenue stream contemplated by its business model). As will become apparent, several of the defendants were willing to consider partnering with Evergreen, but not on the terms Evergreen demanded.

[28] For example, Forrest alleges in his affidavit that Sodexo told him that Pactiv and Dart refused its invitation to produce a green product line with Evergreen's resin in 2005. Forrest Aff. ¶ 17. There is no supporting evidence other than Forrest's say-so.

[29] Defendants argue that the notes should be stricken because they are explicitly labeled as a draft and contain multiple levels of hearsay. Def. Mem. Mot. to Strike at 6 and 12. Only one witness was asked about these notes at deposition, namely an executive of Dow Chemical (not a defendant) whose name appears on the notes as an attendee. He testified that he could not recall either having participated in **[**37]** the conference call or having ever seen the notes themselves. DSOF ¶ 115. Defendants cite to *Livingstone Flomeh-Mawutor v. Banknorth, N.A., 350 F. Supp. 2d 314 (D. Mass. 2014)*, where the court refused to consider a draft copy of a letter on summary judgment because it was "not on letterhead, [was] unsigned and was not authenticated." *Id. at 320*. Evergreen in response argues that the minutes are "a party opponents' [sic] business record, produced by the ACC, containing its admissions regarding the core matters at issue and is not hearsay." Opp'n to Mot. to Strike, at 8 (citing *Fed. R. Evid. 801(d)(2)*). To establish the notes as the admission of an opposing party, Evergreen at a minimum would be required to authenticate them, which it has failed to do. *See* *Carmona v. Toledo, 215 F.3d 124, 131 (1st Cir. 2000)* ("The law is well-established that ***HN6***[] '[d]ocuments supporting or opposing summary judgment must be properly authenticated.'") (citation omitted). In sum, the notes deserve little or no weight in the conspiracy calculus.

[30] Jim Lammers of Dart reportedly asked, "[D]o we get a sense from our opponents that we can 'win out' without having to offer [polystyrene] foodservice recycling as an answer[?]." Pl.'s Ex. 1025 at 1.

[31] It is true that one speaker suggested that support of a litter reduction campaign might defuse some of the public hostility towards polystyrene products, although it is something of a stretch to detect the stirrings of a conspiracy in this rather common-sense recommendation.

purchase recycled resin made by [Evergreen]."[32] Forrest **[*16]** Aff. ¶ 26. Dolco counters that Sysco had its own reasons for backing away from "green activities," and Evergreen has produced no evidence to the contrary. DSOF ¶ 213. (It will be recalled that less than a month **[**39]** after Patterson's statements were allegedly made Dolco put an offer on the table that acceded to every term that Evergreen had demanded).

Evergreen next points to its successful deal with Genpak in 2007 and its communications with Genpak's president, Jim Reilly, as proof of concerted opposition to recycling on the part of the producer defendants. Evergreen alleges that Genpak's attempt in March of that year to withdraw its bid on the lunch tray account with the Gwinnett Schools was the result of pressure from Pactiv.[33] If so, the gambit failed. Genpak's bid was not withdrawn and Genpak and Evergreen won the account over the other bidders, including Pactiv.[34] It was within this same time frame that Reilly urged Evergreen to submit a proposal to obtain funding from the Plastics Group. Evergreen's argument, as I understand it, is that Reilly's invitation to Forrest to seek funding from the Plastics Group reveals a subliminal unwillingness on his part to enter into a deal with Evergreen without the blessing of the Plastics Group.[35] This gloss crosses the border that demarcates the realm of permissible inference from the world of rank speculation.

Requiring unified action

---

[32] Evergreen attempts to explain the collapse of the deal by pointing to statements made by Patterson immediately after the meeting between Evergreen, Patterson, and Sysco in November of 2005. Forrest Aff. ¶ 24 (Patterson "said words to the effect 'f****g McGrath [referring to the head of Dolco] stood up in front of these — the [Plastics Group] meeting . . . and he said that — that they're not going to recycle and that Dart got up right behind him and said 'We're not going to recycle either.' Patterson then said 'I am not going to compete with Pactiv. You understand that?'"). Defendants argue that this paragraph of Forrest's affidavit should be stricken because it involves multiple levels of hearsay and is contradicted by Forrest's prior testimony. Defs.' Mem. Mot. to Strike, at 4-8. Evergreen responds with the same argument it made with respect to the unauthenticated notes, that Patterson's statements are an admission by a party opponent and are offered not to prove that there was a meeting at which the statements were made, but rather to prove "Patterson's **[**40]** state of mind at the time about the unified action and fear of retribution." Opp'n to Mot. to Strike, at 12. Patterson denies having ever heard such a statement. DSOF ¶ 112. That denial aside, Evergreen's explanation makes little evidentiary sense. In the first place, Patterson is not an employee with a senior enough position in Dolco's corporate hierarchy to bind his employer. Second, Evergreen's assertion that it is not relying on the statements for their truth is either nonsensical or disingenuous. If Evergreen is not attempting to use the statements to prove that a concerted decision was taken by the leaders of Dolco and Dart to oppose recycling, and that the alleged decision explains Patterson's reluctance to go forward with the Sysco deal, then there is no reason for them to be offered at all. Moreover, Patterson's state of mind is irrelevant to the question of whether the alleged combination or conspiracy actually existed. That aside, a statement by some unidentified person at Dolco that the company did not want to recycle or compete in Pactiv's sector of the market does not prove a conspiracy. ***HN7***[] The antitrust laws do not require a company to compete with other actors in its market. **[**41]** A company is perfectly free under the antitrust laws to concentrate on its own chosen niche, leaving the broader market for others to exploit.

[33] In support of its assertion that Genpak attempted **[**42]** to pull the bid, Evergreen points to an April 16, 2007 anonymous e-mail that states: "Michael has communicated that Jim Reilly retracted this price. Due to pressures from Kevin Kelly. We need discuss." Pl.'s Ex. 1035 (April 16, 2007 e-mail chain between Forrest and unidentified individuals at Southeastern Paper Group). The sender and recipient of the e-mail are, however, unidentified. Moreover, as apparent from the reference to "Michael," Forrest himself was the source of the allegation that Genpak had attempted to retract its bid. The email, in other words, proves little, if anything with respect to the existence of a conspiracy.

[34] Evergreen adds that yet another unidentified person at Pactiv made a "nasty" phone call to an official at the Gwinnett Schools saying that he would do "whatever is necessary to get that bid back." Pl.'s Ex. 911 at 61 (Laskowski Dep.). It is clear from the deposition testimony cited by Evergreen, however, that this conversation occurred in 2008 when Gwinnett Schools was soliciting bids on a new contract. *Id.* at 60. The court sees no connection between this later anonymous conversation and the 2007 Genpak deal.

[35] Reilly, by contrast, testified that he made the suggestion **[**43]** because he felt Genpak could not provide the depth of financial support that Evergreen required to remain economically viable. Defs.' Ex. K at 171-173 (Reilly Dep.).

Having failed to provide factual support for its allegation that Dolco and Genpak refused to deal with it (or dealt with it reluctantly) because of fear of retribution from Pactiv, Evergreen fares no better in attempting to prove that the defendants undertook at a Plastics Group or Task Force meeting to organize opposition to Evergreen's recycling efforts.

Evergreen argues that both the decision to create the Task Force and the discussion of Evergreen's proposals at the May 31, 2007 meeting were part of a process to "determine which of the two food grade recyclers, [Evergreen] or PDR, the group would support as 'viable' or 'not viable'/'pick winners and losers.'"[36] Opp'n at **[*17]** 3. According to Evergreen, the meeting amounted to an effort by defendants "as a unified group, . . . to control the way and manner that Recyclers such as [Evergreen] could do business." Opp'n at 24. In other words, Evergreen, having failed to identify a meeting in 2005 or 2006 giving birth to a conspiracy, now proffers the May 31, **[**44]** 2007 meeting as an alternative cradle for the plot.[37]

Evergreen does not, however, offer any plausible evidence that defendants, through the Task Force or the larger Plastics Group, were attempting to suppress Evergreen. While Evergreen asserts that McGrath (the president of Pactiv) all but admitted in his deposition to the conspiratorial nature of the May 31, 2007 meeting, the most that McGrath said on the subject was that "the task force formed so we could identify potential solutions to propose to the State of California to help them understand that polystyrene could be recycled." Pl.'s Ex. 905 at 66 (McGrath Dep.).[38] He later added that the goal was to identify "recycling opportunities that were available to develop . . . [i]n the near term." *Id.* at 77-78. In this context, Evergreen's proposal that it establish a recycling facility in California (with the Plastic Group's money and purchasing commitments) was thought not to be viable, at least in the short-term.[39] Similarly, in arguing that the Plastics Group met "to pick winners and losers," Evergreen cites deposition testimony of Tony Kingsbury of Dow Chemical, but the **[**46]** full context makes clear **[*18]** that Kingsbury was saying quite the opposite of the spin that Evergreen gives:

Q. Did you give everybody a fair shot —

---

[36] Defendants note that, even assuming that this meeting of the Plastics Group culminated in a determination that Evergreen was not an attractive option for its members, as a matter of law, trade associations are free to "evaluate competitors and make non-binding recommendations to their members," without violating the antitrust laws. Defs.' Joint Reply at 8. *See* *Consol. Metal Prods., Inc. v. Am. Petroleum Inst., 846 F.2d 284 (5th Cir. 1988)*; *Massachusetts Sch. of Law at Andover, Inc. v. Am. Bar Ass'n, 937 F. Supp. 435 (E.D. Pa. 1996)*, *aff'd*, *107 F.3d 1026 (3d Cir. 1997)*.

[37] There is some confusion in the briefing between the Plastics Group and the Task Force. *Compare* Opp'n at 24 *with* Opp'n at 25. According to McGrath, the Task Force was created on May 31, 2007, during the conference call that considered Evergreen's proposals. Pl.'s Ex. 905 at 71-73 (McGrath Dep.). The Plastics Group had a broader membership than just polystyrene converters. *Id.* at 79. It was the Plastics Group that both considered Evergreen's proposals and formed the Task Force. *Id.* at 80. Evergreen's brief states that the Plastics Group, and not the Task Force, promoted PDR as a competitor. *See, e.g.*, Opp'n at 25. This being said, Evergreen's Complaint limits the membership in the alleged conspiracy to the producer defendants that made up the Task Force (Pactiv, Solo, and Dolco), **[**45]** plus one defendant that was not part of this smaller group (Dart) while excluding the fifth member of the Task Force (Dow Chemical).

[38] The evidence cited by Evergreen confirms that the Plastic Group's deliberations were focused on a strategy for dealing with the threat of a polystyrene ban in California. Pl.'s Ex. 1013 (June 6, 2007 Levy memo) (Task Force was formed "to help develop RFPs (requests for proposals) for qualified **[**47]** bidders for a California [polystyrene] foodservice program").

[39] "The members were then looking at being asked to fund a process that was really not commercial in its existing form and certainly not in the State of California, was being asked to evaluate that and commit — if I recall, the number was something like 3.1 million, with an M, million dollars — to put this thing in and to hope that (a) it would come on line quickly, (b) it would work, (c) that would be the necessary resistance, if you will, where the rest of the State of California would say, okay, now there's this recycling plant here and that's going to solve all of the recycling woes in the State of California, so the judgment of the members was that that's not a viable option." Pl.'s Ex. 905 at 74 (McGrath Dep.). McGrath later clarified that Evergreen's proposal was "[n]ot a viable solution for the State of California at the time [because] we were trying to reduce and discourage municipalities from banning polystyrene foam." *Id.* at 81.

A. Absolutely.

Q. — for their proposals —

A. Absolutely.

Q. — and their submissions?

A. Absolutely. We wanted to pick a winner. Everybody wants to pick the winning horse.

Q. When you did make a decision and discussed different avenues to support or assist when you were on the [Plastics Group], was there any discussion that individual manufacturers couldn't support Option A or Option B on their own?

A. That would have been an inappropriate discussion. I mean, you know, free enterprise says anybody can do whatever they want.

Pl.'s Ex. 907 at 120 (Kingsbury Dep.).[40] In sum, the evidence does not even faintly support the allegation that the May 31, 2007 conference call served as the launching pad for a conspiracy to drive Evergreen out of the polystyrene recycling business.

Group Promotion of Competitor PDR

Evergreen argues that the conspiracy hatched during the May 31, 2007 conference call took further tangible form in efforts by the Plastics Group to actively promote PDR at Evergreen's expense. No evidence, however, is offered to back up this assertion.[41] Evergreen argues that attempts were made by the Plastics Group to help PDR secure accounts in Los Angeles, New York City, and Philadelphia, as well as with the Disney interests, although the only supporting document that Evergreen offers is a memorandum reflecting a conversation in which Tom Preston at PDR *conveyed to* the Plastic Group's Mike Levy a self-promotional account of PDR's successes in courting these potential clients. Pl.'s Ex. 1039 (Sept. 16, 2008 Levy memo to file).[42] The record, by contrast, portrays an effort by the Plastics Group to promote *both* Evergreen and PDR to the extent that it believed the interests of its members were thereby served.[43] It is telling, and Evergreen offers no evidence to the contrary, that PDR never received so much as a dollar in **[*19]** financial assistance from the Plastics Group. DSOF ¶ 61.

---

[40] Kingsbury later confirmed that the Plastics Group "was happy to identify more than one winner who could be pointed to as a viable recycler in efforts to lobby against municipal bans." Def. Ex. C at 123-24 **[**48]** (Kingsbury Dep.).

[41] Evergreen does not identify the defendants or persons who participated **[**49]** in the alleged campaign to promote PDR. Defendants maintain, and Evergreen does not deny, that neither Dolco nor Solo had any involvement with PDR. DSOF ¶¶ 244 and 259.

[42] Evergreen points to PDR's limited success in New York as an example of a tangible benefit that PDR received from the backing of the Plastics Group. The agreement between PDR and the New York City public schools ultimately consisted of little more than a pilot project to establish the feasibility of PDR's proposed recycling program. DSOF ¶ 70. Moreover, the critical fact is that Evergreen was never in the competition for the New York contract because its business model was a nonstarter in New York (or California) for the simple reason that public schools in these states "were not permitted to tie together their potential [Evergreen]-related savings on trash hauling contracts to justify paying more for [Evergreen] school lunch tray purchases, or to specify that they would only purchase recycled trays." *Id.* ¶ 26.

[43] Both Evergreen and PDR were invited to make presentations to the Plastics Group, both were identified by the Group as recyclers that "members should seek out to explore possible business opportunities," and both **[**50]** were the subjects of complimentary articles in *Plastics News*. DSOF ¶¶ 362, 370-71, 392-393, 400-04, 411, 421-23.

In an attempt at rebuttal, Evergreen argues that the Plastic Group's vocal support of PDR was innately suspicious. In this regard, Evergreen cites Forrest's opinion, based on his "investigation" of PDR's recycling facility in California, that PDR was not a functioning entity.[44] Forrest Aff. ¶ 45. Evergreen also points to Levy's site visit on June 18, 2007, and his subsequent report to the Task Force, as further evidence that the Plastics Group knew (or should have known) that PDR was not a viable alternative to Evergreen.[45] *Id.* This proves too much and too little. At most it suggests that Levy had reason to suspect that PDR was not up and running by the day of his site visit. At the least, it suggests that any concerns that Levy had were eventually allayed, as he continued to promote both Evergreen and PDR as players in the California recycling campaign. Evergreen next cites the deposition of Joseph Doyle, Vice President and General Counsel of Pactiv, who testified that he reviewed the financials compiled by PDR between the summer of 2007 and the summer of 2009, and did not find **[**51]** any records of resin sales. Pl.'s Ex. 913 at 54 (Doyle Dep.). Pactiv presented evidence, however, that it was actively involved in assisting PDR in improving its production standards, including loaning PDR $415,000, hardly what one would expect had Doyle determined PDR to be a "sham." DSOF ¶¶ 78, 80 and 135. Pactiv and PDR entered into a confidentiality agreement in March of 2007 and entered into a purchase agreement in 2008. *Id.* ¶¶ 78-79.[46]

[*20] *Subsequent lack of unified action*

While events occurring between 2005 and May 31, 2007, fail to sustain even the faintest suggestion of a conspiracy, what followed is fatal to Evergreen's claims.[47] In August of 2007, Dolco and Genpak entered into a

---

[44] Evergreen also cites for support two e-mails sent from Michael Forrest to Michael Levy and Larry [LNU] warning of "red flags" associated with PDR. Pl.'s Ex. 1037 (May 3, 2007 e-mail from Forrest to Larry [LNU] and June 3, 2007 e-mail from Forrest to Levy). This self-referential "evidence" is puzzling as it consists of nothing more than Forrest's opinion that PDR was not everything it was cracked up to be — hardly a surprising assessment by one competitor of another. Evergreen's own exhibits include an e-mail from Levy assessing PDR in April 2007 as being "beyond the 'pilot' stage." Although this e-mail indicates that PDR was still establishing itself as a business, nothing in it suggests that Levy believed it to be a "sham," as Evergreen asserts. **[**52]** Pl.'s Ex. 1006 (April 2007 e-mail chain between Mike Levy and Jane Adams).

[45] Levy's initial assessment was the cautionary warning that if "[the PDR] facility is not recycling [polystyrene] and is landfilling the trays, [the Plastics Group] will need to prepare for negative media . . . and work to minimize any industry damage." Defs.' Ex. 221 (June 18, 2007 memo to file from Levy). There is no evidence offered by Evergreen that the landfilling accusation was ever verified by Levy or by any independent source.

[46] Beyond failing to prove that defendants thought PDR was a sham, Evergreen has failed to offer any convincing evidence that PDR was in fact a sham. PDR had 18 employees at its peak operation. DSOF ¶ 58. It had investors, including a bank loan of $850,000. *Id.* ¶ 60. It rented an 11,000 square foot facility and owned the equipment needed to recycle polystyrene. *Id.* ¶ 68. PDR was producing 15,000 pounds per month by October of 2008, and it was of such a high quality that items containing 100% recycled resin could be made from it. *Id.* ¶¶ 81-82. In 2008, Evergreen by contrast had the equipment to produce no more than 115 to 150 pounds of resin an hour, for a yearly production capacity of **[**53]** under 300,000 pounds. *Id.* ¶ 36. Defendants contend that Evergreen's resin was repeatedly found inferior, including a high rate of impurities, *id.* ¶¶ 37 and 42-43; odor problems, *id.* ¶¶ 38 and 51; too much moisture, *id.* ¶ 39; high levels of bacterial contamination, *id.* ¶ 40; and melt flow ranges that often made it unusable. *Id.* ¶ 41. At the time Evergreen made its May 31, 2007 proposal to the Plastics Group, it "had not even secured a location for a recycling facility in California, much less obtained permits and licenses or begun construction." *Id.* ¶ 119. Evergreen also has no answer to defendants' contention that Evergreen itself suggested that its resin be blended at a mixture of no more than 10% recycled resin to 90% virgin resin. Defendants question whether this is a sufficiently high content to justify making a "green" environmental claim about the final product. *See, e.g., id.* ¶¶ 199 and 262.

[47] The First Circuit found that at the motion to dismiss stage, this court "improperly weighted defendants' alleged inconsistent responses to Evergreen when it weighed the parties' respective accounts regarding the plausibility of a conspiracy. In fact, 'there is nothing implausible about coconspirators' starting out in a disagreement as to how to deal conspiratorially with their common problem.'" *Evergreen, 720 F.3d at 51*, quoting *Anderson News, LLC v. Am. Media, Inc., 680 F.3d 162, 191 (2d Cir. 2012)*. The factual record now demonstrates that these inconsistent responses amounted to more than the defendants starting out in disagreement. Rather, the defendants' inconsistent responses to Evergreen permeated the entire period of the alleged

funding agreement to provide financing for **[**54]** and to purchase resin from Evergreen's Georgia facility. *Id.* ¶¶ 29 and 120. Both companies continued to buy resin from Evergreen through 2008. *Id.* Pactiv tested Evergreen's resin and discussed the terms of a long-term contract, though the negotiations never bore fruit because of Pactiv's refused to pay Evergreen a commission or royalties over and above the price of the resin itself. *Id.* ¶¶ 137-149. Solo also tested Evergreen's resin and discussed business terms, but like Pactiv refused to pay the premiums that Evergreen demanded. *Id.* ¶¶ 262-291. All the while, the Plastics Group promoted Evergreen as a recycler, inviting it to make a presentation at a Group executive session on March 19, 2008, afterwards recommending Evergreen to Dolco as its choice of a recycler in New York, and providing a laudatory letter from Levy at Forrest's request "recognizing the success of [Evergreen's] closed-loop recycling system for polystyrene in New England and the Atlantic Coast Region." *Id.* ¶¶ 421-425 and 432; Def. Ex. 232 (Oct. 7, 2008 letter from Levy to Forrest). These facts belie any claim of a refusal to deal with Evergreen. The most that can be said is that defendants, in the long-term, were **[**55]** unable to swallow the demands of Evergreen's business model. Nothing in the antitrust laws compels a business to act irrationally by agreeing to an unprofitable scheme that threatens its bottom line.

Permissible Parallel Conduct

While the facts fail to demonstrate "that the [defendants] 'had a conscious commitment to a common scheme designed to achieve an unlawful objective.'" *Monsanto, 465 U.S. at 764* (citations removed), there is also considerable **[**56]** evidence supporting defendants' position that their responses to Evergreen are illustrative of lawful independent parallel action. *See* *White v. R.M. Packer Co., 635 F.3d 571, 577 (1st Cir. 2011)* (***HN8***[] "[C]onduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy.") (internal quotation marks and citation removed).

The hard truth is that Evergreen's recycled resin was more expensive than its virgin counterpart (and became even more expensive as the price of oil began to drop in 2008). *See, e.g.*, DSOF ¶¶ 35, 85 and 277. Evergreen's own expert opined that **[*21]** Evergreen could not survive on the proceeds of recycled resin sales alone, and that in order for Evergreen's business model to succeed the marketplace would have to be willing to pay an "environmental fee," as well as a royalty on the sale of all of a converter's products containing Evergreen's resin. Scarito Rep. at 2-3. Evergreen never succeeded in persuading a single customer (or potential customer) to pay the environmental fee. DSOF ¶ 34; Defs.' Ex. 39 (Aug. 1, 2009 e-mail from Scarito to Forrest). On the issue of royalties, while some defendants were willing to entertain the idea, they were either unable (in the earlier cases of Dolco **[**57]** and Genpak) or unwilling (in the later case of Pactiv and Solo)[48] to enter deals structured with all of the additional unprofitable components that Evergreen insisted upon.[49]

Ultimately, discovery has demonstrated that Evergreen's business model failed because it could not thrive, or even survive, in a competitive capitalist economy. ***Antitrust law*** is simply not the appropriate vehicle for forcing environmental choices on a recalcitrant market, if indeed recycled polystyrene can be deemed an "environmental choice."[50]

---

conspiracy demonstrates that the alleged coconspirators failed to ever reach an agreement, assuming such an attempt was made.

[48] Although Dart, at its own request, tested Evergreen resin, it was never approached by Evergreen with any proposed deal and thus never entered into a discussion of a contract. DSOF ¶¶ 333, 335 and 337.

[49] It is worth noting that other companies that are not alleged to have been part of any conspiracy also rejected deals with Evergreen because the terms of its business model made no economic sense. *See* DSOF ¶ 49 (Dow Chemical), ¶ 50 (Ineos-Nova, Darnel, Wincup), ¶ 51 (Cascades) and ¶ 52 (Wal-Mart).

[50] Defendants further argue that Evergreen has also failed to prove that the alleged combination was "in restraint of trade or commerce . . ." *15 U.S.C. § 1*. Antitrust claims ordinarily require a multi-part **[**58]** showing: that the alleged agreement involved the exercise of power in a relevant economic market, that this exercise had anti-competitive consequences, and that these detriments outweighed any efficiencies or other economic benefits. This is the so-called "Rule of Reason" calculus. *See, e.g.,* *E. Food Servs. v. Pontifical Catholic Univ. Servs. Ass'n, 357 F.3d 1, 5 (1st Cir. 2004)*; *Fraser v. Major League Soccer, LLC, 284*

ORDER

For the foregoing reasons the defendants' Motions for Summary Judgment are ALLOWED. The clerk will enter judgment for all defendants and close the case.

SO ORDERED. **[**59]**

UNITED STATES DISTRICT JUDGE

End of Document

F.3d 47, 59 (1st Cir. 2002). This calculus is bypassed if the collusive arrangement falls instead within one of several categories (*e.g.*, naked horizontal price fixing) in which liability attaches without need for proof of power, intent or impact. *E. Food Servs., 357 F.3d at 4 & n.1*. This is the so-called "*per se"* test. Evergreen alleges that it is a competitor with the four corporate defendants and attempts to shoehorn its claim into a "category of agreements sometimes labeled per se, namely, concerted refusals to deal or group boycotts." *E. Food Servs., 357 F.3d at 4*; *see also Fashion Originators' Guild of Am., Inc. v. FTC, 312 U.S. 457, 465-467, 61 S. Ct. 703, 85 L. Ed. 949, 32 F.T.C. 1856 (1941)*. The defendants argue that Evergreen was merely a supplier, not a competitor, and that this court's analysis must adhere to the "Rule of Reason" analysis. Because I find that there was no combination, there is no reason to decide the issue.

Opinion

AMENDED ORDER GRANTING IN PART AND DENYING IN PART COUNTER-DEFENDANTS' MOTION TO DISMISS

[Re: ECF No. 17]

INTRODUCTION

This case involves the Straw Hat Pizza® restaurants. (Third Amended Complaint ("TAC"), ECF No. 1-14, ¶ 7.)[1] The plaintiffs/counter-defendants include the six remaining members of Straw Hat Cooperative Corporation, a not-for-profit California consumer cooperative, and they operate their Straw Hat Pizza restaurants as Cooperative members. (*Id.*) The other 31 former members of Straw Hat Cooperative now operate their Straw Hat Pizza restaurants as franchisees of the defendant/counter-claimant Straw Hat Restaurants, Inc. (*Id.* ¶¶ 7, 53.) The parties dispute who has the right to control Straw Hat Cooperative and its trademarks and assets. The lawsuit started in 2011 in state court, and the pleadings now are a third amended complaint ("TAC") and a third amended counter-complaint ("TACC"). (*Id.*; TACC, ECF No. 15.) The TACC challenges (among other things) the plaintiffs/counter-defendants' transfer of the Straw Hat marks to Straw Hat IP Holdings.

The plaintiffs/counter-defendants move to dismiss five counterclaims: (3) breach of a noncompete clause in their membership contracts; (6) trademark infringement for wrongful transfer of the marks to Straw Hat IP Holdings, in violation of the Lanham Act, *15 U.S.C. § 1114(1)(a)*; (8) trademark infringement by false representation of ownership and false registration with the U.S. Patent and Trademark Office, in violation of *§ 1125(a)(1)(A)*; (10) dilution of the trademark by the competing claim of ownership, in violation of *§ 1125(c)*; and (12) unfair competition, in violation of *California Business & Professions Code § 17200*. (Motion, ECF No. 17.)

The court finds the motion suitable for determination without oral argument under Civil Local Rule 7-1(b), dismisses claim 3 with leave to amend, and otherwise denies the motion to dismiss.

STATEMENT

I. THE PARTIES

Straw Hat Cooperative is both a named plaintiff and a named defendant/counter-claimant. That is because the plaintiffs/counter-defendants and the defendants/counter-claimants each claim that they are the rightful board of directors of Straw Hat Cooperative and are entitled to control its assets (including its trademarks and other IP). This is the central issue **[*4]** for the claims that the plaintiffs/counter-defendants move to dismiss. The next two sections describe the parties.

A. The Plaintiffs/Counter-Defendants

The plaintiffs/counter-defendants and the counter-claims against them are as follows:

Name	Party (P, Counter-D)	Named in Counter-Claims
Cole and Donna English	Counter-Ds	3, 6, 8, 10, 12
English & Sons, Inc.	P, Counter-D	3, 6, 8, 10, 12
Pizza Pierates, LLC	P, Counter-D	3, 6, 8, 10, 12
Formatts Enterprise, LLC	P, Counter-D	3, 6, 8, 10, 12
Mehrok Foods, Inc.	P, Counter-D	3, 6, 8, 10, 12
Mostafa Sehhat	P, Counter-D	3, 6, 8, 10, 12
Olga Sehhat	P, Counter-D	3, 6, 8, 10, 12
Straw Hat IP Holdings	P, Counter-D	6, 8, 10, 12

[1] Record citations are to documents in the Electronic Case File ("ECF"); **[*3]** pinpoint citations are to the ECF-generated page numbers at the tops of the documents.

Name	Party (P, Counter-D)	Named in Counter-Claims
Straw Hat Cooperative	P, D, Counter-Claimant	no

Except Straw Hat IP Holdings, the plaintiffs/counter-defendants are Cooperative members:

- Cole and Donna English are shareholders of Straw Hats Restaurants, Inc. and shareholders of English & Sons, which is a member of Straw Hat Cooperative and operates two Straw Hat restaurants in Williams and Yuba City, California.. (TAC ¶ 2; TACC ¶ 7.) They applied for permission in 2009 to operate a third restaurant in Live Oak, but Straw Hat Cooperative denied their application. (TACC ¶ 48.) They opened and operated it **[*5]** anyway from May 2010 to May 2013. (*Id.*) In August 2014, Cole was elected to the board of Straw Hat Restaurants. (TACC ¶ 20.) He is the managing director of Straw Hat IP Holdings, which was formed in May or June 2012. (TACC ¶17.)
- Until November 2012, Pizza Pierates was a member of Straw Hat Cooperative and operated a Straw Hat restaurant in Discovery Bay, California. (TACC ¶ 8 .)
- Formatts Enterprise is a member of Straw Hat Cooperative and operates a Straw Hat restaurant in Redmond, Oregon. (TACC ¶ 9.)
- Mehrok Foods, Inc. was a member of Straw Hat Cooperative and operated a now-closed Straw Hat Pizza restaurant in Stockton, California. (TACC ¶ 10.)
- Mostafa and Olga Sehhat share a membership in Straw Hat Cooperative and operate a Straw Hat Restaurant in Rancho Cordova, California. (TACC ¶ 11.)

B. The Defendants/Counter-Claimants

They are as follows. (*See* TAC ¶¶ 9-16; TACC ¶¶ 5-6, 16, 18.)

Name	Party (D, Counter-C)	Role
Straw Hat Restaurants, Inc.	D, Counter-Claimant	Franchiser of Pizza Hat restaurants
Deborah Morris	D	Board Director of Straw Hat Cooperative
Jeffrey Eason	D	Board Director of Straw Hat Cooperative
Sal Listek	D	Board Director of Straw Hat Cooperative
Clark Rupp	D	Board Director of Straw **[*6]** Hat Cooperative
Randy Wise	D	Board Director of Straw Hat Cooperative
Allen Strege	D	CEO of Straw Hat Cooperative
Straw Hat Cooperative	D, Counter-Claimant	Cooperative Corporation

II. THE STRAW HAT ENTITIES AND THE INITIAL COMPLAINT

From 1981 until 2008, members of Straw Hat Cooperative owned and operated all Straw Hat restaurants. (TACC ¶ 13.) In 2006, Straw Hat Cooperative's Board of Directors authorized the formation of Straw Hat Restaurants. (TAC ¶ 39.) In 2008, Straw Hat Restaurants "was organized to expand and enhance the Straw Hat brand" primarily by franchising the Straw Hat restaurants to individuals and entities. (TACC ¶13.) From 2008 until 2011, Straw Hat Cooperative and Straw Hat Restaurants operated a dual system: Straw Hat Cooperative members operated their restaurants under Straw Hat Cooperative's Amended Bylaws and their Member Agreements, and Straw Hat Restaurants' franchisees operated their restaurants under their franchise agreements. (*Id.* ¶ 14)

In May 2011, the Straw Hat Cooperative Board "proposed a ballot measure to windup and dissolve the cooperative corporation and to permit members to obtain shares in [Straw Hat Restaurants] as [] franchises on favorable terms." (TACC ¶¶ **[*7]** 15, 49.) On May 1, 2011, all Cooperative members (including the plaintiffs/counter-defendants) received a ballot to vote "for," "against," or "abstain" as to the following proposition:

> Motion to voluntarily wind up and dissolve SHCC [Straw Hat Cooperative], to authorize and direct the Officers and Directors of SHCC to file a certificate evidencing the election to wind up and dissolve, as required by *Section 12631 of the California Corporations Code*, and to take such further action as may be necessary or convenient to windup and dissolve SHCC including the disposal of certain assets and interests of SHCC by doing all of the following:
> (A) Transferring all intellectual property rights of SHCC including ownership of all trademarks, copyrights and trade secrets to Straw Hat Restaurants, Inc. ("SHRI") in exchange for payment of debt or for fair value; and
> (B) Offering SHCC members the choice of the following options:
>> (i) Receiving the distributions the member would be entitled to receive upon the dissolution of SHCC under the Bylaws and California law; or
>>
>> (ii) Assigning the member's membership in SHCC to SHRI and offering those members who choose to assign their membership to SHRI and who choose to enter into a franchise agreement with SHRI **[*8]** the following in lieu of the distributions those members would be entitled to receive upon the dissolution of SHCC under the Bylaws and California law:
>>> (a) a guaranteed 1.75% in perpetuity combined royalty and advertising/marketing fee for each franchised business, even if the franchised business is sold.
>>> (b) a guaranteed 1.75% in perpetuity combined royalty and advertising/marketing fee and a franchise fee of $5,000/location on up to two (2) additional franchised businesses, provided that the former SHCC member is the owner of 100% of the interest in such businesses and owns them for a minimum of five (5) years or assigns to their children.

(TACC ¶ 50.)

On June 15, 2011, 23 Cooperative members voted to wind up and dissolve Straw Hat Cooperative, and 15 voted against it. (*Id.* ¶ 51.) This quorum complied with the bylaws. (*Id.*)

Subsequently, only English & Sons, Pizza Pierates, Formatts, Mehrok and the Sehhats did not sign franchise agreements and continued to operate their restaurants under their Straw Hat Cooperative Membership Agreements. (TAC ¶¶ 7, 53.) On October 19, 2011, they filed this lawsuit in state court challenging the dissolution of Straw Hat Cooperative. (TACC ¶ 53; *see* ECF **[*9]** No 1-1.)

III. THE 2012 BOARD MEETINGS AND THE TRANSFER OF IP

On April 5, 2012, the Straw Hat Cooperative (but not its individual members) "received a request for a special meeting from" plaintiffs/counter-defendants Cole English and Nick Harrison to address (1) removal of the board of directors, (2) election of a new board, (3) rescission of the voluntary election to windup and dissolve Straw Hat Cooperative, and (4) amendment of the bylaws to eliminate the appointment of two alternate directors to serve as directors upon the resignation, death, or removal of any director. (TACC ¶ 54.) "In response, on April 20, 2012," and in compliance with the Cooperative's bylaws, Straw Hat Cooperative sent a Notice of Special Meeting to all Straw Hat Cooperative Members setting a meeting on July 5, 2012 at 9 a.m. at Straw Hat Cooperative's headquarters to address (1) the composition of the board of directors, (2) the voluntary election to wind up and dissolve Straw Hat Cooperative and replace it with Straw Hat Restaurants, and (3) the amendment of the bylaws. (*Id.* ¶ 55.)

"[O]n May 8, 2012, the [Straw Hat Cooperative] (but not its members) received a Notice of Special Meeting dated May 7, 2012, and signed **[*10]** by Cole English and Nick Harrison" setting a meeting for May 17, 2012 to address (1) the notice of the May 7, 2012 meeting, (2) the removal of the board, (3) the election of a new board consisting of Cole English, Nick Harrison, Randy Matthews, Gary Mehrok, and Olga Sehhat, (4) recission of the election to wind up and dissolve Straw Hat Cooperative, and (5) to revise the bylaws to eliminate the alternate directors. (*Id.* ¶ 57.)

The plaintiffs/counter-defendants held their meeting on May 17, 2012. (*See* Opposition, ECF No. 21 at 7 (citations omitted).) The counter-complaint alleges this about the meeting:

> Based upon information and belief, the SHCC Counter-Defendants, without valid or lawful notice to any other SHCC members, gathered at the office of Pizza Pierates and conducted a purported meeting of SHCC members. Only the dissident SHCC Counter-Defendants were permitted to vote despite the fact that none was in good standing or eligible to vote. Even though other non-delinquent members of SHCC who were in good standing were present, having informally learned about the meeting, they were not allowed to participate in the vote. The SHCC Counter-Defendants, over objection, held a vote without **[*11]** a quorum, without proper notice, and unilaterally acted upon their agenda. Not only was the purported meeting a nullity in light of SHCC's Notice of Special Meeting set for July 5, 2012 and because the purported meeting did not comply with SHCC's Bylaws, but all of the supposed voting members were then in arrears and thus not in good standing and ineligible to vote. After the vote, SHCC Counter-Defendants, through their own hired attorney, knowingly and falsely claimed that they were the Directors of SHCC, with Cole English as the acting President of SHCC, and that individuals other than the Plaintiffs were not authorized to act on behalf of SHCC.

(TACC ¶ 60.)

At the meeting, then, the plaintiffs/counter-defendants "removed" the Cooperative board directors (and named defendants) Deborah Morris, Jeffrey Eason, Sal Listek, Clark Rupp, and Randy Wise, and "elected" Cole English, Nick Harrison, Randy Matthews, Gary Mehrok, and Olga Sehhat as the new board of directors. (TAC ¶ 55.)

In May or June 2012, the "Counter-Defendants formed [Straw Hat IP Holdings] . . . with Cole English as the managing member, for the inequitable and unjust purpose of transferring [Straw Hat Cooperative's] intellectual **[*12]** property, including the Straw Hat trademarks . . . to [Straw Hat IP Holdings] for no consideration." (TACC ¶¶ 17, 61.) The plaintiffs/counter-defendants "attempted and purported to transfer a minimum of . . . seven (7) Marks owned by [Straw Hat Cooperative] and licensed to [Straw Hat Restaurants], to [Straw Hat IP Holdings] without adequate consideration." (TACC ¶ 62.) "In purporting to transfer Marks with serial numbers 78967523, 76378122, 76376553,763170773, 73214150, 73144985 and 73142974 SHIPH, Counter-Defendants and each of them have sought to deprive other persons and entities operating Straw Hat Pizza Restaurants of the full use and value of the Marks and business benefits thereof." (TACC ¶ 63.)

After the May 2012 election, the defendants/counter-claimants moved for a preliminary injunction in state court to prohibit the plaintiffs/counter-defendants from taking any action as the Cooperative's board of directors. The state court granted it on August 29, 2012, finding that the plaintiffs had not produced evidence to contradict CEO Allen Strege's declaration that there were 37 Cooperative members: "Plaintiffs allege that many of these members are no longer members . . . but they **[*13]** have produced no evidence . . . to prove this allegation." (ECF No. 1-3 at 2-3, 7.) On January 7, 2015, the state court dissolved the injunction, finding that the plaintiffs had introduced new material facts supporting their contention that only six Straw Hat Cooperative members remained at the time the May 17, 2012 meeting took place. (ECF No. 1-13 at 5-6.)

IV. OTHER ALLEGATIONS ABOUT THE INTELLECTUAL PROPERTY

Straw Hat Cooperative and Straw Hat Restaurants "have spent substantial time, money, and effort in developing consumer recognition and awareness of the Straw Hat Pizza mark" and "have spent significant amounts of money on print and internet advertising in order to inform consumers of the Straw Hat pizza mark." (TACC ¶ 34.) "Through extensive use of the Straw Hat Pizza mark, [they] have built up and developed significant goodwill in their entire product line . . . [and] have advertised the Straw Hat Pizza mark in a wide array of media. . . . (*Id.*) They are the exclusive owners of the Straw Hat Pizza registered marks and trade and service marks historically used by them in association with Straw Hat Restaurants. (*Id.*, listing marks.)

V. BYLAWS, LICENSING AGREEMENT, AND MEMBERSHIP [*14] AGREEMENTS

The parties cite three documents that implicate their legal obligations: the Straw Hat Cooperative's bylaws, the licensing agreement about the use of the marks, and the membership agreements for Cooperative members.

A. Straw Hat Cooperative's Bylaws

The 2008 Straw Hat Cooperative Amended Bylaws are Exhibit A to the TACC. (*See* ECF No. 15-1.) The parties identify the following relevant sections.

> Article II, Section 1: Eligibility. A Membership may only be owned by a person who owns and operates a restaurant under the name "Straw Hat." . . . Each Membership shall have the right to vote as set forth in section 2 of this Article II, for the election of directors and on disposition of substantially all the assets of the corporation and on the merger or dissolution of the corporation.
>
> Article II, Section 3: Voting Rights. . . .Members who are not in good standing shall not be entitled to vote on any matter.
>
> Article II, Section 6. Good Standing. Any Member in arrears in the payment of obligations under the Agreement for more than thirty (30) days after their due date shall not be in good standing and shall not be entitled to vote his Membership.
>
> Article III, Section 1. Powers. Subject to the limitations of the Articles of these Bylaws and of the Consumer Cooperative Corporation **[*15]** Law relating to action required to be approved by the Members or by a majority of the Members, the activities and affairs of the Corporation shall be conducted and all corporate powers shall be exercised by or under the direction of the Board. The Board may delegate the management of activities of the corporation to any person or persons or committees however composed, provided that the activities and affairs of the corporation shall be managed and all corporate powers shall be exercised under the ultimate direction of the Board.
>
> Article VII, Section 3: Sale or Conversion of Existing Restaurants: A Member may sell, transfer or convert a restaurant into a Franchise. If the Member chooses to convert the store into Franchise, then such action will cause that Member to lose that share of the Corporation associated with that restaurant.
>
> Article VIII, Section 1: Purpose of the Corporation. "The primary purpose of this Corporation shall be and shall remain the provision of benefits for its Members and the preservation and promotion of the name and goodwill associated with Straw Hat.

(ECF No. 15-1 at 2-3, 6, 14-5.)

B. The Licensing Agreement

Under its "Bylaws and a separate System License Agreement dated October 27," 2008,[2] Straw Hat Cooperative licensed to Straw **[*16]** Hat Restaurants the "use of the following intellectual property and other assets of the Corporation that the Board of Directors deem necessary and appropriate for use by [Straw Hat Restaurants] in performing its services of the Corporation, including, but not limited to, the following: the Corporation's logo, trademarks, other intellectual property, systems, processes, and procedures." (TACC ¶ 39.) (The plaintiffs/counter-defendants allege that they, as the new Straw Hat Cooperative Board, terminated the System License Agreement for cause in May 2012. (TAC ¶ ¶ 9, 44.)) The Agreement has the following sections.

1. LICENSE GRANT

---

[2] The TACC lists the date as October 27, 2011, but the date on the agreement is October 7, 2008. (TACC ¶ 39; Agreement, ECF No. 21-4.)

> A. LICENSOR [Straw Hat Cooperative] hereby grants to LICENSEE [Straw Hat Restaurants] for the term of this Agreement, as recited in Schedule A[3] attached hereto, the exclusive right and license, except as provided in Schedule A, to use, sell, distribute, franchise and advertise the System and all Licensed Products (derived therefrom) in the Territory. The license includes, but is not limited to, a license under any and all patents, trademarks **[*17]** and copyrights and any applications therefore which have been filed or may be filed in the future with respect to the System.
>
> * * *

2. TERM OF THE [LICENSING] AGREEMENT

> This Agreement and the provisions hereof, except as otherwise provided, shall be in full force and effect commencing on the date of execution by both parties and shall extend perpetually, unless terminated under one of the provisions herein.
>
> * * *

14. INFRINGEMENTS

> A. LICENSEE shall have the right, in its discretion, to institute and prosecute lawsuits against third persons for infringement of the rights licensed in this Agreement.

(System License Agreement, ECF No. 21-4 at 2-3, 7.) The agreement provides for payment of an annual fee of $50,000, and it sets forth a scheme governing IP whereby the licensor Straw Hat Cooperative retains the IP, the licensee Straw Hat Restaurants can enhance the IP and have IP ownership of those enhancements, and Straw Hats Cooperative must license in a new agreement any use of the enhancements. (*Id.* at 3-5.) It has termination provisions. (*Id.* at 6.)

C. Membership Agreements [*18]

The Membership Agreements for Cooperative members authorize the members to use the marks. (TACC ¶ 40 and Ex. B, Membership Agreement, ECF No. 15-2.) Each Cooperative member "has agreed and acknowledged" that Straw Hat Cooperative "has the exclusive rights to own, control, and license the use of the Marks." (TACC ¶ 43.) Each member agreed that with regard to the Marks,

> You will not contest, or help anyone else contest, Our ownership of them; You have no individual right to them, or to any goodwill associated with them, now or in the future. You will not use any of Our Registered Marks together with any other word or symbol without Our prior written consent; and will not use them in any Business other than the Restaurant. You will not use the Marks as part of any URL, domain name, locator, link, metatag, search engine technique, email address, or otherwise on the Internet except as We license You.

(*Id.*, quoting Membership Agreement, Article VI, § D, ¶ 1, ECF No. 15-2 at 11-12.) The Agreement provides that members can "'use Our Registered Marks only to Operate the Restaurant.'" (TACC ¶ 46, quoting Membership Agreement, Article VI, § C, ¶ 1, ECF No. 15-2 at 10.)

The Membership Agreement requires Cooperative members to pay Straw Hat Cooperative administrative **[*19]** fees (2%) and a marketing fee (.75%); a failure to pay fees results in delinquency and a loss of voting rights. (TACC ¶ 45; Membership Agreement, Article VII, ECF No. 15-1 at 15-17.)

---

[3] Schedule A allowed Straw Hat Cooperative members to operate their existing restaurants. (*See* Reply, ECF No. 22 at 11, quoting Schedule A.)

The Membership Agreement also has a covenant not to compete:

> You, and the Personal Guarantors will not, during the term of this Agreement, on Your own account or as an employee, agent, consultant, partner, officer, director, or shareholder of any other person, firm, entity, partnership, limited liability company, or corporation, own, operate, lease, franchise, conduct, engage in, be connected with, have any interest in, or assist any person or entity engaged in any business involving the production, service, or sale of pizza products, or any other related business that is competitive with or similar to a Straw Hat Pizza restaurant or outlet, except with Our prior written consent.

(TACC ¶ 44; Membership Agreement, Article VI, § G, ECF No. 15-2 at 14-15.)

VI. OTHER RELEVANT PROCEDURAL HISTORY

As described in Section II, the plaintiffs filed their lawsuit in October 2011, after a majority of members voted to wind up and dissolve Straw Hat Cooperative. (TACC ¶ 53.) The lawsuit involved several rounds of complaints and counter-complaints, and in 2015 — after the plaintiffs/counter-defendants **[*20]** added a claim of trademark infringement of the Straw Hat mark in violation of *15 U.S.C. § 1114(1)(a)* — the defendants/counter-claimants removed the case to federal court. (3/25/15 Notice of Removal, ECF No. 1.) The parties consented to magistrate-judge jurisdiction. (ECF Nos. 10, 11.) The operative complaints are the TAC and the TACC.

A. The Third Amended Complaint

The plaintiffs sued Straw Hat Restaurants and Straw Hats Cooperative (and its CEO Allen Strege and the five Cooperative board directors), asking for declaratory relief declaring their rights regarding the Straw Hat Cooperative (in claim 6) and alleging six additional claims (claims 1 through 5 and 7): (1) breach of fiduciary duty by the five directors during the transition to the franchise business model; (2) a right to inspect Straw Hat Cooperative's records; (3) a right to inspect Straw Hat Restaurant's records; (4) conversion (on the ground that rebates belong to Straw Hat Cooperative and not to Straw Hat Restaurant, Inc.); (5) a similar restitution claim titled "Money Had and Received"; and (7) trademark infringement in violation of *15 U.S.C. § 1114(a)*, because "Defendants are deceiving the public by offering their products and restaurant services under the Straw **[*21]** Hat Pizza trademarks, which are counterfeits "of those registered to and owned by Straw Hat" IP Holdings. (TAC, ECF No. 1-14, ¶¶ 91, 93.)

B. The Third Amended Counter-Complaint

The TACC has the following claims:

#	**Claim**	**Defendants**
1	Breach of Fiduciary Duty as Straw Hat Restaurants Board Member	Cole English
2	Aiding and Abetting claim 1	All but Cole English
3	Breach of the Covenant Not to Compete	All but Straw Hat IP
4	Breach of Membership Agreement by not paying financial obligations, voting while delinquent, and using IP	All but Straw Hat IP
5	Breach of Membership Agreements (Live Oak restaurant)	Cole and Donna Engli
6	Trademark Infringement by transfer to Straw Hat IP Holdings	All
7	Trademark Infringement (Live Oak restaurant)	Cole and Donna Engli
8	False Designation of Marks by claiming ownership and registering them with the	All

#	Claim	Defendants
	USPTO	
9	False Designation of Marks (Live Oak restaurant)	Cole and Donna Engli
10	Trademark Dilution by the competing claim of ownership	All
11	Trademark Dilution (Live Oak Restaurant)	Cole and Donna Engli
12	UCL, Cal. Bus. & Prof Code § 17200	All
13	UCL (Live Oak restaurant)	Cole and Donna Engli
14	Unjust Enrichment	All
15	Unjust Enrichment (Live Oak restaurant)	Cole and Donna Engli
16	Declaratory **[*22]** Relief For May 17, 2012 Vote	All
17	Declaratory Relief that true Board is Eason, Listek, Morris, Rupp, and Wise	All
18	Declaratory Relief that June 15, 2011 dissolution was legitimate	All
19	Declaratory Relief for ownership of IP	All
20	Declaratory Relief that Nick Harrison and Pizza Pierates are no longer members of Straw Hat Cooperative	All
21	Intentional Interference with Prospective Economic Advantage	All
22	Disgorgement and Constructive Trust	All
23	Conversion of assets through Straw Hat IP Holdings	All

(TACC, ECF No. 15, at 18-37.)

The plaintiffs/counter-defendants move to dismiss claims 3, 6, 8, 10, and 12. (Motion, ECF No. 17.) These claims were in the first amended counter-complaint ("FACC") and second amended counter-complaint ("SACC"). (Opposition, ECF No. 21 at 9-10.) The state court rejected the plaintiffs/counter-defendants' arguments to dismiss the claims for all claims except claim 3 (then cause of action 20 in the FACC); it overruled their demurrer to the FACC except that it sustained the demurrer for claim 3 (cause of action 20) with leave to amend. (*Id.*))

ANALYSIS

I. PRIOR STATE COURT RULINGS

The counter-claimants first argue that the court should not overturn the state court's rulings on the same **[*23]** arguments. (Opposition, ECF No. 21 at 11.) The TACC supersedes the prior complaint and "renders it without legal effect." *Lacey v. Maricopa Cnty., 693 F.3d 896, 927 (9th Cir. 2012)* (en banc); *see Ferdik v. Bonzelet, 963 F.2d 1258, 1262 (9th Cir. 1992)* (same). In this situation, federal courts have permitted defendants to challenge the entire amended complaint, including those claims that the courts previously found sufficient. *See O'Connor v. Uber Techs., Inc., 58 F. Supp. 3d 989, 995-96 (N.D. Cal. Sept. 4, 2014)* (collecting cases). Applying federal procedural rules, the court addresses the arguments in the motion.

II. MOTION TO DISMISS

A. Legal Standard

Federal Rule of Civil Procedure 8(a)(2) requires only a "short and plain statement of the claim showing that the plaintiff is entitled to relief . . . [to] give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *See Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 554, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A court may dismiss a complaint under *Federal Rule of Civil Procedure 12(b)(6)* when it does not contain enough facts to state a claim to relief that is plausible on its face. *See id. at 570*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)*."The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (quoting *Twombly, 550 U.S. at 557*.)."While a complaint **[*24]** attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. Factual allegations must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555* (citations and parentheticals omitted).

In considering a motion to dismiss, a court must accept all of the non-moving party's allegations as true and construe them in the light most favorable to the non-moving party. *See id. at 550*; *Erickson v. Pardus, 551 U.S. 89, 93-94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)*; *Vasquez v. Los Angeles County, 487 F.3d 1246, 1249 (9th Cir. 2007)*. Courts may consider documents attached to the complaint without converting the motion into a summary-judgment motion. *See Parks School of Business, Inc. v. Symington, 51 F.3d 1480, 1484 (9th Cir. 1995)*; *Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005)*. Courts may also consider a matter that is properly the subject of judicial notice, such as matters of public record. *See Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)*.[4]

If a court dismisses the complaint, it must grant leave to amend even if no request to **[*25]** amend is made "unless it determines that the pleading could not possibly be cured by the allegation of other facts." *Lopez v. Smith, 203 F3.d 1122, 1127 (9th Cir. 2000)* (quotation omitted).

B. The Claims

1. Claim 3: Breach of the Covenant Not to Compete

---

[4] The court grants the defendants/counter-claimants' request to take judicial notice of state-court records to show the procedural history. (ECF No. 21-9 at 5.) Because they are public records, the court may take judicial notice of the undisputed facts in them. *See Hotel Employees & Rest. Employees Local 2 v. Vista Inn Mgmt. Co., 393 F. Supp. 2d 972, 978 (N.D. Cal. 2005)*; *Fed. R. Evid. 201(b)*; see *also Fontenot v. Wells Fargo Bank, N.A., 198 Cal. App. 4th 256, 264-67, 129 Cal. Rptr. 3d 467 (2011)*.

In Claim 3, the counter-claimants claim that by transferring IP to Straw Hat IP Holdings, the counter-defendants breached a non-compete clause in their membership agreements. (TACC ¶¶ 80-83.) The counter-defendants argue that this does not state a claim because the non-compete clause prohibits only competing by the equivalent of selling pizzas, not the transfer of IP. (Motion, ECF No. 17 at 12-13.) The court agrees that the counter-claimants do not state a claim.

Claim 3 incorporates by reference the facts summarized in the Statement, *supra*, and has these additional paragraphs:

> 81. As a term of their Membership Agreements, the [Straw Hat Cooperative] Counter-Defendants including each of the members of [Straw Hat IP Holdings] who are also members of [Straw Hat Cooperative], agreed not to engage in conduct or business competitive with Straw Hat business operations.
>
> 82. The [Straw Hat Cooperative] Counter-Defendants' formation of [Straw Hat IP Holdings], and **[*26]** efforts to usurp the Straw Hat proprietary information and intellectual property including the Marks associated with the brand and their value from other operators of Straw Hat Pizza establishments is in direct contravention of this contract term and their acknowledgment in entering into the contract that the exclusive right to own, control and license use of the Marks remained with [Straw Hat Cooperative], or at its election.

This is the non-compete clause:

> You, and the Personal Guarantors will not, during the term of this Agreement, on Your own account or as an employee, agent, consultant, partner, officer, director, or shareholder of any other person, firm, entity, partnership, limited liability company, or corporation, own, operate, lease, franchise, conduct, engage in, be connected with, have any interest in, or assist any person or entity engaged in any business involving the production, service, or sale of pizza products, or any other related business that is competitive with or similar to a Straw Hat Pizza restaurant or outlet, except with Our prior written consent.

(TACC ¶ 44 and Membership Agreement, Article VI, § G, ECF No. 15-2 at 14-15.).

The counter-defendants argue that the counter-claimants do not state **[*27]** a claim. (Motion, ECF No. 17 at 12.) Stripped of extra words, they assert, the non-compete clause says, "You . . . will not . . . be connected with . . . any related business that is competitive with or similar to a Straw Hat Pizza restaurant . . . except with Our prior written consent." (*Id.*) The TACC does not allege that Straw Hat IP Holdings is a "business that is competitive with or similar to a Straw Hat Pizza restaurant." (*Id.* at 16-17.) And transferring the marks is not "competition with a Straw Hat restaurant" in the way selling pizzas is. (Reply, ECF No. 22 at 9.) Thus, "the text of the non-compete covenant cannot be reasonably construed to apply to transfer of the trademarks as though it were competition with a Straw Hat restaurant." (*Id.*)

The court agrees: the counter-claimants do not state a claim. The non-compete clause is about conduct that is "competitive with or similar to" a Straw Hat Pizza restaurant. The transfer of IP may be an unauthorized transaction that forms the basis for other claims in the TACC. (*See, e.g.*, TACC claim 4.) But the unauthorized transaction is not plausibly a violation of the non-compete clause's prohibition against competing with Straw Hat pizza restaurants. **[*28]**

The counter-claimants nonetheless argue that forming an entity that is branded "Straw Hat" for "the improper purpose" of diverting and converting the Straw Hat Cooperative's IP assets *is* competing for the right to control and manage the IP. (Opposition, ECF No. 21 at 12-13.) They allege as relevant the counter-defendants' acknowledgment in the membership agreements that only Straw Hat Cooperative could control the Marks. (TACC ¶ 82.) This does not change the conclusion that the assignment of the IP is not obviously a violation of the non-compete clause's prohibition against competing with Straw Hat Pizza restaurants.

The counter-claimants note that controlling the IP covers more than the marks; it includes menus, recipes, signage, and other elements that make up the Straw Hat system. (Opposition, ECF No. 21 at 13.) Diverting these, they assert, violates the covenant not to compete. (*Id.*) It might be that diverting IP gives the counter-defendants some business outcome that violates the non-compete clause because the conduct is "competitive . . . with a Straw Hat Pizza restaurant. . . ." (Membership Agreement, Article VI, § G.) That theory is not alleged, and the court thinks that the facts in paragraphs 1 through 79 **[*29]** of the TACC (incorporated by reference in claim 3) do not give "fair notice" of a claim that rests on this theory. *See* Twombly, 550 U.S. at 555. The court dismisses claim 3 with leave to amend.

The counter-defendants also argue that the non-compete clause violates *California Business and Professions Code § 16600*. (Motion, ECF No. 17 at 13.) The counter-claimants respond that their intent is to prevent misappropriation of IP, not prevent operation of a lawful business, and thus the claim does not implicate *section 16600*. (Opposition, ECF No. 21 at 13.) The court does not need to decide the issue because it holds that the non-compete clause does not reach the transfer of the IP.

2. Claim 6: Trademark Infringement by the Transfer of Marks to Straw Hat IP Holdings

In claim 6, the counter-claimants claim that by transferring the Straw Hat Marks to Straw Hat IP Holdings, the counter-defendants committed trademark infringement in violation of the Lanham Act, *15 U.S.C. § 1114(1)(a)*. (TACC ¶¶ 99-103.) The counter-defendants argue that the counter-claimants do not state a claim because they do not allege any commercial use of the trademarks other than licensed use for the Straw Hat Restaurants. (Motion, ECF No. 17 at 14-15.)[5] The court denies the motion to dismiss claim 6 because the counter-claimants **[*30]** plausibly alleged commercial use and the potential for confusion.

15 U.S.C. § 1114(1)(a) provides:

> (1) Any person who shall, without the consent of the registrant —
> (a) use in commerce any reproduction, counterfeit, copy or colorable imitation of a registered mark in connection with the sale, offering for sale, distribution, or advertising of any goods or services on or in connection with which such use is likely to cause confusion, or to cause mistake, or to deceive; []
> * * *
> shall be liable in a civil action by the registrant for the remedies hereinafter provided.

15 U.S.C. § 1114(1)(a).

The elements of trademark infringement are (1) a protectible ownership interest in a trademark, and (2) the defendant's use of the mark creates a likelihood of consumer confusion. *See* *Network Automation, Inc. v. Advanced Sys. Concepts, Inc., 638 F.3d 1137, 1144 (9th Cir. 2011)*. "The core element of trademark infringement is the likelihood of confusion, *i.e.*, whether the similarity of the marks is likely to confuse customers about the source of the products." *Abercrombie & Fitch Co. v. Moose Creek, Inc., 486 F.3d 629, 633 (9th Cir. 2007)*. In determining whether there is a likelihood of confusion, a court weighs the following factors: (1) the **[*31]** strength of the mark; (2) the proximity of the goods; (3) the similarity of the marks; (4) evidence of actual confusion; (5) marketing channels used; (6) type of goods and the degree of care likely to be exercised by the purchaser; (7) the defendant's intent in selecting the mark; and (8) likelihood of expansion of the product lines. *See* *AMF Inc. v. Sleekcraft Boats, 599 F.2d 341, 348-49 (9th Cir. 1979)*.

The counter-defendants argue that the counter-claimants do not allege any commercial use of the marks "without the consent of the registrant." (Motion, ECF No. 17 at 14.) The only use of the mark in commerce is in connection with the operation of the restaurants, and that use is allowed by the membership agreements. (*Id.* at 14-15.) They assert that by definition, the licensed use of the mark cannot cause confusion or deception. (*Id.* at 15.) Moreover, they argue, the transfer to Straw Hat IP Holdings is not "use in commerce;" the allegation is only that the name "Straw Hat" appears in the entity name, and there is no allegation that Straw Hat IP Holdings engages in commercial activity that could cause consumer confusion. (Reply, ECF No. 22 at 9-10.) They conclude that the transfer may be illegal, but that conduct is addressed by other claims and does not amount to trademark **[*32]** infringement. (Motion, ECF No. 17 at 15.)

---

[5] Cole and Donna English used the trademarks in the unapproved Live Oaks restaurant, but that is conduct addressed in claim 5. (*See* Motion, ECF No. 17 at 14 n.6 (making this point).)

The counter-defendants' point is that this claim is about a transfer of IP to an entity that does not engage in any commercial activity, is not visible to the public, and therefore cannot create consumer confusion. But the counter-claimants allege more than this and thus plausibly state a claim. Claim 6 incorporates by reference the fact chronology summarized in the Statement, *supra*. (TACC ¶ 98.) That chronology establishes the core dispute in this case: who owns the marks, who can license them, and who can use them. The parties each allege that they have these rights, and they charge other with trademark infringement based on wrongful use of the marks in violation of *§ 1114(1)(a)*. For example, claim 7 in the TAC charges that the defendants/counter-claimants are deceiving the public by using the marks at Straw Hat restaurants, thus creating a likelihood of consumer confusion and deceiving the public. (TAC ¶¶ 91, 94-97.) Claim 6 in the TACC (when read in the context of the fact allegations) similarly claims trademark infringement by all plaintiffs/counter-defendants by unlawfully converting the marks, exceeding permissible use of the marks, and unlawfully claiming rights **[*33]** to control use of them. (TACC ¶¶ 46, 66, 101; *see* Opposition, ECF No. 21 at 15.) The TAC and the TACC both allege that this constitutes use of a counterfeit mark. (TAC ¶ 91; TACC ¶ 102.) In essence, both parties argue, "you do not control the marks but we do," and both argue that the others' actions have a financial impact and create customer confusion. Moreover, the plaintiffs/counter-defendants claim ownership of the marks to control (or prevent) use of them by the defendants/counter-defendants in their business. Indeed, they seek to vindicate that commercial interest by this lawsuit.

Considering these facts, the counter-claimants plausibly state a claim. They need not plead all evidence in support of their claims, and they need not plead "detailed factual allegations." *See* *Twombly, 550 U.S. at 555*. They need only state a plausible claim and give "fair notice" of what the claim is and the grounds upon which it rests." *Id.* The court denies the motion to dismiss claim 6.

The counter-defendants also argue that the TACC does not allege sufficiently that Straw Hat Restaurants is the registrant of the marks and as a result, Straw Hat Restaurants lacks standing to bring claim 6. (Motion, ECF No. 17 at 15-16.) The **[*34]** TACC sufficiently alleges facts about Straw Hat Restaurant's protectible ownership interest in the marks. *See supra* Statement. For example, the TACC alleges that Straw Hat Restaurants is the exclusive licensee with the right to prosecute lawsuits for infringement. (TACC ¶ 39; *see* Statement, *supra*, quoting License Agreement, ECF No. 21-4 at 2.) The counter-defendants' citation to Schedule A of the License Agreement does not change this conclusion. (Reply, ECF No. 22 at 11.) Schedule A allows the counter-defendants to maintain their restaurants. It does not eliminate Straw Restaurants' claim of an otherwise exclusive license or its standing to sue for trademark infringement.

3. Claim 8: False Designation of Origin

In claim 8, the counter-claimants claim that by falsely claiming that they own the marks and by registering them with the U.S. Patent and Trademark Office, the counter-defendants falsely designated the origin of the marks, in violation of *15 U.S.C. § 1125(a)(1)(A)*. (TACC ¶ 110.) The counter-defendants again argue that the counter-claimants do not state a claim because they do not allege any commercial use other than licensed use at Cooperative members' Straw Hat restaurants. (Motion, ECF No. 17 at 17.) The court denies **[*35]** the motion to dismiss claim 8, again because the counter-claimants plausibly alleged commercial use and the potential for confusion.

15 U.S.C. § 1125(a)(1) provides:

> Any person who, on or in connection with any goods or services, or any container for goods, uses in commerce any word, term, name, symbol, or device, or any combination thereof, or any false designation of origin, false or misleading description of fact, or false or misleading representation of fact, which—
>
> > (A) is likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person, or
> >
> > * * *

shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such act.

To establish a claim for false designation of origin under *Section 1125(a)(1)(A)*, a plaintiff must prove that the defendant (1) used in commerce (2) any word, false designation of origin, false or misleading description, or representation of fact, which (3) is likely to cause confusion or mistake, or to deceive, as to sponsorship, affiliation, **[*36]** or the origin of the goods or services in question. *See Freecycle Network, Inc. v. Oey, 505 F.3d 898, 902 (9th Cir. 2007)Summit Tech. v. High—Line Med. Instruments, Co., 933 F. Supp. 918, 928-29 (C.D. Cal.1996)*; *see also Brookfield Communications, Inc. v. West Coast Entm't Corp., 174 F.3d 1036, 1047 n.8 (9th Cir.1999)* (noting that infringement and false designation of origin claims are often identical, except that false designation of origin claims protect both registered and unregistered trademarks and can protect a wider range of practices, such as false advertising). "[L]ikelihood of confusion is determined by evaluating a variety of factors including the type of trademark at issue; similarity of design; similarity of product; identity of retail outlets and purchasers; identity of advertising media utilized; defendant's intent; and actual confusion." *Roto-Rooter Corp. v. O'Neal, 513 F.2d 44, 45 (5th Cir. 1975)*(footnotes omitted).

The counter-defendants reiterate their argument that the TACC alleges only licensed use of the marks by their restaurants, and that claim cannot constitute confusion. (Motion, ECF No. 17 at 17.) Otherwise, they assert, the TACC does not contain any factual allegations about any of the *Roto-Rooter* factors. (*Id.*) The court disagrees. **[*37]** As discussed in the previous section, the case is about who owns the marks and is entitled to use or license them. The parties each claim that the others' actions constitute use "in a manner likely to confuse the public about the origin of the goods." *Int'l Order of Job's Daughters v. Lindeburg, 633 F.2d at 917*. Given the detailed allegations in the complaint, the counter-claimants have given "fair notice" of the claim and the "grounds upon which it rests." *Twombly, 550 U.S. at 555*. The court denies the motion to dismiss claim 8.

4. Claim 10: Trademark Dilution

In claim 10, the counter-claimants claim that the counter-defendants' unlawful claim of ownership of the marks is trademark dilution in violation of *15 U.S.C. § 1125(c)*. (TACC ¶¶ 117-122.) The counter-defendants again argue that the counter-claimants do not state a claim because they do not allege any commercial use other than licensed use, and that cannot be dilution. (Motion, ECF No. 17 at 18-19.) The court denies the motion to dismiss claim 10 on the ground that the counter-claimants adequately alleged use beyond licensed use.

15 U.S.C. § 1125(c) prohibits dilution by blurring and dilution by tarnishment:

(1) Injunctive relief

Subject to the principles of equity, the owner of a famous mark that is distinctive, inherently or through acquired distinctiveness, **[*38]** shall be entitled to an injunction against another person who, at any time after the owner's mark has become famous, commences use of a mark or trade name in commerce that is likely to cause dilution by blurring or dilution by tarnishment of the famous mark, regardless of the presence or absence of actual or likely confusion, of competition, or of actual economic injury.

(2) Definitions

* * *

(B) For purposes of paragraph (1), "dilution by blurring" is association arising from the similarity between a mark or trade name and a famous mark that impairs the distinctiveness of the famous mark. In determining whether a mark or trade name is likely to cause dilution by blurring, the court may consider all relevant factors, including the following:

(i) The degree of similarity between the mark or trade name and the famous mark.

(ii) The degree of inherent or acquired distinctiveness of the famous mark.

(iii) The extent to which the owner of the famous mark is engaging in substantially exclusive use of the mark.

(iv) The degree of recognition of the famous mark.

(v) Whether the user of the mark or trade name intended to create an association with the famous mark.

(vi) Any actual association between the mark or **[*39]** trade name and the famous mark.

(C) For purposes of paragraph (1), "dilution by tarnishment" is association arising from the similarity between a mark or trade name and a famous mark that harms the reputation of the famous mark.

In denying the motion to dismiss claim 6, the court found that the counter-claimants plausibly alleged use that exceeded permissible use. That conclusion applies here too. The counter-defendants nonetheless argue that the plain language of the Membership Agreements establishes that they are entitled to use the marks. (Reply, ECF No. 22 at 12.) The court disagrees. These are issues of fact to be illuminated through discovery. The court denies the motion to dismiss claim 10.

5. Claim 12: Unfair Competition

In claim 12, the counter-claimants claim that the counter-defendants' actions are unlawful, unfair and fraudulent business acts or practices that violate California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code § 17200*. (TACC ¶¶ 128-130.) The court denies the counter-defendants' motion to dismiss claim 12.

The UCL prohibits any "unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*. "[Because*] section 17200* is [written] in the disjunctive, it establishes three separate types of unfair competition. The statute **[*40]** prohibits practices that are either 'unfair' or 'unlawful,' or 'fraudulent.'" *Pastoria v. Nationwide Ins., 112 Cal. App. 4th 1490, 1496, 6 Cal. Rptr. 3d 148 (2003)*; *see also* *Cel—Tech Communications, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*.

The UCL incorporates other laws and treats violations of those laws as unlawful business practices independently actionable under state law. *Chabner v. United Omaha Life Ins. Co., 225 F.3d 1042, 1048 (9th Cir. 2000)*. Violation of almost any federal, state, or local law may serve as the basis for a UCL claim. *Saunders v. Superior Court, 27 Cal. App. 4th 832, 838-39, 33 Cal. Rptr. 2d 438 (1994)*. In addition, a business practice may be "unfair or fraudulent in violation of the UCL even if the practice does not violate any law." *Olszewski v. Scripps Health, 30 Cal. 4th 798, 827, 135 Cal. Rptr. 2d 1, 69 P.3d 927 (2003)*.

a. "Unlawful" claim

The court previously found that the counter-claimants plausibly alleged the Lanham Act claims. These are predicate claims that support a claim under the "unlawful" prong of the UCL. *Finuliar v. BAC Home Loans Servicing, L.P., No. 3:11-cv-02629-JCS, 2011 U.S. Dist. LEXIS 107324, 2011 WL 4405659, at *9 (N.D. Cal. Sep. 21, 2011)* (citing *People v. McKale, 25 Cal.3d 626, 635, 159 Cal. Rptr. 811, 602 P.2d 731 (1979))*.

b. "Fraudulent" claim

In denying the motion to dismiss claims 6, 8, and 10, the court necessarily found that the counterclaimants alleged with sufficient particularity that the public (as opposed to a corporate competitor) likely would be deceived or confused by the similarity of the marks. *See* *Capella Photonics, Inc. v. Cisco Systems, Inc., No.3:14-cv-03348-EMC, 77 F. Supp. 3d 850, 2014 U.S. Dist. LEXIS 177382, 2014 WL 8097683, at *11 (N.D. Cal., Dec. 23, 2014)* (under the UCL, "a corporate-competitor 'is not entitled to the protection of [the fraudulent] prong **[*41]** of *§ 17200* because it is not a member of the public or a consumer entitled to such protection"); *Finuliar, 2011 U.S. Dist. LEXIS 107324, 2011 WL 4405659, at *10* ("to state a claim under the UCL based on fraudulent conduct, [a p]laintiff must allege, with particularity, facts sufficient to establish that the public would likely be deceived by Defendants' conduct.")

c. "Unfair" claim

This case involves business competitors. Thus, to state an "unfair" claim under the UCL, the alleged unfairness must "be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." *Cel—Tech Communications, Inc. v. L.A. Cellular Tel. Co., 20 Cal.4th 163, 186-187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. In business-competitor claims, "the word 'unfair' . . . means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition. *Levitt v. Yelp! Inc., 765 F.3d 1123, 1136 (9th Cir. 2014)*. The Ninth Circuit has held that Lanham Act claims are "substantially congruent" to state claims of unfair competition. *See* *Cleary v. NewsCorp., 30 F.3d 1255, 1262-63 (9th Cir. 1994)* (citations omitted). The counter-claimants state an "unfair" claim.

CONCLUSION

The court grants in part and denies in part the plaintiffs/counter-defendants' motion to dismiss. The court dismisses claim 3 without **[*42]** prejudice and denies the motion to dismiss claims 6, 8, 10, and 12. The defendants/counter-claimants must file any amended complaint by July 27, 2015. This disposes of ECF No. 17.

IT IS SO ORDERED.

Opinion

ORDER ON DEFENDANTS' JOINT MOTION TO DISMISS OR STAY PLAINTIFFS' AMENDED COMPLAINT

Re: Dkt. Nos. 183, 184, 188, 190, 203, 204

A group of indirect purchaser plaintiffs composed of retail establishments (collectively, "Walgreen Plaintiffs") brought a First Amended Complaint against defendants Endo Pharmaceuticals Inc., Teikoku Pharma USA, Teikoku Seiyaku Co., Watson Pharmaceuticals, Inc., Actavis, plc, formerly known as Watson Pharmaceuticals, Inc., and Watson Laboratories, Inc. (collectively "defendants") in this multidistrict antitrust litigation relating to a settlement agreement entered into by defendants that resolved a patent dispute over the drug Lidoderm (the "Lidoderm Settlement"). Defendants move to dismiss, arguing that (i) the Walgreen Plaintiffs lack statutory standing as indirect purchasers of Lidoderm, (ii) the assignments of claims from Lidoderm wholesalers are invalid and fail for lack of Article III standing, and (iii) any valid assignments of claims should be joined with those of the group of direct purchaser plaintiffs.

The Walgreen Plaintiffs do not have standing to bring claims on their own behalf as indirect **[*29]** purchasers and have not adequately pleaded that they are entitled to injunctive relief. That portion of their claims is STRUCK. The remainder of defendants' motion is DENIED. The assignments of the right to bring antitrust claims are valid and the partial assignment of claims does not require me to dismiss or stay the Walgreen Plaintiffs' claims at this stage of the litigation.

BACKGROUND

The facts relating to the underlying suit are recited in my prior orders and incorporated by reference. *See*, e.g., Dkt. No. 117. The Lidoderm Settlement allegedly violated federal antitrust laws, in part because defendants agreed to delay the release of a generic equivalent of Lidoderm into the market. FAC ¶¶ 146-171 (Dkt. No. 166).

On April 22, 2015, the Walgreen Plaintiffs filed an Amended Complaint ("FAC") against defendants. The FAC asserts that: (i) the Lidoderm Settlement is an unreasonable restraint on trade that violates *Section 1* of the Sherman Act, *see* FAC ¶¶ 146-152; (ii) by entering into the Lidoderm Settlement, defendants conspired to expand monopoly power by intentionally forestalling the introduction of generic Lidoderm in violation of *Section 2* of the Sherman Act, *see id.* ¶¶ 153-160; (iii) defendant Endo **[*30]** exercised monopoly power over the relevant market by intentionally excluding competitors and charging artificially high prices for Lidoderm, *see id.* ¶¶ 161-166; and (iv) defendant Endo attempted to monopolize the relevant market by entering into the Lidoderm Settlement with the other defendants, *see id.* ¶¶ 167-171.

On May 8, 2015, defendants collectively moved to dismiss the Walgreen Plaintiffs' FAC for lack of Article III and statutory standing. Mot. (Dkt. No. 183). I heard argument on July 8, 2015.

LEGAL STANDARDS

I. *RULE 12(b)(1)*

Defendants move to dismiss for lack of standing under Article III and *Federal Rule of Civil Procedure 12(b)(1)*. The burden of proving standing rests with the party invoking federal subject matter jurisdiction. *Lujan v. Defenders of Wildlife, 504 U.S. 555, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*.

"*Rule 12(b)(1)* jurisdictional attacks can be either facial or factual." *White v. Lee, 227 F.3d 1214, 1242 (9th Cir. 2000)*. A factual attack "disputes the truth of the allegations that, by themselves, would otherwise invoke federal jurisdiction." *Safe Air for Everyone v. Meyer, 373 F.3d 1035, 1039 (9th Cir. 2004)*. When a factual attack is raised, the plaintiff must support the jurisdictional allegations with "competent proof[] under the same evidentiary standard that governs in the summary judgment context." *Leite v. Crane Co., 749 F.3d 1117, 1121 (9th Cir. 2014)* (internal citations omitted). "If the moving party converts the motion to dismiss into a factual motion by presenting affidavits **[*31]** and other evidence properly brought before the court, the party opposing the motion must furnish affidavits or other evidence necessary to satisfy its burden of establishing subject matter jurisdiction." *Wolfe v. Strankman, 392 F.3d 358, 362 (9th Cir. 2004)* (internal quotations omitted).

Here, defendants bring a factual attack because they challenge the validity of the wholesalers' assignments of their claims to the Walgreen Plaintiffs. *See* Mot. 4. Accordingly, "no presumptive truthfulness attaches to plaintiff's allegations, and the existence of disputed material facts will not preclude the trial court from evaluating for itself the merits of jurisdictional claims." *Doe v. Holy See*, *557 F.3d 1066, 1073 (9th Cir. 2009)* (internal quotations omitted).

II. *RULE 12(b)(6)*

Defendants also challenge the Walgreen Plaintiffs' standing under the Sherman Act by moving to dismiss for failure to state a claim pursuant to *Rule 12(b)(6)*. *See* Mot. 4. A *Rule 12(b)(6)* motion "tests the legal sufficiency of a claim." *Conservation Force v. Salazar, 646 F.3d 1240, 1241-42 (9th Cir. 2011)* (internal quotations omitted). "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (internal quotations omitted). A claim is plausible "when the plaintiff pleads factual content that allows the court to draw **[*32]** the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* The court should dismiss "if there is a lack of a cognizable legal theory or the absence of sufficient facts alleged under a cognizable legal theory." *Salazar, 646 F.3d at 1242*.

In the private antitrust context, plaintiffs must establish "antitrust standing" to survive a motion to dismiss. *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 987 (9th Cir. 2000)*; *Los Gatos Mercantile, Inc. v. E.I. DuPont De Nemours & Co., No. 13-CV-01180-BLF, 2014 U.S. Dist. LEXIS 133540, 2014 WL 4774611, at *5 (N.D. Cal. Sept. 22, 2014)*. "To determine whether [antitrust standing] is met, the court must evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them." *Knevelbaard, 232 F.3d at 987* (internal quotations omitted). "[A] showing of antitrust injury is necessary, but not always sufficient, to establish standing under *§ 4*." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1055 (9th Cir. 1999)* (internal quotations omitted).

DISCUSSION

I. THE WALGREEN PLAINTIFFS' CLAIMS BROUGHT ON THEIR OWN BEHALF

Defendants argue that as indirect purchasers of Lidoderm, the Walgreen Plaintiffs lack standing under *section 4* of the Clayton Act. Mot. 5-6. The Walgreen Plaintiffs do not contend that they are entitled to treble damages under *Section 4* as indirect purchasers. Oppo. 9-10. Instead, they assert standing as indirect purchasers under *section 16* of the Clayton Act, requesting injunctive **[*33]** relief for violations of *sections 1* and *2* of the Sherman Act. *Id.*

Section 4 of the Clayton Act provides a private right of action for those injured as a result of antitrust violations and entitles them to treble damages. 15 U.S.C. § 15; *see also* In re Lithium Ion Batteries Antitrust Litig., No. 13-MD-2420 YGR, 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377, at *5 (N.D. Cal. Oct. 2, 2014). Only direct purchasers, and not indirect purchasers, may bring claims under section 4. *See* Illinois Brick Co. v. Illinois, 431 U.S. 720, 744-47, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977); *see also* Del. Valley Surgical Supply Inc. v. Johnson & Johnson, 523 F.3d 1116, 1120-21 (9th Cir. 2008) ("[A] bright line rule emerged from *Illinois Brick*: only direct purchasers have standing under § 4 of the Clayton Act to seek damages for antitrust violations.").

Section 16 of the Clayton Act provides a private right of action for injunctive relief based upon violations of ***antitrust law***. It states that "[a]ny person, firm, corporation, or association shall be entitled to sue for and have injunctive relief . . . against threatened loss or damage by violation of the antitrust laws . . ." 15 U.S.C. § 26. In order to obtain injunctive relief, a plaintiff "must allege facts showing that the remedy she seeks is needed to prevent a threatened antitrust injury, meaning an injury of the type the antitrust laws were intended to prevent — *i.e.*, an injury to competition." Somers v. Apple, Inc. 729 F.3d 953, 967 (9th Cir. 2013) (internal quotations omitted).

Unlike section 4, under section 16 "indirect purchasers are not barred from bringing an **[*34]** antitrust claim for injunctive relief against manufacturers." Lucas Automotive Engineering, Inc. v. Bridgestone/Firestone, Inc., 140 F.3d 1228, 1235 (9th Cir. 1998); *see also* Sundance Land Corp. v. Community First Federal Savings & Loan Association, 840 F.2d 653, 661 (9th Cir. 1988) ("The standing requirements under section 16 of the Clayton Act are 'less stringent' than those under section 4. Parties who cannot recover damages may nevertheless obtain injunctive relief.") (internal citations omitted). Therefore, the Walgreen Plaintiffs would not be barred from bringing claims for injunctive relief as indirect purchasers.

That said, the Walgreen Plaintiffs have failed to show a "threatened loss or injury cognizable in equity proximately resulting from the alleged antitrust violation." Sundance Land, 840 F.2d at 661 (internal quotations omitted). Defendants' anticompetitive conduct ended on September 15, 2013, when generic drug competitors were able to enter the market. FAC ¶¶ 122, 135. There are no other allegations of anticompetitive conduct that would be subject to an injunction or that designate conduct to be enjoined; the FAC only mentions injunctive relief in the demand for judgment in a cursory manner. The Walgreen Plaintiffs argue that they have demonstrated "monetary harm" that will continue in the future, *see* Oppo. 9, and argued at the hearing that harm is ongoing because it takes time for prices to reach an equilibrium. These facts **[*35]** were not alleged in the FAC. The Walgreen Plaintiffs also argue that the injunctive relief is a prayer for damages and should not be resolved on a motion to dismiss, but provide no support for this argument.[1]

In short, the Walgreen Plaintiffs have alleged past injuries that they suffered, but have not stated with sufficient particularity any ongoing or future harm caused by the alleged Sherman Act violations. *See* San Diego Cnty. Gun Rights Comm. v. Reno, 98 F.3d 1121, 1126 (9th Cir. 1996) ("it is insufficient for [plaintiffs] to demonstrate only a past injury"); Kamakahi v. Am. Soc'y for Reprod. Med., 305 F.R.D. 164, 195 (N.D. Cal. 2015), *leave to appeal denied* (May 12, 2015). Therefore, to the extent that the Walgreen Plaintiffs bring claims under the Sherman Act on their own behalf, such claims are STRUCK with leave to amend.

II. PLAINTIFFS' ASSIGNMENTS OF THE WHOLESALERS' CLAIMS ARE VALID

Because the Walgreen Plaintiffs may not bring claims under section 4 of the Clayton Act as indirect purchasers, they must establish standing based upon the assignments of antitrust claims from the direct purchaser wholesalers that entered into a distribution service agreement **[*36]** ("DSA") with defendant Endo.[2] *See* FAC ¶¶ 8-12. The

---

[1] In fact, courts may strike prayers for relief in resolving a motion to dismiss. *See*, e.g., Lang v. Cnty. of Sonoma, No. C12-0983 TEH, 2012 U.S. Dist. LEXIS 142746, 2012 WL 4674527, at *6 (N.D. Cal. Oct. 2, 2012); Grohal v. Stauffer Chem. Co., 385 F. Supp. 1267, 1269 (N.D. Cal. 1974).

Walgreen Plaintiffs have obtained assignments of the wholesalers' claims against Lidoderm arising from the direct purchases. *Id.* The DSAs contain non-assignment clauses that (generally) prohibit the wholesalers from assigning their claims against Endo. Defendants point to these non-assignment clauses to argue that the assignments of the wholesaler's rights under the DSAs to the Walgreen Plaintiffs are invalid and that the Walgreen Plaintiffs lack standing. Mot. 8-10.

The DSAs govern Endo's sale of Lidoderm to the wholesalers, and include general provisions for product distribution, inventory management services, and distribution channel information, among other services. *See*, e.g., Dkt. No. 188-1. Each DSA contains essentially **[*37]** the same non-assignment clause: neither party to the DSA is permitted to assign "this Agreement" or any of its "duties or responsibilities" without the other party's consent. *See* Dkt. Nos. 188-1, 188-2, 188-3, 188-4; Mot. 8. In addition, the DSAs all contain language requiring that each party "comply with all applicable federal, state, and local laws involving the purchase, handling, sale, marketing and distribution of Products purchased under the Agreement." *See* Dkt. No. 188-1 at 9.

Defendants' argument rests primarily on *In re Ditropan XL Antitrust Litigation, No. M:06-CV-01761-JSW, 2007 U.S. Dist. LEXIS 78423, 2007 WL 2978329 (N.D. Cal. Oct. 11, 2007)*. In that case, the Hon. Jeffrey S. White addressed various antitrust claims brought by a plaintiff who, as here, was the purported assignee of a direct purchaser wholesaler. Judge White found that the assignment of rights to the plaintiff under a Distribution Performance Agreement between the drug manufacturer defendant and the wholesaler was invalid due to a non-assignment clause. *2007 U.S. Dist. LEXIS 78423, [WL] at *2*. He determined that because the distribution agreement discussed price control protection, it could "not be construed accurately as merely an inventory replenishment agreement." *Id.* Because it encompassed antitrust claims, he dismissed **[*38]** the complaint for lack of standing. Defendants argue that this case raises precisely the same issue and urge me to adopt the same analysis. Mot. 9.

I decline that invitation. First, I note that the reasoning that defendants rely on in *Ditropan XL* is dicta, because the court concluded that the plaintiff lacked standing on other grounds. *See* *2007 U.S. Dist. LEXIS 78423, 2007 WL 2978329, at *2* (plaintiff lacked standing because the assignment occurred *after* the plaintiff filed its amended complaint). Second, other courts that have recently addressed similar questions relating to the validity of assignment of antitrust claims have come to different conclusions.

In *In re TFT-LCD (Flat Panel) Antitrust Litigation*, the plaintiff brought antitrust claims that were assigned to it by vendors, but that the defendants argued were invalid due to non-assignment clauses in agreements that they had with the vendors.[3] *Nos. M 07-1827 SI, C 11-00711 SI, 2011 U.S. Dist. LEXIS 88723, 2011 WL 3475408, at *3-4 (N.D. Cal. Aug. 9, 2011)*. The Hon. Susan Illston found that the non-assignment clause's bar on the unilateral assignment of "rights and obligations" under the agreement had no bearing on the assignment of legal claims arising from those rights and obligations. *Id.* The court cited the *RESTATEMENT (SECOND) OF CONTRACTS § 322* (AM. LAW INST. 1981), which states that: "Unless the **[*39]** circumstances indicate the contrary, a contract term prohibiting assignment of 'the contract' bars only the delegation to an assignee of the performance by the assignor of a duty or condition." *2011 U.S. Dist. LEXIS 88723, [WL] at *3*. Observing no such circumstances, the court concluded that "litigation over antitrust claims cannot be seen as a 'right or duty' contemplated by the contract." *2011 U.S. Dist. LEXIS 88723, [WL] at *4*. Thus, the non-assignment clause did not provide a basis for dismissing the plaintiff's claims. *2011 U.S. Dist. LEXIS 88723, [WL] at *3-4*; *accord* *In re TFT-LCD (Flat Panel)*

---

[2] Defendants request that I take judicial notice of the DSAs and the Agreements for Assignment of Claims between Endo and the wholesalers, and between the wholesalers and the Walgreen Plaintiffs, respectively. Dkt. Nos. 184, 204. These agreements are incorporated into the FAC by reference and plaintiffs do not dispute their authenticity. *See* *Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005)*. To the extent that I rely on these documents, defendants' requests are GRANTED.

[3] The language of the non-assignment clauses in the *Flat Panel* cases was similar to the relevant provisions in this case. *Compare* *2011 U.S. Dist. LEXIS 88723, 2011 WL 3475408, at *4* ("[n]either party will assign their rights or delegate or subcontract their duties under this Agreement to third parties or Affiliates") *with* Dkt. No. 188-1 at 13 ("[n]either Party may assign this Agreement or delegate any of its respective duties or responsibilities [under] this Agreement without prior written consent . . .").

Antitrust Litig., Nos. M 07-1827 SI, C 10-3517 SI, 2011 U.S. Dist. LEXIS 105152, 2011 WL 4345316, at *3 (N.D. Cal. Sept. 15, 2011) (adopting the same analysis).

Defendants urge me to disregard the *Flat Panel* decisions and follow *Ditropan XL* here. Mot. 10. They do so first by distinguishing the facts of **[*40]** a case upon which the *Flat Panel* decisions relied: Lutheran Medical Center v. Contractors, Laborers, Teamsters & Engineers Health & Welfare Plan, 25 F.3d 616 (8th Cir. 1994) *abrogated on other grounds,* Martin v. Arkansas Blue Cross & Blue Shield, 299 F.3d 966 (2002) (en banc).

Lutheran Medical involved the assignment of an employee's rights under a health plan, which prohibited employees from assigning their rights or benefits under the plan. 25 F.3d at 619. While it did not involve antitrust claims or distribution agreements, this factual distinction is largely irrelevant. The *Lutheran Medical* court concluded that notwithstanding language that prohibited the assignment of "rights or benefits," the assignees were not prevented from bringing causes of action arising after the denial of benefits. *Id.* Because the employees assigned their causes of action, not the right to receive benefits under the plan, the assignment was valid. *Id.*

As Judge Illston recognized in the *Flat Panel* cases, the reasoning of *Lutheran Medical* applies to contexts in which a vendor assigns antitrust claims. *See* 2011 U.S. Dist. LEXIS 88723, 2011 WL 3475408, at *4 ("litigation over antitrust claims cannot be seen as a 'right or duty' contemplated by the contract"). Other courts have come to similar conclusions. *See*, e.g., Meijer, Inc. v. Barr Pharmaceuticals, Inc., 572 F. Supp. 2d 38, 64 (D.D.C. 2008) (finding that a non-assignment clause barring the assignment of "this Agreement" could not "be read to prevent the assignment of the parties' **[*41]** statutorily-based antitrust claims.") (internal citations omitted); Health Alliance Network, Inc. v. Cont'l Cas. Co., 354 F. Supp. 2d 411, 417 n.8 (S.D.N.Y. 2005) ("a non-assignment clause does not prohibit assignment of a right to damages for breach of the whole contract or a right arising out of due performance").

Even if the DSAs are construed to prohibit the assignment of the right to bring antitrust claims, the violation of this provision would not render the assignment of a cause of action, instead of the "duty or condition," invalid. While the legal compliance provisions of the DSAs arguably prevent signatories from assigning their duties to comply with applicable law to third parties, a duty is not equivalent to a right arising from a breach of that duty. *See* TransWorld Airlines, Inc. v. Am. Coupon Exch., Inc., 913 F.2d 676, 685 (9th Cir. 1990) (explaining that contractual rights "must be distinguished from *duties*"). Even after the wholesalers assigned their rights to sue for antitrust violations to the Walgreen Plaintiffs, the duty of legal compliance remained with the original parties to the DSAs.

Defendants argue that like *Ditropan XL* and unlike the *Flat Panel* cases, the duty of legal compliance outlined in the DSAs encompasses antitrust laws and demonstrates the parties' intent to prevent the assignment of legal claims. Reply 7-8. The court in *Flat* ***[*42]*** *Panel* acknowledged that there are some "circumstances [that] indicate that the parties intended the anti-assignment provisions to cover territory beyond the rights and obligations set forth in the sales contracts." 2011 U.S. Dist. LEXIS 88723, 2011 WL 3475408, at *4 (internal quotation marks and modifications omitted). But here the non-assignment provisions do not clearly prevent the wholesalers from assigning claims arising out of ***antitrust law***. Davidowitz v. Delta Dental Plan of Cal., Inc., 946 F.2d 1476, 1478 (9th Cir. 1991) ("As a general rule of law, *where the parties' intent is clear*, courts will enforce non-assignment provisions.") (emphasis added).

The existence of a boilerplate duty to abide by "applicable law" does not manifest the requisite intent to expand the scope of the non-assignment clauses beyond their ordinary language. *See* Flat Panel, 2011 U.S. Dist. LEXIS 88723, 2011 WL 3475408, at *4; 2011 U.S. Dist. LEXIS 105152, 2011 WL 4345316, at *3; *see also* TransWorld Airlines, 913 F.2d at 685 ("an explicit contractual provision forbidding assignment of a right created by that contract is ordinarily enforceable *according to its terms*") (emphasis added). The DSAs do not specifically mention ***antitrust law*** or the assignment of legal claims. As in Flat Panel and Meijer, the non-assignment clause is limited to "this Agreement," and does not cover unrelated claims arising from ***antitrust law***.

Flat Panel*,* Lutheran Medical, and Meijer are well-reasoned and factually **[*43]** analogous to this case, notwithstanding defendants' attempts to distinguish them. The DSAs' non-assignment clauses are limited to the assignment of duties and obligations under the DSAs themselves and do not include causes of action sounding in antitrust arising from those agreements. Therefore, the wholesalers' assignments of antitrust claims to the Walgreen Plaintiffs are valid and the FAC does not fail under *Rule 12(b)(1)*.

Defendants also challenge the FAC's allegations that the individual plaintiff Walgreen Co. is "contractually entitled to a second assignment from . . . another pharmaceutical wholesaler, which during the relevant period purchased Lidoderm directly from Endo for resale to Walgreen." FAC ¶ 8; Mot. 11. Because all Walgreen Plaintiffs have standing under the assignments, this argument is inapposite. *See* *In re SLM Corp. Sec. Litig., 258 F.R.D. 112, 115 (S.D.N.Y. 2009)* ("To the extent courts allow assignment of a claim after litigation commences, the plaintiff generally has Article III standing on at least one other claim at the time the action was filed."). The issue of Walgreen's future assignment may become relevant in determining damages, but need not be considered at this stage. *See* FAC ¶ 8 (Walgreen "intends to include purchases made through **[*44]** ABDC in its damage claim when it obtains that assignment.").

III. **GRANTING A STAY PENDING CLASS CERTIFICATION IS IMPROPER**

Defendants argue that *Rule 19 of the Federal Rules of Civil Procedure* requires the Walgreen Plaintiffs to pursue any legitimately assigned claims as part of the putative class action brought by the Direct Purchaser Plaintiffs ("DPPs") in this litigation, and request a stay in anticipation of that group's Rule 23 motion. Mot. 12. They further assert that because the Walgreen Plaintiffs only have partial assignments from the wholesalers, allowing their action to continue separately from those of the DPPs would "complicate the administration of the litigation, and impermissibly force Defendants to face a multiplicity of suits rather than a single claim." *Id.* The Walgreen Plaintiffs respond that this multidistrict litigation sufficiently consolidates the cases to alleviate any of the concerns raised by defendants, and contend that any denial of their rights to opt out of any such class violates *Rule 23* and raises serious due process concerns. Oppo. 11.

Defendants rely heavily on *In re Fine Paper Litigation State of Washington, 632 F.2d 1081, 1091 (3d Cir. 1980)* and *Bailey Lumber & Supply Co. v. Georgia-Pac. Corp., No. 1:08CV1394 LG-JMR, 2009 U.S. Dist. LEXIS 131486, 2009 WL 2872307, at *1 (S.D. Miss. Aug. 10, 2009)*. In *Fine Paper*, the court held that a partial assignee in an antitrust class action **[*45]** was precluded from opting out of a class post-certification. In doing so, the court stated that partial assignment of claims did not pose any problems identified in *Illinois Brick*; namely, that indirect purchasers would bring claims and expose defendants to double liability, or that there would be "insurmountable problems of proof and procedure in typical antitrust cases." *632 F.2d at 1090*. Instead, *Fine Paper* found that the partial assignments created potential complications associated with permitting a partial assignee to opt out of a class, including defendants' uncertainty regarding outstanding liability following settlement with assignors, protection from "additional litigation," and *Rule 19*'s compulsory joinder provisions. *Id. at 1090-91*.

In *Bailey Lumber*, the court addressed two sets of partial assignments of antitrust claims. The first involved claims with "no prior history," while the second involved claims assigned from a party who had opted out of a prior class action bringing the same claims. *2009 U.S. Dist. LEXIS 131486, 2009 WL 2872307, at *7*. The court held that the plaintiff could not bring the second set of claims because it "was not entitled to opt out of the class action and bring [the claims] in this suit without the Defendants' consent." *Id.* Notably, **[*46]** it held that the plaintiff *could* bring the first set of claims. *Id.*

At this stage of the litigation, there is no basis to dismiss or stay the case due to the concerns raised in *Bailey Lumber* or *Fine Paper*. Unlike here, in those cases the partial assignee attempted to opt out of a class that had already been certified, and the assignors were members of that class. *See* *Fine Paper, 632 F.2d at 1089*. Moreover, all relevant cases, claims, and parties are joined in this multidistrict litigation lawsuit, removing many of the problems discussed in those cases. I see no reason why this case cannot be managed in a way to avoid the problems in administration and multiplicity of suits cited by the defendants.

Finally, *Bailey Lumber* and *Fine Paper* stand for the principle that antitrust plaintiffs with partially assigned claims may not opt of a class due to concerns that they will circumvent joinder rules or interfere with the rights of the defendant to be free of excessive and repeated suits growing out of same basic facts. They do not stand for the proposition that partially assigned claims must be dismissed or stayed in actions such as this, where there is no "prior history" of litigation of these claims in a different court. **[*47]**

The current status of this litigation makes a decision to dismiss or stay those claims premature. Although the DPPs have filed a class action complaint, Dkt. No. 70, that group has not yet moved for class certification. And interestingly, none of the *wholesalers* from whom the Walgreen Plaintiffs have been assigned claims are named in the DPP complaint. *See id.* Although defendants raise the issue of partial assignments, it remains unclear whether the wholesalers that assigned their claims to the Walgreen Plaintiffs have reserved for themselves any portion of their right to sue defendants. Thus, defendants' argument is not persuasive. The motion to dismiss or stay the partial assignment claims is DENIED.

CONCLUSION

For the foregoing reasons, I STRIKE the Walgreen Plaintiffs' claims insofar as they are brought as indirect purchasers, with leave to amend, and DENY the remainder of defendants' motion to dismiss.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > Special Proceedings > Class Actions > Class Action Fairness Act

HN1[] **Class Actions, Class Action Fairness Act**

The Class Action Fairness Act confers on district courts original jurisdiction where: (1) the amount in controversy exceeds $5,000,000, as aggregated across all individual claims; (2) there are minimally diverse parties; and (3) the class consists of at least 100 or more members. *28 U.S.C.S. § 1332(d)(2)*, *(5)(B)*, *(6)*.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN2[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Although the parties do not dispute jurisdiction, courts must nevertheless satisfy themselves that federal subject matter jurisdiction exists in the first instance.

Civil Procedure > Special Proceedings > Class Actions > Class Action Fairness Act

HN3[] Class Actions, Class Action Fairness Act

In order to determine whether the Class Action Fairness Act, *28 U.S.C.S. § 1332(d)(2)*, jurisdictional requirements are satisfied, a court evaluates allegations in the complaint.

Civil Procedure > ... > Diversity Jurisdiction > Amount in Controversy > Challenges

Civil Procedure > Special Proceedings > Class Actions > Class Action Fairness Act

HN4[] Amount in Controversy, Challenges

Where the defendant did not contest a complaint's jurisdictional facts under the Class Action Fairness Act, *28 U.S.C.S. § 1332(d)(2)*, appellate courts ask whether it is clear to a legal certainty that the plaintiff cannot recover the amount claimed.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN5[] Standards of Review, Abuse of Discretion

Appellate courts review a class certification order for abuse of discretion, which occurs if the district court's decision rests upon a clearly erroneous finding of fact, an errant conclusion of law or an improper application of law to fact.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN6[] Standards of Review, De Novo Review

Appellate courts review de novo a legal standard applied by a district court.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN7[] Case or Controversy, Standing

Appellate courts have an obligation to assure themselves of litigants' standing under U.S. Const. art. III.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN8[] Standards of Review, De Novo Review

Appellate courts exercise plenary review over a threshold question of law, such as that presented by a U.S. Const. art. III. standing challenge.

Constitutional Law > ... > Case or Controversy > Standing > Elements

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN9[] Standing, Elements

U.S. Const. art. III governs constitutional standing and limits jurisdiction to actual "cases or controversies." U.S. Const. art. III, § 2. Article III requires a plaintiff to demonstrate (1) an injury in fact, (2) a sufficient causal connection between the injury and the conduct complained of, and (3) a likelihood that the injury will be redressed by a favorable decision. Constitutional standing ensures that litigants are truly adverse to one another and are not merely suitors in the courts of the United States. In essence the question of standing is whether the litigant is entitled to have the court decide the merits of the dispute or of particular issues. The law of Article III standing, which is built on separation-of-powers principles, serves to prevent the judicial process from being used to usurp the powers of the political branches. A concrete dispute informs the court of the consequences of its decisions and prevents the anti-majoritarian federal judiciary from usurping the policy-making functions of the popularly elected branches.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN10[] Standing, Elements

The requisite injury-in-fact for U.S. Const. art. III standing is an invasion of a legally protected interest. That injury must be particularized, and concrete in both a qualitative and temporal sense. That injury must also be actual or imminent, not conjectural or hypothetical. A risk of future injury may support standing if the threatened harm is certainly impending, or there is a substantial risk that the harm will occur.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Evidence > Burdens of Proof > Allocation

HN11[] Case or Controversy, Standing

Standing requires that the party seeking to invoke federal jurisdiction demonstrate standing for each claim he seeks to press. Thus, courts do not exercise jurisdiction over one claim simply because it arose from the same nucleus of operative fact as another claim. Standing is not a mere pleading requirement but rather an indispensable part of the plaintiff's case, each element must be supported in the same way as any other matter on which the plaintiff bears the burden of proof, i.e., with the manner and degree of evidence required at the successive stages of the litigation.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN12[] Class Members, Absent Members

In the context of a class action, U.S. Const. art. III must be satisfied by at least one named plaintiff. If none of the named plaintiffs purporting to represent a class establishes the requisite of a case or controversy with the defendants, none may seek relief on behalf of himself or any other member of the class. The U.S. Supreme Court has yet to comment on what Article III requires of putative, unnamed class members during a *Fed. R. Civ. P. 23* motion for class certification.

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN13[] Special Proceedings, Class Actions

Considerations under *Fed. R. Civ. P. 23* are themselves procedural rules, and thus rarely can be antecedent to the question of whether a federal court has jurisdiction to hear a claim at all. *Rule 23* is, therefore, fundamentally a procedural device: it cannot ordinarily be construed to extend or limit the jurisdiction and venue of federal courts.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Governments > Courts > Authority to Adjudicate

HN14[] Subject Matter Jurisdiction, Jurisdiction Over Actions

Because a federal court has a bedrock obligation to examine both its own subject matter jurisdiction and that of the district courts, it is improper to resolve contested questions of law when its jurisdiction is in doubt.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Governments > Courts > Authority to Adjudicate

HN15[] Subject Matter Jurisdiction, Jurisdiction Over Actions

For a court to pronounce upon the meaning or the constitutionality of a state or federal law when it has no jurisdiction to do so is, by very definition, for a court to act ultra vires.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN16[] Class Members, Absent Members

Unnamed, putative class members need not establish U.S. Const. art. III standing. Instead, the "cases or controversies" requirement is satisfied so long as a class representative has standing, whether in the context of a settlement or litigation class.

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN17[] **Special Proceedings, Class Actions**

The class action device treats individuals falling within a class definition as members of a group rather than as legally distinct persons.

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN18[] **Justiciability, Standing**

Standing must be personal to and satisfied by those who seek to invoke the power of federal courts.

Civil Procedure > ... > Class Actions > Class Members > Named Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN19[] **Class Members, Named Members**

A class action is a representative action brought by a named plaintiff or plaintiffs. Named plaintiffs are the individuals who seek to invoke the court's jurisdiction and they are held accountable for satisfying jurisdiction. Thus, a class action is permissible so long as at least one named plaintiff has standing. Requiring individual standing of all class members would eviscerate the representative nature of the class action. It would also fail to recognize that the certified class is treated as a legally distinct entity even though the outcome of such an action is binding on the class.

Civil Procedure > ... > Class Actions > Class Members > Named Members

Constitutional Law > ... > Case or Controversy > Mootness > General Overview

Civil Procedure > ... > Justiciability > Mootness > Real Controversy Requirement

HN20[] **Class Members, Named Members**

In *Sosna v. Iowa, 419 U.S. 393, 95 S. Ct. 553, 42 L. Ed. 2d 532 (1975)*, the U.S. Supreme Court held a class action is not dismissed as moot if the named plaintiff had a live controversy when the suit was filed, a properly certified class action was pending, and there are members of the class whose claims are not moot. The Court did not require that all members have live claims and, instead, focused on there needing to be a "controversy" between at least a named defendant and a member of the class.

Civil Procedure > ... > Justiciability > Standing > Third Party Standing

Constitutional Law > ... > Case or Controversy > Standing > Third Party Standing

HN21[] **Standing, Third Party Standing**

Associational standing occurs whereby an organization may assert the rights of its members, provided: (a) its members would otherwise have standing to sue in their own right; (b) the interests it seeks to protect are germane to the organization's purpose; and (c) neither the claim asserted nor the relief requested requires the participation of individual members in the lawsuit. In the associational standing context, the test ensures there is an actual case and controversy without inquiring into the standing of every member of an organization.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN22[] **Class Members, Absent Members**

The U.S. Court of Appeals for the Second and Eighth Circuits purportedly require absent class members to have U.S. Const. art. III standing. The U.S. Court of Appeals for the Ninth and D.C. Circuits potentially do too. The U.S. Court of Appeals for the Third Circuit is not persuaded.

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN23[] **Special Proceedings, Class Actions**

Class actions are exceptions to the rule that litigation is usually conducted by and on behalf of the individual named parties only.

Civil Procedure > ... > Justiciability > Ripeness > General Overview

Constitutional Law > ... > Case or Controversy > Mootness > General Overview

Civil Procedure > ... > Class Actions > Class Members > Named Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN24[] **Justiciability, Ripeness**

Class representatives need to present a justiciable claim. A plaintiff who lacks the personalized, redressable injury required for standing to assert claims on his own behalf would also lack standing to assert similar claims on behalf of a class. At all times during the course of a class action, there must be a live "case or controversy" for U.S. Const. art. III purposes.

Civil Procedure > ... > Class Actions > Class Members > Named Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN25[] **Class Members, Named Members**

Class representatives must meet U.S. Const. art. III standing requirements the moment a complaint is filed.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN26[] **Class Members, Absent Members**

For a *Fed. R. Civ. P. 23(b)(2)* class, certification is appropriate even if the defendant's action or inaction has taken effect or is threatened only as to one or a few members of the class, provided it is based on grounds which have general application to the class. Technically speaking, those *Rule 23(b)(2)* class members may not have suffered a legal injury and, at best, may only have standing in light of a threatened future injury.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN27[] **Class Actions, Prerequisites for Class Action**

A class representative must be part of the class and possess the same interest and suffer the same injury as the class members. These "interests" or "injuries" are tested by the requirements of *Fed. R. Civ. P. 23*. These separate requirements establish the propriety of granting class-wide relief.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Civil Procedure > ... > Class Actions > Class Members > Named Members

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > ... > Justiciability > Standing > General Overview

HN28[] **Prerequisites for Class Action, Adequacy of Representation**

The question whether a class representative may be allowed to present claims on behalf of others who have similar, but not identical, interests depends not on standing, but on an assessment of typicality and adequacy of representation.

Civil Procedure > ... > Class Actions > Class Members > Named Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN29[] **Class Members, Named Members**

So long as a named class representative has standing, a class action presents a valid "case or controversy" under U.S. Const. art. III.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN30[] Class Actions, Certification of Classes

In Wachtel v. Guardian Life Insurance Co. of America, 453 F.3d 179, (3d Cir. 2006), the court held that Fed. R. Civ. P. 23(c)(1)(B) requires district courts to include in class certification orders a clear and complete summary of those claims, issues, or defenses subject to class treatment. The court rejected the practice of issuing memorandum opinions discussing the allegations in the complaint, the facts of the case, and some combination of the substantive requirements for class certification found in Rule 23(a) and (b) that then go on to treat the parameters of the class itself much more clearly and deliberately than the class claims, issues, or defenses. The court stated that Rule 23(c) requires more specific and more deliberate treatment of the class issues, claims, and defenses than the practice described above. Thus a class-certification order or an incorporated opinion must include (1) a readily discernible, clear, and precise statement of the parameters defining the class or classes to be certified, and (2) a readily discernible, clear, and complete list of the claims, issues or defenses to be treated on a class basis.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN31[] Class Actions, Certification of Classes

Although a motion for class certification presents a discretionary question for a district court, the court must clearly articulate its reasons, in part, so appellate courts can adequately review the certification decision on appeal under Fed. R. Civ. P. 23(f).

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Burdens of Proof > Preponderance of Evidence

HN32[] Class Actions, Certification of Classes

The party proposing class-action certification bears the burden of affirmatively demonstrating by a preponderance of the evidence her compliance with the requirements of Fed. R. Civ. P. 23. A district court must rigorously analyze the evidence used to establish class certification in order to ensure compliance with Rule 23(a) and at least one of the subsections of Rule 23(b). This rigorous analysis may require a district court to address, at least in part, the merits of a plaintiff's underlying claim because class determination generally involves considerations that are enmeshed in the factual and legal issues comprising the plaintiff's cause of action.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN33[] Prerequisites for Class Action, Predominance

Before certifying a Fed. R. Civ. P. 23(b)(3) class, a district court must evaluate whether, inter alia, questions of law or fact common to class members predominate over any questions affecting only individual members. Fed. R. Civ. P. 23(b)(3). This predominance test asks whether common issues of law or fact in the case predominate over non-common, individualized issues of law or fact. Predominance begins, of course, with the elements of the underlying cause of action. To assess predominance, a court at the certification stage must examine each element of a legal claim through the prism of Rule 23(b)(3). Each element of a legal claim is relevant to assessing predominance. That is because the nature of the evidence that will suffice to resolve a question determines whether the question is common or individual and that means that a district court must formulate some prediction as to how specific issues will play out.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN34[] Prerequisites for Class Action, Predominance

The presence of individual questions does not per se rule out a finding of predominance. If issues common to the class overwhelm individual issues, predominance should be satisfied. Predominance involves a qualitative assessment of common versus individualized questions; predominance is not determined simply by counting noses: that is, determining whether there are more common issues or more individual issues. Further, predominance does not require that common questions will be answered, on the merits, in favor of the class. What the rule does require is that common questions predominate over any questions affecting only individual class members. Fed. R. Civ. P. 23(b)(3).

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN35[] Class Actions, Certification of Classes

Comcast Corp. v. Behrend, 133 S. Ct. 1426, 185 L. Ed. 2d 515, 2013 U.S. LEXIS 2544 (2013), held that an antitrust litigation class could not be certified because the plaintiffs' damages model did not demonstrate the theory of antitrust impact that the district court accepted for class-action treatment.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN36[] Class Actions, Certification of Classes

Every question of class certification will depend on the nature of the claims and evidence presented by the plaintiffs. A trial court must consider carefully all relevant evidence and make a definitive determination that the requirements of Fed. R. Civ. P. 23 have been met before certifying a class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN37[] Prerequisites for Class Action, Predominance

Recognition that individual damages calculations do not preclude class certification under Fed. R. Civ. P. 23(b)(3) is well nigh universal. It is a misreading of Comcast Corp. v. Behrend, 133 S. Ct. 1426, 185 L. Ed. 2d 515, 2013 U.S.

LEXIS 2544 (2013), to interpret it as precluding certification under Rule 23(b)(3) in any case where the class members' damages are not susceptible to a formula for class wide measurement.

Opinion by: SMITH

Opinion

[*356] SMITH, *Circuit Judge*.

This appeal involves a putative class action brought by consumers from six states alleging that Appellants-Defendants Volvo Cars of North America, LLC and Volvo Car Corporation (collectively "Volvo") sold certain vehicles with defective sunroof drainage systems. Volvo challenges the grant of class certification by the U.S. District Court for the District of New Jersey. For the **[**2]** reasons that follow, we will vacate the District Court's order and remand for further proceedings.

I.

Plaintiffs-Appellees Joanne Neale, Keri Hay, Kelly McGary, Svein Berg, Gregory Burns, David Taft, Jeffrey Kruger, and Karen Collopy (collectively "Plaintiffs") filed suit on behalf of themselves and a nationwide class of current and former Volvo vehicle owners and lessees. Plaintiffs allege that a uniform design defect exists in the sunroof drainage systems in the following vehicles sold and leased to consumers by Volvo: S40, S60, S80, and V70 (model years 2004 to present); XC90 (model years 2003 to present); and V50 **[*357]** (model years 2005 to present) (the "Class Vehicles").

On August 7, 2012, Plaintiffs proposed a nationwide class consisting of "[a]ll persons or entities in the United States who are current or former owners and/or lessees of a Class Vehicle (the 'Nationwide Class')." Supplemental Appendix ("SA") 19; Joint Appendix ("JA") 140. In the alternative, Plaintiffs also proposed the following statewide classes:

> All persons or entities in Massachusetts who are current or former owners and/or lessees of a Class Vehicle (the "Massachusetts Class").
>
> All persons or entities in Florida who are **[**3]** current or former owners and/or lessees of a Class Vehicle (the "Florida Class").
>
> All persons or entities in Hawaii who are current or former owners and/or lessees of a Class Vehicle (the "Hawaii Class").
>
> All persons or entities in New Jersey who are current or former owners and/or lessees of a Class Vehicle (the "New Jersey Class").
>
> All persons or entities in California who are current or former owners and/or lessees of a Class Vehicle (the "California Class").

All persons or entities in Maryland who are current or former owners and/or lessees of a Class Vehicle (the "Maryland Class").

SA 20; *see also* JA 140-41 (Pls.' Second Am. Compl. listing all classes except for the Maryland Class). Volvo filed a brief in opposition to the proposed classes and separate motions for summary judgment against the individual class representatives.

On March 26, 2013, the District Court denied Plaintiffs' motion to certify a nationwide class, granted Plaintiffs' motion to certify six statewide classes, and denied Volvo's motions for summary judgment. After the Supreme Court's decision in *Comcast Corp. v. Behrend, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*, Volvo moved for reconsideration of the District Court's order granting class certification, which the District Court also **[**4]** denied. Volvo filed this timely appeal.

II.

The District Court had jurisdiction over this case pursuant to *28 U.S.C. §§ 1332(d)(2)* and *(d)(6)* and supplemental jurisdiction over the state law claims pursuant to *28 U.S.C. § 1367*.[1] We have jurisdiction **[*358]** pursuant to U.S.C. *§ 1292(e)* and *Rule 23(f) of the Federal Rules of Civil Procedure*.

HN5[] "We review a class certification order for abuse of discretion, which occurs if the district court's decision rests upon a clearly erroneous finding of fact, an errant conclusion of law or an improper application of law to fact." *Grandalski v. Quest Diagnostics Inc., 767 F.3d 175, 179 (3d Cir. 2014)* (quoting *Hayes v. Wal-Mart Stores, Inc., 725*

---

[1] Plaintiffs asserted federal jurisdiction under the Class Action Fairness Act of 2005 ("CAFA"). ***Pub. L. No. 109-2, 119 Stat. 4*** (codified in scattered sections of 28 U.S.C.). ***HN1***[] CAFA confers on district courts original jurisdiction where: (1) the amount in controversy exceeds $5,000,000, as aggregated across all individual claims; (2) there are minimally diverse parties; and (3) the class consists of at least 100 or more members. *28 U.S.C. § 1332(d)(2)*, *(5)(B)*, *(6)*; *Standard Fire Ins. Co. v. Knowles, 133 S. Ct. 1345, 1348, 185 L. Ed. 2d 439 (2013)*.

HN2[] Although the parties do not dispute CAFA jurisdiction, "[w]e must nevertheless satisfy ourselves that federal subject matter jurisdiction exists in the first instance." *Kaufman v. Allstate N.J. Ins. Co., 561 F.3d 144, 151 (3d Cir. 2009)*. ***HN3***[] "In order to determine whether the CAFA jurisdictional requirements are satisfied, a court evaluates allegations in the complaint." *Judon v. Travelers Prop. Cas. Co. of Am., 773 F.3d 495, 500 (3d Cir. 2014)*. Plaintiffs contend that there were over 100 class members because there were "tens of thousands" of Class Vehicles sold in the United States. JA 107, 141-42, Second Am. Compl. ¶¶ 5, 127. As to the amount in controversy, Plaintiffs allege that class members "suffered **[**5]** economic damages including but not limited to costly repairs, loss of vehicle use, substantial loss in value and resale value of the vehicles, and other related damages," JA 148, ¶ 148, that they are seeking punitive damages and attorney's fees and costs, and that this exceeds $5,000,000. Finally, because one plaintiff and one defendant are citizens of different states, Plaintiffs contend that there is minimal diversity. Volvo answered that the jurisdictional allegations stated "a legal conclusion to which no response [was] necessary," but to the extent "a response is deemed required, Volvo admits the allegations in this paragraph." JA 170, Am. Answer ¶ 5.

HN4[] Because Volvo did not contest these jurisdictional facts, we ask "whether it is clear to a legal certainty that the plaintiff cannot recover the amount claimed." *Judon, 773 F.3d at 505*. As in *Frederico v. Home Depot*, we have an idea of each class representative's damages but not the total number of class members. *507 F.3d 188, 199 (3d Cir. 2007)*. Using class representative Gregory Burns as an example, he was charged $252.82 to repair his damaged vehicle. As a citizen of New Jersey, he can seek punitive damages of up to five times the compensatory damages, *N.J. Stat. Ann. § 2A:15-5.14(b)*. Thus, an estimate of his total **[**6]** damages amounts to $1,516.92. A median recovery range for attorney's fees is approximately 30 percent, which would be $455.08 for Burns' claim. Burns' damages plus attorney's fees would equal $1,972. The $5,000,000 CAFA amount-in-controversy requirement divided by $1,972 equals approximately 2,536 class members. Because 2,536 is well under the number of Class Vehicles identified in the Second Amended Complaint ("tens of thousands"), we are satisfied that the "legal certainty test is met: as it does not appear to a *legal certainty* that [Plaintiffs] cannot recover the jurisdictional amount, the case need not be remanded and we may proceed to the substantive merits of this appeal." *See Frederico, 507 F.3d at 199*.

F.3d 349, 354 (3d Cir. 2013)) (internal quotation marks omitted).***HN6***[] We review de novo a legal standard applied by a district court. *Carrera v. Bayer Corp., 727 F.3d 300, 305 (3d Cir. 2013)*.

III.

Volvo argues on appeal that: (1) putative members of the class have not suffered an injury and therefore lack Article III standing; (2) the District Court failed **[**7]** to identify the class claims and defenses in its certification order; (3) the District Court erred in its analysis of the *Rule 23(b)(3)* predominance requirement; and (4) the Supreme Court's decision in *Comcast Corp. v. Behrend* means that Plaintiffs must have class-wide proof of damages in order for the class to be certified. We address each issue in turn.

A.

Volvo argues that all putative class members must have Article III standing. We begin with this argument because ***HN7***[] "[w]e have 'an obligation to assure ourselves' of litigants' standing under Article III." *DaimlerChrysler Corp. v. Cuno, 547 U.S. 332, 340, 126 S. Ct. 1854, 164 L. Ed. 2d 589 (2006)* (quoting *Friends of the Earth, Inc. v. Laidlaw Envtl. Servs. (TOC), Inc., 528 U.S. 167, 180, 120 S. Ct. 693, 145 L. Ed. 2d 610 (2000))*; *see also In re Deepwater Horizon, 739 F.3d 790, 798 (5th Cir. 2014)*. ***HN8***[] We exercise plenary review over a threshold question of law, such as that presented by an Article III standing challenge. *McNair v. Synapse Grp. Inc., 672 F.3d 213, 222 n.9 (3d Cir. 2012)*.

1.

HN9[] Article III governs constitutional standing and limits our jurisdiction to actual "cases or controversies." *U.S. Const. art. III, § 2*. Article III requires a plaintiff **[*359]** to demonstrate "(1) an 'injury in fact,' (2) a sufficient 'causal connection between the injury and the conduct complained of,' and (3) a 'likel[ihood]' that the injury 'will be redressed by a favorable decision.'" *Susan B. Anthony List v. Driehaus, 134 S. Ct. 2334, 2341, 189 L. Ed. 2d 246 (2014)* (alterations in original) (quoting *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1991))*. Constitutional standing ensures that litigants are truly adverse to one another and are not merely "suitors in the courts of **[**8]** the United States." *Valley Forge Christian Coll. v. Ams. United for Separation of Church and State, Inc., 454 U.S. 464, 476, 102 S. Ct. 752, 70 L. Ed. 2d 700 (1982)*; *Warth v. Seldin, 422 U.S. 490, 498, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)* ("In essence the question of standing is whether the litigant is entitled to have the court decide the merits of the dispute or of particular issues."). "The law of Article III standing, which is built on separation-of-powers principles, serves to prevent the judicial process from being used to usurp the powers of the political branches." *Clapper v. Amnesty Int'l USA, 133 S. Ct. 1138, 1146, 185 L. Ed. 2d 264 (2013)*; *see also* William A. Fletcher, *The Structure of Standing*, *98 Yale L.J. 221, 222 (1988)* (explaining that a concrete dispute "informs the court of the consequences of its decisions" and prevents "the anti-majoritarian federal judiciary from usurping the policy-making functions of the popularly elected branches").

The case before us concerns the injury-in-fact requirement. ***HN10***[] The requisite injury-in-fact is an "invasion of a legally protected interest." *Lujan, 504 U.S. at 560*. That injury must be "particularized," *id.*, and "concrete in both a qualitative and temporal sense," *Whitmore v. Arkansas, 495 U.S. 149, 155, 110 S. Ct. 1717, 109 L. Ed. 2d 135 (1990)*. That injury must also be "actual or imminent, not conjectural or hypothetical." *Lujan, 504 U.S. at 560* (quoting *Whitmore, 495 U.S. at 155*) (internal quotation marks omitted). A risk of future injury may support standing if the threatened harm is "certainly impending," or there is a "'substantial risk'" that the harm will occur. *Clapper, 133 S. Ct. at 1148, 1150 n.5* (quoting *Monsanto Co. v. Geertson Seed Farms, 561 U.S. 139, 153, 130 S. Ct. 2743, 177 L. Ed. 2d 461 (2010))*.

HN11[] Standing requires **[**9]** that the party seeking to invoke federal jurisdiction "demonstrate standing for each claim he seeks to press." *DaimlerChrysler, 547 U.S. at 352*. Thus, we do not exercise jurisdiction over one claim simply because it arose "from the same 'nucleus of operative fact'" as another claim. *Id.* Accordingly,

> [S]tanding is not a "mere pleading requiremen[t] but rather an indispensable part of the plaintiff's case, each element must be supported in the same way as any other matter on which the plaintiff bears the burden of proof, *i.e.*, with the manner and degree of evidence required at the successive stages of the litigation."

Ala. Legis. Black Caucus v. Alabama, 135 S. Ct. 1257, 1276, 191 L. Ed. 2d 314 (2015) (alteration in original) (quoting *Lujan, 504 U.S. at 561*).

HN12[] In the context of a class action, Article III must be satisfied "by at least one named plaintiff." *McNair, 672 F.3d at 223*; *see also* *O'Shea v. Littleton, 414 U.S. 488, 494, 94 S. Ct. 669, 38 L. Ed. 2d 674 (1974)* ("[I]f none of the named plaintiffs purporting to represent a class establishes the requisite of a case or controversy with the defendants, none may seek relief on behalf of himself or any other member of the class."). The Supreme Court has yet **[*360]** to comment on what Article III requires of putative, unnamed class members during a *Rule 23* motion for class certification.[2]

In *Amchem Products, Inc. v. Windsor*, the Supreme Court declined to address the argument that asbestos exposure-only class members had no standing to pursue their class claims and instead began its analysis with *Rule 23*. *521 U.S. 591, 612-13, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*. The Supreme Court agreed with our analysis that the settlement class's standing issues "'would not exist but for the [class-action] certification'" and that those issues were dispositive "because their resolution [was] logically antecedent to the existence of any Article III issues." *Id. at 612* (first alteration in original) (quoting *Georgine v. Amchem Prods., Inc., 83 F.3d 610, 623 (3d Cir. 1996)*); *see also* *Ortiz v. Fibreboard Corp., 527 U.S. 815, 831, 119 S. Ct. 2295, 144 L. Ed. 2d 715 (1999)* (reasoning that the question of whether certification of a settlement class under *Rule 23(b)(1)(B)* on a limited fund rationale presented, as in *Amchem*, an issue of "statutory standing" that "should be treated first").

Yet *HN13*[] considerations under *Rule 23* are themselves procedural rules, and thus rarely can be antecedent to the **[**11]** question of whether a federal court has jurisdiction to hear a claim at all. *See* *28 U.S.C. § 2072(a)*, *(b)* (authorizing the Supreme Court to prescribe "general rules of practice and procedure," but providing that those rules "shall not abridge, enlarge or modify any substantive right"); *Fed. R. Civ. P. 82* (stating that the Federal Rules of Civil Procedure "do not extend or limit the jurisdiction of the district courts"); 1 William B. Rubenstein, *Newberg on Class Actions* § 1:1 (5th ed. 2012) ("*Rule 23* is, therefore, fundamentally a *procedural* device: it cannot ordinarily be construed to extend or limit the jurisdiction and venue of federal courts."). What is more, the Supreme Court has recently explained that "statutory standing" is "misleading, since 'the absence of a valid (as opposed to arguable) cause of action does not implicate subject-matter jurisdiction.'" *Lexmark Int'l, Inc. v. Static Control Components, Inc., 134 S. Ct. 1377, 1387 n.4, 188 L. Ed. 2d 392 (2014)* (quoting *Verizon Md. Inc. v. Pub. Serv. Comm'n of Md., 535 U.S. 635, 642-43, 122 S. Ct. 1753, 152 L. Ed. 2d 871 (2002)*). *HN14*[] Because a federal court has a "bedrock obligation to examine both [its] own subject matter jurisdiction and that of the district courts," *Pub. Interest Research Grp. of N.J., Inc. v. Magnesium Elektron, Inc., 123 F.3d 111, 117 & n.5 (3d Cir. 1997)*, it is improper to "resolve contested questions of law when its jurisdiction is in doubt." *Steel Co. v. Citizens for a Better Env't, 523 U.S. 83, 101, 118 S. Ct. 1003, 140 L. Ed. 2d 210 (1998)*.

The Supreme Court has candidly recognized the tension in its standing precedent: "We need not mince words when we say that the concept **[**12]** of 'Art. III standing' has not been defined with complete consistency in all of

---

[2] The Supreme Court granted the petition for certiorari in ***Tyson Foods, Inc. v. Bouaphakeo, No. 14-1146, 135 S. Ct. 2806, 192 L. Ed. 2d 846, 2015 U.S. LEXIS 3860, 2015 WL 1278593, at *1 (U.S. June 8, 2015)***. The second question presented is: "Whether a class action may be certified **[**10]** or 12 maintained under *Rule 23(b)(3)*, or a collective action certified or maintained under the Fair Labor Standards Act, when the class contains hundreds of members who were not injured and have no legal right to any damages." Pet. for Writ of Cert, *Tyson Foods, Inc. v. Bouaphakeo*, 2015 WL 1285369, at *i (Mar. 19, 2015). The Supreme Court may, therefore, answer this question during its October 2015 term.

the various cases decided by this Court." *Valley Forge Christian Coll., 454 U.S. at 475*. One could say that *Amchem* stands for the proposition **[*361]** that when a federal court would deny a class certification motion, that court need not reach the question of jurisdiction. *See* *521 U.S. at 612-13*. Yet that logic could result in a federal court, in many cases, reaching *Rule 23* questions before assuring itself of jurisdiction. Even more problematic for this application of *Amchem* is the extensive discussion in *Steel Co. v. Citizens for a Better Environment* that read cases that "ha[d] diluted the absolute purity of the rule that Article III jurisdiction is always an antecedent question" in a very limited manner. *523 U.S. at 101*. The Supreme Court reasoned that ***HN15***[] "[f]or a court to pronounce upon the meaning or the constitutionality of a state or federal law when it has no jurisdiction to do so is, by very definition, for a court to act ultra vires." *Id. at 101-02*. And because determining the answer to a *Rule 23* certification motion involves "rigorous analysis" that may overlap with merits-based questions, *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. 2541, 2551-52, 180 L. Ed. 2d 374 (2011)*, a federal court's analysis will rarely be an obvious, foregone conclusion. Indeed, *Amchem* cautioned that "[i]f certification issues **[**13]** were genuinely in doubt . . . the jurisdictional issues would loom larger." *521 U.S. at 613 n.15*.

In this case, certification issues are genuinely in doubt. And because we will remand this matter to the District Court as described herein, that court may well be presented with the very same arguments regarding standing. For these reasons, we address Volvo's standing argument.

2.

In *In re Prudential Insurance Co. America Sales Practice Litigation Agent Actions*, we addressed the applicability of Article III to a putative class. The case involved a settlement class alleging improper sales and marketing practices by the life insurer Prudential. *148 F.3d 283, 290-92 (3d Cir. 1998)*. We held that once Article III standing "is determined vis-a-vis the named parties . . . there remains no further separate class standing requirement in the constitutional sense." *Id. at 306-07* (quoting 1 William B. Rubenstein, *Newberg on Class Actions* § 2.05 (3d ed. 1992)) (citing *In re Prudential Ins. Co. of Am. Sales Practices Litig., 962 F. Supp. 450, 505-06 (D.N.J. 1997)* and *Allee v. Medrano, 416 U.S. 802, 828, 94 S. Ct. 2191, 40 L. Ed. 2d 566 (1974))*.[3] We further explained that "absentee class members are not required to make a similar showing, because once the named parties have demonstrated they are properly before the court, 'the issue [becomes] one of compliance with the provisions of *Rule 23*, not one of Article III standing.'" *Id. at 307* (alteration in original) (quoting **[**14]** *Goodman v. Lukens Steel Co., 777 F.2d 113, 122 (3d* ***[*362]*** *Cir. 1985)*, *aff'd*, *482 U.S. 656, 107 S. Ct. 2617, 96 L. Ed. 2d 572 (1987))*; *see also* *Hayes, 725 F.3d at 361 & n.11-12* (explaining that at the class certification stage when a named plaintiff's Article III standing is in question, a district court must determine whether that named plaintiff "falls within the amended class definition and sustained an injury"). Because *In re Prudential* involved a settlement class, we did not have occasion expressly to address whether unnamed class members in a litigation class must have Article III standing.[4]

---

[3] The latest version of *Newberg on Class Actions* provides that "[a] class action can be maintained by one class representative with proper standing," and cites to *Rule 23(a)* as authority. 2 William B. Rubenstein, *Newberg on Class Actions* § 2:8 (5th ed. 2012); *id.* § 2:1 ("Once threshold individual standing by the class representative is met, a proper party to raise a particular issue is before the court; there is no further, separate 'class action standing' requirement."); *see also* 5 Jerold S. Solovy et al., *Moore's Federal Practice - Civil § 23.63* (3d ed. 1997) ("The named plaintiff in a class action must meet all the jurisdictional requirements to bring an individual suit asserting the same claims, including standing."); 1 *McLaughlin on Class Actions* § 4:28 (11th ed. **[**15]** 2014) ("In the class action context, including cases seeking prospective injunctive relief, as an Article III justiciability matter only the named plaintiff must demonstrate standing to assert the claims (including injury in fact), not the absent class members. Individual class members do not need to submit evidence of personal standing." (footnotes omitted)).

[4] Volvo also asks us to treat the certification of a settlement class in *In re Prudential* as distinguishable from that of a litigation class. Nothing in *In re Prudential*, however, limited its reach to that of absent *settlement* class members. *See* *148 F.3d at 306-07*. Nor has our application of *In re Prudential* been limited solely to settlement classes. *See* *McCray v. Fidelity Nat'l Title Ins. Co., 682 F.3d 229, 243 & n.13 (3d Cir. 2012)* ("In the context of class actions, Article III standing 'is determined vis-a-vis the named parties.'" (quoting *In re Prudential, 148 F.3d at 306*)). Indeed, *Rule 23*'s rigors are not relaxed as to a settlement class; we simply do not weigh issues of trial management as they are irrelevant in such a situation. *Sullivan v. DB Investments, Inc. (Sullivan II), 667 F.3d 273, 303 (3d Cir. 2011)* (en banc) ("[A] district court '[c]onfronted with a request for settlement-only class

We now squarely hold that ***HN16***[] unnamed, putative class members need not establish Article III standing. Instead, the "cases or controversies" requirement is satisfied so long as a class representative has standing, whether in the context of a settlement or litigation class. This rule is compelled by *In re Prudential* and buttressed by a historical review of representative actions.

It is well-established that "history and tradition offer a meaningful guide to the types of cases that Article III empowers federal courts to consider." *Sprint Commc'ns Co., L.P. v. APCC Servs., Inc., 554 U.S. 269, 274, 128 S. Ct. 2531, 171 L. Ed. 2d 424 (2008)*. "[G]roup litigation has a remarkably deep history" dating back to medieval times. Stephen C. Yeazell, *The Past and Future of Defendant and Settlement Classes in Collective Litigation*, *39 Ariz. L. Rev. 687, 687 (1997)*; Stephen C. Yeazell, *From Medieval Group Litigation to the Modern Class Action* 21 (1987) (explaining that representative group litigation in medieval times was attributable to "societ[ies] pervasively organized in groups," such as "villages, parishes, [and] guilds"). As societies evolved, so did the characteristics and treatment of group litigation. One example is the English Chancery practice **[**17]** of the "necessary parties" rule of the seventeenth and eighteenth centuries, which "required that any person with an interest in the object of a suit be joined as a party." Geoffrey C. Hazard, Jr. et al., *An Historical Analysis of the Binding Effect of Class Suits*, *146 U. Pa. L. Rev. 1849, 1858 (1998)*. The necessary parties rule had several exceptions, including the "impossibility exception," which covered "situations in which interested parties were so numerous that it was practically impossible to join them all." *Id. at 1860*; *see also* *Ortiz, 527 U.S. at 832-33*. The impossibility exception permitted representative suits, such as "bills of peace involving a common benefit to or burden upon the members of the group, . . . cases involving a group having creditor claims against a debtor or legatee claims against an estate, and cases involving unincorporated associations." Hazard, Jr. et al., *146 U. Pa. L. Rev. at 1861*; **[*363]** *see also* W. S. Holdsworth, *The History of the Treatment of Choses in Action by the Common Law*, 33 Harv. L. Rev. 997, 1003 (1920) (discussing the gradual and partial allowance of personal rights of action to be asserted by representatives). Such representative actions, including the most widely-recognized bill of peace, were post-medieval developments in the long history of representative litigation. **[**18]** Yeazell, *From Medieval Group Litigation to the Modern Class Action*, at 24-25.

The history of representative actions under English law and how they crossed the pond to nineteenth-century America is marked by complexity. Yeazell, *From Medieval Group Litigation to the Modern Class Action*, at 213-37. Scholars mostly agree that representative actions under the law of this country can be traced back at least as far as Justice Joseph Story's *Commentaries on Equity Pleadings. Id.* at 216-20; Hazard, Jr. et al., *146 U. Pa. L. Rev. at 1878* (citing Joseph Story, *Commentaries on Equity Pleadings*, §§ 94-97, at 93-98 (2d ed. 1840)). In *Smith v. Swormstedt*, the Supreme Court recognized an exception discussed by Justice Story to the well-established rule that litigation is typically conducted on behalf of named parties. *Smith v. Swormstedt, 57 U.S. (16 How.) 288, 298, 14 L. Ed. 942 (1853)*. The Court explained:

> [W]here the parties interested are numerous, and the suit is for an object common to them all, some of the body may maintain a bill on behalf of themselves and of the others; and a bill may also be maintained against a portion of a numerous body of defendants, representing a common interest.

Id. There was no mention of *Article III, § 2*—the Supreme Court focused on the *propriety* of the representative action itself and not whether there was truly a controversy (in the constitutional sense) between the feuding northern and southern wings of the Methodist Episcopal Church. *Id. at 303* ("The legal and equitable rights **[**19]** and liabilities of all being before the court by representation, . . . there can be very little danger but that the interest of all will be properly protected and maintained.").

Before the enactment of *Rule 23* in 1937, federal courts were not consistent in their application of the equity rules governing representative actions. *See* Equity Rule 38 (1912); Equity Rule 48 (1842); *Smith, 57 U.S. (16 How.) at 298* (failing to reference and contradicting the then-governing Equity Rule 48); *Trustees v. Greenough, 105 U.S. 527, 533, 26 L. Ed. 1157 (1881)* (making no reference to the basis for a representative suit but recognizing the ability of a plaintiff to utilize a common fund to pay attorney's fees); Hazard, Jr. et al., *146 U. Pa. L. Rev. at 1902-10*

---

certification' need not inquire whether the case 'would present intractable management problems.'" (second alteration in original) (quoting *Amchem, 521 U.S. at 620*)). Given that standing **[**16]** is a threshold jurisdictional question, there is no reason to alter its application for a litigation class.

(summarizing cases); Yeazell, *From Medieval Group Litigation to the Modern Class Action*, at 219 (The legitimacy of representative actions "could scarcely be questioned once an authority so eminent as Story had recognized it, though his confusion was reflected in the cases."). Yet during this time period it was never suggested that putative class members were required to have standing or that representative actions could not present a proper case or controversy.

In 1937, the Supreme Court promulgated the first version of *Rule 23* along with the Federal Rules of Civil Procedure, which took effect in 1938. *See* John G. Harkins, Jr., *Federal Rule 23—The Early Years*, *39 Ariz. L. Rev. 705, 705-09 (1997)*. *Rule 23* was drastically **[**20]** revised in 1966. Although the 1938 version of *Rule 23* was meant to "encourage more frequent use of class actions," Charles A. Wright, *Class Actions*, 47 F.R.D. 169, 170 (1970), in 1966 the Advisory Committee reworked *Rule 23* and "sought to catalogue in 'functional' **[*364]** terms 'those recurrent life patterns which call for mass litigation through representative parties,'" *Ortiz, 527 U.S. at 833* (quoting Benjamin Kaplan, *A Prefatory Note*, 10 B.C. Indus. & Com. L. Rev. 497, 497 (1969)).

A review of the foregoing history reveals that ***HN17***[] the class action device treats individuals falling within a class definition as members of a group rather than as legally distinct persons. *Sosna v. Iowa, 419 U.S. 393, 399, 95 S. Ct. 553, 42 L. Ed. 2d 532 (1975)* (reasoning that the "class of unnamed persons described in the certification *acquired a legal status separate from* the interest asserted by the [plaintiff]" (emphasis added)); *see also* Hazard, Jr. et al., *146 U. Pa. L. Rev. at 1852-53* (analyzing the group treatment of members of a class as it relates to the doctrine of res judicata). Indeed, in *In re Prudential* we reasoned that the Supreme Court's decision in *Allee v. Medrano* was instructive in providing that ***HN18***[] "standing must be personal to and satisfied by 'those who seek to invoke the power of federal courts.'" *In re Prudential, 148 F.3d at 306* (citing to *Allee, 416 U.S. at 828* (quoting *O'Shea, 414 U.S. at 493*)).

Herein lies the key:***HN19***[] a class action is a *representative* action brought by a named plaintiff **[**21]** or plaintiffs. Named plaintiffs are the individuals who seek to invoke the court's jurisdiction and they are held accountable for satisfying jurisdiction. *See* *Ortiz, 527 U.S. at 832*. Thus, a class action is permissible so long as at least one named plaintiff has standing. *See* *Horne v. Flores, 557 U.S. 433, 446, 129 S. Ct. 2579, 174 L. Ed. 2d 406 & n.2 (2009)*; *Arlington Heights v. Metro. Hous. Dev. Corp., 429 U.S. 252, 264, 97 S. Ct. 555, 50 L. Ed. 2d 450 & n.9 (1977)* ("[W]e have at least one individual plaintiff who has demonstrated standing . . . . Because of the presence of this plaintiff, we need not consider whether the other individual and corporate plaintiffs have standing to maintain the suit."); *Simon v. E. Ky. Welfare Rights Org., 426 U.S. 26, 40 n.20, 96 S. Ct. 1917, 48 L. Ed. 2d 450 (1976)* (class action does not eliminate a class representative's burden of establishing standing). Requiring individual standing of all class members would eviscerate the representative nature of the class action. It would also fail to recognize that the certified class is treated as a legally distinct entity even though the outcome of such an action is binding on the class. *See* *Fed. R. Civ. P. 23(c)(3)*.

What Volvo asks of this Court is arguably in conflict with Supreme Court precedent permitting a representative action to persist despite a named plaintiff's claim becoming moot after certification. In the context of the doctrine of mootness, the Supreme Court has already recognized the representative nature of the class. For example **[**22]** ***HN20***[] in *Sosna v. Iowa*, the Supreme Court held a class action is not dismissed as moot if the named plaintiff had a live controversy when the suit was filed, a properly certified class action was pending, and there are members of the class whose claims are not moot. *419 U.S. at 399, 402-03*. The Court did not require that *all* members have live claims and, instead, focused on there needing to be a "controversy" between *at least* "a named defendant and a member of the class." *Id. at 402*; *see also* *Franks v. Bowman Transp. Co., 424 U.S. 747, 755, 96 S. Ct. 1251, 47 L. Ed. 2d 444 (1976)* (a properly certified class action "'clearly presented' the District Court and the Court of Appeals 'with a case or controversy in every sense contemplated by Art. III of the Constitution'" (quoting *Sosna, 419 U.S. at 398*)); *Holmes v. Pension Plan of Bethlehem Steel Corp., 213 F.3d 124, 135 (3d Cir. 2000)* ("So long **[*365]** as a class representative has a live claim at the time he moves for class certification, neither a pending motion nor a certified class action need be dismissed if his individual claim subsequently becomes moot.").

The Supreme Court has also permitted representative standing of sorts in a variety of other contexts. *Horne, 557 U.S. at 446* ("Because the superintendent clearly has standing to challenge the lower courts' decisions, we need not consider whether the Legislators also have standing to do so."); *Rumsfeld v. Forum for Academic & Institutional Rights, Inc., 547 U.S. 47, 52 n.2, 126 S. Ct. 1297, 164 L. Ed. 2d 156 (2006)* (declining to decide whether the individually named plaintiffs had **[**23]** standing because "the presence of one party with standing is sufficient to satisfy Article III's case-or-controversy requirement"). A particularly apt example of this includes ***HN21***[] associational standing, whereby an organization may assert the rights of its members, provided: "(a) its members would otherwise have standing to sue in their own right; (b) the interests it seeks to protect are germane to the organization's purpose; and (c) neither the claim asserted nor the relief requested requires the participation of individual members in the lawsuit." *Hunt v. Wa. State Apple Adver. Comm'n, 432 U.S. 333, 343, 97 S. Ct. 2434, 53 L. Ed. 2d 383 (1977)*. As to the first prong of the organizational standing test, the Supreme Court in *Hunt* required only that "*some* Washington apple growers" had suffered injuries. *Id.* (emphasis added); *see also* *Laidlaw, 528 U.S. at 181-83* (reasoning that affidavits from *some* organization members were sufficient to establish that the association's "members would otherwise have standing to sue in their own right"). The clear import of that requirement is that in the associational standing context, the test ensures there is an actual case and controversy without inquiring into the standing of every member of an organization. Along this same line, the Supreme Court openly recognizes the ability **[**24]** of a State to bring suit in a *parens patriae* action. *See* *Alfred L. Snapp & Son, Inc. v. Puerto Rico, 458 U.S. 592, 607, 102 S. Ct. 3260, 73 L. Ed. 2d 995 (1982)* (permitting a State to bring suit on behalf of its citizens where the State expresses a quasi-sovereign interest). The focus in a *parens patriae* action is on the State, "independent of the benefits that might accrue to any particular individual." *Id. at 608*.

Volvo urges this Court to adopt the approach taken by some of our sister courts that require all class members to possess standing. ***HN22***[] The Second and Eighth Circuits purportedly require absent class members to have Article III standing. The Ninth and D.C. Circuits potentially do too. We are not persuaded.

In *Denney v. Deutsche Bank AG, 443 F.3d 253 (2d Cir. 2006)*, the Second Circuit affirmed the district court's certification of a *Rule 23(b)(3)* class in a suit against professional tax advisors for improper and fraudulent tax counseling. *Id. at 259*. Two class objectors challenged certification on the grounds that the class contained members who had not yet been assessed tax penalties and therefore lacked Article III or statutory standing. *Id.* As to the standing challenge, the Court explained that "[w]e do not require that each member of a class submit evidence of personal standing. At the same time, no class may be certified that contains members lacking Article **[**25]** III standing. The class must therefore be defined in such a way that anyone within it would have standing." *Id. at 263-64* (citations omitted). The Second Circuit has not expanded upon this declaration.

[*366] The Eighth Circuit in *Avritt v. Reliastar Life Insurance Co.* held that a California law that permitted a single injured plaintiff to bring a class action on behalf of a group of uninjured individuals was "inconsistent with the doctrine of standing as applied by federal courts." *615 F.3d 1023, 1034 (8th Cir. 2010)*. Yet the Court explained that "federal courts 'do not require that each member of a class submit evidence of personal standing.'" *Id.* (quoting *Denney, 443 F.3d at 263-64*). Reconciling this tension, the Court reasoned that "[a] class 'must therefore be *defined* in such a way that anyone within it would have standing.'" *Id.* (emphasis added) (quoting *Denney, 443 F.3d at 264*). More recently in *Halvorson v. Auto-Owners Insurance Co.*, the Court referenced these same general principles and explained that the lack of an individualized injury would impact *predominance* and mean that "individual questions necessary to determine breach of contract and bad faith" would include "individual inquiries" that would "predominate over" whether the defendant's processes were reasonable. *718 F.3d 773, 779 (8th Cir. 2013)*. **[**26]** It is, thus, not clear to us whether the Eighth Circuit's standing analysis rests on Article III or *Rule 23*.

The D.C. Circuit has similarly discussed predominance as requiring that plaintiffs "show that they can prove, through common evidence, that *all* class members were in fact injured by [an] alleged conspiracy." *In re Rail Freight Fuel Surcharge Antitrust Litig., 725 F.3d 244, 252, 406 U.S. App. D.C. 371 (D.C. Cir. 2013)* (emphasis added) (reasoning that "common evidence [must] show all class members suffered *some* injury" but not saying that this was required pursuant to Article III). And the Ninth Circuit in *Mazza v. American Honda Motor Co., Inc.* quoted the rule discussed in *Denney*. *666 F.3d 581, 594-95 (9th Cir. 2012)*. But it did so within the context of a predominance challenge and without detailed discussion. *Id.* Further, the *Mazza* court did not expressly overrule the Ninth Circuit's previous declaration that "our law keys on the representative party, not all of the class members." Stearns v. Ticketmaster Corp., 655 F.3d 1013, 1020-21 (9th Cir. 2011) (analyzing a defendant's Article III injury-in-fact argument while evaluating the district court's predominance ruling).

We decline Volvo's invitation to impose a requirement that all class members possess standing. **HN23**[] Class actions are "exception[s] to the rule that litigation is usually conducted by and on behalf of the individual named parties only." Byrd v. Aaron's Inc., 784 F.3d 154, 163 (3d Cir. 2015) (quoting Comcast, 133 S. Ct. at 1432) (internal **[**27]** quotation marks omitted), *as amended* (Apr. 28, 2015). A Rule 23(b)(3) class "is an 'adventuresome innovation' of the 1966 amendments" to Rule 23, Wal-Mart, 131 S. Ct. at 2558 (quoting Amchem, 521 U.S. at 614), that allows named plaintiffs to bring suit when the procedural protections of Rule 23 are satisfied. The goal is to permit a class action that "would achieve economies of time, effort, and expense, and promote uniformity of decision *as to persons similarly situated*, without sacrificing procedural fairness or bringing about other undesirable results." Rule 23(b)(3), 1966 Amendment advisory committee note (emphasis added).

Before even getting to the point of class certification, however, **HN24**[] class representatives need to present a justiciable claim. As we explained in *Holmes v. Pension Plan of Bethlehem Steel Corp.*, "a plaintiff who lacks the personalized, redressable injury required for standing to assert claims on his own behalf would also lack standing to assert similar claims on behalf of a class." 213 F.3d at 135; *see also* Davis v. Fed. Election Comm'n, 554 U.S. 724, 734, 128 S. Ct. 2759, 171 L. Ed. 2d 737 (2008) **[*367]** ("While the proof required to establish standing increases as the suit proceeds, the standing inquiry remains focused on whether *the party invoking jurisdiction* had the requisite stake in the outcome when the suit was filed." (emphasis added) (citing Lujan, 504 U.S. at 561)). Combined with **[**28]** the Supreme Court's guidance on mootness as applied to a class, we know that at all times during the course of a class action, there must be a live "case or controversy" for Article III purposes. *See* Sosna, 419 U.S. at 399, 402-03; Franks, 424 U.S. at 755.

Quite simply, requiring Article III standing of absent class members is inconsistent with the nature of an action under Rule 23.[5] When a Rule 23(b)(3) class-action complaint is filed, the unnamed class members are generally unknown. As the Seventh Circuit aptly explained:

> [A] class will often include persons who have not been injured by the defendant's conduct; indeed this is almost inevitable because at the outset of the case many of the members of the class may be unknown, or if they are known still the facts bearing on their claims may be unknown.

Kohen v. Pac. Inv. Mgmt. Co. LLC, 571 F.3d 672, 677 (7th Cir. 2009). Only after discovery (which may be limited by a district court at its discretion to issues related solely to class certification), will the court have before it specific facts bearing on the class and the relevant claims. Indeed, class discovery may itself focus on named representatives such that facts bearing on the Article III requirements for putative, unnamed class members never come to light. And after class certification, at least for a (b)(3) class, **[**29]** the class members cannot be identified until the opt-out period pursuant to Rule 23(c)(2)(B) has expired. In light of this, we do not expect a plaintiff to be "able to identify all class members at class certification." Byrd, 784 F.3d at 163. Yet **HN25**[] class representatives must meet Article III standing requirements the moment a complaint is filed. Lewis v. Casey, 518 U.S. 343, 358, 116 S. Ct. 2174, 135 L. Ed. 2d 606 (1996); Lujan, 504 U.S. at 561.

---

[5] Similar reasoning has been used by our sister circuits that have also concluded that unnamed class members need not establish Article III standing. *See, e.g.,* In re Nexium Antitrust Litig., 777 F.3d 9, 25, 30-31 (1st Cir. 2015) (concluding "that the presence of a de minimis number of uninjured class members is permissible at class certification" and would not defeat commonality or predominance); Stearns, 655 F.3d at 1020-21 ("'In a class action, standing is satisfied if at least one named plaintiff meets the requirements [of Article III]. . . . Thus, we consider only whether at least one named plaintiff satisfies the standing requirements.'" (quoting Bates v. United Parcel Serv., Inc., 511 F.3d 974, 985 (9th Cir. 2007) (en banc))); DG ex rel. Stricklin v. Devaughn, 594 F.3d 1188, 1198 (10th Cir. 2010) ("Rule 23's certification requirements neither require all class members to suffer harm or threat of immediate harm nor Named Plaintiffs to prove class members have suffered such harm."); Mims v. Stewart Title Guar. Co., 590 F.3d 298, 308 (5th Cir. 2009) ("Class certification is not precluded simply because a class may include persons who have not been injured by the defendant's conduct."). **[**30]**

Volvo's proposed requirement is likewise inconsistent with a *Rule 23(b)(2)* action. ***HN26***[] For a *Rule 23(b)(2)* class, "certification is appropriate even if the defendant's action or inaction 'has taken effect or is threatened only as to one or a few members of the class, provided it is based on *grounds* which have general application to the class.'" *Devaughn, 594 F.3d at 1201* (quoting *Fed. R. Civ. P. 23(b)(2)*, 1966 Amendment advisory committee note). Technically speaking, those (b)(2) class members may not have suffered a legal injury and, at best, may only have standing in light of **[*368]** a threatened future injury. *See* *Clapper, 133 S. Ct. at 1148, 1150 n.5*.

Additionally, a properly formulated *Rule 23* class should not raise standing issues. This point goes to the very purpose of the class action device—to save "the resources of both the courts and the parties by permitting an issue potentially affecting every [class member] to be litigated in an economical fashion under *Rule 23*." *Califano v. Yamasaki, 442 U.S. 682, 701, 99 S. Ct. 2545, 61 L. Ed. 2d 176 (1979)*. For those economies to work, it is axiomatic that ***HN27***[] "a class representative must be part of the class and possess the same interest and suffer the same injury as the class members." *Gen. Tel. Co. of Sw. v. Falcon, 457 U.S. 147, 156, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)* (quoting *E. Tex. Motor Freight Sys. Inc. v. Rodriguez, 431 U.S. 395, 403, 97 S. Ct. 1891, 52 L. Ed. 2d 453 (1977)* (internal quotation marks omitted)). These "interests" or "injuries" are tested by the requirements of *Rule 23*. These separate requirements establish the propriety of **[**31]** granting class-wide relief. *See* *Lewis, 518 U.S. at 395* (Souter, Ginsburg, Breyer, JJ., concurring in part, dissenting in part, and concurring in the judgment) ("More specifically, the propriety of awarding classwide relief (in this case, affecting the entire prison system) does not require a demonstration that some or all of the unnamed class could themselves satisfy the standing requirements for named plaintiffs.").

Volvo's arguments related to the differences between claims among the separate statewide classes, which confuse distinct Rule 23 requirements, demonstrate that Volvo may have legitimate Rule 23 challenges.[6] Rather than shoehorn these questions into an Article III analysis, we will continue to employ *Rule 23* to ensure that classes are properly certified. In this case, certification requires the District Court to determine what differing factual and legal circumstances might mean for the class: Can the named plaintiffs adequately represent the class if they owned or leased vehicles that did not suffer water damage pursuant *Fed. R. Civ. P. 23(a)(4)*? Are the claims of the representatives typical of the class pursuant to *Fed. R. Civ. P. 23(a)(3)*? And do any relevant distinctions affect the commonality and predominance analyses pursuant to *Fed. R. Civ. P. 23(a)(2)* and *(b)(3)*? *See* 7AA Charles A. **[**32]** Wright et al., Fed. Prac. & Proc. Civ. § 1785.1 (3d ed. 2014) (***HN28***[] "[T]he question whether [a class representative] may be allowed to present claims on behalf of others who have similar, but not identical, interests depends not on standing, but on an assessment of typicality and adequacy of representation.").

Focusing on certification questions is not only necessary to the rigorous analysis we demand in class certification decisions, it is also buttressed by a close analysis of the "circuit split" on this issue. Many courts are in fact dealing with Article III standing questions *within* the confines of *Rule 23*, which raises serious doubts as to whether they really mean to impose **[**33]** Article III standing as separate and distinct analyses in these cases. *See* *In re Nexium Antitrust Litig., 777 F.3d at 25, 30-31* (discussing uninjured class members in terms of the class definition, ascertainability, commonality, and predominance); *In re* ***[*369]*** *Rail Freight Fuel Surcharge Antitrust Litig., 725 F.3d at 252* (predominance); *Stearns, 655 F.3d at 1020-21* (predominance); *Avritt, 615 F.3d at 1034* (class definition); *Kohen, 571 F.3d at 677* (summarizing cases on class definition); *Denney, 443 F.3d at 264* (class definition).

In sum, ***HN29***[] so long as a named class representative has standing, a class action presents a valid "case or controversy" under Article III.

---

[6] Volvo's standing argument dispatches a profusion of class-action buzzwords including overbreadth, class definition, commonality, ascertainability, as well as citation to the injury-in-fact required to establish Article III standing, the Rules Enabling Act's dictate that federal rules may not "abridge, enlarge or modify any substantive right," *28 U.S.C. § 2072(b)*, and a defendant's "due process right to raise individual challenges and defenses to claims," *Carrera, 727 F.3d at 307*. Volvo Br. 34-41. At oral argument, it became apparent that Volvo was focused on the issue of standing.

B.

Although Volvo's standing argument fails, we will nevertheless remand. Volvo mentions in a footnote that the District Court's certification order "did not specifically identify the claims certified, as required by *Wachtel v. Guardian Life Insurance Co. of America, 453 F.3d 179, 184 (3d Cir. 2006)*." Volvo Br. 4 n.2. We agree that this is a problem requiring remand. The District Court's class certification opinion rejected Plaintiffs' proposal of a nationwide class and the application of New Jersey law to all Plaintiffs' claims. And although the District Court directed that "the law of the state of each subclass should be applied to the subclass's claims," JA 77, the District Court did not identify which claims would be subject to class treatment. Volvo noted this lack of specificity and it assumed that the District Court meant **[**34]** "to certify all claims alleged in the [Second Amended Complaint] when it granted the alternative motion to certify six statewide classes." Volvo Br. 4 n.2. Plaintiffs argue that the District Court was sufficiently specific, citing to the District Court's commonality analysis (which also did not identify specific state-law claims subject to class treatment), the District Court's general reference to disputes of fact that justified denying Volvo's motions for summary judgment, and the class certification order that defined the classes and class representatives.

HN30[] In *Wachtel* we held that "*Rule 23(c)(1)(B)* requires district courts to include in class certification orders a clear and complete summary of those claims, issues, or defenses subject to class treatment." *453 F.3d at 184*. We rejected the practice of issuing "memorandum opinions discussing the allegations in the complaint, the facts of the case, and some combination of the substantive requirements for class certification found in *Rule 23(a)* and *(b)*" that then go on to "treat the parameters of the class itself much more clearly and deliberately than the class claims, issues, or defenses." *Id.* We stated that *Rule 23(c)* "requires more specific and more deliberate treatment of the class **[**35]** issues, claims, and defenses than the practice described above." *Id. at 185*. Thus a class-certification order or an incorporated opinion "must include (1) a readily discernible, clear, and precise statement of the parameters defining the class or classes to be certified, and (2) a readily discernible, clear, and complete list of the claims, issues or defenses to be treated on a class basis." *Id. at 187-88*.

HN31[] Although a motion for class certification presents a discretionary question for a district court, the court "must clearly articulate its reasons, in part, so we can adequately review the certification decision on appeal under *Rule 23(f)*." *Beck v. Maximus, Inc., 457 F.3d 291, 297 (3d Cir. 2006)* (remanding because of difficulty discerning the district court's analysis on typicality and adequacy). For example, in *Marcus v. BMW of North America, LLC*, we rejected the district court's certification order and accompanying opinion because although the opinion did address "Marcus's claims and the issues presented," there was no "'readily discernible, clear, and complete list'" of the claims and issues **[*370]** subject to class treatment. *687 F.3d 583, 592 (3d Cir. 2012)* (quoting *Wachtel, 453 F.3d at 187*). We are not required to comb through the District Court's opinion and layers of briefing in order to "cobble together the various statements **[**36]** . . . and reach a general inference as to some categories of issues that the District Court believes are appropriate for class treatment." *See Wachtel, 453 F.3d at 189*.

Here Plaintiffs' proposed classes and claims in the Second Amended Complaint were different from those in the motion for class certification. Plaintiffs also conceded at oral argument that they intended for the Class Vehicles to include only those which actually have a sunroof. This lack of clarity, combined with the District Court's failure to address in detail or list the precise claims subject to class treatment, means that we would be required to engage in some level of guesswork were we to try to piece together the class claims. We will not attempt to do so. We will vacate and remand to the District Court so that it can provide a complete list of the class claims, defenses and issues for each of the six statewide classes in accordance with what *Wachtel* requires.

C.

Volvo disputes whether Plaintiffs satisfied *Rule 23(b)(3)*'s predominance requirement. Volvo argues that the District Court erred by certifying six statewide classes without analyzing those classes' claims and whether those claims were subject to common proof. Although precise analysis of the **[**37]** predominance question is "best conducted with the benefit of a clear initial definition of the claims, issues, and defenses to be treated on a class basis," *see* Wachtel, 453 F.3d at 181 n.1, the District Court erred in making a fundamental assumption about predominance. That assumption was that our decision in *Sullivan v. DB Investments, Inc.* (*Sullivan II*) governed the outcome of this case.

HN32[] "[T]he party proposing class-action certification bears the burden of affirmatively demonstrating by a preponderance of the evidence her compliance with the requirements of Rule 23." Byrd, 784 F.3d at 163. A district court must rigorously analyze the evidence used to establish class certification in order to ensure compliance with Rule 23(a) and at least one of the subsections of Rule 23(b). Comcast, 133 S. Ct. at 1432. This rigorous analysis may require a district court to address, at least in part, the merits of a plaintiff's underlying claim because "class determination generally involves considerations that are enmeshed in the factual and legal issues comprising the plaintiff's cause of action." *Id.* (quoting Wal-Mart, 131 S. Ct. at 2552) (internal quotation marks omitted).

HN33[] Before certifying a Rule 23(b)(3) class, a district court must evaluate whether, *inter alia*, "questions of law or fact common to class members predominate over any questions **[**38]** affecting only individual members." Fed. R. Civ. P. 23(b)(3). This predominance test asks whether common issues of law or fact in the case predominate over non-common, individualized issues of law or fact. *See* Marcus, 687 F.3d at 604. Predominance "begins, of course, with the elements of the underlying cause of action." Erica P. John Fund, Inc. v. Halliburton Co., 563 U.S. 804, 131 S. Ct. 2179, 2184, 180 L. Ed. 2d 24 (2011); *see also* Wal-Mart, 131 S. Ct. at 2552 (analyzing commonality in light of the elements of the plaintiff's Title VII discrimination claims); Marcus, 687 F.3d at 600 ("To assess predominance, a court at the certification stage must examine each element of a legal claim 'through the prism' of Rule 23(b)(3)." (quoting In re DVI, Inc. Sec. Litig., 639 F.3d 623, 630 (3d Cir. 2011))); **[*371]** Malack v. BDO Seidman, LLP, 617 F.3d 743, 746 (3d Cir. 2010) (explaining that each element of a legal claim is relevant to assessing predominance). That is "[b]ecause the nature of the evidence that will suffice to resolve a question determines whether the question is common or individual" and that means that "a district court must formulate some prediction as to how specific issues will play out." In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 311 (3d Cir. 2008) (quoting Blades v. Monsanto Co., 400 F.3d 562, 566 (8th Cir. 2005) and In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d 6, 20 (1st Cir. 2008)) (internal quotation marks omitted), *as amended* (Jan. 16, 2009); *see also* Amgen Inc. v. Conn. Ret. Plans and Trust Funds, 133 S. Ct. 1184, 1191-92, 185 L. Ed. 2d 308 (2013) (beginning the Rule 23 analysis with the elements of a private securities-fraud action under § 10(b) of the Securities Exchange Act of 1934).

HN34[] "[T]he presence of individual questions does not *per se* rule out a finding of predominance." In re Prudential, 148 F.3d at 315. If issues common to the class **[**39]** overwhelm individual issues, predominance should be satisfied. Amgen, 133 S. Ct. at 1196 (explaining that predominance involves a qualitative assessment of common versus individualized questions); Butler v. Sears, Roebuck and Co., 727 F.3d 796, 801 (7th Cir. 2013) (explaining that predominance is not determined "simply by counting noses: that is, determining whether there are more common issues or more individual issues"). Further, predominance does not require that common "questions will be answered, on the merits, in favor of the class." Amgen, 133 S. Ct. at 1191. "What the rule does require is that common questions '*predominate* over any questions affecting only individual [class] members.'" Id. at 1196 (alteration in original) (quoting Fed. R. Civ. P. 23(b)(3)).

The District Court's predominance analysis relied on *Sullivan II* for the proposition that "for consumer fraud claims, the predominance inquiry focuses on whether the defendant's conduct was common to all class members, which predominates over minor individual differences between plaintiffs." JA 83 (citing Sullivan II, 667 F.3d at 297-98). Because "[a]ll of the claims asserted by Plaintiffs in the [Second Amended Complaint] are based upon defectively designed sound traps contained in the sunroof drainage systems in Class Vehicles designed and/or manufactured by Defendants, and Defendant[s'] uniform omissions **[**40]** about the same," the District Court concluded that predominance was satisfied. *Id.* In doing so, the District Court made no distinction between the six statewide classes or the relevant claims brought by those putative classes.[7]

[*372] Volvo argues that the District Court's reliance on *Sullivan II* was in error because that decision involved a settlement class. One cannot read *Sullivan II* as a wholesale departure from precedent that requires a district court to evaluate predominance in light of the claims asserted and relevant evidence. *See* Rodriguez v. Nat'l City Bank, 726 F.3d 372, 379 (3d Cir. 2013) (*Sullivan II* did not "lessen[] the burden required to demonstrate that putative class members share a common question of law or fact."). Indeed, *Sullivan II* cited to *In re Hydrogen Peroxide Antitrust Litigation* for the proposition that "an examination of the elements of plaintiffs' claim is *sometimes necessary* . . . to determine whether the requirements of Rule 23—namely, that the elements of the claim can be proved 'through evidence common to the class rather than individual to its members'—are met." 667 F.3d at 306 (emphasis added) (quoting Hydrogen Peroxide, 552 F.3d at 311-12). *Sullivan II* thus applied the *Hydrogen Peroxide* test to fit the circumstances of that particular case. Id. at 302-04. In *Sullivan II*, looking at the class claims was "particularly unwarranted in the settlement **[**42]** context since a district court need not 'envision the form that a trial' would take, nor consider 'the available evidence and the method or methods by which plaintiffs propose to use the evidence to prove' the disputed element at trial." *Id.* (quoting Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 167 (3d Cir. 2001) and Hydrogen Peroxide, 552 F.3d at 312). Sullivan II is not sufficiently analogous to the case at bar, nor did it obviate the need to evaluate the claims and evidence asserted in order to evaluate predominance for a litigation class.[8] *See* Halliburton, 131 S. Ct. at 2184; Hydrogen Peroxide, 552 F.3d at 311. The District Court erred, therefore, by failing to analyze predominance in the context of Plaintiffs' actual claims.

Plaintiffs make several arguments in support of the District Court's opinion, none of which are persuasive. Plaintiffs first argue that the District **[**43]** Court considered over 1,000 pages of briefing on the motions for summary judgment, and that therefore, the District Court must have considered the individual elements of the various state-law claims. Yet relying on such briefing alone hardly amounts to the "rigorous consideration of all the evidence and arguments offered by the parties" required by Rule 23. *See* Hydrogen Peroxide, 552 F.3d at 321. Quite simply, what Plaintiffs ask us to do is speculate as to what the District Court must have intended. We cannot just assume the District Court conducted the appropriate analysis under Rule 23. "Rigorous analysis" requires more of the District Court than that, and we would be abdicating our role as a reviewing court were we to engage in the speculation Plaintiffs ask for.

Plaintiffs also argue that Volvo's specific examples related to the statewide classes do not defeat predominance. Like the common law claims raised by the plaintiffs in Marcus, 687 F.3d at 600-05, Plaintiffs assert class claims based on breach of express warranty (Count 2), breach of the implied warranty of merchantability (Count 3), and breach of the duty of good **[*373]** faith and fair dealing (Count 5). In addition, Plaintiffs assert claims based on the

---

[7] The District Court also said the predominance requirement was "readily met" "as discussed *supra.*" JA 83. The only relevant previous discussion was the District Court's evaluation of commonality. The District Court stated that the common questions included whether: (1) "the sunroof drainage systems in the Class Vehicles are defective"; (2) "Defendants knew of the defect but failed to disclose it to the Class"; and (3) "the maintenance instructions were inadequate and/or uniformly deficient." JA 78. Rejecting Volvo's commonality challenge, the District Court stated that the "issue is whether the design of the sunroof drainage system was defective, not whether the existence of the alleged defect resulted in a clogged drain tube causing water to spill into the vehicle." JA 79.

The District Court's commonality analysis was of limited import for the question of predominance. We have previously noted that the Rule 23(b)(3) predominance requirement incorporates the Rule 23(a)(2) commonality requirement. **[**41]** In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 528 (3d Cir. 2004). The inverse of this proposition, that the commonality requirement satisfies predominance, is not true because the "predominance criterion is far more demanding." Amchem, 521 U.S. at 624.

[8] Volvo also argues that even if *Sullivan II* applies to Plaintiffs' consumer fraud claims, the District Court ignored the predominance inquiry for the common law fraud, breach of implied warranty, breach of express warranty, and breach of the implied covenant of good faith and fair dealing claims. For the reasons explained above, *Sullivan II* does not obviate the need for Plaintiffs to establish by a preponderance of the evidence that the predominance requirement is satisfied.

New Jersey Consumer Fraud Act ("NJCFA"), as was **[**44]** the case in *Marcus, 687 F.3d at 605-11*, as well as state-specific consumer fraud claims under Massachusetts, New Jersey, Florida, California, and Hawaii law.

Volvo points to, as examples of why the District Court erred in not evaluating the elements of each asserted claim, the following potential predominance problems: (1) individualized proof is needed to establish a causal relationship between the unlawful conduct and ascertainable loss as required under New Jersey and Massachusetts law; (2) the California claims require a plaintiff to establish a duty to disclose an alleged defect, proof of which would vary based on whether a vehicle contained a yaw sensor and whether such disclosure would be material; (3) the implied warranty claims cannot satisfy predominance for reasons similar to those we addressed in *Marcus* relating to causation; (4) claims for a violation of an express warranty require that the warranty be in place when a plaintiff experienced a water leak, which is only established by individualized proof; and (5) uniform evidence cannot be used to establish predominance as to both new and used owners of Class Vehicles because the applicable warranties between the groups may vary.

Evaluating these arguments **[**45]** in the detail that is required goes beyond what was briefed before the District Court, beyond the District Court's reasoning in its certification opinion, and beyond the briefing the panel has received from the parties. We will not engage in an analysis of predominance in the first instance, and will therefore remand these questions to the District Court. Consistent with *Marcus, 687 F.3d at 600-11*, the District Court should evaluate the relevant claims (grouping them where logical and appropriate) and rule on the predominance question in light of the claims asserted and the available evidence.[9]

D.

Volvo's final argument is that the District Court erred in denying the motion to **[*374]** reconsider the class certification decision in light of *Comcast*. Because *Comcast* was distinguishable and the "damages issue [in this case was] much more straightforward," JA 91, the District Court declined to revisit its ruling, *see id.* at 90-92.

Comcast is inapposite to the case before us.***HN35***[] *Comcast* held that an antitrust litigation class could not be certified because the plaintiffs' damages model did not demonstrate the theory of antitrust impact that the district court accepted for class-action treatment. *133 S. Ct. at 1433*. Because the antitrust claim was so limited, the Supreme Court explained:

> It follows that a model purporting to serve as evidence of damages in this class action must measure only those damages attributable to that theory. If the model does not even attempt to do that, it cannot possibly establish that damages are susceptible of measurement across the entire class for purposes of *Rule 23(b)(3)*.

---

[9] In *Marcus*, a New Jersey class asserted four claims against BMW and Bridgestone relating to the NJCFA, breach of the implied warranty of merchantability, breach of contract, and breach of the implied covenant of good faith and fair dealing. *687 F.3d at 600*. Like the trial court, we analyzed Marcus's common law claims together and noted the shared elements between the claims. *Id. at 600* & n.8. Despite concluding that Marcus supplied sufficient evidence to establish predominance as to a defect in the Bridgestone run-flat tires, we concluded that the individualized evidence required to prove proximate causation meant that the common law claims **[**46]** could not be tried on a class-wide basis. *Id. at 605*. We explained that Marcus's damages allegations "beg the question of what caused class members' tires to go flat and need replacement." *Id. at 604*.

As to Marcus's claim under the NJCFA, we noted that the statute required a plaintiff to establish ascertainable loss. *Id. at 605-06*. We explained that "ascertainable loss" based on "the cost of replacing [a] tire" could not meet the predominance requirement and went on to analyze loss based on "the value of the product [a class member] expected to purchase minus the value of the product they actually purchased." *Id. at 606*. We explained that under that theory of "ascertainable loss," a court could not apply a "presumption of causation" without considering both "the defendants' course of conduct . . . [and] also that of the plaintiffs." *Id. at 606-10*. Specifically, we held that the district court needed to have found "(1) that the alleged defects were not knowable to a significant number of potential class members before they purchased or leased their BMWs, or (2) that, even if the defects were knowable, that class members were nonetheless relatively uniform in their decisionmaking." *Id. at 611*. We directed the district court to conduct **[**47]** this analysis in the first instance. *Id.*

> Calculations need not be exact, *see* Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 563, 51 S. Ct. 248, 75 L. Ed. 544 (1931), but at the class-certification stage (as at trial), any model supporting a "plaintiff's damages case must be consistent with its liability case, particularly **[**48]** with respect to the alleged anticompetitive effect of the violation." ABA Section of ***Antitrust Law***, Proving Antitrust Damages: Legal and Economic Issues 57, 62 (2d ed. 2010); *see, e.g.,* Image Tech. Servs. v. Eastman Kodak Co., 125 F.3d 1195, 1224 [9th Cir. 1997]. And for purposes of Rule 23, courts must conduct a "'rigorous analysis'" to determine whether that is so. *Wal-Mart*, [131 S. Ct. at 2551-52].

Id. Comcast went on to analyze the evidence of damages resulting from antitrust impact, and noted that the expert testimony "assumed the validity of all four theories of antitrust impact initially advanced by [the plaintiffs]." Id. at 1434. Because the evidence could not translate the relevant "'*legal theory of the harmful event* into an analysis of the economic impact *of that event,"*' the Court determined that common questions could not predominate over individual ones. Id. at 1435 (quoting Federal Judicial Center, *Reference Manual on Scientific Evidence* 432 (3d ed. 2011)).

Volvo relies on *Comcast* for the proposition that Plaintiffs must show that "'damages are susceptible of measurement across the entire class for purposes of Rule 23(b)(3).'" Volvo Br. 44 (quoting Comcast, 133 S. Ct. at 1433). In so doing, Volvo selectively quotes from *Comcast* as though the Court were creating a broad-based rule applicable to Rule 23(b)(3). Yet the Supreme Court specifically **[**49]** noted that it was not breaking any new ground by stating at the beginning of its opinion: "This case thus turns on the straightforward application of class-certification principles." Comcast, 133 S. Ct. at 1433. A close reading of the text above makes it clear that the predominance analysis was specific to the antitrust claim at issue. That is eminently sensible. ***HN36***[] Every question of class certification will depend on the nature of the claims and evidence presented by the plaintiffs. What we know for sure is that whatever "*Comcast*'s ramifications for antitrust damages models or proving antitrust impact," a trial court must "'consider carefully all relevant evidence and make a definitive determination that the requirements of Rule 23 have been met before certifying a class.'" In re Blood Reagents Antitrust Litig., 783 F.3d 183, 186-87 (3d Cir. 2015) (quoting Hydrogen Peroxide, 552 F.3d at 320).

Our reading of *Comcast* is consistent with decisions by several of our sister courts.[10] That is because ***HN37***[] "[r]ecognition **[*375]** that individual damages calculations do not preclude class certification under Rule 23(b)(3) is

---

[10] *See, e.g.,* Roach v. T.L. Cannon Corp., 778 F.3d 401, 402 (2d Cir. 2015) ("We hold that *Comcast* does not mandate that certification pursuant to Rule 23(b)(3) requires a finding that damages are capable of measurement on a classwide basis."); In re Nexium Antitrust Litig., 777 F.3d at 23 ("*Comcast* did not require that plaintiffs show that all members of the putative class had suffered injury at the class certification stage—simply that at class certification, the damages calculation must reflect the liability theory."); In re Whirlpool Corp. Front-Loading Washer Prods. Liab. Litig., 722 F.3d 838, 860 (6th Cir. 2013) (explaining that *Comcast* did not impact the ability of a trial court to certify a liability class and then later consider class damages under Fed. R. Civ. P. 23(c)(4)), *cert. denied sub nom.* **Whirlpool Corp. v. Glazer, 134 S. Ct. 1277, 188 L. Ed. 2d 298 (2014)**; Butler, 727 F.3d at 800-01 (emphasizing that *Comcast* focused on "the requirement of predominance and on its having to be satisfied by proof presented at the class certification stage rather than deferred to later stages of the litigation" (citing Comcast, 133 S. Ct. at 1432-33)); Wallace B. Roderick Revocable Living Trust v. XTO Energy, Inc., 725 F.3d 1213, 1220 (10th Cir. 2013) (vacating and remanding a district court's certification decision to more fully consider the predominance requirement, but noting that **[**51]** even after *Comcast* "there are ways to preserve the class action model in the face of individualized damages"); Leyva v. Medline Indus. Inc., 716 F.3d 510, 514 (9th Cir. 2013) (interpreting *Comcast* as requiring that "the plaintiffs must be able to show that their damages stemmed from the defendant's actions that created the legal liability" and that rule is satisfied where "damages will be calculated based on the wages each employee lost due to Medline's unlawful practices").

The D.C. Circuit has interpreted *Comcast* as requiring proof of class-wide damages in the context of an antitrust class, explaining: "It is now indisputably the role of the district court to scrutinize the evidence before granting certification, even when doing so 'requires inquiry into the merits of the claim.'" In re Rail Freight Fuel Surcharge Antitrust Litig., 725 F.3d at 253 (quoting Comcast, 133 S. Ct. at 1433). The Court went on to summarize that the specific proffered expert models were essential to the plaintiffs' evidence of class-wide injury, concluding "[n]o damages model, no predominance, no class certification." *Id.* One could read this analysis out of context as saying that all classes require a damages model; however, like *Comcast*, the analysis as to class-wide damages was specific to that antitrust claim.

well nigh universal." *Comcast, 133 S. Ct. at 1437* (Ginsburg, J. & Breyer, J., dissenting) (citing 2 William B. Rubenstein, *Newberg on Class Actions* § 4:54 (5th ed. 2012)). Had the District Court ruled as Volvo requested, denying certification on that basis alone would have amounted to **[**50]** an abuse of discretion. *See Roach, 778 F.3d at 409*. In sum, and as explained by the Fifth Circuit, it is "a misreading of *Comcast"* to interpret it as "preclud[ing] certification under *Rule 23(b)(3)* in any case where the class members' damages are not susceptible to a formula for classwide measurement." *In re Deepwater Horizon, 739 F.3d at 815 & n.104*.

IV.

The difficult questions raised in this appeal are **[**52]** resolved by a return to the basics of *Rule 23*. We will vacate and remand the District Court's class certification decision to allow the District Court to define the class membership, claims, and defenses, and so that it may rigorously analyze predominance in the first instance.

VFM Leonardo Inc. v. Ice Portal, Inc.

United States District Court for the Southern District of Florida, Miami Division

July 23, 2015, Decided; July 23, 2015, Entered on Docket

CASE NO.: 14-24709-CIV-ALTONAGA

Reporter

2015 U.S. Dist. LEXIS 192993 *; 2015 WL 11216727

VFM LEONARDO INC., Petitioner, v. ICE PORTAL, INC., Respondent.

Prior History: Ice Portal, Inc. v. VFM Leonardo, Inc., 2009 U.S. Dist. LEXIS 136128 (S.D. Fla., Apr. 8, 2009)

Core Terms

arbitration, parties, settlement agreement, attorney's fees, email, arbitration agreement, communications, prevailing party, final award, Counterclaim, alteration, fees and costs, entitlement, new agreement, modified, costs, modification, partial, Vacate, fee award, antitrust

Counsel: **[*1]** For Vfm Leonardo Inc., a Canadian corporation, Plaintiff: Eva Merian Spahn, LEAD ATTORNEY, Jacqueline Becerra, David A. Coulson, Greenberg Traurig, Miami, FL USA.

For Ice Portal, Inc., a Florida corporation, Defendant: Greg Shinall, LEAD ATTORNEY, PRO HAC VICE, Sperling & Slater, Chicago, IL USA; Michael G. Dickler, LEAD ATTORNEY, PRO HAC VICE, Sperling & Slater, PC, Chicago, IL USA; Patrick James O'Connor, Harper Meyer Perez Hagen O'Connor Albert & Dribin LLP, Miami, FL USA.

Judges: CECILIA M. ALTONAGA, UNITED STATES DISTRICT JUDGE.

Opinion by: CECILIA M. ALTONAGA

Opinion

ORDER

THIS CAUSE came before the Court upon Respondent, Ice Portal, Inc.'s ("ICE['s]") Motion to Vacate or Correct Arbitral Award of Attorneys' Fees and Costs ("Motion") [ECF No. 40], filed June 2, 2015. The relief ICE seeks is evident from the title of the Motion, although to be precise, ICE does not challenge the amount or reasonableness of the fee award[1] but rather the Award's finding regarding entitlement. Petitioner, VFM Leonardo Inc. ("VFML"), filed its Response in Opposition . . . ("Response") [ECF No. 42] on June 5, 2015; and ICE filed its Reply . . . [ECF No. 46] on June 19, 2015. The parties have also supplied voluminous exhibits, many of **[*2]** them duplicative, appearing at docket entry numbers 41, 42, and 43.

The essence of the present dispute concerns ICE's assertion VFML and ICE entered into a new agreement, following an earlier settlement agreement between the parties which entitled the prevailing party in any three-arbitrator panel arbitration to recover attorneys' fees. Under this new agreement, ICE maintains, VFML gave up the

---

[1] The fee award totals $673,282.83.

right to recover fees in exchange for arbitrating its "non-settlement-agreement" claims in Miami and before retired state circuit judge Herbert Stettin ("Judge Stettin"). VFML denies any new agreement was entered into or that the settlement agreement only provided for fees where arbitration was conducted before a three-arbitrator Chicago panel. Rather, VFML asserts the parties merely modified the settlement agreement through email communications as to location and identity of the single arbitrator in order to lessen expenses. Because the Court agrees with VFML that ICE does not satisfy its high burden in seeking vacatur of Judge Stettin's fee award, and because Judge Stettin's conclusion the parties did not reach a new agreement whereby VFML relinquished its rights to prevailing-party attorney's **[*3]** fees is amply supported by the record, the Motion is denied.

I. BACKGROUND

Petitioner VFML filed this action on December 12, 2014, seeking confirmation and enforcement of a partial final arbitration award in its favor against ICE and a partial judgment in conformity with the partial final award. (*See* Petition . . . [ECF No. 1]). Interestingly enough, the parties had earlier entered into the referenced settlement agreement in a prior dispute, *Ice Portal, Inc. v. VFM Leonardo Inc.*, Case No. 09-61424-Civ-Altonaga,[2] over which the undersigned presided. (*See id.*; October 2010 Settlement Agreement [ECF No. 1-3]). The settlement followed a mediation conference the parties had before Judge Stettin and Judge Stettin's efforts to facilitate a resolution thereafter. (*See* Settlement Agreement 1).

Paragraph 23 of the Settlement Agreement states:

> 23. **ARBITRATION**. Any controversy or claim (in law or in equity) between ICE and VFM whatsoever, including any future dispute of any kind between ICE and VFM, any allegation that either Party's conduct violates any statute, rule or law, any controversy or claim arising out of or relating to this Agreement or any alleged breach hereof, any issues pertaining **[*4]** to the arbitrability of any controversy or claim, and any claim that this Agreement or any part hereof is invalid, illegal, or otherwise voidable or void, shall be submitted to binding arbitration. The arbitration panel shall have the power and authority to determine whether any particular claim or matter is subject to arbitration. Said arbitration shall be administered by the American Arbitration Association ("AAA") in accordance with the AAA Commercial Arbitration Rules (except as set forth in this Agreement). Judgment upon any award rendered may be entered in any court having jurisdiction thereof. The Parties agree that for any controversy or claim arising out of or relating to this Agreement or any alleged breach hereof, Judge Herbert Stettin shall be the sole arbitrator and the arbitration shall take place in Miami, Florida. For any other controversy or claim (or in the event Stettin is not available or is unwilling to serve as to the foregoing type of dispute), including, but not limited to, any claim under any antitrust laws or for tortious interference, the parties will select three arbitrators (and have communications with each of the arbitrators) strictly in accordance with **[*5]** the AAA Commercial Arbitration Rules, including R-17 and R-18(a), and all three arbitrators shall be neutrals who must be free from any conflict of interest and with whom there shall be no *ex parte* communication except as allowed by those rules. The arbitration before a three-member arbitration panel shall take place in Chicago, Illinois, unless agreed to in writing otherwise. No arbitrator in the three-member panel shall reside in the state of Florida or have resided there for any substantial part of the last ten (10) years. In the event the controversy or claim involves any allegation of any violation of ***antitrust law***, each arbitrator must have served as counsel, judge, or arbitrator in at least two antitrust cases within the preceding ten (10) years. *In any arbitration pursuant to this paragraph, the prevailing party shall be entitled to an award of its reasonable attorneys' fees, expert fees and costs that it incurred in connection therewith*. Moreover, punitive damages shall not be awarded by the arbitration panel upon a party prevailing on any claim or counterclaim regardless of whether such otherwise would have been available by statute or common law had the case been litigated **[*6]** in a court of law.

---

[2] That case also included a separate suit the Court consolidated, identified under case number 09-60230-Civ-Altonaga, involving the same parties and overlapping facts and disputes between these parties. (*See* Order [ECF No. 16] in 09-61424-Civ-Altonaga).

(*Id.* ¶ 23 (emphases added)).[3] The Agreement further states, "No part or provision of this Agreement may be changed, modified, waived, discharged or terminated except by an instrument in writing signed by the Party against whom enforcement of such change, modification, waiver, discharge or termination is sought." (*Id.* ¶ 25).

Following their settlement, the parties had yet another dispute (their third?) regarding ICE's interference with VFML's business relationships with two of VFML's clients. VFML initiated an arbitration proceeding against ICE before the American Arbitration Association ("AAA") pursuant to paragraph 23 of the Settlement Agreement. Several email communications between counsel for the parties ensued, whereby, upon suggestion by VFML, "ICE Portal agree[d] to Judge Stettin as the sole arbitrator in the dispute recently initiated by VFML before the AAA (including any counterclaims by ICE Portal), with the arbitration to occur in Miami, Florida." (Resp. Ex. C [ECF No. 42-3], Dec. 13, 2013 10:52 AM email (alteration added)). ICE's counsel further wrote, "Please let me know how you suggest we inform the AAA of our agreement." (*Id.*). After some additional communications **[*7]** between counsel for the parties, VFML's attorney confirmed, "[G]iven your representation below, VFML agrees to proceed with Judge Stettin and let's set up a call soon. However, in the event that ICE later attempts to assert by amendment or otherwise antitrust claims against VFML in this arbitration, VFML shall have the right to apply and enforce the arbitration provision in the 2010 Settlement Agreement as stated, including the criteria for and number of arbitrators and venue." (*Id.*, Dec. 18, 2013 5:45 PM email (alteration added)).

Counsel for VFML sent counsel for ICE a copy of his communication to the AAA regarding the parties' selection of Mr. Stettin, which letter to the AAA stated, "We write in reference to the arbitration encaptioned *VFM Leonardo Inc. v. ICE Portal, Inc.*, Case No. 50 117 T 01179 13. The parties hereby notify you that they have agreed to the appointment of Judge Herbert Stettin as the sole arbitrator in this matter." (Resp. Ex. E [ECF No. 42-5]). VFML's earlier, December 9, 2013 Statement of Claim ("Arbitration Claim") [ECF No. 42-2] submitted to the AAA, states it is brought pursuant to paragraph 23 of the 2010 Settlement Agreement. (*See* Arbitration Claim ¶¶ 4-5). **[*8]** In its December 30, 2013 "Answering Statement" [ECF No. 42-6], ICE similarly relies on paragraph 23 to seek its own attorneys' fees should it prevail in the arbitration. (*See* Answering Statement ¶ 12, 6). ICE also filed a Counterclaim against VFML on January 3, 2014. The parties provided Judge Stettin a Joint Pretrial Stipulation [ECF No. 42-7] on June 13, 2014, wherein they agreed the basis of the AAA's jurisdiction was paragraph 23 of the Settlement Agreement. (*See* Joint Pretrial Stip. 9).

Judge Stettin conducted a hearing in June 2014 and on October 22, 2014, and issued a Partial Final Award [ECF No. 42-8] in favor of VFML on its tortious interference claims and on ICE's Counterclaim. On November 12, 2014, VFML submitted a Verified Motion for Fees and Costs [ECF No. 42-9] as the prevailing party to the arbitration. ICE responded with a Verified Response in Opposition [ECF No. 42-10], raising for the first time the novel contention paragraph 23 did not govern the VFML Arbitration Claim on the basis the parties had entered into a new arbitration agreement through their email communications selecting Judge Stettin as arbitrator that did not provide for the recovery of attorneys' fees **[*9]** by the prevailing party. To be clear, ICE was now making the argument VFML was not entitled to fees on its Arbitration Claim, but it was entitled to fees for having defended ICE's Counterclaim which, according to ICE, did arise from paragraph 23. VFML filed a Verified Reply [ECF No. 42-11], and ICE filed a Verified Surreply [ECF No. 42-12] before Judge Stettin.

Judge Stettin conducted a lengthy hearing on VFML's fees and costs' request on January 16, 2015. (*See* Transcript [ECF No. 42-13]). ICE had ample opportunity to present its arguments and its rather extraordinary position regarding the parties' so-called new "agreement." At the hearing, counsel for VFML reminded Judge Stettin that early in the proceedings before him, a status conference was held wherein the parties explained they had an arbitration agreement from the settlement agreement he had mediated, and the parties were simply substituting Judge Stettin (in place of three arbitrators) and holding the arbitration in Miami (as opposed to Chicago), but if ICE

[3] Paragraph 17 of the Settlement Agreement, titled "Prevailing Party," also contains an attorneys' fee provision: "In the event a dispute arises regarding the performance or satisfaction of any of the rights or obligations created by or arising from the terms of this Agreement, and such dispute is arbitrated or litigated to a conclusion, the Party prevailing in such arbitration or litigation shall be entitled to recover from the losing Party its reasonable attorneys' fees, expert fees and costs." (Settlement Agreement ¶ 17 [ECF No. 41-7]).

filed any antitrust counterclaims, it would necessitate a different arbitration in Chicago. (*Id.* 31:7-15). At the fee hearing, Judge Stettin also clearly understood the **[*10]** issue ICE was presenting in its effort to forestall a fee award against it: "The issue, as I see it, is whether or not the agreement between these lawyers was to modify the existing agreement in respect of those two items only. . . . A one-person arbitration in Miami, or was it in fact a brand new agreement which was complete in itself." (*Id.* 37:5-12 (alteration added)). The parties explicitly agreed Judge Stettin could decide the question of entitlement to fees without taking any testimony from the lawyers who had exchanged the email communications. (*See id.* 48:25-49:13; 67:4-12).[4]

Judge Stettin entered a well-reasoned Final Award [ECF No. 42-15] in VFML's favor on March 25, 2015. In addressing the questions of VFML's entitlement to attorneys' fees and ICE's argument a new agreement was reached through counsels' email communications, he wrote:

> My review reflects that those emails concern only an understanding limited to the selection of the undersigned as the sole Arbitrator in this matter and to hold the hearing in Miami, Florida. They neither refer to a new arbitration agreement nor to abandonment of the prevailing party's right to attorneys' fees, expert fees and costs incurred in **[*11]** the arbitration. . . .
> I find that the email exchange simply modified the Settlement Agreement and did not change the right to prevailing party fees and costs.
> There is no credible evidence which suggests that the parties[] intended to make a new arbitration agreement. The changes agreed upon constitute only a modification of Paragraph 23 for the convenience of the parties and to reduce expenses. It was not a new agreement. . . .
> * * *
> I find that the emails between the attorneys for the parties in December, 2013, modifying the Settlement Agreement are a written instrument signed by the parties as required by Paragraph 23 of the same. . . .
>
> And of course the parties treated the modification as part of Paragraph 23. For example, in its Answering Statement, Respondent requested its attorneys' fees and costs <u>in connection with its defense against Claimant's causes of action</u>, separate and apart from Respondent's later-filed counterclaim which sought fees as part of its own claims for affirmative relief.
>
> In the Surreply to the Fee Motion and at the January 16, 2015 hearing, Respondent argued that because its defense against Claimant's causes of action was grounded upon a breach of the Settlement **[*12]** Agreement, hence properly subject to Paragraph 23 (including the prevailing party fee provision), it did not waive its position that a new arbitration agreement had been entered by its request in its Answering Statement for an award of fees and costs. This does not convince me of Respondent's waiver of the defense that a new Arbitration Agreement was in effect.
>
> The parties' filings subsequent to the Answering Statement consistently reflect they proceeded under Paragraph 23. In the Joint Pre-Trial Stipulation, the parties identified Paragraph 23 as the sole basis for my jurisdiction over this matter. Although the parties reserved the right to brief the issue of entitlement to fees in that Stipulation, Respondent's arguments against Claimant's entitlement to fees, based upon a new arbitration agreement, are in direct contradiction to the statement of jurisdiction to which Respondent agreed. In the Joint Pre-Trial Statement, Respondent was on notice that Claimant was proceeding under Paragraph 23 in requesting its fees and costs if it prevailed in this Arbitration. Respondent did not raise an objection to this until its post-trial Opposition to Claimant's fee request. As such, I find Respondent **[*13]** is estopped from claiming otherwise. Claimant's reliance on Respondent's conduct and the prejudice which would result is shown in several ways. If Respondent had timely raised the issue of the existence of a new arbitration agreement without a prevailing party fee provision, Claimant could have sought to withdraw this Arbitration and re-file its claim before a three-member panel in Chicago. Claimant could also have pursued a claim for punitive damages against Respondent; a claim which is waived by Paragraph 23. Claimant could also have argued in this case that its claim under the *Florida Deceptive and Unfair Trade Practices Act* ("FDUPTA") [sic] was not duplicative

[4] Counsel for ICE has since submitted a June 2, 2015 Declaration [ECF No. 41-2] containing his statements.

> of its tortious interference claims since that statute provides an independent basis for the award of prevailing party fees and costs. The October 22, 2014, Partial Final Award denied such relief on the ground the FDUPTA [sic] claim was duplicative of the claim brought under the Settlement Agreement.
>
> Additionally, the claims and defenses before me in this matter were based on the same core set of facts. I find they were inextricably intertwined such that recovery of all fees and costs incurred in the arbitration as a whole **[*14]** is appropriate without the need to parse out which fees and costs were incurred in connection with each individual claim. . . .

(*Id.* 3-6 (some alterations added; underlined text in original)).

As stated, ICE challenges Judge Stettin's fee award regarding entitlement. ICE argues Judge Stettin "committed error by relying on the fees and costs provision contained in the Pre-Dispute Arbitration Agreement, where those provisions were supplanted by the Post-Dispute Arbitration Agreement. . . . [T]he Pre-Dispute Arbitration Agreement required a three-arbitrator panel in Chicago and does not apply to the underlying Arbitration. . . . [T]hat agreement cannot be used to support the Arbitrator's ruling or to supply him with authority to award fees and costs." (Mot. 2 (alterations added)). According to ICE, Judge Stettin "(i) exceeded his powers, making the Final Award subject to vacatur pursuant to *9 U.S.C. § 10(a)(4)*, and (ii) awarded relief upon a matter not properly submitted to him," rendering the Final Award subject to correction under *9 U.S.C. section 11(b)*. (*Id*).

VFML asserts Judge Stettin did not exceed his powers. Indeed, VFML emphasizes ICE's Motion to Vacate is based on the exact arguments regarding the so-called new agreement that ICE **[*15]** presented to and the arbitgrator rejected. (*See* Resp. 8). Furthermore, VFML notes three independent reasons support the arbitrator's conclusion regarding VFML's entitlement to fees: ICE committed waiver as to, and was estopped from arguing against, entitlement based on ICE's conduct throughout the arbitration, including its failure to raise objection to VFML's consistent position its Arbitration Claim was subject to paragraph 23; VFML's claims and defenses were based on the same core set of facts as, and inextricably intertwined with, ICE's multimillion-dollar Counterclaim; and ICE's concession VFML was entitled to fees and costs on its defense against the Counterclaim entitled VFML to the entirety of its fees and costs under Florida law. (*See id.* 9). Last, VFML asserts the very case law ICE relies on in its Motion supports Judge Stettin's ruling. (*See id.* 10).

II. ANALYSIS

Judicial review of arbitral awards is extremely limited. *Funair Corp. v. Raytheon Co., Nos. 04-22327-CIV, 04-22875-CIV, 2005 U.S. Dist. LEXIS 47509, 2005 WL 6718593, at *3 (S.D. Fla. May 19, 2005)* (citation omitted). Courts must "give considerable leeway to the arbitrator, setting aside his or her decision only in certain narrow circumstances." *First Options of Chicago, Inc. v. Kaplan, 514 U.S. 938, 943, 115 S. Ct. 1920, 131 L. Ed. 2d 985 (1995)*. The "exceedingly narrow grounds upon which an award can be **[*16]** vacated, modified, or corrected" are found in *9 U.S.C. sections 10(a)* and *11*. *Southern Communs. Servs. v. Thomas, 720 F.3d 1352, 1357 & 1358 (11th Cir. 2013)* (*Sections 10* and *11* "provide the FAA's exclusive grounds for expedited vacatur and modification." (quoting *Hall St. Assocs., L.L.C. v. Mattel, Inc., 552 U.S. 576, 584, 128 S. Ct. 1396, 170 L. Ed. 2d 254 (2008)*); *see also* *White Springs Agr. Chems., Inc. v. Glawson Invest. Corp., 660 F.3d 1277, 1280 (11th Cir. 2011)* ('[T]hese sections are the exclusive means for upsetting an arbitration award . . ." (alterations added)). To be clear, "a panel's incorrect legal conclusion is not grounds for vacating or modifying the award." *White Springs Agr. Chems., Inc., 660 F.3d at 1280*.

In support of its position, ICE relies on *subsection 10(a)(4)*: "where the arbitrators exceeded their powers, or so imperfectly executed them that a mutual, final, and definite award upon the subject matter submitted was not made." *9 U.S.C. § 10(a)(4)*. ICE also relies on *section 11(b)*: "Where the arbitrators have awarded upon a matter not submitted to them, unless it is a matter not affecting the merits of the decision upon the matter submitted." *9 U.S.C. § 11(b)*.

"'[T]he sole question' a court should ask under the exacting standards of *§ 10(a)(4)* 'is whether the arbitrator (even arguably) interpreted the parties' contract, not whether he got its meaning right or wrong.'" *So. Communs. Servs., Inc., 720 F.3d at 1359* (alteration added; quoting *Oxford Health Plans LLC v. Sutter, 569 U.S. 564, 133 S.Ct. 2064, 2068, 186 L. Ed. 2d 113 (2013))*. Where the arbitrator "'even arguably'" interpreted the contract, "a court must end its inquiry and deny a *§ 10(a)* motion for vacatur." *Id.* (quoting *Sutter, 133 S.Ct. at 2068*); *Stolt-Nielsen S.A. v. AnimalFeeds Int'l Corp., 559 U.S. 662, 671, 130 S. Ct. 1758, 176 L. Ed. 2d 605 (2010)* ("It is only when an arbitrator **[*17]** strays from interpretation and application of the agreement and effectively dispenses his own brand of industrial justice that his decision may be unenforceable" under *subsection 10(a)(4)*. (alterations, internal quotation marks, and citations omitted)); *see also* *DIRECTV, LLC v. Arndt, 546 F. App'x 836, 839-40 (11th Cir. 2013)* ("Because the parties bargained for the arbitrator's construction of their agreement, an arbitral decision even arguably construing or applying the contract must stand, regardless of a court's view of its (de)merits." (internal quotation marks and citation omitted; alteration in original)).

As to *section 11(b)*, the issue of attorneys' fees in particular is considered to have been submitted to arbitration where the arbitrator "'plainly believed'" the issue was submitted for his decision. *White Springs Agr. Chems., Inc., 660 F.3d at 1281* (citing *Executone Info. Sys., Inc. v. Davis, 26 F.3d 1314, 1321-22 (5th Cir. 1994)* (noting arbitrator's plain belief of submission was relevant to determining whether issue had in fact been submitted)). Particularly relevant for purposes of the issues raised in this case is the Eleventh Circuit's discussion in *White Springs Agricultural Chemicals, Inc.*:

> Upon review of the record, we conclude that the issue of attorneys' fees was submitted to arbitration. First, it is evident from the final award that the arbitration panel "plainly **[*18]** believed" the issue was submitted for their decision. . . . More importantly, the panel received briefing and allowed argument on the issue of attorneys' fees that established White Springs's legal position. White Springs was thus able to — and did — contest the submission of that issue to the panel before the final award.

Id. at 1281 (alteration added; internal citation omitted).

It is abundantly clear the parties asked Judge Stettin to determine whether the Settlement Agreement governed the arbitration in full and afforded the prevailing party the right to recover attorneys' fees. The parties asked Judge Stettin, in other words, to resolve the question of VFML's entitlement to fees. More than ICE's disagreement with Judge Stettin's well-supported interpretation of paragraph 23 of the Settlement Agreement and the parties' email communications, which served to amend the Agreement through the written instrument required by paragraph 25, must be shown in order to vacate, modify, or "correct" the award of fees to VFML.

The Court cannot help but be perplexed by what appears to be a contrived, eleventh-hour excuse interposed by ICE before the arbitrator in seeking to avoid the imposition of a fee award **[*19]** against it. While the Court is not permitted to consider whether the arbitrator got it right or got it wrong, but simply to inquire whether he "even arguably" interpreted the parties' agreement, here, Judge Stettin got it abundantly right. The Court would come down in exactly the same way Judge Stettin did if it were asked to interpret the Settlement Agreement and the parties' counsels' subsequent email communications. There is no credible evidence — none — suggesting the parties came to a meeting of the minds whereby VFML gave up its right to seek the recovery of its attorney's fees in exchange for arbitrating the interrelated disputes more quickly and inexpensively before one arbitrator and in Miami than before a three-arbitrator panel outside the state. There is no credible evidence — none — that the parties reached a new and different agreement through the written email communications ICE's counsel now seeks to recast in a totally different light. Those emails were merely a modification of paragraph 23, not a totally new agreement as ICE posits for the first time after it has lost the arbitration.

ICE's actions, up until the entry of the partial final award against it, confirmed **[*20]** the existence of an amended paragraph 23. While ICE's December email communications referenced counsels' "agreement," that understanding pertained to the modification as to the number of arbitrators and location of the arbitration. As further evidence of the parties' meeting of the minds regarding the amendment worked out on December 18, 2013, ICE sought its own attorneys' fees in its December 30, 2013 Answering Statement — independent of the January 3, 2014 Counterclaim it would much later take the position was the only aspect of the parties' arbitration covered by paragraph 23. ICE continued to be possessed of the same understanding shared by VFML when, on June 13, 2014, it stipulated with VFML in the Joint Pretrial Stipulation the basis of the AAA's jurisdiction was paragraph 23 of the Settlement Agreement.

Paragraph 23 is the only arbitration agreement between the parties, and the parties early agreed it was the only source of Judge Stettin's power to adjudicate their claims, including the recovery of attorneys' fees claimed by each. Furthermore, as noted by VFML, the AAA Commercial Arbitration Rules applied to the proceedings before Judge Stettin, including the rule he has the **[*21]** power to rule on his jurisdiction, "including any objections with respect to the existence, scope, or validity of the arbitration agreement[.]" AAA COMM. ARB. RULE 7(a). The arbitrator did not exceed his powers or so imperfectly execute them such that a final award was not made. *See* *9 U.S.C. § 10(a)(4)*. Similarly, the arbitrator did not enter an award on a matter not submitted to him. *See id.* *§ 11(b)*.

For the foregoing reasons, it is

ORDERED AND ADJUDGED that the Motion to Vacate or Correct Arbitral Award of Attorneys' Fees and Costs **[ECF No. 40]** is **DENIED**.

DONE AND ORDERED in Chambers at Miami, Florida this 23rd day of July, 2015.

Opinion

THIS DOCUMENT RELATES TO ALL INDIRECT-PURCHASER PLAINTIFF CASES

ORDER AND REASONS

Indirect-Purchaser Plaintiffs (IPPs), together with Hayward Industries, Inc. (Hayward) and Zodiac Pool Systems, Inc. (Zodiac), move the Court to grant final approval of a class action settlement between IPPs and Hayward and a class action settlement between IPPs and Zodiac.[1] In addition, Class Counsel for IPPs move the Court to approve the deduction of common benefit litigation expenses and class administration expenses from the fund, and to approve their request for attorneys' fees.[2] The Court has considered all of the evidence submitted at the fairness hearing held on May 14, 2015, as well as the parties' legal memoranda and supplemental submissions. For the reasons stated more fully below, the Court finds the settlement of this class action to be fair, reasonable, and adequate, and the Court awards attorneys' fees and expenses as provided in this order.

I. Background

A. Factual Background

This is an antitrust case that direct-purchaser plaintiffs (DPPs) and indirect-purchaser plaintiffs (IPPs) filed **[*4]** against Pool and Manufacturer Defendants. Pool is the country's largest distributor of products used for the construction and maintenance of swimming pools (Pool Products).[3] Manufacturer Defendants are the three largest manufacturers of Pool Products in the United States: Hayward, Zodiac, and Pentair Water Pool and Spa, Inc. (Pentair).[4] As defined in IPPs' Third Amended Class Action Complaint (Complaint), Pool Products are the equipment, products, parts or materials, and chemicals used for the construction, renovation, maintenance, repair, and service of residential and commercial swimming pools. Pool Products include pumps, filters, covers, drains, fittings, rails, diving boards, and chemicals, among other goods. Pool buys Pool Products from manufacturers, including the three Manufacturer Defendants, and in turn sells them to DPPs, which include pool builders, pool retail stores, and pool service and repair companies (collectively referred to as "Dealers" in the Complaint).[5] IPPs are pool owners who indirectly purchased Pool Products manufactured by the Manufacturer Defendants and distributed

[2] R. Doc. 623.

[3] R. Doc. 290, ¶ 44.

[4] *Id.* ¶ 22.

[5] *Id.* ¶ 31.

by Pool. The IPPs named in the Complaint and their states of citizenship are: Jean Bove (CA), **[*5]** Kevin Kistler (AZ), Peter Mougey (FL), and Ryan Williams (MO).

IPPs allege violations of state laws on behalf of classes of individuals and entities who purchased Pool Products not for resale in California, Arizona, Florida, and Missouri. IPPs allege Pool conspired with each of the Manufacturer Defendants to restrict the supply of Pool Products to Pool's rival distributors. They allege that defendants' conduct resulted in higher prices, reduced output, and reduced customer choice for Pool Products sold indirectly to IPPs. They allege that the conduct of Pool and the Manufacturing Defendants violated various antitrust and consumer protection laws of California, Arizona, Florida, and Missouri. IPPs further allege that any price increases Pool charged were passed on by Pool Dealers to indirect consumers who own residential or commercial swimming pools, such as IPPs. IPPs claim to have suffered damages from defendants' conduct in the form of passed-on overcharges they paid for Pool Products as a result of defendants' conduct and claim that the overcharges are "identifiable and traceable" through the manufacturer, distributor, dealer (retailer), or service **[*6]** company to the ultimate consumer, such as IPPs in Arizona, California, Florida, and Missouri.

B. Procedural History

On November 21, 2011, the Federal Trade Commission (FTC) announced that it conducted an investigation into unfair methods of competition by Pool and entered a consent decree with Pool resolving the matter. Shortly after the FTC's announcement, several direct purchaser plaintiffs filed suit in this district and several others. On April 17, 2012, the Judicial Panel on Multidistrict Litigation consolidated the suits for pretrial purposes in this Court.[6] On May 17, 2012, IPPs filed their initial consolidated class action complaint in the multidistrict litigation in this Court.

On September 5, 2012, IPPs filed their Second Amended Class Action Complaint.[7] That Complaint alleged that Pool's and the Manufacturer Defendants' conduct violated various antitrust and deceptive trade practices laws of California, Arizona, Florida, and Missouri. Specifically, IPPs alleged violations of California's ***antitrust law***, the Cartwright Act, *Cal. Bus. & Prof. Code § 16720, et seq.*; the Unfair Competition Law, *Cal. Bus. & Prof. Code §§ 17200, et seq.*; the state antitrust provisions of *Ariz. Rev. Stat. §§ 44-1401, et seq.*; the consumer protection provisions of the Florida Deceptive **[*7]** and Unfair Trade Practices Act, *Fl. Stat. §§ 501.201, et seq.*, including *§ 501.204*; and the consumer protection provisions of the Missouri Merchandising Practices Act, *Mo. Rev. Stat. §§ 407.010, et seq.*[8] IPPs based their claims on allegations of the same underlying conduct that DPPs alleged in their Sherman Act claims. Specifically, IPPs alleged that Pool pursued a deliberate strategy to restrain trade and monopolize the Pool Product Distribution Market through acquiring competitors and foreclosing actual and potential competition by conditioning access to its distribution network on manufacturers' promises not to supply Pool's rivals. IPPs also alleged that the Manufacturer Defendants agreed with Pool to eliminate existing distribution competitors and prevent new entrants from obtaining the products necessary to compete. IPPs alleged that they were injured because defendants' conduct caused them to pay higher prices for Pool Products than they would have otherwise paid absent defendants' illegal practices. Finally, IPPs alleged that defendants fraudulently concealed their illegal conduct until November 2011 when the Federal Trade Commission investigation and related consent decree made public the nature of Pool's anticompetitive conduct.

On May 24, 2013, the Court dismissed IPPs' claims under the California Unfair Competition Law, Florida Deceptive and Unfair Trade Practices Act, and Missouri Merchandising Practices Act that were based on the theory that defendants engaged in fraud or misrepresentation. The Court dismissed IPPs' illegal group boycott claim under the

---

[6] R. Doc. 1.

[7] **[*8]** R. Doc. 149.

[8] *Id.* at 2.

Cartwright Act because IPPs failed to allege a horizontal agreement.[9] The Court also dismissed IPPs' claim that defendants fraudulently concealed their illegal conduct.[10]

The Court allowed IPPs to go forward with their California Unfair Competition Law and rule of reason Cartwright Act claims involving three vertical conspiracies (one between Pool and each Manufacturer Defendant), to the extent that the claims were predicated on a national market.[11] The Court also allowed IPPs to go forward with their Arizona Antitrust Act claims of three vertical conspiracies, to the extent that the claims were predicated on a national market, and their Arizona Antitrust Act claim of attempted monopolization against Pool.[12] The Court also found that IPPs stated a claim under the Florida Deceptive and Unfair Trade Practices Act based on their allegations **[*9]** of attempted monopolization (by Pool) and three vertical conspiracies (one between Pool and each Manufacturer Defendant), to the extent that the claims were predicated on a national market.[13] In addition, the Court found that IPPs stated a claim under the Missouri Merchandising Practices Act (MMPA) based on their allegations of defendants' alleged anticompetitive agreements to exclude Pool's rivals and Pool's alleged attempted monopolization, to the extent that the claims were predicated on a national market.[14] IPPs then filed their Third Amended Class Action Complaint, which omitted the claims the Court dismissed.

C. Settlement Agreement Background

1. Hayward Settlement Negotiations

Negotiations leading to the Hayward settlement agreement took place over the course of a year. Class Counsel for IPPs and counsel for Hayward mediated this action before the Honorable Layn Phillips, a former federal district judge and a respected mediator of antitrust disputes. Settlement negotiations included two full-day, in-person mediation sessions. The first took place July 22, 2013, and the second occurred nine months later on March 20, 2014. After these sessions, counsel continued to engage in settlement **[*10]** discussions in teleconference calls facilitated by Judge Phillips. The parties came to an agreement on March 31, 2014, and finalized the terms and signed the agreement on May 16, 2014.

2. Zodiac Settlement Negotiations

Negotiations leading to the Zodiac settlement agreement also took place over the course of a year. Class Counsel for IPPs and counsel for Zodiac mediated this action before Judge Phillips. Settlement negotiations for the Zodiac settlement included three full-day, in-person mediation sessions. These sessions occurred on July 22, 2013; March 20, 2014; and October 1, 2014. After these sessions, counsel continued with extensive telephone settlement discussions, including discussions mediated by Judge Phillips. The parties finalized and executed the agreement on November 4, 2014.

After the parties finalized both settlements, IPPs suggested combining the Hayward settlement with the Zodiac settlement for purposes of administration and providing notice to the class.

[14] *Id.* at 35.

3. Preliminary Fairness Determination

The Court held a preliminary fairness and settlement class certification hearing on August 14, 2014. On August 22, 2014, the Court appointed Richard C. Stanley as Special Master, **[*11]** in accordance with *Rule 53 of the Federal Rules of Civil Procedure*, to assist in implementing any subsequent settlements.[15] The Court preliminarily approved the IPP-Hayward settlement and the IPP-Zodiac settlement on December 31, 2014.[16] The terms of the two settlement agreements, with the exception of the settlement amounts, are substantively the same. In addition, the Court certified identical settlement classes for both settlements.[17]

Consistent with the agreements, the Court appointed plaintiffs Kevin Kistler, Jean Bove, Peter Mougey, and Ryan Williams (collectively "Named Plaintiffs") as Class Representatives of the Settlement Class. The Court appointed Thomas J.H. Brill (Law Office of Thomas H. Brill) as Lead Counsel for the Class, and Gainsburgh, Benjamin, David, Meunier & Warshauer, L.L.C.; Edgar Law Firm LLC, Sharp McQueen PA; and Brady & Associates as Co-Counsel for the Settlement Class, finding that the appointments satisfied the prerequisites of *Rule 23(g)*.[18] The Court also approved Angeion Group as the Claims Administrator for the settlement and First NBC Bank as escrow agent.[19] The Court further approved the proposed notice and claim forms, as well as deadlines for submitting claims forms, opting out, **[*12]** and filing objections.

The Court held a fairness hearing on May 14, 2015, to determine whether the settlement is fair and to determine an award of attorneys' fees and expenses. Following the fairness hearing, the parties filed a supplemental joint memorandum alerting the Court to the potential for a *cy pres* distribution of any unclaimed settlement funds. On July 10, 2015, the Court informed the parties that the proposed recipients of *cy pres* funds failed to meet applicable criteria for *cy pres* awards.[20] On July 16, 2015, the parties identified new proposed beneficiaries for any potential *cy pres* distribution.[21]

D. The Settlement Class

The Court certified the following settlement class for both settlements:

> All individuals residing or entities operating in Arizona, California, Florida or Missouri, who or which, between January 1, 2008 and July 16, 2013, purchased indirectly from PoolCorp (and not for resale) Pool Products in Arizona, California, Florida or Missouri manufactured by Hayward, Pentair, or Zodiac. Excluded from the Settlement Class are (1) individuals residing or entities operating in Missouri, who or which did not purchase Pool Products primarily for **[*13]** personal, family, or household purposes, and (2) Defendants and their subsidiaries, or affiliates, whether or not named as a Defendant in this Action, and governmental entities or agencies.[22]

[16] R. Docs. 551 & 552.

[17] *Id.*

[18] *Id.*

[19] *Id.*

[20] R. Doc. 660.

[21] R. Doc. 661.

[22] R. Doc. 500-3 ¶ 5 (Hayward settlement agreement addendum); R. Doc. 500-4 ¶ 5 (Zodiac settlement agreement).

Also excluded from the class are any putative class members who excluded themselves by filing a timely, valid request for exclusion. The parties stipulated that certification of the Settlement Class is for settlement purposes only, and they retain all of their respective objections, arguments, and defenses regarding class certification in the event that settlement is not finalized.

E. The Settlement Agreements

Hayward has paid $1.5 million and Zodiac has paid $500,000 into an Escrow Account pending the Court's final approval of the settlements. Interest from the account accrues to the benefit of the settlement class.

The Agreements provide that the settlement amounts are "all-in" figures, meaning that $1.5 million is the total amount Hayward will pay and $500,000 is the total amount Zodiac will pay in exchange for the released claims.[23] Accordingly, the settlement amounts shall be used to pay: (1) **[*14]** the notice and administration costs; (2) attorneys' fees and litigation expenses; (3) incentive awards; (4) class member benefits; and (5) any remaining administration expenses and any other costs of any kind associated with the resolution of the action.[24]

Hayward and Zodiac also agreed to assist plaintiffs' counsel with document authentication and to continue to answer plaintiffs' questions about transactional data previously produced by Hayward and Zodiac during discovery.[25]

The Agreements provide that they are intended to forever and completely release Hayward and Zodiac from all "Released Claims," which are defined as:

> claims, demands, actions, suits, proceedings, causes of action, damages, liabilities, costs, expenses, penalties and attorneys' fees, of any nature whatsoever, whether class, individual, or otherwise in nature (whether or not any person or entity has objected to the settlement or makes a claim upon or participates in the Settlement Fund), whether directly, representatively, **[*15]** derivatively or in any other capacity that Releasors, or each of them, ever had, now has, or hereafter can, shall, or may have on account of, related to, or in any way arising out of, any and all known and unknown, foreseen and unforeseen, suspected and unsuspected injuries, damages, and the consequences thereof in any way arising out of or relating to the Action, which were asserted or that could have been asserted, in complaints filed in the Action by the Settling Plaintiffs, including, without limitation, any claims arising under any federal or state antitrust, unjust enrichment, unfair competition, or trade practice statutory or common law, or consumer protection law.[26]

Releasors waive any rights or benefits conferred by *Section 1542* of the Ca1ifornia Civil Code, which states: "A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."[27] Releasors also waive rights or benefits available under any law of any state or territory of the United States or District of Columbia, or by principle of common law, which **[*16]** is similar, comparable, or equivalent to *Section 1542 of the California Civil Code*, including but not limited to *Section 20-7-11 of the South Dakota Codified Laws*.

F. Notice

---

[23] R. Doc. 500-2 ¶¶ 19 & 22 (Hayward settlement agreement); R. Doc. 500-4 ¶¶ 19 & 22 (Zodiac settlement agreement).

[24] R. Doc. 500-2 ¶¶ 19 & 22; R. Doc. 500-4 ¶¶ 19 & 22.

[25] R. Doc. 500-2 ¶ 31; R. Doc. 500-4 ¶ 31.

[26] R. Doc. 500-2 ¶ 17; R. Doc. 500-4 ¶ 17.

[27] R. Doc. 500-2 ¶ 18; R. Doc. 500-4 ¶ 18.

Federal Rule of Civil Procedure 23(c)(3) governs the notice requirements for class certification. Specifically, the notice must state:

(i) the nature of the action;
(ii) the definition of the class certified;
(iii) the class claims, issues, or defenses;
(iv) that a class member may enter an appearance through an attorney if the member so desires;
(v) that the court will exclude from the class any member who requests exclusion;
(vi) the time and manner for requesting exclusion; and

(vii) the binding effect of a class judgment on members under *Rule 23(c)(3)*.

Fed. R. Civ. P. 23(c)(3)(B). The notice here gave the class information about the terms of the settlements, the date of the final fairness hearing and deadlines for opting out of or objecting to the settlement, and methods for contacting Class Counsel and Angeion. The notice also informed the class that Class Counsel intended to seek up to one-third of the settlement in attorneys' fees and/or for reimbursement of expenses. The Court found in its preliminary approval order that the proposed notice met the requirements of *Rule 23(c)(3)*. The Court also found that the proposed **[*17]** plan for disseminating the notice was the best notice practicable in accordance with *Rule 23(c)(2)(B)* and that it met the requirements of Due Process.

Class Counsel has provided evidence that the notice was disseminated as planned. Angeion sent email notice to 214,263 individuals and entities, using email addresses gleaned from Hayward's and Zodiac's warranty and rebate databases.[28] The email lists did not include all class members, because many affected class members may have never registered their warranties or submitted a rebate request. Thus, to reach unknown class members, Angeion implemented a three-part, paid notice campaign.

First, Angeion published short-form notice of the settlement in major newspapers in the four states included in the class. The affidavit from Angeion's Executive Vice President includes a chart documenting the particular newspapers and dates of publication. Second, Angeion executed an internet banner advertisement campaign and a Facebook and Google advertisement campaign. Third, Angeion issued a national press release about the settlement.

In addition to the notice campaign, Angeion has established an information website about **[*18]** the settlement. As of March 2015, the website had received approximately 28,000 views. Angeion also established a toll-free number to permit class members to listen to FAQs and request long-form notice.

Hayward and Zodiac have notified the appropriate state and federal officials as required by the Class Action Fairness Act. *See* *28 U.S.C. § 1715*. The Act requires notice to be given no later than ten days after a proposed settlement of a class action is filed in court. *Id.* *§ 1715(b)*. And, under *section 1715(d)*, a court may not grant final approval of a settlement until ninety days after the appropriate officials have been served with notice.

Here, Zodiac served notice on the necessary State and Federal officials on November 26, 2014, two days after filing its proposed settlement in court.[29] Hayward, however, did not serve notice until February 6, 2015--months after filing its proposed settlement.[30] Thus, it did not comply with the Act's requirement of prompt notice. Nonetheless, more than ninety days have passed since both Hayward and Zodiac served notice on the appropriate officials, and no officials have raised complaints or concerns. Therefore, the Court finds that the notice satisfies the Act, because the appropriate state and **[*19]** federal officials have had "sufficient notice and opportunity to be heard" about the settlements. *In re Processed Egg Prods. Antitrust Litig., 284 F.R.D. 249, 258 n.12 (E.D. Pa. 2012)* (collecting cases).

---

[28] R. Doc. 622-2 (declaration of Steven Weisbrot).

[29] R. Doc. 560.

[30] R. Doc. 598.

In sum, after reviewing evidence of the Claims Administrator's actual dissemination of the notice, and the notice provided to state and federal officials under the Class Action Fairness Act, the Court confirms that the notice complies with the requirements of Rule 23 and Due Process, and with the Act.

G. Plan of Allocation and Claims Process

The Agreements provide that settlement funds will be used to pay attorneys' fees and expenses approved by the Court, all settlement administration expenses, costs for notice, and any other costs associated with the settlement. Plaintiffs combined notice and administration for the Hayward and Zodiac settlements to save on costs. IPPs project that after deducting estimated settlement administration expenses ($210,000), and their requested fees and expenses award ($666,666.67), there will be $1,123,333.33 left for the benefit of the class.[31]

The Court also appointed a Special Master for the IPP settlement,[32] and tasked the Special Master with formulating and recommending an allocation protocol that would **[*20]** apportion the settlement proceeds--net of claims administration expenses, attorneys' fees and costs--to Class Members who submit valid claims from each of the four states involved (CA, AZ, MO, and FL). The Special Master recommended a claims procedure that gives claimants the option to recover under a "Standardized Recovery Model" or an "Itemized Recovery Model," depending on the types of documentation they have available. Consumers without extensive documentation will recover standard amounts for items purchased in particular categories of Pool Products. Consumers with extensive records can submit itemized claims based on their actual purchase prices. In any event, consumers will be able to recover only up to the alleged 4.97 percent overcharge on their eligible Pool Products purchases. After all claims are processed, if the aggregate eligible recovery exceeds the net settlement amount, then eligible claims will be reduced *pro rata.* If the aggregate eligible recovery is less than the net settlement amount, the Special Master recommends that the remaining funds be allocated to a *cy pres* fund, to be distributed at the Court's discretion.

The Special Master later issued **[*21]** a supplemental report, in which he recommended that the two settlements be treated as a single fund of $2,000,000 for the purposes of allocation and distribution. The Special Master's supplemental report also recommended awarding an incentive payment of $2000 to each of the four Named Plaintiffs, who have each served the class by reviewing the complaints, submitting to a multi-hour deposition, preparing for the deposition, and gathering and submitting documents to Class Counsel.

H. Opt-outs, Objections, and Claims

The deadline for opting out of the settlements was April 9, 2015. That deadline has passed, and no class members requested exclusion. Nor did any class members object to the settlement.

The claims filing deadline is December 11, 2015. As of May 22, 2015, Angeion had received 1435 claims. The average purchase price amount claimed is $2,577.07. IPPs anticipate that the full amount available for the class will not be claimed and that funds will be left over for a *cy pres* award.

Class Counsel estimates that there are approximately 500,000 class members nationwide, meaning that the claims submitted so far represent approximately 0.3 percent of the class. Class Counsel also represent **[*22]** that, had Steven Weisbrot of Angeion been called to testify at the fairness hearing, he would have testified that this claims rate is consistent with his experience in other consumer and end-user class settlements. In addition, at the fairness hearing, IPPs informed the Court that they have reached a settlement with Pentair. Thus, the class will be "re-noticed" in the coming months, which Class Counsel predicts will lead to an increase in claims.

---

[31] R. Doc. 623-1 at 4.

[32] *See* R. Doc. 467.

II. *Cy Pres* Distribution

Because a *cy pres* award of unclaimed settlement funds is likely, the Court will first analyze whether the parties proposed *cy pres* distribution is appropriate. *See* Dennis v. Kellogg Co., 697 F.3d 858, 865 (9th Cir. 2012) ("In addition to asking whether the *class settlement*, taken as a whole, is fair, reasonable, and adequate to all concerned, we must also determine whether the *distribution* of the approved class settlement complies with our standards governing *cy pres* awards." (internal citations and quotation marks omitted)).

A. Legal Standard

In class actions, federal courts apply the equitable doctrine of *cy pres* to put undistributed or unclaimed settlement funds to their next best compensatory use, "*e.g.*, for the aggregate, indirect, prospective benefit of the class." Klier v. Elf Atochem N. Am., Inc., 658 F.3d 468, 474 (5th Cir. 2011) (quoting **[*23]** In re Airline Ticket Comm'n Antitrust Litig., 307 F.3d 679, 682 (8th Cir. 2002)); *see also* Masters v. Wilhelmina Model Agency, Inc., 473 F.3d 423, 436 (2d Cir. 2007)(internal quotation marks omitted).

The Fifth Circuit requires that two conditions be met before finding that a *cy pres* distribution is appropriate. First, it must be infeasible to make further settlement distributions to class members. Klier, 658 F.3d at 475 (citing Am. Law Inst., Principles of the Law of Aggregation Litigation § 3.07 (2010); William B. Rubenstein, *et al.*, Newberg on Class Actions § 10.17 (4th ed. 2002)). It is infeasible to make further distributions when (1) remaining class members cannot be identified or chose not to participate, (2) the claim amounts are too small to make individual distributions economically viable, and/or (3) the class members' damages claims are fully satisfied by the initial distribution. *Id.*; Am. Law Inst., *supra* § 3.07.

Second, the unclaimed funds must "be distributed for a purpose as near as possible to the legitimate objectives underlying the lawsuit, the interests of class members, and the interests of those similarly situated." Klier, 658 F.3d at 474 (quoting In re Airline Ticket Comm'n, 307 F.3d at 682); *see also* In re Lease Oil Antitrust Litig. (No. II), MDL No. 1206, 2007 U.S. Dist. LEXIS 91467, 2007 WL 4377835, at *21 (S.D. Tex. Dec. 12, 2007) ("In applying *cy pres* principles, it is appropriate for a court to consider (1) the objectives of the underlying statute(s), (2) the nature of the underlying suit, (3) the interests of the class members, and (4) the geographic scope **[*24]** of the case." (internal citations omitted)). Stated differently, there must be a nexus between the harm that the plaintiffs suffered and the benefit the *cy pres* distribution is expected to provide. *See* Rubenstein, *supra* § 12.33. Only when, after thorough investigation and analysis, the court cannot identify a recipient whose interests reasonably approximate those of the class may a court approve a *cy pres* award to a recipient with more tangential connections. *See id.*; *see also* Diamond Chem. Co., Inc. v. Akzo Nobel Chems. B.V., Nos. 01-2118 (CKK), 02-1018 (CKK), 2007 U.S. Dist. LEXIS 49406, 2007 WL 2007447, at *2 (D.D.C. July 10, 2007) ("[T]he doctrine of *cy pres* and the courts' broad equitable powers now permit the use of funds for other public interest purposes by educational, charitable, and other public service organizations." (internal quotation marks omitted)).

B. Discussion

The Court finds the proposed *cy pres* distribution in this case to be appropriate based on the unclaimed settlement funds likely to remain at the claims filing deadline and the nexus between the interests of the class members and the proposed beneficiaries.

First, the Court estimates the amount of the settlement funds likely to remain undistributed at the end of the claims filing deadline of December 11, 2015. Out of a potential class **[*25]** of approximately 500,000 members, only 1435 claimants have filed claims as of May 2015. With approximately six months left in the claims filing period, Class Counsel predict an increase in claims in coming months because the class will be "re-noticed" in connection with IPPs' settlement with Pentair. For the purposes of calculating any potential *cy pres* award, the Court conservatively estimates that only 25 percent more, or 358 additional claims, will be filed by December 2015.

Multiplying the estimated total of 1793 claims by the average purchase price amount claimed of $2,577.07, the claims filed are likely to total approximately $4,620,686.51 in overcharged purchases. Applying the 4.97 percent overcharge to the total purchase price amount, the total amount claimants would be entitled to recover under the settlement agreements is approximately $229,648.12. This amount would fully satisfy IPPs' claims. Subtracting this estimate of total damages, the notice and administration costs ($210,000), and the named plaintiffs' incentive awards ($8000 total) from the total amount of the settlement fund ($2,000,000), leaves approximately $1,552,351.88, exclusive of attorneys' fees and costs, **[*26]** to be distributed *cy pres.* Relying on the current claims information and the estimated projection for the remaining claims period, the Court concludes that it will likely be infeasible to make further distributions of unclaimed funds to the settlement class because the plaintiffs who file claims will be fully compensated by the initial distribution. *See* *Klier, 658 F.3d at 475*; Am. Law Inst., *supra* § 3.07; *see also* *In re Heartland Payment Sys., Inc. Customer Data Sec. Breach, Litig., 851 F. Supp. 2d 1040, 1067 n.18 (S.D. Tex. 2012)* (explaining that awarding claimants settlement funds above the amount of their claim provides them with a "huge windfall").

In an effort to distribute the unclaimed funds for a purpose "as near as possible to the legitimate objectives underlying the lawsuit," the parties propose three organizations as potential *cy pres* recipients: the American Antitrust Institute, Consumers Union, and the Institute for Consumer Antitrust Studies at Loyola University of Chicago.[33] The American Antitrust Institute is a non-profit education, research, and advocacy organization that works to increase the role of competition in the market and to challenge economic abuses. Consumers Union is the policy and action division of the non-profit organization Consumer Reports. Consumers Union seeks to protect consumers by advocating and promoting **[*27]** consumer protection laws. Loyola University's Institute for Consumer Antitrust Studies is a non-partisan academic center designed to explore the impact of antitrust enforcement on the individual consumer and to shape policy issues. Loyola's Institute fulfills its mission by sponsoring symposia, academic colloquia, student fellowships, and the world's first online masters program in global competition law.

Courts have used the *cy pres* doctrine to disburse unclaimed settlement funds to a wide range of "educational, charitable, and other public service organizations." *See, e.g.,* *In re Infant Formula Multidistrict Litig., No. 4:91-CV-00878, 2005 U.S. Dist. LEXIS 32957, 2005 WL 2211312, at *2 (N.D. Fla. Sept. 8, 2005)* (quoting *In re Motorsports Merch. Antitrust Litig., 160 F. Supp. 2d 1392, 1394 (N.D. Ga. 2001))*. In consumer antitrust cases such as this one, courts traditionally award *cy pres* distributions to organizations dedicated to protecting consumers. For example, in *In re Publication Paper Antitrust Litigation*, the court explained, "[b]ecause the plaintiffs' claims here are based on antitrust injury, the next best use for the settlement funds is to disburse those funds to charitable institutions designed to guard against antitrust injury and protect consumers." *No. 3-:04 MD 1631 (SRU), 2009 U.S. Dist. LEXIS 66654, 2009 WL 2351724, at *2 (D. Conn. July 30, 2009)*. The court awarded *cy pres* distributions in varying amounts to the American **[*28]** Antitrust Institute, Public Justice, Class Action, Preservation Project, and Consumer Watchdog. *Id.* Similarly, following a class action settlement in an illegal tying arrangement dispute, the Eastern District of New York awarded *cy pres* distributions to the American Antitrust Institute, Consumers Union, and U.S. Public Interest Research Group. *In re Visa Check/MasterMoney Antitrust Litig., No. 96-cv-5238(JG), 2011 U.S. Dist. LEXIS 122680, 2011 WL 5029841, at *9 (E.D.N.Y. Oct. 24, 2011)*.

Here, IPPs allege that the Manufacturer Defendants abused their economic power by unlawfully conspiring with Pool to increase prices for Pool Products in various states. IPPs assert that they were injured because defendants' conduct caused them to pay higher prices for Pool Products than they would have otherwise paid absent defendants' illegal practices. Considering the objectives underlying the lawsuit and the interests of the class and those similarly situated, the Court finds that Consumers Union and Loyola's Institute for Consumer Antitrust Studies are appropriate *cy pres* beneficiaries for the work to benefit consumers. Each organization is dedicated to a worthy cause that will serve the interests of the consumer class members. Consumers Union is dedicated to protecting consumers. **[*29]** Its mission statement, available online, provides, "We stand firmly behind the principle that consumer products must be safe, effective, reliable, and *fairly priced*." Consumers Union,

[33] R. Doc. 661.

https://consumersunion.org/about/mission/ (last visited July 19, 2015) (emphasis added). Additionally, Loyola's Institute for Consumer Antitrust Studies touts itself as "the only academic organization of its kind" dedicated to exploring the impact that antitrust and consumer protection laws have on the individual consumer. Loyola University Chicago School of Law, http://www.luc.edu/law/centers/antitrust/mission.html (last visited July 19, 2015). These organizations can put any *cy pres* award to good use, resulting in an aggregate, indirect, prospective benefit to the IPP class. *See* Klier, 658 F.3d at 474 (quoting In re Airline Ticket Comm'n, 307 F.3d at 682.). Therefore, if settlement funds remain after distribution to the class members, the Court will award any unclaimed funds in the following amounts: 50 percent to Consumers Union and 50 percent to Loyola University's Institute for Consumer Antitrust Studies.

III. Fairness Determination

A. Legal Standard: Fair, Adequate, and Reasonable

A class action may not be dismissed or compromised without the Court's approval and notification to all class members. Fed. R. Civ. P. 23(e). Before the Court approves a settlement, the Court must find **[*30]** that the proposed settlement is "fair, reasonable, and adequate." Fed. R. Civ. P. 23(e)(1)(C); Newby v. Enron Corp., 394 F.3d 296, 301 (5th Cir. 2004).

The Court must "ensure that the settlement is in the interests of the class, does not unfairly impinge on the rights and interests of dissenters, and does not merely mantle oppression." Ayers v. Thompson, 358 F.3d 356, 368-69 (5th Cir. 2004) (quoting Reed v. Gen. Motors Corp., 703 F.2d 170, 172 (5th Cir. 1983)). Because the parties' interests are aligned in favor of settlement, the Court must take independent steps to ensure fairness in the absence of adversarial proceedings. *See* Reynolds v. Beneficial Nat'l Bank, 288 F.3d 277, 279-80 (7th Cir. 2002) (noting that the class action context "requires district judges to exercise the highest degree of vigilance in scrutinizing proposed settlements"); *see also* Manual for Complex Litigation (Fourth) § 21.61 (2004). The Court's duty of vigilance does not, however, authorize it to try the case in the settlement hearings. Cotton v. Hinton, 559 F.2d 1326, 1330 (5th Cir. 1977).

The Fifth Circuit has identified six factors that courts should consider in assessing whether a settlement is fair, adequate, and reasonable: (1) evidence that the settlement was obtained by fraud or collusion; (2) the complexity, expense, and likely duration of the litigation; (3) the stage of the proceedings and the amount of discovery completed; (4) the factual and legal obstacles to plaintiffs prevailing on the merits; (5) the range of possible **[*31]** recovery and certainty of damages; and (6) the opinions of class counsel, class representatives, and absent class members. *See* Newby, 394 F.3d at 301; Ayers, 358 F.3d at 369; Reed, 703 F.2d at 172.

B. Discussion

1. Settlement Obtained by Fraud or Collusion

There is no evidence that any fraud or collusion infected the process by which the parties arrived at the settlement agreements. For both the Hayward and the Zodiac settlements, the parties reached an agreement only after multiple formal sessions of arm's length mediation with Judge Phillips.

Next, the terms of the agreements do not signal fraud or collusion. In its preliminary approval order, the Court reviewed the "Released Claims" provision in each Settlement and found the provisions reasonable. Both Agreements provide, in identical language, that they are intended to forever and completely release Hayward and Zodiac from all "Released Claims," which are defined as:

> claims, demands, actions, suits, proceedings, causes of action, damages, liabilities, costs, expenses, penalties and attorneys' fees, of any nature whatsoever, whether class, individual, or otherwise in nature (whether or not any person or entity has objected to the settlement or makes a claim upon or participates in the Settlement Fund), **[*32]** whether directly, representatively, derivatively or in any other capacity that Releasors, or each of them, ever had, now has, or hereafter can, shall, or may have on account of, related to, or in any way arising out of, any and all known and unknown, foreseen and unforeseen, suspected and unsuspected injuries, damages, and the consequences thereof in any way arising out of or relating to the Action, which were asserted or that could have been asserted, in complaints filed in the Action by the Settling Plaintiffs, including, without limitation, any claims arising under any federal or state antitrust, unjust enrichment, unfair competition, or trade practice statutory or common law, or consumer protection law.[34]

Regarding unknown claims, the Agreements further specify that these releases constitute a waiver of class members' rights under *Section 1542 of the California Civil Code*, which provides for a release against unknown claims, and "any other rights or benefits available under any law of any state or territory of the United States or District of Columbia, or by principle of common law, which is similar, comparable, or equivalent to *§ 1542 of the California Civil Code*, including but not limited to *Section 20-7-11 of the South Dakota Codified Laws*."[35]

The Court finds that these releases are not impermissibly broad. Courts have consistently approved releases in class action settlements that discharge unknown claims relating to the factual issues in the complaint. *See* *DeHoyos v. Allstate Corp., 240 F.R.D. 269, 311-12 (W.D. Tex. 2007)* (finding that release of unknown claims was not impermissibly broad); *In re Corrugated Container Antitrust Litig., 643 F.2d 195, 221 (5th Cir. 1981)* ("[A] court may release not only those claims alleged in the complaint and before the court, but also claims which could have been alleged by reason of or in connection with any matter or fact set forth or referred to in the complaint."). As the Fifth Circuit explains, courts are required to enforce such broad provisions because they "contribute significantly to the public policy of encouraging the settlement of differences and compromise of disputes in which the execution and exchange of releases is the common and legally accepted means of consummation." *Ingram Corp. v. J. Ray McDermott & Co., 698 F.2d 1295, 1312 (5th Cir. 1983)*. Thus, the Court finds the provisions to be reasonable.

As the Court also noted in its preliminary approval order, the settlement does not give preferential treatment to the named class representatives or any segment of the class. The special master has recommended a modest incentive award of $2000 for each Named Plaintiff, **[*34]** to compensate them for the assistance they have provided to Class Counsel in developing the facts in the case. In addition, to the extent that class members' claims exceed the net settlement fund, the special master recommends that each claimant be compensated *pro rata* according to the claimant's calculated loss under the allocation plan. The Court found this suggested allocation plan to be fair and unbiased.

That class members received notice of the allocation plan and have not objected to it buttresses the Court's conclusion. Class members received notice that the attorneys would request up to one-third of the settlement and that notice and administration expenses would come out of the settlement. They also had access, via the settlement website, to the special master's reports, which set forth in greater detail the proposed plan for allocating the net settlement fund among claimants. No class member has objected to the fairness of the settlement, the allocation plan, or the attorneys' request for one-third of the settlement.

Because the Court finds no indication that the settlement is fraudulent or collusive, or that it unfairly discriminates among class members, this factor favors **[*35]** approving the settlement.

2. Complexity, Expense, and Likely Duration of the Litigation

---

[34] R. Doc. 500-2 at ¶ 17; R. Doc. 500-4 at ¶ 17.

[35] R. Doc. 500-2 at **[*33]** ¶ 18; R. Doc. 500-4 at ¶ 18.

Under this factor, the Court considers whether settling now avoids the risks and burdens of potentially protracted litigation. *Ayers, 358 F.3d at 369*. The settlements eliminate the need for IPPs to litigate their claims against Hayward and Zodiac, which will save substantial time and expense. Moreover, this partial settlement allows IPPs to mitigate some of the risk inherent in continuing in litigation against the remaining defendants. It guarantees at least some recovery for class members, regardless of how IPPs' claims against the remaining defendants may be resolved.

The complexity of this litigation also favors settlement. As the ongoing motions practice involving the non-settling defendants indicates, this case involves complex issues of proof in connection with both IPPs' substantive claims and their motion for class certification. If the Court grants IPPs' motion for class certification, the parties will still likely have to withstand an interlocutory appeal of the Court's class certification order. A trial in this matter would be lengthy and would require numerous attorneys, paralegals, and witnesses. This case **[*36]** also requires expert testimony to establish market definition, causation, damages (including, for IPPs, pass-through). After trial, the parties could still expect years of appeals. Therefore, the complexity and likely duration of this case weigh in favor of finding that partial resolution by settlement is a reasonable option for all parties involved.

3. Stage of the Proceedings

This factor asks whether the parties have obtained sufficient information "to evaluate the merits of the competing positions." *Ayers, 358 F.3d at 369*. The question is not whether the parties have completed a particular amount of discovery, but whether the parties have obtained sufficient information about the strengths and weaknesses of their respective cases to make a reasoned judgment about the desirability of settling the case on the terms proposed or continuing to litigate it. *In re Educ. Testing Serv. Praxis Praxis Principles of Learning & Teaching, Grades 7-12 Litig., 447 F. Supp. 2d 612, 620-21 (E.D. La. 2006)* (citing *In re Train Derailment Near Amite, La., MDL No. 1531, 2006 U.S. Dist. LEXIS 32839, 2006 WL 1561470, at *22 (E.D. La. May 24, 2006))*. If the settlement proponents have taken affirmative steps to gather data on the claims at issue, and the terms of the settlement are not patently unfair, the Court may rely on counsel's judgment that the information gathered was enough to support a settlement. *In re Corrugated Container, 643 F.2d at 211* **[*37]** .

Here, settlement occurred after two years of litigation and extensive fact discovery. Counsel participated in or attended over eighty fact witness depositions and reviewed over four million documents. Expert discovery had already begun. And IPPs defended against a complicated motion to dismiss. Because of the advanced stage of the litigation, counsel for all parties were familiar with the factual and legal issues in the case. Therefore, the Court is satisfied that the parties were sufficiently informed to assess the strengths and weaknesses of their positions and to make a reasoned evaluation of whether and on what terms to settle. This factor favors settlement.

4. The Obstacles to Prevailing on the Merits

As the Court summarized in its preliminary fairness order, IPPs face obstacles to prevailing on the merits of their claim, which IPPs acknowledge in their motion for final approval of these settlements.

First, IPPs' claims are subject to complex problems of proof. Regarding liability, no claim is subject to a theory of *per se* illegality, which makes proof of anticompetitive conduct more difficult. Further, reports from the non-settling defendants' experts indicate that IPPs will face **[*38]** proof challenges on the issues of impact and damages, including pass-through.

Second, class certification in this case is disputed. The non-settling defendants oppose IPPs' pending motion for certification of a litigation class. They challenge, among other things, IPPs' ability to demonstrate commonality and predominance under Rule 23.

Finally, the parties are presently engaged in a heated dispute over expert testimony. The Court is currently considering motions to exclude not only IPPs' economic expert, but also DPPs' economic expert, upon whose analysis IPPs' substantive claims and bid for class certification depend.

Moreover, even if IPPs survive summary judgment and receive class certification, the certification decision will be subject to interlocutory appeal. In sum, considering the risks IPPs face in surviving summary judgment, attaining class certification, and prevailing at trial and on appeal, the probability of success factor favors approving the settlement.

5. Range of Possible Recovery

The Court "must establish the range of possible damages that could be recovered at trial, and, then, by evaluating the likelihood of prevailing at trial and other relevant factors, determine whether **[*39]** the settlement is pegged at a point in the range that is fair." *In re Corrugated Container, 643 F.2d at 213*. In particular, "[p]roof difficulties" are "permissible factors" for a court to consider when evaluating the fairness of a settlement. *In re Chicken Antitrust Litig. Am. Poultry, 669 F.2d 228, 240 (5th Cir. 1982)*.

The Court considers whether the $2 million total settlement fund is pegged at a fair point in the range of potential recovery, taking into account the risks present in this particular litigation. IPPs' expert suggests that estimated damages for class members during the class period are $23,951,893.[36] Although at first glance the settlement figure appears small in comparison to the universe of potential damages, plaintiffs' projected damages reflect a *best* case scenario for plaintiffs' actual damages. This damages estimate does not reflect the substantial risks of nonrecovery or diminished recovery plaintiffs face in this litigation, as discussed above. Indeed, the lower boundary of IPPs' range of possible recovery is zero. The $2 million figure provides prompt and certain recovery of at least some of IPPs' alleged losses.

In addition, IPPs noted at the hearing that some of the proof challenges that they face on showing impact are potentially more relevant to their claims **[*40]** against the Manufacturer Defendants. Plaintiffs generally regard the claims against Pool to be the stronger claims. IPPs further note that, while this settlement amounts to approximately 8.5 percent of IPPs' best case projection for actual damages, that percentage will increase if additional settlements (such as the recently reached settlement with Pentair) are added to the pot. *Cf. Newby, 394 F.3d at 303* (observing that the "numerator" and "denominator" of partial settlements change as additional partial settlements are added to the overall settlement amount).

The Court must also consider the effect of the proposed *cy pres* distribution. With class settlements, the Court's primary concern is assuring the claimants will receive some monetary benefit from the settlement. *See In re Katrina Canal Breaches Litig., 628 F.3d 185, 196 (5th Cir. 2010)*. The more likely the claimants are to receive full compensation for their damages, the better. *In re Heartland Payment Sys., 851 F. Supp. 2d at 1067 n.18* (noting that once claimants have been paid, *cy pres* distributions are a reasonable and fair means to avoid awarding a small number of claimants a windfall of remaining funds). Here, no *cy pres* distribution will be made until after class members have had ample time to file their claims. Thus, the *cy pres* distribution will not divert settlement **[*41]** funds that class members would otherwise be entitled to recover. *See id. at 1067-68*. Indeed, based on the current claims information, it appears highly likely that all plaintiffs who file claims will recover the full distribution to which they are entitled under the terms of the settlement agreement.

The class will also receive a non-monetary benefit as part of the settlement. Both Hayward and Zodiac have agreed to cooperate with IPPs to answer questions about their transactional data and to assist with authenticating records. This cooperation will assist IPPs as they proceed against the non-settling defendants.

[36] R. Doc. 500-1 at 27 n.10.

After evaluating the range of possible recovery in light of the risks of non-recovery, the Court concludes that the $2 million total settlement fund is pegged at a fair point in the range. Thus, this factor weighs in favor of settlement.

6. Opinions of Class Counsel, Class Representatives, and Absent Class Members

The opinions of the affected parties are generally favorable towards the settlement. The Court is entitled to rely on the judgment of experienced counsel in its evaluation of the merits of a class action settlement. *Cotton, 559 F.2d at 1330*. Here, Settlement Class Counsel have expressed their approval **[*42]** of the settlement after over two years of litigation and extensive fact discovery, as discussed above.

Further, no objections have been filed, and no class members have asked to opt out of the settlement. Although the Court is careful not too infer too much from an absence of objectors and opt-outs, the lack of objectors and opt-outs suggests class-wide support for the proposed settlement. *See, e.g., In re Cardizem CD Antitrust Litig., 218 F.R.D. 508, 527 (E.D. Mich. 2003)* (explaining that a small number of opt-outs and objections can be viewed as indicative of the fairness of the settlement); *In re Excess Value Ins. Coverage Litig., No. M-21-84RMB, MDL-1339, 2004 U.S. Dist. LEXIS 14822, 2004 WL 1724980, at *11 (S.D.N.Y. 2004)* (reasoning that small number of objectors suggests support for settlement). In addition, 1435 claim forms had been received by May 2015 -- seven months before the December 11, 2015, deadline.

In sum, because all factors weigh in favor of settlement, the Court finds the settlement to be fair, reasonable and adequate under *Rule 23(e)(1)(C) of the Federal Rules of Civil Procedure*.

IV. Attorneys' Fees and Costs

A. Request

In the notice sent to the class, Class Counsel indicated that they would seek up to one-third of the settlement total for attorneys' fees and/or for reimbursement of expenses. Consistent with that notice, Class Counsel now request a fee award of $346,666.67 **[*43]** and a $320,000 reserve for litigation expenses. Together, these amounts are equivalent to one-third of the total settlement fund.

The requested litigation expense fund comprises $276,716.70 in shared and held expenses already incurred by Class Counsel as of January 31, 2015, and $43,283.30 to be set aside for future litigation expenses. The expenses already incurred have been reported by Class Counsel in accordance with a court-approved protocol and approved by the court-appointed accountant, Philip A. Garrett. Any future expenses will also be vetted by Mr. Garrett before being paid from the fund.

Class Counsel have also expended more than 5000 hours in attorney and staff time on this litigation. All of these hours have been reported to Mr. Garrett, and he found them to be appropriate common benefit work. The requested fee award is equivalent to 17.3 percent of the total settlement fund.

Class Counsel's fee and expense request also sets forth a plan for allocating the requested award among the firms that have worked on the case. At the hearing, Class Counsel represented that all of the firms that have worked on the case are represented in the allocation plan. Further, all of the firms **[*44]** agree with the plan.

In its preliminary fairness determination, the Court concluded that a total attorney award (including both fees and expenses) not exceeding one-third of the fund was consistent with other awards approved in this circuit and within the limit of what the Court deems reasonable. The Court now makes a more detailed inquiry into Class Counsel's request.

B. Class Benefit

The Court begins by assessing the monetary value of the settlements for the purpose of calculating attorneys' fees. Notably, a substantial portion of the settlement funds (approximately $1,552,351.88 based on current claims information and the Court's estimates of future claims) will likely be distributed *cy pres.* Courts take different approaches in valuing *cy pres* awards when it comes to determining attorneys' fees. Some courts consider a *cy pres* award to be sufficiently beneficial to class members to warrant awarding attorneys' fees on the basis of the entire settlement fund, regardless of the amount actually claimed by the class. *See, e.g.,* *Masters v. Wilhelmina Model Agency, Inc., 473 F.3d 423, 437-38 (2d Cir. 2007)*. Other courts hold that *cy pres* distributions should not be considered beneficial to the class and therefore should not be included as part of the common fund on **[*45]** which an award of attorneys' fees is based. *See, e.g.,* *Pearson v. NBTY, Inc., 772 F.3d 778, 781 (7th Cir. 2014)* ("The judge excluded . . . the *cy pres* award of $1.13 million in calculating the benefit to the class, for the obvious reason that the recipient of that award was not a member of the class . . . ."). Still other courts take a "middle" approach, discounting the *cy pres* award's monetary value to account for the indirect benefit provided to the class. *See, e.g.,* *In re Heartland Payment Sys., 851 F. Supp. 2d at 1077*.

The Court finds that the "middle" approach is most appropriate in this case. Courts generally consider the benefit to the class to be the most important consideration when awarding attorneys' fees in class action cases. *See, e.g.,* *In re AT&T Corp., 455 F.3d 160, 165-66 (3d Cir. 2006)* ("[W]hat is important is that the district court evaluate what class counsel actually did and how it benefitted the class."); *Strong v. Bellsouth Telecomm., Inc., 137 F.3d 844, 851 (5th Cir. 1998)* (affirming the district court's refusal to award attorneys' fees, beyond what counsel had already collected in related cases, in light of the non-monetary benefit to the class). Importantly, the Fifth Circuit recognizes that *cy pres* awards provide *some* indirect benefit to the class. *See* *Klier, 658 F.3d at 474*. Because the *cy pres* benefit is only indirect, though, it is "inappropriate to value *cy pres* on a dollar-for-dollar basis." *In re Heartland Payment Sys., 851 F. Supp. 2d at 1077*; *see also* Am. **[*46]** Law Inst., Principles of the Law of Aggregate Litigation § 3.13 cmt. (a) ("Because *cy pres* payments . . . only indirectly benefit the class, the court need not give such payments the same full value for purposes of setting attorneys' fees as would be given to direct recoveries by the class.").

Recognizing that the potential *cy pres* distribution in this case confers some "aggregate, indirect, prospective benefit [to] the class[,]" *see* *Klier, 658 F.3d at 474* (quoting *In re Airline Ticket Comm'n, 307 F.3d at 682*), the Court discounts the potential *cy pres* payment by 50 percent to best value the benefit to the IPP class members. *See* *In re Heartland Payment Sys., 851 F. Supp. 2d at 1077*. Therefore, for purposes of calculating reasonable attorneys' fees, the indirect benefit that the *cy pres* distribution confers on the class members is valued at approximately $791,699.46. Adding this amount to the approximate value of actual claims filed ($229,648.12), plus the $8,000 in incentive awards to the Named Plaintiffs, brings the value of the settlement fund to approximately $1,029,347.58.

In valuing the settlement for purposes of attorneys' fees, the Court also finds that the notice and administrative costs provided a benefit to the class. Without sufficient notice and successful administration, class members would be **[*47]** unaware of their claims and unable to collect the monetary awards to which they are entitled under the settlement agreements. *See* *Waters v. Int'l Precious Metals Corp., 190 F.3d 1291, 1294 (11th Cir. 1999)* ("[Class members'] right to share the harvest of the lawsuit upon proof of their identity, *whether or not they exercise it*, is a benefit in the fund created by the efforts of the class representatives and their counsel."). Accordingly, the Court finds that the notice and administration costs are entitled to their full value of $210,000. Thus, the total monetary value of the settlement on which to calculate reasonable attorneys' fees is $1,239,347.58.

C. Legal Standard

The court must independently analyze the reasonableness of the attorneys' fees proposed in the settlement agreement. Here, the proposed fees amount to 17 percent of the total settlement fund and 27.9 percent of the settlement value as determined by the Court after discounting the *cy pres* award. *See* *Strong, 137 F.3d at 849-50*;

see also Fed. R. Civ. P. 23(e). In a common fund settlement, in which the plaintiffs' attorneys are paid out of settlement proceeds, the interests of the attorneys conflict with those of the class. Put simply, the more money the attorneys get, the less the class gets. The Fifth Circuit has established twelve factors **[*48]** to consider in calculating reasonable fees and costs. *Johnson v. Ga. Highway Express, Inc., 488 F.2d 714 (5th Cir. 1974)*. In common fund cases, district courts typically use either the percentage method or the lodestar method to calculate attorney's fees. The Fifth Circuit endorses the use of the percentage method, cross-checked with the *Johnson* factors. *See* Union Asset Mgmt. Holding A.G. v. Dell, Inc., 669 F.3d 632, 644 (5th Cir. 2012). The Court adopts that approach here.

A different standard applies to the expenses requested by Class Counsel. Typically, class action counsel who create a common fund for the benefit of the class (as counsel have done here), are entitled to reimbursement of reasonable litigation expenses from that fund. *See* *In re Heartland Payment Sys., 851 F. Supp. 2d at 1089*; *City of Omaha Police & Fire Ret. Sys. v. LHC Grp., No. 6:12-1609, 2015 U.S. Dist. LEXIS 26050, 2015 WL 965696, at *11 (W.D. La. Mar. 3, 2015)*. And, in the non-class context, the Fifth Circuit has disapproved the application of the *Johnson* factors to reduce expenses across-the-board. It explained:

> Fees may be increased above the lodestar; the cost of suit may not be. . . . [T]here appears to be no correlation between the Johnson factors and out-of-pocket expenses. While expenses incurred extravagantly or unnecessarily should be disallowed, this should be done on an item-by-item basis.

Copper Liquor, Inc. v. Adolph Coors Co., 684 F.2d 1087, 1101 (5th Cir. 1982), *overruled in part on other grounds by* *Int'l Woodworkers of Am., AFL-CIO & its Local No. 5-376 v. Champion Int'l Corp., 790 F.2d 1174 (5th Cir. 1986)* **[*49]** , and *J.T. Gibbons, Inc. v. Crawford Fitting Co., 790 F.2d 1193 (5th Cir. 1986)*. This makes sense: unlike fees, expense reimbursements are not a reward. They must be awarded simply to return counsel to the position they were in before the litigation began.

Finally, the Court must assess whether the total amount awarded to the attorneys, whether in fees or expenses, is fair to the class. As the Fifth Circuit holds, a district court abuses its discretion when it approves a settlement from which expenses may be sought without having any estimate as to what those expenses may be. *See* *In re Katrina, 628 F.3d at 195*. The Court must ensure that expenses will not "cannibalize the entire . . . settlement," and that money will remain for the class after administrative and litigation expenses have been deducted from the fund. *Id. at 196*. Thus, after assessing whether the fees and expenses requested are independently reasonable, the Court will ensure that the overall sum requested is fair, adequate, and reasonable for the class.

D. Fees Request

The Court assesses the fees requested by Class Counsel according to the percentage method, cross-checked with the *Johnson* factors. *See* Union Asset Mgmt., 669 F.3d at 644.

1. Benchmark Percentage

The Court begins by establishing a "benchmark" percentage, which it will then adjust for the **[*50]** particular circumstances of the case. *See, e.g.,* *Camden I Condo. Ass'n v. Dunkle, 946 F.2d 768, 774-75 (11th Cir. 1991)* (citing *Paul, Johnson, Alston & Hunt v. Graulty, 886 F.2d 268, 272 (9th Cir. 1989)*); *In re Catfish Antitrust Litig., 939 F.Supp. 493, 501 (N.D. Miss. 1996)*; *see also* Manual for Complex Litigation (Fourth) § 14.122 (2004). In determining the benchmark, the Court will consider fee awards in similar cases, which the Court notes is the last of the *Johnson* factors. To adjust the benchmark to the facts of this case, the Court will use the remaining *Johnson* factors, to the extent that they are applicable here.

The Manual for Complex Litigation states that a fee of 25 percent of a common fund "represents a typical benchmark." Manual, *supra*, § 14.121. The Ninth Circuit and Eleventh Circuit have adopted a benchmark of 25 percent in common fund cases. *See Staton v. Boeing Co., 327 F.3d 938, 968 (9th Cir. 2003)*; *Camden I Condo., 946 F.2d at 774-75*.

Further, data on fee awards in class action settlements is available in several academic analyses of class action data. *See* Theodore Eisenberg and Geoffrey P. Miller, *Attorney Fees in Class Action Settlements: An Empirical Study*, 1 J. Empirical Legal Stud. 27 (2004); Brian T. Fitzpatrick, *An Empirical Study of Class Action Settlements and Their Fee Awards, 7 J. Empirical Legal Stud. 811 (2010)*. The Eisenberg and Miller study examines (1) data based on published decisions from "all state and federal class actions with reported fee decisions between 1993 and 2002, inclusive, in which the fee and class recovery could be determined with reasonable confidence"; and (2) information reported on more than 600 common fund cases from 1993 and 2002 in *Class Action Reports* ***[*51]*** *(CAR)*. Eisenberg & Miller, *supra*, at 28.

The study finds a "strong correlation between the fee amount and the client recovery." *Id.* at 52. The study further indicates that a scaling effect exists, for "[a]s client recovery increases, the fee percent decreases." *Id.* at 54. The authors of the study suggest that the results can assist courts in determining fee awards:

> [B]ecause our study finds an overwhelming correlation between class recovery and attorney fees, the court can conduct a simple initial inquiry that looks only at these two variables in any case where the size of the class recovery can be estimated. The court need only compare the request in a given case with average awards in cases of similar magnitude. If the request is relatively close to average awards in cases with similar characteristics, the court may feel a degree of confidence in approving the award. If the request is significantly higher than amounts awarded in past cases, the court should inquire further.

Id. at 72. Eisenberg and Miller divided the cases into ten ranges of recovery (deciles) and then gave the mean and median fee percent, as well as the standard deviation, for each decile. *Id.* at 73.

The Court finds the study's data on the average percentage **[*52]** fee awarded in the recovery range comparable to this case useful in arriving at a benchmark percentage fee.[37] The Court's discounted value of the settlement of approximately $1.2 million falls within the less than 10 percent decile of client recovery, which includes recoveries less than $1.4 million. *Id.* at 73. Based on the *Class Action Reports (CAR)* data set, the mean fee percent for nonsecurities cases in this decile was 30.9 percent, with a standard deviation of 8.2 percent. *Id.* The data set generated from published decisions shows a mean fee percent for cases in this decile of 29.5 percent, with a standard deviation of 5.9 percent. *Id.* An average of the mean fee percentages of the two data sets would be 30.2 percent.

The Fitzpatrick study gives a slightly lower figure, with a mean fee percent of 28.7 percent, with a standard deviation of 6.2 percent, for settlements between $750,000 and $1.75 million. *Fitzpatrick, supra, at 839*. The Fitzpatrick study also indicates that the mean fee **[*53]** percentage for antitrust cases is 25.4 percent. *Id. at 835*.

Based on this data, the Court will use an initial benchmark of 27 percent, which is roughly the average of the two data sets in the Fitzpatrick study involving settlement funds of this size and settlements in antitrust litigation. The 27 percent benchmark is slightly lower than the 30.2 percent average in the Eisenberg and Miller study, but the Court notes that Eisenberg and Miller's percentages are significantly higher than the standard 25 percent benchmark adopted by the Ninth and Eleventh Circuits. Ultimately, whether the Court uses the percentages in Eisenberg and Miller or Fitzpatrick does not impact the result here because plaintiffs' fee request would be reasonable under either scenario. Therefore, the Court finds 27 percent to be an appropriate benchmark. The Court will next determine whether the benchmark should be adjusted based on the particular circumstances of this case. In doing so, the Court will consider the other *Johnson* factors.

2. Johnson Factors

---

[37] Eisenberg and Miller suggest that a fee request within one standard deviation of the mean is presumptively reasonable, and that one falling between one and two standard deviations from the mean may require further justification. *Id.* at 74.

The twelve *Johnson* factors are: (1) the time and labor required; (2) the novelty and difficulty of the question; (3) the skill requisite to perform the legal service; (4) **[*54]** the preclusion of other employment by the attorney due to the acceptance of the case; (5) the customary fee; (6) whether the fee is fixed or contingent; (7) time limitations imposed by the client or the circumstances; (8) the amount involved and the residuals obtained; (9) the experience, reputation, and ability of the attorneys; (10) the "undesirability" of the case; (11) the nature and length of professional relationship with the client; and (12) awards in similar cases. *Von Clark v. Butler, 916 F.2d 255, 258 n.3 (5th Cir. 1990)*.

The *Johnson* factors are intended to ensure "a reasonable fee." *488 F.2d at 720*. Because not all of the *Johnson* factors are always applicable, the Court will consider only the factors relevant to this case. *See In re Harrah's Entm't, Inc. Sec. Litig., No. 95-3925, 1998 U.S. Dist. LEXIS 18774, 1998 WL 832574, at *4 (E.D. La. Nov. 25 1998)* (citing *Uselton v. Commercial Lovelace Motor Freight, Inc., 9 F.3d 849, 854 (10th Cir. 1993))*.

Time and labor required

The Court finds that the amount of time and labor required in this case warrants an adjustment of the benchmark percentage. IPPs reached a settlement with Hayward only after completing fact discovery. IPPs' participation in fact discovery included participating in or attending the depositions of over eighty fact witnesses and reviewing approximately four million documents. IPPs also worked to secure an expert to support their proof of liability and damages. Moreover, they reached these settlements **[*55]** only after successfully defending against a motion to dismiss. The magnitude of the work required in connection with discovery, the motion to dismiss, negotiating the settlement, preliminary approval of the settlement, and the fairness hearing merits an increase in the benchmark percentage.

Novelty and difficulty of the question and skill required to perform the legal service

"An antitrust class action is arguably the most complex action to prosecute." *In re Linerboard Antitrust Litig., 296 F. Supp. 2d 568, 577 (E.D. Pa. 2003)*. Here, IPPs have had to analyze and argue, among other things, the difficult issue of indirect-purchaser standing under the laws of four different states. The Court does not doubt that handling this difficult case required considerable skill and experience. Given the inherent difficulty involved in antitrust class actions and the proof challenges presented by this case, as well as accounting for counsel's skill and expertise, the Court finds that an increase in the benchmark percentage is merited.

The customary fee

The Court has discussed, *supra*, the typical fees in antitrust cases involving comparable awards. Because the benchmark percentage is about average for cases of this kind, the Court finds that this factor does not warrant an adjustment. **[*56]**

Whether the fee is fixed or contingent

Consideration of this factor is designed to "demonstrat[e] the attorney's fee expectations when he accepted the case." *Johnson, 488 F.2d at 718*. This factor considers the financial risks a contingency fee arrangement places on counsel. *See In re Enron Corp. Sec. Derivative & ERISA Litig., 586 F. Supp. 2d 732, 791 (S.D. Tex. 2008)*. Class counsel undertook this case on a contingency basis and have thus far received no payment. But because the Court's benchmark is comparable to a reasonable contingency fee award, the Court finds that consideration of this factor does not justify an increase to the fee award.

Time limitations imposed by the client or the circumstances

Under this factor, the Court is to give a premium for "priority work that delays the lawyer's other legal work." *Johnson, 488 F.2d at 718*. The Court finds that no facts in this case suggest that this factor justifies an adjustment in the benchmark fee.

Amount involved and the results obtained

Counsel obtained a fair settlement for the plaintiff class. *See* Part II, *supra*. This is not a case in which the class receives only illusory benefits in the form of coupons or discounts. Instead, counsel has secured a cash settlement that allows class members to recover their alleged losses, thus mitigating some of the risk inherent in continuing with litigation against **[*57]** the remaining defendants.

Yet only a relatively small portion of the settlement funds will actually be distributed to class members, with charitable and educational organizations receiving the remaining funds in the form of *cy pres* distributions. Because the Court has already discounted the monetary value of the settlements to account for benefits actually delivered to the class, this factor is neutral.

The experience, reputation, and ability of the attorneys

The Court is satisfied that the experience and reputation of the attorneys involved are of the highest quality. But as the Court has accounted for counsel's experience and skill in the *Johnson* factor considering the skill necessary to litigate the case, a further increase in the percentage is not warranted.

Undesirability of the case

The Court finds that although this is not the type of unpopular case that might stigmatize the lawyer who takes it, *see Johnson, 488 F.2d at 719*, there are some aspects of this case that made it undesirable. The risk of nonrecovery, discussed *supra*, is significant. Further, the relatively small size of the individual claims made undertaking expensive litigation on a contingent fee an unattractive proposition. Class certification **[*58]** would change this dynamic, but, here, there remains a serious risk that a class will not be certified. Accordingly, the Court finds that the risks inherent in this case warrant an increase in the fee award.

The nature and length of the professional relationship

There is no evidence of any special or lengthy professional relationship between class counsel and the class members. The relationship did not antedate the litigation, nor will it likely continue beyond the closure of this case. The Court finds that consideration of this factor does not warrant an increase in the fee award.

In sum, three of the *Johnson* factors merit an increase in the fee award. The Court finds that these factors warrant an increase in the fee award to 30 percent. Applying 30 percent to the settlement fund's actual monetary value of $1,239,347.58 to the class, as determined in Part IV.B. *supra*, an appropriate attorney fee award is $371,804.27. Class Counsel's requested fee award is $346,666.67. Therefore, the Court easily concludes that Class Counsel's request is reasonable.

E. Expense Request

Class action counsel who create a common fund for the benefit of the class, are entitled to reimbursement of reasonable litigation expenses **[*59]** from that fund. *See In re Heartland Payment Sys., 851 F. Supp. 2d at 1089*. Here, the expenses incurred are reasonable. IPPs reached a settlement with Hayward and Zodiac only after completing fact discovery, including the depositions of over eighty fact witnesses, and the review of over four million documents. This sort of work requires not only attorney hours but also money--for discovery vendors, travel, copying, and so on. All of the expenses that Class Counsel seek from the fund fall within the categories pre-approved by Pretrial Order No. 9, and Mr. Garrett reviewed and approved all of them. Thus, the Court concludes that the expenses are reasonable and eligible for reimbursement.

F. Fairness to Class

Class Counsel have requested reasonable attorneys' fees and expenses. At the same time, a fair portion of the settlement must be reserved for the benefit of the class. All together, the fees and expenses requested by Class Counsel amount to one-third of the total settlement fund. They also project that settlement administration expenses will amount to approximately $210,000, which the Court considers beneficial to the class. This would leave $1,123,333.33 left for distribution to class members. The Court concludes that the one-third sum **[*60]** sought by Class Counsel strikes a fair balance between the attorneys' right to recover reasonable fees and expenses, and the class's right to the benefit of a fair portion of the settlement. Thus, the Court approves Class Counsel's request for $346,666.67 in fees and $320,000 for a litigation expenses reserve.

G. Apportionment of Fees

Class Counsel propose a method for allocating the requested award among the firms that have worked on the case. Class Counsel represent that all of the firms that have worked on the case are represented in and agree with the proposed allocation plan. In the Fifth Circuit, attorneys may apportion fees among themselves without substantial involvement by the Court, so long as counsel develop a plan agreeable to all attorneys involved. *See Longden v. Sunderman, 979 F.2d 1095, 1101 (5th Cir. 1992)* (citing *In re "Agent Orange" Prod. Liab. Litig., 818 F.2d 216, 223 (2d Cir. 1987))*; *see also Turner v. Murphy Oil USA, Inc., 472 F. Supp. 2d 830, 869-70 (E.D. La. 2007)*. Here, counsel are in agreement about the plan.

Counsel explains the proposed allocation plan in some detail in their motion. The Court has reviewed the plan. The plan sets out the number of hours spent by each firm, along with a description of the types of work done by each firm. All of these hours have been reported to Mr. Garrett, and he has agreed that they represent appropriate common benefit work. **[*61]** The plan also lists the amount of money each firm has fronted for expenses, either in the form of held costs or assessments. At the hearing, Class Counsel and Mr. Garrett confirmed that all of these expenses have already been vetted by Mr. Garrett and approved as appropriate common benefit expenses. Overall, the Court finds that the proposed allocation plan takes into account the work done and the expenses covered by each firm so far and arrives at a fair division of the requested award. Moreover, all of the firms are in agreement about the plan. Therefore, the Court approves the proposed allocation of common benefit attorneys' fees and expenses as set forth in IPPs' motion. The Court retains jurisdiction for the purposes of supervising the allocation.

V. Conclusion

For the foregoing reasons, the Court grants IPPs' Final Approval of the Settlements Between Indirect Purchaser Plaintiffs and Hayward Industries, Inc., and Between Indirect Purchaser Plaintiffs and Zodiac Pool Systems, Inc. The Court also orders that Class Counsel be awarded fees and expenses as set forth in this order.

New Orleans, Louisiana, this 27th day of July, 2015.
