Spex Techs., Inc, v. Kingston Tech. Corp.

United States District Court for the Central District of California

December 23, 2019, Decided; December 23, 2019, Filed

SACV 16-1790 JVS (AGRx)

Reporter
2019 U.S. Dist. LEXIS 228888 *; 2019 WL 8194714

Spex Technologies, Inc. v. Kingston Technology Corporation

Prior History: Spex Techs., Inc. v. Kingston Tech. Corp., 2019 U.S. Dist. LEXIS 229077 (C.D. Cal., Sept. 24, 2019)

Core Terms

patent, Counterclaim, patent misuse, allegations, invalid, settlement agreement, Sherman Act, sham, motion to dismiss, infringement, antitrust, unfair, patentee's, baseless, immunity

Counsel: **[*1]** Attorneys Present for Plaintiffs: Not Present.

Attorneys Present for Defendants: Not Present.

Judges: James V. Selna, United States District Judge.

Opinion by: James V. Selna

Opinion

CIVIL MINUTES - GENERAL

Proceedings: [IN CHAMBERS] Order Regarding Motion to Dismiss

Plaintiff and Counter-Defendant Spex Technologies, Inc. ("Spex") moved to dismiss Defendant and Counter-Claimant Kingston Technology Corporation's ("Kingston's") counterclaims and affirmative defenses. Mot., Dkt. No. 184. Kingston opposed. Opp'n, Dkt. No. 188. Spex replied. Reply, Dkt. No. 190. Kingston filed a notice of supplemental authority, attaching two cases. Notice, Dkt. No. 192; Exs. 1 and 2.

For the following reasons, the Court **GRANTS IN PART and DENIES IN PART** the motion.

I. BACKGROUND

This is a dispute over patents involving portable USB memory devices. On September 27, 2016, Spex brought a complaint alleging that Kingston has infringed two of its patents, U.S. Patent Nos. 6,088,802 (the "802 patent"), entitled "Peripheral Device With Integrated Security Functionality," and 6,003,135 (the "135 patent"), entitled "Modular Security Device." Complaint, Dkt. No. 1.

On December 7, 2016, Kingston filed an Answer. Dkt. No. 57.

On March 14, 2017, Kingston sought *inter partes* review of the '135 patent. Kingston Technology **[*2]** Company, Inc. v. SPEX Technologies, Inc., Case IPR2017-01021 ("Kingston '135 IPR"). The Patent Trial and Appeal Board (PTAB) issued a Final Written Decision upholding the patentability of claims 55 and 57 of the '135 patent. Id., Paper No. 39 at 58-59.

On May 16, 2018, this Court stayed the case in light of the PTAB's decision to institute *inter partes* review proceedings to review Spex's patents. Dkt. No. 157; see Western Digital Corporation v. SPEX Technologies, Inc., IPR2018-00086 (the "Western Digital '135 IPR") (filed October 16, 2017). In its institution decision, the PTAB made a preliminary finding that the Petition established a reasonable likelihood that claims 55 and 57 were invalid over Harari and Anderson. Id., Paper No. 14.

Kingston sought to challenge the '135 patent by joining the Western Digital '135 IPR (Kingston Technology Company, Inc. v. SPEX Technologies, Inc., IPR2018-01002, Paper No. 12 at 2) but the PTAB dismissed its petition as estopped under *35 U.S.C. § 315*, in light of the prior Final Written Decision against Kingston in the Kingston '135 IPR and Kingston's knowledge of the Harari, Anderson, and Dumas references at the time of filing its earlier petition. Id. at 8-9

On January 11, 2019, Spex entered into **[*3]** a settlement agreement with the PTAB petitioners (Western Digital, Toshiba, and Apricorn) where Spex would cease pursuing its infringement allegations against them concerning the '135 patent in return for them requesting that the *inter partes* review be terminated. Dkt. No. 172-2, Appendix B.

On April 18, 2019, the PTAB found that claims 38 and 39 of the '802 patent were unpatentable as obvious over two prior art references: U.S. Patent No. 5,887,145 to Harari ("Harari") and a book describing the architecture for PCMCIA in various combination with Don Anderson, PCMCIA System Architecture 16-Bit PC Cards, Second Edition, 1995 ("Anderson"). See Final Written Decision, Paper 40, Western Digital Corp. et al. v. SPEX Technologies, Inc., IPR2018-00082 (the "Western Digital '802 IPR").

At the scheduling conference on August 1, 2019, the Court lifted the stay and set March 16, 2020 as the law and motion cut off, February 3, 2020, as the cut off for expert discovery and discovery, and set the jury trial for April 28, 2020. Dkt. No. 168.

On August 1, 2019, Kingston filed a motion seeking leave to amend its answer to add an affirmative defense of patent misuse and counterclaims involving alleged antitrust violations. Dkt. No. 172-3, Ex. B. The **[*4]** Court granted the motion on September 24, 2019. Order, Dkt. No. 177. Kingston filed its Amended Answer on September 25, 2019. Dkt. No. 178.

Now, Spex argues that Kingston's Counterclaims for (1) Violation of *§ 1* of the Sherman Act; (2) Violation of the Cartwright Act; (3) Declaratory Judgment of Patent Misuse; and (4) Violation of *§ 17200 of the California Business and Professions Code*, as well as its Affirmative Defense of Patent Misuse, fail to state a claim upon which relief can be granted. See generally, Mot., Dkt. No. 184.

II. LEGAL STANDARD

Under *Rule 12(b)(6)*, a defendant may move to dismiss for failure to state a claim upon which relief can be granted. A plaintiff must state "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim has "facial plausibility" if the plaintiff pleads facts that "allow[] the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

In resolving a *12(b)(6)* motion under Twombly, the Court must follow a two-pronged approach. First, the Court must accept all well-pleaded factual allegations as true, but "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Iqbal, 556 U.S. at 678*. Nor must the Court "'accept as true **[*5]** a legal conclusion couched as a factual allegation.'" *Id. at 678-80* (quoting *Twombly, 550 U.S. at 555*). Second, assuming the veracity of well-pleaded factual allegations, the Court must "determine whether they plausibly give rise to an entitlement to relief." *Id. at 679*. This determination is context-specific, requiring the Court to draw on its experience and common sense, but there is no plausibility "where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct." Id.

III. Discussion

A. Sherman Act

To state a claim under *Section 1* of the Sherman Act, *15 U.S.C. § 1*, a plaintiff must plead facts which, if true, will prove: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition. *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)*.

Spex argues that this Counterclaim should be dismissed because (1) Kingston cannot show that SPEX's assertion of the '135 patent is objectively meritless and (2) Kingston has failed to show the required anticompetitive contract because it has failed to show the existence of a "reverse-payment" settlement agreement and that the settlement **[*6]** agreement will harm competition. Mot. at 9.

The Noerr-Pennington doctrine provides absolute immunity for statutory liability for conduct when petitioning the government for redress. *Sosa v. DIRECTV, Inc., 437 F.3d 923, 929 (9th Cir. 2006)*. The Ninth Circuit has recognized an exception to the Noerr-Pennington doctrine, however. Noerr-Pennington immunity does not apply to conduct that, although "ostensibly directed toward influencing governmental action, is a mere sham to cover what is actually nothing more than an attempt to interfere" with the defendant's business practices. *Sosa, 437 F.3d at 938* (citation omitted). As a result, "'[s]ham' petitions don't fall within the protection of the doctrine." *Freeman v. Lasky, Haas & Cohler, 410 F.3d 1180, 1183-84 (9th Cir. 2005)*.

Determining whether litigation is a sham is a two-part test: "First, the lawsuit must be *objectively baseless* in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under Noerr, and an antitrust claim premised on the sham exception must fail." *Professional Real Estate Investors v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* (emphasis added). "Only if the challenged litigation is objectively meritless may a court [proceed to the second part of the test and] examine the litigant's **[*7]** subjective motivation." *Id. at 60*. "[T]he court should focus on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor." Id. (internal citation and quotation marks removed). However, "[t]his two-tiered process requires the plaintiff to disprove the challenged lawsuit's legal viability before the court will entertain evidence of the suit's economic viability." *Id. at 61*. "[N]either Noerr immunity nor its sham exception turns on subjective intent alone." *Id. at 59*.

In the patent context, "a sham suit must be both subjectively brought in bad faith and based on a theory of either infringement or invalidity that is objectively baseless." *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1072 (Fed. Cir. 1998)*. "[I]f a suit is not objectively baseless, an antitrust defendant's subjective motivation is immaterial. . . . It is the bringing of the lawsuit that is subjectively and objectively baseless that must be proved." Id. Citing this language, Spex contends that because Kingston "pleads only subjective invalidity," its Counterclaim fails to state a claim. Mot. at 12. Spex notes that in Kingston's briefing regarding the earlier Motion for Leave to Amend, Kingston stated that "[wa]s not affirmatively seeking to prove that claims **[*8]** 55 and 57 are invalid over Harari and Anderson." Dkt. No. 175 at 8. Kingston also explained that "this case does not turn on whether the claims are actually invalid. Rather, the case turns on SPEX's knowledge and actions." Id. at 9.

Kingston argues that Noerr-Pennington does not apply to non-petitioning activity, such as entering into a private settlement agreement: "SPEX cites no case and indeed makes no argument explaining how entering into an illegal and anti-competitive contract to end litigation constitutes petitioning activity." Opp'n at 10. Kingston's Counterclaim alleges that Spex violated the Sherman Act when it settled with Western Digital, Toshiba, and Apricorn. See Amended Answer ¶ 36. But Kingston further alleges that Spex settled "so that it may *continue to assert these known-invalid claims* against Kingston and other companies in the industry." Id. (emphasis added); see also ¶¶ 31, 37, 45, 52.

The Court finds that the Noerr-Pennington doctrine may be applicable here; Kingston's allegations depend not just on Spex's settlement agreements but how Spex then used those settlement agreements to maintain its claims against Kingston, which qualifies as petitioning activity. However, the **[*9]** Court believes that Kingston has sufficiently alleged that the sham litigation exception to the doctrine may apply: in its Amended Answer, it alleges that "SPEX's belief that these claims are invalid is *objectively* reasonable" (Amended Answer ¶ 29, emphasis added) and "SPEX has engaged in patent misuses by, inter alia, maintaining its allegations of infringement of claims 55 and 57 of the '135 patent, knowing these claims to be invalid." Id. ¶ 49. The Court concludes that Noerr-Pennington immunity itself does not require dismissal of the Sherman Act claim.

However, the Court finds that dismissal of Kingston's Sherman Act claim is appropriate on a separate ground, even if Kingston adequately alleged that the sham litigation exception applies. The basis for Kingston's Sherman Act claim is an allegation that Spex's settlement agreement with Western Digital, Toshiba, and Apricorn was an illegal "reverse payment settlement," as discussed in the Supreme Court's decision *F.T.C. v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. See Amended Answer ¶ 38.[1]

Spex claims that the Actavis decision does not apply because it was "limited solely to Hatch-Waxman pharmaceutical patent disputes. Mot. at 17; see *Actavis, 570 U.S. at 141* ("Apparently most if not all reverse payment settlement agreements **[*10]** arise in the context of pharmaceutical drug regulation, and specifically in the context of suits brought under statutory provisions allowing a generic drug manufacturer (seeking speedy marketing approval) to challenge the validity of a patent owned by an already-approved brand-name drug owner."). The Federal Circuit seems to have agreed with Spex's position, explaining that "[w]hile Actavis stated that settlements do not, as a blanket rule, always fall under Noerr-Pennington, *133 S.Ct. at 2230-31*, it limited its holding to particular types of settlement agreements in the context of the Hatch-Waxman drug-regulatory framework, see *id. at 2230*, a situation entirely separate from the settlement discussions unsuccessfully attempted in this case." *Industrial Models, Inc. v. SNF, Inc., 716 Fed. Appx. 949, 957 (Fed. Cir. 2017)*.[2]

The Court is not convinced that it can find that Actavis was definitively limited to the Hatch-Waxman context. But the Court finds that Kingston still fails to state a claim for a violation of the Sherman Act, based on its allegations that Spex engaged in an illegal reverse-settlement. Kingston has not alleged that Western Digital, Toshiba, and Apricorn received "payment in return for *staying out of the market*." See Amended Answer ¶¶ 30-33; *Actavis, 570 U.S. at 154* (emphasis added). **[*11]** As Spex notes, the settlement agreements allow Western Digital, Toshiba, and Apricorn to continue to sell their products, so the "adverse effects on competition" that Actavis expressed concern about are simply not present here. Mot. at 19; Reply at 12; *Actavis, 570 U.S. at 153*.

Moreover, Kingston has not adequately alleged that a "large and *unjustified*" payment was exchanged between the settling parties. *Id. at 158* (emphasis added); see Amended Answer ¶ 30.[3] The Court does not believe that Kingston

---

[1] Kingston alleges that Spex "got nothing of value other than the ability to extract licensing fees from Kingston and other companies for claims it knew were invalid."

[2] In its Notice of Supplemental Authority, Kingston directed the Court's attention to the Opinion of the Federal Trade Commission in In re: 1-800 Contract, Inc., FTC No. 9372, Slip Op. at 12-16 (FTC Nov. 7, 2018) to argue that Actavis applies outside of the Hatch-Waxman context. Spex should come prepared to discuss this case at the hearing.

[3] Kingston alleges Spex valued these licenses at over $10 million, and gave them to avoid an adjudication resulting in its claims being found invalid. See Amended Answer ¶ 3.

has adequately alleged that the value of the licenses Spex granted to Western Digital, Toshiba, and Apricorn count as reverse-payments. See *Actavis, 570 U.S. at 156* ("Where a reverse payment reflects *traditional settlement considerations*, such as avoided litigation costs or fair value for services, there is not the same concern that a patentee is using its monopoly profits to avoid the risk of patent invalidation or a finding of noninfringement.").

Accordingly, the Court grants Spex's motion to dismiss Kingston's Sherman Act Counterclaim.

B. Cartwright Act

The Cartwright Act prohibits trusts, which the statute defines as "combination[s] of capital, skill or acts by two or more persons" including "[t]o create or carry out restrictions in trade or **[*12]** commerce." *Cal. Bus. & Prof. Code § 16720*. "Cases decided under the Sherman Act are applicable to interpreting the Cartwright Act" because "the analysis under California's ***antitrust law*** mirrors the analysis under federal law." *Stanislaus Food Prod. Co. v. USS-POSCO Indus., 782 F. Supp. 2d 1059, 1079 (E.D. Cal. 2011)*.

This Court believes that the reasoning supporting its dismissal of Kingston's Sherman Act claim Counterclaim is applicable to this claim, as well. Accordingly, the Court grants Spex's motion to dismiss Kingston's Cartwright Act Counterclaim.

C. Patent Misuse

"The defense of patent misuse arises from the equitable doctrine of unclean hands, and relates generally to the use of patent rights to obtain or coerce an unfair commercial advantage." *Mallinckrodt Inc. v. Medipart, Inc., 976 F.2d 700, 703-704 (Fed. Cir. 1992)*. "Patent misuse relates primarily to a patentee's action that affect competition in unpatented goods or that otherwise extend economic effect beyond the scope of the patent grant." Id. Patent misuse requires "that the alleged infringer show that the patentee has impermissibly broadened the 'physical or temporal' scope of the patent grant with anticompetitive effect." *Windsurfing Int'l. Inc. C. AMF, Inc., 782 F.2d 995, 1001 (Fed. Cir. 1986)* (citation omitted). "If . . . the practice has the effect of extending the patentee's statutory rights and does so with an anti-competitive effect, that practice must then be analyzed in **[*13]** accordance with the 'rule of reason.' *Virginia Panel Corp. v. MAC Panel Co., 133 F.3d 860, 869 (Fed. Cir. 1997)*. "Under the rule of reason, the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." Id. (internal quotation marks and citations omitted).

"Patent misuse is viewed as a broader wrong than antitrust violation because of the economic power that may be derived from the patentee's right to exclude." *C.R. Bard v. M3 Systems, 157 F.3d 1340, 1372 (Fed Cir. 1998)*. Accordingly, "misuse may arise when the conditions of antitrust violation are not met." Id.

Spex notes that in C.R. Bard, the Federal Circuit reversed a jury verdict of patent misuse, reasoning that "[t]t is not patent misuse to bring suit to enforce patent rights not fraudulently obtained . . ." and that "[t]he conduct to which the jury instruction on misuse generally refers, that is 'wrongful' enforcement of patents, is activity protected under Noerr." *Id. at 1373*. Kingston alleges that Spex has engaged in patent misuse by "maintaining its allegations of infringement of claims 55 and **[*14]** 57 of the '135 patent, knowing these claims to be invalid." Amended Answer ¶ 49. Spex argues that an allegation based on mere knowledge of invalidity is insufficient to state this claim. Mot. at 23-24. But, as this Court has previously found, Kingston does more than simply assert that Spex had subjective knowledge of invalidity. Opp'n at 21. Accordingly, the Court denies dismissal of Kingston's Counterclaim and Affirmative Defense of Patent Misuse.

D. California Unfair Practices Law

California Business and Professions Code § 17200, California's unfair competition law, prohibits "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising and any act prohibited by" *California Business and Professions Code § § 17500 to 17594*. See *Cal. Bus. & Prof. Code § 17200*. Under the statute, there are types of unfair competition: practices which are unlawful, unfair, or fraudulent. *In re Tobacco Cases II, 207 P.3d 20, 29 (Cal. 2009)*. "The section was intentionally framed in . . . broad, sweeping language" in order to allow courts "to enjoin on-going wrongful business conduct in whatever context such activity might occur." *Cel-Tech Commc'ns, Inc., et al. v. L.A. Cellular Tel. Co., 973 P.2d 527, 540 (Cal. 1999)*.

The Court has found that Kingston sufficiently pled facts to support its Patent Misuse Counterclaim. Because this Counterclaim is supported by the same facts as that cause of action (Amended Answer ¶ 52), the Court denies **[*15]** Spex's motion to dismiss Kingston's *§ 17200* Counterclaim.

IV. CONCLUSION

For the foregoing reasons, the Court **GRANTS IN PART and DENIES IN PART** the motion.

IT IS SO ORDERED.

Civil Procedure > Judgments > Preclusion of Judgments

HN1[] **Judgments, Preclusion of Judgments**

When a case involves both legal and equitable claims or issues, the trial court may decide the equitable issues first, and this decision may result in factual and legal findings that effectively dispose of the legal claims.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN2[] **Trade Practices & Unfair Competition, State Regulation**

The Unfair Competition Law (UCL), *Bus. & Prof. Code, § 17200 et seq.*, prohibits unfair competition, which includes any unlawful, unfair or fraudulent business act or practice. *Bus. & Prof. Code, § 17200*. The UCL's 's unlawful prong borrows violations of other laws and makes those unlawful practices actionable under the UCL. Virtually any law or regulation—federal or state, statutory or common law—can serve as a predicate for an unlawful prong violation. A UCL claim brought by a private plaintiff is an equitable cause of action, even when it is based on an underlying violation that is legal in nature.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

Civil Procedure > Appeals > Remands

HN3[] **Preclusion of Judgments, Law of the Case**

A reviewing court has authority to affirm, reverse, or modify any judgment or order appealed from, and may direct the proper judgment or order to be entered, or direct a new trial or further proceedings to be had. *Code Civ. Proc., § 43*. The order of the reviewing court is contained in its remittitur, which defines the scope of the jurisdiction of the court to which the matter is returned. The trial court is empowered to act only in accordance with the direction of the reviewing court; action which does not conform to those directions is void. In addition to following the appellate court's remittitur, a trial court on remand must comply with the law of the case. The doctrine of law of the case deals with the effect of the first appellate decision on the subsequent retrial or appeal: The decision of an appellate court, stating a rule of law necessary to the decision of the case, conclusively establishes that rule and makes it determinative of the rights of the same parties in any subsequent retrial or appeal in the same case.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Appeals > Remands

HN4[] **Standards of Review, De Novo Review**

Whether the trial court correctly interpreted the reviewing court's opinion on remand is an issue of law subject to de novo review. The court looks to the wording of the court's directions to determine whether the trial court's order comports with them. When the reviewing court remands the matter for further proceedings, its directions must be read in conjunction with the opinion as a whole.

Civil Procedure > Appeals > Remands

HN5[] **Appeals, Remands**

The fact that the court of appeal reverses in part for lack of an enforceable jury waiver does not mean the plaintiffs are necessarily entitled to a jury trial on their remaining legal claims. On remand, the defendants may submit to the trial court any *Code Civ. Proc., § 437c* motion or other form of dispositive motion they may wish to file.

Civil Procedure > Appeals > Remands

HN6[] **Appeals, Remands**

The appellate court may limit or define the issues to be addressed on remand.

Civil Procedure > Judgments > Preclusion of Judgments

Evidence > Judicial Notice > Adjudicative Facts

HN7[] **Judgments, Preclusion of Judgments**

It is proper for a court to take judicial notice of factual findings in determining whether those findings have preclusive effect.

Civil Procedure > Judgments > Preclusion of Judgments

Evidence > Judicial Notice > Adjudicative Facts

HN8[] **Judgments, Preclusion of Judgments**

The doctrines of res judicata and collateral estoppel will, when they apply, serve to bar relitigation of a factual dispute even in those instances where the factual dispute was erroneously decided in favor of a party who did not testify truthfully. In other words, even though a factual finding in a prior judicial decision may not establish the truth of that fact for purposes of judicial notice, the finding itself may be a proper subject of judicial notice if it has a res judicata or collateral estoppel effect in a subsequent action.

Headnotes/Summary

Summary
[*988] CALIFORNIA OFFICIAL REPORTS SUMMARY

After a bench trial in a commercial real estate dispute, the trial court entered judgment for defendants on all claims, some legal and some equitable. The Court of Appeal reversed and remanded as to the legal claims, holding that plaintiffs' demand for a jury trial as to those claims should not have been stricken. A second trial judge granted summary judgment for defendants, concluding that the findings of the first judge pertaining to the equitable claims were binding and were dispositive of plaintiffs' legal claims. (Superior Court of the City and County of San Francisco, No. CGC10496887, Harold E. Kahn, Judge.)

The Court of Appeal affirmed the judgment. On remand, the second judge properly found that the first judge's findings left nothing to submit to a jury. The first judge's ruling on all three prongs of plaintiffs' equitable claim under the unfair competition law disposed of the underlying legal claims because the findings addressed whether each of the legal claims had merit and expressly ruled that none of them did. The second judge did not disregard in its prior opinion the remittitur or the law of the case. The fact that the Court of Appeal in its prior opinion reversed in part for lack of an enforceable jury waiver did not mean that plaintiffs were necessarily entitled to a jury trial on their remaining legal claims. Plaintiffs were not entitled to relitigate the issues resolved by the first judge, and the second judge could properly take judicial notice of the findings of the first judge, in order to determine their preclusive effect. (Opinion by Streeter, J., with Pollak, P. J., and Tucher, J., concurring.)

CALIFORNIA OFFICIAL REPORTS HEADNOTES

CA(1)[] **(1)**

Trial § 2—Legal and Equitable Claims.

When a case involves both legal and equitable claims or issues, the trial court may decide the equitable issues first, and this decision may result in factual and legal findings that effectively dispose of the legal claims.

CA(2)[] **(2)**

Unfair Competition § 2—Legal and Equitable Claims.

The unfair competition law (UCL) (*Bus. & Prof. Code, § 17200 et seq.*) prohibits unfair competition, which includes any unlawful, unfair or fraudulent business act or practice (*Bus. & Prof. Code, § 17200*). The UCL's unlawful prong borrows violations of other laws and makes those unlawful practices actionable under the UCL. Virtually any law or regulation—federal or state, statutory or common law—can serve as a predicate for an unlawful prong violation. A UCL claim brought by a private plaintiff is an equitable cause of action, even when it is based on an underlying violation that is legal in nature.

CA(3)[] **(3)**

Unfair Competition § 2—Legal and Equitable Claims—Effect of Ruling.

In an action arising from a commercial real estate transaction, the trial judge’s ruling on all three prongs of plaintiffs’ equitable claim under the unfair competition law (*Bus. & Prof. Code, § 17200 et seq.*) addressed whether each of the underlying legal claims had merit and expressly ruled that none of them did. After the reviewing court held that it was error to strike plaintiffs' jury demand as to the legal claims, a second trial court judge correctly ruled that the first judge's determinations disposed of plaintiffs' legal claims. There was nothing left to be submitted to a jury.

[Cal. Forms of Pleading and Practice (2019) ch. 322, Juries and Jury Selection, § 322.18; 7 Witkin, Cal. Procedure (5th ed. 2008) Trial, § 149; 9 Witkin, Cal. Procedure (5th ed. 2008) Appeal, § 890.]

CA(4)[] **(4)**

Jury § 7—Right to Jury Trial and Waiver—Judicial Review—Remand.

The fact that the Court of Appeal in its prior opinion reversed in part for lack of an enforceable jury waiver did not mean the plaintiffs were necessarily entitled to a jury trial on their remaining legal claims. On remand after issuance of the Court of Appeal's prior opinion and based on language in that opinion, the defendants could submit to the trial court any *Code Civ. Proc., § 437c* motion or other form of dispositive motion they may wish to file.

CA(5)[] **(5)**

Judgments § 67—Res Judicata—Collateral Estoppel—Judicial Notice.

The doctrines of res judicata and collateral estoppel will, when they apply, serve to bar relitigation of a factual dispute even in those instances where the factual dispute was erroneously decided in favor of a party who did not testify truthfully. In other words, even though a factual **[*990]** finding in a prior judicial decision may not establish the truth of that fact for purposes of judicial notice, the finding itself may be a proper subject of judicial notice if it has a res judicata or collateral estoppel effect in a subsequent action.

Judges: Opinion by Streeter, J., with Pollak, P. J., and Tucher, J., concurring.

Opinion by: Streeter, J.

Opinion

[117]** **STREETER, J.**—After a bench trial in this commercial real estate dispute, the trial court (Hon. Marla Miller) entered judgment for defendants on all claims, some legal and some **[**118]** equitable.[1] Plaintiffs appealed the judgment, and we reversed as to the legal claims (holding plaintiffs' demand for a jury trial as to those claims should not have been stricken), affirmed as to the equitable claims, and remanded for further proceedings. (*Rincon I, supra, 8 Cal.App.5th at pp. 5, 22*.) On remand, the trial court (Hon. Harold Kahn) granted summary judgment for defendants, concluding Judge Miller's findings pertaining to the equitable claims were binding and were dispositive of plaintiffs' legal claims.

Plaintiffs appeal the ensuing judgment, contending that, on remand after *Rincon I*, they were entitled to a jury trial on their legal claims. Specifically, plaintiffs argue that **[***2]** (1) after this court's partial reversal in *Rincon I*, they were entitled to litigate anew all factual issues relevant to the legal claims, even if the same issues were determined by Judge Miller in connection with her resolution of the equitable claims, (2) by granting defendants' summary **[*991]** judgment motion, Judge Kahn violated this court's remittitur in *Rincon I* and the law of the case, (3) under the statutes governing judicial notice and summary judgment procedure, Judge Kahn, in ruling on defendants' motion, could not consider the "truth" of the facts found by Judge Miller, and (4) even if Judge Miller's findings were properly considered on remand and had binding effect, those findings do not dispose of plaintiffs' legal claims. We reject plaintiffs' arguments and will affirm the judgment.

I. BACKGROUND

"[Plaintiffs] borrowed $110 million in 2007 from Bear Stearns Commercial Mortgage, Inc. (Bear Stearns) to finance the purchase of Rincon Towers, a San Francisco apartment complex (the Property). In 2010, after plaintiffs failed to repay the loan and after changes in the ownership of the loan, defendant CP III Rincon Towers, Inc. (CP III) purchased the Property at a nonjudicial foreclosure **[***3]** sale. Plaintiffs sued CP III and seven other entities who were involved in administering the loan, unsuccessful workout negotiations, and the eventual foreclosure sale, alleging various causes of action, some legal (breach of contract, fraud, slander of title, trade secret misappropriation), and some equitable (unfair competition, to set aside the foreclosure sale, and for an accounting)." (*Rincon I, supra, 8 Cal.App.5th at p. 5*.)

Specifically, plaintiffs' fifth amended complaint, the operative complaint at trial, asserted the following causes of action: (1) breach of a loan agreement (Loan Agreement) entered at the time of the loan (the Loan) in June 2007, (2) breach of a cash management agreement (Cash Management Agreement) entered into by plaintiffs and Bear Stearns concurrently with the Loan Agreement, (3) breach of a March 2009 prenegotiation agreement entered **[**119]** into by plaintiffs and the Maiden Lane Trust (an entity that became the lender after Bear Stearns's 2008 collapse) in connection with negotiations about a possible modification of the Loan, (4) fraud, (5) to set aside the foreclosure, (6) unfair competition (*Bus. & Prof. Code, § 17200 et seq.*) (the unfair competition law (UCL)), (7)

---

[1] The background of the parties' dispute and the resulting litigation (some of which we discuss further below) is set forth in this court's opinion addressing an earlier appeal in this matter. (*Rincon EV Realty LLC v. CP III Rincon Towers, Inc. (2017) 8 Cal.App.5th 1, 5–7 [213 Cal. Rptr. 3d 410]* (*Rincon I*).) The plaintiffs are Rincon EV Realty LLC, Rincon ET Realty LLC and Rincon Residential Towers LLC. (*Id. at p. 5*.) The defendants are (1) CP III Rincon Towers, Inc. (CP III), (2) other "Carmel Partners" entities (Carmel Partners, Inc.; Carmel Partners, LLC; Carmel Management, LLC; and Carmel Partners Investment Fund III, L.P.), (3) U.S. Bank National Association (USB) as trustee for the Maiden Lane Commercial Mortgage-Backed Securities Trust 2008-1 (the Maiden Lane Trust), (4) the Maiden Lane Trust, and (5) Maiden Lane LLC. (*Id. at pp. 6–7*.)

slander of title, (8) violation of the **[***4]** *Uniform Trade Secrets Act (UTSA) (Civ. Code, § 3426 et seq.)*, and (9) accounting. (*Rincon I, supra, 8 Cal.App.5th at p. 7*.) In their UCL cause of action, plaintiffs alleged in part that the conduct supporting several of their other causes of action (including defendants' alleged breaches of contract, fraud, slander of title and violation of the UTSA) also violated the UCL.

Plaintiffs sought a jury trial as to six of these claims—the three breach of contract claims, as well as the claims for fraud, slander of title and violation of the UTSA (the legal claims). (*Rincon I, supra, 8 Cal.App.5th at p. 9*.) As to their other three claims—to set aside the foreclosure, for unfair competition, and for an accounting (the equitable claims)—plaintiffs did not seek a **[*992]** jury trial and agreed those claims were "'equitable in nature.'" (*Ibid.*) In response to a motion by defendants, Judge Miller struck plaintiffs' jury demand based on jury waiver provisions in the three contracts at issue, the Loan Agreement, the Cash Management Agreement and the prenegotiation agreement. (*Ibid.*) According to the register of actions that is included in the appellate record, Judge Miller also denied or took off calendar two motions by defendants to bifurcate or sever certain issues to be tried separately (the second time on the ground that **[***5]** bifurcation was moot in light of the order striking the jury demand).

Judge Miller held a bench trial, issued a detailed statement of decision rejecting all of plaintiffs' claims, and entered judgment for defendants. (*Rincon I, supra, 8 Cal.App.5th at pp. 5, 10*.) Plaintiffs appealed. (*Id. at p. 5*.)

In *Rincon I*, we concluded Judge Miller erred by striking plaintiffs' jury demand as to the legal claims, and we therefore reversed the judgment as to those claims. (*Rincon I, supra, 8 Cal.App.5th at pp. 5, 10, 18, 21–22*.) We concluded, however, there was no error as to the equitable claims, and we affirmed the judgment as to those claims. (*Id. at pp. 5, 18–19, 22*.) We remanded for further proceedings as to the legal claims. (*Id. at pp. 5, 22*.)

On remand, defendants filed a motion for summary judgment, contending in part that the findings Judge Miller made in connection with her resolution of plaintiffs' equitable claims were "binding on, and dispositive of, plaintiffs' remaining legal claims." After a hearing, Judge Kahn granted the motion, concluding Judge Miller's findings in connection with plaintiffs' equitable claim for unfair competition (the UCL claim) necessarily resolved plaintiffs' legal claims. In reaching this conclusion, Judge Kahn relied on the principle that, in a case involving both legal and equitable claims, findings **[***6]** made in connection with one set of claims are binding in a subsequent disposition of the other set of claims.[2] (E.g., *Hoopes v. Dolan (2008) 168 Cal.App.4th 146, 156–157 [85 Cal. Rptr. 3d 337]* (*Hoopes*).) **[**120]**

In his written ruling, Judge Kahn stated in part: "Both the fifth amended complaint and plaintiffs' post-trial brief … make clear, and plaintiffs do not dispute, that all of the substantive law allegations of their six legal claims are also alleged as grounds that defendants violated the UCL. [Citations.] Because the alleged substantive law violations of the six legal claims were subsumed within the UCL claim, Judge Miller's findings resolving the entirety of the UCL claim in favor of defendants necessarily also resolved all **[*993]** six of plaintiffs' legal claims in favor of defendants, and a plain reading of [Judge Miller's] Statement of Decision shows that this is what happened. [Citation.] Among other things, as part of her ruling on the UCL claim, Judge Miller found that defendants did not breach any of the three contracts that they were alleged to have breached, did not commit any fraudulent conduct against the plaintiffs, did not slander plaintiffs' title to the property and did not misappropriate any of plaintiffs' asserted trade secrets."

Judge Kahn entered **[***7]** judgment for defendants, and plaintiffs appealed.

II. DISCUSSION

A. *When an Action Involves Both Legal and Equitable Claims, Findings Pertaining to One Set of Claims Are Binding in the Subsequent Resolution of the Other Set of Claims*

---

[2] In their summary judgment motion, defendants also argued judgment in their favor was appropriate on the alternative ground of collateral estoppel. Judge Kahn did not reach that argument. Because we affirm on the ground addressed by Judge Kahn, we need not address defendants' argument that collateral estoppel provides an alternative basis for affirmance.

CA(1)[] **(1)** As we noted in *Rincon I*, "[w]hile a litigant in a civil action generally has a constitutional right to jury trial on 'legal' causes of action, there is no such right with respect to 'equitable' causes of action [citation], or 'equitable' remedies [citation]." (*Rincon I, supra, 8 Cal.App.5th at p. 19*.) For that reason, we held that, although it was error to strike plaintiffs' jury demand as to their legal claims, Judge Miller did not err in deciding the equitable claims. (*Id. at pp. 18–19*.) ***HN1***[] We also noted that, under established California precedent, when a case involves both legal and equitable claims or issues, the trial court ""may decide the equitable issues first, and this decision may result in factual and legal findings that effectively dispose of the legal claims."" [3] (*Rincon I, supra, 8 Cal.App.5th at p. 19*; accord, e.g., *Raedeke v. Gibraltar Sav. & Loan Assn. (1974) 10 Cal.3d 665, 671 [111 Cal.Rptr. 693, 517 P.2d 1157]* (*Raedeke*); *Alcoa, supra, 12 Cal.App.5th at p. 355*; see *Hoopes, supra, 168 Cal.App.4th at p. 158* ["The rule minimizes inconsistencies, and avoids giving one side two bites of the apple. [Citation.] The rule also prevents duplication of effort."].)

Judge Kahn concluded that this was in effect what **[***8]** happened here, i.e., the equitable claims were decided first, when Judge Miller addressed them in her statement of decision. On remand after our decision in *Rincon I*, with only the legal claims remaining for resolution, Judge Kahn noted **[**121]** that "[t]he **[*994]** present posture of this case is analogous to a bifurcated trial." He therefore applied the preclusion principle noted above and concluded the findings Judge Miller made when resolving the equitable claims also disposed of the legal claims.

On appeal, plaintiffs acknowledge the general applicability of the preclusion rule invoked by Judge Kahn. Plaintiffs state in their opening appellate brief that, "[a]bsent exceptional circumstances, factual findings by the factfinder in the first phase of the trial (either the judge or jury) are binding on the factfinder in the second phase. [Citations.] This may mean that findings from the first phase of trial obviate the need for the second phase." As noted, however, plaintiffs argue that, for several reasons, this rule should not apply here, or, if it does apply, it does not entitle defendants to judgment. We initially address (in pt. II.B. below) the parties' arguments as to whether Judge Miller's findings **[***9]** pertaining to the equitable claims (assuming they are binding) are dispositive of plaintiffs' legal claims. We then address (in pts. II.C.–II.E. below) plaintiffs' contention that, in the circumstances of this case, the usual preclusion rule applied by Judge Kahn should not apply and Judge Miller's findings pertaining to the equitable claims should not be given binding effect.

B. *Judge Miller's Findings Pertaining to the Equitable Claims Are Dispositive of the Legal Claims*

CA(2)[] **(2)** Judge Kahn correctly determined that Judge Miller's findings in connection with plaintiffs' equitable UCL claim disposed of plaintiffs' six legal claims. ***HN2***[] The UCL prohibits "unfair competition," which includes "any unlawful, unfair or fraudulent business act or practice." (*Bus. & Prof. Code, § 17200*.) "The UCL's 'unlawful' prong 'borrows violations of other laws … and makes those unlawful practices actionable under the UCL.' [Citation.] '"[V]irtually any law or regulation—federal or state, statutory or common law—can serve as [a] predicate for [an] … 'unlawful' [prong] violation."'" (*Candelore v. Tinder, Inc. (2018) 19 Cal.App.5th 1138, 1155 [228 Cal. Rptr. 3d 336]*.) A UCL claim brought by a private plaintiff is an equitable cause of action, even when it is based on an underlying violation that is legal in nature.[4] **[***10]** (*Hodge v. Superior Court (2006) 145 Cal.App.4th 278, 284 [51 Cal. Rptr. 3d 519]*.)

In their UCL cause of action, plaintiffs invoked all three prongs of the UCL, alleging defendants' conduct was unlawful, unfair, and fraudulent. As **[*995]** to the unlawful prong, plaintiffs incorporated their other claims, including

[3] California courts have stated the "'better practice' is for 'the trial court [to] determine the equitable issues before submitting the legal ones to the jury'" (*Hoopes, supra, 168 Cal.App.4th at p. 157*) and have referred to this approach as the ""equity first" rule'" (*Orange County Water Dist. v. Alcoa Global Fasteners, Inc. (2017) 12 Cal.App.5th 252, 355 [219 Cal. Rptr. 3d 474]* (*Alcoa*)). But the same preclusion principle applies when the legal claims are decided first by a jury, i.e., the jury's findings are binding in the trial court's subsequent disposition of the equitable claims. (*Hoopes, supra, at p. 157*.)

[4] The situation is different when the government brings a UCL claim for civil penalties, historically a legal claim as to which there is a right to a jury trial. (*Nationwide Biweekly Administration, Inc. v. Superior Court (2018) 24 Cal.App.5th 438, 454–455 [234 Cal. Rptr. 3d 468]*, review granted Sept. 19, 2018, S250047.)

all six of their legal claims, contending defendants' acts and practices were "unlawful" for purposes of the UCL because they constituted breaches of contract, fraud, slander of title, and violated the UTSA. Plaintiffs made a similar argument in their posttrial brief following the bench trial before Judge Miller, asserting defendants' unlawful acts included their alleged breaches of contract, slander of title, and violation of the UTSA, while asserting that the alleged misrepresentations and nondisclosures that formed the basis of their common law fraud claim established defendants' liability under the fraudulent prong of the UCL as well.

In her statement of decision, Judge Miller addressed all three prongs of the UCL when she resolved plaintiffs' claim under **[**122]** that statute. After concluding plaintiffs failed to establish defendants' conduct was unfair within the meaning of the UCL, Judge Miller turned to the fraudulent prong and found there was "no evidence supporting **[***11]** the allegations of fraudulent acts or practices." Judge Miller expressly found there was no merit in the fraud allegations asserted both in connection with plaintiffs' separate fraud claim and in support of their claim of fraudulent conduct under the UCL. Finally, as to the unlawful prong of the UCL, Judge Miller stated plaintiffs "failed to prove unlawful conduct," as they had not established any of "the alleged violations of law" cited in their posttrial brief (a list of violations that, as noted, included defendants' alleged breaches of contract, slander of title, and violation of the UTSA).

CA(3)[] **(3)** In ruling on plaintiffs' equitable claim under the UCL, Judge Miller thus addressed whether each of plaintiffs' six legal claims had merit. She expressly concluded none of them did. Judge Kahn correctly ruled these determinations dispose of plaintiffs' legal claims. There was nothing left to be submitted to a jury.

Plaintiffs' arguments to the contrary are not persuasive. Plaintiffs assert Judge Miller's findings on the equitable UCL claim do not dispose of the legal claims because in her statement of decision Judge Miller "applied different standards [to the UCL claim] from those that would **[***12]** be relevant to the legal claims." Plaintiffs cite a portion of the statement of decision in which Judge Miller states that plaintiffs did not meet what she concluded was the applicable standard for determining whether an act or practice is "unfair" within the meaning of the UCL, i.e., conduct that "'threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.'" (Citing *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 187 [83 Cal. Rptr. 2d 548, 973 P.2d 527]*.) Plaintiffs argue such **[*996]** a showing was not an element of any of their legal claims, so Judge Miller's finding that they did not meet the *Cel-Tech* standard does not establish that they cannot prevail on those claims.

This argument is misplaced. As noted, Judge Miller did not limit her analysis to whether plaintiffs had proven "unfairness" under the UCL. Instead, she addressed plaintiffs' claims under all three prongs of the statute, and she expressly concluded plaintiffs had not established the purported misconduct that supported both their legal claims and the "unlawful" and "fraudulent" branches of their equitable UCL claim.

In their reply **[***13]** brief, plaintiffs suggest Judge Miller's rulings on the "unlawful" and "fraudulent" prongs of the UCL did not encompass rulings on the merits of their breach of contract and fraud claims, because, they assert, (1) Judge Miller adopted an argument made by defendants that a breach of contract, without more, could not support UCL liability, and (2) Judge Miller's analysis of the "fraudulent" prong of the UCL was limited to whether defendants had deceived the general public. Plaintiffs are incorrect. In her statement of decision, Judge Miller did not reject plaintiffs' claim under the "unlawful" prong of the UCL on the ground that a breach of contract could not support liability under that prong. Instead, she ruled categorically that none of the "alleged violations of law" identified by plaintiffs (a list that included alleged breaches of contract) had been established. And as to fraud, Judge Miller did not limit her discussion to a conclusion that plaintiffs had not deceived **[**123]** the general public. She went on to hold specifically that the fraudulent inducement allegations asserted in support of both the fraud and UCL causes of action were "without merit."

Finally, focusing on the organization **[***14]** of Judge Miller's written statement of decision, plaintiffs note in their reply brief that Judge Miller included many of her more specific findings about whether plaintiffs had established their claims—such as her findings that plaintiffs did not meet the conditions for an extension of the Loan's maturity date, that plaintiffs breached the Loan Agreement by not repaying the Loan and by other conduct, that defendants did not fraudulently induce plaintiffs into entering the prenegotiation agreement or into paying taxes for the Property, and that plaintiffs did not establish damages—in the portions of the statement of decision addressing plaintiffs' legal claims, including their claims for breach of contract and fraud. But we reject plaintiffs' suggestion that this method of organizing the statement of decision means Judge Miller only made substantive findings in connection with the legal claims and not in connection with the UCL claim.

As Judge Kahn correctly noted at the hearing on defendants' summary judgment motion, the structure of Judge Miller's statement of decision was a **[*997]** result of the way plaintiffs presented their case. Judge Miller addressed plaintiffs' causes of action in the **[***15]** order in which they were pled in the fifth amended complaint, with headings for the different causes of action. To the extent certain findings pertained both to a legal cause of action and to the equitable UCL claim that incorporated the legal cause of action, it was not necessary for Judge Miller to repeat all the findings under both headings.

C. *Judge Kahn Did Not Disregard the Rincon I Remittitur or the Law of the Case*

Plaintiffs argue that Judge Kahn, by determining that Judge Miller's findings were binding and disposed of plaintiffs' legal claims, misinterpreted or disregarded this court's disposition in *Rincon I* and the "law of the case" as established by our *Rincon I* opinion. We disagree.

HN3[] "'A reviewing court has authority to "affirm, reverse, or modify any judgment or order appealed from, and may direct the proper judgment or order to be entered, or direct a new trial or further proceedings to be had." (*Code Civ. Proc., § 43*.) The order of the reviewing court is contained in its remittitur, which defines the scope of the jurisdiction of the court to which the matter is returned.' [Citations.] 'The trial court is empowered to act only in accordance with the direction of the reviewing court; action which **[***16]** does not conform to those directions is void.'" (*Ayyad v. Sprint Spectrum, L.P. (2012) 210 Cal.App.4th 851, 859 [148 Cal. Rptr. 3d 709]*.)

In addition to following the appellate court's remittitur, a trial court on remand must comply with the law of the case. ""The doctrine of 'law of the case' deals with the effect of the *first appellate decision* on the subsequent *retrial or appeal*: The decision of an appellate court, stating a rule of law necessary to the decision of the case, conclusively establishes that rule and makes it determinative of the rights of the same parties in any subsequent retrial or appeal in the same case."'" (*Leider v. Lewis (2017) 2 Cal.5th 1121, 1127 [218 Cal. Rptr. 3d 127, 394 P.3d 1055]*.)

Here, based on his reading of our opinion in *Rincon I*, Judge Kahn concluded he had authority to consider Judge Miller's findings pertaining to the equitable **[**124]** claims and to determine that those findings disposed of the legal claims. ***HN4***[] "Whether the trial court correctly interpreted our opinion is an issue of law subject to de novo review. [Citations.] [¶] Our remittitur directions are contained in the dispositional language of our previous opinion. [Citation.] The trial court's interpretation of those directions is not binding on us. [Citation.] We look to the wording of our directions to determine whether the trial court's order comports with **[***17]** them. [Citation.] When, as in this case, the reviewing court remands the matter for further proceedings, its directions **[*998]** must be read in conjunction with the opinion as a whole." (*Ayyad v. Sprint Spectrum, L.P., supra, 210 Cal.App.4th at p. 859*.)

The language of the *Rincon I* disposition and opinion establishes Judge Kahn acted within the permitted scope of jurisdiction on remand. In *Rincon I*, we stated in the disposition: "The judgment is reversed as to plaintiffs' claims for breach of contract, fraud, slander of title, and violation of the UTSA (the first, second, third, fourth, seventh and eighth causes of action in the fifth amended complaint) and the case is remanded for *further proceedings consistent with this opinion* as to those causes of action. The judgment is affirmed as to plaintiffs' claims to set aside the foreclosure sale, for unfair competition, and for an accounting (the fifth, sixth and ninth causes of action in the fifth amended complaint). The parties shall bear their own costs on appeal." (*Rincon I, supra, 8 Cal.App.5th at p. 22*, italics added.)

CA(4)[] **(4)** In footnote 12 of the *Rincon I* opinion (footnote 12), we addressed the parties' arguments about whether defendants' success in connection with the equitable claims would have an impact on resolution of the legal claims on remand. **[***18]** (*Rincon I, supra, 8 Cal.App.5th at p. 20, fn. 12*.) We stated in footnote 12: "Defendants assert that, on remand, the trial court's previously entered judgment on the equitable claims would likely require the court to enter summary judgment for them on any remaining legal claims. Plaintiffs disagree, contending even the present judgment on the equitable claims would not eliminate their right to submit some issues to a jury. We need not address this issue, except to point out the fact we reverse in part for lack of an enforceable jury waiver does not mean the plaintiffs are necessarily entitled to a jury trial on their remaining legal claims. ***HN5***[] On remand, defendants may submit to the trial court any [*Code of Civil Procedure] section 437c* motion or other form of dispositive motion they may wish to file. We express no view about whether the grounds relied upon by the trial court for rejecting any of plaintiffs' claims—equitable or legal—might justify granting such a motion." (*Rincon I, supra, at p. 20, fn. 12*.)

We thus did not determine in *Rincon I* whether Judge Miller's findings on the equitable claims disposed of plaintiffs' legal claims, but in footnote 12 we permitted defendants to present that question on remand, and we authorized the trial court to decide it. Accordingly, in the language of our *Rincon **[***19]** I* disposition, Judge Kahn's determination of the preclusive effect of Judge Miller's findings was a proceeding "consistent with" the opinion in *Rincon I.* (*Rincon I, supra, 8 Cal.App.5th at p. 22*.) And for the reasons discussed in part II.B. above, we conclude Judge Kahn's resolution of that preclusion issue was correct.

Plaintiffs assert Judge Kahn's ruling was in effect a finding that Judge Miller's error in striking plaintiffs' jury demand was "harmless," contrary to **[*999]** our **[**125]** determination in *Rincon I* that the error in striking the demand was per se reversible. Specifically, plaintiffs contend that, in *Rincon I*, "this court determined—and it is law of the case—that the record before it was insufficient to support judgment in favor of [defendants] on [plaintiffs'] six Legal Claims."

We disagree. In the bench trial, Judge Miller, pursuant to the contractual jury waivers, addressed and resolved the legal claims on the merits. (*Rincon I, supra, 8 Cal.App.5th at pp. 9–10*.) In *Rincon I*, we concluded (1) the jury waivers were unenforceable, so it was error to strike plaintiffs' jury demand (*id. at pp. 10–18*), and (2) the error was of a type that required reversal as to the legal claims without a showing of prejudice by plaintiffs (i.e., a showing that they would have fared better if their legal claims **[***20]** had been submitted to a jury) (see *id. at pp. 18–19*). In addressing the latter point, we stated in part: "'Denial of the right to a jury trial is reversible error per se, and no showing of prejudice is required of a party who lost at trial.' [Citation.] Accordingly, when a trial court erroneously deprives a party of a jury trial on a cause of action the party was entitled to submit to a jury, reversal of the judgment on that cause of action is required." (*Id. at p. 18*.)

Our partial reversal in *Rincon I* thus was based on the type of error involved; it was not based on an assessment of the strength or weakness of the evidence in the record. Contrary to plaintiffs' current argument, we did not hold or state that the record before Judge Miller (and before this court on appeal in *Rincon I*) was "insufficient" to support her findings or to support a later judgment in favor of defendants on the legal claims.[5] Judge Kahn's determination on remand that Judge Miller's findings pertaining to the equitable claims are dispositive of the legal claims does not conflict with any conclusion we reached in *Rincon I* about the evidence or about Judge Miller's findings, or with any rule of law stated in that opinion. Judge Kahn did not **[***21]** violate our remittitur or the law of the case.

More broadly, in our view there is no inconsistency between our finding of reversible error in *Rincon I* and the established rule in California jurisprudence that, when a case involves both legal and equitable claims, the resolution of one set of claims may result in factual and legal determinations that dispose of the other set of claims. (E.g., *Raedeke, supra, 10 Cal.3d at p. 671*; *Alcoa, supra, 12 Cal.App.5th at p. 355*; *Hoopes, supra, 168 Cal.App.4th at p. 157*.) As Judge Kahn correctly recognized, the net result of **[*1000]** our disposition in *Rincon I* was to leave intact (as a de facto first-phase trial) Judge Miller's resolution of the equitable claims. Before conducting a second-phase trial of the legal claims, it was appropriate for Judge Kahn to consider whether Judge Miller's findings in connection with the equitable claims rendered such a trial unnecessary.

---

[5] Also incorrect is plaintiffs' assertion that this court's "mandate, after *Rincon I* and footnote 12, was to try the case on the legal claims with plaintiffs' jury demand granted." As noted, we stated in footnote 12 that "the fact we reverse in part for lack of an enforceable jury waiver does *not* mean plaintiffs are necessarily entitled to a jury trial on their remaining legal claims." (*Rincon I, supra, 8 Cal.App.5th at p. 20, fn. 12*, italics added.)

Plaintiffs were not powerless to avoid this result. As illustrated by the Supreme Court's decision in *Raedeke*, if a **[**126]** plaintiff asserts both legal and equitable claims and wishes to preserve the ability to submit the legal claims to a jury, the plaintiff can abandon the equitable claims. (See *Raedeke, supra, 10 Cal.3d at p. 671*.) In their briefing in *Rincon I*, plaintiffs themselves noted they might have taken this approach **[***22]** if Judge Miller had declined to enforce the jury waivers and had announced her intention to conduct a bench trial on the equitable claims before submitting the legal claims to a jury. (*Rincon I, supra, 8 Cal.App.5th at p. 20*.)

But plaintiffs could have taken *the same approach* in response to Judge Miller's actual ruling, i.e., her decision to enforce the jury waivers and conduct a bench trial on all claims. Having argued unsuccessfully to Judge Miller that the jury waivers were unenforceable (see *Rincon I, supra, 8 Cal.App.5th at p. 9*), and aware that her ruling on that point would be an appealable issue if they did not prevail on the legal claims at trial, plaintiffs could have decided it was a priority to preserve their ability to submit (eventually) their legal claims to a jury. To keep that option open, they could have dropped some or all of their equitable claims to ensure that an adverse outcome on those claims would not interfere with their ability to seek a future jury trial on the legal claims.

Plaintiffs may have had reasons for not taking this approach. They may have decided it was a priority to seek a favorable disposition of the equitable claims (which included the claim to set aside the foreclosure of the Property (see *Rincon I, supra, 8 Cal.App.5th at p. 9*)) rather than abandoning those **[***23]** claims. We note that, in their appellate briefs in *Rincon I*, plaintiffs presented extensive arguments challenging Judge Miller's resolution of the equitable claims for unfair competition and to set aside the foreclosure, suggesting they viewed those claims as important. (See *Rincon I, supra, 8 Cal.App.5th at p. 5*; *Rincon EV Realty LLC v. CP III Rincon Towers, Inc.* (Jan. 31, 2017, A138463) [nonpub. portion of partially pub. opn.] (*Rincon I*, nonpub. portion).) But similar considerations likely exist in any case where a plaintiff must choose whether to drop his or her equitable claims to preserve the ability to submit legal claims to a jury. Since plaintiffs did not abandon their equitable claims, Judge Miller's findings in connection with those claims are binding and (as discussed) dispose of plaintiffs' legal claims.
[*1001]

D. *Plaintiffs Are Not Entitled To Relitigate Issues Resolved by Judge Miller*

Plaintiffs contend that, as a matter of appellate procedure, they were entitled on remand to relitigate all factual issues relevant to their legal claims, even if Judge Miller resolved the identical issues when she addressed the equitable UCL claim. Plaintiffs base this argument on the rule that, in general, "'[a]n unqualified reversal **[***24]** remands the cause for a new trial [citation], and places the parties in the trial court in the same position as if the cause had never been tried, with the exception that the opinion of the court on appeal must be followed so far as applicable.' [Citation.] This principle is equally applicable to a partial reversal of a judgment." (*Hall v. Superior Court (1955) 45 Cal.2d 377, 381 [289 P.2d 431]* (*Hall*); accord, e.g., *Bevis v. Terrace View Partners, LP (2019) 33 Cal.App.5th 230, 263 [244 Cal. Rptr. 3d 797]*.)

HN6[] But as plaintiffs acknowledge, an appellate court may limit or define the issues to be addressed on remand. (E.g., *Puritan Leasing Co. v. Superior Court (1977) 76 Cal.App.3d 140, 148–149 [142 Cal. Rptr. 676]* **[**127]** [prior appellate opinion foreclosed retrial on some but not all issues]; see *Hall, supra, 45 Cal.2d at p. 381* [general rule allowing retrial is subject to proviso that trial court is to follow the opinion of the appellate court].) Here, as discussed in part II.C. above, our opinion in *Rincon I*, specifically footnote 12, contemplates and authorizes trial court proceedings on remand that could narrow or eliminate the issues to be tried. (*Rincon I, supra, 8 Cal.App.5th at p. 20, fn. 12*.) Judge Kahn, by proceeding in accordance with footnote 12, did not violate the rules of appellate procedure. We need not determine what the proper scope of proceedings on remand would have been if we had not addressed the matter in footnote 12.

The three pairs of cases highlighted by plaintiffs in support of their argument **[***25]** that a retrial was required here—the *Bate*, *Lagiss*, and *Robinson* cases—are distinguishable. In each set of cases, the appellate court in the first appeal reversed a trial court judgment without specifying any limitation on the issues to be retried. In the second appeal, the appellate court held the prior unqualified reversal required a retrial.

In Bate v. Marsteller (1959) 175 Cal.App.2d 573, 576, 583–584 [346 P.2d 903] (*Bate I*), a fraud action brought by sellers of real estate, the appellate court reversed a judgment in favor of a group of broker defendants as unsupported by substantial evidence, while rejecting some other grounds for reversal; the court affirmed the judgment in favor of a different group of defendants. In Bate v. Marsteller (1965) 232 Cal.App.2d 605, 617–618 [43 Cal. Rptr. 149] (*Bate II*), the appellate court held that the "unqualified reversal" in *Bate I* as to the broker defendants left factual issues as to those defendants "open for determination."

[*1002]

In People ex rel. Department of Public Works v. Lagiss (1958) 160 Cal.App.2d 28, 30, 33, 37 [324 P.2d 926] (*Lagiss I*), a condemnation action, the appellate court reversed the judgment because the trial court improperly prevented the defendant property owner from pleading and seeking to prove that the condemning agency acted in bad faith and abused its discretion. In People ex rel. Department of Public Works v. Lagiss (1963) 223 Cal.App.2d 23, 30, 31, fn. 4, 44–45 & fn. 13, 47–49 [35 Cal. Rptr. 554] (*Lagiss II*), the appellate court held that the "unqualified reversal" in *Lagiss I* "set[] **[***26]** the case at large," so the defendant property owner was entitled to relitigate the issue of the amount of compensation due, even though the first appeal involved no claim of error as to compensation.

In Robinson v. Thornton (1893) 102 Cal. 675, 679–681, 685 [34 P. 120] (*Robinson I*), an action involving competing claims to land, the Supreme Court reversed the trial court judgment and found there was sufficient evidence to support a finding that defendant Thornton obtained title through adverse possession. In Robinson v. Thornton (1896) 114 Cal. 275, 276–277 [46 P. 79] (*Robinson II*), the Supreme Court held that the reversal in *Robinson I* did not *require* the jury to find at the retrial that adverse possession was established, and the trial court erred by directing a verdict on that point; adverse possession was a question of fact for the jury.

None of these cases involved the scenario at issue here, where the first appellate decision (i.e., our opinion in *Rincon I*) (1) affirmed the judgment as to one set of claims and (2) authorized the trial court to determine on remand whether the findings made in connection with those claims disposed of the remaining claims. We are not persuaded by plaintiffs' argument that *Bate, Lagiss*, and *Robinson* establish that **[**128]** Judge Kahn committed reversible error here.

In a related argument, **[***27]** plaintiffs assert that the usual rule that findings pertaining to one set of claims (equitable or legal) are binding in the determination of the other set of claims (discussed in parts II.A. and II.B. above) has no application when the trial court's decisions resolving the two sets of claims are separated by a Court of Appeal decision. Plaintiffs contend applying that preclusion doctrine after a partial reversal and remand would conflict with the rules of appellate procedure allowing for a retrial as set forth in Hall, supra, 45 Cal.2d 377 and other cases. Again, however, we see no conflict between these doctrines in the present case. As discussed, Judge Kahn's determination of the preclusive effect of Judge Miller's findings was consistent both with our opinion in *Rincon I* (and thus with *Hall*, which, as noted, provides a trial court is to proceed in accordance with the opinion of the appellate court) and with the preclusion principles applicable in cases involving equitable and legal claims.

[*1003]

In their reply brief, plaintiffs suggest that giving preclusive effect to Judge Miller's findings improperly impairs their ability to obtain appellate review of those findings. They did not develop such an argument in their **[***28]** opening brief, so we need not address it. (Neighbours v. Buzz Oates Enterprises (1990) 217 Cal.App.3d 325, 335, fn. 8 [265 Cal. Rptr. 788].) Plaintiffs note that Samara v. Matar (2018) 5 Cal.5th 322 [234 Cal. Rptr. 3d 446, 419 P.3d 924] (*Samara*), the case on which they rely for this argument, was decided in June 2018, after plaintiffs filed their opening brief in May 2018, but before defendants filed their appellate brief in September 2018. If plaintiffs wished to add an argument based on *Samara*, they should have sought leave to file a supplemental opening brief before defendants' brief was due, rather than saving the issue for reply. (Reichardt v. Hoffman (1997) 52 Cal.App.4th 754, 764–766 [60 Cal. Rptr. 2d 770].)

Plaintiffs' contention lacks merit in any event. In their appeal from the judgment entered by Judge Miller, plaintiffs had the opportunity to challenge any and all of her factual and legal determinations. As we discussed in the unpublished portion of our opinion in *Rincon I*, plaintiffs challenged some aspects of Judge Miller's analysis of their UCL claim, including arguing (1) Judge Miller applied the wrong legal standard for determining whether defendants' conduct was "unfair" under the UCL, (2) Judge Miller misinterpreted contract terms and defendants' conduct pertaining to such matters as whether defendants approved a budget for the Property, and defendants' efforts to convince plaintiffs' investor sponsor to contribute **[***29]** funds for tax payments, and (3) Judge Miller's finding that plaintiffs were not entitled to extend the maturity date of the Loan beyond June 2009 and defaulted by failing to repay it (a finding that Judge Miller concluded barred all of plaintiffs' claims) did not insulate defendants from liability for their unfair conduct, including allegedly engaging in "dual tracking" by seeking to sell the Loan while participating in loan modification discussions. (*Rincon I, nonpub. portion, supra, A138463*.)

But as to Judge Miller's conclusion that plaintiffs had not established liability under the "unlawful" and "fraudulent" prongs of the UCL (and the legal causes of action that underlay those portions of the equitable UCL claim), plaintiffs did *not* challenge a number of the key findings that were the principal bases for Judge Miller's rulings. For example, Judge Miller found plaintiffs were not entitled to extend the maturity date of the Loan and therefore were in default when they failed to **[**129]** repay the Loan in June 2009, a finding that was a central ground for Judge Miller's conclusion that defendants were not liable on the legal claims that underlay their UCL claim. In addition, in connection with **[***30]** each of the alleged violations of law underlying the "unlawful" and "fraudulent" prongs of the UCL claim—including defendants' alleged breaches of contract, fraud, slander of title, and violation of the UTSA—Judge Miller found that plaintiffs did not show that defendants' **[*1004]** conduct caused them to suffer any damages, which she held to be an essential element of each of those underlying claims. In the *Rincon I* appeal, plaintiffs did not challenge Judge Miller's findings that they were in default and proved no damages.

In addition, as to the causation-of-injury element of the UCL claim itself, we concluded in *Rincon I* that, in plaintiffs' opening appellate brief in that case, they did not challenge Judge Miller's finding that they had not proven defendants' alleged conduct caused them to suffer injury. (*Rincon I, nonpub. portion, supra, A138463*.) Based on plaintiffs' failure to challenge that essential element of UCL liability, we affirmed Judge Miller's rejection of that claim, and we did not address plaintiffs' arguments about whether Judge Miller mischaracterized certain aspects of defendants' conduct. (*Ibid.*)

Plaintiffs now argue that, because this court in *Rincon I* affirmed the judgment **[***31]** on the UCL claim based on their failure to challenge Judge Miller's causation determination, her findings about whether defendants' conduct violated the UCL have "evaded" review and should not have binding effect. We disagree.

Plaintiffs rely on our Supreme Court's decision in *Samara, supra, 5 Cal.5th 322*, but that case provides no basis for reversal here. In *Samara*, the court held that, for purposes of claim and issue preclusion, when a trial court ruling is based on multiple grounds, "a ground reached by the trial court *and properly challenged on appeal*, but not embraced by the appellate court's decision, should not affect the judgment's preclusive effect." (*Id. at p. 334*, italics added.) Instead, the preclusive effect of the judgment should be evaluated as though the trial court had not reached the issue that the appellate court did not reach. (*Id. at pp. 326, 338*.) The Supreme Court noted a limitation on its ruling: "We caution, however, that we take no position on the significance of an independently sufficient alternative ground reached by the trial court and *not* challenged on appeal." (*Id. at p. 337*.)

In *Samara*, a dental malpractice case, the plaintiff (Samara) sued two dentists, Dr. Nahigian, who allegedly was negligent, and Dr. Matar, on grounds **[***32]** of vicarious liability. (*Samara, supra, 5 Cal.5th at p. 327*.) The trial court entered summary judgment for Dr. Nahigian on two grounds, the statute of limitations and a lack of evidence of causation. (*Ibid.*) In the first appeal, the appellate court affirmed solely on the basis of the statute of limitations, even though Samara urged the court to address and reverse the finding of a lack of causation. (*Ibid.*) In the meantime, Dr. Matar moved for summary judgment on the basis that the trial court's prior ruling that Dr. Nahigian's alleged negligence did not cause injury entitled him (Dr. Matar) to judgment as well, since the sole alleged basis for his liability was his vicarious liability **[*1005]** for Dr. Nahigian's conduct. (*Id. at pp. 327–328*.) After the appellate decision in favor of Dr. Nahigian became final, the trial court granted Dr. Matar's motion, but the Court of Appeal **[**130]** reversed, and the Supreme Court affirmed the Court of Appeal's decision (*id. at p. 328*), concluding "the preclusive effect of the judgment in favor of Nahigian should be evaluated as though the trial court had not reached the causation issue" (*id. at p. 338*).

Even assuming *Samara* might in some circumstances limit the applicability of the preclusion principle on which Judge Kahn relied (i.e., the **[***33]** rule that findings pertaining to equitable claims are binding in the resolution of legal claims *in the same case*), it does not support plaintiffs' position here. As discussed, unlike the appellant in *Samara, supra, 5 Cal.5th at p. 334*, plaintiffs in *Rincon I* did not "properly challenge[]" the findings by Judge Miller that are dispositive of the legal claims underlying the "unlawful" and "fraudulent" prongs of plaintiffs' equitable UCL claim, including the findings that plaintiffs were in default as of June 2009 and did not prove any damages flowing from defendants' conduct. Accordingly, Judge Miller's findings, in particular those bearing on causation of injury—whether viewed as an element of plaintiffs' underlying legal claims or as a prerequisite for liability on plaintiffs' equitable claim under the UCL—are binding and are unaffected by *Samara*. Those findings were grounds for Judge Miller's decision that plaintiffs did *not* challenge in their first appeal. (*Samara, supra, at pp. 334, 337*; *Rincon I, nonpub. portion, supra, A138463*.)

E. *Judge Kahn Could Properly Take Judicial Notice of Judge Miller's Findings To Determine Their Preclusive Effect*

In support of the summary judgment motion that ultimately was heard by Judge Kahn, defendants submitted **[***34]** a request for judicial notice of several documents, including Judge Miller's statement of decision. Plaintiffs contend Judge Kahn could not take judicial notice of the truth of Judge Miller's findings and therefore defendants' summary judgment motion lacked any evidentiary support. ***HN7***[] But even assuming it was necessary for Judge Kahn to take judicial notice as a prerequisite to considering findings made during an earlier phase of the same case, he correctly ruled that it is proper for a court to take judicial notice of factual findings in determining whether those findings have preclusive effect. (*Hawkins v. SunTrust Bank (2016) 246 Cal.App.4th 1387, 1393 [206 Cal. Rptr. 3d 681]* (*Hawkins*).)

CA(5)[] **(5)** Taking judicial notice of a finding in determining its preclusive effect does not involve a determination of the finding's truth. As the *Hawkins* court explained in the context of claim and issue preclusion: "'"Whether a factual finding is true is a different question than whether the truth of that factual finding may or may not be subsequently litigated a second time. ***HN8***[] The **[*1006]** doctrines of res judicata and collateral estoppel will, when they apply, serve to bar relitigation of a factual dispute even in those instances where the factual dispute was erroneously decided in favor of a party **[***35]** who did not testify truthfully." [Citation.] In other words, even though a factual finding in a prior judicial decision may not establish the truth of that fact for purposes of judicial notice, the finding itself may be a proper subject of judicial notice if it has a res judicata or collateral estoppel effect in a subsequent action.'" (*Hawkins, supra, 246 Cal.App.4th at p. 1393*.) Judge Kahn properly took judicial notice of Judge Miller's findings in determining their preclusive effect.

[**131] III. DISPOSITION

The judgment is affirmed. Defendants shall recover their costs on appeal.

Pollak, P. J., and Tucher, J., concurred.

Appellants' petition for review by the Supreme Court was denied March 25, 2020, S260477. Kruger, J., is of the opinion the petition should be granted.

End of Document

Morice v. Hosp. Serv. Dist. #3

Judges: BARRY W. ASHE, UNITED STATES DISTRICT JUDGE.

Opinion by: BARRY W. ASHE

Opinion

[*190] **ORDER & REASONS**

Before the Court **[**2]** is a motion to dismiss for failure to state a claim filed by defendants Hospital Service District No. 3 Parish of Lafourche d/b/a Thibodaux Regional Medical Center ("TRMC"), Board of Commissioners of TRMC ("the Board"), Medical Executive Committee of TRMC ("MEC"), Credentials Committee of TRMC ("Credentials

Committee"), and Greg Stock ("Stock"), the CEO of TRMC (collectively, "Defendants").[1] The plaintiff, **[*191]** Natchez J. Morice, III, M.D. ("Dr. Morice"), opposes the motion.[2] Also before the Court is a motion for partial summary judgment filed by Dr. Morice relating to his breach-of-contract claim,[3] which Defendants oppose,[4] and in further support of which Dr. Morice replies.[5] Having considered the parties' memoranda and the applicable law, the Court issues this Order & Reasons.

I. BACKGROUND

This litigation arises from TRMC's suspension and denial of Dr. Morice's clinical privileges in obstetrics at TRMC.[6] TRMC's Medical Staff Bylaws ("Bylaws") require a physician to apply for renewal of privileges at TRMC every two years.[7] As part of the written application, a physician must demonstrate "ability to work cooperatively with others," "provide peer recommendations," agree to continued peer review **[**3]** and quality review, and report any violations assessed by the MEC.[8] The Credentials Committee initially reviews the application and makes a recommendation to the MEC, which, in turn, makes a recommendation to the Board, which renders the final decision.[9] Under Article VII of the Bylaws, if the MEC makes an "adverse recommendation," the physician may generally initiate the "Hearing Procedure" set out in Article XI, which provides for a hearing conducted by a "Hearing Committee" (or Hearing Panel) and appellate review by the Board.[10] According to the Bylaws, the recommendation forming the basis of the hearing and appeal does not become "effective and final" until the Board's determination upon final review.[11]

TRMC first granted Dr. Morice privileges in obstetrics and gynecology in 2006. Following notice of five violations spanning from late 2014 to early 2017, however, the MEC recommended corrective action in relation to Dr. Morice's

---

[1] R. Doc. 77. Before Dr. Morice filed a first supplemental and amending complaint (R. Doc. 64), Defendants had filed a motion to dismiss (R. Doc. 21) the original complaint (R. Doc. 1), to which Dr. Morice filed an opposition (R. Doc. 30), in further support of which Defendants filed a reply (R. Doc. 33), and in further opposition to which Dr. Morice filed a surreply (R. Doc. 36). The Court granted Defendants' motion to dismiss in part for Dr. Morice's failure to seek leave of court to proceed anonymously and directed Dr. Morice to file an amended complaint that disclosed his identity. R. Doc. 52. Dr. Morice did so in his first supplemental and amending complaint, which repeated verbatim the original allegations, but also added certain allegations relating to Defendants' denial of Dr. Morice's application for reappointment of privileges in obstetrics. R. Doc. 64. The Defendants' second motion to dismiss and Dr. Morice's response thereto largely repeat arguments made concerning the original motion to dismiss. The first supplemental and amending complaint supersedes the original complaint and moots the balance of the original motion to dismiss. Nevertheless, to the extent any arguments made concerning the original motion to dismiss are applicable to resolving the instant motion, the Court considers them here.

[3] R. Doc. 69.

[4] R. Doc. 79.

[5] R. Doc. 85.

[6] R. Doc. 64 at 4.

[7] *See* R. Docs. 54-7 at 9; 59-1 at 9.

[8] *See* R. Docs. 54-7 at 8-10, 32-36; 59-1 at 8-10, 32-36.

[9] R. Docs. 54-7 at 28-31; 59-1 at 28-31.

[10] *See* R. Docs. 54-7 at 6, 22, 29; 59-1 at 6, 22, 29. Although Article VII refers to the "Hearing Procedure as outlined in Article X," Article X addresses "Corrective Action," whereas Article XI addresses the "Hearing and Appellate Review Procedure." It is apparent, then, that this is a typographical error, and the reference in Article VII should be to the "Hearing Procedure as outlined in Article *XI*."

[11] R. Docs. 54-7 at 41; 59-1 at 41.

privileges in obstetrics.[12] The violations, which Dr. Morice maintains were fabricated, involved Dr. Morice's failure to properly attend to his obstetrical patients.[13] Dr. Morice then requested a hearing under Article XI,[14] which took place on April 24-26, **[**4]** 2018, and May 8, 2018.[15] In preparation for the hearing, Dr. Morice alleges that he and TRMC submitted briefing on what burden of proof and evidentiary standard applied.[16] On June 13, 2018, the Hearing Panel rendered a decision to affirm the MEC's decision to suspend Dr. Morice.[17] Dr. Morice subsequently appealed the MEC's decision **[*192]** to the Board. Dr. Morice alleges that both he and TRMC filed briefs and made oral statements in support of their positions on appeal.[18] On August 13, 2018, the Board affirmed the Hearing Panel's decision suspending Dr. Morice's privileges in obstetrics for a period of six months, until February 13, 2019.[19]

Meanwhile, because Dr. Morice's two-year privileges appointment was set to expire on May 16, 2018, in the midst of the hearing-and-appeal process on his suspension,[20] the Board extended his privileges "until the earlier to occur of (i) the expiration of 4 months from May 15, 2018, the date of reappointment, or (ii) such time as the hearing before the ad hoc medical staff committee ... and the appellate review by the Board ... have concluded and a final decision has been rendered as set forth in Article XI of the TRMC Medical Staff Bylaws."[21] In this case, the latter **[**5]** term applied. Therefore, in the August 13, 2018 letter that informed Dr. Morice of the Board's final decision concerning his suspension, Stock advised Dr. Morice to "submit your application for reappointment and clinical privileges for review by the Credentials Committee as soon as possible."[22] Dr. Morice heeded Stock's instruction to make quick application for reappointment only as to his gynecological privileges. This application was submitted on August 16, 2018,[23] and TRMC approved his reappointment application a month later.[24] However, Dr. Morice waited to apply for privileges in obstetrics until December 17, 2018.[25] On January 14, 2019, the MEC recommended denial of his application for obstetrical privileges, citing a new violation of the professional standard of care and a variance report of unprofessional behavior in addition to the conduct for which Dr. Morice was suspended.[26] As of the date of the briefing of this motion to dismiss, Dr. Morice was still pursuing the hearing-and-appeal process as to the denial of his application for obstetrical privileges. TRMC declined to grant Dr. Morice temporary obstetrical privileges during the pendency of his appeal.[27]

[24] R. Doc. 59-4.

[25] R. Doc. 59-5.

[26] R. Doc. 59-6.

[27] R. Doc. 54-6. The Court has not been apprised of the disposition, if any, of Dr. Morice's appeal of the denial of his application for obstetrical privileges.

In his first supplemental **[**6]** and amending complaint for injunctive relief and damages,[28] Dr. Morice alleges that Defendants violated the *Sherman Act* (Counts I & II), breached the Bylaws and did so in bad faith (Counts III and IV), tortiously interfered with contractual obligations under the Bylaws (Count V), committed an abuse of rights and negligent misrepresentation (Counts VI and VII), intentionally inflicted emotional distress and defamed him (Count VIII), violated the *Louisiana Unfair Trade Practices and Consumer Protection Law ("LUTPA")* (Count IX), and violated his due process and equal protection rights (Count X).[29] In support of these claims, Dr. Morice's allegations may be **[*193]** grouped into three broad categories: the suspension, the denial of reappointment, and Defendants' purported illegal business practices.

First, Dr. Morice alleges that the peer review process relating to the suspension of his privileges was inherently flawed and designed to eliminate him as a competing provider of OB/GYN services. Dr. Morice alleges that the "trumped up" violations coincided with the success of his private practice.[30] In 2012, Dr. Morice opened an office in Thibodaux operated through his limited liability company, Thibodaux **[**7]** Gynecology and Obstetrics, LLC ("TGO").[31] Dr. Morice alleges that he does not have staff physician privileges at any tertiary level facility other than TRMC, which he says is the sole community provider of inpatient and outpatient hospital services in Thibodeaux.[32] Dr. Morice contends that his entire obstetrical practice is based at TRMC, and all of his privileges in obstetrics are with TRMC.[33] From 2006 until 2013, Dr. Morice says his only other competitors were the Thibodeaux Women's Center, an independently-owned OB/GYN group, and TRMC's OB/GYN group. During this time, Dr. Morice alleges that his practice grew dramatically, which he says affected TRMC's market share for ancillary services, in that he was performing all ancillary services within his own medical practice rather than sending these services to TRMC.[34]

In 2014, TRMC purchased the Thibodeaux Women's Center. As a result, TRMC employed the Center's physicians in-house and, says Dr. Morice, heightened the competition between TRMC and Dr. Morice's practice.[35] Only after purchasing the Thibodaux Women's Health Center, Dr. Morice contends, did TRMC cite him for numerous bogus violations to potentially restrict, suspend, or remove **[**8]** his privileges at TRMC, reduce competition in the region, and raise the prices TRMC charged its patients and insurers. In the first nine years of Dr. Morice's privileges at TRMC, Dr. Morice received no violations or write-ups. But between December 10, 2014, and January 5, 2017, Dr. Morice was charged with five Level III or IV violations. Given that Dr. Morice and TGO compete with TRMC's OB/GYN physicians, who earn money for TRMC through services (particularly ancillary services, which constitute most of Dr. Morice's revenue as a private physician) and referrals, Dr. Morice contends that TRMC has a substantial motivation for restricting and denying medical staff privileges to independent non-employee physicians like him.[36] Dr. Morice contends that TRMC fabricated the bases for the violations for the purpose of removing Dr. Morice and TGO from competition, thereby allowing the hospital to have a monopoly or near monopoly for OB/GYN services.[37]

[37] *Id.* at 11.

Dr. Morice alleges that members of the MEC were biased in weighing his suspension because they were likewise in direct competition with him.[38] In addition, Dr. Morice claims that the violations were groundless because each reviewing TRMC committee merely **[**9]** "rubber stamped" the prior committee's recommendation without **[*194]** reviewing the evidence. For instance, on April 11, 2017, Dr. Morice claims to have met with the MEC, and that its members acknowledged never having before them the medical charts or any other facts or evidence purportedly establishing the Level III and IV violations found by TRMC's administration.[39] Dr. Morice claims that this pattern continued at the hearing, where an independent reviewer, the National Peer Review Committee; the medical review panel composed of three independent OB/GYN physicians; and Dr. Morice's expert, all gave evidence that Dr. Morice complied with the applicable standard of care in relation to Case No. 7954, which charged Dr. Morice with a Level IV violation involving injury. Dr. Morice claims that even some testimony elicited from Defendants' expert supported his exoneration. However, TRMC merely reduced the charge from Level IV to Level III, and in so doing, Dr. Morice claims, the Hearing Panel and Board "rubber stamped" the decision of the MEC. The Hearing Panel and Board confirmed the remaining violations, despite "a wealth of evidence, establishing beyond any reasonable dispute, that a sham review **[**10]** process was conducted, and which completely refuted all of the bogus charges against him."[40] Dr. Morice also claims that TRMC evinced its disparate treatment of TRMC-employed physicians and private physicians like him when testimony at the hearing revealed that a TRMC physician's conduct was even more egregious than Dr. Morice's, but that physician was never charged with a violation.[41]

Dr. Morice further contends that the Bylaws are written to prevent a "fair hearing" because the Bylaws provide no guidance on burden of proof or evidentiary standards.[42] Article XI, section 5(H) of the Bylaws provides in pertinent part: "It will be the obligation of the representative to present appropriate evidence in support of the adverse recommendation. The practitioner will be responsible for supporting his/her challenge to the adverse recommendation or decision."[43] Although Dr. Morice and TRMC submitted briefing on the procedural issues, Dr. Morice contends that TRMC should have been required to prove Dr. Morice's charges by clear and convincing evidence, rather than the preponderance standard that was used.[44]

Second, in relation to the January 2019 denial of his request for privileges, Dr. Morice alleges that TRMC was obligated **[**11]** to reinstate his obstetrical privileges after his suspension lifted, even though TRMC had, in the interim, denied his application for such privileges based on new violations that were consistent with his past violations. Dr. Morice essentially argues that the sense of the word "suspension" implies that his obstetrical privileges should have gone back into effect automatically after the suspension ran, and that, under the Bylaws, the denial of his application for reappointment of his obstetrical privileges does not take effect until the Board's final decision on his appeal of such denial. Therefore, Dr. Morice claims he is entitled to exercise obstetrical privileges until the hearing-and-appeal process is complete.[45] Dr. Morice asserts that the deprivation of privileges violated the Bylaws and his constitutional rights to due process and equal protection, amounted to an abuse of rights and misrepresentation, caused intentional **[*195]** infliction of emotional distress, and defamed him. Dr. Morice further asserts that the Bylaws constitute a contract and that Defendants breached this contract, did so in bad faith, and tortiously interfered with obligations under the Bylaws.

[45] R. Docs. 53-2 at 19-21, 38-40; 54-1 at 18; 73 at 15.

Third, Dr. Morice asserts **[**12]** that TRMC has taken additional illegal actions that violate the *Sherman Act* and *LUTPA*. Dr. Morice claims that TRMC intentionally reduced the revenue Dr. Morice earns by "cherry-picking" referrals of higher-paying, non-Medicare/Medicaid patients and rerouting them to hospital-employed physicians, while lower-paying referrals such as uninsured or Medicare/Medicaid patients were sent to non-employee and on-call physicians, such as Dr. Morice.[46] For instance, Dr. Morice alleges that while on call at TRMC during the period from 2006 to 2013, he received average annual referrals of 15 non-Medicaid/Medicare, insured patients, versus 15 uninsured or Medicaid/Medicare patients; however, while on call during the 2013-2018 period, he received referrals of one insured and 20 Medicaid/Medicare or uninsured patients.[47] Dr. Morice alleges that doctors in other medical specialties who have privileges at TRMC but are not employed by TRMC have also experienced such dramatic changes in referrals. Dr. Morice also contends that TRMC has operated and continues to operate and solicit business in St. Mary Parish, without permission from St. Mary's Hospital Service District, another illustration of TRMC's pattern **[**13]** of illegal activity.[48]

II. PENDING MOTIONS

A. Defendants' Motion to Dismiss

Defendants seek to dismiss the entirety of Dr. Morice's supplemental and amending complaint. First, Defendants assert that all but TRMC lack the capacity to be sued.[49] Second, Defendants submit two grounds they claim would dispose of all allegations: (1) the complaint improperly relies on conclusory allegations; and (2) Defendants are immune under the *Health Care Quality Immunity Act ("HCQIA")*, Louisiana law, and the Bylaws.[50] Third, Defendants argue that under the primary jurisdiction doctrine, the suit should be stayed pending the outcome of Dr. Morice's second hearing and appeal.[51] Fourth, Defendants contend that Dr. Morice's individual claims fail for various independent reasons.[52]

In opposition, Dr. Morice argues that all Defendants have capacity to be sued.[53] Dr. Morice also contends that each claim is supported by sufficiently specific allegations to state plausible claims for relief.[54] When these allegations are taken as true, Dr. Morice says it is clear that Defendants do not qualify for statutory immunity or immunity under the Bylaws.[55] In regard to abstention under the primary jurisdiction doctrine, Dr. Morice asserts **[**14]** that the Court should decline to stay the proceedings because only the single claim relating to his denial of privileges would

[54] *Id.* at 11-12.

[55] *Id.* at 16-21.

be affected by any hearing or appeal.[56] Finally, Dr. Morice **[*196]** makes various arguments to rebut dismissal of his individual claims, which the Court will address in detail below.[57]

B. Dr. Morice's Motion for Partial Summary Judgment

In his motion for partial summary judgment, Dr. Morice presents arguments mirroring those he asserted in support of his second motion for preliminary injunction.[58] Essentially, Dr. Morice claims that Defendants violated the Bylaws' provision that adverse recommendations not become effective until the final recommendation of the Board at the end of the hearing-and-appeal process. Accordingly, Dr. Morice says that Defendants should have granted him interim privileges in obstetrics between the denial of his request for reappointment of privileges and the end of the hearing-and-appeal process. Dr. Morice further argues that Defendants impermissibly altered the two-year period of his reappointments (which ran from May to May) by unilaterally extending the period ending on May 16, 2018, to August 13, 2018. In doing so, says Dr. Morice, Defendants **[**15]** created a trap for Dr. Morice's privileges to lapse, so they could shut him out of local competition for obstetrical services. Because Dr. Morice served the entirety of his suspension and complied with all related conditions, he contends that the denial of his reappointment of obstetrical privileges is largely based upon the same "trumped up" allegations for which he was already punished. And, to the extent other instances of substandard and unprofessional conduct formed a basis for the denial of reappointment, Dr. Morice contends that these too were adverse recommendations that should not become binding and effective until the resolution of his hearing and appeal.[59]

In opposition, Defendants urge the Court to deny the motion for partial summary judgment on the same grounds that the Court denied the motion for preliminary injunction — namely, Dr. Morice does not have the right to interim privileges because he permitted his privileges to lapse before applying for reappointment.[60] Defendants also submit that the motion for partial summary judgment is premature and should be denied for the same reasons set forth in their motion to dismiss.[61]

In reply, Dr. Morice argues that certain **[**16]** representations by a staff member of TRMC and Stock indicated that his privileges did not lapse. Dr. Morice submits an email by staff member Dana Rodrigue, who on December 18, 2018, responded to him about his request for activation of his privileges in obstetrics, advising: "I will need you to resubmit the privilege form and leave the dates blank. Because this is not a new application or reappointment application and just a request for privileges, your dates will be from the date of approval to the end of your current reappointment which is May, 2020."[62] Dr. Morice contends that this correspondence proves that his privileges had not lapsed, or else proves that he could submit an application after the two-year period had expired and enjoy continuous privileges.[63] Dr. Morice further argues that Stock's correspondence gave no indication that his privileges had lapsed and thus implied that Dr. Morice's privileges would be granted.[64] **[*197]** Dr. Morice also questions the

legitimacy of one of the two "new" grounds for the denial of his reappointment request, which concerned conduct that occurred in November of 2017.[65]

III. LAW & ANALYSIS

A. *Rule 12(b)(6)* Motion

1. *Rule 12(b)(6)* Standard

The Federal Rules of Civil Procedure require a **[**17]** complaint to contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. *Rule 8* "does not require 'detailed factual allegations,' but it demands more than an unadorned, the-defendant-unlawfully-harmed-me accusation." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). The statement of the claim must "'give the defendant fair notice of what the ... claim is and the grounds upon which it rests.'" *Twombly, 550 U.S. at 555* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*). A pleading does not comply with *Rule 8* if it offers "labels and conclusions," "a formulaic recitation of the elements of a cause of action," or "'naked assertion[s]' devoid of 'further factual enhancement.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 555-57*).

Rule 12(b)(6) of the Federal Rules of Civil Procedure permits a party to move to dismiss for "failure to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 570*). A claim is plausible on the face of the complaint "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* (quoting *Twombly, 550 U.S. at 556*). Plausibility does not equate to probability, but rather "it asks for more than **[**18]** a sheer possibility that a defendant has acted unlawfully." *Id.* (citing *Twombly, 550 U.S. at 556*). "Where a complaint pleads facts that are 'merely consistent with' a defendant's liability, it 'stops short of the line between possibility and plausibility of "entitlement to relief."'" *Id.* (quoting *Twombly, 550 U.S. at 557*). Thus, if the facts pleaded in the complaint "do not permit the court to infer more than a mere possibility of misconduct, the complaint has alleged — but it has not 'show[n]' - 'that the pleader is entitled to relief.'" *Id. at 679* (quoting *Fed. R. Civ. P. 8(a)(2)*).

In considering a *Rule 12(b)(6)* motion to dismiss for failure to state a claim, a court employs the two-pronged approach utilized in *Twombly*. The court "can choose to begin by identifying pleadings that, because they are no more than conclusions [unsupported by factual allegations], are not entitled to the assumption of truth." *Iqbal, 556 U.S. at 679*. However, "[w]hen there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement to relief." *Id.* "[The] task, then, is to determine whether the plaintiff has stated a legally cognizable claim that is plausible, not to evaluate the plaintiff's likelihood of success." *Body by Cook, Inc. v. State Farm Mut. Auto. Ins., 869 F.3d 381, 385 (5th Cir. 2017)* (quoting *Doe v. Covington County Sch. Dist., 675 F.3d 849, 854 **[*198]** (5th Cir. 2012)* (internal **[**19]** quotation marks and citation omitted)). Motions to dismiss are disfavored and rarely granted. *Turner v. Pleasant, 663 F.3d 770, 775 (5th Cir. 2011)* (citing *Harrington v. State Farm Fire & Cas. Co., 563 F.3d 141, 147 (5th Cir. 2009)*).

A court's review of a *Rule 12(b)(6)* motion to dismiss "is limited to the complaint, any documents attached to the complaint, and any documents attached to the motion to dismiss that are central to the claim and referenced by the complaint." *Lone Star Fund V (US), LP v. Barclays Bank PLC, 594 F.3d 383, 387 (5th Cir. 2010)* (citing *Collins v. Morgan Stanley Dean Witter, 224 F.3d 496, 498-99 (5th Cir. 2000)*. A court may also take judicial notice of certain

---

[65] *Id.* at 10 (citing R. Doc. 79-6).

matters, including public records and government websites. *Dorsey v. Portfolio Equities, Inc., 540 F.3d 333, 338 (5th Cir. 2007)*; *see also* *Kitty Hawk Aircargo, Inc. v. Chao., 418 F.3d 453, 457 (5th Cir. 2005)*. Thus, in weighing a *Rule 12(b)(6)* motion, district courts primarily look to the allegations found in the complaint, but courts may also consider "documents incorporated into the complaint by reference or integral to the claim, items subject to judicial notice, matters of public record, orders, items appearing in the record of the case, and exhibits attached to the complaint whose authenticity is unquestioned." *Meyers v. Textron, Inc., 540 F. App'x 408, 409 (5th Cir. 2013)* (citing *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)*).

2. Defendants' Capacity to be Sued

Rule 17(b) of the Federal Rules of Civil Procedure defines the capacity of persons to be sued: the capacity of "an individual who is not acting in a representative capacity" is determined "by the law of the individual's domicile," *Fed. R. Civ. P. 17(b)(1)*; a corporation's capacity to be sued is determined "by the law under which it was organized," *id.* *17(b)(2)*; and "for **[**20]** all other parties," the capacity to be sued is determined "by the law of the state where the court is located, except that ... a partnership or other unincorporated association with no such capacity under that state's law may sue or be sued in its common name to enforce a substantive right existing under the United States Constitution or laws." *Id.* *17(b)(3)(A)*. The "law" of the state includes the "whole law," that is, both statutes and judicial decisions. *Klebanow v. N.Y. Produce Exch., 344 F.2d 294, 297 (2d Cir. 1965)*.

Defendants submit that the Board, MEC, and Credentials Committee should be dismissed because they lack the capacity to be sued because they are mere divisions of TRMC, the proper corporate defendant that is vested with the capacity to be sued under *La. R.S. 46:1060*. Defendants contend that the Board, MEC, and Credentials Committee are not unincorporated associations under *Rule 17(b)(3)* that have a separate identity from TRMC. Rather, Defendants suggest that these entities only exist as bodies of TRMC. For instance, while the Board acts as the "governing body" of TRMC, it does not "possess a corporate identity, the ability to own property (including any funds used to pay judgments), or the ability to sue or be sued."[66] Instead, say Defendants, those rights are vested **[**21]** in TRMC. Similarly, Defendants contend that "the MEC and Credentials Committee are merely internal committees of TRMC's medical staff and serve as the medical staff's representatives to the Board" with "no legal identity, no capacity to contract or be sued, and no ability to pay any judgment rendered against them."[67]

[*199] Dr. Morice responds that Louisiana law recognizes that the Board exists independently from a hospital service district such as TRMC as its governing body, and so too the committees that govern and review the credentials of the medical staff. For instance, *La. R.S. 46:1053* requires the Board to serve as an independent entity of the hospital service district, and *section 46:1055* grants the Board authority to "promulgate rules ... governing the conduct of the hospital," "conduct hearings and pass upon complaints by or against any officer or employee of the district," and appoint a director of the hospital and certain committees. *La. R.S. 46:1053* & *1055*.[68] Pursuant to the Bylaws, Dr. Morice asserts that the Board also makes the final decision in appointing physicians to the medical staff and granting privileges, after considering recommendations by the Credentials Committee and the MEC.[69] Dr. Morice also cites several Louisiana state **[**22]** cases and two federal cases in which the board of a hospital service district and/or committees were named as defendants.[70] In *Giles*, for example, the Louisiana Supreme

Court issued a writ of mandamus to the board of commissioners of the St. Tammany Parish Hospital District to admit Dr. Giles to active staff membership at the St. Tammany Parish Hospital. *160 So. 2d at 618*.

The Board, MEC, and Credentials Committee are not corporations. Thus, these entities fall under the category of "all other parties" in *Rule 17(b)(3)*, and their capacity to be sued is governed by the law of Louisiana, the state in which this Court sits. In Louisiana, "[a]n entity must qualify as a juridical person to have the capacity to be sued." *Dejoie v. Medley, 945 So. 2d 968, 972 (La. App. 2006)* (citing *Dugas v. City of Breaux Bridge Police Dep't, 757 So. 2d 741 (La. App. 2000)*). "A juridical person is an entity to which the law attributes personality, such as a corporation or a partnership. The personality of a juridical person is distinct from that of its members." *La. Civ. Code art. 24*. The Louisiana Code of Civil Procedure lists specific juridical persons with capacities to be sued, including corporations and unincorporated associations. *La. Code Civ. P. arts. 738* & *739*. Unincorporated associations are "created in the same manner as a partnership, by a contract between two **[**23]** or more persons to combine their efforts, resources, knowledge or activities for a purpose other than profit or commercial benefit." *Ermert v. Hartford Ins. Co., 559 So. 2d 467, 473 (La. 1990)*. Political subdivisions of the state are also considered juridical persons with the capacity to be sued. *See Roberts v. Sewerage & Water Bd. of New Orleans, 634 So. 2d 341, 347 (La. 1994)*; *see also La. Const. art. 12, § 10*.

Here, TRMC is a hospital service district created pursuant to Louisiana law, which authorizes and empowers parish police juries to create and form hospital service districts. *La. R.S. 46:1051*. It is well-established that hospital service districts are political subdivisions of the state. *Id. 46:1064(A)*; *Bertrand v. Sandoz, 260 LA. 239, 255 So. 2d 754, 756-59 (La. 1971)*. *Louisiana Revised Statute 46:1060* **[*200]** grants corporate powers, such as "perpetual existence," "the power and right to incur debts and contract obligations" and "to sue and be sued," to hospital service districts. *See Wash. Par. Police Jury, 152 So. 2d at 367-69* (interpreting *La. R.S. 46:1060* to mean that a hospital service district cannot be terminated by a police jury once it is created absent express constitutional or legislative authorization).

Once a hospital district is formed or created, a "board of five commissioners," also referred to as "the commission," is appointed by the police jury of the parish. *La. R.S. 46:1053*. Each commissioner must be a qualified voter and resident of the district, and each serves varying limited terms. *Id. Section 46:1055* sets out duties **[**24]** and authorities of the commission "[i]n addition to the duties defined elsewhere in this Chapter [concerning hospital service districts]," including "[t]o represent the public interest in providing hospital and medical care in the district"; "[t]o advise the police jury and the hospital director on problems concerning the operation of the hospital"; "[t]o make, alter, amend, and promulgate rules and regulations governing the conduct of the hospital"; "[t]o conduct hearings and pass upon complaints by or against any officer or employee of the district"; "[t]o review and modify, or set aside any action of the officers or employees of the district which the commission may determine to be desirable or necessary in the public interest"; "[t]o appoint, with approval of the medical staff, a director of the hospital"; "[t]o appoint necessary standing and special committees which may be necessary to carry out the purposes of this Chapter"; and "[t]o enter into lease agreements with recognized and duly constituted nonprofit associations which are primarily engaged in the operation of hospitals." *La. R.S. 46:1055*.

Both the "hospital service districts," such as TRMC, "and the governing bodies created under the **[**25]** provisions of this chapter," such as the Board, MEC, and Credentials Committee, have the "objects and purposes" of "own[ing] and operat[ing] hospitals"; "administer[ing] other activities related to rendering care to the sick and injured"; "promot[ing] and conduct[ing] scientific research and training ... in connection with the hospital"; "promot[ing] the general health of the community"; and "cooperat[ing] with other public and private institutions and agencies engaged in providing hospital and other health services to residents of the district." *La. R.S. 46:1052*.

a. The Board

Comm'rs for Vermilion Hosp. Serv. Dist. No. 1, 378 So. 2d 919, 922 (La. 1979); ***Giles v. Breaux, 160 So. 2d 608 (La. App. 1964)***; *Wash. Par. Police Jury v. Wash. Par. Hosp. Serv. Dist. No. 1, 152 So. 2d 362 (La. App. 1963)*).

The Board is plainly not an unincorporated association because it was not created by parties through contract, but by the appointment of a police jury authorized to do so by statute. *La. R.S. 46:1053*. A slightly more difficult question is whether the Board has capacity to be sued as a juridical person with distinct personality, separate and apart from the political subdivision of TRMC. *See* *La. Civ. Code art. 24*. In *Roberts*, the Louisiana Supreme Court held that "[i]n the absence of positive law to the contrary, a local government unit may be deemed to be a juridical person separate and distinct from other government entities, when the organic law grants it the legal **[**26]** capacity to function independently and not just as the agency or division of another governmental entity." *634 So. 2d at 347*. "Such a determination will depend on an analysis of specifically what the entity is legally empowered to do." *Id.*

Using this "functional approach," the supreme court held that the Sewerage and Water Board of New Orleans had a juridical personality with capacity to be sued under the *Louisiana Workers Compensation Act*. **[*201]** *Id.* Despite the fact that the political subdivision of the Sewerage and Water Board was "closely related" to the political subdivision of the City of New Orleans, the supreme court found that the Sewerage and Water Board was "legally independent of the City, state and other governments in its source of revenues; the employment, deployment, direction and control of its work force; and the comprehensive management of its public utility operations." *Id. at 346-47*. While composed of appointed citizens and local government officials, the Sewerage and Water Board was authorized to "elect an executive director" and general superintendent and fix their salaries; to "employ all ... employees necessary to operate the public sewerage, water and drainage systems"; to "dispense with the services **[**27]** of unnecessary employees"; to establish and regulate employee pension funds; to acquire and expropriate property; to conduct and make rules and regulations regarding underground construction; to enter into consumer contracts; and to fix rates to consumers, some subject to approval by other local governmental entities. *Id. at 347-48*.

Applying the "functional approach" used in *Roberts*, this Court concludes that the Board is merely a governing body of TRMC without an independent capacity to be sued. Unlike the Sewerage and Water Board in *Roberts*, the Board here does not directly employ a staff or manage their pay, acquire or expropriate property, enter into consumer contracts, or set rates for hospital services. Rather, the Board's primary function is to govern the hospital as the representative of the public interest. In so doing, the Board sets regulations for hospital conduct, selects a competent director, and monitors the physicians to ensure that the hospital provides for the public welfare as contemplated in *La. R.S. 46:1052*. Moreover, as with the police department in *Dugas*, "[s]tate law is silent on whether [the Board] has the capacity to sue or be sued and no local ordinance was introduced to show that [the **[**28]** Board] is granted this capacity." *Dugas, 757 So. 2d at 744*. Rather, the power to sue and be sued is explicitly vested in TRMC. *La. R.S. 46:1060*.

While Dr. Morice cites several cases in which a board of commissioners was named a defendant, these cases are distinguishable or easily explained. First, none of the cases addresses the capacity to be sued, and, indeed, capacity is a waivable defense. *Myers v. Manchester Ins. & Indem. Co., 572 F.2d 134, 134 (5th Cir. 1978)* (failure to object to lack of capacity until post-trial conference constituted waiver of challenge to capacity); *Kennard v. St. James Par. Sch. Bd., 218 So. 3d 680, 683-84 (La. App. 2017)* (upholding waiver of dilatory exception of lack of procedural capacity not pleaded prior to or in answer). Second, the federal cases do not indicate that the commission was a defendant in the case, even if named in the caption. In *Leckelt*, the defendants were "the Board of Commissioners of Hospital District No. 1, Terrebone Parish, Louisiana, [and] the individual commissioners." *909 F.2d at 824*. Thus, the board was referenced only in relation to the defendant hospital district, the real party in interest. Similarly, in *Fremaux*, the court treated the named defendant, "the Board of Commissioners of Hospital Service District No. 3 of Lafourche Parish d/b/a Thibodeaux Hospital and Health Centers," as one and the same with the hospital service **[**29]** district for purposes of *La. R.S. 46:1064(A)*. *1997 U.S. Dist. LEXIS 4098, 1997 WL 159483, at *2*. Third, the Board here holds the same position with respect to the hospital district (TRMC) as does a board of directors with respect to a corporation. *See, e.g.,* *Wells v. Fandal, 136 So. 3d 83, 85 (La. App. 2014)* (board of directors and its unnamed secretary and treasurer were "not juridical person[s] and lack[ed] the requisite capacity" to be sued, because **[*202]** Louisiana law defines a "juridical person [as] an entity to which the law attributes personality, such as a corporation"). In sum, the proper Defendant is the political subdivision, TRMC, which has the capacity to be sued, not its governing body.

b. The MEC and Credentials Committee

The MEC and Credentials Committee were created in Article XIV of the Bylaws.[71] Thereunder, "[c]ommittee members and committee chairpersons, unless otherwise so designated, will be appointed by the Chief of Staff for one year terms and approved by the Medical Executive Committee."[72] *Section 1* provides that the composition of the MEC "shall consist of the officers of the Medical Staff and two (2) members at large elected by the Medical Staff for one-year terms," and further lists the duties of the MEC, including to act on behalf of the medical staff, coordinate policies of the medical staff, **[**30]** "provide liaison between Medical Staff, Administration, and the Board," "initiate corrective review measures when appropriate," "monitor the effective performance of staff functions as provided in these bylaws or as the Board may reasonably require," and "directly recommends to the ... Board issues relative to performance improvement structure, activities, and participation; through the quality improvement program, practitioners, procedures, and/or diagnoses are reviewed for all patients for provision of the same level of quality patient care by all individuals with delineated clinical privileges."[73]

Section 2 provides that the composition of the Credentials Committee will "consist of five (5) members of the active Medical Staff selected on a basis that will ensure representation of the major clinical specialties of the Staff at large," and lists two duties: (1) "to review the credentials of all applicants and to make recommendations for membership and delineation of clinical privileges"; and (2) "to make a written report to the [MEC] on each applicant for Medical Staff appointment/reappointment, delineation or renewal of clinical privileges."[74] Both committees are required to convene for periodic, **[**31]** members-only meetings and maintain a record of their "recommendations and actions taken."[75]

The Bylaws constitute "a contract between two or more persons to combine their efforts, resources, knowledge or activities for a purpose other than profit or commercial benefit" that evinces an intent to create an unincorporated association. *Ermert, 559 So. 2d at 473*. "[F]or an unincorporated association to possess juridical personality, the object of the contract of association must necessarily be the creation of an entity whose personality 'is distinct from that of its members.'" *Id. at 474* (citing *La. Civ. Code art. 24*). The Bylaws for TRMC were adopted and approved by its medical staff and Board in part to "provide a means whereby issues concerning the Medical Staff and the medical center may be discussed by the Medical Staff with the [Board] and the Chief Administrative Officer."[76] The Bylaws as a whole do not create the committees as independent unincorporated associations having the capacity to be sued. Rather, as alleged by Dr. Morice, the Bylaws constitute a contract between himself, as a member of the medical staff, and Defendants to govern the rights and obligations between the medical staff and TRMC. The committees merely function to help **[**32]** govern this **[*203]** relationship. Therefore, the committees are not unincorporated associations under Louisiana law.

Nor do the committees' powers demonstrate that they are juridical entities capable of being sued under *Roberts*. While the MEC and Credentials Committee are authorized to take initial actions regarding a physician's grant or denial of privileges, their recommendations are ultimately subject to approval by the Board, acting on behalf of TRMC, which may override any committee recommendation.[77] Thus, the scope of power that the MEC and

---

[71] R. Doc. 77-3 at 46-48.

[72] *Id.* at 46.

[76] *Id.* at 1, 7.

[77] *Id.* at 28-30, 37-42.

Credentials Committee wields is narrow and advisory. The Bylaws do not purport to give the MEC or Credentials Committee the ability to acquire or alienate property, enter into contracts, set prices, or act in a way that demonstrates independence from TRMC. Rather, the committees function as administrative units or divisions of TRMC to ensure quality performance of the hospital.

In conclusion, the Board, MEC, and Credentials Committee lack the capacity to be sued. TRMC is the proper defendant.

3. Immunity under *HCQIA* and *La. R.S. 13:3715.3(C)*

The *HCQIA* provides immunity to health care providers against certain claims for money damages brought by participants in professional **[**33]** peer review actions. *42 U.S.C. § 1111, et seq.*; *see* *Poliner v. Tex. Health Sys., 537 F.3d 368, 376, 381 (5th Cir. 2008)* (*HCQIA* does not apply to claims for injunctive and declaratory relief); *Monroe v. AMI Hosps. of Tex., Inc., 877 F. Supp. 1022, 1028 (S.D. Tex. 1994)* (noting that *HCQIA* does not apply to *§ 1983* or *Title VII* claims) (citing *Austin v. McNamara, 979 F.2d 728, 733 (9th Cir. 1992)*). Immunity covers claims arising out of "professional review actions" when such action has been taken:

> (1) in the reasonable belief that the action was in the furtherance of quality health care,
> (2) after a reasonable effort to obtain the facts of the matter,
> (3) after adequate notice and hearing procedures are afforded to the physician involved or after such other procedures as are fair to the physician under the circumstances, and
> (4) in the reasonable belief that the action was warranted by the facts known after such reasonable effort to obtain facts and after meeting the requirement of paragraph (3).

42 U.S.C. § 11112(a). A "professional review action" is defined, in part, as "an action or recommendation of a professional review body which is taken or made in the conduct of professional review activity, which is based on the competence or professional conduct of an individual physician (which conduct affects or could affect adversely the health or welfare of a patient or patients), and which affects (or may affect) adversely the clinical privileges, **[**34]** or membership in a professional society, of the physician." *Id.* *§ 11151(9)*. "A professional review action shall be presumed to have met the preceding standards necessary for the protection [*viz.*, immunity from monetary liability] set out in *section 1111(a)* of this title unless the presumption is rebutted by a preponderance of the evidence." *Id.* *§ 11112(a)*

Section 13.3715.3 of the Louisiana Revised Statutes shares the same legislative purpose and scope as the *HCQIA* of "promoting effective peer review" by "encourage[ing] the medical profession to police its own activities with minimal judicial involvement." *Smith v. Our Lady of the Lake Hosp., 639 So. 2d 730, 742-43 (La. 1994)*. Immunity from claims for damages **[*204]** extends to a "committee member act[ing] without malice and in the reasonable belief that such action or recommendation is warranted by the facts known to him." *La. R.S. 13:3715.3(C)*. The Louisiana Supreme Court has interpreted this provision to impose upon the plaintiff the initial burden of establishing lack of malice and good faith. *Smith, 639 So. 2d at 746-47, 750*. "[L]ack of 'malice' and 'good faith' exists in this context when the defendants-peer review committee members are shown to have a reasonable basis for their action or recommendation made in the course of the peer review process," a "formulation ... consistent with that set forth in the federal *HCQIA* counterpart provision." **[**35]** *Id. at 749*.

Defendants contend that immunity applies because Dr. Morice's complaint acknowledges that a hearing-and-appeal process was conducted by Defendants in response to five instances of allegedly incompetent or unprofessional behavior upon which his suspension was based.[78] While Dr. Morice concedes that Defendants implemented a hearing-and-appeal process, he contends that it was not premised upon competence or professional conduct. Instead, Dr. Morice alleges that his suspension and denial of privileges were based upon fabricated allegations and that the reviewing committees "rubber-stamped" the recommendations and conclusions without considering the evidence before them.[79] Such allegations, when accepted as true, compromise Defendants' satisfaction of the

---

[78] R. Doc. 77-1 at 11.

HCQIA's four-element test. Immunity is thus inappropriate at the motion-to-dismiss stage. *See, e.g.*, Brader v. Allegheny Gen. Hosp., 64 F.3d 869, 879-80 (3d Cir. 1995) (denying motion to dismiss where plaintiff "alleged that the defendants have failed to satisfy the requirements of HCQIA immunity"); Zamanian v. Jefferson Par. Hosp. Serv. Dist. No. 2, 2017 U.S. Dist. LEXIS 128657, 2017 WL 3480993, at *4-5 (E.D. La. Aug. 14, 2017) (denying motion to dismiss even where plaintiff's allegations did not rebut presumption of immunity to provide plaintiff "'with an opportunity to conduct further discovery' given that this matter is still in **[**36]** the early stages of litigation and immunity is often invoked on a motion for summary judgment, not a motion to dismiss") (quoting Onel v. Tenet Healthsystems, 2003 U.S. Dist. LEXIS 20071, 2003 WL 22533616, at *2 (E.D. La. Oct. 31, 2003)).

4. Immunity under La. R.S. 9:2798.1

Defendants submit that they are also entitled to immunity under La. R.S. 9:2798.1, which provides immunity for public entities for "policymaking or discretionary acts when such acts are within the course and scope of their lawful powers and duties." La. R.S. 9:2798.1(B). However, immunity does not apply "(1) [t]o acts or omissions which are not reasonably related to the legitimate governmental objective for which the policymaking or discretionary power exists; or (2) [t]o acts or omissions which constitute criminal, fraudulent, malicious, intentional, willful, outrageous, reckless, or flagrant misconduct." *Id.* 9:2798.1(C). As discussed above, even setting to one side Dr. Morice's allegations of Defendants' illegitimate anticompetitive acts, his allegations that TRMC's committees disregarded evidence concerning the charges against him raise plausible concerns of misconduct. Therefore, dismissal is inappropriate at this juncture.

[*205] 5. Immunity under the Bylaws

Defendants assert that the Bylaws provide immunity from all of Dr. Morice's claims. Defendants contend that Dr. **[**37]** Morice agreed to abide by the Bylaws when he applied for privileges at TRMC, and so waived his right to sue Defendants, as did the plaintiff in Deming v. Jackson-Madison County General Hospital District, 553 F. Supp. 2d 914, 938 (W.D. Tenn. 2008).[80] Dr. Morice does not challenge his assent to the immunity provision, but argues that the Bylaws provide only for immunity from claims related to the disclosure of information.[81] The disputed provision is Article XVII, "Immunity From Liability," which provides in pertinent part:

> SECTION 1: Privileged Information
>
> Any act, communication, recommendation, report, or disclosure, with respect to any individual, performed or ***made in good faith and without malice*** and at the request of an authorized representative of this or any other health care facility, for the purpose of assuring quality patient care, will be privileged to the fullest extent permitted by law.
>
> ...
>
> SECTION 3: Immunity From Liability for Disclosing Information
>
> There will, to the fullest extent permitted by law, be absolute immunity from civil liability arising from ***any such*** communication, recommendation, report, or disclosure, even where the information involved would otherwise be deemed privileged.
>
> SECTION 4: Scope of Immunity

---

[79] *See, e.g.*, R. Doc. 64 at 13-16. Although Defendants contend that Dr. Morice's allegations are too conclusory to withstand a motion to dismiss, the Court disagrees. Dr. Morice's allegations recite specific instances in the hearing-and-appeal process in which Defendants are said to have ignored evidence exonerating Dr. Morice from the charges brought against him. The Court is compelled to accept these allegations as true at this stage of the case.

[80] R. Doc. 77-1 at 14 (citing R. Doc. 77-3 at 10).

[81] R. Doc. 82 at 21.

> ***Such immunity*** will apply to all acts, communications, recommendations, reports, or disclosures **[**38]** performed or made in connection with this or any other health care institution's activities related, but not limited to:
>
> a. Application for appointment or clinical privileges;
> b. Periodic reappraisals for reappointment or clinical privileges;
> c. Corrective action, including summary, temporary, and automatic suspensions;
> d. Hearings and/or other reviews ....[82]

Under Louisiana's rules for contract interpretation,[83] the Bylaws provide for immunity limited to the disclosure of privileged information. This is apparent by reading the provisions together,[84] each being connected by the word "such." Section 1 of Article XVII defines a privileged communication as "[a]ny Act, communication, recommendation, report, or disclosure, with respect to any individual, performed or made in good faith and without malice and at the request of an authorized representative of this or any other health care facility, for the purpose of assuring quality patient care." Section 2 extends absolute immunity to "***[a]ny such*** communication, recommendation, report, or disclosure." But Section 3 limits the scope of "***[s]uch immunity***" to the disclosure of privileged communications concerning, as relevant here, actions on an application for clinical privileges, the suspension **[**39]** of privileges, or the hearing-and-appeal process. Immunity, then, is limited to claims arising from the disclosure of privileged communications related to the peer review process. Unlike the clause of sweeping immunity in *Deming*, the immunity conferred by the Bylaws **[*206]** does not apply to the gamut of Dr. Morice's claims. Because "privileged communications" are defined in part as those "made in good faith and without malice," the Court cannot determine at the pleadings stage which, if any, constitute those that may be enforced to bar Dr. Morice's claims related to the disclosure of information. Therefore, Defendants' motion to dismiss on this ground must also be denied at this stage of the case.

6. Primary Jurisdiction Doctrine

Defendants next submit that the entirety of the case should be stayed under the primary jurisdiction doctrine pending completion of the hearing-and-appeal process concerning TRMC's decision to deny Dr. Morice's application for reinstatement of his obstetrical privileges.[85] Defendants contend that the circumstances here are similar to those in *Rogers v. Columbia/HCA of Central Louisiana, 961 F. Supp. 960, 968 (W.D. La. 1997)*, where the court stayed, pending exhaustion of his administrative remedies, a physician's suit against a hospital alleging **[**40]** antitrust and defamation claims as well as violations of due process for revoking the physician's privileges. Dr. Morice responds that it would be impractical to "carve out and stay this single claim ... when the claim is closely related to the numerous other claims currently before the Court" that are ripe for decision.[86]

"'The doctrine of primary jurisdiction ... is a doctrine of judicial abstention whereby a court which has jurisdiction over a matter, nonetheless defers to an administrative agency for an initial decision on questions of fact or law within the peculiar competence of the agency.'" *Occidental Chem. Corp. v. La. Pub. Serv. Comm'n, 810 F.3d 299, 309 (5th Cir. 2016)* (quoting *REO Indus., Inc. v. Nat. Gas Pipeline Co. of Am., 932 F.2d 447, 455 (5th Cir. 1991)*). Three prerequisites must exist before a court may exercise its discretion to stay the matter: "(1) the court has original jurisdiction over the claim before it; (2) the adjudication of that claim requires the resolution of predicate issues or the making of preliminary findings; and (3) the legislature has established a regulatory scheme whereby it

[85] R. Doc. 77-1 at 16-17. Again, the Court has not been apprised whether this process is now complete. 27

[86] R. Doc. 82 at 22.

has committed the resolution of those issues or the making of those findings to an administrative body." *Northwinds Abatement, Inc. v. Emp'rs Ins. of Wausau, 69 F.3d 1304, 1311 (5th Cir. 1995)*. "No fixed formula exists for applying the doctrine of primary jurisdiction. In every case the question is whether the reasons for **[**41]** the existence of the doctrine are present and whether the purposes it serves will be aided by its application in the particular litigation." *Occidental Chem., 810 F.3d at 309* (internal quotation marks and citation omitted). Generally, the court defers to the regulatory forum "based on its determination that the benefits of obtaining aid from that other forum outweigh the need for expeditious litigation." *Id. at 302*.

For instance, in *Rogers*, defendants urged that dismissal under the doctrine of administrative exhaustion was appropriate because the plaintiff had not exhausted the internal review procedures available to him in the hospital bylaws. *961 F. Supp. at 964*. Finding the doctrine of administrative exhaustion inapplicable, the court applied the doctrine of primary jurisdiction. *Id. at 966*. The court reasoned that it could not determine whether defendants were immune under the *HCQIA* and *La. R.S. 13:3715.3* until the peer review process was complete. *961 F. Supp. at 966*. The court further reasoned that "[t]he exhaustion of the **[*207]** administrative process also will allow for the development of a full factual record" and also "give the defendants a chance to discover and correct their own errors, if any exist," thus promoting judicial economy. *Id. at 966, 968*. Additionally, the court explained that the *HCQIA* **[**42]** and its Louisiana counterpart and regulations governing disclosure of information to the National Practitioner Data Bank constituted regulatory schemes that entrusted a professional peer review committee with the responsibility to determine the facts related to the suspension of a physician's privileges. *Id. at 967-68*. The court noted that "the expertise of professional peer review committees makes them specially qualified to make findings as to the competence of fellow physicians," and that "the evaluation of professional proficiency of physicians is best left to their peers, subject only to limited judicial surveillance." *Id. at 968* (citing *Sosa v. Bd. of Managers of Val Verde Mem'l Hosp., 437 F.2d 173, 177 (5th Cir. 1971)*). Finally, the court concluded that no exception existed that would bar the invocation of the primary jurisdiction doctrine. *Id.*

The posture of this case is distinguishable from *Rogers*. Here, Dr. Morice asserts claims that relate to at least one completed peer review process. While Dr. Morice's supplemental and amending complaint also asserts claims related to a peer review process that was ongoing at the time Dr. Morice amended his complaint in March 2019, significant time has passed since that filing, and the peer review process is likely complete. Therefore, unlike **[**43]** *Rogers*, granting a stay here will not promote judicial economy. Additionally, the Court perceives no reason why it cannot resolve this motion to dismiss on the factual allegations in the amended complaint. As discussed above, Dr. Morice has made allegations in his amended complaint that TRMC's reviewing committees ignored evidence when considering his suspension. These allegations may also bear upon the subsequent denial of his application for reinstatement of his obstetrical privileges. Given the procedural posture of the case, the Court declines to apply the primary jurisdiction doctrine at this time. Should any party or parties wish to inform the Court of any proceedings that would materially affect this analysis, they may file a motion for reconsideration.

7. Antitrust Claims (Counts I & II)

Defendants next assert that Dr. Morice fails to properly allege an antitrust claim. Specifically, Defendants argue that Dr. Morice (1) fails to allege an antitrust injury, (2) is not a proper party to assert antitrust claims, (3) fails to allege a restraint of trade, and (4) fails to properly allege a relevant market.[87]

a. Standing under the *Sherman Act*

"Standing to pursue an antitrust suit exists **[**44]** only if a plaintiff shows: 1) injury-in-fact, an injury to the plaintiff proximately caused by the defendants' conduct; 2) antitrust injury; and 3) proper plaintiff status, which assures that other parties are not better situated to bring suit." *Doctor's Hosp. of Jefferson, Inc. v. Southeast Med. All., Inc., 123 F.3d 301, 305 (5th Cir. 1997)*. Accordingly, an "[a]ntitrust injury must be established for the plaintiff to have standing

---

[87] R. Doc. 77-1 at 18-22.

under section 1 or section 2 of the Sherman Act." *Id.* (citing Bell v. Dow Chem. Co., 847 F.2d 1179, 1182 (5th Cir. 1988)). The Supreme Court has defined an "antitrust injury" as an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by **[*208]** the violation." Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977). Accordingly, "the standing inquiry ... ensures that the plaintiff's demand for relief ultimately serves the purposes of ***antitrust law*** to increase consumer choice, lower prices and assist competition, not competitors." Doctor's Hosp., 123 F.3d at 306. The Fifth Circuit instructs that "antitrust injury for standing purposes should be viewed from the perspective of the plaintiff's position in the marketplace, not from the merits-related perspective of the impact of a defendant's conduct on overall competition." Id. at 305. The **[**45]** "proper plaintiff" inquiry examines "(1) whether the plaintiff's injuries or their causal link to the defendant are speculative, (2) whether other parties have been more directly harmed, and (3) whether allowing this plaintiff to sue would risk multiple lawsuits, duplicative recoveries, or complex damage apportionment." Norris v. Hearst Tr., 500 F.3d 454, 465 (5th Cir. 2007) (quoting McCormack v. Nat'l Collegiate Athletic Ass'n, 845 F.2d 1338, 1341 (5th Cir. 1988)).

Defendants argue that Dr. Morice fails to allege an actionable antitrust injury because he does not allege anything more than personal harm, such as loss of income and loss of patient referrals.[88] Defendants contend that to maintain an antitrust claim, Dr. Morice must allege an injury that "affect[s] the prices, quantity, or quality of goods or services and not just his own welfare."[89] To that end, Defendants also argue that Dr. Morice is not the proper plaintiff to assert antitrust claims against them because he is not a patient or third-party payor, the persons who would be injured by the unlawful anticompetitive conduct he alleges.[90] In opposition, Dr. Morice cites Brader v. Allegheny General Hospital, 64 F.3d 869 (3d Cir. 1995), to contend that dismissal is inappropriate where the pleadings indicate a hospital's termination of privileges excluded a plaintiff-physician from competition in the relevant market.[91] In *Brader*, **[**46]** the Third Circuit rejected arguments that the plaintiff failed to allege an antitrust injury and was a "poor champion of consumers," arguments nearly identical to Defendants' here, finding that the "type of injury alleged by [the plaintiff] (the loss of income due to an inability to practice in the relevant market area) is directly related to the illegal activity in which the defendant allegedly engaged: a conspiracy to exclude [the plaintiff] from the relevant market." Id. at 877. The court further noted that the existence of an antitrust injury is typically resolved after discovery and not on a motion to dismiss. Id. at 876 (citing Summit Health, Ltd. v. Pinhas, 500 U.S. 322, 111 S. Ct. 1842, 114 L. Ed. 2d 366 (1991)).

On this motion to dismiss, the Court finds Brader persuasive. Dr. Morice alleges that "Defendants are acting in a concerted manner to restrain trade and commerce by seeking to effectively restrict, limit, and terminate Plaintiffs' privileges at TRMC, which will have the effect of eliminating him from the competitive OB/GYN market in the region," and that such termination of privileges will result in the termination of his practice, which "employs dozens of local staff," and that his elimination from the market "will increase the price of OB/GYN services in the region." **[**47]** [92] These allegations are sufficient to state a claim under *Brader* of an antitrust injury. "If the plaintiff does not eventually **[*209]** produce evidence to create a material fact issue concerning an antitrust violation, then summary judgment should be granted on that basis." Doctor's Hosp., 123 F.3d at 306.

b. Restraint of trade

---

[88] R. Doc. 77-1 at 18.

[89] *Id.*

[90] *Id.* at 19.

[91] R. Doc. 82 at 23.

[92] R. Doc. 64 at 27.

Section 1 of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." 15 U.S.C. § 1. To prevail under this section, a plaintiff must show "'(1) the defendants engaged in a conspiracy; (2) that restrained trade; (3) in the relevant market.'" Benson v. St. Joseph Reg'l Health Ctr., 575 F.3d 542, 549 (5th Cir. 2009) (quoting Golden Bridge Tech., Inc. v. Motorola, Inc., 547 F.3d 266, 270 (5th Cir. 2008)).

Invoking *Benson*, Defendants contend that Dr. Morice's allegations that his suspension and the failure to reinstate his privileges do not amount to actionable "restraint of trade."[93] In *Benson*, a physician alleged that the hospital's denial of privileges resulted in anticompetitive effects to reduce consumer choice of providers and services. *Id. at 549-50*. The Fifth Circuit rejected the physician's argument on the merits, reasoning that, despite his inability to practice at the hospital, the physician was "free to provide services at his own clinic" in the **[**48]** same geographic area. *Id. at 549*. "The inability to service patients at the hospital of [plaintiff's] choice does not demonstrate an unreasonable adverse impact on OB/GYN services for the entire county." *Id.* (citing Doctor's Hosp., 123 F.3d at 309) (other citation omitted). Thus, the court affirmed summary judgment in favor of the hospital that did not renew the physician's privileges.

Dr. Morice argues that *Benson* is inapposite at this motion-to-dismiss stage, and further asserts that his allegations reflect those recognized in Bolt v. Halifax Hospital Medical Center, 891 F.2d 810 (11th Cir. 1990), *overruled in part on other grounds by* City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991).[94] In *Bolt*, the Ninth Circuit held that the plaintiff should have been permitted to introduce evidence of the hospital and medical staff's conspiracy to deny a physician's privileges on the basis of a sham peer review. *Id. at 820*. In finding the conspiracy's potential to create an anticompetitive effect under section 1 of the Sherman Act, the court recognized a rational economic motive for the conspiracy was the remaining doctors' ability to charge higher prices and exclude the physician from the profession. *Id.*

Here, Dr. Morice alleges that Defendants conspired to prevent him from providing obstetrical services in the relevant market by excluding him from the sole facility available **[**49]** in the region to provide such services. He further claims that Defendants benefit from his exclusion because they attain a monopoly on obstetrical services in the Thibodaux/Lafourche region and thus can charge higher prices.[95] These allegations align with those recognized in Bolt.

c. Relevant market

"To establish Section 2 violations premised on attempt and conspiracy to monopolize, a plaintiff must define the relevant market." *Doctor's Hosp., 123 F.3d at 311*. "To define a market is to identify producers that provide customers of a defendant firm (or firms) with alternative sources for the defendant's product or services." *Id.* (quotation and citation omitted). **[*210]** "Critically, evidence must be offered demonstrating not just where consumers currently purchase the product, but where consumers could turn for alternative products or sources of the product if a competitor raises prices." *Id.* (citations omitted).

Defendants contend that Dr. Morice's allegations lack "factual support that the relevant product and geographical market is medical entities that offer hospitalized obstetrical care in the Thibodaux/Lafourche region."[96] Defendants imply that Dr. Morice must, at this juncture, introduce evidence to support its allegations that the **[**50]** Thibodaux/Lafourche region is the relevant market for OB/GYN services. The Court disagrees. As Dr. Morice points out, Defendants rely upon cases that define the relevant market at the summary judgment stage.[97] *See, e.g.*,

---

[93] R. Doc. 77-1 at 20.

[94] R. Doc. 82 at 27.

[95] R. Doc. 64 at 10-13.

[96] R. Doc. 77-1 at 21.

Doctor's Hosp., 123 F.3d at 312 (considering plaintiff's expert report in rejecting plaintiff's narrow interpretation of the relevant market); *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 487-88 (5th Cir. 1984)* (after discovery, determining that "exceptional market conditions" did not exist to support a conclusion that one brand in a market of competing brands constituted a relevant product market). The decision in *PSKS, Inc. v. Leegin Creative Leather Products, Inc., 615 F.3d 412, 418 (5th Cir. 2010)*, the only case cited by Defendants involving a motion to dismiss that was granted, is distinguishable in that the court granted the motion after the case had been fully tried on the merits and vacated. In contrast, this Court has no evidence before it to evaluate whether the alleged relevant market for OB/GYN services is properly said to be the Thibodaux/Lafourche region. On this issue, *Brader* also makes clear that dismissal is inappropriate at the motion-to-dismiss stage where "there is some suggestion in the complaint and in the briefs that [the hospital] may offer unique ... services in the broader geographic ... area served by [the hospital]." *64 F.3d at 878*. Dr. **[**51]** Morice's complaint makes such a suggestion by alleging that "TRMC is the sole community provider of both inpatient and outpatient hospital services in Thibodaux, Louisiana. Other than Plaintiff's clinic, where he cannot provide hospitalized obstetrical care, TRMC is the sole provider of OB/GYN services in Thibodaux, Louisiana."[98] In sum, Dr. Morice's antitrust claims survive Defendants' motion to dismiss.

8. Breach of Contract and Bad Faith Breach of Contract (Counts III & IV)

To succeed on a breach-of-contract claim in Louisiana, a plaintiff must show "(1) the obligor's undertaking an obligation to perform, (2) the obligor failed to perform the obligation (the breach), and (3) the failure to perform resulted in damages to the obligee." *Favrot v. Favrot, 68 So. 3d 1099, 1108-09 (La. App. 2011)*. To prove a bad faith breach of contract, a plaintiff must show the defendant "intentionally and maliciously" failed to perform the obligation. *Olympia Minerals, LLC v. HS Resources, Inc., 171 So. 3d 878, 897 (La. 2014)* (quoting cmt. (b) to *La. Civ. Code art. 1997*). The Louisiana Supreme Court recognizes that the bylaws of a hospital's medical staff may form a contract between the physician and the hospital where the elements of a valid contract are met. *Granger, 144 So. 3d at 760-61*. The supreme court further recognizes that a hospital's performance of its obligations under its **[**52]** bylaws is measured by the "substantial compliance" rule. *Id. at **[*211]** 762-63* (discussing *Smith, 639 So. 2d at 755-56*). The substantial compliance rule teaches that, when evaluating a hospital's alleged breach of its bylaws, a court should view the hospital's conduct as a whole to determine whether the procedures it used undermined the bylaws' guarantees of fair procedure. *Smith, 639 So. 2d at 755-56*. "'Because the central purpose of the bylaws is to provide procedural fairness in reaching decisions regarding staff privileges, merely 'technical' violations or minor deviations in the procedures employed that do not result in material prejudice to the physician or otherwise undermine the result reached by the hospital will not rise to the level of 'breaches' of the hospital's obligation to comply with its bylaws.'" *Id. at 756* (quoting *Owens v. New Britain Gen. Hosp., 32 Conn. App. 56, 627 A.2d 1373, 1380 (Conn. App. Ct. 1993)*).

In neither their motion to dismiss nor their opposition to Dr. Morice's motion for partial summary judgment do Defendants deny the existence of a contract. Therefore, the Court will treat the Bylaws as a contract between Dr. Morice and TRMC for purposes of this motion. Rather, Defendants contend that Dr. Morice's allegations fail to state a breach-of-contract claim because, by alleging that Defendants conducted a hearing and appeal in **[**53]** relation to his suspension, and because it is uncontested that Dr. Morice is entitled to hearing and appeal on a denial of privileges, Dr. Morice has conceded that TRMC substantially complied with the Bylaws.[99] Defendants also assert that these same allegations and circumstances preclude a finding of bad faith because they acknowledge that TRMC attempted to fulfill, rather than circumvent, its obligations.[100] Dr. Morice maintains that the sum of his allegations evinces Defendants' malicious intent to breach the Bylaws and that the peer review process was a

---

[97] *Id.* at 20-21.

[98] R. Doc. 64 at 28.

[99] R. Doc. 77-1 at 22-23.

[100] *Id.* at 23-24.

"sham."[101] For example, Dr. Morice alleges that Defendants ignored certain evidence in their decisions concerning his suspension because they were motivated economically to exclude him from the market of obstetrical services. Viewed as a whole, the conduct alleged (which the Court must accept as true on a Rule 12(b)(6) motion) involves more than a minor deviation from or technical violation of the Bylaws. The Court finds, then, that these allegations are sufficient to state a cause of action against TRMC for breach of the Bylaws. The merits of this dispute cannot be resolved on a motion to dismiss but must await consideration on a motion for summary **[**54]** judgment or trial.

9. Tortious Interference with Contract (Count V)

Louisiana recognizes a narrow cause of action for tortious interference with contract against a corporate officer where the following elements are met:

> (1) the existence of a contract or a legally protected interest between the plaintiff and the corporation; (2) the corporate officer's knowledge of the contract; (3) the officer's intentional inducement or causation of the corporation to breach the contract or his intentional rendition of its performance impossible or more **[*212]** burdensome; (4) absence of justification on the part of the officer; (5) causation of damages to the plaintiff by the breach of contract or difficulty of its performance brought about by the officer.

9 to 5 Fashions v. Spurney, 538 So. 2d 228, 234 (La. 1989). In *9 to 5*, the Louisiana Supreme Court adopted this tort with respect to the limited duty owed by a corporate officer to the corporation "to refrain from intentional and unjustified interference with the contractual relation between his employer and a third person." *Id.* Louisiana courts have accordingly construed this cause of action narrowly and, in the broadest of constructions, consistently require a plaintiff to "identify a duty existing between **[**55]** it and the alleged tortfeasor, the violation of which would give rise to delictual liability." Taxicab Ins. Store, LLC v. Am. Serv. Ins. Co., 224 So. 3d 451, 458-60 (La. App. 2017); *see also* Petrohawk Props., L.P. v. Chesapeake La., L.P., 689 F.3d 380, 395-96 (5th Cir. 2012) (the alleged tortfeasor must owe a "narrow, individualized duty" to the plaintiff). Federal courts are particularly hesitant to expand the scope of the tort beyond that articulated in *9 to 5*. *See, e.g.*, Am. Waste & Pollution Control Co. v. Browning-Ferris, Inc., 949 F.2d 1384, 1390-91 (5th Cir. 1991) ("It took the Louisiana Supreme Court almost 90 years to recognize a quite narrow cause of action for tortious contractual interference; it is not for this diversity court to expand that cause of action in the face of Louisiana's expressed unwillingness to do so."); M & D Mineral Consultants, LLC v. Li, 2013 U.S. Dist. LEXIS 32678, 2013 WL 883689, at *4 (W.D. La. Mar. 7, 2013) ("any expansion of Louisiana's tortious interference law is a task properly contemplated by the state supreme court rather than this [c]ourt sitting in diversity"). In light of these considerations, courts find dismissal appropriate where the plaintiff fails to identify a corporate officer or articulate a narrow duty owed by the defendant to the plaintiff. *See, e.g.*, Petrohawk Props., 689 F.3d at 395-96 (corporate defendant owed no particular duty to plaintiff); Am.'s Favorite Chicken Co. v. Cajun Enters., Inc., 130 F.3d 180, 184-85 (5th Cir. 1997) (proper defendant is corporate officer rather than corporations); United States v. Cytogel Pharma, LLC, 2018 U.S. Dist. LEXIS 183172, 2018 WL 5297753, at *15 & n.197 (E.D. La. Oct. 25, 2018) (noting that district court could not apply broad interpretation of *9 to 5* pronounced in **[**56]** Neel v. Citrus Lands of La., Inc., 629 So. 2d 1299, 1301 (La. App. 1993), which permitted suit against corporation, absent intervening ruling from state supreme court); M & D Mineral Consultants, 2013 U.S. Dist. LEXIS 32678, 2013 WL 883689, at * 2-4 (dismissing action against manager of limited liability company).

Defendants contend that Dr. Morice's allegations fail to identify a corporate officer and thus should be dismissed.[102] Dr. Morice responds that his allegations show that "TRMC officers and agents," such as the MEC, acted outside the

---

101 R. Doc. 82 at 30-41. Dr. Morice also re-urges the grounds he presented in his motion for preliminary injunction, including the argument that TRMC's failure to reinstate Dr. Morice's privileges upon the end of his suspension violated Article XI of the Bylaws. *Id.* at 37-40. The Court again rejects Dr. Morice's position because a plain reading of the Bylaws reveals that lapsed privileges are only extended if a physician satisfies certain standards and follows the prescribed application process. Dr. Morice did not. R. Doc. 78 at 8-15.

102 R. Doc. 77-1 at 24.

scope of their authority and contrary to the duty they owed to TRMC.[103] For example, Dr. Morice claims that the MEC breached its fiduciary duty to the corporation by breaching its obligation under the Bylaws to conduct an impartial and empirical peer review.[104] These allegations, however, support no plausible claim for tortious interference cognizable within the limited scope of Louisiana jurisprudence. Because Dr. Morice fails to articulate a "narrow, individualized duty between the plaintiff and the alleged tortfeasor" or name a corporate officer, his claim for tortious interference with contract **[*213]** fails and must be dismissed. *See* *Petrohawk Props., 689 F.3d at 395-96*.

10. Abuse of Rights and Negligent Misrepresentation (Counts VI & VII)

The abuse of rights doctrine is a "civilian concept" enforced sparingly because its application "renders **[**57]** unenforceable one's otherwise judicially protected rights." *Truschinger v. Pak, 513 So. 2d 1151, 1154 (La. 1987)*; *see also* *Ill. Cent. Gulf R.R. Co. v. Int'l Harvester Co., 368 So. 2d 1009, 1013-14 (La. 1979)* (explaining origin of doctrine and rarity of application). A plaintiff states a cause of action for abuse of rights "when one of the following conditions is met: (1) the predominant motive for exercise of the right is to cause harm; (2) there is no legitimate motive for exercise of the right; (3) exercise of the right violates moral rules, good faith, or elementary fairness; or (4) exercise of the right is for a purpose other than that for which it was granted." *Mixon v. Iberia Surgical, L.L.C., 956 So. 2d 76, 81 (La. App. 2007)* (internal quotation marks and citation omitted). "If a party has a legitimate and serious interest in exercising a [legal] right, he may do so even if it causes harm to another. However, if a party does not have a legitimate and serious interest in the exercise of the right, and to do so would bring unnecessary harm to another, the doctrine of abuse of rights will bar exercise of the right." *Mass. Mut. Life Ins. Co. v. Nails, 549 So. 2d 826, 829 (La. 1989)* (citing *Breland v. La. Hosp. Servs., Inc., 468 So. 2d 1215, 1223 (La. App. 1984)*).

While Defendants contend that the suspension and denial of Dr. Morice's privileges was exercised in the legitimate and serious interest of patient safety,[105] Dr. Morice contends that Defendants' sole motive was that of financial gain.[106] The Court acknowledges **[**58]** that TRMC's right to regulate physician privileges may be exercised to advance legitimate and serious interests, and evidence of same may be easily developed. But no such record is before the Court, and at this stage, the Court is compelled to limit its review to the allegations in the complaint and, having done so, to deny the Defendants' motion to dismiss Dr. Morice's claim for abuse of rights.

Defendants also assert that Dr. Morice's claim for negligent misrepresentation fails as wholly conclusory.[107] His allegations of negligent misrepresentation are limited to the following: "Alternatively, or in addition, one or more of the Defendants have made negligent misrepresentations, causing harm and damages to Plaintiff. As such, Defendants' actions constitute ... misrepresentation under Louisiana law."[108] Understandably, Dr. Morice makes no argument in opposition to dismissal of this claim. The Court agrees with Defendants that Dr. Morice's negligent misrepresentation claim fails to meet the requisite pleading requirements. Accordingly, it is dismissed.

11. Intentional Infliction of Emotional Distress (Count VIII)

To prove intentional infliction of emotional distress in Louisiana, a plaintiff **[**59]** must show: "(1) that the conduct of the defendant was extreme and outrageous; (2) that the emotional distress suffered by the plaintiff was severe; and

---

[103] R. Doc. 82 at 40.

[104] *Id.* at 40-41.

[105] R. Doc. 77-1 at 25.

[106] R. Doc. 82 at 43.

[107] R. Doc. 77-1 at 25.

[108] R. Doc. 64 at 34.

(3) that the defendant desired to inflict severe emotional distress or knew that severe emotional distress would be certain or substantially certain to result from his conduct." *White v. Monsanto Co., 585 So. 2d 1205, 1209 (La. 1991)*. Extreme and outrageous conduct is that which exceeds "all possible **[*214]** bounds of decency" and is "regarded as atrocious and utterly intolerable in a civilized community." *Id.* "Liability does not extend to mere insults, indignities, threats, annoyances, petty oppressions, or other trivialities." *Id.* In the workplace setting, a claim for intentional infliction of emotional distress has been "limited ... to cases which involve a pattern of deliberate, repeated harassment over a period of time." *Nicholas v. Allstate Ins. Co., 765 So. 2d 1017, 1026-27 (La. 2000)* (citing *White, 585 So. 2d at 1205*; *Maggio v. St. Francis Med. Ctr., Inc., 391 So. 2d 948 (La. App. 1980)*). "The distress suffered by the employee must be more than a reasonable person could be expected to endure." *Id. at 1027*; *see also* *Goldberg v. Moses, 811 So. 2d 1165, 1167 (La. App. 2002)*. The distress must be extreme; a "lesser degree of fright, humiliation, embarrassment or worry" is insufficient. *Nicholas, 765 So. 2d at 1027* (citing *White, 585 So. 2d at 1210*); *see also* *Smith v. Amedisys, Inc., 298 F.3d 434, 450 (5th Cir. 2002)* (observing that Louisiana jurisprudence sets a high threshold for the severity prong).

Defendants contend that **[**60]** this claim should be dismissed because Dr. Morice's allegations gloss over any factual support for the nature of the harassment and severe emotional distress he allegedly suffered.[109] In response, Dr. Morice offers little more than a repeat of his allegations and the law.[110] His allegations are devoid of facts that would support actionable distress. Instead, Dr. Morice describes his harm in conclusory fashion as "mental anguish, loss of professional reputation," and "embarrassment."[111] It is reasonable for employees to suffer some degree of emotional distress resulting from an employer's corrective review, and without more, Dr. Morice's allegations fall into this unactionable category. *See* *Nicholas, 765 So. 2d at 1030* ("[A]lthough [plaintiff] genuinely felt humiliated, anxious, confused, upset and worried because of the corrective review process, we cannot say that [plaintiff's] emotional distress was more than a reasonable employee might be expected to endure in the workplace"). As a result, the Court dismisses this claim.

12. Defamation (Count VIII)

To establish a cause of action for defamation in Louisiana, a plaintiff must show: "(1) a false and defamatory statement concerning another; (2) an unprivileged publication **[**61]** to a third party; (3) fault (negligence or greater) on the part of the publisher; and (4) resulting injury." *Lusich v. Capital One, ACP, LLC, 198 So. 3d 1272, 1276 (La. App. 2016)* (citing *Costello v. Hardy, 864 So. 2d 129, 139 (La. 2004)*). "Statements between employees, made within the course and scope of their employment, are not considered publicized for purposes of a defamation claim." *Mitchell v. Tracer Constr. Co., 256 F. Supp. 2d 520, 526 (M.D. La. 2003)* (citing *Cangelosi v. Schwegmann Bros. Giant Super Mkts., 390 So. 2d 196, 198 (La. 1980)*). Moreover, to adequately allege a defamation claim, the plaintiff "must set forth in the [complaint] with reasonable specificity the defamatory statements allegedly published by the defendant." *Lusich, 198 So. 3d at 1276* (quoting *Fitzgerald v. Tucker, 737 So. 2d 706, 713 (La. 1999)*). "It is not necessary for a plaintiff to state verbatim the words on which he bases his cause of action, but he must allege a state of facts or condition of things which would show fault under article 2315." *Badeaux v. Sw. Comput. Bureau, Inc., 929 So. 2d 1211, 1218 (La. 2006)*.

Defendants argue that Dr. Morice fails to state a claim for defamation because he **[*215]** fails "to identify a single, specific publication" made to a person other than the plaintiff or between employees.[112] Dr. Morice claims to have identified statements made to the National Practitioner Data Bank as defamatory.[113] While the cited portions of his

[109] R. Doc. 77-1 at 26.

[110] R. Doc. 82 at 43-44.

[111] R. Doc. 64 at 35.

[112] R. Doc. 77-1 at 27.

[113] R. 82 at 45.

complaint do not indicate that any defendant disclosed information to the National Practitioner Data Bank,[114] the prayer for relief alleges that Defendants have done so or **[**62]** will do so.[115] Moreover, in denying Dr. Morice's motion for preliminary injunction, the Court previously found that Defendants did in fact issue reports to the National Practitioner Data Bank in connection with Dr. Morice's suspension.[116] However, because a report to the National Practitioners Data Bank is made pursuant to HCQIA's statutory reporting requirements and is therefore conditionally privileged,[117] it cannot be made with the requisite malice as would support a claim for defamation under Louisiana law. *Cf.* *Chudacoff v. Univ. Med. Ctr. of S. Nev., 437 F. App'x 609, 611-12 (9th Cir. 2011)* (applying Nevada law; collecting authorities); *see also* *Soriano v. Neshoba Cty. Gen. Hosp. Bd. of Trs., 486 F. App'x 444, 446 (5th Cir. 2012)*. As a result, Dr. Morice's defamation claim is dismissed.[118]

13. *LUTPA* (Count IX)

LUTPA provides a civil cause of action to recover actual damages to "[a]ny person who suffers any ascertainable loss of money or movable property ... as a result of the use or employment by another person of an unfair or deceptive method, act, or practice declared unlawful by *La. R.S. 51:1405*." *La. R.S. 51:1409*. *Section 51:1405(A)* declares unlawful "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." "Trade" or "commerce" is defined as "the advertising, offering for sale, sale, or distribution of any services and any **[**63]** property, corporeal or incorporeal, immovable or movable, and any other article, commodity, or thing of value wherever situated, and includes any trade or commerce directly or indirectly affecting the people of the state." *Id.* **[*216]** *51:1402(10)*. Courts determine "on a case-by-case basis" what conduct constitutes an "unfair trade practice" and "have repeatedly held that, under this statute, the plaintiff must show the alleged conduct offends established public policy and is immoral, unethical, oppressive, unscrupulous, or substantially injurious." *Cheramie Servs., Inc. v. Shell Deepwater Prod., Inc., 35 So. 3d 1053, 1059 (La. 2010)* (internal quotation marks and alteration omitted). A trade practice that amounts to fraud, deceit, or misrepresentation is "deceptive" for purposes of *LUTPA*. *Total Safety v. Rowland, 2014 U.S. Dist. LEXIS 161964, 2014 WL 6485641, at *4 (E.D. La. Nov. 18, 2014)* (citations omitted).

Defendants argue that Dr. Morice fails to state a claim under *LUTPA* because no alleged conduct offends public policy. Defendants contend that because the state's public policy encourages peer review, any actions related to Dr. Morice's peer review cannot be found to violate *LUTPA*.[119] Defendants also cite *Knatt v. Hosp. Serv. Dist. No. 1 of E. Baton Rouge Parish, 2005 U.S. Dist. LEXIS 57594, 2005 WL 8155168, at *4 (M.D. La. Aug. 4, 2005)*, *adopted by* *2006 U.S. Dist. LEXIS 110089, 2006 WL 8432223 (M.D. La. Mar. 7, 2006)*, for the proposition that Dr. Morice's

[114] *Id.* n.166 (citing R. Doc. 1 at 13, 15-16). The Court has also searched the amended complaint for any such allegation. The only mention of the National Practitioner Data Bank is in the prayer for relief. R. Doc. 64 at 40.

[115] *Id.* (Plaintiff seeks "[p]reliminary and [p]ermanent [i]njunctive [r]elief against TRMC and the other Defendants from further proceeding with the prosecution or entry of any actions, charges or decisions which adversely affect Plaintiff's clinical or medical staff privileges at TRMC, or reporting any of the pending charges/allegations of violations, or any rulings or decisions relating to any such charges or allegations of violations by Plaintiff, or any other of Defendants' improperly initiated actions, or resulting decisions, against Plaintiff to the National Practitioners Data Bank or any other entity or person.").

[116] R. Doc. 78 at 17 n.60.

[117] The condition on the privilege is that the reporter must not make the report knowing it to be false. *42 U.S.C. § 1111(a)(2)*. Dr. Morice makes no allegation that the report was known to be false when made to the National Practitioners Data Bank.

[118] Defendants also assert that Dr. Morice waived his right to sue Defendants for "any claims for libel, slander or damages as a result of good faith quality review and peer review activities" in Article III of the Bylaws. R. Doc. 77-3 at 10. As with Article XVII immunity, though, the bar established in Article III applies only upon a determination of "good faith," which cannot be made on the basis of the allegations alone but would have to await the development of an evidentiary record were the defamation claim to otherwise survive the Defendants' motion to dismiss.

[119] R. Doc. 77-1 at 28.

allegations are too conclusory to state a claim under *LUTPA*. In opposition, Dr. Morice merely **[**64]** repeats his allegations and the law, offering no substantive response addressing Defendants' argument.

While Defendants are correct in their assessment that Congress and the Louisiana legislature encourage peer review through the adoption of the qualified immunity in the *HCQIA* and in La. R.S. 13.3715.3(C), *see, e.g., Smith, 639 So. 2d at 742-43* ("The obvious legislative purpose behind this statutory provision is to encourage the medical profession to police its own activities with minimal judicial involvement."), it does not follow that Defendants' conduct, which has not yet been found to merit statutory immunity, cannot fall short of this public policy. Indeed, Dr. Morice alleges that Defendants' "manipulation of the professional review process" deprived him of his right to exercise privileges at TRMC, thereby harming his business which competes with the hospital to provide OB/GYN services.[120] Moreover, Dr. Morice also alleges that "Defendants have attempted to eliminate Plaintiff as a competitor by manipulating referrals of Medicare/Medicaid patients [and] operating outside of their designated hospital service district."[121] For now, these allegations suffice for Dr. Morice's *LUTPA* claim to avoid dismissal.

14. Procedural Due Process [65] (Count X)**

To bring a claim for violation of procedural due process under the U.S. Constitution, a plaintiff must first prove the government's deprivation of a constitutionally-protected interest in one's "life, liberty, or property." *Cleveland Bd. of Educ. v. Loudermill, 470 U.S. 532, 538-41, 105 S. Ct. 1487, 84 L. Ed. 2d 494 (1985)*. "[O]nce it is determined that the *Due Process Clause* applies, 'the question remains what process is due.'" *Id.* (quoting *Morrissey v. Brewer, 408 U.S. 471, 481, 92 S. Ct. 2593, 33 L. Ed. 2d 484 (1972)*). "The essential requirements of procedural due process under the Constitution are notice and an opportunity to respond." *Finch v. Fort Bend Indep. Sch. Dist., 333 F.3d 555, 562 (5th Cir. 2003)* (citing *Loudermill, 470 U.S. at 542*).

Defendants concede that for the sake of this motion, Dr. Morice had a constitutionally-protected property interest in the obstetric privileges he once had at TRMC.[122] **[*217]** *See Darlak v. Bobear, 814 F.2d 1055, 1061 (5th Cir. 1987)* (doctor had protected property interest in medical staff privileges that would not be revoked absent cause or hearing and such revocation would prevent plaintiff from practicing in area due to harm to reputation and lack of comparable facilities). As to the suspension of his privileges, though, Defendants assert that Dr. Morice received all the process that was due. Defendants emphasize that his suspension was "reviewed by two separate committees, a panel of physicians over a four-day hearing, and the hospital's Board of Directors, and [he] was allowed to **[**66]** present his arguments to the different committees and panels and was afforded a hearing before the ultimate determination regarding his privileges."[123] Indeed, Dr. Morice's allegations support this summary of the proceedings.[124]

Numerous courts in the Fifth Circuit have found such procedures, even when conducted post-deprivation, to be adequate. *See, e.g.*, *Soriano, 486 F. App'x at 446* (no violation of due process where hospital afforded physician "a multi-step peer review and appeal process pursuant to the hospital's medical staff by-laws"); *Darlak, 814 F.2d at 1062-64* (no violation of due process for suspension pending full hearing and opportunity for appeal); *Zamanian v.*

---

[120] R. Doc. 64 at 36.

[121] *Id.*

[122] R. Doc. 77-1 at 29. But Defendants deny that Dr. Morice has any property interest in staff privileges that lapsed. *Id.* at 31. To the extent necessary, the Court holds that there can be no constitutionally-protected property interest in lapsed privileges. Therefore, for this reason and the reasons stated for denying Dr. Morice's motion for partial summary judgment, *see* section III(B)(2), *infra*, the Court dismisses Dr. Morice's claim for violation of due process as to the denial of his reappointment of privileges.

[123] *Id.* at 30.

[124] R. Doc. 64 at 17.

Jefferson Par. Hosp. Serv. Dist. No. 2, 2017 U.S. Dist. LEXIS 128657, 2017 WL 3480993, at *3-4 (E.D. La. Aug. 14, 2017) (no violation of due process where physician's "suspension was reviewed by two separate committees, a panel of physicians over a three-day hearing, and the hospital's Board of Directors" and physician "conducted discovery, presented and cross-examined witnesses, submitted affidavits, and gave his statement of the incident through writing and before the different committees/panels"), *aff'd*, *474 Fed. Appx. 982 (5th Cir. 2019)*.

In opposition, Dr. Morice contends that the hearing process was fatally flawed because the Bylaws did not contain provisions governing the burden of proof and evidentiary standards, but left **[**67]** these matters to be established by the hospital's peer review committees.[125] Nonetheless, Dr. Morice alleges that he had the opportunity to submit briefing on what burden of proof and evidentiary standard applied and to advocate for his position on these procedural matters.[126] He argued that Defendants should have been required to prove the charges against him by clear and convincing evidence.[127] Having had his position heard, but not having it adopted, amounts to a due process violation, in Dr. Morice's view. This is a stilted view of due process. To be sure, the Fifth Circuit has expressly found that requiring a physician to bear the burden of proof by clear and convincing evidence in the context of professional peer review does not violate due process. Johnson v. Spohn, 334 F. App'x 673, 684 (5th Cir. 2009). Moreover, Dr. Morice cites no case law in support of his position that the absence of these provisions in a hospital's bylaws would cause the hearing and appeals process itself to violate due process.

[*218] For these reasons, the Court finds that Dr. Morice had failed to state a due process claim as to his suspended privileges.

15. Equal Protection (Count X)

The Equal Protection Clause of the Fourteenth Amendment guarantees that no person be denied equal protection of the law by any state. Unless **[**68]** the challenged action involves a suspect classification or impinges on a fundamental right, the Court applies minimal scrutiny under the rational basis test. *See* San Antonio Indep. Sch. Dist. v. Rodriguez, 411 U.S. 1, 55, 93 S. Ct. 1278, 36 L. Ed. 2d 16 (1973). A state actor satisfies the rational basis test where "the challenged state action rationally furthers a legitimate state purpose or interest." *Id.*

Dr. Morice alleges that Defendants treated similarly-situated, but TRMC-employed physicians differently than him by not bringing charges against them even though, Dr. Morice claims, their conduct was supposedly worse than his, falling below the standard of care.[128] Defendants urge the court to dismiss Dr. Morice's equal protection claim under the rational basis test because Defendants were justified in undergoing the peer review process as to Dr. Morice out of concern for quality patient care, without regard to the conduct of other physicians.[129] In support of his claim for equal protection, Dr. Morice contends that Defendants' financial motives spurred the Defendants' different treatment of him and the other physicians because they were employed by TRMC.[130] But, even assuming that Dr. Morice was treated differently than other similarly-situated physicians, it is enough that Defendants **[**69]** have articulated a rational basis for having pursued charges against Dr. Morice — namely, concern for patient care. *See* Hayman v. City of Galveston, 273 U.S. 414, 417, 47 S. Ct. 363, 71 L. Ed. 714 (1927) (exclusion of some physicians from hospital privileges did not violate equal protection where "selection ... was based upon a classification not arbitrary or unreasonable on its face"); Shaw v. Hosp. Auth. of Cobb Cty., 507 F.2d 625, 628 (5th Cir. 1975) (rational basis test applies to eligibility requirements for hospital staff privileges).

---

125 R. Doc. 82 at 48. Other than these two matters of procedure, Dr. Morice identifies no other alleged violation of due process. Instead, the balance of Dr. Morice's due process allegations are conclusory.

126 R. Doc. 64 at 17.

127 R. Doc. 82 at 48-49.

128 R. Doc. 64 at 16.

129 R. Doc. 77-1 at 31.

130 R. Doc. 82 at 50-51.

Therefore, Dr. Morice's claim for equal protection fails under the rational basis test.

B. Motion for Partial Summary Judgment

1. Summary Judgment Standard

Summary judgment is proper "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)* (citing *Fed. R. Civ. P. 56(c)*). "*Rule 56(c)* mandates the entry of summary judgment, after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which the party will bear the burden of proof at trial." *Id.* A party moving for summary judgment bears the initial burden of demonstrating **[**70]** the basis for summary judgment and identifying those portions of the record, discovery, and any affidavits supporting the conclusion that there is no genuine issue of material fact. *Id. at 323*. If the moving party meets that burden, then the nonmoving party must use evidence cognizable under *Rule 56* to demonstrate the **[*219]** existence of a genuine issue of material fact. *Id. at 324*.

A genuine issue of material fact exists if a reasonable jury could return a verdict for the nonmoving party. *See* *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1996)*. The substantive law identifies which facts are material. *Id.* Material facts are not genuinely disputed when a rational trier of fact could not find for the nonmoving party upon a review of the record taken as a whole. *See* *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*; *Equal Emp't Opportunity Comm'n v. Simbaki, Ltd., 767 F.3d 475, 481 (5th Cir. 2014)*. "[U]nsubstantiated assertions," "conclusory allegations," and merely colorable factual bases are insufficient to defeat a motion for summary judgment. *See* *Anderson, 477 U.S. at 249-50*; *Hopper v. Frank, 16 F.3d 92, 97 (5th Cir. 1994)*. In ruling on a summary judgment motion, a court may not resolve credibility issues or weigh evidence. *See* *Delta & Pine Land Co. v. Nationwide Agribusiness Ins. Co., 530 F.3d 395, 398-99 (5th Cir. 2008)*. Furthermore, a court must assess the evidence, review the facts, and draw any appropriate inferences based on the evidence in the light most favorable to the party opposing summary judgment. *See* *Tolan v. Cotton, 572 U.S. 650, 656, 134 S. Ct. 1861, 188 L. Ed. 2d 895 (2014)*; *Daniels v. City of Arlington, 246 F.3d 500, 502 (5th Cir. 2001)*. Yet, a court only draws reasonable inferences **[**71]** in favor of the nonmovant "when there is an actual controversy, that is, when both parties have submitted evidence of contradictory facts." *Little v. Liquid Air Corp., 37 F.3d 1069, 1075 (5th Cir. 1994)* (citing *Lujan v. Nat'l Wildlife Fed'n, 497 U.S. 871, 888, 110 S. Ct. 3177, 111 L. Ed. 2d 695 (1990))*.

After the movant demonstrates the absence of a genuine dispute, the nonmovant must articulate specific facts and point to supporting, competent evidence that may be presented in a form admissible at trial. *See* *Lynch Props., Inc. v. Potomac Ins. Co. of Ill., 140 F.3d 622, 625 (5th Cir. 1998)*; *Fed. R. Civ. P. 56(c)(1)(A)* & *(c)(2)*. Such facts must create more than "some metaphysical doubt as to the material facts." *Matsushita, 475 U.S. at 586*. When the movant will bear the burden of proof at trial on the dispositive issue, the movant "must come forward with evidence which would entitle it to a directed verdict if the evidence went uncontroverted at trial." *Int'l Shortstop, Inc. v. Rally's, Inc., 939 F.2d 1257, 1264-65 (5th Cir. 1991)* (quotation omitted). Then, the nonmovant may defeat the motion by showing a genuine dispute of material fact or by "showing that the moving party's evidence is so sheer that it may not persuade the reasonable fact-finder to return a verdict in favor of the moving party." *Id. at 1265*. When the nonmovant will bear the burden of proof at trial on the dispositive issue, the moving party may simply point to insufficient admissible evidence to establish an essential element of the nonmovant's claim in order to satisfy its summary judgment **[**72]** burden. *See* *Celotex, 477 U.S. at 322-25*; *Fed. R. Civ. P. 56(c)(1)(B)*. Unless there is a genuine issue for trial that could support a judgment in favor of the nonmovant, summary judgment must be granted. *See* *Little, 37 F.3d at 1075-76*.

2. Analysis

Dr. Morice's motion for summary judgment on his breach-of-contract claims presents substantially the same argument that the Court rejected in denying his second motion for preliminary injunction.[131] For the same reasons the Court **[*220]** rejected it then, the Court rejects it now. *See* *Morice v. Hosp. Serv. Dist. #3, 2019 U.S. Dist. LEXIS 59943, 2019 WL 1517954, at *4-7 (E.D. La. Apr. 8, 2019)*.[132] To the extent Dr. Morice presents new argument in his reply, the Court need not resolve these arguments because courts in the Fifth Circuit may decline to consider arguments first raised in a reply. *See* *Murillo v. Coryell Cty. Tradesmen, LLC, 2017 U.S. Dist. LEXIS 45300, 2017 WL 1155166, at *3 n.48 (E.D. La. Mar. 28, 2017)* (collecting cases). But even if the Court were to consider the merits of these new arguments, none raises legal issues that would change the Court's interpretation of the Bylaws, but instead present facts that Defendants dispute, thereby precluding summary judgment. Thus, Dr. Morice's motion for partial summary judgment is DENIED.

IV. CONCLUSION

Accordingly, for the foregoing reasons,

IT IS ORDERED that the motion to dismiss (R. Doc. 77) is GRANTED IN PART, insofar as it seeks to dismiss the Board, Credentials **[**73]** Committee, and MEC as defendants for lack of capacity; and to dismiss Dr. Morice's claims for tortious interference with contract (Count V), negligent misrepresentation (Count VII), intentional infliction of emotional distress and defamation (Count VIII), and procedural due process and equal protection (Count X); and it is DENIED IN PART in all other respects.

IT IS FURTHER ORDERED that the Defendants' first motion to dismiss (R. Doc. 21) is DENIED AS MOOT.

IT IS FURTHER ORDERED that Dr. Morice's motion for partial summary judgment (R. Doc. 69) is DENIED.

New Orleans, Louisiana, this 27th day of December, 2019.

Opinion

MEMORANDUM AND ORDER ON PLAINTIFF'S MOTION FOR PRELIMINARY INJUNCTION

This matter is before the Court on Plaintiff Association for Accessible Medicine's ("Plaintiff" or "AAM") Motion for Preliminary Injunction requesting the Court enjoin the implementation or enforcement of Assembly Bill 824 ("AB 824"). (ECF No. 10.) Defendant Attorney General Xavier Becerra ("Defendant" or the "State") filed an opposition on December 10, 2019. (ECF **[*2]** No. 24.) Plaintiff filed a reply on December 17, 2019. (ECF No. 27.) The Court also considered Amicus Curiae briefs submitted by various interested parties (ECF Nos. 21, 25), and the Court heard oral argument on December 19, 2020 (*See* ECF No. 28, hearing minutes). After carefully considering all material presented to the Court and for the reasons set forth below, Plaintiff's Motion is DENIED.

I. FACTUAL AND PROCEDURAL BACKGROUND[1]

AB 824 creates a presumption that "reverse payment" settlement agreements regarding patent infringement claims between brand-name and generic pharmaceutical companies are anticompetitive and unlawful.

Reverse payment settlements arise primarily — if not exclusively — in the context of pharmaceutical drug regulations and suits brought under the statutory provisions of the Drug Price Competition and Patent Term Restoration Act of 1984, commonly referred to as the Hatch-Waxman Act. Under the *Hatch-Waxman Act*, once a brand-name company has submitted a new prescription drug to the FDA and gained approval to market it, a manufacturer of a generic drug with the same active ingredients that is biologically equivalent to the approved brand-name drug can gain approval to **[*3]** market the generic through an abbreviated FDA process. The New Drug Application ("NDA") process is long, comprehensive, and expensive whereas the Abbreviated New Drug Application ("ANDA") process that a generic drug is subjected to is substantially less expensive and requires far less testing.

In order to gain approval through the FDA, the generic company must file an ANDA. As part of this application, the generic company must assure the FDA that its drug will not infringe on any patents owned by the brand-name drug company. One way to do so is for the generic company to certify that any listed, relevant patent is invalid or will not be infringed by the manufacture, use, or sale of the generic drug. This is called a Paragraph IV certification. Because filing under Paragraph IV indicates that there are current patents that the generic company asserts are invalid or uninfringed by its product, the Paragraph IV certification is *per se* a patent infringement and thus the brand-name company can, and often does, bring suit against the generic drug manufacturer.

Settlements of the resulting lawsuits sometimes include reverse payments in which the plaintiff, the brand-name drug company, pays **[*4]** the defendant, the infringing generic drug company, a sum of money for the promise that the generic drug company will keeps its drug off the market for an agreed-upon length of time.

AB 824 targets these types of settlements. According to the State, AB 824 closes this loophole in the Hatch-Waxman Act and ensures that a brand-name drug company cannot continue to enforce an otherwise weak patent against generics through these reverse payment settlements.

AB 824 imposes a presumption that a settlement agreement involving a brand-name company compensating the generic for keeping its drug off the market is anticompetitive under California ***Antitrust Law***. It also levies a civil penalty against any individual who assists in the violation of the section of three times the value received by the individual due to the violation or $20 million, whichever is greater.

---

[1] The following recitation of facts is derived from Plaintiff's Complaint (ECF No. 1), as well as the parties' briefing on the Motion for Preliminary Injunction (ECF Nos. 10, 24, 27). Additionally, the Court gathered general background information from *FTC v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*.

Plaintiff asserts the following causes of action, all in an attempt to invalidate AB 824: (1) Declaratory/Injunctive Relief — *Commerce Clause* — Extraterritoriality; (2) Declaratory/Injunctive Relief — Preemption; (3) Declaratory/Injunctive Relief — *Excessive Fines Clause*; (4) Declaratory/Injunctive Relief — Due Process — Burden Shifting; (5) *42 U.S.C. § 1983* and *42 U.S.C. § 1988*. (ECF No. 1 at 30-51.) More **[*5]** specifically, Plaintiff alleges AB 824 violates the Dormant *Commerce Clause* by directly regulating out-of-state conduct; is preempted by federal patent law and the delicate balance between the competing interests of patent protections and anti-trust law struck by the Supreme Court in *FTC v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*; violates the constitutional prohibition of excessive fines under the *Eight Amendment*; and violates due process in that it creates a burden shift with no meaningful opportunity for defendant to rebut the presumption applied. Presently before the Court is Plaintiff's Motion (ECF No. 10) seeking a preliminary injunction prohibiting the enforcement of this law, which would otherwise take effect January 1, 2020.

II. STANDARD

Injunctive relief is "an extraordinary remedy that may only be awarded upon a clear showing that the plaintiff is entitled to such relief." *Winter v. NRDC, Inc., 555 U.S. 7, 22, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008)* (citing *Mazurek v. Armstrong, 520 U.S. 968, 972, 117 S. Ct. 1865, 138 L. Ed. 2d 162 (1997)* (per curiam)). "The purpose of a preliminary injunction is merely to preserve the relative positions of the parties until a trial on the merits can be held." *Univ. of Tex. v. Camenisch, 451 U.S. 390, 395, 101 S. Ct. 1830, 68 L. Ed. 2d 175 (1981)*; *see also* *Costa Mesa City Emps. Ass'n v. City of Costa Mesa, 209 Cal. App. 4th 298, 305, 146 Cal. Rptr. 3d 677 (2012)* ("The purpose of such an order is to preserve the status quo until a final determination following a trial."); *GoTo.com, Inc. v. Walt Disney, Co., 202 F.3d 1199, 1210 (9th Cir. 2000)* ("The status quo ante litem refers not simply to any situation before the filing of a lawsuit, **[*6]** but instead to the last uncontested status which preceded the pending controversy.").

"A plaintiff seeking a preliminary injunction must establish [1] that he is likely to succeed on the merits, [2] that he is likely to suffer irreparable harm in the absence of preliminary relief, [3] that the balance of equities tips in his favor, and [4] that an injunction is in the public interest." *Winter, 555 U.S. at 20*. A plaintiff must "make a showing on all four prongs" of the *Winter* test to obtain a preliminary injunction. *Alliance for the Wild Rockies v. Cottrell, 632 F.3d 1127, 1135 (9th Cir. 2011)*. In evaluating a plaintiff's motion for preliminary injunction, a district court may weigh the plaintiff's showings on the *Winter* elements using a sliding-scale approach. *Id.* A stronger showing on the balance of the hardships may support issuing a preliminary injunction even where the plaintiff shows that there are "serious questions on the merits . . . so long as the plaintiff also shows that there is a likelihood of irreparable injury and that the injunction is in the public interest." *Id.* Simply put, a plaintiff must demonstrate, "that [if] serious questions going to the merits were raised [then] the balance of hardships [must] tip[ ] sharply in the plaintiff's favor," in order to succeed **[*7]** in a request for preliminary injunction. *Id. at 1134-35* (emphasis added).

III. STANDING

Neither party has raised any issues with respect to standing. Nevertheless, "federal courts are required *sua sponte* to examine jurisdictional issues such as standing." *Chapman v. Pier 1 Imps. (U.S.), Inc., 631 F.3d 939, 954 (9th Cir. 2011)* (quoting *Bernhardt v. Cty. of L.A., 279 F.3d 862, 868 (9th Cir. 2002))*. And "[t]he existence of Article III standing is not subject to waiver." *Chapman, 631 F.3d at 954*. To establish Article III standing, a plaintiff must have "(1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." *Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)*.

"[A]n association has standing to bring suit on behalf of its members when: (a) its members would otherwise have standing to sue in their own right; (b) the interests it seeks to protect are germane to the organization's purpose; and (c) neither the claim asserted nor the relief requested requires the participation of individual members in the lawsuit." *Hunt v. Washington State Apple Advert. Comm'n, 432 U.S. 333, 343, 97 S. Ct. 2434, 53 L. Ed. 2d 383*

(1977). Further, "[w]hether an association has standing to invoke the court's remedial powers on behalf of its members depends in substantial measure on the nature of the relief sought. If in a proper case the association seeks a declaration, injunction, or some other form **[*8]** of prospective relief, it can reasonably be supposed that the remedy, if granted, will inure to the benefit of those members of the association actually injured. Indeed, in all cases in which we have expressly recognized standing in associations to represent their members, the relief sought has been of this kind." *Id.* (citing *Warth v. Seldin, 422 U.S. 490, 515, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975))*.

Here, Plaintiff is a nonprofit, voluntary association representing the leading manufacturers and distributors of generic and biosimilar medicines, manufacturers and distributors of bulk active pharmaceutical ingredients, and suppliers of other goods and services to the generic and biosimilar pharmaceutical industry. (ECF No. 1 ¶ 12.) As clarified at oral argument, Plaintiff asserts representational standing on behalf of its members, alleging that its members have many ongoing cases involving patent infringement, and other members are currently developing generics and/or contemplating filing ANDAs. (ECF No. 1 ¶¶ 14-15.) Plaintiff seeks injunctive relief while claiming its members will be injured by the implementation of AB 824. (ECF No. 1 ¶ 16.) The Court finds Plaintiff has sufficiently alleged the elements of representational standing to bring the instant motion **[*9]** for preliminary injunction.

IV. Request for Judicial Notice

At the outset, Defendant requests the Court take judicial notice of five documents pursuant to *Federal Rule of Evidence 201*: (1) Assembly Committee on Health AB 824 Bill Analysis (March 26, 2019), attached to Defendant's Request for Judicial Notice ("RJN," ECF No. 24-1) as Exhibit A; (2) Assembly Floor Analysis of AB 824 (September 4, 2019), attached to RJN as Exhibit B; (3) Letters of Support for AB 824, attached to RJN as Exhibit C; (4) Table 8: Total All Payers State Estimates by State of Residence (1991-2014) — Drugs and Other Nondurable Products (Millions of Dollars), attached to RJN as Exhibit D; and (5) *Pay-for-Delay: How Drug Company Pay-Offs Cost Consumers Billions*, FTC Staff Study (Jan. 2010), attached to RJN as Exhibit E. The State contends judicial notice of Exhibits A, B, and C is appropriate because they are documents that are part of the legislative history of AB 824. The State asserts Exhibits D and E are appropriate for judicial notice because the documents were "administered by or filed with an administrative agency that is not subject to reasonable dispute and is 'capable of accurate and ready determination by resort to sources whose **[*10]** accuracy cannot reasonably be questioned.'" (ECF No. 24-1 at 2, *quoting* *Fed. R. Evid. 201*.) Plaintiff does not oppose the State's request, and the Court finds all five documents are appropriate for judicial notice.

Exhibits A, B, and C are part of the legislative history of AB 824, and courts routinely take judicial notice of legislative history documents. *Anderson v. Holder, 673 F.3d 1089, 1094 n.1 (9th Cir. 2012)* (citing *Chaker v. Crogan, 428 F.3d 1215, 1223 n. 8 (9th Cir.2005))* ("Legislative history is properly a subject of judicial notice."); *Korematsu v. United States, 584 F. Supp. 1406, 1414 (N.D. Cal. 1984)* (citing *Territory of Alaska v. American Can Co., 358 U.S. 224, 227, 79 S. Ct. 274, 3 L. Ed. 2d 257, 17 Alaska 779 (1959))* ("[C]ourts frequently take judicial notice of legislative history, including committee reports."). Similarly, a court "may take judicial notice of 'records and reports of administrative bodies.'" *Anderson, 673 F.3d at 1094* (citing *Mack v. South Bay Beer Distributors, Inc., 798 F.2d 1279, 1282 (9th Cir.1986))*. Exhibit D — a summary table from the Centers for Medicare and Medicaid Services, Office of the Actuary, National Health Statistics Group, available on CMS.gov; and Exhibit E — an "FTC Staff Study" available on ftc.gov, are such reports.

Defendant's unopposed Request for Judicial Notice (ECF No. 24) is therefore GRANTED and the Court hereby judicially notices Exhibits A through E attached thereto.

V. Preliminary Injunction Analysis

Plaintiff's Complaint asserts five causes of action, the first four of which encompass the present request for preliminary injunction. **[*11]** As explained below, and primarily due to the nature of Plaintiff's pre-enforcement attack on AB 824, the Court finds Plaintiff has failed to establish a likelihood of success on the merits of its claims, nor has it raised serious questions going to those merits. Moreover, the Court finds that absent a constitutional violation Plaintiff has failed to establish an irreparable harm that is both likely and — at this time — imminent. And lastly, even if the Court were to find serious questions going to the merits of Plaintiff's claims, the question of balance of harms and public interest are too speculative at this point for the Court to find that either factor favors Plaintiff, sharply or otherwise.

A. Likelihood of Success on the Merits

In an attempt to enjoin enforcement of AB 824 before it takes effect on January 1, 2010, Plaintiff asserts the bill: (1) violates the Dorman *Commerce Clause*; (2) is preempted; (3) violates the *Excessive Fines Clause* of the *Eighth Amendment*; and (4) violates the *Due Process Clause*. Plaintiff's attack on AB 824 is in part both facial and as-applied. As discussed below, Plaintiff has failed to establish a likelihood of success on the merits of any of these claims and as a result, the Court finds a preliminary injunction is inappropriate **[*12]** at this time.

1. Dormant *Commerce Clause*

In its moving papers, Plaintiff indicates AB 824 — because it is not limited to settlement agreements entered into in California or between California entities — directly regulates out of state commerce and is therefore a *per se* violation of the Dormant *Commerce Clause*. Interpreting this as a facial attack on AB 824, the State argues that because AB 824 can conceivably be applied to settlement agreements contained within California, it has at least one constitutional application and so Plaintiff's facial attack fails.

Indeed, a facial challenge is "the most difficult challenge to mount successfully, since the challenger must establish that no set of circumstances exists under which the Act would be valid. The fact that [an] Act might operate unconstitutionally under some conceivable set of circumstances is insufficient to render it wholly invalid, since we have not recognized an 'overbreadth' doctrine outside the limited context of the *First Amendment*." *United States v. Salerno, 481 U.S. 739, 745, 107 S. Ct. 2095, 95 L. Ed. 2d 697 (1987)*. Facial challenges are disfavored because they often require the court to make constitutional determinations based on hypothetical situations. *Washington State Grange v. Washington State Republican Party, 552 U.S. 442, 449-51, 128 S. Ct. 1184, 170 L. Ed. 2d 151 (2008)* ("Claims of facial invalidity often rest on speculation. As a consequence, they raise the risk **[*13]** of premature interpretation of statutes on the basis of factually barebones records." (internal citation omitted)). Here, Plaintiff poses the hypothetical situation of non-California entities entering into a settlement agreement outside of California, and then asks the Court to assume that California would seek to enforce AB 824 against these hypothetical parties. But invalidating or even preliminarily enjoining the law on this basis would force the Court to not only assume the Attorney General will apply the law unconstitutionally, but also to make a constitutional determination before it is necessary to do so. *Washington State Grange v. Washington State Republican Party, 552 U.S. 442, 449-51, 128 S. Ct. 1184, 170 L. Ed. 2d 151 (2008)* ("Facial challenges also run contrary to the fundamental principle of judicial restraint that courts should neither anticipate a question of constitutional law in advance of the necessity of deciding it nor formulate a rule of constitutional law broader than is required by the precise facts to which it is to be applied." (internal quotes and citations omitted)). Such a facial attack therefore fails where, as here, a set of circumstances exists under which AB 824 will be valid.

Plaintiff seems to concede this point, clarifying its position in its reply brief and in oral argument **[*14]** that it is not raising a facial attack against AB 824, but an as-applied attack. (ECF No. 27 at 7.) An as applied challenge looks at a specific plaintiff and set of circumstances and determines if the law is constitutional as applied to that set of circumstances. *Wal-Mart Stores, Inc. v. City of Turlock, 483 F. Supp. 2d 987, 996-97 (E.D. Cal. 2006)* (citing 16 C.J.S. Constitutional Law § 187) ("When faced with a claim that application of a statute renders it unconstitutional, a court must analyze the statute as applied to the particular case, i.e., how it operates in practice against the particular litigant and under the facts of the instant case, not hypothetical facts in other situations"). In other words, Plaintiff claims AB 824 "*as applied* to settlement agreements that were not negotiated, completed, or entered in California," violates the Dormant *Commerce Clause*. (ECF No. 27 at 7.) Indeed, if the Attorney General were to enforce the terms of AB 824 against two out of state parties that entered into a settlement agreement outside of

California, having nothing to do with California, such conduct would likely violate the Dormant Commerce Clause. In this case, however, AB 824 has yet to take effect. As a result, the Court cannot consider the law *as it has been applied* to a particular agreement or party. **[*15]** Rather, Plaintiff raises a "paradigmatic as-applied challenge" to AB 824, urging the Court to find that "the application of the statute to a specific factual circumstance" is in violation of the Dormant Commerce Clause. (*Id.* (citing Hoye v. City of Oakland, 653 F.3d 835, 857 (9th Cir. 2011)).) Plaintiff asserts the fact that AB 824 hasn't been enforced yet is not detrimental to its challenge, citing case law in support of its position that a pre-enforcement as-applied challenge is ripe "so long as [it] present[s] a 'discrete and well-defined' application of the challenged law that is 'likely to occur.'" (*Id.* (citing Gonzales v. Carhart, 550 U.S. 124, 167, 127 S. Ct. 1610, 167 L. Ed. 2d 480 (2007)).)

In oral argument, the State did not blanketly refute Plaintiff's attempt to raise a pre-enforcement as-applied attack on AB 824, but rather highlighted Plaintiff's failure to meet the standard required under such an attack. Stressing that neither *Hoye* nor *Gonzales* supports Plaintiff's position, the State in oral argument contended that a pre-enforcement as-applied attack requires a showing of three things, none of which Plaintiff has established: (1) a concrete plan to violate the law; (2) a communicated threat of prosecution; and (3) a history of past prosecution or enforcement of the challenged law.

Whether Plaintiff's Dormant Commerce Clause claim as asserted **[*16]** is likely to succeed depends first on whether that claim is ripe. While allowing pre-enforcement, as-applied challenges, Gonzalez does not allow for Plaintiff's broad request. In *Gonzalez*, the Supreme Court denied a request to find a partial-birth abortion ban facially unconstitutional. Instead, it concluded that an as-applied challenge was the "proper means to consider exceptions" to the law because in such an as-applied challenge "it can be shown that in discrete and well-defined instances a particular condition has or is likely to occur in which the prohibited act must be used." *Id. at 167*. In the first instance, it is not clear to the Court that *Gonzalez*' standard applies outside of the narrow context of abortion law. Moreover, *Gonzalez* says nothing about the specificity needed to bring a pre-enforcement as-applied challenge but instead reinforces the general proposition that the court should not reach findings of unconstitutionality based on hypotheticals.[2]

As the State articulated in oral argument, the constitutional test for ripeness consists of three parts: (1) a concrete plan to violate the law; (2) a communicated threat of prosecution; and (3) a history of past prosecution or enforcement **[*17]** of the challenged law. *See, e.g.,* Clark v. City of Seattle, 899 F.3d 802 (9th Cir. 2018) ("Where a plaintiff intends to challenge a statute prior to its enforcement, generalized threats of prosecution do not confer constitutional ripeness. Rather, there must be a genuine threat of imminent prosecution. To determine whether a genuine threat of imminent prosecution exists, we use three factors . . . ." (citations and internal quotation marks omitted); Maldonado v. Morales, 556 F.3d 1037, 1044 (9th Cir. 2009). Moreover, the "prudential inquiry" concerning ripeness weighs "the fitness of the issue for judicial decision and the hardship to the parties of withholding court consideration." Maldonado, 556 F.3d at 1044 (quoting Abbott Labs. v. Gardner, 387 U.S. 136, 148, 87 S. Ct. 1507, 18 L. Ed. 2d 681 (1967), *overruled on other grounds by* Califano v. Sanders, 430 U.S. 99, 97 S. Ct. 980, 51 L. Ed. 2d 192 (1977)). The former question includes consideration of whether the issue is purely legal or one that requires factual development. *See* San Diego Gun Rights Committee v. Reno, 98 F.3d 1121 (9th Cir. 1996) (not ripe because "the issues in the instant pre-enforcement challenge are not purely legal. A concrete factual situation is necessary to delineate the boundaries of what conduct the government may or may not regulate without running afoul of the Commerce Clause.") Plaintiff has made no attempt to establish these three constitutional elements nor to discuss the prudential concerns.

Even so, applying either *Clarks* three-pronged test or the more general rule as **[*18]** stated in *Gonzalez* to the instant case, Plaintiff has not established a likelihood of success on the merits of its pre-enforcement as-applied

[2] Neither does Hoye v. City of Oakland, 653 F.3d 835 (9th Cir. 2011) stand for the broad proposition that a party can successfully bring an as-applied pre-enforcement challenge to a statute under all circumstances. Rather, aside from articulating that a paradigmatic as-applied approach can be appropriate at least in the context of First Amendment jurisprudence, *Hoye* offers little support for Plaintiff's position and only further confirms that courts "decline[] to entertain as-applied challenges that would require [them] to speculate as to prospective facts." *Id. at 859*.

challenge because it has not established that the issue is ripe for review. Specifically, Plaintiff has not sufficiently shown that AB 824 is likely to be enforced in an unconstitutional manner, nor has Plaintiff stated neither a plan to violate the law or a specific threat that the law will be enforced in the manner they fear. Plaintiff relies heavily on the declarations it submitted in support of its motion for preliminary injunction. (*See* ECF Nos. 10-2-10-7.) Plaintiff's briefs make these declarations out to be bold statements that should AB 824 go into effect, the subject companies will be forced to make drastic changes to their business practices. However, none of the declarations state an intent to violate AB 824, and none lay out a specific circumstance in which AB 824 will be applied. Instead, the declarants make generalized statements that there are many lawsuits arising from ANDA Paragraph IV applications, that many such lawsuits have settled (it is not clear how many settled with reverse payments), and that AB 824 may have some impact **[*19]** on these cases. The declarants claim they will likely be forced to litigate pending patent-infringement lawsuits to judgment out of fear of AB 824's penalties, even if a procompetitive settlement could be reached. Declarants also claim they may keep the new generics they are currently developing off the market, or will be required to reevaluate their plans, rather than risk the cost of litigation or face AB 824 penalties. But no declarant claims its company has a concrete plan to violate the terms of AB 824. (*See id*.) Had Plaintiff submitted evidence of a currently pending reverse payment settlement negotiation in which the parties would not settle as a result of AB 824 or feared prosecution under AB 824, then this case might be ripe for a pre-enforcement, as-applied challenge. However, that is not the case. Rather, and more to the point regarding prudential ripeness, it is clear to the Court that this is not a purely legal issue, and that additional facts are necessary to address the *Commerce Clause* question.

Because the Court finds Plaintiff's pre-enforcement as-applied claim under the Dormant *Commerce Clause* is not ripe for review, the Court finds Plaintiff has not established a likelihood of success on the merits **[*20]** of its claim, nor has Plaintiff raised serious questions going to the merits, and so a preliminary injunction shall not issue on these grounds at this time.[3] Even if Plaintiff had raised serious questions as to the merits of its Dormant *Commerce Clause* claim, the balance of hardships does not tip significantly in Plaintiff's favor, as discussed below, such that a preliminary injunction should be granted.

2. Preemption

Plaintiff makes two primary arguments concerning preemption. First, Plaintiff asserts AB 824 conflicts with the objectives of federal patent law, and specifically the Hatch-Waxman Act. And second, Plaintiff argues AB 824 is directly preempted by both the *Patent Act* and by the delicate balance struck between ***antitrust law*** and patent law, as discussed by the Supreme Court in *FTC v Actavis, 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. For its part, the State asserts that AB 824 does not conflict with federal patent law and notes that Plaintiff does not identify "a specific patent provision with which AB 824 conflicts." (ECF No. 24 at 7.) The State also contends that AB 824 does not conflict with the Hatch-Waxman Act because it will further the goals of the Act, not frustrate them as Plaintiff claims. And finally, the State argues **[*21]** that *Actavis* does not preempt AB 824 because it weighed in on the interaction between federal, as opposed to state, ***antitrust law*** and patent law and established only that patent settlements were not *per se* exempt from antitrust liability.

---

[3] Plaintiff's pre-enforcement as-applied challenge is also problematic because it may be construed as an attempt to extend a facial overbreadth challenge outside the *First Amendment* context. In theory, Plaintiff claims that the language of the law in question is overbroad because it may allow the government to enforce it unconstitutionally. *See, e.g., Sabri v. United States, 541 U.S. 600, 609, 124 S. Ct. 1941, 158 L. Ed. 2d 891 (2004)* ("It would have been correspondingly clear that if Sabri was making any substantive constitutional claim, it had to be seen as an overbreadth challenge; the most he could say was that the statute could not be enforced against him, because it could not be enforced against someone else whose behavior would be outside the scope of Congress's Article I authority to legislate."). But under Plaintiff's logic, any law regarding commerce passed by the California legislature would have to include language specifically limiting its application to within California. That simply cannot be the case, and Plaintiff cites to no authority indicating otherwise. Moreover, *Sabri* cautioned against overbreadth challenges applied outside the scope of the *First Amendment* and the Supreme Court has regularly declined to extend such an analysis to other constitutional challenges. *Id. at 609-610*.

Plaintiff indeed has not pointed to any provision of the Patent Act that conflicts with AB 824 except to assert in oral argument that federal patent law is entitled to field preemption and states cannot create their own patent-like protections. While this assertion is correct, it does not settle the question of preemption presented to this Court. "[S]tate law is preempted when it enters 'a field of regulation which the patent laws have reserved to Congress.' Where state law offers 'patent-like protection for ideas deemed unprotected under the present federal scheme, [state law] conflicts with the strong federal policy favoring free competition in ideas.'" *Summit Mach. Tool Mfg. Corp. v. Victor CNC Sys., Inc., 7 F.3d 1434, 1439 (9th Cir. 1993)* (citing *Bonito Boats, Inc. v. Thunder Craft Boats, Inc., 489 U.S. 141, 167, 109 S. Ct. 971, 103 L. Ed. 2d 118 (1989))*. But AB 824 is not offering patent-like protection; instead it is imposing a presumption of anti-competitiveness on certain types of patent settlements. A state law claim can survive federal patent law preemption so long as the state claim "contains an element not shared by the federal law; **[*22]** an element which changes the nature of the action so that it is qualitatively different from a copyright [or patent] infringement claim." *Summit Mach. Tool Mfg. Corp. v. Victor CNC Sys., Inc., 7 F.3d 1434, 1439-40 (9th Cir. 1993)* (internal quotation omitted, brackets in original) (considering state law misappropriation claim in light of federal patent laws). AB 824 does not require a court to determine the validity or invalidity of a patent. Instead, it is focused on the payment of a "thing of value" to the generic drug company and attaches a presumption that such a transfer serves anti-competitive purposes. Because AB 824 does not require determination of the validity of a patent and does not create patent-like protections, it does not conflict with federal patent law and is therefore not preempted under this analysis.

Plaintiff's next assertion that AB 824 conflicts with, and is therefore preempted by, the Hatch-Waxman Act is predicated on Plaintiff's claim that the ultimate effect of AB 824 will be to stifle the creation, production, and entry onto the market of cheaper generic medications. The State, by contrast, argues that the intent of AB 824 is to ensure that generic drugs are not kept off the market by the practice of reverse payment settlements and banning these **[*23]** settlements will ensure generics enter the market sooner, ultimately decreasing drug prices and protecting the public's access to affordable medicine. The parties agree that the intent of the Hatch-Waxman Act was to create a pathway for generic medications to enter the market faster and to lower prescription drug prices as a result. The argument of each party turns on how exactly AB 824 will impact these goals. Because AB 824 has not been enacted, nor has any other similar law been enacted in another state, it is impossible to know if this law will have its intended effect, or as Plaintiff argues, will backfire, causing generic drug companies to cease filing ANDA applications and challenging patents held by brand-name drug companies. The Court is not in a position to predict the future impacts of AB 824 before it is enacted and enforced. At this time, it is too speculative for the Court to find one way or another that AB 824 will frustrate or further the aims of the Hatch-Waxman Act. As such, Plaintiff cannot show a likelihood of success on the merits of its conflict preemption claim.

Finally, Plaintiff argues *Actavis* "went out of its way to protect" (ECF No 10-1 at 22) the delicate **[*24]** balance Congress struck between patent law and ***antitrust law***. Plaintiff contends AB 824 disrupts this balance and is therefore preempted by *Actavis*. In support of this assertion, Plaintiff cites *Connell Constr. Co. v. Plumbers & Steamfitters Local Union No. 100, 421 U.S. 616, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*, a case in which the Supreme Court found that "[b]ecause employee organization is central to federal labor policy and regulation of organizational procedures is comprehensive, federal law does not admit the use of state ***antitrust law*** to regulate union activity that is closely related to organizational goals." In *Connell Construction*, the Supreme Court limited the application of state ***antitrust law*** to federal labor laws. In *Actavis*, by contrast, the Supreme Court opened reverse payment patent settlements to antitrust scrutiny rather than limiting the application of ***antitrust law*** to patent settlements. Therefore, *Connell Construction* is inapposite.

Actavis' holding opens patent settlements to antitrust scrutiny by overturning previous circuit court precedent that reverse payment settlements do not present antitrust concerns "so long as its anticompetitive effects fall within the scope of the exclusionary potential of the patent." *570 U.S. at 141* (internal quotes omitted). Instead of following the circuit analysis, **[*25]** *Actavis* applied ***antitrust law*** to reverse payment settlements and found that such settlements may violate federal antitrust laws. *Actavis*' analysis is based not on a presumption of validity of the underlying patent, but rather on the balance between the anti- and pro-competitive impacts of the settlement agreement.

Plaintiff notes the California Supreme Court acknowledged that the "United States Supreme Court is the final arbiter of questions of patent law and the extent to which interpretations of ***antitrust law*** — whether state or federal — must accommodate patent law's requirements . . . ." *In re Cipro Cases I & II, 61 Cal. 4th 116, 142, 187 Cal. Rptr. 3d 632, 348 P.3d 845 (2015)*. Plaintiff posits that the finding in *Actavis* therefore precludes California from imposing its own antitrust laws on reverse payment patent settlements. However, the California Supreme Court determined that "the lesson of *Actavis* is that nothing in the patent laws or the Hatch—Waxman Act dictates such a special rule; that a settlement resolves a patent dispute does not immunize the agreement from antitrust attack;" and that if federal ***antitrust law*** can weigh the pro- and anti-competitive effects of a patent settlement without "offense to patent law, then so too can the state ***antitrust law***." *In re Cipro Cases I & II, 61 Cal. 4th at 161*. This **[*26]** Court agrees with the California Supreme Court. The holding in *Actavis* allows the enforcement of ***antitrust law*** on patent settlements rather than foreclosing such enforcement.

Plaintiff argues that because *Actavis* applied a rule of reason test and declined to follow a quick look approach or rely on a presumption, California may not create its own presumption when applying its ***antitrust law*** to patent settlements. However, there is no such limitation presented in *Actavis* and, as the California Supreme Court points out, "*Actavis* is not dispositive on matters of state law . . . [i]nterpretations of federal ***antitrust law*** are at most instructive, not conclusive, when construing the Cartwright Act, given that the Cartwright Act was modeled not on federal antitrust statutes but instead on statutes enacted by California's sister states around the turn of the 20th century." *In re Cipro Cases I & II, 61 Cal. 4th at 142*. This Court agrees that *Actavis* turns on questions of ***antitrust law***, not patent law, and federal ***antitrust law*** does not preempt state ***antitrust law***. *California v. ARC Am. Corp., 490 U.S. 93, 101-02, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)* ("Congress has not pre-empted the field of ***antitrust law*** . . . Congress intended the federal antitrust laws to supplement, not displace, state antitrust remedies."). Therefore, **[*27]** *Actavis* does not preempt AB 824, nor does it prevent California's imposition of a law establishing a presumption regarding the anticompetitive nature of reverse payment settlements under its own antitrust statutes.

Further, while *Actavis* applies the rule of reason to the analysis of reverse payment settlements under federal ***antitrust law***, it does not establish exactly how and when this test should be applied. Instead, the Court in *Actavis* explicitly leaves the question of how to apply the rule it articulated to the lower courts. "As in other areas of law, trial courts can structure antitrust litigation so as to avoid, on the one hand, the use of antitrust theories too abbreviated to permit proper analysis, and, on the other, consideration of every possible fact or theory irrespective of the minimal light it may shed on the basic question — that of the presence of significant unjustified anticompetitive consequences. We therefore leave to the lower courts the structuring of the present rule-of-reason antitrust litigation." *570 U.S. at 159-60*.

Plaintiff's arguments that AB 824 is preempted by federal law are therefore not likely to succeed. As a result, Plaintiff cannot show that there is a likelihood of **[*28]** success on the merits. Further, even if Plaintiff had raised serious questions as to the merits of the preemption question, the balance of hardships does not tip significantly in Plaintiff's favor, as discussed below, such that a preliminary injunction should be granted.

3. <u>Excessive Fines</u>

In terms of a penalty, AB 824 imposes a fine against any individual who assists in what is deemed to be a violation of the bill of three times the value received by the individual due to the violation or $20 million, whichever is greater. By the terms of the bill, this minimum of $20 million applies to any individual who assists in the party's violation even if that person gained nothing of value as a result of the violation. Presumably, such a penalty could be levied against a junior associate or legal secretary working at the law firm representing one of the settling parties.

Plaintiff raises two arguments that AB 824 imposes excessive fines: (1) that the upper threshold of three times the value received is excessive in relation to the purported anticompetitive harms of any violative settlement agreement; and (2) that a minimum fine of $20 million is excessive as it applies to individuals, as opposed **[*29]** to parties. For its part, the State argues, (1) Plaintiff's claim is not ripe for determination because such a claim is dependent on a number of factual inquiries not presently before the Court; (2) the Court should defer to the State in setting penalties or fixing fines unless they are so grossly excessive as to amount to a due process violation;[4] and (3) because Plaintiff is bringing a facial attack on AB 824, its claim can only succeed if it shows no set of circumstances exist under which the Act would be valid, which it cannot do.

The parties agree that the *Eighth Amendment* prohibits states from imposing "excessive fines" and has been applied where the fine is imposed, in whole or in part, as punishment for an offense. The parties also do not dispute that the fine imposed under AB 824 is intended as a penalty and further agree that a fine is considered excessive if it is disproportionate to the gravity of the offense. In the Ninth Circuit, courts consider four factors in determining whether a penalty is grossly disproportionate to the offense: (1) the nature and extent of the violation; (2) whether the violation was related to other illegal activities; (3) other penalties that may be imposed for **[*30]** the violation; and (4) the extent of the harm caused. (ECF No. 10 at 28; ECF No. 24 at 12; *see* *United States v. $132,245.00 in U.S. Currency, 764 F.3d 1055, 1058 (9th Cir. 2014))*.

It is not entirely clear whether Plaintiff intends to raise a facial or as-applied attack against the penalty portion of AB 824. At least with respect to Plaintiff's claim that the upper threshold is excessive in relation to the purported anticompetitive harms of any violative settlement agreement, Plaintiff's attack — seeking to invalidate the law (or at least enjoin the penalty provision) as applied to any defendant — is necessarily a facial one. *See* *Hoye, 653 F.3d at 857* ("Because the difference between an as-applied and a facial challenge lies only in whether all or only some of the statute's subrules (or fact-specific applications) are being challenged, the substantive legal tests used in the two challenges are 'invariant.'") As discussed above, a facial attack of a law is exceedingly difficult to raise successfully. "[T]he Court's analysis of Plaintiffs' facial excessive fines claims asks whether parts of the penalty structure are always grossly disproportional, or if there are circumstances where the penalties would be valid." *In re Toll Roads Litig., No. SACV1600262AGJCGX, 2018 WL 4945314, at *2 (C.D. Cal. July 31, 2018)* (citing *United States v. Bajakajian, 524 U.S. 321, 336, 118 S. Ct. 2028, 141 L. Ed. 2d 314 (1998))*; *United States v. Salerno, 481 U.S. 739, 745, 107 S. Ct. 2095, 95 L. Ed. 2d 697 (1987)*. Certainly, the **[*31]** Court can fathom a set of circumstances in the context of massive pharmaceutical settlements under which the imposition of three times the value received due to the violation or $20 million, whichever is greater, might be appropriate. At the most general level, then, Plaintiff's facial attack again fails.

Moreover, and as the parties agree, in evaluating a claim under the *Excessive Fines Clause*, "the standard of gross disproportionality" requires a court to "compare the amount of the forfeiture to the gravity of the [ ] offense. If the amount of the forfeiture is grossly disproportional to the gravity of the defendant's offense, it is unconstitutional." *Bajakajian, 524 U.S. at 336-37*. In the Ninth Circuit, this typically requires courts to consider the four factors articulated above: (1) the nature and extent of the violation; (2) whether the violation was related to other illegal activities; (3) other penalties that may be imposed for the violation; and (4) the extent of the harm caused. *See* *United States v. $132,245.00 in U.S. Currency, 764 F.3d 1055, 1058 (9th Cir. 2014)*. Each of these four factors — perhaps with the exception of the third — are all but impossible to assess in the abstract, highlighting the difficulty of a pre-enforcement attack based on the *Excessive Fines Clause*. As one district court noted, "[t]he first factor requires **[*32]** review of the circumstances of the offense 'in great detail.'" *Crawford v. United States Dep't of the Treasury, No. 3:15-CV-250, 2015 U.S. Dist. LEXIS 131496, 2015 WL 5697552, at *14-15 (S.D. Ohio Sept. 29, 2015)*, (citing *Solem v. Helm, 463 U.S. 277, 290-91, 103 S. Ct. 3001, 77 L. Ed. 2d 637 (1983)* (*Cruel and Unusual Punishments Clause* analysis)). "In this case, there are no circumstances to review, because no . . . penalty has been imposed. A fact-specific determination of excessiveness is impossible where any wrongful conduct is hypothetical." *Id.* The same is true here.

In other words, without examining the factual underpinnings of an *actual violation* the Court can hardly speculate as to the nature and extent of the violation, whether the violation is related to other illegal activities (perhaps unlikely in this scenario, but not impossible), and the extent of the harm caused, if any, as it is yet unknown. Plaintiff's

[4] The Court acknowledges Plaintiff's reference to the recent case of *Timbs v. Indiana, 139 S. Ct. 682, 687-89, 203 L. Ed. 2d 11 (2019)*, which holds the *Excessive Fines Clause* is fully incorporated against the states. The Court need not and does not determine whether such incorporation revokes the deference otherwise afforded to the State to set penalties and fines. Because the Court finds Plaintiff's Excessive Fines claim is unripe, it need not consider the State's argument for deference.

arguments to the contrary hinge on its position that "run-of-the-mill patent settlements" are not at all harmful, and thus such a pricey penalty is excessive. (*See* ECF No. 10 at 28-29.) But it is not so clear to the Court that the settlements impacted by AB 824 will be "run-of-the-mill." Quite clearly, the State's position is that AB 824's goal is to effect only those settlements that are ultimately harming consumers. Without a factual underpinning by which to **[*33]** assess a violation, it is impossible to know if the upper threshold imposed is excessive. Put simply, the Court is not willing at this point to find the upper threshold of AB 824's penalty provision is grossly disproportional to the gravity of every conceivable violation of the statute. The Court therefore agrees with the State that Plaintiff's Excessive Fines claim is not ripe for adjudication as it pertains to Plaintiff's attack of the upper limit imposed under the statute, and Plaintiff has therefore failed to establish a likelihood of success on the merits of this claim.

With respect to the $20 million minimum, Plaintiff attempts to clarify in reply that "[c]hallenges to limitations that appear on the face of state laws are ripe the moment the challenged law is enacted," and further that its "principal Excessive Fines claim is that $20 million is excessive as applied to an individual *under any scenario*." (ECF No. 27 at 12, emphasis in original.) Because Plaintiff seeks to invalidate or enjoin the penalty provision of AB 824 as it might be applied to individuals only, the attack is necessarily an as-applied pre-enforcement attack.

Plaintiff fails to cite to any authority establishing **[*34]** that an as-applied pre-enforcement claim is cognizable under the *Excessive Fines Clause*. But assuming it is, the Court must nevertheless apply the three-part test articulated above with respect to pre-enforcement challenges generally. Specifically, in order to successfully establish that the claim is ripe for review, Plaintiff must show: (1) a concrete plan to violate the law; (2) a communicated threat of prosecution; and (3) a history of past prosecution or enforcement of the challenged law. As discussed above with respect to Plaintiff's claim under the Dormant *Commerce Clause*, Plaintiff does not sufficiently meet this standard. Even more so with respect to Plaintiff's "as-applied to individuals" claim, Plaintiff has made no attempt to proffer evidence that a single individual intends to violate AB 824, nor that the State has communicated a threat of levying a $20 million fine against, for example, a junior associate at a law firm who took notes during settlement negotiations. Further, the prudential inquiry leads the Court to find the claim is unripe as it requires factual development. As a result, the Court finds Plaintiff's pre-enforcement as-applied to individuals attack is not yet ripe, and Plaintiff therefore fails **[*35]** to establish a likelihood of success on the merits of the claim.

Lastly, regardless of whether Plaintiff's Excessive Fines claim is intended as a facial or as-applied attack on the provision as it applies to individuals, any Excessive Fines claim requires a court to consider the four factors articulated above to determine if the fine is disproportionate to the gravity of the offense. Again, those factors are: (1) the nature and extent of the violation; (2) whether the violation was related to other illegal activities; (3) other penalties that may be imposed for the violation; and (4) the extent of the harm caused. *See* *United States v. $132,245.00 in U.S. Currency, 764 F.3d 1055, 1058 (9th Cir. 2014)*; *see also* Hoye, 653 F.3d at 857 ("Because the difference between an as-applied and a facial challenge lies only in whether all or only some of the statute's subrules (or fact-specific applications) are being challenged, the substantive legal tests used in the two challenges are 'invariant.'") In the context of the $20 million fine as applied to individuals, Plaintiff comes closer to establishing possible success on this part of the inquiry. To be sure, the Court is troubled that a law firm's junior associate could theoretically face a $20 million fine for her participation in negotiating **[*36]** a settlement agreement that violates AB 824. But given the posture of this case, the Court cannot say Plaintiff has established a likelihood of success, or even raised serious questions going to the merits of its claim. As explained above, the analysis required to find an *Excessive Fines Clause* violation is fact-specific. Even narrowing the challenge to the statute as it applies to individuals, the Court cannot analyze the circumstances surrounding a violation before any violation occurs. Indeed, if a $20 million fine is levied against an individual in a case in which the four factors articulated above indicate such a fine is excessive, that individual may apply for a temporary restraining order or injunction and seek to invalidate the law as it is applied unconstitutionally to the individual. Absent those facts, the relief requested is premature. For those reasons, the Court finds Plaintiff has failed to establish a likelihood of success on the merits of its Excessive Fines claim. Further, even if Plaintiff had raised serious questions as to the merits of the claim, the balance of hardships does not tip significantly in Plaintiff's favor, as discussed below, such that a preliminary injunction should be **[*37]** granted.

4. Due Process

Finally, Plaintiff argues AB 824 violates due process because (1) it unfairly shifts the burden to the defendant to prove procompetitive effects; (2) the defendant's opportunity to rebut the presumptions imposed are meaningless because the statute presumes anticompetitive effects; and (3) relatedly, a manufacturer will not be able to prove an agreement *has had* procompetitive effects, even if that agreement *will* generate such effects over time. (ECF No. 10 at 30-31.) In opposition, the State argues: (1) the State has the authority to regulate legal procedure, including establishing a burden; (2) AB 824 expressly provides parties a meaningful opportunity to disprove liability once the burden is appropriately shifted; and (3) Plaintiff's position that the presumptions set forth in AB 824 represent a stark departure from established law is unsupported. (ECF No. 24 at 24-25.) In reply, Plaintiff seems to concede that a burden shift in and of itself is not violative of due process, clarifying that AB 824 is unconstitutional "because it shifts the burden of persuasion to the defendant *and also* imposes a presumption of guilt while making it effectively impossible to rebut **[*38]** that presumption." (ECF No. 27 at 13.) More specifically, Plaintiff cites to a scenario in which a generic settles a patent dispute by agreeing to an early but not immediate entry date with an exclusive license. The generic, Plaintiff claims, will have to prove that such an agreement *has* generated procompetitive benefits and that the benefits outweigh the anticompetitive effects presumed by the law. (*Id.*)

Again, Plaintiff is not likely to succeed on the merits of this claim. First, Plaintiff cites to no authority holding that the burden of persuasion can never properly be shifted to the defendant to disprove liability, and the Court is aware of none. Indeed, Plaintiff all but concedes that a burden shift in the first instance is not itself a violation of due process. (ECF No. 27 at 9.) Plaintiff's better argument is that AB 824 does not provide a *meaningful* opportunity to rebut the presumption because it requires a defendant to show the questioned agreement *has already had* procompetitive effects. As the law is written, the fact that a settlement supposedly *will* have procompetitive effects is not sufficient to rebut the antitrust presumption.

While seemingly an accurate statement of AB **[*39]** 824's language, the Court is not convinced that AB 824's express provision allowing a manufacturer to rebut the presumption by showing procompetitive effects is not meaningful. Here, it is Plaintiff's burden to establish a likelihood of success on its due process claim. But Plaintiff offers nothing in the way of caselaw or evidence supporting its stance that the process provided for by the statute is not meaningful. First, there are other means of disproving liability, including showing the value received is fair and reasonable compensation solely for other goods or services provided. Also, the parties remain free to invoke any other standard antitrust defense. And moreover, the fact that AB 824 demands a showing that a settlement "has directly generated procompetitive benefits"[5] does not render that option meaningless. Indeed, the Court can imagine a scenario where a settlement would have an immediately procompetitive effect. AB 824 simply reflects a desire to penalize parties that enter into agreements that — among other requirements — have not generated procompetitive benefits.

To the same point, Plaintiff overstates the changes AB 824 makes to established jurisprudence in the **[*40]** areas of antitrust and patent law. The presumption raised by AB 824 is stronger, and the burden shift may be sharper, but both federal and state antitrust caselaw provides for a similar presumption and burden shift in the context of reverse payment settlement agreements. *See* *FTC v. Actavis, 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*; *In re Cipro Cases I & II, 61 Cal. 4th 116, 187 Cal. Rptr. 3d 632, 348 P.3d 845 (Cal. 2015)*. And both federal and state cases make clear that, (1) agreements must be assessed as of the time they are made; and (2) the relevant baseline for determining whether an agreement is procompetitive is the period of competition that would have been, but for the settlement (as opposed to using the life of a valid patent as a baseline). *See* *In re Cipro, 348 P.3d at 870*. As set forth in *In re Cipro*, "***Antitrust law*** condemns the purchase of freedom from competition; what matters is whether a settlement postpones market entry beyond the average point that would have been expected at the time in the absence of agreement." *348 P.3d at 870*. Importantly, AB 824 provides a mechanism — indeed more than one — by which a defendant can rebut the presumption arising from a reverse payment settlement. Nothing supports the contention that this mechanism is not meaningful simply because it requires an actual showing of

---

[5] The State cites to *In re Cipro Cases I & II, 348 P.3d 845, 61 Cal. 4th 116 at 149-150, 187 Cal. Rptr. 3d 632 (Cal. 2015)*, to support its contention that this language "draws on established antitrust jurisprudence and the ex ante framework of pay-for-delay jurisprudence." This "has directly generated" language does not appear in *Cipro*.

procompetitive benefits as of the time the settlement **[*41]** is entered,[6] as opposed to some level of speculation that procompetitive benefits will result at some undetermined time in the future.

Finally, Plaintiff asserts AB 824's presumption that the relevant product market is limited to the branded drug and its generic substitutes renders the anticompetitive presumption irrebuttable because it deprives defendants of the opportunity to present every available defense. (ECF No. 10 at 39.) The Court disagrees. AB 824 simply erects a presumption regarding the relevant market. It does not foreclose the defendant from presenting evidence that the relevant market is broader than the one presumed. Granted, AB 824 seems to stack certain presumptions on top of other presumptions. This may have the effect of making it more difficult to rebut all applied presumptions, but nothing indicates to the Court that it has the effect of depriving potential defendants of their due process rights. As a result, the Court finds Plaintiff has not established a likelihood of success on the merits of its due process claim, nor has it raised serious questions going to those merits. Even if Plaintiff had raised serious questions, as discussed below, the balance of hardships **[*42]** does not tip significantly in Plaintiff's favor such that a preliminary injunction should be granted.

B. Irreparable Injury

Because the Court finds Plaintiff is not likely at this time to succeed on the merits of any of its claims, it need not address the remaining *Winter* factors. *See* *Alliance for the Wild Rockies, 632 F.3d at 1135* (A plaintiff must "make a showing on all four prongs" of the *Winter* test to obtain a preliminary injunction.). Nonetheless, the Court briefly discusses the remaining factors, which further support that issuance of a preliminary injunction is not justified at this time.

Plaintiff alleges its members will suffer irreparable injury because: (1) AB 824 violates Plaintiff's members' constitutional rights and they are therefore *per se* irreparably injured; (2) they will be forced to make a decision to either continually violate AB 824 and expose themselves to significant liability or litigate every patent dispute to judgment and carry the financial burden of doing so; and (3) as a result of AB 824 and the impossible choice presented by (2), Plaintiff's members will have no choice but to cease entering the market, leading to lost goodwill and damage to reputation. Moreover, Plaintiff asserts its members will be **[*43]** irreparably harmed by the imposition of a fine pursuant to AB 824 because the *Eleventh Amendment* prohibits parties from suing state officials, and therefore prevents recoupment of any unjustified payment. In response, the State emphasizes that Plaintiff's claimed injuries are purely speculative, and that any potential harm to Plaintiff's members will be the result of their own business choices, not the result of AB 824 itself. The State also argues that because Plaintiff has failed to demonstrate a likelihood of success on the merits of its constitutional claims, it has failed to demonstrate that it will suffer irreparable harm resulting from a constitutional violation.

The State is of course correct that absent a likelihood of success on the merits of its constitutional claims, Plaintiff's claimed *per se* injury resulting from a constitutional violation necessarily fails. As for Plaintiff's other claimed injuries, the Court finds Plaintiff overstates the certain and impending harm AB 824 will do. First, AB 824 does not prohibit patent settlements; the claim that AB 824 will force Plaintiff's members to either violate the law or litigate to judgment, both at great expense, is therefore based on speculation **[*44]** of how companies will choose to react to AB 824's implementation. But at least one FTC report indicates the majority of patent settlements do not contain a reverse payment at all. (*See* ECF No. 24 at 19, citing *Overview of Agreements Filed in FY 2016*, A Report by the FTC Bureau of Competition.) Surely, then, parties to pharmaceutical patent litigation *can* settle in the aftermath of AB 824.

Moreover, "[s]peculative injury does not constitute irreparable injury sufficient to warrant granting a preliminary injunction." *Caribbean Marine Servs. Co. v. Baldrige, 844 F.2d 668, 674 (9th Cir. 1988)* (citing *Goldie's Bookstore, Inc. v. Super. Ct., 739 F.2d 466, 472 (9th Cir.1984))*. "A plaintiff must do more than merely allege imminent harm sufficient to establish standing; a plaintiff must demonstrate immediate threatened injury as a prerequisite to

[6] The Court has no way of knowing how immediate AB 824 enforcement may be after entry of settlement.

preliminary injunctive relief." *Id.* (citing *Los Angeles Memorial Coliseum Commission v. National Football League, 634 F.2d 1197, 1201 (9th Cir.1980))*. As discussed above in the context of Plaintiff's Dormant *Commerce Clause* claim, nowhere does Plaintiff point to a specific pending case or settlement negotiation in which it will need to act differently as a result of AB 824 (nor is the Court convinced that a change in a drug manufacturer's business practices would constitute irreparable harm in any event). Speculation of how the market will react to the bill's implementation is not enough to support a preliminary **[*45]** injunction.

Most concerning to the Court is Plaintiff's claim that any fine improperly levied — especially with respect to an individual — could not be recouped because of the *Eleventh Amendment's* protection of state officials. But at this time, that injury is also speculative and not imminent. Indeed, if the State were to pursue a $20 million fine against a minor individual participant in a violative settlement agreement, for example, that individual may be able to state a claim that the law violates the *Excessive Fines Clause* as applied to them and may be able to seek a preliminary injunction on those grounds. That, however, is not presently before the Court.

C. Balance of Hardships and Public Interest

The last two factors of the *Winter* test are: "[] that the balance of equities tips in [plaintiff's] favor, and [] that an injunction is in the public interest." *Winter, 555 U.S. at 20*. "When the government is a party, these last two factors merge." *Drakes Bay Oyster Co. v. Jewell, 747 F.3d 1073, 1092 (9th Cir. 2014)*. Therefore the Court must analyze the balance between the hardships imposed on AAM and its members and the impact an injunction on the enforcement of AB 824 will have on the public. It is true that there may be some costs and changes to the business practices of Plaintiff's members as a result of AB 824; **[*46]** however, as discussed above, Plaintiff has failed to establish irreparable injury because its claimed injuries are based purely on speculation as to how members might react to the new law. For the same reasons, the analysis of the burden imposed on Plaintiff therefore does not tip the scale heavily in Plaintiff's favor.

As for the public interest, this factor is at best neutral as both parties argue AB 824 will have the opposite effect. Plaintiff argues that not only does AB 824 impose significant burdens on it and its members, but also that the enforcement of AB 824 is not in the interest of the public. Plaintiff posits that should AB 824 go into effect, generic drug companies will be forced to litigate patent disputes to resolution, significantly increasing litigation costs, decreasing budgets for development of new generic drugs, and thereby decreasing the public's access to cheaper generic drug alternatives. Plaintiff also foresees generic drug companies refraining from putting any new generics on the market to avoid litigation or liability under AB 824, similarly limiting access to generic alternatives and increasing the cost of prescription drugs on the whole.

The State, by contrast, **[*47]** asserts that AB 824 will lower prescription drug prices by closing a loophole in the Hatch-Waxman Act whereby brand-name drug companies are able to preserve otherwise weak patents by paying generic drug companies to keep their drugs off the market. Under the State's analysis, closing this loophole will ensure that generic and brand companies no longer have an incentive to keep the generic off the market for longer than would be supported by the underlying patent and thus encourage the entry of cheaper generics onto the market faster. According to the State, AB 824 is designed to curb the high costs of prescription drugs.

At this juncture, how AB 824 will impact the public interest is purely speculative. The Court cannot predict how the market will react to this new law, nor should it. There is no comparable law in another state nor under federal law, so the Court has no facts before it to base such a determination. Therefore, the balance of equities does not tip in one direction or the other, and it certainly does not tip sharply in Plaintiff's favor. Thus, this factor does not support the imposition of an injunction against the enforcement of AB 824.

VI. CONCLUSION

Based on the foregoing, **[*48]** Plaintiff's Motion for Preliminary Injunction (ECF No. 10) is DENIED. Such denial is without prejudice to Plaintiff seeking another preliminary injunction should certain facts develop and/or certain claims become ripe during the pendency of this litigation.

IT IS SO ORDERED.

Counsel: **[*1]** For Credit Suisse Securities (USA) LLC, Petitioner: Marcia Nelson Jackson, Wick Phillips Gould & Martin, LLP, Dallas, TX.

For Neal David Carlson, Respondent: Leonard J Meyer, LEAD ATTORNEY, HooverSlovacek, LLP, Houston, TX.

Judges: Gray H. Miller, Senior United States District Judge.

Opinion by: Gray H. Miller

Opinion

MEMORANDUM OPINION AND ORDER

Pending before the court are (1) a petition to confirm an arbitration award (Dkt. 1) filed by petitioner Credit Suisse Securities (USA) LLC ("CSS"); and (2) a motion to vacate an arbitration award (Dkt. 9) filed by respondent Neal David Carlson. Having considered the petition, motion, responses, replies, and applicable law, the court is of the opinion that the motion to vacate (Dkt. 9) should be DENIED and the petition to confirm (Dkt. 1) should be GRANTED.

I. BACKGROUND

On April 15, 2019, a three-arbitrator panel in a FINRA Dispute Resolution ("FINRA") arbitration between Carlson and CSS rendered an award in favor of CSS. Dkt. 1; Dkt. 1-1 (award). Carlson alleged in the arbitration that CSS made false representations to induce him into joining its wealth management division and failed to disclose that CSS was in the process of eliminating the division Carlson joined. Dkt. 1-1. **[*2]** CSS made a counterclaim for breach of contract, among other claims, alleging that Carlson was obligated to pay the outstanding balance of a promissary note he had entered into with CSS when he took the position. *Id.* The panel denied Carlson's claims and found that he was liable to CSS for the remaining balance of the promissary note together with interest. *Id.*

The presiding chairperson in the FINRA arbitration was Brian James Tagtmeier. *Id.* Tagtmeier had represented to the parties that he had no professional relationships with any of the parties, counsel, or arbitrators, "no matter how remote."[1] Dkt. 15; Dkt. 13-20 (oath of arbitrator). It appears that this was true at the time the arbitration was filed and Tagtmeier was selected in March of 2017. *See* Dkt. 14-2. However, the arbitration did not occur until March of 2019. *See id.* On December 17, 2018, Tagtmeier filed a notice of appearance in a case captioned *Hestia Complete Home Services d/b/a Hestia Home Services v. Daniel Bonville and Christine Parisien*. Dkt.3-4. Tagtmeier's appearance was on behalf of the plaintiff, Hestia Home Services. *Id.* The defendants, Bonville and Parisien, were represented by Courtney E. Palm of Hoover Slovacek, **[*3]** LLP. *See id.* On December 31, 2018, Carlson's team electronically filed a notice with the FINRA[2] arbitration panel that they were changing firms and that Hoover Slovacek, LLP would now be representing Carlson. Dkt. 13-19 (Meyer Aff.). Three days later, on January 3, 2019, Tagtmeier filed a motion to reconsider in *Hestia* in which he requests that the court vacate an order granting summary judgment in Hoover Slovacek's client's favor. Dkt. 13-5. On February 27, 2019, Tagtmeier was listed as counsel for the plaintiff in an agreed motion for continuance (signed by another attorney) that was filed in *Hestia*, which represented his agreement with opposing counsel at Hoover Slovacek, and he also signed several orders to appear in the arbitration that had been requested by Hoover Slovacek attorneys. Dkts. 13-7, 13-8. When the arbitration began on March 4, 2019, Tagtmeier announced he had no new disclosures. Dkt. 13-19. The *Hestia* case was still ongoing. *Id.*

Carlson argues that the court should vacate the arbitration award because Tagtmeier failed to disclose his ongoing representation of an adversary to an client of Carlson's counsel's firm, which Carlson contends is ground **[*4]** for vacatur under the *Federal Arbitration Act ("FAA")*. Dkt. 13. He additionally argues that some of Tagtmeier's evidentiary rulings are evidence of his partiality and that they are also independent grounds for vacatur. *Id.*

CSS argues that the court should confirm the award, as the parties agreed to final and binding arbitration and Carlson cannot meet the heavy burden of satisfying the extraordinarily narrow statutory grounds necessary for vacatur. Dkt. 14. CSS asserts that Carlson's evidence of partiality is remote, uncertain, or speculative and fails to show clearly evident bias. *Id.* CSS further argues that none of Carlson's evidentiary arguments exhibits misconduct by Tagtmeier or the panel. *Id.*

II. LEGAL STANDARD

The FAA reflects "a liberal federal policy favoring arbitration . . . and the fundamental principle that arbitration is a matter of contract. *AT&T Mobility v. Concepcion, 563 U.S. 333, 339, 131 S. Ct. 1740, 179 L. Ed. 2d 742 (2011)*. If a party seeks confirmation of an arbitration award within one year of it being awarded, "the court must grant such an order unless the award is vacated, modified, or corrected as prescribed in *sections 10* and *11* of [the FAA]." *9 U.S.C. § 9*. Carlson requests vacatur under subsections *10(a)(2)* and *10(a)(3)*. Subsection *10(a)(2)* permits vacatur "where there **[*5]** is evident partiality or corruption in the arbitrators, or either of them," and subsection *10(a)(3)* permits vacatur "where the arbitrators were guilty of misconduct in refusing to postpone the hearing, upon sufficient cause shown, or in refusing to hear evidence pertinent and material to the controversy; or any other misbehavior by which the rights of any party have been prejudiced." *9 U.S.C. § 10(a)(2)-(3)*.

---

[1] The first item on the checklist Tagtmeier completed personal indicates that he did not have any "professional, social, or other relationships or interactions with counsel for any of the parties in this arbitration *or their law firms*." Dkt. 13-20 at 4 (emphasis added).

[2] FINRA stands for Financial Industry Regulatory Authority. *See* Dkt. 13-16.

The Fifth Circuit, in considering the statutory language of subsection *10(a)(2)*, noted that it "seems to require upholding arbitral awards unless bias was clearly evident in the decisionmakers." *Positive Software Sols., Inc. v. New Century Mortg. Corp., 476 F.3d 278, 281 (5th Cir. 2007)*. After considering the terms of the subsection and relevant U.S. Supreme Court caselaw, the Fifth Circuit determined that "nondisclosure alone does not require vacatur of an arbitral award for evident partiality"; instead, the "arbitrator's failure to disclose must involve a significant compromising connection to the parties." *Id. at 282-83*. The "award may not be vacated because of a trivial or insubstantial prior relationship between the arbitrator and the parties to the proceeding." *Id. at 283*. The court concluded that neither the FAA nor the U.S. Supreme Court "countenances vacatur of FAA arbitral awards for nondisclosure by an **[*6]** arbitrator unless it creates a concrete, not speculative impression of bias." *Id. at 286*.

The arguments Carlson makes under subsection *10(a)(3)* relate to alleged failure by the arbitrators to hear pertinent evidence or other misbehavior. In analyzing these claims, the court must be mindful that "arbitration resolves disputes without confinement to many of the procedural and evidentiary strictures that protect the integrity of formal trials." *Forsythe Int'l, S.A. v. Gibbs Oil Co. of Tex., 915 F.2d 1017, 1022 (5th Cir. 1990)*. While an arbitration panel is not required to hear all evidence offered, it "'must give each of the parties to the dispute an adequate opportunity to present its evidence and arguments.'" *Id. at 1023* (quoting *Hoteles Condado Beach v. Union de Tronquistas Local 901, 763 F.2d 34, 39 (1st Cir. 1985))*. However, arbitrators "'need not follow all the niceties observed by the federal courts'"; they simply must "'grant the parties a fundamentally fair hearing.'" *Totem Marine Tug & Barge, Inc. v. N. Am. Towing, Inc., 607 F.2d 649, 651 (5th Cir. 1979)* (quoting *Bell Aerospace Co. v. Div. of Textron, Inc. v. Local 516, UAW, 500 F.2d 921, 923 (2d Cir. 1974))*; *see also* *Laws v. Morgan Stanley Dean Witter, 452 F.3d 398, 399 (5th Cir. 2006)* ("'To constitute misconduct requiring vacatur of an award, an error in the arbitrator's determination must be one that is not simply an error of law, but which so affects the rights of a party that it may be said that he was deprived of a fair hearing.'" (quoting *El Dorado Sch. Dist. No. 15 v. Cont'l Cas. Co., 247 F.3d 843, 848 (8th Cir. 2001)))*. "Arbitrators have broad discretion to make evidentiary decisions." *Int'l Chem. Workers Union v. Columbian Chems. Co., 331 F.3d 491, 497 (5th Cir. 2003)*.

III. ANALYSIS

A. *Subsection 10(a)(2)* - Evident Partiality [*7]

Carlson's arguments primarily center around his allegations of evident partiality, so the court will begin its analysis there. The court must determine in accordance with *Positive Software Solutions* whether the undisclosed connection was "a significant compromising connection to the parties" that created a "concrete, not speculative impression of bias" or if it was "a trivial or insubstantial prior relationship." It is clear that unlike the relationship in *Positive Software Solutions*, this relationship was not a *prior* relationship. The arbitrator had a professional relationship as an adversary with the firm representing one of the parties while the arbitration was ongoing. The court, however, must determine whether the relationship otherwise meets the *Positive Software Solutions* standard by determining if it was significant and created a concrete impression of bias.

Carlson, relying on Texas state caselaw, including *Burlington Northern Railroad Co. v. Tuco Inc., 960 S.W.2d 629 (Tex. 1997)*, and on the U.S. Supreme Court case, *Commonwealth Coatings Corp. v. Continental Casualty Co.*, argues that the court need only determine if there was a "reasonable impression of bias." Dkt. 17. However, in *Positive Software Solutions*, the Fifth **[*8]** Circuit, in an *en banc* opinion, determined that the "reasonable impression of bias" standard in *Commonwealth Coatings* must be read "holistically" and "interpreted practically rather than with utmost rigor" as a majority of the *Commonwealth Coatings* Court did not endorse the "appearance of bias" standard that was set forth in the plurality opinion.[3] *Positive Software Sols., 476 F.3d at 282-83* (relying on

[3] Judge Reavley, joined by Judge Wiener, Garza, Benavides, and Stewart, dissented, stating that the Fifth Circuit "may not overrule a decision of the Supreme Court"—*Commonwealth Coatings*, which Judge Reavley interpreted as requiring disclosure if there are "dealings that might create only an impression of possible bias." *476 F.3d at 287* (Reavley, J., dissenting). He noted

reasoning in cases from the Sixth, Fourth, Second, Seventh, Tenth, and Eleventh Circuits). The Fifth Circuit's practical and holistic interpretation requires a showing of "a significant compromising connection" and "a concrete, not speculative impression of bias" in a failure to disclose case. *Id. at 283, 286*.

CSS thus attempts to minimize Tagtmeier's connection to the parties, noting that Tagtmeier "briefly represented a party in a Texas state court action, where the attorney for the adverse party in that action happened to be a partner at the law firm that Carlson's counsel joined two months prior to the arbitration hearings." Dkt. 14 at 7. It also points out that for the first twenty-two months of the proceedings, **[*9]** there was "no conflict whatsoever," as Carlson's counsel was at a different firm. *Id.* at 8. CSS contends that there is no reason to believe that Tagtmeier even saw and registered in his mind that Carlson's counsel had changed firms and that counsel was now at his opposing counsel's firm in the *Hestia* lawsuit or even that he had an obligation to disclose "such a tenuous circumstance." *Id.* at 9-10. CSS deems the connection with Carlson's counsel's new firm to be an "insubstantial connection from which to infer partiality." *Id.* It points out that in *Positive Software Solutions* the Fifth Circuit clearly stated that the standard is not the mere appearance of bias and argues that Carlson must produce ""specific facts that indicate improper motives on the part of the arbitrator."" *Id.* at 8 (quoting *Vantage Deep Water Co. v. Petrobras Am. Inc., No 4:18-CV-02246, 2019 U.S. Dist. LEXIS 83766, 2019 WL 2161037, at *4 (S.D. Tex. May 17, 2019)* (Bennett, J.) (quoting *Thomas Kinkade Co. v. White, 711 F.3d 719, 724 (6th Cir. 2013))*.

The Fifth Circuit has required, post-*Positive Software Solutions*, that the party requesting vacatur "'must produce specific facts from which a reasonable person would have to conclude that the arbitrator was partial to'" the other party. *Cooper v. WestEnd Capital Mgmt., L.L.C., 832 F.3d 534, 545 (5th Cir. 2016)* (quoting *Householder Grp. v. Caughran, 354 F. App'x 848, 852 (5th Cir. 2009))*. It also requires the alleged partiality be "'direct, definite, and capable of demonstration **[*10]** rather than remote, uncertain, or speculative.'" *Id.* (quoting *Householder Grp., 354 F. App'x at 852*).

Here, Carlson arguably has shown that the undisclosed and ongoing relationship with Carlson's counsel's new firm creates an appearance of bias, which would be sufficient to vacate the award under the *dissent* in *Positive Solutions* or under the Texas cases cited by Carlson, but it is not sufficient to show that a reasonable person "would *have to conclude* that the arbitrator was partial." *Cooper, 832 F.3d at 545*. The facts that Carlson contend support a finding of evident partiality are (1) Tagtmeier was representing a client in the *Hestia* lawsuit who sought to recover at least $25,000; (2) the adverse party in the *Hestia* lawsuit—represented by Carlson's counsel's firm, Hoover Slovacek—sought at least $25,000 in fees and anticipated an additional $50,000 in fees if it proceeded to trial and $20,000 for an appeal; (3) Tagtmeier wrote a motion to reconsider an order granting partial summary judgment in *Hestia* on January 3, 2019, which was three days after Carlson's counsel told the arbitration panel they had joined Hoover Slovacek; (4) Tagtmeier signed several orders in the arbitration on February 27, 2019 that had been requested by Hoover Slovacek; **[*11]** (5) on the same day, an agreed motion for continuance bearing Tagtmeier's signature block and signed by a Hoover Slovacek attorney was filed in *Hestia*; and (6) Carlson's legal team made an argument regarding the *Sherman Antitrust Act* during the arbitration hearing, and Tagtmeier's opposing counsel in *Hestia* primarily practices antitrust and employment law, which could have led Tagtmeier to conclude that his opposing counsel developed this theory for the arbitration even though she was not listed counsel. Dkt. 13. Carlson further contends that Tagtmeier's adverse evidentiary rulings demonstrate evident partiality, including (1) the denial of Carlson's motion to compel material discovery; (2) the refusal to permit Carlson's experts to testify that the alleged promissory note was not a loan and confining their testimony to tax treatment of the funds; and (3) the refusal to permit CSS's Vice President of Human Resources ("HRVP") to testify about a Department of Justice publication ("DOJ Publication") directed at human resources professionals. *Id.*

---

that *Commonwealth Coatings* had "not been well received by some of the circuit courts" and that the majority's holding "might be on a bit firmer ground . . . [i]f circuit courts could overrule the Supreme Court." *Id.* Judge Reavley disagreed with those courts that treated *Commonwealth Coatings* as a plurality or plurality-plus opinion because he believed that the concurrence was not inconsistent with the majority opinion. *Id. at 288*. This court, or course, cannot overrule a Fifth Circuit opinion and must follow the majority's interpretation of *Commonweath Coatings*. Thus, to the extent the Texas caselaw and language from *Commonwealth Coatings* relied upon by Carlson runs contrary to the *Positive Software Solutions* majority's interpretation of the Supreme Court's holding, it is inapposite.

CSS argues that Carlson's allegations of partiality are remote and speculative and that the facts Carlson outlines as supporting improper motives **[*12]** do not meet the *Positive Software Solutions* standard. Dkt. 14. CSS agrees that Tagtmeier filed a notice of appearance in the *Hestia* matter on December 17, 2018, which was before the arbitration hearing, and that the lawyer for the defendants in that matter, Courtney Palm, worked for Hoover Slovacek. *Id.* It concedes that Tagtmeier filed a motion for reconsideration or new trial in *Hestia* three days after Carlson's counsel filed a notice of substitution indicating that they were now with the Hoover Slovacek firm, but CSS argues that these facts do not provide reason to conclude that Tagtmeier even saw and registered that Carlson's counsel had changed firms, made the connection it was the same firm as his adversary in *Hestia*, or, even if he did, thought that such a "tenuous circumstance" obligated him to disclose the connection. *Id.* It also points out that Tagtmeier was only brought into the *Hestia* matter on December 17, so there is no reason to speculate that he harbored ill will or enmity towards opposing counsel in the *Hestia* case. *Id.* As far as the motion for continuance being filed on the same day that Tagtmeier signed some orders in the arbitration, CSS argues that the motion was **[*13]** filed by opposing counsel in *Hestia* and signed by Tagtmeier's co-counsel, not Tagtmeier, and there is "no reason to speculate that Tagtmeier at that point even pieced together in his mind that his opposing counsel in *Hestia* was at the same firm as Carlson's counsel. *Id.* CSS asserts that the speculation that Tagtmeier may have thought his opposing counsel in *Hestia* came up with the Sherman Antitrust argument is "preposterous." *Id.* CSS points out that Tagtmeier is an experienced arbitrator and that his disclosures were extensive. *Id.* It argues that Tagtmeier was diligent and updated his disclosures at least four times while the arbitration was pending. *Id.* Finally, CSS asserts that the arbitration panel was composed of *three* members and issued an *unanimous* award, so the result of the arbitration would not have changed even if Tagtmeier were biased against Carlson's counsel. *Id.*

The court finds that the answer to each of these issues lies somewhere in the middle, but, regardless, Carlson has not met the stringent burden required to overturn an arbitration award for evident partiality. The court cannot conclude that a reasonable person would *have to* conclude that the arbitration panel was **[*14]** partial. While a reasonable person *could* conclude that Tagtmeier was partial and that he somehow influenced the other two arbitrators, a reasonable person could also conclude that the fact that his adversary in a lawsuit that Tagtmeier had recently been pulled into was at the same firm that Carlson's counsel had recently joined is inconsequential, and the fact that the award was unanimous from all three arbitrators supports the opposite conclusion. The adverse evidentiary rulings do provide some minimal additional support for Carlson's theory, but they are not clear cut errors that are sufficient to demonstrate bias. The court does find the nondisclosure troubling and believes that it presents an appearance of bias, but the standard for overturning an arbitral award for evident partiality is more stringent than appearance of bias, and Carlson does not meet his burden of a "concrete, not speculative impression of bias" under *Positive Solutions* and its progeny. The motion to vacate, as it relates to the argument of evident partiality on the part of Tagtmeier, is therefore DENIED.

B. *Subsection 10(a)(3)* - Failure to Hear Pertinent Evidence

The court must now turn to the argument that the **[*15]** court should vacate the award under subsection *10(a)(3)*. The court must determine whether Carlson had a fundamentally fair hearing, keeping in mind the arbitration panel's broad discretion in evidentiary matters. Carlson argues that the award should be vacated under subsection *10(a)(3)* because (1) Tagtmeier denied Carlson's motion to compel discovery of documents regarding CSS's plans to close, sell, or transfer the private banking business in the United States, which allowed damaging testimony to be presented with no opportunity for rebuttal or impeachment; (2) Tagtmeier refused to consider expert testimony regarding the promissory note actually being compensation and instead confined Carlson's experts to discussing tax treatment of the promissory note; and (3) Tagtmeier did not allow Carlson to question CSS's HRVP about CSS's alleged violation of the Sherman Antitrust Act and FINRA Rule 2010. Dkt. 13. The court will consider each of these arguments in turn.

1. Denial of Motion to Compel

Carlson contends that his ability to fully present his claim of fraudulent inducement was "crippled" when Tagtmeier denied his request to compel the production of material evidence. Dkt. 13. Namely, Carlson **[*16]** sought to compel production of documents relating to plans to close, sell, or transfer the CSS banking business in the United States, which Carlson contends he needed to prove that CSS fraudulently induced him to leave his former firm even though CSS knew it was going to close the division he was being induced to join. *Id.* Carlson contends that because Tagtmeier denied the motion to compel, the only evidence he could rely on for this fraudulent inducement theory was a Reuters article from January 2014 that claimed CSS had given the U.S. private wealth business eighteen months to turn around and spare the "'death sentence.'" *Id.* (quoting Dkt. 13, Ex. 11 at Carlson1117). This article was somewhat probative of the theory that CSS planned to close the private wealth management group when it hired Carlson in March 2014, but its evidentiary value was diminished when the person who was CEO of CSS's private banking division in the United States at the time testified during the hearing that the Reuters article mischaracterized and distorted a comment that the division would become profitable in eighteen months with no suggestion it would otherwise close. *Id.* (citing Dkt. 13, Ex. 12 at 1:54-58). **[*17]** Carlson argues that CSS's current CEO was responsible for the fate of the private wealth management group, and documents reflecting when discussions about the closure took place were needed to establish when the decision was made. *Id.* The current CEO, however, was not officially brought on board until 2015, which is long after Carlson was hired. *Id.* Nevertheless, Carlson argues that the current CEO admitted to having multiple meetings with CSS's chairman before he was hired, which Carlson appears to believe raises an inference that the current CEO was planning to close the division and had communicated those plans before he was officially hired. *Id.* Carlson points out that the Reuters article indicates that the restructuring was mapped out before the current CEO was hired. *Id.*

CSS argues that there were no plans to close the private banking business in the United States when Carlson was hired, and that, in fact, the decision was not made until the new CEO was hired in the second half of 2015 and conducted a strategic review of all of CSS's businesses. Dkt. 14. And, regardless, CSS contends that it produced hundreds of documents responsive to the discovery request for which Carlson filed **[*18]** the motion to compel. *Id.* Moreover, CSS notes that Carlson received a full and fair hearing during the arbitration on this issue: he questioned the CEO of CSS's private banking business in the United States at the time of the publication of the Reuters article about the article and CSS's plans. *Id.*

The court finds that the decision not to compel production did not deprive Carlson of a fair hearing. It was within the panel's discretion to determine whether compelling production was necessary, and it was definitely within its discretion to determine whether the production provided by CSS was sufficient. Moreover, Carlson had an opportunity to question the CEO who was in charge at the time, who indicated that the article was erroneous. It was certainly within the panel's discretion to decide the testimony was credible. Carlson was not deprived of a fair hearing due to the denial of the motion to compel. The motion to vacate on this ground is DENIED.

2. Limited Expert Testimony

Carlson next argues that Tagtmeier "placed handcuffs" on Carlson's experts, who would have testified that there was no bona fide loan and that Carlson therefore did not owe CSS anything. Dkt. 13. He contends that he **[*19]** offered Professor Kevin Yamamoto to explain how the promissory note and corresponding monthly bonus provision established that no bona fide loan existed. *Id.* However, CSS's counsel took the expert on voir dire at the hearing and, according to Carlson, commenced to "mischaracterize the anticipated testimony as *solely* limited to the tax treatment of this compensation scheme." *Id.* (citing Dkt. 13, Ex. 12 (MP3 file recordings) at 1:23-34). Carlson complains that Tagtmeier stated that CSS's objections to the expert were overruled, but then he strictly limited the testimony to how the compensation would be treated for taxable purposes. *Id.* (citing Dkt. 13, Ex. 12 at 1:50-51). Tagtmeier limited Carlson's other expert, Lance Stodghill, in the same way—overruling CSS's objections but limiting the testimony to taxable income. *Id.* (citing Dkt. 13, Ex. 12 at 2:47-48). Carlson relies on *Gulf Coast Industries Works Union v. Exxon Co., USA, 70 F.3d 847, 850 (5th Cir. 1995)*, to support his argument that the fact that Tagtmeier overruled CSS's objections but then improperly limited consideration of the testimony to tax purposes and ultimately ignored it with the award is reason to vacate the award.

CSS points out that the promissory note specifically states that if Carlson ceased to **[*20]** be a CSS employee, for any reason, the principal amount and interest would be immediately due and payable.[4] *Id.* (citing Dkt. 13, Ex. 14 at CS 000211-213 (the promissory note)). CSS notes that Carlson argued that the promissory note was not a bona fide loan because the Internal Revenue Service was likely to conclude that the money paid to Carlson in 2014 was taxable income. *Id.* Yamamoto was offered to testify about the following:

> I would like to offer you as an expert on the subject of treatments of transactions for tax purposes whether a loan is properly characterized as a loan or some other form of income, how that plays into the IRS code or the out pool [sic], IRS provisions, IRS, you know, tax court decisions, if any that are applicable, and with respect to the Tax Advisor Memorandum, and the interplay and mechanics between the employment agreement at issue in this case with Mr. Carlson and how that operates, together with the purported promissory note and the characteristics of those two documents when they are run together as opposed to just, you know, separately.

Dkt. 14-10 (Ex. I) at 734-35. Stodghill was offered to testify about the following:

> I would like to offer Mr. Stodghill **[*21]** as an expert to testify about applicable provisions of the Internal Revenue Code and IRS procedure, about the IRS's evaluation of compensation arrangements, and in particular out of the type of arrangement structured through the operation of this promissory note and employment agreement, the IRS's probably [sic.] treatment based on his experience and knowledge, of this — what we believe to be income in year 2014, IRS potential penalties and consequences, in the event that this income is examined by the IRS, whether through audit or through the amendment of Mr. Carlson's taxes, as well as the procedures and potential costs and steps necessary, in the event that this ends up in tax court, what that might involve and the cost thereof.

Dkt. 14-10 (Ex. I) at 796-97. CSS contends that it was reasonable for the panel to limit the expert testimony to tax as they were experts in tax, not securities industry compensation arrangements. Dkt. 14. It relies on *Owen v. Kerr-McGee Corp., 698 F.2d 236, 240 (5th Cir. 1983)* and *Federal Rule of Evidence 702*. *Id.*

The court has reviewed the transcript of the voir dire and testimony of these experts. Yamamoto is a professor at the South Texas College of Law Houston and has been there for twenty-three years. Dkt. 14-10 at 731. Yamamoto has **[*22]** written books on estate and gift taxation and federal tax research and has written five editions of a black letter outline about income taxation. *Id.* at 732. Yamamoto testified that he has never worked in the securities industry, has never been qualified as an expert on financial industry compensation practices or industry practices in the security industry, never been a contracts law professor and is not an expert in contract law, and is not an expert on the enforceability of notes. *Id.* at 736-41. Yamamoto specifically said he was not going to offer an opinion on the enforceability of the note and that the full extent of his opinion was when the funds received were "income." *Id.* at 741-42. CSS objected to Yamamoto testifying about even the tax treatment of the funds since the tax consequences were not determinative of whether it was a loan. *Id.* at 742-43. After going off the record, the arbitrators returned and said that the objection was overruled. However, after Yamamoto started testifying, Carlson's counsel asked if there are situations in which a transaction may look like a bona fide loan but not be properly treated as such, and CSS's counsel objected because Yamamoto was supposed to be opining about tax, not whether a loan **[*23]** is a loan. *Id.* at 749. Tagtmeier pointed out that the question is not what Yamamoto said he was going to testify about and made Carlson's counsel move on. *Id.* Later Tagtmeier clarified with the witness that all of his answers were "from a taxable standpoint" to which the witness responded affirmatively. *Id.* at 750.

Similarly, Stodghill testified that he "was brought in to testify about questions about the IRS procedural aspects of what could happen in this case." *Id.* at 795. Stodghill is an attorney whose practice consists primarily of representing taxpayers in matters involving the IRS. *Id.* Stodghill also teaches a class on federal tax procedures at the South Texas College of Law Houston. *Id.* Stodghill previously worked as an attorney for the IRS for many years. *Id.* Stodghill has never worked in the securities industry and has never been qualified to be an expert before. *Id.* at

---

[4] The Promissory Note states that Carlson "agrees to pay to the order of [CSS] . . . the principal amount," which would be made on the last day of the first payroll period of each month for 108 months. Dkt. 13, Ex. 14 at CS 000211. It further states that if Carlson "cease[d], for any reason, to be an employee of [CSS] or one of its affiliates, the principal amount then outstanding and accrued but unpaid interest thereon shall become immediately due and payable." *Id.*

798. CSS objected to Stodghill testifying about evaluation of compensation agreements since he had no industry experience and to his testimony about the IRS probable treatment because it would be duplicative of Yamamoto's testimony. *Id.* at 802-03. CSS also objected to Stodghill testifying about penalties or consequences for not declaring the payment he received **[*24]** from the promissory note as income and the cost in tax court because these issues were not relevant. *Id.* at 803. The panel, after another brief recess, overruled the objection but specifically noted that, like with Yamamoto, the testimony must "be based solely upon taxable income and not on anything else . . . ." *Id.* at 806-07.

While an arbitration panel is not generally bound by all the strictures of the Federal Rules of Evidence, it is worth discussing *Rule 702*, which is also cited by CSS. Under *Rule 702*, a proposed expert must be "qualified as an expert by knowledge, skill, experience, training, or education." *Fed. R. of Evid. 702*. Federal trial courts act as gatekeepers for expert testimony, and while experts do not have to be highly qualified to testify, courts need not admit testimony that is based purely on the *ipse dixit* of the expert. *Daubert v. Merrell Dow Pharms., 509 U.S. 579, 592-93, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*; *Gen. Elec. Co. v. Joiner, 522 U.S. 136, 146, 118 S. Ct. 512, 139 L. Ed. 2d 508 (1997)*; *Huss v. Gayden, 571 F.3d 442, 452 (5th Cir. 2009)*. Here, both of these experts clearly were experts in tax, not the securities industry. Yamamoto even testified that he was only planning to testify about whether the funds were "income." Under these facts, it would not be surprising if a judge acting as a gatekeeper and enforcing the Federal Rules of Evidence were to limit the expert testimony to tax treatment.

The court will, nevertheless, consider **[*25]** the caselaw cited by the parties. In *Gulf Coast Industries*, during the hearing, Exxon attempted to prove up a report as a business record, but the arbitrator informed Exxon that it did not have to be proved up because it was already in evidence. *70 F.3d at 849*. However, when the arbitrator issued the ruling, the arbitrator found that the report was hearsay that "did not even have the status of a business record." *Id.* (summarizing the ruling). The district court vacated the award, finding that the arbitrator had "lulled Exxon into believing" that the report was admitted and then refused to consider it. *Id. at 849-50* (summarizing the district court's ruling). The Fifth Circuit affirmed, noting that not only did the arbitrator refuse to hear material evidence, "he prevented Exxon from presenting additional evidence by misleading it into believing [the report] had been admitted as a business record." *Id.* The Fifth Circuit held that "such conduct falls squarely within the scope of *Section 10*, and is grounds for vacatur." *Id.*

Here, Carlson attempts to draw parallels with *Gulf Coast* by arguing that Tagtmeier essentially lulled his counsel into believing the testimony of Carlson's experts would be allowed and then proceeded to **[*26]** limit the testimony. This case, however, is not on point at all. Carlson's counsel knew during the hearing that the arbitrator was limiting the scope of the testimony of his experts; the arbitrator did not come back later after it was too late for counsel to do anything about it and change the rules. While the court understands that, at least with Yamamoto, Carlson's counsel may have initially believed his expert was going to be able to testify beyond tax treatment since CSS's objection to the expert was overruled, it quickly became apparent that the arbitrator was limiting the testimony to tax treatment.

CSS cites *Owen v. Kerr-McGee Corp.* for the proposition that the arbitration panel appropriately allowed the experts to testify within their areas of expertise but did not allow them to testify about the ultimate legal issue before the panel—whether the promissory note was an enforceable loan that needed repaid. Dkt. 14. In *Owen*, the Fifth Circuit instructed that "questions which would merely allow the witness to tell the jury what result to reach are not permitted." *698 F.2d at 240*. It pointed out that "allowing an expert to give his [or her] opinion on the legal conclusions to be drawn from the **[*27]** evidence both invades the court's province and is irrelevant." *Id.* This case is on point to the extent that the panel excluded legal opinions about whether the promissory note was an enforceable loan.

The court finds that the panel's refusal to allow the two experts' testimony to go beyond the bounds of the tax treatment of the funds Carlson received from the promissory note did not deprive Carlson of a fair hearing. These two experts had expertise in tax, not the securities industry. The motion to vacate based on this argument is DENIED.

3. Refusal to Allow Human Resources Testimony About a Document

Carlson's final argument is that Tagtmeier refused to permit him to introduce evidence to support his claim that CSS violated FINRA Rule 2010.[5] Dkt. 13. Carlson sought to question CSS's HRVP about the DOJ Publication, which Carlson asserts was a publication specifically for human resources professionals. *Id.* According to Carlson, the publication indicates that sharing compensation information between competitors is contrary to the Sherman Antitrust Act and FINRA Rule 2010. *Id.* Carlson wanted to prove that CSS shared compensation information for approximately 300 of its brokers with Wells Fargo, giving Wells **[*28]** Fargo an undue advantage that depressed the market for Carlson's services. *Id.* Carlson contends that he was offered a less competitive compensation package from Wells Fargo as a result. *Id.* Carlson argues that he was unable to fully develop this argument through testimony during the arbitration hearing because the panel limited his ability to question the HRVP. *Id.* Carlson also contends that Tagtmeier refused to compel discovery of information about the compensation of similarly situated CSS employees who transitioned to Wells Fargo, which he contends further prejudiced him by cutting off the only other reasonable means of proving this theory. *Id.* Carlson believes that Wells Fargo obtained an anticompetitive advantage through its deal with CSS, which he contends violated the Sherman Antitrust Act, resulting in Carlson receiving a significantly lower sign-on bonus than he believes he should have received. *Id.* Carlson asserts that this is not a speculative argument, as the former CEO who testified at the hearing agreed that Wells Fargo's agreement with CSS placed it in a better position than its competitors to recruit CSS's financial advisors. *Id.* Carlson contends, however, that the **[*29]** "glue" he needed for this argument was the testimony of the HRVP showing that the arrangement was illegal under the Sherman Antitrust Act and a violation of FINRA Rule 2010. *Id.*

According the Carlson, CSS did not object to the DOJ Publication as evidence during the hearing but did object to the HRVP discussing it and further asserted that an exception applied to the CSS/Wells Fargo situation. *Id.* Tagtmeier sustained the objection to questioning the HRVP about the document, and Carlson contends that he needed to question the HRVP about the document to show that the carve outs for mergers asserted by CSS were not applicable. *Id.* Carlson complains that he could possibly have used compensation data instead to show that CSS illegally shared with Wells Fargo, but Tagtmeier denied his request to compel that discovery. *Id.*

CSS contends that it was not misconduct for the panel to disallow questioning about the DOJ Publication as Carlson did not even plead an affirmative claim for a violation of FINRA Rule 2010. Dkt. 14. Instead, he made the argument about the alleged violation of the Sherman Antitrust Act which constituted a violation of FINRA Rule 2010 in his opening and closing statements at the hearing. *Id.* The DOJ **[*30]** Publication had not been produced during discovery, which is required under FINRA rules, but CSS did not object to the document itself, only to the questioning of the HRVP about it. *Id.* When Tagtmeier ruled on the objection, he stated that the panel members would read the DOJ Publication and decide what weight to give it, but he did not allow Carlson's counsel to question the HRVP about it. *Id.*

The court has reviewed excerpts of the testimony of the HRVP. It is clear that Carlson's counsel was able to question the HRVP about whether she learned about the risks of sharing compensation information among competitors as a possible violation of ***antitrust law***, and she answered in the affirmative. Dkt. 14-11 at 1192. There were specific objections made when counsel tried to question her about legal issues because the HRVP is not a lawyer. *See id.* at 1192-98. Carlson was, however, able to ask the HRVP if Wells Fargo was given a "leg up on the competition" when it was announced that CSS was leaving the US market, and the HRVP testified that there was an exclusive recruiting agreement with Wells Fargo so as to offer a smooth transition. *Id.* at 1199. Thus, Carlson was not, as he contends, cut off from the only reasonable **[*31]** means of proving his theory. The arbitrators agreed

---

[5] FINRA Rule 2010 "requires members, in the conduct of their business, to observe high standards of commercial honor and just and equitable principles of trade. Rule 2010 protects investors and the securities industry from dishonest practices that are unfair to investors or hinder the functioning of a free and open market, even though those practices may not be illegal or violate a specific rule or regulation. Dkt. 13-16 (Financial Industry Regulatory Authority, Regulatory Notice 08-57 (Oct. 2008, effective Dec. 15, 2008)).

to look at the document, Carlson's counsel was able to make his arguments, and he was able to question the HRVP about alleged anticompetitive activity.

CSS argues that the decision not to let Carlson question the HRVP about the DOJ Publication was reasonable because (1) the document is merely a statement of policy from the DOJ; (2) it was not produced during discovery; (3) the HRVP was not familiar with the document; (4) it was admitted into evidence; (5) Carlson was only planning to read parts of the document and ask the HRVP if she agreed; (6) the HR Publication was published in October 2016, which was a year after the events in 2015 that were subject to the arbitration; and (7) even if it were published earlier, Carlson's arguments regarding the document were invalid because the arrangement CSS had with Wells Fargo was a collaboration between the two companies and appropriate precautions were taken, which is an exception in the document. *Id.* Carlson argues in response to these contentions that CSS was permitted to argue it had satisfied a safe harbor but he was not allowed to confront the HRVP with the DOJ's own guidelines, which **[*32]** resulted in an improper impediment to his case. Dkt. 15.

The court disagrees with Carlson's argument that Tagtmeier impeded the development of his case by not allowing him to question the HRVP about the document and not compelling discovery of the compensation data. In his closing arguments, Carlson's counsel noted that he did not plead the Sherman Antitrust Act but went on to assert that CSS gave Wells Fargo their entire book and that while the agreements may not be illegal, they may be subject to civil liabilities if they have an anticompetitive effect. Dkt. 14-15 (excerpts from closing) at 1349-50. Carlson made his arguments and the document was admitted into evidence for the arbitration panel to consider if it deemed it relevant. Of course, as CSS points out, it may not have even deemed it relevant since it was issued after the events at issue in this case.

The court finds that failing to allow Carlson to question the HRVP about this document that she was not even familiar with and had not been disclosed prior to the hearing is not an instance of the arbitrator or the panel depriving Carlson of a fair hearing. Thus, Carlson's motion to vacate based on that ruling and the failure **[*33]** to allow additional discovery into this unpled theory is DENIED.

C. Petition to Confirm

Having denied all the grounds for vacatur, the court now turns to CSS's petition to confirm. *See* Dkt. 1. CSS seeks a judgment that confirms the award, awards CSS costs incurred in connection with the proceedings to confirm the award, and awards pre-judgment and post-judgment interest. *Id.* A motion to confirm an arbitration award is a summary proceeding. *Yusuf Ahmed Alghanim & Sons, W.L.L. v. Toys "R" Us, Inc., 126 F.3d 15, 23 (2d Cir. 1997)*. A district court's review of an arbitration award is "exceedingly deferential." *Brabham v. A.G. Edwards & Sons, Inc., 376 F.3d 377, 380 (5th Cir. 2004)*. "If an [arbitration] award is rationally inferable from the facts before the arbitrator, the award must be affirmed." *Kergosien v. Ocean Energy, Inc., 390 F.3d 346, 353 (5th Cir. 2009)*.

Under *9 U.S.C. § 9*, "at any time within one year after the award is made any party to the arbitration may apply to the court . . . for an order confirming the award, and thereupon the court must grant such an order unless the award is vacated, modified, or corrected as prescribed in *sections 10* and *11* of this title." *9 U.S.C. § 9*. Thus, if a party seeks confirmation of an arbitration award within one year of the award, the court must confirm the award unless notice of a motion to vacate, modify, or correct is served on the adverse party within **[*34]** three months of the granting of the award. *9 U.S.C. § 12*.

CSS timely filed its petition to confirm the award, and Carlson has provided no valid ground for vacatur. Accordingly, the award is CONFIRMED pursuant to *9 U.S.C. § 9*.

CSS has requested post-judgment interest pursuant to *28 U.S.C. § 1961* as well as costs. Dkt. 1. Costs may be awarded pursuant to *28 U.S.C. § 1920*. The motion for costs is GRANTED. CSS shall file a bill of costs within fourteen days of judgment as required under the Southern District of Texas *Local Rule 54.2*. *See* S.D. Tex. *L.R. 54.2*; *see also 28 U.S.C. § 1920* (outlining the types of costs the clerk may tax).

Finally, CSS requests an award of interest. "Interest shall be allowed on any money judgment in a civil case recovered in district court." *28 U.S.C. § 1961*. Accordingly, CSS's request for interest pursuant to *§ 1961* is GRANTED, and CSS is AWARDED post-judgment interest as computed under that statute.

IV. CONCLUSION

Carlson's motion to vacate the arbitration award (Dkt. 9) is DENIED. CSS's petition to confirm the award (Dkt. 1) is GRANTED and the award is CONFIRMED. CSS is also AWARDED costs under *28 U.S.C. § 1920* and post-judgment interest pursuant to *28 U.S.C. § 1961*. The court will issue a final judgment concurrently with this order.

Signed at Houston, Texas on January 2, 2020.

Opinion

CIVIL MINUTES - GENERAL

Proceedings (In Chambers): Order DENYING WITHOUT PREJUDICE Radio Music License Committee, Inc.'s Motion to Compel Responses to Requests for Production of Documents and Interrogatories (Dkt. Nos. 178, 179, 180, 181, 183, 188, 192)

On November 26, 2019, the parties filed a Joint Stipulation ("Joint Stip.") regarding Radio Music License **[*2]** Committee, Inc.'s Motion to Compel Responses to Requests for Production of Documents and Interrogatories ("Motion to Compel") (Dkt. No. 178), together with declarations in support of each party's position (Dkt. Nos. 179, 180, 181). On December 20, 2019, the parties filed supplemental memoranda in support of their positions.[1] (Dkt. Nos. 188, 192). The Court finds this discovery dispute appropriate for resolution without a hearing. For the reasons discussed below, the Motion is **DENIED WITHOUT PREJUDICE**.

A. Background

Founded in 2013, Global Music Rights, LLC ("GMR") is a "boutique" performing rights organization ("PRO"), which represents fewer than 100 songwriters and has a repertory of about 40,000 songs. (Joint Stip. at 11). The vast majority of songwriters are represented by one of two PROs: Broadcast Music Inc. ("BMI") or American Society of Composers, Authors, and Publishers ("ASCAP"). (Id. at 6). BMI represents more than 1 million artists and has a repertory of 15 million compositions. (Id. at 11). ASCAP's membership includes over 725,000 artists and has over 11 million licensed works in its repertory. See <ascap.com/about-us> (last visited December 10, 2019). PROs provide valuable services to the **[*3]** music industry: efficient licensing and effective oversight. *Radio Music License Comm., Inc. v. SESAC, Inc., 29 F. Supp. 3d 487, 490 (E.D. Pa. 2014)*. "By obtaining, cataloging, and (in many cases) bundling copyrights into composite licenses, they offer consumers the opportunity to purchase the rights to thousands of musical works without the costly and time-consuming process of negotiating the terms and conditions of each individual performance." *Id. at 490-91*. "Furthermore, PROs police the music industry by investigating and prosecuting unauthorized users—those who publicly perform copyrighted works without a license—an otherwise costly prospect for copyright owners." *Id. at 491*. Given their substantial size, BMI and ASCAP have for decades been subject to a consent decree with the Department of Justice. See *United States v. Broad. Music, Inc., 426 F.3d 91, 93 (2d Cir. 2005)*. Among other provisions, the consent decrees provide a procedure whereby ASCAP, BMI, or their prospective licensees may petition a designated "rate court" in the Southern District of New York for the determination of a reasonable license fee. See id.

Radio Music License Committee, Inc. ("RMLC") is a trade association that negotiates public-performance-right licenses on behalf of terrestrial radio stations in the United States. (Joint Stip. at 1, 11). RMLC has 3,000 members, who collectively **[*4]** account for 10,000 radio stations and 90% of the terrestrial radio market. (Id. at 11). "RMLC seeks to obtain fair and reasonable license fees on behalf of radio stations, negotiates for per-program and blanket-license carve outs that allow stations to achieve further fee discounting, and aims to achieve the broadest possible licenses covering new-media applications, including HD multicasting and streaming." *Radio Music License Comm., 29 F. Supp. 3d at 491* (citation omitted).

In November 2016, RMLC filed a lawsuit against GMR in the Eastern District of Pennsylvania, alleging that GMR has violated the Sherman Antitrust Act. RMLC v. GMR, No. 16-6076 (E.D. Pa. filed Nov. 18, 2016). On March 29, 2019, after finding that it did not have personal jurisdiction over GMR, the Pennsylvania district court transferred the case to this Court. (Dkt. No. 117). In a related case, GMR sued RMLC in this Court, alleging that RMLC conducts an unlawful monopsony in violation of the Sherman Act and California antitrust laws. GMR v. RMLC, No. 16, 9051 (C.D. Cal. filed Dec. 6, 2016). Fact discovery, which closes March 2, 2020, is consolidated in these two cases.

In its Motion, RMLC seeks an order compelling GMR to comply with RMLC's Request for Production Nos. 21, **[*5]** 28, 29, 30, 32, 35, 46 and 47 and Interrogatory No. 3, as modified in the Joint Stipulation. (Motion at 2).[2] Specifically, RMLC seeks financial and business strategy documents and documents evincing GMR's business dealings with nonradio entities. (Joint Stip. at 1-3).

---

[1] On December 27, 2019, the Court granted Radio Music License Committee's request to file its supplemental memorandum under seal. (Dkt. Nos. 183, 191).

[2] The Joint Stipulation and related filings were filed in each of the related cases. See GMR v. RMLC, No. 16-9051 (C.D. Cal. filed Nov. 26, 2019) (Dkt. Nos. 106-109, 115, 124).

B. Legal Standards

A party "may obtain discovery regarding any nonprivileged matter that is relevant to any party's claim or defense." *Fed. R. Civ. P. 26(b)(1)*. Nevertheless, information "need not be admissible in evidence to be discoverable." Id. Thus, relevance, for purposes of discovery, is defined broadly, and "[d]iscovery of nonprivileged information not admissible in evidence remains available so long as it is otherwise within the scope of discovery." *Fed. R. Civ. P. 26(b)(1)* advisory committee's note (2015); see *Garneau v. City of Seattle, 147 F.3d 802, 812 (9th Cir. 1998)*. However, under amended *Rule 26(b)*, discovery must be "proportional to the needs of the case, considering the importance of the issues at stake in the action, the amount in controversy, the parties' relative access to relevant information, the parties' resources, the importance of the discovery in resolving the issues, and whether the burden or expense of the proposed discovery outweighs its likely benefit." *Fed. R. Civ. P. 26(b)(1)*. This proportionality requirement "is **[*6]** designed to avoid . . . sweeping discovery that is untethered to the claims and defenses in litigation." *Mfg. Automation & Software Sys., Inc. v. Hughes, No. CV 16-8962, 2017 U.S. Dist. LEXIS 217699, 2017 WL 5641120, at *5 (C.D. Cal. Sept. 21, 2017)*.

Motions to compel are governed by *Rule 37*, which allows a party to "move for an order compelling disclosure or discovery." *Fed. R. Civ. P. 37(a)(1)*. "A party seeking discovery may move for an order compelling... production... if ... a party fails to produce documents . . . as requested under *Rule 34*." *Fed. R. Civ. P. 37(a)(3)(B)(iv)*. *Rule 34* provides that a party may serve on any other party a request to produce documents or electronically stored information within the party's possession, custody, or control that is otherwise within the scope of *Rule 26*. *Fed. R. Civ. P. 34(a)(1)(A)*. "Upon a motion to compel discovery, the movant has the initial burden of demonstrating relevance." *United States v. McGraw-Hill Companies, Inc., No. CV 13-0779, 2014 U.S. Dist. LEXIS 59425, 2014 WL 1647385, at *8 (C.D. Cal. Apr. 15, 2014)*. Further, district courts have "broad discretion" to control discovery and in determining relevancy for discovery purposes. See *Hallett v. Morgan, 296 F.3d 732, 751 (9th Cir. 2002)* (citation and alteration omitted).

C. Discussion

"The antitrust laws of the United States aim to protect consumers by maintaining competitive markets." *In re Musical Instruments & Equip. Antitrust Litig., 798 F.3d 1186, 1191 (9th Cir. 2015)*. To that end, the Sherman Act bars "[e]very contract, combination in the form of trust or otherwise, or conspiracy, **[*7]** in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. Nevertheless, the Supreme Court has long recognized that *§ 1* "outlaw[s] only unreasonable restraints." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. Thus, the "rule of reason is the accepted standard for testing whether a practice restrains trade in violation of *§ 1*." *Leegin Creative Leather Prods. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. "Under this rule, the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Cont'l T. V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. In analyzing agreements under the rule of reason, "courts examine 'the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed,' to determine the effect on competition in the relevant product market." *In re Musical Instruments, 798 F.3d at 1191-92* (quoting *Nat'l Soc. of Prof'l Engineers v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978))*. Some restraints of trade are so inherently anticompetitive, however, that they are subject to the per se rule, under which they are "deemed to be unlawful in and of themselves." *N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*; accord *In re Musical Instruments, 798 F.3d at 1191*. By "treating categories of restraints as necessarily illegal," the per se rule "eliminates the need to study the reasonableness of an individual restraint." *Leegin Creative Leather Prods. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*.

1. GMR's Financial and Business Strategy Documents (RFP Nos. 30, 32, 46, and 47)

RMLC seeks to compel GMR to produce certain **[*8]** financial and business strategy documents, which are designed to determine GMR's financial and business strategies when it formed in 2013, what it told potential investors about those strategies, and how its strategies have subsequently changed or evolved. (Joint Stip. at 13). Specifically, RMLC seeks the following documents from 2011 through June 2019: (1) Any financial budgets or forecasts for GMR or the performing rights organization that eventually formed as GMR (RFP No. 30); (2) Any projections, assessments, or predictions relating to future rates, revenues, growth, and profitability for GMR or the performing rights organization that eventually formed as GMR (RFP No. 32); (3) All prospectuses, financial materials, or other business documents concerning the sale of, or offer to sell, any ownership interest in GMR or the performing rights organization that eventually formed as GMR, including voting and non-voting shares (RFP No. 46); and (4) All business plans, strategic plans, marketing plans or other financial or business strategy documents for GMR or the performing rights organization that eventually formed as GMR (RFP No. 47). (Id. at 14-15).

RMLC asserts that GMR has "refused[ed] to produce **[*9]** any of its financial or business strategy documents." (Joint Stip. at 1; see Dkt. No. 192 at 1-3). RMLC fails to acknowledge, however, that GMR has already agreed to produce "voluminous" financial and business strategy documents. (Joint Stip. at 21-25). Indeed, GMR has agreed to produce documents within the following categories from its designated document custodians:

(1) Agreements with GMR's past and present equity owners (RFP No. 2);

(2) Organizational charts and other corporate governance documents, as well as notes and minutes from meetings of GMR's governing bodies (RFP Nos. 3, 4);

(3) Documents from January 1, 2011, concerning the nature and purpose of GMR's creation (RFP No. 5);

(4) Documents concerning any agreement between or among Global Music Rights' affiliates concerning GMR or any new PRO in which Mr. Grimmett or Mr. Azoff was involved (RFP No. 9);

(5) Agreements with GMR's songwriters, and documents concerning the negotiation of those agreements (RFP Nos. 10, 12);

(6) Documents since January 1, 2010 concerning communications between Mr. Azoff and Mr. Grimmett on the one hand and any person who became a GMR affiliate on the other hand concerning the licensing of public performance **[*10]** rights (RFP No. 13);

(7) Documents since January 1, 2010 concerning actual or proposed agreements concerning the licensing of public performance rights between Mr. Azoff or Mr. Grimmett on the one hand and anyone who became a GMR affiliate on the other hand (RFP No. 14);

(8) Documents since January 1, 2010 discussing, reflecting, or identifying the terms of any agreement concerning the licensing of public performance rights between Mr. Azoff, Mr. Grimmett, or GMR on the one hand, and any GMR affiliate on the other that are not reflected in the affiliate agreement (RFP No. 15);

(9) Documents concerning Mr. Azoff's, Mr. Grimmett's, or GMR's strategies related to which potential affiliates to include in (or add to) GMR's repertory, and communications and documents exchanged with those potential affiliates, including internal or external communications about the possibility of the songwriters who hold nonvoting shares of GMR joining GMR as affiliates (RFP No. 16);

(10) Documents sent to affiliates and potential affiliates concerning compensation they will or could receive if they join a new PRO involving Mr. Azoff or Mr. Grimmett (RFP Nos. 17, 19);

(11) Documents identifying royalties paid **[*11]** to each GMR songwriter that are attributable to terrestrial radio (RFP No. 20);

(12) Documents concerning the amount of terrestrial radio royalties paid to GMR songwriters, both individually and in the aggregate, including how GMR determines those royalty rates and GMR's projections of terrestrial radio royalties (RFP No. 21);

(13) Documents concerning alternatives to blanket licenses (including adjustable-fee blanket licenses and per-program licenses) in the terrestrial radio context, including, *inter alia*, documents concerning whether or why GMR offers, has offered, will offer, or has not offered such licenses (RFP Nos. 24-26);

(14) Documents identifying the revenue and profit margin GMR derives from each songwriter in connection with terrestrial radio licenses (RFP No. 27);

(15) Documents identifying accounting data for terrestrial radio, including costs, revenue, profits, and losses, since GMR's formation (RFP No. 28);
(16) Monthly, quarterly, and annual financial statements with respect to terrestrial radio, for each year of GMR's existence (RFP No. 29); and
(17) Documents concerning GMR's marketing efforts to radio entities (RFP No. 75).

(Dkt. No. 181 (McIntyre Decl.) at ¶ 18(a)-(q)). **[*12]** RMLC does not explain why it needs more than the "thousands" of documents responsive to these 17 categories, which GMR has agreed to produce. (Joint Stip. at 21-22). Indeed, given that discovery is ongoing, RMLC should review GMR's production before asserting that GMR's production is insufficient.

RMLC also fails to make a specific demonstration of relevancy for the additional documents it seeks. See *Kaseberg v. Conaco, LLC, No. 15 CV 1637, 2016 U.S. Dist. LEXIS 97581, 2016 WL 3997600, at *10 (S.D. Cal. July 26, 2016)* (denying motion to compel where party failed to make a "specific showing that the requested documents would lead to relevant evidence") (quoting *Nugget Hydroelectric, L.P. v. Pac. Gas & Elec. Co., 981 F.2d 429, 438-39 (9th Cir. 1992))*; *Fed. R. Civ. P. 26(b)(1)*. While RMLC argues that the requested documents "are highly likely to contain proof of the anticompetitive scheme that [it] alleges" (Joint Stip. at 15), RMLC does not describe how budgets, forecasts, projections, marketing plans, or strategies would contain this information. RMLC further contends that GMR's "own documents" will demonstrate that radio stations had never heard of GMR and those that had heard of GMR did not believe they needed a license from it. (Joint Stip. at 18). But it is not clear which document request at issue would answer this question. Moreover, RMLC does not explain why it needs GMR documents to determine whether its **[*13]** own member radio stations had heard of GMR or believed they did not need a license. In any event, GMR has already agreed to produce documents related to its marketing efforts to radio entities. (McIntyre Decl. ¶ 18(q)). Finally, RMLC vaguely asserts that "materials prepared to attract investors" will evince "how [GMR affiliates] came to be investors, why they decided to do so, and what commitments they made as investors are all highly relevant to proving the concerted action that RMLC has alleged." (Joint Stip. at 17). But GMR has already agreed to produce "documents and communications exchanged with songwriter affiliates who became equity owners; documents concerning equity interests that Global Music Rights offered to or paid any songwriter affiliate; agreements between Global Music Rights and its equity owners; and documents concerning the negotiation of its songwriter affiliate agreements." (Joint Stip. at 26-27; see McIntyre Decl. ¶¶ 18-19).

Nor are RMLC's requests for additional documents proportional to the needs of the case. Even if RMLC could demonstrate that the additional documents have some marginal relevancy—which it has not done—RMLC has not satisfied the proportionality **[*14]** requirement. GMR has attested that it would need to review more than 150,000 additional documents, costing between $100,000 and $700,000, to respond in full to RFP Nos. 30, 32, 46, and 47. (Joint Stip. at 29; McIntyre Decl. ¶¶ 31-32). Given that GMR has already committed to substantial production of its financial and strategic documents, RMLC has failed to demonstrate that any marginal relevance of the four additional requests outweighs the substantial burden to produce.

RMLC's request to compel documents responsive to RFP Nos. 30, 32, 46, and 47 is **DENIED WITHOUT PREJUDICE**. If, after reviewing GMR's production, RMLC still believes that material gaps remain, it should raise the issues with GMR. Thereafter, if the issues remain unresolved, RMLC may raise its concerns with the Court, preferably via the Court's informal discovery dispute resolution process.

2. GMR's Dealings with Nonradio Entities (RFP Nos. 19, 21, 28, 29, 35 and Interrogatory No. 3)

RMLC seeks to compel GMR to produce details regarding its "dealings with entities other than broadcast radio stations." (Joint Stip. at 30; see Dkt. No. 192 at 3-5). Specifically, RMLC seeks the following information from GMR's formation through **[*15]** June 2019 (except at noted):

(1) Documents sufficient to show how GMR calculates the rates that it charges (or attempts to charge) nonradio entities for licenses to GMR's Repertory, and the reasons for any changes to those rates. This would include producing the actual license agreements with these entities (RFP No. 35).

> (2) Documents sufficient to show GMR's accounting data—including costs, revenue, profits, or losses (both net and gross) relating to nonmusic entities for all years since GMR was formed (RFP No. 28).
> (3) GMR's quarterly and annual financial statements—including any statements concerning nonmusic entities (RFP No. 29).
> (4) From January 1, 2010, to June 5, 2019, documents sufficient to identify any and all advances, upfront payments, bonuses, royalty guarantees or equity interests that GMR, Azoff, or Grimmett proposed to pay any Affiliate, including any condition, stipulation, or expectation accompanying any such advance or up-front payment (RFP No. 19).[3]
>
> (5) Documents sufficient to show (or an interrogatory response identifying) the amount of annual compensation, on both an aggregate and individual basis, that GMR has paid to each of its Affiliates, including both royalties **[*16]** and other payments in the form of advances, bonuses, royalty guarantees, or equity interests (RFP Nos. 19, 21; Interrogatory No. 3).
> (6) Documents sufficient to show how GMR calculates, elects, determines, or decides upon the rate or amount of royalties that it pays to each of its Affiliates, and any projections or estimates made or contributed to regarding the amount of royalties it must pay each of its Affiliates in the future (RFP No. 21).

(Id. at 33-34) (footnotes omitted).

RMLC has not demonstrated that its requests are relevant. In an antitrust case, courts generally limit discovery to the ambit of the applicable market. See *Vident v. Dentsply Int'l, Inc., No. SA CV 06-1141, 2008 U.S. Dist. LEXIS 110399, 2008 WL 4384124, at *2 (C.D. Cal. Aug. 29, 2008)* (finding no abuse of discretion in magistrate judge's ruling that "the definition of the relevant market in [this antitrust] case determines the scope of allowable discovery"); *Bal Seal Eng'g, Inc. v. Nelson Prod., Inc., No. 13 CV 1880, 2017 U.S. Dist. LEXIS 231324, 2017 WL 10311212, at *1 (C.D. Cal. Oct. 19, 2017)* (finding that "the definition of the 'relevant market' defines the scope of relevant discovery"); *Heartland Surgical Specialty Hosp., LLC v. Midwest Div., Inc., No. 05-2164, 2007 U.S. Dist. LEXIS 66159, 2007 WL 2668742, at *11 (D. Kan. Sept. 6, 2007)* (finding that discovery outside the relevant geographic market "not relevant on its face"); see generally *Jones v. Metzger Dairies, Inc., 334 F.2d 919, 922 (5th Cir. 1964)* ("discovery procedures must be limited if antitrust cases are to be kept within 'reasonable bounds'"). Here, both parties' complaints identify terrestrial radio licenses as the **[*17]** applicable market. In its Second Amended Complaint ("RMLC SAC"), RMLC alleges that GMR has monopoly power because "*radio stations* have no choice but to take a license from all the PROs'" (RMLC SAC at ¶ 18 n.5) (emphasis added). This "shakedown" occurs because "*[r]adio stations* often do not know what songs will appear on their programming and certainly do not control the choice of music they broadcast in a wide range of scenarios." (Id. ¶ 44) (emphasis added). Thus, the foundation of RMLC's market theory—that radio stations cannot avoid playing GMR's licensed songs—is specific to *terrestrial radio stations*. Further, the basis for RMLC's allegation that GMR seeks to charge "supracompetitive" rates is that the fees requested—although never imposed—are not commensurate with GMR's "'spinshare' of U.S. *radio music*." (Id. ¶¶ 49-50) (emphasis added). Further, RMLC's own expert in this case asserts that "the relevant product market for the bundle of performance rights that GMR licenses includes the other performance rights that *radio stations* view as good *substitutes* for a GMR license." (RMLC v. GMR, No. 19-3957, Dkt. No. 85-4 (Petersen Decl.) at ¶ 32) (first emphasis added).

GMR agrees that **[*18]** the buyers in the relevant market are terrestrial radio stations. In its First Amended Complaint ("GMR FAC"), GMR alleges that the relevant market is "the market for licenses to broadcast copyrighted music on terrestrial commercial radio stations in the United States." (GMR FAC ¶ 82). This assertion is based in part on RMLC's former chairman, who testified to Congress that "[i]t's important to distinguish here between pure webcasters (or internet radio), satellite radio, and terrestrial radio." (Id. ¶ 88). The former chairman explained that "terrestrial radio is unique not only from the vantage point of music listeners, but from copyright holders as well." (Joint Stip. at 51; see GMR FAC at ¶ 88; McIntyre Decl. Ex. M). GMR agrees, alleging that "[t]he broadcasting of copyrighted music by terrestrial radio is not reasonably interchangeable with other forms of media distribution, such

---

[3] Prior to RMLC filing its Motion to Compel, GMR had already agreed to comply with RFP No. 19. (Joint Stip. at 47; McIntyre Decl. J 16). Thus, RMLC's request to compel compliance with RFP No. 19 is **DENIED AS MOOT**.

as satellite-based or internet transmission," because *inter alia*, "terrestrial radio is freely available to hundreds of millions of listeners and is their primary source of music and those listeners are not likely to switch to another medium." (GMR FAC ¶ 86). Thus, while GMR and RMLC may dispute whether **[*19]** the *sellers* in the relevant market are PROs generally or GMR by itself, they agree that the *buyers* are terrestrial radio stations.

Nevertheless, RMLC asserts that it needs nonradio entity discovery to rebut GMR's alleged relevant market. (Joint Stip. at 34-37). RMLC contends that GMR must produce documents showing how GMR has determined each rate it has charged or attempted to charge any licensee (RFP No. 35), all "accounting data" for its entire existence (RFP No. 28), and all royalties and compensation GMR has ever paid any songwriter (RFP No. 21; Interrog. No. 3), so that RMLC can determine whether terrestrial radio affords "unique promotional support . . . to songwriters, record labels, and artists," and whether, "from the vantage point of a PRO or copyright holder, there is simply no substitute for broadcasting by terrestrial radio." (Joint Stip. at 33-34, 35). But the "unique promotional support" referenced in GMR's complaint is the language that *RMLC's* chairman used when testifying before Congress. (Id. at 55; McIntyre Decl. Ex. M). Further, as discussed above, RMLC has consistently asserted that terrestrial radio stations are the relevant market.

Next, RMLC contends that it needs discovery **[*20]** regarding nonradio entities to rebut GMR's allegations regarding the anticompetitive effects of RMLC's monopsony power. (Joint Stip. at 37-39). RMLC focuses on the following effects alleged in GMR's complaint: (1) the suppression of license fees caused by RMLC's price-fixing; and (2) the resultant diminishing of songwriters' incentives to copyright new compositions. (Id.). But the price effect of monopoly power is generally determined by comparing actual prices to what the prices would be but for the anticompetitive conduct alleged. See Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application ¶ 398(c) (4th ed. 2013-2018) ("the competitive price, which is determined by competitive market forces, is the price but for the illegal price fixing"). In regards to whether RMLC's activities have diminished songwriters' incentive to create new works, GMR has already agreed to produce information response to RFP No. 19, which seeks documents concerning "all advances, upfront payments, bonuses, royalty guarantees or equity interests that GMR... proposed to pay any [songwriter]." (Joint Stip. at 31; see McIntyre Decl. ¶¶ 16, 19). Further, GMR **[*21]** has agreed to produce its agreements with songwriters and the compensation songwriters could expect to receive and offered to produce aggregate-level revenue data from nonterrestrial radio music users. (McIntyre Decl. ¶¶ 7, 18(e), 18(j), 18(r)).

RMLC next asserts that it needs nonterrestrial radio discovery to support its affirmative case against GMR. (Joint Stip. at 39-40). RMLC argues that it needs "[i]ndividualized financial information identifying what GMR promised to pay each affiliate and the amounts that GMR actually has paid each affiliate . . . to demonstrate[e] concerted action among and between GMR and its affiliates." (Id. at 39). But according to RMLC's complaint, it was the *promise* of higher compensation that incentivized songwriters to join GMR. (RMLC SAC at ¶¶ 30, 102). And GMR has already agreed to produce documents evincing "all advances, upfront payments, bonuses, royalty guarantees or equity interests that GMR... proposed to pay any [songwriter]," the contracts that lay out songwriters' compensation terms and the negotiations that preceded those contracts, and individualized terrestrial radio royalty payments data for each songwriter. (McIntyre Decl. ¶ 18). RMLC also contends **[*22]** that it needs nonterrestrial radio discovery because "radio certainly is *a* victim in GMR's scheme, but not necessarily the only victim." (Joint Stip. at 40) (emphasis in original). But RMLC's complaint alleges a shakedown of *radio stations* (RMLC SAC at p. 18), and during the meet and confer process, RMLC was unable to identify any allegations of anticompetitive conduct directed specifically at nonterrestrial music users (McIntyre Decl. ¶ 9). Finally, RMLC argues GMR's contention that it is a "lean, cost-efficient operation" (GMR FAC ¶ 36) gives RMLC the right to seek all documents concerning "GMR's costs, revenues, accounting, how it pays its affiliates." (Joint Stip. at 40). But GMR has already agreed to produce a significant trove of financial information, including some employment data. (McIntyre Decl. ¶¶ 17-22). This information should be sufficient for RMLC to analyze GMR's "leanness and efficiency."

Next, RMLC contends that GMR has "admitted" that nonterrestrial radio discovery has a "clear, direct, and deliberate relevance" to this case, noting GMR's motion to quash RMLC's "rate court" subpoena. (Joint Stip. at 40-41) (emphasis omitted). RMLC, however, misapprehends the Court's ruling in that **[*23]** case. In November 2018, RMLC served GMR with a subpoena, ostensibly in relation to RMLC's "rate court" litigation against BMI. (McIntyre

Decl. ¶ 40). GMR objected to the subpoena, including for reasons of overbreadth and irrelevance. (Id. Ex. K). In a joint stipulation filed with this Court, GMR argued that RMLC's subpoena "was little more than a bid for early antitrust discovery, even though [at the time] discovery in this matter was stayed." This Court granted GMR's motion to quash in substantial part. In re Subpoenas to Global Music Rights, No. 18-0170 (C.D. Cal. Jan 18, 2019) (Dkt. No. 32) (order granting in part GMR's motion to quash). While GMR argued that RMLC's subpoena was "relevant" to this litigation, GMR did not "admit" that all of the information requested in the subpoena was proper or appropriate.

Finally, RMLC argues that GMR has sought "the same type of discovery about non-radio entities." (Joint Stip. at 41-42). However, while GMR served interrogatories inquiring how RMLC calculates PROs' market shares (Joint Stip. at 41-42), "we know from RMLC's public filings [that it] uses *radio performances* to measure PRO market shares" (id. at 62). Moreover, RMLC has refused to respond **[*24]** to GMR's market-share interrogatories. (McIntyre Decl. ¶ 2). RMLC does not cite any case in which the service of discovery by one party opened the propounding party to broad discovery arguably related to the subject matter of that request. Instead, the two cases cited by RMLC (Joint Stip. at 41) involve situations where the responding party had previously agreed to the exchange of information and which the court had found "highly relevant." See *Flying J, Inc. v. Pilot Travel Centers LLC, No. 06 CV 0030 TC, 2009 U.S. Dist. LEXIS 55283, 2009 WL 1834998, at *2 (D. Utah June 25, 2009)* ("Plaintiffs effectively concede relevance by their quest for similar information from Defendants and in their willingness to disclose reciprocal transaction databases subject to certain conditions."); *Jang v. Sagicor Life Ins. Co., No. ED CV 17-1563, 2019 U.S. Dist. LEXIS 27077, 2019 WL 699791, at *3 (C.D. Cal. Feb. 20, 2019)* ("Plaintiff does not appear to dispute relevance and in fact implicitly concedes relevance by arguing the issue of whether he contacted his father during that period is case dispositive"). Here, as discussed above, RMLC has not demonstrated the relevance of nonradio discovery.

Moreover, even if RMLC could demonstrate that the nonradio discovery has some marginal relevancy—which it has not done—RMLC has not satisfied the proportionality requirement. **[*25]** GMR has about 2,300 nonradio licenses. (Joint Stip. at 67; Dkt. No. 180 (Grimmett Decl.) at ¶ 5). "And since RMLC also wants documents concerning every license fee Global Music Rights has 'attempted to charge,' RMLC's request would potentially sweep in all *unsuccessful* license negotiations for Global Music Rights' entire history." (Joint Stip. at 67) (emphasis in original). GMR attests that complying in full with RMLC's nonradio requests could add between 100,000 and 200,000 documents to be reviewed. (Joint Stip. at 76; McIntyre Decl. ¶¶ 37-38). The cost to review these additional documents is estimated to range from $175,000 to $700,000. (McIntyre Decl. ¶ 38).

In light of the significant burden for information that is—at best—marginally relevant, RMLC's refusal to entertain GMR's compromise proposal is disconcerting. GMR offered to work with RMLC to identify a "bull's-eye-set" of documents concerning nonradio licenses. (Joint Stip. at 70; McIntyre Decl. ¶ 14). On November 14, 2019, GMR proposed producing: (1) historical aggregate revenue information, broken down by the type of music user (e.g., royalty streaming services); and (2) license agreements with key nonterrestrial radio licensees, **[*26]** with only the price redacted. (Joint Stip. at 70-71; McIntyre Decl. ¶ 14). Further, GMR agreed to produce, as noted above, documents concerning any "advances, upfront payments, bonuses, royalty guarantees or equity interests" that Global Music Rights "paid or proposed to pay" any songwriter; and agreements with songwriters, which will lay the other terms of the songwriters' compensation. (Joint Stip. at 71; McIntyre Decl. ¶ 18(e) & Ex. E). RMLC rejected GMR's proposal the very next day. (McIntyre Decl. ¶ 15). Given that this litigation is about terrestrial radio licenses, RMLC should have given careful consideration to GMR's proposal before dismissing it out of hand. Moreover, RMLC has failed to demonstrate that any marginal relevance of the nonradio discovery requests outweighs the substantial burden to produce.

RMLC's request to compel documents responsive to RFP Nos. 21, 28, 29, 35 and Interrogatory No. 3 is **DENIED WITHOUT PREJUDICE**. If, after reviewing GMR's production, RMLC still believes that material gaps remain, it should raise the issues with GMR. Thereafter, if the issues remain unresolved, RMLC may raise its concerns with the Court, preferably via the Court's informal discovery **[*27]** dispute resolution process.

D. Conclusion

Radio Music License Committee, Inc.'s Motion to Compel Responses to Requests for Production of Documents and Interrogatories [178] is **DENIED**. RMLC's request to compel responses to RFP Nos. 21, 28, 29, 30, 32, 35, 46 and 47 and Interrogatory No. 3 is **DENIED WITHOUT PREJUDICE**. RMLC's request to compel a response to RFP No. 19 is **DENIED AS MOOT**. The hearing set for January 7, 2020, is **STRICKEN**.

The parties MUST avail themselves of the Court's informal discovery dispute resolution process to resolve any remaining discovery issues. (See Judge Sagar's Procedures). If the parties believe that the Court's informal discovery process is insufficient to resolve a particular dispute, they must file a motion requesting leave to file a *Rule 37* Joint Stipulation, describing why the informal dispute resolution process is insufficient.

IT IS SO ORDERED.

Opinion by: JESSE M. FURMAN

Opinion

OPINION AND ORDER

JESSE M. FURMAN, United States District Judge:

Plaintiff Apotex Corp. ("Apotex") brings claims **[*2]** against Defendants Hospira Healthcare India Private Ltd. ("Hospira India") and Hospira, Inc. (together with Hospira India, "Hospira"), successors of an entity that had agreed with Apotex to jointly develop and market certain generic pharmaceutical products for sale in the United States. In an earlier Opinion and Order, the Court granted in part and denied in part a motion to dismiss Apotex's claims, and granted Apotex leave to file a second amended complaint. *See* Apotex Corp. v. Hospira Healthcare India Private Ltd., No. 18-CV-4903 (JMF), 2019 U.S. Dist. LEXIS 116335, 2019 WL 3066328 (S.D.N.Y. July 12, 2019). Thereafter, Apotex filed the operative Second Amended Complaint, which includes claims against Hospira for breach of contract; unfair competition under the Florida Deceptive and Unfair Trade Practices Act ("FDUTPA"), Fla. Stat. Ann. §§ 501.201 et seq.; and monopolization and attempted monopolization under Section 2 of the Sherman Antitrust Act, 15 U.S.C. § 2. ECF No. 74 ("SAC"). Hospira now moves, pursuant to Rule 12(b)(6) of the Federal Rules of Civil Procedure, to dismiss Apotex's antitrust claims and its claim for punitive damages for breach of contract. ECF Nos. 84-85. For the reasons that follow, Hospira's motion is GRANTED as to the antitrust claims. The Court reserves judgment on the punitive damages claim pending further briefing on subject-matter jurisdiction **[*3]** in light of the dismissal of the antitrust claims.

BACKGROUND

The relevant background is set forth in the Court's prior Opinion and will be summarized only briefly here. In 2003, Apotex entered into an agreement — the Development, Manufacturing, Supply and Commercialization Agreement ("Agreement"), *see* ECF No. 39, at 5 8 — with Hospira's predecessor, Orchid Chemicals and Pharmaceuticals, Ltd. ("Orchid"). SAC ¶ 1. The Agreement provided that Orchid would supply Apotex with certain drugs, including cefazolin, ceftriaxone, cefoxitin, cefepime, and piperacillin-tazobactam ("pip/taz"). *Id.* In addition, the Agreement prohibited Orchid from supplying the covered drugs to Apotex's competitors and from directly competing with Apotex in the United States. *Id.* ¶¶ 47-50; *see also id.* ¶ 53 (describing amendment creating an exception for certain customers). On March 23, 2010, Hospira succeeded Orchid through a contractual novation ("Novation"), *see* ECF No. 39, at 11-13, and thus became subject to the Agreement's exclusive supply provision and other restrictions on competition with Apotex, *see* SAC ¶¶ 58-64.

On June 1, 2018, Apotex sued Hospira India for breach of the Agreement and Novation and a variety **[*4]** of related claims. *See* ECF No. 1. On July 12, 2019, the Court granted in part and denied in part a motion to dismiss these claims. ECF No. 70. In brief, the Court ruled that Apotex's three fraud-based claims and claims for unfair competition, breach of the implied covenant of good faith and fair dealing, tortious interference, and unjust enrichment failed as a matter of law, but its claim under the FDUTPA did not. *See* 2019 U.S. Dist. LEXIS 116335, 2019 WL 3066328, at *4-8. In addition, the Court ruled that Apotex may seek only benefit-of-the-bargain damages, attorney's fees, and costs for its FDUTPA claim; that Apotex is bound by the Agreement and Novation's limitation on damages; and that it was ambiguous whether the limitation on damages precluded lost profit damages for Apotex's contract claim. 2019 U.S. Dist. LEXIS 116335, [WL] at *8-9. Most relevant for present purposes, the Court reserved judgment on whether Apotex adequately pleaded a claim for punitive damages for breach of contract and whether any such claim was barred by the limitation on damages, *see* 2019 U.S. Dist. LEXIS 116335, [WL] at *8 n.5, and granted Apotex leave to file a second amended complaint adding "new allegations and claims . . . regarding monopolization and attempted monopolization," 2019 U.S. Dist. LEXIS 116335, [WL] at *10. Thereafter, Apotex filed the Second Amended Complaint, adding **[*5]** Hospira, Inc. as a new Defendant and alleging claims under the Sherman Antitrust Act. *See* SAC ¶¶ 169-192.

The Second Amended Complaint alleges that Hospira monopolized the U.S. market for cefepime, a type of cephalosporin antibiotic, and attempted to monopolize the U.S. market for several other drugs. *See* SAC ¶¶ 169-192. Apotex alleges that Hospira did so by breaching its obligations under the parties' agreement to act as Apotex's exclusive supplier for these drugs, and by selling its own version of the drugs to Apotex's competitors and directly to Apotex's customers. *See id.* ¶¶ 176, 184. For example, Hospira allegedly cut off Apotex's supply of cefepime and manufactured and sold its own brand-name version of the drug, Maxipime, to Apotex's competitors and customers. *Id.* at ¶¶ 176, 180. Hospira allegedly used "confidential average price" information obtained through the parties' partnership to sell Maxipime "on par with or near Apotex's contract price." *Id.* at ¶ 176(d). Through this alleged scheme, Hospira's share of the cefepime market "soared from negligible to a majority market share," reaching 56.58% in August 2016. *Id.* at ¶¶ 173, 178. In addition, Hospira ultimately closed "the **[*6]** only facility at which it manufactures Products for Apotex," known as the MKT facility, leaving Apotex entirely "unable to compete." *Id.* at ¶¶ 8, 203. Hospira allegedly used the same scheme in an attempt to monopolize the U.S. market for other drugs — namely, ceftriaxone, cefazolin, cefoxitin, and pip/taz. *See id.* at ¶¶ 1, 189-91. Hospira allegedly gained 43.75% of the market for ceftriaxone "as of January 2017," and 30.76% of the market for cefazolin "as of January 2016." *Id.* ¶ 191. (It is unclear what, if any, market share Hospira gained for the other drugs.) On the basis of these allegations, Apotex now seeks, *inter alia*, treble damages, plus costs and attorney's fees, for the alleged antitrust violations and punitive damages for the alleged breach of contract. *See* SAC at Prayer for Relief ¶ 1(a), (c).[1]

LEGAL STANDARDS

In evaluating a motion to dismiss pursuant to *Rule 12(b)(6)*, a court must accept all facts set forth in the complaint as true and draw all reasonable inferences in the plaintiff's favor. *See, e.g., Kashef v. BNP Paribas S.A., 925 F.3d 53, 58 (2d Cir. 2019)*. A claim will survive a *Rule 12(b)(6)* motion, however, only if the plaintiff alleges facts sufficient "to state a claim to relief that is plausible on its face." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim is facially plausible **[*7]** "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Twombly, 550 U.S. at 556*). A plaintiff must show "more than a sheer possibility that a defendant has acted unlawfully," *id.*, and cannot rely on mere "labels and conclusions" to support a claim, *Twombly, 550 U.S. at 555*. If the plaintiff's pleadings "have not nudged [his or her] claims across the line from conceivable to plausible, [the] complaint must be dismissed." *Twombly, 550 U.S. at 570*.

DISCUSSION

The Court begins with the motion to dismiss Apotex's antitrust claims, its sole federal claims. *Section 2* of the Sherman Antitrust Act prohibits "monopoliz[ing], or attempt[ing] to monopolize . . . any part of the trade or commerce among the several States." *15 U.S.C. § 2*. A claim of monopolization "requires, in addition to the possession of monopoly power in the relevant market, the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *In re Adderall XR Antitrust Litig., 754 F.3d 128, 133 (2d Cir. 2014)* (internal quotation marks omitted) (quoting *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004))*. "To state an attempted monopolization claim, a plaintiff must establish '(1) that the defendant has engaged in predatory **[*8]** or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.'" *PepsiCo., Inc. v. Coca-Cola Co., 315 F.3d 101, 105 (2d Cir. 2002)* (per curiam) (quoting *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993))*. The two claims "are substantially identical, with the exception that attempted monopolization requires a showing of specific intent to monopolize." *New York v. Actavis, PLC, No. 14-CV-7473 (RWS), 2014 U.S. Dist. LEXIS 172918, 2014 WL 7015198, at *35 (S.D.N.Y. Dec. 11, 2014)*, *aff'd sub nom. New York ex rel. Schneiderman v. Actavis PLC, 787 F.3d 638 (2d Cir. 2015)*.

Hospira argues that Apotex's claims fail for at least two reasons: first, because Apotex fails to make a showing of "anticompetitive conduct," ECF No. 85 ("Defs.' Mem."), at 10-14; and second, because Apotex fails to plausibly

[1] Apotex seeks punitive damages solely in connection with its contract claims. *See* ECF No. 87, at 2 n.2. Thus, the Court need not and does not address Hospira's motion to the extent that it seeks dismissal of a claim for punitive damages under the FDUTPA.

allege that Hospira actually monopolized or dangerously threatened to do so, *id.* 19-22.[2] The Court agrees on both fronts.

A. Anticompetitive Conduct

A claim under the Sherman Act must allege anticompetitive conduct, as federal antitrust laws were "enacted for the protection of competition not competitors." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (internal quotation marks omitted). "[A]nticompetitive conduct is conduct without a legitimate business purpose that makes sense only because it eliminates competition." *In re Adderall, 754 F.3d at 133* (internal quotation marks omitted). A "prototypical valid business purpose" is expanding into a new market to compete on the basis of increased efficiency. *See Port Dock & Stone Corp. v. Oldcastle Northeast, Inc., 507 F.3d 117, 124-25 (2d Cir. 2007)* (holding **[*9]** that a manufacturer's breach of a distributorship agreement was not anticompetitive because the manufacturer "expected to perform the second level service more efficiently than the old trading partners"). Conduct undertaken for such a purpose cannot, as a matter of law, be the basis for an antitrust claim.

In this case, Apotex's own allegations reveal that Hospira's conduct was undertaken for legitimate, pro-competitive purposes. The primary conduct alleged in the Second Amended Complaint is Hospira's decision to breach the exclusive supplier agreement with Apotex in order to compete directly with Apotex and to supply Apotex's competitors. *See, e.g.*, SAC ¶¶ 84 ("Hospira has sold or otherwise supplied to third parties in the Territory certain drugs that directly compete with Apotex's sale of the Products."), 88 (describing "Hospira's deliberate decision to divert supply of Products to its own use in competition with Apotex"); *see also id.* ¶ 2 (alleging that "Hospira did compete with Apotex in the United States pharmaceuticals market" prior to the parties' agreement). That decision is consistent with competitive business behavior: "Like any seller of a product," Hospira "would prefer **[*10]** multiple competing buyers unless an exclusive distributorship arrangement provides other benefits." *E&L Consulting, Ltd. v. Doman Indus. Ltd., 472 F.3d 23, 30 (2d Cir. 2006)*. Engaging in competition was especially rational given Hospira's competitive advantage over Apotex. Apotex alleges that "many" firms produce "virtually identical drugs," which means that firms must compete on factors like "consistency of supply." *Id.* ¶¶ 39-40. Hospira, as a manufacturer, has direct access to a consistent supply of products, unlike a reseller like Apotex. Hospira's decision to capitalize on this advantage is not the type of anticompetitive conduct prohibited by federal antitrust laws. *See Port Dock, 507 F.3d at 125* ("[A] complaint pleading that a defendant expanded vertically and as a result, decided to discontinue doing business with its erstwhile trading partners at the next level down, does not plead an actionable refusal to deal.").

In arguing otherwise, Apotex asserts that "there is no legitimate business justification for a campaign to withhold irreplaceable supply from a competitor, misappropriate its confidential information to target customers and sully the competitor's reputation so customers will abandon it." ECF No. 87 ("Pl.'s Opp."), at 14. In support, Apotex relies heavily on *Associated Radio Service Co. v. Page Airways, Inc., 624 F.2d 1342 (5th Cir. 1980)*, for **[*11]** the proposition that "some unfair business practices can be exclusionary." Pl.'s Opp. 15 (quoting *Page Airways, Inc., 624 F.2d at 1354*). But as the Fifth Circuit has stated more recently, the "distinction between unfair conduct and anticompetitive conduct is critical to maintain because the antitrust laws 'do not create a federal law of unfair competition.'" *Retractable Techs., Inc. v. Becton Dickinson & Co., 842 F.3d 883, 892 (5th Cir. 2016)* (quoting *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* (noting that "*Brooke Grp.*, of course, postdates *Page Airways*"). The conduct that Apotex alleges may well give use to claims for unfair competition and breach of contract, but it does not give rise to an antitrust claim. *See La. Wholesale Drug Co. v. Shire LLC, 929 F. Supp. 2d 256, 262 (S.D.N.Y. 2013)* ("[N]ot every sharp-elbowed

---

[2] Hospira also contends that Apotex fails to allege antitrust injury and, by extension, antitrust standing. *See* Defs.' Mem. 8-10; ECF No. 88 ("Defs.' Reply"), at 2-3 & 3 n.5. Despite its name, antitrust standing is "not jurisdictional in nature but rather relates to the merits of a claim." *Bilinski v. Keith Haring Found., Inc., 96 F. Supp. 3d 35, 43 n.7 (S.D.N.Y. 2015)*. Accordingly, the Court need not and does not address it here. *See, e.g., Biocad JSC v. F. Hoffmann-La Roche, Ltd., 942 F.3d 88, 94 n.5 (2d Cir. 2019)*.

business practice though potentially wrongful as a breach of contract or even fraud — necessarily amounts to an antitrust violation."); *see also, e.g., Hunt v. Mobil Oil Corp., 465 F. Supp. 195, 235 n.102 (S.D.N.Y. 1978)* ("[T]he antitrust laws are not properly invoked every time a party to a contract claims injury because of another party's alleged nonperformance of the agreement"), *aff'd*, *610 F.2d 806 (2d Cir. 1979)*.

Citing *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*, Apotex also argues that Hospira's conduct constitutes an anticompetitive refusal to deal. Pl.'s Opp. 16-19. Private businesses, however, enjoy a "long recognized right" to exercise "independent discretion as to the parties with whom [they] will deal." *In re Adderall, 754 F.3d at 134* (quoting *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919))*. *Aspen Skiing* ***[*12]*** established a "limited" exception to that principle for situations in which the "unilateral termination of a voluntary (and thus presumably profitable) course of dealing suggested a willingness to forsake short-term profits to achieve an anticompetitive end." *Trinko, 540 U.S. at 409* (emphasis omitted); *see Charych v. Siriusware, Inc., No. 17-CV-468 (JS) (GRB), 2018 U.S. Dist. LEXIS 128341, 2018 WL 4870906, at *7 (E.D.N.Y. July 30, 2018)* (noting that the *Aspen Skiing* exception is "narrow"). In that case, the Supreme Court upheld an antitrust verdict against a ski resort operator that had discontinued a longstanding agreement with a smaller rival to jointly sell "all-Aspen" resort access tickets. *472 U.S. at 604, 611*. The Court noted that such a decision was "not necessarily anticompetitive," but found that evidence in the record supported the jury's conclusion that "there were no valid business reasons for the refusal" to deal except to eliminate competition. *Id. at 604, 610-11*. Because the larger ski resort's decision was not motivated by efficiency concerns," the Court concluded that the resort was "sacrificing short-run benefits and consumer goodwill in exchange for a perceived long-run impact on its smaller rival." *Id. at 610-11*.

Two key elements of *Aspen Skiing* are absent from this case. First, *Aspen Skiing's* holding was driven by the Court's **[*13]** conclusion that the defendant had discontinued its prior, "presumably profitable" course of dealing in an effort "to forsake short-term profits to achieve an anticompetitive end." *Trinko, 540 U.S. at 409*; *see Aspen Skiing, 472 U.S. at 610-11*. Here, by contrast, Apotex affirmatively alleges that Hospira breached its contractual obligations in pursuit of competitive profits. *See* SAC ¶ 4 (alleging that Hospira was "using its breaches of the Agreement as a means to capture for itself all of the very profits the parties had agreed to share"). A party does not — at least *as a matter of* ***antitrust law*** — have a duty to deal with a competitor when, as here, greater profits are available through direct competition. *See, e.g., In re Adderall, 754 F.3d at 131, 134-35* (dismissing antitrust claims based on a drug maker's breach of "unprofitable" agreements to "give its competitors both the lights and the supplies necessary to participate in the market").

Second, the *Aspen Skiing* decision relied on the fact that the defendant could use its significant market power to exclude its smaller rival. *See In re Adderall, 754 F.3d at 134* (noting that *Aspen Skiing* held "that a business *with market power* may be subject to a duty to deal with a smaller competitor" (emphasis added)). Because the defendant in *Aspen Skiing* controlled three **[*14]** of the four resorts in the area, the defendant was able to sharply curb business for its competitor by selling a "3-area" ticket to its own resorts while denying the smaller operator access, even at retail price. *Aspen Skiing, 472 U.S. at 610*. Here, by contrast, until Hospira allegedly breached the parties' contract, Hospira had almost no presence in the market for cefepime, as Hospira was contractually barred from competing with Apotex and Hospira's brand drug was subject to "generic substitution laws," which ensured that "sales . . . were negligible." SAC ¶¶ 63, 93. In these conditions, Hospira's conduct does not suggest an anticompetitive motive. It suggests the opposite: that Hospira sought to, and did, participate in the market as a competitor.

Finally, Apotex argues that, "[i]n this Circuit, the bar for showing that a party has engaged in unlawful anticompetitive conduct is a low one.'" Pl.'s Opp. 14 (quoting *Provepharm, Inc. v. Akorn, Inc., No. 17-CV-7087 (SJF) (AKT), 2019 U.S. Dist. LEXIS 98719, 2019 WL 2443185, at *10 (E.D.N.Y. June 11, 2019))*. That may be true, but it does not salvage Apotex's claims because Apotex "fails to allege any facts regarding monopolistic conduct — as opposed to selective aggressive conduct against a rival." **[*15]** *Full Circle United, LLC v. Skee-Ball, Inc., Nos. 11-CV-5476 (LB), 11-CV-6277 (LB), 2014 U.S. Dist. LEXIS 202841, 2014 WL 12829195, at *11 (E.D.N.Y. May 13, 2014)* ("The gravamen of [an antitrust] offense is *not* the enlargement of the defendant's market share at the plaintiff's expense or even the destruction of plaintiff by unfair means." (alterations omitted)). That is, Apotex does not meet the bar, however low it may be. *See* Alaska Elec. Pension Fund v. Bank of Am. Corp., 175 F. Supp. 3d 44, 60 n.2 (S.D.N.Y. 2016) ("[A] competitor cannot use the antitrust laws to recover lost profits as a result of being confronted with an *increase* in competition."). In short, Apotex's antitrust claims fail because the Second Amended Complaint alleges harm to a competitor, not harm to competition — the *sine qua non* of an antitrust claim.

B. Actual or Threatened Monopolization

Apotex's antitrust claims fail for a second reason as well: because the Second Amended Complaint makes clear that Hospira never acquired monopolistic market power and that there was no dangerous probability Hospira would acquire it. *See* Spectrum Sports, 506 U.S. at 456. "Market power is the ability: '(1) to price substantially above the competitive level *and* (2) to persist in doing so for a significant period without erosion by new entry or expansion.'" Commercial Data Servers, Inc. v. Int'l Bus. Machines Corp., 262 F. Supp. 2d 50, 73 (S.D.N.Y. 2003) (quoting AD/SAT, Div. of Skylight, Inc. v. Assoc. Press, 181 F.3d 216, 227 (2d Cir. 1999) (per curiam)). Market power "may be proven directly by evidence of the control of prices or the exclusion of competition, or it **[*16]** may be inferred from one firm's large percentage share of the relevant market." Tops Mts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 98 (2d Cir. 1998).

To allege market power, a party first needs to define the relevant market. "The relevant market is defined as all products reasonably interchangeable by consumers for the same purposes, because the ability of consumers to switch to a substitute restrains a firm's ability to raise prices above the competitive level." Geneva Pharms. Tech. Corp. v. Barr Labs. Inc., 386 F.3d 485, 496 (2d Cir. 2004) (internal quotation marks omitted). The plaintiff must define both "a product market and a geographic market." Concord Assocs., L.P. v. Entm't Props. Trust, 817 F.3d 46, 52 (2d Cir. 2016). In addition, the plaintiff "must offer a theoretically rational explanation for why the boundaries of the market are defined as they are and must define the market according to the rules of interchangeability and cross-elasticity." Bayer Schering Pharma AG v. Sandoz, Inc., 813 F. Supp. 2d 569, 575 (S.D.N.Y. 2011) (internal quotation marks omitted); *see also* AD/SAT, Div. of Skylight, Inc., 181 F.3d at 227 (defining cross-elasticity of demand as an economic measure indicating whether "consumers would respond to a slight increase in the price of one product by switching to another product").

Here, Apotex fails to plausibly allege the relevant market. For its monopolization claim, Apotex alleges that the relevant product market is "that for the drug cefepime, including branded and AB rated generic products." SAC **[*17]** ¶ 170. For its attempted monopolization claim, Apotex alleges the same type of market for each of the other drugs subject to the parties' agreement. *Id.* ¶¶ 184. In all cases, the alleged geographic market is the United States. *Id.* ¶¶ 172, 184. Significantly, however, Apotex fails to "offer any plausible explanation as to why [the] market should be limited" to each individual drug and its AB-rated generic equivalents. *See* Xerox Corp. v. Media Sciences Int'l, Inc., 511 F. Supp. 2d 372, 384 (S.D.N.Y. 2007). Apotex does not allege facts that plausibly rule out potentially interchangeable drugs, especially those within the same "therapeutic classes." SAC ¶ 38. Instead, it simply alleges in conclusory fashion that "[t]here are no products which are interchangeable or substitutable" and that "there is low elasticity of demand." SAC ¶¶ 174, 185. "[M]erely asserting that a commodity is in some way unique," however, "is insufficient to plead a relevant market. Rather, an antitrust complaint must explain why the market it alleges is the relevant, economically significant product market." Concord Assocs., L.P., 817 F.3d at 54 (quoting B.V. Optische Industrie De Oude Delft v. Hologic, Inc., 909 F. Supp. 162, 171 (S.D.N.Y. 1995)). Apotex's failure to do so, by itself, justifies dismissal. *See* Conte v. Newsday, Inc., 703 F. Supp. 2d 126, 143 (E.D.N.Y. 2010).

In addition, even assuming the relevant markets are as Apotex defines them, Apotex fails to allege that Hospira acquired **[*18]** market power. Critically, Apotex itself repeatedly alleges that Hospira could not set prices at a supra-competitive level. *See, e.g.*, SAC ¶¶ 100-01. In fact, one of Apotex's main allegations is that Hospira's scheme depended on using Apotex's confidential pricing data to sell drugs "at prices on par with or near Apotex's contract pricing." SAC ¶¶ 101, 176(d). On top of that, Apotex alleges that there were "many" competing manufacturers producing "virtually identical drugs," including Qilu Pharmaceuticals Co., which Apotex itself ended up selecting as a replacement supplier for some of the relevant drugs. SAC ¶¶ 38-39, 148. Indeed, Apotex goes so far as to admit that the "generic antibiotic and antibacterial injectable Products, including cephalosporins," at issue in this case "belong to therapeutic classes in which generic competition is robust." SAC ¶ 38. Taken together, these allegations establish that Hospira did not, and could not, raise prices above the competitive level for any significant period of time as required to sustain an antitrust claim.

In arguing otherwise, Apotex points to Hospira's alleged market share. Apotex alleges that, as of August 2016, Hospira "had a 56.58 **[*19]** percent share of the cefepime market." SAC ¶ 173; *see also id.* ¶ 190 (alleging that there is a "dangerous probability" of monopolization because Hospira has "already reached monopoly-level shares of that market"). Market share can be a significant factor in the assessment of market power, at least when the alleged market share approaches ninety percent. *See Ortho Diagnostic Sys., Inc. v. Abbott Lab., Inc., 920 F. Supp. 455, 463-64 (S.D.N.Y. 1996)* (discussing *United States v. Aluminum Co. of Am., 148 F.2d 416, 424 (2d Cir. 1945)* (L. Hand, J.) and citing *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992))*. But market share is not dispositive and it cuts the other way when, as here, the alleged percentage falls far short of ninety percent and other factors strongly indicate the absence of market power. *See PepsiCo, 315 F.3d at 109* ("Absent additional evidence, such as an ability to control prices or exclude competition, a 64 percent market share is insufficient to infer monopoly power."); *Natsource LLC v. GFI Grp., Inc., 332 F. Supp. 2d 626, 635 (S.D.N.Y. 2004)* ("Even market shares of approximately 50% are insufficient to demonstrate market power where other factors such as low barriers to entry and strong competition . . . exist").

Here, the most that Apotex alleges is that Hospira controlled 56.68% of the cefepime market for the month of August 2016. *See* SAC ¶ 94 (alleging, contrary to Paragraph 173, 56.68% instead of 56.58%). Elsewhere, Apotex alleges that Hospira had much smaller shares **[*20]** of the cefepime market: 6.79% in March 2013, 16.46% in August 2013, 18.26% in April 2014, and something in excess of 20% in May 2014. *Id.* ¶ 94. Moreover, Apotex alleges that Hospira's market share "fluctuated, often in lock-step with declines in Apotex's own market share." *Id.* Taken together, these allegations make clear that Apotex never reached a sufficiently large or durable market share to create an inference of monopoly power. They also confirm that Hospira lacked the ability to charge supra-competitive prices "for a significant period without erosion by new entry or expansion," *Commercial Data Servers, 262 F. Supp. 2d at 73* (internal quotation marks omitted); *see also, e.g., Bookhouse of Stuyvesant Plaza, Inc. v. Amazon.com, Inc., 985 F. Supp. 2d 612, 622 (S.D.N.Y. 2013)* (dismissing a monopolization claim on a motion to dismiss where the "plaintiffs' only allegation suggesting that [the defendant] possesses monopoly power is that its market share is 60%").

Whether Apotex plausibly alleges a dangerous probability of Hospira acquiring market power with respect to ceftriaxone, cefazolin, cefoxitin, and pip/taz is a closer question (or, at least, would be if a relevant market were properly alleged), if only because "a lesser degree of market power may establish an attempted monopolization claim than that necessary to establish **[*21]** a completed monopolization claim." *Top Mkts., Inc., 142 F.3d at 100*; *see H.L. Hayden Co. of N.Y., Inc. v. Siemens Med. Sys., Inc., 879 F.2d 1005, 1018 (2d Cir. 1989)*. Apotex alleges a 43.75% market share for ceftriaxone "as of January 2017," a 30.76% market share for cefazolin "as of January 2016," and nothing with respect to cefoxitin and pip/taz. SAC ¶ 191. But for similar reasons, here too the Second Amended Complaint falls short. That is, an attempted monopolization claim still requires "some degree of market power," *Top Mkts., Inc., 142 F.3d at 100*, and "[a] company has monopoly power if it can sell a product or service for a supra-competitive price untroubled by market forces; in other words, if it is able to exert power to insulate its prices from competition," *In re Payment Card Interchange Fee & Merchant Discount Antitrust Litig., 562 F. Supp. 2d 392, 399 (E.D.N.Y. 2008)*. Taken together, Apotex's own allegations make plain that there was never a "dangerous probability" that Hospira could insulate its prices from competition, given that Hospira was bound to the prices set by Apotex in competition with other major firms. *See Bayer Schering Pharma AG, 813 F. Supp. 2d at 580*.

CONCLUSION

In short, Apotex's own allegations make clear that it cannot state a plausible claim for monopolization or attempted monopolization. In the final analysis, Apotex is essentially trying to recast a claim for breach of contract — a contract that restricts competition, no less — as an antitrust claim, which it **[*22]** may not do. *See, e.g., In re Adderall, 754 F.3d at 135* ("The mere existence of a contractual duty to supply goods does not by itself give use to an antitrust 'duty to deal.'"); *RxUSA Wholesale Inc. v. Alcon Labs., 391 F. App'x 59, 61 (2d Cir. 2010)* (summary order) ("A refusal to deal with competitors does not constitute anticompetitive conduct in violation of *Section 2* except in limited circumstances not present here."). Accordingly, Apotex's antitrust claims must be and are dismissed.

That leaves two interrelated issues: amendment and jurisdiction. Apotex requests, in the event that its antitrust claims are dismissed, "a conference to address next steps, including amendment." Pl.'s Opp. 25. Construing this as a cursory request for leave to amend, the Court concludes that leave to amend would be futile. *See, e.g., Rincon v. Covidien, No. 16-CV-10033 (IMF), 2017 U.S. Dist. LEXIS 77458, 2017 WL 2242969, at *2 (S.D.N.Y. May 22, 2017)* ("Although courts 'should freely give leave when justice so requires,' a court need not grant leave to amend when further amendment would be futile." (quoting *Fed. R. Civ. P. 15(a)(2)*); *see also Ruffolo v. Oppenheimer & Co., 987 F.2d 129, 131 (2d Cir. 1993)* (per curiam) ("Where it appears that granting leave to amend is unlikely to be productive . . . it is not an abuse of discretion to deny leave to amend."). The defects in Apotex's antitrust claims are "substantive" and arise from Apotex's own allegations, not from inadequate or inartful pleading. *See Cuoco v. Moritsugu, 222 F.3d 99, 112 (2d Cir. 2000)*. Moreover, **[*23]** Apotex has not pointed to additional facts it could allege that would cure these defects, and it did not do so previously when Hospira challenged its proposed amended allegations. *See* ECF Nos. 60-61. Accordingly, leave to amend the antitrust claims is denied.

Without the prospect of antitrust claims, however, it is not clear that this case should remain in federal court. Dismissal of the antitrust claims leaves only state-law claims and Apotex, a Delaware corporation, destroyed diversity by adding Hospira, Inc., another Delaware corporation, as a Defendant in the Second Amended Complaint. *Compare* SAC, *with* ECF No. 1, *and* ECF No. 34. Under *28 U.S.C. § 1367*, the Court has discretion to exercise supplemental jurisdiction over the remaining state-law claims, and must balance the "traditional 'values of judicial economy, convenience, fairness, and comity'" to determine whether to do so. *Kolari v. New York-Presbyterian Hosp., 455 F.3d 118, 122 (2d Cir. 2006)* (quoting *Carnegie-Mellon Univ. v. Cohill, 484 U.S. 343, 350, 108 S. Ct. 614, 98 L. Ed. 2d 720 (1988))*. The balance ordinarily does not support exercising jurisdiction "if all federal claims have been dismissed at the pleading stage." *Haynes v. Zaporowski, 521 F. App'x 24, 28 (2d Cir. 2013)* (summary order) (internal quotation marks omitted). Indeed, the Second Circuit recently reiterated that, "in the usual case in which all federal-law claims are eliminated before **[*24]** trial, the balance of factors to be considered under the pendent jurisdiction doctrine — judicial economy, convenience, fairness, and comity — will point toward declining to exercise jurisdiction over the remaining state-law claims." *Pension Ben. Guar. Corp. ex rel. St. Vincent Catholic Med. Ctrs. Ret. Plan v. Morgan Stanley Inv. Mgmt. Inc., 712 F.3d 705, 727 (2d Cir. 2013)* (internal quotation marks omitted); *see, e.g., Francis v. Hartford Bd. of Educ., 760 F. App'x 34, 38 (2d Cir. 2019)* (summary order).

Unfortunately, the parties have not adequately briefed the question of subject-matter jurisdiction in the absence of the antitrust claims. In its memorandum of law in support of its motion, Hospira indicated, with little elaboration, that "the Court properly may elect to retain jurisdiction . . . or decline to do so." Defs.' Mem. 24. Apotex did not address the issue at all in its opposition brief, and Hospira provided no further discussion in its reply brief Accordingly, the Court will reserve judgment on whether it should exercise supplemental jurisdiction over the remaining state-law claims (and, by extension, reach Hospira's argument with respect to the punitive damages claim) or dismiss the case without prejudice to refiling the state-law claims in state court pending further briefing. No later than **January 17, 2020**, each side shall submit a supplemental brief, not to exceed five pages, **[*25]** addressing the issue.

The Clerk of Court is directed to terminate ECF No. 84.

SO ORDERED.

Opinion

[*1076] WO

ORDER

Before the Court are Defendant Salt River Project Agricultural Improvement and Power District's ("District") Motion to Dismiss and Request for Judicial Notice.[1] (Doc. 14, "Mot."; Doc. 15, "Req."). Plaintiff customers William Ellis, Robert Dill, **[**4]** Edward Rupprecht, and Robert Gustavis responded to the Motion and the District replied. (Doc. 21, "Resp."; Doc. 22, "Repl."). Plaintiffs also responded to the **[*1077]** Request. (Doc. 20, "R.Resp."). The Court heard oral argument November 18, 2019. (Doc. 28.) Accepting the allegations as true, the Motion and Request are each granted in part as explained below.

I. BACKGROUND

This case arises out of the District's adoption of a new rate structure for its sale of electricity, which includes additional fees and different rates for residential customers, like Plaintiffs, who self-generate some of their electricity through solar energy systems. (Doc. 12, "FAC" ¶¶ 6, 28, 75-76.) In 2014, the District proposed the new rate structure ("Standard Electric Price Plans" or "SEPPs"), which includes a new E-27 price plan required for self-generating solar customers, that its Board of Directors ("Board") approved in 2015. (*Id.* ¶¶ 72-73.) The E-27 price plan applies to customers who began self-generating solar power after December 8, 2014. (*Id.* ¶ 81.) Plaintiffs' claims relate to their financial injuries caused by the SEPPs. (*Id.* ¶¶ 1, 5, 73.)

A. Parties

Plaintiffs are four District residential customers who **[**5]** live in Arizona and self-generate some of their electricity through personal solar energy systems. (*Id.* ¶¶ 20-27.) Three Plaintiffs installed their solar energy systems after the

[1] The District's Memorandum in Support of its Motion is docketed separately. (*See* Doc. 14-1, "Memo.")

District adopted the SEPPs. (*Id.* ¶¶ 21, 23, 25.) Specifically, Ellis, Dill, and Rupprecht installed solar energy systems in May 2018, July 2018, and November 2016, respectively. (*Id.*) Rupprecht bought his home equipped with a solar energy system at an unknown date. (*Id.* ¶ 27.)

The District and the "Association" are two distinct entities comprising the Salt River Project Agricultural Improvement and Power District ("SRP"), a power-and-water utility company in central Phoenix, Arizona.[2] (*Id.* ¶ 28.) Although the District is a political subdivision of Arizona, it (1) "is not recognized by the State of Arizona or by any law as a regulator or regulatory authority in the retail [electricity] market;" (2) "cannot impose ad valorem property taxes or sales taxes or enact laws governing citizens' conduct;" (3) "cannot administer normal governmental functions such as the maintenance of streets, the operation of schools, or sanitation, health or welfare services;" (4) "is not exempt from a city's exercise of eminent domain, **[**6]** nor it is immune from tort liability;" and (5) can only levy taxes against its landowners. (*Id.* ¶¶ 35-36.) Unlike other utility providers, the District's rates, rules, and regulations are exempt from the control of Arizona's public utility regulator, the Arizona Corporation Commission ("ACC"). (*Id.* ¶ 37.)

B. The Retail Electricity Market

The District provides electricity to around two million residential and commercial customers including Plaintiffs in central Phoenix ("Market"). (*Id.* ¶¶ 2, 28, 32, 42.) As Plaintiffs allege, the District provides over 95% of retail customers' electricity in the Market through a variety of plans and sources. (*Id.* ¶¶ 48-49.) Individuals in the Market can either purchase electricity from the District or self-generate electricity through purchased or leased solar energy systems. (*Id.* ¶ 43.) By investing in solar energy systems, customers "significantly reduce the amount of electricity that they need to purchase from [the District]." (*Id.* ¶ 44.) However, "[s]ince technologies that would allow consumers to completely remain off the grid are not yet economically viable," "all customers within **[*1078]** [the Market] generally must purchase some retail electricity from **[**7]** [the District]." (*Id.* ¶ 52.) The District competes with solar energy system installers in the Market to provide electricity and one of its executives allegedly referred to solar energy systems, installers, and advocates as 'the enemy.'" (*Id.* ¶¶ 44-45.)

The District's monopolization is allegedly not caused by any state policy to prevent competition, especially since Arizona's legislature encouraged competition in the retail electricity market through the *Electric Power Competition Act of 1998* ("the Act"). (*Id.* ¶¶ 53-54.) The District acknowledges the legislature's transition to promote competition in the Market in its 2010 rules and regulations, which state "[the District's] service territory is open to competition . . . in accordance with the . . . Act." (*Id.* ¶ 55.) The Act also allegedly subjects public power entities to antitrust liability. (*Id.* ¶ 59 (citing *A.R.S. § 30-813*)).

C. Dispute

The SEPPs are "aimed at maintaining [the District's] monopoly power; impeding solar development despite its recognized benefits; quashing competition for electricity from self-generating customers with solar energy systems; and generating additional revenues for [the District] through exploitation of its monopoly **[**8]** power." (*Id.*) More explicitly, the SEPPs make self-generating solar energy uneconomical and force Market consumers to exclusively purchase the District's electricity. (*Id.* ¶ 87.) Because the District previously encouraged and even incentivized consumer investment in solar energy systems until 2014, (*id.* ¶¶ 63, 71-72), Plaintiffs claim the District adopted and advertised the SEPPs to deter individuals from investing in solar energy systems and fortify its monopoly. (*Id.* ¶¶ 5-10, 46, 71-72, 84.)

The SEPPs differentiate between three types of customers. (*Id.* ¶ 81.) The first category is non-solar customers, who purchase all of their electricity from the District, follow the traditional rate structure, and pay per kilowatt-hour of

[2] The Association formed the District as a "political subdivision of the State of Arizona" in 1937 "for the purpose of refinancing the Association's debt by issuing interest-free municipal bonds." (*Id.* ¶¶ 28, 30, 35.)

electric usage, a $20.00 monthly service charge, and a $4.20 distribution charge. (*Id.* ¶¶ 74-75.) The second category is solar-customers, like Plaintiffs, who began self-generating solar energy after 2014 ("post-2014 solar customers"). (*Id.* ¶ 80.) Post-2014 solar-customers are subject to the E-27 plan, which is a "demand based rate plan" that includes a $32.44 or $45.44 monthly service charge, $16.64 or $29.64 distribution charge, and additional "demand charge" **[**9]** that is not applied to non-solar customers. (*Id.* ¶¶ 75-76.) The District charges post-2014 solar customers roughly $600 more per year than other customers. (*Id.* ¶ 89.) The third category is solar-customers who self-generated solar energy before December 8, 2014 ("pre-2014 solar customers"). (*Id.* ¶ 81.) Pre-2014 solar customers are exempt from the E-27 plan and treated like non-solar customers. (*Id.*)

Plaintiffs allege the SEPPs "made it economically unfeasible for customers to install solar energy systems." (*Id.* ¶ 92.) Plaintiffs further allege "[t]here is no rational basis" for adopting the SEPPs and the District's reason of recouping fixed expenses required to service post-2014 solar customers is pretextual. (*Id.* ¶¶ 96, 100.) Beyond "public policy and logic" warranting relief, Plaintiffs claim the District's "anticompetitive, discriminatory, and unconstitutional conduct" warrants "monetary, injunctive, and declaratory relief" under a variety of federal, state, and constitutional remedies. (*Id.* ¶ 1.) Plaintiffs allege the SEPPs violate (1) federal and state ***antitrust law***; (2) state-law price discrimination; (3) federal and state equal protection; and (4) Arizona's Consumer Fraud Act. **[**10]** (*Id.* ¶¶ 120-195.) The District requests judicial notice and moves to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*. **[*1079]** The Court begins with the District's Request.

II. REQUEST FOR JUDICIAL NOTICE

When a complaint is challenged under *Rule 12(b)(6)*, "[r]eview is limited to the complaint." *Cervantes v. City of San Diego, 5 F.3d 1273, 1274 (9th Cir. 1993)*. However, courts may "consider certain [other] materials—documents attached to the complaint, documents *incorporated by reference* in the complaint, or matters of *judicial notice*—without converting the motion to dismiss into a motion for summary judgment." *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)* (emphasis added).

Under the incorporation-by-reference doctrine, a court may consider "certain documents as though they are part of the complaint itself," *Khoja v. Orexigen Therapeutics, Inc., 899 F.3d 988, 1002 (9th Cir. 2018)*, "if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim[s]." *Ritchie, 342 F.3d at 907*. "The doctrine prevents plaintiffs from selecting only portions of documents that support their claims, while omitting portions of those very documents that weaken—or doom—their claims." *Khoja, 899 F.3d at 1002* (citing *Parrino v. FHP, Inc., 146 F.3d 699, 706 (9th Cir. 1998)*, superseded by statute on other grounds as recognized in *Abrego Abrego v. Dow Chem. Co., 443 F.3d 676, 681-82 (9th Cir. 2006))*. But "if the document merely creates a defense to the well-pled allegations in the complaint, then that document did not necessarily form the basis of the complaint." *Khoja, 899 F.3d at 1002*.

Additionally, **[**11]** a court may also consider certain documents satisfying *Federal Rule of Evidence 201*. Under *Rule 201*, a court may judicially notice a fact "not subject to reasonable dispute because it (1) is generally known within the trial court's territorial jurisdiction; or (2) can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." *Fed. R. Ev. 201(b)*. "A court may take judicial notice of matters of public record." *Khoja, 899 F.3d at 999*. But "[j]ust because the document itself is susceptible to judicial notice does not mean that every assertion of fact within that document is judicially noticeable for its truth." *Id.* In cautioning against taking judicial notice, *Rule 201*'s advisory committee notes emphasize that "taking evidence, subject to cross-examination and rebuttal, is the best way to resolve controversies involving disputes of adjudicative facts, that is, facts pertaining to the parties." *Fed. R. Ev. 201*. Dispensing with these traditional methods should only be done so in clear cases of "[a] high degree of indisputability." *Rivera v. Philip Morris, Inc., 395 F.3d 1142, 1151 (9th Cir. 2005)* (citing *Fed. R. Ev. 201*). Here, the District requests consideration of ten exhibits under the incorporation-by-reference doctrine and *Rule 201*. (Req. at 4.)

A. Notice of Claims (Exhibit 1)

Exhibit 1 is Plaintiffs' notice of claims pursuant to **[**12]** *A.R.S. § 12-821.01*. (Doc. 15-2 at 2-45, "Notice.") The District requests the Court judicially notice it because its deficiencies compel dismissal of Plaintiffs' state law claims. (Req. at 5.) Plaintiffs claim the request should be denied because "Arizona's notice of claim requirement is procedural [and] does not apply in federal court." (R.Resp. at 3.) Alternatively, Plaintiffs do not object if the notice of claim requirement applies. (*Id.*) Plaintiffs' Notice applies in federal court. *See Mothershed v. Thomson, No. CV-04-2266-PHX-JAT, 2006 U.S. Dist. LEXIS 6968, 2006 WL 381679, *7 (D. Ariz. Feb. 16, 2006)* ("federal courts entertaining state-law claims against state entities are obligated to apply the state law **[*1080]** notice-of-claim provision"); *see also Payne v. Arpaio, No. CV-09-1195-PHX-NVW, 2009 U.S. Dist. LEXIS 110553, 2009 WL 3756679, *11 (D. Ariz. Nov. 4, 2009)* ("*§ 12-821.01* applies to all state law claims."). Accordingly, the Court judicially notices Exhibit 1.

B. Arizona Corporation Commission Staff Report; 2013 Docket Request; 2018 Docket Request (Exhibits 2-4)

Exhibit 2 is a 2010 ACC internal memorandum containing an attachment titled "staff report for generic proceedings concerning electric restructuring issues." (Doc. 15-2 at 47-77, "Staff Report.") Exhibit 3 is a 2013 ACC internal memorandum docket opening request related to the ACC's "inquiry into retail electric **[**13]** commission." (*Id.* at 79, "2013 Docket Request.") Exhibit 4 is a 2018 ACC internal memorandum docket opening request for "possible modifications to the [ACC's] energy rules" related to at least fourteen different energy and energy-related topics. (*Id.* at 81-85, "2018 Docket Request.") The District argues judicial notice is appropriate because Exhibits 2-4 are "public records that directly implicate Plaintiffs' federal and state antitrust [claims] [sic] regarding the Arizona Legislature's intent regarding competition" and relate to the District's state-action immunity defense. (Req. at 5.) The District also cites a case that previously took notice of ACC documents. (*Id.* (citing *Robinson v. Heritage Elementary Sch., No. CV-09-0541-PHX-LOA, 2009 U.S. Dist. LEXIS 50396, 2009 WL 1578313, at *1 n. 3 (D. Ariz. June 3, 2009))*. Plaintiffs argue judicial notice is inappropriate for each Exhibit. They argue the Staff Report was "created as part of proceedings that do not apply to the parties in this case, and contains hearsay and non-expert opinions." (R.Resp. at 6.) Second, they argue the 2013 and 2018 Docket Requests "lack any substance and only reflect the opening of a regulatory docket."[3] (*Id.*) Plaintiffs also cite a court order from this District *not* judicially noticing an ACC staff report and administrative **[**14]** memoranda. (*Id.* at 5) (citing *SolarCity Corp. v. Salt River Project Agric. Improvement & Power Dist., No. CV-15-00374-PHX-DLR, 2015 U.S. Dist. LEXIS 146904, 2015 WL 6503439, at *3 (D. Ariz. Oct. 27, 2015))*. In general, Plaintiffs dispute the District's characterization of what each Exhibit represents." (R.Resp. at 7.) Considering these Exhibits is inappropriate as they are reasonably disputed by the parties.

C. 2014 Price Proposal Notice; Proposed SEPP Adjustments; Executive Summary; 2018 Price Proposal Notice; Third-Party Report (Exhibits 5-9)

Exhibit 5 is a 2014 self-created SRP price proposal notice. (Doc. 15-2 at 87-88, "2014 Price Proposal Notice.") Exhibit 6 is a 2014 self-created SRP report titled "Proposed Adjustments to SRP's [SEPPs] Effective with the April 2015 Billing Cycle." (*Id.* at 90-276, "Proposed SEPP Adjustments.") Exhibit 7 is a 2015 self-created SRP executive summary related to SRP's price proposal. (Doc. 15-3 at 2-13, "Executive Summary.") Exhibit 8 is a 2018 self-created SRP pricing proposal notice. (*Id.* at 15-16, "2018 Price Proposal Notice.") Exhibit 9 is a 2014 report prepared by Sussex Economic Advisors titled "Review of Proposed Adjustments to [SRP's SEPPs]." (*Id.* at 18-114, "Third-Party Report.") The District requests judicial notice that Exhibits 5-9 "were part of the record during **[**15]** the public ratemaking proceeding." (Req. at 6.). It argues these self-created "public documents . . . have procedural significance to the ratemaking proceeding" and "directly relate to Plaintiffs' **[*1081]** allegations regarding the District's justifications for adopting the challenged E-27 rate." (*Id.*) Plaintiffs again dispute the truth of the matters asserted in these documents, particularly because SRP created these documents and the District has "cherry-

[3] Plaintiffs alternatively do not object to judicially noticing Exhibits 3 and 4 for the assertion that the ACC opened a docket in 2013 and 2018 respectively. (*Id.*)

picked" them from the ratemaking proceeding. (R.Resp. at 7-9.) Exhibits 5-8 are self-created documents, Exhibit 9 is a third-party report, and each Exhibit is reasonably disputed. Even noticing them for the fact that they were "part of the record during the public ratemaking proceeding" is improper because, as Plaintiffs assert, these documents are not the complete record. Accordingly, judicial notice is inappropriate here.

D. Auditor General Report (Exhibit 10)

Exhibit 10 is a 2008 Arizona Auditor General Office report: "Review of Arizona Revised Statutes (A.R.S.) *§§30-806(I)*, and *40-202(B)(3)* and *(5)* related to electric competition." (Doc. 15-3 116-120, "Auditor General Report.") The District argues judicial notice is appropriate because the Auditor General Report **[**16]** "is (1) a public record prepared in the official capacity of the Auditor General at the direction of the legislature, (2) directly relates to Plaintiffs' allegations and the District's defenses, (3) is publicly available through the Auditor General's website, and (4) is not subject to reasonable dispute." (Req. at 7-8.) Plaintiffs argue judicial notice is inappropriate because the Auditor General Report "does not directly relate to the matters at issue, and because the truth of the matters asserted [(the status of electric competition)] is disputed." (R.Resp. at 3, 8.) Because the status of electric competition is at issue, judicially noticing a document on the topic is inappropriate.

Review of each Exhibit (except Exhibit 1) under the incorporation-by-reference doctrine and *Rule 201* reveals their consideration at this stage is inappropriate. For the most part, the Exhibits "merely create[] a defense" for the District. *Khoja, 899 F.3d at 1002*. Further, they lack *Rule 201*'s "high degree of indisputability," *Rivera, 395 F.3d at 1151*, necessary to dispense with the traditional methods of introducing evidence at trial. Notably, we are currently at the motion to dismiss stage. Accordingly, the Court only judicially notices Exhibit 1.

III. LEGAL STANDARD [17]**

When analyzing a complaint under *Rule 12(b)(6)*, well-pled factual allegations are presumed true and construed in the light most favorable to the nonmoving party. *Cousins v. Lockyer, 568 F.3d 1063, 1067 (9th Cir. 2009)*. Dismissal under *Rule 12(b)(6)* "can be based on the lack of a cognizable legal theory or the absence of sufficient facts alleged under a cognizable legal theory." *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1988)*. To survive a *Rule 12(b)(6)* motion to dismiss for failure to state a claim, a complaint must meet *Rule 8(a)(2)*'s minimum requirements. *Rule 8(a)(2)* requires a "short and plain statement of the claim showing that the pleader is entitled to relief," so that the defendant has "fair notice of what the . . . claim is and the grounds upon which it rests." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*. A complaint setting forth a cognizable legal theory will survive a motion to dismiss if it contains sufficient factual matter stating a claim to relief that is "plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*). Facial plausibility only exists if the pleader sets forth "factual content that allows the court to draw the reasonable inference that the defendant is **[*1082]** liable for the misconduct alleged." *Id.* "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id.* Plausibility does not equal "probability," but instead requires **[**18]** "more than a sheer possibility that a defendant has acted unlawfully." *Id.* "Where a complaint pleads facts that are 'merely consistent' with a defendant's liability, it 'stops short of the line between possibility and plausibility of entitlement to relief.'" *Id.* (quoting *Twombly, 550 U.S. at 557*).

IV. DISCUSSION

The FAC alleges nine causes of action against the District. (FAC ¶¶ 120-195.) These include: (1) monopolization and attempted monopolization in violation of the *Sherman Antitrust Act* and the *Arizona Uniform State Antitrust Act* ("AUSAA"); (2) price discrimination in violation of Arizona's constitution and statutes; (3) violation of equal protection under *42 U.S.C. § 1983* and Arizona's constitution; and (4) violation of *Arizona's Consumer Fraud Act*. (*Id.*) Plaintiffs request compensatory damages, class certification, appointment as class representatives and class counsel, treble damages, attorney fees, injunctive relief, and declaratory relief. (*Id.*)

The District moves to dismiss primarily on seven grounds: (A) the action is barred as an improper collateral attack on retail electricity rates; (B) state-action immunity bars the antitrust claims; (C) the equal protection claims are untimely; **[**19]** (D) *Arizona's Actions Against Public Entities and Public Employees Act* bars the state-law claims; (E) state law bars Plaintiffs' state antitrust claims; (F) the Local Government Antitrust Act ("LGAA") and Arizona statutory immunity bar damages against the District; and (G) the FAC fails to state a claim. (Memo. at 15-16.) The Court begins with the District's defenses before discussing the FAC's sufficiency.

V. THE DISTRICT'S DEFENSES

As further explained below, this action is not barred as an improper collateral attack under the federal or state filed-rate doctrines, nor does state-action immunity bar Plaintiffs' antitrust claims. Further, Plaintiffs' state law claims are barred under *A.R.S. § 12-821* and *§ 12-821.01* and their *Fourteenth Amendment* equal protection claims are untimely. Lastly, the LGAA bars Plaintiffs' potential entitlement to antitrust damages arising out of their remaining federal antitrust claims. After the District's defenses, only Plaintiffs' two federal antitrust claims remain.

A. Plaintiffs' Action is Not an Improper Collateral Attack.

The District asserts the filed-rate doctrine bars Plaintiffs' action.[4] (Memo. at 21.) Relatedly, it claims *A.R.S. §§ 30-810 - 812* effectively codifies the filed-rate doctrine in Arizona and alternatively bars Plaintiffs' state-law claims. (*Id.* at 23.) The Court finds **[**20]** neither argument persuasive at this stage.

1. The Filed-Rate Doctrine is Inapplicable.

"In short, the federal filed rate doctrine applies when federal statutes create a federal regulatory scheme for setting federal rates." *Castillo v. Johnson, No. CV-17-04688-PHX-DLR, 2019 U.S. Dist. LEXIS 151067, 2019 WL 4222289, *3 (D. Ariz. Sept. 5, 2019)*. The filed-rate doctrine "precludes interference with the rate setting authority of an administrative agency." *SolarCity Corp., 2015 U.S. Dist. LEXIS 146904, 2015 WL 6503439, at *14* (quoting *Wah Chang v. Duke Energy Trading & Mktg., 507 F.3d 1222, 1225 (9th Cir. 2007))*. In **[*1083]** particular, the doctrine insulates a federal regulatory agency's reasonable rates from challenge. *Id.* (citing *Ark. La. Gas Co. v. Hall, 453 U.S. 571, 577, 101 S. Ct. 2925, 69 L. Ed. 2d 856 (1981))*. The doctrine "applies with equal force to challenges brought 'under state law and federal antitrust laws to rates set by *federal agencies*." *E. & J. Gallo Winery v. EnCana Corp., 503 F.3d 1027, 1033 (9th Cir. 2007)* (emphasis added). "To permit recovery under state law would allow a state court (or a federal court applying state law) to undermine the authority of a federal agency[.]" *Cty. Of Stanislaus v. Pacific Gas and Elec. Co., 114 F.3d 858, 863 (9th Cir. 1997)* (citing *Ark. La. Gas Co., 453 U.S. at 582*).

In addition to shielding federal agencies, some states, *excluding* Arizona, apply the filed-rate doctrine to state agencies. *SolarCity Corp., 2015 U.S. Dist. LEXIS 146904, 2015 WL 6503439, at *14* (citing *Qwest Corp. v. Kelly, 204 Ariz. 25, 59 P.3d 789, 800 (Ariz. Ct. App. 2002))*; *see also* *Johnson v. First Am. Title Ins. CO., No. CV-08-01184-PHX-DGC, 2008 U.S. Dist. LEXIS 93415, 2008 WL 4850198, at *4 (D. Ariz. 2008)* (Arizona "has never adopted the filed-rate doctrine"). "Arizona courts have not expressly adopted the filed rate doctrine." *Castillo, 2019 U.S. Dist. LEXIS 151067, 2019 WL 4222289, *4*; *see Id.* at 4-6 (exhaustively discussing how Arizona has *not* adopted **[**21]** the filed-rate doctrine). "When state-law regulatory authority provides the basis of the filed rate doctrine, the doctrine should be based on a careful analysis of the text and purpose of the underlying state law, rather than blanket application of the filed rate doctrine to all challenges which touch a regulated industry."

---

[4] The District distinguishes, albeit in a footnote, the federal and state filed-rate doctrines. (*See* Memo. at 22 n.10) ("Arizona has effectively adopted the filed rate doctrine legislatively.")

Perryman v. Litton Loan Servicing, LP, No. 14-CV-221-JST, 2014 U.S. Dist. LEXIS 140479, 2014 WL 4954674, at *6 n.4 (N.D. Cal. Oct. 1, 2014).

The District claims the filed-rate doctrine entirely bars Plaintiffs' lawsuit because each claim "in some way collaterally attacks the E-27 rate on the ground that the rate is too high, discriminatory, or unreasonable." (Memo. at 21.) Plaintiffs claim the doctrine is inapplicable because (1) "[the District] does not file rates with a regulatory agency tasked with determining their reasonableness nor is it a 'regulatory agency' of the type that may implicate the doctrine"; (2) "Arizona has 'never adopted the filed-rate doctrine'"; and (3) "even if Arizona recognized the filed-rate doctrine, [it] is not implicated in this case because Plaintiffs do not challenge the reasonableness [sic] of [the District's] E-27 rates." (Resp. at 15-16). The District acknowledges Arizona has not adopted the filed-rate doctrine for its state **[**22]** agencies, but requests the Court apply it anyway.[5] (Repl. at 12.) The District also acknowledges the doctrine prevents courts from usurping functions assigned to a *federal regulatory body*. (*Id.* at 10.) The Court finds the filed-rate doctrine inapplicable here.

The filed-rate doctrine is inapplicable for three main reasons. First, it generally protects rates supervised by *federal* regulatory agencies, such as the Federal Energy Regulatory Commission. *See* Cty. of Stanislaus, 114 F.3d at 863. There are no allegations that a federal or state agency directly oversees the District's rate setting. Instead, and to the contrary, the FAC alleges the District is exempt from even the ACC's regulatory authority in Arizona. (FAC ¶ 37.) Second, as both parties agree, Arizona has not adopted the filed-rate doctrine to insulate its state agencies' ratemaking authority. *See* Johnson, 2008 U.S. Dist. LEXIS 93415, 2008 WL 4850198, at *4 (Arizona "has never adopted the filed-rate doctrine"). Regardless of why Arizona has not adopted this doctrine, **[*1084]** the Court declines to adopt it on Arizona's behalf. Third, Plaintiffs' claims do not "necessarily hinge on a claim that the . . . approved rate was too high and would, therefore, undermine [ratemaking] authority through the medium of direct court actions," Wah Chang, 507 F.3d at 1226. To be sure, Plaintiffs **[**23]** do not challenge the rate as being too high or too low. Nor do they seek Court assistance recalculating the District's precise electricity rates, which is what the filed-rate doctrine seeks to eliminate. Instead, Plaintiffs' allegations appear to be challenging *how* the District treats its solar generating customers, not *at what rate* they are being charged. Thus, dismissal under this doctrine is inappropriate here.

2. A.R.S. §§ 30-810 - 812 Poses No Bar to Plaintiffs' State - Law Claims.

The District next claims Arizona's legislature codified the filed-rate doctrine's underlying principles by barring collateral attacks under Arizona law on the Board's ratemaking decisions. (Memo. at 23 (citing A.R.S. §§ 30-810 - 812)). In particular, the District claims section 30-810(B) bars Plaintiffs' state law claims.[6] (*Id.*) That section states: "[n]o claim . . . shall accrue in any court to any party or the state *unless the party* or the state makes, before the effective date of the order or decision, application to the governing body of the public power entity for a rehearing." A.R.S. §§ 30-810(B) (emphasis added). Only a "party to the [underlying] action or proceeding . . . may apply for a rehearing." A.R.S. § 30-810(A). Plaintiffs claim exemption from this procedure because they were not a "party to the **[**24]** action or proceeding" since they installed solar panels *after* the E-27 rates were adopted and therefore could not apply for rehearing. (Resp. at 16-17.) Plaintiffs also claim they were not a "party" to the proceeding because they did not register as one with the District. (*Id.* at 18.)

As an initial matter, the Court refuses to resolve the factual question of whether each Plaintiff was a "party to the action or proceeding" at this stage. Moreover, in addition to the notion that Arizona courts have not yet adopted the filed-rate doctrine to insulate its state regulatory agencies, the Court refuses to find, as the District requests, that this statutory scheme codifies the Arizona legislature's intent to adopt the filed-rate doctrine for *every* state law claim brought against the District in the retail electricity market. *See* Castillo, 2019 U.S. Dist. LEXIS 151067, 2019

[5] The District acknowledges this by speculating about why Arizona has not adopted the filed-rate doctrine in arguing that the "issue likely remains unresolved in Arizona courts because state law independently forecloses collateral attacks on filed rates." (Repl. at 12.)

[6] The District cites only A.R.S. § 30-810(A), but it appears it is also citing A.R.S. § 30-810(B).

WL 4222289, at *5 (Even "assuming Arizona has adopted a form of the doctrine, it is unclear whether it would apply to the type of conduct at issue here."). Even assuming the filed-rate doctrine exists under Arizona law because of the cited statutory scheme, the District fails to show how any single state law claim is barred by it, let alone all of Plaintiffs' state law claims. Accordingly, the **[**25]** District has failed to show how this statutory scheme bars Plaintiffs' state law claims.

In conclusion, the federal filed-rate doctrine is inapplicable to this case. Additionally, the District has failed to show how A.R.S. §§ 30-810 - 812 is a disguised attempt by the Arizona legislature at adopting the filed-rate doctrine to insulate Arizona agencies or how determining whether Plaintiffs were a "party" is not a factual question. Accordingly, neither defense is persuasive at this stage.

B. State-Action Immunity is Inapplicable.

Every state action immunity analysis begins with *Parker v. Brown, 317 U.S. 341, 350-51, **[*1085]** 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 38, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)* (citing *Parker, 317 U.S. at 350-51*. In *Parker*, the Supreme Court "refused to construe the Sherman Act as applying to the anticompetitive conduct of a State acting through its legislature." *Hallie, 471 U.S. at 38* (citing *Parker, 317 U.S. at 350-51*). "State-action immunity is the exception rather than the rule." *Chamber of Commerce of the United States of Am. v. City of Seattle, 890 F.3d 769, 781 (9th Cir. 2018)*. If applicable, state-action immunity bars antitrust claims against qualifying entities. *Cost Mgmt. Servs. Inc. v. Wash. Nat. Gas Co., 99 F.3d 937, 943 (9th Cir. 1996)* (federal antitrust claims); *Mothershed v. Justices of the Sup. Ct., 410 F.3d 602, 609 (9th Cir. 2005)* (Arizona antitrust claims).

"[W]hen the entity responsible . . . is a literal arm of the state[,] the doctrine's applicability is obvious." *Dakota Territory Tours ACC v. Sedona-Oak Creek Airport Auth. Inc., 383 F. Supp. 3d 885, 896-97 (D. Ariz. Apr. 10, 2019)* (citation omitted). However, "state-action immunity is all the more exacting when . . . the activity at issue is not directly that of the State **[**26]** itself, but rather is carried out by others pursuant to state authorization." *City of Seattle, 890 F.3d at 781* (citing *F.T.C. v. Phoebe Putney Health Sys., Inc., 568 U.S. 216, 225, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013)* (quotation and citation omitted)). In *Cal. Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*, the Supreme Court articulated a "two-part test applicable to instances where private parties participate in a price-fixing regime." *F.T.C. v. Ticor Title Ins. Co., 504 U.S. 621, 633, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992)* (citing *Midcal Aluminum, Inc., 445 U.S. at 105*). Under *Midcal*, "[a] state law or regulatory scheme cannot be the basis for antitrust immunity unless, first the State has articulated a clear and affirmative policy to allow the anticompetitive conduct,[7] and second, the State provides active supervision of anticompetitive conduct undertaken by private actors." *Ticor, 504 U.S. at 631 (1992)* (citing *Midcal Aluminum, Inc., 445 U.S. at 105*). However, "[l]ocal government entities, 'unlike private parties, . . . are not subject to the 'active state supervision requirement' because they have less of an incentive to pursue their own self-interest under the guise of implementing state policies." *Phoebe Putney Health Sys., 568 U.S. at 226* (citing *Hallie, 471 U.S. at 46-47*). But "the need for supervision turns not on the formal designation given by States to regulators but on the risk that active market participants will pursue private interests in restraining trade." *North Carolina State Bd. of Dental Exam'rs v. FTC, 574 U.S. 494, 135 S. Ct. 1101, 1114, 191 L. Ed. 2d 35, 191 L. Ed. 2d 35 (2015)*.

1. *Midcal*'s First Requirement is Not Satisfied: Arizona Has Not Articulated a Clear and Affirmative Policy to Permit the Dis trict's Anticompetitive **[**27]** Conduct.

The Court begins its "uphill" analysis with the understanding that the Supreme **[*1086]** Court narrowly interprets state-action immunity. *See* *City of Seattle, 890 F.3d at 781* ("State-action immunity . . . is 'disfavored.'"). Here, both

---

[7] Under *Midcal*'s first factor, "a state legislature need not 'expressly state in a statute or its legislative history that the legislature intends for the delegated action to have anticompetitive effects.'" *Dakota Territory Tours ACC, 383 F. Supp. 3d at 897*. (citing *Hallie, 471 U.S. at 43*). Rather, this factor is met where anticompetitive effects are "the foreseeable result of what the statute authorizes." *City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 372-73, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)*.

parties dispute whether Arizona has articulated a clear and affirmative policy to allow the District's anticompetitive conduct in the retail electricity market. The parties further dispute whether the District's anticompetitive conduct was a foreseeable result of the Arizona legislature's adoption of various statutes on the issue. *See* Dakota Territory Tours ACC, 383 F. Supp. 3d at 897; *see also* City of Columbia, 499 U.S. at 372-73; *see also* Ticor, 504 U.S. at 631.

The District claims Arizona adopted a clear and affirmative policy to allow anticompetitive conduct by requiring the District to use a ratemaking process that is inherently anticompetitive.[8] (Memo. at 25 (citing Southern Motor Carriers Rate Conf., Inc. v. United States, 471 U.S. 48, 64, 105 S. Ct. 1721, 85 L. Ed. 2d 36 (1985)). The District further argues its status as a "natural monopoly" by Arizona's legislature was Arizona's attempt to foreclose competition in the retail electricity market. (*Id.* at 27 (citing A.R.S. § 9-516)).[9] Furthermore, even if Arizona's policy is unclear, the District claims Arizona intended to oust competition for the District by exempting it from antitrust liability under A.R.S. § 48-247.[10] (Memo. at 27-28.) Plaintiffs argue Arizona's legislature intended to promote competition by requiring **[**28]** that public power entities "open their entire service territories to competition," and "adopt a code of conduct to prevent anticompetitive activities that may result from the public power entity providing both competitive and noncompetitive services to retail electric customers." (Resp. at 23, 25 (citing A.R.S. § 30-803(A) and (F)). Plaintiffs also cite A.R.S. § 40-202, which first acknowledges an existing anticompetitive retail electricity market and then states: "It is the public policy of [Arizona] that a competitive market shall exist in the sale of electric generation service."

The numerous, conflicting statutes cited by the parties belie any adoption of a clear and affirmative policy or foreseeable result of a statute permitting anticompetitive conduct in the retail electricity market. If anything, the statutes signal a shift by Arizona's legislature to *promote* competition in the retail electricity market in the future. *Compare* A.R.S. § 40-202 ("It is the public policy of [Arizona] that a competitive market shall exist in the sale of electric generation service.") *with* A.R.S. § 9-516(A) ("It is declared as a public policy of the state that when adequate public utility service under authority of law is being rendered in an area, **[**29]** . . . a competing service and installation shall not be authorized."). The fact that competition may or may not have materialized is not the question here. (*See* Memo. at 29) ("[T]he ACC has not elected to move forward with retail competition of any sort."). Rather, the Court looks to whether Arizona clearly and affirmatively ousted competition, which these statutes surely do not indicate such a thing.

[*1087] Furthermore, just because Arizona's legislature requires that the District use ratemaking does not necessarily mean a clear and affirmative policy to allow anticompetitive conduct in the retail electricity market exists. *See* City of Seattle, 890 F.3d at 782 ("The state's authorization must be plain and clear."). Regardless of whether ratemaking is "inherently anticompetitive," as the District argues, (Memo. at 25-26), Arizona's requirement that the District use ratemaking does not mean it intended to affirmatively permit the District's allegedly anticompetitive conduct. In light of the conflicting statutes above declaring Arizona's policy relating to retail electricity market competition, the Court is hesitant to infer a policy one way or the other. Although state-action immunity is a legal question, Arizona's legislature, not the Court, must **[**30]** clearly and affirmatively establish a policy to promote the District's anticompetitive conduct. It is not the Court's role to unnecessarily *assume* a policy exists when the test

[8] Section 30-802 defines the procedures for public notice, hearings, comments, and votes before a public power entity adopts terms and conditions for *competition* in the retail sale of electric generation service. *See* A.R.S. § 30-802(A). Entities' rates must also be reasonable. *See* A.R.S. § 30-805.

[9] The District cites § 9-516(A) in support, which states: "It is declared as the public policy of the state that when adequate public utility service under authority of law is being rendered in an area, . . . a competing service and installation shall not be authorized . . . by a city or town[.]" A.R.S. § 9-516(A).

[10] The District cites § 48-247, which exempts "conduct or activity of a district . . . approved by a statute of [Arizona]" from antitrust liability.

requires a "plain and clear" authorization from the state. *See* City of Seattle, 890 F.3d at 782. Accordingly, state-action immunity is inappropriate.[11]

C. Plaintiffs' Fourteenth Amendment Equal Protection Claims are Untimely.

Arizona's statute of limitations governs Plaintiffs' federal equal protection claims.[12] *See* Wilson v. Garcia, 471 U.S. 261, 276-80, 105 S. Ct. 1938, 85 L. Ed. 2d 254 (1985). Arizona's personal injury statute of limitations is "two years after the cause of action accrues, and not afterward." A.R.S. § 12-542. "A statute of limitations under § 1983 . . . begins to run when the cause of action accrues, which is when the plaintiffs know or have reason to know of the injury that is the basis of their action." RK Ventures, Inc. v. City of Seattle, 307 F.3d 1045, 1058 (9th Cir. 2002) (citing Cabrera v. City of Huntington Park, 159 F.3d 374, 379 (9th Cir. 1998)). To determine when a cause of action accrues, courts look to when the "operative decision" occurred. Chardon v. Fernandez, 454 U.S. 6, 8, 102 S. Ct. 28, 70 L. Ed. 2d 6 (1981). Inevitable consequences resulting from the operative decision are not separately actionable. RK Ventures, 307 F.3d at 1058.

The question is when the "operative decision" occurred. The District argues Plaintiffs' equal protection claims "accrued no later than 2015 when the E-27 rate was adopted." (Memo. at 37-38.) Plaintiffs argue the claims accrued "when they subsequently **[**31]** purchased their solar energy systems and became subject to the discriminatory E-27 [sic] rate." (Resp. at 34.) Plaintiffs further argue "new claims accrue each month that they [are] charged the E-27 rates." (*Id.*) Plaintiffs filed this action on February 22, 2019. (Doc. 1.) The Court agrees with the District.

The "operative decision" is the Board's approval of the SEPPs on February 26, 2015. (FAC ¶ 73.) Plaintiffs, presumably already District customers because "all customers within [the Market] generally must purchase some retail electricity from [the District]," (*id.* ¶ 52), knew or reasonably knew the SEPPs were adopted at that time. *See* RK Ventures, 307 F.3d at 1058. Plaintiffs' statute of limitations does not sit idle until they decide to **[*1088]** install solar panel systems after the SEPPs were adopted. This result would be absurd. District customers could essentially challenge the SEPPs in perpetuity by simply waiting to install solar energy systems until they were ready to file a lawsuit. Similarly, recurring monthly bills are inevitable consequences of the initial "operative decision" and do not toll the statute of limitations. RK Ventures, Inc., 307 F.3d at 1058. This too would allow lawsuits in perpetuity. Thus, Plaintiffs' Fourteenth Amendment equal protection claims **[**32]** are untimely.

D. Arizona's Actions Against Public Entities and Public Employees Act Bars Plaintiffs' State Law Claims.

Section 12-821.01 states:

> Persons who have claims against a public entity . . . shall file claims with the person or persons authorized to accept service for the public entity . . . within one hundred eighty days after the cause of action accrues. The claim shall contain facts sufficient to permit the public entity . . . to understand the basis on which liability is claimed. The claim shall also contain a specific amount for which the claim can be settled and the facts supporting that amount. Any claim that is not filed within one hundred eighty days after the cause of action accrues is barred and no action may be maintained thereon.

A.R.S. § 12-821.01. "The purpose of [§ 12-821.01's] notice requirement is to allow the public entity or employee to 'investigate and assess liability,' to 'permit the possibility of settlement prior to litigation,' and to 'assist the public

---

[11] *Midcal*'s second requirement for state-action immunity is not addressed here since Arizona has not adopted a clear and affirmative policy to permit the District's anticompetitive conduct. The Court renders no judgment on whether the District is exempt from *Midcal*'s "active supervision" requirement.

[12] Neither party disputes whether A.R.S. § 12-542 governs Plaintiffs' Fourteenth Amendment equal protection claims brought under 42 U.S.C. § 1983.

entity in financial planning and budgeting.'" *Payne, 2009 U.S. Dist. LEXIS 110553, 2009 WL 3756679, *11* (quoting *Falcon v. Maricopa Cty, 213 Ariz. 525, 527, 144 P.3d 1254, 1256 (2006))*. Section 12-821.01's requirements are strictly applied. *See* *Nored v. City of Tempe, 614 F. Supp. 2d 991, 996 (D. Ariz. Jun. 26, 2008)*; *see also* *Deer Valley Unified Sch. Dist. No. 97 v. Houser, 214 Ariz. 293, 298 n. 6 152 P.3d 490, 496 n.6 (2007)*.

As the statute explicitly states, "*A.R.S. § 12-821.01* requires persons who have claims against a public entity . . . to file a notice of claim with the person **[**33]** authorized to accept service within 180 days after the accrues." *Mothershed, 2006 U.S. Dist. LEXIS 6968, 2006 WL 381679, at *6*. Any claim filed more than 180 days after the cause of action accrues "is barred and no action may be maintained thereon." *See* *Stulce v. Salt River Project Agr. Imp. & Power Dist., 197 Ariz. 87, 90, 3 P.3d 1007, 1010 (Ct. App. 2000)*. In addition to *A.R.S. § 12-821.01*'s time limit, it also requires a notice of claim adhere to certain substantive requirements. *Id.* For instance, the notice of claim "shall contain facts sufficient to permit the public entity . . . to understand the basis on which liability is claimed [and] . . . a specific amount for which the claim can be settled and the facts supporting that amount." *Id.* "[A] genuine issue of material fact . . . as to whether the requirements of this section have been complied with . . . shall be resolved before a trial on the merits and at the earliest possible time." *Id.*

The District claims that *A.R.S. § 12-821.01*'s compels dismissal of Plaintiff's state law claims. (Memo. at 31-32.) Plaintiffs claim *A.R.S. § 12-821.01* does not apply in federal court, but that if it does, it is satisfied here. (Resp. at 27-29.) Again, *§ 12-821.01* applies in federal court. *See* *Mothershed, 2006 U.S. Dist. LEXIS 6968, 2006 WL 381679, at *7* ("federal courts entertaining state-law claims against state entities are obligated to apply the state law notice-of-claim provision"); *see also* *Payne, 2009 U.S. Dist. LEXIS 110553, 2009 WL 3756679, at *11* ("*§ 12-821.01* applies to all state law claims."). The Court **[**34]** agrees with the District.

As a preliminary matter, the FAC omits any allegations that Plaintiffs even filed **[*1089]** the requisite notice of claim. *See* *Mothershed, 2006 U.S. Dist. LEXIS 6968, 2006 WL 381679, at *6* ("The Plaintiff's Complaint does not allege that . . . the Plaintiff has ever filed the requisite notice of claim."). In fact, the Notice is only before the Court because the *District* requested it be judicially noticed. But even if the FAC contained such allegations, Plaintiffs' Notice lacks a "specific amount for which the claim[s] can be settled and the facts supporting that amount." *A.R.S. § 12-821.01*. The Notice instead includes a brief set of facts, a draft of the complaint, and four settlement conditions. (Doc. 15-2 at 2-3.) The settlement conditions require (1) that the District repeal the E-27 rate; (2) declaratory relief *entered by the court* that the District's conduct is illegal; (3) monetary relief of $1.64 per day per individual for an undefined class; and (4) attorney fees to be determined at a later date. (*Id.* at 3.) All four conditions are prerequisites for Plaintiffs' settlement. (*Id.*) Plaintiffs also explicitly state they "are not willing to settle their individual or class claims absent injunctive and declaratory relief for the entire Class." (*Id.*)

[**35] *Estrada v. City of San Luis is especially instructive here. No. CV-07-1071-PHX-DGC, 2007 U.S. Dist. LEXIS 86606, 2007 WL 4025215 (D. Ariz. Nov. 15, 2007)*. In *Estrada*, the court dismissed plaintiffs' state law claims because their notice of claim under *§ 12-821.01* lacked sufficient facts supporting their theory of liability and damages claimed. *2007 U.S. Dist. LEXIS 86606, [WL] at *5*. The *Estrada* court reasoned that *§ 12-821.01* "requires that claimants explain the amounts identified in the claim by providing the government entity with a factual foundation to permit the entity to evaluate the amount claimed." *Id.* (quotations omitted). The *Estrada* court found plaintiffs' notice of claim lacked any indication how they reached the "lump sum" figures included in their notice of claim or what damages stemmed from each of their various fifteen state law claims against defendants. *Id.* The notice of claim's lack of information, the court reasoned, prevented defendant from properly evaluating settlement alternatives and therefore required dismissal of plaintiffs' state law claims. *Id.*

Plaintiffs' Notice similarly lacks sufficient information to permit the District to settle Plaintiffs' claims. Except for the District repealing the E-27 rate, which alone is insufficient to permit settlement, the Notice requests declaratory relief from **[**36]** this Court, monetary relief of an uncertain amount for an unidentified number of class members, and an unspecified amount of attorney fees. (Doc. 15-2 at 3.) Unlike the *Estrada* plaintiffs who actually listed a lump sum, *id.*, Plaintiffs here omit any specific or total amount, let alone describe which damages stem from each of its nine causes of action. Furthermore, Plaintiffs' unwillingness to settle unless an entire unidentified class obtains relief directly contravenes *A.R.S. § 12-821.01*'s purpose of permitting settlement outside of the court, *see* *Payne,* 2009 U.S. Dist. LEXIS 110553, 2009 WL 3756679, *11. This vague Notice falls far short of A.R.S. § 12-821.01's strict standards and purposes.

Nevertheless, Plaintiffs' also claim exemption from identifying a "specific amount" because doing so would be a breach of the putative class representatives' fiduciary duties to the other class members.[13] (Resp. at 28-29 ("attempting to settle on an individual basis, to the exclusion of the absent class members, would be a breach of [a putative class representative's fiduciary] duties."). This is incorrect; the "specific amount" requirement applies to putative class actions as well. *See* City of Phoenix v. Fields, 219 Ariz. 568, 201 P.3d 529, 534 **[*1090]** (2009). As the District correctly argues, even a putative class representative's notice of claim must include **[**37]** a specific amount for which his individual claim can be settled. (Memo. at 31-32 (citing Fields, 201 P.3d at 534). In *Fields*, the Arizona supreme court explicitly held that "there is no exemption [from 821.01] for putative class claims," in rejecting the argument that "the representatives should be excused from including *any* specific settlement demand in their notice of claim." *Id.* (emphasis in original). While Plaintiffs are correct that § 12-821.01 does not demand a class representative to submit a settlement demand on behalf of the class, a class representative is still required to propose a specific amount for settling their own claim. *Id.* Unfortunately for Plaintiffs' state law claims, they do not propose such an amount in their Notice.

The Notice is also untimely under A.R.S. § 12-821 and A.R.S. § 12-821.01. *See* A.R.S. § 12-821 ("All actions against any public entity of public employee shall be brought within one year after the cause of action accrues and not afterward"); *see also* A.R.S. 12-821.01 ("Persons who have claims against a public entity . . . shall file claims . . . within one hundred eighty days after the cause of action accrues."). As discussed above, the cause of action accrued when the District adopted the SEPPs in 2015. Not only are Plaintiffs' claims inadequate under § 12-821's **[**38]** substantive requirements, but they are also untimely. Accordingly, Plaintiffs' state law claims are dismissed.[14]

E. The LGAA Bars Antitrust Damages.

The District claims the LGAA bars Plaintiffs' recovery of antitrust damages. (Memo. at 45.) The LGAA prohibits plaintiffs from recovering "damages, interest on damages, costs, or attorney's fees . . . from any local government." 15 U.S.C. § 35(a). "Local government" includes "a school district, sanitary district, or any other special function governmental unit established by State law in one or more States[.]" 15 U.S.C. § 34(1). The LGAA "provides absolute immunity when the terms of the statute are met" and "courts should strive to resolve the immunity issue as early as possible, with minimum of expense and time to the parties." Sandcrest Outpatient Servs., P.A. v. Cumberland, 853 F.2d 1139, 1148 n. 9 (9th Cir. 1988); *see also* Palm Springs Med. Clinic, Inc. v. Desert Hosp., 628 F. Supp. 454 (C.D. Cal. 1986). "[W]hether a defendant is entitled to absolute immunity is a question of law[.]" *Tennison v. City & Cty. Of S.F., 570 F.3d 1078, 1087 (9th Cir. 2008)*.

The District argues the LGAA shields it from antitrust damages because it is a "local government" entity. (Memo. at 45; Repl. at 25.) Plaintiffs argue the LGAA does not shield the District from antitrust liability and legislative history disfavors it. (Resp. at 44.) The Court agrees with the District and prior precedent finding the District immune from antitrust damages liability under **[**39]** the LGAA. *See* SolarCity, 2015 U.S. Dist. LEXIS 146904, 2015 WL 6503439, at *13-14.

F. Failure to State a Claim

---

[13] This case is not certified as a class action, but the Court assumes it is for purposes of this argument.

[14] As a result, the Court need not analyze whether (1) A.R.S. 48-247 bars Plaintiffs' state antitrust claims; or (2) A.R.S. § 12-820.01 immunizes the District from state law damages. Furthermore, the Court does not consider the parties' arguments regarding whether the LGAA bars *state* antitrust damages because Plaintiffs' state antitrust claims are barred by 12-821.01.

After reviewing the District's defenses, only two causes of action (monopolization; attempted monopolization) under 15 U.S.C. § 2 ("Sherman Act") are not barred.[15] (FAC ¶¶ 120-35.) As alleged, neither can **[*1091]** proceed because the FAC inadequately alleges antitrust injury caused by the District, a necessary element for monopolization and attempted monopolization claims.

1. Antitrust Claims

"Section 2 of the Sherman Act makes it unlawful for a person to monopolize or attempt to monopolize 'any part of the trade or commerce among the several States.'" Aerotec Int'l., Inc. v. Honeywell Int'l., Inc., 4 F. Supp. 3d 1123, 1136 (D. Ariz. 2014) (quoting 15 U.S.C. § 2). "The purpose of the Act is not to protect businesses from the working of the market; it is to protect the public from the failure of the market." Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 458, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993). Generally, "a section 2 monopolization claim consists of three elements: [(1)] possession of monopoly power in the relevant market; [(2)] willful acquisition or maintenance of that power; and [(3)] causal 'antitrust injury.'" Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919, 924 (9th Cir. 1980) (quoting Cal. Comput. Prods. v. Int'l Bus. Machines Corp., 613 F.2d 727, 735 (9th Cir. 1979)); *see also* MetroNet Servs. Corp. v. Qwest Corp., 383 F.3d 1124, 1130 (9th Cir. 2004).[16]

a. Plaintiffs Allege Monopoly Power in a Relevant Market.

The District does not challenge whether Plaintiffs allege monopoly power in a relevant market and Plaintiffs do not argue they do. Nevertheless, the FAC plausibly alleges the **[**40]** District's monopoly power in Phoenix's electricity market. (*See* FAC ¶¶ 42-59.) Specifically, the relevant market is the District's service territory in Arizona where they provide 95% of retail electricity; the product market is "the delivery and sale of electric power to residential and commercial consumers within [the District's] service territory"; self-generated solar power serves as a substitute for purchasing electricity from the District; and self-generating solar power customers deprive the District of electricity sales by creating their own electricity. (*Id.*)

b. Plaintiffs Allege Exclusionary Conduct.

In addition to monopoly power in a relevant market, "[i]t is settled law that [an antitrust violation] requires . . . 'the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'" Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004) (quoting United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)). Mere "possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive *conduct*." Trinko, LLP, 540 U.S. at 398 (emphasis in original); *see* Aerotec Int'l., 4 F. Supp. 3d at 1136-37. In fact, companies "may acquire monopoly power by establishing an infrastructure that renders them uniquely suited **[**41]** to serve their customer [without violating antitrust]." *Id.* "Section 2 claims may be premised upon predatory conduct that is aimed at achieving or maintaining a monopoly in a given market." **[*1092]** ICANN Transparency, Inc. v. VeriSign, Inc., 611 F.3d 495, 506 (9th Cir. 2010). Unlawful or exclusionary conduct satisfies this element. Grinnell, 384 U.S. at 576.

The District claims the FAC inadequately alleges this element because (1) higher prices for self-generating electricity customers; (2) above-cost price-setting; and (3) higher prices making solar power system economically unfeasible do not allege exclusionary conduct. (Memo. at 34-37.) The District further argues Plaintiffs' installation of

---

[15] Section 4 of the Clayton Act creates a private cause of action for antitrust violations, providing that "any person . . . injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefore." 15 U.S.C. § 15(a).

[16] Although attempted monopolization claims under section 2 of Sherman Act require slightly different elements than a pure monopolization claim, "causal antitrust injury" is required under both theories. *See* Rebel Oil Co., Inc. v. Atl. Richfield Co., 51 F.3d 1421, 1432-33 (9th Cir. 1995) ("To establish a Sherman Act § 2 violation for attempted monopolization, a private party seeking damages must demonstrate four elements: (1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct directed at accomplishing that purpose; (3) a dangerous probability of achieving 'monopoly power'; and (4) causal antitrust injury.")

solar energy systems after it adopted the SEPPs indicates the absence of exclusionary conduct. (Repl. at 20-21.) Plaintiffs argue this element is adequately alleged because the District purposely disincentivized consumers from installing solar energy systems by raising prices for post-2014 solar customers like Plaintiffs to maintain its electricity monopoly in Arizona. (Resp. at 31-33.)

The Court finds the FAC sufficiently alleges exclusionary conduct by the District. The FAC alleges a pricing scheme differentiating between self-generating solar energy customers and other customers with the sole purpose of fortifying its monopoly against **[**42]** the rising competitive threat of solar power. (FAC ¶ 81.) The FAC specifically alleges:

> Based on the dramatic pricing increase for solar customers subject to the E-27 plan, it is apparent that the purpose . . . is not to recoup reasonable grid-related costs from solar energy customers, but to prevent competition from solar energy systems by penalizing customers for installing these systems and creating disincentives to purchase or lease them [and] . . . resulted in a significant drop in new applications for the installation of solar energy systems in [the relevant market].

(*Id.* ¶¶ 84, 86.) These allegations adequately allege the District's "willful acquisition or maintenance of power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'" *Trinko, LLP, 540 U.S. 398, at 407, 124 S. Ct. 872, 157 L. Ed. 2d 823*. Moreover, Plaintiffs allege the District adopted the SEPPs to (1) deter the competitive threat of solar energy systems, (FAC ¶¶ 5-6, 84); (2) penalize solar energy investments to fortify the District's monopoly, (*id.* ¶¶ 5-10); (3) and force consumers to exclusively purchase electricity from the District by making solar energy system installation uneconomical, (*id.* ¶ 87). These allegations, **[**43]** if true, rise to the level of exclusionary conduct by the District to oust competition by solar energy system installers and users in the retail electricity market. Accordingly, Plaintiffs adequately allege exclusionary conduct.

c. Plaintiffs Inadequately Allege Antitrust Injury.

"Antitrust injury is defined not merely as an injury caused by an antitrust violation, but more restrictively as 'injury of the type of the antitrust laws were intended to prevent and that flows from that which makes [defendant's] acts unlawful.'" *Glen Holly Entm't, Inc. v. Tektronix, 352 F.3d 367, 371 (9th Cir. 2003)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. Antitrust laws protect against anticompetitive conduct, not competition in the marketplace. *U.S. v. Topco Assoc., Inc., 405 U.S. 596, 608, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*. Antitrust injury has four requirements: "(1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1054-55 (9th Cir. 1999)*. As stated by the Supreme Court:

> **[*1093]** Antitrust laws in general, and the Sherman Act in particular, are the Magna Carta of free enterprise. They are as important to the preservation of economic freedom and our free-enterprise systems as the *Bill of Rights* is to the protection of our fundamental personal freedoms.

Topco, 405 U.S. at 608. "One form of antitrust injury is "[c]oercive **[**44]** activity that prevents its victims from making free choices between market alternatives." *Glen Holly Entm't, 352 F.3d at 374* (citing *Amarel v. Connell, 102 F.3d 1494, 1509 (9th Cir. 1996))*. However, "[antitrust] injury, although causally related to an antitrust violation, nevertheless will not qualify as 'antitrust injury' unless it is attributable to an anti-competitive practice under scrutiny." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. This is because "[i]t is inimical to [the antitrust] laws to award damages' for losses stemming from continued competition." *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 109-110, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*.

The District argues Plaintiffs would have been harmed regardless of its adoption of the SEPPs. (Memo. at 34) ("even if rooftop solar competition had flourished after E-27, Plaintiffs' alleged injury would be the same."). In other words, the District argues its alleged restraint of competition (adopting the SEPPs) did not cause Plaintiffs' economic injuries. (Repl. at 20.) Plaintiffs argue antitrust injury is adequately alleged because they were (1) injured as electricity consumers and competitor and consumer antitrust injury differs; (2) charged higher rates to deter their solar energy investments; (3) and a prior competitor alleged antitrust injury. (Resp. at 29-31.) None of Plaintiffs' arguments persuade the Court that antitrust injury is alleged.

Instead, the Court agrees with the **[**45]** District that the FAC fails to allege antitrust injury. Undoubtedly, the FAC alleges harm to Plaintiffs occurring after the District adopted the SEPPs. (FAC ¶¶ 87, 90-92, 130.) For instance, the FAC alleges the SEPPs "made it economically unfeasible for customers to install solar energy systems" or, in other words, that self-generating solar energy was economically feasible before the District adopted the SEPPs. (*Id.* ¶ 92.) However, the FAC contains no allegations that the District unlawfully restrained competition, the principal evil of antitrust laws. If anything, the District's higher prices for solar energy customers *encourages* competition in alternative energy investment by allowing for new market entrants with its higher prices. Moreover, the FAC even concedes that "technologies that would allow consumers to completely remain off the grid are not yet economically viable." (*Id.* ¶ 52.) Indeed, the FAC alleges solar energy systems are *still* uneconomical. (FAC ¶ 92.) Thus, as the District correctly argues, its alleged anticompetitive conduct of adopting the SEPPs did not cause Plaintiffs' injury because they would have been harmed anyway from using an uneconomical product. Antitrust **[**46]** laws seek to eliminate injuries arising from anticompetitive conduct, not just market injuries tangentially related to antitrust violations from using uneconomical products. *See* *Topco Associates, Inc., 405 U.S. at 608*. Because the FAC lacks sufficient allegations relating to how Plaintiffs' injuries are attributable to any anticompetitive conduct, antitrust injury is inadequately alleged.[17]

[*1094] VI. LEAVE TO AMEND

"Dismissal is a harsh penalty and is to be imposed only in extreme circumstances." *Henderson v. Duncan, 779 F.2d 1421, 1423 (9th Cir. 1986)* (citing *Raiford v. Pounds, 640 F.2d 944, 945 (9th Cir. 1981)*. In accordance with well-settled law in the Ninth Circuit, the Court will grant Plaintiffs leave to amend their complaint because "it is not 'absolutely clear' that [Plaintiffs] could not cure [the amended complaint's] deficiencies by amendment." *See* *Jackson v. Barnes, 749 F.3d 755, 767 (9th Cir. 2014)* (citations omitted); *Fed. R. Civ. P. 15(a)(2)* ("leave to amend should be "freely" given "when justice so requires[]").

Accordingly, within thirty (30) days from the date of entry of this Order, Plaintiffs may submit an amended complaint addressing the deficiencies in claims 1 and 2. Plaintiffs must clearly designate on the face of the document that it is the "Second Amended Complaint." If Plaintiffs decides to file an amended complaint, they are reminded that an amended complaint **[**47]** supersedes the original complaint, *see* *Lacey v. Maricopa Cty., 693 F.3d 896 (9th Cir. 2012)*, and it must be complete in itself and "must not incorporate by reference any part of the preceding pleading, including exhibits," *L.R.Civ 15.1*. To be clear, Plaintiffs may only amend their complaint as it relates to their antitrust claims under the Sherman Act.

VII. CONCLUSION

In conclusion, the District's defenses are availing to the extent that they bar Plaintiffs' state law and *Fourteenth Amendment* equal protection claims and Plaintiffs cannot recover antitrust damages under the Sherman Act. More explicitly, the filed-rate doctrine and state-action immunity are inapplicable. As to the two residual claims that survive the District's defenses and not barred as a matter of law (monopolization and attempted monopolization

[17] The Court does not address whether Plaintiffs adequately allege antitrust standing because antitrust injury is not alleged. *See* *Glen Holly Entm't, 352 F.3d at 371-73* ("Only those who meet the requirements for 'antitrust standing' may pursue a claim under the Clayton Act; and to acquire 'antitrust standing,' a plaintiff must adequately allege and eventually prove 'antitrust injury.'"). Nevertheless, the Court agrees with the District that the "competitor, not the consumer [like Plaintiffs], is the party with antitrust standing to bring a claim of *attempted monopolization*." *Neagle v. Goldman Sachs Group, Inc., 2019 U.S. Dist. LEXIS 36517, 2019 WL 1102199, at * 12 (D. Or. Mar. 1, 2019)* (emphasis added).

under the Sherman Act), the FAC inadequately alleges antitrust injury, which is an essential element under ***antitrust law***. If Plaintiffs wish to file a second amended complaint to fix the deficiencies above as they relate to their antitrust claims under the Sherman Act, they may do so within thirty (30) days.

Accordingly,

IT IS ORDERED that the District's Motion, (Doc. 14), is **GRANTED** and claims 1 and 2 are dismissed with leave to amend, claims 3-9 are dismissed **[**48]** without leave to amend.

IT IS FURTHER ORDERED that the District's Request, (Doc. 15), is **GRANTED** as it relates to judicially noticing Exhibit 1, but denied as to the remaining exhibits;

IT IS FURTHER ORDERED that Plaintiffs may file a Second Amended Complaint within thirty (30) days of this Order. If Plaintiffs fail to file an amended complaint within thirty (30) days of this Order, the Clerk of Court is directed to terminate this action.

Dated this 10th day of January, 2020.

Judges: NICHOLAS G. GARAUFIS, United States District Judge.

Opinion by: NICHOLAS G. GARAUFIS

Opinion

[*401] MEMORANDUM & ORDER

NICHOLAS G. GARAUFIS, United States District Judge. **[**19]**

Plaintiffs bring claims against Defendants American Express Company and American Express Travel Related Services Company, Inc. (together, "Amex") on behalf of two putative classes: (1) a class of merchants who accept Amex cards pursuant to a Card Acceptance Agreement ("CAA") with Amex (the "Amex Class"); and (2) a class of merchants who do not accept Amex cards and who have no contract with Amex (the "Non-Amex Class"). (See Second Amended Consolidated Class Action Complaint ("SAC") (Dkt. 864).) Currently pending before the court are two motions: (1) Amex's motion to stay proceedings and compel arbitration of all the Amex Class's claims; and (2) Amex's motion to dismiss all of the Non-Amex Class's claims under *Federal Rules of Procedure 12(b)(1)* and *12(b)(6)*. (See Mot. to Compel & Mot. to Dismiss ("Mot.") (Dkt. 875).)

For the following reasons, Amex's motion to compel arbitration is GRANTED and its motion to dismiss is GRANTED as to the Non-Amex Class.

I. **BACKGROUND**

This action challenges non-discrimination provisions (the "Anti-Steering Rules") contained in the CAAs. (SAC ¶ 1.) Plaintiffs allege that the Anti-Steering Rules unreasonably restrain interbrand price competition among general purpose credit and charge card networks **[**20]** ("credit card networks") because they: "(1) stifle competition among the networks; (2) impose supracompetitive merchant fees, with corresponding offsetting credit card user economic benefits; (3) increase the overall price of credit card transactions above competitive levels; and (4) raise consumer retail prices throughout the country, thereby reducing output." (Id.)

The background of this case—including the procedural history, the restraints on competition, the workings of the credit-card market in general, and Amex's platform in particular, etc.—have been discussed at great length in this court's previous opinions in this matter and in the **[*402]** related case brought by the federal government. See *In re Am. Exp. Anti-Steering Rules Antitrust Litig., 361 F. Supp. 3d 324, 331-34 (E.D.N.Y. 2019)*; *In re Am. Exp. Anti-Steering Rules Antitrust Litig., No. 11-MD-2221 (NGG), 2016 U.S. Dist. LEXIS 3332, 2016 WL 748089, at *1-4 (E.D.N.Y. Jan. 7, 2016)*; *United States v. Am. Exp. Co. ("U.S. v. Amex"), 88 F. Supp. 3d 143, 149-67 (E.D.N.Y. 2015)*, rev'd, *838 F.3d 179 (2d Cir. 2016)*, aff d sub nom. *Ohio v. Am. Exp. Co. ("Ohio"), 138 S. Ct. 2274, 201 L. Ed. 2d 678 (2017)*. The court facts and aspects of the procedural history necessary to introduce and to decide the instant motion are laid out below.

A. The Parties

The class representatives fall into two groups. The representatives of the Amex Class, which accept Amex cards, are: (1) Animal Land, Inc., a Georgia corporation; (2) Il Form, Inc., a California **[**21]** corporation; (3) Italian Colors Restaurant, a California business; (3) Jasa Inc., a Louisiana corporation; (4) Lopez-Dejonge, Inc., an Alabama corporation; (5) Plymouth Oil Corp. d/b/a Liberty Gas Station, a Pennsylvania corporation, and (6) Clam Lake Partners, LLC (successor in interest to previous class representative Firefly Air Solutions, LLC), a Minnesota corporation. (Id. II 5-11). The representatives of the Non-Amex Class, which do not accept Amex cards, are: (1) Qwik Lube, LCC, a New York corporation and (2) LaJolla Auto Tech, Inc., a California corporation. (Id. ¶¶12-13.) Plaintiffs also assert the existence of two California Subclasses: A California Amex Subclass and a California Non-Amex Subclass. (Id. ¶ 104(c).) The California Amex Subclass is represented by Il Forno, Inc. and Italian Colors Restaurant, and the California Non-Amex Subclass is represented by LaJolla Auto Tech., Inc. (Id.) All Plaintiffs are merchants. (Id. ¶ 104.)

Defendant American Express Company is a New York corporation. (Id. ¶ 14.) Defendant American Express Travel Related Services Company, Inc. is a Delaware corporation with its principal place of business in New York, New York. (Id., ¶ 15.) It is **[**22]** a wholly owned subsidiary of American Express Company. (Id.)

B. The Relevant Market

Plaintiffs lay out two geographic markets: (1) the United States for Counts One, Two, and Three; and (2) California for Counts Four and Five. (SAC ¶ 22.) The relevant product market is the two-sided credit card market, including all transactions provided by Amex and its competitors, MasterCard, Discover, and Visa. (Id. ¶ 23.)

C. The Credit Card Industry

Amex is one of four significant competitors in the nationwide credit card market. (SAC 25.) The others are Visa, MasterCard, and Discover; in 2018, the Supreme Court described their market shares as Visa 45%, Amex 26.4%, MasterCard 23.3%, and Discover 5.3%. (Id. ¶ 51 (citing *Ohio, 138 S. Ct. at 2282*).) According to Plaintiffs, these market shares have not meaningfully changed in many years. (Id.)

Credit card companies provide services both to cardholders, who use the cards to purchase goods and services, and to merchants, who accept those cards as payment in exchange for goods and services. These credit card companies thus operate a two-sided platform, offering services to two, distinct groups (merchants and consumers) and facilitating transactions between them. See *Ohio, 138 S. Ct. at 2280*. Credit card **[**23]** companies need to make a sale to both sides of the market to succeed; after all, "no credit-card transaction can occur unless both the merchant and the cardholder agree to use the same credit-card network." Id. (See also SAC ¶ 18.) Amex **[*403]** offers services directly to both merchants and consumers. (SAC ¶ 27.)

As Plaintiffs allege, "[w]hen a consumer uses a credit card, the merchant's point of sale terminal transmits a record of the transaction to the card's network." (Id. ¶ 20.) The network then pays, or facilitates the payment of, money for that transaction to the merchant, consisting of the purchase price charged to the customer minus the fee that network or bank charges merchants. (Id.) Consumers may also pay fees to use their credit cards and get rewards for making purchases with a particular card. (Id. ¶ 21.) Unlike its competitors, who charge variable merchant fees depending on the particular card the individual consumer is using, "Amex charges a single, typically higher merchant fee for all Amex credit cards." (Id. ¶ 32.) Plaintiffs further allege that, unlike its competitors, "Amex's revenues are primarily dependent on its merchant fees." (Id. ¶ 34.)

D. The CAA

1. Relevant Version **[**24]** of the Agreement

According to Amex, the "current, operative" form of the CAA between Amex and the merchants in the Amex Class has been in effect since October 2018. (Mot. at 5.) Plaintiffs do not state whether they disagree or disagree with this assertion, but do note:

> In the [SAC], Plaintiffs assert that Amex arbitration agreements also state ". . . the arbitrator's authority to make awards is limited to awards to you and us alone." SAC ¶ 90. For years, this language was contained in the Amex arbitration agreement, but was removed by Amex in the 2018 edition of the agreement. Notwithstanding this change, the 2018 agreement continues to prohibit Plaintiffs from obtaining market-wide injunctive relief against Amex.

(Pls. Resp. Mem. in Opp'n to Mot. ("Opp'n") (Dkt. 879) at 2 n.6.) Amex does not dispute this characterization of the changes made in 2018, and agrees with Plaintiffs that the agreement prohibits Plaintiffs from obtaining market-wide injunctive relief (see Amex May 24, 2019 Letter (Dkt. 894)). The court will therefore cite to the 2018 version of the CAA Amex has provided. All members of the Amex Class are bound by this agreement. (See SAC ¶¶ 47, 90.)

2. Arbitration Provisions

[25]** The CAA provides, inter alia:

> You or we may elect to resolve any Claim by individual, binding arbitration.
> If arbitration is chosen by either party, neither you nor we will have the right to litigate that Claim in court or have a jury trial on that Claim. Further, you and we will not have the right to participate in a representative capacity or as a member of any class pertaining to any Claim subject to arbitration. . . . The arbitrator's decisions are as enforceable as any court order and are subject to very limited review by a court. Except as set forth below, the arbitrator's decision will be final and binding.

(2018 CAA (Dkt. 877-3) § 7.c.) The provision defines "Claim" as:

> [A]ny claim (including initial claims, counterclaims, cross-claims, and third-party claims), dispute, or controversy between you and us arising from or relating to the Agreement or prior Card acceptance agreements, or the relationship resulting therefrom, whether based in contract, tort (including negligence, strict liability, fraud, or otherwise), statutes, regulations, or any other theory, including any question relating to the existence, validity, performance, construction, interpretation, enforcement, or termination of the Agreement or prior Card acceptance agreements, or **[**26]** the **[*404]** relationship resulting thereform, except for the validity, enforceability, or scope of section 7.c of the General Provisions.

(Id. § 1.c.)

3. Anti-Steering Rules

Amex's Anti-Steering Rules provide that merchants may not:

- indicate or imply that they prefer, directly or indirectly, any Other Payment Products over [Amex] Card[s];
- try to dissuade cardholders from using [their Amex] Card;
- criticize or mischaracterize [the Amex] Card or any of [Amex's] services or programs;
- try to persuade or prompt cardholders to use any Other Payment Products or any other method of payment (e.g., payment by check);
- impose any restriction, conditions, or disadvantages when the Card is accepted that are not imposed equally on all Other Payment Products, except for ACH funds transfer, cash, and checks;
- engage in activities that harm [Amex's] business or the American Express Brand (or both);
- or promote any Other Payment Products (except the Merchant's own private label card that they issue for use solely at their Establishments) more actively than the Merchant promotes Amex.

(SAC ¶ 46.)

E. Related Actions

In 2008, some merchants first brought suit against Amex in this court (initiating the "MP Actions"). See *In re Amex, 2016 U.S. Dist. LEXIS 3332, 2016 WL 748089, at *2 & n.3*. **[**27]** Then, in October 2010, the Department of Justice and the attorneys general of eighteen states filed suit against Amex, MasterCard, and Visa (the "Government Action").[1] The Government Action proceeded to a bench trial during the summer of 2014., On February 19, 2015, the court found by a preponderance of the evidence that the specific NDPs challenged by the Government violate *Section 1 of the Sherman Act*. After receiving additional briefing from the parties to the Government Action, as well as other interested parties, the court issued a permanent injunction on April 30, 2015. United States. v. Am. Exp. Co., No. 10-CV-4496 (NGG), 2015 WL 1966352 (E.D.N.Y. Apr. 30, 2015), rev'd, *838 F.3d 179*, aff d sub nom. *Ohio, 138 S. Ct. 2274, 201 L. Ed. 2d 678*. The court denied Amex's motion to stay the permanent injunction pending appeal. United States v. Am. Exp. Co., No. 10-CV-4496 (NGG), 2015 WL 13735045 (E.D.N.Y. May 19, 2015). Amex then filed a notice of appeal and sought a stay pending appeal from the Second Circuit. Although a three-judge panel of the Second Circuit initially denied Amex's motion to stay (Order of USCA (Dkt. 687 in No. 10-CV-4496)), the Second Circuit ultimately entered a temporary stay of the permanent injunction and a temporary stay of the Government Action in this court (Order of USCA (Dkt. 697 in No. 10-CV-4496)).

[28]** On September 26, 2016, the Second Circuit reversed this court's judgment in the Government Action, holding that the court erred in excluding the market for cardholders from its definition of the relevant market. See *U.S. v. Amex, 838 F.3d at 197, 206-07*. Because the Second Circuit found that the Government could not, on the facts of the case, prove net harm to both cardholders and merchants, it directed this court to enter judgment in favor of Amex. *Id. at 207*. Certain state plaintiffs then **[*405]** sought certiorari, which the Supreme Court granted. *Ohio v. Am. Exp. Co., 138 S. Ct. 355, 199 L. Ed. 2d 261 (Mem)* (2017). On June 25, 2018, the Supreme Court affirmed the Second Circuit, holding that this court should have included both sides of the Amex platform when defining the relevant market. *Ohio, 138 S. Ct. at 2285-86*.

Following the Supreme Court's affirmance of the dismissal of the Government Action, matters resumed in the MP Actions. The court granted Amex's motion for partial summary judgment in January of 2019, see *In re Amex, 361 F. Supp. 3d at 347*, and the MP Actions were voluntarily dismissed with prejudice on April 12, 2019. (See Stip. & Order of Dismissal (Dkt. 213 in Case No. 08-CV-2315).)

F. The Consolidated Class Actions

---

[1] Visa and MasterCard entered into consent decrees with the Government on the same day that the Government Action was initiated; only Amex remained as a defendant. See *In re Amex, 2016 U.S. Dist. LEXIS 3332, 2016 WL 748089, at *2 n.5*.

The procedural history of the consolidated class actions is complex and need not be repeated in full here. For a detailed accounting of the development of the class action component of the litigation, see the court's 2015 Memorandum and Order denying approval of the Class Settlement Agreement (Aug. 4, 2015 Mem. & Order (Dkt. 657).) After a variety of stays and other proceedings, most notably the Supreme Court's decision in *Ohio, 138 S. Ct. 2274, 201 L. Ed. 2d 678*, Plaintiffs filed their Second Amended Consolidated Class Action Complaint (the "Second Amended Complaint") on December 17, 2018. (SAC.) The Second Amended Complaint asserts **[**29]** the following claims for relief: on behalf of the Amex Class for violation of *§ 1 of the Sherman Act*, based on the Anti-Steering Rules (SAC ¶¶ 111-22); on behalf of the Non-Amex class for violation of *§ 1 of the Sherman Act*, based on the Anti-Steering Rules (SAC ¶¶ 123-26); on behalf of the Amex class for violation of *§ 1 of the Sherman Act*, based on the aspect of the CAA's arbitration provisions disallowing collective action (SAC ¶¶ 127-29); and on behalf of the California subclasses for violation of California Antitrust Laws and the California Unfair Competition Law (SAC ¶¶ 130-40).

On March 15, 2019, Amex filed its fully briefed motion to compel arbitration of the Amex Class's claims and motion to dismiss the Second Amended Complaint. (Mot.; Opp'n; Defs. Reply in Further Supp. of Mot. ("Reply") (Dkt. 882).) On May 22, 2019, Plaintiffs filed a supplemental letter notifying the court of the Supreme Court's decision in Lamps Plus, Inc. v. Varela, *139 S. Ct. 1407, 203 L. Ed. 2d 636 (2019)*. (Pls. May 22, 2019 Letter (Dkt. 893).) Amex responded shortly thereafter. (Amex May 24, 2019 Letter.)

II. MOTION TO COMPEL ARBITRATION

A. Legal Standard

The *Federal Arbitration Act ("FAA")* provides that written agreements to arbitrate are "valid, irrevocable, and enforceable, save **[**30]** upon such grounds as exist at law or in equity for the revocation of any contract." *9 U.S.C. § 2*. The FAA "is a congressional declaration of a liberal federal policy favoring arbitration agreements, notwithstanding any state substantive or procedural policies to the contrary." *Moses H. Cone Mem'l Hosp. v. Mercury Constr. Corp., 460 U.S. 1, 24, 103 S. Ct. 927, 74 L. Ed. 2d 765 (1983)*. "This policy is founded upon 'a desire to preserve parties' ability to agree to arbitrate, rather than litigate, their disputes." *Starke v. SquareTrade, Inc., 913 F.3d 279, 288 (2d Cir. 2019)* (alteration adopted) (quoting *Schnabel v. Trilegiant Corp., 697 F.3d 110, 118 (2d Cir. 2012))*. Under *Section 4 of the FAA*, a party "aggrieved by the alleged failure, neglect, or refusal of another to arbitrate under a written agreement for arbitration" may file a motion to compel, which a court must grant "upon being satisfied that the making of the agreement **[*406]** for arbitration or the failure to comply therewith is not in issue." *9 U.S.C. § 4*; see also *AT&T Mobility LLC v. Concepcion, 563 U.S. 333, 354-55, 131 S. Ct. 1740, 179 L. Ed. 2d 742 (2011)*. Despite the FAA's "liberal federal policy favoring arbitration agreements," *CompuCredit Corp. v. Greenwood, 565 U.S. 95, 98, 132 S. Ct. 665, 181 L. Ed. 2d 586 (2012)* (citation omitted), "arbitration is a matter of contract and a party cannot be required to submit to arbitration any dispute which he has not agreed so to submit," *In re Am. Express Fin. Advisors Sec. Litig., 672 F.3d 113, 127 (2d Cir. 2011)* (quoting *Howsam v. Dean Witter Reynolds, Inc., 537 U.S. 79, 83, 123 S. Ct. 588, 154 L. Ed. 2d 491 (2002))*. "[C]ourts must rigorously enforce arbitration agreements according to their terms," even in cases involving "claims that allege a violation of a federal statute, unless the FAA's **[**31]** mandate has been overridden by a contrary congressional command." *Am. Express Co. v. Italian Colors Rest., 570 U.S. 228, 233, 133 S. Ct. 2304, 186 L. Ed. 2d 417 (2013)* (quotation marks and citations omitted)).

In deciding a motion to compel arbitration, "the court applies a standard similar to that applicable to a motion for summary judgment." *Bensadoun v. Jobe-Riat, 316 F.3d 171, 175 (2d Cir. 2003)*; see also *Wachovia Bank, Nat'l Ass'n v. VCG Special Opportunities Master Fund Ltd., 661 F.3d 164, 172 (2d Cir. 2011)*.

B. Discussion

The Supreme Court's decision in *Italian Colors* controls. In that case, the Supreme Court considered the enforceability of the same arbitration provision as that at issue here. *570 U.S. at 231*. The plaintiffs were merchants who accepted Amex cards and brought an antitrust suit against Amex, arguing that Amex impermissibly used its market power to force merchants to accept its credit cards while assessing fees approximately 30% higher than those for competing credit cards. Id. Amex moved to compel arbitration based on the arbitration provision in their contract with the merchants—the same as that at issue here—that required all disputes between the parties to be resolved by arbitration and provided that "[t]here shall be no right or authority for any Claims to be arbitrated on a class action basis." Id. The Court found that the arbitration provision was enforceable under the FAA.

Plaintiffs argue that this case is different from Italian **[**32]** Colors because, "[u]nlike here, the plaintiffs in Italian Colors did not assert that market-wide injunctive relief was necessary to vindicate their statutory rights." (Opp'n at 6.) In so arguing, Plaintiffs rely on the "effective vindication" exception to the FAA, which allows courts to "invalidate, on public policy grounds, arbitration agreements that operate as a prospective waiver of a party's right to pursue statutory remedies." *Id. at 235* (alterations adopted) (quotation marks, emphasis, and citations omitted). But Italian Colors is clear that *Rule 23* does not establish an entitlement to class proceedings for the vindication of preexisting statutory rights. *570 U.S. at 234*. As the Court observed, a class-action waiver "no more eliminates [ ] parties' rights to pursue their statutory remedy than did federal law before its adoption of the class action for legal relief in 1938." *Id. at 236*. The Court continued: "to put it differently, the individual suit that was considered adequate to assure `effective vindication' of a federal right before adoption of class-action procedures did not suddenly become 'ineffective vindication' upon their adoption." *Id. at 236-37*.

Plaintiffs are correct that, under Italian Colors, the effective vindication **[**33]** exception **[*407]** "would certainly cover a provision in an arbitration agreement prohibiting the assertion of certain statutory remedies." *Id. at 236*. But the text of the CAA does not prohibit the assertion of any statutory remedies. Plaintiffs' primary argument seems to be that market-wide equitable relief is necessary for effective vindication of their rights under the *Clayton Act*, and that foreclosing their ability to access that relief effectively prohibits their assertion of those rights. (Opp'n at 34.) This cannot be true. As the Supreme Court observed in Italian Colors:

> The antitrust laws do not evince an intention to preclude a waiver of class-action procedure. . . . The Sherman and Clayton Acts make no mention of class actions. In fact, they were enacted decades before the advent of *Federal Rule of Civil Procedure 23*, which was designed to allow an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only.

570 U.S. at 234 (alteration adopted) (quotation marks and citations omitted). The parties there had "agreed to arbitrate pursuant to that usual rule," and, the Court held, "it would be remarkable for a court to erase that expectation." Id. (quotation marks omitted). This case is no different. **[**34]** Plaintiffs' claims that class action is necessary to vindicate their rights are nonsensical because, as the Italian Colors Court noted, class wide injunctive relief was not available at the time the Clayton Act was enacted. *Id. at 234*. Plaintiffs have provided no reason for this court to assume that the Clayton Act, at the time of its enactment, provided statutory rights that had no effective means of vindication.

Plaintiffs also submitted a supplemental letter arguing that the Supreme Court's recent decision in Lamps Plus further supports their position that the court should not compel arbitration. (Pls. May 22, 2019 Letter at 1.) It does not. As Amex noted in response (Amex May 24, 2019 Letter), all parties agree that class arbitration is not permitted under the CAA. (See id.; Opp'n at 4.) The Lamps Plus holding—that class arbitration may be compelled under the FAA only when it is affirmatively specified in the parties' agreement—is therefore irrelevant. See *Lamps Plus, 139 S. Ct. at 1412*.

Finally, Plaintiffs argue that the *Seventh Amendment* prohibits irrevocable arbitration agreements. (See Opp'n at 8-9.) This argument is unavailing. It is true that the *Seventh Amendment* "preserve[s]" the right to trial by jury, *U.S. Const. amend. VII*, but the Constitution permits waivers of **[**35]** this right via arbitration agreements between two private parties, see, e.g., *Desiderio v. Nat'l Ass'n of Sec. Dealers, Inc., 191 F.3d 198, 206 (2d Cir. 1999)*; *In re*

Currency Conversion Fee Antitrust Litig., 265 F. Supp. 2d 385, 414 (S.D.N.Y. 2003)). Plaintiffs cite no caselaw to the contrary.

The court therefore grants Amex's motion to compel arbitration of the Amex Class's claims.

III. MOTION TO DISMISS

The court will now address Amex's motion to dismiss the Non-Amex Class's claims under both federal and California law.[2]

A. Federal Claims

Section 4 of the Clayton Act establishes a private right of action to enforce *Section 1 of the Sherman Act*. *15 U.S.C. § 15*. At the pleading stage, lamn antitrust plaintiff must show both constitutional standing and antitrust standing." *Gelboim v. Bank of Am. Corp., 823 F.3d 759, 770* ***[*408]*** *(2d Cir. 2016)*. Amex claims that Plaintiffs here have not met either burden. (Mot. at 1120.) Because the court determines that Plaintiffs have not established Antitrust Standing for the Non-Amex class, it does not address constitutional standing.

At the motion to dismiss stage, "a private antitrust plaintiff must plausibly allege (a) that it suffered a special kind of antitrust injury, and (b) that it is a suitable plaintiff to pursue the alleged antitrust violations and thus is an efficient enforcer of the antitrust laws." *In re London Silver Fixing, Ltd., Antitrust Litig., 213 F. Supp. 3d 530, 549 (S.D.N.Y. 2016)* (quoting *Gatt Communs., Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 76 (2d Cir. 2013)* (alterations adopted) (quotation marks omitted)). Because the court finds that Plaintiffs are **[**36]** not efficient enforcers of the ***antitrust law***, it will not address whether they have plausibly alleged antitrust injury.

As the Second Circuit has described:

> The efficient enforcer inquiry turns on: (1) whether the violation was a direct or remote cause of the injury; (2) whether there is an identifiable class of other persons whose self-interest would normally lead them to sue for the violation; (3) whether the injury was speculative; and (4) whether there is a risk that other plaintiffs would be entitled to recover duplicative damages or that damages would be difficult to apportion among possible victims of the antitrust injury.

Gelboim, 823 F.3d at 772. "[These] factors reflect a concern about whether the putative plaintiff is a proper party to perform the office of a private attorney general and thereby vindicate the public interest in antitrust enforcement." *Id. at 780* (quotation marks and citation omitted). Moreover, "[t]hese four factors need not be given equal weight," and "the relevant significance of each factor will depend on the circumstances of the particular case." *IQ Dental Supply, Inc. v. Henry Schein, Inc., 924 F.3d 57, 65 (2d Cir. 2019)*.

1. Directness

This factor cuts against Plaintiffs. "Directness in the antitrust context means close in the chain of causation." *Gatt, 711 F.3d at 78* (citations omitted). **[**37]** "The overall inquiry is akin to proximate cause in tort law—plaintiffs may not be 'too remote' so as to avoid 'duplicative recovery' and limitless0 increase [in] the universe of potential plaintiffs.'" *Harry v. Total Gas & Power N. Am., Inc., 889 F.3d 104, 116 (2d Cir. 2018)* (citing *In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 159, 162 (2d Cir. 2016))*. Amex argues that the Non-Amex Class "cannot be directly harmed by Amex's [Anti-Steering Rules] because they have no interaction with Amex or Amex's [Anti-Steering Rules]" and "are not Amex consumers or competitors." (Mot. at 17.) Amex is correct that, as a general matter, those entities most directly injured by anticompetitive conduct are customers or competitors of the defendant. *Aluminum Warehousing, 833 F.3d at 159*. And, of course, the Non-Amex Class members are by definition not direct customers or competitors of Amex.

---

[2] The California law claims are asserted only by the California Non-Amex Sublass.

Nonetheless, a plaintiff who is not a customer or competitor may suffer a direct injury if it is "a participant in 'the very market directly distorted by the antitrust violation" and its injury is "inextricably intertwined with the injury the [defendants] sought to inflict." *Id. at 159, 160* (quoting *Blue Shield of Va. v. McCready, 457 U.S. 465, 484, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*; *SAS of PR, Inc. v. PR Telephone Co., 48 F.3d 39, 46 (1st Cir. 1995))*. And "to assess the plausibility of a putative plaintiff's claim to antitrust injury as being inextricably intertwined with the **[*409]** injury the defendants ultimately sought to inflict," this court must "ask whether **[**38]** the plaintiff was manipulated or utilized by defendant as a fulcrum, conduit[,] or market force to injure competitors or participants in the relevant product and geographical markets." *Id. at 161*. Plaintiffs are indisputably participants in the two-sided credit card market—the very market allegedly distorted by Amex's actions. The question for the court is thus whether their supposed injury is inextricably intertwined with the injury Amex sought to inflict. It is not.

Amex first argues that Plaintiffs have not alleged a direct injury and instead present only a so-called "umbrella" theory of liability. (Mot. at 12-14.) Although the Second Circuit has not directly addressed the question,[3] district courts in this circuit to have considered such a theory of liability—under which "a consumer who deals with non-defendants . . . alleges injury by virtue of the defendants' conspiracy"—have determined that it cannot create antitrust standing. *FrontPoint Asian Event Driven Fund, L.P. v. Citibank, N.A., 16-CV-5263 (AKH), 2018 U.S. Dist. LEXIS 171999, 2018 WL 4830087, at *6 (S.D.N.Y. Oct. 4, 2018)* (citing *Gelboim, 823 F.3d at 778*); *In re Platinum & Palladium Antitrust Litig., 14-CV-9391 (GHW), 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *22 (S.D.N.Y. Mar. 28, 2017)*; *Sullivan v. Barclays PLC, No. 13-CV-2811 (PKC), 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *15-16 (S.D.N.Y. Feb. 21, 2017)*; *In re LIBOR-Based Financial Instruments Antitrust Litig. ("LIBOR"), No. 11-MDL-2262 (NRB), 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *16 (S.D.N.Y. Dec. 20, 2016))*. "The concern with so-called umbrella purchasers **[**39]** is that 'significant intervening causative factors, most notably, the independent pricing decisions of non-conspiring retailers, attenuate the causal connection between the violation and the injury.'" *Sonterra Capital Master Fund, Ltd. v. Barclays Bank PLC, 366 F. Supp. 3d 516, 545 (S.D.N.Y. 2018)* (quoting *LIBOR, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *15)*.

"Umbrella standing concerns are most often evident when a cartel controls only part of a market, but a consumer who dealt with a non-cartel member alleges that he sustained injury by virtue of the cartel's raising of prices in the market as a whole." *Gelboim, 823 F.3d at 778*. That is precisely the situation Plaintiffs allege here. As Amex notes, Plaintiffs "allege[] that Amex's [Anti-Steering Rules] raise the prices charged by all credit card networks—even for merchants who do not take Amex cards—because [the Anti-Steering Rules] purportedly restrain competition between credit card networks at merchants who accept Amex." (Mot. at 12 (citing SAC ¶¶ 73-75, 82).) The court need not—and will not—rule on whether an umbrella theory of liability may ever create antitrust standing. It is enough to observe those general concerns and note that they are particularly present here, where adopting Plaintiffs' proposed theory of liability would expose Amex to damages for every merchant fee charged by every credit **[**40]** card network in the United States.

Arguments about the umbrella theory of liability aside, Plaintiffs' alleged injuries are indirect. In Gatt, the Second Circuit considered an alleged "bid-rigging" or "bid rotation" scheme regarding the sale of radios to New York City and State government agencies. See *711 F.3d at 72*. Plaintiff, a radio merchant, alleged that Defendants determined which radio merchant **[*410]** would submit the lowest bid and what the price would be. Id. The remaining dealers would then either "refrain from bidding or submit artificially inflated 'dummy quotations' for the contract." Id. Any merchant who refused to cooperate with the process would lose their license to deal the Vertex radios used by both the City and State governments. Id. The plaintiff refused to comply and, as a result, was no longer permitted to sell Vertex-brand radios. Id. The Second Circuit determined that this was an indirect injury because the plaintiff "was only incidentally harmed by the conspiracy" and "[i]t did not pay higher prices by virtue of the conspiracy; it merely lost the right to sell to one brand of radio." *Id. at 78-79*. Here, unlike in *Gatt*, Plaintiffs do

[3] The Second Circuit has not yet explicitly addressed the viability of antitrust claims that rely on an umbrella theory of liability, but it has expressed concerns about allowing such claims to proceed. See *Gelboim, 823 F.3d at 778-79* (noting that allowing claims under an umbrella theory of liability could "vastly extend the potential scope of antitrust liability" and could allow recovery for "damages disproportionate to wrongdoing").

allege that the Non-Amex Class actually paid higher prices **[**41]** because of Amex's conduct. Nonetheless, as in *Gatt*, their alleged injury is only incidental—Amex was not, according to the allegations in the complaint, using its market power to force its competitors to charge higher merchant fees across the board. Nor did it enter into a horizontal price-fixing agreement with those competitors. What it allegedly did, rather, was force those merchants who did accept its cards to refrain from steering customers towards other cards and, in so doing, insulated its ability to charge those merchants ultracompetitive fees. Plaintiffs may be right that this had an effect on the fees other credit card networks charged to the Non-Amex Class, but any such effect was incidental to Amex's alleged anticompetitive behavior.

In arguing to the contrary, Plaintiffs rely on three cases: *In re DDAVP Direct Purchaser Antitrust Litigation, 585 F.3d 677 (2d Cir. 2009)*; *Dennis v. JPMorgan Chase and Company, 345 F. Supp. 3d 122 (S.D.N.Y. 2018)*; and *In re Namenda Direct Purchaser Antitrust Litigation, 331 F. Supp. 3d 152 (S.D.N.Y. 2018)*. (See Opp'n at 19-20.) In DDAVP, the Second Circuit held that "even though the plaintiffs' injuries were derivative of the direct harm experienced by the defendants' competitors, harming competitors was simply a means for the defendants to charge the plaintiffs higher prices." *585 F.3d at 688*. Plaintiffs have not argued—nor could they—that Amex imposing the Anti-Steering Rules on the Amex **[**42]** Class was "simply a means" to increase the fees its competitors charged to the Non-Amex Class. DDAVP is therefore inapposite.

Dennis and Namenda provide somewhat more analogous situations. The relevant plaintiffs in Namenda purchased the generic version of a drug and sued the manufacturer and seller of the name brand version of the drug, alleging that "they paid higher prices for generic memantine because Defendants intentionally restricted and manipulated generic competition" by entering into settlements seeking to delay market entry for some generic versions. *Id. at 190-94, 213*. This is a more direct injury than that alleged by Plaintiffs here: the defendants there directly conspired with one competitor to keep some other competitors out of the relevant market. See id. Amex's Anti-Steering Rules, by contrast, are not a direct agreement with any other party to manipulate or limit entry into the credit network market. At best, Plaintiffs allegations involve Amex's competitors reacting—perhaps in predictable ways—to a contractual provision entered into between Amex and the Amex Class.

In Dennis, the plaintiffs alleged that the defendants conspired to manipulate the Bank Bill Swap Reference Rate (the "BBSW"), **[**43]** a benchmark interest rate used to set the price for some financial derivatives. *343 F. Supp. 3d at 142*. The plaintiffs had all "engaged in U.S.-based transactions for BBSW-based derivatives." Id. Presumably, Plaintiffs here could argue **[*411]** that they engaged in transactions that charged fees based on Amex's merchant fees—but the situations are entirely different. Amex set the price for its merchant fees, which then influenced the fees charged by its competitors, as all price setting does. It did not, however, fraudulently manipulate a benchmark explicitly used by its competitors to set their rates. Instead, the relationship between its rates and those of Visa, Mastercard, and Discover is indirect, and the chain of causation is attenuated by the intervening decisions of those entities that, presumably, consider a great number of factors.

The Second Circuit's most recent decision on the issue, *IQ Dental, 924 F.3d 57*, underscores the difference between the circumstances in Dennis and Namenda and those the court considers here. There, the plaintiff—a small seller of dental supplies—distributed its supplies using an online portal hosted by a third party. *IQ Dental, 924 F.3d at 61*. The plaintiff alleged that larger dental-supply distributors conspired to drive **[**44]** that online portal out of business and that it was harmed as a result. Id. This injury was insufficiently direct, said the Second Circuit, because the plaintiff "was not the target of annihilation; it was simply collateral damage." *Id. at 65-66*. So, too, here: the Non-Amex Class may have been "damaged" by the Anti-Steering Rules, but they, quite obviously, were "not the target of annihilation."

2. Identifiable Class of Other More Direct Victims

"This consideration seems to bear chiefly on whether the plaintiff is a consumer or a competitor." *Gelboim, 823 F.3d at 779*. "Implicit in the inquiry is recognition that not every victim of an antitrust violation needs to be compensated under the antitrust laws in order for the antitrust laws to be efficiently enforced." Id. As previously noted, the Non-Amex Class members and representatives are definitionally not Amex's customers or competitors, but are, rather, consumers participating in the affected market. And while such participants may occasionally be the most well positioned enforcers of the antitrust laws, that is not the case here because there is an obvious class of more direct victims—the Amex Class, who are actually bound by Amex's Anti-Steering Rules.

The court is aware **[**45]** this factor merely requires "an entity most motivated by self-interest, not the entity most motivated by self-interest" and, therefore, that "[i]nferiority to other potential plaintiffs can be relevant, but it is not dispositive." *DDAVP, 585 F.3d at 688-89* (emphasis in original) (quotation marks and citations omitted). And, of course, even the Non-Amex class members here are "significantly motivated due to their 'natural economic self-interest' in paying the lowest price possible," *id. at 689*. This is not enough to sway this factor in Plaintiffs' favor, however, because "denying [them] a remedy on the basis of [their] allegations in this case is not likely to leave a significant antitrust violation undetected or unremedied." *IQ Dental, 924 F.3d at 66* (citation omitted). Obviously, the Amex Class has litigated the same issue, and remains free to do so pursuant to the arbitration process laid out in their agreement with Amex. Moreover, as previously discussed, these provisions have also been the subject of several other lawsuits in front of this court, from the Government, other, larger, merchants, and, now, consumers who shop at stores bound by the Anti-Steering Rules. And at least some of these other litigants are more directly harmed than **[**46]** the Non-Amex Class members. See *IQ Dental, 924 F.3d at 66* ("Given that [the plaintiff] is further removed from the harm caused by the Defendants than the parties directly affected **[*412]** by the boycott that have already sued the Defendants, the second efficient-enforcer factor weighs against [the plaintiff's] antitrust standing.")

3. Speculative Nature of Injury

The existence of only "highly speculative damages is a sign that a given plaintiff is an inefficient engine of enforcement." *Gelboim, 823 F.3d at 779*. "At the same time, some degree of uncertainty stems from the nature of ***antitrust law***." Id. "Impediments to reaching a reliable damages estimate often flow from the nature and complexity of the alleged antitrust violation." *Id. at 780*.

In IQ Dental, the Second Circuit determined that the nature of the plaintiff's injuries "render[ed] its potential recovery highly speculative" because its "damages calculation rests on multiple layers of speculation" and "essentially would require the creation of an 'alternative universe.'" *924 F.3d at 67*. Here, too, Plaintiffs' damages calculation would necessarily rest on multiple layers of speculation. Plaintiffs claim that "damages here may be readily measured by the overage paid by all merchants—i.e., the difference between **[**47]** the actual 'price' of merchant fees and the presumed competitive 'price' of merchant fees." (Opp'n at 22 (emphasis in original) (footnote call number omitted).) But that is precisely the problem—calculating the "presumed competitive price" would involve assessing the pricing decision on Amex's non-party competitors, all of whom are competing against one another as well as against Amex on both sides of the two-sided market. As such, the calculation involves several stages of speculation: how much steering would occur if merchants accepting Amex cards were permitted to engage in it? What effect would this have on Amex's merchant fees? What effect would any change in Amex's merchant fees have on the decisions of its competitors regarding their own merchant fees? And, perhaps most important in terms of the speculative nature of this claim, how would those decisions trickle over into the parallel situation of the Non-Amex Class members? Such exogenous factors are, to be sure, insufficient by themselves to defeat antitrust standing; nonetheless, their presence is relevant to the efficient enforcer analysis. See *London Silver Fixing, 213 F. Supp. 3d at 557*.

4. Duplicative Recovery and Complex Apportionment

In IQ Dental, the Second Circuit **[**48]** reiterated the importance of this consideration, noting that "[t]he existence of other plaintiffs who could lay claim to precisely the same damages, whether in theory or in actuality, indicates that the would-be antitrust plaintiff might not be well positioned to vindicate the antitrust laws for the benefit of the public." *924 F.3d at 67*. While that is not obviously the case here, the court does note its concerns about the complex nature of apportionment and the broad nature of the class suggested by Plaintiffs, which presents an "obvious risk of disproportionate damages." *In re London Silver Fixing, Ltd., Antitrust Litig., 332 F. Supp. 3d 885, 906 (2d Cir. 2018)*.

Amex argues that the court should be concerned because at least some of Plaintiffs have already recovered damages for the alleged lack of competition between the credit card networks. (Mot. at 19; Reply at 8-9.) However, as Plaintiffs respond and Amex does not dispute, these settlements resolved disputes regarding similar provisions Visa and Mastercard allegedly imposed on merchants, not Amex's Anti-Steering Rules at issue here. (See Opp'n at 22.) The fact that some wrongdoers have already agreed to settlements, moreoever, "has nothing to do with the efficient enforcer analysis, particularly Gelboim's concern **[*413]** with disproportionate **[**49]** damages." *In re Foreign Exch. Benchmark Rates Antitrust Litig., No. 13-CV-7789 (LGS), 2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *7) S.D.N.Y. Sept. 20, 2016)*. The court is thus unpersuaded by Amex's argument on this point.

The court does note, however, that Gelboim "strongly suggested" that "other enforcement mechanisms were relevant" to this factor when it "stat[ed] that the fact that the defendants' alleged manipulation was 'under scrutiny by government organs, bank regulators[,] and financial regulators bears upon the need for the plaintiffs as instruments for vindicating the *Sherman Act*.' *Sonterra, 277 F. Supp. 3d at 565* (alterations adopted) (quoting *Gelboim, 823 F.3d at 778*). And, as the court has previously discussed, there are certainly other available enforcement mechanisms here. While this would not eliminate antitrust standing by itself, it "does reinforce the conclusion that the remaining plaintiffs are not efficient enforcers of the antitrust laws." Id.

* * *

Because all four of the efficient-enforcer factors cut against Plaintiffs, the court finds that the Non-Amex Class has not established federal antitrust standing.

B. California Claims

Amex argues that the California Non-Amex Subclass lacks standing to sue under California law for essentially the same reasons it lacks standing under federal law. (Mot. at 2021.) Plaintiffs contend that standing **[**50]** under California law must be analyzed independent of federal antitrust standing, and argue that the California Non-Amex Subclass does have standing to pursue their antitrust claims under California law. (Opp'n at 23-24.) As an initial matter, Plaintiffs are correct that dismissal of the Non-Amex Class's Sherman Act claims does not necessarily mandate the dismissal of their claims under the California Unfair Competition Law (the "UCL") and California state ***antitrust law***, known as the *Cartwright Act*. *Samsung Elecs. Co. v. Panasonic Corp., 747 F.3d 1199, 1205 n.4 (9th Cir. 2014)*. However, dismissal is independently appropriate on these claims for substantially the same reasons as it is appropriate on their federal claims.

1. The Cartwright Act

The California Supreme Court has not addressed whether antitrust standing under California state law is properly analyzed under the same framework as that used to determine federal antitrust standing. See *Salveson v. JP Morgan Chase & Co., 166 F. Supp. 3d 242, 257 (E.D.N.Y. 2016)*; *In re Capacitors Antitrust Litig., 106 F. Supp. 3d 1051, 1072-73 (N.D. Cal. 2015)*. While courts have disagreed on the issue—and authority is sparse in either direction—the court is persuaded by those that have found that the same or substantially similar factors apply. See *Salveson, 166 F. Supp. 3d at 258*; *In re Dairy Farmers of Am., Inc. Cheese Antitrust Litig., No. 09-CV-3690, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *8 (N.D. Ill. June 29, 2015)*; *In re Flash Memory Antitrust Litig., 643 F. Supp. 2d 1133, 1151 (N.D. Cal. 2009)*. But see *Capacitors, 106 F. Supp. 3d at 1073*.

This determination is in accordance with the analysis of at least one of California's intermediate appellate courts. **[**51]** See *Vinci v. Waste Mgmt., Inc., 36 Cal. App. 4th 1811, 43 Cal. Rptr. 2d 337, 338-39 (Cal. Ct. App. 1995)*. It is unclear the extent to which Vinci's holding was altered by the California Supreme Court's observation that "[i]nterpretations of federal ***antitrust law*** are at most instructive, not conclusive, when construing the Cartwright Act," *Aryeh v. Canon Bus. Sols.., Inc., 55 Cal. 4th 1185, 151 Cal. Rptr. 3d 827, 292 P.3d 871, 877 (Cal. 2013)*, but that statement, without more, is insufficient to convince this court that the California Supreme **[*414]** Court would decide the issue contrary to Vinci. See New *York v. Nat'l Serv. Indus., Inc., 460 F.3d 201, 210 (2d Cir. 2006)*; see also *Comm'r of Internal Revenue v. Bosch's Estate, 387 U.S. 456, 465, 87 S. Ct. 1776, 18 L. Ed. 2d 886 (1967)* ("[A]n intermediate appellate state court is a datum for ascertaining state law which is not to be disregarded by a federal court unless it is convinced by other persuasive data that the highest court of the state would decide otherwise." (quotation marks and citation omitted)).

Lacking more direct guidance from the California courts, and in light of Vinci, the court will thus apply the federal factors to analyze antitrust standing under California law. As laid out by the Supreme Court, then, the relevant factors are: "(1) the nature of the plaintiff's alleged injury, (2) the directness of the injury, (3) the speculative nature of the harm, (4) the risk of duplicative recovery and (5) the complexity in apportioning damages." **[**52]** *Salveson, 166 F. Supp. 3d at 259*; see also *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters ("AGC"), 459 U.S. 519, 535-37, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. The court also observes, however, that California law considers these factors somewhat more liberally than its federal analog. See *Salveson, 166 F. Supp. 3d at 259*.

As to the nature of the alleged injury, the court must consider "whether the nature of the injury asserted by a plaintiff is 'the type the antitrust laws were intended to forestall.'" *Salveson, 166 F. Supp. 3d at 259* (quoting *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 987 (9th Cir. 2000))*. In assessing this requirement, courts look to: (1) the defendant's anticompetitive conduct; (2) the plaintiff's "worse position" as a result of defendant's conduct; and (3) a comparison of the anticompetitive effect of defendant's conduct and plaintiffs alleged injury. See *Harry v. Total Gas & Power N. Am., Inc., 889 F.3d 104, 115 (2d Cir. 2018)*. Here, Amex allegedly used its market power to pressure the merchants who accepted its cards to agree to its Anti-Steering Rules. Because this prevented merchants from charging more to consumers using Amex cards and from offering incentives to those who used other credit cards, merchants have no way to increase use of a card that charges less. Amex and its competitors, then, have no incentive to keep prices down. (SAC ¶ 50.) In other words, Plaintiffs "have alleged that Amex's imposition of its [Anti-Steering Rules] stifles interbrand competition **[**53]** in the relevant market . . . [,] thereby causing all merchants to pay higher fees, and raising overall transaction costs above competitive levels." (Opp'n at 13 (emphasis in original).) This is sufficient to have plausibly alleged that Amex engaged in unlawful anticompetitive conduct, at least to meet the "low bar" of the inquiry at the standing stage. See *IQ Dental, 924 F.3d at 63*. Next, the court must "isolate and identify [Plaintiffs'] 'actual injury' or 'the ways in which the plaintiff claims it is in a 'worse position' as a consequence of the defendant's conduct." *Id. at 63* (quoting *Gatt, 711 F.3d at 76*). "Assuming that [Plaintiffs are] operating in a market affected by anticompetitive conduct, the question of actual injury becomes whether [Plaintiffs are] worse off than [they] would be if the market were free of anticompetitive forces." *Id. at 64*. Taking the allegations in the complaint as true, Plaintiffs have alleged sufficient facts to show that they are in a worse position as a result of Amex's alleged conduct. They allege the following:

> On the merchant side of the market, Amex's imposition of increased merchant fees, has, in turn, enabled Visa, MasterCard, and Discover to increase **[*415]** their respective merchants' fees, thereby stifling competition, **[**54]** and causing all credit card accepting merchants to pay supracompetitive merchant fees. This includes merchants who do not accept Amex cards but do accept other credit cards, because the remaining credit card networks do not lower their merchant fees for the generally small merchants that do not accept Amex.

(SAC ¶ 82.) Plaintiffs thus allege that they are charged higher merchant fees and are, as a result, worse off than they would be in a genuinely competitive market.

Finally, Plaintiffs "must demonstrate that the Defendants' anticompetitive behavior caused its actual injury." *IQ Dental, 924 F.3d at 65*; see also *Brunswick Corp. v. Pueblo Bowl-O-Mat. Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (the plaintiff must show that its injury "flows from that which makes defendants' acts unlawful"). This is the least certain of the relevant considerations in this inquiry. It is plausible that the imposition of higher merchant fees, in combination with the Anti-Steering Rules, could stifle competition and allow Amex's competitors to raise their rates across all merchants, rather than just across those merchants who are bound by the Anti-Steering Rules themselves. This is particularly true given that most large merchants, according to Plaintiffs, do accept Amex, meaning **[**55]** that the credit card companies would have little incentive to tailor contracts for relatively insignificant individual merchants who do not. Despite this logical connection, the court cannot ignore the intervening decisions of third parties that weaken the chain of causation from Amex's Anti-Steering Rules to the merchant fees charged by other networks to the Non-Amex Class members.

Even assuming that antitrust injury has been established, however, that does not outweigh the other factors relevant to the antitrust standing analysis, all four of which cut against Plaintiffs. The court has discussed these factors above—as a part of its "efficient enforcer" analysis—but will address directness again because 'the extent to which antitrust injury is recognized under the Cartwright Act is enlarged, by statute, in comparison to federal law' because an action 'may be brought by a person who is injured . . . by reason of anything declared unlawful by [the Cartwright Act], regardless of whether such injured person dealt directly or indirectly with the defendant." *Salveson, 166 F. Supp. 3d at 263* (emphasis omitted) (quoting *Knevelbaard, 232 F.3d at 991*); see also *Dairy Farmers, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *8* ("California's antitrust-standing provision is broader in some respects than federal antitrust-standing **[**56]** law."); *Cal. Bus. & Prof. Code § 16750(a)*).

Courts applying California law find antitrust standing where, for example, "indirect purchasers of components had satisfied their burden of pleading directness of injury by alleging that the cost of the component was traceable through the product distribution chain." Flash *Memory, 643 F. Supp. 2d at 1155* (collecting cases). In fact, California's statute allowing the expansion of its antitrust standing as compared to federal law was passed in response to *Illinois Brick Company v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, which held that indirect purchasers lacked antitrust standing where their only alleged damages were the overcharges passed on from direct purchasers, *id. at 730-31*; see also *McCready, 457 U.S. at 474* (describing the Illinois Brick decision as finding "unacceptable the risk of duplicative recovery engendered by allowing both direct and indirect purchasers to claim damages resulting from a single overcharge by the antitrust defendant"). See *Dairy Farmers, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at **[*416]** *7* ("The California legislature took action within months . . . (if, prior to the AGC decision) . . . to prevent Illinois Brick from having any effect on judicial interpretation of the Cartwright Act." (alterations adopted) (citations and quotation marks omitted)). The California legislature did not undertake a similar response to AGC just six years later, **[**57]** and has not done so since, despite some state and numerous federal courts applying the AGC factors to California antitrust standing. And, as "Illinois Brick and AGC are separate inquiries," *Dairy Farmers, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *8* (citing *In re Refrigerant Compressors Antitrust Litig., No. 09-MD-2042, 2013 U.S. Dist. LEXIS 50737, 2013 WL 1431756, at *10 (RD. Mich. Apr. 9, 2013))*, the impact of the statute outside the context of indirect purchasers is unclear.

In any event, California law does not allow recovery for an antitrust injury that is a "secondary, consequential, or remote" result of the allegedly unlawful conduct. *In re WellPoint, Inc. Out-of-Network UCR Rates Litig., No. 09-MD-2074, 2013 WL 12130034, at *10 (C.D. Cal. July 19, 2013)* (quoting *Cellular Plus, Inc. v. Superior Court, 14 Cal. App. 4th 1224, 18 Cal. Rptr. 2d 308, 312 (Cal. Ct. App. 1993))*. Instead, the injury alleged must be "the direct result" of that conduct. Id. (quoting *Cellular Plus, 18 Cal. Rptr. 2d at 312*); see also *Meyer v. Qualcomm Inc., No. 08-CV-655, 2009 U.S. Dist. LEXIS 16533, 2009 WL 539902, at *8 (S.D. Cal. Mar. 3, 2009* ("The California courts have held that a plaintiff whose injuries were not secondary, consequential, or remote, but the direct result of the unlawful conduct and were the kind of injuries the antitrust laws seek to prevent has antitrust standing." (quotation marks and citations omitted)). And, as discussed above, the Non-Amex Class's injury is—definitionally—secondary. Plaintiffs have alleged that they were charged higher merchant fees because of reactions to Amex's rate-setting by independent actors, **[**58]** Amex's competitors. They do not allege that Amex conspired to increase merchant fees across the market, but instead only that Amex's Non-Steering Provisions had that effect. Such allegations, without more, do not sufficiently tie Amex's alleged anti-competitive conduct to the merchant fees of the California Non-Amex Subclass, who did not interact with Amex directly (and, moreover, did not directly interact with any other party that, at any point in the chain of causation, entered into any agreement or transaction with Amex at all).

Even under this more liberal approach to the directness inquiry, therefore, the Non-Amex Class's injuries are simply too remote. This determination, in combination with the factors discussed previously, brings the court to conclude that the California Non-Amex Subclass has failed to allege standing under the Cartwright Act.

2. The UCL

Finally, the California Non-Amex Subclass asserts claims under the UCL (SAC 111136-40), alleging that Amex violated the UCL "by entering into contracts in an unreasonable restraint of trade within the State of California in violation of the Sherman Act and the Cartwright Act" (id. ¶ 137). The UCL does allow a plaintiff to bring **[**59]** a claim based on conduct that violates other laws, *Cal. Bus. & Prof. Code § 17200*, but dismissal of an underlying antitrust claim mandates dismissal of the UCL claim as well, see *Dairy Farmers, 2015 U.S. Dist. LEXIS 84152, 2015 WL 3988488, at *18*; *In re Wellpoint, Inc. Out-of-Network UCR Rates Litig., 903 F. Supp. 2d 880, 927-28 (C.D. Cal. 2012)*.

Because the court has dismissed all of the Non-Amex Class's other claims and Plaintiffs have provided no reason that the California Non-Amex Subclass's UCL claims survive independently, the court also dismisses their claims under the UCL.

[*417] IV. CONCLUSION

For the foregoing reasons, Amex's (Dkt. 875) motions to compel arbitration and to dismiss are both GRANTED. The court retains limited jurisdiction to enforce any award resulting from any arbitration between Amex and members of the Amex class.

All claims asserted by the Non-Amex Class are DISMISSED. The Clerk of Court is respectfully DIRECTED to terminate Qwik Lube, LCC and LaJolla Auto Tech, Inc. and to remove them from the caption.

SO ORDERED.

Judges: Presiding Judge Kenton D. Jones delivered the decision of the Court, in which Judge James B. Morse Jr. and Judge Diane M. Johnsen joined.

Opinion by: Kenton D. Jones

Opinion

MEMORANDUM DECISION

JONES, Judge:

P1 Richard Berry appeals the superior court's judgment finding he engaged in the unauthorized practice of law, as defined by *Arizona Rule of the Supreme Court (Rule) 31*, and enjoining him from further unauthorized conduct. For the following reasons, we affirm.

LEGAL BACKGROUND

P2 The power to regulate the practice of law in Arizona is vested exclusively in our supreme court, whose authority extends over those admitted to the Arizona bar as well as non-lawyers and disbarred attorneys. *See In re Creasy, 198 Ariz. 539, 541, ¶¶ 7-8, 12 P.3d 214 (2000)*; *Sobol v. Alarcon, 212 Ariz. 315, 319, ¶¶ 18-19, 131 P.3d 487 (App. 2006)*. In a lawful exercise of this power, "the supreme court has promulgated rules defining and describing both the practice of law and the unauthorized practice of law." *Sobol, 212 Ariz. at 319, ¶ 19*; *see generally Ariz. R. Sup. Ct. 31*,[1] *75*. These rules identify the activities that may only be performed by a licensed attorney and seek **[*2]** to "protect the public from the intolerable evils which are brought upon people by those who assume to practice law without having the proper qualifications." *Morley v. J. Pagel Realty & Ins., 27 Ariz. App. 62, 65, 550 P.2d 1104 (1976)* (quoting *Gardner v. Conway, 234 Minn. 468, 48 N.W.2d 788, 794 (Minn. 1951))*.

P3 As such, under Arizona law, subject to certain exemptions not applicable here, "no person shall practice law in this state or represent in any way that he or she may practice law in this state unless the person is an active member of the state bar." *Ariz. R. Sup. Ct. 31(b)*; *see also Ariz. R. Sup. Ct. 31(d)* (identifying exemptions). *Rule 31* specifically prohibits a non-active member of the state bar from using designations such as "lawyer" or "counselor at law," *Ariz. R. Sup. Ct. 31(a)(2)(B)* (defining the unauthorized practice of law), and "providing legal advice or services to or for another" by:

> (1) preparing any document in any medium intended to affect or secure legal rights for a specific person or entity;
> (2) preparing or expressing legal opinions;
> (3) representing another in a judicial, quasi-judicial, or administrative proceeding, or other formal dispute resolution process such as arbitration and mediation;
> (4) preparing any document through any medium for filing in any court, administrative agency or tribunal for a specific person or entity; or
>
> (5) negotiating legal rights or responsibilities **[*3]** for a specific person or entity.

Ariz. R. Sup. Ct. 31(a)(2)(A) (defining the practice of law).

FACTS AND PROCEDURAL HISTORY

P4 In January 2017, forty years after Berry was disbarred by our supreme court, the State Bar of Arizona (State Bar) filed a complaint against Berry alleging six counts of the unauthorized practice of law.

P5 After a two-day bench trial, the superior court found clear and convincing evidence that Berry engaged in the unauthorized practice of law on four occasions.[2] Specifically, the court found Berry, while affiliated with a paralegal firm called "Why Pay a Lawyer?," had: (1) prepared, signed, and mailed a demand letter on behalf of another person that included legal analysis the person did not specifically direct; (2) represented himself as a lawyer to a second person; drafted a demand letter for the second person that included legal analysis the person did not specifically direct; and prepared a breach of contract complaint for the second person that was later filed in superior court; (3) selected or prepared various bankruptcy documents for a third person that required legal analysis and were ultimately filed in bankruptcy court; and (4) selected or prepared legal documents for a fourth person **[*4]** that addressed legal issues related to a specific landlord-tenant dispute.

---

[1] Absent material changes from the relevant date, we cite the current version of rules and statutes.

[2] The State Bar voluntarily dismissed one count; the superior court dismissed another.

P6 The superior court determined Berry's conduct was sanctionable, permanently enjoined Berry from engaging in the unauthorized practice of law in Arizona, and ordered Berry to pay restitution. *See Ariz. R. Sup. Ct. 76(a)* (describing the grounds for sanctions, including "[a]ny act found to constitute the unauthorized practice of law pursuant to *Rule 31*"), *(b)* (describing the available sanctions to include imposition of an injunction and restitution). Berry timely appealed, and we have jurisdiction pursuant to *Arizona Revised Statutes (A.R.S.) §§ 12-120.21(A)(1)* and *- 2101(A)(1)*.

DISCUSSION

I. Sufficiency of the Evidence

P7 Berry first argues the State Bar failed to prove by clear and convincing evidence that he engaged in the unauthorized practice of law as defined by *Rule 31*.[3] However, when an appellant "contend[s] on appeal that a judgment, finding or conclusion[] is unsupported by the evidence or is contrary to the evidence, the appellant must include in the record transcripts of all proceedings containing evidence relevant to that judgment, finding or conclusion." *ARCAP 11(c)(1)(B)*; *see also Myrick v. Maloney, 235 Ariz. 491, 495, ¶ 11, 333 P.3d 818 (App. 2014)* ("An appellant also has an obligation to provide transcripts and other documents necessary to consider the issues raised on **[*5]** appeal.") (citing *Baker v. Baker, 183 Ariz. 70, 73, 900 P.2d 764 (App. 1995))*. "We presume the items not included in the appellate record support a trial court's ruling." *Myrick, 235 Ariz. at 495, ¶ 11* (citing *Baker, 183 Ariz. at 73*).

P8 Berry did not provide transcripts of the two-day bench trial; nor does his appellate case management statement indicate compliance with *ARCAP 11(c)(1)-(3)* (describing the appellant's duty to order transcripts). Berry has thus waived any argument regarding the sufficiency of the evidence to support the superior court's findings. *See Boltz & Odegaard v. Hohn, 148 Ariz. 361, 366, 714 P.2d 854 (App. 1985)* ("Where no transcript of evidence is made part of the record on appeal, a reviewing court will not question the sufficiency of evidence to sustain the ruling.") (citing *Riley v. Jones, 6 Ariz. App. 120, 122, 430 P.2d 699 (1967))*.

II. Constitutionality

P9 Berry next challenges the constitutionality of *Rule 31*. We review constitutional challenges *de novo* and will presume constitutionality unless the challenger convinces us otherwise beyond a reasonable doubt. *See 3613 Ltd. v. Dep't of Liquor Licenses & Control, 194 Ariz. 178, 182, ¶ 17, 978 P.2d 1282 (App. 1999)* (citations omitted).

P10 Berry contends that *Rule 31*'s provisions governing the practice of law and unauthorized practice of law are unconstitutionally overbroad and vague because the rule identifies several exemptions. *See Ariz. R. Sup. Ct. 31(d)*. But none of those exemptions apply to his conduct. Because Berry engaged in the type of conduct *Rule 31* expressly prohibits, he is **[*6]** precluded from challenging *Rule 31* on the grounds that it is unconstitutionally overbroad or vague.[4] *See Martin, 195 Ariz. at 316, ¶ 77* (collecting cases); *Broadrick v. Oklahoma, 413 U.S. 601,*

---

[3] Berry presents several arguments not raised before the superior court. However, "matters not raised below . . . will not be considered on appeal." *Murphy v. Town of Chino Valley, 163 Ariz. 571, 578, 789 P.2d 1072 (App. 1989)* (citing *Norcor of Am. v. S. Ariz. Int'l Livestock Ass'n, 122 Ariz. 542, 544-45, 596 P.2d 377 (App. 1979))*; *see also Palmer v. City of Phx., 242 Ariz. 158, 165, ¶ 26, 393 P.3d 938 (App. 2017)* ("[A] party must timely present his legal theories to the trial court so as to give it an opportunity to rule properly.") (quoting *Payne v. Payne, 12 Ariz. App. 434, 435, 471 P.2d 319 (1970))*. And although Berry suggests his actions could have rightfully been undertaken by a certified legal document preparer (CLDP), *see Ariz. R. Sup. Ct. 31(d)(24)* (recognizing that a CLDP may perform services in compliance with Part 7, Chapter 2, of the Arizona Code of Judicial Administration), Berry admits he is not a CLDP, and the court found he was not a CLDP at the relevant time.

608, 93 S. Ct. 2908, 37 L. Ed. 2d 830 (1973) ("[E]ven if the outermost boundaries of [a statute challenged for vagueness] may be imprecise, any such uncertainty has little relevance . . . where appellants' conduct falls squarely within the 'hard core' of the statute's proscriptions.") (collecting cases).

III. Antitrust Laws

P11 Finally, relying upon *N.C. State Bd. of Dental Exam'rs v. FTC (N.C. Dental), 574 U.S. 494, 135 S. Ct. 1101, 191 L. Ed. 2d 35 (2015)*, Berry contends enforcement of *Rule 31* violates federal ***antitrust law*** because the members of the State Bar who regulate and enforce the rules are "active participants in the same profession as those [they] govern[]." *See* *Ariz. R. Sup. Ct. 32(c)* (outlining parameters for membership in the State Bar).[5] We review legal questions *de novo*. *McNamara v. Citizens Protecting Tax Payers, 236 Ariz. 192, 194, ¶ 5, 337 P.3d 557 (App. 2014)* (citing *Lincoln v. Holt, 215 Ariz. 21, 23, ¶ 4, 156 P.3d 438 (App. 2007))*.

P12 In *N.C. Dental*, the Federal Trade Commission (FTC) filed an administrative complaint alleging the efforts of the North Carolina State Board of Dental Examiners (the Board) to exclude non-dentists from the teeth-whitening services market "constituted an anticompetitive and unfair method of competition under the *[FTC] Act*." *135 S. Ct. at 1108-09*. The FTC rejected the Board's claim that it was immune from antitrust **[*7]** laws. *Id. at 1109*. In affirming, the U.S. Supreme Court recognized that antitrust laws "confer immunity on anticompetitive conduct by the [s]tates when acting in their sovereign capacity." *Id. at 1110* (citing *Parker v. Brown, 317 U.S. 341, 350-51, 63 S. Ct. 307, 87 L. Ed. 315 (1943))*. When a state delegates control over a market to a non-sovereign actor that is controlled by active market participants, it "enjoys *Parker* immunity only if . . . the challenged restraint [is] clearly articulated and affirmatively expressed as state policy, and . . . the policy [is] actively supervised by the [s]tate." *Id.* (quoting *FTC v. Phoebe Putney Health Sys., Inc., 568 U.S. 216, 225, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013))*; *see also* *Goldfarb v. Va. State Bar, 421 U.S. 773, 788, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)* (recognizing that where an anticompetitive program gets "its authority and its efficacy from the legislative command of the state," there is no antitrust violation because the law "was intended to regulate private practices and not to prohibit a [s]tate from imposing a restraint as an act of government") (citing *Parker, 317 U.S. at 350-52*, and *Olsen v. Smith, 195 U.S. 332, 344-45, 25 S. Ct. 52, 49 L. Ed. 224 (1904))*.

P13 Berry contends Arizona's regulation of the practice of law is analogous to North Carolina's system of regulating dental practices. We disagree.

P14 The Board in *N.C. Dental* admitted it was not actively supervised by the state and therefore, without doubt, ineligible for immunity. *Id. at 1116*. The U.S. Supreme Court nonetheless identified "a few constant **[*8]** requirements of active supervision," namely:

> The supervisor must review the substance of the anticompetitive decision, not merely the procedures followed to produce it; the supervisor must have the power to veto or modify particular decisions to ensure they accord

---

[4] An exception exists where the law's "potential deterrent effect on *First Amendment* activities is 'both real and substantial.'" *Martin v. Reinstein, 195 Ariz. 293, 316, ¶ 78, 987 P.2d 779 (App. 1999)* (quoting *Maricopa Cty. Juv. Action No. JT9065297, 181 Ariz. 69, 73, 887 P.2d 599 (App. 1994))*. Although Berry contends *Rule 31* "outlaw[s]" commercial speech because it bans lawyer advertising, nothing in the text of the rule supports such an interpretation. Nor does he cite any authority suggesting he has a constitutional right to give legal advice in contravention of our supreme court rules prohibiting disbarred attorneys from practicing law.

[5] In conjunction with this argument, Berry argues *Rule 31* creates an illegal monopoly that only "promote[s] lawyer income and eliminate[s] competition [between lawyers and nonlawyers]." *See* *15 U.S.C. § 2* (designating the monopolization of trade or commerce as a felony offense); *see also* *A.R.S. § 44-1403*. Berry does not, however, suggest the State Bar controls pricing for legal services or that he, as a disbarred attorney, is a lawful competitor in the market for legal services. *See* *Pasco Indus., Inc. v. Talco Recycling, Inc., 195 Ariz. 50, 57-61, ¶¶ 22-49, 985 P.2d 535 (App. 1998)* (explaining how the elements of a monopolization claim may be proven). Therefore, we need not and do not address the argument.

> with state policy; and the "mere potential for state supervision is not an adequate substitute for a decision by the [s]tate." Further, the state supervisor may not itself be an active market participant.

Id. at 1116-17 (citing *Patrick v. Burget, 486 U.S. 94, 102-03, 108 S. Ct. 1658, 100 L. Ed. 2d 83 (1988)*, and then quoting *FTC v. Ticor Title Ins., 504 U.S. 621, 638, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992))*. "In general, the adequacy of supervision . . . will depend on all the circumstances of the case." *Id.*

P15 Examining those factors here, we find the State Bar adequately supervised by our supreme court. Indeed, the U.S. Supreme Court has previously recognized the Arizona Supreme Court's supervisory authority over the State Bar, noting that while "the State Bar plays a part in the enforcement of the rules, its role is completely defined by the [Arizona Supreme] [C]ourt; the [State Bar] acts as the agent of the court under its continuous supervision." *Bates v. State Bar of Ariz., 433 U.S. 350, 361, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977)* (holding an antitrust claim against the State Bar was precluded by *Parker* immunity). Our supreme court creates the rules and maintains the authority **[*9]** to veto or modify decisions of the State Bar. *See id. at 359-60* ("[T]he challenged [disciplinary rule] is the affirmative command of the Arizona Supreme Court . . . . That court is the ultimate body wielding the State's power over the practice of law, . . . adopt[s] the rules, and . . . is the ultimate trier of fact and law in the enforcement process."). The Arizona Rules of the Supreme Court govern both the substantive requirements for admission and continued membership in the State Bar and the attendant procedures. *See generally Ariz. R. Sup. Ct. 32 to 45*. Finally, the Arizona Supreme Court is not an active market participant; by definition, judicial members of the State Bar are "not engaged in the practice of law." *Ariz. R. Sup. Ct. 32(c)(6)*. Sufficient state supervision exists here, and antitrust laws do not prohibit the State Bar from enforcing our supreme court's regulations governing the practice of law and unauthorized practice of law.

CONCLUSION

P16 The superior court's judgment is affirmed.

Judges: JOHN D. BATES, United States District Judge.

Opinion by: JOHN D. BATES

Opinion

[*94] MEMORANDUM OPINION [2]**

The Federal Trade Commission petitions this Court for equitable relief, including a permanent injunction and monetary relief, against Surescripts, LLC pursuant to *Section 13(b) of the FTC Act*. See *15 U.S.C. § 53(b)*. The FTC alleges that Surescripts has violated *Section 2 of the Sherman Act* by maintaining a monopoly in two markets—electronic prescription routing and eligibility (explained below)—through anticompetitive conduct, including an exclusive loyalty- based pricing policy. Surescripts moves to dismiss, arguing (1) that the Court lacks subject matter jurisdiction under *Section 13(b) of the FTC Act*, and (2) that the FTC fails to state a claim under *Section 2 of the Sherman Act* because **[*95]** it does not allege either that Surescripts employed predatory pricing or that Surescripts's market behavior violated the rule of reason. For the reasons explained below, the Court will deny Surescripts's motion.

BACKGROUND

At the pleadings stage, the Court assumes the facts alleged in the complaint are true and presents them in the light most favorable to the plaintiff—here, the FTC. *Felter v. Kempthorne, 473 F.3d 1255, 1257, 374 U.S. App. D.C. 272 (D.C. Cir. 2007)*. Surescripts is a health information technology company operating in two complementary markets: electronic prescription routing ("routing") and eligibility, collectively known as "e-prescribing." Compl. for Injunctive **[**3]** & Other Equitable Relief ("Compl.") [ECF No. 1] ¶ 1. Routing involves the transmission of prescription-related data from a prescriber to a pharmacy via the prescriber's electronic health record ("EHR") system. Id. Eligibility involves the transmission of a patient's formulary and benefit information from a payer (often the patient's pharmacy benefit manager ("PBM")) to a prescriber's EHR. Id. Surescripts charges pharmacies a fee for each routing transaction and charges PBMs a fee for each eligibility transaction. Id. ¶ 49.

According to the FTC, Surescripts maintains at least a 95% share (by transaction volume) in each market using various anticompetitive measures. Id. ¶¶ 2-3. Beginning around 2009, Surescripts implemented a pricing policy that rewarded "loyal" (i.e., exclusive) customers with lower prices. Id. ¶ 2. "To be considered exclusive, Surescripts requires that a pharmacy ... route 100% of its transactions through and only through the Surescripts network." Id. 1166 (internal quotation marks omitted). "The same structure exists for PBMs in eligibility." Id. 1167. For routing, the cost to non-loyal customers varies by volume, but can be as high as [TEXT REDACTED BY THE COURT] more than for loyal **[**4]** customers; for eligibility, as high as [TEXT REDACTED BY THE COURT] more. Id. ¶¶ 70-71. Surescripts structured its contracts with EHR providers such that loyalty in either the routing or eligibility markets resulted in an incentive payment to the EHR provider of [TEXT REDACTED BY THE COURT] of the fees paid by the customers in that market; exclusivity in both markets resulted in an incentive payment of [TEXT REDACTED BY THE COURT] of the fees from both markets. Id. ¶ 77.

The FTC contends that "[t]hose effectively exclusive contracts foreclosed at least 70% of each market, eliminating multiple competitive attempts from other companies ... that offered lower prices and greater innovation." Id. ¶ 3. The FTC notes that these loyalty contracts are especially effective at excluding competition in the routing and eligibility markets because, given Surescripts's dominant position, almost all market entrants must compete for customers who already use Surescripts. Id. ¶ 32. To gain a foothold in either market, entrants must convince customers to engage in "multihoming," or the simultaneous use of Surescripts as well as one or more competitors. Id. The FTC alleges that, by raising the cost of **[**5]** multihoming, Surescripts hindered customers' ability to "multihome" and "significantly elevat[ed] the critical mass [of initial customers] a Surescripts competitor would need to become a viable network in either routing or eligibility." Id.

Beyond the loyalty program, Surescripts employed "threats and other non-merits based competition" to keep its customers from working with its competitors. Id. ¶ 4. For instance, when a competitor, Emdeon, attempted to enter the market through contracts with Allscripts, a large EHR, Surescripts relied on its market power to force Allscripts into exclusive contracts that prevented a renewal of Allscripts's **[*96]** contract with Emdeon. Id. ¶¶ 110-11. Surescripts also entered into a non-compete agreement with another competitor, RelayHealth, which prevented RelayHealth from capturing up to 15-20% of the routing market. Id. if 5; see also id. ¶¶ 88-99. The FTC alleges that these exclusive arrangements have allowed Superscripts to impose heightened prices on large portions of the markets, see, e.g., id. ¶¶ 187-95, and have stifled innovation and reduced quality in the two e-prescribing markets, id. ¶ 196-215.

Surescripts moves to dismiss the FTC's complaint, arguing **[**6]** that this case is both procedurally and substantively defective. Surescripts, LLC's Mot. to Dismiss Compl. ("Def.'s Mot.") [ECF No. 32] ¶¶ 1-3. First, Surescripts argues that the Court lacks subject matter jurisdiction over the request for a permanent injunction because the FTC cannot establish that this case is "proper" under *Section 13(b) of the FTC Act*. Id. ¶ 1; see also *15 U.S.C. § 53(b)*. Second, Surescripts argues that the FTC's complaint fails to state a claim under *Section 2 of the Sherman Act* because it does not allege that the prices offered by Surescripts were predatory or that Surescripts's market practices violated the rule of reason. Def.'s Mot. ¶¶ 2-3.

LEGAL STANDARD

When considering a motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*, a court presumes the truth of a complaint's factual allegations, though it is "not bound to accept as true a legal conclusion couched as a factual allegation:" *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal quotation omitted). The court then asks whether the facts alleged suffice "to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (internal quotation omitted). The court considers "facts alleged in the complaint, any documents either attached to or incorporated in the complaint and matters of which [the Court] may take judicial notice." *Mpoy v. Rhee, 758 F.3d 285, 291 n.1, 411 U.S. App. D.C. 94 (D.C. Cir. 2014)* (internal **[**7]** quotation omitted).

Under *Rule 12(b)(1)*, a court has an affirmative obligation to ensure that it is acting within the scope of its jurisdictional authority. *Grand Lodge of the Fraternal Order of Police v. Ashcroft, 185 F. Supp. 2d 9, 13 (D.D.C. 2001)*. "[The] court must dismiss a case when it lacks subject matter jurisdiction." *Randolph v. ING Life Ins. & Annuity Co., 486 F. Supp. 2d 1, 4 (D.D.C. 2007)*. "[P]laintiff's factual allegations in the complaint ... will bear closer scrutiny in resolving a 12(b)(1) motion than in resolving a 12(b)(6) motion for failure to state a claim." *Grand Lodge, 185 F. Supp. 2d at 13-14* (internal quotation marks omitted). And the court may consider material other than allegations in the complaint in determining whether it has jurisdiction to hear the case. See *Settles v. U.S. Parole Comm'n, 429 F.3d 1098, 1107, 368 U.S. App. D.C. 297 (D.C. Cir. 2005)*.

ANALYSIS

I. Subject Matter Jurisdiction Under *Section 13(b)*

Surescripts first contends that the Court lacks subject matter jurisdiction over this dispute. Mem. in Supp. of Surescripts, LLC's Mot. to Dismiss Compl. ("Def.'s Mem.") [ECF No. 32] at 13-29. Surescripts argues that *Section 13(b) of the FTC Act* limits the Court's power to issue permanent injunctions upon request by the FTC to "proper cases," which Surescripts interprets as "routine, straightforward" cases. *Id. at 17-18*; see also *15 U.S.C. § 53(b)*. This case, Surescripts continues, does not qualify as routine or straightforward because it involves complex and novel **[*97]** issues of ***antitrust law***, such as how to understand the two-sided **[**8]** e-prescription markets of routing and eligibility in light of the Supreme Court's recent decision in *Ohio v. American Express Co. ("Amex"), 138 S. Ct. 2274, 201 L. Ed. 2d 678 (2018)*. Def.'s Mem. at 24-29.

The FTC responds in two ways. First, the FTC argues that the "proper cases" language in *Section 13(b)* does not limit courts' jurisdiction to hear cases brought under the Act. Pl. FTC's Mem. of Law in Opp'n to Def. Surescripts, LLC's Mot. to Dismiss Compl. ("Pl.'s Opp'n") [ECF No. 36] at 10-12. The FTC argues that the language of *Section 13(b)* does not clearly speak to courts' power to adjudicate such claims. Pl.'s Opp'n at 11 (citing *Arbaugh v. Y&H Corp., 546 U.S. 500, 515-16, 126 S. Ct. 1235, 163 L. Ed. 2d 1097 (2006))*. Second, the FTC contends that this case is "proper" because that term just means "any case in which a permanent injunction would be `appropriate,' i.e., any case in which a law enforced by the FTC has been violated and equitable remedies are needed to make harmed consumers whole." Id. at 13. The FTC has the stronger argument on both points.

A. Whether "Proper Cases" Is a Jurisdictional Requirement

The Supreme Court has established a clear-statement rule for determining whether statutory elements constitute jurisdictional requirements. See *Arbaugh, 546 U.S. at 515*. "[W]hen Congress does not rank a statutory limitation ... as jurisdictional, courts should **[**9]** treat the restriction as nonjurisdictional in character." *Id. at 516*. Here, the relevant provision reads: "in proper cases the Commission may seek, and after proper proof, the court may issue, a permanent injunction." *15 U.S.C. § 53(b)*. Neither this specific provision nor *Section 13(b)*'s broader framework for seeking equitable relief even include the word "jurisdiction," let alone a clear statement that any of the statutory requirements are jurisdictional. As the Third Circuit recently concluded when analyzing the same provision, "*Section 13(b)* includes no indicia that Congress intended to rank a statutory limitation ... as jurisdictional." *FTC v. Shire ViroPharma, Inc., 917 F.3d 147, 154 (3d Cir. 2019)* (internal quotation marks omitted).

Surescripts's best textual argument for reading "proper cases" as a jurisdictional requirement comes from the label of *Section 13(a)*—"Power of Commission; jurisdiction of courts." Reply Mem. in Supp. of Surescripts, LLC's Mot. to Dismiss Compl. ("Def.'s Reply") [ECF No. 39] at 4. Because *Section 13(a)* "is identical to *Section 13(b)* in structure," Surescripts argues that the latter section too should be read as jurisdictional. Id. Under Arbaugh, however, the inquiry is whether Congress "clearly states that a threshold limitation on a statute's scope" is jurisdictional, and Surescripts's structural argument **[**10]** from *Section 13(a)*'s label falls short of this high bar. *546 U.S. at 515* (emphasis added). Indeed, *Section 13(b)*—the actual section at issue here—has a separate and distinct label ("Temporary restraining orders; preliminary injunctions") that does not include any reference to jurisdiction. See *15 U.S.C. § 53(a)—(b)*; cf. *Reed Elsevier, Inc. v. Muchnick, 559 U.S. 154, 164, 130 S. Ct. 1237, 176 L. Ed. 2d 18 (2010)* (noting that the Copyright Act's registration requirement for bringing an infringement action "is located in a provision `separate' from those granting federal courts subject-matter jurisdiction over those respective claims").

Surescripts also emphasizes that the FTC has itself cited *Section 13(b)* as the basis for personal jurisdiction and as "empower[ing] this Court to issue a permanent **[*98]** injunction." See Def.'s Reply at 4 (internal quotation and emphasis omitted); see also Compl. at 54. But the agency's framing of this language as "empower[ing]" the Court does not thereby transform the language of *Section 13(b)* into a threshold jurisdictional requirement.

Finally, although not dispositive, it is worth noting that the opposite conclusion would create a cumbersome threshold test whenever the FTC seeks a permanent injunction. Pl.'s Opp'n at 20-21; see also Tr. of Mot. Hr'g [ECF No. 41] at 49:3-6 (arguing that the FTC's "interpretation is the one that relies **[**11]** on the plain language of the statute and doesn't saddle the Court with the burden of deciding what a routine case is or not"). Under defendant's jurisdictional interpretation, courts would need to decide whether the claims brought are "straightforward" or "routine" and to assess the novelty or complexity of the claims' merits before deciding whether to hear the case in the first place. Pl.'s Opp'n at 20-21. This requirement is unwieldy and, given the dearth of textual support for a jurisdictional reading, suggests that the "proper cases" element is not jurisdictional.

B. Whether the FTC Pleaded a "Proper Case"

The FTC also prevails on the substance of this issue, for even if "proper cases" is jurisdictional, the agency has pleaded sufficient facts to clear the mark. Cf. Def's Reply at 3 (arguing that the "proper cases" question can be addressed under either *Fed. R. Civ. P. 12(b)(1)* or *Fed. R. Civ. P. 12(b)(6)*).

Surescripts argues for a narrow interpretation of "proper cases" that limits the FTC's power to seek permanent injunctions to instances of routine fraud or other straightforward violations of the FTC's substantive statutes. Def.'s Mem. at 17-18. Surescripts insists that "proper cases" cannot consist of "'all cases' in which **[**12]** the FTC asserts a violation of the laws it enforces" because that would render the phrase superfluous. Id. at 17. Surescripts also points to the legislative history, which suggests that at least one purpose for the permanent injunction provision was to permit the FTC "in the routine fraud case, to merely seek a permanent injunction in those situations in which it does not desire to further expand upon the prohibitions of the Federal Trade Commission Act." *Id. at 18* (internal quotation and emphasis omitted). And Surescripts cites two cases that rely on a narrow interpretation of "proper cases"—*FTC v. Abbott Labs., Civ. A. No. 92 1364, 1992 U.S. Dist. LEXIS 18030, 1992 WL 335442 (D.D.C. Oct. 13, 1992)*, and *FTC v. World Travel Vacation Brokers, Inc., 861 F.2d 1020 (7th Cir. 1988)*—as well as public statements by former FTC officials framing "proper cases" as involving straightforward violations. Def.'s Mem. at 18-24.

There is thus considerable weight to Surescripts's argument that "proper cases" is not synonymous with "all cases," for such an interpretation would make the phrase superfluous. At the same time, this Court's task is not to define the term "proper cases" for all scenarios, but to determine whether this case is proper. The FTC grounds its legal argument here in Circuit precedent, *United States v. Microsoft Corp., 253 F.3d 34, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (en bane) (per curiam), and does not seek to rely on its agency expertise to develop the law. **[**13]** See Pl.'s Opp'n at 21; Tr. of Mot. Hr'g at 67:12-16 (FTC noting that "Microsoft is the primary authority in this case" and suggesting that the Court will not "have to go much beyond Microsoft"). Under such circumstances, the Court concludes that the complaint adequately alleges a "proper case."

[*99] In terms of the statutory text, the language of *Section 13(b)* affords little evidence one way or the other, but it is at least not necessary to read the phrase "proper cases" so narrowly as to mean "straightforward" or "non-novel" cases, as Surescripts suggests. Def.'s Mem. at 22-24. Given that the phrase "proper cases" is embedded in the second "Provided" portion of *Section 13(b)*, the phrase might be seen as merely distinguishing between those disputes suited for a temporary injunction—the subject of most of *Section 13(b)*—and those cases better suited for a permanent injunction. See *15 U.S.C. § 53(b)*. Or, given the requirement that the FTC must present "proper proof," "proper cases" might be interpreted as involving disputes that do not require the exercise of the FTC's scientific expertise. See J. Howard Beales III & Timothy J. Muris, Striking the ProperBalance: Redress Under *Section 13(b) of the FTC Act*, 79 Antitrust L.J. 1, 31-33 (2013). If a district court determined that the targeted entity did not have **[**14]** fair notice or that an administrative proceeding would be more "proper," then the court might rule against a permanent injunction. See id. at 31; see also id. at 9-13. The text alone, then, thus does not dictate either Surescripts's narrow reading of "proper cases" or the FTC's broader interpretation.

Looking beyond the text, all other factors suggest that a broader reading is correct. In terms of case law, a number of other courts have concluded that "proper cases" include more than "routine" violations. See, e.g., *FTC v. Evans Prods. Co., 775 F.2d 1084, 1086-87 (9th Cir. 1985)* (noting that *Section 13(b)* may authorize a permanent injunction in instances beyond the routine fraud case); *FTC v. AmeriDebt, Inc., 373 F. Supp. 2d 558, 562-63 (D. Md. 2005)* (agreeing with the FTC's reading of "proper case" as "simply one that involves a violation of any provision of law enforced by the Commission" (internal quotation marks omitted)); see also Pl.'s Opp'n at 17 20. Indeed, the FTC states that it has often relied on "*Section 13(b)* in a wide variety of non-'routine' cases. See Pl.'s Opp'n at 18 & n.17 (citing *FTC v. Qualcomm Inc., No. 17-CV-00220 LHK, 411 F. Supp. 3d 658, 2019 U.S. Dist. LEXIS 86219, 2019 WL 2206013 (N.D. Cal. May 21, 2019)*; *FTC v. Cephalon, Inc., No. 2:08-cv-2141 MSG, 2019 U.S. Dist. LEXIS 83199, 2019 WL 2111253 (E.D. Pa. Feb. 21, 2019)*; *FTC v. AbbVie Inc., 329 F. Supp. 3d 98 (E.D. Pa. 2018))*; see also *FTC v. Mylan Labs., Inc., 62 F. Supp. 2d 25, 36 (D.D.C. 1999)* ("[T]his Court finds that the permanent injunction proviso may be used to enjoin violations of any provision of law enforced by the FTC." (internal quotation marks omitted)).

[15]** Surescripts's authorities to the contrary are all wanting. In World Travel, the Seventh Circuit held that "it is quite clear that Congress at least expected that the FTC could rely on *[Section 13(b)]* when it sought to halt a straightforward violation of *section 5 [of the FTC Act]* that required no application of the FTC's expertise to a novel regulatory issue through administrative proceedings." *861 F.2d at 1028* (emphasis added). Abbott Labs., quoting this language from World Travel, noted that "Federal Courts have shied away from accepting direct court actions by the Commission . . . if the offending conduct interjects the court into areas of Commission expertise involving the creation and monitoring of new concepts of unfair competitive trade practice." *1992 U.S. Dist. LEXIS 18030, 1992 WL 335442, at *2*. But Abbott Labs. cites no authority other than World Travel for this gloss on *Section 13(b)*, and World Travel elsewhere acknowledges that "[a] substantial argument can be made that the statutory language, when read with [the] legislative history, permits the FTC to proceed under the last proviso of *13(b)* for any violation of a statute administered by the FTC." *861 F.2d at 1028*.

[*100] Surescripts's other arguments fare no better. To the extent that the Court considers legislative history, the Senate report cited by Surescripts does highlight the ability of the FTC to seek a permanent injunction immediately "in the routine fraud case." Def.'s Mem. at 18 (quoting Senate Committee on Commerce, Magnuson-Moss Warranty-Federal Trade Commission Improvement Act, S. Rep. No. 93-151, at 31 (1973)). But the report does not say that such circumstances are the only time that the FTC can seek such an injunction. See id. Likewise, many of the statements and academic articles that Surescripts marshals from former FTC Commissioners and other agency officials conclude that permanent injunctions are ill suited for cases requiring the FTC's expertise and the development of law through the administrative process, but they do not then go on to preclude a case brought under circuit precedent. See id. at 21-23.

Surescripts's argument thus largely rests on authorities that acknowledge straightforward cases as the paradigm applications of *Section 13(b)*, but do not preclude pursuing **[**16]** other claims. See *Evans Prods., 775 F.2d at 1086-87*. In agreement with the clear weight of relevant cases, the Court concludes that the FTC's complaint sufficiently pleads a "proper" case for a permanent injunction under *Section 13(b)*.

II. Failure to State a Claim Under *Section 2* of the Sherman Act

Surescripts next argues that the FTC's claim should be dismissed under *Fed. R. Civ. P. 12(b)(6)* because the FTC's complaint fails to allege a violation of *Section 2 of the Sherman Act*. See Def.'s Mem. at 29-45. First, Surescripts suggests that the FTC's monopolization claim must fail because Surescripts's loyalty program was entirely optional and, therefore, its low prices could constitute anticompetitive conduct only if they were "predatory," which Surescripts denies. Id. at 30-31. Surescripts emphasizes that the FTC's complaint did not plead the necessary elements of predatory pricing. Id. at 33-34. Second, Surescripts argues that, even under the framework of exclusive dealing, the FTC's claim would fail under the rule of reason because the FTC's complaint did not adequately allege that Surescripts's loyalty programs created any anticompetitive effects. Id. at 34-45. Once again, the FTC has the stronger argument on both fronts.

A. Exclusionary Contracts v. Predatory Pricing

The offense of monopolization has two **[**17]** elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. Surescripts does not challenge the allegation that the company maintains a monopoly over the routing and eligibility markets, see Def.'s Mem. at 29-30, and thus the only question is whether "Surescripts has illegally maintained its monopolies through exclusionary conduct," Pl.'s Opp'n at 22.

For an exclusionary act to be anticompetitive, "it must harm the competitive process and thereby harm consumers." *Microsoft Corp., 253 F.3d at 58* (emphasis omitted). Here, the FTC alleges that Surescripts's loyalty programs—and the implicit threat to charge non-exclusive customers higher prices—prevented the entrance of competitors into e-prescribing markets. Compl. ¶ 58. The absence of competitors, in turn, allegedly led to increased prices for pharmacies and PBMs and lower **[*101]** incentive payments for EHRs. See id. ¶¶ 187-93. At least on the face of its complaint, then, the FTC appears to allege facts sufficient to state a claim under *Section 2 of the Sherman Act*. See *Iqbal, 556 U.S. at 678*.

Surescripts's arguments **[**18]** to the contrary are unavailing. First, the company emphasizes that its loyalty programs are entirely optional and thus do not necessarily constitute exclusive contracts. See Def.'s Mem. at 31. But a contract need "not contain specific agreements not to use the [services] of a competitor" as long as "the practical effect . . . is to prevent such use." *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 326, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)* (quoting *United Shoe Mach. Corp. v. United States, 258 U.S. 451, 457, 42 S. Ct. 363, 66 L. Ed. 708 (1922))*. The FTC alleges that the threat of increased prices had the "practical effect" of preventing customers from working with other e-prescribing platforms, "since doing so would trigger the massive penalty provisions in their contracts with Surescripts . . . and cost routing [and eligibility] customers millions of dollars through increased prices or, for EHRs, decreased incentive payments." Compl. ¶ 129; see also id. ¶ 79 (alleging that EHRs that "violate[] the exclusivity commitment" must "pay back [to Surescripts] the incentive fees for historical transaction volume"). Surescripts highlights that some customers, like Kroger, did manage to "multihome" and have a non-exclusive relationship with Surescripts, Def.'s Mem. at 31, but the test of whether a monopolist forecloses competition "is not total foreclosure, but whether the **[**19]** challenged practices bar a substantial number of rivals or severely restrict the market's ambit." *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 191 (3d Cir. 2005)*; see also *Microsoft, 253 F.3d at 70-71* (noting that the use of exclusive contracts can violate *§ 2* even if the contracts foreclose less than 40% or 50% of the market share). Here, the government has pleaded facts demonstrating such substantial foreclosure. See, e.g., Compl. ¶¶ 3, 135.

Surescripts next suggests that optional low pricing loyalty programs are unlawful only when they constitute "predatory" pricing, which the FTC has not pled. Def.'s Mem. at 31. But none of the authorities Surescripts cites stands for the proposition that a plaintiff must allege predatory pricing to succeed on a *Section 2* claim. For instance, *Pac. Bell Tel. Co. v. LinkLine Commc'ns, Inc., 555 U.S. 438, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*, did not concern effectively exclusionary contracts, but price-squeezing. *Id. at 451*. In *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039 (8th Cir. 2000)*, the court examined a loyalty discount program that required at most 80% compliance in the boat market, making the exclusive pressures created by the program materially different than the dynamics arising from Surescripts's total loyalty scheme. *Id. at 1044*. And in *NicSand, Inc. v. 3M Co., 507 F.3d 442 (6th Cir. 2007)* (en banc), the defendant 3M was not a monopolist. *Id. at 451-52*.

Surescripts also mischaracterizes the holdings in Microsoft. It quotes the court's statement that "offering **[**20]** a customer an attractive deal is the hallmark of competition" unless that price is "predatory," but that statement concerned only Microsoft's offering Internet Explorer free of charge. *Microsoft, 253 F.3d at 67-68*; Def.'s Mem. at 31. The relevant portion of the en banc D.C. Circuit's decision for this case is its ruling that Microsoft's exclusive contracts did violate *Section 2 of the Sherman Act*; the court noted that Microsoft's exclusive dealing with fourteen of the fifteen access providers in North America effectively cut off one of the two major channels by which competitors could enter the internet **[*102]** browser market. *Microsoft, 253 F.3d at 68-71*. These contracts "clearly ha[d] a significant effect in preserving its monopoly; they help[ed] keep usage of [Microsoft's competitor] below the critical level necessary for [it] or any other rival to pose a real threat to Microsoft's monopoly." *Id. at 71*.

Like the behavior at issue in *Microsoft*, Surescripts's alleged practice of charging loyal pharmacies and PBMs less, and paying loyal EHRs greater incentives, do not need to constitute predatory pricing for Surescripts's exclusionary practices to constitute illegal maintenance of a monopoly. See *Grinnell, 384 U.S. at 570-71*. "Where, as here, a dominant supplier enters into exclusive dealing **[**21]** arrangements with every customer in the market, other firms may be driven out not because they cannot compete on a price basis, but because they are never given an opportunity to compete . . . ." *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 281 (3d Cir. 2012)*.

Surescripts argues that Third Circuit cases like ZF Meritor have not been adopted in the D.C. Circuit and that (for this Court) predatory pricing still remains an essential element of proving that a loyalty program is unlawful. Def.'s Mem. at 32-33. However, although the D.C. Circuit has cast doubt on the Third Circuit's decision in *LePage's Inc. v. 3M, 324 F.3d 141 (3rd Cir. 2003)* (en banc), see *FTC v. Church & Dwight Co., 665 F.3d 1312,1316, 398 U.S. App. D.C. 449 (D.C. Cir. 2011)*, much of that criticism was focused on the conclusion that "bundling" rebates (i.e., requiring retailers to carry multiple products to receive certain rebates) are anticompetitive, rather than on the Third Circuit's discussion of the exclusionary practices in question here, see *id. at 1316-17*. And even without these persuasive precedents, the FTC's allegations still state a claim of monopolization under the D.C. Circuit's decision in Microsoft. See *253 F.3d at 69-71*.

B. Rule of Reason

Surescripts next contends that, if its loyalty contracts are viewed as exclusive dealing, the FTC's claims fail under the rule of reason. Def.'s Mem. at 34. Surescripts argues **[**22]** that "the FTC bears the burden of demonstrating that Surescripts'[s] alleged contractual provisions have an anticompetitive effect on competition," which in an exclusive dealing case means that Surescripts's conduct "foreclose[d] competition in a substantial share of the line of commerce affected." *Id. at 35* (quoting *Microsoft, 253 F.3d at 69*). In particular, Surescripts suggests that, because the FTC concedes that both routing and eligibility are two-sided markets, "the FTC must plausibly plead foreclosure of a substantial share of each of those markets as a whole." Id. Surescripts insists that the FTC's complaint fails to allege either anticompetitive effects or foreclosure. Id.

The Court concludes, to the contrary, that the FTC has met its burdens. Exclusivity provisions covering about 40-50% of the relevant market have been found to foreclose competition illegally, see *Microsoft, 253 F.3d at 70*, and Surescripts's loyalty program allegedly places 70-80% of the routing and eligibility markets into effectively exclusive contracts, Pl.'s Opp'n at 35; Compl. ¶¶ 172-76. Surescripts insists that, under the Supreme Court's recent decision in Amex, the FTC must plead facts showing "anticompetitive effects in the market as a whole and cannot focus **[**23]** only on the effects on one side." Def.'s Mem. at 37; see also id. at 35-40. But the FTC's complaint does just what Surescripts wants, alleging that Surescripts's loyalty program "foreclosed at least 70% of each market," i.e., at least 70% of both two-sided markets at issue. Compl. ¶ 3 (emphasis added); see also id. **[*103]** ¶ 187 ("But for Surescripts's anticompetitive course of conduct, the net price (taking into account both sides of the network) of the routing transaction would be lower. Similarly, without Surescripts's loyalty contracts, the net price (taking into account both sides of the network) of the eligibility transaction would be lower.").

Surescripts argues that these statements are conclusory and that the FTC does not plead sufficient facts to survive the motion to dismiss. Def.'s Mem. at 38; see also *Iqbal, 556 U.S. at 678* ("A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged."). Surescripts acknowledges, for instance, that the complaint includes an allegation that, "in the routing market, the FTC states that [a competitor] charges [certain] pharmacies lower prices than does Surescripts," **[**24]** but notes that "the FTC does not make any allegations concerning EHRs' incentive payments from Surescripts or [the competitor] for those [same] routing transactions." Def.'s Mem. at 39. Surescripts similarly concedes that the complaint alleges that a competitor charged one PBM a lower price than Surescripts, but highlights the absence of "facts showing higher net-transaction prices across that market as a whole." Id.

This argument is wrong for two reasons. First, Surescripts reads too much into Amex. That case concerned an alleged restraint of trade in violation of *Section 1 of the Sherman Act*, and the Supreme Court determined that plaintiffs failed to offer evidence that the price of credit-card transactions was higher than would be expected in a competitive market because the plaintiffs provided no "reliable measure of Amex's transaction price or profit margins." *138 S. Ct. at 2288*. The Court also concluded that "Amex's increased merchant fees reflected] increases in the value of its services and the cost of its transactions, not an ability to charge above a competitive price." Id. Amex was not a monopolist. *Id. at 2282* ("Visa . . . has 45% of the market as measured by transaction volume. Amex and MasterCard trail with **[**25]** 26.4% and 23.3%, respectively . . . .").

Here, on the other hand, the FTC brings a claim of monopolization under *Section 2 of the Sherman Act* against Surescripts, an undisputed monopolist. Regardless of Surescripts's specific above-market fees or below-market incentives, the central question is whether the FTC alleged that Surescripts engaged in exclusionary conduct that "harmed competition, not just a competitor," by blocking entrants into the market. *Microsoft, 253 F.3d at 59*. The FTC has done just that. See, e.g., Compl. ¶¶ 3,135,172-81.

But, even assuming that Surescripts is correct in its interpretation of Amex, the FTC still pleaded sufficient facts addressing the totality of both two-sided markets. In addition to charging lower fees to pharmacies and PBMs, the

FTC alleges that one competitor was also willing to pay higher incentives to EHRs. Id. ¶ 192. Thus, on both sides of the market, Surescripts stood to gain above-market returns, charging higher fees and paying out lower incentives than its competitors. The FTC also alleges that Surescripts engaged in other anticompetitive conduct, like forcing key customers to terminate association with competitors. Id. ¶ 111. The FTC alleges that this conduct hurt innovation, **[**26]** decreased output, and lowered quality. Id. ¶¶ 196-215. Surescripts's response is largely factual, denying the FTC's allegations. Def.'s Mein. at 41-42. But such denials are not adequate grounds for dismissing the FTC's complaint; rather, they speak to the merits and the need for further **[*104]** factual development through discovery.

Finally, Surescripts argues that the FTC failed to plead sufficient facts showing that Surescripts's business practices foreclosed market competition to a "substantial" degree. Id. at 42-45. Surescripts observes that exclusive dealing is illegal only if the arrangement "substantially" weakens competition, see *Eisai, Inc. v. Sanofi Aventis U.S., LLC, 821 F.3d 394, 403-04 (3d Cir. 2016)*, and insists that its contracts, even if facially exclusive, were easily terminable, of short duration, and therefore presumptively lawful, see, e.g. *Roland Mach. Co. v. Dresser Indus., Inc., 749 F.2d 380, 395 (7th Cir. 1984)*. Def.'s Mem. at 42.

Once again, however, Surescripts's argument turns on a factual dispute ill suited for the pleadings stage. Compare Pl.'s Opp'n at 30-32; Compl. ¶¶ 84-86, with Def.'s Reply at 18-20. Under Supreme Court precedent, the relevant inquiry is fact intensive:

> To determine substantiality in a given case, it is necessary to weigh the probable effect of the contract on the relevant area of effective competition, **[**27]** taking into account the relative strength of the parties, the proportionate volume of commerce involved in relation to the total volume of commerce in the relevant market area, and the probable immediate and future effects which pre-emption of that share of the market might have on effective competition therein.

Tampa Elec., 365 U.S. at 329. Even if the contracts were short term and easily terminable, the FTC argues that their exclusive terms, when combined with the nature of the two relevant markets and Surescripts's dominant monopoly position, had the effect of foreclosing large parts of both markets and harming competition. Pl.'s Opp'n at 31-32; cf. *Microsoft, 253 F.3d at 70-71* (analyzing whether Microsoft's exclusive contracts had "a significant effect in preserving its monopoly"). Further factual development may vindicate Surescripts's position, but the FTC's complaint contains sufficient facts to move beyond the pleadings stage.

CONCLUSION

For all the foregoing reasons, Surescripts's motion to dismiss will be denied. A separate order will issue on this date.

/s/ JOHN D. BATES

United States District Judge

Dated: January 17, 2020

[EDITOR'S NOTE: The following court-provided text does not appear at this cite in F. Supp. 3d.]

[*none] ORDER

Upon consideration of [32] defendant Surescripts, LLC's motion to dismiss, and the entire record herein, and **[**28]** for the reasons explained in the accompanying Memorandum Opinion, it is hereby

ORDERED that [32] defendant's motion to dismiss is **DENIED**; and it is further

ORDERED that the parties shall meet and confer, and shall thereafter submit to the Court, by not later than February 14, 2020, either joint or separate proposals as to how the case should proceed, along with proposed schedules for any discovery or summary judgment briefing. A status conference is hereby set for February 19, 2020, at 9:30 a.m. in Courtroom 30.

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN3[] Entitlement as Matter of Law, Genuine Disputes

Summary judgment is properly granted when there are no disputed questions of material fact and the moving party is entitled to judgment as a matter of law. An appeal on summary judgment comes to the court as a de novo review, as the matter presents only questions of law, not fact. The Supreme Court of Oklahoma assumes plenary independent and non-deferential authority to reexamine a trial court's legal rulings.

Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation

Constitutional Law > State Constitutional Operation

HN4[] Case or Controversy, Constitutionality of Legislation

The Supreme Court of Oklahoma is the final interpreter of Oklahoma's laws, including the Oklahoma Constitution. The court is bound to follow the Oklahoma Constitution, and the court cannot circumvent it because of private notions of justice or because of personal inclinations. In assessing the conformity of a challenged state statute to the court's fundamental law, the court is guided by well-established principles. The Constitution is the bulwark to which all statutes must yield.

Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation

HN5[] Case or Controversy, Constitutionality of Legislation

The objective of construing the Oklahoma Constitution is to give effect to the defendant intent, as well as the people adopting it. When a challenge is limited to the Oklahoma Constitution, the Supreme Court of Oklahoma looks first to its language, which if unambiguous, binds the court. Every provision of the Constitution and statutes of Oklahoma is presumed to have been intended for some useful purpose and every provision should be given effect. Every each portion of the Constitution was intended to be operative and not surplus language. The court, therefore, construes constitutional provisions as a consistent whole in harmony with common sense and reason. The court will uphold a duly enacted statute unless it is clearly, palpably and plainly inconsistent with the Constitution.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Distribution, Processing & Storage

Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation

Constitutional Law > State Constitutional Operation

HN6[] **Agriculture & Food, Distribution, Processing & Storage of Food & Agricultural Products**

The Supreme Court of Oklahoma must interpret constitutional provisions in conformity with their ordinary significance in the English language-given their commonly accepted and nontechnical meaning. The clear and ordinary language of Okla. Const. art. 28A, § 2(A)(2) allows a liquor or wine manufacturer to select one or more than one wholesaler to distribute its product. The second sentence of the section provides that a manufacturer may sell such brands to any licensed wholesaler who desires to purchase the same. "May" denotes that an action is permissive or discretional, and not mandatory. The third sentence further clarifies the second and states: "Provided, if a manufacturer elects to sell its products to multiple wholesalers, such sales shall be made on the same price basis." By providing direction to manufacturers when they choose to sell to more than one wholesaler, Okla. Const. art. 28A, § 2(A)(2) implies that a manufacturer can also select only one wholesaler. The third sentence is purely conditional based on a manufacturer's decision to elect to sell to more than one wholesaler and forbids price discrimination when a manufacturer elects to do so. the supreme court must conclude then that a manufacturer can elect to sell to only one wholesaler.

Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation

HN7[] **Case or Controversy, Constitutionality of Legislation**

Constitutional construction requires the Supreme Court of Oklahoma to garner the drafter's intent, as well as the people adopting it, from the plain language of the provision.

Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation

HN8[] **Case or Controversy, Constitutionality of Legislation**

An amendment to a constitutional provision that has been judicially interpreted is presumed to have changed the existing law.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Distribution, Processing & Storage

Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation

Constitutional Law > State Constitutional Operation

HN9[] **Agriculture & Food, Distribution, Processing & Storage of Food & Agricultural Products**

"Shall" is usually given its common meaning of must implying a command or mandate. From its plain language, Senate Bill 608 modifies the alcohol distribution scheme by mandating that all manufacturers of the top 25 brands of liquor and wine-as determined by the ABLE Commission each quarter-sell those products to every licensed wine and spirits wholesaler who desires to purchase the same on the same price basis and without discrimination or inducements. *Okla. Stat. tit. 37A, § 3-116.4* (Supp. 2019). Senate Bill 608 thus infringes on a manufacturer's constitutionally granted discretion to select one wholesaler to the exclusion of all others, as it mandates that a manufacturer of a top 25 brand must sell to all wholesalers. Senate Bill 608's infringement of Okla. Const. art. 28A, § 2(A)(2) is unconstitutional.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Distribution, Processing & Storage

Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation

Constitutional Law > State Constitutional Operation

HN10[] **Agriculture & Food, Distribution, Processing & Storage of Food & Agricultural Products**

The entirety of the Oklahoma Constitution applies with equal force to statutes enacted pursuant to *Okla. Const. art. V, §§ 44* and *51*. The Oklahoma Constitution prevails over a conflicting statute, and where a statute violates one constitutional provision, another constitutional provision cannot save it.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > State Regulation

Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Distribution, Processing & Storage

Constitutional Law > State Constitutional Operation

HN11[] **Trade Practices & Unfair Competition, State Regulation**

The passage of Okla. Const. art. 28A confines anticompetitive constitutional provisions. Prior holdings of the Supreme Court of Oklahoma instruct that if there is a conflict between a constitutional amendment and other, earlier passed, provisions of the Oklahoma Constitution, the more recent amendment prevails. Article 28A's change in the manufacturing-wholesaling distribution tier is the most recent constitutional change, and if there is a conflict, it controls over any other constitutional provision.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > State Regulation

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Distribution, Processing & Storage

Constitutional Law > The Judiciary > Case or Controversy > Constitutionality of Legislation

Constitutional Law > State Constitutional Operation

HN12[] **Trade Practices & Unfair Competition, State Regulation**

The plain language of Okla. Const. art. 28A, § 2(A)(2) is not in conflict with the anticompetitive provisions of the Constitution. *Okla. Const. art. V, § 44*. Okla. Const. art. 28A, § 2(A)(2)'s discretion allows liquor and wine manufacturers and wholesalers to have exclusive distributorships, and the Supreme Court of Oklahoma has upheld exclusive distributorships as lawful. Senate Bill 608 is not a proper use of legislative authority under the anticompetitive provisions of the Oklahoma Constitution.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > State Regulation

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Distribution, Processing & Storage

HN13[] **Trade Practices & Unfair Competition, State Regulation**

The plain language of Senate Bill 608 shows that the statute is not an operation of the Legislature's power to combat anticompetitive markets pursuant to *Okla. Const. art. V, § 44*. Senate Bill 608 does not define an unlawful restraint of trade nor does it set forth any punishment for those entities engaging in unlawful restraint of trade. Further, Senate Bill 608 only deals with the top 25 brands of liquor and wine as determined by the ABLE Commission every quarter. To apply the State's argument beyond the top 25 brands specified in Senate Bill 608, the statute would allow for a restraint of trade on thousands of other brands of liquor and wine. If Senate Bill 608 was an anticompetitive measure, it would logically restrict anticompetition on all brands of liquor and wine.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Distribution, Processing & Storage

Constitutional Law > ... > Case or Controversy > Constitutionality of Legislation > Inferences & Presumptions

Constitutional Law > State Constitutional Operation

HN14[] **Agriculture & Food, Distribution, Processing & Storage of Food & Agricultural Products**

The Supreme Court of Oklahoma must always presume that a law is constitutional unless clearly, palpably, and plainly inconsistent with the Constitution. Senate Bill 608 is clearly, palpably, and plainly inconsistent with Okla. Const. art. 28A, § 2(A)(2)'s grant of discretion to a liquor or wine manufacturer to determine what wholesaler sells its product.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Distribution, Processing & Storage

Constitutional Law > State Constitutional Operation

HN15[] **Agriculture & Food, Distribution, Processing & Storage of Food & Agricultural Products**

The Supreme Court of Oklahoma must uphold the will of the people of Oklahoma who voted to adopt Okla. Const. art. 28A and open the market between the alcohol manufacturing and wholesaling tier-allowing those actors within the tier to make decisions without interference in a force-sale system. Only an amendment to the Constitution can change what the people enshrined.

Opinion by: Winchester

Opinion

[*P0] [1052]** Senate Bill 608 mandates that manufacturers of the top 25 brands of liquor and wine sell their product to all licensed wholesalers. Appellees, a group of liquor and wine wholesalers, manufacturers, retail liquor stores, and consumers, challenged Senate Bill 608 as unconstitutional, contending it was in conflict with Okla. Const. art. 28A, § 2(A)(2)'s discretion **[***2]** given to a liquor or wine manufacturer to determine what wholesaler sells its product. The district court agreed and ruled Senate Bill 608 unconstitutional. Appellants appealed, and this Court retained the appeal.

Winchester, J.

[*P1] The Oklahoma Legislature passed Senate Bill 608 ("SB 608") which mandates that liquor and wine manufacturers of the 25 top-selling brands must sell their products to all licensed Oklahoma wholesalers. Appellees, The Institute for Responsible Alcohol Policy; Southern Glazer's Wine & Spirits of Oklahoma, LLLP; J.B. Jarboe II; Central Liquor Co. L.P., d/b/a RNDC Oklahoma; Justin Naifeh; E. & J. Gallo Winery; Sutter Home Winery, Inc., d/b/a Trinchero Family Estates; Diageo Americas, Inc.; Luxco, Inc.; Riboli Family of San Antonio Winery, Inc.; Jennifer Blackburn, d/b/a Cellar Wine and Spirits of Norman; and Dale Blackburn, d/b/a Grand Cru Wine and Spirits Superstore (collectively "Distributors"),[1] challenged SB 608 as unconstitutional, arguing it conflicts with the recently passed Article 28A, § 2(A)(2) of the Oklahoma Constitution (State Question 792).

[*P2] The issues before the Court are (1) whether SB 608 is in conflict with Article 28A, § 2(A)(2), and (2) whether SB 608 is a proper use of legislative authority under **[***3]** the anticompetitive provisions of the Oklahoma Constitution. ***HN1***[] For the reasons stated herein, we hold SB 608 is "clearly, palpably, and plainly inconsistent" with Article 28A, § 2(A)(2)'s discretion given to a liquor or wine manufacturer to determine what wholesaler sells its product. *See EOG Res. Mktg. v. Okla. State Bd. of Equalization, 2008 OK 95, ¶ 13, 196 P.3d 511, 519*. We further rule that SB 608 is not a proper use of legislative authority as Article 28A, § 2(A)(2) is not in conflict with the Oklahoma Constitution's anticompetitive provisions. The district court did not err by granting Distributors' Motion for Summary Judgment and ruling SB 608 unconstitutional.

I. FACTS

[*P3] Since the end of alcohol prohibition, Oklahoma has maintained strict control over the distribution of alcoholic beverages. *See State ex rel. Hart v. Parham, 1966 OK 9, ¶ 11, 412 P.2d 142, 147*. Beginning in 1984, Oklahoma regulated alcohol pursuant to *Article 28 of the Oklahoma Constitution*, which created Appellant Alcoholic Beverage Laws Enforcement Commission ("ABLE Commission"). The centerpiece of this regulation still in place today is ***HN2***[

[1] Appellees are a collection of wholesalers, their principal officers, liquor and wine manufacturers, two Oklahoma retail liquor stores, and consumers.

] Oklahoma's three-tier system for alcohol distribution: alcohol manufacturers (first tier) can only sell to licensed Oklahoma wholesalers (second tier); licensed Oklahoma wholesalers (second tier) can only sell to licensed retailers (third tier); and licensed retailers (third tier) **[***4]** can only sell to consumers. This case involves the relationship between the first and second tiers under the recently passed Article 28A. Until recently, the top two tiers operated under a "forced sale clause" that required a manufacturer to sell its products to every licensed Oklahoma wholesaler. *See* *Central Liquor Co. v. Okla. Alcoholic Beverage Control Bd., 1982 OK 16, ¶ 4, 640 P.2d 1351, 1353* (discussing the forced sale clause). Now repealed *Article 28 of the Oklahoma Constitution* stated:

> Provided, that any manufacturer . . . shall be required to sell such brands . . . to every licensed wholesale distributor who desires to purchase the same, on the same price basis and without discrimination . . . .

Okla. Const. art. 28, § 3(A) (repealed Oct. 1, 2018).

[*P4] In 2016, the Oklahoma Legislature passed a joint resolution to place State Question **[**1053]** 792 on the November 2016 ballot. State Question 792 repealed *Article 28 of the Oklahoma Constitution*, replacing it with Article 28A and fundamentally changed how Oklahoma regulates the sale and distribution of alcohol. The people of Oklahoma approved State Question 792 by a 65.62% vote,[2] and it went into effect on October 1, 2018. The Legislature also passed companion legislation in *Title 37A of the Oklahoma Statutes* to create Oklahoma's new alcohol regulatory scheme. The key provision in Article 28A at issue here permits how a liquor or wine manufacturer can sell products to a licensed **[***5]** Oklahoma wholesaler:

> A manufacturer . . . may sell such brands or kinds of alcoholic beverages to any licensed wholesaler who desires to purchase the same. Provided, if a manufacturer, except a brewer, elects to sell its products to multiple wholesalers, such sales shall be made on the **[**1054]** same price basis and without discrimination to each wholesaler.

Okla. Const. art. 28A, § 2(A)(2).[3]

---

[2] *See* Official Results, Federal, State, Legislative and Judicial Races, General Election--November 8, 2016, Oklahoma State Election Board, http://ok.gov/elections/support/20161108_seb.html (last visited Nov. 13, 2019).

The ballot title for State Question 792 provided:

> This measure repeals *Article 28 of the Oklahoma Constitution* and restructures the laws governing alcoholic beverages through a new Article 28A and other laws the Legislature will create if the measure passes.
>
> The new Article 28A provides that with exceptions, a person or company can have an ownership interest in only one area of the alcoholic beverage business--manufacturing, wholesaling, or retailing. Some restrictions apply to the sales of manufacturers, brewers, winemakers, and wholesalers. Subject to limitations, the Legislature may authorize direct shipments to consumers of wine.
>
> Retail locations like grocery stores may sell wine and beer. Liquor stores may sell products other than alcoholic beverages in limited amounts.
>
> The Legislature must create licenses for retail locations, liquor stores, and places serving alcoholic beverages and may create other licenses. Certain **[***6]** licensees must meet residency requirements. Felons cannot be licensees.
>
> The Legislature must designate days and hours when alcoholic beverages may be sold and may impose taxes on sales. Municipalities may levy an occupation tax. If authorized, a state lodge may sell individual alcoholic beverages for on-premises consumption but no other state involvement in the alcoholic beverage business is allowed.

With one exception, the measure will take effect October 1, 2018.

[3] Article 28A, § 2(A)(4) provides the same direction to winemakers:

> Winemakers either within or without this state may sell wine produced at their wineries to any licensed wholesaler who desires to purchase the wine; provided, that if a winemaker elects to sell the wine it produces to multiple wholesalers, then such sales shall be made on the same price basis and without discrimination to each wholesaler. In addition to its sales through one or more licensed wholesalers, a winemaker may be authorized to sell its wine as follows . . . .

[*P5] After passage of State Question 792, Oklahoma's two largest wholesalers, Central Liquor and Jarboe Sales Company, each sold 49% of their respective businesses to the two largest national alcohol distributors, Southern Glazer's Wine & Spirits and Republic National Distribution Co. As a result, these two wholesalers--now known **[***7]** as Appellees Southern Glazer's Wine and Spirits of Oklahoma, LLLP and Central Liquor Co. L.P., d/b/a RNDC Oklahoma--obtained exclusive distribution contracts with the majority of liquor and wine manufacturers, including distribution of the top 25 brands at issue here.[4] The two largest wholesalers controlled the majority of all wholesale distribution in Oklahoma when Article 28A went into effect on October 1, 2018.

[*P6] Intervenor/Appellant Bryan Hendershot, owner of Oklahoma's third-largest wholesaler, Boardwalk Distribution Company, and other wholesalers and liquor stores, advocated for a change to the statutory scheme. The Legislature took up what became SB 608:

> Any wine or spirit product that constitutes a top brand, as defined in this section, shall be offered by the manufacturer for sale to every licensed wine and spirits wholesaler who desires to purchase the same on the same price basis and without discrimination or inducements.[5]

---

[4] On July 15, 2019, the ABLE Commission published the top 25 brands of wine and liquor. Southern Glazer's Wine and Spirits of Oklahoma, LLLP is the exclusive distributor of fourteen of the top 25 brands. Central Liquor Co. L.P., d/b/a RNDC Oklahoma is the exclusive distributor of the other eleven top 25 brands.

[5] SB 608 also sets out how the ABLE Commission determines what liquor or wine brand constitutes a "top brand":

> "Top brand" shall mean those brands constituting the top twenty-five brands in total sales of spirits and of wine **[***8]** by all wholesalers during the past twelve-month period, according to the records of the ABLE Commission as revised by the ABLE Commission quarterly. In order to allow the ABLE Commission to determine the top twenty-five brands of spirits and of wine, all wholesalers must submit to the ABLE Commission every sixty (60) days a sworn affidavit listing their top thirty brands of spirits and of wine in sales for the previous sixty (60) days, excluding sales to wholesalers.

Id. The ABLE Commission's list of the top 25 brands of wine and liquor is as follows:

S.B. 608, 57th Leg., 1st Sess. (Okla. 2019) (codified as *37A O.S. Supp. 2019, § 3-116.4*). The Legislature passed SB 608, and Governor Stitt signed the bill on May 19, 2019. *Id.*

II. PROCEDURAL HISTORY AND ARGUMENTS

[*P7] Distributors previously requested this Court exercise its original jurisdiction and either issue a writ of prohibition against enforcement of SB 608 or declaratory relief that SB 608 is **[***9]** unconstitutional. This Court declined to exercise its concurrent jurisdiction and transferred the case to district court.

[*P8] The parties moved for summary judgment in district court. Distributors claimed that SB 608 directly conflicts with Article 28A, § 2(A)(2), as SB 608 makes Article 28A, § 2(A)(2)'s discretion to select a single wholesaler a nullity. Had Article 28A allowed the Legislature's actions here, Distributors contended Article 28A would have said "shall sell," which the now-repealed Article 28 had required, not "may sell." Appellants, ABLE Commission, Governor Kevin Stitt, and Bryan Hendershot, individually and d/b/a Boardwalk Distribution Center (collectively "the

State"), filed a cross-motion for summary judgment and countered that Article 28A must be read in conjunction with the anticompetitive provisions of the Oklahoma Constitution, specifically *Okla. Const. art. V, § 44* and *§ 51*. The State further argued that Article 28A, § 2(A)(2)'s phrase *a manufacturer . . . may sell* does give manufacturers discretion to sell to one wholesaler, but that discretion must give way where the Legislature passes a law otherwise.

[*P9] Judge Prince granted Distributors' motion, ruling the clear and ordinary language of Article 28A, § 2(A)(2) identifies an intent by the **[***10]** voters to give discretion to liquor and wine manufacturers to decide to sell to only one wholesaler. The district court held the language of SB 608 requiring manufacturers to sell to all wholesalers is "clearly, palpably, and plainly inconsistent with Article 28A," and therefore, unconstitutional. The State appealed. This Court retained the appeal.

III. STANDARD OF REVIEW

[*P10] ***HN3***[] Summary judgment is properly granted when there are no disputed questions of material fact and the moving party is entitled to judgment as a matter of law. *S. Tulsa Citizens Coal., L.L.C. v. Ark. River Bridge Auth., 2008 OK 4, ¶ 10, 176 P.3d 1217, 1220*. An appeal on summary judgment comes to this Court as a *de novo* review, as the matter presents only questions of law, not fact. *In re Estate of Bell-Levine, 2012 OK 112, P5, 293 P.3d 964, 966*; *Carmichael v. Beller, 1996 OK 48, ¶ 2, 914 P.2d 1051, 1053*. This Court assumes "plenary independent and non-deferential authority to reexamine a trial court's legal rulings." *Kluver v. Weatherford Hosp. Auth., 1993 OK 85, ¶ 14, 859 P.2d 1081, 1084*.

[**1055] IV. DISCUSSION

[*P11] ***HN4***[] This Court is the final interpreter of Oklahoma's laws, including the Oklahoma Constitution. *See Monson v. State ex rel. Okla. Corp. Comm'n, 1983 OK 115, ¶ 7, 673 P.2d 839, 843*. We are bound to follow the Oklahoma Constitution, and we cannot "'circumvent it because of private notions of justice or because of personal inclinations.'" *Gurney v. Ferguson, 1941 OK 397, ¶ 12, 190 Okla. 254, 122 P.2d 1002, 1004* (quoting *Judd v. Bd. of Educ., 278 N.Y. 200, 15 N.E. 2d 576, 584 (N.Y. 1938))*. "In assessing the conformity of a challenged state statute to our fundamental law, we are guided by well-established principles. The Constitution **[***11]** is the bulwark to which all statutes must yield." *Liddell v. Heavner, 2008 OK 6, ¶ 16, 180 P.3d 1191, 1199*.

[*P12] ***HN5***[] The objective of construing the Oklahoma Constitution is to give effect to the framers' intent, as well as the people adopting it. *Shaw v. Grumbine, 1929 OK 116, ¶ 30, 137 Okla. 95, 278 P. 311, 315*. When a challenge is limited to the Oklahoma Constitution, the Court looks first to its language, which if unambiguous, binds the Court. *Id.* ¶ 0, *278 P. at 311* (Syllabus by the Court No. 5). "Every provision of the Constitution and statutes of Oklahoma is presumed to have been intended for some useful purpose and every provision should be given effect." *Darnell v. Chrysler Corp., 1984 OK 57, ¶ 5, 687 P.2d 132, 134*; *Cowart v. Piper Aircraft Corp., 1983 OK 66, ¶ 5, 665 P.2d 315, 317* (holding "each portion of the Constitution was intended to be operative and not surplus language"). The Court, therefore, construes constitutional provisions "as a consistent whole in harmony with common sense and reason." *Cowart, 1983 OK 66, ¶ 4, 665 P.2d at 317*. We will uphold a duly enacted statute unless it is "clearly, palpably and plainly" inconsistent with the Constitution. *Lafalier v. Lead-Impacted Cmtys. Relocation Assistance Trust, 2010 OK 48, ¶ 15, 237 P.3d 181, 188*.

[*P13] In determining whether SB 608 is in conflict with the Oklahoma Constitution, the key question before the Court is whether Article 28A, § 2(A)(2) grants to liquor or wine manufacturers the discretion to select a single wholesaler free from legislative interference. A comparison of now-repealed Article 28, § 3(A), Article 28A, § 2(A)(2), and SB 608 is helpful **[***12]** for this discussion:

Okla. Const. art. 28, § (A) (repealed Oct. 1, 2018)	**Okla. Const. art. 28A, § 2(A)(2)**	**S.B. 608, 57th Leg., st Sess. (Okla. 2019)**
Provided, that any	A manufacturer . . .	Any wine or spirit

Okla. Const. art. 28, § (A) (repealed Oct. 1, 2018)	**Okla. Const. art. 28A, § 2(A)(2)**	**S.B. 608, 57th Leg., st Sess. (Okla. 2019)**
manufacturer . . . ***shall be*** required to sell such brands . . . to ***every*** licensed wholesale distributor who desires to purchase the same, on the same price basis and without discrimination	***may sell*** such brands or kinds of alcoholic beverages to any licensed wholesaler who desires to purchase the same. Provided, if a manufacturer, except a brewer, ***elects to*** sell its products to multiple wholesalers, such sales ***shall be*** made on the same price basis and without discrimination to each wholesaler.	product that constitutes a top brand, as defined in this section, shall be offered by the manufacturer for sale to ***every*** licensed wine and spirits wholesaler who desires to purchase the same on the same price basis and without discrimination or inducements.

[*P14] ***HN6***[] This Court must interpret constitutional provisions in conformity with their ordinary significance in the English language--given their commonly accepted and **[**1056]** nontechnical meaning. *See In re Initiative Petition No. 363, State Question No. 672, 1996 OK 122, ¶ 33, 927 P.2d 558, 570*. The clear and ordinary language of Article 28A, § 2(A)(2) allows **[***13]** a liquor or wine manufacturer to select *one* or *more than one* wholesaler to distribute its product. The second sentence of the section provides: "*a manufacturer . . .* ***may*** *sell such brands . . . to any licensed wholesaler who desires to purchase the same*." *May* denotes that an action is permissive or discretional, and not mandatory. *Shea v. Shea, 1975 OK 90, ¶ 10, 1975 OK CR 90, 537 P.2d 417, 418*. The third sentence of Article 28A, § 2(A)(2) further clarifies the second: "Provided, *if* a manufacturer . . . *elects* to sell its products to multiple wholesalers, such sales shall be made on the same price basis . . . ." By providing direction to manufacturers when they choose to sell to more than one wholesaler, Article 28A, § 2(A)(2) implies that a manufacturer can also select only one wholesaler. The third sentence is purely conditional based on a manufacturer's decision to *elect* to sell to more than one wholesaler and forbids price discrimination when a manufacturer elects to do so. We must conclude then that a manufacturer can elect to sell to only one wholesaler.

[*P15] An opinion by the Office of the Attorney General also supports this conclusion:

> Thus, whereas both *Article 28 of the Oklahoma Constitution* and *Section 533* of the Old Act required a manufacturer to sell its products to every wholesaler wishing to purchase them, **[***14]** Article 28A and *Section 3-116* of the New Act permit a manufacturer to choose to sell its products to any or every wholesaler who wishes to distribute its products. Indeed, Article 28A explicitly leaves to the manufacturer's discretion whether to sell to more than one wholesaler. OKLA. CONST. art 28A, § 2(A)(2) ("**If** a manufacturer, except a brewer, **elects** to sell its products to multiple wholesalers . . . .").

Question Submitted by: Harry "Trey" Kouri, III, Chairman, ABLE Commission, 2018 OK AG 6, ¶ 11. Legislation passed after State Question 792 made the same determination that a manufacturer may select one wholesaler to the exclusion of all others. *See 37A O.S. Supp. 2016, §§ 3-123(A)(1)*, *3-116* (repealed May 7, 2019).[6]

---

[6] For example, the Legislature prohibited price discrimination to wholesalers only "when that manufacturer has not designated a single wine and spirits wholesaler." *Id. § 3-123(A)(1)*. Similarly, the Legislature provided the post and adjust price-posting system would not apply to a manufacturer that has a designated wholesaler to sell its products in the state. *Id. § 3-116(D)*; *§ 3-116.1(A)*.

[*P16] ***HN7***[] Constitutional construction requires the Court to garner the drafter's intent, as well as the people adopting it, from the plain language of the provision. *Darnell, 1984 OK 57, ¶ 5, 687 P.2d at 134*; *Shaw, 1929 OK 116, ¶ 30, 278 P. at 315*. The now repealed Article 28, § 3(A) further clarifies what the Legislature, through a vote of the people, granted to all manufacturers in Article 28A, § 2(A)(2)--the removal of the "forced sale clause" from *both* the Oklahoma Constitution and statutes and the ability to select a single wholesaler to the exclusion of all other licensed wholesalers.[7] For the Court to construe Article 28A in a vacuum without reference **[***15]** to the repealed Article 28 would turn a blind eye to what the public intended.

[*P17] In contrast, SB 608 states that manufacturers ***shall*** sell the top 25 brands to ***every*** licensed wholesaler. ***HN9***[] *Shall* is usually "given its common meaning of 'must'. . . implying a command or mandate." *Sneed v. Sneed, 1978 OK 138, ¶ 3, 585 P.2d 1363, 1364*. From its plain language, SB 608 modifies the alcohol distribution scheme by mandating that all manufacturers of the top 25 brands of liquor and wine--as determined by the ABLE Commission each quarter--sell those products "to every licensed wine and spirits wholesaler who desires to purchase the same on the same price basis and without discrimination or inducements." S.B. 608, 57th Leg., 1st Sess. (Okla. 2019) (codified as *37A O.S. Supp. 2019, § 3-116.4*). SB 608 thus infringes on a manufacturer's constitutionally granted discretion to select one wholesaler to the exclusion of all others, as it mandates that a **[**1057]** manufacturer of a top 25 brand must sell to all wholesalers. We hold SB 608's infringement of Article 28A, § 2(A)(2) is unconstitutional.

[*P18] The second question before this court is whether SB 608 is a proper use of legislative authority under the anticompetitive provisions of the Oklahoma Constitution. The State contends that Article 28A, § 2(A)(2) must be **[***16]** read in conjunction with the Oklahoma Constitution's provisions against anticompetitive markets, specifically *Okla. Const. art. V, § 44*[8] and *§ 51*.[9] Taken to its logical conclusion, the State's argument that these constitutional provisions grant the Legislature broad powers to combat monopolies or anticompetitive markets confers to the Legislature broad power to overrule or amend another constitutional provision, here Article 28A. The State has pushed this argument too far. ***HN10***[] The entirety of the Oklahoma Constitution applies with equal force to statutes enacted pursuant to *Okla. Const. art. V, § 44* and *§ 51*. *Cf.* *Liddell, 2008 OK 6, ¶ 18, 180 P.3d at 1200* (rejecting the argument that *Okla. Const. art. X, § 8(A)(2)* and *§ 22*'s grant of legislative power to define assessment classifications justified an unconstitutional statute). The Oklahoma Constitution prevails over a conflicting statute, and where a statute violates one constitutional provision, another constitutional provision cannot save it.

[*P19] ***HN11***[] The passage of Article 28A **[***17]** also confines those anticompetitive constitutional provisions. *See, e.g.,* *Naifeh v. State ex rel. Okla. Tax Comm'n, 2017 OK 63, ¶ 14, 400 P.3d 759, 764* (examining other constitutional provisions to help define the constitutional provision at issue). Prior holdings of this Court instructed that if there is a conflict between a constitutional amendment and other, earlier passed, provisions of the Oklahoma Constitution, the more recent amendment prevails. *See* *E. Okla. Bldg. & Constr. Trades Council v. Pitts, 2003 OK 113, ¶ 10, 82 P.3d 1008, 1012*; *In re Initiative Petition No. 259, 1957 OK 167, ¶ 23, 316 P.2d 139, 144*; *Adams v. City of Hobart, 1933 OK 646, ¶ 0, 166 Okla. 267, 27 P.2d 595, 595* (Syllabus by the Court No. 2). Article 28A's change in the manufacturing-wholesaling distribution tier is the most recent constitutional change, and if there is a conflict, it controls over any other constitutional provision. *See id.*

---

[7] ***HN8***[] This Court has found that "[a]n amendment to a constitutional provision that has been judicially interpreted is presumed to have changed the existing law." *Williams Nat. Gas Co. v. Perkins, 1997 OK 72, ¶ 14 n.11, 952 P.2d 483, 489 n.11*.

[8] *Okla. Const. art. V, § 44* provides:

> The Legislature shall define what is an unlawful combination, monopoly, trust, act, or agreement, in restraint of trade, and enact laws to punish persons engaged in any unlawful combination, monopoly, trust, act, or agreement, in restraint of trade, or composing any such monopoly, trust, or combination.

[9] *Okla. Const. art. V, § 51* provides: "The Legislature shall pass no law granting to any association, corporation, or individual any exclusive rights, privileges, or immunities within this State."

[*P20] ***HN12***[] We hold, however, that the plain language of Article 28A, § 2(A)(2) is not in conflict with the anticompetitive provisions of the Constitution. *See* *Okla. Const. art. V, § 44* & *§ 51*. Article 28A, § 2(A)(2)'s discretion allows liquor and wine manufacturers and wholesalers to have exclusive distributorships, and this Court has upheld exclusive distributorships as lawful. *Crown Paint Co. v. Bankston, 1981 OK 104, ¶ 13, 640 P.2d 948, 951* (finding an agreement between a manufacturer and a distributor setting up an exclusive territory within which the distributor will have exclusive rights to sell does not in itself violate antitrust provisions); *Teleco, Inc. v. Ford Indus., Inc., 1978 OK 159, ¶ 9, 587 P.2d 1360, 1363* ("It is, however, well settled that it is **[***18]** not a per se violation of ***antitrust law*** for a manufacturer or supplier to agree with the distributor to give him an exclusive franchise or distributorship, even if this means cutting off another distributor."). We, therefore, hold that SB 608 is not a proper use of legislative authority under the anticompetitive provisions of the Oklahoma Constitution.[10]

[1058]** **V. CONCLUSION**

[*P21] ***HN14***[] The Court must always presume that a law is constitutional unless "clearly, palpably, and plainly inconsistent with the Constitution." *Lafalier, 2010 OK 48, ¶ 15, 237 P.3d at 188*. Here, SB 608 is clearly, palpably, and plainly inconsistent with Article 28A, § 2(A)(2)'s grant of discretion to a liquor or wine manufacturer to determine what wholesaler sells its product.

[*P22] ***HN15***[] This Court must uphold the will of the people of Oklahoma who voted to adopt Article 28A of the Oklahoma Constitution and open the market between the alcohol manufacturing and wholesaling tier--allowing those actors within the tier to make decisions without interference in a force-sale system. Only an amendment to the Constitution can change what the people enshrined. We, therefore, affirm the district court's holding SB 608 unconstitutional.

DISTRICT COURT'S JUDGMENT AFFIRMED.

Gurich, C.J., Darby, V.C.J., **[***19]** Winchester, Edmondson, JJ., and Reif, S.J., concur.

Kauger (by separate writing), Kane, JJ., Barnes, S.J. (by separate writing), and Goodman, S.J., dissent.

Dissent by: KAUGER; BARNES

Dissent

KAUGER, J., with whom KANE, J. joins, dissenting:

[*P1] The Oklahoma Legislature drafted the referendum in question. The very first sentence, (A)(1) provides that "[t]he Legislature **shall enact laws** providing for the strict regulation, control, licensing and taxation of the manufacture, sale, distribution, possession, transportation and consumption of alcoholic beverages, consistent with the provisions of this Article."[1] (Emphasis supplied.)

---

[10] ***HN13***[] The plain language of SB 608 further shows that the statute is not an operation of the Legislature's power to combat anticompetitive markets pursuant to *Okla. Const. art. V, § 44*. SB 608 does not define an unlawful restraint of trade nor does it set forth any punishment for those entities engaging in unlawful restraint of trade. *Id.* Further, SB 608 **only** deals with the top 25 brands of liquor and wine as determined by the ABLE Commission every quarter. To apply the State's argument beyond the top 25 brands specified in SB 608, the statute would allow for a restraint of trade on thousands of other brands of liquor and wine. If SB 608 was an anticompetitive measure, it would logically restrict anticompetition on **all** brands of liquor and wine.

[1] State Question No. 792, Legislative Referendum No. 370, as adopted at election held on Nov. 9, 2016, is now Art. 28A §2 of the Oklahoma Constitution and it provides in pertinent parts:

[*P2] Subsection (A)(2) also addresses monopolies and common ownership between manufacturing, wholesaling and retailing tiers which is generally prohibited. A manufacturer is not permitted to sell in Oklahoma unless they go through an Oklahoma wholesaler. It also contains two sentences which are at the heart of this cause. A manufacturer and **[**1059]** winemaker may sell to any licensed wholesaler who desires to purchase. Provided if the manufacturer or winemaker elects to sell to multiple wholesalers (more than one), the sales must be the same price basis **and** without discrimination to each wholesaler. (Emphasis supplied.) **[***20]**

[*P3] A cursory reading of these sentences might appear to allow a manufacturer to elect to only sell to one wholesaler or sell to more than one. However, a provision that appears to allow the election to sell to only one is immediately followed by another provision which requires the same price basis to all and that prohibits no discrimination to each wholesaler. It does not say no price discrimination. Rather, it says the "same price basis" and "without discrimination." This implies that any discrimination, including price basis, is prohibited.

[*P4] An immediate ambiguity appears. If one is allowed to sell to only one wholesaler and no others but is also required to sell without any discrimination, how can this provision be met? Selling only to one and no others is a form of discrimination. For example, if there is one manufacturer in the State, and five wholesalers and the manufacturer chooses to sell to only one, but is prohibited from discriminating against the others, how can this provision be satisfied?

[*P5] To further complicate the matter, the same enactment also requires the Legislature to enact further laws as long as they do not conflict with the provisions. Yet, the provisions themselves **[***21]** are in conflict. How is it possible for the Legislature enact anything which doesn't conflict in some way with one or more of the conflicting directions within the provisions? The meaning of language in a statute is construed by courts as internally

---

A. The Legislature shall enact laws providing for the strict regulation, control, licensing and taxation of the manufacture, sale, distribution, possession, transportation and consumption of alcoholic beverages, consistent with the provisions of this Article. Provided:

1. a. there shall be prohibited any common ownership between the manufacturing, wholesaling and retailing tiers, unless otherwise permitted by this subsection. Following the effective date of this Article, brewers may obtain beer wholesaler licenses to distribute beer, also known as brewery-owned branches, to up to two (2) territories within the state. Any brewery-owned branch in operation on the date of adoption of this Article may not expand its distribution territory that was in effect on the date of adoption of this Article. If a brewer maintained one or more licenses to distribute low-point beer in the state prior to the effective date of this Article, then up to two (2) of the brewer's low-point beer distribution licenses shall automatically convert to beer distribution licenses upon the effective date of this Article. All low-point distribution licenses shall cease to exist following this conversion date,

b. [*see note below regarding effective date] from the date of adoption of this Article by the voters until the effective date of this Article, brewers may continue to obtain and operate up to two (2) low-point beer brewery-owned branches pursuant to the existing low-point beer laws pertaining to the distribution of low-point beer by brewery-owned branches,

c. only after the effective date of this Article, the Legislature may duly enact legislation to require, by statute, the divestiture of all brewery-branches. If the Legislature requires brewers to divest, it must require full divestiture of every brewery-owned branch in the state, and it shall allow brewers at least (1) year but no more than three (3) years to complete said divestiture. Except as provided in this subsection, and except for a small brewer as defined by law, no other member of one tier may own an interest in a business licensed in a different tier;

2. A manufacturer, except a brewer, shall not be permitted to sell alcoholic beverages in this state unless such sales occur through an Oklahoma wholesaler. A manufacturer, except a brewer, or subsidiary of any manufacturer, who markets his or her product solely through a subsidiary or subsidiaries, a distiller, rectifier, bottler, winemaker or importer of alcoholic beverages, bottled or made in a foreign country, either within or without this state, may sell such brands or kinds of alcoholic beverages to any licensed wholesaler who desires to purchase the same. Provided, if a manufacturer, except a brewer, elects to sell its products to multiple wholesalers, such sales shall be made on the same price basis and without discrimination to each wholesaler; . . .

consistent and externally consistent with the constitution, i.e., the meaning of the statute's language is construed so that it does not contradict either itself or the constitution.[2]

[*P6] While it may seem somewhat illogical, this is the framework with which we are faced in deciphering this cause. Consequently, our primary duty is to ascertain the intention of the framers, and of the people who adopted the same,[3] and construe it in such a way, if possible, that it does not contradict either itself or the constitution.[4] In such construction and determination, technical rules should be disregarded, and as a rule, a mean between a strict and liberal construction followed, and when ascertained, such intent must govern.[5] The same rule applies as to the intent of the Legislature in vitalizing such provisions and in enacting legislation to prevent corruption in making, procuring, and submitting initiative and referendum petitions.[6]

[*P7] On its face, this voter approved referendum is expressly and clearly aimed at: expanding a consumer's availability to purchase **[**1060]** alcoholic beverages; excluding industry monopolies in Oklahoma; and notifying voters that the Legislature will enact further laws governing such sales.

[*P8] How do we know this? The actual resolution as codified in the Oklahoma Constitution,[7] addresses the Legislature's duties in several sections to enact furtherlaws regarding alcohol sales. It also directs the prohibition of

When economic legislation is involved, the judiciary extends great deference to the legislature. See, e.g., *Gladstone v. Bartlesville Ind. School Dist. No. 30, 2003 OK 30, ¶12, fn. 30, 66 P.3d 442* and *Ross v. Peters, 1993 OK 8, ¶19, 846 P.2d 1107* where in we explained that to equal protection challenges of economic legislation, the judiciary extends great deference to the legislature's judgment as part of an aspect of legislative function and the democratic process.

[7] Enrolled Senate Joint Resolution 68, Enacted by the 2nd Regular Session of the 55th Legislature of the State of Oklahoma Numbered by the Secretary of State, State Question Number 792, Legislative Referendum Number 370. Now, art. 28A §2 provides:

§ 2. Enactment of laws by Legislature - Direct shipment of alcoholic beverages - Direct sales of wine.

> A. The Legislature shall enact laws providing for the strict regulation, control, **[***23]** licensing and taxation of the manufacture, sale, distribution, possession, transportation and consumption of alcoholic beverages, consistent with the provisions of this Article. Provided:
>
> 1. a. there shall be prohibited any common ownership between the manufacturing, wholesaling and retailing tiers, unless otherwise permitted by this subsection. Following the effective date of this Article, brewers may obtain beer wholesaler licenses to distribute beer, also known as brewery-owned branches, to up to two (2) territories within the state. Any brewery-owned branch in operation on the date of adoption of this Article may not expand its distribution territory that was in effect on the date of adoption of this Article. If a brewer maintained one or more licenses to distribute low-point beer in the state prior to the effective date of this Article, then up to two (2) of the brewer's low-point beer distribution licenses shall

discrimination, both based on price and otherwise.[8] The Final Ballot Title approved **[**1061]** by the Attorney General[9] informed voters that this measure "repeals *Article 28 of the Oklahoma Constitution* and restructures the laws governing alcoholic beverages through a new Article 28A and other laws the Legislature will create if the measure passes." It also informed voters that the laws governing alcoholic beverages will be restructured for the

---

automatically convert to beer distribution licenses upon the effective date of this Article. All low-point distribution licenses shall cease to exist following this conversion date,

b. [*see note below regarding effective date] from the date of adoption of this Article **[***24]** by the voters until the effective date of this Article, brewers may continue to obtain and operate up to two (2) low-point beer brewery-owned branches pursuant to the existing low-point beer laws pertaining to the distribution of low-point beer by brewery-owned branches,

c. only after the effective date of this Article, the Legislature may duly enact legislation to require, by statute, the divestiture of all brewery-branches. If the Legislature requires brewers to divest, it must require full divestiture of every brewery-owned branch in the state, and it shall allow brewers at least (1) year but no more than three (3) years to complete said divestiture. Except as provided in this subsection, and except for a small brewer as defined by law, no other member of one tier may own an interest in a business licensed in a different tier;

2. A manufacturer, except a brewer, shall not be permitted to sell alcoholic beverages in this state unless such sales occur through an Oklahoma wholesaler. A manufacturer, except a brewer, or subsidiary of any manufacturer, who markets his or her product solely through a subsidiary or subsidiaries, a distiller, rectifier, bottler, winemaker or importer of alcoholic **[***25]** beverages, bottled or made in a foreign country, either within or without this state, may sell such brands or kinds of alcoholic beverages to any licensed wholesaler who desires to purchase the same. Provided, if a manufacturer, except a brewer, elects to sell its products to multiple wholesalers, such sales shall be made on the same price basis and without discrimination to each wholesaler; . . .

C. All laws passed by the Legislature under the authority of the Article shall be consistent with the provisions of this section. If any provision of this Article applicable to winemakers is ruled to be unconstitutional by a court of competent jurisdiction, then no winemaker shall be permitted to directly sell its wine to restaurants or other retail stores and outlets that may be from time to time authorized by the state to sell wine for off-premise consumption or to consumers in this state.

The Okla. Const. art. 28A §3 provides:

§ 3. Legislature to prescribe licenses - On-premise and off-premise consumption.

A. The Legislature shall, by law, prescribe a set of licenses for the sale of alcoholic beverages to consumers for off-premise consumption, which shall include but not be limited to:

1. A Retail Spirits License, which shall be required in order to sell the following:

a. spirits in their original sealed package, **[***26]** and/or

b. refrigerated and non-refrigerated wine and beer in their original sealed package.

A holder of a Retail Spirits License shall be permitted to sell at retail any item that may be purchased at a grocery store or convenience store, as defined by law, so long as the sale of items other than alcoholic beverages do not comprise more than twenty percent (20%) of the holder's monthly sales;. . .

C. The Legislature shall, by law, prescribe a set of licenses for the sale of alcoholic beverages to consumers for on-premise consumption, which may include the sale of spirits, wine and/or beer, provided that such sales of alcoholic beverages by the individual drink have been authorized by the voters in the specific county where the alcoholic beverages are sold, either prior to or after the enactment of this Article.

The Okla. Const. art. 28A §6 provides:

The Legislature shall, by law, designate the specific days, hours and holidays on which alcoholic beverages may be sold or served to consumers for off-premise and/or on-premise consumption.

[8] The Okla. Const. art 28A, §2, see note 7, supra.

[9] The Secretary of State received the Final Ballot Title for State Question No. 792 on July 7, 2018.

Legislature to: authorize direct shipments to consumers of wine; create licenses; and designate days and hours when alcoholic beverages may be sold.[10]

[*P9] It also expressly informs voters that it targets monopolies as well by providing that: "[t]he new Article 28A provides that with exceptions, a person or company can have an ownership interest in only one area of the alcoholic beverage business -- manufacturing, wholesaling, or retailing." It says absolutely nothing about whether a wholesaler will be allowed to sell to only one retailer or required to sell to multiple retailers.[11]

[*P10] The title of the voter approved proposition **[***27]** notes that alcohol beverage laws will be governed by the new Article 28A **and applicable laws**. (Emphasis supplied.)[12] It **[**1062]** also expressly targets monopolies by

---

[10] The Ballot Title provides:

This measure repeals *Article 28 of the Oklahoma Constitution* and restructures the laws governing alcoholic beverages through a new Article 28A and other laws the Legislature will create if the measure passes.

The new Article 28A provides that with exceptions, a person or company can have an ownership interest in only one area of the alcoholic beverage business-manufacturing, wholesaling, or retailing. Some restrictions apply to the sales of manufacturers, brewers, winemakers, and wholesalers. Subject to limitations, the Legislature may authorize direct shipments to consumers of wine.

Retail locations like grocery stores may sell wine and beer. Liquor stores may sell products other than alcoholic beverages in limited amounts.

The Legislature must create licenses for retail locations, liquor stores, and places serving alcoholic beverages and may create other licenses. Certain licensees must meet residency requirements. Felons cannot be licensees.

The Legislature must designate days and hours when alcoholic beverages may be sold and may impose taxes on sales. Municipalities may levy an occupation tax. If authorized, a state lodge may sell individual alcoholic beverages for on-premises consumption but no other state involvement in the alcoholic beverage business is allowed.

With one exception, the measure will take effect October 1,2018.

SHALL THE MEASURE BE APPROVED?

FOR THE MEASURE _ YES

AGAINST THE MEASURE _ NO

A "YES" vote is a vote in favor of this measure. A "NO" vote is a vote against this measure.

[11] The ballot title must reflect the character and purpose of the measure and not be deceptive or misleading. *In re Initiative Petition No. 409 v. Retail Liquor Assoc. of Oklahoma, 2016 OK 51, ¶3, 376 P.3d 250*; *OCPA Impact, Inc. v. Sheehan, 2016 OK 84, ¶9, 377 P.3d 138*. The ballot must be written so that voters are afforded an opportunity to fairly express their will and it must apprise voters with substantial accuracy what they are asked to approve. *OCPA Impact, Inc. v. Sheehan, supra.*

[12] Enrolled Senate Joint Resolution 68, Enacted by the 2nd Regular Session of the 55th Legislature of the State of Oklahoma Numbered by the Secretary of State, State Question Number 792, Legislative Referendum Number 370 provides:

> A Joint Resolution directing the Secretary of State to refer to the people for their approval or rejection a proposed amendment to add a new Article XXVIIIA to the Oklahoma Constitution, and to repeal *Sections 1*, 1.A, *2*, *3*, *4*, *5*, *6*, *7*, *8*, *9* and *10* of Article XXVIII of the Oklahoma Constitution, which relate to alcoholic beverages; providing that all beverages containing alcohol be subject to Article and applicable laws; requiring Legislature to enact laws regulating alcoholic beverages subject to certain provisions; prohibiting **[***28]** certain common ownership; providing exceptions; providing for automatic conversion and cessation of certain licenses; allowing continuation of certain operations for certain time period; authorizing enactment of certain legislation; specifying conditions of certain divesture; stating restrictions applicable to manufacturers, brewers, wholesalers and winemakers; requiring certain sales to be made on same price basis and without discrimination; prohibiting direct shipments of alcoholic beverages except under certain circumstances; prohibiting certain sales if provisions ruled unconstitutional; providing for certain licenses and setting forth restrictions thereon; defining term; prohibiting licensure of certain persons; providing exceptions; allowing license holders to enter into certain agreements; providing exceptions; specifying unlawful acts; requiring Legislature to designate days and hours of sales; providing for

stating that "[c]ommon ownership between tiers of the alcoholic beverage business is prohibited, with some exceptions." It states the same language as the body of the measure, that the Legislature is required to enact laws to regulate alcoholic beverages; prescribe licenses; and designate days and hours for alcoholic beverage sales. It says absolutely nothing about whether a wholesaler will be allowed to sell to only one retailer or required to sell to multiple retailers. The gist notes that the measure is to allow grocery and convenience stores to sell wine and high-point beer.[13]

[*P11] This Court has long held that the purpose of the gist, along with the ballot title, is to "prevent fraud, deceit, or corruption in the initiative process." The gist must explain the proposal's effect without extending or describing policy arguments for or against the proposal."[14] When the resolution, the title, and the gist are read collectively with each other, and with other constitutional provisions such as art. *2 §32*[15] art. *5 §§44*[16] and *51*,[17] and art. *9 §45*,[18] as mentioned in Barnes, S.J., dissent, it clearly appears that the Legislature was primarily concerned with three things:

1) monopolies forming, especially between different types of alcoholic beverage businesses;
2) preventing discrimination, whether based on price or any thing else related to alcoholic beverage sales; and
3) the retention of the Legislature's authority to regulate the sale of alcoholic beverages in Oklahoma.

[*P12] When the resolution, the title, and the gist, are read collectively, it is apparent that the voters were voting on these same three things. The voters were not notified about whether to allow a manufacturer to sell to only one wholesaler and the ballot title certainly did not inform voters of it in the voting booth. **[***30]** The ballot title said:

---

taxation of alcoholic beverage sales; prohibiting state or political subdivisions from engaging in alcoholic beverage business; providing exceptions; authorizing certain cities and towns to levy occupation tax; providing effective dates; providing ballot title; and directing **[***29]** filing.

[13] The gist provides:

SQ 792 would amend the Oklahoma constitution to allow grocery and convenience stores to sell wine and high-point beer. Currently these stores are prohibited from selling beer containing above 3.2 percent alcohol by volume, as well as all wine and all liquor. SQ 792 would also allow Oklahoma liquor stores to sell refrigerated beer and alcohol accessories (i.e., sodas, corkscrews). The measure would allow multiple beer and wine stores to be owned by one corporation (ownership would be limited to two stores per person if spirits are sold). Currently individual liquor store owners are not allowed to have more than one store. If SQ 792 passes, these changes would take effect on October 1, 2018.

[14] In re Initiative Petition No. 409 v. Retail Liquor Assoc. of Oklahoma, see note 11, supra.

[15] The *Okla. Const. art. 2 §32* provides:

Perpetuities and monopolies are contrary to the genius of a free government, and shall never be allowed, nor shall the law of primogeniture or entailments ever be in force in this State.

[16] The Okla. Const. art 2 §44 provides:

The Legislature shall define what is an unlawful combination, monopoly, trust, act, or agreement, in restraint of trade, and enact laws to punish persons engaged in any unlawful combination, monopoly, trust, act, or agreement, in restraint of trade, or composing any such monopoly, trust, or combination.

[17] The *Okla. Const. art 5 §51* provides:

The Legislature shall pass no law granting to any association, corporation, or individual any exclusive rights, privileges, or immunities within this State.

[18] The *Okla. Const. art 9 §45* provides:

Until otherwise provided by law, no person, firm, association, or corporation engaged in the production, manufacture, distribution, or sale of any commodity of general use, shall, for the purpose of creating a monopoly or destroying competition in trade, discriminate between different persons, associations, or corporations, or different sections, communities or cities of the State, by selling such commodity at a lower rate in one section, community, or city than in another, after making due allowance for the difference, if any, in the grade, quantity, or quality, and in the actual cost of transportation from the point of production or manufacture.

> This measure repeals *Article 28 of the Oklahoma Constitution* and restructures the laws governing alcoholic beverages through a new Article 28A and other laws the Legislature will create if the measure passes.[19]

[*P13] [1063]** One need only look to what happened after the measure was adopted to see that the voter approved measure was not intended to be interpreted in such a manner as sales to one wholesaler which results in discrimination among other wholesalers. Two large wholesalers now control a large part of the market, and they do not compete with one another regarding the top 25 best-selling brands. Currently, 14 of the top 25 brands are exclusively distributed by one distributor and the other 11 brands are distributed by another.

[*P14] The result of the current market? Smaller wholesalers and consequently retailers, are being left with limited options to purchase, and limited options to offer consumers the most popular brands, if they can purchase them at all.[20] According to affidavits in the record, smaller wholesalers are suffering financially and find it nearly impossible to compete. At least one was forced to close.[21] With limited options to purchase the most popular brands, retailers are "hamstrung and face decreased **[***31]** service quality, lower supply and higher prices and fees.[22] Deliveries have dropped and rural retailers have suffered.[23]

[*P15] Once this disparate result became apparent, the Legislature swiftly responded and passed Senate Bill 608 to, consistent with the purpose of the ballot title, the gist and the voter approved measure, modify the way in which the sale of alcoholic beverages occurred. The bill does several things related to this cause. It defines what a "brand" is and what "brand extension" means.[24] It defines "top brand" as those brands constituting the top twenty-five brands in total sales of spirits and of wine by all wholesalers during the past twelve month period. [Of the top 25 brands from July 1, 2018 to June 30, 2019, 10 were wines and the rest were spirits.] It defines a 'manufacturer' as a

---

[19] The Ballot Title, note 10, supra.

[20] For instance, in the lead up to SQ 792's implementation, a wholesaler was unable to secure any exclusive distribution agreement with a top brand manufacturer because of the manufacturers pre-existing relationships with the two entities who controlled the market. Record on Accelerated Appeal (ROAA), Vol. I, Tab 4, at 4, ¶9, Ex. 22 Hendershot (Boardwalk) Affidavit ¶5.

[21] ROAA), Vol. I, Tab 4, at 4, ¶9, Hendershot (Boardwalk) Affidavit ¶5, Willima Icke Affidavit, ¶¶4-6, Chris Cathey Affidavit, ¶3.

[22] ROAA), Vol. I, Tab 4, at 5, ¶10, Ex. 21, Glen Brokenbush, *SB 608 Aims to Restore Competition*, The Lawton Constitution (April 21, 2019. Ex. 17, Carmen Forman, *Fierecely debated liquor bill heads to governor's desk*, The Oklahoman (May 7, 2019); Ex. 6, Tres Savage, *Liquor Bicker: Senate send SB 608 to Gov. Kevin Stitt*, Nondoc (May 6, 2019).

[23] ROAA), Vol. I, Tab 4, at 54, ¶10, Ex. 27 Holt Affidavit ¶¶6-9; Jason Sheffield Affidavit ¶¶3-10.

[24] *Title 37A O.S. Supp. 2018 §1-103* provides in pertinent part:

9. 'Brand' means any word, name, group of letters, symbol or combination thereof, that is adopted and used by a licensed manufacturer to identify a specific bear, wine or spirit, and to distinguish that product from another beer, wine or spirit.

10. 'Brand extension' means:

a. after October 1, 018, any brand of bear or cider introduced by a manufacturer in this state which either:

(1) incorporates all or a substantial part of the unique features of a preexisting brand of the same licensed manufacturer, or

(2) relied to a significant extent on the goodwill associated with the preexisting brand, or

b. any brand of beer that a manufacturer, the majority of whose total volume of all brands of beer distributed in this state by such manufacturer on January 1, 2016, was distributed as low-point beer, desires to sell, introduce, begins selling or theretofore has sold and desires to continue selling a strong beer in this state which either:

(1) incorporates or incorporated all or a substantial part of the unique features of a preexisting low- point beer brand of the same licensed manufacturer, or

(2) relies or relied to a significant extent on the goodwill associated with a preexisting low-point beer brand;

brewer, distiller, winemaker, rectifier or bottler of any alcoholic beverage and its subsidiaries, affiliates and parent companies.

[*P16] The legislation also creates a new law which requires "manufacturers" to offer to sell the 'top brands' to every licensed wine **[***32]** and spirits wholesaler who desire to purchase at the same price basis and without discrimination or inducements. The question before the Court is whether this legislation is consistent with the State Question adopted by the voters.

[*P17] **[**1064]** Accordingly, for the statute to be "consistent" internally, and externally, with the newly enacted Article 28A, and the purpose for which it was enacted it must be interpreted to mean that:

> manufacturers and winemakers must offer the "top brand" to all, without discrimination as to price basis or inducements.

Under this construction, there is no conflict between the constitutional provision and the statute. The statute merely adds a requirement that, of the brands offered for sale, top brands must be included. That is it. That is what this whole controversy boils down to ---- offering the top brands to everyone.

[*P18] When a constitutional provision expressly provides that the legislature shall enact laws for further licensing, regulation, taxation, sale and distribution of alcoholic beverages such as this one does, the legislatures function is to enact laws necessary to carry the provision of the amendment into effect. To, in a manner of speaking, provide the meat **[***33]** on the bones of the provision.[25] Actions of the Legislature are presumed to be constitutional unless it is shown beyond a reasonable doubt that the Oklahoma Constitution or the Constitution of the United States expressly prohibit the Legislative action.[26]

CONCLUSION

[*P19] The Legislature's authority to impose such a requirement comes from the constitutional provision itself wherein it requires the Legislature to enact regulatory laws regarding alcoholic beverage sales. The crux of this cause is that the proposed Legislation does nothing more than adding a requirement that the top brands be made available to everyone. Adding a top brand requirement to what manufacturers and winemakers have to offer does not change the function, the meaning, or the mandate of the voter approved provision. Consequently, the law should be upheld as constitutional. If anything, it furthers the purpose of the legislation regarding sales within the heavily regulated alcoholic beverage industry and levels the playing **[***34]** field.

[*P20] Article 28A of the Oklahoma Constitution repeals Article 28, restructures the laws governing alcoholic beverages, and clearly provides that the Legislature will create other laws if the measure passes.[27] The measure is nothing more than a robust antitrust/antidiscrimintion bill. Perhaps portions were inartfully drafted or could have been drafted better. Nevertheless, interpreting the measure to bestow an absolute right for manufacturers to sell to a single wholesaler, regardless of the consequence and discriminatory fallout, collectively ignores the ballot title, the gist, and the resolution. Such an interpretation is fundamentally contrary to everything the measure seeks to restrict. The district court grant of summary judgment should be vacated.

---

[25] The *Okla. Const. art. 5, §45* provides:

> The Legislature shall pass such laws as are necessary for carrying into effect the provisions of this Constitution.

[27] The Ballot Title, see note 10, supra.

BARNES, S.J., with whom Goodman, S.J., joins, dissenting:

[*P1] I respectfully dissent. Oklahoma jurisprudence directs that we construe the Oklahoma Constitution as a consistent whole and attempt to harmonize Article 28A, § 2(A)(2) with the robust anti-monopoly provisions of the Oklahoma Constitution combined with the "broad inherent power" of the Oklahoma Legislature to regulate and supervise all phases of the alcoholic beverages industry, *Okla. Alcoholic Beverage Control Bd. v. Seely, 1980 OK 189, ¶ 6, 621 P.2d 534*, a power **[***35]** that "is far broader than the power to regulate or restrict ordinary businesses," *State ex rel. Hart v. Parham, 1966 OK 9, ¶ 11, 412 P.2d 142*, and which is reflected in Article 28A, § 2(A) itself.[1]

[*P2] [1065]** It is "our obligation as a court . . . to give vitality to *all* provisions in the Constitution," *Okla. Auto. Dealers Ass'n v. State ex rel. Okla. Tax Comm'n, 2017 OK 64, ¶ 25, 401 P.3d 1152* (footnote omitted) (emphasis in original), and to "measure legislation not merely against a single constitutional provision. . . . [T]he constitution must be construed as a consistent whole, in harmony with common sense and reason, with all pertinent portions of the constitution being construed together." *St. Paul Fire & Marine Ins. Co. v. Getty Oil Co., 1989 OK 139, ¶ 12, 782 P.2d 915* (citations omitted). As with a Legislative act, which is "to be construed in such manner as to reconcile the different provisions, render them consistent and harmonious, and give intelligent effect to each," *South Tulsa Citizens Coalition, L.L.C. v. Arkansas River Bridge Auth., 2008 OK 4, ¶ 15, 176 P.3d 1217* (footnote omitted), the Oklahoma Constitution must similarly be viewed as a single instrument and construed in a manner that renders all pertinent provisions harmonious and operative:

> It is a universally recognized rule of construction that, in ascertaining both the intent and general purpose, as well as the meaning, of a constitution or a part thereof, it should be construed as a whole. As far as possible, each provision should be construed so as to **[***36]** harmonize with all the others, yet with a view to giving effect to each and every provision in so far as it shall be consistent with a construction of the instrument as a whole.

Jones v. Winters, 1961 OK 224, ¶ 42, 365 P.2d 357 (citations omitted). *See also* *Cowart v. Piper Aircraft Corp., 1983 OK 66, P4, 665 P.2d 315* ("It is not to be supposed that a Constitution contains excess verbiage without force and effect"; "[e]very provision of the Constitution and statutes of Oklahoma is presumed to have been intended for some useful purpose and . . . every provision should be given effect"; and "[i]t is presumed that each portion of the Constitution was intended to be operative and not surplus language.").[2] Thus, the "rule [is] that constitutional provisions are construed to harmonize with each other with a view to giving effect to each and every provision," *Okla. City Urban Renewal Auth. v. Med. Tech. & Research Auth. of Okla., 2000 OK 23, ¶ 17, 4 P.3d 677* (footnote omitted), and, "[i]ndeed, . . . where one constitutional provision[] butts up against another, we must harmonize the two rather than allow one to run roughshod over the other," *Okla. Auto. Dealers Ass'n, 2017 OK 64, ¶ 25, 401 P.3d 1152* (footnote omitted).[3]

---

[1] "The Legislature shall enact laws providing for the strict regulation, control, licensing and taxation of the manufacture, sale, distribution, possession, transportation and consumption of alcoholic beverages[.]" Okla. Const. art. 28A, § 2(A).

[2] The Majority, citing *Cowart*, states that it is to "construe[] constitutional provisions 'as a consistent whole in harmony with common sense and reason,'" Maj. Op., ¶ 12; thus, all pertinent provisions must be construed as a consistent whole prior to reaching a determination whether legislation is inconsistent with the Constitution. *See also* *Dobbs v. Bd. of Cnty. Comm'rs of Okla. Cnty., 1953 OK 159, P10, 208 Okla. 514, 257 P.2d 802* (Syllabus by the Court) ("In passing upon the constitutionality of an act of the Legislature all pertinent sections of the Constitution should be considered together in arriving at a correct interpretation.").

[3] Thus, it is my understanding of the reasoning of these cases that even where a conflict appears to exist between two or more constitutional provisions, unless that conflict is truly irreconcilable, the provisions must be harmonized. In addition to the above-cited cases, *see* 16 C.J.S. Constitutional Law § 100 ("A court must reconcile provisions that appear to conflict," and "[i]n construing a constitution, distinct provisions are repugnant to each other only when they relate to the same subject, are adopted for the same purpose, and cannot be enforced without substantial conflict. When a court is faced with conflicting policies arising out of multiple constitutional provisions in a specific factual situation, it must strike a balance between the provisions if

[*P3] This method of constitutional interpretation, in which we examine all pertinent provisions of the Oklahoma Constitution and attempt to harmonize them before determining **[**1066]** whether legislation is inconsistent with **[***37]** the Constitution, is especially applicable to the present case involving a referendum. The Oklahoma Constitution states: "The reservation of the powers of the initiative and referendum in this article shall not deprive the Legislature of the right to repeal any law, propose or pass any measure, which may be consistent with the Constitution of the State and the Constitution of the United States." *Okla. Const. art. 5, § 7*.[4]

[*P4] In addition, "[t]his Court does not examine the Constitution to decide whether the Legislature is permitted to act, only whether it is prohibited from acting. If there is any doubt, it should be resolved in favor of the validity of the Legislature's action; restrictions thereon should be strictly construed." *In re Detachment of Mun. Territory from City of Ada, Okla., 2015 OK 18, ¶ 7, 352 P.3d 1196* (citations omitted). "There is a strong presumption which favors legislative enactments. The presumed constitutionality of a legislative enactment is rebutted only when the enactment is prohibited by either the Oklahoma Constitution or federal law." *Graham v. D & K Oilfield Servs., Inc., 2017 OK 72, ¶ 11, 404 P.3d 863* (citations omitted). As stated in *Oklahoma Alcoholic Beverage Control Board v. Parkhill Restaurants, Inc., 1983 OK 77, 669 P.2d 265*, "The Oklahoma Constitution vests in the Legislature the supreme power to enact laws to meet the needs of the State, and its acts should be upheld unless plainly **[***38]** and clearly within the express prohibitions and limitations fixed by the Constitution." *Id. ¶ 27* (citation omitted). The *Parkhill* Court further stated that "a presumption in favor of validity is afforded to state laws regulating intoxicating liquors." *Id. ¶ 11* (footnote omitted).

[*P5] As reflected in Article 28A, § 2(A), which states that "[t]he Legislature shall enact laws providing for the strict regulation, control, licensing and taxation of the manufacture, sale, distribution, possession, transportation and consumption of alcoholic beverages," this Court has explained that the Legislature has "near absolute power to regulate the liquor industry":

> The broad sweep of the *twenty-first amendment to the Constitution of the United States*[5] gives the states near absolute power to regulate the liquor industry as long as they do not act in a discriminatory manner. Wide latitude as to choice of the means to accomplish regulation is accorded . . . .

---

possible."). *See also* *In re Okla. Capitol Improvement Auth., 2003 OK 59, ¶ 30, 80 P.3d 109* ("the-purpose-of-borrowing provision must be harmonized with other constitutional provisions"); *Matthews v. Funck, 2007 OK CIV APP 15, P20, 155 P.3d 852 & 24, 155 P.3d 852* ("This interpretation of *section 8C [of Article 10 of the Oklahoma Constitution*] not only harmonizes its provisions with the other sections of Article 10, and particularly *section 8B*, but also allows for a construction of *section 2890.1 [of Title 68 of the Oklahoma Statutes]* that is consistent with the Constitution"; "while there is no lack of confusion and contradiction in the constitutional and statutory provisions at issue in this case, we find this interpretation most consistently harmonizes these provisions with reason and common sense." (citation omitted) (footnote omitted)).

[4] The Oklahoma Constitution also provides: "The authority of the Legislature shall extend to all rightful subjects of legislation, and any specific grant of authority in this Constitution, upon any subject whatsoever, shall not work a restriction, limitation, or exclusion of such authority upon the same or any other subject or subjects whatsoever." *Okla. Const. art. 5, § 36*. Further, *sections 36 through 45 of Article 5* are entitled "Powers and Duties" of the Oklahoma Legislature, and *Article 5, § 44*, entitled "Unlawful restraints of trade," discussed below, is contained within this same portion of the Oklahoma Constitution.

[5] "The transportation or importation into any State . . . for delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited." U.S. Const. amend. XXI, § 2. The United States Supreme Court has explained that "[t]he States enjoy broad power under § 2 of the Twenty-first Amendment to regulate the importation and use of intoxicating liquor within their borders," *Capital Cities Cable, Inc. v. Crisp, 467 U.S. 691, 712, 104 S. Ct. 2694, 81 L. Ed. 2d 580 (1984)*, and "the Twenty-first Amendment limits the effect of the dormant *Commerce Clause* on a State's regulatory power over the delivery or use of intoxicating beverages within its borders," *44 Liquormart, Inc. v. R.I., 517 U.S. 484, 516, 116 S. Ct. 1495, 134 L. Ed. 2d 711 (1996)*. However, just as, in my view, the mere existence of Article 28A does not insulate the alcohol industry in this state from Legislative powers and duties set forth elsewhere in the Oklahoma Constitution, the United States Supreme Court has similarly held that the *Twenty-First Amendment* "does not license the States to ignore their obligations under other provisions of the [United States] Constitution," such as the *Equal Protection Clause* and the *First Amendment*, *44 Liquormart, Inc., 517 U.S. at 516*.

Okla. Alcoholic Beverage Control Bd. v. Burris, 1980 OK 58, ¶ 6, 626 P.2d 1316.

Indeed, the Oklahoma Alcoholic Beverage Control Act states:

> The *Oklahoma Alcoholic Beverage Control Act* shall be deemed an exercise of the police power of the State of Oklahoma for the protection of the welfare, health, peace, temperance and safety of the people of this state, and all provisions hereof shall be construed **[***39]** for the accomplishment of that purpose.

37A O.S. Supp. 2018 § 1-106. *See also* Okla. Alcoholic Beverage Control Bd. v. Seely, 1980 OK 189, ¶ 6, **[**1067]** 621 P.2d 534 (The liquor industry "is a business which is subject to a high degree of supervision and regulation in the interest of the public welfare.").[6]

[*P6] Pertinent to this case, the Legislature's power in this domain to "enact laws providing for the strict regulation [and] control . . . of [inter alia] the manufacture, sale, distribution, possession [and] transportation . . . of alcoholic beverages," Okla. Const. art. 28A, § 2(A), is combined with the Oklahoma Constitution's express prohibition of monopolies: "[M]onopolies are contrary to the genius of a free government, and shall never be allowed[.]" Okla. Const. art. 2, § 32. This Court has explained that "[i]n 1906-07, the framers of our Constitution held a strong conviction against monopolies . . . and favored encouraging just competition, as shown by clauses, paragraphs, and sections of our organic law." City of Okmulgee v. Okmulgee Gas Co., 1929 OK 472, ¶ 45, 140 Okla. 88, 282 P. 640, overruled on other grounds in Pub. Serv. Co. of Okla. v. Caddo Elec. Coop., 1970 OK 219, 479 P.2d 572.[7] *See also* Okla. Const. art. 5, § 44 (commanding the Legislature to "define what is an unlawful combination, monopoly, trust, act, or agreement, in restraint of trade, and enact laws to punish persons engaged in any unlawful combination, monopoly, trust, act, or agreement, in restraint of trade, or composing any such monopoly, trust, **[***40]** or combination."); Okla. Const. art. 5, § 51 (prohibiting the Legislature from passing any law "granting to any

---

[6] *Cf.* Seal v. Corp. Comm'n, 1986 OK 34, 21, 725 P.2d 278 & 45 ("It is well settled that the State may adopt reasonable regulation in the exercise of its police power to protect the correlative rights of owners through ratable taking," and "[t]he State of Oklahoma . . . has extensively and continuously regulated the natural gas industry"; "the parties could not have reasonably expected that their contractual rights were immune from alteration by subsequent State regulation.").

[7] *See also* Keith D. Tracy & Ronald L. Walker, ***Antitrust Law****: Indirect Purchaser Standing to Sue in Oklahoma -- Major v. Microsoft Corp.*, 57 Okla. L. Rev. 727, 727-28 (2004) ("Oklahoma ***antitrust law*** originated in the Oklahoma Constitution, which not only prohibits monopolies [as set forth in Okla. Const. art. 2, § 32], but also authorizes the state legislature [as set forth in Okla. Const. art. 5, § 44] to define each 'combination, monopoly, trust, act, or agreement, in restraint of trade' that should be declared unlawful."); Maurice H. Merrill, *The Administrative Law of Oklahoma*, 4 Okla. L. Rev. 286, 286-87 (1951) ("The convention to frame a constitution for Oklahoma met November 20, 1906," when Theodore Roosevelt was President of the United States and "the dominant political philosophy of the new state [of Oklahoma] envisioned a democratic equality of opportunity protected by governmental process against corporate and monied interests. Naturally, the constitution framed under this philosophy contained provisions designed to facilitate [some amount of] state control over corporate and business activities and to encourage governmental activity as an agency of general welfare." (footnotes omitted)); and Gerard Michael D'Emilio, Comment, *Frontier Feudalism: Agrarian Populism Meets Future Interest Arcana in the Land of Manifest Destiny*, 70 Okla. L. Rev. 943, 982 n.236 (2018) (The Oklahoma Constitution "struck out against monopolization[.]").

We must take into consideration the times and circumstances under which the state constitution was formed -- the general spirit of the times, and the prevailing sentiments among the people. Every constitution has a history of its own, which is likely to be more or less peculiar; and unless interpreted in the light of this history is liable to be made to express purposes which were never within the minds of the people in agreeing to it. This the court must keep in mind when called upon to interpret it; for their duty is to enforce the law which the people have made, and not some other law which the words of the constitution may possibly be made to express.

Thomas v. Reid, 1930 OK 49, ¶ 39, 142 Okla. 38, 285 P. 92 (citation omitted). *See also* Wall v. Marouk, 2013 OK 36, ¶ 4, 302 P.3d 775 ("The Oklahoma Constitution is a unique document. Some of its provisions are unlike those in the constitutions of any other state, and some are more detailed and restrictive than those of other states."). "A Constitution is a Magna Charta of the people's rights, the fundamental law of the land, intended, not for short periods of time, but for all time." City of Okmulgee, 1929 OK 472, P17, 140 Okla. 88, 282 P. 640 (citation omitted).

association, corporation, or individual any exclusive rights, privileges, or immunities within this State."). Also relevant is *Article 9, § 45*, as language from this section of the Oklahoma Constitution -- entitled "Monopoly or destruction of competition - Discrimination prohibited" -- is mirrored in the very language in Article 28A, § 2(A)(2) upon which the Majority bases its conclusion that the Legislature is powerless to enact SB 608.[8]

[*P7] **[**1068]** Article 28A, § 2(A)(2) does not plainly and clearly prohibit or suspend the Legislature's broad anti-monopoly power over the liquor industry in our state; I believe this conclusion is all the more inescapable when Article 28A, § 2(A)(2) is interpreted in the wider context of the instrument of which it is a part. Thus, although I agree the requirement of a "forced sale," as discussed by the Majority, has been removed or deconstitutionalized, I disagree **[***41]** that the Legislature's power to enact laws to undo or prevent monopolies has also been removed or deconstitutionalized in the domain of alcohol sales. I disagree, in other words, that we must go from one extreme to the other, from forced sales to sales completely unlimited by the Legislature's above-described power, and, in my view, the Majority arrives at such an interpretation -- that manufacturers now have an absolute right to sell to a designated wholesaler "free from legislative interference"[9] -- based only on a review of Article 28A, § 2(A)(2) and repealed Article 28.[10]

[*P8] A contrary interpretation is discernable, one which harmonizes the various provisions and construes them as a consistent whole. Article 28A, § 2(A)(2) sets forth, as part of the three-tier structure, a general or default ability on the part of manufacturers to sell to any -- hence, zero, "multiple" or, impliedly,[11] one -- licensed wholesaler who desires to buy, but it does not plainly and clearly prohibit the Legislature from exercising its broad anti-monopoly powers in this domain. This is precisely how we would construe a legislative act containing such various provisions.[12] We should also interpret the Constitution in this manner, **[***42]** giving effect to these various

---

[8] *Article 9, § 45* states, in part, that no association or corporation engaged in the production, manufacture, distribution, or sale of any commodity of general use, shall, for the purpose of creating a monopoly or destroying competition in trade, discriminate . . . by selling such commodity at a lower rate in one section, community, or city than in another, after making due allowance for the difference, if any, in the grade, quantity, or quality, and in the actual cost of transportation from the point of production or manufacture.

Cf. Okla. Const. art. 28A, § 2(A)(2) ("such sales shall be made on the same price basis and without discrimination to each wholesaler"). Importantly, Article 28A, § 2(A)(5) similarly states that, as to wholesalers, "[e]very wholesaler, except a beer wholesaler, must sell its products on the same price basis and without discrimination to all on-premise and off-premise licensees, unless otherwise provided by law." Thus, whether or not SB 608 remains in effect, wine and spirit manufacturers already have no control regarding the sale and distribution of their products to the retail tier in Oklahoma as every wholesaler "must sell its products on the same price basis and without discrimination" to retailers. It is essential to keep this in mind to the extent it is relevant to contemplate whether SB 608 deprives manufacturers (i.e., that small fraction of one percent of manufacturers subject to SB 608, *see* n.15, *infra*) of anything of value in the distortions of the highly-regulated three-tier market, and when attempting to analogize SB 608 to industries that do not have this unique structure.

[9] Maj. Op., ¶ 13.

[10] The Majority states it is not "constru[ing] Article 28A in a vacuum" because it construes Article 28A with "reference to the repealed Article 28[.]" Maj. Op., ¶ 16. Indeed, the Majority reaches its conclusion that SB 608 infringes Article 28A, § 2(A)(2) and is unconstitutional based solely on a review of Article 28A and Article 28; only then does it turn to other constitutional provisions. That is, only after "hold[ing] SB 608's infringement of Article 28A, § 2(A)(2) is unconstitutional," Maj. Op., ¶ 17, does the Majority turn to a review of the anti-monopoly provisions of the Oklahoma Constitution. I respectfully disagree with the premise of the Majority's analysis here; in my view, the meaning of Article 28A, § 2(A)(2) must be discerned from a reading of the entire instrument of which it is a part, and only then can any conclusion be reached as to whether SB 608 is inconsistent with the Constitution.

[11] The Majority states that "Article 28A, § 2(A)(2) *implies* that a manufacturer can also select only one wholesaler." Maj. Op., ¶ 14 (emphasis added).

[12] For example, "Where the legislative intent is plainly discernible from the provisions of statute when considered as a whole, the real purpose and intent of the legislative body will prevail over the literal import of the words employed." *Keck v. Okla. Tax Comm'n, 1940 OK 352, ¶ 0, 188 Okla. 257, 108 P.2d 162* (Syllabus by the Court). The primacy of the purpose and intent is even

provisions consistent with a construction of the instrument as a whole. This interpretation also upholds the constitutionality of SB 608:

> **[**1069]** We presume that every statute is constitutional, and we approach a constitutional attack on a statute with great caution and grave responsibility. Our consideration is guided by the general principles that the Legislature is sovereign and that the legislative power has no limitation except by specific declaration in the state or federal constitutions. Constitutional restriction on the Legislature will be strictly construed, and a statute will be upheld against a constitutional attack unless it is clearly and overtly inconsistent with the constitution.

Glasco v. State ex rel. Okla. Dept. of Corrections, 2008 OK 65, P27, 188 P.3d 177 (citations omitted).[13]

[*P9] Importantly, this interpretation does not render Article 28A, § 2(A)(2) into a nullity, as Appellees argue.[14] Rather, this reading leaves the general ability of wine and spirit manufacturers to sell to one, and only one, wholesaler operative with regard to more than 99% of such manufacturers as SB 608 operates to exclude just a small fraction of one percent of the many thousands[15] of wine and spirit manufacturers from the general ability to sell **[***43]** to one, and only one, wholesaler. It is the contrary reading which, in my view, unnecessarily renders provisions of our fundamental law into nullities. In my view, the Majority's interpretation would leave the Legislature powerless to prevent and address the potential scenario in which there remains only one wholesaler who controls all of the popular brands sold and distributed to retailers in this state; it would even leave the Legislature powerless with regard to the potential scenario in which there is only one remaining wholesaler despite Article 28A clearly contemplating the continuing viability of "multiple wholesalers." *See* Okla. Const. art. 28A, § 2(A) ("multiple wholesalers"; "each wholesaler"; "[e]very wholesaler").

[*P10] Thus, in my view, the Majority adopts an overly strict and technical reading of one provision that ultimately threatens the viability of the three-tier structure itself. "The construction of a constitutional provision must not be so strict or technical as to defeat the evident object and purpose of its adoption." *State v. Millar, 1908 OK 124, ¶ 0, 21 Okla. 448, 96 P. 747* (Syllabus by the Court).[16] We must avoid "parsing by lawyers" that moves at cross-purposes

---

more pronounced in constitutional analysis, where we look for "the overriding purposes" or "primary purposes." *Fent v. Fallin, 2014 OK 105, ¶¶ 14, 345 P.3d 1113 & 15*. The *Fent* Court explained that "[a] constitutional provision must be construed considering its purpose and given a practical interpretation so that the manifest purpose of the framers and the people who adopted it may be carried out." *Id. ¶ 17* (footnote omitted).

[13] This legal standard is, of course, not relaxed at the summary judgment stage. In *Lafalier v. Lead-Impacted Communities Relocation Assistance Trust, 2010 OK 48, 237 P.3d 181*, the Court explained that even at the summary judgment stage, "there is a presumption that every statute is constitutional. The party seeking a statute's invalidation as unconstitutional has the burden to show the statute is clearly, palpably, and plainly inconsistent with the Constitution. We scrutinize a constitutional attack on a statute with great caution and grave responsibility." *Id. ¶ 15* (footnotes omitted).

[14] As the Majority states, "Distributors claim[] that SB 608 directly conflicts with Article 28A, § 2(A)(2), as SB 608 makes Article 28A, § 2(A)(2)'s discretion to select a single wholesaler a nullity." Maj. Op., ¶ 8.

[15] As the Majority notes, there are "thousands of other brands of liquor and wine." Maj. Op., ¶ 20 n.10. Indeed, the number of wine and spirits manufacturers worldwide would appear to be at least in the tens of thousands. For example, according to the National Association of American Wineries, in January 2019 there were over 10,000 wineries in the United States alone. *See* the National Association of American Wineries, *United States Wine and Grape Industry FAQS*, https://wineamerica.org/policy/by-the-numbers (last updated 2019).

[16] *Accord* *City of Guymon v. Butler, 2004 OK 37, ¶ 11, 92 P.3d 80* ("The construction of a constitutional provision must not be so strict as to defeat the purpose of its adoption." (citation omitted)); *City of Shawnee v. Williamson, 1959 OK 64, ¶ 9, 338 P.2d 355* ("The construction of a constitutional provision must not be so strict or technical as to defeat the evident object and purpose of its adoption."); *Lone Star Gas Co. v. Bryan Cnty. Excise Bd., 1943 OK 228, ¶ 2, 193 Okla. 13, 141 P.2d 83* ("the general principle of law that construction of a constitutional provision must not be so strict or technical as to defeat the object and purpose of its adoption" (citations omitted)); and *Williams v. City of Norman, 1921 OK 337, ¶ 0, 85 Okla. 230, 205 P. 144* (Syllabus by the Court) ("The construction of a constitutional provision must not be so strict or technical as to defeat the evident object and purpose of its adoption.").

with the "practical interpretation" and **[***44]** "manifest purpose" of the Constitution. *Fent v. Fallin, 2014 OK 105, P11,P17, 345 P.3d 1113 & 17, 345 P.3d 1113*.

[*P11] Furthermore, although we are ultimately concerned only with whether the Legislature is clearly prohibited under the Constitution from enacting SB 608 -- and, absent such a clear prohibition, the Legislature's power is not limited to, for example, waiting until after a destruction of competition has **[**1070]** occurred -- it should nevertheless be pointed out that competition among wholesalers in Oklahoma in the sale and distribution of the most popular brands of wine and spirits has already been "destroyed." This was the conclusion reached under very similar circumstances in *State ex rel. Hart v. Parham, 1966 OK 9, 412 P.2d 142*. In *Parham*, the Court explained that "the wholesalers [had] attempted to restrict competition by the voluntary allocation of the major brands of liquor among themselves" such that, with regard to the top brands, the wholesalers had divided up the market and there was no competition at the wholesaler tier with regard to top brands. *Id.* ¶ 27. The *Parham* Court explained it was "clear that" if this arrangement were permitted, then "the extensive competition heretofore existing between wholesalers selling the same [major or top] brands of liquor *would be destroyed*." *Id.* ¶ 17 **[***45]** (emphasis added).

[*P12] As the Majority acknowledges, in the current market only two wholesalers control the sale and distribution to retailers of all of the most popular brands, and those two wholesalers do not even compete with one another with regard to those brands. From the perspective of Oklahoma retailers, any one of the 25 most popular brands -- and as many as 90 of the top 100 brands -- is currently legally obtainable[17] from only one wholesaler. As the Majority notes,

> On July 15, 2019, the ABLE Commission published the top 25 brands of wine and liquor. Southern Glazer's Wine and Spirits of Oklahoma, LLLP is the exclusive distributor of fourteen of the top 25 brands. Central Liquor Co. L.P., d/b/a RNDC Oklahoma is the exclusive distributor of the other eleven top 25 brands.[18]

Thus, Oklahoma retailers have only one place to go to purchase any one of these particular top brands, a scenario that is destructive of competition among the "multiple wholesalers" contemplated under Article 28A, § 2, an Article containing as its most fundamental objective the continued viability of the three-tier structure, including a privately-owned **[***46]** and competitive second tier of multiple wholesalers.[19] Under the Majority's reading, the Legislature is powerless to address this scenario or prevent even more flagrant potential scenarios at the wholesaler tier.[20]

---

[17] For example, as to wine and spirits, *37A O.S. Supp. 2019 § 3-101(A)* allows "the possession and transportation of alcoholic beverages *for the personal use of the possessor and his or her family and guests*, so long as the Oklahoma excise tax has been paid thereon," but otherwise states that "[n]o person shall manufacture, rectify, sell, possess, store, import into or export from this state, transport or deliver any alcoholic beverage except as specifically provided in the Oklahoma Alcoholic Beverage Control Act." (Emphasis added.) This is yet one more restriction which well distinguishes the alcohol industry from other industries. While markets in surrounding areas and states can be examined by individuals and businesses shopping, for example, for an automobile, it would be illegal for Oklahoma retailers to shop for wine or spirits outside Oklahoma's borders, and it would be impracticable for most Oklahoma consumers to travel a great distance to shop for a bottle of wine for personal use.

[18] Maj. Op., ¶ 5 n.4.

[19] Although not essential to my reasoning, it is useful to note that, generally, "[i]t is the existence of monopoly power *coupled with* the intent to use it for anticompetitive purposes or with *inevitable anticompetitive effects* that establishes the offense of monopolization." *Bd. of Regents of Univ. of Okla. v. Nat'l Collegiate Athletic Ass'n, 1977 OK 17, ¶ 17 n.26, 561 P.2d 499* (emphasis added). *See also* *Beville v. Curry, 2001 OK 1, ¶ 1 n.1, 39 P.3d 754* ("Monopoly power is defined [in the *Oklahoma Antitrust Reform Act*] as the power to control market prices or exclude competition."). When obscure and less popular brands are sold by only one wholesaler, there are no inevitable anticompetitive effects as the thousands of less popular brands do not have the same power to control market prices and exclude competition as do the most popular brands, and a retailer can, for example, simply opt not to purchase a less popular brand and replace it with another lesser-known brand sold by another wholesaler. However, the business of many retailers is likely dependent on having some, if not all, of the most popular brands in stock, brands that can currently be obtained from only one wholesaler.

Id. ¶ 9 (citation omitted).

[*P13] [1071]** The Majority concludes that "[o]nly an amendment to the Constitution can change what the people enshrined," but, in my view, this conclusion stems from a departure from the fundamental rules of constitutional interpretation discussed above. It is nevertheless illuminating to question what such an amendment would look like. The Legislature could perhaps attempt a new referendum seeking voter approval of SB 608 (i.e., that portion of SB 608 under consideration) as part of the Oklahoma Constitution. However, the Legislature, which might in the future deem it wise to adjust the number of top brands subject to its requirements in order to address monopolization at the wholesaler tier,[21] or even to abolish SB 608 altogether, would be forced to again seek to change the Constitution in order to do so.[22] The Legislature could instead propose language stating, in effect, that its duty to strictly regulate the **[***47]** alcohol industry includes the power to pass anti-monopoly laws in this domain and the ability of manufacturers to sell to one wholesaler is not absolute. However, in my view, such language would be redundant, as it is already discernable from a review of the entire instrument of the Oklahoma Constitution. *See, e.g.,* *Okla. City Urban Renewal Auth. v. Med. Tech. and Research Auth. of Okla., 2000 OK 23, ¶ 17, 4 P.3d 677* ("[N]othing in the language of *art. 10, § 6C* indicates that it is intended to affect any other constitutional provision. It contains no language impacting or altering the debt limitations of art. *10, § 26*," and "[t]o hold differently would require us to strike debt limitation provisions from the Oklahoma Constitution, and to ignore the rule that constitutional provisions are construed to harmonize with each other with a view to giving effect to each and every provision." (footnote omitted)).

[*P14] In *United States v. Sprague, 282 U.S. 716, 51 S. Ct. 220, 75 L. Ed. 640 (1931)*, the United States Supreme Court stated:

---

[20] Regarding the importance of examining, in uncertain cases, "the effects and consequences" and "the right being vindicated in the end," the Court in *State v. State Board of Equalization, 1924 OK 682, 107 Okla. 118, 230 P. 743*, stated that "[i]t has been well said" that [n]o feature of the judicial function is of equal dignity with that which requires dealing with what is and what is not really a part of the Constitution, or those things which may have been engrafted upon the original instrument. None requires an equal degree of care to reach a right conclusion, and courage to pronounce it. The court may, and should, and must, on such great occasions, look to the effects and consequences. Not to do so with the thought of hesitation, much less omission to do what duty to the public requires; but as an inspiration to reach the highest attainable degree of certainty of the right being vindicated in the end.

[21] The Majority questions whether SB 608 could even be viewed as an attempt by the Legislature "to combat anticompetitive markets pursuant to *Okla. Const. art. V, § 44*" because SB 608 does not "set forth any punishment for those entities engaging in unlawful restraint of trade," "does not define an unlawful restraint," and "**only** deals with the top 25 brands of liquor and wine[.]" Maj. Op., ¶ 20 n.10 (emphasis in original). However, the Oklahoma Alcoholic Beverage Control Act, at the very least, does provide a punishment for "[a]ny person who shall violate any provision of the Oklahoma Alcoholic Beverage Control Act for which no specific penalty is prescribed[.]" ***37A O.S. Supp. 2018 § 6-125(A)***. Further, SB 608 does, in my view, define an unlawful restraint -- i.e., in the Legislature's wisdom, the definition comprises manufacturers of top brands that sell their wares to one, and only one, wholesaler while refusing to sell to any other wholesaler who desires to buy those top brands. Further, it appears the Majority is asserting that a true anti-monopoly regulation would apply to all manufacturers, even manufacturers of the most obscure, boutique, or small-batch varieties of wines and spirits; however, in my view, not only, as a practical matter, would manufacturers of far less popular brands potentially not have sufficient product to sell to multiple wholesalers, but, more to the point, such a regulation would be targeting brands that have no potential anticompetitive effects. *See* n.19, *supra*. Finally, the Legislature's power is, in my view, not limited to an isolated reading of *Article 5, § 44*; instead, it fundamentally arises from its broad regulatory powers in the area of alcohol sales, a power which, moreover, is coupled with the anti-monopoly provisions, including the prohibition of monopolies set forth in *Article 2, § 32*, as well as the command and legislative duty set forth in *Article 5, § 44*.

[22] *Cf.* *Oklahoma's Children, Our Future, Inc. v. Coburn, 2018 OK 55, ¶ 17 n.33, 421 P.3d 867* (Wyrick, J., and Winchester, J., dissenting) ("[U]nlike constitutional interpretation, if a court erroneously interprets a statute, the Legislature is free to correct the error by amending the statute.").

> If the framers of the instrument had any thought that amendments differing in purpose should be ratified in different ways, nothing would have been simpler tha[n] so to phrase article 5 as to exclude implication or speculation. The fact that an instrument drawn with such meticulous care and by men who so well understood [h]ow to make **[***48]** language fit their thought does not contain any such limiting phrase affecting the exercise of discretion by the Congress in choosing one or the other alternative mode of ratification is persuasive evidence that no qualification was intended.

[1072]** *Id. at 732*. Similarly, here, Article 28A, § 2, which is more than 1,200 words long and contains various mandatory provisions, contains no explicit statement affecting the anti-monopoly provisions of the Oklahoma Constitution or providing that manufacturers have an absolute right to sell to one, and only one, wholesaler. There is certainly no such language anywhere in the ballot title.[23] Rather, the ability to sell to one wholesaler is a mere implication from the two sentences upon which Appellees base their entire argument.[24]

---

[23] In *Fent v. Fallin, 2014 OK 105, 345 P.3d 1113*, the Court stated:

Constitutional provisions are not made for parsing by lawyers, but for the instruction of the people and the representatives of government, so that they may read and understand their rights and duties. Words used in a constitutional provision and an accompanying ballot title are to be construed in a way most familiar to ordinary people who voted on the measure.

Id. ¶ 12 (footnotes omitted). "The ballot title is a contemporaneous construction of the constitutional amendment *and weighs heavily in determining its meaning*." *Id.* (emphasis added) (footnote omitted). Thus, the *Fent* Court stated: "With this guidance in mind, the issue becomes what would the ordinary person who voted on [the state question at issue], as explained by its ballot title, understand they were approving[.]" *Id.* ¶ 13. *See also* *McDonald v. City of Chicago, Ill., 561 U.S. 742, 828-29, 130 S. Ct. 3020, 177 L. Ed. 2d 894 (2010)* ("When interpreting constitutional text, the goal is to discern the most likely public understanding of a particular provision at the time it was adopted," and the focus is on "what the public understood the words chosen by the draftsmen to mean.").

[24] In my view, even an isolated reading of these sentences is less than persuasive regarding a right on the part of manufactures to sell to a designated wholesaler that is completely "free from legislative interference." As I read it, the purpose of the second sentence, for example, is to prevent certain monopolistic tendencies. The only explicitly mandatory language in the two sentences -- certainly the only use of the word "shall" -- is the prohibition of discriminatory pricing contained in the second sentence: "[I]f a manufacturer . . . elects to sell its products to multiple wholesalers, such sales *shall be made on the same price basis and without discrimination to each wholesaler*[.]" Okla. Const. art. 28A, § 2(A)(2) (emphasis added). This language, as indicated above, directly alludes to and mirrors *Article 9, § 45 of the Oklahoma Constitution*, which is entitled "Monopoly or destruction of competition -- Discrimination prohibited." Indeed, other courts have explained that the three-tier system itself is structured so as to "prevent[] . . . monopolistic tendencies . . . ." *S.A. Discount Liquor, Inc. v. Texas Alcoholic Beverage Comm'n, 709 F.2d 291, 293 (5th Cir. 1983)*. In an Oklahoma case confronting language no longer in effect but very similar to that found in Article 28A, including a "require[ment] [that] a manufacturer . . . sell to every licensed wholesaler on the same price basis and without discrimination," "prohibitions against financial assistance from any manufacturer or wholesaler to any retailer," "prohibitions against price discrimination against wholesalers or retailers," and a "constitutional amendment . . . require[ing] each manufacturer to sell to every licensed wholesaler on the same price basis and without discrimination," the Court stated that "[i]t is apparent on the face of all these sections that their general purpose is the prevention of any tendency toward monopoly, or the control of the industry by any segment or special interest group, with the resulting destruction of competition." *Parham, 1966 OK 9, ¶ 16, 412 P.2d 142*. Therefore, in my view, the reason for the existence of the above-quoted sentence from Article 28A, § 2(A)(2) is the prevention of monopolistic tendencies, not the enshrinement of monopoly power. This language, in my view, is aimed at only those scenarios involving sales "to multiple wholesalers" simply because it would be illogical if its requirement (i.e., that such sales shall be made on the same price basis and without discrimination to each wholesaler) sought to embrace other scenarios. Thus, Appellants justifiably assert that the purported right on the part of manufacturers to sell to only one wholesaler completely free from legislative interference would constitute a proverbial "elephant in a mouse hole." *See, e.g.,* *Whitman v. Am. Trucking Ass'ns, Inc., 531 U.S. 457, 468, 121 S. Ct. 903, 149 L. Ed. 2d 1 (2001)* ("Congress, we have held, does not alter the fundamental details of a regulatory scheme in vague terms or ancillary provisions -- it does not, one might say, hide elephants in mouseholes. Respondents' textual arguments ultimately founder upon this principle." (citations omitted)); *see also* *Dep't of Commerce v. N.Y., 139 S. Ct. 2551, 2602, 204 L. Ed. 2d 978 (2019)* (Alito, J., concurring in part and dissenting in part) ("Reading [the particular statutory provision] to mean what the District Court thought would turn it into the proverbial elephant

[*P15] Finally, Appellees emphasize that Article 28A, § 2(A) states that "[t]he Legislature shall enact laws" strictly regulating the alcoholic beverages industry "*consistent with the provisions of this Article*." (Emphasis added.) I disagree, however, that this language effectively suspends **[***49]** all other provisions of the Oklahoma Constitution and requires that **[**1073]** Article 28A be interpreted in a vacuum. The Legislature must, of course, enact laws consistent with the provisions of Article 28A, but Article 28A itself must be construed as part of the Oklahoma Constitution. *See* *Calvey v. Daxon, 2000 OK 17, ¶ 14, 997 P.2d 164* ("The Legislature and the voters expect the courts to be familiar with settled rules of constitutional construction and to follow them."). All pertinent provisions of the Oklahoma Constitution must be reconciled and vitalized, not unnecessarily rendered dormant and ineffective.

[*P16] For all these reasons, I respectfully dissent. In my opinion, we must construe the Oklahoma Constitution as a consistent whole, and resist reading Article 28A, § 2(A)(2) in a vacuum with its predecessor. Such a reading reveals, in my view, that the Legislature's broad anti-monopoly power over the highly-regulated alcoholic beverages industry in our state is not plainly and clearly prohibited or suspended. I would reverse the trial court's order finding SB 608 is unconstitutional.

End of Document

---

stuffed into a mouse hole. [The provision], however, is a decidedly mouse-like provision. It was enacted with no fanfare and no real explanation . . . ." (footnote omitted)).

Prime Steakhouse v. Mowi ASA

Opinion by: John H. Rich III

Opinion

RECOMMENDED DECISION ON MOTION TO TRANSFER VENUE[1]

Seven defendants in this putative class action lawsuit alleging unlawful coordination of the price of farm-raised salmon move pursuant to *28 U.S.C. § 1404(a)* to transfer venue to the United States District Court for the Southern District of Florida ("Southern District of Florida"). *See* Motion of Certain Defendants to Transfer Venue Under *28 U.S.C. § 1404(a)* ("Motion to Transfer") (ECF No. 29); Defendants Grieg Seafood BC Ltd., Marine Harvest USA, LLC, Marine Harvest Canada, Inc., and Ducktrap River of Maine LLC's Joinder in Motion to Transfer Venue Under *28 U.S.C. § 1404(a)* ("Joinder Motion") (ECF No. 47).[2] The plaintiff requests that the court deny the defendants' motion or, in the alternative, stay action on the motion pending the resolution of any Multidistrict Litigation ("MDL") petition that the defendants may wish to file. *See* Response to Motion of Certain Defendants to Transfer Venue Under *28 U.S.C. § 1404(a)* and Motion to Stay ("Response") (ECF No. **[*3]** 39) at 9-10.

Because there is significant overlap between this case and both an earlier and subsequently filed lawsuit in the Southern District of Florida, consideration of other relevant factors favors transfer, and the defendants correctly observe that the filing of an MDL petition is a last resort, I recommend that the court grant the defendants' motion, deny that of the plaintiff, and deem moot the remaining motions pending in this case, ECF Nos. 14, 24, and 26, all of which involve service of process on the defendants, as well as this court's related order to show cause why service has not timely been accomplished on four of the defendants, ECF No. 15.

I. Applicable Legal Standard

Pursuant to *Section 1404(a)*, "[f]or the convenience of parties and witnesses, in the interest of justice, a district court may transfer any civil action to any other district or division where it might have been brought[.]" *28 U.S.C.A. §*

---

[1] Pursuant to *28 U.S.C. § 636(b)(1)(A)*, a magistrate judge may, upon referral of a district judge, "grant non-dispositive motions that do not implicate the federal court's jurisdiction to hear a case." *Salzman v. Travelers Home & Marine Ins. Co., 16-CV-04008 (GBD)(SN), 2016 U.S. Dist. LEXIS 94701, 2016 WL 3951206, at *1 (S.D.N.Y. July 20, 2016)*. If, however, a motion is dispositive, a magistrate judge may only recommend its disposition. *See, e.g., Agincourt Gaming LLC v. Zynga Inc., Civil Action No. 11-720-RGA, 2013 U.S. Dist. LEXIS 105602, 2013 WL 3936508, at *2 (D. Del. July 29, 2013)*. Courts are split as to whether a motion to transfer venue pursuant to *28 U.S.C. 1404(a)* is dispositive or non-dispositive. *Compare, e.g., id.* (concluding that "a motion to transfer is not the functional equivalent of an order of dismissal" and, thus, "not a dispositive motion for purposes of *§ 636(b)(1)*" (internal quotation marks omitted)) *with Payton v. Saginaw Cty. Jail, 743 F. Supp. 2d 691, 693 (E.D. Mich. 2010)* (concluding that the grant of a motion to transfer is dispositive because it "is the functional equivalent of a dismissal of the case — albeit without prejudice — in that forum"). Insofar as appears, the First Circuit has not directly addressed the point. *But see Subsalve USA Corp. v. Watson Mfg., Inc., 462 F.3d 41, 47-48 (1st Cir. 2006)* (holding that an order effecting the transfer of an action pursuant to *28 U.S.C. § 1631* was not immediately reviewable as a final decision of the district court because it did "not terminate the litigation on the merits but, rather, ensure[d] its continuation in a different forum" (footnote omitted)). In an abundance of caution, I have treated the instant motion as dispositive.

[2] Those seven defendants are Lerøy Seafood USA Inc., Ocean Quality USA, Inc., Ocean Quality Premium Brands, Inc., Grieg Seafood BC Ltd., Marine Harvest USA, LLC (now known as Mowi USA, LLC), Marine Harvest Canada, Inc. (now known as Mowi Canada West, Inc.), and Ducktrap River of Maine LLC (an assumed name of Mowi Ducktrap, LLC). *See* Motion to Transfer at Page ID # 246; Joinder Motion at 1. The plaintiff sued 15 defendants, *see* Class Action Complaint, Jury Trial Demanded ("*Prime Steakhouse* Complaint") (ECF No. 1) ¶ 1, one of which, Bremnes Seashore AS, it voluntarily dismissed without prejudice, *see* ECF No. 19. Five Norwegian defendants, Mowi ASA, Grieg Seafood ASA, Ocean Quality AS, SalMar ASA, and Lerøy Seafood Group ASA, are the subject of a pending motion by the plaintiff for approval of a plan for alternative service, *see* ECF No. 14, and the remaining two defendants, Ocean Quality North America Inc. and Scottish Sea Farms Ltd. (along with defendants Marine Harvest Canada, Inc. and Grieg Seafood BC, Ltd.) are the subject of an order that the plaintiff show cause why service was not timely accomplished upon them, *see* ECF No. 15. Counsel for Scottish Sea Farms Ltd., entered a notice of appearance on December 23, 2019, *see* ECF No. 50, and I have granted Scottish Sea Farms Ltd.'s motion to extend its time to answer the complaint to April 27, 2020, *see* ECF Nos. 52, 54, the same deadline by which the seven defendants seeking transfer must answer the complaint, *see* ECF Nos. 42, 49, 54.

1404(a). The district court, hence, has "discretion . . . to adjudicate motions for transfer according to an individualized, case-by-case consideration of convenience and fairness." Bath Iron Works Corp. v. Congoleum Corp., Docket no. 2:18-cv-00405-GZS, 2019 U.S. Dist. LEXIS 80878, 2019 WL 2110499, at *1 (D. Me. May 14, 2019) (citations and internal **[*4]** quotation marks omitted). In so doing, courts examine both public and private factors. *See, e.g.,* Johnson v. VCG Holding Corp., 767 F. Supp. 2d 208, 212 (D. Me. 2011). "Public factors encompass the statutory consideration of the interest of justice, focus on judicial economy and often include the district court's familiarity with the governing law, the local interest in deciding local controversies at home, and the relative congestion of the courts." *Id.* (citation and internal quotation marks omitted). "Private factors include the statutory considerations of convenience of the parties and witnesses, . . . plaintiffs['] forum preference, where the claim arose, and the relative ease of access to sources of proof." *Id.* (citation and internal quotation marks omitted). Courts also consider "the possibility of consolidation" and "the order in which the district court obtained jurisdiction[,]" Bath Iron Works, 2019 U.S. Dist. LEXIS 80878, 2019 WL 2110499, at *1 (citation and internal quotation marks omitted), implicating the degree to which transfer would serve public interests.

The moving party bears the burden of establishing that an action should be transferred, and "there is a strong presumption in favor of the plaintiff's choice of forum." Enercon v. Flextronics Int'l USA Inc., Docket no. 2:18-cv-00258-GZS, 2018 U.S. Dist. LEXIS 214801, 2018 WL 6729774, at *2 (D. Me. Dec. 21, 2018) (citation and **[*5]** internal quotation marks omitted). However, that presumption is overcome when, for example, the district chosen by the plaintiff is not the plaintiff's home forum, *see, e.g.,* Ahmed v. Mohammad, Civil No. 08-257-P-H, 2008 U.S. Dist. LEXIS 80132, 2008 WL 4457866, at *1 (D. Me. Oct. 1, 2008), or the plaintiff brings suit on behalf of itself and a "nationwide class," Johnson, 767 F. Supp. 2d at 213 (citations omitted).

II. Background

The order in which substantially similar lawsuits have been filed, either as "direct purchaser" suits, filed by and on behalf of direct purchasers of salmon, or "indirect purchaser" suits, filed by and on behalf of indirect purchasers of salmon, is as follows.

A. Direct Purchaser Suits

On April 23, 2019, Euclid Fish Company ("Euclid Fish"), on behalf of itself and all others similarly situated, filed a putative class action suit in the Southern District of Florida against the same 15 defendants named in the instant suit, alleging that they had engaged in the

> unlawful coordination of the prices charged to direct purchasers of farm-raised salmon and salmon products derived therefrom (such as salmon fillets or smoked salmon) which were sold directly by Defendants . . . between July 1, 2015 and the present in violation of Sections 1 and 3 of the Sherman Act (15 U.S.C. §§ 1, 3).

Class Action Complaint **[*6]** and Demand for Jury Trial ("*Euclid Fish* Complaint") (ECF No. 1), *Euclid Fish Co. v. Mowi ASA*, No. 1:19-cv-21551-CMA (S.D. Fla., filed Apr. 23, 2019), ¶ 1.[3]

On April 29, 2019, Schneider's Fish and Sea Food Corp. ("Schneider's Fish"), on behalf of itself and all others similarly situated, filed a nearly identical putative class action complaint in the Southern District of Florida, alleging that the same 15 defendants had engaged in unlawful coordination of prices charged to direct purchasers of salmon

[3] The *Euclid Fish* Complaint describes 10 of the defendants as foreign companies headquartered abroad and the remaining four as domestic companies with their respective principal places of business in Florida, Maine, Texas, and North Carolina. *Euclid Fish* Complaint ¶¶ 10-26.

and salmon products. Class Action Complaint and Demand for Jury Trial (ECF No. 1), *Schneider's Fish & Sea Food Corp. v. Mowi ASA*, No. 1:19-cv-21652-CMS (S.D. Fla., filed Apr. 29, 2019).[4]

By order dated May 10, 2019, the Southern District of Florida consolidated the *Euclid Fish* and *Schneider's Fish* actions into *In re: Farm-Raised Salmon and Salmon Products Litigation* ("*Farm-Raised Salmon*"). Order (ECF No. 27), *Euclid Fish* (S.D. Fla. May 10, 2019); *see also* Order of Recusal (ECF No. 4), *Euclid Fish* (S.D. Fla. Apr. 25, 2019) (assigning the case to Judge Cecilia M. Altonaga).

B. Indirect Purchaser Suits

On April 25, 2019, Bagels & Baguettes, on behalf **[*7]** of itself and all others similarly situated, filed a putative class action complaint in the Southern District of Florida against the same 15 defendants named in the instant suit, alleging that they had engaged in the

> unlawful coordination of the price of farm-raised salmon and salmon products derived therefrom which were sold by [the defendants] . . . between July 1, 2015 and the present in violation of federal ***antitrust law*** and various state antitrust and unfair competition, consumer protection and unfair trade practices, and unjust enrichment laws.

Class Action Complaint, Jury Trial Demanded ("*Bagels & Baguettes* Complaint") (ECF No. 1), *Bagels & Baguettes v. Mowi ASA*, No. 1:19-cv-21579-CMA (S.D. Fla., filed Apr. 25, 2019), ¶ 1. Bagels & Baguettes requested that the court certify a nationwide class of those "that purchased farm-raised salmon and/or products derived therefrom . . . other than directly from Defendants . . . from July 1, 2015 to the present[,]" *id.* ¶ 77 — in other words, a class of indirect purchasers.

On the same day, Bagels & Baguettes' counsel, including Samuel J. Dubbin and Daniel Cohen, also filed a notice that "an action alleging antitrust violations related to those **[*8]** found in the instant action is currently pending before the Honorable Cecilia Maria Altonaga: *Euclid Fish Company v. Mowi ASA, et al.*, No. 1:19-cv-21551-CMA." Notice of Pending, Refiled, Related, or Similar Actions (ECF No. 4), *Bagels & Baguettes* (S.D. Fla., filed Apr. 25, 2019). On May 1, 2019, the *Bagels & Baguettes* action was transferred by Judge James Lawrence King to Judge Altonaga. Order of Transfer (ECF No. 5), *Bagels & Baguettes* (S.D. Fla. May 1, 2019). The following day, Judge Altonaga directed that the parties in both *Farm-Raised Salmon* and *Bagels & Baguettes* "be prepared to discuss consolidation and case management issues." Order (ECF No. 6), *Bagels & Baguettes* (S.D. Fla. May 2, 2019). On May 3, 2019, Bagels & Baguettes, by and through its counsel, including Attorneys Dubbin and Cohen, voluntarily dismissed its action without prejudice. Notice of Voluntary Dismissal Without Prejudice (ECF No. 7), *Bagels & Baguettes* (S.D. Fla., filed May 3, 2019).

On May 9, 2019, Prime Steakhouse, located in Falconer, New York, filed the instant action, which appears identical in all material respects to *Bagels & Baguettes. Compare Bagels & Baguettes* Complaint *with Prime Steakhouse* Complaint. **[*9]** Attorney Cohen is among the signatories to the instant complaint. *Prime Steakhouse* Complaint at Page ID # 76. In this case, as in *Bagels & Baguettes*, the plaintiff requests that the court certify a nationwide class of indirect purchasers of farm-raised salmon and/or products derived therefrom. *Id.* ¶ 77.

On May 24, 2019, Wood Mountain Fish LLC ("Wood Mountain") filed a putative class action complaint in the Southern District of Florida against the same 15 defendants named in the instant suit, seeking redress on behalf of itself and 32 proposed classes of plaintiffs grouped by state, territory, or the District of Columbia, "who indirectly purchased Farm-raised salmon and/or products derived therefrom produced by any Defendant . . . during the Class Period." Class Action Complaint and Demand for Jury Trial ("*Wood Mountain* Complaint") (ECF No. 1), *Wood Mountain Fish LLC v. Mowi ASA*, No. 1:19-cv-22128-RS (S.D. Fla., filed May 24, 2019), ¶ 75; *see also id.* ¶ 1

[4] Through joint stipulation, Joint Stipulation for Substitution of Named Defendant Lerøy Seafood Group ASA (ECF No. 178), *Farm-Raised Salmon* (S.D. Fla., filed Nov. 26, 2019), Lerøy Seafood AS has been substituted for Lerøy Seafood Group ASS, and Lerøy Seafood Group ASA has been voluntarily dismissed, Order (ECF No. 184), *Euclid Fish* (S.D. Fla. Jan. 3, 2020).

(alleging that, between July 1, 2015, and the present, the defendants violated "the antitrust and consumer protection laws of each state recognizing a right of action for indirect purchasers harmed by anticompetitive conduct" and also **[*10]** seeking relief pursuant to the Clayton and Sherman acts).[5] The case was assigned initially to Judge Ursula Ungaro and then reassigned to Judge Rodney Smith. ECF Nos. 2, 22, *Wood Mountain* (S.D. Fla., dated May 24, 2019, and June 20, 2019, respectively).

On May 30, 2019, Wood Mountain filed a motion to transfer and coordinate its action with *Farm-Raised Salmon, see* Notice of Pending, Refiled, Related, or Similar Actions and Motion to Transfer and Coordinate with Related Consolidated Actions (ECF No. 8), *Wood Mountain* (S.D. Fla., filed May 30, 2019). However, Judge Ungaro denied the motion without prejudice on the basis that, whereas *Wood Mountain* was an indirect purchaser suit, *Farm-Raised Salmon* was a direct purchaser suit, "[a]nd Judge Altonaga has not indicated a willingness to accept the transfer." Order (ECF No. 14), *Wood Mountain* (S.D. Fla. June 4, 2019). Since then, the court has appointed an interim class counsel for the proposed indirect purchaser class, approved a plan for alternative service on the Norwegian defendants, and issued an order coordinating the timing of an amended complaint in that case with a ruling on *Rule 12(b)* motions in *Farm-Raised Salmon*. ECF Nos. 24, 45, **[*11]** 75, *Wood Mountain* (S.D. Fla., dated June 20, 2019, July 11, 2019, and July 26, 2019, respectively).

Finally, as the plaintiff noted in its response to the instant motion to transfer, *see* Response at 1, on October 1, 2019, Hunt-Alpine Club LLC ("Hunt-Alpine"), a restaurant in Portland, Maine, filed a putative class action suit in this court against 14 of the same defendants (all but Bremnes Seashore AS) that is substantially similar to both *Bagels & Baguettes* and the instant suit, *compare generally* Class Action Complaint, Jury Trial Demanded (ECF No. 1) ("*Hunt-Alpine* Complaint"), *Portland Hunt-Alpine Club LLC v. Mowi ASA*, No. 2:19-cv-00446-JAW (D. Me., filed Oct. 1, 2019) *with Bagels & Baguettes* Complaint; *Prime Steakhouse* Complaint. Attorneys Dubbin and Cohen are among the signatories to the *Hunt-Alpine* complaint. *Hunt-Alpine* Complaint at Page ID # 110.

III. Discussion

The defendants seek to transfer this case to the Southern District of Florida, emphasizing that (i) an action identical to this one was filed and then voluntarily dismissed after Judge Altonaga was assigned to the case, and (ii) two putative nationwide class action lawsuits remain pending in the Southern District of Florida **[*12]** that are predicated on the same core facts as the instant action and seek similar relief. *See* Motion to Transfer at 2-4. For the reasons that follow, after consideration of the relevant factors, I agree that transfer is warranted in this case.

A. Right to Bring Action in Transferee Forum

The parties do not dispute that the plaintiff could have filed this case in the Southern District of Florida, where defendant Marine Harvest USA, LLC, is incorporated and has its primary place of business. *See* Motion to Transfer at 9-10; Response at 3 n.3; *see also Prime Steakhouse* Complaint ¶ 14; *28 U.S.C. § 1332(c)(1)* ("a corporation shall be deemed to be a citizen of every State . . . by which it has been incorporated and of the State . . . where it has its principal place of business"). The defendants, thus, satisfy the threshold requirement of *Section 1404(a)* that the transferee forum be one in which the plaintiff had the right to bring the action at issue.

B. Interests to be Weighed

1. Public Factors

[5] Wood Mountain voluntarily dismissed without prejudice Bremnes Seashore AS as a defendant in the lawsuit. Notice of Voluntary Dismissal of Defendant Bremnes Seashore (ECF No. 85), *Wood Mountain* (S.D. Fla., filed Aug. 20, 2019).

As the defendants persuasively argue, *see* Motion to Transfer at 7-9, analysis of the public interests at stake favors the grant of their motion, in particular, the order in which this court obtained jurisdiction and the possibility of consolidation **[*13]** in the Southern District of Florida.

There is no dispute that two direct purchaser salmon price-fixing suits, *Euclid Fish* and *Schneider's Fish* (later consolidated as *Farm-Raised Salmon)*, as well as one indirect purchaser suit, *Bagels & Baguettes*, were filed in the Southern District of Florida more than a week prior to the filing of the instant suit. The plaintiff, nonetheless, contends that because Bagels & Baguettes voluntarily dismissed its suit without prejudice, and the instant action was the filed prior to *Wood Mountain*, the instant action is the first-filed indirect purchaser suit. *See* Response at 2, 6-7. Yet, in the totality of the circumstances, as the defendants rejoin, "[t]reating the complaint here as the first filed would magnify the exact risks the [first-filed] rule is designed to avoid: wasted resources because of piecemeal litigation, the possibility of conflicting judgments, and a general concern that the courts may unduly interfere with each other's affairs." Defendant's Reply in Support of their Motion to Transfer Venue Under 28 U.S.C. § 1404(a) ("Reply") (ECF No. 40) at 4 (citation and internal quotation marks omitted).

That both *Farm Raised Salmon*, an earlier filed direct purchaser **[*14]** suit, and *Wood Mountain*, a later filed indirect purchaser suit, remain pending in the Southern District of Florida is of significance here. While Bagels & Baguettes voluntarily dismissed its suit, "concurrent federal cases need not be exactly the same to generate a preference for the first-filed action." Bath Iron Works, 2019 U.S. Dist. LEXIS 80878, 2019 WL 2110499, at *3. Instead, analysis focuses on whether permitting concurrent cases to continue "raises concerns about the ills of duplicative litigation." *Id.* (citation and quotation marks omitted).

Such concerns were present in *Bath Iron Works*, in which this court discerned "significant overlap between th[e] case[s]" in this forum and the transferee forum when "both actions require[d] the deciding court to interpret" the same merger agreement, "in the context of the same set of historical corporate transactions, to determine which party [was] liable for the effects of resilient flooring operations conducted on the [same] parcel[.]" *Id.* (footnote omitted). The court determined that, were those cases "to proceed separately, the parties and courts would have to waste resources resolving the same contract issues in two different forums." *Id.* (citations and internal quotation marks omitted). It added that, **[*15]** "because the contract claims in the two actions [we]re so factually intertwined, they raise[d] the specter of conflicting judgments." *Id.* (citations and internal quotation marks omitted).

The same is true here. There is a significant overlap not only between *Bagels & Baguettes* and this suit, but also between *Farm-Raised Salmon* and this suit. Both this suit and *Farm-Raised Salmon* require the resolution of the same underlying factual issue: whether the defendants coordinated the price of farm-raised salmon. Absent a transfer, the "ills of duplicative litigation[,]" *id.* (citation and internal quotation marks omitted), including the waste of resources and the risk of conflicting judgments, would be present.

The plaintiff, nevertheless, contends that this action differs from those in the Southern District of Florida in important ways. *See* Response at 2, 7-8. First, the plaintiff argues that this case is unlikely to be consolidated with *Farm-Raised Salmon*, Judge Altonaga having been unwilling to consolidate an indirect purchaser suit, *Wood Mountain*, with a direct purchaser suit, *Farm-Raised Salmon. See id.* at 2.

Yet, even assuming this suit would not be consolidated with *Farm-Raised Salmon*, I perceive **[*16]** no reason why it could not be consolidated with *Wood Mountain*. Even the mere "possibility of consolidation" must be considered "when adjudicating a venue-transfer request in similar or related cases." Cruz-Acevedo v. Unilever U.S., Inc., Civil No. 15-2175 (ADC), 2016 U.S. Dist. LEXIS 192912, 2016 WL 9460633, at *6 (D.P.R. Sept. 26, 2016) (observing that "the Court can and should consider consolidation in its decision to transfer even though the transferee forum would be the one deciding whether to consolidate the cases") (citation and internal quotation marks omitted); *see also, e.g.,* Bath Iron Works, 2019 U.S. Dist. LEXIS 80878, 2019 WL 2110499, at *3 (transferring case in part because the court "discern[ed] no reason why the claims in this case could not be consolidated" with pending claim in transferee district).

Second, the plaintiff argues that it "seeks to certify a class that appears to be significantly narrower in scope than the putative class set forth in the Wood Mountain complaint." Response at 7. The plaintiff contends that combining this case with *Wood Mountain*, in which lead counsel already has been appointed for a class that seems to subsume the class the plaintiff seeks to represent, jeopardizes its bid for class certification because "a narrower class has a better chance of being certified than does a much broader one." *Id.* Finally, it complains that, if this action is **[*17]** consolidated with *Wood Mountain*, it will become part of a case led by a fundamentally different type of class representative — a wholesaler of farm-raised salmon whose damages claim may differ meaningfully from that of a restaurant selling farm-raised salmon such as itself. *See id.* at 7-8.

The plaintiff cites no authority for the proposition that such class certification issues weigh against a transfer. On the contrary, the pendency of both direct and indirect purchaser suits in one court seemingly would facilitate the resolution of such class certification issues. *See, e.g.*, 7B Charles Alan Wright, Arthur R. Miller, and Mary Kay Kane, *Federal Practice and Procedure* § 1798.1, at 231-32 (3d ed. 2005) (noting the "complicated problems of judicial coordination" posed by "competing and duplicative" class actions; observing that a "single nationwide class action seems to be the best means of achieving judicial economy" and ensuring fairness).

At bottom, despite the differences between this case and *Farm-Raised Salmon*, the possibility of the consolidation of this case with at least one other case pending in the Southern District of Florida, *Wood Mountain*, conserving judicial resources and eliminating the risk **[*18]** of conflicting judgments, weighs in favor of the transfer of this case to the Southern District of Florida. That is particularly true given that, in contrast to *Wood Mountain*, in which the District of Florida has appointed interim class counsel for the proposed indirect purchaser class, approved a plan for alternative service on the Norwegian defendants, and issued an order coordinating the timing of an amended complaint with *Rule 12(b)* practice in *Farm-Raised Salmon*, this case remains in its infancy. As noted above, the deadline for eight defendants to answer the complaint has been extended to April 27, 2020, the plaintiff's motion to serve five Norwegian defendants by alternate means is pending, the remaining defendant, along with three others, is the subject of a pending order that the plaintiff show cause for failure to effectuate timely service of the complaint, and no scheduling order has issued.

The relatively minimal effort expended by this court and the parties in this case, combined with the Southern District of Florida's greater familiarity with the parties, facts, and claims, supports transfer of this case to the Southern District of Florida. *See, e.g., Summers-Wood L.P. v. Wolf, No. 3:08-cv-60/RV/MD, 2008 U.S. Dist. LEXIS 108827, 2008 WL 2229529, at *4 (N.D. Fla. May 23, 2008)* **[*19]** (concluding that transfer was in the interests of justice when case was still in its infancy, and the parties had not even begun discovery); *see also, e.g., Kukich v. Electrolux Home Prods., Inc., Civil Action No. ELH-16-3412, 2017 U.S. Dist. LEXIS 9806, 2017 WL 345856, at *10 (D. Md. Jan. 24, 2017)* ("When a similar case is already pending in another district, transfer of related claims is favored because it may facilitate efficient pretrial proceedings and discovery and also because it avoids inconsistent results. Moreover, there is judicial economy in having the same judge consider the same underlying facts and issues only once[.]" (citations and internal quotation marks omitted)); *Tovar v. Indiana, Civil No. 2:12-CV-175-DBH, 2012 U.S. Dist. LEXIS 112103, 2012 WL 3263948, at *1-2 (D. Me. Aug. 9, 2012)* (transferring case to transferee court that was "familiar with the underlying dispute").

2. Private Factors

a. Presumption in Favor of Plaintiff's Choice of Forum

The defendants argue that, in this case, the strong presumption in favor of a plaintiff's choice of forum is overcome by (i) the plaintiff's "transparent forum shopping," (ii) its status as a New York entity with no alleged relationship to Maine, and (iii) the fact that it brings claims on behalf of a proposed nationwide class, rendering **[*20]** its choice of forum even less relevant. *See* Motion to Transfer at 10. The plaintiff rejoins that this showing fails to carry the defendants' burden of overcoming the strong presumption in favor of its choice of this forum. *See* Response at 4-5. It adds that, in any event, several factors militate in its favor: that (i) there are no clear indicia that it engaged in forum shopping, (ii) it has sued one Maine defendant, Mowi Ducktrap, LLC, and (iii) another Maine plaintiff, Hunt-Alpine, has filed a substantially similar indirect purchaser suit in this forum. *See id.*

The defendants have the better argument. The plaintiff's decision to file in Maine indeed appears to have been a tactical one. However, even apart from whether its choice of this forum was the product of "forum shopping," its lack of relationship with Maine, and the fact that it purports to act on behalf of a nationwide class, in themselves undermine the strong presumption in favor of preserving its choice of this forum. *See, e.g.,* *Ahmed, 2008 U.S. Dist. LEXIS 80132, 2008 WL 4457866, at *1* (presumption overcome when forum was not plaintiff's home forum); *Johnson, 767 F. Supp. 2d at 213* (presumption overcome when plaintiff brought suit on behalf of itself and a nationwide class). That a Maine plaintiff subsequently **[*21]** chose to bring a nearly identical suit in this forum has no bearing on whether the defendants have overcome the presumption in favor of this plaintiff's choice of forum.

b. Convenience of Parties and Witnesses

Examination of the convenience of the parties and witnesses supports transfer as well. The plaintiff does not argue that the Southern District of Florida is inconvenient, instead proposing to coordinate the instant action in Maine with the related actions in Florida:

> **Convenience of parties and witnesses:** Counsel for Prime Steakhouse has worked together with counsel for Wood Mountain and counsel for the plaintiff in the direct purchaser action, Euclid Fish Company, in *In re Packaged Seafood Products Antitrust Litig.*, Case No. 15-2670,[6] in which the law firms are lead counsel for different classes. Prime Steakhouse's counsel is willing to coordinate discovery in the pending lawsuits relating to farm-raised salmon price-fixing, so transfer of the Prime Steakhouse action is not required in order to avoid duplicative depositions and discovery. Defendants assert that transferring the Prime Steakhouse to Judge Smith will avoid "any possibility of repeat proceedings." (ECF No. 29 at 9). **[*22]** However, this would only be true of the indirect purchaser actions. The indirect and direct purchaser actions in the Southern District of Florida have not proceeded on the same schedule thus far.

Response at 7. The plaintiff's counsel's offer to coordinate discovery in the related actions does not allay concerns regarding the "ills of duplicative litigation." *Bath Iron Works, 2019 U.S. Dist. LEXIS 80878, 2019 WL 2110499, at *3* (citation and internal quotation marks omitted). First, coordinated discovery does not address the risk of conflicting judgments. Second, engaging in cross-jurisdictional coordinated discovery could itself lead to complication and inconvenience. Third, in making the above proposal, the plaintiff acknowledges that some form of consolidated discovery is necessary to avoid duplicative and repeat proceedings. This factor, accordingly, weighs in favor of transfer.

c. Availability of Documents

Turning, finally, to the availability of documents and other evidence, the parties agree that this factor is not determinative. *See* Response at 6; Reply at 6; *see also, e.g.,* *Johnson, 767 F. Supp. 2d at 216* ("This factor seems like a holdover from a time when businesses kept important records . . . in paper and **[*23]** the difficulty of physically assessing the paper documents and the burden of transporting them across jurisdictions could be onerous.").

In sum, consideration of the totality of the relevant circumstances, including the order in which the actions were filed, the similarity of the instant case to those pending in the Southern District of Florida, that court's familiarity with those cases, the plaintiff's lack of connection to this forum, and the plaintiff's weak showing of prejudice and lack of any showing of inconvenience arising from the transfer, weigh in favor of granting the defendants' motion to transfer this case to the Southern District of Florida.

---

[6] I presume that in referring to "*In re Packaged Seafood Products Antitrust Litig.*, Case No. 15-2670," the plaintiff meant to refer to *Farm-Raised Salmon*.

C. Judicial Panel on Multidistrict Litigation ("JPML")

The plaintiff seeks the denial of the Motion to Transfer or, in the alternative, a stay pending the resolution of any MDL petition the defendants might wish to file with the Judicial Panel on Multidistrict Litigation ("JPML") pursuant to *28 U.S.C. § 1407*. *See* Response at 9-10. The plaintiff argues that such a petition is the only way in which to address the defendants' concerns regarding "the multi-forum nature of the present litigation, which will not be eliminated by transfer of the [instant] **[*24]** action under *§ 1404*." *Id.* at 9. The plaintiff adds that transfer pursuant to the MDL statute would allow it to maintain its choice of trial forum, providing for a right of transfer back to the originating court in the event of trial. *See id.* at 9-10.

Nonetheless, as the defendants correctly note, "[t]he JPML has cautioned that the MDL procedure 'should be the last solution after considered review of all other options.'" Reply at 7 (quoting *In re: Best Buy Co., Inc., Cal. Song-Beverly Credit Card Act Litig., 804 F. Supp. 2d 1376, 1378 (J.P.M.L. 2011))*; *see also* *In re: Best Buy, 804 F. Supp. 3d at 1379* (denying motions for consolidation pursuant to *Section 1407* when "the proponents of centralization ha[d] not met their burden of demonstrating the need for centralization, particularly given the availability of *Section 1404*"); *In re: Michaels Stores, Inc., Pin Pad Litig., 844 F. Supp. 2d 1368, 1368-69 (J.P.M.L. 2012)* (same).

That the plaintiff prefers an MDL approach does not diminish the strength of the defendants' argument that transfer is appropriate pursuant to *Section 1404(a)*.

IV. Conclusion

For the foregoing reasons, I recommend that the defendants' motion to transfer this action to the United States District Court for the Southern District of Florida be **GRANTED**, the plaintiff's motion for a stay pending the resolution of any MDL petition be **DENIED**, and the three remaining motions pending in this case, ECF Nos. 14, 24, and 26, as well as this court's related order to show cause why service **[*25]** has not timely been accomplished on four of the defendants, ECF No. 15, be **DEEMED MOOT**.

NOTICE

A party may file objections to those specified portions of a magistrate judge's report or proposed findings or recommended decisions entered pursuant to 28 U.S.C. § 636(b)(1)(B) for which de novo review by the district court is sought, together with a supporting memorandum, within fourteen (14) days after being served with a copy thereof. A responsive memorandum shall be filed within fourteen (14) days after the filing of the objection.

Failure to file a timely objection shall constitute a waiver of the right to de novo review by the district court and to appeal the district court's order.

Dated this 23rd day of January, 2020.

/s/ John H. Rich III

Opinion

[*286] **MEMORANDUM OPINION**

Hydrogen peroxide (H_2O_2) is a veritable swiss army knife of chemicals. Often an environmentally friendly alternative to other substances, it bleaches paper, treats wastewater, disinfects knee scrapes, fuels rockets, and plays **[**5]** a role in manufacturing semiconductors, to name a few of its myriad applications. In November 2018, two of the five North American suppliers of hydrogen peroxide, Evonik and PeroxyChem, announced a proposed $625 million merger, and not long after, the Federal Trade Commission (FTC) launched an investigation into the potential anticompetitive effect of the merger. After a nine-month investigation, the FTC filed both an administrative complaint and this preliminary injunction action under *Section 13(b)* **[*287]** of the Federal Trade Commission Act, *15 U.S.C. § 53(b)*, and *Section 7* of the Clayton Act, *15 U.S.C. § 18*. The Court held a two-week evidentiary hearing in November 2019, during which it heard from twenty fact witnesses and two experts and received hundreds of exhibits.

The FTC seeks a preliminary injunction barring Evonik's acquisition of PeroxyChem, and it has the burden of showing that it is likely the proposed merger will substantially lessen competition in a relevant market. But the FTC made an important misstep. Rather than recognizing how hydrogen peroxide suppliers compete for customers served by its countless end uses—accounting for products' variations in purity, concentration, stabilizer chemicals, profitability, and even regulatory **[**6]** approval—the FTC pleaded and argued for a single market for all "non-electronics" hydrogen peroxide. And because evaluating a merger's competitive effects on a market requires the FTC to properly define a market in terms of both product and geography, that oversimplification all but precludes the Court from siding with it. For the reasons explained below, the Court concludes that the FTC has not made out its prima facie case, which requires it to show undue concentration for a particular product in a particular geographic area, and it has not otherwise shown a likelihood that the proposed Evonik-PeroxyChem merger will substantially harm competition. The Court must therefore deny the FTC's motion for a preliminary injunction, ECF No. 3.[1]

I. Background

A. Hydrogen Peroxide Suppliers

There are five suppliers of hydrogen peroxide in North America: Evonik, PeroxyChem, Solvay, Arkema, and Nouryon. DPFFCL at 13 ¶ 34. Evonik is an international chemical company based in Germany and controlled by Defendant RAG-Stiftung. *Id.* at 5 ¶ 3. Evonik produces hydrogen peroxide at three North American plants located in Mobile, Alabama; Gibbons, Alberta; and Maitland, Ontario. PPFFCL at 1 ¶ 1. Evonik seeks to acquire PeroxyChem, a Philadelphia-based international manufacturer of hydrogen peroxide, persulfates, and peracetic **[**7]** acid. DPFFCL at 5 ¶ 5. PeroxyChem produces hydrogen peroxide at two North American plants in Bayport, Texas, and Prince George, British Columbia. PPFFCL at 1-2 ¶ 2. Solvay has one plant in Deer Park, Texas—fewer than ten miles from PeroxyChem's Bayport plant—and one plant in Longview, Washington; Arkema has one plant in Memphis, Tennessee, and one in Becancour, Quebec; and Nouryon has a plant in Columbus, Mississippi. DPFFCL at 13-14 ¶ 35.

B. The Manufacture of Hydrogen Peroxide Products

To manufacture hydrogen peroxide, suppliers move a working solution through a hydrogenation, oxidation, and extraction process, continuously and nearly 365 days a year. PPFFCL at 4 ¶ 12; DPFFCL at 8 ¶ 16. The process produces "crude" hydrogen peroxide. PPFFCL at 4 ¶ 12. Suppliers stabilize the crude with **[*288]** chemical additives to prevent the product from decomposing and concentrate or distill it to produce a marketable product

---

[1] The documents submitted to the Court in this matter include: Complaint, ECF No. 1 ("Compl."); Plaintiff's Memorandum in Support of Motion for Preliminary Injunction, ECF No. 45-1 ("Br."); Defendants' Opposition to Plaintiff's Memorandum, ECF No. 56-1 ("Opp."); Plaintiff's Proposed Findings of Fact and Conclusions of Law, ECF No. 137-1 ("PPFFCL"); Defendants' Proposed Findings of Fact and Conclusions of Law, ECF No. 138-1 ("DPFFCL"). The Court hereby incorporates the FTC's Glossary of Hearing Witnesses, Deponents, and Declarants, PPFFCL at x-xi.

known as "standard grade" hydrogen peroxide, which is the lowest purity sold. *Id.*; DPFFCL at 9 ¶¶ 18-20. Suppliers formulate standard grade hydrogen peroxide at different concentration levels and add stabilizers to serve a variety of end uses, like bleaching pulp and paper (the largest hydrogen peroxide end use) and textiles; it is also used in wastewater treatment and in the mining and oil and gas industries. PPFFCL at 4 ¶ 13; Dumas Hrg. Tr. 235:1-3; **[**8]** Suter Hrg. Tr. 408:8-14; Costanzo Hrg. Tr. 1223:6-13; Montag Hrg. Tr. 1566:5-1567:2, 1600:23-1601:3. Stabilizer packages are proprietary, and a stabilizer like tin that works well for some applications does not for others. DPFFCL at 7-8 ¶ 13; Corson Hrg. Tr. 666:6-667:16; DX0348; PX1522-001 to -002; PX1055-001.

Suppliers can also purify standard grade to make "specialty grade" hydrogen peroxide. PPFFCL at 9 ¶ 27; DPFFCL at 9-10 ¶¶ 21-22. This higher grade or purity level also serves a variety of end uses. For example, in the chemical synthesis space, manufacturers use specialty grade hydrogen peroxide to make sodium chlorite, organic peroxides, and epoxidized soybean oil; in the home and personal care space, specialty grade is used in products for hair and teeth bleaching and in contact lens solutions; and in the food packaging space, manufacturers use it as a disinfectant for aseptic packaging. DPFFCL at 6-7 ¶ 11. These specialty grade applications not only require specific concentrations and stabilizers, but many of them also require FDA or EPA approval before purchasers can put them toward their intended uses. *See* DPFFCL at 8 ¶ 14.

A few suppliers further purify specialty grade to produce "pre-electronics grade" hydrogen peroxide. DPFFCL at 11 ¶ 27. Only **[**9]** Evonik and Arkema sell pre-electronics grade. *Id.* Manufacturing this grade of hydrogen peroxide, a product for which suppliers measure impurities in "parts per billion," Hamann Hrg. Tr. 1281:13, requires additional equipment, including a second reverse osmosis unit, more testing (several times a day), specially trained personnel, a specially equipped room and laboratory, and [TEXT REDACTED BY THE COURT]. Hamann Hrg. Tr. 1282:3-1286:16. PeroxyChem and Solvay produce a purified hydrogen peroxide "feedstock" that is a precursor to their production of *electronics* grade hydrogen peroxide, but the feedstock is not marketed to customers as pre-electronics grade hydrogen peroxide. Montag Hrg. Tr. 1528:1-5; Kramer Hrg. Tr. 1635:19-1636:7; Suter Hrg. Tr. 412:11-17. Over the years, [TEXT REDACTED BY THE COURT] Hancock Decl. ¶¶ 22-23, JX0001-004; Montag Hrg. Tr. 1531:23-1532:1; Suter Hrg. Tr. 434:24-435:11; Hill Hrg. Tr. 2080:22-23; JX0001-001; PPFFCL at 10-11 ¶¶ 32-33.

Some suppliers have the capability to refine pre-electronics grade even further to make the highest purity "electronics grade" hydrogen peroxide. Electronics grade is sold to semiconductor manufacturers to clean and etch silicon microchips. DPFFCL at 11-13 ¶¶ **[**10]** 27, 33. MGC, PeroxyChem, and Solvay sell electronics grade hydrogen peroxide. *Id.* at 13 ¶ 33.

As an engineering matter, a plant can only commit 40 to 50 percent of its output to specialty grade hydrogen peroxide, and only 60 percent of that specialty grade can be purified into pre-electronics grade, leaving around 36 pounds of pre-electronics grade for every 100 pounds of crude. [TEXT REDACTED BY THE COURT]; JX0151-015. Suppliers can shift production between different grades of hydrogen peroxide at a plant merely by adjusting a valve. Hamann Hrg. Tr. 1322:24-1323:13; *see, e.g.*, Suter Hrg. Tr. 406:6-14 ("We get customer input, we look at historical **[*289]** data, and we operate with basically a 90-day rolling forecast. We can make any grade at any time of the month as long as we're forecasting it properly." (cleaned up)).

C. The Sale of Hydrogen Peroxide Products

Hydrogen peroxide suppliers sell their products by the pound from around 30 cents per pound to over a dollar; standard grade is generally the cheapest (and least profitable), then specialty grade, pre-electronics grade, and electronics grade. DPFFCL at 14 ¶¶ 36-38; JX0066-43 fig. 10; JX0151-022; [TEXT REDACTED BY THE COURT]. The annual capacity of hydrogen **[**11]** peroxide plants ranges from around [TEXT REDACTED BY THE COURT] million pounds (Evonik's Maitland plant) to [TEXT REDACTED BY THE COURT] million pounds (PeroxyChem's Bayport plant). PPFFCL at 26-27 ¶¶ 83-93. A significant component of each product's price is transportation cost because hydrogen peroxide is typically heavily diluted with water when it is delivered via railcars and trucks. DPFFCL at 15 ¶ 40. As a result, the distance between customers and plants is a major factor in competition between suppliers. *Id.* ¶ 41.

Hydrogen peroxide suppliers compete for customers across grades and end uses through blind bidding contests for high-volume, long-term contracts. *Id.* ¶ 42. A customer publishes a request for proposal (RFP) for a given location, specifying the hydrogen peroxide product, volume, and contract length sought; suppliers submit confidential bids; and then the customer usually lets one or more of the bidders know how competitive their bid is (without sharing specific prices) so that they will lower their bid price. *See id.* at 15 ¶¶ 42, 44; *id.* at 66-67 ¶ 173. This process produces substantial cost savings for hydrogen peroxide customers, and prices have generally decreased the last few years in part as a result. *See* DPFFCL at 53-55, 66-67 ¶¶ **[**12]** 143-46, 173; Hill Rpt., JX0066-097 to -099 figs. 44-46.

D. Procedural History

Evonik announced its intent to acquire PeroxyChem for $625 million in November 2018. JX0078-011 to -013. The two firms filed a pre-merger notification with the FTC pursuant to the *Hart-Scott-Rodino Improvements Act, 15 U.S.C. § 18a*. Compl. ¶ 20. The FTC then launched a nine-month investigation, during which Defendants produced millions of pages of documents and the FTC interviewed or deposed more than 50 industry participants. Opp. at 2. The FTC voted on August 2, 2019, to commence an administrative proceeding to challenge the acquisition under *Section 5* of the Federal Trade Commission Act, *15 U.S.C. § 53(b)*, and *Section 7 of the Clayton Act, 15 U.S.C. § 18*, alleging that the proposed merger will substantially lessen competition. Compl. ¶ 9. The FTC also filed the instant action and moved for a preliminary injunction, ECF No. 3, and the parties entered into a stipulated restraining order preventing Defendants from closing the proposed transaction until five business days after the Court rules on the motion, ECF No. 9. The parties have delayed the administrative proceeding pending the Court's decision. Mahr Hrg. Tr. 2438:3-10.

Within days of the FTC moving for a preliminary injunction **[**13]** in this action, Evonik and PeroxyChem agreed on a divestiture of PeroxyChem's plant in Prince George, British Columbia. Share Purchase Agreement, JX0147-017. If the merger closes, a new competitor, international chemical producer United Initiators GMBH (UI), will purchase the plant for [TEXT REDACTED BY THE COURT]. *Id.* The Canadian Competition Bureau investigated the proposed merger with PeroxyChem and the divestiture of the **[*290]** Prince George plant to UI and entered into a Consent Agreement with Evonik that approves both. Consent Agreement (Jan. 13, 2020), ECF No. 141-1 at 1-2, 10, 12-13. The proposed divestiture of the Prince George plant means that the FTC's challenge to Evonik's acquisition of PeroxyChem only concerns its other hydrogen peroxide plant in Bayport, Texas, setting aside Evonik's acquisition of PeroxyChem's unrelated assets for other chemicals. *See* DPFFCL at 6 ¶ 7.

II. Legal Standard

Section 7 of the Clayton Act, *15 U.S.C. § 18*, prohibits mergers "where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition . . . may be substantially to lessen competition, or tend to create a monopoly." "*Section 7* involves *probabilities*, not certainties or possibilities," **[**14]** *United States v. Baker Hughes, Inc., 908 F.2d 981, 984, 285 U.S. App. D.C. 222 (D.C. Cir. 1990)*, and a plaintiff must show that the substantial lessening of competition will be "sufficiently probable and imminent." *United States v. Marine Bancorp., 418 U.S. 602, 623 n.22, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974)* (internal quotation omitted); *see* *United States v. Gen. Dynamics Corp., 415 U.S. 486, 505, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1974)*.

If the FTC "has reason to believe that a corporation is violating, or is about to violate, *Section 7 of the Clayton Act*, the FTC may seek a preliminary injunction" from a federal district court under *Section 13(b) of the Federal Trade Commission Act, 15 U.S.C. § 53(b)*, "to prevent a merger pending the Commissioner's administrative adjudication of the merger's legality." *FTC v. H.J. Heinz Co., 246 F.3d 708, 714, 345 U.S. App. D.C. 364 (D.C. Cir. 2001)* (quoting *FTC v. Staples, Inc., 970 F. Supp. 1066, 1070 (D.D.C. 1997)* (*Staples I*)). *Section 13(b)* provides for a preliminary injunction to block a merger when "such action would be in the public interest," after "weighing the equities and considering the Commission's likelihood of ultimate success." *15 U.S.C. § 53(b)*; *see* *Heinz, 246 F.3d at 726*.

To obtain a preliminary injunction, the FTC "is not required to prove, nor is the court required to find, that the proposed merger would in fact violate *Section 7* of the Clayton Act." *Staples I, 970 F. Supp. at 1070*. That determination is reserved for the FTC through its administrative proceeding. *Id.* However, the FTC must show that there is a "reasonable probability" or "appreciable danger" that the acquisition may substantially lessen competition. *Id. at 1072*; *Heinz, 246 F.3d at 713, 719*. It can do so by raising "questions going to the merits so serious, substantial, difficult **[**15]** and doubtful as to make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the Court of Appeals." *Heinz, 246 F.3d at 714-15* (internal citation omitted). That burden "is not insubstantial, and a showing of a fair or tenable chance of success on the merits will not suffice for injunctive relief." *FTC v. Arch Coal, Inc., 329 F. Supp. 2d 109, 116 (D.D.C. 2004)* (cleaned up); *see* *FTC v. Wilh. Wilhelmsen Holding ASA, 341 F. Supp. 3d 27, 44 (D.D.C. 2018)* ("A preliminary injunction in this context remains an extraordinarily drastic remedy, especially since as a result of the short life-span of most tender offers, the issuance of a preliminary injunction blocking an acquisition or merger may prevent the transaction from ever being consummated." (cleaned up)).

To assess the FTC's likelihood of success on the merits, the Court applies the D.C. Circuit's burden-shifting framework set forth in *Baker Hughes, 908 F.2d at 982-83*. *See* *Heinz, 246 F.3d at 715*. **[*291]** First, the FTC bears the prima facie burden of showing that the Evonik-PeroxyChem merger will lead to "undue concentration in the market for a particular product in a particular geographic area." *Baker Hughes, 908 F.2d at 982*; *see* *Arch Coal, 329 F. Supp. 2d at 117*. That showing establishes a presumption that the merger will substantially lessen competition. *Baker Hughes, 908 F.2d at 982*. Defendants can then rebut this presumption by demonstrating that the FTC's prima **[**16]** facie case and market-share statistics inaccurately predict the merger's probable effects in the relevant market. *Id. at 991*. If Defendants' rebuttal is successful, the burden of producing further evidence of anticompetitive effects shifts to the FTC "and merges with the ultimate burden of persuasion which remains with the [FTC] at all times." *Id. at 983*.

In addition to assessing the FTC's prima facie case and any rebuttal evidence, in deciding whether to grant preliminary injunctive relief, the Court must weigh the equities. Because the public's interest in effective enforcement of the antitrust laws is paramount, a "showing of likelihood of success creates a presumption in favor of preliminary injunctive relief." *Heinz, 246 F.3d at 726*. "Conversely, absent a likelihood of success on the merits, equities alone will not justify an injunction." *Arch Coal, 329 F. Supp. 2d at 116*.

The Supreme Court has also stressed that courts must judge "the probable anticompetitive effects of the merger" "functionally" and based on "a further examination of the particular market—its structure, history and probable future." *Gen. Dynamics, 415 U.S. at 498* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320-21, 82 S. Ct. 1502, 8 L. Ed. 2d 510 & n.38 (1962))* (cleaned up). Therefore, "antitrust theory and speculation cannot trump facts, and even *Section 13(b)* cases must be resolved on the basis of the record evidence **[**17]** relating to the market and its probable future." *Arch Coal, 329 F. Supp. 2d at 116-17*.

III. Analysis

A. The FTC's Prima Facie Case

For the FTC to show a likelihood of success on the merits and justify a preliminary injunction blocking the Evonik-PeroxyChem merger, it must first meet its prima facie burden by (1) defining a relevant product market, (2) defining a relevant geographic market, and (3) showing undue concentration in that combined market. *Baker Hughes, 908 F.2d at 983*.

1. Defining the Relevant Market

"The relevant market is the 'area of effective competition' within which the defendants operate." United States v. E. I. du Pont de Nemours & Co., 353 U.S. 586, 649, 77 S. Ct. 872, 1 L. Ed. 2d 1057 (1957) (quoting Standard Oil Co. of Cal. v. United States, 337 U.S. 293, 299 n.5, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949)). Defining the relevant market is a "necessary predicate" to finding a Clayton Act violation because the proposed merger "must be one which will substantially lessen competition within the area of effective competition." Id. at 593 (internal quotations omitted); *see* Baker Hughes, 908 F.3d at 982 (government must "show[] that a transaction will lead to undue concentration in the market for a particular product"). The scope of the relevant market also dictates the analysis of market power and the merger's anticompetitive effects. *See* United States v. Sungard Data Sys., Inc., 172 F. Supp. 2d 172, 181 (D.D.C. 2001); FTC v. Cardinal Health, Inc., 12 F. Supp. 2d 34, 45 (D.D.C. 1998). "The FTC bears the burden of proof and persuasion in defining the relevant market." FTC v. **[*292]** Arch Coal, Inc., 329 F. Supp. 2d 109, 119 (D.D.C. 2004).

A relevant market has two parts: a product market and a geographic **[**18]** market, Marine Bancorp., 418 U.S. at 618. The relevant product market identifies the object of Defendants' competition, and the relevant geographic market identifies where that competition takes place. *See* Arch Coal, 329 F. Supp. 2d at 119.

The parties sharply contest both aspects of the relevant market. The FTC argues that the relevant market is non-electronics grade hydrogen peroxide within two separate geographic markets, the Pacific Northwest and the Southern and Central United States. Defendants argue that both components of the FTC's proposed market are overbroad and inconsistent with the commercial realities of the industry. The Court agrees with Defendants that the FTC has not met its burden of establishing its prima facie case because it has not identified a relevant market within which to analyze the merger's possible anticompetitive effects. That failure begins and ends with the FTC's theory of supply-side substitution, or "swinging," a substantial departure from the typical way in which a product market is defined.

a. The FTC's Product Market and Alternative Product Markets

The Court begins with the FTC's proposed product market for the sale of standard, specialty, and pre-electronics grade hydrogen peroxide, which it calls the "non-electronics" **[**19]** hydrogen peroxide market. PPFFCL at 84 ¶¶ 23-25.

Product markets are almost always defined by demand substitution. *See* Heinz, 246 F.3d at 718; Wilhelmsen, 341 F. Supp. 3d at 45 (demand substitution the "touchstone" of product market definition). Demand substitution describes "customers' ability and willingness to substitute away from one product to another in response to a price increase or a corresponding non-price change such as a reduction in product quality or service." Merger Guidelines § 4. Demand substitution polices the "outer boundaries of a product market" and is governed by either (1) consumers' "reasonable interchangeability of use" or (2) the "cross-elasticity of demand" (price sensitivity) between a product and substitutes for it. Brown Shoe, 370 U.S. at 325. When aggregating products into a relevant market, courts focus on demand substitution because it illuminates whether customers can switch to one product and constrain anticompetitive pricing in another. United States v. Aetna Inc., 240 F. Supp. 3d 1, 20 (D.D.C. 2017); *see* FTC v. Swedish Match, 131 F. Supp. 2d 151, 157 (D.D.C. 2000); Hill Hrg. Tr. 2076:15-25. For instance, if customers would switch from Jif peanut butter to Peter Pan following a price increase, those two products are more likely to be included in a relevant product market.

A relevant product market also "must be drawn narrowly to exclude any other product to which, **[**20]** within reasonable variations in price, only a limited number of buyers will turn; in technical terms, products whose 'cross-elasticities of demand' are small." Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 612 n.31, 73 S. Ct. 872, 97 L. Ed. 1277 (1953); *see* Arch Coal, 329 F. Supp. 2d at 120 ("Relevant market analysis is based on the 'narrowest market' principle."); Merger Guidelines § 4.1.1 (product market defined based on "smallest relevant market satisfying the hypothetical monopolist test"). For example, Jif may compete with mayonnaise "in the overall marketplace" for sandwich spreads, but that does not necessarily mean both should "be included in **[*293]** the relevant product market for antitrust purposes," Staples I, 970 F. Supp. at 1075.

Courts use two approaches to help define a relevant product market. The first is the "hypothetical monopolist test." *FTC & DOJ Horizontal Merger Guidelines* (2010), § 4.1.1. The test asks whether a hypothetical monopolist controlling the products in the alleged market could profitably impose at least a small but significant and non-transitory increase in price (SSNIP), generally assumed to be about five percent, on at least one product in the market.[2] *FTC v. Staples, Inc., 190 F. Supp. 3d 100, 121-22 (D.D.C. 2016)* (*Staples II*). If a hypothetical monopolist can profitably impose a SSNIP, the products may comprise a relevant market. *Id. at 121*. The second approach weighs the *Brown Shoe* factors: **[**21]** "industry or public recognition of the [relevant market] as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Brown Shoe, 370 U.S. at 325*; *see Wilhelmsen, 341 F. Supp. 3d at 47*.[3]

While the Merger Guidelines explicitly state that "[m]arket definition focuses solely on demand substitution factors," § 4, they provide an exception to that general rule when "supply side substitution" may be used to aggregate products that are not demand substitutes into one market, *id.* § 5.1 & n.8. Rather than relying on consumers' ability to constrain prices, supply-side substitution or elasticity focuses on *suppliers'* responsiveness to price increases and their ability to constrain anticompetitive pricing by readily shifting what they produce. *See Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1436 (9th Cir. 1995)*; Rothman Rpt., JX0075-034 (aggregating products that are supply-side substitutes better "reflect[s] suppliers' competitive significance"). According to supply-side substitution theory, the higher the cross-elasticity of supply—"the capability of . . . production facilities to be converted to produce a substitute product"—"the more likely it is that the alternative **[**22]** products are to be counted in the relevant market." *Cardinal Health, 12 F. Supp. 2d at 46*; *see Brown Shoe, 370 U.S. at 325 n.42* ("The cross-elasticity of production facilities may also be an important factor in defining a product market."); *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 792 F.2d 210, 218, 253 U.S. App. D.C. 142 (D.C. Cir. 1986)* (same).

The Merger Guidelines offer a helpful shorthand for supply side substitution—"swinging." Suppliers are said to have "readily available 'swing' capacity" to "rapidly" enter a product market—and therefore to constrain anticompetitive pricing—if "supply side substitution is" (1) "nearly universal among the firms selling one or more of a group of products," (2) "easy," and (3) "profitable." Merger Guidelines § 5.1 & n.8 (cleaned up); PPFFCL at 84-85 ¶ 24. The parties' experts "agree that proof of each of these three conditions is **[*294]** required before a relevant product market may be defined based on supply-side considerations," DPFFCL at 23 ¶ 68, and the Court sees no reason to disagree.[4] *Rebel Oil* offers a helpful illustration of supply-side substitution. The court in that case grouped the sale of self-serve and full-service gasoline into one relevant product market because it found that "sellers of full-serve gasoline can easily convert their full-serve pumps, at virtually no cost, into self-serve, cash-only pumps, expanding

---

[2] The Merger Guidelines, while not binding on courts, offer persuasive guidance in examining competitive effects. *See Heinz, 246 F.3d at 716 n.9*. They also recognize that a SSNIP may be "larger or smaller than five percent" based on industry specifics, § 4.1.2, but the FTC's uncontested position is that a SSNIP of "about five percent" is appropriate. PPFFCL at 2 ¶ 5.

[3] "The *Brown Shoe* practical indicia may indeed be old school, and its analytical framework relegated 'to the jurisprudential sidelines.' But *Brown Shoe* remains the law, and this court cannot ignore its dictates." *FTC v. Sysco Corp., 113 F. Supp. 3d 1, 27 n.2 (D.D.C. 2015)* (quoting ***FTC v. Whole Foods Market, Inc., 548 F.3d 1028, 1059 (2008)*** (Kavanaugh, J., dissenting)) (cleaned up).

[4] The 2010 Merger Guidelines' reference to swinging postdates the very few cases that have considered supply-side substitution, so those cases do not reference the three swinging requirements. Nonetheless, the case law is generally consistent with them. *See, e.g., Brown Shoe, 370 U.S. at 366-68* (Harlan, J., dissenting in part, concurring in part) (swinging between women's and men's shoes); *United States v. Colum. Steel Co., 334 U.S. 495, 510-11, 68 S. Ct. 1107, 92 L. Ed. 1533 (1948)* (swinging production of different rolled steel products); *Rebel Oil, 51 F.3d at 1436* (swinging between offering full-service and self-serve gasoline); *Virtual Maint., Inc. v. Prime Comput., Inc., 11 F.3d 660, 665 (6th Cir. 1993)* (swinging between computer systems with and without software updates included); *FTC v. Elders Grain, Inc., 868 F.2d 901, 907 (7th Cir. 1989)* (swinging between variations of industrial dry corn); *cf. FTC & DOJ Horizontal Merger Guidelines* §§ 1.32-1.322 (1997) (describing similar parameters for defining aggregate product market based on supply side substitution).

output and thus constraining **[**23]** any attempt by [the defendant] to charge [higher] prices for selfserve gasoline." 51 F.3d at 1436.

i. Swinging Between Standard, Specialty, and Pre-Electronics Grade Hydrogen Peroxide

The FTC's only basis for aggregating standard, specialty, and pre-electronics grade hydrogen peroxide into a single market is supply-side substitution. Rhilinger Hrg. Tr. 2272:14-16. The Court therefore turns to the evidence about whether suppliers' swinging between production of these grades is nearly universal, easy, and profitable, as set forth in the Merger Guidelines. The Court finds that the FTC has failed to meet its burden of showing that supplyside substitution across these three grades meets any of the three requirements.

(A) Nearly Universal

The Court cannot conclude, as the FTC urges, that swinging across these grades—while present to some degree—is "nearly universal" among the market participants. Merger Guidelines § 5.1 n.8.

First, and most obviously, three of the five North American suppliers of hydrogen peroxide do not, at present, swing to the production of pre-electronics grade hydrogen peroxide: they simply do not produce that product. PeroxyChem and Solvay produce a purified hydrogen peroxide **[**24]** "feedstock" that is a precursor to their production of electronics grade hydrogen peroxide. Montag Hrg. Tr. 1528:1-5; Kramer Hrg. Tr. 1635:19-1636:7; Suter Hrg. Tr. 412:11-17. But just because they further refine this feedstock to make electronics grade hydrogen peroxide does not mean it is pre-electronics grade for swinging purposes. In fact, PeroxyChem and Solvay do not market or sell their feedstock to customers as pre-electronics grade hydrogen peroxide. JX0001-004, Hancock Declaration ¶¶ 22-23; Montag Hrg. Tr. 1531:23-1532:1; Suter Hrg. Tr. 434:24-435:11. For that reason, they do not constrain the prices of pre-electronics grade hydrogen peroxide sold by Evonik and Arkema. [TEXT REDACTED BY THE COURT] Radlinski Hrg. Tr. 572:4-6, 572:18-23. Swinging is not nearly universal between grades of hydrogen peroxide where a majority of suppliers do not swing into one of the three grades.

[*295] Second, although all suppliers produce hydrogen peroxide for more than one end use, some do not swing into specialty grade hydrogen peroxides formulated for specific end uses. For example, Evonik does not sell an aseptic packaging product in the United States, and Nouryon does not make one at all. Suter **[**25]** Hrg. Tr. 411:18-412:7; Corson Hrg. Tr. 597:14-22, 672:12-16; PX2187-040. The tin stabilizer in Evonik's hydrogen peroxide prohibits it from marketing a chemical synthesis product and from obtaining EPA approval to market hydrogen peroxide biocide products. Corson Hrg. Tr. 666:6-667:16; DX0348; PX1522-001 to -002; PX1055-001. Some suppliers also do not swing into specialty grade hydrogen peroxide formulated for medical sterilization, contact lens solution production, and rocket propulsion. DPFFCL at 87 ¶ 234 n.537.

The FTC tries to waive away this evidence by arguing that specialty grade hydrogen peroxide formulated for those various end uses to which suppliers cannot swing comprises a small percentage "of all H_2O_2 in North America." PPFFCL at 16 ¶ 50. But the FTC decided to include specialty grade hydrogen peroxide in its proposed product market, and this argument says nothing about the ability—or inability—of various suppliers to swing into different specialties. The FTC has not provided evidence, as it must to establish a product market based on swinging *across grades, see* Arch Coal, Inc., 329 F. Supp. 2d at 119, that shows the portion of the *specialty grade* market to which suppliers actually do swing.[5]

---

[5] Defendants also argue that swinging is not nearly universal because the hydrogen peroxide manufacturing process limits suppliers from swinging 100 percent of their capacity to specialty or pre-electronics grade hydrogen peroxide. *See* DPFFCL at 25 ¶ 74; *id.* at 32 ¶ 87. While this may distinguish swinging in the hydrogen peroxide industry with swinging from the Fourdrenier paper machine, not all capacity necessarily needs to swing into a substitute market in order to constrain anticompetitive prices. To constrain prices for specialty or pre-electronics grade hydrogen peroxide, a minority of the overall hydrogen peroxide market, *see* Rothman Hrg. Tr. 755:21-25, suppliers need only purify a fraction of their standard grade hydrogen peroxide.

Finally, it bears noting that much **[**26]** of what the FTC characterizes as swinging in the hydrogen peroxide market is not the sort of activity that constrains prices in the way the Merger Guidelines appear to intend. This is so because over time suppliers are moving overwhelmingly in one direction toward higher purity products that are more profitable. In fact, Defendants' expert, Dr. Nicholas Hill, persuasively testified that a supplier's adjustments described above—the "strategic decision to sell more of one of its products and less of another . . . *in one direction*"—is *not* swinging under the Guidelines. Hill Hearing Tr. 2078:7-10 (emphasis added). Rather, swinging "means to move back and forth producing those products"—like a swing. *Id.* 2077:24-2078:6. Dr. Hill's prototypical swinging example is the Fourdrenier paper machine. *Id.* 2079:17-18. The machine shifts between producing containerboard for cardboard boxes and kraft paper for grocery bags. *Id.* 2079:6-2080:1. Of course, cardboard boxes and grocery bags are not demand substitutes, but based on the relative profitability of those two products at any given time, the supplier "swings" between the two "at the touch of a button." *Id.* Dr. Hill's conception of swinging "back **[**27]** and forth" is intuitive and tracks the few cases to recognize supply substitution; the Fourdrenier paper machine is like the retailer swinging between full-service and self-serve gasoline in *Rebel Oil, 51 F.3d at 1436*.

[*296] In contrast, the record suggests that the market for hydrogen peroxide reflects a long-term shift in production *in one direction*, toward high-purity, specialized products that are more profitable. *See, e.g.*, JX0151-016 [TEXT REDACTED BY THE COURT] *id.* -017 [TEXT REDACTED BY THE COURT] Rettig Hrg. Tr. 1047:10-15 (Evonik "focusing on specialty chemicals" because they "promise higher returns in terms of profitability."). At the same time, suppliers are moving away from the shrinking pie that is the pulp and paper industry. As a result, these shifts in production are not as likely to constrain anticompetitive prices downward, for example, for standard grade hydrogen peroxide, as would be the case if suppliers more commonly swung both back *and* forth between grades.

For these reasons, the record does not support the conclusion that swinging across standard, specialty, and pre-electronics grade hydrogen peroxide is nearly universal.

(B) Easy

Similarly, the Court cannot conclude that swinging across all **[**28]** these grades—while in some cases relatively simple—is generally "easy" for purposes of analyzing competition in the hydrogen peroxide market.

The Merger Guidelines' section that references swinging lacks a definition for "easy," § 5.1, but later on, the Guidelines describe "easy" entry into a market as "timely, likely, and sufficient in its magnitude, character, and scope to deter or counteract the competitive effects of concern," § 9.[6] These standards reflect why courts consider supply substitution in product market definition—to assess if suppliers can constrain anticompetitive prices.

The record is clear that it is easy for *some* suppliers, merely as a matter of production mechanics, to swing *some* capacity up-grade or down-grade between standard, specialty, and—for the two suppliers who currently market pre-electronics—pre-electronics grade hydrogen peroxide. Suter Hrg. Tr. 406:9-14; Myrick Hrg. Tr. 485:24-486:11; Radlinski Hrg. Tr. 539:16-19; Hamann Hrg. Tr. 1322:3-19; Kramer Hrg. Tr. 1685:8-14, 1686:10-13, 1696:4-10, 1696:25-1698:8. Evonik admitted as much to regulators before the FTC moved for a preliminary injunction. *See* PX0019-010 ("some" diversion from specialty **[**29]** to standard grade hydrogen peroxide "could be easily and quickly accomplished at no significant cost"); PX1201-012 ([TEXT REDACTED BY THE COURT]).

But in many other cases, the evidence is just as clear that it is *not* easy for a given supplier to swing into a given grade. Although suppliers can swing 100 percent of their capacity *down*-grade, Hill Hrg. Tr. 2165:22-2166:4, the manufacturing process limits how much can swing *up*-grade; a plant can only commit [TEXT REDACTED BY THE COURT] to [TEXT REDACTED BY THE COURT] percent of output to specialty grade hydrogen peroxide, and only [TEXT REDACTED BY THE COURT] percent of that specialty grade can be purified into pre-electronics grade,

[6] An earlier version of the Merger Guidelines—which does not use the word "easy" to describe product market definition by supply substitution—suggests that swinging into the "production and sale of the relevant product" must take place "within one year" in response to a SSNIP in the relevant product. *Merger Guidelines* § 1.321-1.322 (1997); *see also id.* § 1.321 n.14.

leaving around [TEXT REDACTED BY THE COURT]pounds of pre-electronics grade hydrogen peroxide for every 100 pounds of crude. [TEXT REDACTED BY THE COURT]; [TEXT REDACTED BY THE COURT]; [TEXT REDACTED BY THE COURT]; JX0151-015. As discussed above, this limitation does not necessarily stop suppliers from constraining prices across grades. That said, it does make it difficult [TEXT REDACTED BY THE COURT][7]

[*297] The FTC argues that it is easy for the three suppliers who do not market pre-electronics grade hydrogen peroxide **[**30]** to swing into that market. Indeed, some of Evonik's submissions to regulators give the same impression: [TEXT REDACTED BY THE COURT] PX0002-031; PX1201-012. And in general, the technology required to produce pre-electronics grade is not substantially different from the technology required to produce lower-grade hydrogen peroxide. *See* [TEXT REDACTED BY THE COURT]; PX1387-010 to -017.

But the reality is much more complicated. Producing pre-electronics grade hydrogen peroxide requires additional equipment, including a second reverse osmosis unit, additional testing (several times a day) to ensure the equipment is working, specially trained personnel, a specially equipped room and laboratory, and [TEXT REDACTED BY THE COURT]. Hamann Hrg. Tr. 1282:3-1286:16. Evonik has years of experience supplying pre-electronics grade hydrogen peroxide to MGC from its plant in Mobile, Alabama, and it *still* cost the company [TEXT REDACTED BY THE COURT] over more than [TEXT REDACTED BY THE COURT] to upgrade its Gibbons, Alberta, plant to supply the same product. *See* Costanzo Hrg. Tr. 1136:5-1137:3, 1144:11-1145:9 ([TEXT REDACTED BY THE COURT]); Hamann Hrg. Tr. 1326:25-1327:14; PX0002-031. And all of that **[**31]** assumes the supplier even has the technical know-how to produce pre-electronics grade hydrogen peroxide, far from a given. Were a supplier like [TEXT REDACTED BY THE COURT]—which has never tried to produce pre-electronics grade, [TEXT REDACTED BY THE COURT], likely because of the complexity and costs just described—to try to swing into that market, the effort would be anything but "timely, likely, [or] sufficient" to constrain prices. Merger Guidelines § 9.

Counterintuitively, it is also not easy for PeroxyChem or Solvay—which make electronics grade hydrogen peroxide—to swing into pre-electronics grade, either. The FTC produced some evidence that PeroxyChem *may* be able to market its electronics feedstock as preelectronics grade hydrogen peroxide. But MGC—"the largest customer for pre-electronics[,] which buys on the order of 99 percent of pre-electronics that's sold," Hill Hrg. Tr. 2080:22-23; *see also* JX0001-001—has never approved [TEXT REDACTED BY THE COURT] feedstock as satisfactory pre-electronics grade hydrogen peroxide after years of trying on their part. *See* PPFFCL at 10-11 ¶¶ 32-33.[8] It is exceedingly difficult for [TEXT REDACTED BY THE COURT] pre-electronics hydrogen peroxide, PX0002-031, a product **[**32]** for which suppliers measure impurities in "parts per billion," Hamann Hrg. Tr. 1281:13. *See* DPFFCL at 26-27, 29 ¶¶ 77-78, 81. That includes PeroxyChem and Solvay, even though they sell electronics grade hydrogen peroxide, it is not easy for them to sell pre-electronics grade. A world-renowned baker may sell birthday cakes; it does not mean he can come close to swinging into the cake-mix market if Betty Crocker decides to raise prices. Mahr Hrg. Tr. 2327:13-16.[9]

---

[7] [TEXT REDACTED BY THE COURT] *See* DPFFCL at 25-26 ¶¶ 72, 75.

[8] An internal Evonik document could be construed to suggest that Evonik considers PeroxyChem and Solvay competitors for pre-electronics grade H_2O_2, *see* PPFFCL at 12 ¶ 35 (citing PX1156-010), but the better reading of that chart is that it represents the entire electronics market, with Arkema and Evonik's slices meant to signify the pre-electronics hydrogen peroxide they supply to MGC. *See* DPFFCL at 27 ¶ 79.

[9] The parties also contest the difficulty of Evonik and PeroxyChem's swinging between grades of hydrogen peroxide in a manner that does not necessarily bear on the market's ability to constrain prices post-merger because it does not impact other suppliers' ability to constrain a post-merger Evonik. It is difficult for Evonik to swing into tin-free hydrogen peroxide products and aseptic packaging, but PeroxyChem currently and easily swings into each of these end uses, *see* Montag Hrg. Tr. 1516:20-1517:19, 1522:9-25, and so will a post-merger Evonik. Similarly, it is difficult for PeroxyChem to swing into pre-electronics grade hydrogen peroxide, but Evonik already markets pre-electronics hydrogen peroxide, *see* JX0001-002. Evidence of PeroxyChem's ability to break into that market is therefore only relevant to the extent that it reflects swinging difficulties faced by other suppliers [TEXT REDACTED BY THE COURT] PPFFCL at 10-11 ¶¶ 32-33.

[*298] For these reasons, the Court cannot conclude that swinging across standard, specialty, and pre-electronics grade hydrogen peroxide is easy.

(C) Profitable

Finally, the FTC has not met its burden of showing that swinging between grades of hydrogen peroxide is likely to be profitable, because swinging down-grade is, in general, not profitable. *See* Merger Guidelines § 5.1. In other words, suppliers' average profits increase so much up-grade that even if the price of standard grade or specialty grade increased by five or even ten percent, suppliers are unlikely to switch production down-grade from specialty or pre-electronics grade hydrogen peroxide.

For example, Evonik's average profit margins per pound of hydrogen peroxide are about [TEXT REDACTED **[**33]** BY THE COURT] cents for standard grade, [TEXT REDACTED BY THE COURT] cents for specialty grade ([TEXT REDACTED BY THE COURT] percent higher than standard grade), and [TEXT REDACTED BY THE COURT] cents for pre-electronics grade ([TEXT REDACTED BY THE COURT] percent higher than standard grade and [TEXT REDACTED BY THE COURT] percent higher than specialty grade). JX0066-043 fig. 10; Costanzo Hrg. Tr. 1143:5-1144:1, 1176:14-19 (selling standard grade instead of pre-electronics "would be a disaster on the investment economics" and "the intent [is] to sell it as specialty"). Other suppliers' margins similarly increase up-grade. *See* [TEXT REDACTED BY THE COURT]; JX0151-022 (showing [TEXT REDACTED BY THE COURT] specialty grade with [TEXT REDACTED BY THE COURT] percent higher profit margin than standard grade, pre-electronics grade with [TEXT REDACTED BY THE COURT] percent higher than standard grade and [TEXT REDACTED BY THE COURT] percent higher than specialty grade); Lerner Hrg. Tr. 1377:9-20 (swinging production from specialty to standard grade hydrogen peroxide would be "economic suicide" and "make[] no commercial, business or any logical sense").

The FTC objects to using average profit **[**34]** margins to judge profitability. Its expert, Dr. Dov Rothman, found that some standard and specialty grade hydrogen peroxide products sell at a higher margin than some higher-grade products,[10] likely because of regulatory or customer-focused specifications. There are three reasons why the Court cannot find that this evidence means that swinging down-grade is generally profitable, such that it is appropriate to lump standard, specialty, and pre-electronics grade hydrogen peroxide together in a single product market.

First, the FTC has provided no data on what percentage of the standard and specialty grade markets are comprised of **[*299]** these supposed high-profit-margin products to which suppliers could swing. Second, this subset of high-margin standard and specialty grade products increases the average margins for those products, thereby masking what otherwise would be even *starker* profitability differences between grades. Third—and key for assessing the ability of suppliers to constrain prices—if suppliers wanted to produce more higher-margin standard or specialty grade products, they would not do so by swinging down-grade from their profitable stock of specialty and pre-electronics **[**35]** grade hydrogen peroxide. They would instead try to convert their existing stock of lower-margin standard and specialty grade hydrogen peroxide to higher-margin products. Hill Hrg. Tr. 2083:2-21; *see* [TEXT REDACTED BY THE COURT] (if demand increased for standard grade hydrogen peroxide, "we would just supply them from our production of standard product," not from pre-electronics grade product). This is consistent with

---

[10] [F]or [TEXT REDACTED BY THE COURT] percent of Evonik's volume of food grade hydrogen peroxide, Evonik's per unit margin is higher than Evonik's average per unit margin on pre-electronics grade; for [TEXT REDACTED BY THE COURT] percent of Evonik's volume of cosmetics grade hydrogen peroxide, Evonik's per unit margin is higher than Evonik's average per unit margin on pre-electronics grade; for [TEXT REDACTED BY THE COURT] percent of Evonik's volume of hydrogen peroxide for teeth whitening, Evonik's per unit margin is higher than Evonik's average per unit margin on pre-electronics grade. Furthermore, while food grade, cosmetics grade and hydrogen peroxide for teeth whitening are relatively low volume products for Evonik, for every 100 units of pre-electronics grade hydrogen peroxide that Evonik sells, it sells [TEXT REDACTED BY THE COURT] units of standard grade hydrogen peroxide at a per unit margin that is higher than its average per unit margin on pre-electronics grade.

Rothman Rebuttal Rpt., PX7102-017; *see also* Rothman Hrg. Tr. 791:24-792:19.

suppliers' long-term shift in production toward more profitable, specialized, and high-purity products described above.

At closing argument, the FTC argued that swinging does not have to be profitable "between every combination of products" and that a "snapshot in time" of current contracts and profitability could be misleading. Rhilinger, Hrg. Tr. 2395:14-2396:7. The Court does not mean to suggest that swinging must be profitable between *every* combination of products to meet this requirement. But here, there are consistent and significant profitability differences between selling standard, specialty, and pre-electronics grade hydrogen peroxide. And based on that record, including the overall trend in the market, the Court cannot conclude that in response to a SSNIP on **[**36]** standard or specialty grade hydrogen peroxide, suppliers would likely swing downgrade and constrain those prices; the profit margins are, in general, simply too much higher in higher grades.

To be sure, these differences in profitability suggest that suppliers may constrain anticompetitive prices in specialty or pre-electronics grade by swinging *up* from lower-margin standard grade hydrogen peroxide. But as discussed above, suppliers do not swing up-grade nearly universally because it is not easy. *See* Hill Rpt., JX0066-043 ("The rewards to producing pre-electronics grade are already so high that firms that do not produce it likely do not do so for reasons that will not change in response to a small price increase."). And all three swinging requirements must be met to aggregate grades of hydrogen peroxide in a relevant product market.[11]

For all the above reasons, the FTC cannot combine standard, specialty, and pre-electronics grades in a relevant product market to analyze the anticompetitive effects of the proposed merger. Therefore, the FTC's proposed relevant product market does not support its prima facie case.

ii. Alternative Product Markets

Defendants argue that this **[**37]** failure means the Court need go no further: without a relevant product market, the FTC cannot succeed. *See* Mahr Hrg. Tr. 2401:22-2402:13. The FTC could have pleaded or argued for alternative markets, they say, but it did not, and "it's not the Court's job to go around and try to find that correct market." Mahr Hrg. Tr. **[*300]** 2402:8-13 (cleaned up). And the FTC candidly recognizes that it has "not alleged in [the] complaint a market for standard-grade hydrogen peroxide or any other, sort of, combination of products." Rhilinger Hrg. Tr. 2389:16-18; *see* Compl. ¶¶ 23-24 ("The relevant product market in which to assess the effects of the Acquisition is hydrogen peroxide," excluding "electronics grade hydrogen peroxide.").

Defendants' argument is not without support. The FTC has the burden to prove a relevant product market when it seeks a preliminary injunction, *see* *Arch Coal, 329 F. Supp. 2d at 120*, a point with which the FTC does not quibble, *see* Rhilinger Hrg. Tr. 2389:9-10 ("the case law says that we need to prove a relevant market in which we can show harm"). This is so because without a relevant product market, the FTC cannot show a likelihood of ultimate success on its claim under the Clayton Act. *See* *15 U.S.C. § 18* (prohibiting acquisitions **[**38]** whose "effect . . . may be substantially to lessen competition" in "any line of commerce"); *Heinz, 246 F.3d at 719 n.17* ("Courts interpret 'line of commerce' as synonymous with the relevant product market."); *see FTC v. Whole Foods Market, Inc., 548 F.3d 1028, 1036 (2008)* (Brown, J.) ("market definition is . . . necessary in a *§ 7* case" (citing *15 U.S.C. § 18*)).[12]

---

[11] The FTC also argues that its proposed market satisfies the hypothetical monopolist test because consumers would not substitute away from non-electronics hydrogen peroxide to other chemicals. *See, e.g.*, PFFCL at 85 ¶ 25. That cannot save the FTC's overbroad market. The hypothetical monopolist test "is designed to ensure that candidate markets are not overly narrow." Merger Guidelines § 4; *see also id.* § 4.1.1 (test "does not lead to a single relevant market"). It says nothing about whether a market is overly broad.

[12] The D.C. Circuit's *Whole Foods* decision lacked a majority opinion. *See* ***Whole Foods, 548 F.3d at 1051 n.1, 1061 n.8*** (Kavanaugh, J., dissenting). Thus, in referring to one of the two concurring opinions or the dissent, the Court will indicate the name of the Judge whose opinion is cited. *See* ***id. at 1032*** (Brown, J.); ***id. at 1041 (Tatel, J.)***; ***id. at 1051*** (Kavanaugh, J., dissenting).

But just because the relevant product market is not "as broad[] as the Government chooses to define it," the record may still contain evidence of an alternative relevant product market in which to analyze the merger's competitive effects. *Brown Shoe, 370 U.S. at 368* (Harlan, J., dissenting in part, concurring in relevant part). "The duty rests with the District Court . . . to determine what is the appropriate market on an appraisal of the relevant economic considerations." *Id.* And despite the FTC's insistence that the relevant product market should not "be defined around individual grades of H_2O_2 or end uses," Br. at 14, it *has* provided quantitative evidence of alleged anticompetitive harm in a narrower alternative market consisting solely of standard grade hydrogen peroxide in the Southern and Central United States. *See* Rothman Rpt., JX0075-052 & n.159, -094 & n.324, -104 & n.350 (providing market concentration statistics, predicted **[**39]** first order approximation price effects, and merger simulation predicted price effects, assuming that PeroxyChem divests its Prince George facility to a new competitor). The parties also agree that hydrogen peroxide formulated for particular end uses could constitute separate product markets, *see* PPFFCL at 3, 5 ¶¶ 11, 15; DFFCL at 21-22 ¶¶ 62-63, though the FTC has not provided any specific data related to end uses with which to evaluate the merger. The Court thus proceeds to consider the evidence in the record as to whether either (1) standard grade hydrogen peroxide or (2) hydrogen peroxide formulated for specific end uses is a relevant product market for purposes of assessing the merger's competitive effects.[13]

[*301] (A) Standard Grade Hydrogen Peroxide

Standard grade hydrogen peroxide serves various end uses, including the bleaching of pulp, paper, and textiles; it is also used in wastewater treatment and in the mining and oil and gas industries. Dumas Hrg. Tr. 235:1-3; Suter Hrg. Tr. 408:8-14; Costanzo Hrg. Tr. 1223:6-13; Montag Hrg. Tr. 1566:5-1567:2, 1600:23-1601:3. It is often referred to as a "commodity"—a product that can be used interchangeably among suppliers with ease, where they compete mainly on price. ***[**40]*** *See* PPFFCL at 34 ¶ 120; DPFFCL at 8 ¶ 15; JX0120-001; Anderson Hrg. Tr. 193:1-18. However, this does not necessarily mean that all standard grade hydrogen peroxide, regardless of end use, constitutes a relevant product market. *See* *Arch Coal, 329 F. Supp. 2d at 120* (describing "the 'narrowest market' principle"). For that, there must be sufficient demand-side substitution among standard grade products, or—as discussed above—supply-side substitution may suffice in the exceptional case if the Merger Guidelines' swinging requirements are met.

On the demand side,"[d]etermination of the competitive market for commodities depends on how different from one another are the offered commodities in character or use, how far buyers will go to substitute one commodity for another." *E. I. du Pont., 351 U.S. at 393*; *see* *Staples I, 970 F. Supp. at 1074*. The FTC has not argued that there is demand-side substitutability across formulations of standard grade hydrogen peroxide.[14] And perhaps for that reason, there is no evidence in the record that buyers are likely "to substitute one commodity for another" in response to a SSNIP for a particular end use. *Staples I, 970 F. Supp. at 1074*. For example, if a customer for standard grade hydrogen peroxide used in in fracking—removing oil and gas from subterranean rocks and fissures—experienced a SSNIP, the record **[**41]** does not show that she is likely to instead purchase standard grade hydrogen peroxide intended for bleaching pulp and paper. While all standard grade hydrogen peroxide has a similar purity and chemical composition, its "character or use" appears sufficiently different across end uses. *Id.* To

---

[13] The record lacks evidence of market concentration statistics or other quantitative measures of anticompetitive effects for alternative specialty grade or pre-electronics grade hydrogen peroxide product markets.

[14] While the FTC has consistently pleaded and argued for a product market consisting of non-electronics grade hydrogen peroxide, Defendants contend that the FTC's swinging theory only arose after it moved for a preliminary injunction:

> This supply side approach didn't arise until Dr. Rothman's report after the fact discovery was closed. There is no mention in the complaint of supply side **[**42]** factors informing product market definition, none. There's no mention of the word "swing" or "shift" anywhere in the FTC's complaint. They ask no discovery of any of the five suppliers leading up to -- in the discovery leading up to the hearing, anything about their ability to shift or swing.

Mahr Hrg. Tr. 2321:8-15.

the extent the record contains evidence on this point at all, it suggests that customers primarily view standard grade hydrogen peroxide produced by different suppliers as interchangeable within—but *not* between—end uses. *See, e.g.*, Maeder Hrg. Tr. 170:16-172:5 (pulp and paper end use); Engram Hrg. Tr. 317:2-11, 361:21-362:24 (wastewater treatment end use); PPFFCL at 13 ¶ 42 (oil and gas end use); PPFFCL at 4 ¶ 12 ("The precise combination of purity level, concentration, and stabilization package varies depending on the [end use] of H_2O_2, but within each [end use], H_2O_2 sold by each producer is very similar."). Therefore, the different end-use products are not demand substitutes, and they cannot be aggregated into a single standard grade product market on that **[*302]** basis.[15]

The Court thus turns to the swinging exception to the usual demand-side rule. Merger Guidelines § 5.1; *see Heinz, 246 F.3d at 718* ("The definition of product market focuses solely on demand substitution factors." (cleaned up)). Under the Merger Guidelines, swinging within standard grade hydrogen peroxide formulations must be nearly universal, easy, and profitable before those products may be aggregated into one market. *See* § 5.1 & n.8.

The record is not totally clear on the ease and near universality of swinging between the various formulations of standard grade hydrogen peroxide. This is likely so because the FTC never proposed such a product market; it only argued these points to support swinging between standard, specialty, and pre-electronics grades. But the evidence suggests that as a practical matter, such swinging is possible and happens to some extent. *See* PPFFCL at 4 ¶ 12; PX1201-012. Many of the obstacles to **[**43]** swinging between *grades*, explained above, do not apply to swinging between the various formulations of standard grade. And most suppliers already make the various formulations required for bleaching pulp, paper, and textiles; for treating wastewater; and for use in the mining and oil and gas industries. *See* JX0083-065 to -118 (Evonik's competitor details database).

The problem is the lack of record evidence on profitability. The Court cannot find that standard grade hydrogen peroxide is a relevant product market because the record lacks evidence that swinging between standard grade formulations is likely to be profitable. In fact, the limited evidence in the record suggests substantial differences in profitability across standard grade formulations. Dr. Rothman found that "for every 100 units of pre-electronics grade hydrogen peroxide that Evonik sells, it sells [TEXT REDACTED BY THE COURT] units of standard grade hydrogen peroxide at a per unit margin that is higher than its average per unit margin on pre-electronics grade," Rothman Rebuttal Rpt., PX7102-017; *see also* Rothman Hrg. Tr. 791:24-792:19. The average profit margin for Evonik's standard grade hydrogen peroxide is about [TEXT **[**44]** REDACTED BY THE COURT] cents, and the profit margin for its pre-electronics grade hydrogen peroxide is [TEXT REDACTED BY THE COURT] cents. JX0066-043 fig. 10. That means a subset of standard grade hydrogen peroxide sells at a profit margin [TEXT REDACTED BY THE COURT] *percent higher* than the average for standard grade. And of course, that means that *some* standard grade hydrogen peroxide sells for *even more* than the [TEXT REDACTED BY THE COURT] percent higher profit margin than other standard grade formulations, like that for pulp and paper bleaching, which has some of the lowest margins. *See, e.g.*, Anderson Hrg. Tr. 199:23-25; Lerner Hrg. Tr. 1379:13-24, 1381:6-18. Admittedly, the evidence in the record on this point is minimal.[16] But it is the FTC's burden to **[*303]** define the market and, if relying on supply-side substitutability, show that swinging is likely profitable. The evidence does not suggest that in response to a SSNIP of five percent in lower-profit standard grade hydrogen peroxide, suppliers likely would swing from higher-profit standard grade to constrain the price for the lower-profit formulation.

---

[15] The *Brown Shoe* practical indicia also weigh against a standard grade market. The hydrogen peroxide industry recognizes "well-defined submarkets" by end use; end uses within standard grade, by their definition, have "peculiar characteristics and uses"; their customers tend to be different (save for distributors who re-sell hydrogen peroxide into various industries); and prices are distinct. *Brown Shoe, 370 U.S. at 325*; *see, e.g.*, PPFFCL at 4 ¶ 12; Dumas Hrg. Tr. 235:1-3; PX2047-031 (standard grade hydrogen peroxide for mining sells at nearly 15 percent higher price than for pulp and paper bleaching); JX0083-065 to -118 (Evonik's competitor details database).

[16] The record does include some evidence on pricing for standard grade, *see, e.g.*, PX2047-031; Hill Rpt. JX0066-098 fig. 45, but the Court is unable to glean from that data the profit margins for each product, which is the relevant metric to assess whether suppliers are likely to swing. *Cf. Rebel Oil, 51 F.3d at 1436* ("it is immaterial that . . . a price differential exists" between supply-substitutable products).

And as described above, this shortcoming reflects a more fundamental **[**45]** issue with the FTC's overall product market definition. To some degree, suppliers' decisions to make different hydrogen peroxide products does not appear to represent swinging at all, because in general, it is only profitable to shift production in *one direction* to more specialized products that "are more stable in economic downturns" relative to pulp and paper products. Rettig Hrg. Tr. 1047:14-15; *see, e.g.*, JX0151-016 to -017; [TEXT REDACTED BY THE COURT] Once that happens, there is no evidence that, in general, suppliers shift *back*, or that it would be profitable to do so in response to a SSNIP. In other words, this is not an industry of suppliers prepared to swing and constrain prices across lower-profit formulations, even within an alternative market for standard grade hydrogen peroxide.

(B) End Uses of Hydrogen Peroxide

At this point, then, the FTC has not proven its proposed relevant product market for all non-electronics grade hydrogen peroxide. Neither has it shown, in the alternative, a relevant market for standard grade. Moving one last step narrower, the evidence in the record *does* support a relevant product market for hydrogen peroxide based on traditional demand substitutability: **[**46]** hydrogen peroxide products formulated for different end uses, regardless of grade.[17]

The record is reasonably clear that "within any given end-use for H_2O_2, the product offerings of the five H_2O_2 suppliers are largely undifferentiated." PPFFCL at 33 ¶ 118. And in contrast, across end uses, customers do not find the products substitutable. For example, most suppliers make a specialty grade product used to preserve food packaged for sale known as aseptic packaging hydrogen peroxide. Customers for that product do not view standard grade hydrogen peroxide intended for pulp and paper bleaching as interchangeable with it. Similarly, there is no reason to suspect that, in response to a price increase, they would switch from hydrogen peroxide for aseptic packaging to that intended for bleaching. *See* Engram Hrg. Tr. 364:7-13; Suter Hrg. Tr. 429:2-25; Montag Hrg. Tr. 1516:20-1518:6; Rhilinger Hrg. Tr. 2272:11-13 ("Nobody here is arguing that you should bleach your hair or whiten your teeth or clean your cuts with [hydrogen peroxide for] rocket fuel."). Each of these product markets for particular end uses are the "smallest relevant market[s] satisfying the hypothetical monopolist test." Merger Guidelines § 4.1.1 **[**47]** ; *see* PPFFCL at 3, 5 ¶¶ 11, 15; DFFCL at 21-22 ¶¶ 62-63. Accordingly, hydrogen peroxide products formulated for the same end use satisfy a demand-side substitution approach to defining a relevant product market; analysis of the supply side is unnecessary. *See* *Heinz, 246 F.3d at 718*.

b. The FTC's Proposed Geographic Markets

To establish a prima facie case by showing that the merger would cause a highly concentrated market, besides defining a relevant product market, the FTC must also demonstrate a relevant geographic market. *Baker Hughes, 908 F.2d at 982*. **[*304]** The FTC proposes two relevant geographic markets: (1) the Pacific Northwest, which includes Idaho, Oregon, Montana, Washington, and Wyoming in the United States and Alberta, British Columbia, Manitoba, and Saskatchewan in Canada; and (2) the Southern and Central United States, which includes Alabama, Arkansas, Arizona, California, Colorado, the District of Columbia, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Missouri, Mississippi, North Carolina, North Dakota, Nebraska, New Mexico, Nevada, Ohio, Oklahoma, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, Wisconsin, and West Virginia. PPFFCL at 22-23, 25 ¶¶ 72, 78.

As discussed below, any anticompetitive effects of the merger in the proposed Pacific Northwest geographic market are resolved by PeroxyChem's proposed divestiture of its Prince George plant. And the FTC's failure to show that non-electronics hydrogen peroxide is a relevant product market makes the proposed Southern and Central United States geographic market useless to the FTC in meeting its burden.

[17] [TEXT REDACTED BY THE COURT] PX1201-012 [TEXT REDACTED BY THE COURT]

i. The Pacific Northwest and the Prince George Divestiture

Within days of the FTC moving for a preliminary injunction, Evonik and PeroxyChem agreed on a divestiture that threw a wrench in the FTC's argument that their merger will substantially **[**48]** lessen competition in its proposed Pacific Northwest geographic market. Defendants agreed that if their merger closes, Evonik will not acquire PeroxyChem's only plant in that market, in Prince George, British Columbia. Instead, a new competitor, international chemical manufacturer UI, will purchase the plant for [TEXT REDACTED IN ORIGINAL SOURCE]. Share Purchase Agreement, JX0147-017. Without analyzing the agreement with UI specifically, the FTC's expert, Dr. Rothman, concluded that if PeroxyChem sells its Prince George plant to a new competitor that replaces PeroxyChem's competitive intensity in the Pacific Northwest, competition will not be substantially lessened in that geographic market. Rothman Rpt., JX0075-052 n.156, -104 nn.351-52; Rothman Hrg. Tr. 830:20-831:11.[18] The Court therefore turns to that threshold question first.

Defendants have the burden to show that a proposed divestiture will replace the merging firm's competitive intensity. *Aetna Inc., 240 F. Supp. 3d at 60*. To evaluate whether a divestiture will do so, courts consider the likelihood of the divestiture; the experience of the divestiture buyer; the scope of the divestiture, the independence of the divestiture buyer from the merging seller, and the **[**49]** purchase price. *Id. at 60-74*; *FTC v. Sysco Corp., 113 F. Supp. 3d 1, 72-78 (D.D.C. 2015)*. The Court holds that Defendants have met their burden of showing that UI will replace PeroxyChem's competitive intensity.

(A) Likelihood of the Divestiture's Closing

For starters, the Prince George divestiture to UI is highly likely to occur. The parties to the divestiture, Evonik, PeroxyChem, and UI, have agreed to use all commercially reasonable efforts to ensure the closing conditions are satisfied; UI is capable of closing financially; it is excited to get "a really good business at a really good price"; and just days ago, the Canadian **[*305]** Competition Bureau entered into a Consent Agreement with Evonik approving both its merger with PeroxyChem and the divestiture of the Prince George plant to UI. The Canadian authorities found that the divestiture eliminated what would otherwise have been a likely "substantial lessening of competition" in western Canada. Consent Agreement (Jan. 13, 2020), ECF No. 141-1 at 1-2, 10, 12-13;[19] *see* Cummins Hrg. Tr. 1743:21-25, 1744:8-1746:7, 1770:11-17; DX0142-006; DX0143-002; Share Purchase Agreement, JX0147-035, -038 to - 041, -066. The record lacks any significant obstacles to closing.

(B) UI's Experience

The record shows that UI has **[**50]** the experience necessary to compete effectively in the hydrogen peroxide industry. UI is an international supplier of organic peroxides and persulfates that operates plants around the world, including a hydrogen peroxide plant in Turkey that it bought in August 2019. PPFFCL at 65 ¶ 220; DPFFCL at 48 ¶ 127. Although it does not sell hydrogen peroxide in North America, UI has long been a customer for hydrogen

---

[18] Dr. Rothman did not analyze what impact a divestiture to a new competitor would have on the likelihood of anticompetitive coordinated effects in the Pacific Northwest. Even so, there is no basis in the record to conclude that UI would be any more likely than PeroxyChem to coordinate with suppliers in the Pacific Northwest to substantially harm consumers.

[19] Under *Fed. R. Civ. P. 201(b)(2)* and *(c)(2)*, the Court takes judicial notice of the following adjudicative fact apparent from the Consent Agreement signed January 13, 2020, by the Commissioner of Competition and Evonik: The Commissioner of Competition of the Canadian Competition Bureau has reached a Consent Agreement with Evonik to approve its merger with PeroxyChem and the divestiture of the Prince George plant to United Initiators. *See* Consent Agreement, ECF No. 141-1 at 1-2, 10, 12-13, 27; Defendants' Request for Judicial Notice, ECF No. 141. The Commissioner found that UI satisfied these requirements: [TEXT REDACTED IN ORIGINAL SOURCE] Consent Agreement, ECF No. 141-1 at 10, 12-13. The Court takes judicial notice solely for the purpose of evaluating the likelihood of the divestiture's closing; after Canadian regulatory approval, the divestiture is now more likely to do so.

peroxide, using it as a raw material in many of its products and serving many of the same customers that it would serve as a hydrogen peroxide supplier. DPFFCL at 48 ¶ 128. At its three North American chemical plants, UI grapples with challenges much like those that hydrogen peroxide suppliers face, such as security of supply, inventory, tracking, forecasting, and distribution. *Id.* ¶ 129; Cummins Hrg. Tr. 1722:4-10. Jonathan Cummins—UI's Vice President of Manufacturing for the Americas, who will oversee the Prince George plant if the divestiture closes—managed a hydrogen peroxide plant for Nouryon's predecessor for seven years. DPFFCL at 49-50 ¶¶ 131, 135; Cummins Hrg. Tr. 1722:11-21. That wealth of experience is an important component in helping UI replace PeroxyChem's competitive intensity in the Pacific Northwest.

(C) The Divestiture's [51] Scope**

The scope of the proposed divestiture is more than sufficient for UI to replace PeroxyChem in effectively running the Prince George plant. The employees running the Prince George plant's day-to-day operations will continue to do so on UI's behalf. DPFFCL at 50 ¶ 135. UI will receive all tangible and intangible assets that it needs to compete—"key production, sales, market, and distribution assets, sales and marketing personnel, and intellectual property"—and PeroxyChem's customers for the Prince George plant will become UI's customers [TEXT REDACTED IN ORIGINAL SOURCE]. *Id.* ¶ 134.

The FTC challenges the divestiture's scope on several grounds. It argues that UI is buying a "standalone plant" and not a "standalone business" in Prince George. *See* DPFFCL at 50 ¶ 133; Rhilinger Hrg. Tr. 2427:14-22; Mahr Hrg. Tr. 2430:15-2431:3. It is true that Defendants technically only propose a divestiture of the Prince George plant, but the evidence shows that the plant "comes along with . . . everything else that's needed to run a **[*306]** stand-alone business." Mahr Hrg. Tr. 2431:1-3. UI will have the "personnel, customer lists, information systems, [and] intangible assets," that will help to "effectively preserve the competition **[**52]** that would have been lost through the merger." *Aetna, 240 F. Supp. 3d at 60* (internal citation omitted).[20] In that sense, UI is buying something more like an ongoing business than a plant. And in a recent study of merger remedies, the FTC found that "all of the divestitures involving an ongoing business succeeded" in "clearing a high bar—maintaining competition in the relevant market."[21]

The FTC also points out that PeroxyChem recently lost its biggest customer served by the Prince George plant, Suncor. PPFFCL at 67 ¶ 229. But the Suncor issue speaks more to competition already lost by PeroxyChem, rather than to whether UI will "replace the competitive intensity lost as a result of the merger." *Sysco, 113 F. Supp. 3d at 74*. Even setting that point aside, PeroxyChem showed at the evidentiary hearing that it has already exceeded internal 2020 bidding projections for the Prince George plant by replacing more than half of the lost Suncor business. Lerner Hrg. Tr. 1394:21-1395:15; Cummins Hrg. Tr. 1760:22-1761:13. Since the hearing, PeroxyChem has had every incentive to continue these efforts, with the serious risk that this Court or the Canadian Competition Bureau would block the merger and the need for the divestiture **[**53]** to UI. Lerner Hrg. Tr. 1395:5-15. And if there were any remaining doubt about the Prince George plant's sustainability, the divestiture agreement [TEXT REDACTED IN ORIGINAL SOURCE] [TEXT REDACTED IN ORIGINAL SOURCE] PPFFCL at 69 ¶¶ 233-35. The FTC argues that these provisions are red flags raising "serious and substantial questions as to Prince George's

---

[20] [TEXT REDACTED IN ORIGINAL SOURCE] *See* PPFFCL at 67-68 ¶ 230. Still, even without UI receiving all of Prince George's "management infrastructure" from PeroxyChem's Philadelphia headquarters, *Aetna, 240 F. Supp. 3d at 60*; *see* Lerner Hrg. Tr. 1360:11-12, UI is likely to replace PeroxyChem's competitive intensity in the Pacific Northwest. *See* Montag Hrg. Tr. 1553:4-7; Kramer Hrg. Tr. 1627:11-17.

[21] *See* FTC, *The FTC's Merger Remedies 2006-2012: A Report of the Bureaus of Competition and Economics*, at 1 (Jan. 2017), https://www.ftc.gov/reports/ftcs-merger-remedies-2006-2012-report-bureaus-competition-economics (cleaned up).

viability," PPFFCL at 67 (cleaned up), but in fact, these provisions show that UI is set up to compete into the future.[22]

(D) UI's Independence

Next, there is no reason to question whether UI will be an independent competitor in the Pacific Northwest. The FTC challenges UI's independence because it has ongoing commercial relationships with Evonik and PeroxyChem as a customer for hydrogen peroxide, and UI leases the land for its Mobile, Alabama, plant from Evonik.[23] PPFFCL at 70-71 ¶¶ 241-42. But Cummins credibly dispelled this notion of undue influence. Cummins Hrg. Tr. 1742:5-1743:7. The FTC also points out **[*307]** that when UI made its first offer to purchase the Prince George plant, it [TEXT REDACTED IN ORIGINAL SOURCE] PX1515-003. But that is just the nature of selling a business, which is never completely seamless. UI may not—in fact, it *will* not—secure every customer **[**54]** it pursues when it takes over the Prince George plant. But the record does not cast doubt on UI's ability to compete independently, given the protections in the divestiture agreement, UI's experience, and the scope of the divestiture. In fact, Prince George is likely to be operating at capacity in 2020. *See* Cummins Hrg. Tr. 1753:5-21.

(E) Purchase Price

Finally, the proposed purchase price does not cast doubt on the viability of the Prince George plant if it is sold to UI. The FTC argues that the [TEXT REDACTED IN ORIGINAL SOURCE] purchase price is cause for concern because it is far lower than other third-party valuations of the plant. PPFFCL at 71 ¶¶ 243-45. But there are a few explanations for the low price, none of which impact Defendants' showing that they will compete effectively in the Pacific Northwest.

First, to state the obvious, a potential buyer of an asset sold to facilitate a merger under scrutiny by two countries' antitrust authorities has enormous leverage over the seller because it knows the seller must divest the asset quickly to proceed with the merger. DPFFCL at 52 ¶ 139. This short timeframe puts UI's rushed and minimal due diligence into perspective as well, *see* PPFFCL at 66-67 ¶¶ 223-28. Although **[**55]** most companies contemplating such a purchase would conduct more thorough diligence, the limited window for that diligence allowed UI to bargain for a lower price. *See id.*; PX1515-002 to - 003 ([TEXT REDACTED IN ORIGINAL SOURCE]). In short, by bidding the lowest price possible, UI acted like any rational actor in this circumstance. Cummins Hrg. Tr. 1900:16-1901:10.

Second, that UI has no presence in the Pacific Northwest provided Evonik an even stronger incentive to sell the Prince George plant to it, as opposed to a current hydrogen peroxide supplier in the market like [TEXT REDACTED IN ORIGINAL SOURCE] which valued the plant at [TEXT REDACTED IN ORIGINAL SOURCE]. *See* PPFFCL at 71-72 ¶ 246. It stands to reason that Evonik's merger with PeroxyChem would be more likely to survive antitrust scrutiny if it sold the Prince George plant to UI, since doing so would maintain the same number of competitors in the Pacific Northwest.

The FTC suggests that the [TEXT REDACTED IN ORIGINAL SOURCE] purchase price would allow UI to sell off the Prince George plant for parts or drive it into the ground and still turn a profit. *See* PPFFCL at 71 ¶¶ 243-45. To the contrary, the evidence shows that UI is a good-faith purchaser that **[**56]** intends to compete effectively in the hydrogen peroxide market and grow the business, and it has strong incentives to do so.[24] *See, e.g.*, Cummins Hrg.

---

[22] *See also* Decision and Order, *In re Linde AG*, FTC Docket No. C-4660 at 15 (Feb. 26, 2019), https://www.ftc.gov/system/files/documents/cases/c4660_decision_and_ordermodified_ 593725_public_redacted.pdf (showing similar non-solicitation provision in FTC consent decree to protect divestiture buyer).

[23] The FTC notes that Evonik can evict UI on short notice from this plant, PPFFCL at 70-71 ¶ 242, implying that Evonik could do so to strongarm UI into coordinating on price or declining to compete for certain customers. But there is no evidence in the record to suggest that the Evonik-UI lease is not beneficial to both parties, and Evonik has denied all such intentions. *See* Cummins Hrg. Tr. 1742:14-20.

Tr. 1742:17-1743:7, 1771:16-1773:17. UI's purchase of another hydrogen peroxide plant in Turkey just last year, which it has maintained over the last six months, speaks to this good faith. DPFFCL at 48 ¶ 127. The FTC also makes much out of UI's lack of specific plans for the Prince George plant, as if UI may decide to ignore the plant's existing operating procedures and fire its employees. *See* PPFFCL at 69 ¶ 236. That seems highly doubtful. *See* DPFFCL at 50-51 **[*308]** ¶ 135. UI is buying a plant from PeroxyChem with all of the key assets and day-to-day operations in place; there was no obvious reason at the time of the evidentiary hearing for it to have developed its own specific plan.

Ultimately, "antitrust deals in 'probabilities, not certainties.'" *Aetna, 240 F. Supp. 3d at 60* (quoting *Brown Shoe, 370 U.S. at 323*). And Defendants' burden is only to show that the divestiture will likely replace PeroxyChem's competitive significance in the Pacific Northwest. Defendants have far exceeded that threshold. For these reasons, just as the Canadian Competition Bureau found when approving the UI divestiture with respect to western Canada, **[**57]** *see* Consent Agreement, ECF No. 141-1 at 10, 12-13,[25] the Court finds that the merger is not likely to "substantially . . . lessen competition" in the FTC's proposed Pacific Northwest market. *15 U.S.C. § 18*. As a result, that proposed geographic market cannot assist the FTC in showing its likelihood of success on the merits.

ii. Southern and Central United States

The FTC's other proposed geographic market is the Southern and Central United States. As already noted, the FTC bears the burden to define a relevant geographic market, *Cardinal Health, 12 F. Supp. 2d at 49*, the region "in which the seller operates, and to which the purchaser can practically turn for supplies." *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*; *see also* *Cardinal Health, 12 F. Supp. 2d at 49* (relevant geographic market is the area "to which consumers can practically turn for alternative sources of the product and in which the antitrust defendants face competition" (citation omitted)). As this definition suggests, a geographic market is dependent on a properly defined product market—no court can assess "the area of effective competition" for a product without defining the product itself. *E. I. du Pont de Nemours, 353 U.S. at 593* (quoting *Standard Oil, 337 U.S. at 299 n.5*); *Tampa Elec., 365 U.S. at 328*; *see* Merger Guidelines § 4.2 ("The [Government] applies the principles of [geographic] market definition described here . . . to define a relevant **[**58]** market with a geographic dimension *as well as a product dimension.*"); Merger Guidelines § 4.2.1 ("The hypothetical monopolist test requires that a hypothetical profit-maximizing firm that was the only present or future producer *of the relevant product(s)* located in the region would impose at least a SSNIP from at least one location . . . .") (emphases added).

Here, the Court has already explained that at least on the current record, the only relevant product markets are hydrogen peroxide products formulated for specific end uses. But the FTC argues that its proposed Southern and Central United States geographic market is the area of competition for *all* non-electronics hydrogen peroxide because, in its view, customers for that broader product market can choose from all five "freight-logical" hydrogen peroxide suppliers. *See* PPFFCL at 21 ¶ 68; *id.* at 23 ¶ 74; *id.* at 26-27 ¶¶ 83-84, 87, 90, 93; *id.* at 28 ¶¶ 95, 99. Accordingly, then, the FTC relied on evidence that suppliers of all manner of hydrogen peroxide products bid and compete for customers across the purported "Southern and Central United States." *See, e.g.*, PPFFCL at 23-25 ¶¶ 74-77. Dr. Rothman also conducted the hypothetical monopolist test for **[*309]** "H2O2 sold to customers that are located in **[**59]** these states." *Id.* ¶ 73. But none of that evidence or analysis is tailored to a relevant geographic market for *each* relevant product market—specific end uses of hydrogen peroxide. Because that evidence does not correspond to the relevant product markets, it is of little use to the FTC in meeting its burden of showing an undue concentration in a market for a particular product in a particular geographic area.

---

[24] UI's good-faith desire to compete in the hydrogen peroxide industry is one of many features that distinguish it from the failed divestiture in *Aetna, 240 F. Supp. 3d at 72*. *See id.* at 62, 72-73 (proposed divestiture buyer "repeatedly tried to enter" the market in the past and failed); *id. at 63, 65* (buyer would not acquire anything resembling a standalone business); *id. at 65* (buyer showed substantial doubts about its own ability to succeed); *id.* at 72 (purchase price 1/10th of fair market value).

[25] *But see* ECF No. 142 at 3 n.2 (comparing standards for merger remedies in the United States and Canada).

The FTC need look no further than its own challenge to the proposed merger in *Sysco* to see what is missing here. In *Sysco*, the FTC defined relevant product markets based on customer type: "broadline foodservice distribution" to local customers and "broadline foodservice distribution to national customers." *113 F. Supp. 3d at 48-49*. For the national product, as the name indicates, the FTC defined one relevant national geographic market. *Id. at 49*. But for the local product, the FTC defined 32 relevant local geographic markets where the merging firms have dominant market shares. *Id. at 49, 52*. Here, the FTC could have pleaded and argued a Southern and Central United States geographic market for its proposed non-electronics product market and also argued for alternative geographic markets corresponding to each end-use product **[**60]** market. But it did not. So the Court is left with product markets disconnected from any proposed geographic markets in which to analyze competition for those products.

To be sure, a geographical market need not be defined by precise metes and bounds. *Gen. Dynamics, 415 U.S. at 521*. But the record contains substantial evidence suggesting that the Southern and Central United States would not be the relevant area of effective competition for each end-use hydrogen peroxide product. For pulp and paper customers, for instance, because of the narrow profit margins, "it'd be cost prohibitive to ship hydrogen peroxide all the way across the country," Anderson Hrg. Tr. 199:23-25 (cleaned up), whereas customers for specialty end uses like aseptic packaging or chemical synthesis may look to the entire United States for their hydrogen peroxide supply. *See* Lerner Hrg. Tr. 1379:13-24, 1381:6-18 ("freight-logical market for pulp and paper" much narrower than for "specialties," where suppliers "have a much greater ability to ship those specialties literally anywhere on the land surface"); Hill Rpt., JX0066-028 fig. 4 (over [TEXT REDACTED IN ORIGINAL SOURCE] percent of standard grade hydrogen peroxide in North America served by nearest **[**61]** plant); DPFFCL at 89 ¶ 239. Indeed, the parties agree that in some cases, "it is appropriate to define geographic markets in the hydrogen peroxide industry . . . as narrowly as individual customers." DPFFCL at 38 ¶ 102; PFFCL at 21 ¶ 69. Or take the case of pre-electronics grade hydrogen peroxide, an end use and therefore a relevant product market all its own. MGC, a customer in Arizona with plants opening soon in Oregon and Texas, "buys on the order of 99 percent of pre-electronics that's sold," Hill Hrg. Tr. 2080:22-23, which is shipped from [TEXT REDACTED IN ORIGINAL SOURCE]. *See* Hancock Decl., JX0001-001 to - 002; DPFFCL at 13 ¶ 35. It is therefore highly unlikely that the relevant geographic market for pre-electronics is just the Southern and Central United States.

These examples merely illustrate why the Court cannot assume that the Southern and Central United States is a relevant geographic market, especially when the FTC has not pleaded or proved geographic markets that correspond to the relevant product markets, as it must. *See* *Cardinal Health, 12 F. Supp. 2d at 49*. The FTC's failure to sufficiently define a relevant geographic market is another reason it has not met its burden here. *Id.*

[*310] 2. Market Concentration

Because the FTC has failed to show a relevant product **[**62]** market with a corresponding relevant geographic market in which competition occurs, a discussion of the next step of its prima facie case—showing undue concentration in that market—is anticlimactic. The FTC has not met its burden under *Baker Hughes* to show undue concentration "in the market for a particular product in a particular geographic area." *908 F.2d at 982*.

"Market concentration, or the lack thereof, is often measured by the Herfindahl—Hirschman Index (HHI)."[26] *Heinz, 246 F.3d at 716*. The FTC has not provided HHIs or other measurements for Evonik and PeroxyChem's combined

---

[26] The HHI is calculated by squaring the market share of each firm in the market and adding up these squares (so, if there are three firms with market shares of 50%, 30%, and 20%, the HHI would be $50^2 + 30^2 + 20^2 = 3{,}800$). Squaring the individual market shares allocates proportionately greater weight to firms with larger shares, reflecting the larger threat to competitive behavior they pose. *See* Merger Guidelines § 5.3. For antitrust purposes, the FTC and the U.S. Department of Justice generally classify markets as "unconcentrated," "moderately concentrated," and "highly concentrated." An unconcentrated market features an HHI of below 1,500. A moderately concentrated market has an HHI of between 1,500 and 2,500, while a highly concentrated market has an HHI that is greater than 2,500. *Id.*

market share in any alternative market for a particular end use—the only relevant product markets with which to examine the merger's competitive effects. That failure is dispositive. The Court is unaware of a single case in which a court has enjoined a merger, even at this preliminary stage, where the Government failed to show undue concentration in a relevant market as its prima facie case requires, almost always through an HHI or similar metric. *Baker Hughes* explicitly places that burden squarely on the FTC. *908 F.2d at 982*; *see* *United States v. Anthem, Inc., 855 F.3d 345, 349, 353, 428 U.S. App. D.C. 403 (D.C. Cir. 2017)* (government has the "burden to demonstrate a highly concentrated post-merger market"); *Heinz, 246 F.3d at 715*; *United States v. H & R Block, Inc., 833 F. Supp. 2d 36, 84 n.35 (D.D.C. 2011)* ("The Court is not aware of any modern *Section 7* case **[**63]** in which the court dispensed with the requirement to define a relevant product market."). And a party's failure to make out a prima facie case is generally considered a "fundamental defect" that dooms its case. *See* *Rose v. Mitchell, 443 U.S. 545, 574, 99 S. Ct. 2993, 61 L. Ed. 2d 739 (1979)* ("declin[ing] to overlook" party's failure to "make out a prima facie case of discrimination" even where the opposing party conceded otherwise); *Williams v. Boorstin, 663 F.2d 109, 118, 213 U.S. App. D.C. 345 (D.C. Cir. 1980)* ("holding . . . no prima facie case" and reversing judgment finding a Title VII violation); *Baker Hughes, 908 F.2d at 991* ("production-burden-shifting" framework for "discrimination suits under [T]itle VII" "similar" to *Baker Hughes* framework for *Section 7*).

The FTC argues that no matter how the product markets are sliced, "the merger **[*311]** would be presumptively illegal in most, if not all, of such narrower markets." Br. at 14. High concentrations in the Southern and Central United States in the overall standard and non-electronics grade markets suggest that it is possible the FTC could avail itself of that presumption in some more narrowly defined market for a specific end-use product. *See* Rothman Rpt., JX0075-052 to - 053 & n.159; Rothman Rebuttal Rpt., PX7102-010. But those concentrations do not necessarily mean that is likely, given the issues discussed **[**64]** above with delineating relevant geographic markets that correspond to end-use product markets. At bottom, the Court cannot rely on guesswork to get the FTC over the hump. "[A]ntitrust theory and speculation cannot trump facts, and even *Section 13(b)* cases must be resolved on the basis of the record evidence relating to the market and its probable future." *Arch Coal, 329 F. Supp. 2d at 116-17*.

There are also practical reasons why the Court should not deem the FTC to have made out its prima facie case on this record, without an HHI calculated for a relevant product and geographic market that the Court has found viable. The rest of the Court's analysis on the merits runs the risk of devolving into speculation. For example, the "more compelling the prima facie case, the more evidence the defendant must present to rebut it successfully." *See* *Baker Hughes, 908 F.2d at 991*; *Arch Coal, 329 F. Supp. 2d at 129* ("Certainly less of a showing is required from defendants to rebut a less-than-compelling prima facie case."). But if the Court has no direct measure of the *strength* of the FTC's prima facie case connected to the relevant market, it cannot weigh whether the evidence offered by Defendants is enough to rebut that case. More generally, evaluating the persuasiveness of the additional evidence offered **[**65]** by Defendants in rebuttal, and by the FTC in support of its ultimate likelihood of success on the merits, becomes all but impossible. Some of that evidence might be relevant (and to some degree) to competition in that narrower relevant market, and some might not. The Court has little way of sorting all that out, when the parties have not tailored their presentations to the relevant market. And, it bears mentioning, even the "mere possibility" of a substantial lessening of competition is not enough to show a violation of the Clayton Act. *Heinz, 246 F.3d at 713* (citation omitted); *see also* *Staples I, 970 F. Supp. at 1072* ("It is not enough for the FTC to show merely that it has a 'fair and tenable chance' of ultimate success on the merits.").

Economists calculate the HHI score of an industry before and after the proposed merger. Transactions that result in an HHI increase of fewer than 100 points "are unlikely to have adverse competitive effects." *Id.* In moderately concentrated markets, a transaction that increases the HHI by more than 100 points "potentially raise[s] significant competitive concerns and often warrant[s] scrutiny." *Id.* Mergers "resulting in highly concentrated markets that involve an increase in the HHI of more than 200 points will be presumed to be likely to enhance market power." *Id.* This presumption of anticompetitive effects "may be rebutted by persuasive evidence showing that the merger is unlikely to enhance market power." *Id.*

FTC v. Tronox Ltd., 332 F. Supp. 3d 187, 207 (D.D.C. 2018)

All of this is not to say that in a subsequent administrative proceeding, the FTC could not calculate HHIs connected to end-use-specific product markets and relevant geographic markets to make out its prima facie case. But the Court cannot say on this record—devoid of particularized data for those relevant markets—that there is a "reasonable probability" that Evonik and PeroxyChem's merger would produce an undue concentration in a relevant market.[27] *Heinz, 246 F.3d at 713* (citation omitted). **[*312]** Accordingly, the FTC has not met **[**66]** its burden of demonstrating a prima facie case.

B. Defendants' Rebuttal Evidence and the FTC's Additional Evidence of Anticompetitive Harm

Nonetheless, to provide as complete a review of the record as possible in this unusual circumstance, the Court will not stop there. The Supreme Court has stressed that courts must judge "the probable anticompetitive effects of the merger" "functionally" and based on "a further examination of the particular market—its structure, history and probable future." *Gen. Dynamics, 415 U.S. at 498* (quoting *Brown Shoe, 370 U.S. at 321-22 & n.38*) (cleaned up). Of course, in *General Dynamics*, the Court only conducted a further examination "of the particular market" after the Government met its prima facie burden, *id. at 497-98*, and the Court has concluded that the FTC has failed to meet that burden. But even assuming that the FTC had made out a prima facie case on this record, the Court could not conclude that it has shown a likelihood of success based on Defendants' rebuttal evidence and the FTC's additional evidence of anticompetitive harm.

In undertaking an evaluation of that evidence, the Court's review is necessarily limited. As explained above, much of this additional evidence—especially the dueling quantitative **[**67]** models developed by Dr. Rothman and Dr. Hill—is grounded in the FTC's proposed product and geographic markets, which the Court has rejected. The Court cannot know much about what, if anything, that evidence might mean for the effects of the proposed merger on different product and geographic markets.[28] The Court notes only that Dr. Hill, who has testified on behalf of the FTC and against proposed mergers on several occasions, asserted based on his models that even in the market as conceived by the FTC, the merger would not result in a substantial reduction of competition. Dr. Rothman took the opposite view.

That said, other evidence applies to how the industry operates as a whole and is therefore less dependent on the FTC's proposed product and geographic market definitions. The Court does its best to assess that evidence below. And after doing so, it concludes that the current hydrogen peroxide industry is not particularly vulnerable to coordination, what vulnerability exists is not likely to increase as a result of the merger, and the evidence does not show a likelihood that the merger will cause substantial unilateral anticompetitive effects.

There is no science to weighing the **[**68]** factors at play in an antitrust analysis. Only an examination of the real-world evidence—including ordinary course documents, bidding data, and testimony from market participants—can supply an accurate picture of the industry and competitive **[*313]** dynamics.[29] That picture in this case reveals that

---

[27] One judge has gone so far as to suggest that a plaintiff "may" prove a *Section 7* violation even *without* meeting its prima facie burden under *Baker Hughes* to "defin[e] a market and show[] undue concentration in that market." ***Whole Foods, 548 F.3d at 1036 (Brown, J.)*** (citing *Baker Hughes, 908 F.2d at 982-83*; *United States v. El Paso Natural Gas Co., 376 U.S. 651, 660, 84 S. Ct. 1044, 12 L. Ed. 2d 12 (1964))*. Even if the FTC here could meet its prima facie burden without showing undue concentration in a relevant market—instead relying on other evidence of anticompetitive harm such as predicted price effects, *e.g.*, Rothman Rpt., JX0075-094 & n.324, -097 to - 099 & nn.334, 339, 344; *id.* -104 to - 106 & nn.350, 354, 356, 358—that record evidence would not make out a prima facie case for the reasons already described. The FTC's threshold failure to define a relevant market hamstrings its ability to show (and the Court's ability to evaluate) a likely and substantial lessening of competition.

[28] The FTC introduced data on predicted first order approximation effects and merger simulation predicted price effects for an alternative standard grade hydrogen peroxide product market in the Southern and Central United States and in alternative geographic markets in the Southern, Central, and Western United States—none of which the FTC has shown are relevant markets. *See* Rothman Rpt., JX0075-094 & n.324, -097 to - 099 & nn.334, 339, 344; *id.* -104 to - 106 & nn.350, 354, 356, 358.

hydrogen peroxide prices are falling, and that competition is being promoted by blind bidding, sophisticated customers, and the customary use of large and long-term contracts. The Court concludes that the proposed merger is not likely to substantially change these market characteristics or substantially increase prices.

1. The Market's Vulnerability to Coordination

"Merger law rests upon the theory that, where rivals are few, firms will be able to coordinate their behavior, either by overt collusion or implicit understanding, in order to restrict output and achieve profits above competitive levels." *Heinz, 246 F.3d at 715* (internal quotations omitted). Coordination is conduct by firms that is profitable for each of them only if the others accommodate it. Merger Guidelines *§ 7*. Tacit coordination, the FTC's theory in this case, is enforced not by an explicit agreement, but by the "detection and punishment of **[**69]** deviations." *Id.* Firms' ability to coordinate "depends on the strength and predictability of rivals' responses to a price change or other competitive initiative." *Id.* Tacit coordination itself is not illegal; it is firms making "independent production decisions to maximize profits. But a core purpose of ***antitrust law*** is to scrutinize mergers that may make it easier for firms to collectively reduce output, and indeed, to prevent mergers that are likely to do so." *FTC v. Tronox Ltd., 332 F. Supp. 3d 187, 208-09 (D.D.C. 2018)*; *see* *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*. The Merger Guidelines advise that even where a market "shows signs of vulnerability to coordinated conduct," before challenging a merger, the FTC must also "have a credible basis on which to conclude that the merger may enhance that vulnerability." § 7.1.

The FTC is right that some features of the hydrogen peroxide industry typically suggest vulnerability to coordination. There are few suppliers, only five in the FTC's proposed product and geographic market. And fewer suppliers usually means that suppliers anticipate "stronger and faster" responses from their rivals, which diminishes the reward from attracting a competitor's customers. Merger Guidelines § 7.2; *see* Rothman Hrg. Tr. 750:20-21 ("maintaining discipline through deterrence **[**70]** is more straightforward when there are fewer firms"). Elasticity of demand in the hydrogen peroxide market is also extremely low, regardless of end use. PPFFCL at 32-33 ¶¶ 113-17. In other words, customers are unlikely to substitute away from hydrogen peroxide to a different chemical if suppliers coordinate to increase prices by a significant amount. Accordingly, **[*314]** the incentives for suppliers to coordinate are stronger.

But taken together, the remaining evidence rebuts the notion that the current hydrogen peroxide market is vulnerable to coordination.

First, blind bidding for hydrogen peroxide customers produces substantial cost savings for customers and "frustrate[s] coordination among producers." *Arch Coal, 329 F. Supp. 2d at 144*; *see* DPFFCL at 53-54, 66-67 ¶¶ 143-46, 173. In general, the bidding process in the industry works as follows: a customer publishes an RFP for a given location, specifying the hydrogen peroxide product, volume, and contract duration sought; suppliers submit confidential bids; and then the customer typically lets one or more of the bidders know how competitive their bid is (without sharing specific prices) so that they will lower their bid price. *See* DPFFCL at 15 ¶¶ 42, 44; *id. at 66-67* ¶ 173. This pitting of suppliers against each other lowers prices, **[**71]** even when there are only two competing suppliers, because suppliers generally do not know which other suppliers have placed bids. *See* *id. at 67* ¶ 175. In this market, without specific knowledge of competing bids, suppliers are incentivized "to submit aggressive bids"

---

[29] The Court admitted over 1,300 exhibits en masse at the beginning of the two-week evidentiary hearing. *See* Hrg. Tr. 155:20-157:5; Final Exhibit List, ECF No. 135-2; Joint Report on Defendants' Outstanding Objections, ECF No. 139-1. But the Court did not accord all that evidence equal weight. When a party cited an exhibit in its proposed findings of fact and conclusions of law without laying a foundation for it at the hearing, or where it cited the deposition of a witness who did not testify at the hearing, the Court granted less weight to the evidence (and sometimes no weight). *See, e.g.*, PPFFCL at 77 ¶ 263 (citing JX0021). That weight depended on several factors. *See* Minute Order of October 23, 2019 (denying Defendants' request to exclude certain categories of evidence because the Federal Rules of Evidence do not apply to preliminary injunction hearings, but noting that the Court would accord weight to evidence depending on the manner in which it was presented, whether a foundation for it was laid, and whether the circumstances suggested its relevance and reliability).

because "cheating"—a departure from coordinated higher prices—"would not be detected until well after the fact, if ever, and any punishment would come well after the fact as well." *Arch Coal, 329 F. Supp. 2d at 145*. Accordingly, the average price of standard grade hydrogen peroxide in the Southern and Central United States, measured across all end uses, has *decreased* each of the last three years for three of the five hydrogen peroxide suppliers, Hill Rpt., JX0066-098 fig. 45, and prices have declined for much of the rest of the industry as well, *id.* -097 fig. 44; *see also id.* -099 fig. 46 (annual customer savings from bidding competition for Southern and Central United States customers).

Second, the use of large and long-term contracts in the hydrogen peroxide industry incentivizes firms to "deviate from the terms of coordination," *FTC v. CCC Holdings, 605 F. Supp. 2d 26, 64 (D.D.C. 2009)* (internal quotation omitted), "even if they expect strong responses by rivals," Merger Guidelines § 7.2, because the stakes are so high **[**72]** and there are fewer "opportunities for firms to punish one another." Hill Hrg. Tr. 2059:14-15; *see Arch Coal, 329 F. Supp. 2d at 145*; DPFFCL at 69-70 ¶¶ 179-81. Customers for hydrogen peroxide are typically large manufacturers who consume an enormous volume of hydrogen peroxide annually.[30] DPFFCL at 69 ¶ 180. Contracts for those customers come up for bidding at most once a year, and usually every other or third year. *Id. at 69-70* ¶ 181. If a supplier loses out on too many contracts, it cannot just turn to a customer base outside North America or find other ways to increase demand; total volume in the hydrogen peroxide industry has remained relatively constant, so suppliers understand they are competing for a limited base of customers. *See* PPFFCL at 32 ¶ 114. In this small and stagnant pond of customers, competition for the bigger fish is fierce. It is unlikely that suppliers would **[*315]** coordinate and decline to cast their rod for the chance to reel any one of them in. Indeed, the record shows that suppliers typically bid aggressively for those big contracts, as the Court discusses below when evaluating suppliers' recognition of their interdependence.

Third, even if suppliers did try to coordinate their bidding behavior to increase prices, the hydrogen peroxide industry **[**73]** is marked by sophisticated and powerful customers that are well equipped to defeat coordination. *See* Merger Guidelines § 8; *Wilhelmsen, 341 F. Supp. 3d at 70*; *CCC Holdings, 605 F. Supp. 2d at 64* ("A sophisticated customer base makes price coordination more difficult."). Many hydrogen peroxide customers have dedicated procurement personnel who are experienced at conducting RFPs, minimizing costs, and leveraging competing bids to secure the best contract terms. *See* DPFFCL at 70-71 ¶¶ 183-85.

Fourth, while previous collusion in an industry can give rise to a presumption that a market is vulnerable to coordination, that presumption does not hold if "competitive conditions in the market have since changed significantly." Merger Guidelines § 7.2. Here, competitive conditions in the hydrogen peroxide industry *have* changed significantly since some suppliers engaged in price fixing nearly 20 years ago. *See* PPFFCL at 42-43 ¶ 143; DPFFCL at 72 ¶ 188. The FTC argues that because the industry products, plants, actors, and capacity are roughly the same now, nothing has changed. PPFFCL at 43-44 ¶¶ 144-48. But the very features of the industry that enabled suppliers to fix prices—public price announcements, swap agreements, and meet-or-release clauses, *see* DPFFCL at 73 ¶¶ 190-92—are largely nonexistent now, and there is no reason to think they **[**74]** are likely to return soon.[31]

---

[30] The FTC notes that some pulp and paper customers award business on a mill-by-mill basis, so those large-volume buyers do not "inherently impede coordinated conduct." PPFFCL at 99 ¶ 80; *see id.* at 78 ¶ 268. Although this may mitigate the effect of large and long-term contracts somewhat, each of those mills are still purchasing high volumes of hydrogen peroxide, and competition is progressively stronger for this "shrinking pie" of pulp and paper customers. Rhilinger Hrg. Tr. 2414:18; *see* Hill Hrg. Tr. 2205:20-2206:4; JX0089-003 (almost 19 million pounds of hydrogen peroxide volume for [TEXT REDACTED IN ORIGINAL SOURCE] pulp and paper mill).

[31] For example, the record reflects only one public price announcement since 2016. *See* PX2055-004; PPFFCL at 44 ¶ 149; DPFFCL at 73 ¶ 190. The FTC argues that [TEXT REDACTED IN ORIGINAL SOURCE] attempted to raise prices in 2018, an allegation it first leveled after the hearing in its proposed findings of fact, PPFFCL at 44 ¶ 149 (citing [TEXT REDACTED IN ORIGINAL SOURCE] JX0054 [TEXT REDACTED IN ORIGINAL SOURCE]; PX3028-001), and without questioning the relevant witnesses about it at the evidentiary hearing: [TEXT REDACTED IN ORIGINAL SOURCE] Even so, it appears the attempted price increase was only communicated to customers, not to the public. *See* PX3028-001; Mahr Hrg. Tr. 2421:23-2422:3. In addition, when suppliers fixed prices two decades ago, they frequently reached swap agreements with each other. DPFFCL at

There is mixed evidence in the record relating to other factors that courts consider to evaluate industry vulnerability to coordination. But on balance, the Court concludes that Defendants have the better argument in each case, or at least that the factor is essentially neutral.

One factor is market transparency, on which coordination depends. A market is more vulnerable to coordination if (1) "the terms offered to customers are relatively transparent," (2) there is "[p]rice transparency," or (3) there is "transparency regarding **[*316]** the identities of the firms serving particular customers" (which can give rise to "customer or territorial allocation"). Merger Guidelines § 7.2. Here, the terms offered to customers in blind bids are opaque; aside from knowing the basic terms requested in an RFP, suppliers have little way of knowing what their competitors are offering. *See* DPFFCL at 66-67 ¶ 173. Price is also mostly opaque. Suppliers have information about general pricing trends in the industry and each other's production costs, but systematic attempts by suppliers to track each other's prices have largely failed. *See* DPFFCL at 66-68, 77-78 ¶¶ 173, 176-77, 201; PPFFCL at 36-38 ¶¶ 127-130, 132; Corson Hrg. **[**75]** Tr. 658:8-11 ("I know that the pricing information, we, kind of, stopped even trying to maintain that because there was never a consistency, nor is this information available." (cleaned up)). On the other hand, suppliers gain a general idea of the relationships that develop between certain suppliers and certain customers from the bidding process and their conversations with customers. PPFFCL at 36-38 ¶¶ 130-31, 133.

Another factor is product and pricing homogeneity; the more homogenous products and prices are, the more vulnerable the market is to coordination. *CCC Holdings, 605 F. Supp. 2d at 61*. Although hydrogen peroxide products are relatively homogenous—within end uses, but not between them—pricing is heterogeneous and unpredictable for each product, largely due to the substantial role that freight plays into pricing decisions. *See* PPFFCL at 33-34 ¶¶ 118-20; DPFFCL at 65 ¶ 170; Hill Rpt. JX0066-028 fig. 4; *id.* -098 fig. 45 (average standard grade price varies from 23 cents to 37 cents); *id.* -097 n.254 (standard grade hydrogen peroxide "typically has less variation in price within it than do other grades"). These variations in price make it difficult for suppliers to predict how consumers will react to their pricing decisions, which would facilitate coordination. **[**76]**

In addition, plants operating at capacity can sometimes suggest a reduced incentive to compete for customers aggressively, because suppliers can only serve so many of them. *See* PPFFCL at 39 ¶ 136; JX0032-086; PX2484-001; *cf.* DPFFCL at 55 ¶ 147 (Solvay undercut suppliers on price in 2017 after they expanded capacity). And the evidence here shows that [TEXT REDACTED IN ORIGINAL SOURCE] hydrogen peroxide suppliers are operating their plants nearly at capacity. Even so, other features of the market—a significant portion of contracts up for bidding every year, large volume contracts, and the need to keep plants running at capacity due to the high fixed costs of running them—should still incentivize competition. *See* DPFFCL at 71 ¶ 184. Indeed, for those reasons, every bidding cycle is crucial for suppliers. *See, e.g.*, *id. at 70* ¶ 181; Corson Hrg. Tr. 652:14-19 ("[T]he large volumes that come up . . . at the end of the year . . . expose us to a lot of risk as we plan our production; our terminals; our whole logistics network around those customers. So if there is a change, it affects us dramatically.").

Finally, a market is conducive to tacit coordination "where producers recognize their 'shared economic interests and their interdependence **[**77]** with respect to price and output decisions.'" *Arch Coal, 329 F. Supp. 2d at 131* (quoting *Brooke Group, 509 U.S. at 227*)). The FTC's theory of such coordination presupposes suppliers with an acute awareness of each other's interdependence, withholding bids to avoid downward "price spirals" or retaliation from competitors. PPFFCL at 38-42 ¶¶ 134-41. But the evidence in the record on this point is mixed at best. In most cases when suppliers expressed concern about retaliation from competitors, **[*317]** those same suppliers proceeded to ignore that risk and undercut their competitors on price anyway, in large part due to the large and

---

73 ¶ 191. A swap agreement occurs "when there's a customer that's relatively distant from its supplier, and that supplier makes a deal with a closer supplier to instead serve the customer on its behalf." Hill Hrg. Tr. 2066:19-22. A swap agreement lessens the incentive to compete for customers in the first place because both parties to the swap benefit from a single customer. *Id.* 2065:22-2067:1. And finally, suppliers used to include meet-or-release clauses in their customer contracts. DPFFCL at 73 ¶ 192. That clause allows a customer under contract who is offered a better price elsewhere to tell its current supplier, "[m]atch that price or I'm going to make the contract invalid and switch to the other supplier." *Id.* 2065:18-22. Meet-or-release clauses also lowered suppliers' incentive to compete aggressively in the first place, and they served as "an early warning system for detecting deviations" from coordination. *Id.* 2065:23-2066:7.

long-term contracts at stake. *See, e.g.*, PX1027-008 (Evonik recognizing "Competitive Repercussions" of taking Suncor business from PeroxyChem); PPFFCL at 67 ¶ 229 (Evonik successfully bid on Suncor anyway); JX0112 (supplier "bit off a little more than they expected . . . in retaliation for [Evonik] picking up . . . additional business"); PX2339-001 ("It's really critical that we push for whatever extra share we can get at [TEXT REDACTED IN ORIGINAL SOURCE]"); PX1307; PX1440.

Moreover, in the few instances when suppliers appeared to withhold bids after acknowledging the potential for retaliation, those decisions also reflected legitimate business considerations: **[**78]** for example, the supplier did not believe the contract at issue was large or long enough to justify offering a lower price, or the supplier recognized it was not likely to be competitive due to its location and the high cost of transporting hydrogen peroxide. DPFFCL at 76 ¶ 198; *see, e.g.*, Montag Hrg. Tr. 1569:2-1570:19; *id.* 1574:14-1576:5 (discussing PX2190-001 and that PeroxyChem sought a long-term commitment to justify the investment necessary to serve the customer); PX1074; PX2337-001; PX2501-001.

In summary, the evidence does not show that suppliers are coordinating in the hydrogen peroxide market to keep prices artificially high. As Defendants argued, "a market in which the prices are falling is one in which it's very unlikely that coordination is happening among suppliers. If they are [coordinating], they're doing a terrible, terrible job of it." Mahr Hrg. Tr. 2312:24-2313:2. Rather, despite the relatively few suppliers and low demand elasticity, suppliers appear to bid aggressively to win large and long-term contracts from sophisticated customers. While the "structure and dynamics of the . . . market may *permit* coordination," in this case they "do not make coordination *likely*." *Arch Coal, 329 F. Supp. 2d at 140*.

2. The [79] Proposed Merger's Effect on Coordination**

The Merger Guidelines advise that even where a market "shows signs of vulnerability to coordinated conduct," before challenging a merger, the FTC must also "have a credible basis on which to conclude that the merger may enhance that vulnerability." § 7.1. The proposed merger of Evonik and PeroxyChem is unlikely to do so. None of the above-described features of the industry currently inhibiting coordination in the hydrogen peroxide market are likely to change post-merger. DPFFCL at 78 ¶ 203. In other words, there is no reason to suspect that suppliers will not continue to participate in a blind bidding system for long-term and large contracts to win the business of sophisticated buyers.

The biggest change the proposed merger would bring about is to reduce the number of suppliers who own plants in the Southern and Central United States from five to four. PPFFCL at 45 ¶ 151. That change relates directly to market concentration and the FTC's prima facie case, and the Merger Guidelines suggest that the FTC must have an independent basis to conclude that a merger will increase the likelihood of coordination, apart from whatever evidence it offers to show undue market concentration. **[**80]** *See* § 7.1. In any event, there is no reason to think that reducing the number of hydrogen peroxide suppliers from five to four will likely lead to coordination. As described above, the industry is not especially vulnerable to it, and the record contains no evidence that suppliers are coordinating to raise prices or withhold supply in the FTC's other proposed geographic market of the Pacific **[*318]** Northwest, in which only three suppliers operate.

The FTC also argues that Evonik, which has historically maintained a "price over volume" strategy, will be a market leader post-merger that can more easily discipline competitors. PPFFCL at 45-46 ¶ 154-57. Setting aside whether such market asymmetry in fact increases the likelihood of coordination, *see* Hill Rpt., JX0066-110 to - 111, the FTC's argument is speculative and inconsistent with the record. Evonik is already the market leader in the Southern and Central United States, Rothman Rpt., JX0075-168, and so the scenario the FTC anticipates should have already come to pass. In fact, the evidence suggests the opposite. Evonik has consistently undercut other suppliers in the bidding process, *see, e.g.*, PPFFCL at 67 ¶ 229; JX0112. And market-wide prices are *decreasing* even with Evonik **[**81]** as the dominant player, *see* Hill Rpt., JX0066-097 to - 099.

Moreover, even if suppliers act contrary to that evidence and try to coordinate, Nouryon remains positioned to disrupt that behavior. "[C]ollective market power is diminished by the presence of other market participants with small market shares and little stake in the outcome resulting from the coordinated conduct, if these firms can rapidly expand their sales in the relevant market." Merger Guidelines § 7.2. Nouryon is well situated to expand its hydrogen peroxide sales in the event of a price increase because it (1) is "the smallest of all of the competitors," Radlinski Hrg. Tr. 538:15; (2) has won business from suppliers in the past, [TEXT REDACTED IN ORIGINAL SOURCE] ; and (3) has over [TEXT REDACTED IN ORIGINAL SOURCE] pounds of excess capacity at its Columbus, Mississippi, plant with only an [TEXT REDACTED IN ORIGINAL SOURCE] utilization rate, Radlinski Decl., JX0009-002; Radlinski Hrg. Tr. 545:17-21; Hill Rpt. JX0066-109.[32]

While "the risk that a merger will induce adverse coordinated effects may not be susceptible to quantification or detailed proof," the FTC must still "have a credible **[**82]** basis on which to conclude that the merger may enhance that vulnerability." Merger Guidelines § 7.1. It does not come close to meeting that standard.

3. The Proposed Merger's Unilateral Effects

The FTC has also failed to show that the proposed merger is likely to have substantial unilateral effects. "A merger is likely to have unilateral anticompetitive effect if the acquiring firm will have the incentive to raise prices or reduce quality after the acquisition, independent of competitive responses from other firms." *H & R Block, 833 F. Supp. 2d at 81*. In industries like hydrogen peroxide where buyers negotiate with sellers and play sellers off each other, "[a]nticompetitive unilateral effects . . . are likely in proportion to the frequency or probability with which, prior to the merger, one of the merging sellers had been the runner-up when the other won the business." Merger Guidelines § 6.2. To be sure, the evidence suggests that Evonik and PeroxyChem compete head-to-head for *some* hydrogen peroxide customers, for *some* end uses. *See* PPFFCL at 49-50 ¶ 167. As a result, the loss of PeroxyChem as a competitor may lead to a price increase for *some* customers. But the question for the Court is whether the proposed merger, as a whole, is likely to **[**83]** "substantially . . . lessen competition." *15 U.S.C. § 18*. The evidence does not show that to be so.

[*319] A quantitative analysis of the unilateral effects, like market concentration, is impossible without data reflecting a properly defined relevant market, bounded by both product and geography. The FTC's expert, Dr. Rothman, offered two economic models to illuminate the merger's likely unilateral effects, the "GUPPI" and the "second-score procurement merger simulation model," Rothman Rpt., JX0075-088, -100, both of which rely on markets the Court has rejected. The GUPPI model—which predicts "upward pricing pressure" or "the magnitude of the changes in incentives to compete aggressively"—relies on market shares of those ill-defined markets to measure customers' preferences for Evonik or PeroxyChem.[33] *Id.* -089, -091.

Likewise, Dr. Rothman's second-score procurement merger simulation model—which "estimate[s] the likelihood that Evonik and PeroxyChem are the two-highest surplus bidders for customers"—relies on (1) "market shares," and (2) transaction data aggregated "for all . . . non-electronics hydrogen peroxide, as well as for . . . standard grade hydrogen peroxide only", *id.* -102, both of which are **[**84]** based on the FTC's ill-conceived product and geographic markets. The model then predicts price increases for all non-electronics grade hydrogen peroxide—and

---

[32] The FTC relies on a benign remark by Nouryon's Paul Radlinski to argue that [TEXT REDACTED IN ORIGINAL SOURCE] PPFFCL at 54 ¶ 179. But Radlinski testified that Nouryon—[TEXT REDACTED IN ORIGINAL SOURCE] Hrg. Tr. 545:22-546:16. [TEXT REDACTED IN ORIGINAL SOURCE], *[TEXT REDACTED IN ORIGINAL SOURCE] See id.* 545:17-21 ([TEXT REDACTED IN ORIGINAL SOURCE]).

[33] Even setting aside the GUPPI's market-share input, the model is unreliable here because: (1) the Merger Guidelines only recommend using the GUPPI to predict upward pricing pressure for "differentiated products," § 6.1, and the products here are homogenous within each relevant product market (hydrogen peroxide formulated for a specific end use), *see* Hill Rpt., JX0066-084 to - 085; (2) the GUPPI "assumes that customers have little or no bargaining power," Rothman Rpt., JX0075-088, which is not the case with hydrogen peroxide customers; and (3) accurate GUPPI results "require[] precise information on pass-through behavior," and Dr. Rothman provides no evidence to support his .8 pass-through rate of cost to price, *see* Hill Rpt., JX0066-086 to - 089.

for an alternative standard grade hydrogen peroxide product market—in the Southern and Central United States as well as in alternative geographic markets in the Southern, Central, and Western United States. *Id.* -103 to - 106 & nn.349-50, 354, 356, 358. The problem is that the FTC has not shown that the model's "inputs" or "outputs" are grounded in relevant product or geographic markets. The Court cannot assume that suppliers compete just as closely in smaller product-geography cross-sections of the market; in fact, in many situations, that is clearly not the case. And for these reasons, there is no basis for the Court to assume that the total predicted effect of the merger calculated by Dr. Rothman is merely the sum total of these smaller product-geography cross-sections. Because the Court has found the FTC's proposed product and geographic markets wanting, Dr. Rothman's models are of little use to the FTC in showing likely unilateral effects of the merger.

The remaining qualitative evidence in the record, to the extent that it **[**85]** is instructive given the lack of a properly defined market, suggests that the proposed merger is unlikely to cause unilateral effects that substantially lessen competition. This is so in large part because in general, Evonik and PeroxyChem are not close competitors. Evonik's Mobile, Alabama plant and PeroxyChem's Bayport, Texas plant—their two facilities in the Southern and Central United States—largely sell hydrogen peroxide intended for different end uses. Hill Rpt., JX0066-057; *see* DPFFCL at 86-88 ¶¶ 230-35. For example, about [TEXT REDACTED IN ORIGINAL SOURCE] percent of Evonik's production at Mobile is standard grade hydrogen peroxide sold to pulp and paper customers, while only about [TEXT REDACTED IN ORIGINAL SOURCE] percent of PeroxyChem's Bayport production serves the pulp and paper industry, **[*320]** and that number is shrinking. *See* DPFFCL at 85, 88 ¶ 229, 235. Evonik and PeroxyChem also have different geographic focuses, largely because of the significant freight costs for the shipment of hydrogen peroxide and the location of their plants over 450 miles apart. *See id.* at 88-90 ¶¶ 236-41. The closest possible market competitors for Evonik's Mobile plant are Nouryon's plant in Columbus, Mississippi, and Arkema's plant in Memphis, **[**86]** Tennessee. *Id.* at 89 ¶ 240. The closest possible competitor for PeroxyChem's Bayport plant is Solvay's in Deer Park, Texas, fewer than 10 miles away. *Id.*

After Evonik and PeroxyChem merge, those three competitors are well positioned to check Evonik during the bidding process. Executives for Nouryon, Arkema, and Solvay testified that because of the blind bidding system and the sophistication of their customers, they compete just as aggressively to win contracts no matter how many bidders are involved. *See* Radlinski Hrg. Tr. 574:18-25; Myrick Hrg. Tr. 507:17-508:6; Suter Hrg. Tr. 439:7-17. Nouryon's Paul Radlinski, General Manager for Bleaching Chemicals in North America, Europe, and Asia, has 38 years of experience with Nouryon and its predecessor company. Hrg. Tr. 536:19-24. He explained at the evidentiary hearing that suppliers do not know "whether it's one, two or three or four" suppliers bidding on a given customer. *Id.* 587:14-17. "So my assumption is it's always four when we go in to bid. And if it's only one there, the customer's not going to tell us, [w]ell, you were the second of four bids. They're going to say, [y]our bid was not the lowest bid. You need to sharpen your pencils and bring **[**87]** us back a new offer." *Id.* 587:17-21. "We don't have transparency," so "it's just as competitive with one other competitor as it is with three." *Id.* 588:3, 588:9-11. Because blind bidding in the hydrogen peroxide is "all or nothing," "to win the business, you have to beat everybody," whether it is one or three competitors. *Id.* 588:17, 589:6.

Finally, unlike many cases in which the FTC alleges that a proposed merger would be anticompetitive, the record contains *no* evidence that Evonik intends to raise prices post-merger. DPFFCL at 62-63 ¶¶ 162-63; *cf., e.g.*, *Tronox, 332 F. Supp. 3d at 208* (merging company planned to "slow down" or "manag[e]" production so that "prices will rise"); *Wilhelmsen, 341 F. Supp. 3d at 63* (internal document noted that if merger closed, it would "increase our ability to charge far better prices"). Of course, such a smoking gun is not necessary for the FTC to meet its burden. But here, the evidence reflects a perfectly legitimate reason why Evonik and PeroxyChem would want to merge that has nothing to do with raising prices: the businesses complement each other. The Chairman of Resource Efficiency for Evonik, Claus Rettig, credibly testified that the reason the proposed merger is attractive to Evonik is that it wants to expand into the specialty **[**88]** grade hydrogen peroxide market on which PeroxyChem focuses. *See* Rettig Hrg. Tr. 1047:13-17, 1053:1-9. Those specialty grade products "promise higher returns in terms of profitability" and "are more stable in economic downturns" relative to pulp and paper products, *id.* 1047:14-15, particularly given the number of newsprint customers that have gone out of business. *See* Corson Hrg. Tr. 640:14-641:2, 651:18-21.

Lacking a smoking gun, the FTC fires away with a few squirt guns: (1) a poorly informed third-party consultant's report, based on transaction data only from [TEXT REDACTED IN ORIGINAL SOURCE], predicting a price increase, JX0140; *see* PPFFCL at 47-48 ¶ 161; DPFFCL at 62-63 ¶ 163; (2) a 2019 Evonik internal presentation with a demand curve reflecting that *if* Evonik chose to **[*321]** raise prices, its sales quantity would decrease, JX0129-037 to - 038; *see* PPFFCL at 46 ¶ 156; DPFFCL at 77 ¶ 200; (3) emails exchanged between a competitor's employees, shortly after Evonik and PeroxyChem announced the proposed merger, expressing hope that the industry's falling prices would finally plateau;[34] and (4) out-of-court declarations by customers reflecting "a truism of economics: a decrease in the number of suppliers *may* lead to a decrease in the level of **[**89]** competition in the market." *Arch Coal, 329 F. Supp. 2d at 146*; *see* PPFFCL at 51 ¶ 170. But customers "do not, of course, have the expertise to state what *will* happen in the [hydrogen peroxide] market, and none have attempted to do so." *Arch Coal, 329 F. Supp. 2d at 146*. These declarations are not enough to outweigh the overall trends in the hydrogen peroxide market reflected in the record: decreasing prices, aggressive competition for sophisticated customers with large and long-term contracts, and substantial cost savings from blind bidding. *See* DPFFCL at 57-62 ¶¶ 150-61.[35]

As with the FTC's shortcomings in showing undue concentration in a relevant market, the Court does not mean to suggest that in a later administrative proceeding, it would be impossible for the FTC to show coordinated or unilateral effects, based on a properly defined product and geographic market, that could call the merger into question. But it does not win the day on the record here. "*Section 7* involves *probabilities*, not . . . possibilities," *Baker Hughes, 908 F.2d at 984*, and on this record the Court cannot say it is probable that the merger will substantially harm competition.

For all these reasons, the FTC has not met its burden of showing a likelihood of success on the merits.

C. The Equities

The Federal Trade Commission **[**90]** Act provides for a preliminary injunction to block a merger when "such action would be in the public interest," after "weighing the equities and considering the Commission's likelihood of ultimate success." *15 U.S.C. § 53(b)*; *see* *Heinz, 246 F.3d at 726*. "The primary public interest favoring preliminary injunctive relief in a *Section 13(b)* case, which Congress specifically contemplated, is the effective enforcement of the antitrust laws. . . . Absent a likelihood of success on the merits, however, equities alone will not justify an injunction." *Arch Coal, 329 F. Supp. 2d at 159*.

The parties devote little discussion to the equities. They recognize that the propriety of a preliminary injunction typically rises and falls with the FTC's likelihood of success on the merits and the public interest in enforcing antitrust laws. PPFFCL at 99-100 ¶ 81-82; DPFFCL at 100 ¶ 269. Even so, the FTC argues that without a preliminary injunction, Defendants can "'scramble the eggs'—that is, combine **[*322]** their operations and make it difficult, if not impossible, for competition to be restored to its previous state." PPFFCL at 100 ¶ 82. For their part, Defendants represent that if the Court grants the FTC a preliminary injunction, "the final closing date will pass on February 3, 2020, and commercial imperatives will force the merging **[**91]** parties to terminate their merger agreement." DPFFCL at 16 ¶ 45; *see* Mahr Hrg. Tr. 2439:4-5. But there is no need for the Court to resolve these competing equities. For all the reason explained above, the FTC has not carried its burden of showing that it is

---

[34] Defendants objected to the admission of these two exhibits, PX3000 and PX3020, emails exchanged by [TEXT REDACTED IN ORIGINAL SOURCE] employees. *See* ECF No. 139-1. The Court overrules the objections and admits them, but gives them little weight. Documents such as these appear highly speculative, and because most of their authors did not testify, the Court has little basis to assess their reliability. Indeed, the FTC did not even bother to ask [TEXT REDACTED IN ORIGINAL SOURCE]—the only author who *did* testify—about them. *See* DPFFCL at 62 n.378.

[35] Defendants argue that efficiencies or "logistics savings" from their merger may *reduce* the price of hydrogen peroxide or offset any predicted price increase, DPFFCL at 96-97 ¶ 258, but those purported savings are unverifiable and did not weigh into the Court's analysis. *See* PPFFCL at 76-77 ¶¶ 260-61; *Aetna, 240 F. Supp. 3d at 94* ("the estimate of the predicted saving must be reasonable verifiable by an independent party").

likely that the proposed merger will substantially lessen competition for a particular product in a particular geographic market. The Court must therefore deny its request for a preliminary injunction.

Conclusion

For all of the above reasons, the Court will deny the FTC's Motion for Preliminary Injunction, ECF No. 3. A separate order will issue.

Opinion

MEMORANDUM OPINION AND ORDER

Before the Court are Plaintiffs Ronald Chandler's, Chandler Manufacturing, LLC's, Newco Enterprises, LLC's, and Supertherm Heating Services, LLC's (collectively, the "Chandler Plaintiffs") Motion to Compel Production of Documents Subject to Waiver of Privilege Pursuant to the Crime/Fraud Exception, and for Attorney Depositions, and Brief ("Motion to Compel") and Appendix in Support (ECF Nos. 29-30), filed November 12, 2019; Defendants Phoenix Services, LLC's and Mark H. Fisher's (collectively, the "Phoenix Defendants") Response and Appendix in Support (ECF Nos. 34, 36), filed December 3, 2019; and Plaintiffs' Reply and Appendix in Support (ECF Nos. 40-41), filed December 12, 2019. Also **[*2]** before the Court are Plaintiffs' Motion to Disqualify Devan Padmanabhan, Esq. and Paul Robbennolt, Esq., as Trial Counsel, and Brief ("Motion to Disqualify") (ECF No. 31), filed November 12, 2019; Defendants' Response and Appendix in Support (ECF Nos. 35-36), filed December 3, 2019; and Plaintiffs' Reply and Appendix in Support (ECF Nos. 42-43), filed December 16, 2019.

Having reviewed the motions, briefing, and applicable law, the Court finds that the Chandler Plaintiffs' Motion to Compel should be and is hereby **GRANTED in part** and **DENIED in part.** The Court further finds that the Chandler Plaintiffs' Motion to Disqualify should be and is hereby **GRANTED in part** and **DENIED in part.** In accordance with the Court's instructions below, the Phoenix Defendants are **ORDERED** to produce to the Court "all legal advice provided by the attorneys for HOTF and Phoenix related to the assertion of the '993 Patent against Plaintiffs in the underlying litigation, which remains stayed in this Court," for the Court's *in camera* review. Pls.' Mot. Compel 2, ECF No. 29. The Phoenix Defendants are **further ORDERED** to make attorney Devan Padmanabhan ("Padmanabhan") available for a deposition during the month of February **[*3]** 2020. The Court **HOLDS** that Padmanabhan is hereby disqualified from participating as the Phoenix Defendants' counsel before the jury at the parties' upcoming jury trial.

I. FACTUAL BACKGROUND

In its December 17, 2019 Order ruling on the Phoenix Defendants' Motion to Dismiss, the Court laid out the extensive factual background of this case and the related *Energy Heating* litigation in the District of North Dakota and Federal Circuit courts. *See* *Chandler v. Phoenix Servs., F. Supp. , 419 F. Supp. 3d 972, 2019 U.S. Dist. LEXIS 217008, 2019 WL 6894687, at *1-3 (N.D. Tex. Dec. 17, 2019)*. The Court assumes familiarity and only adds additional facts pertinent to the Chandler Plaintiffs' Motion to Compel and Motion to Disqualify.

In 2018, the Federal Circuit "affirm[ed] the district court's conclusion that the ['993 P]atent is unenforceable for inequitable conduct." *Energy Heating, LLC v. Heat On-The-Fly, LLC, 889 F.3d 1291, 1299 (Fed. Cir. 2018)* [hereinafter *Energy Heating*]. As a result, the Phoenix Defendants "waived privilege" in this litigation "with respect to inequitable conduct and the facts that gave rise to the inequitable conduct finding." Defs.' Resp. Mot. Compel 1, ECF No. 34. The Phoenix Defendants "have not withheld as privileged any documents or information pertaining to the prosecution of [the '993 Patent]; the Defendants' knowledge of or discussions with counsel about the facts and circumstances giving rise **[*4]** to the inequitable conduct finding; and any consideration or discussion of inequitable conduct in connection with the decision to file a patent infringement suit against the Plaintiffs." *Id.* But they withhold all privileged information not related to the inequitable conduct. *See generally id.*

The Phoenix Defendants' attorneys, Padmanabhan and Paul Robbennolt ("Robbennolt"), also represented Phoenix Services, LLC ("Phoenix") subsidiary Heat On-The-Fly, LLC ("HOTF") in the *Energy Heating* litigation. Pls.' Mot. Disqualify 4, ECF No. 31. In their roles as HOTF's counsel, Padmanabhan and Robbennolt were central to the litigation underlying this lawsuit—that in which the Federal Circuit concluded the '993 Patent was unenforceable as a matter of law. *See* *Energy Heating, 889 F.3d at 1303*. Currently, in addition to serving as trial counsel in this case, Padmanabhan represents HOTF against the Chandler Plaintiffs in *Newco Enterprises, LLC v. Super Heaters North Dakota, LLC*, 7:14-CV-87-O, which is stayed in this Court. In spite of the Federal Circuit's ruling that the '993 Patent is unenforceable, HOTF maintains its patent-infringement claims against the Chandler Plaintiffs. *See id.* Countercl., ECF No. 33.

On December 6, 2019, the Chandler Plaintiffs **[*5]** deposed Mark H. Fisher ("Fisher"), who testified as the corporate representative of Phoenix. *See* Pls.' App. Supp. Reply Mot. Disqualify Ex. A, ECF No. 43-2. During his deposition, Fisher testified that "the first time Phoenix Services, LLC found out about the 61 prior frac jobs referenced by the Federal Circuit[, which] could be the basis for inequitable conduct to render the '993 Patent unenforceable[,] was after the judgment in the Energy Heating litigation was rendered" *Id.* at 4. Fisher further stated he did not have "any knowledge of any inequitable conduct," he did not have any "belief there was any inequitable conduct," and there was no "advice provided to [him] that would lead [him] to think there was any risk of inequitable conduct." *Id.* at 6-7. When asked which lawyers he relied on at that time, Fisher mentioned Padmanabhan first. *Id.* at 7.

II. LEGAL STANDARD

A. The Crime-Fraud Exception to Attorney-Client and Work-Product Privileges

"Under the crime-fraud exception to the attorney-client privilege, the privilege can be overcome where communication or work product is intended to further continuing or future criminal or fraudulent activity." *In re Grand Jury Subpoena, 419 F.3d 329, 335 (5th Cir. 2005)* (internal citation omitted). Courts recognize this privilege "to assure **[*6]** that the seal of secrecy between lawyer and client does not extend to communications made for the purpose of getting advice for the commission of a fraud or crime." *United States v. Zolin, 491 U.S. 554, 563, 109 S. Ct. 2619, 105 L. Ed. 2d 469 (1989)* (internal citation omitted).

"To invoke the crime-fraud exception, a party must establish a *prima facie* case that a crime has been committed." *Indus. Clearinghouse, Inc. v. Browning Mfg. Div. of Emerson Elec. Co., 953 F.2d 1004, 1008 (5th Cir. 1992)*. To make out a prima facie case, the movant "must produce evidence 'such as will suffice until contradicted and overcome by other evidence . . . a case which has proceeded upon sufficient proof to that stage where it will support [a] finding if evidence to the contrary is disregarded.'" *In re Grand Jury Subpoena, 419 F.3d at 336* (quoting *In re Int'l Sys. & Controls Corp. Sec. Litig., 693 F.2d 1235, 1242 (5th Cir. 1982))*.

B. Deposing Opposing Counsel

"Generally, federal courts have disfavored the practice of taking the deposition of a party's attorney," so courts in the Fifth Circuit employ the practice "only in limited circumstances." *Theriot v. Parish of Jefferson, 185 F.3d 477, 491 (5th Cir. 1999)*. "In order to determine when it is proper to allow opposing counsel to be deposed, the Fifth Circuit applies a three factor test that the party seeking the deposition must meet." *Davis-Lynch, Inc. v. Weatherford Int'l, Inc., 6:07-cv-559, 2009 U.S. Dist. LEXIS 62464, 2009 WL 2174925, at *2 (E.D. Tex. July 21, 2009)*. The movant must show: "'(1) no other means exist to obtain the information than to depose opposing counsel; (2) the information sought **[*7]** is relevant and non-privileged; and (3) the information is crucial to the preparation of the case.'" *Id.* (quoting *Nguyen v. Excel Corp., 197 F.3d 200, 208 (5th Cir. 1999))*.

C. Disqualifying Opposing Counsel

"[D]isqualification cases are governed by state and national ethical standards adopted by the court." *In re Am. Airlines, 972 F.2d 605, 610 (5th Cir. 1992)*. The Fifth Circuit has stated that "[w]hen considering motions to disqualify, courts should first look to the local rules promulgated by the local court itself." *In re ProEducation Int'l, Inc., 587 F.3d 296, 299 (5th Cir. 2009)* (internal citation omitted). In the Northern District of Texas, attorneys "are subject to the Texas Disciplinary Rules of Professional Conduct [('Texas Rules')]." *Asgaard Funding LLC v. ReynoldsStrong LLC, 3:19-CV-1823-B, 426 F. Supp. 3d 292, 2019 U.S. Dist. LEXIS 211406, 2019 WL 6702119, at *3 (N.D. Tex. Dec. 9, 2019)* (citing *N.D. Tex. Civ. R. 83.8(e)*). The Fifth Circuit has also "recognized the ABA Model Rules of Professional Conduct (Model Rules) as the national standards to consider in reviewing motions to disqualify." *In re ProEducation Int'l, Inc., 587 F.3d at 299*.

Pursuant to both the Model Rules and the Texas Rules, if a lawyer is likely to be a necessary witness in a trial, he typically should not serve as an advocate during that trial. *See* Model Rules of Prof'l Conduct r. 3.7(a) (West 2019) ("A lawyer shall not act as an advocate at a trial in which the lawyer is likely to be a necessary witness unless: (1) the testimony relates to an uncontested **[*8]** issue; (2) the testimony relates to the nature and value of legal services rendered in the case; or (3) disqualification of the lawyer would work substantial hardship on the client."); *Tex. Disciplinary Rules Prof'l Conduct R. 3.08(a)*, *reprinted in* Tex. Gov't Code Ann., tit. 2, subtit. G, app. A (West 2019) ("A lawyer shall not accept or continue employment as an advocate before a tribunal in a contemplated or pending adjudicatory proceeding if the lawyer knows or believes that the lawyer is or may be a witness necessary to establish an essential fact on behalf of the lawyer's client, unless . . . ."). These rules avoid "[c]ombining the roles of advocate and witness," which "can prejudice the tribunal and the opposing party and can also involve a conflict of interest between the lawyer and client." Model Rules of Prof'l Conduct r. 3.7 cmt. 1.

The Model Rules and Texas Rules "may furnish some guidance in those procedural disqualification disputes where the party seeking disqualification can demonstrate actual prejudice to itself resulting from the opposing lawyer's service in the dual roles," but disqualification "should not be used as a tactical weapon to deprive the opposing party **[*9]** of the right to be represented by the lawyer of his or her choice." *Tex. Disciplinary Rules Prof'l Conduct R. 3.08 cmt. 10*; *see also* Model Rules of Prof'l Conduct r. 3.7 cmt. 4 ("[I]n determining whether the lawyer should be disqualified, due regard must be given to the effect of disqualification on the lawyer's client. It is relevant that one or both parties could reasonably foresee that the lawyer would probably be a witness.").

III. ANALYSIS

In their Motion to Compel and Motion to Disqualify, the Chandler Plaintiffs ask the Court to do three things: (1) compel the Phoenix Defendants to produce documents "regarding pre-suit investigations regarding the '993 Patent, and the decision to assert the '993 Patent in litigation, and the decision to maintain the litigation," Pls. Mot. Compel 9, ECF No. 29; (2) compel the Phoenix Defendants to "make Devan Padmanabhan, Esq. and Paul Robbennolt, Esq. available for an oral deposition," *id.* at 10; and (3) order that Padmanabhan and Robbennolt "shall not participate as advocates in the presence of the jury at the trial of this matter," Pls.' Mot. Disqualify 6, ECF No. 31. The Court addressed each request in turn.

A. Motion to Compel Production of Documents

"A finding of inequitable **[*10]** conduct may . . . spawn antitrust and unfair competition claims . . . [and] may also prove the crime or fraud exception to the attorney-client privilege." *Therasense, Inc. v. Becton, Dickinson & Co., 649 F.3d 1276, 1289 (Fed. Cir. 2011)*. The Chandler Plaintiffs invoke this principle and assert that the District of North Dakota's finding of inequitable conduct, affirmed by the Federal Circuit, "proves the fraud that supports application of the crime/fraud exception to pierce the attorney-client and work product privileges of Defendants as to the assertion of the fraudulently procured '993 Patent." Pls.' Mot. Compel 2, ECF No. 29. They argue the exception applies to "all legal advice provided by the attorneys for HOTF and Phoenix related to the assertion of the '993 Patent against Plaintiffs in the underlying litigation, which remains stayed in this Court." *Id.*

The Phoenix Defendants do not dispute that the finding of inequitable conduct invoked the crime-fraud exception. In fact, they have "already waived privilege with respect to inequitable conduct and the facts that gave rise to the inequitable conduct finding." Defs.' Resp. Mot. Compel 1, ECF No. 34. They instead dispute the scope of the exception. The Phoenix Defendants contend that "[p]rivileged information to the pre-suit investigation **[*11]** and the decision to assert a patent infringement claim against Plaintiffs that is **not** related to inequitable conduct should not be the subject of an order compelling production." *Id.* (emphasis in original). According to the Phoenix Defendants, "[t]he only fraud that provides a basis for Plaintiffs' motion is inequitable conduct in the proceedings before the United States Patent and Trademark Office [('PTO')] to obtain the '993 Patent, and the Defendants' assertion of a patent that they allegedly knew was unenforceable against Plaintiffs." *Id.* Thus, the issue is whether the crime-fraud exception to attorney-client and work-product privilege extends beyond HOTF's inequitable conduct to the fraud Defendants allegedly committed by asserting the '993 Patent against Plaintiffs through litigation.

1. Prima Facie Case of Fraud

When reviewing the evidence, the Court must determine whether "the party seeking to breach the walls of privilege [has] ma[de] out a prima facie case" of fraud. *In re Int'l Sys. & Controls Corp. Sec. Litig., 693 F.2d at 1242*. "To make the necessary *prima facie* showing for the application of the crime-fraud exception here, the [movant] must produce evidence 'such as will suffice until contradicted and overcome by other evidence . . . a case which has proceeded **[*12]** upon sufficient proof to that stage where it will support [a] finding if evidence to the contrary is disregarded.'" *In re Grand Jury Subpoena, 419 F.3d at 336* (quoting *In re Int'l Sys. & Controls Corp. Sec. Litig., 693 F.2d at 1242*).

Here, there is no question that the Chandler Plaintiffs made a prima facie case of fraud based on HOTF's inequitable conduct in procuring the '993 Patent—nor do the Phoenix Defendants contest it. But the Court also finds that, based on the Federal Circuit's ruling in the *Energy Heating* litigation and the additional evidence presented, the Chandler Plaintiffs have made the requisite prima facie showing of fraud based on both sham patent litigation and *Walker Process* fraud.

a. *Sham Patent Litigation*

The Court first addresses the crime-fraud exception with regard to the alleged sham patent litigation. Though the Federal Circuit has not addressed the crime-fraud exception in the sham-patent-litigation context, several circuits—including the Fifth—have addressed the exception in similar contexts. For example, in *Burlington Northern*, the Fifth Circuit applied the exception to attorney-client communications and work product in the context of sham *antitrust* litigation. *822 F.2d 518 (5th Cir. 1987)*. There, the Fifth Circuit held that "[t]o the extent the [defendants] sought out their attorneys to bring lawful **[*13]** suits and consulted with them in connection with such suits, they were within the scope of th[e] protection" of attorney-client privilege and work-product immunity. *Id. at 525*. The Fifth Circuit distinguished those lawful suits from "sham" litigation, which "was itself a violation of the antitrust laws" and thus unprotected by the privileges. *Id.* The Second Circuit came to the same conclusion in *Richard Roe. 168 F.3d 69 (2d Cir. 1999)*. The court first noted that "one may violate the antitrust laws by bringing baseless litigation intended to delay entry into a market by a competitor." *Id. at 71*. If, under those circumstances, "the litigation objectively lacked a factual or legal basis," the court stated that "some communications or work product generated in the course of such litigation might, after a rigorous *in camera* review by a court for relevance, fall within the crime-fraud exception." *Id.*

The Court sees no reason why the exception should apply differently when the sham litigation involves patent infringement. The Chandler Plaintiffs have established a prima facie case of sham patent litigation by applying the Federal Circuit's conclusions—that HOTF engaged in "equitable conduct" and "bad faith" representation of an invalid patent—to **[*14]** the assertion of the '993 Patent through the Phoenix Defendants' patent-infringement claims against the Chandler Plaintiffs. *See Energy Heating, 889 F.3d at 1305*. Thus, the crime-fraud exception applies to all attorney-client communications and work product made in furtherance of the Phoenix Defendants' assertion of '993 Patent through the alleged sham patent litigation.

b. *Walker Process Fraud*

The Court next addresses the crime-fraud exception with regard to the alleged *Walker Process* fraud. The Federal Circuit has explicitly held that a party can "successfully pierce the attorney-client privilege under the crime-fraud exception" by establishing *Walker Process* fraud. *Unigene Labs., Inc. v. Apotex, Inc., 655 F.3d 1352, 1358 (Fed Cir. 2011)* (citing *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965))*. And when discussing Federal Circuit precedent, the Fifth Circuit recently stated that "[i]nequitable conduct resembles the fraud element of *Walker Process*, in that it requires proof of misrepresentation, scienter, and a showing of materiality or causation. Over time, it has evolved to be virtually congruent with intentional fraud under *Walker Process.*" *Xitronix Corp. v. KLA-Tencor Corp., 916 F.3d 429, 439 (5th Cir. 2019)* (citing *Therasense, 649 F.3d at 1290*; J. Thomas Roesch, *Patent Law and* ***Antitrust Law****: Neither Friend nor Foe, but Business Partners*, *13 Sedona Conf. J. 95, 100* (2012)).

Given that inequitable conduct—which the District of North Dakota found **[*15]** and the Federal Circuit affirmed, *Energy Heating, 889 F.3d at 1299*—constitutes fraud under the crime-fraud exception, the logical extension is that *Walker Process* fraud also constitutes fraud sufficient to negate the privilege. Further, the Federal Circuit's affirmance of HOTF's inequitable conduct establishes the requisite prima face case of fraud based on *Walker Process* fraud. Accordingly, insofar as the Phoenix Defendants' otherwise privileged attorney-client communications and work product were made in furtherance of the alleged *Walker Process* fraud violations, the crime-fraud exception applies.

2. *In Camera Review*

The Phoenix Defendants oppose the Chandler Plaintiffs' entire request by referring to specific types of documents that should remain privileged. They say "[d]ocuments regarding Defendants' pre-suit investigation, decision to assert the '993 Patent against Plaintiffs, and assertion of the '993 Patent against Plaintiffs, conceivably cover documents that have nothing to do with the alleged fraud that provides the basis for Plaintiffs' motion." Defs.' Resp. Mot. Compel 7, ECF No. 24. The Phoenix Defendants provide two examples of privileged documents not encompassed by the exception: (1) their infringement analyses and (2) their **[*16]** validity analysis. *See id.* at 7-8. The Court agrees: Plaintiffs' request is likely overbroad. But limiting the evidence discoverable under the crime-fraud exception to documents related to the inequitable conduct before the PTO is too narrow.

To strike the correct balance, the Court will conduct an *in camera* review of the potentially responsive documents. *Cf.* *Zolin, 491 U.S. at 574-75* (holding that a district court "may engage in *in camera* review at the request of the party opposing the privilege" if that party has "present[ed] evidence sufficient to support a reasonable belief that *in camera* review may yield evidence that establishes the exception's applicability."). Indeed, when a party asserts privilege, "the only way the district court *can* determine if any of the documents are subject to a subpoena under the crime-fraud exception is by reviewing them. Ordering production *en masse* creates the potential that some material not within the scope of the crime-fraud exception could be ordered produced." *In re Antitrust Grand Jury, 805 F.2d 155, 168 (6th Cir. 1986)* (internal emphasis added).

The Court therefore **ORDERS** Defendants to produce documents "regarding pre-suit investigations regarding the '993 Patent, and the decision to assert the '993 Patent in litigation, and the decision to maintain the litigation." **[*17]** Pls.' Mot. Compel 9, ECF No. 29. However, the Court **LIMITS** this instruction to only attorney-client communications and work product relating to the stayed *Newco Enterprises*, 7:14-CV-87-O litigation. The Phoenix Defendants should not include technical analyses regarding infringement or information regarding the validity of the '993 Patent (as related to prior art). The Court **further ORDERS** Defendants to submit with their responsive documents a cover letter explaining the documents and instructing the Court regarding how to review them.

B. Motion to Compel Depositions

The Chandler Plaintiffs also move to compel the Phoenix Defendants to make their trial attorneys, Padmanabhan and Robbennolt, available for depositions. Padmanabhan and Robbennolt were both counsel for HOTF in the *Energy Heating* litigation, in which the Federal Circuit affirmed the district court's finding that HOTF obtained the '993 Patent through inequitable conduct. *See* Pls.' Mot. Compel 7, ECF No. 29 (depicting Padmanabhan's and Robbennolt's electronic signatures on court filings). The Phoenix Defendants argue that "the Plaintiffs cannot demonstrate that the Defendants' trial counsel are 'necessary' witnesses to an essential fact; they therefore **[*18]** should not be compelled to testify." Defs.' Resp. Mot. Compel 8, ECF No. 34. The Phoenix Defendants say "Plaintiffs have other means available to obtain the information they seek," such as "seek[ing] the same information from Defendants and their employees who will have knowledge regarding their decision to assert the '993 Patent and the basis for their claims." *Id.* at 9. They contend "Mark Fisher and other employees of Phoenix . . . are equally capable of testifying to the legal advice they were given and their basis and reason for filing suit." Defs.' Resp. Mot. Disqualify 10, ECF No. 35.

According to the Chandler Plaintiffs, "[o]ne of the key issues at trial will be for Plaintiffs to prove before the jury that if the infringement allegations brought by HOTF as to the '993 Patent in the *Energy Heating* litigation were brought in 'bad faith[,'] the same must be true for the virtually identical allegations of infringement of the '993 Patent in the underlying litigation by HOTF against Plaintiffs." Pls.' Mot. Disqualify 4-5, ECF No. 31. Plaintiffs contend Defendant Fisher made Padmanabhan a necessary witness during his December 6, 2019 deposition, during which he stated he did not have "any knowledge of any inequitable conduct," **[*19]** did not have any "belief there was any inequitable conduct," and there was no "advice provided to [him] that would lead [him] to think there was any risk as to inequitable conduct." Pls.' App. Supp. Reply Mot. Disqualify 7, ECF No. 43-2. When asked which lawyers he relied on at that time, Fisher mentioned Padmanabhan first. *Id.* at 7. Though Fisher said he did not "f[ind] out [that] the 61 prior frac jobs referenced by the Federal Circuit could be the basis for inequitable conduct," *id.* at 4, until the Federal Circuit's ruling, prior *Energy Heating* filings showed that Padmanabhan and Robbennolt did have knowledge of the inequitable conduct claim before filing the infringement claim against Plaintiff Supertherm, *see* Pls.' Reply Mot. Disqualify 5-6, ECF No. 42.

"In order to determine when it is proper to allow opposing counsel to be deposed, the Fifth Circuit applies a three factor test that the party seeking the deposition must meet." *Davis-Lynch, Inc., 2009 U.S. Dist. LEXIS 62464, 2009 WL 2174925, at *2*. The party must show: "'(1) no other means exist to obtain the information than to depose opposing counsel; (2) the information sought is relevant and non-privileged; and (3) the information is crucial to the preparation of the case.'" *Id.* (quoting *Nguyen, 197 F.3d at 208*). Though the Phoenix **[*20]** Defendants claim the Chandler Plaintiffs cannot satisfy the first element of the test because they can obtain the same information from the Phoenix Defendants themselves, the deposition testimony of Fisher—Phoenix CEO and sole employee of HOTF—belies that assertion. Fisher's testimony demonstrates that Padmanabhan had knowledge that he did not share with HOTF and Phoenix. As Fisher stated he was not privy to the key information the Chandler Plaintiffs seek, Padmanabhan should be required to testify as to the decision to proceed with the patent-infringement claims.

Finally, though Robbennolt was also listed as counsel on several *Energy Heating* filings related to the inequitable conduct claim, the Chandler Plaintiffs do not allege or even suggest that he may have knowledge that Padmanabhan does not also have. Because Fisher stated he relied on Padmanabhan, and because exercising this authority should be used as sparingly as possible, Padmanabhan is the more relevant—and thus necessary—of the two attorney-witnesses. Accordingly, Padmanabhan is a necessary witness, and Robbennolt is not. The Court **ORDERS** the Phoenix Defendants to make Padmanabhan available for a deposition during February **[*21]** 2020.

C. Motion to Disqualify

Based on their argument that Padmanabhan is a necessary witness, the Chandler Plaintiffs argue that Padmanabhan's testimony will include "hotly contested fact issues . . . and under *[Texas Disciplinary Rule of Professional Conduct] 3.08*, there is simply no way to avoid confusion of the jury," if he "act[s] as [an] advocate[] before the jury, as well as providing contested evidence to be considered by the jury as to liability of the Defendants." Pls.' Mot. Disqualify 2, ECF No. 31. The Phoenix Defendants first respond by reiterating that Padmanabhan is not a necessary witness. *See* Defs.' Resp. 9-13, ECF No. 35. Then, they argue that "[e]ven if Plaintiffs had proven that Defendants' trial counsel were 'necessary' witnesses, their motion would fail because Plaintiffs waived their right to seek disqualification by unreasonably delaying their motion." *Id.* at 13. Finally, they argue that the Court should deny Plaintiffs' Motion to Disqualify because it would unduly prejudice Defendants and deprive them of their chosen trial counsel. *Id.* at 14-15.

First, for the reasons discussed above, the Phoenix Defendants' necessary-witness argument fails. Padmanabhan is a necessary witness.

The **[*22]** Phoenix Defendants' unreasonable-delay argument also fails. The Phoenix Defendants claim that the Chandler Plaintiffs have no excuse for "failure to file this motion at the very outset of this case, as soon as they knew of the facts that gave rise to the motion, and before Defendants would suffer hardship if trial counsel were disqualified in the midst of the litigation." *Id.* at 14. But considering Padmanabhan's role in the underlying *Energy Heating* litigation, he and the Phoenix Defendants should have been aware that there was a potential for disqualification—and he arguably should have recused earlier. *See* Model Rules of Prof'l Conduct r. 3.7(a); *Tex. Disciplinary Rules Prof'l Conduct R. 3.08(a)*. Under *Texas Rule 3.08*, when a lawyer who "knows or believes that he or she may be a necessary witness" considers retaining his position as an advocate, he "is obligated . . . to consider the possible consequences of those dual roles for both the lawyer's own client and for opposing parties." *Tex. Disciplinary Rules Prof'l Conduct R. 3.08 cmt. 1*. As Padmanabhan was lead counsel in the *Energy Heating* litigation—the basis for Plaintiffs' sham patent litigation claims—he should have immediately been aware that **[*23]** his involvement and conduct would be at issue such that he could be called as a necessary witness in this case. Moreover, on December 6, 2019, Padmanabhan's own client made him a necessary witness by suggesting that he did not keep HOTF and Phoenix apprised of the details of the ongoing lawsuits. Thus, given the circumstances, the Phoenix Defendants should have anticipated their *Energy Heating* and *Newco Enterprises* counsel could likely be called to testify as necessary witnesses.

Finally, because Robbennolt is not a necessary witness and will not be disqualified from participating as trial counsel, the Phoenix Defendants' prejudice argument also fails. The Phoenix Defendants argue that Padmanabhan and Robbennolt "have obtained a detailed and thorough understanding of the complex issues underlying this case during the ten months of litigation" and "[i]t would be highly prejudicial to Defendants if they were deprived of their chosen counsel, particularly at this late stage of the litigation." Defs.' Resp. 15, ECF No. 35. But importantly, the Texas Rule "does not prohibit the lawyer who may or will be a witness from participating in the preparation of a matter for presentation to a tribunal." **[*24]** *Tex. Disciplinary Rules Prof'l Conduct R. 3.08 cmt. 8*. Instead, it "prohibits any testifying lawyer who could not serve as an advocate from taking an active role before the tribunal in the presentation of the matter." *Id.* And "[e]ven in those situations . . . another lawyer in the testifying lawyer's firm may act as an advocate, provided the client's informed consent is obtained." *Id.*; *see also* Model Rules of Prof'l Conduct R. 3.7(b) ("A lawyer may act as advocate in a trial in which another lawyer in the lawyer's firm is likely to be called as a witness unless precluded from doing so by Rule 1.7 or Rule 1.9.").

Though disqualification "should not be used as a tactical weapon to deprive the deposing party of the right to be represented by the lawyer of his or her own choice," *Tex. Disciplinary Rules Prof'l Conduct R. 3.08 cmt. 10*, the Chandler Plaintiffs have demonstrated that Padmanabhan is a necessary witness, and the Court is persuaded that his "[c]ombin[ed] roles of advocate and witness" would likely confuse the jury and cause prejudice to either or both sides, Model Rules of Prof'l Conduct r. 3.7 cmt. 1. However, the Court only disqualifies Padmanabhan from representing the Phoenix Defendants **[*25]** before the jury; his colleague, Robbennolt, may still serve as trial counsel. Moreover, Padmanabhan is not disqualified from participating in pre-trial preparation. Accordingly, Padmanabhan can continue to represent the Phoenix Defendants and can help Robbennolt prepare for trial. Thus, the Phoenix Defendants should not be unduly prejudiced.

IV. CONCLUSION

Having reviewed the Chandler Plaintiffs' Motion to Compel and Motion to Disqualify, related briefing, and applicable law, the Court **HOLDS** that the Motion to Compel (ECF No. 29) should be and is hereby **GRANTED in part** and **DENIED in part** and the Motion to Disqualify (ECF No. 31) should be and is hereby **GRANTED in part** and **DENIED in part.**

The Court **HOLDS** that the crime-fraud exception extends beyond the finding of inequitable conduct to all attorney-client communications and work product related to the alleged sham patent litigation and *Walker Process* fraud. Accordingly, the Court **ORDERS** the Phoenix Defendants to produce documents pertaining to the *Newco Enterprises*, 7:14-CV-87-O litigation—specifically, those that involve the Phoenix Defendants' and HOTF's (1) pre-suit investigations, (2) decision to assert the '993 Patent in litigation against **[*26]** the Chandler Plaintiffs, and (3) decision to maintain the suit following issuance of the Federal Circuit's *Energy Heating, 889 F.3d 1291* ruling. *See infra* p. 11. The Court **further ORDERS** Defendants to submit with their responsive documents a cover letter explaining the documents and instructing the Court regarding how to review them.

The Court **HOLDS** that Devan Padmanabhan is a necessary witness. Accordingly, the Court **ORDERS** the Phoenix Defendants to make Padmanabhan available for a deposition during February 2020.

The Court **HOLDS** that, as a necessary witness, Padmanabhan should be and is hereby **DISQUALIFIED** from serving as the Phoenix Defendants' trial counsel. He may continue to serve as pre-trial counsel.

The Parties are **ORDERED** to confer and submit to the Court a joint motion proposing an extended discovery deadline on or before **February 6, 2020.** All other deadlines shall remain in place.

SO ORDERED on this **30th day** of **January, 2020.**

bid, interstate commerce, routes, restitution, district court, auction, defendants', indictment, conspiracy, rigging, prices, funds, municipality, argues, price fixing, mail fraud, nexus, mail, Sherman Act, bid-rigging, contracts, plain error, convict, flowed, buses, interstate, sentencing, instructions, calculation, challenges

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > Scope

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Sherman Act

HN1[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act reaches only activities in the flow of interstate commerce or that, while wholly local in nature, would substantially affect interstate commerce if successful. When confronted with horizontal agreements to fix prices within a single state, the U.S. Supreme Court has based jurisdiction on a general conclusion that the defendants' agreement almost surely had a market-wide impact and therefore an effect on interstate commerce. A effect on interstate commerce will be found where the volume of commerce involved was substantial and it was inseparable from the interstate aspects of related transactions.

Criminal Law & Procedure > ... > Indictments > Contents > Content Requirements

Criminal Law & Procedure > ... > Indictments > Contents > Sufficiency of Contents

HN2[] **Contents, Content Requirements**

Appellate courts review de novo the sufficiency of an indictment. In so doing, they do not evaluate the sufficiency of the evidence that the government might have to back up the indictment. Rather, appellate courts will find an indictment sufficient if it apprises the defendant of the charged offense so that the defendant can prepare a defense and plead double jeopardy in any future prosecution for the same offense. *Fed. R. Crim. P. 7(c)(1)* provides: The indictment or the information must be a plain, concise and definite written statement of the essential facts constituting the offense charged. It may parrot the statutory language to describe the offense, but it must also be accompanied by such a statement of facts and circumstances as to inform the accused of the specific offense with which he is charged.

Antitrust & Trade Law > Sherman Act > Scope

HN3[] **Antitrust & Trade Law, Sherman Act**

At trial for a Sherman Act violation, the government had to submit evidence sufficient to establish an interstate nexus beyond a reasonable doubt.

Criminal Law & Procedure > ... > Standards of Review > Plain Error > Jury Instructions

HN4[] **Plain Error, Jury Instructions**

While appellate courts ordinarily review the legal correctness of jury instructions de novo, and issues of phrasing and emphasis for abuse of discretion, they review forfeited challenges only for plain error.

Criminal Law & Procedure > ... > Indictments > Amendments & Variances > Constructive Amendments

Criminal Law & Procedure > Appeals > Standards of Review > De Novo Review

HN5[] **Amendments & Variances, Constructive Amendments**

Appellate courts review constructive amendment claims de novo. A constructive amendment to an indictment occurs where the crime charged has been altered, either literally or in effect, after the grand jury last passed upon it. A variance-or a change in a charge that leaves the substance of the charge unaffected-is permitted unless it affects the defendant's substantial rights, i.e., the right to have knowledge of the charge sufficient to prepare an effective defense and avoid surprise at trial, and the right to prevent a second prosecution for the same offense.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > Sherman Act > Scope

HN6[] **Sherman Act, Defenses**

A per se section 1 of the Sherman Act violation is not excused by a showing that the supra-competitive prices were somehow still reasonable.

Criminal Law & Procedure > ... > Standards of Review > Abuse of Discretion > Evidence

Evidence > Relevance > Exclusion of Relevant Evidence > Confusion, Prejudice & Waste of Time

HN7[] **Abuse of Discretion, Evidence**

In criminal cases, appellate courts review an evidentiary decision under *Fed. R. Evid. 403* for an abuse of discretion and usually defer to the district court's balancing.

Criminal Law & Procedure > Appeals > Standards of Review > Plain Error

HN8[] **Standards of Review, Plain Error**

Where defendant did not make certain arguments below, appellate courts review them for plain error.

Criminal Law & Procedure > ... > Standards of Review > Plain Error > Evidence

HN9[] **Plain Error, Evidence**

Sufficiency challenges that are not preserved through a *Fed. R. Crim. P. 29* motion after trial are reviewed under a particularly exacting variant of plain error review.

Criminal Law & Procedure > ... > Fraud Against the Government > Mail Fraud > Elements

HN10[] **Mail Fraud, Elements**

Proof of mail fraud does not require proof of an actual mailing by the specific defendant. It requires only that the defendants caused the use of the mails, which includes reasonably foreseeable mailings and used the mails for the purpose, or in furtherance, of executing the scheme to defraud.

Criminal Law & Procedure > ... > Appeals > Standards of Review > Abuse of Discretion

Criminal Law & Procedure > Sentencing > Restitution

Criminal Law & Procedure > ... > Appeals > Standards of Review > De Novo Review

Criminal Law & Procedure > ... > Appeals > Standards of Review > Clear Error Review

HN11[] **Standards of Review, Abuse of Discretion**

The Mandatory Victims Restitution Act of 1996 (MVRA) requires restitution for any offense against property including any offense committed by fraud or deceit. *18 U.S.C.S. § 3663A*. Restitution is based on actual loss, not intended or expected loss. The defendant's gain is not a substitute measure under the MVRA, and it is the government's burden to establish the loss amount by a preponderance of the evidence, *18 U.S.C.S. § 3664(e)*. In calculating the restitution award, a sentencing court is not held to a standard of absolute precision. Instead, the restitutionary amount need only have a rational basis in the record. Legal conclusions underpinning restitution awards are reviewed de novo, factual findings for clear error, and orders of restitution on the whole for abuse of discretion.

Criminal Law & Procedure > ... > Appeals > Standards of Review > Plain Error

HN12[] **Standards of Review, Plain Error**

Where a sentencing challenge was not preserved, appellate courts review it for plain error.

Criminal Law & Procedure > Sentencing > Restitution

HN13[] **Sentencing, Restitution**

Booker and its antecedents do not bar judges from finding the facts necessary to impose a restitution order.

Criminal Law & Procedure > Sentencing > Restitution

HN14[] **Sentencing, Restitution**

The Mandatory Victims Restitution Act (MVRA) has no statutory maximum amount and instead tasks the district court with determining the factual amount of loss. *18 U.S.C.S. § 3663A(b)*. As a result, in the MVRA context a judge cannot find facts that would cause the amount to exceed a prescribed statutory maximum.

Criminal Law & Procedure > Sentencing > Restitution

HN15[] **Sentencing, Restitution**

Calculation of restitution is not held to standards of scientific precision.

Counsel: Ignacio Fernández de Lahongrais on brief for appellant Vega-Martínez.

Julie Sonderlund for appellant Garay-Rodríguez.

Steven J. Mintz, Attorney, U.S. Department of Justice, Antitrust Division, with whom Makan Delrahim, Assistant Attorney General, Andrew C. Finch, Principal Deputy Assistant Attorney General, Richard A. Powers, Deputy Assistant Attorney General, Michael F. Murray, Deputy Assistant Attorney General, Stratton C. Strand, Attorney, Antitrust Division, Robert B. Nicholson, Attorney, Antitrust Division, Mark C. Grundvig, Attorney, Antitrust Division, Emma M. Burnham, Attorney, Antitrust Division, and Samson Asiyanbi, Attorney, Antitrust Division, were on brief, for appellee.

Judges: Before Torruella, Thompson, Kayatta, Circuit Judges.

Opinion by: KAYATTA

Opinion

[*47] KAYATTA, Circuit Judge. The two appellants in this case are school-bus operators who contracted with the Caguas, Puerto Rico municipal school system to drive school children to and from school each day. Instead of competing with one another in bidding on routes offered by the municipality in 2013, they gathered together with **[**2]** four other school-bus operators in an old-fashioned bid-rigging and market-allocation conspiracy. In brief, they all agreed on which company would submit the lowest bid on each route, thereby protecting themselves from the price-reducing effects of fair competition. Following trial, conviction, and sentencing on charges of mail fraud and violations of *section 1* of the *Sherman Act*, Luciano Vega-Martínez and René Garay-Rodríguez now appeal, claiming an absence of interstate nexus, insufficiency of the evidence, and assorted other issues. For the following reasons, we affirm.

I.

In 2013, Vega-Martínez, Garay-Rodríguez, and their co-defendants owned competing bus companies that sought to provide busing for low-income students from Caguas to public schools in the area. That year, the municipality announced that it would hold an auction for four-year school-bus-transportation contracts. Rather than submitting competing bids, the conspirators met and agreed to divide up the routes among themselves. For each route, a "winner" was pre-designated, and that "winner" was assured that, at most, only one other bidder would bid on the route (to make it look like there was competition). The other bid, if any, **[**3]** would be a high bid (to allow plenty of room for the winner's non-competitive "low" bid).

After the meeting, bids were submitted. The municipality rejected all of the bids and instead negotiated contracts with each of the low bidders without the benefit of knowing that the low bids were undisciplined by fair competition. The municipality then sent award letters to the successful defendants in the mail. Over a year later, news of the bid rigging leaked. Worse yet for the defendants, it turned out that one **[*48]** of the bus-company owners, Raquel Aldea-Rodríguez, had taped the meeting at which the scheme was put together. In May 2015, the defendants were charged in an indictment alleging conspiracy to restrain trade (*15 U.S.C. § 1*), conspiracy to commit mail fraud (*18 U.S.C. § 1349*), and substantive mail fraud counts (*18 U.S.C. § 1341*). After a seven-day trial, all of the defendants were convicted on all of the charged counts. The defendants made *Rule 29* motions, which were all denied. They were each sentenced to a prison term of one year and one day, plus a year of supervised release.

The district court then allowed the parties to separately brief the issue of restitution. To calculate the amount of restitution due from each defendant, the court **[**4]** ultimately compared the price paid for each route under the 2014 contracts with the prices paid for the same routes in 2017 following a competitive auction in 2016. Defendants Garay-Rodríguez and Vega-Martínez now appeal. Garay-Rodríguez challenges several aspects of his conviction, and both challenge the restitution amounts set by the district court.

II.

A.

HN1[] The Sherman Act reaches only activities in the flow of interstate commerce or that, "while wholly local in nature," would substantially affect interstate commerce if successful. *McLain v. Real Estate Bd. of New Orleans, Inc., 444 U.S. 232, 241-42, 100 S. Ct. 502, 62 L. Ed. 2d 441 (1980)*; see also *Summit Health, Ltd. v. Pinhas, 500 U.S. 322, 330-32, 111 S. Ct. 1842, 114 L. Ed. 2d 366 (1991)*. When confronted with horizontal agreements to fix prices within a single state, the Supreme Court has based jurisdiction "on a general conclusion that the defendants' agreement 'almost surely' had a market[-]wide impact and therefore an effect on interstate commerce." *Summit Health, 500 U.S. at 331* (quoting *Burke v. Ford, 389 U.S. 320, 322, 88 S. Ct. 443, 19 L. Ed. 2d 554 (1967))*; see also *Goldfarb v. Va. State Bar, 421 U.S. 773, 784-85, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)* (finding an effect on interstate commerce where the "volume of commerce involved" was "substantial" and it was "inseparab[le] . . . from the interstate aspects of [related] transactions").

Garay-Rodríguez nevertheless contends that his bid rigging was beyond the reach of the Sherman Act for three reasons: either the indictment failed to allege a sufficient nexus **[**5]** to interstate commerce, or the proof fell short, or the jury was not instructed that it was required to find such a nexus. For the following reasons, we find that the indictment alleged that the defendants' conduct flowed in and had an effect on interstate commerce, that the evidence at trial supported those allegations, and that there was no plain error in the jury instructions.

1.

Before trial, Garay-Rodríguez and his co-defendants moved to dismiss the Sherman Act count for failure to allege a nexus between the scheme and interstate commerce.[1] The district court denied the motion. ***HN2***[] We review de novo the sufficiency of an indictment. *United States v. Stepanets, 879 F.3d 367, 369 (1st Cir. 2018)*; *United States v. Guerrier, 669 F.3d 1, 3 (1st Cir. 2011)*. In so doing, we do not evaluate the sufficiency of the evidence that the government might have to back up the indictment. *Guerrier, 669 F.3d at 4-5*. **[*49]** Rather, we will find an indictment sufficient if it "apprise[s] the defendant of the charged offense so that the defendant can prepare a defense and plead double jeopardy in any future prosecution for the same offense." *United States v. Rodríguez-Rivera, 918 F.3d 32, 34 (1st Cir. 2019)* (internal citations omitted) (quoting *Stepanets, 879 F.3d at 372*); see also *Fed. R. Crim. P. 7(c)(1)* ("The indictment or the information must be a plain, concise and definite written statement of the essential facts constituting the offense charged."). It may "parrot **[**6]** 'the statutory language to describe the offense, but it must also be accompanied by such a statement of facts and circumstances as to inform the accused of the specific offense with which he is charged.'" *United States v. Parigian, 824 F.3d 5, 9 (1st Cir. 2016)* (quoting *United States v. Savarese, 686 F.3d 1, 6 (1st Cir. 2012))*.

Here, the indictment did more than was necessary. It plainly set forth the elements of the charged offenses, including that the defendants' activities "were within the flow of, and substantially affected, interstate trade and commerce." It further alleged that the bus contracts were funded or supported at least in part by federal funds, and that the buses used by the defendants had all been shipped via interstate commerce. Whether the evidence was sufficient to back up these assertions was a matter for trial. See *Rodríguez-Rivera, 918 F.3d at 34*; *Guerrier, 669 F.3d at 4-5*.

2.

At trial, the government's burden increased. ***HN3***[] It had to submit evidence sufficient to establish an interstate nexus beyond a reasonable doubt. Cf. *United States v. DiSanto, 86 F.3d 1238, 1246 (1st Cir. 1996)* (requiring interstate-commerce element to be proven beyond a reasonable doubt in the context of a *Commerce Clause* challenge). The government carried this burden. It proved, for example, that the funds used to pay the defendants were provided by the federal government under the No Child Left Behind Act. Raymond Rivera-Pacheco, **[**7]** a CPA hired by the Puerto Rico Department of Education, testified that Caguas used $436,566.32 in federal funds from the No Child Left Behind Act to pay for school transportation in 2013-2014. The conspiracy's grab of those federal funds is likely sufficient by itself to establish an interstate nexus, given that the funds flowed in interstate commerce. See *Goldfarb, 421 U.S. at 783-84* (deeming intrastate price fixing by lawyers for title work on federally guaranteed real estate purchases to have an interstate nexus); *Englert v. City of McKeesport, 736 F.2d 96, 98 n.4 (3d Cir. 1984)* (federal financing of construction projects "would be sufficient to meet the jurisdictional requirement" of the Sherman Act); *United States v. Davis, 707 F.2d 880, 884 (6th Cir. 1983)* (federal funding of sheriff's office was sufficient to put sheriff's alleged racketeering within the flow of interstate commerce in *Hobbs Act* context); *United States v. Am. Soc'y of Anesthesiologists, Inc., 473 F. Supp. 147, 151, 156-57 (S.D.N.Y. 1979)* (insurance payments, including some federal and state funds, flowed in interstate commerce); *De Gregorio v. Segal, 443 F. Supp. 1257, 1267 (E.D. Pa. 1978)* (federal nursing home reimbursements flowed in interstate commerce via the

[1] They also argued that Puerto Rico was not a state for purposes of the Sherman Act, but the district court roundly rejected that argument, and it is not raised on appeal.

state of Pennsylvania's Medicaid program). But see *Loan Store, Inc. v. Indep. Food Stamps Assocs., Inc., 671 F. Supp. 844, 848, 848 n.5 (D. Mass. 1987)* (federal funding of the food-stamp program was "far too speculative" a basis for Sherman Act jurisdiction where the complaint "d[id] not allege [an effect on] the flow of food stamps").

[*50] Here we have more **[**8]** than the federal funds alone. The defendants' bid packages identified by vehicle identification number the specific buses that they planned to use for each route. Those buses were all purchased in Florida, meaning that they flowed in interstate commerce. As the government points out, if prices increased substantially, demand would likely fall. For example, Caguas might have responded by merging bus routes or reducing the bus services it used in other ways, resulting in fewer buses purchased by local companies from the continental United States. Cf. *Katzenbach v. McClung, 379 U.S. 294, 299, 85 S. Ct. 377, 13 L. Ed. 2d 290 (1964)* (explaining that race discrimination at restaurants would reduce those restaurants' demand for foodstuffs from outside the state: "The fewer customers a restaurant enjoys the less food it sells and consequently the less it buys.").

Given the evidence that the contracts were funded in at least substantial part by federal funding that had flowed through interstate commerce and that the contracts were carried out by use of goods that flowed through interstate commerce, as well as the resulting inference that the effect of the conspiracy could have been to reduce demand for those goods, the evidence in total was sufficient to establish a nexus with interstate **[**9]** commerce.

3.

Next, Garay-Rodríguez argues for the first time on appeal that the district court's instructions to the jury on interstate commerce were incorrect. ***HN4***[] While we ordinarily review the legal correctness of jury instructions de novo, and issues of "phrasing and emphasis" for abuse of discretion, *United States v. Allen, 670 F.3d 12, 15 (1st Cir. 2012)*, we review forfeited challenges like this one only for plain error, see *Ramirez-Burgos v. United States, 313 F.3d 23, 28 (1st Cir. 2002)*.

Garay-Rodríguez argues that the district court failed to fully explain the requirement that an effect on interstate commerce be "substantial." The district court explained that

> A conspiracy may have an effect on interstate commerce even though some or all of the conspirators do not themselves engage in interstate commerce and have confined their activities within a single state. The precise amount, quantity, or value of interstate commerce involved is unimportant so long as you find that the restraint charged in the indictment or the activities of the parties to the conspiracy had some non-substantial effect upon interstate commerce. The government may establish that there was an effect on interstate commerce in many different ways, and you should take into account all the evidence in determining whether there was, **[**10]** in fact, a substantial effect on interstate commerce.

Trial Tr., Dkt. 235 at 184:3-16, United States v. Rivera-Herrera et al., No. 15-cr-00361 (D.P.R. Feb. 1, 2017) (emphasis added). The district court's statement that the conspiracy needed to have "some non-substantial effect" was obviously incorrect, despite government counsel's sketchy attempt to rewrite the record in its briefing on appeal. See Gov. Br., Appellate Dkt. 60 at 41-42 (quoting the district court as stating that "some no[t] [in]substantial effect" was required (alterations in original)). While it does seem likely to us that the court meant to cite the Supreme Court's statement in McLain that the effect need only be "not insubstantial," the district court plainly stated the opposite. *McLain, 444 U.S. at 246* (emphasis added). Nevertheless, in the very same instruction, and at several other points, the district court repeatedly explained that the **[*51]** effect needed to be substantial. Likely for the same reason that no defense counsel objected to the instruction contemporaneously, a reasonable jury would not have been confused by the district court's isolated and likely apparent mistake considering its numerous correct explanations. On plain-error **[**11]** review, we find no sufficient showing of prejudice.

Garay-Rodríguez also argues that the court should have reiterated the "substantial effect" requirement throughout its jury instructions on interstate commerce. But the court was clear enough. A substantial effect is only one possible way to show a nexus with interstate commerce; activity occurring in the flow of interstate commerce is another. See Summit Health, 500 U.S. at 337 (citing Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 213, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)). The court explained both theories, and when it explained the "substantial effect" test it was always clear that the effect needed to be substantial (with the exception of the slight mistake discussed above); it was not required to repeat the word "substantial" in every single instruction -- especially not in instructions explaining the "flow" theory. Garay-Rodríguez has thus failed to show plain error on the interstate-commerce instructions.

B.

Garay-Rodríguez next argues that the government and the district court allowed him and his co-defendants to be convicted for price fixing even though the charges they faced were for bid rigging and market allocation only. He argues both that this was a prejudicial variance from and that it was a constructive amendment to the indictment. ***HN5***[] We **[**12]** review these claims de novo. See United States v. Godfrey, 787 F.3d 72, 78 (1st Cir. 2015). "A constructive amendment 'occurs where the crime charged has been altered, either literally or in effect, after the grand jury last passed upon it.'" Id. at 79 (quoting United States v. Mubayyid, 658 F.3d 35, 49 (1st Cir. 2011)). A variance -- or a change in a charge that "le[aves] the substance of the charge unaffected" --is permitted unless "it affect[s] the defendant's 'substantial rights[,]' . . . i.e., the right[] to have . . . knowledge of the charge [sufficient] to prepare an effective defense and avoid surprise at trial, and [the right] to prevent a second prosecution for the same offense." Id. (first alteration in original) (quoting United States v. Dowdell, 595 F.3d 50, 67-68 (1st Cir. 2010); United States v. Fisher, 3 F.3d 456, 463 (1st Cir. 1993)).

The crux of these claims is Garay-Rodríguez's argument that the government submitted evidence of price fixing even though the indictment referred to "bid-rigging" and did not expressly allege price fixing. But the fact that price fixing might be mentioned in a bid-rigging case strikes us as perfectly appropriate. Most bid-rigging schemes will necessarily include discussions of price. Here, for example, the scheme involved explicitly deciding which companies would submit the high and low bids on each route. To disallow evidence of those conversations would be nonsensical and **[**13]** would prevent the government from making its bid-rigging case. That evidence was probative of bid rigging, and it was clearly set out in the indictment. See United States v. Reeder, 170 F.3d 93, 105 (1st Cir. 1999). Moreover, bid rigging of the type at issue here is simply one pernicious form of price fixing. Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application ¶ 2005b (3d ed. 2012) ("Bid-rigging schemes are commonly thought to be more harmful than ordinary price fixing because bid-rigging is much easier for cartel members to enforce."). And even if that **[*52]** were not the case, the district court was clear with the jury that it could not convict on bid rigging based solely on evidence of price fixing alone. Despite Garay-Rodríguez's claim, then, a reasonable jury would not have believed that it could convict on evidence of price fixing without more. There was no variance from or constructive amendment to the indictment.

C.

Next, Garay-Rodríguez argues that the district court erred in not allowing him to present evidence on the price negotiations that took place between the "low" bidders and the municipality after the auction. Specifically, he points to limitations imposed on his cross-examination **[**14]** of Luz Ortíz-Peña, the auxiliary director of the Caguas Purchasing and Auctions Department. Before trial, the district court granted the government's motion in limine to exclude evidence or arguments that the defendants' "agreements to rig bids and allocate the market for public school bus transportation were reasonable, or that such agreements had economic, business, or personal justifications." During Garay-Rodríguez's cross-examination of Ortíz-Peña, Garay-Rodríguez asked multiple questions about the process of renegotiating the bids after the auction. His attorney finally asked whether Ortíz-Peña had told an FBI agent that in some cases it was more "cost-effective" to merge two routes. She answered, "That is correct," and when Garay-Rodríguez tried to follow up the court told him to "move on."

Essentially, Garay-Rodríguez is arguing that he should have been permitted to show that the final prices decided post-negotiation with the low bidders were not that bad, even reasonable. ***HN6***[] But Garay-Rodríguez and his co-defendants were charged with bid rigging and market allocation, both per se violations of the Sherman Act. See N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958) ("Among the practices which the courts have heretofore deemed **[**15]** to be unlawful in and of themselves are price fixing, division of markets, group boycotts, and tying arrangements." (internal citations omitted)); Stop & Shop Supermkt. Co. v. Blue Cross & Blue Shield of R.I., 373 F.3d 57, 62 (1st Cir. 2004) (explaining that horizontal bid rigging is a per se violation of antitrust laws). Determining the defendants' liability for that conduct did not require the jury to assess its supposed reasonableness. See United States v. Peake, 804 F.3d 81, 93 n.10 (1st Cir. 2015) ("A per se Section 1 violation is not excused by a showing that the supra-competitive prices were somehow still reasonable."). Garay-Rodríguez did not proffer any other reason why the ultimate cost-effectiveness of the final route allocations was relevant. So, it was well within the district court's discretion under Federal Rule of Evidence 403 to exclude evidence at trial about whether the defendants' conduct really cost Caguas much money.

D.

Garay-Rodríguez argues that the district court abused its discretion by admitting a summary chart depicting the total number and duration of calls and attempted calls between the defendants' telephone numbers daily during the two months within which they were alleged to have planned and implemented the bid rigging. ***HN7***[] Garay-Rodríguez claims that the chart should have been excluded under Rule 403, which allows exclusion of relevant evidence "if **[**16]** its probative value is substantially outweighed by a danger of . . . unfair prejudice, confusing the issues, misleading the jury, undue delay, wasting time, or needlessly presenting cumulative evidence." Fed. R. Evid. 403. We review **[*53]** this evidentiary decision for an abuse of discretion and "usually defer to the district court's balancing." United States v. Whitney, 524 F.3d 134, 141 (1st Cir. 2008) (quoting United States v. Smith, 292 F.3d 90, 99 (1st Cir. 2002)).

There was nothing unfairly prejudicial about the chart. To be sure, it supported an inference that the defendants conspired. But that simply means that the evidence was probative. And to the extent defendants claim that the jurors might have thought the evidence to be more incriminating than that, any such risk was eliminated by the trial judge's instruction pointing out the chart's limitations in not showing who actually was on the calls or what they said.

E.

Garay-Rodríguez's next set of arguments revolves around the overlap between the mail fraud and Sherman Act counts. ***HN8***[] Garay-Rodríguez did not make these arguments below, so we review them for plain error. United States v. Prieto, 812 F.3d 6, 17 (1st Cir. 2016).

First, Garay-Rodríguez seems to argue that the district court should have instructed the jury that it had to find a mail-fraud scheme that was separate and distinct from the Sherman Act conspiracy. That **[**17]** is incorrect. Assuming the jury found that the mail fraud was committed in the process of bid rigging or market allocation, it was free to find that the defendants' conduct both violated the Sherman Act and constituted mail fraud. Cf. United States v. Valdés-Ayala, 900 F.3d 20, 30-34 (1st Cir. 2018) (upholding convictions of both bankruptcy fraud and wire fraud for the same underlying conduct).

Second, Garay-Rodríguez argues that there was not sufficient evidence to convict him for mail fraud. ***HN9***[] Sufficiency challenges like this one that are not preserved through a Rule 29 motion after trial are reviewed under "a particularly exacting variant of plain error review." United States v. Foley, 783 F.3d 7, 12-13 (1st Cir. 2015).

Here the government presented evidence to establish both elements of a mail-fraud conviction: that the defendant "devised or intend[ed] to devise a scheme to defraud (or to perform specified fraudulent acts), and . . . use of the mail for the purpose of executing, or attempting to execute, the fraud (or specified fraudulent acts)." Schmuck v. United States, 489 U.S. 705, 721, 109 S. Ct. 1443, 103 L. Ed. 2d 734 (1989). The government presented clear evidence of a scheme to defraud through the testimony of Aldea-Rodríguez and documentary evidence of the bids, including the defendants' certifications that their bids were "fair and free of collusion or fraud," a statement that the **[**18]** jury obviously decided was false. The government then showed that the scheme required a relevant and foreseeable use of the mail because the defendants received the object of the conspiracy -- their contract award letters -- by certified mail.

HN10[] Proof of mail fraud does not require proof of an actual mailing by the specific defendant. *United States v. Hebshie, 549 F.3d 30, 36 (1st Cir. 2008)* (requiring only that the defendants "cause[d] the use of the mails, which includes reasonably foreseeable mailings" and "use[d] the mails for the purpose, or in furtherance, of executing the scheme to defraud" (emphasis omitted)). Garay-Rodríguez cites *United States v. Berroa, 856 F.3d 141 (1st Cir. 2017)*, for a more restrictive view of the causation requirement. *Id. at 148-52* (explaining that the defendants' submission of falsified test scores did not sufficiently cause the mailing of their resulting medical licenses, which were not a property **[*54]** interest of the governing board). Berroa does not control here, however, where the awarding of the contracts themselves was an alleged financial loss to the municipality and gain to the defendants. See *id. at 152* (explaining that the defendants in Berroa did not profit from their fraud until "in the ensuing years after becoming licensed, [they] practiced medicine for profit"). The district **[**19]** court thus did not plainly err in allowing conviction on this evidence.

Finally, the same evidence described above also supports the defendants' convictions for conspiracy to commit mail fraud, which in addition to "intent to commit the substantive offense" requires "intent to agree" to do so -- whether or not the substantive offense is ultimately carried out. *United States v. Delgado Figueroa, 832 F.2d 691, 694-96 (1st Cir. 1987)*. Aldea-Rodríguez's testimony and tape recording of the meeting at which the conspiracy was hatched, as well as documentation of the defendants' phone calls and bid submissions, sufficiently supports a finding that the defendants agreed to submit fraudulent bids and cause the municipality to send out award letters based on that fraudulent information.

F.

HN11[] The last set of challenges is to restitution amounts of $114,181 for Garay-Rodríguez and $93,055 for Vega-Martínez. The *Mandatory Victims Restitution Act of 1996 ("MVRA")* requires restitution for any "offense against property . . . including any offense committed by fraud or deceit." *18 U.S.C. § 3663A*. Restitution is "based on actual loss, not intended or expected loss," *United States v. Innarelli, 524 F.3d 286, 295 (1st Cir. 2008)*; see also *United States v. Fair, 699 F.3d 508, 513, 403 U.S. App. D.C. 39 (D.C. Cir. 2012)* (explaining that the defendant's gain is not a substitute measure under the MVRA in most circuits), and it is the **[**20]** government's burden to establish the loss amount by a preponderance of the evidence, *18 U.S.C. § 3664(e)*; *United States v. Prochner, 417 F.3d 54, 65 (1st Cir. 2005)*. In calculating the restitution award, "a sentencing court is not held to a standard of absolute precision." *United States v. Salas-Fernández, 620 F.3d 45, 48 (1st Cir. 2010)*. Instead, "the restitutionary amount [need only] have a rational basis in the record." Id. Legal conclusions underpinning restitution awards are reviewed de novo, factual findings for clear error, and orders of restitution on the whole for abuse of discretion. *Innarelli, 524 F.3d at 293*; *Prochner, 417 F.3d at 65-66*.

The district court based the restitution order on the difference between the prices that Caguas paid the defendants for their routes in 2014 after the rigged 2013 auction, and the amount that it paid for those same routes in 2017 after a presumably fair auction in 2016. The court then allocated the loss between the defendants based on their routes. Garay-Rodríguez was ordered to pay $114,181 and Vega-Martínez, $93,055.

1.

Garay-Rodríguez -- but not Vega-Martínez -- first challenges the restitution award under *Apprendi v. New Jersey, 530 U.S. 466, 120 S. Ct. 2348, 147 L. Ed. 2d 435 (2000)*, arguing that the amount of restitution should have been found by the jury instead of by a judge. ***HN12***[] This challenge was not preserved, so we review it for plain error. *Prieto, 812 F.3d at 17*. This circuit has previously held, "like all of the other **[**21]** circuits to consider this question," that *HN13*[] "Booker and its antecedents do not bar judges from finding the facts necessary to impose a restitution order." *United State v. Milkiewicz, 470 F.3d 390, 403-04 (1st Cir. 2006)*. Garay-Rodríguez contends that the Supreme Court has more recently provided **[*55]** guidance to the contrary in *Southern Union Co. v. United States, 567 U.S. 343, 347-50, 132 S. Ct. 2344, 183 L. Ed. 2d 318 (2012)*, but that case is clearly distinguishable. There, the Supreme Court evaluated a statute that imposed a $50,000 fine for each day of violation and found that because each day increased the statutory maximum fine, the jury was required to find the number of days the defendant was in violation. Id. *HN14*[] The MVRA, however, has no statutory maximum amount and instead tasks the district court with determining the factual amount of loss. *18 U.S.C. § 3663A(b)*. As a result, in the MVRA context "a judge cannot find facts that would cause the amount to exceed a prescribed statutory maximum." *United States v. Bengis, 783 F.3d 407, 412 (2d Cir. 2015)* (emphasis added). While this court has not re-evaluated its reasoning in Milkiewicz since Southern Union was decided, several other courts of appeals have already concluded that Southern Union does not overrule their previous holdings that Apprendi does not apply to restitution calculations.[2] See *United States v. Sawyer, 825 F.3d 287, 297 (6th Cir. 2016)*; *United States v. Thunderhawk, 799 F.3d 1203, 1209 (8th Cir. 2015)*; Bengis, 783 F.3d at 412-13; *United States v. Rosbottom, 763 F.3d 408, 420 (5th Cir. 2014)*; *United States v. Green, 722 F.3d 1146, 1149-50 (9th Cir. 2013)*; *United States v. Wolfe, 701 F.3d 1206, 1216-17 (7th Cir. 2012)*; *United States v. Day, 700 F.3d 713, 732 (4th Cir. 2012)*.

The district court's decision to follow the approach espoused in Milkiewicz, which accords with the more recent decisions of our sister circuits, was not plain error.

2.

Moving on from Apprendi, both defendants challenge whether it was reasonable for the district court to use the ostensibly fair prices from the 2016-2017 auction as a benchmark for what fair prices would have been in the 2013-2014 auction. Vega-Martínez makes two primary arguments on that point. First, he argues that there were no losses because after the renegotiation process the municipality ultimately did not pay more than it had initially budgeted for the routes. This first argument falls flat. The fact that the municipality might have been able to afford higher prices than it paid in 2014, even if true, does not preclude the likelihood that it would have paid less had there been a fair auction, which is the relevant question. Along those same lines, Vega-Martínez also argues that he "[h]ad been servicing the same route for around 27 years for basically the same price" that was reached in 2014. But that is not the proper measure either. The municipality presumably **[**23]** opened up the auction in the hope that it could get lower prices, as it was entitled to do and as it did for 2017. Prices from previous years thus are not a legally dispositive benchmark -- especially when those previous years' prices were not decided by auction.

Second, Vega-Martínez argues that the government failed to present any evidence to show that there were other companies and drivers available and willing to provide the services for less in 2014. This second argument is better but ultimately not persuasive. As Vega-Martínez points out, neither of the two cooperating witnesses testified that they would have bid on the routes in question but for the agreement reached at the bid-rigging meeting. There was thus **[*56]** no express evidence to establish that market conditions were equivalent between 2013 and 2016. To back up this point, Garay-Rodríguez points to a provision in the MVRA that allows courts not to award restitution where determining the loss amount would "complicate or prolong the sentencing process to a degree that the need to provide restitution to any victim is outweighed by the burden on the sentencing process." *18 U.S.C. § 3663A(c)(3)(B)*. Although the government interprets this provision to suggest **[**24]** that district courts should not concern themselves with complex facts when awarding restitution, it actually suggests that restitution should not be awarded when it is too difficult to estimate accurately. That is, where the facts are too difficult to discern, the sentencing court's option is to forgo restitution, not to fall back on a factually unsupported calculation method.[3]

---

[2] For the contrary argument, see William M. Acker, Jr., The Mandatory Victims Restitution Act Is Unconstitutional. Will the **[**22]** Courts Say So After Southern Union v. United States?, *64 Ala. L. Rev. 803 (2013)*.

[3] See Jennifer Gerarda Brown, Robbing the Rich to Feed the Poor, 3 Buff. Crim. L. Rev. 261, 275-81 (1999); see, e.g., *United States v. Fountain, 768 F.2d 790, 802 (7th Cir. 1985)* (Posner, J.) (applying the Victim and Witness Protection Act's parallel

HN15[] That being said, "calculation of restitution is not held to standards of scientific precision." *United States v. Sánchez-Maldonado, 737 F.3d 826, 828 (1st Cir. 2013)*. Absent evidence to the contrary, it was permissible for the court to assume that market conditions were roughly equivalent between 2013 and 2016. Only three years passed between the two auctions, and the defendants point to no intervening events that would have seriously disrupted the supply of or demand for bus servicing in that span of time.[4]

Vega-Martínez also argued below that "[t]he routes that were served by [his company] are currently served differently." In particular, he contended that a provider who obtained a route for 2017 used a different number of buses and picked up a different number of students than he had. But Vega-Martínez provided no direct evidence **[**25]** of those contentions. While he did include affidavits from community members about their experiences with the busing services post-2017, the affidavits failed to include any detailed information about the routes.

Absent an evidence-supported argument from the defendants that the routes auctioned for 2017 were materially different than those for 2014, the district court was entitled to presume that the two auctions were for approximately the same services in pretty much the same market.

III.

For the reasons explained above, the defendants' convictions and restitution requirements are affirmed.

End of Document

---

complexity exception to reverse a grant of lost future earnings to a murdered prison guard's family because "projecting lost future earnings has no place in criminal sentencing if the amount or present value of those earnings is in dispute" and such an "elaborate damage calculation requiring expert testimony" was too complicated for the sentencing context (emphasis omitted)).

Opinion by: VICTOR A. BOLDEN

Opinion

[*41] RULING AND ORDER ON MOTIONS TO DISMISS

Success Systems, Inc. and Smart C-Stores, LLC ("Success Systems," "Success," or "Plaintiffs") have sued Excentus Corp. ("Excentus") and Skupos, Inc. ("Skupos") (collectively, "Defendants")under *§§ 1* and *2* of the *Sherman Act*, *§ 3* of the *Clayton Act* and Connecticut causes of action.

Any state law claims against Excentus will be dismissed because the Court lacks jurisdiction over them. While venue also is improper for these state law **[**2]** claims, because the Court lacks jurisdiction over them and they are dismissed, no further action by this Court is necessary. The federal antitrust claims against Excentus will be dismissed on the merits.

As to Skupos, the federal antitrust claims against them also will be dismissed. Having dismissed the federal claims against them, the Court declines to exercise supplemental jurisdiction over any state law claim against Skupos and that claim will be dismissed as well.

Excentus's motion to dismiss for failure to state a claim or in the alternative transfer venue is **GRANTED** to the extent Excentus argues Success Systems failed to state a claim; the motion is **MOOT** to the extent Excentus seeks to transfer venue. Excentus's motion to dismiss for lack of jurisdiction and improper venue is **GRANTED**. Skupos's motion to dismiss for failure to state a claim is **GRANTED**.

For the following reasons, all motions to dismiss are **GRANTED**.

[*42] I. FACTUAL AND PROCEDURAL BACKGROUND

A. Factual Allegations

Success Systems, a corporation based in Connecticut, alleges that this Court has jurisdiction under *28 U.S.C. §§ 1337*, *1331*, *1367* as the "case arises under *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*; *Section 3* and *4* of the *Clayton Act*" and the Court may exercise **[**3]** supplemental jurisdiction over the state law claims accordingly. Am. Compl. ¶ 5. The Court also allegedly has jurisdiction under *28 U.S.C. § 1332* and venue is allegedly proper under *28 U.S.C. § 1391*, *Sections 4* and *12* of the Clayton Act, *15 U.S.C. §§ 15* and *22*. *Id.* ¶¶ 6-7. The Court allegedly "has personal [j]urisdiction over the Defendants as a substantial part of the events or omissions giving rise to the claims occurred in Connecticut, Defendants have transacted a substantial amount of business in Connecticut" and the harm from Defendants' anticompetitive and tortious conduct was felt in Connecticut. *Id.* ¶ 8.

1. The Parties

Success Systems "offers automation solutions for convenience, grocery, liquor, tobacco and gasoline service stations (collectively 'C-stores') across the country." Am. Compl. ¶ 9. One of its programs "is a tobacco loyalty program named 'Smokin' Rebates®.'" *Id.* Success Systems alleges that "Smokin' Rebates is the most diversified and complete solution for compliancy-based rebate reporting system through which major tobacco manufacturers . . . offer rebates to C-store owners who agree to share tobacco sale and scan data from their stores." *Id.* ¶ 10. The program allegedly allows participants "to charge their **[**4]** customers as much as $2 per pack of cigarettes less than other C-stores" that do not enroll or engage in the tobacco rewards program. *Id.* ¶ 11.

The savings allegedly are important to C-stores because tobacco suppliers have reported "a 6-11% drop in tobacco category sales for retailers" that do not participate in the rebate programs. *Id* ¶ 12. Even with declining smoking rates, C-stores allegedly "report that they still derive upwards of 50-65% of their revenue from tobacco products," making the lower priced packs of cigarettes "a critical competitive advantage." *Id.* ¶ 13.

"Smokin' Rebates [allegedly] is one of the few providers of the tobacco rewards programs and is compatible with 13 Point of Sale ("POS") registers" C-stores often use. *Id* ¶ 14.

Excentus "develops and operates loyalty programs[.]" *Id.* ¶ 15. Fuel Rewards, a program operated in conjunction with Shell Oil, allegedly is Excentus's flagship product. *Id.* Fuel Rewards allegedly "gathers all data relating to the sale of fuel and all products sold at Shell service stations, including tobacco products" and then provides the data to Shell. *Id.* ¶ 16. According to Success Systems, "Excentus does not offer or support the tobacco loyalty **[**5]** programs provided by the major tobacco manufactures." *Id.* ¶ 17.

For a Shell service station to participate in a tobacco loyalty program, the service station would allegedly require Excentus "to provide the POS data for all tobacco sales to the tobacco loyalty program provider[.]" *Id.* ¶ 18. This is because "Excentus' Fuel Rewards system [allegedly] is the only system that can gather and provide this data in a Fuel Rewards Shell service station." *Id.*

Johnson Oil allegedly "owns and operates several Shell service stations in Illinois and Iowa[.]" *Id.* ¶ 19. Johnson Oil allegedly participates in the Excentus-operated Fuel Rewards program. *Id.*

[*43] 2. Alleged Oral Contract

In 2017, Johnson Oil allegedly began working with Success Systems to use "several of its back-office productivity solutions ...."*Id.* ¶ 20. In September 2018, Johnson Oil allegedly "decided that it would like to participate in the tobacco loyalty rewards program, and asked Success to implement its Smokin' Rebates program in the Johnson Oil Shell service stations." *Id.* ¶ 21. Excentus allegedly agreed to provide Success Systems with the Fuel Rewards data, in order for the tobacco rebate program to work. *Id.* ¶ 22. Excentus allegedly **[**6]** "contacted Success in Connecticut" which allegedly began "the relationship between the parties which led to the agreement to integrate their respective programs." *Id.*

During that initial call and on subsequent calls, Excentus allegedly "agreed to provide the required data and agreed to integrate Smokin' Rebates with the Shell Fuel Rewards program for Johnson Oil, and the Shell Fuel Rewards program in general[.]" *Id.* ¶ 23. The integration allegedly "would make the Smokin' Rebates available to all Shell Fuel Rewards users." *Id.*

According to Success Systems, this was an "oral agreement made between representatives for Excentus—with at least apparent authority—and representatives from Success." *Id.* ¶ 24. Numerous e-mails sent between the parties allegedly "documented the agreement," *id.* ¶ 25, and "provide evidence of the agreement between the parties, as does Excentus' willingness to provide its confidential data to Success as well as its willingness to provide extensive support for integration," *id.* ¶ 26. The effort in the following months that required cooperative work, the e-mails, and the practice and conduct of the parties allegedly demonstrates "a meeting of the minds and an agreement." **[**7]** *Id.* ¶ 27. Although the agreement "did not provide for any payments either from Excentus to Success or vice versa, it nonetheless bears all the hallmarks of an oral contract." *Id.* ¶ 28.

Allegedly, in exchange for providing the Fuel Rewards data to Success Systems, Excentus obtained "the ability to advertise to other locations ...that if they subscribed to Shell Fuel Rewards, they would now also be able to take advantage of the lucrative Smokin' Rebates tobacco rewards program." *Id.* ¶ 29.

Altria Group, a major tobacco manufacturer, *id.* ¶ 10, has data which indicates providers of loyalty solutions, like Excentus, "are having a difficult time competing in the marketplace without rebate reporting module[s]," especially considering the current high demand of rebate programs, *id.* ¶ 30. An integration of the systems allegedly "made Fuel Rewards more valuable to Shell station owners." *Id.*

The allegedly competitive advantage "a tobacco rewards program provides C-store operators[,]" and Excentus's potential "ability to provide such a program as a part of Fuel Rewards was a direct and a real and direct benefit to Excentus." *Id.* ¶ 31. Success Systems also alleges that Excentus's conspiracy "to replace **[**8]** Success with another tobacco rewards provider" before implementing Smokin' Rebates in sixty-eight Johnson Oil locations further demonstrates "the value Excentus placed on the service that Success was providing." *Id.* ¶ 32.

Success Systems allegedly would have benefitted from a partnership with Excentus "by securing set and subscription fees" from the initial sixty-eight Johnson Oil locations "and then from other Shell Fuel Rewards locations." *Id.* ¶ 33.

Success Systems and Excentus allegedly discussed expanding the Smokin' Rewards **[*44]** program to Excentus's "other non-rewards Shell locations beyond the Johnson Oil stores." *Id.* ¶ 34. Both allegedly had begun installing "Smokin' Rewards at another Fuel Rewards location[s]. . .."*Id.* ¶ 35.

Over a month before Excentus allegedly breached its agreement with Success Systems, Success Systems allegedly "published several announcements on prominent social media platforms advertising that it had integrated Smokin' Rebates with the Shell Rewards network[,]" relying on Excentus that full integration was on the horizon. *Id.* ¶ 36. Excentus allegedly objected to the post for the first time then. *Id.*

Success Systems alleges that Excentus's late-hour objection **[**9]** to its announcement "is further evidence of the agreement to make Smokin['] Rewards available to all Fuel Rewards locations after" after integration to the platforms was complete. *Id.* ¶ 37.

3. Parties' Performance

Between November 2018 and March 2019, "Excentus [allegedly had] worked hand in hand with Johnson Oil, Success, and a company called IRI (which certified data for the Altria tobacco loyalty program) to integrate Smokin' Rebates into the Fuel Rewards program." *Id.* ¶ 38.

Through the process of integration, Excentus, Success Systems, and Johnson Oil allegedly exchanged hundreds of e-mails. *Id.* ¶ 39. Success Systems points to language in e-mails between Success Systems and Excentus allegedly demonstrating the agreement between the two:

- On November 16, 2018, Jamie Hudson, VP at Excentus, allegedly received an e-mail from Kathy Peugh stating "they decided to implement Success' Smokin' rebates program." Mr. Hudson allegedly responded, "have them give me a call we can share a file with them and probably get this going pretty quickly." *Id.* ¶ 40(a);

- On January 18, 2019, Anthony Lezzi at IRI allegedly e-mailed Henrik Ampel at Excentus "requesting that Excentus provide Success with the **[**10]** export files necessary for Success to start getting Smokin' Rebates running at the Johnson Oil locations." *Id.* ¶ 40(b). Mr. Ampel allegedly replied to the "Team" "and provided login credentials to the Excentus SFTP server." *Id.*;

- On January 30, 2019, Andrew Iorio at Success Systems allegedly wrote to Todd Kuhlmeyer at Excentus. *Id.* ¶ 40(d). Mr. Iorio allegedly requested "the StoreSiteID for each of the stores, so I can confirm that we are getting all the stores." *Id.* Mr. Kuhlmeyer allegedly provided "a list of each Johnson site with address and site ID." *Id.*;

- On February 15, 2019, Johnson Oil's Rolando Ducoing allegedly sent an e-mail to Success Systems personnel and Mr. Kuhlmeyer approving of a starting with a specific test cite "for a few days before going live everywhere is a great idea." *Id.* ¶ 40(c); and

- On February 26, 2019, Mr. Ducoing allegedly sent an e-mail to Success Systems informing they "[were] live now[,]" and that they could "run the rewards at store 4 [possibly the above referenced test site] for a couple of days for verification before opening it up to everyone." *Id.* ¶ 40(e).

Success Systems allegedly relied on its agreement with Excentus before entering into a written **[**11]** agreement with Johnson Oil requiring Success Systems to "implement the Smokin' Rewards program in all Johnson Oil locations." *Id.* ¶ 41. As consideration, **[*45]** allegedly "Johnson Oil agreed to pay Success to set up the program and also to administer the program on a monthly basis." *Id.* Success Systems and Johnson Oil allegedly "spent considerable time, effort, and capital in coordinating the setup, implementation, and testing of Smokin' Rebates in conjunction with the Excentus Fuel Rewards program." *Id.* ¶ 42. Following the Johnson Oil rollout, Excentus allegedly "asked if Fuel Rewards could be installed in 18 Johnson Oil BP locations...."*Id.* ¶ 43. Excentus allegedly "offered to provide a price quotation." *Id.*

By March 2019, allegedly "Excentus had provided Success with general data for all 68 Johnson Oil locations, and specific testing data for Johnson Oil location #4[.]" *Id.* ¶ 44. And in early March 2019, an allegedly successful test of the Smokin' Rebates/Fuel Rewards integration occurred. *Id.*

According to Success Systems, "information was attached directly to emails that were sent from Excentus in Texas to Success in Connecticut, and ...Excentus provided Success with login credentials to **[**12]** its internal FTP server and invited Success to login and download the data from Texas to Connecticut." *Id.* ¶ 45.

No in-person meetings occurred between the two companies or "employees or representatives of either company." *Id.* ¶ 46. "All of the communication between Excentus and Success took place over the phone or via email[.]" *Id.*

4. The Aftermath

Success Systems alleges that, "unbeknownst to Success or Johnson Oil, Excentus had been working for some time behind[] the scenes" with Skupos, an alleged competitor of Success Systems. *Id.* ¶ 47. Excentus allegedly sought "to provide a tobacco reward program to its clients (including Johnson Oil) in conjunction with Fuel Rewards and in violation [of] its agreement with Success." *Id.* Excentus allegedly worked to "to conspire and breach the agreement" with Success Systems "to give the tobacco rewards business to Skupos." *Id.* ¶ 48.

Success Systems alleges that "while some personnel at Excentus [worked] hand in hand with Success, Johnson Oil, IRI, and Altria pursuant to the agreement to implement tobacco rewards alongside Shell Fuel Rewards, other or the same people at Excentus" worked to conspire and breach the agreement with Success Systems to **[**13]** "give the tobacco rewards business to Skupos." *Id.* ¶ 48.

Through conspiring and collaborating, "Skupos and Excentus [allegedly] were knowingly and tortuously interfering with the business expectancies and contractual relationships between Success and Johnson Oil, and between Success and Excentus." *Id.* ¶ 49.

Success Systems allegedly "has reason to believe that Skupos and Excentus were sharing Success's proprietary processes to improve Skupos' offering, which is [allegedly] far inferior to that of Smokin' Rebates." *Id.* ¶ 50. Excentus terminated the agreement only after "Success [allegedly] had successfully certified the process, and Excentus and Skupos extracted all of Success's information, that Excentus terminated the agreement." *Id.*

Allegedly after Skupos and Excentus finalized their own agreement, "Excentus abruptly informed Success that it had no intention of living up to its agreement to integrate Smokin' Rebates with Fuel Rewards." *Id.* ¶ 51.

Then, Excentus allegedly "informed Johnson Oil that despite its agreement with Success, the only way it would be able to integrate tobacco rewards with Shell **[*46]** Fuel Rewards" was with Skupos, "Success' direct competitor[.]" *Id.* ¶ 52.

Success Systems **[**14]** allegedly "invested over four months ...of time and effort in integrating and gaining certification of Smokin' Rebates into the Fuel Rewards program not only for the sixty-eight Johnson Oil locations, but to offer the newly integrated Smokin' Rebates program to all of the Shell Fuel Rewards location[s]." *Id.* ¶ 54. According to Success Systems, anything less than integrating with all Shell Fuel Rewards locations "would not justify the investment." *Id.*

Success Systems allegedly "proceeded with the understanding that" after spending time and effort on the Fuel Rewards/Smokin' Rebates integration, "Excentus would allow it to offer the program to other Shell Fuel Rewards locations." *Id.* ¶ 55.

Success Systems allegedly lost significant revenue from the inability to offer its program to other Shell Fuel Rewards locations. *Id.*

5. The Alleged Antitrust Violations

As the sole provider of the Shell Fuel Rewards programs, Excentus allegedly "gathers all data relating to the sales of fuel and all products sold at Shell Fuel Rewards service stations, including tobacco products, and provides the same to Shell." *Id.* ¶ 57. Excentus then allegedly "is thecustodianof12%ofallC-storesalesdataintheUnitedStates...and **[**15]** 100% of the sales data from the 12,000 Shell Oil stations that use Fuel Rewards." *Id.* ¶ 58. For Shell Oil service stations to remain competitive they "must participate in a tobacco rewards program, [they] must arrange for a tobacco rewards provider—such as Success or Skupos—to receive the data collected by Excentus with respect to the sale of tobacco products and use said data to report sales to major tobacco manufacturers." *Id.* ¶ 59.

After allegedly "entering into this anticompetitve conspiracy and agreement with Skupos," Excentus allegedly notified Johnson Oil and other Fuel Rewards participants that, in order to implement a tobacco rewards program, they allegedly "would have to partner with Skupos and could not use Success' Smokin' Rebates, even though Smokin' Rebates had just [allegedly] successfully undergone a [four] month proofing test with Johnson Oil and was the only tobacco rewards program that actually worked with Fuel Rewards." *Id.* ¶ 62.

Success Systems allegedly has learned from other C-store owners "that Skupos is offering predatory and economically unjustified rates to Fuel Rewards customers" to persuade customers "who would rather use Smokin' Rewards or another provider" **[**16]** to instead use Skupos. *Id.* ¶ 63.

Success Systems alleges "that once it spent four months of time and effort integrating Smokin' Rewards, Excentus would allow it to offer the program to the other Shell Fuel Rewards locations." *Id.* ¶ 55. Success Systems allegedly has lost significant revenue "as a result of being prohibited from offering Smokin' Rebates to other Shell Fuel Rewards users ...."*Id.* Indeed, Success Systems allegedly "agreed to absorb the bulk of its development and implementation cost involved in the Shell Fuel Rewards/Smokin' Rebates integration with the understanding by both Johnson Oil and Excentus that said costs would be recouped through the long-term operation of Smokin' Rebates in the Shell Fuel Rewards network." *Id.* ¶ 56.

Excentus's effective monopoly on 12,000 Shell Oil locations means Excentus "effectively control[s] who can provide tobacco rewards regardless of which tobacco rewards provider the individual Shell Fuel Rewards location wants to use." *Id.* ¶ 60. By restricting the tobacco reward provider **[*47]** to Skupos, "Excentus and Skupos conspired to create a vertical monopoly by which Skupos would be the only provider of tobacco rewards programs to all 12,000 Fuel Rewards **[**17]** locations." *Id.* ¶ 61.

For a Shell C-store to remain competitive "it must participate in a tobacco rewards program" and must have a tobacco rewards provider, like Success Systems or Skupos, "receive the data collected by Excentus with respect to the sale and use said data to report sales to the major tobacco manufacturers." *Id.* ¶ 59.

Success Systems alleges that "both Excentus and Skupos ...deliberately used Success's resources, reputation and cache with Altria and RJ Reynolds for an expedited certification, knowing that that certification would transferred to Skupos." *Id.* ¶ 64. Skupos, even now, allegedly "struggles with RJ Reynolds and ITG certifications, only having a small percentage of their customer base certified on those platforms." *Id.*

Skupos allegedly can implement "predatory and economically unjustifiable pricing as a means of pushing others out of the tobacco rebates market because it is backed by investors" who can absorb the short-term loss "in exchange for a monopoly wherein Skupos is the only viable player in the market and competitors like Success are squeezed out." *Id.* ¶ 65.

Excentus and Skupos allegedly "engage in unethical, unfair, and anticompetitive schemes and strategies **[**18]** in restraint of trade." *Id.* ¶ 66. This activity allegedly suppresses competition and prevents "Success from contracting with any of the 12,000 Shell Rewards locations." *Id.* ¶ 67. Furthermore, this activity allegedly raises "barriers to entry in the relevant Shell Fuel Rewards tobacco rewards market" and ensures Skupos's establishment and perpetuation in the Shell Fuel Rewards market. *Id.* ¶ 68.

Success Systems further alleges that there is "no valid or legitimate business justification" for this anticompetitive and exclusionary conduct. *Id.* ¶ 69. It allegedly evinces a "specific intent to monopolize the Shell Fuel Rewards tobacco rewards market by eliminating, destroying, or foreclosing any meaningful competition[,]" then allowing "Excentus and Skupos to dictate the prices and the terms of the tobacco rewards" provided. *Id.* ¶ 70. Excentus and

Skupos, through their allegedly "intentional, sweeping, and disruptive conduct...[are]willful, malicious, and oppressive." *Id.* ¶ 72.

6. The Alleged Relevant Market

Success Systems alleges that, for the purposes of its antitrust claims, the relevant product market "is the Shell Fuel Rewards tobacco rewards market[,]" allegedly unique, distinct, and **[**19]** not in competition with the broader general tobacco rewards market. *Id.* ¶¶ 73-74. Excentus "control[s] entry and access to the Shell Fuel Rewards market because it controls the data necessary to make a tobacco rewards program function as part of the Shell Rewards program." *Id.* ¶ 75. Excentus allegedly controls entry into the provider of the tobacco rewards program, *id.* ¶ 76, and, similarly, a Shell Fuel Rewards gas station or chain "must purchase a tobacco rewards provider who is part of the Shell Fuel Rewards tobacco rewards market[,]" *id.* ¶ 77. As a result, "tobacco rewards programs which are generally available to gas stations and C-stores cannot be included in the same relevant market," as these tobacco rewards programs are excluded from all Shell Fuel Rewards locations. *Id.* ¶ 78.

The relevant geographic market allegedly includes "the nationwide Shell Fuel Rewards tobacco rewards market and the **[*48]** world-wide tobacco rewards market." *Id.* ¶ 82.

The nature of the limited and controlled market allegedly results in considerable cost "for a Shell Fuel Rewards location to switch to another tobacco rewards provider...."*Id.* ¶ 87. In order for a Shell Rewards user to employ "a tobacco rewards **[**20]** program not sanctioned by Excentus, it [allegedly] would likely have to quit the Shell Fuel Rewards network which would be expensive, administratively onerous, and extremely time consuming." *Id.* It allegedly "would be cumbersome, expensive, inefficient, and in all probability economically unfeasible" for any tobacco rewards provider to integrate without Excentus's systems and data. *Id.* ¶ 88.

Switching providers without Excentus's consent also allegedly "would entail a high information cost." *Id.* ¶ 91. The tobacco rewards programs "are often inherently confusing and opaque" and programs that work with the Excentus program without interfering "would necessarily be experimental, temperamental, and may end up costing more in the short run than a program run with Excentus' permission." *Id.* ¶ 92.

Because of Excentus's alleged market power, "locked-in Shell Fuel Rewards locations are either being exploited by Excentus and Skupos working in concert, or are [in] danger of such an exploitation." *Id.* ¶ 94. "[C]ompetition from the greater tobacco rewards market cannot control or prevent anticompetitive or exclusionary activity in the Shell Fuel Rewards tobacco market." *Id.* ¶ 96. Finally, within **[**21]** the Shell Fuel Rewards tobacco rewards market, allegedly "there is no significant elasticity of demand." *Id.* ¶ 99.

"Excentus and Skupos [allegedly] have market power in the Shell Fuel Rewards tobacco rewards market." *Id.* ¶ 100. Success Systems alleges Excentus has used "its market power to exclude Success and others from the relevant market and instead give its approval and cooperation [to] Skupos[.]" *Id.* ¶ 102. The alleged market power also allegedly means that Excentus and Skupos are "able to dictate fees and costs which are not competitive in the larger tobacco rewards market." *Id.* ¶ 103.

B. Procedural History

On March 27, 2019, Success Systems, Inc., and Smart C-Stores, LLC filed a Complaint against Excentus and Skupos. Compl., ECF No. 1 (Mar. 27, 2019).

On July 17, 2019, after Defendants submitted motions to dismiss for lack of personal jurisdiction and failure to state a claim, Plaintiffs filed an Amended Complaint. Am. Compl., ECF No. 58 (July 17, 2019).

On August 20, 2019, Excentus filed a motion to dismiss for failure to state a claim and, in the alternative, transfer under the first-filed rule. Mot., ECF No. 62 (Aug. 20, 2019) "Mot. to Dismiss Failure to State a Claim"). The filing **[**22]** included a memorandum of law, Excentus Mem., ECF No. 62-1 (Aug. 20, 2019) ("Excentus Failure to State a Claim Mem."), and accompanying exhibits, Exs. 1-9. ECF Nos. 2-10 (Aug. 20, 2019).

On August 20, 2019, Excentus also filed a motion to dismiss for lack of jurisdiction and improper venue. Mot., ECF No. 63 (Aug. 20, 2019) ("Mot. to Dismiss Personal Jur."). The filing included a memorandum of law, Excentus Mem., ECF No. 63-1 (Aug. 20, 2019) ("Excentus Jurisdiction Mem."), and accompanying exhibits, Exs. 1-7. ECF Nos. 2-8 (Aug. 20, 2019).

On September 12, 2019, Skupos submitted a motion to dismiss. Mot., ECF No. 69 (Sept. 12, 2019). The filing included a memorandum, Skupos Mem., ECF No.69-1 (Sept. 12, 2019) ("Skupos Mem."), and a **[*49]** declaration and accompanying exhibits, Exs., ECF No. 69-2 (Sept. 12, 2019).

On September 30, 2019, Plaintiffs timely filed oppositions to both of Excentus's motions to dismiss. *See* Mem. in Opp'n Failure to State a Claim, ECF No. 74 (Sept. 30, 2019) ("Pl. Opp'n Failure to State a Claim"); Mem. in Opp'n Jurisdiction and Venue, ECF No.75 (Sept. 30, 2019) ("Pl. Opp'n Jurisdiction").

On October 15, 2019 Excentus filed two replies to Plaintiffs' opposition memoranda. **[**23]** *See* Reply, ECF No. 76 (Oct. 15, 2019) ("Excentus Reply Failure to State a Claim"); Reply, ECF No. 77 (Oct. 15, 2019) ("Excentus Reply Jurisdiction").

On October 21, 2019, Plaintiffs timely opposed Skupos's motion to dismiss. Opp'n Mem., ECF No. 78 (Oct. 21, 2019) ("Pl. Opp'n Skupos").

On November 11, 2019, Skupos timely submitted its reply to Plaintiffs' opposition. Reply, ECF No. 80 (Nov. 11, 2019) ("Skupos Reply").

On December 20, 2019, Excentus filed a notice of decision in a related case. Notice, ECF No. 82 (Dec. 20, 2019) ("Excentus Notice").

On December 28, 2019, Plaintiffs responded to the notice of decision in a related case. Notice, ECF No. 84 (Dec. 28, 2019) ("Pls.' Notice").

On January 14, 2020, the Court held a hearing on the outstanding motions. Minute Entry, ECF No. 88 (Jan. 14, 2020).

On January 24, 2020, Skupos filed a notice with the Court that the service agreement, although previously expired, had been extended. Notice, ECF No. 91 (Jan. 24, 2020).

On January 27, 2020, Success Systems filed a counter-notice, arguing that because the agreement between Defendants never actually lapsed, there is no reason to consider mootness. Counter-Notice, ECF No. 92 (Jan. 27, 2020).

II. [**24] STANDARD OF REVIEW

A. *Rule 12(b)(2)*

On a motion to dismiss for lack of personal jurisdiction under *Federal Rule of Civil Procedure 12(b)(2)*, the "plaintiff bears the burden of showing that the court has jurisdiction over the defendant." *In re Magnetic Audiotape Antitrust Litig., 334 F.3d 204, 206 (2d Cir. 2003)*. The plaintiff therefore must make a prima facie showing that jurisdiction exists. *Licci ex rel. Licci v. Lebanese Canadian Bank, SAL, 673 F.3d 50, 59 (2d Cir. 2012)*.

"The prima facie showing must include an averment of facts that, if credited by the ultimate trier of fact, would suffice to establish jurisdiction over the defendant." *Id.; see also* *Glenwood Sys., LLC v. Med-Pro Ideal Sols., Inc.,* No. 3:09-cv-956 (WWE), 2010 U.S. Dist. LEXIS 151427, 2010 WL 11527383, at *2 (D. Conn. May 4, 2010) ("At this stage of the proceedings, if the court relies upon pleadings and affidavits, the plaintiff must make out only a prima facie showing of personal jurisdiction, and the affidavits and pleadings should be construed most favorably to the plaintiff."), *aff'd*, 438 F. App'x 27 (2d Cir. 2011) (citing CutCo Indus., Inc. v. Naughton, 806 F.2d 361, 365 (2d Cir. 1986)). A court considers the facts as they existed when the plaintiff filed the complaint. *See id.* (citing *Klinghoffer v. S.N.C. Achille Lauro Ed Altri-Gestione Motonave Achille Lauro in Amministrazione Straordinaria, 937 F.2d 44, 52 (2d Cir. 1991))*.

A court must apply Connecticut's long-arm statute, which provides that "a trial court may exercise jurisdiction over a foreign defendant only if the defendant's intrastate activities meet the requirements both of [the state's long-arm] statute and **[*50]** of the due process clause of the federal constitution." Thomason v. Chem. Bank, 234 Conn. 281, 285-86, 661 A.2d 595 (1995). If the court has personal jurisdiction over the **[**25]** defendant under the long-arm statute, the court will consider whether jurisdiction would comport with the Due Process Clause of the United States Constitution. *See* Licci ex rel. Licci v. Lebanese Canadian Bank, 732 F.3d 161, 168 (2d Cir. 2013); *see also* Lombard Bros., Inc. v. Gen. Asset Mgmt. Co., 190 Conn. 245, 250, 460 A.2d 481 (1983) (explaining that the court need only address due process considerations if it determines that jurisdiction exists under the long-arm statute).

B. *Rule 12(b)(3)*

"In deciding a motion to dismiss based on improper venue, [t]he court must take all allegations in the complaint as true, unless contradicted by defendants' affidavits, and [w]hen an allegation is challenged [a] court may examine facts outside the complaint to determine whether venue is proper." Quinn v. Fishkin, 117 F. Supp. 3d 134, 2015 WL 4635770, at *3 (D. Conn. 2015) (internal quotation marks and citation omitted). "[T]he court must draw all reasonable inferences and resolve all factual conflicts in favor of the plaintiff, who has the burden of showing that venue in the forum is proper." *Id.* (internal quotation marks and citations omitted). "If the venue is not proper, the district court 'shall dismiss, or if it be in the interest of justice, transfer such case to any district or division in which it could have been brought.'" *Id.* (quoting 28 U.S.C. § 1406(a)). "Whether dismissal or transfer is appropriate lies within the sound discretion of the district court." Minnette v. Time Warner, 997 F.2d 1023, 1026 (2d Cir. 1993).

C. *Rule 12(b)(6)*

A complaint **[**26]** must contain a "short and plain statement of the claim showing that the pleader is entitled to relief." Fed. R. Civ. P. 8(a). Any claim that fails "to state a claim upon which relief can be granted" will be dismissed. Fed. R. Civ. P. 12(b)(6). In reviewing a complaint under Rule 12(b)(6), a court applies a "plausibility standard" guided by "two working principles." Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009).

First, "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id.; see also* Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007) ("While a complaint attacked by a Rule 12(b)(6) motion to dismiss does not need detailed factual allegations...a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." (internal citations omitted)). Second, "only a complaint that states a plausible claim for relief survives a motion to dismiss." Iqbal, 556 U.S. at 679. Thus, the complaint must contain "factual amplification ...to render a claim plausible." Arista Records LLC v. Doe 3, 604 F.3d 110, 120 (2d Cir. 2010) (quoting Turkmen v. Ashcroft, 589 F.3d 542, 546 (2d Cir. 2009)).

When reviewing a complaint under Federal Rule of Civil Procedure 12(b)(6), a court takes all factual allegations in the complaint as true. Iqbal, 556 U.S. at 678. A court also views the allegations in the light most favorable to the plaintiff and draws all inferences in the plaintiff's **[**27]** favor. Cohen v. S.A.C. Trading Corp., 711 F.3d 353, 359 (2d Cir. 2013); *see also* York v. Ass'n of the Bar of the City of N.Y., 286 F.3d 122, 125 (2d Cir. 2002) ("On a motion to dismiss for failure to state a claim, we construe the complaint in the **[*51]** light most favorable to the plaintiff, accepting the complaint's allegations as true.")).

A court considering a motion to dismiss under Rule 12(b)(6) generally limits its review "to the facts as asserted within the four corners of the complaint, the documents attached to the complaint as exhibits, and any documents incorporated in the complaint by reference." McCarthy v. Dun & Bradstreet Corp., 482 F.3d 184, 191 (2d Cir. 2007). A court may also consider "matters of which judicial notice may be taken" and "documents either in plaintiffs' possession or of which plaintiffs had knowledge and relied on in bringing suit." Brass v. Am. Film Techs., Inc., 987 F.2d 142, 150 (2d Cir. 1993); Patrowicz v. Transamerica HomeFirst, Inc., 359 F. Supp. 2d 140, 144 (D. Conn. 2005).

III. DISCUSSION

There are three motions before the Court: (1) a motion to dismiss for failure to state a claim and, in the alternative, transfer venue under the first-filed rule submitted by Excentus; (2) a motion to dismiss for lack of personal jurisdiction and improper venue submitted by Excentus; and (3) a motion to dismiss for failure to state a claim submitted by Skupos.

Although Excentus requests that the Court consider the motion to dismiss on the merits, the Court will first consider whether the Court has personal jurisdiction over the **[**28]** Plaintiffs' state law claims. Mot. to Dismiss Personal Jur. at i n.1 ("[T]he Court should consider Excentus Corporation's 12(b)(6) motion first in this case because Excentus' personal-jurisdiction and venue arguments turn, in part, on whether Plaintiffs adequately pled their claims."). Because the Plaintiffs' Amended Complaints suggests diversity of citizenship between the parties, *see* Am. Compl., the Court may have jurisdiction over Plaintiffs' state law claims, even if the federal claims are dismissed. *See* Arbaugh v. Y&H Corp., 546 U.S. 500, 513, 126 S. Ct. 1235, 163 L. Ed. 2d 1097 (2006) (A plaintiff invokes diversity of citizenship under 28 U.S.C. § 1332 "when she presents a claim between parties of diverse citizenship that exceeds the required jurisdictional amount, currently $75,000." (citing 28 U.S.C. § 1332(a)). After considering the jurisdictional issue, the Court will determine if transfer of any state law claims brought against Excentus is appropriate. Next, the Court will examine the substantive claims brought against Excentus and Skupos, to the extent necessary.

If the federal claims are dismissed, and the Court does not otherwise have jurisdiction over any state law claim, the Court will decline to exercise supplemental jurisdiction.

A. Personal Jurisdiction

Under Connecticut's long-arm **[**29]** statute, "a trial court may exercise jurisdiction over a foreign defendant only if the defendant's intrastate activities meet the requirements both of [the state's long-arm] statute and of the due process clause of the federal constitution." Thomason, 234 Conn. at 285-86. If a court has personal jurisdiction over the defendant under the long-arm statute, the court then will consider whether jurisdiction would comport with the Due Process Clause of the United States Constitution. *See* Licci ex rel. Licci, 732 F.3d at 168; *see also* Lombard Bros., Inc., 190 Conn. at 250 (explaining that the court need only address due process considerations if it determines that jurisdiction exists under the long-arm statute).

Connecticut's long arm statute provides that a foreign corporation will be amenable to a suit in this state based on a cause of action arising out of: (1) a contract **[*52]** made or to be performed in Connecticut; (2) business solicited in the state; (3) the production, manufacture, or distribution of goods with the reasonable expectation that they will be used or consumed in the state; or (4) tortious conduct in the state. Conn. Gen. Stat. § 33-929(f). It does not require "that a party transact business within the state to be subject to suit nor does it require a causal connection between the plaintiff's cause of action and the defendant's presence in the state." Tomra of N. Am., Inc. v. Envtl. Prods. Corp., 4 F. Supp. 2d 90, 93 (D. Conn. 1998) (footnote omitted) (citing Thomason, 234 Conn. at 295-97, and Lombard Bros., Inc., 190 Conn. at 253-54). The statute **[**30]** instead requires "a nexus between the cause of action alleged and the conduct of the defendant within the state." Donner v. Knoa Corp., No. 3:01-cv-2171 (JCH), 2002 U.S. Dist. LEXIS 17618, 2002 WL 31060366, at *3 (D. Conn. July 29, 2002).

A court considers several factors

> to determine whether a contract can serve as the basis for personal jurisdiction: (1) "whether the defendant entered into an ongoing contractual relationship with a Connecticut-based plaintiff; (2) whether the contract was negotiated in Connecticut; (3) whether, after executing a contract with the defendant, the defendant visited Connecticut to meet with the plaintiff or communicated with the plaintiff as part of the contractual relationship; and (4) whether the contract contains a Connecticut choice-of-law provision."

*Dunne v. Doyle, No. 3:13-cv-1075 (VLB), 2014 U.S. Dist. LEXIS 102389, 2014 WL 3735619, at *7 (D. Conn. July 28, 2014)* (quoting *Nusbaum & Parrino, P.C. v. Collazo De Colon, 618 F. Supp. 2d 156, 161 (D. Conn. 2009))*.

Excentus argues that there are "no contacts with Connecticut giving rise to personal jurisdiction." Excentus Jurisdiction Mem. at 1. Excentus notes, however, that its memorandum only touches on Success Systems's state law claims, as the Clayton Act authorizes nationwide service for antitrust claims. *Id.* at 1 n.3. In Excentus's view, the Complaint barely mentions personal jurisdiction and makes little effort to connect the factual allegations to this Court's **[**31]** jurisdiction. *Id.* at 9.

Excentus points to Connecticut law which allows a Connecticut court to "exercise personal jurisdiction . . . only if Success can show execution or performance of a contract, or tortious conduct in Connecticut." *Id.* at 10 (citing Conn. Gen. Stat. § 33.929(f)). According to Excentus, no contract was executed or performed in Connecticut, *id.* at 10-11, and no tortious conduct occurred, *id.* at 12-13. For that reason, exercising personal jurisdiction, general or specific, would violate the *Due Process Clause* and would not "comport with notions of fair play and substantial justice." *Id.* 13-14.

Success Systems responds that Connecticut's long-arm statute permits jurisdiction over both its contract and tort claims. Pl. Opp'n Jurisdiction at 3-5. In its view, because Connecticut courts examine whether a contract was made within the state or to be performed within in the state, this Court has jurisdiction. *Id.* at 4. Success Systems points to the fact that Excentus, although in Texas, began the relationship by calling Success Systems in Connecticut, and Excentus also sent data into Connecticut. *Id.* at 5-6. Regarding Excentus' argument that the agreement was created in Texas because Excentus accepted it in Texas, Success Systems responds that this argument is "without support, as the **[**32]** agreement required performance by both parties and entailed no exchange of goods or services for money." *Id.* Moreover, the employees and officers of Success Systems capable of entering an agreement all live **[*53]** in Connecticut. *Id.* Finally, Success Systems argues that it did perform in Connecticut. *Id.* at 6. In its view, the tort claims create jurisdiction in Connecticut because "[f]alse representations emanating from out of state into Connecticut have consistently constituted tortious acts of conduct in Connecticut" for jurisdictional purposes and "Success has alleged numerous tortious acts in Connecticut." *Id.* at 6.

Success Systems also argues that because "the defendant corporation purposefully engaged in the transaction with the plaintiffs, which was to be performed, in part, in Connecticut and that litigation has risen as a result of this transaction" the minimum contacts requirement under the *Due Process Clause* has been satisfied. *Id.* at 8-9. Success Systems argues that traditional notions of fair play and substantial justice would not be offended because Excentus is a larger company, better suited to "the burden of litigation in a foreign state[,]" whereas litigation in a foreign state for Success "would have dire financial **[**33]** implications for the company." *Id.* at 10. Connecticut also "has an interest in protecting its residents from tortious conduct" and "Success clearly has an interest in obtaining relief in Connecticut." *Id.*

In response, Excentus reiterates that any alleged contract was not made or performed in Connecticut. Excentus Reply Jurisdiction at 2. The scope of the alleged agreement, in which Excentus allegedly "agreed to integrate [its] entire Fuel Rewards Program with Success' Tobacco Program[,]" then limits conduct and communications that could support personal jurisdiction. *Id.* at 2. In its view, the relevant conduct and communications do not demonstrate the contract was made in Connecticut, nor is there evidence of performance because "Success simply has no evidence that Success or Excentus performed work or shared information related to any Excentus Fuel Rewards client other than Johnson Oil." *Id.* at 3-4. Excentus notes that Success Systems's response referred only to its misrepresentation-tort based claims and so "failed to meet its burden of establishing [personal jurisdiction]...as to its tortious-interference and CUTPA claims[,]" so those claims should be dismissed. *Id.* at 5.

Excentus further argues that no personal jurisdiction **[**34]** exists under the *Due Process Clause*. *Id.* In its view, Success Systems presents no "evidence that Excentus sought out or otherwise initiated any integration agreement[,]" Excentus' phone calls or emails are nothing "more than mere communications into Connecticut[,]" the communications pertained "only to work requested by" Illinois company Johnson Oil, and "the mere existence of a contract is insufficient to confer personal jurisdiction" over Excentus. *Id.* at 6.

The Court agrees.

Under *Conn. Gen. Stat. § 33-929(f)*, the Court must examine the elements of Plaintiff's cause of action and the totality of the Defendants' contacts with the forum to determine "whether the defendant could reasonably have anticipated being haled into court here." *Am. Wholesalers Underwriting, Ltd. v. Am. Wholesale Ins. Grp., Inc., 312 F. Supp. 2d 247, 253 (D. Conn. 2004)* (quoting *Lombard Bros., Inc., 190 Conn. at 254-55*)). Success Systems is a Connecticut corporation and Smart C-Stores is a Delaware corporation with its place of business in Connecticut. Am. Compl. ¶¶ 1-2. While both parties agree that no formal contract document was signed or agreed upon, Success Systems alleges that an agreement was reached, while Excentus vehemently denies this. The companies were all initially brought together to integrate Smokin' Rebates into sixty-eight Johnson Oil locations. Am. Compl. ¶¶ 20-23.

[*54] In support of its argument **[**35]** that an agreement had been reached with Excentus, Success Systems relies on e-mails relating to the integration and testing of the Johnson Oil sites. Am. Compl. ¶ 40(a)-(d). Success Systems argues that phone calls and e-mails directed into Connecticut from Texas created an oral contract and support its claims of personal jurisdiction through contract. Am. Compl. ¶¶ 22, 25, 34.

Success Systems, however, fails to plead specific factual allegations which support its assertion that an oral contract was created. It refers to the creation of an agreement with Excentus without describing the party discussing the details of the agreement (at either Excentus or Success Systems) or describing in more specific or concrete terms the nature and scope of the agreement. "Complete integration with all Excentus Fuel Rewards locations" is vague and indefinite; this phrase describes neither specific performance requirements of either party nor a timeframe in which the contract would be completed. *See Weiss v. Smulders, 313 Conn. 227, 233-35, 96 A.3d 1175 (2014)* (affirming the lower court's finding that defendant was not in breach of an oral contract after discussions of "working together as two separate companies" and the defendant's indications "that [both plaintiff **[**36]** and defendant] would merge their companies to form a new enterprise" if their current relationship proved successful and the execution of distributorship contract, when plaintiff spent time and money "on marketing and research" for the new company which never came to fruition); *Geary v. Wentworth Labs., Inc., 60 Conn. App. 622, 627, 760 A.2d 969 (2000)* ("[A]n agreement must be definite and certain as to its terms and requirements....So long as any essential matters are left open for further consideration, the contract is not complete." (citation omitted)).

Furthermore, Success Systems points to no specific conversation or date of a conversation which took place where a mutual understanding and mutual assent were reached. *See Dunne, 2014 U.S. Dist. LEXIS 102389, 2014 WL 3735619, at *18* (a binding and enforceable contract requires offer, acceptance, and a mutual understanding which "manifest[s] itself by a mutual assent between the parties" (quoting *Housing Auth. v. DeRoche, 112 Conn. App. 355, 370, 962 A.2d 904 (Conn. App. Ct. 2009))*; Am. Compl. ¶ 27 ("In short, given the words, emails, practice and conduct of the parties over the ensuing months is that of [sic] parties working in concert and pursuant to a meeting of the minds and an agreement."). While "there is no bright line rule describing the essential elements of any and all enforceable contracts, [w]hether a term is essential turns 'on the particular **[**37]** circumstances of each case.'" *111 Whitney Ave., Inc. v. Comm'r of Mental Retardation, 70 Conn. App. 692, 701, 802 A.2d 117 (Conn. App. Ct. 2002)* (quoting *Willow Funding Co., L.P. v. Grencom Assocs., 63 Conn. App. 832, 845, 779 A.2d 174 (Conn. App. Ct. 2001))*.

To the extent that Success Systems relies on its partial performance, Success Systems makes no effort to distinguish the work performed to fulfill the terms of its contract with Johnson Oil from the alleged oral contract with

Excentus. Instead, it relies on its partial performance. "The outer boundaries of what qualifies as a contemplated performance are broad...'*incidental* acts of performance of contracts in [Connecticut] would come within [Connecticut's] statute' when the defendant also has other significant contacts with" Connecticut. *Samelko v. Kingstone Ins. Co., 329 Conn. 249, 261, 184 A.3d 741 (2018)* (emphais in original).

While "to be performed" incorporates contemplated work and does not require the work to have actually been performed, **[*55]** *id. at 258*, without more specific allegations as to work done specifically for Excentus, Success Systems's factual allegations of partial performance are too vague to support the existence of an oral contract or that partial performance was begun for an agreement with Excentus, *see* *Twombly, 550 U.S. at 558* ("[W]hen the allegations in a complaint, however true, could not raise a claim of entitlement to relief, this basic deficiency should ...be exposed at the point of minimum expenditure of time and money **[**38]** by the parties and the court." (internal quotation marks and citation omitted)); *see also* *Weiss v. Smulders, 313 Conn. 227, 235 n.4, 96 A.3d 1175 (2014)* (rejecting a breach of oral contract claim finding "that the plaintiffs failed to provide sufficient evidence to demonstrate that there was a meeting of the minds as to the clear and definite terms of the merging of the parties' companies").

It is also significant that a contract allegedly so important or so lucrative to Success System's business was not reduced to a written agreement, suggesting that there was not a meeting of the minds on the essential terms of the oral contract. *See* *111 Whitney Ave., 70 Conn. App. at 701* (comparing the defendant's conduct in the action with the "defendant's undisputed practice of contracting with service providers...on the basis of formal requests for proposal" and finding that provided "further support for the defendant's argument that the essential terms of the [] contracts were not finalized because they were never in a written agreement").

In *Samelko*, under Connecticut's long-arm statute, the court allowed a New York corporation to be haled into Connecticut court because the express terms of the insurance policy required payment for any accident in "any location within the coverage territory, **[**39]** which span[ned] the United States." *329 Conn. at 261*. Here, the absence of a written, formal agreement specifying the terms of performance in Connecticut undercut the significance of whatever work Success Systems alleges was accomplished in Connecticut. *See id.* ("In other words, when the contract expressly contemplates providing a defense and indemnification in Connecticut, it anticipates a host of unavoidable performances in Connecticut.").

Success Systems's attempt to establish personal jurisdiction through tort also falls short. *Conn. Gen. Stat. § 33-929(f)(4)* allows a finding of personal jurisdiction "out of tortious conduct in [Connecticut], whether arising out of repeated activity or single acts, and whether arising out of misfeasance or nonfeasance." Connecticut courts have rejected the argument that "a tort 'should be deemed to have been committed in Connecticut' simply because 'the injury is felt in Connecticut.'" *Fleming v. HD Supply Waterworks, Ltd., No. 3:16-cv-2081 (AWT), 2018 U.S. Dist. LEXIS 196229, 2018 WL 5993914, *3 (D. Conn. Oct. 15, 2018)* (quoting *Am. Wholesalers Underwriting, Ltd., 312 F. Supp. 2d at 253*)).

Plaintiffs rely on *Teleco Oilfield Servs., Inc. v. Skandia, Ins. Co., Ltd.*, for the proposition that emanations into Connecticut are sufficient to establish personal jurisdiction for tort. *656 F. Supp. 753 (D. Conn. 1987)*. But that case involved an insurance policy with agreed **[**40]** upon terms in place. *Id. at 755*. Personal jurisdiction there was based on (1) the terms of the policy which required payment in Connecticut (making a failure to pay to "occur" in Connecticut); (2) that defendant's "communication of the legal basis for denial of coverage" would have been made into Connecticut; and (3) that "misrepresentations of coverage" also would have been made into Connecticut. *Id. at 758*. Again, as noted **[*56]** above, the existence of a written agreement—the underlying insurance policy—provided the basis for finding personal jurisdiction, something notably absent here.

Accordingly, Success Systems has not met its burden of establishing personal jurisdiction over Excentus.[1]

---

[1] Because the Court does not have personal jurisdiction through Connecticut's long-arm statute, it need not analyze whether the long-arm statute comports with the *Due Process Clause*. *See* *Licci, 732 F.3d at 168* ("If jurisdiction lies, we consider whether the

B. Improper Venue

28 U.S.C. § 1391 governs venue for all civil actions filed in federal courts. Under that statute, a civil action may be brought in the judicial district in which any defendant resides or is subject to the court's personal jurisdiction, or in the judicial district in which a substantial part of the events giving rise to the action occurred. *28 U.S.C. § 1391(b)*. "[V]enue is proper so long as the requirements of *§ 1391 (b)* are met...." *Atl. Marine Const. Co. v. U.S. Dist. Court for W. Dist. of Tex., 571 U.S. 49, 55, 134 S. Ct. 568, 187 L. Ed. 2d 487 (2013)*. But "[t]he district court of a district in which is filed a case laying venue in the wrong division or district shall **[**41]** dismiss, or if it be in the interest of justice, transfer such case to any district or division in which it could have been brought." *28 U.S.C. § 1406(a)*.

"Whether venue is 'wrong'...depends exclusively on whether the court in which the case was brought satisfies the requirements of federal venue laws[.]" *Atl. Marine, 571 U.S. at 55*. Whether venue is "wrong" therefore is "generally governed by *28 U.S.C. § 1391*[.]" *Id.* After finding that venue is wrong, "[w]hether dismissal or transfer is appropriate lies within the discretion of the district court." *Minnette v. Time Warner, 997 F.2d 1023, 1026 (2d Cir. 1993)*.

28 U.S.C. § 1391(b) provides:

> A civil action wherein jurisdiction is not found solely on diversity of citizenship may, except as otherwise provided by law, be brought only in (1) a judicial district where any defendant resides, if all defendants reside in the same State, (2) a judicial district in which a substantial part of the events or omissions giving rise to the claim occurred, or a substantial part of property that is the subject of the action is situated, or (3) a judicial district in which any defendant may be found, if there is no district in which the action may otherwise be brought.

28 U.S.C. § 1391(b).

Under *Section 1391(b)(1)*, "a corporation is deemed to 'reside' in any judicial district in which it is subject to personal jurisdiction at the **[**42]** time the action is commenced." *Nelson v. Wells Fargo Bank, N.A., No. 17-cv-4045 (LAP), 2019 U.S. Dist. LEXIS 101779, 2019 WL 2514229, at *7 (S.D.N.Y. June 18, 2019)* (quoting *Bell v. Classic Auto Grp., Inc., No. 04 Civ. 0693 (PKC), 2005 U.S. Dist. LEXIS 4413, 2005 WL 659196, at *4 (S.D.N.Y. Mar. 21, 2005))*.

Section 1391(b)(2) requires a "substantial" part, construed strictly, of the events to have occurred in the district where venue is sought. *Gulf Ins. Co. v. Glasbrenner, 417 F.3d 353, 356 (2d Cir. 2005)*. "[F]or venue to be proper, *significant* events or omissions *material* to the plaintiff's claim must have occurred in the district in question, even if other material events occurred elsewhere." *Id. at 357* (emphasis in the original). For a plaintiff **[*57]** to defeat a venue challenge with *§ 1391(b)(2)*, the court must (1) "identify the nature of the claims and the acts or omissions that the plaintiff alleges give rise to those claims" and (2) determine "whether 'significant events or omission to [those] claims . . . have occurred in the district in question.'" *NovaFund Advisors, LLC v. Capitala Grp., LLC., No. 3:18-cv-1023 (MPS), 2019 U.S. Dist. LEXIS 40433, 2019 WL 1173019, at *12 (D. Conn. Mar. 13, 2019)* (alterations in the original) (quoting *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 431 (2d Cir. 2005))*.

Section 1391(b)(3) "indicates that venue may be on [this] subsection only if venue cannot be established in another district pursuant to any other venue provision." *Daniel, 428 F.3d at 434*; *see also* *Rose v. Myers, No. 3:13-cv-419 (MPS), 2013 U.S. Dist. LEXIS 163385, 2013 WL 6073627, at *1 (D. Conn. Nov. 18, 2013)* (finding venue under *§ 1391(b)(3)* improper where plaintiff did "not contend that there is no district in which [the] action may otherwise be brought").

Excentus argues that **[**43]** venue is improper for Success Systems's contract claim under *Rule 12(b)(2)*. Specifically, the alleged contract "would have required nationwide performance from both parties," but this contract

---

district court's exercise of personal jurisdiction over a foreign defendant comports with due process protections established under the United States Constitution.").

claim "hinges on whether Excentus' conduct gave rise to a contract." Excentus Jurisdiction Mem. at 20 (emphasis omitted). And had a contract been formed, breach could only have occurred in Dallas "because Dallas is where Excentus executives decided to do what Success complains about—(1) not partner with Success and (2) not provide Success with confidential Fuel Rewards Program data[.]" *Id.*

Excentus also argues that venue is improper for Success Systems's misrepresentation-based claims and tortious interference claims. The Amended Complaint refers to "decisions Excentus made in Texas and events that unfolded in Illinois," because Success Systems has not pled facts which indicate "Connecticut is a proper venue for its misrepresentation-based claims." *Id.* at 21. Success Systems' tortious-interference claims similarly lacks any factual allegations establishing "any legal connection to Connecticut." *Id.* at 21-22.

Success Systems responds that venue is proper because (1) "Excentus reached out to Success in Connecticut to initiate the **[**44]** integration of the systems" and (2) "all of the work Success performed in furtherance of the agreement between the parties was conducted in Connecticut." Pl. Opp'n Jurisdiction at 13. Because these constitute a substantial part of the underlying events, Plaintiffs believe venue is proper in Connecticut. *Id.*

According to Excentus, "Success bears the burden of establishing that venue is proper" in Connecticut and has failed to do so. Excentus Reply Jurisdiction at 6.

The Court agrees.

Venue is improper under *Section 1391(b)(1)* because the Court lacked personal jurisdiction over either defendant at the start of this action, nor do any of the defendants reside in Connecticut. Plaintiff does not argue that there is no other venue in which this action can be brought, making *Section 1391(b)(3)* inapplicable.

Success Systems relies on *28 U.S.C. § 1391(b)(2)* for proper venue. But *Section 1391(b)(2)* permits venue in "a judicial district in which a substantial part of the events or omissions giving rise to the claim occurred . . . ." While Success Systems describes Excentus reaching out into Connecticut to execute the agreement, the alleged communication relates to the execution of the agreement with Johnson Oil. Am. Compl. ¶ 40; *see also* *Gulf Ins. Co., **[*58]** 417 F.3d at 357* (cautioning district courts "to **[**45]** take seriously the adjective 'substantial'" and "to construe the venue statute strictly"). The "substantial part" of performance determination for venue does not mirror the minimum contacts test employed in determining personal jurisdiction. *Gulf Ins. Co., 417 F.3d at 357* (citing *Jenkins Brick Co. v. Bremer, 321 F.3d 1366, 1372 (11th Cir. 2003))*. Furthermore, to the extent that omissions or misrepresentations occurred over the phone by Excentus executives, those omissions or misrepresentations would have occurred in Texas and any breach of an oral contract also would have occurred in Texas.

While Success Systems focuses its argument on the propriety of venue based on its contract claims, relying on the fact that "Excentus reached out to Success in Connecticut to initiate the integration of the systems" and that "Excentus sent data and confidential and proprietary information" to Connecticut, Pl. Opp'n Jurisdiction at 12-13, Plaintiffs fail to establish a prima facie showing of venue under either their contract, tort, or misrepresentation claims, *see* *MAK Marketing, Inc. v. Kalapos, 620 F. Supp. 2d 295, 310 (D. Conn. 2009)* (In a *28 U.S.C. § 1404(a)* venue inquiry, "misrepresentations and omissions are deemed to occur in the district where they are transmitted or withheld, not where they are received." (internal quotation marks omitted) (quoting *In re Nematron Corp. Secs. Litig., 30 F. Supp. 2d 397, 404 (S.D.N.Y. 1998)))*; *Alzal Corp. v. Emporio Motor Grp., L.L.C., No. 13 Civ. 2636 (LTS), 2013 U.S. Dist. LEXIS 105037, 2013 WL 3866633, at *3 (S.D.N.Y. July 26, 2013)* (finding venue improper **[**46]** for a tortious interference claim where a plaintiff did not proffer "sufficient facts to show its tort claim is substantially related to any acts that occurred in New York").

The Court thus dismisses the state law claims against Excentus without prejudice to renewal in the proper venue. *See* *Minnette v. Time Warner, 997 F.2d 1023, 1026 (2d Cir. 1993)* ("Whether dismissal or transfer is appropriate lies within the sound discretion of the district court.").

C. The Clayton Act Claims [2]

Section 3 of the Clayton Act prohibits:

> [A]ny person engaged in commerce . . . to lease or make a sale or contract for sale of goods, wares, merchandise, machinery, supplies, or other commodities . . . for use, consumption, or resale within the United States . . . or fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement, or understanding that the lessee or purchaser thereof shall not use or deal in the goods, wares, merchandise, machinery, supplies, or other commodities of a competitor or competitors of the lessor or seller, where the effect of such lease, sale, or contract for sale or such condition, agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

15 U.S.C. § 14 **[**47]** .

This section of the Clayton Act applies to exclusive-dealing contracts, but "two pre-requisites must be met: the exclusive dealing arrangement must be one for goods or other commodities, as opposed to services, and the agreement putting in place the arrangement must be a lease, sale or contract for sale." *Maxon Hyundai Mazda v. Carfax, Inc., No. 13-cv-2680 (AJN), 2014 U.S. Dist. LEXIS 139480, 2014 WL 4988268, at *6 (S.D.N.Y.* **[*59]** *Sept. 29, 2014)*. Section 3 does not apply to sales of services. *Id.* (citing *Hudson Valley Asbestos Corp. v. Tougher Heating & Plumbing Co., Inc., 510 F.2d 1140, 1145 (2d Cir. 1975))*; *see also* *Innomed Labs, LLC v. ALZA Corp., 368 F.3d 148, 156 (2d Cir. 2004)* (a combination tangible sales of product and services contract is covered by the Clayton Act "if its 'dominant nature' or purpose is the sale of tangible products rather than the transfer of intangible rights or services").

Success Systems alleges violations under the Clayton Act against both Excentus and Skupos for conspiracy to restrain trade and exclusive dealing.

The Court addresses the claim against each defendant in turn.

1. Excetus

Excentus argues that the Clayton Act covers goods, supplies, and commodities and because "Success mentions no commodity offered for sale or lease by Excentus" the claim should be dismissed. Excentus Mem. to Dismiss Failure to State Claim at 30.

Success Systems does not respond to this argument in its opposition memorandum. Pl. Opp'n Excentus Failure **[**48]** to State a Claim.

In its reply, Excentus notes Success Systems's failure to "allege a sale of lease or commodities" and Success Systems's opposition "in no way attempts to address or cure its claims' deficiency because the deficiency is incurable." Excentus Reply Failure to State a Claim at 6.

The Court agrees.

Success Systems's claims revolve around a contract to gather, collect, and report data from convenience stores attached to gas stations. Success Systems, however, has failed to allege in its Complaint or its memorandum in opposition how the antitrust violations it complains of relate to goods or commodities.

Accordingly, Success Systems' Clayton Act claim against Excentus will be dismissed.

---

[2] Because Excentus and Skupos have amended and extended the terms of the underlying agreement, the Court will not consider whether Success Systems's Clayton Act and Sherman Act claims against these defendants are moot. *See* Notice, ECF No. 91 (Jan. 24, 2020).

2. Skupos

Skupos likewise argues that *Section 3* of the Clayton Act applies only to tangible goods. Skupos Mem. at 7. Because nothing in Plaintiffs' Complaint "alleged 'Shell Fuel Rewards tobacco rewards market' bears any resemblance to a tangible good" the claims should be dismissed. *Id.* at 8.

Again, Success Systems does not respond to this argument. Pl. Opp'n Skupos.

In its reply, Skupos contends "Plaintiffs have abandoned their Clayton Act allegations entirely, having made no attempt to address Skupos' arguments **[**49]** that the Clayton Act does not apply, and having scarcely mentioned the Clayton Act at all." Skupos Reply at 2.

As discussed above with respect to Success' claim against Excentus, Success Systems similarly fails to allege a plausible Clayton Act claim against Skupos.

Accordingly, Success' Clayton Act claim against Skupos will be dismissed.

D. The Sherman Act Claims

The remaining claims all relate to *Sections 1* and *2* of the Sherman Act. Under *Section 1* of the Sherman Act, Success Systems alleges a conspiracy to restrain trade in the tobacco rewards market against both Excentus and Skupos. Under both *Sections 1* and *2* of the Sherman Act combined, Success Systems alleges exclusive dealing in the tobacco rewards market against both Excentus and Skupos. Finally, under *Section 2* of the Sherman Act alone, Success Systems alleges monopolization of the tobacco rewards market against Skupos only.

[*60] The Court will address each of these claims in turn.

1. The *Sherman Act § 1* Claims

Section 1 of the Sherman Antitrust Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in the restraint of trade and commerce. . . ." *15 U.S.C. § 1*. Necessary to a *Section 1* violation is the establishment of "a combination or some form of concerted action between **[**50]** at least two legally distinct economic entities." *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 542 (2d Cir. 1993)*. "'In restraint of trade' has been read by the Supreme Court to be limited to 'unreasonable restraints' that are prohibited." *U.S. Airways, Inc. v. Sabre Holdings Corp., 938 F.3d 43, 54 (2d Cir. 2019)* (citing *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*).

Per se unreasonable restraints "include mostly prominently 'horizontal' agreements among competitors to fix prices for their goods or services.'" *Id. at 54-55*. "Restraints that are not unreasonable *per se* are judged under the [fact-specific] 'rule of reason.'" *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)* ("*Amex II*"). The rule of reason attempts "to 'distinguis[h] between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest.'" *Id.* (alterations in the original) (quoting *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007))*.

"[T]he plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market." *Id.* If the plaintiff establishes a restraint, "then the burden shifts to the defendant to show a procompetitive rationale for the restraint." *Id.* If the defendant establishes a procompetitive rationale, "the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could reasonably be achieved through **[**51]** less anticompetitive means." *Id.* Anticompetitive effects may be proven directly or indirectly; "[i]ndirect evidence would be proof of market power plus some evidence that the challenged restraint harms competition." *Id.*

Defining the relevant market and consumers in the relevant market occurs during the first step. *U.S. Airways, 938 F.3d at 55*; *see also* *Amex II, 138 S. Ct. at 2285* ("[C]ourts usually cannot properly apply the rule of reason without an accurate definition of the relevant market."). "A relevant product market consists of 'products that have reasonable interchangeability for the purposes for which they are produced—price, use, and qualities considered[,]'" *PepsiCo, Inc. v. Coca-Cola, Co., 315 F.3d 101, 105 (2d Cir. 2002)* (quoting *United States v. E.I. du Pontde Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*, or an "arena within which significant substitution in consumption or production occurs," *Amex II, 138 S. Ct. at 2285* (citation omitted). Within a broad market, "well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes." *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*. "The goal in defining the relevant market is to identify the market participants and competitive pressures that restrain an individual firm's ability to raise prices or restrict output." *Geneva Pharms. Tech. Corp. v. Barr Labs. Inc., 386 F.3d 485, 496 (2d Cir. 2004)*.

Exclusive dealings arrangements or contracts can satisfy a plaintiff's initial burden of proof demonstrating coordinated **[*61]** action. *Geneva Pharms., 386 F.3d at 508*. "Exclusive **[**52]** dealing arrangements implicate *Section 1* because they have the potential unreasonably to exclude competitors or new entrants from a needed supply, or to allow one supplier to deprive other suppliers of a market for their goods." *Id.* (citing *Jefferson Par. Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 45, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, *abrogated on other grounds by* *Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006))*. "Exclusive dealing is an unreasonable restraint on trade only when a significant fraction of buyers or sellers are frozen out of a market by the exclusive deal." *Jefferson Par., 466 U.S. at 45*.

Proof of market power is not a requirement in all *Section 1* cases. *K.M.B. Warehouse Distribs., Inc. v. Walker Mfg. Co., 61 F.3d 123, 129 (2d Cir. 1995)*. "If a plaintiff can show an actual adverse effect on competition," demonstrating market power is not required. *Id.* "'[W]here the plaintiff is unable to demonstrate such actual effects' . . . 'it must at least establish that defendants possess the requisite market power' and thus the capacity to inhibit competition market-wide." *Id.*

Market power "can be proven directly through evidence of control over prices or the exclusion of competition, or it may be inferred from a firm's large percentage share of the relevant market." *Geneva Pharms., 386 F.3d at 500*. "One traditional way to demonstrate market power is by defining the relevant product market and showing defendants' percentage share of the market." *Todd v. Exxon Corp., 275 F.3d 191, 199 (2d Cir. 2002)*. It also "may be shown by evidence **[**53]** of 'specific conduct indicating the defendant's power to control prices or exclude competition." *K.M.B. Warehouse, 61 F.3d at 129*. It is typically a fact-intensive inquiry. *Id. at 199-200*.

"The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe Co., 370 U.S. at 325*. Interchangeability means roughly equivalent products exist, even if a consumer might have a preference between products the consumer could use either product and it would work effectively. *Queen City Pizza, Inc. v. Domino's Pizza, Inc. 124 F.3d 430, 436 (3d Cir. 1997)*; *see also* *E.I. Du Pont De Nemours, 351 U.S. at 395* ("commodities reasonably interchangeable by consumers for the same purposes"). "Cross-elasticity of demand exists if consumers would respond to a light increase in the price of one product by switching to another product.'" *Todd, 275 F.3d at 201-02* (quoting *AD/SAT v. Assoc. Press, 181 F. 3d 216, 227 (2d Cir. 1999))*. "'[A] single brand of a product or service" may "be a relevant market under the Sherman Act" if no substitute exists for the brand's products or services." *U.S. Airways, 938 F.3d at 66* (quoting *Kodak, 504 U.S. at 482*).

2. The *Sherman Act § 1* Conspiracy to Restrain Trace Claim Against Excentus

Excentus begins its argument discussing the potential relevant market. According to Excentus, "Success pleads no facts indicating that tobacco-loyalty programs provided to **[**54]** Shell gas stations are different from tobacco loyalty programs provided to other brands of gas stations." Excentus Mem. to Dismiss Failure to State a Claim at 23. The relevant question is "whether convenience stores in general might use tobacco-loyalty programs interchangeably." *Id.* at 24. With regards to *Section 1* specifically, Excentus argues that "*Section 1* of the Sherman Act require[s] **[*62]** a plaintiff to show that the defendant has market power in the relevant market" and Success Systems has pled "that Excentus owns only 12% of the market." *Id.* at 26. A 12% market share is insufficient to create an alleged harm to competition, considering "the Supreme Court has held that a 30% market share" is insufficient to allege the same kind of harm to competition. *Id.* In Excentus's view, "Success has not and cannot plausibly allege that Excentus controls prices for tobacco-loyalty programs in general because Excentus has no control over non-Shell gas stations." *Id.* The small percentage of the relevant market and the inability to control prices indicates Excentus does not control "enough of a relevant market for it to have monopoly power." *Id.* at 27.

Additionally, in Excentus's view, Success Systems fails to plead an antitrust injury. *Id.* at 28. "[T]he **[**55]** only injury Success claims to have suffered in that market is losing the competition for a contract with Excentus." *Id.* at 29. This is a loss "from competition[, it] is not an antitrust injury[,]" *id.* at 29, nor is it the "kind of injury Congress enacted the antitrust laws to prevent[,]" *id.* at 28.

Success Systems responds by arguing that "[t]he relevant market refers to the relevant product market and the relevant geographic market" and often requires a fact-intensive inquiry. *Id.* at 22 (citing *PepsiCo, Inc., 315 F.3d at 105*). At the motion to dismiss stage, Success Systems argues that it need only plead a market that is plausible and rational. *Id.* In its view, part of the relevant market inquiry examines the interchangeability and cross-elasticity which Success Systems has adequately pled. *Id.* at 22-23. According to Success Systems, because it "has alleged a relevant market of Shell Fuel Rewards tobacco rewards market" and that "Excentus and Skupos control 100% of this market[,]" Success Systems has adequately pled Excentus's and Skupos's market control to survive a motion to dismiss. *Id.* at 29.

To the extent Excentus argues Success Systems' claim "must fail because it has [plead] a single-brand market[,]" Success Systems responds that a single brand markets can exist **[**56]** "when other branded products may not be reasonably interchangeable[,]" *id.* at 24 (citing *Eastman Kodak Co. v. Image Tech Servs., Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992))*, and that it has sufficiently alleged the *Kodak* factors, *id.* at 25.

Finally, Success Systems argues that it "has alleged full exclusion from the stated relevant market by Excentus and Skupos and has therefore alleged a valid antitrust injury." *Id.* at 31.

Excentus replies that Success System's relevant market claims do not fit into the single brand market, nor has it alleged facts remotely similar to *Kodak*, and again relies on the actual agreement between Excentus and Skupos. Excentus Reply Failure to State a Claim at 6-8.

The Court agrees.

Even if "the [allegedly] exclusive dealing arrangement itself satisfies the *§ 1* requirement of coordinated action[,]" *Geneva Pharms., 386 F.3d at 508*, Success Systems fails "to show how defendants' activities comprised an unreasonable restraint of trade[,]" *Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 96 (2d Cir. 1998)*, and fails to adequately allege a relevant market.[3]

[*63] The rule of reason requires a demonstration of both a relevant market and an unreasonable restraint on trade. *Id.* Success Systems fails on both elements. Success Systems vaguely refers to the "effects on competition" produced by the arrangement between Skupos and Excentus. *See* Am. Compl. ¶¶ 67, 70, 79, 96, 114, 133. **[**57]**

[3] Excentus also argues that it lacks monopoly power in defense of Success Systems's Sherman Act *§ 1* claim. *See* Excentus Mem. to Dismiss Failure to State a Claim at 26-27. This argument will be more fully addressed in the Court's analysis of any alleged monopoly power by Excentus with respect to Success System's *§ 2* claims.

Success Systems discussed Excentus' "high market share and the competitive advantages that could have resulted in *potentially* higher prices, but significantly did not allege that prices were *actually* higher" because of the agreement. Tops, 142 F.3d at 96 (emphasis in original). "The fact that the defendant's actions prevent a plaintiff from competing in a market is not enough, standing alone, to satisfy [the] initial burden of proof." Virgin Atl. Airways, Ltd. v. British Airways PLC, 257 F.3d 256, 264 (2d Cir. 2001). Courts look to factors "like reduced output, increased prices and decreased quality" to determine "whether an actual effect has occurred . . . ." *Id.*

Success Systems, however, merely alleges that Skupos "provides services at a quality and rate out of step with the broader tobacco rewards market and has the ability to dictate rates without the influence of the broader market." Am. Compl. ¶ 112. It offers only slightly more detailed explanations as to quality. Success Systems mentions, again imprecisely, the alleged impact on price. *See* Am. Compl. ¶¶ 114 (Excentus and Skupos "have driven prices and fees out of step with the broader market"); 70 (Excentus and Skupos can "dictate the prices and the terms of the tobacco rewards services provided to the Shell Rewards locations"); **[**58]** 99 (if Excentus and Skupos raise prices "there will be no increased demand for tobacco rewards programs in the general market because the tobacco rewards providers in the general market are barred from participating in the Shell Fuel Rewards tobacco rewards market"). As discussed further below, none of these factual allegations support an actual adverse effect on competition and suggest that Success Systems complains of injury as a competitor and incorrectly defines the relevant market.

Success Systems distinguishes between the general tobacco rewards market and the Shell Fuel Rewards tobacco market in that "Excentus controls entry and access to the Shell Fuel Rewards market because it controls the data necessary to make a tobacco rewards program function as part of the Shell Rewards program." Am. Compl. ¶ 75. In its view, the market is separate and distinct from tobacco rewards programs generally available to gas stations and C-stores because other tobacco rewards programs are not available to Shell Fuel Rewards locations "and the providers of these other tobacco rewards programs cannot offer these programs to Shell Fuel Rewards locations." *Id.*at 78. "[D]emand and competition in the general **[**59]** tobacco rewards markets will not affect the prices charged or the prices paid for tobacco rewards services in the Shell Fuel Rewards tobacco rewards market." *Id.* ¶ 79. And Success alleges that "there is no significant elasticity of demand[,]" increased prices from Excentus and Skupos would not affect the general market "because the tobacco rewards providers in the general market are barred from participating in the Shell Fuel Rewards tobacco rewards market." Am. Compl. ¶ 99.

But Success Systems fails to make any plausible allegations on the critical issue of interchangeability.

While defining a relevant market is a fact intensive inquiry, if a

> **[*64]** plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted.

Chapman v. New York State Div. for Youth, 546 F.3d 230, 238 (2d Cir. 2008) (quoting Queen City Pizza, 124 F.3d at 436). "The test for a relevant market is not commodities reasonably interchangeable by a particular plaintiff, but 'commodities reasonably **[**60]** interchangeable by consumers for the same purposes.'" Queen City Pizza, 124 F.3d at 438 (quoting E.I. du Pont de Nemours, 351 U.S. at 395)). Any "restriction of intrabrand competition must be balanced against any increases in Interbrand competition" because the analysis considers "the relevant market as a whole[.]" K.M.B. Warehouse, 61 F.3d at 128. Success Systems fails to demonstrate how the Shell Fuel Rewards tobacco rewards market is different from the larger market for tobacco rewards generally and should be considered a separate and distinct market. *Cf.* Chapman, 546 F.3d at 238 (finding plaintiffs failed to define a relevant market where plaintiffs "failed to show the market for restraint training services to *child care providers* is any different from the larger market for restraint training services to other businesses, agencies, and organizations" (emphasis in original)).

Success Systems thus alleges harm to a competitor in a market that has interchangeable suppliers (tobacco rewards programs) and interchangeable buyers (c-stores, gas stations, supermarkets). *See* Queen City Pizza, 124

F.3d at 438 ("[T]he dough, tomato sauce, and paper cups that meet Domino's Pizza, Inc. standards and are used by Domino's stores are interchangeable with dough, sauce and cups available from other suppliers and used by other pizza companies . . . Thus, the **[**61]** relevant market . . . cannot be restricted solely to those products currently approved by Domino's Pizza, Inc. for use by Domino's franchisees."); *Cf.* K.M.B. Warehouse, 61 F.3d at 127-28 ("Restrictions on intrabrand competition can actually enhance market-wide competition by fostering vertical efficiency and maintaining the desired quality of a product.").

Moreover, "[m]arket power is the power 'to force a purchaser to do something that he would not do in a competitive market.'" Eastman Kodak, 504 U.S. at 462 (citations omitted). "One traditional way to demonstrate market power is by defining the relevant product market and showing defendants' percentage share of the market." Todd, 275 F.3d at 199. While Success Systems rightly alleges that Excentus has 100% of the market share of the Shell Fuel Rewards market, Success Systems fails to allege Excentus's market power over the properly defined relevant market, encompassing more than just the Shell Fuel Rewards program and including the entire market of convenience, grocery, liquor, tobacco and gasoline service stations. Success Systems thus has not adequately pled Excentus's market power.

Success Systems argues that the Shell Fuel Rewards market is a single-brand market, but Success Systems's argument fares no better under **[**62]** a single-brand market analysis.

Courts rely on the *Kodak* factors to determine if a single brand market is appropriate. The first *Kodak* factor is the "high switching costs faced by a substantial number of customers[.]" Lima LS PLC **[*65]** v. PHL Variable Ins. Co., No. 3:12-CV-1122 (WWE), 2013 U.S. Dist. LEXIS 91849, 2013 WL 3327037, at *5 (D. Conn. July 1, 2013) (citing Commercial Data Servers, Inc. v. In'tl Business Mach. Corp., 262 F. Supp. 2d 50, 71 (S.D.N.Y. 2003)). The second *Kodak* factor requires a plaintiff to plead the "high information costs faced by a substantial number of customers[.]" Lima, 2013 U.S. Dist. LEXIS 91849, 2013 WL 3327037 at *5. The third *Kodak* factor examines the "exploitation of the 'locked-in' customers." Lima, 2013 U.S. Dist. LEXIS 91849, 2013 WL 3327037 at *5.

As to these factors, Success Systems first alleges that "switching to an un-sanctioned company would entail a high information cost" at Shell Fuel Rewards locations. In its view, Excentus has created considerable barriers such that if a user wanted to switch "it would likely have to quit the Shell Fuel Rewards network which would be expensive, administratively onerous, and extremely time consuming." Am. Compl. ¶ 91, 95. Success Systems then alleges that administering or switching to an unsanctioned tobacco rewards program "would entail a high information cost." Am. Compl. ¶ 91. Success Systems alleges that the "inherently confusing and opaque" nature of tobacco rewards programs and "a program that would **[**63]** work on top of and in conjunction with the Excentus program without interfering with the same would necessarily be experimental, temperamental, and may end up costing more in the short run than a program run with Excentus' permission." Am. Compl. ¶ 92. Finally, Success Systems alleges that "the market power of Excentus" has "locked-in Shell Fuel Rewards locations" and are exploited by Excentus and Skupos. Am. Compl. ¶ 94. Success Systems refers back to high switching costs and high information costs in supporting its claim that customers are "locked-in." *Id.* ¶ 97.

But the Shell Fuel Rewards Program is not a single-brand market. Unlike *Kodak*, which dealt with "market power in the primary market" which precluded "the possibility of market power in derivative aftermarkets[,]" no such aftermarket exists here. Eastman Kodak, 504 U.S. at 454-55. Excentus correctly notes that the relevant inquiry is "whether convenience stores in general might use tobacco-loyalty programs interchangeably." Excentus Mem. Failure to State a Claim at 24.

Because the tobacco rewards programs are interchangeable, the relevant market cannot plausibly be limited to Shell gas stations participating in the Shell Fuel Rewards program, and must include **[**64]** all convenience stores, grocery stores, liquor stores, tobacco stores and gasoline service stations capable of using tobacco rewards programs. Success Systems thus has failed to plausible allege its Sherman Act § 1 claim against Excentus. *See* Iqbal, 556 U.S. at 678 ("The plausibility standard is not akin to a probability requirement ....Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief." (internal quotation marks omitted) (quoting Twombly, 550 U.S. at 555-57);

Twombly, 550 U.S. at 558 ("So, when the allegations in a complaint, however true, could not raise a claim of entitlement to relief, this basic deficiency should . . . be exposed at the point of minimum expenditure of time and money by the parties and the court." (internal quotation marks and citation omitted)).

Accordingly, Success' claim of unreasonable restraint of trade against Excentus will be dismissed.[4]

[*66] 2. The Sherman Act § 1 Conspiracy to Restrain Trace Claim Against Skupos

As for Success Systems' Section 1 claims, Skupos argues that Success Systems fails to define any relevant market, which "requires identifying both the relevant product market as well as the relevant geographic market." **[**65]** Skupos Mem. at 11 (citation omitted). "[T]he fact that gas stations and convenience stores that choose to align themselves with the Shell Fuel line must operate under the Fuel rewards program . . . and must then operate under Excentus' terms is irrelevant to defining a relevant market." *Id.* at 14. Skupos further argues that Success Systems fails to "plead facts to support [the] narrow theory" of a single-brand market, supported by alleged "lock-in" factors. *Id.* The Amended Complaint "attempts to define a product market that fits Plaintiffs' personal injury as opposed to a relevant market that meets antitrust pleading standards . . . ." *Id.* at 17 (emphasis omitted).

Skupos argues that Success Systems fails to plead harm to competition, as required to establish an antitrust injury. *Id.* at 8-9. In its view, Success Systems pleads factual allegations that "relate to potential harm to themselves in the particular rewards programs implemented in the Shell stations for which Excentus offers a fuel rewards program." *Id.* Skupos characterizes Success Systems's injury as harm from competition and not to competition generally. *Id.*

Success Systems again argues that defining a relevant market is a fact-intensive injury, unsuitable **[**66]** at this stage of litigation. Pls.' Opp'n Skupos at 6. Success Systems contends that it has alleged "(a) how Shell Fuel Rewards members face high costs to leave the Excentus/SkuPos monopoly on tobacco rewards program . . . (b) the opacity of the tobacco rewards pricing and discount scheme and the overall difficulty in ascertaining relevant information, and (c) the exploitation and potential exploitation" of customers locked into the Skupos tobacco rewards program. *Id.* at 9-10.

Success Systems also states it has alleged a valid antitrust injury by pleading its "full exclusion from the relevant market by Excentus and Skupos.[,]" *id.* at 16, and notes it has pled conspiracy and notes Skupos relies on summary judgment case law, *id.* at 18.

Skupos replies that Success Systems attempts "to define the relevant market as 'Shell Fuel Rewards tobacco rewards market' without factual allegations regarding reasonable interchangeability and cross-elasticity of demand." Skupos Reply at 2. Success Systems's attempt to create a "lock-in theory" market fails because they "do no more than speculate and offer legal conclusions." *Id.* at 4. In its view, Skupos "cannot rely on their conclusory allegations of information and switching costs alone, **[**67]** and there is no question of fact about cross-elasticity." *Id.*

Skupos thus reiterates its arguments that Success Systems has failed to allege an antitrust injury. *Id.* at 6-7.

The Court agrees.

For the same reasons that Success Systems's restraint of trade claim under § 1 of the Sherman Act fails against Excentus, Success Systems also fails to allege plausibly a viable unreasonable restraint of trade claim under § 1 of the Sherman Act against Skupos.

[*67] Accordingly, Success Systems's unreasonable restraint of trade claim under § 1 of the Sherman Act against Skupos will be dismissed.

---

[4] The Court further considers whether Success Systems has sufficiently pled an antitrust injury below in the context of Success Systems's exclusive dealing claim against Excentus.

3. The Sherman Act § 1 and §2 Exclusive Dealing Claims

"An exclusive dealing agreement is 'a contract between a [supplier] and a buyer that forbids the buyer from purchasing the contracted [service] from any other seller." *Conn. Ironworkers Employers' Ass'n v. New England Regional Council of Carpenters, 324 F. Supp. 3d 293, 306 (D. Conn. 2018)* (citations omitted). It is not a *per se* violation of ***antitrust law***, unlike group boycott. *Id.* Exclusive dealing contracts are analyzed under the same rule of reason. *Id.* (quoting *Minn. Ass'n of Nurse Anesthetists v. Unity Hosp., 208 F.3d 655, 660 (8th Cir. 2000))*. Because exclusive dealing arrangements can have pro-competitive purposes and effects, "courts must take care to consider the competitive characteristics of the relevant market." *Geneva Pharms., 386 F.3d at 508*. Not all injuries constitute an antitrust injury, "[f]or instance, **[**68]** an 'exclusive-dealing partner whose business relationship was terminated in favor of another exclusive-dealing partner' is '[c]learly not a victim of antitrust injury." *Conn. Ironworkers, 324 F. Supp. 3d at 306* (citation omitted); *see also* *Geneva Pharms., 386 F.3d at 508* ("Exclusive dealing is an unreasonable restraint of trade and a *§ 1* violation only when the agreement freezes out a significant fraction of buyers or sellers from the market.").

Success Systems alleges that the exclusive agreement entered into by Excentus and Skupos regarding the Shell Fuel Rewards program violates both *Sections 1* and *2* of the Sherman Act. Excentus and Skupos argue that the alleged exclusive agreement was, in fact, non-exclusive

The Court will address each of these claims in turn.[5]

i. The Exclusive Dealing Claim Against Excentus

Excentus again argues Success Systems has failed to plead any plausible antitrust violations. Excentus Mem. Failure to State a Claim at 22. It includes the agreement with Skupos "which explicitly states that [the agreement] is not exclusive." *Id.*; Ex. 3 - Skupos Agreement, ECF No. 62-4 at 2 (Aug. 20, 2019). In its view, Success Systems fails to plead a relevant market, instead limiting the market to the tobacco-loyalty programs only at Shell gas stations. **[**69]** *Id.* at 23. And Success Systems fails to allege that a relevant market exists based on "lock-in factors." *Id.* at 25. According to Excentus, "[t]he 'high switching costs, the lack of information and high information costs, and the exploitation of the locked-in customer' . . . [does] not transform the market for tobacco loyalty programs at Shell gas stations into a relevant market." *Id.*

Success Systems responds that the "realities of the relationship between [Excentus] **[*68]** and Skupos is a question of fact" that must ultimately be determined by a trier of fact. Pl. Opp'n Excentus Failure to State a Claim at 21. Success Systems further argues that it has alleged the market and monopoly power of Excentus in a relevant market, the Shell Fuel Rewards tobacco rewards market. *Id.* at 28-29. In it view, Success Systems has alleged, and Excentus does not contest, "that Excentus and Skupos control 100% of this market." *Id.* at 29. "The exclusive conduct of Defendants in creating a monopoly in, and excluding Success from the relevant market is clearly illegal and anticompetitive." *Id.* at 32.

The Court disagrees.

Success Systems's anticompetitive arguments must be considered in this context: they were contemplating forming the same agreement with Excentus that Skupos ultimately formed. *See* Am. Compl. **[**70]** ¶ 37 (Success's

---

[5] Significantly, the Court has not identified any caselaw — nor have Success Systems identified any caselaw in its filings suggesting the proper standard of review for this allegedly hybrid *§ 1* and *§ 2* of the Sherman Act claim. *See* *15 U.S.C §§ 1-3* (specifying distinct elements for each individual antitrust claim). Consistent with other exclusive dealing claims, however, the Court will analyze this claim using caselaw applying *§ 1* of the Sherman Act. *See* *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*; (analyzing a challenged restraint of trade, which was not per se illegal, under the rule of reason). At best, one treatise suggests "exclusive dealing is subject to challenge under *Section 1* of the Sherman Act . . . and as conduct evidencing a violation of *Section 2* of the Sherman Act." ABA Section of ***Antitrust Law***, ***ANTITRUST LAW*** DEVELOPMENTS, 215 (Debra J. Peralstein et al. eds., 5th ed. 2002).

marketing the integration of Smokin' Rebates with Shell Fuel Rewards and Excentus's lack of an objection to the ads "is further evidence of the agreement to make Smokin Rewards available to all Fuel Rewards locations after the work to integrate the platforms was complete.").

In any event, as discussed above, Success Systems has failed to allege a plausible claim for exclusive dealing because Success Systems fails to allege a relevant market or the antitrust injury felt within that market. *See* *Tampa Elec. Co. v. Nashville Coal, Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)* ("[E]ven though a contract is found to be an exclusive-dealing arrangement, it does not violate the section unless the court believes it probable that performance of the contract will foreclose competition in a substantial share of the line of commerce affected."). Indeed, Success Systems's allegations of injury to competition are vague and conclusory. Am. Compl. ¶¶ 67, 70, 114. *See* *Iqbal, 556 U.S. at 678* ("Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." (citing *Twombly, 550 U.S. at 556*)).

Accordingly, Success Systems' exclusive dealing claim against Excentus will be dismissed.

ii. The Exclusive Dealing Claim Against Skupos

Skupos also argues that Success Systems **[**71]** only repeatedly uses the word "conspiracy" without providing accompanying factual allegations, Skupos Mem. at 22, and again relies on the non-exclusive agreement between Skupos and Excentus to claim exclusive dealing between the two, *id.* at 24. In its view, Success Systems presents "no allegations as to how the alleged (but nonexistent) exclusive agreement between Skupos and Excentus . . . unreasonably restrains trade (as opposed to simply Plaintiffs)." Skupos Mem. at 26.

Success Systems again argues it has adequately alleged its Sherman Act claims. Pl. Opp'n Skupos at 16. In its view, the written agreement between Excentus and Skupos "does not prohibit Excentus from dealing exclusively with Skupos, it only states that Exentus is not required to deal exclusively with Skupos." *Id.* at 17. And the parties' behavior suggest exclusive dealings: (1) "after Excentus and Skupos finalized their agreement Excentus pulled the plug on the ongoing integration, 2) Excentus told Johnson Oil it had to continue the integration with Skupos instead, and 3) Excentus stated in a phone call that the reason it was terminating the agreement with Success was that it had entered into an exclusive relationship with Skupos." *Id.* at 17 (citations **[**72]** omitted). In its view, Success Systems has pled a relevant market, which Excentus and Skupos monopolize, and which Success Systems is **[*69]** excluded from because of their "clearly illegal and anticompetitive conduct." *Id.* at 17-18.

The Court disagrees.

As discussed above, Success Systems has failed to plausibly plead a relevant market or that an exclusive agreement exists, dooming the exclusive agreement claim against Skupos, just as the absence of these allegations, doomed this claim against Excentus.

Accordingly, Success Systems's exclusive dealing claim against Skupos will be dismissed.

4. The Sherman Act *§ 2* Claim

Section 2 of the Sherman Act requires a plaintiff to "establish '(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *PepsiCo, Inc., 315 F.3d at 105* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*). "[E]valuating market power begins with defining the relevant market." *Geneva Pharms., 386 F.3d at 496*. Market power is "[t]he core element of a monopolization claim." *Id.* (citation omitted).

"Market power is the power 'to force a purchaser to do something that he would not do in a competitive market.'" *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 462, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*.

Alternatively, **[**73]** "the ability of a single seller to raise price and restrict output.'" *Id.* (citations omitted). To determine if monopoly is probable, "a court must inquire 'into the relevant product and geographic market and the defendant's economic power in that market.'" *Queen City Pizza, 124 F.3d at 442* (quoting *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993))*. A court gauges interchangeability based on factors like "price, use, and qualities" or "by 'cross elasticity of demand between the product itself and substitutes for it.'" *Id. at 437*. "Cross-elasticity of demand exists if consumers would respond to a light increase in the price of one product by switching to another product.'" *Todd, 275 F.3d at 201-02*.

"To have standing to prosecute private antitrust claims, plaintiffs must show more than that the defendants' conduct caused them an injury." *Balaklaw v. Lovell, 14 F.3d 793, 797 (2d Cir. 1994)* (citing *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535 n.31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*. The injury alleged "should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Id.* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. "[I]njuries resulting from competition alone are not sufficient to constitute antitrust injuries." *Id.* "[A]n 'exclusive-dealing partner whose business relationship was terminated in favor of another exclusive-dealing partner' is '[c]learly not a victim of antitrust injury.'" *Conn. Ironworkers Emp'rs. Ass'n v. New Eng. Reg'l Council of Carpenters, 324 F. Supp. 3d 293, 309 (D. Conn. 2018)* (quoting XI Phillip E. **[**74]** Areeda & Herbert Hovenkamp, et al., ***Antitrust Law*** ¶ 1823, at 199 (2d ed. 2005)).

Success Systems brings this *Section 2* claim only against Skupos.

Skupos argues Success Systems cannot meet the threshold requirements of pleading "harm to competition and not merely a competitor" and delineating "a properly defined, relevant market that includes all reasonably interchangeable **[*70]** goods." Skupos Mem. at 7. In its view, determining a relevant market "requires identifying both the relevant product market as well as the relevant geographic market[.]" *Id.* at 11. And the relevant market proposed by Success "consists of one product sold in one type of market—tobacco rewards programs available in convenience stores attached to Shell stations," *id.* at 12-13, to which the "lock-in" theory regarding a single brand relevant market does not apply, *id.* at 15-16. In Skupos's view, Success Systems "attempts to define a product market that fits Plaintiffs' personal injury as opposed to a relevant market that meets antitrust pleading standards—one that includes all reasonably interchangeable products and is thus designed to test harm to competition and not merely a competitor." *Id.* at 17.

Skupos also argues that Success Systems fails to plead the elements required **[**75]** for a violation of *Section 2* of the Sherman Act: "that there is monopoly power in the relevant market and (2) the monopoly was willfully acquired or maintained through anticompetitive means." *Id.* at 18. In its view, nothing in the Complaint alleges that Skupos has monopoly power over a market share of more than 50%. *Id.* Skupos also argues that Success Systems fails to plead "factual allegations to support any monopolistic intent" as required under *Section 2* of the Sherman Act, *id.* at 21, and has no factual allegations supporting monopoly power, *id.* at 8. Finally, "Plaintiffs have no meaningful response to the actual agreement between Skupos and Excentus, which reveals the non-exclusive nature and short-term duration of the agreement." *Id.* at 9. In Skupos's view, despite knowing the nature of the agreement, Success Systems claims it is entitled to discovery on the conspiracy and exclusive dealing claims, relying on allegations pled on information and belief. *Id.*

Success Systems argues in response that "the relationship between Excentus and Skupos is a question of fact that will be explored in discovery and ultimately determined by a trier of fact[,]" that defining a relevant market is a fact-intensive inquiry, that it has plead a relevant **[**76]** market with reference to interchangeability and cross-elasticity, and that a single-brand market exists here. Pl. Opp'n Skupos at 5-12. In its view, by pleading a relevant market (the Shell Fuel Rewards tobacco rewards market) and alleging Excentus and Skupos "control 100% of this market," Success Systems has adequately alleged monopoly and market power. *Id.* at 13-14.

The Court disagrees.

"Monopoly power under *§ 2* requires, of course, something greater than market power under *§ 1*." *Eastman Kodak, 504 U.S. at 481*. "Monopoly power is 'the power to control prices or exclude competition.'" *Geneva Pharms., 386*

F.3d at 500 (citation omitted). "It can be proven directly through evidence of control over prices or the exclusion of competition, or it may be inferred from a firm's large percentage share of the relevant market." *Id.*

As discussed above, however, Success Systems has failed to plausibly allege a single-brand relevant market. While Success Systems alleges that "Excentus and Skupos' practices have harmed competition in Shell Fuel Rewards tobacco rewards market ...[and] have driven prices and fees out of step with the broader market," Am. Compl. ¶ 114, this conclusory allegation is entitled to no weight and fails to provide the plausible entitlement to relief required, **[**77]** *see* *Iqbal, 556 U.S. at 679* ("[A] court considering a motion to dismiss can choose to begin by identifying pleadings that, because they are no more than conclusions, are not entitled to the assumption of truth."). Indeed, Success **[*71]** Systems's arguments regarding monopolization fail for the same reasons that its arguments about market power and the relevant market have failed above: the absence of plausible and actionable allegations regarding Skupos's share of the relevant general tobacco rewards market, a market, as discussed above, that extends far beyond the Shell Fuel Rewards program. *See id.* ("While legal conclusions can provide the framework of a complaint, they must be supported by factual allegations.").

Accordingly, Success Systems's claim under *Section 2* of the Sherman Act against Skupos will be dismissed.

E. State Law Claims

Supplemental or pendant jurisdiction is a matter of discretion, not of right. *See* *United Mine Workers v. Gibbs, 383 U.S. 715, 726, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966)*. Under federal law, "district courts may decline to exercise supplemental jurisdiction" if, as is the case here, "the district court has dismissed all claims over which it has original jurisdiction." *28 U.S.C. § 1367(c)(3)*; *Carnegie-Mellon Univ. v. Cohill, 484 U.S. 343, 350, 108 S. Ct. 614, 98 L. Ed. 2d 720 (1988)* ("[W]hen the federal-law claims have dropped out of the lawsuit in its early stages and only state-law claims **[**78]** remain, the federal court should decline the exercise of jurisdiction by dismissing the case without prejudice.").

Because the Court will dismiss any viable federal claim brought against Skupos, the Court declines to exercise supplemental jurisdiction over any remaining state law claim against Skupos. *See* *Kolari v. New York-Presbyterian Hosp., 455 F.3d 118, 122 (2d Cir. 2006)* ("[I]n the usual case in which all federal-law claims are eliminated before trial, the balance of factors . . . will point toward declining to exercise jurisdiction over the remaining state-law claims.").

As a result, Success Systems's state law claim against Skupos will be dismissed.

IV. CONCLUSION

For the foregoing reasons, Excentus's motion to dismiss for failure to state a claim or in the alternative transfer venue is **GRANTED** to the extent Excentus argues Success Systems failed to state a claim; the motion is **MOOT** to the extent Excentus seeks to transfer venue. Excentus's motion to dismiss for lack of jurisdiction and improper venue is **GRANTED**. Skupos's motion to dismiss for failure to state a claim is **GRANTED**.

The Clerk of Court is respectfully directed to close this case.

SO ORDERED at Bridgeport, Connecticut, this 1st day of February, 2020.

/s/ Victor A. Bolden

Opinion

ORDER GRANTING MOTION TO DISMISS COUNTS FIVE, SIX, AND EIGHT OF THE SECOND AMENDED COMPLAINT

[ECF No. 10]

Before the Court is Defendant HP Inc.'s ("HP" or "Defendant") motion to dismiss counts five, six, and eight of the second amended complaint ("SAC"). ECF No. 10. Bryant Fonseca ("Plaintiff" or "Fonseca") filed an opposition on October 18, 2019. ECF No. 12. HP filed a reply on October 25, 2019. ECF No. 13. For **[*2]** the reasons discussed below the Court **GRANTS** HP's motion to dismiss counts five, six, and eight.

PROCEDURAL BACKGROUND

On November 29, 2017, an action was commenced in the Superior Court for the State of California, County of San Diego, entitled *Bryant Fonseca v. Hewlett-Packard Company, a Delaware Corporation; HP Enterprise Services, LLC, a Delaware Limited Liability Company; HP, Inc., a Delaware Corporation; and Does 1-100, inclusive*, Case No. 37-2017-00045630-CU-WT-CTL. ECF No. 1-2, Ex. A ("State Complaint").

This case was first removed to this Court on January 11, 2018 (3:18-cv-0071-BEN-JLB) and was remanded back to the Superior Court for the County of San Diego on September 5, 2018. ECF No. 12-1, Ex. 2, Order.

On January 28, 2019, Defendant moved for a stay of the entire action in Superior Court. ECF No. 12-2 (Declaration of Jeffrey L. Hogue or "Hogue Decl.") ¶ 3. On April 12, 2019, the Superior Court for the County of San Diego entered an order staying the case "except with respect to the two 'no poach' antitrust counts (counts 5 and 6)" in light of *Forsyth v. HP Inc., et al.* which is currently pending in the U.S. District Court for the Northern District of California, Civil Action **[*3]** No. 5:16-cv-04775-EJD. *Id.* ¶ 4; ECF No. 1-10 at 38.

On April 22, 2019, Plaintiff filed a First Amended Complaint ("FAC") in response to Defendant's then-pending demurrer to Counts Five and Six for violations of the Cartwright Act and *Section 16600*. ECF 12-2, Hogue Decl. ¶ 4. On August 2, 2019, the Superior Court for the County of San Diego sustained Defendant's demurrer. Order, ECF No. 12-1 at 112.

On August 12, 2019, Plaintiff filed a Second Amended Complaint in San Diego Superior Court (37-2017-00045630-CU-WT-CTL). ECF No. 1-2, Ex. E ("Second Amended Complaint" or "SAC"). The SAC re-alleges the counts in the FAC and additionally alleges an eighth count for violation of the Sherman Act, *15 U.S.C. § 1*. SAC ¶¶ 182-88. In sum, the SAC contained the following eight counts: (1) Disparate Treatment — *California Government Code §§ 12900 et seq.*; (2) Disparate Impact — *California Government Code §§ 12940(A)*, *12941*; (3) Wrongful Termination In Violation Of Public Policy; (4) Failure To Prevent Discrimination — *California Government Code §§ 12900 et seq.*; (5) Violation of the Cartwright Act, *California Bus. & Prof. Code §§ 16720 et seq.*; (6) Violation of *California Bus. & Prof. Code §§ 16600 et seq.*; (7) Unfair Competition — *California Bus. & Prof. Code § 17200, et seq.*; and (8) Violation of the Sherman Act, *15 U.S.C. § 1*. ECF No. 1-2 ¶¶ 101-188. Plaintiff alleges that the SAC also includes additional legal assertions — including Sherman Act violations and that the "no poach" agreement was **[*4]** a *per se* injury to competition — and additional factual allegations regarding Defendant's conduct and their 10-K filing. ECF No. 12 at 9-10.

On September 11, 2019, Defendant removed the case to this Court. ECF No. 1.

FACTUAL BACKGROUND

Plaintiff is a resident of the County of San Diego and was an employee of HP at HP's San Diego site. SAC ¶¶ 3, 18. Defendants are Hewlett-Packard Company, HP Enterprise Services, LLC, and HP Inc. (collectively, "HP"). *Id.* ¶ 1. HP's headquarters and principal place of business are in Palo Alto, California. *Id.* ¶ 4. Non-party 3D Systems Inc. ("3D Systems") is HP's major competitor in the 3D printing industry. *Id.* ¶ 49. Plaintiff also names Does 1 through 100 as defendants as agent, servant, alter ego, and/or employee of the other defendants. *Id.* ¶ 10.

Plaintiff brings this class action on behalf of all individuals employed by HP from January 1, 2016 to present and all current, former, or prospective employees who were at least 40 years old at the time that HP terminated them under HP's 2012 U.S. Workforce Reduction Plan ("WFR"). *Id.* ¶ 84. At the time that he filed the SAC, Plaintiff was fifty-five years old. *Id.* ¶ 17. Plaintiff alleges that HP eliminated the **[*5]** jobs of older, age-protected employees in November 2015 in order to begin replacing them with younger employees; plaintiff additionally alleges that, due to HP's "no-poach" agreement with 3D Systems, Plaintiff and other HP employees were unable to obtain employment at 3D Systems. *Id.* ¶¶ 27-28.

Plaintiff worked for HP's printing and engineering groups for nearly thirty-six years. *Id.* ¶¶ 18-21. According to the SAC, HP purported to use the WFR to terminate employees on a neutral basis. *Id.* ¶ 23. However, Plaintiff alleges that HP used the WFR to terminate older, higher-paid employees and replace them with younger, lower-paid employees. *Id.* On May 8, 2017, Plaintiff's employment with Defendant terminated pursuant to the WFR. *Id.* ¶ 44. HP informed Plaintiff that he would have two weeks as part of his "redeployment period" to find another job with HP. If he were unsuccessful, then HP would provide him with a 60-day "Preferential Rehire Period" during which time Plaintiff would be allowed to apply for jobs within HP and if re-hired, could bypass the conventional rehiring process. *Id.* ¶ 45.

After Plaintiff's termination, he applied for two different positions at HP but did not receive offers. **[*6]** *Id.* ¶ 49. Plaintiff also participated in a four-month career transition program with a career counseling firm, which was offered to him as part of his benefits package under the WFR. *Id.* ¶ 50. In 2017, Plaintiff applied for a job at 3D Systems but did not receive an offer. *Id.* ¶¶ 56, 69. Plaintiff alleges that he, like other HP employees, were denied offers from 3D Systems due to the "no-poach agreement" between HP and 3D Systems. *Id.* ¶¶ 58-63, 67-69.

The SAC alleges that the "no-poach" agreement began in 2016 after 3D Systems poached several of HP's most talented employees. *Id.* ¶¶ 67-69. In 2016, Vyomesh Joshi, a former HP executive, was hired by 3D Systems to become its new CEO. *Id.* ¶ 58.[1] Joshi began poaching HP's top executives and began hiring many top-level HP employees. *Id.* ¶ 59. Plaintiff alleges that Joshi developed a close business relationship with a number of top-level executives at HP, including, Stephen Nigro, who was promoted to become President of HP's 3D Printing unit once Joshi became the CEO of 3D Systems. *Id.* ¶ 60.[2]

However, the SAC alleges that soon after Joshi poached away several of HP's employees, HP and 3D Systems' executives entered into a "cease-fire." And as **[*7]** a result of this "cease-fire," the SAC alleges that both 3D Systems and HP ceased cold calling each other's employees in order to solicit them, and dissuaded their current employees from applying for work at the other company. *Id.* ¶ 61.

As a result of this agreement between HP and 3D Systems, Plaintiff alleges that in August 2016 a group of HP managers informed HP employees that they were required to notify HP if they were offered a position at 3D Systems and that any HP employee offered a position with 3D Systems would be deprived of the severance check provided under the WFR. *Id.* ¶ 65. The SAC additionally alleges that in at least one group meeting, Plaintiff and other HP employees were informed that one of their coworkers "interviewed with 3D Systems" and "that is why HP terminated him." *Id.* ¶ 66. Plaintiff also alleges that an HP manager told Plaintiff and other employees that HP would help them with their job searches if they were laid off, but if they were applying or talking to 3D Systems, the manager did not "want to know about it, because if [he] or [other] managers know about it, you will get 'escorted out'" meaning you will "be immediately terminated and forfeit your right" **[*8]** to the severance package benefits. *Id.* Plaintiff asserts that he would have applied for a job with 3D Systems earlier, but refrained from doing so due to HP managers' warnings that Plaintiff would face repercussions if he applied to 3D Systems. *Id.* ¶ 69.

Plaintiff also alleges that as part of their agreement, HP and 3D Systems ceased hiring one another's employees through third-party recruiters and shared their pay scales to avoid entering a bidding war with one another. *Id.* ¶¶ 62-63.

LEGAL STANDARD

Federal Rule of Civil Procedure ("Rule") 12(b)(6) permits dismissal for "failure to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. Dismissal under *Rule 12(b)(6)* is appropriate where the complaint lacks a

---

1 Defendant notes that Joshi left HP in 2012. ECF No. 10-1 at 9.

2 Plaintiff also alleges that Meg Whitman served as a top executive at HP during the time of the "no-poach agreement," and notes that Whitman was involved in a 2014 settlement with the Department of Justice regarding eBay Inc.'s separate no-poach agreement with Intuit Inc. SAC ¶ 53.

cognizable legal theory or sufficient facts to support a cognizable legal theory. *See* *Balistreri v. Pacifica Police Dep't., 901 F.2d 696, 699 (9th Cir. 1990)*. Under Rule 8(a)(2), the plaintiff is required only to set forth a "short and plain statement of the claim showing that the pleader is entitled to relief," and "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

A complaint may survive a motion to dismiss only if, taking all well-pleaded factual allegations as true, it contains enough facts to "state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*). "A claim has facial **[*9]** plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id.* "In sum, for a complaint to survive a motion to dismiss, the non-conclusory factual content, and reasonable inferences from that content, must be plausibly suggestive of a claim entitling the plaintiff to relief." *Moss v. U.S. Secret Serv., 572 F.3d 962, 969 (9th Cir. 2009)* (quotations omitted). In reviewing a *Rule 12(b)(6)* motion, the Court accepts as true all facts alleged in the complaint, and draws all reasonable inferences in favor of the plaintiff. *al-Kidd v. Ashcroft, 580 F.3d 949, 956 (9th Cir. 2009)*. The Court evaluates lack of statutory standing under the *Rule 12(b)(6)* standard. *Maya v. Centex Corp., 658 F.3d 1060, 1067 (9th Cir. 2011)*.

Where a motion to dismiss is granted, "leave to amend should be granted 'unless the court determines that the allegation of other facts consistent with the challenged pleading could not possibly cure the deficiency.'" *DeSoto v. Yellow Freight Sys., Inc., 957 F.2d 655, 658 (9th Cir. 1992)* (quoting *Schreiber Distrib. Co. v. Serv-Well Furniture Co., 806 F.2d 1393, 1401 (9th Cir. 1986))*. In other words, where leave to amend would be futile, the Court may deny leave to amend. *See* *Desoto, 957 F.2d at 658*; *Schreiber, 806 F.2d at 1401*.

DISCUSSION

Defendant asserts that the fifth, sixth, and eighth counts should be dismissed. Plaintiff also seeks judicial notice **[*10]** of seven exhibits. ECF No. 12-1. The Court first addresses Plaintiff's request for judicial notice, and then addresses Defendant's arguments in turn.

I. Request for Judicial Notice

Plaintiff seeks judicial notice of seven exhibits, which are all either orders or motions filed in the underlying state court action or filed previously in this Court. As a general rule, "a district court may not consider any material beyond the pleadings in ruling on a *Rule 12(b)(6)* motion." *Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)*. However, two exceptions to this rule exist. First, a district court may consider "material which is properly submitted as part of the complaint." *Id.* If the documents are not attached to the complaint, an exception exists if the documents' "authenticity . . . is not contested" and "the plaintiff's complaint necessarily relies" on them. *Id.* (citations omitted). Second, a court may take judicial notice of "matters of public record" under *Federal Rule of Evidence ("Rule") 201*. *Id. at 688-89*. However, under *Rule 201*, a court may not take judicial notice of a fact that is "subject to reasonable dispute." *Fed. R. Evid. 201(b)*. If the contents of a matter of public record are in dispute, the court may take notice of the fact of the document at issue but not of the disputed information contained within. *See* *id. at 689-90*.

Since **[*11]** these documents are either pleadings or documents otherwise recorded by the court, they are the proper subject of judicial notice. *See Burbank-Glendale-Pasadena Airport Auth. v. City of Burbank, 136 F.3d 1360, 1364 (9th Cir. 1998)* (granting judicial notice of pleadings filed in a related state court action); *Reynolds v. Applegate, No. C 10-04427 CRB, 2011 U.S. Dist. LEXIS 14740, 2011 WL 560757, at *1 n.2 (N.D. Cal. Feb. 14, 2011)* (granting judicial notice of documents recorded in the county recorder office since "the Court may properly see them"); *Ewing v. Superior Court of California, 90 F. Supp. 3d 1067 (S.D. Cal. 2015)* (granting judicial notice of documents filed in state court case, including trial court's judgment and opinion of state appellate court); *Amato v. Narconon Fresh Start, No. 3:14-CV-0588-GPC-BLM, 2014 U.S. Dist. LEXIS 150724, 2014 WL 5390196, at *4 (S.D. Cal. Oct. 23, 2014)* ("Orders in federal court cases and state licenses are matters of public record and are capable of accurate and ready determination.").

On a *Rule 12(b)(6)* motion to dismiss, when a court takes judicial notice of another court's opinion, it may do so "not for the truth of the facts recited therein, but for the existence of the opinion, which is not subject to reasonable dispute over its authenticity." *Lee, 250 F.3d at 690*. Accordingly, Plaintiff's request for judicial notice for all seven exhibits is **GRANTED**. The Court takes notice of these documents for the fact of their existence, but not for the truth of the content therein.

II. Sherman Act and Cartwright Act

Under *section 1* of the Sherman Act, "every contract, **[*12]** combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. To state a *section 1* claim, a plaintiff must plead not just ultimate facts (such as a conspiracy), but evidentiary facts which, if true, will prove:

> (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several States, or with foreign nations; (3) which actually injures competition.

Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008) (citing *Les Shockley Racing Inc. v. National Hot Rod Association, 884 F.2d 504, 507 (9th Cir.1989)*; *see also* *Bell Atlantic v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "In addition to these elements, plaintiffs must also plead (4) that they were harmed by the defendant's anti-competitive contract, combination, or conspiracy, and that this harm flowed from an 'anti-competitive aspect of the practice under scrutiny.' This fourth element is generally referred to as 'antitrust injury' or 'antitrust standing.'" *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1197 (9th Cir. 2012)* (citations omitted).

The analysis under California ***antitrust law*** — i.e., the Cartwright Act - "mirrors the analysis under federal law because the Cartwright Act was modeled after the Sherman Act." *Cnty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir.2001)*; *see also* *Nova Designs, Inc. v. Scuba Retailers Ass'n, 202 F.3d 1088, 1091 (9th Cir.2000)*. "[I]f Plaintiffs plead a valid Sherman **[*13]** Act claim, they likewise plead a valid Cartwright Act claim." *In re High-Tech Employee Antitrust Litig., 856 F. Supp. 2d 1103, 1114 (N.D. Cal. 2012)*

1. Contract, Combination, or Conspiracy

The "crucial question" in antitrust claims under *section 1* of the Sherman Act is whether "the challenged anticompetitive conduct stem[s] from independent decision or from an agreement, tacit or express." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 553, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (quoting *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 540, 74 S. Ct. 257, 98 L. Ed. 273 (1954))* (internal quotation marks omitted). To allege an agreement between antitrust co-conspirators, a complaint must "contain enough factual matter (taken as true) to suggest that an agreement was made." *Id. at 556*. In other words, "the complaint must allege facts such as a 'specific time, place, or person involved in the alleged conspiracies' to give a defendant seeking to respond to allegations of a conspiracy an idea of where to begin." *Kendall, 518 F.3d at 1047*. "A bare allegation of a conspiracy is almost impossible to defend against, particularly where the defendants are large institutions with hundreds of employees entering into contracts and agreements daily." *Id. at 1047*. The Ninth Circuit has noted that "discovery in antitrust cases frequently causes substantial expenditures and gives the plaintiff the opportunity to extort large settlements even where he does not have much of a case." *Id.*

Defendant argues that Plaintiff's **[*14]** claim under the Sherman Act must be dismissed for failure to state a claim and for lack of subject-matter jurisdiction. Specifically, Defendant asserts that Plaintiff has failed to meet the standard as set forth by *Kendall* since Plaintiff has provided insufficient facts regarding "who, did what, to whom (or with whom), where, and when." *Id. at 1048*. Defendant observes that Plaintiff has failed to allege any specific communications, meetings, or interactions between Joshi and Nigro; has failed to allege where, when, or how the alleged agreement was reached; which companies were a party to the alleged agreement; and whether the agreement was verbal or written.

Plaintiff responds that he has offered sufficient facts and relies on two cases from the Northern District of California - *In re High-Tech Employee Antitrust Litig., 856 F. Supp. 2d 1103 (N.D. Cal. 2012)* and *In re Animation Workers Antitrust Litig., 123 F. Supp. 3d 1175 (N.D. Cal. 2015)*. In both *High-Tech* and *Animation Workers*, the court held that the plaintiffs sufficiently alleged their Sherman Act claims.

In *High-Tech*, plaintiffs alleged a conspiracy consisting of express bilateral agreements between employers seeking to suppress compensation and restrict employees' mobility in violation of, *inter alia*, the Sherman Act and the Cartwright Act. According to the plaintiffs, senior executives for **[*15]** the defendant companies participated in negotiating, executing, monitoring compliance with, and policing violations of the bilateral agreements. *Id. at 1110*. The *High-Tech* plaintiffs set forth how the "nearly identical agreements, of identical scope, were entered into in various cities and counties in California . . . how these agreements were the subject of a DOJ investigation in which the DOJ found the agreements to be 'per se unlawful' and in which Defendants agreed that the DOJ stated a federal antitrust claim." *Id. at 1117*. The court concluded that the plaintiffs' allegations were sufficient to survive a motion to dismiss.

Similarly, in *Animation Workers*, the plaintiffs pled their allegations with great factual support and detail — including discussion of who drafted the agreement, the specific involvement of the top executives in the drafting of said agreement, and a multitude of email communications describing the enforcement of the no-poach agreement. *Animation Workers, 123 F. Supp. 3d at 1182*.

Plaintiff has alleged in the SAC that HP "agreed not to compete with a specific company (3D Systems), starting at a specific time (2016), pursuant to specific terms, the key players (Joshi and Nigro), and during the corporate culture set by HP's CEO **[*16]** — Meg Whitman — who had a history of entering into these no-poach arrangements." ECF No. 12 at 17. Plaintiff alleges only that HP and 3D Systems' "executives" entered into the no-poach agreement in 2016, without providing details as to who drafted or entered the agreement, or when and where it was agreed upon. SAC ¶ 61. Although Plaintiff references the relationship between Joshi and Nigro, he fails to point to any specific connection or communication between the two with respect to a no-poach agreement. Further, Plaintiff's reference to Meg Whitman's involvement with the 2014 DOJ settlement regarding the agreement between eBay Inc. and Intuit Inc. fails to bolster Plaintiff's Sherman Act claims with respect to HP and 3D Systems. These allegations fall short of the standard of specificity as required by *Kendall*.

a. Parallel Conduct

A plaintiff must allege facts at the pleading stage "tending to exclude the possibility of independent action." *Twombly, 550 U.S. at 544* (internal citation omitted). "[W]hen allegations of parallel conduct are set out in order to make a *§ 1* claim, they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be **[*17]** independent action." *Id. at 557*. Examples of an allegation that would suffice under this standard include "parallel behavior that would probably not result from chance, coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties." *Id. at 556 n. 4* (internal quotation marks omitted). The Ninth Circuit has distinguished permissible parallel conduct from impermissible conspiracy by looking for certain "plus factors." *See, e.g., In re Citric Acid Litig., 191 F.3d 1090, 1102 (9th Cir. 1999)* ("Parallel pricing is a relevant factor to be considered along with the evidence as a whole; if there are sufficient other 'plus' factors, an inference of conspiracy can be reasonable."). Whereas parallel conduct is as consistent with independent action as with conspiracy, plus factors are economic actions and outcomes that are largely inconsistent with unilateral conduct but largely consistent with explicitly coordinated action. *See Twombly, 550 U.S. at 557 n. 4*. If pleaded, they can place parallel conduct "in a context that raises a suggestion of preceding agreement." *In re Musical Instruments & Equip. Antitrust Litig., 798 F.3d 1186, 1194 (9th Cir. 2015)*.

In support of his argument on parallel conduct, Plaintiff relies on the following allegations: (1) HP had no safeguards in place that would prevent it from entering a no-poach **[*18]** agreement (SAC ¶ 70); (2) HP and 3D Systems did not have any type of joint venture agreement subject to legitimate collaboration (SAC ¶ 72); (3) HP immediately terminated and denied severance packages to any employee who interviewed with 3D Systems (SAC ¶¶ 65, 66); (4) HP and 3D Systems ceased cold-calling and hiring each other's employees (SAC ¶¶ 61, 62); and (5) HP and 3D Systems shared their pay scales with each other to assure that they would not be in a bidding war with one another (SAC ¶ 63). ECF No. 12 at 19-20. Plaintiff additionally points to the circumstantial evidence that Nigro and Joshi worked together at HP before Joshi left to work for 3D Systems.

The first allegation does not identify any parallel actions by HP and 3D Systems but instead reveals a unilateral action — or, lack of action — on the part of HP. The second allegation also fails since the absence of joint concerted activity is insufficient to establish covert joint activity. The third allegation reveals unilateral actions by HP which would suggest that there was no agreement between HP and 3D Systems.[3] Additionally, HP offers that rational business reasons can explain this behavior — namely, that HP would want **[*19]** to discourage their employees from applying to 3D Systems since they did not want their employees to leave for a competitor and HP also wanted to protect their proprietary information.

On the fourth allegation, Plaintiff alleges that both 3D Systems and HP ceased cold-calling and hiring each other's employees; however, Plaintiff only provides this bare allegation with respect to HP without providing any further factual detail about HP's actions. With respect to 3D Systems' actions, Plaintiff alleges that 3D Systems had previously been engaged in a campaign of aggressively poaching HP employees but stopped doing so in or around 2016. In response, HP first argues that Plaintiff's allegations are contradictory, pointing to the fact that 3D Systems continued to interview HP's employees, which undermines the notion that the two companies had an agreement to refrain from poaching the others' employees. However, even taking Plaintiff's allegations as true, HP offers two alternate explanations for 3D Systems' decision to cease cold-calling and hiring HP's employees: (1) when Joshi first started working at 3D Systems in early 2016 he managed to hire the top HP employees and therefore no longer **[*20]** needed to hire from HP's workforce; and (2) 3D Systems could hire any of the numerous former HP employees who had been terminated under the WFR, and therefore had no need to poach current HP employees. The Court agrees that the behavior of 3D Systems can be justified by either of the rational business reasons offered by Defendant and follows the reasoning of other courts who have found that courts cannot "infer an anticompetitive agreement when factual allegations just as easily suggest rational, legal business behavior." *Name.Space, Inc. v. Internet Corp. for Assigned Names & Numbers, 795 F.3d 1124, 1130 (9th Cir. 2015)* (citations omitted) (dismissing plaintiff's allegations that an anticompetitive agreement existed since the company's alleged conduct, though contrary to its business model, were not "illogical or suspicious"). *See also* *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 597 n. 21, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* ("[C]onduct that is as consistent with permissible competition as with illegal conspiracy does not, without more, support even an inference of conspiracy."); *Eclectic Props. E., LLC v. Marcus & Millichap Co., 751 F.3d 990, 996 (9th Cir. 2014)* (explaining that courts must consider obvious alternative explanations for a defendant's behavior when analyzing plausibility).

The fifth allegation on sharing pay scales is insufficiently supported by Plaintiff's factual pleadings. In *Kelsey K. v. NFL Enterprises, LLC*, plaintiffs argued that **[*21]** defendants engaged in parallel conduct by suppressing the wages of National Football League cheerleaders. *254 F. Supp. 3d 1140, 1146 (N.D. Cal. 2017)*, *aff'd*, *757 F. App'x 524 (9th Cir. 2018)*. The *Kelsey* plaintiffs provided exact figures of wages across different teams and additionally alleged that no NFL team paid cheerleaders for rehearsals. However, the *Kelsey* court held that the plaintiffs had nevertheless failed to provide more than "a mere allegation" and therefore could not "nudge the overall conspiracy

---

[3] The Court additionally notes that Plaintiff's allegations appear contradictory; if HP and 3D Systems did agree to refrain from poaching each other's employees, not only would 3D Systems have been unlikely to interview an HP employee, there would have also been no need for HP to fire employees who were hired by 3D Systems, or to warn HP's employees against seeking employment with 3D Systems.

across the line from *conceivable* to *plausible*." *Id.* (emphasis in original). Here, Plaintiff has only alleged that HP and 3D Systems shared pay scales and suppressed wages, without providing any further factual detail to support these claims. Plaintiff's mere allegations fail to show parallel conduct that would support an inference of conspiracy between HP and 3D Systems.

In sum, Plaintiff's allegations are either insufficient or otherwise can be independently explained by rational business decisions on the part of HP or 3D Systems and therefore do not meet the standard as set out by the Ninth Circuit, requiring that the plus factors exclude the possibility that defendants' actions were possibly the result of independent conduct. *See In re Citric Acid Litig., 191 F.3d 1090, 1094 (9th Cir. 1999)*. Without more of **[*22]** the "plus" factors, an inference of conspiracy would be unreasonable. *See e.g., In re Musical Instruments & Equip. Antitrust Litig., 798 F.3d 1186, 1189 (9th Cir. 2015)* (allegation that manufacturers adopted similar advertisement policies was an insufficient "plus factor" to state a claim under *section 1* of the Sherman Act).

Accordingly, Plaintiff's claims under the Sherman and Cartwright Acts — counts five and eight — are **DISMISSED**.

III. Per Se Illegality and Standing

Plaintiff argues that the no-poach agreement is *per se* illegal, and therefore, he is not required to plead an anticompetitive injury in order to meet the requirements for standing. Defendant disputes the *per se* illegality, but further argues that even if Plaintiff could prove that the agreement is *per se* illegal, he would still be required to prove the antitrust and Article III pleading requirements. The Court has already dismissed Plaintiff's Sherman Act and Cartwright Act claims, but the Court will nevertheless address this issue.

In considering claims made under *Section 1* of the Sherman Act, courts have applied either (1) the "rule of reason" standard, which "weighs legitimate justifications for a restraint against any anticompetitive effects," *Paladin Assocs., Inc. v. Mont. Power Co., 328 F.3d 1145, 1156 (9th Cir. 2003)*, or (2) the *per se* standard, which applies to a category of agreements which **[*23]** have been determined to be *per se* illegal, *see United States v. Brown, 936 F.2d 1042, 1045 (9th Cir. 1991)*.

The latter *per se* rule is applied "when the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output." *NCAA v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 100 (1984)* (internal quotation marks omitted). The following practices are typically considered to be *per se* illegal: (1) horizontal agreements between actual or potential competitors to fix or stabilize prices; (2) horizontal territorial, customer, output, and other market restraints between competitors; and (3) horizontal group boycotts by competitors with shared market power or control over a scarce resource or facility. *See* William Holmes & Melissa Mangiaracina, ***ANTITRUST LAW*** HANDBOOK § 2:9. These practices are "conclusively presumed to be unreasonable" because of their "pernicious effect on competition and lack of any redeeming virtue." *N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S.Ct. 514, 2 L.Ed.2d 545 (1958)*.

Although the *per se* standard has a limited scope, courts have previously been tempted to expand its reach:

> "The absence of any requirement that a per se plaintiff make specific market allegations creates the danger that an unwary court might allow a plaintiff in a market unlikely to have been affected by the practice he challenges to pursue a treble-damages **[*24]** claim. Such errors permit the *per se* standard to impose greater penalties on a defendant than those he would have suffered had his practice been judged by the rule of reason. The consequences of such errors are especially great because of the extent to which plaintiffs rely upon *per se* theories and the ease with which arguably *per se* practices often can be identified. Courts can avoid this danger by recognizing that each *per se* rule presumes a particular practice harms particular markets, and by then permitting only plaintiffs within those markets to pursue per se claims. The failure of many courts to appreciate this limited nature of the per se standard accounts for much of the confusion that has long plagued standing doctrine in antitrust cases."

Daniel C. Richman, *Antitrust Standing, Antitrust Injury, and the Per Se Standard*, 93 YALE L.J. 1309, 1313-14 (1984).

Per se illegality can apply to agreements, such as a no-poach agreement, that depress competition in the employment market since "[a]ntitrust law does not treat employment markets differently from other markets." *United States v. eBay,* Inc., 968 F. Supp. 2d 1030, 1039 (N.D. Cal. 2013). *See also* Roman v. Cessna Aircraft Co., 55 F.3d 542 (10th Cir.1995) (an airplane engineer adequately pled antitrust standing in a suit challenging two airline manufacturers' no-hire **[*25]** agreement). "***Antitrust law*** addresses employer conspiracies controlling employment terms precisely because they tamper with the employment market and thereby impair the opportunities of those who sell their services there." *Id.* (internal citations omitted). "Just as ***antitrust law*** seeks to preserve the free market opportunities of buyers and sellers of goods, so also it seeks to do the same for buyers and sellers of employment services." *Id.*

However, merely alleging a no-poach agreement is insufficient; the agreement must also "facially appear[] to be one that would almost always tend to restrict competition and decrease output," in other words, it must be "a naked restraint on trade." eBay, 968 F. Supp. 2d at 1039 (citing National Collegiate Athletic Ass'n v. Board of Regents of University of Oklahoma, 468 U.S. 85, 100, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)). If "a defendant advances plausible arguments that a practice enhances overall efficiency and makes markets more competitive, per se treatment is inappropriate, and the rule of reason applies." Paladin Assoc., Inc. v. Montana Power Co., 328 F.3d 1145, 1155 (9th Cir. 2003). Thus, to make a determination, a court must consider whether the alleged no-solicitation or no hire agreement is ancillary to a procompetitive business purpose. *See* Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 19-22, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979).

a. Discussion

Plaintiff alleges that HP and 3D Systems entered in a no-poach agreement in or around 2016 and thereafter ceased cold-calling **[*26]** each other's employees, which ultimately "stopped or greatly limited" 3D Systems from attempting to hire outgoing HP employees. ECF No. 1-2 at 18; SAC ¶ 67. Plaintiff alleges that this no-poach agreement is *per se* illegal since it has no legitimate competitive justification. Defendant counters that Plaintiff has failed to allege facts showing the existence of such an agreement altogether, and that even taking Plaintiff's allegations as true, the alleged agreement can be justified by HP and 3D Systems' rational business decisions.

In *United States v. eBay,* Inc., 968 F. Supp. 2d 1030, 1039 (N.D. Cal. 2013), the court declined to apply *per se* treatment to a non-poach agreement where parties supplied "substantial legal argument" on the non-poach agreement but "without sufficient factual evidence." 968 F. Supp. 2d at 1040. The *eBay* court held that even taking plaintiffs' allegations as true, it could not determine whether to apply *per se* analysis. *Id. See also* California Dental Ass'n v. F.T.C., 526 U.S. 756, 779, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999) ("[T]here is often no bright line separating *per se* from Rule of Reason analysis, since considerable inquiry into market conditions may be required before the application of any so-called *per se* condemnation is justified.").[4] At this stage, it would be premature for the Court to find the agreement to be **[*27]** *per se* illegal given the lack of factual evidence and therefore, the Court declines to apply *per se* treatment.

b. *Per Se* Illegality Does Not Affect Standing Requirements

Regardless of the outcome for *per se* illegality, the Court notes that the standing analysis would not be affected. Plaintiff argues that since the no-poach agreement is *per se* illegal, he is not required to plead an anticompetitive

[4] Plaintiff cites the 2016 guidance from the Department of Justice and Federal Trade Commission, which states that no-poach agreements are *per se* illegal. *See* DOJ/FTC Antitrust Guidance for HR Professionals, October 2016. However, although this guidance cites a number of DOJ and FTC prosecutions that ended in consent judgments, it does not cite any judicial opinions on the question of whether no-poach agreements are always *per se* illegal.

injury. This is incorrect. Even after establishing that an agreement is *per se* illegal, a plaintiff is still required to meet the Article III and antitrust standing requirements, including the requirement of proving an antitrust injury.

"[E]ven if the challenged conduct is per se illegal, the particular plaintiff may still lack standing to assert a claim." William Holmes & Melissa Mangiaracina, ***ANTITRUST LAW*** HANDBOOK § 2:9. "The *per se* rule is a presumption of unreasonableness based on business certainty and litigation efficiency . . . [t]he purpose of the antitrust injury requirement is different." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (a competitor lacked standing to challenge a *per se* illegal agreement where the nature of the competitor's alleged injury was not the type of injury for which the antitrust laws provide **[*28]** protection).

"The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-*reducing* aspect or effect of the defendant's behavior." *Id. at 344* (emphasis in original). "The need for this showing is *at least as great* under the *per se* rule as under the rule of reason." *Id.* (emphasis added). "[P]rocompetitive or efficiency-enhancing aspects of practices that nominally violate the antitrust laws may cause serious harm to individuals, but this kind of harm is the essence of competition and should play no role in the definition of antitrust damages." *Id.* (citing William H. Page, *The Scope of Liability for Antitrust Violations*, *37 Stan. L. Rev. 1445, 1460 (1985)*). "Thus, proof of a per se violation and of antitrust injury are distinct matters that must be shown independently." *Id.*

Here, Plaintiff has conflated the pleading requirements for standing with the pleading requirements for the substantive antitrust violation. A finding of *per se* illegality does impact the pleading requirements for a substantive antitrust violation; for example, plaintiffs are not required to plead the element of intent to produce anticompetitive effects when an agreement is deemed *per se* illegal. *See* *United States v. Brown, 936 F.2d 1042, 1046 (9th Cir. 1991)*. However, **[*29]** even if Plaintiff's allegations with respect to *per se* illegality were sufficient, Plaintiff would still be required to prove he has standing under the general standard set out by ***antitrust law*** and Article III of the Constitution.[5]

II. *Section 16600*

The *California Business and Professions Code § 16600* ("*Section 16600*") provides that, in absence of a statutory exception, "every contract by which anyone is restrained from engaging in a lawful profession, trade, or business of any kind is to that extent void." *Cal. Bus. & Prof. Code § 16600*. Under *Section 16600*, "an employer cannot by contract restrain a former employee from engaging in his or her profession, trade, or business unless the agreement falls within one of the exceptions to the rule." *Edwards v. Arthur Andersen LLP, 44 Cal. 4th 937, 946-47, 81 Cal. Rptr. 3d 282, 189 P.3d 285 (2008)*. For example, this statute invalidates provisions in employment contracts that prohibit an employee from working for a competitor, unless such provisions are necessary to protect trade secrets. *See* *Muggill v. Reuben H. Donnelley Corp., 62 Cal. 2d 239, 242, 42 Cal. Rptr. 107, 398 P.2d 147 (1965)*.

Plaintiff bases his *Section 16600* claim on the alleged no-poach agreement between HP and 3D Systems. ECF NO. 12 at 29. Defendant argues that Plaintiff has failed to allege a violation of *Section 16600* since he has failed to adequately allege the existence of any such no-poach agreement. As discussed at length in the preceding sections, Plaintiff has failed to sufficiently plead allegations regarding the existence of the **[*30]** no-poach agreement; therefore, insofar as the *Section 16600* claim is solely premised on the existence of the no-poach agreement by HP and 3D Systems, Plaintiff's sixth cause of action is **DISMISSED**.[6]

---

[5] Since the Court has already held that the insufficiency of Plaintiff's allegations regarding Defendant's violation of the Sherman and Cartwright Acts merits granting of Defendant's motion to dismiss, the Court declines to address the issue of Article III standing.

[6] Defendant also argues that (1) Plaintiff's claim fails since ***Section 16600*** does not confer a statutory cause of action, and (2) Plaintiff lacks standing to seek declaratory and injunctive relief. Since Plaintiff's claim has been denied for the reasons described above, the Court declines to address these issues here.

CONCLUSION

Defendant's motion to dismiss counts five, six, and eight of the second amended complaint is **GRANTED**. Plaintiff is granted leave to amend within the next 20 days.

IT IS SO ORDERED.

Dated: February 3, 2020

Opinion

ORDER RE MOTIONS IN LIMINE

[Re: ECF 384, 385, 386, 387, 388, 390, 391, 392]

Plaintiff Sumotext Corporation ("Sumotext") brings this suit against Defendants Zoove, Inc. ("Zoove"), Virtual Hold Technology LLC ("VHT"), VHT StarStar, and StarSteve, LLC ("StarSteve"), alleging that Defendants have violated the federal antitrust laws in connection with the leasing and servicing of "StarStar numbers." After substantial motion practice, two claims remain in the operative third amended complaint ("TAC"): Count IV for restraint of trade in violation of *Section 1 of the Sherman Act*, and Count V for conspiracy to monopolize and monopolization in violation of *Section 2 of the Sherman Act*. Trial in this case is scheduled to begin on February 24, 2020.

On January 16, 2020, in advance of the Final Pretrial Conference, Defendants jointly filed five motions in limine, ECF 384, 385, 386, 387, 388, and Plaintiff filed three motions in limine, ECF 390, 391, 392. Each side responded to the other's motions on January 23, 2020. ECF 396, 397, 398, 399, 400, 401, 402, 403. The Court held the Final Pretrial Conference in this case **[*3]** on January 30, 2020, during which the Court heard oral argument on the motions in limine and issued its rulings on the record. This order memorializes those rulings. For the reasons stated on the record, and as summarized below, the Court orders as follows:

I. LEGAL STANDARD

Motions in limine are a "procedural mechanism to limit in advance testimony or evidence in a particular area." *United States v. Heller, 551 F.3d 1108, 1111 (9th Cir. 2009)*. Like other pretrial motions, motions in limine are "useful tools to resolve issues which would otherwise clutter up the trial." *City of Pomona v. SQM N. Am. Corp., 866 F.3d 1060, 1070 (9th Cir. 2017)*. Accordingly, "a ruling on a motion in limine is essentially a preliminary opinion that falls entirely within the discretion of the district court." *Id.*; *see* *Luce v. United States, 469 U.S. 38, 41 n. 4, 105 S. Ct. 460, 83 L. Ed. 2d 443 (1984)* (explaining that a court may rule in limine "pursuant to the district court's inherent authority to manage the course of trials").

In many instances, however, rulings "should be deferred until trial, so that questions of foundation, relevancy, and potential prejudice may be resolved in proper context." *United States v. Pac. Gas & Elec. Co., 178 F. Supp. 3d 927, 941 (N.D. Cal. 2016)*. After all, in order to exclude evidence on a motion in limine, "the evidence must be inadmissible on all potential grounds." *McConnell v. Wal-Mart Stores, Inc., 995 F. Supp. 2d 1164, 1167 (D. Nev. 2014)*. Thus, denial of a motion in limine to exclude certain evidence does not mean that all evidence **[*4]** contemplated by the motion will be admitted, only that the court is unable to make a comprehensive ruling in advance of trial. *Id.* Even if a district court does rule in limine, moreover, the court may "change its ruling at trial because testimony may bring facts to the district court's attention that it did not anticipate at the time of its initial ruling." *City of Pomona, 866 F.3d at 1070*; *see also* *Ohler v. United States, 529 U.S. 753, 758 n.3, 120 S. Ct. 1851, 146 L. Ed. 2d 826 (2000)* ("[I]n limine rulings are not binding on the trial judge, and the judge may always change his mind during the course of a trial.").

II. PLAINTIFF'S MOTIONS IN LIMINE

Plaintiff brings three motions in limine. The Court addresses each in turn below.

A. Plaintiff's Motion in Limine No. 1

Plaintiff's first motion in limine seeks to "preclude Defendants from arguing that their anticompetitive conduct is justified because they sought to make more profits and prevent Zoove from failing." ECF 390 ("Pl. MIL No. 1") at 2. To provide some context, Defendants argued at the summary judgment stage that "Zoove has never made money, Defendants made a legitimate business decision to pivot to a different business model, and such a decision cannot give rise to antitrust liability." ECF 382 at 23-24; *see, e.g.*, ECF 336 at 17, 22-23. The Court **[*5]** acknowledged that a legitimate business justification can avert antitrust liability in some cases but concluded that Defendants were not entitled to summary judgment on those grounds. ECF 382 at 24. Plaintiff now contends that Defendants should not be able to present their business justification defense to the jury because the business justification is not "legitimate." Defendants, of course, disagree. They maintain that "Zoove was perfectly entitled to terminate its deal with Sumotext to increase Zoove's profits and make it a more viable company." ECF 397 ("Opp. to Pl. MIL No. 1").

As a general matter, Plaintiff is correct that "the promotion of self-interest alone does not invoke the rule of reason to immunize otherwise illegal conduct." *Otter Tail Power Co. v. United States, 410 U.S. 366, 380, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*. Thus, "the desire to make Zoove profitable," Opp. to Pl. MIL No. 1 at 2, is not, by itself, enough to justify "anticompetitive uses of [a company's] dominant economic power," *Otter Tail Power Co., 410 U.S. at 380-81*. It is not, in the parlance of the Rule of Reason, a "procompetitive benefit." That is because the Sherman Act "assumes that an enterprise will protect itself against" unprofitability "by operating with superior service, lower costs, and improved efficiency" rather than "predatory **[*6]** practices." *Id.*

Plaintiff, however, mischaracterizes Defendants' defense. The legitimate business justification issue properly arises with regard to Plaintiff's claim of actual monopolization under *Section 2* against VHT StarStar.[1] *See* ECF 398 at 15. Plaintiff "alleges that after obtaining monopoly power in both relevant markets, VHT StarStar maintained its monopoly power through . . . a practical refusal to deal . . . or a denial of access to an essential facility." ECF 409 at 53 (Plaintiff's proposed jury instruction for claim of actual monopolization). In other words, Plaintiff's theory of liability is based on VHT StarStar's alleged unilateral refusal to deal.[2] *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1184 (9th Cir. 2016)* ("The essential facilities doctrine . . . is a variation on a refusal to deal claim."). "As a general rule, a monopolist has no duty to deal with its competitors." *High Tech. Careers v. San Jose Mercury News, 996 F.2d 987, 990 (9th Cir. 1993)*. On the contrary, the Supreme Court has repeatedly emphasized the "high value" it "place[s] on the right to refuse to deal with other firms." *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*; *see also* *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* ("[A]s a general matter, the Sherman Act does not restrict the long recognized right of a trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with **[*7]** whom he will deal.") (internal quotation marks and alterations omitted). And although that right is not "unqualified," the Supreme Court has "been very cautious in recognizing . . . exceptions." *Trinko, 540 U.S. at 408*.

Plaintiff apparently appeals to the "narrow exception," *Aerotec Int'l, 836 F.3d at 1184*, recognized by the Supreme Court in *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. *See also* *Trinko, 540 U.S. at 408* ("The leading case for *§ 2* liability based on refusal to cooperate with a rival . . . is *Aspen Skiing*."). In *Aspen Skiing*, as here, the Court considered "the defendant's decision to cease participation" in a course of dealing with the plaintiff. *Trinko, 540 U.S. at 408*. Specifically, "the defendant—who owned three of the four ski resorts in the market—discontinued a joint lift-ticket package with a smaller rival, the only other competitor in the market, and then flatly refused to sell the rival any lift tickets so it could create its own bundles." *Aerotec Int'l, 836 F.3d at 1184* (citing *Aspen Skiing, 472 U.S. at 592-94*). The jury was properly instructed that the defendant's actions did not violate *Section 2* "if valid business reasons exist for that refusal." *Aspen Skiing, 472 U.S. at 604-05*. The Court upheld the jury's verdict in favor of the plaintiff, which implied that "the jury concluded there were no valid business reasons for the refusal." *Id. at 605*. The Court explained: "The jury may well have concluded that **[*8]** [the defendant] elected to forgo these short-run benefits because it was more interested in reducing competition in the Aspen market over the long run by harming its smaller competitor." *Id. at 608*.

---

[1] Plaintiff stated at the Final Pretrial Conference that it has dismissed certain defendants from certain of its claims. These changes are reflected in Plaintiff's proposed verdict form and proposed jury instructions. *See* ECF 407 (Plaintiff's verdict form). Relevant here, Plaintiff brings its claim for actual monopolization under *Section 2* of the Sherman Act against VHT StarStar (and its wholly-owned subsidiary, Zoove) only. *Id.* at 6.

[2] Plaintiff originally alleged a "group boycott" in violation of *Section 1* of the Sherman Act. *See* TAC ¶¶ 274-75. However, Plaintiff is apparently no longer pursuing a group boycott theory, which is a theory of per se illegality, *see* TAC ¶ 274, *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*. Instead, Plaintiff is only pursuing its *Section 1* claim under the Rule of Reason. ECF 409 at 19 (Plaintiff's proposed jury instruction for *Section 1*).

The Supreme Court has since made clear, however, that "*Aspen Skiing* is at or near the outer boundary of *§ 2* liability." *Trinko, 540 U.S. at 409*. The key fact in *Aspen Skiing* was that "[t]he unilateral termination of a voluntary (*and thus presumably profitable*) course of dealing suggested a willingness to forsake short-term profits to achieve an anticompetitive end." *Id.* (emphasis in original). That is, because the course of dealing the defendant terminated was profitable, it "was apparently motivated entirely by a decision to avoid providing any benefit to" the defendant's competitor rather than any "normal business purpose." *Aspen Skiing, 472 U.S. at 608, 611*. Terminating (or declining to engage in) an *unprofitable* course of dealing, however, is another matter. "Economic necessity" and "business acumen"—and not the acquisition or maintenance of monopoly power—is the rationale for ending a course of dealing that is unprofitable. *Oahu Gas Serv., Inc. v. Pac. Res., Inc., 838 F.2d 360, 369 (9th Cir. 1988)*. That a course of dealing is unprofitable is therefore a valid business reason. *See id.* (finding no *Section 2* liability for Pacific Resources' **[*9]** refusal to produce propane to sell to Oahu Gas where "the investment required of Pacific Resources to produce propane would have resulted in a negative return"); *MetroNet Servs. Corp. v. Qwest Corp., 383 F.3d 1124, 1132 (9th Cir. 2004)* (distinguishing *Aspen Skiing* because defendant "Qwest attempted to change this prior course of dealing after it realized that the resale of Centrex by MetroNet and others was having a 'significantly negative' impact on its own profitability"); *High Tech. Careers, 996 F.2d at 992* ("If Mercury News can prove its assertion" "that it was actually losing money from the insert," "it should prevail."); *Four Corners Nephrology Assocs., P.C. v. Mercy Med. Ctr. of Durango, 582 F.3d 1216, 1225 (10th Cir. 2009)* ("[T]he evidence here suggests that Mercy refused to deal with Dr. Bevan to avoid an unprofitable relationship, and that the hospital pursued the course it did to protect and maximize its chances of profitability in the short-term. . . . *Aspen Skiing* does not require more economic justification than this to avoid *Section 2* liability."); *see also Drinkwine v. Federated Publications, Inc., 780 F.2d 735, 740 (9th Cir. 1985)* ("Drinkwine argues that the Statesman was merely trying to make more money. Even that motive is consistent with competition and the reasoning in *Aspen Skiing*.").

Put another way, "there is 'no duty to deal under the terms and conditions preferred by a competitor's rivals,' there is only a duty not to refrain from dealing where the **[*10]** only conceivable rationale or purpose is to sacrifice short-term benefits in order to obtain higher profits in the long run from the exclusion of competition." *Aerotec Int'l, 836 F.3d at 1184* (quoting *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 457, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009))*.

In sum, once Plaintiff has presented evidence that Defendants' refused to deal with it in order to gain or maintain monopoly power, Defendants' will be entitled to present evidence that it did so because dealing with Plaintiff was unprofitable. *See Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 483, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (explaining that once plaintiffs "have presented evidence that Kodak took exclusionary action to maintain its parts monopoly," "liability turns . . . on whether 'valid business reasons' can explain Kodak's actions"). Plaintiff can certainly contest whether the deal was or would be unprofitable. *See, e.g.*, *High Tech. Careers, 996 F.2d at 992* (whether Mercury News "was actually losing money from the insert" "will be the issue at trial"). But as just explained, ending an unprofitable course of dealing is a "valid business reason" that would inoculate Defendants' refusal to deal—even if the refusal necessarily excluded competition. *Oahu Gas, 838 F.2d at 369* ("[T]he desire to maintain market power—even a monopolist's market power—cannot create antitrust liability if there was a legitimate business justification.").

That said, Defendants **[*11]** cannot proffer evidence or argument that it was merely "more profitable" to exclude Plaintiff. Furthermore, as just explained, the valid business reasons defense has only been recognized as to unilateral refusals to deal; it is inapplicable to Plaintiff's conspiracy claims. Accordingly, Plaintiff's motion is DENIED in part and GRANTED in part.

B. Plaintiff's Motion in Limine No. 2

Second, Plaintiff asks the Court to limit the use of the trade name "StarStar Mobile" to refer only to Defendant VHT StarStar and not to Defendant Zoove. ECF 391 ("Pl. MIL No. 2") at 2. Because "StarStar Mobile" "is the registered fictitious name for VHT StarStar," Plaintiff believes it would be confusing for the jury if Defendants also use "StarStar Mobile" to refer to Zoove. *Id.*

It is undisputed that VHT StarStar and Zoove—a wholly-owned subsidiary of VHT Star-Star—are distinct legal entities. At the Final Pretrial Conference, however, Defendants asserted that "StarStar Mobile" is not a registered dba name for either entity. In Defendants' telling, the name "StarStar Mobile" "actually does refer to both" entities: "[T]hey operate a single business venture that is referred to internally and holds itself out **[*12]** to the public as 'StarStar Mobile.'" ECF 396 ("Opp. to Pl. MIL No. 2") at 2. "VHT StarStar is the entity that pays employees and makes contracts with customers, while Zoove is the entity that holds contracts with mobile phone operators and owns the relevant technology." *Id.* But if, say, a company wants to lease a StarStar number, it would visit the website https://starstarmobile.com. *Id.* Employees likewise "use starstarmobile.com email accounts and boast StarStar Mobile signature lines." *Id.* at 2-3. Hence, say Defendants, "it is logical to refer to the entities by their technical legal names when describing only one or the other and then to refer to them collectively by their common name." *Id.* at 3.

In light of the foregoing, Plaintiff's motion is DENIED as to the request to use "StarStar Mobile" to refer to VHT StarStar. Nevertheless, it is eminently clear that precision will be necessary to avoid confusing the jury. The parties shall use the legal names for VHT StarStar and Zoove to refer to those entities; the parties shall not use "StarStar Mobile" to refer to either VHT StarStar or Zoove alone. Hence, the Court agrees with Plaintiff that Defendants cannot tell the jury "that StarStar Mobile . . **[*13]** . terminated its business relationship with Sumotext (presumably referring to Zoove), but yet is also the same company that had no course of dealing with Sumotext (presumably referring to VHT StarStar)." Pl. MIL No. 2 at 2. At the same time, the Court will not preclude the Defendants from explaining to the jury that "StarStar Mobile" was a fictitious name used by both VHT StarStar and Zoove. Plaintiff is free to clarify or contest the respective roles of VHT StarStar and Zoove on cross-examination (or re-direct examination, as the case may be).

In addition, in order to aid the jury, the parties shall prepare a chart identifying the name that will be used to refer to each of the relevant entities. That chart must make clear that "StarStar Mobile" is not an independent entity. The deadline for that submission is **February 12, 2020**.

C. Plaintiff's Motion in Limine No. 3

In its third motion in limine, Plaintiff seeks to bar Defendants from (1) arguing that the dismissal of the contract and tortious interference claims "impacts the legal viability of Plaintiffs' antitrust claims" or (2) introducing evidence "that Mblox was originally named as a defendant." ECF 392 ("Pl. MIL No. 3") at 2-3. **[*14]** As the Court confirmed at the Final Pretrial Conference, the parties agree that the fact of the dismissals—of the contract claim, of the tortious interference claim, and of Mblox—is not relevant to Defendants' liability *vel non* for the antitrust claims. *See also* ECF No. 384 ("Def. MIL No. 1") at 1 ("To be sure, Sumotext still can claim that Zoove's termination of its contracts with Sumotext violated ***antitrust law***."). Defendants may have violated the antitrust laws regardless of whether Plaintiff's have claims for breach of contract or tortious interference. Likewise, the current Defendants' liability in unaffected by the Court's dismissal of Mblox. Accordingly, the Court GRANTS Plaintiff's motion, recognizing its limited scope.

Defendants' opposition also raises issues that exceed the scope of Plaintiff's motion but are squarely presented by Defendants' first and second motions in limine. The Court addresses those issues below.

III. DEFENDANTS' MOTIONS IN LIMINE

The Court now turns to Defendants' five motions in limine.

A. Defendants' Motion in Limine No. 1

First, as alluded to earlier, Defendants also make a motion regarding references at trial to the parties' stipulated dismissals of **[*15]** the claims for breach of contract (Count I) and breach of the covenant of good faith and fair dealing (Count II) in the TAC. Defendants make two requests, one concerning what Plaintiff may present and another concerning what Defendants may present. The former is GRANTED but the latter is DENIED.

As to what Plaintiff may present, Defendants ask the Court to bar Plaintiff from "making any argument or offering any evidence advancing the theory that Zoove's termination of Sumotext's contracts violated either contract law or the implied covenant of good faith and fair dealing." Def. MIL No. 1 at 2. The Court agrees that such argument would be improper in light of the stipulated dismissals with prejudice. Plaintiff also represents that it "does not seek to relitigate its claim against Defendants for breach of contract, breach of implied covenants, or tortious interference." ECF 398 ("Opp. to Def. MIL No. 1") at 4. As Defendants acknowledge, however, "Sumotext still can claim that Zoove's termination of its contracts with Sumotext violated ***antitrust law***." Def. MIL No. 1 at 1. That is, Plaintiff will be permitted to offer evidence of conduct under the contract, including Zoove's termination **[*16]** of its contracts with Sumotext.

As to what Defendants may present, Defendants seek permission "to inform the jury that it was entitled under contract law to terminate its agreements with Sumotext." Def. MIL No. 1 at 1. No; that would be improper for two reasons. First of all, "voluntary dismissal of a claim prior to any adjudication and without any stipulated findings of fact does not actually litigate any issue." *Amadeo v. Principal Mut. Life Ins. Co., 290 F.3d 1152, 1159 (9th Cir. 2002)*. Consequently, there has been no finding that Zoove did not commit a breach of contract or a breach of the covenant of good faith and fair dealing. Second, as already discussed with regard to Plaintiff's Motion in Limine No. 3, Defendants' liability (or lack thereof) for the contract claims is not relevant to Defendants' liability for the antitrust claims.

However, should Plaintiff introduce evidence that Zoove terminated its contracts with Sumotext in the course of its antitrust case, Defendants may tell the jury that they are not being sued for breach of contract or breach of the covenant of good faith and fair dealing. To be clear, Defendants may not refer to the dismissal of those claims, *see supra* Part II.C., but they may state that there are no such claims currently **[*17]** in the case. Moreover, Defendant is entitled to bring evidence that the termination (or any other conduct under the contract) was permitted by the contracts at issue.

And again, Plaintiff may respond with evidence and argument that such conduct—whether allowed by the contract or not, violated the antitrust laws.

B. Defendants' Motion in Limine No. 2

Defendants' Motion in Limine No. 2 concerns the parties' stipulated dismissals of the claim for tortious interference with contract (Count III) in the TAC. ECF 385 ("Def. MIL No. 2"). As in their Motion in Limine No. 1, Defendants address the evidence Plaintiff may introduce and the evidence Defendants may introduce.

First, as with the contract claims, Plaintiff may not present evidence or argument advancing the tortious interference claim that has been dismissed with prejudice. However, the Court will not bar Plaintiff from making "[a]ny reference to pre-acquisition communications with Sumotext's customers." Def. MIL No. 2 at 2. Defendants believe such references are irrelevant to Plaintiff's antitrust claim, but the Court is persuaded by Plaintiff's briefing and arguments at the Final Pretrial Conference that the communications may bear on **[*18]** Plaintiff's allegation of conspiracy to monopolize. The Court therefore DENIES Defendant's motion to exclude all evidence regarding Defendants' pre-acquisition communications with Sumotext's customers. Defendants may, of course, object on relevance grounds to specific questions at trial.

Second, Defendants seek to argue that its "pre-termination communications with Sumotext's customers were permissible and proper" and it "did not tortiously interfere with Sumotext's customer contracts." Def. MIL No. 2 at 1-2. Again, the voluntary dismissal of the tortious interference claim is not sufficient to support such findings—which are also irrelevant to Plaintiff's antitrust claims. The Court therefore DENIES Defendants' motion as to this request. As with the contract claims, the Court will permit Defendants to tell the jury that they are not currently being sued for tortious interference with contract.

C. Defendants' Motion in Limine No. 3

In their third motion in limine, Defendants challenge the testimony of Plaintiff's damages expert, Dr. Alan Goedde, ECF 386 ("Def. MIL No. 3") at 5. Dr. Goedde provides two damages figures: (1) $3,048,300 for "Defendants' breach of contract" and (2) $9,223,500 **[*19]** for "the alleged antitrust violations." ECF 386-2 ("") ¶¶ 5-6. Defendants contend that neither of these opinions is admissible and that, consequently, Dr. Goedde should not be permitted to testify at trial.

Turning first to Dr. Goedde's testimony that Plaintiff suffered $3,048,300 in damages from Defendants' alleged breach of contract, Defendants argue this testimony is irrelevant. Plaintiff does not oppose exclusion; it states that it "does not intend to offer Dr. Goedde's breach-of-contract damages calculation at trial." ECF 401 ("Opp. to Def. MIL No. 3") at 4. The Court therefore GRANTS Defendants' motion as to Dr. Goedde's opinion regarding breach of contract damages.

Defendants also move to exclude Dr. Goedde's opinion that Plaintiff suffered $9,223,500 in damages from Defendants' alleged antitrust violations. Defendants make two arguments: (i) that Dr. Goedde has failed to apportion damages amongst Plaintiff's different claims and legal theories, and (ii) that Dr. Goedde did not consider data on StarStar number usage. Def. MIL No. 3 at 1. As set out below, the Court DENIES Defendants' motion on both scores.

i. Failure to Apportion Damages

There are several dimensions to Defendants' **[*20]** apportionment argument.

First, Defendants claim that Dr. Goedde's "antitrust calculation includes built-in damages for breach of contract, too" and "offers the jury no way to back out Sumotext's breach-of-contract and tortious-interference damages." Def. MIL No. 3 at 3-4. But there is no need to "back out" these damages. Dr. Goedde has made clear that the entire $9,223,500 in damages is attributable to the alleged antitrust violations. It is not true that Dr. Goedde's antitrust calculation includes damages "for claims that are no longer in this case," Opp. to Def. MIL No. 3 at 4; it simply includes "conduct that is separately actionable for claims of tortious interference with contract and breach of contract," Goedde Report ¶ 5. If the contract claims remained in the case, adding together the $3,048,300 in contract damages and $9,223,500 in antitrust damages might create a double-counting problem—but that is not the present situation.

Second, Defendants object that Dr. Goedde provided a single damages estimate for Plaintiff's antitrust damages, without apportioning the damages amongst Plaintiff's different legal theories under Sections 1 and 2 of the Sherman Act or between the allegedly distinct **[*21]** leasing and servicing markets. Def. MIL No. 3 at 1. Defendants are correct that "where an antitrust plaintiff challenges multiple business practices of a defendant yet fails to disaggregate its proof of damages," the jury is left "without a reasonable basis for determining the amount by which the plaintiff's damage model figure should be reduced in the event that one or more of the challenged business practices are not found to be exclusionary." *Litton Sys. v. Honeywell, Inc., No. CV 90-4823 MRP(EX), 1996 U.S. Dist. LEXIS 14662, 1996 WL 634213, at *2 (C.D. Cal. July 24, 1996)*. Consequently, "[e]xcept in circumstances where disaggregation is shown to be impossible or impractical, an antitrust plaintiff challenging a variety of conduct is required to segregate damages attributable to particular business practices." *Id.* In *Image Tech. Servs., Inc. v. Eastman Kodak Co.*, for example, the Ninth Circuit ordered a new trial on damages stemming from Kodak's monopolization in the service market because the plaintiff's expert did not distinguish between sales lost "due to Kodak's control over the parts market" and sales "lost due to Kodak's service monopoly." *125 F.3d 1195, 1223 (9th Cir. 1997)*; *see also* *Comcast Corp. v. Behrend, 569 U.S. 27, 35-37, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (refusing to accept a model for damages that assumed four market distortions when only one remained at issue **[*22]** in the case).

Nevertheless, the Court does not believe Dr. Goedde's aggregated damages figure must be excluded, for three reasons. To begin with, the disaggregation rule pertains to *conduct*, not *legal theories*. The point is that damages may be awarded only for conduct that is unlawful. Where certain conduct is unlawful under multiple theories of liability, a plaintiff need not—and indeed, could not—disaggregate damages across each theory.

Second, the Court is mindful that, once the fact of an antitrust violation is established, the jury has broad latitude in assessing the amount of damages caused by that violation. *See, e.g.*, *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 123, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)* (damages are a "matter of just and reasonable inference from the proof of defendants' wrongful acts and their tendency to injure plaintiffs' business, and from the evidence of the decline in prices, profits and values, not shown to be attributable to other causes"). Defendants worry that "the jury could conclude that Zoove properly terminated Sumotext (and thus did not restrain trade under Count IV) but that the methods by which the defendants acquired were improper (and thus that there was a conspiracy to monopolize under Count V)." Def. MIL No. 3 at 2. But the **[*23]** latter violation may be sufficient to establish the entire damages amount. *Oltz v. St. Peter's Community Hospital, 19 F.3d 1312 (9th Cir. 1994)*, is instructive on this issue. In that case, plaintiff Oltz proved only that an initial exclusive contract between the alleged conspirators violated the antitrust laws, but not that a later, renegotiated contract was also unlawful. *Id. at 1314*. The Ninth Circuit held that Oltz was not required to separate out damages resulting from the renegotiated contract: "Because the initial conspiracy destroyed his practice, Oltz is entitled to seek recovery for all damages resulting from the destruction of his business in Helena." *Id.*; *see also* *Nat'l Farmers' Org., Inc. v. Associated Milk Producers, Inc., 850 F.2d 1286, 1307 (8th Cir. 1988)* ("[I]f an antitrust plaintiff alleges that the defendant engaged in unlawful acts A, B, C, and D, and acts C and D are later rejected as a basis of liability, it does not automatically follow that the damage award must be reduced. Rather, if acts A and B support the entire damage award, it must be sustained.").

The Court is more concerned about Dr. Goedde's failure to apportion damages between the allegedly distinct markets for leasing and serving StarStar numbers in the United States. For instance, the jury could conclude that there is a distinct market for servicing StarStar numbers but **[*24]** not for leasing StarStar numbers. Moreover, "conduct found anticompetitive in one market may not be anticompetitive in another market." *Image Tech. Servs, 125 F.3d at 1224*. Should the jury find in Plaintiff's favor as to only one market, Defendants have a plausible argument that Sumotext's lost profits from re-leasing alone should be disaggregated from its losses from having been excluded from the servicing market. *See* Def. MIL No. 3 at 1-2.

It is premature to litigate such possibilities at this stage, however. The evidence at trial will determine whether Dr. Goedde's damages estimate is incongruous with the jury's liability findings. Furthermore, as alluded to above, it may be that disaggregation is "impossible or impractical." *Litton Sys., 1996 U.S. Dist. LEXIS 14662, 1996 WL 634213, at *2*. Plaintiff is entitled to show that damages cannot be disaggregated across the various markets or courses of conduct in the instant case, at which point "the burden shifts to the defendant to demonstrate the contrary." *Spray-Rite Serv. Corp. v. Monsanto Co., 684 F.2d 1226, 1243 (7th Cir. 1982)*, *aff'd*, *465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*.

In sum, Defendants' concerns are well-taken, but insufficient to justify excluding Dr. Goedde's damages opinion. If the jury renders a split verdict and awards the full $9,223,500 in damages, Dr. Goedde's damages opinion may very well prove inadequate to support the **[*25]** damages award. But that is properly addressed in a post-trial motion. *See, e.g.*, *Litton Sys., 1996 U.S. Dist. LEXIS 14662, 1996 WL 634213, at *4* (ordering a new trial on damages). The motion in limine is, therefore, DENIED.

ii. Failure to Consider Data on StarStar Number Usage

Defendants also object to Dr. Goedde's antitrust damages calculation on the ground that he "did not look at usage data"—i.e., data on the degree to which the downstream customers were receiving calls on each of the StarStar numbers they were leasing. Def. MIL No. 3 at 4. As background, Dr. Goedde's damages calculation projected the lease revenues Plaintiff would have earned through 2033. *See* ECF 346-6 ¶ 39. That calculation includes an estimate of net growth in lease revenues, which in turn accounts for customer attrition—i.e., customers who would not have renewed their leases with Plaintiff. Opp. to Def. MIL No. 3 at 6; *see* ECF 346-6 ¶ 39. Defendants complain that Dr. Goedde did not base his estimate of customer attrition on usage data. Def. MIL No. 3 at 4 (citing ECF 386-4 ("Goedde Tr.") at 8-9). This is problematic, Defendants say, because Dr. Goedde purportedly acknowledged that customer attrition is affected by usage rates when he testified that "if a downstream customer **[*26]** wasn't getting much use of the number, they would cancel it." Def. MIL No. 3 at 4.[3]

Plaintiff concedes that Dr. Goedde did not consider usage data. In fact, Dr. Goedde did not calculate a customer attrition rate at all; instead, he estimated "net lease growth" rates for each quarter. Those rates represent *net* growth, which means they "already account for cancellations owing to a customer's belief that their **numbers were not getting enough usage." Opp. to Def. MIL No. 3 at 6. Consequently, Dr. Goedde did not need to separately estimate customer attrition.

The Court notes that Plaintiff's representation that Dr. Goedde's net growth rates include "real-world cancellations," *id.*, is not strictly true. According to the footnotes in his report, Dr. Goedde used "actual Q1 2016 growth, with quarterly step-downs through the end of 2017" for 2016 and 2017, but then switched to the 4.0% annual "long term growth rate projected by the Federal Reserve" for 2018 to 2033. ECF 346-6 at 26, 28. In any event, the source of Dr. Goedde's net growth rates goes to the weight of his testimony, not to its admissibility. Again, Defendants' are free challenge the accuracy of Dr. Goedde's estimates on cross-examination **[*27]** and using their rebuttal expert witness. The Court DENIES the motion to exclude Dr. Goedde's damages opinion for failure to consider usage rates.

D. Defendants' Motion in Limine No. 4

Fourth, Defendants move to exclude portions of Plaintiff's expert, Dr. Ryan Sullivan pursuant to *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. ECF 387 ("Def. MIL No. 4"). Dr. Sullivan is an economist who has been retained by Plaintiff to testify on the scope of the relevant markets in this case. ECF 402 ("Opp. to Def. MIL No. 4").

Federal Rule of Evidence 702 provides that a qualified expert may testify if "(a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case."

In *Daubert*, the Supreme Court held that *Rule 702* requires the district court to act as a gatekeeper to "ensure that any and all scientific testimony or evidence admitted is not only relevant, but reliable." *509 U.S. at 589*. The Supreme Court discussed four factors that may be inform the reliability determination: (1) whether **[*28]** the theory or technique used by the expert "can be (and has been) tested"; (2) "whether the theory or technique has been subjected to peer review and publication"; (3) "the known or potential rate of error"; and (4) whether there is "general acceptance" of the theory or technique in the "relevant scientific community." *Id. at 593-94*; *see also Estate of Barabin v. AstenJohnson, Inc., 740 F.3d 457, 463 (9th Cir. 2014)* (reciting factors). Then, in *Kumho Tire Co., Ltd. v. Carmichael, 526 U.S. 137, 147, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*, the Supreme Court clarified that the "basic gatekeeping obligation" articulated in *Daubert* applies not only to scientific testimony but to all expert testimony. The Supreme Court also emphasized that the reliability inquiry is a flexible one, and "whether *Daubert*'s specific factors are, or are not, reasonable measures of reliability in a particular case is a matter that the law grants the trial judge broad latitude to determine." *Id. at 153*.

---

[3] Defendants cite "Goedde Tr. 123:9-19" for this quote but have failed to attach that portion of the deposition to their motion. In any event, the Court does not rely upon the quoted testimony to rule on the motion.

Pursuant to _Rule 702_ and *Daubert*, the district court must also "ensure that the proposed expert testimony is relevant and will serve to aid the trier of fact." _United States v. Finley, 301 F.3d 1000, 1008 (9th Cir. 2002)_ (citing _Daubert, 509 U.S. at 592-93_).

Importantly, however, the district judge's role under *Daubert* is as "a gatekeeper, not a fact finder." *Primiano v. Cook, 598 F.3d 558, 564-65 (9th Cir. 2010)* (internal quotation marks and citation omitted). "When an expert meets the threshold established by _Rule 702_ as explained in Daubert, the expert **[*29]** may testify and the jury decides how much weight to give that testimony." *Id. at 565*. "Shaky but admissible evidence is to be attacked by cross examination, contrary evidence, and attention to the burden of proof, not exclusion." *Id. at 564*.

Here, Defendants raise three objections to Dr. Sullivan's proffered testimony. As explained below, the Court agrees with Plaintiff that none of these justifies excluding or limiting Dr. Sullivan's testimony and DENIES Defendants' motion.

iii. Dr. Sullivan's Opinions Regarding the Functionality of StarStar Numbers

First, Defendants argue that Dr. Sullivan should not be able to opine on "why **numbers are different from other consumer engagement products" because (1) he "is not an expert on consumer engagement" and (2) his opinions are not "beyond the common knowledge of the average layman." Def. Mot. No. 4 at 1. The opinions at issue identify the attributes that purportedly distinguish StarStar numbers from competing consumer engagement products such as short codes for texting, apps and websites, and 1-800 phone numbers. *See* ECF 387-2 ("Sullivan Report") ¶¶ 91-98. For instance, Sullivan states that (i) StarStar numbers are "short, unique, and easy to remember," (ii) they **[*30]** "can be used with any mobile phone, require no additional software to use, are easy for the brand to set up, are easy to use and free for the consumer, offer variable length namespaces, and provide text, voice, and multimedia responses," and (iii) are consequently "functionally distinct" from various alternatives. Def. Mot. No. 4 at 1 (citing Sullivan Report ¶¶ 91, 93-95).

As to Defendants' argument regarding the scope of Dr. Sullivan's expertise, Plaintiff responds that Dr. Sullivan did not need specific expertise on StarStar numbers or the consumer engagement industry to provide the opinions at issue. Opp. to Def. Mot. No. 4 at 3. Rather, as an economist with a Ph.D from UC San Diego, he "applied his industrial organization economic training" to the relevant products. *Id.*; *see* Sullivan Report ¶¶ 6-7. The Court agrees. The threshold for expert qualifications under _Federal Rule of Evidence 702_ is "low: a minimal foundation of knowledge, skill, and experience suffices*."* _PixArt Imaging, Inc. v. Avago Tech. Gen. IP (Sing.) Pte. Ltd., No. C 10-00544 JW, 2011 U.S. Dist. LEXIS 133502, 2011 WL 5417090, at *3 (N.D. Cal. Oct. 27, 2011)_ (citing _Hangarter v. Provident Life & Acc. Ins. Co., 373 F.3d 998, 1015 (9th Cir. 2004))_. In light of this "broad conception of expert qualifications," the Court holds that Dr. Sullivan has the requisite expertise in "the general field" of economics **[*31]** to review data specific to the consumer engagement industry and render an opinion on product differentiation in that industry. _Hangarter, 373 F.3d at 1015, 1015 n. 12_*; see, e.g.*, _In re MyFord Touch Consumer Litig., No. 13-CV-03072-EMC, 2016 U.S. Dist. LEXIS 179487, 2016 WL 7734558, at *5 (N.D. Cal. Sept. 14, 2016)_ ("Although he has not worked specifically with automobiles," expert's testimony about the technical problems with Ford's infotainment system fell within his "broad engineering and human factors expertise."); _Hynix Semiconductor Inc. v. Rambus Inc., No. CV-00-20905 RMW, 2008 U.S. Dist. LEXIS 123822, 2008 WL 73689, at *11 (N.D. Cal. Jan. 5, 2008)_ (finding it was "within his economic expertise" for expert to testify as to "the effect alternative technologies would have had on Rambus's ability to wield market power" in various specific technology markets). In the Court's view, Dr. Sullivan's "lack of particularized expertise goes to the weight accorded [his] testimony, not to the admissibility of [his] opinion as an expert." _United States v. Garcia, 7 F.3d 885, 890 (9th Cir. 1993)_.

The Court likewise rejects Defendants' contention that Dr. Sullivan's opinion will not "assist the trier of fact," _Fed. R. Evid. 702_, because the jury can examine the same documents and testimony cited by Dr. Sullivan and form their own views on the functionality of StarStar numbers. Def. Mot. No. 4 at 1. Generally, "[e]xpert testimony assists the trier of fact when it provides **[*32]** information beyond the common knowledge of the trier of fact." _Finley, 301 F.3d at 1008_. Critically, however, the Ninth Circuit has admonished courts "not to overstate the scope of the average juror's common understanding and knowledge" in determining whether expert testimony would be helpful to the jury. *Id. at 1013*. Although it is certainly possible that a juror could compare the relevant products in this case and identify various similarities and differences, Dr. Sullivan opines on the key dimensions across which the products compete. Furthermore, courts have consistently allowed expert testimony on the differences across products in antitrust cases and other contexts. Hence, the Court finds that his opinions are not so obvious as to be unhelpful to the jury.

iv. Dr. Sullivan's Opinions Regarding Market Definition

Second, Defendants argue that Dr. Sullivan's opinion that "there are distinct antitrust markets for **number re-leasing and servicing" is invalid because he did not determine the "cross-elasticity of demand between **numbers and the various alternative communication methods that are the equivalent of StarStar numbers." Def. MIL No. 4 at 2.

It is true that cross-elasticity of demand—i.e., "whether consumers **[*33]** view the products as substitutes for each other," *Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421, 1435 (9th Cir. 1995)*—is a guiding principle of product market definition. *Newcal Indus., Inc. v. Ikon Office Sol., 513 F.3d 1038, 1045 (9th Cir. 2008)* ("The outer boundaries of a product market are determined by . . . the cross-elasticity of demand between the product itself and substitutes for it.") (quoting *Brown Shoe v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*. A common method for establishing (or disproving) the substitutability of two or more products is the "SSNIP" test, which "asks whether a [hypothetical] monopolist in the proposed market could profitably impose a small but significant and nontransitory price increase" (or "SSNIP") on a product in the proposed market. *Theme Promotions, Inc. v. News Am. Mktg. FSI, 546 F.3d 991, 1002 (9th Cir. 2008)*. As the Ninth Circuit explained:

> If a significant number of customers would respond to a SSNIP by purchasing substitute products, the SSNIP would not be profitable for the hypothetical monopolist. If a monopolist could not profitably impose a SSNIP, the market definition should be expanded to include those substitute products that constrain the monopolist's pricing.

Id.

Defendants contend that Dr. Sullivan's market definition opinion is unreliable because he failed to perform the SSNIP test or otherwise calculate the cross-elasticity of demand between StarStar numbers and various potential substitutes. Def. MIL **[*34]** No. 4 at 4-5. Instead, Defendants say, Dr. Sullivan looked only to the large price differential across the products. *Id.* At the outset, the Court agrees with Defendants that comparing existing prices is not a "SSNIP test" and that "the scope of the relevant market is not governed by the presence of a price differential between competing products." *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1274 (9th Cir. 1975)*. What Defendants fail to recognize, however, is that the SSNIP test is a *legal* test; it is not a form of scientific analysis. And Dr. Sullivan's report makes clear that he did apply the SSNIP test, albeit without reference to any empirical analysis. *See* Sullivan Report ¶¶ 103-109.

The heart of Defendants' objection, then, appears to be that Dr. Sullivan failed to substantiate his conclusions under the SSNIP test using empirical analysis. To be sure, it may be desirable to collect data and construct a formal econometric model of the SSNIP test. As Plaintiff correctly emphasizes, however, there is no requirement in this Circuit that an expert use any particular form of analysis in developing an opinion on market definition. Courts in this district and others have often admitted expert testimony on market definition where the expert did not **[*35]** conduct an econometric study. *See, e.g.*, *Apple iPod iTunes Antitrust Litig., No. 05-CV-0037 YGR, 2014 U.S. Dist. LEXIS 136437, 2014 WL 4809288, at *7 (N.D. Cal. Sept. 26, 2014)* (denying *Daubert* motion where economics expert looked to "internal Apple documents, employee testimony, and discovery responses, third-party information such as contemporaneous financial analysis and press coverage"); *Hynix Semiconductor Inc., 2008 U.S. Dist. LEXIS 123822, 2008 WL 73689, at *10* (admitting expert report on market definition though expert did not use the SSNIP test to determine if the technologies are close economic substitutes). That Dr. Sullivan's opinions have a foundation in qualitative data such as employee testimony, third-party industry analyses, and media coverage is enough to establish their admissibility. *See* Sullivan Report ¶¶ 89-100, 108.

Accordingly, the Court DENIES Defendants' motion to exclude Dr. Sullivan's opinions regarding market definition for having failed to conduct an econometric analysis. Defendants' arguments that Dr. Sullivan's opinions are conclusory and unpersuasive are proper subjects for cross-examination.

v. Dr. Sullivan's Opinions Regarding Market Power

Defendants' third objection is to Dr. Sullivan's statement in his report that "Defendants have possessed and exerted market power by way of the alleged anticompetitive conduct." **[*36]** Def. MIL No. 4 at 4 (quoting Sullivan Report ¶ 47). Because "market definition and market power are essentially questions of fact" for the jury, *id.* at 5, Defendants believe this statement runs afoul of the rule that "an expert witness cannot give an opinion as to her legal conclusion, *i.e.*, an opinion on an ultimate issue of law," *id.* (quoting *Hangarter, 373 F.3d at 1016*). In response, Plaintiff assures the Court that Dr. Sullivan will provide "economic opinions only" and not impermissible legal conclusions.

To be precise, *Federal Rule of Evidence 704(a)* provides that "an opinion is not objectionable just because it embraces an ultimate issue." *Legal conclusions*, however, are forbidden. This prohibition recognizes that "when an expert undertakes to tell the jury what result to reach, this does not aid the jury in making a decision, but rather attempts to substitute the expert's judgment for the jury's." *United States v. Diaz, 876 F.3d 1194, 1197 (9th Cir. 2017)* (internal quotation marks and citation omitted). "Similarly, instructing the jury as to the applicable law is the distinct and exclusive province of the court." *Hangarter, 373 F.3d at 1016*. At the same time, the Ninth Circuit has recognized that "it is sometimes impossible for an expert to render his or her opinion on a subject without resorting to language that recurs in **[*37]** the applicable legal standard." *Diaz, 876 F.3d at 1198*. In *Diaz*, for instance, the Ninth Circuit affirmed the district court's decision to permit the Government's medical expert to testify that the defendant's prescribing practices were "outside the usual course of medical practice" and lacking "legitimate medical purpose"—phrases that also appear in the elements of the relevant criminal statute. *Id. at 1199*. In sum, although an expert witness may express facts or opinions using "legal terminology," he may not explain the law to the jury or tell the jury how to apply the law to the facts of the case. *Nationwide Transp. Fin. v. Cass Info. Sys., Inc., 523 F.3d 1051, 1058-59 (9th Cir. 2008)*.

Based on the foregoing principles, the Court holds that Dr. Sullivan may provide his expert economic opinion as to whether Defendants possessed market power, to the extent that opinion is supported by economic analysis. In so doing, he may use the term "market power." Although that term is used in antitrust jurisprudence, it does not have so "separate, distinct and specialized" a meaning in the law as opposed to economics that its use rises to the level of a legal conclusion. *Diaz, 876 F.3d at 1198* (agreeing that "legitimate medical purpose" does not have a "separate, distinct and specialized meaning" in law than it has in medicine). Dr. **[*38]** Sullivan may not, however, give the bare conclusion that "Defendants have possessed and exerted market power by way of the alleged anticompetitive conduct." *See* *Hynix Semiconductor Inc., 2008 U.S. Dist. LEXIS 123822, 2008 WL 73689, at *13* (barring an expert from testifying that the defendant's conduct is "anticompetitive" because he "merely attaches the label 'anticompetitive' to defendant's actions without any "economic analysis"). In addition, Dr. Sullivan may not instruct the jury on how "courts have defined the requisite market power for claims brought under *Sections 1* and *2* of the Sherman Act," Sullivan Report ¶ 45, or otherwise "go beyond providing a legal framework," for his analysis, *Huawei Techs., Co, Ltd v. Samsung Elecs. Co, Ltd., 340 F. Supp. 3d 934, 965 (N.D. Cal. 2018)*.

In the instant motion, the only purportedly objectionable portion of Dr. Sullivan's report that Defendants cite is a single sentence summarizing his findings; Defendants have not attached the sections of the report containing Dr. Sullivan's substantive opinions. Because this record is insufficient to justify the exclusion of particular testimony at the motion in limine stage, the motion is DENIED.

E. Defendants' Motion in Limine No. 5

Last, Defendants are concerned that "Sumotext intends to call all six defense witnesses . . . live as adverse witnesses during Sumotext's case in chief." **[*39]** ECF 388 ("Def. MIL No. 5") at 1. Defendants acknowledge the "general right of a plaintiff to call adverse witnesses," but ask the Court to prohibit Sumotext from "calling *all of* the defense's witnesses adversely" for two reasons: (1) it would inconvenience the five witnesses who live in Florida to travel to San Jose twice, and (2) it would produce "a disjointed trial narrative that would unfairly disadvantage the defendants." *Id.* at 1-2.

The Court is sympathetic to Defendants' concerns. However, Defendants have cited no authority for the proposition that calling all—rather than merely some—of the defense's witnesses is unfairly prejudicial, and the Court sees no principled basis upon which to determine which witnesses may or may not be called. Hence, the Court will not arbitrarily limit the number of defense witnesses Plaintiff may call during its case-in-chief. Instead, the Court will grant Defendants' alternative request to have the option of eliciting evidence for their case-in-chief from their designated witnesses at the time that Plaintiff calls those witnesses; Defendants will not be limited to cross-examining on topics covered during Plaintiff's direct examination. Defendants are also **[*40]** free to advise the jury that it is doing so for the convenience of the witness. Plaintiff has not opposed this commonly-used trial practice. ECF 403 at 2. Defendants are not, of course, required to put on their full case during Plaintiff's case-in-chief; they may call their witnesses a second time if they so choose.

Defendants' motion is DENIED as to the request to limit the witnesses Plaintiff may call but GRANTED as to the request to fully examine the defense witnesses when they are called by Plaintiff.

IV. ORDER

For the foregoing reasons, the Court rules on Plaintiff's motions in limine as follows:

- Motion in Limine No. 1, ECF 390: DENIED in part without prejudice and GRANTED in part.
- Motion in Limine No. 2, ECF 391: DENIED without prejudice.
- Motion in Limine No. 3, ECF 392: GRANTED.

The Court rules on Defendants' motions in limine as follows:

- Motion in Limine No. 1, ECF 384: GRANTED in part and DENIED without prejudice in part.
- Motion in Limine No. 2, ECF 385: DENIED without prejudice.
- Motion in Limine No. 3, ECF 386: DENIED without prejudice.
- Motion in Limine No. 4, ECF 387: DENIED without prejudice.

- Motion in Limine No. 5, ECF 388: DENIED as to the request to limit the witnesses **[*41]** Plaintiff may call but GRANTED as to the request to fully examine the defense witnesses when they are called by Plaintiff rather than call the witnesses a second time.

IT IS SO ORDERED.

Dated: February 3, 2020

Opinion by: WENDY B. VITTER

Opinion

ORDER [*3]

Before the Court is Plaintiff's Motion to Strike Defendants' Affirmative Defenses (R. Doc. 15),[1] Plaintiff's Motion to Dismiss for Failure to State a Claim (R. Doc. 16),[2] and Defendants' Motion for Leave to File Supplemental Memorandum in Support of Opposition to Plaintiff's *Rule 12(b)(6)* Motion to Dismiss Antitrust Counterclaims (R. Doc. 45).[3]

I. Factual Background

This is a trademark infringement case. The plaintiff ("721 Bourbon, Inc. d/b/a Tropical Isle") claims that it was forced to file this lawsuit in April 2019 as a last resort because the defendants refused to stop selling cocktails in a souvenir yard cup that the plaintiff claims mimics the federally registered trade dress design of Tropical Isle's distinctive, green, souvenir yard cup.[4] The defendants answered the plaintiff's complaint with numerous affirmative defenses and antitrust and anticompetition counterclaims.[5] The plaintiff's complaint brings four claims against the defendants: federal trademark infringement; federal unfair competition; state trademark dilution; and state unfair trade practices.

II. Legal Standard and Analysis

The plaintiff seeks to strike the defendants' affirmative defenses and dismiss Counts IV, **[*4]** V, and VI of the defendants' counterclaims.[6]

A. Striking Affirmative Defenses

A court may strike any defense that is insufficient, redundant, immaterial, impertinent, or scandalous either on its own motion, or on motion by a party.[7] "A motion to strike is appropriate when the allegations are prejudicial to the opposing party or immaterial to the lawsuit. An allegation is immaterial to the lawsuit when the challenged allegations do not bear on the subject matter of the litigation."[8] The Fifth Circuit provides that "[a]n affirmative defense is not valid if it appears to a certainty that the plaintiff would succeed despite any set of facts which could be proved in support of the defense."[9] Whether an affirmative defense is insufficient depends on "the nature of the claim for relief and the defense in question."[10] A motion to strike an affirmative defense is generally disfavored.[11] In

[8] *Schlesinger, 2014 U.S. Dist. LEXIS 15574, 2014 WL 527657, at *1* (internal citations omitted).

[9] *EEOC v. First Nat'l Bank of Jackson, 614 F.2d 1004, 1008 (5th Cir. 1980)*.

deciding a motion to strike, the Court considers whether the affirmative defenses asserted by the defendant are sufficient as a matter of law.[12] The Court considers whether the defenses are applicable and whether they are sufficiently pled as to give the plaintiff fair notice: "a defendant . . . must plead an affirmative **[*5]** defense with enough specificity or factual particularity to give the plaintiff 'fair notice' of the defense that is being advanced."[13] The requirement is met if the defendant "sufficiently articulated the defense so that the plaintiff was not a victim of unfair surprise."[14]

Plaintiff argues that the second, third, fourth, sixth, ninth, twelfth, and seventeenth affirmative defenses are actually negative arguments against elements of trademark infringement, which the plaintiff bears the burden of proving at trial.[15] After careful consideration of the parties' memoranda, the Court strikes as redundant the second, third, fourth, sixth, thirteenth, and fourteenth affirmative defenses. Because the Court grants the plaintiff's motion to dismiss Counts IV, V, and VI of the defendants' counterclaims, discussed below, the tenth and eleventh affirmative defenses fail and are hereby stricken. The affirmative defenses that are not stricken as detailed in this Order remain.

B. Dismissing Counterclaims

The plaintiff seeks to dismiss Counts IV, V, and VI of the defendants' counterclaims. Count IV alleges an antitrust violation under the Sherman Act, attempted monopolization; **[*6]** Count V alleges unfair competition under Louisiana law; and Count VI alleges negligent interference under Louisiana law.

Under *Federal Rule of Civil Procedure 12(b)(6)*, a defendant can seek dismissal of a complaint, or any part of it, for failure to state a claim upon which relief may be granted.[16] To survive a *Rule 12(b)(6)* motion to dismiss, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'"[17] "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged."[18] "The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully."[19]

[18] *Gentilello v. Rege, 627 F.3d 540, 544 (5th Cir. 2010)* (quoting *Iqbal, 556 U.S. at 678* (quotation marks omitted)).

[19] *Iqbal, 556 U.S. at 679* (quotation marks omitted).

A court must accept all well-pleaded facts as true, viewing them in the light most favorable to the plaintiff.[20] A court, however, is not bound to accept as true conclusory allegations, unwarranted factual inferences, or legal conclusions.[21] "Dismissal is appropriate when the complaint on its face shows a bar to relief."[22] In deciding a *Rule 12(b)(6)* motion to dismiss, a court is generally prohibited from considering information outside the pleadings **[*7]** but may consider documents outside of the complaint when they are: (1) attached to the motion; (2) referenced in the complaint; and (3) central to the plaintiff's claims.[23]

Under *Section 1* of the *Sherman Act*, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal."[24] For the defendants to prevail on their *Section 1* violation counterclaim, they must show that the plaintiff (1) engaged in a conspiracy (2) that produced some anticompetitive effect (3) in the relevant market.[25] The defendants must also show an actual injury and an antitrust injury, meaning the plaintiff's activities caused an injury to competition.[26]

The plaintiff seeks protection under the *Noerr-Pennington* doctrine for Counts IV, V, and VI of the defendants' counterclaims. This doctrine was established by two Supreme Court cases: *Eastern R.R. Presidents Conference v. Noerr Motor Freight Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*, and *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*. "The essence of the doctrine is that parties who petition the government for governmental action favorable to them cannot be prosecuted under the antitrust laws even though their petitions are motivated by anticompetitive intent."[27] Pre-suit threats to litigate, *i.e.*, **[*8]** cease-and-desist letters, made in good faith are also exempt.[28] The plaintiff argues that the *Noerr-Pennington* doctrine can apply to Counts V and VI, which are brought under the *Louisiana Unfair Trade Practices Act ("LUPTA")*.[29] The Fifth Circuit provides that

> Although the *Noerr—Pennington* doctrine initially arose in the antitrust field, other circuits have expanded it to protect *first amendment* petitioning of the government from claims brought under federal and state laws, including *section 1983* and common-law tortious interference with contractual relations. We find it easy to agree that the same rationale under ***antitrust law*** that supports [the defendant's] petitions to the City [of Dallas, another defendant] also serves to protect [the defendant] from the tort claim. There is simply no reason that a common-law tort doctrine can any more permissibly abridge or chill the constitutional right of petition than can a statutory claim such as antitrust.

Video Intern. Prod., Inc. v. Warner-Amex Cable Commc'ns., Inc., 858 F.2d 1075, 1084 (5th Cir. 1988) (internal citations omitted). The Court finds that the same reasoning applies to the defendants' counterclaims under Louisiana law.

The defendants argue that the plaintiff is not entitled to this immunity. The United States Supreme Court has carved out an antitrust **[*9]** exemption for efforts to influence governmental action through the *Noerr-Pennington* antitrust immunity doctrine.[30] The petitioning of governmental bodies, including judicial bodies,[31] does not qualify for *Noerr-Pennington* immunity "if it is a mere sham to cover an attempt to interfere directly with the business relationships of a competitor."[32] The sham exception applies in this suit if the plaintiff is using litigation as an anticompetitive weapon, rather than genuinely seeking to achieve an intended result.[33]

The Supreme Court has articulated a two-part test for determining whether litigation is a "sham:"

> First, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of the definition a court should focus on whether the baseless suit conceals "an attempt to interfere directly" **[*10]** with a competitor's business relationships, *Noerr, supra, 365 U.S., at 144, 81 S.Ct., at 533*, through the "use [of] the governmental process—as opposed to the outcome of that process—as an anticompetitive weapon[.]" This two-tiered process requires a plaintiff to disprove the challenged lawsuit's legal viability before the court will entertain evidence of the suit's economic viability.

Prof'l Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 50, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993) (internal citations omitted). "The existence of probable cause to institute legal proceedings precludes a finding that an antitrust defendant has engaged in sham litigation."[34] Probable cause in this sense requires no more than a reasonable belief that there is a chance that a claim may be held valid upon adjudication.[35]

The defendants argue that the plaintiff is not entitled to *Noerr-Pennington* immunity because the plaintiff's actions allegedly fall under the "sham" exception: "[The plaintiff's] actions were objectively baseless and subjectively baseless as [the plaintiff] possessed the requisite intent."[36] Having carefully reviewed the relevant law and applicable memoranda, the Court finds that the defendants fail to prove that this litigation is a "sham." The defendants' continued iteration that the plaintiff's actions are objectively baseless does **[*11]** not make them so. Support for this finding includes the fact that the plaintiff owns a registered trademark and has taken steps to protect that trademark—before and by filing this lawsuit. The Court declines to discuss in detail the technical merits of the plaintiff's claims nor is the Court making a determination on whether the plaintiff will succeed at trial. This Order is limited to the Court's finding that this litigation is not a sham and, therefore, the Court dismisses Counts IV, V, and VI of the defendants' counterclaims.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN1[ ] **Summary Judgment, Burdens of Proof**

Summary judgment is appropriate when the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. A genuine issue for trial exists when the evidence is such that a reasonable jury could return a verdict for the nonmoving party. Under *Rule 56*, the movant bears the initial burden of informing the district court of the basis for its motion, and identifying those portions of the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, which it believes demonstrate the absence of a genuine issue of material fact. The mere existence of some alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no genuine issue of material fact. In responding to a summary judgment motion, the nonmoving party may not simply rest upon the allegations contained in the pleadings but must present specific facts to show that a genuine issue of material fact exists. *Fed. R. Civ. P. 56(e)(2)*.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > Cross Motions

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

HN2[] **Entitlement as Matter of Law, Appropriateness**

On cross-motions for summary judgment, the court assesses whether each movant has satisfied the requirements of *Fed. R. Civ. P. 56*. As with any summary judgment motion, a court considers cross-motions for summary judgment construing all facts, and drawing all reasonable inferences from those facts, in favor of the non-moving party. Inferences that are supported by only speculation or conjecture will not defeat a summary judgment motion.

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

HN3[] **Infringement Actions, Determinations**

A plaintiff must establish essentially two elements to prevail on Lanham Act trademark claims: (1) that it has a protectable trademark and (2) that defendants' use of the trademark is likely to cause confusion among consumers.

Trademark Law > ... > Registration Procedures > Federal Registration > Federal Registration as Evidence

HN4[] **Federal Registration, Federal Registration as Evidence**

Registry with the U.S. Patent and Trademark Office constitutes prima facie evidence of the validity of a plaintiff's registered trademarks and of a plaintiff's exclusive right to use the trademarks.

Copyright Law > ... > Criminal Infringement > Defenses > First Sale Doctrine

Trademark Law > ... > Infringement Actions > Defenses > First Use

Copyright Law > ... > Civil Infringement Actions > Defenses > First Sale Doctrine

HN5[] **Defenses, First Sale Doctrine**

The first sale doctrine is a defense to infringement subject to certain well-defined exceptions. Under the doctrine, when a retailer merely resells a genuine, unaltered good under the trademark of the producer, the use of the producer's trademark by the reseller will not deceive or confuse the public as to the nature, qualities, and origin of the good. Rather, the consumer gets exactly what the consumer bargains for, the genuine product of the particular producer. Thus, resale by the first purchaser of the original article under the producer's trademark is generally neither infringement nor unfair competition.

Trademark Law > Trademark Enforcement by US Customs > Importation and Recordation of Gray Market Goods

HN6[] **Trademark Enforcement by US Customs, Importation and Recordation of Gray Market Goods**

Trademarked goods are not considered genuine goods until the trademark owner first authorizes the sale of those goods.

Copyright Law > ... > Criminal Infringement > Defenses > First Sale Doctrine

Evidence > Burdens of Proof > Allocation

Copyright Law > ... > Civil Infringement Actions > Defenses > First Sale Doctrine

HN7[] **Defenses, First Sale Doctrine**

The party asserting the first sale defense bears the initial burden of satisfying its requirements. That means that the party asserting the first sale defense has the burden to show ownership through lawful acquisition.

Evidence > Burdens of Proof > Allocation

HN8[] **Burdens of Proof, Allocation**

Fairness dictates that a litigant ought not have the burden of proof on facts particularly within the knowledge of the opposing party.

Copyright Law > ... > Criminal Infringement > Defenses > First Sale Doctrine

HN9[] **Defenses, First Sale Doctrine**

The first sale doctrine does not apply to products that have been materially altered from their original form. It is incumbent upon the reseller to show that the differences are not of the kind that consumers would likely consider in purchasing the product. An alteration is material if it changes something about a product that is relevant to consumers' decision to purchase the product.

Copyright Law > ... > Criminal Infringement > Defenses > First Sale Doctrine

Copyright Law > ... > Civil Infringement Actions > Defenses > First Sale Doctrine

HN10[] **Defenses, First Sale Doctrine**

Absence of or a different warranty is held to be a material difference for purposes of the first sale doctrine.

Copyright Law > ... > Criminal Infringement > Defenses > First Sale Doctrine

HN11[] Defenses, First Sale Doctrine

Differences in warranties must influence a customer's purchasing decision to overcome the first sale doctrine. It is incumbent upon the re-seller to show that the differences are not of the kind that consumers would likely consider in purchasing the product.

Trademark Law > Likelihood of Confusion > Factors for Determining Confusion > Relationship of Goods

HN12[] Factors for Determining Confusion, Relationship of Goods

Legitimate quality control measures can constitute a material difference in appropriate circumstances. Quality control measures may create subtle differences in quality that are difficult to measure but important to consumers. Courts do not require trademark owners show that the actual quality of the inspected goods is measurably higher than that of the uninspected goods. At the same time, quality control is not a talisman the mere utterance of which entitles the trademark owner to judgment. Rather, the test is whether the quality control procedures established by the trademark owner are likely to result in differences between the products such that consumer confusion regarding the sponsorship of the products could injure the trademark owner's goodwill. Thus, a trademark owner must demonstrate that its quality control procedures create a likelihood that its products are different from those that it does not control. In so demonstrating, the trademark owner need not show that its procedures succeed in preventing virtually all substandard product from reaching the consumer. It is enough that it stops purchases of substandard product to create a material difference between the categories of authorized and unauthorized sales.

Copyright Law > ... > Criminal Infringement > Defenses > First Sale Doctrine

Trademark Law > ... > Infringement Actions > Defenses > First Use

Copyright Law > ... > Civil Infringement Actions > Defenses > First Sale Doctrine

HN13[] Defenses, First Sale Doctrine

Under the sponsorship exception, the first sale doctrine's protections do not extend to resellers who use other entities' trademarks to give the false impression that they are favored or authorized dealers for a product. Thus, use of a plaintiff's trademark in promotional materials, such as advertising or displays, is not protected by the first sale doctrine, but use of a plaintiff's trademark solely to identify a product up for sale is protected. The sponsorship exception is a relevant inquiry because one who resells trademark goods is obligated to do so in a manner that is not likely to cause confusion or imply that the seller is associated with the manufacturer. That means that conduct that goes beyond the mere resale of trademarked goods and its incidental advertising may not be protected by the first sale doctrine.

Evidence > Burdens of Proof > Allocation

Trademark Law > Causes of Action Involving Trademarks > Infringement Actions > Burdens of Proof

Trademark Law > Likelihood of Confusion > Factors for Determining Confusion > Relationship of Goods

HN14[] Burdens of Proof, Allocation

A trademark holder must establish that a defendant's use of its trademarks is likely to cause confusion among consumers. A seven-factor test can be used to determine whether a likelihood of confusion exists. Courts can presume likelihood of confusion where a defendant produces counterfeit goods in an apparent attempt to capitalize upon the popularity of, and demand for, another's product. The party asserting infringement bears the burden of proving confusion.

Trademark Law > ... > Registration Procedures > Federal Registration > Degree of Protection

Trademark Law > ... > Factors for Determining Confusion > Intent of Defendant to Confuse > Inferences & Presumptions

HN15[] Federal Registration, Degree of Protection

Under the counterfeit presumption test, a court presumes likelihood of confusion when a defendant has produced counterfeit goods to capitalize on the popularity of another's product. To be counterfeit, the goods must have been produced by an entity that was not authorized to use the mark at the time the goods were manufactured. *15 U.S.C.S. § 1116(d)(1)(B)*. Additionally, counterfeit goods must bear a spurious mark which is identical with, or substantially indistinguishable from, a registered mark. *15 U.S.C.S. § 1127*. A protected mark need not appear on an item to render it counterfeit; rather, the Lanham Act only requires that the protected mark be used in connection with the sale.

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 3rd Circuit Court

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 7th Circuit Court

Trademark Law > ... > Infringement Actions > Summary Judgment > Appropriateness

Trademark Law > ... > Factors for Determining Confusion > Similarity of Marks > Commercial Impressions

Trademark Law > ... > Factors for Determining Confusion > Intent of Defendant to Confuse > Inferred Intent

HN16[] Circuit Court Factors, 3rd Circuit Court

To determine whether a likelihood of confusion exists, a court considers the following factors: (1) the similarity between the marks in appearance and suggestion; (2) the similarity of the products; (3) the area and manner of concurrent use; (4) the degree and care likely to be exercised by consumers; (5) the strength of the plaintiff's mark; (6) any actual confusion; and (7) the intent of the defendant to palm off his product as that of another. No single factor is dispositive. Courts may assign varying weight to each of the factors depending on the facts presented, though usually the similarity of the marks, the defendant's intent, and actual confusion are particularly important. Where the evidence is so one-sided that there can be no doubt about how the question should be answered, the likelihood of confusion can be resolved on summary judgment.

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 11th Circuit Court

Trademark Law > ... > Factors for Determining Confusion > Similarity of Marks > Commercial Impressions

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 3rd Circuit Court

Trademark Law > Likelihood of Confusion > Factors for Determining Confusion > Relationship of Goods

HN17[] Circuit Court Factors, 11th Circuit Court

The first factor of the seven-factor test for determining whether a likelihood of confusion exists, similarity between marks in appearance and suggestion, is assessed by viewing the similarity of the marks as a whole, not from their elements separated and considered in detail. The test is whether the viewer of an accused mark would be likely to associate the product with which it is connected with the source of products with which an earlier mark is connected.

Trademark Law > ... > Factors for Determining Confusion > Similarity of Marks > Commercial Impressions

HN18[] Similarity of Marks, Commercial Impressions

The test for similarity of products is whether the parties' products are the kind the public might very well attribute to a single source. Consumers are likely to attribute similar products to a single source when the parties compete in the same market, targeting similar consumers.

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 7th Circuit Court

Trademark Law > Likelihood of Confusion > Factors for Determining Confusion > Relationship of Goods

HN19[] Circuit Court Factors, 7th Circuit Court

The third factor of the seven-factor test for determining whether a likelihood of confusion exists, the area and manner of concurrent use, assesses whether there is a relationship in use, promotion, distribution, or sales between the goods or services of the parties.

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 2nd Circuit Court

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 3rd Circuit Court

Trademark Law > Likelihood of Confusion > Factors for Determining Confusion > Relationship of Goods

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 7th Circuit Court

Trademark Law > ... > Factors for Determining Confusion > Similarity of Marks > Commercial Impressions

HN20[] Circuit Court Factors, 2nd Circuit Court

The fourth factor of the seven-factor test for determining whether a likelihood of confusion exists examines the degree of care likely to be exercised by purchasers to determine whether the purchasers would be confused by the defendant's products. The general rule guiding the factor is the more widely accessible and inexpensive the products the more likely that consumers will exercise a lesser degree of care and discrimination in their purchases. Some courts temper the weight given to the factor where there is a strong similarity of marks and identity of goods.

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 2nd Circuit Court

Trademark Law > Subject Matter of Trademarks > Eligibility for Trademark Protection > Strength of Trademark

Trademark Law > ... > Eligibility for Trademark Protection > Distinctiveness > Evidence of Distinctiveness

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 6th Circuit Court

HN21[] **Circuit Court Factors, 2nd Circuit Court**

The fifth factor of the seven-factor test for determining whether a likelihood of confusion exists inquires into the mark's strength. The stronger the mark, the more likely it is that encroachment on it will produce confusion. The strength of a trademark refers to the mark's distinctiveness, meaning its likelihood to identify the product as something emanating from a specific source.

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 11th Circuit Court

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 2nd Circuit Court

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 6th Circuit Court

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 4th Circuit Court

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 9th Circuit Court

HN22[] **Circuit Court Factors, 11th Circuit Court**

The sixth factor of the seven-factor test for determining whether a likelihood of confusion exists looks towards any evidence of actual consumer confusion. A plaintiff does not need evidence of actual confusion to demonstrate a likelihood of confusion.

Trademark Law > ... > Consumer Confusion > Circuit Court Factors > 11th Circuit Court

Trademark Law > ... > Factors for Determining Confusion > Intent of Defendant to Confuse > Inferred Intent

HN23[] **Circuit Court Factors, 11th Circuit Court**

The final factor of the seven-factor test for determining whether a likelihood of confusion exists focuses on evidence that a defendant attempted to pass off its product as having come from the plaintiff. Evidence of bad faith intent to confuse consumers is particularly relevant.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

HN24[] **False Advertising, Lanham Act**

A false advertising claim requires proof of five elements: (1) a false statement of fact by the defendant in a commercial advertisement about its own or another's product; (2) the statement actually deceived or has the tendency to deceive a substantial segment of its audience; (3) the deception is material, in that it is likely to influence the purchasing decision; (4) the defendant caused its false statement to enter interstate commerce; and (5) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to defendant or by a loss of goodwill associated with its products. The first element requires proof that the defendant made a false statement of fact in a commercial advertisement about its own or another's product. Two types of false statements can violate the Lanham Act: (1) claims that are literally false as a factual matter or (2) claims that may be literally true or ambiguous that implicitly convey a false impression, are misleading in context, or likely to deceive consumers. Literally false statements give rise to a presumption of deception and materiality.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

HN25[] **False Advertising, Lanham Act**

The false advertising remedy under the Lanham Act does not cover all deceitful business practices.

Antitrust & Trade Law > Consumer Protection > Likelihood of Confusion > False Designation of Origin

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Trade Dress Protection > Causes of Action

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Reverse Palming Off

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Palming Off

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Elements of False Designation of Origin

HN26[] **Likelihood of Confusion, False Designation of Origin**

Any person who uses in commerce any false designation of origin that is likely to cause confusion shall be liable to any person who believes that he or she is likely to be damaged by such act. *15 U.S.C.S. § 1125(a)*. To establish a reverse passing off claim, a plaintiff must establish that: (1) the defendant used a false designation of origin, or a false description or representation in connection with the goods or services; (2) the defendant caused the goods or services to enter interstate commerce; and (3) the plaintiff is a person who believes that he or she is likely to be damaged as a result. Reverse passing off is where a party misrepresents someone else's goods' as their own.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN27[] **Trade Practices & Unfair Competition, State Regulation**

A plaintiff must establish the same two elements for Lanham Act and Illinois Uniform Deceptive Trade Practices Act claims: (1) that it has a protectable trademark; and (2) that the defendants' use of the trademark is likely to cause confusion among consumers.

Copyright Law > Scope of Copyright Protection > Publication > Copyright Act of 1976

Copyright Law > ... > Civil Infringement Actions > Elements > Ownership

Copyright Law > ... > Ownership Rights > Reproductions > Infringement

Copyright Law > ... > Protected Subject Matter > Graphic, Pictorial & Sculptural Works > Works of Art

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Scope of Protection

HN28[] **Publication, Copyright Act of 1976**

The owner of a copyright has the exclusive right to use and to authorize reproduction of the copyrighted work in copies, including copies of pictorial and graphic works. *17 U.S.C.S. § 106(1)*, *(5)*; *17 U.S.C.S. § 501(a)*. Not all copying, however, is copyright infringement. To establish infringement, two elements must be proven: (1) ownership of a valid copyright, and (2) copying of constituent elements of the work that are original.

Copyright Law > Scope of Copyright Protection > Publication > Copyright Act of 1976

Copyright Law > ... > Fair Use > Fair Use Determination > Factors

Copyright Law > ... > Ownership Rights > Reproductions > Limitations

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Scope of Protection

HN29[] **Publication, Copyright Act of 1976**

The fair use doctrine is a statutory defense codified at *§ 107* of the Copyright Act. *17 U.S.C.S. § 107*. Under the doctrine, using another's copyrighted work is fair for purposes such as criticism, comment, news reporting, teaching, scholarship, or research and is therefore not an infringement of copyright.

Copyright Law > Copyright Infringement Actions > Civil Infringement Actions > Burdens of Proof

Copyright Law > ... > Fair Use > Fair Use Determination > Factors

Copyright Law > ... > Ownership Rights > Reproductions > Limitations

HN30[] **Civil Infringement Actions, Burdens of Proof**

To determine whether the fair use doctrine, codified in *17 U.S.C.S. § 107*, saves a defendant in a copyright infringement lawsuit, courts consider the following factors: (1) the purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes; (2) the nature of the copyrighted work; (3) the amount and substantiality of the portion used in relation to the copyrighted work as a whole; and (4) the effect of the use upon the potential market for or value of the copyrighted work. *17 U.S.C.S. § 107*. The burden of proof is on the defendant because fair use is an affirmative defense.

Copyright Law > ... > Fair Use > Fair Use Determination > Factors

HN31[] **Fair Use Determination, Factors**

The first factor of the fair use doctrine considers the purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes. *17 U.S.C.S. § 107(1)*. Central to determining the purpose and character of a work is whether the new work merely supersedes the original work, or instead adds something new with a further purpose or of a different character.

Copyright Law > ... > Fair Use > Fair Use Determination > Factors

Copyright Law > ... > Statutory Copyright & Fixation > Originality Requirement > Quantum of Originality

Copyright Law > ... > Protected Subject Matter > Graphic, Pictorial & Sculptural Works > Photographs

Copyright Law > Scope of Copyright Protection > Collective & Derivative Works > Originality Requirement

Copyright Law > ... > Subject Matter > Statutory Copyright & Fixation > Scope of Protection

HN32[] **Fair Use Determination, Factors**

The second factor of the fair use doctrine focuses on the nature of the copyrighted work. *17 U.S.C.S. § 107(2)*. Works that are creative in nature are closer to the core of intended copyright protection than are more fact-based works. But a copyrighted work need only possess at least some minimal degree of creativity. The requisite level of creativity is extremely low; even a slight amount will suffice. The vast majority of works make the grade quite easily, as they possess some creative spark, no matter how crude, humble, or obvious it might be. Courts find that photographs, even if taken partly for informative purposes, can still be creative.

Copyright Law > ... > Fair Use > Fair Use Determination > Factors

Copyright Law > ... > Ownership Rights > Reproductions > Limitations

HN33[] **Fair Use Determination, Factors**

The third factor of the fair use doctrine scrutinizes the amount taken by the alleged infringers in relation to the copyrighted work as a whole. *17 U.S.C.S. § 107(3)*. Courts sometimes ask whether the secondary use took the heart of the original work. Ultimately, the extent of permissible copying varies with the purpose and character of the use.

Copyright Law > ... > Fair Use > Fair Use Determination > Factors

Copyright Law > ... > Ownership Rights > Reproductions > Limitations

HN34[] **Fair Use Determination, Factors**

The fourth factor of the fair use doctrine addresses the effect of the use upon the potential market for or value of the copyrighted work. *17 U.S.C.S. § 107(4)*. The fourth factor is often the most important of the four. In assessing the factor, courts ask whether the contested use is a complement to the protected work rather than a substitute for it. Still, market harm is a matter of degree, and the importance of the factor will vary, not only with the amount of harm, but also with the relative strength of the showing on the other factors. Courts must consider not only the extent of market harm caused by the particular actions of the alleged infringer, but also whether unrestricted and widespread conduct of the sort engaged in by the defendant would result in a substantially adverse impact on the potential market for the original. The market in fair use cases means the potential market for not only the original work, but also derivative uses and licensing rights.

Copyright Law > ... > Deposit & Registration Requirements > Registration > Application Requirements

Copyright Law > ... > Civil Infringement Actions > Presumptions > Validity of Facts

Copyright Law > ... > Civil Infringement Actions > Presumptions > Validity of Copyright

Copyright Law > ... > Deposit & Registration Requirements > Registration > Registration Certificates

Copyright Law > ... > Civil Infringement Actions > Presumptions > Originality

HN35[] **Registration, Application Requirements**

Under *17 U.S.C.S. § 410(c)*, a certificate of a registration made before or within five years after first publication of the work shall constitute prima facie evidence of the validity of the copyright and of the facts stated in the certificate.

Copyright Law > Scope of Copyright Protection > Publication > Copyright Act of 1976

Copyright Law > ... > Damages > Types of Damages > Statutory Damages

Copyright Law > Copyright Infringement Actions > Civil Infringement Actions > Registration Requirement

Copyright Law > ... > Deposit & Registration Requirements > Registration > Registration Certificates

Copyright Law > ... > Civil Infringement Actions > Defenses > Statute of Limitations

HN36[] **Publication, Copyright Act of 1976**

Under *17 U.S.C.S. § 412*, statutory damages for copyright infringement are not available before the effective date of its registration, unless such registration is made within three months after the first publication of the work or one month after the copyright owner has learned of the infringement.

Copyright Law > ... > Elements > Copying by Defendants > Access

Evidence > Inferences & Presumptions > Inferences

HN37[] **Copying by Defendants, Access**

The Copyright Act affords no protection against the independent creation of a work that happens to resemble some prior creation. Recognizing that direct evidence of copying is only rarely available, a plaintiff may also prove copying by showing that the defendant had the opportunity to copy the original and that the two works are substantially similar, thus permitting an inference that the defendant actually did copy the original.

Copyright Law > ... > Substantial Similarity > Intrinsic Tests > Ordinary Observer Test

Copyright Law > ... > Protected Subject Matter > Graphic, Pictorial & Sculptural Works > Photographs

HN38[] **Intrinsic Tests, Ordinary Observer Test**

The United States Court of Appeals for the Seventh Circuit applies the ordinary observer test to determine whether two works are substantially similar. The test asks whether the accused work is so similar to the plaintiff's work that an ordinary reasonable person would conclude that the defendant unlawfully appropriated the plaintiff's protectable expression. With respect to photography, copyright infringement is found where the accused photographer in choosing the subject matter, camera angle, lighting, etc., copies and attempts to duplicate all of such elements as contained in a prior photograph.

Torts > ... > Contracts > Intentional Interference > Elements

HN39[] **Intentional Interference, Elements**

To state a claim for tortious interference, a plaintiff must show: (1) the existence of a valid and enforceable contract between the plaintiff and another, (2) the defendants' awareness of that contract, (3) the defendants' intentional and unjustified inducement of a breach of the contract, (4) a subsequent breach by the other caused by the defendants' conduct, and (5) damages.

Torts > Intentional Torts > Defamation > Defamation Per Quod

Torts > Intentional Torts > Defamation > Defamation Per Se

HN40[] **Defamation, Defamation Per Quod**

A defamatory statement is a statement that harms a party's reputation to the extent it lowers the party in the eyes of the community or deters the community from associating with the party. Under Illinois law, the elements of a defamation per se claim are that the defendant made a false statement about the plaintiff, that the defendant made an unprivileged publication of that statement to a third party, and that the publication caused damages. Illinois' courts recognize four categories of statements that are considered defamatory per se: (1) words that impute the commission of a criminal offense; (2) words that impute infection with a loathsome communicable disease; (3) words that impute an inability to perform or want of integrity in the discharge of duties of office or employment; or (4) words that prejudice a party, or impute lack of ability, in his or her trade, profession, or business. A statement that falls into one of these categories will not be found defamatory per se if it true or is reasonably capable of an innocent construction.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN41[] **Types of Contracts, Quasi Contracts**

If an unjust enrichment claim rests on the same improper conduct alleged in another claim, then the unjust enrichment claim will be tied to the related claim and unjust enrichment will stand or fall with the related claim.

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

Evidence > Burdens of Proof > Allocation

HN42[] Relief From Judgments, Altering & Amending Judgments

Under *Fed. R. Civ. P. 59(e)*, district courts may entertain motions to alter or amend a judgment. Motions under *Rule 59(e)* will only be granted to correct manifest errors of law or fact. A party moving for reconsideration pursuant to *Rule 59(e)* bears a heavy burden of establishing that the court should reverse its prior judgment. Motions to reconsider sounding under *Rule 59(e)* should only be granted in rare circumstances. A *Rule 59(e)* motion is not appropriately used to advance arguments or theories that could and should have been made before the district court rendered a judgment, or to present evidence that was available earlier.

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

HN43[] Relief From Judgments, Altering & Amending Judgments

A *Fed. R. Civ. P. 59(e)* motion is not an appropriate means to advance arguments or theories that could and should have been made before the district court rendered a judgment.

Torts > Intentional Torts > Defamation > Defamation Per Se

HN44[] Defamation, Defamation Per Se

The innocent construction rule has the effect of exculpating an otherwise defamatory per se statement and is considered an exception to the republication rule. Thus, even if republishing one's defamatory statement is defamation per se, if it is subject to an innocent construction, the republished statement is protected.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN45[] Standing, Requirements

Under Knevelbaard, an actual injury has four requirements: (1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent.

Opinion

[*1069] REDACTED PUBLIC VERSION of MEMORANDUM OPINION AND ORDER

MARVIN E. ASPEN, District Judge:

This is a voluminous intellectual property lawsuit with over 500 docket entries to date. Plaintiff Maui Jim, Inc. ("Maui Jim") alleges that the defendants sell non-genuine Maui-Jim-branded sunglasses while using its copyrighted photographs to falsely advertise that they are an authorized retailer. The defendants (collectively "Defendants," "SmartBuyGlasses," "SBG," or "Counterclaimants") counterclaim that Maui Jim's statements about their legitimacy amounts to defamation or, alternatively, warrant damages for unjust enrichment. Presently before us are Maui Jim's motions for summary judgment (Pl.'s Counterclaim MSJ (Dkt. No. 420); Pl.'s Copyright MSJ (Dkt. No. 423); Pl.'s MSJ on Lanham Act and Related State Law Claims ("Lanham MSJ") (Dkt. No. 426)) and Defendants' motion for summary judgment in their favor on both Maui Jim's **[**3]** claims and their counterclaims. (Defs.' MSJ (Dkt. No. 412).).[1] Also before us is Defendants' motion for reconsideration of our ruling on their earlier motion to dismiss. (Mot. for Reconsideration (Dkt. No. 378).) For the reasons stated below, Maui Jim's motions for summary judgment are **[*1070]** granted in part and denied in part, Defendants' motion for summary judgment is granted in part and denied in part, and Defendants' motion for reconsideration is denied.

BACKGROUND

Unless otherwise stated, the facts described herein are undisputed and culled from the parties' multiple Local Rule 56.1 submissions.

A. Parties

Maui Jim is a designer, manufacturer, and provider of premium prescription and non-prescription sunglasses. (Defs.' Resp. to Pl.'s Lanham SOF (Dkt. 459) ¶ 1.) Maui Jim's sunglasses are marketed, offered, and sold globally. (*Id.*) Defendants retail designer eyewear and they sell products into the United States through websites like SmartBuyGlasses.com. (Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶¶ 1, 45.) These sales include eyewear displaying Maui Jim's marks. (Defs.' Resp. to Pl.'s Lanham SOF ¶ 35.) Defendants sold approximately [TEXT REDACTED BY THE COURT] non-prescription and [TEXT REDACTED BY **[**4]** THE COURT] prescription pairs of Maui-Jim-branded sunglasses into the United States between 2009 and 2019. (Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶ 6.) These prescription sunglasses contained third-party prescription lenses glazed into a Maui-Jim-branded frame. (*Id.*)

B. Intellectual Property

---

[1] Maui Jim does not move for summary judgment on its claims for trademark dilution and tortious interference with its third-party contracts. (Pl.'s Mem. Lanham MSJ (Dkt. No. 427) at 39.)

Maui Jim offers over 125 different sunglasses styles under one or more of its marks. (*Id.* ¶ 6.) Maui Jim's sunglasses incorporate Maui Jim's patented, color-infused lens technology that wipe out glare and UV rays, and boosts color via lens treatments. (*Id.* ¶ 7.) Maui Jim's sunglasses all have earned the Skin Cancer Foundation's Seal of Recommendation as an effective UV filter for the eyes and surrounding skin. (*Id.* ¶ 14.) Since at least the early 1980s, Maui Jim continuously used the following marks in selling sunglasses in U.S. commerce:

Mark	Goods	Reg. No.	Reg. Date
MAUI JIM	Clothing, namely t-shirts; sunglasses	1404711	August 12, 1986
	Sunglasses	3443858	June 10, 2008
	Sunglasses	1465234	November 17, 1987
	Clothing, namely, t-shirts, polo shirts, tank tops, hats, visors, sweatshirts and jackets; sunglasses	4547944	June 10, 2014

(*Id.* ¶ 2) (sic.) Maui Jim registered these as trademarks with the U.S. Patent & Trademark Office. (*Id.* ¶ 5.)

The U.S. Copyright Office issued Certificates of Registration for the ninety-three professional photographs ("93 Photographs") at issue in this case. (Defs.' Resp. to Pl.'s Copyright SOF (Dkt. No. 461) ¶¶ 7-9.) Maui Jim published its 93 Photographs **[**5]** either on its website or in print between March 2015 and April 2016. (*Id.* **[*1071]** ¶¶ 20-21.) Each registration was issued within five years of Maui Jim's first publication of the photograph. (*Id.* ¶ 8.) Twenty-two of those photographs ("22 Photographs") were taken between March 27 and October 22, 2015. (Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶ 108.) Those 22 Photographs were registered on August 8, 2016. (*Id.*)

Since 2009, Maui Jim invested nearly [TEXT REDACTED BY THE COURT] in marketing its Maui Jim sunglasses, including its marks, as a high-quality premium product. (*Id.* ¶ 10.) For example, Maui Jim prominently uses these marks in TV commercials, print advertisements, brochures, social media, and other digital advertising, marketing, and promotional campaigns. (*Id.* ¶ 11.) Maui Jim's TV commercials have aired on major networks like NBC, CBS, ABC, HGTV, Discovery Channel, Food Network, and ESPN. (*Id.*) Maui Jim also promotes its sunglasses on its website, www.mauijim.com, where it publicly displays photographs of the sunglasses. (Defs.' Resp. to Pl.'s Copyright SOF (Dkt. No. 461) ¶ 7.)

Maui Jim's website contains the following notice at the bottom of each page: "© [applicable year] MAUI **[**6]** JIM, INC." (Defs.' Resp. to Pl.'s Copyright SOF (Dkt. No. 461) ¶¶ 9.) Additionally, the "Intellectual Property Notice" section of Maui Jim's Terms of Use webpage states:

> Unless otherwise noted, all materials, including text, illustrations, *photographs*, designs, graphics, logos, button icons, *images*, audio clips, software, written and other material (collectively, the "Contents") are *copyrights* . . . owned, controlled or licensed by Maui Jim, Inc.

(*Id.* ¶ 10) (emphasis added.) But the parties dispute whether these notices are expressly associated with any of the 93 Photographs. (*Id.*)

Defendants had access to Maui Jim's 93 Photographs. (*Id.* ¶ 21.) Although Defendants did not independently take or create any of the relevant Maui Jim-branded sunglasses that it displayed on its website,[2] they dispute whether

[2] For example, when Maui Jim asked Defendants' 30(b)(6) witness whether Defendants took any of the 93 Photographs of Maui Jim sunglasses they displayed on its website, he testified "Not that I can recall." (*Id.* ¶ 18) (internal citation omitted).)

their website displayed Maui Jim's 93 Photographs. (*Id.* ¶¶ 14-16, 18-19, 28.)[3] The parties dispute whether Maui Jim's purported acquiescence granted Defendants a license to use Maui Jim's 93 Photographs. (*Id.* ¶¶ 29-31.)

C. Retail

Maui Jim and its wholly-owned distributors sell Maui Jim sunglasses through an authorized retailer program. (Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) **[**7]** ¶ 17.) Each authorized retailer enters into a written agreement with Maui Jim and/or Maui Jim USA, Inc. that governs the business relationship, outlines Maui Jim's terms and conditions, and references its U.S. General Policies. (*Id.* ¶ 21.) Defendants do not dispute that Maui Jim purports to have a policy governing its business relationships with authorized retailers. (*Id.*) That authorized retailer program permits certain retail establishments to sell Maui Jim sunglasses to consumers. (*Id.*) The parties dispute whether Maui Jim's authorized U.S. retailers purchase Maui Jim sunglasses exclusively from Maui Jim or whether they obtain Maui-Jim-branded **[*1072]** sunglasses from additional sources. (*Id.* ¶ 20.) It is undisputed that SmartBuyGlasses is not within Maui Jim's authorized retailer program. (*Id.* ¶ 31.) But Defendants do dispute whether they are authorized to sell Maui Jim sunglasses as a matter of law.

Maui Jim states that it requires all Maui Jim sunglasses be sold with authentic Maui Jim lenses, frames, and parts, and not modified in any manner. (*Id.* ¶ 22.) Defendants dispute that averment, citing to the fact that nothing in Maui Jim's European authorized retailer agreements stated that **[**8]** its warranty would be voided if an authorized retailer sold Maui Jim sunglasses to third parties or if third-party lenses were glazed into its frames. (*Id.*) Defendants also dispute this fact by claiming that Maui Jim authorized retailers in the U.S. had glazed third-party lenses into Maui Jim's frames without consequence. (*Id.*)

Maui Jim states that authorized retailers are *required* to direct all consumer repair requests to Maui Jim's trained repair technicians. (*Id.* ¶ 26.) Defendants dispute that fact because of a small font general policy attached to Maui Jim's CFO Paul Lippens' declaration that states "We *recommend* that you or your customer call us on our toll-free number . . . regarding any repair questions." (*Id.* ¶ 26 (citing Lippens Dec. (Dkt. No. 428-4) at 9) (emphasis added).)

It is undisputed that Maui Jim provides warranty protection for its sunglasses. (Defs.' Resp. to Pl.'s Lanham SOF (Dkt. 459) ¶ 27.) But the parties dispute whether Maui Jim's warranty only covers those Maui Jim sunglasses sold by Maui Jim and its authorized retailers. (*Id.*) Maui Jim believes that Defendants' warranty is different from its own. (*Id.* ¶ 63.) Defendants disagree and contend that their own warranty **[**9]** provides identical coverage. (*Id.*) The parties dispute whether Maui Jim's warranty is an integral part of its customer service offering that consumers have come to expect and enjoy from the Maui Jim brand. (*Id.* ¶ 30.) Defendants' dispute is premised on the fact that [TEXT REDACTED BY THE COURT] According to Maui Jim's head of Customer Care, Lynn Campen, customers do use Maui Jim's repair department, at average, three to four non-Maui Jim prescription lenses per week between 2015 and 2018. (Pl.'s Resp. to Defs.' SOF (Dkt. 466) ¶ 70(f).)

Defendants ship all their Maui-Jim-branded sunglasses sold to the United States from Hong Kong, so international shipping regulations and procedures govern their shipments. (*Id.* ¶ 48.) Defendants create commercial invoices for the products they ship. (*Id.* ¶ 49.) An uncertain number of Defendants' shipments of Maui-Jim-branded sunglasses contained a packaging slip that identified [TEXT REDACTED BY THE COURT] as the manufacturer. (*Id.* 51.) [TEXT REDACTED BY THE COURT] does not manufacture Maui-Jim-branded sunglasses, and Defendants know that. (*Id.* ¶ 47.) Defendants blame the [TEXT REDACTED BY THE COURT] identification mishap on faulty computer coding that operated **[**10]** from [TEXT REDACTED BY THE COURT] (*Id.* ¶ 51.) Defendants' sales documents show that it shipped at least [TEXT REDACTED BY THE COURT] pairs of Maui-Jim-branded sunglasses into the

---

[3] Maui Jim's Exhibit 9 to its Memorandum in Support of its Copyright Summary Judgment Motion is a chart allegedly showing excerpts from Defendants' website that displays what appears to be Maui Jim's 93 Photographs. (Pl.'s Mem. Copyright MSJ Ex. 9 (Dkt. 425-1).) This chart includes five columns: Style Name, Title of Work, Date of Registration and Registration Number, Maui Jim Copyrighted Image, and Image Reproduced on SmartBuyWebsite. (*Id.*)

U.S. during that time frame. (*Id.* ¶ 52.) Customer complaints brought this error to Defendants' attention. (*Id.* ¶¶ 54-56.) For one example:

> I received [the shipment] from eyeware manufacturer [TEXT REDACTED BY THE COURT] that was initiated by you SmartBuyGlasses.com for a replacement pair of Maui Jim Sunglasses . . . . On [TEXT REDACTED BY THE COURT] website — there is no mention that they sell Maui Jim products or an authorized retailer for Maui Jim...I would like to know if these were manufactured by Maui Jim or are they a copy of Maui Jim product"

(*Id.* ¶ 53 (second ellipsis in original) (sic).) As for another inaccuracy in Defendants' **[*1073]** shipments, Defendants admit that it included a Maui Jim's 2009 Drop Ball Certification (a certification that lenses comply with certain regulatory requirements) in a limited number of shipments to U.S. consumers. (*Id.* ¶¶ 43-45.) These shipments were made without Maui Jim's consent and they were not certified under the 2009 Drop Ball Certification. (*Id.*)

The parties dispute whether **[**11]** they received inquiries from consumers and potential consumers complaining about Defendants' delayed shipment speeds with respect to Maui-Jim-branded sunglasses. (*Id.* ¶ 61.) Nevertheless, Defendants admit to at least twenty examples of delayed shipments to its purchasers of Maui-Jim-branded sunglasses, thirteen of which were delayed due to U.S. Food and Drug Administration ("FDA") or customs issues. (*Id.*)

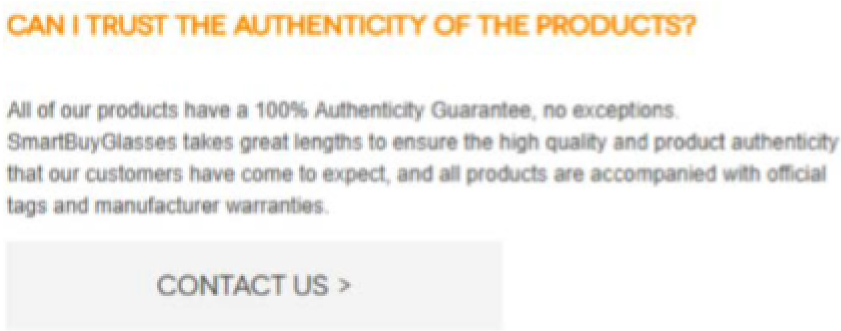
D. Defendants' Advertising

The parties dispute whether customers and potential customers were confused over Defendants' allegedly false and/or misleading statements. (*Id.* ¶ 65.) Defendants' webpage touts the supposed authenticity of eyewear that it sells from "some of the world's leading eyewear manufacturers." (*Id.* ¶ 66.) It also touts their "relationships with some of the world's leading suppliers." (*Id.* ¶ 67.) Defendants' webpage once contained the following diagram:

(*Id.* ¶ 68 (citing Ex. 35).) This diagram suggests that Defendants' supply chain is direct from the manufacturer to the customer rather than the "traditional supply chain" that routes from the manufacturer to an exporter to an importer to a wholesaler to a shop and then to a customer. (*Id.*). That diagram also contained **[**12]** the following accompanying sentence: "By offering the world's largest range of authentic designer eyewear, sourced directly from the world's leading eywear [sic] suppliers, we are here to help you find what you love." (*Id.*) Defendants dispute that this diagram was factually misleading, stating that it "was accurate and consistent with SmartBuyGlasses' practice for the majority of its sales including manufacturers/brands — such as [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT] - from which it buys genuine products from the manufacturer of the brands and ships it to its consumers." (*Id.*)

The following statement has appeared on Defendants' website's FAQ, and Maui Jim disputes whether it is truthful:

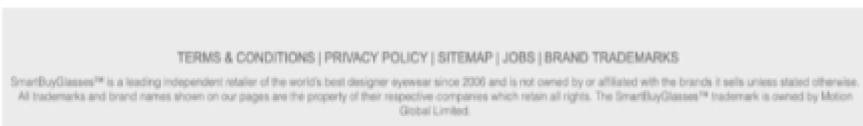
[*1074]



(*Id.* ¶ 69 (citing Ex. 36).)

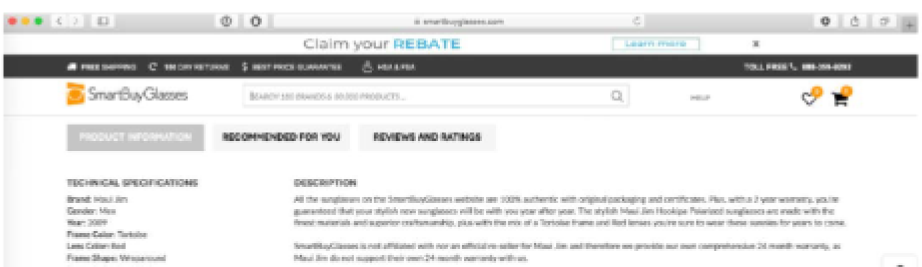
Elsewhere on Defendants' website is a statement that "SmartBuyGlasses is not affiliated with nor an official re-seller for Maui Jim . . . ." (*Id.* ¶ 69.) Maui Jim commissioned a survey coined the Sowers Survey to test whether Defendants' website misleads consumers into believing that Defendants are an authorized retailer of Maui Jim sunglasses. (*Id.* ¶ 70 (citing Ex. 20 (Dkt. No. 428-20 at 6)).) Accounting for "noise," 40.1% of respondents to the Sowers **[**13]** Survey took away the false impression that SmartBuyGlasses is an authorized retailer of Maui Jim sunglasses. (*Id.*)[4]

The following disclaimer appears in small type on the bottom of SmartBuyGlasses.com:



(*Id.* ¶ 48.) That disclaimer states that SmartBuyGlasses is not owned by or affiliated with the brands it sells unless stated otherwise. (*Id.*) The parties dispute the impact of this sentence.

Once a customer selects a Maui-Jim-branded frame on Defendants' website, the customer is confronted with the following website display:



(*Id.* ¶ 51.) The last sentence of the above states in relevant part that "SmartBuyGlasses is not affiliated with nor an official re-seller for Maui Jim and therefore we provide our own comprehensive 24 month warranty, as Maui Jim do not support their own 24 month warranty with us." (*Id.*) But Defendants' Kalinko testified **[*1075]** that he drafted that language after the litigation commenced. (*Id.* (citing Kalinko Dep. 500:13-504:2).) So, we cannot discern from the record how long this disclaimer was posted.

The parties also dispute whether statements on Defendants' website adequately informed consumers that they were purchasing third-party prescription lenses rather than Maui Jim **[**14]** lenses. (*Id.* 54-56.) As two examples:

---

[4] Defendants filed a motion to exclude the Sowers Survey. (Dkt No. 417.) We previously denied that motion. (Dkt. No. 494.) We incorporate the analysis and reasoning contained within our Memorandum Opinion and Order denying the Sowers Survey within this summary judgment Memorandum Opinion and Order. (*Id.*)

(*Id.* ¶ 54), and

SmartBuyGlasses Prescription Lenses
SmartBuyGlasses USA is the largest online full-service optical shop in USA. Choose from a huge range of designer eyeglasses and have them professionally fitted by our licensed opticians in the SmartBuyGlasses Optical Lab. At SmartBuyGlasses, we make prescription glasses shopping easy and efficient online. Simply choose your favorite glasses frame and have them fitted with ophthalmic lenses at a fraction of the cost compared to a local eye doctor. Our licensed optical dispensers provide 100% accuracy and quality for each prescription lens fitting.

Lenses Guide
SmartBuyGlasses offers a wide range of prescription lenses from premium lens producer [redacted] as well as our premium quality house brand. The SmartBuyGlasses Optical Lab lenses cover refractive indexes of 1.50, 1.61, 1.67 or 1.74 for single, bifocal or progressive vision correction needs. All of the lenses that we offer are either made of CR39 or High Index plastic material. Please refer to the other Premium Lenses information tabs to learn more about prescription lenses at SmartBuyGlasses USA.

FREE Scratch Resistant Coating
FREE Anti-Glare Coating
FREE UV Protection

(*Id.* ¶ 55.) Suggesting that their customers would have viewed these disclaimers, Defendants note that their customers take their time when purchasing sunglasses on their website. (*Id.* ¶ 62.) For example, Defendants contend that their customers visit its website on average [TEXT REDACTED BY THE COURT] over a period of more than [TEXT REDACTED BY THE COURT] days before making a purchase. (*Id.* ¶ 64.)

Defendants also claim that they additionally sent customers who bought prescription Maui-Jim-branded sunglasses a separate envelope along with a lens card explaining that the lenses they received were third-party manufactured. (*Id.* ¶¶ 59, 65-69.)

Defendants' website contained the following world map portrayal suggests that Defendants had an "operation centre" in New York:

[*1076]

(Defs.' Resp. to Pl.'s Lanham SOF (Dkt. No. 459) ¶ 40). Although Defendants do not dispute that they do not have any physical location or physical office in New York, they contend that they do have an "operational dropship location in New York." (*Id.* ¶¶ 40-41.)

E. First Sales of Defendants' Maui-Jim-Branded Sunglasses

Maui Jim claims that it never sold a single pair of Maui Jim sunglasses **[**15]** to Defendants. (*Id.* ¶ 32.) Defendants dispute that, reasoning that Maui Jim sold its sunglasses to a company called "[TEXT REDACTED BY THE COURT] with the full knowledge that these sunglasses would then be sold by SmartBuyGlasses online." (*Id.* ¶ 32.) We find that Defendants' response implicitly admits by omission that Maui Jim never *directly* sold a pair of its sunglasses to Defendants. (*See id.*)

Defendants additionally contend that they source their products through a network of suppliers, manufacturers, distributors, and authorized retailers. (Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶ 1(d).) But Maui Jim disputes that fact. (*Id.*) Although Defendants contend that they obtained their Maui-Jim-branded sunglasses from [TEXT REDACTED BY THE COURT] or more companies (*id.* ¶ 37 (citing Ex. 49 (Dkt. Nos. 415-65)) Maui Jim claims that it never sold a single pair of its sunglasses to about half of those companies. (*Id.* ¶ 38.)[5] More, Maui Jim claims that it only sold a total of [TEXT REDACTED BY THE COURT] sunglasses to ten of the companies that Defendants claim gave them Maui-Jim-branded sunglasses, while Defendants claim that they received [TEXT REDACTED BY THE COURT] pairs from those **[**16]** ten companies. (*Id.*)

A highlighted example is [TEXT REDACTED BY THE COURT] the company that Defendants claim supplied them with most of their Maui-Jim-branded sunglasses. (*Id.*¶¶ 30-32.) Defendants claim that [TEXT REDACTED BY THE COURT] provided Defendants with [TEXT REDACTED BY THE COURT] pairs of Maui Jim sunglasses (*id.* ¶ 32(d)) while Maui Jim states it sold far less to [TEXT REDACTED BY THE COURT] (Pl.'s Mem. Lanham MSJ (Dkt. 427) at 12.) Defendants' suppliers have submitted letters affirming the authenticity of the Maui-Jim-branded products they suppled to Defendants after this lawsuit was filed. (Pl.'s **[*1077]** Resp. to Defs.' SOF (Dkt. No. 466) ¶ 18.) Related, SmartBuyGlasses CEO Doron Kalinko testified "No" to the question of whether he understood "that all of the Maui Jim-branded sunglasses that [TEXT REDACTED BY THE COURT] was selling to SmartBuy came directly to [TEXT REDACTED BY THE COURT] from Maui Jim." (Defs.' Resp. to Pl.'s Lanham SOF (Dkt. No. 459) at 16.) Thus, there is a material factual dispute over where the difference (potentially [TEXT REDACTED BY THE COURT] pairs of sunglasses) came from.

Maui Jim conducted test purchases from Defendants to test the authenticity of Defendants' **[**17]** Maui-Jim-branded sunglasses between 2011 and 2016. (Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶¶ 13, 81.) Maui Jim Europe's Hans-Juergen Penzek testified that they also conducted test purchases from Defendants' European websites. (Pl.'s Resp. to Defs.' SOF (Dkt. 466) ¶ 13(a) (citing Penzek Dep. (Dkt. 466-7).) Maui Jim's digital marketing manager Dave Siragusa testified that "beyond a visual inspection, I can't tell if those were or were not manufactured by Maui Jim." (Siragusa Dep. (Dkt. No. 466-3, 51:5-23).) Similarly, Maui Jim's Vice President of Purchasing Christopher McClain testified that he couldn't determine one way or the other when he was asked whether he could "say that any plano sunglasses that Maui Jim purchased from SmartBuyGlasses were not manufactured by Maui Jim." (McClain Dep. (Dkt. No. 415-24, 19:23-20:6).) Related, Maui Jim Vice President Jay Black testified that he was not aware of any evidence that Defendants were selling stolen merchandise, and that Maui Jim did not know whether Defendants ever sold damaged or stolen merchandise. (Pl.'s Resp. to Defs.' SOF (Dkt. No. 466) ¶ 12(b) (citing Black Dep. (Dkt. No. 466-2).) On this point, Maui Jim had a Rule 30(b)(6) witness **[**18]** testify that Maui Jim did receive at least one pair of damaged Maui-Jim-branded sunglasses from Defendants. (Pl.'s Resp. to Defs.' SOF (Dkt. No. 466) ¶ 12(b) (citing Siragusa Dep. (Dkt. 466-3).) But that deponent testified further that he does not know for certain whether Defendants' Maui-Jim-branded sunglasses are stolen because he could not determine from where Defendants sources their products. (*Id.*)

On at least two occasions, a Maui Jim customer service representative told a customer that Defendants' omission from Maui Jim's authorized retailers list does not automatically mean that Defendants' Maui-Jim-branded sunglasses are inauthentic. (Pl.'s Resp. to Defs.' SOF (Dkt. No. 466) ¶ 14.)

---

[5] Defendant's explanation for this factual dispute is, in part, that Maui Jim miscounted companies, like [TEXT REDACTED BY THE COURT], that have slightly different names on the list than they do within Maui Jim's system.

Thus, the parties dispute whether the Maui-Jim-branded sunglasses sold by Defendants were 100% genuine and authentic. And therefore, Maui Jim submits that none of the Maui-Jim-branded sunglasses sold by Defendants were once subject to an authorized first sale by Maui Jim.

F. Maui Jim's Statements About SmartBuyGlasses

Defendants claim that Dave Siragusa, Maui Jim's Digital Marketing Manager, instructed Maui Jim's customer service to inform customers that SmartBuyGlasses sold "stolen, used, damaged, **[**19]** gray market or counterfeit products through their site." (Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶ 97 (citing Ex. 112 of Defs.' Amend. SOF).) Maui Jim admits that Siragusa stated that any site not on Maui Jim's authorized retailer list *may be* selling used, counterfeit, broken or stolen products. (*Id.* ¶ 98.) He also told Maui Jim customer service representatives to respond to customer inquiries about unauthorized retailers "that these sites are not listed and therefore are selling diverted, used, damaged or counterfeit goods and they void our 2 year warranty by purchasing on these sites." (*Id.* (citing Ex. 112 of Defs.' Amend. SOF).)

[*1078] G. Maui Jim's Third-Party Contracts

On September 24, 2008, Maui Jim's employee, Michelle Munson, emailed VisionDirect.com.au, one of Defendants' websites, alleging that that website was tortuously interfering with Maui Jim's contracts by procuring Maui-Jim-branded sunglasses from Maui Jim's authorized accounts. (*Id.* ¶ 23.) In that email, Munson demanded they cease doing so. (*Id.* ¶ 23.) In response, Defendants' Co-Founder David Menning emailed Munson and stated that Defendants would remove the Maui Jim line from their website and requested follow up **[**20]** conversations to better understand the procedure behind becoming authorized distributor. (*Id.*)

Defendants claim that neither Maui Jim nor any of Maui Jim's authorized retailers ever informed Defendants of their contractual terms. (*Id.* ¶ 100.) Maui Jim dispute that fact, contending that on March 8, 2008, Maui Jim wrote to Defendants and stated in part:

> By purchasing Maui Jim sunglasses from any authorized Maui Jim account, you are inducing that retailer to breach its contract with Maui Jim, which will subject you to civil liability for interference with a contractual relationship.
>
> . . . Please cease and desist from attempting to procure Maui Jim products from any Maui Jim authorized accounts in the future. Such interference would likely result in those accounts being terminated and you will be liable for any damage suffered by Maui Jim as a consequence of such termination and diversion of our product.
>
> . . .
>
> Now that you are aware of Maui Jim's policy regarding its authorized retail accounts, you are on notice that future violations will constitute intentional interference with contractual relations.

(*Id.* (internal citation omitted).) Maui Jim echoed this message to Defendants on January 20, **[**21]** 2009. (*Id.*) Nevertheless, the parties disagree as to whether Defendants had knowledge of Maui Jim's contracts with third-party authorized retailers. (*See, e.g.*, *id.* ¶¶ 99-104.) Maui Jim contends that it has produced two of its contracts with its authorized retailers and that those contracts include the relevant anti-diversion clause. (*Id.* ¶ 102 (citing Dkt. No. 465).) Regarding alleged damages stemming from the claimed tortious interference with Maui Jim's third-party contracts, the parties dispute whether unpaid amounts owed to Maui Jim were incurred because of Defendants' conduct. (*Id.* ¶ 103.)

LEGAL STANDARD

HN1[] Summary judgment is appropriate when "the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A genuine issue for trial exists when "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 2510, 91 L. Ed. 2d 202 (1986)*. Under *Rule 56*, the movant bears the initial burden of "informing the district court of the basis for its motion, and identifying those portions of the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, which it believes **[**22]** demonstrate the absence of a genuine issue of material fact." *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 2553, 91 L. Ed. 2d 265 (1986)* (internal quotations omitted). "[T]he mere existence of some alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no genuine issue of material fact." *Anderson, 477 U.S. at 247-48, 106 S. Ct. at 2510*. In responding to a summary judgment motion, **[*1079]** the nonmoving party may not simply rest upon the allegations contained in the pleadings but must present specific facts to show that a genuine issue of material fact exists. *Fed. R. Civ. P. 56(e)(2)*; *see also* *Hemsworth v. Quotesmith.com, Inc., 476 F.3d 487, 489-90 (7th Cir. 2007)*.

HN2[] "On cross—motions for summary judgment, the Court assesses whether each movant has satisfied the requirements of *Rule 56*." *Portalatin v. Blatt, Hasenmiller, Leibsker & Moore, LLC, 125 F. Supp. 3d 810, 813 (N.D. Ill. 2015)* (internal citations omitted); *see also* *Laskin v. Siegel, 728 F.3d 731, 734 (7th Cir. 2013)*. As with any summary judgment motion, we consider cross—motions for summary judgment "construing all facts, and drawing all reasonable inferences from those facts, in favor of the non—moving party." *Laskin, 728 F.3d at 734* (internal citation omitted); *see also* *Anderson, 477 U.S. at 255, 106 S. Ct. at 2513*. "[I]nferences that are supported by only speculation or conjecture will not defeat a summary judgment motion." *Dorsey v. Morgan Stanley, 507 F.3d 624, 627 (7th Cir. 2007)* (citation and quotation marks omitted).

ANALYSIS

I. Motion for Summary Judgment on Lanham Act and Related State Law Claims

A. Trademark Infringement [23] and Counterfeiting**

We first[6] address Maui Jim's **[*1080]** motion for summary judgment in its favor on its trademark infringement claim along with Defendants' related cross-motion. (Pl.'s Lanham MSJ (Dkt. No. 426); Defs.' MSJ).) Maui Jim's basis for

[6] We reject Defendants' laches defense for various reasons. For laches to apply, the defendant must show: (1) the plaintiff had knowledge of the defendant's use of an allegedly infringing mark; (2) the plaintiff inexcusably delayed taking action with respect to the defendant's use; and (3) the defendant would be prejudiced by allowing the plaintiff to assert its rights. *See* *Chattanoga Mfg., Inc. v. Nike, Inc., 301 F.3d 789, 792-93 (7th Cir. 2002)*. Defendants' laches defense is based on the premise that Maui Jim knew at least eight years before filing this lawsuit that Defendants were selling Maui-Jim-branded sunglasses absent an authorized retailer agreement. We hold that Defendants have not shown that Maui Jim inexcusably delayed taking action, nor that they would be prejudiced by allowing this lawsuit to go forward, nor that Maui Jim acquiesced to their conduct for the following reasons. For one, Maui Jim sent a cease and desist letter concerning the core of this case's issue, and Defendants' Co-Founder David Menning's response to that letter indicated a mutual understanding that his company would stop their conduct. (Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶ 23; Defs.' SOF Ex. 43 (Dkt. No. 415-59) at 2-3.) Maui Jim echoed its cease and desist letter again in 2009. (*See, e.g.*, Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶ 76, 100 (citing Ex. 112 of Defs.' Amend. SOF).) More, Maui Jim's CFO, Paul Lippens, testified that Maui Jim waited to sue Defendants until their conduct had a significant impact on plaintiff's goodwill and business reputation. (Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶ 77 (testifying to a culmination of Maui Jim's awareness along with an increased number of related incidences and customer complaints).) *See Am. Eagle Outfitters, Inc. v. Am. Eagle Furniture, Inc.*, No. 11-cv-02242, *2013 U.S. Dist. LEXIS 180912, 2013 WL 6839815, at *11 (N.D. Ill. Dec. 27, 2013)* ("a trademark owner is not forced by the rule of laches to sue until the likelihood of confusion caused by the accused use presents a significant danger to the mark."). Indeed, the record shows that Maui Jim's lawsuit was filed soon after Defendants' sales and marketing of Maui-Jim-branded sunglasses rapidly increased. (*See* Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶¶ 77-79 (illustrating Defendants' increase in sales and marketing of Maui-Jim-branded sunglasses leading up to this lawsuit's filing).) Nor have Defendants been demonstrably prejudiced by any delay since their alleged infringing conduct continues post-filing of this lawsuit, suggesting that they would have continued their conduct were the lawsuit filed sooner. Last, to the extent that Defendants contend that Maui Jim acquiesced to their conduct through acts

trademark infringement is brought under both Section 32 of the Lanham Act, 15 U.S.C. § 1114(1), and Section 43(a)(1) of the Lanham Act, 15 U.S.C. § 1125(a)(1). **HN3**[] Plaintiff must establish essentially two elements to prevail on its Lanham Act trademark claims: (1) that it has a protectable trademark and (2) that Defendants' use of the trademark is likely to cause confusion among consumers. 15 U.S.C. § 1114(1) and 1125(a)(1); *see also Entm't One UK Ltd. v. 2012Shiliang*, 384 F. Supp. 3d 941, 948 (N.D. Ill. 2019) (citing Packman v. Chicago Tribune Co., 267 F.3d 628, 638 n.8 (7th Cir. 2001)).

1. Protectable Trademarks

First, Maui Jim owns protectable trademarks. Maui Jim's marks are registered with the U.S. Patent and Trademark Office on the Principal Register. (Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶¶ 2-5.) **HN4**[] Such registry constitutes *prima facie* evidence of the validity of a plaintiff's registered trademarks and of a plaintiff's exclusive right to use the trademarks. 15 U.S.C. § 1057(b); *see also Entm't One*, 384 F. Supp. 3d at 948; *Monster Energy Co. v. Zheng Peng*, No. 17-cv-414, 2017 U.S. Dist. LEXIS 175287, 2017 WL 4772769, at *4 (ND. Ill. 2017). Accordingly, we find that there is no genuine **[**24]** issue of material fact that Maui Jim's trademarks are protectable.

2. First Sale Doctrine

Before addressing likelihood of confusion, we address the first sale doctrine because Defendants contend it saves them from Maui Jim's trademark infringement case altogether. **HN5**[] The first sale doctrine is a defense to infringement subject to certain well-defined exceptions. Hart v. Amazon.com, Inc., 191 F. Supp. 3d 809, 818 (N.D. Ill. 2016), *aff'd*, 845 F.3d 802 (7th Cir. 2017). Under this doctrine, "when a retailer—such as Amazon—'merely resells a genuine, unaltered good under the trademark of the producer, the use of the producer's trademark by the reseller will not deceive or confuse the public as to the nature, qualities, and origin of the good.'" *Id.* Rather, "the consumer gets exactly what the consumer bargains for, the genuine product of the particular producer." *Id.* (quoting Sebastian Int'l, Inc. v. Longs Drug Stores Corp., 53 F.3d 1073, 1074 (9th Cir. 1995)). Thus, resale by the first purchaser of the original article under the producer's trademark is generally neither infringement nor unfair competition. *See id.*; *see also Enesco Corp. v. K's Merch. Mart*, No. 99-CV-1070, 2000 WL 1800640, at *12 (N.D. Ill. Aug. 29, 2000); *Brode v. Tax Mgmt., Inc.*, No. 88 C 10698, 1990 WL 25691, at *4 (N.D. Ill. Feb. 1, 1990).

Defendants believe Maui Jim exhausted its right to control distribution of its sunglasses when it sold them to other retailers. Maui Jim posits three reasons why it believes this defense fails. First, Maui Jim contends that Defendants cannot show **[**25]** that [TEXT REDACTED BY THE COURT] of Maui-Jim-branded sunglasses Defendants sold were subjected to an authorized first sale. (Pl.'s Supp. Mem. (Dkt. No. 496) at 8.) Second, Maui Jim contends that Defendants' Maui-Jim-branded sunglasses are materially different from the ones that Maui Jim sells. Third, Maui Jim argues that Defendants go beyond the boundaries of the first sale doctrine because they mislead customers into believing that they are associated with Maui Jim. (Pl.'s Mem. Lanham MSJ (Dkt. 427) at 26.)

a. First Sale Doctrine: Authorized First Sales

Maui Jim contends that Defendants' first sale doctrine defense fails because they cannot show an authorized first sale of the Maui-Jim-branded sunglasses **[*1081]** they sold. **HN6**[] Trademarked goods are not considered genuine goods until the trademark owner first authorizes the sale of those goods. *See, e.g.*, *Delta Air Lines, Inc. v. TDM Investments, LLC*, No. 18-cv-968, 2018 U.S. Dist. LEXIS 135125, 2018 WL 3819108, at *2 (N.D. Ill. August 10, 2018) (citing Hart, 191 F. Supp. 3d at 817-18 (N.D. Ill. 2016); RFA Brands, LLC v. Beauvais, No. 13-14615, 2014 WL 7780975, at *7 (E.D. Mich. Dec. 23, 2014), *report and recommendation adopted*, No. 13-14615, 2015 WL 519166 (E.D. Mich. Feb. 9, 2015); Ryan v. Volpone Stamp. Co., 107 F. Supp. 2d 369 (S.D.N.Y. 2000)); Liz Claiborne, Inc. v. Mademoiselle Knitwear, Inc., 979 F. Supp. 224, 230 (S.D.N.Y. 1997) ("The question of whether a

committed by certain Maui Jim Italy employees, the record is bereft of any facts suggesting that they had Maui Jim's graces to do so, and any suggestion of acquiescence is directly refuted by Maui Jim's cease and desist letters. (*Id.* ¶¶ 80-81.)

good is genuine, however, presupposes the initial sale was authorized."); Restatement (Third) of Unfair Competition § 24 (1995) ("Trademarked goods produced by a manufacturer under a contract with the trademark owner should not be considered genuine **[**26]** goods until sale of the goods under the mark has been authorized by the trademark owner.")

We begin our analysis by addressing the applicable burden. The parties disagree over who shares the burden of proving whether an authorized first sale occurred. Maui Jim says that the Defendant bears the burden arguing that it is an affirmative defense[7] ; Defendants say that Maui Jim bears the burden as part of its infringement case in chief. The parties cite neither binding case law nor a case within this district on this point. Nor were we able to find one.[8] The Ninth Circuit persuasively addressed the burden of proof applicable to the first sale defense in a 2015 copyright infringement opinion. *See* Adobe Sys. Inc. v. Christenson, 809 F.3d 1071, 1079 (9th Cir. 2015). *Adobe* held that **HN7**[] the party asserting the first sale defense bears the initial burden of satisfying its requirements. *Id.* This means that the party asserting the first sale defense had the burden to "show ownership through lawful acquisition." *Id.* [9] We think that *Adobe*'s reasoning makes sense because it accords with the general notion that **HN8**[] fairness dictates that a litigant ought not have the burden of proof on facts particularly within the knowledge of the opposing party. *See* United States v. N.Y., New Haven & Hartford R.R. Co., 355 U.S. 253, 256 n. 5, 78 S. Ct. 212, 214 n. 5, 2 L. Ed. 2d 247 (1957) ("The ordinary rule, based **[**27]** on considerations of fairness, does not place the burden upon a litigant of establishing facts peculiarly within the knowledge of his adversary."); *see also* 2 **[*1082]** McCormick on Evid. § 337 (7th ed.) (2013) ("A doctrine often repeated by the courts is that where the facts with regard to an issue lie peculiarly in the knowledge of a party, that party has the burden of proving the issue."). Here, Defendants are best suited to know who gave them the Maui-Jim-branded sunglasses they sell on their website. We think it would be absurd to think that fairness would otherwise dictate that an IP holder should be required to prove from where a potential infringer obtained their property to overcome the first sale doctrine. That type of information is not within a trademark holder's knowledge. Pragmatically, holding otherwise would require trademark holders to employ mechanisms outside of the Lanham Act's purview to track their trademarked products' sales throughout the stream of commerce when a reseller could have just revealed their source. Thus, fairness leads us to follow *Adobe*'s holding and so we place the burden on Defendants — the parties asserting the first sale affirmative defense — to show how **[**28]** they obtained ownership of the Maui-Jim-branded sunglasses that they sold.

With an understanding of the applicable burden, we briefly review other first sale doctrine cases. In *RFA Brands*, for example, the defendant claimed that he obtained certain goods through a one-time purchase of auctioned storage units and believed the first sale defense applied to protect his later sales on Amazon.com. RFA Brands, 2014 WL 7780975 at *8. *RFA Brands* held that even if the defendant did find the plaintiffs' products in the storage units that he bought, the defendant at best could only speculate as to the origin of such **[**29]** products. *Id.* So, *RFA Brands* held that the "defendant ha[d] not established that the first sales of the products at issue were 'authorized'" and held

---

[7] Defendants asserted the first sale doctrine as an affirmative defense in their Answer. (Answer (Dkt. No. 259) at 31-32.) Curiously, Defendants' legal position flipped to the opposite in their supplemental briefing on this issue. (Defs.' Supp. Mem. (Dkt. No. 499) at 2-3.)

[8] The Supreme Court last scrutinized the first sale doctrine in 2013 without discussing burdens. *See* Kirtsaeng v. John Wiley & Sons, Inc., 568 U.S. 519, 528, 133 S. Ct. 1351, 1357, 185 L. Ed. 2d 392 (2013). In *Kirtsaeng*, the Supreme Court held that the first sale doctrine applies to copies of works made and sold abroad. *Id.* Central to that decision was the fact that the first sale doctrine has its roots in common law principles that made no geographical distinction. *Id.*

[9] *Adobe* further explained:

> What does this mean in practical terms? In the context of a summary judgment motion in a software case, it simply means that the party asserting a first sale defense must come forward with evidence sufficient for a jury to find lawful acquisition of title, through purchase or otherwise, to genuine copies of the copyrighted software. To the extent that the copyright holder claims that the alleged infringer could not acquire title or ownership because the software was never sold, only licensed, the burden shifts back to the copyright holder to establish such a license or the absence of a sale.

Id.

that the plaintiffs were entitled to summary judgment on their trademark infringement claim. *Id.* Indeed, *RFA Brands* held that those goods were no longer genuine goods since there was no proof of an authorized first sale by the trademark owner. *Id. RFA Brands* went on to grant summary judgment for the plaintiff-IP holders. *Id.*

RFA Brands followed the analytical process set out by other courts. For example, in *Ford Motor Co. v. Heritage Mgmt. Grp., Inc., 911 F. Supp. 2d 616, 620 (E.D. Tenn. 2012)*, the defendants purchased certain goods through eBay and were "unsure where the parts came from or where they were produced before they arrived in their possession." *Id.* That court went on to hold that since those defendants could only speculate that the goods were produced by Ford and purchased within Ford's supply chain that there was a "risk of injury to the reputation of [Ford's] mark." *Id. at 626-27* (internal citation omitted.); *see also Green v. Electric Vacuum Cleaner Co., 132 F.2d 312, 314 (6th Cir. 1942)* (holding that an alleged infringer does not enjoy the first sale doctrine's protection by merely asserting "that the articles are legitimate and, without disclosing their source, were purchased from those **[**30]** who bought from the plaintiff.").

Here, Maui Jim argues that Defendants offer less than *RFA Brands*' insufficient speculation because they "deliberately stayed ignorant of the source of the MAUI JIM-branded sunglasses that it purchase[d] from third parties, half of whom have never been Maui Jim authorized retailers." ((Pl.'s Mem. Lanham MSJ (Dkt. 427) at 27.) Related, Maui Jim argues that Defendants are unable to prove that [TEXT REDACTED BY THE COURT] of pairs of Maui-Jim-branded sunglasses they sold stem from an initial authorized sale. This argument is based on the following purchasing scheme laid out by Maui Jim:

> Maui Jim has never sold a single pair of MAUI JIM sunglasses to [Defendants]. **[*1083]** Because [Defendants] cannot get MAUI JIM sunglasses *from* Maui Jim, [Defendants] ha[ve] chartered a secretive path *around* Maui Jim. [Defendants] contend[ ] that it gets the sunglasses through [TEXT REDACTED BY THE COURT] distributors and affiliates that purchase directly from Maui Jim. Maui Jim, however, has never sold a single pair of MAUI JIM sunglasses to [TEXT REDACTED BY THE COURT] of the companies. Therefore, the MAUI JIM-branded sunglasses that those companies sold to [Defendants] could not **[**31]** have come to those companies "directly from Maui Jim."
> The remaining [TEXT REDACTED BY THE COURT] companies were once authorized retailers of Maui Jim, but Maui Jim sold only [TEXT REDACTED BY THE COURT] pairs of MAUI JIM sunglasses to those companies. Those companies necessarily obtained the other [TEXT REDACTED BY THE COURT] pairs from one or more sources other than Maui Jim. And [Defendants] admit[ ] that [they] neither know[ ] the sources nor care[ ] to know, for fear of being invested with uncomfortable facts."

(Pl.'s Mem. Lanham MSJ (Dkt. 427) at 25.)[10]

Defendants have not shown authorized first sales for each of its Maui-Jim-branded sunglasses beyond blanketed self-serving testimony and testimony from third-parties. (*See, e.g.*, Defs.' Supp. Mem. (Dkt. No. 499) at 5-6 (collecting citations to the record).) Such blanket testimony does not convince us that no question of material fact exists such that we may rule for Defendants at the summary judgment stage. *See Green, 132 F.2d at 314* (holding that an alleged infringer does not enjoy the first sale doctrine's protection by merely asserting "that the articles are legitimate and, without disclosing their source, were purchased from those who bought from the **[**32]** plaintiff."). The non-blanketed evidence fairs no better. For example, Defendants claim that a vast majority of their sunglasses (more than [TEXT REDACTED BY THE COURT] sunglasses) were sold by Maui Jim to a company called [TEXT REDACTED BY THE COURT] (Dkt. Nos. 462 at 3, 458 at 7-8, 466 32(d).) And Defendants further claim that Maui Jim's own sales representatives knew that [TEXT REDACTED BY THE COURT] would turn around and sell those sunglasses to Defendants to be resold. (Defs.' Resp. to Pl.'s SOF Pl.'s MSJ (Dkt. No. 459 ¶ 32.) In fact, there is a dispute between Maui Jim's records show that it sold [TEXT REDACTED BY THE COURT] pairs of sunglasses to [TEXT REDACTED BY THE COURT] and Defendants' contention that they obtained more than [TEXT REDACTED BY THE COURT] pairs from [TEXT REDACTED BY THE COURT] (*See, e.g.*, Pl.'s Mem. Lanham MSJ (Dkt. 427) at

[10] Defendants state that it is actually [TEXT REDACTED BY THE COURT] total suppliers rather than [TEXT REDACTED BY THE COURT] and that the [TEXT REDACTED BY THE COURT] tally was the result of an administrative error. (Dkt. No. 458 at 7.)

12.) Defendants' chief support for this factual claim relies on the declaration submitted by [TEXT REDACTED BY THE COURT] managing director, [TEXT REDACTED BY THE COURT] testimony effectively states that Maui Jim sold some sunglasses to [TEXT REDACTED BY THE COURT] knowing that it would then sell those sunglasses to SmartBuyGlasses. We **[**33]** are unable to know whether a jury would view [TEXT REDACTED BY THE COURT] testimony to mean that the unaccounted-for sunglasses were routed to Defendants after an authorized first sale. (*See, e.g.*, Defs.' Opp. Mem. (Dkt. No. 458 at 7).) Moreover, besides [TEXT REDACTED BY THE COURT] there remains [TEXT REDACTED BY THE COURT] of other sunglasses procured from other sources that lack specific sourcing information. (*See id.*; *see also* (Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶ 38)). Therefore, we hold that Defendants have failed to overcome their burden with respect to the first sale doctrine at this juncture. Nevertheless, we decline to grant summary judgment on this defense in Maui Jim's favor because Defendants have provided enough source evidence to create a question of material fact as to whether they meet their burden under the first sale doctrine such that **[*1084]** judgment as a matter of law would be inappropriate.

For these reasons, we find a genuine issue of material fact exists such that judgment as a matter of law on the first sale doctrine issue would be inappropriate at the summary judgment stage.[11]

b. First Sale Doctrine: Material Differences

HN9[] The first sale doctrine does not apply **[**34]** to products that have been materially altered from their original form. *See, e.g.*, *Delta Air Lines, Inc., 2018 WL 3819108 at *2* (citing *SoftMan Prods. Co., LLC v. Adobe Sys., Inc., 171 F. Supp. 2d 1075, 1093 (C.D. Cal. 2001))*; *Rockwell Automation, Inc. v. Radwell Int'l, Inc.*, No. CV 15-05246 *(RBK/JS), 2019 U.S. Dist. LEXIS 222361, 2019 WL 7288946, at *3 (D.N.J. Dec. 30, 2019)* ("The 'material differences' doctrine, which is judge-made law, has been an exception to the doctrine that the first sale of a good covered by IP exhausts the IP owner rights in the good.") It is incumbent upon the reseller to show that the differences are not of the kind that consumers would likely consider in purchasing the product. *Hyundai Const. Equip. U.S.A., Inc. v. Chris Johnson Equip., Inc.*, No. 06-cv-3236, 2008 WL 4210785 (N.D. Ill. Sept. 10, 2008). An alteration is material if it changes something about a product that is relevant to consumers' decision to purchase the product. *Id.* (collecting cases).

Maui Jim believes that its branded sunglasses are materially different from those sold by Defendants in several ways. First, Maui Jim contends that Defendants' Maui-Jim-branded sunglasses customers experience inordinate delays. Second, Maui Jim argues that Defendants' sales do not qualify for Maui Jim's warranty program. Third, Maui Jim reasons that "someone who bought MAUI JIM-branded sunglasses from [Defendants] may have received MAUI JIM-branded sunglasses **[**35]** that differed from genuine MAUI JIM sunglasses" because Defendants "sold MAUI JIM-branded sunglasses after removing the original lenses and mounting in the frames prescription lenses that did not come from Maui Jim" but rather were "manufactured using a process over which Maui Jim had no control." (Pl.'s Lanham MSJ at 32; *see also* SOF ¶ 34.). We discuss these three categories of potentially material differences in turn.

i. Material Difference: Shipping Delays

Maui Jim first contends that the first sale doctrine does not save Defendants due to a material difference in shipping speeds and delivery reliability. (Pl.'s Mem. Lanham MSJ (Dkt. No. 427) at 28.) Maui Jim does not cite any case law where a court held that inordinate shipping delays were a material difference. But Maui Jim does direct us to *Bel Canto Design, Ltd. v. MSS HiFi, Inc., 837 F. Supp. 2d 208, 224 (E.D.N.Y. 2011)* and *Beltronics USA, Inc. v. Midwest Inventory Distrib. LLC, 522 F. Supp. 2d 1318, 1327 (D. Kan. 2007)*, *aff'd* *562 F.3d 1067, 1071 (10th Cir. 2009)*. *Beltronics* and *Belcanto* stand for the proposition that "a physically identical product is nevertheless

---

[11] Our conclusion would be the same had the burden been Maui Jim's to bear. Had the burden been Maui Jim's, we would have held that they did enough to convince us that a question of material fact existed as to whether an authorized first sale occurred such that judgment as a matter of law would be rendered inappropriate.

'materially different' from the genuine article if 'the bundle of services' that attach to that genuine article is not available to the consumer." Bel Canto, 837 F. Supp. 2d at 224 (citing *Beltronics*, 562 F. Supp. at 1071).

In *Beltronics*, the defendant manufactured automobile radar detectors and sold them through authorized dealers who agreed **[**36]** to minimum price restrictions. *Beltronics, 522 F. Supp. 2d at 1327*, *aff'd* 562 **[*1085]** F.3d at 1071. However, as alleged in this case, the authorized dealers violated their dealership agreements by reselling to an unauthorized retailer, the defendant. That defendant in turn sold Beltronics' products on eBay as "new" Beltronics products. The *Beltronics* defendant altered the product merely be masking the serial number on the products to make unknown the identity of the authorized dealer that supplied them with the radar detector. But Beltronics' policy was that consumers could only receive certain services like software upgrades, rebates, product use information, service assistance, warranties, and recall information if their radar detector had an original serial number. The Tenth Circuit found the altering of serial numbers voided the product's warranty under Beltronics' policy and so the radar detectors the defendant sold were materially different from genuine Beltronics radar detectors. *Id. Bel Canto* followed *Beltronics* and analogously involved alteration of serial numbers. *Bel Canto, 837 F. Supp. 2d 208*. *Bel Canto* held that the defendants' products lacked warranty and other services such as upgrades and recall notices did not constitute a material difference. *Id. Bel* ***[**37]*** *Canto*'s reasoning was premised in the fact that Bel Canto was a New York dealer governed by a New York law that prohibited attempts to limit warranties to direct purchasers only. *Id. at 226* (citing GBL 369-b of the New York General Business Law). Neither *Bel Canto nor Beltronics* directly discuss delivery speeds. *Id*; *see also* *Beltronics, 522 F. Supp. 2d at 1327*, *aff'd* 562 F.3d at 1071.

Here, although the record contains disputed evidence of customer complaints about Defendants' slow and delayed shipments (Defs.' Resp. to Pl.'s Lanham SOF (Dkt. No. 459) ¶ 61), we are unaware of any case law establishing that poor customer service respecting shipment speeds constitutes a "material difference." And shipment speeds are distinguishable from the warranties discussed in *Belcanto* and *Beltronics*, so we refuse to combine the two. We think a holding that different shipping speeds constitute a material difference would be inappropriate since customers should know that shipment speeds are based on the retailer/website from which they purchase their product and are wholly unrelated to the product's brand. Accordingly, we hold that the difference in shipping speeds between Maui Jim's website's sales and Defendants' website's sales is not a material difference **[**38]** barring Defendants' first doctrine defense.

ii. Material Difference: Warranty Program

Maui Jim next contends that differences between Maui Jim's warranty and Defendants' is a material difference that overcomes Defendants' first sale doctrine defense. The analysis into the warranty programs invites two inquiries: (1) whether Maui Jim's warranty extends to a pair of authentic glasses sold by someone other than an authorized vendor like Defendants and, if not, (2) whether Maui Jim's warranty is materially different from Defendants'.

Maui Jim's position is that its warranty "does not apply to sunglasses purchased outside its network of authorized retailers." (Pl.'s Mem. Lanham MSJ (Dkt. No. 427) at 31.) Defendants counter that Maui Jim's "own communications with customers belie that contention." (Defs.' Mem. Opp. to Pl.'s Lanham MSJ (Dkt. No. 458) (citing Dkt. No. 488)); *see, e.g.*, Defs.' Resp. to Pl.'s Lanham SOF (Dkt. No. 459) ¶¶ 28, 63.)

First, Defendants argue that Maui Jim's head of Customer Care, Lynn Campen, specifically advised a customer service representative to tell a customer that Maui Jim would repair and replace a customer's sunglasses as long as they are authentic. **[*1086]** (Defs.' SOAF **[**39]** Opp. Pl.'s Lanham MSJ ¶ 28 (Dkt. No. 488).) The record shows in this instance that a customer emailed Maui Jim asking whether Maui Jim's warranty applied to retailers who are "not authorized." (Defs.' SOAF Opp. Pl.'s MSJ ¶ 28, Ex. S (Dkt. 463-19).) The pertinent customer service representative then asked Campen for advice. (*Id.*) Campen emailed the customer service representative advising her to tell the customer "If your sunglasses are authentic Maui Jim Sunglasses we would offer repair and replacement options as long as parts are available." (*Id.*). Defendants' inference, that Maui Jim would repair all sunglasses under their warranty bears no relationship to this quoted language. Indeed, Campen's internal email simply did not indicate that the repair would be made pursuant to a *warranty*. (*Id.*)

SOAF ¶ 29 echoes ¶ 28. There, a customer asked whether Maui Jim's customer service representative whether they will "do repairs" "even if I get one of ur [sic] glasses from" an unauthorized dealer like Amazon. (Dkt. No. 463-20, Ex. T at 2.) That customer did not ask about Maui Jim's warranty, as Defendants would like us to infer. (*Id.*) The customer service representative there answered in part, **[**40]** "Yes, we will still *offer* repair services on authentic Maui Jim sunglasses, even if they are purchased from an unauthorized retailer." (*Id.* (emphasis added).) The fact that Maui Jim will repair sunglasses is different than whether Maui Jim's warranty would apply. The real question is, would this customer need to *pay* for repairs.

In summary, although Defendants say the emails contained at SOAF ¶¶ 28 and 29 mean that Maui Jim's warranty would cover Maui Jims purchased from unauthorized dealers, the record does not support that alleged fact. For one, Defendants' reading differs from the plain language used in the emails that state only that Maui Jim would merely *offer* certain services. (*see, e.g.*, *id.*) More, Lynn Campen later clarified this policy in her testimony. (Pl.'s Resp. to Defs.' SOAF Opp. Pl.'s MSJ, Ex. 73 (Dkt. No. 488-13) at 3.) She testified that "We don't offer repair service under warranty from an unauthorized reseller." (*Id.*). Campen further testified that any such "repair and replacement options" she referenced in an internal email "would be at a charge." (*Id.* at 170-:4-171:1.) Campen's testimony is corroborated by customer feedback organized in Maui Jim's "Warranty Chart." (*See,* ***[**41]*** *e.g.*, Dkt. No. 428, Ex. 30, Statement No. 156.). There, for example, a customer complained that he bought Maui-Jim-branded sunglasses from SmartBuyGlasses, eventually sent them in to Maui Jim for a repair, and then "found out that they could not repair under warranty since SmartBuy was not a autherrized [sic] store . . . So [I] had to pay for repair which would almost cost more tha[n] new." (*Id.*) Thus, there is no question of material fact in the record that Maui Jim's warranty does not apply to Maui-Jim-branded sunglasses obtained from an unauthorized retailer like Defendants.

We next address whether Maui Jim's warranty is materially different from Defendants' warranty. ***HN10***[] "[A]bsence of or a different warranty has been held to be a material difference." *Hyundai v. Johnson*, No. 06-3238, 2008 WL 4210785 at *2 (N.D. Ill. 2008) (citing *Bourdeau Bros., Inc. v. International Trade Com'n, 444 F.3d 1317, 1325 n. 3 (Fed. Cir., 2006))*; *Beltronics*, 562 F. Supp. at 1071 (holding that warranties fall within the bundle of services that may yield material differences).

The *Hyundai* defendant contended that his customers knew what they were purchasing: a Hyundai product without any warranty. *Id.* at *2-3. The customers deposed in *Hyundai* agreed with the defendant's view that they knew they were purchasing **[*1087]** a Hyundai product without any warranty. *Id.* at *2. Still, the court granted summary judgment against the defendant **[**42]** reasoning that "While it may have been [his] intention to warn all of his customers . . . this would not protect subsequent customers who may purchase the equipment from [his] customers." *Id. Hyundai* continued, "Thus, the record here conclusively establishes that there are material differences between the equipment [he] imported and the equipment distributed by Hyundai in the United States and Canada." *Id.*

Indeed, it is undisputed that the parties have received inquiries from both present and potential customers about their respective warranty coverages. (Defs.' Resp. to Pl.'s SOF (Dkt. 459) ¶ 62, Ex. 30 (Dkt. 428-25).) Yet the parties dispute whether their respective warranties are identical. (Defs.' Resp. to Pl.'s SOF (Dkt. 459) ¶ 63.) Defendants contend that SmartBuyGlasses' warranty provides identical or better coverage. (*Id.*; Defs.' Mem. Opp to Pl.'s MSJ (Dkt. 458) at 14). To demonstrate this, Defendants compare, among other things, Maui Jim's 24-month replace/repair policy and Defendants' 24-month replacement warrant against manufacturer's defects. (Defs.' Resp. to Pl.'s SOF (Dkt. 459) at 14.) But we observe three potential differences in the parties' warranty coverages based **[**43]** on the record: (1) Maui Jim's warranty offers *repair* in addition to replacement, while SmartBuyGlasses' does not; (2) Maui Jim's warranty is tracked from the date the customer receives the product, whereas SmartBuyGlasses' tracks it from the order date, meaning that Maui Jim's is longer (without even accounting for SmartBuyGlasses' alleged slower shipping speeds); and (3) both warranties only cover *manufacturer's defects*, so Maui Jim, as manufacturer, is logically better suited to determine whether an issue is a manufacturer's defect or not.

HN11[] Differences in warranties must influence a customer's purchasing decision to overcome the first sale doctrine. *See Hyundai Const. Equip. U.S.A., Inc.*, 2008 WL 4210785 at *2 (internal citation omitted). It is incumbent upon the re-seller to show that the differences are not of the kind that consumers would likely consider in purchasing the product. *See id.* Here, there is a question of material fact as to whether differences in Maui Jim and Defendants' warranties influence a customer's purchasing decision. [TEXT REDACTED BY THE COURT]n. More, the record contains evidence suggesting that Maui Jim's warranty does influence consumers' purchasing decision as highlighted in consumer complaints and consumer inquiries **[**44]** directed to both Maui Jim and SmartBuyGlasses.[12] More, the fact that warranties and repair services were ranked [TEXT REDACTED BY THE COURT] in consumer priorities when choosing premium sunglasses could support a finding that Maui Jim's warranty is a material part of a consumer's purchasing decision, especially given Defendants do not offer repair services.[13] **[*1088]** Therefore, we hold that the question of whether Maui Jim's warrant is materially different from Defendants' remains a question of material fact such that judgment as a matter of law is inappropriate at this juncture.

iii. Material Difference: Quality Control

Third, Maui Jim argues that even if Defendants' Maui-Jim-branded sunglasses were once authentic, the lack of Maui Jim's ability to control quality of the sunglasses once they arrived in Defendants' hands constitutes a material difference. (Pl.'s Lanham MSJ (Dkt. 427) at 32; Defs.' Resp. to Pl.'s Lanham SOF (Dkt. No. 459) ¶ 34.) ***HN12***[] Legitimate quality control measures can constitute a material difference in appropriate circumstances. *Iberia Foods Corp. v. Romeo, 150 F.3d 298, 304 (3d Cir. 1998)*. Quality control measures may create subtle differences in quality that are difficult to measure but important to consumers. *Id.* So, courts do not require **[**45]** trademark owners show that the actual quality of the inspected goods is measurably higher than that of the uninspected goods. *Id.* (collecting cases). At the same time, 'quality control' is not a talisman the mere utterance of which entitles the trademark owner to judgment. *Id.* (internal citation omitted). Rather, the test is whether the quality control procedures established by the trademark owner are likely to result in differences between the products such that consumer confusion regarding the sponsorship of the products could injure the trademark owner's goodwill. *Id.* (citing *Warner—Lambert Co. v. Northside Dev. Corp., 86 F.3d 3, 6 (2d Cir. 1996)* (trademark holder must show that it uses substantial and nonpretextual quality control procedures such that nonconforming sales will diminish the value of the mark)); *see also R.J. Reynolds Tobacco Co. v. Premium Tobacco Stores Inc.*, No. 99 C 1174, 2000 WL 1923332, at *3 (N.D. Ill. Nov. 15, 2000) (collecting cases). Thus, Maui Jim must demonstrate that its quality control procedures create a likelihood that their sunglasses are different from those that it does not control. *Id.* (internal citation omitted). In so demonstrating, Maui Jim need not show that its procedures succeed in preventing virtually all substandard product from reaching the consumer. *Id.* It is enough that it stops purchases of substandard product to **[**46]** create a material difference between the categories of authorized and unauthorized sales. *Id.* (citing *Iberia, 150 F.3d at 305* (cursory and standardless search for "obvious defects" insufficient to create material difference)). True, Defendants admit that it sold a small amount ([TEXT REDACTED BY THE COURT] pairs) of Maui Jim sunglasses with third-party prescription lenses outside of Maui Jim's control (Defs.' Opp. Mem. (Dkt. 458) at 15) but we are otherwise unable to ascertain based on the record how Maui Jim's other talisman of 'quality control' is enough to allow us to resolve this issue at the summary judgment stage.

Concluding the inquiry into material differences, we hold that there remains questions of material fact that preclude judgment as a matter of law.

---

[12] We additionally think that a jury could find that the difference in warranty provider alone could warrant a material difference even if the warranties' terms were identical. For example, we conjecture that a warranty from an institutional manufacturer would certainly be perceived more valuable to a consumer than the same warranty term provided by a discount retailer. We think that that could make sense under the appropriate circumstances, but the parties do not address whether consumers would be more likely to trust an institutional manufacturer's warranty fulfillment promise more than a lesser known discount vendor's.

[13] Campen testified that Maui Jim's repair department received on average three to four nonprescription lenses per week for repair services between 2015 and 2018. (Pl.'s Resp. to Defs.' SOF (Dkt. 466) ¶ 70(f).) The jury is best positioned to determine how that frequency of repair requests reflects on the materiality of the repair service.

c. First Sale Doctrine: Sponsorship

Maui Jim contends that the first sale doctrine's "sponsorship exception" also blocks Defendants from the first sale doctrine defense. (Pl.'s Mem. Lanham MSJ (Dkt. 427) at 32.) ***HN13***[] Under the sponsorship exception, the first sale doctrine's protections do not extend to resellers who use other entities' trademarks to give the false impression that they are favored or authorized dealers for a product. *Delta, 2018 WL 3819108 at 2* (citing *Australian Gold, Inc. v. Hatfield, 436 F.3d 1228, 1241 (10th Cir. 2006)*; *D 56, Inc. v. Berry's Inc., 955 F. Supp. 908, 910-20 (N.D. Ill. 1997)*. Thus, **[**47]** use of a plaintiff's trademark in promotional **[*1089]** materials such as advertising or displays is not protected by the first sale doctrine, but use of a plaintiff's trademark solely to identify a product up for sale is protected. *Id.* The sponsorship exception is a relevant inquiry because "one who resells trademark goods is obligated to do so in a manner that is not likely to cause confusion or imply that the seller is associated with the manufacturer." *Bernina of Am., Inc. v. Fashion Fabrics Int'l, Inc.*, No. 01-cv-585, 2001 WL 128164, at *2 (N.D. Ill. Feb. 9, 2001) (quoting *Quill Corp. v. Nada Scientific Ltd.*, No. 97-cv-7461, *1998 U.S. Dist. LEXIS 8527, 1998 WL 295502 (N.D. Ill. May 21, 1998))*. This means that conduct that goes beyond the mere resale of trademarked goods and its incidental advertising may not be protected by the first sale doctrine. *See, e.g.*, *Enesco Corp. v. K's Merchandise Mart Inc.*, No. 99-cv-1070, 2000 WL 1800640 (N.D. Ill. Aug. 29, 2000) (Pallmeyer, J.) (collecting cases); *D56, Inc.* 955 F. Supp. at 919 (acts such as the use of the producer's trademark on displays and in advertising, and the distribution of the producer's promotional literature constituted conduct that went beyond mere resale and its incidental advertising).

Maui Jim claims that Defendants misled consumers that they were an authorized retailer of Maui Jim sunglasses. Indeed, it **[**48]** is undisputed that Defendants were never part of Maui Jim's authorized retailer program. (Defs.' Resp. to Pl.'s SOF (Dkt. 459) ¶ 64.) Maui Jim chiefly takes issue towards SmartBuyGlasses.com's representation that it works directly with leading eyewear manufacturers and suppliers. (Pl.'s Mem. Lanham MSJ (Dkt. No. 427) at 33.) As an example, the parties do not dispute that SmartBuyGlasses.com previously contained a diagram that advertises that SmartBuyGlasses.com's supply chain is direct from the manufacturer to the customer. (Pl.'s Lanham SOF ¶ 68, Ex. No. 35 (Dkt. No. 428-40). That diagram additionally shows that SmartBuyGlasses.com's supply chain does not include intermediaries like exporters, importers, wholesalers, and retail shops. (*Id.*) Maui Jim reasons that that representation is misleading because it is also a leading eyewear manufacturer, does not associate with SmartBuyGlasses.com, yet SmartBuyGlasses.com nevertheless retails its product. (*Id.at 33-34*.) So, Maui Jim contends that that diagram falsely suggests that sunglasses purportedly bearing Maui Jim's brand on SmartBuyGlasses.com would be sourced directly from Maui Jim, the manufacturer. To that point, even SmartBuyGlasses' Vice **[**49]** President, Mr. Rossetto, testified that this diagram was a poor representation of SmartBuyGlasses' procurement model. (Pl.'s Resp. to Defs.' SOAF (Dkt. No. 488) ¶ 15.)

Maui Jim submitted [TEXT REDACTED BY THE COURT] instances where Defendants' customer service representatives supposedly indicated that they were an authorized Maui Jim dealer. (Pl.'s Lanham SOF ¶ 65, Ex. No. 26 (Dkt. No. 428).) One example is highlighted in their brief. (Pl.'s Lanham MSJ Mem. (Dkt. 427) at 33.). That example shows a customer asking SmartBuyGlasses' customer service representative: "Are you an authorized Maui Jim's dealer?" (Pl.'s Lanham SOF ¶ 65, Ex. No. 26-60 (Dkt. No. 428-28) and its customer service representative responding: "Yes, we are." (*Id.*). Other customer feedback echoes Maui Jim's concern. For example, Maui Jim points to customer feedback organized in a chart where a SmartBuyGlasses representative stated "all our products are 100% authentic[ ] [w]e source the authentic items through authorized distributors." (Pl.'s Lanham SOF 65, Ex. 32, No. 148 (Dkt. No. 428-37 at 12).) That statement was in response to the following Customer's message: "your section 'Authenticity' says you work directly with **[**50]** the manufacturers, in this case Maui Jim, so why is it that they don't know where you get your MJ sunglasses **[*1090]** from. Sh [sic] also told me that they could be counterfeit." (*Id.*) Maui Jim also cites to the example of a SmartBuyGlasses customer who asked its customer service representative how it can "guarantee authenticity when [its] not an authorized dealer of Maui Jim products?" (*Id. at 7-98* (Dkt. No. 428-37 at 8.) To which SmartBuyGlasses' customer service representative responded by stating that it "source[s] it from the manufacturer itself." *(Id.*) That customer responded by telling the representative that Maui Jim had told that customer that they "aren't supplying you guys with glasses," and then the representative changed course and stated "we do not source the item from Maui Jim brand, we source it from the factory or manufacturer on where they also ordered their items." (*Id.*)[14] Defendants downplay these statements as merely mistakes made by customer service representatives rather than depictions of customer confusion.

Maui Jim also argues impermissible sponsorship on the basis that Defendants "fraudulently uses Maui Jim's 2009 Drop Ball Certification, without Maui Jim's knowledge or authorization, **[**51]** to mislead Customs into believing that Maui Jim guaranteed that whatever SBG was shipping to U.S. customers had been tested for impact resistance." (Pl.'s Mem. Lanham MSJ (Dkt. 427) at 35) (citing Pl.'s Lanham SOF ¶ 43); Pl.'s Lanham SOF ¶ 43, Ex. 8 (Dkt. 428-8 at 2.) Exhibit 8 is a one-page document entitled "Drop Ball Test Certification" that states:

> I, Rebecca Myers, hereby guarantee that the articles listed herein are impact resistant within the meaning of *21 CFR 801.410* and have been tested pursuant to that section. Impact resistant lenses are not unbreakable or shatterproof. Record of testing will be maintained for a period of three (3) years from the date of shipment and copies will be furnished to the FDA upon request.
> Company Name: Maui Jim
> Name: Rebecca Meyers
> Title: Logistics Manager
> Date: 6/8/09

(Pl.'s Lanham SOF ¶ 43, Ex. 8 (Dkt. No. 428-8) at 2.) The certification includes Maui Jim's trademark on the top left of the certification page. (*Id.*) Defendants' attempt to downplay this by drawing a distinction between misleading consumers versus misleading U.S. Customs. (*Id. at 18*.) We find that difference unremarkable especially where Defendants admit that at least two consumers received this incorrect **[**52]** Drop Ball Test Certification paperwork. (*Id. at 17-18*.)

Defendants reason that the sponsorship exception does not overcome the first sale doctrine defense due to their website's disclaimers. First, Defendants state that its website has disclaimers stating that SmartBuyGlasses is not owned by or affiliated with any brand it sells unless expressly stated otherwise. (Defs.' Mem. Opp. to Pl.'s Lanham MSJ (Dkt. No. 458) at 16 (citing its SOF (Dkt. No. 446) ¶ 48).). Maui Jim does not dispute that that disclaimer appears in small type on the bottom of SmartBuyGlasses.com. (Pl.'s Resp. to Defs.' Amend. SOF Defs.' MSJ (Dkt. 466 ¶ 48.). Second, Defendants argue that its website advises customers that "SmartBuyGlasses is not affiliated with nor an official re-seller for Maui Jim" when a customer views a Maui Jim specific model on its website. (*Id. at 16* (citing their SOF ¶ 51.) SmartBuyGlasses may have confused customers with its contradictory statements throughout its website that it is authorized by "all" brands rather than a **[*1091]** more accurate word like "most" or "many" brands.

Last, Maui Jim's Sowers Expert Survey suggests that certain disclaimers misled 40% of the survey respondents to incorrectly think that SmartBuyGlasses **[**53]** was an authorized retailer of Maui-Jim-branded sunglasses. (ECF 418, Ex. 1 ¶ 12.) But that could also reasonably suggest that the other 60% of the survey respondents did not perceive any degree of sponsorship.

We cannot say that no question of material fact exists with respect to sponsorship when considering these disclaimers' existence alongside the other evidence in the record. Accordingly, the sponsorship question presented here contains far too many disputed material facts such that adjudication at summary judgment would be inappropriate.

3. Likelihood of Confusion

---

[14] Defendants dispute that any of the examples references within Maui Jim's Ex. 32 to its Statement of Facts reflects actual customer confusion from SmartBuyGlasses' statements and actions. (Defs.' Resp. to Pl.'s SOF ¶ 65 (Dkt. No. 459 at 23.)

We need not address the likelihood of confusion question since we have found that a threshold question of material fact exists regarding the first sale doctrine. Nevertheless, for the sake of completion, we next address the likelihood of confusion component of a trademark infringement lawsuit.

HN14[] Maui Jim must establish that Defendants' use of its trademarks is likely to cause confusion among consumers. The Seventh Circuit has set forth seven factors to determine whether a likelihood of confusion exists. *See AutoZone, Inc. v. Strick, 543 F.3d 923, 929 (7th Cir. 2008)*; *see also Entm't One*, 384 F. Supp. 3d at 949. However, the Seventh Circuit also held, in a non-precedential opinion, that courts can presume likelihood **[**54]** of confusion where a defendant "produces counterfeit goods in an apparent attempt to capitalize upon the popularity of, and demand for, another's product." *Microsoft Corp. v. Rechanik, 249 Fed. App'x. 476, 479 (7th Cir. 2007)* (quoting *Polo Fashions, Inc. v. Craftex, Inc., 816 F.2d 145, 148 (4th Cir. 1987))*. We will first analyze the facts under the counterfeit presumption, and then under the full seven factor test. *See Entm't One*, 384 F. Supp. 3d at 949 (quoting *Coach, Inc. v. Treasure Box, Inc.*, No. 3:11 CV 468, *2013 U.S. Dist. LEXIS 76607, 2013 WL 2402922, at *4-5 (N.D. Ind. May 31, 2013)* ("This ... is plainly a case for presuming likelihood of confusion. But in an abundance of caution, [the Court] will take a belt-and-suspenders approach ... and proceed with the seven-factor analysis to determine whether there is a likelihood of consumer confusion.")). The party asserting infringement bears the burden of proving confusion. *See, e.g.*, *Barbecue Marx, Inc. v. 551 Ogden, Inc., 235 F.3d 1041, 1043 (7th Cir. 2000)*.

a. Likelihood of Confusion: Counterfeit Presumption Test

HN15[] Under the counterfeit presumption test, a court presumes likelihood of confusion when a defendant has produced counterfeit goods to capitalize on the popularity of another's product. *Microsoft*, 249 Fed. App'x. at 479; *Ent't One*, 384 F. Supp. 3d at 949. To be "counterfeit," the goods must have been produced by an entity that was not authorized to use the mark at the time the goods were manufactured. *15 U.S.C. § 1116(d)(1)(B)*; *see Specht v. Google, Inc., 660 F. Supp. 2d 858, 865 (N.D. Ill. 2009)* ("Counterfeiting is the act of producing or selling a product with a sham trademark that is an intentional **[**55]** and calculated reproduction of the genuine trademark."). Maui Jim never authorized Defendants to use its trademarks. Additionally, counterfeit goods must bear "a spurious mark which is identical with, or substantially indistinguishable from, a registered mark." *15 U.S.C. § 1127*. And a protected mark need not appear on an item to render it counterfeit; rather, the Lanham Act only requires that the protected mark be used "in connection with" the sale. *15 U.S.C. § 1114(1)(a)*; *see Ent't* ***[*1092]*** *One*, 384 F. Supp. 3d at 949-50; *see also Chloe SAS v. Sawabeh Info. Servs. Co.*, No. CV 11-04147, *2014 WL 4402218, at *7 (C.D. Cal. Sept. 5, 2014)* (finding that using a word mark in the title of a sale listing constitutes counterfeiting even if the mark is not located on the product offered for sale). The Maui Jim marks were imprinted directly on the sunglasses at issue and Defendants used them in the product's website displays.

In support of Maui Jim's position that Defendants used a counterfeit mark, Maui Jim chiefly relies on the undisputed fact that three SmartBuyGlasses executives showed interest in selling Maui Jim-branded sunglasses.[15] Opposing, Defendants point to deposition testimony of Maui Jim's executives. (Pl.'s Resp. to Def's. Amend. SOF Defs.' MSJ (Dkt. 466 ¶ 7 at 9-12.) For example, Maui Jim's CFO, Paul Lippens, **[**56]** testified that he could not identify any particular pair of Maui Jim sunglasses that SmartBuyGlasses sold to a consumer that were not originally sourced from Maui Jim. (*Id. at 10*.) Similarly, Maui Jim's VP of Purchasing, Chris McClain, testified that he could not determine whether any plano sunglasses that Maui Jim purchased from SmartBuyGlasses were not manufactured by Maui Jim. (*Id.*). But, Lippens' and McClain's testimony is contrasted by the testimony of Maui Jim's digital marketing manager, Dave Siragusa, who oversaw secret test purchases of Maui-Jim-branded sunglasses from SmartBuyGlasses.com between 2013-2016. (*Id. at 10*.) Siragusa testified that he could indeed tell that some of the Maui-Jim-branded glasses purchased as part of a secret test were not manufactured by Maui Jim. (*Id.*) Lippens'

[15] In relevant part, one executive said: "Maui Jim will generate top sales for us if we can secure it," "Maui [J]im is a very solid online brand and will mean significant sales if we can secure it," and "when we were online with it even for a week, we were starting to get great sales." (Defs.' Resp. to Pl.'s SOF ¶ 57.)

and McClain's testimony is also contrasted by Maui Jim's VP of Marketing, Mr. Black, who testified that he could tell that some of the glasses sold through SmartBuyGlasses.com were counterfeit because they were sold "without our Maui Jim lenses." (*Id. at 11*.)

These disputed material facts regarding counterfeiting preclude us from resolving whether Defendants' Maui-Jim-branded sunglasses were counterfeits as a matter **[**57]** of law at the summary judgment phase. For example, although there is no evidence tracing Defendants' Maui-Jim-branded sunglass *frames* to a counterfeit manufacturer, there remains some mystery as to where Defendant acquired some of their Maui-Jim-branded sunglasses. And to the extent that Maui Jim's counterfeit claim is couched in the fact that Defendants' insert third-party prescription lenses into Maui-Jim-branded eyeglass frames, as discussed later in this opinion, there remains a question of material fact as to whether Defendants adequately notified its customers that those lenses were manufactured by Defendants, not Maui Jim. Last, the conflicting testimonies of Maui Jim's Lippens, McClain, Siragusa, and Black make us further reluctant to hold that no question of material fact exists as to whether Defendants' Maui-Jim-branded sunglasses are counterfeits. Thus, we do not presume a likelihood of confusion at this juncture under the counterfeit presumption test. So, we turn to address the "likelihood of confusion" seven factor test without relying on a presumption. *See Microsoft*, 249 Fed. App'x. at 479; *see also Ent't One*, 384 F. Supp. 3d at 949.

b. Likelihood of Confusion: Seven Factor Test

HN16[] To determine whether a likelihood of confusion exists we **[**58]** consider the **[*1093]** following factors: (1) the similarity between the marks in appearance and suggestion; (2) the similarity of the products; (3) the area and manner of concurrent use; (4) the degree and care likely to be exercised by consumers; (5) the strength of the plaintiff's mark; (6) any actual confusion; and (7) the intent of the defendant to "palm off" his product as that of another. *AutoZone, 543 F.3d at 929*. No single factor is dispositive. *Id.* Courts may assign varying weight to each of the factors depending on the facts presented, though usually the similarity of the marks, the defendant's intent, and actual confusion are particularly important. *Id.* Where the evidence is so one-sided that there can be no doubt about how the question should be answered, the likelihood of confusion can be resolved on summary judgment. *See, e.g.*, *Door Sys., Inc. v. Pro-Line Door Sys., Inc., 83 F.3d 169, 173 (7th Cir. 1996))*; *NNA Properties, Inc. v. Yan Zhou*, No. 16-cv-11117, *2017 U.S. Dist. LEXIS 148971, 2017 WL 4074020, *2 (N.D. Ill. Sept. 14, 2017)*.

HN17[] The first factor (similarity between the marks in appearance and suggestion) is assessed by viewing the similarity of the marks as a whole, not from their "elements separated and considered in detail." *AutoZone, 543 F.3d at 929*. The test is whether the viewer of an accused mark would be likely to associate the product with which it is connected with **[**59]** the source of products with which an earlier mark is connected. *Id. at 930*. Since Defendants used Maui Jim's exact marks, this factor favors Maui Jim.

HN18[] The test for the second factor (similarity of the products) is whether the parties' products "are the kind the public might very well attribute to a single source (the plaintiff)." *Id. at 931*. Consumers are likely to attribute similar products to a single source when the parties compete in the same market, targeting similar consumers. *AutoZone, 543 F.3d at 932*. Maui Jim produces and sells a wide variety of Maui-Jim-branded sunglasses. Defendants advertise that the sunglasses they sell on their website are branded and produced by a variety of labels, including Maui Jim. Therefore, a reasonable consumer might believe that Maui Jim produced the Maui-Jim-branded sunglasses and authorized their sale on Defendants' website. *AutoZone, 543 F.3d at 932*. This factor weighs in favor of consumer confusion.

HN19[] The third factor (the area and manner of concurrent use) assesses "whether there is a relationship in use, promotion, distribution, or sales between the goods or services of the parties." *Id.* (citation omitted). Defendants sold the products at issue on the internet. Maui Jim sells its sunglasses on its own webpage, **[**60]** its authorized retailers' websites, and in brick and mortar retail stores. (Defs.' Resp. to Pl.'s Lanham SOF (Dkt. No. 459) ¶ 19.) Thus, the parties target an overlapping customer base: people looking to purchase Maui Jim products online. *See AutoZone, 543 F.3d at 932*; *see also Ent't One*, 384 F. Supp. 3d at 951. The third factor favors Maui Jim.

HN20[] The fourth factor examines the degree of care likely to be exercised by sunglass purchasers to determine whether purchasers would be confused by Defendants' products. *CAE, Inc. v. Clean Air Eng'g, Inc., 267 F.3d 660, 682 (7th Cir. 2001)*. The general rule guiding this factor is "the more widely accessible and inexpensive the products . . . the more likely that consumers will exercise a lesser degree of care and discrimination in their purchases." *AutoZone, 543 F.3d at 933* (citation omitted). Some courts have tempered the weight given to this factor where there is a "strong similarity of marks and identity of goods." *Cunningham v. Laser Golf Corp., 222 F.3d 943, 948-49 (Fed. Cir. 2000)*. Maui Jim argues that this factor is **[*1094]** less significant because "no amount of care could distinguish the [Maui Jim] marks that [Defendants] use[ ] from the identical MAUI JIM Marks that Maui Jim owns, particularly where the parties use the marks on identical products." (Pl.'s Mem. (Dkt. No. 427) at 21). In assessing this factor, we consider that Maui Jim sunglasses are both premium **[**61]** (and so relatively expensive) and widely accessible on the internet such that Maui Jim eyewear purchasers can simply search the internet for what they believe to be the exact same product offered by a discount retailer's website like the Defendants' SmartBuyGlasses.com. Accordingly, we find that the expensiveness and wide availability in combination cause this factor to weigh neutrally. *AutoZone, 543 F.3d at 933*. Despite the neutral weight, we temper this factor considering that the marks used on Defendants' website are identical to Maui Jim's.

HN21[] The fifth factor inquires into the mark's strength. The stronger the mark, the more likely it is that encroachment on it will produce confusion. *AutoZone*, 543 at 933. The strength of a trademark refers to the mark's distinctiveness, meaning its likelihood to identify the product as something emanating from a specific source. *CAE, 267 F.3d at 684* (collecting cases); *see, e.g.*, *Ent't One*, 384 F. Supp. at 951 (citing *Coach, 2013 WL 2402922 at *7)*. Maui Jim establishes that its trademarks are strong because the "Maui Jim" mark is consistently recognized by optical retailers and eye care professionals as the Sunglass Company of the Year (Defs.' Resp. to Pl.'s Lanham SOF (Dkt. No. 459) ¶ 13) and Maui Jim has spent millions of dollars advertising, marketing, **[**62]** and promoting its good bearing the marks (Defs.' Resp. to Pl.'s Lanham SOF (Dkt. No. 459) ¶ 10). We also find that the Maui Jim mark is an arbitrary mark that is inherently distinctive because it is two generic words ("Maui" and "Jim") combined in a way that arbitrarily indicates that the branded object is something else. *See, e.g.*, *Abercrombie & Fitch Co. v. Hunting World, Inc., 537 F.2d 4, 9 n.6 (2nd Cir. 1976)* ("To take a familiar example 'Ivory' would be generic when used to describe a product made from the tusks of elephants but arbitrary as applied to soap."). This factor favors Maui Jim.

HN22[] The sixth factor looks towards any evidence of actual consumer confusion. Maui Jim does not need evidence of actual confusion to demonstrate a likelihood of confusion. *See, e.g.*, *CAE, Inc. v. Clean Air Eng'g, Inc., 267 F.3d 660, 685-86 (7th Cir. 2001)*. Both parties have received consumer feedback suggesting actual confusion regarding Defendants' retail of sunglasses bearing Maui Jim's marks. Although disputed, Maui Jim believes there are at least 181 instances of actual confusion. (Defs.' Resp. to Pl.'s Lanham SOF (Dkt. No. 459) ¶ 58.). The chart dubbed as the "confusion chart" (*id.*) submitted by Maui Jim shows examples of customer feedback that indicates customers' actual impressions.[16] **[*1095]** These snippets of customer feedback, along with the other **[**63]** 180 cited in the statements of fact, lead us to weigh the factor for actual consumer confusion weighs favorably to Maui Jim.

HN23[] The final factor focuses on evidence that a defendant attempted to pass off its product as having come from the plaintiff. *Sorensen v. WD-40 Co., 792 F.3d 712, 731 (7th Cir. 2015)*. Evidence of bad faith intent to confuse consumers is particularly relevant. *Id.* Here, there is a question of material fact as to whether Defendants attempted

---

[16] Defendants additionally argue that the underlying incidents of "actual confusion" organized into the "Confusion Chart" are inadmissible hearsay. We overrule Defendants' hearsay objection under the business record exception to the rule against hearsay. *Fed. R. Evid. 803(6)(B)*. These documents are records of a regularly conducted activity that were made at or near the time they transpired, were kept in the course of a regularly conducted activity of a business, and making these records was a regular practice. So, these actual statements between customers and customer service representatives are admissible just like emails are commonly admissible and excepted from the rule against hearsay. Based on the record before us, we hold that the communications between customer service representatives and customers fall into this Business Record exception to the rule against hearsay.

to pass off its Maui-Jim-branded sunglasses as having come from Maui Jim for the reasons explained in this opinion's First Sale Doctrine Sponsorship section.

We cannot adequately weigh these factors due to certain disputed material facts. Even ignoring those questions of material facts, we would decline to hold at this juncture that the weight is "so one-sided that there can be no doubt about how the question should be answered" as would be necessary to resolve the likelihood of confusion on summary judgment. *Door Sys., Inc. v. Pro-Line Door Sys., Inc., 83 F.3d 169, 173 (7th Cir. 1996))*; *see also NNA Properties, Inc. v. Yan Zhou*, No. 16-cv-11117, *2017 U.S. Dist. LEXIS 148971, 2017 WL 4074020, *2 (N.D. Ill. Sept. 14, 2017)*.

B. Trademark Dilution

Defendants move for summary judgment in their favor on Maui Jim's trademark dilution claim. (*See, e.g.*, Defs.' Mem. MSJ (Dkt. No. 416) at 50-52.) Maui Jim avers that it need not move for summary **[**64]** judgment on this point because the disposition of its Lanham Motion may render the relief sought in the dilution case duplicative and/or moot as a practical matter. (Pl.'s Mem. MSJ (Dkt. No. 427) at 39.) We agree that the trademark dilution case is largely factually duplicative of the infringement case. Thus, we find that addressing this issue would require factual resolution of the related and overlapping questions of material facts that make summary judgment inappropriate as to the trademark infringement case.[17] We therefore deny Defendants' motion for summary judgment in their favor as to trademark dilution.

C. False Advertising

We turn to the parties' respective motions for summary judgment in their favor on Maui Jim's false advertising claim. ***HN24***[] A false advertising claim requires proof of five elements: (1) a false statement of fact by the defendant in a commercial advertisement about its own or another's product; (2) the statement actually deceived or has the tendency to deceive a substantial segment of its audience; (3) the deception is material, in that it is likely to influence the purchasing decision; (4) the defendant caused its false statement to enter interstate commerce; **[**65]** and (5) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to defendant or by a loss of goodwill associated with its products. *Hot Wax, Inc. v. Turtle Wax, Inc., 191 F.3d 813, 819 (7th Cir. 1999)*; *Right Field Rooftops, LLC v. Chicago Cubs Baseball Club, LLC, 136 F. Supp. 3d 911, 918 (N.D. Ill. 2015)*, *aff'd*, *870 F.3d 682 (7th Cir. 2017)*. The first element **[*1096]** requires proof that the defendant made a false statement of fact in a commercial advertisement about its own or another's product. *Id.* Two types of false statements can violate the Lanham Act: (1) claims that are literally false as a factual matter or (2) claims that may be literally true or ambiguous that implicitly convey a false impression, are misleading in context, or likely to deceive consumers. *Right Field Rooftops, 136 F. Supp. 3d at 918* (quoting *Hot Wax, 191 F.3d at 820*). Literally false statements give rise to a presumption of deception and materiality (elements two and three). *See id.*

The record suggests that Maui Jim disputes numerous false statements made by Defendants. Maui Jim's memorandum in support of its motion for summary judgment on its false advertising case covers a few allegedly false statements. (Pl.'s Mem. Lanham MSJ (Dkt. No. 427 37-39).) We limit our discussion here to those referenced statements. *See* *Celotex Corp., 477 U.S. at 323, 106 S. Ct. at 2553* (citing *Rule 56* for the proposition that that the movant bears the initial burden of "informing **[**66]** the district court of the basis for its motion, and identifying those portions of the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, which it believes demonstrate the absence of a genuine issue of material fact"). The relevant false

---

[17] We note the parties' disagreement as to the applicable trademark dilution law. The applicable law for the trademark dilution claim is the Federal Trademark Dilution Act of 1995, as amended by the Trademark Dilution Revision Act of 2006, *15 U.S.C. § 1125(c)*. This requires a showing that the mark is famous, that the defendant adopted an identical or similar mark, that defendant's use likely dilutes the plaintiff's mark by blurring or tarnishment, and commercial use of the mark. *See, e.g.*, *Joshi v. Joshi, No. 18 C 5426, 2019 U.S. Dist. LEXIS 128625, 2019 WL 3554388, at *5 (N.D. Ill. Aug. 1, 2019)* (internal citation omitted).

statements for analysis here, as mentioned in Maui Jim's memorandum are: (1) Defendants' customer service representatives statements as detailed in Exhibit 32 to Statement of Fact ¶ 65, (2) Defendants' website's authenticity guarantee, (3) Defendants' Supply Chain Image, and (4) Defendants' alleged statement that it has a U.S. location. We address each in turn.

1. Defendants' Customer Service Representatives' Statements

Maui Jim attached a 12-page chart entitled "SBG False Representations" as an exhibit to its Lanham Act Statement of Facts. (Pl.'s Lanham SOF ¶ 65, Ex. 32 at 11-148 (Dkt. No. 428-37).) Maui Jim's memorandum of law in support of their false advertising claims based on customer service representative statements points to this chart. (*See* Pl.'s Mem. Lanham Act (Dkt. No. 427) at 37. We addressed a few of these examples above.

Defendants contend that this segment of Maui Jim's false **[**67]** advertising case fails under the first element because, as a matter of law, statements made in response to consumer inquiries are not statements made 'in a commercial advertisement.' ***HN25***[] To this extent, Courts have held that the false advertising remedy under the Lanham Act does not cover all deceitful business practices. *See* *ISI Int'l, Inc. v. Borden Ladner Gervais LLP, 316 F.3d 731, 733 (7th Cir. 2003)*; *Fashion Boutique of Short Hills, Inc. v. Fendi USA, Inc., 314 F.3d 48, 57 (2d Cir. 2002)* ("businesses harmed by isolated disparaging statements do not have redress under the Lanham Act; they must seek redress under state-law causes of action."). In *ISI Int'l*, the Seventh Circuit confirmed that letters to customers that misleadingly asserted that the plaintiff lacked rights to license out an invention did not fall within the scope of a Lanham Act false advertising claim. *ISI Int'l, Inc., 316 F.3d at 733 (7th Cir. 2003)* (citing *First Health Grp. Corp. v. BCE Emergis Corp., 269 F.3d 800 (7th Cir. 2001))*. Similarly, in *Sanderson v. Culligan Intern. Co., 415 F.3d 620, 624 (7th Cir. 2005)*, the Seventh Circuit held that three supposedly false statements made person-to-person at trade shows were not actionable as a false advertisement claim under the Lanham Act because they were not "promotional material disseminated to anonymous recipients." *Id.* (citing *First Health Grp. Corp., 269 F.3d at 804*). The customer service representatives' dialogue with customers or potential customers is **[*1097]** thus not actionable as a false advertising claim because they were not 'commercial advertisements.' ***[**68]*** *Id.* Those conversations were person-to-person rather than promotional material disseminated to anonymous recipients. Accordingly, we partially grant Defendants' motion for summary judgment in their favor, and deny Maui Jim's in respective part, to the narrow extent that they seek judgment in their favor on the false advertising claims brought solely under Maui Jim's customer service representatives' false statements.

2. Defendants' Website's Authenticity Guarantee, Supply Chain Image, and U.S. Location Image

We next turn to three portions from Defendants' website that are allegedly literally false statements. These excerpts follow:

(Pl.'s SOF ¶ 65, Ex. 36 (Dkt. No. 428-41) at 5) ("Authenticity Guarantee"), a supply chain graphic,

(Pl.'s Resp. to Defs.' SOF (Dkt. 466) ¶ 68 (citing Ex. 35) ("Supply Chain Image"),[18] and a world map depicting that Defendants had an "operation centre" in New York, USA,

[*1098]

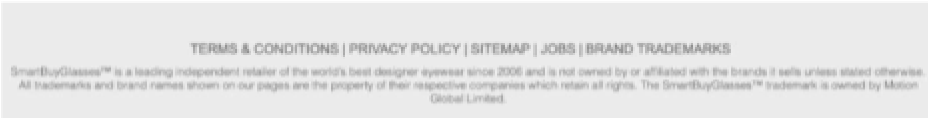
(Defs.' Resp. to Pl.'s Lanham SOF (Dkt. No. 459) ¶ 40) ("U.S Location Image.").[19]

Defendants respond by reasoning that their website additionally contains language disclaiming these generalized terms: "With some of the brands that we sell, the manufacturers' warranty will be available **[**69]** worldwide however for other brands the official warranty may not be available in your country due to territorial limitations and/or brand policies. To cover all scenarios, we offer our own exclusive 24-month warranty against all manufacturers' defects without exception." (Def's. Resp. to Pl.'s SOF ¶ 69 (Dkt. No. 459 ¶ 69). As for another disclaimer, the following appears in small type on the bottom of SmartBuyGlasses.com:

---

[18] This diagram suggests that Defendants' supply chain is direct from the manufacturer to the costumer rather than the "traditional supply chain" that routes from the manufacturer to an exporter to an importer to a wholesaler to a shop and then to a customer. (*Id.*). That diagram also contained the following accompanying sentence: "By offering the world's largest range of authentic designer eyewear, sourced directly from the world's leading eywear [sic] suppliers, we are here to help you find what you love." (*Id.*) Dispute as to whether this diagram was factually misleading as to the Maui Jim brand exists at least in part because Defendants claim that it "was accurate and consistent with SmartBuyGlasses' practice for the majority of its sales including manufacturers/brands — such as [TEXT REDACTED BY THE COURT] and [TEXT REDACTED BY THE COURT] - from which it buys genuine products from the manufacturer of the brands and ships it to its consumers" and that they made consumers aware of this reality through disclaimers. (*Id.* ¶ 68)

[19] Although Defendants do not dispute that they do not have any physical location or physical office in New York (*id.* ¶ 41) they contend that they do have an "operational dropship location in New York." (*Id.* ¶ 40 (citing Defs.' SOAF ¶ 15).) Therefore, a question of material fact remains as to whether this statement is truthful. We were not presented with the factual differences between an 'operational dropship location,' an 'operation centre,' and a physical location. Nor have the parties articulated the difference to us at this summary judgment stage. Thus, the specific factual inquiry left for the jury is whether Defendants' 'operational dropship location' identified as an "operation centre" on the U.S. Location Image was a false statement, given the fact that Defendants do not have a physical location in New York.



(*Id.* ¶ 48.) That disclaimer states that SmartBuyGlasses is not owned by or affiliated with the brands it sells unless stated otherwise. (*Id.*) The parties dispute the impact of this sentence. As for another disclaimer, once a customer pulls up a Maui Jim specific model on the website, the customer is confronted with the following website display:

[*1099]

(*Id.* ¶ 51.) The last sentence of the above states in relevant part that "SmartBuyGlasses is not affiliated with nor an official re-seller for Maui Jim and therefore we provide our own comprehensive 24-month warranty, as Maui Jim do not support their own 24-month warranty with us." (*Id.*) But Defendants' Kalinko testified that he drafted that language after the litigation commenced. (*Id.* (citing Kalinko Dep. 500:13-504:2).) So, **[**70]** the record is unclear as to how long this disclaimer was posted.

True, the Sowers Survey[20] indicates that 40.1% of its respondents had a false impression that Defendants were an authorized retailer of Maui Jim sunglasses. Nevertheless, there remains a threshold question of material fact as to the falsity of Defendants' statements (both whether they are literally false and whether they implicitly convey a false impression) given Defendants' disclaimers[21] and the other reasons discussed above such that this issue should be brought before a jury.[22] Therefore, the parties' respective motions for summary judgment on these issues are denied.

D. Reverse Passing Off

Maui Jim believes that Defendants are liable for reverse passing off under *15 U.S.C. § 1125(a)*. ***HN26***[] Any person who uses in commerce any false designation of origin that is likely to cause confusion shall be liable to any person who believes that he or she is likely to be damaged by such act. *15 U.S.C. § 1125(a)*. To establish a reverse passing off claim, a plaintiff must establish that: (1) the defendant used a false designation of origin, or a false description or representation in connection with the goods or services; (2) the defendant caused the goods or

---

[20] Defendants' dispute the results of that survey and asked us to exclude it. (Def.'s Resp. to Pl.'s SOF ¶ 70 (Dkt. No. 459 ¶ 70); Def.'s Mot. to Excl. Surv. and Test. of B. Sowers (Dkt. No. 417).) We denied that motion. (Dkt. No. 496)

[21] We are also not convinced at this juncture that the Sowers Survey is enough to resolve questions of material fact regarding falsity because it does not specifically evaluate the effects of Defendants' disclaimers.

[22] We find that the advertising issue as to third—party lenses also depends on the resolution of a question of material fact. The parties dispute whether Defendants' statements pertaining to third-party prescription lenses (less than 1% of Defendants' sales) were false. (*See* Defs.' Resp. to Pl.'s SOF ¶¶ 54-59.) On one hand, Maui Jim contends that Defendants advertised that their prescription lenses were manufactured by Maui Jim. On the other hand, Defendants contend that SmartBuyGlasses.com did not so advertise because they referred to those prescription lenses on their website with words like "our" rather than "Maui Jim's prescription lenses." (*See id.*) We are unable to say that no question of material fact exists as to whether that statement would be perceived as misleading as to who "our" pertained to (whether Defendants or Maui Jim) so we defer that question to the jury as well.

services to **[**71]** enter interstate commerce; and (3) the plaintiff is a person who believes that he or she is likely to be damaged as **[*1100]** a result. *See, e.g.*, *Hoopla Sports and Ent. v. Nike, Inc., 947 F. Supp. 347, 352 (N.D. Ill. 1996)*. Reverse passing off is where a party misrepresents someone else's goods' as their own. *See Dastar Corp. v. Twentieth Century Fox Film Corp., 539 U.S. 23, 27 n.1, 123 S. Ct. 2041, 2045 n.1, 156 L. Ed. 2d 18 (2003)*; *see also Bretford Mfg. v. Smith Sys. Mfg. Corp., 419 F.3d 576, 580 (7th Cir. 2005)* ("reverse passing off . . . is selling someone else's goods under your own mark").[23] Maui Jim's Reverse Passing Off theory is rooted in Defendants' incorrect identification of

[TEXT REDACTED BY THE COURT][24]as the manufacturer of Maui-Jim-branded sunglasses on commercial invoices it sent to its customers. Defendants blame this [TEXT REDACTED BY THE COURT] identification mishap on computer coding that operated from [TEXT REDACTED BY THE COURT] (Pl.'s Resp. to Defs.' SOF (Dkt. 466) ¶ 51.) Thus, Defendants' listing of [TEXT REDACTED BY THE COURT] name rather than Maui Jim's name on its commercial invoices (whether intentional or mistaken) does not constitute reverse passing off since they did not represent those goods as their *own*.[25]

Even if the binding law tracked the Ninth Circuit's *Smith* opinion, we would still come to the same conclusion with respect to Maui Jim's reverse passing off claim. To this point, we additionally **[**72]** hold that Maui Jim has not shown they are likely to be damaged based on the mislabeled invoices. Maui Jim's memorandum on this point only affords the following two sentences to explaining the likelihood for damages element: "The damage to Maui Jim is established by showing a likelihood that consumers will be by SBG's identification of [TEXT REDACTED BY THE COURT] as the manufacturer of MAUI JIM-branded sunglasses. The record has unassailable evidence of actual confusion, which is the best evidence of a likelihood of confusion." (Pl.'s Mem. MSJ.) To the contrary, the handful of customer feedback regarding the invoice's misstatement is not enough for us to resolve the question of whether these mislabeled invoices caused a likelihood for Maui Jim to be damaged.[26]

Accordingly, we deny Maui Jim's motion for summary judgment with respect to its claims for reverse passing off.[27]

[*1101] E. Illinois' Uniform Deceptive Trade Practices Act

---

[23] We note that the Ninth Circuit held in 1981 that reverse passing of occurs "when the wrongdoer removes the name or trademark on another party's product and sells that product under *a name chosen by the wrongdoer*," rather than requiring the passed—off—name be the wrongdoer's own. *Smith v. Montoro, 648 F.2d 602, 605 (9th Cir. 1981)* (emphasis added). We follow the precise words used by the Supreme Court and the controlling Seventh Circuit and hold that Defendants must have substituted its own name for the true manufacturer to be liable for reverse passing off. *See Dastar Corp., 539 U.S. at 27 n.1, 123 S. Ct. at 2045 n.1*; *see also Bretford Mfg., 419 F.3d at 580*. This approach harmonizes with Supreme Court's explanatory dicta that illustrated reverse passing off as to prohibit the Coca—Cola Company from filling Coca—Cola branded bottles with Pepsi—Cola, and then selling it as Coca—Cola. *Dastar Corp., 539 U.S. at 32, 123 S. Ct. at 2047*.

[24] According to Maui Jim, [TEXT REDACTED BY THE COURT] is one of Maui Jim's biggest competitors and one of Defendants' main partners. (Pl.'s Mem. Lanham MSJ (Dkt. No. 427) at 38.)

[25] Nothing on the record suggests that Defendants benefited from listing [TEXT REDACTED BY THE COURT] over Maui Jim as the manufacturer through the means of kick-backs paid by [TEXT REDACTED BY THE COURT] increased customer demand, or otherwise.

[26] We note that this situation could be different had the mislabeling of the manufacturer's identity occurred on advertisements rather than post-purchase commercial invoices.

[27] Although Defendants' motion for summary judgment in their favor on the Lanham Act claims requests judgment "on all of Maui Jim's Lanham Act Claims," neither the motion nor memorandum specifically requested summary judgment in their favor on Maui Jim's reverse passing off claims. (*See generally* Defs.' Mot. MSJ (Dkt. No. 412); Defs.' Mem. MSJ (Dkt. No. 416.)) We decline to *sua sponte* raise that argument.

Maui Jim's next seeks summary judgment on its claims for deceptive business practices under Illinois' Uniform Deceptive Trade Practices Act, 815 ILCS 510 ("UDTPA"). ***HN27***[] Plaintiff must establish the same two elements for its Lanham Act and UDTPA claims: (1) that it **[**73]** has a protectable trademark; and (2) that Defendants' use of the trademark is likely to cause confusion among consumers." *Entm't One UK Ltd. v. 2012Shiliang*, *384 F. Supp. 3d 941, 948-49 (N.D. Ill. 2019)* (collecting cases). Thus, the basis for summary judgment on the unfair competition claim is based on the same conduct as Maui Jim's Lanham Act case. (Pl.'s Mem. Lanham MSJ (Dkt. 427) at 38.) We therefore deny the motions for summary judgment for overlapping reasons as our denial of the Lanham Act motions for summary judgment.

II. Maui Jim's Copyright Claim

Maui Jim filed a separate motion for summary judgment on its copyright claim. (Pl.'s Copyright MSJ (Dkt. No. 423); Pl.'s Copyright SOF (Dkt. No. 424); Pl.'s Mem. Copyright MSJ (Dkt. No. 425).) Defendants also move for summary judgment in their favor on the copyright claim. (Defs.' MSJ (Dkt. No. 412); Defs.' Mem. MSJ (Dkt. No. 416); Defs.' SOFs (Dkt. Nos. 415, 446, 461, 463).). In summary, Maui Jim's copyright claim case alleges that it had copyrighted photographs (the "93 Photographs") of its sunglasses, and SmartBuyGlasses used those copyrighted images without Maui Jim's permission.

HN28[] The owner of copyright has the exclusive right to use and to authorize reproduction of the copyrighted **[**74]** work in copies, including copies of pictorial and graphic works. *17 U.S.C. § 106(1)*, *(5)*; *17 U.S.C. § 501(a)*. Not all copying, however, is copyright infringement. "To establish infringement, two elements must be proven: (1) ownership of a valid copyright, and (2) copying of constituent elements of the work that are original." *Feist Publn's, Inc. v. Rural Tel. Serv. Co., 499 U.S. 340, 361, 111 S. Ct. 1282, 1296 (1991)* (internal citation omitted); *Design Basics, LLC v. Lexington Homes, Inc., 858 F.3d 1093, 1099 (7th Cir. 2017)* (quoting *JCW Inv., Inc. v. Novelty, Inc., 482 F.3d 910, 914 (7th Cir. 2007))*.

A. Fair Use Doctrine

Defendants assert that Maui Jim's copyright infringement case fails as a matter of law because of the fair use doctrine. ***HN29***[] The fair use doctrine is a statutory defense codified at *§ 107* of the Copyright Act. *17 U.S.C. § 107*; *see also* *Kienitz v. Sconnie Nation LLC, 766 F.3d 756, 758 (7th Cir. 2014)*. Under this doctrine, using another's copyrighted work is "fair" for purposes such as "criticism, comment, news reporting, teaching, scholarship, or research" and is therefore "not an infringement of copyright." *Id.* These examples "guide[ ]" the analysis under the first factor. *Campbell v. Acuff-Rose Music, Inc., 510 U.S. 569, 578, 114 S. Ct. 1164, 1171, 127 L. Ed. 2d 500 (1994)*; *Red Label Music Publ'g, Inc.*, 388 F. Supp. 3d at 984. ***HN30***[] To determine whether *§ 107* saves a defendant in a copyright infringement lawsuit, courts consider the following factors: (1) the purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes; (2) the nature of the copyrighted work; (3) the amount and substantiality of the portion used in relation **[**75]** to the copyrighted work as a whole; and (4) the effect of the use upon the potential market for or value of the copyrighted work. *17 U.S.C. § 107*; *see e,g.*, *Brownmark Films, LLC v. Comedy Partners, 682 F.3d 687, 692-93 (7th Cir. 2012)*; *Red Label Music Publ'g, Inc. v. Chila Prods., 388 F. Supp. 3d 975, 983 (N.D. Ill. 2019)*. The burden of proof **[*1102]** here is on Defendants because fair use is an affirmative defense, meaning that the defendant must present "evidence sufficient to withstand summary judgment." *Chi. Bd. of Educ. v. Substance, Inc., 354 F.3d 624, 629 (7th Cir. 2003)*.

HN31[] The first factor considers the purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes. *17 U.S.C. § 107(1)*. "Central to determining the purpose and character of a work is whether the new work merely supersedes the original work, or instead adds something new with a further purpose or of a different character." *Brownmark Films, LLC, 682 F.3d at 693* (internal citation omitted). Here, the purpose and character of the use is commercial as the parties use these copyrighted photographs to advertise and sell Maui-Jim-branded sunglasses. Nothing in the record suggests that Defendants add something new to these photographs. This first factor thus weighs against fair use.

HN32[] The second factor focuses on the nature of the copyrighted work. *17 U.S.C. § 107(2)*. Works that are creative in nature are closer to the core of intended copyright protection than are more fact-based works. **[**76]** *Campbell, 510 U.S. at 586, 114 S. Ct. at 1175* (collecting cases). Defendants argue that these 93 Photographs are merely functional, low-creativity works designed to present Maui Jim sunglasses for sale and are not creative or artistic works. But a copyrighted work need only possess "at least some minimal degree of creativity." *Feist Publn's, Inc., 499 U.S. at 345, 111 S. Ct. at 1287*. "[T]he requisite level of creativity is extremely low; even a slight amount will suffice." *Id.* "The vast majority of works make the grade quite easily, as they possess some creative spark, no matter how crude, humble or obvious it might be." *Id.* (internal quotations and citation omitted). Courts have found that photographs, even if taken partly for informative purposes, can still be creative. *See, e.g.*, *Balsley v. LFP, Inc., 691 F.3d 747, 760 (6th Cir. 2012)* (finding that amateur photograph of a wet t-shirt contest had "a mixed nature of fact and creativity"); *Kelly v. Arriba Soft Corp., 336 F.3d 811, 820 (9th Cir. 2003)* ("Photographs that are meant to be viewed by the public for informative and aesthetic purposes . . . are generally creative in nature."). Even photographs of "mundane articles of furniture" have been found to have a creative nature for copyright purposes. *See Ashley Furniture Indus., Inc. v. Am. Signature, Inc.*, No. 2:11-CV-427, 2014 WL 11320708, at *9 (S.D. Ohio 2014) ("although the copyrighted photographs at issue in this case depict comparatively **[**77]** mundane articles of furniture, they are at least as creative as the surreptitious grab shot at issue in *Balsley*.").

Here, although the 93 Photographs are mundane depictions of Maui Jim's sunglasses, we find that the process of creating those photographs necessarily included decisions about lighting, camera angle and distance, shadowing, and post-production editing. Additionally, creative judgment was necessarily exercised in selecting which photographs to use on Maui Jim's advertisements. Therefore, we hold that the second factor weighs in Maui Jim's favor against the fair use doctrine.

HN33[] The third factor scrutinizes the amount taken by the alleged infringers "in relation to the copyrighted work as a whole." *17 U.S.C. § 107(3)*. Courts sometimes ask whether the secondary use took the "heart" of the original work. *Harper & Row Publishers, Inc. v. Nation Enterprises, 471 U.S. 539, 544, 564-65, 105 S. Ct. 2218, 85 L. Ed. 2d 588 (1985)*. Ultimately, "the extent of permissible copying varies with the purpose and character of the use." *Campbell, 510 U.S. at 586-87, 114 S. Ct. at 1175*. Here, Defendants used the **[*1103]** entirety of each photograph at issue. Thus, this factor weighs against the fair use doctrine and in favor of Maui Jim.

HN34[] Last, the fourth factor addresses "the effect of the use upon the potential market for or value of the copyrighted work." *17 U.S.C. § 107(4)*. This factor is often the most **[**78]** important of the four. *See* *Red Label Music Publ'g, Inc., 388 F. Supp. 3d at 986* (citing *Kienitz, 766 F.3d at 758*). In assessing this factor, courts ask whether the contested use is a complement to the protected work (allowed) rather than a substitute for it (prohibited). *See* *Kienitz, 766 F.3d at 758-59*. Still, "Market harm is a matter of degree, and the importance of this factor will vary, not only with the amount of harm, but also with the relative strength of the showing on the other factors." *Id. at 590 n.21, 114 S. Ct. at 1170 n.21*. Courts must "consider not only the extent of market harm caused by the particular actions of the alleged infringer, but also 'whether unrestricted and widespread conduct of the sort engaged in by the defendant ... would result in a substantially adverse impact on the potential market' for the original." *Id. at 590, 114 S. Ct. 1164* (internal citation omitted). The 'market' in fair use cases means the potential market for not only the original work, but also derivative uses and licensing rights." *Red Label Music Publ'g, Inc., 388 F. Supp. 3d at 987* (citing Thomas Plotkin & Tarae Howell, *"Fair Is Foul and Foul Is Fair:" Have Insurers Loosened the Chokepoint of Copyright and Permitted Fair Use's Breathing Space in Documentary Films*?, *15 Conn. Ins. L.J. 407, 433-34 (2009)* ("Even if the first three factors of the test can be satisfied, the fourth factor pre-supposes a licensing market for the copyrighted work **[**79]** which may render any abrogation of permission harmful, and thus not a fair use.")).

Here, we observe that Maui Jim uses its 93 Photographs for commercial purposes: to promote both its own sales and its authorized retailers' sales of Maui Jim sunglasses. The widespread reproduction of Maui Jim's 93 Photographs by resellers who do not pay to be Maui Jim's 'authorized retailers' certainly affects Maui Jim's market for licensing the right to use these advertising photos. Indeed, Defendants' theory that no market exists for these photographs ignores the reality that a benefit of contracting to act as one of Maui Jim's authorized retailers is the right to use these copyrighted photographs in advertisements. Thus, this factor weighs in Maui Jim's favor and against the fair use doctrine.

There is no question of material fact that the weight of these four factors falls against application of the fair use doctrine. Accordingly, we hold that no reasonable jury could find that Defendants' use of Maui Jim's copyrighted photographs to advertise their resale of Maui-Jim-branded sunglasses was fair use of Maui Jim's copyrights. We next turn to the elements of a copyright infringement claim.

B. Copyright [**80] Ownership Over the 93 Photographs

Maui Jim must prove that it owns a valid copyright over each of the 93 Photographs. ***HN35***[] Under *17 U.S.C. § 410(c)*, the certificate of a registration made before or within five years after first publication of the work shall constitute *prima facie* evidence of the validity of the copyright and of the facts stated in the certificate. *17 U.S.C. § 410(c)*. Here, it is undisputed that the U.S. Copyright Office issued Certificates of Registration for the 93 Photographs. (Defs.' Resp. to Pl.'s Copyright SOF (Dkt. No. 461) ¶ 8 (citing Second Amend. Compl. (Dkt. No. 257) at 145-244.) It is also undisputed that each registration was issued within five years of Maui Jim's **[*1104]** first publication of each of the 93 Photographs. (*Id.*)

Defendants contend that twenty-two of the 93 Photographs ("22 Photographs") at issue cannot be a basis for relief because Maui Jim did not timely register those images. ***HN36***[] Under *17 U.S.C. § 412*, statutory damages for copyright infringement are not available before the effective date of its registration, unless such registration is made within three months after the first publication of the work or one month after the copyright owner has learned of the infringement. *See, e.g.*, *FM Indus., Inc. v. Citicorp Credit Servs., Inc., 614 F.3d 335, 336 (7th Cir. 2010)* (citing *17 U.S.C. § 412*); *Intercom Ventures,* ***[**81]*** *LLC v. City Media Plus Ex-Yu Streaming*, No. 12-cv-10275, *2013 U.S. Dist. LEXIS 110236, 2013 WL 4011052, at * 5 (N.D. Ill. Aug. 6, 2013)*.

On this issue, Maui Jim argues that Defendants' motion for summary judgment on these 22 Photographs should be denied because Defendants offer no evidence that they first reproduced or publicly displayed those photographs before they were registered with the U.S. Copyright office. (Pl.'s Resp. to Defs.' MSJ (Dkt. 464) at 45.) The parties do not dispute that the 93 Photographs were generally published on Maui Jim's website or in print between March 2015 and April 2016, even though they were not registered until August 8, 2016. (Defs.' Resp. to Pl.'s Copyright SOF (Dkt. No. 461) ¶¶ 8, 20-21, 108.) True, even Maui Jim agrees that they "did not register its copyrights in the 22 photographs within three months after their publication." (Pl.'s Reply MSJ (Dkt. No. 490) at 45.) But missing the three-month timeline alone does not mean that Maui Jim cannot possibly recover damages on those photographs. Rather, *17 U.S.C. § 412* also allows damages be recovered within one month after the copyright owner has learned of the infringement. Thus, Maui Jim can still recover statutory damages on the 22 Photographs if Defendants began its infringing conduct after **[**82]** the registration date. *See* *17 U.S.C. § 412(2)*. The evidence on the record lapses in this respect. Therefore, Defendants do not meet their burden to inform us of the basis for its motion in this regard, see *Celotex, 477 U.S. at 323, 106 S. Ct. at 2553*, and we deny Defendants' motion for summary judgment as to these 22 Photographs.[28]

C. Copying

Next, Maui Jim must prove that Defendants copied its copyrighted material without its permission. *See* *Feist Publn's, Inc., 499 U.S. at 361, 111 S. Ct. at 1296*; *see also* *Design Basics, LLC, 858 F.3d at 1099* (quoting *JCW Inv., Inc., 482 F.3d at 914*). ***HN37***[] The Copyright Act affords no protection against the independent creation of a

---

[28] Defendants may revisit their argument concerning the 22 Photographs at trial. *See* *17 U.S.C. § 412* ("Registration as prerequisite to certain remedies for infringement.")

work that happens to resemble some prior creation. *See id.*; *see also* Selle v. Gibb, 741 F.2d 896, 901 (7th Cir. 1984) ("Proof of copying is crucial . . . no matter how similar the two works may be (even to the point of identity), if the defendant did not copy the accused work, there is no infringement."). Recognizing that direct evidence of copying is only rarely available, a plaintiff may also "prove copying by showing that the defendant had the opportunity to copy the original (often called 'access') and that the two works are 'substantially similar,' thus permitting an inference that the defendant actually did copy the original." Design Basics, 858 F.3d at 1099 (quoting Peters v. West, 692 F.3d 629, 633 (7th Cir. 2012)).

To prove copying by circumstantial evidence, Maui Jim must show both that Defendants had both access to the 93 **[**83]** Photographs *and* that the photographs are **[*1105]** substantially similar. Although the parties dispute whether Defendants' Rule 30(b)(6) deponent (Kalinko) admitted that their website displayed images of Maui Jim sunglasses, the parties agree that the 93 Photographs were published on Maui Jim's website or in print between March 2015 and April 2016, and that Defendants had access to them. (Defs.' Resp. to Pl.'s Copyright SOF (Dkt. No. 461) ¶¶ 20-21.) Further, the parties agree that Defendants did not independently create any of the 93 images of Maui-Jim-branded sunglasses it displays on its website. (Defs.' Resp to Pl.'s Copyright SOF (Dkt. No. 461) ¶ 16.)[29]

We next address the similarity between the 93 Photographs and the images on Defendants' website. ***HN38***[] The Seventh Circuit applies the 'ordinary observer' test to determine whether two works are substantially similar. *See* Design Basics, 858 F.3d at 1099 (quoting Peters v. West, 692 F.3d 629, 633 (7th Cir. 2012)). This test asks whether the accused work is so similar to the plaintiff's work that an ordinary reasonable person would conclude that the defendant unlawfully appropriated the plaintiff's protectable expression. Weller v. Flynn, 312 F. Supp. 3d 706, 720 (N.D. Ill. 2018) (quoting Design Basics, 858 F.3d at 1101). "With respect to photography, copyright infringement has been found where the [accused] photographer in choosing **[**84]** the subject matter, camera angle, lighting, etc., copies and attempts to duplicate all of such elements as contained in a prior photograph." Bryant v. Gordon, 483 F. Supp. 2d 605, 617 (N.D. Ill. 2007) (internal citations and quotations omitted). For the following reasons, we agree with Maui Jim to the extent that the comparisons shown in Copyright MSJ Exhibit 9 resemble *identical* images of Maui Jim sunglasses used on Defendants' website and Maui Jim's website. (*Compare* Pl.'s Mem. Copyright MSJ Ex. 9 (Dkt. 425-1) Column 4 *with id.* Column 5.) As one example:

(*Id. at 12*.) In this example, Maui Jim Copyright Registration Number VA 2-015-593 is depicted in the fourth column. That depiction is a photograph of a black pair of sunglasses facing the right. (*Id.*) This pair of sunglasses is lying on a white surface with shadows beneath both the sunglass's earpiece and each lens. (*Id.*) The fifth column contains an identical photograph hosted on Defendants' website. (*See id.*) The images of Maui Jim's sunglasses that Defendants host on their webpage are identical to Maui Jim's 93 Photographs in every way: they show the same angle, perspective, shadows and shading, colors, and positioning. Although Defendants ask us to infer that this is merely the same pairs of sunglasses **[**85]** shot at standard angles against a standard white background, we hold that no reasonable jury would find these photos are anything but identical. The fact that all of Exhibit 9's images contained in Column **[*1106]** 4 and 5 appear identical combined with the fact that there is no dispute that Defendants did not independently take or create any of those 93 images leads us to conclude that a reasonable jury could not possibly find them to be unidentical or coincidental. (Defs.' Resp. to Pl.'s Copyright SOF ¶ 16-17.)

[29] Nevertheless, even if 'access' was a disputed fact, we would infer the existence of access because of the striking similarity of the works at issue. *Weller*, 312 F. Supp. 3d at 718 (quoting Design Basics, 858 F.3d at 1100 ("inference of access may also arise from 'proof of similarity which is so striking that the possibilities of independent creation, coincidence and prior common source are, as a practical matter, precluded.'")).

Therefore, we find that they are substantially similar and that a reasonable ordinary observer could not possibly conclude otherwise.

For these reasons, we grant Maui Jim's motion for summary judgment on its copyright infringement claims, and deny Defendants'. We leave the factual issue of calculating damages for trial.

III. Tortious Interference

Defendants move for summary judgment in their favor on Maui Jim's claim for tortious interference with third-party contracts. Maui Jim does not move for summary judgment on its tortious interference claim. ***HN39***[] To state a claim for tortious interference, Maui Jim must show: (1) the existence of a valid and enforceable contract between the plaintiff **[**86]** and another, (2) Defendants' awareness of that contract, (3) Defendants' intentional and unjustified inducement of a breach of the contract, (4) a subsequent breach by the other caused by Defendants' conduct, and (5) damages. *See, e.g.*, *Webb v. Frawley, 906 F.3d 569, 577 (7th Cir. 2018)*; *Hess v. Kanoski & Assocs., 668 F.3d 446, 454 (7th Cir. 2012)*.

The first element that Maui Jim must show is the existence of a valid and enforceable contract between the plaintiff and another. *See* *Cromeens, Holloman, Sibert, Inc. v. AB Vovo, 349 F.3d 376, 398 (7th Cir. 2003)* (rejecting a tortious interference with contract claim where the plaintiffs had "not presented any evidence that [any entity] breached already-existing agreements because of [the defendant's] conduct"). The parties dispute whether Maui Jim can prove the existence of the relevant third-party contracts as a starting point. (*See, e.g.*, Defs.' Resp. to Pl.'s SOAF (Dkt. 485) ¶¶ 101-102.) Therefore, the question of whether Maui Jim produced enough evidence to establish the existence of contracts between it and third-parties is based on disputed questions of material fact such that judgment as a matter of law would be inappropriate.[30]

The second element is Defendants' awareness of that contract. Here, there is no question of material fact that Defendants were aware that Maui **[**87]** Jim contracted with authorized retailers and that those authorized retailers were prohibited from selling to other retailers (like Defendants). For example, in 2008, Maui Jim wrote to Defendants the following:

> By purchasing Maui Jim sunglasses from any authorized Maui Jim account, you are inducing that retailer to breach its contract with Maui Jim, which will **[*1107]** subject you to civil liability for interference with a contractual relationship. Your continued sale of any diverted Maui Jim products will be considered willful and malicious.
>
> . . .
>
> > Please cease and desist from attempting to procure Maui Jim products from any Maui Jim authorized accounts in the future. Such interference would likely result in those accounts being terminated and you will be liable for any damage suffered by Maui Jim as a consequence of such termination and diversion of our product.
> >
> > Now that you are aware of Maui Jim's policy regarding its authorized retail accounts, you are on notice that future violations will constitute intentional interference with contractual relations.

---

[30] This necessarily defers the legal question of whether those third-party contracts are valid and enforceable. Insofar as Defendants contend that those contracts are unenforceable under European law: the European Court of Justice ("ECJ") squarely addressed the legality of authorized retailer contracts and distribution networks under TFEU Article 101 in the context of luxury or high-end goods and ruled such contracts are not prohibited when three conditions are met: (1) the product necessitates a selective distribution system because it is high quality or technical; (2) resellers must be chosen on the basis of objective criteria; (3) the criteria defined must not go beyond what is necessary. Case C-230/16, *Coty Germany GmbH v Parfumerie Akzente GmbH*, 2017 EUR-Lex CELEX LEXIS 62016CJ0230, at □ 24. In the words of the ECJ: "[T]he characteristics and conditions of a selective distribution system may, in themselves, preserve the quality and ensure the proper use of such goods." *Id.*, at □ 26. Indeed, the ECJ held that contract terms prohibiting authorized retailers from selling luxury goods through third-party online retailers were not illegal contract terms. *Id.* at □□ 40, 52.

(Pl.'s Resp. to Defs.' Amend. SOF (Dkt. No. 466) ¶ 100 (citing Defs.' Amend. SOF (Dkt. No. 446) Ex. 43 (available at Dkt. No. 415-59 at 2).). Defendants' **[**88]** David Menning responded and recognized a mutual understanding. (Defs.' Amend. SOF Ex. 43 (Dkt. No. 415-59) at 2.) Thus, Defendants fail to show that there is no question of material fact that they were unaware of the relevant third-party contracts.

As to the third and fourth elements, Defendants' intentional inducement of a breach and a subsequent breach, Defendants do not address either in their motion for summary judgment on this issue. (Defs.' Mem. MSJ (Dkt. No. 416) at 57-62.) Thus, Defendants fail to meet their burden as movant at summary judgment on these issues. *See Celotex Corp., 477 U.S. at 323, 106 S. Ct. at 2553*.

Although we need not address the final element of damages, we nevertheless note that that remains a question of material fact as evidence on the record suggests that Maui Jim incurred financial harm due to Maui Jim's alleged interference with its third-party contracts. (*See, e.g.*, Defs.' Resp. to Pl.'s SOAF (Dkt. No. 485) ¶ 103.)

Accordingly, we deny Defendants' motion for summary judgment as to tortious interference.

IV. Defendants' Counterclaims for Defamation and Unjust Enrichment Claims

Defendants filed counterclaims for defamation and unjust enrichment against Maui Jim. (Defs.' MSJ (Dkt. No. 412); *see also* Defs.' **[**89]** Mem. MSJ (Dkt. No. 416) at 62-66.) Maui Jim also filed a motion for summary judgment on Counterclaimants' defamation and unjust enrichment counterclaims. (Pl.'s Counterclaim MSJ (Dkt. No. 420); *see also* Pl.'s Mem. Counterclaim MSJ (Dkt. No. 422).) For the following reasons, Counterclaimants' motion for summary judgment as to its counterclaims is denied.

A. Counterclaim: Defamation *Per Se*

Counterclaimants' defamation *per se* claim is brought under Illinois law based on allegations that Maui Jim knowingly made false statements to both customers and U.S. customs officials. These claims are bases on two incidents. (Defs.' Counterclaims (Dkt. No. 394-1 ¶ 29-30).) First, Defendant—Counterclaims allege that Maui Jim's corporate headquarters and customer service representatives falsely instructed potential SmartBuyGlasses' customers that SmartBuyGlasses sells counterfeit goods, that the Maui-Jim-branded sunglasses they sell are 'fake' or 'not authentic,' and that SmartBuyGlasses 'is not an authentic website.' (*Id.* ¶ 29.) Counterclaimants additionally allege that Maui Jim contacted SmartBuyGlasses' customers directly and claimed that their sunglasses are not genuine. (*Id.*) As for the second incident, **[**90]** Counterclaimants allege that Maui Jim falsely claimed to customs officials that Maui-Jim-branded sunglasses shipped by SmartBuyGlasses to U.S. Consumers **[*1108]** were "not genuine," causing U.S. customs to seize their authentic sunglasses. (*Id.* ¶ 30.)

HN40[🡅] "A defamatory statement is a statement that harms a [party's] reputation to the extent it lowers the [party] in the eyes of the community or deters the community from associating with [the party]." *Doctor's Data, Inc. v. Barrett, 170 F. Supp. 3d 1087, 1102-03 (N.D. Ill. 2016)* (quoting *Green v. Rogers, 234 Ill.2d 478, 491, 917 N.E.2d 450, 459, 334 Ill. Dec. 624 (2009))*. Under Illinois law, the elements of a defamation *per se* claim is "that the defendant made a false statement about the plaintiff, that the defendant made an unprivileged publication of that statement to a third party, and that this publication caused damages." *Id.* Illinois' courts have recognized four categories of statements that are considered defamatory *per se*: (1) words that impute the commission of a criminal offense; (2) words that impute infection with a loathsome communicable disease; (3) words that impute an inability to perform or want of integrity in the discharge of duties of office or employment; or (4) words that prejudice a party, or impute lack of ability, in his or her trade, profession or business." *Kolegas v. Heftel Broad. Corp., 154 Ill. 2d 1, 10, 607 N.E.2d 201, 206, 180 Ill. Dec. 307 (1992)* (internal citations omitted). **[**91]** Counterclaimants reason that stating that they sold stolen goods imputes the commission of a criminal offense (category 1) and that they sold counterfeit, damaged, or used goods both imputed a want of integrity in their duties of office (category 3) and constituted words that prejudice their business (category 4).

A statement that falls into one of these categories will not be found defamatory *per se* if it true or is reasonably capable of an innocent construction. *See id.* Here, it is undisputed that Maui Jim said that Counterclaimants sold counterfeit, fake, inauthentic, or non-genuine goods through its website. (*See, e.g.*, Defs.' Resp. to Pl.'s SOF (Dkt. No. 460) ¶ 22.) But, since truth is a defense to a defamation claim, the fact that we previously found in this opinion that the legitimacy of Counterclaimants' Maui-Jim-branded sunglasses is a question of material fact for the jury, we decline to reach this question as a matter of law. Therefore, we deny the parties' motions for summary judgment with respect to Counterclaimants' defamation claims. (Defs.' MSJ (Dkt. No. 412); Pl.'s Counterclaim MSJ (Dkt. No. 420).)[31]

B. Counterclaim: Unjust Enrichment

Counterclaimants' **[**92]** unjust enrichment claim seeks to recover the profits **[*1109]** that Maui Jim earned through both its allegedly defamatory statements and improper use of trademark and copyright law. ***HN41***[] "[I]f an unjust enrichment claim rests on the same improper conduct alleged in another claim, then the unjust enrichment claim will be tied to this related claim—and, of course, unjust enrichment will stand or fall with the related claim." *Cleary v. Philip Morris Inc., 656 F.3d 511 (7th Cir. 2011)*. Thus, to the extent that the parties' motions for summary judgment on Counterclaimants' unjust enrichment claim is premised upon the surviving defamation claim, they are denied. (Defs.' MSJ (Dkt. No. 412); Pl.'s Counterclaim MSJ (Dkt. No. 420). Similarly, to the extent those motions are premised on improper use of intellectual property law: they are denied as intellectual property claims also survive the summary judgment stage. (*Id.*)

V. Motion to Reconsider

We next address SmartBuyGlasses' motion to reconsider pursuant to *Fed. R. Civ. P. 59(e)*. (Mot. for Recons. ("Mot.") (Dkt. No. 378).) SmartBuyGlasses seek review of our May 10, 2019 Order that granted Maui Jim's motion to dismiss Counts IV, V, and VI, and Count II (in part) of their second amended counterclaim. (Mem. Op. and Order ("Order") (Dkt. **[**93]** No. 358).) For the reasons set forth below, we deny their motion to reconsider.

A. Background

We assume familiarity with the relevant facts as detailed in our May 10, 2019 Order and thus do not fully recount them here. (Order at 2-5.) On May 10, 2019, we issued our Order granting Maui Jim's motion to dismiss Counts I, III, IV, V, and VI and dismiss in part Count II of SmartBuyGlasses' second amended counterclaim. (*Id. at 40*.) On June 2, 2019, Counterclaimant filed the instant motion for reconsideration of our Order with respect to Count II (defamation); Count IV (violation of California's Cartwright Act, *Cal. Bus. & Prof. Code § 16700, et seq.*); Count V (violation of California's Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200, et seq.*); and Count VI (violation of Article 101 of the Treaty on the Functioning of the European Union). (Mot. at 1.) SmartBuyGlasses contends that

---

[31] Maui Jim contends that summary judgment in its favor is additionally appropriate under the unclean hands doctrine because Counterclaimants made false statements to both U.S. Customs and consumers about the manufacturer and/or source of their Maui Jim-branded sunglasses by representing that [TEXT REDACTED BY THE COURT] made them. *See, e.g.*, *Intercon Sols., Inc. v. Basel Action Network, 969 F. Supp. 2d 1026, 1064 (N.D. Ill. 2013)*, *aff'd on other grounds*, *791 F.3d 729 (7th Cir. 2015)* (discussing the doctrine of unclean hands). Maui Jim contends that these false documents prompted them to make some of the statements at issue in this lawsuit. "The bad conduct constituting unclean hands must involve fraud, unconscionability or bad faith toward the party proceeded against, and must pertain to the subject matter involved and affect the equitable relations between the litigants." *Int'l Union, Allied Indus. Workers of Am., v. Local Union No. 589, Allied Indus. Workers of Am., 693 F.2d 666, 672 (7th Cir. 1982)* (internal quotations and citations omitted). We find that this is a factual question for the jury that is inappropriate at this juncture because it turns on, among other things, the factually disputed material question as to whether Counterclaimants' inaccurate statements as to [TEXT REDACTED BY THE COURT] involvement was bad-faith misconduct or a good-faith computer coding error. (Pl.'s Resp. to Defs.' SOF (Dkt. 466) ¶ 51).

we committed manifest errors of law that require us to modify our Order in their favor. (*Id. at 1-2*.) Alternatively, they move to dismiss Count VI of Maui Jim's second amended complaint (tortious interference with contract) for *forum non conveniens* and international comity if we maintain our dismissal of Count VI of the counterclaim. (*Id.*)

Count II of SmartBuyGlasses' second amended counterclaim alleges **[**94]** defamation *per se* in connection with the fifth paragraph in Maui Jim's January 23, 2017 press release and several statements made by Maui Jim to SmartBuyGlasses potential and current customers as well as customs officials. (2d Am. Countercl. ¶¶ 26-30, 43.) We granted in part the motion to dismiss Count II based upon to the press release, finding that the statements in the fifth paragraph were protected under Illinois' innocent construction rule and thus were not actionable as defamation *per se*. (Order at 14-15.) Specifically, we found that "when the press release is read as a whole and the words given their natural and obvious meaning, the statements in the fifth paragraph refer to Maui Jim's lawsuit and its allegations, instead of a defamatory attack that can be separated from the bulk of the press release." (Order at 15 (internal quotation marks omitted) (citation omitted).) We denied in part the motion to dismiss Count II based on other statements. (Order at 11-13.) SmartBuyGlasses now moves us to reconsider our dismissal with respect to the press release. (Mot. at 1.) In the motion for reconsideration, SmartBuyGlasses contends that we committed manifest errors of law when dismissing **[**95]** **[*1110]** part of Count II because we "failed to properly apply the republication rule and erroneously believed republishing the allegations from the complaint was immunized by the litigation privilege or fair report privilege." (Mot. at 1-2.)

Count IV of SmartBuyGlasses' second amended counterclaim alleges that Maui Jim violated California's ***antitrust law***, the Cartwright Act, *Cal. Bus. & Prof. Code § 16700 et seq.* (2d Am. Countercl. ¶¶ 61-76.) Related,[32] Count V alleges that Maui Jim violated California's unfair competition law, *Cal. Bus. & Prof. Code § 16720 et seq.* (2d Am. Countercl. ¶¶ 77-85.) We found that SmartBuyGlasses did not adequately allege actionable injury under the Cartwright Act. The Cartwright act requires "(1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." (Order at 23 (citing *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 987* (9th Cir. 2000 (internal citation omitted)).) SmartBuyGlasses urges that we committed manifest errors of law since we "(i) misapprehended SmartBuyGlasses' Cartwright Act claim because SmartBuyGlasses pled injury from Maui Jim's termination of those suppliers who violate the pricing policy to sell to SmartBuyGlasses and (ii) failed to properly **[**96]** interpret the Ninth Circuit's holding in *Knevelbaard Dairies v. Kraft Foods, Inc.[,] 232 F.3d 979, 988 (9th Cir. 2000)*, with respect to antitrust standing and injury." (Mot. at 2.)

Count VI of SmartBuyGlasses' second amended counterclaim alleges Maui Jim violated the Treaty on the Functioning of the European Union ("TFEU") Article 101. (2d Am. Countercl. ¶¶ 86-90.) SmartBuyGlasses alleged TFEU Article 101(1) prohibits Maui Jim's authorized retailer contracts as unlawful restraints on trade. (*Id.* □ 88.) We dismissed the TFEU claim on the grounds of *forum non conveniens*, relying particularly on the public interest factors counseling against a US court interpreting EU law. (Order at 26, 30-33.) SmartBuyGlasses now moves us to reconsider our dismissal of its EU antitrust claim. (Mot. at 1.) They argue that we misapplied the law of *forum non conveniens*, applied inapposite case law, and should have dismissed Maui Jim's tortious interference claim since we dismissed SmartBuyGlasses' EU antitrust claim. (Mot. at 12-13.)

B. Legal Standard

HN42[] Under *Rule 59(e)*, district courts may entertain motions "to alter or amend a judgment." *Fed. R. Civ. P. 59(e)*. Motions under *Rule 59(e)* will only be granted to correct manifest errors of law or fact. *Divane v. Krull Elec. Co., 194 F.3d 845, 848 (7th Cir. 1999)* (citing *Moro v. Shell Oil Co., 91 F.3d 872, 876 (7th Cir. 1996))*. "A party moving for reconsideration pursuant to *Rule 59(e)* bears a heavy burden **[**97]** of establishing that the court should reverse its prior judgment." *Scott v. Bender, 94 F. Supp. 2d 859, 865 (N.D. Ill. 2013)* (citing *Caisse Nationale de Credit Agricole v. CBI Indus., Inc., 90 F.3d 1264, 1270 (7th Cir. 1996))*. "Motions to reconsider sounding under *Rule*

[32] Because the unfair competition law counterclaim is coterminous with the Cartwright Act counterclaim, dismissal of the latter leads to dismissal of the former. (Order at 25-26.)

59(e) should only be granted in rare circumstances." *Id.* (citing Bank of Waunakee v. Rochester Cheese Sales, Inc., 906 F.2d 1185, 1191 (7th Cir. 1990)). A Rule 59(e) motion "is not appropriately used to advance arguments or theories that could and should have been made before the district court rendered a judgment, . . . or to present evidence that was available earlier." LB Credit Corp. v. **[*1111]** Resolution Tr., 49 F.3d 1263, 1267 (7th Cir. 1995) (citations omitted).

C. Analysis

1. Defamation Claim Related to the Press Release (Count II)

SmartBuyGlasses avers that we "failed to properly apply the republication rule and erroneously believed republishing the allegations from the complaint was immunized by the litigation privilege or fair report privilege." (Mot. at 1-2.) SmartBuyGlasses summarizes the "republication rule" as "republishing one's allegations from a lawsuit to third parties, whether in a press release or other manner, is defamatory if the underlying allegations themselves are false and defamatory" and argues that "under the rule, the press release is not capable of an innocent construction." (Dkt. No. 379-1 at 2-5.) SmartBuyGlasses also assert that they did not concede that the other paragraphs of the press release are not defamatory. **[**98]** (*Id. at 7*.) Lastly, they argue that the Seventh Circuit's *Republic Tobacco* decision confirms that SmartBuyGlasses stated a defamation claim. (*Id. at 11-12*.) We will address each argument in turn.

As an initial matter, SmartBuyGlasses raises new arguments in this motion that it could have made before our prior ruling. ***HN43***[] A Rule 59(e) motion is not an appropriate means "to advance arguments or theories that could and should have been made before the district court rendered a judgment." LB Credit Corp. v. Resolution Tr., 49 F.3d 1263, 1267 (7th Cir. 1995) (citations omitted). SmartBuyGlasses contends that Rule 54(b) governs this case because they seek reconsideration of an interlocutory, non-final order, and as a result SmartBuyGlasses did not waive its reliance on the rule. (Dkt. No. 409 at 2 n.1.) However, the stated proposition applies regardless of whether the movant raises a motion to reconsider under Rule 54(b) or Rule 59(e). *See* Ace Hardware Int'l Holdings Inc. v. Masso Expo Corp., No. 11 C 3928, 2012 U.S. Dist. LEXIS 7337, 2012 WL 182236, at *3 (N.D. Ill. Jan. 23, 2012) (motions to reconsider do "not provide a party with the opportunity to take a second bite at the apple or raise new arguments that it did not make in the first instance.") (citation omitted). SmartBuyGlasses gives no reason why it did not earlier rely on the republication rule and its newly cited cases.

More importantly, the application of the republication rule does not reverse our **[**99]** conclusion regarding the reasonable innocent construction of the fifth paragraph. ***HN44***[] The innocent construction rule has the effect of exculpating an otherwise defamatory *per se* statement and is considered an exception to the republication rule. *See* Tuite v. Corbitt, 224 Ill. 2d 490, 502, 866 N.E.2d 114, 121, 310 Ill. Dec. 303 (Ill. 2006) ("even if a statement falls into one of the categories of words that are defamatory *per se*, it will not be actionable *per se* if it is reasonably capable of an innocent construction.") (internal citation omitted); *Snitowsky*, 297 Ill. App. 3d at 311, 696 N.E.2d at 766 (explaining the innocent construction rule "presents an important qualification to the rule which renders a republisher liable for the original defamation despite referring to the charges of misconduct as allegations"). Thus, even if republishing one's defamatory statement is defamation *per se*, if it is subject to an innocent construction, the republished statement is protected. *See Owens v. CBS Inc.*, 173 Ill. App. 3d at 990, 527 N.E.2d at 1305 ("Before statements will be judged defamatory as a matter of law, they must be considered in light of what has come to be known as the innocent-construction rule." (citing Owen v. Carr, 113 Ill. 2d 273, 278, 497 N.E.2d **[*1112]** 1145, 1147, 100 Ill. Dec. 783 (Ill. 1986)). Thus, merely asserting the republication rule, without an independent showing that the fifth paragraph is not protected by the innocent construction rule, is not enough for us to **[**100]** reconsider our ruling.[33]

---

[33] We need not address the litigation and fair report privileges arguments because we already found that the statements are not actionable as defamation *per se*.

We next find SmartBuyGlasses' contention that it did not concede that the other paragraphs of the press release are not defamatory is inconsistent with the record. SmartBuyGlasses' second amended counterclaim refers only to the fifth paragraph of the press release. (2d Am. Countercl. at 28, 41.) And in their opposition to Maui Jim's motion to dismiss, SmartBuyGlasses distinguished the fifth paragraph from the remainder of the press release. (Dkt. No. 231 at 9.) For example, they stated, "[i]n looking at the press release as a whole, the first four paragraphs all relate to the allegations being made in the lawsuit, but the fifth paragraph — which includes the defamatory statements — does not signal to the reader that Maui Jim is referring to allegations in its complaint." (*Id.*)

Finally, SmartBuyGlasses has not provided a single reason why or how our holding runs afoul of the *Republic Tobacco* decision. In *Republic Tobacco*, the Seventh Circuit upheld summary judgment to the plaintiff on its defamation *per se* claim because, among other things, each of the allegedly defamatory letters could only be read to confer liability. *Republic Tobacco*, 381 F.3d at 733. However, different from the letters **[**101]** in *Republic Tobacco*, the fifth paragraph of the press release here clearly refers to the allegations in the suit. Therefore, unlike *Republic Tobacco*, the statements made by Maui Jim in this paragraph are protected by the innocent construction rule. Thus, SmartBuyGlasses has failed to establish that we made a manifest error of law that requires us to reconsider our dismissal of the defamation counterclaim in pertinent to the press release.

2. Dismissal of the California Counterclaims (Counts IV & V)

a. Cartwright Act Counterclaim

SmartBuyGlasses argues that we "(i) misapprehended SmartBuyGlasses' Cartwright Act claim because SmartBuyGlasses pled injury from Maui Jim's termination of those suppliers who violate the pricing policy to sell to SmartBuyGlasses and (ii) failed to properly interpret the Ninth Circuit's holding in *Knevelbaard Dairies v. Kraft Foods, Inc.* [sic] *232 F.3d 979, 988 (9th Cir. 2000)*, with respect to antitrust standing and injury." (Mot. at 2.)

These arguments are misplaced for the following reasons. Following the Ninth Circuit's holding in *Knevelbaard*, we require that SmartBuyGlasses pleaded an actionable injury. *Id.* ***HN45***[] Under *Knevelbaard*, an actual injury has four requirements: "(1) unlawful conduct, (2) **[**102]** causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." *Id. at 987* (quoting *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1055 (9th Cir. 1999))*. We dismissed this counterclaim because the claimed injury at least failed the second and third requirements. (Order at 23-24.)

SmartBuyGlasses has not shown how the alleged unlawful agreements caused its injury. According to their pleadings, Maui Jim entered into Retailer Agreements with its retailers that "set minimum resale price maintenance prices **[*1113]** and restricts to whom those retailers can sell the product." (2d Am. Countercl. ¶ 65.) SmartBuyGlasses claim that the Retailer Agreements are unlawful because they "(a) created or carried out restrictions in trade or commerce; (b) increased the price of Maui Jim sunglasses; (c) fixed the price of Maui Jim sunglasses intended for sale, barter, use, or consumption in the State of California; (c) controlled Maui Jim's sunglasses price to the public or consumer; (d) kept the price of Maui Jim sunglasses at a fixed value; and/or (e) set the Maui Jim product price to preclude free and unrestricted competition." (*Id.* ¶ 69.) However, they do not allege that they were **[**103]** harmed due to the price fixing agreements. In fact, as we explained in our Order, because SmartBuyGlasses claims that it is Maui Jim's direct competitor, SmartBuyGlasses would stand to gain by such agreements to raise price. (2d Am. Countercl. ¶ 54; Order at 24.)

Furthermore, the claimed injury here does not flow from the unlawful conduct alleged by SmartBuyGlasses: the price fixing practice. *Compare* *Knevelbaard, 232 F.3d at 987-88* ("Since the plaintiffs allegedly were subjected to artificially depressed milk prices, the injury flows 'from that which makes the conduct unlawful,' i.e., from the collusive price manipulation itself.") *with* *Am. Ad Mgmt., Inc., 190 F.3d at 1056* ("[Plaintiff's] injury, its lost commissions, flows from the agreement to eliminate [the] discounts."). Instead, the injury flows either from the breaches of the contracts between Maui Jim and its retailers or from this litigation, neither of which Defendants allege violates ***antitrust law***.

SmartBuyGlasses counters that we dismissed its counterclaim because we misapprehended that their potential gain from an inflated price may offset its harm. (Mot. at 2.) That was not our consideration. Nor did we require the harm to consumers and to SmartBuyGlasses be the same. Rather, we held that **[**104]** the claimed injury is not actionable because it is not caused by and does not flow from the alleged price fixing agreements. (Order at 23-24.)[34]

b. Unfair Competition Law Counterclaim

The parties agree that SmartBuyGlasses' unfair competition counterclaim rises and falls with the Cartwright Act counterclaim. (Dkt. No. 379-1 at 24; Dkt. No. 400 at 16.) And SmartBuyGlasses's request for us to reconsider the unfair competition law counterclaim is based on the same reasons as its request for us to reconsider the Cartwright Act counterclaim. (Dkt. No. 379-1 at 24.) Because we do not change our decision on the Cartwright Act counterclaim, we do not change our decision on the unfair competition law counterclaim. We hold that SmartBuyGlasses has not shown that there was a manifest error of law that warrants reconsideration of our dismissal of the California counterclaims.

3. Dismissal of the European Antitrust Counterclaim (Count VI)

SmartBuyGlasses next asks us to reconsider our decision to dismiss Count VI of its counterclaim. (Mot. at 1.) That claim alleged violations of European Union ***antitrust law*** under TFEU Article 101. (2d Am. Countercl. ¶¶ 86-90.) Specifically, SmartBuyGlasses contend we **[**105]** applied an incorrect balancing test to dismiss their **[*1114]** counterclaim on *forum non conveniens* grounds. (Mot. at 1, 12-13.) As explained in the following, we find no manifest errors of law in our decision and thus deny SmartBuyGlasses' motion for reconsideration on its EU antitrust claim.

First, the balancing factors heavily favored dismissal. In this respect, SmartBuyGlasses suggests that we applied an incorrect "lesser weight" balancing test to determine dismissal of Count VI was appropriate. (Mot. at 12.) But we decidedly *did not* apply a "lesser weight" balancing test to determine this forum was inconvenient. (Order at 30-34.) Rather, we said that the balance tipped *slightly* in favor of Maui Jim *as to private factors*, not the analysis as a whole. (Order at 34.) Since we did not apply an adverb the first time, we clarify that the public interest factors *heavily* tipped in favor of dismissing for *forum non conveniens*. SmartBuyGlasses claim is at best a willful misreading of the wording of our prior order. As such, we remind SmartBuyGlasses' counsel of their obligations under *Fed. R. Civ. P. 11*, and hold that there was no manifest error of law with respect to the *forum non conveniens* balancing factors.

We specifically **[**106]** address the public factor of comity. Comity clearly supports dismissal because SmartBuyGlasses' claim requires our interpretation of EU ***antitrust law*** and creates a significant risk of cross-border conflicts. SmartBuyGlasses argue that EU law invalidates Maui Jim's contract provisions, and thus they believe that our refusal to hear its antitrust claim creates a conflict. EU law does not support SmartBuyGlasses' position on the legality of Maui Jim's anti-diversion contracts. SmartBuyGlasses cite no cases in support of its argument that Maui Jim's contracts are "clearly illegal." Likely this is because they are not. The European Court of Justice ("ECJ") squarely addressed the legality of authorized retailer contracts and distribution networks under TFEU Article 101 in the context of luxury or high-end goods and ruled such contracts are not prohibited when three

[34] SmartBuyGlasses also assert that the harm they suffer due to Maui Jim's termination of its agreements with retailers who violated the pricing policy is the kind of harm the Cartwright Act was designed to prevent. (Dkt. No. 379-1 at 22.) Fundamentally, SmartBuyGlasses contend that the injury meets the fourth requirement of an actionable injury. We need not address this requirement to dismiss the counterclaim because the injury has not met the two requirements explained above.

conditions are met: (1) the product necessitates a selective distribution system because it is high quality or technical; (2) resellers must be chosen on the basis of objective criteria; (3) the criteria defined must not go beyond what is necessary. Case C-230/16, *Coty Germany GmbH v Parfumerie Akzente GmbH*, 2017 EUR-Lex CELEX **[**107]** LEXIS 62016CJ0230, at 24. In the words of the ECJ: "[T]he characteristics and conditions of a selective distribution system may, in themselves, preserve the quality and ensure the proper use of such goods." *Id.*, at 26. Indeed, the ECJ held that contract terms prohibiting authorized retailers from selling luxury goods through third-party online retailers were not illegal contract terms. *Id.* at 40, 52.

The precise contours of SmartBuyGlasses' EU ***antitrust law*** claim is at best unclear. (2d Am. Countercl. ¶¶ 86-90.) It appears their counterclaim flies in the face of an on-point ruling from the ECJ. *Coty Germany*, 2017 EUR-Lex CELEX LEXIS 62016CJ0230 at 72. There is little daylight between their claim and the anti-diversion contracts that prevented sales to online third-party distributors in *Coty*. *Id.* at 52. Regardless, the application of EU ***antitrust law*** to Maui Jim's particular contractual provisions requires a full inquiry into the relative harm to competition, objective necessity of the contractual terms, benefit to competition, and the applicability of the TFEU block exemptions from antitrust liability. *Id.* at 55, 56, 69. Thus, SmartBuyGlasses' argument that its claim mirrors **[**108]** Maui Jim's tortious interference claim is false: there are clearly a number of additional elements at work in SmartBuyGlasses' TFEU claim that require significant independent discovery and engender legal disputes on matters of foreign **[*1115]** law. (*Contra* Mot. at 12-13.) Therefore, there is also no contradiction in dismissing their antitrust counterclaim while keeping Maui Jim's tortious interference claim. Thus, we also decline to dismiss Plaintiff's tortious interference claim based on *forum non conveniens*.

CONCLUSION

For the reasons discussed above, Maui Jim's motion for summary judgment is granted in part and denied in part, Defendants' motion for summary judgment is granted in part and denied in part, and Defendants' motion for reconsideration is denied. Our limited grants of summary judgment are: (1) In Plaintiff's favor on its Copyright claims (with the issue of damages left for trial); and (2) in Defendants' favor to the narrow extent that Maui Jim's false advertising theory is based solely on Maui Jim's customer service representatives' false statements. Questions of material fact exist as to all other pending claims and theories such that judgment as a matter of law is otherwise inappropriate. **[**109]** [35]

Opinion

MEMORANDUM DECISION AND ORDER

This matter is before the court on Defendants Steward Health Care System LLC and Jordan Valley Medical Center, LP's Motion to Dismiss Plaintiff Legrand P. Belnap, M.D.'s amended complaint for lack of subject-matter jurisdiction and failure to state a claim pursuant to *Rules 12(b)(1)* and *12(b)(6) of the Federal Rules of Civil Procedure*. The court held a hearing on the motion on January 8, 2020. At the hearing, Defendants were represented by Ashley M. Fischer, Katharine M. O'Connor, and Amy F. Sorenson and Plaintiff was represented by Peter Stirba. The court took the matter under advisement. The court considered carefully the memoranda and other materials submitted by the parties, **[*2]** as well as the law and facts relating to the motion. Now being fully advised, the court issues the following Memorandum Decision and Order.

BACKGROUND

Plaintiff Legrand P. Belnap, M.D. ("Dr. Belnap") is a general surgeon with expertise in organ transplantation, bariatric surgery, and cases involving complex cancers. He has been a practicing physician in the State of Utah since 1974. Defendant Jordan Valley Medical Center, LP ("JVMC") is a medical center located in West Jordan, Utah, which was formerly owned by Iasis Healthcare Holdings ("Iasis"). Steward Health Care System LLC ("Steward") is a health care corporation that acquired Iasis in or around September 2017. Steward currently owns or operates five hospitals in the State of Utah, including JVMC and Salt Lake Regional Medical Center ("Salt Lake Regional"), another hospital formerly owned by Iasis.

From 2009 to 2013, Dr. Belnap enjoyed a successful medical practice at Salt Lake Regional. In March 2013, however, Dr. Belnap's hospital privileges at Salt Lake Regional were summarily suspended for alleged behavior issues by Salt Lake Regional's Medical Executive Committee (the "MEC"). Following the MEC's decision, Dr. Belnap sought review **[*3]** of his suspension, and he took part in a hearing before a Fair Hearing Committee in April 2013. The Fair Hearing Committee determined that Dr. Belnap's suspension had been arbitrary and capricious because the investigation that led to the suspension had been one-sided. Consequently, Dr. Belnap's hospital privileges were reinstated in May 2013. Yet, after his reinstatement, Salt Lake Regional (1) did not notify insurance carriers that Dr. Belnap's suspension had been vacated; (2) communicated to third parties that Dr. Belnap had been the subject of suspension proceedings; and (3) began reviewing Dr. Belnap's medical charts for errors.

Based on his suspension and his subsequent experience at Salt Lake Regional, Dr. Belnap filed suit against Salt Lake Regional and Iasis. Approximately seven months after filing the lawsuit, in September 2014, the MEC denied Dr. Belnap's application to renew his hospital privileges at Salt Lake Regional. Again, Dr. Belnap sought and took part in a hearing before a panel to review the MEC's decision. Following the hearing, the panel upheld the denial of Dr. Belnap's renewal application, and that decision was ultimately upheld by the Board of Trustees.[1] Defendants **[*4]** then reported the denial of Dr. Belnap's renewal application to the National Practitioner Data Bank (the "Data Bank").

In or around September 2013, after his privileges had been reinstated at Salt Lake Regional, Dr. Belnap applied for privileges at JVMC. At JVMC, applications for privileges follow a four-step process: (1) the JVMC Medical Executive Committee (the "JVMC Committee") first considers an application with input from the Credentials Committee; (2) if the application is denied, the applicant may request a hearing before the JVMC Fair Hearing Panel (the "FHP"); (3) if denied again, the applicant may request appellate review before the JVMC Appellate Review Body; and (4) a final determination is made by the JVMC Board of Directors. Nearly a year after submitting his application, and approximately six months after filing the lawsuit against Salt Lake Regional, the JVMC Committee denied Dr. Belnap's application for privileges based on previous behavior issues at other hospitals as well as the number of medical malpractice claims against him. In turn, Dr. Belnap requested a hearing from the FHP, which took place in October 2014. The FHP unanimously concluded that JVMC failed to **[*5]** exercise due diligence in evaluating Dr. Belnap's application. Moreover, the FHP recommended that Dr. Belnap's application should be approved.

Despite the FHP's conclusion, the JVMC Committee held another meeting in January 2015 where they heard from three physicians, including Dr. Steven Mintz ("Dr. Mintz"), a general surgeon and the Chief of General Surgery at Salt Lake Regional who was also a member of Salt Lake Regional's Credentials Committee and Board of Trustees, and Dr. Ben Howard ("Dr. Howard"), an anesthesiologist, the Chief of Medical Staff at Salt Lake Regional, and a member of the MEC. Dr. Belnap was neither notified of the meeting nor invited to attend. Following this meeting, the JVMC Committee reaffirmed the denial of Dr. Belnap's application for alleged poor behavior at other hospitals. Dr. Belnap appealed the JVMC Committee's decision, and JVMC appointed Yocum as the advisor to the Appellate Review Body. Dr. Belnap filed a motion to disqualify Yocum, but the Appellate Review Panel denied his motion.

---

[1] Dr. Belnap alleges that the hearing was not fair because Salt Lake Regional employed a panel advisor, William J. Yocum ("Yocum"), who had a conflict of interest and was regarded as a "hospital lawyer." Dr. Belnap claims that Yocum's strong bias in favor of Salt Lake Regional manifested itself throughout the hearing.

After a hearing to review the denial of Dr. Belnap's application, the Appellate Review Board affirmed the JVMC Committee's denial of Dr. Belnap's application for privileges, **[*6]** and that decision was subsequently affirmed by the JVMC Board of Directors. As a result, in June 2015, Defendants reported the denial of Dr. Belnap's application for privileges to the Data Bank.

Since the JVMC Board of Directors' denial of Dr. Belnap's application, Dr. Belnap has been unable to obtain privileges at any other hospital due to the Data Bank reports because hospitals are legally required to check the Data Bank prior to granting privileges to any new doctors. As such, Dr. Belnap has been unable to continue his career in inpatient general surgery, and now assists weight loss surgeries at an outpatient clinic. Yet, even at the outpatient clinic, no insurance company will cover Dr. Belnap's services due to the Data Bank reports and his lack of hospital privileges.

Dr. Belnap commenced the instant suit on May 13, 2019 and has since filed an amended complaint wherein he alleges seven causes of action: (1) a conspiracy to restrain trade in violation of *Section 1* of the *Sherman Act* and *Section 4* of the *Clayton Act*; (2) breach of contract; (3) breach of contract as a third-party beneficiary; (4) breach of the implied covenant of good faith and fair dealing; (5) tortious interference with economic **[*7]** relations; (6) intentional infliction of emotional distress; and (7) civil conspiracy.[2] Dr. Belnap alleges that Defendants conspired to eliminate Dr. Belnap from the Utah inpatient general surgery market for anticompetitive reasons. He alleges that Defendants conspired to deny his application for privileges at JVMC in order to eliminate him from the market and preclude him from obtaining privileges at other hospitals. Further, Dr. Belnap contends that by denying him privileges at JVMC and inhibiting him from obtaining privileges at other Utah hospitals, Defendants have deprived patients in Utah from being able obtain necessary treatment that otherwise could have been rendered by Dr. Belnap. Consequently, he claims that such patients have been forced to seek treatment outside of Utah and settle for substandard care.

DISCUSSION

Defendants now move to dismiss Dr. Belnap's antitrust claim for failure to state a claim and his remaining claims for lack of subject-matter jurisdiction. "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim for relief that is plausible on its face." *Bixler v. Foster, 596 F.3d 751, 756 (10th Cir. 2010)* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009))* (quotation marks omitted). "[A]ll well-pleaded **[*8]** factual allegations in the complaint are accepted as true and viewed in the light most favorable to the nonmoving party." *Acosta v. Jani-King of Oklahoma, Inc., 905 F.3d 1156, 1158 (10th Cir. 2018)* (quoting *Moore v. Guthrie, 438 F.3d 1036, 1039 (10th Cir. 2006))*. "[M]ere 'labels and conclusions,' and 'a formulaic recitation of the elements of a cause of action' will not suffice; a plaintiff must offer specific factual allegations to support each claim." *Kansas Penn Gaming, LLC v. Collins, 656 F.3d 1210, 1214 (10th Cir. 2011)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. Furthermore, if, at any time, a "court determines . . . that it lacks subject-matter jurisdiction, the court must dismiss the action." *Fed. R. Civ. P. 12(h)(3)*; *see also* *Full Life Hospice, LLC v. Sebelius, 709 F.3d 1012, 1016 (10th Cir. 2013)* ("A court lacking jurisdiction cannot render judgment but must dismiss the cause at any stage of the proceedings in which it becomes apparent that jurisdiction is lacking.").

I. Antitrust Claim

Under *Section 1* of the Sherman Act, "[e]very contract, combination . . ., or conspiracy, in restraint of trade or commerce . . . is . . . illegal." *15 U.S.C. § 1*. In order to bring a claim under *Section 1*, a plaintiff must first establish that he or she has antitrust standing. *See* *Tal v. Hogan, 453 F.3d 1244, 1253 (10th Cir. 2006)*. Significantly, "the

---

[2] This is the third in a series of lawsuits Dr. Belnap has filed against JVMC, Salt Lake Regional, the hospitals' owners, and various physicians who have practiced at the hospitals, all arising out of Dr. Belnap's lack of privileges to practice at these facilities.

standing requirements in the antitrust context are more rigorous than that of the Constitution." *Id.* Indeed, not only must an antitrust plaintiff demonstrate an "antitrust injury," he or she must also show "a direct causal connection between that injury **[*9]** and a defendant's violation of the antitrust laws." *Id.*

After a plaintiff has met the antitrust standing requirements, his or her complaint can only survive if it plausibly alleges a *Section 1* violation. *See Twombly, 550 U.S. at 556*. When analyzing whether a plaintiff has adequately alleged a violation of *Section 1*, "[t]he crucial question is whether the challenged anticompetitive conduct stem[s] from independent decision or from an agreement, tacit or express." *Id. at 553* (alterations in original) (internal quotation marks omitted) (quoting *Theatre Enterprises, Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 540, 74 S. Ct. 257, 98 L. Ed. 273 (1954))*. This is because "[i]ndependent action is not proscribed." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. Therefore, "[o]nly after an agreement is established will a court consider whether the agreement constituted an unreasonable restraint of trade." *Champagne Metals v. Ken-Mac Metals, Inc., 458 F.3d 1073, 1082 (10th Cir. 2006)*.

In this case, Defendants move to dismiss Dr. Belnap's antitrust claims for two reasons. First, they contend that Dr. Belnap has failed to alleged an antitrust injury and therefore lacks antitrust standing to bring his claim. Second, even if Dr. Belnap has alleged an antitrust injury, Defendants aver that he has failed to adequately allege a conspiracy under *Section 1*. The court will address each of Defendants' arguments in turn.

A. Antitrust Injury

An "antitrust injury" is an "injury of the type the antitrust **[*10]** laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))*. "The primary concern of the antitrust laws is the corruption of the competitive process, not the success or failure of a particular firm." *Tal, 453 F.3d at 1258*. Put differently, "the antitrust laws . . . were enacted for 'the protection of competition, not competitors.'" *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*. Accordingly, a plaintiff "must allege and prove harm, not just to a single competitor, but to the competitive process, i.e., to competition itself." *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*; *see also Cohlmia v. St. John Med. Ctr., 693 F.3d 1269, 1281 (10th Cir. 2012)* ("An antitrust plaintiff must prove that challenged conduct affected the prices, quantity or quality of goods or services, not just his own welfare.") (quoting *Mathews v. Lancaster Gen. Hosp., 87 F.3d 624, 641 (3d Cir. 1996))*.

In this case, Dr. Belnap alleges that Defendants' actions have resulted in various antitrust injuries. First, Dr. Belnap avers that Defendants improperly utilized the privileges and credentialing process to drive him out of the Utah inpatient general surgery market and eliminate him as a competitor. Dr. Belnap contends that this has resulted in injury to the relevant market considering he is one of the top surgeons in the market. Thus, because patients no longer have access to one of the top surgeons in the market, **[*11]** Dr. Belnap contends that Defendants have essentially deprived patients of necessary treatment, caused patients to receive lower quality care, and forced patients to seek care outside of the State of Utah. Second, Dr. Belnap claims that his removal from the relevant market has injured the competitive process in that the flow of out-of-state patients, money, and goods that he generated through his surgical practice have been completely eliminated. Third, Dr. Belnap contends that Defendants' actions have precluded him from being able to obtain privileges at any hospitals, severely reduced his income, and caused him substantial financial, reputational, and emotional harm.

To support his claim of antitrust injury, Dr. Belnap relies heavily on *Cohlmia v. Ardent Health Servs., LLC*. There, the plaintiff doctor alleged that there existed an antitrust injury when the defendants "improperly used the peer review process, normally thought to enhance competition, in order to drive [the plaintiff] out of the market and thus harm competition." *Cohlmia v. Ardent Health Servs., LLC, 448 F. Supp. 2d 1253, 1263 (N.D. Okla. 2006)*. The plaintiff further argued that the defendants interfered with the plaintiff's patients "to prevent them from exercising free choice in the market and indeed, **[*12]** to prevent some of them from receiving the best medical care possible."

Id. at 1264. The court concluded that such allegations were sufficient to survive the defendants' motion to dismiss. *Id.*

Having reviewed Dr. Belnap's allegations, the court concludes that he has failed to adequately allege an antitrust injury. As a preliminary matter, Dr. Belnap makes several allegations that Defendants' actions have injured him personally. Such injuries, however, do not constitute antitrust injuries because they are injuries to Dr. Belnap as a competitor, not injuries to the competitive process. Accordingly, the court will disregard Dr. Belnap's allegations that he has been unable to obtain privileges at other hospitals, that his income has suffered, and that he has suffered substantial personal harm as result of Defendants' actions for standing purposes because they do not constitute antitrust injuries.

As for Dr. Belnap's remaining injury allegations, the court likewise finds them insufficient. To start, as the Tenth Circuit has noted, an antitrust injury does not exist "every time someone is excluded from a medical hospital as a result of peer review" or the credentialing process. *Cohlmia, 693 F.3d at 1281*. For example:

> A staffing **[*13]** decision does not itself constitute an antitrust injury. If the law were otherwise, many a physician's workplace grievance with a hospital would be elevated to the status of an antitrust action. To keep the antitrust laws from being so trivialized, *the reasonableness of a restraint is evaluated based on its impact on competition as a whole* within the relevant market.

Id. (emphasis in original) (quotation marks omitted) (quoting *BCB Anesthesia Care Ltd. v. Passavant Mem'l Area Hosp. Ass'n., 36 F.3d 664, 669 (7th Cir. 1994))*. Thus, for Dr. Belnap to have properly stated a *Section 1* claim, he must have set forth plausible allegations that Defendants' actions in denying him hospital privileges negatively impacted the Utah inpatient general surgery market. The court concludes that he has failed to do so. Although Dr. Belnap contends that the Utah inpatient general surgery market has been injured for the various reasons enumerated above, the court finds those allegations to be conclusory and bereft of factual support. Moreover, at least in this case, the court is unconvinced that one general surgeon's denial of privileges at a single hospital has or will have the type of anticompetitive effect on the relevant market that Dr. Belnap so insists.

The court further concludes that Dr. Belnap's reliance **[*14]** on *Ardent Health* to be misplaced given that the facts of that case are readily distinguishable from the present case. First, the physician plaintiff in that case specialized "in cardiovascular, thoracic, vascular and endovascular surgery." *Ardent Health, 448 F. Supp. 2d at 1260*. Second, a significant portion of the physician plaintiff's patients were Native American and considered "high risk," and, as such, were "not always well received by other cardiovascular surgeons and health care facilities." *Id.* Nevertheless, the plaintiff physician "possesse[d] the skill, expertise, and willingness to operate on [them]." *Id.* In sum, the plaintiff physician's patients were a small and narrow subset of the population that required treatment in an-already narrow market but who would almost certainly be deprived of treatment in the physician's absence from the market. That, however, is not the case here. As a general surgeon, Dr. Belnap is a competitor in a market much broader than the relevant market at issue in *Ardent Health*, i.e., the general surgery market vs. the cardiovascular, thoracic, vascular and endovascular surgery market. Furthermore, Dr. Belnap's claims of injury to the relative market—and, particularly, to patients—are **[*15]** much less certain and particularized than the allegations of injury in *Ardent Health*. And, importantly, in *Ardent Health*, the district court reached its decision regarding antitrust injury *because of* the specific patients and how they would be affected if the plaintiff physician was unable to practice. *See id. at 1265* (noting that the court was "willing . . . to give [the plaintiff] the benefit of the doubt, for the sake of [his] patients—i.e., the consumers in [the] market—who [were] . . . high risk and low income, and may therefore have real difficulty securing comparable services"). Consequently, the court is unpersuaded by Dr. Belnap's reliance on *Ardent Health*.[3]

---

[3] The court also notes that the district court decided *Ardent Health* before the Supreme Court set forth the plausibility pleading standard in *Twombly* and *Iqbal*. Thus, not only are the facts of that case distinguishable from this case, but the court was operating under a lower standard of pleading.

The court therefore concludes that Dr. Belnap has failed to plausibly allege an antitrust injury sufficient to confer standing. As such, Dr. Belnap's antitrust claim must be dismissed.

B. Conspiracy

Even if Dr. Belnap had adequately alleged an antitrust injury, the court concludes that he has failed to properly allege a conspiracy in violation of *Section 1* of the Sherman Act. As mentioned above, *Section 1* makes contracts, combinations, and conspiracies that restrain trade or commerce illegal. *15 U.S.C. § 1*. "This language has been interpreted **[*16]** . . . to prohibit a 'concerted action.'" *Bell v. Fur Breeders Agric. Co-op., 348 F.3d 1224, 1232 (10th Cir. 2003)*. Indeed, "*Section 1* does not proscribe purely unilateral activity by a single entity." *Systemcare, Inc. v. Wang Lab. Corp., 117 F.3d 1137, 1140 (10th Cir. 1997)*. Accordingly, for there to exist a conspiracy, there must be "two or more entities that previously pursued their own interests separately . . . combining to act as one for their common benefit." *Abraham v. Intermountain Health Care Inc., 461 F.3d 1249, 1256 (10th Cir. 2006)* (quoting *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 769, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))*. And, as noted above, "*Section 1* requires the existence of an agreement between the allegedly conspiring parties." *Reazin v. Blue Cross & Blue Shield of Kansas, Inc., 899 F.2d 951, 963 (10th Cir. 1990)*; *see also* *Champagne Metals, 458 F.3d at 1082* ("The essence of a claim of violation of *Section 1* of the Sherman Act is the agreement itself."). In other words, a plaintiff must allege that the defendants entered into an agreement wherein they "consciously committed themselves to a common scheme designed to achieve an unlawful objective." *Llacua v. W. Range Ass'n, 930 F.3d 1161, 1179 (10th Cir. 2019)* (quoting *N. Am. Soccer League, LLC v. United States Soccer Fed'n, Inc., 883 F.3d 32, 40 (2d Cir. 2018))*.

In this case, Dr. Belnap alleges that Steward, JVMC, Salt Lake Regional, members of the JVMC Committee, the Appellate Review Body, Dr. Howard, and Dr. Mintz all conspired to eliminate him from the Utah inpatient general surgery market. He further alleges that a conspiracy can be inferred based on the allegations in the Amended Complaint because he contends that Defendants had rational economic motives to conspire against him.

The court finds Dr. Belnap's allegations **[*17]** to be insufficient for various reasons. At the outset, Steward, JVMC, and Salt Lake Regional are incapable, as a matter of law, of conspiring together for purposes of a *Section 1* claim based on the Supreme Court's decision in *Copperweld*. In *Copperweld*, the Court held that a corporation and "its wholly owned subsidiary . . . are incapable of conspiring with each other for purposes of *§ 1* of the Sherman Act." *Id. at 777*. The Court explained:

> [T]he coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the Sherman Act. A parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but one. . . . With or without a formal "agreement," the subsidiary acts for the benefit of the parent, its sole shareholder. If a parent and a wholly owned subsidiary do "agree" to a course of action, there is no sudden joining of economic resources that had previously served different interests, and there is no justification for *§ 1* scrutiny.

Id. at 771. Since *Copperweld*, courts have applied its reasoning to other **[*18]** corporate relationships. For example, the Tenth Circuit has opined that "*Copperweld* supports treating the coordinated acts of *sister subsidiaries* wholly owned by the same parent as those of a single enterprise, such that the subsidiaries are incapable of conspiring under *§ 1* of the Sherman Act." *Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 847 F.3d 1221, 1234 (10th Cir. 2017)* (emphasis added). In reaching this conclusion, the Tenth Circuit noted that "[c]ourts and commentators have long agreed that the logic of this view is plain." *Id.* The court further articulated:

> [A]ll of the reasoning of the Court [in *Copperweld*] . . . equates sibling corporations with subsidiaries. The total unity of the corporate enterprise is equally reflected in both. In refusing to make corporate form determinative and in refusing to treat wholly owned corporations differently from unincorporated divisions, the *Copperweld* holding also denies conspiratorial capacity to sibling corporations' dealings with each other.

Id. (alterations in original) (quoting 7 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1464f, at 225 (3d ed. 2008)). In the Amended Complaint, Dr. Belnap alleges that, at all relevant times, both JVMC and Salt Lake Regional were owned by Iasis, and Iasis was acquired by **[*19]** Steward. Am. Compl. ¶ 5. Therefore, the court concludes that because JVMC and Salt Lake Regional are sister subsidiaries under their parent corporation, Steward, they are incapable of conspiring with each other or Steward for purposes of Dr. Belnap's *Section 1* claim.

To avoid this conclusion, Dr. Belnap attempts to distinguish this case from *Copperweld* by arguing that *Copperweld* and its progeny only apply to cases involving a parent corporation and its *wholly owned* subsidiary. Dr. Belnap points out that neither JVMC nor Salt Lake Regional are wholly owned subsidiaries of Steward, and he has made no allegation advancing such a claim. While it is true that neither JVMC nor Salt Lake Regional are wholly owned subsidiaries, courts have continuously applied *Copperweld* to cases even when the subsidiaries were not wholly owned.[4] *See* *Coast Cities Truck Sales, Inc. v. Navistar Int'l Transp. Co., 912 F. Supp. 747, 764 (D.N.J. 1995)* ("Since [*Copperweld*], several courts have concluded that subsidiaries that are not wholly owned nevertheless cannot be actors in conspiracy with their majority owners."); *Bell Atl. Bus. Sys. Servs. v. Hitachi Data Sys. Corp., 849 F. Supp. 702, 706 (N.D. Cal. 1994)* (applying *Copperweld* when parent company owned only 80% of the subsidiary); *Novatel Commc'ns, Inc. v. Cellular Tel. Supply, Inc., No. CIV.A. C85-2674A, 1986 U.S. Dist. LEXIS 16017, 1986 WL 15507, at *6 (N.D. Ga. Dec. 23, 1986)* (holding that *Copperweld* applied even though the **[*20]** parent company owned only 51% of the subsidiary). The court is therefore unpersuaded by Dr. Belnap's attempt at removing this case from the purview of *Copperweld*.

The court finds Dr. Belnap's conspiracy allegations regarding the JVMC Committee and the Appellate Review Body to be equally unavailing. First, while Dr. Belnap claims that the JVMC Committee and the Appellate Review Body conspired to exclude him, they simply did not have the final authority to deny him privileges. Although they decided to deny Dr. Belnap's application, their decisions functioned as nothing more than recommendations to the JVMC Board of Directors—the final decisionmaker on which physicians will obtain privileges to practice at JVMC. And, here, Dr. Belnap's allegations only establish that the JVMC Board of Directors acted unilaterally in denying Dr. Belnap's application for privileges. Indeed, the Amended Complaint simply suggests that the JVMC Board of Directors did nothing more than adopt the recommendations of the JVMC Committee and the Appellate Review Body. The Amended Complaint is devoid of any allegation that the JVMC Board of Directors engaged in any conduct that would imply a conspiracy. Second, despite **[*21]** Dr. Belnap's contentions, the JVMC Board of Directors had a legitimate economic motive to grant Dr. Belnap privileges because hospitals make more when surgeons perform their surgeries there. *See* *Llacua, 930 F.3d at 1179-80* ("An inference of conspiracy is impermissible if the defendants had no rational economic motive to conspire.") (quotation marks omitted). Consequently, the court concludes that Dr. Belnap has failed to adequately allege a conspiracy involving the JVMC Committee or the Appellate Review Body.[5]

This leaves Dr. Howard and Dr. Mintz as the only remaining parties that could have conspired with Defendants. The court, however, finds Dr. Belnap's conspiracy allegations regarding them to be insufficient. First, the court finds unconvincing Dr. Belnap's allegations that Dr. Howard and Dr. Mintz had rational economic motives to conspire to exclude him from the relevant market. On the one hand, Dr. Howard is an anesthesiologist and thus had no economic motive to exclude Dr. Belnap because he was not a competitor. And on the other, although Dr. Mintz is a general surgeon, he is also the Chair of the Salt Lake Regional Board of Trustees and therefore was incentivized to grant Dr. Belnap privileges **[*22]** at Salt Lake Regional for the hospital to derive more revenue. Second,

[4] Steward owns 90% or more of JVMC. Def. Jordan Valley Med. Ctr., LP's Corp. Discl. Statement, ECF No. 13 (Aug. 30, 2019) ("No other publicly-held corporation owns 10% or more of Jordan Valley Medical Center, LP's stock.").

[5] The court is further persuaded that Dr. Belnap has failed to allege a conspiracy with respect to the JVMC Committee and the Appellate Review Body because, during the privileges and credentialing process, those bodies are essentially acting vicariously for JVMC. *Oksanen v. Page Mem'l Hosp., 945 F.2d 696, 703 (4th Cir. 1991)* ("We think . . . that the staff is acting as an agent of [the hospital] during the peer review process and as such is indistinct from the hospital."). Thus, allegations that the JVMC Committee and the Appellate Review Body conspired with Defendants cannot meet the requirement that there be a concerted action by *independent* entities.

irrespective of Dr. Howard's and Dr. Mintz's economic motives, the court finds that Dr. Belnap has simply failed to plausibly allege a conspiracy between those doctors and Defendants. Importantly, the Amended Complaint makes no allegation that Dr. Howard and Dr. Mintz had any communication with the JVMC Board of Directors. Rather, all of the allegations regarding Dr. Howard and Dr. Mintz suggest that they (1) took part in denying Dr. Belnap's application for privileges at Salt Lake Regional and (2) made false and defamatory statements about Dr. Belnap to the JVMC Committee.[6] Yet, neither set of allegations evinces the existence of a conspiracy, nor do they imply that the parties entered into any type of agreement at all. The court therefore finds that Dr. Belnap's allegations regarding Dr. Howard and Dr. Mintz are insufficient to suggest a conspiracy.[7]

The court concludes that Dr. Belnap has failed adequately allege that Defendants conspired to eliminate him from the market. Thus, based on that additional basis, Dr. Belnap's antitrust claim must be dismissed.

As a final matter, the court once again notes that this case **[*23]** involves nothing more than a single physician being denied privileges at a single hospital. While the hardships that Dr. Belnap has suffered as a result of being unable to obtain privileges at hospital are not lost on the court, the court is persuaded that this case does not present a set of facts that are meant to be covered by the antitrust laws. On this point, the court finds the Seventh Circuit's analysis in *BCB Anesthesia* to be particular pertinent. In the Seventh Circuit's words:

> This case involves one hospital's decisions about staff privileges and staffing patterns. The cases involving staffing at a single hospital are legion. Hundreds, perhaps thousands of pages in West publications are devoted to the issues those circumstances present. Those cases invariably analyze those circumstances under the rule of reason-there is nothing obviously anticompetitive about a hospital choosing one staffing pattern over another or in restricting the staffing to some rather than many, or all. A hospital has an unquestioned right to exercise some control over the identity and number to whom it accords staff privileges. Malpractice concerns, quality of care, market perceptions, cost, and administrative **[*24]** considerations may all impact those decisions.
>
> Those hundreds or thousands of pages almost always come to the same conclusion: the staffing decision at a single hospital was not a violation of *section 1* of the Sherman Act.

BCB Anesthesia, 36 F.3d at 667 (citations omitted).

II. Remaining State Law Claims

Defendants contend that if the court grants their motion to dismiss Dr. Belnap's antitrust claim, the court must also dismiss Dr. Belnap's remaining state law claims for lack of subject-matter jurisdiction. "There are two statutory bases for federal subject-matter jurisdiction: diversity jurisdiction under *28 U.S.C. § 1332* and federal-question jurisdiction under *28 U.S.C. § 1331*." *Nicodemus v. Union Pac. Corp., 318 F.3d 1231, 1235 (10th Cir. 2003)*. "Federal-question jurisdiction exists for all claims 'arising under the Constitution, laws, or treaties of the United States.'" *Id.* (quoting *28 U.S.C. § 1331*). If a federal court has original jurisdiction in a case also involving claims arising under state law, it "shall have supplemental jurisdiction over [the state law] claims that are so related" to the claims within the court's original jurisdiction such "that they form part of the same case or controversy." *28 U.S.C. § 1367(a)*. In a case, however, "[w]hen all federal claims have been dismissed, the court may, and usually should, decline to exercise jurisdiction **[*25]** over any remaining state claims." *Smith v. City of Enid By & Through Enid City Comm'n, 149 F.3d 1151, 1156 (10th Cir. 1998)*; *see* *28 U.S.C. § 1367(c)* ("The district courts may decline to

[6] Dr. Belnap makes much out of the roles that Dr. Howard and Dr. Mintz played in him losing his privileges at Salt Lake Regional. Whatever roles Dr. Howard and Dr. Mintz played in Salt Lake Regional's credentialing process, however, has no bearing on JVMC's credentialing process.

[7] Dr. Belnap also alleges that Defendants conspired with "John Does 1-20." The allegations in the Amended Complaint, however, are too insufficient and vague as to those unnamed defendants to allow Dr. Belnap's antitrust claim to proceed.

exercise supplemental jurisdiction over a claim . . . if . . . the district court has dismissed all claims over which it has original jurisdiction.").

In this case, the court has federal-question jurisdiction over Dr. Belnap's antitrust claim and supplemental jurisdiction over Dr. Belnap's state law claims. Yet, because the court has decided to grant Defendants' motion and dismiss Dr. Belnap's antitrust claim, the only remaining claims in this case are state law claims. Therefore, in the absence of any federal causes of action, the court will refrain from exercising supplemental jurisdiction over Dr. Belnap's remaining state law claims and dismiss them for lack of subject-matter jurisdiction.

CONCLUSION

Based on the foregoing reasoning, Defendants' Motion to Dismiss is hereby GRANTED. Accordingly, Dr. Belnap's antitrust claim is dismissed with prejudice for failure to state a claim, and his remaining state law claims are dismissed without prejudice for lack of subject-matter jurisdiction.

Dated this 10th day of February, 2020.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Sanctions

HN1[] **Standards of Review, Abuse of Discretion**

The party challenging a district court's choice of sanction has the difficult burden of convincing an appellate court that the district court abused its discretion-a burden which is met only when it is clear that no reasonable person would agree with the district court's assessment of what sanctions are appropriate.

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN2[] **Appellate Review, Standards of Review**

The appellate court reviews the grant of summary judgment de novo to determine whether there are genuine issues of material fact and whether the district court erred in its application of the law. The appellate court views the evidence in the light most favorable to the party against whom summary judgment was granted.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN3[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is inappropriate when reasonable persons might draw different conclusions from the evidence presented.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Promissory Estoppel

HN4[] **Consideration, Promissory Estoppel**

Promissory estoppel is an equitable doctrine which requires proof of the following three elements: (1) a clear and definite promise, (2) the promisor intended to induce reliance and the promisee in fact relied to his or her detriment, and (3) the promise must be enforced to prevent injustice.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN5[] **Burdens of Proof, Nonmovant Persuasion & Proof**

A party must present specific admissible facts showing that there was a genuine issue for trial to avoid summary judgment.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN6[] **Deceptive & Unfair Trade Practices, State Regulation**

Minn. Stat. § 325D.53, subd. 1(3), with certain exceptions, makes a contract, combination, or conspiracy between two or more persons refusing to deal with another person unlawful.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN7[] **Sherman Act, Claims**

Minnesota's antitrust laws are generally interpreted consistently with federal courts' construction of federal antitrust laws. While there is no direct federal analogue of *Minn. Stat. § 325D.53, subd. 1(3)*, the U.S. Supreme Court has analyzed federal refusal-to-deal claims under *Sections 1* and *2* of the Sherman Act, *15 U.S.C.S. §§ 1*, *2 (2012)*.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Sherman Act > Claims

HN8[] **Robinson-Patman Act, Claims**

A claim for commercial bribery is potentially actionable under the Robinson-Patman Act, *15 U.S.C.S. § 13(c) (2012)*, not *Sections 1* and *2* of the Sherman Act.

Governments > Courts

HN9[] **Governments, Courts**

The appellate court, as an error correcting court, is without authority to change the law.

Antitrust & Trade Law > Sherman Act > Claims

HN10[] **Sherman Act, Claims**

Section 2(c) of the Sherman Act was enacted primarily to combat the practice of dummy brokerages, but the sine qua non of a *Section 2(c)* violation is an improper payment, i.e., a payment of a commission, brokerage, or discount other than for services actually rendered.

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN11[] **Robinson-Patman Act, Claims**

The Robinson-Patman Act does not provide a private cause of action for treble damages; instead, a claim must be pursued via Section 4 of the Clayton Act, which authorizes private suits by any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws, *15 U.S.C.S. § 15(a)*. A private litigant seeking treble damages for such a violation under Section 4 of the Clayton Act must nevertheless allege an antitrust injury.

Antitrust & Trade Law > Clayton Act > Claims

HN12[] **Clayton Act, Claims**

To establish antitrust injury, a private litigant must prove injury in its business or property by reason of the violation and that the violation was at least a material cause of the plaintiff's injury. In other words, a plaintiff must show (1) an injury-in-fact; (2) that has been caused by the violation; and (3) that is the type of injury contemplated by the statute. A plaintiff must not only state a claim for commercial bribery, but must also demonstrate an antitrust injury in order to invoke the jurisdictional provision of Section 4 of the Clayton Act.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN13[] **Clayton Act, Claims**

A claim for commercial bribery is potentially actionable under the Robinson-Patman Act (i.e. *Section 2(c)* of the Clayton Act), but a claim for commercial bribery, standing alone, does not state a claim under the Sherman Act.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN14[] **Clayton Act, Claims**

If a claim for commercial bribery is actionable under federal ***antitrust law***, it is under *Section 2(c)* of the Robinson-Patman Act. In order to maintain a private cause of action under the Robinson-Patman Act, a litigant must establish an antitrust injury in accordance with Section 4 of the Clayton Act.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Sherman Act > Claims

HN15[] **Clayton Act, Claims**

An allegation of a per se violation of *Section 1* of the Sherman Act is distinguished from an allegation of an antitrust injury. The per se rule is a method of determining whether *Section 1* of the Sherman Act has been violated, but it does not indicate whether a private plaintiff has suffered antitrust injury and thus may recover damages under Section 4 of the Clayton Act.

Antitrust & Trade Law > Clayton Act > Claims

HN16[] **Clayton Act, Claims**

The allegation of a per se violation is insufficient to convey a private right of action under the Clayton Act. Instead, the plaintiff must also establish an antitrust injury.

Antitrust & Trade Law > Sherman Act > Claims

HN17[] **Sherman Act, Claims**

An allegation of commercial bribery does not state a claim under the Sherman Act.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Sherman Act > Claims

HN18[] **Clayton Act, Claims**

A claim of commercial bribery neither provides the antitrust injury necessary to convey a private right of action under Section 4 of the Clayton Act, nor is commercial bribery actionable under *Sections 1* and *2* of the Sherman Act.

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN19[] **Robinson-Patman Act, Claims**

If a federal antitrust claim based on commercial bribery lies anywhere, it is pursuant to *Section 2(c)* of the Robinson-Patman Act, not in a state-law claim for refusal to deal.

Syllabus

An allegation of commercial bribery does not relieve a litigant of the need to show targeting and market foreclosure in order to state an antitrust refusal-to-deal claim under *Minn. Stat. § 325D.53, subd. 1(3)* (2018).

Opinion

[*241] FLOREY, Judge

Appellants TMT Management Group, LLC, et. al. (TMT) assert that the district court erred by: (1) imposing a sanction against TMT that precluded the introduction of evidence relating to alleged oral statements made by respondents U.S. Bank National Association, et. al. (U.S. Bank); (2) determining that TMT could not prove a clear and definite promise to support its promissory-estoppel claim; (3) granting U.S. Bank summary judgment dismissing **[**2]** TMT's failure-to-deal claim; and (4) dismissing TMT's derivative claims for lack of underlying tortious conduct. We affirm.

FACTS

This action involves a dispute between TMT, a debt-purchasing company, and U.S. Bank. TMT asserts that U.S. Bank conspired with another debt-purchasing **[*242]** company, United Credit Recovery, LLC (UCR), to prevent TMT from purchasing portfolios of overdrawn consumer checking accounts, which are referred to as demand deposit accounts (DDAs).

On March 16, 2011, the principals of TMT, Mark Bugni and respondent Thomas Leiferman, met with employees of U.S. Bank for the first time to discuss TMT's desire to purchase DDA portfolios from U.S. Bank. U.S. Bank expressly rejected TMT's proposal for a five-year forward-flow agreement at that time.[1]

On February 18, 2011, prior to meeting with TMT, U.S. Bank executed a forward-flow agreement with UCR for the sale of DDA portfolios whereby U.S. Bank agreed to sell UCR all of its 2011 DDA portfolios. U.S. Bank cancelled its forward-flow agreement with UCR on June 7, 2011, and granted UCR a right of first refusal on the next portfolio sale.

U.S. Bank sold its May 2011 DDA portfolio to UCR pursuant to the entities' forward-flow agreement. **[**3]** TMT bid on U.S. Bank's July 2011 DDA portfolio, but UCR exercised its right of first refusal to purchase it. TMT executed a purchase agreement for U.S. Bank's September 2011 portfolio. In March 2012, U.S. Bank offered its last DDA portfolio for sale, which it also sold to TMT.

On May 8, 2013, TMT's principals again met with U.S. Bank to discuss possible future purchases of DDA portfolios. TMT alleges that U.S. Bank orally agreed to sell TMT $200 million in DDA debt for three cents on the dollar. U.S. Bank denies that it made a clear and definite promise to sell a DDA portfolio to TMT at that meeting.

In June 2014, federal authorities indicted UCR's principal, Leonard Potillo, for defrauding UCR's customers by misrepresenting the value of DDA debt purchased from U.S. Bank and other financial institutions. U.S. Bank was not charged with any wrongdoing. Wilber Tate, a former U.S. Bank employee, pleaded guilty to unrelated bribery charges in Connecticut. However, there is no dispute that Tate received kickbacks from UCR and Potillo from 2007 until his resignation in January 2011 in exchange for inside information and preferential treatment regarding U.S. Bank's DDA sales.

Following the dismissal **[**4]** of TMT's civil federal claims against U.S. Bank by the federal district court in February 2016, TMT initiated the present action in state district court against U.S. Bank, UCR, and various employees and principals of those entities, under the overarching theory that U.S. Bank and UCR conspired to prevent TMT from purchasing U.S. Bank's DDA portfolios. Near the close of discovery, TMT produced an email that it asserted memorialized an oral contract entered into by U.S. Bank and TMT during the initial March 16, 2011 meeting. Following a forensic analysis, the district court determined that Leiferman fabricated the email. The district court sanctioned TMT for perpetrating a fraud upon the court, precluding TMT from introducing any evidence of alleged oral statements made by, or on behalf of, U.S. Bank defendants, among other penalties.

TMT narrowed or withdrew a number of its claims, and the district court granted U.S. Bank summary judgment on all remaining claims, based, in part, on its evidentiary sanction against TMT. TMT appeals.

[*243] ISSUES

I. Did the district court abuse its discretion by imposing an evidentiary sanction on TMT?

II. Did the district court err by granting U.S. Bank summary **[**5]** judgment on TMT's promissory-estoppel claim?

III. Are the extant state-law refusal-to-deal precedents distinguishable when the plaintiff alleges commercial bribery as the basis of the claim?

IV. Did the district court err by dismissing TMT's derivative claims for lack of underlying tortious conduct?

ANALYSIS

---

[1] A forward-flow agreement allows the buyer to purchase all of the bank's DDA portfolios for a given period at specified prices.

I. Evidentiary sanction

TMT argues that the district court abused its discretion by precluding TMT from introducing any evidence of alleged oral statements made by, or on behalf of, U.S. Bank defendants as a sanction for TMT's fabrication of evidence related to a purported oral contract. ***HN1***[] The party challenging a district court's choice of sanction "has the difficult burden of convincing an appellate court that the [district] court abused its discretion—a burden which is met only when it is clear that no reasonable person would agree [with] the [district] court's assessment of what sanctions are appropriate." *Patton v. Newmar Corp., 538 N.W.2d 116, 119 (Minn. 1995)* (quotation omitted); *accord In re Kujawa, 270 F.3d 578, 582 (8th Cir. 2001)* (stating that appellate courts review sanctions imposed pursuant to a court's inherent authority for an abuse of discretion).

TMT concedes that Leiferman fabricated evidence, but argues that the district court abused its discretion by failing to narrowly **[**6]** tailor the sanctions it imposed. In support of this proposition, TMT cites the Eighth Circuit's decision in *Kujawa*, but the language TMT relies on refers specifically to monetary sanctions. *270 F.3d at 583* ("The cornerstone of imposing a monetary sanction . . . should be the selection of an amount no greater than sufficient to deter future misconduct by the party.") Here, TMT does not challenge the imposition of monetary sanctions by the district court, only the preclusion of evidence related to alleged oral statements.

TMT also relies on the supreme court's statement that courts "should impose the least severe sanction necessary to effectuate the purpose of deterrence." *Uselman v. Uselman, 464 N.W.2d 130, 145 (Minn. 1990)* (citations omitted). However, in *Uselman*, the supreme court specifically provided for the exclusion of evidence as an available sanction, which it ranked as the sixth most severe sanction out of twelve potential penalties, and stated that the district court "may also consider the presence or absence of bad faith in determining an appropriate sanction." *Id.*

The supreme court also noted in *Seagate Tech., LLC v. W. Digital Corp.* that while preclusion of evidence is a severe sanction, it has been applied in other jurisdictions as a penalty **[**7]** for fabricating evidence. *854 N.W.2d 750, 763-64 (Minn. 2014)*. Here, the record reflects that the district court seriously considered U.S. Bank's request that it dismiss all of TMT's claims as a sanction for TMT's fraud. While the district court noted that significant sanctions were warranted, it decided to impose the less-severe penalty of precluding TMT from introducing evidence of alleged oral statements made by, or on behalf of, U.S. Bank, as the most effective means of deterring TMT from any additional attempts to fabricate evidence of alleged oral statements. We conclude that the district court did not abuse its discretion.

[*244] II. Promissory estoppel

TMT argues that the district court erred by granting U.S. Bank summary judgment on TMT's promissory-estoppel claim. ***HN2***[] "We review the grant of summary judgment de novo to determine whether there are genuine issues of material fact and whether the district court erred in its application of the law." *Montemayor v. Sebright Prods., Inc., 898 N.W.2d 623, 628 (Minn. 2017)* (quotation omitted). "We view the evidence in the light most favorable to the party against whom summary judgment was granted." *STAR Ctrs., Inc. v. Faegre & Benson, L.L.P., 644 N.W.2d 72, 76-77 (Minn. 2002)*. ***HN3***[] Summary judgment "is inappropriate when reasonable persons might draw different conclusions from the evidence presented." *Montemayor, 898 N.W.2d at 628*.

TMT seeks to estop U.S. **[**8]** Bank from rescinding an alleged oral promise to sell TMT a $200 million DDA portfolio for three cents on the dollar. ***HN4***[] Promissory estoppel is an equitable doctrine which requires proof of the following three elements: "(1) a clear and definite promise, . . . (2) the promisor intended to induce reliance and the promisee in fact relied to his or her detriment, and (3) the promise must be enforced to prevent injustice." *Martens v. Minn. Min. & Mfg. Co., 616 N.W.2d 732, 746 (Minn. 2000)*. The district court granted U.S. Bank summary judgment on the bases that TMT failed to establish a dispute of material fact regarding the existence of a clear and definite promise, and also as a result of the sanction precluding TMT from introducing evidence of U.S. Bank's alleged oral statements.

TMT alleged that a U.S. Bank vice chairman orally promised to sell TMT a DDA portfolio during the May 8, 2013 meeting. TMT asserts that the deposition testimony of its own principals, along with that of a local U.S. Bank employee, created a dispute of material fact regarding whether the U.S. Bank vice chairman made the alleged oral promise.

As an initial matter, the U.S. Bank employee did not testify to the existence of a clear and definite promise. The U.S. Bank employee testified **[**9]** as follows:

> Q: Can you tell me whether you think that a final, finished deal had been reached for U.S. Bank to sell TMT DDA by the end of the lunch meeting?
> A: A final deal, no.
> . . . .
> Q: [D]o you remember [U.S. Bank employees] saying, "Yeah, that price sounds good to us"?
> A: I don't recall that, that they verbally agreed to it. I can't recall 100 percent.
> Q: Do you remember them shaking hands or hugging or giving high fives during the meeting?
> A: I do remember at the end of the meeting . . . they were shaking and hugging making comments that . . . [they were] looking for a way to make a deal happen.

Even when viewed in the light most favorable to TMT, the bank employee's testimony established the existence of a negotiation, not a clear and definite promise upon which TMT could rely.

Furthermore, TMT was precluded from introducing any evidence of oral statements allegedly made on behalf of U.S. Bank. TMT identified no other evidence in the record that could potentially create a dispute of material fact regarding the existence of a clear and definite promise. ***HN5***[] Accordingly, the district court properly granted summary judgment to U.S. Bank on the promissory-estoppel claim. *See* **[*245]** *Leamington Co. v. Nonprofits' Ins., 661 N.W.2d 674, 679 (Minn. App. 2003)* ("A party must **[**10]** present specific admissible facts showing that there was a genuine issue for trial to avoid summary judgment." (quotation omitted)).

III. Refusal to deal

TMT argues that the district court erred by granting U.S. Bank summary judgment on TMT's antitrust refusal-to-deal claim. TMT concedes that it cannot prevail under controlling Minnesota precedent, but asserts that those holdings are distinguishable when the purportedly collusive agreement is the result of commercial bribery.

TMT initially brought a number of antitrust claims, first in federal district court under federal ***antitrust law***, and then following the dismissal of those claims, in state district court under Minnesota ***antitrust law***—all centered around its allegation that a bribery scheme between UCR and Tate operated to artificially control the market for U.S. Bank's DDA portfolio sales. ***HN6***[] However, TMT eventually limited its antitrust allegations to a single claim of refusal to deal under *Minn. Stat. § 325D.53, subd. 1(3)*, which, with certain exceptions, makes "a contract, combination, or conspiracy between two or more persons refusing to deal with another person" unlawful.

A. Refusals to deal under Minnesota *antitrust law*

The parties have identified two cases that **[**11]** interpret the Minnesota refusal-to-deal statute. In *Minn.-Iowa Telev. Co. v. Watonwan T.V. Impr. Ass'n*, the supreme court analyzed a contract between a local ABC affiliate, KAAL, and a broadcasting company, Watonwan, which prevented Watonwan from broadcasting any signal that duplicated KAAL's network programming. *294 N.W.2d 297, 301 (Minn. 1980)*. When Watonwan began carrying the signal of another ABC affiliate, KSTP, KAAL sued to enforce the non-duplication provision, and Watonwan asserted that the provision constituted an invalid refusal to deal. *Id. at 302*. The supreme court held that the non-duplication provision did not constitute a refusal to deal on two principal bases. *Id. at 307*. First, the contract did not target

KTSP, but instead applied to any station carrying ABC network programming. *Id.* Second, because KTSP could still broadcast its signal using a carrier other than Watonwan, it was not foreclosed from the relevant market. *Id.*

In *Hough Transit, Ltd. v. Nat'l Famers Org.*, this court analyzed an exclusive milk-hauling agreement between a dairy cooperative and a former Hough Transit employee, where Hough Transit asserted that the agreement constituted a refusal to deal. *472 N.W.2d 358, 359 (Minn. App. 1991)*. Relying on the analysis set forth in *Watonwan*, this **[**12]** court held that the agreement did not constitute a refusal to deal under the statute on the same two bases. *Id. at 361*. First, because the exclusive arrangement between the co-op and the former employee prevented competition from all other haulers, it did not target Hough Transit for exclusion. *Id.* Second, because Hough Transit was not prevented from hauling for other dairy farmers, it was not foreclosed from the relevant market. *Id.*

Based on *Watonwan* and *Hough*, the district court granted U.S. Bank summary judgment on TMT's refusal-to-deal claim because the undisputed evidence established that the allegedly collusive arrangement between U.S. Bank and UCR applied to all entities seeking to purchase DDA portfolios from U.S. Bank, not just TMT, and TMT could still purchase DDA portfolios from entities other than U.S. Bank.

[*246] TMT asks this court to look to federal ***antitrust law*** in order to distinguish *Watonwan* and *Hough* when a refusal-to-deal claim is premised on commercial bribery. ***HN7***[] "Minnesota's antitrust laws are generally interpreted consistently with federal courts' construction of federal antitrust laws." *Minn. Twins P'ship v. State ex rel. Hatch, 592 N.W.2d 847, 851 (Minn. 1999)*. While there is no direct federal analogue of *Minn. Stat. § 325D.53, subd. 1(3)*, the Supreme Court has analyzed federal refusal-to-deal **[**13]** claims under *sections 1* and *2* of the *Sherman Act*, *15 U.S.C. §§ 1*, *2 (2012)*. *See* *Times-Picayune Publ'g Co. v. United States, 345 U.S., 594, 624-26, 73 S. Ct. 872, 889-90, 97 L. Ed. 1277 (1953)* (analyzing an asserted refusal-to-deal claim under *15 U.S.C. § 1*); *see also* *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407-08, 124 S. Ct. 872, 878-79, 157 L. Ed. 2d 823 (2004)* (analyzing an asserted refusal-to-deal claim under *15 U.S.C. § 2*).

TMT's argument overlooks two important aspects of federal ***antitrust law***. ***HN8***[] As fully set forth below, under the federal precedents identified by the parties, a claim for commercial bribery is potentially actionable under the Robinson-Patman Act, *15 U.S.C. § 13(c) (2012)*, not *sections 1* and *2* of the Sherman Act. Therefore, commercial bribery is an entirely distinct claim from refusal to deal.

Furthermore, none of the federal cases identified by the parties have held that commercial bribery constitutes the antitrust injury necessary to establish standing under *section 4* of the *Clayton Act*, *15 U.S.C. § 15(a) (2012)*, the section under which a litigant must bring a private action for violation of the *Robinson-Patman Act*. Therefore, there is no basis to distinguish the precedential approach to refusal-to-deal claims under state law solely because a plaintiff's claim is premised upon an allegation of commercial bribery. *See* *Lake George Park, L.L.C., v. IBM Mid-Am. Emps. Fed. Credit Union, 576 N.W.2d 463, 466 (Minn. App. 1998)* ***HN9***[] ("This court, as an error correcting court, is without authority to change the law."), *review denied* (Minn. June 17, 1998).

B. Commercial bribery [14] under federal *antitrust law***

Commercial bribery is already potentially actionable under federal ***antitrust law***. Under *section 2(c)* of the Robinson-Patman Act:

> It shall be unlawful for any person engaged in commerce, in the course of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, except for services rendered in connection with the sale or purchase of goods, wares, or merchandise, either to the other party to such transaction or to an agent, representative, or other intermediary therein where such intermediary is acting in fact for or in behalf, or is subject to the direct or indirect control, of any party to such transaction other than the person by whom such compensation is so granted or paid.

15 U.S.C. § 13(c). "Precision of expression is not an outstanding characteristic of the Robinson-Patman Act . . . ." Automatic Canteen Co. of Am. v. FTC, 346 U.S. 61, 65, 73 S. Ct. 1017, 1020, 97 L. Ed. 1454, 49 F.T.C. 1763 (1953); *see also* Blue Tree Hotels Inv. (Canada), Ltd. v. Starwood Hotels & Resorts Worldwide, Inc., 369 F.3d 212, 218 (2nd Cir. 2004) (providing an overview of the interaction of the various clauses of the act).

HN10[] Section 2(c) of the Robinson-Patman Act was enacted primarily to combat the practice of dummy brokerages, Blue **[*247]** Tree Hotels, 369 F.3d at 221, but "[t]he sine qua non of a § 2(c) violation . . . is an improper payment, i.e., a payment of a commission, brokerage, **[**15]** or discount other than for services actually rendered." Blue Tree Hotels, 369 F.3d at 223. In *Blue Tree Hotels*, the Second Circuit noted that other federal circuits had held that section 2(c) proscribes commercial bribery, but did not actually decide if the section applied because it held that the appellant failed to establish that the purportedly illicit payments constituted commercial bribery. Id. at 221.

HN11[] Even though the Second Circuit did not address the applicability of section 2(c) to a claim for commercial bribery, it noted that the Robinson-Patman Act does not provide a private cause of action for treble damages; instead, a claim must be pursued via section 4 of the Clayton Act, which authorizes private suits by "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws," 15 U.S.C. § 15(a). Blue Tree Hotels, 369 F.3d at 218. "[A] private litigant seeking treble damages for such a violation under § 4 of the Clayton Act must nevertheless allege an antitrust injury." Id. at 220.

HN12[] "To establish antitrust injury, a private litigant must prove injury in its business or property by reason of the violation and that the violation was at least a material cause of the plaintiff's injury. In other words, a plaintiff must show (1) an injury-in-fact; (2) that has been caused **[**16]** by the violation; and (3) that is the type of injury contemplated by the statute." Blue Tree Hotels, 369 F.3d at 220 (quotations and citation omitted). Therefore, under the Second Circuit's approach, a plaintiff must not only state a claim for commercial bribery, but must also demonstrate an antitrust injury in order to invoke the jurisdictional provision of section 4 of the Clayton Act.

Unlike the Second Circuit's approach, the federal district court of Idaho awarded damages for commercial bribery under the Robinson-Patman Act, but dismissed claims under sections 1 and 2 of the Sherman Act because of the lack of an antitrust violation. Sterling Nelson & Sons, Inc. v. Rangen, Inc., 235 F. Supp. 393 (D. Idaho 1964), *aff'd on other grounds*, 351 F.2d 851 (9th Cir. 1965).[2] This approach appears to be called into question by the more recent decision of the Second Circuit in *Blue Tree Hotels*.

In *Sterling Nelson*, the federal district court of Idaho found that Rangen violated section 2(c) of the Robinson-Patman Act by bribing a state official to influence the state to purchase all of its fish food from Rangen, to the detriment of Sterling Nelson. Id. at 398-99. After reciting the general purpose of the Sherman Act set forth by the Supreme Court in Apex Hosiery Co. v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L. Ed. 1311 (1940), the district court characterized the scheme as "a simple case of buying influence, sometimes called commercial **[**17]** bribery, which is cognizable under the anti-trust laws only because of the specific language of 15 U.S.C. § 13(c) . . . . The case falls short of proving actionable wrongs under the Sherman Act." Sterling Nelson, 235 F. Supp. at 400.

The federal district court of Idaho's characterization is relevant because TMT asks this court to alter its analysis of a specific type of antitrust claim—refusal to deal in accordance with Minn. Stat. § 325D.53, subd. 1(3)—because of the presence of an allegation of commercial bribery. Sterling Nelson specifically held that **[*248]** no violation of the Sherman Act occurred, which is the closest federal analogue to Minn. Stat. § 325D.53, subd. 1(3).

The Ninth Circuit relied on this language from *Sterling Nelson* when affirming in part the dismissal of claims under sections 1 and 2 of the Sherman Act premised on commercial bribery. Calnetics Corp. v. Volkswagen of Am., Inc., 532 F.2d 674, 687 (9th Cir. 1976). There, the Ninth Circuit stated that "VW's and Subsidiary's claim of commercial

---

[2] The Ninth Circuit's opinion in *Sterling Nelson* was overruled on other grounds by Rotec Indus. v. Mitsubishi Corp., 348 F.3d 1116, 1122 (9th Cir. 2003).

bribery, standing alone, does not constitute a violation of the Sherman Act." *Id.* The Ninth Circuit went on to clarify the impact of *Sterling Nelson*, stating:

> VW's and Subsidiary reliance on the Ninth Circuit opinion in *Sterling Nelson* for the proposition that antitrust claims may be based on commercial bribery is misplaced. This court decided merely that, according to congressional intent, **[**18]** a claim under [§] 2(c) of the Clayton Act, could be based on commercial bribery. The district court holding in *Sterling Nelson* that Sherman Act claims may not be predicated on commercial bribery was never presented to the Ninth Circuit for review . . . .

Id.***HN13***[] Therefore, in the Ninth Circuit, a claim for commercial bribery is potentially actionable under the Robinson-Patman Act (i.e. *section 2(c)* of the Clayton Act), but a claim for commercial bribery, standing alone, does not state a claim under the Sherman Act. TMT has not identified any analogous federal precedent where a refusal-to-deal claim was found to be actionable under the Sherman Act due to an accompanying allegation of commercial bribery. Thus, there is no basis to distinguish *Watonwan* and *Hough* in light of federal refusal-to-deal precedent.

C. Antitrust injury

HN14[] As discussed above, if a claim for commercial bribery is actionable under federal ***antitrust law***, it is under *section 2(c)* of the Robinson-Patman Act. Also discussed above, in order to maintain a private cause of action under the Robinson-Patman Act, a litigant must establish an antitrust injury in accordance with *section 4 of the Clayton Act*. TMT alleges that it suffered an antitrust injury as a result of UCR's commercial bribery of **[**19]** Tate, which it then attempts to use as the basis of its refusal-to-deal claim, despite the fact that these are distinct aspects of ***antitrust law***. TMT asserts that due to the illegal commercial bribery scheme,[3] it was prevented from competing for DDA portfolios offered for sale by U.S. Bank. Even assuming that TMT has sufficiently alleged damages resulting from commercial bribery, the federal caselaw does not support TMT's argument that it has alleged the antitrust injury necessary to bring a private cause of action for violation of the Robinson-Patman Act via *section 4* of the Clayton Act.

HN15[] The United States District Court for the southern district of New York discussed under what aspects of the antitrust laws a claim for commercial bribery may arise in *World Wrestling Entm't, Inc. v. Jakks Pac., Inc., 425 F. Supp. 2d 484, 517-23 (S.D.N.Y. 2006)*, *aff'd*, *328 F. App'x 695 (2d Cir. 2009)*. Notably, the court distinguished an allegation of a per se violation of *section 1* of the Sherman Act from an allegation of an antitrust injury. "The per se rule is a method of determining whether *§ 1* of the Sherman Act has been violated, but it does not indicate whether a private plaintiff has suffered antitrust injury and thus may recover damages under *§ 4* of the Clayton Act." *Id. at 519* (*quoting Atl. Richfield Co. v. USA Petrol. Co., 495 U.S. 328, 341-42,* ***[*249]*** *110 S. Ct. 1884, 1893, 109 L. Ed. 2d 333 (1990))*.

TMT asserts that because a refusal to deal is a per se antitrust **[**20]** violation, the allegation of that violation alone, especially an allegation premised upon a claim of commercial bribery, is sufficient to excuse it from meeting the elements of a state-law claim for refusal to deal, namely, targeting and market foreclosure. ***HN16***[] However, as the Supreme Court made clear in *Atl. Richfield*, the allegation of a per se violation is insufficient to convey a private right of action under the Clayton Act. *Atl. Richfield, 495 U.S. at 341-42, 110 S. Ct. at 1893*. Instead, the plaintiff must also establish an antitrust injury.[4]

---

[3] *Minn. Stat. § 609.86* makes commercial bribery illegal under state law.

[4] Again, it is worth noting that TMT has not even alleged the existence of a per se refusal-to-deal antitrust violation. ***HN17***[] As discussed above, the Ninth Circuit held that an allegation of commercial bribery does not state a claim under the Sherman Act. *Calnetics, 532 F.2d at 687*. The United States District Court for the southern district of New York came to a similar conclusion in *World Wrestling Entm't, 425 F. Supp. 2d at 522*.

In *World Wrestling Entm't*, the plaintiff (WWE) alleged that one of its employees conspired with its licensing agent and an action-toy seller, among others, to ensure that the toy seller obtained valuable licenses from WWE. *Id. at 488-89, 515*. The district court characterized this arrangement as "an extensive and, if true, astounding commercial bribery scheme." *Id. at 520*. However, the district court held that the bribery scheme did not state a claim for an antitrust injury, because even if the license-bidding process was rigged as a result of the bribes paid to the employee, WWE was not compelled to accept the artificially low bid. *Id. at 522*. "Indeed, the allegations . . . are even more problematic for [WWE] . . . because the Amended **[**21]** Complaint identifies competitors that were active in the bidding process. . . ." *Id. at 521*. The same is true here, where TMT alleges that it was harmed as a result of the bribes paid by UCR to Tate, which allowed UCR access to inside information. There is no allegation that U.S. Bank was forced to accept UCR's bid instead of TMT's or the bids of other competitors.[5] Therefore, TMT has not alleged the antitrust injury necessary to bring a commercial-bribery claim via *section 4* of the Clayton Act for violation of the Robinson-Patman Act.

In the civil federal litigation initiated by TMT that preceded the present state-court action, the federal district court characterized the commercial-bribery scheme as follows:

> Potillo's [a principal of UCR] plea stated that Tate . . . would provide information to Potillo concerning the highest bids for the DDA Portfolios and the lowest minimum price U.S. Bank would accept. Based on that information, Potillo would submit bids that were slightly higher than the next highest bid and also above the minimum bids deemed acceptable to U.S. Bank. Potillo paid Tate for providing this information.

*TMT Mgmt. Grp., LLC v. U.S. Bank Nat'l Assoc., No. 14-4692, 2016 U.S. Dist. LEXIS 23790, 2016 WL 730254 at *27 (D. Minn. Jan. 4, 2016)*. Nothing in this arrangement relates to an agreement not to deal with TMT. Nothing **[**22]** in the bribery scheme prevented U.S. Bank from accepting a higher bid from TMT.

Here, the alleged antitrust violation involves U.S. Bank's refusal to deal, not UCR's conduct constituting commercial bribery. While TMT points to federal caselaw relating to claims for commercial bribery, nothing in the cases discussed above **[*250]** establishes a basis for excusing a plaintiff asserting a refusal-to-deal claim from establishing that it was singled out for exclusion and was entirely foreclosed from the relevant market. ***HN18***[] Furthermore, as the above cases show, a claim of commercial bribery neither provides the antitrust injury necessary to convey a private right of action under *section 4* of the Clayton Act, nor is commercial bribery actionable under *sections 1* and *2* of the Sherman Act.

HN19[] While TMT is correct that the presence of an allegation of commercial bribery makes this case factually distinguishable from *Watonwan* and *Hough*, TMT does not present any authority that stands for the proposition that the normal analytic framework applied to refusal-to-deal claims does not apply when a plaintiff asserts that the refusal to deal is the result of commercial bribery. If a federal antitrust claim based on commercial bribery lies **[**23]** anywhere, it is pursuant to *section 2(c)* of the Robinson-Patman Act,[6] not in a state-law claim for refusal to deal. Therefore, we decline to distinguish *Watonwan* and *Hough* in the manner urged by TMT when the principal distinguishing fact is an accompanying allegation of commercial bribery.

IV. Derivative claims

Finally, TMT argues that if this court remands either the promissory-estoppel or refusal-to-deal claims, TMT's derivative claims for respondeat superior, civil conspiracy, and punitive damages should be reinstated, as TMT

---

[5] During oral argument, counsel stated that there were four or five bidders for the June 2011 DDA portfolio.

[6] We note that the federal district courts possess exclusive jurisdiction over claims arising under *section 4* of the Clayton Act. *General Talking Pictures Corp. v. De Marce, 203 Minn. 28, 279 N.W. 750, 753 (Minn. 1938)* ("[T]he above-quoted provision of the Clayton Act, supplementing a similar one in the Sherman Act (*section 7*, *15 U.S.C.A. §15* note), has been widely construed by both state and federal courts to vest exclusive jurisdiction of issues arising under the anti-trust laws in the federal courts alone." (*citing Blumenstock Bros. Advert. Agency v. Curtis Publ'g Co., 252 U.S. 436, 40 S. Ct. 385, 64 L. Ed. 649 (1920)*)).

would once again have a tort claim to support them. *See* *DeRosa v. McKenzie, 936 N.W.2d 342, 347 n.5 (Minn. 2019)*. Because we affirm the dismissal of the tort claims, the derivative liability-based claims necessarily fail.

DECISION

The district court did not abuse its discretion by precluding TMT from introducing oral statements allegedly made on behalf of U.S. Bank into evidence as a sanction for TMT's fabrication of evidence relating to an alleged oral statement. The district court properly granted summary judgment to U.S. Bank on TMT's promissory-estoppel claim because TMT did not possess any admissible evidence of a clear and definite promise. The district court also appropriately granted U.S. Bank summary judgment on **[**24]** TMT's refusal-to-deal claim because TMT did not establish the existence of a dispute of material fact as to whether it was the sole target of the supposed exclusive agreement between U.S. Bank and UCR or whether it was foreclosed from the entire DDA-portfolio market. Finally, the dismissal of TMT's derivative claims was appropriate following the dismissal of the tort claims upon which they relied.

Affirmed.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN1[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

When a drug manufacturer files an application for FDA approval of a new drug (a new drug application, or NDA) or a supplemental application for approval of changes to an already-approved drug (a supplemental new drug application, or sNDA), the manufacturer must file with the application the patent number and the expiration date of any patent which claims the drug for which the applicant submitted the application or which claims a method of using such drug and with respect to which a claim of patent infringement could reasonably be asserted if a person not licensed by the owner engaged in the manufacture, use, or sale of the drug. *21 U.S.C.S. § 355(b)(1)*. The FDA reviews the submission for completeness and to see whether the patent is not facially ineligible for listing. *21 C.F.R. § 314.53(c)(2)(ii)*. Upon accepting the submission, the FDA then lists the patent in the Orange Book.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN2[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The FDA has expressly declared that it does not review patent information for its accuracy and relevance. Rather, the agency requires the manufacturer to declare that the submitted patent claims the drug substance, drug product (composition/ formulation, or one or more methods of using the drug for which it is listed. *21 C.F.R. § 314.53(c)(2)(i)(M)-(O)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN3[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The FDA does have a limited mechanism for reviewing the accuracy or relevance of patent information submitted for listing in the Orange Book. *21 C.F.R. § 314.53(f)*. Specifically, anyone may notify the Agency in writing about a potential problem. *§ 314.53(f)(1)*. In the case of patents claiming the drug substance or drug product, the NDA holder may then be required either to confirm the correctness of the patent information, or withdraw or amend the patent information. *§ 314.53(f)(1)(i)(A)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN4[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The regulation is clear that unless the NDA holder withdraws or amends its patent information in response to the patent listing dispute, the FDA will not change the patent information in the Orange Book. *21 C.F.R. § 314.53(f)(1)(i)(A)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN5[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The Orange Book listing comes into play when another manufacturer seeks FDA approval to sell a competing drug based on the safety and efficacy studies for the original, already-approved drug. *21 U.S.C.S. § 355(b)(2)*; *21 C.F.R. § 314.54(a)(1)(iii)*. In its application, the aspiring competitor must certify for each patent listed in the Orange Book for the original drug that (1) the patent has expired, (2) the competing manufacturer will wait for the patent to expire before marketing its competing product, or (3) the listed patent is invalid, unenforceable, or will not be infringed. *§ 355(b)(2)(A)(i)-(iv)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN6[] Agriculture & Food, Federal Food, Drug & Cosmetic Act

A 21 U.S.C.S. § 355(b)(2)(A)(iv) (Paragraph IV) certification has two direct effects on the resolution of any patent dispute between the original manufacturer and the putative competitor. First, the statute treats the filing of a Paragraph IV certification as an infringement of the listed patent, allowing the putative competitor to force the patentholder to acquiesce or sue without exposing the competitor to damages for actual infringement. § 355(c)(3)(C); 35 U.S.C.S. § 271(e)(2)(A). Second, if the patentholder initiates an infringement lawsuit within 45 days of receipt of a Paragraph IV certification, the mere filing of the lawsuit triggers an automatic, 30-month stay of FDA approval of the would-be competitor's application. § 355(c)(3)(C). And while that 30-month period may be shortened by resolution of the infringement action or order of the court, § 355(c)(3)(C), the status quo, the allocation of burdens, and the life-span of patent litigation can all work against any such shortening.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN7[] Agriculture & Food, Federal Food, Drug & Cosmetic Act

The plain text of 21 U.S.C.S. § 355(b)(1) calls for the listing of patents which claim the drug for which an application is submitted or which claim a method of using such drug. In its implementing regulations, the FDA makes it clear that only such patents are to be listed. 21 C.F.R. § 314.53(b)(1). The FDA also provides further guidance on what patents qualify as claiming a drug. The FDA has noted that these requirements reflect an attempt to balance two competing interests: promoting competition between brand-name or innovator drugs' and generic drugs, and encouraging research and innovation.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN8[] Standards of Review, De Novo Review

In reviewing the dismissal of a complaint, Fed. R. Civ. P. 12(b)(6), the appellate court assumes that all pleaded facts and reasonable inferences drawn from those facts are true.

Patent Law > Claims & Specifications > Claims

HN9[] Claims & Specifications, Claims

In intellectual property law, a patent claim is the portion of the patent document that defines the scope of the patentee's rights.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN10[] Scope, Monopolization Offenses

To make out a violation of § 2 of the Sherman Act, a plaintiff must demonstrate, (1) that the defendant possesses monopoly power in the relevant market, and (2) that the defendant has acquired or maintained that power by improper means.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN11[] Agriculture & Food, Federal Food, Drug & Cosmetic Act

The term "drug" as used in the FDA's regulation includes not just the drug substance itself, but also the drug product. *21 C.F.R. § 314.53(b)(1)*. FDA regulations further define a drug product as a finished dosage form, e.g., tablet, capsule, or solution, that contains a drug substance, generally, but not necessarily, in association with one or more ingredients. *21 C.F.R. § 314.3(b)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN12[] Agriculture & Food, Federal Food, Drug & Cosmetic Act

Under the plain wording of *21 U.S.C.S. § 355(b)(1)*, proper filing of a patent would require not only that it be a patent that claims a drug; it must be a patent that claims the drug (or a method of using the drug) for which the applicant submitted the supplemental new drug application.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN13[] Agriculture & Food, Federal Food, Drug & Cosmetic Act

The regulations clearly require a patent not to be submitted if it does not claim the drug for which the application was filed: For patents that claim a drug product, the applicant must submit information only on those patents that claim the drug product, as is defined in *§ 314.3*, that is described in the pending or approved new drug application. *21 C.F.R. § 314.53(b)(1)*.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN14[] Reviewability of Lower Court Decisions, Preservation for Review

Issues adverted to in a perfunctory manner, unaccompanied by some effort at developed argumentation, are deemed waived.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN15[] Agriculture & Food, Federal Food, Drug & Cosmetic Act

The general definition of "drug" set forth at *21 U.S.C.S. § 321(g)(1)* states that the term includes, among other things, both articles intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in man or other animals, and articles intended for use as a component of any article specified in the previous clause. The definitions included at *§ 321* are for the purposes of this chapter, referring presumably to Chapter 9 of Title 21, at which is codified the entire FDCA. The definition likely applies to the requirements of *21 U.S.C.S. § 355*, then, and it very clearly includes "components" of "articles" intended for use in the treatment of disease. *§ 321(g)(1)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN16[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The definition of "drug" in *21 U.S.C.S. § 321(g)(1)* demonstrates that Congress knew that some drugs had components; thus the absence of any mention of components in the provisions setting out which patents should be filed cuts against any attempt to interpret the statute and its implementing regulations as requiring or allowing listing of patents that claim only components of a proposed drug. *21 U.S.C.S. § 355(b)(1)*.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN17[] **Scope, Monopolization Offenses**

Generally in a *§ 2* of the Sherman Act case, the court would examine the effects of a monopolist's improper conduct, rather that the reasons why it engaged in such conduct.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN18[] **Per Se Rule & Rule of Reason, Sherman Act**

The Rule of Reason doctrine developed in the context of § 1 of the Sherman Act claims and is not typically applied to claims under *§ 2* of the Act. The Rule of Reason is a rule of construction which applies to § 1 of the Sherman Act. The need for such a rule arose because a literal reading of § 1 would prohibit virtually every private contract. The Rule of Reason does not directly apply as such to the offense of monopolization under *§ 2* of the Act.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN19[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

Under the Hatch-Waxman Amendments, a manufacturer is subject to Congress's command to submit any patent that claims the drug for which it seeks approval. *21 U.S.C.S. § 355(b)(1)*.

Governments > Legislation > Expiration, Repeal & Suspension

HN20[] **Legislation, Expiration, Repeal & Suspension**

Courts do not frequently find an implied repeal of ***antitrust law***, except where there is a plain repugnancy between the antitrust and regulatory provisions.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN21[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The FDA does not police the accuracy of an applicant's contention that a patent claims a drug, nor does the FDA profess to have any special expertise in construing patents.

Antitrust & Trade Law > Sherman Act > Defenses

HN22[] **Sherman Act, Defenses**

An antitrust defendant is entitled both to raise and to have the jury consider its good faith adherence to regulatory obligations as a legitimate antitrust defense.

Antitrust & Trade Law > Sherman Act > Defenses

HN23[] **Sherman Act, Defenses**

If a defendant can establish that, at the time the various anticompetitive acts alleged here were taken, it had a reasonable basis to conclude that its actions were necessitated by concrete factual imperatives recognized as legitimate by the regulatory authority, then its actions did not violate the antitrust laws.

Antitrust & Trade Law > Sherman Act > Claims

HN24[] **Sherman Act, Claims**

Antitrust causation requires only that the complained-of activity be a material or substantial cause of the injury. It is enough that the antitrust violation contributes significantly to the plaintiff's injury, even if other factors amounted in the aggregate to a more substantial cause.

Opinion by: KAYATTA

Opinion

[*3] KAYATTA, Circuit Judge. The FDA maintains a publication called Approved Drug Products with Therapeutic Equivalence Evaluations, known in the industry as "the Orange Book." The Orange Book lists patents said by their owners to claim FDA-approved drugs. The listing of a patent in the Orange Book arms the patent-owning drug manufacturer with the ability to trigger an automatic, thirty-month **[**2]** suspension of the FDA's approval of a competitive product. The principal questions posed on this appeal are whether Sanofi improperly submitted a patent for listing in the Orange Book and, if so, whether Sanofi is potentially liable under the antitrust laws to drug purchasers who were allegedly harmed by the effective extension of Sanofi's monopoly. We answer "yes" to both questions and vacate the dismissal of the plaintiffs' complaint to the extent that the district court held otherwise.

I.

A.

HN1[] When a drug manufacturer files an application for FDA approval of a new drug (a "new drug application," or NDA) or a supplemental application for approval of changes to an already-approved drug (a "supplemental new drug application," or sNDA), the manufacturer must

> file with the application the patent number and the expiration date of any patent which claims the drug for which the applicant submitted the application or which claims a method of using such drug and with respect to which a claim of patent infringement could reasonably be asserted if a person not licensed by the owner engaged in the manufacture, use, or sale of the drug.

21 U.S.C. § 355(b)(1).[1] The FDA reviews the submission for completeness and to see, in **[**3]** Sanofi's words, whether the patent "is not facially ineligible for listing." See *21 C.F.R. § 314.53(c)(2)(ii)*. Upon accepting the submission, the FDA then lists the patent in the Orange Book. **HN2**[] Pointing to its "scarce resources," the FDA has expressly declared that it does not "review patent information for its accuracy and relevance." *59 Fed. Reg. 50,338, 50,343, 50,345 [*4] (Oct. 3, 1994)*. Rather, the agency requires the manufacturer to declare that the submitted patent claims the "drug substance," "drug product (composition/formulation)," or "one or more methods of using" the drug for which it is listed. *21 C.F.R. § 314.53(c)(2)(i)(M)—(O)*. The plaintiffs characterize the FDA's review of tendered Orange Book listings as purely "ministerial," noting that the FDA has refused to create any additional processes for "review[ing] the scope of [a submitted Orange Book] patent and its application to the approved drug product" or for delisting patents in the *Orange Book. 68 Fed. Reg. 36,676, 36,683 (June 18, 2003)*.[2]

HN5[] The Orange Book listing comes into play when another manufacturer seeks FDA approval to sell a competing drug based on the safety and efficacy studies for the original, already-approved drug. See *21 U.S.C. § 355(b)(2)*; *21 C.F.R. § 314.54(a)(1)(iii)*. In its application, the aspiring competitor must certify for each patent listed in the Orange Book for the original **[**4]** drug that (1) the patent has expired, (2) the competing manufacturer will wait for the patent to expire before marketing its competing product, or (3) the listed patent is invalid, unenforceable,

---

[1] The legal obligations of drug manufacturers at issue in this case are set out by the Hatch-Waxman Amendments, or the *Drug Price Competition and Patent Term Restoration Act of 1984, Pub. L. No. 98-417, 98 Stat. 1585* (codified as amended at *21 U.S.C. § 355* and *35 U.S.C. § 271(e)*), which amended the *Federal Food, Drug, and Cosmetic Act ("FDCA"), Pub. L. No. 75-717, 52 Stat. 1040 (1938)* (codified as amended at *21 U.S.C. §§ 301-397*).

[2] **HN3**[] The FDA does have a limited mechanism for reviewing the "accuracy or relevance of patent information submitted" for listing in the Orange Book. *21 C.F.R. § 314.53(f)*. Specifically, anyone may notify the Agency in writing about a potential problem. Id. *§ 314.53(f)(1)*. In the case of patents claiming the drug substance or drug product, the NDA holder may then be required either to "confirm the correctness of the patent information," or "withdraw or amend the patent information." Id. *§ 314.53(f)(1)(i)(A)*. There is no indication that any party attempted to use this process in this case. And in any case, as noted in In re Buspirone Patent Litigation, this process would not provide convincing evidence that "the FDA engaged in substantive review of the information." *185 F. Supp. 2d 363, 371-72 (S.D.N.Y. 2002)*. **HN4**[] In fact, the regulation is clear that "[u]nless the NDA holder withdraws or amends its patent information in response to the patent listing dispute, the Agency will not change the patent information in the Orange Book." *21 C.F.R. § 314.53(f)(1)(i)(A)*.

or will not be infringed. *21 U.S.C. § 355(b)(2)(A)(i)—(iv)*. The last of the foregoing certifications is referred to as a "Paragraph IV certification."

HN6[] A Paragraph IV certification has two direct effects on the resolution of any patent dispute between the original manufacturer and the putative competitor. First, the statute treats the filing of a Paragraph IV certification as an infringement of the listed patent, allowing the putative competitor to force the patentholder to acquiesce or sue without exposing the competitor to damages for actual infringement. See *21 U.S.C. § 355(c)(3)(C)*; *35 U.S.C. § 271(e)(2)(A)*. Second, if the patentholder initiates an infringement lawsuit within forty-five days of receipt of a Paragraph IV certification, the mere filing of the lawsuit triggers an automatic, thirty-month stay of FDA approval of the would-be competitor's application. *21 U.S.C. § 355(c)(3)(C)*. And while that thirty-month period may be shortened by resolution of the infringement action or order of the court, id., the status quo, the allocation of burdens, and the life-span of patent litigation can **[**5]** all work against any such shortening.

HN7[] The plain text of the statute calls for the listing of patents "which claim[] the drug for which [an application is submitted] or which claim[] a method of using such drug." Id. *§ 355(b)(1)*. In its implementing regulations, the FDA makes it clear that "only" such patents are to be listed. *21 C.F.R. § 314.53(b)(1)*. The FDA also provides further guidance, to be discussed, infra, on what patents qualify as claiming a drug. See, e.g., id. The FDA has noted that these requirements "reflect an attempt to **[*5]** balance two competing interests: [p]romoting competition between 'brand-name' or 'innovator drugs' and 'generic' drugs, and encouraging research and innovation." *68 Fed. Reg. at 36,676*.

B.

HN8[] In reviewing the dismissal of a complaint, see *Fed. R. Civ. P. 12(b)(6)*, we assume that all pleaded facts and reasonable inferences drawn from those facts are true, *Breiding v. Eversource Energy, 939 F.3d 47, 49 (1st Cir. 2019)* (quoting *Fothergill v. United States, 566 F.3d 248, 251 (1st Cir. 2009))*. The complaint in this case, as amended, focuses on the drug insulin glargine, sold by Sanofi under the brand name "Lantus." Insulin glargine is a long-lasting and much-favored form of insulin that can be used to manage diabetes. In 2014, annual sales of Lantus products in the United States amounted to $7.87 billion.

Sanofi first obtained approval from the FDA to market Lantus **[**6]** for management of diabetes in 2000. With its original application, Sanofi submitted U.S. Patent No. 5,656,722 ("the '722 patent") for listing in the Orange Book. The '722 patent claimed the drug insulin glargine and was set to expire in August 2014, with its period of regulatory exclusivity ending in February 2015. Had Sanofi filed nothing else with the FDA, other companies would have been able to pursue requests for FDA approval to sell insulin glargine products beginning in 2015 with the end of the '722 patent's grace period of exclusivity.

In 2006, Sanofi filed an sNDA to sell insulin glargine in a disposable injector pen device called the Lantus SoloSTAR. Sanofi had previously sold Lantus only in vials or cartridges for reusable injectors. The FDA reviewer evaluating the SoloSTAR product described it this way:

> The SoloStar injection system is a device that provides a method of accurately injecting a selected dose of insulin . . . . The device is intended to be used for self-injection by patients. . . . The dose is pre-selected by rotating a dosage selector at the rear end of the device. The number of selected insulin units is displayed in the dose window on the side of the pen. The dialing mechanism allows dosage in 1 insulin unit increments. It **[**7]** provides a maximum of 80 insulin units in one dosing. . . . The dose is delivered by pressing the injection button.

Sanofi sells the SoloSTAR pen for use with several active drugs in addition to insulin.

In 2007, the FDA accepted Sanofi's sNDA for the SoloSTAR and categorized it as a change to Lantus's labeling or container. In 2013, Sanofi submitted patents associated with the SoloSTAR to the FDA for listing in the Orange Book. While the complaint references a number of those patents, plaintiffs pare their arguments on appeal to U.S.

Patent No. 8,556,864 ("the '864 patent"), named "Drive Mechanisms Suitable for Use in Drug Delivery Devices," which is set to expire in 2024.

HN9[] In intellectual property law, a "patent claim" is "the portion of the patent document that defines the scope of the patentee's rights." *Markman v. Westview Instruments, Inc., 517 U.S. 370, 372, 116 S. Ct. 1384, 134 L. Ed. 2d 577 (1996)*. The '864 patent contains ten claims, all concerning aspects of a "drive mechanism" that serves as a part of the SoloSTAR drug injector pen. The "drive mechanism" "enabl[es] the administration of medicinal products from" a pen injector's cartridge. Claim 1 sets out the attributes of the drive mechanism; Claim 2 describes a drive mechanism with slightly different attributes; Claims 3 through 7 describe different constructions of the mechanism **[**8]** in Claim 2; Claim 8 describes yet another variation on **[*6]** the drive mechanism; and Claims 9 and 10 describe alternative variations to the mechanics of Claim 8. The patent does not include a claim for an injector pen more broadly, though it does mention that the drive mechanism is intended for use in a "drug delivery device." Elsewhere the patent states that the technical field of the patent is "drive mechanisms suitable for use in drug delivery devices, in particular pen-type injectors." The patent does not mention insulin glargine or the Lantus SoloSTAR at any point. The patent's specification only briefly mentions diabetes and insulin, the latter as an example of the type of drug the device using the drive mechanism could dispense.

In 2013, competitor Eli Lilly planned to market a competing insulin glargine product, called Basaglar, in its own injector pen, the KwikPen. Confronted with the Orange Book listing of the '864 patent, Lilly submitted a Paragraph IV certification stating that its Basaglar KwikPen product would not infringe that patent. Within forty-five days, Sanofi sued Lilly for patent infringement, seeking to bar Lilly from manufacturing or selling the Basaglar KwikPen until the last **[**9]** of the patents listed in the Orange Book for Lantus and the Lantus SoloSTAR expired in 2024. That lawsuit triggered the thirty-month stay of FDA approval for Basaglar under *21 U.S.C. § 355(c)(3)(C)*. In filing the lawsuit, Sanofi thus protected its monopoly from Lilly's competition for up to thirty months more, even if the KwikPen did not actually infringe any Sanofi patent. In September 2015, the parties settled the lawsuit, and Sanofi granted Lilly a royalty-bearing license to sell Basaglar beginning over a year later in December 2016.

Lilly was not the only would-be competitor in the insulin glargine market. In 2016 and 2017, Merck and Mylan both submitted applications to market insulin glargine in injector pens, along with Paragraph IV certifications on the patents that Sanofi had listed for the Lantus SoloSTAR. After it settled with Lilly, Sanofi also sued Merck and Mylan. The Merck lawsuit settled after a trial on some of the patents at issue. Stipulation of Dismissal (redacted), Dkt. 339, Sanofi-Aventis U.S. LLC v. Merck Sharp & Dohme Corp., No. 16-cv-00812 (D. Del. Nov. 1, 2018). A bench trial was held but not decided in the Mylan lawsuit in December 2019. Minute Entry, Dkt. 528, Sanofi-Aventis U.S. **[**10]** LLC v. Mylan GmbH, No. 17-cv-09105 (D.N.J. Dec. 2, 2019).

The plaintiffs in this case are a putative class of direct insulin glargine purchasers who allege that Sanofi artificially restricted competition in the market for insulin glargine by impermissibly extending its monopoly over insulin glargine products. They allege that Sanofi improperly listed the '864 patent in the Orange Book, thereby delaying competition in the insulin glargine market and resulting in inflated prices. They also allege that Sanofi's lawsuit alleging infringement of the '864 patent was a "sham" that was initiated merely to trigger the automatic stay of FDA's approval of the KwikPen. They bring two claims under *section 2* of the *Sherman Act*, *15 U.S.C. § 2*, based on an unlawful scheme to monopolize and an attempt to monopolize the market for insulin glargine products.

The district court dismissed the plaintiffs' Sherman Act claims, reasoning that as a matter of law Sanofi's decision to list the '864 patent was reasonable and not "objectively baseless" given what the court deemed to be ambiguities in the FDA's listing requirements.[3] *In re Lantus Direct **[*7]** Purchaser Antitrust Litig., 284 F. Supp. 3d 91, 104-05 (D. Mass. 2018)*. This appeal followed.

[3] The district court also determined that the plaintiffs' allegations that Sanofi's lawsuits against Lilly, Merck, and Mylan did not constitute impermissible serial petitioning. The plaintiffs have abandoned those arguments on appeal, so we need not address them.

II.

HN10[] To make out a violation of *section 2* of the Sherman Act, a plaintiff must demonstrate, "(1) that the defendant possesses **[**11]** 'monopoly power in the relevant market,' and (2) that the defendant has acquired or maintained that power by improper means." *Town of Concord v. Bos. Edison Co., 915 F.2d 17, 21 (1st Cir. 1990)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*. Here, all parties assume -- and so do we -- that the complaint adequately alleges that Sanofi possessed monopoly power in the relevant market. Our analysis thus turns on whether the complaint plausibly alleges that the challenged method by which Sanofi allegedly maintained that power, that is to say, submitting the '864 patent for listing in the Orange Book, was an "improper means" of maintaining that power. Id.; see also *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (requiring "sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face'" (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*).

A.

We consider first whether, under the facts alleged by the plaintiffs, it was proper for Sanofi to submit the '864 patent for listing in the Orange Book. At first blush, the answer seems readily apparent: The statute and applicable regulations call for the listing of only patents that claim the pertinent drug or a method of using the drug, and the '864 patent does not even mention, much less claim, either insulin glargine or any method of using it.

HN11[] Sanofi, though, points out that the term "drug" as used in the FDA's regulation includes **[**12]** not just the drug substance itself, but also the "drug product." *21 C.F.R. § 314.53(b)(1)*. FDA regulations further define a "drug product" as "a finished dosage form, e.g., tablet, capsule, or solution, that contains a drug substance, generally, but not necessarily, in association with one or more ingredients." Id. *§ 314.3(b)*. Sanofi argues that the Lantus SoloSTAR is a "drug product" because it is a "finished dosage form," which the regulations define as "the physical manifestation containing the active and inactive ingredients that delivers a dose of the drug product." Id. This reading of the regulations finds support in FDA guidance, which has described the "appendix in the Orange Book" as "list[ing] current dosage forms for approved drug products," including "metered aerosols, capsules, metered sprays, gels, and pre-filled drug delivery systems." *68 Fed. Reg. at 36,680*. Indeed, a "Frequently Asked Questions" page on the FDA website actually lists an "insulin injector pen" as an example of a "[p]refilled drug delivery system[]."

Working backward, then, Sanofi's principal argument goes like this: the Lantus SoloSTAR is an injector pen, and as such is a "pre-filled drug delivery system[]," meaning that it qualifies as a "dosage form," which **[**13]** under the regulations is a "drug product," which in turn is a "drug." Hence, Sanofi concludes that because the FDA approved the Lantus SoloSTAR as a "pre-filled drug delivery system," any patent claiming the Lantus SoloSTAR is a "patent which claims the drug for which" the sNDA was submitted.

[*8] Even if we accept Sanofi's chain of reasoning, however, and thus assume for the sake of argument that the Lantus SoloSTAR is a drug under the statute, there is still a vital link missing: the '864 patent does not claim or even mention the Lantus SoloSTAR. Indeed, though it claims a device intended for use in an injector pen, it does not claim any injector pen, nor even a method of using a pen.

HN12[] Under the plain wording of the statute, proper filing of the '864 patent would require not only that it be a patent that claims a drug; it must be a patent that claims the drug (or a method of using the drug) "for which the applicant submitted" the sNDA. *21 U.S.C. § 355(b)(1)*. It therefore follows that because the claims of the '864 patent do not mention the drug for which the sNDA was submitted, the patent does not "claim the drug," and it was improper for Sanofi to have submitted it for listing in the Orange Book as a drug claiming either insulin glargine or **[**14]** the Lantus SoloSTAR. *HN13*[] The regulations clearly require a patent not to be submitted if it does not claim the drug for which the application was filed: "For patents that claim a drug product, the applicant must submit information only on those patents that claim the drug product, as is defined in § 314.3, that is described in the pending or approved NDA." 21 C.F.R. § 314.53(b)(1) (emphasis added).

Confronted with this gap between its reading of the law and its filing of a patent that does not claim the listed drug, Sanofi argues that the regulations also require listing in the Orange Book any patents that contain "integral components" of an approved drug product. According to this line of reasoning, because the drive mechanism is an integral part of the Lantus SoloSTAR, a patent that claims the drive mechanism claims a part of a drug product, and thus "claims the drug."

We see nothing in the statute or regulations that welcomes such a further expansion of the already stretched statutory terms, whereby an integral part of an injector pen becomes the pen itself, and in turn is a drug. One would not think, for example, that a patent claiming only a transmission system must be read as also claiming any car in which it is **[**15]** used.

The FDA has already passed on opportunities to stretch the statutory terms in this way. In 2003, the FDA addressed commentary to a proposed rule that "would not have allowed an applicant to list a patent that claimed packaging." 68 Fed. Reg. at 36,680. Some of that commentary argued that "patents claiming devices or containers that are 'integral' to the drug product . . . should be submitted and listed." Id. The FDA acknowledged those comments but did not adopt them. See id. Instead it responded by reiterating that: "[t]he key factor is whether the patent being submitted claims the finished dosage form of the approved drug product." Id. And the '864 patent does not. Rather, it claims several versions of a device that can be combined with other components to produce the finished dosage form of the approved drug product.

Sanofi also argues that, because the language of the regulations suggests that multiple patents can be filed with an application, the regulations must contemplate submission of patents claiming components of a drug product[4] -- otherwise, Sanofi reasons, manufacturers would have to claim every part of a drug in a single patent in order to file it, and the plural language in the regulations would be **[**16]** meaningless. See, e.g., 21 C.F.R. § 314.53(b)(1) **[*9]** (referring to "those patents that claim the drug product," and those "patents that claim the drug substance"). But Sanofi does not explain why multiple patents could not all directly claim a drug product. And in any case, the plaintiffs point out that some patents do claim all the components of a combination drug product, even for drug products similar to the Lantus SoloSTAR. Specifically, they point to the patent for Narcan, U.S. Patent No. 9,211,253, as well as the patent for the EpiPen, U.S. Patent No. 8,870,827. So even if in some cases only one patent can legitimately be listed as a patent claiming the drug product, that does not mean that the patent will necessarily be unable to claim all the important components of the drug. And in any event, even if we misunderstand Sanofi's rather cryptic point here,[5] the possibility that the statute does not accommodate all desired listings does not mean that we rewrite it.

At oral argument, Sanofi tried another argument. ***HN15***[] It pointed to the general definition of "drug" set forth at 21 U.S.C. § 321(g)(1), which states that the term includes, among other things, both "articles intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in man or other animals," **[**17]** and "articles intended for use as a component of any article specified" in the previous clause. 21 U.S.C. § 321(g)(1). The definitions included at 21 U.S.C. § 321 are "[f]or the purposes of this chapter," referring presumably to Chapter 9 of Title 21, at which is codified the entire FDCA. The definition likely applies to the requirements under section 355, then, and it very clearly includes "components" of "articles intended for use in the" treatment of disease. Id. § 321(g)(1). Nevertheless, it is not clear how far this textual focus on Chapter 9's general definition of "drug" gets Sanofi. ***HN16***[] That definition of "drug" in section 321(g)(1) demonstrates that Congress knew that some drugs

[4] Sanofi does not make the same argument with regard to the statute, which itself employs the term "any patent." 21 U.S.C. § 355(b)(1).

[5] And if this is the case, then it is waived for lack of development. See United States v. Zannino, 895 F.2d 1, 17 (1st Cir. 1990) (***HN14***[] "[I]ssues adverted to in a perfunctory manner, unaccompanied by some effort at developed argumentation, are deemed waived.").

had "components"; thus the absence of any mention of "components" in the provisions setting out which patents should be filed cuts against any attempt to interpret the statute and its implementing regulations as requiring or allowing listing of patents that claim only components of a proposed drug. See *21 U.S.C. § 355(b)(1)*.

More importantly, even assuming that the drive mechanism claimed by the '864 patent is itself a drug, we still find Sanofi falling short of its goal because the drive mechanism is not the "drug for which [Sanofi] submitted" the sNDA. *21 U.S.C. § 355(b)(1)*. For that reason alone the patent for the drive mechanism **[**18]** does not qualify for listing in the Orange Book as claiming the Lantus SoloSTAR.

Sanofi also seeks to find support in communications between other drug manufacturers and the FDA. Sanofi points to requests for advisory opinions submitted by Ropes & Gray in 2006, Forest Laboratories in 2011, Novo Nordisk in 2012, and AstraZeneca in 2007, all asking, in substance, "whether patents directed to drug delivery systems . . . that do not recite the approved active ingredient or formulation should be listed in the [Orange Book]." According to Sanofi, the FDA has not responded satisfactorily to any of the requests. Instead, the FDA has simply acknowledged that the Orange Book "was not designed to separately address combination product listings or to identify the specific type of drug delivery system" and that it "could benefit from enhanced listing capabilities." In response to one request **[*10]** from Forest Laboratories, the FDA also stated that it had "been unable to reach a decision . . . due to the need to address other Agency priorities" and noted the "numerous demands on the Agency's resources."

We find no warrant to read anything into the FDA's non-answer beyond a conclusion that it simply chose **[**19]** not to answer the question. To infer an answer, or even to infer that silence by the FDA indicates that the correct answer is uncertain, would be to force agencies to respond to all inquiries lest their silence be misunderstood. And even if one could infer an answer from silence, Sanofi points to no support for affording any deference to its chosen inference. Moreover, the fact that the Orange Book is not designed to separately address combination product listings hardly helps Sanofi's argument that the '864 patent was listable as claiming a component of a combination product. Nor does the fact that some manufacturers view the FDA's guidance as outdated in that regard. The statute and regulations clearly require that only patents that claim the drug for which the NDA is submitted should be listed in the Orange Book. The '864 patent, which neither claims nor even mentions insulin glargine or the Lantus SoloSTAR, does not fit the bill.

B.

Having determined that the complaint adequately alleges that Sanofi should not have submitted the '864 patent for Orange Book listing, we turn to Sanofi's alternative argument, accepted by the district court, that submitting the '864 patent for listing was reasonable, and that Sanofi cannot be **[**20]** held liable under the antitrust laws for a reasonable mistake. Plaintiffs challenge this argument on both levels: they argue that reasonableness is not a defense, and they argue that the statute was sufficiently unambiguous so as to render Sanofi's filing unreasonable as a matter of law. For the following reasons we find that neither side is quite correct, and that further proceedings beyond a *Rule 12* motion are necessary to determine whether Sanofi should be held liable under the Sherman Act for any antitrust injury caused by its improper submission of the '864 patent.

HN17[] Generally in a *section 2* case, we would examine the effects of a monopolist's improper conduct, rather that the reasons why it engaged in such conduct. See *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 232 (1st Cir. 1983)* (Breyer, J.) (observing that, though "[s]ome courts have written as if one might look to a firm's 'intent to harm' to separate 'good' from 'bad' [conduct]," this search for "improper intent" in reality "refer[s] to a set of objective economic conditions"); see also *United States v. Microsoft Corp., 253 F.3d 34, 60, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (en banc) ("[I]n considering whether the monopolist's conduct on balance harms competition and is therefore condemned as exclusionary for purposes of *§ 2*, our focus is upon the effect of that conduct, not upon the intent behind it."); **[**21]** Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application ¶ 658f (4th ed. 2019) [hereinafter Areeda & Hovenkamp] ("[I]nquiries into subjective intent should be limited in § 2 cases."). Presumably for this reason, Sanofi does not point us to any section 2 cases holding that reasonableness generally immunizes monopolists from section 2 liability.[6]

[*11] In this regulatory setting, however, there is some reason to consider the rationale for the monopolist's challenged conduct, rather than just the effects of that conduct. ***HN19***[] Under the Hatch-Waxman Amendments, Sanofi is subject to Congress's command to submit any patent that claims the drug for which it seeks approval. See *21 U.S.C. § 355(b)(1)*. And the improper failure to comply with that command could itself arguably have an anticompetitive effect by depriving potential competitors of notice and of the other procedural benefits that result from an Orange Book listing. Sanofi has pointed to one 1996 complaint seeking to charge a manufacturer with antitrust liability for not filing relevant patents in the Orange Book. The plaintiffs in that case alleged that they were damaged by the defendant's failure to list the patent because they spent money developing a potential **[**22]** generic competitor they would not have developed had they known of the original patent through an Orange Book listing. See Complaint, Mut. Pharm. Co. v. Hoechst Marion Roussel, Inc., No. CIV. A. 96-1409, 1996 WL 34406666 (E.D. Pa. Feb. 23, 1996) ("Had the '129 patent been listed in the Orange Book, [the plaintiff] would not have expended over $500,000.00 to develop its generic . . . product . . . .").[7] Sanofi therefore reasons that if liability flowed from improper submission of patents for Orange Book listing, Sanofi and others seeking FDA approval would find themselves "between the horns of an insoluble dilemma: list -- or not -- at risk of treble damage claims" either way.

This may be something of an overstatement. It would appear that a company unsure about whether it must submit a patent for listing might protect itself from liability by submitting the patent and then not suing within forty-five days of any subsequent Paragraph IV certification, thereby ensuring that the mere listing would not slow down final FDA approval of a competitor's submission.

That being said, such a strategy would potentially sacrifice a benefit that Congress gave to patent holders in the Hatch-Waxman Amendments. So, in the end, Sanofi has a fair point in arguing that the plaintiffs' version of what would essentially **[**23]** be strict liability for improper Orange Book submissions could slightly tilt the regulatory balance Congress sought in this bespoke scheme at the intersection of the FDCA and patent law. See *68 Fed. Reg. at 36,676* (seeking a "balance between the innovator companies' intellectual property rights and the desire to get generic drugs on the market in a timely fashion").

The fact that Sanofi must align its conduct with regulatory requirements does not, however, mean that Sanofi gets a free pass from antitrust scrutiny. ***HN20***[] Courts do not frequently find an implied repeal of ***antitrust law***, except where there is a "plain repugnancy between the antitrust and regulatory **[*12]** provisions." *Gordon v. N.Y. Stock Exch., Inc., 422 U.S. 659, 682, 95 S. Ct. 2598, 45 L. Ed. 2d 463 (1975)* (quoting *United States v. Phila. Nat'l Bank, 374 U.S. 321, 350-51, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963))*; see also *MCI Commc'ns Corp. v. Am. Tel. & Tel. Co., 708 F.2d 1081, 1101-02 (7th Cir. 1983)* (finding no immunity where "AT&T is not subject to conflicting requirements, nor would it be held liable for decisions which were not its own business judgment"); *Town of Norwood v. New England Power Co., 202 F.3d 408, 422 (1st Cir. 2000)* (noting "the default rule retaining antitrust liability"). There is no such repugnancy here where, far from seeking a contradictory result from the regulatory regime, the plaintiffs' antitrust claim relies upon obligations created by it.[8] Moreover, ***HN21***[] the FDA does not

---

[6] Sanofi does seem to argue that the "rule of reason" doctrine applies, but ***HN18***[] that doctrine developed in the context of *section 1* claims and is not typically applied to claims under *section 2*. See *Fraser v. Major League Soccer, L.L.C., 284 F.3d 47, 55-61 (1st Cir. 2002)* (characterizing the rule as "*section 1*'s rule of reason" and discussing whether it could be applied to evaluate claims of conspiracy between distinct members of the same franchise); *MCI Commc'ns Corp. v. Am. Tel. & Tel. Co., 708 F.2d 1081, 1139 (7th Cir. 1983)* ("The Rule of Reason is a rule of construction which applies to *section 1* of the Sherman Act. The need for such a rule arose because a literal reading of *section 1* would prohibit virtually every private contract. . . . [T]he Rule of Reason does not directly apply as such to the offense of monopolization under *section 2* of the Sherman Act." (internal citations omitted)).

[7] The parties appear to have settled the case after summary judgment briefing. See Stipulation of Dismissal, Dkt. 65, Mut. Pharm. Co. v. Hoechst Marion Roussel, Inc., No. CIV. A. 96-1409, (E.D. Pa. July 1, 1999).

police the accuracy of an applicant's contention that a patent claims a drug, nor does the FDA **[**24]** profess to have any special expertise in construing patents. See *68 Fed. Reg. at 36,683*. Sanofi acknowledges as much: "Orange Book listings are not immune from antitrust scrutiny and might subject a patent holder to liability under certain circumstances."

Nevertheless, antitrust precedent anticipates the possibility that *section 2* liability might work a bit differently in the regulatory context. As Areeda and Hovenkamp note, "even if the challenged conduct is not the proper implementation of regulatory policies, condemning conduct undertaken in a reasonable good faith effort to comply with such policies would punish regulated firms for trying to act consistent with those policies." Areeda & Hovenkamp, supra, ¶ 246a.

Several circuits have identified a defense to antitrust liability where the defendant's action was taken as part of a good faith, reasonable attempt to comply with a regulatory scheme. In MCI Communications, the Seventh Circuit held that "[i]n the particular context of an industry subject to extensive and rapidly changing regulatory demands, we believe that an antitrust defendant is entitled both to raise and to have the jury consider its good faith adherence to regulatory obligations as a legitimate antitrust **[**25]** defense." *708 F.2d at 1109-10*; see also *id. at 1138* ("An ideal instruction would very briefly explain . . . that a carrier has an obligation under the Communications Act to interconnect, but may deny interconnections if it determines that the public interest is to the contrary; and that if the carrier at the time had a reasonable basis in regulatory policy to conclude, and in good faith concluded, that denial of interconnections is required by concrete, articulable concerns for the public interest, then there is no liability under the antitrust laws."). See also *S. Pac. Commc'ns Co. v. Am. Tel. & Tel. Co., 740 F.2d 980, 1010 (D.C. Cir. 1984)* ("[W]e agree with the standard articulated by the Seventh Circuit . . . ."); see also *Phonetele, Inc. v. Am. Tel. & Tel. Co., 664 F.2d 716, 737-38 (9th Cir. 1981)* (Kennedy, J.).

Though the aforementioned cases all deal with the Communications Act of 1934, and while recognizing that the regulatory overlay may be less extensive here, we nevertheless see no principled reason why the same defense should not arise from a reasonable, good-faith attempt to comply with the regulatory demands of the Hatch-Waxman Amendments. Deterring reasonable, good-faith attempts at compliance **[*13]** "would obviously impair the achievement of regulatory goals." Areeda & Hovenkamp, supra, ¶ 246a.

The defense recognized in the regulatory context of the communications industry is not quite the defense that Sanofi seeks. **[**26]** Sanofi asks for immunity if its proffered reading of the statute was objectively reasonable. But the precedent we have cited requires that the challenged conduct be both reasonable and in good faith. See *MCI Commc'ns, 708 F.2d at 1138* (allowing the defense "if the [defendant] at the time had a reasonable basis in regulatory policy to conclude, and in good faith concluded," that its actions were required by regulation); *S. Pac. Commc'ns, 740 F.2d at 1010* (quoting the same). We adopt that two-pronged version of the defense here, to be proven by Sanofi on remand. See *MCI Commc'ns, 708 F.2d at 1109-10* ("[W]e believe that ***HN22***[] an antitrust defendant is entitled both to raise and to have the jury consider its good faith adherence to regulatory obligations as a legitimate antitrust defense."); *Phonetele, 664 F.2d at 737-38* (***HN23***[] "If a defendant can establish that, at the time the various anticompetitive acts alleged here were taken, it had a reasonable basis to conclude that its actions were necessitated by concrete factual imperatives recognized as legitimate by the regulatory authority, then its actions did not violate the antitrust laws.").[9] Certainly the dilemma faced by companies seeking to comply with the

[8] As a counter-example, see our recent opinion in *Breiding, 939 F.3d at 54-57*, in which we applied the filed-rate doctrine to claims challenging conduct that was expressly allowed in a FERC tariff. See also, e.g., *In re Celexa & Lexapro Mktg. & Sales Practices Litig., 915 F.3d 1 (1st Cir. 2019)*; *Gustavsen v. Alcon Labs., Inc., 903 F.3d 1 (1st Cir. 2018)*; *In re Celexa & Lexapro Mktg. & Sales Practices Litig., 779 F.3d 34 (1st Cir. 2015)*.

[9] One recent district court decision directly addressed the question of whether antitrust plaintiffs were required to plead facts alleging an absence of good faith in their prima facie case in order to avoid dismissal on the basis of this exception to antitrust liability. See *In re Actos End-Payor Antitrust Litig., No. 13-CV-9244, 417 F. Supp. 3d 352, 2019 U.S. Dist. LEXIS 170178, 2019 WL 4805843, at *14-15 (S.D.N.Y. Sept. 30, 2019)*. At least in part because the defendant had acknowledged at oral argument

Hatch-Waxman Amendments is no greater than the regulatory dilemmas presented by the "extensive and rapidly changing" regulation under the **[**27]** *Communications Act* in the other cases. *MCI Commc'ns, 708 F.2d at 1109*. Nor can we see any good reason to immunize improper, exclusionary conduct by a monopolist unable to show it was acting in good faith -- especially in the *section 2* context, where reasonableness alone has never been considered to be a generally available defense to antitrust liability. See supra n.5.

Plaintiffs seem to argue that the allegations in the complaint necessarily defeat the reasonableness prong of any such defense. At this early stage of the lawsuit, however, the record does not yet contain any evidence about custom and practice in the industry, or what if any legal opinions Sanofi sought and obtained before submitting the patent. Indeed, Sanofi has yet to answer the complaint. And while we are reasonably confident of our reading of the statutory and regulatory texts, we cannot ignore either the complexity of that endeavor or the fact that at least one other district court has found it difficult to arrive comfortably at a similar conclusion. See *Organon, Inc. v. Mylan Pharms., Inc., 293 F. Supp. 2d 453, 459-60 (D.N.J. 2003)* (finding no liability where the defendant listed a patent claiming an "off-label" use of the drug because there was a "reasonable basis for the submission"). But see *In re Buspirone Patent Litig., 185 F. Supp. 2d 363, 375-76 (S.D.N.Y. 2002)* (finding that the defendant's **[**28]** improper listing of a patent in the Orange Book and subsequent litigation to enforce it was "objectively baseless" under the Noerr-Pennington **[*14]** framework).[10] A statute can be unambiguous once carefully construed, yet nevertheless be reasonably susceptible to mis-readings until that unambiguous reading is explained. Occasionally, even courts that find a text unambiguous may split on the meaning of the text. See, e.g., *Kasten v. Saint-Gobain Performance Plastics Corp., 563 U.S. 1, 16, 20-21, 131 S. Ct. 1325, 179 L. Ed. 2d 379 (2011)* (majority finding that a statute supports one interpretation so unambiguously as to preclude use of the rule of lenity, with dissent finding a contrary interpretation of the statute so clear as to obviate any need to consider its purpose); *Staples v. United States, 511 U.S. 600, 604-07, 624-25, 114 S. Ct. 1793, 128 L. Ed. 2d 608 (1994)* (majority espousing one interpretation of the statute, with dissent arguing that it "unambiguous[ly]" means something different).

Conversely, the fact that the law in this area is complicated does not by itself mean that Sanofi's action was reasonable. Cf. *Chevron, U.S.A., Inc. v. Nat. Res. Def. Council, 467 U.S. 837, 842-43, 104 S. Ct. 2778, 81 L. Ed. 2d 694 (1984)* (anticipating that there are impermissible readings even of ambiguous statutes: "if the statute is silent or ambiguous with respect to the specific issue, the question for the court is whether the agency's answer is based on a permissible construction of the statute"). **[**29]** An experienced and sophisticated drug manufacturer routinely works with such complexity. And in this instance no close reader could have reasonably thought that submitting the '864 patent was so clearly proper as to obviate the need for inquiry and advice.

We therefore hold that the facts and reasonable inferences found in the complaint describe an improper submission of the '864 patent for listing in the Orange Book; that the defenses to antitrust liability as a result of such an improper submission include proving that the submission was the result of a reasonable, good-faith attempt to comply with the Hatch-Waxman scheme; and that the record does not now allow for the adjudication of that defense as a matter of law.

C.

Finally, Sanofi briefly argues that even if its submission of the '864 patent was improper and not subject to any reasonableness defense, the plaintiffs could not win on their claims because the improper Orange Book listing could not alone have caused an antitrust injury. ***HN24***[] Antitrust causation, however, requires only that the complained-of activity be a "material" or "substantial" cause of the injury. Areeda & Hovenkamp, supra, ¶ 338a ("It is . . . enough that the antitrust violation contributes significantly to the plaintiff's **[**30]** injury, even if other factors

---

that the exception was an affirmative defense to liability, the court determined that the complaint was not required to include allegations of bad faith in order to survive a motion to dismiss. Id.

[10] See *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *E. R.R. Presidents Conf. v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*. The parties agree that the Noerr-Pennington doctrine does not apply to this issue.

amounted in the aggregate to a more substantial cause."). As best we can tell, Sanofi's premise is that without the Orange Book listing of the '864 patent, the patent infringement litigation between Sanofi and its putative competitors, including its ultimate settlement with Lilly, would have proceeded and concluded exactly the same way as it did, such that the listing itself was not a substantial cause of the extension of Sanofi's monopoly. Even putting aside the sham-litigation claims, which the plaintiffs have abandoned on appeal, nothing in the operative complaint requires us **[*15]** to conclude that the automatic thirty-month freeze on FDA approval of the other companies' products had no plausible effect on the course of the underlying litigation. So we see no basis for affirming the dismissal of the complaint under *Rule 12(b)(6)* on this alternative basis.

III.

We reverse the district court's dismissal of the plaintiffs' claims as to Sanofi's alleged improper Orange Book listing of the '864 patent and remand for further proceedings in accord with this opinion.

Judges: Before Torruella, Lynch and Thompson, Circuit Judges.

Opinion

JUDGMENT

This is an appeal from the dismissal, pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, of a complaint featuring antitrust, contract, and other claims. Upon de novo review, we affirm.

Plaintiff-appellant James Dickey was certified to be a contract advisor (basically, a sports agent) to represent football players who were members of the National Football League Players Association (that is, the professional football players' labor union, hereinafter NFLPA) in contract negotiations with the National Football League **[*2]** (NFL) and its management council (NFLMC). Dickey was not able to serve as the representative of any player within a three-year time period, resulting in his certification lapsing under a "three-year rule" in the standard NFLPA agreement with contact advisors. Dickey alleges that this three-year rule is among those that the NFLPA enforces "selectively" to the benefit of more-established agents. Dickey further alleges collusion between the NFLPA and the

NFL and NFLMC to the detriment of less-established agents like himself. He also asserts that the NFLPA shifts its union status for "legal convenience."

Dickey sued the NFLPA, NFLMC and NFL in the United States District Court for the District of Massachusetts, asserting antitrust violations, contractual claims, and breach of fiduciary duty. The district court dismissed Dickey's complaint pursuant to *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim upon which relief could be granted. This appeal followed.

This court applies de novo review to *Rule 12(b)(6)* dismissals. See *Morales-Tanon v. Puerto Rico Elec. Power Auth., 524 F.3d 15, 18 (1st Cir. 2008)*. "To survive a motion to dismiss for failure to state a claim, a complaint must contain factual allegations sufficient to 'raise a right to relief above the speculative level.'" Id. (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "'[A] plaintiff's **[*3]** obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do.'" Id. (quoting *Bell Atl., 550 U.S. at 555*). In order to survive, a claim must be "plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (internal quotations omitted).

On the basis of the alleged unfairness to him, Dickey claims that the named defendants should be liable for antitrust violations, notwithstanding established statutory and non-statutory exemptions for labor unions and their collective-bargaining activities under federal law. See, e.g., *15 U.S.C. § 17*. Dickey's theory is that the alleged favoritism towards the agents he views as more established or powerful is an affront to free competition, and that shielding agents situated like himself from selective enforcement of the three-year rule is necessary to protect a freely-competitive market. However, on appeal, Dickey has failed to identify authority legitimately calling into question the district court's conclusion that statutory and nonstatutory labor exemptions from the application of federal ***antitrust law*** apply to the conduct at the heart of Dickey's claims. See *American Steel Erectors, Inc. v. Local Union No. 7, Int'l Ass'n of Bridge, Structural, Ornamental & Reinforcing Iron Workers, 536 F.3d 68, 76 (1st Cir. 2008)* (discussing labor exemptions).

Dickey **[*4]** also claims that he had a contractual and fiduciary right to fair treatment that the defendants breached via alleged selective enforcement of the three-year rule and other conduct. The district court concluded that the bulk of these claims are preempted, and, on appeal, Dickey points to no authority legitimately suggesting otherwise. See generally *29 U.S.C. § 185*. Additionally, focusing specifically on Dickey's claim that one or more fiduciary duties have been breached, there is no plausible allegation in the operative complaint of a fiduciary duty running from the named defendants to Dickey. As for any portion of Dickey's contract claims not preempted by federal law, Dickey has elucidated no legally-cognizable basis for Dickey to escape the agreed-upon operation of his contract, according to its written terms, by asserting "selective enforcement." See *Original Great Am. Chocolate Chip Cookie Co., Inc. v. River Valley Cookies, Ltd., 970 F.2d 273, 279 (7th Cir. 1992)*("The fact that the [plaintiff] may, as [defendants] argue, have treated other franchisees more leniently is no more a defense to a breach of contract than laxity in enforcing the speed limit is a defense to a speeding ticket.").

Subsidiary allegations and assertions made by Dickey in relation to these claims do nothing to alter the result.

The judgment **[*5]** of the district court is summarily **affirmed**. See *1st Cir. Loc. R. 27.0(c)*.

Opinion by: NANCY J. ROSENSTENGEL

Opinion

MEMORANDUM AND ORDER

ROSENSTENGEL, Chief Judge:

Pending before the Court is a Motion to Dismiss pursuant to *Rules 12(b)(1)* and **[*2]** *12(b)(6) of the Federal Rules of Civil Procedure* for lack of standing and failure to state a claim (Doc. 35) and a Motion to Dismiss pursuant to

Rule 12(b)(2) for lack of personal jurisdiction (Doc. 36) filed jointly by Defendants Benco Dental Supply Co., Henry Schein, Inc., and Patterson Co., Inc. For the reasons set forth below, the motion to dismiss for lack of standing is granted, and the motion to dismiss for lack of personal jurisdiction is denied as moot.

BACKGROUND

Plaintiff R. Lawrence Hatchett, M.D., initiated this action on behalf of himself and a proposed class of persons who have purchased dental care in Illinois, alleging they have been overcharged by a long-term, price-fixing conspiracy implemented by dental supply distributors Henry Schein, Inc., Patterson Companies, Inc., and Benco Dental Supply Company (collectively "Defendants") (Doc. 1).

Defendants are the three largest distributors of dental supplies in the United States (*Id.* at ¶ 1). Hatchett alleges Defendants have engaged in anti-competitive schemes, which have allowed them to fix prices at well above competitive levels and earn historically high profit margins (*Id.* at ¶ 2). First, Hatchett claims Defendants have boycotted dental buying groups, which foster competition by **[*3]** endorsing or joint venturing with discounting distributors competing with Defendants and provide these competitors with access to Illinois independent dentists (*Id.*). Second, Hatchett alleges Defendants have expressly agreed to fix their pricing at specific, above-competitive levels that are consistent with maintaining their gross margins in the range of 26 percent to 28 percent or more and well-above competitive returns (*Id.* at ¶ 3). Third, Hatchett asserts Defendants have conspired to prevent the entry and expansion of competing, discounting distributors by boycotting, or threatening to boycott, manufacturers supplying the discounters by denying these manufacturers Defendants' distribution (*Id.* at ¶ 4). They also have colluded to boycott, or threatened to boycott, the trade shows of state dental associations promoting state-wide buying groups seeking to generate supply savings for their independent dentists (*Id.*).

Hatchett claims these actions violate the *Illinois Antitrust Act*, *740 Ill. Comp. Stat. §§ 10/3(2)*, *10/7(2)*, by increasing the price and reducing the supply of dental supplies and by restraining trade and preventing competition in the relevant markets for the distribution of dental supplies in Illinois (*Id.* at **[*4]** ¶ 163). Hatchett further claims the Class members have suffered indirect antitrust price injury in their business or property and have been deprived of the benefits of full competition (*Id.* at ¶ 165). As relief, Hatchett requests actual damages, treble damages, a permanent injunction enjoining Defendants from continuing the alleged unlawful acts, attorneys' fees and costs, and pre-judgment and post-judgment interest.

Defendants have moved to dismiss the Class Action Complaint, in its entirety and with prejudice, pursuant to *Rules 12(b)(1)*, *12(b)(2)*, and *12(b)(6) of the Federal Rules of Civil Procedure*. Defendants argue that the Complaint must be dismissed because Hatchett lacks standing to pursue a class action under the Illinois Antitrust Act and because he lacks standing under Article III of the Constitution. They further assert that he lacks antitrust injury and antitrust standing under the Illinois Antitrust Act. Defendants separately contend that Hatchett has failed to plead any basis for this Court to exercise personal jurisdiction over Defendants. Thus, the Complaint must be dismissed.

LEGAL STANDARD

To survive a motion seeking dismissal under *Rule 12(b)(1)*, a plaintiff must "clearly allege facts demonstrating each element" required to establish standing. *See* *Spokeo, Inc. v. Robins, 136 S.Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016)*. Whether a defendant argues that **[*5]** a complaint fails to (1) properly state a claim, or (2) properly plead the elements of standing, courts apply the same analysis. *See* *Silha v. ACT, Inc., 807 F.3d 169, 173 (7th Cir. 2015)*. The factual allegations contained within a complaint must "raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact)." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 554-55, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal citations omitted).

I. Standing Under the Illinois Antitrust Act

Defendants first assert Hatchett lacks standing to pursue a class action under the Illinois Antitrust Act, which provides "that no person shall be authorized to maintain a class action in any court of this State for indirect purchasers asserting claims under this Act, with the sole exception of this State's Attorney General." 740 Ill. Comp. Stat. §10/7(2). Hatchett maintains, however, that Illinois's restriction on class actions is a procedural limitation that is inapplicable in federal court, where Rule 23 of the Federal Rules of Civil Procedure governs whether a case may be maintained as a class action.

In *Shady Grove Orthopedic Associates, P.A. v. Allstate Insurance Company*, the Supreme Court addressed whether a New York class action bar conflicted with Rule 23 and, if so, whether the federal rule or the state rule applied. 559 U.S. 393, 130 S. Ct. 1431, 176 L. Ed. 2d 311 (2010). A majority of the Court **[*6]** agreed that the New York statute conflicted with Rule 23, but a plurality found that the federal rule applied. *Id.* The plurality held that the New York statute did not bar class actions under New York law in federal court because Rule 23 is a procedural and not a substantive rule. Id. at 408. Justice Stevens concurred in the judgment, but reasoned the proper analysis is not whether Rule 23 is procedural, but whether the state law is procedural but "so bound up with the state-created right or remedy that it defines the scope of that substantive right or remedy." Id. at 420 (J. Stevens, concurring).

In the wake of *Shady Grove*, there has been a split of authority on the issue of whether the Illinois Antitrust Act's class action prohibition is part of Illinois's "substantive rights or remedies." City of Rockford v. Mallinckrodt ARD, Inc., 360 F. Supp. 3d 730, 763-65 (N.D. Ill. 2019), *reconsideration denied*, No. 17 C 50107, 2019 U.S. Dist. LEXIS 103885, 2019 WL 2763181 (N.D. Ill. May 3, 2019). Many federal district courts have treated Justice Stevens's "framework of substantive rights or remedies" concurrence as controlling because it was decided "on the narrowest grounds." Marks v. United States, 430 U.S. 188, 193, 97 S. Ct. 990, 51 L. Ed. 2d 260 (1977) (when no rationale of the Supreme Court achieves a majority, the Court's holding is the position taken by those who concurred "on the narrowest grounds"). Those courts have then found that the Illinois Antitrust Act's restriction **[*7]** on indirect purchaser class actions is intertwined with the State's substantive rights and remedies. This is because "the limitations on indirect purchaser actions in the IAA were enacted in the same paragraph of the same statute as the state-created right and are accompanied by other substantive limitations." In re Wellbutrin XL Antitrust Litig., 756 F.Supp.2d 670, 677 (E.D. Pa. 2010). "Furthermore, courts have observed that the Illinois statute represents a policy judgment as to the feasibility of managing duplicative recovery, which the legislature has entrusted to the Attorney General but not to individual indirect purchasers." *Id.* For these reasons, several federal courts have found that applying Rule 23 would "abridge, enlarge or modify Illinois' substantive rights" and have, therefore, dismissed class action claims under the Illinois Antitrust Act. *See, e.g.,* In re Generic Pharms. Pricing Antitrust Litig., 368 F. Supp. 3d 814, 834 (E.D. Pa. 2019); In re Loestrin 24 Fe Antitrust Litig., 410 F. Supp. 3d 352 (D.R.I. 2019); In re Effexor Antitrust Litig., 357 F.Supp.3d 363, 392, 2018 WL 6003893, at *16 (D.N.J. 2018); In re Lipitor Antitrust Litig., 336 F. Supp. 3d 395, 417-18 (D.N.J. 2018); In re Opana ER Antritrust Litig., 162 F.Supp.3d 704, 723 (N.D. Ill. 2016).

Others have taken a more nuanced approach to Justice Stevens's concurrence, however, doubting whether the concurrence controls in the first place. In *In re Aggrenox Antitrust Litigation*, the District of Connecticut explained:

> [T]he doctrine that in a split decision the controlling rationale is that taken by the Justices who concur **[*8]** in the judgment on the narrowest grounds—works only when one opinion is a logical subset of other, broader opinions. In essence, the narrowest opinion must represent a common denominator of the Court's reasoning; it must embody a position implicitly approved by at least five Justices who support the judgment. The Stevens concurrence is narrower than the position of the other Justices who made up the *Shady Grove* majority only in the sense that it would reject state procedural rules in fewer cases. It is not logically narrower, however, because it is not a logical subset of the opinion of the other Justices in the majority. Those Justices do not implicitly approve of its rationale for sometimes allowing state procedural rules to control—on the contrary, they explicitly reject that rationale—and it therefore does not represent the common denominator of the Court's reasoning.

In re Aggrenox Antitrust Litig., No. 3:14-MD-2516 (SRU), 2016 U.S. Dist. LEXIS 104647, 2016 WL 4204478, at *5 (D. Conn. Aug. 9, 2016) (internal citation and quotations omitted).

"Although the Seventh Circuit has not squarely addressed which opinion controls, it otherwise has indicated that Justice Scalia's plurality sets forth the controlling legal standard." *In re Dealer Mgmt. Sys. Antitrust Litig., 362 F. Supp. 3d 510, 552-53 (N.D. Ill. 2019)* (citing *Sawyer v. Atlas Heating & Sheet Metal Works, Inc., 642 F.3d 560, 564 (7th Cir. 2011)* (*Shady Grove* "holds that *Rule 23* applies to **[*9]** all federal civil suits, even if that prevents achieving some other objective that a court thinks valuable")). Indeed, district courts in the Northern District of Illinois recently have agreed with the reasoning in *Aggrenox* and concluded that even if Justice Stevens's concurrence was persuasive dicta, the Illinois Antitrust Act did not alter the scope of any substantive right or remedy "because any indirect purchaser procedurally blocked from participation in a class action would still have the same remedy in an individual action." *Mallinckrodt ARD, Inc., 360 F. Supp. 3d at 764* (quoting *Aggrenox, 2016 U.S. Dist. LEXIS 104647, 2016 WL 4204478, at *6)*; *see also* *In re Dealer Mgmt. Sys. Antitrust Litig., 362 F. Supp. 3d 510, 552-53 (N.D. Ill. 2019)* ("Even if Justice Stevens's plurality opinion applied, Defendant has not identified any authority for concluding that the class action bars at issue are so intertwined with a state-created right or remedy as to justify finding that it trumps *Rule 23* . . . ."); *In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d 772, 817-18 (N.D. Ill. 2017)* ("The availability of the class action procedure does not change the substantive rights or remedies available to [indirect purchasers] under Illinois law.").

The undersigned agrees with this latter approach. Even if Justice Stevens's concurrence controls, allowing indirect purchasers to bring a class action in federal court under *Rule 23* does not enlarge their substantive rights under Illinois **[*10]** law. Indirect purchasers are allowed to sue in state court under the Illinois Antitrust Act, just not under the procedural device of a class action. *See* *Shady Grove, 559 U.S. at 408* ("A class action, no less than traditional joinder (of which it is a species), merely enables a federal court to adjudicate claims of multiple parties at once, instead of in separate suits. And like traditional joinder, it leaves the parties' legal rights and duties intact and the rules of decision unchanged."). As explained in *Shady Grove*, the fact that a dispute is brought as a class action—thereby transforming the claim for a $500 penalty into a $5 million penalty—does not change the defendant's aggregate liability. *Id.* While it "is undoubtedly true that some plaintiffs who would not bring individual suits for the relatively small sums involved will choose to join a class action," that has no effect on a defendant or plaintiff's legal rights. *Id.*

Because the Court finds that *Rule 23* permits Hatchett to maintain this matter as a class action, and because doing so does not enlarge the substantive rights or remedies available to Hatchett and the proposed class under Illinois law, the Court finds that Hatchett has standing under the Illinois **[*11]** Antitrust Act to bring a class action. Accordingly, the Court denies Defendants' motion to dismiss on this basis.

II. Article III Standing

Defendants next argue the Complaint should be dismissed for failure to plead facts demonstrating Hatchett has standing to assert his claim under Article III of the Constitution. Defendants specifically challenge Hatchett's allegations regarding his injury in fact and whether that injury is fairly traceable to Defendants' conduct.

With regard to Article III standing, a plaintiff must show (1) injury in fact, meaning an invasion of a legally protected interest that is concrete and particularized, actual or imminent, and not conjectural or hypothetical; (2) a causal connection between the injury and the conduct complained of such that the injury is fairly traceable to the defendant's actions; and (3) that a favorable decision is likely to redress the injury. *Lujan v. Defs. of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. Second, the injury must be fairly traceable to the challenged conduct. *Id.* Third, the injury must be likely to be "redressed by a favorable decision." *Id. at 561*. At the pleading stage, the plaintiff must allege facts demonstrating each element of Article III standing. *Crabtree v. Experian Info. Sols., Inc., No. 18-3405, 948 F.3d 872, 2020 U.S. App. LEXIS 2698, 2020 WL 428938, at *2 (7th Cir. Jan. 28, 2020)*. "At the pleading stage, general factual allegations of injury resulting from the defendant's **[*12]** conduct may suffice, for on a motion to dismiss we presum[e] that general allegations embrace those specific facts that are necessary to support the claim." *Lujan, 504 U.S. at 561* (internal quotation omitted).

A. Injury in Fact

A "particularized" injury is one that "affect[s] the plaintiff in a personal and individual way." *Crabtree, 2020 U.S. App. LEXIS 2698, 2020 WL 428938, at *3* (quoting *Lujan, 504 U.S. at 560 n.1*). "Concreteness means that the injury must exist: it must be 'real', not abstract." *Id.* (citing *Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1548, 194 L.Ed.2d 635 (2016))*. According to Defendants, Hatchett has not alleged a particularized injury because does not say how much he was overcharged, whether his dentists accounted for the costs of those supplies in determining their prices for dental procedures, or whether his dentists billed him for the costs of these supplies.

The Court disagrees. Hatchett alleges that he paid several hundred dollars for dental services and procedures including a crown, molar extraction, and other procedures provided by two independent dentists who purchased supplies, in part, from Defendant Schein (Doc. 1 at ¶ 9). Those supplies included x-ray accessories, materials associated with crown installation (impression materials, instruments, etc.), binding/cement material, core build-up material including pins, topical fluoride, **[*13]** and anti-oxidant rinse (*Id.*). Hatchett further alleges he was overcharged for these services because his dentists obtained at least some of their supplies from Defendant Schein, which he claims conspired with the other Defendants to engage in price fixing (*Id.*). Finally, Hatchett claims that the prices charged by dental supply distributors to dentists constitutes "a substantial and identifiable portion of the pricing for dental services they provide." (*Id.* at ¶ 154). "The above-competitive pricing of such supplies by the Defendant distributors inevitably results in increased pricing for the dental services in which the supplies are used, in an amount that can be determined through econometric analysis." (*Id.* at ¶ 155). While these allegations do not specify the exact amount of any overcharges Hatchett experienced as a result of Defendants' conduct, the Court finds that they are sufficient to establish an injury in fact at the pleading stage.

B. Traceability

To satisfy the causation prong of Article III standing, the injury complained of "must be fairly traceable to the challenged action of the defendant—i.e., there must be a causal connection between the injury and the conduct." *Sterk v. Redbox Automated Retail, LLC, 770 F.3d 618, 623 (7th Cir. 2014)*. According **[*14]** to Defendants, Hatchett has made merely conclusory legal assertions that fail to support his conclusion that his claimed overpayments are traceable to Defendants.

Hatchett alleges, however, that his dentists purchased supplies from Schein, which is alleged to have conspired with the other two defendants. He further alleges facts about the dental supply distribution chain, that Defendants account for 80 to 90 percent of full-service dental supply distribution, and that the products distributed by Defendants can be traced from their manufacturers, to distributors like Defendants, to dental practices. Finally, he alleges, the price for those products is a substantial factor in the prices charged for dental services. Based on these facts, the Court finds that it is plausible that Hatchett's injuries are "fairly traceable" to Defendants' alleged price-fixing conspiracy. *See* *Remijas v. Neiman Marcus Grp., LLC, 794 F.3d 688, 696 (7th Cir. 2015)* (citing *In re Target Corp. Data Sec. Breach Litig., 66 F.Supp.3d 1154, 1159 (D. Minn. 2014)* ("Plaintiffs' allegations plausibly allege that they suffered injuries that are 'fairly traceable' to Target's conduct. This is sufficient at this stage to plead standing. Should discovery fail to bear out Plaintiffs' allegations, Target may move for summary judgment on the issue.")).

While Defendants make no **[*15]** argument that Hatchett's complaints could not be redressed by a favorable decision, the Court also finds that element to be satisfied. Any judgment in favor of Hatchett and his proposed class would serve to redress the alleged overpayment. Accordingly, Hatchett has met the requirements for Article III standing.

III. Antitrust Injury and Standing

Defendants next assert that Hatchett has failed to demonstrate antitrust injury and antitrust standing, both of which are required under the Illinois Antitrust Act. *O'Regan v. Arbitration Forums, Inc., 121 F.3d 1060, 1066 (7th Cir.*

1997) ("Federal antitrust standing rules apply under the Illinois Antitrust Act."); McGarry & McGarry LLP v. Bankr. Mgmt. Sols., No. 17 CV 5779, 2018 U.S. Dist. LEXIS 110264, 2018 WL 3218659, at *2 (N.D. Ill. July 2, 2018), *aff'd sub nom.* McGarry & McGarry, LLC v. Bankr. Mgmt. Sols., Inc., 937 F.3d 1056 (7th Cir. 2019) ("Illinois courts have adopted a common-law harmonization provision, meaning that they interpret their antitrust laws in harmony with federal-court decisions interpreting federal ***antitrust law***.").

A. Antitrust Injury

First, Defendants argue Hatchett does not participate in the dental supply market; thus, he cannot plead antitrust injury from a purported conspiracy in that market.

Federal ***antitrust law*** provides a treble-damages remedy to "any person . . . injured in his business or property by reason of anything forbidden in the antitrust laws." 15 U.S.C. § 15(a). The Supreme Court has limited those who may **[*16]** bring an antitrust action to "(1) those who have suffered the type of injury that the antitrust laws were intended to prevent and (2) those whose injuries are a result of the defendant's unlawful conduct." Serfecz v. Jewel Food Stores, 67 F.3d 591, 595 (7th Cir. 1995) (citing Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)). "Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property." Blue Shield of Va. v. McCready, 457 U.S. 465, 476-77, 102 S.Ct. 2540, 73 L.Ed.2d 149 (1982). Some injuries are "too remote from the violation and the purposes of the antitrust laws to form the predicate for a suit." Id. at 477, 102 S.Ct. 2540.

Courts "usually presume that competitors and consumers in the relevant market are the only parties who suffer antitrust injuries and are in a position to efficiently vindicate the antitrust laws." McGarry, 937 F.3d at 1065; Sw. Suburban Bd. of Realtors, Inc. v. Beverly Area Planning Ass'n, 830 F.2d 1374, 1379 (7th Cir. 1987) (antitrust injury requires a plaintiff to show that it was a participant in the relevant market); *see also* In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 161 (2d Cir. 2016) ("[T]o suffer antitrust injury, the putative plaintiff must be a participant in the very market that is directly restrained.").

If a party is neither a purchaser nor a competitor in the relevant market, however, a narrow exception exists if the party's injuries are "inextricably intertwined" with the injuries of market participants. McCready, 457 U.S. at 484. In *McCready*, the plaintiff **[*17]** sought insurance coverage for treatment by a psychologist, but her insurance plan only provided reimbursement for therapy if provided by a psychiatrist. Id. at 468-69. The plaintiff sued her health insurance provider and a group of psychiatrists alleging they colluded to exclude psychologists from receiving compensation under the plan. Id. at 469-70. While she was not a participant in the group health insurance market or the market for treatment from a psychiatrist, the Supreme Court held that she had stated a claim for antitrust injury because her "clearly foreseeable" injury was "a necessary step in effecting the ends of the alleged illegal conspiracy," and "the very means by which it is alleged that [the health insurance provider] sought to achieve its illegal ends." Id. at 479.

After its decision in *McCready*, the Supreme Court further explained that the plaintiff in that case "alleged that she was a consumer of psychotherapeutic services and that she had been injured by the defendants' conspiracy to restrain competition *in the market for such services*." Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 538, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983) (emphasis added) ("ACG"); *see also* IIA Areeda & Hovenkamp, ***Antitrust Law*** ¶ 339, at 145 (4th ed. 2014) (concluding that *McCready* "clearly limited" the meaning of the **[*18]** "inextricably intertwined" exception "to those whose injuries are the essential means by which defendants' illegal conduct brings about its ultimate injury to the marketplace").

Here, Hatchett admits in the Complaint that he and the proposed Class do not directly participate in the market for the distribution of dental supplies (Doc. 1 at ¶ 152). He alleges, however, that the market in which the Class does participate—the purchase of dental *services*—is inextricably intertwined with the relevant markets for distribution of dental supplies, as overcharging for dental supplies affects the price of dental services in Illinois in a traceable way (*Id.* at ¶ 153). Furthermore, he claims, "[f]rom the perspective of the patients using the services of independent dentists, the dental supplies have no value in and of themselves: they only have value to the extent they are used in providing them dental services." (*Id.* at ¶ 151). Thus, Hatchett asserts, "[t]he demand for dental supplies and for the distribution of those supplies directly derive from the demand for dental services for which the supplies are used." (*Id.*).

The Northern District's decision in *Supreme Auto Transport v. Arcelor Mittal* is **[*19]** instructive here. In that case, indirect purchasers of steel brought a putative class action against domestic steel manufacturers, alleging the manufacturers reduced steel production in an effort to drive up the price of steel. *Supreme Auto Transp. LLC v. Arcelor Mittal, 238 F. Supp. 3d 1032, 1036 (N.D. Ill. 2017)*. The direct purchasers of steel then passed on the higher prices to downstream customers like the plaintiffs, who bought consumer products made with steel as well as other materials. *Id.*

In determining whether the plaintiffs had suffered an antitrust injury, the court noted that while the plaintiffs made conclusory allegations about causation, the complaint did not acknowledge the role of interceding parties who purchased and distributed the raw steel from the defendants. *Id. at 1040*. The Court ultimately decided that although the plaintiffs "may have paid inflated prices for steel-containing products, the alleged scheme would have been just as effective from defendants' point of view if direct purchasers of steel paid supracompetitive prices for raw steel and never passed that cost on to consumers." *Id. at 1041*. Because the indirect purchasers only purchased the steel as a component part of mixed material products, plaintiffs failed to demonstrate antitrust injury. *Id.* The Seventh **[*20]** Circuit affirmed. *Supreme Auto Transp., LLC v. Arcelor Mittal USA, Inc., 902 F.3d 735, 744 (7th Cir. 2018)*. In doing so, it contrasted plaintiffs' allegations that they purchased steel as a component of other, more complex products, of which steel was not even a primary or necessary ingredient, with plaintiffs in a related suit who alleged injury based on the purchase of steel items from distributors who had purchased those same items from the defendants. *Id.* In the second instance, the alleged injury was fairly traceable to the defendant steel manufacturers, whereas in the instant case, the claims were too remote to demonstrate causation. *Id.*

The Court also finds *Aluminum Warehousing* to be analogous. *833 F.3d at 162*. In that case, the Second Circuit found that purchasers of aluminum-containing products such as beverages sold in aluminum cans did not establish antitrust standing when they were not participants in the defendant's market (aluminum warehousing). *Id.* Moreover, their injury was not "inextricably intertwined" with the injuries of participants in the aluminum warehousing market. *Id.* The Court explained that plaintiffs' injury was not "a necessary step" in carrying out the alleged anti-competitive conspiracy; instead, the injury was "suffered down the distribution chain of a **[*21]** separate market, and was a purely incidental byproduct of the alleged scheme." *Id.*

The Second Circuit also rejected the indirect purchasers' argument that, without them, there would be no real-world purchasers of aluminum, and without users of physical aluminum, there would be no market for aluminum futures or aluminum warehousing. *Id.* The court noted that "[t]his approach would limitlessly increase the universe of potential plaintiffs, and cannot be squared with *McCready* itself, which held that courts must apply a 'proximate cause' test to alleged antitrust injury." *Id.* (quoting *McCready, 457 U.S. at 477-78*).

Like the indirect steel and aluminum purchasers, the Court finds that Hatchett and the proposed class's alleged injuries as purchasers of dental services were "not a necessary step in carrying out the alleged anti-competitive conspiracy, but rather a 'purely incidental byproduct of the alleged scheme.'" *See Supreme Auto Transp. LLC, 238 F. Supp. 3d at 1040-41*. Nor were their injuries "clearly foreseeable" or the essential means by which Defendants' illegal conduct brought about its ultimate injury to the marketplace. *See McCready, 457 U.S. at 479*.

Assuming the facts as alleged are true, Defendants' scheme would be just as effective if dentists purchased the higher priced supplies but **[*22]** never passed on that cost to Plaintiffs. And, as noted in *Aluminum Warehousing*, the fact that the demand for dental services drives the market for dental supplies is inconsequential, as *McCready* demands proximate—not but-for—causation. For these reasons, the Court finds that the injuries alleged by Hatchett and the proposed class are not inextricably intertwined with the injuries of market participants: the dentists who obtained their supplies from Defendants. Therefore, Plaintiffs have not adequately pleaded antitrust injury.

B. Antitrust Standing

Even if Hatchett had adequately pleaded antitrust injury, he must also demonstrate antitrust standing, *i.e.*, that he is the proper plaintiff to bring the claim.[1] "From the class of injured persons suffering an 'antitrust injury' only those parties who can most efficiently vindicate the purposes of the antitrust laws have antitrust standing to maintain a private action under *§ 4*." *Serfecz, 67 F.3d at 598* (citation omitted). The Seventh Circuit has "recognized the need to balance the interests of deterrence through private antitrust enforcement and avoidance of excessive treble damages litigation," which is achieved by allowing only those who "suffer immediate injuries **[*23]** with respect to their business or property, while excluding persons whose injuries were more indirectly caused by the antitrust conduct." *Id.*

The Supreme Court has identified six factors that courts should weigh in making this assessment:

> (1) [t]he causal connection between the alleged anti-trust violation and the harm to the plaintiff; (2) [i]mproper motive; (3) [w]hether the injury was of a type that Congress sought to redress with the antitrust laws; (4) [t]he directness between the injury and the market restraint; (5) [t]he speculative nature of the damages; (6) [t]he risk of duplicate recoveries or complex damages apportionment.

ACG, 459 U.S. at 537-46.

As discussed above, the causal connection here is weak; Hatchett alleges he overpaid for dental services on account of Defendants' actions, but he has not alleged that any specific charge he paid was related to the costs his dentist paid for specific dental supplies. And Hatchett can only speculate that his dentists passed on any additional charges to him; the actual amount of those charges, if any, certainly is unknown.

Perhaps the most important factor to the analysis in this case though is the risk of duplicate recoveries. Defendants point **[*24]** out that a number of other lawsuits have been filed against them by (1) dental practices and direct purchasers of dental supplies; (2) dental supply distributors that compete directly with Defendants in the sale of dental supplies; (3) an online platform for the sale of dental supplies that competed with Defendants; and (4) a supplier of dental supplies to that online platform. In one of those cases, *In re Dental Supplies Antitrust Litig.*, No. 1:16-CV-00696-BMC-GRB (E.D.N.Y.), a settlement was granted final approval in June 2019 between a proposed class of dental practices and dental laboratories—*i.e.*, the purchasers of dental supplies who have suffered immediate injuries—and Defendants in this case. Thus, the Court agrees with Defendants that Hatchett "is not the party who can most efficiently vindicate the purposes of the antitrust laws in this case." *Kochert v. Greater Lafayette Health Servs., Inc., 463 F.3d 710, 718 (7th Cir. 2006)* (internal quotation marks and citation omitted). Because Hatchett lacks antitrust standing, his complaint must be dismissed.

Conclusion

For these reasons, the Court **GRANTS** the Motion to Dismiss for lack of standing filed by Defendants (Doc. 35). Plaintiff's Complaint (Doc. 1) is **DISMISSED with prejudice**. Defendants' Motion to Dismiss **[*25]** for lack of personal jurisdiction (Doc. 36) is **DENIED as moot**. This case is closed, and the Clerk of Court is **DIRECTED** to enter judgment.

IT IS SO ORDERED.

DATED: February 13, 2020

/s/ Nancy J. Rosenstengel

---

[1] In *Supreme Auto*, the Seventh Circuit eschewed the term "antitrust standing," noting that it is actually a proximate cause requirement. *Supreme Auto Transp., LLC, 902 F.3d at 743*.

Opinion

MEMORANDUM RE MOTION TO DISMISS AMENDED COMPLAINT

Baylson, J.

I. Introduction

In this securities class action, a putative class of shareholders bring claims for violations of Section 10(b) and 20(a) of the *Securities Exchange Act of 1934 (the "Exchange Act")*, alleging that Recro Pharma, Inc. ("Recro") and five Individual **[*2]** Defendants (collectively, the "Defendants") defrauded the class by failing to inform them of various concerns that had been raised to the company by industry professionals regarding the manufacturing and efficacy of Intravenous Meloxicam ("IV Meloxicam"). This drug promised to provide postoperative pain relief without many of the complications of opioids. When the company announced that the FDA declined to approve IV Meloxicam, the price of Recro's stock fell. The Amended Complaint alleges two counts:

- **Count I:** Violation of Section 10(b) of the Exchange Act and *Rule 10b-5*, which is asserted against all Defendants; and
- **Count II:** Violation of Section 20(a) of the Exchange Act, which is asserted against the Individual Defendants.

Defendants collectively move to dismiss the Amended Complaint under *Federal Rule of Civil Procedure ("Rule") 12(b)(6)* and *Rule 9(b)*, and the Private Securities Litigation Reform Act of 1995 ("PSLRA"). The lead Plaintiff responds in opposition, and Defendants reply.

For the reasons discussed below, Defendants' Motion to Dismiss is granted without prejudice.

II. Facts[1]

A. The Parties

The lead plaintiffs are investors Daniel Wessler, Charles Clark, Ronald Davidson, and John Alberici ("Recro Investor Group" or "Plaintiff"). (ECF 21 ¶ 1.)

Defendant Recro, a **[*3]** "specialty pharmaceutical company" headquartered in Malvern, Pennsylvania, "develops non-opioid therapeutics for the treatment of pain in the post-operative setting." (Am. Compl. ¶¶ 2, 3.)

The Amended Complaint names five individuals who allegedly served as members of Recro's Management and Leadership teams at all relevant times:

Defendant Henwood, who founded Recro in 2007 and has served as the company's CEO, President and Director since 2008. (Am. Compl. ¶ 17.)

Defendant McCallum, who has served as Recro's Chief Medical Officer ("CMO") since December 2015. (Am. Compl. ¶ 18.)

Defendant Harlow, who has served as Recro's Executive Vice President, Commercial since 2018 and previously served as Vice President, Marketing. (Am. Compl. ¶ 19.)

---

[1] The following factual narrative is drawn from the Amended Complaint and disregards any differences between the Amended Complaint and the Original Complaint. See *W. Run Student Hous. Assocs., LLC v. Huntington Nat'l Bank, 712 F.3d 165, 173 (3d Cir. 2013)* (noting that because "the district court typically may not look outside the four corners of the amended complaint, the plaintiff cannot be bound by allegations in the superseded complaint"). The Court takes the allegations in the Amended Complaint as true and draws all reasonable inferences in favor of Plaintiff, as is required at the motion to dismiss stage. *Phillips v. Cty. of Allegheny, 515 F.3d 224, 231 (3d Cir. 2008)*.

Defendant Celano, who has served as Recro's Chief Operating Officer since January 3, 2018, and previously served as CFO. (Am. Compl. ¶ 20.)

Defendant Lake, who has served as Recro's CFO since January 2018 and previously served as Senior Vice President of Finance and Chief Accounting Officer. (Am. Compl. ¶ 21.)

B. IV Meloxicam

Recro is comprised of two segments, the Acute Care division and the Contract Development and Manufacturing Organization ("CDMO"). (Am. **[*4]** Compl. ¶ 24.) The Acute Care segment is "primarily focused on developing products for hospitals and other acute care settings." (Am. Compl. ¶ 25.) The product that is central to this case, IV Meloxicam, is the lead product in the Acute Care division. (Am. Compl. ¶ 31.)

IV Meloxicam is "a proprietary injectable form of meloxicam, a long-acting, non-opioid drug for the management of moderate-to-severe, acute postoperative pain." (Am. Compl. ¶ 26.) Put simply, IV Meloxicam is a non-opioid drug for post-operation management of pain. Because opioids currently dominate the market for IV acute pain, Plaintiff asserts that "Recro touts IV [M]eloxicam as having the potential to overcome many of the significant complications and side effects associated with commonly-prescribed opioid drugs, including addiction, respiratory depression, constipation, excessive nausea and vomiting." (Am. Compl. ¶ 29.) Recro conducted clinical trials of IV Meloxicam in patients recovering from both hard tissue and soft tissue procedures. (Am. Compl. ¶ 44.)

C. Feedback from the Key Opinion Leaders on IV Meloxicam

Plaintiff asserts that Recro has a "robust list"—200 to 300—of Key Opinion Leaders ("KOLs"). (Am. Compl. **[*5]** ¶ 38.) KOLS are "well-respected, expert physicians in their field who provide thought leadership to their peers and the general public" and assist with marketing pharmaceuticals. (Am. Compl. ¶ 37.) Plaintiff alleges that the KOLs expressed various concerns to Recro regarding the manufacturing and efficacy of IV Meloxicam.[2] Some of the KOLs' concerns were communicated to Recro via a confidential witness, CW1, who was employed in various roles at Recro from June 2017 through May 2018 and had frequent communication with the KOLs. (Am. Compl. ¶ 39.)

The first concern expressed by the KOLs about IV Meloxicam involved the manufacturing process. IV Meloxicam is manufactured overseas pursuant to a supply agreement with an Irish company. (Am. Compl. ¶ 59.) Plaintiff alleges that "CW1 stated that approximately 30% of KOLs expressed their concern to CW1 about IV [M]eloxicam being manufactured overseas." (Am. Compl. ¶ 61.) The KOLs' concern was based on their experience with foreign manufacturing of drugs and the possibility that "a manufacturing plant in Ireland may not have the same standards as the U.S. which could cause the plant to fail the FDA pre-approval plant inspections." (Am. Compl. ¶ **[*6]** 62.) The KOLs also expressed concerns to CW1 about the "level and quality of oversight of the manufacturing process of IV [M]eloxicam." (Am. Compl. ¶ 63.) Plaintiff alleges that "Recro had only one employee, [Chris] Sharr, handling the oversight for manufacturing IV [M]eloxicam and its packaging in Ireland." (Am. Compl. ¶ 63.) According to Plaintiff, "CW1 and CW1's Medical Affairs Team reported the KOLs' concerns regarding ... foreign manufacturing of IV [M]eloxicam to Recro's top leadership," including three of the Individual Defendants. (Am. Compl. ¶ 67.)

The second concern expressed by the KOLs regarding IV Meloxicam involved its efficacy. According to Plaintiff, "while 99.9% of KOLs were convinced that IV [M]eloxicam should be used in orthopedic [hard tissue] procedures, ... <u>KOLs stated that IV [M]eloxicam should not be used in soft tissue procedures</u> ...." (Am. Compl. ¶ 69.) Plaintiff alleges that "the clinical trial data for the efficacy of IV [M]eloxicam in hard tissue procedures ... was far more compelling than the clinical trial data for the drug's efficacy in soft tissue procedures." (Am. Compl. ¶ 69.) This is likely because soft tissue procedures are less painful, so the reduction **[*7]** of pain that results from using IV

---

[2] The Amended Complaint contains various allegations related to concerns raised by the KOLs about alleged nepotism at Recro. (Am. Compl. ¶¶ 32-42.) The Court will not address the nepotism allegations because, as acknowledged by Plaintiff, Recro fully "disclose[d] the family relationships" that Plaintiff alleges were suspect. (ECF 41, Plaintiff's Supplemental Submission at 5.)

Meloxicam is less pronounced when the drug is used to treat postoperative pain arising from a soft tissue procedure. (Am. Compl. ¶ 70.) Plaintiff alleges that Defendants were fully aware that "soft tissue physicians were not a receptive market for IV [M]eloxicam," but nonetheless made statements to convey to the market that "soft tissue surgeons and their patients were 'IV [M]eloxicam target opportunities.'" (Am. Compl. ¶ 73.)

D. Recro Files a New Drug Application for IV Meloxicam

On July 31, 2017, Recro announced that it had filed a New Drug Application ("NDA") for IV Meloxicam 30 mg with the Food and Drug Administration ("FDA"). (Am. Compl. ¶ 46.) Recro allegedly conducted "efficacy and safety clinical trials" in preparation for filing its NDA. (Am. Compl. ¶ 43.) Plaintiff alleges that, according to the KOLs, Recro's efficacy data was "far less robust" for the abdominoplasty (soft tissue) clinical trial than it was for the bunionectomy (hard tissue) clinical trial—a result of the difference in the extent to which the different patient classes reported a reduction in pain. (Am. Compl. ¶ 45.)

On September 28, 2017, Recro announced that the FDA had "accepted **[*8]** for review its NDA," and on October 5, 2017, it announced that the FDA had set May 26, 2018 as the date by which the FDA would complete its review (the "PDUFA date"). (Am. Compl. ¶¶ 47, 48.) Plaintiff asserts that "[m]any drug companies choose to disclose their PDUFA dates in the hopes that doing so will lead to an increase in their share prices." (Am. Compl. ¶ 49.)

E. The FDA Rejects Recro's NDA

On May 24, 2018, the FDA rejected Recro's NDA in a Complete Response Letter ("CRL"). (Am. Compl. ¶ 50.) A "CRL[] inform[s] drug companies that the review cycle for an NDA has been completed and that the NDA is <u>not</u> approvable. They lay out deficiencies and outline possible remedies. CRLs can have a devastating effect on a small company's share value" and are "usually confidential." (Am. Compl. ¶¶ 51, 52.)

Recro issued a press release when it received the CRL, stating that the FDA declined to approve the NDA. (Am. Compl. ¶ 53.) The press release explained that

> The CRL states that data from ad hoc analyses and selective secondary endpoints suggest that the analgesic effect does not meet the expectations of the FDA. In addition, the CRL raised CMC [or Chemistry, Manufacturing and Controls]-related **[*9]** questions on extractable and leachable data provided in the NDA.

(Am. Compl. ¶ 103.) Plaintiff alleges that during a morning conference call on May 24, 2018, Defendant Henwood stated that "to the best of our understanding right now, there is a lack of clarity in the reviewer's mind about some of the data." (Am. Compl. ¶ 54.) Plaintiff states that "Recro's share price was decimated as a result of the news. The stock dropped from $6.79, or 54.67%, to close at $5.63 on May 24, 2018." (Am. Compl. ¶ 55.)

According to Plaintiff, it is "very likely" that Recro knew the FDA was going to reject its NDA. (Am. Compl. ¶ 57.) This allegation is based on the fact that after the FDA accepts an NDA for review, it will "send information requests, raise further questions, have meetings, and may make recommendations to the drug company applicant." (Am. Compl. ¶ 56.) Plaintiff alleges that this practice made it likely that "Recro was aware of, but failed to disclose, the two issues raised by the FDA in deciding not to approve the NDA."[3] (Am. Compl. ¶ 57.)

III. Procedural History

[3] The Amended Complaint does not explain "the two issues raised by the <u>FDA."</u> This is presumably a reference to the two concerns raised by the KOLs regarding (a) potential inadequacy in manufacturing oversight and (b) the fact that IV Meloxicam was marketed as a drug to solve pain following soft-tissue procedures when the KOLs were not impressed by the clinical data on efficacy in the soft-tissue context. There is a difference between, on the one hand, Recro being aware that the <u>KOLs</u> raised these concerns prior to the FDA's rejection of the NDA and, on the other, Recro being aware that the <u>FDA</u> raised these concerns in its decision to deny approval. This gap in logic is addressed briefly in subsection V.E.2's analysis of loss causation.

Plaintiff filed his Complaint on May 31, 2018. (ECF 1.) On October 5, 2018, this Court appointed Daniel Wessler, Charles **[*10]** Clark, Ronald Davidson, and John Alberici (collectively "Recro Investor Group" or "Plaintiff") as the Lead Plaintiff. (ECF 21.) Plaintiff filed an Amended Complaint on December 11, 2018. (ECF 26.) Defendants moved to dismiss the Amended Complaint on February 8, 2019, (ECF 31),[4] and Plaintiff responded in opposition on April 9, 2019, (ECF 32.) Defendants replied, (ECF 33), and attached as Exhibit A summary chart of all of the misstatements alleged by Plaintiff to be misleading, together with its defense to each statement, (ECF 33-1.) The Court held oral argument on the Motion to Dismiss on June 26, 2019. (ECF 37; ECF 39, June 26, 2019 Hr'g Tr.)

Following oral argument, the Court invited the parties to submit supplemental briefing. On August 30, 2019, Plaintiff filed a supplemental memorandum in further opposition to Defendants' Motion to Dismiss. (ECF 41.) Attached to Plaintiff's supplemental memorandum as Exhibit A is a counter-chart responding to Defendants' chart. (ECF 41-1.) On September 27, 2019, Defendants filed their supplemental memorandum, (ECF 43), and attached a chart that responded to Plaintiff's counter-chart, (ECF 43-2.)

IV. Legal Standard

A securities fraud complaint must **[*11]** do much more than a typical complaint. In addition to the traditional *Rule 12(b)(6)* standard, a securities fraud complaint must satisfy *Rule 9(b)*'s particularity requirement. Moreover, a securities fraud complaint must comply with the heightened pleading requirements of the PSLRA, which "imposes another layer of factual particularity to allegations of securities fraud." *In re Rockefeller Ctr. Props., Inc. Sec. Litig., 311 F.3d 198, 217 (3d Cir. 2002)*.

A. Pleading Standard Under *Rule 12(b)(6)*

In considering a motion to dismiss under *Rule 12(b)(6)*, the Court "accept[s] all factual allegations as true [and] construe[s] the complaint in the light most favorable to the plaintiff." *Warren Gen. Hosp. v. Amgen Inc., 643 F.3d 77, 84 (3d Cir. 2011)* (internal quotation marks and citations omitted). The Supreme Court has instructed that, "[t]o survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim for relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*.

The Court in Iqbal explained that, although a court must accept as true all of the factual allegations contained in a complaint, that requirement does not apply to legal conclusions; therefore, pleadings must include factual allegations to support the legal claims asserted. *556 U.S. at 678, 684*. "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do **[*12]** not suffice." *Id. at 678*. Accordingly, to survive a motion to dismiss, a plaintiff must plead "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Id.

B. Pleading Standard Under *Rule 9(b)* and the PSLRA

All allegations of fraud must meet *Rule 9(b)*'s "particularity" requirement. "*Rule 9(b)*'s heightened pleading standard gives defendants notice of the claims against them, provides an increased measure of protection for their reputations, and reduces the number of frivolous suits brought solely to extract settlements." *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1418 (3d Cir. 1997)*.

Rule 9(b) may be satisfied by describing "the circumstances of the alleged fraud with precise allegations of date, time, or place, or by using some means of injecting precision and some measure of substantiation into [the]

[4] The caption of the action was amended to add two individual defendants, Stewart McCallum and John Harlow. (ECF 27, ECF 28.)

allegations of fraud." Bd. of Trs. of Teamsters Local 863 Pension Fund v. Foodtown, Inc., 296 F.3d 164, 172 n.10 (3d Cir. 2002) (internal quotation marks and citations omitted). Stated differently, the plaintiff must plead the "who, what, when, where, and how" of the fraud. Institutional Inv'rs Grp. v. Avaya, Inc., 564 F.3d 242, 253 (3d Cir. 2009); see Bonavitacola Elec. Contractor, Inc. v. Boro Developers, Inc., No. CIV.A. 01-5508, 2003 U.S. Dist. LEXIS 2190, 2003 WL 329145, at *6 (E.D. Pa. Feb. 12, 2003) (Baylson, J.) ("While a complaint need not set out 'precise words,' it should adequately describe the nature and subject of an alleged misrepresentation."). Rule 9(b)'s particularity requirement is "rigorously applied in securities fraud cases." Burlington, 114 F.3d at 1417. [B]oilerplate **[*13]** and conclusory allegations will not suffice." Id. at 1418.

However, "courts should be sensitive to the fact that application of [Rule 9(b)] prior to discovery may permit sophisticated defrauders to successfully conceal the details of their fraud. Accordingly, the normally rigorous particularity rule has been relaxed somewhat where the factual information is peculiarly within the defendant's knowledge or control." Id. (internal quotation marks and citations omitted).

The PSLRA[5] imposes two distinct, heightened pleading requirements for actions brought under Section 10(b) and Rule 10b-5. First, the PSLRA requires that "the complaint ... specify each statement alleged to have been misleading, the reason or reasons why the statement is misleading, and, if an allegation regarding the statement or omission is made on information and belief, the complaint [must] state with particularity all facts on which that belief is formed." 15 U.S.C. § 78u-4(b)(1). Second, the PSLRA requires that "the complaint ... state with particularity facts giving rise to a strong inference that the defendant acted with the required state of mind." 15 U.S.C. § 78u-4(b)(2)(A) (emphasis added). In a nutshell, the PSLRA requires that "securities fraud complaints 'specify' each misleading statement; ... set forth **[*14]** the facts 'on which a belief' that a statement is misleading was 'formed'; and ... 'state with particularity facts giving rise to a strong inference that the defendant acted with the required state of mind.'" Dura Pharms., Inc. v. Broudo, 544 U.S. 336, 345, 125 S. Ct. 1627, 161 L. Ed. 2d 577 (2005) (quoting 15 U.S.C. §§ 78u-4(b)(1), (2)).

The PSLRA's pleading standard for private securities actions essentially replaced Rule 9(b)'s heightened pleading standard for claims of fraud. The particularity requirement in Rule 9(b) "is comparable to and effectively subsumed by the requirements of ... the PSLRA." Avaya, 564 F.3d at 253 (internal quotation marks and citations omitted). Therefore, securities fraud plaintiffs must "plead the who, what, when, where and how" of the alleged fraud. Id. However, for allegations that are made on information and belief, "the complaint shall state with particularity all facts on which that belief is formed." 15 U.S.C. § 78u-4(b); see also Avaya, 564 F.3d at 253 ("[W]hen allegations are made on information and belief, the complaint must not only state the allegations with factual particularity, but must also describe the sources of information with particularity, providing the who, what, when, where and how of the sources, as well as the who, what, when, where and how of the information those sources convey.").

V. Discussion

A. Legal Framework: Section 10(b), Rule 10b-5, and [*15] Section 20(a)

Section 10(b) of the Exchange Act makes it unlawful to "use or employ, in connection with the purchase or sale of any security registered on a national securities exchange ... any manipulative or deceptive device or contrivance in contravention of such rules and regulations as the Commission may prescribe ...." 15 U.S.C. § 78j(b). Rule 10b-5,

---

[5] The PSLRA was enacted "to curb perceived abuses of the § 10(b) private action—'nuisance filings, targeting of deep-pocket defendants, vexatious discovery requests and manipulation by class action lawyers.'" Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 320, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (quoting Merrill Lynch, Pierce, Fenner & Smith Inc. v. Dabit, 547 U.S. 71, 81, 126 S. Ct. 1503, 164 L. Ed. 2d 179 (2006)). The "substantive and procedural controls" imposed by the PSLRA include procedures for the appointment of lead plaintiffs and lead counsel; limitations on damages and attorney's fees; a safe harbor for forward-looking statements; sanctions for frivolous litigation; authorization for a stay of discovery pending decision on a motion to dismiss; and additional pleading requirements. Tellabs, 551 U.S. at 320.

which was created under Section 10(b), makes it unlawful "[t]o make any untrue statement of material fact or to omit to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading." *17 C.F.R. § 240.10b-5(b)*. Stating a claim under Section 10(b) and *Rule 10b-5* requires the plaintiff to establish six elements:

(1) A material misrepresentation or omission by the defendant;
(2) Scienter;
(3) A connection between the misrepresentation or omission and the purchase or sale of a security;
(4) Reliance upon the misrepresentation or omission;
(5) Economic loss; and
(6) Loss causation.

Matrixx Initiatives, Inc. v. Siracusano, 563 U.S. 27, 37-38, 131 S. Ct. 1309, 179 L. Ed. 2d 398 (2011).

Section 20(a) of the Exchange Act provides that "[e]very person who, directly or indirectly, controls any person liable [for a Section 10(b) violation] shall also be liable jointly and severally with and to the same extent as such controlled person to any person to whom such controlled person is liable, unless the controlling **[*16]** person acted in good faith and did not directly or indirectly induce the act ... constituting the violation ...." *15 U.S.C. § 78t(b)*. Therefore, liability under Section 20(a) runs with liability under Section 10(b). *Avaya, 564 F.3d at 280*. If there is no liability under Section 10(b), there is no control person liability under Section 20(a). Id.

B. Statements Alleged to be False and/or Misleading

Plaintiff alleges that Recro made twenty-five false and/or misleading statements over the class period, which runs from July 17, 2017 through May 23, 2018. (Am. Compl. ¶ 1.) Plaintiff separates the allegedly false and misleading statements by the fiscal quarter in which they were made: five statements that were made during the third quarter of 2017 (July 1, 2017-September 30, 2017), (Am. Compl. ¶¶ 74-78); six statements that were made during the fourth quarter of 2017 (October 1, 2017-December 31, 2017), (Am. Compl. ¶¶ 80-85); nine statements that were made during the first quarter of 2018 (January 1, 2018-March 31, 2018), (Am. Compl. ¶¶ 87-95); and five statements that were made during the second quarter of 2018 (April 1, 2018-June 30, 2018), (Am. Compl. ¶¶ 97-101, 103.)

The Appendix to this Memorandum collects the alleged misstatements or omissions, maintaining the language emphasized **[*17]** by Plaintiff. The statements that Plaintiff alleges violate the Exchange Act can be grouped into five basic categories:[6]

• (1) **Investor Presentation Statements:** Statements in investor presentations suggesting that IV Meloxicam is suitable for use in soft-tissue procedures, (Am. Compl. ¶¶ 74, 77, 78, 81, 84, 85, 87, 88, 89, 90, 94, 95, 100, 101.)

• (2) **Sarbanes-Oxley Act (SOX) Certifications:** Certifications of mandatory disclosures (e.g., Form 10-Q and Form 10-K) pursuant to SOX, (Am. Compl. ¶¶ 75, 82, 91, 97.)

• (3) **Contract Manufacturer Statement:** One statement in Recro's 2017 10-K noting that Recro has "internal managers" overseeing manufacturing, (Am. Compl. ¶ 92.)

• (4) **Revenue Statements:** Statements in mandatory disclosures noting that the Acute Care segment does not bring in revenue and has costs associated with IV Meloxicam's clinical trials, (Am. Compl. ¶¶ 76, 83, 93, 98.)

• (5) **Investor Relations Statements:** Statements in press releases and on earnings calls suggesting that IV Meloxicam is suitable for use in soft tissue procedures, (Am. Compl. ¶¶ 80, 99.)

---

[6] Although Plaintiff takes issue with two broad omissions (omissions related to the degree of oversight of foreign manufacturing and omissions related to the KOLs' concerns about the efficacy of IV Meloxicam in soft tissue procedures), the vast majority of the twenty-five misrepresentative statements deal with the latter category of omission.

Plaintiff alleges that these statements are misleading or false because they failed to disclose "that: (i) KOLs told the Company **[*18]** that the clinical data for IV [M]eloxicam did not have a sufficient analgesic effect for soft tissue procedures and should not be used in soft tissue procedures; and (ii) Recro did not have a handle on the manufacturing process for IV [M]eloxicam, even though KOLs had raised concerns about Sharr's qualifications and his lack of oversight of manufacturing." (Am. Compl. ¶¶ 79, 86, 96, 102.)

C. Judicial Notice

Plaintiff and Defendants have each requested that the Court take judicial notice of certain materials.

First, Plaintiff requests that the Court take judicial notice of a March 22, 2019 press release announcing Recro's receipt of a second CRL in which the FDA declined to approve IV Meloxicam, as well as a webcast of a conference call in which Henwood stated that "[t]he FDA did focus on the ... fact that some patients have a reduction in pain relief in the waning hours of the dosing period. We believe that the product does perform well, that it has a role, that it could be useful in multi-model analgesia. That's based on KOL feedback ...." (ECF 32, Plaintiff's Opposition at 11.) This request need not be evaluated because Defendants do not oppose the Court taking judicial notice of the **[*19]** March 22, 2019 press release. (ECF 43, Defendants' Supplemental Submission at 8-9.)

Second, Defendants request that the Court take judicial notice of a press release that was issued by Recro on October 31, 2019 announcing that "it ... received a written decision from the [FDA] granting its appeal of the [CRL] relating to the ... [NDA] seeking approval for ... IV [M]eloxicam." (ECF 44, Ex. A.) Defendants argue that the press release is "integral" to the issues in the Amended Complaint as well as the Motion to Dismiss. (ECF 44, Request for Judicial Notice at 3.) Plaintiff responds in opposition, asserting that the FDA's decision to grant Recro's appeal fifteen months after the denial is irrelevant to whether Defendants committed securities fraud violations during the class period. (ECF 45 at 1.)

A district court evaluating a motion to dismiss under *Rule 12(b)(6)* may take judicial notice of (1) exhibits attached to the complaint; (2) matters of public record; and/or (3) undisputedly authentic documents integral to or explicitly relied upon in the complaint without violating the principle that "matters extraneous to the pleadings" should not be considered. *Burlington, 114 F.3d at 1426*; see also *In re Egalet Corp. Secs. Litig., 340 F. Supp. 3d 479, 496 (E.D. Pa. 2018)* (Baylson, J.) (listing exceptions). **[*20]** Moreover, *Federal Rule of Evidence 201(b)(2)* permits courts to "judicially notice a fact that is not subject to reasonable dispute because it can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." The October 31, 2019 press release was not attached to or relied on in the Amended Complaint (indeed, the press release was not published until many months after the filing of the Amended Complaint), so the first and third exceptions do not apply. Judicial notice is only proper if the press release is a public record.

Documents approved by the Third Circuit as "public records" that may be judicially noticed include "SEC filings, published reports of administrative bodies, ... criminal case dispositions and decision letters of government agencies." *Egalet, 340 F. Supp. 3d at 496* (internal quotation marks and citations omitted). By contrast, [a]rticles published in accounting journals and law reviews, conference call transcripts, ... and company web sites ... are not 'matters of public record.'" *In re Astea Int'l Inc. Sec. Litig., Civil Action No. 06-1467, 2007 U.S. Dist. LEXIS 58238, 2007 WL 2306586, at *8 (E.D. Pa. Aug. 9, 2007)* (Yohn, J.). The key question is not accessibility, but rather whether "the public had unqualified access" to the document at issue. *Pension Benefit Guar. Corp. v. White Consol. Indus., Inc., 998 F.2d 1192, 1197 (3d Cir. 1993)*.

The Court declines to take judicial notice of the October 31, 2019 press release **[*21]** regarding the FDA's grant of Recro's appeal of the CRL because this document is not within the scope of the Third Circuit's narrow construction of the "public records" exception. See *Schmidt v. Skolas, 770 F.3d 241, 249 (3d Cir. 2014)* (holding that press releases not attached to the complaint could "not be considered at the motion to dismiss stage" because the complaint was not "based" on the press releases); see also *Toner v. GEICO Ins. Co., 262 F. Supp. 3d 200, 205 n.3 (E.D. Pa. 2017)* (Slomsky, J.) (construing the public records narrowly).

D. Parties' Arguments

The Motion to Dismiss articulates six independent reasons for why the Amended Complaint should be dismissed, raising arguments under the first, second, and sixth elements. Plaintiff responds in opposition to each theory set forth by Defendants.

First, Defendants assert that Plaintiff failed to plead a materially misleading misrepresentation or omission. According to Defendants, "Plaintiff's allegations based on the opinions of KOLs ... cannot form the basis of a claim against Recro because there is no legal duty for a company to disclose the opinions of third parties." (Motion to Dismiss at 2-3.) Second, Defendants argue that many of the allegedly fraudulent statements are protected by the PSLRA's safe harbor for forward looking statements, and **[*22]** therefore are not actionable as misleading misstatements. (Id. at 3.) Third, Defendants assert that the Amended Complaint does not meet the PSLRA's specificity requirement, in part because Recro fully disclosed the facts underlying the KOLs' alleged opinions regarding the efficacy of IV Meloxicam for soft tissue procedures. (Id.) Fourth, Defendants contend that Plaintiff's allegations of scienter are insufficient to satisfy the "strong inference" standard because "Plaintiff makes no allegation that could form the basis of scienter, such as allegations relating to stock sales by Defendants or any motive of Defendants to act fraudulently." (Id.) Fifth, Defendants argue that Plaintiff fails to make any allegations regarding loss causation. (Id.) Sixth, Defendants explain that because Section 20(a) liability is derivative of Section 10(b) liability, and because there is no Section 10(b) liability, Count II should be dismissed. (Id.)

Further, Defendants' chart notes specific reason(s) why each of the twenty-five alleged misstatements do not satisfy the requirements of Section 10(b). Defendants contend that: the statements in paragraphs 74, 77, 78, 81, 84, 85, 87, 88, 89, 94, 100 of the Amended Complaint are forward-looking statements and the statements **[*23]** in paragraphs 80 and 99 are corporate puffery, so these statements are protected by the PSLRA's safe harbors; the statements in paragraphs 75, 82, 91, 97 of the Amended Complaint are disclaimers or legal conclusions; and the statements in paragraphs 76, 83, 90, 92, 93, 95, 98, 101 of the Amended Complaint do not contain an allegation of falsity (i.e., there was no misrepresentation or omission).

E. Analysis

The Court will address Defendants' arguments that (1) the opinions of the third-party KOLs were not material; (2) the Amended Complaint is devoid of scienter allegations; (3) the loss causation allegations are lacking.

Initially, the Court notes that the various statements differ in the degree to which they are misleading and/or covered by Section 10(b)—for some statements, there is no clear theory of falsity, and for others, the applicability of the PSLRA's safe harbors raise legitimate questions about actionability. This Memorandum will not engage in statement-by-statement analysis because the insufficiency of the scienter allegations applies to all of the alleged misrepresentations. Plaintiff's failure to adequately plead scienter obviates the need to assess the statements individually, because **[*24]** regardless of the Court's conclusion on falsity and the PSLRA's safe harbors, the lack of scienter is fatal.

Before reaching the scienter question, however, the Court will analyze Defendants' arguments on materiality and loss causation. Like scienter, the arguments on both of these elements apply to all of the misrepresentations.

1. Materiality of Opinions of Third-Party KOLs

Defendants argue that "[t]here is no legal duty for a company to disclose the opinions of third parties. Rather, the duty to disclose is for facts and not opinions." (Motion to Dismiss at 11.) Plaintiff responds that because Recro chose to speak on the efficacy of IV Meloxicam in soft tissue procedures and the sufficiency of Recro's oversight controls, "Defendants were bound to discuss these issues in a manner that would not mislead investors as to potentially negative information within their possession." (Plaintiff's Opposition at 20.)

Defendants contend that even if the KOLs' opinions were material, Recro's public disclosure of all of its clinical data for both hard tissue and soft tissue procedures rendered the omissions not misleading. (Defendants' Supplemental Submission at 6.) Plaintiff responds that the disclosure **[*25]** of the clinical trial data is inadequate because "[n]o matter how many times investors review the clinical trial data, they are not able to discern from such disclosures that the Company's trusted KOLs, on whom [Recro] relied, had specifically told [Recro] that IV Meloxicam should not be used in soft tissue procedures." (Plaintiff's Supplemental Submission at 9.)

The questions of whether the KOLs' opinions were material, and relatedly, whether disclosure of the data underlying the KOLs' opinions rendered the statements regarding the efficacy of IV Meloxicam for use in soft-tissue procedures not misleading, are foundational to this case. If the KOLs' opinions were not material, or if the disclosure of the clinical data rendered the alleged omissions related to soft tissue efficacy not misleading, then there is no liability under Section 10(b). The Court concludes that, in the context of the statements made by Recro regarding the potential for IV Meloxicam to be used in soft tissue procedures, the KOLs' statements would have been considered significant by the reasonable investor, and that the statements still could have been misleading despite Recro's disclosure of the clinical data.

a. The KOLs' Opinions [*26] Were Material In the Context of Recro'sStatements

There is no requirement or general duty under the Exchange Act "to provide the public with all material information." *Burlington, 114 F.3d at 1432*; see also *Matrixx, 563 U.S. 27, 45, 131 S. Ct. 1309, 179 L. Ed. 2d 398 (2011)* ("Even with respect to information that a reasonable investor might consider material, companies can control what they have to disclose ... by controlling what they say to the market."); *Basic Inc. v. Levinson, 485 U.S. 224, 239 n.17, 108 S. Ct. 978, 99 L. Ed. 2d 194 (1988)* ("Silence, absent a duty to disclose, is not misleading under *Rule 10b-5*."). However, a duty to disclose "may arise when there is insider trading, a statute requiring disclosure, or an inaccurate, incomplete or misleading prior disclosure." *Oran v. Stafford, 226 F.3d 275, 285-86 (3d Cir. 2000)*. Plaintiff does not allege that there was insider trading or required disclosure here; Plaintiff's theory is that because Recro chose to speak on IV Meloxicam's efficacy and manufacturing, it was duty-bound to do so in a way that was not misleading. Because Recro chose to make representations regarding its manufacturing process and focus on the soft tissue market, it had an obligation to ensure that those representations were not materially misleading. *17 C.F.R. § 240.10b-5(b)*; see also *Williams v. Globus Med., Inc., 869 F.3d 235, 241 (3d Cir. 2017)* ("Once a company has chosen to speak on an issue—even an issue it had no independent obligation to address—it cannot omit material facts **[*27]** related to that issue so as to make its disclosure misleading."); *In re Urban Outfitters, Inc. Sec. Litig., 103 F. Supp. 3d 635, 652 (E.D. Pa. 2015)* (Restrepo, J.) ("By specifically pointing out ... areas of [the defendant's] business activities, [the] defendants put these topics 'in play' and triggered a duty to disclose and correct" prior disclosures).

The test for securities fraud materiality is whether there is "a substantial likelihood that the disclosure of the omitted fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available." *Matrixx, 563 U.S. at 38* (quoting *TSC Indus., Inc. v. Northway, Inc., 426 U.S. 438, 449, 96 S. Ct. 2126, 48 L. Ed. 2d 757 (1976))*. "An omitted fact is material if there is a substantial likelihood that, under all the circumstances, the omitted fact would have assumed actual significance in the deliberations of the reasonable shareholder." *Shapiro v. UJB Fin. Corp., 964 F.2d 272, 280 n.11 (3d Cir. 1992)* (quoting *TSC Industries, 426 U.S. at 449*).

Matrixx, the most recent Supreme Court decision to analyze Section 10(b)'s materiality requirement, is factually similar and procedurally on point. The question in Matrixx was whether the plaintiff sufficiently alleged the materiality of adverse event reports associated with the defendant's pharmaceutical product to survive the defendant's *Rule 12(b)(6)* challenge. *563 U.S. at 30*. Matrixx refused to endorse a bright line rule, concluding instead that "assessing the materiality **[*28]** of adverse event reports is a 'fact-specific' inquiry ... that requires consideration of the source, content, and context of the reports." *Id. at 43*. Applying this standard, the Supreme Court found that the plaintiff adequately pleaded materiality because the defendant represented that the product would multiply revenues, but it had received information that plausibly connected the same product to a negative effect. Id. at 47. The negative information that the company received included the reports of three medical experts summarizing cases of ten patients who experienced the side effect after using the product, and the fact that two professionals presented their findings of a causal link at a medical conference. Id. at 45.

Applying the rationale and holding of Matrixx indicates that materiality is sufficiently established for purposes of Defendants' Motion. Plaintiff pleaded that Recro spoke optimistically and positively about the use of IV Meloxicam for soft tissue uses—Recro spoke of intra-abdominal procedures (a soft tissue procedure) as a "target opportunity," (Am. Compl. ¶¶ 74, 77, 78, 81, 84, 85, 87, 88), and identified "GI/Colorectal" procedures (a soft tissue procedure) as a "core target." (Am. Compl. **[*29]** ¶¶ 81, 84, 85, 87, 88, 90, 94, 100.) Yet, according to the Amended Complaint, thirty percent of the KOLs expressed concern to Recro about the oversight of manufacturing of IV Meloxicam, and an undisclosed number of KOLs advised the company that in their view the clinical data showed that IV Meloxicam was not suited for use in soft tissue patients.

The FDA presumably used the same clinical data that the KOLs analyzed in considering Recro's NDA. Therefore, the fact that at least some of these esteemed medical professionals thought IV Meloxicam was not efficacious for soft tissue uses makes it plausible that the FDA would be concerned about efficacy as well—a fact that is highly relevant to investors, especially because IV Meloxicam is Recro's lead product. See id. at 47 (concluding materiality requirement was satisfied in large part because the defendant "had information indicating a significant risk to its leading revenue-generating product" but represented that the concerns were "completely unfounded"). Moreover, Recro did not conduct any further studies to explore the KOLs' concerns about IV Meloxicam efficacy. See id. (noting that despite evidence of a "biological link" between the product **[*30]** and a bad side effect, the company did not "conduct[] any studies of its own to disprove that link"). The parallels are clear and, as the Supreme Court did in Matrixx, this Court finds the allegations sufficient to establish materiality.

b. The Statements Could Be Misleading Despite Recro'sDisclosure of the Clinical Data Regarding IV Meloxicam

Since materiality is concerned with the "total mix" of information available to the investor, a statement or omission cannot be materially misleading "if the allegedly undisclosed facts have ... already entered the market." Anderson v. Stonemor Partners, L.P., 296 F. Supp. 3d 693, 702 (E.D. Pa. 2017) (Robreno, J.). Therefore, dismissal of a securities fraud complaint may be proper if the company adequately disclosed the information that allegedly made the statements misleading. See Winer Family Tr. v. Queen, No. Civ.A. 03-4318, 2004 U.S. Dist. LEXIS 19244, 2004 WL 2203709, at *4 (E.D. Pa. Sept. 27, 2004) (Padova, J.) ("A motion to dismiss may be granted if the company's SEC filings or other documents disclose the very information necessary to make their public statements not misleading.") (internal quotation marks and citations omitted). Two precedential Third Circuit opinions illustrate this proposition.

First, in Ieradi v. Mylan Laboratories, Inc., the Third Circuit affirmed dismissal of a securities fraud complaint where the defendant company **[*31]** disclosed the possibility of adverse agency action but did not disclose the underlying contractual documents related to the agency's investigation. 230 F.3d 594, 596 (3d Cir. 2000). In Ieradi, the defendant was under investigation by the Federal Trade Commission ("FTC") for suspected antitrust violations related to the existence of exclusive supply contracts and disclosed this fact in various SEC filings. Id. at 597. The FTC investigation resulted in the filing of civil charges, which led to a drop in the company's stock price. Id. at 597-98. A shareholder who purchased prior to the filing of the FTC's action sued alleging that "in commenting on the FTC investigation [the company] had a duty to disclose the existence and substance of its exclusive supply contracts ... so that ... reasonable investors could intelligently assess the risk that the FTC investigation would result in a civil antitrust action ...." Id. at 598-99. The Third Circuit affirmed the district court's conclusion that the failure to specifically disclose the exclusive supply contracts was not material, because the company unambiguously disclosed the fact of the FTC investigation. Id. at 599. On the question of whether disclosure of the exclusive supply contracts would have given a reasonable **[*32]** investor the ability to evaluate the risk of an FTC enforcement action, Ieradi "seriously doubt[ed] that 'the reasonable investor' possesse[d] the depth of ***antitrust law*** expertise that would allow him or her to conclude that the contracts were susceptible to successful attack under the antitrust laws." *Id. at 600*.

More recently, in Fan v. StoneMor Partners LP, the Third Circuit addressed the materiality of an alleged misrepresentation in light of the company's disclosure of "facts and information that would render the alleged misrepresentations not misleading." *927 F.3d 710, 716 (3d Cir. 2019)*. The issue in Fan was whether certain disclosures regarding the defendant's accounting practices were sufficient to render immaterial statements touting its financial health and ability to pay down a credit facility. *Id. at 715*. The defendant, which provided funeral services, was required by state law to hold a certain percentage of sales proceeds in trust until the death of the customer ("pre-need sales"). *Id. at 713*. This requirement resulted in a disparity between the defendant's overall sales and its accessible cash, because Generally Accepted Accounting Principles ("GAAP") do not permit pre-need sales to be reported as current revenue. Id. To compensate, **[*33]** the defendant issued standard GAAP financials and non-GAAP financials (which included the pre-need sales in the revenue calculation); and borrowed cash to distribute the pre-need sales to investors in the same quarter in which the sale occurred, using equity sales to pay down the borrowed cash. *Id. at 713, 714*. Fan held that the issuance of both GAAP and non-GAAP financials "render[ed] any ... perceived misstatement [regarding the fact that the defendant's distributions were not funded from operating revenue] immaterial" because they "demonstrated the mathematical reality" of the defendant's accounting practices. *Id. at 717*.

Ieradi and Fan reveal that disclosure of information that is typical to a public filing (e.g., knowledge of possible adverse agency action in Ieradi or the accounting statements in Fan) may render a company's failure to provide further disclosures immaterial. However, Ieradi's conclusion that "[k]nowledge that the FTC was engaging in an investigation ... was much more informative to the 'reasonable investor' than information pertaining to [the source of the FTC's concerns]" indicates there is a nuance to the analysis: the information that is disclosed must be accessible to the reasonable **[*34]** investor. *Ieradi, 230 F.3d at 600*.

Because of this nuance, the Court rejects Defendants' analogy to Fan. In Fan, the information that was disclosed (accounting statements) was presumably accessible to the reasonable investor who is fluent in financial metrics. By contrast, here the data that was disclosed was clinical data for the pain relief provided by IV Meloxicam in both soft tissue and hard tissue patients, which would be foreign to the average investor or anyone without a medical degree. Reviewing the clinical data "from the objective perspective of a reasonable investor," the Court is not convinced that the disclosure rendered the misrepresentations not misleading. *Fan, 927 F.3d at 716*; see also *In re Celgene Corp. Secs. Litig., Civil Action No. 18-4772, 2019 U.S. Dist. LEXIS 218141, 2019 WL 6909463, at *17 (D.N.J. Dec. 19, 2019)* (finding that defendant's failure to disclose discovery of an effect that would require further safety testing was materially misleading in light of existing disclosure of timeline for submitting NDA).

In summary, Defendants' materiality arguments do not persuade the Court. Assuming the allegations in the Amended Complaint to be true, it is "substantially likely that a reasonable investor would have viewed [the KOLs' opinions] as having significantly altered the 'total mix' of information made available." *Matrixx, 563 U.S. at 47* (internal quotation **[*35]** marks and citations omitted). The KOLs raised concerns about IV Meloxicam that could have significantly affected the likelihood of FDA approval, and because IV Meloxicam is Recro's lead product, investors would have considered the KOLs' feedback highly relevant. Recro's disclosure of the clinical data does not undermine this conclusion, because a reasonable investor cannot be expected to understand complex medical data. Plaintiff has pleaded materiality under Section 10(b).

2. Loss Causation

Defendants argue that Plaintiff has failed to adequately plead loss causation because "Plaintiff does not allege that any fraudulent statement or omission was the cause of the actual loss suffered." (Motion to Dismiss at 30.) Plaintiff responds that the drop in the price of Recro's stock following the May 24, 2018 press release establishes loss causation. (Plaintiff's Opposition at 27.) The Court concludes that because Plaintiff has adequately alleged a causal nexus between the misrepresentative omissions and the stock drop, loss causation has been pleaded.

Under the PSLRA, a securities fraud plaintiff bears "the burden of proving that the act or omission of the defendant ... caused the loss for which the plaintiff **[*36]** seeks to recover damages." *15 U.S.C. § 78u-4(b)(4)*. The PSLRA "makes clear Congress' intent to permit private securities fraud actions for recovery where, but only where, plaintiffs adequately allege and prove the traditional elements of causation and loss." *Dura, 544 U.S. at 346*. The loss causation inquiry is focused on "how directly the subject of the fraudulent statement caused the loss, and whether the resulting loss was a foreseeable outcome of the fraudulent statement." *Berckeley Inv. Grp., Ltd. v. Colkitt, 455 F.3d 195, 222 (3d Cir. 2006)*. Establishing loss causation requires that the plaintiff "demonstrate[] that the fraudulent misrepresentation actually caused the loss suffered." *Newton v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 259 F.3d 154, 173 (3d Cir. 2001)*.

The briefing on loss causation focuses on the fact that Plaintiff's loss resulted from Recro's May 24, 2018 press release announcing the CRL denying Recro's NDA for IV Meloxicam.[7] Although Defendants may be correct that this theory would not be enough, paragraph 124 of the Amended Complaint adequately alleges loss causation.

Paragraph 124 of the Amended Complaint alleges that

> Had Plaintiff and the other members of the Class known the truth, they would not have purchased or otherwise acquired [Recro's] securities, or would not have purchased or otherwise acquired them at the inflated prices that were paid. **[*37]** At the time of the purchases ..., the true value of Recro securities was substantially lower than the prices paid by Plaintiff and the other members of the Class. The market price of Recro securities declined sharply upon public disclosure of the facts alleged ... to the injury of Plaintiff and Class members.

Thus, prior to May 24, 2018, Recro's stock price was inflated because of the company's omissions and the injury to Plaintiff was realized when the facts that were allegedly fraudulently omitted were made known. Said differently, the market price for Recro's stock reflected the information that was publicly available at the time. Before May 24, 2018, Recro's stock price was artificially high because the market did not know of the concerns that had been raised by the KOLs. If Recro had not omitted the questions raised by the KOLs regarding IV Meloxicam's manufacturing and efficacy, the market price for Recro's securities would have reflected the extent to which these concerns affected the likelihood of FDA approval. On May 24, 2018, Recro announced the FDA's denial of the NDA, and explained that the CRL was concerned that "data from ad hoc analyses and selective secondary endpoints **[*38]** suggest that the analgesic effect does not meet the expectations of the FDA." (Am. Compl. ¶ 53.) The stock price dropped upon this disclosure, causing the injury that Plaintiff complains of.

This is sufficient to establish loss causation at the motion to dismiss stage. The Third Circuit has squarely held that "where the claimed loss involves the purchase of a security at a price that is inflated due to an alleged misrepresentation, there is a sufficient causal nexus between the loss and the alleged misrepresentation to satisfy the loss causation requirement." *Semerenko v. Cendant Corp., 223 F.3d 165, 184 (3d Cir. 2000)*. Paragraph 124 fits within the scope of this holding, because it alleges that Plaintiff purchased Recro's stock at a price that was artificially inflated due to the omissions, and that Plaintiff was injured by the stock price decline when the omitted information was subsequently disclosed. In other words, because Plaintiff alleges that "the price of [Recro's] security was inflated due to [the] fraudulent [omissions]," its burden on loss causation is met. *Berckeley, 455 F.3d at 222*.

Defendants argue that Plaintiff cannot plead loss causation because "the FDA denied Recro's NDA for IV [M]eloxicam for both soft tissue and hard tissue procedures, which demonstrates **[*39]** that there was no nexus between any opinions from the alleged KOLs about clinical data relating to soft tissue procedures and the FDA's

---

[7] The Court notes that there is an unsupported inferential leap in this theory of loss causation. As Plaintiff acknowledges, the stock drop occurred as a result of the FDA's denial of the NDA—not as a result of Recro's failure to publicly disclose the opinions of the KOLs. See Am. Compl. ¶ 55 ("Recro's share price was decimated as a result [of] the news [that the FDA decided to deny Recro's NDA for IV Meloxicam]."). Said differently, to make the loss causation theory that is briefed work, Plaintiff would need to connect Recro's allegedly misleading omissions to the stock drop. However, analyzing this theory in depth is unnecessary because, as discussed, Plaintiff alleges that the market price incorporated the omissions at the time of purchase.

denial of Recro's NDA relating to both soft tissue and hard tissue procedures." (Motion to Dismiss at 30.) However, because the Amended Complaint alleges that the market price for Recro stock was higher than it would have been absent the omission, the FDA's subsequent denial of approval for both uses does not defeat loss causation. The share price reflected the market's assessment of the value of Recro, which reflected the market's estimated likelihood of FDA approval for either use. Accepting all of Plaintiff's allegations as true, the omission increased the market's estimation of the likelihood of FDA approval for soft-tissue uses, and therefore the stock price. If the information had been disclosed, Plaintiff either would not have purchased or would have purchased at a lower price. In either scenario, the omission's effect on the stock price is independent of any effect that the likelihood of FDA approval for hard tissue procedure uses had on the stock price.

The Amended Complaint adequately pleads loss causation for purposes of Defendants' *Rule 12* challenge. **[*40]** However, Plaintiff will bear a heavy burden in proving this element—whether Plaintiff can ultimately establish loss causation is an entirely different question.

3. Scienter

Defendants argue that Plaintiff has not satisfied the PSLRA's "strong inference" standard for scienter allegations. (Motion to Dismiss at 25.) Plaintiff responds that the scienter requirement is satisfied because CW1 had firsthand knowledge of the views of the majority of the KOLs and provided those opinions to Recro and its management. (Plaintiff's Opposition at 24-25.)

The PSLRA requires that a securities fraud complaint plead facts that lead to a "strong inference" of scienter, *15 U.S.C. § 78u-4(b)(2)(A)*; that is, an intent "to deceive, manipulate, or defraud." *Tellabs, 551 U.S. at 313*. Scienter may include "either reckless or conscious behavior." *Avaya, 564 F.3d at 276* (quoting *In re Advanta, 180 F.3d 525, 534-35 (3d Cir. 1999))*. "A reckless statement is one involving not merely simple, or even inexcusable negligence, but an extreme departure from the standards of ordinary care, and which presents a danger of misleading buyers or sellers that is either known to the defendant or is so obvious that the actor must have been aware of it." *Id. at 276 n.42* (quoting *Advanta, 180 F.3d at 535*).

In Tellabs, the Supreme Court prescribed three rules for assessing scienter on a motion **[*41]** to dismiss. "First, faced with a *Rule 12(b)(6)* motion to dismiss a § 10(b) action, courts must, as with any motion to dismiss for failure to plead a claim on which relief can be granted, accept all factual allegations in the complaint as true." *Id. at 252*. "Second, courts must consider the complaint in its entirety, as well as other sources courts ordinarily examine when ruling on *Rule 12(b)(6)* motions to dismiss, in particular, documents incorporated into the complaint by reference, and matters of which a court may take judicial notice." Id. This includes documents that are "integral to or explicitly replied upon" in the complaint. *Burlington, 114 F.3d at 1426* (quoting *Shaw v. Dig. Equip. Corp., 82 F.3d 1194, 1220 (1st Cir. 1996)* (emphasis omitted)). "Third, in determining whether the pleaded facts give rise to a 'strong' inference of scienter, the court must take into account plausible opposing inferences." Id.

The pertinent inquiry is "whether all of the facts alleged, taken collectively, give rise to a strong inference of scienter, not whether any individual allegation, scrutinized in isolation, meets that standard." *Id. at 267-268*. In assessing scienter, courts must "consider plausible, nonculpable explanations for the defendant's conduct, as well as inferences favoring the plaintiff." *Id. at 323, 324*. To survive dismissal, the inference **[*42]** of scienter "must be cogent and compelling, thus strong in light of other explanations." *Id. at 324*. A showing of motive and opportunity, though not an independent route to scienter, may be relevant when considered along with the other allegations in the complaint. *Avaya, 564 F.3d at 277*; see also *Frater v. Hemispherx Biopharma, Inc., 996 F. Supp. 2d 335, 349 (E.D. Pa. 2014)* (Yohn, J.) ("While allegations relating to motive and opportunity may not independently support a finding of scienter, such considerations may amplify an inference of scienter as part of the holistic information available to the court.").

Plaintiff's allegations of scienter include the following:

- Defendants "knowingly or recklessly engaged in acts, transactions, practices and courses of business which operated as a fraud and deceit," (Am. Compl. ¶ 119);

• "By virtue of their positions at Recro, Defendants had actual knowledge of the materially false and misleading statements ... or, in the alternative, Defendants acted with reckless disregard for the truth in that they failed or refused to ascertain and disclose such facts as would reveal the materially false and misleading nature of the statements made, although such facts were readily available to Defendants," (Am. Compl. ¶ 121); and

• "[E]ach Defendant knew or recklessly **[*43]** disregarded that material facts were being misrepresented or omitted," (Am. Compl. ¶ 121.)

Plaintiff points to two facts that circumstantially demonstrate Defendants acted consciously or recklessly with respect to the misleading omissions: first, that the information concerning the KOLs' concerns was exposed to Defendants by someone who later became Plaintiff's confidential source (described in the Amended Complaint as "CW1"); and second, that the alleged misstatements involved Recro's lead product. (Plaintiff's Opposition at 25.)

The Court is unpersuaded by Plaintiff's theory that CW1's disclosures to Defendants of the KOLs' concerns are sufficient to establish scienter. The Third Circuit has explained that, where the defendants' purported knowledge comes from the disclosures of a confidential source, applying the PSLRA's particularity standard to the scienter element requires the court to "evaluat[e] the 'detail provided by the confidential sources, the sources' basis of knowledge, the reliability of the sources, the corroborative nature of other facts alleged, including from other sources, the coherence and plausibility of the allegations, and similar indicia.'" *Avaya, 564 F.3d at 263* (quoting *Cal. Pub. Emps.' Ret. Sys. v. Chubb Corp., 394 F.3d 126, 147 (3d Cir. 2004))*; see also **[*44]** *In re Cigna Corp. Sec. Litig., No. Civ. A. 02-8088, 2006 U.S. Dist. LEXIS 3864, 2006 WL 263631, at *2 (E.D. Pa. Jan. 31, 2006)* (Baylson, J.) ("[E]ven if personal sources must be identified in a complaint, there is no requirement that they be explicitly named, provided they are described with sufficient particularity to support the probability that a person in the position occupied by the source would possess the information alleged."). The weight that confidential source allegations are given depends on the degree to which they are particularized: if the allegations are inadequate with respect to these criteria, then they may be discounted "steeply," but if they are sufficiently specific, they should not be dismissed simply because they are anonymous. *Avaya, 564 F.3d at 263*.

Here, Plaintiff's description of CW1 permits the inference that CW1 had an adequate basis for his knowledge. Plaintiff explains that "CW1 was employed at [Recro] as the Regional Medical Affairs Director from June 2017 through September 2017, and the National Director of Medical Affairs from October 2017 through May 2018. CW1 was a member of Recro's Leadership Team. He led and coordinated medical conferences attended by KOLS ... During such conferences, CW1 frequently spoke with Recro's KOLs. CW1 also travelled to KOL facilities where he personally spoke with **[*45]** Recro's KOLs." (Am. Compl. ¶ 39.) Thus, Plaintiff has "adequately described the duration of ... [CW1's] employment, the time period during which [CW1] acquired the relevant information, and how [CW1] had access to [the] information." *Avaya, 564 F.3d at 263*.

However, the allegations related to CW1's communication of that information to Defendants are insufficient to create a "strong inference" that Defendants acted with scienter.

Plaintiff alleges that CW1 reported to Defendant McCallum (Recro's CMO), and that CW1 attended Recro's Leadership Team meetings "every few weeks." (Am. Compl. ¶ 40.) These meetings were attended by, among others, Defendant McCallum and Defendant Harlow. (Am. Compl. ¶ 40). Although Defendant Henwood did not generally attend, she received reports from McCallum and Harlow. (Am. Compl. ¶ 40.) It was presumably at the Leadership Team meetings that CW1 expressed the concerns he and the Medical Affairs Team had about the manufacturing of IV Meloxicam and the efficacy of the drug in soft tissue procedures.[8] Plaintiff alleges that "CW1 ... and his Medical Affairs Team reported at meetings to [Recro's] leadership that the KOLs had concerns about ...

---

[8] The Amended Complaint states that CW1 brought forth his concerns "at meetings to the Company's leadership." (Am. Compl. ¶ 42.) The Amended Complaint never explicitly states that these meetings were the same Leadership Team meetings described in paragraph 40 of the Amended Complaint. However, based on Plaintiff's representation in the opposition memorandum that CW1 "conveyed [his knowledge of the KOLs' concerns] to Defendants and other top executives at Leadership Team meetings," the Court assumes that the ambiguous "meetings" Plaintiff refers to were the Leadership Team meetings described elsewhere in the Amended Complaint. (Plaintiff's Opposition at 24 25.)

Sharr and his oversight of manufacturing in **[*46]** Ireland ... and the lack of robust data concerning IV [M]eloxicam's analgesic efficacy to convince soft tissue surgeons to use IV [M]eloxicam in soft tissue procedures." (Am. Compl. ¶ 42.) Plaintiff notes that "CW1 confirmed that [the KOLs'] concerns [regarding manufacturing] were provided to Henwood, McCallum, [and] Harlow." (Am. Compl. ¶ 67.)

The paragraphs cited above relating to CW1 do not meet the requirements of a "strong inference" of scienter because they lack many of the key requirements of particularized pleading. For example, Plaintiff merely alleges that these concerns were communicated at "Leadership Team meetings [that occurred] every few weeks"—Plaintiff does not specify when these meetings occurred, where they were held, or how often the concerns were communicated.[9] (Am. Compl. ¶ 40.)

Moreover, the Amended Complaint is deficient in describing what was conveyed to Recro and its management regarding the KOLs' concerns about IV Meloxicam's efficacy in soft tissue procedures.[10] There are two allegations that relate to the information CW1 provided to Defendants regarding the KOLs' efficacy concerns:

- "CW1 stated that he and his Medical Affairs Team reported at meetings to [Recro's] **[*47]** leadership that the KOLs had concerns about ... the lack of robust data concerning IV [M]eloxicam's analgesic efficacy to convince soft tissue surgeons to use IV [M]eloxicam in soft tissue procedures," (Am. Compl. ¶ 42); and

- "CW1 ... stated that Defendants knew that while 99.9% of KOLs were convinced that IV [M]eloxicam should be used in [hard tissue] procedures, Defendants also knew that KOLs stated that IV [M]eloxicam should not be used in soft tissue procedures because the clinical trial data for the efficacy of IV [M]eloxicam in hard tissue procedures ... was far more compelling than the clinical trial data for the drug's efficacy in soft tissue procedures," (Am. Compl. ¶ 69.)

These allegations are insufficient to establish exactly what was conveyed by CW1 to Recro and Defendants regarding the substance of the efficacy-related concerns raised by the KOLs. The extent to which the KOLs were concerned about the clinical data is unclear from the Amended Complaint. While Plaintiff alleges that "99.9% of KOLs" were convinced that IV Meloxicam was efficacious in hard tissue procedures, the Amended Complaint is silent on the percentage of Recro's 200-300 KOLs who expressed concerns **[*48]** about soft tissue efficacy. (Am. Compl. ¶ 69.) This is relevant because the more KOLs who raised questions, the more reckless a course of action that seemingly ignores these concerns; conversely, if only a small percentage of KOLs raised concerns, then Recro's representations regarding IV Meloxicam's efficacy may not have been reckless. The Court is unable to evaluate the strength of any competing inferences without understanding the specific substance of the concerns that CW1 conveyed to Recro and its leadership.

Additionally, the Amended Complaint is devoid of allegations that CW1 communicated to Recro that the KOLs' concerns about soft tissue efficacy were correlated with the likelihood of FDA approval. For example, while paragraph 61 of the Amended Complaint directly relates the KOLs' concerns regarding overseas manufacturing of

---

[9] The lack of information regarding the meetings at which CW1 communicated with the KOLs is important because the statements were made over a roughly one year period starting in July 2017 and ending in May 2018. Depending on when CW1 communicated the KOLs' concerns, the confidential source information may not bear on scienter at all for statements that were made prior to CW1's disclosures.

[10] Paragraphs 61 to 64 of the Amended Complaint lay out, in detail, the concerns that the KOLs brought to CW1 regarding foreign manufacturing. For example, Plaintiff alleges "CW1 stated that approximately 30% of KOLs expressed their concern to CW1 about IV [M]eloxicam being manufactured overseas" that was based, partially, on "their experience with foreign manufacturing of drugs." (Am. Compl. ¶¶ 61, 62.) The KOLs also conveyed to CW1 concerns regarding "Recro's level and quality of oversight of the manufacturing process." (Am. Compl. ¶ 63.) The Amended Complaint then alleges that "CW1 and CW1's Medical Affairs Team reported the KOLs' concerns regarding Sharr and foreign manufacturing of IV [M]eloxicam to Recro's top leadership," (Am. Compl. ¶ 67.) This level of detail is likely sufficient to establish the "what" for purposes of scienter. However, as discussed, the allegations regarding the concerns communicated to Recro about IV Meloxicam's efficacy in soft tissue procedures were far sparser, and because efficacy is the primary theory of omission, scienter is not adequately pleaded.

IV Meloxicam to the prospect of receiving FDA approval, see Am. Compl. ¶ 61 ("When CW1 spoke to KOLs about FDA approval 'the thing that kept coming back up over and over again ... the thing they were concerned about was a potential packaging issue or manufacturing issue because the manufacturer was in Ireland'"), there is no analogous paragraph relating **[*49]** the KOLs' concerns about soft tissue efficacy to the KOLs' concerns about the likelihood of FDA approval. The fact that an undisclosed number of KOLs expressed concerns about efficacy is not enough to establish that Defendants were "either reckless or conscious" as to the alleged omissions. *Avaya, 564 F.3d at 276*.

Finally, Plaintiff's allegations related to "the who" of the scienter analysis are lacking. Plaintiff alleges that CW1 communicated the KOLs' concerns to Defendant Henwood, Defendant McCallum, and Defendant Harlow. Significantly, there is no allegation that either Defendant Celano or Defendant Lake attended the meetings at which CW1 purportedly articulated the KOLs' efficacy concerns. Therefore, since Plaintiff's primary theory of scienter appears to be CW1's disclosures, there is no basis from which to conclude that either Celano or Lake acted consciously or recklessly with respect to the omissions. To the extent that Plaintiff relies on Celano and Lake's status as high level company executives to establish their scienter, that theory is unpersuasive. Although IV Meloxicam was Recro's key product and Celano and Lake held high level positions, Plaintiff suggests no reason why these executives—who **[*50]** served in financial roles—would have been aware of the KOLs' opinions regarding clinical data. See also *Egalet, 340 F. Supp. 3d at 512* ("[K]knowledge of [drug's] prospects for FDA approval in general is different from knowledge that [the drug] would or would not receive approval ....").

The two cases cited by Plaintiff to support the theory that the confidential witness information establishes scienter are distinguishable. In Aviva Partners LLC v. Exide Technologies, the plaintiffs successfully established scienter by reference to "information obtained from and corroborated by the confidential informants." *Civil Action No. 05-3098 (MLC), 2007 U.S. Dist. LEXIS 17347, 2007 WL 789083, at *18 (D.N.J. Mar. 13, 2007)*. Because the Aviva plaintiffs alleged thirteen very specific facts that the company "encountered during the class period, which were either brought to the individual defendants' attention or such that persons in their positions would have been aware of them," a strong inference of scienter was pleaded. *Id. 2007 U.S. Dist. LEXIS 17347, [WL] at *19*. As an initial matter, Aviva is distinguishable on the basis of the amount of the defendants' knowledge—there, the plaintiffs had pleaded very specific "detail[ed]" facts that the individual defendants knew, while here, the allegations are far vaguer. *Id. 2007 U.S. Dist. LEXIS 17347, [WL] at *18*. This case is also unlike Aviva because the only source of **[*51]** Defendants' alleged knowledge of potential inefficacy in IV Meloxicam is CW1's communication of the KOLs' concern. There is no independent corroboration, and the only allegation regarding a red flag is the information conveyed by CW1.

Similarly, in the second case cited by Plaintiff, In re Viropharma Inc. Securities Litigation, the "strong inference of scienter [was] supported by [the] [p]laintiff's several confidential witnesses, and the allegations [were] supported by documentation in the [c]omplaint." *21 F. Supp. 3d 458, 473 (E.D. Pa. 2014)* (Jones II, J.) (emphasis added). There were other facts alleged in the complaint that suggested scienter (including contradiction between the defendants' private information and public statements, allegations of stock sales, and facts establishing both motive and opportunity), and the confidential witness information simply provided corroboration. *Id. at 473-74*. By contrast, here the primary theory of scienter is the information provided by CW1; it is not corroborative of an allegation of independent knowledge.

Recro's disclosure of the clinical data is also relevant to scienter because it undermines Plaintiff's position that Defendants were acting with the intent to defraud investors about the **[*52]** likelihood of IV Meloxicam receiving FDA approval, at least as to the alleged omissions regarding IV Meloxicam's efficacy. Plaintiff alleges that the concerns of Recro's KOLs regarding IV Meloxicam's efficacy in soft tissue procedures came from the clinical data. (Am. Compl. ¶ 69.) However, this very same data was disclosed in Recro's public filings. (Motion to Dismiss at 20.)

The fact that the clinical data was available and could have been analyzed by a set of KOLs or other medical professionals hired by Plaintiff suggests that Recro did not mislead the market about IV Meloxicam's efficacy. The Court is not suggesting that there was an affirmative obligation on Plaintiff to independently analyze the clinical data. Rather, the fact that Plaintiff, or any other shareholder, could have conducted their own verification process is suggestive of a lack of opportunity and possibly lack of scienter. Cf. *Rahman v. Kid Brands, Inc., 736 F.3d 237, 245 (3d Cir. 2013)* ("It also is significant that [the plaintiff] did not demonstrate that the individual defendants had a motive for their wrongful conduct ... [because the] presence [of motive] can be persuasive when conducting a holistic review of the evidence."). Without a contrary explanation, the Court **[*53]** cannot ignore the inference that the disclosure of the clinical data points to—that Defendants did not have the intent to defraud the market regarding soft tissue efficacy, because if they had, they would not have disclosed the data.

Viewed "holistically," these allegations do not suggest a strong inference of scienter. *Tellabs, 551 U.S. at 326*. Without further detail as to exactly what CW1 communicated regarding the KOLs' efficacy concerns, and to whom, and when/how often, it is impossible to evaluate the plausibility of competing inferences, such as the possibility that the percentage of KOLs who expressed concerns was insignificant, or that further clinical study would alleviate the concerns, or that reasonable KOLs differed on the efficacy question. Said differently, the Court is unable to conclude that the scienter inference is at least as compelling as any competing inference from the "whole factual picture painted by the [Amended Complaint]." *Avaya, 564 F.3d at 269*. As a result, Plaintiff has not pleaded scienter with the particularity that is required by the PSLRA.[11]

F. Section 20(a) Claims

Because Plaintiff's Section 20(a) claims depend on the existence of an underlying violation of Section 10(b), and because the Court concludes that Plaintiff has not stated a **[*54]** claim under Section 10(b), it follows that the Section 20(a) claims necessarily fail. See, e.g., *City of Edinburgh Council v. Pfizer, Inc., 754 F.3d 159, 177 (3d Cir. 2014)* ("Because the [plaintiffs] have failed to adequately plead a predicate section 10(b) violation, their section 20(a) claim must be dismissed."). Therefore, Plaintiff's Section 20(a) claims, which are asserted against all five Individual Defendants in Count II, are dismissed without prejudice.

VII. Leave to Amend

Plaintiff requests that the Court grant leave to amend if the Motion to Dismiss is granted. (Plaintiff's Opposition at 28 n.22.) The Court will grant Plaintiff leave to amend to address the deficiencies identified in this Memorandum.

Rule 15 requires that a court "freely give leave when justice so requires." *Fed. R. Civ. P. 15(a)(2)*. The Third Circuit has made clear that leave to amend should be refused "only on the grounds of bad faith, undue delay, prejudice, or futility." *Alston v. Parker, 363 F.3d 229, 236 (3d Cir. 2004)*. Granting leave would be futile when "the complaint, as amended, would fail to state a claim upon which relief could be granted." *Burlington, 114 F.3d at 1434*. The court must apply *Rule 12(b)(6)*'s standard of legal sufficiency when analyzing futility. Id.

The Amended Complaint does not contain factual allegations that support a "strong inference" of scienter, which is why Defendants' Motion to Dismiss is granted. However, if Plaintiff can supplement **[*55]** the complaint with additional factual allegations related to scienter, it may survive another *Rule 12(b)(6)* challenge. Therefore, the Court is not convinced that amendment would be futile. Defendants contend that any amendment of the complaint would be futile because it would not "change the contents of Defendants' statements on which Plaintiff has based its claims, that all of the information purportedly omitted by Defendants was already public, or the forward-looking nature of many of the statements ...." (ECF 33, Defendants' Reply at 10.)

However, as discussed, the Amended Complaint is dismissed due to the insufficiency of the scienter allegations, and because Plaintiff may be able to adequately replead that element, it is not certain that amendment would be

---

[11] The allegations related to individual scienter are insufficient, and even assuming that the Third Circuit accepted the doctrine of corporate scienter, Plaintiff has not alleged facts that fit within the scope of that doctrine. Therefore, the Court will not analyze the scienter of Recro, a corporation.

futile. See, e.g., *Utesch v. Lannett Co., Inc., 316 F. Supp. 3d 895, 907 (E.D. Pa. 2018)* (Beetlestone, J.) ("Plaintiff will be given leave to amend to address the scienter pleading deficiency.").

VIII. Conclusion

Defendants' Motion to Dismiss the Amended Complaint is granted without prejudice because the Amended Complaint does not plead a "strong inference" of scienter as required by the PSLRA. Plaintiff may file a second amended complaint within fourteen days of this Memorandum.

An appropriate order follows. **[*56]**

ORDER RE MOTION TO DISMISS AMENDED COMPLAINT

AND NOW, this 14th day of February 2020, upon consideration of Defendants' Motion to Dismiss the Amended Complaint, (ECF 31), Plaintiff's Response in Opposition, (ECF 32), Defendants' Reply, (ECF 33), and the supplemental briefing, (ECF 41 (Plaintiff's Supplemental Memorandum); ECF 43 (Defendants' Supplemental Memorandum)), and for the reasons stated in the foregoing Memorandum, it is hereby **ORDERED** that Defendants' Motion is **GRANTED** and Plaintiff's Amended Complaint is **DISMISSED** without prejudice. Plaintiff may file a second amended complaint within fourteen days of this Order.

BY THE COURT:

/s/ Michael M. Baylson

MICHAEL M. BAYLSON

United States District Judge

Statements Issued During Fourth Quarter of 2017 (October 1, 2017–December 31, 2017)			
80	Press Release	Oct. 10, 2017	MALVERN, Pa., Oct. 10, 2017 (GLOBE NEWSWIRE) -- Recro Pharma, Inc. (Nasdaq:REPH), a revenue generating specialty pharmaceutical company focused on therapeutics for hospital and other acute care settings, today announced an oral presentation highlighting clinical efficacy data from its Phase III study evaluating intravenous (IV) meloxicam 30mg for the treatment of acute postoperative pain in patients following abdominoplasty surgery. The poster was presented at Plastic Surgery The Meeting 2017, hosted by the American Society of Plastic Surgeons (ASPS), taking place October 6-10, 2017, in Orlando, FL. The poster, which was selected as a "Top 6" of the meeting, describes the clinical performance of IV meloxicam 30mg, including achievement of the study's primary endpoint, a statistically significant difference in Summed Pain Intensity Difference (SPID) over the first 24 hours (SPID24) compared to placebo, along with detailed secondary endpoints. "The Phase III results presented this year at Plastic Surgery The Meeting demonstrate the efficacy of IV meloxicam 30mg, including significant reductions in pain, as evidenced by SPID24, meaningful reductions in opioid rescue use and improvements across numerous other pain relief metrics," said Stewart McCallum, M.D., F.A.C.S., Chief Medical Officer of Recro Pharma and co-author of the poster. "On the safety front, IV meloxicam 30mg continues to demonstrate a favorable safety and tolerability profile with a low incidence of adverse events (AEs), serious AEs and infusion events. ***We believe these results demonstrate IV meloxicam 30mg's ability to provide rapid and durable pain relief following abdominoplasty surgery and support its potential to be an attractive non-opioid alternative for physicians and patients for the treatment of acute, postoperative pain.***"
81	Investor presentation attached to Form 8-K	Oct. 11, 2017	*IV Meloxicam Target Opportunity* *Intra-abdominal Procedures* • Surgeons have keen interest in: Avoidance of opioids Avoidance of troughs in existing non-opioid pain med options • *If approved, could answer needs through:* *Relief of moderate to severe pain over 24 hours* *Reducing LOS* [length of stay] *** *Targeted Accounts Cover ~12.6M Patients Across All Settings Of Care* *Core Target Procedures* Orthopedic (Hip/Knee, Spine other) General Surgery *GI/Colorectal*
82	Form 10-Q	Nov. 9, 2017	Certification that the Q3 2017 10-Q ***"does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report."***

90	Investor presentation attached to Form 8-K	Feb. 7, 2018	Statement in sections titled "What We Have Learned: Market Research Feedback on Clinical Profile" and "IV Meloxicam Receptivity: Anticipated Usage" that *"In multiple market research surveys, the majority of HCP [health care professionals] surveyed said they would accept IV Meloxicam as a valuable addition upon approval to multimodal pain-management protocols. They estimated they would use the product in ~30% of their surgical cases."* The presentation also stated that *"core target procedures"* include *"GI/Colorectal"*.
91	Form 10-K	Mar. 2, 2018	Certification that the 2017 10-K *"does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report."*
92	Form 10-K	Mar. 2, 2018	Manufacturing and Supply of our Acute Care Product Candidates *We currently rely on contract manufacturers to produce drug product for our clinical studies under cGMPs [Current Good Manufacturing Practice regulations enforced by the FDA], with oversight by*

			our internal managers. We plan to continue to rely on contract manufacturers to manufacture development quantities of our product candidates, as well as commercial quantities of our product candidates, if and when approved for marketing by the FDA. We currently rely on a single manufacturer for the clinical supplies of our drug product for each of our product candidates and do not currently have agreements in place for redundant supply or a second source for any of our product candidates ….
93	Form 10-K	Mar. 2, 2018	Our Acute Care segment is primarily focused on developing innovative products for commercialization in hospital and other acute care settings. Our lead product candidate, IV meloxicam, has successfully completed three Phase III clinical trials, two pivotal efficacy trials, large double-blind Phase III safety trial and other safety studies for the management of moderate to severe pain. Overall, the total NDA program included over 1,400 patients. At the end of July 2017, we submitted an NDA to the FDA for IV meloxicam 30mg for the management of moderate to severe pain. The FDA has accepted the NDA for review and set a PDUFA date of May 26, 2018. ***Our Acute Care segment has no revenue and our costs consist primarily of expenses incurred in conducting our clinical trials and preclinical studies, manufacturing scale-up, regulatory activities, pre-commercialization of meloxicam and personnel costs.***
94	Investor presentation attached to Form 8-K	Mar. 9, 2018	Statement in regard to "***Defining Our Market***" that there is a "***Large Addressable Patient Opportunity***" of "***29 Million Patients***" for "***addressable procedures where [the] greatest IV meloxicam use is anticipated.***" It is anticipated that "***17%***" of these 29 million patients will have "***core procedures***" by "***gastrointestinal/colorectal surgeons***" involving the "***belly [and] bowel***". The presentation also stated that "***core target procedures***" include "***GI/Colorectal***".
95	Investor presentation attached to Form 8-K	Mar. 9, 2018	Statement with respect to "IV Meloxicam Receptivity: Anticipated Usage" that "***In multiple market research surveys, the majority of HCP [health care professionals] surveyed said they would accept IV Meloxicam as a valuable addition upon approval to multimodal pain-management protocols. They estimated they would use the product in ~30% of their surgical cases.***"
Statements During Second Quarter of 2018 (April 1, 2018–June 30, 2018)			
97	Form 10-Q	May 9, 2018	Certification that the Q1 2018 10-Q "***does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report.***"
98	Form 10-Q	May 9, 2018	Our Acute Care segment is primarily focused on developing and commercializing innovative products for hospital and related acute care settings. Our lead product candidate is a proprietary injectable form of meloxicam, a long-acting preferential COX-2 inhibitor. IV meloxicam has successfully completed three Phase III clinical trials for the management of moderate to severe pain, consisting of two pivotal efficacy trials and a large double-blind Phase III safety trial, as well as other safety studies. Overall, the total new drug application, or NDA, program included over 1,400 patients. In late July 2017, we submitted a NDA to the U.S. Food and Drug Administration, or FDA, for IV meloxicam 30mg for the management of moderate to severe pain. The FDA has accepted the NDA for review and set a date for decision on the NDA under the Prescription Drug User Fee Act, or PDUFA, of May 26, 2018. ***Our Acute Care segment has no revenue and our costs consist primarily of expenses incurred in conducting our clinical trials and preclinical studies, manufacturing scale-up, regulatory activities, pre-commercialization of meloxicam and personnel costs.***
99	Statement during earnings call	May 9, 2018	Given the increasing urgency of the national opioid crisis, we believe IV meloxicam has to potential to serve as a valuable analgesic alternative for healthcare institutions, physicians and patients. ***We believe, we've identified clear addressable segments of the market, that will benefit from IV meloxicam's profile. Segments in which we believe, IV meloxicam's profile provides both clinical and economic value.*** From a clinical standpoint, we believe IV meloxicam can effectively treat pain, while reducing opioid consumption, which reduced opioid related adverse events. From an economic standpoint, we believe IV meloxicam's durable 24-hour dosing profile will allow ambulatory surgical centers to perform more complex procedures with same date discharge, while managing pain. And hospitals to accelerate patients discharge and reduce length of stay through reduction of opioids. ***A pillar of our strategy is identifying the key surgeons specifically*** orthopedic surgeons, general surgeons and ***GI colorectal surgeons. The procedures conducted by these surgeons represent a primary opportunity both in ambulatory surgical centers and in hospitals.***
100	Investor presentation attached to Form 8-K	May 10, 2018	Statement in regard to "***Defining Our Market***" that there is a "***Large Addressable Patient Opportunity***" of "***29 Million Patients***" for "***addressable procedures where [the] greatest IV meloxicam use is anticipated.***" It is anticipated that "***17%***" of these 29 million patients will have "***core procedures***" by "***gastrointestinal/colorectal surgeons***" involving the "***belly [and] bowel***". Atakapa Indian De Creole Nation v. Louisiana

United States District Court for the Middle District of Louisiana

February 14, 2020, Decided; February 14, 2020, Filed

CIVIL ACTION NO. 19-28-SDD-EWD

Reporter
2020 U.S. Dist. LEXIS 57497 *; 2020 WL 1539856

ATAKAPA INDIAN DE CREOLE NATION VERSUS LOUISIANA, THROUGH THE GOVERNOR'S OFFICE OF INDIAN AFFAIRS, ET AL.

Subsequent History: Adopted by, Motion denied by, Dismissed by *Atakapa Indian De Creole Nation v. Trump, 2020 U.S. Dist. LEXIS 56081 (M.D. La., Mar. 31, 2020)*

Prior History: *Atakapa Indian De Creole Nation v. Edwards, 2019 U.S. Dist. LEXIS 8485 (M.D. La., Jan. 17, 2019)*

Core Terms

plaintiff's claim, motion for leave, frivolous claim, frivolous, proposed amended complaint, amended complaint, sanctions

Counsel: **[*1]** For Atakapa Indian de Creole Nation, Plaintiff: Edward Moses, Jr., LEAD ATTORNEY, Moses Law Firm, Baton Rouge, LA.

Judges: ERIN WILDER-DOOMES, UNITED STATES MAGISTRATE JUDGE.

Opinion by: ERIN WILDER-DOOMES

Opinion

MAGISTRATE JUDGE'S REPORT AND RECOMMENDATION

Before the Court is the Original Complaint[1] and Second Motion for Leave to File Supplemental and Amended Complaint,[2] filed by Edward Moses[3] ("Plaintiff"), individually and on behalf of the Atakapa Indian de Creole Nation ("Atakapa"). Following a hearing held pursuant to *Spears v. McCotter*,[4] and for the reasons set forth herein, the

[1] R. Doc. 1-2.

[2] R. Doc. 12.

[3] Throughout the pleadings, Plaintiff refers to himself as: "the CHRISTIAN EMPEROR D'ORLEANS," "his Majesty," and "the Trust Protector of the American-l'iberian Indian Tribe of Moses." *See, e.g.*, R. Doc. 1-2, pp. 1, 4, 46, 56-57.

[4] *766 F.2d 179 (5th Cir. 1985)*.

undersigned RECOMMENDS that Plaintiff's suit be dismissed with prejudice. Plaintiff's Motion for Leave to File Supplemental and Amended Complaint is denied.[5]

I. Background

On January 15, 2019, Plaintiff filed an Application for Emergency Temporary Restraining Order ("TRO") and Injunction[6] and Application for Writ of Habeas Corpus with Verified Complaint ("Complaint"), which allege violations of federal law, purportedly giving rise to federal question jurisdiction under *28 U.S.C. § 1331*.[7] Plaintiff's request for TRO and injunction were denied (the "January 17 Ruling).[8] On referral,[9] the undersigned held a hearing on January 29, 2019 to determine **[*2]** if this proceeding established grounds for habeas relief. Plaintiff appeared at the hearing and presented argument. Since Plaintiff failed to show that the Complaint established grounds for habeas relief, the matter was reclassified as seeking declaratory and injunctive relief. As a result, Plaintiff was ordered to either pay the required civil filing fee or seek leave to proceed *in forma pauperis.*[10]

Just prior to the January 29, 2019 hearing, Plaintiff filed his First Motion for Leave of Court to File Amended and Supplemental Complaint.[11] The proposed amended complaint was not comprehensive, and the undersigned explained to Plaintiff at the hearing that the First Motion for Leave was denied on that basis. Plaintiff was also advised that his allegations in the proposed amended complaint, which were intended to address the deficiencies noted in the January 17 Ruling with respect to the Court's exercise of personal jurisdiction over many of the defendants and subject matter jurisdiction, were still inadequate. Plaintiff was instructed to file a concise, comprehensive proposed amended complaint in compliance with *Fed. R. Civ. P. 8(a)*.[12]

---

[5] A motion for leave to amend is not among the motions expressly excluded from direct ruling by a magistrate judge under *28 U.S.C. § 636(b)(1)(A)*. Further, although the Fifth Circuit has not ruled on the issue, the weight of authority appears to be that motions for leave to amend are generally considered nondispositive in nature. *See, e.g., Bona Fide Demolition and Recovery, LLC v. Crosby Construction Co. of La., Inc., 07-3115, 2010 U.S. Dist. LEXIS 111782, 2010 WL 4176858, *1 (E.D. La. Oct. 20, 2010)*(collecting cases). Accordingly, the undersigned issues a Ruling on the Motion for Leave.

[6] R. Doc. 1.

[7] Although the Complaint purports to be verified by an affidavit wherein a "Notary Public" avers that Plaintiff personally appeared before the Notary, and after being duly sworn, stated: "That he is petitioner in the above and foregoing petition and that all of the allegations of fact contained therein are verified, true, and correct to the best of his information, knowledge and belief," the affidavit appears invalid because the Notary's signature is illegible, there is no notary stamp or seal, no notary number, and no identification of the state and parish/county under which the Notary is commissioned. *See* R. Doc. 1-2, p. 1. To the extent the affidavit does not attest that it is based on Plaintiff's personal knowledge, it also appears substantively deficient. *Charbonnet v. Malveaux, No. 15-799, 2017 U.S. Dist. LEXIS 25863, 2017 WL 740337 (M.D. La. Feb. 24, 2017) at *1* (to meet the *Fed. R. Civ. P. 56* standards for affidavits, verification must be based on an affiant's personal knowledge, and verification based on "knowledge, information and belief" is insufficient) (*quoting* ***Fowler v. S. Bell Tel. & Tel. Co., 343 F.2d 150, 154 (5th Cir. 1965))***.

[8] R. Doc. 1. As more fully set forth in the January 17, 2019 Ruling at R. Doc. 4, the Court denied Plaintiff's application for a TRO and injunction because Plaintiff failed to satisfy the four factors set forth in *Planned Parenthood Ass'n of Hidalgo Cnty. Tex., Inc. v. Suehs, 692 F.3d 343, 348 (5th Cir. 2012)* (citations omitted) and the two requirements of *Fed. R. Civ. P. 65(b)(1)*.

[9] R. Doc. 4.

[10] R. Doc. 8.

[11] R. Doc. 7.

[12] R. Doc. 8.

On March 1, 2019, Plaintiff filed a motion to proceed *in forma pauperis* ***[*3]*** , which was granted and a hearing set pursuant to *Spears v. McCotter*[13] ("*Spears* hearing") to determine if any or all of Plaintiff's claims were frivolous and subject to dismissal.[14] Just prior to the scheduled *Spears* hearing, Plaintiff filed his Second Motion for Leave of Court to File Amended and Supplemental Complaint ("Motion for Leave"), which included a 138-page proposed Amended Complaint ("Amended Complaint"), that reiterated many of the same claims asserted in the original Complaint.[15] The Amended Complaint also added claims for declaratory judgment and quiet title, among others, and again attempted to address the jurisdictional deficiencies. At the *Spears* hearing, Plaintiff presented argument regarding the basis for his claims. At the conclusion of the hearing, Plaintiff was advised that a report would be issued with the undersigned's recommendation as to whether Plaintiff's claims should be allowed to proceed.

II. Law and Analysis

Plaintiff, a Louisiana-licensed attorney, who (as the Fifth Circuit also found) styles himself as both a monarch and a deity, brings claims on his own behalf and on behalf of the Atakapa tribe. Plaintiff's original Complaint named approximately 180 local, **[*4]** national, and international individual and corporate defendants, including, for example: Mayor of Baton Rouge Sharon Weston Broome, Governor of Louisiana John Bel Edwards,[16] President of the United States Donald Trump, then Prime Minister of the United Kingdom Theresa May, the Crown Prince of Saudi Arabia, and Pope Francis, as well as Microsoft Corporation, Burger King, the Bank of China, and Facebook Inc.[17] (all collectively referred to herein as "Defendants"). Against these numerous Defendants, Plaintiff makes various, and often incomprehensible, allegations in his Complaint and proposed Amended Complaint on behalf of the Atakapa as its "Trust Protector"[18] including, without limitation, claims for tribal recognition[19] and a *Fed. R. Civ. P. 23* class action based upon Defendants' alleged global and "intergalactic" conspiracy to restrain trade in order to manipulate foreign currency rates on the foreign exchange market in violation of *Section 1 of the Sherman Act*, *15 U.S.C. § 1 et seq.*[20][21] Louisiana's ***antitrust law***, *La. R.S. 51:122 et seq.*, [22] and the *Civil Rights Act of 1871, 42 U.S.C. § 1983*.[23]

[13] *766 F.2d 179 (5th Cir. 1985)*.

[14] R. Doc. 11.

[15] R. Docs. 12 and 12-2. The Motion for Leave was referred to the undersigned.

[16] The defendants domiciled in Louisiana defeat diversity jurisdiction under *28 U.S.C. § 1332*.

[17] R. Doc. 1-2, pp. 4-26.

[18] *Id.* at pp. 4, 56.

[19] R. Doc. 1-2, pp. 56, 59, 61, 63-71.

[20] R. Doc. 1-2, pp. 3, 27-30, 47-48, *citing 15 U.S.C. § 1*. *See also* Plaintiff's discussion of "spot FX trade[s]," and "State Street Rules for WM/Reuters Rates" at R. Doc. 1-2, pp. 36-45, which purports to set forth the basis for Plaintiff's conspiracy claim alleging the manipulation of foreign exchange rates and governmental investigations thereof.

[21] Plaintiff sets forth a lengthy recitation of the alleged historical treatment of the Atakapa, the Freedman's Bank, the Compromise of 1877, the production of currency by the U.S. Dept. of the Treasury's Bureau of Engraving and Printing, and other matters. *See* R. Doc. 1-2, pp. 30-36. In connection with these statements, Plaintiff references the "Violation of Human Rights of [unspecified] American Aboriginals," the "Violation of *Civil Rights Act of 1871*..." and an "Essential Facilities" claim, but Plaintiff does not assert specific factual allegations alleging particularized harm in support of these claims. Rather, Plaintiff refers to these matters in order to explain the "urgency" for judicial action.

[22] R. Doc. 1-2, pp. 49-50, *citing La. R.S. 51:122*. "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce in this state is illegal."

A. The Fifth Circuit Previously Dismissed Plaintiff's Claims As Frivolous

In the January 17, 2019 Ruling, this Court specifically noted that Plaintiff previously **[*5]** asserted similar claims in the United States District Court for the Western District of Louisiana ("Western District").[24] The Western District ultimately disposed of all of Plaintiff's claims as precluded on sovereign immunity grounds.[25] Plaintiff appealed the various rulings in the Western District case disposing of his claims and motions, including motions for leave to file amended complaints and an application for a temporary restraining order,[26] to the United States Court of Appeals for the Fifth Circuit ("Fifth Circuit").[27]

On December 10, 2019, the Fifth Circuit affirmed the Western District's rulings on the alternate basis that "plaintiff's claims are frivolous and the district court lacked jurisdiction to entertain them."[28] Noting that Plaintiff's claims are "based on a gumbo of federal and state laws, including eighteenth-century federal treaties with France and Spain, as well as sources such as the 'Pactum De Singularis Caelum, [or] the Covenant of One Heaven,'" the Fifth Circuit held that, while the Western District dismissed on sovereign immunity grounds, "it need not go that far" to resolve **[*6]** the appeal because Plaintiff's claims were "entirely frivolous" such that the lower court lacked power to entertain them. According to the Fifth Circuit:

---

[23] *Id., citing* *42 U.S.C. § 1983*. Plaintiff's Complaint vaguely references additional claims. For example, Plaintiff also refers to "Trademark Infringement—Temporary Restraining Order" and "Fraud." R. Doc. 1-2, p. 51. However, Plaintiff has not asserted a claim for relief for any particular or actual trademark infringement or fraud in his Complaint, and the Court has already denied Plaintiff's application for a TRO. R. Doc. 4. Rather, Plaintiff only vaguely alleges that he owns the mark "and that he may be entitled to a TRO and injunction if anyone commences use of such mark in the future. Plaintiff also vaguely claims that the federal and state governments know that the Atakapa are indigenous peoples, and that the "transfer" of the Atakapa "into United States Citizenship, Louisiana Residency, or ward and under false names such as African-American, Colored, Black or negroes" was necessarily a fraud. R. Doc. 1-2, pp. 51-52.

[24] R. Doc. 4, p. 9, *citing Atakapa Indian de Creole Nation v. State of Louisiana et al*, No. 18-0190 (W.D. La. Feb. 14, 2018) and specifically, Judge Patrick Hanna's Report and Recommendation at *No. 18-0190, 2018 U.S. Dist. LEXIS 149544, 2018 WL 4222830 at *1 (W.D. La. July 23, 2019)*, *adopted* at *2018 U.S. Dist. LEXIS 149299, 2018 WL 4089385 (W.D. La. Aug. 27, 2018)*. Like this case, Plaintiff initiated proceedings in the Western District by filing a Petition for Writ of Habeas Corpus.

[25] *See* *No. 18-0190, 2018 U.S. Dist. LEXIS 149299, 2018 WL 4089385 (W.D. La. Aug. 27, 2018)* (adopting Report and Recommendation recommending dismissal of all of Plaintiff's claims for lack of subject matter jurisdiction due to the application of sovereign immunity); *No. 18-0190, 2019 U.S. Dist. LEXIS 5789, 2019 WL 660558, at *1 (W.D. La. Jan. 11, 2019)* (denying subsequently-filed application for TRO at R. Doc. 52 because Plaintiff "clearly failed to satisfy the first factor" for temporary injunctive relief, *i.e.*, a substantial likelihood of success on the merits); No. 18-0190, at R. Doc. 58, denying Plaintiff's Motion for Reconsideration/Motion for New Trial of the August 27, 2018 Ruling dismissing Plaintiff's claims with prejudice and also denying two motions for leave to amend complaint. Then, on March 5, 2019, monetary sanctions were imposed on Plaintiff for violating *Fed. R. Civ. P. 11* when Plaintiff based his application for a TRO on the same frivolous claims that had already rejected in the August 27, 2018 Ruling. *No. 18-0190, 2019 U.S. Dist. LEXIS 35596, 2019 WL 1050405, at **1-2 (W.D. La. Mar. 5, 2019)*.

[26] *Compare* R. Doc. 1 herein *with* R. Doc. 52 in No. 18-0190 (W.D. La.), which were filed 7 days apart on January 15, 2019 and January 8, 2019, respectively.

[27] *No. 18-0190, R. Doc. 57, 2019 U.S. Dist. LEXIS 5789 (W.D. La. Jan. 11, 2019)* (Notice of Appeal of Order denying TRO and injunctions) and R. Docs. 61-62 (W.D. La. Jan. 30, 2019) (Notice of Appeal and Amended Notice of Appeal on Judgment on Report and Recommendations, Order on Motion to Dismiss, and Orders on Motions to Amend and for New Trial).

[28] *Atakapa Indian de Creole Nation v. Louisiana, 943 F.3d 1004, 1005 (5th Cir. 2019)* *citing* *Southpark Square Ltd. v. City of Jackson, Miss., 565 F.2d 338, 344 (5th Cir. 1977)* ("We hold that the district court was without power to entertain this federal question case otherwise within its jurisdiction because the claim asserted is 'so attenuated and unsubstantial as to be absolutely devoid of merit'. *Newburyport Water Co. v. Newburyport, 193 U.S. 561, 579, 24 S.Ct. 553, 557, 48 L.Ed. 795 (1904)*. Lacking jurisdiction, the district court should have dismissed the action. *Fed.R.Civ.P. 12(h)(3)*.")

> Some claims are "so insubstantial, implausible, ... or otherwise completely devoid of merit as not to involve a federal controversy." *See* Oneida Indian Nation of N.Y. v. Oneida Cty., 414 U.S. 661, 666, 94 S.Ct. 772, 39 L.Ed.2d 73 (1974). Federal courts lack power to entertain these "wholly insubstantial and frivolous" claims. Southpark Square, 565 F.2d at 343-44. Determining whether a claim is "wholly insubstantial and frivolous" requires asking whether it is "obviously without merit" or whether the claim's "unsoundness so clearly results from the previous decisions of (the Supreme Court) as to foreclose the subject." Id. at 342.
>
> Unsurprisingly, we can find no Supreme Court precedent controlling or even addressing the plaintiff's exotic claims. We must therefore ask: are the claims "obviously without merit"? We say yes.
>
> The pleadings speak for themselves....[29]

In finding that Plaintiff's claims were frivolous, the Fifth Circuit considered the following: Plaintiff's references to himself as "his Majesty," "[T]he Christian King de Orleans," "[T]he God of the Earth Realm," the "Trust Protector of the American Indian Tribe of Moses," and by using the following Hebrew script "משה," all **[*7]** of which Plaintiff has used in this case.[30] The Fifth Circuit also considered Plaintiff's "bizarre" claims, including, for example, Plaintiff's allegations that the Atakapa are being held in "pupilage" by the United States and as "wards" of Louisiana, and that the United States and Louisiana seek to monopolize "intergalactic foreign trade," which Plaintiff has likewise asserted herein.[31] Next, the Fifth Circuit considered the relief sought, including for example, a "declaration of rights guaranteed ... by the 1795 Spanish Treaty with the Catholic Majesty of Spain and the 1800 French Treaty with the former Christian Majesty of France," which Plaintiff also references herein, [32] as well as the defendants Plaintiff named, *e.g.*, Secretary of the Interior Ryan Zinke, then Attorney General Jeff Sessions, King Felipe VI of Spain, Prime Minister Justin Trudeau of Canada, President Emmanuel Macron of France, Chancellor Angela Merkel of Germany, then Prime Minister Theresa May of the United Kingdom and Pope Francis, also named as defendants in this case.[33] The Fifth Circuit declined "to decipher what any of this means" because to do so "might suggest that these arguments have some colorable merit."[34] **[*8]** Instead, that Court held that federal question jurisdiction did not exist because Plaintiff did not present any non- frivolous claims based on the violation of federal law and, to the extent Plaintiff tried to assert various antitrust violations, such as the ones cited in this proceeding, Plaintiff so completely failed to allege any colorable basis for such violations that the courts should not have to adjudicate the claims.[35]

For the same reasons all of Plaintiff's claims asserted in this case, individually and on behalf of the Atakapa, are completely devoid of merit and should be dismissed. Likewise, the Motion for Leave,[36] which seeks to add additional frivolous claims similar to the ones already asserted, is denied.[37]

[34] Id. at 1007.

[35] *Id.*

[36] R. Doc. 12. Plaintiff's Motion for Leave also failed to comply with the Court's Order for Plaintiff to file a concise and focused proposed Amended Complaint that complies with Fed. R. Civ. P. 8. *See* R. Doc. 8.

[37] *And see, e.g.,* Kjellvander v. Citicorp, No. 93-2665, 156 F.R.D. 138, 141 (S.D. Tex. June 30, 1994) ("Leave to amend should be denied if the proposed claims are subject to dismissal or an amendment would be futile.").

B. Plaintiff Should Be Ordered to Show Cause If He Continues to Assert Frivolous Claims

Plaintiff is a Louisiana-licensed attorney who is admitted to practice in this Court and is thus required, by the Federal Rules of Civil Procedure, the Local Rules of this Court, and the Louisiana Rules of Professional Conduct, to refrain from asserting frivolous claims.[38] Plaintiff's conduct in asserting frivolous claims in this Court **[*9]** is in violation of *Fed. R. Civ. P. 11*, which provides, in pertinent part, that by presenting to the court a pleading, written motion, or other paper--whether by signing, filing, submitting, or later advocating it, an attorney certifies that to the best of his knowledge, information, and belief, formed after an inquiry reasonable under the circumstances: (1) it is not being presented for any improper purpose, such as to harass, cause unnecessary delay, or needlessly increase the cost of litigation; (2) the claims, defenses, and other legal contentions are warranted by existing law or by a nonfrivolous argument for extending, modifying, or reversing existing law or for establishing new law; and (3) the factual contentions have evidentiary support or, if specifically so identified, will likely have evidentiary support after a reasonable opportunity for further investigation or discovery. "[W]here a reasonable amount of research would have revealed to the attorney that there was no legal foundation for the position taken, *Rule 11* sanctions will be imposed."[39] Courts apply an objective (rather than subjective) standard of reasonableness in determining whether a party has violated *Rule 11*.[40]

On January 29, 2019, the Western District issued a Memorandum Order, admonishing Plaintiff for asserting the frivolous claims set forth in his application for a TRO,[41] which was filed after the case was closed and which re-alleged many of the same claims that the Western District had already dismissed. After a show cause hearing, sanctions of $ 2,500 were imposed against Plaintiff.[42] This information is pertinent because Plaintiff's Motion for Leave was filed in this Court *one week after the Western District imposed sanctions*[43] yet asserts some of the same frivolous claims upon which those sanctions were based.[44] Plaintiff is aware that his claims have been determined frivolous yet he continues to needlessly waste judicial resources by reurging them. As such, if Plaintiff continues to assert frivolous claims in this Court, Plaintiff should be ordered to show cause why *Fed. R. Civ. P. 11* sanctions should not issue.

III. Conclusion

Accordingly, for the reasons set forth herein, Plaintiff's Second Motion for Leave to File Amended and Supplemental Pleading is **DENIED.**[45]

---

[38] *Thibeaux v. Psychiatrist, No. 18-314, 2018 U.S. Dist. LEXIS 61497, 2018 WL 1734632, at *3 (M.D. La. March 29, 2018)* (holding that *pro se* litigants are held to less stringent standards than formal pleadings drafted by lawyers) (*citing Haines v. Kerner, 404 U.S. 519, 92 S.Ct. 594, 30 L.Ed.2d. 652 (1972)) and see Fed. R. Civ. P. 11* and Local Rule 83.

Opinion by: BRIAN C. WIMES

Opinion

ORDER

Before the Court is Defendant Shane Fairchild's separate motion for summary judgment (Doc. #638). The Court, being duly advised of the premises, grants the motion on Plaintiffs' claim for tortious interference, but otherwise denies the motion.

Plaintiffs InfoDeli, LLC, and Breht Burri as InfoDeli's sole shareholder, allege claims against Defendant Shane Fairchild, product manager for Defendant Ceva. Plaintiffs' claims stem from allegations **[*4]** that Fairchild, with knowledge that the working relationship between Plaintiffs and WRI was breaking down, feigned interest in negotiating with Plaintiffs a direct licensing agreement for the use of the InfoDeli software platform, for the improper purpose of providing compiled data to Defendant WRI and its contractor Defendant Engage Mobile Solutions, LLC. Plaintiffs assert that without Fairchild's provision of the data compilation from vectrarebate.com, WRI and Engage would not have been able to replicate the functionality of the software platform in the Ceva Webstore and Ceva Vectra Rebate website.

Fairchild's motion for summary judgment argues there is no genuine issue of material fact and he is entitled to judgment as a matter of law with respect to each of Plaintiffs' remaining claims against him.

LEGAL STANDARD

A party is entitled to summary judgment "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)* (citing *Fed. R. Civ. P. 56(c)*).

A party who moves for summary judgment bears the burden to establish that **[*5]** there is no genuine issue of material fact. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. When considering a motion for summary judgment, the court must evaluate the evidence in the light must favorable to the nonmoving party and the nonmoving party is entitled to "the benefit of all reasonable inferences." *Mirax Chem. Prods. Corp. v. First Interstate Commercial Corp., 950 F.2d 566, 569 (8th Cir. 1991)*.

UNCONTROVERTED FACTS

On September 9, 2019, an "Amended Final Judgment On All Claims" was entered in the Circuit Court of Jackson County, Missouri in the case captioned InfoDeli, LLC, et al. v. Western Robidoux, Inc., et al., Case No. 1616-CV09518. This final judgment states:

> [i]n accordance with the jury verdicts in this matter, judgment is entered on Plaintiff TooBaRoo LLC's claim of breach of joint venture in favor of Plaintiff TooBaRoo, LLC against Defendant Western Robidoux, Inc. for breach of joint venture agreement in the amount of $1,134,372.00.
>
> [. . .]
>
> [i]n accordance with the bench trial [that was] held in this matter, judgment is separately entered on Plaintiff Breht Burri's claim of minority shareholder oppression in favor of Defendants Brian Burri and Peter Burri and against Plaintiff Breht Burri.
>
> [. . . .]

Plaintiffs InfoDeli, LLC and Breht C. Burri had a working relationship with Defendant Western Robidoux, Inc. **[*6]** ("WRI") beginning in 2011 and continuing until March 11, 2014. Breht Burri opines the joint venture between Plaintiffs and WRI was breached in 2013 when Defendants Brian Burri and Peter Burri began receiving weekly salaries that were higher than Breht Burri's compensation.

On March 11, 2014, WRI's attorney emailed Breht Burri to say WRI had stopped using the InfoDeli software platform in connection with their fulfillment service contracts. The email also discussed the Terms of Use that Breht Burri had posted to the Ceva Lit Store.

On March 12, 2014, during a meeting among Defendants Brian Burri, Cindy Burri, and Fairchild, Cindy Burri indicated WRI was experiencing a "family issue" with Breht Burri. At the time of the meeting, Brian Burri and Cindy Burri were looking for a new resource to replace Breht Burri. Plaintiffs believe Fairchild was in on, and knew about, the plan to stop relying on Plaintiffs for web-based fulfillment services for WRI's customers at the time of this March 12, 2014 meeting, and as early as February 28, 2014.

On March 12, 2014, Plaintiffs and Fairchild began discussing the possibility and/or the option of a direct license for Ceva's use of the InfoDeli software **[*7]** platform.

On March 18, 2014, Fairchild requested from Plaintiffs the data compilation used with vectrarebate.com. The data requested included information about Ceva customers who had redeemed a rebate offer on vectrarebate.com, which operated in reliance on the InfoDeli software platform. Fairchild requested this data as a backup. Vectrarebate.com never had the InfoDeli Terms of Use posted to it. Instead, vectrarebate.com had a "Legal Notice and Terms of Use" page posted, which provided that all elements of vectrarebate.com are the exclusive property of Ceva. Plaintiffs inadvertently posted this notice, instead of the Terms of Use, to vectrarebate.com.

Plaintiffs posted the Terms of Use to the Ceva Lit Store on March 11, 2014. These terms required users to acknowledge Plaintiffs' rights in the website and software. Fairchild, on at least three occasions, acknowledged the Terms of Use in connection with use of the Ceva Lit Store. Fairchild was thus aware of the Terms of Use and knew vectrarebate.com relied on the InfoDeli software platform because he had requested vectrarebate.com be designed that way.

On March 19, 2014, Cindy Burri sent an email discussing the working relationship between **[*8]** Cindy Burri on behalf of WRI, and Fairchild on behalf of Ceva. The email mentioned Ceva's continuing fulfillment contract with WRI.

On March 20, 2014, Plaintiffs provided the data to Fairchild on a thumb drive; however, Defendants believe that data provided is not the entirety of that which Fairchild requested.

Breht Burri stated he gave the data to Fairchild because he believed Fairchild was bound by the Terms of Use. Fairchild requested the data as a backup for vectrarebate.com on the basis that the data was Ceva's property.

Plaintiffs did not tell Fairchild at the time that the data was provided in reliance on the Terms of Use.

Defendants used the data requested by Fairchild and provided by Plaintiffs on a thumb drive to make the new vectrarebate website. Fairchild did not get the data on which the new vectrarebate website is based from logging into the Ceva Lit Store or vectrarebate.com.

Plaintiffs asserts its software platform was damaged through the entry of "dummy" orders, that were subsequently deleted. There is no evidence Fairchild entered or deleted any of these dummy orders.

ANALYSIS

Consistent with the Court's previous rulings, the following claims remain against Fairchild: (1) **[*9]** tortious interference with a contract or business expectancy; (2) breach of the InfoDeli Terms of Use; (3) violation of the Computer Fraud and Abuse Act; and (4) civil conspiracy. Fairchild argues there is no genuine issue of material fact and he is entitled to judgment as a matter of law with respect to each of these claims as set forth in Counts IV, VIII, X, and XII of the second amended complaint. (Doc. #287).

A. Fairchild's motion for summary judgment on Plaintiffs' Count IV for tortiousinterference with a contract or business expectancy is granted.

Fairchild argues he is entitled to summary judgment because Plaintiffs' claim for tortious interference is preempted, Plaintiffs cannot demonstrate Fairchild induced a breach, and Plaintiffs are judicially estopped from asserting they are the party in interest in the joint venture, as opposed to Toobaroo.

To demonstrate a claim of tortious interference, a plaintiff must demonstrate (i) the existence of a contract or business expectancy; (ii) the defendant's knowledge of the contract or expectancy; (iii) breach of the contract or business expectancy that was induced by the defendant's intentional interference; (iv) the absence of justification; **[*10]** and (v) damages. *Fabricor, Inc. v. E.I. DuPont Denemours & Co., 24 S.W.3d 82, 93 (Mo. Ct. App. 2000)*.

In this case, the business expectancy at issue is the "joint venture," which a jury in state court found to exist between Plaintiffs' predecessor company Toobaroo and WRI. Further, based on the record, Fairchild was aware of the relationship. However, with respect to the third element of a claim for tortious interference, Plaintiffs cannot show that breach of the joint venture was induced by Fairchild's intentional interference. To the contrary, the uncontroverted facts establish Plaintiffs' position that the joint venture was breached in 2013 when Breht Burri began receiving less money than his brothers.

Regarding the third element, Plaintiffs must demonstrate that Fairchild took affirmative steps to induce a breach, and that without Fairchild's interference, the joint venture would not have ended. *Hensen v. Truman Med. Ctr., 62 S.W.3d 549, 555 (Mo. Ct. App. 2001)*.

With all reasonable inferences drawn in Plaintiffs' favor, the joint venture was already breached in 2013 when Brian Burri received more money than Breht Burri. Further, under the uncontroverted facts, Plaintiffs posted the Terms of Use on March 11, 2014, thus demonstrating Plaintiffs' belief that the joint venture was over. Fairchild heard that WRI was dealing with a **[*11]** family issue on March 12, 2014. Therefore, Plaintiffs cannot demonstrate that but for Fairchild's conduct, the joint venture would not have been breached. Fairchild is entitled to summary judgment on this claim.

B. Fairchild's motion for summary judgment on Plaintiffs' Count VIII forbreach of the Terms of Use is denied.

Fairchild argues he is entitled to summary judgment on Plaintiffs' claim for violation of the Terms of Use ("the Terms") posted on March 11, 2014 for the same reasons that Ceva asserts it is entitled to summary judgment on this claim. (Doc. #637). Fairchild asserts the Terms are an unlawful restraint of trade because they improperly limit competition by preventing anyone besides Plaintiffs from duplicating the Platforms' functionality.

InfoDeli alleges (1) Fairchild was an active user of the Platforms and accepted the terms of use in the course of his employment; (2) the Terms to which Fairchild agreed to the following

> [n]ot to reverse engineer, copy, download, reproduce, distribute, duplicate functionality, create derivative works or adaptations of, publicly display or in any way exploit any part of the [Platforms], or content in whole or in part except as expressly authorized **[*12]** in writing by InfoDeli. Users further waive any right of 'fair use' as that phrase is interpreted and denied under U.S. Copyright law and agree to limit their use of the site to the purposes intended. InfoDeli does not grant any express or implied rights in [the Platforms] to Users, and all rights in and to the Site and to [the Platform], software, or Content are retained and reserved by InfoDeli;

(3) Fairchild materially breached the Terms by assisting WRI in copying protectable aspects of the Platform; (4) InfoDeli incurred damage as a proximate result of Fairchild's conduct for which they are entitled to compensatory and economic damages. (Doc. #287). Fairchild argues he is entitled to summary judgment because InfoDeli cannot show that the Terms are an enforceable contract.

A claim for breach of contract requires the plaintiff to establish the following: (1) an enforceable contract exists; (2) mutual obligations under the contract; (3) failure to perform a specified obligation; and (4) damages. *Superior Ins. Co. v. Univ. Underwriters Ins. Co., 62 S.W.3d 110, 118 (Mo. Ct. App. 2001)* (citing *Trimble v. Pracna, 51 S.W.3d 481, 506 (Mo. Ct. App. 2001))*.

Electronic agreements are subject to "traditional principles of contract law and focus on whether the plaintiff had reasonable notice of and manifested assent to the online agreement." **[*13]** *Ramsey v. H&R Block Inc., Case No. 18-00933-CV-W-ODS, 2019 U.S. Dist. LEXIS 79876, 2019 WL 2090691, at *3 (W.D. Mo. May 13, 2019)* (citing *Major v. McCallister, 302 S.W.3d 227, 229 (Mo. Ct. App. 2009))*.

The relevant inquiry is whether the user had reasonable notice of the terms and "manifested assent" by clicking a box or button. Id. The type of electronic agreement that includes an affirmative step, like clicking "I agree," is referred to as a "clickwrap agreement" and is generally enforceable. Id. (collecting cases).

"[E]very contract, combination or conspiracy in restraint of trade or commerce in [Missouri] is unlawful." *Mo. Rev. Stat. § 416.031.1*. "*Sections 416.011 to 416.161* shall be construed in harmony with ruling judicial interpretations of comparable federal antitrust statutes." *Mo. Rev. Stat. § 416.141*.

Under federal ***antitrust law***, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. "To demonstrate a violation of *section 1* of the Sherman Act, a plaintiff must provide proof of an illegal contract, combination, or conspiracy which results in an unreasonable restraint of trade." *Double D Spotting Serv., Inc. v. Supervalu, Inc., 136 F.3d 554, 558 (8th Cir. 1998)* (citing *State Oil Co. v. Khan, 522 U.S. 3, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*.

Certain practices, like "price-fixing, division of markets, group boycotts, and tying arrangements" are illegal per se. *Double D Spotting Serv., 136 F.3d at 558* (citing *Arizona v. Maricopa Cnty. Med. Soc., 457 U.S. 332, 344 n.15, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)* (*N. Pac. Ry. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958))*. In the absence of such circumstances, courts apply **[*14]** a "rule of reason" analysis, "according to which the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition." *Double D Spotting Serv., 136 F.3d at 558*. This "analysis involves an inquiry into the market power and the defendant's market structure in order to assess the actual effect of the restraint," which necessarily requires the plaintiff to identify "a valid relevant market." *Double D Spotting Serv., 136 F.3d at 560* (citing *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*; *Flegel v. Christian Hosp., Ne.-Nw., 4 F.3d 682, 688 (8th Cir. 1993))*.

In the antitrust context, the relevant market consists of (1) the product market; and (2) the geographical market. *Bathke v. Casey's Gen. Stores, Inc., 64 F.3d 340, 345 (8th Cir. 1995)* (citing Flegel, 4 F.3d at 345. The product market covers "all reasonably interchangeable products." *Double D Spotting Serv., 136 F.3d at 560* (citing *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)*, cert. denied, *523 U.S. 1059, 118 S. Ct. 1385, 140 L. Ed. 2d 645 (1998))*. The geographic market is "the market area in which the seller operates." Id. (citing *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*; *Bathke, 64 F.3d at 345*).

In this case, the Terms are properly categorized as a clickwrap agreement, in that in order to use the platforms, the user had to agree to the Terms that are "reasonably communicated." *TradeComet.com LLC v. Google, Inc., 693 F. Supp. 2d 370, 377 (S.D.N.Y. Mar. 5, 2010)* (citing *Register.com, Inc. v. Verio, Inc., 356 F.3d 393, 429 (2d Cir. 2004))*.

Fairchild argues he is entitled to summary judgment on this claim for breach of the Terms because the provision against duplicating the Platform's functionality is an unlawful restraint of trade. InfoDeli counters the Terms do not contain an unlawful restraint on trade and are enforceable **[*15]** in reliance on *Davidson & Associates v. Jung, 422 F.3d 630 (8th Cir. 2005)*.

In Davidson & Associates, the Eighth Circuit held, in affirming summary judgment for the plaintiffs in that case that "private parties are free to contractually forego the limited ability to reverse engineer a software product under the exemptions of the Copyright Act, and a state can permit parties to contract away a fair use defense or to agree not to engage in uses of copyrighted material that are permitted by the copyright law if the contract is freely negotiated." Id. (citing *Bowers v. Baystate Techs, Inc., 320 F.3d 1317, 1325-26 (Fed. Cir. 2003)*; *Nat'l Car Rental Sys., Inc. v. Computer Assocs. Intern, Inc., 991 F.2d 426, 434 (8th Cir. 1993))*. The Eighth Circuit thus concluded, in the context of the facts of that case, that in accepting the terms of use for the relevant software, the defendants had expressly agreed not to reverse engineer. *Davidson & Assocs., 422 F.3d at 639*.

Under the circumstances of this case, the Court finds Davidson persuasive. Although undisputed that Plaintiffs posted the Terms without notifying Fairchild or any other defendant of their intent to do so, Fairchild accepted the Terms of Use by accessing the Platforms after March 11, 2014 on at least a handful of occasions. Whether Fairchild breached the Terms depends on the factual circumstances surrounding Ceva's arrangement with WRI, and in turn, WRI's arrangement with Plaintiffs as agreed. **[*16]** In light of the remaining factual disputes presented by the record, the Court declines to find the Terms an unreasonable restraint of trade. Fairchild's motion for summary judgment on Plaintiffs' claim for breach of Terms of Use is denied.

C. Fairchild's motion for summary judgment on Plaintiffs' Count X for violationof the CFAA is denied.

Fairchild argues he is entitled to summary judgment for violation of the CFAA because Plaintiffs cannot establish cognizable damages or any access in excess of authorization. Fairchild further argues the record does not demonstrate that he accessed the InfoDeli software platforms in violation of the CFAA.

The Computer Fraud and Abuse Act provides a private cause of action to individuals damaged by computer fraud. *Lasco Foods, Inc. v. Hall & Shaw Sales, Mtkg. & Consulting, LLC, 600 F. Supp. 2d 1045, 1050 (E.D. Mo. 2009)* (citing *18 U.S.C. § 1030(g)*).

> Any person who suffers damage or loss by reason of a violation of this section may maintain a civil action against the violator to obtain compensatory damages and injunctive relief or other equitable relief. A civil action for a violation of this section may be brought only if the conduct involves 1 of the factors set forth in subclauses (I), (II), (III), (IV), or (V) of subsection (c)(4)(A)(i). [. . . .]

18 U.S.C. § 1030(g).

"[T]he factors set forth in subclauses . . . of **[*17]** subsection (c)(4)(A)(i)" are as follows:

> (I) loss to 1 or more persons during any 1-year period . . . aggregating at least $ 5,000 in value;

(II) the modification or impairment, or potential modification or impairment, of the medical examination, diagnosis, treatment, or care of 1 or more individuals;
(III) physical injury to any person;
(IV) a threat to public health or safety;
(V) damage affecting a computer used by or for an entity of the United States Government . . . .

18 U.S.C. § 1030(c)(4)(A)(i)(I)-(V). Under the circumstances presented in this case, Plaintiffs' claim under the CFAA must arise under subsection (I) because the predicate facts do not establish any of the other possible factors set forth in subsections (II)-(V). Thus, the issue is whether, with all reasonable factual inferences drawn in Plaintiffs' favor, Fairchild is entitled to summary judgment on Plaintiffs' claim that Fairchild's conduct in violation of the CFAA resulted in loss, totaling at least $ 5,000 in value, to at least one person during any one-year period.

A claim under this section of the CFAA requires a plaintiff to demonstrate that the defendant (1) accessed a protected computer, (2) without authorization or exceeding authorized access; and (3) caused a loss in excess of $ 5,000. 18 U.S.C. §§ 1030(a)(4), 1030(c)(4)(A)(i)(I). With respect **[*18]** to the element of authorization, the CFAA defines "exceeds authorized access" as "access to a computer with authorization and to use such access to obtain or alter information in the computer that the accesser is not entitled to obtain or alter." 18 U.S.C. § 1030(e)(6). Otherwise, the CFAA, does not define "access" or "without authorization," and the Eighth Circuit has not definitely stated whether "without authorization" under the CFAA includes authorized access for an improper purpose. Porters Bldg. Ctrs., Inc. v. Sprint Lumber, Case No. 16-06055-CV-SJ-ODS, 2017 U.S. Dist. LEXIS 162139, 2017 WL 44113288, at *2 (W.D. Mo. Oct. 2, 2017) (collecting cases).

Persuasive authority on the confines of acting "without authorization" under the CFAA is also unsettled. Some courts have found that an employee who is authorized to access certain information or data acts "without authorization" under the CFAA when he or she "acquires adverse interest or if he is otherwise guilty of a serious breach of loyalty" relative to the authorizing party. Id. (citing Int'l Airport Ctrs., LLC v. Citrin, 440 F.3d 418, 421 (7th Cir. 2006); (United States v. Rodriguez, 628 F.3d 1258, 1263-64 (11th Cir. 2010; P.C. Yonkers, Inc. v. Celebrations the Party & Seasonal Superstore LLC, 428 F.3d 504, 510-11 (3d Cir. 2005). According to the narrower view, however, a CFAA violation based on access "without authorization" cannot apply to anyone to whom authorization has been previously given for a specific purpose; rather, this "without authorization" **[*19]** applies to the conduct of outsiders, like hackers. WEC Carolina Energy Sols, LLC v. Miller, 687 F.3d 199, 203-07 (4th Cir. 2012); LVRC Holdings LLC v. Brekka, 581 F.3d 1127, 1132-35 (9th Cir. 2009).

In the context of Fairchild's motion for summary judgment, the Court concludes the best course is to adopt the broader view that the CFAA might impose liability under circumstances where access to a protected computer is authorized for one purpose, but the defendant uses that access for an unauthorized purpose. Under the uncontroverted facts, Fairchild accessed the platforms after Plaintiffs posted the Terms and also used the thumb drive data in a manner inconsistent with that contemplated by Plaintiffs. Under the applicable standard for summary judgment, genuine issues of material fact relating to the issue of authorization remain in dispute. With respect to the issue of loss, the Court finds this issue is best resolved by the jury after presentation of expert witness testimony. Fairchild's motion for summary judgment under the CFAA is denied.

D. Fairchild's motion for summary judgment on Plaintiffs' Count XII for civilconspiracy is denied.

Fairchild argues he is entitled to summary judgment on Plaintiffs' Count XII for civil conspiracy because the claim is not an independent tort, and the uncontroverted facts do not demonstrate **[*20]** a meeting of the minds among any of the defendants.

A claim of civil conspiracy in Missouri requires the plaintiff to prove: (1) two or more persons; (2) acting with an unlawful objective; (3) after a meeting of the minds; (4) committed an act in furtherance of a conspiracy; and (5) resulting damages. W. Blue Print Co. LLC v. Roberts, 367 S.W.3d 7, 22 (Mo. 2012).

While a claim for civil conspiracy requires an underlying tortious act, as set forth above, Fairchild is not entitled to summary judgment on each of the remaining claims against him. Id. Because genuine issues of material fact preclude summary judgment for Fairchild on all of Plaintiffs' remaining claims, the record presents at least one underlying tortious act to which a claim for civil conspiracy might attach. The motion for summary judgment is thus denied on this point.

Fairchild next argues the record does not establish a meeting of the minds. However, the record presents sufficient evidence of association among the defendants in this case that, with all reasonable factual inferences drawn in Plaintiffs' favor, Fairchild is not entitled to judgment as a matter of law on the civil conspiracy claim. *Lyn-Flex W., Inc. v. Dieckhaus, 24 S.W.3d 693, 700 01 (Mo. Ct. App. 1999)* (the underlying tort "may include individuals associating for the purpose of causing **[*21]** or inducing a breach or business expectancy"); *Envirotech, Inc. v. Thomas, 259 S.W.3d 577, 586 (Mo. Ct. App. 2008)*. Accordingly, it is hereby

ORDERED Fairchild's motion for summary judgment (Doc. #638) is GRANTED IN PART and DENIED IN PART. The motion is granted on Plaintiffs' Count IV for tortious interference. The motion is denied on Plaintiffs' Count VIII for breach of contract, Count X for violation of the CFAA, and Count XII for civil conspiracy.

IT IS SO ORDERED.

Opinion

MEMORANDUM

Schiller, J.

On February 14, 2020, this Court denied Certain Defendants' motion in limine to preclude testimony and other evidence regarding Defendants' Supply Control Plan at trial. This memorandum explains the Court's reasoning.

I. BACKGROUND

Plaintiffs have accused certain players in the market for fresh agaricus mushrooms of violating ***antitrust law***. Plaintiffs claim that Defendants incurred antitrust liability in three ways. First, Plaintiffs accuse Defendants of conspiring to set the price at which mushroom distributors would sell to buyers. Second, Plaintiffs accuse

Defendants of bid rigging reverse internet auctions in which supermarkets select mushroom **[*8]** providers to supply them with mushrooms. Finally, and most importantly here, Plaintiffs accuse Defendants of engaging in a "Supply Control Plan" whereby Defendants conspired to buy mushroom farms and place deed restrictions on them to prevent future mushroom growing, thus reducing the overall mushroom supply. According to Plaintiffs, the combined effect of this conduct inflated the price of fresh agaricus mushrooms above competitive levels, leading Plaintiffs to pay inflated prices.

Plaintiffs support the claim that Defendants' actions resulted in overcharge with a report by Dr. Keith Leffler. The Court has previously outlined Dr. Leffler's qualifications and the particulars of his analysis, which "are based on two multi-variable regression analyses, one for each opt-out plaintiff, which attempt to isolate and quantify the impact caused by and damages resulting from defendants' policies on mushroom prices." *In re Mushroom Direct Purchaser Antitrust Litig., Civ. A. No. 06-0620, 2015 U.S. Dist. LEXIS 119446, 2015 WL 5775600, at *1 (E.D. Pa. Aug. 5, 2015)*. What is important for the purpose of the instant motion is this: Dr. Leffler did not analyze the effect of Defendants' alleged Supply Control Plan on the price Plaintiffs paid for mushrooms.

In his analysis, Dr. Leffler did not include a variable to account for farm closure, a choice **[*9]** he justified by claiming that the mushroom farm closures occurring during the relevant time period were endogenous to other control variables. (Mot. to Preclude, Ex. C. 78:24-80:3 and Ex. D. 44:25-45:6.) As a result, Dr. Leffler's calculations do not show how much, if at all, Defendants' Supply Control Plan impacted the price of fresh agaricus mushrooms. (Rebuttal Expert Report of Keith B. Leffler, Ph.D. on Behalf of Public Supermarkets, Inc. and Giant Eagle Inc. [Rebuttal Report] at ¶ 6 n.6) ("[I] did not specifically estimate any overcharge from EMMC's purchase-deed restriction actions."); (*id.*) ("[I] have estimated no separate impact of the purchase-deed restriction conduct.") Because Plaintiffs have not made the Court aware of any other evidence tending to prove, through any sort of analysis, the effect of the Supply Control Plan on the price of fresh agaricus mushrooms, for the purpose of this motion, the Court finds that Plaintiffs have not shown that the Supply Control Plan resulted in overcharge.

Here, Defendants ask the Court to conclude that, because Plaintiffs cannot show that the Supply Control Plan resulted in overcharge, Plaintiffs should be precluded from putting on any **[*10]** evidence regarding the Supply Control Plan. For the reasons that follow, the Court rejects this request.

II. DISCUSSION

Defendants put forth two arguments for why evidence of the Supply Control Plan should be excluded: it is irrelevant and, in the alternative, its probative value is substantially outweighed by the risk of prejudice.[1] Neither argument is persuasive.

A. Relevance

Defendants argue that evidence of the Supply Control Plan is irrelevant. Evidence is relevant if "it has any tendency to make a fact more or less probable than it would be without evidence" and "the fact is of consequence in determining the action." *Fed. R. Evid. 401*. "[T]he threshold for relevance is low." *Thomas v. Dragovich, 142 F.*

---

[1] Defendants' brief also contains sections arguing (A) Plaintiffs are estopped from offering evidence that the Supply Control Plan "affected mushroom supply, otherwise had an anticompetitive effect, or caused plaintiffs any alleged damages", and (B) "expert testimony would be required to support any claim that the Supply Control Campaign caused plaintiffs any damages, and Plaintiffs have offered no such testimony with respect to the supply control campaign." However, neither serves as an independent basis to exclude evidence of the Supply Control Program — rather they are reasons that (according to Defendants) evidence of the Supply Control Plan should be excluded pursuant to *Rules 402* and *403 of the Federal Rules of Evidence.* As such, the Court evaluates the central claim of these sections — that Plaintiffs cannot show the Supply Control Plan affected the price of fresh agarics mushrooms — in the context of determining whether evidence relating to the Supply Control Plan is admissible under *Rules 402* and *403*.

App'x 33, 37 (3d Cir.2005). Here, evidence of the Supply Control Plan is relevant to Defendants' antitrust liability in two ways.

First, evidence of the Supply Control Plan is relevant to whether Defendants incur liability for their price control and reverse internet auction policies under the rule of reason. Whether or not an antitrust defendants' conduct was undertaken for the purpose of constraining trade is relevant to whether that conduct is unreasonable under a rule of reason analysis. As the Supreme Court observed in *Chicago Board of Trade v. United* ***[*11]*** *States*:

> The true test of [challenged conduct's] legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, *the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts*. This is not because a good intention will save an otherwise objectionable regulation or the reverse; *but because knowledge of intent may help the court to interpret facts and to predict consequences*.

246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918) (emphasis added). In this case, if it is true that Defendants undertook a plan to reduce the supply of mushrooms, and did so with the intent of maintaining artificially high prices, those facts would have a tendency to make it more probable that the price control and reverse internet auction policies were also undertaken with the intent of restraining **[*12]** competition, which is relevant to whether such policies constitute unreasonable restraints of trade. This is true even if Plaintiffs cannot show that Defendants Supply Control Plan was successful. Thus, evidence of the Supply Control Plan is relevant because it is probative of whether the price control and reverse internet auction policies violated ***antitrust law***.

Second, evidence of the Supply Control Plan is relevant to whether Defendants are *per se* liable for violations of the *Sherman Act*. Defendants who engage in conduct that *per se* violates the Sherman Act are liable regardless of the actual effects of their conduct. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 224 n.59, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)* ("It is the 'contract, combination or conspiracy, in restraint of trade or commerce' which *§ 1* of the Act strikes down, whether the concerted activity be wholly nascent or abortive on the one hand, or successful on the other."); *In re Flat Glass Antitrust Litig., 385 F.3d 350, 363 (3d Cir. 2004)* ("But a horizontal agreement to fix prices need not succeed for sellers to be liable under the Sherman Act; it is the attempt that the Sherman Act proscribes."); *see* Christopher R. Leslie, *Hindsight Bias in* ***Antitrust Law***, *71 Vand. L. Rev. 1527, 1579-82 (2018)*. In this case, "plaintiffs' claim that the supply control program violated *Section 1* of the Sherman Act is . . . subject to *per se* ***[*13]*** antitrust liability" *In re Mushroom Direct Purchaser Antitrust Litig., Civ. A. No. 06-0620, 2015 U.S. Dist. LEXIS 143331, 2015 WL 6322383, at *16 (E.D. Pa. May 26, 2015)*. As such, evidence regarding the Supply Control Plan is relevant to their liability even if Plaintiffs cannot show the Plan resulted in overcharge. Thus, evidence regarding Defendants' Supply Control Plan is relevant.

B. *Rule 403*

Defendants argue in the alternative that, even if evidence of the Supply Control Plan is relevant, it should nonetheless be excluded because its probative value is substantially outweighed by the risk of undue prejudice. Their argument is unavailing.

Under *Rule 403*, courts have discretion to exclude relevant evidence if the evidence's probative value is substantially outweighed by the danger of "unfair prejudice, confusing the issues, misleading the jury, undue delay, waste of time, or needlessly presenting cumulative evidence." *Fed. R. Evid. 403*. When weighing the *Rule 403* factors, courts "must appraise the genuine need for the challenged evidence and balance that necessity against the risk of prejudice to the defendant." *United States v. Bailey, 840 F.3d 99, 118-19 (3d Cir. 2016)*. Evidence can be kept out only if its unfairly prejudicial effect *substantially* outweighs its probative value. *Id. at 119*.

Here, it is not clear how introduction of evidence regarding the Supply Control Plan would result in any of the harms *Rule 403* seeks to avoid, and, to the **[*14]** extent that any such harms would occur, there is no basis to conclude that they would substantially outweigh the evidence's probative value. As such the Court declines to find evidence of Defendants' Supply Control Plan inadmissible under *Rule 403*.

III. CONCLUSION

For the foregoing reasons, this Court denied Certain Defendants' motion to categorically exclude all evidence of Defendants' alleged Supply Control Plan at trial.

ORDER

AND NOW, this **21st** day of **February 2020**, it is **ORDERED** that the attached Memorandum supplements this Court's Order of February 14, 2020 denying Certain Defendants' Motion in Limine to Preclude Testimony and Evidence Regarding Defendants' Supply Control Campaign.

Judges: BRIAN C. WIMES, UNITED STATES DISTRICT JUDGE.

Opinion by: BRIAN C. WIMES

Opinion

ORDER

Before the Court is Defendant Ceva Animal Heath, LLC's motion for summary judgment. (Doc. #636). The Court, being duly advised of the premises, denies said motion.

LEGAL STANDARD

A party is entitled to summary judgment "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)* (citing *Fed. R. Civ. P. 56(c)*).

A party who moves for **[*4]** summary judgment bears the burden to establish that there is no genuine issue of material fact. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. When considering a motion for summary judgment, the court must evaluate the evidence in the light must favorable to the nonmoving party and the nonmoving party is entitled to "the benefit of all reasonable inferences." *Mirax Chem. Prods. Corp. v. First Interstate Commercial Corp., 950 F.2d 566, 569 (8th Cir. 1991)*.

UNCONTROVERTED FACTS

Breht Burri created the first version of its software platform in 2002 based on an existing e-commerce store. This platform is the basis for what became the Ceva Literature Store in 2011. In 2012, Breht Burri modified the platforms for Ceva's use with vectrarebate.com.

In 2013, Plaintiffs provided "ghost" codes for Ceva to use before the Plaintiffs posted the Terms of Use ("the Terms").

On March 11, 2014, Breht Burri posted the Terms for the InfoDeli software platforms underlying the Lit Store. When the Terms were posted, Ceva did not have a license to use the InfoDeli software.

The Terms provide that users would not "reverse engineer, copy, download, reproduce, distribute, duplicate functionality, create a derivative works or adaptations of . . . or in any way exploit" the software platform. The Terms do not contain a representation from users that they **[*5]** have the authority to bind their employer to the Terms.

The Terms state:

> [y]ou may access the Site or Service as an authorized user ("User") provided (a) Subscribing Organization is in possession of a current written license agreement with [InfoDeli] for the Service; (b) Subscribing Organization's licensing payments are paid in full and current as invoiced; (c) Subscribing Organization is not in default under the terms of that Licensing Agreement; (d) User is an employee or approved user of Subscribing Organization; and (3) you agree to the terms set forth herein.
> [. . . .]
> For purposes of this Agreement, the business or person that obtains a written license, 'Service License' from Company for use of the Service shall be referred to as the 'Subscribing Organization' or 'Subscriber.'

The Terms do not include any payment provision. The Terms require all users be "human" and at least 13 years old, while subscribers must be 18 years old. Ceva was not a "Subscriber" or "Subscribing Organization" under the Terms because it was not "in possession of a current written license agreement with [InfoDeli] for the service and never obtained a written license from InfoDeli."

Breht Burri posits that these **[*6]** Terms obligate the user on a continuing basis for a "reasonable period of time" after a user's last log in the Lit Store. Plaintiffs did not notify Ceva that the Terms were being posted. At least 58 Ceva employees, including Shane Fairchild, agreed to the Terms in order to access the Lit Store after March 11, 2014.

The Lit Store's functionality includes the ability to search for products. A Lit Store user would log in, search for and/or select a product to add to the electronic shopping cart, and check out, after which WRI would fulfill the order. The Lit Store also included a reporting feature that allowed users to request and determine what products were shipped where, and when they were shipped.

Plaintiffs gave Shane Fairchild the data that Engage used to create a new web store. Fairchild did not obtain the data provided to Engage through logging into the Lit Store, though he had otherwise accepted the Terms. When Plaintiffs gave Fairchild the data, Plaintiffs expected Fairchild to treat the data as subject to the website's Terms. Fairchild knew that the data compilation from vectrarebate.com was tied to Plaintiffs' software platforms because Fairchild had requested Plaintiffs design **[*7]** the rebate website in that manner. In the course of providing the data to Fairchild, Plaintiffs intended to negotiate a license with Ceva for the use of the software platforms in conformity with the Terms. The data Plaintiffs provided included information submitted by consumers who redeemed Ceva's Vectra rebate offer.

The vectrarebate.com website never had the Terms posted to it; rather, vectrarebate.com showed a "Legal Notice and Terms of Use," which provided that all elements of the redemption website were Ceva's property. The notice said the collection of personal information on the redemption website was for use by Ceva. Plaintiffs assert this notice was posted in error.

Before March 2014 and Plaintiffs' dispute with WRI, Plaintiffs had provided data requested by Ceva without restriction and/or without any claim of ownership to the data by Plaintiffs.

In mid-March 2014, Plaintiffs presented a proposed written license agreement to Ceva, but the licensing agreement was never executed.

ANALYSIS

Ceva seeks summary judgment on each of Plaintiffs' remaining claims against it for breach of the Terms (Count VIII) and for civil conspiracy (Count XII).

A. Ceva's motion for summary judgment on [*8] Plaintiff' claim for breach of the Terms is denied.

Ceva argues it is entitled to summary judgment on Plaintiffs' claim for breach of the Terms for two reasons: (1) the Terms are an unlawful restraint of trade; and (2) the Terms do not apply to Ceva.

The Court first considers whether Ceva is entitled to summary judgment on the basis that the Terms impose an unlawful restraint of trade, such that the Terms are unenforceable, and Plaintiffs cannot establish a breach of contract claim as a matter of law. *Superior Ins. Co. v. Univ. Underwriters Ins. Co., 62 S.W.3d 110, 118 (Mo. Ct. App. 2001)* (A claim for breach of contract requires the plaintiff to establish the following: (1) an enforceable contract exists; (2) mutual obligations under the contract; (3) failure to perform a specified obligation; and (4) damages).

Electronic agreements are subject to "traditional principles of contract law and focus on whether the plaintiff had reasonable notice of a manifested assent to the online agreement." *Ramsey v. H&R Block Inc., Case No. 18-00933-CV-W-ODS, 2019 U.S. Dist. LEXIS 79876, 2019 WL 2090691, at *3 (W.D. Mo. May 13, 2019)* (citing *Major v. McCallister, 302 S.W.3d 227, 229 (Mo. Ct. App. 2009))*. The relevant inquiry is whether the user had reasonable notice of the terms and "manifested assent" by clicking a box or button. Id. The type of electronic agreement that includes an affirmative step, like clicking "I agree," is referred **[*9]** to as a "clickwrap agreement" and is generally enforceable. Id. (collecting cases).

"[E]very contract, combination or conspiracy in restraint of trade or commerce in [Missouri] is unlawful." *Mo. Rev. Stat. § 416.031.1*. "*Sections 416.011 to 416.161* shall be construed in harmony with ruling judicial interpretations of comparable federal antitrust statutes." *Mo. Rev. Stat. § 416.141*.

Under federal ***antitrust law***, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. "To demonstrate a violation of *section 1* of the Sherman Act, a plaintiff must provide proof of an illegal contract, combination, or conspiracy which results in an unreasonable restraint of trade." *Double D Spotting Serv., Inc. v. Supervalu, Inc., 136 F.3d 554, 558 (8th Cir. 1998)* (citing *State Oil Co. v. Khan, 522 U.S. 3, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*.

Certain practices, like "price-fixing, division of markets, group boycotts, and tying arrangements" are illegal per se. *Double D Spotting Serv., 136 F.3d at 558* (citing *Arizona v. Maricopa Cnty. Med. Soc., 457 U.S. 332, 344 n.15, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*; (*N. Pac. Ry. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958))*. In the absence of such circumstances, courts apply a "rule of reason" analysis, "according to which the finder of fact must decide whether the questioned practice puts an unreasonable restraint on competition." *Double D Spotting Serv., 136 F.3d at 558*.

In this case, the Terms are properly categorized as a clickwrap agreement, in that in order to use the Platforms, the user had **[*10]** to agree to the Terms that are "reasonably communicated." *TradeComet.com LLC v. Google, Inc., 693 F. Supp. 2d 370, 377 (S.D.N.Y. Mar. 5, 2010)* (citing *Register.com, Inc. v. Verio, Inc., 356 F.3d 393, 429 (2d Cir. 2004))*. Ceva argues it is entitled to summary judgment because the provision of the Terms against duplicating the functionality of the platforms is an unlawful restraint of trade. Plaintiffs counter that the Terms are enforceable in reliance on *Davidson & Associates v. Jung, 422 F.3d 630 (8th Cir. 2005)*.

In Davidson & Associates, the Eighth Circuit held, in affirming summary judgment for the plaintiffs in that case, that "private parties are free to contractually forego the limited ability to reverse engineer a software product under the exemptions of the Copyright Act, and a state can permit parties to contract away a fair use defense or to agree not to engage in uses of copyrighted material that are permitted by the copyright law if the contract is freely negotiated." Davidson & Assocs., 422 F.3d at 639 (citing *Bowers v. Baystate Techs, Inc., 320 F.3d 1317, 1325-26 (Fed. Cir. 2003)*; *Nat'l Car Rental Sys., Inc. v. Computer Assocs. Intern, Inc., 991 F.2d 426, 434 (8th Cir. 1993))*. The Eighth Circuit thus concluded, in the context of the facts of that case, that in accepting the terms of use for the relevant software, the defendants had expressly agreed not to reverse engineer.

Under the circumstances of this case, the Court finds *Davidson & Associates* instructive. To access the platforms, Ceva's employees undertook the affirmative step to acknowledge the Terms. Though Ceva asserts **[*11]** that Plaintiffs have not demonstrated that the Ceva employees who accepted the Terms had authority to bind Ceva to the Terms, the record demonstrates that Ceva employees accessed the platforms after March 11, 2014 in connection with their work for Ceva. Implied authority "encompasses the power to act in ways reasonably necessary to accomplish the purpose for which express authority was granted" and "evidence that an agent historically engaged in related conduct, without limitation, would be enough to support a jury question on the issue of actual authority." *Essco Geometric v. Harvard Indus., 46 F.3d 718, 723-24 (8th Cir. 1995)*. With all reasonable inferences drawn in Plaintiffs' favor, the Ceva employees that accessed the platforms after Plaintiffs posted the Terms likely performed the same tasks on behalf of Ceva relative to the platforms that they performed before the Terms were posted. Based on the current record, the Court declines to find the Terms unenforceable as an unlawful restraint on trade. Ceva's motion for summary judgment on this point is denied.

The Court next considers whether, by their stated provisions, the Terms can bind Ceva. Ceva argues that the Terms state they apply to "users," who must be human, or "subscribing organizations," **[*12]** which have a written licensing agreement with Plaintiffs. The Terms state that "the Service is available only to Users who are human (not bots, except for certain authorized API users) and 13 years of age or older, and Users who are also Subscribers must be 18 years old." With respect to Ceva's argument that the Terms are inapplicable because Ceva is an entity, as oppose to a "human" as required under the explicit terms of the Terms, Ceva may only act through its agents. *Sutherland v. Sutherland, 348 S.W.3d 84, 92 (Mo. Ct. App. 2011)*. Under the uncontroverted facts, Plaintiffs provided Ceva's employees credentials to access the platforms on the basis that those accessing the platforms in the course of Ceva's business would comply with the Terms. Ceva's motion for summary judgment on the basis that it is not a human under the Terms is denied.

Ceva also argues it is entitled to summary judgment because it is not, under the Terms, a "Subscriber" as explicitly defined. Because the Terms apply to users or to subscribing organizations, the Court's conclusion above precludes summary judgment for Ceva on Plaintiffs' claim for breach of the Terms. Stated differently, since Plaintiffs' claim for breach of the Terms survives because Ceva may be properly considered **[*13]** a "User," Ceva's motion for summary judgment on this claim is denied.

B. Ceva's motion for summary judgment on Plaintiff' claim for civil conspiracy is denied.

Ceva argues it is entitled to summary judgment on Plaintiffs' claim for civil conspiracy because (1) it is entitled to summary judgment on Plaintiffs' other tort claims and (2) Plaintiffs cannot demonstrate a meeting of the minds.

A claim of civil conspiracy in Missouri requires the plaintiff to prove: (1) two or more persons; (2) acting with an unlawful objective; (3) after a meeting of the minds; (4) committed an act in furtherance of a conspiracy; and (5) resulting damages. *W. Blue Print Co. LLC v. Roberts, 367 S.W.3d 7, 22 (Mo. 2012)*. "Civil conspiracy is not a stand-alone claim and requires the underlying existence of a wrongful act or intentional tort to survive." Falco v. Farmers Ins. Grps., No. 4:12-CV-00134-BCW, 2014 WL 11394453, at *6 (W.D. Mo. June 19, 2014) (citing *Williams v. Mercantile Bank of St. Louis N.A., 845 S.W. 2d 78, 86 (Mo. Ct. App. 1993))*.

"Conspiracy to breach a contract has been long recognized as a plausible civil conspiracy claim in Missouri. Similarly, a conspiracy to injure or destroy the trade, business or occupation of another is an unlawful conspiracy." *Envirotech, Inc. v. Thomas, 259 S.W.3d 577, 587 (Mo. Ct. App. 2008)* (citations omitted). Further, "proof of civil conspiracy allows a plaintiff to hold a defendant liable for the wrongful act of another, if that **[*14]** wrongful act was committed in furtherance of an illegal conspiracy." *Id. at 594 n.11*.

In the context of Ceva's motion for summary judgment, because Ceva is not entitled to summary judgment on Plaintiffs' claim for breach of the Terms, there exists an underlying basis upon which Plaintiffs' claim for civil conspiracy might attach against Ceva. In addition, there exist multiple factual disputes relating to Plaintiffs' claims for intentional tortious acts alleged against other defendants. Plaintiffs' civil conspiracy claim against Ceva may also "attach" to any of the remaining wrongful acts alleged against any of the other remaining defendants. Ceva's motion is denied on this point.

Ceva also argues there is no genuine issue of material fact with respect to the element of a "meeting of the minds." To demonstrate this element, a plaintiff must present facts suggesting a concerted action and agreement to "carry out the unlawful purposes of the conspiracy" by clear and convincing evidence. *The Olivier Family Interests Ltd. v.*

*Wright, No. 08-3075-CV-S-DW, 2012 U.S. Dist. LEXIS 194962, 2012 WL 12893873, at *5 (W.D. Mo. Jan. 24, 2012)*, aff'd, *527 F. App'x 596 (8th Cir. 2013)*; *Aguilar v. PNC Bank N.A., 853 F.3d 390, 403 (8th Cir. 2017)*; *Chmielski v. City Prods. Corp., 660 S.W.2d 275, 290 (Mo. Ct. App. 1983)*. Based on the record overall, genuine issues of material fact preclude summary judgment for Ceva on Plaintiffs' claim for civil conspiracy. Ceva's **[*15]** motion is thus denied. Accordingly, it is hereby

ORDERED Defendant Ceva Animal Heath, LLC's motion for summary judgment. (Doc. #636) is DENIED.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > Appeals > Appellate Jurisdiction

HN1[] **Appeals, Appellate Jurisdiction**

The appellate court may not pass on the merits of moot questions or abstract propositions.

Antitrust & Trade Law > Sherman Act > Scope

HN2[] **Antitrust & Trade Law, Sherman Act**

It has long been recognized that the primary purpose of the federal anti-trust laws is to protect the welfare of customers. Perhaps ironically, however, it is well established under federal ***antitrust law***'s Illinois Brick doctrine that customers of parties more directly injured by an alleged antitrust violation do not have standing to assert their own claims for damages. *section 2*.

* These cases were scheduled for oral argument on September 18, 2019. On September 12, 2019, new counsel for plaintiffs in both cases moved to vacate oral argument and to have the cases submitted on the briefs. Two defendants opposed the motion; two others took no position. The panel vacated the oral argument and has concluded that the briefs presented the cases adequately under these circumstances. See Fed. R. App. P. 34(a)(2)(C).

Antitrust & Trade Law > Sherman Act > Scope

HN3[] Antitrust & Trade Law, Sherman Act

Antitrust defendants are not permitted to argue that their direct victims were not injured because they were able to pass along price increases to their customers. Illinois Brick extended the same principle to bar claims by indirect purchasers (such as customers) even if they were the ultimate victims of the violations.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN4[] Per Se Rule & Rule of Reason, Sherman Act

Under the rule of reason for *Section 1* cases, exclusive dealing or refusals to deal could violate *Section 1* only if a defendant has monopoly or market power in a relevant market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN5[] Attempts to Monopolize, Sherman Act

Section 2 of the Sherman Act prohibits monopolization and attempts to monopolize, but with narrow exceptions it allows even firms with monopoly power to choose with whom they deal and on what terms and conditions. Even monopolists are free to choose the parties with whom they will deal, as well as the prices, terms, and conditions of that dealing. There are limited circumstances under which a monopolist's refusal to deal with a competitor will be illegal anticompetitive conduct.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN6[] Relevant Market, Geographic Market Definition

A relevant market under the Sherman Act is comprised of the commodities reasonably interchangeable by consumers for the same purposes. A properly defined market excludes other potential suppliers (1) whose product is too different (product dimension) or too far away (geographic dimension) and (2) who are not likely to shift promptly to offer defendant's customers a suitably proximate (in both product and geographic terms) alternative.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN7[] Relevant Market, Geographic Market Definition

The antitrust statutes require a pragmatic and factual approach to defining the geographic market. The market must correspond to the commercial realities of the industry. Where geographic convenience is important to consumers, retail markets can be small, but not this small. It defies belief to suggest that a hypothetical monopolist retail pharmacy could raise its drug prices substantially without losing customers to competitors outside that tiny area.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN8[] **Relevant Market, Geographic Market Definition**

The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN9[] **Relevant Market, Geographic Market Definition**

A cluster of products can comprise a relevant product market if the cluster is itself an object of consumer demand. The Supreme Court has recognized such cluster markets in banking, and central-station home security products, no barrier to combining in a single market a number of different products or services where that combination reflects commercial realities. Health care services can be suitable subjects for such cluster product markets.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN10[] **Motions to Dismiss, Failure to State Claim**

Since federal civil pleading standards changed so dramatically, and it has been especially important for district courts to give leave freely to amend pleadings. Uncertainty about application of the Twombly-Iqbal standard means that a plaintiff whose original complaint has been dismissed under *Fed. R. Civ. P. 12(b)(6)* should ordinarily be given at least one opportunity to try to amend its complaint before the action itself is dismissed with prejudice.

Counsel: For SHARIF PHARMACY INC., an Illinois Corporation, Plaintiff - Appellant (18-2725): Lawrence M. Karlin, Attorney, KARLIN EIDE, Chicago, IL; Ariel Weissberg, Attorney, WEISSBERG & ASSOCIATES, LTD., Chicago, IL.

Judges: Before KANNE, HAMILTON, and BARRETT, Circuit Judges.

Opinion by: HAMILTON

Opinion

[*914] HAMILTON, *Circuit Judge*. The issue in these consolidated appeals is whether plaintiffs in two similar cases have stated viable claims under *Sections 1* or *2* of the *Sherman Act*, *15 U.S.C. §§ 1* and *2*. They have not. We affirm the judgments of both district courts dismissing the cases on the plaintiffs' pleadings, though in one case with slight modifications.

I. *The Prime Network and the Plaintiffs*

Defendant Prime Therapeutics LLC is a pharmacy benefits manager. Plaintiffs Sharif Pharmacy, Inc. and J&S Community Pharmacy, Inc. were both members of the Prime pharmacy network. Under Medicare, Medicaid, and private health insurance plans, many patients had significant financial incentives to buy their prescription drugs from pharmacies within the network. Prime terminated both Sharif and J&S from the network after audits uncovered, in Prime's view, irregularities in invoicing for prescription drugs. Prime is owned in part by **[**3]** the insurer Blue Cross Blue Shield, and plaintiffs suggest that membership in the network is required in order for pharmacies in certain states to accept Blue Cross Blue Shield, Medicare, and Medicaid prescription drug insurance plans. We assume, therefore, that termination from the Prime network hurt Sharif's and J&S's businesses.[1]

Sharif and J&S filed these suits alleging that their terminations from the Prime network violated the federal Sherman Act. Three customers joined the J&S action as plaintiffs who had to switch to different, less convenient pharmacies, at least for a time. In both cases, the plaintiffs alleged that the audits were pretextual and that Prime really terminated both pharmacies' participation in its network in an attempt to get rid of competition with Walgreens, with whom it had entered a joint venture in August 2016. Prime sent letters to both pharmacies' customers saying that Sharif and J&S would no longer accept their insurance and recommending that customers have their prescriptions filled at a nearby Walgreens. Prime also retained funds from both pharmacies as a result of the audits.

II. *The J&S Suit*

The two cases took different paths through the district court **[**4]** and on appeal, presenting different issues. We begin with the J&S suit, which has been affected by events while the appeal has been pending. First, J&S itself obtained reinstatement in the Prime network. J&S then moved to dismiss its appeal voluntarily under *Federal Rule of Appellate Procedure 42(b)*. We granted that motion, so J&S itself is no longer asserting any claims in the lawsuit. The reinstatement has also rendered moot the customer-plaintiffs' request for injunctive relief restoring J&S to the Prime network. See, e.g., *E.E.O.C. v. Flambeau, Inc., 846 F.3d 941, 949-50 (7th Cir. 2017)*. ***HN1***[] We may not pass on the merits of "moot questions or abstract propositions." *Dorel Juvenile Group, Inc. v. DiMartinis, 495 F.3d 500, 503 (7th Cir. 2007)*, citing *Calderon v. Moore, 518 U.S. 149, 150, 116 S. Ct. 2066, 135 L. Ed. 2d 453 (1996)*.

That leaves only the customers' claims for damages in the J&S lawsuit. Those claims are not moot, but they cannot be remedied directly in federal antitrust litigation. ***HN2***[] It has long been recognized that the primary purpose of the federal anti-trust laws is to protect the welfare of customers. E.g., *NCAA v. Board of Regents, 468 U.S. 85, 107, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*, citing *Reiter v. Sonotone* ***[*915]*** *Corp., 442 U.S. 330, 343, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*, quoting in turn Robert H. Bork, *The Antitrust Paradox: A Policy at War With Itself* 66 (1978); *Fishman v. Estate of Wirtz, 807 F.2d 520, 535-36 (7th Cir. 1986)*; *id. at 585* (Easterbrook, J., dissenting). Perhaps ironically, however, it is well established under federal ***antitrust law***'s *Illinois Brick* doctrine that customers of parties more directly injured by an alleged antitrust violation **[**5]** do not have standing to assert their own claims for damages. See *Apple Inc. v. Pepper, 139 S. Ct. 1514, 1520-21, 203 L. Ed. 2d 802 (2019)* (applying *Illinois Brick* rules to *section 2* claims for monopolization); *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*; see also *Loeb Industries, Inc. v. Sumitomo Corp., 306 F.3d 469, 481-82 (7th Cir. 2002)* (explaining *Illinois Brick* and its limits).

[1] For example, J&S alleged that more than 80 percent of its prescription-drug customers are insured by Medicare, Medicaid, or Blue Cross Blue Shield.

HN3[] The Court explained in *Illinois Brick* that antitrust defendants are not permitted to argue that their direct victims were not injured because they were able to pass along price increases to their customers. *431 U.S. at 724-26*, discussing *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*. *Illinois Brick* extended the same principle to bar claims by indirect purchasers (such as customers) even if they were the ultimate victims of the violations. Because J&S Pharmacy would have been most directly affected by any alleged anti-trust violation, its own customers may not bring their own claims for damages under the Sherman Act.

The customer plaintiffs alleged that they depended on J&S Community Pharmacy because it was the only pharmacy within walking distance that had accepted their insurance. During the time when J&S was excluded from the Prime pharmacy network, the customers were injured because they could no longer use it to fill their prescriptions and were "too poor or physically or mentally weak to regularly travel to a distant pharmacy for their medicine," "particularly **[**6]** during inclement weather."

We take these plaintiffs at their word, of course. We do not doubt that the exclusion of their familiar and most convenient pharmacy from their insurance coverage caused significant inconvenience and even hardship to them. Such harms, however, have not been treated as injury to "business or property" as required to recover damages under the Sherman Act, *15 U.S.C. § 15(a)*. Even if we assumed for the sake of argument that the exclusion of J&S Pharmacy from the Prime network might have violated the Sherman Act (though we reject Sharif's similar claims on the merits, below), its customers would not be entitled to sue for damages under that Act.

Courts and commentators have long been concerned with calibrating antitrust standing doctrine in order both to capture "the full cost of an antitrust violation ... by looking to the injuries to all victims," and to ensure that "the defendant should not be made to pay twice for the very same injury." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 339a (4th ed. 2019). Here, the relief sought by the customer-plaintiffs would duplicate any relief that J&S could have sought on **[**7]** its own behalf. Their claims are barred because they would "substantially increase[] the possibility of inconsistent adjudications [ ]and therefore of unwarranted multiple liability for the defendant[.]" *Illinois Brick, 431 U.S. at 730*. **[*916]** [2]

III*. The Sharif Pharmacy Suit*

Although we affirm the dismissal of the J&S suit for reasons unrelated to the merit or lack of merit of the allegations of Sherman Act violations, the Sharif Pharmacy appeal presents the merits squarely. Sharif alleges in essence that Prime Therapeutics and Walgreens have created a joint venture that encourages patients insured through Prime to buy their prescription drugs at Walgreens and not at other competing retail pharmacies like Sharif. The allegations fail to state a viable claim under either *Section 1* or *Section 2* of the Sherman Act, so we affirm.

In antitrust parlance, Sharif alleges a variant on a claim for exclusive dealing and/or a refusal to deal. Sharif alleges in effect that Prime prefers to deal with Walgreens rather than Sharif. **HN4**[] Sharif has not alleged a horizontal agreement (i.e., among competitors) to fix prices or divide markets, so the case is not subject to the rule of per se illegality under *Section 1* of the Sherman Act. Under the rule of reason for *Section 1* cases, **[**8]** exclusive dealing or refusals to deal could violate *Section 1* only if a defendant has monopoly or market power in a relevant market. See generally, e.g., *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 885-87, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* (summarizing per se illegality and rule of reason).

HN5[] *Section 2* of the Sherman Act prohibits monopolization and attempts to monopolize, but with narrow exceptions it allows even firms with monopoly power to choose with whom they deal and on what terms and conditions. Even monopolists "are free to choose the parties with whom they will deal, as well as the prices, terms, and conditions of that dealing." *Pacific Bell Telephone Co. v. Linkline Communications, Inc., 555 U.S. 438, 448, 129*

[2] Given our holdings here as to mootness and antitrust standing, we have considered but see no need to reach the arguments raised by the State of Illinois under the *Eleventh Amendment* and the Sherman Act state action immunity doctrine.

S. Ct. 1109, 172 L. Ed. 2d 836 (2009), citing United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919).

There are "limited circumstances" under which a monopolist's refusal to deal *with a competitor* will be illegal anticompetitive conduct. *Id.*; see generally Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004); Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985); Areeda & Hovenkamp, ***Antitrust Law*** ¶ 1800c5 ("Section 2 of the Sherman Act reaches unilateral refusals to deal when the refusals constitute monopolization ... ."). To begin even to try to fit this case into these relatively narrow exceptions, Sharif would need to allege that Prime and/or Walgreens either have or are dangerously likely to obtain monopoly power in a relevant market.

So, in the absence of an alleged per se violation of Section 1, Sharif's federal claims require it to identify a relevant product **[**9]** and geographic market in which Prime and/or Walgreens have or were dangerously likely to obtain monopoly power. Even at the pleading stage, it is sufficiently clear that Sharif cannot identify an appropriate geographic market where a defendant had or threatened to have monopoly power.

HN6[] A "relevant market" under the Sherman Act is comprised of the "commodities reasonably interchangeable by consumers for the same purposes." United States v. E.I. Du Pont de Nemours & Co., ***[*917]*** 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956). "A properly defined market excludes other potential suppliers (1) whose product is too different (product dimension) or too far away (geographic dimension) and (2) who are not likely to shift promptly to offer defendant's customers a suitably proximate (in both product and geographic terms) alternative." Areeda & Hovenkamp, ***Antitrust Law*** ¶ 530a.

Geographic Market: Sharif has not plausibly alleged that either Prime or Walgreens has or threatens to gain monopoly power in a relevant geographic market. In its proposed second amended complaint, Sharif identified three areas that might serve as relevant geographic markets. In the section entitled "The Geographic Market," Sharif alleges that the relevant market in this case is "nation-wide for Prime and Walgreens." Sharif **[**10]** argues, quoting a Dow Jones wire article, that Prime and Walgreens were joining forces to give Walgreens "more muscle to compete against CVS Health's integrated model that combines a retail pharmacy chain with a large PBM [pharmacy benefits manager]." The proposed complaint construes this news coverage as "a public admission by Defendants that through their partnership, and the scheme Plaintiff alleges above where Prime terminates pharmacies' ability to sell prescription drugs, they will violate antitrust laws nation-wide to increase their market share of prescription drugs." Elsewhere in the proposed complaint, Sharif asserts that "the five-block area" surrounding its pharmacy and "the Chicago market area" are geographic regions in which Prime is seeking to terminate the network participation of possible Walgreens competitors.

The United States as a whole and the Chicago metropolitan area are plausible geographic markets for retail prescription drug sales, but we see no plausible allegation that Prime and/or Walgreens have or threaten to gain monopoly power in a nationwide or metropolitan Chicago market for retail prescription drug sales. Plaintiff's assertion that the defendants merely **[**11]** sought to increase their market shares does not come close to satisfying the requirement of actual or threatened monopoly power. ***Antitrust law*** assumes that all competitors seek to increase their respective market shares, especially by business arrangements that will offer more attractive products and services to their customers.

Sharif's assertion that the five-block radius around its location is a relevant market is not plausible. ***HN7***[] The antitrust statutes require a "pragmatic" and "factual" approach to defining the geographic market. Brown Shoe Co. v. United States, 370 U.S. 294, 336, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962). The market must "correspond to the commercial realities of the industry." *Id.*, quoted in Federal Trade Comm'n v. Advocate Health Care Network, 841 F.3d 460, 468 (7th Cir. 2016) (quotations omitted). Where geographic convenience is important to consumers, retail markets can be small, see United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 358, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963), but not this small. It defies belief to suggest that a hypothetical monopolist retail pharmacy could raise its drug prices substantially without losing customers to competitors outside that tiny area. See also 42nd Parallel North v. E Street Denim Co., 286 F.3d 401, 406 (7th Cir. 2002) (rejecting as "absurdly small" a proposed market for retail designer jeans and tee-shirts comprising only the "central business district" of Highland Park, Illinois).

Product Market: Though we could affirm the judgment of the district court solely **[**12]** on the basis of our geographic market analysis, for two reasons, we also address **[*918]** plaintiffs' failure to plead a proper product market. First, though its discussion was brief, the district court did address the issue, and its analysis would have been sufficient to support its decision. Second, Prime Therapeutics has taken an aggressive position on appeal: that "claiming a market of all 'prescription drugs' is meaningless" and that "attempting to measure the interchangeability of countless unnamed 'prescription drugs' is an impossible task." Sharif has not pleaded facts sufficient to support an inference that defendants have the requisite market power within a viable product market for retail prescription drugs. Sharif's failure, however, does not mean that no future antitrust plaintiff may be able to do so.

HN8[] "The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe, 370 U.S. at 325*. Sharif asserts that the relevant product market is retail prescription drugs. Defendants contend that this product market is not plausible because more than 39,000 prescription drugs are sold in **[**13]** the United States, and of course one prescription drug may be interchangeable with only a few or perhaps no others. Contrary to the defense arguments, however, and subject to appropriate proof, we see no necessarily fatal flaw in treating that bundle or cluster of prescription drugs that are typically sold in brick-and-mortar retail pharmacies as a relevant product market.

HN9[] A cluster of products can comprise a relevant product market "if the cluster is itself an object of consumer demand." *Advocate Health Care Network, 841 F.3d at 467* (quotations omitted). As the Tenth Circuit noted in *Green Country Food Market, Inc. v. Bottling Group, LLC, 371 F.3d 1275, 1283-85 (10th Cir. 2004)*, the Supreme Court has recognized such "cluster" markets in banking, see *United States v. Phillipsburg Nat'l Bank & Trust Co., 399 U.S. 350, 360-61, 90 S. Ct. 2035, 26 L. Ed. 2d 658 (1970)*; *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 356-57, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*, and central-station home security products, see *United States v. Grinnell Corp., 384 U.S. 563, 572-73, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. The Court said in *Grinnell Corp.* that "We see no barrier to combining in a single market a number of different products or services where that combination reflects commercial realities."

Health care services can be suitable subjects for such "cluster" product markets. In *Advocate Health Care Network*, we recognized "inpatient general acute care services—specifically, those services sold to commercial health plans and their members" as a product market, including those "medical services and procedures that require admission **[**14]** to a hospital, such as abdominal surgeries, childbirth, treatment of serious infections, and some emergency care." *841 F.3d at 468*. See also, e.g., *Messner v. Northshore University HealthSystem, 669 F.3d 802 (7th Cir. 2012)* (recognizing bundled hospital services as product market); *Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1412 n.2 (7th Cir. 1989)* (retail supermarkets defined relevant product market); see generally *Grinnell Corp., 384 U.S. at 572-73 & n.6* (commercial realities showed that central-station alarm companies needed to offer all or nearly all types of property-protection services, making cluster of services a relevant product market); Areeda & Hovenkamp, ¶ 565c (recognizing that surgical services might be appropriate "cluster" product market, but criticizing other attempts to establish cluster product markets).

[*919] We close with a note about resolving these appeals on the pleadings, with the federal claims dismissed with prejudice. ***HN10***[] Since federal civil pleading standards changed so dramatically in *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, and *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*, it has been especially important for district courts to give leave freely to amend pleadings. E.g., *Runnion v. Girl Scouts of Greater Chicago and Northwest Indiana, 786 F.3d 510, 519-20 (7th Cir. 2015)* (collecting cases). Uncertainty about application of the *Twombly-Iqbal* standard means that a plaintiff whose original complaint has been dismissed under *Rule 12(b)(6)* should ordinarily be given at least one opportunity to try to amend its complaint before the action itself is **[**15]** dismissed with prejudice. *Id.* In these cases, however, it is apparent that the federal antitrust claims are based on misunderstandings about foundational principles of ***antitrust law***. It is evident from the proceedings in the district courts and the arguments in plaintiffs' appellate briefs that the defects in these cases cannot be corrected, so that further amendment would be futile. E.g., *Runnion, 786 F.3d at 520*; *Airborne Beepers & Video, Inc. v. AT&T Mobility LLC, 499 F.3d 663, 666-67 (7th Cir. 2007)*. The district courts thus did not err in dismissing these federal antitrust claims with prejudice.

* * * *

The judgment of the district court in the J&S Pharmacy case dismissing the Sherman Act claims of J&S customers Scale, Thomas, and Brown with prejudice is AFFIRMED as to plaintiffs' damage claims; dismissal of those plaintiffs' claims for injunctive relief is AFFIRMED AS MODIFIED to dismiss those claims as moot; and dismissal of those plaintiffs' state-law claims without prejudice is also AFFIRMED. In the Sharif Pharmacy case, the dismissal of the Sherman Act claims with prejudice and dismissal of the state-law claims without prejudice are AFFIRMED.

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > Scope

HN1[] **Antitrust & Trade Law, Sherman Act**

The purpose of the antitrust laws is to protect competition, not competitors.

Communications Law > ... > Rules & Regulations > Regulated Practices > Introducing Competition

Communications Law > ... > Regulated Entities > Telephone Services > Mobile Communications Services

HN2[] **Regulated Practices, Introducing Competition**

An Interconnect is what economists call a "two-sided platform." It serves as a clearinghouse, offering different products or services to two different groups who both depend on the platform to intermediate between them. Such connectivity gives an Interconnect its value but can also be misused to harm competition.

Communications Law > ... > Regulated Entities > Telephone Services > Mobile Communications Services

HN3[] **Telephone Services, Mobile Communications Services**

The value of the services that an Interconnect provides increases as the number of participants on both sides of the Interconnect increases.

Antitrust & Trade Law > Regulated Industries > Communications

HN4[] **Regulated Industries, Communications**

An Interconnect is not necessarily a one-way ratchet to increased demand. Decreased participation on either side of the Interconnect can also reduce its value. Thus, an Interconnect losing participation on the cable provider side decreases the value of the advertiser side, and if advertisers leave due to this loss in value, then the Interconnect has even less value to the cable providers, risking a feedback loop of declining demand. Whether the Interconnects are procompetitive or not depends on the competitive dynamics among its participants. In a competitive market, for example, the risk of negative feedback may serve as a check on the ability of any one participant to raise prices or otherwise exert market power. Conversely, in a less competitive market, access to the crucial Interconnects can be used to exclude competitors and harm competition. The Interconnects are so important that exclusionary conduct can become a weapon to injure competitors.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN5[] **Sherman Act, Claims**

Section 2 of the Sherman Act imposes liability on every person who shall monopolize any part of the trade or commerce among the several States. *15 U.S.C.S. § 2*. A private plaintiff may bring a civil claim as a person who was injured in his business or property by reason of anything forbidden in the antitrust laws. *15 U.S.C.S. § 15(a)*.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN6[] **Scope, Monopolization Offenses**

Judicial decisions interpreting *§ 2* of the Sherman Antitrust Act, *15 U.S.C.S. § 2*, have long held that simple possession of monopoly power, or the pursuit of it, is not in itself illegal. The law does not make mere size an offence, or the existence of unexerted power an offense. It requires overt acts. Size does not determine guilt as the monopolist may have gained market power by force of accident, or by virtue of his superior skill, foresight and industry. Therefore, there must be some exclusion of competitors. Thus, a firm violates the monopoly provision in *Section 2* only when it both (1) possesses monopoly power in the relevant market and (2) engages in the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN7[] **Relevant Market, Geographic Market Definition**

A relevant antitrust geographic market is the area in which sellers operate and where purchasers can predictably turn for supplies.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN8[] **Actual Monopolization, Monopoly Power**

Antitrust analysis must always be attuned to the particular structure and circumstances of the industry at issue. When assessing exclusionary conduct, it is necessary to examine market power or share at both of the two market levels involved.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN9[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

A firm's market power is important because, without it, a firm will have little to no ability to distort or harm competition, no matter how great its desire to do so, even when engaging in conduct that in different circumstances might be perceived as anticompetitive. Not infrequently, the initial question of market power proves decisive. Even mildly reprehensible behavior might be enough to challenge a firm whose power is significant.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN10[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Courts recognize various types of conduct that have the potential to harm competition. The types of conduct that are "exclusionary" in nature impair rivals' opportunity to compete in a way that is inconsistent with "competition on the merits. In the vernacular of ***antitrust law***, a "predatory" practice is one in which a firm sacrifices short-term profits in order to drive out of the market or otherwise discipline a competitor.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

HN11[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Conduct that can harm competition may fit into more than one of the court-devised categories. After all, the means of illicit exclusion, like the means of legitimate competition, are myriad. Although the standard for a *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, violation is significantly stricter in its power assessment than for a *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, claim, it is broader and less categorical in its definition of proscribed conduct. This means that a dominant firm's conduct may be susceptible to more than one court-defined category of anticompetitive conduct. A simple refusal to deal is conduct where one firm refuses to deal no matter what, whereas tying and exclusive dealing are two common examples of conditional refusals to deal, i.e., one firm will refuse to deal with another firm unless some condition is met. Similarly, many of the practices that have been characterized as exclusive dealing could also be described as tying because the economic distinction between the two is most often slight or nil.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN12[] **Sherman Act, Claims**

Plaintiffs must allege and prove harm, not just to a single competitor, but to the competitive process, i.e., to competition itself. At bottom, the purpose of identifying the categories of conduct is to help determine the presence or absence of harmful effects, which are both the reason for any antitrust concern and often the simplest element to disprove.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN13[] **Standards of Review, De Novo Review**

The court of appeals reviews de novo a grant of a motion to dismiss, construing the complaint in the light most favorable to the plaintiff, accepting as true all well-pleaded facts alleged, and drawing all possible inferences in its favor. In reviewing dismissal for failure to state a claim, the court of appeals accepts the facts alleged by the plaintiff without vouching for their objective truth.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

HN14[] **Actual Monopolization, Monopoly Power**

Monopolists are both expected and permitted to compete like any other firm. A monopolist is not obliged to watch the quality of its products deteriorate and its customers become disaffected and lie down and play dead because even a monopolist is entitled to compete. Part of competing like everyone else is the ability to make decisions about with whom and on what terms one will deal. And just because a firm has monopoly power doesn't mean that the law should prevent it from competing, as it would be absurd to require the monopolist to hold a price umbrella over less efficient entrants. Thus, the general rule is that even monopolists are free to choose the parties with whom they will deal, as well as the prices, terms, and conditions of that dealing. Yet there are limited circumstances under which a monopolist's refusal to deal with another party will be illegal anticompetitive conduct. *Section 2* of the Sherman Act, *15 U.S.C.S. § 15*, reaches unilateral refusals to deal when the refusals constitute monopolization.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

HN15[] **Horizontal Refusals to Deal, Sherman Act**

In the absence of any purpose to create or maintain a monopoly, the Sherman Act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his or her own independent discretion as to parties with whom he or she will deal.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

HN16[] **Horizontal Refusals to Deal, Sherman Act**

Under certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate *Section 2* of the Sherman Act, *15 U.S.C.S. § 15*. There are limited circumstances in which a firm's unilateral refusal to deal with its rivals can give rise to antitrust liability.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal

HN17[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

A pre-existing relationship supports a presumption that the joint arrangement was efficient and profitable. In any business, patterns of distribution develop over time. These may reasonably be thought to be more efficient than alternative patterns of distribution that do not develop. The patterns that do develop and persist the court may call the optimal patterns. By disturbing optimal distribution patterns, one rival can impose costs upon another, that is, force the other to accept higher costs.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

HN18[] **Horizontal Refusals to Deal, Sherman Act**

The factors help case-by-case assessments of whether a challenged refusal to deal is indeed anticompetitive, even though no factor is always decisive by itself. Even a monopolist might wish to withdraw from a prior course of dealing and suffer a short-term profit loss in order to pursue perfectly procompetitive ends, say, to pursue an innovative replacement product of its own. Similarly, forgoing short-run profits may sometimes reflect desirable, procompetitive behavior, such as efforts to offer promotional discounts. And a defendant may have procompetitive rationales for treating a rival differently, such as if it's more costly to deal with distant rivals than other nearby customers. But because the factors as a whole provide a window into likely harm to competition, a court should start with the factors in determining whether a refusal to deal is unlawful.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

HN19[] **Sherman Act, Defenses**

Valid business justifications are relevant only to the rebuttal of a prima facie case of monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > Sherman Act > Defenses

HN20[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Balancing anticompetitive effects against hypothesized justifications depends on evidence and is not amenable to resolution on the pleadings. Whether valid business reasons motivated a monopolist's conduct is a question of fact.

Antitrust & Trade Law > Sherman Act > Defenses

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN21[] **Sherman Act, Defenses**

A district court cannot choose between competing explanations without first resolving questions of fact not before it upon a motion to dismiss.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN22[] **Sherman Act, Defenses**

Consideration of procompetitive justifications must wait for a comprehensive rule of reason analysis.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN23[] **Actual Monopolization, Anticompetitive & Predatory Practices**

A gross benefit or gain for the defendant is not enough. Conduct fails the "no economic sense" test if it is expected to yield a negative payoff, net of the costs of undertaking the conduct, and not including any payoff from eliminating competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

Antitrust & Trade Law > Sherman Act > Defenses

HN24[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Although the "no economic sense test" offers good insights into when aggressive actions by a single firm go too far, it can lead to erroneous results unless one also seeks to "balance" gains to the monopolist against losses to consumers, rivals, or others. Otherwise the courts could arrive at absurd outcomes. Theoretically, an act might benefit the defendant very slightly while doing considerable harm to the rest of the economy, and it would be lawful. It is possible the test could be adapted to meet these criticisms, given that a court should not consider any gain from eliminating competition, but, in any event, the no economic sense test was not intended to displace all other approaches. Rather, it is likely to be most useful as one part of a sufficient condition: If challenged conduct has a tendency to eliminate competition and would make no economic sense but for that tendency, the conduct is exclusionary. Under a broader approach, harm "wholly disproportionate" to the valid business justification can also support a refusal-to-deal-claim. Condemnation would be appropriate only for conduct that (1) clearly injures an actual or prospective rival either (2a) with no good business justification at all, or (2b) with a business justification that is poorly fitted to the result or wholly disproportionate to the harm that is inflicted.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

HN25[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The monopolist's conduct must be irrational but for its anticompetitive effect. The factor of a defendant forsaking short-term profits is relevant but should not always be dispositive because a short-term profit sacrifice is neither necessary nor sufficient for conduct to be exclusionary. A short-run profit sacrifice also is not necessary for conduct to be exclusionary because the anticompetitive gains from exclusionary conduct sometimes can be reaped immediately. Monopolizing conduct is not necessarily costly to the defendant. This more nuanced approach considering both pro-competitive benefits and anticompetitive harms is necessary to answer the ultimate question of whether competition was harmed. The plaintiff ultimately needs to prove that the monopolist's refusal to deal was part of a larger anticompetitive enterprise, such as (again) seeking to drive a rival from the market or discipline it for daring to compete on price. The result of such conduct is to harm competition by entrenching a dominant firm and enabling it to extract monopoly rents once the competitor is killed off or beaten down.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN26[] **Sherman Act, Claims**

The calculation of procompetitive benefits net of anticompetitive harms does not easily lend itself to a pleading standard. Rule of reason cases place a premium on objective tests based on evidence that is typically not in the defendant's exclusive control. This is why it is typically considered an adequate pleading in a rule of reason antitrust case for a plaintiff to allege (1) evidence of market structure (i.e., market power and relevant markets) and (2) "exclusionary effect" (i.e., foreclosure of a competitor from a market), both of which can ordinarily be obtained without access to the defendant's own records and indicate that an antitrust violation is plausible. To the extent that refusal-to-deal claims require more at the pleading stage, it is enough to allege plausibly that the refusal to deal has some of key anticompetitive characteristics.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN27[] **Sherman Act, Claims**

A plaintiff must eventually show a sacrifice of short-term profits to prevail on a refusal-to-deal claim, and alleging that a refusal to deal was predatory is sufficient at the pleadings stage.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Defenses

HN28[] **Actual Monopolization, Claims**

Under the burden-shifting framework, once a plaintiff has successfully established a prima facie case under *§ 2* of the Sherman Act, *15 U.S.C.S. § 15*, by demonstrating anticompetitive effect, then the defendant may proffer a "procompetitive justification," a nonpretextual claim that its conduct is indeed a form of competition on the merits because it involves, for example, greater efficiency or enhanced consumer appeal. If such a justification is offered, the burden shifts back to the plaintiff to rebut that claim. If the plaintiff cannot rebut the evidence of the defendant's procompetitive justifications, then the plaintiff must demonstrate that the anticompetitive harm of the conduct outweighs the procompetitive benefit. This burden-shifting has evolved based on which party has access to the various categories of evidence and information, with any evidence of pro-competitive justifications likely to be under the defendant's control.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN29[] **Per Se Rule & Rule of Reason, Sherman Act**

Courts apply a balancing approach in rule of reason cases, whether alleged under *§ 1* or *§ 2* of the Sherman Act, *15 U.S.C.S. §§ 1*, *2*. For a rule of reason *§ 1* case, to determine whether a restraint violates the rule of reason a three-step, burden-shifting framework applies. Under this framework, the plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market. If the plaintiff carries its burden, then the burden shifts to the defendant to show a pro-competitive rationale for the restraint. If the defendant makes this showing, then the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means. Courts require stronger proof of offsetting efficiencies when defendants possess greater ability to foreclose rivals from the market.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN30[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Even a monopolist is free to integrate, especially when integration creates no new monopoly in any second area. Such an integration allows the defendant to achieve cost-savings by elimination of double marginalization. In other words, prior to vertical integration, the firms providing complementary products would earn margins over cost before their products reached consumers. After integration, goes the theory, there is no need for two entities to earn margins over cost, and the merged entity would eliminate that cost and pass on some of those cost savings to consumers in order to attract additional customers. Thus, it would rarely be an antitrust violation for a firm to supply itself through vertical integration, and a plaintiff would not generally have a right under ***antitrust law*** to demand that a defendant forgo supplying itself from an in-house source.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN31[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Vertical expansion by a monopolist, without more, does not violate *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, unless there is an allegation of an anticompetitive incentive to create a downstream monopoly, or other special circumstances in which a monopolist's vertical expansion could be anticompetitive.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN32[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Taking control of and exploiting control of a previously cooperative mechanism is not vertical integration.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN33[] **Tying Arrangements, Sherman Act Violations**

The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms.

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN34[] **Summary Judgment, Entitlement as Matter of Law**

The court of appeals reviews a decision to grant summary judgment de novo. Summary judgment is appropriate only if there are no disputed questions of material fact and the moving party is entitled to judgment as a matter of law, so the court examine the record in the light most favorable to the non-movant, granting it the benefit of all reasonable inferences that may be drawn from the evidence and reversing if the court find a genuine issue concerning any fact that might affect the outcome of the case.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN35[] **Summary Judgment, Evidentiary Considerations**

On summary judgment, courts must refrain from making credibility determinations or weighing evidence.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN36[] **Private Actions, Sherman Act**

When determining whether there is a genuine issue of material fact the substantive law will identify which facts are material. The requirement in that the plaintiffs' claims make economic sense do not introduce a special burden on plaintiffs facing summary judgment in antitrust cases.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN37[] **Tying Arrangements, Sherman Act Violations**

A competitor's claim that a rival used monopoly power in a tying product market to gain a monopoly in a tied product market is facially anticompetitive and exactly the harm that antitrust laws aim to prevent.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN38[] **Tying Arrangements, Sherman Act Violations**

Tying is conduct in which a firm will sell one product, the tying product, but only on the condition that the buyer also purchases a different (or tied) product. The seller will purchase the tied product not because the party imposing the tying requirement has a better product or a lower price but because the seller has power or leverage in the market for the tying product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN39[] **Tying Arrangements, Per Se Rule**

Tying is still nominally subject to a per se rule of illegality, but it is a most peculiar per se rule. The factual elements that must be proven for a tying claim capture much of what must be demonstrated in a rule of reason case.

Showing that the purchase of the tied product was forced uses many of the same concepts used to analyze refusals to deal: some assessment of market power, rough predictions of anticompetitive harm, and consideration of procompetitive justifications. While some tying arrangements are still unlawful, such as those that are the product of a true monopoly, that conclusion must be supported by proof of power in the relevant market. Even when treated as per se illegal, the Supreme Court has almost always been willing to consider a defendant's offered justifications.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN40[] Tying Arrangements, Per Se Rule

When the defendant is a dominant firm and meets a much stricter power requirement, the "special screening function" of the tying factors is largely unnecessary, and the more general standards of *§ 2* of the Sherman Act, *15 U.S.C.S. § 15*, become relevant because the technical requirements attach only to per se ties. Thus, when the defendant is a monopolist in the "tying product," it may be superfluous to go through a detailed inquiry into whether there are "separate products." Similarly, when a defendant's market share and the underlying market structure make monopolization or attempt plausible, then a tie that contributes significantly to the maintenance or creation of monopoly power violates *§ 2* even though it is unilaterally imposed.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN41[] Tying Arrangements, Sherman Act Violations

Whether one or two products are involved turns on the character of the demand for the two items. For service and parts to be considered two distinct products, there must be sufficient demand so that it is efficient for a firm to provide service separately from parts.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN42[] Tying Arrangements, Sherman Act Violations

The fact that buyers may wish to purchase and use two complementary products together does not, in and of itself, convert the two separate products into a single product. Rather, the market must be assessed at the pre-contract rather than post-contract stage. A grouping of sales covered by a single contract does not become a relevant market for that reason.

Communications Law > ... > Rules & Regulations > Regulated Practices > Introducing Competition

HN43[] Regulated Practices, Introducing Competition

A provider of Interconnect services bundles and re-sells ads from multiple "multichannel video programming distributors" (MVPDs) in a regional market. An ad rep has a more direct relationship with an MVPD, directly representing it in regional and/or local ad sales, and potentially acting as its representative with an Interconnect. The "character of the demand" for the two services also differs, as demonstrated by how the market participants have sold and purchased the services.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN44[ ] Scope, Monopolization Offenses

In applying the antitrust laws, the courts care more about economic substance than about form.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN45[ ] Tying Arrangements, Sherman Act Violations

When a defendant adopts a policy that makes it unreasonably difficult or costly to buy the tying product (over which the defendant has market power) without buying the tied product from the defendant, it forces' buyers to buy the tied product from the defendant and not from competitors. Liability is appropriate where the monopolist bars a rival from cost-efficient means of distribution even if some means of distribution remain open.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN46[ ] Tying Arrangements, Sherman Act Violations

Bundling in non-competitive markets does not necessarily provide insight into whether a tie is efficient rather than reflective of increased market power exploitation, while unbundling in competitive markets likely reflects efficiencies.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

HN47[ ] Price Fixing & Restraints of Trade, Horizontal Market Allocation

Antitrust law is rightly skeptical of mechanisms that permit competitors jointly to set prices and other terms of dealing. Collaboration between actual or potential competitors can be rife with opportunities for anticompetitive activity.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

HN48[ ] Price Fixing & Restraints of Trade, Horizontal Market Allocation

The government antitrust enforcement agencies provide guidance on competitor collaborations. Factors that show anticompetitive effect include whether the collaboration may: (1) Limit independent decision making or combine the control of or financial interests in production, key assets, or decisions regarding price, output, or other competitively sensitive variables, otherwise reduce the participants' ability or incentive to compete independently, potentially facilitate explicit or tacit collusion through facilitating practices such as the exchange or disclosure of competitively sensitive information or through increased market concentration, successfully eliminate procompetitive pre-collaboration conduct, such as withholding services that were desired by consumers when offered in a competitive market.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

HN49[] **Sherman Act, Defenses**

The procompetitive benefits typically recognized in ***antitrust law*** include evidence of higher output, improved product quality, energetic market penetration, successful research and development, cost-reducing innovations, and the like.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

HN50[] **Sherman Act, Defenses**

As a general matter, the evidence supporting a prima facie case need not be as specific as the evidence supporting a procompetitive justification because if the defendants have a procompetitive justification, it must have been a motivating factor for the restraint, and the defendants should be able to establish it rather easily. To the extent that the defendants' expectation of profit came from something other than a restriction of competition, they should have evidence and are in the best position to provide it.

Mergers & Acquisitions Law > Merger Guidelines

HN51[] **Mergers & Acquisitions Law, Merger Guidelines**

The United States Department of Justice and Federal Trade Commission, Horizontal Merger Guidelines, identify as their unifying theme the proposition that mergers should not be permitted to create, enhance, or entrench market power or facilitate its exercise by enhancing a firm's market power. One example of an anticompetitive merger is: Firms A and B operate in a market in which network effects are significant, implying that any firm's product is significantly more valuable if it commands a large market share or if it is interconnected with others that in aggregate command such a share. Prior to the merger, they and their rivals voluntarily interconnect with one another. The merger would create an entity with a large enough share that a strategy of ending voluntary interconnection would have a dangerous probability of creating monopoly power in this market. The interests of rivals and consumers would be broadly aligned in preventing such a merger.

Antitrust & Trade Law > Sherman Act > Defenses

HN52[] **Sherman Act, Defenses**

Any defense premised upon the proposition that competition itself is inefficient, unreasonable, or confusing is not cognizable.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN53[] **Per Se Rule & Rule of Reason, Sherman Act**

And while protection against free-riding is generally recognized as a procompetitive goal, when payment is possible, free-riding is not a problem because the "ride" is not free. Often instances of claimed free riding are really complaints about competition, particularly when there are joint costs, and complete market exclusion is a suspiciously excessive remedy for claimed free riding, even where a certain amount of free riding actually occurs.

Antitrust & Trade Law > Sherman Act > Remedies

HN54[] **Sherman Act, Remedies**

Courts are ill suited to act as central planners, identifying the proper price, quantity, and other terms of dealing.

Antitrust & Trade Law > Sherman Act > Remedies

HN55[] **Sherman Act, Remedies**

A court should not impose a duty to deal that it cannot explain or adequately and reasonably supervise. Yet courts are often called upon to undertake complicated, long-term supervision of complex cases and remedies. The judiciary need not and should not adopt a posture of learned helplessness in the face of proven antitrust violations.

Antitrust & Trade Law > Sherman Act > Remedies

HN56[] **Sherman Act, Remedies**

Evidence of an earlier course of dealing helps address, at least to some degree, administrability concerns, presumably profitable terms already agreed to by the parties may suggest terms a court can use to fashion a remedial order without having to cook them up on its own.

Antitrust & Trade Law > Sherman Act > Remedies

HN57[] **Sherman Act, Remedies**

Antitrust courts normally avoid direct price administration, relying on rules and remedies that are easier to administer. If a pricing remedy proves too complicated, then structural remedies may be preferable. Even mildly reprehensible behavior might be enough to challenge a firm whose power is significant and could justify imposing a more substantial remedy (e.g., divestiture or dissolution versus an injunction.)

Antitrust & Trade Law > Sherman Act > Remedies

HN58[] **Sherman Act, Remedies**

Court-imposed and court-supervised remedies can be imposed without a defendant's consent after a finding of liability.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN59[] **Standing, Requirements**

A private civil plaintiff in an antitrust case must establish antitrust injury, which requires proof that its claimed injuries are of the type the antitrust laws were intended to prevent and reflect the anticompetitive effect of either the violation or of anticompetitive acts made possible by the violation.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN60[] **Standing, Requirements**

When a monopolist creates a monopoly in the tied market, rivals are often excluded from the market, thereby losing market share or sales. In such cases courts ordinarily grant standing to the excluded or impeded rival. Competitors may be able to prove injury before they actually are driven from the market and competition is thereby lessened. The case for relief will be strongest where competition has been diminished. Competitors suffer antitrust injury when they are forced from the market by exclusionary conduct. When the plaintiff's injury is linked to the injury inflicted upon the market, such as when consumers pay higher prices because of a market monopoly or when a competitor is forced out of the market, the compensation of the injured party promotes the designated purpose of the ***antitrust law***, the preservation of competition. This rule is integral to an effective antitrust regime because the foreclosed rival's injury is entirely independent of the amount or existence of any injury to buyers.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN61[] **Standing, Requirements**

The general rule is that customers and competitors in the affected market have antitrust standing. Competitors and consumers in the market where trade is allegedly restrained are presumptively the proper plaintiffs to allege antitrust injury. Competitors and consumers are favored plaintiffs in antitrust cases. Competitors and consumers are favored plaintiffs in antitrust cases.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN62[] **Standing, Requirements**

Rivals in the tied market may be "foreclosed" when their entry or expansion is impeded or they lose existing market share or sales. Consumers lose the benefits of any entry, expansion, competition, or innovation that independent rivals might have injected into the tied market. In such cases courts ordinarily grant standing to the excluded or impeded rival.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

HN63[] **Standards of Review, Abuse of Discretion**

The court of appeals reviews the district court's exclusion of evidence for an abuse of discretion. If a discretionary ruling is based on an error of law, though, it can often be deemed an abuse of discretion.

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN64[] **Expert Witnesses, Qualifications**

Expert opinion testimony is admissible if (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue, (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods, and (d) the expert has reliably applied the principles and methods to the facts of the case. *Fed. R. Evid. 702*. An expert's opinion may overlap with the jurors' own experiences or cover matters that are within the average juror's comprehension, so long as the expert uses some kind of "specialized knowledge" to place the litigated events into context. All you need to be an expert witness is a body of specialized knowledge that can be helpful to the jury.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN65[] **Sherman Act, Claims**

Hiring another expert on causation is not a legal requirement for successfully bringing an antitrust case. Rather than requiring *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, liability to turn on a plaintiff's ability or inability to reconstruct the hypothetical marketplace absent a defendant's anticompetitive conduct, which would only encourage monopolists to take more and earlier competitive action, courts have inferred causation when a defendant's conduct reasonably appears capable of making a significant contribution to maintaining monopoly power. To the extent there may be an underlying problem of proof, the defendant is made to suffer the uncertain consequences of its own undesirable conduct, and causation queries go to questions of remedy, not liability.

[*434]

HAMILTON, *Circuit Judge*. Plaintiff Viamedia, Inc. has sued defendant Comcast Corporation for violating *Section 2 of the Sherman Act*, *15 U.S.C. § 2*. Viamedia accuses Comcast of using its monopoly power in one service market to exclude competition and gain monopoly power in another service market. The district court dismissed Viamedia's case, in part on the pleadings and in part on summary judgment. We reverse. Viamedia's allegations and evidence are sufficient to state and support claims that should be presented to a jury.

Because the district court dismissed part of the case on the pleadings and the rest on summary judgment, we must **[**4]** treat as true Viamedia's factual allegations and give it the benefit of factual disputes and favorable inferences from the evidence. To make sense of this case, we explain some basic business arrangements in the markets that put television programming in American homes, as well as market definitions necessary in evaluating the antitrust claims.

The parties agree on the definitions of the relevant geographic and service markets. Viamedia asserts claims against Comcast for monopolization in three geographic markets: the Chicago, Detroit, and Hartford metropolitan areas. In each of those three geographic markets Comcast now has monopoly power over two separate service markets: Interconnect services and advertising representation services. Interconnect services are cooperative selling arrangements for advertising through an "Interconnect" that enables providers of retail cable television services to sell advertising targeted efficiently at regional audiences. Advertising representation services for retail cable television providers assist those providers with the sale and delivery of national, regional, and local advertising slots. This market in advertising representation services is the **[**5]** one in which Viamedia competed with Comcast. In each geographic market, according to Viamedia's evidence, Comcast used its monopoly power over the cooperative Interconnects to force its smaller retail cable television competitors to stop doing business with Viamedia, thereby gaining monopoly power over the market for advertising representation services.

Viamedia has presented evidence that Comcast's elimination of its only competitor **[*435]** in the advertising representation services market has harmed competition in violation of *Section 2*. According to Viamedia's evidence, its customers for advertising representation services (i.e., Comcast's retail cable competitors) did not switch to Comcast because it offered a better-quality or lower-priced service. They switched because Comcast used its monopoly power over the Interconnects to present its cable competitors with a Hobson's choice: either start buying advertising representation services from us and regain access to the Interconnects, or keep buying those services from Viamedia and stay cut off from the Interconnects they needed to compete effectively. According to Viamedia's evidence, Comcast deliberately adopted a strategy it knew would cost Comcast **[**6]** itself millions of dollars in the short run, but the strategy eventually gave it monopoly power in these local markets for advertising representation services. ***HN1***[] Giving Viamedia the benefit of its allegations and evidence, this is not a case in which *Section 2* is being misused to protect weaker competitors rather than competition more generally. See *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 906, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*, quoting *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 338, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (purpose of the antitrust laws is to protect "*competition*, not *competitors*").

As now the sole provider of advertising representation services to its cable competitors, Comcast can also damage competition beyond the relatively narrow markets for advertising representation services in Chicago, Detroit, and Hartford. This control allows it to undercut competition in two more markets: cable television services to retail customers, and the sale of advertising spots to local retailers. By establishing itself as the gatekeeper for its cable competitors' advertising, Comcast has gained access to their sensitive marketing and promotional pricing information. And because Comcast took control of its rival cable companies' inventory of local ads, local retailers no longer have a choice of cable companies from whom they buy ad time.[1]

Viamedia has thus **[**7]** offered evidence to defeat summary judgment on its claim that Comcast unlawfully used its monopoly power over the Interconnects to tie those services to its advertising representation services. Viamedia has also adequately stated a claim that Comcast has unlawfully refused to deal with Viamedia and any cable competitor that bought advertising representation services from Viamedia. On the pleadings and the summary judgment record, Viamedia's *prima facie* claims of monopolization are similar to but stronger than the successful plaintiff's *Section 2* claim in *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. We remand this case for any further necessary discovery and for trial.

In Part I, we lay out the key facts: in Part I-A, the structure of the cable television markets; in Part I-B, the specifics of Comcast's and Viamedia's businesses, including the advertising representation services they both offer and the critical role that Interconnects play for providers of cable television programming; and in Part I-C, Comcast's refusal to continue providing Interconnect access to Viamedia or **[*436]** any of its customers in Chicago, Detroit, and Hartford. In Part II, we review the district court proceedings. Then, in Part III-A, we lay out the legal standards **[**8]** under *Section 2* that apply to Viamedia's claims. In Part III-B-1, we apply that law to Comcast's decision to refuse to allow Viamedia or its customers access to the Interconnects. In Part III-B-2, we apply that law to Viamedia's claim that Comcast illegally tied Interconnect services to advertising representation services. In Part III-C, we evaluate in greater detail the harm to competition alleged by Viamedia and the procompetitive justifications offered by Comcast, highlighting considerations that will be relevant on remand. Finally, in Parts III-D and III-E, we address issues of antitrust injury and the district court's exclusion of expert witnesses.

I. *The Markets and the Competitors*

Because the district court dismissed one claim on the pleadings and the other on summary judgment, we present the relevant allegations and evidence in the light reasonably most favorable to plaintiff Viamedia, the non-moving party. The parties agree on the definition of the relevant geographic markets, and the relevant service-product markets are not disputed on appeal. The relevant geographic markets are the Chicago, Detroit, and Hartford metropolitan areas, called Direct Marketing Areas or DMAs. The monopolized **[**9]** service market in each metropolitan area is that for the sale of advertising representation services ("ad rep services" in industry terms) related to so-called spot advertising on cable systems. To assess the harm to competition that can result from monopolization of the market for ad rep services, we must explain the related markets for retail cable television services to consumers, as well as access to the cable companies' cooperative advertising distribution platforms called Interconnects.

A. *Cable Television: History, Revenue Sources, and Competition*

Understanding these markets' competitive dynamics requires a bit of history about the evolution of television in the United States, including the challenges that cable companies have faced in competing with over-the-air broadcast programming.

1. *Television Programming and Advertising*

An awkward acronym, MVPDs, stands for "multichannel video programming distributors." That umbrella term includes cable companies like Comcast and Cox, as well as "overbuilders" like RCN and Wide Open West, known as WOW!. Beyond cable companies, MVPDs also include direct-broadcast satellite companies (AT&T's DirecTV and Dish Network), as well as companies formerly **[**10]** associated only with telephone service (e.g., Verizon's

---

[1] Comcast sells advertising representation services through an entity called Comcast Cable Communications Management, LLC, which was formerly called Comcast Spotlight. The district court and the parties have referred to Comcast's ad-related services division as both Comcast and Comcast Spotlight. We use "Comcast" to refer to both together but make clear when we refer to Comcast Spotlight in particular.

FiOS and AT&T's U-verse). The two largest MVPDs are Comcast and AT&T-DirecTV, which together have more than 20 million television subscribers.[2]

Focusing on the advertising-supported network programming carried by these MVPDs, we explain the special obstacles cable companies face in taking advantage of advertising revenue. The cable companies' solution—jointly developing the Interconnects—created a later opening for a dominant cable company like Comcast to use its power over several Interconnects to gain a monopoly in a related market and to **[*437]** gain some measure of oversight and control of its smaller cable competitors.

For decades, television programming was dominated by three broadcast networks and was funded largely by the advertisements that ran in the programming. To help advertisers know how many and which viewers they were reaching, the industry adopted various audience measurement metrics, most importantly "Designated Market Areas" or "DMAs." DMAs are meant to capture regional audiences that are likely to view the same programming. They often encompass more than a single county and can also cross state lines.

As cable television **[**11]** companies got started, they typically won exclusive franchise areas granted by local governments. Their further expansion was then "subsidized by monopoly profits" from these exclusive territories. U.S. Dep't of Justice, *Voice, Video and Broadband: The Changing Competitive Landscape and Its Impact on Consumers* 71 (Nov. 2008) (DOJ Report). Cable companies then grew and consolidated by sewing together such local franchises. Critically for this case, the patchwork combinations of local franchise areas did not align with DMAs.

2. *Revenue Sources: Competition and Cooperation*

Most revenue for MVPDs comes from (1) the sale of advertising and (2) customer subscription fees. In geographic areas where MVPDs overlap, they compete on both fronts. The conduct at issue in this litigation affects both fronts and millions of households in the key metropolitan areas, and it potentially affects tens of millions more in other metropolitan areas.

a. *Competition for Advertising Dollars and Cooperation Through Interconnects*

The mechanics of advertising are central to this lawsuit, accounting for the existence of the market in which Comcast and Viamedia competed. For every hour of programming, networks allot **[**12]** a certain number of minutes for advertisements. Contracts between an MVPD and a network (e.g., CNN or ESPN) typically make two or three of those minutes per hour available for the MVPDs to sell themselves, with the networks selling the remainder. MVPDs can sell these time slots to advertisers in various increments of time, such as 15, 30, or 60 seconds. Each increment is typically referred to as a "spot cable availability," or "spot avail." Approximately 75% of the spot avails are sold to advertisers. The MVPDs use the remaining 25% to advertise their own products and services.

This brings us to the source of the problem here. In the early days of cable, advertisers who wanted to reach an entire DMA such as Chicago faced an obstacle. Cable systems had grown organically, with each cable service obtaining franchises "through the simple addition of new systems as opportunities arose," leaving cable "company holdings ... typically scattered across the country." Patrick R. Parsons, *Horizontal Integration in the Cable Television Industry: History and Context*, 16 The Journal of Media Economics, no. 1 (2003) at 23, 37. Most important, the DMAs that helped broadcast television advertising reach **[**13]** entire marketing areas did not align with cable companies' franchise areas. And yet, for a substantial percentage of spot avails, it would be most profitable to sell them on a regional, DMA-wide level.

As a result, cable companies had a weaker competitive position for advertising dollars vis-à-vis the broadcast networks and satellite providers, who could easily deliver advertising to an entire DMA. Cable companies could not

---

[2] For statutory definitions of "multichannel video programming distributor" (MVPD), "cable service," and "video programming," see *47 U.S.C. § 522(13)*, *(6)*, and *(20)*.

offer DMA-wide coverage, so advertisers would pay less for spot **[*438]** avails. To ensure DMA-wide coverage, an advertiser had to contract separately with each cable provider whose footprint included any part of that DMA. This was inefficient.

The cable companies came up with a solution. They banded together to create a platform called an Interconnect that could bring together all cable providers within a given DMA. The cable companies could contribute their DMA-wide spot avails to the Interconnect, which would provide a single point of contact for advertisers. An advertiser could then purchase a particular time slot and be assured that its advertisement would appear in cable subscribers' programming throughout the DMA. Thus, Interconnect services are provided DMA by DMA. **[**14]** As described by Comcast, "interconnects were formed voluntarily by MVPDs in markets to pool their resources and offer DMA-wide selling of cable/MVPD advertising inventory[.] ... Otherwise, advertisers trying to cobble together a wide-footprint, MVPD-based advertising campaign would have to go MVPD-by-MVPD."

To cable subscribers, the national, regional, and local advertisements appear seamlessly within television shows and live sports events. But the hidden seam of the Interconnects—and the ways its spot avails are paid for and delivered—is the locus of Comcast's allegedly anticompetitive conduct.

For purposes of this suit, the services provided by the Interconnects must be distinguished from advertising representation services. An Interconnect operator will:

- Pool inventory of spot avails from multiple MVPDs on a DMA-wide basis;
- Employ sales personnel to sell and/or coordinate sales of DMA-wide spot avails;
- Distribute schedules of participating MVPDs' spot avails to facilitate coordinated merging of local advertising schedules;
- Coordinate insertion of ads (although MVPDs themselves generally provide the technical equipment for ad insertion into programming); and
- Collect money from **[**15]** Interconnect advertisers and coordinate payment to participating MVPDs or their ad representatives.

Thus, the Interconnects allow the participating MVPDs to sell their DMA-wide advertising in a way that mimics the broadcast networks' and satellite providers' comprehensive coverage of a DMA.[3]

All participating MVPDs were intended to benefit from the Interconnects, and all were encouraged to participate to maximize the value of the DMA-wide spot avails. To quote Comcast again: "The value of an interconnect increases as more MVPDs in an area participate, so our incentive is to have as many MVPDs participate as possible." First Am. Cplt. ¶ 39. Because MVPDs will contribute only about one-third of their spot avails to the Interconnects, and compete with one another for local ad sales, Interconnect participants took steps to avoid giving preferential treatment to any single MVPD participant. To ensure fair administration of the Interconnects, they were initially conceived as being operated by non-MVPD, neutral third parties. At the time of their formation, **[*439]** Interconnects were overseen by boards of directors elected by all MVPD members.

Interconnects thus became valuable bridges to advertisers, **[**16]** translating into millions of dollars of advertising revenue each year in each market. Interconnects are especially valuable to smaller MVPDs. Once an Interconnect gains a critical mass of subscribers, regional or national advertisers are less likely to bother dealing with standalone MVPDs, especially those with small shares of DMA subscribers. And selling spot avails only to local (as opposed to DMA-wide or national) advertisers will not compensate for the lost revenue if an MVPD is shut out of the Interconnect. Purely local spot avails are sources of revenue and local business relationships, but they have lower profit margins.

---

[3] This type of cooperative arrangement is also available at the national level, with National Cable Communications (NCC) able to place ads across multiple DMAs or nationwide, replicating broadcast networks' and satellite providers' nationwide coverage. As the country's largest cable provider, Comcast now controls 60% of the NCC.

HN2[] An Interconnect is what economists call a "two-sided platform." It serves as a clearinghouse, offering "different products or services to two different groups who both depend on the platform to intermediate between them." *Ohio v. American Express Co., 138 S. Ct. 2274, 2280, 201 L. Ed. 2d 678 (2018)*. Such connectivity gives an Interconnect its value but can also be misused to harm competition.

On one side of the Interconnect are the advertisers, who are interested in reaching the greatest number of viewers, especially within a targeted DMA. The more subscribers an MVPD can bring to the table, the more advertisers will pay to reach that **[**17]** expanded audience. On the other side of the Interconnect are the MVPDs and their retail customers. The more advertisers that participate, the more valuable the Interconnect is to the MVPDs and their customers. Cable customers watching a ballgame or their favorite comedy may not think about the value of the advertisements they see, but MVPDs can use advertising revenue to keep monthly subscription prices lower and to run promotional discounts to bring in even more subscribers. Those new subscribers will in turn make the MVPD a more valuable and attractive advertising venue. The Interconnect can thus produce a competitively virtuous feedback loop. HN3[] "[T]he value of the services that [an Interconnect] provides increases as the number of participants on both sides of the [Interconnect] increases." See *American Express, 138 S. Ct. at 2280-81*. Or, as Comcast puts it: "The value of an interconnect increases as more MVPDs in an area participate, so our incentive is to have as many MVPDs participate as possible."

HN4[] An Interconnect is not necessarily, however, a one-way ratchet to increased demand. Decreased participation on either side of the Interconnect can also reduce its value. Thus, adapting language from *American Express*, an Interconnect **[**18]** "losing participation on [the cable provider side] decreases the value" of the advertiser side, and if advertisers "leave due to this loss in value, then the [Interconnect] has even less value to [the cable providers]—risking a feedback loop of declining demand." *138 S. Ct. at 2281*.

Whether the Interconnects are procompetitive or not depends on the competitive dynamics among its participants. In a competitive market, for example, the risk of negative feedback may serve as a check on the ability of any one participant to raise prices or otherwise exert market power. See *138 S. Ct. at 2281 n.1*. Conversely, in a less competitive market, access to the crucial Interconnects can be used to exclude competitors and harm competition. The Interconnects are so important that exclusionary conduct can become a weapon to **[*440]** injure competitors.[4]

b. *Competition for Subscribers*

We have just outlined the ways in which MVPDs compete and cooperate in the pursuit of advertising revenue, which is the focus of Viamedia's claims. Yet to see the full potential harm to competition caused by Comcast's alleged conduct, we must also describe the MVPDs' competition for subscribers. Comcast's alleged conduct is all the more dangerous to competition because it **[**19]** was made possible by accelerating industry consolidation and has the potential to interfere with MVPDs' competition with one another. The industry dynamics provide important context to understand the exclusion of Viamedia from a handful of DMA Interconnects, at least initially, and the broader potential impact on MVPD markets in general.

i. *Growing MVPD Competition*

Until the mid-1990s, cable companies typically operated as monopolists with exclusive local cable franchises in their respective areas. They showed little interest in building into one another's franchise areas and forcing competition. A combination of legal, regulatory, and practical barriers limited competitive entry by new MVPDs, and those limits were often supported by incumbent cable providers. DOJ Report at 32. Thus, only satellite companies DirecTV and Dish Network, with their nationwide coverage, could compete with cable companies for subscribers. Satellite companies were able to take some market share, particularly in rural areas, but their competitive threat to cable companies proved to be limited. DOJ Report at 5, 10, 22 & n.88, 59.

---

[4] There is no challenge here to the legality of the Interconnects themselves, at least as originally conceived, which seem to fit the model of certain procompetitive cooperative arrangements among competitors. See generally *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*. Whether that remains the case when one MVPD controls an Interconnect is a question not presented here.

The 1990s saw major changes in the MVPD landscape. The cable industry shifted "toward **[**20]** regional consolidation, with specific companies carving out large parts of the country within which to group their systems." Patrick R. Parsons, *Horizontal Integration in the Cable Television Industry: History and Context*, 16 Journal of Media Economics, no. 1 (2003) at 23, 37. The larger companies "bought and traded individual systems," with "the various systems in a given city" increasingly "fall[ing] into the hands of a single cable company." *Id.*

With changes in technology and the regulatory environment, however, cable companies were about to face new competitors. The *Telecommunications Act of 1996* was intended to break down barriers among cable, telephone, satellite, and internet businesses to galvanize competition—and it did. Larry Satkowiak, *The Cable Industry: A Short History Through Three Generations* 47-48 (The Cable Center 2015). The lines between MVPDs, traditional telephone companies, and new broadband internet service providers became increasingly blurred as these companies started offering multiple services to consumers. DOJ Report at 1, 17, 19. Cable companies introduced telephone voice services, which had previously been a legal monopoly in many states, and started selling **[**21]** bundles of telephone, video, and broadband Internet access. *Id.* at 9, 11. Meanwhile, broadband internet service providers like RCN and WOW!, known as "overbuilders," built their own infrastructure in areas already served by incumbent cable companies and rolled out multiple services. *Id.* at 8 & **[*441]** n.33, 21 & n.78, 47.[5] And traditional telephone service providers responded in kind. Verizon introduced its FiOS service in 2005, and AT&T followed with its MVPD service dubbed "U-Verse." *Id.* at 6-7.

Thus, cable providers—formerly the beneficiaries of cable franchise monopolies—suddenly faced a new array of competitors. Today, many DMAs are served by an incumbent cable provider (e.g., Comcast), one or more overbuilder cable providers (e.g., RCN and WOW!), one or more telephone companies offering video services (e.g., Verizon FIOS), and two satellite dish providers (DISH and AT&T-DirecTV).

ii. *Incumbent Cable Companies' Efforts to Stymie Competition for Subscribers*

This new competition led to credible reports of lower prices and falling cable subscription rates in **[**22]** areas with new MVPD entrants—exactly what one would hope to see in competitive markets. DOJ Report at 38-39 & nn.180-83. Incumbent cable companies were forced to "respond[] to new entry by improving customer service, increasing bandwidth speeds ..., adding more programming channels and services, and rolling out enhanced products (such as HD)." *Id.* at 48; see also *id.* at 45-46. But new MVPD competitors continued to encounter obstacles, including some put in place by the incumbent cable providers. The incumbents had strong incentives to try to stymie these new competitors. As the FCC noted, competition from new cable companies reduces rates far more than competition from satellite companies. *FCC 2007 Report and Order, 22 FCC Rcd 5101 [slip op] at 26 ¶ 50*.

Among the obstacles for new competitors relevant to this case, incumbent cable providers entered into exclusive contracts with apartment buildings dense with potential subscribers, which new entrants could not reach, and exclusive and discriminatory contracts with programmers, whose content new entrants could not carry. *FCC 2007 Report and Order, 22 FCC Rcd 5101 [slip op] at 18 ¶ 35*. Overbuilders and the FCC reported in 2008 that "[e]xclusivity and discrimination in access to programming are the most powerful **[**23]** tactics that incumbent operators use in an effort to block or otherwise constrain [new] competition." DOJ Report at 74; see also *id.* at 73, 75, 89; Petition of RCN Telecom Services, Inc., to Deny Applications or Condition Consent at 24, 27, *In the Matter of Applications for Consent to the Transfer of Control of Licenses of Comcast Corporation and AT&T Corporation to AT&T Comcast Corp.*, FCC MB Docket 02-70 (Apr. 29, 2002) (RCN 2002 FCC Petition) (RCN recounting "the difficulties it has encountered in gaining, and keeping, access to critical, non-substitutable local programming

---

[5] "The term 'overbuild' describes the situation in which a second cable operator enters a local market in direct competition with an incumbent cable operator. In these markets, the second operator, or 'overbuilder,' lays wires in the same area as the incumbent, 'overbuilding' the incumbent's plant, thereby giving consumers a choice between cable service providers." Report and Order and Further Notice of Proposed Rulemaking at 15 n.97, *In the Matter of Implementation of Section 621(a)(1) of the Cable Communications Policy Act of 1984 as amended by the Cable Television Consumer Protection and Competition Act of 1992, FCC MB Docket 05-311, 22 FCC Rcd 5101, 2007 FCC LEXIS 1867 (Mar. 5, 2007)* (FCC 2007 Report and Order).

controlled by Comcast" and the "numerous instances in which the incumbents (Comcast and its predecessors) have received exclusive building rights covering a period of years").

Incumbent providers also created barriers to signing up individual customers by locking existing subscribers into long-term contracts. Because of these long-term contracts "there is only a small window when **[*442]** a customer is able to move." DOJ Report at 52. "The incumbent [cable provider] knows when that window is, but the new entrant does not." *Id.* "The new entrant must spend resources marketing to customers during periods when they cannot switch or will have **[**24]** disincentives to doing so," while "an incumbent can target discounts and other incentives to subscribers immediately prior to the expiration of their contracts." *Id.* at 52-53. This competitive dynamic helps explain why smaller cable companies would hesitate to turn over their promotional advertising plans to their dominant cable competitor in advance of the actual promotions—which is the likely result of Comcast's actions challenged in this case.

B. *The Ad Rep Services Market*

1. *The Role of Viamedia*

As MVPDs were trying to establish themselves in new markets, the sale of spot avails provided a key source of revenue that helped subsidize offers to attract subscribers. Incumbent cable companies had been selling their spot avails to advertisers for decades, with the scale, internal structures, and sales and operational personnel to support those activities. The new overbuilders and telephone service providers had no such experience or infrastructure.

Enter Viamedia. The new MVPD competitors could have all spent money to hire their own advertising sales staffs, to buy and implement billing systems, to set up monitoring protocols, and to deal with the necessary equipment to insert those ads seamlessly **[**25]** and accurately into programming. Many, including MVPDs in Chicago, Detroit, and Hartford, chose instead to contract for these spot advertising services with Viamedia. RCN, for example, could focus on competing with incumbent MVPDs through attracting subscribers and building out its footprint, with an assured ad revenue stream managed by Viamedia. With an Interconnect already in place, the new MVPDs (or Viamedia on their behalf) could sign an agreement with that Interconnect so that advertisers could place DMA-wide ads that reached the new entrants' subscribers along with the those of the incumbents.

These ad rep services are at the core of this lawsuit. The ad rep services that Viamedia provides its customer MVPDs include:

- Allocating the MVPD's inventory of spot avails among different sales channels—i.e., local ads, sold in competition with other MVPDs; DMA-wide ads; or multi-DMA/national ads;
- Researching, marketing, pricing, and selling an MVPD's inventory of spot avails to advertisers, including the approximately one-third of spot avails sold to local retailers in competition with other MVPDs;
- Interfacing with the relevant Interconnect for spot avails allocated to regional, DMA-wide **[**26]** ads;
- Providing technical services such as encoding video files and operating and maintaining the software needed to run, insert, traffic, monitor, and archive ads;
- Organizing the MVPD's inventory of spot avails into schedules and ensuring that each ad runs correctly during those schedules; and
- Performing financial services, such as accounting, billing, and collection.

Viamedia employs the personnel needed for these functions, spreading these costs among all of its MVPD customers. If an MVPD retained Viamedia to provide this full range of services for all of its inventory of spot avails, including the competitive selling of local spot avails, it was said that **[*443]** the MVPD had secured "full turnkey" representation. As overbuilders and telephone companies continued their build out, Viamedia was able to expand the areas and MVPD customers to which it could supply services.

2. *Vertically Integrated MVPDs*

By contrast, Comcast does not need an independent ad rep services provider like Viamedia. Instead, Comcast is vertically integrated and has its own wholly-owned subsidiary that provides ad rep services both in-house and to other competing MVPDs. In markets where Comcast does not operate the **[**27]** Interconnects, its in-house ad rep services arm secures Interconnect access for its own MVPD service and its customer/competitors' MVPD services, just as Viamedia used to do in Chicago, Detroit, and Hartford. Several other MVPDs have similar internal divisions that provide spot cable ad rep services.[6] In fact, Viamedia is unique in that it is the only ad rep services firm of any size that is independent—i.e., not owned by an MVPD.

MVPDs that have their own ad rep services divisions or subsidiaries, such as Comcast, compete with Viamedia to provide these services to other MVPDs. And just as MVPDs compete for subscribers wherever their service footprints overlap, the providers of ad rep services compete DMA by DMA. The ad rep services providers organize their sales forces around the boundaries of DMAs and provide services only to the MVPDs who have subscribers within those DMAs. Hybrid arrangements also exist. Some MVPDs do not contract for "full turnkey services," but instead seek ad rep services for only a portion of their spot avails and sell the remaining spot avails themselves.

This unusual market structure thus involves three levels of competition: (1) MVPDs compete against one another **[**28]** for subscribers; (2) some vertically integrated MVPDs' ad rep services arms compete against Viamedia (and potentially against each other) for clients; and (3) MVPDs compete with one another for some sales of their spot avails to advertisers. We need to keep all three levels in mind.

3. *Back to the Interconnects*

As part of the continuing industry consolidation in the 2000s, Comcast moved into many new DMAs. It also expanded from being one of several cable companies that participated in some DMA Interconnects to being the largest participant. For example, Comcast was able to acquire over 3,300 local cable franchising areas through its purchase of AT&T Broadband's and Adelphia's cable properties. *FCC 2007 Report and Order, 22 FCC Rcd 5101, [slip op] at 15 & n.95*. As Comcast repeatedly acquired other cable systems, it grew to be the largest participant in dozens of DMAs and became the sole "operator" or "manager" of those DMAs' Interconnects, including in Chicago, Detroit, and Hartford.

Yet the Interconnects continued to function as they had before industry consolidation. They provided a single point of contact for distributing DMA-wide ads, as well as access to and collecting fees from all MVPDs (or their ad rep service **[**29]** providers) that participated in the Interconnects. If an MVPD did not participate in an Interconnect, an advertiser could not reach its subscribers, making an ad buy within the DMA less valuable for any remaining MVPD Interconnect participants.

During this period, in 2003, Viamedia entered into agreements with Comcast for Interconnect access in the Chicago and **[*444]** Detroit DMAs, which ran until May 2012. Viamedia sought this access because it provided ad rep services to cable overbuilders RCN (in Chicago) and WOW! (in Chicago and Detroit) under contracts that ran until 2014. As noted above, typical industry practice is for approximately one-third of an MVPD's spot avail inventory to be sold on a DMA-wide basis. In line with that practice, Viamedia agreed to sell a portion of RCN's and WOW!'s spot avail inventory on a DMA-wide basis through the Comcast-controlled Interconnects. Viamedia sold the remaining portion of RCN's and WOW!'s spot avails both nationally and—in competition with Comcast—locally. Comcast also agreed not to solicit Viamedia's MVPD clients until four months before the Viamedia/MVPD contracts expired, although the MVPDs remained free to contact Comcast.

C. *Comcast Refuses **[**30]** Interconnect Access to Viamedia*

This was the competitive landscape for Comcast's conduct challenged in this lawsuit. Internal Comcast PowerPoint presentations explained that Comcast viewed its "Next phase" as "consolidat[ing the] core business" of ad rep services, and then "look[ing] at other businesses we can leverage (our technologies or platforms)." A212 n.68. There is evidence that Comcast saw the Interconnects as one such point of "leverage."

As noted, Viamedia's Interconnect access agreements with Comcast for the Chicago and Detroit DMAs were due to expire in 2012. Viamedia's contracts for ad rep services with RCN and WOW! were extended until 2015 (RCN) and

---

[6] These include Charter's Spectrum Reach, Cox's Cox Media, Altice's Suddenlink Media and Altice Media Solutions, and Mediacom's OnMedia.

2014 (WOW!). As 2012 neared, Comcast faced a choice. It could compete for RCN's and WOW!'s ad rep services business the following year, as it already competed for RCN's, WOW!'s, and other MVPDs' business in many other DMAs. Or it could try to use its control over the Interconnects to shut out the competition for ad rep services. At first, it appeared that Comcast would take the route of competition, contacting RCN and WOW! to express interest in selling them ad rep services. But Comcast then changed its strategy. It tried instead **[**31]** to take advantage of its control over the Interconnects. Comcast notified Viamedia in December 2011 that it would refuse to permit Viamedia any further access to the Interconnects. In June 2012 Comcast executed on that notice. For the first time in any DMA since the Interconnects had been created, an Interconnect operator—Comcast—had cut off Interconnect access to an MVPD or an MVPD representative.

Comcast executed this strategy in other DMAs, as well, similarly denying Viamedia access to Interconnects on behalf of Viamedia's customer MVPDs (Comcast's competitor MVPDs). For example, in the Hartford DMA, Comcast had previously provided full-turnkey service to AT&T's MVPD. When Frontier acquired AT&T's Hartford network in 2014, it had the option of assuming the Comcast contract. Frontier, however, had been unhappy with Comcast's customer service when it used Comcast in other DMAs, so it switched from Comcast to Viamedia. Comcast then excluded Frontier's spot avails from the Hartford Interconnect, resulting in millions of dollars in lost ad revenues for Frontier and Viamedia, as well as Comcast itself, and degrading the value of the Hartford Interconnect.[7] By contrast, in DMAs **[*445]** where the **[**32]** Interconnects were controlled not by Comcast but by other large, incumbent cable companies such as TimeWarner Cable, access to the Interconnects had not yet been pulled.

Comcast then returned to Viamedia with a series of offers that would have required Viamedia to "assign" 100% of its customers' spot avails to Comcast in exchange for a one-time "finder's fee." That was essentially an offer to pay Viamedia to exit the marketplace. At the end of July 2014, Comcast provided a more detailed offer. It would have had the same effect as the first offer—a payment to Viamedia to stop providing spot cable ad rep services. In August 2014, Viamedia received the third iteration of Comcast's offer, which at first appeared promising. When Viamedia received a detailed offer in writing, however, it discovered that Comcast had added a provision that would permit Comcast unilaterally, and on just four hours' notice, to take any ad inventory from Viamedia and contribute it to the Interconnect. That uncertainty would have rendered those spot avails virtually worthless to advertisers.

Along with these onerous terms, the revenue-share proposals appeared to be below market rate for Interconnect-only access, **[**33]** compared to both Viamedia's prior agreement with Comcast and other Interconnect-only access agreements in any other comparable DMAs. In short, the agreements did not offer access to the Interconnect in a way that would allow Viamedia to provide ad rep services to its MVPD customers. Nor were these terms to be found in any other Interconnect only agreement employed by any Interconnect operator in any DMA.

Moreover, during these "negotiations" in July 2014, the head of Comcast's cable spot ad rep services division and his colleague, Hank Oster, expressed concern that Comcast COO Dave Watson was "wavering on why we won't let Viamedia in the Interconnects." Whatever second thoughts some within Comcast might have had, however, Comcast's approach did not change. As Oster later candidly explained, by July 2014 Comcast already "had made the decision" to exclude Viamedia from the Interconnects. Comcast was also telling WOW! that it would not allow it to return to the Interconnect with Viamedia as its ad rep, and that Comcast was taking that position as part of its "strategic plan." A230.

Comcast urges us to infer—as a matter of law—that it was acting for procompetitive reasons. The evidence, **[**34]** though, can easily support the inference that Comcast was instead choosing to inflict financial pain on both its competitors *and itself* to gain monopoly power in the ad rep services market, which would also produce a new

---

[7] On these points, the record contains more precise numbers in documents that have been under seal. Here and elsewhere in this opinion, we have used verbal descriptions rather than specific numbers for important information that has been submitted under seal. We are skeptical, however, about the grounds for sealing much, if not all, of the evidence under seal. Simultaneously with this decision, we are issuing an order that unseals evidence we identified in an earlier order to show cause, and we are ordering the parties to show cause why any of the remaining sealed evidence, including that obtained from non-parties, should remain under seal at this time.

advantage over its retail cable competitors. By cutting Viamedia off from the Chicago and Detroit Interconnects in 2012, Comcast ensured that its competitor MVPDs' spot avails could not be distributed through the Interconnects while they were represented by Viamedia under their existing contracts.

This was an expensive decision for Comcast. As operator of the Interconnect, Comcast's internal analysis of the "Revenue Impact" of its decision predicted that Comcast itself would lose $10.6 million in just the first six months after cutting off Viamedia's (and thus RCN's and WOW!'s) **[*446]** access, including $2.3 million in lost cash flow. A838, A787-88. The evidence of actual effects is consistent with that prediction. In the years that RCN and WOW! were unable to access the Interconnects (June 2012 through December 2015), they lost approximately $27 million in ad revenue. Comcast itself lost $7 million in commissions. A248, A637, A648 (figs. 35, 46). Moreover, Comcast's own spot **[**35]** avails would have decreased in value because an advertiser could no longer reach all cable subscribers within the DMA through the Interconnect.

But as an amicus supporting Comcast points out, Comcast could easily afford to sacrifice millions in Interconnect fees and lower ad revenue in order to inflict this harm on its MVPD competitors, advertisers, and Viamedia. As the dominant MVPD provider in markets across the country, this "temporary and localized lost revenue is small potatoes," a mere "rounding error." Brief for Washington Legal Foundation's as Amicus Curiae Supporting Appellees at 22. Just so.

With Comcast and Viamedia as the only two providers of ad rep services in the Chicago and Detroit DMAs, Comcast's denial of Interconnect access to Viamedia left Comcast with an effective monopoly over both Interconnect services *and* ad rep services. The window of time between Viamedia's foreclosure from Interconnect access and Comcast's competitor MVPDs' return to the market to seek bids for their ad rep services would be the time for Comcast "to overpower ViaMedia," as a Comcast employee in the Detroit DMA explained. A217 (budget presentation). So the evidence supports an inference that Comcast willingly chose to inflict short-term financial losses on itself. Why? A reasonable **[**36]** explanation is that it did so because it could survive those losses (the "small potatoes" and "rounding error") to obtain and use monopoly power in the ad rep services market.

In this lawsuit Comcast has argued that RCN and WOW! chose it over Viamedia on the merits of its offered services. Comcast highlights, for example, testimony from an RCN representative that—after comparing Comcast's offer with Interconnect access to Viamedia's offer without—"It was not in the end a very difficult decision to make." DA688. But this answer presupposes that Comcast shutting its competitors out of the Interconnects could be a reasonable basis to treat RCN's decision as uncoerced. There is evidence that Comcast did just that. Contrary to the assertions of the district court and our colleague who dissents in part, for example, a Comcast employee working in the Chicago and Detroit DMAs explained that Comcast had adopted "a business practice" that "if an MVPD wants to get access to a Comcast controlled Interconnect, it has to hire Comcast as its sale representative." A215.

Viamedia's evidence also supports a finding that WOW! and RCN did not go willingly into Comcast's arms. Both pushed back against Comcast's **[**37]** demands (or threats) that they either use it for their advertising services or face exclusion from the Interconnects if they stayed with Viamedia. A WOW! employee communicating with Comcast reported back to WOW! colleagues that Comcast was "maintaining their position that [WOW!] can be in the IC [Interconnect] but only if they [Comcast] rep us directly." A215 n.81, A230 n.129. It is a factual question whether it was reasonable at the time for the smaller MVPDs to "understand [that] to be part of the interconnect [they] would need to be with Comcast Spotlight," Comcast's ad rep services arm. DA687.

Comcast's competitor MVPDs immediately began losing money after Comcast excluded them from the Interconnects. **[*447]** They lamented that their reductions in cash flow were "primarily due to the loss of the Comcast Interconnect revenues in Chicago and Detroit." A233. Despite that pressure, though, the MVPDs continued to resist Comcast's demands. As discussed above, at the time, Comcast was trying to buy TimeWarner Cable, a proposed deal that was under review by federal agencies. With a forum to share their ongoing experiences with Comcast, RCN (futilely) filed comments with the FCC, alerting regulators **[**38]** that "Comcast was not being truthful" when it said "RCN is free to join the Comcast-managed interconnects at any time," because "Comcast will only allow RCN to join the interconnects if RCN employs Comcast Spotlight instead of Viamedia." A215 n.81, A886-87.

Viamedia also was not going quietly. Even though Comcast had barred it from Interconnect access, Viamedia continued to compete for RCN's and WOW!'s business. Without Interconnect access, their MVPD customers' spot avails would not bring in nearly as much revenue, which left Viamedia's bids' proposed revenue shares at a substantial disadvantage compared to Comcast's bids. A231-32. Nonetheless, Viamedia's bids caused consternation for Comcast. Internal Comcast emails reflect executives' disbelief. They called it "absolutely unbelievable" that Viamedia could make a remotely competitive bid without Interconnect access. A232. In contrast to Viamedia's bids, Comcast bids touted the "exclusive" benefit of Interconnect access that WOW! would receive if it selected Comcast for ad rep services. Comcast said that the "generous" financial terms it offered included the "sizable annual guarantee" that would be attributable to "the opportunity **[**39]** to add WOW! subscribers [back] to the important Detroit and Chicago Interconnects." In other words, sign up with Comcast for ad rep services, and we will stop your bleeding—the bleeding that we have inflicted by barring you from the DMA Interconnects.

Substantial evidence thus shows that Comcast's MVPD competitors did not want to buy ad rep services from Comcast. Their reluctance was not based on a short-sighted inability to see the procompetitive benefits of Comcast's vertical integration or what Comcast touts as "one-stop shopping." Rather, these MVPDs had economically rational reasons for seeking to avoid this entanglement with their dominant competitor, which would naturally have divided loyalties. In addition, WOW! considered Viamedia to be "by far the best ad partner from a technical team to work with." A560, DA 685. RCN testified that it would prefer to obtain ad rep services from an independent company like Viamedia rather than Comcast because, "all things being equal, even close to being equal," it "had concerns about being a partner with a company associated with our competitor." A236 n.150.

Thus, as Comcast's MVPD competitors assessed the situation, the possible outcomes all **[**40]** amounted to unfair wins for Comcast. Its actions could have resulted in three different outcomes, each of which would work to its benefit and harm its competitors. First, if Comcast succeeded in having its competitor MVPDs buy Comcast ad rep services, Comcast would gain the following benefits:

- Comcast's smaller MVPD rivals would now be contributing additional revenue toward their dominant competitor, Comcast;
- The majority of spot avails that MVPDs had formerly kept out of the Interconnects to allocate to, among other outlets, local ads (for which the MVPDs compete against each other for sales) would now come under the control of their competitor Comcast **[*448]** —whose contracts required that Comcast have "sole and exclusive control" over all spot avails;
- Comcast's competitor MVPDs would just have to trust that Comcast would make the best business decisions on behalf of its competitors when allocating adds to the national, regional, and local sales markets. For example, the smaller MVPDs prefer to weight some of their ad sales to non-Interconnect local sales, which help the MVPDs with local business relationships that can lead to additional sales of services, such as providing business internet **[**41]** connectivity (sales for which they compete against Comcast); the Interconnect operator, on the other hand, prefers DMA-wide Interconnect ad sales for which it gets higher margins—an ad mix choice that Comcast would be free to make for its smaller MVPD competitors;
- Comcast would be a single seller of advertisements in the local market, eliminating competition;
- Comcast would not only have access to its competitor MVPDs' ad sales information, but the MVPDs would have to provide Comcast with all of their own promotional ad materials to current and potential subscribers that they are attempting to retain or win away from Comcast, giving Comcast a chance to undercut them. That would be in addition to other competitively sensitive information (e.g., number and location of its subscribers) that would need to be disclosed.

Viamedia has offered evidence that what drove Comcast's actions was this close relationship with competing MVPDs—not hypothesized economic efficiencies from ordinary vertical integration. For example, there are some DMAs where Comcast controls the Interconnects, but the participating MVPDs do not have overlapping footprints with Comcast's service areas. In those DMAs, Comcast **[**42]** still offers Interconnect-only agreements on terms similar to the terms of the former Comcast-Viamedia agreements for the Chicago and Detroit DMAs.

Viamedia offered evidence on summary judgment (described above) of a second outcome in which Comcast's MVPD competitors would forgo Interconnect access entirely and renew with Viamedia rather than switch to Comcast. If its MVPD competitors made that choice, those MVPDs would be cut off from a large percentage of ad revenue, which in turn would hinder them from funding promotional offers to their subscribers, potentially leading their subscribers to switch to Comcast. In the meantime, Comcast's lost millions from Interconnect fees and reduced advertising revenue within the DMA would continue to be a mere "rounding error."

In the third potential outcome—which only Comcast contends was actually a possibility—Comcast would not bar competing MVPDs completely from Interconnect access but instead would permit them to have Interconnect-only access if they took care of their own ad services, without using either Viamedia's or Comcast's ad rep services. In this scenario, Comcast would lose the revenue it would have gained from providing full-turnkey **[**43]** service to the MVPDs, but it would still earn Interconnect access fees and the Interconnect's value would not be degraded. The result would also raise rivals' costs by forcing them to provide internally the staff, technology, and services that Viamedia had previously provided at lower cost. Those fixed costs would be difficult for those MVPDs to afford and would shift revenue away from subscriber promotions and further infrastructure build-out. See *FCC **[*449]** 2007 Report and Order, 22 FCC Rcd 5101, at 5108* ("Revenues from cable services are, in fact, a driver for broadband deployment," i.e., the build-out of additional cable infrastructure).[8]

Faced with this Hobson's choice, Comcast's competitor MVPDs chose to sign with Comcast in 2015. WOW! noted that "a key decision point" in this "choice" was its understanding that "in order to remain competitive, we need to be in the Interconnect." A233. WOW! signed with Comcast for ad rep services in Chicago and Detroit in 2015. WOW! continued, however, to use Viamedia as its ad rep in some non-Comcast DMAs. Similarly, although RCN had planned to renew its contract with Viamedia, it too ultimately decided to sign with Comcast for Chicago and Detroit. By 2016, a Comcast **[**44]** employee congratulated a colleague regarding its new monopoly in ad rep services in the Chicago DMA: "THE WOW AND RCN DEALS PROVIDE [COMCAST] WITH COMPLETE REPRESENTATION OF THE CHICAGO MARKET." A214 n.77.

II. *District Court Proceedings*

In 2016, Viamedia sued Comcast for violating *Section 2 of the Sherman Antitrust Act*, as well as various state antitrust statutes, and for tortious interference. The parties agree that analysis under the state antitrust statutes tracks federal ***antitrust law***, so the federal antitrust analysis controls whether the state antitrust claims survive. Viamedia is no longer pressing its tortious interference claim, so our only focus is *Section 2 of the Sherman Act*.

Comcast moved to dismiss the complaint for failing to state a claim. The district court construed Viamedia's complaint as alleging that Comcast engaged in three types of monopolistic conduct recognized by the antitrust laws: (1) Comcast's refusal to deal with Viamedia by cutting off access to the Interconnects, (2) Comcast's exclusive dealing, and (3) Comcast's tying of Interconnect access to the purchase of Comcast's ad rep services.

The district court granted the motion to dismiss with respect to Viamedia's refusal-to-deal **[**45]** claim, faulting Viamedia for failing to demonstrate through its allegations that Comcast's conduct was "irrational but for its anticompetitive effects." *Viamedia, Inc. v. Comcast Corp., 218 F. Supp. 3d 674, 698 (N.D. Ill. 2016)*. The court hypothesized that Comcast's complete foreclosure of Viamedia from the market potentially serves a procompetitive purpose and "offers potentially improved efficiency." *218 F. Supp. 3d at 699*. And because "vertical integration is usually procompetitive," Comcast likely had "a rational procompetitive purpose: it has become 'a one-stop shop' in

---

[8] Viamedia has presented evidence that RCN and WOW! did not view bringing ad rep services in-house as a viable option. When confronted with Comcast's refusal to deal with Viamedia, both said they had no choice but to enter into ad rep agreements with Comcast. A215, A887. The in-house option was always available in theory. But RCN and WOW! are presumed to be economically rational actors. They had always chosen to buy these services from outside companies, suggesting that in-house was not an economically viable option.

certain DMAs for MVPDs wishing to sell advertisements on a regional basis." Id. at 698-99. Comcast's "short-term losses" in excluding Viamedia and Comcast's competitor MVPDs from the Interconnects were not "necessarily indicative of anticompetitive conduct," the court reasoned in dismissing a later version of the complaint on identical grounds, because a "monopolist might wish to withdraw from a prior course of dealing ... in order to pursue perfectly competitive ends." Viamedia, Inc. v. Comcast Corp., No. 16-CV-5486, 2017 U.S. Dist. LEXIS 24213, 2017 WL 698681, at *4 (N.D. Ill. **[*450]** Feb. 22, 2017), quoting Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1075 (10th Cir. 2013).

After discovery on Viamedia's exclusive dealing and tying claims, the district court granted Comcast's motion for summary judgment because Viamedia had failed to "present evidence that tends to exclude the possibility that [defendant's] conduct **[**46]** was as consistent with competition as with illegal conduct." Viamedia, Inc. v. Comcast Corp., 335 F. Supp. 3d 1036, 1054 (N.D. Ill. 2018). In the district court's view, there was no evidence that Comcast conditioned its sale of Interconnect services to MVPDs on their purchase of ad rep services because in DMAs outside the relevant geographic markets, Comcast *did* offer Interconnect-only access to other MVPDs. Id. at 1058-59. Further, because "both RCN and WOW! *wanted* full-turnkey representation," the purchase of the two products together could not be considered tying. Id. at 1059. In fact, the district court concluded (in tension with the observation that Comcast offered Interconnect-only access in other DMAs), Comcast had "no reason to offer" Interconnect-only access to RCN and WOW! because, the district court again hypothesized, an Interconnect-only deal would be less substantial, less profitable, and less efficient for Comcast than a full-turnkey deal. Id. at 1059.

In any event, even if Comcast had refused to deal with its competitor MVPDs unless they met Comcast's condition of purchasing ad rep services, the court viewed this as simply a reformulation of Viamedia's already-dismissed refusal-to-deal claim. 335 F. Supp. 3d at 1062, 1070, 1072. To support this conclusion, the district court noted that Viamedia sought injunctive **[**47]** relief that would restore its access to the Interconnects and give RCN and WOW! the option to decline purchase of Comcast's ad rep services. Id. at 1074.

In addition, the district court found that Viamedia's two experts' testimony was based upon an incorrect understanding of the law—i.e., that Comcast had engaged in anticompetitive conduct for which it could be held responsible under the antitrust laws. Id. at 1064-74. The district court concluded that this justified excluding the damages expert's testimony in its entirety, as well as a portion of the economic expert's testimony. Viamedia has appealed the final judgment dismissing its claims.

III. *Legal Standards and Analysis*

With the facts and competitive dynamics set out, we turn to the legal standards and analysis. In Part III-A, we describe the standards for an antitrust violation under Section 2, the monopolization provision of the Sherman Act. Undisputed by the parties, we explain that Comcast is a monopolist in the relevant geographic markets (here: Chicago, Detroit, and Hartford) for both Interconnect and ad rep services, and that it is the dominant MVPD retail cable provider.

In Part III-B, we address Viamedia's two claims. In Part IIIB-1, we set out the legal **[**48]** test for refusals to deal and assess Comcast's conduct, explaining why this claim should not have been dismissed on the pleadings. In Part III-B-2, we turn to Viamedia's tying claim. These related claims are both based on the same course of conduct, resulted in the same anticompetitive harms, and would be subject to the same procompetitive justifications or defenses. The decision to dismiss one claim on the pleadings while allowing the other, closely related claim to go as far as summary judgment offered potential for confusion, but in the end, both claims need to be tried.

In Part III-C, we evaluate in greater detail the harm to competition alleged by Viamedia and the procompetitive justifications **[*451]** offered by Comcast, highlighting considerations that will be relevant on remand. In Part III-D, we explain that Viamedia has presented evidence of a cognizable antitrust injury as a rival driven from the market by a tying arrangement.

Finally, in Part III-E, we address the district court's rulings excluding expert witness evidence. Our resolution of Viamedia's refusal-to-deal and tying claims largely resolves its challenge to the testimony's exclusion. The district court's decision on this **[**49]** score was based almost entirely upon its erroneous legal analysis. On remand, the district court will need to take a fresh look at the expert reports in light of this opinion.

A. *Sherman Act Section 2—Illegal Monopolization*

HN5[] Section 2 of the Sherman Antitrust Act imposes liability on "Every person who shall monopolize ... any part of the trade or commerce among the several States." 15 U.S.C. § 2. A private plaintiff like Viamedia may bring a civil claim as a person who was "injured in his business or property by reason of anything forbidden in the antitrust laws." 15 U.S.C. § 15(a).

HN6[] Judicial decisions interpreting Section 2 have long held that simple possession of monopoly power, or the pursuit of it, is not in itself illegal. United States v. U.S. Steel Corp., 251 U.S. 417, 451, 40 S. Ct. 293, 64 L. Ed. 343 (1920) ("[T]he law does not make mere size an offence, or the existence of unexerted power an offense. It ... requires overt acts."); United States v. Aluminum Co. of America, 148 F.2d 416, 429-30 (2d Cir. 1945) ("size does not determine guilt" as the monopolist may have gained market power "by force of accident," or "by virtue of his superior skill, foresight and industry"; therefore, "there must be some 'exclusion' of competitors"). Thus, a firm violates the monopoly provision in Section 2 only when it both (1) possesses "monopoly power in the relevant market" *and* (2) engages in "the willful acquisition or **[**50]** maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." Verizon Communications, Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004), quoting United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966); see also Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 600a, at 3, ¶ 650a, at 91 (4th ed. 2015) (Areeda & Hovenkamp).[9]

On appeal, the parties do not dispute several often-contentious issues in antitrust cases: the relevant geographic and product markets, and market power. See Goldwasser v. Ameritech Corp., 222 F.3d 390, 397 (7th Cir. 2000) ("Few would say that the first element is easily proved: it is exceedingly difficult to prove market power, or monopoly power ... ."). The relevant geographic markets are the specific DMAs in which Viamedia asserts Comcast's conduct harmed competition: Chicago, Detroit, and Hartford. See Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 332-33, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961) (***HN7***[] a relevant antitrust geographic market is the area in which sellers operate and where purchasers can predictably turn for supplies). Comcast's conduct in other DMAs may be relevant for comparison purposes.

[*452] The relevant product market allegedly monopolized is ad rep services for MVPDs. The immediate effect of Comcast's conduct was to force out its only competitor in that market to gain monopoly power in **[**51]** the relevant geographic markets for those services. This market is inextricably connected to access to the cooperative mechanism of the Interconnects, as well as to the related markets for MVPD retail cable services and the sale of MVPD spot avails. Understanding the harm to competition in these related markets helps in assessing Comcast's alleged conduct. ***HN8***[] "Antitrust analysis must always be attuned to the particular structure and circumstances of the industry at issue." Trinko, 540 U.S. at 411; see also Areeda & Hovenkamp ¶ 1802d, at 79-80 (When assessing exclusionary conduct, it is "necessary to examine market power or share at *both* of the two market levels involved.").

As for market power, in the Chicago, Detroit, and Hartford markets, Comcast started with monopoly control over Interconnect access and services. Comcast has acquired a pure monopoly in the market for ad rep services in these metropolitan areas, where it is also by far the dominant MVPD retail cable provider.[10]

---

[9] This appeal does not present any issues under the Section 2 language barring attempts and conspiracies to monopolize.

[10] For antitrust purposes "monopoly power and market power typically are used interchangeably" and simply mean that "a firm can influence the price it receives for its product." Dennis W. Carlton and Jeffery M. Perloff, *Modern Industrial Organization* 137 (2d ed. 1994).

HN9[] A firm's market power is important because, without it, a firm will have little to no ability to distort or harm competition, no matter how great its desire to do so, even when engaging in conduct that in **[**52]** different circumstances might be perceived as anticompetitive. See *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1071 (10th Cir. 2013)* (Gorsuch, J.) ("Not infrequently, the initial question of market power proves decisive."). Even "[m]ildly reprehensible behavior might be enough to challenge a firm whose power is significant." Areeda & Hovenkamp ¶ 600b, at 4.

B. *Claims of Anticompetitive Conduct: Refusals to Deal and Tying*

The dispute here focuses on the second prong of the *Section 2* test: did Comcast "willfully acquire" or "maintain" its new monopoly power in the ad rep services market, or is its new market dominance "a consequence of a superior product or business acumen" or the result of an "historic accident"?

Baked into this inquiry is an assessment of what types of anticompetitive conduct are prohibited as illegally acquiring or maintaining monopoly power, rather than the kind of pro-competitive conduct the antitrust laws do not impede. The latter includes innovation resulting in superior products, the introduction of efficiencies reflecting superior business acumen, or even the luck of a firm that unwittingly stumbles into a monopoly position. See Areeda & Hovenkamp ¶ 600a, at 3 (setting out first two prongs identified above and articulating the two "subsidiary **[**53]** questions": (3) "given that *§ 2* requires some element of conduct in addition to substantial market power, what kinds of conduct or intent transform power into unlawful monopolization; and (4) what defenses, if any, save monopoly power from condemnation?").

HN10[] The statutory text does not provide the answers, but case law over more than a century provides extensive guidance. Courts recognize various types of conduct that have the potential to harm competition. The types of conduct alleged in this case are "exclusionary" in nature, impairing rivals' opportunity to compete in a way **[*453]** that is inconsistent with "competition on the merits." Areeda & Hovenkamp ¶ 650a, at 92; see also *id.* ¶ 651b, at 99-100; *Covad Communications Co. v. Bell Atlantic Corp., 398 F.3d 666, 675-76, 365 U.S. App. D.C. 78 (D.C. Cir. 2005)* (agreeing with plaintiff's description of defendant's refusal to deal as "'predatory' ... because, in the vernacular of ***antitrust law***, a 'predatory' practice is one in which a firm sacrifices short-term profits in order to drive out of the market or otherwise discipline a competitor").

In the present case, Viamedia alleges and has offered evidence that Comcast: (1) refused to deal with Viamedia by denying it Interconnect access, and (2) engaged in tying by denying MVPDs Interconnect access unless **[**54]** they purchased Comcast's ad rep services.[11] We set out below the legal tests for refusals to deal and tying, which help in assessing whether such conduct is anticompetitive and illegal, or instead harmless or even procompetitive.

HN11[] Conduct that can harm competition may fit into more than one of these court-devised categories. After all, the "means of illicit exclusion, like the means of legitimate competition, are myriad." *Trinko, 540 U.S. at 398*, quoting *United States v. Microsoft Corp., 253 F.3d 34, 58, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (en banc). Although "the standard for a *§ 2* violation is significantly stricter in its power assessment [than for a *§ 1* claim], it is broader and less categorical in its definition of proscribed conduct." Areeda & Hovenkamp ¶ 777a, at 324. This means that a dominant firm's conduct may be susceptible to more than one court-defined category of anticompetitive conduct. A "simple refusal to deal" is conduct where one firm "refuses to deal no matter what," whereas "[t]ying and exclusive dealing are two common examples" of "conditional refusals to deal"—i.e., one firm will refuse to deal with another firm unless "some condition is met." Herbert Hovenkamp, *FRAND and Antitrust*, Cornell L. Rev. (forthcoming 2020) (manuscript at 11), available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=3420925 **[**55]** . Similarly, "[m]any of the practices that have been characterized as exclusive dealing could also be described as tying" because "[t]he economic distinction between the two is most often slight or nil." Areeda & Hovenkamp ¶ 1800b, at 7-8, ¶ 1800a, at 4.

HN12[] The fact that the categories of conduct here are conceptually related and may overlap should not cause confusion if we stay focused on the underlying inquiry: the conduct "must harm the competitive *process* and thereby

[11] To "simplify the issues" on appeal, Viamedia elected not to pursue exclusive dealing as a distinct theory of liability.

harm consumers." *Microsoft, 253 F.3d at 58*; see also *Nynex Corp. v. Discon, Inc., 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)* (plaintiffs "must allege and prove harm, not just to a single competitor, but to the competitive process, i.e., to competition itself"). At bottom, the purpose of identifying these categories of conduct is to help determine "the presence or absence of harmful effects, which are both the reason for any antitrust concern and often the simplest element to disprove." Areeda & Hovenkamp ¶ 1701d, at 33. We therefore start by assessing how Comcast's conduct fits into these categories under *Section 2*, mindful that we should stay focused on the effect Comcast's conduct has on competition.

1. *Refusals to Deal*

The district court dismissed on the pleadings the portion of Viamedia's complaint focused on a refusal-to-deal **[**56]** theory. **[*454]** ***HN13***[] We review *de novo* a grant of a motion to dismiss, "constru[ing] the complaint in the light most favorable to the plaintiff, accepting as true all well-pleaded facts alleged, and drawing all possible inferences in [its] favor." *Tamayo v. Blagojevich, 526 F.3d 1074, 1081 (7th Cir. 2008)*; see also *Goldberg v. United States, 881 F.3d 529, 531 (7th Cir. 2018)* (in reviewing dismissal for failure to state a claim, we accept facts alleged by plaintiff without vouching for their objective truth). We next set out the general principles underlying a refusal-to-deal claim and then explain how the leading case—*Aspen Skiing*—maps onto Comcast's conduct. We then reject Comcast's argument that Viamedia's claim could properly be dismissed on the pleadings.

a. *Monopolists and Refusals to Deal*

HN14[] Monopolists are both expected and permitted to compete like any other firm. *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 116, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. A monopolist is not obliged to "watch[] the quality of its products deteriorate and its customers become disaffected" and "lie down and play dead" because "even a monopolist is entitled to compete." *Goldwasser v. Ameritech Corp., 222 F.3d 390, 397 (7th Cir. 2000)*. "Part of competing like everyone else is the ability to make decisions about with whom and on what terms one will deal." *Id.*; see also *Authenticom, Inc. v. CDK Global, LLC, 874 F.3d 1019, 1025 (7th Cir. 2017)*. And just because "a firm has monopoly power doesn't mean that the law should prevent it from competing," as "[i]t **[**57]** would be absurd to require the [monopolist] to hold a price umbrella over less efficient entrants." Richard A. Posner, ***Antitrust Law*** 196 (2d ed. 2001). Thus, the general rule is that even monopolists "are free to choose the parties with whom they will deal, as well as the prices, terms, and conditions of that dealing." *Pacific Bell Telephone Co. v. Linkline Communications, Inc., 555 U.S. 438, 448, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*, citing *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*.

Yet there are "limited circumstances" under which a monopolist's refusal to deal with another party will be illegal anticompetitive conduct. *Id.*; see also Areeda & Hovenkamp ¶ 1800c5, at 21 ("*Section 2* of the Sherman Act reaches unilateral refusals to deal when the refusals constitute monopolization ... ."). For example, in *Lorain Journal Co. v. United States, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*, a monopolist newspaper was "an indispensable medium of advertising for many" local businesses but refused to deal with any advertiser who placed any ad with a new radio competitor in an effort "to destroy and eliminate" the new competitor. *Id. at 152, 150*. The Court was not persuaded by the newspaper's argument that it had "a right as a private business concern to select its customers and to refuse to accept advertisements from whomever it pleases." *Id. at 155*.

HN15[] In a holding that resonates in this case, *Lorain Journal* explained: "*In the absence of any purpose to create or* ***[**58]*** *maintain a monopoly*, the act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal." *Id.*, quoting *Colgate, 250 U.S. at 307*; see also *Goldwasser, 222 F.3d at 397* (acknowledging circularity of *Colgate* test). With the newspaper's clear expectation that it would "outlast" the new competition and regain its complete monopoly, and with "no apparent efficiency justification for its conduct," *Lorain Journal* has been described as "entirely correct." Robert H. Bork, *The Antitrust Paradox: A Policy at War with Itself* **[*455]** 344-45 (2d ed. 1993). This theory of liability was endorsed again in *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*, the leading case on this issue.

b. *Aspen Skiing and Comcast*

Comcast takes the position that after the Supreme Court's 2003 *Trinko* decision, any "antitrust claims based on a duty to deal with rivals 'bit the dust.'" ***HN16***[] In the face of both *Aspen Skiing* and the actual language of *Trinko*, we must reject that argument about what the law should be. *Trinko* itself said just the opposite: "Under certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate *Section 2*," and the "leading case for *§ 2* **[**59]** liability based on refusal to cooperate with a rival ... is *Aspen Skiing*." *540 U.S. at 408*; see also *Linkline, 555 U.S. at 448* ("There are also limited circumstances in which a firm's unilateral refusal to deal with its rivals can give rise to antitrust liability."), citing *Aspen Skiing, 472 U.S. at 608-11*.

What do those limited circumstances look like? In addition to reiterating *Aspen Skiing*'s continued, albeit narrow, validity, the Court has also provided useful guidance on primary factors to consider when determining whether potentially anticompetitive conduct falls within *Aspen Skiing's* bounds. To provide background on what role those factors play in a court's analysis, we summarize the facts of *Aspen Skiing*, focusing on the primary factors the Supreme Court has continued to highlight.

The case involved four ski mountains that were initially developed and operated under separate ownership. *472 U.S. at 587*. For over a decade, the four mountains offered a variety of ski-lift tickets and packages, including a joint ticket that allowed skiers to gain convenient access to all four mountains. *Id. at 588-89*. Even as defendant Aspen Skiing Company (Ski Co.) came to control three of the four mountains, thus gaining market power over the Aspen ski area, the joint "interchangeable ticket" program continued to include the fourth mountain, which was independently owned by plaintiff Aspen Highlands Skiing Corporation (Highlands). *Id. at 590-92*. Revenues from this **[**60]** cooperative arrangement were distributed according to mountain usage. The joint ticket was a popular and profitable package for both parties. The four-mountain package outsold by a two-to-one margin the Ski. Co. packages that offered access to only its three mountains. *Id. at 592*.

Ski Co. management concluded, however, that if the four-mountain ticket were not available at all, customers would default to buying just Ski Co.'s three-mountain pass. Ski Co.'s president explained that "the 4-area ticket was siphoning off revenues that could be recaptured by Ski Co. if the ticket was discontinued." *Id.* In the following year's negotiations, Ski Co. made a revenue share offer to Highlands on such unfavorable terms that Ski Co. correctly expected Highlands "could not accept" it. *Id.* The joint ticket was no longer offered. *Id.* In an attempt to stanch the flow of lost business, Highlands "tried a variety of increasingly desperate measures to re-create the [four-mountain] joint ticket," including "offering to buy the defendant's tickets at retail price." *Trinko, 540 U.S. at 408-09*, citing *Aspen Skiing, 472 U.S. at 593-94*. Ski Co. refused to permit Highlands even to "pay full retail value for the daily lift tickets," with a Ski Co. official explaining, "we will **[**61]** not support our competition." *Aspen Skiing, 472 U.S. at 593-94 n.14*. Highlands filed suit.

[*456] At trial, defendant Ski Co. primarily relied on the testimony of its economic expert, which included the theory that Ski Co.'s conduct had such procompetitive justifications as eliminating "free-riding by Highlands."[12] Ski Co. offered evidence that its own product was being devalued by being associated with "the inferior skiing services offered at Highlands." *Aspen Skiing, 472 U.S. at 609-10*. Ski Co. also argued that it could save administrative expenses and other costs by eliminating the joint ticket, which Ski Co. found "administratively cumbersome." *Id. at 592*. In short, defendant Ski Co. argued that "the conduct at issue was pro-competitive conduct that a monopolist could lawfully engage in." *Id. at 599*.

Procompetitive justifications were also highlighted in the jury instructions. The jury was instructed that a monopolist "is not barred from taking advantage of scale economies by constructing a large and efficient factory," nor is it "under a duty to cooperate with its business rivals ... if valid business reasons exist for that refusal." *Id. at 597*. Ski Co. could be found liable only if it "gained, **[**62]** maintained, or used monopoly power in a relevant market by arrangements and policies which rather than being a consequence of a superior product, superior business sense, or historic element, were designed primarily to further any domination of the relevant market." *Id.* Therefore, "if there

---

[12] See George L. Priest & Jonathan Lewinsohn, *Aspen Skiing: Product Differentiation and Thwarting Free Riding as Monopolization*, in *Antitrust Stories* 248 (Eleanor M. Fox and Daniel A. Crane, eds., 2007).

were legitimate business reasons for the refusal [to deal], then the defendant, even if he is found to possess monopoly power in a relevant market, has not violated the law," because the law is not concerned with conduct which may "benefit consumers by making a better product or service available"—only conduct that "has the effect of impairing competition." *Id. at 597*. The jury "resolved all contested questions of fact in Highlands' favor," *id. at 599*, including a finding "that there were no valid business reasons for the refusal." *Id. at 605*.

The Supreme Court upheld the jury verdict for the plaintiff. The Court reiterated *Lorain Journal's* rejection of the argument that "the right to refuse to deal with other firms ... is unqualified." *Id. at 601-02 & n.27*, citing *Lorain Journal, 342 U.S. at 155*, and *Colgate, 250 U.S. at 307*. This conclusion was supported by three key factors.

HN17[] First, Ski Co. "elected to make an important change in a pattern of distribution that had originated in a competitive **[**63]** market and had persisted for several years," including after "the character of the market was changed by Ski Co.'s acquisition of monopoly power." *Id. at 603*. Such a pre-existing relationship supports a presumption that the joint arrangement was efficient and profitable. *Trinko, 540 U.S. at 408-09* (distinguishing *Aspen Skiing* from situation where that presumption would not apply—e.g., a defendant who would never have "voluntarily engaged in a course of dealing with its rivals ... absent statutory compulsion"); see also *Linkline, 555 U.S. at 450* (refusing to impose a duty to deal on a defendant when "such duty arises only from FCC regulations, not from the *Sherman Act*"). The Court explained in *Aspen Skiing:*

> In any business, patterns of distribution develop over time; these may reasonably be thought to be more efficient than **[*457]** alternative patterns of distribution that do not develop. The patterns that do develop and persist we may call the optimal patterns. By disturbing optimal distribution patterns, one rival can impose costs upon another, that is, force the other to accept higher costs.

472 U.S. at 604 n.31, quoting Robert H. Bork, *The Antitrust Paradox* 156 (1978).

Second, the Court compared Ski Co.'s conduct in the Aspen market with Ski Co.'s arrangements in comparable **[**64]** markets where it lacked such dominance, noting that cooperative joint tickets were "used in other multimountain areas which apparently are competitive." *Aspen Skiing, 472 U.S. at 603-04 & n.30*. The Court could thus "infer that such tickets satisfy consumer demand in free competitive markets." *Id.*

Third, defendant Ski Co. decided to forgo profitable transactions by refusing to permit Highlands to purchase ski tickets at the retail price for the sake of harming Highlands. *472 U.S. at 608* ("The jury may well have concluded that Ski Co. elected to forgo these short-run benefits because it was more interested in reducing competition ... over the long run by harming its smaller competitor."). Ski Co. made this "decision to avoid providing any benefit to Highlands even though accepting the coupons would have entailed no cost to Ski Co. itself, would have provided it with immediate benefits, and would have satisfied its potential customers." *Id. at 610*.

These factors all pointed to Ski Co.'s conduct causing anticompetitive harm. But whether its conduct "may properly be characterized as exclusionary" also required consideration of possible procompetitive justifications, including any beneficial or harmful impacts on consumers or competition itself. *Id. at 605*, citing Bork, **[**65]** *Antitrust Paradox* at 138. Critical to this case, the Court treated procompetitive justification as a factual issue properly resolved by the jury. The Court focused on "the evidence relating to Ski Co. itself, for Ski Co. *did not persuade the jury* that its conduct was justified by any normal business purpose." *Id. at 608* (emphasis added). Conflicting evidence presented at trial undermined Ski Co.'s arguments that the joint ticket was "administratively cumbersome" (no more so than the joint tickets Ski Co. used in other, competitive markets) and that Highlands' "inferior skiing services" were free-riding on Ski Co.'s services (a joint ticket "allowed consumers to make their own choice on these matters of quality"). *Id. at 608-10*.

Highlands refuted Ski Co.'s procompetitive justifications with exactly the kind of evidence that is helpful to prove exclusionary conduct or "predation," including "statements made by the officers or agents of the company, evidence that the conduct was used threateningly and did not continue when a rival capitulated, or *evidence that the conduct was not related to any apparent efficiency." Id. at 608-09 n.39*, quoting Bork, *Antitrust Paradox* at 157 (emphasis in *Aspen Skiing)*. The Court concluded that "the evidence supports an inference that Ski Co. **[**66]** was not motivated by efficiency concerns and that it was willing to sacrifice short-run benefits and consumer goodwill in exchange for a perceived long-run impact on its smaller rival." *Id. at 611*.

HN18[] The *Aspen Skiing* factors help case-by-case assessments of whether a challenged refusal to deal is indeed anticompetitive, even though no factor is always decisive by itself. For example, even "a monopolist might wish to withdraw from a prior course of dealing and suffer a short-term **[*458]** profit loss in order to pursue perfectly procompetitive ends—say, to pursue an innovative replacement product of its own." *Novell, Inc. v. Microsoft Corp., 731 F.3d 1064, 1075 (10th Cir. 2013)* (Gorsuch, J.). Similarly, forgoing short-run profits may sometimes reflect desirable, procompetitive behavior, such as efforts to offer "promotional discounts." *Id.* And a defendant may have "procompetitive rationales for treating a rival differently," such as if "it's more costly to deal with distant rivals than other nearby customers." *Id. at 1078 n.4*. But because the factors as a whole provide a window into likely harm to competition, a court should start with the *Aspen Skiing* factors in determining whether a refusal to deal is unlawful.

The Supreme Court has described *Aspen Skiing* as "at or near the outer boundary **[**67]** of *§ 2* liability." *Trinko, 540 U.S. at 409*. Given the facts we must assume here, Viamedia has presented a case that is well within those bounds and appears stronger than *Aspen Skiing*. A comparison of Viamedia's allegations to the facts found by the jury in *Aspen Skiing* (and which the Supreme Court considered significant to its analysis) is instructive:

[*459]

ASPEN SKIING	**VIAMEDIA ALLEGATIONS**
Long-term business relationship that created joint offering	Same
Relationship existed absent any statutory obligation/duty (*Trinko*)	Same
Can presume prior relationship was thus mutually advantageous	Same
Sudden course reversal	Same
Course reversal came at a monetary loss for defendant	Same
Refused to sell service/product at retail price	Same
Sold product at retail price to others in the relevant market	Same
Unhappy customers	Same
Discouraged customers from doing business with its smaller rival	Same
Defendant continued to deal with competitors in other competitive markets	Same
Procompetitive justifications are a question for the factfinder	Same
Exclusionary conduct aimed	Same

ASPEN SKIING	VIAMEDIA ALLEGATIONS
at the only other competitor in the market	
Ski Mountain Passes	Different: Ad Rep Services

In light of the similarities, unless the Court meant to limit *Aspen Skiing* to ski resorts, we see no sound basis **[**68]** to distinguish Viamedia's case as a matter of law. Comcast's alleged conduct, absent compelling evidence to the contrary, indicates its "calculation that its future monopoly retail price would be higher" by foreclosing its ad rep services competitor. *Trinko, 540 U.S. at 409*. In addition, **[*460]** unlike in *Aspen Skiing,* where the ultimate customers were skiers who did not compete against the defendant ski resort, Comcast's refusal to deal with Viamedia has left its MVPD customers in these markets no practical choice but to turn over their ad sales business, along with their sensitive business information and a large percentage of their ad revenue, to their dominant MVPD competitor.

c. *Refusals to Deal and Motions to Dismiss*

Comcast nonetheless contends this case can be decided on the pleadings because "there is no liability under *Aspen Skiing* where, as here, the defendant's alleged termination of a preexisting course of dealing was not 'irrational but for its anticompetitive effect.'" Comcast relies on the district court's acceptance of Comcast's thinly supported assertion that it had a "valid business purpose" in refusing to deal with Viamedia because Comcast's replacement of Viamedia as WOW!'s and RCN's ad representative **[**69]** is a course of conduct that "offers *potentially* improved efficiency." See *218 F. Supp. 3d at 698-99* (emphasis added). Comcast contends this "valid business objective" is what "distinguishes this case from *Aspen Skiing*, where the defendant 'fail[ed] to offer any efficiency justification whatever for its pattern of conduct.'" Appellees' Br at 27, quoting *Aspen Skiing, 472 U.S. at 608*.

Comcast's argument has the facts wrong. Its reading fails to comport with the actual language of the opinion, the jury instructions, and the evidence presented by both parties. In *Aspen Skiing* the Court was reviewing a jury verdict. Only after a month-long trial had the jury "resolved all contested questions of fact in Highlands' favor" and "concluded that there were no valid business reasons for the refusal." *Aspen Skiing, 472 U.S. at 599, 605*. The Court concluded that "the evidence *supports an inference* that Ski. Co. was not motivated by efficiency concerns." *Id. at 610* (emphasis added).

Comcast next cites *Novell* in support of its argument that a factual dispute regarding the existence of procompetitive justifications is appropriate for resolution on the pleadings. Yet *Novell* was a decision based on an eight-week trial. *731 F.3d at 1066*. And what about *Olympia Equipment Leasing Co. v. Western Union Telegraph Co., 797 F.2d 370 (7th Cir. 1986)*? That decision followed a "trial [that] lasted more than six weeks **[**70]** and produced the usual mountain of testimony and exhibits." *Id. at 372*. ***HN19***[] Valid business justifications are relevant only to the rebuttal of a *prima facie* case of monopolization.

HN20[] Thus, balancing anticompetitive effects against hypothesized justifications depends on evidence and is not amenable to resolution on the pleadings, at least where the plaintiff has alleged conduct similar to that in *Aspen Skiing*. See also, e.g., *Illinois ex rel. Burris v. Panhandle Eastern Pipe Line Co., 935 F.2d 1469, 1482 (7th Cir. 1991)* ("Whether valid business reasons motivated a monopolist's conduct is a question of fact."). Adapting language from our colleagues in the D.C. Circuit, the correct approach in this situation requires a district court to acknowledge that:

> [Comcast's] defense—that its refusal to deal was economically justified—depends upon a question of fact and therefore is not cognizable in support of a motion to dismiss. It is, of course, entirely possible [Comcast] will be able to prove ... [that] its refusal to deal was a reasonable business decision. On the other hand, it is also possible [Comcast's] refusal to deal reflected its willingness to sacrifice immediate profits **[*461]** from the sale of [Interconnect access] in the hope of driving [Viamedia] out of the market and recovering monopoly

> profits **[**71]** in the long-run. ... ***HN21***[] The district court cannot choose between these competing explanations without first resolving questions of fact not before it upon a motion to dismiss.

Covad Communications Co. v. Bell Atlantic Corp., 398 F.3d 666, 676, 365 U.S. App. D.C. 78 (D.C. Cir. 2005) (reversing dismissal of refusal-to-deal claim on pleadings). This analysis must also include the harm from Comcast's alleged tying conduct, which we turn to below. Viamedia has alleged—and offered evidence of—enough harm to competition from Comcast's refusal-to-deal and tying conduct for its claim to go forward. ***HN22***[] Consideration of procompetitive justifications must wait for a comprehensive rule of reason analysis.

i. *Comcast's Proposed Legal Standard*

Comcast both misunderstands the law and relies on inapposite cases by conflating the vertical integration of its MVPD and ad rep services functions with its control over the cooperative Interconnects and alleged misuse of that power. Comcast proposes that if a defendant merely postulates "a valid business purpose"—apparently including any business purpose a defendant could dream up, regardless of feasibility or value—that "ends the inquiry." "[T]here is no 'balancing' of benefits and harms," Comcast declares. In support of that proposition, Comcast points to the United **[**72]** States' Amicus Brief (in support of neither party) filed in this case, which offers a test dubbed the "no economic sense test." Appellee Br at 27-28; see also United States Brief at 11-12 (relying on the formulation articulated in the United States' amicus brief in *Trinko*, available at 2003 WL 21269559, and elaborated upon in Gregory J. Werden, *Identifying Exclusionary Conduct Under Section 2: The "No Economic Sense" Test*, 73 Antitrust L.J. 413, 422-25 (2006)).

The proposed "no economic sense" test would condemn conduct as "exclusionary or predatory" only if it "would make no economic sense for the defendant but for its tendency to eliminate or lessen competition." United States Brief at 11. ***HN23***[] A "gross benefit [or gain] for the defendant" is not enough, however: "Conduct fails the no economic sense test if it is expected to yield a negative payoff, *net of the costs of undertaking the conduct, and not including any payoff from eliminating competition."* Werden at 416 (emphasis added). Or—as explained by the government at oral argument here— it is an objective "balancing" test that requires more than just "a slight procompetitive benefit or efficiency gain."[13]

[*462] ***HN25***[] This test is essentially the same one employed by the Tenth Circuit in *Novell*, which noted that "the **[**73]** monopolist's conduct must be irrational but for its anticompetitive effect." *731 F.3d at 1075*, citing *Aspen Skiing, 472 U.S. at 597*, *Trinko, 540 U.S. at 407*, and Werden at 422-25. However formulated, this test is aimed in part at the potential overweighting of the *Aspen Skiing* factor of a defendant forsaking short-term profits. *Id.* As noted, this factor is relevant but should not always be dispositive because "a short-term profit sacrifice is neither necessary nor sufficient for conduct to be exclusionary." Werden at 424; see also *id.* ("short-run profit sacrifice also

---

[13] ***HN24***[] Comcast's confusion may stem from the terse proposed name of "no economic sense," which does not appear to invite balancing. The test is actually more nuanced than the name suggests, and it is not meant to resolve every *Section 2* challenge. As Werden sensibly notes, its "utility ... ultimately is apt to vary," and we "should not presume that a single test must resolve every exclusionary conduct case." Werden at 421 & n.31.

Furthermore, it has been observed that although the "no economic sense" test "offers good insights into when aggressive actions by a single firm go too far," it "can lead to erroneous results unless" one also "seek[s] to 'balance' gains to the monopolist against losses to consumers, rivals, or others." Areeda & Hovenkamp ¶ 651b3, at 106-07. Otherwise we could arrive at absurd outcomes: "Theoretically, an act might benefit the defendant very slightly while doing considerable harm to the rest of the economy, and it would be lawful." *Id.* It is possible the test could be adapted to meet these criticisms, given that a court should not consider any gain from eliminating competition, but—in any event—the "no economic sense test" was not intended to displace all other approaches. Rather, it "is likely to be most useful as one part of a sufficient condition: If challenged conduct has a tendency to eliminate competition and would make no economic sense but for that tendency, the conduct is exclusionary." Werden at 418. Areeda and Hovenkamp also suggest a broader approach, in which harm "wholly disproportionate" to the valid business justification can also support a refusal-to-deal-claim. ¶ 772c2, at 223 ("Condemnation would be appropriate only for conduct that (1) clearly injures an actual or prospective rival either (2a) with no good business justification at all, or (2b) with a business justification that is poorly fitted to the result or wholly disproportionate to the harm that is inflicted.").

is not necessary for conduct to be exclusionary because the anticompetitive gains from exclusionary conduct sometimes can be reaped immediately"); Areeda & Honvenkamp ¶ 651b3, at 107 ("monopolizing conduct is not necessarily costly to the defendant").

Because the *Aspen Skiing* factors are helpful but not dispositive, this more nuanced approach considering both pro-competitive benefits and anticompetitive harms is necessary to answer the ultimate question of whether competition was harmed. The plaintiff ultimately needs to prove "that the monopolist's refusal to deal was part of a larger anticompetitive enterprise, such as (again) seeking to drive a rival from the market or discipline it for daring to compete on price." **[**74]** *Novell, 731 F.3d at 1075*. The result of such conduct is to harm competition by "entrench[ing] a dominant firm and enab[ling] it to extract monopoly rents once the competitor is killed off or beaten down." *Id.*

As the above paragraphs suggest, and without our endorsing any particular catchy title for this analytical approach, the calculation of procompetitive benefits net of anticompetitive harms does not easily lend itself to a *pleading* standard. ***HN26***[] Rule of reason cases "place[] a premium on objective tests based on evidence that is typically not in the defendant's exclusive control"—for example, Comcast's cost savings and other efficiencies it may have obtained due to its conduct. See Herbert Hovenkamp, *The Rule of Reason*, *70 Fla. L. Rev. 81, 86 (2018)*. This is why it is typically considered an "adequate pleading in a rule of reason antitrust case" for a plaintiff to allege (1) "evidence of market structure" (i.e., market power and relevant markets, which are not in dispute in this case) and (2) "exclusionary effect" (i.e., foreclosure of a competitor from a market, which is also not in dispute in this case)—"both of which can ordinarily be obtained without access to the defendant's own records—[and] indicate that an antitrust violation **[**75]** is plausible." *Id at 90*.

To the extent that refusal-to-deal claims require more at the pleading stage, it is enough to allege plausibly that the refusal to deal has some of the key anticompetitive characteristics identified in *Aspen Skiing*. The Supreme Court said as much in *Trinko*, in which it affirmed dismissal of a complaint, distinguished *Aspen Skiing*, and emphasized that "the defendant's prior conduct sheds no light upon the motivation of its refusal to deal—upon whether its **[*463]** regulatory lapses were prompted not by competitive zeal but competitive malice." *540 U.S. at 409*. *Trinko* specifically identified the absence of two factors—a prior and voluntary course of dealing, and refusal to sell at retail price—in distinguishing *Aspen Skiing*. ***HN27***[] The former factor was important, because it "suggested a willingness to forsake short-term profits to achieve an anticompetitive end." *Id.*, citing *Aspen Skiing, 472 U.S. at 608, 610-611*. In *Covad*, the D.C. Circuit adopted a similar, if slightly more explicit, holding that a plaintiff must eventually show a sacrifice of short-term profits to prevail on a refusal-to-deal claim and that alleging that a refusal to deal was "predatory" was sufficient at the pleadings stage. *398 F.3d at 675-76*.

Viamedia's pleading adequately alleges **[**76]** an anticompetitive refusal to deal. As described above, Viamedia's claim closely tracks *Aspen Skiing* and contains the key elements that were missing in *Trinko:* a prior course of voluntary conduct, sacrifice of short-term profits, and refusal to sell to rivals on the same terms as other potential buyers. Certainly, no more is required. We leave open the question whether allegations of short-term losses are necessary to state a refusal-to-deal claim. A case might present itself in which other factors—such as a prior course of conduct, exploitation of power over a cooperative network, refusal to sell at retail price, and discriminatory treatment of rivals—could plausibly support the inference that a refusal to deal is "prompted ... by anticompetitive malice." *Trinko, 124 S. Ct. at 880*. But this case is easier and does not require precise delineation of the requirements of a refusal-to-deal pleading.

Even if an allegation that a defendant's conduct was irrational but for its anticompetitive effect were necessary, Viamedia has plausibly alleged just that. In a section of the First Amended Complaint entitled "Comcast's Refusal to Deal with Viamedia is Irrational But for its Anticompetitive Effects," Viamedia walked **[**77]** through the long-term course of dealing prior to Comcast's conduct; the subsequent degradation of the value of the cooperative Interconnects; the financial losses suffered by Comcast itself, as well as by Viamedia and Comcast's competitor MVPDs; Comcast's willingness to offer Interconnect-only access in other markets where it did face competition; and the fact that "[t]here are no procompetitive justifications" to be achieved by the conduct given that there were "no material administrability problems in allowing Viamedia to participate in Interconnects" on behalf of its MVPD customers. First Am. Cplt. ¶¶ 154-68. Viamedia's allegations—regardless of the standard applied—are more than sufficient to pass muster under *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, and *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

HN28[] With Viamedia meeting the appropriate pleading standard and presenting evidence of harm to competition, the remainder of the case should settle into the traditional analysis followed in rule of reason cases, with the burden shifting to Comcast, which "may, of course, introduce its own proof of inevitability, superior skill, or business justification." Areeda & Hovenkamp ¶ 650c, at 94. To be more specific, under this burden-shifting framework, once Viamedia has "successfully **[**78]** establish[ed] a *prima facie* case under *§ 2* by demonstrating anticompetitive effect, then [Comcast] may proffer a 'procompetitive justification' ... a nonpretextual claim that its conduct is indeed a form of competition on the merits because it involves, for example, greater efficiency or enhanced consumer appeal." *Microsoft, 253 F.3d at* ***[*464]*** *59*. If such a justification is offered, "the burden shifts back to [Viamedia] to rebut that claim." *Id.* If Viamedia cannot rebut the evidence of Comcast's procompetitive justifications, "then [Viamedia] must demonstrate that the anticompetitive harm of the conduct outweighs the procompetitive benefit." *Id.* This burden-shifting has evolved based on which party has access to the various categories of evidence and information, with any evidence of pro-competitive justifications likely to be under the defendant's control. Cf. United States Department of Justice and Federal Trade Commission, *Horizontal Merger Guidelines* § 10, at 30 (Aug. 19, 2010) (Merger Guidelines) ("much of the information relating to efficiencies is uniquely in the possession" of the firms seeking to justify a transaction).[14]

ii. *Inapposite Vertical Integration Cases*

Comcast also relies on cases involving vertically integrated **[**79]** defendants with facts that, in crucial ways, do not map onto this case. In seeking to shoehorn this case into this category, Comcast caused confusion in the district court—and continues in this effort on appeal—by glossing over the unusual market structures in this case and portraying itself as just a "prototypical" vertically integrated firm. This misconception is accomplished by conflating (1) Comcast's actual vertical integration of its MVPD cable services with its ad rep services functions with (2) its control over the cooperative Interconnects in the relevant geographic markets. Comcast's argument for dismissal on the pleadings depends upon this confusion.

HN30[] To start, "[e]ven a monopolist ... is free to integrate, especially when integration creates no new monopoly in any second area." Areeda & Hovenkamp ¶ 1700j1, at 14-15. Such an integration allows the defendant to achieve cost-savings by "elimination of double marginalization." *United States v. AT&T, Inc., 916 F.3d 1029, 1036, 439 U.S. App. D.C. 388 (D.C. Cir. 2019)*. In other words, prior to vertical integration, the firms providing complementary products would "earn[] margins over cost before their products reached consumers." *Id. at 1044*. After integration, goes the theory, there is no need for two entities to earn margins **[**80]** over cost, and "the merged entity would eliminate that cost and ... pass on some of those cost savings to consumers in order to attract additional" customers. *Id.* Thus, it would rarely be an antitrust violation for a firm to supply itself through vertical integration, and a plaintiff would not generally have a right under ***antitrust law*** to demand that a defendant forgo supplying itself from an in-house source. Areeda & Hovenkamp ¶ 1700j1, at 14-16 & n.35.

[*465] This principle has been illustrated in some *Section 2* cases, in which a company claimed antitrust injury when a larger company vertically integrated and provided in-house what it formerly purchased from the smaller

---

[14] ***HN29***[] Courts apply a "similar balancing approach" in rule of reason cases, whether alleged under *§ 1* or *§ 2*. *Microsoft, 253 F.3d at 59*, citing *Standard Oil Co. v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*. The Supreme Court has recently reiterated this balancing test for a rule of reason *§ 1* case: "To determine whether a restraint violates the rule of reason ... a three-step, burden-shifting framework applies. Under this framework, the plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market. If the plaintiff carries its burden, then the burden shifts to the defendant to show a pro-competitive rationale for the restraint. If the defendant makes this showing, then the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means." *Ohio v. American Express Co., 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)* (omitting internal citations); see also Areeda & Hovenkamp ¶ 1820a, at 188, ¶ 1821, at 207 (observing that courts require "stronger proof of offsetting efficiencies" when defendants possess greater ability to foreclose rivals from the market).

company. For example, in *Port Dock & Stone Corp. v. Oldcastle Northeast, Inc., 507 F.3d 117 (2d Cir. 2007)*, a company with a local monopoly in crushed stone (aggregate) sold the aggregate through two distributors. The aggregate monopolist decided to vertically integrate by purchasing one of the distributors and bringing all of its distribution in-house. *Id. at 119*. The remaining distributor alleged a Section 2 violation, claiming that "its injury resulted from [defendant's] vertical integration into the distribution market." *Id. at 120*. The facts of *Port Dock* do not map onto the conduct of Comcast, which was already vertically integrated **[**81]** and was instead exploiting its control over the cooperative Interconnects.

Similarly, the defendant in *Christy Sports, LLC v. Deer Valley Resort Co., 555 F.3d 1188 (10th Cir. 2009)*, owned the mountain on which it leased property to plaintiff, and "the creator of a resort has no obligation under the antitrust laws to allow competitive suppliers of ancillary services on its property." *Id. at 1193*. Notably, the mountain was not a cooperative enterprise, and the customers (skiers) did not compete against the defendant mountain resort. And in *Novell* (which, recall, was a case that went to trial), defendant Microsoft was the sole owner of the intellectual property it had made available to independent software vendors. *731 F.3d at 1067*. And again, the customers (computer users) did not compete against Microsoft.

HN31[] These opinions about "prototypical" vertically integrated firms recognize, nevertheless, that different circumstances could support a cognizable antitrust claim in cases like this one. See *Port Dock, 507 F.3d at 124-25* ("Vertical expansion by a monopolist, without more, does not violate *section 2*," unless there is an allegation of an "anticompetitive incentive to create a downstream monopoly," or other "special circumstances in which a monopolist's vertical expansion could be anticompetitive."); *Christy Sports, 555 F.3d at 1196* ("We would not even preclude **[**82]** the theoretical possibility that such a change [by refusing to deal] could give rise to an antitrust claim, for example, if by first inviting an investment and then disallowing the use of the investment the [defendant] imposed costs on a competitor that had the effect of injuring competition in a relevant market."); *Novell, 731 F.3d at 1076* (plaintiff could have proven refusal-to-deal case against Microsoft, but at trial "presented no evidence from which a reasonable jury could infer that Microsoft's discontinuation of this arrangement suggested a willingness to sacrifice short-term profits, let alone in a manner that was irrational but for its tendency to harm competition").

Even if this were a vertical integration case, Viamedia adequately alleged that Comcast presented just such a "special circumstance." Its conduct eliminated its only competitor in the ad rep services market and increased control over its MVPD competitors in the retail cable market. But again, this is not a case of simple vertical integration. Comcast *is* vertically integrated and has been at all relevant times. No one objects to a vertically integrated Comcast offering both Interconnect services and ad rep services. Viamedia does not seek **[**83]** to force Comcast to buy ad rep services from Viamedia; nor does Viamedia seek to force Comcast to allow Viamedia to re-sell or distribute Comcast's ad rep services. Viamedia simply wants to ensure that MVPDs can freely choose Viamedia as their supplier of ad rep services if that is their preferred choice.

[*466] Another distinguishing fact is that the Interconnects are joint, cooperative efforts among competing MVPDs. That distinguishes this case from cases involving vertically integrated defendants, as in *Port Dock*. Viamedia seeks to regain access to the Interconnects to operate on behalf of its MVPD customers. It is true that by virtue of acquiring numerous other cable companies, Comcast now controls the Interconnects at issue. But they are cooperative ventures that jointly set prices for competitor MVPDs' spot avails. Comcast itself has described the Interconnects as a "collection of two or more cable TV systems that work together to distribute commercials to a wider geographic area than a single system would otherwise reach, giving advertisers the option to reach all cable households within a market with one buy." First Am. Cplt. ¶ 156.

The Interconnects' cooperative structure explains **[**84]** why Comcast describes itself not as an Interconnect "owner" but as an Interconnect "operator" and describes its function as a firm that "operates interconnects in DMAs including Chicago and Detroit." See, e.g., Appellees' Br. at 7. It also explains why Comcast describes Viamedia as having "participated in interconnects," and after being denied access, Comcast says, Viamedia sought "readmission." *Id.* Typical vertically integrated firms do not refer to themselves as the "operators" of their assets, and they do not describe their buyers as "participating" in the vertically integrated firms' services, let alone say that buyers might seek "readmission" to those services. **HN32**[] Taking control of and exploiting control of a previously cooperative mechanism is *not* vertical integration.[15]

Accordingly, we reverse the Rule 12(b)(6) dismissal of Viamedia's claim for monopolization through an unlawful refusal to deal.

2. *Tying*

HN33[] The "essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." **[**85]** Jefferson Parish Hospital Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984). Viamedia contends that Comcast conditioned the sale of Interconnect services (the tying product) on the purchase of ad rep services (the tied product). Viamedia alleges that Comcast engaged in anticompetitive conduct on two fronts. Comcast inserted itself between Viamedia and its competitor MVPDs by: (1) denying Viamedia access to the Comcast-controlled Interconnects, and (2) then using its control over the Interconnects to demand that its smaller MVPD competitors turn over to Comcast 100% of their spot avails, including the sale of local spots, an area in which Comcast and the MVPDs had formerly competed. Viamedia has offered evidence that this two-front strategy was successful. Comcast excluded its only competitor in the ad rep services market—gaining a pure monopoly. It also gained new control over and insight into its MVPD competitors that it could not have achieved otherwise.

HN34[] The district court, however, granted summary judgment on Viamedia's tying claim, a decision we also review *de novo.* Schlaf v. Safeguard Prop., LLC, 899 F.3d 459, 465 **[*467]** (7th Cir. 2018). "Summary judgment is appropriate only if there are no disputed questions of material fact and the moving party is entitled to judgment as a matter of law," so we "examine the record in the **[**86]** light most favorable to the [non-movant], granting [it] the benefit of all reasonable inferences that may be drawn from the evidence and reversing if we find a genuine issue concerning any fact that might affect the outcome of the case." *Id.* (citations omitted); see also Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986) (**HN35**[] on summary judgment, courts must refrain from making credibility determinations or weighing evidence).

a. *Summary Judgment Standard*

HN36[] The district court applied, and Comcast argues for, a summary judgment standard that requires plaintiffs in Section 2 monopolization cases to present evidence that "tends to exclude the possibility" that a monopolist's conduct is just "as consistent with competition as with illegal conduct." 335 F. Supp. 3d at 1061, quoting Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986). The proper question on summary judgment is whether Viamedia has presented evidence to establish a genuine dispute of material fact as to whether Comcast engaged in exclusionary conduct forbidden by Section 2. See Matsushita, 475 U.S. at 585; Eastman Kodak Co. v. Image Technical Services, 504 U.S. 451, 483, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992); see also, generally, In re Text Messaging Antitrust Litig., 782 F.3d 867 (7th Cir. 2015). **HN37**[] When determining whether there is a "genuine issue of material fact ... the substantive law will identify which facts are material. Anderson v. Liberty Lobby, Inc., 477 U.S. at 247-48 (emphasis omitted). "The Court's requirement in *Matsushita* that the plaintiffs' claims make economic sense did not introduce a special burden **[**87]** on plaintiffs facing summary judgment in antitrust cases." Eastman Kodak, 504 U.S. at 467-68.

Viamedia's tying theory is not economically implausible, unlike the alleged twenty-year-long conspiracy to charge predatorily low prices in Matsushita itself. A competitor's claim that a rival used monopoly power in a tying product market to gain a monopoly in a tied product market is "facially anticompetitive and exactly the harm that antitrust laws aim to prevent." Eastman Kodak, 504 U.S. at 479. The sufficiency of the tying claim depends on whether Comcast forced RCN and WOW! to buy its ad rep services. Our summary judgment inquiry can be framed in the

---

[15] Viamedia disputes the accuracy of describing Comcast as an Interconnect "owner." Deposition testimony characterizes an Interconnect simply as "an agreement between two or more MVPDs in a DMA to distribute commercials ... across all partners in the interconnect."

language of *Matsushita—are* the facts "as consistent with" forcing as with noncoerced action?—but this formulation does not get us anywhere beyond the general summary judgment standard. In the following analysis, we ask whether Viamedia has presented evidence of forcing sufficient to create a genuine dispute for trial.

b. *Tying and Comcast's Conduct*

In granting summary judgment, the district court concluded that no reasonable jury could find as a matter of fact that Comcast tied Interconnect services to the purchase of its ad rep services. We respectfully disagree. Viewing the evidence in the light most **[**88]** favorable to Viamedia, and without making credibility determinations or weighing the parties' competing evidence, we conclude that Viamedia has offered sufficient evidence that Comcast illegally tied purchase of its ad rep services to the Interconnect access it already controlled.

[*468] First, it is undisputed that Comcast (a) has market power in the tying market for Interconnect services and (b) has now foreclosed all competition in the tied market for ad rep services. Second, there is substantial evidence that the cooperative Interconnects are a separate service from Comcast's ad rep services. Third, Viamedia offered evidence that Comcast forced its competitor MVPDs to become its customers for ad rep services if they also wanted to keep their access to the Interconnects.

i. *Definition*

HN38[] Tying is conduct in which a firm will "sell one product [the tying product] but only on the condition that the buyer also purchases a different (or tied) product." *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5-6, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*; see also *Sheridan v. Marathon Petroleum Co., 530 F.3d 590, 592 (7th Cir. 2008)*; Areeda & Hovenkamp ¶ 1700a, at 4. The seller will purchase the tied product "not because the party imposing the tying requirement has a better product or a lower price" but because the seller has "power or leverage" in the market for **[**89]** the tying product. *Northern Pacific Railway, 356 U.S. at 6*.

HN39[] Tying is still nominally subject to a per se rule of illegality, but it is "a most peculiar per se rule." Areeda & Hovenkamp ¶ 1701c, at 31; see *Jefferson Parish Hospital Dist. No. 2 v. Hyde, 466 U.S. at 26-29*; *Eastman Kodak, 504 U.S. at 462*.[16] The factual elements that must be proven for a tying claim capture much of what must be demonstrated in a rule of reason case. Showing that the purchase of the tied product was forced uses many of the same concepts used to analyze refusals to deal: some assessment of market power, rough predictions of anticompetitive harm, and consideration of procompetitive justifications. See, e.g., *Illinois Tool Works Inc. v. Independent Ink, Inc., 547 U.S. 28, 44, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)* ("While some such [tying] arrangements are still unlawful, such as those that are the product of a true monopoly ... that conclusion must be supported by proof of power in the relevant market.") (citation omitted); *Sheridan v. Marathon Petroleum Co., 530 F.3d 590, 593-94 (7th Cir. 2008)* (describing the tying rule and its market-power requirement); Areeda & Hovenkamp ¶ 1760(b), at 379 (noting that, even when treated as per se illegal, "the Supreme Court has almost always been willing to consider a defendant's offered justifications").

HN40[] "When the defendant is a dominant firm" and meets "a much stricter power requirement," however, the "special screening function" of the tying factors **[**90]** is "largely unnecessary, and the more general standards of *§ 2* become relevant" because "the technical requirements ... attach only to per se ties." Areeda & Hovenkamp ¶ *777*, at 324. Thus, "when the defendant is a monopolist in the 'tying **[*469]** product,'" it may be superfluous to go through a detailed inquiry into whether there are "separate products." *Id.* ¶ 617b2, at 52-53; see also *id.* ¶ *777*, at

[16] We stay "still" because in recent years the Supreme Court has held that some categories of conduct that were formerly treated as per se illegal are now subject to a rule of reason analysis. See *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 907, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* (resale price maintenance no longer per se illegal, overruling *Dr. Miles Medical Co. v. John D. Park & Sons, 220 U.S. 373, 31 S. Ct. 376, 55 L. Ed. 502 (1911))*; *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 57, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)* (non-price vertical restraints no longer per se illegal, overruling *United States v. Arnold, Schwinn, & Co., 388 U.S. 365, 87 S. Ct. 1856, 18 L. Ed. 2d 1249 (1967))*; *State Oil Co. v. Khan, 522 U.S. 3, 22, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)* (vertical maximum price restraints no longer per se illegal, overruling *Albrecht v. Herald Co., 390 U.S. 145, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968))*.

324-25 & n.9 (noting that in *Eastman Kodak*, the Supreme Court treated a conditional refusal to sell parts without service as a tying arrangement, although on remand the tying claim was dropped and a *Section 2* violation was found without any "separate products" requirement); *United States v. Microsoft Corp., 253 F.3d 34, 96-97, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (en banc). Similarly, "[w]hen a defendant's market share and the underlying market structure make monopolization or attempt plausible, then a tie that contributes significantly to the maintenance or creation of monopoly power violates *§ 2* even though it is unilaterally imposed." Areeda & Hovenkamp ¶ *777*, at 325.

Here, Comcast's monopoly power in the tying market of Interconnect services in the three metropolitan areas and its successful capture of a monopoly position in the tied market of ad rep services in the same areas are undisputed. And **[**91]** yet great effort has been made to parse whether Comcast's conduct satisfies some platonic ideal of tying conduct. We, too, walk through the tying factors at issue (separate product and forced purchase) and determine, taking the record as a whole, that Viamedia has provided sufficient evidence to create a question of fact as to each factor. Ultimately, the focus in this *Section 2* case must remain on "whether, viewing the monopolist's conduct as a whole, it has unreasonably maintained or enhanced its monopoly position." *Id.* ¶ 777, at 324.

ii. *Separate Products or Services*

HN41[] "[W]hether one or two products are involved turns ... on the character of the demand for the two items." *Jefferson Parish, 466 U.S. at 19*; see also *Eastman Kodak, 504 U.S. at 462* ("For service and parts to be considered two distinct products, there must be sufficient demand so that it is efficient for a firm to provide service separately from parts."); *Northern Pacific Railway, 356 U.S. at 5-6*. Comcast disputes whether Interconnect access and ad rep services are separate services. The district court assumed they are. On this record, that was correct.

HN42[] The fact that buyers may wish to purchase and use two complementary products together does not, in and of itself, convert the two separate products into a single product. Rather, the **[**92]** market must "be assessed at the pre-contract rather than post-contract stage." Areeda & Hovenkamp ¶ 1802d6, at 89, citing *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*; see also *id.* ¶ 1802d6, at 88 (noting that a "grouping of sales covered by [a single] contract does not become a relevant market for that reason"). In this case, RCN and WOW! viewed the services as separate prior to entering into their present contracts with Comcast.

Interconnect services and ad rep services are different functionally, as already described at length. See above at pages 10-24. To summarize, ***HN43***[] a provider of Interconnect services bundles and re-sells ads from multiple MVPDs in a regional market. An ad rep has a more direct relationship with an MVPD, directly representing it in regional and/or local ad sales, and potentially acting as its representative with an Interconnect. The "character of the demand" for the two services also differs, as demonstrated by how the market participants have sold and purchased the services. See *Jefferson Parish, 466 U.S. at 19-21*. Viamedia has offered only ad rep services for almost two decades. Comcast formerly offered the two **[*470]** services separately in the relevant DMA geographic markets. It continues to offer them separately in other DMAs. MVPDs like Comcast **[**93]** that also operate Interconnects "often have separate salespeople selling local advertising and selling Interconnect advertising." DA650. And the other alleged victims of Comcast's tying conduct—its smaller MVPD competitors—previously purchased these services separately and, as shown above, expressed strong interest in continuing to do so when Comcast was forcing them to buy the two together in Chicago, Detroit, and Hartford.

Comcast's claim that the two services are not distinct is also flatly inconsistent with one of Comcast's primary arguments on the next factor. In arguing that it did not force the MVPDs to buy its ad rep services, Comcast points to other DMAs where it sells Interconnect services separately. Even if there might be a viable factual dispute on whether it is possible to consider these two services a single "unified market," which we doubt, that would be at minimum a question to "be resolved by the trier of fact." *Eastman Kodak, 504 U.S. at 463*. Comcast is not entitled to summary judgment on this ground.

iii. *Forced Purchase*

Ample evidence shows that Comcast conditioned MVPDs' access to the Interconnects on hiring Comcast as their ad rep. Internal Comcast documents indicate that it ended its relationship **[**94]** with Viamedia specifically to obtain full-turnkey deals with the MVPDs. A216 n.84. Internal WOW! emails show that its executives understood that WOW! would have to hire Comcast for ad rep services if it wanted to regain access to the Interconnects. A215 n.81. RCN testified to the FCC that "Comcast will only allow RCN to join the interconnects if RCN employs Comcast spotlight instead of Viamedia." *Id. A* Comcast employee working in the Chicago and Detroit markets testified to the Department of Justice that Comcast had a business practice that "if an MVPD wants to get access to a Comcast [Spotlight] controlled Interconnect, it has to hire Comcast [Spotlight] as its ad sales representative." *Id.*, A835. And a Comcast employee responded to the question "were you also clear ... that Comcast Spotlight was interested only in a turnkey deal?" with "Direct relationship, full turnkey, yes, we made that clear to [WOW!]." A811. Both Comcast and the partial dissent offer explanations and rationales to try to defang these unusually explicit pieces of evidence. See Post at 136-37. On review of summary judgment, of course, Viamedia is entitled to the benefit of reasonable inferences and interpretations in its favor. **[**95]** The opposing arguments are suitable for a trial but are not grounds for affirmance.

A jury could easily find that Comcast improperly forced the smaller MVPDs to buy its ad rep services using its monopoly in the Interconnect services market. The entire purpose of its refusal to deal with Viamedia—conceded repeatedly by Comcast—was to force RCN and WOW! to become full-turnkey clients for ad rep services. A789. Every party involved understood that this was the practical effect of banning from the Interconnects MVPDs that received ad rep services from Viamedia.

The fact that the arrangements were structured so that ownership of the slot avails passed from the MVPDs to Viamedia does not affect this analysis. ***HN44***[] In applying the antitrust laws, we care more about economic substance than about form. See *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 760, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. Smaller MVPDs do **[*471]** not have their own ad rep services divisions. As a practical matter, they cannot self-provide ad rep services and must work with an ad rep to interface with the Interconnects. ***HN45***[] Given these dynamics, Viamedia offered sufficient evidence that Comcast explicitly used its control over the Interconnects to deny access to its competitor MVPDs or their agent to force RCN and WOW! to use **[**96]** Comcast's ad rep services for *all* spot avails, including the two-thirds of spot avails sold outside of the Interconnects, many of which used to be sold locally in competition with Comcast. See *Collins Inkjet Corp. v. Eastman Kodak Co., 781 F.3d 264, 272 (6th Cir. 2015)* ("When a defendant adopts a policy that makes it unreasonably difficult or costly to buy the tying product (over which the defendant has market power) without buying the tied product from the defendant, it 'forces' buyers to buy the tied product from the defendant and not from competitors."); *Microsoft, 253 F.3d at 64* (liability appropriate where monopolist bars rival from "cost-efficient" means of distribution even if some means of distribution remain open).[17]
