Under Tennessee law, the cause of action accrues and the statute of limitations begins to run when the injury occurs or is discovered, or when in the exercise of reasonable care and diligence, it should have been discovered. The Tennessee Court of Appeals explains that the claim accrues upon discovery of the existence of a right of action, that is, facts which would support an action for tort against the tortfeasor. Such facts include not only the existence of an injury, but the tortious origin of the injury.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Class Actions

Civil Procedure > Special Proceedings > Class Actions > General Overview

Governments > Legislation > Statute of Limitations > General Overview

HN15[] Class Actions, Certification of Classes

Filing a federal class action tolls the federal statute of limitations on individual claims pending a decision on class certification in the same federal court based on the facts alleged in the class case.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Governments > Legislation > Statute of Limitations > Tolling

Governments > Legislation > Statute of Limitations > General Overview

HN16[] Class Actions, Prerequisites for Class Action

Not until the existence and limits of the class have been established and notice of membership has been sent does a class member have any duty to take note of the suit or to exercise any responsibility with respect to it in order to profit from the eventual outcome of the case. It follows that even as to asserted class members who were unaware of the proceedings brought in their interest or who demonstrably did not rely on the institution of those proceedings, the later running of the applicable statute of limitations does not bar participation in the class action and in its ultimate judgment.

HN17[] Class Actions, Certification of Classes

The American Pipe ruling, in which the filing of a federal class action tolls the federal statute of limitations on individual claims pending a decision on class certification in the same federal court based on the facts alleged in the class case, has been extended to cases in which class members file individual suits instead of intervening in the class action after the denial of class certification.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Governments > Legislation > Statute of Limitations > Tolling

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Governments > Legislation > Statute of Limitations > General Overview

HN18[] Class Actions, Certification of Classes

The American Pipe holding, in which the filing of a federal class action tolls the federal statute of limitations on individual claims pending a decision on class certification in the same federal court based on the facts alleged in the class case, is extended to situations in which a class is certified and putative class members choose to opt out of the litigation and file individual suits against the defendants.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Governments > Legislation > Statute of Limitations > General Overview

HN19[] Tolling of Statute of Limitations, Class Actions

In determining whether state statutes of limitations are tolled during the time that the defendant contests the issue of class certification, a federal district court examines: (1) the federal interest in tolling the state statutes of limitations: (2) whether the highest court of the state has or would adopt cross-jurisdictional class action tolling for antitrust class actions filed in federal court; (3) whether the plaintiffs' state law claims are sufficiently similar to the plaintiffs' federal claims to toll the state statutes of limitations; and (4) the prejudice suffered by the defendants if the court tolls the statutes of limitations.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN20[] Federal & State Interrelationships, Erie Doctrine

In the absence of controlling state law, a district court must consider all available resources, including appellate court decisions of the individual courts in question, other state and federal decisions, and the general trend of authority, to determine how the highest courts of the various states in question would decide an issue.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

Governments > Legislation > Statute of Limitations > Tolling

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN21[] Federal & State Interrelationships, Erie Doctrine

A rule recognizing cross-jurisdictional class action tolling in antitrust class actions filed in federal court generates greater efficiencies than a rule declining to do so. A court considers this factor when analyzing whether a state, which has an interest in conserving judicial resources and reducing the cost of litigation, would adopt cross-jurisdictional class action tolling in the context of antitrust cases. The court also examines three additional factors to determine if a state's highest court would adopt cross-jurisdictional class action tolling: (1) whether that state has adopted class action tolling as to class actions filed in its own courts; (2) whether that state's class action rule was modeled on *Fed. R. Civ. P. 23*; and (3) whether the state antitrust statute is similar to the Sherman and Clayton Acts.

Governments > Legislation > Statute of Limitations > General Overview

HN22[] **Class Actions, Certification of Classes**

Because Colo. R. Civ. P. 23 is virtually identical to *Fed. R. Civ. P. 23*, the Colorado Supreme Court relies on cases applying the federal rule. The commencement of a class action tolls the statute of limitations for all the members of the putative class, the portion of the limitations period that remained at the time the class action was commenced. The statute of limitations remains tolled for all members of the putative class until class certification is denied. At that point, class members may choose to file their own suits or intervene as plaintiffs in the pending action.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN23[] **Public Enforcement, State Civil Actions**

Federal judicial interpretations of the Sherman and Clayton Acts are entitled to careful scrutiny in determining whether a particular business arrangement is a per se antitrust violation under the Colorado Antitrust Act. *Colo. Rev. Stat. § 6-4-104 et seq.* The only significant difference between plaintiffs' federal and state antitrust claims is that the Colorado Antitrust Act provides full consideration paid as a remedy. *Colo. Rev. Stat. § 6-4-121*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Governments > Legislation > Statute of Limitations > Tolling

HN24[] **Class Actions, Prerequisites for Class Action**

The Indiana Court of Appeals has adopted intra-jurisdictional class action tolling.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN25[] **Class Actions, Prerequisites for Class Action**

Indiana's class action rule, Ind. R. Trial P. 23, is based upon *Fed. R. Civ. P. 23* and the Indiana Supreme Court has ruled that it is appropriate for Indiana courts to consider federal court interpretations of the federal rule when applying the Indiana rule.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN26[] **Public Enforcement, State Civil Actions**

The Indiana antitrust statute is modeled after the Sherman Antitrust Act. The only significant difference between plaintiffs' federal and state law claims is that the Indiana statute provides full consideration paid as a remedy. Ind. Code § 24-1-5.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

The Supreme Court of Kansas has adopted intra-jurisdictional class action tolling.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN28[] **Class Actions, Prerequisites for Class Action**

Kansas's class action rule is patterned after *Fed. R. Civ. P. 23*, although it is not identical, and the Kansas Supreme Court traditionally follows the federal courts' interpretation of the federal rule.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN29[] **Antitrust & Trade Law, Sherman Act**

The provisions of the Kansas antitrust act are very similar to the provisions of the Sherman Act. The only significant difference between plaintiffs' federal and Kansas state law claims is that the applicable state law provides full consideration paid as a remedy. *Kan. Stat. Ann. § 50-115*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN30[] **Class Actions, Prerequisites for Class Action**

South Carolina's class action rule is drawn principally from *Fed. R. Civ. P. 23*. Citations to federal case law and the federal rules are based on the principle that interpretations of the federal rule provide guidance in interpreting the South Carolina rule absent material differences in their wording.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN31[] **Antitrust & Trade Law, Sherman Act**

The South Carolina antitrust act is similar to the Sherman Act. The only significant difference between plaintiffs' federal and state law claims is that the South Carolina antitrust act provides full consideration paid as a remedy. *S.C. Code Ann. § 39-3-30*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN32[] **Class Actions, Prerequisites for Class Action**

The Tennessee Supreme Court describes Tennessee's class action rule as identical to *Fed. R. Civ. P. 23* and has ruled that federal authority is persuasive in Tennessee state courts interpreting Tennessee's class action rule.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN33[] **Antitrust & Trade Law, Sherman Act**

The Tennessee antitrust statute uses language very similar to the Sherman Act. The only significant difference between plaintiffs' federal and state law claims is that the Tennessee antitrust act provides full consideration paid as a remedy. *Tenn. Code Ann. § 47-25-106*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Governments > Legislation > Statute of Limitations > Tolling

HN34[] **Class Actions, Prerequisites for Class Action**

For tolling to apply, claims do not have to be identical but only substantially similar to those brought in the original class action.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN35[] **Public Enforcement, State Civil Actions**

The Maryland Antitrust Act, *Md. Code Ann., Com. Law § 11-201 et seq.*, contains a four year statute of limitations. *Md. Code Ann., Com. Law § 11-209(c)*.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN36[] **Statute of Limitations, Time Limitations**

Under Maryland law, the statute of limitations begins to run once plaintiff knows, or through the exercise of reasonable diligence should know, of the wrong.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Governments > Courts > Judicial Precedent

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Statute of Limitations > Tolling

HN37[] **Class Actions, Prerequisites for Class Action**

The United States District Court for the Eastern District of Pennsylvania concludes, based on relevant Maryland precedents, that the Maryland Court of Appeals would adopt cross-jurisdictional class action tolling in the antitrust context.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN38[] **Public Enforcement, State Civil Actions**

Courts interpreting the Maryland Antitrust Act, *Md. Code Ann., Com. Law § 11-201 et seq.*, are to be guided by the interpretation given by the federal courts to the various federal antitrust statutes. *Md. Code Ann., Com. Law II § 11-202(b)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN39[] **Class Actions, Prerequisites for Class Action**

The Maryland class action rule, Md. R. 2-231, is similar to *Fed. R. Civ. P. 23*, and the Maryland Court of Appeals has ruled that its analysis shall be informed by cases interpreting *Fed. R. Civ. P. 23* and other analogous state rules outlining class certification requirements.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN40[] **Public Enforcement, State Civil Actions**

South Carolina's antitrust statute proscribes, inter alia, arrangements, contracts, agreements, trusts or combinations made with a view to lessen, or which tend to lessen, full and free competition in the importation or sale of articles imported into the state. *S.C. Code Ann. § 39-3-10*. Further, the statute forbids agreements that control, advance or reduce the price or cost to the consumer of goods that are either imported or that are transacted entirely within the state.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN41[] **Public Enforcement, State Civil Actions**

The Wisconsin antitrust statute prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade and commerce. *Wis. Stat. § 133.03*. Further, all contracts or agreements made by any person while a member of any combination or conspiracy prohibited by *Wis. Stat. § 133.03* are void. *Wis. Stat. § 133.14*.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN42[] **Public Enforcement, State Civil Actions**

Wisconsin ***antitrust law***, though taken from the federal statutes, applies to intrastate as distinguished from interstate transactions. However, Wisconsin courts do not refuse to apply Wisconsin's antitrust statutes to intrastate activities that also involve interstate conduct or have interstate effects.

MEMORANDUM

I. INTRODUCTION

Presently before the Court is Defendants' Motion to Dismiss Plaintiffs' State Law Claims (Docket No. 369, filed April 28, 2004), Opposition to Defendants' Motion to Dismiss Plaintiffs' State Law Claims (Docket No. 369, filed May 19, 2004), Memorandum of Plaintiff Perdue Farms Incorporated in Opposition to Defendants' Motion for Judgment on the Pleadings (Docket No. 383, filed May 24, 2004), Reply in Support of Defendants' Motion for Judgment on the Pleadings (Docket No. 386, filed June 2, 2004), Reply in Support of Defendants' Motion to Dismiss State Law

Claims (Docket No. 387, filed June 2, 2004) and Surreply of Plaintiff Perdue Farms Incorporated in Opposition to Defendants' Motion for Judgment on the Pleadings (Docket No. 390, filed June 4, 2004). For the reasons that follow, the defendants' Motion to Dismiss is denied.

[7] II. FACTUAL AND PROCEDURAL HISTORY**

This is an antitrust action involving allegations that a number of U.S. manufacturers of linerboard engaged in a combination and conspiracy in unreasonable restraint of trade and commerce in violation of Section 1 of the Sherman Act, *15 U.S.C. § 1*. [1] The Court sets **[*338]** forth only an abbreviated factual and procedural history as pertinent to Defendants' Motion to Dismiss Plaintiffs' State Law Claims. The factual background of the case is described at length in this Court's Memorandum dated October 4, 2000 denying defendants' Motion to Dismiss, *In re Linerboard Antitrust Litig., 2000 U.S. Dist. LEXIS 14433, MDL No. 1261, 2000 WL 1475559, at *1-3 (E.D. Pa. Oct. 4, 2000)* ("Linerboard I"), its Memorandum dated September 4, 2001 certifying classes of direct purchasers of corrugated boxes and corrugated sheets, *In re Linerboard Antitrust Litig., 203 F.R.D. 197, 201-04 (E.D. Pa. 2001)* ("Linerboard II"), the Opinion of the Court of Appeals for the Third Circuit affirming the September 4, 2001 Memorandum and Order, *In re Linerboard Antitrust Litig., 305 F.3d 145, 147-49 (3d Cir. 2002)* (" **[**8]** Linerboard III"), this Court's Memorandum dated August 26, 2003 approving the final settlement between plaintiffs classes and two of the defendants, Temple-Inland, Inc. and Gaylord Container Corporation, *In re Linerboard Antitrust Litig., 296 F. Supp. 2d 568, 573-575 (E.D. Pa. Aug. 26, 2003)* ("Linerboard IV"), and this Court's Memorandum dated June 2, 2004 awarding class counsel attorneys fees, *In re Linerboard Antitrust Litig., -- F. Supp. 2d --, 2004 U.S. Dist. LEXIS 10532, 2004 WL 1221350, *1-3 (E.D.Pa. Jun. 2, 2004)* ("Linerboard V").

[9] A. The Class Case**

The price fixing conspiracy that is the subject of this litigation was the focus of a 1998 complaint by the Federal Trade Commission ("FTC") against Stone Container Corporation ("Stone"). [2] **[**10]** See *In re Linerboard Antitrust Litigation, 2000 U.S. Dist. LEXIS 14433, 2000 WL 1475559, *1 (E.D.Pa. Oct. 4, 2000)*. Soon after the FTC filed its complaint, three lawsuits were filed in the Northern District of Illinois on behalf of purchasers of corrugated sheets ("Sheets Complaint I"). [3]

---

[1] Linerboard includes any grade of paperboard suitable for use in the production of corrugated sheets, which are in turn used in the manufacture of corrugated boxes and for a variety of industrial and commercial applications. Corrugated sheets are made by gluing a fluted sheet which is not made of linerboard, known as the corrugating medium, between facing sheets of linerboard; corrugated sheets are also referred to as containerboard. The defendants named in the instant lawsuits are major integrated manufacturers and sellers of linerboard, corrugated sheets and corrugated boxes.

[2] The FTC charged Stone with a unilateral violation of *Section 5 of the Federal Trade Commission Act*. According to the FTC, Stone had attempted to reduce linerboard inventories and had "invited" some of its competitors to join in a "coordinated price increase." The FTC did not allege that any other manufacturer had accepted Stone's "invitation," nor did it allege the existence of any conspiracy. Stone and the FTC entered into a consent decree. In doing so, Sone did not admit liability for its alleged unilateral misconduct, and the consent decree has no preclusive effect on Stone in this private party action. See *In re Linerboard Antitrust Litigation, 2000 U.S. Dist. LEXIS 14433, 2000 WL 1475559, *1 (E.D.Pa. Oct. 4, 2000)*.

[3] General Refractories Co. v. Stone Container Corp., Civil Action No. 99-1341 (transferred on Mar. 16, 1999 to E.D. Pa.), and originally No. 98 C 3543 (filed June 8, 1998, N.D. Ill.); Albert I. Halper Corrugated Box Co. v. Stone Container Corp., Class Action No. 99-1396 (transferred on Mar. 19, 1999 to E.D. Pa.), and originally No. 98 C 4659 (filed July 28, 1998, N.D. Ill.) and Crest Meat Co., Inc. v. Stone Container Corp., Civil Action No. 99-1397 (transferred on Mar. 19, 1998 to E.D. Pa.), and originally No. 98 C 4612 (filed July 27, 1998, N.D. Ill.). These cases named only Stone as a defendant, but plaintiffs alleged that there were unnamed co-conspirators involved in the antitrust conspiracy, including inter alia, Jefferson Smurfit Corp. See Sheets Complaint I (all three complaints) at P 9. Together, these plaintiffs are referred to as the Corrugated Sheet Plaintiffs or Sheet Plaintiffs. The Corrugated Sheet Plaintiffs aver in Sheets Complaint I that they were harmed by an industry-wide combination to artificially raise the price of linerboard.

Four other lawsuits were filed **[**11]** against Stone in the Eastern District of Pennsylvania on behalf of purchasers of corrugated boxes in late 1998 ("Box Plaintiffs"). [4] On February 12, 1999 the Judicial Panel on Multidistrict Litigation transferred the actions pending in the Northern District of Illinois to this Court for all further pretrial proceedings. On May 14, 1999 the Corrugated Box Plaintiffs filed the First Amended and Consolidated Class **[*339]** Action Complaint ("Corrugated Box Amended Complaint"). Stone and the following "Non-Stone" Defendants were named in the Corrugated Box Amended Complaint: Jefferson Smurfit Corp., Smurfit-Stone Container Corp., International Paper Co., Georgia Pacific Corp., Weyerhaeuser Paper Co., Temple Inland Inc., Gaylord Container Corp., Union Camp Corp., Simpson Tacoma Kraft Co., Tenneco Inc., Tenneco Packaging, and Packaging Corp. of America. According to the Corrugated Box Amended Complaint, the Non-Stone Defendants accepted Stone's "invitation" to restrict the production of linerboard and artificially raise prices, resulting in an antitrust conspiracy in violation of the *Sherman Act*.

[12]** On May 18, 1999 a separate class action complaint was filed in the Eastern District of Pennsylvania on behalf of purchasers of corrugated sheets ("Sheets Complaint II"). This complaint names eleven of the twelve Non-Stone Defendants identified in the Corrugated Box Amended Complaint. Like the Corrugated Box Amended Complaint, Sheets Complaint II alleges that the named Non-Stone Defendants unlawfully conspired with Stone and each other to artificially raise the price of linerboard.

By Memorandum and Order dated September 4, 2001, this Court certified the following two plaintiff classes: a "sheet class" consisting of buyers of corrugated sheets and a "box class" consisting of purchasers of corrugated containers. *Linerboard II, 203 F.R.D. at 224*. On September 5, 2002, the Court of Appeals affirmed the ruling of this Court. By Order dated October 16, 2002, the Court of Appeals denied defendants' petition for en banc review. On January 14, 2003, defendants filed a Petition for Writ of Certiorari to the United States Supreme Court. The petition was denied on April 21, 2003. Thereafter, the class case was resolved through a series of partial settlements for a total **[**13]** of $ 202,572,489. [5]

[14] B. The Direct Actions**

---

[4] Winoff Industries, Inc. v. Stone Container Corp., Civil Action No. 98-5055 (filed Sep. 23, 1998, E.D. Pa.), Oak Valley Farms, Inc. v. Stone Container Corp., Civil Action No. 98-5251 (filed Oct. 2, 1998, E.D. Pa.), Garrett Paper, Inc. v. Stone Container Corp., Civil Action No. 98-5228 (filed Oct. 1, 1998, E.D. Pa.), and Local Baking Products, Inc. v. Stone Container Corp., Civil Action No. 98-5384 (filed Oct. 9, 1998, E.D. Pa.). Together, these plaintiffs are referred to as the Corrugated Box Plaintiffs or Box Plaintiffs. The Corrugated Box Plaintiffs also aver that they were harmed by an industry-wide combination to artificially raise the price of linerboard. The four corrugated box actions in the Eastern District of Pennsylvania were consolidated by stipulation and order dated December 17, 1998 pursuant to *Federal Rule of Civil Procedure 42(a)*.

[5] By Order dated August 26, 2003, this Court approved a partial settlement in the amount of $ 8 million between plaintiff classes and Temple-Inland, Inc. and Gaylord Container Corp. The $ 8 million settlement was reduced to$ 7.2 million in accordance with the terms of the settlement agreement based on the number of parties that subsequently opted-out of the classes. This first partial settlement was described by petitioners as an "ice-breaker-a settlement that would lead to further settlements.

Within a month of Court approval of the ice-breaker settlement, on September 22, 2003, the plaintiff classes and defendants International Paper Company and Union Camp Corporation, Georgia Pacific Corporation, and Weyerhauser Company announced they had reached a settlement in the total amount of $ 68 million. The Court granted final approval of that settlement on December 8, 2003.

Prior to that date, in October and November 2003, the parties announced the two additional partial settlements with defendants Packaging Corporation of America, Tenneco, Inc., and Tenneco Packaging, Inc. (The "PCA settlement") in the amount of $ 43 million and with defendants Stone Container Corporation, Jefferson Smurfit Corporation, and Smurfit Stone Container Corporation (the "Stone settlement") in the amount of $ 92.5 million. As a result of a "most favored nation's clause" in the PCA settlement agreement, the terms of the Stone settlement triggered a reduction in the PCA settlement from $ 43 million to $ 34 million. The Court granted final approval of both the PCA settlement and the Stone settlement by Memorandum and Order dated March 21, 2004. With the Court's approval of these last two partial settlements, all claims in the class action were resolved for a total of $ 202,572,489.

One-hundred and forty entities opted out of the classes by filing Requests for Exclusion on or before June 9, 2003. [6] A detailed description of the notice to classes and the procedural history involving the opt-outs from the class is provided in this Court's Memorandum of this Court of September 5, **[*340]** 2003. Of the 140 Requests for Exclusion, 13 groups of opt-outs subsequently filed direct action actions against defendants. As of the date of this memorandum, 11 of those groups have claims against one or more of the defendants outstanding and one group has voluntarily dismissed its claims against all defendants." The 11 direct actions are as follows:

1. Perdue Farms Incorporated v. Stone Container Corporation, et al., No. 03-1702 (D. Md. filed June 9, 2003);

2. Sara Lee Corporation, et al. v. Smurfit Stone Container Corporation, et al., No. 03-3939 (N.D. Ill. filed June 10, 2003);

3. Procter & Gamble Company, et al. v. Stone Container Corporation, et al., No. 03-3944 (N.D. Ill. filed June 10, 2003);

4. United States Gypsum Company, et al. v. Stone Container Corporation, et al., No. 03-4251 (N.D. Ill. filed June 10 ,2003);

5. **[**15]** Smithfield Foods, Inc., et al. v. Smurfit Stone Container Corporation, et al., No. 03-3968 (N.D. Ill. filed June 11, 2003);

6. Hormel Foods Corporation, et al. v. Stone Container Corporation, et al., No. 03-3421 (D. Minn. filed June 13, 2003);

7. Milne Fruit Products, Inc., et al. v. Stone Container Corporation, et al., No. 03-4049 (N.D. Ill. filed June 13, 2003);

8. Kellogg Company, et al. v. Smurfit Stone Container Corporation, et al., No. 03-4213 (N.D. Ill. filed June 19, 2003)

9. Farmland National Beef Packing Co. v. Stone Container Corporation, et al., No. 03-1312 (D. of Kansas filed August 29, 2003).

10. Mars Inc., et al. v. Stone Container Corporation, et al., No. 03-6977 (N. D. of Ill. filed October 1, 2003); and

11. Conopco, Inc., et al. v. Smurfit Stone Container Corporation, as successor to Stone Container Corporation, et al., No. 03-3549 (E.D. Pa. filed June 9, 2003).

Of the above 11 cases, only the Perdue plaintiffs' Complaint alleged violations of state antitrust laws, the *Maryland Antitrust Act* ("MATA"), in addition to federal antitrust violations. On April 1, 2004, plaintiffs in the Procter & Gamble, Milne Fruit and **[**16]** Mars cases moved to amend their complaints to add causes of action under the laws of six states: Colorado, Indiana, Kansas, South Carolina, Tennessee and Wisconsin. The defendants did not oppose the motion to amend stating that they would instead file motions to dismiss. By Order dated April 1, 2004, the Court granted the motion to amend. These plaintiffs subsequently filed amended complaints and defendants filed responses. Thereafter, defendants moved to dismiss the state law claims in the Procter & Gamble, Milne Fruit and Mars Amended Complaints under *Federal Rule of Civil Procedure 12(b)(6)* and the *Maryland Antitrust Act* claims in the Perdue Complaint under *Federal Rule of Civil Procedure 12(c)*.

---

[6] Copies of the Record of Potential Class Members Who Excluded Themselves from the Classes is appended to this Court's Memorandum and Order dated December 8, 2003 approving the Settlement Agreement between Temple-Inland, Inc. and Gaylord Container Corporation; this Court's Memorandum and Order dated December 8, 2003, granting Class Plaintiffs' Motion for Final Approval of Settlement Agreement Between the Class and International Paper Company and Union Camp Corporation, Georgia-Pacific Corporation, and Weyerhauser Company; and this Court's Memorandum and Order dated April 21, 2004 granting Class Plaintiffs' Motion for Final Approval of the Settlements with Defendants Packaging Corporation of America, Inc., Tenneco, Inc. And Tenneco Packaging Inc. and with Defendants Stone Container Corporation, Jefferson Smurfit Corporation, and Smurfit Stone Container Corporation.

[17]** On April 26, 2004, the plaintiffs in the Conopco, Kellogg, US Gypsum, Hormel and Perdue direct actions sought leave to amend their complaints consistent with the amendments in the Proctor & Gamble, Milne Foods and Mars direct actions. The Court decided to defer addressing that issue until it had ruled on the Defendants' Motion to Dismiss Plaintiffs' State Law Claims in the amended complaints filed in Procter & Gamble, Milne Foods and Mars direct actions. By Order dated June 22, 2004, the Court granted plaintiffs in the Conopco, Kellogg, US Gypsum, Hormel and Perdue direct actions leave to file amended complaints in the event that it denied the instant Motion to Dismiss Plaintiffs' State Law Claims and provided that any such amended complaints would be deemed filed as of April 26, 2004, the date on which these direct action plaintiffs sought leave of court to do so. [7]

[18] III. LEGAL STANDARDS**

A. *Rule 12(b)(6)*

Rule 12(b)(6) of the federal rules of civil procedure provides that, ***HN1***[] in response to a pleading, a defense of "failure to state a claim upon which relief can be granted" may **[*341]** be raised by motion. *Fed. R. Civ. P. 12(b)(6)*. In considering a motion to dismiss under *Rule 12(b)(6)*, a court must take all well pleaded facts in the complaint as true and view them in the light most favorable to the plaintiff. *Jenkins v. McKeithen, 395 U.S. 411, 421, 23 L. Ed. 2d 404, 89 S. Ct. 1843 (1969)*. Only those facts alleged in the complaint may be considered in deciding such a motion. *ALA, Inc. v. CCAIR, Inc., 29 F.3d 855, 859 (3d Cir. 1994)*. A complaint should be dismissed if "it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations." *Hishon v. King & Spalding, 467 U.S. 69, 73, 81 L. Ed. 2d 59, 104 S. Ct. 2229 (1984)*. Therefore, the facts alleged in plaintiffs' Amended Complaints are accepted as true in deciding this motion.

HN2[] The 'Third Circuit Rule" allows defendants to raise a limitations defense in a *Rule **[**19]** 12(b)(6)* motion where the "time alleged in the statement of a claim shows that the cause of action has not been brought within the statute of limitations." *Robinson v. Johnson, 313 F.3d 128, 135 (3d Cir. 2002)* (citing *Hanna v. U.S. Veterans' Admin. Hosp., 514 F.2d 1092, 1094 (3d Cir. 1975))*. Thus, the Court will consider defendants limitations arguments in addressing the motion to dismiss.

B. *Rule 12(c)*

HN3[] A motion for judgment on the pleadings, made pursuant to *Federal Rule of Civil Procedure 12(c)*, is treated under the same standard as a motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*. See *Shelly v. Johns-Manville Corp., 798 F.2d 93, 97 n.4 (3d Cir. 1986)*; *Regalbuto v. City of Philadelphia, 937 F. Supp. 374, 376 (E.D.Pa. 1995)*. A motion for judgment on the pleadings will only be granted where the moving party has established that no material issue of fact remains to be resolved, and that the movant is entitled to judgment as a matter of law. See *Institute for Scientific Info., Inc. v. Gordon and Breach, Science Publishers, Inc., 931 F.2d 1002, 1005 (3d Cir. 1991)*. **[**20]** In determining whether a material issue of fact exists, the court must view the facts and inferences to be drawn from the pleadings in the light most favorable to the non-moving party. See *Janney Montgomery Scott, Inc. v. Shepard Niles, Inc., 11 F.3d 399, 406 (3d Cir. 1993)*.

IV. DISCUSSION

Defendants Motion to Dismiss raises three issues. First, defendants have moved under *Rule 12(b)(6)* to dismiss the antitrust claims under Colorado, Indiana, Kansas, South Carolina and Tennessee law in the Mars, Milne Fruit and Procter & Gamble Amended Complaints on the ground that they are time barred. Second, defendants have moved under *Rule 12(c)* to dismiss the Perdue plaintiffs' Maryland antitrust claims on the ground that they are time barred. Third, defendants have moved under *Rule 12(b)(6)* to dismiss the South Carolina and Wisconsin claims in the Mars,

---

[7] Direct action plaintiffs argued that this was the appropriate relation back date. The Court, applying *Federal Rule of Civil Procedure 15(c)*, concludes that the amendments relate back to the date on which the original direct action complaints were filed.

Milne Fruit and Procter & Gamble Amended Complaints on the ground that the conduct plaintiffs allege is not cognizable under the antitrust statutes of these states. The Court will address these issues in turn.

A. MOTION TO DISMISS COLORADO, INDIANA, KANSAS, SOUTH CAROLINA, [21] AND TENNESSEE CLAIMS UNDER *RULE 12(b)(6)* AS TIME BARRED**

1. Colorado, Indiana, Kansas, South Carolina and Tennessee Statutes of Limitations

Defendants argue that each plaintiff admits in its Amended Complaint that it knew of the alleged wrongful conduct by all defendants as of February 25 1998, when the FTC published its Complaint against Stone. Mars Am. Compl. P 65; Milne Am. Compl. P 61; Procter & Gamble Am. Compl. P 127. In the alternative, defendants argue that plaintiffs knew of defendants' alleged conspiracy by May 18, 1999, the date the Sheets Complaint II was filed in this district, at the latest. Defendants Mot. to Dismiss 5. Defendants argue under the statutes of limitations of the states in question, using either February 25, 1998 or May 18, 1999, as a baseline, direct action plaintiffs claims are time barred.

[*342] By Order dated April 1, 2004, the Court granted the motion of the Mars, Milne Fruit and Proctor & Gamble plaintiffs to amend their complaints. Thereafter, the Mars, Milne Fruit and Proctor & Gamble plaintiffs filed Amended Complaints.

Federal Rule of Civil Procedure 15(c) provides **[**22]** that:

> *HN4*[] An amendment of a pleading relates back to the date of the pleading when . . . (2) the claim or defense asserted in the amended pleading arose out of the conduct, transaction, or occurrence set forth or attempted to be set forth in the original pleading.

The Court concludes that the Amended Complaints allege claims that arose out of the conduct set forth in the original Complaints filed in these cases. The Mars direct action was filed on October 1, 2003, the Milne Fruit direct action was filed on June 13, 2003, and the Proctor & Gamble direct action was filed on June 10, 2003. Thus, the amendments relate back to these dates under *Rule 15(c)*.

a. Colorado

Claims under the Colorado Antitrust Act of 1992 (*Colo. Rev. Stat. § 6-4-104 et seq.*) have a four year limitations period. *HN5*[] "Any civil action commenced pursuant to this [Act] shall be brought within four years from the date such cause of action accrued." *Colo. Rev. Stat. § 6-4-118*.

HN6[] Plaintiffs' four year deadline for filing their Colorado claims began when "the circumstances giving rise to the cause of action are discovered or should have been **[**23]** discovered in the exercise of reasonable diligence." Id.

Defendants argue that if direct action plaintiffs knew of the alleged wrongful conduct by defendants as of February 25 1998, then each plaintiff should have filed its complaint alleging violations of Colorado law by February 25, 2002. In the alternative, defendants argue that if direct action plaintiffs knew of the alleged wrongful conduct by defendants as of May 18, 1999, the Colorado claims should have been filed by May 18, 2003.

b. Indiana

HN7[] Under Indiana case law, the statute of limitations for claims under the Indiana antitrust statute (*Ind. Code § 24-1-1-1 et seq.*) is two years. *Gibson v. Miami Valley Milk Producers, Inc., 157 Ind. App. 218, 299 N.E.2d 631, 637 (Ind. Ct. App. 1973)* (it is "without dispute that the two year statute of limitations" barred claims under the Indiana antitrust statute); *Sandidge v. Rogers, 167 F. Supp. 553, 556 (S.D. Ind. 1958)*; cf. *Citizens Nat'l Bank of Grant County v. First Nat'l Bank of Marion, 165 Ind. App. 116, 331 N.E.2d 471, 483 (Ind. Ct. App. 1975)* (assuming that two year statute of limitations **[**24]** applied to Indiana state antitrust claim).

HN8[] In Indiana, a cause of action accrues when the plaintiff knew or, in the exercise of ordinary diligence, could have discovered that an injury had been sustained. *Wehling v. Citizens Nat'l Bank, 586 N.E.2d 840, 842 (Ind. 1992)* (finding discovery rule applies to all tort claims); *Burks v. Rushmore, 534 N.E.2d 1101, 1103-04 (Ind. 1989)*; *Meisenhelder v. Zipp Express Inc., 788 N.E.2d 924, 927 (Ind. Ct. App. 2003)*. 10 See *Ind. Code Ann. § 34-11-2-4* ("An action for … forfeiture of penalty given by statute must be commenced within two years after the cause of action accrues.").

Defendants argue that if direct action plaintiffs knew of the alleged wrongful conduct by defendants as of February 25 1998, then each plaintiff should have filed its complaint alleging violations of Indiana law by February 25, 2000. In the alternative, defendants argue that if direct action plaintiffs knew of the alleged wrongful conduct by defendants as of May 18, 1999, the Indiana claims should have been filed by May 18, 2001.

c. Kansas

HN9[] Kansas courts apply a three year statute of limitations **[**25]** for statutory claims under the Kansas Restraint of Trade Act (*Kan. Stat. Ann. § 50-101 et seq.*).11 See *Kan. Stat. Ann. § 60-512(2)* ("The following actions shall be brought within three (3) years:…An action upon a liability created by statute other than a penalty or forfeiture"); see also *Four B* ***[*343]*** *Corp. v. Daicel Chem. Indus., Ltd., 253 F. Supp. 2d 1147, 1156 (D. Kan. 2003)* (finding the "applicable statute of limitations [for antitrust liability] is three years, as set out in *§ 60-512(2)*") (citing *McCue v. Franklin, 156 Kan. 1, 131 P.2d 704 (Kan. 1942)*); *In re Vitamins Antitrust Litig., 2000 U.S. Dist. LEXIS 11351, 2000 WL 1524912, at *6 (D.D.C. July 14, 2000)* ("claims under the Kansas Antitrust Statutes are governed by the three-year statute of limitations set forth in the general Kansas statutes.").

HN10[] In Kansas, the statute of limitations began to run when the direct action plaintiffs reasonably could have learned of their potential cause of action. See *Med James, Inc. v. Barnes, 31 Kan. App. 2d 89, 61 P.3d 86, 93 (Kan. Ct. App. 2003)* ("Cases in Kansas have repeatedly held that the critical **[**26]** information to trigger the running of the statute of limitations is knowledge of the fact of injury, not the extent of injury."); *Roof-Techs Int'l v. State, 30 Kan. App. 2d 1184, 57 P.3d 538, 546 (Kan Ct. App. 2002)* ("The critical information is knowledge of the fact of injury, not the extent of injury.") (emphasis in original).

Defendants argue that if direct action plaintiffs knew of the alleged wrongful conduct by defendants as of February 25 1998, then each plaintiff should have filed its complaint alleging violations of Kansas law by February 25, 2001. In the alternative, defendants argue that if direct action plaintiffs knew of the alleged wrongful conduct by defendants as of May 18, 1999, the Kansas claims should have been filed by May 18, 2002.

d. South Carolina

HN11[] The South Carolina antitrust statute (*S.C. Code Ann. § 39-5-10 et seq.*) contains no express statute of limitations provision. Therefore, the general three year statute of limitations period for "an action upon a liability created by statute other than a penalty or forfeiture" is applicable. *S.C. Code Ann. § 15-3-530*. This three year statutory **[**27]** period is analogous to the three-year statute of limitations for claims under South Carolina's Unfair Trade Practices Act, *S.C. Code Ann. § 39-5-10 et seq.* See *S.C. Code Ann. § 39-5-150* (action may not be brought "more than three years after discovery of the unlawful conduct which is the subject of the suit.").

HN12[] In South Carolina, the statute of limitations begins to run when the plaintiff "knows or should have known by the exercise of reasonable diligence that a cause of action arises from the wrongful conduct." *Dean v. Ruscon Corp., 321 S.C. 360, 468 S.E.2d 645, 647 (S.C. 1996)*. This requires plaintiffs to act with "promptness where the facts and circumstances of an injury place a reasonable person of common knowledge and experience on notice that a claim against another party might exist." Id.

Defendants argue that if direct action plaintiffs knew of the alleged wrongful conduct by defendants as of February 25 1998, then each plaintiff should have filed its complaint alleging violations of South Carolina law by February 25, 2001. Defendants argue that in the alternative, if direct action plaintiffs knew **[**28]** of the alleged wrongful conduct by defendants as of May 18, 1999, the South Carolina claims should have been filed by May 18, 2002.

f. Tennessee

HN13[] Tennessee applies its general three year statute of limitations to claims under the Tennessee Trade Practices Act (*Tenn. Code § 47-25-101 et seq.*). See *Tenn. Code § 28-3-105* ("The following actions shall be commenced within three (3) years from the accruing of the cause of action ... (3) Civil actions based upon the alleged violation of any federal or state statute creating monetary liability for personal services rendered, or liquidated damages or other recovery therefore, when no other time of limitation is fixed by the statute creating such liability."); see also Leech v. Levi Strauss & Co., 1980 WL 4696, at *3 (Tenn. Ch. Ct. Sept. 25, 1980) (holding that a private antitrust action for injury sounds in tort and is subject to a three year statute of limitations).

HN14[] Under Tennessee law, the cause of action accrues and the statute of limitations begins to run when the injury occurs or is discovered, or when in the exercise of reasonable care and diligence, it should **[**29]** have been discovered. *Foster v. Harris, 633 S.W.2d 304 (Tenn. 1982)*; McCroskey v. Bryant Air ***[*344]*** Conditioning Co., *524 S.W.2d 487, 491 (Tenn. 1975)*. The Tennessee Court of Appeals explained that the claim accrues upon "discovery of the existence of a right of action, that is, facts which would support an action for tort against the tortfeasor. Such facts include not only the existence of an injury, but the tortious origin of the injury." *Hathaway v. Middle Tenn. Anesthesiology, P.C., 724 S.W.2d 355, 359 (Tenn. Ct. App. 1986)*.

Defendants argue that if direct action plaintiffs knew of the alleged wrongful conduct by defendants as of February 25 1998, then each plaintiff should have filed its complaint alleging violations of Tennessee law by February 25, 2001. Defendants argue that in the alternative, if direct action plaintiffs knew of the alleged wrongful conduct by defendants as of May 18, 1999, the Tennessee claims should have been filed by May 18, 2002.

2. Tolling the Colorado, Indiana, Kansas, South Carolina and Tennessee Statutes of Limitations

The Mars, Milne Fruit and Proctor & Gamble plaintiffs argue **[**30]** that the state statutes of limitations were tolled during the five years that defendants were contesting the issue of class certification, from the first date of filing in 1998 to this Court's Order of April 23, 2004 granting final certification of the two classes citing the rationale of the Supreme Court decisions *American Pipe & Const. Co. v. Utah, 414 U.S. 538, 38 L. Ed. 2d 713, 94 S. Ct. 756 (1974)* and *Crown Cork & Seal Inc., v. Parker, 462 U.S. 345, 76 L. Ed. 2d 628, 103 S. Ct. 2392 (1983)*. Pl.'s Opp. to Def.'s Mot. to Dismiss Pl.'s State Law Claims 3. Plaintiffs filed their direction actions within 10 months of the Order of April 23, 2004, thus within even the shortest statute of limitations of two years.

The Court notes as an initial matter, that if the statutes of limitations on the plaintiffs' claims in Mars, Milne Fruit and Proctor & Gamble plaintiffs claims were tolled because of the pendency of the class action, they were tolled until those plaintiffs filed Requests for Exclusion from the classes, not, as plaintiffs assert, when the Court issued its final certification order. See *Realmonte v. Reeves, 169 F.3d 1280, 1284 (10th Cir. 1999)* **[**31]** (citing *Tosti v. City of Los Angeles, 754 F.2d 1485, 1488 (9th Cir. 1985)* (when class certification has been granted, statute of limitations begins running anew from date class member opts out). These plaintiffs filed Requests for Exclusion on or before June 9, 2003. Thus, if the statutes of limitations were tolled, direct action plaintiffs claims are timely. The Court will analyze the arguments on this issue using the opt out date as the baseline.

HN15[] Filing a federal class action tolls the federal statute of limitations on individual claims pending a decision on class certification in the same federal court based on the facts alleged in the class case. *Crown Cork & Seal Inc., v. Parker, 462 U.S. 345, 76 L. Ed. 2d 628, 103 S. Ct. 2392 (1983)*; *American Pipe & Const. Co. v. Utah, 414 U.S. 538, 38 L. Ed. 2d 713, 94 S. Ct. 756 (1974)*. The Supreme Court reasoned that the purpose of *Fed. R. Civ. P. 23* would not be served by precluding putative class members from intervening in a class case if they failed to do so within the applicable statute of limitations. *American Pipe, 414 U.S. at 550-52*. The Court further **[**32]** explained:

> ***HN16***[] Not until the existence and limits of the class have been established and notice of membership has been sent does a class member have any duty to take note of the suit or to exercise any responsibility with respect to it in order to profit from the eventual outcome of the case. It follows that even as to asserted class members who were unaware of the proceedings brought in their interest or who demonstrably did not rely on

> the institution of those proceedings, the later running of the applicable statute of limitations does not bar participation in the class action and in its ultimate judgment.

Id. at 552. The Supreme Court expressed a number of reasons for its holding in American Pipe. First, the Court reasoned that refusing to extend the tolling rule to class members would "deprive *Rule 23* class actions of the efficiency and economy of litigation which is a principal purpose of the procedure," leading to the filing of numerous protective, duplicative and in many cases, unnecessary, suits by individual class members. **[*345]** *Id. at 553-54*. Moreover, the Supreme Court concluded that the tolling rule is not inconsistent with the **[**33]** purposes behind statutes of limitations, namely, preventing plaintiffs from bringing "stale claims" with no prior notice to defendants.

Crown, Cork & Seal ***HN17***[] extended the ruling in American Pipe to cases in which class members filed individual suits instead of intervening in the class action after the denial of class certification. *Id. at 554*. In so ruling the Court reasoned that because defendants were put on notice of the factual predicates for all of the potential antitrust claims of class members, no "potential for unfair surprise" would be created by tolling the statutes of limitations for plaintiffs' claims during the pendency of class certification. *Crown, Cork, 462 U.S. at 353* (once class action is filed, "the defendant will be aware of the need to preserve evidence and witnesses respecting the claims of all the members of the class").

HN18[] American Pipe's holding has been extended to situations, such as the one presented in this case, in which a class is certified and putative class members choose to opt out of the litigation and file individual suits against the defendants. See, e.g., *Realmonte v. Reeves, 169 F.3d 1280, 1284 (10th Cir. 1999)* **[**34]** (collecting cases). In applying the American Pipe rule to class members who opted out of a class after class certification was granted, the Realmonte court stated:

> Considering the Supreme Court's rationale that tolling the applicable statute of limitations during the course of a class member's participation would serve to prevent the "needless duplication of motions" and protective filings by parties seeking to preserve their rights, we believe that, in this case, the tolling rule would even be more applicable.

Id. Continuing, the court stated that the *Rule 23(c)(2)* requirement of notice to all class members that can upon request be excluded from the class would be meaningless if the statute of limitations for such members' subsequent individual claims were not tolled. Id. (citing *Crown, Cork & Seal, 462 U.S. at 351-52*).

The Mars, Milne Fruit and Proctor & Gamble plaintiffs contend that none of the states in question have addressed application of the rationale of American Pipe and Crown, Cork to toll the statute of limitations on state antitrust claims during the pendency of an antitrust class action filed in federal **[**35]** court, hereafter referred to as "cross-jurisdictional class action tolling," but that the highest court of each state would adopt cross-jurisdictional class action tolling under the facts of the present case. Defendants agree that neither the highest court nor the legislature of those states have adopted cross jurisdictional class action tolling and argue that this Court should only apply a cross-jurisdictional tolling rule where the highest court or legislature has expressly adopted such a rule.

In *Chardon v. Soto, 462 U.S. 650, 656-7, 77 L. Ed. 2d 74, 103 S. Ct. 2611 (1983)*, a case involving a claim under *42 U.S.C. § 1983*, the Supreme Court ruled that a federal court applying a state statute of limitations must also apply the state law of tolling. However, Chardon did not address the situation presently before this Court-how class action tolling applies in an antitrust case involving state and federal claims when the applicable state law does not provide for tolling.

HN19[] In analyzing plaintiffs tolling argument the Court will examine: (1) the federal interest in tolling the state statutes of limitations: (2) whether the highest court of the state has or **[**36]** would adopt cross-jurisdictional class action tolling for antitrust class actions filed in federal court; (3) whether plaintiffs state law claims are sufficiently similar to plaintiffs federal claims to toll the state statutes of limitations; and (4) the prejudice suffered by defendants if the Court tolls the statutes of limitations.

a. The Federal Interest

As the Eighth Circuit held in *Adams Pub. Sch. Dist. v. Asbestos Corp., 7 F.3d 717 (8th Cir. 1993)*, in "American Pipe the [Supreme] Court identified a strong federal interest in ensuring the 'efficiency and economy of the class-action procedure." *Id. at 718* (citing *Chardon, 462 U.S. at 661*. Thus, the Court will consider **[*346]** the federal interest in the efficiency of the class action procedure in applying state statutes of limitations.

In the antitrust context, declining to adopt cross-jurisdictional class action tolling will invite the filing of numerous protective, duplicative and in many cases, unnecessary, suits by class members that want to consider filing claims under state ***antitrust law*** not included in a federal class action complaint. *American Pipe, 414 U.S. at 553-54.* **[**37]** These suits would undermine the efficiency of federal class actions. For instance, in the present case, because the defendants made sales to buyers in many states, class members would have had to file protective suits in every state in which a class member potentially made purchases from defendants pending confirmation of those sales through discovery. Thus, in addition to filing protective suits in the seven states in question, adopting defendants' argument would mean that class members would have been required to file protective suits in a number of other states in order to preserve their state law claims. Moreover, if there were diversity of citizenship, defendants could remove such suits to federal court. Once in federal court, these cases would likely be transferred by the Judicial Panel on Multidistrict Litigation to this Court. Additional suits in this Court would further complicate these proceedings and consume significant judicial resources and unnecessarily increase the cost of litigation to the parties.

Further, pendency of suits in state court would require coordination of discovery in the federal case with discovery in the state cases that were not removed. The Manual **[**38]** for Complex Litigation counsels courts to "encourage techniques that coordinate discovery and avoid duplication." Manual for Complex Litigation (4) § 20.14 (2004). A cross-jurisdictional class action tolling rule accomplishes both goals. The Court believes that this federal interest alone is sufficient to warrant tolling of state statutes of limitations. *Adams Public School District, 7 F.3d 717 (8th Cir. 1993)* ("we view the federal interest as sufficiently strong to justify tolling in a diversity case when the state law provides no relief").

b. The States' Interests

The Court concludes that, independent of the federal interest involved, each of the states in question would adopt cross-jurisdictional class action tolling in antitrust class actions filed in federal court. ***HN20***[] In the absence of controlling state law, this Court must consider all available resources, including appellate court decisions of the individual courts in question, other state and federal decisions, and the general trend of authority, to determine how the highest courts of the various states in question would decide the issue. *Sawtell v. E. I. du Pont De Nemours and Co., 22 F.3d 248, 250* ***[**39]*** *(10th Cir.)*, cert. denied, *513 U.S. 917, 115 S. Ct. 295, 130 L. Ed. 2d 209 (1994)*. The Court will analyze the statutes and laws of each state individually but first will consider "other state and federal decisions, and the general trend of authority" as it applies in general to the laws of all the states in question.

A number of states' highest courts have addressed cross-jurisdictional tolling. The Supreme Court of Illinois in *Portwood v. Ford Motor Co., 183 Ill. 2d 459, 701 N.E.2d 1102, 233 Ill. Dec. 828 (Ill. 1998)*, declined to adopt cross-jurisdictional tolling under the following rationale:

> Tolling the statute of limitations for individual actions filed after the dismissal of a class action is sound policy when both actions are brought in the same court system. In such instances, failing to suspend the limitation period would burden the subject court system with the protective filings described by the Supreme Court in American Pipe and Crown, Cork. Tolling the statute of limitations for purported class members who file individual suits within the same court system after class status is denied therefore serves to reduce the total **[**40]** number of filings within that system.
>
> Tolling a state statute of limitations during the pendency of a federal class action, however, may actually increase the burden on that state's court system, because plaintiffs from across the country may elect to file a subsequent suit in that state solely to take advantage of the generous tolling rule. **[*347]** Unless all states simultaneously adopt the rule of cross-jurisdictional class action tolling, any state which independently does so will invite into its courts a disproportionate share of suits which the federal courts have refused to certify as

> class actions after the statute of limitations has run. Although plaintiffs assert that the majority of courts which have considered this issue have chosen to adopt cross-jurisdictional tolling to preserve claims under state law, our research indicates precisely the opposite. At any rate, it is apparent that very few states to date have even considered the issue of cross-jurisdictional tolling, let alone adopted it. Given this state of affairs, it is clear that adoption of cross-jurisdictional class tolling in Illinois would encourage plaintiffs from across the country to bring suit here following dismissal **[**41]** of their class actions in federal court. We refuse to expose the Illinois court system to such forum shopping.
> Furthermore, because state courts have no control over the work of the federal judiciary, we believe it would be unwise to adopt a policy basing the length of Illinois limitation periods on the federal courts' disposition of suits seeking class certification. State courts should not be required to entertain stale claims simply because the controlling statute of limitations expired while a federal court considered whether to certify a class action.

Id. at 1104.

The Supreme Court of Ohio reached the opposite result and adopted cross-jurisdictional tolling in **[*348]** *Vaccariello v. Smith & Nephew Richards, Inc., 94 Ohio St. 3d 380, 2002 Ohio 892, 763 N.E.2d 160 (Ohio 2001)*, an antitrust case. The Vaccariello court addresses the Illinois Supreme Court Portwood decision and provided the following rationale for cross jurisdictional tolling in antitrust cases:

> In *Portwood v. Ford Motor Co., 183 Ill. 2d 459, 701 N.E.2d 1102, 1104, 233 Ill. Dec. 828 (Ill. 1998)* the Supreme Court of Illinois rejected cross-jurisdictional tolling "because plaintiffs **[**42]** from across the country may elect to file a subsequent suit in that state solely to take advantage of the generous tolling rule," thereby burdening Illinois' court system. We are not persuaded that this is a realistic potential problem.
> Our holding today merely allows a plaintiff who could have filed suit in Ohio irrespective of the class action filed in federal court in Pennsylvania to rely on that class action to protect her rights in Ohio. To do otherwise would encourage all potential plaintiffs in Ohio who might be part of a class that is seeking certification in a federal class action to file suit individually in Ohio courts to preserve their Ohio claims should the class certification be denied. The resulting multiplicity of filings would defeat the purpose of class actions. Our holding does not invite plaintiffs who have no relationship to Ohio to file suit in our courts. Instead, only those plaintiffs who could have otherwise filed suit in Ohio will be able to file suit pursuant to the tolling rule we espouse today.

Id. at 163.

The Court finds the Ohio Supreme Court's rationale in Vaccariello more compelling in an antitrust case. In so ruling, the Court notes **[**43]** that Portwood involved products liability claims. "Several courts which have considered the applicability of the American Pipe tolling rule to products liability or mass tort cases have ruled against tolling" on the ground that it led to forum shopping-the filing of lawsuits in states which permitted tolling. *Staub v. Eastman Kodak Co., 320 N.J. Super. 34, 726 A.2d 955, 964 (N.J. Super.Ct.App.Div. 1999)* (collecting cases). This Court agrees with the Ohio Supreme Court that the Illinois Supreme Court's concerns about encouraging litigation expressed in Portwood are not realistic in antitrust cases. Unlike products liability cases which, because of our national economy, could potentially be filed in any state, claims under state antitrust statutes require much greater contacts between the potential claimant and the forum state. [8] See, e.g., *Vaccariello, 763 N.E.2d at 164* ("Our

---

[8] The states have adopted various standards for assessing the requisite contacts between a claimant and a state's economy in order to give rise to a claim under the state's antitrust laws. Many, but not all, have adopted what amounts to an effects-based standard. See, e.g., *Abbott Lab. v. Durrett, 746 So. 2d 316, 1998 Ala. LEXIS 208, 1998 WL 436062 (Ala. July 31, 1998)* (limiting field of operation to purely intrastate transactions); *Heath Consultants, Inc. v. Precision Instruments, Inc., 247 Neb. 267, 527 N.W.2d 596, 606-07 (Neb.1995)*; *C. Bennett Bldg. Supplies Inc. v. Jenn Air Corp., 759 S.W.2d 883, 889 (Mo.Ct.App.1988)*; *International Television Prods. Ltd. v. Twentieth Century-Fox Television Div., 622 F. Supp. 1532, 1540 (S.D.N.Y.1985)*; *Lynch Display Corp. v. National Souvenir Ctr. Inc., 640 S.W.2d 837, 840 (Tenn.Ct.App.1982)* (examining whether intrastate effects of alleged conduct predominate over interstate effects to determine applicability of state antitrust statute); *R.E. Spriggs Co. v. Adolph Coors Co., 37 Cal. App. 3d 653, 112 Cal.Rptr. 585, 593 (Cal.Ct.App.1974)* (relying on "factual nexus" within state to determine applicability of state antitrust statute); *Commonwealth v. McHugh, 326 Mass. 249, 93 N.E.2d 751 (Mass.1950)*;

holding today merely allows a plaintiff who could have filed suit in Ohio . . . to rely on that [federal] class action to protect her rights in Ohio. . . . [It] does not invite plaintiffs who have no relationship to Ohio to file suit in our courts."). See, **[**44]** e.g., *PMI Mortgage Ins. Co. v. Deseret Fed. Savings and Loan, 757 P.2d 1156* (Colo. Ct. of App. 1988); *Fidelity Finan. Svcs., Inc. v. West, 640 N.E.2d 394 (Ind. Ct. App. 1994)*; *Environmental Ventures, Inc. v. Alda Svcs. Corp., 19 Kan. App. 2d 292, 868 P.2d 540* (Kan. Ct. of App. 1994); *Federal Land Bank of Columbia v. Davant, 292 S.C. 172, 355 S.E.2d 293* (S.C. Ct. of App. 1987);*Smith v. Priority Transp., Inc., 1993 Tenn. App. LEXIS 90, 02A01-9203-CV-00074, 1993 WL 29021 (Tenn. Ct. App. Feb. 9, 1993)*.

[45]** In the antitrust context, declining to adopt cross-jurisdictional class action tolling will invite the filing of numerous protective, duplicative and in many cases, unnecessary, suits by class members. *American Pipe, 414 U.S. at 553-54*. These suits will consume judicial resources at the federal and state level. The Court agrees with the Staub court that the "efficient utilization of judicial resources and the reduction of costs to individual litigants are among the principal purposes of both state and federal class action rules." *Staub, 726 A.2d at 966* (citing *American Pipe, 414 U.S. at 553*). As the Staub court further explained:

> A tolling rule which permits individual claimants to refrain from filing suit pending a decision on certification is almost indispensable to accomplish those purposes. In fact, a contrary rule would reward defendants who caused a court to delay decision of class action certification until the statute of limitations had run against any potential plaintiffs . . .

Id. And in a footnote to this passage, the court addressed the precise issue before this Court:

> We see no reason for **[**46]** tolling to depend on whether the class action is pending in state or federal court. Tolling state statutes of limitations during the pendency of a putative class action in federal court would tend to promote the efficiency of both state and federal courts systems because suits asserting the individual claims of the class members might be filed in either court system or in both. Further, we have an interest in promoting the efficiency of both systems.

Id. at n.4.

In sum, ***HN21***[] the Court concludes that a rule recognizing cross-jurisdictional class action tolling in antitrust class actions filed in federal court generates greater efficiencies than a rule declining to do so. The Court will consider this factor when analyzing whether the various states in question, all of which have an interest in conserving judicial resources and reducing the cost of litigation, would adopt cross-jurisdictional class action tolling. The Court will also examine three additional factors to determine if a state's highest court would adopt cross-jurisdictional class action tolling whether: (1) whether that state has adopted class action tolling as to class actions filed in its own courts (hereafter **[**47]** referred to as "intra-jurisdictional class action tolling"); (2) whether that state's class action rule was modeled on *Federal Rule of Civil Procedure 23*; and (3) whether the state antitrust statute is similar to the *Sherman* and *Clayton Acts*.

(I) Colorado

Colorado has adopted intra-jurisdictional class action tolling. The Colorado Court of Appeals in Rosenthal v. Dean Witter, held:

> ***HN22***[] **[*349]** Because *Colorado Rule of Civil Procedure 23* is virtually identical to *Fed.R.Civ.P. 23*, we rely on cases applying the federal rule. *Goebel v. Colorado Dep't of Institutions, 764 P.2d 785 (Colo. 1988)*. The commencement of a class action tolls the statute of limitations for all the members of the putative class, the portion of the limitations period that remained at the time the class action was commenced. *American Pipe & Construction Co. v. Utah, 414 U.S. 538, 38 L. Ed. 2d 713, 94 S. Ct. 756 (1974)*. The statute of limitations remains tolled for all members of the putative class until class certification is denied. *Crown Cork & Seal Co. v.*

Emergency One, Inc. v. Waterous Co., Inc., 23 F. Supp. 2d 959, 969 (E.D. Wis. 1998) (applying an "effects based standard" which "extends the jurisdictional scope of [state] ***antitrust law*** to unlawful activity which has significantly and adversely affected trade and economic competition within this state").

> Parker, 462 U.S. 345, 76 L. Ed. 2d 628, 103 S. Ct. 2392 (1983). **[**48]** At that point, class members may choose to file their own suits or intervene as plaintiffs in the pending action.

883 P.2d 522, 531 (Colo. 1994) rev'd on other grounds 908 P.2d 1095 (Colo. 1995). [9] As the Colorado Supreme Court stated in Rosenthal, Colorado's class action rule is "virtually identical" to Federal Rule of Civil Procedure 23.

HN23[] An intermediate Colorado appeals court has ruled that "federal judicial interpretations of the Sherman and Clayton Acts are entitled to careful scrutiny in determining whether a particular **[**49]** business arrangement is a per se antitrust violation under the Colorado Antitrust Act".Stifflear v. Bristol-Myers Squibb Co., 931 P.2d 471, 474 (Colo. Ct. of App. 1996). The only significant difference between plaintiffs' federal and state antitrust claims is that the Colorado Antitrust Act provides full consideration paid as a remedy. See Colo. Rev. Stat. Ann. § 6-4-121.

Thus, for all of the foregoing reasons, the Court concludes that the Supreme Court of Colorado would adopt cross-jurisdictional class action tolling for antitrust class actions filed in federal courts.

(ii) Indiana

HN24[] The Indiana Court of Appeals has adopted intra-jurisdictional class action tolling. Arnold v. Dirrim, 398 N.E.2d 426, 439 (Ind. 1979).

HN25[] Indiana's class action rule, Trial Rule 23, is "based upon Fed.R.Civ.P. 23" and the Indiana Supreme Court has ruled that it is appropriate for Indiana courts to consider federal court interpretations of the federal rule when applying the Indiana rule." Hefty v. All Other Members of the Certified Settlement Class, 680 N.E.2d 843 (Ind. 1997) **[**50]** (citing In re Tina T., 579 N.E.2d 48, 55 (Ind.1991)).

HN26[] A United States District Court has noted that the Indiana antitrust statute is modeled after the Sherman Antitrust Act. Perry v. Hartz Mountain Corp., 537 F. Supp. 1387, 1390 (S.D. Ind. 1982). The only significant difference between plaintiffs' federal and state law claims is that the Indiana statute provides full consideration paid as a remedy. See Ind. Code § 24-1-5

Thus, for all of the foregoing reasons, the Court concludes that the Supreme Court of Indiana would adopt cross-jurisdictional class action tolling for antitrust class actions filed in the federal courts.

(iii) Kansas

HN27[] The Supreme Court of Kansas had adopted intra-jurisdictional class action tolling. Waltrip v. Sidwell Corp., 234 Kan. 1059, 678 P.2d 128, 133 (Kan. 1984) ("we hold that the right of all putative members of a proposed class in an action filed pursuant to K.S.A. 60-223 to file a separate action is preserved pending the determination whether the initial case shall be maintained as a class action). [10]

[51]** **[*350]** As the Kansas Supreme Court noted most recently in Dragon v. Vanguard Industries, Inc., 277 Kan. 776, 89 P.3d 908 (Kansas 2004), ***HN28***[] Kansas' class action rule is "patterned after Fed. R. Civ. Proc. 23, although it is not identical, and this court has traditionally followed the federal courts' interpretation of the federal rule." Id. at 910 (citing Steele v. Security Benefit Life Ins. Co., 226 Kan. 631, 602 P.2d 1305 (Kan. 1979).

---

[9] Defendants argue that the Supreme Court of Colorado would not adopt cross-jurisdictional class action tolling because Colorado courts strictly construe statutes of limitations and do not allow for tolling absent a specific statutory provision to that effect. Def.'s Mot. to Dismiss 18. However, as the citation to Rosenthal makes clear, Colorado has adopted intrajurisdictional class action tolling.

[10] Defendants argue that the Supreme Court of Kansas would not adopt cross-jurisdictional class action tolling because Kansas courts strictly construe statutes of limitations. Def.'s Mot. to Dismiss 19. Defendants further argue that issues related to Kansas state statutes of limitations must be resolved solely with reference to Kansas law. Id. However, as the citation to Waltrip makes clear, Kansas has adopted intra-jurisdictional class action tolling.

HN29[] The provisions of the Kansas antitrust act are very similar to the provisions of the *Sherman Act*. Compare *Kan. Stat. Ann. § 50-112* ("All arrangements, contracts, agreements, trusts or combinations between persons made with a view or which tend to prevent full and free competition . . . are hereby declared to be against public policy, unlawful and void.") with *15 U.S.C. § 1* ("Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal."). The only significant difference between plaintiffs' federal and Kansas state law claims is that the applicable state law **[**52]** provides full consideration paid as a remedy. See *Kan. Stat. Ann. § 50-115*.

Thus, for all of the foregoing reasons, the Court concludes that the Supreme Court of Kansas would adopt cross-jurisdictional class action tolling for antitrust class actions filed in the federal courts.

(iv) South Carolina

HN30[] South Carolina's class action rule is "drawn principally from Federal *Rule 23*." See also, *McGann v. Mungo, 287 S.C. 561, 340 S.E.2d 154 (SC App 1986)* (Court of Appeals cites federal cases and commentary in construing new *Rule 23*, SCRCP). As an intermediate South Carolina appellate court recently explained, "citations to federal case law and the federal rules are based on the principal that interpretations of the federal rule provide guidance in interpreting the South Carolina rule absent material differences in their wording." Middleton v. SunStar Acceptance Corp., 2000 WL 33385388, *3 n.3 (S.C.Com.Pl.,2000).

HN31[] The South Carolina antitrust act is similar to the *Sherman Act*. Compare *S.C. Code Ann. § 39-3-10* ("All arrangements, contracts, agreements, trusts or combinations . . . made with a view **[**53]** to lessen, **[*351]** or which tend to lessen, full and free competition . . . are declared to be against public policy, unlawful and void.") with *15 U.S.C. § 1* **[*352]** ("Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal."). The only significant difference between plaintiffs' federal and state law claims is that the South Carolina antitrust act provides full consideration paid as a remedy. *S.C. Code Ann. § 39-3-30*.

Defendants cite *Witt v. American Trucking Ass'ns, 860 F. Supp. 295, 299, 301 n.4 (D.S.C. 1994)* for the rule that "South Carolina does not provide the tolling of the limitations period while a claim is pending in federal court." However, the statement of the Witt court cited by defendants was made in a footnote without elaborating the court's reasoning and it relies without explanation on two earlier decisions, only one of which was from a South Carolina state court and neither of which held that the filing of a claim in federal court does not toll the statute of limitations in a later filed state court claim. Further, and most importantly, **[**54]** Witt was not a class action. Thus,*Witt* is distinguishable from this case.

Thus, for all of the foregoing reasons, the Court concludes that the Supreme Court of South Carolina would adopt cross-jurisdictional class action tolling for antitrust class actions filed in the federal courts.

(v) Tennessee

HN32[] The Tennessee Supreme Court describes Tennessee's class action rule as "identical" to *Federal Rule of Civil Procedure 23* and has ruled that "federal authority is persuasive" in Tennessee state courts interpreting Tennessee's class action rule. *Meighan v. U.S. Sprint Communications Co., 924 S.W.2d 632, 637, n.2 (Tenn. 1996)*; *Bayberry Associates v. Jones, 783 S.W.2d 553 (Tenn.1990)*.

HN33[] The Tennessee antitrust statute uses language very similar to the *Sherman Act*. Compare *Tenn. Code Ann. § 47-25-101* ("All arrangements, contracts, agreements, trusts, or combinations . . . made with a view to lessen, or which tend to lessen, full and free competition . . . are declared to be against public policy, unlawful, and void.") with *15 U.S.C. § 1* ("Every contract, combination **[**55]** in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal."). The only significant difference between plaintiffs' federal and state law claims is that the Tennessee antitrust act provides full consideration paid as a remedy. *Tenn. Code Ann. § 47-25-106*.

In *Maestas v. Sofamor Danek Group, Inc., 33 S.W.3d 805, 808 (Tenn. 2000)* the Supreme Court of Tennessee declined to adopt cross-jurisdictional tolling in a products liability case. Defendants argue this decision precludes the application of cross-jurisdictional class action tolling in the present case. This Court disagrees. The Tennessee Supreme Court declined to adopt cross-jurisdictional class action tolling, citing the Supreme Court of Illinois Portwood decision. For the reasons stated supra, the Court concludes the Portwood rationale would not be adopted by the Tennessee Supreme Court in antitrust cases. Further, the factors the Tennessee Supreme Court considered, judicial economy and costs of litigation, favor adopting cross-jurisdictional class action tolling for antitrust class actions filed in federal court.

[56]** Thus, for all of the foregoing reasons, the Court concludes that the Supreme Court of Tennessee would adopt cross-jurisdictional class action tolling for antitrust class actions filed in the federal courts.

c. Tolling is Appropriate Because Plaintiffs State Law Claims are Substantially Similar to Those Asserted in the Federal Class Action

HN34[] For tolling to apply, claims do not have to be identical but only substantially similar to those brought in the original class action. *Crown, Cork, 462 U.S. at 355* ("when a plaintiff invokes American Pipe in support of a separate lawsuit, the district court should take care to ensure that the suit raises claims that 'concern the same evidence, memories, and witnesses as the subject matter of the original class suit'") (citing *American Pipe, 414 U.S. 538, 38 L. Ed. 2d 713, 94 S. Ct. 756 (1974))* (Powell, concurring). See also *Tosti v. City of Los Angeles, 754 F.2d 1485, 1489 (9th Cir. 1985)* ("We find no persuasive authority for a rule which would require that the individual suit must be identical in every respect to the class suit for the statute to be tolled."); *CSU Holdings v. Xerox (In re Independent Serv. Orgs. Antitrust Litig.), 1997 U.S. Dist. LEXIS 4496, Civil Action No. MDL-1021, 1997 WL 161940, **[**57]** *4 (D. Kan. Mar. 12, 1997)* (requiring the allegations of both suits to be identical "would be illogical because one of the primary reasons a member will opt out of a class suit is that she has strong individual claims against the defendant that she believes will not be redressed by the overall class settlement") (citations omitted).

Plaintiffs' state law claims meet the similarity requirements for tolling set forth in American Pipe and Crown, Cork. First, the factual predicates for plaintiffs' federal and state claims are the same. Second, as discussed above, the state antitrust statutes on which plaintiffs' claims are based are modeled upon or closely track the language of the federal antitrust statutes. *Stifflear v. Bristol-Myers Squibb Co., 931 P.2d 471, 474* (Colo. Ct. of App. 1996) ("federal judicial interpretations of the *Sherman* and *Clayton Acts* are entitled to careful scrutiny in determining whether a particular business arrangement is a per se antitrust violation under the *Colorado Antitrust Act*"); *Perry v. Hartz Mountain Corp., 537 F. Supp. 1387, 1390 (S.D. Ind. 1982)* (Indiana antitrust statute modeled after *Sherman Antitrust **[**58]** Act*); *Kan. Stat. Ann. § 50-112* ("All arrangements, contracts, agreements, trusts or combinations between persons made with a view or which tend to prevent full and free competition . . . are hereby declared to be against public policy, unlawful and void."); *S.C. Code Ann. § 39-3-10* ("All arrangements, contracts, agreements, trusts or combinations . . . made with a view to lessen, or which tend to lessen, full and free competition . . . are declared to be against public policy, unlawful and void."); *Tenn. Code Ann. § 47-25-101* ("All arrangements, contracts, agreements, trusts, or combinations . . . made with a view to lessen, or which tend to lessen, full and free competition . . . are declared to be against public policy, unlawful, and void.") with *15 U.S.C. § 1* ("Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal.").

The only significant difference between plaintiffs' federal and state antitrust claims is that the applicable state laws provide full consideration paid as a remedy. See *Colo. Rev. Stat. Ann. § 6-4-121* **[**59]** ; *Ind. Code § 24-1-5*; *Kan. Stat. Ann. § 50-115*; *S.C. Code Ann. § 39-3-30*; *Tenn. Code Ann. § 47-25-106*; *Wis. Stat. § 133.14*. However, as this Court noted several years ago, an individual plaintiff that seeks a different remedy from that sought in the class action should not be barred from asserting claims by the statute of limitations. *Swierkowski v. CONRAIL, 168 F. Supp. 2d 389, 395 (E.D. Pa. 2001)* ("Creating a rule which would require individual plaintiffs to litigate their damages claims while a class action seeking injunctive relief for an alleged pattern or practice of discrimination was pending would run completely counter to the efficiency rationale of the class action by having two suits covering essentially the same claim running at the same time.") (quoting *Crown, Cork, 462 U.S. at 350*).

d. Prejudice

Because defendants were put on notice of the factual predicate for all of the potential antitrust claims-whether federal or state-of class members, regardless of whether they stayed in the class **[**60]** or opted out and filed individual actions, no "potential for unfair surprise" would be created by tolling the statutes of limitations for plaintiffs' state law claims. *Crown, Cork, 462 U.S. at 353* (once class action is filed, "the defendant will be aware of the need to preserve evidence and witnesses respecting the claims of all the members of the class"). See also *Vaccariello, 763 N.E.2d at 163* (when a class action is filed, "the defendant is put on notice of the substance and nature of the claims against it" as to any subsequent individual claims that might be asserted arising out of the same set of facts); *Staub, 726 A.2d at 967* ("although defendants did not know of the specific claim of these plaintiffs until they commenced this suit, defendants knew within the period of limitations that if they were successful in defeating class certification, they would probably face individual suits").

In sum, the Court concludes that the statutes of limitations were tolled in Colorado, Indiana, Kansas, South Carolina and Tennessee from the date of filing the class action until the direct action plaintiffs opted out of the classes. Thus, direct **[**61]** action plaintiffs claims under the laws of these states are not time barred and will not be dismissed.

B. MOTION TO DISMISS MARYLAND CLAIMS UNDER *RULE 12(c)* AS TIME BARRED

Defendants have also moved to dismiss Perdue's claims arising under the MATA on the grounds that they are time barred. ***HN35***[] The MATA (*Md. Code Ann., Com. Law § 11-201 et seq.*) contains a four year statute of limitations. See *Md. Code Ann., Com. Law § 11-209(c)* ("An action brought to enforce this subtitle shall be commenced within four years after the cause of action accrues."). ***HN36***[] Under Maryland law, the statute of limitations begins to run once plaintiff "knows, or through the exercise of reasonable diligence should know, of the wrong." *Murphy v. Merzbacher, 346 Md. 525, 697 A.2d 861, 865 (Md. Ct. App. 1997)*. Thus, defendants argue that direct action plaintiffs had until February 25, 2002 to file their Maryland claims. Perdue did not file its direct action until June 9, 2003.

The Perdue plaintiffs argue that the Maryland statute of limitations was tolled during the pendency of class certification in this court. Defendants argue that **[**62]** Maryland has not affirmatively adopted cross-jurisdictional tolling and point to *Thelen v. Massachusetts Mutual Life Insurance Co., 111 F. Supp. 2d 688 (D.Md. 2000)* in support of their argument that Maryland would not adopt cross-jurisdictional class action tolling. In Thelen, a United States District Court sitting in diversity concluded:

> In Maryland, also, there is no case directly addressing the issue, but what precedents there are, augur against its adoption. See, e.g., *Hecht v. Resolution Trust Corp., 333 Md. 324, 635 A.2d 394, 399 (1994)*. Indeed, the existence of Rule 2-101(b), which **[*353]** provides a limited savings window if an identical action is dismissed by another court, clearly indicates the absence, under Maryland law, of the broad, cross-jurisdictional class action equitable tolling advocated by plaintiffs.

Id. at 694.

The facts in Thelen differ so substantially from the facts in the present matter as to make the district court's ruling distinguishable. Thelen involved an attempt by Maryland residents asserting Maryland common law and Massachusetts statutory consumer protection claims against a Massachusetts **[**63]** defendant to toll the statute of limitations on those claims based upon the pendency of separate and different class actions against the same defendant in state courts in New York and Mississippi. The common law and state consumer protection claims asserted by the class plaintiffs in New York and Mississippi class actions were different from each other and from those asserted by the Thelen plaintiffs and each different claim required proof of different elements. *Russo v. Massachusetts Mutual Life Ins. Co., 192 Misc. 2d 349, 746 N.Y.S.2d 380, 381-82 (N.Y.Sup.Ct. 2002)* (detailing the requirements of the New York statute under which the New York class action was brought); *Russo v. Massachusetts Mutual Life Ins. Co., 178 Misc. 2d 772, 680 N.Y.S.2d 916, 919 (N.Y.Sup.Ct. 1998)* (declining to apply substantively different Massachusetts law to plaintiffs claims); *Cunningham v. Massachusetts Mutual Life Ins. Co., 1996 U.S. Dist. LEXIS 21408, 1996 WL 901285 at *1 (N.D. Miss. 1996)* (all of plaintiffs claims were under

Mississippi law). Thus, the Thelen plaintiffs could not claim to have preserved their claims against the defendant by virtue of the filing of the class **[**64]** actions in New York and Mississippi and, unlike this case, Thelen presented substantial forum-shopping problems.

While the Thelen court concluded that "what precedents there are, augur against its adoption" in that case, ***HN37***[] this Court concludes, based on relevant Maryland precedents, that the Maryland Court of Appeals would adopt cross-jurisdictional class action tolling in the antitrust context. First, the Maryland General Assembly has instructed ***HN38***[] courts interpreting the MATA to "be guided by the interpretation given by the federal courts to the various federal [antitrust] statutes. *Md. Code Ann. Com. Law II § 11-202(b)*. Second, ***HN39***[] the Maryland class action rule, Rule 2-231, is "similar to *Rule 23 of the Federal Rules of Civil Procedure*" and the Maryland Court of Appeals has ruled that "our analysis shall be informed by cases interpreting *Rule 23* and other analogous state rules outlining class certification requirements." *Creveling v. Gov't Emples. Ins. Co., 376 Md. 72, 828 A.2d 229, 239 n.4 (Md. 2003)*; see also *Philip Morris v. Angeletti, 358 Md. 689, 752 A.2d 200, 219-20 (Md. 2000)* **[**65]** (noting that "there exists an abundance of cases from other jurisdictions, federal and state, that have analyzed class action rules either identical to or similar to Maryland's rule" and utilizing those cases as analytical aids).

Thus, for all the foregoing reasons, the Court concludes that the Maryland Court of Appeals would adopt cross-jurisdictional class action tolling in antitrust class actions filed in federal court.

C. MOTION TO DISMISS SOUTH CAROLINA AND WISCONSIN CLAIMS UNDER *RULE 12(b)(6)* BECAUSE CLAIMS INVOLVE INTERSTATE COMMERCE

Defendants argue that plaintiffs' South Carolina and Wisconsin claims are not cognizable under the antitrust laws of those states because they do not relate solely to intrastate conduct. The Court addresses these arguments in turn.

1. South Carolina

HN40[] South Carolina's antitrust statute proscribes, inter alia, "arrangements, contracts, agreements, trusts or combinations . . . made with a view to lessen, or which tend to lessen, full and free competition in the importation or sale of articles imported into this State . . . ." *S.C. Code Ann. § 39-3-10*. Further, the statute forbids agreements that **[**66]** control, advance or reduce the price or cost to the consumer of goods that are either imported or that are transacted entirely within the state. Id.

[*354] Defendants assert that South Carolina courts have limited application of its state antitrust statute to "conduct that is solely intrastate in nature." Def. Mot. to Dismiss 20. Defendants cite *State v. Virginia-Carolina Chem. Co., 71 S.C. 544, 51 S.E. 455 (S.C. 1905)* and decisions applying that case in support of their position. *Three J. Farms, Inc. v. Alton Box Board Co., 1978 U.S. Dist. LEXIS 14134, 1978 WL 1459, at *6 (D.S.C. Nov. 29, 1978)*, rev'd on other grounds, *609 F.2d 112 (4th Cir. 1979)* ("even though South Carolina has an ***antitrust law*** . . . its application was limited many years ago to exclude activities having an effect upon interstate commerce"); *In re Wiring Device Antitrust Litig., 498 F. Supp. 79, 84-85 (E.D.N.Y. 1980)* (dismissing South Carolina antitrust claim under *Rule 12(b)(6)* because defendants' business activities were "wholly interstate in character").

In *Virginia-Carolina Chem. Co., 71 S.C. 544, 51 S.E. 455 (S.C. 1905)*, the South Carolina Attorney General **[**67]** brought suit against a number of fertilizer manufacturers. Most were located in South Carolina, but at least one, the Virginia-Carolina Chemical Co., was incorporated in New Jersey and had very few operations in South Carolina. The plaintiff alleged that the defendants entered into an unlawful scheme, controlled by Virginia-Carolina, to control the prices and lessen competition in the manufacture and sale of fertilizer in South Carolina. The South Carolina Supreme Court held that the clause of the South Carolina antitrust statute that regulates the importation of goods or sale of imported goods into South Carolina conflicted with the federal *interstate commerce clause*. *Virginia-Carolina, 51 S.E. at 461*. However, the South Carolina Supreme Court upheld the Circuit Court's decision to deny the defendants' motion to dismiss the complaint, finding that the plaintiff had sufficiently alleged unlawful conduct pursuant to South Carolina's antitrust statute.

Three J Farms, Inc. v. Alton Box Board Co., 1978 U.S. Dist. LEXIS 14134, Civil Action No. 78-1257, 1978 WL 1459 (D.S.C. November 29, 1978) and *In re Wiring Device Antitrust Litigation, 498 F. Supp. 79 (E.D.N.Y. 1980),* **[**68]** cite that part of the Virginia-Carolina decision which held that the clause of the South Carolina antitrust statute that regulates the importation of goods or sale of imported goods into South Carolina conflicted with the federal *interstate commerce clause*. *Virginia-Carolina, 51 S.E. at 461*. These cases do not stand for the proposition, as defendants assert, that South Carolina's ***antitrust law*** does not apply "where the defendant is alleged to have engaged in a scheme that took place and affected consumers across the country." Def. Mem. at 20. Rather, the courts in these cases made significantly more limited holdings that, on the specific facts before them, South Carolina law did not apply to claims based upon products manufactured outside of the state of South Carolina and imported into South Carolina for sale. [11]

[69]** In the instant case, plaintiffs allege ties to South Carolina that are comparable to, if not stronger than, those found to be sufficient in Virginia-Carolina. During the relevant time period, at least 16 plaintiffs resided in South Carolina, maintained facilities in South Carolina for which corrugated material was purchased from one or more of the defendants, or purchased corrugated material from one or more of the defendants for use in South Carolina. P&G Amended Complaint at P 161; Mars Amended Complaint at **[*355]** P 92. Plaintiffs allege that at least seven of the defendants maintained corrugated container manufacturing facilities in South Carolina during the relevant period. P&G Amended Complaint at P 162; Mars Amended Complaint at P 93. Thus, unlike the claims in *Three J Farms*, plaintiffs are not bringing claims based solely on the importation or sale of imported articles in South Carolina; defendants' conduct is not "wholly interstate" as was the case in In re Wiring Device Antitrust Litigation. Rather plaintiffs have pled in their Amended Complaints that defendants have produced linerboard in South Carolina and sold it to South Carolina entities. Accordingly, plaintiffs' **[**70]** South Carolina claims will not be dismissed on the ground that defendants' alleged conduct is not actionable under South Carolina ***antitrust law***.

2. Wisconsin

HN41[] The Wisconsin antitrust statute prohibits "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade and commerce." *Wis. Stat. Ann. § 133.03*. Further, "all contracts or agreements made by any person while a member of any combination or conspiracy prohibited by *§ 133.03*" are void. *Wis. Stat. Ann. § 133.14*.

Defendants argue that Wisconsin has limited the application of its state antitrust statute to "conduct that is solely intrastate in nature." Def. Mot. to Dismiss 20. Defendants cite *Pulp Wood Co. v. Green Bay Paper & Fiber Co., 157 Wis. 604, 147 N.W. 1058 (Wisc. 1914)* and subsequent decisions applying Pulp Wood in support of their position. Id.

Pulp Wood involved antitrust allegations surrounding a series of contracts to supply wood pulp to Wisconsin paper manufacturers. The contracts required the paper mills to purchase wood pulp from a single Wisconsin supplier.

---

[11] In Three J Farms, the Court ruled:

> Therefore any claim for damages resulting from the importation or the sale of imported corrugated containers is not a South Carolina claim, but purely a federal claim. This would include the plaintiff Shapiro since he was not located in South Carolina and in his affidavit affirms: 'It is conceded, of course, that corrugated boxes involved in this complaint have been shipped by the defendants into South Carolina.'

*1978 U.S. Dist. LEXIS 14134, 1978 WL 1459 at *6*. Similarly in In re Wiring Device, the district court concluded:

> The sole connection between the defendants and South Carolina is that an insignificant portion approximately one percent of the wiring devices which they have manufactured outside the state has been imported into the state. Thus, each defendant's activities in South Carolina involve nothing more than "soliciting, cultivating and supervising its interstate business." This circumstance is not sufficient to invoke the application of *section 39-3-10*. The well-established South Carolina rule that wholly interstate activity is outside the scope of that section must be applied.

498 F. Supp. at 83.

However, because the wood **[**71]** originally furnished to this supplier came from Wisconsin, Minnesota, Michigan and Canada, the Wisconsin Supreme Court held that defendants conduct was interstate in character and chose to apply the *Sherman Act*. Pulp Wood does not unequivocally bar the simultaneous application of state and federal ***antitrust law***.

"Subsequent cases have tended to cite Pulp Wood summarily for the proposition that ***HN42***[] Wisconsin ***antitrust law***, though taken from the federal statutes, applies "to intrastate as distinguished from interstate transactions." *Emergency One, Inc. v. Waterous Co., Inc., 23 F. Supp. 2d 959, 971 (E.D. Wis. 1998)*. As the Emergency One court explains, however, Wisconsin courts have not, as defendants assert, refused to apply Wisconsin's antitrust statutes to intrastate activities that also involve interstate conduct or have interstate effects. *Id. at 965-966* ("the Wisconsin Supreme Court has for some time interpreted the state antitrust statutes to reach interstate activities in certain circumstances and has rejected a mutually exclusive vision of state/federal antitrust enforcement"). [12]

[72]** In *State v. Allied Chem. & Dye Corp., 9 Wis.2d 290, 101 N.W.2d 133 (Wisc. 1960)*, the Wisconsin attorney general brought price-fixing charges against several domestic and foreign corporations engaged in the manufacture and sale of the chemical product calcium chloride in Wisconsin. The complaint alleged that **[*356]** some but not all of the acts constituting a nationwide conspiracy in restraint of trade occurred in Wisconsin. *Id. at 291*. Similar actions by the same defendants had been the subject of FTC proceedings over an extended period. *Id. at 293-94*. Defendants asserted inter alia that all sales of calcium chloride in Wisconsin were made in interstate commerce; that none of the defendants owned or operated a manufacturing plant, sales office or warehouse in Wisconsin; that the chemical was produced entirely out of state; and that each defendant routinely sold calcium chloride on a nationwide basis. *Id. at 292-93*. Based on these assertions, the defendants moved for summary judgment, arguing that Chapter 133 did not reach the conduct at issue. The Wisconsin Supreme Court rejected the defendants' argument and denied summary judgment. **[**73]** After examining both the state and federal legislative enactments in the antitrust field, that court concluded that there was no conflict between the two as the state statutes did not burden interstate commerce. *Id. at 295*.

Direct action plaintiffs have alleged more extensive intrastate conduct and contacts with Wisconsin than the defendants' Wisconsin conduct and contacts in Allied Chemical. In the Amended Complaints plaintiffs allege that during the relevant time period, at least 23 plaintiffs resided in Wisconsin, maintained facilities in Wisconsin for which corrugated material was purchased from one or more of the defendants, or purchased for use in Wisconsin corrugated material from one or more of the defendants. See, e.g., P&G Amended Complaint at P 125. Further, plaintiffs allege that at least six of the defendants maintained corrugated container manufacturing facilities in Wisconsin during the relevant time period. Id. at P 126. Plaintiffs also allege that contracts or agreements, pursuant to which plaintiffs purchased corrugated materials, were the result of, grew out of, or were otherwise connected with, the violation of the Wisconsin antitrust **[**74]** statute. Id. at P 127. Construing the allegations in the direct action plaintiffs' Amended Complaints liberally, the Court concludes that plaintiffs have sufficiently alleged wrongful conduct and damages pursuant to the requirements of the Wisconsin antitrust statute.

---

[12] In place of "rote reliance" on the intrastate/interstate distinction, the Emergency One court adopted an "adverse effects standard" to determine whether Wisconsin state antitrust statutes are appropriately applied to economic activity that is both intrastate and interstate in character. The court reasoned:

> An adverse effects standard would extend the jurisdictional scope of Wisconsin ***antitrust law*** to unlawful activity which has significantly and adversely affected trade and economic competition within this state. This standard is consistent with both Wisconsin precedent and judicial interpretations of the scope of federal ***antitrust law***. Most importantly, it comports with the legislative intent of Chapter 133 . . . In a recent decision addressing the correct burden of proof to be applied to private, civil antitrust actions under the chapter, the Wisconsin Supreme Court noted its assumption that "the legislature intended an interpretation that advances, not hinders, the purposes of the statute." Ultimately, an adverse effects standard is the only standard that remains faithful to the purpose of Chapter 133--to protect and encourage competition in this state, by penalizing interstate activities that adversely affect it.

Id. at 969-970 (citations omitted).

In conclusion, with respect to the Wisconsin claims, direct action plaintiffs have brought to the Court's attention that the Wisconsin Court of Appeals recently certified a case for immediate appeal to the Wisconsin Supreme Court on the precise issue faced by this Court. Olstad v. Microsoft, No. 03-1086, 2004 WL 291267 (Wis. App. Feb. 17, 2004) ("The parties' arguments to this court strongly suggest that the determination of whether Wisconsin's antitrust statute applies to interstate commerce affecting intrastate commerce is an issue requiring careful analysis of public policy as well as law . . . this case is appropriate for certification to the Wisconsin Supreme Court."). Olstad is now pending argument in the Wisconsin Supreme Court. The Court will therefore grant defendants leave to file a second motion to dismiss direct action plaintiffs Wisconsin claims if Olstad is decided in a way **[**75]** that conflicts with this Court's ruling.

IV. CONCLUSION

As to defendants motion to dismiss under *Rules 12(b)(6)and 12(c)* raising timeliness issues, the Court concludes that the statutes of limitations in Colorado, Indiana, Kansas, South Carolina and Tennessee were tolled until the Mars, Milne Fruit and Proctor & Gamble opted out of the classes. Thus, direct action plaintiffs state law claims asserted in the Amended Complaints are not time barred. Similarly, the Perdue plaintiffs claims were tolled until Perdue opted out of the classes and the Perdue plaintiffs Maryland claims included in their Complaint are not time barred.

As to defendants motion to dismiss under *Rule 12(b)(6)* on the ground that direct action plaintiffs allegations are not cognizable under the South Carolina and Wisconsin antitrust laws, the Court concludes that neither South Carolina nor Wisconsin has limited the applicability of their antitrust statutes to preclude direct action plaintiffs claims as a matter of law.

[*357] Defendants Motion to Dismiss Plaintiffs' State Law Claims is denied for all of the foregoing reasons.

An appropriate Order follows.

ORDER

AND NOW, this 27th day of August, **[**76]** 2004, upon consideration of Defendants' Motion to Dismiss Plaintiffs' State Law Claims (Docket No. 369, filed April 28, 2004), Opposition to Defendants' Motion to Dismiss Plaintiffs' State Law Claims (Docket No. 369, filed May 19, 2004), Memorandum of Plaintiff Perdue Farms Incorporated in Opposition to Defendants' Motion for Judgment on the Pleadings (Docket No. 383, filed May 24, 2004), Reply in Support of Defendants' Motion for Judgment on the Pleadings (Docket No. 386, filed June 2, 2004), Reply in Support of Defendants' Motion to Dismiss State Law Claims (Docket No. 387, filed June 2, 2004) and Surreply of Plaintiff Perdue Farms Incorporated in Opposition to Defendants' Motion for Judgment on the Pleadings (Docket No. 390, filed June 4, 2004), **IT IS ORDERED** that Defendants' Motion to Dismiss Plaintiffs' State Law Claims is **DENIED**.

IT IS FURTHER ORDERED that the plaintiffs in Perdue Farms Incorporated v. Stone Container Corporation, et al., No. 03-1702 (D.Md. filed June 9, 2003), United States Gypsum Company, et al. v. Stone Container Corporation, et al., No. 03-4251 (N.D. Ill. filed June 10, 2003), Hormel Foods Corporation, et al. v. Stone Container **[**77]** Corporation, et al., No. 03-3421 (D. Minn. filed June 13, 2003), Kellogg Company, et al. v. Smurfit Stone Container Corporation, et al., No. 03-4213 (N.D. Ill. filed June 19, 2003), and Conopco, Inc., et al. v. Smurfit Stone Container Corporation, a successor to Stone Container Corporation, et al., No. 03-3549 (E.D. Pa. filed June 9, 2003) are **GRANTED LEAVE** to file and serve amended complaints within twenty (20) days which add the same federal and state claims that were included in the Amended Complaints filed by plaintiffs in Procter & Gamble Company, et al. v. Stone Container Corporation, et al., No. 03-3944 (N.D. Ill. filed June 10, 2003), Milne Fruit Products, Inc., et al. v. Stone Container Corporation, et al., No. 03-4049 (N.D. Ill. filed June 13, 2003), and Mars, Inc., et al. v. Stone Container Corporation, et al., No. 03-6977 (N.D. Ill. filed October 1, 2003). One copy of the amended complaints shall be served on the Court (Chambers, Room 12613) when the originals are filed.

BY THE COURT:

JAN E. DUBOIS, J.

Cheryl Terry Enters. v. City of Hartford

Supreme Court of Connecticut

May 19, 2004, Argued ; August 31, 2004, Officially Released

(SC 17067)

Reporter

270 Conn. 619 *; 854 A.2d 1066 **; 2004 Conn. LEXIS 352 ***; 2004-2 Trade Cas. (CCH) P74,540

CHERYL TERRY ENTERPRISES, LTD. v. CITY OF HARTFORD

Prior History: [*1]** Action in four counts to enjoin the defendant from, inter alia, awarding the contract for the transportation of schoolchildren within the city of Hartford to any bidder other than the plaintiff, and for other relief, brought to the Superior Court in the judicial district of New London, where the court, Hurley, J., granted in part the defendant's motion to dismiss as to one count; thereafter, the case was tried to the jury before Corradino, J.; verdict in part for the plaintiff; subsequently, the court, Corradino, J., granted the defendant's motion to set aside the verdict and rendered judgment thereon, and ordered that Laidlaw Transit, Inc., be joined as a necessary party within thirty days; the plaintiff thereafter appealed from the judgment setting aside the verdict, and this court rendered judgment dismissing the appeal for lack of final judgment; thereafter, the case was reclaimed to the trial list and was tried to the court, Corradino, J., on the request for permanent injunctive relief; judgment denying the injunctive relief, from which the plaintiff appealed.

Cheryl Terry Enters. v. City of Hartford, 2003 Conn. Super. LEXIS 1666 (Conn. Super. Ct., June 4, 2003)

Disposition: Affirmed in part, reversed in part and remanded with direction.

Conn. Gen. Stat. § 35-26 provides that every contract, combination, or conspiracy in restraint of any part of trade or commerce is unlawful. For purposes of *§ 35-26*, "person" is defined broadly as any individual, proprietorship, corporation, limited liability company, firm, partnership, incorporated and unincorporated association, or any other legal or commercial entity. § 35-25(b). A municipality is a legal entity that can sue and be sued. Towns have no sovereign immunity, and are capable of suing and being sued in any action. The plain language of the statutory definition of "person" is broad enough to include municipalities.

Conn. Gen. Stat. § 35-35 provides that any person injured in its business or property by any violation of the provisions of ch. 35 shall recover treble damages, together with a reasonable attorney's fee and costs. Section 35-34 provides that any person may sue for injunctive relief, both temporary or permanent, against threatened loss or damage to its property or business by any violation of ch. 35.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Business & Corporate Law > ... > Management Duties & Liabilities > Causes of Action > General Overview

Public Contracts Law > Dispute Resolution > Bid Protests

HN5[] **Private Actions, Standing**

Conn. Gen. Stat. Ann. § 35-38 provides that any person who has been held to have violated any of the provisions of ch. 35 shall forfeit and pay to the state a civil penalty of not more than $ 250,000. Section 35-39 provides that a corporation, association, firm, partnership, proprietorship, or any other legal or commercial entity is liable under ch. 35 for the acts of its agents. The only express limitation on the Connecticut Antitrust Act's (Act), *Conn. Gen. Stat. § 35-24 et seq.*, applicability is set forth in § 35-31, which contains four classes of exceptions from liability under the Act. Section 35-31 exceptions are to be strictly construed. Although the legislature has excluded certain organizations and activities from liability under the Act, it has not excluded municipalities, or the municipal bidding process, from its provisions.

Governments > Legislation > Interpretation

HN6[] **Legislation, Interpretation**

Unless there is evidence to the contrary, statutory itemization indicates that the legislature intended a list to be exclusive. A court itself cannot rewrite a statute to accomplish a particular result. That is the function of a legislature.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Governments > Local Governments > Claims By & Against

Public Contracts Law > Bids & Formation > Sealed Bids > Invitations for Bids

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Public Contracts Law > Dispute Resolution > Bid Protests

HN10[] **Justiciability, Standing**

If an unsuccessful bidder has standing to bring a claim against a municipality, such standing must be derived from a source other than its bid submitted in response to an invitation to bid. That source is the municipal bidding statutes themselves.

Civil Procedure > Judgments > Relief From Judgments > General Overview

Civil Procedure > Trials > Jury Trials > General Overview

HN11[] **Judgments, Relief From Judgments**

A trial court possesses inherent power to set aside a jury verdict which, in the trial court's opinion, is against the law or the evidence. The supervision which a judge has over a verdict is an essential part of the jury system. A trial court should not set aside a verdict where it is apparent that there was some evidence upon which the jury might reasonably reach their conclusion, and should not refuse to set it aside where the manifest injustice of the verdict is so plain and palpable as clearly to denote that some mistake was made by the jury in the application of legal principles, or as to justify the suspicion that they or some of them were influenced by prejudice, corruption or partiality. A trial court has a duty to set aside a verdict where the jury's action is so unreasonable as to suggest that it was the product of such improper influences.

Civil Procedure > Judicial Officers > Judges > General Overview

Civil Procedure > ... > Jury Trials > Jurors > Misconduct

Civil Procedure > Judgments > Relief From Judgments > General Overview

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

HN12[] **Judicial Officers, Judges**

In determining whether to set aside a verdict, a trial court walks a thin line. The decision to set aside a verdict entails the exercise of a broad legal discretion that, in the absence of clear abuse, an appellate court shall not disturb. An appellate court's review of a trial court's action on a motion to set aside the verdict involves a determination of whether a trial court abused its discretion, according great weight to the action of a trial court and indulging every reasonable presumption in favor of its correctness since a trial judge has had the same opportunity as a jury to view the witnesses, to assess their credibility and to determine the weight that should be given to their evidence. A trial judge can gauge the tenor of a trial, as an appellate court, on the written record, cannot, and can detect those factors, if any, that could improperly have influenced the jury.

Civil Procedure > Judgments > Relief From Judgments > General Overview

Constitutional Law > ... > Fundamental Rights > Criminal Process > Right to Jury Trial

Civil Procedure > Trials > General Overview

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

HN13[] **Judgments, Relief From Judgments**

In evaluating the exercise of a trial court's discretion, an appellate court is mindful that litigants have a constitutional right to have juries decide issues of fact. The right to a jury trial is fundamental in our judicial system and is an immovable limitation on the legal discretion of a trial court to set aside a verdict, since the constitutional right of a trial by jury includes the right to have issues of fact as to which there is room for a reasonable difference of opinion among fair-minded men passed upon by a jury and not by a court. Since, in setting aside a verdict, a trial court deprives a party in whose favor the verdict was rendered of his constitutional right to have factual issues resolved by the jury, an appellate court must examine the evidential basis of the verdict itself to determine whether a trial court abused its discretion.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN14[] **Jury Trials, Province of Court & Jury**

The amount of a damage award is a matter peculiarly within the province of the trier of fact.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Civil Procedure > Judgments > Relief From Judgments > General Overview

HN15[] **Standards of Review, Abuse of Discretion**

In considering a motion to set aside a verdict, a trial court must determine whether the evidence, viewed in the light most favorable to the prevailing party, reasonably supports a jury's verdict. An appellate court must determine whether a trial court abused its discretion in making its determination that the evidence reasonably did not support the jury's award of damages.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Contracts Law > ... > Measurement of Damages > Foreseeable Damages > General Overview

Civil Procedure > Remedies > Damages > General Overview

HN16[ ] **Standards of Review, Abuse of Discretion**

In deciding whether damages properly have been awarded, an appellate court is guided by the well established principle that such damages must be proved with reasonable certainty. Although damages for lost profits may be difficult to prove with exactitude, such damages are recoverable only to the extent that the evidence affords a sufficient basis for estimating their amount with reasonable certainty. Courts permit lost profits to be calculated by extrapolating from past profits.

Civil Procedure > Remedies > Damages > General Overview

Contracts Law > ... > Measurement of Damages > Foreseeable Damages > General Overview

HN17[ ] **Remedies, Damages**

Courts look to a number of factors in evaluating whether a plaintiff has proved lost profits to a reasonable certainty. A plaintiff's prior experience in the same business has been held to be probative as has a plaintiff's experience in the same enterprise subsequent to the interference. The experience of a plaintiff in a similar business has been admitted to prove lost profits. The average experience of participants in the same line of business as the injured party has been approved as a method of proving lost profits. Prelitigation projections, particularly when prepared by a defendant, have also been approved. The underlying requirement for each of these types of evidence is a substantial similarity between the facts forming the basis of the profit projections and the business opportunity that was destroyed.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN18[ ] **Private Actions, Remedies**

The vagaries of the marketplace usually deny a court sure knowledge of what a plaintiff's situation would have been in the absence of a defendant's antitrust violation. A damage theory may be based on assumptions so long as the assumptions are reasonable in light of the record evidence. The reasonableness of the assumptions underlying a plaintiff's damage theory is determined by the trier of fact. Federal appellate courts refuse to find damage evidence insufficient unless there was no basis for critical assumptions made by the trier of fact.

Evidence > ... > Testimony > Competency > General Overview

Evidence > Admissibility > Procedural Matters > Rulings on Evidence

HN19[] **Testimony, Competency**

The owner of property is competent to testify to its value. A franchise owner is competent to testify as to the value of a franchise. The weight to be accorded such testimony is for the trier to decide.

Civil Procedure > Judgments > Entry of Judgments > Multiple Claims & Parties

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN20[] **Entry of Judgments, Multiple Claims & Parties**

The rule precluding double recovery is a simple and time-honored maxim that a plaintiff may be compensated only once for his just damages for the same injury. Plaintiffs are not foreclosed from suing multiple defendants, either jointly or separately, for injuries for which each is liable, nor are they foreclosed from obtaining multiple judgments against joint tortfeasors. The possible rendition of multiple judgments does not defeat the proposition that a litigant may recover just damages only once. Double recovery is foreclosed by the rule that only one satisfaction may be obtained for a loss that is the subject of two or more judgments.

Civil Procedure > Remedies > Injunctions > Mandatory Injunctions

HN21[] **Injunctions, Mandatory Injunctions**

A mandatory injunction is a court order commanding a party to perform an act. Relief by way of mandatory injunction is an extraordinary remedy granted in the sound discretion of a court and only under compelling circumstances. An injunction will not lie where there is an adequate remedy at law. Injunctions should not be issued when damages can adequately protect an injured party. Where the granting of an injunction would cause damage to a defendant greatly disproportionate to the injury of which a plaintiff complains, it may be held inequitable to grant a mandatory injunction and a plaintiff may be remitted to her remedy by way of damages. Mandatory injunctions are disfavored as a harsh remedy and are used only with caution and in compelling circumstances.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > Remedies > Injunctions > Mandatory Injunctions

HN22[] **Judges, Discretionary Powers**

A mandatory injunction is an extraordinary remedy granted in the sound discretion of a court.

Counsel: Ralph J. Monaco, with whom was Thomas J. Londregan, for the appellant **[***2]** (plaintiff).

Ann F. Bird, assistant corporation counsel, with whom, on the brief, was Alexander Aponte, corporation counsel, for the appellee (defendant).

Richard D. O'Connor, with whom, on the brief, was George J. Kelly, Jr., for the appellee (Laidlaw Transit, Inc.).

Judges: Sullivan, C. J., and Borden, Norcott, Katz, Palmer, Vertefeuille and Zarella, Js. [1]

---

[1] This case was argued on May 19, 2004, before a panel of this court consisting of Chief Justice Sullivan and Justices Norcott, Katz, Vertefeuille and Zarella. Thereafter, the court, pursuant to *Practice Book § 70-7 (b)*, sua sponte, ordered that the case be

Opinion by: KATZ

Opinion

[1070]** **[*621]** KATZ, J. In *Cheryl Terry Enterprises, Ltd. v. Hartford, 262 Conn. 240, 242, 811 A.2d 1272 (2002)*, the plaintiff, Cheryl Terry Enterprises, Ltd., appealed from the judgment of the trial court setting aside the jury's verdict for the plaintiff on its antitrust claim against the defendant, the city of Hartford. We concluded therein that the **[***3]** plaintiff had not appealed from a final judgment because the trial court had not yet resolved the plaintiff's remaining claim for permanent injunctive relief. The case thereafter was reclaimed to the trial list and, following additional hearings and briefing from the parties, the trial court denied the plaintiff's request for a mandatory injunction. Thereafter, the plaintiff appealed from the judgment of the trial court to the **[*622]** Appellate Court, and we transferred the appeal to this court pursuant to *General Statutes § 51-199 (c)* and *Practice Book § 65-1*.

In the present appeal, the plaintiff claims that the trial court improperly: (1) set aside the jury's verdict on its antitrust claim on the ground that, under our decision in *Lawrence Brunoli, Inc. v. Branford, 247 Conn. 407, 722 A.2d 271 (1999)*, the plaintiff, an unsuccessful lowest bidder in a municipal bidding process, lacked standing to bring an antitrust claim against the defendant; (2) determined that it could effectively repeal Connecticut's antitrust statute in cases involving municipal bidding; (3) set aside the jury's verdict on the plaintiff's antitrust claim on the ground **[***4]** that the plaintiff had failed to present sufficient proof of damages; (4) directed a verdict for the defendant on the plaintiff's equal protection claims; and (5) failed to award the plaintiff mandatory injunctive relief.

We conclude that the trial court improperly set aside the verdict on the ground that the plaintiff lacked standing to bring an antitrust claim for damages against a municipality arising out of the municipal bidding process. We conclude further that the trial court improperly set aside the verdict on the ground that the plaintiff had not proved its damages to a reasonable certainty. In light of that conclusion, we need not address the plaintiff's claim that the trial court improperly granted the defendant's motion for a directed verdict on its equal protection claims. Finally, we conclude that the trial court properly denied the plaintiff's request for injunctive relief. Accordingly, we reverse in part the judgment of the trial court.

The relevant facts and procedural history are set forth in our opinion in *Cheryl **[**1071]** Terry Enterprises, Ltd. v. Hartford, supra, 262 Conn. 240*. "The plaintiff is a school bus company based in Hartford. The president **[***5]** of the **[*623]** company, Cheryl Terry, has worked in the school transportation business for more than thirty years. The plaintiff was one of three vendors who had submitted sealed bids to the defendant in response to an invitation to bid for a proposed five year contract to provide bus transportation services for the Hartford public schools, commencing with the 1998-1999 school year. The plaintiff's bid was lower than either of the other vendors, Laidlaw Transit, Inc. (Laidlaw), and Dattco, Inc. (Dattco). Despite being the highest bidder, Laidlaw was awarded the five year contract.

"After Laidlaw was awarded the contract, the plaintiff brought the action underlying this appeal, claiming violations of its equal protection rights and state ***antitrust law*** [2] . . . . The plaintiff also claimed that, by awarding the contract to an entity other than the lowest responsible bidder, the defendant violated § 2-548 of the Hartford municipal code. [3] **[***7]** The plaintiff's complaint alleged a violation of the Connecticut Antitrust Act (act); *General Statutes § 35-24*

---

considered . Justices Borden and Palmer were added to the panel, and they have read the record and the briefs, and have listened to the tape recording of the original oral argument.

[2] The plaintiff's complaint also contained a breach of contract claim, which was dismissed by the trial court prior to trial. The plaintiff has not appealed from that ruling, and, therefore, it is not before us in the present appeal.

[3] Section 2-548 of the Hartford municipal code provides in relevant part: ***HN1***[] "(a) The contract for which sealed bids are invited shall be awarded to the lowest responsible bidder. Any person or organization is deemed not to be a responsible bidder that . . .

et seq.; in that it was not awarded the contract due to a conspiratorial agreement between a [labor] union and the defendant, **[***6]** with the purpose of obtaining a union contract. [4] The plaintiff sought temporary **[*624]** and permanent injunctive relief relating to the contract, monetary damages and equitable relief. At trial, the defendant acknowledged that the plaintiff's bid was the lowest submitted, but it maintained that the plaintiff was not awarded the contract because the defendant had been informed that the plaintiff had a pending labor case with the National Labor Relations Board, and because its bid did not conform to the specifications of the bid request. Terry testified, however, that the plaintiff had 'fully complied with each and every material term of [the] defendant's bid specifications . . . .'

"Thereafter, the trial court held a hearing on the plaintiff's motion for a temporary restraining order. On August 4, 1998, subsequent to the completion of the hearing, but prior to the issuance of the trial court's decision, the defendant executed its contract with Laidlaw. The trial court issued a decision denying the plaintiff's motion for a temporary restraining order on August 7, 1998.

"After a trial on the plaintiff's equal protection and state antitrust claims, the trial court granted the defendant's motion for a directed verdict as to the plaintiff's equal protection claims, and submitted to the jury only the claim alleging an antitrust violation. Ultimately, the jury returned **[**1072]** a verdict for the plaintiff in the amount of $ 500,000 on that claim. The defendant then filed a motion to set aside the verdict. The trial court granted this motion and, thereafter, set aside the verdict for the plaintiff. The trial court reserved the question as to whether Laidlaw was a necessary party on the injunction portion of the claim **[***8]** and noted that it would hold a hearing on the plaintiff's request for permanent injunctive relief ab initio if it were to decide that Laidlaw was indeed a necessary party. The court ultimately determined that Laidlaw was a necessary party and that it should be joined as a party within thirty days of that order. Prior to a resolution of the claim for permanent **[*625]** injunctive relief, [however] the plaintiff appealed from the judgment of the trial court setting aside the verdict on its antitrust claim." [5] Cheryl Terry Enterprises, Ltd. v. Hartford, supra, 262 Conn. 243-45.

[*9]** As we noted previously, we dismissed the plaintiff's first appeal, concluding that the plaintiff had not appealed from a final judgment because the claim for injunctive relief had not been determined. Id., 242. Due to the trial court's subsequent resolution of the plaintiff's remaining claim for injunctive relief, we now address the merits of the plaintiff's claims.

I

We address the plaintiff's first two claims together because they are interrelated. The plaintiff claims that the trial court improperly granted the defendant's motion to set aside the verdict on the ground that Lawrence Brunoli, Inc. v. Branford, supra, 247 Conn. 407, precludes a plaintiff from pursuing a statutory antitrust claim for damages against a municipality arising out of a municipal bidding process. The defendant contends that the trial court properly found

---

"(2) Has been found by a court or administrative body of competent jurisdiction to be in violation of the National Labor Relations Act and that such violation continues to exist . . . .

"(c) The city manager shall certify whether the bidder is deemed to be a responsible bidder. If the city manager deems a bidder to meet the city's requirements, the bidder will be certified for a period of one (1) year. In each case, where the city manager determines that a bidder is not deemed to be a responsible bidder, he shall state his reasons in a written opinion to be forwarded to . . . the bidder. . . ."

[4] Laidlaw was the only union shop of the three bidders on the contract.

[5] At the time of the plaintiff's first appeal to this court, Laidlaw had not been joined as a defendant, and, therefore, it was not a party to that appeal. Cheryl Terry Enterprises, Ltd. v. Hartford, supra, 262 Conn. 241. As we noted previously, however, when the case was reclaimed to the trial list, Laidlaw subsequently was a defendant in the plaintiff's action. In the current appeal, Laidlaw is involved as an appellee only as to the plaintiff's final claim--whether the trial court properly denied the plaintiff's request for injunctive relief. In conformity with our prior opinion, therefore, we will continue to refer to the city of Hartford as the defendant, and we refer to Laidlaw by name in part IV of this opinion, which addresses the plaintiff's final claim.

that, under *Lawrence Brunoli, Inc.*, the plaintiff lacked standing to pursue its antitrust claim, and, therefore, that the trial court lacked subject matter jurisdiction. We agree with the plaintiff.

The following additional facts are relevant to our resolution of this claim. Prior to trial, the plaintiff was **[***10]** **[*626]** warned by the trial court that it would allow the antitrust claim to go to the jury because the court was unprepared to rule on its ultimate viability, but that the court would "closely examine that issue if the jury were to return a verdict in the plaintiff's favor." Ultimately, the jury did return a verdict in the plaintiff's favor, and awarded the plaintiff $ 500,000 in damages. The defendant filed a motion to set aside the verdict, claiming, inter alia, that the court lacked subject matter jurisdiction to award damages on the antitrust claim. [6] The trial **[**1073]** court agreed, and granted the defendant's motion to set aside the verdict.

[*11]** ***HN2***[] "The trial court's subject matter jurisdiction is a matter of law and, therefore, our review is plenary. If a party is found to lack standing, the court is without subject matter jurisdiction to determine the cause. . . . A determination regarding a trial court's subject matter jurisdiction is a question of law." *Cadle Co. v. D'Addario, 268 Conn. 441, 446, 844 A.2d 836 (2004)*.

In its memorandum of decision on the defendant's motion to set aside the verdict, the trial court analyzed the act and determined that "it seems clear that a municipality can be sued under [the] act." We agree. The act provides, inter alia, that ***HN3***[] "every contract, combination, or conspiracy in restraint of any part of trade or commerce is unlawful." *General Statutes § 35-26*. For purposes **[*627]** of the act, "'person'" is defined broadly as "any individual, proprietorship, corporation, limited liability company, firm, partnership, incorporated and unincorporated association, or any other legal or commercial entity . . . ." *General Statutes § 35-25 (b)*. We consistently have stated that a municipality is a legal entity that can sue and be sued. See, **[***12]** e.g., *Murphy v. Ives, 151 Conn. 259, 264, 196 A.2d 596 (1963)* ("towns have no sovereign immunity, and are capable of suing and being sued . . . in any action" [internal quotation marks omitted]). Therefore, the plain language of the statutory definition of "person" is broad enough to include municipalities, such as the defendant in the present case.

This broad definition of "person" is then utilized by the legislature to define both who may be liable for anticompetitive behavior, and who has standing to recover damages for such behavior. In regard to standing, *General Statutes § 35-35* provides in relevant part that ***HN4***[] "any person . . . injured in its business or property by any violation of the provisions of this chapter shall recover treble damages, together with a reasonable attorney's fee and costs." See also *General Statutes § 35-34* ("any person . . . may sue for injunctive relief, both temporary or permanent, against threatened loss or damage to its property or business by any violation of this chapter").

Conversely, the legislature also has used that same broad definition of "person" to define any individual **[***13]** or entity that may be liable under the act for anticompetitive behavior. See, e.g., *General Statutes § 35-38* ***HN5***[] ("any . . . person who has been held to have violated any of the provisions of this chapter shall forfeit and pay to the state a civil penalty of not more than two hundred fifty thousand dollars"); *General Statutes § 35-39* ("[a] corporation, association, firm, partnership, proprietorship, or any other legal or commercial entity is liable under this chapter for the acts of its . . . agents"). **[*628]** Indeed, the only express limitation on the act's applicability is set forth in *General Statutes § 35-31*, [7] **[***15]** which contains four classes of **[**1074]** exceptions from liability under

---

[6] The defendant's motion to set aside the verdict also claimed that: (1) there was no evidence submitted upon which a reasonable jury could have concluded that the defendant conspired to restrain trade; and (2) there was no evidence upon which a reasonable jury could have concluded that the plaintiff suffered damages or an antitrust injury. Because the trial court found that it lacked subject matter jurisdiction in the present case, it declined to address the defendant's claim that there was insufficient evidence to support a finding that the defendant had conspired to restrain trade. Therefore, that claim is not before us in the present appeal. The defendant's remaining claim, that there was insufficient evidence to support a finding that the plaintiff had suffered damages for an antitrust injury, is addressed in part II of this opinion.

[7] *General Statutes § 35-31* provides: ***HN7***[] "(a) Nothing contained in this chapter shall be construed to forbid the existence or operation of labor, agricultural, or horticultural organizations instituted for the purpose of mutual help, and not having capital stock and not conducted for profit, or to forbid or restrain individual members of such organizations from lawfully carrying out the

the act. None of these exceptions is applicable to the facts of the present case. See also *Mazzola v. Southern New England Telephone Co., 169 Conn. 344, 355, 363 A.2d 170 (1975)* ("[*§ 35-31*] exceptions are to be strictly construed"). Thus, although the legislature has excluded certain organizations and activities from liability under the act, it has not excluded municipalities, or the municipal bidding process, from its **[***14]** provisions. [8] **[*629]** See *Doucette v. Pomes, 247 Conn. 442, 457, 724 A.2d 481 (1999)* ***HN6***[] ("unless there is evidence to the contrary, statutory itemization indicates that the legislature intended [a] list to be exclusive" [internal quotation marks omitted]). Although the defendant may be correct that there are significant public policy reasons to exclude the municipal bidding process from the act, that is a change that must be made by the legislature, not this court. See *State v. Hanson, 210 Conn. 519, 529, 556 A.2d 1007 (1989)* ("It is axiomatic that the court itself cannot rewrite a statute to accomplish a particular result. That is the function of the legislature." [Internal quotation marks omitted.]); see also *State v. Luurtsema, 262 Conn. 179, 202, 811 A.2d 223 (2002)* (rejecting argument imputing temporal requirement to restraint element of kidnapping statute). In sum, we conclude that the trial court properly determined that a municipality can be sued for violations of the act. [9]

[*16]** **[**1075]** Despite having reached this conclusion, however, the trial court granted the defendant's motion to set aside **[*630]** the judgment, determining that in light of our decision in *Lawrence Brunoli, Inc. v. Branford, supra, 247 Conn. 416*, the act was "effectively repealed" in actions arising from the municipal bidding process because "to allow antitrust damages here would be repugnant to the public benefit purposes of the municipal competitive bidding laws and would not therefore comport with the similar objectives of the antitrust laws to benefit the public, not competitors, and lead to results the legislature could not have intended." We disagree.

---

legitimate objects thereof. Such organizations, or the members thereof, shall not be held or construed to be illegal combinations or conspiracies or monopolies in restraint of trade, under the provisions of this chapter.

"(b) Nothing contained in this chapter shall apply to those activities of any person when said activity is specifically directed or required by a statute of this state, or of the United States.

"(c) Nothing contained in this chapter shall be construed to prevent persons engaged in the production of agricultural products as farmers, planters, dairymen or growers from acting together in associations, corporate or otherwise, with or without capital stock, in collectively processing, preparing for market, handling and marketing in interstate and foreign commerce, such products of persons so engaged. Such associations may have marketing agencies in common; and such associations and their members may make the necessary contracts and agreements to effect such purposes; provided, such associations are operated for the mutual benefit of the members thereof, as such producers, and conform to one or both of the following requirements: (i) That no member of the association is allowed more than one vote because of the amount of stock or membership capital he may own therein, or, (ii) that the association does not pay dividends on stock or membership capital in excess of eight per cent per annum, and, (iii) that the association shall not deal in the products of nonmembers to an amount greater in value than such as are handled by it for members."

[8] ***HN8***[] "In construing [the act] . . . the courts of this state shall be guided by interpretations given by the federal courts to federal antitrust statutes." *General Statutes § 35-44b*. We note, therefore, that ***HN9***[] the federal courts, including the United States Supreme Court, consistently have held that a municipality is a "person" within the federal antitrust statutes. See, e.g., *Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 396, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*.

[9] Our resolution of this issue is informed further by our decision in *Westport Taxi Service, Inc. v. Westport Transit District, 235 Conn. 1, 26, 664 A.2d 719 (1995)*. In that case, the defendant, a transit district established by the town of Westport, provided bus and taxi services in direct competition with the plaintiff. After the plaintiff was forced out of business, it brought an action against the defendant, alleging violations of the act. *Id., 11-12*. The trial court found that the defendant had engaged in attempted monopolization and actual monopolization in violation of the act, and awarded the plaintiff damages for lost profits, the value of the business, and prejudgment interest. In addition, the trial court awarded the plaintiff treble damages under *§ 35-35*. *Id., 12-13*. On appeal to this court, the defendant claimed, inter alia, that it was entitled to "governmental immunity applicable to municipalities and their agencies because it is a transit district established by the town of Westport." *Id., 26*. We declined to review this claim, concluding that the record was insufficient to analyze the defendant's claim properly. *Id., 27*. Accordingly, we concluded that the trial court properly awarded the plaintiff treble damages for lost profits and the lost value of the business. *Id., 45*.

To begin with, we already have concluded that the trial court properly determined that the definition of "persons" subject to liability under the act is broad enough to include municipalities. Once the trial court made this determination, it should have denied the defendant's motion to set aside the verdict, and declined to apply the policy reasons set forth in *Lawrence Brunoli, Inc.*, in order to alter the plain language of the act. *State v. Hanson, supra, 210 Conn. 529*.

Moreover, *Lawrence Brunoli,* **[***17]** *Inc.*, readily is distinguishable from the present case. In *Lawrence Brunoli, Inc.,* the plaintiff, an unsuccessful bidder in a municipal bidding contest, alleged impropriety in the contract awarding process and brought a breach of contract action for money damages against the town of Branford. *Lawrence Brunoli, Inc. v. Branford, supra, 247 Conn. 408*. Specifically, the plaintiff alleged fraud, corruption or favoritism on the part of the defendant in awarding the contract. *Id., 410*. The trial court dismissed the action for lack of subject matter jurisdiction on the ground that the plaintiff lacked standing to assert a claim for money damages and was, therefore, limited to an action for injunctive relief. Id. The issue on appeal to this court was "whether the [trial] court [had] subject matter jurisdiction over a claim for damages, rather than for injunctive relief, allegedly resulting from fraud, corruption or favoritism in the award of a contract that **[*631]** is subject to competitive municipal bidding requirements." *Id., 408*. We answered that question in the negative, concluding that, "as a matter of law, an unsuccessful bidder to a municipal **[***18]** contract has no standing to assert a cause of action for money damages for failure of the municipality to follow its competitive bidding laws, regardless of whether the plaintiff alleges fraud, corruption or favoritism" in the bidding process. *Id., 411*. We began our analysis by noting that because the plaintiff only had bid on the contract, and was not awarded the contract, it lacked standing to bring a common-law breach of contract action. *Id., 411-12*. Accordingly, we concluded that ***HN10***[] "if an unsuccessful bidder has standing to bring a claim against a municipality . . . such standing must be derived from a source other than its bid submitted in response to an invitation to bid. That source is the municipal bidding statutes themselves." [10] *Id.,* ***[**1076]*** *412*. Because the statutes expressly did not confer standing for money damages, and our prior case law had limited relief in such actions to injunctive relief, we considered whether the policy considerations underlying the bidding statutes were best served by continuing to limit the remedy to injunctive relief. *Id., 412-16*. We concluded that they were, and, accordingly, affirmed the judgment of **[***19]** the trial court. *Id., 416*.

Our decision in *Lawrence Brunoli, Inc.*, was limited to actions based on common-law breach of contract claims or the municipal bidding statutes. In the present case, the plaintiff did not assert a common- law breach of contract action, nor an action for injunctive relief **[*632]** under the municipal bidding statutes, but, rather, **[***20]** sought relief under the act. We simply were not called upon in *Lawrence Brunoli, Inc.*, to address whether an unsuccessful lowest bidder had standing to bring an action under the act. Furthermore, as we stated in that case, "if an unsuccessful bidder has standing to bring a claim against a municipality . . . such standing must be derived from a source other than its bid submitted in response to the invitation to bid." *Id., 412*. As we noted previously, the legislature expressly has conferred standing on a broad range of individuals under the act, including unsuccessful bidders in a municipal bidding process. Thus, an independent source of standing, which was absent in *Lawrence Brunoli, Inc.*, exists in the present case. Put another way, in *Lawrence Brunoli, Inc.*, we were attempting to discern whether, in the absence of a direct conferral of standing by the legislature in the municipal bidding statutes, this court should recognize a right to standing for money damages. See *id., 412-16*. To the contrary, in the present case the legislature has conferred standing to a broad class of persons that includes a municipality, and this court cannot now limit **[***21]** that standing in a manner contrary to the plain language of the act.

Finally, we note that the policy considerations supporting our decision in *Lawrence Brunoli, Inc.*, are rendered inapplicable to the present case due to the legislature's broad conferral of standing under the act, which is based on several important principles, including, the protection of the public from anticompetitive behavior and the promotion

---

[10] See, e.g., *Blesso Fire Systems, Inc. v. Eastern Connecticut State University, 245 Conn. 252, 254-55, 713 A.2d 1283 (1998)*; *Unisys Corp. v. Dept. of Labor, 220 Conn. 689, 693-95, 600 A.2d 1019 (1991)*; *Ardmare Construction Co. v. Freedman, 191 Conn. 497, 501, 467 A.2d 674 (1983)*; *Spiniello Construction Co. v. Manchester, 189 Conn. 539, 543-44, 456 A.2d 1199 (1983)*; *John J. Brennan Construction Corp., Inc. v. Shelton, 187 Conn. 695, 702, 448 A.2d 180 (1982)*; *Austin v. Housing Authority, 143 Conn. 338, 349, 122 A.2d 399 (1956)*.

of competition in the marketplace. See, e.g., *Shea v. First Federal Savings & Loan Assn. of New Haven, 184 Conn. 285, 294, 439 A.2d 997 (1981)* ("both federal and Connecticut ***antitrust law*** attempt to promote competition in the marketplace"). Put another way, although this court was hesitant to expose taxpayers to the additional costs of **[*633]** money damages in *Lawrence Brunoli, Inc.*, the legislature has not expressed a similar hesitation within the language of the act. Indeed, as the plaintiff correctly contends, it would be incongruous to allow a municipality to bring an action against contractors under the act for anticompetitive behavior, yet preclude those same contractors from bringing an action against a municipality that has engaged in anticompetitive **[***22]** behavior. [11] The trial court's reliance **[**1077]** on *Lawrence Brunoli, Inc.*, therefore, was misplaced.

II

We turn next to the plaintiff's claim that the trial court improperly granted the defendant's motion to set aside the verdict on the ground that the plaintiff had failed to prove its claim of lost profits to a reasonable degree of certainty. The defendant contends that the trial court properly determined that the plaintiff had introduced no evidence of lost profits. We agree with the plaintiff.

The following additional facts and procedural history are relevant to our resolution **[***23]** of this claim. At trial, the evidence concerning the plaintiff's lost profits consisted of the bid on the Hartford school transportation contract (bid) and the testimony of Terry, the plaintiff's president. The bid was for a five year contract, with busing services to commence on July 1, 1998, and to terminate on June 30, 2003. On the bid forms, bidders had to specify the price of five items for each of the five years. Specifically, the bid forms requested prices for three "runs" consisting of morning, midday and afternoon service, whereby bidders had to specify the **[*634]** annual unit price per school bus, and then multiply that price by the number of buses to arrive at an annual price per run. [12] The bid forms also requested an annual price for 180 half hours of "additional service." Finally, the bid forms requested the annual price of bus monitors, to be calculated by multiplying a monitor's hourly salary by 15,120 hours. Each of these prices were added together to arrive at the total annual price of the busing service. The bidder was then required to add together the annual prices for each of the five years, adjusted for present value, to arrive at the net present value, or total price, **[***24]** of the bid.

The net present value of the plaintiff's bid was $ 5,862,997.93. Terry testified that this figure included all of the plaintiff's costs, as well as its usual anticipated profit of 8 to 10 percent. Specifically, Terry testified that, in preparing the bid, she had calculated the following costs: the cost of purchasing new or used school buses, including the cost of financing those purchases; payroll, including taxes and workers' compensation insurance; facility costs, including the cost of gasoline for the school buses; property costs; and the cost of liability insurance. Terry further testified that she had calculated each of these costs on the basis **[***25]** of the individual specifications of the bid. She then testified that, after calculating the plaintiff's costs, she had added its anticipated profit. Terry stated that her usual practice was to add between 8 and 10 percent profit to her bids.

In addition, Terry testified at length concerning her approximately thirty years of experience in the school transportation business. She stated that she had started as a school bus driver in the 1960s, and soon thereafter **[*635]** was managing school transportation contracts for a number of cities and towns throughout the state, encompassing "well over 200" school buses at one time and "[forty- eight school buses] in Norwich alone." In 1984, Terry incorporated the plaintiff, which has provided **[**1078]** school transportation services since that time.

---

[11] We note that the defendant's anticompetitive behavior in the present case resulted in a greater cost to taxpayers for the contract, not less. Although awarding damages to the plaintiff, the injured party, may exacerbate the additional costs paid by the taxpayers, thus bolstering the defendant's policy argument for exempting the municipal bidding process from the act, any change to the act must come from the legislature, not this court.

[12] With regard to morning, midday and afternoon service, the bid form requested prices for the following specifications: thirty-four school buses for morning service, running from 6:30 a.m. to 9:15 a.m.; one school bus for midday service, running from 10:30 a.m. to 12 p.m.; and thirty-four school buses for afternoon service, running from 2 p.m. to 5 p.m.

On cross-examination by the defendant, Terry acknowledged that she was unable to produce the exact figures that she had used in calculating the bid. She stated, however, that, although she had prepared the bid two and one-half years before the trial and could not remember the actual figures she had used, she could explain how she had calculated the bid. Terry explained that she had calculated the bid the same way **[***26]** that she calculates all of her bids: "I took my costs, as I always do, and added a profit, and that is all I can tell you because that is the way you do it." Although Terry acknowledged that it was "possible" that she could have miscalculated the bid, she stated: "I have been doing this for a long time, and I have been pretty much on target. . . . I am not infallible, no one is infallible, but I have a record." When the defendant's attorney asked Terry, a second time, if she could have miscalculated her expenses, she replied: "I have a record, that is why I am in business. . . . I am confident of my past experience which has been many many years in the business, or I wouldn't have been in the business."

At the end of Terry's testimony, the defendant moved to strike her testimony concerning anticipated profits as irrelevant because "she does not have the knowledge upon which to base an estimate of the profits." The trial court denied the motion to strike, but indicated that, "unless there is more offered in the way of facts and figures that [Terry] relied on, I may be in a position **[*636]** where I grant a motion for a directed verdict . . . ." [13] The plaintiff presented no further evidence **[***27]** concerning Terry's preparation of the bid or the plaintiff's anticipated profits.

[*28]** The jury returned a verdict in favor of the plaintiff on its antitrust claim, and awarded damages in the amount of $ 500,000.

[14] The defendant thereafter filed a motion to set aside the verdict, claiming, inter alia, that "the verdict bears no relationship to [the] damages proved in the case." The trial court agreed, and concluded that the plaintiff had "failed to prove damages to a reasonable certainty [and] that the jury verdict was based on sheer speculation." Specifically, the court stated that, "the plaintiff, through . . . Terry, presented no experts, statistics, financial records as to costs or any information **[**1079]** from which a reasonable calculation of lost profits could be made for this contract. [Terry] simply testified that she had been in the school **[*637]** transportation business for thirty years and her rate of profit was between 8 and 10 percent. . . . Terry was a very candid witness . . . [and] repeatedly said that she had done the calculation on cost for this bid over two years ago and did not have her records nor any present memory of any of the cost items that went into determining the expenses of completing the contractual obligations she was bidding for . . . . In **[***29]** the court's opinion, that will not do. Profits are determined by subtracting expenses from anticipated revenue. Although expenses for a five year contract cannot be calculated precisely in every category, some credible and concrete figures must be provided--[Terry] admitted at one time she had those very figures, she just did not bring them to court or no longer had them." The trial court further stated that, even if the plaintiff could have established lost profits "by proving the amount of the bid and the rate of profit it traditionally received by running this business for over thirty years," there was "no evidence that the school transportation contracts it had performed in the past were anything comparable to the prospective Hartford five year contract." Consequently, the trial court granted the defendant's motion to set aside the jury's verdict.

---

[13] In denying the defendant's motion to strike Terry's testimony as irrelevant, the trial court stated: "My difficulty now is in [granting] a motion to strike if the trial isn't over, so I can't say that the testimony is not relevant, you know, as such. But I am telling you, counsel, in fairness to you, that unless it is tied up, I am going to have a problem, because one of the aspects of this case is a request for an injunction, and the other aspect of this case is a request for damages. . . . The law permits speculation, but in certain respects on future earnings, and the cases are pretty liberal. Like a claim for future earnings, but there has to be some foundational requirement. And [Terry] didn't remember any costs of this contract, she didn't remember maintenance, facilities, she had no access to these figures. And yet she says that she relies on these figures in determining what her bid price was and what her rate of profit is. . . . I can't say that her testimony was completely irrelevant, but I am telling you, counsel, unless there is more offered in the way of facts and figures that [Terry] relied on, I may be in a position where I grant a motion for a directed verdict . . . . And in fairness to you, I will allow you to recall her if she has figures."

[14] Approximately 8.5 percent of the net present value of $ 5,862,997.93, the plaintiff's bid on the Hartford school transportation contract, amounted to approximately $ 500,000, the amount awarded the plaintiff. Terry's estimated profit of between 8 and 10 percent of the net present value represents a profit between $ 469,039.83 and $ 586,299.79. Accordingly, the jury's damage award falls within this range.

[*30]** We begin with a brief discussion of the appropriate standard of review. ***HN11***[] "The trial court possesses inherent power to set aside a jury verdict which, in the court's opinion, is against the law or the evidence. . . . The supervision which a judge has over the verdict is an essential part of the jury system. . . . [The trial court] should not set aside a verdict where it is apparent that there was some evidence upon which the jury might reasonably reach their conclusion, and should not refuse to set it aside where the manifest injustice of the verdict is so plain and palpable as clearly to denote that some mistake was made by the jury in the application of legal principles, or as to justify the suspicion **[*638]** that they or some of them were influenced by prejudice, corruption or partiality. . . . The court has a duty to set aside the verdict where the jury's action is so unreasonable as to suggest that it was the product of such improper influences. . . .

"We recognize that, ***HN12***[] in determining whether to set aside the verdict, the trial court walks a thin line. . . . Ultimately, the decision to set aside a verdict entails the exercise of a broad legal discretion . . . that, in the absence of **[***31]** clear abuse, we shall not disturb. Our review of the trial court's action on a motion to set aside the verdict involves a determination of whether the trial court abused its discretion, according great weight to the action of the trial court and indulging every reasonable presumption in favor of its correctness . . . since the trial judge has had the same opportunity as the jury to view the witnesses, to assess their credibility and to determine the weight that should be given to their evidence. . . . Moreover, the trial judge can gauge the tenor of the trial, as we, on the written record, cannot, and can detect those factors, if any, that could improperly have influenced the jury. . . .

"Finally, ***HN13***[] in evaluating the exercise of the trial court's discretion, we are mindful that litigants have a constitutional right to have juries decide issues of fact. The right to a jury trial is fundamental in our judicial system, and this court has said that the right is one obviously immovable limitation on the legal discretion of the court to set aside a verdict, since the constitutional right of trial by jury includes the right to have issues of fact as to which **[**1080]** there is room for a reasonable **[***32]** difference of opinion among fair-minded men passed upon by the jury and not by the court. . . . Since, in setting aside the verdict, the trial court has deprived the party in whose favor the verdict was rendered of his constitutional right to have factual issues resolved by the jury, we must examine the evidential basis of the verdict **[*639]** itself to determine whether the trial court abused its discretion." (Citations omitted; internal quotation marks omitted.) *Howard v. MacDonald, 270 Conn. 111, 126-28, 851 A.2d 1142 (2004)*.

In the present case, the trial court set aside the jury's verdict because it concluded that the plaintiff had not proved its damages to a reasonable certainty. ***HN14***[] "The amount of a damage award is a matter peculiarly within the province of the trier of fact, in this case, the jury. . . . ***HN15***[] In considering a motion to set aside the verdict, the [trial] court must determine whether the evidence, viewed in the light most favorable to the prevailing party, reasonably supports the jury's verdict." (Internal quotation marks omitted.) *Carrol v. Allstate Ins. Co., 262 Conn. 433, 449, 815 A.2d 119 (2003)*. Accordingly, we must determine whether **[***33]** the trial court abused its discretion in making its determination that the evidence reasonably did not support the jury's award of damages.

HN16[] "In deciding whether damages properly have been awarded . . . we are guided by the well established principle that such damages must be proved with reasonable certainty. . . . Although we recognize that damages for lost profits may be difficult to prove with exactitude . . . such damages are recoverable only to the extent that the evidence affords a sufficient basis for estimating their amount with reasonable certainty. . . . Consequently, we have permitted lost profits to be calculated by extrapolating from past profits." (Citations omitted; internal quotation marks omitted.) *Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, 247 Conn. 48, 69, 717 A.2d 724 (1998)*.

"This court and ***HN17***[] courts of other jurisdictions have looked to a number of factors in evaluating whether the plaintiff has proved lost profits to a reasonable certainty. A plaintiff's prior experience in the same business has been held to be probative . . . as has a plaintiff's **[*640]** experience in the same enterprise subsequent to the interference. . . **[***34]** . The experience of the plaintiff . . . in a similar business [has] been admitted to prove lost profits. . . . In addition, the average experience of participants in the same line of business as the injured party has been approved as a method of proving lost profits. . . . Similarly, prelitigation projections, particularly when prepared by the defendant, have also been approved. . . . The underlying requirement for each of these types of evidence is a substantial similarity between the facts forming the basis of the profit projections and the business opportunity that was destroyed." (Citations omitted.) *Id., 72-74*.

Finally, this court has recognized that, *HN18*[] "the vagaries of the marketplace usually deny us sure knowledge of what [the] plaintiff's situation would have been in the absence of the defendant's antitrust violation. This fact and the general belief that it would be inequitable to allow a wrongdoer to defeat recovery by insisting on rigorous proof of damages have resulted in a lesser burden of proving the amount of damages in antitrust suits than in other contexts." (Internal quotation marks omitted.) *Westport Taxi Service, Inc. v. Westport Transit District, 235 Conn. 1, 28, 664 A.2d 719 (1995),* **[***35]** quoting 1 A.B.A. Antitrust Section, ***Antitrust Law*** **[**1081]** Developments (3d Ed. 1992) p. 668. Accordingly, "[a] damage theory may be based on assumptions so long as the assumptions are reasonable in light of the record evidence. . . . The reasonableness of the assumptions underlying the plaintiff's damage theory is determined by the trier of fact. . . . Federal appellate courts have refused to find damage evidence insufficient unless there was *no basis* for critical assumptions made by the [trier of fact]." (Citations omitted; emphasis added; internal quotation marks omitted.) *Westport Taxi Service, Inc. v. Westport Transit District, supra, 28*.

[*641] Our review of the record reveals that the jury's award of damages was reasonably supported by the evidence, which proved those damages to a reasonable certainty. First, the plaintiff's bid on the Hartford school transportation contract stated a net present value of $ 5,862,997.93. This figure reflects the net present value of the requested three daily runs of school bus service, additional service and bus monitors over the course of five years. On the basis of this evidence and any assumptions reasonably drawn therefrom, **[***36]** the jury reasonably could have concluded that, in the absence of the defendant's antitrust violation, the plaintiff would have performed the Hartford school transportation contract at a price of $ 5,862,997.93.

Second, Terry testified at length concerning her substantial experience in preparing bids for school transportation contracts. Specifically, Terry testified that she had approximately thirty years of experience in preparing such bids, and that she had run her own school transportation company since 1984. She also stated, several times, that she prepared her bids by first calculating her costs, and then adding in an anticipated profit, which was usually between 8 and 10 percent of the price of the bid. Although Terry could not produce the exact figures she had used in calculating the costs for the bid, she discussed, in detail, the nature of those costs. On cross- examination, Terry candidly acknowledged the possibility that she could have miscalculated the bid. She stated, however, that "I have been doing this for a long time, and I have been pretty much on target." Terry also stated: "I am confident of my past experience which has been many many years in the business, or I **[***37]** wouldn't have been in the business." On the basis of this testimony, the jury reasonably could have inferred that Terry accurately had predicted the plaintiff's profits on previous bids. Moreover, her testimony was consistent with our well settled principle **[*642]** that *HN19*[] "the owner of property is competent to testify to its value. . . . Furthermore, we have determined that a franchise owner is competent to testify as to the value of a franchise. . . . This is based in part on the common experience that an owner is familiar with her property . . . . The weight to be accorded such testimony is for the trier to decide." (Citations omitted; internal quotation marks omitted.) *Westport Taxi Service, Inc. v. Westport Transit District, supra, 235 Conn. 35*.

In *Westport Taxi Service, Inc. v. Westport Transit District, supra, 235 Conn. 32-36*, in which the plaintiff had alleged antitrust violations, this court upheld an award of damages for lost profits and lost business value. In that case, the plaintiff, a private taxi company, claimed that the defendant municipality had committed an antitrust violation by operating a government subsidized, below cost taxi service **[***38]** for the purpose of monopolizing the town's taxi business, thereby forcing the plaintiff out of business. After a court trial, the trial court agreed with **[**1082]** the plaintiff and awarded it damages for lost profits and lost business value. With regard to lost profits, the trial court found that the plaintiff had not sought a fare increase with the state public utilities commission, because it "legitimately [had] feared that it would have trouble enough competing with [the defendant's] service at present rates, without adding to the problem by increasing its fares." (Internal quotation marks omitted.) *Id., 30*. Accordingly, the court awarded damages of $ 12,144 in lost profits based upon the difference in what the plaintiff had been charging and what it could have charged but for the defendant's conduct. [15] *Id., 30-32*.

---

[15] The plaintiff had been charging a fare of $ 1.80 for an average three mile trip, whereas taxi companies in the surrounding areas of Bridgeport, Greenwich and Stamford had been charging $ 2.70 for the same distance. The trial court therefore awarded

[*39] [*643]** The trial court in *Westport Taxi Service, Inc.*, then determined that the plaintiff also was entitled to $ 150,000 in damages for lost business value. In arriving at this figure, the trial court noted its reliance on the testimony of the plaintiff's vice president, who stated that a fair return on a taxi business would be between 10 and 12 percent. Specifically, "the trial court determined that [the witness'] valuation of the business was based on his own experience in the taxi business for more than twenty years, his knowledge of how a taxi business was valued by the industry, his discussions with other owners, his knowledge of other sales, his membership in the Connecticut Taxi Cab Association, his membership in the International Taxi Cab Association, and finally, his own personal experience and practice . . . ." (Internal quotation marks omitted.) *Id., 34*. In accordance with the testimony of the plaintiff's vice president, the trial court applied a 10 to 12 percent rate of return to its own calculation of the plaintiff's projected profits to arrive at its ultimate determination in lost business value. *Id., 33*.

The defendant appealed to this court, **[***40]** which affirmed the award of damages for lost profits and lost business value. *Id., 45*. With respect to lost profits, this court concluded that "the trial court based its calculation of the plaintiff's damages due to lost profits on sufficient evidence and reasonable assumptions . . . ." *Id., 32*. In addition, this court concluded that the trial court properly had relied on the testimony of the plaintiff's vice president to establish the lost value of the plaintiff's business. In so concluding, we noted "that the trial court has broad discretion to admit the testimony of anyone who is involved with a business or property and may have personal knowledge of its value." *Id., 35*. Because the plaintiff's vice president was competent to testify to the methods he had employed in valuing the business, the weight given his testimony was for **[*644]** the trial court, as the trier of fact, to decide. Id. Just as the plaintiff's vice president in *Westport Taxi Service, Inc.*, was competent to testify as to the plaintiff's lost anticipated profits and to his reliance on those figures in valuing his business, Terry was competent to testify in the present case as to **[***41]** the methods she had used in predicting a profit in the plaintiff's bid for the Hartford school transportation contract, and, therefore, the jury was entitled to credit her testimony as it did. [16] **[***42] [**1083]** See *Capitol City Personnel Services, Inc. v. Franklin, 52 Conn. App. 783, 787, 727 A.2d 1284 (1999)* (plaintiff proved damages with reasonable certainty when principal shareholder estimated profits as 25 percent of adjusted gross receipts, and testified that 25 percent was "accurate" for both industry and this particular plaintiff). [17]

---

lost profits on the basis of the difference between the $ 1.80 average fare that the plaintiff had been charging and the $ 2.70 average fare that it could have charged. *Westport Taxi Service, Inc. v. Westport Transit District, supra, 235 Conn. 30-31*.

[16] We note, in addition, that our observation in *Westport Taxi Service, Inc. v. Westport Transit District, supra, 235 Conn. 29*, that the trial court in that case had "made meticulous findings of fact and clearly detailed its calculations" regarding the plaintiff's lost profits, does not lessen the applicability of that case to our resolution of this issue in the present case. This detail was the result of the fact that *Westport Taxi Service, Inc.*, was tried to the court, which has the ability, and indeed the obligation, to provide such findings. See *Practice Book § 6-1 (a)*.

[17] The defendant attempts to distinguish the present case from *Capitol City Personnel Services, Inc. v. Franklin, supra, 52 Conn. App. 787*, because in that case, "the plaintiff's witness testified that [the] plaintiff had earned a 25 percent profit markup on its billings for the same type of business in the same locality over the past three years. [The] plaintiff also presented testimony that other businesses in the same industry and area also earned about the same percentage profit at the time." This is a distinction without a difference. In the present case, Terry testified that she always anticipates a profit of between 8 and 10 percent, and that she usually is accurate. Therefore, Terry's estimate of lost profits was not a "pure guess [that] was wholly unsupported as to either the amount of business lost or the profit to be expected." *Doeltz v. Longshore, Inc., 126 Conn. 597, 602, 13 A.2d 505 (1940)*. Moreover, the fact that the plaintiff had submitted the lowest bid on the Hartford school transportation contract, is evidence that the plaintiff's bid was competitive in the industry. Therefore, the jury reasonably could have inferred that Terry's stated anticipated profit of 8 to 10 percent was accurate as to the state's school transportation industry, as well as to this particular plaintiff. Finally, the fact that the plaintiff's anticipated profit had ranged from 8 to 10 percent is not fatal to its claim for lost profits; that range of anticipated profit was sufficiently restrictive to permit the jury to determine the damages with reasonable certainty. See *Westport Taxi Service, Inc. v. Westport Transit District, supra, 235 Conn. 33-34* (trial court's reliance on fair rate of return of between 10 to 12 percent in valuing plaintiff's business was proper).

Similarly, the dissent's reliance on *Doeltz* is misplaced. In that case, this court determined that lost profits had been improperly awarded for the plaintiff's new business when profits had actually increased after the defendant's interference and the plaintiff had presented no evidence of costs other than rent. *Doeltz v. Longshore, Inc., supra, 126 Conn. 601*. In addition, the plaintiff's

[*43]** **[*645]** Moreover, in *Bead Chain Mfg. Co. v. Saxton Products, Inc., 183 Conn. 266, 439 A.2d 314 (1981)*, this court concluded that, under the Uniform Commercial Code; *General Statutes § 42a-1-101 et seq.*; lost profits on a breached contract for the sale of goods may be established through the opinion testimony of the seller. Specifically, this court stated: "With regard to the loss of profits, [the plaintiff's] president testified, without objection, about the elements he considered in pricing the job for [the defendant]. Under the [Uniform Commercial] Code, it is not fatal that his cost and price estimates about the actual production run were necessarily theoretical, since [the defendant's] breach made it impossible to go forward with the production that would have made historically accurate figures available. . . . [The plaintiff's] **[**1084]** president based his estimates on his experienced view of the equipment that would be required, the difficulty of maintaining production, and the time required for the job. Having taken account of these and related factors, he built a 20 percent profit into the contract price of $ 13.95 per thousand units. **[***44]** The award of $ 3000 lost profits on a contract for **[*646]** 5,000,000 units at a total contract price of approximately $ 70,000 was therefore well within the supporting evidence." (Citations omitted.) *Bead Chain Mfg. Co. v. Saxton Products, Inc., supra, 279-80*. Although *Bead Chain Mfg. Co.* was decided under the Uniform Commercial Code, "we have often drawn upon provisions of the Uniform Commercial Code as a source of analogy for the emergent common law." *Normand Josef Enterprises, Inc. v. Connecticut National Bank, 230 Conn. 486, 501, 646 A.2d 1289 (1994)*. Therefore, as in *Bead Chain Mfg. Co.*, it is not fatal in the present case that Terry's estimated profits under the Hartford school transportation contract were necessarily theoretical, since it was the defendant's antitrust violation, in the first instance, that rendered the historically accurate figures unavailable.

The defendant, relying on *Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 247 Conn. 70*, and *Gordon v. Indusco Management Corp., 164 Conn. 262, 320 A.2d 811 (1973)*, contends that this court previously has set **[***45]** aside damage awards that were "supported by far more evidence than the verdict here." A review of those cases, however, reveals that they do not support the defendant's characterization. In *Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 50-52*, the plaintiff, a corporation that sold exercise equipment, brought an action against the defendant law firm and certain individual attorneys for malpractice in connection with the plaintiff's failed attempt to establish a new business that would franchise fitness clubs. After a court trial, the trial court rendered a verdict for the plaintiff, and awarded the plaintiff approximately $ 15.9 million in lost profits. *Id., 51*. On appeal, this court reversed the damages award, because "the trial court improperly concluded that the plaintiff had established its damages to a reasonable certainty." *Id., 59*. Specifically, the plaintiff in that case **[*647]** had not sold any fitness franchises; *id., 72*; therefore, there was no record of such sales from which to extrapolate anticipated future profits. Accordingly, the plaintiff attempted to establish lost profits through the **[***46]** expert testimony of a certified public accountant, who estimated the plaintiff's lost profits on the basis of its prior sales of fitness equipment. *Id., 70-72*. As this court noted, however, this testimony was based on the faulty assumption that, because the plaintiff previously had sold fitness *equipment*, it would have been able to sell fitness *franchises* with a similar rate of success. Id.

The lost profits of a new business also was an issue in *Gordon v. Indusco Management Corp., supra, 164 Conn. 262*, the other case relied on by the defendant. In *Gordon*, the plaintiff, who had acquired an area distributorship franchise in a fast-food restaurant operation, entered into a contract with the defendant for the construction and lease of a building in Danbury in which the plaintiff would operate an outlet of the restaurant chain. *Id., 264*. After the defendant had failed to construct the outlet, as it had promised to in the contract, the plaintiff brought an action against the defendant for breach of contract. *Id., 263*. In an effort to establish lost profits, the plaintiff presented the testimony **[**1085]** of the operator an outlet **[***47]** of the fast-food chain located in Orange. That witness testified that his outlet's gross receipts were $ 175,000, and that his net profit was 12 percent of the gross receipts. *Id., 275*. As this court noted, however, the operator of the outlet in Orange had managed that outlet himself, and his stated figure of a 12 percent profit had *included* the value of his own services to the operation in that capacity. *Id., 276*. The plaintiff, by contrast, had intended to hire a manager to run his outlet for him. Id. Accordingly, the court in

---

testimony that "we usually figure on the liquor 100 [percent profit] and food 50 [percent profit]"; *id., 599*; in an attempt to establish lost profits was deficient. *Id., 601*. This court concluded in *Doeltz* that, without more evidence, simply averaging the two figures to arrive at a claim for 75 percent lost profit, was insufficient, because "no attempt was made to show what relative proportion of [the plaintiff's] total sales fell within one class or the other. The evidence quoted shows that the estimate of the plaintiff was a pure guess and was wholly unsupported as to either the amount of business lost or the profit to be expected." *Id., 601-602*.

Gordon concluded that the plaintiff had not proved his damages, because, "since the plaintiff would not have given his services but would have employed a manager **[*648]** for his outlet, it is not clear that he would have enjoyed a similar profit margin." Id.

Unlike the businesses in both *Beverly Hills Concepts, Inc.*, and *Gordon*, the plaintiff in the present case is not a new business.

[18] As we previously have stated, Terry testified that she had approximately thirty years of experience in the school transportation industry and had been running her own school transportation company since 1984. She also testified that, prior **[***48]** to incorporating her own company, she had managed a school transportation company that had "well over 200" school buses and "[forty-eight school buses] in Norwich alone." The bid form in the present case indicates that only thirty-four school buses would have been required for performance of the Hartford school transportation contract. See footnote 12 of this opinion. Finally, Terry discussed the specific types of expenses that she had considered in preparing the bid, and she testified that she always had prepared her bids by first calculating the costs, and then adding in the anticipated profit. Accordingly, Terry's testimony established that she previously had managed school transportation contracts that were similar to the contract at issue in the present case, and on the basis of this testimony, the jury reasonably could have concluded that Terry's anticipated profit of between 8 and 10 percent was appropriate. Because the jury's damage award of $ 500,000, or approximately 8.5 percent in lost profits, was well within this range; see footnote 14 of this opinion; the trial court abused its discretion in setting aside the jury's verdict.

[*49]** **[*649]** III

The plaintiff next claims that the trial court improperly granted the defendant's motion for a directed verdict on its equal protection claims on the ground that the plaintiff had an adequate remedy at law in its antitrust claim, because the trial court subsequently deprived the plaintiff of that adequate remedy when it set aside the jury's verdict on the antitrust claim. The defendant contends that the trial court properly directed the verdict on the plaintiff's constitutional claims because the plaintiff had the remedy of a permanent injunction available to her. Because we have concluded that the trial court's judgment setting aside the verdict was improper, we need not decide this issue because a litigant may recover just damages only **[**1086]** once. [19]

[*50]** IV

The plaintiff's final claim is that the trial court improperly failed to grant it a mandatory injunction requiring that the defendant enter into a prospective, five year contract with the plaintiff on a cost plus 10 percent profit basis.

[20] **[***51]** The defendant contends that the trial **[*650]** court was within its discretion to deny the relief requested by the plaintiff. Laidlaw [21] claims that, because the 1998 contract has terminated, and it already is performing work

---

[18] In addition, we note that neither *Beverly Hills Concepts, Inc.*, nor *Gordon* were antitrust cases and, accordingly, both can be distinguished on that ground alone. See *Westport Taxi Service, Inc. v. Westport Transit District, supra, 235 Conn. 28* (there is "a lesser burden of proving the amount of damages in antitrust suits than in other contexts" [internal quotation marks omitted]); see also *Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 247 Conn. 92* (*Peters, J.*, dissenting).

[19] ***HN20***[] "The rule precluding double recovery is a simple and time- honored maxim that [a] plaintiff may be compensated only once for his just damages for the same injury. . . . Plaintiffs are not foreclosed from suing multiple defendants, either jointly or separately, for injuries for which each is liable, nor are they foreclosed from obtaining multiple judgments against joint tortfeasors. . . . The possible rendition of multiple judgments does not, however, defeat the proposition that a litigant may recover just damages only once. . . . Double recovery is foreclosed by the rule that only one satisfaction may be obtained for a loss that is the subject of two or more judgments." (Internal quotation marks omitted.) *Haynes v. Yale-New Haven Hospital, 243 Conn. 17, 22 n.6, 699 A.2d 964 (1997)*.

[20] In its complaint, the plaintiff also sought prohibitory injunctive relief, namely, that the court temporarily restrain the defendant from entering into the contract with another party, and temporarily restrain the defendant from permitting any party to perform

under a new five year contract awarded in 2003, issuance of the mandatory injunctive relief sought by the plaintiff would severely harm Laidlaw. We agree with the defendant.

HN21[] "A mandatory injunction . . . is a court order commanding a party to perform an act." *Tomasso Bros., Inc.* v. O*ctober* *Twenty-Four, Inc., 230 Conn. 641, 652, 646 A.2d 133 (1994)*. "Relief by way of mandatory injunction is an extraordinary remedy granted in the sound discretion of the court and only under compelling circumstances. . . . Ordinarily, an injunction will not lie where there is an adequate remedy at law." (Citation omitted; internal quotation marks omitted.) *Monroe v. Middlebury Conservation Commission, 187 Conn. 476, 480, 447 A.2d 1 (1982)*; accord *Harvey v. Daddona, 29 Conn. App. 369, 377, 615 A.2d 177 (1992)* ("injunctions should not be issued when damages can adequately protect the injured party"). Moreover, "where the granting of the injunction would cause damage to the defendant greatly disproportionate to the injury of which the plaintiff complains, it may be held inequitable to grant a mandatory injunction and the plaintiff **[***52]** may be remitted to her remedy by way of damages." *Moore v. Serafin, 163 Conn. 1, 6-7, 301 A.2d 238 (1972)*. In sum, "mandatory injunctions are . . . disfavored as a harsh remedy and are used only with caution and in compelling circumstances." 42 Am. Jur. 2d 560, Injunctions § 5 (2000).

We conclude that the trial court properly determined that the present case failed to present the "'compelling **[*651]** circumstances'" required for the issuance of a mandatory injunction. *Monroe v. Middlebury Conservation Commission, supra, 187 Conn. 480*. The plaintiff had an adequate remedy under **[**1087]** the act, namely, an action for damages against the defendant, on which she prevailed. Moreover, even if the plaintiff had not had the ability to collect damages, we would conclude that the trial court properly exercised its discretion in denying the relief requested. See id. ***HN22***[] ("mandatory injunction is an extraordinary remedy granted in the sound discretion of the court" [internal quotation marks omitted]). The plaintiff was requesting that the trial court award a new contract to the plaintiff, for a term of five years, and for a total value of cost plus a *guaranteed profit* **[***53]** of 10 percent. The plaintiff has failed to cite, before both the trial court and this court, any authority for such a broad use of the extraordinary remedy of a mandatory injunction. Indeed, the contract underlying the present case has expired, and the defendant already has entered into a new five year contract with Laidlaw. Thus, if that contract, which is not challenged in the present case, remained in effect, and the plaintiff's request for a new contract was granted, the result would be that two contracts would be in effect for the same project. [22] This court previously has rejected such a bizarre result. See *Blesso Fire Systems, Inc. v. Eastern Connecticut State University, 245 Conn. 252, 257, 713 A.2d 1283 (1998)*. Consequently, we conclude that the trial court did not abuse its discretion in denying the plaintiff's request for a mandatory injunction.

[*54]** The judgment is reversed in part and the case is remanded with direction to reinstate the judgment for the plaintiff in accordance with the jury's verdict.

[*652] In this opinion SULLIVAN, C. J., and BORDEN, PALMER and ZARELLA, Js., concurred.

Concur by: NORCOTT

Dissent by: NORCOTT

Dissent

---

work under the contract. The plaintiff concedes that, because the contract was in fact almost complete at the time of the hearing, its request for prohibitory injunctive relief was moot and nonjusticable. Consequently, we will address only the trial court's denial of the plaintiff's request for prospective mandatory relief. See *Tomasso Bros., Inc. v. October Twenty-Four, Inc., 230 Conn. 641, 652, 646 A.2d 133 (1994)* (distinguishing prohibitory injunctions from mandatory injunctions).

[21] Laidlaw is involved as an appellee solely for this claim. See footnote 5 of this opinion.

[22] Such a remedy also would create an expansive range of practical problems for the trial court when developing, and subsequently monitoring, the new contract, including: how would cost be determined; what services would be covered under the contract; how would changes resulting from changed market conditions be addressed; and how would the level of service provided by the plaintiff be measured.

NORCOTT, J., with whom VERTEFEUILLE, J., joins, concurring and dissenting. I concur with the outcome in parts I, III and IV of the thoughtful majority opinion. [1] I disagree with the majority's conclusion in part II, however, and respectfully dissent. More specifically, I would conclude that the trial court properly set aside the jury's verdict on the antitrust claim of the plaintiff, Cheryl Terry Enterprises, Ltd., on the ground that the plaintiff had failed to present sufficient proof of damages.

[*55]** Without reiterating the entire standard of review, I nonetheless note that I agree with the majority that a trial court's decision to set aside a verdict is entitled to "'broad legal discretion,'" and, therefore, our review of "'the trial court's action on a motion to set aside the verdict involves a determination of whether the trial court abused its discretion, according great weight to the action of the trial court and indulging every reasonable presumption in favor of its correctness' . . . ." (Citations omitted.) *Howard v. MacDonald, 270 Conn. 111, 127, 851 A.2d 1142 (2004)*; accord *Labbe v. Pension Commission, 239 Conn. 168, 192, 682 A.2d 490 (1996)*; *Ginsberg v. Fusaro, 225 Conn. 420, 425, 623* ***[**1088]*** *A.2d 1014 (1993)*; *Palomba v. Gray, 208 Conn. 21, 24, 543 A.2d 1331 (1988)*; *O'Brien v. Seyer, 183 Conn. 199, 208, 439 A.2d 292 (1981)*; *Jacobs v. Goodspeed, 180 Conn. 415, 416, 429 A.2d 915 (1980)*.

Moreover, I agree with the majority that we apply this familiar and deferential scope of review in light of **[*653]** the equally familiar principle that "damages must be proved **[***56]** with reasonable certainty. . . . Although we recognize that damages for lost profits may be difficult to prove with exactitude . . . such damages are recoverable only to the extent that the evidence affords a sufficient basis for estimating their amount with *reasonable certainty*." (Citations omitted; emphasis in original; internal quotation marks omitted.) *Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, 247 Conn. 48, 69, 717 A.2d 724 (1998)*. "The plaintiff cannot recover for the mere possibility of making a profit. . . . A damage theory may be based on assumptions so long as the assumptions are reasonable in light of the record evidence. . . . In order to recover lost profits, therefore, the plaintiff must present *sufficiently accurate and complete evidence* for the trier of fact to be able to estimate those profits with reasonable certainty." (Citations omitted; emphasis added; internal quotation marks omitted.) *Id., 70* [2]

[*57]** Applying this deferential standard of review to the present case, I would conclude that the trial court did not abuse its discretion when it granted the motion of the defendant, the city of Hartford, to set aside the verdict. As the trial court noted, the plaintiff "presented no experts, statistics, financial records as to costs or any information from which a reasonable calculation of lost profits could be made for this contract." To the **[*654]** contrary, as the majority recognizes, the only evidence offered by the plaintiff in support of its claim for lost profits was the testimony of its president, Cheryl Terry. Before evaluating whether the trial court properly determined that Terry's testimony, standing alone, failed to prove damages to a reasonable certainty, it is important to first identify what information was *not* testified to by Terry.

First, Terry failed to testify about *any profits* the plaintiff actually had made under prior busing contracts. See *Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 247 Conn. 72-73* (experience of plaintiff in

---

[1] I join fully in the reasoning and conclusion set forth in part I of the majority opinion. I agree with the outcome in part III of the majority opinion, yet I would reach that result based on my conclusion that the plaintiff, Cheryl Terry Enterprises, Ltd., had failed to present an adequate record for review. With regard to part IV of the majority opinion, I agree that "the trial court properly exercised its discretion in denying the relief requested."

[2] This court has articulated a number of factors to be taken into account when evaluating whether a plaintiff has proved lost profits to a reasonable certainty. Those factors include: a plaintiff's prior experience in the same business; the plaintiff's experience in the same enterprise subsequent to the interference; the experience of the plaintiff and that of third parties in a similar business when dealing with a new business; the average experience of participants in the same line of business as the injured party; and prelitigation projections. *Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 247 Conn. 72-74*. We have emphasized, however, that "the underlying requirement for each of these types of evidence is a substantial similarity between the facts forming the basis of the profit projections and the business opportunity that was destroyed." *Id., 74*.

same business probative on issue of lost profits); Kay Petroleum Corp. v. Piergrossi, 137 Conn. 620, 624-25, 79 A.2d 829 (1951) **[***58]** (profits earned by plaintiff in year prior to breach may be extrapolated to time remaining on contract breached by defendant); Tull v. Gundersons, Inc., 709 P.2d 940, 945 (Colo. 1985) (trial court improperly excluded evidence of plaintiff's "past profit experience on other projects"); Van Hooijdonk v. Langley, 111 N.H. 32, 34, 274 A.2d 798 (1971) ("an established business can usually provide data from **[**1089]** which future prospects [of profitability] can reasonably be projected"); White v. Southwestern Bell Telephone Co., 651 S.W.2d 260, 263, 26 Tex. Sup. Ct. J. 441 (Tex. 1983) (profits earned by plaintiff's florist shop prior to defendant's breach of contract relevant to determination of lost profits caused by defendant's failure to list plaintiff's business properly in telephone directory).

Second, Terry failed to testify about any profits that the plaintiff actually had made under subsequent busing contracts. See Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 247 Conn. 73 (plaintiff's experience in same enterprise subsequent to interference probative on issue of lost profits); El Fredo Pizza, Inc. v. Roto-Flex Oven Co., 199 Neb. 697, 698, 261 N.W.2d 358 (1978) **[***59]** (increased profits earned after **[*655]** faulty pizza oven replaced indicative of profits lost as result of defendant's breach of warranty of merchantability); Cook Associates v. Warnick, 664 P.2d 1161, 1165-66 (Utah 1983) (plaintiff's experience at unaffected plant relevant to lost profits projected for affected plant).

Third, Terry failed to testify about profits other participants in the busing industry had made under a contract with the defendant, or, more generally, under contracts with other towns. See Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 247 Conn. 73 (experience of third parties in similar business probative on issue of lost profits); Chung v. Kaonohi Center Co., 62 Haw. 594, 611, 618 P.2d 283 (1980) (proper to base future profit calculation on experience of third party conducting virtually identical business at same location), overruled in part on other grounds, Francis v. Lee Enterprises, Inc., 89 Haw. 234, 237, 971 P.2d 707 (1999); Vickers v. Wichita State University, 213 Kan. 614, 618, 518 P.2d 512 (1974) (approving of reliance on experience **[***60]** of others in same line of business). While the lack of this evidence is not, by itself, fatal, it would have "removed the assessment of damages from the realm of speculation [by providing] . . . objective verifiable facts that bear a logical relationship to projected future profitability." Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 76.

Rather than testify about past profits the plaintiff or other companies actually had made under prior contracts, Terry merely testified that she always added 8 to 10 percent profit to her expenses to determine *the bid amount*, and that she "would have hoped for" the same amount for the contract with the defendant. [3] This **[*656]** testimony is speculative on a number of different levels. First, Terry failed to present any evidence as to what profit expectation she in fact had added to prior bids, and merely claimed that she usually added a profit of 8 to 10 percent. Second, Terry failed to testify about profits the **[**1090]** plaintiff *actually had earned* on those prior contracts, and limited her testimony to what she had included in the bid. While the former would have "removed the assessment of damages from **[***61]** the realm of speculation"; Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 247 Conn. 76; the latter attempts to prove speculative future profit levels through mere speculation about past bid calculations. Third, the speculative nature of Terry's testimony was compounded by the fact that she was unable to testify accurately as to whether she added in an 8 percent profit projection, a 10 percent profit projection,

---

[3] In testifying generally about the bid preparation process, Terry stated: "You can't determine your price per bus until you have all [of your] costs factored in. This is how you come out with your cost per bus or cost per van when you have your driver pay scale and all of the above that I just mentioned. And then you come out with the total price. *Then you add your profit, which is usually between--I usually add 8 to 10 percent, hoping for the higher*, but I don't know until after that first year." (Emphasis added.)

With regard to the bid submitted to the defendant, the following colloquy occurred during the plaintiff's direct examination of Terry:

"Q. And what was the net present value of the five years in the [bid submitted to the defendant]?

"A. $ 5,862,097.

"Q. And of that, what was your anticipated profit?

"A. It would have been about 8 to 10 percent that I would have hoped for."

or some other number to the bid submitted to the defendant. Instead, Terry merely testified that it was her normal practice to add an 8 to 10 percent profit level to bids. Given that the total bid amount was almost $ 6 million, that is a difference between a $ 480,000 profit at 8 percent, and a $ 600,000 profit at 10 percent, being factored into the bid. Put another way, the plaintiff's bid price of $ 5,862,097 was arrived at either by: (1) adding up the total costs for providing the services under the contract and adding an 8 percent profit; or (2) adding up the total costs for providing the services under the **[*657]** contract and adding a 10 percent profit. [4] **[***63]** It simply cannot be true, as the majority seems to accept, that Terry added **[***62]** up her costs and added in an expected profit of *8 to 10* percent. To reach the fixed price eventually submitted with the bid, Terry had to add in one or the other, not both. [5]

[*64]** The majority places great emphasis on the fact that Terry "had approximately thirty years of experience in the school transportation industry and had been running her own school transportation company since 1984." On the basis of this experience, the majority states that "the jury reasonably could have concluded that Terry's anticipated profit of between 8 and 10 percent was appropriate." Although I agree that Terry, as well as the plaintiff, had substantial experience in the busing industry, I would conclude that this counsels **[*658]** strongly in favor of upholding the trial court's determination that the plaintiff had not proved lost profits to a reasonable certainty. Put another way, despite having **[**1091]** over thirty years of experience in the busing industry, having calculated and submitted numerous bids for busing contracts, having performed busing services pursuant to contracts with several cities and towns, and presumably having earned a sufficient profit to remain in business for thirty years, Terry failed to testify about any profits the plaintiff actually had made over that time. To the contrary, she testified only that she normally added an 8 to 10 percent profit level *to the bid* **[***65]** . I cannot conclude, given her extensive experience in the business and all of the past financial information at the plaintiff's disposal, that the trial court abused its discretion by determining that Terry's testimony failed to prove damages to a reasonable certainty.

As the majority notes, "this court has recognized that, 'the vagaries of the marketplace usually deny us sure knowledge of what [the] plaintiff's situation would have been in the absence of the defendant's antitrust violation,'" and therefore a plaintiff in a typical antitrust case is subject to a "'lesser burden of [proof] . . . .'" This case is not a typical antitrust case, however, as the plaintiff's situation was necessarily limited to an identifiable amount based on the figures set forth in the bid submitted to the defendant. As the trial court stated: "This is not a case where the requirements of proof of lost profits should be relaxed because of the intricacies of proof presented by a complex antitrust case. The contract price was known, all that was needed was information about expenses which Terry at one time admitted she had calculated. This rather is a situation where evidence that could have been preserved **[***66]** and presented was not offered in court and, without that evidence, there can be no reasonable basis for the jury's determination of lost profits." See also *Doeltz v. **[*659]** Longshore, Inc., 126 Conn. 597, 601, 13 A.2d 505 (1940)* ("while the modern tendency is toward greater liberality in the requirements [for demonstrating lost profits] . . . it is the unvarying rule that evidence of such certainty as the nature of the case permits should be produced" [citation omitted]). The present case does not involve a scenario where the defendant's actions

[4] With regard to how she calculated the bid submitted to the defendant, Terry testified: "I took my costs, as I always do, and added a profit, and that is all I can tell you because that is the way you do it."

[5] The majority claims that "the fact that the plaintiff's anticipated profit had ranged from 8 to 10 percent is not fatal to its claim for lost profits; that range of anticipated profit was sufficiently restrictive to permit the jury to determine the damages with reasonable certainty." This statement misses the point. The fact that the plaintiff may have adjusted its anticipated profit between 8 and 10 percent for varying bids it had made in the past is not relevant. What is relevant to the present case, however, is the profit level the plaintiff factored into the *specific bid* submitted to the defendant. Terry was unable to testify to that amount, and could only testify that in the past it had ranged from 8 to 10 percent. Indeed, the fact that Terry testified that it ranged from 8 to 10 percent indicates that it was always a firm number, and not a range, that she factored into a particular contract.

The record further reveals that the plaintiff had never provided busing services to the defendant before, and its prior contracts were with towns in the southeastern portion of Connecticut. The majority concludes that the fact that the plaintiff submitted the lowest bid indicates that "the plaintiff's bid was competitive in the industry." Although that may be true, it also may be true that the fact that the plaintiff submitted the lowest bid is evidence that the plaintiff reduced its normal profit level in order to win this contract, and expand its business into the central portion of the state. In sum, the fact that the plaintiff submitted the lowest bid has no bearing on a determination as to what the plaintiff's profit would have been if it had been awarded the contract.

prevented an opportunity for limitless business growth, and the concomitant opportunity for the limitless accumulation of profits. To the contrary, the business activity of the plaintiff in the present case, and the concomitant opportunity to accumulate profits, was limited to the terms specified in the bid. The nature of the present case therefore required the plaintiff to present more certain evidence of lost profits than that provided by Terry's testimony. Id.

At the completion of Terry's testimony, the defendant moved to strike her testimony on the ground that she did not have the knowledge upon which to base an estimate **[***67]** of the profit built into the bid. Although the trial court denied the defendant's motion, it nevertheless warned counsel for the plaintiff that, "unless there is more offered in the way of facts and figures that [Terry] relied on, I may be in a position where I grant a motion for a directed verdict . . . ."

[6] **[***69]** Despite this **[*660]** cautionary statement **[**1092]** from the trial court, the plaintiff failed to present any additional evidence concerning the preparation of the bid and Terry's profit estimates. Accordingly, the trial court found that Terry's testimony that, in her experience, she normally factored an 8 to 10 percent profit into a bid, without more, did not prove the plaintiff's lost profits under the proposed contract to a reasonable certainty. See *Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 247 Conn. 72* (trial court abused discretion in awarding damages for lost profits where plaintiff did not prove lost profit damages to reasonable certainty). On the record before us, considering the factors this court outlined in *Beverly Hills Concepts, Inc.,* [7] and indulging every reasonable presumption in favor of the trial court's action; *Howard v. MacDonald, supra, 270 Conn. 127*; **[***68]** I would conclude that the trial court did not abuse its discretion in granting the defendant's motion to set aside the verdict.

In reaching this conclusion, I am guided by this court's decision in *Doeltz v. Longshore, Inc., supra, 126 Conn. 597*. In *Doeltz*, the plaintiff had leased a refreshment concession from the defendant for $ 500 plus 5 percent of the gross receipts for the summer season. *Id., 598*. Under the terms of the lease, the defendant was to equip the bar and permit the plaintiff to have the exclusive sales of beverages and food on the defendant's premises. Id. Despite the terms of the lease, the plaintiff alleged that the bar was not equipped and ready for him on the agreed date, and that the defendant subsequently interfered with the operation of the plaintiff's business. *Id., 598-99*. The plaintiff brought an action against the defendant seeking, inter alia, an award of lost profits. *Id., 599*. In support of his claim for lost profits, the plaintiff testified that he "usually figured on the liquor 100 percent [profit] and [on the] **[*661]** food 50 percent [profit]." (Internal quotation marks omitted.) Id. On the **[***70]** basis of those usual profit margins, the plaintiff testified that he averaged a 75 percent profit, and, therefore, if he lost $ 3750 in business due to the defendant's interference, then his lost profits were $ 2500. [8] Id. The jury returned a verdict for the plaintiff in the amount $ 2500, and the trial court denied the defendant's subsequent motion to set aside the verdict. Id. On appeal, this court reversed the judgment of the trial court, concluding that the "unsatisfactory and conjectural character [of

---

[6] Specifically, the trial court stated: "My difficulty now is in [granting] a motion to strike if the trial isn't over, so I can't say that the testimony is not relevant, you know, as such. But I am telling you, counsel, in fairness to you, that unless it is tied up, I am going to have a problem, because one of the aspects of this case is a request for an injunction, and the other aspect of this case is a request for damages. . . . The law permits speculation, but in certain respects on future earnings, and the cases are pretty liberal. Like a claim for future earnings, but there has to be some foundational requirement. And [Terry] didn't remember any costs of this contract, she didn't remember maintenance, facilities, she had no access to these figures. And yet she says that she relies on these figures in determining what her bid price was and what her rate of profit is. . . . I can't say that her testimony was completely irrelevant, but I am telling you, counsel, unless there is more offered in the way of facts and figures that [Terry] relied on, I may be in a position where I grant a motion for a directed verdict . . . . And in fairness to you, I will allow you to recall her if she has figures."

[7] See footnote 2 of this opinion.

[8] Although $ 2500 is slightly less than 75 percent profit of $ 3750 in sales, the plaintiff stated that the lower amount was applicable because "sometimes you give something away free of charge, and so forth, you know, the kids come in for ice cream cones and sometimes you give a drink away on the house." (Internal quotation marks omitted.) *Doeltz v. Longshore, Inc., supra, 126 Conn. 599*.

the plaintiff's evidence] is plain." *Id., 601*. In so concluding, this court noted, inter alia, that "no data whatever as to his costs, other than rent, were shown nor was there any testimony to the effect that such data were not available." Id. Moreover, the court noted that the plaintiff's estimation **[**1093]** of a 75 percent profit level "was a pure guess and was wholly unsupported as to either the amount of business lost or the profit to be expected." *Id., 602*.

[*71]** The facts of *Doeltz* and the present case are similar in several important respects. First, both the plaintiff's testimony in *Doeltz* and Terry's testimony in the present case were predicated upon unsupported claims of "usual" profit margins. Just as there was no evidence in *Doeltz* to support the claimed average of 75 percent profits, there was no evidence in the present case to support the claimed level of 8 to 10 percent profit. Moreover, the plaintiff's testimony in *Doeltz* contained speculation about usual profits *earned* in his business. Terry's testimony in the present case, however, concerned speculative profit levels set forth in a bid, rather than speculation over past profits actually earned. If **[*662]** the testimony in *Doeltz* was insufficient because it was speculative, then surely Terry's testimony was insufficient as well. Second, in both cases, no data whatsoever was presented by the plaintiff as to relevant costs, nor was there testimony in either case that this data was unavailable. Therefore, I would conclude in the present case, just as this court concluded in *Doeltz*, that the "unsatisfactory and conjectural character [of Terry's testimony] is plain. **[***72]** " *Id., 601*.

This conclusion is buttressed by an examination of other cases in which this court has addressed awards for lost profits. In those cases where the award was affirmed, the plaintiff had presented specific evidence, beyond mere speculation, which supported the award. See, e.g., *Westport Taxi Service, Inc. v. Westport Transit District, 235 Conn. 1, 29, 664 A.2d 719 (1995)* (affirming award of lost profits where "trial court made meticulous findings of fact and clearly detailed its calculations regarding the plaintiff's damages" based on, inter alia, specific figures in evidence regarding average taxi fares, yearly rides and commissioner's guidelines for fair rate of return);

[9] *Burr v. Lichtenheim, 190 Conn. 351, 361, **[*663]** 460 A.2d 1290 (1983)* (affirming award of lost profits where **[**1094]** plaintiff "introduced, as an exhibit, a contract for sale of that property for $ 25,000 [that was lost by the plaintiff] . . . [and] expert testimony that he might reasonably have expected to make a profit of $ 23,000 to $ 25,000 had he been able to build [on a separate piece of land] in 1976"); *Humphrys v. Beach, 149 Conn. 14, 20, 175 A.2d 363 (1961)* **[***73]** (award of $ 3500 for lost profits over one year and three months had sufficient support in record, namely, "evidence that the [plaintiff's] profit in 1955 was $ 3500, and that it was about half of that amount during the first half of 1956"); *Kay Petroleum Corp. v. Piergrossi, supra, 137 Conn. 624* (award of $ 3025 for lost profits over three years and nine months had sufficient support in record, namely, evidence that plaintiff had profit of $ 806.57 in prior year); *Kastner v. Beacon Oil Co., 114 Conn. 190, 194, 158 A. 214 (1932)* (award for lost profits reasonably supported by testimony from owner that, inter alia, in 1928, net profit was about $ 3400, and in 1929, gross profit was $ 3200, and net profit was something less due to family illness).

---

[9] The majority's reliance on *Westport Taxi Service, Inc. v. Westport Transit District, supra, 235 Conn. 1*, in support of its conclusion is misplaced. To begin with, much of the discussion the majority cites to from *Westport Taxi Service, Inc.,* is contained in the part of that opinion addressing the defendant's challenge to the trial court's award of $ 150,000 for the loss of the business, and not the part of that opinion addressing the defendant's challenge to an award of $ 12,144 in lost profits. See *id., 32-35*. Second, within that part of *Westport Taxi Service, Inc.,* addressing the award for lost profits, this court noted that the trial court, as the trier of fact in that case, had "sufficient evidence" from which to make "reasonable assumptions" concerning lost profits. *Id., 32*. That sufficient evidence included, inter alia, evidence that the plaintiff collected a $ 1.80 average fare, that the state commission would have approved a fare increase to the rate of $ 2.70, that surrounding communities were charging an average fare of $ 2.70, and that the commission considered a reasonable rate of return to be a ratio of operating costs to gross revenue of between 85 and 95 percent. *Id., 30-31*. That level of evidence simply was not presented by Terry in the present case. Thus, while the majority is correct that the owner in *Westport Taxi Service, Inc.,* properly was allowed to testify that a fair rate of return on a taxi business would be 10 to 12 percent, the trial court "applied this rate of return to *its own calculations of the plaintiff's lost profits* and concluded that the plaintiff's value was $ 150,000." (Emphasis added.) *Id., 34*. Put another way, the award for lost value of business was based on calculations made from the "sufficient evidence" of lost profits presented by the plaintiff; *id., 32*; evidence that is completely absent in the present case.

[*74]** Moreover, in other cases this court has found that awards for lost profits were not proved to a reasonable certainty, despite the fact that the plaintiff had presented more significant evidence than was presented by the plaintiff in the present case. See, e.g., *Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 247 Conn. 68* (vacating trial court's award of $ 15.9 million in lost profits for prospective period of twelve years because not proved to reasonable certainty where testimony from plaintiff's expert on future sales **[*664]** of franchises too speculative to support award); *Gargano v. Heyman, 203 Conn. 616, 620, 525 A.2d 1343 (1987)* (despite fact that "to support his claim for damages, the plaintiff offered his 1983 and 1984 federal income tax returns and testimony concerning an offer to purchase his business," this court affirmed state trial referee's finding that plaintiff had failed to prove lost profits to reasonable certainty); *West Haven Sound Development Corp. v. West Haven, 201 Conn. 305, 324-27, 514 A.2d 734 (1986)* (despite fact that expert was certified public accountant, university professor **[***75]** and had coauthored college textbook on securities analysis and business valuation, award based on present value of future profits vacated because expert used faulty calculations and assumptions;); *Gordon v. Indusco Management Corp., 164 Conn. 262, 275-76, 320 A.2d 811 (1973)* (evidence that similar business had grossed "$ 175,000 and had net profit of 12 percent of gross receipts" insufficient to support $ 21,000 award for lost profits because plaintiff had more expenses to subtract from gross revenue than other business had).

This court has stated that "[a] damage theory may be based on assumptions so long as the assumptions are reasonable in light of the record evidence." (Internal quotation marks omitted.) *Beverly Hills Concepts, Inc. v. Schatz & Schatz, Ribicoff & Kotkin, supra, 247 Conn. 70*. I continue to adhere to the sentiments expressed in that statement. As the foregoing discussion illustrates, however, this court consistently has required a higher level of "record evidence" to support an award for lost profits than that which was submitted in the present case. The majority's conclusion therefore represents a significant departure **[***76]** from our prior cases.

I recognize that my conclusion would mean that the defendant, whose antitrust violations caused the plaintiff's harm, would escape virtually unscathed. Although troubling, "this outcome is a direct result of the plaintiff's **[*665]** choice of evidence." *Id., 78*. As the trial court aptly noted, "if the expense **[**1095]** figures had been preserved and presented at trial, it would have been possible for the jury to have a nonspeculative basis to determine lost profits. . . . Without that evidence, there can be no reasonable basis for the jury's determination of lost profits."

I therefore respectfully dissent, and would affirm the judgment of the trial court granting the defendant's motion to set aside the verdict on the ground that the plaintiff failed to prove lost profits to a reasonable certainty.

Next Generation Realty, Inc. v. Iowa Realty Co.

Supreme Court of Iowa

September 1, 2004, Filed

No. 84 / 03-0470

Reporter
686 N.W.2d 206 *; 2004 Iowa Sup. LEXIS 253 **; 2004-2 Trade Cas. (CCH) P74,538

NEXT GENERATION REALTY, INC., an Iowa Corporation, and HOMEBUYERS CONSULTANTS, an Iowa Corporation, Appellants, vs. IOWA REALTY COMPANY, INC., an Iowa Corporation d/b/a IOWA REALTY, FIRST REALTY, LTD., an Iowa Corporation d/b/a FIRST REALTY, MIDAMERICAN ENERGY HOLDINGS COMPANY, an Iowa Corporation, and DES MOINES AREA ASSOCIATION OF REALTORS, an Iowa Nonprofit Corporation, Appellees.

Prior History: [1]** Appeal from the Iowa District Court for Polk County, Glenn E. Pille, Judge. Appeal from dismissal of antitrust suit brought under Iowa Code chapter 553.

Summary judgment is appropriate only when there is no genuine issue of material fact and the moving party is entitled to judgment as a matter of law.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN2[] **Injunctions, Preliminary & Temporary Injunctions**

Temporary injunctions, by their very nature, are preliminary and thus do not contribute to any determination of facts in dispute.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN3[] **Private Actions, Remedies**

Without an antitrust injury, the provisions of Iowa Code ch. 553 (2003) do not apply.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN4[] **Public Enforcement, State Civil Actions**

Iowa Code § 533.2 (2003) provides that Iowa Code ch. 533 (2003) is to be construed to complement and be harmonized with the applied laws of the United States which have the same or similar purpose, and shall be made to achieve uniform application of the state and federal laws prohibiting monopolistic practices.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Torts > Business Torts > Unfair Business Practices > Remedies

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN5[] **Private Actions, Remedies**

Until a monopolistic act impacts on the public's access to a competitive market, the injured are left to proceed with traditional tort or contract remedies. Iowa Code ch. 553 (2003) simply does not provide a remedy for a private wrong.

Counsel: Glenn L. Norris and George F. Davison, Jr. of Hawkins & Norris, P.C., Des Moines; Christopher T. Cook of Wandro, Lyons & Baer, P.C., Des Moines; and Dennis C. Schemmel of Schemmel Law Offices, P.C., Des Moines, for appellants.

John D. French and Amy M. Gernon of Faegre & Benson LLP, Minneapolis, MN; Mark McCormick of Belin Lamson McCormick Zumbach & Flynn, A P.C., Des Moines; and Kimberly J. Walker and Chad R. Anderson of Faegre & Benson LLP, Des Moines, for appellees Iowa Realty Company, Inc., First Realty, Ltd., and MidAmerican Energy Holdings Company.

F. Richard Lyford and Joan M. Fletcher of Dickinson, Mackaman, Tyler & Hagen, P.C., Des Moines, for appellee Des Moines Area Association of Realtors.

Judges: All justices concur except Ternus and Wiggins, JJ., who take no part. This opinion shall be published.

Opinion

[*207] PER CURIAM.

This antitrust suit was dismissed on summary judgment, [1] and the plaintiffs have appealed, vigorously contending there are material facts very much in dispute. There is some **[**2]** attraction to this contention because the parties certainly disagree on matters relating to the disputed issues. The dismissal was nevertheless correct because a controlling legal principle in the field of ***antitrust law*** renders the disputed issues irrelevant. [2] So we affirm.

[3]** Defendants, Iowa Realty Company, Inc. and First Realty (Iowa Realty defendants), are real estate brokerage firms that do business in the Des Moines area. Iowa Realty purchased First Realty in 1995. Now both firms are wholly owned by Home Services of America, Inc., which is wholly owned by MidAmerican Energy Holding Company. Customarily, Des Moines realtors charge a 7% commission for selling previously owned homes: half going to the seller's agent, half to the buyer's.

The Iowa Realty defendants are members of defendant Des Moines Area Association of Realtors (DMAAR). DMAAR is a professional association of real estate agencies that offers members the Multiple Listing Service (MLS). This service provides **[*208]** a vehicle for listing and selling residential real estate.

Plaintiff, Next Generation Realty, Inc. (Next Generation), is a real estate broker in the Des Moines area. Although Next Generation was a DMAAR member through 2001, it seldom used the MLS for its clients' listings; Next Generation used the MLS for only 2% of its sales. Instead, Next Generation relied on "office exclusive" listings, which are not accessible to other MLS participants. This was part of Next Generation's business **[**4]** strategy, and it advertised that not using the MLS saved its customers money. Plaintiff Homebuyer's Consultants, which operated only during 1998, offered services to buyers on a negotiated-fee basis. Because it did not represent sellers, it did not contribute a single listing on the MLS.

DMAAR requires that members report office exclusive listings within forty-eight hours of posting. This way all members can obtain accurate information concerning the status of properties, even though other brokers cannot sell office-exclusive listings. In March 2000 DMAAR set its fee for exclusive listings at $ 35, which covered DMAAR's expenses. Next Generation protested, claiming the fee was highly prejudicial because it dealt almost entirely with exclusive listings.

Next Generation did not report its office exclusive listings to DMAAR, resulting in delinquent fees totaling $ 20,160. On September 11, 2001, the DMAAR board voted to suspend Next Generation's MLS privileges until its past-due fees (which by then totaled $ 36,120) were paid in full. Next Generation did not pay the fees and was expelled.

On October 30, 2001, DMAAR elected its officers and directors for 2002. Iowa Realty agents received **[**5]** enough votes to form a majority of the board, but those elected did not assume their positions until 2002.

Plaintiffs' claims are grounded in two Iowa statutes. Under *Iowa Code section 553.4* (2003), they claim Iowa Realty defendants conspired to take control of DMAAR through an unorthodox election and conspired to expel plaintiffs from DMAAR and its MLS. They append an assertion to this claim to allege horizontal price-fixing. The claim under

---

[1] ***HN1***[] Summary judgment is appropriate only when there is no genuine issue of material fact and the moving party is entitled to judgment as a matter of law. *Schoff v. Combined Ins. Co., 604 N.W.2d 43, 45 (Iowa 1999)*. *See generally* *Iowa R. Civ. P. 1.981*.

[2] The same dispute was involved in our opinion in *Max 100 L.C. v. Iowa Realty Co., 621 N.W.2d 178 (Iowa 2001)*, in which we reversed the granting of the temporary injunction. Following remand, the district court conducted a hearing, reviewed extensive discovery taken following the remand, and made extensive findings, which these plaintiffs urge for our consideration. We, however, find those findings of scant relevance here. The hearing on a temporary injunction is preliminary, and the one here was made irrelevant when we ordered it vacated in the prior decision. ***HN2***[] Temporary injunctions, by their very nature, are preliminary and thus do not contribute to any determination of facts in dispute. *Econ. Roofing & Insulating Co. v. Zumaris, 538 N.W.2d 641, 648 (Iowa 1995)*. It would be especially inappropriate to factor the temporary-injunction evidence ruling here. Since it was entered, parties have been added and dropped, and extensive discovery has been undertaken. We base our review on the record made since then.

Iowa Code section 553.5 is that defendants engaged in a monopolistic practice by refusing to share MLS real estate commissions with them.

The trial court dismissed the petition on alternative grounds. In affirming the dismissal though, we need consider only one. There was no antitrust injury, and ***HN3***[] without an antitrust injury, the provisions of *Iowa Code chapter 553* do not apply.

I. In adopting *Iowa Code chapter 553*, the legislature left us without authority to innovate from the federal courts' understanding of federal ***antitrust law***. In the preliminary appeal involved in this dispute, we again pointed out that *Iowa Code section 553.2* ***HN4***[] provides that the chapter is to **[**6]** be "'construed to complement and be harmonized with the applied laws of the United States which have the same or similar purpose,' and 'shall be made to achieve uniform application of the state and federal laws prohibiting . . . monopolistic practices.'" *Max 100 L.C. v. Iowa Realty Co., 621 N.W.2d 178, 182 (2001)* (quoting *Iowa Code § 553.2*).

The authorities we are obliged to follow make it clear that antitrust laws were not intended to deal with claimed wrongs inflicted on individual parties. Their function is only to foster the public's access to a freely competitive market. Antitrust is in place to protect the market, not any individual merchant doing business there. The marketplace is often unfair, **[*209]** sometimes brutal; sometimes tortious acts take place there. *Chapter 553* presupposes all this. But, ***HN5***[] until an act impacts on the public's access to a competitive market, the injured are left to proceed with traditional tort or contract remedies. *Iowa Code chapter 553* simply does not provide a remedy for a private wrong. Cases holding this include *Dial A Car, Inc. v. Transportation, Inc., 317 U.S. App. D.C. 240, 82 F.3d 484, 486-87 (D.C. Cir. 1996)*; **[**7]** *National Ass'n of Review of Appraisers & Mortgage Underwriters, Inc. v. Appraisal Foundation, 64 F.3d 1130, 1135 (8th Cir. 1995)*; *Products Liability Insurance Agency, Inc. v. Crum & Forster Insurance Cos., 682 F.2d 660, 663-64 (7th Cir. 1982)*.

The record here contains no hint that the public was inhibited from access to services of real estate brokers. The proofs are unanimous to the contrary. Iowa Realty's share of the local market decreased from 71.7% in 1996 to 61.5% in 2001, roughly a 10% decline. Next Generation's market share was 2.6% in 1999, and is projected at 6.2% by 2006. There were fifty-one Des Moines real estate agencies in 1996, and the same number in 2001. Of those fifty-one firms in 2001, twenty were recent entrants, after 1996. Plaintiffs' own growth during the period has been remarkable.

In resisting the assertion that the market had been adversely affected by the wrongs plaintiffs assert, the defendants offered an impressive analysis by a highly qualified expert in the field. He supported his opinion with a careful statistical analysis. Although plaintiffs think otherwise, the issue was not joined on the question when plaintiffs **[**8]** offered the anecdotal evidence of one witness, unsupported by any statistical data. She elected not to enter the Des Moines real estate business because of defendants' conduct.

II. The trial court correctly rejected plaintiffs' price-fixing contention because that contention lacked any support in the record. Although MLS participants typically apply a commission rate of 7%, there is no evidence that the information exchanged through MLS participation causes or induces MLS participants to always charge and subsequently split the 7% commission rate on sold properties. The practice of splitting a 7% commission was established many years ago in the Des Moines business community, and there is no suggestion that the defendants in any way took part in originating the practice or furthering its continuance.

The petition was correctly dismissed.

AFFIRMED.

All justices concur except Ternus and Wiggins, JJ., who take no part.

This opinion shall be published.

HN1[] **Standards of Review, De Novo Review**

An appellate court reviews de novo a district court's decision to grant summary judgment in the moving party's favor, construing all the facts and inferences in favor of the non-moving party.

Torts > ... > Defamation > Elements > General Overview

Torts > Intentional Torts > Defamation > General Overview

HN2[] **Defamation, Elements**

A defamatory statement is one that tends to cause such harm to the reputation of another that it lowers that person in the eyes of the community or deters third persons from associating with him. To make out a defamation claim under Illinois law, a plaintiff must show that the defendant made a false statement concerning him, that there was an unprivileged publication to a third party with fault by the defendant, which caused damage to the plaintiff.

Torts > Intentional Torts > Defamation > Defamation Per Se

Torts > Intentional Torts > Defamation > General Overview

HN3[] **Defamation, Defamation Per Se**

Defamatory statements may be actionable per se or actionable per quod. Illinois courts have recognized four categories of statements that are considered defamatory per se: (1) words that impute the commission of a crime; (2) words that impute infection with a loathsome disease; (3) words that impute an inability to perform or a want of integrity in the discharge of duties of office or employment; or (4) words that prejudice a party, or impute lack of ability, in his or her trade, profession, or business. If a statement qualifies as defamatory per se, it is unnecessary for a plaintiff to demonstrate actual damage to reputation. Rather, statements that fall within these per se categories are thought to be so obviously and materially harmful to the plaintiff that injury to its reputation may be presumed. In contrast, with a per quod action, in order to recover the plaintiff must plead and prove that it sustained actual damage of a pecuniary nature ("special damages").

Torts > Intentional Torts > Defamation > Defamation Per Se

Torts > Intentional Torts > Defamation > General Overview

Torts > Intentional Torts > Defamation > Procedural Matters

HN4[] **Defamation, Defamation Per Se**

Under the Illinois innocent construction rule, even a statement that falls into one of the limited per se categories will not be found defamatory per se if it is "reasonably capable of an innocent construction." This rule requires courts to consider a written or oral statement in context, giving the words, and their implications, their natural and obvious meaning. If a statement may reasonably be interpreted innocently, it cannot be actionable per se. However, the Illinois courts have firmly emphasized that only reasonable innocent constructions will remove an allegedly defamatory statement from the per se category. Whether a statement is reasonably capable of an innocent construction is a question of law for the court to decide.

Torts > ... > Defenses > Privileges > General Overview

HN5[] **Defenses, Privileges**

A number of common law privileges and defenses exist that may shield a defendant from liability for making another wise defamatory statement.

Torts > ... > Defamation > Defenses > Fair Comment & Opinion

Torts > ... > Defenses > Privileges > General Overview

HN6[] Defenses, Fair Comment & Opinion

A statement that does not contain any verifiable facts (as some call, "an opinion") is not actionable under Illinois law. In Illinois, a statement of fact is not shielded from an action for defamation by being prefaced with the words 'in my opinion, but if it is plain that the speaker is expressing a subjective view, an interpretation, a theory, conjecture, or surmise, rather than claiming to be in possession of objectively verifiable facts, the statement is not actionable.

Torts > ... > Defamation > Defenses > Fair Comment & Opinion

Torts > ... > Defenses > Privileges > General Overview

Torts > ... > Defamation > Defenses > Truth

HN7[] Defenses, Fair Comment & Opinion

Substantial truth is a complete defense to an allegation of defamation. This rule derives from the recognition that falsehoods which do no incremental damage to the plaintiff's reputation do not injure the only interest the law of defamation protects.

Torts > ... > Defenses > Privileges > General Overview

HN8[] Defenses, Privileges

Under Illinois law, publication of defamatory matters in a report of an official proceeding that deals with a matter of public concern is privileged as long as the report is accurate and complete.

Torts > ... > Defenses > Privileges > General Overview

HN9[] Defenses, Privileges

Illinois law confers a privilege upon "statements made within a legitimate business context." Under this rule, a statement is conditionally privileged when the defendant makes it (1) in good faith; (2) with an interest or duty to be upheld; (3) limited in scope to that purpose; (4) on a proper occasion; and (5) published in a proper manner only to proper parties.

Constitutional Law > ... > Freedom of Speech > Defamation > General Overview

Torts > ... > Defenses > Privileges > Constitutional Privileges

Constitutional Law > Bill of Rights > Fundamental Freedoms > General Overview

Torts > Intentional Torts > Defamation > General Overview

Torts > Intentional Torts > Defamation > Procedural Matters

HN10[] **Freedom of Speech, Defamation**

The *First Amendment* imposes limits on state defamation law. However, a court must first examine the threshold question of whether the challenged statements are actionable under state law; if they are not, the *First Amendment* does not come into play.

Constitutional Law > ... > Freedom of Speech > Defamation > Public Figures

Torts > ... > Defenses > Privileges > Constitutional Privileges

Constitutional Law > Bill of Rights > Fundamental Freedoms > General Overview

Constitutional Law > ... > Freedom of Speech > Defamation > General Overview

Torts > ... > Defamation > Public Figures > Voluntary Public Figures

HN11[] **Defamation, Public Figures**

Federal constitutional law adds another layer of limitations on the kind of defamatory statements for which a defendant may be found liable. At common law, defamation was a strict liability tort, but constitutional doctrine has imposed culpability, or fault, requirements in most cases. The level of culpability is determined by whether the statement was of public concern and whether the plaintiff is a public or private figure. Moreover, overlapping with the common law rule, the *First Amendment* protects statements on matters of public concern that are not provably false.

Civil Procedure > ... > Summary Judgment > Appellate Review > Appealability

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN12[] **Appellate Review, Appealability**

The United States Court of Appeals for the Seventh Circuit has long refused to consider arguments that were not presented to the district court in response to summary judgment motions. Appellate review is not designed to serve as an unsuccessful party's second bite at the apple -- an opportunity to raise issues and arguments that were not brought forth below. This is so even when the issue is an element of a plaintiff's prima facie case.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

Criminal Law & Procedure > Juries & Jurors > Province of Court & Jury > Sentencing Issues

HN13[] **Reviewability of Lower Court Decisions, Preservation for Review**

Issues and arguments which were not raised before the district court cannot be raised for the first time on appeal. The rule is essential in order that parties may have the opportunity to offer all the evidence they believe relevant to the issues and in order that litigants may not be surprised on appeal by final decision there of issues upon which they have had no opportunity to introduce evidence. To reverse the district court on grounds not presented to it would undermine the essential function of the district court. This rule is not meant to be harsh, overly formalistic, or to punish careless litigators. Rather, the requirement that parties may raise on appeal only issues which have been presented to the district court maintains the efficiency, fairness, and integrity of the judicial system for all parties.

Torts > ... > Defamation > Defenses > Fair Comment & Opinion

Torts > Intentional Torts > Defamation > General Overview

HN14[] **Defenses, Fair Comment & Opinion**

Prefacing a defamatory statement with the phrase "in my opinion" does not shield a defendant from liability, and the same is true for presenting a defamatory statement under a list of "concerns." Prefatory language does not control whether these statements are actionable as defamation; what matters is whether the assertions are verifiably false.

Torts > Intentional Torts > Defamation > General Overview

HN15[] **Intentional Torts, Defamation**

Illinois courts (and federal courts when interpreting Illinois law) have been quick to find implications of criminal conduct or of employee or business misconduct in statements that might have seemed susceptible of an interpretation that would have taken them out of the per se categories.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN16[] **Federal & State Interrelationships, Erie Doctrine**

As a federal court sitting in diversity, the United States Court of Appeals for the Seventh Circuit is obligated to apply Illinois law as announced by the Illinois Supreme Court. In circumstances where a state supreme court has not issued a ruling on the issue presented, the rulings of the intermediate court control, unless there is a persuasive indication that the highest court would decide the issue differently.

Torts > ... > Defamation > Defenses > Fair Comment & Opinion

Torts > ... > Defenses > Privileges > General Overview

HN17[] **Defenses, Fair Comment & Opinion**

The United States Court of Appeals for the Seventh Circuit is confident that if presented with the issue, the Illinois Supreme Court would determine that the common law defamation privilege may not be self-conferred. It is significant that the Illinois Supreme Court has adopted the official proceeding privilege, and commentary on that privilege provides that a person cannot confer this privilege upon himself by making the original defamatory publication himself and then reporting to other people what he had stated. This is true whether the original publication was privileged or not.

Torts > ... > Defenses > Privileges > General Overview

Torts > Intentional Torts > Defamation > General Overview

HN18[] **Defenses, Privileges**

The test under the innocent construction rule is objective: it asks whether there is an objectively reasonable innocent interpretation of the allegedly defamatory statements.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

HN19[] **Standards of Review, Abuse of Discretion**

An appellate court reviews a district court's remittitur decision for an abuse of discretion.

Torts > Remedies > Damages > General Overview

Torts > Intentional Torts > Defamation > General Overview

Torts > ... > Defamation > Remedies > General Overview

HN20[] **Remedies, Damages**

By definition, presumed damages are speculative in nature, and this limitation on presumed damages protects a defamation defendant from being subjected to an astronomical award based upon a jury's guess about the plaintiff's unproven harm. Illinois law requires an appellate court to give some deference to the jury's determination of presumed damages while also considering whether it considers the jury award of presumed damages excessive. If it finds the award excessive, the court may exercise discretion and reduce the award to what it considers a more appropriate figure.

Torts > Remedies > Damages > General Overview

Torts > Intentional Torts > Defamation > General Overview

Torts > ... > Defamation > Remedies > General Overview

HN21[] **Remedies, Damages**

In a case lacking proof of economic injury and where the defamatory statements were publicized to a relatively limited audience, it would be inappropriate to award presumed damages that are exponentially greater than have been awarded in past cases. While under the doctrine of presumed damages a party is not required to show specific loss, there must be some meaningful limit on the magnitude of a jury award when it is arrived at by pure speculation. Presumed damages serve a compensatory function -- when such an award is given in a substantial amount to a party who has not demonstrated evidence of concrete loss, it becomes questionable whether the award is serving a different purpose.

Torts > ... > Types of Damages > Punitive Damages > General Overview

HN26[] Damages, Punitive Damages

Under Illinois law, three factors are particularly relevant in analyzing the amount of a punitive damages award: (1) the nature and enormity of the wrong, (2) the financial status of the defendant, and (3) the potential liability of the defendant resulting from multiple claims.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN27[] Relevant Market, Geographic Market Definition

There are some circumstances where to establish a violation of antitrust laws it is unnecessary to prove that defendant wielded market power in a properly defined product and geographic market, and may rely instead on direct evidence of anticompetitive effects.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN28[] Regulated Practices, Market Definition

Horizontal agreements are illegal per se. Unlike horizontal agreements between competitors, vertical exclusive distributorships are presumptively legal. Rather than condemning exclusive dealing, courts often approve them because of their procompetitive benefits.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN29[] **Price Fixing & Restraints of Trade, Vertical Restraints**

As horizontal agreements are generally more suspect than vertical agreements, courts must be cautious about importing relaxed standards of proof from horizontal agreement cases into vertical agreement cases. To do so might harm competition and frustrate the very goals that ***antitrust law*** seeks to achieve.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN30[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Neither Toys "R" Us nor Indiana Federation of Dentists allows an antitrust plaintiff to dispense entirely with market definition. Rather, these cases stand for the proposition that if a plaintiff can show the rough contours of a relevant market, and show that the defendant commands a substantial share of the market, then direct evidence of anticompetitive effects can establish the defendant's market power--in lieu of the usual showing of a precisely defined relevant market and a monopoly market share.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN31[] **Relevant Market, Geographic Market Definition**

In antitrust cases, economic analysis is virtually meaningless if it is entirely unmoored from at least a rough definition of a product and geographic market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN32[] **Regulated Practices, Market Definition**

The relevant market has both a product and a geographic dimension.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN33[] **Regulated Practices, Market Definition**

Identifying a geographic market requires both careful selection of the market area in which the seller operates and to which the purchaser can practicably turn for supplies.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN34[] Regulated Practices, Market Definition

Contracts represent transactions that have occurred within the market. The question of what transactions have occurred in the market is subsequent to and therefore irrelevant to the definition of the market itself.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

Civil Procedure > ... > Relief From Judgments > Additur & Remittitur > General Overview

Civil Procedure > ... > Relief From Judgments > Additur & Remittitur > Remittiturs

Civil Procedure > Appeals > Remands

HN35[] Reviewability of Lower Court Decisions, Preservation for Review

An order that offers a choice between a remitted award and a new trial is not a final decision, and if a plaintiff agrees to accept the reduced judgment in the trial court, that plaintiff may not later argue that the jury's verdict should be reinstated on appeal. However, if the plaintiff declines to accept the reduced award, no appeal may be taken until after a new trial.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

Civil Procedure > ... > Relief From Judgments > Additur & Remittitur > General Overview

Civil Procedure > ... > Relief From Judgments > Additur & Remittitur > Remittiturs

Civil Procedure > Appeals > Remands

HN36[] Reviewability of Lower Court Decisions, Preservation for Review

Ash suggests that a plaintiff may expedite appeal by taking "a pratfall" on a new trial, meaning that the plaintiff can accept defeat in the second trial by failing to put up a real fight and then appeal seeking reinstatement of the first jury's verdict. Ash explained that if a plaintiff cannot afford the same elaborate presentation it mustered the first time, or if the absence of witnesses undermines the case, then the plaintiff may do poorly -- but it has the first verdict to fall back on. A party electing the new-trial branch of the remittitur option may take a pratfall as quickly as it pleases, and thus expedite the appeal. Nowhere does Ash suggest that the Donovan may be completely circumvented by simply stipulating that a second trial would result in a judgment equal to the remitted award.

Judges: Before FLAUM, Chief Judge, and MANION and WILLIAMS, Circuit Judges.

Opinion by: FLAUM

Opinion

[*721] FLAUM, *Chief Judge*. This appeal involves the claims that two competing tobacco companies brought against one another -- one company suing for violation of antitrust laws, the other for defamation. North Atlantic Trading Co., Inc. ("North Atlantic") was upset when its efforts to engage new markets for its cigarette papers proved unsuccessful. It blamed its difficulties in cultivating new customers on the business practices of its competitor, Republic Tobacco Company ("Republic") and decided to sue. The hard feelings went both ways -- Republic became upset with North Atlantic after North Atlantic criticized Republic's business practices in two letters sent to customers. Claiming that it had been defamed (among other things), Republic also decided to sue.

The parties' dueling lawsuits were eventually consolidated into one case before the United States District Court for the Northern District of Illinois. At summary judgment, the district court considered **[**2]** both parties' multiple claims and counterclaims -- the only one to survive being Republic's defamation claim. Not only did it advance; it was successful at summary judgment. Following this judgment, a **[*722]** jury trial was held on the issue of damages, both presumed and punitive, for the defamation claim. The jury returned a verdict for $ 8.4 million in presumed damages and $ 10.2 million in punitive damages. The trial court granted North Atlantic's subsequent motion for remittitur, reducing the awards to $ 3.36 million and $ 4.08 million, respectively.

On appeal, North Atlantic seeks review of: (1) the district court's decision to grant summary judgment to Republic on its defamation claim; (2) the remitted damage awards; and (3) the district court's decision to grant summary judgment to Republic on North Atlantic's antitrust claims. Republic cross-appeals the district court's refusal to entertain a procedure that might have enabled Republic to appeal the remittitur. For the reasons stated in this opinion, we affirm the district court's decisions with respect to Republic's defamation claim, North Atlantic's antitrust claims, and Republic's cross-appeal. On the issue of damages, we vacate **[**3]** the district court's award of presumed and punitive damages, and award to Republic $ 1 million in presumed damages and $ 2 million in punitive damages.

I. Background

Republic and North Atlantic are competitors in the market for premium roll-your-own ("RYO") cigarette papers, tobacco, and other tobacco-related products. Republic and North Atlantic sell their RYO products to distributors and wholesalers, who in turn resell the products to outlets such as convenience stores, drugstores, gas stations, and mini-marts. Republic's products are marketed under several brand names, including Job, Top, and Drum, while North Atlantic's products are marketed under the brand name Zig-Zag. North Atlantic's Zig-Zag has been the number-one selling domestic RYO cigarette paper brand since its introduction in the U.S. in 1938. North Atlantic estimates its domestic market share of cigarette paper is 49 percent or higher. Republic is the second largest supplier of cigarette paper, with a market share of approximately 25 percent. Robert Burton Associates ("RBA") is the third major competitor in the cigarette paper business.

In 1997, North Atlantic acquired an exclusive license to market and distribute **[**4]** the Zig-Zag brand of RYO papers in the United States. At this time, North Atlantic announced that it sought to challenge Republic's historic market dominance in the "Southeastern" United States -- a group of nine states where Republic's total market share is as much as 95 to 98 percent. Things did not go according to North Atlantic's plan and the company experienced some difficulty in penetrating this market. Republic asserts that NorthAtlantic's disappointing sales growth in these states was the product of simple market economics, principally Republic's lower pricing and superior marketing strategy.

In contrast, North Atlantic claims that its sales difficulties were caused, in part, by Republic's unfair and unlawful business practices. North Atlantic believed Republic to be violating antitrust and unfair competition laws by pursuing enhanced exclusivity agreements through its incentive programs for distributors and retailers. North Atlantic also claims that it believed Republic was violating trademark and unfair competition laws by defacing Zig-Zag display boxes. [1]

[5] [*723] A. Disputed Statements**

Naturally, in the course of business relations, North Atlantic and Republic sent letters to their customers. Statements contained in two letters sent from North Atlantic representatives to North Atlantic customers or potential customers that were critical of Republic's business practices form the basis of Republic's defamation suit. The first letter (the "Czerewko Letter") was sent to a potential customer in the course of North Atlantic and Republic's battle for retail outlets. The second letter (the "August 13 Letter") was sent to North Atlantic customers shortly after North Atlantic filed its lawsuit against Republic.

1. Czerewko Letter

In January 1998, North Atlantic Regional Manager John Czerewko sent a letter to a customer attacking the integrity of Republic's business conduct and accusing Republic of engaging in inappropriate activity with respect to the plastic display boxes. In late 1997, Clark Oil, one of the largest convenience store chains in the Midwest, elected to stock and sell Republic's products exclusively. Czerewko was involved in a North Atlantic campaign to convince Clark to drop its exclusivity with Republic. North Atlantic **[**6]** offered $ 95,000 in promotional money to Clark if it agreed to sell North Atlantic products, however this offer was less lucrative than the $ 110,000 offer Clark received from Republic.

In the course of courting this potential client, Czerewko wrote a one-page letter to Clark buyer Sanjiv Jain discussing Republic's competing proposal for exclusivity as well as the modifications to the display boxes. Czerewko wrote, "Frankly, I have some concerns not only with the Exclusivity proposal, the rationale, the Cigarette Paper category, but also for Clark in long term consequences." Below this sentence, are two boldface headings ("**The Republic Proposal for exclusivity**" and "**Similarity of Display Units**"), each with a series of bullet-points underneath. According to Republic and the district court, the defamatory statements in the Czerewko Letter consist of the following three sentences located under the "**Similarity of Display Units**" heading:

> . Recently, another Chain was positioned for exclusivity and a modified, defaced Zig Zag unit was used. We own the patent-trademark which has been violated.
>
> . Our Attorneys initiated legal action regarding this and had to **[**7]** include the Chain in the Trademark-Patent violation.

Republic contends that these statements were false and defamatory because North Atlantic held no patent or trade-mark rights in the boxes and had not initiated litigation against anyone in connection with the display boxes.

After receiving the Czerewko Letter, Clark forwarded it to Clark's supplier, Eby-Brown, which buys products directly from Republic and distributes them to retailers. Thereafter, Eby-Brown discontinued its participation in Republic's incentive programs. Clark subsequently discontinued its participation in Republic's incentive program as well.

2. August 13 Letter

---

[1] Plastic display boxes were used to package RYO papers sold by North Atlantic in limited promotional runs. Customers received the display boxes along with their purchase of the products inside. Some of Republic's customers wanted to use the boxes to display and sell Republic's cigarette papers. To meet this demand, Republic obtained unused boxes from third-party distributors and then re-labeled the boxes with its own labels, restocked the boxes with its products, and made them available to customers upon request.

In June 1998, Republic filed this defamation action, a few days after Clark cancelled its exclusive contract. Two weeks later, North Atlantic filed a second suit in the U.S. District Court for the Western **[*724]** District of Kentucky, alleging unfair competition, deceptive trade practices, and antitrust violations. On August 13, 1998, North Atlantic sent a letter to all of its customers -- many of whom were also customers of Republic -- explaining that North Atlantic had filed a lawsuit against Republic, charging Republic with "unfair competition, **[**8]** deceptive trade practices and antitrust violations." The letter went on to describe the substance of these allegations as follows:

> The complaint alleges that Republic Tobacco's exclusivity agreements, rebates, incentive programs, buybacks and other activities violate federal and state antitrust and unfair competition laws. The complaint charges that Republic Tobacco entered into contracts, combinations, and conspiracies in illegal restraint of trade and has attempted to illegally monopolize, and has illegally monopolized, the roll-your-own ("RYO") cigarette paper market in the southeast United States.
>
> The complaint also alleges that Republic Tobacco has defaced and directed others to deface North Atlantic's and National Tobacco's vendor displays for ZIG-ZAG tm RYO cigarette papers. On many of these vendors, the ZIG-ZAG tm brand name has been covered up with an advertisement for JOB tm, TOP tm, and other Republic Tobacco RYO cigarette brands. The lawsuit alleges that these activities violate North Atlantic's and National Tobacco's rights and constitute unfair competition under federal and state law.

Republic responded to the August 13 Letter with a letter of its own, calling **[**9]** North Atlantic's claims "frivolous," and asserting that they "were raised solely for the purpose of fulfilling [North Atlantic's] published business plan to increase revenue of the Zig Zag products primarily through price increases." (internal quotations omitted).

B. Incentive Programs

North Atlantic's antitrust claims, as described in the August 13 Letter, are premised on Republic's alleged attempts to foreclose competition in the nine-state "Southeast" region through its incentive programs. The nine-state region, as defined by North Atlantic's economist, includes the states east of the Mississippi River and south of the Ohio River: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia (collectively the "Southeast"). Historically, Republic's brands have been tremendously popular in each of these nine states.

Republic's incentive programs allowed participating customers to receive rebates, free products, and free travel in exchange for stocking or promoting specified amounts of Republic's RYO products and meeting certain sales goals. [2] Program participants could enhance rebate and travel benefits by electing to sell **[**10]** Republic's brands of cigarette paper exclusively. These programs lasted for one year or less and were all terminable at will.

North Atlantic contends that Republics' incentive programs had the result of foreclosing North Atlantic products from the shelves of 46 percent of convenience stores **[*725]** in the Southeast, effectively eliminating choice in the region. Republic counters that its practices are not anticompetitive and its success in these states is due to its procompetitive incentive-based marketing strategy and its offering low, steady **[**11]** prices on its products at a time when North Atlantic raised its prices by more than 15 percent.

C. Proceedings Below

Once served with the complaint in this case, North Atlantic sought to transfer this case to Kentucky, or to stay proceedings pending resolution of its Kentucky lawsuit, but the district court refused. North Atlantic then filed

---

[2] The Republic Value-Added Rebate Incentive Program ("VRIP") provides incentives to distributors for stocking, promoting, and selling Republic's products to their retail accounts. Republic's Convenience Store Distribution Incentive Program ("CDIP") provides discounts to convenience stores to stock, promote, and sell Republic's products. The Republic Travel Plus Program, open to both distributors and convenience stores, offers "points" to be used toward trips, such as cruises.

counter-claims against Republic in the court below, including the same antitrust claim presented in the Kentucky action. Accordingly, the case proceeded below, and the Kentucky court suspended the action.

Following extensive fact and expert discovery, the parties filed cross-motions for summary judgment. In its summary judgment order, the district court considered Republic's six-count Seconded Amended Complaint and North Atlantic's ten-count amended counterclaim. The district court granted Republic's motions with respect to all of North Atlantic's claims. With respect to the antitrust counterclaims, the court held that a determination of the relevant market was a necessary element of each count brought by North Atlantic. Although the court acknowledged that the definition of a relevant market is a question of fact and that the parties **[**12]** disagreed on the relevant geographic market, the court found that there was no evidence to support a definition of the nine-state Southeast as the relevant geographic market. The district court found that there was no doubt that Republicand North Atlantic operated in a nationwide market and that their purchasers, i.e., distributors and wholesalers, turn to suppliers across the nation for RYO papers. As NorthAtlantic did not argue that Republic monopolized, attempted to monopolize, unreasonably restrained trade in, or foreclosed competition in the national market for RYO papers, the district court granted summary judgment on each of North Atlantic's antitrust counterclaims.

In the same order, the district court granted Republic's motion for summary judgment on its defamation claim, holding that North Atlantic was liable for defamation *per se* as a matter of law in light of (1) the statements in the Czerewko Letter that "we own the patent-trademark which has been violated," and "our Attorneys initiated legal action regarding this and had to include the Chain in Trademark-Patent violation," and (2) the statements in the August 13 Letter describing North Atlantic's Kentucky lawsuit **[**13]** allegations. According to the court, these statements were false assertions about Republic, were unprivileged, and were defamatory *per se* because they attacked the integrity of Republic's business conduct, prejudiced Republic in its business, and with respect to the August 13 Letter, accused Republic of illegal conduct.

Following the court's order, a jury trial was held to assess presumed and punitive damages on Republic's defamation claim. At trial, Republic introduced evidence to show that its reputation had been harmed by North Atlantic's statements. Three witnesses testified that after the August 13 Letter was sent, Republic received phone calls from its salesmen and from dozens of customers indicating that customers thought less of Republic, were concerned that they had been "dragged [] into illegal conduct," and were wary of further participation in Republic's incentive programs. Republic's President, Donald Levin, testified that reputation is important in the **[*726]** small, closely regulated tobacco industry and that Republic had built strong business relationships and a good reputation over the years. Absent from Republic's presentation was evidence that any customer reduced **[**14]** purchases or severed business relations with Republic as a direct result of North Atlantic's actions.

After a three-day trial, the jury returned a verdict in Republic's favor of $ 8.4 million in presumed damages and$ 10.2 million in punitive damages. Upon North Atlantic's motion, the district court remitted these awards by 60 percent, to $ 3.36 million and $ 4.08 million, respectively. The court then gave Republic the option of accepting the remittiturs or facing a new trial. Republic accepted the remittiturs. We now consider both parties' appeals.

II. Analysis

A. Defamation

HN1[] We review *de novo* the district court's decision to grant summary judgment in Republic's favor, construing all the facts and inferences in favor of North Atlantic. *See* *Vision Fin. Group, Inc. v. Midwest Family Mut. Ins. Co., 355 F.3d 640, 642 (7th Cir. 2004)*.

HN2[] A defamatory statement is one that "tends to cause such harm to the reputation of another that it lowers that person in the eyes of the community or deters third persons from associating with him." *Kolegas v. Heftel Broad. Corp., 154 Ill. 2d 1, 607 N.E.2d 201, 206, 180 Ill. Dec. 307 (Ill. 1992)* (citing **[**15]** *Restatement (Second) of Torts § 599* (1977)). To make out a defamation claim under Illinois law, the plaintiff must show "that the defendant[]made a false statement concerning him, that there was an unprivileged publication to a third party with fault by the defendant, which caused damage to the plaintiff." Krasinski v. United Parcel Serv., Inc., 124 Ill. 2d 483, 530 N.E.2d 468, 471, 125 Ill. Dec. 310 (Ill. 1988)(citing Restatement (Second) of Torts § 588 (1977)).

HN3[] Defamatory statements may be actionable *per se* or actionable *per quod*. Illinois courts have recognized four categories of statements that are considered defamatory *per se*: (1) words that impute the commission of a crime; (2) words that impute infection with a loathsome disease; (3) wordsthat impute an inability to perform or a want of integrity in the discharge of duties of office or employment; or (4) wordsthat prejudice a party, or impute lack of ability, in his or her trade, profession, or business. *See* Kolegas, 607 N.E.2d at 206. If a statement qualifies as defamatory *per se* (the theory **[**16]** upon which Republic solely relies), it is unnecessary for a plaintiff to demonstrate actual damage to reputation. Rather, statements that fall within these *per se* categories are thought to be so obviously and materially harmful to the plaintiff that injury to its reputation may be presumed. *See* Owen v. Carr, 113 Ill. 2d 273, 497 N.E.2d 1145, 1147, 100 Ill. Dec. 783 (Ill. 1986). In contrast, with a *per quod* action, in order to recover the plaintiff must plead and prove that it sustained actual damage of a pecuniary nature ("special damages"). *See* Dubinsky v. United Airlines, 303 Ill. App. 3d 317, 708 N.E.2d 441, 447, 236 Ill. Dec. 855 (Ill. App.Ct. 1999). For further discussion of *per quod* actions see Bryson v. News America Publications, 174 Ill. 2d 77, 672 N.E.2d 1207, 1221, 220 Ill. Dec. 195 (Ill. 1996). **HN4**[] Under the Illinois innocent construction rule, even a statement that falls into one of the limited *per se* categories will not be found defamatory *per se* if it is "reasonably capable of an innocent construction." Kolegas, 607 N.E.2d at 206. This rule "requires courts to consider a written or oral **[**17]** statement in context, giving the words, and their implications, **[*727]** their natural and obvious meaning." Bryson, 672 N.E.2d at 1215. If a statement may reasonably be interpreted innocently, it cannot be actionable *per se*. *See id.* However, the Illinois courts have firmly emphasized that "only *reasonable* innocent constructions will remove an allegedly defamatory statement from the *per se* category." *Id.* (emphasis in original). Whether a statement is reasonably capable of an innocent construction is a question of law for the court to decide. *See* Kolegas, 607 N.E.2d at 207.

HN5[] A number of common law privileges and defenses exist that may shield a defendant from liability for making another wise defamatory statement. Four of these defenses and privileges, to varying degrees, are relevant to this appeal. First, **HN6**[] a statement that does not contain any verifiable facts (as some call, "an opinion") is not actionable under Illinois law. [3] In Illinois, "[a] statement of fact is not shielded from an action for defamation by being prefaced with the words 'in my opinion,' but if it is plain that the speaker is expressing a subjective view, an interpretation, **[**18]** a theory, conjecture, or surmise, rather than claiming to be in possession of objectively verifiable facts, the statement is not actionable." Haynes v. Alfred A. Knopf, Inc., 8 F.3d 1222, 1227 (7th Cir. 1993); *see also* Wilkow v. Forbes, Inc., 241 F.3d 552, 555 (7th Cir. 2001) (Illinois law); Pope v. Chronicle Publ'g Co., 95 F.3d 607, 614 (7th Cir. 1996) (Illinois law); Restatement (Second) of Torts § 566 (1977) ("A defamatory communication may consist of a statement in the form of an opinion, but a statement of this nature is actionable only if it implies the allegation of undisclosed defamatory facts as the basis for the opinion."). Second, **HN7**[] substantial truth is a complete defense to an allegation of defamation. *See* Pope, 95 F.3d at 613. This rule derives from the "recognition that falsehoods which do no *incremental* damage to the plaintiff's reputation do not injure the only interest the law of defamation protects." Haynes, 8 F.3d at 1228 (emphasis in original). Third, **HN8**[] under Illinois law, publication of defamatory matters in a report of an official proceeding **[**19]** that deals with a matter of public concern is privileged as long as the report is accurate and complete. *See* Restatement (Second) of Torts § 611(1977); *see also* Catalano v. Pechous, 83 Ill. 2d 146, 419 N.E.2d 350, 360, 50 Ill. Dec. 242 (Ill.1980). Fourth, **HN9**[] Illinois law confers a privilege upon "statements made within a legitimate business context." Larson v. Decatur Mem'l Hosp., 236 Ill. App. 3d 796, 602 N.E.2d 864, 867, 176 Ill. Dec. 918 (Ill. App. Ct.1992). Under this

[3] This principle overlaps with the constitutional protection for statements of on matters of public concern that are not provably false. *See* Milkovich v. Lorain Journal Co., 497 U.S. 1, 111 L. Ed. 2d 1, 110 S. Ct. 2695 (1990). *Milkovich*, a federal constitutional law case, reflects the fact that **HN10**[] the First Amendment imposes limits on state defamation law. However, we must first examine the threshold question of whether the challenged statements are actionable under Illinois law; if they are not, the First Amendment does not come into play. *See* Wilkow v. Forbes, Inc., 241 F.3d 552, 555 (7th Cir. 2001); Stevens v. Tillman, 855 F.2d 394, 400 (7th Cir. 1988).

rule, "[a] statement is conditionally privileged when the defendant makes it (1) in good faith; (2) with an interest or duty to be upheld; (3) limited in scope to that purpose; (4) on a proper occasion; and (5) published in a proper manner only to proper parties." *Id.* (citing *Zeinfeld v. Hayes Freight Lines, Inc., 41 Ill. 2d 345, 243 N.E.2d 217, 221 (Ill. 1968))*.

[20]** ***HN11***[] Federal constitutional law adds another layer of limitations on the kind of defamatory statements for which a defendant may be found liable. At common law, **[*728]** defamation was a strict liability tort, but constitutional doctrine has imposed culpability, or fault, requirements in most cases*. See* *New York Times v. Sullivan, 376 U.S. 254, 11 L. Ed. 2d 686, 84 S. Ct. 710 (1964)*; *Gertz v. Robert Welch, Inc., 418 U.S. 323, 41 L. Ed. 2d 789, 94 S. Ct. 2997 (1974)*. The level of culpability is determined by whether the statement was of public concern and whether the plaintiff is a public or private figure. Moreover, overlapping with the common law rule, the *First Amendment* protects statements on matters of publicconcern that are not provably false*. See* *Milkovich, 497 U.S. 1, 20, 111 L. Ed. 2d 1, 110 S. Ct. 2695 (1990)*. For further discussion of various *First Amendment* limitations to defamation actions see Ronald D. Rotunda & John E. Nowak, *Treatise on Constitutional Law: Substance and Procedure* §§ 20.33-20.35 (2d. ed. 1992).

As important to this appeal as the principles of defamation is the rule of waiver. ***HN12***[] "We have long refused to consider arguments that were not presented to the district **[**21]** court in response to summary judgment motions." *Arendt v. Vetta Sports, Inc., 99 F.3d 231, 237 (7th Cir. 1996)* (quoting *Cooper v. Lane, 969 F.2d 368, 371 (7th Cir. 1992))*; *see also* *Maust v. Headley, 959 F.2d 644, 650 (7th Cir. 1992)*; *DeValk Lincoln Mercury v. Ford Motor Co., 811 F.2d 326, 338 (7th Cir. 1987)*. Appellate review is not designed to serve as an unsuccessful party's second bite at the apple -- an opportunity to raise issues and arguments that were not brought forth below. This is so even when the issue is an element of a plaintiff's prima facie case. *See* *Resolution Trust Corp. v. Juergens, 965 F.2d 149, 153 (7th Cir. 1992)* (the law of summary judgment "does not permit a nonmovant defendant to delay pointing out claimed flaws in the plaintiff's prima facie case until an appeal is underway"). As we said of waiver in *Boyers v. Texaco Refining and Marketing, Inc.*:

> It is axiomatic that ***HN13***[] issues and arguments which were not raised before the district court cannot be raised for the first time on appeal . . . . The rule is essential in order that parties may have the opportunity to offer **[**22]** all the evidence they believe relevant to the issues . . . and in order that litigants may not be surprised on appeal by final decision there of issues upon which they have had no opportunity to introduce evidence. To reverse the district court on grounds not presented to it would undermine the essential function of the district court. This rule is not meant to be harsh, overly formalistic, or to punish careless litigators. Rather, the requirement that parties may raise on appeal only issues which have been presented to the district court maintains the efficiency, fairness, and integrity of the judicial system for all parties.

848 F.2d 809, 812 (7th Cir. 1988) (citations and quotations omitted).

With these principles in mind, we now turn to the statements at issue in this case.

1. Czerewko Letter

To review, the disputed statements in the Czerewko Letter consist of the following three sentences:

> . Recently, another Chain was positioned for exclusivityand a modified, defaced Zig Zag unit was used. We own the patent-trademark which has been violated.
>
> . Our Attorneys initiated legal action regarding this and had to include the Chain in the Trademark-Patent **[**23]** violation.

Republic asserts that the Czerewko Letter was designed to persuade Clark to abandon its exclusive deal with Republic, **[*729]** in favor of a less profitable deal from North Atlantic. Republic contends that to accomplish this task North Atlantic utilized a strategy of attacking Republic's lower prices, rebates and travel incentives with slander and threats.

North Atlantic responds that the Czerewko Letter was sent by a regional sales director to a single customer to propose a business relationship and express "concerns" about a competitor's proposal. North Atlantic contends that the letter's statements cannot reasonably be construed as objectively false and defamatory. Although North Atlantic did not have patent rights in the display boxes, the company did believe that it had rights in those boxes (and indeed, it pursued a trademark claim below, albeit unsucessfully). According to North Atlantic, the Czerewko Letter simply expressed an opinion that the company's legal rights had been violated.

We disagree with North Atlantic's characterization of the Czerewko Letter and with its contention that the letter's organization as a list of "concerns" prevents the disputed statements **[**24]** from being actionable as defamation. As explained above, ***HN14***[] prefacing a defamatory statement with the phrase "in my opinion" does not shield a defendant from liability, and the same is true for presenting a defamatory statement under a list of "concerns." Prefatory language does not control whether these statements are actionable as defamation; what matters is whether the assertions included in the three disputed sentences are verifiably false.

We conclude that they are. These statements cannot be read as the expression of "a subjective view, an interpretation, a theory, conjecture, or surmise . . . ." *Haynes, 8 F.3d at 1227*. Nor are they mere sales puffery as can be found elsewhere in the letter (e.g., "Zig Zag is a magical name"). Rather, Czerewko is claiming to be in possession of objectively verifiable facts that could easily be evaluated in a defamation suit. *Did North Atlantic have trademark rights or hold a patent in the display boxes? Was this patent or trademark violated? Had legal action been pursed to enforce these rights? Had another chain been included in the legal action?*A jury could readily answer all of these questions and thereby verify the truthfulness **[**25]** of Czerewko's statements. What is more, the phrasing of these statements in the past tense makes them all the easier to separate out from statements expressing the speaker's subjective view. The reasonable reader would understand Czerewko to be informing him of events that have already occurred. While it may be difficult in some circumstances to verify or refute a prediction about the future, it is relatively easy to do so when describing events that have allegedly occurred in the past.

In this case, however, it is unnecessary for a jury to examine the truth of Czerewko's statements as North Atlantic does not dispute that the underlying facts are false. That is, North Atlantic concedes that it had no trademark and held no patent on the display boxes; and it follows that there was no patent or trademark violation. Moreover, North Atlantic admits that at the time that the Czerewko Letter was written it had filed no lawsuit, so clearly then no other "chain" had been included in a lawsuit.

Still, North Atlantic urges us to give an innocent construction to the disputed statements. North Atlantic argues that we should interpret the sentence mentioning "legal action" as either true (because **[**26]** the word "action" could mean "activity" and not just a lawsuit) or nondefamatory (because simply saying that someone has been sued is not defamatory in this litigious day and age). To benefit from the **[*730]** innocent construction rule, a statement must be reasonably susceptible to an innocent interpretation. "When a defamatory meaning was clearly intended and conveyed, [Illinois courts] will not strain to interpret allegedly defamatory words in their mildest and most inoffensive sense in order to hold them nonlibelous under the innocent construction rule." *Bryson, 672 N.E.2d at 1217*. If we interpret the words according to the meaning that they were intended to convey to the reasonable reader, it is clear that they are both false and defamatory. First, the words "legal action" can only be intended to mean some sort of lawsuit or official proceeding and not mere discussion between parties (which is the interpretation required to render the statement true). It stretches reason to interpret "legal action" as "any activity of a lawyer" when it is used in daily parlance to mean a lawsuit or legal proceeding. Second, we are unpersuaded by North Atlantic's argument that litigation **[**27]** is a fact of life and that a statement that a corporation has been sued is not, of itself, defamatory. Even if that were true, the statement was not simply that Republic had been sued, but it provided factual detail about Republic's alleged inappropriate activity. We also must bear in mind that the Czerewko Letter was sent to a Republic customer in order to convince the customer to establish an exclusive relationship with North Atlantic.

North Atlantic further argues that the district court erred by granting Republic summary judgment on its defamationclaim without requiring Republic to prove that it was injured by the statements in the Czerewko Letter. However, it was unnecessary for Republic to plead and prove special damages as the allegations in the Czerewko Letter fit into at least two *per se* categories -- malfeasance or misfeasance in the performance of an office or a job and unfitness for one's profession or trade. That is, the Czerewko Letter suggests that Republic was involved in improperly defacing its competitor's merchandise and conducting its business in violation of trademark and patent laws. North Atlantic again contends that it is entitled to an innocent construction **[**28]** for these statements. However, as we noted in *Haynes*, ***HN15***[] "Illinois courts (and federal courts when interpreting Illinois law) have been quick to find implications of criminal conduct or of employee or business misconduct in statements that might have seemed susceptible of an interpretation that would have taken them out of the per se categories." *8 F.3d at 1226*. Again, considering the letter's context and the words' natural and obvious meaning, we conclude that an innocent construction of the Czerewko Letter would be inappropriate.

Finally, with respect to the Czerewko Letter, North Atlantic raises the following three issues that were not presented to the district court at summary judgment: (1) the Czerewko Letter did not contain any defamatory statements "of and concerning" Republic; (2) the district court made no inquiry into fault; and (3) the Czerewko Letter is privileged as a statement made within a legitimate business context. Despite North Atlantic's vigorous efforts to convince us that these issues command reversal of the district court's judgment, we are unable to consider the arguments related to any of them because North Atlantic waived them by not raising **[**29]** them prior to appeal.

2. August 13 Letter

Turning to the August 13 Letter, North Atlantic's main contention is that the description of its antitrust claims is not a statement of fact concerning Republic; rather, it is a statement of opinion regarding **[*731]** the legality of Republic's practices. According to North Atlantic, every lawsuit expresses the plaintiff's opinion that the defendant's conduct has violated the law. An expression of that opinion, North Atlantic contends, is not actionable as a false and defamatory factual statement, regardless of how a court ultimately resolves the plaintiff's claims on the merits. North Atlantic warns of dire consequences if the district court's ruling is upheld -- suggesting that unsuccessful plaintiffs will become *per se* liable for defamation for having alleged incorrectly that the defendant violated the law and that judicial proceeding will have to be conducted in secret.

Republic responds that North Atlantic waived this argument by failing to raise it below. North Atlantic counters that it "consistently argued that the August 13 letter did not contain a false statement of fact, and hence was not actionable, because it accurately summarized **[**30]** the allegations of the Kentucky lawsuit." Looking to record, we see that North Atlantic did argue below that the August 13 Letter did not raise a false statement of fact. However, it did so by making an argument based on truth. *See* Memorandum of Law in Support of Defendant's Motion for Summary Judgment at 17-18 ("The statements allegedly attributable to . . . the August 13 letter accurately summarize the claims set forth in North Atlantic's legal pleadings. Accordingly, the statements are true and non-actionable."). North Atlantic is therefore attempting on appeal to recast its truth defense as an opinion defense. But under Illinois law truth and opinion are two separate defenses. *See* *Pope, 95 F.3d at 613-14* (listing "substantial truth" and "statement of opinion" as two separate defenses). We, therefore, agree with Republic that North Atlantic waived the opinion defense by failing to raise it below. In any event, North Atlantic's position seems akin to a rule that filing a lawsuit provides blanket protection for one seeking to publicize false facts. This is a proposition that we, of course, find unsettling. Moreover, we are unimpressed by North Atlantic's *in* **[**31]** *terrorem* argument that finding liability here will have the effect of muzzling litigants, as North Atlantic's argument fails to take into account common law and constitutional defenses that protect parties speaking on matters of common interest or public concern.

Next, North Atlantic contends that the August 13 Letter is protected by common law privilege as a description of an official proceeding. In Illinois, this privilege protects publications that fairly and accurately report an official action or proceeding. *See* *Catalano v. Pechous, 83 Ill. 2d 146, 419 N.E.2d 350, 360-61, 50 Ill. Dec. 242 (Ill. 1980)*. The district court held this privilege inapplicable to the August 13 Letter for two reasons: (1) NorthAtlantic made the underlying allegations in the Kentucky lawsuit, and could not "confer the privilege upon itself", and (2) the basis of this privilege is the public's interest in official proceedings, and North Atlantic disseminated the information to its own customers, not the public. In response to the first reason, North Atlantic argues that as long as the underlying lawsuit itself is not objectively baseless (designed solely to immunize otherwise defamatory **[**32]** statements), there is no reason in law or logic to strip the plaintiff of the privilege. This is an argument for the modification or extension of Illinois law, and ***HN16***[] as a federal court sitting in diversity, we are obligated to apply Illinois law as announced by the Illinois Supreme Court. In circumstances where a state supreme court has not issued a ruling on the issue presented, "the rulings of the intermediate court control, unless there is a persuasive indication that the highest court would decide the issue **[*732]** differently." *Allstate Ins. Co. v. Keca, 368 F.3d 793, 800 (7th Cir. 2004)*.

While the Illinois Supreme Court has not directly addressed whether this privilege may be "self-conferred" -- i.e., by filing a pleading and then reporting on it, ***HN17***[] we are confident that if presented with the issue, the Illinois Supreme Court would determine that the privilege may not be self-conferred. It is significant in our view that the Illinois Supreme Court has adopted the official proceeding privilege as expressed in the Second Restatement *§ 611*. *See Catalano, 419 N.E.2d at 360-61* (abandoning *§ 611* of the Restatement (First) of Torts and adopting *§ 611 of the Restatement (Second) of Torts* **[**33]**). The commentary to the Second Restatement of Torts states:

> A person cannot confer this privilege upon himself by making the original defamatory publication himself and then reporting to other people what he had stated. This is true whether the original publication was privileged or not.

Restatement (Second) of Torts, § 611, comment c (1977).

Given that the Illinois Supreme Court has adopted *§ 611*, we think it likely that they would follow this commentary as well. Moreover, our conclusion is bolstered by a ruling from an Illinois appellate court holding that this privilege may not be self-conferred. *See Kurczaba v. Pollock, 318 Ill. App. 3d 686, 742 N.E.2d 425, 443, 252 Ill. Dec. 175 (Ill. App. Ct. 2000)* (finding the fair report privilege not available to defendant who circulated his own complaint to third parties).

We are unpersuaded by North Atlantic's arguments that the Illinois Supreme Court would decide the issue differently. North Atlantic relies primarily on *ADT Co. v. Brink's Inc., 380 F.2d 131 (7th Cir. 1967)*, a case in which this Court (applying Illinois law) held that a defamation **[**34]** defendant was entitled to invoke the privilege with respect to statement made in a press release describing a lawsuit against its competitor. Putting aside any factual differences between that case and the one before us now, *Brink's* was based on the First Restatement, which did not have language analogous to comment c of the Second Restatement. [4]

Next, we address North Atlantic's contention that the district court erred in failing to require Republic to prove fault. Under *Gertz v. Robert Welch, Inc., 418 U.S. 323, 41 L. Ed. 2d 789, 94 S. Ct. 2997 (1974)*, North Atlantic argues that Republic was obligated to show at least negligence, and to the extent that this case involves a matter of public concern, Republic was required to show actual malice. Republic responds that North Atlantic **[**35]** waived this argument by not raising it before the district court. We agree that by failing to point out this alleged deficiency in Republic's case prior to appeal North Atlanticwaived this argument.

Finally, North Atlantic contends that the district court erred by granting summary judgment to Republic without requiring Republic to prove that it was injured by the August 13 Letter. As with the Czerewko Letter, the statements of the August 13 Letter fit comfortably within several *per se* categories. North Atlantic accuses Republic of defacing property and operating its business in violation of federal and state law. North Atlantic argues that under the innocent construction rule, the August 13 Letter can reasonably **[*733]** be construed as describing North Atlantic's good-faith allegations about the legality of Republic's conduct. NorthAtlantic's position is beside the point, though, because regardless of North Atlantic's professed intentions, the letter substantively conveys objectively verifiable facts which can only be read one way. North Atlantic's position seeks to turn the innocent construction rule into a subjective test. ***HN18***[] The test is objective: it asks whether there is an objectively **[**36]** reasonable innocent interpretation of the allegedly defamatory statements. In this case, we conclude that there is not.

---

[4] The rule against self-conferral renders this privilege inapplicable to the August 13 Letter, and it is therefore unnecessary for us to address the alternate ground upon which the district court supplied for its decision.

B. Damages

With respect to the damage awards, North Atlantic argues that the district court erred in the following three ways: (1) by allowing the jury to award presumed damages and punitive damages absent a predicate determination of actual malice; (2) by refusing to consider whether $ 3.36 million in presumed damages is impermissibly "substantial," and by allowing Republic to recover that amount; and (3) by permitting Republic to recover punitive damages at all, much less an award of $ 4.08 million. We address each argument in turn.

First, we review *de novo* North Atlantic's contention that the district court committed legal error by allowing Republic to recover damages without making a predicate determination of fault. North Atlantic contends that Illinois law requires a plaintiff to prove actual malice, i.e., knowledge of falsity or reckless disregard for truth or falsity, to recover either presumed or punitive damages. North Atlantic's position has merit. Indeed, the Illinois Supreme Court has never approved the recovery of punitive or presumed **[**37]** damages on less than actual malice. *See*, *e.g.*, *Babb v. Minder, 806 F.2d 749, 758 (7th Cir. 1986)* ("Under Illinois law, . . . only upon a showing of actual malice may damages be presumed and punitive damages be awarded."); *Troman v. Wood, 62 Ill. 2d 184, 340 N.E.2d 292, 296 (Ill. 1975)* ("Only if liability was predicated on actual malice could punitive damages be awarded or actual damages be presumed."). And while the United States Supreme Court has held that the federal Constitution does not prohibit a private individual from recovering punitive or presumed damages upon a showing of less than actual malice when the statements in question do not involve a matter of public concern, *see* *Dun & Bradstreet, Inc. v. Greenmoss Builders, Inc., 472 U.S. 749, 773-74, 86 L. Ed. 2d 593, 105 S. Ct. 2939 (1985)*, the Illinois Supreme Court has yet to decide, as a matter of state law, whether this lower threshold of recovery will be permitted.

However, none of this aids North Atlantic. First of all, North Atlantic waived this argument by failing to propose a jury instruction requiring a predicate finding of actual malice for general damages or to object to the **[**38]** court's instruction on that ground. *See* *Fed. R. Civ. P. 51*; *Gordon v. Degelmann, 29 F.3d 295, 298 (7th Cir. 1994)*. Furthermore, while there was no actual malice instruction given for presumed damages, the court instructed the jury that it could award punitive damages only if it found that North Atlantic "knew [its] statements were untrue" or "made the statements with conscious disregard as to whether they were true or not." This standard is at least as strict as the actual malice standard of knowledge or reckless disregard. Following this instruction, the jury awarded punitive damages to Republic. Thus, the jury necessarily found that North Atlantic acted with "knowledge or conscious disregard" of the statements' falsity and, *a fortiori*, that the actual malice standard had been met.

[*734] Second, we consider North Atlantic's argument that the district court abused its discretion by allowing Republic to recover $ 3.36 million in presumed damages. Because this is a case of defamation *per se*, proof of actual damage was unnecessary and Republic was entitled to presumed damages. After a trial on damages, the jury awarded **[**39]** Republic $ 8.4 million is presumed damages, which the district court later reduced to $ 3.36 million. In remitting the award, the district court explained that it agreed with North Atlantic's "most basic argument: $ 8.4 million is simply excessive given the evidence of harm in this case." *Republic Tobacco, L.P. v. N. Atl. Trading Co., 2003 U.S. Dist. LEXIS 21153, No. 98-C-4011, 2003 WL 22794561, at *7 (N.D. Ill. Nov. 23, 2003)*. ***HN19***[] We review the district court's remittitur decision for an abuse of discretion. *See* *McNabola v. Chicago Transit Authority, 10 F.3d 501, 516 (7th Cir. 1993)*.

North Atlantic contends that under Illinois law an award of presumed damages may not be "substantial," *see* *Brown & Williamson Tobacco Corp. v. Jacobson, 827 F.2d 1119, 1142 (7th Cir. 1987)*; *Bloomfield v. Retail Credit Co., 14 Ill. App. 3d 158, 302 N.E.2d 88, 97 (Ill. App. Ct. 1973)* ("Substantial damages are not presumed."), and that $ 3.36 million falls into this impermissible category. ***HN20***[] By definition, presumed damages are speculative in nature, and this limitation on presumed damages protects a defamation defendant from being subjected to an astronomical **[**40]** award based upon a jury's guess about the plaintiff's unproven harm. In *Brown & Williamson*, this Court explained Illinois law as requiring, "an appellate court to give some deference to the jury's determination of presumed damages while also considering whether it considers the jury award of presumed damages excessive. If it finds the award excessive, the court may exercise discretion and reduce the award to what it considers a more appropriate figure." *827 F.2d at 1141*.

Following this principle, we hold that the district abused its discretion in allowing $ 3.36 million in presumed damages. We conclude that a presumed damages award of $ 1 million is more appropriate in this case. Republic failed to identify any presumed damages award in the history of Illinois law remotely in the vicinity of $ 3.36 million. (In fact, the most sizeable award identified was the award of $ 1 million, remitted from $ 3 million, in *Brown & Williamson*.) ***HN21***[] In a case lacking proof of economic injury [5] and where the defamatory statements were publicized to a relatively limited audience (North Atlantic's customers and potential customers), it would be inappropriate to award presumed damages **[**41]** that are exponentially greater than have been awarded in past cases. While we are mindful that under the doctrine of presumed damages a party is not required to show specific loss, there must be some meaningful limit on the magnitude of a jury award when it is arrived at by pure speculation. Presumed damages serve a compensatory function -- when such an award is given in a substantial amount to a party who has not demonstrated evidence of concrete loss, it becomes questionable whether the award is serving a different purpose. An award of $ 1 million is sizeable enough to compensate Republic for the damage that we presume was caused to its reputation in the tobacco industry and the harm that we presume was done to the business relationships it **[*735]** cultivated over the years, yet not so substantial as to be out of line with other presumed damages awards allowed under Illinois law.

[42]** Third, North Atlantic requests that the award of punitive damages be reversed, arguing that they should not have been allowed at all, or in the alternative, that the award should be substantially remitted. We will consider these arguments separately.

North Atlantic argues that the conduct at issue in this case does not meet the demanding standard for awarding punitive damages under Illinois law. ***HN22***[] In a diversity proceeding, state law governs whether punitive damages are appropriate. *See* *Ross v. Black & Decker, Inc., 977 F.2d 1178, 1187 (7thCir. 1992)*. ***HN23***[] Punitive damages are available under Illinois law upon proof of actual malice. *See* *Brown & Williamson, 827 F.2d at 1142*; *see also* *J.I. Case Co. v. McCartin-McAuliffe Plumbing & Heating, Inc., 118 Ill. 2d 447, 516 N.E.2d 260, 263, 114 Ill. Dec. 105 (Ill. 1987)*(explaining that punitive damages may be awarded when the defendant acts "with fraud, actual malice, deliberate violence or oppression, or when the defendant acts willfully, or with such gross negligence as to indicate a wanton disregard for the rights of others"). As explained above, the jury was instructed that in order to award **[**43]** punitive damages it must find that the defendant acted with "knowledge or conscious disregard" -- a standard stricter than actual malice. Since this is essentially a sufficiency of the evidence argument, we ask only whether a rational jury could conclude that North Atlantic's statements were made with knowledge or reckless (or conscious) disregard of their falsity. A rational jury could so conclude. Evidence was presented that in order to gain a business advantage over its competitor, North Atlantic made statements without regard to their truth. The nature and timing of the events are probative of North Atlantic's willful intent -- the combination of the cutthroat competition that existed between the companies, the substance of the letters, and the identity of the recipients supports the conclusion that North Atlantic deliberately used the letters to harm Republic's business.

We are more receptive to North Atlantic's claim that the amount of punitive damages awarded was excessive. The jury awarded Republic $ 10.2 million in punitive damages, which the trial court remitted to $ 4.08 million. ***HN24***[] In a diversity action, state law governs the factors a jury may consider in determining the **[**44]** amount of punitive damages, while federal law governs the district court's review of the jury award and appellate review of the district court's decision. *See* *Black & Decker, 977 F.2d at 1189*. ***HN25***[] We review the district court's determination on the size of the jury verdict for an abuse of discretion. *Id.* ***HN26***[] Under Illinois law, three factors are particularly relevant in analyzing the amount of a punitive damages award: "(1) the nature and enormity of the wrong, (2) the financial status of the defendant, and (3) the potential liability of the defendant resulting from multiple claims." *Hardin, Rodriguez & Boivin Anesthesiologists, Ltd. v. Paradigm Ins. Co., 962 F.2d 628, 640 (7th Cir. 1992)* (citing *Hazelwood v. Illinois Central Gulf. Railroad, 114 Ill. App. 3d 703, 450 N.E.2d 1199, 1207, 71 Ill. Dec. 320 (Ill. 1983))*.

[5] Indeed, the failure to prove economic injury prompted the district court to grant North Atlantic summary judgment on Republic's tortious-interference claim -- a ruling from which Republic has not cross-appealed, but a cause of action in which this case seems to most comfortably fit, putting the actual injury requirement aside.

We concentrate on the first factor. We generally agree with the district court's comprehensive analysis supporting its decision to remit the jury's punitive damage award, but, in view of our discussion of presumed damages above, we conclude that the district court did not go far enough in remitting the punitive damage award. **[**45]** While evidence supports the jury's **[*736]** determination that North Atlantic acted with the requisite malice to justify punitive damages, the "nature and enormity of [North Atlantic's] wrong" does not justify a $ 10.2 million award, or even a $ 4.08 million award. We therefore further reduce the punitive damage award to $ 2 million.

C. Antitrust

North Atlantic argues that the district court erred by concluding that North Atlantic's antitrust claims had to fail on the ground that North Atlantic did not establish the existence of a distinct geographic market. This Court's review of summary judgment is *de novo*. *See* *Vision Fin. Group, Inc. v. Midwest Family Mut. Ins. Co., 355 F.3d 640, 642 (7thCir. 2004)*.

North Atlantic's antitrust claims included that Republic (1) entered into unlawful agreements in unreasonable restraint of trade in violation of Section 1 of the Sherman Act, *see* *15 U.S.C. § 1*; (2) acted unlawfully to attempt to monopolize and monopolize in violation of Section 2 of the Sherman Act, *see* *15 U.S.C. § 2*; and (3) entered into unlawful exclusive dealing agreements that substantially lessen competition **[**46]** in violation of Section 3 of the Clayton Act, *see* *15 U.S.C. § 14*.

A determination of the relevant market is ordinarily required for all of North Atlantic's claims. However, as North Atlantic argues, ***HN27***[] there are some circumstances where to establish a violation of antitrust laws it is unnecessary to prove that defendant wielded market power in a properly defined product and geographic market, and may rely instead on direct evidence of anticompetitive effects. *See* *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)*. Relying on our decision in *Toys "R" Us, Inc. v. FTC, 221 F.3d 928 (7th Cir. 2000)*, North Atlantic argues that this is such a case. In *Toys "R" Us*, this Court upheld an Federal Trade Commission finding that a powerful chain store owner had coordinated a horizontal agreement among toy manufacturers to restrict distribution to warehouse clubs. *221 F.3d at 940*. Because the FTC had demonstrated that the boycott organized by Toys "R" Us was having an effect in the market, the Court held that the FTC did not need to prove the contours of a distinct geographic market to state an **[**47]** antitrust claim. *See* *id. at 937*; *see also* *Indiana Fed'n of Dentists, 476 U.S. at 460-61* (holding that, in light of direct evidence of anticompetitive effects, the FTC did not need to prove the contours of a distinct geographic market in order to prove that a group of dentists had violated the antitrust laws by agreeing not to provide insurers with x-rays when submitting claims).

North Atlantic's reliance on *Toys "R" Us* is misplaced. *Toys "R" Us* made very clear that despite the vertical agreements between Toys "R" Us and individual manufacturers, the conspiracy at issue was horizontal. ***HN28***[] Horizontal agreements, which have not been alleged in this case, are illegal *per se.* Unlike horizontal agreements between competitors, vertical exclusive distributorships (like in this case) are presumptively legal. *See* *CDC Techs., Inc. v. IDEXX Lab., Inc., 186 F.3d 74, 80-81 (2d Cir. 1999)*. Rather than condemning exclusive dealing, courts often approve them because of their procompetitive benefits. *See*, *e.g.*, *Roland Mach. Co. v. Dresser Indus., Inc., 749 F.2d 380, 395 (7th Cir. 1984)* (exclusive dealing eliminates **[**48]** divided loyalties and reduces free riding). In fact, emphasizing the existence of a horizontal conspiracy, *Toys "R" Us* contrasted the situation in that case with the "typical story of a legitimate vertical transaction" in which the manufacturer sought exclusivity in exchange for what it hoped **[*737]** would be more effective promotion of its goods. *221 F.3d at 936*. ***HN29***[] As horizontal agreements are generally more suspect than vertical agreements, we must be cautious about importing relaxed standards of proof from horizontal agreement cases into vertical agreement cases. To do so might harm competition and frustrate the very goals that ***antitrust law*** seeks to achieve. *Cf.*, *e.g.*, *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 763-64, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)* (noting the dangers of imposing too low a standard of proof in anti-trust cases); *InterVest, Inc. v. Bloomberg, L.P., 340 F.3d 144 (3d Cir. 2003)* (citing the "chilling effect on lawful conduct that would result from the unreasonable interpretation of evidence").

Nonetheless, the fact that "direct evidence of anticompetitive effects" has not been used outside the context of horizontal agreements **[**49]** does not entirely dispose of North Atlantic's argument. It may be that, in a proper case alleging vertical restraints, a direct anticompetitive effects analysis could be used to show market power. But this is not that case. North Atlantic fails to recognize that ***HN30***[] neither *Toys "R" Us* nor *Indiana Federation of Dentists* allows an antitrust plaintiff to dispense entirely with market definition. Rather, these cases stand for the proposition that if a plaintiff can show the rough contours of a relevant market, and show that the defendant commands a substantial share of the market, then direct evidence of anticompetitive effects can establish the defendant's market power [6] -- in lieu of the usual showing of a precisely defined relevant market and a monopoly market share.

[50]** For example, in *Indiana Federation of Dentists*, there was no dispute that the product market was, roughly speaking, dental services; all seemed to agree to "the reality that markets for dental services tend to be relatively localized"; and the FTC found "adverse effects on competition in those areas where IFD dentists *predominated*." *Ind. Fed'n of Dentists, 476 U.S. at 461* (emphasis added). In other words, there was no significant dispute about the rough contours of the relevant market, and the FTC's findings only applied where the IFD dentists commanded a substantial market share. Likewise in *Toys "R" Us*, the product market (the wholesale toy market) was not contested; the geographic market was assumed to be national; and Toys "R" Us had "20% of the national wholesale market and up to 49% of some local wholesale markets." *Toys "R" Toys "R" Us, Inc., 221 F.3d at 937*. These circumstances were enough, we held, to allow an inference of market power from direct evidence of anticompetitive effects.

The situation before us now is entirely different because of the dispute about the relevant geographic market. *Toys "R" Us* and *Indiana Federation of Dentists* **[**51]** do not excuse North Atlantic from providing evidentiary support for its putative Southeast geographic market. ***HN31***[] Economic analysis is virtually meaningless if it is entirely unmoored from at least a rough definition of a product and geographic market. As we explain below, there is no evidentiary support for the putative Southeast geographic market. Therefore, North Atlantic cannot even cross the threshold into a *Toys "R" Us*- style proof of market power through direct evidence of anticompetitive effects.

Thus, because North Atlantic can draw no support from *Toys "R" Us* or *Indiana Fed'n of Dentists*, and exclusive **[*738]** dealing arrangements violate antitrust laws only when they foreclose competition in a substantial share of the line of commerce at issue, *see Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 320-27, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*, North Atlantic must precisely establish a relevant market. ***HN32***[] The relevant market has both a product and a geographic dimension. *See Brown Shoe Co. v. United States, 370 U.S. 294, 324, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. The parties agree that the relevant product market is the market for premium RYO cigarette papers. The **[**52]** relevant geographic market, however, is disputed. North Atlantic contends that the market is limited to the Southeast region of the United States, which it defines as Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia. Republic counters that the relevant market is nationwide and that North Atlantic has failed to establish sufficient facts to demonstrate that the nine states that make up the so-called Southeast are in fact a relevant market.

HN33[] Identifying a geographic market requires both, "careful selection of the market area in which the seller operates, and to which the purchaser can practicably turn for supplies." *Tampa Electric, 365 U.S. at 327*. Applying the two-part test to this case, the district court concluded that the only possible market supported by the evidence is national, and that it was therefore unnecessary to present the question to a jury. We agree.

With respect to the first prong, it is undisputed that North Atlantic, Republic, and their competitors operate nationally and sell to wholesale customers all over the United States. All three of the top suppliers (North Atlantic, Republic and RBA) **[**53]** publish national price lists.

---

[6] Indeed, even the references to "plaintiff" and "defendant" are questionable, as both *Toys "R" Us* and *Indiana Federation of Dentists* originated not as private-party civil litigation, but as agency proceedings before the Federal Trade Commission.

With respect to the second prong, Republic presented unrebutted evidence that distributors and wholesalers can practicably (and in fact do) turn to suppliers across the nation for RYO cigarette paper. Before the district court, North Atlantic argued that the relevant purchasers were indirect customers (i.e., retailers and consumers) rather than the direct customers (i.e., distributors and wholesalers) -- a position the district court rejected and that NorthAtlantic does not explicitly now reassert. Rather, North Atlantic contends on appeal that Republic's sales contracts (which included restrictions on buying or selling Republic's product to or from other wholesalers) made it impossible for wholesalers to turn to outside suppliers for Republic's products outside of their region. This argument puts the cart before the horse -- ***HN34***[] contracts represent transactions that have occurred within the market. The question of what transactions have occurred in the market is subsequent to and therefore irrelevant to the definition of the market itself.

Additionally, North Atlantic argues that as a result of barriers to entry caused by "transportation costs and the realities **[**54]** of the market," wholesalers outside the Southeast are not well-positioned to enter the region to sell competing product. Even if this convenience-based argument could meet the *Tampa Electric* standard of practicability, this argument (and to some extent the argument previously discussed) reverts to the position advanced at the district court that consumers and retailers are the "purchasers" for purposes of the geographic analysis. This is wrong because Republic and North Atlantic do not sell cigarette papers to retailers and consumers. They sell to distributors and wholesalers. Accordingly, the evidence presented regarding where wholesalers can practicably sell their products (or in other words, where customers and retailers practicably turn for alternative sources **[*739]** of RYO paper) is beside the point when it comes to market definition. Thus, the primary defect in North Atlantic's geographic argument remains -- North Atlantic has not identified any evidence presented at trial indicating that wholesalers and distributors in the Southeast because of market forces were only able to turn to suppliers in that region.

This conclusion is hardly surprising, as tobacco products generally have **[**55]** been found to have national markets. *See*, *e.g.*, *FTC v. Swedish Match, 131 F. Supp. 2d 151, 166 (D.D.C.2000)* (loose leaf chewing tobacco); *R.J. Reynolds Tobacco Co. v. Phillip Morris Inc., 60 F. Supp. 2d 502, 504 (M.D.N.C.1999)* (cigarettes).

As there is no genuine issue that the relevant geographicmarket in this case is a national market, and North Atlantic does not argue that Republic has a monopoly or has attempted to monopolize in the national market, summary judgment was appropriately granted on all of North Atlantic's anti-trust claims.

D. Cross-Appeal

On cross-appeal, Republic challenges "the longstanding rule that a plaintiff in a federal court . . . may not appeal from a remittitur order he has accepted." *Donovan v. Penn Shipping Co., Inc., 429 U.S. 648, 650, 51 L. Ed. 2d 112, 97 S. Ct. 835 (1977)*. ***HN35***[] An order that offers a choice between a remitted award and a new trial is not a final decision, and if a plaintiff agrees to accept the reduced judgment in the trial court, that plaintiff may not later argue that the jury's verdict should be reinstated on appeal. *Id.* However, if the plaintiff declines to accept the **[**56]** reduced award, no appeal may be taken until after a new trial. *See* *Ash v. Georgia-Pacific Corp., 957 F.2d 432, 437 (7th Cir. 1992)*. Because Republic accepted the remittitur here, instead of facing a second trial, it cannot challenge the remittitur. *See* *id. at 437-38*.

However, Republic contends that *Ash* allows for a third option for successful plaintiffs facing remittitur -- stipulating that a second trial would result in entry of judgment in the amount equal to the remitted award and appeal the remittitur based on that stipulation -- and the district court erred in refusing to allow Republic to pursue this course. Republic argues that absent this option, in order to obtain appellate review of a remittitur, a successful plaintiff must undertake a seemingly endless series of new trials -- until one jury produces a verdict that squares with the trial judge's view of an appropriate verdict. We disagree with Republic's reading of *Ash*. ***HN36***[] *Ash* suggests that a plaintiff may expedite appeal by taking "a pratfall" on a new trial, meaning that the plaintiff can accept defeat in the second trial by failing to put up a real fight and then appeal seeking **[**57]** reinstatement of the first jury's verdict. *Ash* explained that if a plaintiff "cannot afford the same elaborate presentation it mustered the first time, or if the absence of witnesses . . . undermines the case, then [the plaintiff] may do poorly -- but it has the first verdict to fall back on. A party electing the new-trial branch of the remittitur option may take a pratfall as quickly as it pleases, and thus expedite the appeal." *Id. at 438*. Nowhere does *Ash* suggest that the *Donovan* may be completely circumvented by simply stipulating that a second trial would result in a judgment equal to the remitted award. We therefore reject Republic's invitation to sanction such a procedure.

III. Conclusion

For the reasons given in this opinion, we AFFIRM the district court's grant of summary judgment to Republic on its defamation claim and North Atlantic's antitrust **[*740]** claims. We AFFIRM the district court's decision with respect to Republic's cross-appeal. We VACATE the district court's remitted damages award and order entry of judgment for $ 1 million in presumed damages and $ 2 million in punitive damages.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN1[] **Private Actions, Standing**

The United States Supreme Court has determined that under federal ***antitrust law***, indirect purchasers generally lack standing to seek antitrust damages.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN2[] **Complaints, Requirements for Complaint**

The federal rules permit plaintiffs to plead alternative and inconsistent claims. Fed. R. Civ. P. 8(e)(2).

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN3[] **Class Actions, Certification of Classes**

The United States Supreme Court has emphatically rejected the suggestion that the settlement concerns of Fed. R. Civ. P. 23(e) supersede the certification requirements of Rule 23(a), (b).

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN4[] **Class Actions, Compromise & Settlement**

The safeguards provided by the Fed. R. Civ. P. 23 (a), (b) class-qualifying criteria, are not impractical impediments--checks shorn of utility--in the settlement-class context.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Constitutional Law > Equal Protection > Parentage

Torts > Procedural Matters > Settlements > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

Torts > ... > Settlements > Multiple Party Settlements > General Overview

HN5[] **Class Actions, Compromise & Settlement**

While settlement classes remain an important technique in the resolution of complex, class action litigation, their utility does not excuse a court from examining the proposed class definition with equal, if not greater, care.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN6[] **Class Actions, Prerequisites for Class Action**

One of several factors counseling against certification of a settlement class is the fact that certain claimants have more valuable claims, the consequence being a second instance of disparate interests. Thus, as the United States Supreme Court has recognized, absent at least some consideration of the "value" of class members' claims a certifying court cannot assure "fair and adequate representation." In addition to raising adequacy concerns, differences in state law may undermine predominance, "compounding" the questions that affect only individual members.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN7[] **Class Actions, Prerequisites for Class Action**

The claims of disparate groups cannot be mixed together under *Fed. R. Civ. P. 23(a)*.

Governments > Legislation > Interpretation

HN8[] **Legislation, Interpretation**

Legislative choices--even choices not to act--must be respected: Differences across states may be costly for courts and litigants alike, but they are a fundamental aspect of our federal republic and must not be overridden in a quest to clear the queue in court.

Contracts Law > Remedies > Equitable Relief > General Overview

HN9[] **Remedies, Equitable Relief**

The North Dakota Supreme Court has suggested that the doctrine of unjust enrichment applies only if another has, without justification, obtained a benefit at the direct expense of the complainant.

Opinion by: WILLIAM G. YOUNG

Opinion

[*19] MEMORANDUM

YOUNG, C.J.

I. INTRODUCTION

By Order dated November 21, 2003, this Court allowed the end payor plaintiffs' motion for class certification with respect to persons and entities who purchased nabumetone in five "exemplar" states. Order of 11/21/03 [Doc. No. 168 in Master File No. 01-12222-WGY] at 3, 5; see also *In re Relafen Antitrust Litig., 221 F.R.D. 260 (D. Mass. 2004)*. The end payor plaintiffs, having since reached an agreement of settlement with SmithKline, now seek to extend certification to a nationwide settlement class. [Doc. No. 306]. To assist the parties in their ongoing negotiations, the Court offers the following analysis.

II. BACKGROUND

Because the present **[**9]** analysis is, in the Court's view, primarily a continuation of a previous memorandum, see *Relafen, 221 F.R.D. 260*, the Court relates the factual and procedural background only briefly. In this consolidated action against SmithKline Beecham Corporation and GlaxoSmithKline PLC (collectively "SmithKline"), the plaintiffs

[1] alleged that SmithKline fraudulently procured and maliciously prosecuted its patent for nabumetone, a nonsteroidal anti-inflammatory drug sold under the brand name "Relafen." *Id. at 263*. Essentially, the plaintiffs claimed that but for SmithKline's unlawful conduct, they could have begun purchasing nabumetone in a competitive market -- comprising both Relafen and its generic alternatives -- as early as September 1998, nearly four years before generic nabumetone products actually became available. *Id. at 264*.

[10]** The end payor plaintiffs -- parties who purchased nabumetone from sources other than SmithKline for purposes other than resale -- assert claims under federal and state antitrust laws, state unfair competition statutes, and state consumer protection statutes. *Id. at 264*. On September 16, 2003, the end payor plaintiffs moved for certification of a nationwide class under *Federal Rule of Civil Procedure 23(b)(2)* and *(3)*. Id. After hearing oral argument and conducting a "rigorous analysis" of the end payor plaintiffs' proposed order, the Court denied the motion for certification under *Rule 23(b) (2)* and allowed it under *Rule 23(b)(3)* for the following exemplar classes:

With respect to their state antitrust and consumer protection claims --

> All persons or entities who purchased Relafen or its generic alternatives in the states of Arizona, California, Massachusetts, or Vermont during the period of September 1, 1998 through June 30, 2003 for consumption by themselves, their families, members, employees, insureds, participants, or beneficiaries.

and with respect to their unjust enrichment claims --

> All persons or entities in the United **[**11]** States who purchased Relafen in the states of Arizona, California, Massachusetts, Tennessee, or Vermont during the period September 1, 1998 through June 30, 2003 for consumption by themselves, their families, members, employees, insureds, participants, or beneficiaries.

Id. at 288. Excluded from both classes were governmental entities; SmithKline and its officers, directors, management, employees, **[*20]** subsidiaries, and affiliates; persons or entities who purchased Relafen for purposes of resale; persons or entities who purchased Relafen directly from SmithKline or its affiliates; and persons or entities who suffered no economic harm as a result of SmithKline's alleged conduct. Id.

On November 25, 2003, SmithKline moved for summary judgment. [Doc. Nos. 169, 187, 193, 197, 202]. With respect to the end payor plaintiffs, SmithKline emphasized that states had varied in their responses to *Illinois Brick v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, in which ***HN1***[] the Supreme Court determined that under federal ***antitrust law***, indirect purchasers (parties who, like the end payor plaintiffs, "are not the immediate buyers from the alleged antitrust violators," **[**12]** *Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 207, 111 L. Ed. 2d 169, 110 S. Ct. 2807 (1990))* generally lack standing to seek antitrust damages. See Defs.' Unjust Enrichment Mem. [Doc. No. 203] at 5-9. SmithKline maintained that in those states that construe their antitrust statutes consistently with Illinois Brick, permitting the end payor plaintiffs to seek restitution for unjust enrichment would allow an "end run" around state antitrust policies. See id. at 5-7. In addition, SmithKline continued, in those states that construe their antitrust statutes inconsistently with Illinois Brick -- that is, those states that allow indirect purchasers to seek antitrust damages under either statutory enactments (commonly termed "Illinois Brick repealers") or judicial decisions -- permitting the end payor plaintiffs to seek restitution for unjust enrichment would lead to unlawful "double recovery." See id. at 8-9. The Court agreed, in part. It allowed SmithKline's motion "with respect to unjust enrichment claims asserted under the laws of states in which such claims would constitute an end [] run around the state's adherence to Illinois Brick." Order of 12/19/03 [Doc. No. 229] **[**13]** at 2-3. The Court otherwise denied the motion, mindful that ***HN2***[] the Federal Rules permit plaintiffs to plead alternative and inconsistent claims. See *Fed. R. Civ. P. 8(e)(2)*.

The end payor plaintiffs now seek certification of a nationwide settlement class. [Doc. No. 306]. Members of the proposed class -- defined as "persons or entities in the United States who purchased Relafen and/or its generic alternatives . . . during the period of September 1, 1998 through June 30, 2003" -- would share in a settlement fund

---

[1] As discussed in greater detail elsewhere, the majority of the plaintiffs in this action -- including two of SmithKline's competitors, Teva Pharmaceuticals USA and Eon Labs, Inc., and many of SmithKline's customers, described by the parties as "direct purchasers" and "drugstore plaintiffs" -- have settled their claims.

of $ 75 million. Am. Stip. & Agreement [Doc. No. 305] P 1. Recovery would vary according to the end payor's status (as a settling health plan, third-party payor, or consumer), and, more importantly for present purposes, according to the end payor's place of purchase (in a "Group I" or "Group II" state). Id. P 17. Not surprisingly, Group I and Group II correspond to the responses to Illinois Brick described above: Group I states have rejected Illinois Brick; Group II states have not. Id. P2(m)-(n). To account for their varying "strengths and weaknesses," claims asserted under the laws of Group I states would be "favored" over those asserted under the laws **[**14]** of Group II states should the settlement fund prove insufficient. Pls.' Supp. Mem. [Doc. No. 334] at 10. Otherwise, all claims would be compensated equally, with consumers, [2] for example, receiving the greater of 100 to 150 percent of their claims or a minimum payment of $ 50. Am. Stip. & Agreement P 17. This allocation according to place of purchase, unlike the allocation according to status, was not the result of "independent negotiations" between counsel designated to represent the distinct interests of Group I or Group II claimants. Compare Pls.' Mem. at 7-8.

Also before the Court are motions by the attorneys **[**15]** general of six Group II states: Arkansas, Idaho, Illinois, Maryland, Oregon, and Washington. [Doc. Nos. 314, 316, 318, 320, 322, 324]. The moving attorneys general seek to intervene under *Rule 24(a)*, expressing concern that the proposed settlement would disadvantage the rights of end payors in their respective states. See, e.g., **[*21]** Ark.'s Mot., Attach. 1 (Ark.'s Mem.). Notwithstanding the repeated reassurances of the parties, see, e.g., Pls.' Supp. Mem.; Defs.' Mem. [Doc. No. 337], and the conditional acquiescence of the attorneys general, the Court continues to have serious reservations regarding the breadth of the proposed class. In an effort to guide further negotiations, the Court expresses these reservations below.

III. DISCUSSION

A. Legal Standard

Here, as before, see *Relafen, 221 F.R.D. at 265*, the end payor plaintiffs bear the burden of establishing the elements necessary for class certification: the four requirements of *Rule 23(a)* and one of the several requirements of *Rule 23(b)*. *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 613-14, 138 L. Ed. 2d 689, 117 S. Ct. 2231 (1997)*; *Guckenberger v. Boston Univ., 957 F. Supp. 306, 325 (D. Mass 1997)* **[**16]** (Saris, J.). The Court's role in this context is clear: it must "conduct a rigorous analysis of the prerequisites established by *Rule 23*," *Smilow v. Southwestern Bell Mobile Sys., Inc., 323 F.3d 32, 38 (1st Cir. 2003)* -- with one exception. Because the end payor plaintiffs move to certify a settlement class, the Court "need not inquire whether the case, if tried, would present intractable management problems." *Amchem, 521 U.S. at 620, 138 L. Ed. 2d 689, 117 S. Ct. 2231*. The other requirements of *Rule 23*, however -- "those designed to protect absentees by blocking unwarranted or overbroad class definitions -- demand undiluted, even heightened, attention in the settlement context. . . . for a court asked to certify a settlement class will lack the opportunity, present when a case is litigated, to adjust the class, informed by the proceedings as they unfold." Id.

At oral argument, the end payor plaintiffs nevertheless asserted that courts don an entirely "different hat" at settlement. This Court disagrees. ***HN3***[] The Supreme Court in Amchem emphatically rejected the suggestion that the settlement concerns of *Rule 23(e)* supersede the certification requirements of *Rule 23(a)* and *(b)*: **[**17]**

> Subdivisions (a) and (b) focus court attention on whether a proposed class has sufficient unity so that absent members can fairly be bound by decisions of class representatives. That dominant concern persists when settlement, rather than trial, is proposed.
>
> ***HN4***[] The safeguards provided by the *Rule 23 (a)* and *(b)* class-qualifying criteria, we emphasize, are not impractical impediments -- checks shorn of utility -- in the settlement-class context.

[2] The distribution to third-party payors (health benefit plans that purchased nabumetone for beneficiaries) would also reflect the Group I-Group II distinction, but would do so somewhat differently. Am. Stip. & Agreement P 2 (t). The claims of third-party payors would be limited to 15 percent of the purchases made in Group I states plus 5 percent of the purchases made in Group II states. Id.

Id. at 621. Indeed, a proposed amendment to Rule 23 which would have expressly validated the end payor plaintiffs' understanding -- that courts may certify a settlement class "even though the requirements of subdivision (b)(3) might not be met for purposes of trial," id., 521 U.S. at 619 (quoting Proposed Amendment to Fed. R. Civ. P. 23(b)) -- was widely criticized as both practically unwise and legally unsound. See id. (citing, inter alia, Letter from Steering Committee to Oppose Proposed Rule 23 to Stotler of 5/28/96, available at http://www.misko.com/library/steering23.PDF); see also, e.g., Paul D. Carrington & Derek P. Apanovitch, The Constitutional Limits of Judicial Rulemaking: **[**18]** The Illegitimacy of Mass-Tort Settlements Negotiated under Federal Rule 23, 39 Ariz. L. Rev. 461 (1997); John C. Coffee, Jr., Class Action "Reform": Advisory Committee Bombshell, N.Y.L.J., May 21, 1996, at 1. Accordingly, **HN5**[] while settlement classes "remain [] an important technique in the resolution of complex, class action litigation," Pls.' Mem. at 23, their utility does not excuse the Court from examining the proposed class definition with equal, if not greater, care. See Amchem, 521 U.S. at 620, 138 L. Ed. 2d 689, 117 S. Ct. 2231; Reynolds v. Beneficial Nat. Bank, 288 F.3d 277, 279-80, 285-86 (7th Cir. 2002) ("We and other courts have gone so far as to term the district judge in the settlement phase of a class action suit a fiduciary of the class, who is subject therefore to the high duty of care that the law requires of fiduciaries.").

Nor is the Court convinced that the present settlement posture renders it wholly "inappropriate to address the strength of class claims." Pls.' Supp. Mem. at 6. As the **[*22]** end payor plaintiffs emphasize, under Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 40 L. Ed. 2d 732, 94 S. Ct. 2140 (1974), the certification inquiry may not involve a "preliminary **[**19]** hearing into the merits." Id. at 177. But the suggestion that Eisen bars all consideration of disparities between class members' claims "reads too much into too little." See Waste Management Holdings, Inc. v. Mowbray, 208 F.3d 288, 298 (1st Cir. 2000). In fact, the Supreme Court's subsequent opinion in Ortiz v. Fibreboard Corp., 527 U.S. 815, 144 L. Ed. 2d 715, 119 S. Ct. 2295 (1999), noted that **HN6**[] one of several factors counseling against certification of the settlement class was the fact that certain claimants "had more valuable claims . . . [,] the consequence being a second instance of disparate interests." Id. at 857. Thus, as the Supreme Court recognized in Ortiz, absent at least some consideration of the "value" of class members' claims -- which here varies according to differences in state law -- a certifying court cannot assure "fair and adequate representation." Id. at 856 (quoting Amchem, 521 U.S. at 627, 138 L. Ed. 2d 689, 117 S. Ct. 2231); see Carrington & Apanovitch, supra, at 471 ("The modification of rights from those that can be enforced at trial to those that will be measured by weak conjecture [at settlement] effects **[**20]** a transfer of wealth from class members with clearly meritorious claims to those whose claims are more dubious. . . . The wealth transfer is most apparent when the court-approved settlement treats diverse class members as if their claims were of equal worth."). In addition to raising adequacy concerns, differences in state law may undermine predominance, "compounding" the questions that affect only individual members. Amchem, 521 U.S. at 624, 138 L. Ed. 2d 689, 117 S. Ct. 2231. For these reasons, the Court, unlike the end payor plaintiffs, may not gloss over differences in state law by characterizing all claims as "questionable but potentially viable." Pls.' Supp. Mem. at 8.

The Court also rejects the suggestion that its approach to determining the "content" of state law ought differ here. 19 Charles Alan Wright, Arthur R. Miller & Edward H. Cooper, Federal Practice and Procedure § 4507. Although the Court must, in the context of settlement, "round [] off the differences" to some extent, Carrington & Apanovitch, supra, at 466, its role in resolving questions of state law remains otherwise unchanged: it "must determine issues of state law as it believes the highest court of the state would determine **[**21]** them," Wright, Miller & Cooper, supra, § 4507. The end payor plaintiffs nevertheless urge the Court to be "humble" in its determinations. As to the need for humility, this Court does not disagree. As to the consequences of humility, however, this Court has a different view. Humility does not, as the end payor plaintiffs suggest, require the Court to favor recovery. Rather, it requires the Court to apply state law "'as it exists.'" Wright, Miller & Cooper, supra, § 4507 (quoting Burris Chem., Inc. v. USX Corp., 10 F.3d 243, 247 (4th Cir. 1993)). Here, the relevant state law is uniformly "guided" by federal interpretation. E.g., Md. Code Ann., Comm. Law II § 11-202(a); see Pls.' Class Certification Mem. [Doc. No. 127], Ex. A. Accordingly, absent an express indication to the contrary, the Court presumes that state law is guided by the federal rule of Illinois Brick. See FTC v. Mylan Lab., Inc., 62 F. Supp. 2d 25, 43 (D.D.C. 1999). Although this presumption acts to bar recovery in many states, it simply is not this Court's "function . . . to expand the existing scope of state law." Wright, Miller & Cooper, supra, § 4507; **[**22]** see Migliori v. Airborne Freight Corp., 952 F. Supp. 38, 44 n.7 (D. Mass. 1997).

Having thus established the framework for its inquiry, the Court proceeds to consider the states included in the proposed settlement class. The Court offers its analysis mindful that "at some point there must be an end to reclassification." Ortiz, 527 U.S. at 857, 144 L. Ed. 2d 715, 119 S. Ct. 2295. The following variations, however, raise serious concerns of adequacy and predominance, and, as such, warrant special attention.

B. Previously Excluded States

1. Excluded "Exemplar States" [3]

Florida. Kansas, Maine, Michigan, Minnesota, New York, North Carolina. In **[*23]** its previous certification order, the Court excluded end payors from the above exemplar **[**23]** states because the "laws of [these] states incorporate variations that counsel against certification." See Relafen, 221 F.R.D. at 280. Because the proposed settlement class essentially must meet the same specifications, Amchem, 521 U.S. at 620, 138 L. Ed. 2d 689, 117 S. Ct. 2231, these "variations" in state law remain relevant. Significantly, the Court excluded end payors from these states not because their inclusion would "present intractable management problems," id. (citing Fed. R. Civ. P. 23(b)(3)(D)), but because their inclusion would raise concerns regarding the predominance of common questions, the adequacy of representation, and the superiority of class resolution. See Relafen, 221 F.R.D. at 276, 280. These concerns "persist [] when settlement, rather than trial, is proposed." Amchem, 521 U.S. at 621, 138 L. Ed. 2d 689, 117 S. Ct. 2231.

The end payor plaintiffs nevertheless urge the Court to abandon its practice of "considering statutory and common law claims asserted under the laws of the same state as a pair," Relafen, 221 F.R.D. at 280. See Pls. Supp. Mem., Ex. A (The Rationale for the Classification of Group I States) ("Rationale") at 2-4 (including **[**24]** end payors from previously excluded exemplar states because either their statutory or common law claim "remains viable"). As the Court previously explained, however:

> To the extent that a judgment in this action would be claim preclusive, [as the proposed settlement would be, see Am. Stip. & Agreement P 18,] including State *A* equitable claims would effectively waive State *A* statutory claims, raising adequacy concerns for end payors who might prefer to litigate their statutory claims individually or as part of a State *A* class.

Relafen, 221 F.R.D. at 280. The need for fair and adequate representation demands "undiluted, even heightened, attention in the settlement context." [4] Amchem, 521 U.S. at 620, 138 L. Ed. 2d 689, 117 S. Ct. 2231; see also id. 521 U.S. at 615, 138 L. Ed. 2d 689, 117 S. Ct. 2231 (explaining that the Rule 23(b)(3) requirements of predominance and superiority attempt to balance the "competing tugs of individual autonomy for those who might prefer to go it alone or in a smaller unit, on the one hand, and systemic efficiency on the other"). As such, the Court may not certify a class including end payors from previously excluded exemplar states without, at a minimum, **[**25]** ensuring that absent class members receive the "structural protection" required by Amchem. See Ortiz, 527 U.S. at 857, 144 L. Ed. 2d 715, 119 S. Ct. 2295.

---

[3] Adopting the practice of the end payor plaintiffs, the Court uses the term "exemplar states" to refer to Arizona, California, Florida, Kansas, Maine, Massachusetts, Michigan, Minnesota, New York, North Carolina, Tennessee, and Vermont. See Proposed Exemplar Order at 1.

[4] Consider end payors from Maine, for example. If permitted to bring their own class action, they would be free to attempt a "stronger and more precise showing of individual impact." See Relafen, 221 F.R.D. at 282. They would then face no bar to asserting their statutory claims, which provide for recovery of "3 times the amount of the damages sustained and cost of suit, including necessary and reasonable investigative costs, reasonable experts' fees and reasonable attorney's fees." Me. Rev. Stat. Ann. tit. 10, § 1104(1). If, on the other hand, end payors from Maine are included in the proposed settlement, they must release their statutory claims in exchange for a maximum recovery of 1.5 times the amount of their "Recognized Consumer Claims." See Am. Stip. & Agreement PP 17-18.

2. Group II States

Alabama, Alaska, Colorado, Connecticut, Delaware, **[**26]** Georgia, Indiana, Kentucky, Mississippi, Missouri, Montana. New Hampshire, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Texas, Utah, Virginia, Wyoming. The inclusion of end payors from Group II states poses its own threat to "class cohesion." See *Amchem, 521 U.S. at 624, 138 L. Ed. 2d 689, 117 S. Ct. 2231*. Unlike end payors from Group I states, end payors from Group II states lack recognized rights of action under both the statutory schemes, compare *Relafen, 221 F.R.D. at 278*, and the common law, see Order of 12/19/03 at 2-3, of their respective states. As to the latter common law claims, the Court offers a brief explanation. The rule of Illinois Brick, to which Group II states look for guidance, seeks to "eliminate the complications of apportioning overcharges," "eliminate multiple recoveries," and "promote the vigorous enforcement of the antitrust laws." *UtiliCorp United. 497 U.S. at 208, 212, 214, 111 L. Ed. 2d 169, 110 S. Ct. **[*24]** 2807*. Respectfully, the Court is not persuaded that these concerns "are absent under Plaintiffs' claims of unjust enrichment.'" Pls.' Supp. Mem. at 4 (quoting In re Cardizem CD Antitrust Litig., Master File No. 99-md-1278, Order No. 70, at 31 (E.D. **[**27]** Mich. May 23, 2003), attached as Ex. A to Pls.' Unjust Enrichment Opp'n [Doc. No. 205]). Specifically, determining the benefit conferred by end payors involves at least some of "the complications of apportioning overcharges" and creates serious risk of "multiple recoveries." See *In re Terazosin Hydrochloride Antitrust Litig., 160 F. Supp. 2d 1365, 1380 (S.D. Fla. 2001)* ("Illinois Brick expressed concerns [regarding] indirect purchasers actions . . .

The end payors' unjust enrichment claim raises identical concerns."); *Mylan Laboratories, 62 F. Supp. 2d at 43* (" Providing monetary relief to indirect purchasers increases the risk of duplicative recovery. Therefore, restitution and/or disgorgement on behalf of indirect purchasers will be denied absent express authority for such relief under state law."). As explained in Illinois Brick, the "risk" arises because "following an automatic recovery of the full overcharge by the direct purchaser, the indirect purchaser could sue to recover the same [or a portion of the same] amount." *Illinois Brick, 431 U.S. at 730, 52 L. Ed. 2d 707, 97 S. Ct. 2061*. For this reason, many of the Group I "repealers" specifically **[**28]** provide, for example, that "the court shall take all steps necessary to avoid duplicate liability for the same injury including transfer and consolidation of all actions." *740 Ill. Comp. Stat. 10/7*; see *Ciardi v. F. Hoffmann-La Roche, Ltd., 436 Mass. 53, 78 n.9, 762 N.E.2d 303 (2002)*. If, in determining the law of Group II states (which lack such repealers), this Court were simply to "read in" unjust enrichment claims, it would frustrate the ability of Group II states to make the same policy choices.

The parties respond that these end payors are properly included because they retain, "at a minimum, a right to appeal this Court's decision." Defs.' Mem. at 5; see Pls.' Supp. Mem. at 7-8. Their response, although of course accurate, largely misses the mark. The Court does not deny that Group II end payors may "upset" its determinations, either by filing an appeal, or by initiating an action in state court, see *Migliori, 952 F. Supp. 38, 44 n.7* (noting that a Massachusetts state judge, unlike a federal district judge, need "not hesitate to participate in the evolution of Massachusetts common law"). The Court determines only that their rights to assert such challenges **[**29]** are substantially different from the rights enjoyed by Group I end payors. For this reason, ***HN7***[] "the claims of these disparate groups cannot be mixed together under *Rule 23(a)*." Cf. *Valley Drug Co. v. Geneva Pharms., Inc., 350 F.3d 1181, 1195 (11th Cir. 2003)* (determining that representation was inadequate where the economic interests of certain class members were "significantly different from -- and potentially antagonistic to -- [those of] the named representatives purporting to represent them").

The Court is not convinced that the present Group I-Group II distinction sufficiently addresses these concerns. First, as noted above, this allocation was not made after "division into homogenous subclasses," each "with separate representation." *Ortiz, 527 U.S. 815, 856, 144 L. Ed. 2d 715, 119 S. Ct. 2295*. Second, although Group I consumers would be "favored" should the fund prove insufficient, consumers otherwise would receive the same compensation "without regard to their state of residence." Pls.' Mem. at 18. Thus, in the more likely event that the fund is sufficient, see Pls.' Supp. Mem. at 18 (noting that "historically consumer participation in these settlements has been less than 20%"), **[**30]** consumers would be treated "all the same," *Ortiz, 527 U.S. at 857, 144 L. Ed. 2d 715, 119 S. Ct. 2295*. As noted in Ortiz, this "itself is an allocation decision with results almost certainly different from the results that those with [more valuable claims] would have chosen." Id.; accord Amchem ("The disparity between . . .

categories of plaintiffs, and the diversity within each category are not made insignificant by the District Court's finding that petitioners' assets suffice to pay claims under the settlement. Although this is not a limited fund' case certified under *Rule 23 (b) (1) (B)*, the terms of the settlement reflect essential allocation decisions designed to confine compensation and to limit defendants' liability." (citation omitted)).

[*25] Notwithstanding the above, the parties suggest that Group II end payors must be included because as a practical matter, "a settlement may be impossible unless some compensation is provided." Pls.' Supp. Mem. at 11-13; Defs.' Mem. at 3. Both *Amchem* and *Ortiz*, however, expressly rejected similar arguments, namely that a reviewing court may certify a settlement class simply because settlement is practical or desirable:

> The argument **[**31]** is sensibly made that a nationwide administrative claims processing regime would provide the most secure, fair, and efficient means of compensating victims of asbestos exposure. Congress, however, has not adopted such a solution. And *Rule 23*, which must be interpreted with fidelity to the *Rules Enabling Act* and applied with the interests of absent class members in close view, cannot carry the large load. . . .

Amchem, 521 U.S. 591, 628-29, 138 L. Ed. 2d 689, 117 S. Ct. 2231 (footnote omitted).

> Under the present regime, transactional costs will surely consume more and more of a relatively static amount of money to pay these claims.
> But we are not free to devise an ideal system for adjudicating these claims. Unless and until the Federal Rules of Civil Procedure are revised, the Court's opinion correctly states the existing law . . .

Ortiz, 527 U.S. at 865, 144 L. Ed. 2d 715, 119 S. Ct. 2295 (Rehnquist, C.J., concurring). Here, as in Amchem, ***HN8***[] legislative choices -- even choices not to act -- must be respected: "Differences across states may be costly for courts and litigants alike, but they are a fundamental aspect of our federal republic and must not be overridden in a quest to clear the queue **[**32]** in court." *In re Bridgestone/Firestone, Inc., 288 F.3d 1012, 1020 (7th Cir. 2002)*.

C. States Represented by their Attorneys General

Arkansas, Idaho, Illinois, Maryland, Oregon, Washington. The above Group II states move to intervene under *Rule 24(a)*, seeking to secure the more favorable allocation made to Group I states. Each of these states authorizes its attorney general to represent residents as parens patriae, *Ark. Code Ann. § 4-75-315*; *Idaho Code § 48-108*; *740 Ill. Comp. Stat. 10/7*; *Md. Code Ann., Com. Law II, § 11-209*; *Or. Rev. Stat. § 646.775*; *Wash. Rev. Code § 19.86.080*, and, with the exception of those discussed below, repudiates the rule of Illinois Brick, *Ark. Code Ann. § 4-75-315*; *Idaho Code § 48-108*; *740 Ill. Comp. Stat. 10/7*. Notwithstanding these commonalities, the laws of certain states incorporate variations that cast doubt on the "interest" claimed by the attorneys general. See *Fed. R. Civ. P. 24(a)(2)*.

1. Adherence to Illinois Brick

Maryland. Oregon, Washington. The Court previously suggested that the unjust enrichment claims asserted by Group II end payors may raise "identical" Illinois Brick concerns. **[**33]** *Terazosin, 160 F. Supp. 2d at 1380*. The same is true of parens patriae claims asserted by attorneys general. The "rationales of . . . Illinois Brick may not apply with equal force," but they nevertheless are implicated. See *UtiliCorp United, 497 U.S. at 208, 111 L. Ed. 2d 169, 110 S. Ct. 2807*. For example, although attorneys general typically will have adequate incentives to "promote the vigorous enforcement of the antitrust laws," recovery on behalf of indirect purchasers nevertheless creates a serious risk of "multiple recoveries." Id. As explained above, the risk arises because the rule of Illinois Brick, which has been incorporated by the courts of Maryland, Oregon, and Washington, bars recovery by the indirect purchaser in favor of "recovery of the full overcharge by the direct purchaser." *Illinois Brick, 431 U.S. at 730, 52 L. Ed. 2d 707, 97 S. Ct. 2061*; see *Davidson v. Microsoft Corp., 143 Md. App. 43, 52, 792 A.2d 336 (2002)* ("We hold today, therefore, that until the legislature expressly provides otherwise, Illinois Brick bars suits by indirect purchasers seeking to recoup alleged overcharges under MATA [the *Maryland Antitrust Act*]."); Daraee v. Microsoft Corp., No.

0004 03311, 2000 WL 33187306, **[**34]** * 1 (Or. Cir. June 27, 2000) ("The indirect purchaser rule of *Illinois Brick v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)* [,] applies to Oregon's Antitrust Act."); *Blewett v. Abbott Lab., 86 Wash. App. 782, 789, 938 P.2d 842 (1997)* ("The holding of Illinois Brick is rational **[*26]** and based on the collectively greater experience of federal courts in adjudicating antitrust suits. We conclude we must follow it.") [5] **[**35]** ; see also *Oregon Laborers-Employers Health & Welfare Trust Fund v. Philip Morris Inc., 185 F.3d 957, 963 n.4 (9th Cir. 1999)* (noting that "the district court . . . [had] treated [Oregon] state and federal antitrust claims as one and the same for purposes of standing analysis" and doing the same). [6] Because the Court concludes that permitting additional recovery on behalf of indirect purchasers would undermine the policies of these states, it determines that their intervention is not warranted.

2. Recently Enacted Repealers

Arkansas, Idaho. Certain of the attorneys general assert authority under recently enacted Illinois Brick repealers. See *Ark. Code Ann. § 4-75-315* (effective Apr. 8, 2003); *Idaho Code § 48-108* (effective July 1, 2000). Unlike interpretations or clarifications of existing law, see, e.g., *Elkins v. Microsoft Corp., 174 Vt. 328, 338, 817 A.2d 9 (2002)*, the above repealers "effectuate a change in [state] law," id. See Act of Apr. 8, 2003, 2003 Ark. Acts 1172 ("It is found and determined by the Eighty-fourth General Assembly that without **[**36]** the amendments herein, the Attorney General is unable to adequately protect the interests of the consumers of the State of Arkansas. . . ."); Idaho Competition Act of 2000, *ch. 148, 2000 Idaho Sess. Laws 148* ("The proposed *Idaho Competition Law* replaces Idaho's present *Antitrust Act*."). More specifically, they "increase a party's liability for past conduct." *Landgraf v. USI Film Prods., 511 U.S. 244, 280, 128 L. Ed. 2d 229, 114 S. Ct. 1483 (1994)*; see *California v. ARC America Corp., 490 U.S. 93, 105, 104 L. Ed. 2d 86, 109 S. Ct. 1661 (1989)* (noting that state indirect purchaser claims "impose liability over and above that authorized by federal law").

For this reason, the Court presumes that the Arkansas and Idaho repealers "are to be given only prospective application." *City of Dover v. Barton, 337 Ark. 186, 189, 987 S.W.2d 705 (1999)*; accord *City of Garden City v. City of Boise. 104 Idaho 512, 515, 660 P.2d 1355 (1983)*. To presume the contrary would offend "elementary considerations of fairness," which "dictate that individuals should have an opportunity to know what the law is and to conform their conduct accordingly." *Landgraf, 511 U.S. at 265, 128 L. Ed. 2d 229, 114 S. Ct. 1483*. Here, the conduct complained of [7] -- namely SmithKline's **[**37]** enforcement of its patent, see *In re Relafen Antitrust Litig.,*

---

[5] The Court interprets a subsequent portion of Blewett -- which rejects the indirect purchaser's request for injunctive relief but notes that she is "not entirely without a remedy," *Blewett, 86 Wash. App. at 790, 938 P. 2d 842* -- to refer to the attorney general's authority to "restrain and prevent" antitrust violations, *Wash. Rev. Code § 19.86.080*. A contrary interpretation (that is, an interpretation which would permit the attorney general to seek monetary relief on the indirect purchaser's behalf) would implicate the "multiple recoveries" concerns of Illinois Brick, a rule the Blewett court had just confirmed as "rational" and applicable. *Blewett, 86 Wash. App. at 789, 938 P.2d 842*.

[6] On the persuasive authority of determinations by a "federal district court judge who sits in a particular state," see Wright, Miller & Cooper, supra, § 4507:

> As a general proposition, a federal district court judge who sits in a particular state, especially one who has practiced before its courts, may be better able to resolve complex questions regarding the law of that state than is a federal appellate judge who has no such personal acquaintance with the law of the state.

Id.

[7] In addressing the reach of New York's repealing amendment, the Cardizem court focused its attention on the time of injury, rather than the time of violation. Cardizem , supra, at 12. This Court respectfully disagrees. The presumption against retroactive legislation is rooted in the belief that "individuals should have an opportunity . . . to conform their conduct" to the law. *Landgraf, 511 U.S. at 265, 128 L. Ed. 2d 229, 114 S. Ct. 1483*. Accordingly, it is the relationship between the statute and the conduct -- not the injury -- that raises concerns of "unfair surprise" and "upsetting expectations." *Id., 511 U.S. at 283 n.35, 128 L. Ed. 2d 229, 114 S. Ct. 1483*.

286 F. Supp. 2d 56, 61 (D. Mass. 2003) -- occurred prior to the statutory enactments. Following the traditional presumption, then, the Court declines to apply the statutes absent a clearer expression of retroactive reach. Compare Ark. Code Ann. § 4-75-320 (c) ("This section is not intended to allow for the commencement of any action by the Attorney General under the provisions of this **[*27]** subchapter for events occurring prior to the enactment of this section of which the Attorney General had actual knowledge.").

[38] D. Non-Exemplar Group I States**

District of Columbia, Hawaii. Iowa, Louisiana, Nebraska, Nevada, New Mexico, New Jersey, North Dakota, South Dakota, West Virginia. Wisconsin. The Court concludes by considering the Group I states not addressed in the Court's previous certification order. Like the exemplar states, each of these Group I states, with the exception of those discussed below, "permits indirect purchaser actions under its antitrust, consumer protection, or unfair trade practices, statutes." *Relafen. 221 F.R.D. at 278*; see *D.C. Code Ann. § 28-4509*; *Haw. Rev. Stat. § 480-3*; *Comes v. Microsoft Corp., 646 N.W.2d 440 (Iowa 2002)*; *Arthur v. Microsoft Corp., 267 Neb. 586, 676 N.W.2d 29 (2004)*, *Nev. Rev. Stat. Ann. § 598A.210*; *N.M. Stat. Ann. § 57-1-3*, *N.D. Cent. Code § 51-08.1-08*; *S.D. Codified Laws § 37-1-33*; W. Va. Code St. R. tit. 142, § 9; *Wis. Stat. § 133.18*. In addition, however, the laws of these states incorporate certain significant differences, to which the Court now turns.

1. Adherence to Illinois Brick

Louisiana, New Jersey. As described above, "absent an express indication to the contrary, the **[**39]** Court presumes that state law is guided by the federal rule of Illinois Brick." The authority cited by the end payor plaintiffs -- which at best suggests a "split of authority" in the states of Louisiana and New Jersey, Rationale at 6 -- fails to provide such an indication. See *Free v. Abbott Lab., 176 F.3d 298, 301 (5th Cir. 1999)* ("Because the Illinois Brick scheme is preferable for this purpose, we believe Louisiana courts would follow it.") [8] **[**40]** ; *Van Natta Mechanical Corp., v. Di Staulo, 277 N.J. Super. 175, 190, 649 A.2d 399 (N.J. Super. Ct. App. Div. 1994)* (affirming the dismissal of a state antitrust claim because the plaintiff failed to meet the standing requirements applied under federal law). [9] Accordingly, the Court concludes that these states are more properly placed in Group II.

2. Minimum Statutory Damages

New Mexico, Hawaii. Certain of the Group I states provide minimum statutory damages for antitrust plaintiffs. See *Haw. Rev. Stat. § 480-13(b)* ("Any consumer who is injured by any unfair or deceptive act . . . (1) May sue for

---

[8] The end payor plaintiffs urge the Court to disregard the Fifth Circuit's determination because Louisiana ***antitrust law***" was intended to be sweeping in its breadth."' Pls.' Supp. Mem. at 6 (quoting *Louisiana Power & Light Co. v. United Gas Pipe Line Co., 493 So. 2d 1149, 1154 (La. 1986))*. As the Fifth Circuit noted, however, Louisiana Power addressed a question of statutory interpretation "distinguishable" from the "policy laden" question of defining antitrust injury: "Louisiana courts have not eschewed the importance of defining antitrust injury in this manner but, in fact, have deferred to federal precedent." *Free, 176 F.3d at 300*.

Moreover, even if the Court were not convinced by Free, it would remain convinced by Loew's: "In *Loew's, Incorporated v. Don George, Inc., 237 La. 132, 110 So.2d 553 (La. 1959)*, the Supreme Court held that an antitrust action sounds in tort and the one year prescriptive period of *La. C.C. art. 3492* applies in a private action." *State ex rel. Ieyoub v. Bordens, Inc., 684 So.2d 1024, 1026 (La. Ct. App. 1996)*. Under Loew's, end payors from Louisiana, unlike end payors from other Group I states, are subject to an apparent time bar, a fact that "'invariably weighs against class certification under *Rule 23(b) (3)*.'" See *Relafen, 221 F.R.D. at 283* (quoting *Waste Management, 208 F.3d at 296*).

[9] The Court is not persuaded that end payors claims present a different question because they are "premised primarily on the *New Jersey Consumer Fraud Act*" rather than the *New Jersey Antitrust Act.* Pls.' Supp. Mem. at 5. Like the unjust enrichment claims described above, consumer fraud claims may create precisely the risk of "multiple recoveries," which Illinois Brick (and parallel New Jersey decisions) seek to avoid.

damages sustained by the consumer and, if the judgment is for the plaintiff, the plaintiff shall be awarded a sum not less than $ 1,000 [or $ 5,000 where the plaintiff is an elder'] or threefold damages by the plaintiff sustained, whichever sum is the greater, and reasonable attorneys' fees together with the costs of suit [.] "); *N.M. Stat. Ann. § 57-12-10(B)-(C)* (permitting parties complaining of an unfair **[**41]** or deceptive trade practice to recover "actual damages or the sum of one hundred dollars ($ 100), whichever is greater" as well as attorneys' fees and costs). Not surprisingly, though, these minimum **[*28]** remedies are unavailable in class actions. See *Haw. Rev. Stat. § 480-13(c)(1)* ("The minimum $ 1,000 recovery provided in subsections (a) and (b) shall not apply in a class action or a de facto class action lawsuit [.] "); *N.M. Stat. Ann. § 57-12-10(E)* ("In any class action filed under this section, the court may award damages to the named plaintiffs as provided in Subsection B of this section and may award members of the class such actual damages as were suffered by each member of the class as a result of the unlawful method, act or practice.").

Including end payors from Hawaii and New Mexico in the proposed class thus waives their rights to substantial [10] statutory damages. As the Court explained in its previous opinion:

> Such waiver necessarily casts doubt on the named plaintiffs' fitness to represent class members who might prefer to pursue statutory or punitive remedies individually.
>
> Nor are the Court's concerns lessened because any class member wishing to pursue his **[**42]** or her statutory right to minimum and treble damages may opt out of the class. Scholars have recognized that as a practical matter, the opportunity to opt out is unevenly distributed, with far lesser opportunity held by plaintiffs like those here, who have small rather than independently viable claims, and who receive best practicable rather than individual notice.

Relafen, 221 F.R.D. at 286 (citations and alterations omitted). For these reasons, the Court determines that Hawaii and New Mexico ought be grouped with the excluded exemplar states.

[**43] 5. Direct Benefit

North Dakota. The Court turns finally to unjust enrichment claims asserted under the common law of North Dakota. In *Apache Corp. v. MDU Resources Group, Inc., 1999 ND 247, 603 N.W.2d 891 (N.D. 1999)*, ***HN9***[] the North Dakota Supreme Court suggested that the doctrine of unjust enrichment applies only "if another has, without justification, obtained a benefit at the direct expense of the [complainant].'" *Id. at 895* (quoting *Midland Diesel Serv. & Engine Co. v. Sivertson, 307 N.W.2d 555, 557 (N.D. 1981))* (alteration in original) (emphasis added). Here, the benefits that SmithKline received were obtained most directly from wholesalers, who, in turn, obtained benefits from end payors. Because its precedent casts doubt on the end payors' unjust enrichment claims, North Dakota ought also be grouped with the excluded exemplar states. See *Relafen, 221 F.R.D. at 287* (excluding North Carolina plaintiffs from the exemplar classes because they "would be subject to an individualized defense regarding the direct benefit' element of their unjust enrichment claims").

IV. CONCLUSION

---

[10] The value of their statutory damages provisions distinguishes the laws Hawaii and New Mexico from the law of Massachusetts, for example. See *Mass. Gen. Laws ch. 93A, § 9* ("If the court finds for the petitioner, recovery shall be in the amount of actual damages or twenty-five dollars, whichever is greater. . . ."). The Seventh Circuit in Reynolds suggested that waiver of such modest amounts may not present a "fatal" conflict. See *Reynolds, 288 F.3d at 282* (noting that where class members would receive $ 15 for one refund anticipation loan and $ 30 for two or more such loans, there was an unremarked conflict "between those class members who took out one or two refund anticipation loans and those who took out more than two and thus will receive no compensation for the additional damages," but declining to find this conflict fatal "in light of the modesty of the stakes").

In sum, the Court is **[**44]** not convinced that the proposed settlement class, as presently defined, meets the requirements of *Rule 23*. The Court is not insensitive to the "tugs . . . of systemic efficiency." *Amchem. 521 U.S. at 615, 138 L. Ed. 2d 689, 117 S. Ct. 2231*. But it is perhaps in these circumstances -- when it is faced with obvious savings of time, effort, and expense -- that the Court must most carefully safeguard the rights of absent class members "who might prefer to go it alone." Id.

WILLIAM G. YOUNG

CHIEF JUDGE

Blind Doctor, Inc. v. Hunter Douglas, Inc.

United States District Court for the Northern District of California

September 7, 2004, Decided

No. C-04-2678 MHP

Reporter

2004 U.S. Dist. LEXIS 18480 *; 59 Fed. R. Serv. 3d (Callaghan) 635

BLIND DOCTOR INCORPORATED dba BLIND DOCTOR.COM and dba WELLS INTERIORS, a Delaware Corporation registered to do business in California, Plaintiff, V. HUNTER DOUGLAS, INC., a Foreign Corporation registered to do business in California, Defendants.

Disposition: Plaintiff's motion for preliminary injunction DENIED.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN1[] **Injunctions, Grounds for Injunctions**

A preliminary injunction is a "provisional remedy." Aimed at preserving the status quo and preventing the occurrence of irreparable harm during the course of litigation, preliminary injunctions may be issued where the moving party has established two prerequisites for equitable relief: one, a threat of irreparable injury and, two, the inadequacy of available legal remedies. *Fed. R. Civ. P. 65* (placing this type of injunctive relief within the bounds of the court's discretion and equitable power). In general, a preliminary injunction is appropriate where a plaintiff can demonstrate either: (1) a likelihood of success on the merits and the possibility of irreparable injury; or (2) that serious questions going to the merits were raised and the balance of hardships tips sharply in plaintiff's favor. The two components of this test sit on a kind of sliding scale or "continuum;" thus, the less certain the district court is of the likelihood of success on the merits, the more plaintiffs must convince the district court that the public interest and balance of hardships tip in their favor.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > Remedies > Injunctions > General Overview

HN2[] **Injunctions, Preliminary & Temporary Injunctions**

In all occasions in which a court issues a preliminary injunction, *Fed. R. Civ. P. 65(d)* requires that the court make the injunction specific in terms describing in reasonable detail, and not by reference to the complaint or other document, the act or acts sought to be restrained. *Fed. R. Civ. P. 65(d)*. This mandate for specificity ensures that those against whom an injunction is drawn receive fair and precise notice of what conduct is prohibited.

HN3[] **Sherman Act, Claims**

The Sherman Antitrust Act (Sherman Act) makes illegal every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations. *15 U.S.C.S. § 1*. In order to establish a claim under *§ 1* of the Sherman Act, a plaintiff must demonstrate: (1) that there was a contract, combination, or conspiracy; (2) that the agreement unreasonably restrained competition under either a per se rule of illegality or a rule of reason analysis; and (3) that the restraint actually restrains competition, causing injury that extends beyond the impact on the claimant to affect the field of commerce in which the claimant is engaged (i.e., "antitrust injury").

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Regulated Industries, Higher Education & Professional Associations**

Despite the language in *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, prohibiting any contract, the Supreme Court has repeatedly declined to read this language literally and instead has recognized that Congress intended to outlaw only unreasonable restraints. Following this logic, the Court has set forth a two-tiered mode of analysis to determine whether a contract, combination, or conspiracy is "unreasonable:" some agreements are analyzed under a per se rule of illegality while others are assessed from a rule of reason analysis. Most antitrust claims are analyzed under a rule of reason, according to which the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition. This analysis is holistic and inclusive, taking into account a variety of factors including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Some types of restraint have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful per se. Per se analysis of a restraint is appropriate once experience with a particular kind of restraint enables the court to predict with confidence that the rule of reason will condemn it. Because of the level of certitude required, courts have been hesitant to adopt per se rules with regard to restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

The bedrock of any antitrust claim under *§1* of the Sherman Act, *15 U.S.C.S. § 1*, is a conspiracy or compact between two parties. While the words "conspiracy" or "agreement" are freely used in colloquial speech, in the antitrust milieu they take on discrete and defined meanings. In ***antitrust law***, an agreement is found only when the conspirators have a unity of purpose or a common design and understanding, or a meeting of the minds in an unlawful arrangement. In antitrust actions, there is an essential distinction between illegal concerted actions and lawful independent decisions, with the conspiring sheep fenced in by *§ 1* analysis and the independent goats left to safely graze entirely alone. Independent action is not proscribed. A manufacturer of course generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > Sherman Act > General Overview

Energy & Utilities Law > Antitrust Issues > Pricing Conduct

HN10[] **Antitrust & Trade Law, Regulated Industries**

Price fixing comes in two general strains: horizontal and vertical. Vertical price fixing occurs when a supplier attempts to fix the prices charged by those who resell its products. A vertical price fixing scheme setting minimum prices is generally subject to per se analysis. However, a vertical price fixing scheme setting maximum prices is not a per se antitrust violation and should be analyzed under the rule of reason approach. Horizontal price fixing, by contrast, is a restraint imposed by agreement between competitors to fix prices and muscle out competition. Horizontal price fixing is always subject to per se analysis and is the poster child of a Sherman Antitrust Act violation.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN11[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Under a rule of reason analysis for restraints of trade, a plaintiff must identify the relevant geographic and product markets in which the plaintiffs and the defendants compete and allege facts demonstrating that the defendants' conduct has an anticompetitive effect on those markets.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN12[] Antitrust & Trade Law, Sherman Act

Failure to identify a relevant market is a proper ground for dismissing a Sherman Act claim under a rule of reason analysis.

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] Antitrust & Trade Law, Sherman Act

Under the Sherman Act, it is not enough for a plaintiff to merely allege injury to itself as a result of defendant's practices; competition within the industry itself must actually be restrained for an actionable claim. It is well established that the antitrust laws are only intended to preserve competition for the benefit of consumers. Thus the famous aphorism, it is competition, not competitors, which the Sherman Act protects. The United States Court of Appeals for the Ninth Circuit has specifically identified four requirements for a showing of antitrust injury: (1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) is of the type the antitrust laws were intended to prevent. Only if all four requirements are satisfied will the court label plaintiff's alleged injury an actionable "antitrust injury."

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN14[] Private Actions, Standing

Without a violation of the antitrust laws, there can be no antitrust injury.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN15[] Injunctions, Grounds for Injunctions

The second component of the two-part test for injunctive relief requires the moving party to show that the balance of hardships tip in its favor. Because the branches of the preliminary injunction test represent two points on a sliding scale in which the required degree of irreparable harm increases as probability of success decreases, a strong showing of one factor of the test can tip the scales in the evaluation of whether a preliminary injunction is justified. As the Ninth Circuit has said, if the movant has a 100 percent probability of success on the merits, then the balance of the hardships factor need not be regarded.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN16[] **Injunctions, Grounds for Injunctions**

Loss of profit is generally not recognized as an irreparable harm sufficient to sustain a motion for preliminary injunction. The temporary loss of income, ultimately to be recovered, does not usually constitute irreparable injury. The key word in this consideration is irreparable. Mere injuries, however substantial, in terms of money, time and energy necessarily expended are not enough.

Opinion

MEMORANDUM AND ORDER

Motion for Preliminary Injunction

In July 2004, plaintiff Blind Doctor, Inc. brought this civil action against defendant Hunter Douglas, Inc. seeking injunctive relief for alleged violations of federal ***antitrust law***. See *15 U.S.C. § 1*. At its core, Blind Doctor's complaint alleges that Hunter Douglas engaged in price fixing by placing restrictions on the advertising of its window coverings. Before the court is Blind Doctor's motion for preliminary injunction, a request to have the court prevent Hunter Douglas from discontinuing shipment of its coverings to Blind Doctor due to Blind Doctor's violation of Hunter **[*2]** Douglas' advertising policies. Having considered the arguments presented and for the reasons stated below, the court enters the following memorandum and order.

BACKGROUND

[1]

A Delaware corporation licensed to do business in California, plaintiff Blind Doctor is involved in the buying, selling, installing, and repairing of window coverings. [2] The owners and operators of the corporation are Eric and Lynn Wells -- a husband and wife duo who founded Blind Doctor in May of 2001 and currently employ five additional employees at their primary place of business in San Ramon, California. Mr. and Mrs. Wells have been involved in the retail side of the window covering business since 1976. From 1976 to 2000, they operated an Oregon corporation known as Wells Interiors, Inc. which did business in California, Oregon, and Nevada, and a mail order business throughout the United States. Mr. and Mrs. Wells previously sold Hunter Douglas window coverings through Wells Interiors, but in 2000 they filed a petition under the bankruptcy laws in California, and Wells Interiors was liquidated as part of that proceeding. As a result of the bankruptcy, Hunter Douglas was unable to collect on substantial **[*3]** accounts receivable owed by Wells Interiors. Furthermore, Wells Interiors ceased honoring its customer service obligations and warranty claims submitted by customers that had purchased Hunter Douglas products, forcing Hunger Douglas to directly handle customer service issues that normally would have been handled by Wells Interiors.

Defendant Hunter Douglas, Inc. is a foreign corporation engaged in the manufacture, distribution, and sale of window coverings throughout the United States and the world. While Hunter Douglas is involved in the production of window covering parts, it contracts with a select group of licensed manufacturers **[*4]** to assemble the parts into finished products ready for sale. These licensed manufacturers -- known in the trade as fabricators -- are trusted with proprietary window covering parts from Hunter Douglas and function as the exclusive distributors of Hunter Douglas products to retailers and dealers. Hunter Douglas contracts with approximately ten such fabricators in the United States for distribution of its products; two of the fabricators are Blinds and Designs in Wixom, Michigan, and Steven Fabrics in Minneapolis, Minnesota. From May 2001 to April 2004, plaintiff purchased Hunter Douglas products through Blinds and Designs; from April 2004 to the present, plaintiff purchased defendant's finished window coverings from Steven Fabrics. [3] All of the fabricators, as wells as retailers like Blind Doctor, are at liberty to set their own prices for Hunter Douglas products.

[*5] The world of window covering manufacturing is characterized by fierce competition, and defendant Hunter Douglas accounts for just one of many window covering manufacturers currently competing in the market. In an effort to boost sales, retailers such as plaintiff offer customers a wide choice of window coverings from many different manufacturers. In 2001, Blind Doctor began dealing in various Hunter Douglas products while also offering a variety of other competing brands for sale. Without evidentiary support, plaintiff asserts that in 2002 alone Hunter Douglas products accounted for 60 to 70 percent of total sales. Hunter Douglas challenges this claim, offering statistical evidence to support its counterargument that Hunter Douglas products accounted for only 37 percent of Blind Doctor's sales in 2002.

Hunter Douglas views its overall positive brand image as one of its most significant assets in the highly competitive market of window coverings. To protect its reputation for quality customer service and to preserve the upscale image of its trade name, Hunter Douglas requires retail dealers to abide by certain advertising policies. All Hunter Douglas products are subject to advertising **[*6]** restrictions that forbid the use of false or misleading claims [4] **[*7]**

---

[1] Unless otherwise noted, the facts are uncontested and distilled from the parties' moving papers.

[2] "Window coverings" is an inclusive term referring to blinds, shades, and shutters. However, draperies or curtains are not considered window coverings. Gottuso Decl., at P 2. For those in the "House Beautiful" know, apparently the latter are included in the "window treatment" category.

[3] While alleging that the two fabricators -- Blinds and Designs and Steven Fabrics -- are co-conspirators in the antitrust violation, plaintiff oddly fails to name them as defendants in the current lawsuit. As a result, the fabricators are not formally parties to the current litigation and are merely mentioned in this order to provide factual context. Hunter Douglas, Inc. is the only defendant in the present action.

[4] According to the Hunter Douglas Dealer Advertising Policy, examples of false and misleading claims include any ad that contains the phrases "factory direct prices;" "factory sale;" "factory discount prices;" "warehouse prices/discounts;" "buy direct

in the actual advertisement. Company policy also restricts the printing of a discount for a product that exceeds the maximum discount outlined in the advertising policy. Certain products within the Hunter Douglas collection have been deemed "proprietary products" by the company, and these window coverings are under an even more restrictive advertising regime. With an eye towards preserving the quality image of these upscale proprietary products, Hunter Douglas prohibits retailers from selling them over the Internet or via toll -- free telephone numbers. [5] Still, all of Hunter Douglas' policies act merely to restrict the advertising practices of retailers; they do not dictate the actual prices retailers charge for Hunter Douglas products.

In September 2001, Hunter Douglas learned that Blind Doctor was creating a website through which Blind Doctor intended to sell certain propriety products made by Hunter Douglas over the Internet. After Blind Doctor ignored Hunter Douglas' request to cease such activity, Hunter Douglas severed its business **[*8]** relationship with Blind Doctor in April 2002. In justifying its decision to break ties, Hunter Douglas cited Blind Doctors' history of unresolved consumer complaints stemming from the Wells Interiors bankruptcy, along with a smattering of recent advertising policy violations. These violations included the improper placement of an advertisement that made unauthorized use of Hunter Douglas artwork; the improper offering of proprietary products on a website; and the offering of certain proprietary products through a mail order operation.

Blind Doctor later requested that Hunter Douglas reconsider its decision to terminate business ties. In a May 2002 letter, Hunter Douglas agreed to resume business with Blind Doctor provided that Blind Doctor cease violating Hunter Douglas' advertising policy. This newly reinstated business relationship proved tenuous at best, and two years later, in June 2004, Hunter Douglas once again severed its business relationship with Blind Doctor due to Blind Doctor's continued use of prohibited forms of advertising along with the history of unresolved consumer complaints stemming from Wells Interiors. [6]

[*9] In response, plaintiff Blind Doctor filed this action on July 2, 2004, alleging that Hunter Douglas' advertising policies constitute an impermissible vertical restraint under Section One of the Sherman Act. See *15 U.S.C. § 1*. Plaintiff now seeks a preliminary injunction against Hunter Douglas, requiring Hunter Douglas to continue making its products available to plaintiff for retail sale.

LEGAL STANDARD

HN1[] A preliminary injunction is a "provisional remedy." *Napa Valley Publ. Co. v. City of Calistoga, 225 F. Supp. 2d 1176, 1180 (N.D. Ca. 2002)* (Chen, Mag. J.) (citation omitted). Aimed at preserving the status quo and preventing the occurrence of irreparable harm during the course of litigation, id., preliminary injunctions may be issued where the moving party has established two prerequisites for equitable relief: one, a threat of irreparable injury and, two, the inadequacy of available legal remedies. See *Fed. R. Civ. P. 65* (placing this type of injunctive relief within the bounds of the court's discretion and equitable power); *Easyriders Freedom F.I.G.H.T. v. Hannigan,*

---

and save;" "wholesale pricing;" and any other statement which implies that the retailer is purchasing directly from the manufacturer. App. of Exs. in Supp. of Pl.'s Mot., Ex. 2 at 6.

[5] Concerns with Internet and telephone purchases stem from the fact that Hunter Douglas views these mediums of exchange as inherently impersonal and removed. As explained by Richard Gottuso, vice president and general counsel of Hunter Douglas, "In instituting its advertising policies, Hunter Douglas exercised its sound business judgment and determined that sales presentations as to [proprietary products] should be made, to the greatest extent possible, in-person, by well-informed dealers, so as to ensure superior customer service commensurate with the high expectations of consumers that express interest in purchasing such products. Such face-to-face encounters are important, because they facilitate immediate and unfettered communication between dealers and consumers." Gottuso Decl., at P 12.

[6] In support of its decision to terminate business ties, Hunter Douglas specifically cited Blind Doctor's use of a toll -- free telephone number which was published on its website that allowed customers to purchase proprietary products; Blind Doctor's improper use of Hunter Douglas' marks in an Internet domain name; and Blind Doctor's improper publishing of retail price information for Hunter Douglas's proprietary products on its website.

92 F.3d 1486, 1495 (9th Cir. 1996); **[*10]** Big Country Foods, Inc. v. Bd. of Educ. of Anchorage Sch. Dist., 868 F.2d 1085, 1087 (9th Cir. 1989).

In general, a preliminary injunction is appropriate where a plaintiff can demonstrate "either: (1) a likelihood of success on the merits and the possibility of irreparable injury; or (2) that serious questions going to the merits were raised and the balance of hardships tips sharply in [plaintiff's] favor." Southwest Voter Registration Educ. Project v. Shelley, 344 F.3d 914, 917 (9th Cir. 2003) (en banc; per curiam) (citing Clear Channel Outdoor, Inc. v. City of Los Angeles, 340 F.3d 810, 813 (9th Cir. 2003), and Walczak v. EPL Prolong, Inc., 198 F.3d 725, 731 (9th Cir. 1999)); see also Sun Microsystems, Inc. v. Microsoft Corp., 188 F.3d 1115, 1119 (9th Cir. 1999) (distilling four relevant factors into this two-part test); Los Angeles Mem'l Coliseum Comm. v. Nat'l Football League, 634 F.2d 1197, 1200-01 (9th Cir. 1980) (listing the likelihood of plaintiff's success on the merits, the threat of irreparable harm to the plaintiff if the injunction is not issued, the relative balance **[*11]** of harm between the parties, and the public interest as factors to consider). The two components of this test sit on a kind of sliding scale or "continuum," Southwest Voter, 344 F.3d at 918; thus, "the less certain the district court is of the likelihood of success on the merits, the more plaintiffs must convince the district court that the public interest and balance of hardships tip in their favor." Id. (noting, too, that review of a district court's preliminary injunction decision is "limited and deferential"); see also Miller ex rel. NLRB v. California Pac. Medical Ctr., 19 F.3d 449, 456 (9th Cir. 1994) (en banc) (citations omitted).

As **HN2**[] in all occasions in which a court issues a preliminary injunction, Federal Rule of Civil Procedure 65(d) requires that the court make the injunction "specific in terms . . . describing in reasonable detail, and not by reference to the complaint or other document, the act or acts sought to be restrained." Fed. R. Civ. P. 65(d). This mandate for specificity ensures that those against whom an injunction is drawn receive fair and precise notice of what **[*12]** conduct is prohibited. See Union Pac. R.R. v. Mower, 219 F.3d 1069, 1077 (9th Cir. 2000).

DISCUSSION

At the core of plaintiff's complaint lies the allegation that defendant violated Section One of the Sherman Antitrust Act by engaging in a price fixing conspiracy and by coercing plaintiff to participate in that scheme. Plaintiff seeks a preliminary injunction to restrict defendant from discontinuing its business relationship with plaintiff on account of plaintiff's violation of the alleged price fixing conspiracy. The Ninth Circuit, as noted, has propounded a two-pronged test for determining whether a moving party is entitled to a preliminary injunction. See, e.g., Sun Microsystems, 188 F.3d at 1119. The court addresses each branch of this test separately below.

I. Probable Success on the Merits

A. Sherman Act Standard

To warrant injunctive relief, plaintiff must show a probability of success on the merits of its Sherman Act claim. The Sherman Antitrust Act **HN3**[] makes illegal "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign **[*13]** nations." 15 U.S.C. § 1. In order to establish a claim under Section One, plaintiff must demonstrate: (1) that there was a contract, combination, or conspiracy; (2) that the agreement unreasonably restrained competition under either a per se rule of illegality or a rule of reason analysis; and (3) that the restraint actually restrains competition, causing injury that extends beyond the impact on the claimant to affect the field of commerce in which the claimant is engaged (i.e., "antitrust injury"). See *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1062 (9th Cir. 2001)*; Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421, 1443-44 (9th Cir. 1995), cert. denied, *516 U.S. 987, 133 L. Ed. 2d 424, 116 S. Ct. 515 (1996)*: Sicor Ltd. v. Cetus Corp., 51 F.3d 848, 854 (9th Cir. 1995), cert. denied, *516 U.S. 861, 133 L. Ed. 2d 111, 116 S. Ct. 170 (1995)*; McGlinchy v. Shell Chem. Co., 845 F.2d 802, 811 (9th Cir. 1988). **HN4**[] Despite the language in Section One of the Sherman Act prohibiting *any* contract, the Supreme Court has repeatedly declined to read this language literally and instead has recognized that **[*14]** Congress intended to outlaw only *unreasonable* restraints. See National Soc. of Professional Engineers v. United States, 435 U.S. 679, 687, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978) (noting that Section One of the Sherman Act "cannot mean what it says"); State Oil

Co. v. Khan, 522 U.S. 3, 10, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997). [7] Following this logic, the Court has set forth a two-tiered mode of analysis to determine whether a contract, combination, or conspiracy is "unreasonable": some agreements are analyzed under a per se rule of illegality while others are assessed from a rule of reason analysis. See, e.g., *McDaniel v. Appraisal Inst., 117 F.3d 421, 422 (9th Cir. 1997)*. "Most antitrust claims are analyzed under a rule of reason,' according to which the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition." *State Oil, 522 U.S. at 10*. This analysis is holistic and inclusive, taking into account a variety of factors "including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." Id.

[*15] ***HN5***[] Some types of restraint, however, have such "predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful per se." Id. Per se analysis of a restraint is appropriate "once experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it." *Arizona v. Maricopa County Med. Soc., 457 U.S. 332, 344, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*; see also *Broad. Music. Inc. v. Columbia Broad. Sys. Inc., 441 U.S. 1, 19 n.33, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. Because of the level of certitude required, courts have been hesitant to adopt per se rules "with regard to restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious." *State Oil, 522 U.S. 3 at 10, 139 L. Ed. 2d 199* (citation omitted). [8]

[*16] Proceeding through the three-step inquiry as mandated by Section One, plaintiff's motion falls far short of convincing the court that its antitrust claim has a probability of success on the merits.

1. Conspiracy

HN6[] The bedrock of any Section One antitrust claim is a conspiracy or compact between two parties. See *15 U.S.C. § 1*. While the words "conspiracy" or "agreement" are freely used in colloquial speech, in the antitrust milieu they take on discrete and defined meanings. In ***antitrust law***, an agreement is found only when "the conspirators have a unity of purpose or a common design and understanding, or a meeting of the minds in an unlawful arrangement." *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 771, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*. The Supreme Court has made clear that, in antitrust actions, there is an essential distinction between illegal concerted actions and lawful independent decisions, with the conspiring sheep fenced in by Section One analysis and the independent goats left to safely graze entirely alone. See *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. "Independent **[*17]** action is not proscribed. A manufacturer of course generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." Id.; see also *United States v. Colgate & Co., 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465, 1919 Dec. Comm'r Pat. 460 (1919)*.

While plaintiff contends in the present action that defendant was engaged in a price -- fixing conspiracy -- a conspiracy manifested through defendant's advertising policy -- a review of the facts reveals that plaintiff's understanding of what constitutes a "conspiracy" is misguided. Defendant is nothing more than a lone manufacturer of window coverings acting independently to control the overall image of its products. The Ninth Circuit has long held that ***HN7***[] manufacturers are able "to choose with whom [they] wish to deal and *unilaterally* may refuse to deal with a distributor or customer for business reasons without running afoul of antitrust laws." *Dimidowich v. Bell*

[7] Read literally, the statute deems unlawful "every" contract that restrains trade. But, as Justice Brandeis noted, restraint is the very essence of every contract and, read literally, Section One would outlaw the entire body of private contract law: "The legality of an agreement or regulation cannot be determined by so simple a test, as whether it restrains competition. Every agreement, concerning trade, every regulation of trade, restrains. To bind, to restrain, is of their very essence." *Chicago Bd. of Trade v. United States, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918)*.

[8] As the Supreme Court has reminded, the purpose of both the per se and rule of reason analyses is "to form a judgment about the competitive significance of the restraint; it is not to decide whether a policy favoring competition is in the public interest, or in the interest of the members of an industry." *National Soc. of Professional Engineers v. United States, 435 U.S. 679, 692 (1978)*. That policy decision lies in the exclusive purview of Congress.

& Howell, 803 F.2d 1473, 1478 (9th Cir. 1987) (emphasis added). This is all that defendant has done, and courts have uniformly refused to find antitrust implications if the termination reflected the isolated decision of a single manufacturer. **[*18]** See *Sierra Wine and Liquor Co. v. Heublein, Inc., 626 F.2d 129, 133 (9th Cir. 1980)*; *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71 (9th Cir. 1969)*, cert. denied sub. nom., *Hawaiian Oke & Liquors, Ltd. v. Joseph E. Seagram & Sons, Inc., 396 U.S. 1062, 24 L. Ed. 2d 755, 90 S. Ct. 752 (1970)*. Because "independent action is not proscribed" under the Sherman Act and because plaintiff has failed to show a "contract, combination . . . or conspiracy," at first blush plaintiff's antitrust claim appears fatally flawed. See *Colgate, 250 U.S. at 307*; *15 U.S.C. § 1*.

Furthermore, plaintiff's understanding of "price fixing" under the Sherman Act is similarly misguided. Defendant has never dictated the price of its products to the fabricators and retailers who sell defendant's window coverings downstream to consumers. App. of Exhs. in Supp. of Mot. for Prelim. Inj., Ex. 2 at 6. Instead, in an effort to maintain consumer goodwill and a reputation for stellar customer service, defendant merely requires retailers to abide by certain advertising restrictions. Courts have long recognized that such advertising **[*19]** restrictions do not rise to the level of an antitrust violation. Indeed, the Supreme Court has said that ***HN8***[] non-price restrictions like those enacted by defendant "arise in the normal course of business" and are not illegal under the Sherman Act. *Monsanto Co., 465 U.S. at 763*; see also *GTE Sylvania, Inc. v. Continental T.V., Inc., 537 F.2d 980, 989-90 (9th Cir. 1976)*. [9] Defendant is free to set restrictions on retailer advertising and to terminate business ties with merchants who fail to abide by the restrictions. As the Supreme Court explained in Colgate,***HN9***[] a manufacturer can announce its resale prices or other non-price restrictions and refuse to deal with those who fail to comply without running afoul of antitrust laws. See *Colgate, 250 U.S. at 307*.

[*20] In an attempt to bolster its antitrust allegations, plaintiff cites two cases that deal with price fixing and coordinated behavior. However, both cases are examples of group collusion and are factually dissimilar to the instant action, rendering the cases ultimately unhelpful to plaintiff. As Ninth Circuit doctrine illustrates, plaintiff's use of United States v. Serta Associates., Inc. to buttress its antitrust claim is both misplaced and inappropriate. *296 F. Supp. 1121 (N.D. Ill. 1968)*, aff'd *393 U.S. 534, 21 L. Ed. 2d 753, 89 S. Ct. 870 (1969)*. Serta dealt with *group* of manufacturers joining together in a single entity to control prices of mattresses -- a situation defined as horizontal price fixing and a glaring violation of Section One. *Id. at 1122*. "The internal organization of Serta Associates indicates that it is the product of horizontal cooperation among manufacturers who might otherwise compete with one another." *Serta, 296 F. Supp. at 1122*. However, no such grouping occurred in the present case. Instead, a single manufacturer merely set advertising -- not price-restrictions on retailers down the distribution chain, making the **[*21]** Serta ruling entirely inapposite.

The same is true of *California Dental Ass'n v. FTC, 526 U.S. 756, 143 L. Ed. 2d 935, 119 S. Ct. 1604 (1999)*, a case involving a *group* of dentists who formed a nonprofit professional association to regulate dental advertising throughout the state of California. The association was comprised of competitors whose self-regulation restricted certain forms of advertising. As explained by the Supreme Court, the California Dental Association was "a voluntary nonprofit association of local dental societies . . . including about three-quarters of those practicing in the State." *Id. at 759*. This is quite unlike the solitary manufacturer in the present case merely restricting advertising of its own products. Furthermore, California Dental is distinguishable on the grounds that the infringing association functioned in the unique marketplace of dentistry, "a market for professional services, in which advertising is relatively rare and the comparability of service packages not easily established, the difficulty for customers or potential customers to get and verify information about the price and availability of services magnifies the **[*22]** dangers to competition associated with misleading advertising." *Id. at 772*. This is quite unlike the market for window coverings, a market hardly characterized by "significant challenges to informed decisionmaking" by customers. *Id. at 773*. Restrictions on advertising in the context of a dental association may be antitrust infringement, but restrictions on advertising

---

[9] Even if defendant had taken the more drastic step of dictating prices to retailers, defendant would still not be found in violation of Section One so long as it acted unilaterally. See *Mularkey v. Holsum Bakery, Inc., 146 F.3d 1064, 1065 (9th Cir. 1998)*. Yet plaintiff does not allege this more severe scenario of price dictation. Rather, plaintiff points to the much less suspect policy that allows defendant to control the advertising of its products in the marketplace.

made by a lone window coverings manufacturer does not. In short, defendant's independent decision to set nonprice restrictions on advertising does not constitute a cognizable conspiracy or compact under the Sherman Act.[10] Plaintiff thus fails to satisfy the first element of a colorable Section One claim.

[*23] 2. Unreasonable Restraint on Trade

Plaintiff similarly fails to satisfy the second element of Section One, namely unreasonable restraints on competition. As noted above, the unreasonableness of an agreement between two parties is analyzed under either a per se rule of illegality or a rule of reason approach. See, e.g., *Tanaka, 252 F.3d at 1062*. With little to no explanation, plaintiff maintains that defendant's advertising policy constitutes price fixing and is, thus, a per se violation of *Section One of the Sherman Act*. However, by classifying advertising restrictions as per se antitrust behavior, plaintiff is assuming that the economic impact of such restrictions is immediately obvious and not deserving of closer investigation by the court. Pl.'s Mot. for Prelim. Inj., at 4; see *State Oil, 522 U.S. at 10*. In the end, the court finds that plaintiff's invocation of per se analysis is more wishful thinking than sound law.

HN10[] Price fixing comes in two general strains: horizontal and vertical. Vertical price fixing occurs when a supplier attempts to fix the prices charged by those who resell its products. See *Gen. Cinema Corp. v. Buena Vista Distrib. Co., 681 F.2d 594, 597 (9th Cir. 1982).* **[*24]** A vertical price fixing scheme setting minimum prices is generally subject to per se analysis. See *Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 725-27, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)*. However, a vertical price fixing scheme setting maximum prices is not a per se antitrust violation and should be analyzed under the rule of reason approach. See *State Oil, 522 U.S. at 22*. Horizontal price fixing, by contrast, is a restraint imposed by agreement between competitors to fix prices and muscle out competition. Horizontal price fixing is always subject to per se analysis and is the poster child of a Sherman Antitrust Act violation. See *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 100, 101 n.21, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)*.

Not only is it difficult to fit plaintiff's general allegation of price fixing into one of the specific categories recognized by the Ninth Circuit, it is even more difficult to see how price fixing has occurred at all between retailers and the defendant manufacturer. There is no obvious vertical price fixing, as defendant has set no maximum or minimum prices that retailers must abide by. **[*25]** Nor is there any evidence of horizontal price fixing, as there is no conspiracy among manufacturers of window coverings to set artificial prices. Because defendant's advertising policy does not have a "predictable and pernicious anticompetitive effect" on the market that fits into one of the categories of price fixing defined by the Ninth Circuit, this court refuses to label it a per se violation. *State Oil, 522 U.S. at 10*. The evaluation must thus proceed under the more measured and deliberate rule of reason framework.

HN11[] Under a rule of reason analysis, plaintiff must "identify the relevant geographic and product markets in which Plaintiffs and Defendants compete and allege facts demonstrating that Defendants' conduct has an anticompetitive effect on those markets." *Big Bear Lodging Ass'n v. Snow Summit, Inc., 182 F.3d 1096, 1104-05 (9th Cir. 1999)*. However, plaintiff has alleged virtually nothing in the way of facts to define the market for window coverings. Furthermore, plaintiff has entirely failed to show that defendant's advertising policy has an unreasonable restraint on the market through anticompetetive effects as required. See *Mularkey, 146 F.3d at 1065*; **[*26]** *Tanaka, 252 F.3d at 1063*. Without such showings, plaintiff cannot tenably claim that defendant's conduct unreasonably restrains trade under the rule of reason analysis. Because ***HN12***[] "failure to identify a relevant market is a proper ground for dismissing a Sherman Act claim" under a rule of reason analysis, the court finds that plaintiff has not shown an unreasonable restraint on trade resulting from defendant's advertising policy. *Tanaka, 252 F.3d at 1063*.

3. Antitrust Injury

---

[10] *Section Two of the Sherman Act* prohibits unilateral action when the manufacturer acts as a monopolistic power in the relevant market. See *Copperweld, 467 U.S. at 767*. Plaintiff has not alleged a Section Two violation in this action, and the issue of monopoly power wielded by defendant will be not addressed.

The final requirement for a Section One violation is the presence of antitrust injury or injury to competition. See, e.g., *Sicor Ltd., 51 F.3d at 854*; *McGlinchy, 845 F.2d at 811*. ***HN13***[] Under the Sherman Act, it is not enough for plaintiff to merely allege injury to itself as a result of defendant's practices; competition within the industry itself must actually be restrained for an actionable claim. As noted by the Ninth Circuit, "it is well established that the antitrust laws are only intended to preserve competition for the benefit of consumers. Thus the famous aphorism, it is competition, not competitors, which the Act protects.'" *American Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1055 (9th Cir. 1999),* **[*27]** quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 8 L. Ed. 2d 510, 82 S. Ct. 1502*. *344, 8 L. Ed. 2d 510 (1962)*. The Ninth Circuit has specifically identified four requirements for a showing of antitrust injury: (1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) is of the type the antitrust laws were intended to prevent. See *American Ad, 190 F.3d at 1055*. Only if all four requirements are satisfied will the court label plaintiff's alleged injury an actionable "antitrust injury."

Plaintiff appears to forget that the antitrust injury analysis must begin with the identification of defendant's specific unlawful conduct. ***HN14***[] "Without a violation of the antitrust laws, there can be no antitrust injury." *Id. at 1056*. As noted, plaintiff has not stated a colorable claim of a violation of Section One-the court has determined that defendant did not collude or conspire or agree to inhibit competition in the market for window coverings. Because plaintiff has failed to allege dispositive facts or controlling law to properly establish unlawful conduct by defendant, the antitrust injury analysis **[*28]** fails at element one.

Factors two and three deal with the causality involved between defendant's actions and plaintiff's alleged injuries. Plaintiff alleges that if defendant ceases to sell products to plaintiff, plaintiff "will suffer not merely loss of profits with respect to defendant's goods, but loss of good will from lack of a full line of goods." Def.'s Mot. for Prelim. Inj., at 2. However, plaintiff cannot allege that the injury "flows from that which makes that conduct unlawful." *American Ad, 190 F.3d at 1055*. Defendant's conduct is lawful, making plaintiff's alleged harm unfortunate but unactionable.

Finally, factor four speaks to antitrust conduct and is closely tied to factor one. As previously noted, defendant's policy is not the type of conduct that the antitrust laws were intended to prevent. Defendant's unilateral decision to control the advertising of its window coverings is simply not collusive behavior. After evaluating the four factors necessary for a showing of antitrust injury, the court can find no evidence suggesting that defendant's advertising restrictions have impeded competition in the marketplace for window coverings.

A preliminary injunction **[*29]** is warranted if the moving party is able to show a provisional likelihood of success on the merits of its claim. After a review of the elements necessary to establish a violation of *Section One of the Sherman Act*, the court concludes it is highly unlikely that the facts alleged by plaintiff show a likelihood of success on the merits. Thus, plaintiff's claim fails the first prong in a successful motion for preliminary injunction.

II. Possibility of Irreparable Injury / Balance of Hardships

HN15[] The second component of the two-part test for injunctive relief requires the moving party to show that the balance of hardships tip in its favor. Because the branches of the preliminary injunction test "represent two points on a sliding scale in which the required degree of irreparable harm increases as probability of success decreases," a strong showing of one factor of the test can tip the scales in the evaluation of whether a preliminary injunction is justified. See *Sammartano v. First Jud. Dist. Ct., 303 F.3d 959, 965 (9th Cir. 2002)*; see also *Sun Microsystems, 188 F.3d at 1119*. As the Ninth Circuit has said, "if the movant has a 100% probability **[*30]** of success on the merits," then the balance of the hardships factor need not be regarded." *Sammartano, 303 F.3d at 965*.

Because plaintiffs probability of success on the merits is virtually nonexistent, the balance of hardships factor must tip overwhelmingly in plaintiff's favor in order for the court to issue a preliminary injunction. The sliding scale logic employed by the Ninth Circuit mandates that an improbability of success on the merits can only be overcome by a strong showing of the balance of hardships tipping in plaintiff's favor. Yet plaintiff's assertion that it "will suffer not merely loss of profits with respect to defendant's goods, but loss of good will from lack of a full line of goods" is completely bereft of evidentiary support -- no numbers, statistics, or any other solid facts that illustrate the extent of harm wrought by defendant's decision. Wells Decl., at 2-3. Also, plaintiff's conclusory statement that it will lose

"50% of its sales and profits from the termination" is devoid of evidentiary foundation. [11] Id. Furthermore, *HN16*[] loss of profit is generally not recognized as an irreparable harm sufficient to sustain a motion for preliminary injunction. **[*31]** As explained by the Supreme Court: "The temporary loss of income, ultimately to be recovered, does not usually constitute irreparable injury . . . The key word in this consideration is irreparable. Mere injuries, however substantial, in terms of money, time and energy necessarily expended . . . are not enough." *Sampson v. Murray, 415 U.S. 61, 90, 39 L. Ed. 2d 166, 94 S. Ct. 937 (1974)* (internal quotation marks omitted).

The lack of verifiable evidence illustrating hardship resulting from defendant's decision to sever business ties renders plaintiff's conclusory allegations of hardship hollow. Plaintiff has failed to show how, and to what extent, the balance of hardships tip in its favor. In the end, plaintiff's passing and unsubstantiated **[*32]** statements of injury fail to convince the court that the hardships plaintiff alleges are real, let alone that they tip the balance in plaintiff's favor.

CONCLUSION

Based on the foregoing conclusions, Blind Doctor's motion for preliminary injunction is DENIED.

IT IS SO ORDERED.

Dated:September 7, 2004

HN1[] **Clayton Act, Jurisdiction**

Section 7 of the Clayton Act prohibits a person engaged in commerce or in any activity affecting commerce from acquiring the whole or any part of a business's stock or assets if the effect of the acquisition may be substantially to lessen competition, or to tend to create a monopoly. *15 U.S.C.S. § 18*. The United States is authorized to seek an injunction to block the acquisition, *15 U.S.C.S. § 25*, as are private parties and the several states, and district courts have jurisdiction over such actions. *15 U.S.C.S. § 25*, *28 U.S.C.S. § 1337(a)*. Plaintiffs have the burden of proving a violation of § 7 of the Clayton Act by a preponderance of the evidence.

HN2[] **Antitrust & Trade Law, Clayton Act**

To establish a violation of § 7 of the Clayton Act, 15 U.S.C.S. § 18, plaintiffs must show that a pending acquisition is reasonably likely to cause anticompetitive effects. Congress used the words "may be substantially to lessen competition" to indicate that its concern was with probabilities, not certainties. Section 7 of the Clayton Act does not require proof that a merger or other acquisition will cause higher prices in the affected market. All that is necessary is that the merger create an appreciable danger of such consequences in the future. Substantial competitive harm is likely to result if a merger creates or enhances "market power," a term that has specific meaning in ***antitrust law***.

HN3[] **Antitrust & Trade Law, Clayton Act**

In determining whether a transaction will create or enhance market power, courts historically have first defined the relevant product and geographic markets within which the competitive effects of the transaction are to be assessed. This is a "necessary predicate" to finding anticompetitive effects. Market definition under the case law proceeds by determining the market shares of the firms involved in the proposed transaction, the overall concentration level in the industry and the trends in the level of concentration. A significant trend toward concentration creates a presumption that the transaction violates § 7 of the Clayton Act, *15 U.S.C.S. § 18*. In other words, plaintiffs establish a prima facie case of a § 7 of the Clayton Act violation by showing that the merger would produce a firm controlling an undue percentage share of the relevant market, and would result in a significant increase in the concentration of firms in that market.

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

HN4[] **Antitrust & Trade Law, Clayton Act**

Under Philadelphia Nat. Bank, a post-merger market share of 30 percent or higher unquestionably gives rise to the presumption of illegality. To rebut this presumption, a defendant may show that the market-share statistics give an inaccurate account of the merger's probable effects on competition in the relevant market. Arguments related to efficiencies resulting from the merger may also be relevant in opposing the plaintiffs' case. If the defendant successfully rebuts the presumption of illegality, the burden of producing additional evidence of anticompetitive effects shifts to the plaintiffs, and merges with the ultimate burden of persuasion, which remains with the government at all times.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN5[] **Admiralty & Maritime Law, Maritime Contracts**

An application of the burden-shifting approach under § 7 of the Clayton Act, *15 U.S.C.S. § 18*, requires the court to determine (1) the "line of commerce" or product market in which to assess the transaction; (2) the "section of the country" or geographic market in which to assess the transaction; and (3) the transaction's probable effect on competition in the product and geographic markets.

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN6[] Antitrust Actions, Facilities

Both the United States Supreme Court and appellate courts acknowledge the need to adopt a flexible approach in determining whether anticompetitive effects are likely to result from a merger. Reflecting their "generality and adaptability," application of the antitrust laws to mergers during the past half-century has been anything but static. Accordingly, determining the existence or threat of anticompetitive effects has not stopped at calculation of market shares.

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > Merger Guidelines

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

HN7[] Antitrust, Horizontal Mergers

Unilateral effects result from the tendency of a horizontal merger to lead to higher prices simply by virtue of the fact that the merger will eliminate direct competition between the two merging firms, even if all other firms in the market continue to compete independently. Unilateral effects are thought to arise in primarily two situations. The first situation involves a dominant firm and a "fringe" of competitors producing a homogeneous product. In this situation, the dominant firm has a substantial cost advantage over the fringe competitors and, therefore, can restrict output to obtain an above-marginal cost price. The second situation concerns differentiated products. Competition in differentiated product markets is often described as "monopolistic competition.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN8[] Actual Monopolization, Anticompetitive & Predatory Practices

Like a seller in a perfectively competitive market, sellers in a "competitive" differentiated products market do not obtain monopoly rents. In differentiated product markets with few barriers to entry, firms will introduce products that are increasingly close, although not perfect substitutes, for the other products in the market. The introduction of additional products causes the demand curve faced by each seller to shift downward and leftward until, at long run equilibrium, the demand curve intersects the average cost curve of the seller (defined as economists define costs to include a reasonable profit) eliminating the monopolistic rent.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN9[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Differentiated product markets share some characteristics of both a pure monopoly and perfect competition, in that prices are above marginal costs but economic profits have been driven down to zero. Firms selling differentiated products have some "market power" in that they are able to exert some control over the prices they obtain although this does not rise to the level of "monopoly power."

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > General Overview

HN10[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Under § 7 of the Clayton Act, *15 U.S.C.S. § 18*, a plaintiff must prove not only that the merging firms produce close substitutes but also that other options available to the buyer are so different that the merging firms likely will not be constrained from acting anticompetitively.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Mergers & Acquisitions Law > General Overview

HN11[] **Regulated Practices, Market Definition**

Four factors make up a differentiated products unilateral effects claim. First, the products controlled by the merging firms must be differentiated. Products are differentiated if no "perfect" substitutes exist for the products controlled by the merging firms. Second, the products controlled by the merging firms must be close substitutes. Products are close substitutes if a substantial number of the customers of one firm would turn to the other in response to a price increase. Third, other products must be sufficiently different from the products controlled by the merging firms that a merger would make a small but significant and non-transitory price increase profitable for the merging firms. Finally, repositioning by the non-merging firms must be unlikely. In other words, a plaintiff must demonstrate that the non-merging firms are unlikely to introduce products sufficiently similar to the products controlled by the merging firms to eliminate any significant market power created by the merger.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > General Overview

HN12[] **Actual Monopolization, Anticompetitive & Predatory Practices**

In a unilateral effects case, a plaintiff is attempting to prove that the merging parties could unilaterally increase prices. Accordingly, a plaintiff must demonstrate that the merging parties would enjoy a post-merger monopoly or dominant position, at least in a "localized competition" space.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN13[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Relevant markets defined in terms of "localized competition" may be much narrower than relevant markets defined in typical cases in which a dominant position is required. Judicial experience cautions against the use of qualitative factors to define narrow markets. This judicial experience arises, in part, from the rise (and fall) of the "submarkets" doctrine.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN14[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Merely demonstrating that the merging parties' products are differentiated is not sufficient under § 7 of the Clayton Act, *15 U.S.C.S. § 18*. Instead, a plaintiff must demonstrate product differentiation sufficient to sustain a small but significant and non-transitory price increase.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN15[] Regulated Practices, Market Definition

Product characteristics that are too vague do not meet § 7 of the Clayton Act's requirement that the relevant market be "well-defined."

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN16[] Regulated Practices, Market Definition

A differentiated product "market" is a market in which sellers compete along more dimensions than price. As a result, products competing against one another in a differentiated product market may have widely different prices. That products with widely different prices may, in fact, be in the same market complicates market definition considerably.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN17[] Actual Monopolization, Anticompetitive & Predatory Practices

Because a monopolist exercises market power by increasing price until the cross-price elasticity of demand is so high that a further price increase would be unprofitable, a high cross-price elasticity of demand at current prices, by itself, does not demonstrate that the seller lacks market power.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN18[] Regulated Practices, Market Definition

Courts should be wary of defining markets so broadly that a seller's existing market power is missed. On the other hand, in differentiated product markets, some measure of market power is inherent and an unduly narrow product market definition proves too much. In merger analysis, the court is concerned primarily with determining whether the merger would enhance market power, not whether market power currently exists.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN19[] **Regulated Practices, Market Definition**

The inability clearly to define a market suggests that strong presumptions based on mere market concentration may be ill-advised in differentiated products unilateral effects cases. It is generally misleading to suggest that a firm "controls" a certain market share in the absence of an analysis beyond market concentration. Such a concern applies with equal force to differentiated products unilateral effects claims. Furthermore, in differentiated products unilateral effects cases, the merging parties' combined market shares relative to competitors may be less relevant than the size of their market shares in determining whether anticompetitive effects are likely. Accordingly, a strong presumption of anticompetitive effects based on market concentration is especially problematic in a differentiated products unilateral effects context.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN20[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Differentiated products unilateral effects analysis shares many similarities to "standard" antitrust analysis. The primary differences are that the relevant market is likely to be smaller and more difficult to define and that quantitative analyses may be robust.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN21[] **Actual Monopolization, Anticompetitive & Predatory Practices**

In analyzing antitrust claims, courts have considered both "circumstantial" and "direct" evidence of anticompetitive effects. Even though "direct" evidence of the potential for anticompetitive harm from a merger is not literally available, merger analyses range from highly qualitative ("circumstantial") to highly quantitative ("direct"), depending on the data available for a particular market. Qualitative analyses of antitrust claims are most often structural. In a structural analysis, anticompetitive effects are presumed if a plaintiff demonstrates undue concentration in a well-defined market. A relevant market may be defined by reference to Brown Shoe's "practical indicia." Once the relevant market is defined, market shares are calculated and inferences are drawn from the degree of concentration.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN22[] **Regulated Practices, Market Definition**

To prevail on a differentiated products unilateral effects claim, a plaintiff must prove a relevant market in which the merging parties would have essentially a monopoly or dominant position. The United States Court of Appeals for the Ninth Circuit has noted that a market share of 30 percent is presumptively insufficient to establish the power to control price.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN23[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Defining the relevant market is critical in an antitrust case because the legality of the proposed merger in question almost always depends upon the market power of the parties involved.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN24[] **Regulated Practices, Market Definition**

Arbitrage occurs when a consumer of a product buys the product from a vendor in one geographic location at a low price, but then sells the product to another consumer in a different geographic location for a higher price.

Antitrust & Trade Law > Clayton Act > General Overview

HN25[] **Antitrust & Trade Law, Clayton Act**

In the antitrust context, the most persuasive testimony from customers is not what they say in court, but what they do in the market.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN26[] **Actual Monopolization, Anticompetitive & Predatory Practices**

In order for a claimed efficiency to be "cognizable" as a defense to rebut a plaintiff's claim of anticompetitive effects, it must be "substantiated" and "verifiable."

Opinion

[*1100] FINDINGS OF FACT, CONCLUSIONS OF LAW AND ORDER THEREON

The government, acting through the Department of Justice, Antitrust Division, and the states of Connecticut, Hawaii, Maryland, Massachusetts, Michigan, Minnesota, New York, North Dakota, Ohio and Texas, First Amended Complaint (FAC) (Doc # 125) P 3 at 5-6, seek to enjoin Oracle Corporation from acquiring, directly or indirectly, the whole or any part of the stock of PeopleSoft, Inc. Plaintiffs allege that the acquisition would violate section 7 of the Clayton Act, *15 U.S.C. § 18*. Both companies are publicly traded and headquartered in this district. Jt Stip Fact (Doc # 218) at 1-2. The court has subject matter jurisdiction under *15 U.S.C. § 25* and *28 U.S.C. §§ 1331*, *1337(a)* and *1345*. There is no dispute about the **[*1101]** court's personal jurisdiction over the defendant.

Oracle initiated its tender offer for the shares of PeopleSoft on June 6, 2003. Jt Stip of Fact (Doc # 128) **[**9]** *at 2;* Ex P2040. Plaintiffs brought suit on February 26, 2004. Compl (Doc # 1). The case was tried to the court on June 7-10, 14-18, 21-25, 28-30 and July 1, 2004, with closing arguments on July 20, 2004, and further evidentiary proceedings on August 13, 2004. Based on the evidence presented and the applicable law, the court concludes that plaintiffs have failed to carry the burden of proof entitling them to relief and, therefore, orders that judgment be entered for defendant and against plaintiffs.

INTRODUCTORY FINDINGS: INDUSTRY OVERVIEW

Products at Issue

Of the many types of computer software, such as operating system software, database software, integration software (sometimes called "middleware" in software parlance) and utilities software, this case involves only one -- application software. And within this type, the present case deals with only applications that automate the overall business data processing of business and similar entities; these applications are called "enterprise application software" (EAS). Jt Definitions (Doc # 332) at 6. There are three main kinds of EAS. Plaintiffs single out one.

Some EAS programs are mass market PC-based applications of **[**10]** fairly limited "functionality" (meaning capability). Id (Doc # 332) at 5. See Daniel E O'Leary, Enterprise Resource Planning Systems at 19 (Cambridge, 2000). Other EAS programs are developed by or for a specific enterprise and its particular needs; most large organizations had such specially designed EAS (called "legacy software") prior to the advent of the products in suit. Plaintiffs focus their claims on the third, intermediate category of EAS -- enterprise resource planning (ERP) system software. Jt Sub Definitions (Doc # 332) at 6. ERP is packaged software that integrates most of an entity's data across all or most of the entity's activities. See O'Leary, Enterprise Resource Planning Systems at 27-38. Oracle and PeopleSoft develop, produce, market and service ERP software.

These copyrighted software programs are licensed ("sold" is the term applied to these license transactions) to end users along with a continued right to use license which usually includes maintenance or upgrades of the software. To the customer, the fees to license and maintain ERP software are generally a small part, 10 to 15 percent, of the total cost of the installation and maintenance of an ERP **[**11]** system. Tr at 133:12-15 (Hatfield); 655:2-4 (Maxwell); 1385:6-11 (Gorriz). An ERP installation, because of its complexity, usually requires substantial and expensive personnel training, consulting and other services to integrate the program into the customer's pre-existing or "legacy" software. Jt Sub Definitions (Doc # 332) at 6. See also O'Leary, Enterprise Resource Planning Systems at 19. ERP software vendors often provide some of those services, but they are typically also performed and augmented by the customer's own staff, obtained from providers other than ERP vendors or both.

Many ERP programs were developed to address the needs of particular industries, such as banking and finance, insurance, engineering, construction, healthcare, government, legal and so forth (in industry lingo, these are called "verticals"). See Martin Campbell-Kelly, From Airline Reservations to Sonic the Hedgehog, at 169-73 (MIT, 2003). Vertical-specific ERP programs, although well suited to the needs of firms engaged in a particular industry, often are not well suited to the **[*1102]** needs of firms in other verticals. An enterprise that relies on vertical-specific ERP software products, but whose operations **[**12]** embrace more than one vertical faces the task of integrating the programs. The largest and most complex organizations face particular difficulty. "Only custom-written software or carefully tailored and integrated cross-industry packages [can] handle larger firms' historically idiosyncratic accounting systems and diverse overseas operations." Id at 172.

ERP programs have been developed to handle the full range of an enterprise's activities; these include human relations management (HRM), financial management systems (FMS), customer relations management (CRM), supply chain management (SCM), Product Life Cycle Management, Business Intelligence (BI), among many others. These are called "pillars." Although ERP encompasses many pillars, see Ex D5572, plaintiffs assert claims with respect to only two pillars, HRM and FMS. FAC (Doc # 125) P 23 at 12-13.

Within these two pillars, plaintiffs further limit their claims to only those HRM and FMS products able to meet the needs of large and complex enterprises with "high functional needs." Id at P 14 at 9. Plaintiffs label HRM and FMS products capable of meeting these high function needs "high function HRM software" and "high function FMS software, **[**13]** " respectively. Id P 23(a)-(b) at 12-13. ERP pillars incapable of meeting these high function needs are called "mid-market" software by plaintiffs. Id P 13 at 9.

"High function software" is a term adopted by plaintiffs to describe what they contend is the separate and distinct line of commerce in which they contend competition would be lessened by the proposed acquisition. Id at P 23 at 13-14. Plaintiffs apply the term "high function" to both HRM and FMS. "High function software," as defined by plaintiffs, has no recognized meaning in the industry. See Tr at 349:7-10 (Bergquist); 2298:6-20 (Elzinga).

Rather, industry participants and software vendors use the terms "enterprise" software, "up-market" software and "Tier One" software to denote ERP that is capable of executing a wide array of business processes at a superior level of performance. See Tr at 274:24-275:7 (Bergquist); Tr at 1771:5-1772:1 (Wilmington); Tr at 1554:25-1555:7 (Wolfe); Tr at 2180:22-2181:5 (Iansiti). Software vendors use these terms to focus sales and marketing initiatives. Tr 2816:6-2818:8 (Knowles) (testifying that SAP divided mid-market and large enterprise at $ 1.5 billion based on SAP's sales resources and **[**14]** estimated amount of IT "spend" available from those customers).

Each ERP pillar consists of "modules" that automate particular processes or functions. HRM and FMS software each consists of numerous modules. Exs P3010, P3011. Tr at 268:8-269:11, 270:5-271:12 (Bergquist). HRM modules include such functions as payroll, benefits, sales incentives, time management and many others. Ex P3010. FMS modules include such functions as general ledger, accounts receivable, accounts payable, asset management and many others. Ex P3011.

"Core" HRM modules are those specific ERP modules that individually or collectively automate payroll, employee tracking and benefits administration. Core FMS modules are those ERP modules that individually or collectively track general ledger, accounts receivable, accounts payable and cash and asset management business processes. Core FMS and HRM modules are offered by all the ERP vendors that have HRM and FMS offerings. Ex P3179 (Ciandrini 1/16/04 Dep) at Tr 256:2-257:10. Large enterprise customers rarely, if ever, buy core HRM or FMS modules **[*1103]** in isolation. Tr at 3461:14-23 (Catz). Customarily, FMS and HRM software are purchased in bundles with other products. Tr **[**15]** at 3807:21-3808:1 (Hausman). See also Tr at 3813:12-13 (Hausman). Customers purchase a cluster of products such as Oracle's E-Business Suite that provide the customer with a "stack" of software and technology, which may include core HRM or FMS applications, add-on modules, "customer-facing" business applications such as CRM software, and the infrastructure components (application servers and database) on which the applications run. Tr at 3461:14-3462:5 (Catz); Tr at 3807:21-3808:1 (Hausman). See, e g, Exs P1000-P1322 (Oracle discount request forms).

ERP vendors, including Oracle and PeopleSoft, sell modules individually as well as integrated suite products. Some ERP vendors sell only one or a few modules. Individual modules are referred to as "point solutions" as they address a particular need of the enterprise. ERP vendors that sell products for only one or a limited number pillars are referred to as point solution or "best of breed" providers. A customer licensing a particular module because it fits the specific needs of the enterprise is sometimes said to be seeking a best of breed or point solution. An ERP customer that acquires best of breed or point solutions faces the task **[**16]** of integrating these solutions with one another and with the customer's existing ERP or legacy footprint.

Although the production cost of ERP applications is negligible, vendors bear significant development and marketing expenses and substantial costs of pre-and post-sales support and ongoing maintenance and enhancement. ERP vendors employ and bear substantial costs of account managers, technical sales forces and personnel for user training, product documentation and post-sale support.

Customers at Issue

"Large Complex Enterprises" (LCE) is a term adopted by plaintiffs to describe the ERP customers that have "high function software" needs. Based on the testimony described hereafter, the court finds that industry participants and software vendors do not typically use this term and it has no widely accepted meaning in the industry.

While many in the software industry differentiate between large customers and mid-market customers, there is no "bright line" test for what is a "large" or "up-market" customer. Tr 348:23-349:3 (Bergquist) (acknowledging "different parties tend to define it differently"); Tr 2033:1-12 (Iansiti); Ex P3032 (Henley 5/4/04 Dep) at Tr 98:20-25. Likewise, **[**17]** there is no "bright line" test for what is a "mid-market" customer. Tr at 2820:9-19 (Knowles) (SAP executive noting that the separation between mid-market and large enterprise customers is "not an exact science"); Ex D7174 (Pollie 5/26/04 Dep) at Tr 54:14-55:3 (testifying that the meaning of the term mid-market "varies from, from everyone you talk to"); Ex P3191 (Block 12/16/03 Dep) at Tr 88:12-21, 94:19-95:3 (noting the term mid-market is used in many different ways by many different people). ERP vendors, analysts, systems integrators and others in the industry define the mid-market variously. Compare Tr at 864:19-865:2 (Keating) (noting variability of definitions and that Bearing Point generally refers to mid-market as customers in its General Business Group, which is synonymous with companies having less than $ 2 billion in revenue) with Tr at 1846:17-1847:15 (Wilmington) (PeopleSoft formerly defined mid-market as less than $ 500 million revenue, but after acquiring J D Edwards, it raised mid-market to include companies with less than $ 1 billion revenue).

[*1104] Prior to Oracle's tender offer, PeopleSoft used a proxy of $ 500 million in revenue to distinguish mid-market customers from **[**18]** large customers. Tr at 348:5-18 (Bergquist). SAP defines its "large enterprise" market as companies with more than $ 1.5 billion in revenues. Tr at 2819:12-20 (Knowles). Oracle segments the market based on the customers' revenue level or number of employees. Ex P3070 (Prestipino 5/18/04 Dep) at Tr at 21:5-23:11.

Plaintiffs failed to show ERP vendors distinguish mid-market customers from large customers on the amount of money spent in an ERP purchase. Yet, as discussed below, this was the basis on which plaintiffs attempted to quantify the ERP market.

Vendors at Issue

Many firms develop, produce, market and maintain ERP software. Ex 5543 at 8-17. Some ERP software vendors, notably Oracle, PeopleSoft and a German company, SAP AG, developed cross-industry applications or "suites" of "generalized integrated software that could be customized for virtually any large business," Campbell-Kelly, From Airline Reservations to Sonic the Hedgehog at 172. It is to the products of these three vendors that plaintiffs direct their allegations. Although not alone in the ERP business, these three firms have the most comprehensive ERP software offerings.

Oracle. Oracle is headquartered in **[**19]** Redwood Shores, California. Oracle has over 41,000 employees and offices in 80 countries and sells product in over 120 countries. Tr at 3485:10-12, 3486:16-18 (Catz). Oracle's E-Business suite is a fully integrated suite of more than 70 modules for FMS, internet procurement, BI, SCM, manufacturing, project systems, HRM and sales and service management. Ex P2209 at xiv. As of December 2002, Oracle had over 5000 customers of its E-Business Suite, Release Hi. Ex P2208 at ORLIT-EDOC-00244117; Ex P3038. Oracle's ERP products have enjoyed success with telecommunications and financial services customers. Oracle is a major producer of relational database software which accounts for a much larger share of its revenue than its ERF business.

PeopleSoft. PeopleSoft is headquartered in Pleasnton, California and has 8300 employees. PeopleSoft sells software "in most major markets." Ex 7149 at 7. It has offices in Europe, Japan, Asia-Pacific, Latin America and other parts of the world. Id. PeopleSoft was formed in 1987 to develop an HRM product, and it continues to enjoy widespread customer acceptance of its HRM offerings. PeopleSoft now sells, in addition to HRM products, FMS, SCM and CRM products **[**20]** and related consulting services. Jt Stip Fact (Doc # 218) at 2. In 2003, Peoplesoft generated about $ 1.7 billion in revenue, derived almost entirely from ERP-related business. PeopleSoft v8 is PeopleSoft's current integrated suite offering. It competes with Oracle's E-Business suite, Release 11i.

SAP. SAP AG is headquartered in Waldorf, Germany. SAP AG has global operations, including major business operations in more than a dozen countries and customers in more than 120 countries around the globe. Tr at 2805:20-2806:2 (Knowles). SAP AG has over 30,000 employees and sells a product called MySAP ERP Suite, which includes HRM, FMS, corporate controlling and corporate services. Tr at 2811:7-13 (Knowles). SAP AG offers a product called All-in-One, which is "essentially a scaled-down version of MySAP ERP with a lot of functionality turned off." Tr at 2813:20-2814:2 (Knowles). All-in-One is marketed both through an indirect channel of resellers to the $ 200 million-and-below customer revenue segment and by SAP's direct sales **[*1105]** force. Tr at 2813:20-2814:2 (Knowles). SAP AG also offers a product called Business One, which is a "packaged software offering" targeting the $ 200 million-and-below **[**21]** customer revenue segment and sold through an indirect channel of resellers. Tr at 2813:10-17 (Knowles). SAP has six sales regions worldwide. SAP America, Inc is responsible for sales in the United States and Canada. Tr at 2808:16-19 (Knowles). SAP America sells software solutions created by SAP AG. Tr at 2808:8-15, 2806:16-17 (Knowles). In addition to selling software solutions created by SAP AG, the largest price discounts offered by SAP America must be approved by SAP AG. Tr 2836:22-24 (Knowles). SAP products have won wide acceptance in the aerospace and petroleum industries. Tr at 899:9-900:19, 947:10-21 (Keating).

Lawson. Lawson is headquartered in Saint Paul, Minnesota and has 1700 employees. Lawson was founded in the mid-1970s and has 2000 customers, mostly in North America and Europe. Lawson offers FMS, HRM, procurement products, merchandising products, enterprise performance management (EPM), service automation and a unique function called surgery instrument management. Tr at 3591:5-10 (Coughlan). In 2003, Lawson generated more than $ 360 million in annual revenue. Tr at 3589:19 (Coughlan). Lawson has tended to do extremely well in the healthcare and retail verticals. **[**22]** Tr at 3591:1-2 (Coughlan). As Professor Jerry Hausman testified, and the court will hereafter find, although Lawson does not now compete in all the industry verticals in which Oracle, PeopleSoft and SAP compete, Lawson has sufficient resources and capabilities to reposition to any industry vertical it so chooses. Tr at 3841:3-13 (Hausman).

AMS. AMS is an ERP vendor that was recently acquired by CGI, headquartered in Montreal, Quebec, with offices in North America, Europe and Asia-Pacific. As an ERP vendor, AMS offers FMS, HRM, procurement, tax and revenue software, CRM, CMS, environmental compliance software, performance management and budgeting and contracting software to government entities. See P3034 (Morea 5/7/04 Dep) at Tr 14:19-23. AMS has been successful in its sales to state and federal governmental agencies, often competing head to head with commercial ERP vendors. Tr at 972:6-15 (Keating) (agreeing that AMS is a "viable competitor for large and complex federal procurements"). In fact, only a short time after this action was initiated, the United States Department of Justice chose AMS FMS over the FMS offerings of Oracle, PeopleSoft and SAP. See D7166 (Morea 5/7/04 Dep) **[**23]** at Tr 21:22-22:7.

Microsoft. Microsoft is headquartered in Redmond, Washington, and sells a wide range of software products. In 2001 Microsoft acquired Great Plains Software and renamed it Microsoft Great Plains. Microsoft now has a division called Microsoft Business Solutions (MBS), which was created in 2002 when Microsoft Great Plains acquired the Danish software company Navison. Tr at 2972:19-2973:9, 2973:8-9 (Burgum). MBS has four existing ERP product lines: Navison, Great Plains, Axapta and Solomon. Tr at 2996:16 (Burgum). Great Plains offers FMS, HRM, E-commerce, retail management, CRM, analytics and reporting. See *http://www.microsoft.com/BusinessSoluions/GreatPlains/default.asp* x. Solomon provides FMS only. Tr at 2998:4 (Burgum). Navison offers FMS, SCM, CRM and E-commerce. See http://www.microsoft.com/BusinessSolutions/Navison/default.aspx. Finally Axapta offers FMS, HRM, SCM, E-commerce, CRM and analytics. See http://www.microsoft.com/BusinessSolutions/ Axapta/default.aspx.

[*1106] *Best of breed vendors.* Ninety percent of ERP sales are purchases of software "bundles" containing several pillars; rarely does a consumer purchase a single pillar. Tr at 3815:10-13 (Hausman). **[**24]** FMS and HRM pillars typically are sold in a bundle along with additional kinds of ERP, such as CRM or SCM. Further, the discounts that are offered to potential consumers are based on the value of the entire bundle, not simply based upon the presence of an HRM or FMS pillar. Tr at 3813:23-3814:1 (Hausman). Accordingly, when Oracle or PeopleSoft offers a discount on a bundle, it is doing so in order to ensure that the customer purchases all the pillars from Oracle or PeopleSoft, rather than turn to a best of breed vendor that specializes in selling a single kind of pillar. One best of breed vendor, Siebel, sells individual pillars of CRM. Testimony suggests Siebel is recognized industry-wide as selling high-quality CRM, equal to or better than the CRM pillars in Tier One software. Tr at 3814:15-17 (Hasuman).

Outsourcing. Because of the extensive amount of training and maintenance involved in implementing ERP packages purchased from ERP vendors, some companies have chosen an alternative solution -- outsourcing. Outsourcing occurs when a company hires another firm to perform business functions, often HRM functions. Tr at 2198:15-2198:3 (Elzinga). A company may outsource a single HRM **[**25]** function, such as benefits, pensions or payroll, or it may choose to outsource its entire continuum of HRM needs. Tr at 1648:14-22 (Bass). Many firms have outsourcing capabilities. Some of the outsourcers discussed at trial include: Accenture, Fidelity, ADP, Mellon, Exult, Hewitt, Aon and Convergys. Outsourcing firms may process a company's HR data using HRM software manufactured by an ERP vendor, such as Oracle, but some outsourcing firms use internally created HRM software (such as Fidelity using HR Access). Tr at 3152:18-3153:23 (Sternklar).

In addition to individual vertical success, ERP vendors have tended to enjoy varying degrees of success in different geographic regions. SAP, for example, has been more successful at selling ERP to financial institutions in Europe than in North America. Tr at 996:20-997:15 (Keating).

The FMS and HRM software sold to large customers is the same as that sold to mid-market customers. Tr at 819:8-11 (Allen); Tr at 1787:25-1788:2 (Wilmington); Tr at 3436:24-3437:11 (Catz); Ex D7166 (Morea 5/17/04 Dep) at Tr 18:15-19:2 (AMS); Ex P3179 (Ciandrini 1/16/04 Dep) at Tr 235:15-22. All the vendors -- including Oracle, SAP, and PeopleSoft -- have a single **[**26]** product "and that one product is sold up and down the line" to customers of all sizes. Ex P3171 (Ellison 1/20/04 Dep) at Tr 148:10-151:15. While some ERP vendors have introduced special licensing packages of FMS and HRM that are marketed to smaller customers, the actual software code in the FMS and HRM products sold to both large and mid-market customers is not different. Ex P3070 (Prestipino 5/18/04 Dep) at Tr 35:19-36:10 (Oracle); Tr at 3437:5-9 (Catz). Oracle has recently launched its E-Business Suite Special Edition to appeal to its smallest customers -- those who can use only 50 seats or less. It contains the same code as the software sold to the largest and middle-sized customers, but it arrives pre-configured by the consulting organization. Tr at 3436:24-3438:5 (Catz). It contains a subset of the modules found in Oracle's E-Business Suite, including FMS but excluding HRM. Tr at 3437:5-11 (Catz); Ex P3070 (Prestipino 5/18/04 Dep) at Tr 25:5-22, 32:19-33:19.

Despite the identity of code in each company's ERP packaged product, ERP product offerings are not homogeneous. While **[*1107]** the ERP products offered by Oracle and PeopleSoft and other vendors perform the same or similar functions, **[**27]** these products are not uniform in their architecture, scalability, functionality or performance characteristics. Tr at 897:23-899:3, 899:9-900:19, 901:6-902:15, 903:6-15, 946:18-20, 947:4-9, 992:23-993:7, 993:16-994:2, 996:20-997:15 (Keating). The product of each vendor possesses certain features or qualities so that none is a perfect substitute for any other. As the testimony indicated, and the court finds, no vendor is capable of meeting all of the high function needs, as defined by plaintiffs, of all customers. Tr at 2085:3-5 (Iansiti).

Furthermore, because each packaged ERP product must be customized and configured to fit the software footprint of the customer, a packaged ERP product may, as fitted to one customer's information technology footprint, differ significantly from the same packaged ERP product fitted to another customer's footprint. Because of these facts, the court finds the ERP products in suit to be differentiated products.

The court also finds that ERP software is highly durable and, therefore, regarded by customers as a capital good. Campbell demo # 5,6,19; see also Tr at 189:12-18 (Hatfield); Tr at 1107:16-19 (Cichnowicz); Tr at 1572:14-18 (Wolfe).

Customers **[**28]** almost always purchase a cluster of products such as Oracle's E-Business Suite that provide the customer with a stack of software and technology, which may include core HRM or FMS applications, add-on modules, customer-facing business applications such as CRM software and the infrastructure components (application servers and database) on which the applications run. Tr at 3461:14-3462:5 (Catz); Tr at 3807:21-3808:1 (Hausman). See, e g, Exs P1000-P1322 (Oracle discount request forms).

Plaintiffs' Claim of Threatened Injury to Competition

Plaintiffs allege that the HRM and FMS sold by Oracle, PeopleSoft and SAP are the only HRM and FMS products that can appropriately be deemed "high function HRM and FMS." FAC (Doc # 125) P 9 at 8.

Plaintiffs allege that these "high function" HRM and FMS products have the "scale and flexibility to support thousands of simultaneous users and many tens of thousands of simultaneous transactions and the ability to integrate seamlessly into bundles or 'suites' of associated HRM and FMS functions." Id P 14 at 9. Plaintiffs allege that "high function" HRM and FMS products compete in a market that is separate and distinct from that of all other ERP products, **[**29]** such as SCM, CRM or mid-market HRM and FMS, the latter being HRM or FMS products designed for organizations having less demanding needs. These mid-market products include Oracle's E-Business Suite Special Edition, SAP's MySAP and All-in-One, PeopleSoft's PeopleSoft EnterpriseOne and the products of ERP vendors such as Lawson and AMS.

Moreover, plaintiffs allege that this competition is geographically confined to the United States. Id at PP 24, 26 at 13. Within this narrowly defined product and geographic market, plaintiffs allege that with limited and specially explained exceptions, only Oracle, PeopleSoft and, to a lesser degree, SAP's United States arm, SAP America, are in effective competition. The proposed merger would therefore, in plaintiffs' view, constrict this highly concentrated oligopoly to a duopoly of SAP America and a merged Oracle/PeopleSoft.

Oracle, predictably enough, contends that plaintiffs' market definition is legally and practicably too narrow. Oracle contends that (1) "high function" HRM and **[*1108]** FMS software does not exist; "high function" is simply a label created by plaintiffs; (2) there is just one market for all HRM and FMS ERP products; (3) many firms other **[**30]** than the three identified by plaintiffs compete in the business of developing, producing, marketing and maintaining HRM and FMS ERP software; (4) this competition plays out in many more products than those in the HRM and FMS pillars; (5) price competition comes from sources in addition to ERP software vendors and includes competition from firms that provide outsourcing of data processing, the integration layer of the "software stack" and from the durability and adaptability of enterprises' installed base or legacy systems; (6) the geographic area of competition is worldwide or, at the very least, the United States and Europe; (7) the knowledgeable and sophisticated customers of ERP software would impede the exercise of any market power by a merged Oracle/PeopleSoft; and (8) potential entrants are poised to enter into competition, so that the proposed merger will not have an anticompetitive effect.

Taking up this dispute, the court first discusses the applicable law and economic principles that underlie its decision and then describes the parties' contentions and evidence along with the court's resolution of the disputed factual issues not previously discussed. This begins with the **[**31]** parties' sharply differing definitions of the product and geographic markets and whether there is a level of concentration sufficient to trigger the presumption under *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)*, that the proposed transaction will lead to a substantial lessening of competition under the principles set forth in the Department of Justice and Federal Trade Commission Horizontal Merger Guidelines (Apr 2, 1992, as revised Apr 8, 1997) ("Guidelines"). The court then turns to an efficiency defense offered by Oracle before setting forth its conclusions of law.

In brief summary, for the reasons explained at length herein, the court's findings and conclusions are as follows:

! plaintiffs have not proved that the product market they allege, high function HRM and FMS, exists as a separate and distinct line of commerce;

! plaintiffs have not proved the geographic market for the products of the merging parties is, as they allege, confined to the United States alone;

! plaintiffs have not proved that a post-merger Oracle would have sufficient market shares in the product and geographic markets, properly defined, to **[**32]** apply the burden shifting presumptions of Philadelphia Nat'l Bank;

! plaintiffs have not proved that the post-merger level of concentration (HHI) in the product and geographic markets, properly defined, falls outside the safe harbor of the Horizontal Merger Guidelines (Guidelines);

! plaintiffs have not proved that the ERP products of numerous other vendors, including Lawson, AMS and Microsoft, do not compete with the ERP products of Oracle, PeopleSoft and SAP and that these other vendors would not constrain a small but significant non-transitory increase in price by a post-merger Oracle;

! plaintiffs have not proved that outsourcing firms, such as Fidelity and ADP, would not constrain a small but significant non-transitory increase in price by a post-merger Oracle;

! plaintiffs have not proved that the ability of systems integrators to adapt, configure and customize competing ERP vendors' products to the needs of the group of customers that plaintiffs contend constitute a separate and distinct **[*1109]** product market would not constrain a small but significant non-transitory increase in price by a post-merger Oracle;

! plaintiffs have not proved that a post-merger **[**33]** Oracle and SAP would likely engage in coordinated interaction as the products of Oracle and SAP are not homogeneous, but are differentiated products, and that the pricing of these products is not standardized or transparent;

! plaintiffs have not proved localized product or geographic competition between Oracle and PeopleSoft that will be lessened as a result of the proposed merger as the merger would not create a dominant firm occupying a product or geographic space in which there is no serious competition;

! assuming that localized product or geographic competition exists between Oracle and PeopleSoft, plaintiffs have not proved that SAP, Microsoft and Lawson would not be able to reposition themselves in the market so as to constrain an anticompetitive price increase or reduction in output by a post-merger Oracle;

! plaintiffs have proved that products in the integration layer of the computer software industry and the presence of incumbent ERP systems would not constrain anticompetitive conduct on the part of a post-merger Oracle;

! Oracle has not proved efficiencies from the proposed merger sufficient to rebut any presumption of anticompetitive effects; should **[**34]** the court's principal findings and its conclusion that plaintiffs have not proved the proposed merger will likely lead to a substantial lessening of competition not be upheld on appeal, Oracle's efficiency defense should not require further trial court proceedings.

HORIZONTAL MERGER ANALYSIS

Section 7 of the Clayton Act ***HN1***[] prohibits a person "engaged in commerce or in any activity affecting commerce" from acquiring "the whole or any part" of a business' stock or assets if the effect of the acquisition "may be substantially to lessen competition, or to tend to create a monopoly." *15 USC § 18*. The United States is authorized to seek an injunction to block the acquisition, *15 USC § 25*, as are private parties and the several states, *California v. American Stores Co., 495 U.S. 271, 109 L. Ed. 2d 240, 110 S. Ct. 1853 (1990)*; *Hawaii v. Standard Oil Co. 405 U.S. 251, 258-59, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)*, and district courts have jurisdiction over such actions. *15 U.S.C. § 25*; *28 USC § 1337(a)*. Plaintiffs have the burden of proving a violation of *section 7* by a preponderance of the evidence.

[35]** ***HN2***[] To establish a *section 7* violation, plaintiffs must show that a pending acquisition is reasonably likely to cause anticompetitive effects. See *United States v. Penn-Olin Chem. Co., 378 U.S. 158, 171, 12 L. Ed. 2d*

775, 84 S. Ct. 1710 (1964) (noting that a section 7 violation is established when "the 'reasonable likelihood' of a substantial lessening of competition in the relevant market is shown"); United States v. Marine Bancorp. Inc., 418 U.S. 602, 622-23, 41 L. Ed. 2d 978, 94 S. Ct. 2856 (1974); FTC v. H J Heinz Co., 345 U.S. App. D.C. 364, 246 F.3d 708, 713, 719 (DC Cir. 2001). "'Congress used the words "may be substantially to lessen competition" (emphasis supplied) to indicate that its concern was with probabilities, not certainties.'" Id. at 713 (quoting Brown Shoe Co. v. United States, 370 U.S. 294, 323, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)). "Section 7 does not require proof that a merger or other acquisition [will] cause higher prices in the affected market. All that is necessary is that the merger create an appreciable danger of such con **[*1110]** sequences in the future." Hospital Corp. of Am. v. FTC, 807 F.2d 1381, 1389 (7th Cir. 1986). Substantial competitive harm **[**36]** is likely to result if a merger creates or enhances "market power," a term that has specific meaning in ***antitrust law***. See Eastman Kodak Co. v. Image Tech. Servs., Inc, 504 U.S. 451, 464, 119 L. Ed. 2d 265, 112 S. Ct. 2072, 92 Cal. Daily Op. Service 4823 (1992); Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421, 1434 (9th Cir. 1995).

Market Definition

HN3[] In determining whether a transaction will create or enhance market power, courts historically have first defined the relevant product and geographic markets within which the competitive effects of the transaction are to be assessed. This is a "necessary predicate" to finding anticompetitive effects. United States v. E.I. Du Pont de Nemours & Co., 353 U.S. 586, 593, 1 L. Ed. 2d 1057, 77 S. Ct. 872 (1957). Market definition under the case law proceeds by determining the market shares of the firms involved in the proposed transaction, Philadelphia Nat'l Bank, 374 U.S. 321, 10 L. Ed. 2d 915, 83 S. Ct. 1715, the overall concentration level in the industry and the trends in the level of concentration. United States v. Aluminum Co. of Am., 377 U.S. 271, 277-79, 12 L. Ed. 2d 314, 84 S. Ct. 1283 (1964); United States v. Von's Grocery Co., 384 U.S. 270, 272-74, 16 L. Ed. 2d 555, 86 S. Ct. 1478 (1966). A **[**37]** significant trend toward concentration creates a presumption that the transaction violates section 7. United States v. Baker Hughes Inc., 285 U.S. App. D.C. 222, 908 F.2d 981, 982-83 (DC Cir. 1990) (Thomas, J). See also United States v. Citizens & S. Nat'l Bank, 422 U.S. 86, 120-22, 45 L. Ed. 2d 41, 95 S. Ct. 2099 (1975). In other words, plaintiffs establish a prima facie case of a section 7 violation by "showing that the merger would produce 'a firm controlling an undue percentage share of the relevant market, and [would] result [] in a significant increase in the concentration of firms in that market.'" Heinz, 246 F3d at 715 (quoting Philadelphia Nat'l Bank, 374 U.S. at 363) (alterations in original). **HN4**[] Under Philadelphia Nat'l Bank, a post-merger market share of 30 percent or higher unquestionably gives rise to the presumption of illegality. 374 U.S. at 364 ("Without attempting to specify the smallest market share which would still be considered to threaten undue concentration, we are clear that 30% presents that threat.").

To rebut this presumption, defendant may "show that the market-share statistics give an inaccurate account **[**38]** of the merger's probable effects on competition in the relevant market." Heinz, 246 F.3d at 715 (internal quotation marks and alterations omitted). See also Baker Hughes, 908 F.2d at 987; California v. Am. Stores Co., 872 F.2d 837, 842-42 (9th Cir. 1989), rev'd on other grounds, 495 U.S. 271, 109 L. Ed. 2d 240, 110 S. Ct. 1853 (1990); FTC v. Warner Communs. Inc., 742 F.2d 1156, 1164 (9th Cir. 1984); Olin Corp. v. FTC, 986 F.2d 1295, 1305-06 (9th Cir. 1993). Arguments related to efficiencies resulting from the merger may also be relevant in opposing plaintiffs' case. See FTC v. Tenet Health Care Corp., 186 F.3d 1045, 1054-55 (8th Cir. 1999); FTC v. Staples, Inc, 970 F. Supp. 1066, 1088 (D. DC 1997). "'If the defendant successfully rebuts the presumption [of illegality], the burden of producing additional evidence of anticompetitive effects shifts to [plaintiffs], and merges with the ultimate burden of persuasion, which remains with the government at all times.'" Heinz, 246 F.3d at 715 (quoting Baker Hughes, 908 F.2d at 983) (first alteration in original).

HN5[] An application **[**39]** of the burden-shifting approach requires the court to determine (1) the "line of commerce" or product market in which to assess the transaction; (2) the "section of the country" or geographic market in which to assess the **[*1111]** transaction; and (3) the transaction's probable effect on competition in the product and geographic markets. See Marine Bancorporation, 418 U.S. at 618-23; FTC v. Harbour Group Investments LP, 1990 U.S. Dist. LEXIS 15542, 1990 WL 198819 at * 2 n3 (D. DC). See also FTC v. Swedish

Match, 131 F. Supp. 2d 151, 156 (D. DC 2000); FTC v. Cardinal Health, Inc, 12 F. Supp. 2d 34, 45 (D. DC 1998); Staples, 970 F. Supp. at 1072.

HN6[] Both the Supreme Court and appellate courts acknowledge the need to adopt a flexible approach in determining whether anticompetitive effects are likely to result from a merger. Reflecting their "generality and adaptability," Appalachian Coals. Inc. v. United States, 288 U.S. 344, 360, 77 L. Ed. 825, 53 S. Ct. 471 (1933), application of the antitrust laws to mergers during the past half-century has been anything but static. Accordingly, determining the existence or threat of anticompetitive effects has not stopped **[**40]** at calculation of market shares. In Hospital Corp. of Am. the court upheld the FTC's challenge to the acquisition of two hospital chains, but noted that "the economic concept of competition, rather than any desire to preserve rivals as such, is the lodestar that shall guide the contemporary application of the antitrust laws, not excluding the Clayton Act." 807 F.2d at 1386. Hence, the court held that it was appropriate for the FTC to eschew reliance solely on market percentages and the "very strict merger decisions of the 1960s." Id. at 1386. In addition to market concentration, probability of consumer harm in that case was established by factors such as legal barriers to new entry, low elasticity of consumer demand, inability of consumers to move to distant hospitals in emergencies, a history of collusion and cost pressures creating an incentive to collude. 807 F.2d at 1388-89.

In United States v. Waste Management, 743 F.2d 976 (2d Cir. 1984), the court of appeals reversed a finding of a section 7 violation based on market shares and prima facie illegality under Philadelphia Nat'l Bank, one made even though there were few barriers **[**41]** to new entry into the market. The trial court had erroneously ignored the Supreme Court's holding in United States v General Dynamics, 415 U.S. 486, 39 L. Ed. 2d 530, 94 S. Ct. 1186 (1974), that a prima facie case may still be rebutted by proof that the merger will not have anticompetitive effects. A finding of market shares and consideration of the Philadelphia Nat'l Bank presumptions should not end the court's inquiry.

The trend in these cases away from the "very strict merger decisions of the 1960s," Hospital Corp. of Am. 807 F.2d at 1386, is also reflected in the Guidelines. The Guidelines view statistical and non-statistical factors as an integrated whole, avoiding the burden shifting presumptions of the case law. The Guidelines define market power as "the ability profitably to maintain prices above competitive levels for a significant period of time." Guidelines § 0.1. Five factors are relevant to the finding of market power: (1) whether the merger would significantly increase concentration and would result in a concentrated market, properly defined; (2) whether the merger raises concerns about potential adverse competitive effects; (3) whether timely and likely **[**42]** entry would deter or counteract anticompetitive effects; (4) whether the merger would realize efficiency gains that cannot otherwise be achieved; and (5) whether either party would likely fail in the absence of the merger. Guidelines, § 0.2.

In defining the market, the Guidelines rely on consumer responses. Starting with the smallest possible group of competing products, the Guidelines then ask "whether 'a hypothetical monopolist over that group of products would profitably impose at **[*1112]** least a "small but significant and nontransitory" [price] increase ["(SSNIP)"],'" generally deemed to be about five percent lasting for the foreseeable future. United States v. Sungard Data Sys., Inc, 172 F. Supp. 2d 172, 182 (D. DC 2001) (quoting Guidelines § 1.11). If a significant number of customers respond to a SSNIP by purchasing substitute products having "a very considerable degree of functional interchangeability" for the monopolist's products, then the SSNIP would not be profitable. United States v. E.I. Du Pont de Nemours & Co., 351 U.S. 377, 399, 100 L. Ed. 1264, 76 S. Ct. 994. See Guidelines § 1.11. Accordingly, the product market must be expanded to encompass those substitute products that constrain the monopolist's pricing. **[**43]** The product market is expanded until the hypothetical monopolist could profitably impose a SSNIP. Id § 1.11. Similarly, in defining the geographical market, the Guidelines hypothesize a monopolist's ability profitably to impose a SSNIP, again deemed to be about five percent, in the smallest possible geographic area of competition. Id § 1.21. If consumers respond by buying the product from suppliers outside the smallest area, the geographic market boundary must be expanded. Id.

Once the market has been properly defined, the Guidelines set about to identify the firms competing in the market and those likely to enter the market within one year. Guidelines § 1.32. Following these steps, the Guidelines calculate the market share of each participant, followed by the Herfindahl-Hirschman Index (HHI) concentration measurement for the market as a whole. Guidelines § 1.5. The HHI is calculated by squaring the market share of each participant, and summing the resulting figures. Id. The concentration standards in the Guidelines concern the (1) pre-merger HHI (HHI1), (2) the post-merger HHI (HHI2) and (3) the increase in the HHI resulting from the merger, termed delta HHI (?HHI). See Andrew **[**44]** I Gavil, William E Kovacic and Jonathan B Baker, ***Antitrust Law*** in Perspective; Cases. Concepts and Problems in Competition Policy, 480-84 (Thomson West, 2002). The Guidelines specify safe harbors for mergers in already concentrated markets that do not increase concentration very much. For example if the post-merger HHI is between 1000 and 1800 (a moderately concentrated market) and the ?HHI is no more than 100 points, the merger is unlikely to be presumed illegal. Guidelines § 1.51. Likewise, if the post-merger HHI is above 1800 (a highly concentrated market) and the ?HHI is no more than 50 points, the merger will not be presumed illegal. Id.

Notwithstanding these statistical data, the Guidelines next focus on the likely competitive effects of the merger. Guidelines § 2.0; *Baker Hughes, 908 F.2d at 984* ("Evidence of market concentration simply provides a convenient starting point for a broader inquiry into future competitiveness * * *.). The Guidelines recognize that anticompetitive effects may arise in two contexts. First, the Guidelines address the lessening of competition through coordinated interaction between the merged firm and remaining rivals. Guidelines **[**45]** § 2.1. Second, the Guidelines address the anticompetitive effects based on unilateral action. Id § 2.2.

Anticompetitive Effects Coordinated Effects

In analyzing potential coordinated effects, a court is concerned that the merger may diminish competition by "enabling the firms * * * more likely, more successfully, or more completely to engage in coordination interaction." Guidelines § 2.1. This behavior can be express or tacit (implied by silence), and the behavior may or may not be lawful in and of itself. Id. The Guidelines explicitly recognize that successful coordinated interaction "entails **[*1113]** reaching [1] terms of coordination that are profitable to the firms involved and [2] an ability to detect and punish [cheating]." Id § 2.1. See also *FTC v. Elders Grain, Inc., 868 F.2d 901, 905 (7th Cir. 1989)*; *Hospital Corp. of Am., 807 F.2d at 1386-87*. Examples of "terms that are profitable" include common pricing, fixed price differentials, stable market shares and customer or territorial restrictions. Guidelines § 2.11

Factors that increase the likelihood of coordination include product homogeneity, pricing standardization and pricing transparency. **[**46]** *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 238, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)*; *Elders Grain, 868 F.2d at 905*. Plaintiffs do not contend that any of those conditions are presented in the proposed merger which must, therefore, be analyzed for unilateral anticompetitive effects.

Unilateral Effects

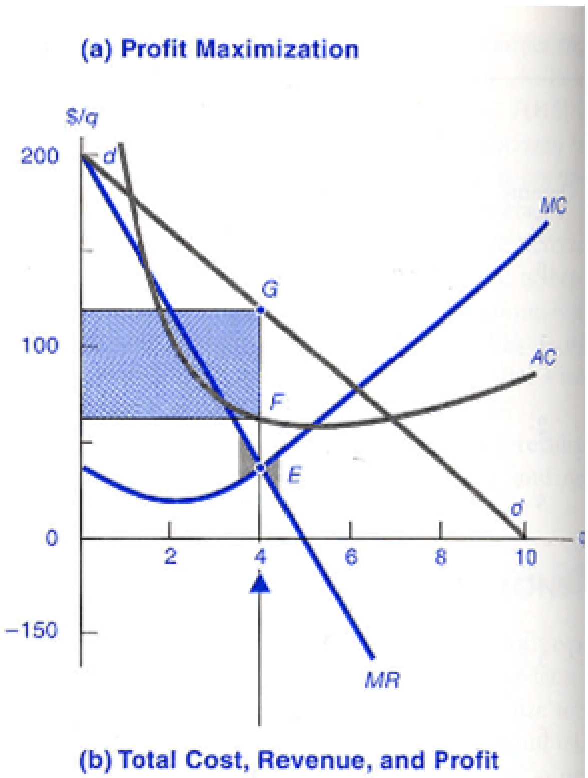
There is little case law on unilateral effects merger analysis. Few published decisions have even discussed the issue, at least using the term "unilateral effects." See, e g, *Swedish Match. 131 F. Supp. 2d at 168*; *New York v Kraft Gen Foods, Inc., 926 F. Supp. 321, 333-35 (S.D.N.Y. 1995)*; Guidelines § 2.2. But, as the court demonstrates below, "unilateral effects" is primarily a new term to address antitrust issues that courts have in other contexts considered for quite some time.

HN7[] Unilateral effects result from "the tendency of a horizontal merger to lead to higher prices simply by virtue of the fact that the merger will eliminate direct competition between the two merging firms, even if all other firms in the market continue to compete independently." Carl Shapiro, Mergers with Differentiated Products, 10 Antitrust 23, 23 (Spring 1996). **[**47]** Unilateral effects are thought to arise in primarily two situations, only the second of which is alleged in this case. See Roscoe B Starek III & Stephen Stockum, What Makes Mergers Anticompetitive?: "Unilateral Effects" Analysis Under the 1992 Merger Guidelines, 63 Antitrust LJ 801, 803 (1995); Guidelines §§ 2.21, 2.22; Phillip E Areeda, Herbert Hovenkamp & John L Solow, 4 ***Antitrust Law*** P 910 (Aspen, rev ed 1998) (subdividing unilateral effects theories into four categories).

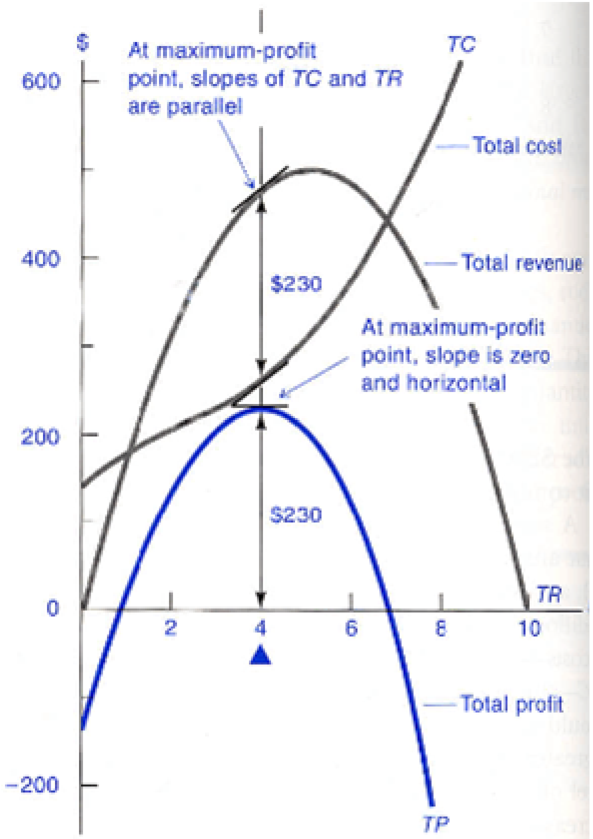
The first situation involves a "dominant firm and a ' fringe' of competitors producing a homogeneous product." Starek & Stockum, 63 Antitrust LJ at 803. In this situation, the dominant firm has a substantial cost advantage over the fringe competitors and, therefore, can restrict output to obtain an above-marginal cost price.

The second situation, and the one here applicable, concerns differentiated products. Starek & Stockum, 63 Antitrust LJ at 803; Guidelines § 2.21. Competition in differentiated product markets, such as ERP products, is often described as "monopolistic competition." There is a notable and interesting literature on this subject commencing with **[**48]** the path-breaking and independent insights of two notable economists. See Edward Chamberlin, The Theory of Monopolistic Competition (Harvard, 1933, 1938); Joan Robinson, The Theory of Imperfect Competition (St Martin's, 1933, 2d ed 1969). The admirably clear exposition found in Paul A Samuelson & William D Nordhaus, Economics 187-89 (McGraw-Hill, 17th ed 2001) makes apparent this nomenclature.

The market demand curve shows the quantity of a good that would be purchased in the market at each price, other things being equal. Id at 760. A seller's "own," or "residual," demand curve shows the quantity of the good offered by the seller that would be purchased from the seller at each price, other things being equal. Under perfect competition, the individual **[*1114]** seller faces a horizontal (each additional unit brings the same revenue), or perfectly elastic, demand curve because nothing the seller can do alters demand for the seller's product. Id at 148. The seller is a price taker. Because the seller's demand curve is horizontal, the seller's marginal revenue curve is also horizontal and the seller continues to produce until its marginal cost is equal to the market price or average **[**49]** revenue and profits, as economists define them, are *zero.* See id fig 8-2 and text at 148-50.



The adjacent figure, borrowed from Samuelson & Nordhaus, Economics fig 9-4 at 178, illustrates the different picture facing the monopolist. Its demand curve is not horizontal but reflects the inverse relationship between price and the quantity demanded. Because it is the only seller of the product, the pure or natural monopolist faces not the horizontal demand curve of the perfectly competitive firm, but the sloping demand curve of the entire market. In the graph, the monopolist is able to maximize profit at the intersection of marginal cost and revenue by reducing output to 4 and raising the price to $ 120, which exceeds marginal cost. The monopolist thus derives a "monopoly rent" equal to the number of units sold times the difference between the market price (G) and the monopolist's average cost (F), algebraically, (G -- F) x 4. It is this reduction in output and elevation of price that has been the historic concern of antitrust.



[*1115]

Firms in perfect competition "produce homogeneous product" so that "price is the only variable **[**50]** of interest to consumers, and no firm can raise its price above marginal cost without losing its entire market share." Jean Tirole, The Theory of Industrial Organization at 277 (MIT, 1988). Differentiated products are imperfect substitutes representing as they do different features or characteristics that appeal variously to different customers. Because no product is a perfect substitute of another in a differentiated products market, each seller continues to face a downward sloping demand curve. Like a pure monopolist, the seller of a differentiated product, facing a downward sloping, or less than perfectly elastic, demand curve, maximizes its profit by pricing above marginal cost. See Samuelson & Nordhaus, Economics fig 10-3 and text at 188-89.

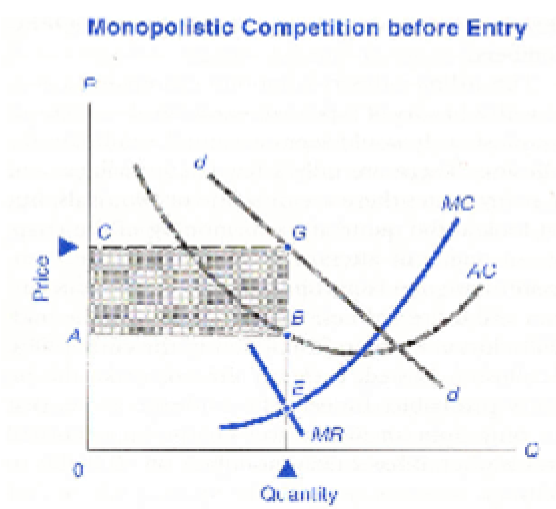


FIGURE 10-3. Monopolistic Competitors Produce Many Similar Goods

[*1116]

HN8[] Like a seller in a perfectively competitive market, however, sellers in a "competitive" differentiated products market do not obtain monopoly rents. In differentiated product markets with few barriers to entry, firms will introduce products that are increasingly close, although not perfect substitutes, for the other products in the market. The introduction of additional products causes the demand curve **[**51]** faced by each seller to shift downward and leftward until, at long run equilibrium, the demand curve intersects the average cost curve of the seller (defined as economists define costs to include a reasonable profit) eliminating the monopolistic rent (ACGB). See id fig 10-4 and text at 188-89.

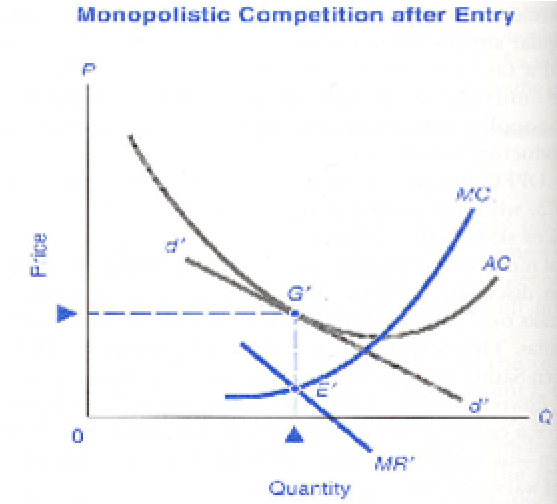

FIGURE 10-4. Free Entry of Numerous Monopolistic Competitors Wipes Out Profit

HN9[] Differentiated product markets hence share some characteristics of both a pure monopoly and perfect competition, in that "prices are above marginal costs but economic profits have been driven down to zero." Id at 189 (describing "economic profits" as supra-normal profits or monopoly rents). Firms selling differentiated **[*1117]** products have some "market power" in that they are able to exert some control over the prices they obtain although this does not rise to the level of "monopoly power." See Shapiro, 63 Antitrust LJ 801 n4 (citing the economic literature).

The Guidelines provide some instruction on the necessary elements of a unilateral effects claim involving differentiated products under *section 7*.

> Substantial unilateral price elevation in a market for differentiated products requires [1] that there be a significant share of sales in the market **[**52]** accounted for by consumers who regard the products of the merging firms as their first and second choices, and [2] that repositioning of the non-parties' product lines to replace the localized competition lost through the merger be unlikely.

Guidelines § 2.21.

Although the Guidelines' discussion quoted above may be a helpful start, the factors described therein are not sufficient to describe a unilateral effects claim. First, the Guidelines' discussion, at least in section 2.21, emphasizes only the relative closeness of a buyer's first and second choices. But the relative closeness of the buyer's other choices must also be considered in analyzing the potential for price increases. The Guidelines later acknowledge as much in section 2.212, which recognizes that if a buyer's other options include "an equally competitive seller not formerly considered, then the merger is not likely to lead to a unilateral elevation of prices." Accordingly, *HN10*[] a plaintiff must prove not only that the merging firms produce close substitutes but also that other options available to the buyer are so different that the merging firms likely will not be constrained from acting anticompetitively.

Second, **[**53]** the Guidelines require only a demonstration of some "significant share of sales in the market accounted for by customers" that rank the merging firms first and second. Id § 2.21. "Measures of the 'closest substitutes' or 'second choices' of inframarginal purchasers of Product A are only relevant to the degree that inframarginal and marginal consumers have similar preferences. However, essentially by definition, marginal and inframarginal consumers do not share similar preferences." Christopher A Vellturo, Creating an Effective Diversion;

Evaluating Mergers with Differentiated Products, 11 Antitrust 16, 18 (Spring 1997); Gregory J Werden & George A Rozanski, The Application of Section 7 to Differentiated Products Industries: The Market Definition Dilemma, 8 Antitrust 40, 41 (Summer 1994) (" There is no reason why the shares in any delineated market in a differentiated products industry are indicative of the relative importance of each merging firm as a direct competitor of the other.").

In sum, it appears that ***HN11***[] four factors make up a differentiated products unilateral effects claim. First, the products controlled by the merging firms must be differentiated. **[**54]** Products are differentiated if no "perfect" substitutes exist for the products controlled by the merging firms. See Samuelson & Nordhaus, Economics at 187-89; Areeda, Hovenkamp & Solow, 4 ***Antitrust Law*** P 914d ("By 'significant' we mean product differentiation that goes to fairly fundamental differences in product design, manufacturing costs, technology, or use of inputs."). Second, the products controlled by the merging firms must be close substitutes. Products are close substitutes if a substantial number of the customers of one firm would turn to the other in response to a price increase. Third, other products must be sufficiently different from the products controlled by the merging firms that a merger would make a small but significant and non-transitory price increase profitable for the merging **[*1118]** firms. Finally, repositioning by the non-merging firms must be unlikely. In other words, a plaintiff must demonstrate that the non-merging firms are unlikely to introduce products sufficiently similar to the products controlled by the merging firms to eliminate any significant market power created by the merger. These four factors substantially track the analysis in Areeda, Hovenkamp **[**55]** and Solow. Areeda, Hovenkamp & Solow, 4 ***Antitrust Law*** P 914f at 68-69.

The essential elements of such a differentiated products unilateral effects claim are quite similar to those in "standard" antitrust analysis. In standard antitrust analysis, the court considers both "demand elasticity" and "supply elasticity" in determining whether anticompetitive effects are likely. *Rebel Oil, 51 F.3d at 1436*. In other words, courts determine the degree to which price increases will cause marginal buyers to turn to other products or marginal suppliers to increase output of the product. Considerations of demand and supply elasticity also motivate the factors outlined by the court for a differentiated products unilateral effects analysis. The factors considering the relative substitutability of the products of the merging and non-merging firms, factors 1 to 3, essentially address demand-side substitutability and the repositioning factor, factor 4, essentially addresses supply-side substitutability.

Antitrust analysis of differentiated product markets is hardly new. See, e g, *Du Pont, 351 U.S. at 392-93* (describing the concepts of monopolistic competition and **[**56]** differentiated product markets); Areeda, Hovenkamp & Solow, 4 ***Antitrust Law*** P 914c (suggesting that early railroad merger cases could be viewed as unilateral effects cases). Indeed, as noted above, defining a geographic market involves exactly same concept of localized competition that motivates differentiated products unilateral effects analysis.

Areeda, Hovenkamp and Solow persuasively contend that "the appropriate conclusion [under *a* unilateral effects analysis] is that the merger has facilitated the emergence of a new grouping of sales capable of being classified as a relevant market." Id P 913b. This "new grouping of sales" is one "in which the merging firms have either a monopoly or else a dominant share." Id P 914f at 69. In an example of two merging firms, B and C, Areeda, Hovenkamp and Solow state that "the merger does not create such a market because a cartel of firms B and C would also have been able to increase price profitably, indicating that B and C were already a relevant market." Id P 914a at 60. But of course, "before their union, B and C felt one another's competition, as well as that of other firms, more significantly than after the merger." Id. Areeda, **[**57]** Hovenkamp and Solow also later note that "the sufficiently similar output of other firms must be included" in the relevant market. Id P 914f at 70.

HN12[] In a unilateral effects case, a plaintiff is attempting to prove that the merging parties could unilaterally increase prices. Accordingly, a plaintiff must demonstrate that the merging parties would enjoy a post-merger monopoly or dominant position, at least in a "localized competition" space.

Unilateral effects analysis shares many similarities with standard coordinated effects antitrust analysis. But there are also notable differences.

HN13[] Relevant markets defined in terms of "localized competition" may be much narrower than relevant markets defined in typical cases in which a dominant position is required. Judicial experience cautions against the use of qualitative factors to define narrow markets. This judicial experience **[*1119]** arises, in part, from the rise (and fall) of the "submarkets" doctrine.

In Brown Shoe, the Supreme Court stated that submarkets may constitute relevant product markets. "The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between **[**58]** the product itself and substitutes for it. However, within this broad market, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes." *Brown Shoe, 370 U.S. at 325* (citing *Du Pont, 353 U.S. at 593-95*) (footnote omitted).

Properly construed,*Brown Shoe* suggests merely that the technical definition of a relevant market in an antitrust case may be smaller than a layperson would normally consider to be a market. The use of the term "submarket" may be useful in "overcoming the first blush or initial gut reaction" to a relatively narrowly defined market. See *Staples, 970 F. Supp. at 1074* (defining the relevant market as "the sale of consumable office supplies through office supply superstores").

Focusing on "submarkets" may be misleading, however, because "the same proof which establishes the existence of a relevant product market also shows (or * * * fails to show) the existence of a product submarket." *H J, Inc v. International Tel. & Tel. Corp., 867 F.2d 1531, 1540 (8th Cir. 1989)*. See also *Olin, 986 F.2d at 1301*. Defining a narrow "submarket" tends to require a **[**59]** relatively long laundry list of factors, which creates the danger of narrowing the market by factors that have little economic basis. Courts and commentators suggest that the use of the submarkets doctrine has, in fact, misled courts into "identifying artificially narrow groupings of sales on the basis of noneconomic criteria having little to do with the ability to raise price above cost." Areeda, Hovenkamp & Solow, 4 ***Antitrust Law*** P 914a at 60. See also *Allen-Myland, Inc. v. IBM, 33 F.3d 194, 208 n16 (3rd Cir. 1994)*; Satellite Television & Associated Resources v. Continental Cablevision of Va, Inc., 714 .F2d 351, 355 n5 (4th Cir. 1983).

The similarities between the submarkets doctrine generally and localized competition in unilateral effects cases are difficult to miss. Indeed, commentators have been quick to note the potential for "localized competition" analysis to devolve into an unstructured submarket-type analysis. See Areeda, Hovenkamp & Solow, 4 ***Antitrust Law*** P 914a at 60; Starek & Stockum, 63 Antitrust LJ at 814-15 (arguing that the Guidelines' focus on localized competition should not "be used as a tool for rehabilitating discredited **[**60]** 'submarket' analysis").

Furthermore, judicial rejection of markets narrowly defined to a single manufacturer's product has been even more pronounced than judicial skepticism about narrowly defined submarkets. See, e g, *Du Pont, 351 U.S. at 392-93* (refusing to define a market limited to cellophane); *TV Communs. Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1025 (10th Cir. 1992)* (refusing to define a market limited to TNT cable provision in the greater Denver area); *Town Sound & Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 479-80 (3rd Cir. 1992)* (en banc) (refusing to define a market limited to Chrysler products); *Gall v. Home Box Office, Inc., 1992 U.S. Dist. LEXIS 13020, 1992 WL 230245 at *4 (SDNY)* ("The natural monopoly every manufacturer has in its own product simply cannot serve as the basis for antitrust liability."). Cf *Eastman Kodak, 504 U.S. at 481-82* (upholding denial of summary judgment in an installed base context).

As emphasized in Du Pont;

> **[*1120]** One can theorize that we have monopolistic competition in every nonstandardized commodity with each manufacturer having power over the price and production **[**61]** of his own product. However, this power that, let us say, automobile or soft-drink manufacturers have over their trademarked products is not the power that makes an illegal monopoly. Illegal power must be appraised in terms of the competitive market for the product.

351 U.S. at 393 (footnotes omitted).

HN14[] Merely demonstrating that the merging parties' products are differentiated is not sufficient. Instead, a plaintiff must demonstrate product differentiation sufficient to sustain a small but significant and non-transitory price increase.

Additionally, defining markets in terms of "localized competition" may result in markets defined so narrowly that one begins to question whether the market constitutes a "line of commerce" as required by *section 7*. One concern is that the market is defined so narrowly that it encompasses an insubstantial amount of commerce. In Philadelphia Nat'l Bank, the Supreme Court found a "workable compromise" between a geographic market narrowly defined in terms of bank offices in the immediate neighborhood or more expansively defined to include the banks available only to large borrowers. *374 U.S. at 360-61*. Another concern is **[**62]** that the market is defined so narrowly it fails to capture the potential effects of the merger. For example, it might be inappropriate to focus on a single city in analyzing the effects of a merger between sellers who compete on a much larger scale. Cf *Staples, 970 F. Supp. at 1073* & nn5-6 (analyzing the likelihood of anticompetitive effects in forty-two metropolitan areas).

Even if a narrow market definition would be appropriate, it may be more difficult to identify "clear breaks in the chain of substitutes" sufficient to justify bright-line market boundaries in differentiated products unilateral effects cases. The conventional ideal market boundary divides products within the market, which are freely substitutable with one another, from products outside the market, which are poor substitutes for the products within the market. See *United States v. Rockford Memorial Corp., 717 F. Supp. 1251, 1260 (N.D. Ill. 1989)* (emphasis added), aff'd, *898 F.2d 1278 (7th Cir 1990)*. In differentiated products unilateral effects cases, a "spectrum" of product differences, inside and outside the market boundary, is more likely. *In re Super Premium Ice Cream Distribution Antitrust Litig., 691 F. Supp. 1262 (N.D. Cal. 1988),* **[**63]** aff'd sub nom, Haagen-Dazs Co. v. Double Rainbow Gourmet Ice Creams, Inc., *895 F.2d 1417 (9th Cir. 1990)* (table). In discussing unilateral effects, Shapiro has written:

> Any attempt to make a sharp distinction between products "in" and "out" of the market can be misleading if there is no clear break in the chain of substitutes: if products "in" the market are but distant substitutes for the merging products, their significance may be overstated by inclusion to the full extent that their market share would suggest; and if products "out" of the market have significant cross-elasticity with the merging products, their competitive significance may well be understated by their exclusion.

Shapiro, 10 Antitrust at 28. See also Edward Chamberlin, Product Heterogeneity and Public Policy, 40 Am. Econ. Rev. (Papers & Procs) 85, 86-87 (1950).

Additionally, to the extent that clear breaks are difficult to identify, attempts to create defensible market boundaries are likely to be based on relatively vague product **[*1121]** characteristics. ***HN15***[🡅] Product characteristics that are too vague do not meet *section 7*'s requirement that the relevant market be "well-defined. **[**64]** " See *Tenet Healthcare, 186 F.3d at 1052*.

A closer look at product differentiation demonstrates further difficulties in defining the relevant market in differentiated product unilateral effects cases. Price is one, but only one, of many ways in which to differentiate a product. A market of homogeneous goods can be seen as a market in which sellers have only one dimension in which to differentiate their product. One expects sellers in such a market to "differentiate" their products by lowering the price until price equals marginal cost. On the other hand, ***HN16***[🡅] a differentiated product "market" is a market in which sellers compete along more dimensions than price. As a result, products competing against one another in a differentiated product market may have widely different prices. That products with widely different prices may, in fact, be in the same market complicates market definition considerably.

The "Cellophane fallacy" may complicate matters even further. This phenomenon takes its name from an error in the Supreme Court's logic Du Pont. In Du Pont, the plaintiff was the primary manufacturer of cellophane. The Supreme Court held that the relevant market included **[**65]** "all flexible wrappings" because cross-price elasticities of demand indicated that an increase in the price currently charged for cellophane would cause a significant number of purchasers to turn to other flexible wrapping products.

The error in the logic of *Du Pont* is that " the existence of significant substitution in the event of further price increases or even at the current price does not tell us whether the defendant already exercises significant market power.'" *Eastman Kodak, 504 U.S. at 471* (quoting Phillip Areeda & Louis Kaplow, Antitrust Analysis P 340(b) (Aspen, 4th ed 1988)). Stated slightly differently, ***HN17***[🡅] because a monopolist exercises market power by increasing price until the cross-price elasticity of demand is so high that a further price increase would be unprofitable, a high cross-price elasticity of demand at current prices, by itself, does not demonstrate that the seller lacks market power.

The implications of the Cellophane fallacy on market definition in differentiated product market cases would seem to suggest caution. ***HN18***[] Courts should be wary of defining markets so broadly that a seller's existing market power is missed. On the other **[**66]** hand, in differentiated product markets, some measure of market power is inherent and an unduly narrow product market definition proves too much. In merger analysis, the court is concerned primarily with determining whether the merger would enhance market power, not whether market power currently exists.

In sum, defining the relevant market in differentiated product markets is likely to be a difficult task due to the many non-price dimensions in which sellers in such markets compete. Further, it may be difficult to determine currently existing market power and separate this from enhanced market power due to the merger.

HN19[] The inability clearly to define a market suggests that strong presumptions based on mere market concentration may be ill-advised in differentiated products unilateral effects cases. As noted by Starek and Stockum, "it is generally misleading to suggest that a firm "controls" a certain market share in the absence of an analysis beyond market concentration." Starek & Stockum, 63 Antitrust LJ at 804. See also Jerry A Hausman & Gregory K Leonard, Economic Analysis of Differentiated Products Mergers Using Real World Data, *5 Geo. Mason L. Rev. 321, 337-39 (1997)*. **[**67]** **[*1122]** Such a concern applies with equal force to differentiated products unilateral effects claims. Furthermore, in differentiated products unilateral effects cases, the merging parties' combined market shares relative to competitors may be less relevant than the size of their market shares in determining whether anticompetitive effects are likely. See Gregory J Werden & Luke M Froeb, The Effects of Mergers in Differentiated Products Industries; Logit Demand and Merger Policy, 10 J L Econ & Org 407, 413 (1994).

Accordingly, a strong presumption of anticompetitive effects based on market concentration is especially problematic in a differentiated products unilateral effects context.

Despite the problems with qualitative analyses, modern econometric methods hold promise in analyzing differentiated products unilateral effects cases. Merger simulation models may allow more precise estimations of likely competitive effects and eliminate the need to, or lessen the impact of, the arbitrariness inherent in defining the relevant market. For example, some merger simulation methods compensate for potential errors in market definition. A model advanced by Werden and Froeb uses a set of "inside **[**68]** goods" and a set of "outside goods." Id at 410. The model contains a parameter, beta, that controls for the substitutability among the inside goods and another parameter, epsilon, that controls for the substitutability between the inside and outside goods. Id. To the extent the set of goods considered as "inside goods" is defined narrowly, epsilon increases. Id at 424-25. The increase in epsilon increases the predicted amount of substitution to outside goods. Accordingly, error in defining the product market too narrowly will be offset, at least to some extent, by the increase in epsilon.

In sum, ***HN20***[] differentiated products unilateral effects analysis shares many similarities to "standard" antitrust analysis. The primary differences are that the relevant market is likely to be smaller and more difficult to define and that quantitative analyses may be robust.

HN21[] In analyzing antitrust claims, courts have considered both "circumstantial" and "direct" evidence of anticompetitive effects. See *Rebel Oil, 51 F.3d at 1434*. Even though "direct" evidence of the potential for anticompetitive harm from a merger is not literally available, merger analyses range from highly **[**69]** qualitative ("circumstantial") to highly quantitative ("direct"), depending on the data available for a particular market. Qualitative analyses of antitrust claims are most often structural. In a structural analysis, anticompetitive effects are presumed if a plaintiff demonstrates undue concentration in a well-defined market. See *Philadelphia Nat'l Bank, 374 U.S. at 363*; *Baker Hughes, 908 F.2d at 982*. A relevant market may be defined by reference to Brown Shoe's "practical indicia." *370 U.S. at 325*. Once the relevant market is defined, market shares are calculated and inferences are drawn from the degree of concentration.

The Guidelines adopt a structural approach for addressing unilateral effects claims that closely mirrors traditional structural analysis. See Guidelines § 2.211. The biggest weakness in the Guidelines' approach appears to be its strong reliance on particular market share concentrations. Under the Guidelines, anticompetitive effects are presumed "where market concentration data fall outside the safeharbor regions of Section 1.5, the merging firms have a combined market share of at least thirty-five percent, and where data **[**70]** on product attributes and relative product appeal show that a significant share of purchasers of one merging firm's product regard the other as **[*1123]** their second choice," unless "rival sellers likely would replace any localized competition lost through the merger by repositioning their product lines." Id at §§ 2.211, 2.212.

A presumption of anticompetitive effects from a combined share of 35% in a differentiated products market is unwarranted. Indeed, the opposite is likely true. ***HN22***[] To prevail on a differentiated products unilateral effects claim, a plaintiff must prove a relevant market in which the merging parties would have essentially a monopoly or dominant position. In Rebel Oil, the Ninth Circuit noted that a market share of 30% is "presumptively insufficient to establish the power to control price." *51 F.3d at 1438*.

Market definitions, statistical presumptions and likelihood of unilateral anticompetitive effects are all issues on which the parties contended vigorously and presented much evidence. To these, the court now turns.

CONTENTIONS, EVIDENCE AND FINDINGS

HN23[] "Defining the relevant market is critical in an antitrust case because the legality of the proposed **[**71]** merger [] in question almost always depends upon the market power of the parties involved." *Cardinal Health, 12 F. Supp. 2d at 45*. Yet the precise characteristics that plaintiffs have used to describe the line of commerce allegedly affected by the proposed transaction changed throughout the course of this litigation. And the evidence of market shares presented to enable the court to apply the Philadelphia Nat'l Bank presumptions or make the HHI calculations of the Guidelines is, given the mountain of evidence plaintiffs presented, startling sparse.

Plaintiffs' Proposed Product Market Definition

Plaintiffs offer a product market of high function HRM and FMS and a geographic market of the United States.

Four elements constitute plaintiffs' definition of high function HRM software as alleged in the FAC: "[1] Human Resource Management (HRM) [2] software and accompanying services [3] that can be integrated into suites of associated functions from a single vendor [4] with performance characteristics that meet the demands of multifaceted organizations with high-level functional needs." FAC (Doc # 125) P 23 (a) at 12.

Likewise, four elements constitute plaintiffs' **[**72]** definition of high function FMS software as alleged in the FAC: "[1] Financial Management Services (FMS) [2] software and accompanying services [3] that can be integrated into suites of associated functions from a single vendor [4] with performance characteristics that meet the demands of multifaceted organizations with high-level functional needs." Id P 23(b) at 12-13.

The FAC also notes certain performance characteristics of high function software:

> Customers with high-level functional needs ("enterprise customers") require products that can support their ongoing business processes and reporting requirements that may stretch across multiple jurisdictions (often requiring support for foreign languages and reporting requirements), multiple legal entities or divisions within the organization and multiple lines of business. These **[*1124]** products must have the scale and flexibility to support thousands of simultaneous users and many tens of thousands of simultaneous transactions, and the ability to integrate seamlessly into bundles or "suites" of associated HRM and FMS functions. Most importantly, these products must have the flexibility through configuration options or other **[**73]** means to be matched to the administrative and reporting processes of each unique customer.

Id P 14 at 9.

Plaintiffs clarified their allegations at the request of the court during the trial by submitting a statement of definitions, some of which were joined by defendant. Jt Sub Definitions (Doc # 332). In these definitions, plaintiffs omitted "and accompanying services" from the second element alleged in the FAC. Plaintiffs also relegated the FAC's third element regarding integration to a mere sub-element of the performance characteristics described in the FAC's fourth element. Finally, plaintiffs describe four "performance capabilities." Products in the market are (1) "highly" configurable, (2) "seamlessly" integrated software products that support (3) "multiple" languages, currencies and legal regimes with (4) "virtually unlimited" scalability. See id at 2-4 & n2.

This definition shifted somewhat in plaintiffs' proposed findings of fact and conclusions of law. Plaintiffs clarified the definition to include "licensing and maintenance" rather than "licensing and accompanying services," as alleged in the FAC's second element. See Pls Prop FF (Doc # 356) at PP 3.1.1 -- 3.1.2. **[**74]** Plaintiffs also added an element to the formal definition, claiming that high function software "provides robust functionality that allows organizations to go beyond the basics." Id at P 3.1.3.4.

Even though not stated as part of the formal definition of high function software, plaintiffs scatter throughout their proposed findings of fact other characteristics of ERP software in an apparent attempt further to narrow the relevant market.

First, plaintiffs point to the claimed strength of high function software in "core" applications. See, e g, id at P 3.6.2.1.

Second, plaintiffs emphasize that high function customers purchase high function software. Id (Doc # 356).

Third, plaintiffs emphasize the brand value of the software vendor. Factors that promote vendor brand value include previous experience in a particular industry, research and development spending and local sales forces. See, e g, id (Doc # 356) at PP 3.2.4.3 -- 3.2.4.5.

Fourth, plaintiffs note the incumbent advantage software vendors have in competing for further sales with a customer who has that vendor's product as part of its existing footprint. See, e g, id at P 7.3.2.1.18 (pointing to testimony that "Bearing Point **[**75]** has identified more than 1,200 companies that now have an Oracle Financials and PeopleSoft HR footprint").

Fifth, plaintiffs emphasize the alleged strength of Oracle and PeopleSoft in certain industry verticals, such as insurance. See, e g, id at PP 7.2.3.10 -- 7.2.3.13.

Sixth, plaintiffs describe high-function software as being "Able to Accommodate Rapid Growth, Acquisitions and Reorganizations." Id at P 2.2.5.

Seventh, plaintiffs define high function software as allowing users to consolidate data across multiple organizations while still allowing the user to drill down to the original data. Id at P 2.2.6.

In their post-trial brief too, plaintiffs adjusted their proposed product market definition. They eliminated the "robust functionality" factor and incorporated two of the factors scattered throughout their proposed findings of fact into the more formal definition of high function software. The newly incorporated factors are that high function software must accommodate rapid growth and complicated business structures.

[*1125] At closing argument, plaintiffs disclaimed reliance on high function software's claimed strength in "core" functionality in defining the relevant market and accused **[**76]** Oracle of creating confusion "by limiting the relevant market to basic core' functionality." Pl Post Brief (Doc # 366) at 10 n17.

Added together, plaintiffs propose a very restricted product market definition: HRM and FMS integrated suites sold to large complex enterprises ("high function FMS and HRM market"). See id (Doc # 366) at 8. Plaintiffs have defined the asserted relevant product market using a large number of factors. In sum, the competition between Oracle and PeopleSoft that plaintiffs claim will be impaired bears the following characteristics:

Product characteristics:

. Software licensing and maintenance;

. HRM and FMS (as separate markets);

Customer characteristics:
. High function needs;
. Oracle or PeopleSoft are major vendors in their software footprint;

Performance characteristics:
. Scalable;
. Highly configurable;
. Seamlessly integratable;
. Able to accommodate rapid growth, acquisitions and reorganizations;
. Able to reflect actual units of business; and
. Able to adapt to industry specific requirements.

Plaintiffs contend that this product market does not include mid-market vendors, **[**77]** best-of-breed solutions, incumbent solutions or outsourcing. Id (Doc # 366) at 14-19.

Plaintiffs' Evidence of a High Function HRM & FMS Market

In support of their proposed product market definition and theory of anticompetitive effects, plaintiffs presented at trial or through deposition ten customer witnesses, five industry witnesses, two systems integration witnesses, three expert witnesses, a few others who appear mostly to have been presented to fill a gap or two in the evidence or, because every trial seems to need some, for spice (e g, the Ellison and Phillips videotape deposition testimony) and a plethora of exhibits, some of these also for spice (e g, Ex P2290). The court will not attempt to recount or even summarize the entire evidentiary record. Given the quantity of evidence, that would be unduly time-consuming and is unnecessary. It suffices to note that the laboring oar of the plaintiffs' case was pulled by the customer witnesses (whom plaintiffs' counsel described as their strongest witnesses), by some of the systems integrator and industry witnesses and by the experts.

Customer Witnesses

Michael Gorriz, Vice President of Information Technology Business at **[**78]** DaimlerChrysler (Daimler), testified about his company's large and complex needs regarding HRM software. Tr at 1368 (Gorriz). Daimler has about 365,000 employees worldwide in about 100 manufacturing facilities. Tr at 1368:6-13 (Gorriz). Since 1996, Daimler has used SAP as its financial management software. Tr at 1370:4-10 (Gorriz). Daimler requires highly functional HRM to accommodate its large number of employees and to comply with the differing labor laws and union agreements in different countries. Tr at 1371:9-12 (Gorriz). For its HRM needs, Daimler currently uses PeopleSoft. Daimler chose PeopleSoft based upon its reputation and the fact that companies of comparable size to Daimler have had success with PeopleSoft HRM. Tr at 1375:13-21 (Gorriz). But when Daimler was first searching for an HRM vendor in 1996, Gorriz stated that "only SAP, PeopleSoft **[*1126]** or Oracle could serve [Daimler's] needs for the HR management." Tr at 1376:9-11 (Gorriz). Gorriz stated that Daimler considered no other vendors. Tr at 3716:18-19 (Gorriz). Daimler's legacy system was "too old" for the company seriously to consider upgrading. Tr at 1376:24 (Gorriz). Daimler did not consider outsourcing to be an option **[**79]** because Daimler's HRM requirements were, Gorriz testified, "too complex." Tr at 1377:24-25 (Gorriz). Further, if Oracle, SAP or PeopleSoft were to increase their price for HRM by 10 percent, Gorriz stated that Daimler "would not consider any offer" from any other vendors. Tr at 1381:16 (Gorriz).

Bob Bullock, Senior Vice President and Chief Information Officer of CH2M Hill, testified about the ERP needs of that civil and environmental engineering firm. CH2M Hill has 14,000 employees, 200 worldwide offices and over $ 2 billion in annual revenue. CH2M Hill has used Oracle FMS since 1993, but in 2002 the company decided to replace its legacy HRM software. Bullock stated that through consultation with the Gartner Group, CH2M Hill was given a list of HRM vendors. CH2M Hill did not seriously consider SAP, as it "was a very complex product" and had a "reputation for being a costly product." Tr at 207:19-20 (Bullock). In Bullock's opinion, there were only two candidates, Oracle and PeopleSoft. Id at 208:7-8 (Bullock). CH2M Hill never considered outsourcing, Lawson or remaining on its legacy system. Tr at 210:8, 211:12, 216:8-9 (Bullock). Oracle and PeopleSoft both offered initial bids between **[**80]** $ 1.5 and 41.6 million. Bullock stated that if this price had been 10 percent higher, CH2M Hill would not walked away from the deal with Oracle or PeopleSoft. Tr at 218-19 (Bullock).

Curtis Wolfe, CIO for the State of North Dakota, testified about the state's process of picking an ERP vendor. Tr at 1532 (Wolfe). North Dakota has approximately 10,000 full and part-time employees, 58 state agencies and a budget of $ 5 billion. Tr at 1533 (Wolfe). In 2002, the state decided to buy a full ERP program that included FMS and HRM. Tr at 1534:10-16 (Wolfe). North Dakota had a unique need in that it required that its ERP serve the state's higher education facilities as well. Id. North Dakota had six vendors submit proposals: Oracle, PeopleSoft, SAP, SCT, Jenzabar (a partner of Lawson) and Microsoft's Great Plains. Tr at 1543:21-22 (Wolfe). The state eliminated SAP, Great Plains and Jenzabar almost immediately. SAP was too expensive, while Jenzabar and Great Plains did not have the required functionality. Tr at 1545-46 (Wolfe). SCT did not make the final round; while SCT met the functionality for the higher education area, it could not do so with state agency needs. Tr at 1551:1-4 (Wolfe). Oracle **[**81]** and PeopleSoft were in head to head competition and Wolfe testified that he believes that this caused the state to get a $ 6 to $ 8 million lower final bid from each vendor. Tr at 1561:10-11 (Wolfe). If these final offers had been 10 percent higher, Wolfe stated that North Dakota would not have turned to Lawson, Microsoft, SCT, outsourcing or writing its own software. Tr at 1569-1570 (Wolfe).

Kenneth Johnsen, Chief of Technology for Pepsi Americas, testified as to his concerns about the Oracle/PeopleSoft merger. Pepsi Americas is the second largest bottler of Pepsi-brand soft drinks within the Pepsi system and the third largest bottler worldwide. Tr at 1723:25-1724:1 (Johnsen). Pepsi Americas has over 15,000 employees and annual revenues of about $ 3.2 billion. Tr at 1724:5-10 (Johnsen). Pepsi Americas uses PeopleSoft ERP in its North America operations and SAP ERP in its European operations. Tr at 1727:13-14 (Johnsen). Johnsen testified that he has "a concern" about the impact **[*1127]** of this merger on the long-term effectiveness of the PeopleSoft ERP. Tr at 1734:23 (Johnsen). Johnsen is concerned that a post-merger Oracle, while agreeing to maintain the PeopleSoft ERP, will not provide **[**82]** enhancements to the functionality of the software (i e, upgrades). Tr at 1737: 1-9 (Johnsen). To Johnsen this leaves Pepsi Americas with two options: constantly upgrade with point solutions (not his desired choice) or buy ERP from a new vendor. When asked what vendors he could turn to meet his ERP needs, Johnsen claims there are no options outside of Oracle, PeopleSoft and SAP. Tr at 1739:14 (Johnsen).

Scott Wesson, Senior Vice President and Chief Information Officer of AIMCO, discussed the company's choices for FMS and HRM software. Tr at 1126 (Wesson). AIMCO is the largest owner and operator of apartment buildings in the United States. Tr at 1127:7-8 (Wesson). The company owns approximately 2000 complexes in 47 states and the District of Columbia. AIMCO has over 6,500 employees and an annual revenue of about $ 1.5 billion. Tr at 1127:9-24 (Wesson). For its FMS, AIMCO uses PeopleSoft's financial suite. For its HR payroll systems, AIMCO currently uses Lawson. Tr at 1129:8,21 (Wesson). In 2002, AIMCO began to reevaluate its HRM options and it hired Towers Perrin consult in this process. Towers Perrin told AIMCO that only three vendors could meet AIMCO's HRM needs: PeopleSoft, Oracle **[**83]** and SAP. Tr at 1132:7-8 (Wolfe). (There was no objection to the question that elicited this response). Wesson stated that AIMCO decided not to upgrade to the latest version of Lawson because it would have cost AIMCO "about the same * * * as it would to go with a new system" and also, Lawson" [was] lacking some key features" that AIMCO was looking for. Tr at 1133:5-11 (Wolfe). AIMCO was deciding between Oracle and PeopleSoft when Oracle first made its tender offer to PeopleSoft. Tr at 1143: 9-10 (Wolfe). Wesson stated that because of this proposed merger, he believes PeopleSoft gave him a "very good deal" on the HRM. Tr at 1144:17 (Wolfe). Wesson testified that Oracle agreed to match any price offered by PeopleSoft. Tr at 1145:5 (Wolfe). Wesson said AIMCO ultimately chose PeopleSoft because PeopleSoft had guaranteed to pay AIMCO three times the contract price should there be a "change of ownership" at PeopleSoft. Tr at 1146:14, 1147:6-16 (Wolfe). AIMCO is expecting to implement the PeopleSoft system in late 2004 or early 2005. Tr at 1148:10 (Wolfe). Moreover, Wesson stated, AIMCO does not consider outsourcing to be a viable option because it is not quick to respond to "last minute **[**84]** changes," such as new benefits programs. Tr at 1150:10 (Wolfe). Best of breed solutions are too expensive for AIMCO to consider. Tr at 1150:22-24 (Wolfe).

Richard Cichanowicz, Vice President of Systems Integration of Nextel, testified about the wireless services company's ERP needs. Nextel has 13 million subscribers, over $ 8 billion in annual revenue 17,000 [transcript incorrect] employees. See Tr at 1052:25-1053:3 (Cichanowicz). Before 2002, Nextel had been using PeopleSoft HRM, Oracle FMS and Ariba SCM. Tr at 1058:9-11 (Cichanowicz). In 2002, however, Nextel determined that using one integrated solution would provide more operational efficiency. Tr at 1061:7-9 (Cichanowicz). Nextel received advice from six consulting firms, which informed Nextel that Oracle, SAP and PeopleSoft could meet those software needs. Tr at 1066:13-19 (Cichanowicz). Nextel then sent RFPs to Oracle and Peoplesoft. Tr at 1067:25-1068:3 (Cichanowicz). Nextel did not seriously consider SAP because it was already using Oracle for FMS and PeopleSoft for HRM and believed that conversion costs and risks for those two **[*1128]** vendors would be lower. Tr at 1068:4-17 (Cichanowicz). Nextel ultimately chose Peoplesoft, based **[**85]** on its scoring of vendor criteria such as functionality, ease of integration, scalability, audits, costs and relationship confidence. See Tr at 1071:20-1072-22 (Cichanowicz). Even after it had chosen PeopleSoft, however, Nextel continued to negotiate with Oracle for leverage purposes until the signing of the December 2002 contract with PeopleSoft. Tr at 1073:11-20 (Cichanowicz). Cichanowicz stated that if the price of the Oracle or PeopleSoft licenses had been 10 percent higher, Nextel would not have considered a best of breed approach, writing or building its own ERP software, outsourcing, staying with its previous system or using SAP or any other United States vendor. Tr at 1077:16-1080:25 (Cichanowicz).

Mary Elizabeth Glover, Vice President of Information Technology at Greyhound Lines, testified about her company's foray into the market for HRM software. Greyhound is in the bus transportation business in both the United States and Canada. The company employees some 16,000 people and has annual revenues of around $ 1.2 billion. Tr at 1459-1460 (Glover). For its FMS, Greyhound uses Oracle in the United States and J D Edwards in Canada. Tr at 1464:11-21 (Glover). For its HRM, Greyhound **[**86]** uses a product called HR1 in the United States and HR2000 in Canada. The company outsources its payroll to ADP. Tr at 1465:11 (Glover). Glover stated that the HR incumbent systems are "very old" and no longer meet the needs of the company. Tr at 1466:21-25 (Glover). Further, she testified that outsourcing is too expensive for Greyhound. Tr at 1467:12-15 (Glover). For these reasons, in 2001, Greyhound began a potential procurement process for new HRM software. Tr at 1468:17-18 (Glover). The company hired CDG & Associates to match Greyhound with potential vendors who met their HRM needs. The firm narrowed the selection down to only four vendors: Oracle, PeopleSoft, Lawson and Ultimate Software. Tr at 1470:11 (Glover). Greyhound never considered SAP because the consulting firm believed they were too costly. Tr at 1470:16 (Glover). Ultimate Software was eliminated soon thereafter because of lack of functionality. Tr at 1470:24-25 (Glover). Greyhound eliminated PeopleSoft as being too costly. Between Oracle and Lawson, Greyhound found that Oracle had more functionality; therefore, Lawson was eliminated. But before Greyhound made a final choice, Glover stated that the company decided to **[**87]** give PeopleSoft a second look. Upon reexamination, Greyhound determined that both Oracle and PeopleSoft could meet the company's needs, with the company preferring PeopleSoft over Oracle. Tr at 1483:6-9 (Glover). Unfortunately, the events of September 11, 2001, a new CEO and a decrease in profits caused Greyhound to lose the funds necessary to purchase the software. Tr at 1490:6-11 (Glover). But Glover stated that should Greyhound ever decide to purchase HRM software, this proposed merger would make the purchase more costly, as Greyhound's only choices were Oracle and PeopleSoft. Tr at 1495:13-21. Without the competition between the two, Glover foresees prices increasing. Tr at 1495:13-21 (Glover).

Phillip Maxwell, Senior Vice President and Chief Information Officer of the Neiman Marcus Group (NMG), testified about the ERP needs of the specialty retailer. NMG has properties located throughout the country, approximately 15,000 employees and $ 3 billion in annual sales. Tr at 652:3-13 (Maxwell). NMG formerly had used FMS software that was originally from MSA, a vendor purchased by Dun & Bradstreet and then GEAC subsequent to NMG's installation of the software. Tr at **[*1129]** 655:15-22 (Maxwell). **[**88]** In 2002, NMG decided to replace its FMS software and began conferring with individuals in its business and technology units, three consulting firms and the Gartner Group. See Tr at 662:1-663:11 (Maxwell). After examining vendors' functionality, experience in retail, price and size/stability, NMG narrowed its choices to Oracle and PeopleSoft. Tr at 665:6-20 (Maxwell). NMG did not consider SAP because of SAP's lack of strong presence in the retail vertical and Maxwell's opinion that SAP is "very expensive to implement." Tr at 669:11-16 (Maxwell). Had the cost of Oracle or PeopleSoft FMS software been 10 to 20 percent higher, NMG would not have considered SAP, any other FMS vendor, legacy software or internally developed software. Tr at 669:17-670:15 (Maxwell). Based on price, a high level comparison and detailed GAP analysis, NMG eventually selected Oracle to provide it with FMS software. See Tr at 671:8-673:2 (Maxwell).

NMG also began licensing HRM software from Oracle in 2003, though it has not yet begun to implement that software. See Tr at 674:9-11, 676:14-18 (Maxwell). NMG went through a similar process in evaluating HRM software as it did in evaluating FMS software. Tr at 684: **[**89]** 25-685:20 (Maxwell). As with the FMS software, NMG concluded that Oracle and PeopleSoft were its only viable alternatives. See Tr at 686:13-16 (Maxwell). NMG did not believe that SAP suited its needs as a retailer. See Tr at 686:11-18 (Maxwell). Had the cost of the Oracle or PeopleSoft HRM software been 10 to 20 percent higher, NMG would not have considered other HRM vendors, legacy software, internally developed software or outsourcing. Tr at 686:19-687:13 (Maxwell). NMG eventually selected the Oracle HRM software, but based on a 70 to 80 percent higher target price than previously predicted, NMG has delayed implementation of the Oracle HRM software to look for cost-reducing options. Tr at 676:19-677:13 (Maxwell). But Maxwell testified that, even with the 80 percent price increase, NMG has not abandoned the Oracle HRM. Tr at 677:20-25 (Maxwell).

Laurette Bradley, Senior Vice President of Information Technology at Verizon, testified about Verizon's current procurement of new HRM software. Tr at 577 (Bradley). Verizon is a telecommunications company with a "majority holding in four of five different countries." Tr at 580:22-25 (Bradley). Verizon has minor investments in over 30 countries **[**90]** worldwide with an annual revenue of approximately $ 66 billion. Id. Bradley testified that 49 percent of Verizon's labor is unionized worldwide, which places "significant demands upon [the] ERP systems, particularly [the] HR and payroll systems" because each union contract, from each jurisdiction, must be reflected and managed regarding payroll, vacation, absences, and personal days. Tr at 583:6-15 (Bradley). Prior to October 2003, Verizon had used two different HRM programs, one from PeopleSoft and one from SAP. Tr at 583:23 (Bradley). The PeopleSoft HRM was used to manage the former BellAtlantic part of the company and SAP HRM was used to manage the former GTE part of the company. Tr at 584:1-4 (Bradley). The same is true of Verizon's FMS. But in October 2003, Verizon decided to consolidate the two systems as far as HRM software. Tr at 584:11-12 (Bradley). Verizon chose PeopleSoft HRM for the entire company and as of the date of the trial, the new software was being implemented. Id. Bradley testified that a merger between Oracle and PeopleSoft makes her very concerned that Oracle will not be interested in upgrading or further "developing" current PeopleSoft software. Tr at 592: **[**91]** 5, 593:3-10 (Bradley). Bradley does not want to lose the constant "care, feeding, repair, and evolution" that PeopleSoft now offers to its customers. **[*1130]** Tr at 592:17-18 (Bradley). When asked what other vendors Verizon could turn to in obtaining FMS and HRM that meet Verizon's complex and international needs, Bradley listed only Oracle, PeopleSoft and SAP. Tr at 598:7-8 (Bradley). But Bradley did testify that Verizon is "constantly" considering outsourcing its entire HR management, but so far has determined that the risks are just too high. Tr at 604:20-21 (Bradley).

Bradley admitted that Verizon already outsources its 401(k) stock plans and medical and dental benefits. Tr at 604:12-14 (Bradley). Finally, Bradley stated that if Oracle, PeopleSoft or SAP increased prices by 10 percent, Verizon would not turn to any other vendors for their FMS and HRM. Tr at 606:23-25, 607:1-3 (Bradley). Further, Verizon would not use its off-shore information technology staff to develop an in-house FMS or HRM system in response to a 10 percent increase. Tr at 607:12-15 (Bradley).

Finally, Scott Hatfield, Chief Information Officer of Cox Communications discussed his company's ERP software needs. Tr at 87: **[**92]** 8-11 (Hatfield). Cox is the third largest cable television operator in the United States, delivering video service to about six and half million households. Tr at 89:11-14 (Hatfield). Cox has a presence in 30 states and about 21,000 employees. Cox has annual revenues of over $ 6 billion. Tr at 89:22-25 (Hatfield). Hatfield testified that Cox uses PeopleSoft HRM to handle payroll, recruitment, benefits programs and training. Tr at 94:14-19 (Hatfield). In 1995, during the HRM vendor procurement process, Cox only considered Oracle and SAP as other potential vendors of HRM. Tr at 96:12 (Hatfield). Hatfield testified that while Cox had considered outsourcing its HRM altogether, it had decided against doing so because the company needed to have a "tight integration" between its HRM and CMS, which could not be outsourced. Tr at 97:17-19 (Hatfield).

Regarding FMS, in 2003, Cox decided to change from J D Edwards to a new vendor. Cox hired Accenture to consult in this process. Tr at 114:22-25 (Hatfield). Accenture gave Cox a list of three vendors of FMS that could meet Cox's needs: Oracle, PeopleSoft and SAP. Tr at 115:9-10 (Hatfield). Hatfield stated that no other firms were "brought to his **[**93]** attention." Tr at 121:18 (Hatfield). Cox eliminated SAP because no one in the company had any real experience with SAP and Hatfield did not want to "be starting from scratch." Tr at 118:3 (Hatfield). Hatfield stated that Cox wanted Oracle and PeopleSoft to know they were the final two competing for Cox's FMS business and that Cox asked the two vendors to give their best prices. Tr at 126:1-3 (Hatfield). Cox ultimately chose Oracle as its FMS vendor based upon highest level of functionality ratings. Tr at 129:1-5 (Hatfield). Finally, Hatfield stated that if Oracle or PeopleSoft's prices had been 10 percent higher, Cox would not have turned to Lawson, Great Plains, best of breed solutions, outsourcing or writing its own FMS software. Tr at 136:14-138:23.

In the main, and contrary to the characterization of plaintiffs' counsel before trial, the court found the testimony of the customer witnesses largely unhelpful to plaintiffs' effort to define a narrow market of high function FMS and HRM. Each of these witnesses had an impressive background in the field of information technology. They appeared knowledgeable and well informed about their employers' ERP needs and resources. And the court **[**94]** does not doubt the sincerity of these witnesses' beliefs in the testimony that they gave. What the court questions is the grounds upon which these witnesses offered their opinions on the definition of the product **[*1131]** market and competition within that market.

The test of market definition turns on reasonable substitutability. *Du Pont, 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994*. This requires the court to determine whether or not products have "reasonable interchangeability" based upon "price, use and qualities * * *." *Id. at 404*. What, instead, these witnesses testified to was, largely, their preferences.

Customer preferences towards one product over another do not negate interchangeability. See *R.R. Donnelley & Sons Co., 120 F.T.C. 36, 54 n65 (1995)* (citing Robert Pitofsky, New Definitions of the Relevant Market and the Assault on Antitrust, *90 Colum L Rev 1805, 1816 (1990)* ("There will almost always be classes of customers with strong preferences * * * but to reason from the existence of such classes to a conclusion that each is entitled to * * * a separate narrow market definition grossly overstates the market power of the sellers.")). The **[**95]** preferences of these customer witnesses for the functional features of PeopleSoft or Oracle products was evident. But the issue is not what solutions the customers would like or prefer for their data processing needs; the issue is what they could do in the event of an anticompetitive price increase by a post-merger Oracle. Although these witnesses speculated on that subject, their speculation was not backed up by serious analysis that they had themselves performed or evidence they presented. There was little, if any, testimony by these witnesses about what they would or could do or not do to avoid a price increase from a post-merger Oracle. To be sure, each testified, with a kind of rote, that they would have no choice but to accept a ten percent price increase by a merged Oracle/PeopleSoft. But none gave testimony about the cost of alternatives to the hypothetical price increase a post-merger Oracle would charge: e g, how much outsourcing would actually cost, or how much it would cost to adapt other vendors' products to the same functionality that the Oracle and PeopleSoft products afford.

If backed by credible and convincing testimony of this kind or testimony presented **[**96]** by economic experts, customer testimony of the kind plaintiffs offered can put a human perspective or face on the injury to competition that plaintiffs allege. But unsubstantiated customer apprehensions do not substitute for hard evidence.

While listening to the testimony of these customer witnesses, it became clear to the court that these witnesses represent a group of extremely sophisticated buyers and users of information technology; they have decades of experience in negotiating in this field. This made more evident the failure of these witnesses to present cost/benefit analyses of the type that surely they employ and would employ in assessing an ERP purchase. The evidence at trial established that ERP customers have choices outside the integrated suites of Oracle, PeopleSoft and SAP. Indeed, Glover's testimony showed that -- as Oracle contends -- customers have some leverage by virtue of their existing installed base "to do nothing" and thereby resist anticompetitive price increases by ERP vendors. Although the court is not convinced that this is a long-term option due to the ever changing business and legal environment in which enterprises operate, this option does afford ERP **[**97]** customers some limited protection and leverage. At any rate, plaintiffs' customer witnesses did not, in their testimony, provide the court with data from actual or probable ERP purchases and installations to demonstrate that the witnesses' employers would have had no choice but to submit to a SSNIP imposed by a post-merger Oracle.

[*1132] The court, therefore, finds that these witnesses did not establish by a preponderance of the evidence that the products offered by Oracle, PeopleSoft and SAP are in a distinct line of commerce or product market from those offered by other ERP vendors. The court finds that these witnesses did not establish that it was more likely than not that customers of a post-merger Oracle would have no choice but to submit to a small but significant non-transitory price increase by the merged entity. These findings do not rest alone on the court's skepticism about the testimony of plaintiffs' customer witnesses.

Oracle, too, presented customer witnesses, although a much smaller number of such witnesses. Brian Mearns, Director of Personnel Service Delivery for Bank Of America (BA), testified about BA and Fleet Boston's (Fleet) needs and decisions regarding HRM and FMS **[**98]** software. Tr at 3276:2-21 (Mearns). In April 2004, BA acquired Fleet. Tr at 3276:10 (Mearns). Mearns had held the title of Director of HR Service Delivery at Fleet prior to the acquisition. Mearns stated that Fleet had personnel of over 50,000 worldwide, with investment and mortgage offices in 32 states and throughout South America, Europe and Asia. Tr at 3280:14-3281:11 (Mearns). Mearns testified that Fleet had used PeopleSoft HRM software since 1996. Tr at 3286:18-20 (Mearns). In 2002, Fleet sought to upgrade its PeopleSoft HRM software to encompass increased functionality. But the $ 12 million price tag was too much for Fleet's appropriation committee and Mearns was told that upgrading PeopleSoft was not an option. Tr at 3289-3290:11. Based upon this turn of events, Mearns stated that Fleet instead turned to outsourcing to meet its HRM needs. Tr at 3290:24-25 (Mearns). The search to find an outsourcing firm that could meet all of Fleet's needs led to five candidates: Mellon, Hewitt, Exult, Accenture and Fidelity. Tr at 3293:1-2 (Mearns). Fidelity "best met [the] business objectives and selection criteria" that Fleet required. Tr at 3295:11-12 (Mearns). After implementation of **[**99]** the new outsourcing solution, Mearns stated that Fidelity's systems were "very configurable to meet [Fleet's] requirements." Tr at 3297:12-14 (Mearns). After BA acquired Fleet, Mearns gave a presentation to BA executives about Fleet's experience with outsourcing and the capability of Fidelity. Tr at 3300:14-17 (Mearns). Based upon this presentation, BA decided to outsource all of its HRM functions to Fidelity. Tr at 3300:20-22 (Mearns).

Charles Peters, Senior Executive Vice President for Emerson Electric Company (Emerson), was also called by Oracle to testify about other viable substitutes to high function ERP. Emerson is a global manufacturing company operating in six industries including climate technologies (air conditioning and heating components), motor and appliance components and components for large industrial equipment. Tr at 1190-1191:15 (Peters). Emerson's annual revenue exceeds $ 15 billion and its workforce includes about 110,000 employees in over 50 countries. Tr at 1191:18-25 (Peters). Within these six industries, Emerson has over 40 divisions. Tr at 1193:11 (Peters). Some of these divisions, standing alone, have global operations and revenues in the billions of dollars. **[**100]** Tr at 1193:19-20 (Peters). Many of these divisions operate their own HRM and FMS software. Tr at 1198:7-8 (Peters).

One aspect of Peters' job is to provide "options" to each division regarding their choices for handling FMS and HRM needs. Tr at 1197:6-18 (Peters). Peters stated these "options" include ERP vendors, outsourcing, best of breed solutions, in-house solutions and extending incumbent systems. Tr at 1198:7-19 (Peters). Peters testified that one of his divisions **[*1133]** will not implement Oracle ERP because their in-house software fully meets its needs. Tr at 1211:1-18 (Peters). Further, Peters discussed the increasing role that outsourcing to Asia or the Philippines plays in the HR area of many divisions. Tr at 1214:7-16 (Peters). Finally, Peters stated that he did not believe that Emerson divisions would have to pay more for Oracle ERP if the proposed merger is consummated. Tr at 1235:11-14 (Peters).

In so testifying, Peters cited to a recent negotiation he conducted with Oracle concerning ERP for one division. During the negotiations, Peters stated, PeopleSoft was never a contender. Tr at 1235:16 (Peters). The possibility of using PeopleSoft was not leverage that Peters could **[**101]** use to advantage in seeking to obtain a lower price from Oracle. Emerson still received a competitive price from Oracle. Tr at 1235:18-24 (Peters). Accordingly, Peters stated that he does not believe that the presence or absence of PeopleSoft is a factor that constrains Oracle pricing. Id.

To be sure, the testimony of the Oracle witnesses, like that of the plaintiffs' customer witnesses, entailed some speculation about the presence or absence of PeopleSoft in the market. But the Oracle witnesses testified about concrete and specific actions that they had taken and been able to complete in order to meet their firms' information processing needs, apart from relying on the three ERP vendors that plaintiffs contend are a market unto themselves. Hence, the court finds on this basis, as well as an assessment of the witnesses' credibility, that the testimony of the Oracle customer witnesses was more believable than that of the plaintiffs' witnesses, despite the greater number of the latter.

Plaintiffs' Expert: Iansiti

In addition to the customer witnesses, plaintiffs presented the expert opinion testimony of Marco Iansiti, a professor of business administration at the Harvard Business **[**102]** School. Iansiti's expertise lies in operations management and information technology. Iansiti also has experience as a consultant for companies in the "software space." Tr at 2020:24 (Iansiti). Iansiti thus brought an academic perspective that basically echoed the testimony of the customer witnesses. The court is satisfied that Iansiti is well qualified to opine on features of ERP products.

Iansiti was asked to identify the vendors whose ERP products would meet the needs of a "large and complex enterprise." Tr at 2024:4 (Iansiti). Iansiti examined the product documents and analysts reports of 148 ERP vendors. Tr at 2025:10 (Iansiti). Iansiti testified that only the products of Oracle, PeopleSoft and SAP possess the functionality adequate to meet the needs of such an enterprise. With regard to Lawson, Iansiti testified that its HRM product can handle only three levels of an organization and its FMS product five levels and thus is wholly inadequate for a large and complex enterprise. Tr at 2047:3-5 (Iansiti). By contrast the PeopleSoft and Oracle products can capture "unlimited levels of organization." Tr at 2047:17 (Iansiti).

Iansiti testified that Microsoft Business Solutions (MBS) **[**103]** provides four ERP products: Navison, Axapta, Great Plains and Solomon. Tr at 2054:7-8 (Iansiti). But MBS sells exclusively through resellers and thus lacks the kind of direct relationship necessary to furnish the level and specific services required by large and complex enterprises. Tr at 2054:17-2055:11 (Iansiti). Microsoft will not, in Iansiti's view, have a single product to "rationalize" its present four ERP products until 2009. Tr at 2058:25-2061:10 (Iansiti). Iansiti expressed doubts that Microsoft will be able to develop products competitive with those of PeopleSoft, Oracle **[*1134]** and SAP because Microsoft's business model is radically different from that of these three companies. Tr at 2061:11-2063:15 (Iansiti). Iansiti also saw no developments in internet technology or the integration layer that would likely replace the functionalities of the ERP offerings of PeopleSoft, Oracle and SAP. Tr at 2077:12-2080:11 (Iansiti).

The court finds that Iansiti's testimony fails to establish a product market. Iansiti did not claim to have performed an economic study of the ERP industry. Tr at 2082:5-20 (Iansiti). He conceded that there is not a "clear line or demarcation" to distinguish enterprises **[**104]** that have high functional needs from "lower function or mid-market needs." Tr at 2088:7-2090:21 (Iansiti). Furthermore, Iansiti conceded that a number of companies that would appear to meet the criteria of large and complex enterprises have satisfied their ERP requirements with the products of vendors other than PeopleSoft, Oracle and SAP and have satisfied their needs from outsourcing or from their legacy systems. See Tr at 2091:5-2095:3, 2100:1-2113:15 (Iansiti). Because of his lack of economic analysis and his inability to identify articulable product market boundaries (a key issue in a horizontal merger case), the court finds that Iansiti failed to establish a clearly defined product market along the lines alleged by plaintiffs.

Systems Integrators

Plaintiffs presented the testimony of two systems integrator witnesses in an effort to prove the existence of a separate high function ERP market. One of these witnesses, Perry Keating of BearingPoint, however, rebutted as much as supported plaintiffs' positions regarding market participants and likelihood of entry into the market.

Keating is the Senior Vice President of BearingPoint, one of the largest consulting companies in **[**105]** the world. Tr at 857:12-15 (Keating). BearingPoint is involved in "management consulting" which includes the "implementation of financial [and] human resource * * * solutions." Tr at 858:4-7 (Keating). At the outset of his testimony, Keating made clear that BearingPoint has taken no position either for or against the proposed merger. Tr at 858:11-18 (Keating). Keating stated that BearingPoint "wishes both [Oracle and PeopleSoft] well." Id.

Keating started off by supporting plaintiffs' product market definition, stating that BearingPoint's "large clients, whether it be commercial or public service * * * predominant [ly] * * * choose Oracle, PeopleSoft and SAP" software. Tr at 867:10-14 (Keating). Keating called these large customers "Tier 1" customers, describing their needs with regard to multiple currencies, languages and legal systems. Keating stated that "Oracle, PeopleSoft and SAP are the three clear, you know, players in the marketplace." Tr at 870:9-10 (Keating).

Further, Keating testified that no other vendor could deliver the degree of functionality that these three vendors deliver. Tr at 871:17-20 (Keating). In support of these contentions, plaintiffs introduced **[**106]** *a* questionnaire that BearingPoint had completed for the European Commission's investigation of the merger at bar. Ex P203 at 1. Keating was personally involved in preparing the responses to this questionnaire. In one question, the EC asked BearingPoint: "[Is] there a specific market for supplying EAS * * * to large companies, * * * in which only a few vendors are active?" Id at 11. BearingPoint responded: "Yes, there is such a market. The vendors are SAP, Oracle and PeopleSoft * * *." Moreover, BearingPoint's responses also stated that it believed innovation would be slowed in this market as a **[*1135]** result of the proposed merger between Oracle and PeopleSoft. Id at 16.

Once the topic turned to the likelihood of entry into this marketplace by vendors other than SAP, Oracle or PeopleSoft, Keating's testimony began to undermine BearingPoint's response to the EC. Plaintiffs directed the court's attention to a portion of the EC questionnaire pertaining to ease of entry. When BearingPoint was asked to "indicate at least three companies that are potentially able to enter this [EAS for large companies] market," BearingPoint had listed Microsoft, Siebel and IBM. Id at 14. Moreover, the response **[**107]** stated that the only barrier to entry by these three vendors is "self choice." Id. But when asked at trial by plaintiffs if Keating was surprised by Microsoft's approach to acquire SAP, Keating responded: "No, * * * Microsoft's not a company that plays for second." Tr at 926:22-24 (Keating).

On cross-examination, Oracle delved deeper. When asked if "there was any question in [his] mind that Microsoft has the ability to develop a scalable product," Keating replied "no." Tr at 940:13-15 (Keating). The following testimony presents a good summary of Keating's contribution regarding the potential entry of Microsoft into the high function market:

> Question (by Oracle Counsel): They're [Microsoft] coming aren't they, to the large market space?
> Answer (Keating): Monday they were almost there [referring to the SAP acquisition revelation].
> Question: Indeed they were.
> Answer: I had a conference call with my SAP practice [saying], "you guys might want to get new letterheads." I don't mean to be flip, but it was pretty clear they're coming.

Tr at 942:14-19 (Keating).

Furthermore, Keating's testimony makes it appear that BearingPoint is rolling out the red **[**108]** carpet for Microsoft's arrival. At trial, an "alliance" between Microsoft and BearingPoint came to light under which BearingPoint has agreed to become Microsoft's "go to partner" in the high function ERP software market for customers that have less than $ 2 billion in annual revenues. Ex D5051 at 2.

In the main, the court found Keating's testimony to be credible. Most particularly, Keating's testimony of the alliance between his company and Microsoft substantiates Oracle's contention that Microsoft is a competitor for much ERP business and able to extend its reach into an arena in which plaintiffs contend that only Oracle, PeopleSoft and SAP now compete. Keating's testimony gives evidence that Microsoft's entry into competition may be achieved by a business model different from that followed by Oracle, PeopleSoft or SAP. Microsoft's ERP products through this collaboration with BearingPoint can be customized, configured and adapted to be competitive with the offerings of the three companies that plaintiffs contend make up the market, at least up to a level that is well within the large, complex level of customer demand that plaintiffs contend requires high function ERP.

Nancy Ellen **[**109]** Thomas, the Global and Americas Financial Management Solutions Leader for IBM, also called by plaintiffs, testified about IBM's role as a consultant to "large, global complex clients" procuring FMS software. Unlike BearingPoint, IBM has publicly stated its opposition to the hostile takeover of PeopleSoft by Oracle. Ex D5240R at 13 (stating that a "successful Oracle bid" would be a "negative for IBM * * * [with] possible impact on strong PeopleSoft [and IBM] alliance revenue" and also considering taking a "proactive stance against the [Oracle/PeopleSoft] deal"). Thomas began by echoing many of the same views that Keating expressed **[*1136]** in regard to the ERP needs of large complex customers, including multiple geographies, currencies, languages and regulatory requirements. Tr at 474:9-12 (Thomas). When asked, based upon her experience, which ERP vendors could offer a product that could satisfy the requirements of these customers across multiple countries, Thomas listed only Oracle, PeopleSoft and SAP. Tr at 475:2 (Thomas). When asked what vendors could support reporting requirements for multiple ranges of legal entities, Thomas listed only Oracle, PeopleSoft and SAP. Tr at 476:3 (Thomas). **[**110]** The same three vendors were listed when Thomas was asked about supporting multiple lines of business. Tr at 476:15 (Thomas). Thomas downplayed the role that Lawson plays within this "up market" sector, stating that "the clients * * * we work with are typically not" focusing on Lawson to the extent that they are focusing on Oracle, PeopleSoft and SAP. Tr at 495:10-15 (Thomas).

Plaintiffs also appeared to use Thomas to bolster their contention on "localization" between Oracle and PeopleSoft by asking Thomas about the banking industry and which firms compete for that business. When asked which vendors she would expect to see in the final scoring and recommendation phase of a banking customer's selection process, Thomas stated: "primarily Oracle and PeopleSoft." Tr at 498:21-25 (Thomas).

When Oracle's counsel questioned Thomas about the possible bias of IBM, Tr at 499-503 (Thomas), Thomas admitted that IBM has the "largest PeopleSoft practice of any consulting firm in the world" and that PeopleSoft has "publicly described IBM as PeopleSoft's strongest partner." Tr at 499 (Thomas). Further, IBM has over 150 employees dedicated to consulting and implementing PeopleSoft products, all of **[**111]** whom could lose their jobs if PeopleSoft was merged with Oracle, a company for which IBM has only 75 dedicated consultants. Tr at 500:20-502:10 (Thomas).

Turning to Lawson, when asked about IBM's large and complex implementation of Lawson HRM for the State of Arizona, which has over 60,000 employees, Thomas stated that she didn't have the "Lawson expertise" to talk about that transaction. Tr at 519:12-13. Further, Thomas "was not aware" of IBM's implementation of Lawson software at Montgomery County Schools in Maryland, an entity with over 140,000 students. Nor was she "aware" of IBM's implementation of Lawson for the State of Michigan or IBM's implementation of Lawson for a large school district in Tampa. Tr at 520:7-19 (Thomas).

The court first notes a possible IBM bias due to IBM's potential loss of PeopleSoft implementation business, a significant source of IBM revenue. Furthermore, the court cannot overlook Thomas' lack of knowledge about <u>any</u> potential high function implementation of Lawson software. This makes the court reluctant to afford much, if any, weight to her testimony. Thomas seemed not to be able to identify factors that would keep Lawson from competing in the **[**112]** high function sector. Her testimony failed to substantiate plaintiffs' claim of separate FMS and HRM high function markets.

Industry Witnesses: PeopleSoft and Microsoft

Next, plaintiffs presented the testimony of several industry witnesses in an effort to support the proposed high function ERP market.

Richard Bergquist, Chief Technology Officer, Senior Vice President and PeopleSoft "Fellow," explained to the court how PeopleSoft defines a high function customer versus a mid-market customer. Tr at 255:18-19, 275-276:21 (Bergquist). Not surprisingly, Bergquist's definition of high **[*1137]** function customers and high function software echoed plaintiffs' definitions (or, at least, some of them). First, Bergquist stated that a customer cannot be labeled as high function simply based upon its size or revenue. Rather, one "ha [s] to look all the different dimensions" in order properly to distinguish between these two types of customers. Tr at 276:3 (Bergquist). The "different dimensions" that Bergquist referred to in guiding an explorer through the task of deciding what label to apply to a customer are: functionality, flexibility, scalability, reliability and technology. Tr at 280-282, 283: **[**113]** 18, 289:4-25 (Bergquist). Only after knowing the customer's needs regarding all of these dimensions, which one must learn "through a series of conversations with the customer," can one then place a customer in the correct talismanic column of high function or mid-market. Tr at 276:11-13 (Bergquist).

A high function customer requires software that is highly functional, highly flexible, contains large scalability and is reliable 24 hours per day, seven days a week. Tr at 283-289 (Bergguist). Customers who do not need software with such deep functionality, large scalability or high flexibility are mid-market customers who buy mid-market software. Tr at 300:10-13 (Bergguist). Bergguist succinctly stated that "customers that don't have the needs of large and complex enterprises, we [PeopleSoft] group into the mid-market." Tr at 275:1-2 (Bergguist). Bergguist clearly stated that a market exists for the sale of high function software to high function customers, and in this market PeopleSoft competes with only SAP and Oracle. Tr at 279:17 (Bergguist). Berguist went on to explain that a customer can be high function regardless of its international locations or international currency needs. **[**114]** Tr at 292:20 (Bergguist). "Internationally" was not a dimension for delineating high function from mid-market, rather international needs simply create the need for more function and scalability. Nonetheless, multiple currency, language and nationality capabilities are not requirements for a high function customer, as a customer can be located in the United States only and use only English and still be a high function customer according to Bergguist. Tr at 292:1-15 (Bergguist).

Questions soon turned to Lawson and its role in this high function software market. Berguist stated that PeopleSoft "does not believe" that Lawson sells any HRM or FMS software that has similar functionality to the same software sold by PeopleSoft. Tr at 299:21-25 (Bergguist). Rather, Lawson has FMS and HRM that is "adequate for the basics of what an organization would need." Tr at 300:4-5 (Bergguist). If the organization has simple and repetitive tasks, then "the Lawson product does that very well." Tr at 300:9-10, 304:1-4 (Bergquist). But if a customer starts going beyond those basic tasks, then the customer needs features and functions that Lawson cannot supply. Tr at 300:10-13 (Bergquist). Moreover, Lawson **[**115]** does not have to ability to support Unicode, a common character set for all languages of the world. Since Lawson cannot do that, it is "limited to the US, Canada and UK." Tr at 301:19-25 (Bergquist).

The next topic was AMS and its role in the high function market. Bergquist stated that AMS only has a "financial product that is meant for sale in the public sector." Tr at 309:14-15 (Bergquist). Further, the software was developed only for a minimum level of functionality and requires extensive customization before it can be implemented. Tr at 309:12-17 (Bergquist). Further, AMS does not have an HRM product. Because AMS does not rise to the level of functionality required to be considered high function, AMS is not a high function vendor selling a product that **[*1138]** competes in the proposed market. Tr at 310:4-7 (Bergquist).

Next, Bergquist took aim at the best of breed solutions, stating that a customer "can't assemble point solutions to get the full picture." Tr at 311:12-14 (Bergquist). These point solutions do not provide core functionality, requiring a customer to purchase core functionality from a different vendor, and then having "multiple solutions from point solutions," creating extensive **[**116]** integration costs. Tr at 311:12-25 (Bergquist). Accordingly, best of breed solutions are not a viable option for high function customers and therefore are not substitutes for high function software.

Next, Bergquist set out to prove that outsourcing is also not a viable option for high function customers stating that "we see it [outsourcing] as less capable software than that provided by PeopleSoft, SAP and Oracle." Tr at 314:11-12 (Bergquist).

Finally, Bergquist was questioned about potential localized competition between Oracle and PeopleSoft, thus establishing the likelihood of unilateral anticompetitive effects. Bergquist testified that there are some instances where Oracle is PeopleSoft's closest competitor over SAP. Tr at 319:6-8 (Bergquist). This type of situation arises in the service industries according to Bergquist because Oracle and PeopleSoft both "grew up in the same neighborhood," the services industry neighborhood, thus making Oracle and PeopleSoft strong competitors in this vertical, especially among those who have a "buy-American tendency." Tr at 319:11-16 (Bergquist). Moreover, Bergquist testified that SAP has suffered from the "stereotype of German engineering" **[**117]** that leads many to view SAP software as less flexible and requiring more customization. Tr at 320:11-15 (Bergquist). But Oracle and PeopleSoft are both seen as very flexible, again making them more likely competitors over SAP. Tr at 320:16-18 (Bergquist).

On cross, Bergquist was first asked about the distinction between mid-market and high function customers and software. When asked if there were any PeopleSoft documents which describe this distinction between high function and mid-market customers or software, Bergquist said that he was not aware of any such documents. Tr at 347:22-25 (Bergguist). Further, Bergguist admitted that there are no "clear-cut answers" or "firm dividing lines" that distinguish a mid-market customer from a high function customer. Tr at 353:15-22 (Bergguist).

Next Bergguist was asked about his dismissal of Lawson from the high function market. When asked if PeopleSoft had lost any business from large and complex customers to Lawson, Bergguist replied: "I can't think of any that we have * * * lost." Tr at 364:5 (Bergguist). Oracle then showed Bergguist a document, created by PeopleSoft, tabulating enterprise deals which PeopleSoft had competed for, and the **[**118]** name of the competitor on the deal. Ex D6236A. The data read that Lawson was an enterprise competitor 27 times, with SAP competing 33 times and Oracle 38 times. Id at PS-C077332. But Bergguist stated: "I don't know anything about this document * * * where it came from or how it was." Tr at 375:3-9 (Bergguist).

Bergguist was then asked about specific instances of competition with Lawson. When asked if he knew anything about PeopleSoft's loss to Lawson on the Dean Foods account, Bergguist stated "no." Tr at 377:16-18 (Bergguist). When asked about PeopleSoft's loss to Lawson on the Qwest [transcript misspelling] Communications account, again Bergguist stated that he knew nothing about that lost business. Tr at 377:19-21 (Bergguist). **[*1139]** Moreover, it appears Bergguist was not even aware of instances in which PeopleSoft won business when in competition with Lawson. When asked if he knew anything about PeopleSoft's wins over Lawson on the Maricopa County account, Bergguist replied "no." Tr at 377:22-24 (Bergguist). Bergguist provided the same answer when asked about PeopleSoft's win against Lawson on the San Diego Unified School District account. Tr at 378:2 (Bergguist). Bergquist, like Ms **[**119]** Thomas before him, seemed to have been struck with a singular memory lapse. It appears both witness, while able to testify thoroughly about other vendors, drew a complete blank when asked about potential high function implementations of Lawson. The court began to wonder if this phenomenon, perhaps called "Lawson Amnesia," would strike any more of plaintiffs' witnesses.

The final part of Bergguist's cross came when defense counsel began inquiring about the alleged localization of competition between PeopleSoft and Oracle in the services industry vertical:

> Question (Oracle counsel): Can you identify for me any particular verticals in which you believe that SAP is not competitive with Oracle and PeopleSoft?
> Answer (Bergguist]: SAP may compete in almost all the verticals that are there. * * *. There is relative strength for PeopleSoft and Oracle in the services industries.
>
> Question: I understand that you've said that sir, but my guestion is different. <u>In any of those services industries, is it your testimony that SAP is not competitive with Oracle and PeopleSoft?</u>
> Answer: No.

Tr at 388:1-11 (Bergguist) (emphasis added).

Notwithstanding any bias, Bergguist's **[**120]** testimony served to hurt plaintiffs' claims rather than bolster them. First, Bergguist conceded that no "clear-cut" dividing line exists in labeling a customer as "high function" rather than "mid-market." Finding an articulable division between so-called high function and mid-market ERP is necessary to plaintiffs' burden of establishing a product market. Second, Bergguist conceded that there is not one single services industry vertical in which SAP is not "competitive" with Oracle and PeopleSoft. The court <u>must</u> demarcate such a "node" or area of localized competition between Oracle and PeopleSoft as a prereguisite to finding any likelihood of unilateral anticompetitive effects. Bergguist's testimony was also full of self-serving statements regarding the low functionality of AMS and Lawson, testimony that was shown to be wholly unreliable on cross-examination when Bergguist was rendered unable to remember key information regarding Lawson.

Philip Wilmington, Executive Vice President of PeopleSoft Americas, further testified in support of the plaintiffs' proposed product market. Tr at 1760:4 (Wilmington). Wilmington began by expounding how PeopleSoft characterizes the mid-market **[**121]** versus the "up-market" or high function market. Tr at 1765-1766 (Wilmington). Wilmington stated that the "up-market" is defined as customers that have revenues of $ 1 billion or above and have "complex reguirements." Tr at 1765:16-22 (Wilmington). Prior to the PeopleSoft acguisition of J D

Edwards, the demarcation line between mid-market and up-market had been $ 500 million. Tr at 1847:7-17 (Wilmington). Predictably, Wilmington stated that PeopleSoft only competes in the up-market with Oracle and SAP. Tr at 1773:14 (Wilmington). Oracle and SAP are the "ones [PeopleSoft] runs into all the time." Tr at 1773:19-20 (Wilmington). Only these vendors have "the functionality" and the "references or customer successes" which allow them to **[*1140]** be a competitive presence in the up-market. Tr at 1773:21-1774:2 (Wilmington). Wilmington further testified that when these three competitors compete, it gets "very aggressive." Tr at 1797:20 (Wilmington). Moreover, Wilmington stated that oftentimes PeopleSoft knew the identity of its competitors on any given account, with that information driving higher discounts. Wilmington cited the example of the Oracle and PeopleSoft competition for Target, in which **[**122]** Target would communicate the other competitor's discount offerings to PeopleSoft. Tr at 1797:20-25 (Wilmington).

Wilmington testified that he did not believe that the "do nothing" option was a threat to PeopleSoft or other up-market vendors. Wilmington stated: "Almost never do I see a company that is invested in a [procurement] evaluation * * * just do nothing." Tr at 1792:2-3 (Wilmington). Wilmington stated that incumbent systems may simply "delay the decision" to buy ERP, but it is not a long-term solution for any customer. Tr at 1792:21-22 (Wilmington).

Testimony turned to Lawson and its classification as a mid-market or up-market vendor. "Very, very infrequently do I see Lawson," stated Wilmington in describing the competition for high function customers. Tr at 1803:9 (Wilmington). "They are not a viable competitor for the up-market." 1803:10-12 (Wilmington). Wilmington stated that Lawson competes, and competes well, in the mid-market sector, and perhaps it can be seen sporadically in the up-market healthcare and retail industry. Tr at 1805:13-23 (Wilmington). When Wilmington was asked about the competition between PeopleSoft and Lawson on the Amerigroup account, Wilmington **[**123]** stated that Americgroup "was very much a mid-market opportunity." Tr at 1810:5-6 (Wilmington). Regarding Microsoft, Wilmington stated that PeopleSoft does not compete with Microsoft in the up-market and only sees it from "time to time" in the mid-market. Tr at 1811:14 (Wilmington).

Next, Wilmington was asked about outsourcing and its role in the up-market. Tr at 1812:13-14 (Wilmington). Wilmington stated that he does not see outsourcing as a threat to PeopleSoft; rather, he sees outsourcing as an opportunity. Tr at 1812-17-18 (Wilmington). Wilmington stated that outsourcers have to buy software to manage the client's HR needs, and PeopleSoft tries to be the vendor to supply such software. Tr at 1812:17-18 (Wilmington). Accordingly, outsourcing is a business opportunity, not a threat. When asked about outsourcers who use their own software to manage HR, Wilmington stated that he doesn't feel threatened because that software lacks the "robust functionality that is going to be necessary to successfully meet the needs of [the] up-market." Tr at 1813:12-14 (Wilmington).

Finally, Wilmington testified regarding localized competition between Oracle and PeopleSoft. Wilmington stated that **[**124]** SAP software was "developed for a more rigid business model" and therefore lacks flexibility. Tr at 1815:5-6 (Wilmington). Oracle and PeopleSoft possess such flexibility and therefore are better solutions for up-market customers. Tr at 1815:11-15 (Wilmington). Moreover, Wilmington testified that he believes SAP is more expensive, ranging anywhere from "20 to 50 percent, in terms of higher cost of ownership across the board." Tr at 1817:5-7 (Wilmington). In fact, Wilmington cited one example, the PNC Bank account, in which Oracle, SAP and PeopleSoft were all three competing. But SAP was eliminated because its software did not possess the flexibility that PNC required. Accordingly, PNC narrowed the competition to only Oracle and PeopleSoft. Finally, Wilmington stated **[*1141]** that the PNC scenario was exemplary of the situation in the entire United States banking industry. Tr at 1817-1818 (Wilmington).

On cross, Wilmington was questioned about PeopleSoft's up-market versus mid-market demarcation. It was during this questioning that the court learned that <u>the day prior</u> to Oracle's tender offer for PeopleSoft, the demarcation line was $ 500 million in revenues and/or 2,000 employees but, soon **[**125]** thereafter, the of demarcation line increased to $ 1 billion in revenue only. Tr at 1848:10-16 (Wilmington). Wilmington stated that it was the J D Edwards acquisition, and not the tender offer, which caused the increase. But Oracle's counsel then asked: "If you drew the line at 500 million and/or 2,000 employees for [the] mid-market [roof amount], then the up-market would include players other than Oracle, PeopleSoft and SAP, isn't that right?" Tr at 1849:5-7 (Wilmington). Wilmington had trouble giving a direct answer to this question, choosing instead to argue that other factors were necessary, other than revenue, before being able to classify a customer in the mid-market or up-market. Tr at 1849:8-15 (Wilmington). But Oracle's counsel quickly brought Wilmington's attention to a 2003 PeopleSoft Pricing Policy Document which stated that "[a] mid-market customer is defined as a customer with revenues of up to $ 500 million and/or 2,000 employees." Ex P4965 at 6-7. There is no mention of other factors such as scalability or functionality needs. Further, the document stated that "the revenue-based metric is meant to be <u>the single determinant</u> of the Mid-Market Line * * *." Ex **[**126]** P4965 at 6-7 (emphasis added).

Regarding Lawson, Wilmington stood by his deposition statement that not once in 25 years had Wilmington seen PeopleSoft compete with Lawson for a "enterprise customer." Tr at 1856:21-25 (Wilmington). Wilmington stated that he based this statement upon the new $ 1 billion demarcation line between mid-market and up-market (enterprise) customers. Tr at 1857:5 (Wilmington). But Wilmington conceded that if the $ 500 million/2,000 employee line were used, then PeopleSoft had competed with Lawson for enterprise customers. Tr at 1858:7-8 (Wilmington). Oracle then introduced a document created by PeopleSoft in July 2003, after the Oracle offer and the J D Edwards acquisition, which showed the number of times PeopleSoft had competed with certain vendors on enterprise deals. Tr at 1858:10-17 (Wilmington); Ex D6236. Since the document was created after the J D Edwards acquisition, it would appear that the mid-market demarcation line used would be (or should have been) the $ 1 billion line. The document lists PeopleSoft as having competed with Lawson 27 times for an enterprise customer. Tr at 1859:7-8 (Wilmington). When asked if Wilmington still stood by his testimony, **[**127]** Wilmington stated that he still believed that PeopleSoft "doesn't see Lawson in enterprise deals." Tr at 1859:13-14, 1861:5-7 (Wilmington). Wilmington elected to "stand by his testimony." Tr at 1861:8 (Wilmington). Lawson Amnesia appeared to have claimed yet a third victim.

When asked about PeopleSoft's competition with Lawson for HCA Columbia, Wilmington could not speak to that issue because "he had not been involved in the competition." Tr at 1868:4 (Wilmington). When shown a PeopleSoft document that listed Lawson as "the number one competitor in new market deals" in the western geographic region of the United States, Wilmington stated that he "did not know" if Lawson was really number one. Tr at 1866:13-21 (Wilmington). When competing with Lawson for the Stanford University Medical Center, PeopleSoft documents written by Lynn Duffy, the sales team **[*1142]** leader on the deal, stated that "Lawson is the competition," but Wilmington stated that he "was not sure" if Duffy was right about that point. Tr at 1870:5-6 (Wilmington). When asked about PeopleSoft's loss to Lawson for the State of Michigan account, Wilmington stated that he was "not certain" if PeopleSoft had even competed against **[**128]** Lawson for that account. Tr at 1878:15-16 (Wilmington). When asked about PeopleSoft's loss to Lawson for ManuLife's business, Wilmington stated that he "did not remember losing to them" on that account. Tr at 1896:14 (Wilmington). When asked about the loss to Lawson for the Mayo Clinic account, Wilmington stated that he "was not familiar with the details of that competition." Tr at 1896:22-23 (Wilmington). Since Wilmington apparently was not aware of what PeopleSoft's own documents reveal about Lawson as a competitor and is "not certain" whether PeopleSoft competed against Lawson for several large accounts, the court finds Wilmington's testimony concerning Lawson's absence from the up-market largely incredible.

Regarding outsourcing, Wilmington was shown the same document created by PeopleSoft soon after the Oracle tender offer, which showed that PeopleSoft competed against ADP, an outsourcer, 15 times. Ex D6236. Wilmington stated that he "did not know how this [sic] data was compiled and edited;" therefore, he could not state whether these data meant that PeopleSoft faced competition from ADP for up-market customers. Tr at 1860:5-15 (Wilmington).

Finally, Oracle cross-examined **[**129]** Wilmington about any alleged localization between Oracle and PeopleSoft. Wilmington was shown his video deposition in which he was asked:

> Question (Oracle counsel): Is there <u>any</u> vertical segment of the market in the United States, the ERP market, where you do not consider SAP to be a formidable competitor for large enterprise customers?
> Answer (Wilmington): For large enterprise customers, no. I believe them to be a formidable competitor across the industry.

Tr at 1957:10-21 (Wilmington) (emphasis added). When asked if he had given those answers, Wilmington replied "yes." Tr at 1957:20 (Wilmington).

For the same reasons the court mentioned above in discounting Berquist's testimony, the court cannot accord much weight to Wilimgton's testimony. First, Wilmington admitted that there is not a single vertical industry in which Wilmington does not believe SAP to be a "formidable competitor" undercutting plaintiffs' unilateral effects claim. Further, in describing the way in which PeopleSoft characterizes mid-market customers, Wilmington was impeached by a document created by his own company. Likewise, the same document impeached his testimony about the absence of **[**130]** outsourcers from the up-market. This impeachment, combined with Lawson Amnesia, leads the court to find that Wilmington did not offer reliable evidence establishing an articulable product market containing only Oracle, PeopleSoft and SAP.

Douglas Burgum, Senior Vice President of Microsoft Business Solutions (MBS), was another industry witness called by plaintiffs in order to support their theory of the high function product market and its three participants. Burgum began by describing how he literally "bet the farm" on a small software company called Great Plains in 1983. In 2001 Microsoft acquired Great Plains. Tr at 2974:3-8 (Burgum). In 2002, Microsoft acquired Navison Software, a Danish company. The entire group was rebranded as "Microsoft Business Solutions" (MBS). Tr at 2973:8-9 (Burgum). MBS sells four business application **[*1143]** products: Navison, Great Plains, Solomon and Axapta. Tr at 2996:15-16 (Burgum). Burgum is responsible for the overall performance and market strategies of MBS, as well as ongoing developments of new products and enhancements to existing products. Tr at 2974:18-20 (Burgum). Burgum began by stating that MBS is focused on selling its product to mid-market customers. **[**131]** Tr at 2978:5-8 (Burgum).

To Microsoft, mid-market customers are customers who have employees ranging from 50 to 1000 employees and an average IT spend between $ 10,000 and $ 2 million. Ex P2533R at 6. Further showing that Microsoft is only focused on mid-market customers, Burgum testified that MBS does not have a sales force. Rather, MBS is sold indirectly through reselling partners, companies whose sole purpose is to resell MBS products. Tr at 2986-2988 (Burgum). Moreover, neither partners nor MBS itself offers implementation or consulting services for the products and do not intend to do so in the future. Tr at 2995:3-18 (Burgum). When asked if MBS intended to expand its products' ability to serve the large enterprise sector, Burgum responded "no, * * * that is not a segment we are targeting." Tr at 3001:20-3302:1 (Burgum). Moreover, MBS products do not have the functionality to meet large customers' needs. Tr at 3005:22-25 (Burgum). MBS products, Burgum stated, cannot handle the "multi-multi-multi issues," such as multiple languages and currencies that large organizations tend to need. Tr at 3011:23-25 (Burgum). When asked what firms' software could meet those needs, Burgum responded: **[**132]** Oracle, PeopleSoft and SAP. Tr at 3006:8-9 (Burgum). Burgum stated that while Microsoft competes with these three from time to time, that competition only occurs for mid-market customers. Tr at 3008:3-6 (Burgum).

Burgum cited the lost North Dakota account as an example of the limited functionality of the Great Plains product, both pre- and post-acquisition with Microsoft, and its inability to meet large functional needs. Tr at 3022:3-7 (Burgum). Burgum was asked why Microsoft didn't "just spend a bunch of money" to redevelop the code and the salesforce in order to compete for larger accounts. Tr at 3024:3-10 (Burgum). Burgum stated that undertaking would "be a formidable task" and would "take more money than I would be willing to recommend that Microsoft spend." Tr at 3024:12-18 (Burgum). Plaintiffs asked Burgum about the Microsoft/SAP acquisition proposal. Burgum stated the "leading" reason that Microsoft wanted to acquire SAP was not to enter the high function market for ERP and thereby start competing with Oracle or PeopleSoft. Rather the acquisition was to create "a better value for the customers who would use Microsoft Office to work with and make decisions around the data that **[**133]** would come out of the SAP system." Tr at 3040:9-15 (Burgum). Microsoft simply wanted to purchase SAP in order to help "front-end users" be "better able to communicate with back-end data." Tr at 3039:25-3040:2 (Burgum). See Ex P841R at 1. Apparently, the acquisition was not motivated by any ill-will towards Oracle or any desire to enter the market and begin undercutting Oracle. The discussions between Microsoft and SAP were concluded in early spring 2004, about the time this suit went to trial, with a decision not to move forward with the acquisition. Tr at 3028:9-10 (Burgum).

When asked about Microsoft's alliance with BearingPoint, Burgum testified that Microsoft had only the humblest of intentions in entering into this alliance. Under this agreement, Microsoft was to "provide funding for hiring, recruiting and training of people who would get skilled up on **[*1144]** Axapta." Tr at 3055:15-17 (Burgum). In return, BearingPoint agreed to recommend, install and maintain MBS software, specifically Axapta, to BearingPoint consulting clients. Tr at 3055:15-17 (Burgum); Ex 3249R at 4, 15. MBS had no plan or expectation for BearingPoint to recommend Axapta software to high function customers. Tr at **[**134]** 3053:1-6 (Burgum). To the contrary, this agreement was only entered into for BearingPoint to sell MBS to mid-market customers. Tr at 3054:10-18 (Burgum).

Subsequent to trial, BearingPoint announced that the new Microsoft Business Solutions Axapta was "a compelling ERP solution" which "provides functionality across all key areas of the business * * * including financial management, CRM [and] HR management * * *." See BearingPoint homepage at http://www.bearingpoint.com/solutions/enterprise_solutions/ microsoft_bus_sol.html. The BearingPoint webpage claims the "key" functionalities of Microsoft Axapta include "multiple companies, multiple languages, and multiple currencies." Id. Although these statements do not appear in the trial record, they are consistent with the substantial evidence in the record and afford additional reason to discount Burgum's testimony that MBS is not at least a potential entrant in what plaintiffs characterize as the high function market.

The court accords little weight to Burgum's testimony attempting to prove Microsoft's absence from the so-called high function ERP product market. Burgum's Uriah Heep like humility about Microsoft's intentions regarding **[**135]** the failed SAP alliance and the successful BearingPoint alliance was unconvincing. It strains credulity to believe that Microsoft would offer billions of dollars to acquire SAP merely to make data processing easier for customers who use both Microsoft Office and SAP ERP. Further, this proposition is impeached by Microsoft's actions with BearingPoint concurrently, or soon after, the SAP alliance was discontinued. Finally, the court wholly discounts Burgum's testimony that MBS software, especially Axapta, lacks the functionality to be considered high function ERP. Burgum stated that MBS products cannot provide the "multi, multi, multi" functionality, but BearingPoint is selling Axapta on the basis that it can handle "multiple languages, currencies and businesses." Accordingly, the court discounts Burgum's testimony portraying MBS solely as a mere humble mid-market vendor.

Finally, in attempting to show the high barriers to entry into the high function market, plaintiffs called Richard Allen, former Executive Vice President of Finance Administration and CFO of J D Edwards. Tr at 747:20-25 (Allen). Allen testified that J D Edwards, prior to being acquired by PeopleSoft, had been a company **[**136]** "focused on mid-market customers" that did not need "high levels of configurability," "deep functionality" or high scalability. Tr at 746:20-21, 757:25-758:20 (Allen). But Allen testified that in the early 1990s J D Edwards attempted to reposition itself in order to sell to "up-market customers." Tr at 770:22-771:10 (Allen). J D Edwards had to "create a software architecture to allow [its] products to run on multiple hardware platforms, with multiple databases and multiple operating systems." Tr at 771:16-21 (Allen). But J D Edwards ultimately abandoned this attempted repositioning in 2001. Tr at 777:6 (Allen). Allen stated that "[J D Edwards] came to the conclusion that after about a decade involved in the effort, hundred of millions of dollars of investment, we didn't have the products, services, and ultimately the reputation necessary to satisfy the requirements that up-market customers have." Tr at 777:8-13 (Allen). **[*1145]** Accordingly, plaintiffs argue that no firm could enter the high function FMS and HRM markets within the required two year threshold set by the Guidelines. Pls Post Brief (Doc # 366) at 44 (citing Guidelines § 3.3).

Plaintiffs' Expert: Elzinga

By far the most **[**137]** important of plaintiffs' witnesses was Professor Kenneth Elzinga of the University of Virginia. Elzinga is a well known and highly regarded economist. Tr 2142-2145 (Elzinga); Ex 4014A. The court finds Elzinga to be highly qualified to offer testimony on market definition. Elzinga was the only one of plaintiffs' witnesses who offered testimony from which the court could attempt to calculate market shares and apply the Philadelphia Nat'l Bank presumptions or perform the HHI calculations of the Guidelines.

In reaching his proposed market definition, Elzinga purported to follow the Guidelines approach. Tr. at 2163:18-19 (Elzinga). Elzinga concluded that the relevant market was limited to high function FMS and HRM software. Elzinga testified that a hypothetical monopolist could profitably impose a SSNIP in high function FMS and HRM. Tr at 2149:16-22 (Elzinga). Elzinga posited that if a merged Oracle/PeopleSoft decided to increase the price of its high function FMS and HRM products, consumers would not substitute (1) mid-market solutions (such as those produced by ERP vendor Lawson), (2) best-of-breed solutions (such as those produced by vendor Kronos), (3) incumbent or legacy solutions **[**138]** or (4) the services of outsourcing firms (such as Fidelity and ADP). Tr at 2178:10, 2179:8-14 (Elzinga).

Elzinga reached his conclusions by analyzing several "strains" of evidence: (1) Oracle discount approval forms; (2) reports from independent research firms; (3) information from high function FMS and HRM customers and consulting firms; and (4) internal documents from firms in the enterprise software sector. Tr at 2168:9-11, 2180:4, 2184:10-12, 2188:23-25 (Elzinga). This being established, Elzinga then presented his conclusions on market shares. Tr at 2209-2220 (Elzinga).

Discount approval forms. Elzinga's first strain of evidence, and the one on which he appeared to place the greatest emphasis, was the analysis and tabulation of Oracle discount approval forms (DAF). See Exs P1000-P1944.

Oracle salespersons have the discretion to offer a 20 to 25 percent discount off the list price of HRM or FMS. Tr at 2168:25-2169:2 (Elzinga). If a situation arises in which Oracle is competing with another ERP vendor and this requires the Oracle salesperson to offer a larger discount on the Oracle ERP software, a DAF must be executed and approved by an Oracle official. Tr at 2169:3-9 (Elzinga). **[**139]** In executing a DAF, the salesperson lists the "justification" for pursuing an increased discount. In the justification column of the DAF, "sometimes the particular competitor or alternative [solution] that is justifying * * * or provoking the discount that is being requested" can be found. Tr at 2169:17-19 (Elzinga).

Elzinga analyzed 222 DAFs that Oracle provided to the DOJ. Elzinga only analyzed the "forms that [1] had US customers, [2] pertained to HRM or FMS software, * * * [3] [had a] net transaction price [of] over $ 500,000 and [4] where the justification section listed the competitor [or alternative solution] that was driving the request for the discount." Tr at 2174:14-18 (Elzinga). These criteria decreased the number of DAFs available for analysis to just over 200. Tr at 2175:25 (Elzinga). After analyzing all the justifications that were proffered by Oracle salespersons, Elzinga created a graph that showed the number of times each competitor or alternative solution forced an Oracle **[*1146]** salesperson to request a discount (i e, the number of times each competitor or alternative constrained Oracle's pricing of FMS or HRM). See Ex P3175.

Based upon the graph, Oracle **[**140]** salespersons cited as primary justification, competition from: Peoplesoft, 122 times; SAP, 81 times; Lawson, 16 times; and Microsoft and AMS, each less than 10 times. Pls Post Brief (Doc # 366) at 12; Tr at 2177:10-11 (Elzinga). Elzinga concluded that this discount tabulation is "very powerful, robust evidence" that the relevant product market is high function FMS and HRM. Tr at 2179:7-8 (Elzinga). "I think that [high function FMS and HRM] is [the relevant market] because I don't see alternatives outside * * * of that market, such as mid-market, or [incumbent] or outsourcing, disciplining the Oracle pricing the way the [other] two manufacturers of high function FMS software and HRM software do, and that's SAP and PeopleSoft." Tr at 2179:9-14 (Elzinga).

Market research studies. Independent market research organizations study certain product markets and summarize findings about any number of relevant aspects of that market. Most of these research organizations conduct research and issue reports for "people who buy [the product] and want to implement it, * * * but [these firms are] not writing to an antitrust economist or antitrust lawyer audience." Tr at 2182:12-15 (Elzinga). **[**141]** Elzinga found one such market research report, conducted by the Gartner Research firm, which analyzed the HRM pillar of the software industry. Tr at 2181: 17-18 (Elzinga). In the Gartner report, Gartner had enumerated two characteristics upon which it chose to analyze HRM vendors: (1) "completeness of vision" and (2) "ability to execute." Completeness of vision apparently refers to a vendor's level of desire to have software capable of either broad and complex transactions (deemed "visionaries") or limited and ordinary transactions (deemed "niche players"). Tr at 2182: 17-19 (Elzinga). Ability to execute apparently refers to whether Gartner believed each vendor had the ability to execute its HRM capability "vision" (e g, high levels of functionality and scalability). Tr at 2182:24-25 (Elzinga).

[SEE FIGURE IN ORIGINAL]

According to Elzinga, the Gartner research only identified three firms as "visionaries" with a high ability to execute -- Oracle, PeopleSoft and SAP. Tr at 2183:1-4 **[*1147]** (Elzinga). Elzinga concluded that the Gartner report is again "consistent with the notion that there is <u>something different</u> about high function enterprise software from other alternatives * * * and **[**142]** when it comes to high function software, there is <u>something different</u> about Oracle, PeopleSoft and SAP." Tr at 2183: 16-20 (Elzinga) (emphasis added).

Customers and consulting firms. The next strain of evidence Elzinga relied upon were declarations of ERP customers and the "Big Five consulting firms" that plaintiffs furnished him. Tr at 2184:8-15 (Elzinga). In particular, Elzinga pointed to declarations of Perry Keating of Bearing Point (who also testified) and Deloitte's [David] Dortenzo. See Elzinga demo # 6. Tr at 2185:1-2188:9 (Elzinga). In seeking cost-effective solutions and recommendations in choosing ERP vendors, many consumers employ consulting firms to advise them in their negotiations with the vendors. Accenture, IBM Global Services, BearingPoint, Deloitte and CGEY are the consulting firms collectively known as the "Big Five." At trial, plaintiffs offered the statement of BearingPoint's Senior Vice President, Perry Keating. Tr at 912:15-916:7 (Keating). Keating stated that Oracle, SAP and PeopleSoft "are the only [vendors] that provide a product that will be acceptable to a large company in terms of product capabilities * * *." Id.

Elzinga described the similar **[**143]** testimony of Keating and Dortenzo in declarations as indicating that these Big Five systems integrators most frequently recommend PeopleSoft, Oracle and SAP for ERP implementations. Tr at 2186: 7-2188:9 (Elzinga).

The customers' declarations, Elzinga concluded, "were consistent with the hypothesis that there's a distinction between high function enterprise software and the mid-market * * *. [Mid-market solutions] are not substitutes that a hypothetical monopolist * * * would be constrained [by] in its pricing discretion [of high function FMS and HRM]." Tr at 2184:17-22 (Elzinga).

Internal documents from ERP vendors. Elzinga was also privy to internal company documents, some of which he claimed were informative. Tr at 2189:23-25, 2190:15 (Elzinga). First, Elzinga was privy to customer surveys that had been completed by Oracle ERP customers. These surveys had been given to Oracle customers who were classified by Oracle as having over $ 2 billion in sales. Tr at 2189:5-7 (Elzinga). These 28 surveys asked the Oracle customer to identify any other "vendors [other than Oracle] that were considered." Id at 3-4 (Elzinga). Elzinga summarized the surveys and concluded that PeopleSoft **[**144]** was considered 50 percent of the time by Oracle customers. Ex P3176. SAP was considered 28 percent of the time and Lawson was considered 18 percent of the time. Id. Microsoft was considered only 4 percent of the time. Id.

Also of interest to Elzinga was an internal document produced by Microsoft in response to the government's civil investigative demand (CID), MS-OPCID 1610. The document was labeled "Microsoft Business Solutions: Scorecard Review." See Elzinga demo # 8. In the document, Microsoft is characterized as worried about "Oracle, Peoplesoft, [and] SAP aggressively moving down-market, increasing pricing pressure (discounting levels) and creating new channel programs." Tr at 2192:8-11 (Elzinga). Elzinga concluded that this document showed that Microsoft (1) recognizes a difference between mid-market and high function software and (2) does not consider itself to be in the market for high function ERP. Tr at 2192:13-20 (Elzinga).

From the foregoing, Elzinga crafted a metric to measure the product market.

[*1148] Elzinga's data were calculated exclusively for use in this trial. In estimating the product market from the non-public sales data of Oracle and PeopleSoft and third party **[**145]** vendors obtained through the government's compulsory process, Pls Fact (Doc # 356) 6.2, Elzinga applied a minimum threshold purchase "of $ 500,000 per customer" to identify high function FMS and HRM. Tr at 2210:2-4 (Elzinga). Elzinga used this threshold amount to filter out mid-market and point solution sales. Tr at 2210:4-6 (Elzinga). Accordingly, any sale of FMS or HRM that resulted in at least $ 500,000 in net license revenues to the vendor, Elzinga considered to be a sale of high function FMS or HRM and thus was in the relevant market. Because plaintiffs' product market definition has no widely accepted meaning in the industry, there were no generally available data explicating the proposed market's participants and their relevant shares to backup Elzinga's estimates.

From his numbers, Elzinga calculated the following United States high function FMS market shares: SAP, 39 percent; PeopleSoft, 31 percent; and Oracle, 17 percent. Tr at 2212:22-24 (Elzinga). A merged Oracle/PeopleSoft would, in Elzinga's view, possess a 48 percent market share. Tr at 2212:24-25 (Elzinga). Using the same data, Elzinga calculated the HHI1 in the high function FMS market to be 2800. Tr at 2214:17-18 (Elzinga). **[**146]** Based upon Elzinga's calculations, a merger between Oracle and PeopleSoft would increase the high function FMS HHI2 to 3800. Tr at 2214:20-21 (Elzinga).

For high function HRM, Elzinga calculated PeopleSoft's market share at 50 pecent, SAP at 30 percent and Oracle at 18 percent; hence, in Elzinga's view, a merged Oracle/PeopleSoft would have a market share approaching 70 percent. Tr at 2218:18-23 (Elzinga). Elzinga calculated an HHI1 of 2800 in the high function HRM market. Tr at 2219:7-9 (Elzinga). Post-merger, the HHI2 would increase to 5700. Tr at 2219:10-11 (Elzinga).

Plainly, the levels of concentration reflected in Elzinga's testimony exceed the thresholds for "significant competitive concerns" under the Guidelines. Guidelines § 1.51(c). Both HHI2 amounts exceed 1800, and both? HHI amounts exceed 50 points. Likewise, of course, post-merger market shares of this magnitude would satisfy the conditions to raise the anticompetitive presumption described by the Supreme Court in Philadelphia Nat'l Bank.

But for reasons explained more fully following the discussion of Oracle's expert witnesses, the court finds that Elzinga failed to carry the plaintiffs' burden of (1) establishing **[**147]** an articulable product market and (2) providing post-merger market share and HHI measurements, in a properly defined market, invoking an anticompetitive presumption under *Philadelphia Nat'l Bank* or the Guidelines.

Oracle's Critique of Plaintiffs' Product Market Definition

Oracle painted *a* quite different picture. Oracle assailed plaintiffs' high function software "label," arguing that there is "not a sufficient break in the chain of FMS and HRM substitutes to warrant calling 'high-function' software -- meaning SAP, Oracle and PeopleSoft [FMS and HRM] products -- a market unto themselves." Def Post Brief (Doc # 365) at 17. Oracle argued that the relevant product market is, at least, the entire continuum of FMS and HRM software, including those sold by so-called mid-market vendors. Id. In support of this position, Oracle presented several witnesses.

Systems Integrator Witness

Oracle called Christy Bass, Global Managing Partner of Global Business Solutions for Accenture, to rebut plaintiffs' product **[*1149]** market definition as well as rebut the notion of localized competition between Oracle and PeopleSoft. Accenture is the largest systems integrator in the world, with annual **[**148]** revenue exceeding $ 11.4 billion. Tr at 1610:15 (Bass). Bass testified that "all" of Accenture's clients have high function needs. Tr at 1613:6-7 (Bass). Bass testified that several high function clients, such as Best Buy and BellSouth, had chosen to outsource their entire HR function. Tr at 1648:14-19 (Bass). While some of these outsourcing clients were on a "one-to-one" outsourcing model, in which it took a license directly from an ERP vendor, such as Oracle, Bass stated that Accenture is planning to launch the "one-to-many" model. Tr at 1649:14-1650:13 (Bass). Under this model, the license will be between Accenture and the ERP vendor, with no contractual arrangement between the customer and the vendor. Tr at 1650:3-13 (Bass). Moreover, Bass testified Accenture plans to begin outsourcing FMS on a "one-to-many" model within the next two years. Tr at 1655:6 (Bass).

Bass also testified about best of breed solutions and their potential to constrain high function ERP prices. Bass stated that it was "extremely common" for high function clients to pursue a best of breed approach. Tr at 1668:17 (Bass). Bass stated that these best of breed solutions could possibly offer greater functionality **[**149]** than Oracle, SAP or PeopleSoft. Tr at 1668:24-1669:3 (Bass). She also stated that best of breed solutions put competitive pressure on these ERP vendors. Tr at 1669:19-22 (Bass).

Bass rebutted plaintiffs' assertions that SAP was a "struggling" firm and also plaintiffs' evidence regarding localized competition between Oracle and PeopleSoft. Bass characterized SAP's position in the United States ERP marketplace as "strong." Further, she testified that she considered SAP to have a "stronger" position than either Oracle or PeopleSoft in regards to Global 2000 clients. Tr at 1621:18-23 (Bass). When asked about SAP's complete exclusion from the United States banking industry, Bass conceded that such a situation existed, but opined that change was on the horizon. Bass disclosed that SAP and Accenture have entered into a "strategic alliance" to co-develop a banking solution for European and United States banking firms. Tr at 1633:4-7 (Bass); Ex D5001. Bass stated that Accenture has relationships with all twenty of the largest United States banks, and Accenture "leveraged the experience that [Accenture] has had in the banking industry" in order to get some of these banks to discuss implementing **[**150]** the co-developed software. Tr at 1634:15-16, 1635:3-10, 1636:1-6 (Bass).

The court finds Bass' testimony to be reliable and informative on the issues of outsourcing and localized competition. Regarding high function clients that have chosen outsourcing as an ERP alternative, Bass gave specific examples of companies, both of which would seem to meet plaintiffs' high function definition, that had chosen to outsource their entire HRM needs. Bass' testimony of a lack of localized competition between Oracle and PeopleSoft was likewise supported by her explanation of the SAP/Accenture co-development alliance, under which Bass explicitly stated that Accenture will use its leverage and experience with United States banking firms in order to help SAP gain a larger competitive share in that vertical.

Industry Witnesses: Lawson and SAP

Jay Coughlan, CEO and President of Lawson Software testified regarding his view of the plaintiffs' proposed product market and its relation to Lawson. Tr at 3586:1-13 (Coughlan). Oracle wasted no time in questioning Coughlan about plaintiffs' characterization of Lawson as only a **[*1150]** mid-market vendor. Tr at 3596:5-9 (Coughlan). Coughlan stated that he disagreed **[**151]** with this view, testifying that Lawson has customers that exceed $ 1 billion in revenues, employ more than 10,000 people and are listed among the Fortune 1000. Tr at 3596:6-19 (Coughlan). Coughlan stated that the plaintiffs' perception of Lawson may have been appropriate before 1996, when Lawson made a conscious decision to focus on specific verticals and winning larger shares in those verticals. Tr at 3597:1-8 (Coughlan). The first vertical that Lawson focused on was healthcare and today it is providing procurement and HRM for HCA, the largest health care provider in the world with annual revenues exceeding $ 20 billion. Tr at 3600:1-4 (Coughlan). Coughlan also stated that Lawson provides FMS and procurement to the Mayo Clinic, an account for which Lawson beat both Oracle and PeopleSoft. Tr at 3601:2-6 (Coughlan).

Coughlan stated that Lawson next focused upon the retail vertical and has met with much success. Today, Lawson provides FMS to Safeway, the third largest grocery chain in the United States with approximate revenues of $ 30 billion. Tr at 3604:1-8 (Coughlan). Lawson provides FMS to Walgreens, a convenience store chain with more than $ 30 billion in revenues. Tr at 3604: **[**152]** 12-21 (Coughlan). Lawson provides FMS for Target, a department store chain with more than 300,000 employees and $ 50 billion in revenues. Tr at 3605:2-13 (Coughlan). The same is true for Williams-Sonoma. Tr at 3606:16-19 (Coughlan). In the apparel area, Lawson provides HRM and FMS to Ralph Lauren and Gucci. Tr at 3605:19-25 (Coughlan). Lawson provides HRM to McDonald's, a food retailer with over 100,000 employees. Tr at 3607:4-19 (Coughlan).

In the public sector vertical, Lawson has won major accounts with school districts in Florida, Virginia and Maryland, all of which Lawson competed for, and won, against Oracle and PeopleSoft. Lawson provides HRM to the States of Michigan and Arizona. Tr at 3615:4-15 (Coughlan). Lawson provides HRM for the City of Dallas and the University of Wisconsin. Tr at 3613:4-12 (Coughlan). Coughlan's testimony continued to describe Lawson accounts in insurance and financial services verticals as well as individual customers including Johnson & Johnson (HRM) and Sara Lee and McGraw-Hill (HRM and FMS). Tr at 3636-3640 (Coughlan). See also Ex D7140.

Moreover, Coughlan testified that Lawson software systems run in English, French and Spanish. Tr at 3645:13-17 (Coughlan). **[**153]** Coughlan testified that Lawson software is able to handle multiple currencies as well, citing one Lawson customer, Schlumberger, a major supplier to the oil industry with $ 10 billion in revenues, 10,000 employees and international operations. Tr at 3641:23-3642:11 (Coughlan). Schlumberger is utilizing Lawson FMS in close to 100 countries, but not the United States, thus showing that the Lawson software can handle currencies beyond the United States dollar. Tr at 3642:16-3643:9 (Coughlan).

Finally, Oracle asked Coughlan about Professor Elzinga's data expounding the market shares for high function HRM and FMS. Tr at 3648:16-3655:19 (Coughlan). Oracle offered into evidence the DOJ subpoena to which Lawson had responded by telling the DOJ of a large number of HRM and FMS shipments that had been made in late 2002 and throughout 2003. Ex D7079R. This list included FMS sales to Dollar Tree Store, Louisiana Pacific Corporation and ManuLife, with each sale totaling more than $ 500,000. Ex D7079R; Tr at 3650:3-8 (Coughlan). Moreover, FMS suites were sent to Schlumberger, **[*1151]** Sara Lee and Johnson & Johnson, with each spending more than $ 1 million on the suites. Id. Accordingly, Coughlan stated **[**154]** that he was perplexed when told that according to Professor Elzinga's statistics, Lawson had no market share of the high function FMS market because Lawson had made no sales of FMS over $ 500,000. Tr at 3653:10-13 (Coughlan). Further, Coughlan was told that Elzinga's HRM data listed Lawson as having made only one sale above $ 500,000, a sale for $ 995,000, leading Elzinga to call Lawson a "fringe player" in the HRM high function market. Tr at 2219:16 (Elzinga). In response, Coughlan stated that he disagreed with Elzinga's calculations, citing that Lawson "had one deal alone in HRMS in [2003] that was more than one million dollars." Tr at 3654:1-2 (Coughlan). Coughlan stated that he disagreed with plaintiffs' attempts to characterize Lawson as "not a serious player [in the high function market]." Tr at 3655:15-19 (Coughlan).

On cross-examination, the plaintiffs were able to delve more deeply into the customer relationships that Lawson has with several of the customers discussed on direct. The City of Dallas had extensive problems with Lawson's HRM software, Coughlan admitted, and its ability to handle overtime payroll functionality, leading Dallas to withhold payments to Lawson. **[**155]** Tr at 3699:15-19 (Coughlan). Coughlan claimed the problem had been corrected. Tr at 3700:11 (Coughlan). Next, an internal Lawson memo showed that McGraw-Hill was exploring the option of replacing Lawson, as was another client, Cendant. Ex P3297. Moreover, the document stated that Johnson & Johnson was "not purchasing much in the way of additional applications." Id. In summation, the document seemed to call into question Lawson's ability to meet the HR needs of global organizations. Id. Coughlan conceded that the Mayo Clinic has had problems with its Lawson FMS software. Tr at 3715:10-23 (Coughlan). Plaintiffs went through a series of Lawson customers that have had some implementation or service problem with Lawson software. Tr at 3699-3711 (Coughlan).

This evidence was elicited in an attempt to show that Lawson is not a player in the high function ERP market. The evidence did show the existence of implementation or service problems. But the customers all appeared to fit plaintiffs' definition of high function customers. Hence, this line of inquiry did not appear to demonstrate Lawson's absence from this or any such market, only that some Lawson customers have had problems with its **[**156]** software. The court, therefore, discounts Coughlan's cross-examination testimony for the purpose for which it was apparently offered. Plaintiffs did not show that implementation or service problems were absent or less frequent in Oracle, PeopleSoft or SAP products. Accordingly, the court credits Coughlan's testimony regarding large and complex customers that have chosen Lawson ERP to meet their FMS and HRM needs. Not only was this evidence uncontradicted, but the testimony was amply supported by many exhibits.

Richard Knowles, Vice President of Operations for SAP America, was called by Oracle to refute the plaintiffs' product market definition as well as to poke holes in plaintiffs' theory of unilateral anticompetitive effects. Tr at 2805:4-9 (Knowles). At the outset, Knowles clarified some of the terms used in this case, or at least as those terms are understood by SAP. "High function" has no meaning apparently. SAP looks to customer characteristics in determining whether a vendor is mid-market or high function. SAP considers a customer to be mid-market if it has revenues less than $ 1.5 billion, but more than $ 200 million. Tr at 2818:9-19 (Knowles). **[*1152]** A customer above $ 1.5 billion **[**157]** is considered a "large enterprise." Tr at 2819:14-15 (Knowles). But Knowles stated that characterizing a customer as one or the other was far from "an exact science." Tr at 2820:18-19 (Knowles).

Oracle then proceeded to "name drop" a large number of SAP clients: Deloitte & Touche, Accenture, Halliburton, MCI, SBC, T-Mobile, AOL, Starbucks, Nike, Home Depot and Barnes & Noble, all clearly up-market customers. Tr at 2829:6-2831:19 (Knowles). This evidence tended to rebut the suggestion that SAP was a struggling firm with substantial disadvantages in the United States. Next, Oracle questioned Knowles regarding two specific examples in which SAP had competed head to head against Oracle and other ERP vendors. First, Oracle presented an SAP DAP regarding a proposed ERP license transaction with ExpressJet, a company with approximately $ 1.5 billion in revenues, thus making it a large enterprise. D5641R at 1; Tr at 2839:23 (Knowles). As with the DAFs used by Oracle, the SAP DAFs had a column for denoting the competitor that was requiring or motivating the increased discount request. D5641R at 1. In the case with ExpressJet, SAP was originally competing against PeopleSoft, Lawson, Exact, Microsoft, **[**158]** Oracle and Ultimate. Ex D5641R at 2. Knowles stated that he recognized the name Lawson and that SAP "of course" competes with Lawson. Tr at 2841:8-12 (Knowles). Moreover, once ExpressJet had narrowed the six vendors down to three, it was a contest with Lawson, Oracle and SAP. Tr at 2842:23-2843:5 (Knowles).

Knowles stated that SAP was "agnostic" about which competitor makes it to the final round, because SAP is going to give the same level of discount regardless of the competitor. Tr at 2848:7-10 (Knowles). Oracle then introduced another SAP DAF, this time for Kellogg, Brown & Root, a subsidiary of Halliburton. Ex D5649R at 1. This form listed the justification for the discount as the "extreme competition" between Oracle and SAP. Id. Knowles stated that this type of scenario was to be expected, as SAP views Oracle to be "highly aggressive" on pricing. Tr at 2856:10-11 (Knowles).

Next, Oracle introduced an email from Bill McDonald, the CEO of SAP America. Ex D5636. The email contained Microsoft's second quarter earnings for 2004. Id at 1. The document began by reading: "These guys are here!". Id. Knowles stated that McDermott was referring to Microsoft's 32 percent year-over-year **[**159]** increase in the EAS market. Tr at 2892:4-23 (Knowles).

Finally, Oracle questioned Knowles about any apprehensions SAP felt regarding increased prices should the proposed merger of Oracle and PeopleSoft be consummated. Tr at 2858:9-11 (Knowles). Knowles responded that SAP has a neutral opinion on the merger. Knowles stated his belief that the merger will actually make the ERP market more competitive. Tr at 2858:20-21 (Knowles).

On cross, Knowles conceded that the reason SAP America exists is because customers in the United States "want to have somebody here present to deal with in buying the type of software that [SAP] sells." Tr at 2902:12-15 (Knowles). Next, Knowles stated that SAP views Lawson as a "mid-market company." Tr at 2924:24 (Knowles). This characterization appears to rest on SAP's labeling as mid-market of customers with less than $ 1.5 billion in revenues, a substantially different demarcation from plaintiffs' labeling of a mid-market customer as one that does not buy software packages exceeding $ 500,000. See Tr at 2924:5-7 (Knowles). Accordingly, the court accords no weight to Knowles' statement inasmuch as it was offered to **[*1153]** show that Lawson does not compete in the **[**160]** high function market. Otherwise, the court finds Knowles' testimony to be reliable and uncontradicted.

Outsourcing Witnesses

Michael Sternklar, Executive Vice President of Fidelity Human Resources Services Company, testified regarding Fidelity's outsourcing solutions for HR needs. Tr at 3124-3126 (Sternklar). Sternklar stated that Fidelity currently has a license with Oracle for HRM software. Tr at 3130:2-7, 3135:3-8 (Sternklar). Sternklar listed several of Fidelity's "large" customers: Bank of America, IBM, American Corporation and Asea Brown Boveri (ABB). Tr at 3136:13-3137:8 (Sternklar). Sternklar described the procurement process by which Fidelity won the ABB account. ABB made its choice between buying an in-house system from PeopleSoft or SAP, or instead, outsourcing ABB's HRM needs through Fidelity. Tr at 3138:14-25, 3139:10-13 (Sternklar). ABB chose Fidelity over PeopleSoft and SAP. Tr at 3140:17-18 (Sternklar). Sternklar stated several reasons why a customer would choose outsourcing over an in-house ERP system. One important reason, Sternklar stated, was the "continued investment" involved in buying an in-house ERP system based upon the need continuously to upgrade such **[**161]** a system. Tr at 3139:23-25 (Sternklar).

Jay Rising, President of National Accounts at ADP also testified about what he called "upgrade treadmill" and "hidden costs" that are involved in package software. Tr at 4094:15-22 (Rising). Both Sternklar and Rising testified that there are no such costs associated with outsourcing because the outsourcer itself, not the customer, handles all upgrades and maintenance. Tr at 3140:2-5 (Sternklar); 4093: 12-16 (Rising). The client need not bother with such hassles.

Both witnesses also testified that outsourcing companies are able to handle the HR needs of companies with large numbers of employees. ADP has 1000 customers that have over 1000 employees. Tr at 4097:21-25 (Rising). ADP's client list includes Comcast, Sysco, Xerox and Tyco. Tr at 4100:13-24 (Rising). Fidelity outsources for Bank of America which currently has between 170,000 and 180,000 employees. Tr at 3145:18-25 (Sternklar).

Finally, Sternklar stated that Fidelity was currently in the process of creating its own software called HR Access. Tr at 3152:3-3153:13 (Sternklar). Fidelity's goal is to move all customers onto HR Access within the next two years and cease using Oracle software **[**162]** completely. Tr at 3154:9-15 (Sternklar).

The evidence of both of these outsourcing witnesses was reliable and amply supported by specific examples of high function customers that had chosen to outsource with Fidelity or ADP as an ERP alternative. Accordingly, the court credits this testimony in determining whether outsourcing solutions have a price-constraining effect on ERP vendors.

Expert Witnesses: Hausman and Campbell

Oracle did not propose a product market definition. Instead, Oracle picked apart plaintiffs' market definition piece by piece. Two expert witnesses, Professor Jerry Hausman, an industrial organization economist at MIT, and Tom Campbell, dean of the Haas Graduate School of Business at the University of California (Berkeley) testified for Oracle. Among other important positions in government, Campbell served as director, Bureau of Competition, at the FTC. Both Hausman and Campbell assailed plaintiffs' product market definition, describing it as vague, unrealistic and underinclusive. As with Elzinga, the court finds both Hausman and Campbell to be **[*1154]** well qualified to offer their opinion testimony.

Vague. Hausman characterized the "high function" label as vague **[**163]** and too "hard to get your arms around." Tr at 3807:14-15 (Hausman). He cited plaintiffs' changing description of "high function" ERP as illustrating the unreality of plaintiffs' proposed product market definition. Tr at 3809:20-3810:9 (Hausman). At first, plaintiffs argued for a customer-based product definition. Campbell characterized this initial customer-based market definition as "unprecedented" and "unusual." Tr at 2704:6 (Campbell). Hausman asserted that plaintiffs, in reaching this strange product market, clearly worked backwards from their desired result: finding a group of customers all of which had purchased SAP, Oracle or PeopleSoft ERP, then claiming that those customers were "similarly situated" and defined the market. But, at trial, Hausman noted, plaintiffs shifted ground and argued that the high function market was based upon "product characteristics" of the software, such as functionality and scalability, not the customers who buy it. Tr at 3809:20-3810:3 (Hausman). See also Pls Post Brief (Doc # 366) at 3-4.

Even accepting the plaintiffs' second version of high function software, both experts asserted that the term is too imprecise to define a market. Hausman **[**164]** contended that Elzinga himself admitted that the high function definition contained no "quantitative metrics" that could be used to distinguish a vendor of high function ERP from a vendor of mid-market software. Tr at 3807:16-17 (Hausman). See Tr 2151:18-2152:3 (Elzinga). Hausman illustrated his point by reference to ManuLife Insurance Company, the fifth largest insurance company in the United States with offices throughout North America. ManuLife has complex needs and transactions and thus by any objective measure would fit in plaintiffs' high function market. But plaintiffs, for a reason Hausman said plaintiffs left unexplained, considered ManuLife to be a mid-market purchaser and therefore excluded from the plaintiffs' market definition. Tr at 3840:17-3841:13 (Hausman). The same applies to Johnson & Johnson and Safeway, both considered by plaintiffs as mid-market customers because they bought ERP solutions from vendors that Elzinga and plaintiffs put in the mid-market. But plainly these firms fit plaintiffs' description of enterprises having high functional needs. So, concluded Hausman, plaintiffs have provided no objective way to distinguish ERP licenses in the high function market **[**165]** from those in the mid-market.

Both Hausman and Campbell made the obvious point that if the market is not precisely defined, then the market participants and their relative shares will be "economically inaccurate." Tr at 2702:16-19 (Campbell); 3793:9-11 (Hausman). Referring to plaintiffs' customer witnesses, Hausman asserted that surveys that ask customers what their preferences are or what their hypothetical actions "would be" are known to be unreliable and subjective. Id.

Oracle summarized Hausman's vagueness argument by claiming "there must be a clear break in the chain of substitutes in order for separate markets to be found." Def Post Brief (Doc # 365) at 17. According to Oracle, "[T] here is clearly not a sufficient break in the chain of FMS and HRM substitutes to warrant calling * * * software [sold by] Oracle, PeopleSoft and SAP, a market unto themselves." Id. If such a clear break exists, plaintiffs have not proven it by a preponderance of the evidence, Oracle argued in closing. Id.

Disconnected. Oracle also argued that plaintiffs' product market definition "does not address the market reality" of the way **[*1155]** software is sold, a point to which Hausman testified. **[**166]** Def Post Brief (Doc # 365) at 1. Hausman posited that FMS and HRM are not products in and of themselves. Rather, "90 percent" of companies "are buying more than just FMS, more than just HRM. * * * [they are] buying bundles of software." Tr at 3815:10-12, 3813:12-22 (Hausman).

Hausman gave as an example a consumer purchasing a single package of software from PeopleSoft that included FMS, HRM, EPM and CRM pillars. In such a bundle, PeopleSoft would not offer discounts based on the individual pillars. Rather, PeopleSoft would give a "blended discount" across all products in the bundle in order to ensure that the consumer buys all the pillars from PeopleSoft. Tr at 3814:3-22 (Hausman). If the vendor does not offer an acceptable discount, then the consumer can threaten to buy one of the pillars, such as CRM, from a best of breed vendor such as Siebel. Tr at 3815:1-6 (Hausman). Based upon this analysis, Hausman opined that the presence of best of breed vendors constrains the prices that the ERP vendors can charge for a bundle of software. Tr at 3814:18-22 (Hausman).

Underinclusive. Finally, Oracle's witnesses stated that even if one assumes that a "high function HRM and FMS" market **[**167]** does exist and the market can be demarcated from other solutions, there are viable substitutes for high function ERP that must be included in the product market. Specifically, Oracle argued that (1) mid-market vendors, (2) outsourcing, (3) incumbent systems, and (4) best of breed solutions, discussed above, must all be included in the product market, as all are potential substitutes constraining a post-merger SSNIP.

Incumbent systems, also called legacy systems, refer to the FMS and HRM software systems that the DOJ's "enterprise customers" already have in operation. These are the systems that the new software from Oracle or PeopleSoft or SAP will replace, should a consumer choose to purchase an integrated suite from one of the high function vendors. Oracle argued that if a post-merger Oracle/PeopleSoft imposed a SSNIP, consumers could constrain that SSNIP by simply refusing to buy high function FMS and HRM and choosing to use already existing products. Tr at 3821:1-9 (Hausman). Hausman stated that the cost of maintaining and upgrading incumbent systems has been decreasing recently so that these systems have become a "credible threat" to ERP vendors. Tr at 3821:13 (Hausman). Accordingly, **[**168]** if a customer finds a post-merger price offer too high, it can almost always credibly claim it will not buy the product and instead continue to operate its incumbent system. Tr at 3821:13-14 (Hausman).

Campbell stated that "20 to 30 percent of the time, even after negotiations have started, the purchaser will opt to drop out" and remain with the system it already has. Tr at 2708:23-25 (Campbell). Campbell claimed that this factor must be taken into account when calculating market shares, otherwise "you've made a very serious mistake in calculating your market shares," because 20 to 30 percent of the relevant customers' actual behavior is being ignored. Tr at 2709:1-6 (Campbell).

Regarding outsourcing, Hausman presented evidence of over twenty large enterprises, such as Bank of America and A T & T, who currently outsource all or some of their HRM needs. Tr at 3825:19-25 (Hausman). And this phenomenon was occurring long before Oracle made its take-over offer to PeopleSoft. These large enterprise customers would not be outsourcing if they did not find this option to be equal to or better than the purchase of high function software from a vendor. Tr **[*1156]** at 3828:19-23 (Hausman). If this **[**169]** many corporations can currently have their HRM needs effectively met by outsourcing, it only follows that many more customers could follow suit should a post-merger SSNIP occur in the high function market. Tr at 3829:1-3 (Hausman).

Hausman gave the example of MIT, his employer, outsourcing its HRM to Fidelity, who he claims do "a heck of a lot better" than MIT personnel. Tr at 3825:4 (Hausman). Hausman presented evidence that many companies have chosen outsourcing; these include: Bank of America, Motorola, International Paper, McKesson, American Express and Sony. Tr at 3829:21-23 (Hausman). These are "sophisticated" companies, with a lot of complex transactions, and they have clearly found outsourcing a satisfactory alternative. Id. Hausman's demonstratives alone listed seven outsourcing firms capable of handling the HR for large companies; these include Fidelity, Accenture, ACS, Exult and Mellon, among others. Hausman demo # 10.

Accordingly, both Campbell and Hausman asserted that any product market must include outsourcing solutions as a viable substitute to which consumers can turn in the event that a merged Oracle/PeopleSoft imposes a SSNIP.

Finally, Oracle attempted to show **[**170]** that the products of so-called mid-market vendors, such as Lawson and AMS are reasonably interchangeable for those of the alleged high function vendors, Oracle, PeopleSoft and SAP. Accordingly, Hausman stated that any market definition that is devoid of these vendors is too narrow. Tr at 3939-3940 (Hausman). Hausman presented evidence of over thirty consumers, all of which have large and complex needs, and all of which had chosen to use Lawson or AMS for their FMS and HRM needs. Lawson's customers include: Johnson & Johnson, Walgreens, Target, Williams-Sonoma, Jack in the Box, the Federal Reserve Bank and Safeway. Hausman demo # 11. AMS' customers include: United States Environmental Protection Agency, United States Postal Service, Library of Congress, Internal Revenue Service and the DOJ. Id. Very telling to Hausman was the fact that the DOJ, two weeks after bringing this case, chose to buy AMS FMS for $ 24 million, ranking AMS better than Oracle or PeopleSoft in the DOJ's view for the DOJ's needs. Tr at 3842:7-13 (Hausman).

Hausman admitted that these vendors are "not PeopleSoft," nor do they "aspire to be." Tr at 3839:4-6 (Hausman). He also admitted that these three "cannot currently **[**171]** satisfy the entire market as defined by the DOJ." But "you do not have to beat PeopleSoft to constrain it" argued Hausman. Tr at 3839:20-21 (Hausman). The question is not whether the entire market <u>would</u> switch to these other vendors in the event of a SSNIP, the question is whether enough consumers <u>could</u> potentially turn to a product to meet their needs, thereby making a SSNIP unprofitable. Clearly, if the high function needs of Johnson & Johnson and the DOJ are met by these mid-market vendors, then many other companies could also do so in the wake of a SSNIP. Accordingly, these two mid-market vendors should be included in the product market.

Infrastructure layer. Two of defendant's expert witnesses discussed the infrastructure layer and its impact on the product markets. Tr at 4138-4145 (Kutnik); Tr at 4364-4369, 4397-4398 (Teece). Traditionally, ERP software contained both business logic and applications services. Business logic is the logical structure of the business process being automated. Applications services are tools that support business logic across different business applications. Applications services **[*1157]** include directory services, security features and content **[**172]** management tools. Web services are a type of applications service.

Recent innovations in software technology have led to a "decoupling" of business logic from applications services. These innovations have resulted in the creation of an "infrastructure layer" that standardizes many of the applications services that were once incorporated with the business logic in an EAS program. The infrastructure layer has also been referred to as the "integration layer," the "applications services" layer and the "composite applications" layer. Tr at 325-31 (Bergguist).

Infrastructure layer products and ERP software share some degree of substitutability in that both address integration. Developments in infrastructure layer technology allow greater interoperability and easier horizontal integration. Ex D7143 (Mills 5/27/04 Dep) at Tr 59-61; Tr 2886-89 (Knowles); Tr 4150:9-19 (Kutnick). Similarly, pre-integration in ERP software suites allows greater interoperability and easier horizontal integration. Because one can choose more robust infrastructure layer products instead of pre-integration, the infrastructure layer is a partial substitute for the pre-integration in ERP software suites.

Oracle's **[**173]** experts Kutnick and Teece testified that the emergence of the infrastructure layer constitutes a paradigm shift in ERP software products and affects the proper product market definition.

The following facts suggest that infrastructure layer products should not be included in the same relevant market as ERP software. First, the overlap in substitutability between infrastructure layer products and ERP software is limited. ERP software products perform a large number of functions that are not performed by infrastructure layer products, and vice versa. Accordingly, sellers of infrastructure layer products likely could not constrain market power of a hypothetical monopoly over ERP software.

Second, the integration offered by infrastructure layer products is a poor substitute for pre-integration in ERP software suites. Pre-integration allows tighter integration than the integration offered by infrastructure layer products. Certain functions previously performed within the ERP software layer are now performed in the infrastructure layer. Infrastructure layer products, however, do not contain business logic. Tr at 4144:8-11, 4187 (Kutnik); Tr at 1813-1814 (Wilmington); Tr at 331-332 (Bergquist). **[**174]** Because infrastructure layer products do not contain business logic, a purchaser could not choose a more robust infrastructure layer product instead of ERP software. Accordingly, the decoupling of the infrastructure layer from the ERP software layer does not suggest that the infrastructure layer products are partially substitutable for ERP software.

Oracle's experts Kutnick and Teece contend that the emergence of the infrastructure layer constitutes a paradigm shift in ERP software products. The age of infrastructure layer products calls into question this contention. See D7143 (Mills 5/27/04 Dep) Tr at 30-31 (stating that IBM's middleware products have been in the market for nearly twenty years); Tr at 420 (Kutnik) (testifying that applications servers have been available for seven to eight years); Tr at 3414:2-18 (Wohl) (noting that Oracle's applications server has been through several versions); Tr at 328 (Bergquist) (testifying about the evolution of web services protocols).

Even if the emergence of the infrastructure layer will have a substantial impact on the EAS software industry, more robust infrastructure layer products both enhance and diminish the likelihood of stack competition. **[**175]** **[*1158]** On the one hand, decoupling applications services from the business logic provides the interoperability standard necessary to create multi-seller clustering. See Tr at 4378-4379 (Teece). On the other hand, enhanced infrastructure layer products increase interoperability with other stacks. See Tr at 2885-2889 (Knowles); Tr at 1637:7-22 (Bass); P3337; D7143 (Mills 5/27/04 Dep) Tr 59-61; Tr at 4150:9-19 (Kutnik).

Findings of Fact: Product Market Definition

In order to sustain plaintiffs' product market definition the court must find, by a preponderance of the evidence, that plaintiffs' have shown an articulable and distinct product market for HRM and FMS sold by Oracle, PeopleSoft and SAP only that does not include mid-market software, outsourcing solutions, best of breed solutions, legacy systems or the infrastructure layer.

Based upon a review of the law and the evidence, the court concludes that the plaintiffs have not met their burden of establishing that the relevant product market is limited to so-called high function FMS and HRM sold by Oracle, PeopleSoft and SAP. The equivocal and vague evidence presented by plaintiffs at trial does not permit the court to exclude mid-market **[**176]** vendors, outsourcing or best of breed solutions from any product market that includes ERP software sold by Oracle, PeopleSoft and SAP.

For reasons discussed above, the court cannot rely upon the testimony of the customer witnesses offered by plaintiffs in determining if plaintiffs have met their burden. Likewise, the testimony of all three industry witnesses offered by plaintiffs affords no reliable or articulable basis to distinguish a high function product market. Ironically, much of plaintiffs' testimony supports a finding of no clear or articulable distinction.

Accordingly, the full weight of the plaintiffs' product market burden fell at trial upon Elzinga. In resolving the battle of the expert witnesses on product definition, the court must conclude that Oracle's witnesses presented the better and more convincing case. Elzinga for all his indubitable credentials as an economist seemed mostly to apply the techniques of his avocational interest in mystery writing. See Ex P4014A. The evidence Elzinga marshalled was circumstantial and highly qualitative.

Elzinga's tabulations of concentration statistics from responses to the DOJ CIDs, Elzinga demo ## 10-11, suffer from several **[**177]** shortcomings. Elzinga defined high function ERP as any sale in excess of $ 500,000. As the DAFs establish, ERP vendors sell a cluster of products. Sales exceeding a half-million dollars, therefore, are likely in many instances, if not most, to include pillars other than FMS and HRM. Elzinga's chosen demonstrative, Ex 4015A, will make the point. The sale in question, to Teradyne Corporation, met the $ 500,000 threshold. Ex 4015A at ORLITE0086650. Yet the discount Oracle offered on the HRM pillar license fee was 100 percent, and the bundle included modules in the SCM pillar along with modules in the HRM pillar. Despite this, Elzinga tabulated this entire transaction as an Oracle HRM sale, even though Oracle appeared to give away for free an HRM license in order to sell modules in the SCM pillar. Id at ORLITE0086654. The court has not attempted to retabulate market shares to correct for these problems.

Elzinga's other statistical tabulations are sketchy at best. The tabulation of Oracle customer surveys was a tiny sample of only twenty-eight sales opportunities. Elzinga demo # 7. The roster of Oracle DAFs was also short. Elzinga demo # 3. But even more troubling, as pointed out in **[*1159]** connection **[**178]** with the Teradyne sale, is that these tabulations did not break out FMS and HRM sales from the bundles in which they were sold. Again, the DAFs register prices and discounts on a mixture of different pillars and modules. Metaphorically, Elzinga did not separate the wheat from the chaff.

Not only does the court find Elzinga's data to be unreliable in establishing a distinct and articulable product market, but Elzinga himself admitted that plaintiffs' product market has no "quantitative metric" that could be used to determine the distinction between a high function product and a mid-market product. Tr at 2311:3-17 (Elzinga). Rather, Elzinga kept telling the court that there is "something different" about the products sold by Oracle, SAP and PeopleSoft. But the court cannot delineate product boundaries in multi-billion dollar merger suits based upon the mere notion that there is "something different" about the merging products and all others, especially when that "something different" cannot be expressed in terms to make a judgment of the court have meaning. More is required.

Accordingly, based upon the evidence presented at trial, the court concludes that the following products cannot **[**179]** be excluded from the relevant product market for purposes of analyzing the effects of this merger.

Outsourcing. Professor Hausman presented evidence of over twenty large enterprises that currently outsource all or some of their HRM needs. Furthermore, the testimony of Peters, Bass, Sternklar and Rising all support Hausman's contention that large companies can, and do, have their HRM needs effectively met by outsourcing. Accordingly, outsourcing solutions cannot be excluded.

Plaintiffs argue that because several of the outsourcing firms themselves use Oracle, SAP or PeopleSoft, these outsourcing firms do not count as independent competitors. But the court finds the testimony of Bass and Sternklar regarding "blanket licenses" or "one-to-many" licenses to be the most reliable on how outsourcing works. Most outsourcers that handle HRM needs for large enterprises either have, or soon will have, a type of blanket contract with an ERP vendor. Under these contracts, the software vendors agree to provide software to the outsourcer at a set price up to a certain number of employees, or "seats," usually numbering well into the millions of employees. Fidelity's contract with Oracle provides **[**180]** for a "seat" capacity of 2 million employees, with Fidelity having the option to increase the number of employees at a pre-set fee. Ex D7158. So if Company X chooses to outsource through Fidelity, which may be operating on Oracle software, there is no direct connection between Oracle and Company X. There is no license between Oracle and Company X and no chance for Oracle to take advantage of Company X which has no "post-merger" choice in ERP software. Company X is merely more "seats" in Fidelity's millions of empty seats under its blanket contract.

Moreover, several outsourcing firms currently use their own proprietary software, such as Hewitt and ADP. Fidelity has also begun the process of migrating clients from Oracle software to Fidelity's own software. Tr at 3154:3-15 (Sternklar).

Mid-market vendors. The court is perplexed about plaintiffs' position that "mid-market solutions" are not part of the product market for high function ERP. Plaintiffs claim that mid-market vendors, such as Lawson and AMS could not constrain a post-merger SSNIP. Pls Post Brief (Doc # 366) at 14. Such a statement clearly implies that plaintiffs do not view Lawson and AMS as high function vendors. **[**181]** But Elzinga's high function market share calculations **[*1160]** showed Lawson and AMS each had market shares. See Elzinga demo ## 10-11. Further, Elzinga stated that his calculations probably understated Lawson's market share in the high function market. Lawson and AMS plainly cannot have market shares in the high function market if they are not a part of it. Accordingly, plaintiffs' own evidence shows that either (1) Lawson and AMS are a substitute for high function vendors or (2) no substantive demarcation between these two types of vendors exists. This evidence glaringly shows that plaintiffs have failed to prove a distinct relevant product market for this court to analyze.

As surprising as plaintiffs' evidence and statistics on the mid-market is one of the plaintiff's actual behavior. Plaintiffs characterize vendors that serve the mid-market as "having limited capacity to support customers with diverse operations such as multiple geographic locations, distinct legal entities * * * or numerous lines of business." FAC (Doc # 125) P 12 at 8. But, soon after filing its complaint, the United States Department of Justice itself -- which surely meets at least two of these criteria -- chose **[**182]** AMS, a so-called mid-market vendor, to meet its HRM and FMS needs. The DOJ chose AMS over Oracle and PeopleSoft.

Plaintiffs' statistics, expert witness and behavior all treat mid-market vendors Lawson and AMS as part of the high function market. The court sees no reason why it should not follow suit.

Microsoft. As discussed above the court finds Burgum's testimony regarding Microsoft's entry into the up-market to be incredible. The testimony of Keating, as well as BearingPoint's homepage, make it clear that Microsoft has every intention of using Axapta and BearingPoint to compete for so-called up-market business. Furthermore, Allen's testimony about the struggle of J D Edwards in trying to enter the up-market does not apply to Microsoft. Microsoft has the money, the reputation and now, due to the BearingPoint alliance, it has the sales force necessary to become a major competitor for up-market business. Accordingly, the court finds that Microsoft will be a viable substitute for a significant number of consumers should a post-merger Oracle impose a SSNIP in its pricing of ERP software.

Best of breed solutions. The court does not dismiss defendant's bundle argument as an "elaborate **[**183]** distraction" or "economical nonsense" as plaintiffs urge. Pls Post Brief (Doc # 366) at 21-22. The reality of this industry is that 90 percent of consumers purchase software "bundles" containing several pillars; rarely does a consumer purchase a single pillar. Tr at 3815:10-13 (Hausman). FMS and HRM pillars typically are sold in a bundle along with additional kinds of EAS, such as CRM or SCM. Further, the discounts that are offered to potential consumers are based on the value of the entire bundle, not simply based upon the presence of an HRM or FMS pillar. Tr at 3813:23-3814:1 (Hausman). Accordingly, when Oracle or PeopleSoft offer a discount on a bundle, they are doing so in order to ensure that the customer purchases all the pillars from Oracle or PeopleSoft, rather than turn to a best of breed vendor.

Incumbent solutions. The court, however, is not persuaded that incumbent solutions would be able to constrain a post-merger Oracle from imposing a SSNIP. Companies can, and apparently do, threaten to "do nothing," in hopes of getting a better price on ERP software. See Campbell demo ## 20-21. But it is highly unlikely that any monopolist would see this threat as "credible," thereby **[**184]** preventing a SSNIP. Given the ever-changing conditions of both the regulatory and technological aspects of human resources and financial **[*1161]** management, it is hard to sustain the idea that large corporations would rather employ an antiquated software system than pay 10 percent more for modern and continuously maintained products. Such a choice in today's business world would be extremely risky and unlikely.

Accordingly, without a relevant market having been established, the court cannot conduct a burden-shifting statistical analysis under *Philadelphia Nat'l Bank*, much less hold that plaintiffs are entitled to such a presumption. Nor, of course, can the court apply the concentration methodology of the Guidelines. See Guidelines § 1.51.

Plaintiffs' Proposed Geographic Market

Assuming that high function FMS and HRM is the relevant product market, plaintiffs claimed that the relevant geographic market is the United States. Pls Post Brief (Doc # 366) at 22. Again, plaintiffs relied heavily on Elzinga's testimony. In reaching this market definition, Elzinga ironically enough did not rely upon the oft-used Elzinga-Hogarty (E-H) test, which he admitted has been used in "dozens and dozens **[**185]** of merger cases" and which he himself co-developed. Tr at 2154:22-23 (Elzinga).

In informal terms, the E-H test "measures the accuracy of a market delineation by determining the amount of either imports into or exports from a tentative market. The test is based on the assumption that if an area has significant exports or imports, then that area is not a relevant geographic market. Under the [test], exports or imports greater than 10% suggest that the market examined is not a relevant market." *United States v. Country Lake Foods, Inc., 754 F. Supp. 669, 672 n2 (D Minn 1990)*.

Elzinga stated that he did not believe the E-H test "fit this particular antitrust case." Tr at 2154:25-25 (Elzinga). Instead, Elzinga relied solely upon the Guidelines "hypothetical monopolist" test in determining the geographic market. Tr at 2204:1-11. (Elzinga). See Guidelines § 1.21. "I am persuaded that the United States [is the geographic market because] if someone were the sole supplier of high function FMS and HRM * * * in the US, and [he imposed a SNNIP], he would not be thwarted or undercut by economic * * * agents outside the United States." Id.

Elzinga cited several relevant factors **[**186]** that led him to believe the Guidelines required a United States-only geographic market. Tr at 2203:24-25 (Elzinga).

Where software code is written is not relevant to geographic market. "The [product] market here is high function FMS and HRM, and that is not just code. What you buy when you buy this product * * * is a relationship." Tr at 2154:10-14 (Elzinga) (emphasis added). Plaintiffs urged the court to exclude from the geographic market the site of manufacture. Hence, Elzinga urged the court to look beyond the location of manufacture for FMS and HRM. Since all of SAP's software is manufactured in Germany and SAP indisputably produces high function ERP, inclusion of SAP's site of manufacture would wholly undermine plaintiffs' proposed geographic market.

Rather, Elzinga stated that the relevant factor in determining the geographic market is how the products are "marketed and supported" (i e, the relationship) between the ERP vendor and the consumer. Tr at 2202 (Elzinga). Elzinga argued that purchasing high function FMS and HRM entails installation, implementation, maintenance and upgrades -- a relationship that has an inherently "local" aspect. Tr at 2154:21-25 (Elzinga). **[**187]** Accordingly, since the relevant factor is the marketing and support of the software (which occurs in the United States) and not the "shipment" of the software from the manufacturing **[*1162]** site (which could occur outside the United States), the E-H "shipments" test is not appropriate for this merger analysis. Tr at 2205:11-14 (Elzinga).

Under the Guidelines, because the relevant factor of "relationship" occurs only within the United States for United States customers, these customers could not seek substitutes abroad in the event of a SSNIP, thus making the United States the geographic market, according to Elzinga.

No arbitrage exists in this market. ***HN24***[] Arbitrage occurs when a consumer of a product buys the product from a vendor in one geographic location at a low price, but then sells the product to another consumer in a different geographic location for a higher price. Tr at 2157:15-19 (Elzinga). Arbitrage is a factor that Elzinga stated can "stitch" together two geographic locations into "one geographic market" for merger analysis. Tr at 2157:20-22 (Elzinga). Elzinga illustrated the phenomenon of arbitrage for the court via a precious stone hypothetical. "If the price of diamonds got **[**188]** relatively high in the United States, compared to * * * Europe, * * * arbitragers could buy diamonds where the price is low [Europe] and ship them to where the price is high * * * thereby eliminating the price difference [between] the two parts of the world." Tr at 2157:16-19 (Elzinga).

But, according to Elzinga, arbitrage is not a factor that can "stitch" the United States high function FMS and HRM markets to the same markets in other parts of the world. Tr at 2205:21 (Elzinga). Arbitrage does not exist in the high function FMS and HRM markets for two reasons, he testified. First, the products that consumers buy from Oracle, PeopleSoft or SAP are licensed products; accordingly, the consumers "do not have the legal authority" to resell the software to other consumers. Tr at 2158:6 (Elzinga). Second, high function FMS and HRM is tooled to "work * * * and meet the specific configurations and capabilities [of only one consumer], it won't work [on another consumer's computers]." Tr at 2158:18-21 (Elzinga). Therefore, lack of the "arbitrage factor" reinforced Elzinga's proposition that consumers cannot find substitute products outside of the United States, he testified.

Prices **[**189]** *in the United States are not affected by prices in other parts of the world.* Elzinga posited that United States consumers of high function FMS and HRM cannot expect to be charged the same price that a European consumer is paying. Tr at 2206:7-11 (Elzinga). "The United States is not affected by prices or output of [high function FMS and HRM] outside the United States. And the flip side is also true. Prices charged outside of the United States aren't affected by prices charged inside." Tr at 2206:10-12 (Elzinga).

Oracle's Proposed Geographic Market

Oracle asks the court to reject the plaintiffs' proposed geographic market. Oracle argues that the geographic market in this case is "so clearly [a global market] that reasonable people ought not be debating it." Def Post Brief (Doc # 365) at 22. Further, Oracle noted that this is not the first time the DOJ has tried (unsuccessfully) to claim a United States-only market in the face of overwhelming evidence of a worldwide market. Def Post Brief (Doc # 365) at 23 n19 (citing *United States v. Eastman Kodak, 63 F.3d 95 (2d Cir. 1995))*.

Oracle assailed plaintiffs' severance of SAP into two distinct companies. "The proposed **[**190]** United States-only market is a way of * * * making SAP appear smaller' than it really is and simultaneously making Oracle and PeopleSoft appear bigger' than they really are." Def Post Brief (Doc # 365) at 23. While SAP America is responsible for all sales of SAP software in **[*1163]** the United States and Canada, it sells software that was manufactured in Germany. SAP America has no North American manufacturing sites. Def Fact (Doc # 357) P 100 at 50. Further, all large discount rates offered to United States customers by SAP America must be approved by SAP AG. Tr at 2836:22-24 (Knowles). Accordingly, without SAP AG, SAP America would (1) have nothing to sell and (2) not be able to offer competitive discounts.

Moreover, simply because SAP has a larger market share in Europe does not mean that the geographic market should be limited to the United States. "Shares are not determinative of how you define the [geographic] market" Hausman testified. SAP -- all of SAP -- must be included he stated.

Once SAP is seen as a single entity, defendant claims that there are four different ways of analyzing the geographic market in this case, all of which point to a worldwide market. Tr at 3793:18-19 (Hausman).

[191]** First, Hausman analyzed the geographic market under the "hypothetical monopolist" test from the Guidelines. Tr at 3794:9-10 (Hausman). See Guidelines § 1.21. Even assuming SAP America is distinct from SAP AG, Hausman stated that if a hypothetical monopolist in the United States imposed a SSNIP, SAP AG could "of course hire plenty of salespeople * * * and come in and compete." Tr at 3795:2-6 (Hausman). "[SAP AG's] product would do just fine in the United States." Id. Accordingly, "if [the court] looks at this market from a Merger Guidelines approach, you need to look at this on a worldwide basis." Tr at 3795:1-12 (Hausman).

Second, Hausman analyzed the geographic market under the plaintiffs' description of the "high function needs" of the customers who buy high function software. Tr at 3795:24-25 (Hausman). Hausman described the DOJ's product definition as "multi, multi, multi," referring to the functionality that the DOJ claims high function software possesses. Tr at 3796:1-2 (Hausman). The software must be able to handle multiple currencies, from multiple jurisdictions, while understanding multiple languages. Different currencies and different languages are clearly "international **[**192]** or worldwide features," and therefore "bring a worldwide aspect" to the analysis. Tr at 3798:7-8, 18-20 (Hausman).

Third, Hausman employed the E-H test that was rejected by its own creator. Tr at 3800-3804 (Hausman). Hausman stated that this is a point that both he and Elzinga agree upon: the E-H test would only be satisfied if the geographic market were defined worldwide. Tr at 3801:7-11 (Hausman). Hausman stated that Elzinga's rejection of the E-H test was "inappropriate" for two reasons. First, there are several markets, other than the high function ERP market, where the client buys a "relationship" with the vendor (e g, the purchase of a mainframe computer or server). But, it has never been argued that the computer market is not a worldwide market. Tr at 3802:1-15 (Hausman). "We see [this kind of relationship] in all sorts of high-technology markets. Yet, people agree that those are all world markets." Tr at 3802:13-15 (Hausman). Second, the E-H test has "often" been applied to several cases involving services based upon a relationship with customers, such as hospital merger cases. Tr at 3803:12-20 (Hausman). Accordingly, the E-H test is appropriate for this type of relationship-oriented **[**193]** scenario as well, and all agree that the E-H test mandates a worldwide market.

Finally, Hausman opined that there is empirical evidence showing that prices in Europe constrain prices in the United **[*1164]** States, and vice versa. Tr at 3805 (Hausman). Hausman studied the PeopleSoft DAFs submitted to the DOJ. He found that the average discount rates for PeopleSoft in the United States was 45.2 percent. Tr at 3805:19 (Hausman). In Europe, the average discount was 45.1 percent. Tr at 3805:20 (Hausman). Hausman stated that these discount rates are "virtually identical." Tr at 3805:22. If the competitive conditions in Europe and the United States were wholly independent of each other, one would expect to see completely different discounts in both regions. But these facts demonstrate, in Hausman's view, that the market needs to be analyzed on a global scale. Tr at 3806 (Hausman).

Accordingly, Oracle urged the court to look at concentration figures based upon a global market of all FMS and HRM software. Def Fact (Doc # 357) at 56. Using these product and geographic market definitions, Oracle offered the following global FMS market shares: SAP, 19.2 percent; Oracle, 16.8 percent; and PeopleSoft, **[**194]** 12 percent. Ex P0825 at 21. A merged Oracle/PeopleSoft would, in Oracle's view, possess a 28.8 percent market share in the FMS market.

For global HRM, Oracle offers the following market shares: SAP, 11.9 percent; PeopleSoft, 11.3 percent; and Oracle, 3.04 percent. Ex D5815 at 9. A merged Oracle/PeopleSoft would possess only a 14.3 percent market share in the HRM market.

Findings of Fact: Geographic Market

The court finds that the relevant geographic market ("the area of effective competition") in this case is a worldwide market. *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 327-28, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*.

At the outset, the court must address the plaintiffs' attempt to sever SAP into two companies -- SAP America and SAP AG. The court finds this argument wholly unpersuasive. SAP America, while critical to SAP's success in North America, is not an independent company. This fact was clearly shown by the testimony of Knowles who stated that any large discount (usually above 70 percent) that SAP America offers, clearly in the face of competition, must get that discount approved by SAP AG in Germany. Further, while the source of the code is not determinative **[**195]** of this severance inquiry, it is important to note that all of SAP America's software is manufactured and shipped from SAP AG. So without SAP AG, SAP America would have nothing to sell, and even if it did have its own manufacturing, SAP America would still have to get competitive discount rates approved by SAP AG. To view these two dependent branches of SAP as separate entities would be asking the court to ignore the reality of how the industry presently operates. Accordingly, the court finds that SAP must be viewed as one single entity.

Next the court must decide the geographic boundaries within which the market participants effectively compete. This court (per Judge Chesney) has used the E-H test in defining the relevant geographic market for merger analysis. See *California v. Sutter Health Systems, 84 F. Supp. 2d 1057, 1069 (N.D. Cal. 2000)* ("The analytical process [of defining the geographic market] generally begins with an application of the Elzinga-Hogarty test * * *."). Furthermore, the results of employing the E-H test are undisputed. See Tr at 2155:9-10 (Elzinga) (admitting that the E-H test would dictate the court to view the market as a global market). Elzinga's **[**196]** basis for rejecting the E-H test is unpersuasive. The court, while agreeing that "relationships" are important in ERP sales, does not find that such relationships render the E-H test inapplicable. First, the court can think of a number of sales transactions that involve marketing and negotiation as well as installation and **[*1165]** maintenance "relationships" between seller and vendor: computer sales, copier sales, motor vehicles to name a few. But to argue that these markets, all involving major foreign vendors, are limited to the United States would be untenable.

Second, the E-H test has been used when important vendor-customer relationships are involved. A clear example is Sutter Health, where Judge Chesney used the E-H test in a hospital merger case to determine whether patients seeking medical treatment outside of the Bay area required a geographic market expansion. No one can argue that medical treatment is not a "relationship" between the patient and the doctor. But the E-H test controlled the analysis, not the location of the "relationship" between the doctor and the patient. Further, Judge Chesney is not alone in applying the E-H test to hospital merger cases. See *United States v. Mercy Health Services, 902 F. Supp. 968, 980 (N.D. Iowa 1995).* **[**197]**

Finally, the court cannot allow this "relationship" factor to solely dictate the geographic boundaries for this case, as the court has already found that "non-relationship" solutions (i e, outsourcing) cannot be excluded from the product market.

Accordingly, the court holds that the E-H test is an appropriate method of determining the "area of effective competition" between vendors in this relevant market. *Tampa Electric, 365 U.S. at 327*. Elzinga, creator of the test, admitted that applying the E-H test would mandate a global market. The court therefore finds that the geographic market in this case is global.

Findings of Fact: Market Shares and Concentration

In addition to failing to meet their burden of proving a distinct product market, plaintiffs have failed to prove that the relevant product market in this case is geographically bound to the United States. Accordingly, the market share and concentration statistics presented by Elzinga are wholly inapplicable to the court's analysis. The court is left with a new product market definition which includes, at least: (1) ERP sold by Oracle, SAP, PeopleSoft, Lawson, AMS and Microsoft; (2) outsourcing solutions; **[**198]** and (3) best of breed solutions. Further, this product market must be analyzed as a global one.

Not surprisingly, plaintiffs did not offer any market share data other than those of Elzinga. Oracle, while successfully picking apart plaintiffs' market definition did not provide a definitive alternative of its own. The only statistical data Oracle offered showed the 2002 global HRM shares of Oracle, PeopleSoft and SAP, but did not include HRM data on AMS or Microsoft's share since the BearingPoint alliance. Moreover, Oracle offered even less in the way of FMS shares or concentration.

But it is plaintiffs, not defendant, who carry the burden of proving market shares and concentration in order to invoke the presumptions of the case law or to sustain a showing in accordance with the Guidelines. The court cannot furnish its own statistics.

Without the benefit of presumptions, the burden remains upon plaintiffs to come forward with evidence of actual anticompetitive effects.

Anticompetitive Effects

Plaintiffs' Evidence of Coordinated Effects

Plaintiffs presented no evidence at trial on coordinated effects. This was a wise decision, as proving the probability of such collusion **[**199]** would definitely be an uphill battle for two reasons. First, the products in the relevant market are not homogeneous. Plaintiffs themselves even argue against homogeneity. Pls Post Brief (Doc # 366) at 30 (stating that the products **[*1166]** in the high function HRM and FMS market are "highly differentiated"). Second, there is no price transparency in this market. Prices and discount rates for software are known only to the vendor and the customer, both of whom take great pains to keep such information confidential. Without homogeneity or transparency, the market conditions are not conducive to coordinated effects, either tacit or express. Plaintiffs recognized this unlikelihood. Id at 38 ("The fact that high function software is a differentiated product and that pricing is not transparent make price coordination between Oracle and SAP unlikely.").

But in plaintiffs' post-trial brief they unexpectedly included an entire section arguing that a post-merger Oracle and SAP could tacitly collude in allocating customers or markets. Id at 38-40. Plaintiffs argue that "Oracle is strong in the high technology and telecommunications" area while "SAP dominates the oil and gas industry." Id at 39. Accordingly, **[**200]** Oracle and SAP could reach a tacit understanding based upon "mutual trust and forbearance" and stop competing against each other in those relevant areas. Pls Post Brief at 38 (quoting *Hospital Corp. of Am. 807 F.2d at 1391*). But the court has searched in vain for any testimony or exhibits regarding tacit territorial or market divisions by Oracle and SAP. With no evidence in the record regarding such a speculative coordinated effects argument, the court finds this new theory to be without merit.

Plaintiffs' Evidence of Unilateral Effects

Plaintiffs rest their theory of anticompetitive effects on an attempt to prove that Oracle and PeopleSoft are in a "localized" competition sphere (a "node") within the high function FMS and HRM market. This sphere does not include SAP or any other vendors, and a merger of Oracle and PeopleSoft would, therefore, adversely affect competition in this localized market. Pls Post Brief (Doc # 366) at 31-36; Tr at 2448-2450 (McAfee). Plaintiffs also offered evidence to show that SAP could not reposition itself to replace the localized competition that would allegedly be lost if Oracle and PeopleSoft merge. Pls Post Brief (Doc # 366) at **[**201]** 32-33.

In attempting to prove localized competition between Oracle and PeopleSoft, plaintiffs relied on virtually the same kind of evidence used to prove the product market, including internal corporate documents, SAP executive testimony, customer and consultant firm testimony and expert testimony.

Internal documents. Plaintiffs rely upon several quarterly "win/loss analysis" documents that were compiled by Oracle during 2003 to show that Oracle and PeopleSoft are each other's "closest competitors." Pls Post Brief (Doc # 366) at 31. In Quarter 1 of 2003, plaintiffs offered evidence that Oracle lost to PeopleSoft 37 percent of the time when the two were in competition, while Oracle lost to SAP only 15 percent of the time the two competed. Ex P2090. Plaintiffs then offered evidence from Quarter 3 in which Oracle "explicitly states" that "PeopleSoft is our Number # 1 competitor" and "SAP is our Number # 2 competitor." Ex P2093.

But what plaintiffs failed to mention regarding the Quarter 3 findings is that Oracle lost to PeopleSoft 54 percent of the time, while they lost to SAP 53 percent of the time. Accordingly, what separates the "# 1 competitor" and "# 2 competitor" of Oracle **[**202]** is merely one percent. Ex P2093. Moreover, these roughly equal loss ratios continued into Quarter 4 when Oracle lost to PeopleSoft 59 percent of the time, while losing to SAP 50 percent of the time. Ex P2095. Accordingly, the court can draw no conclusions from the conflicting data within the win/loss reports upon which **[*1167]** plaintiffs focus. In fact, these documents arguably negate a showing of localization between Oracle and PeopleSoft more than they support such a finding.

SAP executive testimony. Plaintiffs attempt to localize PeopleSoft and Oracle by showing that many customers have a negative "perception" of SAP and that SAP is at a "substantial disadvantage" when it comes to competing for customers in the United States (the geographic market that the court has already rejected). Pls Post Brief (Doc # 366) at 31-32. In proving these negative perceptions, plaintiffs pointed to the testimony of SAP America's Knowles. At trial, Knowles agreed that SAP has had to deal with "perceptions" that SAP is "too costly and difficult to implement." Tr at 2950:8-12 (Knowles). Further, plaintiffs cited evidence from consulting firms and Knowles stating that SAP has had "trouble" breaking into **[**203]** certain verticals in the United States. See Ex P3037 (Knowles dep

5/3/04) at Tr 67:21-68:7 (difficulty breaking into services sector); Tr at 1698:1-8 (Bass) (difficulty in entering banking industry).

In deciding the merits of this argument, the court is again perplexed by the inconsistency within plaintiffs' own evidence. In trying to prove Oracle and PeopleSoft are in localized competition, plaintiffs tried to downplay SAP's presence in the United States and characterize SAP has being "disadvantaged" and unable to enter several markets. But plaintiffs' own evidence on market shares negates such a finding. Even assuming the relevant geographic market in this case was the United States, Elzinga's calculations of market shares in so-called high function FMS has SAP ranked highest (above Oracle and PeopleSoft) with a 39 percent market share. Elzinga demo # 10. Moreover, in the HRM high function market, plaintiffs' expert ranked SAP second with a 29 percent market share (beating Oracle). Elzinga demo # 11. SAP is not a "disadvantaged" and "troubled" competitor in the United States. If it were, SAP should not be beating Oracle in both markets and beating PeopleSoft in the FMS market. **[**204]** Accordingly, the court cannot credit plaintiffs' argument that SAP is suffering from negative customer perceptions or is disadvantaged in competing against Oracle and PeopleSoft.

Customer and consulting firm testimony. In furtherance of this localization theory, plaintiffs argued that customer testimony shows that "Oracle and PeopleSoft present better alternatives in the United States than SAP." Pls Post Brief (Doc # 366) at 32. Plaintiffs support this assertion by citing the testimony of five customers who eliminated SAP from the final round of negotiations and instead chose to deal with Oracle and PeopleSoft. Id (citing testimony *of* North Dakota, Neiman Marcus, Greyhound, AIMCO and Cox).

The court finds this evidence unpersuasive for two reasons. First, the court cannot take the self-interested testimony of five companies which chose to eliminate SAP from consideration, and from that sample draw the general conclusion that SAP does not present a competitive alternative to Oracle and PeopleSoft. Drawing generalized conclusions about an extremely heterogeneous customer market based upon testimony from a small sample is not only unreliable, it is nearly impossible. See *Sungard Data Sys., 172 F. Supp. 2d at 182-83*. **[**205]** Second, ***HN25***[] the most persuasive testimony from customers is not what they say in court, but what they do in the market. And as Elzinga's statistics showed, customers are buying SAP FMS more than Oracle and PeopleSoft FMS. Elzinga demo # 10. Customers are buying SAP HRM more than that of Oracle. Elzinga demo # 11.

[*1168] Plaintiffs rely upon two of the Big Five consulting firms' testimony stating "they believe SAP is often the third choice of many US customers." Pls Post Brief (Doc # 366) at 32. According to BearingPoint's Keating, SAP has long been the least flexible of the three vendors in the way it has sold its HRM and FMS software. Tr at 901:6-20, 946:18-20 (Keating). Also, Accenture's Bass testified that SAP was "less likely to discount than Oracle and PeopleSoft." Pls Post Brief (Doc # 366) at 32; P3198 (Bass Dep) at Tr 132:08-133:07. But the plaintiffs' own evidence discounts this argument. While it may be true that SAP has been the least flexible and least likely to discount, the evidence introduced by Elzinga shows that customers apparently are not deterred by SAP's inflexibility or higher pricing. Customers still buy SAP software over Oracle and PeopleSoft. See Elzinga demo ## 10-11.

[206]** Taken as a whole, the customer and consulting firm testimony falls short of proving that Oracle and PeopleSoft engage in competition to which SAP is simply not a party. Moreover, both PeopleSoft industry witnesses conceded there is no vertical in which SAP is not competitive with Oracle and PeopleSoft. Tr at 388:1-11 (Bergquist); 1957:10-21 (Wilmington).

Expert testimony. Finally, plaintiffs offered the testimony of Professor McAfee to show that PeopleSoft and Oracle are engaged in localized competition to which SAP is not a party. McAfee conducted three independent analyses to reach his conclusions. Pls Post Brief (Doc # 366) at 34.

First, McAfee examined, in detail, twenty-five of Oracle's DAFs in which Oracle salespersons had listed PeopleSoft as their justification for seeking a higher discount. Second, McAfee, using charts of discount trends provided by Oracle, ran a regression analysis to assess the effect of PeopleSoft's presence on Oracle's discount levels. Third, using the market statistics calculated by Elzinga, McAfee conducted a "merger simulation" to assess the theoretical effects of an Oracle/PeopleSoft merger. Tr at 2447-2449 (McAfee). Based upon these three independent **[**207]** studies, McAfee concluded that in many instances PeopleSoft and Oracle are each other's closest competitor and a merger between the two would cause significant anticompetitive effects. Tr at 2466:8-13, 2449:22-24 (McAfee).

Twenty-five case studies. At trial, McAfee showed the court several DAFs in which the presence of PeopleSoft had justified an Oracle salesperson seeking a steep discount. McAfee then picked out explicit language from the justification column to prove that when Oracle and PeopleSoft compete, they do so vigorously. For example, when seeking a discount on the Hallmark account, a salesperson's justification for a discount was an "EXTREMELY competitive situation against" PeopleSoft. Because of this competition, a "higher discount was warranted." Tr at 2464:15-21 (McAfee). Likewise, in trying to win the Greyhound account Oracle wanted to cause a "third straight loss" for PeopleSoft and "only aggressive proposals" would win Greyhound over. Tr at 2466:14-20 (McAfee).

These two examples are representative of the many that McAfee showed the court -- clear examples of how vigorously PeopleSoft and Oracle compete when they go "head to head" against each other, he asserted. **[**208]** McAfee concluded that such head to head competition between Oracle and PeopleSoft would be lost if this merger were consummated. Tr at 2488:13-25 (McAfee).

Regressions. Next, in trying to show localized competition, McAfee used a regression technique to calculate what effect, **[*1169]** if any, the presence of PeopleSoft or another competitor has on the discounts offered by Oracle. Tr at 2495:22-25 (McAfee). McAfee ran two regression analyses. In the first, McAfee was privy to sales representative surveys identifying the discount percentages given to Oracle customers that had purchased the E-Business Suite. The surveys also identified the competitor that Oracle had beaten to get the account. Tr at 2497:10-14 (McAfee). McAfee narrowed the sample to all sales that were over $ 500,000, in order to equate the sample with Elzinga's market definition. McAfee used these variables (competitor, net revenue, discount percentage) and ran the regressions. Tr at 2498:3-20 (McAfee). The data led McAfee to conclude that "PeopleSoft has a .097 (9.7 percent) effect" on the discount Oracle offers. Tr at 2499:22-25 (McAfee). In other words, when Oracle competes against PeopleSoft for the sale of Oracle's E-Business **[**209]** Suite, the consumer obtains a 9.7 percent greater discount than when Oracle competes against no one in selling the suite.

Wanting to look at more than just the sale of the E-Business suite, McAfee then analyzed all of the DAFs that Elzinga had used in defining the product market and matched those with the data from the sales representative forms to create a larger sample with more variables. Tr at 2504:22-25 (McAfee). The DAFs listed the percentage requested along with the competitor justifying such a discount. Once McAfee ran this second regression, he concluded that PeopleSoft had a .136 effect on Oracle's discount rates (i e, 13.6 percent greater discount). Tr at 2507:6-11 (McAfee). Accordingly, McAfee concluded that when PeopleSoft is competing against Oracle, Oracle's discounts are 9 to 14 percentage points greater. Tr at 2508 (McAfee).

Based upon these DAF studies and regression analyses, it is safe for the court to conclude that Oracle and PeopleSoft do compete frequently for ERP customers and when they do compete, that competition can be vigorous. But these two contentions are not disputed by anyone in the case. Oracle concedes that PeopleSoft is a frequent rival. Def Post **[**210]** Brief (Doc # 365) at 34. The court fails to understand what this undisputed fact is supposed to show about whether Oracle and PeopleSoft are competing head to head in a product space in which SAP is not a party. McAfee himself stated that from these twenty-five DAFs, he drew the "broad conclusion that in many instances PeopleSoft and Oracle are each others' closest competitors." Tr at 2466:10-12 (McAfee). But these DAFs tell the court nothing about how often SAP competes against PeopleSoft or Oracle (a key factual issue if trying to exclude SAP) or whether that competition is equally fierce. What would have been more helpful to the court would have been the DAFs of PeopleSoft and SAP as well. Defendants introduced several SAP DAFs during trial, one showing a very aggressive competition against Oracle, so it is clear that such forms exist. Ex D5649R A more complete DAF record would perhaps have evidenced localized competition between Oracle and PeopleSoft. But plaintiffs did not provide such DAFs to McAfee, nor is it clear whether they even sought to obtain such documents during discovery.

Simply because Oracle and PeopleSoft often meet on the battlefield and fight aggressively does **[**211]** not lead to the conclusion that they do so in the absence of SAP.

Merger simulation. Finally, McAfee conducted a merger simulation analysis. There are several merger simulation models that can be used depending on the characteristics of the industry. Tr at 2511:12-19 (McAfee). McAfee chose the "English auction" model (also called the **[*1170]** oral ascending auction) because one of the features of this model is its allowance of multiple bidders and multiple rounds of bidding. Tr at 2511:19-22 (McAfee). The simulation works by putting in necessary variables and assumptions, such as market shares and percentage of wins in head to head competition. Once these variables were accounted for, McAfee still had to set a variable for "how competitive the market [was] pre-merger." Tr at 2526:17-22 (McAfee). One way of creating such a measurement is by estimating the "total value of the product that accrues to the buyer" (i e, how "much of the value of the software to the buyer actually accrues to the buyer and how much accrues to the vendors in the form of price"). Tr at 2517:1-4 (McAfee). McAfee ran the simulation based upon five different "buyer accrual" estimates: .5 (only 50 percent accrual) **[**212]** to .9 (90 percent accrual). McAfee used the market shares calculated by Elzinga as his market shares variable. Once all the data are compiled and the variables accounted for, the merger is simulated by merging the shares of the two merging firms. Once this is done, data can be calculated showing how much the price of the relevant product is expected to increase. McAfee asserted that in the high function FMS market, after the Oracle/PeopleSoft merger, he expects price to increase anywhere from 5 percent (.50 accrual variable) to 11 percent (.90 accrual variable). In the high function HRM market, McAfee concluded that the price would increase by 13 percent (.50 accrual variable) to 30 percent (.90 accrual variable). Ex P4024.

McAfee asserted that this merger simulation, using Elzinga's market share statistics, shows that a merger between Oracle and PeopleSoft will lead to a unilateral price increase in both markets.

But the court has already found that Elzinga's market share statistics are not a reliable indicator of Oracle, SAP and PeopleSoft's positions in the ERP market. Accordingly, because this merger simulation is based upon these unreliable data, the court concludes that the **[**213]** simulation results are likewise unreliable.

Oracle's Competitive Effects Rebuttal

Oracle takes issue with all of the plaintiffs' evidence regarding the likelihood of anticompetitive unilateral effects.

First, Oracle claims that the present case is not the type of case for which the doctrine of unilateral effects was created. Oracle offered Campbell's expert testimony that a fundamental assumption of the unilateral effects theory is not present in this case. Tr at 2721:3-5 (Campbell). Campbell testified that the "unilateral effects doctrine is posited on the notion of a localized market powered by a seller and a group of purchasers located in product space or geographic space around that particular seller." Tr at 2721:5-9 (Campbell). This "product space" is defined by characteristics of the product or products within the space. Campbell offered a homey example of product space using breakfast cereal. Tr at 2721:15-18 (Campbell). A number of customers have characteristic preferences for their breakfast cereal that could create a product space within the entire breakfast cereal market. For example, some customers prefer cereal to be crunchy, sugar-free and high in fiber. These **[**214]** characteristics of the product will narrow the entire market down to a "space" in which only crunchy, sugarless, high fiber cereals occupy the space and only those companies that produce such cereal are competitors. Campbell called this space a "node," with the buyers being centered around this node. The unilateral effects theory is concerned about there being only one vendor operating inside the node, thereby being able to increase the price unilaterally. Tr at **[*1171]** 2721:19-23 (Campbell). Plaintiffs attempted to carve out a "node" for high function FMS and HRM software in the United States in which only Oracle and PeopleSoft compete. Accordingly, if a merger takes place, there will be only one vendor in this node with the ability unilaterally to reduce output and raise price within the node.

Campbell asserted that the unilateral effects theory is predicated on the fundamental assumption that the consumers in the node have no "buyer power." He testified that the theory assumes that customers are unsophisticated buyers who will not be able to rebuff a price increase. Tr at 2721:23 (Campbell). This fundamental assumption does not hold in the case of the products in suit. Campbell asserted **[**215]** that the buyers of high function FMS and HRM are extremely sophisticated and knowledgeable and engage in extensive and intensive one-on-one negotiations with vendors. These customers clearly have a lot of power during these negotiations, Campbell claimed, and they are aware of this power. Tr at 2722:1-4 (Campbell). Campbell gave examples of high function consumers such as Emerson Electric and Daimler whose representatives testified that their companies have "leverage" and "power over people they deal with," and use their "size" and "the size of the deal" to gain better deals on software. Campbell demo # 25 (citing Tr at 1287:22-1288:2 (Peters); Tr at 1407:20-1408:1 (Gorriz)). Campbell concluded that the unilateral effects theory is "dogma developed for a totally different context" from the present case. Tr at 2728:6-7 (Campbell).

Even assuming arguendo that a unilateral effects theory is appropriate for this case, Oracle attacks each piece of evidence that plaintiffs put forward attempting to prove localization between Oracle and PeopleSoft.

Oracle objected to plaintiffs' characterization of SAP as a struggling firm with a substantial disadvantage which prevents it from being in **[**216]** a localized space with Oracle and PeopleSoft. Def Post Brief (Doc # 365) at 33. Oracle claims that these SAP "struggling" assertions are "not remotely true" and are belied by the fact that SAP has over 22,000 professional service customers. Id. While Oracle admits that SAP does not "dominate" the United States in the manner that it may "dominate elsewhere," non-domination does not equate with "struggling." Id.

Finally, Oracle takes aim at McAfee's expert testimony on anticompetitive effects. First, Oracle claims that McAfee's "case studies" based upon the Oracle DAFs do nothing more than "show Oracle and PeopleSoft are frequent rivals." Id at 34. This evidence reveals nothing about localization between Oracle and PeopleSoft in a product space in which SAP is not encompassed. McAfee offered no insights regarding the characteristics of high function FMS and HRM that create the alleged product space between Oracle and PeopleSoft. Further, these case studies are devoid of any information about whether head to head competition between Oracle and SAP, or PeopleSoft and SAP, is equally vigorous.

With regards to McAfee's regression analysis, Oracle argued the analysis was flawed from the **[**217]** outset. The data upon which McAfee based his regression were "not based on any set of data identifying * * * high function HRM and FMS software, but only on data involving broader suites of EAS." Id at 36. Accordingly, it is impossible to know if these alleged increased discount rates were the product of high function FMS and HRM, other ERP pillars or the bundling of all. Without this crucial information, the regression analysis shows nothing in regards to localization **[*1172]** between Oracle and PeopleSoft in a high function FMS and HRM product space. Id at 37.

Furthermore, Oracle assails McAfee's merger simulation as "simplistic" and "spurious." Id. Oracle cites two major flaws in the merger simulation. First, the "auction" model is wholly inappropriate for the present market because (1) the customers in this market are extremely powerful at bargaining and (2) vendors of ERP do not simply "bid" for business; rather these negotiations are extensive and prolonged, with the purchaser having complete control over information disclosure. Id. Second, the "market shares -- the only input having any connection to real-world data -- were those produced by Elzinga using the plaintiffs' market definition. **[**218]** " Id at 38. Because Oracle wholly rejects plaintiffs' "gerrymandered" market definition, market statistics based upon this definition are equally flawed. Accordingly, the merger simulation's prediction of price increases after the merger are inaccurate and unreliable, based as it is on an inappropriate model using inaccurate data.

Finally, and perhaps most importantly, Oracle contends that plaintiffs have offered no "econometric calculations in trying to prove localization." Id at 31. Oracle argues that proving localization requires "extensive econometric analysis," such as diversion ratios, price-cost margins and the like, of which plaintiffs have offered none. When Oracle cross-examined plaintiffs' expert witnesses, both admitted that they "did not even attempt to calculate diversion ratios, or cross-elasticities, or any other economically meaningful measurement of whether the products of Oracle and PeopleSoft are uniquely close substitutes for each other." Id. See Tr at 2293:23-25 (Elzinga); Tr at 2599:3-8 (McAfee).

Findings of Fact: Unilateral Effects

The court finds that the plaintiffs have wholly failed to prove the fundamental aspect of a unilateral effects case -- they **[**219]** have failed to show a "node" or an area of localized competition between Oracle and PeopleSoft. In other words, plaintiffs have failed to prove that there are a significant number of customers (the "node") who regard

Oracle and PeopleSoft as their first and second choices. If plaintiffs had made such a showing, then the court could analyze the potential for exercise of monopoly power over this "node" by a post-merger Oracle or the ability of SAP or Lawson to reposition itself within the node in order to constrain such an exercise of monopoly power.

Plaintiffs' attempt to show localized competition based upon customer and expert testimony was flawed and unreliable. Moreover, plaintiffs' evidence was devoid of any thorough econometric analysis such as diversion ratios showing recapture effects. Both the Kraft Gen Foods and Swedish Match courts, the only other courts explicitly to address unilateral effects, based their rulings in part upon econometric evidence submitted by the parties. *Kraft Gen. Foods, 926 F. Supp. at 356* (relying on econometric evidence of the cross-price elasticity of demand between Post cereal brands and Nabisco brands); *Swedish Match, 131 F. Supp. 2d at 169* **[**220]** (relying upon the diversion ratio between two brands of loose leaf tobacco).

Plaintiffs claim they were unable to present the court with such econometric data because "this [the high function HRM and FMS market] is a market that's shot through with price discrimination," and therefore such data would be unreliable. Tr at 2291:15-16 (Elzinga). But the court finds plaintiffs' price discrimination argument unpersuasive. First, "this" market which Elzinga claims is plagued by price discrimination, is the so-called high function FMS and HRM market that the court has already rejected as being the relevant **[*1173]** product market in which to examine the effects of the proposed merger. Second, assuming that the high function FMS and HRM market were the relevant market, which it clearly is not, plaintiffs only evidence regarding price discrimination came from Elzinga's analysis of the Oracle DAFs. Elzinga stated that there was a wide range of discounts offered by Oracle to these 222 customers. Tr at 2222:13-19 (Elzinga). Elzinga stated that because Oracle charged different discounts to these customers, Oracle must be able to determine what price it can charge a customer before the customer eliminates **[**221]** Oracle as a potential vendor (i e, Oracle price discriminates). And since Oracle price discriminates, then SAP and PeopleSoft must price discriminate as well.

But Elzinga admitted he conducted no formal studies of price discrimination in "this" market. Tr at 2343:14-20 (Elzinga). Nor did he examine the discounts given by PeopleSoft or SAP to their respective customers. Tr at 2351:10-14 (Elzinga). Elzinga's assertion that this market is "shot through" with price discrimination because "somehow" Oracle was able to determine what level of discount it could offer to different customers uncannily resembles his argument that there is "something different" about Oracle, PeopleSoft and SAP. Again, the court refuses to sustain plaintiffs' inarticulable contentions.

In sum, the court finds that plaintiffs have failed to show an area of localized competition between Oracle and PeopleSoft.

Oracle's *Efficiency Defense*

Oracle offers an efficiency defense to rebut plaintiffs' claim of anticompetitive effects. Def Post Brief (Doc # 365) at 39-40. Oracle claims that the merger will result in two overall efficiencies: (1) significant cost-savings for Oracle in many areas of business, and (2) **[**222]** an increase in Oracle's scale (i e, customer base), thereby fueling more competition with SAP, Siebel and Microsoft resulting in higher innovation and lower costs. Def Fact (Doc # 357) PP 234-237 at 113, PP 247-251 at 118-21.

Oracle's cost-savings evidence came from a spreadsheet originally compiled in May 2003 when Oracle wanted to acquire J D Edwards. The spreadsheet was revamped in June 2003 when Oracle sought to acquire PeopleSoft. It was finalized in July 2003 when Oracle looked at acquiring both. Tr at 3469:5-12, 3470:19-20 (Catz); Ex D7132. (Acquisition Efficiencies Analysis) (AEA). The AEA lists, as of July 2003, PeopleSoft's total costs for the areas of sales and marketing (S & M), research and development (R & D) and general and administrative (G & A). Id. For 2003, PeopleSoft's total cost of S & M was $ 769.3 million, R & D was $ 466.9 million and G & A costs were $ 214 million. Id. The AEA projects that one year after Oracle has acquired PeopleSoft, the cost of S & M will decrease to $ 34 million ($ 735.3 million in savings), R & D will decrease to $ 201.3 million ($ 265.6 million in savings) and G & A will decrease to $ 37.4 million ($ 176.6 million in savings). Id. Accordingly, **[**223]** Oracle argues that post merger, it will achieve cost-savings of over $ 1 billion. Def Fact (Doc # 357) P 234 at 113. Moreover, the cost savings are annual. So Oracle would save $ 1 billion in 2005, $ 1 billion in 2006, and so forth. Tr at 3493:2-5 (Catz).

Catz further testified to the efficiencies that would result if Oracle's scale were expanded to include PeopleSoft's customers. Tr at 3438-3439 (Catz). Catz stated that one of the main reasons, aside from cost savings, that led Oracle to make a tender offer for PeopleSoft was the potential acquisition of PeopleSoft's "customer base." Tr at 3438:20 (Catz). The scale of a company is a source of annuity revenue, revenue which allows a company to invest **[*1174]** more in research and development of its products. Id. By acquiring PeopleSoft, Oracle would capture the extra revenue of PeopleSoft's customer base as well as the potential for revenue from sales of add-on products. Tr at 3439:6-12 (Catz). This additional revenue and customer base would allow Oracle to expand its R & D, thereby fueling more innovation of Oracle software. Specifically, Catz testified about a new "superset product line" that would have the "best features from Oracle" and **[**224]** the "best features and modules from PeopleSoft." Tr at 3451:2-7 (Catz).

Further, the larger customer base and increased innovation would allow Oracle to compete with larger competitors, such as Microsoft, and compete better in other ERP markets, such as SCM and CMS. Tr at 3440:3-7 (Catz); Def Fact (Doc # 357) P 251. Reduced costs, increased innovation and more competition are efficiencies Oracle claims outweigh, and thus rebut, any showing of anticompetitive effects plaintiffs have put forward.

Plaintiffs' Efficiency Rebuttal

Plaintiffs rebutted the efficiency defense by calling Professor Zmijewski, a professor of business from the University of Chicago. Zmijweski was asked to verify the arithmetic in the AEA spreadsheet that Oracle claims explicate its large cost-saving efficiencies. To verify the spreadsheet, Zmijewski was required to "tease out" all of the inputs (i e, the pre-merger costs and the post-merger costs of all departments) that had been plugged in by Oracle, verify that those inputs were true (based in fact) and then recalculate the numbers to verify that the final efficiency amounts were the same as the amounts represented on the AEA. Tr at 4509:16, 4517-4518 (Zmijewski).

[225]** Zmijewski teased out the inputs successfully then began looking at information provided by Oracle and the SEC for some "factual foundation" for these inputs and post-merger assumptions Oracle had used in calculating the AEA. Tr at 4520:5 (Zmijewski). But Zmijewski hit a "dead end" every time he tried to find some factual basis for any of the inputs in the spreadsheet. Id. A four month search through the documents left Zmijewski with "essentially none" of the information he needed to verify the AEA inputs. Tr at 4520:11 (Zmijewski). Zmijewski's uneasiness about his fruitless search was relieved when he found that there was no factual basis for the inputs. Catz had "used her personal judgment" based upon consultation with Larry Ellison and others in determining the inputs that went into the AEA. Tr at 4520:14-23 (Zmijewski); 3558:1-8 (Catz). Further, there were no documents that could explain how Catz and others had reached these personal judgments on the inputs. Tr at 3558:21 (Catz). This led Zmijewski to conclude that the AEA is "not verifiable" and therefore not reliable under the verification standards used by many professionals, including the SEC. Tr at 4519:24, 4516:5-12 (Zmijewski). **[**226]** Plaintiffs claim that cost-saving efficiencies require defendant to "'explain the methods used to calculate'" the cost-saving numbers. Pls Post Brief (Doc # 366) at 47 (quoting *Staples, 970 F. Supp. at 1089*). According to plaintiffs, Oracle has provided no explanation of the methods used to calculate the AEA other than the judgment of Catz and her colleagues.

Finally, plaintiffs urge the court to put no stock in Oracle's innovation claims, as they are unverified and not merger-specific. Pls Post Brief (Doc # 366) at 49-50. When Catz was cross-examined about the superset product line, the innovative hybrid of Oracle and PeopleSoft, she did not have any documents discussing this proposed innovation, nor did she know any details about when the product would be available. Pls Post Brief (Doc # 366) at 50; Tr at 3533:8-16 (Catz). Plaintiffs **[*1175]** claim this "vague" assertion of a superset product line is not a cognizable innovation claim under case law or the Guidelines. Pls Post Brief (Doc # 365) at 49 (citing *Heinz, 246 F.3d at 723* (requiring "reliable and significant evidence that the merger will permit innovation that otherwise could not be accomplished * **[**227]** * * ."))

Findings of Fact: Efficiencies

HN26[] In order for a claimed efficiency to be "cognizable," it must be "substantiate[d]" and "verfi[able]." Guidelines § 4.0. The court finds Oracle's evidence on the claimed cost-savings efficiency to be flawed and unverifiable. Catz and Ellison's personal estimations regarding the potential cost-savings to Oracle are much too speculative to be afforded credibility. Oracle's efficiency defense based upon future innovations (e g, the superset product) was not verified by internal documents. Oracle presented no evidence regarding the functionality or characteristics the innovative product will contain, nor any evidence regarding its date of availability.

Accordingly, both claimed efficiencies are much too vague and unreliable to rebut a showing of anticompetitive effects.

Conclusions Of Law

This court has jurisdiction over this action pursuant to *28 U.S.C. §§ 1331*, *1337(a)* and *1345* and Section 15 of the Clayton Act, *15 U.S.C. § 25*. Venue is proper in this district pursuant to *15 U.S.C. § 22* and *28 U.S.C. § 1391(c)*.

In order to succeed on their claim, plaintiffs **[**228]** must prove by a preponderance of the evidence (1) the relevant product and geographic market, and within this market (2) the effect of Oracle's acquisition of PeopleSoft may be substantially to diminish competition. See *Penn-Olin, 378 U.S. at 171*.

Plaintiffs alleged a product market limited to HRM and FMS software licensed by Oracle, PeopleSoft and SAP. Plaintiffs also alleged a geographic market limited to the United States.

Plaintiffs have proven that the relevant product market does not include incumbent systems or the integration layer. But plaintiffs failed to prove that outsourcing solutions, best of breed solutions and so-called mid-market vendors should be excluded from the relevant product market. Furthermore, plaintiffs have failed to establish that the area of effective competition is limited to the United States. Accordingly, plaintiffs have failed to meet their burden of proving the relevant market for *section 7* analysis.

Because plaintiffs have failed to meet this predicative burden, plaintiffs are not entitled to a presumption of illegality under *Philadelphia Nat'l Bank* or the Guidelines.

Plaintiffs have failed to prove the likelihood that a post-merger **[**229]** Oracle and SAP would tacitly coordinate by allocating customers or markets. Accordingly, the plaintiffs have not met their burden of establishing anticompetitive coordinated effects.

Plaintiffs have failed to prove an area of localized competition between Oracle and PeopleSoft in which a post-merger Oracle could profitably impose a SSNIP. Accordingly, plaintiffs have not met their burden of establishing the likelihood of anticompetitive unilateral effects.

Notwithstanding that plaintiffs have failed to carry their burden to be entitled to relief, Oracle has not proved by a preponderance of the evidence cognizable efficiencies sufficient to rebut any anticompetitive effects of Oracle's acquisition of PeopleSoft.

Because plaintiffs have not shown by a preponderance of the evidence that the merger of Oracle and PeopleSoft is likely substantially to lessen competition in a **[*1176]** relevant product and geographic market in violation of *15 USC § 7*, the court directs the entry of judgment against plaintiffs and in favor of defendant Oracle Corporation.

This order is stayed 10 days to permit plaintiffs to apply for appellate remedies.

IT IS SO ORDERED.

VAUGHN R WALKER

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] Per Se Rule & Rule of Reason, Per Se Violations

Where a state statute restricts competition, the question whether the statute is preempted by the Sherman Act is determined by a two-step analysis: The plaintiff must first show that the scheme of market control created by the statute would constitute a per se violation of the Sherman Act if brought about by an agreement among private parties. Even if a per se violation is shown, the alleged anticompetitive scheme may still be immunized under the Parker state action doctrine if: (i) the restraint in question is clearly articulated and affirmatively expressed as state policy and (ii) the policy is actively supervised by the state itself.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN2[] Injunctions, Preliminary & Temporary Injunctions

Generally, preliminary injunctive relief is appropriate when a plaintiff establishes (1) the likelihood of irreparable injury in the absence of such an injunction, and (2) either (a) likelihood of success on the merits or (b) sufficiently serious questions going to the merits to make them a fair ground for litigation plus a balance of hardships tipping decidedly in plaintiff's favor. In several circumstances, however, a heightened standard must be satisfied.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Likelihood of Success

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN3[] Grounds for Injunctions, Likelihood of Success

Regarding preliminary injunctions, one of the circumstances where a heightened standard applies is where (i) an injunction will alter, rather than maintain, the status quo, or (ii) an injunction will provide the movant with substantially all the relief sought and that relief cannot be undone even if the defendant prevails at a trial on the merits. An injunction in such a case is considered "mandatory" because it is said to alter the status quo by commanding some positive act. In such a situation, plaintiffs must show a greater likelihood of success and make a clear showing that the moving party is entitled to the relief requested, or that extreme or very serious damage will result from a denial of preliminary relief.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN4[] Injunctions, Preliminary & Temporary Injunctions

Regarding preliminary injunctions, one of the circumstances where a heightened standard is appropriate is where the moving party seeks to stay governmental action taken in the public interest pursuant to a statutory or regulatory scheme. In such a situation, the moving party must establish a probability of success on the merits. Accordingly, plaintiffs may not obtain an injunction by showing a reasonable question on the merits plus a balance of hardships tipping in their favor. Plaintiffs must instead satisfy the stricter preliminary injunction standard, by demonstrating both a clear showing of irreparable injury in the absence of such an injunction, and a greater likelihood of success on the merits.

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN5[] **Remedies, Damages**

15 U.S.C.S. § 26 eases the requirement of standing for suit under the antitrust laws, allowing suit for threatened rather than actual harm. It does not affect the standard for granting a preliminary injunction. Indeed, the text of the statute provides that an injunction can be obtained under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN6[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

"The essential inquiry" of both the per se rule and the rule of reason remains the same--whether or not the challenged restraint enhances competition. Stating that there is often no bright line separating per se rules from Rule of Reason analysis," the U.S. Supreme Court has instructed that because under both tests the criterion to be used in judging the validity of a restraint on trade is its impact on competition, the per se rule, despite its name, may require considerable inquiry into market conditions before the evidence justifies a presumption of anticompetitive conduct.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The per se rule should be carefully limited to "naked" restraints, which are restraints that lack redeeming social benefits. Accordingly, when legitimate objectives are served, conduct constituting price fixing in the lay sense is not defined as the "price fixing" that is per se unlawful.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

There is no bright line between the per se rule and the rule of reason. The proper analysis should be thought of as a spectrum, rather than a dichotomy: There is generally no categorical line to be drawn between restraints that give rise to an intuitively obvious inference of anticompetitive effect and those that call for more detailed treatment. What is required, rather, is an enquiry meet for the case, with justifications for the restriction to be taken into account. The object is to see whether the experience of the market has been so clear, or necessarily will be, that a confident conclusion about the principal tendency of a restriction will follow.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Federal Common Law > General Overview

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

For a statute to be preempted, the conduct contemplated by the statute must be in all cases a per se violation of the federal antitrust laws.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN10[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

For a state statute to be considered a per se antitrust violation, it must mandate or authorize conduct that necessarily constitutes a violation of the antitrust laws in all cases, or place irresistible pressure on a private party to violate the antitrust laws: A state statute, when considered in the abstract, may be condemned under the antitrust laws only if it mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Such condemnation will follow under § 1 of the Sherman Act when the conduct contemplated by the statute is in all cases a per se violation. If the activity addressed by the statute does not fall into that category, and therefore must be analyzed under the rule of reason, the statute cannot be condemned in the abstract. Analysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute is facially inconsistent with federal antitrust laws.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN11[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Horizontal price fixing, output limitations, and market division are classic characteristics of a cartel. A cartel is defined as a combination of producers or sellers that join together to control a product's production or price. Competing firms form a cartel when they replace independent decisions with an agreement on price, output, or related matters. A cartel is strongest when it controls a large market share or when it is supported by market-based or external enforcement mechanisms. But even an ineffective cartel may be invalid: The cartel need not attain the profit-maximizing price or output to be profitable and socially harmful; indeed, even relatively poorly functioning cartels can be quite profitable. As a result, while many horizontal arrangements are beneficial and lawful, they generally receive the highest level of antitrust scrutiny. Thus, if the offensive elements of a cartel are present, the cartel is likely to be held illegal per se under the Sherman Act, even if the cartel is less effective than its participants would like.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN12[] **Per Se Rule & Rule of Reason, Per Se Violations**

Horizontal agreements among competing sellers to fix prices or restrict output are, absent more, per se violations of § 1 of the Sherman Act.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN13[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The trend in favor of recognizing competing policies in the antitrust arena should apply where the considerable public health policies regarding cigarettes militate in favor of decreased consumption, particularly by young people, even if higher prices cause that end to be served, and even if higher prices are often considered antithetical to the goals served by ***antitrust law***. Classic antitrust analysis must take into consideration the right of states to seek to further other, and equally important, social goals, even at the expense of pure antitrust analysis. It would thus seem that the court should choose the first strand of per se analysis; in determining whether an antitrust violation has occurred, the court should consider not only whether prices have risen and output has been restricted, but also the state's justifications for the statutes that have allegedly caused the rising prices and output restraints.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN14[] **Regulated Practices, Price Fixing & Restraints of Trade**

A price fixing agreement is no less unlawful if the parties to it fail to carry it out effectively.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN15[] **Regulated Practices, Price Fixing & Restraints of Trade**

In searching for irreparable harm, the existence of a cartel is irrelevant; the question instead is what ongoing damages plaintiffs have suffered and are likely to suffer because of the alleged cartel. Further, damages which can be remedied at the close of trial are definitionally not irreparable. Thus, a loss of earnings on account of the cartel may not necessarily be irreparable, because if plaintiffs prevail at trial, they may recover their losses from the manufacturing defendants, plus interest. A loss of market share, however, is difficult to quantify and represents the loss of an opportunity which may not be quickly or easily regained, and thus may be considered irreparable.

Counsel: **[**1]** For Freedom Holdings, Inc., International Tobacco Partners, Ltd., 1010 Northern Boulevard, Suite 208, Great Neck, NY 11021, on behalf of themselves and all others similarly situated, Plaintiff: David F. Dobbins, Walter M. Luers, Patterson, Belknap, Webb & Tyler, L.L.P., New York, NY.

Judges: ALVIN K. HELLERSTEIN, United States District Judge.

Opinion by: ALVIN K. HELLERSTEIN

Opinion

[*233] ***OPINION AND ORDER PARTIALLY GRANTING AND PARTIALLY DENYING PRELIMINARY INJUNCTION***

ALVIN K. HELLERSTEIN, U.S.D.J.:

On January 6, 2004, the Court of Appeals for the Second Circuit, affirming and reversing my decision of May 14, 2002, remanded this case to me for further proceedings not inconsistent with its rulings. *Freedom Holdings Inc., et al., v. Spitzer, et al., 357 F.3d 205 (2d Cir. 2004)* (*Freedom Holdings I*), *reh'g denied*, *Freedom Holdings Inc., et al., v. Spitzer, et al., 363 F.3d 149 (2d Cir. 2004)* (*Freedom Holdings II*). The Court of Appeals affirmed my dismissal of the dormant *Commerce Clause* claim, reversed my dismissal of the *Sherman Act* claim, and vacated my dismissal of the Equal Protection claim.

The Mandate issued on April 30, 2004. Almost immediately **[**2]** afterwards, plaintiffs filed an amended complaint, a motion for summary judgment (the briefing of which is incomplete), and, by Order to Show Cause, a motion for a preliminary injunction. This last motion is before me now, and was the subject of oral argument on May 24 and June 2, 2004. For the reasons stated below, I grant the motion in part and deny it in part. I deny plaintiffs' motion to the extent that it seeks an injunction against enforcement of the Master Settlement Agreement between forty-six states and the four major cigarette companies and subsequently agreeing cigarette companies. I deny plaintiffs' motion to the extent that it seeks an injunction against enforcement of the Escrow Statute, *N.Y. Pub. Health Law §§ 1399-nn-pp*, and the Contraband Statute, *N.Y. Tax Law §§ 480(b)*, *481*, *1846*. However, I grant plaintiffs' motion to the extent that it seeks an injunction against enforcing the repeal of the Allocable Share Release provision of the Escrow Statute, *N.Y. Pub. Health Law § 1399-pp*, as amended, 2003 N.Y. Laws 666, eff. Oct. 15, 2003.

I. Factual Background

Cigarette smoking **[**3]** is a scourge to our society. Before modern prohibitions against smoking in public institutions, cigarette smoke hung like a pall over baseball, basketball, and hockey stadia, fouled the air in the offices where we worked and the homes where we lived, and coated our lungs with tars and other poisons, shortening our lives and injuring our health. In recent decades, many injured parties sued the tobacco companies, with mixed results. In the 1990s, governmental entities brought their own lawsuits, seeking to recover their damage -- billions of dollars spent on Medicaid and other health costs caused by cigarette smoking - and to restrict and prevent various advertising and marketing practices of the cigarette manufacturers that tended to popularize cigarette smoking and cause young people to become addicted.

On November 23, 1998, a settlement was reached between forty-six states, the District of Columbia and several territories, and the four major cigarette companies, Philip Morris, Inc. ("Philip Morris," now Altria Group, Inc.), R.J. Reynolds Tobacco Co. ("R.J.Reynolds"), Brown and Williamson Tobacco Co. ("Brown & Williamson"), and Lorillard Tobacco Co. ("Lorillard"). The Master Settlement **[**4]** Agreement ("MSA"), a long and complicated agreement with many annexes, provided for substantial payments by the cigarette companies **[*234]** to the states, an ability to recoup settlement costs by passing them on to consumers, incentives to other cigarette companies to join the settlement and protections against those that would not join, and various marketing and advertising restrictions intended to reduce the attraction of cigarettes, especially to young people.

A. The MSA

The manufacturers who signed the MSA consented to a variety of marketing and advertising restrictions. Signatory manufacturers agreed that they would not "take any action, directly or indirectly, to target Youth within any Settling State in the advertising, promotion or marketing of Tobacco Products." MSA Art. III(a). They agreed not to use cartoons such as Joe Camel in advertising or promotions, MSA Art. III(b), sponsor concerts or major sporting events using tobacco brand names, MSA Art. III(c)(1), or advertise on billboards, in shopping malls, or in transit systems. MSA Art. III(d). They agreed to refrain from selling clothing or other merchandise bearing a tobacco brand name, MSA Art. III(f), and from **[**5]** giving free samples or gifts based on proofs of purchase to youths under age eighteen. MSA Art. III(g), (h). They pledged not to pay for product placement in movies, television shows, theatrical performances, or video games, MSA Art. III(e), nor to enter into agreements restricting anti-tobacco advertising. MSA Art. III(d)(4).

Participating manufacturers also accepted limitations on their lobbying rights. They are prohibited from opposing state or local legislation "intended . . . to reduce Youth access to, and the incidence of Youth consumption of, Tobacco Products." MSA Art. III(m)(1). They also may not support congressional legislation which would override the MSA, or challenge state tobacco-related statutes, MSA Art. III(m)(3), V, or promote the diversion of MSA proceeds to uses that are not health-related. MSA Art. III(n). The MSA requires participating manufacturers to develop corporate principles that express their commitment to reducing youth smoking, to communicate those principles clearly to employees and customers, and to designate an executive level manager responsible for identifying methods of reducing youth smoking. MSA Art. III(i)(1), (2).

The MSA provides for the **[**6]** dissolution of several tobacco industry nonprofit research or trade organizations, and provides for state governmental oversight of any new tobacco-related trade organizations. MSA Art. III(o), (p). The MSA establishes a National Public Education Fund, financed by proceeds from payments under the MSA, to study and support the reduction of youth smoking and of smoking-related diseases. MSA Art. VI(a). For instance, the fund is authorized to support "sustained advertising and education programs" to counter youth smoking. MSA Art. III(g).

The four major tobacco companies, who were the original participating manufacturers to the settlement ("OPMs"), agreed under the MSA to make three sets of payments for a combined value of approximately $ 2.4 billion in the first year and $ 225 billion dollars over twenty-five years. *See* MSA Art. IX(b), (c). [1] **[**8]** The payments **[*235]** of the OPMs were to be adjusted each year to reflect inflation, miscalculations of relative shares, and various other factors. *See* MSA Art. IX(b), (c). A Volume Adjustment, MSA Art. II(aaa), Exh. E, adjusts aggregate payments by

---

[1] One set of payments was to be made immediately after the MSA was executed and annually thereafter, on January 10, from 2000 through 2003. These base payments totaled $ 12,741,925,944. MSA Art. IX(b). The second set of payments was to be made annually "on April 15, 2000 and on April 15 of each year thereafter in perpetuity," increasing from $ 4.5 billion in 2000 to $ 9 billion annually beginning in 2018. The second set of payments totals $ 207.89 billion between 2000 and 2025. MSA Art. IX(c)(1). The third set of payments was to be made annually "on April 15, 2008 and on April 15 each year thereafter through 2017." The payments were in the amount of $ 861 million per year, or $ 8.61 billion in total. MSA Art. IX(c)(2). The three sets of payments combined have been called "the largest privately negotiated redistribution of wealth in world history." Margaret A. Little, *A Most Dangerous Indiscretion: The Legal, Economic, and Political Legacy of the Governments' Tobacco Litigation*, *33 Conn. L. Rev. 1143, 1171 (2001)*.

the OPMs according to yearly changes in the quantity of cigarettes that they ship in or to the **[**7]** United States. If total shipments increase, the base payment is increased proportionally; if total shipments decrease, the base payment is decreased by 98 percent of the proportion of decrease. MSA Exh. E(A), (B)(i). [2]

The payments of each individual OPM were to be adjusted yearly as well, according to changes in its share of the entire United States market for cigarette sales, relative to the shares of the other three OPMs. As an OPM's market share increased relative to the other OPMs' shares of the market, so did that OPM's burden of payments relative to those of the other OPMs; as its relative market share decreased, so did its relative burden. MSA Art. II(mm). [3]

[9]** The settling states and territories agreed to allocate amongst themselves the moneys derived from the OPMs' payments under the MSA. Art. II(f), at 4, Exh. A. The percentages, or allocable shares, were negotiated among the settling states to reflect total smoking population, health care costs, and other relevant considerations. By far the largest allocable shares are those of California, 12.7639554 %, and New York, 12.7620310 %. The next largest allocable share is Pennsylvania's, which is 5.7468588 %, less than half of New York's. Kentucky's allocable share is 1.7611586 %.

The MSA provides an incentive for other cigarette manufacturers to join the payments scheme. Subsequent participating manufacturers ("SPMs") who agreed to join the MSA within the first sixty days after its execution by the OPMs were "grandfathered" into their 1998 market share or 125 % of their 1997 market share, whichever is greater. Grandfathered SPMs become liable for payments to the states only to the extent that their market share increases above those grandfathered levels; above those levels, their required payments are measured by the degree to which their yearly market shares increase relative, not to the **[**10]** entire market, but to the aggregate market share of the OPMs. MSA Art. IX(i). The relationship is reflected in the formula: (current market share - 1998 [or 125 % of 1997] market share) / (current aggregate market share of OPMs). [4] As the Court of Appeals observed, **[*236]** the formula imposes on SPMs a payment obligation that increases by more than its proportional growth of market share:

> If the denominator were current aggregate market share of OPMs and SPMs, gaining market share from OPMs would be less harmful for SPMs, because the denominator would not change even when the numerator increased. But under the MSA, if the numerator increases because the SPM has taken market share from an OPM, the denominator decreases by the amount of the increase. Thus, the SPM's proportion of the annual payment increases by more than its proportion of overall market share.

Freedom Holdings II, 363 F.3d at 153. Thus, SPMs pay nothing to the states for their cigarette sales at or below their base of 1998 (or 125 % of their 1997) market share, but disproportionately higher payments for cigarette sales that increase their market shares above those levels, relative to the market **[**11]** shares of the OPMs.

The MSA provides a different protection relative to non-participating manufacturers ("NPMs"), by providing incentives to the states to enact legislation aimed at preventing NPMs from benefiting competitively by avoiding the onus of payment obligations to the states. The Escrow and Contraband Statutes, passed in virtually every signatory state, are the result of these provisions of the MSA. *N.Y. Pub. Health Law §§ 1399-nn-pp* **[**12]** ; *N.Y. Tax Law §§*

---

[2] The 2% disproportion seems to mitigate slightly an aggregate decrease in payments to the states. Any decrease in payments under the Volume Adjustment is subject to reduction - that is, the OPMs' payments are adjusted downwards somewhat less, according to a complex formula - if the aggregate operating income of the OPMs from yearly sales of cigarettes in and to the United States exceeds $ 7.195 billion (adjusted upward for inflation). MSA Art. II(aaa), Exh. E(B)(ii).

[3] All payment calculations in the MSA are made on the basis of statistical data of the previous year. Thus the payments due on April 15, 2004, for instance, are based on audited and certified manufacturers' 2003 statistics regarding volume of sales, percentage of market share, and the like. *See*, *e.g.*, MSA Art. II(mm), Exh. E(C).

[4] For non-grandfathered SPMs, 1997 and 1998 market share are defined as zero, so that the formula collapses to current market share divided by current aggregate market share of OPMs. MSA Art. IX(i)(4). Any manufacturer which consented to join the MSA more than sixty days after its initial execution by the OPMs becomes a nongrandfathered SPM. MSA Art. IX(i)(4). Both by number of manufacturers and by volume of sales, the majority of manufacturers which became SPMs did so within the first sixty days after the MSA's execution and became grandfathered.

480(b), 481, 1846. The MSA provides an NPM Adjustment, reducing payment obligations of PMs to the extent they lose market share to NPMs. [5] However, the NPM Adjustment does not take effect if a state enacts Escrow or similar statutes imposing payment obligations on NPMs to the states. If a state fails so to legislate, payment obligations of the participating manufacturers ("PMs") are reduced by triple the PMs' aggregate market share loss for market share loss of between zero and 16 2/3 %. If the market share loss increases above 16 2/3 %, the trebling provision is replaced by a complex formula potentially increasing the PMs' discount. MSA Art. IX(d)(1)(A).

The NPM Adjustment is subject to several other conditions. It does not apply **[**13]** until cigarette shipments fall below 1997 levels. MSA Art. IX(d)(1)(D). The independent auditor appointed to administer the MSA must certify "that the disadvantages experienced as a result of the provisions of this Agreement were a significant factor contributing to the Market Share Loss." MSA Art. IX(d)(1)(C). And, as noted, the NPM Adjustment will not apply to any state which enacted an Escrow Statute, "and diligently enforced the provisions of such statute." MSA Art. IX(d)(2)(B). [6] The Escrow Statute is intended to "effectively and fully neutralize[] the cost disadvantages vis-a-vis Non-Participating Manufacturers." MSA Art. IX(d)(2)(E).

The Escrow Statute, passed by New York on November 27, 1999, "imposes a **[*237]** per-pack fee on NPM-manufactured cigarettes that adds to the resale price of the product." *Freedom Holdings I, 357 F.3d at 212.* **[**14]** This fee, which is paid to an escrow account from which NPMs can recover under several eventualities, is currently $ .0167539 per cigarette sold, or $ 3.35078 per carton, and increases slightly over time. [7] NPMs are entitled to receive interest on their payments while in escrow. MSA Exh. T; *N.Y. Pub. Health Law § 1399-pp(2)(b)*. NPM payments are not made variable according to changes in their market shares, as are the payment obligations of the OPMs. Unlike SPMs, NPMs are not "grandfathered" and entitled to exclude a certain percentage of their sales below a base level. While PMs' payments are tax deductible, NPM escrow payments are probably not tax deductible, with the possibility (disputed) that they could become tax deductible if rights to reversion and interest were to be surrendered.

[15]** Under the Escrow Statute as initially enacted, *see* MSA Exh. T., *N.Y. Pub. Health Law § 1399-pp* (McKinney 2002), 1999 N.Y. Laws 536, eff. Nov. 27, 1999, an NPM could recover funds that it placed into escrow under three circumstances. First, the funds placed into escrow could satisfy a judgment or settlement on a tobacco-related claim. Second, an NPM could recover funds that it placed into escrow in a particular state to the extent that those funds exceeded the amount that that state would have received from that manufacturer as its allocable share, had the manufacturer been an SPM. Third, to the extent that an NPM does not recover from the escrow fund through those two methods, its funds are to be released from escrow after twenty-five years. *Id. § 1399-pp(2)(b)*. The statutory provision allowing for the second of these three methods of releasing funds, *N.Y. Pub. Health Law § 1399-pp(2)(b)(ii)*, is commonly known as the Allocable Share Release provision.

The Contraband Statute was passed by New York on December 28, 2001, as an enforcement mechanism for the Escrow Statute. As described by the Court of Appeals, ***[**16]*** *Freedom Holdings I, 357 F.3d at 213-15*, it requires each manufacturer to certify annually that it is either a PM making payments under the MSA, or in compliance with the Escrow Statute. If a manufacturer fails so to certify or if the Commissioner of Public Health determines that the manufacturer is in violation of the Escrow Statute, state tax stamp agents are prohibited from stamping that manufacturer's cigarettes. Penalties for violation of the Contraband Statute include seizure and forfeiture of

[5] The NPM Adjustment applies to the second and third sets of OPM payments, which account for all but $ 12.74 billion of the OPMs' aggregate payments. MSA Art. IX(c)(1), (2). The NPM Adjustment also applies to SPM payments. MSA Art. IX(i)(3).

[6] If a state enacts and fully defends the model escrow statute, but it is invalidated by a court, the state may still avoid 65% of the NPM Adjustment. MSA Art. IX(d)(2)(F).

[7] The escrow payment was $ .0094241 per cigarette, or $ 1.88482 per carton, in 1999, and it rises to $ .0188482 per cigarette, or $ 3.76964 per carton, beginning in 2007. MSA Exh. T; *N.Y. Pub. Health Law § 1399-pp(2)(a)(1)*, *(v)*. A pack contains twenty cigarettes and a carton contains ten packs, so that a carton equals 200 cigarettes.

cigarettes, monetary liability, and suspension or cancellation of the manufacturer's license. N.Y. Tax Law §§ 480-b, 481, 1846.

The Allocable Share Release provision was amended, effective in New York on October 15, 2003, and to date the same amendment has been passed in approximately thirty states. Under the amended law, an NPM can recover funds it placed into escrow only to the extent that they are greater than the total amount of payments that manufacturer would have been required to pay to all states had it been an SPM. N.Y. Pub. Health Law § 1399-pp, as amended, 2003 N.Y. Laws 666, eff. Oct. 15, 2003. The statutory **[**17]** amendment provides, in effect, that escrowed amounts formerly returned to NPMs would now be **[*238]** retained in escrow for 25 years, and in the interim would be available only to satisfy a judgment or settlement on tobacco-related claims.

B. Statistical Data

The payment obligations of the OPMs are stated in base amount in the MSA, but are adjusted according to several formulae which take market share and other factors into account. The payment obligations of the SPMs are based on their relative market shares and those of the OPMs. By contrast, the NPMs' payments are a flat fee per cigarette sold. The contrast makes the various types of payments difficult to compare, leaving it open to question which manufacturers have, in practice, paid higher or lower amounts under the MSA, or whether any such differences are material. Statistical data provided by PriceWaterhouse Coopers, the independent auditor responsible for overseeing the calculations to be made pursuant to the MSA, show that payments per carton have been as follows:

Year	**OPM**	**SPM** [8] **Grandfathered**	**SPM Not Grandfathered**	**NPM**
1999	$3.92600	$0.48336	$2.02476	$2.01656
2000	$4.34052	$0.69332	$2.36810	$2.34180
2001	$5.15794	$1.1656	$3.13972	$3.12976
2001	$4.98840	$1.61918	$3.28210	$3.27330
2003	$4.16913	$1.83088	$3.97212	$3.96144

[18]**

According to these figures, in any given year, the OPMs have had the highest per cigarette payment obligations, and the SPMs who have had the benefit of averaging their costs because of the benefits given to them under the grandfather clause, have had the lowest. NPMs' payment obligations have been between these two poles. NPMs' payment obligations have consistently been less than, although very close to, those of SPMs who did not have the benefit of the grandfather clause. [9]

---

[8] This figure represents the average of cigarettes sold without payment, pursuant to the grandfather clause and cigarettes sold with payments of increasing proportions for sales above grandfathered levels.

[9] Because the Escrow Statute required NPMs to pay a stated amount per cigarette sold, the figures for payments per carton should, in theory, be strict multiples of the figures for payments per cigarette provided by the Escrow Statute. For instance, the Escrow Statute provides that in 2003, NPMs pay $ .0167539 per cigarette sold; because there are 200 cigarettes in a carton, one would expect that the figure for NPM payments per carton should be $ 3.35078. The figures provided by PriceWaterhouse for NPM payments per carton, per year, are somewhat higher: $ 3.96144 per carton for 2003, for example. Presumably the

[19]** Plaintiffs also allege that NPMs' escrow payments are taxed, while the MSA payments of PMs are tax deductible. In response, New York State (the "State") submits an affidavit by Marvin Chirelstein, tax professor at Columbia Law School, who maintains that the NPMs' payments could be structured as tax deductible, if the NPMs were willing to cede their reversionary and interest rights in those payments. The State supports this assertion with an affidavit by Todd Kerner, a New **[*239]** York State taxation agent, who maintains that if an NPM would attempt to cede its reversionary rights and structure its payments as Professor Chirelstein suggests, New York (and presumably other states) would accept the payments as fully deductible. Plaintiffs contend that they have tried that in other states, but have been blocked from doing so, and that PriceWaterhouse has also taken the position that escrow payments are not tax deductible. [10] Moreover, the State has submitted no evidence on the position of the IRS regarding the relative tax treatment of PM and NPM payments.

[20]** Of equal importance to the volume of payments is their effect on, or reflection of, competition. According to the data provided by PriceWaterhouse, the volume of OPM sales has decreased since the signing of the MSA, from 455 billion cigarettes in 1998 to 344 billion cigarettes in 2003, a reduction of 24 percent. Prices charged by the OPMs increased during this period, not only to cover the cost of the settlement with the states, estimated at $ .19 per pack, but by $ .45 per pack when the MSA was signed in November 1998 and, including subsequent increases, by a total of $ 1.27 through April 2002. The average retail price of an OPM-manufactured pack of cigarettes was $ 1.49 per pack before the MSA was signed in November 1998 and $ 2.76 per pack in April 2002, an increase of over 85 percent.

As the volume of OPM sales fell between 1998 and 2003, the volume of SPM sales rose from 14.12 to 30.08 billion cigarettes, or 113 percent. The volume of NPM sales rose even more during this same period, from 2.43 to 33.31 billion cigarettes, or 1271 percent. The market share of the OPMs shrank over this time period from 96.5 % to 84.5 %. The market share of the SPMs grew from 3 % to 7.4 %, and **[**21]** the market share of the NPMs grew from 0.5 % to 8.2 %. The following chart reflects the shift in volume and market share from 1998 to 2003. [11]

Year	**OPMs**		**SPMs**		**NPMs**		**Total**
	(billions;%)		**(billions;%)**		**(billions;%)**		
1998	455.22	96.5%	14.12	3%	2.43	0.5%	471.77
1999	422.00	92.3%	18.00	3.9%	17.10	3.7%	457.10
2000	401.49	91.4%	22.63	5.2%	14.89	3.5%	439.01
2001	383.31	89.4%	26.70	6.2%	18.70	4.4%	428.71
2002	364.31	86.1%	30.67	7.2%	28.20	6.7%	423.18
2003	344.61	84.5%	30.08	7.4%	33.31	8.2%	408.00
2004	335	83.75%	30	7.5%	35	8.75%	400

difference stems from the Escrow Statute's requirement that its figures be adjusted for inflation. *See* *N.Y. Pub. Health Law § 1399-pp(2)(a)*. Neither party presented arguments regarding this point.

[10] Jeffrey Avo Uvezian, the President of plaintiff International Tobacco Partners, Ltd. ("ITP"), states that his company imports Grand Tobacco cigarettes, which had an escrow obligation to Hawaii of less than ten dollars and does not intend to sell more cigarettes in that state. "To avoid the time and expense of opening an escrow account and maintaining it for 25 years for about ten dollars, ITP . . . offered to pay the amount due directly to Hawaii. . . . No matter how we proposed to structure the transaction, [Hawaii] refused to accept the money, stating that . . . the only way for ITP to fulfill its obligation was for ITP to sign an escrow agreement, establish the required sub-account, name a registered agent, and hold the money for 25 years."

[11] This data was provided by plaintiffs and attributed to PriceWaterhouse. The figures have been rounded. The State provided figures attached to the Declaration of Patricia Tilton, a principal at PriceWaterhouse. The figures attached to the Tilton Declaration are similar to those above, with slight and generally inconsequential variations. An exception is the figures for 2001, when a different categorization altered the market size by 15 billion cigarettes. The figures used here give a more accurate picture of the 2001 market, and are otherwise closely enough confirmed by the Tilton Declaration figures that I accept them as reliable.

Year (est.)	OPMs (billions;%)	SPMs (billions;%)	NPMs (billions;%)	Total

[*240] **[**22]**

The percentages of market shares among the OPMs have also changed, although not to as large an extent. In 1998, Brown & Williamson made 15.4 percent of total sales by OPMs. By 2003, that figure had declined to 11.5 percent, a loss of over 25 percent of its relative market share. Philip Morris gained commensurately; as a percentage of total OPM sales, its share rose from 50.5 percent in 1998 to 54.7 percent in 2003. The relative market shares of Lorillard and R.J. Reynolds, as percentages of total OPM sales, have remained relatively consistent since the MSA was signed. Lorillard's relative market share has stayed between 9.4 percent and 10.8 percent. R.J. Reynolds's relative market share has hovered between 23.5 percent and 25.1 percent.

The statistical trend of declining volume and market share on the part of the OPMs, and increasing volume and market share of NPMs, has been the subject of concern to the OPMs. In the months following the signing of the MSA, the OPMs' share prices fell steeply, but the prices began rising in early 2000 and substantially recovered by early 2002. During 2002, in order to hold market share, the OPMs began offering a variety of promotions, including **[**23]** buy-two-get-one-free giveaways. In response, the OPMs' stock prices once again began to decline. Philip Morris announced on September 26 and November 12, 2002 that it would not meet growth forecasts, and its share price fell further, declining from approximately $ 58 per share in June 2002 to under $ 30 per share in early 2003. R.J. Reynolds's share price fell from over $ 70 per share to $ 27 per share in the same time period. Altria, which in 2002 became the new name of the parent company which was formerly Philip Morris, began the Business Review section of its 2002 Annual Report by listing "heightened competition" among the factors responsible for the weakened position of its domestic tobacco manufacturing subsidiary, Philip Morris USA:

> The year was characterized by the convergence of several factors, including a weak economic environment and resulting consumer frugality, sharp increases in state excise taxes and heightened competition. Industry shipment volume in 2002 . . . declined by 3.7 % to 391.4 billion units, while PM USA's shipment volume declined 7.5 % to 191.6 billion units.

Altria explained, however, that it had "strategies in place" to ensure a stronger market **[**24]** position in the future, and in the Business Review section of its 2003 Annual Report, Altria described its strategies in more detail, including lobbying for

> federal and state initiatives that are designed to provide governments with additional tools to ensure that cigarette manufacturers comply with their Master Settlement Agreement (MSA) payment obligations or the escrow deposit requirements of related state laws, that the availability of counterfeit cigarettes is significantly reduced, and that the illegal sale of cigarettes and non-payment of taxes are dealt with effectively. Significant progress has been made on many of these issues.

Prior to 2003, only eight states had passed Contraband Statutes; during 2003, thirty-one did. On March 20, 2003, West Virginia became the first state to repeal its Allocable Share Release provision and, by year's end, eighteen states, including New York, had followed suit. The OPMs' stock prices began to rise in May 2003, and have generally continued in the same direction **[*241]** since then. Altria described its market position more positively in its 2003 Annual Report, noting that "Philip Morris USA Inc. (PM USA) volume began to stabilize and **[**25]** its retail share increased sequentially during each quarter of 2003, with improved results in the fourth quarter."

The record does not provide a satisfactory economic analysis as to the cause of the statistical trends which have seen OPMs' market shares decline steadily since 1998, notwithstanding the enactment of Escrow and Contraband Statutes, and which have seen SPMs' and NPMs' market shares rise. The Court of Appeals, accepting the allegations of the complaint, ruled that the MSA created the constituent elements of a cartel, *Freedom Holdings I, 357 F.3d at 226*, but the statistical trends are not consistent with those rulings and, indeed, contradict them. The plaintiffs alleged, and the Court of Appeals assumed, a large degree of inelasticity of demand, but the price increases imposed by the OPMs have resulted in loss of market share to OPMs, in favor of both SPMs and NPMs. The Escrow and Contraband Statutes were enacted by the states in response to the incentives provided to them under the MSA to create equivalent obligations on NPMs to those imposed on OPMs and SPMs. *See* MSA Art. IX(d)(2)(E) (Escrow Statute "effectively and fully neutralizes" competition **[**26]** from NPMs). Yet the statistical trends have shown no adverse competitive impact on the NPMs following passage of those Statutes.

An explanation offered by the NPMs may be found in the workings of the Allocable Share Release provision. As explained above, the MSA allocates among the various settling states the moneys paid by PMs according to each state's allocable share. MSA Art. II(f), at 4; Exh. A. Under the Escrow Statute as initially enacted, *see* MSA Exh. T., *N.Y. Pub. Health Law § 1399-pp* (McKinney 2002), 1999 N.Y. Laws 536, eff. Nov. 27, 1999, an NPM could recover funds that it placed into escrow in a particular state to the extent that those funds exceeded the amount the state would receive from that manufacturer as its allocable share, had the manufacturer been an SPM. Thus, an NPM, by concentrating its distribution regionally, to just a few states, could recover a greater percentage of the total money it placed into escrow because those states were allowed to retain only their relatively small percentage shares.

In practical effect, the Allocable Share Release provision provided NPMs with substantial competitive advantages from concentrating **[**27]** their efforts on regional cigarette distribution. If an NPM distributed its cigarettes nationally, and its distribution patterns approximated those of the national market, its payment obligations on its national sales would be apportioned 100 percent among the settling states, with the result that something close to 100 percent of its payments would, in the aggregate, be retained under the Escrow Statute and not released under the Allocable Share Release provision. However, if an NPM were to concentrate its business to the New York-New Jersey-Connecticut area, for instance, it could gain a competitive advantage in that region, because it would make 100 % of its sales there and would be able to recoup the payments on all but roughly 16.5 % of them, these being approximately the percentage shares of those states. While the OPMs and SPMs would be required to continue 100 % of their payments under the MSA, an NPM which focused on the New York metropolitan area could be exempt (aside from the time-value of its money between when it was escrowed and when it was released) to **[*242]** the extent of over 80 % of its business. [12]

[28]** The Declaration of Everett W. Gee III, submitted by plaintiffs, demonstrates this strategy. Gee, the Vice President and General Counsel to S&M Brands, Inc., a Virginia-based NPM, explained that his company was presented with the option of (1) signing the MSA, becoming an SPM, and reducing its ability to increase sales beyond their 1998 (or 125 % of their 1997) levels; or (2) not signing the MSA, "but remaining regional so as to avoid making payments on a national scale. . . . Thus, S&M gave up its dream to be national, settling into the MSA's rules even as an NPM by remaining a regional presence." By selling only in the Southeast, S&M was able to keep its prices lower and continue its growth within that regional market.

Plaintiffs allege that the repeal of the Allocable Share Release provision has halted this process. An NPM can effectively no longer recover funds it placed into escrow, except to pay a judgment or settlement against it, or after 25 years. *See* *N.Y. Pub. Health Law § 1399-pp*, as amended, 2003 N.Y. Laws 666, eff. Oct. 15, 2003. Thus, according to plaintiffs, the barriers against NPMs have been heightened dramatically, and the ability **[**29]** of an NPM to gain a competitive advantage within a regional market has been essentially arrested. However, no independent statistical information has been presented to confirm, or rebut, this thesis; the change in law is too recent.

C. Procedural Background

---

[12] Because New York's allocable share is high, plaintiffs explain, many NPMs avoided selling cigarettes in New York and decided to sell instead elsewhere in the country, where they could recover a higher percentage of their escrow payments. For instance, plaintiff International Tobacco Partners, Ltd. ("ITP") has sold no cigarettes in New York since before 2000, but sold approximately 23 million Tough Guy cigarettes and 61 million Boston cigarettes in Kentucky in 2002, and 38 million Tough Guys and 44 million Boston cigarettes in 2003. ITP made escrow deposits for both Tough Guys and Bostons sold in Kentucky in 2003; because Kentucky's allocable share is 1.7611586%, ITP could recover over 98% of the escrow payments it made on sales in Kentucky. Logically and arithmetically, however, an NPM could just as effectively concentrate its distribution into the New York market, with its large smoking population, and gain regional competitive advantage in this market.

In April 2002, Freedom Holdings Inc. and International Tobacco Partners, Ltd., two cigarette importers who were not participants to the settlement, and who imported cigarettes from foreign manufacturers who were also not participants to the settlement, filed this lawsuit on behalf of themselves and others similarly situated. By their lawsuit, they sought to enjoin New York State from enforcing the MSA to the extent that it preserved the market domination of the OPMs amongst themselves and against others, and the statutes passed by the State to enforce the MSA against non-participating companies like plaintiffs. The State moved to dismiss, and I granted its motion. Relying on *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, I held that the anticompetitive provisions notwithstanding, the State had acted pursuant to its traditional police powers, and such action was protected against the reach of **[**30]** the federal antitrust laws.

The Court of Appeals reversed, holding that plaintiffs had alleged valid claims for relief as to their antitrust and equal protection counts, and remanded the case to me. Two of the three judges constituting the panel [13] held that the State had not **[*243]** sufficiently articulated the policy goals that made it necessary to allow the major cigarette manufacturers to organize themselves into a cartel, and all three judges held that the State had not regulated the anticompetitive features of the settlement to minimize their anticompetitive effects in relation to the states' concerns for the public health of their citizens.

The Court of Appeals ruled that ***HN1***[] where a state statute restricts competition, the question whether the statute is preempted by the *Sherman Act* "is **[**31]** determined by a two-step analysis":

> The plaintiff must first show that the scheme of market control created by the statute would constitute a per se violation of the *Sherman Act* if brought about by an agreement among private parties. . . . Even if a per se violation is shown, the alleged anticompetitive scheme may still be immunized under the *Parker* state action doctrine . . . if: (i) the restraint in question is "clearly articulated and affirmatively expressed as state policy" and (ii) the policy is "actively supervised" by the state itself.

Freedom Holdings I, 357 F.3d at 222-23 (quoting *Cal. Regional Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980))*. Based on the allegations of the complaint and on the Third Circuit's decision in *A.D. Bedell Wholesale Co. v. Philip Morris, Inc., 263 F.3d 239 (3d Cir. 2001)*, the Court of Appeals ruled:

> The alleged arrangement, even without the protection of the Contraband Statutes as enforced by wholesalers, would be a per se violation because it is a naked restraint on competition, albeit one subject to erosion by NPMs. With the **[**32]** Contraband Statutes in force, the scheme as alleged threatens to become a permanent, nationwide cartel. . . . We therefore hold that appellants have sufficiently alleged a per se violation of the *Sherman Act*.

Freedom Holdings I, 357 F.3d at 226. A flat state tax on all manufacturers and importers of cigarettes, measured by their sales rather than their market shares, and without the protective features of the MSA tending to preserve market shares, could have just as easily vindicated the interests of the states. However, the Court of Appeals held, the per se violation of the *Sherman Act* notwithstanding, the restraint on competition imposed by the MSA and the statutes enacted pursuant to the MSA could be saved from illegality if the *Parker v. Brown* exception, exempting state action from the preemptive effect of the *Sherman Act*, were to apply. As the Court of Appeals explained, the exception for state action applies "only if (i) the restraint in question is 'clearly articulated and affirmatively expressed as state policy,' and (ii) the policy is 'actively supervised' by the State itself." *Freedom Holdings I, 357 F.3d at 226* (quoting *Midcal, 445 U.S. at 106*). **[**33]**

On the first of these two prongs, the Court of Appeals ruled that the action was in fact taken by the State, and it reduced the question to whether "the State's policy goals are sufficient to qualify for the *Parker* immunity - simply protecting private parties from competition is not a sufficient goal." *Id. at 227*. Reviewing the legislative history of the

---

[13] Judge Ralph K. Winter wrote the decision on behalf of Judge Sonia Sotomayor and himself. *357 F.3d at 208*. Judge Robert D. Sack concurred in a separate opinion. *Id. at 235* (Sack, J., concurring).

Escrow and Contraband Statutes, the Court of Appeals ruled that the State's interest in protecting and enhancing the revenue it expected from the MSA animated the passage of the statutes far more than the conclusory rationale of protecting the public health. *Id. at 227-31*. Because, the Court of Appeals held, "the MSA requires the PMs to pay a fixed **[*244]** fee per cigarette but leaves them free to set whatever price they choose, the resolution of the price/sales/public health conflict is left by the MSA to the PMs," whose concern is for profits rather than public health. *Id. at 230*. Accordingly, the Circuit held that "the relationship of such [public health] benefits to the restraint on competition is not obvious and may even be counterproductive." *Id. at 230-31*.

Addressing whether the allegedly anticompetitive provisions **[**34]** are "actively supervised" by the State, the second prong of *Midcal*, the Court of Appeals held that they are not. *Id. at 231*. Finally, the Second Circuit rejected the State's argument that the MSA reflected *Noerr-Pennington* rights, rights under the *First Amendment* to petition the state governments for relief. The Court of Appeals held that the *First Amendment* doctrine is irrelevant to the issues arising from the complaint. *Id. at 233*.

The Court of Appeals, with respect to all these rulings, emphasized that it was dealing with only the allegations of the complaint, and was assuming the truth of facts and conclusions alleged by the plaintiffs. [14]

[35]** Judge Sack, concurring, agreed with the majority that the State had not satisfied the second *Midcal* prong, requiring the State's active supervision of the anticompetitive features of the MSA, but differed with the majority as to the first *Midcal* prong. That prong, Judge Sack stated, "requires only that the state offer a clear articulation of a state policy to authorize anticompetitive conduct," and "seems easily met here, or at least seems as though it would be capable of proof before the district court on remand." *Id. at 236*. As Judge Sack put it, "The 'clear articulation' standard is not strict." *Id.* Judge Sack thus expressed doubt that the majority should have impugned the State's motivation for entering into the MSA, and questioned whether comparing the MSA's payment provisions with a flat tax was appropriate. *Id. at 238-39*. He commented that since "this action is being returned to the district court for further proceedings . . . the State may be able to satisfy both *Midcal* factors as a matter of fact." *Id. at 238*.

Defendants petitioned the panel for reconsideration, but the Court of Appeals confirmed its rulings, **[**36]** in an opinion dated March 25, 2004. The State argued that "the complex market share arrangements of the MSA" were not anticompetitive, as the Court of Appeals had ruled, but "have no purpose other than to impose a flat levy per cigarette sold." *Freedom Holdings II, 363 F.3d at 152*. The Court of Appeals rejected the State's arguments, commenting that on the State's view, the MSA's payment provisions would amount to "a superfluous maze leading to a result that could have been achieved in a simple, straight-forward manner." *Id.* Judge Winter, again writing for the panel and "construing the complaint's allegations most favorably to the plaintiffs," *id.*, ruled that the MSA (1) confers tax benefits on SPMs over NPMs; (2) confers benefits on SPMs who joined the MSA within sixty days of its execution over those SPMs who joined later; and (3) confers benefits on OPMs over SPMs, by penalizing SPMs for increases in market share to an extent greater than their actual market gains. **[*245]** *Id. at 153*. Judge Winter ruled that these features, and others, gave rise to a cartel favoring the OPMs, inter se and against SPMs and NPMs, and constituted a per se violation **[**37]** of the antitrust laws.

The Court of Appeals reaffirmed that the State's policy goals failed to exempt it from antitrust liability. *Parker v. Brown* did not apply, the Court of Appeals held, because the State did not relate the anticompetitive features of the Escrow and Contraband Statutes to the legitimate State policies of protecting public health and forcing cigarette manufacturers to assume the costs of health care caused by their marketing and sale of cigarettes. As the Court of Appeals explained, the State "never states how the alleged market-sharing scheme furthers those goals. It simply denies that the market-sharing scheme is anticompetitive, leaving the purpose of this complex, carefully drafted set of rules an enigma." *Id. at 156*.

---

[14] *See*, *e.g.*, *357 F.3d at 208* ("appellants allege - and at this stage we must assume their allegations to be true"); 209 ("Because this appeal is from a dismissal on the pleadings, we assume the factual allegations of the complaint to be true."); 216 ("We accept as true the material facts alleged in the complaint and draw all reasonable inferences in plaintiffs' favor."); 225 (subsection (ii) entitled "The Allegations of the Complaint"); 230 ("at this stage in the proceeding and given the allegations of the complaint").

Clarifying its earlier decision, the Court of Appeals allowed that *Parker v. Brown* might be satisfied even without the State's articulation of how the MSA furthered legitimate State policies, so long as the State "actively supervised" the cartel created by the MSA. Referring to the requirement that the State articulate why the anticompetitive features of the MSA express legitimate State policy as the "ancillary purpose" **[**38]** of the first prong of *Midcal*, Judge Winter stated, "the *Parker* analysis and the ancillary purpose of the *Midcal* prong are interchangeable," and the "failure to meet the ancillary purpose test alone - where *Parker* was clearly satisfied . . . - would not be enough to upset a statute." *Id. at 155*. The holding of the Court of Appeals, Judge Winter stated, "expressly relied on the challenged scheme's failure to meet the second *Midcal* prong," the requirement of the State's active supervision. *Id. at 157*. In so ruling, the Court of Appeals emphasized, it was deciding on a *Rule 12* motion, and accepting the allegations of the complaint as if proved, without having ascertained if plaintiffs could actually prove the anticompetitive facts they alleged. [15] Thus, the Court of Appeals reversed my decision of May 14, 2002 and reinstated the complaint. *Id. at 151*.

[39]** Following remand, plaintiffs amended their complaint and moved for a preliminary injunction, seeking to enjoin New York State from enforcing the MSA, and the statutory enactments ancillary to the MSA, as respects Non-Participating Manufacturers and importers. Specifically, they seek to enjoin enforcement of the Escrow Statute, *N.Y. Pub. Health Law § 1399-pp*; the Contraband Statute, *N.Y. Tax Law §§ 480-b*, *481*, *1846*; and the recently amended Allocable Share Release provision, *N.Y. Pub. Health Law § 1399-pp*, as amended, 2003 N.Y. Laws 666, eff. Oct. 15, 2003. They argue that these laws enforce a cartel which has the purpose and effect of maximizing the OPMs' profits and discouraging the sales of cigarettes by NPMs.

[*246] New York State, opposing the motion, argues that the statistical evidence of competition, compiled by a neutral and nationally recognized firm of certified public accountants appointed pursuant to the MSA, is inconsistent with the existence of a cartel, and disproves it. All that is happening, the State argues, is that NPMs are not being allowed to skim the market, to take advantage **[**40]** of the fact that competitor cigarette manufacturers responsibly pay for the public health costs they create while the NPMs do not, and in so doing unfairly jeopardize the public health purposes that the MSA advances. The NPMs, the State argues, are being asked to pay no more into escrow than the amounts that PMs are required to pay, so that all incremental costs in relation to cigarette sales, from whatever source, are equal, per cigarette sold. Furthermore, the State argues, the articulation of a public purpose animating the MSA is plain and clear to see: (1) the MSA effectively shifts the costs of injury to the public health from the states to the companies that caused those injuries, and (2) the shifting of such costs by cigarette manufacturers to consumers, adding to the price of cigarettes, along with severe restrictions on future advertising and marketing by cigarette manufactures, particularly as directed towards young people, effectively deters consumers from purchasing the volume of cigarettes that they once did.

Plaintiffs argue that the MSA, and the ancillary statutory enactments, have created a cigarette cartel, well beyond any legitimate state interest. The MSA, they **[**41]** argue, provided for yearly adjustments of payments to the states according to percentage changes of market control, thus tending to reward market-share stability. Furthermore, the NPM Adjustment, by reducing payment obligations of OPMs corresponding to three times their losses of market share from sales gained by NPMs unless states enact and defend measures against NPMs, creates incentives to states to enforce the MSA against NPMs and deter competition from NPMs. As to contrary statistical trends, plaintiffs attribute the sales growth of NPMs to a certain slowness by the states in enforcing the MSA. The recent amendment by New York and most other participating states of the Allocable Share Release provision should, it is

---

[15] *See*, *e.g.*, *363 F.3d at 151* ("the anticompetitive effects of the MSA involved disputed issues of fact for trial"); 151-52 ("We therefore accept as true the material facts alleged in the complaint and draw all reasonable inferences in the plaintiffs' favor. Nevertheless, we may, as we did in our earlier opinion, view those allegations in light of the full terms of the Escrow and Contraband Statutes . . . and the MSA." (citations omitted)); 152 ("construing the complaint's allegations most favorably to the plaintiffs"); 153 ("if these allegations are true" . . . "again viewing the allegations in the light most favorable to appellants"); 154 ("Given the allegations of the complaint, we cannot dismiss a challenge to this scheme on the grounds that it is not, as a matter of law, anti-competitive. For reasons stated in our earlier opinion and here, the complaint alleges such an effect and plaintiffs are entitled to attempt to prove it."); 157 ("It is too soon to say whether the state will ultimately be able to elicit evidence sufficient to meet this second prong.").

expected, reverse the secular trends and protect the market share of the PMs. Indeed, according to plaintiffs, insuring a continuing flow of money from PMs gives the states a strong incentive to enact ever more stringent laws to assure that the PMs' market positions remain secured, protected by their settlements with the states.

I have carefully reviewed the record supporting, and opposing, plaintiffs' motion for a preliminary injunction, and heard both sides in extended **[**42]** argument, spreading over two days. I hold that plaintiffs have shown neither a likelihood of success on the merits nor irreparable damage with respect to the MSA, the Escrow Statute, or the Contraband Statute sufficient to justify preliminary injunctive relief. However, the recent repeal of the Allocable Share Release provision threatens to jeopardize the ability of the NPMs to compete with the SPMs and OPMs, and thereby to cause them serious and irreparable injury. To that extent only, a preliminary injunction will be granted. Since this issue, and all others, will have to be fully explored at trial, my ruling will have the effect of preserving the competitive status quo until the trial and final judgment.

II. Discussion

A. Standard for Preliminary Injunction

HN2[] Generally, "preliminary injunctive relief is appropriate when a plaintiff establishes **[*247]** (1) the likelihood of irreparable injury in the absence of such an injunction, and (2) either (a) likelihood of success on the merits or (b) sufficiently serious questions going to the merits to make them a fair ground for litigation plus a balance of hardships tipping decidedly in [plaintiff's] favor." *Wisdom Import Sales Co. v. Labatt Brewing Co., 339 F.3d 101, 108 (2d Cir. 2003)* **[**43]** (brackets in original). In several circumstances, however, a heightened standard must be satisfied. Two such circumstances are present here.

HN3[] First, a heightened standard applies "where (i) an injunction will alter, rather than maintain, the status quo, or (ii) an injunction will provide the movant with substantially all the relief sought and that relief cannot be undone even if the defendant prevails at a trial on the merits." *Tom Doherty Assocs., Inc. v. Saban Entertainment, Inc., 60 F.3d 27, 34 (2d Cir. 1995)*. An injunction in such a case is considered "mandatory" because it "is said to alter the status quo by commanding some positive act." *Id.* In such a situation, plaintiffs must show "a greater likelihood of success" and make "a clear showing that the moving party is entitled to the relief requested, or [that] extreme or very serious damage will result from a denial of preliminary relief." *Id.*; *see also Great Earth Int'l Franchising Corp. v. Milks Development, Inc., 302 F. Supp. 2d 248, 251 (S.D.N.Y. 2004)*. Although no positive act would be required by an injunction here, the scope of injunctive relief requested by plaintiffs would significantly **[**44]** alter the status quo, give plaintiffs substantially all the relief they seek, and cost defendants revenue in ways that they claim could not be undone. Accordingly, the heightened *Tom Doherty* standard applies here.

HN4[] A heightened standard is also appropriate "where the moving party seeks to stay governmental action taken in the public interest pursuant to a statutory or regulatory scheme." *Plaza Health Laboratories, Inc. v. Perales, 878 F.2d 577, 580 (2d Cir. 1989)*; *see also Bery v. New York City, 97 F.3d 689 (2d Cir. 1996)* (quoting *Plaza Health Labs*). In such a situation, the moving party must establish "a probability of success on the merits," *Plaza Health Labs, 878 F.2d at 580*. Accordingly, plaintiffs may not obtain an injunction by showing a reasonable question on the merits plus a balance of hardships tipping in their favor. Plaintiffs must instead satisfy the stricter preliminary injunction standard, by demonstrating both a clear showing of irreparable injury in the absence of such an injunction, and a greater likelihood of success on the merits. *Plaza Health Labs, 878 F.2d at 580*; *see also Tom Doherty, 60 F.3d at 34* **[**45]** (requiring irreparable injury and "a more substantial showing of likelihood of success"); *Tunick v. Safir, 209 F.3d 67, 70 (2d Cir. 2000)* (equating the *Tom Doherty* and the *Plaza Health Labs* standards).

Plaintiffs argue that the *Clayton Act* provides a less stringent standard, requiring a showing of only "threatened loss or damage." *15 U.S.C. § 26* (covering any "violation of the antitrust laws"). But plaintiffs are mistaken.***HN5***[] This provision eases the requirement of standing for suit under the antitrust laws, allowing suit for threatened rather than actual harm. It does not affect the standard for granting a preliminary injunction. *See Christian Schmidt Brewing Co. v. G. Heileman Brewing Co., 753 F.2d 1354, 1358 (6th Cir. 1985)* ("the courts have recognized a lower threshold standing requirement" under this provision; nevertheless, "although there is a lesser threshold standard, plaintiffs must nonetheless make a sufficient showing of potential or threatened antitrust injury to meet the customary requirements **[*248]** for a grant of preliminary injunctive relief"); *Kay Instrument Sales Co. v. Haldex Aktiebolag, 296 F. Supp. 578, 579 (S.D.N.Y. 1968)* **[**46]** ("In determining whether to issue a preliminary injunction, however, there is nothing exceptional by reason of the presence of antitrust elements; the normal principles of equity are applicable."). Indeed, the text of the statute provides that an injunction can be obtained "under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity." *15 U.S.C. § 26*. Accordingly, the heightened standard applies. *See* Tr. June 2, 2004, at 4.

B. *Likelihood of Success on the Merits*

In order to show a likelihood of success on the merits, plaintiffs must show, first, a likelihood that the MSA, Escrow Statute, Contraband Statute, and amended Allocable Share Release provision establish a cartel constituting a per se violation of the federal antitrust laws, *see* *Freedom Holdings I, 357 F.3d at 222-23*, and second, a likelihood that the antitrust violations are not exempt from the reach of the antitrust laws under the doctrine of *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. I address the two issues in turn, recognizing that the two decisions **[**47]** of the Court of Appeals state the law of the case which I must follow but that they are based, not on fact, but on plaintiffs' allegations of fact that they claim to be able to prove. The facts as proved, however, tell a quite different story, giving rise to very different applications of the same principles of law.

1. *Per Se Violation*

The opinions of the Court of Appeals did not define what conduct constitutes a "per se violation" of the antitrust laws. The caselaw and literature suggest several strands of understanding, giving rise to different legal conclusions. Under one strand of understanding, the term could be shorthand for a category of cases where a court, instead of having again to consider alleged defenses that previous cases have rejected, might sweep away these failed justifications, shortcut the traditional "rule of reason" analysis, and peremptorily hold the conduct invalid. But the term also could be applied to hold an entire class of activities invalid per se, without even considering any justifications. In the instant case, upon the facts presented, it is unclear that the MSA and the challenged statutes amount to a per se restraint on competition.

[48]** The first strand of caselaw may be best viewed through the lengthy discussion of the per se rule found in *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)* (*NCAA*). In that case, the NCAA had established a limit on the number of college football games which could be televised. The University of Oklahoma contracted to televise more games than the NCAA would permit, and it challenged the NCAA's limitation as an antitrust violation. The Supreme Court explained that the per se standard would normally be applied to cases involving price fixing and output limitations, since these practices "always or almost always tend to restrict competition and decrease output." *Id. at 100* (quoting *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 19-20, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979))*. The Court declined to apply the per se rule, however, holding that horizontal restraints were desirable "in order to preserve the character and quality of the 'product,'" college football. *Id. at 104*. The Court proceeded to analyze the restriction under the rule of reason, explaining that **[*249]** ***HN6***[] "the essential inquiry" **[**49]** of both the per se rule and the rule of reason "remains the same - whether or not the challenged restraint enhances competition." *Id.* Stating that "there is often no bright line separating per se rules from Rule of Reason analysis," the Court instructed that because under both tests "the criterion to be used in judging the validity of a restraint on trade is its impact on competition," the per se rule, despite its name, "may require considerable inquiry into market conditions before the evidence justifies a presumption of anticompetitive conduct." *Id. at 104* & n.26. The Court cited the example of *Jefferson Parish Hospital District No. 2 v.* *Hyde, 466 U.S. 2, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*, which held that because the conduct at issue may have had beneficial justifications, it was "inappropriate to condemn without considerable market analysis." *NCAA, 468 U.S. at 104 n.26*.

The foremost treatise on ***antitrust law*** also observes that the per se and reasonableness approaches may be seen as a "single inquiry with varying presumptions." VII Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 1511, at 418 (2d ed. 2003). As Professor Areeda explains it, the **[**50]** per se rule developed as "merely a special case of the rule of reason," because it was an analysis that was "generalized for a class of behavior or for a class of claimed defenses" which could be analyzed similarly in almost all cases. *Id.* P 1509a, at 396. In many instances, the behavior could be analyzed similarly because "the conceivable social benefits are few in principle, small in magnitude, speculative in occurrence, and always premised on the existence of price-fixing power that is likely to be exercised adversely to the public." *Id.* at 400. For this reason, Professor Areeda states that ***HN7***[] the per se rule should be "carefully limited to 'naked' restraints, which are restraints that lack redeeming social benefits." *Id.* P 1509c, at 403. Accordingly, "when legitimate objectives are served, conduct constituting price fixing in the lay sense is not defined as the 'price fixing' that is per se unlawful." *Id.* P 1511a, at 419.

In *California Dental Ass'n v. FTC, 526 U.S. 756, 143 L. Ed. 2d 935, 119 S. Ct. 1604 (1999)*, the Dental Association had imposed advertising restrictions on its members, which the FTC had found to be anticompetitive. The Court of Appeals affirmed the **[**51]** FTC's decision, and affirmed its decision to employ an abbreviated, or "quick-look," rule of reason analysis, an intermediate analysis between the per se rule and the rule of reason. The Supreme Court vacated and remanded for more scrutiny of the nature of the restrictions. Relying principally on *NCAA* and on Professor Areeda's analysis, the Court reiterated that ***HN8***[] there is no bright line between the per se rule and the rule of reason. The proper analysis, it ruled, should be thought of as a spectrum, rather than a dichotomy: "There is generally no categorical line to be drawn between restraints that give rise to an intuitively obvious inference of anticompetitive effect and those that call for more detailed treatment. What is required, rather, is an enquiry meet for the case," *id. at 780-81*, with justifications for the restriction to be taken into account. "The object is to see whether the experience of the market has been so clear, or necessarily will be, that a confident conclusion about the principal tendency of a restriction will follow . . . ." *Id. at 781*.

Under this analysis of the per se rule applied to the facts of record, the plaintiffs **[**52]** have not shown a likelihood that the MSA and the challenged statutes constitute a per se violation of the *Sherman Act.* The record shows that the settlement between the states and the tobacco manufacturers **[*250]** was intended to have, and in fact has had, important and redeeming social benefits, namely, the public health concerns to reduce tobacco consumption, particularly among youth, *see* MSA Art. I, at 2, to restrict the scope of cigarette manufacturers' advertising and marketing programs, and to shift to the tobacco manufacturers the health care costs caused by sales of their products. The New York Supreme Court, in approving the settlement between New York State and the OPMs, reflected in the MSA, compared the prayer for relief in the amended complaint with the provisions of the MSA in relation to the public interest, *State of New York, et al., v. Philip Morris, Inc., et al., 179 Misc. 2d 435, 686 N.Y.S.2d 564, 568 (N.Y. Sup. Ct. 1998)*, *aff'd*, *263 A.D.2d 400, 693 N.Y.S.2d 36 (N.Y. App. Div., 1st Dep't 1999)*, and found that the most important demands of the complaint had been achieved: an injunction against cigarette sales to minors, and against advertisements **[**53]** targeting them; greater disclosure of the health effects of tobacco and nicotine; and funding of educational and clinical programs intended to increase awareness and treatment of the health risks associated with cigarette smoking. Indeed, the court noted, some provisions of the MSA could not have been achieved through litigation, or even through legislation, such as the waiver by the participating manufacturers of their *First Amendment* rights to advertise and to lobby against adverse legislation. *Id. at 568 & 569 n.6*; *see* MSA Art. III(d), (m), V. The court concluded:

> With all of these and the monetary provisions of the MSA, the court is confronted with a settlement that goes well beyond what could have been achieved in plaintiffs' fondest dreams for the result after a protracted and risky trial, that excels over the [earlier] Minnesota settlement, and that painstakingly accommodates the public interest.

686 N.Y.S.2d at 569.

> The MSA [and a companion settlement, the Smokeless Tobacco Master Settlement Agreement] adequately protect the public interest . . . The economic and noneconomic benefits for New York State are substantial [and] **[**54]** are consistent with and advance the objectives of New York public policy as set forth in the amended complaint."

Id. at 567.

This evidence suggests that the MSA and the Escrow and Contraband Statutes were intended not as "naked restraints on trade," as plaintiffs allege, but as restraints enacted for public health purposes. Under the reasoning of *NCAA* and Areeda, these restrains should not be tested without considering their redeeming social benefits, and accordingly may not violate a rule of per se illegality without such evaluation. *See* *Freedom Holdings I, 357 F.3d at 223* ***HN9***[] ("For a statute to be preempted, the conduct contemplated by the statute must be 'in all cases a per se violation' of the federal antitrust laws." (quoting *Battipaglia v. N.Y. State Liquor Authority, 745 F.2d 166, 174 (2d Cir. 1984)* (quoting *Rice v. Norman Williams Co., 458 U.S. 654, 73 L. Ed. 2d 1042, 102 S. Ct. 3294 (1982)))*. The second strand of caselaw pays attention to the character of the restraint in question rather than to why it might be justified. This definition of "illegal per se" was articulated most concisely in *Rice*, where defendant challenged **[**55]** a California law regulating the importation of alcohol. The Court held that ***HN10***[] for a state statute to be considered a per se antitrust violation, it must mandate or authorize "conduct that necessarily constitutes a violation of the antitrust laws in all cases," or place "irresistible pressure on a private party to violate the antitrust laws":

> **[*251]** [A] state statute, when considered in the abstract, may be condemned under the antitrust laws only if it mandates or authorizes conduct that necessarily constitutes a violation of the antitrust laws in all cases, or if it places irresistible pressure on a private party to violate the antitrust laws in order to comply with the statute. Such condemnation will follow under *§ 1 of the Sherman Act* when the conduct contemplated by the statute is in all cases a per se violation. If the activity addressed by the statute does not fall into that category, and therefore must be analyzed under the rule of reason, the statute cannot be condemned in the abstract. Analysis under the rule of reason requires an examination of the circumstances underlying a particular economic practice, and therefore does not lend itself to a conclusion that a statute is **[**56]** facially inconsistent with federal antitrust laws.

Id. at 661. This formulation has been accepted by a number of subsequent cases. *See* *Fisher v. Berkeley, 475 U.S. 260, 265, 89 L. Ed. 2d 206, 106 S. Ct. 1045 (1986)* (quoting *Rice*); *324 Liquor Corp. v. Duffy, 479 U.S. 335, 342, 345, 93 L. Ed. 2d 667, 107 S. Ct. 720 (1987),* (quoting *Rice*). Despite the outcome in *NCAA*, the Supreme Court in that case acknowledged that horizontal price fixing and output limitations are ordinarily considered illegal per se because they "always or almost always tend to restrict competition and decrease output":

> Horizontal price fixing and output limitation are ordinarily condemned as a matter of law under an "illegal per se" approach because the probability that these practices are anticompetitive is so high; a per se rule is applied when "the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output." *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 19-20, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. In such circumstances a restraint is presumed unreasonable without inquiry into the particular market **[**57]** context in which it is found.

468 U.S. at 100; *see also* VII Areeda & Hovenkamp, ***Antitrust Law***, P 1510a, at 405 (calling this the "oldest meaning of 'per se illegality,'" and citing *United States v. Addyston Pipe & Steel Co., 85 F. 271 (6th Cir. 1898)*, *modified as to decree & aff'd*, *175 U.S. 211, 44 L. Ed. 136, 20 S. Ct. 96 (1899)*; *United States v. Trenton Potteries Co., 273 U.S. 392, 71 L. Ed. 700, 47 S. Ct. 377 (1927)*; and *FTC v. Superior Ct. Trial Lawyers Ass'n, 493 U.S. 411, 107 L. Ed. 2d 851, 110 S. Ct. 768 (1990))*.

HN11[] Horizontal price fixing, output limitations, and market division are classic characteristics of a cartel. A cartel is defined as "[a] combination of producers or sellers that join together to control a product's production or price." Black's Law Dictionary 206 (7th ed. 1999). "Competing firms form a cartel when they replace independent decisions with an agreement on price, output, or related matters." IIA Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 405a, at 26 (2d ed. 2002). A cartel is strongest when it controls a large market share or when it is supported by market-based or external enforcement mechanisms. **[**58]** *See id.* P 405c, at 29. But even an ineffective cartel may be invalid:

> The cartel need not attain the profit-maximizing price or output to be profitable and socially harmful; indeed, even relatively poorly functioning cartels can be quite profitable. As a result, while many horizontal arrangements are beneficial and lawful, they generally receive the highest level of antitrust scrutiny.

[*252] II Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 405c, at 29 (2d ed. 2002). Thus, if the offensive elements of a cartel are present, the cartel is likely to be held illegal per se under the *Sherman Act*, even if the cartel is less effective than its participants would like. *See* *Fisher, 475 U.S. at 265*; *NCAA, 468 U.S. at 100*; *Rice, 458 U.S. at 661*; XI Herbert Hovenkamp, ***Antitrust Law*** P 1902a, at 190-91.

The Second Circuit Court of Appeals quoted both *Rice*, *see* *Freedom Holdings I, 357 F.3d at 222* (quoting *Fisher, 475 U.S. at 265* (quoting *Rice, 458 U.S. at 661*)), and the approving language of *NCAA*, *see* *id. at 225* (quoting *NCAA, 468 U.S. at 100*), to **[**59]** support its holding that ***HN12***[] "horizontal agreements among competing sellers to fix prices or restrict output are, absent more, per se violations of Section I of the *Sherman Act*." *Id. at 225*. Under this understanding of the per se rule, my examination of the record in relation to the MSA and the related statutory enactments should focus on whether they "mandate[] or authorize[] conduct that necessarily constitutes a violation of the ***antitrust law*** in all cases," or place "irresistible pressure on a private party to violate the ***antitrust law***," and should not focus on the justifications for the alleged restraints. *Rice, 458 U.S. at 661*.

The question at hand is which strand of analysis of the per se rule to apply. Classically, arrangements among oligopolists and a state that reward price and output stability are considered socially harmful, and therefore invalid, without further consideration of redeeming social justifications. *See* *15 U.S.C. § 1*; *Fisher, 475 U.S. at 268-69* (citing *Schwegmann Bros. v. Calvert Distillers Corp., 341 U.S. 384, 95 L. Ed. 1035, 71 S. Ct. 745, 60 Ohio Law Abs. 81 (1951)* and *Midcal*); *cf.* *A.L.A. Schechter Poultry Corp. v. United States, 295 U.S. 495, 534-35 & 531 n.9, 79 L. Ed. 1570, 55 S. Ct. 837* (1935) **[**60]** (quoting *§ 3 of the National Industrial Recovery Act* as declaring "the policy of Congress to remove obstructions to the free flow of interstate and foreign commerce which tend to diminish the amount thereof; . . . to eliminate unfair competitive practices, [and] . . . to avoid undue restriction of production (except as may be temporarily required)," and invalidating the provision on other grounds). The Court of Appeals ruled to that effect, and immediately went on to question whether the *Parker v. Brown* exception rescued the antitrust restraint from invalidity. *Freedom Holdings I, 357 F.3d at 225-26*.

Cigarettes, however, are different from most other products, given the social ills caused by cigarette smoking and the perceived pernicious effects resulting from aggressive and extensive advertising and marketing of cigarettes. Classically, the public good is enhanced by free competition in pricing and vigorous and relatively unfettered advertising and marketing. Cheaper prices make goods more available, and drive free markets. But with respect to cigarettes, the public good can be furthered by higher prices and strong restraints on advertising and marketing, **[**61]** especially to young people. Higher prices and restrictions on advertising and marketing reduce the demand for cigarettes, lessening the injury to the public's health. Plaintiffs do not contest that cigarettes may be legitimately the subject of state governmental regulation, and any antitrust analysis of the effects of such regulation cannot be performed without giving proper consideration to the social purposes that state governments propose to achieve by such regulation.

[*253] Recent trends in ***antitrust law*** reflect a growing concern with potentially conflicting social policies. Labor law, for example, will permit a competitive restraint which classic antitrust analysis is likely to forbid. *See* *29 U.S.C. § 158* (protected activities under *Labor Management Relations Act*); *see, e.g.*, *Clarett v. National Football League, 369 F.3d 124 (2d Cir. 2004)*. This is so even where the restraint deals with applicants to a labor pool, for example, star high school football players forbidden to enter a hiring lottery run for the benefit of professional football teams, *see id.*, and even where the enforcement of such restraints potentially would create **[**62]** a violation, not only of classical ***antitrust law***, but also of closed shop provisions of the Taft-Hartley amendments to the *Labor Management Relations Act*. *See* *Communications Workers of America v. Beck, 487 U.S. 735, 747-54, 101 L. Ed. 2d 634, 108 S. Ct. 2641 (1988)* (reviewing the legislative history of the *Taft-Hartley Act of 1947*, and concluding that concerns over barriers to free employment were outweighed by concerns that unions' health not be eroded by free rider employees who declined to join but reaped the benefits of the unions' presence); *Marquez v. Screen Actors Guild, 525 U.S. 33, 36, 142 L. Ed. 2d 242, 119 S. Ct. 292 (1998)* (following *Beck*). In other fields, too, courts will refrain from strict application of antitrust doctrine because of sensitivity to other valuable social policies that potentially conflict with the interest of having free and unfettered markets, particularly where the conflicting social policy is expressed in a statute. *See, e.g.*, *Jung v. Ass'n of Am. Med. Colleges, 02 Civ. 873, 339 F. Supp. 2d 26, 2004 U.S. Dist. LEXIS 16099, 2004 WL 1803198 (D.D.C. Aug. 12, 2004)* (dismissing antitrust suit challenging medical residency matching **[**63]** system, based on recently passed *15 U.S.C. § 37b*); *Friedman v. Salomon/Smith Barney, Inc., 313 F.3d 796, 797 (2d Cir. 2002)* (alleged price-fixing scheme "enjoys implied immunity from antitrust laws because the antitrust laws conflict with securities regulatory provisions"); *Miller v. Am. Stock Exch., Inc. (In re Stock Exchs. Options Trading Antitrust Litig.), 317 F.3d 134, 150 (2d Cir. 2003)* (same). Judicial sensitivity to other policies potentially conflicting with antitrust laws has extended also to consider important social policies that may not be specified by statute. *See, e.g.*, *United States Postal Service v. Flamingo Industries (USA) Ltd., 540 U.S. 736, 158 L. Ed. 2d 19, 124 S. Ct. 1321, 1329 (2004)* (the "nationwide, public responsibilities of the Postal Service" render it outside the reach of ***antitrust law***); *Clarett, 369 F.3d at 130* (limiting discussion to "non-statutory exemption").

HN13[] This trend in favor of recognizing competing policies in the antitrust arena should apply here, where the considerable public health policies regarding cigarettes militate in favor of decreased consumption, particularly by young people, even if higher prices cause **[**64]** that end to be served, and even if higher prices are often considered antithetical to the goals served by ***antitrust law***. Classic antitrust analysis must take into consideration the right of states to seek to further other, and equally important, social goals, even at the expense of pure antitrust analysis. *See* John E. Lopatka & William H. Page, *State Action and the Meaning of Agreement Under the Sherman Act: An Approach to Hybrid Restraints*, *20 Yale. J. on Reg. 269, 313-16 (2003)* (calling *Bedell* "[a] particularly troublesome case" because "it is one thing to thwart a mandate that has little purpose other than to facilitate collusion, but it is another to inhibit a government from taking action that may sensibly serve a legitimate public interest, even if it may also create an environment favorable to tacit collusion"). It would thus seem that I should choose the first strand of per se analysis; in determining whether an antitrust **[*254]** violation has occurred, I should consider not only whether prices have risen and output has been restricted, but also the State's justifications for the statutes that have allegedly caused the rising prices and output restraints.

As discussed **[**65]** above, were I to choose this strand of per se analysis, I would find that plaintiffs have shown no likelihood of being able to prove a per se violation of the antitrust laws. The MSA had, as a principal goal, limiting the scope of advertising and marketing, particularly to young people, a goal that would be likely to result in fewer sales and higher prices. The substantial payments required of cigarette companies also would be likely to result in higher prices and fewer sales. The justifications behind the MSA and the related statutory enactments are substantial and, as the New York Supreme Court found, *State v. Philip Morris, 686 N.Y.S.2d at 568-69*, are closely tied to the payment provisions embodied in the MSA. Sales of cigarettes were checked by the MSA's ban on advertising to youth and numerous other measures, and by high cigarette prices. Cigarette companies accepted the onus of paying substantially for the injuries to public health caused by cigarette smoking, and this reimbursement of expenses was made to apply to all cigarette companies selling cigarettes in and to the settling states, not only to signatories of the MSA. A payment stream was created extending **[**66]** into the future, anticipating public health needs that would continue to flow from future sales of cigarettes. This system created by the MSA could not be effective unless roughly equivalent burdens would be imposed on all other companies engaged in selling cigarettes in a particular state, as well as on the signatories to the MSA. The payment provisions accordingly do not represent a "naked restraint" on competition. *Cf.* VII Areeda & Hovenkamp, ***Antitrust Law*** P 1509c, at 403. Rather, the higher cigarette prices directly further legitimate state goals.

Ultimately, however, it may not matter which strand of per se analysis to apply. Even under the strand of per se analysis that limits the investigation to the nature of the restriction and discounts any consideration of potentially meritorious justifications, plaintiffs have not shown a likelihood that the MSA and the Escrow and Contraband Statutes constitute a per se violation of the *Sherman Act.* That is because the effects of the MSA and the Escrow and Contraband Statutes have proved not to be anticompetitive, as demonstrated by the sales and market share data compiled by PriceWaterhouse. Nor is it clear that the contested MSA **[**67]** and statutory provisions were intended and promulgated as market restrictions.

The proofs thus far presented in the record show that the MSA and the Escrow and Contraband Statutes have not demonstrably restricted the competitiveness of the NPMs. The record shows clearly that the NPMs have made substantial gains in volume and market share since the settlement was executed. Between 1998, when the MSA was executed, and 2003, NPM sales have increased from 2.43 billion to 33.31 billion cigarettes, for an increase in market share from 0.5 % to 8.2 %. Their gains in market share have been taken mostly from the OPMs but also from the SPMs, and the SPMs also have taken market share from the OPMs. Sales by OPMs have declined over 110 billion, from 455.22 billion to 344.61 billion, for a decline of over 24 % of sales by OPMs, resulting in a decline of 12 % of the OPMs' market share. SPM sales have increased from 14.12 billion to 30.8 billion cigarettes, a substantial gain against the OPMs but a decline as measured against the NPMs. These facts are inconsistent with the allegations **[*255]** of a cartel, alleged in the Amended Complaint.

HN14[] A price fixing agreement is no less unlawful, however, if the parties **[**68]** to it fail to carry it out effectively. II Areeda & Hovenkamp, ***Antitrust Law*** P 405c, at 29. The Court of Appeals has also ruled that that the MSA, as alleged by plaintiffs and incorporated into the complaint, contains features of a cartel, and I must accept those rulings. *Freedom Holdings I, 357 F.3d at 226*; *Freedom Holdings II, 363 F.3d at 154*. Accordingly, if market conditions fail to bear out the arguments that the effect of the MSA's terms are anticompetitive, I must consider plaintiffs' arguments that the MSA's terms are anticompetitive in their intent or on their face. The Court of Appeals was required to accept these arguments in the posture of reviewing a motion to dismiss. In the present context, I may look to the evidence in the record and the competing interpretations of the MSA by the plaintiffs and the State.

Plaintiffs argue that the MSA and related statutory enactments establish a state-supported cartel; that the allocation of substantial payments among OPMs according to their relative market share, with adjustments that vary directly with their sales volume, provides a disincentive to gain market share at each other's expense and an **[**69]** incentive to increase their prices, rather than their output, as the way to maximize their profits. Thus, as plaintiffs argue, the OPMs have been increasing their prices even beyond that necessary to recoup their payments to the states, while experiencing decreased sales volume and market share. [16]

[70]** The MSA enables the OPMs to pay large sums to the states, and to continue paying large sums annually, by financing payments from future sales of cigarettes. The cigarette companies that signed the MSA presumably expected that they would be able to increase their prices to gain the extra revenue that would enable them to make the large payments due each year to the states. Since, in a normal market, companies without such burden could undersell the OPMs and eventually jeopardize the revenue stream upon which the states settled with the major cigarette companies, the MSA, in order to remain effective, had to protect the revenue stream due from the OPMs by creating an equivalent cost structure applicable to non-signatories.

The MSA accomplished that objective in two ways. First, manufacturers and importers of cigarettes who agreed to become signatories of the MSA within a sixty day period after the OPMs had executed the agreement gained an exemption from paying anything to the states to the extent their future annual sales remained at or below either 125 percent of their 1997 sales, or their 1998 sales, whichever sales level was higher; those SPMs also agreed to pay disproportionately **[**71]** greater amounts to the states than the OPMs to the extent their future sales exceeded those base levels. **[*256]** MSA Art. IX(i). [17] The effect, plaintiffs argue, was to entice manufacturers to join the MSA by offering them the benefits of the grandfather clause, and then to encourage these SPMs to follow the price leadership of the OPMs in order not to increase market share and thereby lose some of the cost advantage given to them if they maintain their sales at or below the base level. And the effect, plaintiffs argue, is significant since the PMs collectively control upwards of 90 percent of the cigarette market.

---

[16] A manufacturer, suffering an increase of costs, will normally wish to raise prices even more than necessary to recoup costs, in order to maintain desired profit margins and to compensate for reduced sales volume at the higher price level. The MSA provides, in such event, that the manufacturer's profits may prevent it from being entitled to the discount to the extent otherwise available for reduced sales volume. MSA Exh. E(b)(ii) reduces the OPMs' benefit from the Volume Adjustment if their income rises while volume of sales falls. However, the clause provides for only a percentage decrease in the Volume Adjustment, and it is possible, therefore, that OPMs may still increase their profits from price increases, even if they result in lower sales. The proofs did not treat this issue.

[17] The formula of increase is provided in MSA Art. IX(i)(2). *Freedom Holdings II, 363 F.3d at 153*, cites it as an example of an unlawful restraint on trade.

As to manufacturers and importers who did not join the MSA, the MSA provided the states with a strong incentive to enact measures to deter them from seeking a free ride based on a cost structure not including substantial, contractually **[**72]** required payments to the states. If PMs suffered a loss of sales and market share to the NPMs because of "disadvantages experienced as a result of the [MSA]," MSA Art. IX(d)(1)(C), the states would become subject to a trebled reduction in income from the PMs unless they passed and "diligently enforced" the Escrow Statute. MSA Art. IX(d)(2)(B). The states accordingly enacted the Escrow Statutes, requiring NPMs to make payments to the states based on their volume of sales. MSA Art. IX(d)(2)(B), (E), Exh. T. NPMs, not having become signatories to the MSA within the sixty-day period provided, are not granted an exempt base of sales, as are grandfathered SPMs, and thus are not benefited by the reduced, average cost base that SPMs enjoy. Furthermore, NPMs' escrow payments, because they are reversionary annually for interest accumulations and excess contributions, and reversionary after 25 years if states fail to sue or settle with them for having incurred expense because of injuries to the public health caused by cigarette smoking, are not tax deductible, as are the payments made to the states under the MSA by OPMs and SPMs.

The MSA provides a strong incentive for the states to "diligently **[**73]** enforce[]" the Escrow Statutes. MSA Art. IX(d)(2)(B). When the Escrow Statutes appeared not to be sufficiently effective, the states enacted Contraband Statutes. These used the tax stamp practices of the states to assure that manufacturers and importers complied with the Escrow Statutes, for if they failed to bring themselves within its payment obligations, they would not be issued tax stamps and their cigarettes would be considered "contraband" if sold or distributed within the affected state. However, the Contraband Statutes appeared not to be any more effective than the Escrow Statutes, as the statistics of growing sales and market share of the NPMs, set out above, clearly show. One stratagem employed by the NPMs became the subject of the next enactment, the amendment of the Allocable Share Release provision, enacted by thirty states, including, on October 15, 2003, by New York. NPMs that distributed cigarettes to only a few states paid their per-cigarette tax directly to the states in which they made sales, satisfying the Escrow and Contraband Statutes. But these states could retain only their allocable shares of the aggregate payments made by the NPMs; the balance had to be **[**74]** returned annually to the NPMs under the Allocable Share Release provisions as initially enacted. As a result, it appears that the NPMs continued to have a competitive advantage in comparison to the cost burdens of the OPMs and SPMs. The Allocable Share Release provisions were amended in order to limit the NPMs' ability to arbitrage the allocation relationships among the states, **[*257]** by terminating the states' obligations to the extent of such arbitrage.

The many critics of the MSA contend that it creates a state-protected cartel. *See* Margaret A. Little, *A Most Dangerous Indiscretion: The Legal, Economic, and Political Legacy of the Governments' Tobacco Litigation*, *33 Conn. L. Rev. 1143, 1171 (2001)*. They accuse the states of countenancing high prices to enable the OPMs to finance the substantial amounts they undertook to pay to the states, and of protecting the market shares of the OPMs at 1997 or 1998 levels by enacting Escrow Statutes, followed by Contraband Statutes, followed by amendments to the Allocable Share Release provisions. As Little states:

> Economists and legal analysts have written extensively on the anticompetitive effects of the MSA and the four **[**75]** state settlements. They have leveled pointed criticisms at the provisions of the MSA that create high barriers to entry, that entrench the current market shares of the settling tobacco companies, and that eliminate price competition and facilitate price fixing among the settling tobacco companies. . . . The consensus of the academic commentators who have analyzed the MSA and the four separate settlement agreements is that they pose serious antitrust concerns and are anticompetitive in their effects.

Little, *A Most Dangerous Indiscretion*, *33 Conn. L. Rev. at 1173-74*. The Court of Appeals agreed with these observations.

The State takes issue with plaintiffs' assertions that the payment provisions of the MSA are anticompetitive, arguing instead that they are neutral and serve legitimate state interests. Apportioning payments obligations among OPMs represents a fair way to divide the burden and to reflect changes in relative volume of annual cigarette sales; of greater relevance, apportionment among OPMs is an internal matter which does not affect the ability of NPMs to compete in any material way. Likewise, the Volume Adjustment is a means of advancing the goal **[**76]** of reduced cigarette sales; it rewards decreasing sales and punishes increases. The granting of exemptions for SPM payments, if market positions did not grow from 1997 or 1998 levels, and disproportionately higher payments obligations if and to the extent SPMs gained market share above those levels, provided an incentive to SPMs to join the MSA and be bound by its restrictions, but limited or removed those cost benefits to the extent SPMs sought to take advantage of them and gain a competitive edge through the incentives provided by the MSA. *See* Lopatka & Page, *State Action and the Meaning of Agreement*., *20 Yale J. on Reg. at 315* (noting that "nothing in the MSA or the [Escrow] Statutes explicitly authorized the Majors to set prices jointly" and that "the best anticompetitive story that can be told" is that the large increase in OPMs' prices suggested that the payment provisions indirectly "fostered tacit collusion").

Noting the dictum of the Court of Appeals that a flat tax on cigarettes would not raise antitrust concerns, *Freedom Holdings I, 357 F.3d at 229*, New York State argues that the payment obligations provided by the MSA are the equivalent. Thus, **[**77]** NPM payments, by being fixed per cigarette sold, constitute a flat tax and, although differently expressed, amount to less than the per cigarette cost to OPMs and non-grandfathered SPMs. And the cost to grandfathered SPMs, although less on average because of the exemption based on 1997 and 1998 sales, are the same or greater with respect to incremental sales above the grandfathered levels. As the testimony of experts showed, production decisions are driven more by incremental **[*258]** than by average costs. The conclusion urged by New York State is that the MSA does not establish a cartel, particularly as it might affect the competitive abilities of NPMs. The State argues, further, that the repeal of the Allocable Share Release provision of the Escrow Statute is irrelevant, because New York has not in practice been releasing to depositors any portion of escrow payments beyond New York's allocable share.

Faced with these competing explanations of the intrinsic nature of the MSA and the Escrow and Contraband Statutes, I cannot accept plaintiffs' arguments at face value without supporting evidence, at least not in connection with a motion for a preliminary injunction. *See* Lopatka & Page, **[**78]** *State Action and the Meaning of Agreement*., *20 Yale J. on Reg. at 318* (calling for "intent evidence" to identify restraints). And the evidence plaintiffs have offered on the record is insufficient to prove an anticompetitive intent underlying the MSA. *See* *NCAA, 468 U.S. at 100* (per se condemnation attaches to a restriction where "the probability that these practices are anticompetitive is so high" that "the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output"). Rather, the evidence seems to fit more closely with the State's view. The escrow payments required of NPMs are essentially a flat tax, assessed at a flat rate per cigarette sold, which the Court of Appeals ruled could be enacted. *Freedom Holdings I, 357 F.3d at 229*; *cf.* *Freedom Holdings II, 363 F.3d at 152*. The statistical data, as provided above, show that NPM payments are less than the payments of OPMs and of non-grandfathered SPMs. As compared with those manufacturers, the assessment on NPMs' sales is, if anything, more favorable than a flat tax, and the NPMs have no basis to complain.

It is true that **[**79]** NPM escrow payments are higher per cigarette sold than payments made by SPMs averaged down by the basis of 1997 or 1998 levels provided by the grandfather clause. A comparison of average costs, however, is not necessarily relevant. Jonathan Gruber, an MIT economist who submitted an affidavit on the State's behalf, teaches that marginal costs, not average costs, drive manufacturers' decision regarding how to price their products and how many cigarettes to sell. Manufacturers have an incentive to continue producing so long as the marginal costs incurred in making an additional sale are less than the revenue anticipated from that sale. Additional sales will be profitable up to that point, and accordingly, price and output levels are determined by costs on the margin, rather than by average costs. Grandfathered SPMs have lower average costs, but for all sales beyond their base levels (the number of sales which meets their 1998 or 125 % of their 1997 market shares), their marginal costs stemming from the MSA will continually rise - and at a higher rate than the marginal costs of NPMs stemming from the Escrow Statutes. NPMs, which pay a flat fee, will maintain the same MSA-derived marginal **[**80]** costs throughout their production. There was no proof that the pricing structure of the NPM payments yields a disadvantage, vis-a-vis the grandfathered SPMs, that would deter them from continuing to produce and promote their products. Instead, the increased marginal costs to the SPMs above the grandfathered levels can be viewed as a means of recouping those funds which were lost to the states through the grandfather provision.

The NPMs also argue that their payments suffer in comparison with those of all PMs because their payments are not tax deductible, while those of the PMs are. This fact, however, cannot by itself conclusively show that the NPMs suffer a competitive **[*259]** disadvantage. The structure of the NPMs' escrow payments also differs from the structure of PM payments in other respects that are more beneficial to the NPMs: the NPMs retain reversionary rights to annual interest on their payments, and, the amendment to the Allocable Share Release provision aside, to the entirety of their payments above the level of the State's allocable share. Further, the NPMs retain a reversionary interest in the entirety of their escrow payments to the extent the State cannot collect on a lawsuit **[**81]** against them, or settlement with them, within 25 years. These benefits, which are not available to the PMs, appear to be substantial, and there has been no evidence to indicate that they are outweighed on the whole by the tax liability. I also note that if the tax liability of the escrow payments does in fact outweigh their relative benefits, the State argues that the tax liability may be traded away in exchange for those benefits. Although plaintiffs have attested that such an exchange is not possible in other states, New York State has maintained that it would be possible here, and neither side has submitted any evidence regarding the stance of the IRS on this issue.

Accordingly, plaintiffs have failed to show a likelihood that the MSA, or the Escrow or Contraband Statutes, constitute per se violations of the antitrust laws. Even were I to select the strand of per se analysis that looks to the nature of the restriction and not to its justifications, there is no indication from the evidence that the challenged provisions of the MSA and the Escrow and Contraband Statutes have the effect of stifling competition, or that they are facially anticompetitive. [18] I therefore hold that plaintiffs **[**82]** have failed to establish a likelihood of success that the MSA and the statutes enacted pursuant to it constitute a per se violation of the *Sherman Act*.

I hold to this effect with respect to both the Escrow and Contraband Statutes. However, the October 15, 2003 amendment to the New York Allocable Share Release provision presents a different set of considerations. Each state, under the MSA, can retain only an agreed percentage of an NPM's aggregate contributions and must return any excess to the contributor. The states thus have agreed that the **[**83]** net escrow thus provided is sufficient to secure them against that manufacturer's or importer's eventual liability for a cigarette-based lawsuit. Any excess that the states wish to retain is, by the MSA's definition, surplus to their needs, and discriminatory against the NPMs, intended only to discourage the NPMs' competitive practices. On the record as it currently stands, the states have not shown any legitimate need to enact the Allocable Share Release provisions, except to give more aid and comfort to the OPMs than they should have to redress competitive disadvantage imposed by the MSA. Indeed, the State has failed to elicit any justification whatsoever for its passage of the amendment to the Allocable Share Release provision, stating only that the amendment is inconsequential because the provision had never been invoked. It appears from the record - including the fact that the repeals of the Allocable Share Release provision began occurring shortly after the OPMs fixed on them as lobbying goals, as reflected in their corporate literature - that the states passed these amendments **[*260]** purely at the behest of the OPMs, and without any serious consideration of balancing the anticompetitive **[**84]** effects and any additional public health benefits that might be produced. I hold, therefore, that the plaintiffs have shown a likelihood of success with respect to the amendment to the Allocable Share Release provision.

2. *Parker v. Brown*

The Court of Appeals accepted plaintiffs' complaint as validly alleging that the MSA and ancillary statutes constituted a per se violation of the antitrust laws, and, assuming the truth of that allegation, proceeded to address whether they should be exempted from liability under the doctrine of *Parker v. Brown*. I assume, for the purposes of this section, that the MSA and ancillary statutory enactments constitute a per se antitrust violation, and I turn to consider, under *Parker v. Brown*, whether "(i) the restraint in question is 'clearly articulated and affirmatively expressed as state policy,' and [whether] (ii) the policy is 'actively supervised' by the state itself." *Freedom Holdings*

---

[18] To the extent that any payment whatever could be seen as raising prices and restricting output, the Court of Appeals has laid such arguments to rest by ruling that a flat tax would be permissible, and such payments do not constitute per se violations of the antitrust laws because they are substantially justified by the public health gains which they advance. *Freedom Holdings I, 357 F.3d at 229*; *cf. Freedom Holdings II, 363 F.3d at 152*.

I, 357 F.3d at 205 (quoting *Midcal, 445 U.S. at 105*); *see also* *Freedom Holdings II, 363 F.3d at 155, 157*. Judge Winter, for the majority, ruled that the State likely failed both criteria. Judge **[**85]** Sack, concurring, found that the State likely satisfied the first criterion, but failed the second. However, the true test of plaintiffs' allegations requires that they be tested against the actual proofs, and this is my task in the context of this motion for a preliminary injunction. *Freedom Holdings II, 363 F.3d at 157*.

In his rulings, Judge Winter elaborated that the restraint had to be not only "an express act of the state," a requirement that the State had met, but the State's purposes in agreeing to, and enforcing, the restraint had also to be "revealed" and shown to have a valid nexus to the restraint imposed. *Freedom Holdings II, 363 F.3d at 155* (quoting *Freedom Holdings I, 357 F.3d at 227*). Elaborating further, Judge Winter held that even though the State had not adequately revealed its purpose, that failure, alone, would not be crucial. *Id.* The crucial issue is whether or not the State "actively supervised" the effects of its policy to prevent undue anticompetitive repercussions. *Freedom Holdings I, 357 F.3d at 231*. Thus, all three judges agreed that plaintiffs' allegation, that the State was not actively **[**86]** supervising the antitrust characteristics of the MSA and ancillary statutory enactments, was sufficient to uphold the complaint.

On the basis of the factual record presented to me, I now find that plaintiffs have not demonstrated a likelihood of success in showing either that the State has failed to reveal its underlying policies or that the State has failed to supervise actively the effects of its enactments. The several states, New York among them, settled with the four leading cigarette companies on the basis of the complaint they brought against them. As described earlier, the states sought substantial equitable and legal relief against the cigarette companies: compelling them to pay large sums to compensate for causing major injury to the public health and, by various measures, dampening future demand for cigarettes and restricting the cigarette companies' marketing and distribution strategies and behavior. *See* *New York v. Philip Morris, 686 N.Y.S.2d at 568-70*. The states substantially accomplished their objectives by their settlement with the cigarette companies, as reflected in the approval of the New York settlement by the New York Supreme Court. *Id.* The **[**87]** State accomplished its objectives in part through increasing production costs to all manufacturers: the increase in costs, passed along to consumers in the form of increased **[*261]** prices, drove down demand, and the increased costs facing every manufacturer prevented any manufacturer from selling at an artificially low price, thereby taking advantage of others' compliance and spoiling the settlement. Clearly, the MSA, and the statutory enactments that implemented the MSA, reflect the policies expressed in its lawsuit against the OPMs.

As for the issue of "active supervision," the Court of Appeals observed:

> We are directed to no mechanism in the MSA or any of the related legislation whereby New York may "review[] the reasonableness" of the pricing decisions of tobacco manufacturers. *Midcal, 445 U.S. at 105*. Nor is there provision for New York to "monitor market conditions or engage in any 'pointed reexamination' of the program." *Id. at 106*. The PMs are therefore free to charge the profit maximizing price, the classic monopoly result.

Id. at 231.

New York State takes issue with these observations. The MSA provides a mechanism of monitoring: **[**88]** careful and reliable collection of statistical information by a nationally recognized firm of certified public accountants, for review by the states, the public, and actual and potential competitors, like plaintiffs. The statistical information shows, very clearly, that the MSA and the Escrow and Contraband Statutes have not had anticompetitive effects, and so long as that remains true, a careful collection and review of the data is all the supervision that is necessary to check any undue anticompetitiveness, and thus all that can be demanded by the law.

The statistical data show, as has been noted above, that the NPMs have successfully gained market share during the life of the MSA. Moreover, the data show that the demand curves for cigarettes are not inelastic, as plaintiffs alleged, but price-sensitive. Further, the NPMs' payment structure is not tied to that of the PMs or to their market share, and, contrary to plaintiffs' allegations, their incremental costs do not rise with their volume of sales, and they are not in any manner obliged to increase their prices in lock-step with the OPMs. In consequence, the price increases charged by the OPMs to finance their payment obligations **[**89]** to the states have caused them to lose substantial market share to the NPMs. That is, price increases have resulted in reduced sales, followed by additional price increases to compensate for lost sales, resulting in even more lost sales. The NPMs have succeeded to take away market share from the PMs, and not even the Escrow and the Contraband Statutes have succeeded in reversing the trend.

Because the State has closely tracked the competitive effects of the MSA and found no anticompetitive impact, no further active supervision is necessary. Further, the market dynamics created by the MSA have been the equivalent of "active supervision." As long as the NPMs can compete, the dangers of cartelization are checked. Even assuming that the MSA does enable a cartel, the *Parker v. Brown* exemption should apply, for the State has articulated its policies for the MSA explicitly in its underlying complaint, the terms of the MSA are appropriately tied to those policies, and the State remains poised through watchful statistical collection to correct undue restraints. Indeed, the New York Attorney General recently pressed claims to enforce the provisions of the MSA restricting cigarette companies **[**90]** from marketing cigarettes to youthful populations. And SPMs have recently sued the State because of its failures to enforce protective (and, presumably, anticompetitive) measures desired by the SPMs. *See* **[*262]** Daniel Wise, News in Brief, *Spitzer Accuses Company of Marketing Kools to Youths*; and Daniel Wise, News in Brief, *Tobacco Firms Accuse Five States of Failing Obligations*, N.Y.L.J., June 17, 2004, at 1.

Plaintiffs have not shown a likelihood of success of being able to prove their allegations that the PMs have gained the ability to raise prices without losing market share, or that the Escrow and Contraband Statutes were passed for a discriminatory purpose, rather than to prevent NPMs from undermining the settlement and the public health purposes that the settlement was intended to serve. The Escrow and Contraband Statutes have prevented NPMs from free-riding on the payments required of OPMs and SPMs, by requiring NPMs to set aside proportionately equivalent funds to assure the states compensation will be available to them for injuries to the public that the NPMs are causing and will continue to cause by selling and distributing cigarettes within the settling states.

That **[**91]** is not the case, however, with respect to the recent repeal by the State of the Allocable Share Release provision, applicable to NPMs. As explained above, no compelling case has been advanced by the State showing a need for this enactment. The only purpose appears to be a desire to accommodate the PMs, and to protect them unduly against competition from the NPMs. Moreover, no nexus has been shown between protecting the health goals of the MSA and restricting the terms on which escrowed funds can be released. Plaintiffs have shown a likelihood that *Parker v. Brown* does not exempt the repeal of the Allocable Share Release provision of the Escrow Statute.

C. *Irreparable Injury*

Plaintiffs contend that they are irreparably harmed by the alleged cartel, which erects high barriers against entry into the cigarette market in New York State. Even if they did enter the New York market, plaintiffs assert, they would be penalized for any increase in market share, so that the Escrow and Contraband Statutes would effectively keep their market share minimized. Plaintiffs allege that by exacting penalties on sales by SPMs and NPMs which represent an increase in market share, the output cartel **[**92]** established by the MSA and the related statutes allows the OPMs to set cigarette prices at the levels of their choosing and requires SPMs and NPMs to follow suit. According to plaintiffs, this scheme effectively fortifies the market position of the OPMs, and requires SPMs and NPMs to resign themselves to accepting smaller market positions.

I initially take care to circumscribe the issue on this prong of the motion for preliminary injunction.***HN15***[] In searching for irreparable harm, the existence of a cartel is irrelevant; the question instead is what ongoing damages plaintiffs have suffered and are likely to suffer because of the alleged cartel. Further, damages which can be remedied at the close of trial are definitionally not irreparable. *See* *Great Earth, 302 F. Supp. 2d at 253* (citing *Pacific Electric Wire & Cable Co. v. Set Top Int'l, Inc., 2003 U.S. Dist LEXIS 23270 (S.D.N.Y. Dec. 30, 2003))*. Thus, a loss of earnings on account of the cartel may not necessarily be irreparable, because if plaintiffs prevail at trial, they may recover their losses from the manufacturing defendants, plus interest. [19] A loss of market **[*263]** share, however, is difficult to quantify **[**93]** and represents the loss of an opportunity which may not be quickly or easily regained, and thus may be considered irreparable. *Cf.* *Cook Inc. v. Boston Scientific Corp., 2002 U.S. Dist. LEXIS 19223 (N.D. Ill. Oct. 1, 2002)*, *aff'd as modified*, *Cook Inc. v. Boston Scientific Corp., 333 F.3d 737 (7th Cir. 2003)* (granting injunction where the parties were competing in a race to the market, because damages based on loss of market share would be difficult to quantify); *Knudsen Corp. v. Nevada State Dairy Comm'n, 676 F.2d 374 (9th Cir. 1982)* (affirming grant of preliminary injunction under *Parker v. Brown* because Nevada milk pricing laws harmed plaintiff's ability to compete by setting higher sale prices). And plaintiffs allege that the cartel prevents them from entering or gaining any foothold in the New York market.

[94]** Many provisions of the MSA have no bearing whatever on the NPMs' market share, and thus are not suitable subjects of a preliminary injunction. The payment structure for OPMs and SPMs, by themselves, are irrelevant as regards the NPMs. The allocation of payments among PMs, as well, has no bearing on NPM sales or market share. Although the OPM payments are adjusted based on volume, there is no indication that such an adjustment impacts NPMs' ability to gain market share. The payment aspects of the NPM Adjustment similarly do not impact NPMs, since the NPM Adjustment is effectively blocked by the universal passage of Escrow Statutes. If the NPM Adjustment affects the competitiveness of NPMs, it is in the incentives to the states to pass Escrow and Contraband Statutes, not in the NPM Adjustment's payment provisions standing alone.

The grandfather clause, by decreasing the payment obligations and therefore also the production costs of grandfathered SPMs, appears to give a competitive advantage to the SPMs against the NPMs, and perhaps to impact negatively the competitiveness of NPMs. This disadvantage may not constitute irreparable harm, however. As explained by the State's expert, because **[**95]** manufacturers and distributors make production and pricing decisions based on incremental costs rather than on average costs, incremental costs are the more important measure of competitive effect. And because the SPMs' incremental costs are higher - they must pay an increasingly high percentage as their market share rises above grandfathered levels, *see* *Freedom Holdings II, 363 F.3d at 153* - the NPMs should not be deterred from producing and selling cigarettes based on the competition from grandfathered SPMs, and as such are not irreparably harmed by the grandfather provision.

Plaintiff faces another, more crucial problem in demonstrating irreparable harm: the evidence shows no adverse impact on NPMs' market share stemming from the MSA or the Escrow or Contraband Statutes. Instead, the statistical evidence shows, and plaintiffs acknowledge, that the SPMs and NPMs have in fact gained market share over the life of the MSA, in comparison with the OPMs, who have lost market share. Further, the data show, and plaintiffs acknowledge, that the NPMs have gained market share more rapidly and to a larger extent than the SPMs. As such, it is difficult to see how the NPMs have **[**96]** been irreparably harmed **[*264]** by the alleged restrictions on their gaining market share.

The Court of Appeals was aware of this issue, and, in 12(b)(6) posture, accepted plaintiffs' explanation for it. As Judge Winter explained it, the OPMs suffered a loss in market share because of "difficulties in enforcing the Escrow Statute, in particular against foreign manufacturers." *Freedom Holdings I, 357 F.3d at 231*. However, the Contraband Statutes were passed "in response to this threat," *id.*, with the effect, as alleged by plaintiffs, that the cartel would tighten, the loopholes would be closed, and plaintiffs and other NPMs would not be able to sell cigarettes outside of the settlement structure, thereby having to adhere to price and output leadership by the majors.

If this explanation were accurate, however, the market shares of the SPMs and OPMs would have leveled off or declined beginning with the passage of the Contraband Statutes on December 28, 2001. Yet the evidence shows, and plaintiffs acknowledge, that the reverse continued to happen; SPMs, and even more prominently NPMs,

---

[19] I do not intend any implication regarding the State's exposure to a monetary judgment in an antitrust case under the *Eleventh Amendment*. *See*, *e.g.*, *Bd. of Trustees of Univ. of Ala. v. Garrett, 531 U.S. 356, 363-64, 148 L. Ed. 2d 866, 121 S. Ct. 955 (2001)* (*Eleventh Amendment* immunity from suit).

continued to gain market share, to the detriment of the OPMs. The evidence thus belies **[**97]** not only plaintiffs' allegations, but also their interpretation of the facts.

At oral argument on the present motion, plaintiffs again alleged that the State had "turned the corner." Tr. June 2, 2004, at 26. Plaintiffs argued that the repeal of the Allocable Share Release provision would force NPMs into submission; that from the date of the repeal onward, the cartel would be fully and firmly established; and that plaintiffs and all others would find it impossible to gain market share in New York, and presumably in the other twenty-nine states which have repealed that provision.

Before I analyze that claim, I note its significance. Plaintiffs filed suit in 2002, alleging that the cartel was already firmly in place and the barriers to their entry into the New York market were already prohibitive. As defendants observed at oral argument, plaintiffs now are essentially admitting that the evidence, as of the time they filed suit, was insufficient to sustain their claim, and they are asking me now to focus not so much on the evidence relating to the prior enactments, as on the evidence since October 15, 2003, the effective date of the repeal of the Allocable Share Release provision, and **[**98]** on what may be likely in the future. In effect, plaintiffs concede that the passage of the Escrow and Contraband Statutes did not sufficiently cause them to lose market share. Indeed, the statistics of sales and market shares collected by PriceWaterhouse require that concession. Plaintiffs thus concede, as the facts of record require, that they are not able to prove a likelihood of irreparable injury, except for speculation what the future might bring. I thus decline to grant a preliminary injunction, enjoining enforcement of the Escrow and Contraband Statutes, or the MSA. I now turn to analyzing the repeal of the Allocable Share Release provision.

As explained above, the repeal of the Allocable Share Release provision, *N.Y. Pub. Health Law § 1399-pp*, as amended, 2003 N.Y. Laws 666, eff. Oct. 15, 2003, took away the NPMs' reversionary right to escrow payments beyond the rights or needs of particular states, and provided a windfall to those states. The repeal discriminated against NPMs and served to deter them from competing in local and regional markets, where they otherwise could have concentrated costly marketing and distribution expenses, minimized **[**99]** their payments to the states, and competed effectively against the cigarette majors. Thus the barriers against NPMs have been heightened dramatically by the **[*265]** repeal, and the ability of an NPM to compete within a regional market has been arrested. Plaintiffs submit affidavits from executives at several NPMs which aver that because their payment obligations have been dramatically increased, they have been forced to raise prices, and as a result their sales have substantially decreased. S&M Brands, which chose to maintain low prices and increase its market share in the southeast, has suffered a competitive disadvantage in Tennessee and Kentucky. CigTec Tobacco, LLC, another NPM which competed vigorously under the Escrow and Contraband Statutes, was forced by the repeal to increase its price from $ 7.50 to $ 10.60 per carton. As a result, between the first and second halves of 2003, it suffered a 69 percent decline in sales in Louisiana and a 39 percent decline in sales in Alabama. ITP, the second named plaintiff, suffered similarly. After raising its prices in the face of the repeal of Indiana's statute, its sales dropped over forty percent, from approximately 400,000 to approximately **[**100]** 232,000 cigarettes a month. Four months after Indiana repealed its statute, ITP could no longer afford to sell cigarettes in Indiana.

This evidence suggests, therefore, that plaintiffs, and other NPMs on whose behalf they also bring suit, are likely to be caused - and in some cases appear already to have been caused - irreparable injury stemming from the repeal of the Allocable Share Release provision. The evidence is, undoubtedly, still preliminary. Most of the affidavits regarding the economic impact of the repeal of the Allocable Share Release provision came into the record on supplemental briefing, and as such have not been subjected to testing or to a full opportunity for the State to oppose them. The State thus may yet defeat any requested permanent injunction. Nonetheless, plaintiffs have adequately shown a likelihood of irreparable harm from the repeal of the Allocable Share Release provision. In the absence of adequate state justifications for repeal, other than to defer to the OPMs and discriminate against the NPMs, I hold that plaintiffs have made a sufficient showing of irreparable injury with regard to the repeal of the Allocable Share Release provision, and I grant plaintiffs' **[**101]** motion to enjoin enforcement of the repeal.

III. Conclusion

I find that plaintiffs have demonstrated neither a likelihood of success on the merits nor irreparable harm with regards to the MSA, the Escrow Statute, and the Contraband Statute. I thus deny plaintiffs' motion for preliminary injunction inasmuch as it is directed against these provisions. I find, however, that plaintiffs have made a showing of likelihood of success and of irreparable harm as regards the repeal of the Allocable Share Release provision. Accordingly, to that extent, plaintiffs have satisfied the requirements for, and I accordingly grant, a preliminary injunction, enjoining the amended version of *N.Y. Pub. Health Law § 1399-pp*, as amended, 2003 N.Y. Laws 666, eff. Oct. 15, 2003.

The parties shall appear before me on October 4, 2004, at 4:00 p.m. for a status conference, to discuss the status of the pending motion for summary judgment and future proceedings.

SO ORDERED.

Reporter
2004 Minn. Dist. LEXIS 19 *; 2004 WL 2114991

Gordon Gutzwiller, on behalf of himself and all others similarly situated, Plaintiff vs Visa U S A, Inc and MasterCard International, Inc, Defendants

Core Terms

consumer, anti trust law, merchants, purchaser, debit card, antitrust, plaintiff's claim, indirect, competitor, damages, debit, Defendants', restrained, retailers, factors, indirectly, products, parties, prices, credit card, courts, federal court, lack standing, artificially, MEMORANDUM, overcharge, inflated, antitrust violation, standing to sue, consumer goods

Judges: **[*1]** Honorable Galen J Vaa, Judge of District Court.

Opinion by: Galen J Vaa

Opinion

ORDER AND MEMORANDUM

The above-entitled matter came before the undersigned Court on the 29th day of July, 2004, at the Clay County Courthouse, Moorhead, Minnesota, upon motion of the Defendants to Dismiss the Plaintiff's Complaint for Failure to State a Claim Upon which Relief can be Granted, pursuant to Rule 12.02 (e) of the Minnesota Rules of Civil Procedure.

The following attorneys appeared as counsel for the parties Drew Hanson and Michael J Williams appeared on behalf of the Plaintiff, David Crosby and Steven Bomse appeared on behalf of Defendant Visa U S A, Inc, and Peter Gleekel and Gary Carne appeared on behalf of Defendant MasterCard.

Having heard and/or read the oral and written submissions of counsel for the parties and being further advised in the premises, the Court now enters the following **ORDER**

1 Defendants' Motion to Dismiss Plaintiff's claim for failure to state a claim upon which relief can be granted is hereby **GRANTED**, and
2 Court Administration shall enter a Judgment, forthwith, dismissing the Plaintiff's Complaint with prejudice, and
3 The attached Memorandum is incorporated by reference herein

Dated this 15th day of September, 2004

/s/ Galen J Vaa

Honorable Galen J Vaa **[*2]**

Judge of District Court

MEMORANDUM

I. Procedural History

In October of 1996, a series of class action lawsuits were filed in the United States District Court for the Eastern District of New York, *In re Visa Check/MaterMoney Antitrust Litig (a/k/a Wal-Mart Stores, Inc et al v Visa U S A. Inc and MasterCard Int'l, Inc*) (hereafter the Wal-Mart action) No 96-CV-5238 (JG), by certain retailers and retail trade associations against the Defendants. Generally, the retailers alleged that Visa and MasterCard violated federal antitrust laws by forcing merchants who accepted their credit cards to accept Visa and MasterCard branded debit cards. Plaintiffs claimed that defendants' actions caused merchants to pay excessive fees on Visa and MasterCard off-line debit transactions, which injured competition, merchants and consumers. The retailers sought (1) an injunction prohibiting Defendants from engaging in the alleged violations of the federal antitrust laws (including the elimination of the alleged forced acceptance of the Visa and MasterCard-branded debit cards by merchants who accept Visa and MasterCard-branded credit cards), and (2) damages for the alleged excess portion of fees paid.

In February **[*3]** 2000, the federal court certified a nationwide class of more than four million merchants who had accepted Visa or MasterCard cards within the statute of limitations period *See* *In re Visa Check/MasterMoney Antitrust Litig., 192 F R D 68, 90 (E D N Y 2000)*, *aff'd*, *280 F 3d 124 (2d Cir 2001)*, *cert denied*, *536 U.S. 917, 122 S. Ct. 2382, 153 L. Ed. 2d 201 (2002)*. The class action was settled in April 2003, on the eve of trial, and the federal court recently issued an order providing final approval of the settlements. *In re Visa Check/MasterMoney Antitrust Litig, 297 F Supp 2d 503 (E D N Y 2003)*. Pursuant to the settlements, Visa and MasterCard have eliminated the asserted tying of credit and debit services to merchants, thereby allowing merchants to reject consumers' Visa or MasterCard branded debit cards but still accept consumers' Visa or MasterCard branded credit cards. Additionally, Visa and MasterCard will also collectively pay, over ten years, more than three billion dollars into a settlement fund *Id. at 507-09*.

The current action is one of several lawsuits filed in a number of state courts throughout the country. In this case, Plaintiff brings this contemplated class action on behalf of Minnesota consumers who have purchased goods from merchants who (1) accepted Visa and MasterCard credit cards as a form of payment, and (2) were effectively forced by Visa and MasterCard to accept *Visa Check* and *MasterMoney* signature debit **[*4]** cards as a condition of accepting Visa and MasterCard credit cards.

Plaintiff's complaint is based on the same wrongful conduct allegedly committed by Visa and MasterCard that was at issue in the federal merchant class action. Specifically, Plaintiff here claims to be a Minnesota resident who "has made purchases within the state of goods and services from one or more retailers that were forced by Visa and/or MasterCard to accept *Visa Check* and/or *MasterMoney* debit cards as a condition of being able to accept Visa and/or MasterCard credit cards". Complaint ¶ 13 Plaintiff brings this action on behalf of a class of all persons who purchased goods in Minnesota from merchants who accepted Visa and/or MasterCard cards *Id.* at ¶17.

Plaintiff asserts that as a result of the alleged wrongful conduct of Visa and MasterCard, trade was restrained in the market for debit card services *Id.* at ¶ 48. Plaintiff further asserts that the alleged restraint caused merchants to pay "supra-competitive prices for the debit card products of Visa and MasterCard," and in return passed the overcharge onto the consumers *Id.* at ¶¶ 57-58. Plaintiff claims the purported overcharge is passed onto the consumer in the **[*5]** price of all goods bought by consumers — "not only consumers who use the debit card products, but by all consumers who shop at merchants that accept Visa and MasterCard". Complaint ¶ 7 Thus, Plaintiff claims he paid higher prices on all purchases made from merchants who accept Visa and/or MasterCard, regardless of the method of payment (i e credit, debit, check or cash) and regardless of the product purchased (i e clothing, food, gas, or dry cleaning).

Based upon said allegations, Plaintiff claims that the alleged wrongful conduct of Visa and MasterCard constitutes a tying arrangement in violation of the Minnesota ***Antitrust Law*** under *Minn Stat § 325D.51*. Complaint ¶¶ 61-67. Plaintiff is seeking damages and attorney's fees for the alleged violation by the Defendants *Id* at ¶ 66.

In summary, Plaintiff alleges in his Complaint that thousands of merchants located throughout Minnesota who have accepted Visa and MasterCard credit cards as a form of payment, have had to artificially inflate the prices of retail goods sold to Minnesota consumers to recoup the supra-competitive, artificially inflated amounts that they paid when they were forced to accept *Visa Check* and *MasterMoney* debit cards. Notwithstanding **[*6]** the fact that the merchants received a multibillion-dollar settlement with the Defendants in the federal lawsuit, Plaintiff's complaint alleges that the actual costs of Defendants' monopolistic conduct was borne by the American consumer, including Minnesota consumers.

Plaintiff's sole claim for relief in the Complaint is based on the Minnesota ***Antitrust Law*** Complaint ¶¶ 61-67. *Minn Stat § 325D.51* (2002), provides that a "contract, combination or conspiracy between two or more person in unreasonable restraint of trade or commerce is unlawful". Further, section 325D.51 provides a damages remedy to "any person injured directly or indirectly by a violation of sections 325D.49 to 325D.66."

II. Summary of Claims Advanced by the Parties

In their memorandum, Defendants claim that Plaintiff's complaint must be dismissed pursuant to Rule 12.02 (e) of the Minnesota Rules of Procedure tor the following reasons

> 1 Plaintiff lacks standing to sue because any injuries incurred are too "remote" in nature,
>
> 2 Plaintiff has no standing to bring this action, because he is neither a direct and/or indirect purchaser of the Visa/MasterCard goods or services that were the subject of the Defendants alleged antitrust activities

In response, Plaintiff alleges that **[*7]** *Minn Stat § 325D.49* cloaks him with standing to sue, because he is a consumer that was "indirectly" injured by the Defendants alleged violation of Minnesota ***Antitrust law***(s). Thus, Plaintiff claims that Minnesota law does not require that a Plaintiff be either a direct or an indirect purchaser to have standing to pursue a claim under the Minnesota ***Antitrust law***. Further, Plaintiff requests that the Court adopt the "target area" test for standing advocated by Supreme Court Justice Brennen in his dissent in the case of *Illinois Brick Co v Illinois, 431 U.S. 720, 760, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*.

III. Standard of Review

Rule 12.02 (e) of the Minnesota Rules of the Civil Procedure, reads as follows

> Every defense, in law or fact, to a claim for relief in any pleading, whether a claim, counterclaim, cross-claim, or third-party claim, shall be asserted in the responsive pleading thereto if one is required, except that the following defenses may at the option of the pleader be made by motion.
>
> (e) failure to state a claim upon which relief can be granted

The question before the Court in a motion to dismiss for failure to state a claim upon which relief can be granted is whether the pleadings set forth a legally sufficient claim for relief *Witzman v Lehrman, Lerhman & Flom, 601 N.W.2d 179, 185 (Minn 2003)*. A "complaint should be dismissed if there are no facts **[*8]** alleged that could support the claim" *Rohricht v O'Hare, 586 N. W. 2d 587, 588 (Minn App 1998)*. At the oral heating relative to this matter, counsel for the parties agreed that Rule 12.02 (e) could be invoked if the facts alleged in the Plaintiff's complaint clearly indicates that the Plaintiff lacks standing to pursue the pending action.

IV. Minnesota ***Antitrust Law***

In 1971, the Minnesota Legislature enacted the Minnesota ***Antitrust law*** *Minn. Stat. § § 325D.49 to 325D.66*. Specifically, *Minn. Stat. § 325D 51* (2002) provides that a "contract, combination or conspiracy between two or more person in unreasonable restraint of trade or commerce is unlawful." In 1984, the legislature amended the original Act by providing a damages remedy to "any person injured directly or indirectly by a violation § 325D.49 to § 325D 66".

Historically, Minnesota Appellate Courts have interpreted Minnesota's antitrust laws in a manner which is consistent with the federal courts construction of federal ***antitrust law*** *Minnesota Twins P'ship v State by Hatch, 592 N. W. 2d 847, 851 (Minn 1999)*, *Howard v Minnesota Timberwolves Basketball Ltd P'ship, 636 N. W. 2d 551, 556 (Minn App 2001)*. ("Minnesota ***antitrust law*** should be interpreted consistently with federal court interpretations of federal ***antitrust law*** unless Minnesota law clearly conflicts"). *Keating v Philip Morris, Inc, 417 N. W. 2d 132, 136 (Minn App 1987)* (citing *State v Duluth Board of Trade, 107 Minn 506, 517, 121 N. W. 395, 399 (1909))*. The underlying rationale for this rule was that the general purpose of the Minnesota ***antitrust law*** was the same as the general purpose of the federal **[*9]** ***antitrust law*** and therefore, Minnesota Appellate Courts could properly look to the decisions made under the federal law in order to achieve consistency in this area of the law However, Plaintiff claims that in its amendment to the Minnesota Antitrust Act in 1984, the Minnesota legislature "expressly departed" from federal antitrust standing principles enunciated by the United States Supreme Court in *Associated Gen Contractors of Cal. Inc v Cal State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. Specifically, Plaintiff alleges that when the legislature's intent is clear from plain and unambiguous statutory language, the courts cannot engage in further construction and instead must look to the plain meaning of said statutory language. *State v Bluhm, 676 N. W. 2d 649, 651 (Minn 2004)*.

V. Decision

Standing is a legal requirement that a party have a sufficient stake in a justiciable controversy to seek relief from a court *Sierra Club v Morton, 405 U.S. 727, 731-32, 92 S. Ct. 1361, 31 L. Ed. 2d 636 (1972)*. A party who has only an abstract or tenuous connection to the subject matter of the case, lacks standing *State by Humphrey v Philip Morris, Inc*, No C1-94-8565, 1995 WL 1937124 (Minn Dist Ct 1995). If a plaintiff lacks standing to bring a suit, the attempt to do so must fail Standing is acquired in two ways either the plaintiff has suffered some "injury-in-fact" or the plaintiff is the beneficiary of some legislative enactment granting standing. *Snyder's Drug Stores, Inc. v Minnesota State Board of Pharmacy, 301 Minn 28, 31-32, 221 N. W. 2d 162, 165 (Minn 1974)*. The primary **[*10]** goal of the "standing" requirement is to ensure that the factual and legal issues before the courts will be vigorously and adequately presented. *Channel 10, Inc v Ind School Dist No 709, St Louis County, 298 Minn 306, 314, 215 N. W. 2d 814, 821 (Minn 1974)*.

In 1977, the United States Supreme Court ruled that an indirect purchaser of concrete products that were the Subject of previous price fixing conspiracies had no standing under the federal ***antitrust law*** *Illinois Brick Co v Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707(1977)*. As previously stated, the Minnesota legislature responded to this decision by broadening the scope of individuals entitled to seek redress under the Minnesota Antitrust Act, by allowing any person injured "directly or indirectly" to seek judicial relief under the act. In *Keating v Philip Morris, 417 N. W. 2d 132 (Minn App 1987)*, the Minnesota Court of Appeals specifically stated that the 1984 amendment was intended to allow "a cause of action to indirect *purchaser*" (emphasis added) *417 N. W. 2d at 136*. Specifically, the *Keating* concluded that the legislative history of the 1984 amendment clearly established that file legislation was in direct response to the decision of the U S Supreme Court in *Illinois Brick Co v Illinois*

In 1996, the Minnesota Supreme Court ruled that the broad grant of standing under the 1984 amendment to the Minnesota Antitrust Act conferred standing to Blue Cross Blue Shield of Minnesota (BCBSM) **[*11]** to sue a number of tobacco companies (under *Minn Stat § 325D.51*) for reimbursement of health care expenses incurred by its subscribers secondary to medical treatment for tobacco related diseases. In reaching this conclusion, the Supreme Court reasoned that the 1984 amendment's broad grant of standing to maintain private antitrust suits, reached the injuries suffered by BCBSM. *State by Humphrey v Philip Morris, Inc, 551 N. W. 2d 490, 495 (Minn 1996)*. Significantly, the Supreme Court agreed with the decision of the Minnesota Court of Appeals in *Keating*, that the 1984 amendment to the Minnesota Antitrust Act was in direct response to the U S Supreme Court decision in the *Illinois Brick* case Relative to this issue, the high court stated as follows

> We concur with this analysis and conclude it was the intent of the Minnesota legislatures to abolish the availability of the pass through defense by specific grams of standing within statutes designed to protect Minnesota citizens from sharp commercial practices as the pass through defense is unavailable to the tobacco companies, Blue Cross has standing to sue under the various consumer protection theories, including antitrust alleged in its complaint.

551 N. W. 2d at 496.

In entering its decision relative to this issue, the Minnesota Supreme Court did **[*12]** not address standing requirements under federal law as enunciated by the U S Supreme Court in the *Associated Gen Contractors* decision, supra. Unfortunately, it does not appear that the Court was presented with the precise issue of whether the five "standing" factors as set forth by the U S Supreme Court in the *Associated Gen Contractors* case should be applied to Minnesota's amended antitrust act. Therefore, it becomes necessary for this Court to determine whether any (or all) of the five factors enunciated by the U S Supreme Court in *Associated Gen Contractors* remain in effect in Minnesota in light of the *Philip Morris* decision.

In the *Associated Gen Contactors* case, the Supreme Court identified the following five factors to assess in determining whether the relationship between the plaintiff's harm and the defendant's conduct is sufficiently close to confer standing (1) whether the plaintiff is a consumer or competitor in the allegedly restrained market, (2) whether the injury alleged is a direct, first-hand impact of the restraint alleged, (3) whether there are more directly injured plaintiff with motivation to sue, (4) whether the damages claims are speculative, and (5) whether the **[*13]** plaintiff's claims risk duplicative recoveries and would require a complex apportionment of damages *459 U.S. 519, 538-45, 103 S. Ct. 897, 74 L. Ed. 2d 723*. As previously stated, Minnesota ***antitrust law*** must be interpreted consistently with federal court interpretations of federal ***antitrust law***, unless Minnesota law clearly conflicts *Howard v Minnesota Timberwolves Basketball Ltd P'ship, 636 N. W. 2d 551, 556 (Minn App 2001)*.

In light of the legislative history provided by counsel for the parties in the enactment of the 1984 amendment, and the clear language of the statute providing a remedy for any person directly or indirectly injured by a violation, it is apparent that factors (2) and (3) of the *Associated Gen Contractors* case do clearly conflict with present Minnesota statutory law. However, the Court finds no language in the 1984 legislative amendment, legislative history, or the *Philip Morris* decision which establishes that application of factors (1), (4), and (5) in determining the issue of standing, would clearly conflict with Minnesota state law. Utilizing factors (1), (4) and (5) of the *Associated Gen Contractors* case in assessing the issue of standing, is consistent with the concerns addressed by the state legislators who debated the 1984 amendment prior to its passage, and consistent with federal law. Therefore, the **[*14]** Court must apply those three factors in this case to determine if the Plaintiff lacks standing under Minnesota state law.

The antitrust laws were intended for the protection of competition and therefore, standing is generally limited to consumer and competitors *Associated Gen Contractors, 459 U.S. at 538*. In this case, it is apparent that the Plaintiff is not a consumer or a competitor in the allegedly restrained market. In the alleged restrained market, the merchants are the consumers of Visa and MasterCard debit card services, and other debit networks are the competitors of Visa and MasterCard. Thus, there is no connection between the Plaintiff's purchases of general consumer goods and the Defendants' alleged unlawful tying of debit services.

Thus, the instant case is dearly distinguishable from the facts in the *Philip Morris* case, where the district court concluded that BCBSM was "clearly a link in the chain of interacting parties" and from a practical standpoint, was the "natural plaintiff best able to pursue the claim " *State by Humphrey v Philip Morris, Inc*, 1995 WL 1937124 *36 (Minn Dist Ct). The special role of BCBSM in the healthcare filed and its role as a major payor of healthcare expenses was an essential factor in the decision of the *Philip Morris* court to grant standing to that entity. **[*15]** The Supreme Court (in the *Philip Morris* case) emphasized that BCBSM was a proper party to assert an antitrust claim since the company was the direct purchaser of health care, and thus had a right to sue to collect overcharges, even though each payment was made on behalf of an individual patient *551 N. W. 2d at 497 FN1* (citing *Blue Cross &*

Blue Shield United of Wis v Marshfield Clinic and Security Health Plan of Wis, Inc., 65 F 3d 1406 (7thCir 1995), *cert. denied*, *516 U.S. 1184, 116 S. Ct. 1288, 134 L. Ed. 2d 233(1996)*.

The Eighth Circuit Court of Appeals has repeatedly applied *Associated Gen Contractors* factor (1), in rejecting the antitrust claims of plaintiffs who are neither consumers nor competitors in the allegedly restrained market. In S D Collectibles, Inc. v Plough, Inc, 952 F 2d 211 (8thCir 1991), a plaintiff who solicited orders for a company's zinc oxide sun screen product claimed that the defendant had restrained trade in the market for such products. The Eighth Circuit rejected the plaintiff's antitrust claim on the ground that as a mere broker, the plaintiff was neither a consumer nor competitor in the market for the purchase and sale of such products. It reasoned, "standing is generally limited to actual market participants, that is, competitors or consumers" and "[plaintiff] is neither" Id at 213 Numerous other Eighth Circuit decisions have reached the same result.

In *South Dakota v Kansan City S Indus. Inc*, the Eighth Circuit rejected **[*16]** the claims of the state of South Dakota, stating that "standing has been generally limited to the actual participants in the relevant market" and the "State's injuries were 'purely an incidental result of anti-competitive activity in another segment of the economy.'" 880 F 2d 40, 47-49 (8thCir 1989) (internal citation omitted). Additionally, in *Alpha Shoe Serv V. Fleming Cos*, the court rejected claims because the defendant's "activities occurred in the grocery market" and "[t]he plaintiffs were not competitors, participants, or consumers in that relevant market" 849 F 2d 352, 354 (8th Cir 1988). Finally, in *General Indus. Corp v Hartz Mountain Corp*, the Eighth Circuit rejected plaintiff's claim because it "was not a consumer of goods or services subject to restraint or an injured competitor of [defendant], the party engaging in the claimed restraint" 810 F 2d 795, 809 (8thCir 1987).

In his Memorandum in Opposition to the pending motion, Plaintiff refers to decisions from other state courts *construing* antitrust statutes similar to or identical to Minnesota's, and argues that said decisions provide persuasive authority relative to the interpretation of Minnesota's ***antitrust law***. *See* Conway v Todd County Highway Dept, 187 Minn. 223, 244 N.W. 807, 808-09 (Minn 1932). However, in all of the state court decisions cited by the Plaintiff, the underlying facts indicate **[*17]** that the Plaintiff occupied some link in the industry or market that was the subject of the antitrust claim, either as an indirect purchaser of a product or service or as a competitor That link or nexus is missing in this case. As previously stated, there is no connection between the Plaintiff's purchases of consumer goods throughout the state of Minnesota from merchants who accept Visa or MasterCard cards, and the Defendants' alleged antitrust activities (i e tying of debit services). There is no allegation in the Complaint that the debit network systems of Visa or MasterCard contributes in any way to the research, manufacture, production, distribution, or advertising of the consumer goods for which Plaintiff contends he paid inflated prices.

As previously stated, the Minnesota appellate courts have ruled that the 1984 amendment to Minn Stat § 325D.57 simply removed the bar created by the *Illinois Brick* decision to actions commenced by indirect purchasers. State by Humphrey v Philip Morris, Inc, 551 N. W. 2d 490, 496 (Minn 1996), Keating v Philip Morris, 417 N. W. 2d 132, 136 (Minn App 1987) However, a close reading of the Supreme Court decision in *Philip Morris*, confirms that in order to have standing, a plaintiff must be a purchaser or competitor, either directly or indirectly, of goods or services in the market allegedly restrained **[*18]** by an antitrust violation. Specifically, in the *Philip Morris* case, BCBSM claimed that it had incurred damages "resulting from the fact that it has paid and will pay substantially higher amounts to its contracted healthcare providers due to the increased cost of healthcare services for treatment of smoking related illnesses in its nicotine addicted consumer/patients." 551 N. W. 2d at 492. Deciding in favor of BCBSM, the Minnesota Supreme Court acknowledged that Blue Cross was a direct purchaser in the market allegedly restrained (i e the market for healthcare services) and as such, would have standing to sue even absent the statutory grant of authority under Minn Stat § 325D.57 Id. at 497 FN1.

Relative to this issue, counsel for the Plaintiff claims the Minnesota ***antitrust law*** does not require an indirect purchaser to have repurchased the allegedly restrained product or service (in this case debit card services) in order to have standing under state law. In support of this contention, Plaintiff's counsel refers to federal court decisions and/or legal authorities which have authorized indirect purchaser actions of products which have substantially changed form Specifically, Plaintiff's counsel refers to the follow quote from Judge **[*19]** Richard A Posner of the Seventh Circuit Court of Appeals, in a law review article

> Many producers do not sell directly to their ultimate consumers The producer of a consumer good may, for example, sell it to a wholesaler who will resell it to a retailer who in turn will resell it to the ultimate consumer, and even if there is no wholesale stage of distribution, the ultimate consumer will ordinarily be the direct purchaser from a retailer and only an "indirect purchaser" from the producer The product may be used as an input into a final consumer good — for example, the flour sold to a baker who makes it into bread that is sold to the consumer *The product map not even appear physically in the final good — for example, the oven used by the baker in making the bread* In these cases as well, *the ultimate consumer is only an indirect purchaser of the flour or the oven, the cast of which will be reflected in the price of the bread*.

William M Landes & Richard A Posner, *Should Indirect Purchasers Have Standing to Sue Under the Antitrust Laws? An Economic Analysis of the Rule of Illinois Brick*, 46 U CHI L REV 602, 602 (1979) (emphasis added) Commenting upon the above quotation, Plaintiff's counsel argues that Gutzwiller **[*20]** is an indirect purchaser of the debit card services because the monopoly overcharge on Defendants' debit card services is reflected in the artificially inflated prices of the consumer goods he purchases.

The Court finds that Plaintiff's analysis relative to this issue must fell, because unlike Judge Posner's above illustration, there is no industry, business, or market nexus or link between the monopoly overcharge on Defendants' debit card services and the alleged artificially inflated prices of all consumer goods sold at stores that accept Visa and MasterCard cards. Stated otherwise. Judge Posner's example identifies specific products or services (i e flour, bread, ovens, etc) which may have been the subject of artificially increased prices due to monopolistic business activities. In this case, Plaintiff does not allege the original product (debit card services or any subsequent and/or modified debit card services) were indirectly purchased by him at an artificially inflated price.

In assessing the standing issue in this case, counsel for the Plaintiff invites the Court to adopt the "target area" test advocated by Justice Brennen in his dissent in *Illinois Brick Co v. Illinois, 431 U.S. 720, 760-61, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. In his dissent, Justice Brennen argued **[*21]** that standing should be determined not by asking whether the plaintiff's injury was "derivative" or "remote," but by asking whether the plaintiff was in the "target area" of the antitrust violation, a concept analogous to whether the plaintiff's injury is a "reasonably foreseeable consequence" of the defendant's illegal conduct.

However, the "target area" test has never been adopted by the Minnesota Supreme Court, the United States Supreme Court and/or the Eighth Circuit Court of Appeals (or any other federal court) as an appropriate test for determining standing under the federal ***antitrust law***. Therefore, it would be inappropriate for the Court to assume that the "target area" test is an appropriate factor under Minnesota law.

Also, the Court agrees with Defendants assertion that Plaintiff's damages claims are inherently speculative. In this case, Plaintiff asserts that he paid overcharges on every single purchase that he made for several years from merchants who accepted Visa or MasterCard cards A brief illustration of an "exemplar" purchase confirms the inherently speculative nature of Plaintiff's claim.

Assume that Plaintiff purchased an item at a K-Mart store which accepted Visa **[*22]** and MasterCards, on March 1, 2003. To recover damages, Plaintiff would first need to prove that as a result of Defendants' alleged restraint of trade in providing debit card services to that K-Mart store, K-Mart paid excessive debit fees. Plaintiff would then need to prove that K-Mart did not absorb any such excess debit fees by making less profit, or in some other non-monetary way, such as by hiring fewer employees and/or not making major repairs to its building, but instead passed on the excess debit fees in the price of the items sold to consumers. Plaintiff would then need to prove that some identifiable portion of the item was not attributable to any factors such as competitive pricing, the wholesale cost of the item, and any myriad of other factors which might affect the price of that item on that specific date. Plaintiff would then need to make the same offer of proof for any item sold by the K-Mart store not only on March 1, 2003, but for every other day in issue, and would have to make the same offer of proof relative to every other merchant involved in his claim.

In raising the above example, the Court has not even discussed the financial difficulties that K-Mart (and numerous **[*23]** other retailers) has experienced in the past that are unique to that corporation and which might have a very significant effect on the price of its item. This simple example establishes that Plaintiff's damages claim is inherently and hopelessly speculative Again, the *Philip Morris* case is readily distinguishable relative to this issue. Evidence in the *Philip Morris* case clearly established that the costs of health services related to smoking were substantially increased due to the Defendant's misrepresentations with respect to its product, and that BCBSM paid for and/or incurred a significant portion of said increased costs. Thus, the damages claim in the *Philip Morris* case was far less speculative than the Plaintiff's claim for damages in this case.

Further, Plaintiff's claims risk duplicative recoveries and would require an apportionment of damages so complex as to be impossible. Plaintiff's claims in this case are based on the very same conduct of Visa and MasterCard that was the subject of litigation in the federal merchant clam action. Plaintiff's claims would require apportionment of damages of virtually every single purchase that Plaintiff (and his class) made during the years **[*24]** in which he seeks damages. The Court is convinced that no expert witness would be capable of accurately assessing a fair and impartial "apportionment" of the damages to the respective parties, including the prior merchant plaintiffs. Moreover, in light of the previous multibillion-dollar settlement in the federal venue, tins is obviously not a situation where the antitrust violators will go unpunished, because the parties who are directly injured (the merchants) will not sue.

VI. Plaintiff's Request for Leave to File an Amended Pleading

In his response to the Defendants' motion, Plaintiff argues in the alternative that he should be granted leave to file an Amended Complaint, re-defining the class to consist only of Minnesota residents who purchased goods or services using a Visa or MasterCard-branded debit card. The Court must deny this Motion because it does not comply with Rule 115.03 or 115.04 of the Rules of Practice for the District Courts of Minnesota or Rule 15 of the Minnesota Rules of Civil Procedure. Under these rules, a party filing a motion must serve notice of the motion, motion, proposed order, memorandum of law, and any affidavits and exhibits to be submitted in conjunction with the motion, a designated period of time prior to the **[*25]** bearing relative to said motion. Plaintiff has not filed a motion to amend under these rules and instead, has requested "leave" to file the amended pleading in his responsive brief Since the Defendants have not had the opportunity to fully respond to this new issue raised by the Plaintiff, it would be unduly prejudicial and unfair to the Defendants for the Court to entertain that issue at this time.

VII. Summary

Despite the broad language of the Minnesota ***antitrust law*** as set forth in *Minn Stat § 325D.57* (2002), and the broad language contained in the *Philip Morris* decision of the Minnesota Supreme Court, not every person claiming some remote or tangential injury from an antitrust violation can maintain a suit under the Minnesota antitrust laws. A literal reading of the Minnesota statute is broad enough to encompass any harm that can be attributed either directly or indirectly to the consequences of an antitrust violation. Even though the language of the statute is clear and unambiguous, the Court must interpret the statute in a manner which will not lead to an illogical or absurd result *Mut Serv Cas Ins Co v League of Minn Cities Ins Trust, 646 N.W.2d 546, 549 (Minn App 2002)*, *review granted* (Minn Sept 17, 2002), *Minn Stat § 645.17 (1)*(2004).

In this case, the Plaintiff's proposed interpretation of the **[*26]** Minnesota ***antitrust law*** would lead to a decision that would provide a remedy in damages for any injury (however minor) that might conceivably be traced to the antitrust violation in issue. In short, the Plaintiff's proposed construction of the Minnesota ***antitrust law***, carried to its logical conclusion, would provide the general public and/or general tax payer standing to sue for most antitrust causes of action. In this case, the Plaintiff's proposed class (all consumers who purchased products from a merchant who accepted Visa and/or MasterCard) is likely as large, or larger, than a class limited to Minnesota residents who pay property or income taxes. Clearly, the legislature did not intend the 1984 amendment to *Minn Stat § 325D.57* to be interpreted in such a broad and illogical manner. *See* Comments of Sen Sieloff, March 19, 1984, in the Civil Law Subcommittee of the Judiciary Committee of the Minnesota Senate; in connection with S F 1807, a bill to amend *Minn Stat § 325D 57*. In this case, Plaintiff has only an abstract or tenuous connection to the subject matter of the case. Therefore, he lacks standing to sue for the injuries he claims to have incurred *See State by Humphrey v Philip Morris, Inc*, No C1-94-8565, 1995 WL 1937124 (Minn Dist Ct 1995).

Dated this **[*27]** 15th day of September, 2004

HN1[] **Standards of Review, De Novo Review**

An appellate court reviews de novo a district court's grant of summary judgment. The appellate court must determine, viewing the evidence in the light most favorable to the nonmoving party, whether there exist any genuine issues of material fact and whether the district court correctly applied the substantive law. The appellate court may not weigh the evidence or determine the truth of the matter; rather, it may determine only whether there is a genuine issue for trial.

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

Antitrust & Trade Law > Regulated Industries > Communications

HN2[] **Regulated Industries, Communications**

The "essential facilities" doctrine imposes on the owner of a facility that cannot reasonably be duplicated and which is essential to competition in a given market a duty to make that facility available to its competitors on a nondiscriminatory basis. In order to prevail on an essential facilities claim, the plaintiff must prove (1) that the defendant is a monopolist in control of an essential facility, (2) that the plaintiff, as the defendant's competitor, is unable reasonably or practically to duplicate the facility, (3) that the defendant has refused to provide the plaintiff access to the facility and (4) that it is feasible for the defendant to provide such access.

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

Antitrust & Trade Law > Regulated Industries > Communications

HN3[] **Regulated Industries, Communications**

Even though the essential facilities doctrine is followed in the United States Court of Appeals for the Ninth Circuit and other circuits, the United States Supreme Court has never recognized such a doctrine. In Verizon, the Supreme Court found no need either to recognize the doctrine or to repudiate it because the Supreme Court concluded that the plaintiff could not state a claim under the doctrine. The Supreme Court reasoned that the indispensable requirement for invoking the doctrine is the unavailability of access to the "essential facilities"; where access exists, the doctrine serves no purpose. Thus, essential facility claims should be denied where a state or federal agency has effective power to compel sharing and to regulate its scope and terms.

Antitrust & Trade Law > Regulated Industries > Communications

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN4[] **Regulated Industries, Communications**

Under the Telecommunications Act of 1996 (the 1996 Act), *47 U.S.C.S. § 151 et seq.*, a requesting competitive local exchange carrier (CLEC) can obtain access to an incumbent local exchange carrier's (ILEC) network in three ways: it can purchase local telephone services at wholesale rates for resale to end users; it can lease elements of the ILEC's network on an unbundled basis; and it can interconnect its own facilities with the ILEC's network. The ILEC can negotiate an agreement with the CLEC without regard to the duties it would otherwise have under *47 U.S.C.S. § 251(c)*, but if private negotiations fail, either party can petition the relevant state commission to arbitrate unresolved issues. *47 U.S.C.S. § 252*. Thus, the 1996 Act's extensive provision for access makes it unnecessary to impose a judicial doctrine of forced access. Where a state or federal agency is authorized to compel access to a competitor's infrastructure, as under the 1996 Act, the United States Supreme Court's decision in Verizon states that an essential facilities claim should be denied.

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

Antitrust & Trade Law > Regulated Industries > Communications

HN5[] Regulated Industries, Communications

The essential facilities doctrine makes a facility that is essential to competition in a given market available to competitors so that they may compete in that market. A facility is "essential" only if it is otherwise unavailable and cannot be reasonably or practically replicated. The doctrine does not guarantee competitors access to the essential facility in the most profitable manner.

HN6[] Sherman Act, Claims

15 U.S.C.S. § 2 of the Sherman Act makes it illegal to monopolize any part of the trade or commerce among the several states. To prevail on a claim under *§ 2*, a plaintiff must prove that the defendant (1) possessed monopoly power in the relevant market, (2) willfully acquired or maintained that power through exclusionary conduct and (3) caused antitrust injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] Monopolies & Monopolization, Actual Monopolization

The United States Supreme Court in Verizon stated that as a general matter there is no duty to aid competitors. The Supreme Court articulated three reasons for this general proposition. First, compelling firms to share the source of their advantage is in some tension with the underlying purpose of ***antitrust law***, since it may lessen the incentive for the monopolist, the rival, or both to invest in those economically beneficial facilities. Second, enforced sharing also requires antitrust courts to act as central planners, identifying the proper price, quantity, and other terms of dealing--a role for which they are ill-suited. Third, compelling negotiation between competitors may facilitate the supreme evil of antitrust: collusion. Although recognizing that under certain circumstances, a refusal to cooperate with rivals can constitute anti-competitive conduct and violate *15 U.S.C.S. § 2* of the Sherman Act, the Supreme Court noted that it has been very cautious in recognizing such exceptions.

Antitrust & Trade Law > Regulated Industries > Communications

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **Regulated Industries, Communications**

Verizon teaches that the regulatory context is an important consideration in deciding whether to recognize an expansion of the contours of *15 U.S.C.S. § 2* of the Sherman Act. To determine whether a court should expand the contours of *§ 2* liability in a regulated industry, the court must weigh the benefits of antitrust intervention against a realistic assessment of its costs.

Antitrust & Trade Law > Regulated Industries > Communications

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Regulated Industries, Communications**

In Verizon, the United States Supreme Court noted that where a regulatory structure designed to deter and remedy anticompetitive harm exists, the additional benefit to competition provided by antitrust enforcement will tend to be small.

Opinion

[*1126] FISHER, Circuit Judge:

The Supreme Court vacated our prior decision in this antitrust case, *MetroNet Serv's Corp. v. U.S. West Communications, 329 F.3d 986 (9th Cir. 2003)*, and remanded for further consideration in light of its recent decision in *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. *Qwest Corp. v. MetroNet Servs. Corp., 540 U.S. 1147, 157 L. Ed. 2d 1040, 124 S. Ct. 1144 (2004).* **[**2]** Qwest Corp., formerly U.S. West Communications, is the incumbent local exchange carrier ("ILEC") serving the state of Washington. [1] After Qwest offered volume discounts on phone services to businesses with more than 20 phone lines, MetroNet Services Corp. and MetroNet Telemanagement Corp. (collectively "MetroNet") began purchasing those services from Qwest and reselling them to small businesses with 20 or fewer phone lines.

---

[1] We refer to Qwest Corp. and its predecessors simply as "Qwest."

MetroNet received the volume discounts by aggregating the phone lines of these small businesses. In 1997, in order to eliminate resale of its services, Qwest changed the pricing structure of its calling features and required that customers have at least 21 lines at each location in order to receive the volume discount.

In 2000, MetroNet filed suit alleging that Qwest violated *Section 2 of the Sherman Act* by illegally maintaining a monopoly over the market for small business local telephone services in the Seattle/Tacoma **[**3]** area, and by denying MetroNet access to an essential facility. [2] After MetroNet and Qwest engaged in settlement discussions, MetroNet moved to enforce a written, unsigned settlement agreement. The district court denied the motion and subsequently granted summary judgment in favor of Qwest on the remaining antitrust claims. In our original decision, we reversed the grant of summary judgment and affirmed the denial of MetroNet's motion to enforce its settlement agreement with Qwest.

In light of *Verizon*, we now affirm summary judgment in favor of Qwest. MetroNet cannot prove an essential facilities claim, because the Telecommunications Act of 1996, Pub. L. No. 104-104, 110 Stat. 56 (1996), *47 U.S.C. § 151 et seq.* ("1996 Act"), provides **[**4]** the means for MetroNet to obtain access to Qwest's local exchange network. In addition, Qwest's change in pricing in order to eliminate arbitrage does not amount to exclusionary conduct under the Supreme Court's refusal to deal precedents as interpreted by *Verizon*. Finally, we decline to expand antitrust liability to encompass MetroNet's claims because of their novel nature, the existence of a regulatory structure designed to deter and **[*1127]** remedy anti-competitive harm and the record of the regulatory agency's attentiveness to the anticompetitive conduct alleged in this antitrust suit.

I. FACTUAL AND PROCEDURAL BACKGROUND

Qwest sells two types of business phone services relevant to this antitrust suit: flat-rate local exchange called "1FB" [3] and "Centrex." Centrex consists of two components: multiple telephone line access that allows a company's employees to make internal calls using a four-digit extension and external calls via the Qwest central office switch (the access component), and calling features such as call forwarding, call waiting and call hold (the features component). [4] Although each component is priced separately, Qwest sells them as one bundled service, requiring **[**5]** customers who buy one component to buy the other as well. [5]

Qwest originally developed Centrex for the large business market as an alternative to private branch exchange ("PBX"), a switch owned by large businesses and located on their property. [6] Qwest initially offered volume discounts to large businesses with more than 20 phone lines. Small businesses with 20 or fewer lines could purchase Centrex without the discount, **[**6]** or purchase 1FB lines from Qwest as well as features for an additional fee. [7]

---

[2] MetroNet also asserted a state law cause of action for breach of con-tract and the implied covenant of good faith and fair dealing. This cause of action was dismissed without prejudice by the district court on May 2, 2000 and is not before us.

[3] "F" stands for "flat-rate" and "B" stands for "business." Flat-rate residential service is known as "1FR."

[4] MetroNet stresses that the access component itself consists of two subcomponents: the physical line between the customer and Qwest's switch, called the network access channel ("NAC"), and a device that limits the number of lines that have access, called the network access register ("NAR"). Because our analysis does not depend on this further level of detail, we do not refer to it in the text.

[5] MetroNet has not alleged or argued that Qwest has engaged in illegal tying.

[6] A PBX allows four-digit internal calling and can provide some features. External dialing is done through Qwest's local network using a "trunk line" that connects the customer's PBX to the Qwest network.

[7] It is unclear from the record whether small business customers choosing to purchase 1FB lines could also buy features from providers other than Qwest.

Qwest priced Centrex on a "per system basis," *i.e.* based on the number of phone lines included in the Centrex package, regardless of whether those lines ran to a single location or multiple, separate locations. This "system pricing" scheme allowed resellers to receive the volume discounts by aggregating the telephone lines of several variously located small businesses. As early as 1985, MetroNet and other resellers began purchasing volume discounted Centrex lines from Qwest and reselling them to aggregations of small businesses, each with 20 lines or fewer. MetroNet **[**7]** sold Centrex at a price above what it cost MetroNet to purchase Centrex from Qwest but below what MetroNet's customers would have had to pay for 1FB lines plus features.

By 1991, Qwest had taken note of the significant resale market for Centrex created by the differential pricing of Centrex and 1FB lines. Qwest sought to introduce a new version of Centrex, Centrex Plus, with a pricing structure designed to eliminate or reduce the arbitrage between Centrex and 1FB lines. Under the new "per location pricing" structure, Qwest required customers to have more than 20 lines *at each location* in order to receive a volume discount for the service to that location. Because the resellers' customers have 20 or fewer lines, Qwest's shift to per location pricing eliminated the resellers' ability to obtain the Centrex volume discounts.

The Washington Utilities and Transportation Commission ("WUTC") is authorized **[*1128]** to regulate the rates, services, facilities and practices of telecommunications companies in the state of Washington. *Wash. Rev. Code § 80.01.040(3)*(2004). Qwest filed tariff changes with the WUTC for the new per location pricing structure, which would apply **[**8]** not only to the features component of Centrex, but also to the access component. [8] The WUTC conditionally approved per location pricing of Centrex Plus on November 18, 1993, and finally approved it on November 30, 1994. However, a year and a half later, on April 11, 1996, the WUTC abolished per location pricing and ordered that system pricing be reinstated. Qwest viewed the WUTC order as "exasperating dramatically the existing revenue arbitrage situation" and appealed. The Washington Supreme Court upheld the WUTC order. *U S West Communications, Inc. v. Wash. Utils. & Transp. Comm'n, 134 Wn.2d 74, 949 P.2d 1337, 1364 (Wash. 1998)*.

In December 1996, with system pricing back in place, Qwest concluded that:

> The current Washington tariff structure for Centrex Plus, [1FB], and features offers a profitable, relatively low risk opportunity **[**9]** for Centrex resellers to win significant market share of 1FB customers (mainly small business) in Washington. In essence, it appears that resellers can operate with positive margins while reselling [Centrex] at anywhere from 10 to 35 percent discounts to [1FB lines], not including features.

Qwest estimated that it was losing more than $ 300,000 in revenues per month to MetroNet and other resellers, and that the revenue loss was having a "significantly negative" impact on profitability. In addition to these financial concerns, Qwest was greatly troubled that the loss of its direct relationship with customers due to resale would deprive it of the opportunity to cross-sell additional products and services. Qwest concluded that "no existing or forthcoming product . . . effectively addresses Centrex resale competition," and set about developing strategies to win back market share. On April 18, 1997, Qwest filed a price list with the WUTC reinstating per location pricing for the features component of Centrex. This later imposition of per location pricing is the subject of the present suit.

II. STANDARD OF REVIEW

HN1[↑] We review de novo a district court's grant of summary judgment. **[**10]** *Balint v. Carson City, 180 F.3d 1047, 1050 (9th Cir. 1999)* (en banc). We must determine, viewing the evidence in the light most favorable to the nonmoving party, whether there exist any genuine issues of material fact and whether the district court correctly applied the substantive law. *Id.* We may not weigh the evidence or determine the truth of the matter; rather, we may determine only whether there is a genuine issue for trial. *Id. at 1054*.

III. ESSENTIAL FACILITIES

---

[8] To be more precise, the per location pricing scheme applied to the NAC subcomponent of Centrex access, not the NAR subcomponent. *See* note 4 *supra*.

MetroNet claims that Qwest denied resellers like MetroNet access to its local exchange network, an essential facility, by eliminating opportunities for Centrex resale. ***HN2***[] "The 'essential facilities' doctrine imposes on the owner of a facility that cannot reasonably be duplicated and which is essential to competition in a given market a duty to make that facility available to its competitors on a nondiscriminatory basis." *Ferguson v. Greater Pocatello Chamber of Commerce, Inc., 848 F.2d 976, 983 (9th Cir. 1988)*. In order to prevail on its essential facilities claim, MetroNet must prove (1) that Qwest is a monopolist in control of an essential facility, (2) **[*1129]** that **[**11]** MetroNet, as Qwest's competitor, is unable reasonably or practically to duplicate the facility, [9] (3) that Qwest has refused to provide MetroNet access to the facility and (4) that it is feasible for Qwest to provide such access. [10] *See City of Anaheim v. S. Cal. Edison Co., 955 F.2d 1373, 1380 (9th Cir. 1992)*.

HN3[] Even though the essential facilities doctrine is followed in this and other circuits, the Supreme Court **[**12]** has "never recognized such a doctrine." *Verizon, 124 S. Ct. at 881*. In *Verizon*, the Court found "no need either to recognize [the doctrine] or to repudiate it" because the Court concluded that the plaintiff could not state a claim under the doctrine. *Id.* The Court reasoned "the indispensable requirement for invoking the doctrine is the unavailability of access to the 'essential facilities'; where access exists, the doctrine serves no purpose." *Id.* Thus, "essential facility claims should . . . be denied where a state or federal agency has effective power to compel sharing and to regulate its scope and terms." *Id.* (quoting Areeda & Hovenkamp, ***Antitrust Law*** P 773e, at 150 (2003 Supp.)).

The Court's reasoning in *Verizon* compels affirmance of the district court's grant of summary judgment with respect to MetroNet's essential facilities claim. MetroNet cannot establish the first element of its claim, because the 1996 Act provides the WUTC with the effective power to compel Qwest to share its local exchange network with competitors. Specifically, ***HN4***[] under the 1996 Act, a requesting competitive local exchange carrier ("CLEC") can obtain access to an incumbent **[**13]** carrier's network in three ways: "it can purchase local telephone services at wholesale rates for resale to end users; it can lease elements of the [ILEC's] network 'on an unbundled basis'; and it can interconnect its own facilities with the [ILEC's] network." *AT&T Corp. v. Iowa Utils. Bd., 525 U.S. 366, 371, 142 L. Ed. 2d 834, 119 S. Ct. 721 (1999)*; *see 47 U.S.C. § 251(c)(2)-(4)(2004)*. The incumbent carrier can negotiate an agreement with the competitive carrier without regard to the duties it would otherwise have under *§ 251(c)*, but if private negotiations fail, either party can petition the relevant state commission to arbitrate unresolved issues. *See 47 U.S.C. § 252 (2004)*; *AT&T, 525 U.S. at 372-73*. Thus, "the 1996 Act's extensive provision for access makes it unnecessary to impose a judicial doctrine of forced access." *Verizon, 124 S. Ct. at 881*; *see Covad Communications Co. v. Bellsouth Corp., 374 F.3d 1044, 1050 (11th Cir. 2004)* ("Where a state or federal agency is authorized to compel access to a competitor's infrastructure, as under the [1996 Act], [*Verizon* **[**14]**] states that an essential facilities claim should be denied.").

MetroNet contends that the compelled sharing provisions of the 1996 Act are irrelevant here because they have no effect on MetroNet's resale business. This argument misapprehends the purpose of the essential facilities doctrine. ***HN5***[] The doctrine makes a facility that is essential to competition in a given market available to competitors so that they may compete in that market. A facility is "essential" only if it is "*otherwise unavailable* and cannot **[*1130]** be reasonably or practically replicated." *City of Anaheim, 955 F.2d at 1380* (emphasis added). The doctrine does not guarantee competitors access to the essential facility in the most profitable manner. Even assuming that MetroNet can no longer profitably buy Centrex in the retail market and resell it to small businesses, MetroNet can still obtain access to Qwest's local exchange network through the compelled sharing provisions of the 1996 Act. *See 47 U.S.C. § 251(c)*. Because reasonable access to the essential facility exists -- even if not in a way that is conducive to MetroNet's existing business model -- MetroNet cannot establish an essential facilities **[**15]** claim.

---

[9] "The second element is effectively part of the definition of what is an essential facility in the first place. That is to say, if the facility can be reasonably or practically duplicated it is highly unlikely, even impossible, that it will be found to be essential at all." *City of Anaheim v. S. Cal. Edison Co., 955 F.2d 1373, 1380 (9th Cir. 1992)*.

[10] "The fourth element basically raises the familiar question of whether there is a legitimate business justification for the refusal to provide the facility." *City of Anaheim, 955 F.2d at 1380*.

MetroNet also argues that the WUTC has no *effective* power to compel sharing due to the realities of the regulatory scheme. MetroNet relies on testimony by its expert that Qwest has considerable latitude in setting prices because of the WUTC's limited statutory authority, limited resources and other constraints of the regulatory process. Even were we to credit this testimony and find that the WUTC is unable to regulate *prices*, this would not show that the WUTC lacks effective power to compel *sharing*. The WUTC's statutory authority to compel sharing stems from the same 1996 Act provisions that the Court relied upon in *Verizon* to reject the plaintiff's essential facilities argument. *See* *Verizon, 124 S. Ct. at 876*. Moreover, the record shows that Qwest has entered into an interconnection agreement with MetroNet and that other telecommunications carriers have successfully petitioned the WUTC to arbitrate and approve interconnection agreements with Qwest. Thus, we conclude that the WUTC has the effective power to compel sharing under the 1996 Act.

IV. MONOPOLIZATION

We must also consider the impact of *Verizon* on MetroNet's monopolization **[**16]** claim under Section 2 of the Sherman Act. *See* *15 U.S.C. § 2 (2004)* ***HN6***[] (making it illegal to "monopolize . . . any part of the trade or commerce among the several States"). To prevail on this claim, MetroNet must prove that Qwest (1) possessed monopoly power in the relevant market, (2) wilfully acquired or maintained that power through exclusionary conduct and (3) caused antitrust injury. *See* *Am. Prof'l Testing Serv., Inc. v. Harcourt Brace Jovanovich Legal & Prof'l Publ'ns, Inc., 108 F.3d 1147, 1151 (9th Cir. 1997)*. *Verizon* does not address the meaning of monopoly power or antitrust injury, but does examine the element of exclusionary conduct. [11] *See* *Verizon, 124 S. Ct. at 879*.

[17] [*1131] A. Refusal to deal**

HN7[] The Court in *Verizon* stated that as a general matter "there is no duty to aid competitors." *Id. at 881*. It articulated three reasons for this general proposition. First, "compelling . . . firms to share the source of their advantage is in some tension with the underlying purpose of ***antitrust law***, since it may lessen the incentive for the monopolist, the rival, or both to invest in those economically beneficial facilities." *Id. at 879*. Second, "enforced sharing also requires antitrust courts to act as central planners, identifying the proper price, quantity, and other terms of dealing -- a role for which they are ill-suited." *Id.* Third, "compelling negotiation between competitors may facilitate the supreme evil of antitrust: collusion." *Id.*

Although recognizing that "under certain circumstances, a refusal to cooperate with rivals can constitute anti-competitive conduct and violate *§ 2*," the Court noted that it has been "very cautious in recognizing such exceptions." *Id.* The Court concluded that *Verizon* did not fit within the existing exceptions carved out by *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985),* **[**18]** or *Otter Tail Power Co. v. United States, 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)*.

---

[11] MetroNet argues that *Verizon* has no impact on its case because of the differences in procedural posture. *Verizon* was decided on a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)*, *see* *Law Offices of Curtis V. Trinko, LLP v. Bell Atlantic Corp., 305 F.3d 89, 95-96 (2d Cir. 2002)*, whereas the district court resolved this case on a motion for summary judgment. MetroNet says that our previous conclusion that it had created triable issues of fact is not disturbed by *Verizon*.

Nonetheless, *Verizon* affected whether Qwest's conduct can be considered anticompetitive as a matter of law. *See* *Verizon, 124 S. Ct. at 879*; *see also* *SmileCare Dental Group v. Delta Dental Plan of Cal., Inc., 88 F.3d 780, 783 (9th Cir. 1996)* ("Whether specific conduct is anti-competitive is a question of law reviewed de novo."). Contrary to MetroNet's contention, the procedural differences, if anything, make it more difficult for Metro-Net's claims to survive summary judgment because the Court's dismissal in *Verizon* implied that the plaintiff could prove no set of facts that would entitle it to relief. *See id.* ("A complaint should not be dismissed [under *Rule 12(b)(6)*] unless it appears beyond doubt that [the] plaintiff can prove no set of facts in support of his claim which would entitle him to relief."). Thus, *Verizon* raises the threshold with respect to the facts that MetroNet must plead and prove to establish an antitrust violation.

In *Aspen Skiing*, the defendant owned three of the four mountains in the Aspen, Colorado ski area, and the plaintiff owned the fourth mountain. They had jointly offered for many years a multiple-day, multiple-area ticket that gave skiers admission to all of the mountains (the "joint ticket"). *Aspen Skiing, 472 U.S. at 589-90*. The joint ticket was often cheaper than purchasing multiple single-day tickets. *Id. at 589*. Revenues from the joint ticket were divided between the parties according to the relative percentage that buyers with the joint ticket used each mountain. *Id*. The defendant decided to discontinue the joint ticket by giving the plaintiff "an offer that it could not accept": the defendant would continue participating in the joint ticket only if the plaintiff agreed to receive a fixed percentage of joint ticket revenues that was considerably lower than the historical average based on actual usage of the fourth mountain. *Id. at 592*. After the plaintiff rejected the offer, the defendant sold a joint ticket featuring only **[**19]** its three mountains. *Id. at 593*. The plaintiff attempted to market its own multiple-day, multiple-area package by offering ski passes to the fourth mountain along with vouchers, each equal to the retail price of a single-day ticket to one of the defendant's mountains. *Id. at 593-94*. The defendant refused to accept these vouchers and to sell any lift tickets to the plain-tiff at retail price. The Supreme Court upheld a jury verdict in favor of the plaintiff on its claim that the defendant had monopolized the market for downhill skiing services in Aspen. *Id. at 605*.

In *Verizon*, the Court explained *Aspen Skiing* in this way:

> The Court . . . found significance in the defendant's decision to cease participation in a cooperative venture. The unilateral termination of a voluntary (*and thus presumably profitable*) course of dealing suggested a willingness to forsake short-term profits to achieve an anticompetitive end. Similarly, the defendant's unwillingness to renew the ticket *even if compensated at retail price* revealed a distinctly anticompetitive bent.

Verizon, 124 S. Ct. at 879-80 (citations **[**20]** omitted). The Court then distinguished *Verizon* from *Aspen Skiing*. Because there were no allegations that Verizon had "voluntarily engaged in a course of dealing with its rivals, or would ever have done so **[*1132]** absent statutory compulsion," Verizon's prior conduct "shed[] no light upon the motivation of its refusal to deal -- upon whether its regulatory lapses were prompted not by competitive zeal but by anticompetitive malice." *Id. at 880*. The Court also observed that "in *Aspen Skiing,* what the defendant refused to provide to its competitor was a product that it already sold at retail," whereas in *Verizon*, "the services allegedly withheld are not otherwise marketed or available to the public." [12] *Id.* Thus, the Court "concluded that Verizon's alleged insufficient assistance in the provision of service to rivals is not a recognized antitrust claim under this Court's existing refusal-to-deal precedents." *Id.*; *see also* *Covad, 374 F.3d at 1048*.

[21]** MetroNet attempts to fit the present case into *Aspen Skiing*'s exception to the general "no duty to deal" rule. Although this case is similar in certain respects, it does not fit comfortably in the *Aspen Skiing* mold. The circumstances that *Verizon* found significant for creating antitrust liability are not present here.

The first fact found relevant in *Verizon* was the unilateral termination of a voluntary and profitable course of dealing. *Verizon, 124 S. Ct. at 880*. In the Court's view, this fact "suggested a willingness to forsake short-term profits to achieve an anticompetitive end." *Id.* Here, although Qwest voluntarily sold Centrex to its customers, including resellers like MetroNet, on a per system price from 1985 to 1991, Qwest attempted to change this prior course of dealing after it realized that the resale of Centrex by MetroNet and others was having a "significantly negative" impact on its own profitability. Hence, Qwest was not forsaking short-term profits by switching from system pricing to per location pricing, but rather was attempting to increase its short-term profits. Qwest's termination of its prior course of dealing therefore **[**22]** "sheds no light" upon whether Qwest was "prompted not by competitive zeal but by anticompetitive malice." *Id.*

The second fact in *Aspen Skiing* to which *Verizon* attached significance was the defendant's refusal to sell tickets to the plaintiff "*even if compensated at retail price*," thus "suggesting a calculation that its future monopoly retail price would be higher." *Id*. Similar to the unilateral termination of a prior profitable course of dealing, the defendant's refusal to sell to the plaintiff at the prevailing retail price, in the Court's view, indicated a willingness to sacrifice short-term benefits in order to obtain higher profits in the long run from the exclusion of competition. *See Aspen*

[12] The Court also distinguished *Otter Tail* on this basis. *See* *Verizon, 124 S. Ct. at 880*.

Skiing, 472 U.S. at 608. Here, Qwest has been willing to sell and has sold Centrex to Metro-Net at its retail price. However, Qwest has set its retail price in a way that has made it unprofitable for MetroNet to buy and resell Centrex. [13] Thus, Qwest's per location pricing is analogous to the offer that the defendant in *Aspen Skiing* made to the plaintiff -- an offer that the defendant anticipated would not be profitable for the plaintiff to accept. **[**23]** An offer to deal with a competitor only on unreasonable terms and conditions can amount to a practical refusal to deal. *Cf.* Del. & Hudson Ry. Co. v. Consol. Rail Corp., 902 F.2d 174, 179-80 (2d Cir. 1990) (holding that even if there is no "outright refusal to deal," a denial of an essential **[*1133]** facility can occur "if the terms of the offer to deal are unreasonable").

Nonetheless, Qwest's choice to switch to per location pricing does not have the same economic significance as the defendant's refusal to sell to the plaintiff at the retail price in Aspen Skiing. Qwest's switch to per location pricing does not entail a sacrifice of short-term benefits. Rather, it enables Qwest to maintain a price discrimination structure established before resellers entered the market for local **[**24]** telephone services. [14] Because Qwest voluntarily implemented the volume discount pricing structure before Centrex resale began to undercut its sales to small businesses, that pricing structure was presumably maximizing Qwest's profits. Therefore, by price discriminating through per location pricing, Qwest has not set its retail price at an unprofitable level in the short run merely to exclude competition in the long run.

[25]** The third fact the Court emphasized in *Verizon* was that the defendants in *Aspen Skiing* and *Otter Tail* refused to provide to their competitors products that were already sold in a retail market to other customers. Verizon, 124 S. Ct. at 880. The importance of this fact relates to the Court's concern about the administrability of a judicial remedy. One of the reasons for a general "no duty to deal" rule is that enforced sharing "re-quires antitrust courts to act as central planners, identifying the proper price, quantity, and other terms of dealing -- a role for which they are ill-suited." Id. at 879. If the defendant already sells the product in an existing market to certain customers but merely refuses to sell to its competitors, the court can impose a judicial remedy that does not require the court to "assume the day-to-day controls characteristic of a regulatory agency." Id. at 883 (quoting Areeda, *Essential Facilities: An Epithet in Need of Limiting Principles*, 58 Antitrust L.J. 841, 853 (1989)). The court can simply order the defendant to deal with its competitors on the same terms that it already deals with others in the **[**26]** existing retail market, without setting the terms of dealing. In contrast, if the defendant does not already provide the product in an existing market or otherwise make it available to the public, the court will have to delineate the defendant's sharing obligations, and "an antitrust court is unlikely to be an effective day-to-day enforcer of these detailed sharing obligations." *Id*.

In this case, Centrex is a service already sold in a retail market. Qwest, however, has not refused to sell this retail service to MetroNet, but has sold it to MetroNet on the same terms that it sells to direct consumers. [15] Like direct consumers, MetroNet must have more than 20 lines at the same location in order to receive a volume discount on Centrex features. Thus, MetroNet is essentially asking this court to "identify[] the proper price" that Qwest should charge in the retail market -- a role **[*1134]** the Supreme Court has deemed courts ill suited to perform. Id. at 879.

---

[13] The record contains conflicting evidence about MetroNet's profitability after Qwest implemented per location pricing in 1997, but we take the facts in the light most favorable to MetroNet as we must on summary judgment.

[14] Price discrimination describes the practice of charging different prices to different customers for essentially the same product or service. More technically, price discrimination occurs when a firm sells to different groups of customers at differing ratios of price to marginal cost. *See* 3 Areeda & Hovenkamp, ***Antitrust Law*** P 721b, at 262 (2d ed. 2002). It appears that Qwest is able to price discriminate among consumers because small businesses have a lower elasticity of demand than large businesses. In other words, large businesses are more sensitive to changes in price due to the availability of substitutes to Centrex, namely PBXs. Small businesses are willing to pay a higher price for Centrex because fewer substitutes for Centrex are available to them.

[15] Qwest discriminates in price among different types of direct consumers (small businesses versus large businesses) but does not discriminate between competitors and direct consumers.

[27]** In sum, *MetroNet* does not fall within the *Aspen Skiing* exception to the general "no duty to deal" rule, because Qwest's switch to per location pricing does not entail a sacrifice of short-term profits for long-term gain from the exclusion of competition and because Qwest has not refused to deal with MetroNet on the same terms that it deals with direct consumers. Therefore, MetroNet does not have an actionable antitrust claim under the Supreme Court's existing refusal to deal precedents as explained and limited by *Verizon*.

B. Elimination of arbitrage

In our previous decision, we did not rely on the existing refusal to deal doctrine to conclude that Qwest could be liable under the Sherman Act for monopolization. *MetroNet, 329 F.3d at 1006-08*. Instead, analogizing to cases which had condemned collaborative efforts to eliminate discounters, we extended antitrust liability to Qwest's unilateral attempt to eliminate discount resellers like MetroNet. *Id. at 1007*. ***HN8***[] *Verizon* teaches, however, that the regulatory context is an important consideration in "deciding whether to recognize an expansion of the contours of *§ 2*." *Verizon, 124 S. Ct. at 881.* **[**28]** [16] To determine whether we should expand the contours of *Section 2* liability in a regulated industry, we must weigh the "benefits of antitrust intervention" against "a realistic assessment of its costs." *Id. at 882*.

With regard to the benefits of antitrust intervention, we recognize that imposing antitrust liability on sellers who unilaterally attempt to eliminate resellers can deter attempts to eliminate arbitrage that is beneficial to consumer welfare. A reseller can engage in arbitrage when a seller price discriminates among its consumers. In particular, if a seller charges a higher price to some consumers (the "disfavored consumers") and a lower price to others (the "favored consumers"), a reseller can take advantage of this price differential by buying **[**29]** the product or service at the lower price intended for the favored consumers and reselling it to the disfavored consumers at a price below the price the seller charges the disfavored consumers. *See* 3 Areeda & Hovenkamp, ***Antitrust Law*** P 721b, at 263 (2d ed. 2002).

Prohibiting sellers from eliminating arbitrage thus can enhance consumer welfare under certain conditions. For instance, if the seller's increase in profits from a greater number of sales due to the discounted price outweighs the loss in profits from the decrease in sales at the higher price due to customers switching to the reseller, the seller would find it profitable to continue to offer the product or service at a discounted price despite the presence of arbitrage and an inability to eliminate it. Consequently, favored consumers would still be able to purchase the product or service at the lower discounted price from the seller. In addition, some disfavored consumers who were willing to pay the seller's higher price could buy the product or service at a lower price from the reseller, and other disfavored consumers who were unwilling to pay the seller's higher price might be willing to buy the product at the reseller's **[**30]** lower price. Under these conditions, deterring the seller from eliminating arbitrage would increase consumer welfare and allocative efficiency.

HN9[] In *Verizon*, however, the Supreme Court noted that where "a regulatory structure designed to deter and remedy anticompetitive harm . . . exists, the additional **[*1135]** benefit to competition provided by antitrust enforcement will tend to be small." *124 S. Ct. at 881*. Such a regulatory structure exists in this case. Under the Washington regulatory scheme, Qwest must file tariff schedules with the WUTC regarding its rates, which must be "fair, just, reasonable and sufficient," and may not change its filed tariff rates unless it gives 30 days notice to the WUTC and the public. *Wash. Rev. Code §§ 80.36.080*, *.100*, *.110(1)(a)*. The WUTC can suspend proposed changes within this 30-day period or before they are due to go into effect, whichever is later. *Id. § 80.36.110(1)(a)*. In addition, the WUTC may on its own initiative or upon complaint hold a hearing to determine whether the rates being charged are "unjust, unreasonable, unjustly discriminatory or unduly preferential, or in anywise in violation of law. **[**31]** " *Id. §§ 34.05.413*, *80.36.140*. If the WUTC finds in the affirmative, it "shall determine the just and reasonable rates" and fix such rates by order. *Id. § 80.36.140*.

---

[16] The Supreme Court recognized, however, that the regulatory scheme created by the 1996 Act does not shield regulated entities from antitrust scrutiny altogether under the doctrine of implied immunity. *Verizon, 124 S. Ct. at 878*.

The WUTC may classify a telecommunications service as competitive if it is subject to "effective competition," which "means that customers of the service have reasonably avail-able alternatives and that the service is not provided to a significant captive customer base." *Id.* *§ 80.36.330(1). The WUTC* may require a competitive service to be provided under a price list, and 10 days notice must be given to the WUTC and customers for changes to rates filed in a price list. *Id.* *§ 80.36.110(1)(b)*, *.330(2)*. Moreover, the WUTC "may investigate prices for competitive telecommunications services upon complaint," in which case Qwest would have to prove that the prices charged are "fair, just, and reasonable." *Id.* *§ 80.36.330(4). The WUTC* may also "reclassify any competitive telecommunications service if reclassification would protect the public interest." *Id.* *§ 80.36.330(7)*.

In addition to the regulatory structure that exists, the record shows that the WUTC has been attentive to Qwest's attempts to eliminate **[**32]** Centrex resale and to price discriminate through per location pricing. The WUTC classified Centrex features as a competitive service in 1987 after hearing testimony from Dr. Nina Cornell, MetroNet's expert in this case, that Qwest's ability to price discriminate prevented effective competition. The WUTC nevertheless concluded that Centrex features were subject to effective competition. In 1992, after Qwest filed a price list revision to implement per location pricing for Centrex, the WUTC on its own initiative issued a complaint and instituted an investigation into whether Centrex features should be reclassified as noncompetitive. After conducting several days of hearings, the WUTC found that reclassifying Centrex features as noncompetitive would not protect the public interest. In 1995, the WUTC suspended Qwest's tariff revisions and ordered Qwest to refile tariffs for Centrex with-out the per location requirement, which Qwest did. When Qwest filed a price list in 1997 re-implementing per location pricing for Centrex *features*, the WUTC held an open meeting during which MetroNet urged the WUTC to reject the price list, arguing that the per location pricing was designed to eliminate **[**33]** resellers and was thus inconsistent with the WUTC's prior orders. [17] Despite this testimony, the WUTC accepted its staff's recommendation to allow the price list to go into effect without taking any action.

[*1136] In sum, the record demonstrates that the WUTC has been attentive to Qwest's attempts to eliminate resale through per location pricing and has taken corrective action when it found Qwest's conduct to be in violation of the regulatory framework. Thus, the additional benefits of antitrust intervention would tend to be small given the existence of a regulatory structure designed to deter and remedy anticompetitive harm and the record of the WUTC's attentiveness to the alleged anticompetitive conduct. *See* *Verizon, 124 S. Ct. at 881-82*; Areeda & Hovenkamp, ***Antitrust*** **[**34]** ***Law*** P 242, at 39 (2004 Supp.).

On the other side of the scale, the costs from antitrust intervention might be significant. Prohibiting a seller from eliminating arbitrage can diminish consumer welfare and allocative efficiency in the long run under some circumstances. For instance, a seller may charge different prices to favored and disfavored consumers in order to recover the common costs of serving both sets of consumers. *See* Einer Elhauge, *Why Above-Cost Price Cuts to Drive Out Entrants are not Predatory -- and the Implications for Defining Costs and Market Power*, *112 Yale L.J. 681, 732-33 (2003)*. If the seller cannot eliminate arbitrage, its sales to the disfavored (and higher-paying) consumers might be significantly -- if not completely -- undercut by the reseller to the extent that the seller can no longer recoup its common costs. As a result, the seller might choose not to incur common costs that are necessary for the development of economically beneficial facilities.

Alternatively, the seller might choose not to offer a discounted price in the first place and instead charge a uniform price to all consumers. If the uniform price it would set is as high **[**35]** as the price the seller would have charged the disfavored consumers if price discrimination could be maintained, consumer welfare would diminish. All consumers, including those who otherwise would have been favored if price discrimination were sustainable, would have to pay the high uniform price, and some potential consumers who are not willing to pay the high uniform price but would have been willing to pay a lower price that is above the marginal cost to provide the service or product would forgo it. *See* 3 Areeda & Hovenkamp, ***Antitrust Law*** P 721d1, at 266-68 (2d ed. 2002). Hence, consumer welfare would diminish, and allocative efficiency would be distorted.

---

[17] There is no evidence in the record, however, that MetroNet filed a petition to reclassify Centrex features as a noncompetitive service or a complaint that per location pricing for Centrex features was unfair, unjust or unreasonable.

Although courts ideally would not impose antitrust liability on a seller for eliminating arbitrage under such circumstances, a mistaken inference by a factfinder in an antitrust suit could result in the false condemnation of an attempt to preserve a price discrimination scheme that increases consumer welfare or allocative efficiency. The Court observed in *Verizon* that "mistaken inferences and the resulting false condemnations are especially costly, because they chill the very conduct the antitrust laws are designed to **[**36]** protect." *Verizon, 124 S. Ct. at 882* (internal quotation marks omitted). Here, a false condemnation could hurt the very interest the antitrust laws seek to protect -- consumer welfare. *See* *Reiter v. Sonotone Corp., 442 U.S. 330, 343, 60 L. Ed. 2d 931, 99 S. Ct. 2326 (1979)* ("Congress designed the Sherman Act as a 'consumer welfare prescription.' ") (quoting Robert H. Bork, The Antitrust Paradox 66 (1978)); *accord* *Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995)*. Moreover, the risk of false condemnations and the resulting imposition of treble damages in private suits may be enough to deter sellers from attempting to eliminate arbitrage that is not beneficial to consumer welfare or from engaging in socially desirable price discrimination in the first place. Thus, **[*1137]** "the cost of false positives counsels against an undue expansion of *§ 2* liability." *Verizon, 124 S. Ct. at 882*.

We recognize that a unilateral attempt by a seller to eliminate arbitrage can result in anticompetitive harm. If "there [were] nothing built into the regulatory scheme which performs the antitrust function, the benefits of antitrust **[**37]** [would be] worth its sometimes considerable disadvantages." *Id. at 881* (internal citation and quotation marks omitted). Even in the presence of such a regulatory scheme, a plaintiff may be able to pursue an antitrust claim based on existing antitrust standards. *See* *Covad, 374 F.3d at 1052* (reversing the dismissal of a price squeeze claim after *Verizon*). However, given the novel nature of MetroNet's claims, the regulatory structure that exists and the record of agency action in this case -- and guided by *Verizon* -- we decline to expand the scope of *Section 2* liability to Qwest's attempts to eliminate arbitrage by MetroNet.

V. CONCLUSION

We affirm the district court's grant of summary judgment on MetroNet's essential facilities and monopolization claims. We also affirm the denial of MetroNet's motion to enforce its purported settlement agreement with Qwest for the reasons stated in our previous opinion. *See* *MetroNet, 329 F.3d at 1013-15*. In all other respects, our prior opinion is superseded by our opinion today. Each party shall bear its own costs.

AFFIRMED.

HN1[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The standard for addressing an antitrust claim based on an invalid tying arrangement is well established and is not disputed. The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into a purchase of a tied product that the buyer either did not want, or might have preferred to purchase elsewhere on different terms. To prevail on a tying claim, a plaintiff must establish that (1) the tying and the tied products are separate and distinct products; (2) the seller has forced purchasers of the tying product to buy the tied product also; and (3) the tie forecloses a substantial volume of commerce in the market for the tied product.

Opinion

Ruling on Motion of MJ Research, Inc. and Michael and John Finney For Reconsideration of the Court's Order Precluding MJ's Evidence and Arguments Claiming that PCR Rights are Tied to Authorized Thermal Cyclers [Doc. # 897]

On January 28, 2004, this Court granted plaintiffs' motion in limine to exclude MJ's evidence and arguments claiming PCR rights are tied to authorized thermal cyclers. Defendants now move for reconsideration. The motion is granted, and for the reasons discussed below, the Court declines upon reconsideration to change the substance of its earlier decision.

HN1[] The standard for addressing an antitrust claim based on an invalid tying arrangement is well established and is not disputed. "The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into a purchase of a tied product that the buyer either did not want, or might have preferred to purchase elsewhere on different terms." *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*. To prevail on **[*2]** a tying claim, MJ must establish that (1) the tying and the tied products are separate and distinct products; (2) the seller has forced purchasers of the tying product to also buy the tied product; and (3) the tie forecloses a substantial volume of commerce in the market for the tied product. *See id. at 11-16*.

This Court's January 28, 2004 decision concluded that plaintiffs did not unlawfully tie the rights to practice PCR to the purchase of thermal cyclers, and based its holding on three separate grounds. First, the Court found that to the extent the parties defined the "tying product" as the PCR process patent right, and the "tied product" as an "authorized" thermal cycler, then there were not two separate products, because "the PCR process patent right (the tying product) is the same as the "authorization" on the thermal cycler (the tied product). There can be no demand for an 'authorized' thermal cycler separate and distinct from the demand for a PCR process patent right." *See* Ruling on Motion in Limine [Doc. # 874] at 8. The Court found that MJ defined the tied product as an authorized thermal cycler based in part on counsel's unambiguous assertion that **[*3]** "the illegal tie underlying plaintiffs' anti-competitive licensing scheme is the requirement that in order to have the rights to the PCR process patents (the 'tying' product) an end user must use an 'authorized' thermal cycler (the 'tied' product)." Memorandum of MJ Research, Inc. In Opposition to Plaintiffs' Five Motions to Exclude Evidence and Arguments Relating to MJ's Antitrust Counterclaims and Patent Misuse Defense [Doc. # 682] at 15 n.17. In addition, the Court noted that MJ's argument about the coercive effect of the alleged tying scheme relied on the "authorization" aspect of the thermal cycler market. The Court acknowledged, however, that MJ appeared to inconsistently define the tied product, and had at various points defined the tied product as a thermal cycler in general, not simply an "authorized" thermal cycler. Thus, as an alternative holding, the Court assumed two separate products existed, and examined the coercive effect of the tying arrangement.

To establish coercion, there must be evidence that end users were forced to purchase thermal cyclers that they "did not want at all, or might have preferred to purchase elsewhere on different terms," *Jefferson Parish, 466 U.S. at 12,* **[*4]** in order to obtain the right to the PCR process patents. The Court found that end users were not required to purchase an authorized thermal cycler, or any thermal cycler, because they could purchase PCR patent rights through Applera's End User Authorization Program ("EAP"). The Court found the EAP to be a "viable" program that operated independently from the sale of thermal cyclers. The Court rejected defendants' arguments that the EAP itself was an illegal tie, because the EAP did not require end users to buy thermal cyclers, and because the use of a thermal cycler to perform PCR was patented, so that it was not improper to require end users to obtain authorization for this purpose.

The Court acknowledged, however, MJ's argument that the EAP was a sham, because Applera pressured thermal cycler suppliers to join the Supplier Authorization program ("SAP"), and if all suppliers joined the SAP, then the EAP would not be used. As a result, the Court assumed that the SAP was the only authorization program available, and in a second alternative holding, concluded that the SAP did not have a coercive effect, and was not an unlawful tie. In particular, the Court noted that because automated **[*5]** PCR requires the use of a thermal cycler, then "any end user who wished to perform automated PCR would, by necessity, have to obtain a thermal cycler of some kind. The SAP does not restrict the choices of the end user, because it does not determine which thermal cycler machines are available on the market, nor does it require end users to purchase a particular thermal cycler machine." *See* Ruling on Motion in Limine [Doc. # 874] at 8. The Court acknowledged that in a scenario in which all suppliers join the SAP, those purchasers who do not use thermal cyclers to perform PCR may be forced to pay for a PCR process authorization that they do not want or need, but concluded that such a result is not a tie, not least because the PCR process patents gave the plaintiffs a lawfully monopoly on PCR rights.

In its motion for reconsideration, defendants argue that the Court's first holding "misinterprets MJ's claim," the second "overlooks a significant factual dispute," and the third "misreads the law." Defendant's Memorandum of Law [Doc. # 898] at 3. The Court disagrees. While MJ now argues that the tied product is the generic thermal cycler, not an "authorized" thermal cycler, the **[*6]** force of its argument that Applera's authorization program has a coercive and anti-competitive effect continues to stem from the "authorization" aspect of the thermal cycler market. MJ references *Int'l Salt Co. v. United States, 332 U.S. 392, 395-96, 92 L. Ed. 20, 68 S. Ct. 12 (1947)*, in which the Supreme Court found an illegal tie where International Salt required customers to use only salt sold by International Salt in the machines bought from International Salt. MJ argues that even though "International Salt forbids customers from using its machines unless they also acquire salt sold by International Salt (i.e. 'authorized salt')," the machine and the "authorized" salt were still deemed separate products. *See* Defendants' Memorandum of Law [Doc. # 898] at 4. Defendants lose sight of the nature of the process patent at issue this case. Automated PCR requires the use of a thermal cycler, and authorization of a thermal cycler provides the right to perform automated PCR. Thus, the demand for an "authorized" thermal cycler is exactly the same as the demand for automated PCR process rights. And as discussed in this Court's earlier ruling, those end users who wish to perform automated **[*7]** PCR are not forced to buy a product (a thermal cycler) that they do not want or need, because thermal cyclers are required to perform automated PCR.

MJ also argues that the Court's conclusion that the EAP was a viable way for end users to obtain a license to perform PCR impermissibly resolved a genuine dispute of material fact in plaintiffs' favor. MJ asserts, for example, that the authorization fee for the EAP was too high relative to the SAP to make it an economical choice for end users, that Applera refused to allow MJ to buy end user licenses and resell them to end users buying MJ thermal cyclers, and that Applera refused to allow MJ to distribute to its customers EAP forms so as to facilitate end user participation. MJ estimates that only one half of one percent of the thermal cyclers sold were licensed through the EAP. The Court agrees, therefore, that its statement that a "substantial number of EAP agreements have been reached," Ruling on Motion in Limine [Doc. # 874] at 10, was improperly conclusory. Nonetheless, the factual disputes about the extent to which end users participated in the EAP do not disturb the undisputed facts that were central to this Court's finding of **[*8]** viability; namely that the EAP existed as a program, and that there were identifiable end users who purchased licenses through the EAP.

More importantly, however, the Court's earlier ruling acknowledged that the viability of the EAP was subject to change, particularly if all suppliers were pressured by Applera into joining the SAP. Thus, the Court considered the scenario in which the SAP remained the only authorization program available. MJ now argues that the Court's holding as to the exclusive SAP scenario misstated the law, in that *Jefferson Parish* prohibits any coercion of the buyer to purchase a product that the buyer "might have preferred to purchase elsewhere on different terms." *Jefferson Parish, 466 U.S. at 12*. MJ argues that "if all suppliers of thermal cyclers are SAP participants, then the prices of all thermal cyclers will be increased because plaintiffs extract an 'authorization fee' for each and every sale of a machine, regardless of whether the machine is actually ever used to perform 'automated PCR' in PE/Applera's fields." Defendants' Memorandum of Law [Doc. # 898] at 7. That authorization fee, however, is the license for performing automated **[*9]** PCR, which is the same product as the PCR process patent right. To the extent that defendants argue that purchasers of thermal cyclers may be forced to buy unwanted PCR rights, such a result is not a tie. As this Court's January 28, 2004 decision concluded, the "PCR Process Patents give the plaintiffs a lawful monopoly on PCR rights and thus, as a matter of law, plaintiffs cannot be found to 'unlawfully restrain free competition in the market for the tied product. . . .'" Ruling on Motion in Limine [Doc. # 874] at 13 (quoting *Coniglio v. Highwood Servs., Inc., 495 F.2d 1286, 1291 (2d Cir. 1974)*.

For the foregoing reasons, the Motion of MJ Research, Inc. and Michael and John Finney For Reconsideration of the Court's Order Precluding MJ's Evidence and Arguments Claiming that PCR Rights are Tied to Authorized Thermal Cyclers [Doc. # 897] is granted, and upon reconsideration, the Court declines to amend its January 28, 2004 decision granting plaintiffs' Motion to Exclude MJ's Evidence and Arguments Claiming PCR Rights are Tied to Authorized Thermal Cyclers [Doc. # 667 (2)].

IT IS SO ORDERED.

HN1[] **Standards of Review, De Novo Review**

An appellate court exercises plenary review over a district court's grant of summary judgment.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN2[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, provides that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce is declared to be illegal. Despite its broad language, *§ 1* only prohibits contracts, combinations, or conspiracies that unreasonably restrain trade. Certain restraints of trade are per se unreasonable, while others require more searching analysis under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN3[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Restraints of trade are per se unreasonable when they are manifestly anticompetitive or would always or almost always tend to restrict competition. Because of their pernicious effect on competition and lack of any redeeming virtue, these restraints of trade are conclusively presumed to unreasonably restrain competition without elaborate inquiry as to the precise harm it has caused or the business excuse for its use.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN4[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Horizontal price-fixing occurs where competitors at the same market level agree to fix or control the prices they will charge for their respective goods or services.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN5[] **Cartels & Horizontal Restraints, Price Fixing**

Horizontal restraints of trade are per se unreasonable. Whatever economic justification particular price-fixing agreements may be thought to have, the law does not permit an inquiry into their reasonableness. Such restraints are all banned because of their actual or potential threat to the central nervous system of the economy.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN6[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Plaintiffs alleging horizontal restraints of trade need only prove that the defendants conspired among each other and that this conspiracy was the proximate cause of the plaintiff's injury.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN7[] **Antitrust & Trade Law, Sherman Act**

The existence of an agreement is the very essence of a claim under *15 U.S.C.S. § 1*. The Sherman Act is interpreted to require some form of concerted action. There must be a unity of purpose or a common design and understanding or a meeting of minds, or a conscious commitment to a common scheme.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN8[] **Summary Judgment, Opposing Materials**

When faced with whether a plaintiff has offered son a *15 U.S.C.S. § 1* claim, a court must generally apply the same summary judgment standards that apply in other contexts. A court shall render summary judgment when the evidence shows that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Fed R. Civ. P. 56(c)*. In making this determination, a court must view the facts and any reasonable inferences drawn therefrom in the light most favorable to the party opposing summary judgment. The court should not tightly compartmentalize the evidence put forward by the nonmoving party, but instead should analyze it as a whole to see if it supports an inference of concerted action.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Evidence > Admissibility > Circumstantial & Direct Evidence

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Inferences & Presumptions > General Overview

HN9[] **Summary Judgment, Opposing Materials**

Antitrust law limits the range of permissible inferences from ambiguous evidence in a case brought under *15 U.S.C.S. § 1*. In other words, certain inferences may not be drawn from circumstantial evidence in an antitrust case. That higher threshold is imposed in antitrust cases to avoid deterring innocent conduct that reflects enhanced, rather than restrained, competition. The evidentiary limitation does not apply where the plaintiff provides direct evidence of a conspiracy, no inferences are required from direct evidence to establish a fact and thus a court need not be concerned about the reasonableness of the inferences to be drawn from such evidence.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN10[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Courts are cautious in accepting inferences from circumstantial evidence in cases involving allegations of horizontal price-fixing among oligopolists. The basis for this circumspect approach is the theory of interdependence.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN11[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

The theory of interdependence posits the following: In a market with many firms, the effects of any single firm's price and output decisions would be so diffused among its numerous competitors that they would not be aware of any change. In a highly concentrated market dominated by few firms, however, any single firm's price and output decisions will have a noticeable impact on the market and on its rivals. Thus when a firm in a concentrated market, that is, an "oligopolist" is deciding on a course of action, any rational decision must take into account the anticipated reaction of the other firms.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN12[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Under the theory of interdependence, is that firms in a concentrated market may maintain their prices at supracompetitive levels, or raise them to those levels, without engaging in any overt concerted action.

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act, *15 U.S.C.S. § 1 et seq.*, does not proscribe noncompetitive "conscious parallelism."

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN14[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Conscious parallelism is described as the process, not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a profit-maximizing, supracompetitive level by recognizing their shared economic interests and their interdependence with respect to price and output decisions.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN15[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

To establish illegal concerted action based on consciously parallel behavior, a plaintiff must show (1) that the defendants' behavior was parallel; (2) that the defendants were conscious of each other's conduct and that this awareness was an element in their decisionmaking process; and (3) certain "plus" factors. Courts have identified at least three such plus factors: (1) evidence that the defendant had a motive to enter into a price fixing conspiracy; (2) evidence that the defendant acted contrary to its interests; and (3) evidence implying a traditional conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN16[] **Antitrust & Trade Law, Sherman Act**

Evidence that the defendant had a motive to enter into a price fixing conspiracy means evidence that the industry is conducive to oligopolistic price fixing, either interdependently or through a more express form of collusion. In other words, it is evidence that the structure of the market was such as to make secret price fixing feasible. Evidence that the defendant acted contrary to its interests means evidence of conduct that would be irrational assuming that the defendant operated in a competitive market. In a competitive industry, a firm would cut its price with the hope of increasing its market share if its competitors were setting prices above marginal costs. In analyzing this factor, a court looks to evidence that the market behaved in a noncompetitive manner.

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] **Antitrust & Trade Law, Sherman Act**

The most important evidence of a plus factor as evidence of a price fixing conspiracy is generally noneconomic evidence that there was an actual, manifest agreement not to compete. That evidence may involve customary indications of traditional conspiracy, or proof that the defendants got together and exchanged assurances of common action or otherwise adopted a common plan even though no meetings, conversations, or exchanged documents are shown.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN18[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

An agreement to fix prices is a per se violation of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, even if most or for that matter all transactions occurred at lower prices.

An appellate court reviews a district court's determination to not compel a witness to testify for an abuse of discretion.

Criminal Law & Procedure > ... > Interrogation > Miranda Rights > Self-Incrimination Privilege

Evidence > Privileges > Self-Incrimination Privilege > General Overview

HN20[] **Miranda Rights, Self-Incrimination Privilege**

As a general matter, a court should allow a witness to invoke his *Fifth Amendment* privilege only if the hazard of incrimination is substantial and real, and not merely trifling or imaginary. However, the trial judge should order the witness to answer questions only if it is perfectly clear, from a careful consideration of all the circumstances in the case that the answer cannot possibly tend to incriminate the witness.

Criminal Law & Procedure > ... > Interrogation > Miranda Rights > Self-Incrimination Privilege

Governments > Legislation > Statute of Limitations > General Overview

HN21[] **Miranda Rights, Self-Incrimination Privilege**

A promise by the government not to use the testimony to be compelled, even if approved by a court, does not strip the recipient of the protection of that privilege.

Criminal Law & Procedure > ... > Interrogation > Miranda Rights > Self-Incrimination Privilege

Governments > Legislation > Statute of Limitations > General Overview

Criminal Law & Procedure > Commencement of Criminal Proceedings > Interrogation > General Overview

HN22[] **Miranda Rights, Self-Incrimination Privilege**

If a prosecution for a crime, concerning which the witness is interrogated, is barred by the statute of limitations, he is compellable to testify.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Evidence > ... > Statements as Evidence > Hearsay > Hearsay Within Hearsay

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Evidence > Admissibility > Procedural Matters > Rulings on Evidence

HN23[] **Standards of Review, De Novo Review**

An appellate court reviews a district court's decisions to admit or exclude evidence for abuse of discretion, although its review is plenary as to the interpretation or application of a legal standard underlying such a decision.

Evidence > ... > Hearsay > Rule Components > Statements

Evidence > ... > Hearsay > Exceptions > Statements Against Interest

HN24[] **Rule Components, Statements**

A hearsay statement is nonetheless admissible if (1) the declarant is unavailable as a witness; (2) the statement is so contrary to his pecuniary, proprietary or penal interest that a reasonable person in the declarant's position would not have made the statement unless believing it to be true; (3) the trustworthiness and reliability of the statement is corroborated by the totality of circumstances in the case Fed. R. Evid. 804(b)(3); and (4) the declarant had personal knowledge.

Evidence > ... > Hearsay > Exceptions > Statements Against Interest

HN25[] **Exceptions, Statements Against Interest**

See Fed. R. Evid. 804(b)(3).

Evidence > Relevance > Exclusion of Relevant Evidence > Confusion, Prejudice & Waste of Time

HN26[] **Exclusion of Relevant Evidence, Confusion, Prejudice & Waste of Time**

Where a district court fails to explain its grounds for denying a Fed. R. Evid. 403 objection and its reasons for doing so are not otherwise apparent from the record, an appellate court has no way to review its discretion.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

Evidence > ... > Exemptions > Statements by Coconspirators > General Overview

Evidence > ... > Hearsay > Exemptions > General Overview

Evidence > ... > Exemptions > Statements by Party Opponents > General Overview

HN27[] **Inchoate Crimes, Conspiracy**

For an out of court statement to be admissible pursuant to Fed. R. Evid. 801(d)(2)(E), the district court must find by a preponderance of the evidence that: (1) a conspiracy existed; (2) the declarant and the party against whom the statement is offered were members of the conspiracy; (3) the statement was made in the course of the conspiracy; and (4) the statement was made in furtherance of the conspiracy. There is no requirement that the declarant be speaking from personal knowledge.

Evidence > ... > Exemptions > Statements by Coconspirators > General Overview

Evidence > ... > Statements as Evidence > Hearsay > General Overview

Evidence > ... > Hearsay > Exceptions > General Overview

Evidence > ... > Hearsay > Exemptions > General Overview

Evidence > ... > Exemptions > Statements by Party Opponents > General Overview

Evidence > ... > Hearsay > Rule Components > Statements

HN28[] **Exemptions, Statements by Coconspirators**

Fed. R. Evid. 801(d) sets forth statements that are admissible because they do not constitute hearsay, including statements by a coconspirator of a party during the course and in furtherance of the conspiracy.

Evidence > ... > Exemptions > Statements by Coconspirators > General Overview

Evidence > ... > Hearsay > Exemptions > General Overview

Evidence > ... > Exemptions > Statements by Party Opponents > General Overview

Evidence > ... > Hearsay > Rule Components > Statements

Evidence > ... > Procedural Matters > Preliminary Questions > General Overview

HN29[] **Exemptions, Statements by Coconspirators**

A district court can consider hearsay and other inadmissible evidence in determining the admissibility of a coconspirator statement. It must consider the content of the alleged coconspirator statement as well, although the statement requires independent corroboration.

Evidence > ... > Exemptions > Statements by Coconspirators > General Overview

Evidence > ... > Hearsay > Exemptions > General Overview

Evidence > ... > Exemptions > Statements by Party Opponents > General Overview

HN30[] **Exemptions, Statements by Coconspirators**

See *Fed. R. Evid. 801(d)(2)(E)*.

Evidence > Admissibility > Procedural Matters > Rulings on Evidence

HN31[] **Procedural Matters, Rulings on Evidence**

The Federal Rules of Evidence are to be liberally construed in favor of admissibility.

Civil Procedure > Appeals > Standards of Review > General Overview

Evidence > Relevance > Exclusion of Relevant Evidence > Confusion, Prejudice & Waste of Time

HN32[] **Appeals, Standards of Review**

The exclusion of evidence because it's probative value is substantially outweighed by the danger of unfair prejudice under *Fed. R. Evid. 403* is reviewed with substantial deference to the trial court's ruling.

Opinion

[*352] OPINION OF THE COURT

CHERTOFF, *Circuit Judge*.

This case addresses the recurring question of what quantity and quality of evidence suffices to create a genuine issue of material fact as to one particular element of a claim under *Section 1 of the Sherman Act*: whether a defendant entered into an unlawful agreement. Appellants contend **[*353]** that appellee PPG Industries, Inc. ("PPG") conspired with its competitors to fix the prices of flat glass and automotive replacement glass in the early 1990s. The District Court granted PPG's motion for summary judgment on the ground that there was insufficient proof of an agreement. We will reverse in part, affirm in part, and remand for additional proceedings.

I. Background

A. The Flat Glass and Automotive Replacement Glass Industries

PPG manufactures sheets of glass through a method called the "float process." Molten glass is poured over a bath of higher-density liquid, such as molten tin. As the glass floats on top of the bath, it is polished under controlled temperatures. Finally, the glass is fed into an "annealing oven" where it gradually cools and hardens. **[**3]** See *In re Flat Glass Antitrust Litigation, 191 F.R.D. 472, 476 n.7 (W.D. Pa. 1999)*. The glass that PPG produces through the float process--in various sizes, thicknesses, and tints, see Supp. App. 14 n.16; App. 634--is called "flat glass."

PPG and a handful of other firms--Libbey-Owens-Ford Company ("LOF," a subsidiary of the British glass producer Pilkington LLC); AFG Industries, Inc. ("AFG," a subsidiary of the Japanese glass producer Asahi Glass Co.); [1] Guardian Industries ("Guardian"); and Ford Motor Co. ("Ford")--manufacture well over ninety percent of the flat glass sold in the United States. In 1995, for example, PPG accounted for approximately 28% of domestic flat glass shipments, LOF and AFG each accounted for 19%, and Guardian and Ford each accounted for 15%. Supp. App. 20. [2]

[4]** Flat glass produced through the float process may be sold "as is," in which case it is used primarily in construction. Supp. App. 16. Alternatively, many different products may be "fabricated" from flat glass by subjecting it to a variety of processes. A substantial amount of flat glass, for example, is fabricated for use in automobiles. Flat glass may be molded and combined with other parts to produce windshields, for example, or side and rear

---

[1] Asahi also owns a company called Glaverbel, which was associated with AFG, and a Canadian-based company called Glaverbec.

[2] A company named Cardinal Glass Industries ("Cardinal") accounted for approximately 3 of domestic flat glass sales in 1995. Cardinal, which is not a defendant in this suit, did not produce flat glass until 1992, when it purchased a flat glass manufacturing plant that AFG built for it. Before that time, Cardinal fabricated products from flat glass it purchased from PPG and others.

windows. Supp. App. 19. Some products--called original equipment manufacturer products ("OEM" glass products)--are fabricated for sale to vehicle manufacturers for use in new vehicles. Other products--called automotive replacement glass products--are fabricated for sale and use as automotive replacement parts. Supp. App. 25. These are two separate markets. [3]

[5]** **[*354]** The automotive replacement glass market has a four-tier vertical structure. First, manufacturers--the handful of firms mentioned above--produce flat glass. Second, various companies fabricate the flat glass into different types of automotive replacement glass products. The major United States fabricators of automotive replacement glass products during the class period were PPG, LOF, Ford, Guardian, Safelite, Viracon, Premier/Hordis, and Chrysler. App. 585. Thus a number of firms, such as PPG, both manufacture flat glass and fabricate it into automotive replacement glass products. [4]

Third, the fabricators sell the parts by the "truckload" to wholesale distributors. The wholesale distributors then sell the automotive replacement glass products in less than truckload quantities to the retail installers that **[**6]** sell the products directly to car owners.

PPG operates at every level of the automotive replacement glass market; that is, PPG is "vertically integrated." In addition to manufacturing flat glass and fabricating automotive replacement glass products, PPG runs a wholesale distribution operation that sells less than truckload quantities to retail installers. Yet PPG also sells its products to its downstream competitors. It sells flat glass to automotive replacement glass fabricators, and it sells truckload quantities of automotive replacement glass products to wholesale distributors.

B. The Alleged Conspiracies

In 1993, LOF fired two of its executives--Ronald Skeddle (LOF's President and Chief Executive Officer) and Edward Bryant (LOF's Executive Vice President, the company's second-highest ranking officer)--and a grand jury indicted them for conspiracy, mail and wire fraud, and money laundering. A jury eventually acquitted them of the charges, but in the meantime Skeddle and Bryant alleged that during the early 1990s LOF had conspired with its competitors to fix the price of the glass products it sold. See *In re Flat Glass Antitrust Litigation, 288 F.3d 83, 86 (3d Cir. 2002).* **[**7]**

Skeddle and Bryant's allegations spurred plaintiffs to file several private antitrust lawsuits against LOF and its competitors (PPG, AFG, Ford, and Guardian), and the Judicial Panel on Multidistrict Litigation eventually consolidated and transferred the actions to the Western District of Pennsylvania. After the District Court certified two subclasses of plaintiffs, see *In re Flat Glass Antitrust Litigation, 191 F.R.D. 472, 475 (W.D. Pa. 1999)*, plaintiffs reached settlements with all defendants except PPG.

Plaintiffs allege that PPG and its competitors conspired to "fix, raise, and maintain" the prices of flat glass and automotive replacement glass. The two alleged conspiracies correspond with the two subclasses that the District Court certified. See *In re Flat Glass Antitrust Litigation, 191 F.R.D. at 475*. One subclass consists of individuals and entities that purchased flat glass or products fabricated from flat glass from PPG, LOF, Guardian, Ford, or AFG. The other subclass consists of individuals and entities that purchased automotive replacement glass products from any of those same firms. Id.

---

[3] The parties fail to adequately explain the relationship between OEM glass parts and automotive replacement parts, which plaintiffs describe as "identical in composition." Plaintiffs' Br. 4. We gather from the record that they differ in two important respects. First, generally (but not always) only one OEM glass producer exists for any particular product. Thus PPG alone might produce a particular windshield that a car manufacturer uses in a particular model car. In contrast, multiple manufacturers typically produce any one type of automotive replacement part. So PPG, Guardian, and LOF might produce the automotive replacement part that would replace the OEM product that only PPG produced and sold to the car manufacturer. Second, OEM glass products are sold to a particular car manufacturer, whereas the corresponding identical automotive replacement glass products are sold to multiple wholesalers and retail installers.

[4] Automotive replacement glass fabricators produced approximately 10,000 different automotive replacement glass products. No one fabricator produced all 10,000. PPG produced approximately 6,000. App. 585.

Plaintiffs' allegations regarding price-fixing **[**8]** in the market for flat glass are relatively straightforward. Several times during the class period, PPG and the other **[*355]** flat glass producers raised their "list prices" for flat glass by the same amount and within very close time frames. Within a twelve-day period in the summer of 1991, for example, PPG and its competitors all raised their list prices for flat glass by the same amounts. [5] Plaintiffs simply contend that PPG and its competitors agreed to raise their prices, rather than doing so independently and with no concerted coordination.

[9]** Plaintiffs' allegations regarding price-fixing in the market for automotive replacement glass are more complicated. According to plaintiffs, PPG and other automotive replacement glass fabricators used a mechanism, called the "NAGS Calculator," to fix prices at supra-competitive levels.

NAGS, which stands for "National Auto Glass Specifications," is a business that produced a catalogue called the "NAGS Calculator." The NAGS Calculator supplied an identifying number for each type of automotive replacement glass product and provided a recommended price for an installer to charge a car owner for the part. NAGS came up with its recommended price for any particular automotive replacement glass product by taking a truckload quantity price of that product and multiplying it by a number (a "multiplier") specific to that product. Generally, NAGS would use the truckload quantity price for the OEM glass product that the automotive replacement glass was intended to replace.

According to plaintiffs, PPG and other automotive replacement glass manufacturers knew the multipliers that NAGS used to devise its recommended prices. Thus PPG could, and plaintiffs allege did, work backwards from the recommended **[**10]** price to determine the truckload price that NAGS used in its calculation. "If the truckload price used by NAGS was different from its own truckload price," plaintiffs argue, "PPG then adjusted its truckload price to match the truckload price used to create the NAGS price, as did the other [automotive replacement glass] manufacturers." Plaintiffs' Br. 33. Thus plaintiffs contend that PPG and its competitors "had an understanding and acted in concert" to use the NAGS Calculator to "align their truckload price lists and stabilize pricing, and as a benchmark for pricing of [automotive replacement glass] at less-than-truckload quantities." Plaintiffs' Br. 30.

C. <u>The Present Appeal</u>

The District Court granted PPG's motions for summary judgment on both of plaintiffs' price-fixing claims. Before doing so, the Court circumscribed the evidence it considered when deciding PPG's summary judgment motions through a series of *in limine* motions. The Court refused to order Skeddle and Bryant to testify despite their invocation of their *Fifth Amendment* privileges, for example, and it **[*356]** also excluded many of Skeddle's handwritten notes that plaintiffs argue tend to implicate PPG in a price-fixing **[**11]** conspiracy.

Plaintiffs appeal from the District Court's summary judgment and certain of its evidentiary decisions. After addressing the applicable legal standards, we first address whether summary judgment was warranted based on the evidence the District Court considered. [6] We conclude that the District Court should not have granted summary judgment on plaintiffs' flat glass price-fixing claim, and we address the District Court's evidentiary rulings so that the

---

[5] The District Court catalogued these price increases as follows:

> July of 1991, all defendants raised their prices within days of each other by 7.5-9 %, with an effective date of July 29 or August 1, 1991; September of 1992, all defendants raised their prices within days of each other by 5-9 % with an effective date of October 1 or October 12; May of 1993, defendants raised their prices within days of each other by 5.5 % with an effective date of June 7 or 9; October of 1993, defendants raised their prices within days of each other by 6. 5% with an effective date of October 30 or November 1, 1993; April of 1994 all defendants raised their prices by 5-9 % with an effective date of May 1 or 2; August of 1994, all defendants raised their prices by 5-8 % with an effective date of September 19, 1994; March of 1995, all defendants raised their prices by 6 % with an effective date of April 3 or 11.

App. 16 n.4 (internal citations to District Court record omitted).

[6] ***HN1***[] We exercise plenary review over the District Court's grant of summary judgment. <u>See, e.g.</u>, *InterVest Inc. v. Bloomberg, L.P., 340 F.3d 144, 158 (3d Cir. 2003)*.

Court can further consider what evidence a jury may consider on remand. We affirm summary judgment on plaintiffs' automotive replacement glass conspiracy claim.

II. Discussion

HN2[↑] *Section 1 of the Sherman Act* provides that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal." **[**12]** *15 U.S.C. § 1*. Despite its broad language, *Section 1* only prohibits contracts, combinations, or conspiracies that *unreasonably* restrain trade. See *InterVest Inc. v. Bloomberg, L.P., 340 F.3d 144, 158 (3d Cir. 2003)*. Certain restraints of trade are *per se* unreasonable, while others require more searching analysis under the "rule of reason." *Id. at 158-59*.

HN3[↑] Restraints of trade are *per se* unreasonable when they are "'manifestly anticompetitive' or 'would always or almost always tend to restrict competition.'" *Rossi v. Standard Roofing, Inc., 156 F.3d 452, 461 (3d Cir. 1998)* (quoting *Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988))*. Because of their "pernicious effect on competition and lack of any redeeming virtue," *Northern Pac. Ry. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*, these restraints of trade are "conclusively presumed to unreasonably restrain competition 'without elaborate inquiry as to the precise harm [it has] caused or the business excuse for [its] use." *Rossi, 156 F.3d at 461* (internal **[**13]** citations and quotations omitted).

Here, plaintiffs allege that PPG engaged in *HN4*[↑] horizontal price-fixing--i.e., "where competitors at the same market level agree to fix or control the prices they will charge for their respective goods or services."*United States v. Brown Univ., 5 F.3d 658, 670 (3d Cir. 1993)*. Since at least*United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*, the Supreme Court has held that *HN5*[↑] such restraints of trade are *per se* unreasonable. "Whatever economic justification particular price-fixing agreements may be thought to have," the Court explained, "the law does not permit an inquiry into their reasonableness. They are all banned because of their actual or potential threat to the central nervous system of the economy." *310 U.S. 150, 224 n.59, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*; see also *Brown Univ., 5 F.3d at 670*.

As a result, *HN6*[↑] plaintiffs need only prove that "the defendants conspired among each other and that this conspiracy was the proximate cause of the plaintiff's injury." *InterVest, 340 F.3d at 159*. PPG does not dispute proximate causation. Rather, it argues that it did not agree with **[**14]** its competitors to fix prices.

HN7[↑] The existence of an agreement is "the very essence of a *section 1* claim." *Alvord-Polk, Inc. v. Schumacher & Co., 37 F.3d 996, 999 (3d Cir. 1994)*. The *Sherman Act* **[*357]** speaks in terms of a "contract," "combination" or "conspiracy," but courts have interpreted this language to require "some form of concerted action." *Id. at 999* & n.1. In other words, there must be a "'unity of purpose or a common design and understanding or a meeting of minds'" or "'a conscious commitment to a common scheme.'" *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 764, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)* (quoting *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 111 (3d Cir. 1980))*.

HN8[↑] When faced with whether a plaintiff has offered sufficient proof of an agreement to preclude summary judgment, a court must generally apply the same summary judgment standards that apply in other contexts. See *Intervest, 340 F.3d at 159-60*. A court shall render summary judgment when the evidence shows "that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a **[**15]** matter of law." *Fed R. Civ. P. 56(c)*. In making this determination, a court must "view the facts and any reasonable inferences drawn therefrom in the light most favorable to the party opposing summary judgment." *Intervest, 340 F.3d at 160*. And a court "should not tightly compartmentalize the evidence put forward by the nonmovant, but instead should analyze it as a whole to see if it supports an inference of concerted action." *Petruzzi's IGA v. Darling-Delaware, 998 F.2d 1224, 1230 (3d Cir. 1993)*.

Although these normal summary judgment principles apply in antitrust cases, an important distinction exists. As the Supreme Court held in *Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*, *HN9*[↑] "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case." *Id. at 588*;see also *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 763-64, 79 L. Ed. 2d 775,* 104 S. Ct. 1464 (1984). In other words, certain "inferences may not be drawn from circumstantial evidence in an antitrust case." Intervest, 340 F.3d at 160. **[**16]** [7] This higher threshold is imposed in antitrust cases to avoid deterring innocent conduct that reflects enhanced, rather than restrained, competition.

We explored "exactly what inferences are circumscribed in a section 1 case" in our decision in Petruzzi's. There, we identified "two important circumstances underlying the [Supreme] Court's decision in Matsushita": (1) "the plaintiffs' theory of conspiracy was implausible"; and (2) "permitting an inference of antitrust **[**17]** conspiracy in the circumstances 'would have the effect of deterring *significant* procompetitive conduct.'" 998 F.2d at 1232 (quoting In re Coordinated Pretrial Proceedings in Petroleum Prods. Antitrust Litig., 906 F.2d 432, 439 (9th Cir. 1990)) (emphasis in Petruzzi's). In other words, "the Court stated that the acceptable inferences which can be drawn from circumstantial evidence vary with the plausibility of the plaintiffs' theory and the dangers associated with such inferences." Id.; see also Matsushita, 475 U.S. at 587 ("If the factual context renders [the plaintiff's] claim implausible--if the claim is one that simply makes no economic sense--[a plaintiff] must come forward with more persuasive evidence to support [its] claim than **[*358]** would otherwise be necessary.") (citations omitted).

The plaintiffs in Matsushita alleged that the defendants conspired to engage in predatory pricing, the practice by which "a firm sets its prices temporarily below costs, with the hope that the low price will drive a competitor out of business, after which the 'predatory' firm will raise its prices so high that it will recoup its temporary **[**18]** losses and earn additional profit, all before new firms, attracted by the high prices, enter its market and force prices down." Clamp-All Corp. v. Cast Iron Soil Pipe Inst., 851 F.2d 478, at 483. Courts and commentators alike have come to regard predatory pricing as a relatively speculative phenomenon, particularly when its success requires collusion among multiple firms. See Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 226-27, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993). Inferences about predatory pricing are also inherently weak because the behavior of firms engaged in predatory pricing would largely mirror how firms in a competitive market act: by cutting prices. See Matsushita, 475 U.S. at 594 ("Cutting prices in order to increase business often is the very essence of competition."). Thus inferring from ambiguous evidence that firms are engaging in predatory pricing would "chill procompetitive behavior." Petruzzi's, 998 F.2d at 1232.

In Petruzzi's, by contrast, the plaintiff alleged that the defendants conspired to allocate customers. "Plaintiff's theory of conspiracy is not implausible," we explained, rather it made "perfect economic **[**19]** sense." 998 F.2d at 1232. In addition, the challenged activities could not reasonably be perceived as procompetitive. Id. ("After all, refusing to bid on accounts hardly can be labeled as the 'very essence of competition.'") (quoting Matsushita, 475 U.S. at 594). As a result of those circumstances, we concluded that "more liberal inferences from the evidence should be permitted than in Matsushita because the attendant dangers from drawing inferences recognized in Matsushita are not present." Id.; see also Intervest, 340 F.3d at 162; Alvord-Polk, Inc., 37 F.3d at 1001 ("The meaning we ascribe to circumstantial evidence will vary depending on the challenged conduct."). [8]

[7] The "strictures of Matsushita do not apply" when a plaintiff provides direct evidence of a conspiracy. Petruzzi's, 998 F.2d at 1233. That is because "no inferences are required from direct evidence to establish a fact and thus a court need not be concerned about the reasonableness of the inferences to be drawn from such evidence." Id. In addition, "the focus in Matsushita was on *ambiguous* evidence, and what inferences *reasonably* could be drawn from that evidence." Id. (internal citation omitted).

[8] As one prominent antitrust commentator has explained:

> Matsushita spoke in the context of a highly improbable twenty-year-long predatory pricing conspiracy and required high-quality evidence to permit such a conspiracy to be presented to a jury. . . . However, Matsushita itself said little about proof requirements in a case where underlying structural evidence indicates that the offense is quite plausible and would be profitable for the defendants.

Herbert Hovenkamp, The Rationalization of Antitrust, 116 Harv. L. Rev. 917, 925-26 (2003) (reviewing Richard A. Posner, ***Antitrust Law*** (2d ed. 2001)).

[20]** Here, like in *Petruzzi's*, plaintiffs' theory of conspiracy--an agreement among oligopolists to fix prices at a supracompetitive level--makes perfect economic sense. In addition, absent increases in marginal cost or demand, raising prices generally does not approximate--and cannot be mistaken as--competitive conduct.

Yet despite the absence of the Matsushita Court's concerns, this ***HN10***[] Court and others have been cautious in accepting inferences from circumstantial evidence in cases involving allegations of horizontal price-fixing among oligopolists. See *Williamson Oil Co. v. Philip Morris USA, R.J., 346 F.3d 1287, 1300-01 (11th Cir. 2003)*; *Blomkest Fertilizer, Inc. v. Potash Corp. of Saskatchewan, 203 F.3d 1028, 1042-43 (8th Cir. 2000)*; *Jacob Blinder & Sons, Inc. v. Gerber Prods. Co. (In re Baby Food Antitrust Litig.), 166 F.3d 112, 121-22 (3d Cir. 1999)*; *Clamp-All Corp. v. Cast Iron Soil Pipe Institute, 851 F.2d 478, 484* ***[*359]*** *(1st Cir. 1988)*; *Apex Oil Co. v. DiMaurio, 822 F.2d 246, 253-54 (2d Cir. 1987)*; see also *Petruzzi's, 998 F.3d at 1232-33*. [9] The basis for this circumspect approach is the theory of "interdependence." **[**21]** See Donald F. Turner, The Definition of Agreement Under the Sherman Act: Conscious Parallelism and Refusals to Deal, 75 Harv. L. Rev. 655, 662-63 (1962).

HN11[] The theory of interdependence posits the following: In a market with many firms, the effects of any single firm's price and output decisions "would be so diffused among its numerous competitors that they would not be aware of any change." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 1429, at 206 (2nd ed. 2000). In a highly concentrated market (i.e., a market dominated by few firms), however, any single firm's "price **[**22]** and output decisions will have a noticeable impact on the market and on its rivals." Id. Thus when a firm in a concentrated market (i.e., an "oligopolist") is deciding on a course of action, "any rational decision must take into account the anticipated reaction of the other [] firms." Id. at 207. [10]

The result, ***HN12***[] according to the theory of interdependence, is that firms in a concentrated market may maintain their prices at supracompetitive **[**23]** levels, or even raise them to those levels, without engaging in any overt concerted action. We quote the Areeda treatise at length:

> The first firm in a five-firm oligopoly, Alpha, may be eager to lower its price somewhat in order to expand its sales. However, it knows that the other four firms would probably respond to a price cut by reducing their prices to maintain their previous market shares. Unless Alpha believes that it can conceal its price reduction for a time or otherwise gain a substantial advantage from being the first to move, the price reduction would merely reduce Alpha's profits and the profits of the other firms as well.
>
> Such "oligopolistic rationality" cannot only forestall rivalrous price reductions, it can also provide for price increases through, for example, price leadership. If the price had for some reason been less than X [the price a monopolist would charge to maximize profits], firm Beta might announce its decision to raise its price to X effective immediately, or in several days, or next season. The other four firms may each choose to follow Beta's lead; if they do not increase their prices to Beta's level, Beta may be forced to reduce its **[**24]** price to their level. Because each of the other firms knows this, each will consider whether it is better off when all are charging the old price or price X. They will obviously choose X when they believe that it will maximize industry profits.

Id. at 207-08.

---

[9] A leading antitrust scholar, who now authors the Areeda treatise, has characterized these cases at least in part as "an unfortunate misinterpretation" of Matsushita. Herbert Hovenkamp, The Rationalization of Antitrust, *116 Harv. L. Rev. at 925* ("Unfortunately, many courts have read Matsushita as requiring a certain quantum evidence of verbal agreement before summary judgment can be avoided.").

[10] "For example, in a market of one hundred sellers of equal size, an expansion in output of 20 percent by one of them will result in an average fall in output of only about .2 percent for each of the others, so a seller need not worry in making his pricing decisions about the reactions of his rivals." Richard A. Posner, ***Antitrust Law*** 56 (2nd ed. 2001). But if "there are three sellers of equal size, a 20 percent expansion in the sales of one will cause the sales of each of the others to fall by an average of 10 percent--a sales loss the victims can hardly overlook." Id.

Despite the noncompetitive nature of such conduct, which we have come to call***HN13***[] **[*360]** "conscious parallelism," we have held that the *Sherman Act* does not proscribe it. See *In re Baby Foods, 166 F.3d at 121-22*. There are two primary bases for this approach, both embodied in a line of scholarship that started with Donald Turner in 1962 and continued in large part in Phillip Areeda's influential antitrust treatise. First, there exists the notion that interdependent behavior is not an "agreement" within the term's meaning under the *Sherman Act*. See Turner, supra, at 663-65; but see Posner, ***Antitrust Law***, supra, at 94-95. Second, Turner and Areeda argued that judicial remedies are incapable of addressing the anticompetitive effects of consciously parallel pricing. Turner, supra, at 669-71, Areeda, ***Antitrust Law***, supra, PP 1432d5-1432f, at 232-36; but see Posner, **[**25]** supra, at 98. Indeed,***HN14***[] the Supreme Court has described conscious parallelism in dicta as "the process, *not in itself unlawful*, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a profit-maximizing, supracompetitive level by recognizing their shared economic interests and their interdependence with respect to price and output decisions." *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)* (emphasis added).

As a result, we have required that plaintiffs basing a claim of collusion on inferences from consciously parallel behavior show that certain "plus factors" also exist. See *In re Baby Food, 166 F.3d at 122*; *Petruzzi's, 998 F.2d at 1243*. [11] Existence of these plus factors tends to ensure that courts punish "concerted action"--an actual agreement--instead of the "unilateral, independent conduct of competitors." *In re Baby Food, 166 F.3d at 122*. In other words, the factors serve as proxies for direct evidence of an agreement.

[26]** The question then becomes, what are "plus factors" that suffice to defeat summary judgment? There is no finite set of such criteria; no exhaustive list exists. See Id.; Areeda, supra, P 1434a, at 241-42. We have identified, however, at least three such plus factors: (1) evidence that the defendant had a motive to enter into a price fixing conspiracy; (2) evidence that the defendant acted contrary to its interests; and (3) "evidence implying a traditional conspiracy." *Petruzzi's, 998 F.2d at 1244*.

In the context of parallel pricing, the first two factors largely restate the phenomenon of interdependence. We candidly acknowledged as much in *In re Baby Food, 166 F.3d at 122*. See also Areeda, supra, P 1434c1, at 245 ("'Conspiratorial motivation' and 'acts against self-interest' often do no more than restate interdependence."); Posner, supra, at 100. ***HN16***[] Evidence that the defendant had a motive to enter into a price fixing conspiracy means evidence that the industry is conducive to oligopolistic price fixing, either interdependently or through a more express form of collusion. In other words, it is "evidence that the structure of the market **[**27]** was such as to make secret price fixing feasible." *In re High Fructose Corn Syrup Antitrust Litigation, 295 F.3d 651, 655 (7th Cir. 2002)*. Evidence that the defendant acted contrary to its interests means evidence of conduct that would be irrational assuming **[*361]** that the defendant operated in a competitive market. In a competitive industry, for example, a firm would cut its price with the hope of increasing its market share if its competitors were setting prices above marginal costs. Put differently, in analyzing this factor a court looks to "evidence that the market behaved in a noncompetitive manner." Id.

These two plus factors are important to a court's analysis, because their existence tends to eliminate the possibility of mistaking the workings of a competitive market--where firms might increase price when, for example, demand increases--with interdependent, supracompetitive pricing. But since these factors often restate interdependence (at least in the context of an alleged price-fixing conspiracy), they may not suffice--by themselves--to defeat summary judgment on a claim of horizontal price-fixing among oligopolists. [12] ***HN17***[] The most important evidence will

---

[11] ***HN15***[] Thus in order to establish illegal concerted action based on "consciously parallel behavior, a plaintiff must show (1) that the defendants' behavior was parallel; (2) that the defendants were conscious of each other's conduct and that this awareness was an element in their decision-making process; and (3) certain 'plus' factors." *Petruzzi's, 998 F.2d at 1242*,quoted in *Intervest, 340 F.3d at 165*. It is undisputed that the first two circumstances exist here, and we therefore concentrate on the third and final.

generally **[**28]** be non-economic evidence "that there was an actual, manifest agreement not to compete." *Id. at 661*. That evidence may involve "customary indications of traditional conspiracy," or "proof that the defendants got together and exchanged assurances of common action or otherwise adopted a common plan even though no meetings, conversations, or exchanged documents are shown." Areeda, supra, P 1434b, at 243; see also *Petruzzi's, 998 F.2d at 1244*.

[29]** We turn to whether plaintiffs here have adduced sufficient evidence of plus factors to preclude summary judgment on their two separate antitrust claims.

A. Flat Glass

We first note that plaintiffs have offered substantial evidence tending to show that PPG had a motive to enter into a price fixing conspiracy because conditions existed in the flat glass industry that were conducive to collusion. As we have described, the flat glass market is concentrated; there are a handful of sellers and there is no "fringe market" of smaller firms. Flat glass is sold primarily on the basis of price, and although it may vary in tint or thickness it is generally a standardized product. Importantly, the demand for flat glass was in decline during the start of the 1990s and PPG and its competitors had excess capacity. Normally, reduced demand and excess supply are economic conditions that favor price cuts, rather than price increases. There are also high fixed costs in the industry. See App. 635. Suffice it to say, the flat glass industry is in many respects a text book example of an industry susceptible to efforts to maintain supracompetitive prices. See generally Richard A. Posner, **[**30]** ***Antitrust Law*** 69-79 (2d ed. 2001). PPG concedes as much. See Tr. of Oral Argument 21-22.

Similarly, there is evidence in the record indicating that the price increases PPG and its competitors implemented were inconsistent with competition in the industry. In other words, there is evidence of anti-competitive behavior and that PPG **[*362]** acted "contrary to its interests." The entry of Cardinal into the market, for example, tends to indicate that flat glass producers were charging supracompetitive prices. See Posner, supra, at 89 ("The charging of a monopoly price will attract new competitors to a market who perceive opportunities for unusual profits by reason of the abnormally high price."). More important, no evidence suggests that the increase in list prices was correlated with any changes in costs or demand. Indeed, in July of 1992 a PPG executive noted that "no one . . . believes that demand will be robust enough to support a price increase without significant discipline on the part of all float producers." App. 5841. After the flat glass producers implemented a price increase in September of 1992, the same executive noted that "basic supply and demand do not support this **[**31]** [1992] increase." App. 5908.

All the above indicates that the price increases were collusive, but not whether the collusion was merely interdependent or the result of an actual agreement. We therefore consider whether sufficient "traditional" conspiracy evidence exists from which a reasonably jury could infer that an agreement existed. Plaintiffs argue that evidence that PPG's competitors entered into an agreement--at least amongst themselves--tends to show that PPG too entered the same agreement. They also argue that other circumstantial evidence shows--or at least a finder of fact could infer--that PPG agreed to raise the price of flat glass three specific times: June-July of 1991, September-October of 1992, and May-June of 1993.

As a preliminary matter, however, we address an argument that pervades PPG's briefs, both before us and before the District Court. PPG contends that regardless of the flat glass producers' list prices, the actual transactional prices--that is, the prices at which flat glass producers actually sold their product to customers--declined during the period of the alleged conspiracy. Insofar as PPG argues that plaintiffs cannot establish liability as a matter **[**32]** of

---

[12] Neither factor is "strictly necessary." *In re High Fructose Corn Syrup Antitrust Litigation, 295 F.3d 651, 655 (7th Cir. 2002)*. Thus this type of economic evidence is neither necessary nor sufficient to conclude that sufficient proof of an agreement exists to preclude summary judgment, but it is relevant and courts should as a general matter consider it.

We also observe that certain types of "actions against self interest" may do more than restate economic interdependence. For example, non-price acts against self-interest, such as apparently unilateral exchanges of confidential price information, cannot simply be explained as a result of oligopolostic interdependence. See *Blomkest Fertilizer, Inc., 203 F.3d at 1046-47* (Gibson, J., dissenting).

law for that reason, it is simply wrong. [13] ***HN18***[] "An agreement to fix prices is . . . a per se violation of the Sherman Act even if most or for that matter all transactions occurred at lower prices." *In re High Fructose Corn Syrup, 295 F.3d at 656*.

[33]** PPG does not--it cannot--seriously contend that the flat glass producers increased their list prices with no intention of affecting transaction prices. "Sellers would not bother to fix list prices if they **[*363]** thought there would be no effect on transaction prices." Id. Thus declining transaction prices despite an agreement to fix list prices would constitute a failed attempt to fix prices. But a horizontal agreement to fix prices need not succeed for sellers to be liable under the Sherman Act; it is the attempt that the Sherman Act proscribes. See *Socony-Vacuum Oil Co., 310 U.S. at 224 n.59*.

1. Evidence of an Agreement Among PPG's Competitors

The District Court concluded that the record "undoubtedly evidences that several of the settling defendants conspired to fix prices." App. 46. We agree. The most compelling basis for this conclusion is a document that LOF submitted to the Department of Justice's Antitrust Division in 1995.

The Antitrust Division had a "Corporate Leniency Policy" in effect at the time under which the DOJ accorded "leniency to corporations reporting their illegal antitrust activity at an early stage, if they meet certain conditions." App. **[**34]** 6459. Among the policy's requirements was that the cooperating corporation "report[] the wrongdoing with candor and completeness and provide[] full, continuing and complete cooperation that advances the Division in its investigation." App. 6460.

LOF sought leniency under the policy in 1995, but the Antitrust Division concluded that LOF had not been sufficiently forthcoming with information of its wrongdoing. "We are surprised that you consider our proffer, which described an agreed upon, across the board price increase for the entire United States," LOF responded, "to be less than a 'full and complete disclosure.'" App. 5003.

LOF's response to the Antitrust Division does not directly state that it agreed with PPG to raise prices. But a reasonable factfinder could infer such an agreement from LOF's reference to an "across the board" price increase. Black's Law Dictionary defines "across-the-board" as "applying to all classes, categories, or groups." Black's Law Dictionary 24 (7th ed. 1999). One reasonable interpretation of LOF's statement is that LOF agreed with one or more competitor to increase the price of all types of flat glass. Another is that LOF agreed with all its competitors **[**35]** to increase prices on one or more category of flat glass. And yet another is that LOF agreed with *all* its competitors to increase the price of *all* types of flat glass. [14]

PPG argues that under our decision in In re Baby Food, "the fact that some other glass producers may have attempted to fix prices in this case is irrelevant." PPG Brief 82. We disagree. Even if LOF's statement--and any other evidence--tends to show that PPG's competitors agreed among themselves to raise prices but does not

---

[13] PPG argued before the District Court, for example, that "controlling case law precludes an antitrust plaintiff from avoiding summary judgment by reliance on evidence relating to list prices." App. 667. PPG misstates the law. Declining transaction prices will tend to support a conclusion that competitors did not enter into an agreement to fix prices where the other record evidence also fails to sufficiently prove an agreement. See, e.g., *Clamp-All Corp., 851 F.2d at 484* ("The fact that [the defendants] often set prices that deviated from their price lists helps support the inference that the similarity of price lists reflects *individual* decisions to copy, rather than any more formal pricing agreement."). Our decision in In re Baby Food is not to the contrary. In the specific factual setting of that case--involving "hundreds of products" and multiple complicated discounts and price promotions--we concluded that plaintiffs' and their experts' use of list price data was insufficient to show that parallel pricing had occurred. *166 F.3d at 128-29*. Significantly, the defendants made "similar pricing decisions" 15.5 of the time and priced their products differently 84.5 of the time. *Id. at 128*. The District Court therefore concluded, in a portion of its decision that we cited with approval, that the plaintiffs were "unable to show that defendants' prices moved in a parallel fashion. That is true both for list prices and transaction prices." Id.

[14] PPG does not argue that LOF's proffer is not admissible, and we therefore assume that it is for purposes of this decision. In any case, however, we would reach the same result even if we did not consider LOF's proffer.

directly implicate PPG, it is surely not irrelevant to whether PPG entered an agreement. If six firms act in parallel fashion and there is evidence that five of the firms entered into an agreement, for example, it is reasonable to infer that the sixth firm acted consistent with the other five **[**36]** firms' actions because it was also a party to the agreement. That is especially so if the sister firm's behavior mirrored that of the five conceded coconspirators. In some circumstances, to be sure, such evidence might not be sufficient alone to defeat summary judgment. See *In re Citric Acid Litig., 191 F.3d 1090, 1106 (9th Cir. 1999)*. But we need not determine **[*364]** whether it can be here, because plaintiffs argue that additional evidence supports their contention that PPG entered into an agreement.

2. The June-July 1991 Increase

On June 7, 1991, AFG announced that it was raising the price of its flat glass. The price increase was to become effective on July 15, 1991. App. 3552. Neither PPG nor any of AFG's other competitors raised their prices in response. [15]

Also on June 7, 1991, top executives from Pilkington's various **[**37]** businesses (including LOF) met in the United Kingdom. Minutes from the meeting state: "There were indications that a price increase of approximately 8% would hold" in the United States. App. 3868.

A week later, on June 13, 1991, two of LOF's board members (Tomoaki Abe and Mr. Matsumora) traveled to Pennsylvania to play golf with Robert Duncan, the Vice President of PPG's Glass Group. The night before they played golf, Abe's administrative assistant sent him a fax relating a message from Glen Nightingale, the Pilkington executive based in London with responsibility for LOF. [16] The fax stated: "Mr. Nightingale requests that you call him on Friday morning [June 14] before you leave your hotel room--it will only take two minutes. He seemed rather firm. . ." App. 3890.

[38]** Two weeks later, on June 28, 1991, PPG announced a 7.5-9% price increase--an amount different than the price increase AFG announced on June 7, but notably approximately 8 %--to be effective July 29, 1991. App. 5833. PPG's competitors eventually followed suit with virtually identical price increases, to be effective either July 29 or August 1, 1991. Ford announced its price increase on July 1, app. 3472; LOF announced its price increase on July 8, app. 3474; Guardian announced on July 9, app. 3482; and AFG rescinded its June 7 increase and announced a price increase in line with PPG's on July 10, app. 3551.

A copy of PPG's June 28, 1991 announcement produced from the files of John Frazier (manager of PPG's Knoxville, Tennessee branch) contains a typewritten note on it stating: "ALL OTHER MAJOR GLASS SUPPLIERS ARE CONCURRENTLY RAISING PRICES THE SAME PERCENTAGE." App. 5833. Evidence suggests that Frazier received this document, together with the typewritten notation, sometime *before* PPG's competitors had actually matched PPG's price increase. [17]

[39]** On July 2, 1991, a Ford executive sent an email to his regional managers stating that "we must have total support of this industry pricing action and focus our attention on implementing the price increase in an intelligent manner. The actions being **[*365]** taken are important to the industry and will improve the commercial glass

---

[15] AFG raised the price of its "pattern glass" by 4 %, its "thin glass products" by 5 %, its "gray and bronze thicknesses" by 9 %, and its "4mm-12mm" also by 9 %. App. 3552.

[16] LOF's proffer to the DOJ identified Nightingale as an individual "involved in the 1992 activities." App. 5003. It also stated that Nightingale had "discussions with [an AFG executive] that resulted in a price move." App. 5004. Nightingale invoked his *Fifth Amendment* privilege against self incrimination when plaintiffs sought to depose him.

[17] PPG on the other hand argues that there is evidence suggesting that someone typed the note on the June 28 announcement *after* its competitors announced their price increases. PPG is undoubtedly correct; this document's time frame is a disputed fact and a finder of fact could reasonably reach the conclusion PPG urges us to draw. But a fact finder could also reasonably conclude the opposite, and it is black letter law that we must draw all reasonable inferences in plaintiffs' favor at this point in the proceedings.

profitability." App. 3553. As of that day, however, neither LOF nor Guardian had announced a price increase. They announced increases on July 8 and July 9, respectively.

A PPG internal document dated September 6, 1991 stated that the "price increase was implemented without any problems." App. 5831. A similar document, dated September 3, 1991, stated that "the industry price increase was implemented in August by all primary manufacturers, although varying degrees of protection were offered by our competition." App. 5731. An internal LOF document from November of 1991, however, stated that the "price increase of 8/19/91 is unraveling at several key accounts due to AFG/Glaverbec/ Guardian's failure to hold the line on pricing and PPG's price protected annual contracts through the year end." App. 1712.

To summarize: AFG raised its prices, but no one followed suit. **[**40]** LOF executives expressed their opinion at a board meeting that an 8% increase in flat glass prices would "hold." Two board members met with a PPG executive one week later. Two weeks after the meeting, PPG raised its flat glass prices by essentially the same amount that LOF executives thought would "hold." An internal PPG memorandum, which might have been produced prior to any other firm announcing an increase in its flat glass prices, states that other flat glass producers were "concurrently raising prices the same percentage." The flat glass manufacturers initially felt that the price increase had gone successfully, but they later felt it was unsuccessful because at least some of them failed to "hold the line."

3. <u>The September-October 1992 Price Increase</u>

A July 1, 1992 entry in the pocket calendar for a Ford Regional Sales Manager indicated that LOF was going to announce a price increase on Sept. 22, 1992, effective Oct. 1, 1992, with increases of 9% on clear and tinted glass and 5% on "Eclipse" glass. App. 3628. A few weeks later, on July 24, 1992, Joseph Hudson--PPG's Eastern Zone Manager for Flat Glass Products, app. 5908--noted: "No one, however, believes that demand will **[**41]** be robust enough to support a price increase without significant discipline on the part of all float producers." App. 5841. [18]

In September of 1992, however, the competitors announced a 5-9% price increase: AFG announced its price increase on September 15, 1992, to **[**42]** be effective October 1, app. 3545; Guardian announced a price increase on September 21, to be effective October 9, app. 3547; LOF announced on September 22, to be effective October 1, app. 3476; and both PPG and Ford announced their prices increases on September 23, to be effective October 12, app. 3475, 3549. On September 24, AFG changed the effective date of its price increase **[*366]** from October 1 to October 12. App. 3550.

Between September 22 and September 26, 1992, soon after the price increases were announced, senior executives from the various competitors (PPG, Ford, Guardian, and Pilkington) attended a "Glass Fair" meeting in Germany. A Pilkington executive reported the following in a letter to LOF's Skeddle:

> I was pleased to learn during the Glass Fair that an attempt to raise prices by 9% in the United States had been initially supported by all suppliers in the marketplace. During the Fair, I also had the opportunity to meet with Russ Ebeid of Guardian who assured me that they were fully supportive of the price increase proposition. Clearly, this could make quite a difference to your results if the price increase can stick.

App. 3895. This excerpt was removed from **[**43]** a later version of the letter. App. 7194. [19]

---

[18] A fuller excerpt from the cited portion of the record states:

> Glaverbec appears to have quieted down just a bit in terms of new aggressive pricing, seemingly for the first time to be content with current absurdly low prices. Significantly, for the first time, Glaverbec is reported to have said that their tank is sold out. All producers, including PPG, continue to react selectively to Glaverbec's pricing and attempt to protect selected customers and selected markets.
>
> Discussion and rumors surrounding a possible price increase later in the year are widespread in the market place. No one, however, believes that demand will be robust enough to support a price increase without significant discipline on the part of all float producers.

App. 5841.

Finally, during the same time period in September of 1992, PPG's Hudson reiterated his July comment that a price increase would not be consistent with market conditions. According to Hudson, "basic supply and demand do not support this [1992] increase." App. 5908. [20]

[44]** To summarize: A Ford Regional Sales Manager was aware of the precise date when LOF was going to announce a price increase almost three months ahead of time, as well as the precise amounts of the increase. A PPG executive believed that the market would not support a price increase. Nonetheless, PPG and its competitors raised their prices by the same amount, all within eight days of each other. Soon after the price increases were announced, executives from the various flat glass producers attended a trade show at which a executive from Guardian assured an executive from Pilkington that Guardian was "fully supportive of the price increase proposition."

4. <u>The May-June 1993 Price Increase</u>

In December of 1992, AFG's Roger Kennedy told LOF's Roger Teat that AFG was "considering another increase in May

or June [of 1993] of about 5 or 6%." App. 3720, 3456, 3458-59. Teat reported this to superiors at LOF with pricing authority. App. 3721-23, 3456-58. [21]

[45]** LOF's preliminary budget for fiscal year 1994, dated January 21, 1993, refers to a "May-June '93 price increase." App. 6432. Similarly, an LOF "CEO's Review Report" from March 30, 1993 stated that there would be "a U.S. domestic price increase in the May-June timeframe." App. 4031. [22] And LOF's revised budget (dated **[*367]** April 5, 1993) also referred to a "May-June price increase." App. 4669. [23]

[46]** A few months later, on April 16, 1993, AFG faxed to PPG a "prepublication" copy of its May 17, 1993 5.5% price increase announcement (to be effective in June). App. 6369. [24] It also faxed a copy to Guardian. App. 3711.

---

[19] Even if this statement does not unambiguously tend to show that flat glass producers agreed ahead of time to raise prices, it at least tends to show that there was an agreement to maintain higher prices despite competitive demands (i.e. to "make it stick").

[20] The full excerpt from the record reads:

> Certainly the hot topic on the pricing front is the industry increase announced during September to be effective in October. Basic supply and demand do not support this increase, so it will require discipline on the part of each manufacturer. Glaverbec, Guardian's mirror operations and AFG's distribution arm are keys to the success of the increase.

App. 5908.

[21] Kennedy was an officer and director of AFG. Although Teat did not have pricing authority, his precise position at LOF is unclear from the record.

[22] A fuller excerpt stated:

> A price increase has been initiated in Eastern Canada by PPG to be effective March 22; 7 % increase for all clear, uncased product (2.3mm through 6.0mm) and a 9 % increase for clear cased product. It is anticipated that this increase will be a lead into a U.S. domestic price increase in the May-June timeframe. LOF is following the Canadian lead and including heavy clear and tint product with the increase.

App. 4031.

[23] In addition, Ford's business plan (dated April 29, 1993) also referred to a 5 % price increase. App. 3698. Under the heading "Possible Opportunities and Improvements," it stated: "A 5 % market price increase spurred by cyclical recovery with increased industry capacity utilization would increase profits by almost $ 3 million." App. 3697-98.

[24] PPG urges that AFG did not send the fax on April 16, 1993, arguing that the most likely explanation for the date's appearance on the fax is that the fax machine malfunctioned. PPG is free to make this argument to a jury, but surely a reasonable finder of fact could infer that the date on the fax means that it was sent on that day.

PPG announced a 5.5% price increase on May 12, 1993, almost a week before AFG was going to announce its price increase. App. 5840. The rest of PPG's competitors quickly followed suit. LOF, AFG, and Ford announced five days later, on May 17, 1993. App. 3477, 3708, 3478. Guardian announced on May 19, 1993. App. 6105.

After the price increases went into effect, John Musser (from PPG) reported that "the price increase of 5.5% announced in early May by all major **[**47]** float producers for an implementation on or about June 7 has had the effect of stabilizing prices." App. 5906. [25] In a similar vein, an LOF report (dated June 21, 1993) stated: "Price increase is in effect from all major manufacturers. We are monitoring the market to make sure that all stick to the rules and will report any and all information we hear about." App. 3732.

[48]** PPG's Central Zone Manager, Thomas Merlitti, stated on June 25, 1993 that "the price increase implemented in June remains firmly in place as all major flat glass producers are holding firm." App. 3507. And Hudson of PPG reported: "The increase which was effective June 7 has been a nearly complete success." App. 5794.

To summarize: AFG and LOF discussed a May-June 1993 price increase during the preceding December, and LOF accounted for such an increase in its forthcoming budget. In April, AFG faxed to PPG a copy of the increase it planned to announce on May 17. PPG announced an identical increase on May 12, and the rest of the flat glass producers followed with identical price increases. LOF was "monitoring the market to make sure that all stick to the rules." The flat glass producers all "held firm," and executives from the firms generally considered the price increase a "success."

[*368] 5. Analytical Summary

The above evidence is sufficient to provide a finder of fact with a basis to reasonably conclude that PPG agreed with the other flat glass producers to raise prices. Put differently, there is "evidence that would enable a reasonable jury to reject the hypothesis that the defendants **[**49]** foreswore price competition without actually agreeing to do so." *In re High Fructose Corn Syrup, 295 F.3d at 661* (citing *Matsushita, 475 U.S. at 588*).

First, there is the evidence--including LOF's assertion that there was an "across the board" agreement to increase prices--that PPG's competitors entered into an agreement. And viewed collectively and holistically, there is evidence tending to show that PPG was a party to an agreement to raise the price of flat glass on three occasions.

PPG urges us to take a different approach. It appears to propose that we consider each individual piece of evidence and disregard it if we could feasibly interpret it as consistent with the absence of an agreement to raise prices. With regard to the announcement that stated "all other major glass suppliers are concurrently raising prices by the same percentage," for example, PPG argues that the "facts *suggest* that the notation was placed on the announcement after all glass producers had issued their announcements." PPG Br. 25 (emphasis added). Similarly, PPG contends that the "most likely explanation" for the date that appears on an AFG price announcement found **[**50]** in PPG's files "is that the date stamp mechanism malfunctioned." PPG Br. 43. We echo the Seventh Circuit's admonition in In re High Fructose Corn Syrup that the "statement of facts in the defendants' brief combines a recital of the facts favorable to the defendants with an interpretation favorable to them of the remaining evidence; and that is the character of a trial brief rather than of a brief defending a grant of summary judgment." *295 F.3d at 655*. PPG's

[25] A fuller excerpt stated:

> The price increase of 5.5 % announced in early May by all major float producers for an implementation on or about June 7 has had the effect of stabilizing prices. Overall customer reaction to the increase has been favorable, particularly in the mirror and distributor/ fabricator segments. Sash accounts who are not price protected are resisting the increased [sic], to a degree. The modest amount of the increase, the perceived cost justification for the increase, and the firmness to date of all float producers, however, are all positive factors which project that the announced prices will hold. The highest degree of uncertainty resides on the West Coast, which has the lowest level of industry capacity utilization.

App. 5906.

arguments are well-suited for an argument before a jury, but they are irrelevant to our consideration in the present posture of this case.

Alternatively, PPG appears to contend that we should disregard certain categories of evidence, from various periods of time, because such evidence does not in isolation lead inexorably to the conclusion that PPG entered into an agreement. Tr. of Oral Argument 25. PPG argues, for example, that competitors' possession of each others' price increase announcements or meetings among competitors' executives cannot suffice to preclude summary judgment. To be sure, the mere presence of such evidence does not require a court to deny summary judgment. In In re Baby Food, we observed **[**51]** that "we do not believe that the mere possession of competitive memoranda is evidence of concerted action to fix prices." *166 F.3d at 126*. But the price-exchange evidence in *In re Baby Food* was far less compelling than in this case. The In re Baby Food plaintiffs relied upon testimony of competitors' price information gathered by low-level sales employees in unsystematic fashion. Plaintiffs pointed to a few competitors' memos in sales files, but there was no evidence of how the documents got there. Additional evidence documented some awareness of competitors' price increase plans. Notably, these scraps of evidence of foreknowledge were not correlated to any actual concerted price increase activity among all competitors.

We made two salient points in reviewing this evidence and rejecting the inference of agreement. First, we noted that price discussion among low level sales people has little probative weight; we distinguished the far different situation where upper level executives have secret conversations **[*369]** about price. *Id. at 125 & n.8* ("Evidence of sporadic exchanges of shop talk among field sales representatives who lack pricing authority is **[**52]** insufficient to survive summary judgment."). Second, and more important, we emphasized that "there must be evidence that the exchanges of information had an impact on pricing decisions." *Id. at 125*. The reason for this requirement is that exchanges of price information may be compatible with competition, because they may "'increase economic efficiency and render markets more, rather than less, competitive.'" Id. (quoting *United States v. United States Gypsum Co., 438 U.S. 422, 443 n.16, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978))*. The In re Baby Food plaintiffs simply could not correlate information exchanges with specific collusive behavior. Rather, they made the more amorphous claim that the exchanges of information "impacted the market as a whole." Id.

The exchanges of information here, by contrast, are qualitatively different from those in *In re Baby Food*, particularly when considered in the context of other evidence. First, there is evidence tending to show that the exchanges occurred at a higher level of the flat glass producers' structural hierarchy. Second, and more importantly, a finder of fact could reasonably infer that the flat glass producers **[**53]** used the information to implement collusive price increases; that is, "the exchanges of information had an impact on pricing decisions." A court must look to the evidence as a whole and consider any single piece of evidence in the context of other evidence. See *Big Apple BMW, Inc. v. BMW of North America, Inc., 974 F.2d 1358, 1364-65 (3d Cir. 1992)*, cited in *In re Baby Food, 166 F.3d at 124*. So, for example, there is evidence that AFG faxed to PPG a copy of a planned future increase that it had not announced publicly, PPG announced an identical increase before AFG, and the rest of the flat glass producers followed with identical price increases. It would take no stretch of the imagination for a fact finder to infer from this evidence--one piece of which is PPG's possession of a "competitive memoranda"--that PPG engaged in concerted action to fix prices.

In sum, here the exchanges of information are more tightly linked with concerted behavior and therefore they appear more purposive. Several of the key documents emphasize that the relevant price increases were not economically justified or supportable, but required competitors to hold the line. Others **[**54]** suggest not just foreknowledge of a single competitor's pricing plans, but of the plans of multiple competitors. Predictions of price behavior were followed by actual price changes. The inference of concerted rather than interdependent action is therefore stronger. In other words, these facts take the exchanges of pricing information outside the realm of "mere possession." *In re Baby Food, 166 F.3d at 126*.

We need not speculate as to whether something less than the evidence in this record--two rate increases, for instance, rather than three--would suffice to deny summary judgment. The evidence here, in its totality, is sufficient to go to a jury.

B. Automotive Replacement Glass

As described above, PPG and other automotive replacement glass producers supplied NAGS with their truckload list prices for various automotive replacement glass products. NAGS would select a particular truckload price--usually the truckload price of the identical OEM glass product--to devise recommended retail prices for the products. NAGS devised the recommended price by using a particular **[*370]** "multiplier" for each type of product. [26] The glass producers knew the multipliers NAGS used, **[**55]** and were able to calculate backwards to the truckload price that NAGS had utilized. The producers would then align their truckload list prices with the price that NAGS had used. As a result, the automotive replacement glass producers often increased their prices in parallel fashion. [27]

Plaintiffs argue that the evidence shows that PPG and other automotive replacement glass producers agreed to raise their prices. They provide evidence that although it was against PPG's official policy, PPG provided its truckload pricing information to NAGS. Plaintiffs also refer to the NAGS website, which at one point stated: "Manufacturers were in conflict over their **[**56]** published list prices. As a neutral party NAGS was asked to assign list prices to NAGS part numbers, establishing the NAGS List Price." App. 6444-45. [28] In addition, a chart that LOF devised depicts the process. It indicates that producers gave their truckload prices to NAGS, NAGS selected a particular truckload price, the producers issued a "new pricing schedule adjusted to NAGS," and as a result "industry pricing stabilized." App. 4939.

We understand why the NAGS Calculator would raise suspicion in plaintiffs' minds, and why plaintiffs would **[**57]** seek discovery regarding PPG's use of the calculator. Cf. Areeda, supra, P 1435g, at 264-65 (discussing the use of "pricing manuals"). But publication of pricing information can have a pro-competitive effect. As we note above, we should therefore hesitate to rest on inference of improper collusion from this ambiguous, or even pro-competitive, fact. See, e.g., *In re Baby Food, 166 F.3d at 126*;*Petruzzi's, 998 F.2d at 1232*. After conducting discovery, plaintiffs have failed to adduce sufficient evidence to create a genuine issue of material fact. First, there is no evidence that PPG or any other automotive replacement glass producer exerted influence over the truckload prices that NAGS selected to formulate recommended prices. And there is no evidence--unlike the evidence we described above regarding flat glass list prices--that the automotive replacement glass manufacturers agreed to adjust their list prices according to the NAGS recommended price. We will therefore affirm summary judgment on this claim.

C. Evidentiary Rulings

The District Court excluded several categories of evidence before it decided PPG's motions for summary judgment. **[**58]** Plaintiffs appeal from four of the District Court's evidentiary determinations. We address them in turn. [29]

[*371] 1. *Fifth Amendment*

---

[26] The multiplier for domestic windshields, for example, was 4.06. App. 2980.

[27] PPG, Ford and LOF increased the price of windshields by 7 % and tempered parts by 8 %, for example, in February-March of 1992. App. 5913, 5917, 7184. Similarly, in January-February of 1992 they increased windshield prices by 9 % and tempered parts by 10 %. App. 4899, 7192, 7187.

[28] A fuller excerpt states:

> *In the 1950s*, manufacturers were in conflict over their published list prices. As a neutral party NAGS was asked to assign list prices to NAGS part numbers, establishing the NAGS List Price. These prices reflected the industry practice of discounting and were based on manufacturers' truckload prices. NAGS started publishing the part numbers with prices, establishing the 'NAGS calculator'.

App. 6444-45 (emphasis added).

[29] We do not address the District Court's other evidentiary rulings, such as its decision to exclude the transcript of Skeddle's grand jury testimony. Plaintiffs opine that the District Court erred when it excluded the testimony, but they do not appeal from that decision. Plaintiffs' Br. 18.

When plaintiffs sought to depose Skeddle and Bryant--the former LOF executives who were charged with crimes and who alleged that LOF engaged in illegal antitrust activity--they both asserted their *Fifth Amendment* privilege against self incrimination. The District Court denied plaintiffs' motion in which they urged the Court to compel Skeddle and Bryant to testify. Plaintiffs now challenge the District Court's ruling on appeal. ***HN19***[] We review the Court's determination for an abuse of discretion. See *United States v. Castro, 129 F.3d 226, 229 (1st Cir. 1997)*.

HN20[] As a general matter, **[**59]** a court should allow a witness to invoke his *Fifth Amendment* privilege only if the hazard of incrimination is "substantial and 'real,' and not merely trifling or imaginary." *United States v. Apfelbaum, 445 U.S. 115, 128, 63 L. Ed. 2d 250, 100 S. Ct. 948 (1980)* (citation omitted). Yet "the trial judge should order the witness to answer questions only if it is perfectly clear, from a careful consideration of all the circumstances in the case that the answer cannot possibly tend to incriminate the witness." *United States v. Washington, 318 F.3d 845, 856 (8th Cir.)*, cert. denied, *540 U.S. 899, 157 L. Ed. 2d 179, 124 S. Ct. 251 (2003)* (internal quotations and citations omitted); see also *United States v. Yurasovich, 580 F.2d 1212, 1215-16 (3d Cir. 1978)* ("To support a contempt citation for a refusal to testify on *Fifth Amendment* grounds . . . it must be 'Perfectly clear from a careful consideration of all the circumstances in the case, that the witness (who invokes the privilege) is mistaken, and that the answer(s) cannot Possibly have such a tendency to incriminate.'").

Plaintiffs argue that the Court erred because (1) all relevant statutes of limitations **[**60]** have run; and (2) the relevant prosecutorial authorities have stated that they do not intend to bring criminal charges against Skeddle or Bryant. It is irrelevant, however, that prosecutorial authorities have stated that they do not intend to prosecute Skeddle or Bryant. See *Matter of Special Federal Grand Jury, 819 F.2d 56, 58 (3d Cir. 1987)* ***HN21***[] ("[A] promise by the government not to use the testimony to be compelled, even if approved by a court, does not strip the recipient of the protection of that privilege."). And Skeddle and Bryant have sufficiently refuted plaintiffs' statute of limitations argument. To be sure, ***HN22***[] "if a prosecution for a crime, concerning which the witness is interrogated, is barred by the statute of limitations, he is compellable to answer." *Brown v. Walker, 161 U.S. 591, 598, 40 L. Ed. 819, 16 S. Ct. 644 (1896)*. But, contrary to plaintiffs' assertion, Skeddle and Bryant have identified several state statute of limitations that have not run. In Michigan, for example, a defendant's absence from the state tolls the statute of limitation for certain of the state's antitrust laws. See *Mich. Comp. Laws. Ann. §§ 445.781*, *767.24(5)*. The District **[**61]** Court did not abuse its discretion by declining to compel Skeddle and Bryant to testify.

2. Skeddle's Notes

Over the course of the litigation, plaintiffs obtained a large collection of Ronald Skeddle's handwritten notes. The notes fall into two general categories: notes that LOF provided to plaintiffs during discovery and notes that the DOJ produced to plaintiffs pursuant to an order of the District Court. App. 10746, 11154. Skeddle originally provided the latter notes, which the parties have come to call the "Queen's File," to a grand jury empaneled in the **[*372]** spring of 1996 to investigate Skeddle's (and others) allegations of wrongdoing in the flat glass industry. [30]

PPG filed two separate *in limine* motions seeking to exclude both categories of notes, and the District Court granted its motions because **[**62]** it determined that the notes contain "multiple levels of hearsay" and did not fall within any exception to the hearsay rule. App. 47-48, 56-58. ***HN23***[] "We review the district court's decisions to admit or exclude evidence for abuse of discretion, although our review is plenary as to the interpretation or application of a legal standard underlying such a decision." *Robinson v. City of Pittsburgh, 120 F.3d 1286, 1293 (3d Cir. 1997)* (citations omitted).

a. Non-Queen's File Notes

Plaintiffs argue that many portions of Skeddle's notes tend to support their contentions that PPG agreed with its competitors to increase prices on at least two of the three occasions we discussed above. With respect to the June-July 1991 price increase, plaintiffs reference a May 31, 1991 note that states: "Glen [Nightingale] heard that

---

30 There is apparently some amount of overlap between the two categories of notes: LOF had already produced a portion of the notes that plaintiffs also obtained as part of the Queen's File. App. 11154 n.3.

Glaverbec wants to move upwards in N.E. Reg's." App. 4567. Similarly, a note that plaintiffs argue Skeddle wrote no later than May of 1991 states that Jim Collins, a PPG Regional Sales Manager, "mentioned that PPG is looking at the possibility of an inc this summer." App. 3938.

With regard to the September-October 1992 price increase, plaintiffs refer to notes **[**63]** that purportedly memorialize conversations Skeddle had with Glen Nightingale, of Pilkington. First, a note dated February 6, 1992 provides: "Clearly Glen has had discussions w AFG, Guardian, & probably indirectly w PPG (crystal tower) re price increases, and is asking me now to supply him info so that he can initiate more detailed discussions with his contacts." App. 3877. And a note that plaintiffs contend pertains to a meeting Skeddle had with Glen Nightingale on April 29, 1992 states:

> Glen indicated he would make contacts w AFG and Glaverbel/Glaverbec to see if he could get them to agree to come off their silly low prices and if he could initiate a general price increase w/in the next 2 months.
> He indicated he would get back to me to indicate his findings/effect following his calls.

App. 4581. Another note also ostensibly memorializing a conversation Skeddle had with Glen Nightingale states that Nightingale met with AFG's Dee Hubbard. The note mentions an "incremental increase" and states that "AFG will lead--before Labor Day." App. 3891.

Similarly, a note from a meeting Skeddle had with LOF board member Tomoaki Abe and dated November 17, 1992 contains the **[**64]** notation: "Mtgs. w PPG, Guardian re lic'g, prices, etc." App. 10602. Finally, a note that plaintiffs contend memorializes a July 13, 1992 conversation with Nightingale states:

> Glen then related his information on North American flat glass pricing -- the info came from Hubbard of AFG, and the top guy at Glaverbel (Asahi) who control Glaverbec in Canada, [illegible] controls AFG in the states.
>
> The indication is that new "targets" have been established for AFG and Glaverbec in Canada @ [tilde] 7 % above recent experience--letters will be forthcoming to **[*373]** the general mkt place explaining new prices as follows:
> [chart omitted]
> These prices should go into effect 17th July.
> Glen then related that Hubbard & he have "talked" and have together convinced PPG to take the lead in putting up the price by [tilde] 7 % with letter to go out in Sept. 92, to take effect Oct. 1, 1992--with PPG taking the lead.

App. 3893.

Plaintiffs argue that these statements are admissible because they are statements of coconspirators under *Federal Rule of Evidence 801(d)(2)(E)* and therefore not hearsay. Alternatively, they argue that even **[**65]** if the statements are hearsay they are admissible as statements against interest under *Federal Rule of Evidence 804(b)(3)*.

We first consider whether the District Court erred in concluding that the statements were not admissible as against interest under *Rule 804(b)(3)*.***HN24***[] A hearsay statement is nonetheless admissible if (1) "the declarant is unavailable as a witness," *United States v. Boyce, 849 F.2d 833, 836 (3d Cir. 1988)*; (2) "the statement is so far contrary to his pecuniary, proprietary or penal interest that 'a reasonable person in the declarant's position would not have made the statement unless believing it to be true,'" id. (quoting *Fed. R. Evid. 804(b)(3)*); (3) "the trustworthiness and reliability of the statement [is] corroborated by the 'totality of circumstances' in the case," id.; and (4) the declarant had personal knowledge (i.e., he perceived the facts to which the statement relates), see *United States v. Ammar, 714 F.2d 238, 254 (3d Cir. 1983)*; 5 Jack B. Weinstein et al., Weinstein's Federal Evidence § 804.06[4] (2d ed. **[**66]** 2003). [31] The second and third requirements are "somewhat redundant" and often

---

[31] *Federal Rule of Evidence 804(b)(3)* provides:

> ***HN25***[] (b) Hearsay exceptions. The following are not excluded by the hearsay rule if the declarant is unavailable as a witness:
>
> . . . .

require "'a sensitive analysis of the circumstances in which the statement was made and the precise nature of the statement.'" *Boyce, 849 F.2d at 836* (quoting *United States v. Palumbo, 639 F.2d 123, 127 (3d Cir. 1981))*; see also *United States v. Moses, 148 F.3d 277, 280 (3d Cir. 1998)* ("This determination must be made 'by viewing [the statement] in context' and 'in light of all the surrounding circumstances.'") (quoting *Williamson v. United States, 512 U.S. 594, 603-604, 129 L. Ed. 2d 476, 114 S. Ct. 2431 (1994))*.

[67]** Here, the District Court concluded that Skeddle's statements were inadmissible because they "have not been corroborated by the totality of the circumstances." App. 47. Because this was the total of the District Court's analysis, the precise basis for this conclusion is unclear. In its *in limine* motion before the District Court, PPG appears to have offered three reasons **[*374]** why the totality of the circumstances do not corroborate Skeddle's statements: (1) actual events did not occur precisely as the notes indicated they would (e.g., PPG did not "lead" the September 1992 price increase); (2) Skeddle's notes tend to implicate others besides himself; and (3) Skeddle may not have written the notes contemporaneously with the events he described in them. App. 10748-50.

The first two factors do not sufficiently impugn Skeddle's statements. To the contrary, discrepancies between Skeddle's statements and later actual events could tend to reinforce their veracity; statements that exactly mirrored what occurred would arguably be more suspect. And there is no *per se* rule that statements implicating another person in misconduct are not against the interest of the declarant. See *Moses, 148 F.3d at 280.* **[**68]** We do not agree with PPG's assertion that the statements, which relate the inculpatory statements of his superiors (such as Nightingale), do not also inculpate Skeddle. Skeddle was the President of LOF at the time of the alleged conspiracy. Discussions to increase prices and Skeddle's knowledge of those discussions blanket him with antitrust liability. Indeed, such liability likely forms the basis for Skeddle's invocation of his *Fifth Amendment* privilege against self incrimination.

We agree, however, that a finding that Skeddle's notes were not contemporaneous would support a conclusion that the statements are not reliable or corroborated by the circumstances. Skeddle left LOF under a cloud of mutual disaffection. Consequently, documenting LOF wrongdoing during a time when LOF was alleging that Skeddle himself had engaged in wrongdoing would tend to impugn Skeddle's motives and therefore also the reliability of the statements. But it is not clear that the District Court excluded Skeddle's notes because it found that they were not contemporaneous. Moreover, it is not clear that the record supports such a conclusion; on their face, many of the notes give no indication that they were **[**69]** ex post fabrications.

The District Court's summary disposition of PPG's *in limine* motion hinders our ability to determine whether it abused its discretion. Cf. *Becker v. ARCO Chemical Co., 207 F.3d 176, 181 (3d Cir. 2000)* ***HN26***[] ("Where, however, the district court fails to explain its grounds for denying a *Rule 403* objection and its reasons for doing so are not otherwise apparent from the record, there is no way to review its discretion."). Since we conclude that a jury could find an agreement existed even absent Skeddle's notes and we would remand on that basis alone, we believe the best course is to allow the District Court to consider these evidentiary matters in the first instance. We will therefore remand the District Court's determination that Skeddle's statements were not against self interest so that the Court can consider its rulings in light of our decision and more fully explain any bases for its rulings. [32]

> (3) Statement against interest. A statement which was at the time of its making so far contrary to the declarant's pecuniary or proprietary interest, or so far tended to subject the declarant to civil or criminal liability, or to render invalid a claim by the declarant against another, that a reasonable person in the declarant's position would not have made the statement unless believing it to be true. A statement tending to expose the declarant to criminal liability and offered to exculpate the accused is not admissible unless corroborating circumstances clearly indicate the trustworthiness of the statement.

Fed. R. Evid. 804(b)(3). We note that the *Confrontation Clause* raises some additional issues about admissibility of such testimony in a criminal case, but those concerns are irrelevant in this civil case. See *Crawford v. Washington, 541 U.S. 36, 158 L. Ed. 2d 177, 124 S. Ct. 1354 (2004)*.

[32] In this regard, the District Court should determine whether, because the statements at issue were diary entries, Skeddle believed that they would be seen by anyone. This may bear on whether they qualify as statements against interest. See ***Zenith Radio Corp. v. Matsushita Electric Industrial Co., 505 F. Supp. 1190, 1259-60 (E.D. Pa. 1981)***, issue aff'd *In re Japanese*

[70]** **[*375]** Similarly, we will also remand the District Court's determination that the statements in Skeddle's notes were not statements of co-conspirators.***HN27***[] "In order for an out-of-court statement to be admissible pursuant to *Rule 801(d)(2)(E)*, the district court must find by a preponderance of the evidence that: (1) a conspiracy existed; (2) the declarant and the party against whom the statement is offered were members of the conspiracy; (3) the statement was made in the course of the conspiracy; and (4) the statement was made in furtherance of the conspiracy." *United States v. Ellis, 156 F.3d 493, 496 (3d Cir. 1998)*. [33]

Here, the District Court determined that plaintiffs had not satisfied the second requirement. It concluded **[**71]** that the statements in Skeddle's notes were not admissible as co-conspirator statements because "plaintiffs have failed to adduce sufficient evidence that PPG was a coconspirator in the alleged price-fixing conspiracy." App. 48. [34] In other words, although the Court concluded that there was evidence that a conspiracy existed, see app. 46, it found that there was insufficient evidence that PPG was a party to the conspiracy.

It was plaintiffs' burden to show by a preponderance **[**72]** of the evidence that the statements in Skeddle's notes were made in the course of and in furtherance of a conspiracy of which the declarant and PPG were members. See *United States v. McGlory, 968 F.2d 309, 334 (3d Cir. 1992)* (citing *Bourjaily v. United States, 483 U.S. 171, 175, 97 L. Ed. 2d 144, 107 S. Ct. 2775 (1987))*; 5 Jack B. Weinstein et al., Weinstein's Federal Evidence § 801.34[6][a] (2d ed. 2003). And it was the District Court's role to determine whether plaintiffs satisfied their burden. See *Bourjaily, 483 U.S. at 175*; *Ammar, 714 F.2d at 247 n.5*. In making this factual determination, a district court is not bound by the rules of evidence. See *Bourjaily, 483 U.S. at 178-79*; *Fed. R. Evid. 104(a)*. Thus ***HN29***[] a district court can consider hearsay and other inadmissible evidence. See *McGlory, 968 F.2d at 334*. And it must consider the content of the alleged coconspirator statement as well, although the statements require independent corroboration. See *Fed. R. Evid. 801(d)(2)(E)* ***HN30***[] ("The contents **[**73]** of the statement shall be considered but are not alone sufficient to establish . . . the existence of the conspiracy and the participation therein of the declarant and the party against whom the statement is offered . . . .").

The Court's summary disposition again hampers our review of its decision for an abuse of discretion, however, which is the standard of review we must apply to its *Rule 801(d)(2)(E)* determinations. See, e.g., *United States v. Local 560 (I.B.T.), 974 F.2d 315, 337 (1992)*. Insofar as the Court based its determination on a conclusion that there was insufficient evidence from which a jury could conclude that PPG entered into an agreement to fix prices, the District Court erred for the reasons we set forth above. But simply because a jury *could* find by a preponderance of the evidence that PPG entered into a conspiracy, **[*376]** it is not the case that the District Court *must* find that plaintiffs showed by a preponderance of the evidence that PPG entered into an agreement. Any particular factual determination requires making a number of more particularized factual determinations and weighing the relevant importance of those determinations. And two **[**74]** factfinders could feasibly reach different conclusion, especially under a preponderance of the evidence standard. To be sure, however, ***HN31***[] "the Federal Rules of Evidence are to be liberally construed in favor of admissibility." *United States v. Pelullo, 964 F.2d 193, 204 (3d Cir. 1992)*.

Because we will remand plaintiffs' flat glass price fixing claim for further proceedings, we again conclude that the best course is to remand the District Court's determination that the statements in Skeddle's notes were not

---

Electronic Products Antitrust Litigation, 723 F.2d 238, 300 (3d Cir. 1983), rev'd on other grounds sub. nom *Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. We do not categorically hold that diary entries cannot satisfy the requirements of *Rule 804(b)(3)*, see *Walker v. Lockhart, 763 F.2d 942, 951 n.18 (8th Cir. 1985)* (en banc), but we do believe that a searching inquiry is appropriate here, *In re Japanese Electronic Products, 723 F.2d at 300*.

[33] There is no requirement that the declarant be speaking from personal knowledge. See *United States v. Ammar, 714 F.2d 238, 254 (3d Cir. 1983)*; 5 Jack B. Weinstein et al., Weinstein's Federal Evidence § 801.23[2] (2d ed. 2003).

[34] The District Court characterized the admissibility of coconspirator statements as an "exception to the hearsay rule." *Rules 803* and *804* set forth exceptions to the hearsay rule; that is, they explain when statements are admissible even though they qualify as hearsay. ***HN28***[] *Rule 801(d)*, however, sets forth statements that are admissible because they do not constitute hearsay, including statements "by a coconspirator of a party during the course and in furtherance of the conspiracy." *Fed. R. Evid. 801(d)(2)(E)*.

coconspirator statements. See *In re Japanese Electronics Products Antitrust Litigation, 723 F.2d 238, 263 (3d Cir. 1983)* (remanding *Rule 801(d)(2)(E)* determination to be reconsidered),rev'd on other grounds sub. nom. *Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. Thus the District Court can consider whether the statements in Skeddle's notes are coconspirator statements with the benefit of our discussion of the evidence tending to implicate PPG in a price-fixing conspiracy, and can further explain any bases it might have for its reasoning. [35]

[75]** Finally, we note that many of the notes contain multiple levels of hearsay. See, e.g., *Carden v. Westinghouse Elec. Corp., 850 F.2d 996, 1001-02 (3d Cir. 1988)*; *Fed. R. Evid. 805*. One note states, for example, that Nightingale "related" that he and an AFG executive "convinced PPG to take the lead in putting up the price by [tilde] 7 % with letter to go out in Sept. 92, to take effect Oct. 1, 1992--with PPG taking the lead." App. 3893. The note itself (Skeddle's statement) and Nightingale's assertion that he convinced PPG to take the lead in increasing prices are both out-of-court statements that plaintiffs seek to use to prove the truth of the matter asserted. Either or both might be admissible as statements of coconspirators as well as statements against interest. Again, we think the District Court should make these determinations in the first instance, taking into account our discussion in this opinion.

b. Queen's File Notes

The District Court concluded that the statements in the Queen's File notes, like the statements in the other Skeddle notes, were not admissible as coconspirator statements because "plaintiffs have **[**76]** failed to adduce sufficient evidence that PPG was a co-conspirator in the alleged price-fixing conspiracy." App. 57. It also concluded that the statements were hearsay and the Queen's File was not admissible under the statement against interest exception because "the statements contained therein are not contrary to Skeddle's pecuniary or penal interest" and because "the documents' trustworthiness and reliability are questionable given the totality of the circumstances." App. 57. [36]

[*377] Since this was the sum of the District Court's reasoning, we turn to PPG's arguments before the **[**77]** District Court to discern the bases for the Court's decision. Cf. *United States v. Himelwright, 42 F.3d 777, 781 (3d Cir. 1994)* (looking to whether bases for district court's decision was "apparent from the record" where the court did not explain the grounds for its decision). PPG argued that most of the notes in the Queen's File "were written after Mr. Skeddle's termination as chief executive officer of LOF on May 10, 1993, when he, Edward Bryant (then LOF's head of manufacturing operations), and Darryl Costin (then LOF's head of technical operations) were fired amidst allegations of actionable self-dealing." App. 11154. Many of the notes appear, on their face, to support PPG's contention. They are written in the third-person, for example, and they refer to events that post-date Skeddle's termination. See, e.g., Supp. App. 437. One note, for instance, refers to the "summer of 1993" in the past tense. App. 11154.

If the District Court concluded that the notes were not contemporaneous, it could have concluded that the statements contained therein were not in furtherance of a conspiracy or corroborated by the totality of the circumstances; that is, it could have **[**78]** concluded that the statements were not admissible as coconspirator statements or statements against interest. If we could conclude that the District Court excluded all the Queen's File notes on that basis, we would affirm the District Court's decision. But PPG concedes that not all the Queen's File notes appear to be non-contemporaneous. See PPG Br. 94, Tr. of Oral Argument 46. We will therefore remand the District Court's decision to exclude the Queen's File notes for the same reasons we remand its determination to

---

[35] PPG argues that the District Court concluded that the statements in Skeddle's notes were not in furtherance of any conspiracy, ostensibly because--as PPG argues--Skeddle did not create the notes at the same time as the events he purports to describe in them. But nothing in the Court's decision indicates that this was a basis for its determination that the statements were inadmissible. The District Court will surely consider PPG's arguments in this regard on remand.

[36] The District Court also concluded that the Queen's File and non-Queen's File notes did not fall within the business records exception of *Rule 803(6)*. App. 47, 56-57. And the Court found that the "Queen's File does not qualify as an admission by a party opponent under *Rules 801(d)(2)(A)*, *(B)*, *(C)*, or *(D)*." App. 57-58. Plaintiffs do not argue that the District Court erred in these determinations, and we therefore do not address them.

exclude Skeddle's other notes. We think it best for the District Court to have the opportunity to make these evidentiary determinations with the benefit of our discussion here.

3. Evidence Concerning OEM Glass

As we explained above, PPG and others fabricated flat glass into products for use in automobiles. Some of those products--called "original equipment manufacturer" glass ("OEM glass")--were fabricated for use in new automobiles. Others were fabricated for use as automotive replacement parts. The latter products--called automotive replacement glass--are the same as OEM glass products, but the markets for the two are distinct.

In order to prove that PPG conspired **[**79]** to fix the price of flat glass, plaintiffs offered evidence that they argue shows that PPG conspired with LOF to fix the price of OEM glass products. Specifically, plaintiffs argue that meetings and conversations occurred between Edward Bryant--who was LOF's Executive Vice President in charge of the firm's flat glass, automotive replacement glass, and OEM businesses--and Frank Archinaco (the head of PPG's automotive replacement glass and OEM businesses). These meetings and discussions were private and occurred, according to plaintiffs, at "opportune times" for price fixing.

The District Court concluded that while the evidence constituted "other bad acts" evidence under *Federal Rule of Evidence Rule 404(b)*, it was admissible for other acceptable purposes (e.g. motive, opportunity, or intent). ***HN32***[] Yet the Court excluded the evidence because it determine that the **[*378]** evidence's probative value was substantially outweighed by the danger of unfair prejudice. App. 54-55. This is a standard *Rule 403* balance, which we review with "substantial deference." *McQueeney v. Wilmington Trust Co., 779 F.2d 916, 922 (3d Cir. 1985)*. [37]

[80]** While evidence that PPG and LOF conspired together in the OEM market would be relevant to plaintiffs' claim that PPG also conspired to fix prices in the market for flat glass, see *In re High Fructose Corn Syrup, 295 F.3d at 661* (noting that defendant conceded to having fixed prices on related products during the same time frame as the alleged conspiracy), Areeda, supra, P 1421, at 145, plaintiffs' evidence here is not particularly probative of any OEM glass conspiracy. The weakness of this evidence also mitigates any danger of unfair prejudice. But we cannot say that the District Court abused its discretion in weighing these countervailing considerations, and we will therefore affirm the Court's decision to exclude the OEM glass evidence.

III. Conclusion

We will affirm the District Court's decision granting summary judgment on plaintiffs' claim that PPG conspired to fix the prices of automotive replacement glass. We conclude, however, that there is sufficient evidence in the record--not taking into account evidence the District Court excluded--from which a reasonable jury could find that PPG conspired to fix the prices of flat glass. We will therefore reverse **[**81]** the District Court's judgment and remand for further proceedings. In addition, we will affirm the District Court's decisions declining to compel Skeddle and Bryant to testify and excluding evidence regarding OEM glass. But we will remand the Court's decision to exclude Skeddle's notes so that the Court can consider its ruling in light of our opinion here and have a further opportunity to explain the bases for its decisions.

End of Document

---

[37] PPG also argues that we should affirm the District Court's decision because a reasonable jury could not conclude that PPG committed the "other bad acts"--conspiring in the OEM market--that plaintiffs argue tend to show that PPG conspired to fix the prices of flat glass. See *Huddleston v. United States, 485 U.S. 681, 689, 99 L. Ed. 2d 771, 108 S. Ct. 1496 (1988)*. The District Court did not exclude the OEM glass evidence on that basis, however, and we need not address PPG's argument since we affirm on other grounds.

Davidson & Assocs. v. Internet Gateway

United States District Court for the Eastern District of Missouri, Eastern Division

September 30, 2004, Decided

No. 4:02-CV-498 CAS

Copyright Law > Scope of Copyright Protection > Subject Matter > General Overview

Copyright Law > ... > Protected Subject Matter > Literary Works > General Overview

HN10[] **Federal & State Law Interrelationships, Federal Preemption**

A court considering federal copyright preemption must determine if a right sought under state law is equivalent to exclusive rights under federal copyright law. If an extra element is required, instead of or in addition to the acts of reproduction, performance, distribution, or display, in order to constitute a state-created cause of action, then the right does not lie within the general scope of copyright and there is no preemption.

California courts enforce end user license agreements, which are valid under California law.

Contracts Law > Contract Conditions & Provisions > General Overview

Contracts Law > Defenses > Unconscionability > General Overview

HN16[] **Contracts Law, Contract Conditions & Provisions**

California law allows courts to refuse to enforce an unconscionable provision in a contract. *Cal. Civ. Code § 1670.5* (2004). The purpose of *§ 1670.5* is to make it possible for the courts to police explicitly against the contracts or clauses which they find to be unconscionable. The basic test for unconscionability is whether, in light of the general background and the needs of a particular case, the clauses involved are so one-sided as to be unconscionable under the circumstances existing at the time of the making of the contract. Unconscionability has both a procedural and substantive element. The procedural element focuses on oppression or surprise due to unequal bargaining power, and substantive unconscionability focuses on overly harsh or one-sided results. The prevailing view is that both procedural and substantive unconscionability must be present, although not to the same degree, before a court may exercise its discretion to refuse to enforce a contract or clause due to unconscionability. In other words, the more substantively oppressive the contract term, the less evidence of procedural unconscionability is required to come to the conclusion the term is unenforceable, and vice versa.

Contracts Law > Defenses > Unconscionability > General Overview

HN17[] **Defenses, Unconscionability**

Procedural unconscionability concerns the manner in which a contract was negotiated and the circumstances of the parties at that time. Procedural unconscionability focuses on factors of oppression and surprise. The oppression component arises from an inequality of bargaining power of the parties to the contract and an absence of real negotiation or a meaningful choice on the part of the weaker party. The second component of procedural unconscionability encompasses an aspect of surprise which the party supposedly agreed being hidden in a prolix printed form drafted by the party seeking to enforce them.

Contracts Law > Defenses > Unconscionability > General Overview

HN18[] **Defenses, Unconscionability**

Substantive unconscionability focuses on the actual terms of an agreement. It traditionally involves contract terms that are so one-sided as to shock the conscience or that impose harsh or oppressive terms.

Opinion by: CHARLES A. SHAW

Opinion

[*1166] **MEMORANDUM AND ORDER**

This matter is before the Court on defendants' motion for summary judgment **[*1167]** and plaintiffs' motion for partial summary judgment. The Court will grant plaintiffs' motion to consider supplemental authority and defendants' motion to consider supplemental authority. The Court entered a consent decree on March 18, 2004 which resolved most of the claims raised in the summary judgment motions. On the remaining claims, the Court will (1) grant plaintiffs' motion for summary judgment as to Count **[**2]** VII of their second amended complaint for breach of contract and deny defendants' motion for declaratory judgment as to the contract claim; (2) grant plaintiffs' motion for summary judgment as to the anti-circumvention claim in Count II and will deny defendants' motion for declaratory judgment as to the anti-circumvention claim; and (3) grant plaintiffs' motion for summary judgment as to the trafficking in anti-circumvention technology claim in Count II and deny defendants' motion for declaratory judgment regarding the trafficking in anti-circumvention technology claim.

I. Procedural Background

Plaintiffs Davidson & Associates, Inc. d/b/a Blizzard Entertainment ("Blizzard") and Vivendi Universal Games, Inc. sued defendants Internet Gateway, Inc., Jim Jung, Ross Combs, Rob Crittenden, Yi Wang, and John Does 1-50. The Court dismissed Yi Wang and John Does 1-50. (See Order of July 8, 2003). Plaintiffs' second amended complaint alleges that defendants committed copyright infringement in violation of *17 U.S.C. § 501*; circumvention of copyright protection systems and trafficking in circumvention technology under *17 U.S.C. § 1201(a)* **[**3]** ; federal trademark infringement under the Lanham Act, *15 U.S.C. § 1114(1)*; federal false designation of origin under the Lanham Act, *15 U.S.C. § 1125(c)*; common law trademark infringement and unfair competition; and breach of End User License Agreements ("EULA") and Battle.net Terms of Use ("TOU"). The defendants filed counterclaims requesting declaratory relief as to non-infringement under *17 U.S.C. § 501*, non-circumvention of copyright under *17 U.S.C. § 1201(a)*, the unconstitutionality of *17 U.S.C. § 1201(a)*, and unenforceability of contract.

On March 18, 2004, the Court entered a consent decree and permanent injunction which constituted the full and complete relief on plaintiffs' claims of copyright infringement, federal trademark infringement, federal false designation, and common-law trademark and infringement. The consent decree also provided complete relief on defendants' claim for declaratory judgment for non-infringement and unconstitutionality of *17 U.S.C. § 1201(a)*. The consent decree resolves plaintiffs' claims in Counts I, III, **[**4]** IV, V, and VI of the second amended complaint. The consent decree also constitutes the full monetary relief, costs, and fees related to this action. The parties agreed that the remaining claims for injunctive relief (plaintiffs' claims of circumvention of copyright protection systems and trafficking in circumvention technology under *17 U.S.C. § 1201(a)*, breach of the EULAs and TOU, and defendants' claims for declaratory relief for non-circumvention and unenforceability of contract) should be resolved by the Court based on the parties' existing summary judgment motions. The parties only seek injunctive relief on plaintiffs' remaining claims under Counts II and VII and defendants' claims for declaratory relief under Counts II and IV of their second amended counterclaim.

II. Legal Standard

HN1[] This Court must grant summary judgment if, based upon the pleadings, admissions, depositions and affidavits, there exists no genuine issue of material fact and **[*1168]** the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*; *Board of Education, Island Trees v. Pico, 457 U.S. 853, 863, 73 L. Ed. 2d 435, 102 S. Ct. 2799 (1982).* **[**5]** "Where the unresolved issues are primarily legal rather than factual, summary judgment is particularly appropriate." *Cearley v. General Am. Transp. Corp., 186 F.3d 887, 889 (8th Cir. 1999)* (citing *Crain v. Board of Police Comm'rs, 920 F.2d 1402, 1405-06 (8th Cir. 1990))*. In this case, only legal issues exist for determination, as the parties submitted a joint stipulation of undisputed facts after entry of the consent decree.

III. Undisputed Facts

Blizzard is a California corporation. Vivendi is the parent corporation of Blizzard. The plaintiffs will be collectively referred to as Blizzard. Blizzard creates and sells computer games that are played on personal computers. The particular Blizzard games at issue in this case are entitled "StarCraft," "StarCraft: Brood War," "WarCraft II: Battle.net Edition," "Diablo," and "Diablo II: Lord of Destruction." Blizzard games have sold millions of copies and generated revenue in excess of $ 480 million since 1998.

The individual defendants are two computer programmers, Ross Combs and Rob Crittenden, and a systems administrator, Jim Jung. The corporate defendant Internet Gateway is an Internet service **[**6]** provider based in St. Peters, Missouri. [1] Jung is the president, co-owner, and day-to-day operator of Internet Gateway.

A. Battle.net Online Gaming Service

In January 1997, Blizzard officially launched Battle.net, a 24-hour online gaming service available to purchasers of its computer games. The Battle.net service currently has nearly 12 million active users who spend more that 2.1 million hours online per day. At any given time, Battle.net servers average about 200,000 concurrent users, with a peak volume of 400,000 concurrent users.

Blizzard has valid copyright registrations covering Battle.net and each of its computer games at issue in this litigation. The only copyright registrations Blizzard has identified in this case concern its Battle.net server program and its individual computer game software. The Battle.net service **[**7]** is a free service that allows owners of certain Blizzard games to play those games, through their personal computers, against each other by linking together over the Internet. Battle.net mode allows users to create and join multi-player games that can be accessed across the Internet, to chat with other potential players, to record wins and losses and save advancements in a password protected individual game account, and to participate with others in tournament play featuring elimination rounds. Players can set up private chat "channels" and private games on the Battle.net service to allow players to determine whom they wish to interact with on the Battle.net service. These Battle.net mode features are accessed from within the games themselves.

In addition to multi-player play over the Internet via Battle.net mode, the games at issue have the capacity for and permit non-Internet multi-player gaming for a limited number of players who connect to each other via a local area computer network ("LAN") such as a home network, via modems connected to telephone lines, or by directly connecting two computers together with cables. The features and functions of Battle.net mode, however, cannot **[**8]** be accessed when players are connected **[*1169]** through those means. The parties stipulate that players also have the option of engaging in single player play against the computer.

Like most computer software, Blizzard games can be easily copied and distributed over the Internet. The Battle.net service is designed to prohibit access and use of Battle.net mode by such unauthorized or pirated copies of Blizzard games. Each time a customer logs onto the Battle.net service, a Battle.net server examines the customer's game to

[1] The parties have included Internet Gateway in the term "defendants," but have not discussed its liability separate from the individual defendants. The Court will do the same.

check whether the game is using the latest version of the game software. If a Blizzard game does not have the latest software upgrades and fixes, the Battle.net service updates the customer's game before allowing the game to play in Battle.net mode.

B. Technology of the Battle.net Service

Blizzard's games are shipped to customers on CD-ROM disks. Except for the game "Diablo," each authorized version of a Blizzard game comes with a "CD Key," a unique sequence of alphanumeric characters that is printed on a sticker attached to the case in which the CD-ROM was packaged. The user of the game must input the CD Key into his or her computer when installing the game, and it **[**9]** is subsequently stored on the computer for use in logging on to the Battle.net service. The Battle.net service prohibits use of unauthorized or pirated copies of Blizzard games with the Battle.net service.

To log on to the Battle.net service and access Battle.net mode, the game initiates a authentication sequence or "secret handshake" between the game and Battle.net server. First, the game and Battle.net server exchange random numbers (one provided by the game and one provided by the server). The game then takes the random numbers, as well as information from the CD Key, and calculates an encrypted alphanumeric sequence which is sent to the Battle.net server. The game performs this encryption to prevent individuals from stealing the game's CD Key when it is transmitted over the Internet to a Battle.net server. The Battle.net server receives the alphanumeric sequence sent by the game, along with other information sent by the game, and uses this data to determine whether the CD Key information sent by the game is valid. If the CD Key information is valid, the Battle.net server will determine whether the same CD Key is already being used by another game that is currently logged on to **[**10]** that Battle.net server gateway. [2] If the CD Key is both valid and not currently being used by other players on the same Battle.net gateway, the Battle.net server sends a signal to the game that allows the game to enter the Battle.net mode and use the Battle.net gaming services. The Blizzard game waits for this signal before entering Battle.net mode. Battle.net uses an encryption algorithm for this process based on a common encryption algorithm. The standard version of this algorithm was released by the United States government.

C. End User License Agreements ("EULA") and Battle.net Terms of Use ("TOU")

In order to play the Blizzard game contained on a CD-ROM, a user must first install the game onto a computer from the CD-ROM. First, the user inserts the CD-ROM into his or her computer. A menu pops up automatically, and **[**11]** the user chooses to install the game from that menu. Second, the user is presented with the terms of an End User License Agreement **[*1170]** ("EULA"). At the end of the EULA, Blizzard includes a button with the text, "I Agree" in it, which the user must click in order to proceed with the installation. The game will not work if the "I Agree" button is not selected. Third, the user is asked to enter a name and the CD Key. Fourth, the user is asked to choose where on his or her computer the program's files should be installed. The files are then installed at the chosen location. Finally, the user is offered the opportunity to register his or her copy of the game with Blizzard via an on-line registration process. After the user has finished registering his copy, or if he or she chooses not to register, the installation process is complete.

Blizzard's Battle.net service has a Terms of Use ("TOU"), which Blizzard presents to users when they first log onto the Battle.net service. First-time users of the Battle.net service are shown the terms of the Battle.net service TOU after a user has installed a Blizzard game and logs onto the Battle.net service for the first time to play with a purchased Blizzard **[**12]** game product. At the end of the TOU, Blizzard includes a button with the text, "Agree" in it, which the user must click before the Battle.net service can be used. The product will not work with the Battle.net service if the "Agree" button is not selected.

---

[2] The parties stipulate that a gateway is a cluster of servers located in a particular geographic region and that the four current gateways are U.S. West, U.S. East, Europe, and Asia.

For every game at issue in this litigation except for Diablo, the outside packaging of the game states that use of the game is subject to a EULA, and that use of Blizzard's Battle.net service is subject to the Battle.net TOU. The terms of the EULAs and TOU themselves do not appear on the outside packaging. If the user does not agree to the terms of Blizzard's EULAs or Battle.net TOU, he or she may return the game for a full refund of the purchase price within thirty (30) days of the original purchase. The EULA contains the following language:

> YOU SHOULD CAREFULLY READ THE FOLLOWING END USER LICENSE AGREEMENT BEFORE INSTALLING THIS SOFTWARE PROGRAM. BY INSTALLING, COPYING, OR OTHERWISE USING THE SOFTWARE PROGRAM YOU AGREE TO BE BOUND BY THE TERMS OF THIS AGREEMENT. IF YOU DO NOT AGREE TO THE TERMS OF THIS AGREEMENT, PROMPTLY RETURN THE UNUSED SOFTWARE PROGRAM TO THE PLACE OF PURCHASE OR CONTACT BLIZZARD ENTERTAINMENT CUSTOMER **[**13]** SERVICE . . . FOR A FULL REFUND OF THE PURCHASE PRICE WITHIN THIRTY DAYS OF THE ORIGINAL PURCHASE.

(Pls.' Ex. 8). The EULA further states "subject to the grant of license hereinabove, you may not, in whole or in part, copy, photocopy, reproduce, translate, reverse engineer [3], derive source code [4] **[**14]** , modify, disassemble, decompile, create derivative works [5] based on the Program, or **[*1171]** remove any proprietary notices or labels on the program without the prior consent, in writing, of Blizzard." Id. The EULA also states that it "shall have been deemed to have been made and executed in the State of California and any dispute arising hereunder shall be resolved in accordance with the law of California." Id.

The Battle.net TOU states: "Blizzard hereby grants, and by using Battle.net you thereby accept, a limited personal non-exclusive license and right to use Battle.net using either a home, work, or portable computer." Pls.' Ex. 9.

> You are entitled to use Battle.net for your own personal use, but you shall not be entitled to (i) sell or grant a security interest in or transfer reproductions of Battle.net to other parties in any way, nor to rent, lease, or license Battle.net to others without the prior written consent of Blizzard; (ii) copy, photocopy, reproduce, translate, reverse engineer, modify, disassemble, or de-compile in whole or in part any Battle.net software; (iii) create **[**15]** derivative works based on Battle.net; (iv) host or provide matchmarking services for any Blizzard software programs or emulate or redirect the communication protocols used by Blizzard as part of Battle.net, through protocol emulation, runneling, modifying, or adding components to the Program, use of a utility program, or any other technique now known or hereafter developed for any purpose, including, but not limited to, network play over the Internet, network play utilizing commercial or non-commercial gaming networks, or as part of content aggregation networks without the prior written consent of Blizzard or exploit Battle.net or any of its parts for any commercial purpose, including but not limited to, use at a location such as a cyber cafe, arcade, or other location where users are charged a fee, whether hourly or otherwise to use Battle.net; (v) use any third-party software to modify Battle.net to change game play, including, but not limited to cheats and/or hacks; (vi) use Blizzard's intellectual property rights contained in Battle.net to create or provide any other means through which Blizzard entertainment software products including, but not limited to, StarCraft, StarCraft: **[**16]** Brood War, Diablo, Diablo II, Warcraft: Orcs & Humans, Warcraft II: Tides of Darkness, Warcraft II: Beyond the Dark Portal, Warcraft II: Battle.net Edition, and Warcraft II may be played by others, including, not limited to, server emulators . . . this agreement shall be governed by and construed with the laws of the State of California, without giving effect to any principles of conflicts of laws.

---

[3] "Reverse engineering is the process of discovering how an invention works by inspecting and studying it, especially by taking it apart in order to learn how it works and how to copy it and improve it." BLACK'S LAW DICTIONARY 1345 (8th ed. 2004).

[4] "The term "source code" means the [non-machine] language used by a computer programmer to create a program." BLACK'S LAW DICTIONARY 1429 (8th ed. 2004).

[5] ***HN2***[] "A 'derivative work' is a work based upon one or more preexisting works, such as a translation . . . abridgment, condensation, or any other form in which a work may be recast, transformed, or adapted. A work consisting of editorial revisions, annotations, elaborations, or other modifications which, as a whole, represent an original work of authorship is a 'derivative work." *17 U.S.C. § 101*.

Pls.' Ex. 9 P13. Defendant Combs installed one Blizzard game, StarCraft, and clicked on the "I Agree" button after the EULA was displayed. Defendant Crittenden installed Blizzard games and clicked on the "I Agree" button after the EULAs were displayed. Defendant Jung installed three Blizzard games, Diablo, Diablo II, and Diablo II: Lord of Destruction, and clicked on the "I Agree" button after the EULAs were displayed. Crittenden and Jung logged onto the Battle.net service and clicked on the "Agree" button after the TOUs were displayed.

D. The bnetd project

The users of the Battle.net service have occasionally experienced difficulties with the service. Blizzard has also received complaints about user profanity and users who cheated to win games by modifying Blizzard's software **[**17]** ("client hacks"). Although Blizzard has taken actions to correct these difficulties with its Battle.net service, including adding additional server capacity, banning cheaters, and providing **[*1172]** for private channels and games, defendants were frustrated by the difficulties.

To address their frustrations with Battle.net, the defendants joined a group of non-profit volunteer game hobbyists, programmers, and other individuals called the "bnetd project." Combs, Crittenden, and Jung were lead developers for the bnetd project. Combs led all the developers. The bnetd project was a collaboration focusing on development of the bnetd server, which is a program that attempts to emulate Blizzard's Battle.net service. The bnetd server was created for "hack value" [6] and to address the difficulties that users sometimes experienced with the Battle.net service. In addition, some or all of the defendants developed bnetd, in part, because they believed that Blizzard game players should not be forced to view advertisements displayed via the Battle.net service and that it was morally wrong for Blizzard to require people who want to play Blizzard's games over the Internet to agree to the Battle.net TOU or **[**18]** other restrictions imposed by Blizzard. The bnetd project is a volunteer effort and the project has always offered the bnetd program for free to anyone who wants a copy of it.

The bnetd project was organized and managed over the Internet through a website, available at www.bnetd.org, that was available to the public through equipment provided by defendant Internet Gateway. The bnetd emulator provides a server that would allow gamers unable or not wishing to connect to Battle.net to experience the multi-player features of Blizzard's games, and was designed to allow access to Blizzard games in a multi-player environment without using Battle.net. The bnetd emulator provides matchmaking services for users of Blizzard games who want to play those games in a multi-player environment without using Battle.net. The bnetd project attempted to include all of the user-visible features of the Battle.net service. The bnetd.org website provided online discussion forums and information **[**19]** about the bnetd program, and also provided access to the program's computer code for others to copy and modify.

The bnetd program was intended as a functional alternative to the Battle.net service. To serve this function, bnetd had to be compatible with Blizzard's software. In particular, compatibility required that bnetd speak the same protocol [7] that the Battle.net service speaks. This was necessary for compatibility because the Blizzard games expect servers to speak this protocol, and will therefore be unable to work with any server that does not speak the protocol. By speaking the same protocol, the bnetd program was able to interoperate with Blizzard games. Once game play starts there is no difference between Battle.net and the bnetd emulator from the standpoint of a user who is actually playing the game.

Reverse engineering was **[**20]** necessary in order for the defendants to learn Blizzard's protocol language and to ensure that bnetd worked with Blizzard games. It would not have been possible to create a workable bnetd server without reverse engineering Blizzard's software and protocols. Combs used reverse engineering in the process of developing the bnetd server, including a program called "tcpdump" to log communications between Blizzard games and the Battle.net server. Crittenden used reverse engineering in the process of developing the bnetd server,

---

[6] The parties do not define "hack value."

[7] Protocol is a set of rules for the format and sequencing of communication between two or more parties. Plaintiffs' and defendants' joint stipulation of undisputed facts P91.

including using a program called "Nextray." **[*1173]** Crittenden also used a program called "ripper" to take Blizzard client files which were compiled together in one file and break them into their component parts. Crittenden used the ripper program in order to figure out how Blizzard games displayed ad banners so that people running the bnetd emulator could display ad banners to users in the format that Blizzard uses on the Battle.net service. Combs tried to disassemble a Blizzard game to figure out how to implement a feature that allowed bnetd to protect the password that a user enters when creating an account in Battle.net mode. Crittenden made an unauthorized copy of a **[**21]** Blizzard game in order to test the interoperability of the bnetd server with multiple games.

Blizzard games are designed to connect only to Battle.net servers. To cause a Blizzard game to connect to a bnetd server instead of a Battle.net server, the computer file that contains the Internet address of the Battle.net servers must be modified. Combs participated in the development of a utility program called "BNS" to allow Blizzard games to connect to bnetd servers. The BNS utility is part of the bnetd project. Connecting to a bnetd server without the BNS utility program is more difficult to do and somewhat involved compared to using the BNS utility program. Once the computer files that contains the Internet address of the Battle.net servers has been modified so that the Blizzard game will connect to a bnetd server, the game sends the bnetd server information about its CD Key. It is technically possible for an individual who is using one of the Blizzard games at issue to play his or her game over the Internet via bnetd rather than Battle.net. Blizzard believes that the EULAs and TOUs prohibit this activity.

When the bnetd server receives the CD Key information, unlike Battle.net, it **[**22]** does not determine whether the CD Key is valid or currently in use by another player. The bnetd server computer code always sends the game an "okay" reply regardless of whether the CD Key is valid or currently in use by another player, as the game will otherwise not allow access to Battle.net mode. The bnetd emulator always allows the Blizzard games to access Battle.net mode features even if the user does not have a valid or unique CD Key, because the bnetd emulator does not determine whether the CD Key is valid or currently in use by another player. Blizzard does not disclose the methods it uses to generate CD Keys or to confirm the validity of CD Keys. Therefore, there is no way that defendants could have implemented a check for CD Key validity in the bnetd program. Defendants never advised people to play pirated copies of Blizzard games using the bnetd server.

The bnetd server program is highly configurable, which means that much of the operation of the server is under the control of the administrator running the server. Running a bnetd server allows users to become server administrators and not just players on someone else's server, giving them the ability to allow or deny access **[**23]** to various features of the bnetd server or to modify the computer code of the bnetd server. This allows the administrator of the bnetd server to create a gaming environment with different options than those presented to the user on the Battle.net service. In contrast, the Battle.net service is operated solely by Blizzard.

Combs, Crittenden, and Jung have used a Blizzard game to log into a bnetd server. Crittenden was aware that unauthorized versions of Blizzard games were played on bnetd servers. Jung knew that the bnetd emulator did not require that Blizzard games provide valid CD Keys. Combs suspected that the bnetd server would not know the difference between a real game and a pirated game.

[*1174] E. Distribution of the bnetd Server Program

Combs and Crittenden sent portions of the bnetd software to Jung to place on the www.bnetd.org website for download, or they put the software on the website themselves. Combs made the bnetd software available on his website located at *www.cs.nmsu.edu*/ rcombs/sc/. Defendants distributed the BNS utility program, which allowed Blizzard games to connect to bnetd servers. Also, defendants made the source code available as an "open source" application, **[**24]** meaning that others were free to copy the source code and distribute it with or without modifications. Because the bnetd source code was freely available, others developed additional Battle.net emulators based on the bnetd source code. Defendants also distributed binary versions of the bnetd program make it more convenient for users to set up and access the emulator program. Internet Gateway has donated space on its computers for use by the bnetd project. Internet Gateway also hosted a bnetd server that anyone on the Internet could access and use to play Blizzard games in Battle.net mode.

IV. Discussion

HN3[] Copyright protection exists as a matter of federal law. The Copyright Act is constitutionally based in Article I, § 8 which states: HN4[] "The Congress shall have power . . . to promote the progress of science and other useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries." HN5[] States may not enact copyright protection that conflicts with federal law. HN6[] "The Copyright Act must be construed in light of its basic purpose of 'promoting broad public availability of literature, music, and other arts.'" Twentieth Century Music Corp. v. Aiken, 422 U.S. 151, 156, 45 L. Ed. 2d 84, 95 S. Ct. 2040 (1975). **[**25]**

A. Preemption under the Copyright Act

Plaintiffs assert that the individual defendants [8] breached the EULAs and TOU when they used reverse engineering to learn Blizzard's protocol and distributed the bnetd software on the Internet. Defendants contend that the EULAs and TOU in this case concern areas protected by the Copyright Act. Defendants assert that the Copyright Act preempts the state law of contracts and therefore plaintiffs' state law contract claim is preempted by the Copyright Act.

HN7[] "The clearest indication that federal law supplants state law is a statutory preemption provision. When Congress expressly codifies its preemptive intent in statutory form, our analysis 'begins with the language of the statute.'" Jones v. Vilsack, 272 F.3d 1030, 1034 (8th Cir. 2001) (citing Lorillard Tobacco Co. v. Reilly, 533 U.S. 525, 150 L. Ed. 2d 532, 121 S. Ct. 2404, 2415 (2000)). There is a statutory preemption provision in the Copyright Act, **[**26]** HN8[] 17 U.S.C. § 301(a)(2004), which provides that "all legal or equitable rights that are equivalent to any of the exclusive rights within the general scope of copyright . . . are governed exclusively by this title." Id. HN9[] Section 301 preempts only those state law rights that "may infringe one of the exclusive rights provided by copyright law." National Car Rental Sys. Inc. v. Computer Assocs. Int'l Inc., 991 F.2d 426, 431 (8th Cir. 1991). Section 301 also states that nothing in its title limits any rights or remedies under the common law or statutes of any state with respect to activities violating legal or equitable rights that are not equivalent to any of the exclusive rights within the general scope of copyright **[*1175]** as specified under section 106. 17 U.S.C. § 301(b)(3).

First, the Court must determine if the computer software program is within the subject matter of copyright. National, 991 F.2d at 431. The answer is yes. 17 U.S.C. § 102. Then, HN10[] the Court must determine if the right sought under state law is equivalent to exclusive rights under federal copyright law. National, 991 F.2d at 431. **[**27]** If an extra element is required, instead of or in addition to the acts of reproduction, performance, distribution or display, in order to constitute a state-created cause of action, then the right does not lie 'within the general scope of copyright' and there is no preemption. Id.

In this contract claim, the plaintiffs are alleging that the contract creates a right not existing under copyright law, a right based upon defendants' agreement to the EULA and TOU with Blizzard. The Court agrees that the contractual restriction does create a right not existing under copyright law. The right created is the right to restrict the use of the software through the EULAs and TOU. "Absent the parties' agreement, this restriction would not exist. The contractual restriction on use of the programs constitutes an extra element that makes this cause of action qualitatively different from one for copyright." Id. at 433. Therefore, the Court finds that the EULA and TOU are not statutorily preempted by the Copyright Act.

B. Choice of Law Provisions in Contract

First, the parties dispute whether the contract should be governed by Missouri law or California law. HN11[] In a case where **[**28]** federal jurisdiction is based on diversity of citizenship, the law of the forum state is applied when

[8] Defendant Internet Gateway is not a party to the EULAs and TOU.

deciding choice of law issues. *Inacom Corp. v. Sears, Roebuck and Co., 254 F.3d 683, 687 (8th Cir. 2001)*. ***HN12***[] Missouri courts generally recognize that parties may choose the state whose law will govern the interpretation of their contractual rights and duties. *Peoples Bank v. Carter, 132 S.W.3d 302, 304 (Mo. Ct. App. 2004)*. Missouri courts will honor the parties' choice of law provision if the application of the law is not contrary to a fundamental policy of Missouri. *Id.* (citing *Consolidated Fin. Invs. v. Manion, 948 S.W.2d 222, 224 (Mo. Ct. App. 1997))*.

In this case, the choice of law provision on the EULAs states, "This license Agreement shall be deemed to have been made and executed in the State of California and any dispute arising hereunder shall be resolved in accordance with the law of California." The TOU choice of law provision states, "This agreement shall be governed by and construed in accordance with the laws of the State of California, ..."

When a contract contains a choice of law provision, the validity of that provision **[**29]** is governed by *§ 187 of the Restatement (Second) of Conflict of Laws* (1971), which provides:

> ***HN13***[] (1) The law of the state chosen by the parties to govern their contractual rights and duties will be applied if the particular issue is one which the parties could have resolved by an explicit provision in their agreement directed to that issue.
>
> (2) The law of the state chosen by the parties to govern their contractual rights and duties, will be applied, even if the particular issue is one which the parties could not have resolved by an explicit provision in their agreement directed to that issue, unless either
>
>> (a) the chosen state has no substantial relationship to the parties or the transaction and there is no other reasonable basis for the parties' choice, or
>>
>> **[*1176]** (b) application of the law of the chosen state would be contrary to a fundamental policy of a state which has a materially greater interest than the chosen state in the determination of the particular issue and which, under the rule of § 188, would be the state of the applicable law in the absence of an effective choice of law by the parties.

See *In the Estate of Brown, 955 S.W.2d 940, 944-45 (Mo. Ct. App. 1997)* **[**30]** (court finds that Missouri law follows the Restatement (Second) Conflict of Laws in contract actions and *§ 187* addresses choice of law where contract contains a choice of law provision).

The relevant inquiry is whether the issue involved here is one in which the parties could have resolved by mutual agreement. If so, the Court should honor the parties' choice of law. See *Baxter Int'l Inc. v. Morris, 976 F.2d 1189, 1195-96 (8th Cir. 1992)*. The Court finds that the parties made an explicit agreement to the choice of law provision. Under Missouri law and the Restatement *§ 187(1)*, this Court will give effect to the reasonable expectations of the parties to the Agreement and apply the law of the state chosen by the parties, California. See *Hospital Products, Inc. v. Sterile Design, Inc., 734 F. Supp. 896, 899 n.2 (E.D. Mo. 1990)* (court applies Missouri law where parties agreed that Missouri law would govern interpretation of the agreement).

C. Existence of Contract

The parties disagree as to whether an enforceable contract exists. Blizzard asserts that the EULAs and TOU are enforceable contracts. Defendants assert that the EULAs and TOU are not **[**31]** contracts because under Missouri law there was no agreement between the parties. [9] Defendants argue that the only agreement between the parties is the offer to sell the software and the defendants' acceptance by purchase of the software. Also,

---

[9] The Court notes that the defendants only addressed the applicability of Missouri law and did not address whether the EULAs and TOU were enforceable contracts under California law.

defendants contend that the terms of the EULAs and TOU were not presented at the time of purchase. The defendants assert that if a contract exists, it is unenforceable because it is unconscionable.

The end user licenses at issue in this case are commonly referred to as "clickwrap" agreements.

> ***HN14***[] A "clickwrap" agreement appears when a user first installs computer software obtained from an online source or attempts to conduct an Internet transaction involving the agreement and purports to condition further access to the software or transaction on the user's consent to certain conditions **[**32]** there specified; the user consents to these conditions by clicking on a dialog box on the screen, which then proceeds with the remainder of the software installation or Internet transaction.

Kevin W. Grierson, Annotation, *Enforceability of "Clickwrap" or "Shrinkwrap" Agreements Common in Computer Software, Hardware, and Internet Transactions,* 106 A.L.R. 5th 309 n.1 (2003). [10]

[*1177] The Court finds that the license agreements are enforceable contracts under both California and Missouri law. **[**33]** ***HN15***[] California courts have enforced end user license agreements, which are valid under California law. See *Adobe Sys. Inc. v. One Stop Micro, Inc., 84 F. Supp.2d 1086, 1089-93 (N.D. Cal. 2000)* (end user license agreement valid under California law); *Hotmail Corp. v. Van$ Money Pie, Inc., 1998 U.S. Dist. LEXIS 10729, No. C-98-20064, 1998 WL 388389, at *6 (N.D. Cal. 1998)* (applying California law, plaintiff likely to prevail on breach of contract claim regarding clickwrap agreement). Cf. *SoftMan Prods. Co. v. Adobe Sys., 171 F. Supp. 2d 1075, 1087-88 (C.D. Cal. 2001)* (software reseller was not bound by EULA because it had never assented to the terms and court did not rule on validity of shrinkwrap agreements in general).

Even if Missouri law applied, the license agreement would be enforceable. Missouri has implemented the Uniform Commercial Code. The UCC provides that "a contract for sale of goods may be made in any manner sufficient to show agreement, including conduct by both parties which recognizes the existence of such a contract." [11] *MO. REV. STAT. § 400.2-204(1)* (2000). "An agreement sufficient to constitute a contract for sale may be found even though **[**34]** the moment of its making is undetermined." *MO. REV. STAT. § 400.2-204(2)* (2000). The defendants assert that the licenses are not enforceable because they add additional terms under *Mo. Rev. Stat. § 400.2-207*, which are to be construed as proposals for additions to the contract. Defendants state that the EULAs and TOU are additional terms which they rejected. Defendants contend that is unfair for them to pay $ 49.99 for the games and then be unable to install them or access Battle.net without assenting to the EULA and TOU.

[35]** The Court finds the EULAs and TOU are enforceable under the UCC. First, the defendants did not purchase the Blizzard software, rather they purchased a license for the software. A sale consists in the passing of title from the seller to the buyer. *Mo. Rev. Stat. § 400.2-106(1)* (2000). When defendants purchased the games, they bought a license to use the software, but did not buy the software. Defendants' argument parallels the "first sale doctrine," although defendants do not use this term.

---

[10] Clickwrap licenses are similar to shrinkwrap licenses which "consist of written conditions on a card or paper sheet which appears when the user opens the packaged hardware or software" and "purports to condition use of the hardware or software on the user's implicit agreement to abide by the conditions specified thereon." Kevin W. Grierson, *Enforceability of "Clickwrap" or "Shrinkwrap" Agreements Common in Computer Software, Hardware, and Internet Transactions,* 106 A.L.R. 5th 309 n.2.

[11] The Court assumes, as have several other courts, that the games in question constitute goods under the UCC. See *Specht v. Netscape Communications Corp., 306 F.3d 17, 29 n.13 (2nd Cir. 2002)* (discusses problems with applying the UCC to licensing of software downloadable from the Internet under California law); *I.Lan Systems, Inc. v. Netscout Serv. Level Corp., 183 F. Supp.2d 328, 332 (D. Mass. 2002)* (court notes UCC does not technically apply to software licenses, but assumes that it does under Massachusetts law). In 1999, the National Conference of Commissioners on Uniform State Laws approved the Uniform Computer Information Transactions Act (UCITA), which would establish the enforceability of the EULA and TOU in this case. See UNIF. COMPUTER TRANSACTIONS ACT *§ 112* (2002). To date, the UCITA has only been adopted in *Maryland* and *Virginia*. It applies specifically to computer software license agreements. Adoption of the UCITA recognizes the difference between the copyrighted information contained in the physical object and the physical object itself.

Under the first sale doctrine, "a sale of a lawfully made copy terminates a copyright holder's authority to interfere with subsequent sales or distribution of that particular copy." *Adobe Sys. Inc., 84 F. Supp.2d at 1089* (citations omitted). "The first sale doctrine is only triggered by an actual sale. Accordingly, a copyright owner does not forfeit his right of distribution by entering into a licensing agreement." Id. *Section 117 of the Copyright Act* provides that copies of computer programs may be "leased, sold, or otherwise transferred . . . **[*1178]** only with the authorization of the copyright owner." *17 U.S.C. § 117(b)*.

> To apply the first sale doctrine **[**36]** and the exceptions of *§ 117*, there must be an authorized transfer of ownership. Either a licensee can never be the owner of a copy for purposes of *§ 117* or ownership of the licensed copy depends on the terms of the license agreement. First, it must be determined what are the express terms of the contract? When license terms provide that ownership of the copy remains in the copyright owner, they preclude the transfer of title to the copy of the license.

Raymond T. Nimmer, LAW OF COMPUTER TECHNOLOGY: RIGHTS LICENSES LIABILITIES § 7:69 (3d ed. 2003). The EULAs and TOU in this case explicitly state that title and ownership of the games and Battle.net remain with Blizzard. Defendants do not produce sufficient evidence demonstrating that title and ownership of the games passed to them. Therefore, the Court finds that the first sale doctrine is inapplicable here.

Defendants rely upon *Klocek v. Gateway, Inc., 104 F. Supp.2d 1332 (D. Kan. 2000)*, to support their argument that Missouri law would not recognize their assent to the EULAs and TOU as binding contracts. In Klocek, the court found that the shrinkwrap agreement was not enforceable under Missouri law. **[**37]** The Court believes that this case is readily distinguishable from *Klocek*. In Klocek, the parties disputed whether plaintiff's complaint about repair of his Gateway computer should be submitted to arbitration. The contract was contained in a standard terms and conditions agreement and placed in the box with the Gateway computer. The contract provided that if the customer kept the Gateway computer beyond five (5) days after delivery, the customer accepted the terms and conditions. The court in Klocek held that a contract did not exist because "the act of keeping the computer past five days was not sufficient to demonstrate that Kloeck expressly agreed to the standard terms." *Id. at 1341*. Additionally, the mere fact that Gateway shipped the goods with the terms attached did not communicate to Klocek any willingness to proceed without Klocek's agreement to the standard terms.

In this case, the defendants do not dispute that (1) the software at issue in this litigation with the exception of Diablo has outside packaging stating it is subject to a EULA and Battle.net is subject to a TOU; (2) the defendants installed the games and assented to the EULA; (3) the **[**38]** defendants went to the Battle.net website and assented to the TOU; and (4) the EULA and TOU state it is a license and ownership of software remains with Blizzard. This case is readily distinguishable from Klocek, because here the defendants had sufficient notice of the EULAs and TOU. It is true that the terms of the EULAs and TOU were not on the box, but the terms were disclosed before installation of the games and access to Battle.net was granted. The defendants also expressly consented to the terms of the EULA and TOU by clicking "I Agree" and "Agree." See *SoftMan, 171 F. Supp.2d at 1087* ("Reading a notice on a box is not equivalent to the degree of assent that occurs when the software is loaded onto the computer and the consumer is asked to agree to the terms of the license."). Unlike the plaintiff in Klocek, the defendants in this case are not being penalized for inaction, but instead are being held to contract terms to which they assented. Accordingly, the Court finds that the EULA and TOU are enforceable contracts under both Missouri or California law.

D. Unconscionability

Next, the defendants argue that even if a contract was formed, it was a **[**39]** **[*1179]** contract of adhesion and is therefore unenforceable. Defendants argue that the contract is adhesive because it fails to square with the reasonable expectations of the parties, as no average member of the public would expect to pay $ 49.99 for a game and then be unable to use it when he or she gets home. Defendants also argue that no reasonable person would expect to be barred from installing the game he just bought unless he or she is forced to comply with an EULA. [12]

HN16[] California law allows courts to refuse to enforce an unconscionable provision in a contract. Cal. Code *§ 1670.5* (2004). The purpose of *§ 1670.5* is to make it possible for the courts to police explicitly against the contracts or clauses which they find to be unconscionable. Cal. Code *§ 1670.5* (2004) Legis. Comm. Cmt. (1). The basic test for unconscionability is "whether, in light of the general **[**40]** background and the needs of a particular case, the clauses involved are so one-sided as to be unconscionable under the circumstances existing at the time of the making of the contract." Id. Unconscionability has both a procedural and substantive element. *Freeman v. Wal-mart Stores, Inc., 111 Cal. App. 4th 660, 3 Cal. Rptr. 3d 860, 866 (Cal. Ct. App. 2003)* (citations omitted). The procedural element focuses on oppression or surprise due to unequal bargaining power, and substantive unconscionability focuses on overly harsh or one-sided results. *Id.* The prevailing view is that both procedural and substantive unconscionability must be present, although not to the same degree, before a court may exercise its discretion to refuse to enforce a contract or clause due to unconscionability. *Pardee Construction Co. v. Superior Court of San Diego County, 100 Cal. App. 4th 1081, 123 Cal. Rptr. 2d 288, 293 (Cal. Ct. App. 2002)*. "In other words, the more substantively oppressive the contract term, the less evidence of procedural unconscionability is required to come to the conclusion the term is unenforceable, and vice versa." *Freeman, 3 Cal. Rptr. 3d at 866-67*.

> ***HN17***[] Procedural unconscionability **[**41]** concerns the manner in which the contract was negotiated and the circumstances of the parties at that time. Procedural unconscionability focuses on factors of oppression and surprise. The oppression component arises from an inequality of bargaining power of the parties to the contract and an absence of real negotiation or a meaningful choice on the part of the weaker party. The second component of procedural unconscionability encompasses an aspect of surprise which the party supposedly agreed being hidden in a prolix printed form drafted by the party seeking to enforce them.

Pardee at 294.

The parties in this case did have unequal bargaining power because Blizzard is the sole seller of its software licenses; however, the defendants had the choice to select a different video game, to agree to the terms and gain the software and access to Battle.net, or to disagree and return the software for a full return of their money. See *De John v. TV Corp. Int'l, 245 F. Supp.2d 913, 919 (C.D. Ill. 2003)*. Also, the defendants are not unwitting members of the general public as they claim. They are computer programmers and administrators familiar with the language used **[**42]** in the contract, and have the expertise to reverse engineer and understand source code. Next, there was no surprise about the contract terms. The defendants had notice that the games were subject to the EULAs and that access to Battle.net was subject to a TOU. The defendants also had **[*1180]** access for up to thirty days to read over the EULA and decide if they wanted to adhere to its terms or return the games. Defendants had the same option in obtaining access to Battle.net. Therefore, the Court finds that the licensing agreements were not procedurally unconscionable.

Even if the contract was procedurally unconscionable, it is not substantively unconscionable. ***HN18***[] "Substantive unconscionability focuses on the actual terms of the agreement." *Pardee, 123 Cal. Rptr. 2d at 295*. It traditionally involves contract terms that are so one-sided as to "shock the conscience" or that impose harsh or oppressive terms. Id. The terms of the EULA and TOU in this case do not impose harsh or oppressive terms. Therefore, the Court hold that the EULAs and TOU in this case are enforceable contracts.

E. Fair Use Defense

The defendants claim that even if the EULA and TOU are enforceable **[**43]** under state law, they are unenforceable because they prohibit the fair use of the Blizzard software. ***HN19***[] *Section 107 of the Copyright*

---

[12] The defendants make their arguments under Missouri law, but the Court will consider the clickwrap license in accordance with applicable California law.

Act states that "the fair use of a copyrighted work, including such use by reproduction in copies . . . for purposes such as criticism, comment, news reporting, teaching, scholarship, or research, is not an infringement of copyright." 17 U.S.C. § 107. This section provides:

> In determining whether the use made of a work in any particular case is a fair use the factors to be considered shall include-- (1) the purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes; (2) the nature of the copyrighted work; (3) the amount and substantiality of the portion used in relation to the copyrighted work as a whole; and (4) the effect of the use upon the potential market for or value of the copyrighted work.

Id.; See United Tel. Co. of Mo. v. Johnson Publ'g Co., 855 F.2d 604, 609-10 (8th Cir. 1988). Defendants argue that the EULAs and TOU are anti-competitive because they prohibit Blizzard's customers from hosting or providing matchmaking services **[**44]** for the game. Also, the defendants state that the prohibition on reverse engineering violates their right under the fair use doctrine. Plaintiffs contend private contractual agreements waiving the right to reverse engineer are valid and defendants waived their rights in this case.

HN21[] Reverse engineering as a fair use is firmly established. See Bowers v. Baystate Techs., Inc., 320 F.3d 1317, 1325 (Fed. Cir. 2003) (reverse engineering is a fair use under 17 U.S.C. § 107); Sony Computer Entm't, Inc. v. Connectix Corp., 203 F.3d 596, 602 (9th Cir. 2000) (reverse engineering was fair use for the purpose of gaining access to the unprotected elements of software). The parties' dispute concerns the interpretation of two circuit court cases about the prohibition of reverse engineering under state law and licensing contracts.

In Vault Corp. v. Quaid Software, Ltd., 847 F.2d 255 (5th Cir. 1988), a software license agreement was declared invalid because the Louisiana License Act, with which the contract complied, was preempted by the federal Copyright Act. The Fifth Circuit noted the conflicts between the Louisiana Act and **[**45]** the Copyright Act: First, the Louisiana Act "authorized a total prohibition on copying, [while] the Copyright Act allows archival copies and copies made as an essential step in the utilization of a computer program . . . ." Id. at 269. Second, the Louisiana Act "authorized a perpetual bar against copying [and] the Copyright Act grants protection only for the life of the author plus fifty years . . . ." Third, the Louisiana Act "placed no restrictions on programs which may be protected, but the Copyright **[*1181]** Act only protects original works of authorship." Id. The court held that the provision of the Louisiana Act which "permits a software producer to prohibit the adaptation of a licensed computer program by decompilation or disassembly, conflicts with the rights of computer program owners under § 117 and clearly touches upon an area of federal copyright law." Id. at 270. The Fifth Circuit therefore concluded the restriction in Vault's license agreement against decompiliation or disassembly was unenforceable. Id.

Defendants rely on Vault and assert that Blizzard's licensing restrictions on fair use by reverse engineering are identical **[**46]** to those in Vault. Defendants state that Blizzard is attempting to use state enforcement of private contracts in an area that touches upon federal copyright law. Plaintiffs rely on Bowers and assert that the Vault holding is limited because it holds only that a state law prohibiting all copying is preempted by the Copyright Act. Therefore, plaintiffs contend that Vault does not apply to private license agreements at issue in this case.

In Bowers, the court held that ***HN22***[] "private parties are free to contractually forego the limited ability to reverse engineer a software product under the exemptions of the Copyright Act." Bowers, 320 F.3d at 1325-26 (applying First Circuit law). The Bowers court acknowledged the Vault holding, but distinguished it by stating there was no evidence that "the First Circuit would extend the concept to include private contractual agreements supported by mutual assent and consideration." Bowers, 320 F.3d at 1325. The Federal Circuit in Bowers stated that the First Circuit recognized the contractual waiver of affirmative defenses and statutory rights, therefore, the defendants could contractually **[**47]** waive their fair use right to reverse engineer. Id.

The Court finds the reasoning in Bowers persuasive. The defendants in this case waived their "fair use" right to reverse engineer by agreeing to the licensing agreement. ***HN23***[] Parties may waive their statutory rights under law in a contract. See, e.g, The Older Workers Benefit Protection Act, 29 U.S.C. § 626(f) (2004) (statute outlines minimum requirements for waiver of statutory right to sue under the ADEA). In this case, defendants gave up their fair use rights and must be bound by that waiver.

F. Copyright Misuse Defense

Finally, defendants assert that the EULA and TOU terms constitute a misuse of Blizzard's copyright in the software. Defendants assert that by requiring restrictions on reverse engineering, matchmaking, and commercialization, Blizzard is guilty of copyright misuse. Further, defendants state that the EULA and TOU are facially anti-competitive. Blizzard responds that the copyright misuse defense is unavailable as a defense to a contract claim. Further, Blizzard asserts that even if the defense were available, Blizzard's software licenses contain routine restrictions repeatedly **[**48]** upheld by the courts and that defendants' unclean hands prevent them from relying upon the doctrine.

HN24[] "Abuse of copyright is generally recognized as an equitable affirmative defense to a copyright infringement claim." *Schoolhouse, Inc. v. Anderson, 2000 U.S. Dist. LEXIS 22524, No. 99-1214, 2001 WL 1640081 at *7 (D. Minn. 2001)* (citing *Lasercomb America, Inc. v. Reynolds, 911 F.2d 970, 973 (4th Cir. 1990))*, aff'd *275 F.3d 726 (8th Cir. 2002)*. In examining an assertion of copyright misuse, "the question is not whether the copyright is being used in a manner violative of ***antitrust law*** . . . but whether the copyright is being used in a manner violative of the public policy embodied in the grant of a copyright." *Lasercomb, 911 F.2d at 978*. Misuse does not invalidate the copyright, it only precludes its enforcement **[*1182]** during the period of misuse. *Video Pipeline, Inc. v. Buena Vista Home Entm't, Inc., 342 F.3d 191, 204 (3rd Cir. 2003)*.

The leading cases affirming the availability of the copyright misuse defense have found that the language used in licensing agreements may constitute a misuse or abuse of copyright law. See *Lasercomb, 911 F.2d 970* **[**49]** (licensing agreement was copyright misuse because its broad language suppressed any attempt to independently implement the idea expressed, forbade licensee and its employees from developing or assisting in the development of any kind of computer-assisted diemaking software; agreement term was for ninety-nine years, and all licensees and employees forewent utilization of creative abilities); *Practice Mgmt. Info. Corp. v. American Medical Assoc., 121 F.3d 516, 520-21 (9th Cir. 1997)* (licensing agreement constituted copyright misuse because the limitation imposed by the AMA prevented licensee from using other forms, giving the AMA a substantial and unfair advantage over its competitors thus violating the public policy embodied in the grant of copyright); *Video Pipeline, 342 F.3d at 204-05* ("Anti-competitive licensing agreements may conflict with the purpose behind a copyright's protection by depriving the public of a would-be competitor's creativity," but copyright misuse not found).

In the *Lasercomb*, *Practice Management*, and *Video Pipeline* cases, the defendants raised copyright misuse as a defense to copyright infringement claims. In contrast, **[**50]** in this case defendants are asserting the copyright misuse doctrine as a defense to a contract claim, as plaintiffs' copyright infringement claim was settled by the parties and dismissed in the Consent Decree. As a result, the copyright misuse defense may be inapplicable. See, e.g., *Pollstar v. Gigmania Ltd., 170 F. Supp.2d 974, 982 (E.D. Cal. 2000)* (court declined to decide whether the license agreement terms constituted copyright misuse because the plaintiff did not allege copyright infringement).

In this case, the EULA's language permits the licensee to install one copy of the program on either a home or portable computer. The program has a multi-player capability [13] that allows up to eight players per registered version. These "spawned" versions may be installed on an unlimited number of computers, but must be played in conjunction with the registered version of the program from which they are spawned. The license agreement is effective until terminated and may be terminated at any time by either party. The licensee may also permanently transfer all of its rights under the license agreement if the recipient of the transfer agrees to the license agreement's terms **[**51]** and the licensee agrees to remove the program and any new materials from his or her computer. These requirements are in addition to the requirements previously mentioned which prohibit reverse engineering, creating derivative works, and transferring reproductions of the program among other restrictions.

---

[13] The EULA for StarCraft: Brood of War does not state it has a multi-player format. There is no EULA provided to the Court for the Diablo game.

Considering these factors, the Court finds that the EULAs and TOU terms do not constitute copyright misuse. The language used does not prevent defendants from competing with Blizzard by prohibiting them or their employees from developing video game software as in Lasercomb, or require defendants to use or buy only Blizzard games similar to the AMA's prohibition on use of a competitor's coding system in Practice Management. The parties can terminate the licenses at any time. Finally, the Court is reluctant to apply the copyright misuse defense as a **[*1183]** defense to **[**52]** a contract claim, because the defense is normally used in copyright infringement actions and the copyright claim has been dismissed in this case. Therefore, the copyright misuse defense fails. As a result, the Court will grant plaintiffs' motion for summary judgment on Count VII of the second amended complaint and deny defendants' motion for summary judgment on this claim.

G. Digital Millennium Copyright Act

The Digital Millennium Copyright Act of 1998 ("DMCA") implemented the Copyright Treaty and the Performances and Phonograms Treaty, "two international treaties signed before the World Intellectual Property Organization ("WIPO") in December 1996 by the United States and 125 other countries." *17 U.S.C. § 1201 (1998)*. "The two treaties supplement the Berne Convention for the Protection of Literary and Artistic Works, to account for the development of 'digital works and the growth of the Internet and other digital communication networks." Raymond T. Nimmer, LAW OF COMPUTER TECHNOLOGY: RIGHTS LICENSES LIABILITIES § 1:44 (3d ed. 2003). "Along with implementing the WIPO treaties, the [DMCA] addresses a variety of copyright issues, including the circumvention **[**53]** of copyright protection systems, the integrity of copyright management information, and civil remedies and criminal offenses and penalties with respect to copyright protection and management systems." Amy P. Bunk, Annotation, *Validity Construction, and Application of Digital Millennium Copyright Act,* 179 A.L.R. Fed. 319 (1998).

1. Circumvention of Copyright Protection Systems

Plaintiffs allege that defendants violated the anti-circumvention provision of the DMCA. The DMCA provides, ***HN25***[] "No person shall circumvent a technological measure that effectively controls access to a work protected under this title." *17 U.S.C. § 1201(a)(1)(A)*. ***HN26***[] To circumvent a technological measure "means to descramble a scrambled work, to decrypt an encrypted work, or otherwise to avoid, bypass, remove, deactivate, or impair a technological measure, without the authority of the copyright owner." *17 U.S.C. § 1201(a)(3)(A)*. The statute defines "effectively controls access to a work" to mean if the measure, in the ordinary course of its operation, requires the application of information, or a process or a treatment, with the authority of the copyright **[**54]** owner, to gain access to the work. *17 U.S.C. § 1201(a)(3)(B)*.

Plaintiffs contend that the defendants' development of the bnetd emulator violates *§ 1201(a)(1)(A)*, because the defendants circumvented Blizzard's technological measures to gain access to Battle.net mode on their "unauthorized emulator." Plaintiffs assert that all of the available defenses are inapplicable to defendants' conduct.

Defendants respond that even if they circumvented or provided tools for circumvention, *§ 1201(f)* provides a complete defense to Blizzard's claims. First, defendants assert that *§ 1201(f)* provides a specific exception to the prohibition on circumvention outlined in *§ 1201(a)* when the circumvention is done for the sole purpose of creating and distributing interoperable computer programs such as the bnetd matchmaking server. Second, defendants state the legislative history shows that the DMCA only protects initial access to copyrighted works, not subsequent access. [14] See S. REP. NO. 105-190 at 28 **[*1184]** (1998); H.R. REP. NO. 105-551, pt. 1, at 18 (1998). Third, the

---

[14] The Senate Report states: "Paragraph (a)(1) establishes a general prohibition against gaining unauthorized access to a work by circumventing a technological measure put in place by the copyright owner . . . . This paragraph does not apply to the subsequent actions of a person once he or she has obtained authorized access to a copy of a work protected under title 17, even if such actions involve circumvention of other types of technological measures. S. REP. NO. 105-190 at 28. The House Report states: "Paragraph (a)(1) does not apply to the subsequent actions of a person once he or she has obtained authorized

defendants assert they had authority to access the Battle.net mode because they lawfully purchased the software. **[**55]**

[56]** Plaintiffs respond that the defendants did not circumvent technological measures for the sole purpose of identifying and analyzing elements of the program that are necessary to interoperate with computer programs. Rather, plaintiffs allege that defendants' sole purpose was to copy and distribute Blizzard computer files. Plaintiffs contend that the defendants not only copied code that would achieve interoperability, but also copied elements that would preserve player account information, display of icons, and presentation of ad banners. Plaintiffs contend that the reverse engineering exemptions of *§ 1201(f)* are inapplicable because defendants consented to a EULA and TOU that expressly gave up the right to reverse engineer and engage in matchmaking. Next, plaintiffs state that the legislative history cited by defendants did not make it into the text of the statute and the plain language of the statute should prevail. Finally, plaintiffs asset that the defendants did not have authority to access Battle.net mode via a fake Battle.net server. Plaintiffs state that even if the defendants' theory were correct, the scope of the initial access was limited to connections with authentic Battle. **[**57]** net servers. Plaintiffs assert that defendants' argument relies on the false assumption that granting permission to access Battle.net mode via a Battle.net server creates implied authority to access Battle.net mode via a fake Battle.net server.

Section 1201(f)(1) provides a possible defense to plaintiffs' anti-circumvention claims. *Section 1201(f)(1)* provides:

> ***HN27***[] Notwithstanding the provisions of subsection (a)(1)(a), a person who has lawfully obtained the right to use a copy of a computer program may circumvent a technological measure that effectively controls access to a particular portion of that program for the sole purpose of identifying and analyzing those elements of the program that are necessary to achieve interoperability of an independently created computer program with other programs, and that have not previously been readily available to the person engaging in the circumvention, to the extent any such acts of identification and analysis do not constitute infringement under this title.

The DMCA defines ***HN28***[] interoperability as the "ability of computer programs to exchange information, and such programs mutually to use the information which has been exchanged." **[**58]** *17 U.S.C. § 1201(f)(4)*.

The Court finds that the defendants' actions constitute a circumvention of copyright under the DMCA. It is undisputed that defendants circumvented Blizzard's technological measure, the "secret handshake" **[*1185]** between Blizzard games and Battle.net, that effectively controlled access to Battle.net mode. It is true the defendants lawfully obtained the right to use a copy of the computer programs when they agreed to the EULAs and TOU. The statute, however, only exempts those who obtained permission to circumvent the technological measure, not everyone who obtained permission to use the games and Battle.net. See *Universal City Studios, Inc. v. Corley, 273 F.3d 429, 444 (2nd Cir. 2001)* (court rejects argument that because DVD buyer has authority to view DVD, buyer has authority of copyright owner to view DVD in a competing platform; court finds that argument misreads *§ 1201(a)(3)* because the provision exempts from liability those who would "decrypt"--not "use"--an encrypted DVD with the authority of copyright owner). The defendants did not have the right to access Battle.net mode using the bnetd emulator. Therefore, defendants' **[**59]** access was without the authority of the copyright owner.

The primary question is whether the defenses under *§ 1201(f)* are available to the defendants. It must be determined whether the defendants' sole purpose was to identify and analyze elements of the program to achieve interoperability of an independently created computer program with other programs, to the extent the identification and analysis did not constitute infringement under the Copyright Act. Plaintiffs contend that the defendants did not try to create another program, but rather their purpose was to copy Battle.net and place and distribute copies of it on the bnetd server to imitate Battle.net without the restrictions. The defendants admit that the bnetd project was to

---

access to a copy of a work protected, under Title 17, even if such actions involve circumvention of additional forms of technological protection measures. In a fact situation, where the access is authorized, the traditional defenses to copyright infringement, including fair use, would be fully applicable. So, an individual would not be able to circumvent in order to gain unauthorized access to a work, but would be able to do so in order to make fair use of a work which he or she has acquired lawfully. H.R. REP. NO. 105-551, pt. 1 at 18.

provide matchmaking services for users of Blizzard games who want to play in a multi-player environment without using Battle.net.

The Court finds that the defendants' actions constituted more than enabling interoperability. The bnetd emulator developed by the defendants always allows the Blizzard game to access Battle.net mode features even if the user does not have a valid or unique CD Key, because the bnetd emulator does not determine whether the CD **[**60]** Key is valid or currently in use by another player. Unauthorized copies of the Blizzard games were played on bnetd servers. Then, defendants distributed the bnetd program for free. Because the bnetd source code was freely available, others developed additional Battle.net emulators based on the bnetd source code. In addition, the defendants distributed binary versions of the bnetd program to make it more convenient for users to set up and access the emulator program. Finally, the defendants did not create an independently created computer program. The bnetd program was intended as a functional alternative to the Battle.net service. Once game play starts there are no differences between Battle.net and the bnetd emulator from the standpoint of a user who is actually playing the game. Based on these facts, defendants' actions extended into the realm of copyright infringement and they cannot assert the defenses under *§ 1201(f)(1)*. See *17 U.S.C. § 1201(f)(1)*. Therefore, the Court will grant summary judgment to Blizzard on Count II of its second amended complaint as to the anti-circumvention claim and deny defendants' motion for summary judgment on this claim.

[**61] 2. Trafficking in Circumvention Technology

Finally, plaintiffs allege that defendants trafficked in circumvention devices in violation of *17 U.S.C. § 1201(a)(2)*. *Section 1201(a)(2)* provides:

> ***HN29***[] No person shall manufacture, import, offer to the public, provide, or otherwise **[*1186]** traffic in any technology, product, service, device, component, or part thereof, that, -- (A) is primarily designed or produced for the purpose of circumventing a technological measure that effectively controls access to a work protected under this title; (B) has only limited commercially significant purpose or use other than to circumvent a technological measure that effectively controls access to work protected under this title; or (C) is marketed by that person or another acting in concert with that person with that person's knowledge for use in circumventing a technological measure that effectively controls access to a work protected under this title.

The statute also states that ***HN30***[] "nothing in this section shall affect rights, remedies, limitations, or defenses to copyright infringement, including fair use, under this title." *17 U.S.C. § 1201(c)* **[**62]** .

Plaintiffs allege that the defendants' development and distribution of the bnetd emulator satisfies one, if not all, of the tests for liability. First, the plaintiffs assert that the "secret handshake" that takes places between the Battle.net server and the Blizzard game is a technological measure that effectively controls access to Battle.net mode. Second, plaintiffs claim that the only purpose of the bnetd emulator is to allow access to Battle.net mode. Third, plaintiffs' claim that the defendants distributed the bnetd emulator knowing that it could be used to circumvent Blizzard's technological controls.

Defendants do not dispute these facts. Again, defendants rely on the exceptions of *§ 1201(f)*. Therefore, the question is whether the defendants' conduct meets the exceptions of *§ 1201(f)*. The provisions applicable to *§ 1201(a)(2)* in *§ 1201(f)(2)-(3)* provide:

> ***HN31***[] Notwithstanding the provisions of subsections (a)(2) and (b), a person may develop and employ technological means to circumvent a technological measure, or to circumvent protection afforded by a technological measure, in order to enable the identification and analysis under paragraph (1), or for the purpose **[**63]** of enabling interoperability or an independently created computer program with other programs, if such means are necessary to achieve such interoperability, to the extent that doing so does not constitute infringement under this title.
>
> The information acquired through the acts permitted under paragraph (1), and the means permitted under paragraph (2), may be made available to others if the person referred to in paragraph (1) or (2), as the case

> may be, provides such information or means solely for the purpose of enabling interoperability of an independently created computer program with other programs, and to the extent that doing so does not constitute infringement under this title or violate applicable law other than this section.

17 U.S.C. § 1201(f)(2)-(3). The defendants assert that their purpose was to enable interoperability with the Blizzard software and that distribution to others for that same purpose is protected under § 1201(f).

Based on the facts presented to the Court, defendants violated the trafficking provision of § 1201(a)(2). The defendants' purpose in developing the bnetd server was to avoid the anti-circumvention restrictions **[**64]** of the game and to avoid the restricted access to Battle.net. Thus, the sole purpose of the bnetd emulator was not to enable interoperability. The bnetd emulator had limited commercial purpose because it was free and available to anyone who wanted to copy and use the program. See *RealNetworks, Inc. v. Streambox, Inc., 2000 U.S. Dist. LEXIS 1889, No. 99-CV02070, 2000 WL 127311 at *8 (W.D. Wash. 2000)* ("portion of VCR that circumvents the Secret Handshake so as to avoid the Copy Switch has no significant **[*1187]** commercial purpose other than to enable users to access and record protected content."). Finally, the development and distribution to others constituted copyright infringement and ***HN32***[] persons who commit copyright infringement cannot benefit from the exemptions of § 1201(f). See 17 U.S.C. § 1201(f)(2)-(3). "Sections 1201(f)(2) and (3) of the DMCA are not broad exceptions that can be employed to excuse any behavior that makes some device 'interoperable' with some other device." *Lexmark Int'l Inc. v. Static Control Components, Inc., 253 F. Supp.2d 943, 970 (E.D. Ky. 2003)*. Therefore, the Court will grant plaintiffs' motion for summary judgment as to Count **[**65]** II regarding the trafficking in anti-circumvention technology provisions and deny defendants' motion for summary judgment on this claim.

V. Conclusion

For the foregoing reasons, the Court finds that the individual defendants Jung, Crittenden, and Combs breached the license agreements in this case. As a result, plaintiffs' motion for summary judgment should be granted on the breach of contract claim in Count VII and defendants' motion for summary judgment on this claim and Count IV of their counterclaim should be denied. Plaintiffs' motion for summary judgment on the anti-circumvention and trafficking in anti-circumvention technology claims in Count II should be granted and defendants' motion for summary judgment on Count II of the second amended complaint and Count IV of their counterclaim should be denied.

Accordingly,

IT IS HEREBY ORDERED that defendants' motion for summary judgment is **DENIED.** [Doc. 109]

IT IS FURTHER ORDERED that defendants' supplemental opposition to plaintiffs' motion for partial summary judgment is **DENIED.** [Doc. 142].

IT IS FURTHER ORDERED that plaintiffs' motion for partial summary judgment is **GRANTED. [**66]** [Doc. 111]

IT IS FURTHER ORDERED that plaintiffs' motion to consider supplemental authority is **GRANTED.** [Doc. 152]

IT IS FURTHER ORDERED that defendants' motion to consider supplemental authority is **GRANTED.** [Doc. 160]

An appropriate judgment will accompany this memorandum and order.

CHARLES A. SHAW

UNITED STATES DISTRICT JUDGE

Dated this 30th day of September, 2004.

JUDGMENT

In accordance with the Memorandum and Order of this date and incorporated herein and the Consent Decree entered on March 18, 2004, and the Order of March 24, 2004,

IT IS HEREBY ORDERED, ADJUDGED, AND DECREED that judgment is entered in favor of plaintiffs and against defendants on Count II of plaintiffs' second amended complaint.

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that judgment is entered in favor of plaintiffs and against defendants on Count VII of plaintiffs' second amended complaint.

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that judgment is entered in favor of plaintiffs and against defendants on Count II of defendants' counterclaim.

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that judgment is entered **[**67]** in favor of plaintiffs and against defendants on Count IV of defendants' counterclaim.

IT IS FURTHER ORDERED that defendants, their officers, employees, agents, subsidiaries, representatives, distributors, dealers, members, affiliates, and all other persons in active concert or participation with any of them are permanently enjoined from: (1) violating the prohibitions on circumvention of copyright protection systems and trafficking in circumvention technology with respect to the Blizzard games: "StarCraft," "StarCraft: Brood War," "WarCraft II: Battle.net Edition," "Diablo," and "Diablo II: Lord of Destruction." and Battle.net and (2) violating Blizzard's End User License Agreements or providing matchmaking services, or emulating communication protocols to enable provision of Internet gaming services for Blizzard games.

CHARLES A. SHAW

UNITED STATES DISTRICT JUDGE

Dated this 30th day of September, 2004.

Volvo Constr. Equip. N. Am., Inc. v. CLM Equip. Co.

United States Court of Appeals for the Fourth Circuit

September 24, 2003, Argued ; October 8, 2004, Decided

No. 03-1108

Reporter

386 F.3d 581 *; 2004 U.S. App. LEXIS 21023 **

VOLVO CONSTRUCTION EQUIPMENT NORTH AMERICA, INC., a Delaware corporation; VOLVO TRADEMARK HOLDING AKTIEBOLAGET, a Swedish corporation; CHAMPION ROAD MACHINERY LIMITED, a Canadian corporation, Plaintiffs-Appellees, v. Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN3[] **Federal Declaratory Judgments, Appellate Review**

An appellate court reviews de novo the issue of whether a district court possessed jurisdiction in a declaratory judgment proceeding. If a plaintiff has asserted sufficient facts to create declaratory judgment jurisdiction, the appellate court reviews for abuse of discretion a district court's decision to exercise its jurisdiction. District courts possess discretion in determining whether and when to entertain an action under the Declaratory Judgment Act, even when the suit otherwise satisfies subject matter jurisdictional prerequisites.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Judgments > Pretrial Judgments > General Overview

Civil Procedure > Judgments > Pretrial Judgments > Judgment on Pleadings

HN4[] **Standards of Review, De Novo Review**

An appellate court reviews de novo a district court's award of judgment on the pleadings. *Fed. R. Civ. P. 12(c)*. The same standard is applied to motions under *Rule 12(c)* and *Rule 12(b)(6)*. In reviewing an award of judgment on the pleadings, the appellate court assumes the facts alleged in the relevant pleadings to be true and draws all reasonable inferences therefrom.

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > General Overview

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN5[] **Distributorships & Franchises, Franchise Relationships**

The issue of whether an entity is protected under a state dealer protection statute is a question of law, which is reviewed de novo.

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > Discretionary Jurisdiction

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > Actual Controversy

Civil Procedure > Judgments > Declaratory Judgments > General Overview

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

HN6[] **Federal Declaratory Judgments, Discretionary Jurisdiction**

A federal court may properly exercise jurisdiction in a declaratory judgment proceeding when three essentials are met: (1) the complaint alleges an actual controversy between the parties of sufficient immediacy and reality to warrant issuance of a declaratory judgment; (2) the court possesses an independent basis for jurisdiction over the parties (that is, federal question or diversity jurisdiction); and (3) the court does not abuse its discretion in its exercise of jurisdiction. *28 U.S.C.S. § 2201*.

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

Civil Procedure > Judgments > Declaratory Judgments > General Overview

HN7[] **Declaratory Judgments, Federal Declaratory Judgments**

See *28 U.S.C.S. § 2201*.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > Judgments > Declaratory Judgments > General Overview

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

HN9[] **Diversity Jurisdiction, Citizenship**

For a controversy to exist for declaratory judgment purposes, the situation need not present a federal cause of action; if the parties are diverse, a federal court may possess subject matter jurisdiction over a state-law contract dispute.

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > Actual Controversy

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > General Overview

Civil Procedure > Judgments > Declaratory Judgments > General Overview

Civil Procedure > Judgments > Relief From Judgments > General Overview

HN10[] **Case & Controversy Requirements, Actual Controversy**

An actual controversy exists under the Declaratory Judgment Act when a plaintiff seeks declaratory relief in order to avoid the accrual of potential damages for past actions. The purpose of the Declaratory Judgment Act is to avoid accrual of avoidable damages to a party uncertain of its rights.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > Judgments > Declaratory Judgments > General Overview

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > General Overview

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > Discretionary Jurisdiction

HN11[] **Standards of Review, Abuse of Discretion**

If a district court possesses declaratory judgment jurisdiction, it may nonetheless, in the exercise of its discretion, decline to entertain the action. The exercise of such discretion, however, is not without bounds. A district court must have good reason for declining to exercise its declaratory judgment jurisdiction. A district court is obliged to rule on the merits of a declaratory judgment action when declaratory relief will serve a useful purpose in clarifying and settling the legal relations in issue, and will terminate and afford relief from the uncertainty, insecurity, and controversy giving rise to the proceeding. District courts have great latitude in determining whether to assert jurisdiction over declaratory judgment actions.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Abstention

Civil Procedure > Judgments > Declaratory Judgments > General Overview

Governments > Courts > Judicial Comity

HN12[] **Declaratory Judgments, Federal Declaratory Judgments**

The federal trial courts should weigh the legitimate concerns of efficiency and comity when deciding whether to award declaratory relief. However, the first suit should have priority, absent the showing of balance of convenience in favor of the second action.

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > Franchise Agreements

Contracts Law > Defenses > Ambiguities & Mistakes > General Overview

Evidence > Types of Evidence > Documentary Evidence > Parol Evidence

Contracts Law > Contract Interpretation > Parol Evidence > General Overview

Evidence > Admissibility > Statements as Evidence > Parol Evidence

HN13[] **Franchise Relationships, Franchise Agreements**

In South Carolina and Ontario, the parol evidence rule precludes the use of extrinsic evidence of prior or contemporaneous negotiations to alter, contradict, or explain the terms of agreements, provided the agreements are complete, unambiguous and unconditional. Unless the agreements are ambiguous or incomplete, oral promises or representations made prior to execution of the agreements have no effect on those agreements.

Business & Corporate Compliance > ... > Contracts Law > Standards of Performance > Discharge & Termination

Contracts Law > Contract Interpretation > General Overview

HN14[] **Standards of Performance, Discharge & Termination**

The fact that both "with cause" and "without cause" termination provisions are contained in the same section of a contract only shows that the parties differentiated between termination for cause and termination without cause. And when a contract contains both "for cause" and "without cause" provisions, a party may terminate a contract, even in the absence of breach or fault by the other party, pursuant to the without cause provision.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Integration Clauses

Evidence > Admissibility > Statements as Evidence > Parol Evidence

Contracts Law > Contract Interpretation > Parol Evidence > General Overview

Evidence > Types of Evidence > Documentary Evidence > Parol Evidence

HN15[] **Contract Conditions & Provisions, Integration Clauses**

A court applying South Carolina or Ontario law is obliged to consider a writing as complete if the writing on its face appears to express the whole agreement. In addition, the court is entitled to consider an integration clause in weighing whether contracting parties intended a written contract to constitute the entirety of an agreement.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Adequate Consideration

Contracts Law > Contract Formation > Consideration > General Overview

Contracts Law > Contract Modifications > General Overview

Business & Corporate Compliance > ... > Contracts Law > Contract Modifications > Oral Modifications

HN16[] **Consideration, Adequate Consideration**

Pursuant to South Carolina and Ontario law, an oral modification of a written contract must be supported by separate and adequate consideration. A written contract may be changed by a subsequent parol agreement supported by valuable consideration.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Preexisting Duties

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > Franchise Agreements

Business & Corporate Compliance > ... > Contract Formation > Consideration > Sufficient Consideration

Contracts Law > Contract Modifications > General Overview

Business & Corporate Compliance > ... > Contracts Law > Contract Modifications > Oral Modifications

HN17[] Consideration, Preexisting Duties

Pursuant to South Carolina law, an agreement to do what one is already legally bound to do is not sufficient consideration to support a new agreement. Moreover, under Ontario law, an agreement to perform a preexisting duty does not constitute new consideration.

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > Franchise Agreements

Contracts Law > Contract Interpretation > Parol Evidence > General Overview

Contracts Law > Defenses > Ambiguities & Mistakes > General Overview

Evidence > Admissibility > Statements as Evidence > Parol Evidence

HN18[] Franchise Relationships, Franchise Agreements

Although courts commonly look to evidence of the course of dealing and to industry custom and usage in assessing ambiguous contract terms, under South Carolina and Ontario law, extrinsic evidence of a usage or custom is not admissible where the contract expresses the intent of the parties in clear and unambiguous language. Extrinsic evidence is not admissible to vary the terms of a clear and unambiguous contract.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

Contracts Law > Breach > General Overview

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN19[] Types of Contracts, Covenants

In South Carolina and Ontario, there can be no breach of an implied covenant of good faith and fair dealing where a party to a contract does what provisions of the contract expressly give him the right to do. The covenant of good faith and fair dealing is circumscribed by the terms of the contract.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Promissory Estoppel

Contracts Law > Remedies > Equitable Relief > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

HN20[] Consideration, Promissory Estoppel

Promissory estoppel is not a cause of action recognized in Ontario. And in South Carolina, equitable relief is precluded under a theory of promissory estoppel if the estoppel claim is in direct conflict with a specific contract term.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN21[] **Federal Venue Transfers, Convenience Transfers**

A federal court exercising diversity jurisdiction is obliged to apply the substantive law of the state in which it sits, including the state's choice-of-law rules. The forum state's choice-of-law rules are substantive.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Forum & Place

Commercial Law (UCC) > Sales (Article 2) > Form, Formation & Readjustment > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN22[] **Contract Conditions & Provisions, Forum Selection Clauses**

The presumptive rule of lex loci contractus is that the interpretation of a contract is governed by the law of the place where it was made. Under North Carolina law, however, such a presumption may be overcome by the presence of a choice-of-law provision in a contract.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Choice of Law

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Forum & Place

Contracts Law > Contract Conditions & Provisions > General Overview

HN23[] **Contract Conditions & Provisions, Forum Selection Clauses**

Despite North Carolina's adherence to the presumptive rule of lex loci contractus, contracting parties in North Carolina are entitled to agree that a particular jurisdiction's substantive law will govern their contract, and such a provision will generally be given effect. In certain circumstances, however, North Carolina will decline to honor a choice-of-law provision. North Carolina relies on the Second Restatement of Conflict of Laws to determine whether such circumstances are present. Thus, a choice-of-law provision will not be enforced if either of the following two conditions is satisfied: (a) the chosen state has no substantial relationship to the parties or the transaction and there is no other reasonable basis for the parties' choice, or (b) application of the law of the chosen state would be contrary to a fundamental policy of a state which has a materially greater interest than the chosen state in the determination of the particular issue.

HN31[] **Consumer Protection, Deceptive & Unfair Trade Practices**

A business possessing an intangible right such as the contract right to be a dealer of a manufacturer's goods in a certain geographic area may be a consumer under the Texas Deceptive Trade Practices and Consumer Protection Act, *Tex. Bus. & Com. Code Ann. § 17.41 et seq.*, if (1) the business purchased the intangible right, and (2) the business's decision to purchase the right was motivated, in part, by its desire to obtain collateral services under the dealer agreement.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN32[] **Federal & State Interrelationships, Choice of Law**

Not every statutory provision constitutes a fundamental policy of a state. The law of a state and its public policy are not necessarily synonymous. Not every law enacted by the legislature embodies the public policy of the state.

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN33[] **Distributorships & Franchises, Franchise Relationships**

In assessing whether a dealer protection statute expresses a state's fundamental policy, a court is guided by the language of the statute, relevant court decisions, and pertinent legislative history.

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Computer & Internet Law > Civil Actions > Jurisdiction > Conflict of Law

HN34[] **Distributorships & Franchises, Franchise Relationships**

The presence of a statutory anti-waiver provision does not necessarily mean that a statute embodies a state's fundamental policy. There is no established rule for determining whether a state policy is fundamental. Although the presence of an anti-waiver provision does not necessarily mean that a dealer protection statute embodies a fundamental policy, such a provision suggests the importance the legislature attached to the statute. The strength of anti-waiver provisions in dealer protection statutes, however, varies among the states.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN35[] **Federal & State Interrelationships, Choice of Law**

In Arkansas, a determination of public policy lies almost exclusively with the legislature, and courts should not interfere with that determination absent palpable error.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN36[] **Contract Conditions & Provisions, Forum Selection Clauses**

In the absence of an anti-waiver provision in the statute, and there being no legislative finding that the Louisiana Dealer Act, *La. Rev. Stat. Ann. § 51:481 et seq.*, constitutes an important, much less a fundamental, state policy, the act cannot override a choice-of-law contract provision precluding its application.

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Choice of Law

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > General Overview

HN37[] **Causes of Action, Choice of Law**

See *Ark. Code Ann. § 4-72-206(1)*.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN38[] **Federal & State Interrelationships, Choice of Law**

A legislature simplifies the task of determining whether a state statute embodies fundamental policy when it expressly states that the statute constitutes such policy.

Governments > Legislation > Interpretation

HN39[] **Legislation, Interpretation**

In interpreting an Arkansas statute, courts may look to an emergency clause to determine legislative intent.

Counsel: Scott E. Korzenowski, DADY & GARNER, P. A., Minneapolis, Minnesota, for Appellants.

Judges: Before WIDENER, TRAXLER, and KING, Circuit Judges. Judge King wrote the opinion, in which Judge Traxler joined. Judge Widener wrote an opinion concurring in part and dissenting in part.

Opinion by: KING

Opinion

[*587] KING, Circuit Judge:

Three retail dealers of large earth-moving motor graders (the "Dealers") [1] appeal the district court's decision in favor of the graders' manufacturers (collectively, "Volvo") [2] in this contract dispute. *Volvo Trademark Holding Aktiebolaget v. CLM Equip. Co., Inc., 236 F. Supp. 2d 536 (W.D.N.C. 2002)* **[**2]** (the "Opinion"). The Dealers maintain that the court lacked jurisdiction in the declaratory judgment proceeding initiated by Volvo because no actual controversy existed. The Dealers also assert that, even if the court possessed jurisdiction, it abused its discretion by exercising jurisdiction in that proceeding. Finally, the Dealers contend that the court erroneously ruled in favor of Volvo on the merits of this dispute, in that Volvo's refusal to supply them with equipment constituted a breach of its contractual obligations and contravened several state statutes. For the reasons explained below, we affirm in part, vacate in part, and remand.

[3]** I.

A.

---

[1] The Dealers are CLM Equipment Company, Inc., a Louisiana corporation, Clark Machinery Company, an Arkansas corporation, and Future Equipment Company, Inc., a Texas corporation.

[2] The three appellees, referred to as Volvo, are Volvo Construction Equipment North America, Inc., a Delaware corporation, Volvo Trademark Holding Aktiebolaget, a Swedish corporation, and Champion Road Machinery Limited, a Canadian corporation.

Prior to being purchased by Volvo in 1997, Champion Road Machinery Limited ("Champion") was a Canadian corporation specializing in the manufacture of large earth-moving motor graders (the "Champion Motor Graders"). [3] The contract dispute **[*588]** underlying this litigation emanates from Volvo's 1997 purchase of Champion and Volvo's subsequent decision to cease supplying Champion Motor Graders to the Dealers - CLM Equipment Company, Inc. ("CLM"), Clark Machinery Company ("Clark"), and Future Equipment Company, Inc. ("FEC") - for resale. That decision resulted in what the Dealers contend was Volvo's unlawful termination of their dealer agreements with Champion (the "Dealer Agreements"). [4] According to the Dealers, Champion promised them, during a 1970s effort to increase its dealerships in this country, that it would "continue a business relationship with a dealer unless the dealer was having financial difficulties or was performing poorly." The Dealers allege that Champion promised to terminate a Champion dealer "only after first giving the dealer notice of its deficiencies and an opportunity to correct those deficiencies." The Dealers maintain that Champion representatives also **[**4]** made contemporaneous oral representations that the Dealers could continue as Champion dealers so long as they adequately performed. This contract dispute relates primarily to the interpretation and application of a specific subsection of the Termination section of the Dealer Agreements. That subsection, the "Without Cause Provision," authorizes termination of a dealership without cause, providing as follows:

> Champion may terminate this agreement at any time without cause by written notice of termination delivered to [Dealer or Distributor], such termination to be effective not less than sixty (60) days after receipt or deemed receipt by Dealer of such notice.

CLM, Clark, and FEC Dealer Agreements § 24.4. Although the Without Cause Provision is important in this appeal, several other provisions of the Dealer Agreements are also significant. They include:

- a merger and integration clause (the "Integration Clause"), providing that a Dealer Agreement contains the entire agreement respecting a Dealer's purchase and distribution of Champion products and parts; CLM and Clark Dealer Agreements § 32.1, FEC Dealer Agreement § 33.1;

- a clause prohibiting oral **[**5]** modification (the "Modification Clause"), providing that any modification of a Dealer Agreement must be in writing and signed by a duly authorized officer of Champion; CLM and Clark Dealer Agreements § 32.2, FEC Dealer Agreement § 33.2;
- a market withdrawal provision (the "Market Withdrawal Provision"), pursuant to which Champion reserves the right to discontinue its product lines without notice to the Dealers; CLM, Clark, and FEC Dealer Agreements § 27;
- a best efforts provision (the "Best Efforts Provision"), under which the Dealers agree to use their best efforts to sell Champion products; CLM and Clark Dealer Agreements § 6, FEC Dealer Agreement § 7;

- a choice-of-law provision (the "Choice-of-Law Provision"), providing that, pursuant to CLM's and Clark's Dealer Agreements, the obligations of the parties are to be determined under South Carolina law; CLM and Clark Dealer **[*589]** Agreements § 29; and that, pursuant to FEC's Dealer Agreement, the obligations of the parties are to be governed by the law of Ontario; FEC Dealer Agreement § 29; and

- a conformity with local laws provision (the "Local Law Provision"), under which the rights and obligations of the **[**6]** parties are subject to all applicable laws of government entities having jurisdiction over them, and providing that, if local law substantially alters relationships under a Dealer Agreement, a party may request modification of the Agreement; CLM, Clark, and FEC Dealer Agreements § 30.

After consummating its purchase of Champion, Volvo decided that it could compete more effectively with such manufacturers as Case, Caterpillar, **[**7]** John Deere, and Komatsu if it marketed motor graders under a single

---

[3] ***HN1***[] Because we are reviewing an award of judgment on the pleadings, our factual recitation is presented in the light most favorable to the nonmoving party (i.e., the Dealers). *George C. Frey Ready-Mixed Concrete, Inc. v. Pall Hill Concrete Mix Corp., 554 F.2d 551, 553 (2d Cir. 1977)*; 5ACharles Alan Wright & Arthur R. Miller, *Federal Practice and Procedure* § 1368 (2d ed. 1990).

[4] The three Dealer Agreements at issue are entitled "Distributor Sales Agreements" (CLM and Clark) and "Grader Dealer Agreement" (FEC). We refer to each as a Dealer Agreement.

brand name (i. e., Volvo) and through a single dealer network (i. e., that of Volvo). [5] As a result, Volvo implemented a plan to "Volvoize" its products and "rationalize" its dealer network. Volvo characterized the "Volvoization" program as a process of reengineering and rebranding Champion Motor Graders for sale under the VOLVO trademark. Volvo characterized its "Dealer Rationalization" plan as the integration of the Volvo and Champion dealer networks.

In 2000, the Dealers responded to Volvo's plan by demanding that Volvo continue to provide them with motor graders manufactured by Volvo at the former Champion factory. Despite these demands, the Dealers were not selected by Volvo as authorized dealers of such motor graders, and Volvo notified the Dealers that it would no longer **[**8]** supply them with Champion Motor Graders. On January 19, 2000, FEC received notice that its Dealer Agreement would be terminated on March 19, 2000. On October 10, 2000, Volvo notified Clark and CLM that their Dealer Agreements would be terminated on January 9, 2001. Upon receipt of these termination notices, the Dealers advised Volvo that they would litigate all efforts to terminate the Dealer Agreements. In January 2001, after receipt of such advice from the Dealers, Volvo ceased manufacturing Champion brand motor graders.

B.

On October 10, 2000, Volvo filed its declaratory judgment complaint in the Western District of North Carolina (the "North Carolina Litigation"), naming as defendants CLM, FEC, AIS Construction Equipment Corporation ("AIS"), and certain other Champion dealers, including Nueces Farm Center, Inc. ("NFC"). By this civil action, Volvo sought a declaration that, pursuant to the Dealer Agreements, it was not obliged to continue supplying Champion Motor Graders to Champion dealers. On November 27, 2000, the defendants sought dismissal of the North Carolina Litigation for lack of subject-matter jurisdiction. In response, Volvo amended its declaratory judgment complaint **[**9]** and, *inter alia*, named Clark as an additional defendant. On March 19, 2001, before the district court addressed the jurisdictional issue, Volvo sought leave to amend its complaint for a second time, dropping defendant NFC from the North Carolina Litigation and asserting diversity jurisdiction in the North Carolina court. [6]

[*590] On March 20, 2001, the Dealers filed a separate civil action against Volvo in the Eastern District of Arkansas (the "Arkansas Litigation"). The Dealers then moved the North Carolina court to dismiss, abstain from, or stay the North Carolina Litigation, in deference to the Arkansas Litigation (the "Dealers' Motion"). On April 9, 2001, a magistrate judge in North Carolina recommended to the **[**10]** district court that the Dealers' Motion be denied and that Volvo be authorized to file its Second Amended Complaint. *Volvo Trademark Holding Aktiebolaget v. AIS Const. Equip. Corp., No. 1:00CV238, 2001 U.S. Dist. LEXIS 13198 (W.D.N.C. April 9, 2002)*.

On April 20, 2001, Volvo moved the Arkansas court to dismiss, abstain from, or stay the Arkansas Litigation, in deference to the North Carolina Litigation. On June 21, 2001, the Arkansas court granted that motion, entering a stay of the Arkansas Litigation pending resolution of the Dealers' Motion in North Carolina. On August 27, 2001, the North Carolina court, relying on the magistrate judge's recommendation, denied the Dealers' Motion, granted Volvo leave to voluntarily dismiss NFC as a defendant, and authorized Volvo to file its Second Amended Complaint (the "Complaint"). *Volvo Trademark, 162 F. Supp. 2d 465, 2001 U.S. Dist. LEXIS 13493, No. 1:00CV238 (W.D.N.C. Aug. 27, 2001)*. [7]

---

[5] According to Volvo, its competing manufacturers typically market a full line of construction equipment, and their dealers offer "one-stop shopping" for such products.

[6] Both Volvo and NFC are Delaware corporations. NFC, as a defendant, would have destroyed diversity in the North Carolina Litigation. *See* *28 U.S.C. § 1332*. With NFC no longer a defendant in the North Carolina Litigation, no diversity issue is raised, and none is apparent.

[7] Volvo's Second Amended Complaint in the North Carolina Litigation sought the following: (1) a declaration pursuant to the Lanham Act (*15 U.S.C. § 1051, et seq.*) of trademark infringement, unfair competition, and dilution; (2) a declaration that the Lanham Act preempted any state law claims that were inconsistent therewith; (3) a declaration that there had been no breach of contract by Volvo; (4) a declaration that there are no ancillary tort law claims against Volvo; and (5) a declaration that Volvo had not violated any state statutes. Volvo's Second Amended Complaint is the operative complaint in this appeal.

[11]** Upon being advised of the North Carolina court's ruling on the Dealers' Motion, the Arkansas court, on August 30, 2001, transferred the Arkansas Litigation to the Western District of North Carolina. Thereafter, on September 14, 2001, the Dealers filed their Joint Answer and Counterclaim in the North Carolina Litigation. Their Counterclaim mirrored the claims asserted in their complaint against Volvo in the Arkansas Litigation. [8] On January 9, 2002, the parties consented to consolidation of the Arkansas Litigation with the North Carolina Litigation in the North Carolina court. *Volvo Trademark*, No. 1:00CV238, No. 1: 01CV122 (W.D.N.C. Jan. 9, 2002).

[12]** On December 13, 2002, the district court filed the Opinion from which this appeal arises. The Opinion granted Volvo partial judgment on the pleadings, dismissed the Dealers' counterclaims in the **[*591]** North Carolina Litigation, and dismissed the Dealers' affirmative claims in the Arkansas Litigation. *Opinion at 558*. In its Opinion, the court determined, *inter alia*, that Volvo's refusal to supply the Dealers with Champion Motor Graders did not breach the Dealer Agreements because each agreement contained the Without Cause Provision. *Id. at 546*. In addition, the court concluded that the Dealers were not protected by the state dealer protection statutes of Arkansas, Louisiana, or Texas, because the Choice-of-Law Provision precludes the Dealers from seeking protection under those statutes. *Id. at 551-54*. The Dealers thereafter filed a timely notice of appeal, and we possess jurisdiction pursuant to *28 U.S.C. § 1291*. [9]

[13]** II.

HN3[] We review de novo the issue of whether a district court possessed jurisdiction in a declaratory judgment proceeding. *Richmond, Fredericksburg & Potomac R. Co. v. United States, 945 F.2d 765 (4th Cir. 1991)*. If a plaintiff has asserted sufficient facts to create declaratory judgment jurisdiction, we review for abuse of discretion a district court's decision to exercise its jurisdiction. *See Wilton v. Seven Falls Co., 515 U.S. 277, 282, 132 L. Ed. 2d 214, 115 S. Ct. 2137 (1995)* ("District courts possess discretion in determining whether and when to entertain an action under the Declaratory Judgment Act, even when the suit otherwise satisfies subject matter jurisdictional prerequisites."). ***HN4***[] We review de novo a district court's award of judgment on the pleadings. *Fed. R. Civ. P. 12(c)*; *see Burbach Broad. Co. v. Elkins Radio Corp., 278 F.3d 401, 405-06 (4th Cir. 2002)* (noting that same standard is applied to motions under *Rule 12(c)* and *Rule 12(b)(6)*). In reviewing an award of judgment on the pleadings, we assume the facts alleged in the relevant pleadings to be true, and we draw all reasonable inferences therefrom. **[**14]** *Elkins Radio, 278 F.3d at 406*; *see also Edwards v. City of Goldsboro, 178 F.3d 231, 244 (4th Cir. 1999)*. Finally, ***HN5***[] the issue of whether an entity is protected under a state dealer protection statute is a question of law, which we review de novo. *See generally United States v. Hill, 322 F.3d 301, 304 (4th Cir. 2003)*; *Hand v. Dean Witter Reynolds Inc., 889 S.W.2d 483, 496 (Tex. App. 1994)*.

III.

The Dealers raise multiple issues on appeal. They first maintain that the district court erred in exercising jurisdiction in the North Carolina Litigation. Specifically, they contend that Volvo failed to allege an actual controversy between

[8] The Dealers asserted twelve claims against Volvo in the Arkansas Litigation and in the North Carolina Litigation. Those claims were for (1) violations of the Arkansas Franchise Practices Act, *Ark. Code § 4-72-201, et seq.*; (2) violations of the Texas Farm, Industrial and Outdoor Power Equipment Dealer Act, *Tex. Bus. & Com. Code § 19.01, et seq.*; (3) violations of the Texas Deceptive Trade Practices and Consumer Protection Act, *Tex. Bus. & Com. Code § 17.41, et seq.*; (4) violations of the Michigan Motor Vehicle Act, *Mich. Comp. Laws Ann., Ch. 445.1561, et seq.*; (5) violations of the Louisiana Dealer Act, *La. Rev. Stat. § 51:481, et seq.* ; (6) violations of Ontario's Arthur Wishart Act; (7) violations of the South Carolina Fair Practices of Farm, Construction, Industrial and Outdoor Power Equipment Manufacturers, Distributors, Wholesalers and Dealers Act, *S.C. Code Ann. § 39-6-10, et seq.*; (8) breach of contract and the covenant of good faith and fair dealing; (9) tortious interference with contractual relations and prospective economic advantage; (10) unjust enrichment; (11) estoppel; and (12) recoupment.

[9] We recognize that ***HN2***[] an award of partial judgment on the pleadings does not generally constitute an appealable order. *See Am. Canoe Ass'n, Inc. v. Murphy Farms, Inc., 326 F.3d 505, 511 (4th Cir. 2003)*. This appeal is not interlocutory, however, because Volvo has voluntarily dismissed its remaining claims. *Volvo Trademark*, No. 1: 00CV238, No. 1: 01CV232, No. 1: 01CV122 (W.D.N.C. Jan. 2, 2003).

it and the Dealers. Moreover, the Dealers maintain that, even if the court possessed jurisdiction, its exercise thereof constituted an abuse of discretion.

The Dealers next contend that the district court erred when it ruled that Volvo's termination of the Dealer Agreements was not a breach of its contractual obligations. They maintain that the contract terms "may" and "without cause," as used in the Without Cause Provision, are ambiguous, that the Dealer Agreements are not completely integrated, **[**15]** and that the parties orally modified the Without Cause Provision. The Dealers contend that, notwithstanding the Without Cause Provision, Volvo's actions breached its implied duty **[*592]** of good faith and fair dealing. The Dealers also maintain that, even if the Dealer Agreements are completely integrated contracts unmodified by oral promises, Volvo is estopped from breaching its oral representations.

Finally, the Dealers contend that the Without Cause Provision is trumped by Arkansas, Louisiana, and Texas statutes that preclude manufacturers from terminating dealer agreements without cause (collectively, the "State Statutes"). The Dealers assert that, under the Local Law Provision, the Dealer Agreements are governed by the State Statutes. In the alternative, the Dealers maintain that the Choice-of-Law Provision should not be given effect because the laws selected thereunder are not rationally related to the Dealer Agreements and are contrary to the fundamental policies of their home states. Volvo maintains that the Dealers never raised this alternative contention in the district court and that it should not be considered on appeal.

We assess each of these contentions in turn.

A.

We first **[**16]** consider whether the district court erred in its exercise of jurisdiction in Volvo's declaratory judgment action. In this regard, it is elementary that ***HN6***[] a federal court may properly exercise jurisdiction in a declaratory judgment proceeding when three essentials are met: (1) the complaint alleges an "actual controversy" between the parties "of sufficient immediacy and reality to warrant issuance of a declaratory judgment;" (2) the court possesses an independent basis for jurisdiction over the parties (e.g., federal question or diversity jurisdiction); and (3) the court does not abuse its discretion in its exercise of jurisdiction. *28 U.S.C. § 2201*; *Cont'l Cas. Co. v. Fuscardo, 35 F.3d 963, 965 (4th Cir. 1994)*; *N. Jefferson Square Assocs. v. Virginia Hous. Dev. Auth., 94 F. Supp. 2d 709, 714 (E.D. Va. 2000)*.

Two of these three jurisdictional prerequisites, the first and the third, are contested by the Dealers on appeal. The second jurisdictional prong, that the court must possess an independent basis for jurisdiction over the parties, was satisfied when Volvo filed its Complaint and dropped defendant NFC, the only party defeating **[**17]** diversity. The district court thus properly concluded that Volvo had established diversity jurisdiction in its Complaint. *Volvo Trademark, 162 F. Supp. 2d 465, No. 1:00CV238 (W.D.N.C. Aug. 27, 2001)*.

The Dealers maintain, however, that the first and third jurisdictional prongs are not met, and that the district court erred in its exercise of jurisdiction. They assert that the first prong (the "Constitutional Inquiry") is not satisfied because Volvo's actions did not create an actual controversy under the Declaratory Judgment Act. They contend that the third prong (the "Prudential Inquiry") is not met because, even if the court had jurisdiction, it abused its discretion in considering the merits of this dispute. We address these inquiries below.

1.

In assessing the Constitutional Inquiry, we look to the Declaratory Judgment Act, which provides that ***HN7***[] "in a case of *actual controversy within its jurisdiction* …any court of the United States …may declare the rights and other legal relations of any interested party seeking such declaration, whether or not further relief is or could be sought." *28 U.S.C. § 2201* (emphasis added). ***HN8***[] A case meets the actual controversy requirement **[**18]** only if it presents a controversy that qualifies as an actual controversy under Article III of the Constitution. *See Aetna Life Ins. Co. v. Haworth, 300 U.S. 227, 240, 81 L. Ed. 617, 57 S. Ct. 461* ***[*593]*** *(1937)* (deciding that, pursuant to statute's limitation to cases involving actual controversy, Act is operative only with respect to constitutional controversy). The Dealers contend that, although Volvo's termination notices created disputes regarding their rights to distribute Champion Motor Graders, "the termination did not create the type of trademark 'case or controversy' subject to declaratory-judgment review." As explained below, this contention is immaterial.

The Dealers first maintain that the district court lacked federal question jurisdiction because they did not take any action or make any assertion that placed Volvo in objective apprehension of the improper use of its trademark or its ability to control its trademark. ***HN9***[] For a controversy to exist for declaratory judgment purposes, however, the situation need not present a federal cause of action; if the parties are diverse, a federal court may possess subject matter jurisdiction over a state-law contract dispute. The Dealers **[**19]** have admitted in their pleadings that the court had diversity jurisdiction over the North Carolina Litigation, and the existence of a contract dispute is plainly evident in the pleadings. [10] Indeed, when the court addressed the Dealers' Motion, Volvo had already been sued in Maine and Texas by Champion dealers, [11] **[**20]** and Volvo had already received written and oral litigation threats from the Dealers. [12]

The Dealers acknowledge that ***HN10***[] an actual controversy exists under the Declaratory Judgment Act when a plaintiff seeks declaratory relief in order to avoid the accrual of potential damages for past actions. *NUCOR Corp. v. Aceros Y Maquilas de Occidente, 28 F.3d 572, 577 (7th Cir. 1994)* (stating that purpose of Declaratory Judgment Act is to avoid accrual of avoidable **[**21]** damages to party uncertain of its rights). When Volvo initiated its declaratory judgment action in North Carolina, it had terminated the Dealer Agreements, it had received the Dealers' litigation threats, and separate suits had been filed against it in Maine and Texas. In these circumstances, Volvo possessed a reasonable apprehension of a multiplicity of litigation and of liability for ongoing **[*594]** damages. An actual controversy therefore existed between Volvo and the Dealers when Volvo initiated the North Carolina Litigation. The first prong of the declaratory judgment test is thus satisfied.

2.

The Dealers next maintain that Volvo fails to satisfy the third prong of the declaratory judgment test, the Prudential Inquiry. They contend that, even if an actual controversy existed and the district court possessed an independent basis of jurisdiction, the court nevertheless abused its discretion when it exercised jurisdiction in the North Carolina Litigation.

HN11[] If a district court possesses declaratory judgment jurisdiction, it may nonetheless, in the exercise of its discretion, decline to entertain the action. *See* *Cont'l Cas. Co., 35 F.3d at 965* (acknowledging that court **[**22]** possessed jurisdiction in declaratory judgment action and noting that critical question was whether court should have exercised its jurisdiction). The exercise of such discretion, however, is not without bounds. We have held that a district court must have "good reason" for declining to exercise its declaratory judgment jurisdiction. *Id*. As Judge Parker aptly opined years ago, a district court is obliged to rule on the merits of a declaratory judgment action when

---

[10] In its Complaint, Volvo sought a "declaratory judgment with respect to [its] rights and obligations under certain contracts ...." Complaint P 3. And, in assessing whether an actual controversy existed between Volvo and the Dealers under the Complaint, the magistrate judge observed that Volvo "runs the risk of incurring multiple liabilities if [it does] not seek judicial interpretation and clarification of [its] rights in respect to the contracts ....Without a doubt, there is an active and immediate controversy among these plaintiffs and defendants ...." *Volvo Trademark*, No. 1: 00CV238 (W.D.N.C. April 9, 2001).

[11] On February 2, 2000, Champion dealer N.A. Burkitt, Inc. initiated litigation against Volvo in the District of Maine alleging, *inter alia*, that Volvo's termination of its dealer agreement contravened the Maine Motor Vehicle Dealers Act. On August 28, 2000, a defendant in Volvo's original complaint in North Carolina (i. e., NFC) commenced litigation against Volvo in Texas, contending, *inter alia*, that Volvo could not terminate its dealer agreement without cause.

[12] The initiation of litigation against Volvo and the threats of future litigation distinguish this dispute from *North Jefferson*, a decision on which the Dealers rely. There, the district court determined that a controversy was not present under the Declaratory Judgment Act because the defendant had not taken any action, even of a preliminary nature, against the plaintiff, and the defendant had not indicated that it intended to take any future legal action against the plaintiff. *N. Jefferson, 94 F. Supp. 2d at 718*. *See generally* *GTE Directories Pub. Corp. v. Trimen Am., Inc., 67 F.3d 1563 (11th Cir. 1995)* (holding that threat of future litigation gives rise to actual controversy).

declaratory relief "will serve a useful purpose in clarifying and settling the legal relations in issue," and "will terminate and afford relief from the uncertainty, insecurity, and controversy giving rise to the proceeding." *Aetna Cas. & Sur. Co. v. Quarles, 92 F.2d 321, 325 (4th Cir. 1937)*. And we have often observed that "'district courts have great latitude in determining whether to assert jurisdiction over declaratory judgment actions.'" *United Capitol Ins. Co. v. Kapiloff, 155 F.3d 488, 493 (4th Cir. 1998)* (quoting *Aetna Cas. & Sur. Co. v. Ind-Com Elec. Co., 139 F.3d 419, 422 (4th Cir. 1998)*). In these circumstances, the district court did not abuse its discretion. **[**23]** Its Opinion served several useful purposes: it clarified and settled Volvo's legal obligations under the Dealer Agreements, it eliminated uncertainty regarding those agreements, and it clarified the contractual rights of the parties. [13]

[24]** The Dealers, relying on the Supreme Court's decision in *Colorado River Water Conservation District v. United States, 424 U.S. 800, 817, 47 L. Ed. 2d 483, 96 S. Ct. 1236 (1976)*, maintain that principles of efficiency and comity compelled the district court either to dismiss or abstain from Volvo's declaratory judgment action, in the interests of conserving judicial resources and comprehensively disposing of the litigation. We recognize that ***HN12***[] the federal trial courts should weigh the legitimate concerns of efficiency and comity when deciding whether to award declaratory relief. *Id*. As the Dealers acknowledge, however, "the first suit should have priority, **[*595]** absent the showing of balance of convenience in favor of the second action." *Ellicott Mach. Corp. v. Modern Welding Co., Inc., 502 F.2d 178, 180 n. 2 (4th Cir. 1974)* (internal quotation marks and citation omitted). In this situation, as there has been no such showing, the court did not abuse its discretion in declining to defer to the Arkansas proceeding.

B.

The Dealers next maintain that Volvo breached its contractual obligations when it terminated the Dealer Agreements under its programs of Volvoization and **[**25]** Dealer Rationalization. More specifically, the Dealers contend that Volvo breached the Dealer Agreements when it began placing Volvo labels on Champion Motor Graders and when it refused to provide the Dealers with an inventory of Champion Motor Graders. As explained below, we disagree.

First and foremost, Volvo's termination of the Dealer Agreements did not constitute a breach of contract because the Without Cause Provision authorized Volvo to act as it did. When Volvo acquired Champion in 1997, Volvo assumed Champion's rights and obligations under the Dealer Agreements. Volvo was, therefore, entitled to terminate the Dealer Agreements under the Without Cause Provision. [14]

---

[13] The factual predicate underlying this appeal is analogous to the factual underpinnings of *Kapiloff*. There, we concluded that a "declaratory judgment action is designed to allay exactly the sort of uncertainty that flows from the threat that ambiguous contractual rights may be asserted," and we observed that a "declaratory judgment action allows the uncertain party to gain relief from the insecurity caused by a potential suit waiting in the wings." *Kapiloff, 155 F.3d at 494*.

The Dealers acknowledge that a federal court may exercise its declaratory judgment jurisdiction when a plaintiff is seeking a declaration to avoid the accrual of potential damages for past actions. *See Tempco Elec. Heater Corp. v. Omega Eng'g, Inc., 819 F.2d 746, 749 (7th Cir. 1987)* (observing that declaratory judgment is available where party desires declaration of legal effect of proposed or past course of action). In this dispute, Volvo was seeking such a declaration.

[14] Volvo also contends that, in the absence of the Without Cause Provision, its terminations of the Dealer Agreements would not constitute breaches of contract because "the Market Withdrawal Provision contemplates the possibility that Champion could completely disappear from the marketplace without liability following a discontinuation of the CHAMPION line of motor graders." The Market Withdrawal Provision provides:

> Champion reserves the right at any time to change models, classification of models and specifications, or add to or discontinue any products or product lines without notice to [Dealer or Distributor] and without incurring any obligation to incorporate such changes in any other products.

CLM, Clark, and FEC Dealer Agreements § 27. According to Volvo, any interpretation of the Market Withdrawal Provision that would not permit Champion to withdraw from the marketplace would render meaningless the phrase "discontinue any product or product lines." The Dealers contend, however, that in order to "withdraw from the market," Volvo would have to cease producing

[26]** The Dealers do not contend that the express terms of the Dealer Agreements preclude Volvo from terminating their dealer contracts without cause. Instead, they contend that the Without Cause Provision is ambiguous and that the district court was obligated to look beyond the Dealer Agreements in determining Volvo's contractual obligations. Under South Carolina and Ontario law, which apply to CLM's and Clark's contract claims, the court did not err because (1) the Without Cause Provision is clear and unambiguous; (2) the Dealer Agreements were integrated instruments; and (3) oral promises, course of dealing, and industry custom can not alter the plain and unambiguous terms of the integrated Dealer Agreements. *See* *U.S. Leasing Corp. v. Janicare, Inc., 294 S.C. 312, 364 S.E. 2d 202, 205 (S.C. Ct. App. 1988)* (providing that, under South Carolina law, if contract contains language that imports complete legal obligation, parol or extrinsic evidence is not admissible to add to contract); *Gutierrez v. Tropic Int'l Ltd.*, 63 O.R. 3d 63, 73 (Ont. C.A. 2002) (providing that, under Ontario law, evidence of collateral **[*596]** agreement is not admissible to contradict **[**27]** terms of integrated contract).

1.

Because the terms of the Dealer Agreements favor the legal position advanced by Volvo, the Dealers emphasize a series of oral promises allegedly made by Champion representatives before the Dealer Agreements were made. ***HN13***[] In South Carolina and Ontario, however, the parol evidence rule precludes the use of extrinsic evidence of prior or contemporaneous negotiations to alter, contradict, or explain the terms of the Dealer Agreements, provided the agreements are complete, unambiguous and unconditional. *See* *Gilliland v. Elmwood Prop., 301 S.C. 295, 391 S.E. 2d 577, 581 (S.C. 1990)* (applying South Carolina law); *Gutierrez*, 63 O.R. 3d at 71 (applying Ontario law). Unless the Dealer Agreements are ambiguous or incomplete, oral promises or representations made to the Dealers by Champion representatives prior to execution of the Dealer Agreements have no effect on those agreements. In their appeal, the Dealers maintain that the Dealer Agreements are both ambiguous and incomplete and that the district court erred by not incorporating Volvo's oral promises into them. As explained below, we disagree.

a.

The Dealers first maintain **[**28]** that the Without Cause Provision is ambiguous and that the district court should have looked beyond the four corners of the Dealer Agreements in determining Volvo's contractual obligations. The Without Cause Provision provides that "Champion *may* terminate [the] agreement at any time *without cause* by written notice of termination …." CLM, Clark, and FEC Dealer Agreements § 24.4 (emphasis added). The Dealers contend that this terminology is ambiguous because it fails to define the terms "may" and "without cause" as they are used therein. To the contrary, however, there is nothing ambiguous about the term "may," and there is no ambiguity in any of the other operative terms in the Without Cause Provision. Those terms are easily and commonly understood in the English language - contract terms are rarely more plainly stated. See *Cromeens, Holloman, Sibert, Inc. v. AB Volvo, 349 F.3d 376, 2003 WL 22519825, at *13 (7th Cir. 2003)* (declaring contract language permitting dealer agreement to be terminated at any time without cause to be unambiguous). [15]

---

motor graders at the Champion factory - the simple act of relabeling does not constitute a withdrawal from the marketplace. As the district court observed, however:

> Volvo did not terminate the dealership contracts by virtue of discontinuing Champion Road motor graders or withdrawing that product from the market; the contracts were terminated pursuant to the provision … for termination without cause.

Opinion at 543-44.

[15] The Seventh Circuit's decision in *Cromeens* was filed on November 7, 2003, a month after this appeal was argued. One of the issues in *Cromeens* was whether, under their programs of Volvoization and Dealer Rationalization, AB Volvo, Volvo Excavators AB, and Volvo Construction Equipment NV could terminate the dealers of Samsung construction equipment without cause. The dealer agreements in *Cromeens* contained a termination clause analogous to the Without Cause Provision. *Cromeens, 349 F.3d 376, 2003 WL 22519825, at *11*. On appeal, the Samsung dealers maintained that the "without cause" provision in the Samsung dealer agreements was ambiguous. The Seventh Circuit rejected this contention, ruling that the language of the "without cause" provision "could not be more plain." *349 F.3d 376, [WL] at *13*. The Seventh Circuit then concluded that the dealer agreements unambiguously permitted termination of the Samsung dealers without cause. *Id*.

[29]** The Dealers contend, however, that the ambiguity of the Without Cause Provision is apparent when examined in the context of Section 24 of the Dealer Agreements. More specifically, the Dealers maintain that the "may terminate" language of the Without Cause Provision contrasts sharply with the "shall terminate automatically" language found in Subsection 24.5. As the district court noted in its Opinion, however, this distinction relates **[*597]** to the fact that termination under the Without Cause Provision is discretionary and occurs only after sixty days notice. Opinion at 545. A termination under Subsection 24.5, by contrast, is non-discretionary, and it occurs automatically upon the occurrence of a certain event, such as when a dealer files for bankruptcy.

The Dealers also maintain that the ambiguity of the term "without cause" is apparent when examined in the context of Section 24. The Dealers contend that, because Section 24 otherwise provides when Champion can terminate the Dealer Agreements for cause, the term "cause" in the Without Cause Provision should be interpreted to mean a cause not otherwise provided for in Section 24. As the Eleventh Circuit has observed, however, ***HN14***[] the fact **[**30]** that both "with cause" and "without cause" termination provisions are contained in the same section of a contract only shows that the parties differentiated between termination for cause and termination without cause. And when a contract contains both "for cause" and "without cause" provisions, a party may terminate a contract, even in the absence of breach or fault by the other party, pursuant to the without cause provision. *Harris Corp. v Giesting & Assocs., Inc., 297 F.3d 1270, 1273 (11th Cir. 2002)*. We agree with the district court; the Without Cause Provision is "clear, specific and unambiguous." Opinion at 546.

b.

The Dealers next maintain that, because the Dealer Agreements are incomplete, evidence of promises made by Champion representatives prior to execution of the Dealer Agreements are not barred by the parol evidence rule. In this regard, ***HN15***[] a court applying South Carolina or Ontario law is obliged to consider a writing as complete if "the writing on its face appears to express the whole agreement." *U.S. Leasing Corp., 364 S.E. 2d at 205*; G.H.L. Fridman, *Law of Contract in Canada* 22 (4th ed. 1999). In addition, we are entitled to **[**31]** consider an integration clause in weighing whether contracting parties intended a written contract to constitute the entirety of an agreement. *Gilliland, 391 S.E. 2d at 581*; *Gutierrez*, 63 O.R. 3d at 73. In this situation, the Dealer Agreements are detailed and explicit, and each contains the Integration Clause providing that the writing is "the entire and only agreement between the parties respecting the …purchase and distribution" by the Dealers of Champion products and parts. [16] Furthermore, the Dealer Agreements emphasize that "terms or conditions in connection therewith not incorporated herein shall not be binding upon either party." Finally, the agreements provide that they cancel, terminate, and supersede all previous agreements entered into between the parties. CLM and Clark Dealer Agreements § 32.1; FEC Dealer Agreement § 33.1.

[32]** In these circumstances, the Dealer Agreements are both unambiguous and integrated. As such, we agree with the district court on the parol evidence issue. **[*598]** The parol evidence rule bars the Dealers from utilizing oral representations made prior to contract execution to modify or contradict the terms of the Dealer Agreements. Opinion at 546.

2.

The Dealers next maintain that subsequent oral promises, made by Champion and Volvo representatives *after* the Dealer Agreements were executed, altered the terms thereof. Volvo acknowledges that the parol evidence rule does not bar the use of such promises; it maintains, however, that the Modification Clause precludes their use here.

---

[16] The Integration Clause specifically provides:

> This agreement and [any] accompanying Exhibits contain the entire and only agreement between the parties respecting the sale to and purchase and distribution by [Dealer or Distributor] of Products and Parts, and any representations, terms or conditions in connection therewith not incorporated herein shall not be binding upon either party. This agreement wholly cancels, terminates and supersedes any agreement heretofore entered into between the parties, or their successors or assigns, pertaining to Products and Parts.

CLM and Clark Dealer Agreements § 32.1; FEC Dealer Agreement § 33.1.

Pursuant to the Modification Clause, any modification of a Dealer Agreement is invalid unless it is in writing and signed by an authorized Champion officer. [17] In response to Volvo's reliance on the Modification Clause, the Dealers assert that a "no oral modification clause" may itself be orally modified, validating subsequent unwritten modifications. This position must also fail, however, because, **HN16**[] pursuant to South Carolina and Ontario law, an oral modification of a written contract must be supported by separate **[**33]** and adequate consideration. *See* Evatt v. Campbell, 234 S.C. 1, 106 S.E. 2d 447, 449-50 (S.C. 1959) (observing that written contract may be changed by subsequent parol agreement supported by valuable consideration); *Francis v. Canadian Imperial Bank of Commerce*, 21 O.R. 3d 75, 83 (Ont. C.A. 1994) (recognizing principle of contract law that additional consideration is required to support modification of existing agreement).

The Dealers' sole basis for contending that they provided separate and adequate consideration in support of modification of the Modification Clause is that they continued to market Champion Motor Graders after Champion was purchased **[**34]** by Volvo. Although the Dealers may have made good faith efforts to market Champion Motor Graders after Champion's purchase by Volvo, such efforts could not constitute consideration in support of an oral modification because, under the Best Efforts Provision, the Dealers had a preexisting contractual obligation to make such efforts. Rabon v. State Fin. Corp., 203 S.C. 183, 26 S.E. 2d 501, 502 (S.C. 1943) (observing that, **HN17**[] pursuant to South Carolina law, agreement to do what one is already legally bound to do is not sufficient consideration to support new agreement); *Francis*, 21 O.R. 3d at 82 (observing that, under Ontario law, agreement to perform preexisting duty does not constitute new consideration). In such circumstances, the Dealers' contention of subsequent oral modification of the Dealer Agreements must fail.

3.

In their final effort to convince us to read additional terms into the Dealer Agreements, the Dealers contend that, in defining the parties' obligations under the Dealer Agreements, we should look to the course of dealing between the parties and to industry custom regarding heavy equipment dealer franchises. **HN18**[] Although courts commonly **[**35]** look to evidence of the course of dealing and to industry custom and usage in assessing ambiguous contract terms, under South Carolina and Ontario law, "extrinsic evidence of a usage or custom is not admissible where the contract expresses the intent of the parties in clear and unambiguous **[*599]** language." U.S. Leasing Corp., 364 S.E. 2d at 206; *see Gutierrez*, 63 O.R. 3d at 71 (concluding that extrinsic evidence is not admissible to vary terms of clear and unambiguous contract). The terms of the Dealer Agreements are clear and unambiguous, and we must decline to modify them on the basis of either course of dealing or industry custom.

4.

Finally, the Dealers contend that Volvo breached its implied duty of good faith and fair dealing when it refused to supply them with Champion Motor Graders. **HN19**[] In South Carolina and Ontario, however, there can be no breach of an implied covenant of good faith and fair dealing where "a party to a contract [does] what provisions of the contract expressly [give] him the right to do." Adams v. G.J. Creel & Sons, Inc., 320 S.C. 274, 465 S.E. 2d 84, 85 (S.C. 1995); *see Peel Condo. Corp. No. 505 v. Cam-Valley Homes, Ltd.*, 53 O.R. 3d 1, 16 (Ont. C.A. 2001) **[**36]** (holding that covenant of good faith and fair dealing is circumscribed by terms of contract). In this regard, the Dealer Agreements gave Champion, and therefore Volvo, the right to terminate the Dealer Agreements without cause. In terminating the Dealer Agreements, then, Volvo could not have breached its duty of good faith and fair dealing.

C.

---

[17] The Modification Clause provides:

> This agreement, and any modification, renewal, waiver, extension or termination hereof, shall not be valid unless in writing and signed by a duly authorized officer of Champion.

FEC Dealer Agreement § 33.2; CLM and Clark Dealer Agreements § 32.2 (omitting "waiver").

The Dealers maintain that, even if the Dealer Agreements are completely integrated contracts unmodified by the promises of Champion and Volvo representatives, Volvo is estopped from breaching its oral promises. The Dealers' estoppel theory is without merit. ***HN20***[] Promissory estoppel is simply not a cause of action recognized in Ontario. *See Gilbert Steel, Ltd. v. Univ. Constr., Ltd.*, 12 O.R. 2d 19, 23 (Ont. C.A. 1976) ("Estoppel can never be used as a sword but only as a shield. A plaintiff cannot found his claim in estoppel."). And in South Carolina, equitable relief is precluded under a theory of promissory estoppel if the estoppel claim is in direct conflict with a specific contract term. *See Charleston County Sch. Dist. v. Laidlaw Transit, Inc., 348 S.C. 420, 559 S.E. 2d 362, 364-65 (S.C. Ct. App. 2001)* (holding **[**37]** that party who acknowledges being bound by contract cannot recover in equity under theory of promissory estoppel if estoppel claim is in direct conflict with contract term). CLM's and Clark's estoppel claims are barred under South Carolina law, therefore, because they conflict with the Without Cause Provision.

D.

We next turn to the Dealers' contentions regarding the State Statutes. The Dealers maintain that, notwithstanding the Without Cause Provision, Volvo was prohibited by the State Statutes from terminating the Dealer Agreements without good cause. More specifically, Clark contends that the Arkansas Franchise Act (the "Arkansas Act") prohibited Volvo from terminating its Dealer Agreement (*Ark. Code § 4-72-201, et seq.)*; CLM maintains that Volvo's termination of its Dealer Agreement was prohibited by the Louisiana Dealer Act (the "Louisiana Act"; *La. Rev. Stat. § 51: 481, et seq.*); and FEC alleges that both the Texas Farm, Industrial and Outdoor Power Equipment Dealer Act (the "Equipment Act"; *Tex. Bus. & Com. Code § 19.01, et seq.*) and the Texas Deceptive Trade Practices and Consumer Protection **[**38]** Act (the "DTPA"; *Tex. Bus. & Com. Code § 17.41, et seq.*) precluded Volvo's termination of its Dealer Agreement.

HN21[] A federal court exercising diversity jurisdiction is obliged to apply the **[*600]** substantive law of the state in which it sits, including the state's choice-of-law rules. *See Erie R.R. Co. v. Tompkins, 304 U.S. 64, 79, 82 L. Ed. 1188, 58 S. Ct. 817 (1938)*; *Klaxon Co. v. Stentor Elec. Mfg. Co., Inc., 313 U.S. 487, 496, 85 L. Ed. 1477, 61 S. Ct. 1020 (1941)* (observing that forum state's choice-of-law rules are substantive). And when a lawsuit is transferred from one federal court to another pursuant to *28 U.S.C. § 1404(a)*, the transferee court is obliged to apply the choice-of-law rules that the transferor court would have applied. *Van Dusen v. Barrack, 376 U.S. 612, 632-37, 11 L. Ed. 2d 945, 84 S. Ct. 805 (1964)*. This transfer, however, was not a typical *§ 1404(a)* convenience-of-the-witnesses transfer. Instead, the Arkansas Litigation was transferred to North Carolina because the North Carolina court declined to defer to the Dealers' later filed Arkansas case. The North Carolina Litigation was first filed, venue was **[**39]** proper in the Western District of North Carolina, and that court possessed jurisdiction over all the parties. The North Carolina court's decision that it need not defer to the Arkansas court, therefore, was entirely proper. Under these circumstances, and in light of the principles animating the Supreme Court's decision in *Van Dusen*, we are not at all sure that the *Van Dusen* precedent should be blindly and mechanically applied, as the Dealers would have us do. *See Van Dusen, 376 U.S. at 635-36* ("The legislative history of *§ 1404(a)* certainly does not justify the rather startling conclusion that one might get a change of law as a bonus for a change of venue. Indeed, an interpretation accepting such a rule would go far to frustrate the remedial purposes of *§ 1404(a)*. If a change of law were in the offing, the parties might well regard the section primarily as a forum-shopping instrument.").

Moreover, the claims asserted by the Dealers in the Arkansas Litigation are mirror images of their counterclaims in the North Carolina Litigation. Thus, applying Arkansas law to the Arkansas claims and North Carolina law to the North Carolina counterclaims could (in theory, **[**40]** at least) lead to different results on identical claims. It therefore seems clear that the choice-of-law rules of only one state should be applied to this action. For example, in *Boardman Petroleum, Inc. v. Federated Mutual Insurance Co., 135 F.3d 750 (11th Cir. 1998)*, an insurer and its insured filed separate actions in the federal courts of different states, both raising the question of whether coverage existed under an insurance policy. The insurer's action was transferred from South Carolina to Georgia, where the insured's action was pending, and the proceedings were consolidated. The Eleventh Circuit applied *Van Dusen* but nonetheless concluded that "of necessity, only one state's law may be applied" to the consolidated case. *Id. at 753*; *see also Bott v. Am. Hydrocarbon Corp., 441 F.2d 896, 899-900 (5th Cir. 1971)* ("When the California action was transferred to Texas the California law went with it. But this is only the first step, because the Texas District Court found pending before it two separate but identical actions between the same parties, which it consolidated. …The Texas court could not try the consolidated **[**41]** cases under two sets of laws if to do so would produce differing results. If there was a conflict, it was required to make a choice of law.").

In any event, we need not definitively decide how this thorny issue should be resolved, because the choice-of-law principles of North Carolina and Arkansas are sufficiently similar that the outcome of this dispute would be the same under either set of rules. Both North Carolina and Arkansas typically give effect to contractual **[*601]** choice-of-law provisions. *See* *Torres v. McClain, 140 N.C. App. 238, 535 S.E. 2d 623, 625 (N.C. App. 2000)* (holding that parties' choice of law is generally binding); *In re Jones, 231 B.R. 66, 68 (Bankr. E.D. Ark. 1999)* (observing that Arkansas courts will generally uphold contract's choice of law). In addition, as discussed in more detail later, both Arkansas and North Carolina rely on the Restatement (Second) of Conflict of Laws (1971) (the "Second Restatement") to determine the circumstances under which a contractual choice-of-law provision will be given effect. *See* *Cable Tel Servs., Inc. v. Overland Contracting, Inc., 154 N.C. App. 639, 574 S.E. 2d 31, 33-34 (N.C. Ct. App. 2002)*; **[**42]** *S. Farm Bureau Cas. Ins. Co. v. Craven, 79 Ark. App. 423, 89 S.W. 3d 369, 372 (Ark. Ct. App. 2002)*. Accordingly, in the interest of simplicity, and because it will not affect the outcome of this proceeding, we will approach this dispute through the prism of North Carolina's choice-of-law rules.

In support of their contentions regarding the State Statutes, the Dealers rely on ***HN22***[] the presumptive rule of *lex loci contractus*, that is, the interpretation of a contract is governed by the law of the place where it was made. *See* *Tanglewood Land Co., Inc. v. Byrd, 299 N.C. 260, 261 S.E. 2d 655, 656 (N.C. 1980)* (observing presumption that interpretation of contract is governed by law of place where contract was made). Under North Carolina law, however, such a presumption may be overcome by the presence of a choice-of-law provision in a contract. *See* *Bueltel v. Lumber Mut. Ins. Co., 134 N.C. App. 626, 518 S.E. 2d 205, 209 (N.C. App. 1999)* (noting that, when contract contains choice-of-law provision, parties intended exception to presumptive rule that law of place where contract made governs). In this situation, the Dealer Agreements each contain **[**43]** a Choice-of-Law Provision. [18]

Recognizing the difficultly presented by that provision, the Dealers attack Volvo's position that the Dealer Agreements are governed solely by South Carolina and Ontario law. First, the Dealers contend that the Local Law Provision is also a choice-of-law clause and that, pursuant thereto, the Dealer Agreements are governed by the State Statutes. Second, the Dealers maintain that, if **[**44]** the Dealer Agreements are not governed by the State Statutes under the Local Law Provision, the Choice-of-Law Provision is invalid because the law selected thereunder contravenes the fundamental policies of their home states. We address these contentions below.

1.

The Dealers first contend that there are, in effect, two choice-of-law clauses in each Dealer Agreement - the Choice-of-Law Provision (§ 29) and the Local Law Provision (§ 30). The Dealers maintain that these two clauses are reconcilable because the drafters of the Dealer Agreements could have intended the Choice-of-Law Provision to be applicable only in the absence of local law governing the agreements. The Dealers contend that, because these two provisions are reconcilable, it would be error to give effect to **[*602]** one clause but not the other. As explained below, these contentions are without merit.

---

[18] The Choice-of-Law Provision in the Clark and CLM Dealer Agreements provides:

> This Agreement has been formalized in South Carolina, and the rights, duties and obligations of the parties as set forth herein shall be determined according to the laws of the State of South Carolina.

CLM and Clark Dealer Agreements § 29. The Choice-of-Law Provision in the FEC agreement provides:

> This Agreement and the rights and obligations of the parties hereunder shall be governed by and construed in accordance with the laws of the Province of Ontario.

FEC Dealer Agreement § 29.

Under the Local Law Provision, the rights and obligations created by the Dealer Agreements are subject to all applicable laws, orders, and regulations of governments and government agencies having jurisdiction over the parties. If a contracting party believes that a local law substantially alters the relationships established **[**45]** by its Dealer Agreement, that party may request the other party to modify the agreement. [19] According to Volvo, the State Statutes, if applied, would effectively nullify the Without Cause Provision, substantially altering the relationship between Champion and the Dealers. We agree.

[46]** The Local Law Provision provides a ready mechanism for the Dealers to request that the Dealer Agreements be modified. If the Dealers had viewed the State Statutes as substantially altering the relationships between the parties under the Dealer Agreements, they were entitled to request Champion (or Volvo) to modify the agreements; the Local Law Provision expressly provided them with this right. The Dealers did not, however, seek to modify the Dealer Agreements so that they could be terminated only "for good cause," and they cannot now maintain that, under the Local Law Provision, they are protected by the State Statutes. [20]

[47]** 2.

In their second assault on the Choice-of-Law Provision, the Dealers maintain that application of South Carolina law (under the Clark and CLM Dealer Agreements) and Ontario law (under the FEC Dealer Agreement) is unreasonable and contravenes the fundamental policies of Arkansas, Louisiana, and Texas. ***HN23***[] Despite North Carolina's adherence to the presumptive rule of *lex loci contractus*, contracting parties in North Carolina are entitled to agree that a particular jurisdiction's substantive law will govern their contract, and such a provision will generally be given effect. *See* Torres, 535 S.E. 2d at 625 (holding that parties' choice of law is generally binding). [21] In certain circumstances, **[*603]** however, North Carolina will decline to honor a choice-of-law provision. North Carolina relies on the Second Restatement to determine whether such circumstances are present. *See* Cable Tel Servs., 574 S.E. 2d at 33-34. Pursuant to § 187 of the Second Restatement, a choice-of-law provision will not be enforced if either of the following two conditions is satisfied:

> (a) the chosen state *has no substantial relationship* to the parties or the transaction **[**48]** and there is no other reasonable basis for the parties' choice, or
>
> (b) application of the law of the chosen state would be *contrary to a fundamental policy* of a state which has a materially greater interest than the chosen state in the determination of the particular issue ….

---

[19] The Local Law Provision provides:

> The rights and obligations of the parties hereto shall be subject to all applicable laws, orders, regulations, directions, restrictions and limitations of governments and government agencies having jurisdiction over the parties hereto. In the event that [a local] law, order, regulation, direction, restriction or limitation, appropriation, …or interpretation thereof shall, in the judgment of either party hereto substantially alter the relationship between the parties under this Agreement or the advantages derived from such relationship, *either party may request the other hereto to modify this Agreement*.

CLM, Clark, and FEC Dealer Agreements § 30 (emphasis added).

[20] In support of their contention that the Local Law Provision mandates that the State Statutes govern the Dealer Agreements, the Dealers rely on two decisions, Sutter Home Winery, Inc. v. Vintage Selections, Ltd., 971 F.2d 401 (9th Cir. 1992), and Lake Charles Diesel, Inc. v. General Motors Corp., 328 F.3d 192 (5th Cir. 2003). Their reliance on these decisions, however, is misplaced. The agreement at issue in *Sutter Home* expressly provided that, "*except as otherwise required by applicable law*, this Agreement shall be governed by the law of the State of California." Sutter Home, 971 F.2d at 406 (emphasis added). This language is absent from the Dealer Agreements. The agreement at issue in *Lake Charles* provided that "any provision which contravenes the laws of any state or jurisdiction where this Agreement is to be performed will be deemed not a part of this Agreement in such state or jurisdiction." Lake Charles, 328 F.3d at 197 n. 10. No such provision exists in the Dealer Agreements.

[21] We recognize that the "Supreme Court has consistently accorded choice of forum and choice of law provisions presumptive validity." Allen v. Lloyd's of London, 94 F.3d 923, 928 (4th Cir. 1996).

Second Restatement *§ 187* (emphasis added). The Dealers maintain that the Choice-of-Law Provision does not apply here because it contravenes both prongs of the *§ 187* test. They contend, first, that there is no substantial relationship between South Carolina and the Clark and CLM Dealer Agreements (the "Substantial Relationship" issue), and, second, that application of South Carolina or Ontario law to those agreements would contravene the fundamental policies of Arkansas, Louisiana, and Texas (the "Fundamental Policy" issue).

[49]** Before addressing this aspect of the Dealers' assault on the Choice-of-Law Provision, we must assess whether Volvo is correct in its contention that the Substantial Relationship and Fundamental Policy issues were not properly raised in the district court. If those issues are properly before us, we must determine whether the Dealers are protected by the State Statutes.

a.

Volvo contends that the Substantial Relationship and Fundamental Policy issues were not raised in the district court. ***HN24***[] Absent exceptional circumstances, of course, we do not consider issues raised for the first time on appeal. *Williams v. Prof'l Transp. Inc., 294 F.3d 607, 614 (4th Cir. 2002)* (citing *Muth v. United States, 1 F.3d 246, 250 (4th Cir. 1993)*). Indeed, we consider such issues on appeal only when the failure to do so would result in a miscarriage of justice. *Muth, 1 F.3d at 250*.

In support of its contention, Volvo relies on an observation in the Opinion that the Dealers and the Dealer Agreements may not bear a reasonable relationship to South Carolina or Ontario. The court declined to decide whether such a reasonable relationship existed, however, concluding **[**50]** that the Dealers had not raised the Substantial Relationship issue. Opinion at 542 n. 5. The Dealers maintain that Volvo has mischaracterized the record on this point, and they contend that the Substantial Relationship and Fundamental Policy issues were raised in the district court. In support of their position that these issues were properly raised, the Dealers point to memoranda filed on October 23, 2002 (the "October Response"), in which they maintained:

> all the Dealers are protected by dealer protection statutes enacted by their own state legislatures to protect them from the precise action that Volvo is seeking to undertake. …all but one of the applicable statutes contain 'non-waiver' provisions - meaning that the contract simply cannot be seen as circumventing the statute.

In the October Response, the Dealers asserted that, because some of the State Statutes contain anti-waiver provisions, the Dealers are protected by them, despite the presence of the Choice-of-Law **[*604]** Provision in the Dealer Agreements. ***HN25***[] In assessing whether an issue was properly raised in the district court, we are obliged on appeal to consider any theory plainly encompassed by the submissions **[**51]** in the underlying litigation. *See* *Maynard v. Gen. Elec. Co., 486 F.2d 538, 539 (4th Cir. 1973)*. In this circumstance, the October Response plainly encompasses the contention that certain of the State Statutes contain anti-waiver provisions (namely the Arkansas Act, the Texas Equipment Act, and the Texas DTPA), and that protection of the Dealers under these statutes cannot be circumvented by the Choice-of-Law Provision. We will therefore consider this contention on appeal. The Dealers acknowledged in the October Response, however, that one of the State Statutes (i.e., the Louisiana Act) does not contain an anti-waiver clause. Rather than raising the issue of whether the Louisiana Act sets forth a fundamental policy of Louisiana, and therefore trumps the Choice-of-Law Provision, the Dealers asserted that the Act governs CLM's Dealer Agreement because of the Local Law Provision. Although the Dealers failed to assert in the district court that the Louisiana Act expresses a fundamental policy of Louisiana, the court addressed this point in determining whether the Louisiana Act precluded Volvo's termination of the CLM Dealer Agreement without cause. Opinion at 554. Because **[**52]** the question of whether the Louisiana Act expresses fundamental state policy was decided by the district court, that issue is properly before us on appeal. *Home Health Servs., Inc. v. Currie, 706 F.2d 497, 498 (4th Cir. 1983)* (observing that ***HN26***[] issue may be considered on appeal if it was argued below or specifically decided by district court).

We next consider whether the Substantial Relationship issue was properly raised below. On this point, the pleadings fail to plainly encompass the contention that there is no substantial relationship between the law selected under the Choice-of-Law Provision, on the one hand, and the parties or the Dealer Agreements, on the other. We therefore agree with the district court - the Dealers did not properly raise the Substantial Relationship issue below.

Opinion at 542 n. 5. Moreover, the Dealers have presented us with no reason to believe that declining to address this issue on appeal will result in a miscarriage of justice.

b.

Next, before assessing whether the State Statutes constitute fundamental policies of Arkansas, Louisiana, or Texas and thus govern the Dealer Agreements, we must decide whether the Dealers are protected **[**53]** parties under those statutes. If a Dealer is protected by one of the State Statutes, we must then determine whether the statute also applies to Champion Motor Graders.

(1)

We first consider whether FEC can assert a claim under ***HN27***[] the Texas Equipment Act, which provides that a manufacturer may not terminate a dealer agreement except for cause. *Tex. Bus. & Com. Code § 19.41*. As the district court ruled, however, FEC cannot state a claim under the Texas Equipment Act because FEC is not a party protected by it. When FEC acquired its Champion dealership in 1996, the Texas Equipment Act excluded from its protection those ***HN28***[] "persons whose principal business is the sale of off-road construction equipment." *Id*. *§ 19.01(5)* (originally enacted as Act of May 19, 1991, 72nd Leg., ch. 119, § 1), *amended by* Act of Sept. 1, 1999, 76th Leg., ch. 725, § 2. The court concluded that FEC could not state a claim under the Texas Equipment Act **[*605]** because Champion Motor Graders constituted offroad construction equipment. [22] Opinion at 553. We agree. Because FEC is unable to state a claim under the Texas Equipment Act, we need not address the question of whether its provisions **[**54]** constitute a fundamental policy of Texas.

(2)

We next turn to the issue of whether FEC can state a claim under ***HN29***[] the Texas DTPA, which provides protection only to "consumers." *See* *Kennedy v. Sale, 689 S.W.2d 890, 892-93, 28 Tex. Sup. Ct. J. 377 (Tex. 1985)* (noting that DTPA is designed to protect only "consumers," as that term is defined therein). Under the DTPA, "a consumer is one who seeks or acquires, by purchase or lease, any goods **[**55]** or services." *Rayford v. Maselli, 73 S.W. 3d 410, 411 (Tex. App. 2002)* (citing *Tex. Bus. & Com. Code Ann. § 17.45(4)*). On appeal, FEC maintains that it is a consumer under the DTPA, and that the district court erred in ruling that it could not state a claim under that statute. In assessing whether the court erred in so ruling, we must ascertain and follow the substantive law of Texas. *See* *Erie, 304 U.S. at 78-79*.

In its Opinion, the court relied heavily on the Texas decision in *Fisher Controls International, Inc. v. Gibbons, 911 S.W.2d 135 (Tex. App. 1995)*, and it ruled that FEC was not a consumer under the DTPA. [23] In *Fisher*, the owner ("Gibbons") of a company engaged in the resale of valves and instruments ("ACI") sued the company's supplier ("Fisher"), alleging a violation of the DTPA. ACI was an independent sales representative for Fisher. In his DTPA claim, Gibbons alleged that Fisher had falsely promised to extend ACI's agreement beyond the three years expressly provided in its contract, and that Fisher failed to inform ACI of Fisher's long-term business plan to

---

[22] In 1999, the Texas Legislature amended the Texas Equipment Act so that a "dealer" under the Act included dealers engaged in the retail sale of off-road construction equipment. The Legislature provided, however, that "an agreement entered into before the effective date of this Act [Sept. 1, 1999] *is governed by the law in effect on the date the agreement was entered into* …." 1999 Tex. Gen. Laws § 4, 76th Leg., Ch. 725 (emphasis added). FEC acquired its Champion dealership in 1996; thus the 1999 amendments to the Texas Equipment Act have no application to its Dealer Agreement.

[23] The Supreme Court of Texas, the court possessing the final authority in all Texas civil cases, has not addressed the issue of whether, pursuant to a dealer agreement analogous to FEC's, a vendee is a consumer under the DTPA. Because there is no reason to believe the Supreme Court of Texas would disagree with the Texas Court of Appeals (an intermediate appellate court of Texas) on this issue, we must rely on that court in discerning Texas law. *See* *West v. Am. Tel. & Tel. Co., 311 U.S. 223, 237, 85 L. Ed. 139, 61 S. Ct. 179 (1940)* (holding that ***HN30***[] state intermediate appellate court's judgment on rule of law is datum for ascertaining state law and should not be disregarded by federal court unless it is convinced by persuasive data that highest court of state would decide otherwise).

terminate its independent representatives **[**56]** (such as ACI). *Id. at 139* n. 1. Although the jury found for Gibbons, the trial court granted judgment notwithstanding the verdict, concluding that ACI was not a consumer under the DTPA.

The Texas Court of Appeals **[**57]** began its analysis of whether ACI was a consumer by noting that ACI was authorized, under the agreement, to "buy Fisher products at a discount and resell them on its own behalf." *Id. at 139*. The court ruled, however, that despite being authorized to buy Fisher products, ACI was not a consumer under the DTPA. The court observed that ACI's DTPA complaint was premised on ACI's "intangible property right …to act as Fisher's sales representative under the ' **[*606]** Representative Agreement,'" rather than the quality of Fisher's products. *Id. at 138-39*. In ruling for Volvo, the district court concluded that the *Fisher* decision was controlling because there is no material distinction between the arrangement in *Fisher* and the arrangement between FEC and Volvo. [24] We agree. FEC's complaint is based on its asserted intangible right to be a Champion dealer, not the quality of Champion Motor Graders. Opinion at 552.

[58]** FEC maintains that, under the Texas decision in *Texas Cookie Co. v. Hendricks & Peralta, 747 S.W.2d 873 (Tex. App. 1988)*, it is nonetheless a consumer protected by the Texas DTPA. Under *Texas Cookie*, ***HN31***[] a business possessing an intangible right analogous to that in *Fisher* (i. e., the contract right to be a dealer of a manufacturer's goods in a certain geographic area) may be a consumer under the DTPA if (1) the business purchased the intangible right, and (2) the business's decision to purchase the right was motivated, in part, by its desire to obtain collateral services under the dealer agreement. *Fisher, 911 S.W.2d at 139* (citing *Tex. Cookie, 747 S.W.2d at 876-77*).

FEC is not a consumer under the DTPA, however, because FEC did not *purchase* an intangible right to be a Champion dealer, and the collateral services provided under the Dealer Agreement were merely incidental to the agreement. *See id*. (concluding that, because collateral services provided ACI under contact were incidental to transaction rather than its objective, ACI was not consumer under DTPA). As the district court observed, FEC does not allege that **[**59]** it paid for an intangible right to continue to be a Champion dealer, and no payment is reflected in the Dealer Agreement. Opinion at 552. In addition, receipt of collateral services provided to FEC by Champion was not an objective of the Dealer Agreement. The collateral services Champion provided to the Dealers included sales advice, catalogues, manuals, instruction booklets, and advertising signs, and the Dealer Agreement provided that all demonstration equipment furnished by Champion "remains the property of Champion." FEC Dealer Agreement § 14. These collateral services were, therefore, merely incidental to FEC's objective of being an authorized Champion dealer, and the court properly determined that FEC was not a consumer under the DTPA. Opinion at 552. As such, FEC is unable to assert a claim under the DTPA, and we need not reach the issue of whether the DTPA constitutes a fundamental policy of Texas.

(3)

Next, we assess whether Clark or CLM can state a claim under the Arkansas Act or the Louisiana Act, respectively. In the district court, Volvo maintained that Clark was not protected by the Arkansas Act and that CLM was not protected by the Louisiana Act because, pursuant **[**60]** to the Choice-of-Law Provision, Clark's and CLM's Dealer Agreements are governed by South Carolina law. Volvo did not, however, assert that the statutes in question, by their terms, fail to apply to Clark's or CLM's Dealer Agreements. Absent the Choice-of-Law Provision, Clark could state a claim under the Arkansas Act, and CLM could state a claim under the Louisiana Act. We must therefore decide whether either statute embodies a fundamental state policy.

[*607] c.

---

[24] Under both the dealer agreement in *Fisher* and FEC's Dealer Agreement, the relationship between the manufacturer and dealer was that of vendor and vendee. FEC Dealer Agreement § 21. And like the valves and instruments provided to ACI by Fisher, Champion Motor Graders were sold to FEC at dealer net prices for resale. *Id*. §§ 9.1, 12.4.

Under the Second Restatement, North Carolina will not honor a choice-of-law provision if the law of the chosen state is contrary to the fundamental policy of a state possessing a greater interest in the issue than the chosen state (the "Fundamental Policy" test). *See* Cable Tel Servs., 574 S.E. 2d at 33-34 (quoting § 187 and noting that it has been incorporated into North Carolina common law). Pursuant thereto, unless the Choice-of-Law Provision in either Clark's or CLM's Dealer Agreement satisfies the Fundamental Policy test, it does not deprive Clark or CLM of protection under the Arkansas Act or the Louisiana Act, respectively.

In this regard, Clark and CLM maintain that Volvo's termination of their Dealer **[**61]** Agreements without cause contravenes fundamental state policies. More specifically, they contend that the law selected under the Choice-of-Law Provision is contrary to the Arkansas Act and the Louisiana Act, that these statutes constitute fundamental state policy, and that the Choice-of-Law Provision therefore fails the Fundamental Policy test.

In order to determine whether the law selected under the Choice-of-Law Provision fails the Fundamental Policy test, we must first determine whether either the Arkansas Act or the Louisiana Act expresses a fundamental state policy. In addressing this issue, we begin with the proposition that ***HN32***[] not every statutory provision constitutes a fundamental policy of a state. *Cherokee Pump & Equip. Inc. v. Aurora Pump, 38 F.3d 246, 252 (5th Cir. 1994)* ("The law of a state and its public policy are not necessarily synonymous. Not every law enacted by the legislature embodies the 'public policy' of the state."). [25]

[62]** (1)

HN33[] In assessing whether a dealer protection statute expresses a state's fundamental policy, we are guided by the language of the statute, relevant court decisions, and pertinent legislative history. [26] In particular here, we are aided by several recent decisions of our sister circuits regarding similar controversies. *See* *Cromeens, 349 F.3d 376, 2003 WL 22519825* (determining that Maine franchise statute evidenced strong public policy against contracts violating franchise law, and that protection under such statute may not be waived); *Wright-Moore Corp. v. Ricoh Corp., 908 F.2d 128 (7th Cir. 1990)* (determining that Indiana franchise law expressed fundamental policy, and that protection under Indiana franchise law may not be waived); *Modern Computer Sys., Inc. v. Modern Banking Sys., Inc., 871 F.2d 734 (8th Cir. 1989)* (en banc) (holding that protection under Minnesota franchise law may be waived because law does not embody fundamental policy); *Tele-Save Merch. Co. v. Consumers Distrib. Co., Ltd., 814 F.2d 1120 (6th Cir. 1987)* (holding that protection under Ohio business statute **[*608]** may be waived because statute does not embody **[**63]** fundamental policy).

The Sixth, Seventh, and Eighth Circuits have, in their analyses of similar issues, focused on whether state dealer protection statutes contain anti-waiver provisions. The Arkansas Act contains such a provision, and Clark maintains that its inclusion reflects that the Arkansas Act constitutes a fundamental policy of Arkansas. [27] In espousing this proposition, Clark relies primarily on the Seventh Circuit's decision in *Wright-Moore*. There, the court held that an Indiana franchise statute containing an anti-waiver provision constituted a fundamental policy of Indiana and barred contracting **[**64]** parties from opting out of its protection "whether directly through waiver provisions or indirectly through choice of law." *Wright-Moore, 908 F.2d at 132*. As the Sixth and Eight Circuits have observed, however, ***HN34***[] the presence of a statutory anti-waiver provision does not *necessarily* mean that a statute embodies a state's fundamental policy. *See* *Tele-Save, 814 F.2d 1120*; *Modern Computer, 871 F.2d 734*.

---

[25] If every statutory provision expressed a state's fundamental policy, contracting parties would be entitled to apply the law of another state under the Second Restatement only when the law of the chosen state was the same as that of the state where the contract was made. *Cherokee Pump & Equip. Inc., 38 F.3d at 252* (characterizing such proposition as "ridiculous").

[26] We note that, in assessing whether the Arkansas Act or the Louisiana Act embodies a fundamental state policy, we would be bound by any relevant precedent of the Arkansas or Louisiana courts. Because there is none, and because our Court has not heretofore addressed such an issue, we are constrained to examine the decisions of our sister circuits addressing these and similar dealer protection statutes.

[27] Unlike the Arkansas Act, the Louisiana Act does not contain an antiwaiver provision.

There is no established rule for determining whether a state policy is fundamental. Although the presence of an anti-waiver provision does not necessarily mean that a dealer protection statute embodies a fundamental policy, such a provision suggests the importance the legislature attached to the statute. The strength of anti-waiver provisions in dealer protection statutes, however, varies among the states. *Wright-Moore, 908 F.2d at 134*. Following the lead **[**65]** of our sister circuits, we will determine whether the Arkansas Act expresses fundamental policy by first assessing the strength of its anti-waiver provision. *See Wright-Moore, 908 F.2d at 134*; *Modern Computer, 871 F.2d at 738*; *Tele-Save, 814 F.2d at 1122-23*; *see also Jeffries v. State, 212 Ark. 213, 205 S.W.2d 194, 196 (Ark. 1947)* (observing that, in Arkansas, public policy is determined by examining constitution, statutes, and court decisions). We will also focus on any legislative history indicating whether the Arkansas Act was intended to embody a fundamental policy of Arkansas. *See Cromeens, 376 F.3d 376, 2003 WL 22519825, at *9-10*; *see also Jordan v. Atl. Cas. Ins. Co., 344 Ark. 81, 40 S.W. 3d 254, 257 (Ark. 2001)* (observing that, ***HN35***[] in Arkansas, determination of public policy lies almost exclusively with legislature, and courts should not interfere with that determination absent palpable error). Because the Louisiana Act does not have an anti-waiver provision, we must, in seeking to determine whether the Act was intended to embody a fundamental policy of Louisiana, focus on its **[**66]** provisions and on any relevant court decisions.

(2)

In assessing whether the Louisiana Act constitutes a fundamental policy of Louisiana, we look to pertinent Louisiana judicial and legislative authorities. Because the Louisiana courts have not addressed this issue, our analysis is limited to the text of the statute. *Cherokee Pump, 38 F.3d at 253* (observing that court decisions fail to show that Louisiana Act reflects public policy of Louisiana). Unlike the dealer protection statutes of certain other states, the Louisiana Act does not contain an anti-waiver provision. More importantly, nothing in the Act indicates that it was enacted to foster or protect a fundamental policy of Louisiana. *See Cherokee Pump, 38 F.3d at 253* (observing that Louisiana Act fails to indicate that "strongly held belief" or "public policy" of Louisiana was being fostered or protected by its enactment). In this regard, the Louisiana legislature **[*609]** clearly understood the significance of a statutory provision indicating that a statute represents important state policy. For example, in the Louisiana Oilfield Indemnity Act, the legislature indicated its intent "to declare *null* **[**67]** *and void and against public policy of the state of Louisiana any provision in any agreement* which requires defense and/or indemnification, for death or bodily injury to persons, where there is negligence or fault …on the part of the indemnitee …." *La. Rev. Stat. § 9:2780* (emphasis added). No such provision is found in the Louisiana Act.

HN36[] In the absence of an anti-waiver provision in the statute, and there being no legislative finding that the Louisiana Act constitutes an important, much less a fundamental, state policy, we agree with the Fifth Circuit that the Act cannot override a choice-of-law contract provision precluding its application. *Cherokee Pump, 38 F.3d at 252*. Because the body of law selected in CLM's Choice-of-Law Provision does not fail the Fundamental Policy test, that law, rather than the Louisiana Act, governs the obligations of the parties.

(3)

Finally, we turn to the issue of whether the Arkansas Act embodies a fundamental policy of Arkansas. The Arkansas courts have not addressed this issue. We begin our analysis, therefore, by examining the text of the Arkansas Act. That Act, unlike the Louisiana Act, contains an **[**68]** anti-waiver provision, which provides that a franchisor may not ***HN37***[] "require a franchisee at the time of entering into a franchise agreement to assent to a …waiver …which would relieve any person from liability imposed by [the Arkansas Act]." *Ark. Code § 4-72-206(1)*. Although the inclusion of an anti-waiver provision in the Arkansas Act is indicative of the importance the Arkansas legislature attached to the statute, we see nothing in the provision itself to indicate that the legislature intended the Act to embody the state's fundamental policy.

The Seventh Circuit recently addressed a similar situation in *Cromeens*, in which it analyzed the anti-waiver provision of the Maine Franchise Law for Power Equipment, Machinery and Appliances (*10 M.R.S.A. § 1361, et* seq.; the "Maine Law"). [28] Like the anti-waiver provision of the Arkansas Act, there was nothing in the anti-waiver provision of the Maine Law to indicate that the legislature intended the statute to embody fundamental policy. As the court observed in *Cromeens*, however, ***HN38***[] a legislature simplifies the task of determining whether a state statute embodies fundamental **[**69]** policy when it expressly states that the statute constitutes such policy. *Cromeens, 349 F.3d 376, 2003 WL 22519825, at *9*. In *Cromeens*, the Seventh Circuit discovered that the Maine legislature had rendered the court's task "exceedingly easy" by including in the Maine Law a section entitled "Public Policy." *Id*. The "Public Policy" section of the Maine Law provides that "[a] contract …or activity undertaken pursuant to a contract in violation of this chapter is deemed against public policy and is void and unenforceable." *10 M.R.S.A. § 1368*. Relying on this section, the court held that the Maine Law "evidences a strong public policy against contracts that violate the franchise law generally," and that, because Maine has expressed a strong public policy against allowing choice-of-law provisions **[*610]** to prevail over the statute, franchisees could not waive protection under the Maine Law. *Cromeens, 349 F.3d 376, 2003 WL 22519825, at *10*.

[70]** In determining whether the Arkansas Act embodies a fundamental policy of Arkansas, we will conduct an analysis like that utilized by the *Cromeens* court. As the Supreme Court of Arkansas has observed, the "public policy [of Arkansas] is declared by the General Assembly." *Western World Ins. Co. v. Branch, 332 Ark. 427, 965 S.W.2d 760, 762 (Ark. 1998)*. And the Arkansas legislature, in the Arkansas Act's emergency clause (the "Emergency Clause"), included a provision analogous to the "Public Policy" section of the Maine Law. [29] In the Emergency Clause, the legislature expressly declared that cancellation of franchise agreements in Arkansas, absent good cause, was "vitally affecting the …public welfare." 1977 Ark. Acts 355, § 13. More specifically, the Emergency Clause asserted that franchisors, "without good cause and to the great prejudice and harm of the citizens of the State of Arkansas, [were] cancelling existing franchise agreements." And it declared that the legislature had enacted the Arkansas Act to prevent the cancellation of such franchise agreements without good cause, in order to preserve the "public peace, health, and safety" of its citizens. **[**71]** Importantly, the Supreme Court of Arkansas has recognized that the Emergency Clause shows that the legislature "designed the [Arkansas Act] for the protection of the public," and it has acknowledged that the purpose of the Arkansas Act is revealed in its Emergency Clause. *Dr. Pepper Bottling Co. of Paragould v. Frantz, 311 Ark. 136, 842 S.W.2d 37, 41 (Ark. 1992)*. In sum, like the "Public Policy" provision of the Maine Law, the Emergency Clause of the Arkansas Act constitutes a compelling statement of Arkansas policy.

[72]** In these circumstances, the anti-waiver provision of the Arkansas Act, considered in conjunction with the declarations made in the Emergency Clause, renders the termination of a dealer agreement, absent good cause, a violation of the fundamental policy of Arkansas. And Arkansas has a materially greater interest than South Carolina in determining whether a dealer agreement between an Arkansas dealer and an out-of-state manufacturer can be terminated without cause. Thus, under the Fundamental Policy test, Clark's Dealer Agreement is governed by the Arkansas Act. We must therefore assess whether Volvo's termination of Clark's Dealer Agreement was permissible under the Arkansas Act.

d.

---

[28] Pursuant to the anti-waiver provision of the Maine Law, it is unlawful for a manufacturer, without good cause, "to cancel …a franchise relationship with a distributor or dealer, notwithstanding …the terms or provisions of a waiver …." 10 M.R.S.A. *§ 1363(3)(B)*.

[29] The requirements for enacting an emergency clause in Arkansas are explained in Amendment 7 to the Arkansas Constitution:

> If it shall be necessary for the preservation of the public peace, health and safety that a measure shall become effective without delay, such necessity shall be stated in one section, and if upon a yea and nay vote two-thirds of all members elected to each house …shall vote upon separate roll call in favor of the measure going into immediate operation, such emergency measure shall become effective without delay.

Ark. Const. amend. 7. ***HN39***[] In interpreting an Arkansas statute, courts may look to the emergency clause to determine legislative intent. *Quinney v. Pittman, 320 Ark. 177, 895 S.W.2d 538, 542 (Ark. 1995)*.

Volvo maintains that, even if Clark's Dealer Agreement is governed by the Arkansas Act, it did not violate the Act because the Dealer Agreement was terminated for good cause. More specifically, Volvo contends that its legitimate business objective of consolidating its network of motor-grader dealers satisfies the good cause standard of the Arkansas Act. Indeed, in the *Cromeens* controversy, AB Volvo, Volvo Excavators AB, and Volvo **[*611]** Construction Equipment NV (collectively, "AB Volvo") made a similar **[**73]** argument to the Seventh Circuit. And AB Volvo, like Volvo here, maintained that it possessed good cause to terminate its dealers because it had withdrawn from the market the heavy equipment sold by those dealers. *Cromeens, 349 F.3d 376, 2003 WL 22519825, at *10*.

In this appeal, Volvo maintains that it possessed good cause to terminate Clark's Dealer Agreement because it withdrew the Champion Motor Graders from the market. Volvo acknowledges that, although the Maine Law assessed in *Cromeens* provided that "there is good cause [for termination of a franchise] when the manufacturer discontinues production or distribution of the franchise goods," 10 M.R.S.A. *§ 1363(3)(C)(4)*, the Arkansas Act contains no such provision. Volvo maintains, however, that circumstances other than those enumerated in the Arkansas Act may constitute good cause, and it contends that a market withdrawal is such a circumstance.

Clark, on the other hand, asserts that, even if the list of what may constitute good cause under the Arkansas Act is not exhaustive, and even if a market withdrawal may constitute good cause for a franchise termination, Volvo did not in fact withdraw the **[**74]** Champion Motor Graders from the market. Clark contends that, because the motor graders currently manufactured by Volvo have not been significantly reengineered, Volvo has not withdrawn Champion Motor Graders from the market. More specifically, Clark maintains that Volvo has simply rebranded the Champion Motor Graders and that it is selling them as Volvo graders. And, according to Clark, such rebranding does not constitute a market withdrawal. Clark contends, therefore, that even if a market withdrawal may constitute good cause under the Arkansas Act, Volvo did not possess good cause for terminating its Dealer Agreement.

In these circumstances, a genuine factual dispute exists as to whether Volvo possessed good cause, under the Arkansas Act, to terminate Clark's Dealer Agreement. We therefore remand Clark's statutory claim (in the Arkansas Litigation) and its statutory counterclaim (in the North Carolina Litigation) for the district court's assessment of whether, pursuant to the Arkansas Act, Volvo terminated Clark's Dealer Agreement without good cause.

IV.

Pursuant to the foregoing, we affirm the district court except as to Clark's statutory claim in the Arkansas Litigation and **[**75]** its statutory counterclaim in the North Carolina Litigation. We vacate the judgment on those two claims only, and we remand for such further proceedings as may be appropriate.

AFFIRMED IN PART, VACATED IN PART, AND REMANDED

Concur by: WIDENER, (In Part)

Dissent by: WIDENER, (In Part)

Dissent

WIDENER, Circuit Judge, concurring and dissenting:

I concur in part and respectfully dissent in part.

I agree with the result reached by the majority except the treatment of CLM's claim under the Louisiana Act and the claim of Future Equipment Company under the Texas Deceptive Trade Practices and Consumer Act. In my opinion, the decision of the district court as to those claims should be vacated, and as to them should be remanded to the district court for further consideration.

I.

The key provision in CLM's dealer agreement with Volvo is the Local Law Provision, or section 30 of the dealer **[*612]** agreement. The Local Law Provision provides as follows:

> The rights and obligations of the parties hereto shall be subject to all applicable laws, orders, regulations, directions, restrictions and limitations of governments and governmental agencies having jurisdiction over the parties hereto. In the event **[**76]** that any law, order, regulation, direction, restriction or limitation, appropriation …or interpretation thereof shall, in the judgment of either party hereto, substantially alter the relationship between the parties under this Agreement or the advantages derived from such relationship, either party may request the other party hereto to modify this Agreement. If, within fifteen (15) days subsequent to making such request, the parties hereto are unable to agree upon a mutually satisfactory modification hereof, then the adversely affected party may terminate this Agreement on fifteen (15) days' notice to the other party.

The Louisiana Act, *La. Rev. Stat. Ann. §§ 51: 481-82 (West 2003)*, applies to the CLM-Volvo dealer agreement. In *Lake Charles Diesel, Inc. v. General Motors Corp., 328 F.3d 192 (5th Cir. 2003)*, the court explained the prerequisites necessary for the Louisiana Act to apply. For the Louisiana Act to apply in this case, each of the following must be present:

> 1. A contract or agreement, written or oral;
> 2. The contract must be between (1) a dealer, [1] and (2) an agent. [2]
>
> 3. The dealer must be in the business **[**77]** of selling, distributing, or retailing.
> 4. The agent must be in the business of wholesaling, manufacturing, or distributing.
> 5. The tangible movable (personal) property that the dealer agrees to sell, distribute, or retail and that the agent agrees to wholesale, manufacture, or distribute must pertain to one or more of five industries only: (1) farming; (2) construction; (3) heavy industrial material handling; (4) utility; or (5) lawn and garden.
> 6. The tangible movables that are the objects of the dealership contract must be one or more of the following types: (1) equipment; (2) engines; (3) implements; (4) machinery; or (5) attachments.
>
> 7. In addition to the type or types of equipment that are the objects of the dealership contract, the dealer must also agree to sell, distribute or retail, and the agent must also agree to wholesale, manufacture, or distribute repair parts for such equipment.
>
> 8. In the dealership contract, the dealer must agree to maintain an inventory of one or more of the following: (1) repair parts for the subject tangible movables; or (2) the tangible movables themselves; or (3) attachments.

Lake Charles Diesel, 328 F.3d at 200. **[**78]** The CLM-Volvo dealer agreement fulfills all of these prerequisites. Because the dealer agreement fulfills all of the prerequisites **[*613]** outlined by the court in *Lake Charles Diesel*, the substantive sections of Title 51 apply to the dealer agreement. In particular, *§ 482* is applicable. *Section 482(A)(1)* provides that:

> no agent, directly through an officer or an employee, may terminate, cancel, fail to renew, or substantially change the competitive circumstances of a dealership agreement or contract without good cause.

La. Rev. Stat. Ann. § 51: 482 (West 2003). Accordingly, *§ 482* is an applicable law under the Local Law Provision of the dealer agreement.

[79]** Under the majority's interpretation of the *Local Law Provision, § 482* is not applicable in this case because CLM failed to request a modification of its dealer agreement. Maj. Op. at 25-26. But the plain language of the Local Law Provision does not require CLM to request a modification of the dealer agreement in order to gain the

[1] A dealer is defined by statute to mean "any farm dealer, heavy industrial equipment dealer, construction equipment dealer, material handling equipment dealer, utility equipment dealer, engines equipment dealer, lawn and garden equipment dealer or retail equipment distributor dealer." *La. Rev. Stat. Ann. § 51:481(B)(3)* (West 2003).

[2] An agent is defined by statute to mean "any manufacturer, wholesaler or wholesale distributor." *La. Rev. Stat. Ann. § 51: 481(B)(4) (West 2003).*

protection of § 482. Under the Local Law Provision, either party, *either Volvo or CLM*, could have requested a modification if it believed, "in [its] judgment" that a local law would substantially alter the contractual relationship between the parties. Neither CLM nor Volvo requested a modification. As the majority duly notes in its opinion, Volvo recognized that § 482 would alter the relationship between the two parties:

> According to Volvo, the State Statutes, if applied, would effectively nullify the Without Cause Provision, substantially altering the relationship between Champion and the Dealers.

Maj. Op. at 25-26. Despite this realization, Volvo never sought a modification of the contract.

The Louisiana state legislature added § 482 to Title 51 in 1991. See La. Rev. Stat. Ann. § 51:482 (West 2003). Until **[**80]** the time of this addition, neither CLM nor Volvo was subject to § 482(A)(i), and immediately upon enactment, and until 2000, either CLM or Volvo could have asked for a modification of the dealer agreement. The reason that CLM did not seek such a modification is at once apparent; under the dealer agreement, if there had been no applicable local law, the agreement could have been terminated under the Without Cause Provision of CLM Dealer Agreement § 24. At the time the dealer agreement was signed in 1984, neither party had any cause to seek a modification. The passage of § 482 in 1991 modified the dealer agreement. CLM had no cause for concern, however, because it derived a benefit from § 482. Volvo, as it admits and as the majority notes in its opinion, did have its rights and advantages altered by the passage of § 482. Maj. Op. at 26. Since Volvo now recognizes the impact of § 482, as shown without objection, it could have recognized § 482's significance at any time since 1991, and did not.

Furthermore, the Local Law Provision provided a method for Volvo to alter the dealer agreement to regain any advantages, in its judgment it lost by the passage of § 482. The majority opinion **[**81]** holds that only CLM bears the burden of requesting a modification of the dealer agreement, but as I have noted, the plain language of the Local Law Provision does not limit to CLM alone the ability to request a modification. The majority interprets the Local Law Provision so that, while § 482 alters the relationship of the parties, CLM loses on its claims because it did not request a modification. Using the same logic, the majority should, with equal facility, reach the opposite conclusion; that because § 482 alters the relationship between the parties, Volvo loses because it did not request a modification.

The majority offers no reason or justification for declaring Volvo the winner with **[*614]** respect to the construction of this provision of the contract, which, by its literal terms, applies to "either party." Indeed, a more logical and reasonable construction of the contract is that in the absence of a "request [of] the other party," the literal terms of the contract should stand as written and unaltered.

Under the majority's reasoning, CLM, as the party benefitting from § 482, must call Volvo's attention to the existence of a provision that benefits CLM for the purpose of altering **[**82]** the relationship to the point where CLM loses the benefit of § 482. Such a departure from human nature is not a reasonable contract construction, I suggest.

II.

The Local Law Provision, section 30 of the dealer agreement, is reconcilable with the Choice of Law Provision in section 29. For example, prior to 1991, the Louisiana legislature had not enacted § 482. As a result, no local law triggered the application of the Local Law Provision. Had there been a contract dispute prior to 1991, it would have been governed by South Carolina law. After the passage of § 482, the contract is still governed by South Carolina law, except that § 482, as an applicable local law, applies as well.

Yet, under the majority's interpretation of the contract, the Local Law Provision would be surplusage, violating the "universal law of contract law that, in construing language in a contract, 'an interpretation that gives a reasonable meaning to all parts of the contract will be preferred to one that leaves portions of the contract meaningless.'" Island Creek Coal Co. v. Lake Shore, Inc., 832 F.2d 274, 277 (4th Cir. 1987) (quoting United States v. Johnson Controls, Inc., 713 F.2d 1541, 1555 (Fed. Cir. 1983); **[**83]** see also Union Inv. Co. v. Fidelity & Deposit Co. of Ind., 549 F.2d

1107, 1110 (6th Cir. 1977)). The majority decision renders meaningless the contractual language in the Local Law Provision that "the rights and obligations of the parties …shall be subject to all applicable local laws."

In *Liverpool & London Steamship Protection & Indemnity Association, Ltd. v. Queen of Leman MV, 296 F.3d 350 (5th Cir. 2002)*, the court faced a contract construction question similar to the one facing this court regarding the Local Law Provision and Choice of Law Provision in the dealer agreement. Liverpool & London Steamship Protection & Indemnity Association, Ltd., (L & L) provided protection and indemnity insurance to the owners and operators of the QUEEN OF LEMAN. *296 F.3d at 351*. The insurance contract between the parties contained four provisions that affected the choice of law that would govern the contract. First, Rule 40 of the contract stated that L & L "is entitled to 'a lien on the ships of a member' for any unpaid premiums." Second, Rule 47 stated that "disputes are to be resolved either by arbitration or 'by the English High Court **[**84]** of Justice.'" Third, Rule 47C stated that:

> nothing herein shall affect or prejudice the right of the Association to take action and/or commence proceedings in any jurisdiction to enforce its right of lien on ships or to otherwise obtain security by seizure, attachment or arrest of assets for any amounts owed to the Association.

Finally, Rule 48 provided that

> these rules and any special terms of entry form a contract of insurance between the Association and a member, and subject to the right of the Association under Rule 47C to enforce its right of lien in any jurisdiction in accordance with local law in such a jurisdiction, shall **[*615]** be construed in accordance with English law.

See *L & L, 296 F.3d at 353*.

L & L filed a complaint in the Eastern District of Louisiana to seize the QUEEN OF LEMAN for unpaid insurance premiums. *296 F.3d at 351*. The district court granted the request, and the vessel was arrested and later sold for $ 512,000.00. *296 F.3d at 351*. The funds from the sale of the vessel were placed in the registry of the district court. Two parties, one who insured the vessel's cargo and one who owned the **[**85]** vessel's cargo, intervened seeking to recover the proceeds from the sale. The intervenors argued that the insurance contract called for the application of English law, under which L & L could not obtain a maritime lien. *296 F.3d at 351*. The district judge agreed, granted summary judgment in favor of the intervenors, and L & L appealed to the Fifth Circuit. *296 F.3d at 351-52*.

On appeal, the parties agreed "that English law generally governs the contract." *296 F.3d at 352*. They also agreed that the procedure for enforcing a lien was governed by the law of the jurisdiction in which the lien was being enforced, in this case the United States. The parties disagreed over whether English law, as the law that governs the contract generally, also determines whether a maritime lien exists. As the court noted, this disagreement is "significant because even L & L admits it would have no maritime lien under English law." *296 F.3d at 352*. In contrast, the federal Maritime Commercial Instruments and Liens Act, *46 U.S.C. §§ 31341-31343*, makes a maritime lien available for a party who provides necessaries, which includes **[**86]** marine insurance in the Fifth Circuit, to a vessel. *296 F.3d at 353* (citing *Equilease Corp. v. M/V Sampson, 793 F.2d 598, 603 (5th Cir. 1986)* (en banc)). The intervenors sought to persuade the court that the "reference to local law in Rules 47C and 48 is limited to the procedural aspects of enforcing liens." The argument went that the substantive issue of any lien to which L & L may be entitled is governed by English law, but L & L may enforce the lien by relying on local procedural law. *296 F.3d at 353*.

The court disagreed. If the choice of law provision controlled the maritime lien, then the provision in Rule 40 authorizing L & L to secure a maritime lien would have been rendered meaningless because English law did not recognize a maritime lien. *296 F.3d at 353*. The court explained that

> if English law controls and there is no maritime lien for unpaid insurance premiums, then L & L would have little need for enforcement provisions, as no right would exist to be enforced. …We therefore agree with L & L that in order to give meaning to the entire contract, the determination of whether a maritime lien exists in the first **[**87]** place should be determined by United States law.

296 F.3d at 353-54. The court thus reversed the district court's decision granting the intervenors' motion for summary judgment. 296 F.3d at 355.

The Local Law Provision in the dealer agreement is similar to Rule 47C. By construing the contract to allow the Choice of Law Provision to trump another provision in the contract, the majority follows a path that the *L & L* court rejected because it would not give meaning to the entire contract. See L & L, 296 F.3d at 353-54. Because the Local Law Provision can be reconciled with the Choice of Law Provision, this court should allow CLM to pursue its rights under § 482, an applicable local law.

The dealer agreement should be construed to give effect to all of its provisions. See Osteen v. T.E. Cuttino Constr. Co., 315 S.C. 422, 434 S.E. 2d 281, 284 **[*616]** (S.C. 1993). The majority's interpretation gives no effect to the Local Law Provision. In my opinion, CLM is entitled to the protection of the Louisiana Act, and CLM's claims and counterclaims under the Louisiana Act should be remanded to the district court.

III.

On remand, **[**88]** the district court should have South Carolina law and the Louisiana Act as the governing law for interpreting the CLM Volvo dealer agreement. The district court should enforce the Louisiana Act unless there is a rule in North Carolina that prevents the district court from enforcing the Louisiana Act, and no such rule has been brought to our attention. Accordingly, the Louisiana Act should be enforced by the district court on the basis of the Local Law Provision.

The majority concluded that the CLM dealer agreement is to be construed according to South Carolina law. Maj. Op. at 24. The majority reached this decision by applying North Carolina's choice of law rules, which enforce choice of law provisions in contracts. Maj. Op. at 24; see also Bueltel v. Lumber Mut. Ins. Co., 134 N.C. App. 626, 518 S.E. 2d 205, 209 (N.C. App. 1999). South Carolina law, while retaining the rule of lex loci contractus, [3] also recognizes the right of parties to choose another jurisdiction's law to govern the contract. Associated Spring Corp. v. Wilson, 410 F. Supp. 967, 975 (D.S.C. 1976). The *Associated Spring Corp*. court relied on the following language from the South **[**89]** Carolina Supreme Court's opinion in Livingston v. Atlantic Coast Line R. Co., 176 S.C. 385, 180 S.E. 343 (S.C. 1935):

> It is fundamental that unless there be something intrinsic in, or extrinsic of, the contract that another place of enforcement was intended, the lex loci contractu governs. If the contract be silent thereabout, the presumption is that the law governing the enforcement is the law of the place where the contract is made.
>
> "The act of the parties in entering into a contract at a particular place, in the absence of anything shown to the contrary, sufficiently indicates their intention to contract with reference to the laws of that place; hence the rule as it usually stated is that a contract as to its validity and interpretation is governed by the law of the place where it is made, the lex loci contractu; or more accurately, that contracts are to be governed as to their nature, validity and interpretation by the law of the place where they are made, unless the contracting parties clearly appear to have had some other place in view." 13 C. J., 248.

180 S.E. at 345.

[90]** In *Livingston*, the South Carolina Supreme Court explained that South Carolina law allows parties to choose the law that they want to use to enforce their contract. See Associated Spring Corp., 410 F. Supp. at 975 (noting that this view is "widely-held and is generally in conformity with that of the Restatement (Second) of Conflict of Laws § 187 (1971)"). Under the Restatement (Second) of Conflict of Laws § 187(2), South Carolina law will govern the contract unless the

---

[3] The rule of lex loci contractus means "the law of the place where the contract is made governs the contract." Joye v. Heuer, 813 F. Supp. 1171, 1173 (D.S.C. 1993) (citing Livingston v. Atlantic Coast Line R. Co., 176 S.C. 385, 180 S.E. 343, 345 (S.C. 1935)).

> application of the law of the chosen state would be contrary to a fundamental policy of a state which has a materially greater interest than the chosen state in the determination of the particular issue and which, under the rule of *§ 188*, **[*617]** would be the state of the applicable law in the absence of an effective choice of law by the parties.

The majority refuses to remand CLM's claims and counterclaims under the Louisiana Act to the district court on the ground that the Louisiana Act does not constitute a fundamental policy of Louisiana. Maj. Op. at 34-35. In my opinion, this reasoning is not only overly **[**91]** and hyper-technical, it is fundamentally wrong. A statute enacted by a state legislature establishes the public policy of that State. See *Bibb v. Navajo Freight Lines, Inc., 359 U.S. 520, 524, 3 L. Ed. 2d 1003, 79 S. Ct. 962 (1959)* ("Policy decisions are for the state legislature, absent federal entry into the field."); *Barnes Group, Inc. v. C & C Prods., Inc., 716 F.2d 1023, 1031 (4th Cir. 1983)* ("It seems apparent that where the law chosen by the parties would make enforceable a contract flatly unenforceable in the state whose law would otherwise apply, to honor the choice-of-law provision would trench upon that state's 'fundamental policy.'").

Every state court in the Fourth Circuit has also recognized the state legislature as the definitive voice on pronouncements of public policy. See *Schmeizl v. Schmeizl, 186 Md. 371, 46 A.2d 619, 621 (Md. 1946)* ("The court cannot adopt a public policy contrary to the plain provisions of the statute."); *Pitt & Greene Electric Membership Corp. v. Carolina Power & Light Co., 255 N.C. 258, 120 S.E. 2d 749, 754 (N.C. 1961)* ("Public policy is for legislative determination."); *Brown v. Drake, 275 S.C. 299, 270 S.E. 2d 130, 132 (S.C. 1980)* **[**92]** ("Public policy is basically for the legislature"); *Wood v. Board of Supervisors of Halifax City, 236 Va. 104, 115, 372 S.E.2d 611, 5 Va. Law Rep. 541 (1988)* ("It is the responsibility of the legislature, not the judiciary, to formulate public policy."); *State v. Varney, 142 W. Va. 105, 96 S.E. 2d 72, 76 (W. Va. 1956)* (". ..the public policy of a state is a law of the state, and is a legislative and not a judicial function, and it is not the function of the judiciary to declare what is the public policy of the state respecting matters on which the legislature has spoken …").

The Supreme Court of Louisiana especially has expressed its opinion as to whether statutes express the public policy of Louisiana in a case involving a state ***antitrust law***. *State v. American Sugar Refining Co., 138 La. 1005, 71 So. 137, 142-143 (La. 1916)*. …

> the public policy of a state is to be found in its statutes, and, when they have not directly spoken, then in the decisions of the courts. But, when the Legislature speaks upon a subject upon which it has the constitutional power to legislate, public policy is what the statutes passed by it enacts public policy to be. The only authentic **[**93]** and admissible evidence of public policy of a state on any given subject are its Constitutions, laws, and judicial decisions. The public policy of a state, of which courts take notice and which they give effect, must be decided from those sources. Where the state has spoken through its legislators, there is no room for speculation as to what the policy of the state is.

So, in my opinion, it is beyond argument that the fundamental policy of Louisiana is expressed in *§ 51:482*.

Section 51:482, barring cancellation of the contract without cause, was enacted by the Louisiana state legislature. In this circuit, nothing else appearing, we must accept that statute as the fundamental public policy of Louisiana. See *Hall v. McKenzie, 537 F.2d 1232, 1234 (4th Cir. 1976)*("The determination of legislative policy for the State of West Virginia is for that state and not us."); *St. Paul Fire & Marine Ins. Co. v. Jacobson, 48 F.3d 778 (4th Cir. 1995)* ("We will not attempt to **[*618]** decide the public policy of the State of Virginia absent a clear and dominant articulation of that policy by the Commonwealth herself."). By concluding that the Louisiana Act does not constitute **[**94]** a fundamental policy of Louisiana, the majority is making its own determination that the Louisiana Act, as a statute, does not express the fundamental public policy of Louisiana. Our court cannot determine the public policy of Louisiana, even if the Fifth Circuit is willing to do so. See *St. Paul Fire & Marine, 48 F.3d at 783*. C. f. *Cherokee Pump & Equipment, Inc. v. Aurora Pump, 38 F.3d 246, 252-53 (5th Cir. 1994)*. Instead, the Louisiana state statute must be viewed as the fundamental public policy of that State.

Whatever the Fifth Circuit may have decided, *Cherokee Pump* is a flawed authority on which to rest our decision. *Cherokee Pump* recites, *38 F.3d at 253*, that "There is no case law evidencing that the Repurchase Statute amendment espouses public policy in Louisiana." Along the same line, the majority in this case recites that "The Louisiana courts have not addressed this issue," referring to whether the Louisiana statute is a fundamental policy of Louisiana. Although *State v. American Sugar Refining Co., 138 La. 1005, 71 So. 137 (La. 1916)* has been in full force and virtue in that State for some 88 years **[**95]** and has not been modified or overruled, both the Fifth Circuit and the majority here persist in their reasoning that the subject has not been addressed by the Louisiana courts. To repeat, *American Sugar* stated:

> But, when the Legislature speaks upon a subject upon which it has the constitutional power to legislate, public policy is what the statutes passed by it enacts public policy to be.

71 So. at 142. That certainly should end the discussion, but just as *Cherokee Pump* did not mention *American Sugar*, so the majority here does not. Such omission, both by the Fifth Circuit and this court, is flawed reasoning, I suggest.

If that were not enough, and of even more importance, the case of *Barnes Group, Inc. v. C & C Prods., Inc., 716 F.2d 1023 (4th Cir. 1983)*, is on facts which are indistinguishable from those at hand, and, on the same question, determines that where the law chosen by the parties would make enforceable a contract flatly unenforceable in the State whose law would otherwise apply, "the choice of law provision would trench upon that State's 'fundamental policy.'" *716 F.2d at 1031*. *Barnes Group* was **[**96]** a case in which Barnes, the plaintiff, alleged that C & C, the defendant, had interfered with Barnes' contracts with six of Barnes' sales agents. Barnes was an Ohio company, and its contracts with its agents provided that they should be construed in accordance with the laws of the State of Ohio. Three of the salesmen, however, were from Alabama, and their territories were exclusively in Alabama. The contract of employment, which included a covenant not to compete, was void as against public policy under Alabama law and could not be enforced. The holding of this court was:

> To honor the contractual choice of law would make enforceable a contract flatly unenforceable in Alabama, surely impinging upon "fundamental policy" of Alabama. It was error, therefore, for the district court to apply Ohio law to determine the enforceability of the Alabama salesmen's covenants not to compete.

716 F.2d at 1032. Applying the facts of this case to the holdings of *Barnes Group*, the law chosen by the parties, South Carolina, would permit a contractual provision for cancellation to be without notice, and would make enforceable in Louisiana a **[*619]** contract "flatly unenforceable" **[**97]** in Louisiana under *§ 51: 482*, the law of that State. The holding of *Barnes Group* is that such a choice-of-law provision would "trench upon [Louisiana's] 'fundamental policy.'" *716 F.2d at 1031*. And the impinging of the fundamental policy of Louisiana, error here as there, means that the statute of Louisiana, *§ 51: 482*, must be applied. Louisiana is the State in which the dealership is located, and which even the majority in this case agrees had a greater interest than the chosen State of South Carolina.

Applying the rule of *§ 187(b) Restatement (Second) Conflict of Laws* to this case indicates that the Louisiana Act should apply, for if the "application of the law of the chosen state would be contrary to a fundamental policy of a state which has a materially greater interest than the chosen state in the determination of the particular issue" the law of South Carolina should not apply. I have just demonstrated that the fundamental policy of Louisiana is expressed in the statute requiring that such contracts not be cancelled by the manufacturer without cause. It is also beyond doubt that Louisiana has a materially greater **[**98]** interest than South Carolina in determining whether a dealer agreement between a Louisiana dealer and an out-of-state manufacturer can be terminated without cause. The majority holds just that with relation to the Arkansas dealer, [4] and no reason is apparent why the Louisiana dealer should be treated differently on what are essentially the same facts. The only difference in the two statutes is that Arkansas has some kind of anti-waiver provision mentioned by the majority, but even Arkansas does not have an opinion of its Supreme Court taking nearly so strong a stand as the position of the Louisiana court in *American*

[4] "And Arkansas has a materially greater interest than South Carolina in determining whether a dealer agreement between an Arkansas dealer and an out of state manufacturer can be terminated without cause." Maj. Op. at 39.

Sugar that statutes reflect the fundamental policy of Louisiana. In my opinion, the clearly implicit holding of the majority, that a statute without an anti-waiver provision is not the fundamental policy of a State, is clearly wrong.

[99]** IV.

I am further of opinion that the claim of Future Equipment Company, Inc. under the *Texas Deceptive Trade Practices and Consumer Protection Act, Vernon's Texas Statutes and Codes Ann., Title II, § 17.41,* et seq., should be re-examined on the merits.

This case is a result of a "judgment on the pleadings," A. 486, and not based on depositions, affidavits, etc., a factual development, as is the more usual case.

> For the purposes of the court's consideration of the motion [for judgment on the pleadings], all of the well pleaded factual allegations in the adversary's pleadings are assumed to be true, and all contravening assertions in the movant's pleadings are taken to be false.

5A Charles Alan Wright & Arthur R. Miller, *Federal Practice and Procedure* 520 (2d. ed. 1990) relying on *National Metropolitan Bank of U. S., 323 U.S. 454, 457, 89 L. Ed. 383, 65 S. Ct. 354 (1945)* and various cases from the federal courts of appeals and district courts. In Count III of the Arkansas complaint found in this appendix at A. 298, the following allegation is made by Future Equipment Company:

> 53. At all times material to this action, FEC was a 'business consumer' **[**100]** as that term is defined in the Texas Deceptive Trade Practices and Consumer Protection Act (' DTPA'), *Tex. Bus. & Com. Code, § 17.41, et seq.*, **[*620]** in that FEC is a corporation or business that sought and/or acquired goods or services by purchase or lease, and the goods or services formed the basis of their claims.

Section 17.45 (10) provides that:

> 'Business Consumer' means an individual, partnership or corporation who seeks or acquires by purchase or lease, any goods or services for commercial or business use. The term does not include this state or a subdivision or agency of this state.

So, for the purposes of judgment on the pleadings under *Rule 12*, as here, we must consider that FEC is a "business consumer, a corporation who seeks or acquires by purchase or lease …goods or services for commercial or business use." That is sufficient to qualify Future Equipment to have its claim examined under the Texas Deceptive Trade Practices and Consumer Protection Act under Texas law as found in *Fisher Controls Intern., Int'l v. Gibbons,, 911 S.W. 2d. 135 (Tx. App. 1995)* and *Texas Cookie Co. v. Hendricks & Peralta, 747 S.W. 2d. 873 (Tx. App. 1988).* **[**101]** Briefly, *Texas Cookie* held that the fact that the transfer agreement "involved the transfer of 'goods or services' for purpose of the DTPA," *Texas Cookie, 747 S.W. at 877*, qualified Hendricks for relief under the Texas Deceptive Trade Practices and Consumer Act, the same statute involved here.

This is not to say that a future factual development may not add to the facts favorable to Future Equipment or to the facts favorable to Volvo. But it is clear that judgment in favor of Volvo should not have been entered *on the pleadings which admit the necessary facts*, and that the case on remand should require examination and development of that aspect or Future Equipment's claim.

In all events, if the majority holding is correct, that Future Equipment loses because "FEC does not allege that it paid for an intangible right to continue to be a champion dealer and no payment is reflected in the dealer agreement," there would have been no dealership contract to cancel, and this case is nothing more than an exercise for the lawyers.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Regulated Practices, Private Actions**

A complaint is not to be dismissed unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. Inquiry under *Fed. R. Civ. P. 12(b)(6)* is limited to whether the complaint gives the defendant fair notice of what the claim is and the grounds upon which it rests. This liberal "notice pleading" standard applies in antitrust cases.

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] Antitrust & Trade Law, Sherman Act

See *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] Antitrust & Trade Law, Sherman Act

Though *15 U.S.C.S. § 1* does not explicitly so state, its scope is limited to "unreasonable" trade restraints.

Antitrust & Trade Law > Sherman Act > Claims

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Sherman Act, Claims

The party alleging a *15 U.S.C.S. § 1* violation must prove that two or more persons entered into an agreement to restrain trade. The antitrust plaintiff must also prove that the restraint is unreasonable.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Criminal Law & Procedure > Preliminary Proceedings > Preliminary Hearings > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN5[] Per Se Rule Tests, Manifestly Anticompetitive Effects

For purposes of *15 U.S.C.S. § 1*, unreasonableness can be shown by demonstrating that the conduct in question is historically of the type that regularly poses anticompetitive consequences, and thus qualifies as a "per se" violation. In lieu of this, the plaintiff can establish a per se violation by means of a preliminary examination of market conditions which discloses an "anticompetitive effect," with no "procompetitive justification." Failing either of these alternatives, the antitrust plaintiff must cope with the "rule of reason," which requires proof that the defendant's conduct had an anticompetitive effect in the relevant market and that no procompetitive rationale would justify the conduct. This approach requires more extensive evidence of an anticompetitive effect than is necessary in connection with a preliminary examination. The preliminary examination of market conditions is not as detailed as the one required by the rule of reason, and has been referred to as a "quick look" at market conditions.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN6[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Restraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints, and those imposed by agreement between firms at different levels of distribution as vertical restraints.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Evidence > Admissibility > Circumstantial & Direct Evidence

HN7[] **Regulated Practices, Price Fixing & Restraints of Trade**

Recognizing the unlikelihood that direct evidence of a price-fixing agreement will be available, courts permit the existence of such an agreement to be inferred from indirect evidence.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN8[] **Regulated Practices, Price Fixing & Restraints of Trade**

In a price-fixing case, indirect evidence often involves proof that the antitrust defendants demand similar contractual terms in dealing with the plaintiffs. This "parallel" behavior is not enough by itself, however, as it is just as plausible that the behavior simply reflects a rational, independent calculus by each of the defendants, rather than a conspiracy to fix prices. The courts have accordingly fashioned a test under which price fixing plaintiffs must demonstrate the existence of "plus factors" that remove their evidence from the realm of equipoise and render that evidence more probative of conspiracy rather than of conscious parallelism. One prominent "plus factor" is a showing that the defendants' behavior would not be reasonable or explicable (i.e., not in their legitimate economic self-interest) if they were not conspiring to fix prices.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > Notice Requirement

HN9[] **Summary Judgment, Entitlement as Matter of Law**

Under the Federal Rules of Civil Procedure's simplified standard for pleading, a court may dismiss a complaint only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations. This simplified notice pleading standard relies on liberal discovery rules and summary judgment motions to define disputed facts and issues and to dispose of unmeritorious claims.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN10[] **Complaints, Requirements for Complaint**

A requirement of greater specificity for particular claims is a result that must be obtained by the process of amending the Federal Rules of Civil Procedure, and not by judicial interpretation. Furthermore, *Fed. R. Civ. P. 8(a)*, which calls for a short and plain statement of the claim showing that the pleader is entitled to relief, establishes a pleading standard without regard to whether a claim will succeed on the merits. Indeed, it may appear on the face of the pleadings that a recovery is very remote and unlikely but that is not the test.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN11[] **Motions to Dismiss, Failure to State Claim**

For purposes of *Fed. R. Civ. P. 12(b)(6)*, so-called "conclusory" allegations are not inherently objectionable. Cases which say that "conclusory allegations" of conspiracy are not enough to withstand a motion to dismiss cannot be squared with Swierkiewicz. Factual allegations in a complaint--even if "conclusory"--are sufficient if they allow the defendant to understand the gist of the plaintiff's claim, thereby making it possible to formulate a meaningful response. All that need be specified is the bare minimum facts necessary to put the defendant on notice of the claim so that he can file an answer. All that is required to state a claim in a complaint filed in a federal court is a short statement, in plain (that is, ordinary, nonlegalistic) English, of the legal claim. The courts keep reminding plaintiffs that they do not have to file long complaints, do not have to plead facts, do not have to plead legal theories.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Securities Law > Initial Offerings of Securities > General Overview

HN12[] **Pleadings, Rule Application & Interpretation**

The function of the complaint is simply to give the defendant fair notice of what the plaintiff's claim is and the grounds upon which it rests.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN13[] Regulated Practices, Price Fixing & Restraints of Trade

"Plus factor" allegations serve to substantiate a plaintiff's conspiracy allegation; their purpose is not to clarify an otherwise incomprehensible claim. Just as an employment-discrimination plaintiff need not allege circumstances that support an inference of discrimination, there is no need for an antitrust plaintiff to allege a plus factor which generates an inference of illegal price fixing. The prima facie case applicable to a claim of employment discrimination is an evidentiary standard, not a pleading requirement. The prima facie case relates to the employee's burden of presenting evidence that raises an inference of discrimination. This United States Supreme Court has never indicated that the requirements for establishing a prima facie case also apply to the pleading standard that plaintiffs must satisfy in order to survive a motion to dismiss.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN14[] Pleadings, Rule Application & Interpretation

Under the so-called notice rules of pleading, a complaint must include sufficient detail so that the defendant can obtain a fair idea of what the plaintiff is complaining.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN15[] Pleadings, Heightened Pleading Requirements

The United States Supreme Court has rejected the proposition that conspiracy allegations are subject to a heightened pleading standard, holding that courts have no authority to create exceptions to the "simplified pleading standard" generally applicable under the Federal Rules of Civil Procedure.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN16[] Regulated Practices, Private Actions

Notice pleading is all that is required for a valid antitrust complaint. Notice pleading means that the complaint need only give the defendant fair notice of what the plaintiff's claim is and the grounds upon which it rests.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN17[] Regulated Practices, Private Actions

Because of the liberal pleading requirements of the Federal Rules of Civil Procedure, rarely will a motion to dismiss for failure to state a claim be granted. Indeed, such a motion should not be granted unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. This is particularly true in an antitrust suit where the proof and details of the alleged conspiracy are largely in the hands of the alleged co-conspirators. This is not to say that liberal pleading requirements negate the need to draft an antitrust complaint in a careful and thoughtful fashion. An antitrust complaint must comprehend a so-called prima facie case, and enough data must be pleaded so that each element of the alleged antitrust violation can be properly identified. Conclusory allegations that the defendant violated the antitrust laws and the plaintiff was injured thereby will not survive a motion to dismiss if not supported by facts constituting a legitimate claim for relief. However, the alleged facts need not be spelled out with exactitude.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN18[] **Pleadings, Rule Application & Interpretation**

Factual allegations as to "when and how" price-fixing agreements were made, the terms of such alleged agreements, and how those alleged agreements were supposedly implemented are precisely the kinds of "details" which would likely be known only by the alleged co-conspirators, and hence should not be required in the complaint. In antitrust cases, where the proof is largely in the hands of the alleged conspirators, dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN19[] **Regulated Practices, Private Actions**

Given the highly fact-sensitive nature of antitrust litigation, case-to-case consistency and predictability require clearly stated overarching principles to which both the courts and the parties can refer in determining what must be pled.

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN20[] **US Department of Justice Actions, Criminal Actions**

The United States District Court for the Northern District of Alabama, Northeastern Division, declines to infer from Aquatherm and Lombard's that antitrust complaints are subject to a more exacting standard than, for example, a complaint in an employment discrimination lawsuit. Since the United States Court of Appeals for the Eleventh Circuit has not explicitly ruled otherwise, the court assumes that in the antitrust context, the ordinary rules for assessing the sufficiency of a complaint apply.

Antitrust & Trade Law > Sherman Act > General Overview

HN21[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers. Nor does it immunize the outlawed acts because they are done by any of these. The Act is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices by whomever they may be perpetrated.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN22[] **Actual Monopolization, Anticompetitive & Predatory Practices**

"Predatory pricing" is a term that has been used chiefly in cases in which a single firm, having a dominant share of the relevant market, cuts its prices below some appropriate measure of cost as a means of forcing competitors out of the market, or perhaps to deter potential entrants from coming in.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN23[] **Regulated Industries, Higher Education & Professional Associations**

The distinction between "legitimate" buying arrangements and those that run afoul of the Sherman Act turns largely on the concept of "antitrust injury." An antitrust injury is one which results from interference with the freedom to compete. More specifically, it is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN24[] **Private Actions, Standing**

Even where the conduct complained of is illegal per se, a plaintiff must show that it is adversely affected by an anticompetitive aspect of the defendant's conduct. In the absence of an antitrust injury, a plaintiff does not have standing to prosecute an action under *15 U.S.C.S. § 1* of the Sherman Act.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN25[] **Private Actions, Remedies**

An antitrust plaintiff may either prove that the defendants' behavior had an actual detrimental effect on competition, or that the behavior had the potential for genuine adverse effects on competition.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN26[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The United States Court of Appeals for the Eleventh Circuit has implicitly accepted the proposition that prices fixed by a purchaser can be predatory.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN27[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

A horizontal conspiracy among buyers to stifle competition is as unlawful as one among sellers.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN28[] **Regulated Practices, Price Fixing & Restraints of Trade**

While antitrust plaintiffs are required to present economic evidence that would show that the hypothesis of collusive action is more plausible than that of individual action, they do not have to exclude all possibility that price discrimination was unilateral rather than collusive.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN29[] **Pleadings, Rule Application & Interpretation**

A complaint must contain either direct allegations on every material point, or the pleading must contain allegations from which an inference fairly may be drawn by the district court that evidence on the these material points will be available and introduced at trial.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN30[] **Complaints, Requirements for Complaint**

For purposes of notice pleading, lack of permissible purpose is implicit in an allegation that defendants did have an impermissible purpose.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN31[] **Actual Monopolization, Anticompetitive & Predatory Practices**

An "oligopoly" is the control or domination of a market by a few large sellers. By definition, it results in "high prices."

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN32[] **US Department of Justice Actions, Criminal Actions**

Antitrust complaints are to be measured against the Federal Rules of Civil Procedure's "simplified pleading standard."

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN33[] **Conspiracy, Elements**

Where the "spokes" of a conspiracy have no knowledge of or connection with any other, dealing independently with the hub conspirator, there is not a single conspiracy, and the importance has been noted in a wheel type conspiracy of such knowledge by individual spokes of the existence of other spokes.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN34[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

A restraint is horizontal because it is the product of a horizontal agreement. A facilely vertical restraint imposed by a manufacturer only because it has been coerced by a "horizontal cartel" agreement among his distributors is in reality a horizontal restraint.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN35[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The "per se" designation is reserved for those types of restraints which are "deemed unlawful" precisely because they have predictable and pernicious anticompetitive effect, and limited potential for procompetitive benefit. Thus a plaintiff's allegation of a per se violation logically implies a violation of the rule of reason. Per se treatment is appropriate once experience with a particular kind of restraint enables a court to predict with confidence that the rule of reason will condemn it.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN36[] Regulated Practices, Price Fixing & Restraints of Trade

Illicit price-fixing does not require a finding that the prices set are "uniform and inflexible."

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Contracts Law > Defenses > Illegal Bargains

Antitrust & Trade Law > Sherman Act > General Overview

HN37[] Regulated Practices, Price Fixing & Restraints of Trade

An agreement to pay or charge rigid, uniform prices would be an illegal agreement under the Sherman Act. But so would agreements to raise or lower prices whatever machinery for price-fixing was used. Price fixing includes more than the mere establishment of uniform prices. Prices are fixed if the range within which purchases or sales will be made is agreed upon, if the prices paid or charged are to be at a certain level or on ascending or descending scales, if they are to be uniform, or if by various formulae they are related to the market prices. Price-fixing in its various manifestations is implicitly an artificial stimulus applied to (or at times a brake on) market prices, a force which distorts those prices, a factor which prevents the determination of those prices by free competition alone.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN38[] Regulated Practices, Price Fixing & Restraints of Trade

An allegation that the defendants have conspired to keep prices paid to the plaintiffs at below market-rate levels suffices for purposes of the Sherman Act.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Contracts Under Seal

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN39[] Types of Contracts, Contracts Under Seal

A document central to a complaint that the defense appends to its motion to dismiss is properly considered, provided that its contents are not in dispute.

Opinion by: VIRGINIA EMPERSON HOPKINS

Opinion

[*1282] OPINION REGARDING MOTION TO DISMISS SECOND AMENDED COMPLAINT

This matter is before the court on a motion by the Defendants in these consolidated actions to dismiss the Plaintiffs' Second Amended Complaint ("SAC"). Doc. **[**2]** 27. The Plaintiffs allege a violation of *§ 1 of the Sherman Act*. The issue is whether the SAC "state[s] a claim upon which relief can be granted." *F.R.Civ.P. 12(b)(6)*. The court holds that it does.

I. BACKGROUND

The Plaintiffs are independent pharmacies. One of the four Defendants, Merck & Co., Inc., is a pharmaceuticals manufacturer. The Plaintiffs allege that during the relevant time period, Merck "controlled and dominated" another Defendant, Medco Health Solutions, Inc., "to the extent that Medco was the mere 'alter ego' and/or agent of Merck." SAC Doc. 90 (case no. CV-03-HS-2695NE [1]) at P 21. Medco, like the other two Defendants, is a pharmacy benefits manager, or "PBM." The PBMs administer drug-benefit plans on behalf of the plan sponsors.

II. DISCUSSION

A. Standard of Review

HN1[] A complaint is not to be dismissed "unless it appears beyond **[**3]** doubt that the plaintiff can prove no set of facts **[*1283]** in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. Inquiry under *Rule 12(b)(6)* is limited to whether the complaint "give[s] the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Id. at 47*. This liberal "notice pleading" standard applies in antitrust cases. See *Hospital Bldg. Co. v. Trustees of Rex Hosp., 425 U.S. 738,746-47, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976)*; cf. *Swierkiewicz v. Sorema N.A., 534 U.S. 506,512-13, 152 L. Ed. 2d 1, 122 S. Ct. 992 (2002)*; *Leatherman v. Tarrant County Narcotics Intelligence &.Coordination.Unit, 507 U.S. 163, 168-69, 122 L. Ed. 2d 517, 113 S. Ct. 1160 (1993)*.

B. Analysis

[1] This is the original lead case. It was transferred to the Northern District of Illinois on August 3, 2004. Doc. 100 (case no. CV-03-HS-2695-NE).

Section 1 of the Sherman Act states that **HN2**[] "every contract, combination. . . , or conspiracy, in restraint of trade or commerce among the several States . . . is . . . illegal." 15 U.S.C. § 1. **HN3**[] Though the statute does not explicitly so state, its scope is limited to "unreasonable" trade restraints. See, e.g., Maris Distr. Co. v. Anheuser-Busch, Inc., 302 F.3d 1207, 1215 (11th Cir. 2002).

HN4[] The party alleging a § I violation must prove **[**4]** that two or more persons entered into an agreement to restrain trade. Aquatherm Indus. v. Florida Power & Light Co., 145 F.3d 1258,1262 (11th Cir 1998). The antitrust plaintiff must also prove that the restraint is unreasonable. Retina Assocs. v. Southern Baptist Hospital of Fla., 105 F.3d 1376, 1380 (11th Cir. 1997) (*per curiam*).

HN5[] Unreasonableness can be shown by demonstrating that the conduct in question is "historically . . . of the type that regularly poses anticompetitive consequences," and thus qualifies as a *"per se"* violation. Id. at 1381. In lieu of this, the plaintiff can establish a *per se* violation by means of "a preliminary examination of market conditions" which discloses an "anticompetitive effect," with no "procompetitive justification." Id.

Failing either of these alternatives, the antitrust plaintiff must cope with the "rule of reason," which requires proof that the defendant's "conduct had an anticompetitive effect in the relevant market; and . . . that no procompetitive rationale would justify the conduct." Id. at 1383. This approach requires more extensive evidence of an anti-competitive **[**5]** effect than is necessary in connection with a preliminary examination. See id. (The "preliminary examination of market conditions . . . is not as detailed as the one required by the rule of reason, and has been referred to as a 'quick look' at market conditions." (citation omitted)).

The SAC alleges that the Defendants have agreed amongst themselves, with other PBMs, and/or with plan sponsors to fix prices that would be paid to Plaintiffs for their services. SAC at PP 66-68, 74-77. The Plaintiffs characterize this as a "horizontal" scheme. Id. at P 59. See generally, e.g., Southern Card & Novelty v. Lawson Mardon Label. Inc., 138 F.3d 869, 875 n.9 (11th Cir.1998) **HN6**[] ("Restraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints, and those imposed by agreement between firms at different levels of distribution as vertical restraints." (citation omitted)). They also assert that the price-fixing constitutes a *per se* violation of § 1. See SAC at PP 67, 76; see generally, United States v. Giordano, 261 F.3d 1134, 1142 (11th Cir. 2001) (referring to the "long-established rule that a horizontal **[**6]** price-fixing agreement . . . is *per se* illegal").

In their motion to dismiss, the Defendants implicitly concede that a price-fixing conspiracy among PBMs would constitute a *per se* violation of § 1. The Defendants **[*1284]** do, however, claim that a conspiracy involving plan sponsors would create a "vertical" restraint, rather than a "horizontal" one, and therefore is not a *per se* violation. They assert that the allegations of price-fixing are deficient in a number of other respects as well. These assertions are considered in the sub-sections which follow.

Conspiracy

(1) Plus Factors

To establish their claim, the Plaintiffs will have to prove that the Defendants reached an agreement among themselves or with others on the price to be paid for Plaintiffs' services. **HN7**[] Recognizing the unlikelihood that direct evidence of a price-fixing agreement will be available, courts permit the existence of such an agreement to be inferred from indirect evidence. See, e.g., Williamson Oil Co. v. Philip Morris USA, 346 F.3d 1287,1299-1300 (11th Cir. 2003).

HN8[] Indirect evidence often involves proof that the antitrust defendants demand similar contractual terms in dealing **[**7]** with the plaintiffs. This "parallel" behavior is not enough by itself, however, as it is just as plausible that the behavior simply reflects "a rational, independent calculus by each" of the defendants, rather than a conspiracy to fix prices. Id. at 1299. The courts have accordingly "fashioned a test under which price fixing plaintiffs must demonstrate the existence of 'plus factors' that remove their evidence from the realm of equipoise and render that evidence more probative of conspiracy rather than of conscious parallelism." *Id. at 1301*. "One prominent 'plus factor' . . . is a showing that the defendants' behavior would not be reasonable or explicable (i.e., not in their legitimate economic self-interest) if they were not conspiring to fix prices . . . " *City of Tuscaloosa v. Harcros Chemicals, 158 F.3d 548, 572 (11th Cir. 1998)*.

The Plaintiffs accuse the Defendants of "parallel behavior." SAC at P 53. They describe this behavior as follows:

> [The Defendants all] have substantially similar contracts in which all material provisions are the same; all are engaged in the formation of third-party utilization services, including Hub RX [*sic* - **[**8]** RxHub]; all used the AWP [average wholesale price] and MAC [maximum allowable cost] to set their reimbursement prices to pharmacies; all require member pharmacies to use and purchase similar software designed to process claims and to maintain their detrimental pricing scheme; all impose unreasonable and unnecessary additional costs on member pharmacies; all continue to "push" drugs, by placing them on their formulary, that are not the least expensive or even the most therapeutic or effective of a given class of drugs; all contractually require pharmacies to turn over confidential customer data and then use that data to divert customers to their mail-order pharmacies; all refuse to disclose to pharmacies what price they have negotiated for formulary drugs with the drug manufacturer, including any rebates, discounts, or incentives they received; all refuse to share any of the savings they receive via these rebates and discounts with either the pharmacies or the health plan members; and all impose the same or similar unconscionable and punitively low reimbursement rates on member pharmacies.

Id. [2]

[9]** The Defendants argue that "each of the parallel practices alleged . . . is . . . in the **[*1285]** economic interest of individual PBMs acting independently and therefore cannot support an inference of conspiracy." Defendants' Brief (doc. 28) at 17. Because the SAC "proffers no plus factors reflecting unlawful parallel conduct," the Defendants assert, the complaint must be dismissed. Id.

The premise underlying this argument is that a complaint which fails to allege a valid plus factor is subject to dismissal pursuant to *Rule 12(b)(6)*. The Defendants imply that such is the case, citing 3 cases for the proposition that "'plus factors' must be alleged." Id. at 16. Those cases are not on point, however, as they addressed the sufficiency of the plaintiffs evidence, rather than the adequacy of the complaint. See *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764-65, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*; *Williamson Oil, 346 F.3d at 1300-01*; *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1456 (11th Cir. 1991)*.

A case which the court believes *is* on point is the decision of the United States Supreme Court in *Swierkiewicz, supra.* There the plaintiff alleged **[**10]** that his employer discriminated against him on the basis of age and national origin. The Second Circuit affirmed dismissal of the complaint because the plaintiff did not allege "circumstances that support an inference of discrimination." *Swierkiewicz, 534 U.S. at 510*.

The Court reversed, stressing that ***HN9***[] under "the Federal Rules' simplified standard for pleading, [a] court may dismiss a complaint only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations.'" *Id. at 514* (citation omitted). This "simplified notice pleading standard," the Court explained, "relies on liberal discovery rules and summary judgment motions to define disputed facts and issues and to dispose of unmeritorious claims." *Id. at 512*.

The defendant in Swierkiewicz argued "that allowing lawsuits based on conclusory allegations of discrimination to go forward will burden the courts and encourage disgruntled employees to bring unsubstantiated suits." *Id. at 514*. The Court was unswayed:

---

[2] The Plaintiffs describe AWPs and MACs as "prices for drugs that are established by known and unknown sources" which are "published in industry trade magazines and databases." SAC at P 31. RxHub is described by the Defendants as "an electronic link that permits healthcare providers, pharmacies and PBMs to share medical information and specific identification of prescription. drugs for individual patients." Defendants' Brief (doc. 28) at 3.

> Whatever the practical merits of this argument, the Federal Rules do not contain a heightened **[**11]** pleading standard for employment discrimination suits. ***HN10***[] A requirement of greater specificity for particular claims is a result that must be obtained by the process of amending the Federal Rules,. and not by judicial interpretation. . . . Furthermore . . . . [*F.R.Civ.P.] 8(a)*[, which calls for "a short and plain statement of the claim showing that the pleader is entitled to relief,"] establishes a pleading standard without regard to whether a claim will succeed on the merits. Indeed, it may appear on the face of the pleadings that a recovery is very remote and unlikely but that is not the test.

Id. at 514-15 (quotation marks & citations omitted).

The Court made clear in Swierkiewicz that ***HN11***[] for purposes of *Rule 12(b)(6)*, so-called "conclusory" allegations are not inherently objectionable. See, e.g., *Walker v. Thompson, 288 F.3d 1005, 1008 (7th Cir. 2002)* ("Cases. . . which say that 'conclusory allegations' of conspiracy . . . are not enough to withstand a motion to dismiss cannot be squared with . . . *Swierkiewicz* . . . ."). Factual allegations in a complaint -- even if "conclusory" -- are sufficient if they allow the defendant to understand **[**12]** **[*1286]** the gist of the plaintiff's claim, thereby making it possible to formulate a meaningful response:

> All that need be specified is the bare minimum facts necessary to put the defendant on notice of the claim so that he can file an answer. . . . All that's, required to state a claim in a complaint filed in a federal court is a short statement, in plain (that is, ordinary, nonlegalistic) English, of the legal claim . . . . The cqurts keep reminding plaintiffs that they don't have to file long complaints, don't have to plead facts, don't have to plead legal theories. . . . Had Higgs merely alleged that the defendants had retaliated against him for filing a suit, without identifying the suit or the act or acts claimed to have constituted retaliation, the complaint would be insufficient . . . because the defendant would not have known how to respond. But Higgs specified both the suit and the act of retaliation. . . , and this specification was enough to enable the defendants to file an answer.

Higgs v. Carver, 286 F.3d 437, 439 (7th Cir. 2002) (citation & quotation marks omitted). See also *Swierkiewicz, 534 U.S. at 512* ***HN12***[] (The function of the **[**13]** complaint is "simply [to] 'give the defendant fair notice of what the plaintiffs claim is and the grounds upon which it rests.'" (quoting *Conley, 355 U.S. at 47*)); *In re Initial Public Offering Securities Litigation, 241 F. Supp.2d 281, 324 n.42* & accompanying text (S.D. N.Y. 2003).

As discussed, ***HN13***[] "plus factor" allegations serve to substantiate a plaintiffs conspiracy allegation; their purpose is not to clarify an otherwise incomprehensible claim. Just as an employment-discrimination plaintiff need not allege "circumstances that support an inference of discrimination," *Swierkiewicz, 534 U.S. at 510*, there is no need for an antitrust plaintiff to allege a "plus factor [which] generates an inference of illegal price fixing." *Williamson Oil, 346 F.3d at 1301*. Cf. *Swierkiewicz, 534 U.S. at 510-11* ("The prima facie case [applicable to a claim of employment discrimination] . . . is an evidentiary standard, not a pleading requirement. . . . This Court has reiterated that the prima facie case relates to the employee's burden of presenting evidence that raises an inference of discrimination. . . . This **[**14]** Court has never indicated that the requirements for establishing a prima facie case . . . also apply to the pleading standard that plaintiffs must satisfy in order to survive a motion to dismiss."). But see *Twombly v. Bell Atlantic Corp., 313 F. Supp.2d 174, 180-82 (S.D. N.Y. 2003)* (declining to adhere to Swierkiewicz in the antitrust context, for reasons this court regards as unpersuasive). The Defendants' assertion that the SAC does not allege valid "plus factors" is therefore irrelevant under *Rule 12(b)(6)*.

(2) Specificity

The Plaintiffs allege that the Defendants have "conspired . . . to fix reimbursement disbursement rates" paid to independent pharmacies. SAC at P 46. The Defendants complain that more specific allegations are required, such as "when and how" price-fixing agreements were made, the "terms of such alleged agreements, and how those alleged agreements were supposedly implemented." Defendants' Brief at 12.

In support of their position, the Defendants cite 3 decisions of the Eleventh Circuit Court of Appeals -- *Aquatherm, supra*, *Lombard's v. Prince Mfg., 753 F.2d 974 (11th Cir. 1985)*, and *Fullman v. Graddick, 739 F.2d 553 (11th Cir. 1984).* **[**15]** See Defendants' Brief at 11.

The last-cited of these cases stated that ***HN14***[] "under the so-called notice rules of pleading," a complaint must include "sufficient **[*1287]** detail . . . so that the defendant . . . can obtain a fair idea of what the plaintiff is complaining." *Fullman, 739 F.2d at 556* (citation omitted). The Plaintiffs' contention that the Defendants have conspired to fix the price to be paid for the services of independent pharmacies gives the Defendants a "fair idea" as to the nature of the Plaintiffs' grievance.

Fullman goes on to declare that "in civil rights and conspiracy actions, . . . more than mere conclusory notice pleading is required." Id. "It is not enough," the court added, "to simply aver in the complaint that a conspiracy existed." *Id. at 557*. Thus a "complaint may justifiably be dismissed because of the conclusory, vague and general nature of the allegations of conspiracy." Id.

Given these comments, *Fullman* appears to stand for the proposition that conspiracy allegations are subject to a heightened pleading standard. See *Ross v. State of Alabama, 15 F. Supp.2d 1173, 1191 (M.D. Ala. 1998)* (DeMent, **[**16]** J.) (citing Fullman in asserting that "a more stringent pleading standard is required to state a claim under *§ 1983*); *Malone v. Chambers County Board of Commrs., 875 F. Supp. 773, 790 (M.D. Ala. 1994)* (Albritton, J.) (likewise stating that Fullman imposes a "'heightened pleading' standard" with respect to *§ 1983* complaints). ***HN15***[] The United States Supreme Court has since rejected that proposition, holding that courts have no authority to create exceptions to the "simplified pleading standard" generally applicable under the Federal Rules of Civil Procedure. *Swierkiewicz, 534 U.S. at 513*.

In identifying the appropriate pleading standard under *Rule 12(b)(6)*, Aquatherm referred to Lombard's, which in turn referred to *Quality Foods de Centro America v. Latin American Agribusiness Dev. Corp., 711 F.2d 989 (11th Cir. 1983)*. See *Aquatherm, 145 F.3d at 1261*; *Lombard's, 735 F.2d at 975*. Quality Foods stated in pertinent part:

> ***HN16***[] Notice pleading is all that is required for a valid antitrust complaint. . . . By notice pleading, we mean that the complaint need only give the defendant fair **[**17]** notice of what the plaintiff's claim is and the grounds upon which it rests. . . .
>
> ***HN17***[] Because of the liberal pleading requirements of the Federal Rules, rarely will a motion to dismiss for failure to state a claim be granted. Indeed, such a motion should not be granted unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. . . . This is particularly true in an antitrust suit where the proof and details of the alleged conspiracy are largely in the hands of the alleged co-conspirators . . . .
>
> This is not to say that liberal pleading requirements negate the need to draft an antitrust complaint in a careful and thoughtful fashion. An antitrust complaint must comprehend a so-called prima facie case, . . . and enough data must be pleaded so that each element of the alleged antitrust violation can be properly identified. . . . Conclusory allegations that defendant violated the antitrust laws and plaintiff was injured thereby will not survive a motion to dismiss if not supported by facts constituting a legitimate claim for relief. . . . However, the alleged facts need not be spelled out with exactitude . **[**18]** . . .

Ouality Foods, 711 F.2d at 995 (quotation marks & citations omitted).

As mentioned, the Defendants argue that the Plaintiffs must include ***HN18***[] factual allegations as to "when and how" the price-fixing agreements were made, the "terms of such alleged agreements, and how those alleged agreements were supposedly implemented." Defendants' Brief at 12. **[*1288]** The court believes that these are precisely the kinds of "details" which Quality Foods indicated would likely be known only by the "alleged co-conspirators,". and hence should *not* be required in the complaint. *Ouality Foods, 711 F.2d at 995*. See also *Hospital Bldg. Co., 425 U.S. at 746* (" . . . in antitrust cases, where the proof is largely in the hands of the alleged conspirators, ... dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly." (citation & quotation marks omitted)).

An argument could be made that while nominally adhering to a liberal pleading standard, Aciuatherm and Lombard's actually applied a more rigorous standard in holding that the complaints under consideration failed to state an antitrust **[**19]** claim. See *Aquatherm, 145 F.3d at 1261*; *Lombard's, 753 F.2d at 975*. These cases could accordingly be construed as standing for the proposition that antitrust complaints are subject to a kind of *de facto* heightened pleading standard.

However, that rather cynical construction would put the Eleventh Circuit on a collision course with the United States Supreme Court. See *Walker, 288 F.3d at 1008* (quoted supra p. 7).

It would also greatly complicate the task of lower courts in this circuit. It is difficult, after all, to apply a heightened pleading standard which the Eleventh Circuit Court of Appeals has not explicitly recognized, much less attempted to articulate in any coherent fashion. And ***HN19***[] given the highly fact-sensitive nature of antitrust litigation, case-to-case consistency and predictability require clearly stated overarching principles to which both the courts and the parties can refer in determining what must be pled.

For these reasons, ***HN20***[] the court declines to infer from Aquatherm and Lombard's that antitrust complaints are subject to a more exacting standard than, for example, "a complaint in an employment discrimination **[**20]** lawsuit." *Swierkiewicz, 534 U.S. at 508*. Since the Eleventh Circuit Court of Appeals has not explicitly ruled otherwise, the court assumes that in the antitrust context, "the ordinary rules for assessing the sufficiency of a complaint apply." *Id. at 511*. The conspiracy allegation in the SAC passes muster under these very lenient rules, as it makes reasonably clear what the Defendants are accused of having done, thereby permitting the Defendants to formulate an appropriate response. See generally *Higgs, 286 F.3d at 439* (quoted supra p. 8).

The Cooperative-Buying Defense and Antitrust Injury

The Defendants argue "that when Plan Sponsors use an individual PBM to administer their prescription drug benefit plans, the economic effect of that action is similar to that of a cooperative purchasing group." Defendants' Supplemental Submission (Doc. 91, case no. CV-03-HS-2695-NE), at 5. This is significant, the Defendants explain, because "mere buying coops" receive "favorable treatment under the *Sherman Act*." *Id.*

According to the Defendants, the "seminal" case on this point is *Kartell v. Blue Shield of Massachusetts, 749 F.2d 922 (15th Cir. 1984).* **[**21]** Id. at 6. The plaintiffs in Kartell were physicians who alleged that Blue Shield violated the *Sherman Act* by limiting the amount that they could charge for services provided to Blue Shield subscribers. The court held that ***antitrust law*** did not forbid Blue Shield from fixing prices to be charged to others (*i.e.,* the subscribers). *Kartell, 749 F.2d at 927*.

To reach this result, the First Circuit implicitly acknowledged the need to distinguish *Mandeville Island Farms v. American Crystal Sugar Co., 334 U.S. 219, 92 L. Ed. 1328, 68* ***[*1289]*** *S. Ct. 996 (1948)*. See *Kartell, 749 F.2d at 925*. In that case, northern California beet growers filed an action under the *Sherman Act* against a sugar refiner, claiming that it had conspired with two other refiners to fix the prices paid by the refiners for beets. *Mandeville, 334 U.S. at 221-22*. These "refiners controlled . . . the only practical market for beets grown in northern California." *Id. at 223*.

The Ninth Circuit affirmed the district court's dismissal of the complaint for failure to state a cause of action. *Id. at 221*. The Court reversed, making the following pertinent **[**22]** observations:

> It is clear that the agreement [among the refiners] is the sort of combination condemned by the Act, even though the price-fixing was by purchasers, and the persons specially injured . . . are sellers, not customers or consumers. . . .
>
> ***HN21***[] The statute does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers. Nor does it immunize the outlawed acts because they are done by any of these . . . . The Act is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices by whomever they may be perpetrated.

Id. at 235-36 (footnotes omitted). See also *id. at 235 n. 16* (favorably citing cases which "involved outlawed practices by persons who were both purchasers and sellers, and forbidden effects upon sellers as well as purchasers and consumers").

Kartell included Mandeville among 3 cases cited to illustrate the assertion that in situations "where courts have forbidden an 'organization' to buy a good or service[,] . . . the buyer was typically a 'sham' organization seeking only to combine otherwise independent buyers in order to suppress **[**23]** their otherwise competitive instinct to bid up [the] price." *Kartell, 749 F.2d at 925*. The Defendants likewise argue that Mandeville is distinguishable because the price-fixing scheme was implemented by way of a "sham organization." Defendants' Reply (Doc. 31) at 7.

There is, however, no indication in Mandeville that the 3 refiners formed *any kind* of "entity," let alone one which was a "sham." Nor does*Mandeville* otherwise suggest that its analysis is limited in the fashion posited by Kartell or the Defendants.

The idea behind the "sham" distinction, the Defendants suggest, is that price-fixing is permissible if it serves "a legitimate business purpose in seeking to reduce costs and improve efficiencies." Defendants' Supplemental Submission at 7. But this simply begs the question as to when price-fixing is "legitimate." Nor does Kartell offer a coherent and satisfactory answer to that question.

The Defendants also rely on *Austin v. Blue Cross & Blue Shield of Alabama, 903 F.2d 1385 (11th Cir. 1990)*. See Defendants' Supplemental Submission at 7. There the court stated that agreements between Blue Cross and various hospitals **[**24]** setting the price to be paid for health care rendered to Blue Cross subscribers was not an unreasonable restraint of trade. *Austin, 903 F.2d at 1391*.

However, Austin's benign view of the agreements was based on the absence of allegations that "Blue Cross conspired with the hospitals to engage in predatory pricing," or that the agreed-upon charges were below the hospitals' "average variable cost" or "total cost." Id. See generally *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 584 n.8, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)* ***HN22***[] ("Predatory pricing" is a term that "has been used chiefly in cases in which a single firm, having a dominant share of the relevant market, cuts its prices" below "some appropriate **[*1290]** measure of cost" as a means of forcing "competitors out of the market, or perhaps to deter potential entrants from coming in."). Allegations to that effect are made by the Plaintiffs in this case. See SAC at PP 46, 60, 63, 67, 68, 71, 76, 77, & 80.

While Austin is not on point, it does offers some guidance in suggesting that ***HN23***[] the distinction between "legitimate" buying arrangements and those that run afoul of the *Sherman Act* turns largely on the concept **[**25]** of "antitrust injury." See *Austin, 903 F.2d at 1389-91*. An antitrust injury is one which "result[s] from interference with the freedom to compete." *Johnson v. University Health Servs., 161 F.3d 1334, 1338 (11th Cir. 1998)*. More specifically, it is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." *DeLong Equip. Co. v. Washington Mills Electro Minerals Corp., 990 F.2d 1186, 1198 (1993)*, amended, *997 F.2d 1340 (11th Cir. 1993)* (citation & quotation marks omitted).

HN24[] "Even where the conduct complained of is illegal per se, a plaintiff must show that it is adversely affected by an *anti-competitive* aspect of the defendant's conduct." Id. (citation & quotation marks omitted; emphasis in original). In the absence of an antitrust injury, a plaintiff does not have standing to prosecute an action under *§ 1 of the Sherman Act*. *Eichorn v. AT &T Corp., 248 F.3d 131, 140 (3d Cir. 2001)*.

The SAC makes the following allegations regarding the nature of the harm caused by the Defendants:

> PBMs engage in numerous anti-competitive **[**26]** practices that have a detrimental effect on the competition for the dispensing and sale of prescription drugs reimbursed by insurance and generally result in increased prescription drug costs to both consumers and pharmacies and lower reimbursement rates. to the pharmacies. These practices . . . include . . . :
>
> a. Fixing and artificially depressing the prices to be paid to pharmacies for prescription drugs.

> b. Accepting "kickbacks" such as rebates, discounts, and other undisclosed incentives from drug manufacturers in return for placing the manufacturer's drugs on the PBMs' formulary and "pushing" these drugs on physicians and pharmacists regardless of whether the drug is the least expensive and most therapeutically effective drug available and using these undisclosed kickbacks to set anticompetitive prices for drugs filled through their in-house mail order pharmacies.
>
> c. Conspiring to and using their oligopolistic market power to force unconscionable reimbursement rates on "member pharmacies" with the specific intent to manipulate prices. These reimbursement rates are far below the rates that would apply in a true competitive market and are generally below any measure of **[**27]** Independent Pharmacist's actual costs including their variable, marginal, and/or actual costs. Additionally, the Defendants . . . unilaterally change reimbursement rates without negotiating with the member pharmacies and force these new rates upon them.
>
> d. Acting as a conduit for the [plan sponsors] . . . to engage in horizontal restraint of trade by removing the need and existence for any market whereby they must compete in order to secure the services of pharmacist[s] to service their insured. The removal of this market and conferring of the aggregate power to negotiate these services upon Defendants and other **[*1291]** PBMs amounts to horizontal price fixing as it allows for the stabilization and repression of the fees pharmacists would be able to charge in a free and open market.
>
> e. Diverting health plan members to mail order pharmacies, which are owned by Defendants and other PBMs, by prohibiting retail pharmacies from providing more than a 30-day supply of drugs, while allowing their own mail order pharmacies to provide 90-day supplies, through direct prohibitions on certain network pharmacies[,] preventing them from dispensing refill and follow-up prescriptions, and by undercutting **[**28]** the co-pay the network pharmacy is required to charge for each 30-day refill.
> f. Removing the physician and pharmacist from their vital role in the health care equation. PBMs "push" their formulary drugs on health plan members, bypassing the physician and the pharmacist, regardless of whether the formulary drug is the cheapest or most therapeutic drug in that class.
> g. Requiring pharmacists to contact the prescribing physician and patient, if a non-formulary drug was prescribed, and encourage a change to a formulary drug; and to provide the prescribing physician with a list of alternative formulary drugs,
> h. Requiring member pharmacies to use and pay for common software systems to process claims that are designed to maintain the detrimental pricing schemes.
> i. Imposing unreasonable and unnecessary additional costs on member pharmacies, including charging them a fee for each claim processed and a fee when the pharmacy seeks information from a PBM.
> j. Attempting to extend their oligopoly power in many directions[,] including the diversion of more profitable refill prescription business to their in-house mail order pharmacies and wholesale markets.

SAC at P 5. See **[**29]** also, e.g., id. at P 4 ("PBMs now maximize their revenue through . . . methods resulting in egregious injuries to Plaintiff Independent Pharmacies and end consumers."); id. at P 62 ("The Defendants' practices harm competition in the marketplace and create antitrust injury.").

The Defendants characterize these allegations as "concluaory," and argue that the SAC is "defective as a matter of law" because the Plaintiffs "have not pled a single fact to explain how consumers or the 'marketplace' are injured as a result of [their] . . . allegedly anticompetitive conduct." Defendants' Brief at 6. Restating this argument in terms relevant to *Rule 12(b)(6)*, the Defendants apparently take the position that the complaint does not reasonably support the inference that antitrust injury has occurred.

The Court disagrees. A premise underlying the Defendants' argument is that there can be no antitrust injury if consumers are not adversely affected by their alleged price-fixing. See id. That premise may not be unanimously accepted. See *Telecor Comms. v. Southwestern Bell Tel. Co., 305 F.3d 1124, 1134 (10th Cir. 2002)* (Mandeville "strongly suggests that suppliers . **[**30]** . . are protected by antitrust laws even when the anti-competitive activity does not harm end-users. . . . Tenth Circuit case law also appears to reject the notion that a monopsony plaintiff must prove end-user impact."); see generally Black's Law Dictionary (8th ed.) (The term "monopsony" is used to describe a "situation in which one buyer controls the market.").

The issue is moot here, however, as the SAC suggests at least one scenario which would satisfy the consumer-injury requirement, **[*1292]** and which is not implausible: By conspiring to hold down prices paid to independent pharmacies (among other alleged actions), PBMs will bankrupt those pharmacies, thereby capturing a larger segment of the insurance-paid prescription market for the PBMs' own prescription-dispensing business, and allowing the PBMs to charge higher prices for that service. See SAC at P 76 (Each of the Defendants' "practices harms consumers . . . by eliminating independent pharmacists nationwide."); id. at P 33 (". . . Defendants' anticompetitive conduct is done with the purpose and specific intent to expand . . . their stranglehold on the market of insurance reimbursed prescription drug sales."); *id.* ***[**31]*** *at P 63* (The Defendants' "practices will ultimately drive independent pharmacists out of business," which will "harm competition in the marketplace and create antitrust injury."); see generally *Levine v. Central Florida Medical Affiliates, 72 F.3d 1538, 1551(11th Cir. 1996)* ***HN25***[] (". . . the plaintiff may either prove that the defendants' behavior had an actual detrimental effect on competition, or that the behavior had the potential for genuine adverse effects on competition." (quotation marks omitted)).

The Defendants ridicule this theory on several grounds. They argue that the facts in this case don't fit the mold of a "true" claim of "predatory pricing" because there is no contention that the Defendants are selling a product or service at below cost. Defendants' Brief at 9. This case is atypical, the Defendants explain, because the allegation is that they have conspired to create an opportunity to charge supra-competitive prices by *paying* for a service at below the Plaintiffs' cost. Id.

One problem with the Defendants' position on this point is that it runs counter to a case upon which they themselves rely: As indicated earlier, Austin ***HN26***[] implicitly accepts **[**32]** the proposition that prices fixed by the purchaser *can* be predatory. See *Austin, 903 F.2d at 1391* ("There is no claim that Blue Cross conspired with the hospitals to engage in predatory pricing.").

The more fundamental problem is that the Defendants do not explain why their purchaser/seller distinction matters. The potential effect of the Defendants' alleged scheme on retaillevel competition is in essence the same as is hypothesized in cases involving predatorily established pricing by sellers. Thus the antitrust injury is likewise the same. See *Mandeville, 334 U.S. at 235-242*; *Todd v. Exxon Corp., 275 F.3d 191, 201 (2d Cir. 2001)* ***HN27***[] (". . . a horizontal conspiracy among buyers to stifle competition is as unlawful as one among sellers."). And the Defendants' alleged scheme is actually more plausible, as it does not entail the risk associated with predatory pricing. Compare *Matsushita, 475 U.S. at 589* ("Absent some assurance that the hoped-for monopoly will materialize, *and* that it can be sustained for a significant period of time, 'the predator must make a substantial investment with no assurance that it will pay **[**33]** off.'" (citation omitted; emphasis in original)).

Alluding to this lack of risk, the Defendants point out that they are not alleged to be "acting against their short-run economic interests" by negotiating for lower prices. Defendants' Brief at 9-10. A credible allegation to this effect would tend to support a finding of conspiracy. See *City of Tuscaloosa, 158 F.3d at 572* (quoted supra p. 5). But it is not a prerequisite to such a finding. Cf. *In re Brand Name Prescription Drugs Antitrust Litigation, 186 F.3d 781, 787 (7th Cir. 1999)* ***HN28***[] (While the plaintiffs were required "to present economic evidence that would show that the hypothesis of collusive action was more plausible than that of individual **[*1293]** action[,] . . . they did not . . . have to exclude all possibility that the manufacturers' price discrimination was unilateral rather than collusive."). Nor is this allegation relevant to the question of antitrust injury.

The Defendants also observe that "the SAC makes no allegation regarding" their "ability" to raise prices after independent pharmacies are "driven. . . out of the market." Defendants' Brief at 10. This allegation, however, is implicit **[**34]** in the Plaintiffs' contention that the Defendants' "practices harm consumers . . . by eliminating independent pharmacists nationwide," SAC at P 76, and are designed to "expand . . . their stranglehold on the market of insurance reimbursed prescription drug sales." Id. at P 33. See also id. at P 5 (alleging that the

Defendants are "attempting to extend their oligopoly power" to the "refill prescription business" [3]). That is sufficient under *Rule 12(b)(6)*. See generally 5 Wright & Miller Federal Practice and Procedure: Civil 3d § 1216 ***HN29***[] (". . . the complaint must contain either direct allegations on every material point . . . , or the pleading must contain allegations from which an inference fairly may be drawn by the district court that evidence on the these material points will be available and introduced at trial."); compare *Phillips v. Grendahl, 312 F.3d 357, 365 (8th Cir. 2002)* ("Although the complaint does not literally plead that defendants lacked a permissible purpose . . . , ***HN30***[] for purposes of notice pleading, lack of permissible purpose is implicit in the allegation that they did have an impermissible purpose."); *Quality Foods, 711 F.2d at 996-97* **[**35]** (inferring that various key allegations were made in an antitrust complaint on the basis of other allegations therein).

The Defendants cite *Spanish Broadcasting Sys. of Florida v. Clear Channel Comms., 376 F.3d 1065 (11th Cir. 2004)*, in which the court affirmed dismissal under *Rule 12(b)(6)* of an antitrust complaint that "offered only conclusory allegations of harm to competition." *Id. at 1079*. See Defendants' Reply at 2.

Spanish Broadcasting presents this court with the same dilemma as the decisions in Aquatherm and Lombard's, discussed supra p.10 -- namely, a holding which is difficult to reconcile with the lenient pleading standard that the court purports to apply. See *Spanish Broadcasting, 376 F.3d at 1070-79*. Nevertheless, for the reasons stated earlier, the court adheres **[**36]** to the position that ***HN32***[] antitrust complaints are to be measured against the Federal Rules' "simplified pleading standard." *Swierkiewicz, 534 U.S. at 513*. By this measurement, the SAC adequately alleges antitrust injury.

Common Agent

The Plaintiffs allege that the sponsors of the drug-benefit plans use the Defendants as their "common agents" in a scheme to fix prices to be paid for the Plaintiffs' services. SAC at PP 5, 56-57. The Defendants argue that this allegation is deficient because no claim is made that the sponsors agreed among themselves to implement such a scheme. Defendants' Brief at 14.

To support their contention that an allegation to this effect is necessary, the Defendants cite *United States v. Chandler, 376 F.3d 1303 (11th Cir. 2004)*, a criminal-conspiracy case. Stated in terms applicable to this case, however, Chandler simply stands for the proposition that a plan sponsor must be aware that by using a PBM, it and the PBM's other plan sponsors would be able to compel independent pharmacies to accept lower prices than the pharmacies **[*1294]** could command through separate negotiations with each of the sponsors. See *id. at 1317* **[**37]** (construing a decision of the United States Supreme Court as holding that ***HN33***[] "where the 'spokes' of a conspiracy *have no knowledge of* or connection with any other, dealing independently with the hub conspirator, there is not a single conspiracy," and adding that "we too have noted 'the importance in a wheel type conspiracy of such *knowledge by individual spokes of the existence of other spokes"* (citation omitted; emphasis added)).

The SAC implies that plan sponsors share, and are aware that they share, a common strategy -- *i.e.,* the utilization of a PBM to combine purchasing power and drive down pharmacy costs. In paragraph 5 of the SAC, for example, the Plaintiffs allege:

> PBMs. . . act[] as a conduit for [plan sponsors] . . . to engage in horizontal restraint of trade by removing the need and existence for any market whereby they must compete in order to secure the services of pharmacist[s] to service their insured. The removal of this market and conferring of the aggregate power to negotiate these services upon Defendants and other PBMs amounts to horizontal price fixing as it allows for the stabilization and repression of the fees pharmacists would be able **[**38]** to charge in a free and open market.

The SAC goes on to allege:

---

[3] ***HN31***[] An "oligopoly" is the "control or domination of a market by a few large sellers." Black's Law Dictionary (8th ed.). By definition, it results in "high prices." Id.

> . . . by collectively conferring their pharmacy purchase decisions upon Defendants and other PBMs, [plan sponsors] . . . effectively accomplished the same anti-competitive behavior which would have existed if they had themselves directly engaged in horizontal price fixing. By using Defendants as common agents, the . . . [plan sponsors] are able to present retail pharmacies with worse coordinated offers and bargaining positions . . . .

SAC at P 56. See also id. at P 57 ("Defendants and [plan sponsors]. . . engage in price fixing. . . .").

Based on these allegations, the court rejects the Defendants' argument that the common-agent theory is legally insufficient.See *Bellevue Drug Co. v. Advance PCS, 2004 U.S. Dist. LEXIS 3627, No. 03-4731, 2004 WL 724490, at *5 (E.D. Pa. Mar. 2, 2004)* (Robreno, J.) (The "complaint alleges . . . that each plan sponsor is fully aware that Advance PCS negotiates with . . . pharmacies on behalf of many other plan sponsors." If true, the plaintiffs' allegations "may give rise to the inference that Advance PCS acted with the acquiescence and understanding of the plan sponsors **[**39]** it represented and that each plan sponsor 'had an awareness of the general scope and purpose of the undertaking.'" (quoting *United States v. Masonite Corp., 316 U.S. 265, 275, 86 L. Ed. 1461, 62 S. Ct. 1070, 1942 Dec. Comm'r Pat. 777 (1942))*; see also *Brady Enters. v. Medco Health Solutions, 2004 U.S. Dist. LEXIS 15155, No. 03-4730,2004 WL 1737651, at *1 (E.D. Pa. Aug. 3, 2004)* (Fullam, J.) (concurring with the decision in Bellevue).

The Defendants also argue that if a common-agent theory is "cognizable," it establishes a vertical restraint, and is therefore subject to the "rule of reason." Defendants' Brief at 15. See *State Oil Co. v. Khan, 522 U.S. 3, 18, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997)* ("There is insufficient economic justification for per se invalidation of vertical maximum price fixing."). The Plaintiffs' invocation of the theory fails, the argument continues, because nothing in the SAC "suggests . . . a rule of reason violation." Defendant's Brief at 15.

HN34[] "[A] restraint is horizontal. . . because it is the product of a horizontal agreement." *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 731 n.4, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)*. Thus if plan sponsors have conspired to fix prices, a horizontal restraint **[*1295]** is created even **[**40]** if PBMs are used to carry out the scheme. Cf. id. ("[A] facilely vertical restraint imposed by a manufacturer only because it has been coerced by a 'horizontal cartel' agreement among his distributors is in reality a horizontal restraint.").

The Defendants' argument fails for another reason. ***HN35***[] The *"per se"* designation is reserved for those "types of restraints" which are "deemed unlawful" precisely because they "have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit." *State Oil, 522 U.S. at 10*. Thus the Plaintiffs' allegation of a *per se* violation, see SAC at PP 67 & 76, logically implies a violation of the rule of reason. See *State Oil, 522 U.S. at 10* ("*Per se* treatment is appropriate 'once experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it.'" (citation omitted)). For purposes of *Rule 12(b)(6)*, then, the common-agent theory would be viable even if the Defendants were correct in asserting that it does not establish a *per se* violation.

Pricing

The Plaintiffs allege that the **[**41]** fees paid to them by the various Defendants "are roughly the same and/or remarkably similar." SAC at P 32. The Defendants argue that "these nebulous allegations of similar rates or prices do not support the inference that there was any conspiracy to fix such rates or prices." Defendants' Brief at 18.

HN36[] Illicit price-fixing does not require a finding that the prices set are "uniform and inflexible." *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 222, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*. As the Supreme Court explained,

> ***HN37***[] An agreement to pay or charge rigid, uniform prices would be an illegal agreement under the *Sherman Act*. But so would agreements to raise or lower prices whatever machinery for price-fixing was used. . . . Price fixing includes more than the mere establishment of uniform prices . . . . Prices are fixed . . . if the range within which purchases or sales will be made is agreed upon, if the prices paid or charged are to be at a certain level or on ascending or descending scales, if they are to be uniform, or if by various formulae they are

> related to the market prices. . . . [Price-fixing] in its various manifestations is implicitly an artificial stimulus applied to (or **[**42]** at times a brake on) market prices, a force which distorts those prices, a factor which prevents the determination of those prices by free competition alone.

Id. at 222-23.

The SAC ***HN38***[] alleges that the Defendants have conspired to keep the prices paid to the Plaintiffs at below market-rate levels. See, e.g., SAC at PP 56, 67, & 76. Socony-Vacuum instructs that this allegation suffices for purposes of the *Sherman Act*.

The Defendants' alternative argument fails for the same reason. Citing the relevant contracts, copies of which have been submitted under seal, the Defendants claim that the fees actually paid by them to the Plaintiffs are "widely divergent." Defendants' Brief at 18. See generally *Harris v. Ivax Corp., 182 F.3d 799, 802 n.2 (11th Cir. 1999)* ***HN39***[] (". . . a document central to the complaint that the defense appends to its motion to dismiss is . . . properly considered, provided that its contents are not in dispute."). This alleged discrepancy does not rule out the possibility that even the highest contract prices are artificially low -- *i.e.,* less than what the Defendants would be obliged to pay in the absence of a **[*1296]** price-fixing **[**43]** conspiracy. See *Socony-Vacuum, 310 U.S. at 223*. Thus even if the contracts can properly be taken into account, the prices set forth therein do not establish grounds for dismissal under *Rule 12(b)(6)*.

III. CONCLUSION

The SAC provides the Defendants with fair notice as to the nature and basis of the claims made against them. Moreover, the SAC affords no sound basis for ruling out the possibility that the Plaintiffs will be able to establish facts which establish a right of recovery for violation of the *Sherman Act*. The Defendants' motion to dismiss will therefore be denied.

A separate order will be entered.

October 13, 2004.

VIRGINIA EMPERSON HOPKINS

UNITED STATES DISTRICT JUDGE

ORDER DENYING MOTION TO DISMISS SECOND AMENDED COMPLAINT

The Defendants have filed a motion to dismiss the second amended complaint. Doc. 27. For the reasons stated in the court's written opinion, it is **ordered** that the motion is denied. The hearing presently scheduled on this motion is cancelled.

It is further **ordered** that any pending motions to dismiss the original or first amended complaint are denied **[**44]** as moot.

Done and ordered this 13 day of October, 2004.

[Geneva Pharms. Tech. Corp. v. Barr Labs., Inc.](#)

United States Court of Appeals for the Second Circuit

December 4, 2003, Argued ; October 18, 2004, Decided

Docket Nos. 02-9222, 02-9346

Reporter

386 F.3d 485 *; 2004 U.S. App. LEXIS 21586 **; 2004-2 Trade Cas. (CCH) P74,583

GENEVA PHARMACEUTICALS TECHNOLOGY CORP., as successor in interest to Invamed, Inc., Plaintiff-Appellant, APOTHECON, INC., Consolidated-Plaintiff-Appellant, v. BARR LABORATORIES INC., BRANTFORD CHEMICALS INC., BERNARD C. SHERMAN, APOTEX HOLDINGS, INC., APOTEX, INC., SHERMAN DELAWARE, INC., Defendants-Appellees.

Subsequent History: On remand at, Motion granted by *Geneva Pharm. Tech. Corp. v. Barr Labs., 2005 U.S. Dist. LEXIS 19069 (S.D.N.Y., Sept. 6, 2005)*

Prior History: [1]** Plaintiffs manufacturers appeal an order of the United States District Court for the Southern District of New York (Sweet, J.) entered October 7, 2002 granting partial summary judgment dismissing plaintiffs' claims that a competing manufacturer and its supplier conspired to restrain trade and monopolize the supply and retail markets of generic warfarin sodium in violation of 1 and 2 of the Sherman Antitrust Act and § 7 of the Clayton Act.

Geneva Pharms. Tech. Corp. v. Barr Labs., Inc., 201 F. Supp. 2d 236, 2002 U.S. Dist. LEXIS 8411 (S.D.N.Y., 2002)

Disposition: The court reversed the grant of summary judgment pursuant to the Sherman Act, affirmed the dismissal of the Clayton Act claim; and reversed the ruling that plaintiff Apothecon lacks standing to sue. The case was remanded to the district court for further proceedings.

HN4[] **Summary Judgment, Entitlement as Matter of Law**

Summary judgment is useful to isolate and dispose of factually unsupported claims, particularly in antitrust cases. This remedy is an essential tool in the area of ***antitrust law*** because it helps avoid wasteful and lengthy litigation that may have a chilling effect on pro-competitive market forces.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN5[] **Standards of Review, De Novo Review**

An appellate court reviews a grant of summary judgment de novo to ensure the district court applied substantive ***antitrust law*** correctly. A grant of such relief is proper if there are no genuine issues of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. Upon reviewing the record, the court draws all inferences and resolve all ambiguities in favor of the non-moving party. In an antitrust case, however, those inferences must be weighed in light of competing inferences of permissible competition, and the inference of conspiracy must be found the more reasonable in order for plaintiffs to escape summary judgment.

HN6[] **Scope, Monopolization Offenses**

Section 2 of the Sherman Antitrust Act makes it an offense for any person to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states. 15 U.S.C.S. § 2.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN7[] **Sherman Act, Claims**

To establish a violation of § 2 (15 U.S.C.S. § 2) of the Sherman Antitrust Act, plaintiffs must prove that defendants possessed monopoly power, and willfully acquired or maintained that power in the relevant market. The willful acquisition or maintenance of monopoly power is to be distinguished from growth or development that is the result of superior product, business acumen or historical accident.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN8[] **Regulated Practices, Market Definition**

In the context of an antitrust claim, a market definition provides the context against which to measure the competitive effects of an agreement.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN9[] **Market Definition, Relevant Market**

In the context of an antitrust claim, the goal in defining the relevant market is to identify the market participants and competitive pressures that restrain an individual firm's ability to raise prices or restrict output. The relevant market is defined as all products reasonably interchangeable by consumers for the same purposes, because the ability of consumers to switch to a substitute restrains a firm's ability to raise prices above the competitive level. Reasonable interchangeability sketches the boundaries of a market, but there may also be cognizable submarkets which themselves constitute the appropriate market for antitrust analysis. Defining a submarket requires a fact-intensive inquiry that includes consideration of such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. The term "submarket" is somewhat of a misnomer, since the "submarket" analysis simply clarifies whether two products are in fact "reasonable" substitutes and are therefore part of the same market. The emphasis always is on the actual dynamics of the market rather than rote application of any formula.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN10[] **Monopolies & Monopolization, Actual Monopolization**

Monopoly power is the power to control prices or exclude competition. It can be proven directly through evidence of control over prices or the exclusion of competition, or it may be inferred from a firm's large percentage share of the relevant market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN11[] **Monopolies & Monopolization, Actual Monopolization**

Where direct evidence is unavailable or inconclusive, monopoly power may be inferred from high market share. Although market share is not functionally equivalent to monopoly power, it is nevertheless highly relevant to the determination of monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN12[] **Monopolies & Monopolization, Actual Monopolization**

Courts will only draw the inference that a high market share leads to a fair inference of monopoly power only after considering market share in conjunction with other characteristics of the market, such as the strength of competition, the probable development of the industry, the barriers to entry, the nature of the anticompetitive conduct and the elasticity of consumer demand.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN13[] **Monopolies & Monopolization, Actual Monopolization**

Every first mover into a new market has a monopoly during its initial period of exclusivity. The antitrust laws have not been applied to condemn the transient advantage inherent in being a first mover because to do so would stifle innovation.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] Sherman Act, Claims

Section 1 of the Sherman Antitrust Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states. 15 U.S.C.S. § 1. As the language states, § 1 targets concerted action between two or more entities. Independent conduct falls outside the purview of this provision. To prove a § 1 violation, a plaintiff must demonstrate (1) a combination or some form of concerted action between at least two legally distinct economic entities that (2) unreasonably restrains trade.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN15[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Under the rule of reason, the plaintiffs bear an initial burden to demonstrate the defendants' challenged behavior had an actual adverse effect on competition as a whole in the relevant market. Because the antitrust laws protect competition as a whole, evidence that plaintiffs have been harmed as individual competitors will not suffice. If the plaintiffs satisfy their initial burden, the burden shifts to the defendants to offer evidence of the pro-competitive effects of their agreement. Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means. Ultimately, the factfinder must engage in a careful weighing of the competitive effects of the agreement -- both pro and con -- to determine if the effects of the challenged restraint tend to promote or destroy competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN16[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In the context of § 1 (15 U.S.C.S. § 1) of the Sherman Antitrust Act, to withstand a summary judgment motion, plaintiffs must present evidence of an actual illegal combination, and such evidence must satisfactorily cast doubt on inferences of independent action or proper conduct by defendants. The evidence must prove defendants had an intent to adhere to an agreement that was designed to achieve an unlawful objective; specific intent to restrain trade is not required.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN17[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

Exclusive dealing arrangements implicate *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Antitrust Act because they have the potential unreasonably to exclude competitors or new entrants from a needed supply, or to allow one supplier to deprive other suppliers of a market for their goods. Such agreements may also, however, have pro-competitive purposes and effects, such as assuring steady supply, affording protection against price fluctuations, reducing selling expenses, and promoting stable, long-term business relationships. In order not to condemn the positive aspects of exclusive dealing agreements, courts must take care to consider the competitive characteristics of the relevant market. Exclusive dealing is an unreasonable restraint of trade and a *§ 1* violation only when the agreement freezes out a significant fraction of buyers or sellers from the market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Evidence > Burdens of Proof > General Overview

HN18[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

Plaintiffs bear the initial burden to demonstrate an actual adverse effect on competition. Courts have not required proof of market power in *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Antitrust Act cases. If plaintiff can demonstrate an actual adverse effect on competition, such as reduced output, there is no need to show market power in addition.

Business & Corporate Law > Joint Ventures > Dissolution & Winding Up

Business & Corporate Law > Joint Ventures > General Overview

Business & Corporate Law > Joint Ventures > Formation

HN23[] Types of Contracts, Joint Contracts

A joint venture is a special combination of two or more persons, whether corporate, individual or otherwise, formed for some specific venture in which a profit is jointly sought without the parties designating themselves as an actual partnership or corporation. Under New Jersey law, the elements of a joint venture are essentially the same as of a partnership. These elements include agreement, sharing profits and losses, ownership and control of the partnership's property and business, community of power, rights upon dissolution and the conduct of the parties towards third persons, among others. Joint venture status is created by contract, express or implied, and depends on the mutual intent of the parties.

Opinion by: CARDAMONE

Opinion

[*489] CARDAMONE, *Circuit Judge*:

This civil antitrust action was instituted by plaintiffs-appellants Apothecon, Inc. and Geneva Pharmaceuticals Technology Corp., which manufacture and distribute a generic form of warfarin sodium, an anti-coagulant medication (a blood thinner). The suit was brought under §§ 1 and *2* of the Sherman Antitrust Act, *15 U.S.C. § 1* and *§ 2 (2000)*. Those sections make it unlawful to enter into a contract, combination, or conspiracy in restraint of trade (*§ 1*), and/or to engage in a conspiracy to monopolize (*§ 2*). Plaintiffs' antitrust claims are based on the alleged anti-competitive conduct of defendants-appellees Barr Laboratories, Inc., a competing manufacturer of generic warfarin **[**3]** sodium, and Brantford Chemicals, Inc., a supplier of clathrate, which is the primary chemical ingredient used to make warfarin sodium.

This litigation is about protecting the operation of our competitive markets. Competition, which fosters innovation and tends to lower prices for consumers, directly pits one producer against another. When individual firms go head-to-head, one might wish that the rules of the Marquis of Queensberry, which ensure fair play, [1] would be uppermost in the competitors' minds. The antitrust laws, however, safeguard consumers by protecting the competitive process. Those laws, unlike the Marquis of Queensberry rules, are not designed to protect competitors from one another's conduct.

[4]** Plaintiffs appeal from an order of the United States District Court for the Southern District of New York (Sweet, J.), entered October 7, 2002, which granted partial summary judgment to defendants dismissing plaintiffs'

There are 12 rules in all, including "no wrestling or hugging allowed," to ensure a fair fight between contestants. *See* 7 *EncyclopC&dia Britannica* 870 (15th ed. 2002).

antitrust causes of action and dismissing Apothecon's state law claims for lack of standing. *See Geneva Pharms. Tech. Corp. v. Barr Labs., Inc., 201 F. Supp. 2d 236 (S.D.N.Y. 2002)*.

BACKGROUND

A. *The Parties*

Plaintiff Apothecon, Inc. (Apothecon) is a wholly-owned subsidiary of pharmaceutical giant Bristol-Myers Squibb, and plaintiff Geneva Pharmaceuticals Technology Corp. (Geneva), the successor-in-interest to Invamed, Inc., is a wholly-owned subsidiary of Novartis. In June 1996 Apothecon and Geneva entered into a five-year Development and Supply Agreement to develop, manufacture, and market generic pharmaceutical drugs, including generic warfarin sodium. The parties dispute the precise nature of the relationship between Apothecon and Geneva, which as we explain later affects whether Apothecon has standing to sue.

[*490] Defendant Barr Laboratories, Inc. (Barr) is a competing manufacturer of generic warfarin sodium. Defendant Brantford Chemicals, **[**5]** Inc. is a Canadian corporation that, prior to July 1996, was known as ACIC (Canada) Inc. (hereafter ACIC/Brantford). ACIC/Brantford is a supplier of various chemicals used in manufacturing pharmaceutical drugs, including clathrate. An exclusive dealing contract between Barr and ACIC/Brantford is a key issue in this litigation.

The other defendants are Dr. Bernard C. Sherman, a Canadian citizen who is the beneficial owner of all the stock of defendant Apotex, Inc., a Canadian company with its principal place of business in Weston, Ontario. Dr. Sherman is also a substantial shareholder of Barr and was a member of its board of directors. In addition, Dr. Sherman, through Apotex, now controls 100 percent of the shares of ACIC/Brantford, so he is clearly an important figure in the events we discuss.

B. *Drug Industry*

1. *Generic Pharmaceutical Drugs*

We believe it helpful to describe at the outset the place of generics in the drug industry. Generic drugs are chemically identical versions of branded drugs and cannot be put on the market until the patent on the branded drug has expired. Generic drugs are typically sold at a substantial discount from the name brand drug. To market **[**6]** and distribute such a drug in the United States, manufacturers must receive approval from the United States Food and Drug Administration (FDA). A generic manufacturer files an Abbreviated New Drug Application with the FDA to establish that its drug is therapeutically equivalent to the innovator drug.

As part of the approval process, pharmaceutical companies must identify the supplier of the active pharmaceutical ingredient they intend to use in manufacturing the product. Ingredient suppliers, such as ACIC/Brantford, submit a Drug Master File (Master File) to the FDA which summarizes the equipment, manufacturing process, and control measures used to prepare the particular ingredient. The supplier submits a reference letter to the FDA on behalf of a particular manufacturer, stating that it will follow the methods in its Master File for that manufacturer.

The parties dispute the effect of a Master File reference letter. Plaintiffs maintain it is industry practice for such a reference letter effectively to bind a supplier actually to provide the chemical to the manufacturer. They also state that manufacturers and suppliers generally do business in reliance on oral agreements. Defendants **[**7]** respond that the filing of a reference letter is nothing more than a preliminary action that creates no obligation on the part of the supplier.

The FDA rates a generic product as AB equivalent if it is a bioequivalent to the branded product. The generic warfarin sodium products currently on the market all have been rated as AB equivalent to the branded drug Coumadin. Despite this rating, generic drugs may have some minor differences from the branded drug, such as the water content, crystalline structure, and particle size of the active ingredient.

2. *Warfarin Sodium*

Warfarin sodium, the drug at the root of this litigation, is an oral anti-coagulant medication prescribed by a physician and taken in tablet form. This drug thins the blood and helps prevent blood clots that can cause strokes and heart attacks. Warfarin sodium is viewed as a narrow therapeutic index drug because the dosage has a narrow range of therapeutic value: the **[*491]** range between too low a dose, which is ineffective, and too high a dose, which may cause harmful side effects, is narrow. Its active ingredient is known as "bulk" warfarin sodium or warfarin sodium clathrate. The parties dispute whether the process **[**8]** to make clathrate is simple or complex; plaintiffs assert it can take years to develop a process to produce clathrate.

For nearly 50 years warfarin sodium has been manufactured by DuPont under the well-known brand name Coumadin. Although DuPont's patent for Coumadin expired in 1962, it remained the only manufacturer of warfarin sodium for the next 35 years. Its annual sales eventually exceeded $ 500 million. Several companies received FDA approval to market warfarin-related products in the 1980's, but these products were unsuccessful.

In 1990 the New England Journal of Medicine published the results of two studies that created renewed interest in the efficacy of warfarin sodium. A few companies thereafter began the process of gaining approval to enter the warfarin sodium market. Currently, four companies sell warfarin sodium in the United States: DuPont, with Coumadin since 1956; Barr, with generic warfarin sodium since July 1997; Geneva, with generic warfarin sodium since October 1998; and Taro Pharmaceutical Industries Ltd. (Taro), which has marketed generic warfarin sodium since September 1999. Key for a manufacturer to the production of warfarin sodium is obtaining a source **[**9]** of clathrate.

C. *Obtaining a Source of Clathrate*

1. *Defendant Barr's Relationship with Defendant ACIC/Brantford*

In the early 1990's Barr identified warfarin sodium as a product with high barriers to entry because of the difficulty in procuring commercial quantities of clathrate. Barr began to research potential suppliers, and in 1991 it discussed purchasing clathrate from ACIC/Brantford. ACIC/Brantford confirmed that it would be able to produce commercial quantities of clathrate. In February 1991 Barr placed a small order for it. On March 15, 1995 ACIC/Brantford filed a Master File for clathrate, and on April 3, 1995, it provided a reference letter to the FDA in support of Barr's warfarin sodium Abbreviated New Drug Application. On May 10, 1995 Barr filed its application, listing ACIC/Brantford as its supplier of clathrate.

(a) *Exclusive Arrangement Between Barr and ACIC/Brantford*

In September 1995 the defendants entered into an exclusive supply agreement pursuant to which ACIC/Brantford would supply Barr with clathrate. The agreement obligated Barr to purchase $ 1.8 million worth of clathrate. It also provided that ACIC/Brantford would supply Barr exclusively **[**10]** with commercial quantities of clathrate until another manufacturer began selling generic warfarin sodium. Barr agreed to purchase 100 percent of its supply from ACIC/Brantford during the exclusivity period. One week after they entered into the supply agreement, the defendants executed a confidentiality agreement that for five years prohibited either party from disclosing "valuable, proprietary, technical, commercial and other confidential information."

This agreement only covered commercial quantities of clathrate. Hence, it did not prohibit ACIC/Brantford from selling small samples or developmental quantities, or from acting as a broker between manufacturers and other suppliers. The agreement also permitted Barr to purchase small quantities of clathrate from other sources in order to qualify that supplier as an alternate source.

[*492] (b) *ACIC/Brantford Becomes Barr's Only Source*

From September 1995 through September 1996, Barr ordered larger shipments of clathrate from ACIC/Brantford, the last of which was shipped in February 1997. On March 26, 1997, the FDA approved Barr's application and authorized it to begin marketing, which it did starting in July 1997. The FDA determined **[**11]** that Barr's warfarin sodium tablets were "bioequivalent, and therefore therapeutically equivalent" to the name brand drug Coumadin.

Barr continued to place orders for large quantities of clathrate from ACIC/Brantford. In a September 1997 document Barr referred to ACIC/Brantford as "the only source [of clathrate] available to the generic industry." The district court found that Barr had attempted to secure a back-up producer, but as of March 1998 had not succeeded.

2. *Plaintiff Geneva's Search for a Source of Clathrate*

(a) *Plaintiff's Dealings Before 1996 with Defendant ACIC/Brantford*

Geneva's attempt to obtain a source of clathrate encountered nearly insurmountable obstacles. Between 1993 and 1996 it sought to obtain a clathrate supply from numerous chemical companies, including Hoechst Celanese, Chemoswede, Banyan Chemicals, and others. A critical issue in the present dispute is whether any of these potential suppliers was in fact a viable commercial source of clathrate because nearly all of plaintiff's accusations depend on its theory that ACIC/Brantford's monopoly on clathrate created a bottleneck for others attempting entry into the generic warfarin market. **[**12]** At the relevant time, Geneva concluded that ACIC/Brantford was its only viable supplier. But, the district court found several other sources were available to plaintiffs.

Geneva had purchased a variety of products from ACIC/Brantford during the 1980's and 90's. Dr. Panjak Dave, Geneva's regulatory manager, had represented Geneva in most of the prior dealings with ACIC/Brantford. Sergio Getrajdman was ACIC/Brantford's sales representative responsible for sales to Geneva. On September 20, 1994 when Dr. Dave contacted Getrajdman to discuss the availability of clathrate, Getrajdman told him that ACIC/Brantford had no exclusive arrangement with respect to clathrate and that it could supply clathrate to Geneva. The next day, Dr. Dave telephoned ACIC/Brantford for a price quote on a small purchase and was quoted approximately $ 2,500 per kg. From late 1994 through early 1995, ACIC/Brantford sent Geneva several samples and R&D quantities of clathrate. At one point, Geneva purchased 15 kg. In March 1995 ACIC/Brantford sent three additional samples along with technical information that Geneva had requested. In April 1995 ACIC/Brantford sent the FDA a Master File reference letter on behalf **[**13]** of Geneva (then known as Invamed). The letter provided:

> Dear Sir,
>
> Re: WARFARIN SODIUM DMF # 11387
>
> Authorization is hereby given to the Food and Drug Administration to refer to our Master File for WARFARIN SODIUM on behalf of:
>
> INVAMED, INC.
> 2400 Route 130 North
> Dayton, NJ 08810 -- U.S.A.
>
> In support of any new drug application they may file on pharmaceutical preparation containing the drug manufactured by us.
>
> **[*493]** ACIC (CANADA) INC. herewith commits itself to manufacture all of their pharmaceutical products in accordance with the current good manufacturing practices and by the methods described in this specific Drug Master File, and to issue a new DMF reference letter after each amendment on the above Drug Master File.

In July 1995 Geneva ordered 5 more kg of clathrate at $ 2,500 per kg and requested ACIC/Brantford's safety and handling procedures. ACIC/Brantford shipped the product along with information about its procedures.

(b) *Plaintiff's Dealings with ACIC/Brantford in 1996-97*

From this point forward, communications between ACIC/Brantford and Geneva are in considerable dispute. In the background of these communications is the Barr/ACIC/Brantford **[**14]** exclusive dealing arrangement signed in late September 1995, and the confidentiality agreement signed one week later. The district court found that on August 23, 1995 ACIC/Brantford's Getrajdman attempted to dissuade Geneva from pursuing its FDA application on the pretext that others were ahead of it, and that its market share would thus be proportionally smaller. In January 1996 Geneva's Dave placed an order for 12 to 14 kg of clathrate from ACIC/Brantford to perform tests on a particular machine. Getrajdman advised Dave that he did not know when availability would permit ACIC/Brantford to accept this order.

Before and during 1996, Geneva avers it informed Getrajdman that it would be working with ACIC/Brantford's clathrate and intended to use its clathrate to file its Abbreviated New Drug Application. Geneva insists it also specifically advised ACIC/Brantford that it would be obligated to supply Geneva with commercial clathrate once Geneva's application was approved, and asserts that it received repeated assurances from ACIC/Brantford. Geneva says that ACIC/Brantford never mentioned its exclusive contract with Barr and never said it was unwilling or unable to supply Geneva with **[**15]** clathrate.

In the spring of 1997 Dr. Dave asked Getrajdman for 100-150 kg of clathrate. Getrajdman responded that ACIC/Brantford would be able to deliver the order as soon as the FDA approved two generic manufacturers' applications for generic warfarin sodium. Getrajdman gave no explanation for this condition, but it is essentially consistent with the terms of the Barr/ACIC/Brantford supply agreement.

In September 1997 Geneva received FDA approval for its generic warfarin sodium application. The next day it sent ACIC/Brantford an order to purchase 750 kg of clathrate for $ 1.8 million. By October 1997 Geneva still had not received an acceptance of its order, and it threatened legal action. On October 20, 1997 ACIC/Brantford formally rejected Geneva's order, and thereafter refused to accept further Geneva orders. It was then that Geneva first learned of the exclusive deal between ACIC/Brantford and Barr, and that as a result, ACIC/Brantford would not be able to supply it with clathrate.

Finding itself suddenly without a supplier, Geneva turned to Banyan Chemicals (Private) Ltd. (Banyan), an Indian manufacturer. Geneva and Banyan had previously worked together on several products, **[**16]** and in 1995 had signed a Memorandum of Understanding that included a provision that Banyan would begin to develop the capability to manufacture clathrate. Banyan had never manufactured clathrate before, and at the time Geneva expected **[*494]** Banyan's development process to take years.

After ACIC/Brantford rejected Geneva's order, Geneva decided that the fastest way it could enter the market was by assisting Banyan to develop a process for manufacturing clathrate. Geneva and Apothecon eventually entered the generic warfarin sodium market using Banyan clathrate in October 1998, after a one-year delay from the date of Geneva's unfilled order to ACIC/Brantford.

D. *Plaintiffs' Claims Against Defendants*

Plaintiffs sued ACIC/Brantford and Barr alleging that their secret exclusive dealing arrangement unfairly gave Barr exclusive access to the only available source of clathrate. They further assert that ACIC/Brantford repeatedly assured them that it would provide them with clathrate, and that because of those assurances they delayed taking steps to develop an alternative supply. These circumstances, plaintiffs insist, effectively delayed their entry into the generic warfarin sodium market **[**17]** for one year, and gave Barr a monopoly in this drug during that period. Plaintiffs declare that consumer prices were inflated during the exclusivity period and that Barr's lengthy monopoly gave it an unfair advantage as an entrenched first-mover, even after competitors eventually entered the market.

Plaintiffs further declare that the exclusive supply contract, coupled with the confidentiality agreement, amounted to a contract, combination or conspiracy in restraint of trade that violated *§ 1 of the Sherman Act and* was, in effect, a conspiracy to monopolize in violation of *§ 2*. They allege in addition an actual monopoly by Barr in the generic warfarin sodium market that violated *§ 2*, and declare that ACIC/Brantford misused its monopoly in the clathrate market that likewise violated *§ 2*. Finally, plaintiffs aver that the acquisition of ACIC/Brantford by Apotex -- and via Apotex by Dr. Sherman -- violated *§ 7 of the Clayton Act* because the acquisition lessened competition or tended to create a monopoly in the generic warfarin sodium market.

E. *District Court Proceedings*

On defendants' motion for summary judgment, the district court ruled against plaintiffs on most of the **[**18]** crucial issues and, granting defendants' motion, dismissed plaintiffs' federal antitrust claims. The court ruled the relevant warfarin sodium market was the entire market, including Coumadin. Since Barr had little market share in this overall market, the court found no monopolization of warfarin sodium. It also identified other available suppliers of clathrate and ruled that ACIC/Brantford was not therefore monopolizing the clathrate industry.

Finding the supply agreement between Barr and ACIC/Brantford was the product of reasonable business decisions and had pro-competitive benefits, the trial court dismissed all the Sherman Act causes of action. Further, finding no evidence that Apotex's purchase of ACIC/Brantford caused economic harm to plaintiffs, it also dismissed the Clayton Act claim. In addition, the district court ruled Apothecon was not engaged in a joint venture with Geneva and therefore lacked standing to sue. From these rulings and the order entered thereon, plaintiffs appeal. Geneva's state law tort and breach of contract causes of action against the same defendants remain before the district court during the pendency of this appeal.

DISCUSSION

I Partial Summary **[**19]** Judgment

HN1[] Ordinarily, a district court's grant of partial summary judgment is not **[*495]** immediately appealable because it is not a final judgment. *See* *28 U.S.C. § 1291*; *Coopers & Lybrand v. Livesay, 437 U.S. 463, 467, 57 L. Ed. 2d 351, 98 S. Ct. 2454 (1978)* (federal appellate jurisdiction generally requires a conclusive decision by the district court that ends the litigation on the merits). The district court entered final judgment on October 7, 2002 on the claims it dismissed pursuant to *Fed. R. Civ. P. 54(b)*. [2]***HN2***[] *Rule 54(b)* allows for the entry of a partial final judgment and thereby permits immediate appeal to avoid injustice. Thus, we have appellate jurisdiction. *See* *O'Bert ex rel. Estate of O'Bert v. Vargo, 331 F.3d 29, 40-41 (2d Cir. 2003)*.

[20]** ***HN4***[] Summary judgment is useful "to isolate and dispose of factually unsupported claims," *Celotex Corp. v. Catrett, 477 U.S. 317, 323-24, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*, particularly in antitrust cases. *See* *Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 95 (2d Cir. 1998)*. This remedy is an essential tool in the area of ***antitrust law*** because it helps avoid wasteful and lengthy litigation that may have a chilling effect on pro-competitive market forces. *See* *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 593-94, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*.

HN5[] We review a grant of summary judgment *de novo* to ensure the district court applied substantive ***antitrust law*** correctly. *Tops Mkts., 142 F.3d at 95*. A grant of such relief is proper if there are no genuine issues of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)* (2000). Upon reviewing the record, we draw all inferences and resolve all ambiguities in favor of the non-moving party, here plaintiffs. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986).* **[**21]** In an antitrust case, however, those inferences must be weighed in light of competing inferences of permissible competition, and the inference of conspiracy must be found the more reasonable in order for plaintiffs to escape summary judgment. *Matsushita, 475 U.S. at 588*. With these standards in mind we turn to the substantive claims.

II *Section 2* Claims

HN6[] *Section 2 of the Sherman Act* makes it an offense for any person to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States." *15 U.S.C. § 2*. Plaintiffs accuse defendants of monopolizing the generic warfarin market by controlling and misusing ACIC/Brantford's monopoly on clathrate.

---

[2] *Rule 54(b)* provides in pertinent part:

> ***HN3***[] When more than one claim for relief is presented in an action, whether as a claim, counterclaim, cross-claim, or third-party claim, or when multiple parties are involved, the court may direct the entry of a final judgment as to one or more but fewer than all of the claims or parties only upon an express determination that there is no just reason for delay and upon an express direction for the entry of judgment.

HN7[] To establish a violation of *§ 2*, plaintiffs must prove that defendants possessed monopoly power, and willfully acquired or maintained that power in the relevant market. *See* *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. The willful acquisition or maintenance of monopoly power is to be distinguished from growth or development that is the result of **[**22]** superior product, business acumen or historical accident. *See* *id. at 571*.

A. *Defining the Relevant Market for Warfarin Sodium*

Before proceeding further we think it helpful to define the relevant market for **[*496]** warfarin sodium. Evaluating market power begins with defining the relevant market. This inquiry will also prove useful for analyzing the *§ 1* allegations because *HN8*[] a market definition provides the context against which to measure the competitive effects of an agreement. *See*, *e.g.*, *Copperweld v. Independence Tube Corp., 467 U.S. 752, 768, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)* (rule of reason requires "an inquiry into market power and market structure designed to assess the combination's actual effect").

HN9[] The goal in defining the relevant market is to identify the market participants and competitive pressures that restrain an individual firm's ability to raise prices or restrict output. The relevant market is defined as all products "reasonably interchangeable by consumers for the same purposes," because the ability of consumers to switch to a substitute restrains a firm's ability to raise prices above the competitive level. *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 100 L. Ed. 1264, 76 S. Ct. 994 (1956).* **[**23]** Reasonable interchangeability sketches the boundaries of a market, but there may also be cognizable submarkets which themselves constitute the appropriate market for antitrust analysis. *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. Defining a submarket requires a fact-intensive inquiry that includes consideration of "such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Id*. The term "submarket" is somewhat of a misnomer, since the "submarket" analysis simply clarifies whether two products are in fact "reasonable" substitutes and are therefore part of the same market. The emphasis always is on the actual dynamics of the market rather than rote application of any formula.

The district court ruled that the entire warfarin sodium market, including Coumadin, was the appropriate market. It had noted the chemical equivalence between Coumadin and generics, found that customers and vendors viewed the products as competing, **[**24]** and concluded that generics took market share from Coumadin. We have performed our own analysis of the *Brown Shoe* factors and we conclude to the contrary that in this case generics alone constitute the relevant market.

1. *Generics - A Separate Market*

It may seem paradoxical to believe that Coumadin and generic warfarin -- which have been certified by the FDA as therapeutically equivalent -- are nevertheless in separate markets for antitrust analysis. Functional interchangeability is certainly a *prima facie* indication that consumers of one product might be willing to switch to the other in the face of a non-trivial price increase. Yet, in examining the competitive pressures that affect the ability of a lone generic manufacturer to raise prices or reduce output, we are persuaded that competition among generics creates those restraints. We note that there is not just one relevant customer group, and are mindful to consider the impact that patients, doctors, third-party payers, wholesalers, and chain pharmacies can have on the price and output of warfarin.

(a) *Price Differential*. First, the price differential between Coumadin and generics is plain, as are the **[**25]** variant pricing trends. Barr's generic was introduced at about 70 percent of Coumadin's price, and has since declined to 50 percent while Coumadin's price has stayed steady, creating a marked gap in price between the products. Coumadin's substantially higher **[*497]** prices is evidence of a distinct customer group with brand allegiance and/or high risk sensitivity that was unwilling to switch from the known brand name even in the face of a discounted alternative. That this group has remained loyal despite Coumadin's conspicuously higher prices strongly suggests inelastic demand. More significantly, this division of customers indicates there is little likelihood that price-sensitive generic customers would switch to the higher-priced Coumadin when faced with an increase in generic prices.

When other generic competitors entered the market, Barr's prices dropped substantially, but Coumadin's remained virtually unchanged and even rose slightly. Not only did Barr's invoice prices drop a small, but statistically significant amount, but more importantly Barr admitted that Geneva's presence forced it to offer substantial off-invoice discounts and rebates. Barr's senior vice president of sales and **[**26]** marketing confirmed that Geneva's entry had a substantial effect on Barr's pricing, especially with large chain pharmacies and wholesalers. Regarding wholesalers, he testified Barr offered 15-20 percent rebates after Geneva entered, and with chain pharmacies, he confirmed that Geneva's entry cost Barr "many millions of dollars." As one example, he noted that Geneva's entry forced Barr to give rebates to the CVS and Walgreens chain pharmacies each in excess of a million dollars a year.

(b) Brown Shoe *Distinguished*. Defendants urge us not to evaluate the market based on pricing differentials since they believe the Supreme Court rejected such analysis in *Brown Shoe, 370 U.S. at 326*. In *Brown Shoe*, the Court did indeed reject Brown's claim that its medium priced shoes did not compete with its lower priced shoes. Applying *Brown Shoe* to the instant case, the district court agreed with defendants' position and held that "a division of the product lines based on 'price/quality' was 'unrealistic.'" *201 F. Supp. 2d at 269* (quoting *Brown Shoe, 370 U.S. at 326*). We cannot adopt this reasoning.

In *Brown Shoe*, customers and vendors **[**27]** viewed the differently priced shoes as competing, and the Court simply clarified that a price differential alone should not override observed market conditions. Further, in *Brown Shoe* there was a continuous spectrum of pricing, leading the court to conclude "it would be unrealistic to accept Brown's contention that, for example, men's shoes selling below $ 8.99 are in a different product market from those selling above $ 9.00." *Brown Shoe, 370 U.S. at 326*. Here we find a substantial gap in pricing indicative of separate markets. Nor do we treat pricing as dispositive, but rather use pricing trends as one indicator of the impact each market participant has on overall price and output.

(c) *Inelastic Demand*. We also conclude that Coumadin's customers are displaying strongly inelastic demand. Overall generic penetration has not been as significant in the warfarin market as in other drug markets of comparable size: Barr's CEO testified that generic penetration after one year can be as high as 60 percent, but Barr projected only 35 percent penetration after a year and in fact captured just 8 percent of the warfarin market. Three-and-a-half years after generic warfarin **[**28]** was introduced, the generic substitution rate was just over 30 percent despite prices that were 40 percent lower than Coumadin. Such results indicate a substantial customer base that has not responded to lower prices.

Customers that have remained with Coumadin clearly do not perceive generics to be a reasonable substitute for it. Conversely, price-sensitive customers have flocked to the cheaper generic and are **[*498]** likely to view another inexpensive generic as a reasonable substitute. Plaintiffs' evidence suggests that upon generic entry, the consumer base split such that Coumadin and generics each faced smaller, distinct consumer groups.

Plaintiffs have offered evidence supporting plausible justifications for this trend. The narrow therapeutic index status of the drug may be having some effect on the risk-sensitivity of patients. Since proper dosing is tricky, patients must go through a lengthy introductory period of closely monitored dosage by their attending physician. Patients concerned about the potential for dosage problems may be especially unlikely to switch from a known entity even though they have to pay a higher price. Also, since Coumadin was the sole manufacturer of warfarin **[**29]** sodium for 35 years, there has been a lengthy opportunity to develop strong brand association and loyalty among patients and doctors.

(d) *Different Distribution Chains*. In addition, the distribution chain for generics is different in important ways from that of Coumadin. Wholesalers and chain pharmacies frequently stock Coumadin plus one generic version. Thus, for a substantial customer base, generic warfarin manufacturers compete among themselves for one slot rather than with Coumadin. Plaintiffs also offered evidence that Coumadin has been marketed primarily to physicians, while generics target wholesalers and chain pharmacies. Not surprisingly, Geneva's entry affected Barr's pricing primarily with respect to wholesalers and chain pharmacies.

(e) *Industry Recognition*. Industry recognition is also notable. Although the industry undoubtedly acknowledges that Coumadin competes to some extent with generics, generic manufacturers treat each other as the entities which most directly affect their pricing and output decisions. With respect to generic drugs generally, Dr. Sherman, defendant ACIC/Brantford's principal owner, stated:

> Given that generic drug products are universally **[**30]** cheaper than original brand products, the first generic drug company, upon entry of a particular drug market, will automatically capture a sizeable portion of the sales of the drug, thereby creating the generic drug market.
> When subsequent generic drug companies enter the market in respect of the particular drug, these generic companies compete with the first and prior generic drug companies as to the share of the generic drug market.
> . . . As a result, from the standpoint of the patentee drug company it matters not whether there is one, two, ten or twenty generic drug companies since each successive generic entrant only gains market share from the previous generic competitors and not from the patentee.

Several Apothecon employees also testified that they make pricing decisions as to generic warfarin sodium based on generic competition, not competition from Coumadin. Apothecon's former product manager stated "We compete against other generics, we do not compete against Coumadin. . . . We do not set our prices based on what the brand is doing." Plaintiff's expert pointed out that Barr's website stated, "Barr focuses its generic research and development activities on generic **[**31]** products that have significant barriers to entry," and such barriers would apply only to generic competitors. [3]

[*499] Barr's own price predictions for generic warfarin sodium led it to conclude that it could charge 70 percent of Coumadin's price in the first year, 50 percent in the second year and 40 percent in the third year. These predictions assumed one generic competitor entering in the second year and another entering in the third year. This effect is consistent **[**32]** with the literature on generic drug competition describing how generic pricing is a function of the number of generic competitors. *See generally* Congressional Budget Office, *How Increased Competition from Generic Drugs Has Affected Prices and Returns in the Pharmaceutical Industry*, at 32 (1998); Roy Levy, *The Pharmaceutical Industry: A Discussion of Competitive and Antitrust Issues in an Environment of Change* (Federal Trade Commission Bureau of Economics Staff Report, Mar. 1999); David Reiffen & Michael R. Ward, *Generic Drug Industry Dynamics* (Federal Trade Commission, Working Paper No. 248, Feb. 2002), *at* *http://www.ftc.gov/be/workpapers/industrydynamicsreiffenwp.pdf* (last visited June 4, 2004).

(f) *No Supply Substitution*. Moreover, the evidence shows there was very limited potential for supply substitution in the generic market. A manufacturer's ability to raise prices or reduce output is not only constrained by current substitutes but also by actual or potential competitors capable of providing new competition quickly with little sunk costs.

We can readily dismiss potential substitution from all entities other than DuPont. We find **[**33]** evidence of particularly high barriers to entry resulting both from limited supply of clathrate and from the regulatory requirements to sell generics. We find no evidence that other generic pharmaceutical manufacturers could quickly and easily have entered the warfarin market if generic warfarin prices were raised substantially above marginal cost. Barr's own process of reaching the warfarin market, which began in 1991 and ended in 1997, belies its claim of easy entry, as does its mission statement which acknowledges seeking drugs with high barriers to entry.

2. *DuPont Unlikely to Enter Generic Market*

---

[3] We note that Barr appears to have changed the wording on its website, although consistent with that language the site now also states that "[Barr's] generic product development activities focus on the selection of pharmaceutical products where these selection criteria may limit the potential number of *generic competitors*." *See* *http://www.barrlabs.com/pages/corphist.html* (last visited June 7, 2004) (emphasis added). Since the district court did not have the benefit of this statement before it, we do not rely on it in reaching our decision.

Competition from DuPont is not so straightforward. DuPont already sold warfarin sodium, had access to a clathrate supply, and had contacts in the distribution chain. However, DuPont would have had strong incentives not to introduce its own generic, even if it felt that Barr was charging supra-competitive prices. No doubt it observed that within a few years, there would be increased competition among generics, and its own entry would simply accelerate the decline of generic prices and thereby accelerate the segmentation of the market. Since at best it would be substituting sales **[**34]** of a generic at a lower price for sales of Coumadin at a higher price, all with the same cost of production, DuPont's entry into the generic market could only hurt its bottom line. DuPont likely could only have had success selling generic warfarin if it had been able to seize the substantial advantage that a first mover has in the generic market, and even then, it obviously found any advantage would be outweighed by the erosion of sales of Coumadin. DuPont had substantial success maintaining its customer allegiance at the higher price, and we believe it posed no **[*500]** threat of generic entry and therefore no check on generic prices.

In sum, the totality of the evidence convinces us that once Barr entered the market, the market became segmented so that Coumadin and Barr each had smaller, distinct customer groups. After the initial segmentation, Barr's price was impacted much more by Geneva's entry than by Coumadin. For example, plaintiffs have pointed to data indicating that Geneva's entry affected Barr's pricing of its dosage strengths also sold by Geneva, but not of its other dosage strengths. This evidence strongly suggests to us that competition among generics is the competitive force **[**35]** that restrains a single generic competitor from raising prices or restricting output.

We therefore hold that the relevant market for our purposes is the market for generic warfarin sodium tablets.

B. *Monopoly Power*

We turn now to discuss proof of monopoly power in the generic warfarin sodium market. ***HN10***[] Monopoly power is "the power to control prices or exclude competition." *E.I. du Pont, 351 U.S. at 391*. It can be proven directly through evidence of control over prices or the exclusion of competition, or it may be inferred from a firm's large percentage share of the relevant market. *Tops Mkts., 142 F.3d at 98*. Plaintiffs seek to demonstrate monopoly power through both methods.

1. *Direct Evidence of Monopoly Power*

With respect to direct evidence, plaintiffs primarily rely on the report of their expert, Dr. Robert Larner. The expert's market analysis led him to conclude that in the absence of generic competition Barr had charged a monopoly price that lasted until plaintiffs finally entered the market. Plaintiffs offered evidence to show that after their entry Barr lowered its price and offered substantial price discounts and rebates. Plaintiffs **[**36]** contend this is direct proof that Barr controlled prices during its period of exclusivity. Further, they assert that Barr's first-mover advantage led to substantial entrenchment, such that it continued to control 80 percent of generic sales several years after it faced competition. This, they think, constituted exclusion of competition, which likewise is direct proof of monopoly power.

This direct proof is at best ambiguous. We recognize plaintiffs' pricing proof may of course be indicative of monopoly power. However, absent from plaintiffs' proffer is any analysis of Barr's costs. Hence, we do not know whether the allegedly elevated prices led to an abnormally high price-cost margin. *See* 2A Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 501 (1995). Nor do plaintiffs present direct evidence that defendants restricted output, asking us to infer the basis for the higher prices. Moreover, plaintiffs' assertion with regard to Barr's continuing high percentage market share is not direct evidence, but rather requires that we engage in the sort of inference more appropriate for market share analysis.

HN11[] Where direct evidence is unavailable or inconclusive, as here, monopoly **[**37]** power may be inferred from high market share. Although market share is not functionally equivalent to monopoly power, it is nevertheless highly relevant to the determination of monopoly power. *Tops Mkts., 142 F.3d at 98*.

2. *Monopoly Power Through Market Share*

Having defined the relevant market, we consider whether Barr's high market share leads to a fair inference of monopoly power. ***HN12***[] Courts will only draw that **[*501]** inference after considering market share in conjunction with other characteristics of the market, such as "the strength of competition, the probable development of the industry, the barriers to entry, the nature of the anticompetitive conduct and the elasticity of consumer demand." *Int'l Distribution Ctrs., Inc. v. Walsh Trucking Co., 812 F.2d 786, 792 (2d Cir. 1987)*.

Defendants do not dispute that Barr was the sole manufacturer of generic warfarin sodium during the period from July 1997 through October 1998. This alone creates a strong inference of monopoly power. The nature of defendant's pricing activities also supports an inference of monopoly power. However, we think there is a question of fact as to whether this is the type of **[**38]** competitive advantage about which the antitrust laws should be concerned. ***HN13***[] Every first mover into a new market has a monopoly during its initial period of exclusivity. The antitrust laws have not been applied to condemn the transient advantage inherent in being a first mover because to do so would stifle innovation. *See AD/SAT, a Division of Skylight, Inc. v. Associated Press, 181 F.3d 216, 229 (2d Cir. 1999)* (*per curiam*) (quoting 2A Areeda & Hovenkamp, *supra*, P 506d, at 103 ("Transitory power may safely be ignored by ***antitrust law***" because market forces would end that power fairly quickly)); *Dimmitt Agri Indus., Inc. v. CPC Int'l Inc., 679 F.2d 516, 530 (5th Cir. 1982)* ("Transitory control over prices, ever present in a competitive economy . . . is not the subject of the completed monopolization offense.").

Barr's period of exclusivity lasted about 15 months, although plaintiffs allege that the effects of this exclusivity period lasted much longer. This may or may not be of sufficient duration to have significant anti-competitive effects. In any event, whether Barr's advantage should be viewed as a transitory advantage inherent **[**39]** in being a first entrant or a substantial impediment to competition involves a genuine question of material fact. Plaintiffs have satisfied their burden of producing evidence that the effects of Barr's advantage were substantial and that competition overall was impaired. Such an issue of material fact should not be resolved at the summary judgment stage because to do so requires weighing the evidence, which is a matter left for a jury.

The final element of the monopolization charge is that defendants must have willfully acquired or maintained their advantage as opposed to succeeding through a superior product, business acumen or historical accident. On this point, plaintiffs have alleged a conspiracy between Barr and ACIC/Brantford, embodied in their exclusivity agreement and in their actions towards plaintiffs. Plaintiffs believe Barr and ACIC/Brantford sought to leverage ACIC/Brantford's monopoly in the clathrate market in a manner that attempted both to assure Barr's monopoly in the downstream generic warfarin sodium market and simultaneously helped reinforce ACIC/Brantford's monopoly in the clathrate market. Because of the close connection of these allegations to the dynamics **[**40]** of the clathrate market, we discuss the evidence of intent as part of our analysis of the clathrate market, where we conclude that plaintiffs presented satisfactory evidence that Barr willfully acquired or maintained its monopoly, *see Grinnell Corp., 384 U.S. at 570-71*, and that both defendants conspired to do so.

III Clathrate Market

A. *Section 2 Claims Stated*

Plaintiffs also allege that ACIC/Brantford monopolized the clathrate supply market and that both defendants, ACIC/Brantford and Barr, conspired to do **[*502]** so. Defendants respond that plaintiffs' arguments regarding ACIC/Brantford's asserted clathrate monopoly relate to the purported effort to monopolize the generic warfarin sodium market. They maintain that plaintiffs have not contended that ACIC/Brantford's actions had the effect of keeping other clathrate suppliers out of the clathrate market and that therefore plaintiffs' *§ 2* claim in the clathrate market must fail.

Defendants are correct that *§ 2* is often concerned with the exclusion of competitors. However, plaintiffs contend that ACIC/Brantford and Barr conspired to mislead and deceive them in order to delay Geneva from pursuing and developing **[**41]** an alternate supply of clathrate. They have thus successfully alleged that, by so preventing the plaintiffs from developing a rival to ACIC/Brantford, the defendants "willful[ly] . . . maint[ained]" ACIC/Brantford's monopoly. *Id*. Although the plaintiffs were not themselves excluded from the clathrate market, they have sufficiently stated *§ 2* claims regarding that market and have standing to bring them, *see Blue Shield of Va. v. McCready, 457 U.S. 465, 479-81, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*. Thus, it is a question for the jury whether

ACIC/Brantford had monopoly power in the clathrate market, and if so, whether defendants abused ACIC/Brantford's market power.

B. *No Other Viable Suppliers of Clathrate Available*

In determining if ACIC/Brantford had monopoly power in the clathrate supply market, it is crucial to determine whether other suppliers besides ACIC/Brantford were available as potential generic warfarin sodium manufacturers. The district court found other suppliers of clathrate were available to plaintiffs in 1995-98, and ruled that ACIC/Brantford did not have a sizeable market share. Specifically, it identified Hoechst Celanese and Chemoswede as **[**42]** companies prepared to sell clathrate. It also mentioned several other manufacturers that could have developed the capability of processing clathrate, if plaintiffs had pursued the matter. However, viewing the facts as we must in the light most favorable to plaintiffs, the issue of whether ACIC/Brantford effectively was the only source available to generic manufacturers in 1995-98 is in sufficient dispute so that it should not have been resolved on a motion for summary judgment. We enumerate ten other possible suppliers of clathrate. They are: Hoechst, Chemoswede, Lachema, Taro, Arenol, Vinchem, Diosynth, Banyan, Chemagis, and Shanghai. Plaintiffs' proof suggests that for one reason or another none of them could actually be considered a viable supplier of clathrate during the relevant time period.

Hoechst. Geneva received R&D samples from Hoechst and considered entering into a supply agreement with Hoechst. Plaintiffs raise serious questions about Hoechst's willingness and ability to provide clathrate. Hoechst had not filed a Drug Master File with the FDA and indicated it would not be able to for some time. According to plaintiffs, Hoechst was experiencing difficulties with the **[**43]** stability of its clathrate production, reporting environmental problems due to clathrate's toxicity that were hampering its development. Hoechst had little interest in solving this problem. A Hoechst interoffice memo describes Geneva's frustration with Hoechst's clathrate development problems, and describes Dr. Patel's suggestion that if they could not provide better service they should not be in the business. The memo's author states "I resisted the urge to tell him that we are likely to accept his advice." Hoechst eventually sold the only facility it had working to develop clathrate. **[*503]** Barr's purchasing manager Mary Casatelli confirmed that Barr considered Hoechst's viability as a clathrate supplier to be a "moot point" because it had decided to close its manufacturing facility and put it up for sale.

Chemoswede. Chemoswede was DuPont's supplier of clathrate for Coumadin. As of mid-1995 Chemoswede was under contract to supply clathrate exclusively to DuPont, and DuPont purchased Chemoswede outright in 1997. Barr's Paul Bisaro testified in his deposition that Chemoswede would not sell clathrate to Barr because of its obligations to DuPont. Barr's chairman Bruce Downey also testified **[**44]** that the result of DuPont's purchase of Chemoswede was that Chemoswede would no longer supply to the generic industry. Despite this testimony, the district court decided that Chemoswede should be considered an available source. Although acknowledging that "most or all of its clathrate was dedicated to DuPont," the court believed that "internal or captive sources of a product are still included in the relevant market." 201 F. Supp. 2d at 272. In light of our market definition of generic warfarin sodium, this conclusion no longer is apt. The question here is availability of clathrate to generic manufacturers, which affects the supply of generic warfarin sodium. Chemoswede's clathrate affects neither, and therefore has no impact on a putative monopolist's ability to control supply of generic warfarin.

Lachema. Plaintiffs ordered a 15 kg sample of clathrate from Lachema in February 1998. When Lachema failed to fill this order after a 6-9 month delay, Geneva abandoned the order realizing that Lachema could not supply them. Barr's Mary Casatelli testified that when she left Barr in November 1997, she had concluded "there was no way" Lachema could have been an approved **[**45]** supplier.

Taro. Sergio Gertrajdman, an employee of ACIC/Brantford, testified that before he left he attempted to secure clathrate from Taro, but Taro refused to sell. Plaintiffs presented evidence that Taro did not have a Master File on file with the FDA and did not enter the market until September 1999, two full years after Geneva sought a clathrate source.

Arenol. Arenol evidently worked on a clathrate process in 1997 and 1998, although it too did not file a Master File for clathrate. Arenol's plant was eventually destroyed by fire in August 1998, but even at that late date, plaintiffs maintain that Arenol had not even begun to prepare to supply clathrate.

Vinchem. Vinchem was a broker, not a manufacturer of clathrate. Plaintiffs at one point received some clathrate from Vinchem, but they were unable to determine that the source had filed the requisite Master File. Geneva ultimately concluded that Vinchem was unable to deliver any clathrate.

Diosynth. Diosynth potentially could have provided clathrate, but had no viable process for synthesizing or manufacturing clathrate in 1996-97. According to plaintiffs, Diosynth was unable to develop a process until September **[**46]** 1999, two years after Geneva's Abbreviated New Drug Application was approved.

Banyan. In 1995, Geneva and Banyan amended their existing development agreement to include development of clathrate. At the time, Banyan had no facilities capable of producing clathrate nor did it have a process for manufacturing clathrate. Because Banyan was not expected to have clathrate production capabilities for a substantial period of time, plaintiffs did not consider Banyan a viable source. After ACIC/Brantford rejected plaintiffs' purchase order in 1997, plaintiffs made an **[*504]** effort to accelerate Banyan's capabilities, and were able to enter the market using Banyan clathrate in October 1998.

Chemagis. Geneva met with Chemagis to discuss the purchase of clathrate. Chemagis never filed a Master File for clathrate. Chemagis refused to develop a process to manufacture clathrate unless plaintiffs paid the upfront costs of establishing a new facility. According to plaintiffs, Chemagis' development time frame was too long, the startup costs were prohibitive, and its production capability was at best speculative.

Shanghai. Geneva received samples of clathrate from Shanghai in early 1997. However, **[**47]** Shanghai had not filed a Master File for clathrate, and Geneva understood that its facilities to produce clathrate had not been built. Believing Shanghai was in the very early stages of development, plaintiffs concluded it was even further behind than Banyan.

It is significant that plaintiffs' description of the state of the clathrate industry in 1995-98 is consistent with Barr's own records and reports. A Barr memorandum to investors commented that warfarin sodium featured "unique raw material sourcing issues," and that it had secured "an exclusive source of active ingredient that to date is the only source available to the generic industry." Barr's CEO Bruce Downey also testified that Barr had been actively looking for a backup material supplier in the period before its launch, and he stated "it was our judgment that there were no others, other than the one that we had worked with."

The factual dispute over the availability of clathrate precludes any definitive assessment of ACIC/Brantford's power in the clathrate industry, making the grant of summary judgment on this issue inappropriate.

C. *Willful Acquisition or Maintenance of Monopoly Power*

We have found material questions **[**48]** of fact regarding Barr's monopoly power in the generic warfarin sodium market and ACIC/Brantford's monopoly power in the clathrate industry. Plaintiffs have presented sufficient evidence on both of these issues to satisfy their burden at the summary judgment stage. To succeed on their claims however plaintiffs must also demonstrate that defendants willfully acquired or maintained their monopoly power as opposed to having achieved their advantage through superior business practice or historical accident.

Several Barr statements can be interpreted as suggesting an intent to seize the sole supply of clathrate in order to monopolize the generic warfarin market. A memorandum dated April 14, 1997 from Mary Casatelli, Barr's purchasing manager, to Paul Bisaro, Barr's vice president and general counsel, identifies just two manufacturers capable of making clathrate, DuPont Chemoswede and ACIC/Brantford. The memo closes with the statement, "We should give thought to the strategy we should pursue in order to deny a viable source to Invamed." Mary Petit, Barr's director of pharmacology and senior vice president of operations, added a handwritten note to the memorandum: "Paul - What is this worth **[**49]** to us - Will purchasing the Coventry facility's supply (even tho we can't use it) be less $$ than our losses if Invamed enters the market? Would ACIC/Brantford or Barr purchase the

Coventry R/M and sell to ACIC/Brantford's overseas customers to keep them out of supplying Invamed?" Defendants attempt to portray these notes as isolated thoughts of non-decision-making employees, but we think a jury should decide what weight should be given these statements.

[*505] Later in 1997 a "Product Development Strategy" prepared for a Barr board of directors' meeting in September 10-11, 1997, states that Barr focuses on lower sales volume drugs with high barriers to entry that limit competition. The memorandum describes Barr's efforts to secure a source of raw materials for generic warfarin sodium and notes that its "investment of time and capital resulted in an exclusive source of active ingredient that to date is the only source available to the generic industry."

Further, an internal Barr memorandum titled "Branded Pharmaceutical Company Generic Defense Strategies" contains a section entitled "Preserving Market Share: Warfarin Case Study" that includes the headline "Block Generic Competition by **[**50]** Controlling Raw Materials." Ms. Casatelli believed that denying Geneva a source of clathrate was "simply good business practice." Barr's chairman, Bruce Downey, confirmed that Barr was not successful in finding backup clathrate suppliers, and he believed generic competition would be limited due in part to the small number of FDA-approved raw material suppliers.

Plaintiffs also provided evidence relating to why they believed they had an oral contract with ACIC/Brantford. Sergio Getrajdman, ACIC/Brantford's sales representative who dealt with Geneva, recalled telling Geneva's Dr. Dave that ACIC/Brantford could provide clathrate to Geneva. Getrajdman stated that he had not been aware that ACIC/Brantford had even considered an exclusive agreement on clathrate: "I never - I would have never approached [Dr. Dave] with the product had there been discussion of an exclusive." Getrajdman testified that he thought ACIC/Brantford was obligated to provide clathrate to Geneva and that he repeatedly advised people at ACIC/Brantford of that obligation. Antoniette Walkom, who was the author of ACIC/Brantford's Master File reference letter in support of Geneva, testified similarly that the letter **[**51]** reflected a commitment by ACIC/Brantford to provide clathrate to Geneva.

In September 1996 after ACIC/Brantford acquired ACIC, ACIC/Brantford wrote to Dr. Dave and stated, "According to our records, letters of access to the following U.S. files have been provided to your firm. Please kindly review the list below and notify us of any omissions . . ." Warfarin sodium was on the list. Geneva's Dr. Mahendra Patel testified that on several occasions, ACIC/Brantford actively encouraged Geneva to develop warfarin sodium using ACIC/Brantford clathrate, and repeatedly solicited Geneva's business.

After the exclusive agreement was signed, ACIC/Brantford was elusive in its responses to Geneva's requests for more clathrate. Getrajdman wrote in a memo dated August 23, 1995, "I contacted [Geneva's Mahendesh] Patel with the strategy we discussed Friday in Toronto, namely, to discourage him from proceeding w/development on the pretext that others were ahead of him and his market share would thus be proportionately smaller. I was unsuccessful . . ." ACIC/Brantford's Telemagic printout contains entries of Getrajdman's response to Dr. Dave's January 12, 1996 request for clathrate: he stalled until **[**52]** February 5, "but we must decide whatever I am to tell Invamed by then: we had the chance to tell them face to face in Germany, but [ACIC/Brantford President Luciano Calenti] felt the time was not right."

ACIC/Brantford evidently developed several strategies for how to tell Geneva that they would no longer provide clathrate. One strategy was to give the false story that for capacity reasons, they would be moving their production facility to Mexico. Getrajdman noted at the bottom of a **[*506]** memo, "Time to bite the bullet. If I go with the switching site story, I need dates as soon as possible." He also placed an entry in the Telemagic machine dated January 16, 1996: "The fact that they're putting things in writing makes me nervous." As late as mid-1997, two full years after the exclusive supply agreement was signed, it is clear that ACIC/Brantford still had not told Geneva it could not supply clathrate.

Additionally, plaintiffs provided some evidence that Barr was involved with ACIC/Brantford in the decision to reject Geneva's purchase order in September 1997. Barr Chairman Bruce Downey stated that Barr was contacted by ACIC/Brantford and informed that ACIC/Brantford had received a purchase **[**53]** order from Geneva for commercial quantities of clathrate, "which sale was prohibited by our contract. And we were asked whether we were going to stand on our rights as embodied in that contract and we said yes." Defendants dispute their involvement in the decision, but given the totality of the circumstances suggesting intent to monopolize, we are inclined to allow a jury to make that factual determination.

The evidence as a whole could lead a reasonable jury to conclude that Barr and ACIC/Brantford intended to take advantage of ACIC/Brantford's clathrate monopoly, intended to create a monopoly for Barr in the generic warfarin sodium industry, and intended to keep their agreement secret so that Geneva would not take steps to develop an alternate source. We discuss the specific evidence of agreement in the following section. While there may be some pro-competitive benefits of exclusive supply agreements, it is difficult to conceive of the pro-competitive benefits that would be derived from this level of deception, and, also, it is difficult to believe that defendants' advantage came about through better business practices or historical accident. The district court's grant of summary **[**54]** judgment on plaintiffs' *§ 2* claims must therefore be reversed.

IV *Section 1*

HN14[] *Section 1 of the Sherman Act* prohibits "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. As the language states, *§ 1* targets concerted action between two or more entities. Independent conduct falls outside the purview of this provision. *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. To prove a *§ 1* violation, a plaintiff must demonstrate: (1) a combination or some form of concerted action between at least two legally distinct economic entities that (2) unreasonably restrains trade. *See* *Tops Mkts., 142 F.3d at 95*; *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 542 (2d Cir. 1993)*. The parties agree that the conduct at issue here does not fall within the narrow range of behavior that is considered so plainly anti-competitive and so lacking in redeeming pro-competitive value that it is "presumed illegal without further examination," that is, it is illegal **[**55]** *per se*. *Broad. Music, Inc. v. CBS, 441 U.S. 1, 8, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. Accordingly, the case before us is evaluated under the rule of reason, and defendants' conduct will be deemed illegal only if it unreasonably restrained competition. *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*.

HN15[] Under the rule of reason, the plaintiffs bear an initial burden to demonstrate the defendants' challenged behavior "had an *actual* adverse effect on competition **[*507]** as a whole in the relevant market." *Capital Imaging, 996 F.2d at 543*. Because the antitrust laws protect competition as a whole, evidence that plaintiffs have been harmed as individual competitors will not suffice. *Atl. Richfield, 495 U.S. at 343-44*. If the plaintiffs satisfy their initial burden, the burden shifts to the defendants to offer evidence of the pro-competitive effects of their agreement. *Capital Imaging, 996 F.2d at 543*; *Bhan v. NME Hosp., Inc., 929 F.2d 1404, 1413 (9th Cir. 1991)*. Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove **[**56]** that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means. *Capital Imaging, 996 F.2d at 543*. Ultimately, the factfinder must engage in a careful weighing of the competitive effects of the agreement -- both pro and con -- to determine if the effects of the challenged restraint tend to promote or destroy competition. *Id*.

A. *Contract, Combination or Conspiracy*

To satisfy the concerted action requirement, plaintiffs allege a conspiracy between Barr and ACIC/Brantford to restrain trade in the clathrate and generic warfarin sodium markets. In addition, they insist the exclusive supply and confidentiality agreements themselves violate *§ 1*. Although the district court only addressed the conspiracy argument, we think the complaint fairly read encompasses both allegations.

HN16[] To withstand a summary judgment motion, plaintiffs must present evidence of an actual illegal combination, and such evidence must satisfactorily cast doubt on inferences of independent action or proper conduct by defendants. *Matsushita, 475 U.S. at 588*. The evidence must prove defendants had an intent to adhere to **[**57]** an agreement that was designed to achieve an unlawful objective; specific intent to restrain trade is not required. *Capital Imaging, 996 F.2d at 545*.

The district court ruled that there was a material question of fact regarding Barr's knowledge of the interactions between Geneva and ACIC/Brantford. The court held that plaintiffs' evidence was sufficient to support an inference that Barr was aware that ACIC/Brantford had supplied Geneva with enough clathrate to file its Abbreviated New Drug Application, and that it was industry practice that such supply created an implied contract.

However, the district court then ruled the conspiracy theory must fail because there was no evidence that the exclusive agreement was anything but a legitimate business tactic by ACIC/Brantford. It held that lack of intent by one party, here ACIC/Brantford, precludes a conspiracy to monopolize. While we agree with the district court's statement of the law, we believe it inappropriately resolved factual disputes in reaching its conclusion that there was no conspiracy.

The testimony as a whole as well as the various memos and internal documents support an inference of conscious, concerted **[**58]** action intended to take advantage of ACIC/Brantford's monopoly on clathrate. Plaintiffs presented circumstantial evidence that Barr and ACIC/Brantford conspired to control the only source of clathrate available and to deceive plaintiffs so that plaintiffs would not take steps to develop an alternate supply. There was evidence that Barr demanded the confidentiality agreement in order to delay Geneva's entry and thwart the development of alternative supplies. Testimony further showed that both Barr and ACIC/Brantford understood the confidentiality agreement to require silence by ACIC/Brantford in its dealings with Geneva, **[*508]** suggesting that ACIC/Brantford's deceptions were in furtherance of the agreement.

Also, the Casatelli/Petit memorandum urging Barr to purchase excess clathrate in order to block Geneva's entrance is particularly damning. The district court dismissed this memorandum because the court found "no evidence that this document represents any employee's view but that of Casatelli and Petit, nor that their views were ever acted upon." *201 F. Supp. 2d at 277*. We doubt the soundness of this conclusion since at least one was a senior executive. But, in any event, **[**59]** it represents an improper weighing of the evidence by the court, which should have instead looked at the evidence in the light most favorable to the non-moving party. *See*, *e.g.*, *Adjustrite Sys., Inc. v. GAB Bus. Servs., Inc., 145 F.3d 543, 547 (2d Cir. 1998)*.

We also believe the exclusive dealing arrangement itself satisfies the *§ 1* requirement of coordinated action. Since Barr was aware that clathrate was in short supply -- and in fact believed ACIC/Brantford was the only available supplier -- the decision to use an exclusive supply contract as opposed for example to a requirements contract, as well as its demand for a confidentiality clause, suggest intent to control the supply of clathrate. The evidence as a whole from telephone records, deposition testimony, and internal documents, indicates "a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto, 465 U.S. at 768*. [4] Thus, plaintiffs satisfied the concerted action requirement at this stage of the litigation.

[60]** B. *Unreasonable Restraint of Trade*

HN17[] Exclusive dealing arrangements implicate *§ 1* because they have the potential unreasonably to exclude competitors or new entrants from a needed supply, or to allow one supplier to deprive other suppliers of a market for their goods. *See* *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 45, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)* (O'Connor, J., concurring). Such agreements may also, however, have pro-competitive purposes and effects, such as assuring steady supply, affording protection against price fluctuations, reducing selling expenses,

[4] Theorists note it usually does not further harm competition for a monopolist in one market to leverage its advantage into a monopoly in a downstream market. This is so because the firm already has a monopoly and can extract monopoly returns. *See*, *e.g.*, Robert H. Bork, The Antitrust Paradox, 228-29, 372-75 (1978). Still, the window of monopoly opportunity is unique in this case. ACIC/Brantford recognized its period of exclusivity would be brief, and that the best way to take advantage of its exclusivity was to work with Barr to gain a monopoly in the generic warfarin sodium market. If Barr too could gain an entrenched advantage, ACIC/Brantford's clathrate advantage could last even after other clathrate suppliers entered that market. Therefore, despite allegedly possessing monopoly power, ACIC/Brantford would still have had an incentive to use that power to gain advantage downstream.

and promoting stable, long-term business relationships. *See* *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 333-35, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*. In order not to condemn the positive aspects of exclusive dealing agreements, courts must take care to consider the competitive characteristics of the relevant market. Exclusive dealing is an unreasonable restraint of trade and a *§ 1* violation only when the agreement freezes out a significant fraction of buyers or sellers from the market. *Jefferson Parish, 466 U.S. at 45*; *cf*. *Standard Oil Co. v. United States, 337 U.S. 293, 93 L. Ed. 1371, 69 S. Ct. 1051 (1949).* **[**61]**

[*509] The exclusive dealing agreement in the present case is of particular concern because of the alleged bottleneck in the clathrate supply chain. Plaintiffs have created a material dispute of fact as to whether ACIC/Brantford effectively controlled the entire supply of clathrate available to generic warfarin sodium manufacturers during the period at issue. There is also evidence of high barriers to entry, meaning that potential suppliers could not easily enter the market. To the extent plaintiffs' theory is accurate, the exclusive dealing agreement had the potential to freeze competitors out of the generic warfarin sodium market.

HN18[] Plaintiffs bear the initial burden to demonstrate an actual adverse effect on competition. We have not required proof of market power in *§ 1* cases. If plaintiff can demonstrate an actual adverse effect on competition, such as reduced output, *see* *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)*, there is no need to show market power in addition. *See* *K.M.B. Warehouse Distribs., Inc. v. Walker Mfg. Co., 61 F.3d 123, 128-29 (2d Cir. 1995)*.

In addition to the somewhat inconclusive evidence **[**62]** of Barr's warfarin sodium pricing, plaintiffs presented evidence that the exclusive dealing arrangement reduced the supply of clathrate available to generic manufacturers. They offered evidence that ACIC/Brantford's own production plans called for the production of a greater amount of clathrate than Barr intended to purchase. This output was effectively lost to the generic warfarin sodium industry because of the exclusive terms of the contract. In addition, for the reasons previously discussed, plaintiffs have created a genuine issue of material fact regarding ACIC/Brantford's market power in the clathrate market and Barr's market power in the generic warfarin sodium market. Their proffer is sufficient to satisfy their initial burden under the rule of reason.

The burden then shifts to defendants to offer pro-competitive justifications for the arrangement. Even if we credit defendants' evidence, the essential facts are in dispute. The period of 1995-98 was a period of uncertainty in an emerging market. Supplies were difficult to procure, and the number of actual or potential generic warfarin sodium manufacturers was unknown, in part due to delays relating to FDA approval. This was **[**63]** a time when it might make particular sense for a supplier to secure a ready buyer and for a buyer to secure a steady supply of materials. Were there other clathrate competitors available, a point which is in dispute, this exclusive arrangement could have significant pro-competitive benefits both to the signatories and to competition overall.

The calculus of course changes if ACIC/Brantford was indeed the sole available supplier, and the evidence suggests Barr and ACIC/Brantford at least suspected that was the case. If so, then an exclusive dealing agreement that dedicated all that supply to one buyer could freeze out competition to an extent that greatly outweighed any pro-competitive effects. At the least, such a situation would heighten the need to consider if less restrictive means could have achieved the pro-competitive benefits of an exclusive dealing arrangement without totally foreclosing competition.

The issue of duration which troubled us in considering *§ 2* is also relevant here: a transitory advantage does not significantly harm competition and therefore should not violate *§ 1*, but plaintiffs have provided at least some evidence to suggest that this was not a transitory **[**64]** advantage, but rather was a substantial impediment to competition. For example, Apothecon's general **[*510]** manager reported that even though its offer price to the Eckerd and CVS drugstore chains was as much as 25 percent below Barr's, neither was willing to leave Barr after having devoted substantial time to switching patients and getting their pharmacists comfortable with the new product. The assessment of long-term effects depends greatly on credibility of the evidence, which is the task of the jury.

Once again, the district court resolved crucial factual disputes against the non-moving party on a motion for summary judgment. We think plaintiffs' evidence provides a *prima facie* case of a *§ 1* violation, and the district court should not have terminated the case on summary judgment.

V *Clayton Act Section 7*

We pass now to the claimed violation of the ***HN19***[] *Clayton Act. Section 7* of the Clayton Act prohibits mergers or acquisitions if the effect "may be substantially to lessen competition, or to tend to create a monopoly." *15 U.S.C. § 18 (2000)*. Prior to 1996, Apotex, which is owned indirectly by Dr. Sherman, had owned 75 percent of ACIC/Brantford. In 1996 Apotex purchased **[**65]** the remaining 25 percent to become ACIC/Brantford's sole owner. Plaintiffs claim the 1996 purchase tended to impede competition and monopolize the warfarin sodium market in violation of *§ 7* because the acquisition enabled defendants to misuse ACIC/Brantford's monopoly in the clathrate market to gain competitive advantage in the warfarin sodium market. Due to the various parent/subsidiary relationships connected to Apotex, plaintiffs included as defendants to this claim Apotex, Dr. Sherman, Apotex Holdings, Inc., Sherman Delaware, Inc. and Barr.

The district court dismissed the *§ 7* claim against all entities except Apotex because it ruled that "the only entity that may be held liable under *§ 7* is the acquirer, Apotex Inc." *201 F. Supp. 2d at 279*. The district court gave no explanation for why defendants Dr. Sherman, Apotex Holdings, Inc. and Sherman Delaware, Inc., were not also potentially liable since the Clayton Act by its terms applies to both "direct and indirect" acquisitions, and the court had previously found that Dr. Sherman, through several subsidiaries, owned 100 percent of Apotex Holdings and 100 percent of Sherman Delaware, which combined own 100 percent **[**66]** of Apotex. Aside from pointing out that plaintiffs cited no cases that extend liability under *§ 7* beyond the acquirer, the court offered no analysis of its own.

While we find sparse case law either supporting or rejecting the district court's conclusion -- indeed only one case seems to have addressed the question head on, *see* *Cmty. Publishers, Inc. v. Donrey Corp., 882 F. Supp. 138 (W.D. Ark. 1995)* -- the Clayton Act's application to "direct or indirect" acquisitions suggests to us that parent/subsidiary relationships, or any other corporate structure, ought not preclude application of the *Clayton Act § 7* to any entity that had an active role in an acquisition that tends "substantially to lessen competition." However, we need not decide in this case whether any defendant that directly or indirectly owned Apotex played a sufficient role to be held liable, for we hold that plaintiffs have failed to demonstrate that the acquisition itself was likely to impair competition.

HN20[] Although *§ 7 of the Clayton Act* targets restraint of trade and monopolization, it is not co-extensive with the Sherman Act. After *§ 7* was amended in 1950, the Supreme Court recognized **[**67]** that *§ 7* was intended to be a pre-emptive tool that gave the Federal Trade Commission and the courts the power to stop mergers that "tended" to impair trade, even before the **[*511]** effects reached the level of violating the Sherman Act. *See* *Brown Shoe, 370 U.S. at 317*; *see also* *id. at 312-23* (surveying the history and purpose of *§ 7* in light of the 1950 amendments). *Section 7* therefore provides for scrutiny of a transaction to evaluate if the acquisition will tend to increase concentration of market power and/or inhibit competition. *See* *Copperweld, 467 U.S. at 777*. The Supreme Court also confirmed that the focus of *§ 7*, like the Sherman Act, is on competition not competitors. *Brown Shoe, 370 U.S. at 320*.

Plaintiffs' allegations as to the specific anti-competitive effects of Apotex's purchase of ACIC/Brantford are meager indeed, occupying but a single paragraph of their appellate brief. As best we can glean, plaintiffs allege that Apotex, Dr. Sherman, and the various subsidiaries were all passive investors in ACIC/Brantford prior to 1996, but that their purchase in 1996 of the remainder of ACIC/Brantford's **[**68]** shares enabled them to take anti-competitive actions. According to plaintiffs, lack of a minority shareholder meant that defendants were free to take steps that were not in ACIC/Brantford's economic interests, such as misleading Geneva and refusing to fill Geneva's order for clathrate. Plaintiffs assert that these actions were a misuse of ACIC/Brantford's monopoly in the clathrate market designed to gain advantage in the generic warfarin sodium market.

Whatever the merits of this characterization of defendants' motive and actions, the allegations are not of a sort that implicates the Clayton Act. ***HN21***[] The Clayton Act is concerned with whether an acquisition or merger *itself* may cause antitrust injury. *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 115-17, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*. Plaintiffs themselves assert in other causes of action that ACIC/Brantford had a monopoly on clathrate even before Apotex purchased the remaining shares of ACIC/Brantford, indicating that the acquisition itself had no effect on the degree of concentration or competition in the clathrate market. Further, the Barr/ACIC/Brantford exclusive dealing agreement, which is the crux of the **[**69]** antitrust claims, was entered into before the purchase of ACIC/Brantford.

Plaintiffs have alleged no potential antitrust harm stemming from the acquisition, and thus, at most, allege that the purchase gave ACIC/Brantford unity of ownership. The fact that the 1996 purchase removed a layer of internal corporate control is not by itself a concern of the Clayton Act, for that removal standing alone is not an antitrust violation.

Without directly saying so, plaintiffs appear to hint that Dr. Sherman's connection with Barr -- he was a significant shareholder and member of Barr's Board of Directors in 1996 -- should lead us to examine the vertical aspects of the acquisition. The Supreme Court and this Court have set forth standards for assessing if a vertical merger violates the Clayton Act: ***HN22***[] "The primary vice of a vertical merger or other arrangement tying a customer to a supplier is that, by foreclosing the competitors of either party from a segment of the market otherwise open to them, the arrangement may act as a "'clog on competition' which 'deprive[s] . . . rivals of a fair opportunity to compete.'" *Brown Shoe, 370 U.S. at 324*; *United States v. Am. Cyanamid Co., 719 F.2d 558, 566 (2d Cir. 1983).* **[**70]** Plaintiffs' only evidence that competitors were foreclosed or that there was a clog on competition comes from the Barr/ACIC/Brantford exclusive dealing agreement, not the 1996 acquisition itself.

All we really have before us is plaintiffs' sneaking suspicion that something illegal **[*512]** occurred from the acquisition of ACIC/Brantford. But plaintiffs have the burden to present evidence that the purchase violated the Clayton Act. They cannot on the basis of surmise and suspicion transform their Sherman Act allegations into a Clayton Act violation. The district court's dismissal of the Clayton Act claim should be affirmed.

VI Joint Venture

In the district court defendants challenged plaintiff Apothecon's standing to raise its state law claims. Apothecon and Geneva had asserted that they were joint venturers and that, under New Jersey law, Apothecon could sue for injuries to the joint venture. The district court ruled that Geneva and Apothecon were not engaged in a joint venture and consequently that Apothecon lacked standing to sue.

The trial court held the relationship lacked two crucial elements to qualify as a joint venture: a joint property interest in the subject of the venture **[**71]** and a sharing of losses. It found that under the agreement between Apothecon and Geneva, Geneva retained ownership of the finished tablets and then sold them to Apothecon. Thus, it found no joint ownership in the subject of the venture. The trial court also ruled that there was no sharing of losses, but rather only a risk of losing an initial capital investment. It ruled the possibility of losing initial funds invested in the venture was not equivalent to shared losses.

We turn first to the law. ***HN23***[] "A joint venture is a special combination of two or more persons, whether corporate, individual or otherwise, formed for some specific venture in which a profit is jointly sought without the parties designating themselves as an actual partnership or corporation." 12 Richard A. Lord, *Williston on Contracts*, 36:9 at 644 (4th ed. 1999). Under New Jersey law, which governs the plaintiffs' agreement, the elements of a joint venture are essentially the same as of a partnership. *Carney v. Hansell, 363 N.J. Super. 111, 831 A.2d 128, 134 (N.J. Super. Ct. App. Div. 2003)*. These elements "include agreement, sharing profits and losses, ownership and control of the partnership's property **[**72]** and business, community of power, rights upon dissolution and the conduct of the parties towards third persons, among others." *Am. Fire & Cas. Ins. Co v. Manzo, 347 N.J. Super. 100, 788 A.2d 925, 929 (N.J. Super. Ct. App. Div. 2002)*. Joint venture status is created by contract, express or implied, and depends on the mutual intent of the parties. *Sullivan v. Jefferson, Jefferson & Vaida, 167 N.J. Super. 282, 400 A.2d 836, 839 (N.J. Super. Ct. App. Div. 1979)*.

We find the cases applying New Jersey law to be inconsistent on the evaluation of joint venture status. Some cases hold, for example, that sharing of profits *and* losses is required, while others hold that sharing of profits *or* losses is sufficient. *See*, *e.g.*, Wittner v. Metzger, 72 N.J. Super. 438, 178 A.2d 671, 675 (N.J. Super. Ct. App. Div. 1962) (sharing of profits and losses required); *Hellenic Lines, Ltd. v. Commodities Bagging & Shipping, Process Supply Co., 611 F. Supp. 665, 679 (D. N.J. 1985)* (venturers must share profits or losses); Ruta v. Werner, 1 N.J. Super. 455, 63 A.2d 825 (N.J. Super. Ct. Ch. Div. 1948) **[**73]** (finding a joint venture despite agreement's lack of allocation of losses); Rodin Properties-Shore Mall, N.V. v. Cushman & Wakefield, 49 F. Supp. 2d 728, 736-37 (D. N.J. 1999) (lack of shared losses does not preclude finding of joint venture); First Mechanics Bank v. Commissioner, 91 F.2d 275, 278 (3d Cir. 1937) (same).

Additional cases suggest that the absence of one or more factors does not foreclose a finding of a joint venture. *See*, *e.g.*, Rodin, 49 F. Supp. 2d at 736 (unequal management responsibilities does not preclude **[*513]** finding joint venture) (quoting 46 Am. Jur. 2d Joint Ventures § 16 (1994) ("[A] joint venture may exist although the parties have unequal control of operations.")). Still other cases consider only some factors but not others. *See* Upper Penns Neck Tp., Salem County v. Lower Penns Neck Tp., Salem County, 20 N.J. Super. 280, 89 A.2d 727, 732 (N.J. Super. Ct. Law Div. 1952) (Joint venture requires an "agreement to enter into an undertaking in the objects or purpose of which the parties to the agreement have a community of interest **[**74]** and a common purpose in its performance.").

After reviewing this inconsistent and sometimes conflicting case law, we think on balance that the relationship between Geneva and Apothecon contains sufficient indicia of a joint venture to satisfy New Jersey law. Despite being styled a "Development and Supply Agreement," it is clear that the contract is more than a standard supply contract and in fact envisions a substantial sharing of resources towards a joint enterprise.

We agree with the district court's point that the potential for losing initial capital investments is not equivalent to shared losses. Nevertheless, such potential loss points to a mutual interest in success since both parties have an investment at stake and each depends on the other to ensure they do not lose that investment. The potential shared loss of investments, while not itself sufficient evidence of a joint venture, still suggests a fiduciary relationship towards each other and supports the finding of a joint venture based on the other evidence.

Next, we consider the facts. We make six points in developing our divergence from the trial court. First, ***HN24***[] a classic element of a joint venture is that there is a **[**75]** limited objective and scope of the venture. The Apothecon/Geneva agreement specifically is limited to the development and distribution of twelve pharmaceutical preparations specified in Appendix A to the agreement. It is also limited in duration, having a fixed term of five years with options for extension.

Second, the contract provides for significant sharing and pooling of resources, skills and knowledge. In sections of the agreement titled "Cooperation" and "Product Development," the contract provides that the parties will share scientific and medical information as well as pre-clinical and clinical data, including "all toxicological, analytical, chemical data and the like." The "Recitals" provisions outline the skills and expertise that each party brings to the arrangement, a consideration not usually relevant to a supply contract.

Third, there is a shared interest, although not strictly speaking shared ownership, over the subject matter of the venture. For example, Apothecon was responsible for funding Geneva's research and development costs in the formulation, testing, and development of the twelve products. Each party had registration and filing responsibilities, Geneva with **[**76]** the FDA and Apothecon with state medicaid agencies. The district court noted that Geneva retained title to the drugs until it sold them to Apothecon, but failed to note that Apothecon purchased the raw materials used to manufacture the drugs. In sum, regardless the state of title to the drugs at any given moment, the agreement envisioned that both parties would be involved in the development of the drugs and both had an ongoing interest in the endeavor.

Fourth, the contract provides for some degree of overlapping control and management over the development. Each party had the right to audit the books and records pertaining to the development and **[*514]** sale of the products. Geneva was required to permit Apothecon's representatives to visit and inspect its facilities at any time. Apothecon had the right to audit Geneva for compliance with the Current Good Manufacturing Practices promulgated by the FDA. Geneva had the right to a quarterly accounting from Apothecon detailing the quantity of goods sold, total receipts, Apothecon's profit and loss on each product, and the inventory on hand. This degree of mutual oversight suggests to us a close relationship.

Fifth, there was a joint expectation **[**77]** of and participation in profits. Geneva was to be paid a percentage of Apothecon's sales of the drugs.

Sixth, plaintiffs presented some evidence that they held themselves out as partners, for example by issuing advertisements and launch packages that showed Apothecon and Geneva as partners. There is also evidence that defendants recognized Geneva and Apothecon were partners. ACIC/Brantford's Sergio Getrajdman for example referred to Apothecon and Geneva as "partners on the product," and Barr's chief operating officer, Paul M. Bisaro, said Barr was aware of "the relationship between Apothecon, Bristol-Myers and Invamed." Signs of a relationship are not always signs of a joint venture, but the evidence is not inconsistent with a finding of a joint venture.

We conclude that these aspects of the venture demonstrate Geneva and Apothecon's mutual intent to engage in a joint endeavor. More broadly, we are convinced that if there were antitrust violations, Apothecon was likely injured by them and should not be barred from seeking redress. While the district court cannot be faulted for reaching a contrary conclusion given the state of the case law, we nevertheless must reverse its ruling **[**78]** that Apothecon lacks standing to sue. We hold instead that Apothecon and Geneva were engaged in a joint venture under New Jersey law and that Apothecon therefore has standing to pursue claims as a plaintiff for injuries to the joint venture.

CONCLUSION

Accordingly, for the foregoing reasons, we (1) reverse the grant of summary judgment dismissing all plaintiffs' claims brought pursuant to the Sherman Act §§ *1* and *2*; (2) affirm the dismissal of the Clayton Act claim; and (3) reverse the ruling that plaintiff Apothecon lacks standing to sue. The case is remanded to the district court for further proceedings consistent with this opinion.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Sherman Act, Remedies**

In considering a motion to dismiss a complaint under *Fed. R. Civ. P. 12(b)(6)*, a court must assume all the facts alleged in the complaint are true, and must liberally construe the complaint in the light most favorable to a plaintiff. A *Rule 12(b)(6)* motion to dismiss a complaint should not be granted unless it appears beyond a doubt that the plaintiff can prove no set of facts which would entitle him to relief. Thus, as a practical matter, a dismissal under *Fed. R. Civ. P. 12(b)(6)* should be granted only in the unusual case in which a plaintiff includes allegations that show on the face of the complaint that there is some insuperable bar to relief.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN2[] **Antitrust & Trade Law, Sherman Act**

Although courts are hesitant to dismiss antitrust actions before the parties have had an opportunity for discovery, because the proof of illegal conduct lies largely in the hands of the alleged antitrust conspirators, there is no blanket prohibition against dismissal of antitrust claims for failure to state a claim. The essential elements of a private antitrust claim must be alleged in more than vague and conclusory terms to prevent dismissal of the complaint on a defendant's *Fed. R. Civ. P. 12(b)(6)* motion.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Sherman Act, Claims**

Section 1 of the Sherman Antitrust Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. *15 U.S.C.S. § 1*. To prove a *§ 1* violation, a plaintiff must show an agreement in the form of a contract, combination, or conspiracy that imposes an unreasonable restraint on trade. The unreasonableness of a restraint is determined using either a per se standard or a standard that examines all of the circumstances, the so-called rule-of-reason test. Under the per se standard, conduct that is manifestly anticompetitive or would always or almost always tend to restrict competition, is conclusively presumed to restrain competition unreasonably without elaborate inquiry as to the precise harm it has caused or the business excuse for its use. Practices that have been held to be unlawful per se include price fixing, division of markets, group boycotts, and tying arrangements.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN4[] **Vertical Restraints, Nonprice Restraints**

For purposes of ***antitrust law***, there is a presumption in favor of a rule-of-reason standard and departure from that standard must be justified by demonstrable economic effect. Moreover, interbrand competition is the primary concern of the antitrust laws. Thus, vertical restraints are generally more defensible than horizontal restraints. Accordingly, vertical nonprice restraints are not per se unlawful restraints of trade. Similarly, vertical maximum price-fixing is not per se unlawful, but should be analyzed under the "rule of reason."

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN5[] **Price Fixing & Restraints of Trade, Vertical Restraints**

For purposes of ***antitrust law***, concerted action between competitors at the same level of the market structure is usually termed a "horizontal" restraint, in contradistinction to combinations of persons at different levels of the market structure, e.g., manufacturers and distributors, which are termed "vertical" restraints.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

For purposes of ***antitrust law***, under the rule-of-reason test, the issue is whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect. Accordingly, a plaintiff must allege facts that show that a defendant's activities had an impact upon competition in a relevant market. In order to state a viable claim under *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, the plaintiff is required to allege facts which, if proven true, would demonstrate that the defendant's agreements with its distributors were likely to result in an anticompetitive effect. The plaintiff cannot make that showing absent allegation of facts demonstrating its power or share in the market.

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Sherman Act, Remedies**

Under the rule-of-reason standard, a plaintiff's failure to allege a relevant market amounts to a failure to state a claim under *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN8[] **Monopolies & Monopolization, Actual Monopolization**

In order to state a claim for monopolization under *§ 2* of the Sherman Antitrust Act, *15 U.S.C.S. § 2*, a plaintiff must allege: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. To state an attempted monopolization claim, the plaintiff must establish: (1) that the defendant has engaged in predatory or anticompetitive conduct; with (2) a specific intent to monopolize; and (3) a dangerous probability of achieving monopoly power. The plaintiff's failure to allege any facts that show its market power or market share is fatal to a *§ 2* claim.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Regulated Practices, Private Actions**

A private plaintiff seeking to state a claim for violation of *§§ 1* or *2* of the Sherman Antitrust Act, *15 U.S.C.S. §§ 1* or *2*, must allege that it has suffered an "antitrust injury." The antitrust injury requirement obligates the plaintiff to demonstrate, as a threshold matter, that the challenged action has had an actual adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice. The antitrust laws were enacted for the protection of competition, not competitors.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Detrimental Reliance

Contracts Law > ... > Consideration > Enforcement of Promises > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

Business & Corporate Compliance > ... > Contract Formation > Consideration > Promissory Estoppel

HN10[] **Consideration, Detrimental Reliance**

Promissory estoppel is a situation involving a promise by one party upon which another relies to his detriment, and which the promisor should reasonably have foreseen would cause the promisee to so rely. Under Nebraska law, a promise which the promisor should reasonably expect to induce action or forbearance on the part of the promisee or a third person and which does induce such action or forbearance is binding if injustice can be avoided only by enforcement of the promise. The remedy granted for breach may be limited as justice requires. Stated another way, a cause of action for promissory estoppel is based upon a promise which the promisor should reasonably expect to induce action or forbearance on the part of the promisee which does in fact induce such action or forbearance.

Business & Corporate Compliance > ... > Contract Formation > Acceptance > General Overview

Contracts Law > Breach > Breach of Contract Actions > General Overview

Business & Corporate Compliance > ... > Contract Formation > Consideration > Promissory Estoppel

HN11[] **Contract Formation, Acceptance**

Promissory estoppel provides for damages as justice requires and does not attempt to provide the plaintiff damages based upon the benefit of the bargain. It requires only that reliance be reasonable and foreseeable and does not impose the requirement that the promise giving rise to the cause of action must be so comprehensive in scope as to meet the requirements of an offer that would ripen into a contract if accepted by the promisee.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN12[] **Consumer Protection, Deceptive & Unfair Trade Practices**

The Nebraska Uniform Deceptive Trade Practices Act, *Neb. Rev. Stat. § 87-301 et seq.*, prohibits a broad panoply of deceptive trade practices. However, it does not provide a private right of action for damages. *Neb. Rev. Stat. § 87-303*.

Banking Law > Federal Acts > Federal Trade Commission Act > Unfair Competition & Practices

Antitrust & Trade Law > Consumer Protection > General Overview

Antitrust & Trade Law > Federal Trade Commission Act > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN13[] **Consumer Protection, Deceptive & Unfair Trade Practices**

Nebraska's Consumer Protection Act (CPA) mirrors federal law. The CPA is essentially the Nebraska state version of the Sherman Antitrust Act. Although the CPA provides both a private right of action and a public right, disputes that fall within the ambit of the CPA are unfair or deceptive trade practices that affect the public interest.

Counsel: [1]** For Triple 7, Inc., a Nebraksa corporation, Plaintiff: Richard D. Dunn, PANSING, HOGAN LAW FIRM, Omaha, NE.

For Intervet, Inc., a Delaware corporation, Defendant: Laurie A. Novion, Todd W. Ruskamp, SHOOK, HARDY LAW FIRM - KANSAS CITY, Kansas City, MO.; Michael K. Huffer, CASSEM, TIERNEY LAW FIRM, Omaha, NE.

Judges: JOSEPH F. BATAILLON, UNITED STATES DISTRICT JUDGE.

Opinion by: JOSEPH F. BATAILLON

Opinion

[*1084] MEMORANDUM AND ORDER

This matter is before the court on defendant Intervet, Inc.'s motion to dismiss (Filing No. 4). [1] This is an action for breach of contract and for violations of the Sherman Antitrust Act, *15 U.S.C. §§ 1* & *2*, the Nebraska Uniform Deceptive Trade Practices Act, *Neb. Rev. Stat. § 87-301 et seq.*, and the Nebraska Consumer Protection Act, *Neb. Rev. Stat. § 59-1601 et seq.* Plaintiff, a corporation engaged in the business of supplying veterinary services and products, alleges that defendant, a veterinary pharmaceuticals manufacturer, breached an agreement to provide certain rebates in connection with plaintiff's purchase of veterinary pharmaceuticals. Plaintiff further alleges that defendant violated the Sherman Act by "[acting] in concert with **[**2]** certain distributors to disrupt Plaintiff's business by failing to pay the rebates to which Plaintiff is entitled" and alleges that these actions "are preventing Plaintiff from actively engaging in the business of selling veterinary products" and that as a result of defendant's actions "plaintiff's customers and the public in general are not able to obtain veterinary products at a competitive price in western Nebraska."

Defendant asserts that plaintiff's complaint fails to state a claim for relief under the Sherman Antitrust Act, the Nebraska Uniform Deceptive Trade Practices Act and the Nebraska Consumer Protection Act. ***HN1***[] In considering a motion to dismiss a complaint under *Rule 12(b)(6)*, the court must assume all the facts alleged in the complaint are true, and must liberally construe the complaint in the light most **[**3]** favorable to the plaintiff. *Schmedding v. Tnemec Co., 187 F.3d 862, 864 (8th Cir. 1999)*. A *Rule 12(b)(6)* motion to dismiss a complaint should not be granted unless it appears beyond a doubt that the plaintiff can prove no set of facts which would entitle him to relief. *Id.* Thus, as a practical matter, a dismissal under *Rule 12(b)(6)* should be granted only in the unusual case in which a plaintiff includes allegations that show on the face of the complaint that there is some insuperable bar to relief. *Id.* In addition, ***HN2***[] although courts are hesitant to dismiss antitrust actions before the parties have had an opportunity for discovery, because the proof of illegal conduct lies largely in the hands of the alleged antitrust conspirators, there is no blanket prohibition against dismissal of antitrust claims for failure to state a claim. *Double D Spotting Serv., Inc. v. Supervalu, Inc., 136 F.3d 554, 559 (8th Cir. 1998)*. The essential elements of a private antitrust claim must be alleged in more than vague and conclusory terms to prevent dismissal of the complaint on a defendant's *Rule 12(b)(6)* motion. *Id. at 558*.

HN3[] *Section 1 of the Sherman Antitrust Act* **[**4]** prohibits "[e]very contract, combination in the form of trust or otherwise, **[*1085]** or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1 (1994)*. To prove a *Section 1* violation, a plaintiff must show an agreement in the form of a contract, combination, or conspiracy that imposes an unreasonable restraint on trade. *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1058 (8th Cir. 2000)*. The unreasonableness of a restraint is determined using either a *per se* standard or a standard that examines all of the circumstances, the so-called rule-of-reason test. *Id.* Under the *per se* standard, conduct that is "manifestly anticompetitive" or "would always or almost always tend to restrict competition," is conclusively presumed to restrain competition unreasonably "'without elaborate inquiry as to the precise harm [it has] caused or the business excuse for [its] use.'" *Id.* (quoting *Rossi v. Standard Roofing, Inc., 156 F.3d 452, 461 (3d Cir. 1998))*. Practices that have been held to be unlawful *per se* include price fixing, division of markets, group boycotts, and tying arrangements. *Id.*

HN4[] There **[**5]** is a presumption in favor of a rule-of-reason standard and departure from that standard must be justified by demonstrable economic effect. *See Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 726, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)*. Moreover, interbrand competition is the primary concern of the antitrust laws. *Id.* Thus, vertical restraints are generally more defensible than horizontal restraints. [2] *See, e.g., Arizona v.*

[1] Defendant has moved for leave to file the reply brief attached to Filing No. 11. Leave is hereby granted, and the court has considered that reply brief in making its determinations of this motion.

[2] ***HN5***[] Concerted action between competitors at the same level of the market structure is usually termed a "horizontal" restraint, in contradistinction to combinations of persons at different levels of the market structure, e.g., manufacturers and distributors, which are termed "vertical" restraints. *United States v. Topco Assocs., 405 U.S. 596, 607-08, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)*.

Maricopa County Medical Soc., 457 U.S. 332, 348 n.18, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982). Accordingly, vertical nonprice restraints are not *per se* unlawful restraints of trade. *Business Elecs. Corp, 485 U.S. at 726*. Similarly, vertical maximum price-fixing is not *per se* unlawful, but should be analyzed under the "rule of reason." *State Oil Co. v. Khan, 522 U.S. 3, 21, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997)*.

[6]** ***HN6***[] Under the rule-of-reason test, the issue is whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect. *Id. at 9*. Accordingly, plaintiff must allege facts that show that the defendant's activities had an impact upon competition in a relevant market. *See Dickson v. Microsoft Corp., 309 F.3d 193, 212 (4th Cir. 2002), cert. denied, 539 U.S. 953, 156 L. Ed. 2d 647, 123 S. Ct. 2605 (2003)*. In order to state a viable *Section 1* claim, a plaintiff is required to allege facts which, if proven true, would demonstrate that defendant's agreements with its distributors were likely to result in an anticompetitive effect. *Id.* A plaintiff cannot make that showing absent allegation of facts demonstrating its power or share in the market. *Id.*

Plaintiff has not pled facts that could amount to a *per se* violation. It essentially alleges only a vertical restraint. The court must thus apply a rule-of-reason analysis. ***HN7***[] Under the rule-of-reason standard, plaintiff's **[**7]** failure to allege a relevant market amounts to a failure to state a *Section 1 Sherman Act* claim. *See id.*

Plaintiff similarly fails to allege facts that would entitle him to relief under *Section 2 of the Sherman Antitrust Act*. ***HN8***[] In **[*1086]** order to state a claim for monopolization under *Section 2 of the Sherman Act*, a plaintiff must allege: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. To state an attempted monopolization claim, a plaintiff must establish "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*. Plaintiff's failure to allege any facts that show its market power or market share is fatal to its *Section 2* claim.

Also, ***HN9***[] a private plaintiff seeking to state a claim for violation of *Sections 1* or *2* of the Sherman **[**8]** Act must allege that it has suffered an "antitrust injury." *See Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*. The antitrust injury requirement obligates a plaintiff to demonstrate, as a threshold matter, "that the challenged action has had an actual adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice." *Capital Imaging Assocs., P.C. v. Mohawk Valley Medical Assocs., 996 F.2d 537, 543 (2d Cir. 1993)*. "The antitrust laws . . . were enacted for 'the protection of competition, not competitors.'" *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))*. Plaintiff's complaint contains no allegations of injury to competition. Accordingly, the court finds that plaintiff's complaint fails to state a claim under the Sherman Antitrust Act.

Plaintiff's second claim is for "detrimental reliance." Defendant asserts that in Nebraska, detrimental reliance is a measure for damages under breach of contract, not a separate cause of action. *See Anderson Excavating & Wrecking Co. v. Sanitary Improvement District No. 177, 265 Neb. 61, 67, 654 N.W.2d 376 (2002).* **[**9]** The court finds defendant mischaracterizes the nature of plaintiff's claim. However denominated, the court finds plaintiff's allegations state a claim for relief under the theory of "promissory estoppel." ***HN10***[] Promissory estoppel is a situation involving a promise by one party upon which another relies to his detriment, and which the promisor should reasonably have foreseen would cause the promisee to so rely. *Farmland Service Coop, Inc. v. Klein, 196 Neb. 538, 244 N.W.2d 86, 90 (Neb. 1976)*. Nebraska follows the *Restatement (Second) of Contracts § 90* (1981) with regard to promissory estoppel. *Yankton Production Credit Asso. v. Larsen, 365 N.W.2d 430, 433, 219 Neb. 610 (Neb. 1985)*. The Restatement provides as follows:

> (1) A promise which the promisor should reasonably expect to induce action or forbearance on the part of the promisee or a third person and which does induce such action or forbearance is binding if injustice can be avoided only by enforcement of the promise. The remedy granted for breach may be limited as justice requires.

Restatement (Second) Contracts § 90. "Stated another way, a cause of action for promissory estoppel is based upon a promise which the **[**10]** promisor should reasonably expect to induce action or forbearance on the part of the promisee which does in fact induce such action or forbearance." *Goff-Hamel v. Obstetricians & Gyns., P.C., 256 Neb. 19, 588 N.W.2d 798 (Neb. 1999)*. *Maxwell, **[*1087]** Inc. v. Kenney Deans, Inc., 1999 Neb. App. LEXIS 271, 1999 WL 731846 (Neb. App. 1999)* (quoting *Rosnick v. Dinsmore, 235 Neb. 738, 457 N.W.2d 793, 799 (Neb. 1990)*. ***HN11***[] Promissory estoppel provides for damages as justice requires and does not attempt to provide the plaintiff damages based upon the benefit of the bargain. *Rosnick, 457 N.W.2d at 799*. It requires only that reliance be reasonable and foreseeable and does not impose the requirement that the promise giving rise to the cause of action must be so comprehensive in scope as to meet the requirements of an offer that would ripen into a contract if accepted by the promisee. *Hawkins Constr. Co. v. Reiman Corp., 245 Neb. 131, 511 N.W.2d 113, 117 (1994)*. The court finds the plaintiff has adequately alleged promissory estoppel as an alternative theory to its breach of contract claim.

Plaintiff's fourth claim is for violations of the Nebraska Uniform Deceptive Trade Practices Act, *Neb. **[**11]** Rev. Stat. § 87-301 et seq.* ("UDTPA"). ***HN12***[] The UDTPA prohibits a broad panoply of deceptive trade practices. *Id.* However, it does not provide a private right of action for damages. *Neb. Rev. Stat. § 87-303*. Plaintiff does not seek injunctive relief. Accordingly, plaintiff's UDTPA claim will be dismissed.

HN13[] Nebraska's Consumer Protection Act (CPA) mirrors federal law. *Compare* *15 U.S.C. § 45(a)(1)* ("Unfair or deceptive acts or practices in or affecting commerce, are hereby declared unlawful.") *with* *Neb. Rev. Stat. § 59-1602* ("Unfair or deceptive acts or practices in the conduct of any trade or commerce shall be unlawful."). In the context of plaintiff's allegations, the CPA is essentially the state version of the Sherman Antitrust Act. *See* *State ex rel. Douglas v. Associated Grocers of Nebraska Cooperative, Inc., 214 Neb. 79, 332 N.W.2d 690, 692-93 (Neb. 1983)*. Although the CPA provides both a private right of action and a public right, disputes that fall within the ambit of the CPA are unfair or deceptive trade practices that affect the public interest. *Nelson v. Lusterstone Surfacing Co., 258 Neb. 678, 605 N.W.2d 136 (Neb. Jan. 28, 2000).* **[**12]** Plaintiff has failed to state a claim under the CPA for the same reasons discussed in connection with its Sherman Antitrust Act claim. Plaintiff has not alleged any unfair practices or actions by defendant that affect the public interest. It has not alleged any facts showing that this claim involves anything more than an ordinary breach of contract. In order to state a claim under the CPA, a plaintiff must show aggravating factors indicating that the act in question is more than a mere breach of contract. *See* *Raad v. Wal-mart Stores, Inc. 13 F. Supp. 2d 1003, 1014 (D. Neb. 1998)*. Accordingly,

IT IS HEREBY ORDERED:

1. Defendant's motion to dismiss plaintiff's Sherman Antitrust Act claims is granted. Plaintiff's Sherman Antitrust Act claims are dismissed.

2. Defendant's motion to dismiss plaintiff's UDTPA claim is granted. Plaintiff's UDTPA claim is dismissed.

3. Defendant's motion to dismiss plaintiff's CPA claim is granted. Plaintiff's CPA claim is dismissed.

4. Defendant's motion to dismiss plaintiff's detrimental reliance claim, construed as a promissory estoppel claim, is denied.

Dated this 19th day of October, 2004.

BY THE COURT:

JOSEPH F. BATAILLON

2004 Me. Super. LEXIS 227 *; 2004-2 Trade Cas. (CCH) P74,642

CATHERINE J. KNOWLES, et al, Plaintiffs v. VISA U.S.A. INC., et al, Defendants

Prior History: In re Visa Check/MasterMoney Antitrust Litig., 2004 U.S. Dist. LEXIS 8729 (E.D.N.Y., Apr. 27, 2004)

Disposition: **[*1]** Defendants' motion to dismiss complaint for lack of standing granted.

Core Terms

consumers, merchants, antitrust, factors, anti trust law, indirect, debit card, duplicative, damages, retail, class action, plaintiffs', credit card, defendants', purchasers, settlement, courts, overcharge, purposes, apportionment, parties, wording, billion, injunctive relief, issue of standing, motion to dismiss, district court, speculative, decisions, costs

Judges: Thomas D. Warren, Justice.

Opinion by: Thomas D. Warren

Opinion

ORDER

This action is brought by plaintiffs Catherine J. Knowles and Diane Roberts, suing on behalf of themselves and a proposed class of all similarly situated Maine consumers, against defendants Visa U.S.A. Inc. and MasterCard International Inc. alleging violations of Maine's antitrust statutes, 10 M.R.S.A. §§ 1101, 1104 (1996). Before the court is defendants' motion to dismiss on the ground that plaintiffs lack standing for purposes of the antitrust laws.

1. *The Wal-Mart Class Actions*

This action follows on the heels of the settlement of a group of antitrust class actions brought in the U.S. District Court for the Eastern District of New York styled *In re Visa Check/MasterMoney Antitrust Litigation,* No. 96-CV-5238 (JG) (E.D.N.Y.) also known as *Wal-Mart Stores, Inc., et al v. Visa U.S.A. Inc., et al.* (the "*Wal-Mart* class actions")

The *Wal-Mart* class actions were brought by merchants who asserted that they had been harmed by defendants' requirement that merchants had to accept Visa and MasterCard debit cards in order to be allowed **[*2]** to accept Visa and MasterCard credit cards. The merchants alleged that this constituted an illegal tying arrangement in violation of the antitrust laws.

In February 2000 the federal district court granted class certification to a national class consisting of all merchants who accepted Visa or MasterCard credit cards and consequently had been required to accept Visa or MasterCard debit cards. *In re Visa Check/MasterMoney Antitrust Litigation, 192 F.R.D. 68, 90 (E.D.N.Y. 2000)*. In October 2001 the district court's class certification order was affirmed by the *U.S. Court of Appeals for the Second Circuit. 280 F.3d 124 (2d Cir. 2001)*, *cert. denied,* *536 U.S. 917 (2002)*.

On April 11, 2003 the federal district court denied a motion for summary judgment by Visa and MasterCard and granted partial summary judgment to the class plaintiffs on a number of specific issues. *In re Visa Check/MasterMoney Antitrust Litigation, 2003 U.S. Dist. LEXIS 4965, 7-12 (E.D.N.Y. 2003)*. The court concluded, however, that issues of disputed fact remained, *inter alia,* on issues "that lie at the heart of the merchants' [Sherman Act] claims: whether **[*3]** Visa and MasterCard's Honor All Cards rules harmed competition in the debit card services market, and whether the defendants acted together to produce that result." *Id.* at 19.

On April 30, 2003, on the eve of trial, the parties reached a settlement of the *Wal-Mart* class actions. This settlement was ultimately approved by the district court in December 2003. *In re Visa Check/MasterMoney Antitrust Litigation, 297 F. Supp.2d 503 (E.D.N.Y. 2003)*. The settlement involved a payment to the class of more than $ 3 billion plus injunctive relief preventing Visa and MasterCard from tying debit and credit cards in the future. In approving the settlement and awarding $ 220 million in attorneys fees, the district court noted that this constituted "the largest antitrust settlement in history," *297 F. Supp.2d at 508*, and further noted that in addition to the $ 3 billion to be paid in settlement, the injunctive relief that had been agreed to was estimated to result in future savings of $ 25 billion to $ 87 billion. *Id. at 511*. [1]

[*4] 2. *The Consumer Class Actions*

Once the merchants' class had been settled, consumer class actions began to be filed. It is the court's understanding that the case at bar is one of approximately 20 consumer class actions filed against Visa and MasterCard in state courts around the country.

Like their counterparts in other states, Knowles and Roberts allege that the unlawful tying of Visa and MasterCard credit and debit cards harmed consumers because the merchants subjected to the allegedly illegal tying arrangement passed the increased costs on to consumers. Neither the class nor plaintiffs' theory of the case is limited to Maine consumers who actually used Visa or MasterCard debit or credit cards. Instead, plaintiffs' theory is that because merchants had to pay artificially inflated amounts as a result of defendants' unlawful tying agreement, the merchants passed those amounts on to all their customers by increasing the price of *all* retail goods they sold -- regardless of whether payment was made by cash, check, credit card, debit card or otherwise. Thus the proposed class in this case consists of all consumers who purchased any item from any Maine merchant who accepted **[*5]** Visa or MasterCard during the period from December 1999 to December 2003.

Specifically, the class plaintiffs allege that because Visa and MasterCard credit cards are dominant and ubiquitous, acceptance of these cards is critical to the business success of all or most retail merchants. As a result, plaintiffs contend, Visa and MasterCard were able to require that retail merchants accept Visa or MasterCard debit cards if they wanted to accept Visa or MasterCard credit cards, and were able to impose artificially inflated costs and fees upon the merchants, who then passed on those costs to consumers. Complaint PP32, 38-40, 54, 56-58. Plaintiffs allege that Visa and MasterCard were able to set the same fees for their debit cards as for their credit cards even though, in an unrestrained market, debit cards would have commanded lower fees. Complaint PP40, 44. Moreover, according to plaintiffs, the particular kind of debit cards which Visa and MasterCard required merchants to accept

---

[1] With respect to the merits, the district court noted that the *Wal-Mart* plaintiffs did not have an open and shut case as to liability. *See* *297 F. Supp. 2d at 511* (plaintiffs' ability to prove that the "honor all cards" rule was anticompetitive was "no sure thing"). This was particularly true in light of the difficult questions of law involved. *See* *297 F. Supp. 2d at 510*, *quoting* Hovencamp, *Tying Arrangements and Class Actions,* *36 Vand.L.Rev. 213, 213 (1983)* to the effect that "few areas of federal ***antitrust law*** are more confusing than the law that governs tying arrangements."

involved a higher level of credit risk for merchants than other kinds of debit cards offered by entities other than Visa and MasterCard. [2] *Id.* P43.

[*6] Plaintiffs further allege that Visa and MasterCard were able to impose a "no discount, no surcharge" policy on retailers. This prevented retailers from either adding a surcharge for the riskier off-line debit cards offered by Visa and MasterCard or giving consumers a discount for paying through a less expensive means, such as cash or an online debit card. Complaint P7.

One of the named plaintiffs in the case at bar, Diane Roberts, is also a plaintiff in a class action brought in the District of Columbia. *Peterson, et al v. Visa U.S.A. Inc., et al.,* Civil Action No. 03-008080 (D.C. Superior Court, filed Dec. 1, 2003). That action includes claims under the laws of the District of Columbia and seventeen states (including Maine) and seeks to have the District of Columbia court certify a multi-state class action on behalf of consumers from Maine and the 16 other states. In the District of Columbia action, plaintiffs are seeking monetary damages and injunctive relief against Visa and MasterCard's "no discount, no surcharge" policy. D.C. Complaint PP187-92. Only monetary damages are sought in the case before this court. [3]

[*7] 3. *The Contentions of the Parties with respect to Standing*

Visa and MasterCard contend that plaintiffs lack standing to pursue their antitrust claims under the rationale of the U.S. Supreme Court's decision in *Associated General Contractors v. California State Counsel of Carpenters, 459 U.S. 519 (1983)*. That decision sets forth various factors to be considered, including the directness of the injury, when determining whether a plaintiff has standing for antitrust purposes. Visa and MasterCard argue that the direct victims of their allegedly unlawful tying scheme (the merchants) have already settled their claims and that an allegation of indirect injury to consumers is insufficient to provide consumers with standing for antitrust purposes.

Plaintiffs have a simple response. They point out that while the U.S. Supreme Court has ruled that under federal ***antitrust law*** only direct victims of anti-competitive practices may sue for treble damages, *Illinois Brick Co. v. Illinois, 431 U.S. 720, 729 (1977)*, Maine and a number of other states have passed legislation rejecting the *Illinois Brick* rule for purposes of their state antitrust laws. Specifically, **[*8]** the Maine legislature amended *10 M.R.S.A. § 1104(1)* in 1989 to provide a private antitrust treble damage remedy for any person injured "directly *or indirectly* in its business or property." *See* Laws 1989, ch. 367 (emphasis added). The legislative history of this provision demonstrates that the legislature intended to allow "indirect purchasers" to sue manufacturers who had engaged in price-fixing. L.D. 1653, 114th Legis., 1st Sess. (1989). Given this so-called *Illinois Brick* repealer, plaintiffs argue, federal precedent limiting standing for antitrust purposes is inapplicable in Maine.

The threshold issue on this motion, therefore, involves the legal effect of Maine's *Illinois Brick* repealer on the issue of antitrust standing.

4. *The Effect of the Illinois Brick Repealer*

In considering a motion to dismiss, the court must accept the allegations in the complaint as true. Given their allegations in this case, plaintiffs' argument on standing is straightforward. They argue that the language of *10 M.R.S.A. § 1104 (1)* as amended by Laws 1989, ch. 367, is unambiguous and expressly permits suits by indirect victims. Under these circumstances, they contend, the court **[*9]** should not go beyond the statutory wording and should conclude that the issue of standing has been legislatively resolved.

---

[2] The Visa and MasterCard debit cards complained of by the class plaintiffs are off-line debit cards, as opposed to on-line debit cards offered by other entities.

[3] Because of the pendency of the District of Columbia action, plaintiffs originally sought to have this action stayed to await developments in the District of Columbia. Plaintiffs thereafter withdrew their request for a stay. The court agrees that this case should proceed. There is an undoubted benefit in having Maine courts construe Maine's antitrust laws and determine what relief, if any, should be available to Maine consumers.

In most other contexts, the court would be inclined to agree that the plain wording of the statute would control. However, the court does not agree that it should limit its analysis to the statutory wording in this case for several reasons. First, the U.S. Supreme Court expressly stated that it did not base its ruling in *Illinois Brick* on standing and observed that the issue of standing and the indirect purchaser rule were "analytically distinct." *431 U.S. at 728 n.7*. As a result, the fact that the Maine legislature decided to overrule *Illinois Brick* on the issue of whether indirect purchasers may assert a remedy does not necessarily resolve the issue of standing.

Second, it is well established that the antitrust laws set forth broad general principles and leave the application and elaboration of those principles to the courts. As the U.S. Supreme Court noted in *National Society of Professional Engineers v. United States, 435 U.S. 679, 687-88 (1978)*:

> One problem presented by the language of § 1 of the Sherman Act **[*10]** is that is cannot mean what it says ….
> Congress … did not intend the text of the Sherman Act to delineate the full meaning of the statute or its application in concrete situations. The legislative history makes it perfectly clear that it expected the courts to give shape to the statute's broad mandate by drawing on common law tradition. [4]

This same language was quoted by the U.S. Supreme Court when it was faced with the task of defining standing for antitrust purposes in *Associated General Contractors. 459 U.S. at 531*.

Thus, the antitrust laws constitute a broad grant of authority to the courts to fashion a common law of antitrust in furtherance of a general principle to prevent anticompetitive restraints of trade. *See, e.g., SAS of Puerto Rico v. Puerto Rico Telephone Co., 48 F.3d 39, 43 (1st Cir. 1995)* **[*11]** ("Despite its statutory framework, ***antitrust law*** is largely the handiwork of federal judges and antitrust enforcers …."). In this context, the rule that a court should not look beyond the wording of a statute does not have its usual force. Although the court must heed the legislature's intent in enacting the *Illinois Brick* repealer, it must recognize that in the particular context of antitrust, statutory wording is only the beginning and not the end of any inquiry.

Notably, when asked at the hearing what standing principles plaintiffs would apply in this case, counsel for plaintiffs directed the court's attention to Justice Brennan's dissent in *Illinois Brick. See* Tr. of June 17, 2004 hearing at 36. In that dissent Justice Brennan conceded that "despite the broad wording of [the statute] there is a point beyond which the wrongdoer should not be held liable." *431 U.S. at 760* (Brennan, J., dissenting). *See id. at 748 n.2*. Although Justice Brennan went on to argue for a liberal rule of standing defined in terms of the "target area" of the violation, *id. at 760-61*, what is important for present purposes is that he did not dispute **[*12]** that some limits have to be placed on the standing of indirect victims. The wording of the statute, therefore, does not resolve the issue of standing.

5. *Standing under Associated General Contractors*

The court is accordingly faced with a choice between the "target area" test for standing espoused by Justice Brennan in *Illinois Brick* and the *Associated General Contractors* test adopted by the U.S. Supreme Court in 1983. As the Supreme Court noted in *Associated General Contractors,* the target area test poses the prospect of "contradictory and inconsistent results." *459 U.S. at 536 n.33*. Moreover, the target area test does not take account of prudential concerns that may significantly affect whether specific plaintiffs are proper parties to enforce the antitrust laws. "Although the law is written broadly, the Superior Court's doctrine of antitrust standing has significantly narrowed the number of persons entitled to bring suit." *RSA Media, Inc. v. AK Media Group, Inc., 260 F.3d 10, 13 (1st Cir. 2001)* (footnote and citations omitted).

Associated General Contractors has remained the template for determining standing under the federal **[*13]** antitrust laws for the past 20 years. *See, e.g., Verizon Communications Inc. v. Law Offices of Curtis V. Trinko LLP,*

---

[4] The specific statutory language referred to in the above-quoted citation, section 1 of the Sherman Act, is mirrored by *10 M.R.S.A. § 1101*, the provision of Maine ***antitrust law*** which plaintiffs allege Visa and MasterCard violated in this case.

124 S.Ct. 872, 884-85 (2004) (Stevens, J., concurring); RSA Media Inc. v. AK Media Group Inc., 260 F.3d at 13-14. It is probable that the Maine Law Court, if presented with this issue, would look to the *Associated General Contractors* factors in determining standing under Maine's antitrust laws and would apply those factors except to the extent that those factors cannot be reconciled with the legislature's adoption of the *Illinois Brick* repealer.

In *Associated General Contractors,* the U.S. Supreme Court began by observing that standing in an antitrust case is not limited to the requirement of injury in fact but requires a further inquiry to determine whether the plaintiff is a proper party to bring a private antitrust action. 459 U.S. at 535 n. 31. The Court then set forth the following specific factors that must be considered as part of that inquiry:

> (1) the causal connection between the plaintiffs' alleged injury and defendants' claimed violation of the antitrust laws. 459 U.S. at 537. **[*14]**
>
> (2) the alleged improper motive of the defendant. 459 U.S. at 537 and n. 35.
>
> (3) the nature of plaintiffs' alleged injury, including whether it is the type Congress sought to redress in the antitrust laws and whether the plaintiff was a consumer or competitor in the market in which trade was restrained. 459 U.S. at 538-39.
>
> (4) the directness or indirectness of the alleged injury. 459 U.S. at 540.
>
> (5) whether there exists a more immediate class of potential plaintiffs whose self-interest could be expected to motivate them to enforce the antitrust laws. 459 U.S. at 541-42.
>
> (6) whether the damages or injuries claimed are speculative. 459 U.S. at 542-43.
>
> (7) whether the complexity of the case can be kept "within judicially manageable limits", avoiding the risk of duplicative recoveries and the danger of complex apportionment of damages. 459 U.S. at 543-44. [5]

[*15] Looking at these factors in the instant case, it is evident that plaintiffs have adequately pleaded a causal connection and an improper motive. As *Associated General Contractors* demonstrates, however, those factors alone do not confirm standing if they are outweighed by other factors. *See* 459 U.S. at 537.

Inquiry with respect to the nature of the alleged injury presents a somewhat closer case. As noted above, *Associated General Contractors* suggests that one of the subsidiary issues in this inquiry is whether plaintiffs are consumers or competitors in the relevant market. 459 U.S. at 539. The plaintiffs before the court are neither consumers nor competitors in the specific market in which trade was allegedly restrained, which is the market among retail merchants' debit and credit card services. *See* In re Visa Check/MasterMoney Antitrust Litigation, 2003 U.S. Dist. LEXIS 4965, 8-10 (E.D.N.Y. 2003) (relevant market is among merchants, not consumers). Nevertheless, plaintiffs have adequately alleged an injury of the type that Congress sought to redress. *See* Blue Shield of Virginia v. McCready, 457 U.S. 465, 483 (1982). **[*16]** Moreover, Maine's adoption of an *Illinois Brick* repealer further suggests that the court should not deny standing just because plaintiffs are not participants in the actual market where trade was allegedly restrained. This factor weighs in favor of standing.

---

[5] There are some minor variations in the manner in which courts have summarized the factors set forth in *Associated General Contractors.* The above represents this court's own distillation of those factors.

In light of Maine's *Illinois Brick* repealer, the next factor -- directness or remoteness of the asserted injury -- should be disregarded entirely in any inquiry as to standing under Maine's antitrust laws.

The remaining factors are whether there exist more immediate plaintiffs, whether the damages or the injuries are speculative, whether there is a danger of duplicative recoveries, and whether there is a need for complex apportionment. *See* *459 U.S. at 541-44*. These factors are the prudential concerns that have caused federal courts to limit the right of private parties to sue even when a violation exists and the plaintiff has been damaged. *See* *SAS of Puerto Rico v. Puerto Rico Telephone Co., 48 F.3d at 43*. In the court's view, all these factors weigh against standing in this case.

First, there is indisputably a more immediate class of potential plaintiffs motivated to enforce the antitrust **[*17]** laws in this case -- namely, the merchants who have already sued and obtained a settlement of more than $ 3 billion as well as injunctive relief putting an end to the allegedly illegal tying arrangement. *See* *297 F. Supp.2d 503*. This injunctive relief benefits consumers as well as merchants and puts to rest any concern that unless remote plaintiffs are allowed to sue, the antitrust laws will remain unenforced in this case. *See* *Associated General Contractors, 459 U.S. at 542*; *SAS of Puerto Rico,* 147 F.3d at 45. In contrast, if this case presented a situation where potential antitrust violations would remain unredressed unless the parties bringing suit were found to have standing, the case for standing would be immeasurably improved.

Second, both the asserted damages and the chain of causation in this case are speculative. Plaintiffs' contention is that merchants subjected to overcharges as a result of defendants' illegal tying arrangement passed those overcharges on to consumers. To determine what portion of any overcharge was passed on by any given merchant, with respect to which products, and to which consumers is a task of monumental **[*18]** uncertainty and complexity. Depending on their other costs, their competitive position in the market, their profit margins, and the specific products they sold, some merchants could have absorbed a substantial portion of any overcharge instead of passing it on. To a significant extent, whether an overcharge was passed on would depend on the elasticity of demand in the various product markets in which the merchant sells. [6]

In this case, where plaintiffs are alleging that retailers raised **[*19]** prices generally and that plaintiffs therefore paid overcharges on every single purchase, *see* Complaint PP7, 46-47, 58, 66, the extent to which damages were incurred by the class would depend on the specific elasticity of demand for any given product sold at retail in the State of Maine by any retailer who accepted Visa or MasterCard credit cards -- essentially every product of any kind sold to anyone in the State. While this might be a manageable inquiry if only one product were involved, the complexity of inquiry is geometrically increased when all of the different pricing variables applicable to each and every retail product sold in the state must be considered. For any given consumer, the issue is even more complicated and speculative because the inquiry would involve what items that particular consumer purchased, what that consumer paid for each item, and what percentage of overcharge, if any, was contained in that price.

For example, if plaintiff Diane Roberts purchased a number of items at a Shaw's Supermarket on a specific date during the relevant time period and paid $ 2.49 for a carton of orange juice, her right to damages would depend on what portion of that $ 2.49 **[*20]** was attributable to defendants' alleged restraint of trade with respect in providing debit card services to Shaws -- as opposed to such factors as competitive pricing by other supermarkets, the wholesale cost of orange juice, labor costs and other overhead, the elasticity of demand for orange juice, and strategic pricing decisions made by Shaw's. [7] Moreover, the same issues would arise for every other item in Ms. Roberts' grocery cart and for every other item that she purchased from any other retailer that day. This process would then need to be repeated for every single day of the alleged four-year damages period.

---

[6] *See, e.g.,* *Illinois Brick Co. v. Illinois, 431 U.S. at 750 n.3* (Brennan, J, dissenting) ("If the market is relatively inelastic, he may pass on a relatively large portion [of any overcharge]. If demand is relatively elastic, he may not be able to raise his price and will have to absorb the increase, making it up by decreasing other costs or increasing sales volume. It is extremely unlikely that a middleman could pass on the entire cost increase. But rarely would he have to absorb the entire increase.").

[7] This is a modified version of an example offered by defendants in their memorandum of law.

It might be argued that such an inquiry is not necessary for each consumer because relief can be afforded on a generalized basis once the damage to the class has been determined. But even if no inquiry were required as to the specific damages incurred by each consumer, determination of the damage incurred **[*21]** by the class as a whole would require determining what portion of any overcharge had been passed on to consumers with respect to every item sold in Maine over a four year period by every supermarket, every large retailer, every gas station, every restaurant, and every other merchant that accepted Visa or MasterCard. To say that such an inquiry would be highly speculative and problematic is an understatement.

The remaining *Associated General Contractors* factors are the danger of duplicative recovery and the problem of complex apportionment. Duplicative recovery is a major issue in this case in light of the more than $ 3 billion already recovered by the merchants in settlement of the *Wal-Mart* class actions. If double recovery is to be avoided, a complex apportionment between the damages already recovered by merchants and the damage recoverable by the class will be necessary. As noted above, there would also be a complex apportionment necessary to determine the relief that should be afforded to individual class members. Both those issues have a significant effect on the ability of this case to be kept within "judicially manageable limits." *Associated General Contractors,* 459 U.S. at 741. **[*22]**

Plaintiffs argue that in light of the *Illinois Brick* repealer, the court should conclude that the Maine legislature has expressly authorized duplicative recoveries and this factor should therefore not be weighed against them on the issue of standing. The court does not agree. The 1989 amendment to *10 M.R.S.A. § 1104* expressly authorizes indirect purchasers to sue but it does not expressly authorize duplicative recoveries. One of the major arguments for allowing indirect purchasers to sue is that in many cases the direct victims of a restraint of trade are reluctant to bring suit and antitrust violations would therefore otherwise go unremedied. Although this rationale justifies eliminating the *Illinois Brick* bar against suits by indirect purchasers, it does not answer the question of what should happen when the direct victims have in fact already brought suit.

The most forceful opponent of the *Illinois Brick* ruling -- Justice Brennan -- believed that double recovery was only a theoretical possibility. Thus in his *Illinois Brick* dissent, he expressed the view that while arguments based on the potential dangers of double recovery had "some abstract merit", those concerns **[*23]** were unrealistic "as a practical matter." *431 U.S. at 761*. *See* *id. at 762-64*. To the extent those concerns actually materialized, however, Justice Brennan's dissent makes it clear that he contemplated that duplicative recoveries should be prevented and that apportionment between the direct and indirect victims could and should be made. *See* *431 U.S. at 761-63*. He specifically approved the Ninth Circuit's discussion of the procedural mechanisms available to prevent duplicative recovery in *In re Western Liquid Asphalt Cases, 487 F.2d 191, 201 (9th Cir. 1973)*, *cert. denied, 415 U.S. 919 (1974)*, and he noted that those mechanisms could be used to require antitrust plaintiffs to litigate among themselves "their appropriate shares of the total recovery" in the event that a problem of double recovery was actually presented. *431 U.S. at 763*. Thus, if the dissenters had prevailed in *Illinois Brick,* indirect victims would be able to sue but would not necessarily be entitled to subject defendants to duplicative recoveries.

Other states that have enacted *Illinois Brick* repealers have provided **[*24]** statutory mechanisms to deal with the problem of duplicative recoveries, in some cases expressly authorizing their courts to take appropriate steps to avoid such recoveries. *See* *Bunkers Glass Co. v. Pilkington PLC, 75 P.3d 99, 108 (Ariz. 2003)*; *Ciardi v. F. Hoffman-LaRoche Ltd., 762 N.E.2d 303, 321 (Mass. 2002)* (Sosman, J., dissenting). While the treatment of potential duplicative recovery when direct and indirect antitrust victims have both brought suit is an unresolved issue under Maine law, the guidance from Justice Brennan's *Illinois Brick* dissent is that duplicative recovery should at least be prevented to the extent possible. In the court's view, the danger of duplicative recovery and the complex apportionment that may be necessary to avoid such recovery are legitimate factors that must be considered for purposes of antitrust standing. These factors, like the other prudential considerations discussed above, weigh against the standing of the plaintiffs in this case.

In the final analysis, the court has weighed the *Associated General Contractors* factors and has concluded that notwithstanding Maine's enactment of an *Illinois Brick* repealer, **[*25]** the factors that militate against standing outweigh those in favor of standing. Accordingly, defendants' motion to dismiss for lack of standing is granted.

In light of its decision that plaintiffs lack standing under *Associated General Contractors* the court does not have to reach defendants' alternative argument that even if plaintiffs have standing, *10 M.R.S.A. § 1104* is only intended to create a remedy for "indirect purchasers" and that the class members here are not indirect purchasers of debit card services. Nor does it have to consider plaintiffs' response that if defendants are correct as to their indirect purchaser argument, plaintiffs should be allowed to redefine their proposed class to consumers who made purchases with a Visa or MasterCard debit card. [8]

[*26] The entry shall be:

Defendants' motion to dismiss the complaint for lack of standing is granted. The clerk is directed to incorporate this order in the docket by reference pursuant to Rule 79(a).

Dated: October 20, 2004

Thomas D. Warren

Justice, Superior Court

Since the court heard oral argument on defendants' motion to dismiss and took that motion under advisement, counsel for defendants have sent a number of letters to the court submitting various decisions from other state trial courts. Plaintiffs' counsel have not objected to any of these submissions. On October 15, 2004 plaintiffs' counsel filed a motion for leave to submit supplemental authorities, enclosing materials from pending cases in New Mexico and Minnesota. Defendants do not object to this motion but have submitted a response commenting on plaintiffs' submissions.

Plaintiffs' motion for leave to submit supplemental authorities is granted. For the record, the court's view is that parties should be permitted to submit copies of decisions from other courts that they contend are relevant to the issues pending before this court. However, to avoid any perceived need for responsive filings, all parties submitting **[*27]** decisions from other courts should limit themselves to directing the court's attention to the portions of the decisions that they contend are relevant and should refrain from any argument or commentary on the import of those decisions.

October 20, 2004

Thomas D. Warren

Justice, Superior Court

---

[8] As of the writing of this decision, the court is aware that seven other state trial courts have dismissed consumer antitrust claims brought against Visa and MasterCard based on allegations similar to those asserted in this case. *Tackitt v. Visa U.S.A. Inc.,* No. C103-740, Nebraska District Court, Lincoln County, order filed October 19, 2004; *In re Credit/Debit Card Tying Cases,* J.C.C.P. No. 4355, California Superior Court, San Francisco County; order filed October 14, 2004; *Cornelison v. Visa U.S.A. Inc.,* Civil No. 03-1350, South Dakota Circuit Court, Pennington County, order filed September 29, 2004; *Gutzwiller v. Visa U.S.A. Inc.,* No C4-04-58, Minnesota District Court, Clay County, order filed September 15, 2004; *Beckler v. Visa U.S.A. Inc.,* Civil No. 09-04-C-00030, North Dakota District Court, Cass County, opinion filed August 23, 2004; *Stark v. Visa U.S.A. Inc.,* No. 03-055030-CZ, Michigan Circuit Court, Oakland County, opinion and order filed July 23, 2004; *Ho v. Visa U.S.A. Inc.,* No. 1123166/00, New York Supreme Court, New York County, order filed April 26, 2004. All of the states in question, like Maine, have enacted *Illinois Brick* repealers. Some of these decisions have been based on standing, others have been based on the view that the consumers bringing suit did not qualify as indirect purchasers, and some have been based on both grounds.

Plaintiffs have also directed the court's attention to a preliminary ruling by a trial court in New Mexico expressing the view that the *Associated General Contractors* test per se is not applicable in New Mexico but that some of the *Associated General Contractors* factors may nevertheless be relevant to standing under the New Mexico antitrust statute. *Nass-Romero v. Visa U.S.A. Inc.,* No. D0101-CV-200400413, New Mexico District Court, Santa Fe County, transcript of proceedings on September 17, 2004. The New Mexico court invited further briefing on the issue.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss for failure to state a claim will be denied unless it appears that the plaintiff can prove no set of facts that would entitle it to relief. All material allegations in the complaint will be taken as true and construed in the light most favorable to the plaintiff.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Complaints, Requirements for Complaint

A complaint must contain a short and plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)*. Each averment of a pleading shall be simple, concise, and direct. No technical forms of pleading or motions are required. *Fed. R. Civ. P. 8(e)*. These rules do not require a claimant to set out in detail the facts upon which he bases his claim. To the contrary, all the Rules require is a short and plain statement of the claim' that will give the defendant fair notice of what the plaintiff's claim is and the grounds on which it rests.

Antitrust & Trade Law > Sherman Act > Defenses

HN3[] Sherman Act, Defenses

The possession of a valid patent or patents does not give the patentee any exemption from the provisions of the Sherman Act beyond the limits of the patent monopoly.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN4[] Sherman Act, Claims

A monopolist who acquires a dominant position in one market through patents and copyrights may violate § 2 of the Sherman Act if the monopolist exploits that dominant position to enhance a monopoly in another market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] Monopolies & Monopolization, Actual Monopolization

Neither the aims of intellectual property law, nor the antitrust laws justify allowing a monopolist to rely upon a pretextual business justification to mask anticompetitive conduct.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN6[] Antitrust & Trade Law, Sherman Act

In order to assert standing in an antitrust case, a party must allege antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Antitrust injury requires (1) unlawful conduct, (2) causing injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent. In addition, a party must satisfy a fifth element: the injured party must be a participant in the same market as the alleged violator. The party must either be a consumer of the alleged violator's goods or services or otherwise be a competitor in the relevant market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Claims

HN7[] **Actual Monopolization, Claims**

In order to plead a monopolization claim under § 2 of the Sherman Act, a party must allege three essential elements: (1) possession of monopoly power in the relevant market, (2) willful acquisition or maintenance of that power, and (3) causal antitrust injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN8[] **Attempts to Monopolize, Sherman Act**

To plead an attempted monopolization claim under § 2 of the Sherman Act, a party must allege (1) specific intent to control prices or destroy competition in the relevant market, (2) predatory or anticompetitive conduct directed to accomplishing the unlawful purpose, and (3) a dangerous probability of success.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Claims

HN9[] **Actual Monopolization, Claims**

Regarding a monopolization claim under § 2 of the Sherman Act, courts generally require a 65 percent market share to make a prima facie showing of market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN10[] **Attempts to Monopolize, Sherman Act**

Addressing the interrelatedness of the attempted monopolization elements, the United States Court of Appeals for the Ninth Circuit has ruled that a dangerous probability of success under the last element may be inferred from conduct that could support an inference of intent or from direct evidence of specific intent plus proof of conduct directed toward accomplishing the unlawful goal.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN11[] **Trade Practices & Unfair Competition, State Regulation**

Under *Cal. Bus. and Prof. Code § 17200*, unfair competition shall mean and include any unlawful, unfair or fraudulent business act or practice. The unfair competition law embraces anything that can properly be called a business practice and that at the same time is forbidden by law. In other words, *§ 17200 et seq.* "borrows" violations from other laws and makes them independently actionable as unfair business practices.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN12[] **State Regulation, Claims**

Pleading that a defendant's business activity was unlawful is all that *Cal. Bus. and Prof. Code § 17200* requires.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN13[] **Types of Contracts, Quasi Contracts**

The United States Court of Appeals for the Ninth Circuit has applied a three-pronged test for unjust enrichment: (1) a benefit conferred upon the defendant, (2) the defendant's appreciation or knowledge of the benefit, and (3) retention of the benefit under such circumstances as to make the retention inequitable.

Opinion

ORDER DENYING DEFENDANT'S MOTION TO **[*2]** DISMISS FIRST AMENDED CLASS ACTION COMPLAINT

Defendant Abbott Laboratories moves to dismiss Plaintiffs' first amended class action complaint pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. Plaintiffs oppose the motion. This matter was heard on September 17, 2004. Having considered all of the papers filed by the parties and oral argument on this motion, the Court DENIES Defendant's motion to dismiss Plaintiffs' first amended class action complaint.

BACKGROUND

Plaintiffs' first amended class action complaint alleges as follows. Defendant is a pharmaceutical company that has participated in HIV research since the early days of the AIDS epidemic. Defendant is one of several companies currently manufacturing protease inhibitors (PIs), considered the most potent class of drugs to combat the HIV virus. Plaintiffs bring this action on their own behalf and as representatives of all similarly situated individuals who purchased Norvir, a PI manufactured and sold by Defendant, from December 3, 2003 to the present.

Defendant originally developed Norvir for use as a stand-alone PI, but quickly discovered that the drug had serious side effects when **[*3]** used in large dosages. However, when Norvir is prescribed in smaller dosages along with other PIs, it both "boosts" the antiviral effect of those PIs and reduces their harmful side effects. There is no other drug that "boosts" PIs the way Norvir does, and all but one PI currently prescribed for HIV treatment benefit from the use of Norvir as a booster. Norvir thus affects two distinct markets: the "booster market," which Norvir alone constitutes, and the "boosted market," which consists of those PIs that are prescribed for use with Norvir as a booster.

In September, 2000, Defendant introduced its own boosted PI regimen: Kaletra. Kaletra, which comes in the form of a pill that contains both Defendant's PI lopinavir and Norvir, causes significant and harmful side effects. Nevertheless, by June, 2003, Kaletra had secured a seventy-five percent share of the boosted market. In June, 2003, Bristol-Meyers Squib introduced Reyataz, a competing PI that is boosted by Norvir. In October, 2003, GlaxoSmithKline introduced Lexiva, another PI capable of being boosted by Norvir. Kaletra prescriptions began to decrease as HIV patients switched to boosted regimens that result in less harmful side effects **[*4]** than does Kaletra.

On December 3, 2003, just five weeks after Lexiva entered the boosted market, Defendant increased the wholesale price of Norvir by 478 percent. In doing so, Defendant significantly raised the cost of using all PIs in the boosted market -- the increase in annual cost for using Lexiva was over $ 6,200 -- but did not pass along the same Norvir price increase to its own Kaletra. As a result, the cost of Kaletra overnight became substantially cheaper than the cost of using all other PIs in conjunction with Norvir. Plaintiffs allege that the December 3, 2003 Norvir price increase constitutes an illegal attempt to achieve an anticompetitive purpose in the boosted market.

Plaintiffs filed their first amended class action complaint on June 10, 2004, alleging (1) violations of *section 2* of the Sherman Act, (2) fraudulent, unfair or deceptive business practices under *California Business and Professions Code section 17200, et seq.*, and (3) unjust enrichment.

LEGAL STANDARD

HN1[] A motion to dismiss for failure to state a claim will be denied unless it appears that the plaintiff can prove no set of facts that would entitle it to relief. *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*; **[*5]** *Fidelity Fin. Corp. v. Fed. Home Loan Bank of S.F., 792 F.2d 1432, 1435 (9th Cir. 1986)*. All material allegations in the complaint will be taken as true and construed in the light most favorable to the plaintiff. *Big Bear Lodging Ass'n v. Snow Summit, Inc., 182 F.3d 1096, 1101 (9th Cir. 1999)*.

HN2[] A complaint must contain a "short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)*. "Each averment of a pleading shall be simple, concise, and direct. No technical forms of pleading or motions are required." *Fed. R. Civ. P. 8(e)*. These rules "do not require a claimant to set out in detail the facts upon which he bases his claim. To the contrary, all the Rules require is a short and plain statement of the claim' that will give the defendant fair notice of what the plaintiff's claim is and the grounds on which it rests." *Conley, 355 U.S. at 47*.

DISCUSSION

I. Defendant's Liability Under ***Antitrust Law***

Defendant argues that it has a complete defense to every count in Plaintiffs' amended complaint because **[*6]** Defendant owns patents on Norvir and its use as a booster. However, it is "well settled that ***HN3***[] the possession of a valid patent or patents does not give the patentee any exemption from the provisions of the Sherman Act beyond the limits of the patent monopoly." *United States v. Singer Mgmt. Co., 374 U.S. 174, 196-97, 83 S. Ct. 1773, 10 L. Ed. 2d 823, 1963 Dec. Comm'r Pat. 547 (1963)*.

Defendant does not dispute this settled law, and concedes that ***antitrust law*** is implicated when a patent owner extends its monopoly beyond the scope of the patent. However, Defendant argues that Plaintiffs fail to allege that Defendant has engaged in unlawful activity outside of the scope of its patent rights. In support of this argument, Defendant urges the Court to take judicial notice of two patents that purportedly cover Norvir and its use as a booster. [1] However, in addition to the fact that Plaintiffs neither refer to nor rely upon Defendant's patents in the amended complaint, Defendant does not argue that the patents cover anything other than Norvir and its use as a booster. Even when directly addressing the boosted market, Defendant argues only that the Norvir patents cover "a method for improving the pharmacokinetics of protease inhibitors. **[*7]** " Def.'s Reply Br. at 5.

Plaintiffs concede that Defendant owns a monopoly in the booster market. Plaintiffs define the booster market as the market for Norvir and its use as a boosting agent. Plaintiffs' contention is that Defendant's actions constitute illegal anticompetitive activity in the boosted market, which Plaintiffs define as the market for PIs that are prescribed together with Norvir as a booster. Defendant does not argue that its Norvir patents cover the market for PIs that are prescribed along with Norvir. In fact, Defendant acknowledges in its moving papers that there are at least seven competing PIs in the boosted market.

Plaintiffs' complaint alleges that Defendant has used its monopoly in one market (the booster market) in order to achieve an anticompetitive purpose in a separate market **[*8]** (the boosted market). In *Image Technical Services, Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1216 (9th Cir. 1997)*, the court noted that ***HN4***[] "a monopolist who acquires a dominant position in one market through patents and copyrights may violate *§ 2* if the monopolist exploits that dominant position to enhance a monopoly in another market." In *Image Technical*, the court ruled that Kodak violated the Sherman Act when it used its monopoly over Kodak parts, many of which Kodak had patented, in order to gain a monopoly over the service of Kodak equipment. *Id. at 1215-16*. The court demanded that Kodak sell its parts to independent service organizations that serviced Kodak equipment, holding, ***HN5***[] "Neither the aims of intellectual property law, nor the antitrust laws justify allowing a monopolist to rely upon a pretextual business justification to mask anticompetitive conduct." *Id. at 1219*. The successful "monopoly leveraging theory" relied upon by the plaintiffs in *Image Technical, Id. at 1208*, is the theory Plaintiffs assert in their amended complaint to trigger Sherman Act liability.

II. Plaintiffs' Standing to Sue Under the Sherman Act

[*9] A. Damages Under the Sherman Act

Defendant argues that Plaintiffs lack standing to seek damages under the Sherman Act because Plaintiffs are not direct purchasers. In their amended complaint, Plaintiffs seek judgment pursuant to *15 United States Code section 15*; however, in their opposition to this motion Plaintiffs state that they are seeking only injunctive relief under the Sherman Act. Because Plaintiffs do not contest Defendant's argument on this issue and now profess to seek only injunctive relief under the Sherman Act, the Court rules that Plaintiffs lack standing to recover money damages under their Sherman Act claims.

B. Injunctive Relief Under the Sherman Act

Defendant argues that Plaintiffs lack standing to seek an injunction under the Sherman Act because Plaintiffs fail to allege an injury that bears a causal relationship to the alleged antitrust violation. ***HN6***[] In order to assert standing in an antitrust case, a party must allege "antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977).* **[*10]** Antitrust injury requires "(1) unlawful conduct, (2) causing injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1055 (9th Cir. 1999)*. In addition, a party must satisfy a fifth element: the injured party must be a participant in the same market as the alleged violator. The party must either be a consumer of the alleged violator's goods or services or otherwise be a competitor in the relevant market. *Glen Holly Entm't, Inc. v. Tektronix, Inc., 352 F.3d 367, 372 (9th Cir. 2003)*.

[1] Defendant requests that the Court take judicial notice of U.S Patent No. 6,037,157 (the 157 patent) and U.S. Patent No. 5,886,036 (the036 patent). The Court takes judicial notice of the existen these patents.

Here, Defendant argues that Plaintiffs have not satisfied the *American Ad* test because Plaintiffs have not alleged an injury caused by, or that "flows from," loss of competition in the boosted market. Defendant argues that, in fact, while Plaintiffs complain of having to pay higher prices for Norvir as a result of the price increase, Defendant's own drug in the boosted market, Kaletra, is actually less expensive than the competitors' PIs. Defendant argues that having to pay less money does not give rise to a **[*11]** legally cognizable injury.

In order to demonstrate that they have suffered a cognizable injury as a result of Defendant's allegedly unlawful activity in the boosted market, Plaintiffs rely on *Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*. In *McCready*, a consumer plaintiff alleged that her group health plan conspired with, among others, a group of neuropsychiatric physicians to restrain competition in the psychotherapy market. The health plan reimbursed its members for psychotherapy treatment administered by psychiatrists, but refused to provide reimbursement for treatment given by psychologists. According to the *McCready* Court, this practice amounted to forcing subscribers into a Hobson's choice between forfeiting reimbursement by visiting a psychologist or receiving reimbursement by foregoing treatment by the practitioner of their choice. *Id. at 483*. The Court ruled that the plaintiff had standing under the Sherman Act because "the injury she suffered was inextricably intertwined with the injury the conspirators sought to inflict on psychologists and the psychotherapy market." *Id. at 484*.

Plaintiffs allege a similar **[*12]** and analogous injury here. They argue that the Hobson's choice into which they have been forced -- paying more for competing boosted regimens versus paying less for Defendant's Kaletra while accepting the drug's harmful side effects -- is intertwined with the injury that Defendant sought to inflict on its competitors and on the boosted PI market. Plaintiff's injury is distinguishable from the injuries complained of in *Brunswick* and *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*, relied upon by Defendant. In *Brunswick, 429 U.S. at 484*, the injury complained of was lost profits resulting from *increased* competition, and in *Cargill, 479 U.S. at 113*, the injury was alleged to have arisen from a *decrease* in prices in the relevant market. Neither injury is of the type the antitrust laws were intended to prevent, and neither fact scenario is relevant here. Plaintiffs have standing to seek injunctive relief under the Sherman Act.

III. Essential Elements of *Section 2* of the Sherman Act

Defendant argues that Plaintiffs have failed to plead all of the essential elements of their Sherman Act claims. Plaintiffs **[*13]** argue both monopolization and attempted monopolization theories under *section 2*. ***HN7***[] In order to plead a monopolization claim, a party must allege three essential elements: "(1) possession of monopoly power in the relevant market, (2) willful acquisition or maintenance of that power, and (3) causal antitrust injury."' *Rutman Wine Co. v. E. & J. Gallo Winery, 829 F.2d 729, 736 (9th Cir. 1987)*. ***HN8***[] To plead an attempted monopolization claim, a party must allege "(1) specific intent to control prices or destroy competition in the relevant market, (2) predatory or anticompetitive conduct directed to accomplishing the unlawful purpose, and (3) a dangerous probability of success." *Id.*

A. Monopolization

Defendant argues that Plaintiffs have not plead all essential elements of a monopolization claim because Plaintiffs have failed to demonstrate that Defendant possesses a monopoly power in the boosted market. ***HN9***[] Courts generally require a sixty-five percent market share to make a prima facie showing of market power. *Image Technical, 125 F.3d at 1206*. Here, Plaintiffs allege that Defendant had a seventy-five percent market share in June, 2003. Plaintiffs do acknowledge **[*14]** that Defendant's share of *new* PI prescriptions began a precipitous decline following the introduction of competitors' PIs into the boosted market and that those competing PIs began to make inroads into Kaletra's market share. However, Plaintiffs allege that Defendant's December 3, 2003 Norvir price increase was enacted in order to "*maintain* its dominant position in the Boosted Market." Pl.'s Compl. P 19 (emphasis added). Plaintiffs make a specific factual allegation that Defendant had a dominant share of the boosted market in June, 2003, and further allege that Defendant continued to maintain that dominant share six months later when the allegedly illegal activity took place. Plaintiffs have adequately plead Defendant's possession of monopoly power in the relevant market, and have adequately plead all essential elements of a monopolization claim.

B. Attempted Monopolization

Defendant argues that Plaintiffs have not adequately plead all essential elements of an attempted monopolization claim because Plaintiffs have not alleged that there is a dangerous probability that Defendant will achieve monopoly power in the boosted market. ***HN10***[] Addressing the interrelatedness of the attempted **[*15]** monopolization elements, the Ninth Circuit has ruled, "A dangerous probability of success under the last element may . . . be inferred from conduct that could support an inference of intent or from direct evidence of specific intent plus proof of conduct directed toward accomplishing the unlawful goal." *Thurman Indus., Inc. v. Pay N Pak Stores, Inc., 875 F.2d 1369, 1378 (9th Cir. 1989)*. Plaintiffs allege that Defendant seeks illegal anticompetitive goals in the boosted market. Plaintiffs further allege that Defendant, by raising the price of Norvir by 478 percent for every PI in the boosted market except its own, threatens to undercut competing PIs and to discourage competitors from developing new PIs in the future. Plaintiffs have therefore alleged both intent and conduct directed toward achieving the unlawful goal. Plaintiffs have adequately plead all essential elements of an attempted monopolization claim under *section 2* of the Sherman Act.

IV. Unfair Competition

Defendant argues that Plaintiffs' cause of action under *California Business and Professions Code section 17200 et seq.* should be dismissed because Plaintiffs have **[*16]** failed to allege that Defendant's business practices are unlawful, unfair or fraudulent. ***HN11***[] Under *section 17200*, "unfair competition shall mean and include any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*. The unfair competition law "embraces anything that can properly be called a business practice and that at the same time is forbidden by law." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1135, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (Cal. 2003)*. In other words, *section 17200 et seq.* "borrows" violations from other laws and makes them independently actionable as unfair business practices. *Id.*

Here, Defendant argues that because Plaintiffs have failed to allege any actionable violation under the Sherman Act, there is nothing to "borrow" under *section 17200 et seq.* However, the converse of Defendant's argument is also true. If Plaintiffs have adequately plead their Sherman Act claims, *section 17200 et seq.* is triggered because the underlying unlawful activity is properly alleged. Because the Court rules that Plaintiffs have adequately plead their Sherman Act claims, the Court will not dismiss Plaintiffs' **[*17]** unfair competition claim.

Defendant argues correctly that Plaintiffs have failed to allege that Defendant's business practices were fraudulent in any way. Plaintiffs' complaint does not allege any facts that could support a fraud claim. Plaintiffs do allege in their opposition papers that Defendant's claim that Norvir's daily cost is lower than that of competitors' PIs is misleading, but that allegation was not made in Plaintiffs' amended complaint. Plaintiffs' amended complaint does not mention any claim made by Defendant relating to Norvir's cost. However, this is immaterial because Plaintiffs have adequately ***HN12***[] plead that Defendant's business activity was unlawful, and that is all that *section 17200* requires.

V. Unjust Enrichment

Defendant argues that Plaintiffs' unjust enrichment claim should be dismissed because it rests on Plaintiffs' faulty allegations that Defendant violated federal antitrust laws. However, the Court rules that Plaintiffs have adequately plead their federal antitrust claims.

HN13[] The Ninth Circuit recently applied a three-pronged test for unjust enrichment: (1) a benefit conferred upon the defendant, (2) the defendant's appreciation or knowledge of the benefit, **[*18]** and (3) retention of the benefit under such circumstances as to make the retention inequitable. *United States for Use & Benefit of Walton Tech., Inc. v. Weststar Eng'g, Inc., 290 F.3d 1199, 1204 (9th Cir. 2002)*. Here, Plaintiffs allege that Defendant knowingly benefitted in the boosted market from its Norvir price increase, and that it would be unfair to allow Defendant to retain that benefit. Plaintiffs have adequately plead their cause of action for common law unjust enrichment.

CONCLUSION

For the foregoing reasons, Defendant's motion to dismiss Plaintiffs' first amended class action complaint is DENIED.

IT IS SO ORDERED.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN1[] **Standards of Review, De Novo Review**

A district court's denial of a *Fed. R. Civ. P. 50(b)* motion is reviewed de novo. The district court can grant the motion only if after viewing the evidence in the light most favorable to the non-moving party and drawing all reasonable inferences in favor of the non-moving party, it finds that there is insufficient evidence to support the verdict. The district court cannot set aside the jury's credibility findings and cannot find for the movant based on evidence the jury was entitled to discredit. Federal appellate courts apply the same standards.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

Civil Procedure > ... > Standards of Review > Substantial Evidence > Sufficiency of Evidence

HN2[] Trials, Judgment as Matter of Law

To make a sufficiency argument on appeal, a party must have challenged the sufficiency of the evidence to support the particular element in question before the jury retires. *Fed. R. Civ. P. 50(a)(2)*. Notwithstanding the general rule, federal appellate courts may reach the waived issue if to ignore it would result in manifest injustice. Federal appellate courts also may correct a purely legal error despite the lack of a timely request in the district court.

Criminal Law & Procedure > Trials > Jury Instructions > Objections

Criminal Law & Procedure > Trials > Verdicts > Inconsistent Verdicts

HN3[] Plain Error, Definition of Plain Error

When a charge or verdict sheet may lead to inconsistent verdicts, a party must object before the jury begins its deliberations. *Fed. R. Civ. P. 51*. If a timely objection is not made, the failure can be excused only if the district court committed a "fundamental error," a standard that is more stringent than the plain error standard applicable to criminal appeals under *Fed. R. Crim. P. 52(b)*.

HN5[] **Antitrust & Trade Law, Federal Trade Commission Act**

The Connecticut Unfair Trade Practices Act (CUTPA) is to be construed in accord with interpretations by the Federal Trade Commission and by the federal courts interpreting the Federal Trade Commission Act. *Conn. Gen. Stat. § 42-110b(b)*. Thus, Connecticut has adopted the Commission's "cigarette rule" to determine whether a practice is unfair under CUTPA. The factors to be weighed under the cigarette rule are (1) whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise-whether, in other words, it is within at least the penumbra of some common law, statutory, or other established concept of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; (3) whether it causes substantial injury to consumers (competitors or other businessmen). A CUTPA plaintiff need not establish all three criteria to demonstrate unfairness. Instead, a practice may be shown to be unfair either because of the degree to which it meets one of the criteria or because to a lesser extent it meets all three. The practice attacked may be actually deceptive or a practice amounting to a violation of public policy. The plaintiff need not show intent to deceive.

Torts > ... > Punitive Damages > Measurement of Damages > Determinative Factors

HN9[] **Damages, Punitive Damages**

The *Due Process Clause of the Fourteenth Amendment* prohibits a State from imposing a grossly excessive punishment on a tortfeasor. States may impose punitive damages to further legitimate interests, including the prevention of deceptive trade practices. However, elementary notions of fairness enshrined in U.S. constitutional jurisprudence dictate that a person receive fair notice not only of the conduct that will subject him to punishment, but also of the severity of the penalty that a state may impose. To determine whether a defendant has been given adequate notice, courts look to the so-called Gore factors, including the degree of reprehensibility of the relevant conduct; the disparity between the harm or potential harm suffered by plaintiff and his punitive damages award; and the difference between this remedy and the civil penalties authorized or imposed in comparable cases.

Civil Procedure > Remedies > Damages > Punitive Damages

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Contracts Law > ... > Damages > Types of Damages > Punitive Damages

HN10[] **Standards of Review, De Novo Review**

Federal appellate courts review de novo a district court's conclusion that an award of punitive damages is within constitutional limits.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Torts > ... > Types of Damages > Punitive Damages > Aggravating Circumstances

Civil Procedure > Remedies > Damages > Punitive Damages

Contracts Law > ... > Damages > Types of Damages > Punitive Damages

Torts > ... > Punitive Damages > Measurement of Damages > Determinative Factors

HN11[] **Procedural Due Process, Scope of Protection**

The first factor in determining whether states may impose punitive damages to further legitimate interests, namely, the reprehensibility of the defendant's conduct, is "perhaps the most important." In judging reprehensibility, courts consider whether: the harm caused was physical as opposed to economic; the tortious conduct evinced an indifference to or a reckless disregard of the health or safety of others; the target of the conduct had financial vulnerability; the conduct involved repeated actions or was an isolated incident; and the harm was the result of intentional malice, trickery, or deceit, or mere accident.

Contracts Law > ... > Damages > Types of Damages > Punitive Damages

HN12[] **Damages, Punitive Damages**

Although the State Farm Court noted that single-digit multipliers are more likely to comport with due process than awards with ratios in the range of 500 to 1, it also recognized that this proposition may not apply where the plaintiff receives an insignificant or nominal compensatory award. In considering a punitive damages award where the jury awarded no compensatory damages and only one dollar in nominal damages, the United States Court of Appeals for the Second Circuit has said: In Gore, a 500 to 1 ratio was "breathtaking." However, in a *42 U.S.C.S. § 1983* case in which the compensatory damages are nominal, a much higher ratio can be contemplated while maintaining normal respiration. Since the use of a multiplier to assess punitive damages is not the best tool here, courts must look to the punitive damage awards in other civil rights cases to find limits and proportions.

Contracts Law > Remedies > Equitable Relief > General Overview

HN16[] **Types of Contracts, Express Contracts**

Unjust enrichment applies even where the parties have an express contract if: (1) the plaintiff cannot recover under the contract because the plaintiff is guilty of breach of contract, and (2) the defendant would nevertheless be unjustly enriched by keeping the plaintiff's services or money without some payment.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

Contracts Law > ... > Damages > Types of Damages > Punitive Damages

HN17[] **Consumer Protection, Deceptive & Unfair Trade Practices**

In a Connecticut Unfair Trade Practices Act lawsuit, the trial court may award, to the plaintiff, costs and reasonable attorneys' fees based on the work reasonably performed by an attorney and not on the amount of recovery. *Conn. Gen. Stat. § 42-110g(d)*. The award is committed to the discretion of the trial court, and the exercise of such discretion will not ordinarily be interfered with on appeal unless the abuse is manifest or injustice appears to have been done.

Civil Procedure > ... > Costs & Attorney Fees > Attorney Fees & Expenses > Reasonable Fees

HN18[] **Attorney Fees & Expenses, Reasonable Fees**

The Connecticut Supreme Court has repeatedly held that courts have a general knowledge of what would be reasonable compensation for services which are fairly stated and described. Not only is expert testimony not required, but such evidence, if offered, is not binding on the court.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

Civil Procedure > ... > Costs & Attorney Fees > Attorney Fees & Expenses > Reasonable Fees

HN19[] **Consumer Protection, Deceptive & Unfair Trade Practices**

A trial court can compensate a plaintiff for attorney hours spent on unsuccessful claims as long as those claims are related to the Connecticut Unfair Trade Practices Act (CUTPA) claim and there is no reasonable basis for segregating the hours. However, the court can award attorney's fees under CUTPA only for those expenses that were related to the prosecution of a CUTPA claim. Great weight is due to the action of the trial court and every reasonable presumption should be given in favor of its correctness.

Opinion by: POOLER

Opinion

[*116] POOLER, Circuit Judge:

Like Humpty Dumpty, a jury verdict once broken is difficult to put together again. At least, it is difficult to refashion the verdict in a way that accords each party substantial justice. Hence, elementary considerations of fairness support certain procedural obstacles to challenges to a jury's verdict. For instance, a party who fails to object to the sufficiency of the evidence on a particular claim may lure his opponent into failing to present evidence that would cure the asserted defect. The Federal Rules provide a prophylactic against such a strategy **[**2]** by requiring that a party make its sufficiency challenges with some specificity before the other party rests. See *Fed. R. Civ. P. 50(a)(2)*. Similarly, allegedly inconsistent verdicts do not necessarily imply that the jury erred by rendering a verdict favoring plaintiff. Instead, the jury may have made an error favoring defendant, or there may be no real inconsistency. Thus, a party concerned about the possibility of an inconsistent verdict must challenge the court's charge or projected verdict sheet before submission to the jury. See *Fed. R. Civ. P. 51(d)* (allowing a party to claim error based on a charge only if it timely objected to the charge at trial). If a party does not object before the jury retires to consider its verdict, we ordinarily will not consider the argument on appeal. On this appeal, defendants seek reversal on bases that they did not properly place before the district court. Finding no reason to excuse their defaults, we refuse to consider their arguments.

BACKGROUND

Juan F. Fabri, Sr. ("Fabri, Sr.") and Juan F. Fabri, Jr. ("Fabri, Jr.") do business as Juan F. Fabri **[**3]** (collectively, the "Fabris"). For over thirty years, the Fabris acted as sales representatives in Argentina for Sikorsky Aircraft Corporation ("Sikorsky"), whose parent is United Technologies, Inc. ("UTI"), and for various other UTI-affiliated entities. Each year the Fabris entered into a Sales Representation Agreement ("SRA") with UTI to make sales on behalf of Sikorsky and other UTI entities (collectively, "defendants"). Pursuant to the SRA in effect at the time of the events under review, the Fabris would receive "commissions and/or other compensation" from UTI in exchange for selling UTI's products. Further, the Fabris warranted and represented to UTI that

> none of such commissions nor any other money or thing of value has been or will be paid, offered, given or promised by the Representative, his agents or employees, directly or indirectly, to:
>
> . . .
>
> (c) any political party or official thereof, any candidate for political office, or any officer or employee of any government or of any instrumentality controlled by any government, or any person acting on behalf of any government or any instrumentality controlled by any government, for the purposes of:
>
> > (I) **[**4]** [i]nfluencing any act or decision of such party, official, candidate, officer, employee, or person in his or its official capacity;

> > (ii) [i]nducing any such party, official, candidate, officer, employee, or person to use his or its influence with a government or government controlled instrumentality to affect or influence any act or decision of such government or government controlled instrumentality,
>
> in order to promote sales of [the companies'] products or otherwise to assist **[*117]** [the companies] in any aspect of [their] business.

The agreement authorized either party to terminate it on thirty days written notice. In addition, UTI and its subsidiaries had a unilateral right to immediately terminate the agreement under several circumstances, including when "UTI has reason to believe that the representations and warranties made by the [Fabris and quoted above] are no longer valid." Upon termination, UTI or its affiliate had no obligation to pay a commission on any sale the Fabris had arranged unless a sales contract had been signed before the termination. These provisions were included in the SRA to protect Sikorsky and other UTI companies from liability **[**5]** under the *Foreign Corrupt Practices Act ("FCPA"), Pub. L. No. 95-213, 91 Stat. 1494 (1977)*, as amended, codified in pertinent part at *15 U.S.C. § 78dd-2* (imposing liability on companies that pay commissions to sales representatives while knowing that all or part of the commission will be used to bribe a foreign official).

On November 24, 1993, defendants terminated the SRA purportedly because "[v]arious discussions that [they] had with [the Fabris] during the course of the [prior] three weeks had given [defendants] reason to believe that [the Fabris had] violated the terms of [the Fabris' warranty not to pay or agree to pay any portion of their commission as a bribe]." At the time, the Fabris were negotiating with Argentinian president, Carlos Saul Menem, for the purchase of one of Sikorsky's S-70A helicopters. After terminating the Fabris, Sikorsky continued negotiations with Argentinian officials, who ultimately agreed to purchase the helicopter on the terms and conditions that had been proposed by the Fabris. In September 1994, Sikorsky delivered the helicopter, for which it was paid almost $ 16 million.

On November 21, 1996, the Fabris **[**6]** filed a complaint in the United States District Court for the District of Connecticut. Their claims included breach of contract, promissory estoppel, unjust enrichment, quantum meruit, tortious interference, violation of the Connecticut Unfair Trade Practices Act ("CUTPA"), *Conn. Gen. St. § 42-110a et seq.*, breach of the duty of good faith and fair dealing, and invasion of privacy.

Prior to trial, the Fabris withdrew their invasion of privacy claim. At the beginning of the trial, Judge Dorsey dismissed the breach of good faith claim, finding that it was not a cause of action independent of the breach of contract claim. The judge also determined that the jury would not consider unjust enrichment. Finally, he limited the jury's consideration of the quantum meruit claim.

At the close of plaintiffs' proof, defendants moved, pursuant to *Rule 50(a)*, for judgment as a matter of law. As to the CUTPA claim, they argued: (1) plaintiffs' claims for breach of contract, promissory estoppel, unjust enrichment, and quantum meruit could not support a CUTPA claim; (2) therefore, the viability of the CUTPA claim depended on plaintiffs' claim of tortious interference-i.e., that defendants improperly **[**7]** interfered with plaintiffs' contracts with other businesses; and (3) plaintiffs had not proven tortious interference. Defendants renewed this motion without further argument before the case was submitted to the jury pursuant to *Rule 50(b)*.

The jury found that although plaintiffs had not established their claims for breach of the SRA, promissory estoppel, breach of an oral contract, quantum meruit, or tortious interference, they had proven a CUTPA violation. Despite awarding plaintiffs no compensatory damages, the jury awarded one dollar in nominal damages. Finally, the jury found that defendants' **[*118]** violation of CUTPA was willful, reckless, malicious, or oppressive and that plaintiffs were entitled to $ 500,000 and legal fees as punitive damages.

After the verdict, defendants renewed their motion for judgment as a matter of law. They argued: (1) the CUTPA verdict should be set aside because the jury found that plaintiffs failed to prove an ascertainable loss, which, defendants argued, is an element of a CUTPA violation; (2) the evidence did not support a CUTPA violation; (3) the jury should not have been allowed to consider punitive damages or attorney's fees because those issues **[**8]** are for the court not the jury; (4) the punitive damage award was legally and factually unsupported; and (5) even it were allowed to stand, the award was excessive. With respect to the insufficiency of the CUTPA evidence, defendants principally argued that because plaintiffs had offered the same factual allegations and evidence on the common law and CUTPA claims, the jury's verdict in defendants' favor on the common law claims mandated dismissal of the CUTPA claim.

The district court denied defendants' motion. It found that the CUTPA claim could be differentiated from plaintiffs' common law claims and that the jury's general verdict rejecting the common law claims did not necessarily reject the factual allegations underlying those claims. The district court also saw no merit in defendants' alternative argument that the jury's failure to award compensatory damages required that the court set aside the liability verdict.

Judge Dorsey also rejected each of defendants' challenges to the punitive damages award. Finally, he found that the jury's assessment that plaintiffs should receive attorney's fees was, at worst, a harmless advisory opinion because the court would consider plaintiffs' **[**9]** attorney's fees motion at a later date.

Defendants subsequently moved for reconsideration on the CUTPA claim based on a recent decision of the Connecticut Supreme Court, *Gomes v. Commercial Union Insurance Company, 258 Conn. 603, 783 A.2d 462 (Conn. 2001)*. The district court denied this motion as untimely, but also found that it lacked merit.

Plaintiffs requested an award of approximately $ 1.6 million in attorney's fees and expenses based on their CUTPA recovery. The district court awarded slightly more than $ 600,000 as fees and expenses after making reductions on several different bases.

On appeal, defendants argue: (1) the district court improperly imposed a super-fairness standard on their conduct when it found that there was sufficient evidence to support the CUTPA verdict; (2) under the correct CUTPA standard, the jury's conclusion that defendants terminated the SRA in good faith, which was necessary to rule in defendants' favor on the contract claim, precluded a verdict in plaintiffs' favor on the CUTPA claim; (3) in any case, defendants' conduct was not unfair under the "cigarette rule" Connecticut uses to assess CUTPA claims; (4) the district court's **[**10]** interpretation of CUTPA impaired defendants' contractual rights in violation of the *Contracts Clause of the United States Constitution*, *U.S. CONST. art. I, § 10, cl. 1*; (5) the district court's interpretation of CUTPA conflicts with the FCPA; (6) the award of punitive damages should be reversed because there was no evidence of malice or wanton disregard of plaintiffs' rights; and (7) in any event, the punitive damages award should be reduced.

On their cross-appeal, the Fabris argue that (1) the district court should not have dismissed the good faith and fair dealing claim; (2) the district court misinterpreted **[*119]** the law on unjust enrichment and quantum meruit; and (3) the district court erred by reducing the requested attorney's fees.

DISCUSSION

I. Defendants' Appeal

A. Standard of review and procedural requirements.

The parties' positions implicate both the standard of review of the district court's denial of judgment as a matter of law and two potential procedural bars. ***HN1***[] The district court's denial of a *Rule 50(b)* motion is reviewed de novo. *Yurman Design, Inc., v. PAJ, Inc., 262 F.3d 101, 108 (2d Cir. 2001)*. The district court can grant the motion **[**11]** only if after viewing the evidence in the light most favorable to the non-moving party and drawing all reasonable inferences in favor of the non-moving party, it finds that there is insufficient evidence to support the verdict. *Tolbert v. Queens College, 242 F.3d 58, 70 (2d Cir. 2001)*. The district court cannot set aside the jury's credibility findings and cannot find for the movant based on evidence the jury was entitled to discredit. Id. We apply the same standards. Id.

The first of the potential procedural bars is the general requirement that *HN2*[] to make a sufficiency argument on appeal, a party must have challenged the sufficiency of the evidence to support the particular element in question before the jury retires. *Kirsch v. Fleet St., Ltd., 148 F.3d 149, 164 (2d Cir. 1998)* (citing *Fed. R. Civ. P. 50(a)(2)*). Notwithstanding the general rule, we may reach the waived issue if to ignore it would result in manifest injustice. See Id. We also may correct a purely legal error despite the lack of a timely request in the district court. *Baker v. Dorfman, 239 F.3d 415, 420 (2d Cir. 2000).* **[**12]**

The second of the potential procedural bars governs a claim of inconsistent verdicts. As we will explain, defendants implicitly argue that the verdicts dismissing plaintiffs' other claims, especially the contract claim, and the verdict sustaining the CUTPA claim are incurably inconsistent. *HN3*[] When a charge or verdict sheet may lead to inconsistent verdicts, a party must object before the jury begins its deliberations. *Jarvis v. Ford Motor Co., 283 F.3d 33, 56-57 (2d Cir. 2002)* (citing *Fed. R. Civ. P. 51*). If a timely objection is not made, the failure can be excused only if the district court committed a "fundamental error," a standard that is more stringent than the plain error standard applicable to criminal appeals under *Federal Rule of Criminal Procedure 52(b)*. *Id. at 62*.

B. CUTPA liability.

CUTPA provides: *HN4*[] "No person shall engage in unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." *Conn. Gen. St. § 42-110b(a)*. "Any person who suffers any ascertainable loss of money or property, real or **[**13]** personal, as a result of the use or employment of a method, act or practice prohibited by *section 42-110b*, may bring an action" to recover actual damages, punitive damages, and equitable relief. *Conn. Gen. St. 42-110g(a)*. *Subsection (d) of Section 42-110g* allows the court to award "costs and reasonable attorneys' fees based on the work reasonably performed by an attorney and not on the amount of recovery."

HN5[] CUTPA is to be construed in accord with interpretations by the Federal Trade Commission and by the federal courts of the *Federal Trade Commission Act*. *Conn. Gen. St. § 42-110b(b)*. Thus, Connecticut has adopted the Commission's "cigarette rule" to determine whether a **[*120]** practice is unfair under CUTPA. [1] The factors to be weighed under the cigarette rule are

> (1) Whether the practice, without necessarily having been previously considered unlawful, offends public policy as it has been established by statutes, the common law, or otherwise-whether, in other words, it is within at least the penumbra of some common law, statutory, or other established concept of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; (3) whether it causes substantial **[**14]** injury to consumers [(competitors or other businessmen)].

Cheshire Mortgage Serv. Inc. v. Montes, 223 Conn. 80, 612 A.2d 1130, 1143 (Conn. 1992). A CUTPA plaintiff need not establish all three criteria to demonstrate unfairness. Id. Instead, a practice may be shown to be unfair either "because of the degree to which it meets one of the criteria or because to a lesser extent it meets all three." *Id. at 1143-44* (internal quotation marks omitted). The practice attacked may be actually deceptive "or a practice amounting to a violation of public policy." *Id. at 1144*. The plaintiff need not show intent to deceive. Id.

[15]** Defendants make three attacks on the CUTPA verdict. First, they argue that because the jury found in their favor on all of the common law grounds, it could have found in the Fabris' favor on the CUTPA claim only by imposing a super-fairness standard. Defendants' argument is subtle and complex, but it ultimately founders on their failure to object to the charge and verdict sheet. Defendants begin by noting that the district court instructed the jury that to defeat the contract claim, defendants must establish that they had a good faith reason to believe that the

---

[1] The Connecticut Supreme Court first used the term "cigarette rule" in *McLaughlin Ford, Inc. v. Ford Motor Co., 192 Conn. 558, 473 A.2d 1185 (Conn. 1985)*, to refer to a 1964 Federal Trade Commission publication listing the factors to be considered in determining whether a practice that is neither deceptive nor a violation of ***antitrust law*** is nevertheless unfair. See Statement of Basis and Purpose of Trade Regulation Rule 408, Unfair or Deceptive Advertising and Labeling of Cigarettes in Relation to the Health Hazards of Smoking. ***29 Fed. Reg. 8324, 8355 (1964)***.

Fabris had breached the warranties in the SRA. Defendants then reason that, absent a super-fairness standard, they could not have violated CUTPA without also breaching their duty of good faith and fair dealing under the contract.

With respect to the contract claim, the court charged the jury:

> The contract provides that defendants may terminate the contract when in the exercise of good faith and fair dealings they have reason to believe that the plaintiffs violated the sales representation agreement by payment, offer or promise of money or thing of value to an Argentine official.
>
> In determining whether the plaintiffs **[**16]** were entitled to payment under the contract, you must determine whether the defendants have proven that they had good-faith reason to believe that plaintiffs violated the sales representation agreement.

With respect to the CUTPA claim, the court charged that the plaintiffs must prove "an unfair or deceptive act or practice by defendants." It further instructed:

> There have been certain guidelines established to help you decide what constitutes an unfair trade practice.
>
> One, whether the practice, though not previously considered unlawful, offends a public policy established by statutes, common law or otherwise. Whether, in other words, it is within the scope of a **[*121]** concept of unfairness established by the common law or statutes.
> Two, whether it is immoral, unethical, oppressive or unscrupulous.
> Three, whether it causes substantial injury to other business persons.

The court then went on to tell the jury that it need not find all three factors, that one present to a great extent might demonstrate an unfair practice, and that in order to prevail on the third factor, the plaintiffs must show that the injury was indeed substantial and that it was not outweighed **[**17]** by benefits of the practice.

Defendants did not object to either the contract or the CUTPA charge, and they did not object to the verdict sheet, which stated the two claims separately and contained no indication that a verdict in defendants' favor on the common law claims mandated the same verdict on the CUTPA claim.

Although defendants frame their challenge to the verdict as a challenge to the sufficiency of the evidence, any problem with the verdict is a result of the charge and verdict sheet, which allowed the jury to find in favor of defendants on all of the common law claims, but also in favor of plaintiffs on the CUTPA claim. Because defendants' sufficiency challenge is truly an attack on the consistency of the contract and CUTPA verdicts, defendants were required to object before the jury began its deliberations. *Jarvis, 283 F.3d at 56-57*. Since they did not object, defendants must demonstrate fundamental error in the charge and verdict sheet in order to prevail. [2] *Id. at 62*. "Fundamental error is more egregious than the 'plain' error that can excuse a procedural default in a criminal trial and is so serious and flagrant that it goes to the **[**18]** very integrity of the trial." Id. (internal quotation marks and citation omitted).

[19]** Defendants cannot establish fundamental error because none of the authorities on which they rely--*Gomes v. Commercial Union, 258 Conn. 603, 783 A.2d 462 (Conn. 2001)*; *Rudel Mach. Co. v. Giddings & Lewis, Inc., 68 F. Supp. 2d. 118 (D. Conn. 1999)*; and *McKeown Distribs. v. Gyp-Crete Corp., 618 F. Supp. 632 (D. Conn. 1985)*--establish that the jury's verdict in favor of defendant on the contract claim precluded it from finding for the Fabris on the CUTPA claim. In Gomes, the only case from Connecticut's highest court, the court dismissed claims for

---

[2] Defendants' reliance on their motion for judgment as a matter of law to preserve their inconsistency argument is unavailing. In support of that motion, defendants argued that a verdict in the Fabris' favor on the contract, promissory estoppel, unjust enrichment, or quantum meruit claims would not justify a verdict in their favor on the CUTPA claim. In order to prevail on the CUTPA claim, defendants argued, plaintiffs must show either aggravated conduct associated with the breach of contract or tortious interference, neither of which they had done. This argument is quite different from defendants' current claim that the jury's finding that defendants acted in good faith with respect to their contract obligations precluded the jury from also finding that defendants violated CUTPA. See *Jarvis, 283 F.3d 33 at 61* (holding that movant must have "clearly apprised" the trial court of the error in the charge and verdict sheet and given the trial court an opportunity to correct its error).

intentional tort and negligence based on: (1) a hotel desk clerk's failure to notify authorities of a break-in at plaintiffs' gas station after the clerk had assured a guest that she would call and (2) an insurance company's subsequent demand that plaintiffs repay money the company had paid due to plaintiffs' alleged negligence. *783 A.2d at 465*. The court then held:

> Having determined that the conduct of the desk clerk was not actionable **[*122]** under either an intentional tort or negligence theory, we conclude that the plaintiffs' CUTPA claim similarly must fail because the **[**20]** factual predicate of the claimed unfair or deceptive act or practice, as required by *General Statutes § 42-110b(a)*, does not exist.

Id. at 473.

Whatever persuasive authority *Gomes* might have in a different procedural context, it does not establish fundamental error. The Connecticut court did not hold that a plaintiff could never prevail on a CUTPA claim if it also failed to prevail on a contract claim in which defendants were assigned the burden of proving good faith. Instead, the Gomes court primarily determined "whether, under the circumstances of this case, the defendants owed a duty to the plaintiffs to refrain from preventing a third person from rendering aid to prevent damage to the plaintiffs' properties." *Id. at 464*. Thus cabined, Gomes has little precedential force in determining whether the verdicts in this case are incurably inconsistent. It certainly does not establish that fundamental error occurred.

Rudel and McKeown are federal district court decisions. As we have discussed, the fundamental error standard is stricter than the plain error standard that applies when a defendant fails to object to an asserted error in a criminal **[**21]** trial. On plain error review, we "typically will not find such error where the operative legal question is unsettled, including where there is no binding precedent from the Supreme Court or this court." *United States v. Whab, 355 F.3d 155, 158 (2d Cir.)* (internal quotation marks omitted), cert. denied, *58 L. Ed. 2d 519, 124 S. Ct. 2055 (2004)*. Because fundamental error review is even more deferential than plain error review, we doubt that we could find fundamental error in a district court's action on a state law claim in the absence of clear authority from the state's highest court.

Even if we could, neither *Rudel* nor *McKeown* clearly supports defendants' argument. In McKeown, the district court, acting as a fact-finder, rejected a CUTPA claim based on its finding that defendant had good cause to cancel the contract. *618 F. Supp. at 644*. However, the court also noted that it was arguable that McKeown could have shown an unfair trade practice simply by showing that the injury it incurred outweighed any benefit to consumers arising from the practice. Id. n. 7. Thus, McKeown does not rule out a CUTPA claim whenever plaintiff fails to prevail on any of its common **[**22]** law claims. Rudel also leaves open the possibility that a CUTPA claim can survive even though the jury finds no breach of contract. *68 F. Supp. 2d at 130* ("Even assuming that . . . conduct [not in breach of the contract] could give rise to a claim under the second prong of the cigarette rule, to be cognizable it would have to entail a degree of bad faith not shown here."). [3]

Therefore, we hold that defendants waived their challenge to the sufficiency of the evidence supporting the CUTPA claim to the extent that the claimed insufficiency rests on an implication that the jury found no bad faith because it held in defendants' favor on the contract claim. **[**23]** Moreover, we find no fundamental error.

Putting aside any inference that might be drawn from the verdict on the contract claim, we must nevertheless determine whether there was sufficient evidence **[*123]** to support the CUTPA claim. See *Lavoie v. Pacific Press & Shear Co., 975 F.2d 48, 57 (2d Cir. 1992)* (holding that where defendant waives its objection based on inconsistency in the verdicts, the reviewing court is not limited to considering "the sufficiency of the evidence of [the theory on which the jury found for the plaintiff] which is reconcilable with a finding that the [defendant] is not . . . liable" on another theory). Because of defendants' waiver, and because the jury made no findings as to which of

[3] We, too, have held that ***HN6***[] a simple breach of contract does not violate CUTPA and that the plaintiff must show aggravating circumstances. See *Boulevard Assocs. v. Sovereign Hotels, Inc., 72 F.3d 1029, 1040 (2d Cir. 1995)*. That holding, however, does not establish that a CUTPA violation cannot occur without a breach of contract.

plaintiffs' allegations of misconduct it rejected and which it accepted, we must consider all of plaintiffs' evidence of misconduct in determining whether the jury could have properly found a CUTPA violation.

Included in the relevant evidence the Fabris adduced was proof that: (1) they had a thirty-year relationship with defendants in which defendants never had cause to doubt the Fabris' honesty; (2) defendants' investigation of possible misconduct was triggered **[**24]** by Fabri, Jr.'s, report to them of an attempt by an Argentinian government official to corrupt him; (3) defendants knew there were innocent explanations for conduct by the Fabris that defendants viewed as suspicious; (4) defendants terminated the SRA only after the Fabris had effectively obtained the contract for them; (5) after terminating the SRA, defendants offered the Fabris a consulting contract, which required the Fabris to make the same representation that they would not bribe Argentinian officials, but which gave them less compensation than the SRA; and (6) defendants did not reinstate the SRA after the sale went through without a bribe having been paid despite their representative's prior acknowledgment that selling the helicopter without paying a bribe would be substantial evidence of the Fabris' innocence.

As we have discussed, a jury can find a violation of CUTPA if a practice, even if not previously deemed unlawful, offends public policy as expressed in the state's statutes and common law, the conduct is immoral, unethical, or oppressive, and/or it causes substantial harm to a business that outweighs benefits of the practice. *Cheshire Mortgage Serv., 612 A.2d at 1143.* **[**25]** The Fabris have not identified any statute or public policy that defendants' conduct violated. The jury, however, could have found in the Fabris' favor on the other two CUTPA analysis factors. That is, the jury could have found that defendants' investigation and its post-termination actions were unethical and oppressive. Or, it could have found that defendants' failure to reopen their investigation based on new information caused the Fabris significant economic harm without creating a concomitant benefit, especially in light of the thirty-year relationship between the Fabris and defendants. Although defendants certainly had a right and an obligation to act promptly to protect themselves from FCPA liability, they arguably could have reinstated the SRA after receiving more evidence of the Fabris' innocence without jeopardizing their status as government contractors. The jury also could have found that although defendants were entitled to terminate the SRA under its terms, they acted unethically by taking advantage of the Fabris' labor without paying for it.

Because in considering the sufficiency of the evidence to support the CUTPA verdict, we must set aside the fact that the jury **[**26]** found in Sikorsky's favor on the contract claim, and because the evidence viewed in the light most favorable to plaintiffs is sufficient to support the verdict, we reject defendants' sufficiency/inconsistency argument.

Defendants next argue that the district court's interpretation of CUTPA **[*124]** conflicts with the policies of the FCPA and is thus preempted. Defendants claim that they adequately preserved their preemption defense by: (1) including an assertion in their amended answer that the FCPA compelled them to act as they did; (2) adducing expert testimony concerning their FCPA obligations; and (3) raising the FCPA issue, albeit not specifically preemption, in their *Rule 50(b)* motion. Defendants point out that it would have made no sense to raise the issue of preemption before the district court held that the jury could have properly interpreted CUTPA as imposing higher standards than the SRA.

Whether or not defendants waived their preemption claim, it lacks merit in light of our disposition of the sufficiency issue. Defendants' argument is triggered by the district court's holding that the jury could have imposed a higher standard on defendants with respect to the CUTPA claim than **[**27]** it did with respect to the contract claim. However, our affirmance of the district court's verdict does not rest on the district court's conclusion. Instead, we have held: (1) we must consider all proof offered in support of the CUTPA claim and not just proof that is consistent with the jury's verdict on the contract claim and (2) viewed in this fashion, the evidence was sufficient to support the CUTPA verdict. Because our analysis does not rest on or require a super-fairness standard, there is no merit to defendants' preemption contention.

Finally, defendants argue that allowing the Fabris to recover on the CUTPA claim impaired defendants' rights in violation of the *Contracts Clause*. Defendants concede that they did not raise an impairment of contracts claim in district court. They argue, however, that this court can nevertheless reach the issue because it is a purely legal one requiring no additional fact-finding. See, e.g., *Krumme v. Westpoint Stevens Inc., 238 F.3d 133, 142 (2d Cir. 2000)*.

Again, defendants could have avoided the procedural dilemma in which they now find themselves by asking the court to charge the jury that plaintiff could not prevail on its **[**28]** CUTPA claim if it found defendants had not breached the duty of good faith implicit in the SRA. Their failure to do so requires us to find fundamental error in the jury charge or verdict sheet to address the purported error. We do not do so for two reasons. First, any error in the district court's analysis is mooted by our conclusion that no super-fairness standard is required to sustain the CUTPA verdict. Second, defendants have not identified any error and certainly have not established fundamental error. ***HN7***[] The *Contract Clause* prohibits the impairment by the state of existing contracts. *Kinney v. Connecticut Judicial Dep't, 974 F.2d 313, 314 (2d Cir. 1992)* (per curiam). Even if it takes a judicial interpretation of a statute to give it unconstitutional effect, the statute must have been passed after the contract was executed. *Id. at 315*. It is undisputed that CUTPA was passed long before the parties entered into the latest SRA. Therefore, there has been no unconstitutional impairment of a contract.

C. Punitive damages.

Defendants argue both that there was no evidence on which the jury could have premised a punitive damages award and that **[**29]** the damages awarded are excessive. ***HN8***[] Under Connecticut law, punitive damages may be awarded on a CUTPA claim if the evidence "reveal[s] a reckless indifference to the rights of others or an intentional and wanton violation of those rights." *Gargano v. Heyman, 203 Conn. 616, 525 A.2d 1343, 1347 (Conn. 1987)*.

[*125] Defendants did not object to the submission of the CUTPA punitive damages claim to the jury. At the close of plaintiffs' case, defendants asked for dismissal of all claims but did not argue in the alternative that, even assuming a claim had been made out, plaintiffs had not shown an entitlement to punitive damages. Before the jury retired to deliberate, defendants simply reiterated the bases on which they had previously moved. Thus, defendants waived any argument that there was insufficient evidence to support a punitive damages award. Cf. *Local Union No. 38 v. Pelella, 350 F.3d 73, 87-88 (2d Cir. 2003)* (holding that Union waived its objection to award of punitive damages in absence of award of compensatory damages by failing to object to charge in which judge told jury it could award punitive damages without awarding compensatory damages), **[**30]** cert. denied, *541 U.S. 1086, 159 L. Ed. 2d 248, 124 S. Ct. 2821 (2004)*. Because defendants' argument does not present a claim of purely legal error, see *Baker, 239 F.3d at 420*, and because failure to consider it will not result in manifest injustice, see *Kirsch, 148 F.3d at 164*, we decline to reach the sufficiency question.

We turn instead to defendants' claim that the damages award must be set aside as grossly excessive. ***HN9***[] "The *Due Process Clause of the Fourteenth Amendment* prohibits a State from imposing a grossly excessive punishment on a tortfeasor." *BMW of North America, Inc. v. Gore, 517 U.S. 559, 562, 134 L. Ed. 2d 809, 116 S. Ct. 1589 (1996)* (internal quotation marks omitted). States may impose punitive damages to further legitimate interests, including the prevention of deceptive trade practices. *Id. at 568*. However, "elementary notions of fairness enshrined in our constitutional jurisprudence dictate that a person receive fair notice not only of the conduct that will subject him to punishment, but also of the severity of the penalty that a State may impose." *Id. at 574*. To determine whether a defendant has **[**31]** been given adequate notice, we look to the so-called Gore factors, including "the degree of reprehensibility of the [relevant conduct]; the disparity between the harm or potential harm suffered by [plaintiff] and his punitive damages award; and the difference between this remedy and the civil penalties authorized or imposed in comparable cases." *Id. at 575*. ***HN10***[] We review de novo the district court's conclusion that an award of punitive damages is within constitutional limits. *Cooper Indus. v. Leatherman Tool Group, Inc., 532 U.S. 424, 436, 149 L. Ed. 2d 674, 121 S. Ct. 1678 (2001)*.

In this case, applying the Gore factors will require a new trial on punitive damages unless plaintiffs agree to a reduction, in an amount to be determined by the district court, in their punitive damages. ***HN11***[] The first factor, the reprehensibility of the defendant's conduct, is "perhaps the most important." *Gore, 517 U.S. at 575*. In judging reprehensibility, we consider "whether: the harm caused was physical as opposed to economic; the tortious conduct evinced an indifference to or a reckless disregard of the health or safety of others; the target of the conduct had **[**32]** financial vulnerability; the conduct involved repeated actions or was an isolated incident; and the harm was the result of intentional malice, trickery, or deceit, or mere accident." *State Farm Mut. Auto Ins. Co. v. Campbell, 538 U.S. 408, 419, 155 L. Ed. 2d 585, 123 S. Ct. 1513 (2003)*.

The criteria for establishing reprehensibility, as applied to this case, cut in different directions. The harm here was economic, rather than physical, and there was no disregard of the health or safety of others. We accept that the Fabris were **[*126]** somewhat financially vulnerable because an arms embargo had prevented them from doing business in Argentina on defendants' behalf, that the jury could have found that defendants' conduct was intentional and motivated by malice, and that the unfair conduct involved repeated actions rather than an isolated incident. Nevertheless, the conduct in this case differs only in degree from that in a more typical CUTPA claim, and, altogether, the criteria for establishing reprehensibility call into question the amount of punitive damages in this case.

The second Gore factor--the relationship between actual damages and punitive damages--would, if fully applicable, **[**33]** cut strongly in favor of defendants because plaintiffs received one dollar in nominal damages and $ 500,000 in punitive damages. However, the very fact that plaintiffs received only nominal damages counsels against reducing their punitive damages award too substantially. ***HN12***[] Although the State Farm Court noted that "single-digit multipliers are more likely to comport with due process . . . than awards with ratios in [the] range of 500 to 1," it also recognized that this proposition may not apply where the plaintiff receives an insignificant or nominal compensatory award. *State Farm, 538 U.S. at 425*. In considering a punitive damages award where the jury awarded no compensatory damages and only one dollar in nominal damages, we said:

> In *Gore*, a 500 to 1 ratio was "breathtaking." However, in a *§ 1983* case in which the compensatory damages are nominal, a much higher ratio can be contemplated while maintaining normal respiration. Since the use of a multiplier to assess punitive damages is not the best tool here, we must look to the punitive damage awards in other civil rights cases to find limits and proportions.

Lee v. Edwards, 101 F.3d 805, 811 (2d Cir. 1996). **[**34]**

Applying the third Gore factor, which examines civil penalties available for similar violations, further persuades us that the punitive damages award is excessive. ***HN13***[] CUTPA provides that the Attorney General of Connecticut may recover a civil penalty of $ 5,000 for each willful CUTPA violation. *Conn. Gen. St. § 42-110o(b)*. That sum is 1/100 of the punitive damages awarded here. However, civil verdicts also are relevant, see *Lee 101 F.3d at 811*, at least where there is some parity between the injuries suffered by the plaintiff in the case under review and those suffered by the plaintiffs in the cases being compared, see *id. at 812-13* (reducing award because plaintiff received damages solely on his malicious prosecution claim and his award exceeded punitive damages given to plaintiffs who suffered severe physical and psychological harms).

We have found no case in which a Connecticut court approved a punitive damages award of the magnitude approved by the district court here in which there was neither bodily injury nor a pattern of misconduct by the defendant that affected entities other than the plaintiffs. The largest punitive damages award we **[**35]** have found for solely economic loss without allegations of pattern and practice is approximately $ 340,000. See *Advanced Fin. Servs. v. Associated Appraisal Servs., 79 Conn. App. 22, 830 A.2d 240, 249 (Conn. App. Ct. 2003)*. However, Advanced Financial differs from this case in two significant respects. First, the court awarded compensatory damages in the amount of half the punitive damages award. *Id. at 250*. Second, the Connecticut court found that defendants committed actual fraud, rather than the aggravated **[*127]** sharp dealing the jury in this case permissibly could have found. *Id. at 246*.

Based on our consideration of all the Gore factors, we hold that a corporation such as UTI or Sikorsky would not have been on notice that its conduct could trigger a punitive damages award of $ 500,000. We therefore hold that the punitive damages award is so excessive as to have denied defendants due process. Because the district court is far more familiar with this case than this court, we vacate the punitive damages award and remand for the district court to set the appropriate remittitur amount. See *Smith v. Lightning Bolt Prods., 861 F.2d 363, 375 (2d Cir. 1988).* **[**36]**

II. The Cross-Appeal

The Fabris contend that the district court erred by: (1) dismissing sua sponte their breach of good faith and fair dealing claim; (2) dismissing their claims for unjust enrichment and quantum meruit; and (3) reducing their award of attorney's fees.

A. Good faith and fair dealing.

The Fabris contend that a breach of the duty of good faith and fair dealing is an independent claim under Connecticut law. Further, they assert that the district court's error in dismissing the claim was not cured "by adding the bare words 'good faith,' and the phrase 'good faith and fair dealing' to the instructions on the breach of contract claim." Appellees' Br. at 72.

We are not certain whether Connecticut courts would allow a litigant to proceed on theories of both breach of the implied warranty of good faith and breach of contract. It appears that allowing plaintiffs to plead both claims would be duplicative because ***HN14***[] the implied warranty of good faith is read into all contracts. See *Celentano v. Oaks Condo Ass'n, 265 Conn. 579, 830 A.2d 164, 188 (Conn. 2003)*. However, in *Miller v. Guimaraes, 78 Conn. App. 760, 829 A.2d 422 (Conn. App. Ct. 2003),* **[**37]** the court upheld, without discussion, liability verdicts for both breach of contract and breach of the implied duty of good faith and fair dealing. *Id. at 432-33*. Even assuming that Miller presages a holding that a plaintiff can maintain separate claims for breach of contract and breach of the duty of good faith and fair dealing, the Fabris cannot prevail because they suffered no prejudice. The district court charged the jury that in order to terminate the contract, defendants were required to have held a good faith belief that the Fabris had breached their warranties. The court also charged that Sikorsky must prove that it had a good faith reason for its belief. If anything, plaintiffs, who would have borne the burden of proof on the independent claim, benefitted from the allocation of the burden on the contract claim. Therefore, if the district court erred in refusing to charge the good faith claim separately, its error was harmless as a matter of law and thus not a basis for reversal. See *28 U.S.C. § 2111*.

Plaintiffs also contend that the trial court denied their request for a charge that would have better explained the obligation to exercise **[**38]** good faith, making it clear that this obligation extended not just to defendants' initial reason for their belief that plaintiffs were engaged in conduct contrary to the SRA, but also to defendants' investigation of plaintiffs. Defendants deny that plaintiffs made any such request. Plaintiffs moved in this court and the district court to supplement the record to reflect the substance of the charge conference, which was not on the record. All of the motions to correct the record were denied. Plaintiffs concede that, absent the charging conference, the record does not contain any objections to the court's charge, which would require us to consider whether the charge caused a fundamental **[*128]** injustice. Because we conclude that-even if plaintiffs had timely objected to the charge-they have not demonstrated harmful error, much less fundamental injustice, we reject plaintiffs' challenge to the good faith charge.

B. Quantum meruit and unjust enrichment.

The district court dismissed plaintiffs' unjust enrichment claim with respect to the sale of both the S-70A helicopter, which has been the principal focus of our analysis thus far, and an S-76 helicopter, which plaintiffs claimed **[**39]** was bought by Argentina in 1997 because of their efforts. The court also dismissed plaintiffs' quantum meruit claim with respect to the S-70A helicopter and instructed the jury that it could not find in plaintiffs' favor on the S-76 quantum meruit claim if it found the work performed to sell the S-76 was within the scope of the SRA. The Fabris contend that the district court erred in all these decisions. The district court did not err by dismissing the quantum meruit claim on the S-70A sale and by limiting it on the S-76 sale. ***HN15***[] "Parties who have entered into controlling express contracts are bound by such contracts to the exclusion of inconsistent implied contract obligations." *H.B. Toms Tree Surgery, Inc. v. Brant, 187 Conn. 343, 446 A.2d 1, 3 (Conn. 1982)*. Because an express contract governed the relationship between the Fabris and defendants, the quantum meruit claim was appropriately rejected.

HN16[] Unjust enrichment applies even where the parties have an express contract if: (1) the plaintiff cannot recover under the contract because the plaintiff is guilty of breach of contract, and (2) the defendant would nevertheless be unjustly enriched by keeping the plaintiff's **[**40]** services or money without some payment. Vines v. Orchard Hills, Inc., 181 Conn. 501, 435 A.2d 1022, 1028 (Conn. 1980) ("The purchaser must show more than that the contract has come to an end and that the seller retains moneys paid pursuant to the contract. To prove unjust enrichment, in the ordinary case, the purchaser, because he is the party in breach, must prove that the damages suffered by his seller are less than the moneys received from the purchaser.").

Here, the proof presented to the jury focused on whether defendants had a reasonable good faith belief that the Fabris' warranties were no longer valid. Defendants did not attempt to prove that the Fabris actually breached the SRA, and the Fabris certainly did not admit to a breach. Therefore, the Fabris were not entitled to an unjust enrichment charge.

C. Attorney's fees.

The Fabris claim that the district court erred in calculating attorney's fees by: (1) reducing their uncontested claimed hourly rates; (2) halving hours worked on claims clearly interrelated with the CUTPA claim; (3) denying all fees for a second senior attorney at trial; (4) not allowing fees related to polygraph evidence, **[**41]** which allegedly demonstrated that Fabri, Jr. neither offered nor paid a bribe; (5) double discounting; and (6) making miscellaneous calculation errors. Defendants suggest that if this court eliminates or significantly reduces the punitive damages verdict, it also should remand for recalculation of fees in light of the Fabris' diminished success.

HN17[] In a CUTPA lawsuit, the trial court "may award, to the plaintiff, . . . costs and reasonable attorneys' fees based on the work reasonably performed by an attorney and not on the amount of recovery." Conn. Gen. St. § 42-110g(d). The award is committed to the discretion of the trial court, "and the exercise of such discretion will not ordinarily be interfered **[*129]** with on appeal unless the abuse is manifest or injustice appears to have been done." Gargano v. Heyman, 203 Conn. 616, 525 A.2d 1343, 1347 (Conn. 1987).

Plaintiffs requested almost $ 1.6 million in attorney's fees. Judge Dorsey first reduced the hourly rate for partners from a requested maximum of $ 275 an hour to a maximum of $ 225 per hour, the hourly rate for associates from a requested maximum of $ 170 per hour to a maximum of $ 150 per hour, the hourly rate for **[**42]** paralegals, summer associates, and interns from an unknown maximum to $ 75 per hour, and the hourly rate for litigation support to $ 40 per hour. These rate reductions resulted in the subtraction of $ 167,866 from the requested fee award. Judge Dorsey acknowledged that plaintiffs supported their fee requests with an affidavit from a Connecticut attorney who "stated that the rates charged by Plaintiffs' counsel were reasonable and comparable to rates charged by similar firms engaged in complex litigation." The judge noted, however, that the attorney did not claim that the individual attorneys involved in the litigation deserved such rates. Judge Dorsey rested his reduction not on record evidence but rather on his own assessment that the plaintiffs' attorney's fees were higher than those prevailing in the area and on his observation of the trial proceedings.

The Fabris contend that it was an abuse of discretion for the judge to discount their hourly rates because there was no evidence to the contrary, but HN18[] the Connecticut Supreme Court has "repeatedly held that courts have a general knowledge of what would be reasonable compensation for services which are fairly stated and described. **[**43]** Not only is expert testimony not required, but such evidence, if offered, is not binding on the court." Piantedosi v. Floridia, 186 Conn. 275, 440 A. 2d 977, 980 (Conn. 1982) (internal quotation marks omitted). Therefore, the hourly rate reduction was well within the discretion accorded to the district court.

After reducing hourly rates, the district court made reductions in the hours of attorney time that plaintiffs claimed. We discuss only those reductions that the Fabris contest. Although defendants challenged the time the Fabris' attorneys spent on any claim other than the successful CUTPA claim, the court refused to eliminate hours spent on the Fabris' claims for breach of written contract, breach of the duty of good faith and fair dealing, and unjust enrichment because these claims "were factually intertwined with [the] CUTPA claim." However, the court found that the claims for "breach of oral contract (related to the S-61 helicopter sale), promissory estoppel (related to the S-61 helicopter sale), quantum meruit (related to the S-76 helicopter sale), tortious interference with business relations, equitable estoppel, and invasion of privacy were not factually intertwined **[**44]** with these other claims and were not meritorious." It held that awarding fees for the time spent on those claims would neither be appropriate nor "reasonable" within the meaning of CUTPA. The court found that, within the parameters it had set, approximately 50% of the time entries were not related to the CUTPA claim. The court therefore reduced the requested fee by an additional $ 215,279.

The Fabris contend that because all their claims were factually intertwined, no reduction was merited. However, they fail to explain how the claims are interrelated. Instead, they rely principally on their incorporation of all factual allegations to support their CUTPA claim and on the district court's conclusion that plaintiffs could rely on all of their evidence to avoid **[*130]** judgment as a matter of law on the CUTPA claim.

HN19[] A trial court can compensate a plaintiff for attorney hours spent on unsuccessful claims as long as those claims are related to the CUTPA claim and there is no reasonable basis for segregating the hours. See *Bristol Tech. Inc., v. Microsoft Corp., 127 F. Supp. 2d 64, 70 (D. Conn. 2000)*. However, "the court can award attorney's fees under CUTPA only for those **[**45]** expenses that were related to the prosecution of a CUTPA claim. Great weight is due to the action of the trial court and every reasonable presumption should be given in favor of its correctness." *Jacques All Trades Corp. v. Brown, 57 Conn. App. 189, 752 A.2d 1098, 1105 (Conn. App. Ct. 2000)* (internal quotation marks and indicators of alterations from the original omitted).

In this case, the district court's reliance on facts proven in support of other claims to justify the CUTPA verdict does not establish that those claims were interrelated with the CUTPA claim. It was reasonable for the judge to conclude he must consider all proof adduced on all claims in determining whether to set aside the jury's verdict and yet find on the attorney's fees motion, which was committed to his discretion, that certain legal claims were not significantly related to the CUTPA claim. Therefore, he did not abuse his discretion by reducing the verdict to account for hours spent on these non-CUTPA claims.

Two senior attorneys and one junior attorney represented the Fabris at trial. Judge Dorsey refused to compensate the Fabris for the services of the second senior attorney. He found **[**46]** that only two attorneys were necessary "for the prosecution of this case." Disallowing the services of one senior attorney resulted in a reduction of $ 45,575 from the attorney's fee award. Plaintiffs contend this reduction was an abuse of discretion because "the case plainly required three attorneys" and "Sikorsky usually had *four* attorneys in the courtroom." Appellees' Br. at 89. The number of attorneys reasonably necessary to prosecute a claim is best judged by the trial court, which actually observes the roles played by the attorneys at trial. Therefore, we have no basis for holding that the trial court abused its discretion when it denied fees for a second senior attorney.

Judge Dorsey would not allow attorney's fees and expenses relating to the polygraph testing of Fabri, Jr. He found that "the Fabris do not adequately explain why the expenses were reasonable, aside from conclusory assertions that the polygraph exams were 'important' and 'significant' to aid settlement discussions and to speculation that they may have enticed Defendants to withdraw an affirmative defense." He also found the fees "excessive" and "pertaining to evidence that is not admissible and thus unnecessary **[**47]** in that regard." He therefore deducted the $ 35,105 attributable to the polygraph evidence from the fee and expenses award.

Plaintiffs contend that Judge Dorsey plainly erred in reaching this conclusion because the results were relevant to show that defendants had conducted a flawed investigation. They also argue that the polygraph results, which allegedly demonstrated Fabri, Jr.'s innocence, caused Sikorsky to withdraw its affirmative defense that it would have been impossible under the FCPA to pay the Fabris a commission. The district court did not abuse its discretion by concluding otherwise and disallowing the fees and expenses.

Finally, the Fabris urge that the district court failed to factor in earlier reductions when it made later ones and made other calculation errors. Because we vacate the punitive damages award, **[*131]** plaintiffs may apply to the district court on remand to correct any miscalculations that may have occurred. However, we decline defendants' request that we allow the district court to reduce the attorney's fees award in light of the contemplated reduction in the punitive damages award. ***HN20***[] CUTPA instructs us not to base the attorney's fees award on the amount of a **[**48]** party's recovery. See *Conn. Gen. St. § 42-110g(d)*.

CONCLUSION

The liability verdict is affirmed. We vacate the award of punitive damages and remand in order that the district court can set a remittitur amount by applying the *Gore* factors. Should plaintiffs refuse to accept the reduced damages award, a new trial on punitive damages will be necessary. The district court shall also consider any request plaintiffs may make for a correction of calculation errors in the attorney's fees award.

HN3[] **Ownership & Transfer of Rights, Assignments**

The Patent Act provides the patent owner with what amounts to a permissible monopoly over the patented work. Patent laws are in pari materia with the antitrust laws and modify them pro tanto (as far as the patent laws go). As a number of recent cases have observed, there is a tension between the protections offered by patent and antitrust laws.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Appeals

HN4[] **Inequitable Conduct, Anticompetitive Conduct**

In the context of patent law, the U.S. Court of Appeals for the First Circuit has held that it cannot presume that elimination of an intermediate seller of repair parts harms consumers; indeed, consumers are likely to benefit by not having to accept a third-parties' mark-up of the defendant's prices. Further, a direct sales policy does not act as a significant barrier to market entry by competitors offering lower prices for higher quality support services.

Torts > ... > Commercial Interference > Contracts > General Overview

HN13[] **Copyright Infringement Actions, Civil Infringement Actions**

In the context of whether a state law tortious interference with contract claim involves the same conduct as a copyright infringement claim and, thus, is preempted by federal copyright law, if the state law involves different or additional elements for recovery, then it is not preempted because it is not the same action. A tortious interference claim involves an additional element. A tortious interference claim requires a plaintiff to demonstrate that the defendant violated the terms of plaintiff's software license for third parties, which is an element beyond federal copyright law that prohibits unauthorized copying. As such, the state law claim is not preempted because the claim at issue is not equivalent to the claim under *17 U.S.C.S. § 106*.

Judges: Before BLACK and KRAVITCH, Circuit Judges, and STROM [*], District Judge.

Opinion by: KRAVITCH

[*] Honorable Lyle E. Strom, United States District Judge for the District of Nebraska, sitting by designation.

Opinion

[*1003]** **[*823]** KRAVITCH, Circuit Judge:

The appellants, a group of independent telephone service companies and telephone system customers, appeal the dismissal on summary judgment of their antitrust claim against Siemens Rolm Communications ("Siemens"). The issue is whether Siemens's refusal to sell or license patented or copyrighted goods to the appellants is an illegal use of monopoly power in a secondary market. The appellants also appeal the jury verdicts on Siemens's cross-claims against them stemming from copyright and patent infringement.

I. Facts

Siemens produces private branch exchanges ("PBXs"), also referred to as "switches," which are computers that direct telephone calls and data transmissions through a network of private extensions. Businesses that have multiple telephone lines use PBXs to send and receive calls. The PBXs include hardware **[**2]** (the physical parts making up the switch) and software components (the telephone system program). Siemens possesses intellectual property rights over some of the hardware and all of the software used in its PBXs. Siemens does not sell the software, but sells licenses to use the system. Depending on the what type of system the customers want and the price they wish to pay, the software can be activated to provide more or fewer features.

In addition to selling licenses to use its PBXs, Siemens also sells PBX servicing for its products. Siemens has a patent on many of its parts and does not sell parts to third parties for resale. A customer can service its PBX in one of three ways. First, it can hire Siemens **[***1004]** to service the PBX. Second, it can order the parts directly from Siemens (or an authorized distributor) and make arrangements to service the machine themselves. Third, it can hire an independent service organization ("ISO") to service the machine, although Siemens requires that the customer furnish the ISO with a letter of agency authorizing it to order the part on the customer's behalf before Siemens sells the part.

The appellants, primarily a group of ISOs that specialize in **[**3]** servicing PBX systems, allege that Siemens has created a monopoly in the market for servicing Siemens's PBXs. [1] They claim that Siemens's refusal to sell parts to third parties is designed to prevent competition in the service market. The district court initially denied Siemens's motion for summary judgment on the antitrust claim, but later reversed that ruling based on the Court of Appeals for the Federal Circuit's holding that an antitrust claim could not be brought based on a refusal to sell patented parts or license copyrighted software. [2] **[*824]** See *CSU, L.L.C. v. Xerox Corp. (In re Independent Serv. Orgs. Antitrust Litig.), 203 F.3d 1322 (Fed. Cir. 2000)* ("In re ISO"). The ISOs now appeal.

[4]** Siemens filed counterclaims against certain individual appellants stemming from their alleged infringement on Siemens's patents and copyrights. Siemens claimed that all of the ISOs had infringed on its copyrights and patents by copying and distributing software covered by Siemens's intellectual property rights. Siemens further claimed that by distributing protected software, the ISOs tortiously interfered with Siemens's contractual relations with its customers. Finally, Siemens claimed that three ISOs (ATC, TTSI, and RealCom) misappropriated trade secrets by stealing passwords that allowed the ISOs to activate features that customers had not licensed from Siemens.

---

[1] None of the appellants allege that Siemens has a monopoly over the market for PBX sales. Companies other than Siemens, including Lucent Technologies and Nortel, also compete with Siemens for PBX customers. *Telecomm Tech. Servs. v. Siemens Rolm Communs., Inc., 66 F. Supp. 2d 1306, 1310 (N.D. Ga. 1998)*.

[2] The district court believed that this case would be appealed to the Court of Appeals for the Federal Circuit. That court, however, determined that it did not have jurisdiction over this case because the patent claims were only raised as counterclaims. The case was then transferred back to this court.

The district court, before dismissing the antitrust claim altogether, bifurcated the antitrust claim and the counterclaims into separate trials. A trial was held on the counterclaims and the jury returned a verdict for Siemens on all claims. The district court, however, limited the damage award because awards for the different claims were duplicative. The court upheld only the damage award for copyright infringement within the three-year statute of limitations period because all of the other claims were derivative of the **[**5]** copyright infringement. The ISOs appeal the jury verdict on a number of grounds. Siemens does not appeal the reduction in damages.

II. The Antitrust Claim

The issue here is whether Siemens's refusal to sell parts for its PBX systems, some of which are protected by patent or copyright, is a use of monopoly power *in the service market* in violation of antitrust laws.

1. Procedural Background

The district court, relying on the Supreme Court's decision in *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)* ("Kodak I"), initially determined that the plaintiffs presented sufficient evidence to withstand a motion for summary judgment on their antitrust claim. In Kodak I, as in this case, ISOs brought suit against Kodak for failure to sell parts required to service Kodak machines. Kodak had a policy of refusing to sell parts to any ISO and would only ship parts to customers who planned to service the machines themselves. The ISOs argued, and the Supreme Court agreed, that they should be able to proceed to trial on two antitrust claims. The ISOs' first claim was that Kodak "tied" the parts and service markets **[**6]** in violation of *§ 1 of the Sherman Act*. In short, the plaintiffs claimed that Kodak was using its market power in the *parts market* to require that customers also buy from Kodak in the *service market*. By making access to Kodak parts contingent on buying Kodak service, Kodak was illegally using its market power in one market (parts) to limit competition in another market (service).

The ISOs's second claim was that Kodak was attempting to maintain a monopoly in violation of *§ 2 of the Sherman Act*. ***HN1***[] To demonstrate a violation of *§ 2*, the plaintiffs must show "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical **[*825]** accident." *Id. at 480*. The Supreme Court held that the ISOs presented **[***1005]** sufficient evidence to withstand summary judgment for both elements by demonstrating that Kodak controlled 100% of the parts market and used this power to dominate 80% to 95% of the service market.

Here, the district court considered whether Siemens used illegal means to dominate the service market. **[**7]** [3] **[**8]** The ISOs alleged that Siemens violated *§ 2 of the Sherman Act* by using its control of the *parts* market to establish and maintain a monopoly in the *service* market. [4] Siemens responded with two arguments. First, Siemens disputed whether the purchase of the PBX system and the servicing of the system were two separate markets. Siemens maintained that the existence of a competitive market for the purchase of PBX systems prevented the company from undertaking anti-competitive action in the service market. [5] If only one market existed, then Siemens

---

[3] The appeal here, unlike *Kodak*, does not involve a § 1 tying claim.

[4] To demonstrate that Siemens was illegally using monopoly power in the service market, the ISOs presented evidence that Siemens's prices for servicing were 30% to 60% higher than comparable ISO prices.

[5] Siemens's argument is based on a "life-cycle" theory of consumer buying where the consumers include present and future costs (such as servicing) when deciding which telecommunications system to purchase. In short, Siemens argued that customers considered the costs of service when making initial purchasing decisions and that this prevented Siemens from later charging super-competitive prices to service the PBX system. The Supreme Court rejected a similar life-cycle argument in Kodak I, but stated that a court needed to look at the facts of each case in evaluating whether consumers would realistically use life-cycle pricing when making purchasing decisions. *504 U.S. at 472-77*. Here, the ISOs argue that the life-cycle theory is

could not illegally tie or leverage its dominance in one market into another market. Second, Siemens argued that its intellectual property rights in its PBX parts and software granted it the right to refuse to sell to competitors and, thereby, insulated it from antitrust liability under *§ 2 of the Sherman Act*. The district court initially rejected both of these arguments. The court found that there was sufficient evidence for a jury to determine whether two markets existed and held that Siemens's intellectual property rights in the parts market did not immunize it from antitrust liability in the service market.

[9]** The district court reversed its original summary judgment ruling, however, after the Court of Appeals for the Federal Circuit issued its decision in *In re ISO, 203 F.3d at 1322*. There, a group of ISOs, relying on Kodak, argued that Xerox was establishing a monopoly in the servicing of its machines by refusing to sell parts to independent service companies. *In re ISO, 203 F.3d at 1326-27*. The Court of Appeals for the Federal Circuit rejected that argument, finding that Xerox could refuse to sell *patented* parts and not run afoul of ***antitrust law***. Id. If Xerox's policy with regards to its patented products happened to create a monopoly in the service market, this was simply an outgrowth of Xerox's statutory patent rights in the parts market and not an antitrust violation. *Id. at 1328-30*.

The district court applied Federal Circuit law because it believed (correctly at the time) that the patent issues involved placed an appeal in this case under the Federal Circuit's jurisdiction. The court, **[*826]** therefore, altered its earlier ruling to be consistent with the In re ISO decision. The district court determined that Siemens's **[**10]** failure to sell *patented parts or copyrighted software* was not an antitrust violation, but that Siemens's refusal to sell parts or license software not protected by intellectual property law could be a violation of *§ 2 of the Sherman Act*. Nonetheless, the district court granted summary judgment for Siemens because the ISOs failed to separate the effects of Siemens's lawful conduct (refusing to sell patented parts) and alleged unlawful conduct (refusing to sell unpatented parts) in the service market. As a result, the plaintiffs failed to establish a sufficient causal relationship between the alleged unlawful activity and their injury. In addition, the district court credited the ISOs' claim that they could not perform timely and efficient service if denied access to *any* important part and, thus, the district court determined that the ISOs would be unable to compete in the service market by Siemens's legal activity alone.

In the time between the district court's order and this appeal, however, the Supreme Court determined that the Federal Circuit does not have jurisdiction over appeals unless a patent issue is on the face of the initial complaint. See *Holmes Group, Inc. v. Vornado Air Circulation Sys., 535 U.S. 826, 153 L. Ed. 2d 13, 122 S. Ct. 1889 (2002)*. **[**11]** Because the face of the complaint, here, addresses antitrust issues and patent infringement issues are only raised as counterclaims, the Federal Circuit determined that it did not have jurisdiction over the present case and transferred it to this court. **[***1006]** Consequently, the Federal Circuit opinion in In re ISO now only has persuasive authority.

2. Antitrust Issue

Several circuits have directly confronted the question of how to weigh the significance of a firm's assertion of intellectual property rights as a justification for its refusal to deal in the context of a *§ 2 Sherman Act* action. See *In re ISO, 203 F.3d at 1327-28*; *Image Tech. Servs v. Eastman Kodak Co., 125 F.3d 1195 (9th Cir. 1997)* ("Kodak II"); *Data General Corp. v. Grumman Sys. Support Corp., 36 F.3d 1147 (1st Cir. 1994)*. We recognize that this question lies at the intersection of intellectual property law and ***antitrust law*** and presents a difficult and increasingly important issue. In this case, however, we do not need to reach to this question, because we can resolve the antitrust issue on other grounds alone. [6]

[12]** As an introductory note, we observe the importance of carefully distinguishing between the various intellectual property regimes--patent, copyright, and trademark. Each of these regimes confers somewhat different property rights and provides a different type of protection.

---

unrealistic, as it was in Kodak, because there are high initial costs to leasing a PBX system and customers are then "locked-in" to the system even if Siemens charges super-competitive prices for service.

[6] ***HN2***[] We review de novo the district court's grant of summary judgment. *Williams v. BellSouth Telecomms., Inc., 373 F.3d 1132 (2004)*.

(a) PBX Repair Parts

Siemens asserts that its right to refuse to sell PBX repair parts derives from the patent protection it enjoys for many of those parts. ***HN3***[] *The Patent Act* provides the patent owner with what amounts to a permissible monopoly over the patented work. See *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 135, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*. Patent laws "are in pari materia with the antitrust laws and modify them pro tanto (as far as the patent laws go)." *Simpson v. Union Oil Co., 377 U.S. 13, 14, 12 L. Ed. 2d 98, 84 S. Ct. 1051 (1964)*. As a number **[*827]** of recent cases have observed, there is a tension between the protections offered by patent and antitrust laws. See *In re ISO, 203 F.3d at 1325-26*; *Kodak II, 125 F.3d at 1215*; *Data General, 36 F.3d at 1187*. [7]

[13]** As noted above, however, we need not address what impact Siemens's patent rights may have on its refusal to sell its parts. Under *Data General*, Siemens's behavior does not constitute exclusionary conduct in violation of *§ 2 of the Sherman Act* because there is no evidence of any harm to equipment owners, completely independent of any patents Siemens may have on these parts.

In Data General, the defendant Data General designed, manufactured, and serviced mini-computers. *36 F.3d at 1152-54*. Grumman also serviced computers made by Data General. Data General adopted a policy of only selling its repair parts to owners of its equipment. Thus, a third party such as Grumman had no way to obtain the parts from Data General. An equipment owner could, however, order the repair parts and then use a third party to perform the servicing. The parts were not patented. Nonetheless, the First Circuit held that

> ***HN4***[] we cannot presume that elimination of an intermediate seller of such items harms consumers; indeed, consumers are likely to benefit by not having to accept [third-parties'] mark-up of [the defendant's] prices. Further, a direct sales policy does not act as a **[**14]** significant barrier to market entry by competitors offering lower prices for higher quality support services. [Third-party] technicians may … install spare **[***1007]** parts the customer has ordered from [the defendant.]

Id. at 1189.

The case at bar presents even stronger facts than were present in Data General. As in Data General, here the equipment owner has the option of ordering the PBX repair parts and then asking an ISO to install them. In addition, here an equipment owner can also provide an ISO with a letter of agency such that the ISO may order the part from Siemens and carry out the installation-an option not available in Data General. Applying the *Data General* rationale, we conclude that there is not actionable harm to consumers and therefore **[*828]** the ISOs have failed to prove a violation of *§ 2 of the Sherman Act* with respect to the parts policy.

(b) Copyrighted Software

---

[7] Each of these decisions adopted a different approach to dealing with the issue. In In re ISO, the Federal Circuit held that patent holders who unilaterally refuse to license their products are exempt from the antitrust laws unless one of three conditions exist: (1) the patent was obtained by fraud on the Patent Office, (2) the patent holder tied the sale of the patent to other goods or services, or (3) the patent holder brought sham enforcement proceedings to interfere with a competitor's business. *In re ISO, 203 F.3d at 1326-28*. In Data General, the court adopted a rebuttable presumption standard in a copyright case, drawing an analogy between copyright and patent law. *Data General, 36 F.3d at 1188-89*. Finally, in Kodak II, the court purported to apply the Data General presumption in a patent case, but held that it is possible to rebut this presumption is through evidence of pretext. *Kodak II, 125 F.3d at 1219*. Commentators have criticized all of these approaches. In particular, the approaches of the Ninth Circuit and Federal Circuit have received extensive commentary. See 3 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 709b (2d ed. 2002) (criticizing Ninth Circuit approach); Jonathan I. Gleklen, *Per Se Legality for Unilateral Refusals to License IP is Correct as a Matter of Law and Policy*, The Antitrust Source (July 2002), *at* http://www.antitrustsource.com (same); Robert Pitofsky, *Challenges of the New Economy: Issues at the Intersection of Antitrust and Intellectual Property*, 68 Antitrust L.J. 913 (2001) (criticizing Federal Circuit approach); Jeffrey K. MacKie-Mason, *Antitrust Immunity for Refusals to Deal in (Intellectual) Property is a Slippery Slope*, The Antitrust Source (July 2002), *at* http://www.antitrustsource.com (same).

The ISOs also contend that Siemens violated *§ 2 of the Sherman Act* by using its reconfiguration software to control PBX operating system updates. There are two types of software at issue here. First, Siemens licenses operating system software along with sales of the **[**15]** PBXs to all end users and to licensed distributors of its products. This software is necessary for the PBXs' operation. Second, Siemens has reconfiguration software which can modify and activate features in the operating system software. Siemens does not license or sell its reconfiguration software to anyone, as that software allows Siemens to control the licenses it extends to users and distributors for its PBX operating system. Siemens also uses this reconfiguration software to update its users' operating system software as such updates become available, for an additional licensing fee. The ISOs contend that Siemens used its control over the reconfiguration software to prevent ISOs from performing necessary software updates for equipment owners, and that this behavior constitutes a monopolization of the service market.

HN5[] The Copyright Act gives copyright owners the exclusive right to distribute protected works by "transfer of ownership, or by rental, lease, or lending." *17 U.S.C. § 106*. As other circuit courts have recognized, this right potentially conflicts with the *Sherman Act*. See *Kodak II, 125 F.3d at 1215*; *Data General, 36 F.3d at 1187.* **[**16]** [8]

We need not address this potential conflict here, as the present case involves **[**17]** a different type of software than was at issue in Data General and Kodak II. In both those cases, the software was diagnostic software which technicians used to assist in their service efforts. See *Kodak II, 125 F.3d at 1214*; *Data General, 36 F.3d at 1152*. That software was copyrighted material which served to make its owner or licensee competitive in the *service* market for the defendant's products. By contrast, the software at issue in the present case has no diagnostic or repair function; it is operating system software which operates the PBX hardware and proprietary reconfiguration software which allows Siemens to control its licenses on the operating system software. The software helps to make Siemens competitive in the *product* market for PBX products. Neither type of software, however, is intended to help diagnose problems and make repairs. Thus, the software does not give Siemens a competitive advantage in the *service* market. As such, Siemens' refusal to deal its copyrighted material cannot constitute a violation of *§ 2 of the Sherman Act* with respect to the market for service.

For the forgoing reasons, we affirm the district's **[**18]** grant of summary judgment in favor of Siemens. Because we affirm the grant of summary judgment, we **[*829]** do not reach the plaintiffs' claim that the district court erred in denying them class status.

III. The Jury Verdict for Siemens on its Counterclaims.

The ISOs also appeal the jury verdict for Siemens on patent and copyright infringement. For the reasons that follow, we affirm the jury verdict.

1. Ownership of the PBX Copyrights and Patents

The ISOs begin by appealing the district court's holding that Siemens owned the copyrights **[***1008]** and patents at issue in this case and, thus, had standing to bring these infringement claims. [9] The ISOs claim that the relevant intellectual property was not properly transferred from the Rolm Company Partnership to Siemens Rolm Communications, Inc.

---

[8] Both the First and Ninth Circuits have found that a copyright owner is entitled to a rebuttable presumption that its refusal to deal copyrighted material is based on a legitimate business justification, and therefore not in violation of *§ 2 of the Sherman Act*. *Kodak II, 125 F.3d at 1218*; *Data General, 36 F.3d at 1187*. The Ninth Circuit went further, finding that the presumption had been rebutted by "evidence of pretext," and finding a *Sherman Act* violation. *Kodak II, 125 F.2d at 1219*. In the court's words, "neither the aims of intellectual property law, nor the antitrust laws justify allowing a monopolist to rely upon a pretextual business justification to mask anticompetitive conduct." Id. The First Circuit reached the opposite result, finding that in its case the presumption was not rebutted and the *Sherman Act* not violated. *Data General, 36 F.3d at 1187-89*.

[9] ***HN6***[] We review issues of law de novo and a district court's findings of fact for clear error. *SunTrust Bank v. Houghton Mifflin Co., 268 F.3d 1257, 1260 (11th Cir. 2001)*.

The original owner of the intellectual property **[**19]** was the Rolm Company, a Delaware partnership. The partners signed a subscription agreement to convert the partnership into a Delaware corporation. The appellants argue that Delaware law does not permit the merger of partnerships into corporations without a "winding up," which Rolm Company did not complete. The ISOs contend that, without a "winding up," Rolm Company never transferred its intellectual property rights to the Siemens Rolm Corporation, and, thus Siemens does not own the patents and copyrights.

The district court found, and we agree, that ***HN7***[] where all of the partners directly exchange their partnership interest for shares in the corporation, the partnership ends without a "winding up" and all of the assets of the partnership transfer directly to the corporation. Delaware law is silent on the issue, so the district court looked to the rules of other jurisdictions as well as treatises and found that a winding up period is not required. See *Carnes v. McNeal, 224 Ga. App. 88, 479 S.E. 2d 474 (Ga. Ct. App. 1996)*; *Judelson v. Weintraub, 55 A.D.2d 906, 390 N.Y.S.2d 455 (2d Dep't 1977)*; Alan R. Bromberg & Larry E. Ribstein, Bromberg and Ribstein **[**20]** on Partnership, Vol. 2, Rel. 6 Suppl., p. 281-82 (1999). We affirm the district court's finding that Siemens owns the intellectual property rights originally established by the Rolm Company Partnership.

2. Evidence of Contract Terms

The jury found that the ISOs violated copyright and patent law by distributing additional software to existing Siemens customers who had not licensed the additional software from Siemens. For instance, a customer could license a Siemens PBX with limited capabilities for a certain price, and Siemens alleged that the ISOs would then install copied software on the PBX that the customer did not pay to license. At trial, the ISOs defended their distribution of Siemens's copyrighted software by arguing that Siemens had sold its software. Under the "first sale" defense, a sale of the software would protect the ISOs from a copyright infringement suit. In rebuttal, Siemens presented testimony and unexecuted contracts, as evidence of its policy to license, rather than sell, its software.

The ISOs argue that the district court erred by allowing Siemens to present the unexecuted copies of its licensing contracts instead of the actual contracts in violation **[**21]** of the "best evidence" rule. The ISOs argue admission of these contracts prejudiced their case because the contracts varied **[*830]** widely and the ISOs could not examine Siemens's witnesses concerning the specifics of individual contracts.

HN8[] We review evidentiary rulings for abuse of discretion, *United States v. Smith, 231 F.3d 800, 807 (11th Cir. 2000)*, and find that the district court did not err in admitting these contracts. ***HN9***[] The best evidence rule applies where the party presenting evidence seeks to prove the specific contents of a writing. See *Allstate Ins. Co. v. Swann, 27 F.3d 1539, 1543 (11th Cir. 1994)* . Here, the rule is inapplicable because Siemens sought to prove its policy of leasing software, not the terms of its contractual relationship with any one client. See id. (finding that the best evidence rule should not have prevented an insurance company employee from testifying about the company's policy); see also *United States v. Castro, 89 F.3d 1443, 1455 (11th Cir. 1996)* (finding that the best evidence rule did not prevent the government from using testimony, rather than a detailed federal fund report, to show that a county **[**22]** received federal grants). As such, Siemens could prove its licensing policy through testimony, which it also presented, *or* documentary evidence. Because Siemens sought to demonstrate a company policy, not specific terms of any contract, the district court did not err and the ISOs were not prejudiced.

3. "Distribution Infringement" Damages

The ISOs appeal the award of damages for their copyright infringement claiming that the damages were too speculative. The district court charged the jury to award damages based on "the amount of an ISO's profits that were gained because of the infringement." In a separate holding, the district court found that Siemens had not lost sales based on the infringement. For example, Siemens did not necessarily lose sales because the ISOs gave customers more capabilities than the customer had licensed from Siemens - the customer might not have ordered those capabilities if it had to pay for them. The ISOs use this secondary **[***1009]** holding to argue that if the district court found that Siemens did not lose sales, then the necessary corollary is that the ISOs did not *profit* as a result of the infringement. We reject this argument and affirm the decision **[**23]** of the district court.

HN10[] We review Rule 50 motions de novo and apply the same standard as the district court. *Russell v. North Broward Hosp., 346 F.3d 1335, 1343 (11th Cir. 2003)*. In doing so, we draw all inferences in favor of the non-moving party. Id. We affirm the jury verdict unless there is no legal basis upon which the jury could have found for Siemens. See id. The district court instructed the jury that Siemens had the burden of proving that the ISOs profited from their unlicensed transfer to customers. Siemens presented evidence at trial that the ISOs were selling used PBX parts that were running unlawfully copied Siemens software, and that the ISOs would not have made many of their equipment sales without this copyright infringement. The jury evidently credited this evidence because it returned a verdict for Siemens and awarded damages. Given the evidence presented, we hold that the jury verdict is reasonable.

4. Misuse Defense

The ISOs next appeal the district court's decision to include their claims of copyright and patent misuse in the antitrust proceeding, rather than as a defense in the trial on the infringement counterclaims. The ISOs **[**24]** argue that they presented questions of fact as to whether Siemens misused its copyrights and patents by extending their copyrights and patents beyond established legal limits. In essence, the **[*831]** ISOs wanted to be able to argue in the counterclaims trial that Siemens engaged in activities similar to leveraging and tying that are impermissible uses of copyright under antitrust laws. This circuit has not recognized, but has not rejected, misuse as a defense for infringement suits. In *BellSouth Advert. & Pub. Corp. v. Donnelley Info. Pub., 933 F.2d 952, 960-61 (11th Cir. 1991)*, this court found that there was a copyright infringement and discussed the conditions under which a company could misuse its copyright protection:

The antitrust misuse defense is an established defense to patent infringement. The policy supporting the patent misuse defense lies in the equitable clean hands doctrine. A patentee who comes into court, praying that defendant's patent infringement be enjoined will not be gratified if he is guilty of abusing his patent rights. Some courts have concluded that a misuse of copyright defense is inherent in the law of copyright just as a misuse of patent defense **[**25]** is inherent in patent law. Although the patent misuse defense closely fits the copyright law situation and may someday be extended to discipline those who abuse their copyrights, we decline to extend the application in the context before us because there is no antitrust violation. (Footnotes omitted.)

This decision, however, was vacated and reversed en banc. *BellSouth Advert. & Pub. Corp. v. Donnelley Info. Pub., 999 F.2d 1436 (11th Cir. 1993)*. The en banc court found that there was no copyright infringement and, therefore, never reached the issue of whether to recognize a misuse defense. Id. Similarly, we need not reach the issue of copyright abuse here. Even if such a defense exists, it would not help the ISOs because we conclude that Siemens's actions do not violate intellectual property or ***antitrust law***.

5. Sufficient Evidence for the Patent Infringement Claims

The jury found that the ISOs had infringed on Siemens's patents by illegally copying and selling Siemens's software that included one or more of Siemens's patents without a license from Siemens. The ISOs argue that Siemens failed, as a matter of law, to present sufficient evidence to support **[**26]** a jury verdict of patent infringement. [10]

The ISOs first argue that, under the doctrine of "first sale," Siemens had exhausted its patent when it sold its hardware and that this "first sale" defense was improperly rejected by the jury. The argument is not on point, however, because Siemens presented evidence to the jury that it had instituted valid restrictions on the sale or license of its patented products. Thus, a reasonable jury could reject the "first sale" defense and find that the ISOs had violated Siemens's patents.

[10] We review Rule 50 motions de novo and apply the same standard as the district court. *Russell, 346 F.3d at 1343*. We draw all inferences in favor of the non-moving party. Id. We affirm the jury verdict unless there is no legal basis upon which the jury could have found for Siemens. See id.

The ISOs next argue that there was insufficient evidence for five of the elements necessary to prove patent infringement. The elements **[***1010]** are: (1) Siemens failed to prove what **[**27]** versions of its patented Phonemail system were illegally transferred, (2) Siemens failed to show that the ISOs used its patented methods, (3) Siemens could not establish patent liability based on "mismatch," [11] (4) Siemens could not establish liability based on the unauthorized "feature activation," and (5) Siemens **[*832]** failed to prove that the infringement took place after the ISOs received notice of possible liability.

The district court held that Siemens presented evidence that its software was copied and distributed without its actual or implied authorization. At trial, Siemens presented evidence that it owned **[**28]** three patents that cover its Phonemail software. Siemens also presented testimony from ISO representatives that they had installed copies of the Phonemail software and activated features without authorization from Siemens. Furthermore, Siemens presented evidence that the ISOs copied 9000 and 9751 PBX software and used Siemens's patented methods of testing software. The district court found this to be sufficient evidence of patent infringement and we agree. [12]

6. The Copyright Claim

The jury also found that the ISOs had illegally copied Siemens's software and distributed the software to customers without a license to do so. The ISOs now argue that this claim should not have been presented to the jury because the judge should have ruled that Siemens's software was in the public domain. The ISOs argue that Siemens failed **[**29]** to attach a copyright notice to each disk containing copyrighted programs, and, thus, these works entered the public domain. Although Siemens's software does not carry a copyright notice, the hardware containing the software does. Anyone seeking to copy the software would necessarily view the notice affixed to the hardware. The ISOs contend that this notification of copyright is insufficient under the Copyright Act, *17 U.S.C. § 401(a)*, which applies to publicly-distributed copyrighted work. [13]

We reject this argument and affirm the district court's holding. **[**30]** The jury found that the copyrights held by Siemens were valid. It could have reasonably reached this determination either by finding that Siemens issued its work in a limited publication (exempting it from *§ 401*), or by finding that the work contained adequate notification. [14] Siemens presented sufficient evidence to support both of these theories. As such, we see no reason to disturb the jury verdict.

[31]** 7. The Trade Secret Misappropriation Claim

The jury found that three of the ISOs had misappropriated Siemens's trade **[*833]** secrets by wrongfully acquiring passwords to activate additional Siemens features. The first ISO, Realcom, argues that evidence that one of its

---

[11] Siemens assigns a serial number to all of its hardware and coordinates that number to the software license for that specific system. If software is installed on the hardware that does not match the serial number, then Siemens knows that someone has copied its software and installed it on the hardware. When the serial numbers on the hardware and software are not coordinated, this is called a "mismatch."

[12] In its jury instructions, the district court covered, in detail, the necessary evidence for a findings of patent infringement and the ISOs did not object to any of these instructions.

[13] *§ 401*. Notice of copyright: Visually perceptible copies

(a) ***HN11***[] General provisions. Whenever a work protected under this title is published in the United States or elsewhere by authority of the copyright owner, a notice of copyright as provided by this section may be placed on publicly distributed copies from which the work can be visually perceived, either directly or with the aid of a machine or device. (Emphasis added.)

[14] The district court noted, and we agree, that ***HN12***[] regulations relating to the Copyright Act permit some flexibility in how copyright owners must mark their protected works. See *37 C.F.R. 201.20(g)(4)*(permitting copyright notice to be affixed to containers that are permanent receptacles for the software copies). Because different work is transferred or leased in varying forms of media, the best way to notify a user of the copyright protections may vary. Here, Siemens affixed copyright notices to hardware cards contained with the PBX system. Anyone who tried to copy the software would see these cards.

employees used his knowledge from his previous employment with Siemens to transfer passwords was "mere speculation." Siemens, however, provided evidence that Realcom could only gain access to Siemens's passwords maintenance-level passwords by using higher-level engineering passwords from the employee. This is sufficient evidence to support the jury verdict.

The two other ISOs, ATC and TTSI, claim that the jury verdict against them was in error because they did not use any passwords. ATC was found to use RCTL, a computer program, to activate certain Siemens features. ATC argues that the use of RCTL alone does not show that it knowingly used Siemens's passwords, **[***1011]** and, thus, does not prove that it appropriated trade secrets. TTSI argues that it never used RCTL to activate features-it only sold a PBX system to another ISO who did so. Siemens, however, presented evidence that the only way to activate features in the Siemens **[**32]** PBX system was to use its passwords and that ATC and TTSI purchased the RCTL program to attain these passwords. This is sufficient evidence for the jury to find ATC and TTSI knew that the RCTL program was unlawful.

8. Tortious Interference of Contract Claim

Finally, the ISOs finally argue that Siemens's ***HN13***[] state law tortious interference with contract claim involves the same conduct as the copyright infringement claim and, thus, is preempted by federal copyright law. See *Crow v. Wainwright, 720 F.2d 1224 (11th Cir. 1983)*. [15] If, however, the state law involves different or additional elements for recovery, then it is not preempted because it is not the same action. See *Bateman v. Mnemonics, Inc., 79 F.3d 1532, 1549 (11th Cir. 1996)*. The district court found, and we agree, that the tortious interference claim involves an additional element. The tortious interference claim requires Siemens to demonstrate that the ISOs violated the terms of Siemens's software license for third parties, which is an element beyond federal copyright law that prohibits unauthorized copying. See *Nat'l Car Rental Sys., Inc. v. Computer Assocs. Int'l, Inc., 991 F.2d 426, 433 (8th Cir. 1993)*. **[**33]** As such, the state law claim is not preempted because the claim at issue is not equivalent to the claim under *§ 106*.

[34]** **[*834]** For the above reasons, we AFFIRM the judgments of the district court.

End of Document

---

[15] In Crow, this court found that Florida could not criminally prosecute Crow for selling copied Tammy Wynette eight-tracks because *§ 301 of the Copyright Act* preempts state law remedies that are equivalent to the exclusive rights under *§ 106 of the Copyright Act*. *Id. at 1225-26*, see *17 U.S.C. § 106 (2004)*. *§ 106* states:

> ***HN14***[] Subject to sections 107 through 122, the owner of copyright under this title has the exclusive rights to do and to authorize any of the following:
>
> (1) to reproduce the copyrighted work in copies or phonorecords;
>
> (2) to prepare derivative works based upon the copyrighted work;
>
> (3) to distribute copies or phonorecords of the copyrighted work to the public by sale or other transfer of ownership, or by rental, lease, or lending;
>
> (4) in the case of literary, musical, dramatic, and choreographic works, pantomimes, and motion pictures and other audiovisual works, to perform the copyrighted work publicly;
>
> (5) in the case of literary, musical, dramatic, and choreographic works, pantomimes, and pictorial, graphic, or sculptural works, including the individual images of a motion picture or other audiovisual work, to display the copyrighted work publicly; and
>
> (6) in the case of sound recordings, to perform the copyrighted work publicly by means of a digital audio transmission.

Opinion

[*1348] ***TRANSFER ORDER***

This litigation currently consists of the six actions in the Southern District of New York, two actions in the Central District of California and one action in the District of Arizona as listed on the attached Schedule A. [1] Before the Panel is a motion, pursuant **[*1349]** to *28 U.S.C. § 1407*, brought by defendant Del Monte Fresh Produce

[1] The defendants have notified the Panel of a related action pending in the District of Nevada. This action and any other related actions will be treated as potential tag-along actions. *See* Rules 7.4 and 7.5, R.P.J.P.M.L., *199 F.R.D. 425, 435-36 (2001)*. The motion before the Panel as originally filed also pertained to three additional actions. These three actions -- *Conroy v. Fresh Del Monte Produce, Inc., 325 F. Supp. 2d 1049 (N.D. California 2004)*; *Vassilatos v. Del Monte Fresh Produce Co., 2004 U.S. Dist. LEXIS 22123, S.D. Florida, C.A. No. 9:04-80450*; and *Williams v. Del Monte Fresh Produce Co., 325 F. Supp. 2d 855 (M.D. Tennessee 2004)* -- have been remanded to their respective state courts, and, accordingly, the question of *Section 1407* transfer with respect to the actions is moot.

Company and other related entities (collectively Del Monte) for coordinated or consolidated pretrial proceedings of these actions in the Southern District of New York. [2] Plaintiffs in the six Southern District of New York actions support the motion for transfer to that district. Plaintiffs in the other three actions oppose the motion. These plaintiffs variously proposed the Southern District of Florida or, in the alternative, the Northern District of California, as transferee district, in the event the Panel ordered transfer over their objections. Moving defendants then acknowledged **[**2]** that the Southern District of Florida would be an appropriate transferee forum.

[3]** On the basis of the papers filed and hearing session held, the Panel finds that these nine actions involve common questions of fact, and that centralization under *Section 1407* in the Southern District of New York will serve the convenience of the parties and witnesses and promote the just and efficient conduct of this litigation. All actions allege that Del Monte, by fraudulently procuring and wrongfully enforcing a patent on an extra-sweet variety of pineapple, has monopolized an asserted market for extra-sweet pineapples in violation of federal ***antitrust law*** or state antitrust statutes. Certain of the constituent actions also allege that defendants' conduct violated other statutory and common law proscriptions of various states. The named plaintiffs in each action purport to sue on behalf of classes of either direct or indirect purchasers of defendants' pineapples, in particular, Del Monte Gold pineapples. Centralization under *Section 1407* is thus necessary in order to eliminate duplicative discovery; prevent inconsistent pretrial rulings, including those with respect to class certification; and conserve the resources of the parties, their counsel and the judiciary.

We are persuaded **[**4]** that the Southern District of New York is an appropriate transferee forum for this docket. We note that 1) six of the nine actions are pending in this district, have been consolidated and are proceeding apace before one judge; 2) the Southern District of New York actions include claims of both direct and indirect purchasers; and 3) the purported classes in those actions encompass the indirect purchaser classes sought in the three other actions. We also note that the plaintiffs opposed to transfer base their objections, *inter alia,* on their motions to remand to state court. We observe, however, that both courts in which the three actions are pending stayed proceedings in those actions pending a decision by the Panel, and, moreover, plaintiffs' motions to remand to state court can be presented to and decided by the transferee court. *See, e.g., In re Ivy, 901 F.2d 7 (2nd Cir. 1990)*; *Uresti v. Prudential Ins. Co. of Am. (In re Prudential Ins. Co. of Am. Sales Practices Litig.), 170 F. Supp.2d 1346, 1347-48 (J.P.M.L. 2001)*.

IT IS THEREFORE ORDERED that, pursuant to *28 U.S.C. § 1407*, the actions listed on Schedule A and pending outside the Southern **[**5]** District of New York are transferred to the Southern District of New York and, with the consent of that court, assigned to the Honorable Richard M. Berman for coordinated or consolidated pretrial proceedings with the actions pending **[*1350]** in that district and listed on Schedule A.

FOR THE PANEL:

Wm. Terrell Hodges

Chairman

SCHEDULE A

MDL-1628 -- In re Pineapple Antitrust Litigation

District of Arizona

Eileen Churosh v. Del Monte Fresh Produce, N.A., Inc., C.A. No. 2:04-1067

Opinion

OPINION, ORDER AND JUDGMENT

[*P1] The above captioned cases are before the Court on motions to dismiss pursuant to Rule 12(b)(6) of the North Carolina Rules of Civil Procedure. They are treated together because they both present the same legal issues. The first issue is whether indirect purchasers have standing under *N.C.G.S. § 75-16* to sue for violations of the state antitrust **[**3]** laws. The Court holds, as it has before, that the decision of the Court of Appeals in *Hyde v. Abbott Laboratories, Inc., 123 N.C. App. 572, 473 S.E.2d 680 (1996)*, *disc. rev. denied, 344 N.C. 734, 478 S.E.2d 5 (1996)*, is controlling, and indirect purchasers do have standing to sue under North Carolina's antitrust laws. If indirect purchasers have standing, the question becomes whether there are applicable limitations on that standing. The Court holds that indirect purchaser standing is not limitless; that there are standing requirements that apply to indirect purchasers. Application of those standards to the pleadings in each of these cases results in dismissal.

I.

FACTUAL BACKGROUND IN *CROUCH*

[*P2] Plaintiff Crouch is an individual residing in New Hanover County, North Carolina. Plaintiff purchased four B.F. Goodrich tires (Advantage GT model # P195-70R14 90SM+S) for his automobile on October 19, 2002 from Sam's Club of Wilmington. Plaintiff brings this claim individually and on behalf of all other persons who purchased tires, other than for resale, that were manufactured using the rubber-processing chemicals sold by Defendants since 1994. [1]

[*P3] Defendant Crompton Corporation ("Crompton") is a Connecticut corporation with its principal place of business in Greenwich, Connecticut. Crompton is a global marketer and manufacturer of specialty chemicals, polymer products and processing equipment, which includes chemicals used for the processing of rubber and tires. Crompton's actions have affected commerce within the State of North Carolina.

[*P4] Defendant Uniroyal Chemical Company Limited ("Uniroyal") is a Delaware corporation with its principal place of business in Akron, Ohio. It is a wholly-owned subsidiary of Crompton and is responsible either independently or jointly with Crompton Manufacturing Company, Inc. for the manufacture, sale and/or distribution of rubber-processing products as part of its ordinary and customary business. Uniroyal manufactures several rubber-processing products including specialty products for tires and industrial rubber goods. Uniroyal's actions have affected commerce within the State of North Carolina.

[*P5] Defendant Crompton Manufacturing Company, Inc., **[**5]** formerly legally named in North Carolina as Uniroyal Chemical Company, Inc. ("Crompton Manufacturing"), is a New Jersey corporation with its principal place of business in Greenwich, Connecticut. It is a wholly-owned subsidiary of Crompton and is responsible either independently or jointly with Uniroyal for the manufacture, sale and/or distribution of rubber-processing products as part of its ordinary and customary business. Crompton Manufacturing's rubber-processing products include specialty products for tires and industrial rubber goods. Crompton Manufacturing's actions have affected commerce within the State of North Carolina.

[*P6] Defendant Flexsys NV is a joint venture between Solutia, a United States company, and Akzo Nobel, a Netherlands company. Flexsys NV has its headquarters in Woluwe, Belgium.

---

[1] Am. Compl. P 20. At oral argument the Court understood **[**4]** plaintiff's counsel to say that the class would be limited to retail consumers, excluding, for example, customers who purchased used cars with new tires.

[*P7] Defendant Flexsys America LP ("Flexsys") is the United States subsidiary of Flexsys NV. Flexsys is a Delaware corporation with its headquarters located in Akron, Ohio. Flexsys NV is the world's leading supplier of chemicals to the rubber industry. Flexsys' actions have affected commerce within the State of North Carolina.

[*P8] Defendant Flexsys America Limited Partnership of North Carolina **[**6]** ("Flexsys NC"), the legal name in North Carolina of Flexsys America LP, is the United States subsidiary of Flexsys NV. Flexsys NC is a Delaware corporation with its headquarters located in Akron, Ohio.

[*P9] Defendant Bayer AG is a corporation organized and existing under the law of the Federal Republic of Germany and maintains its principal place of business in Leverkusen, Federal Republic of Germany. Bayer AG is the parent company of Bayer Corporation, the wholly-owned subsidiary that sells and markets rubber-processing chemicals in the United States.

[*P10] Defendant Bayer Corporation ("Bayer") is a wholly-owned subsidiary of Bayer AG. Bayer has its principal place of business in Pittsburg, Pennsylvania, and is incorporated under the laws of Pennsylvania. Bayer develops, manufactures, sells and distributes a variety of pharmaceutical and chemical products, including rubber-processing products.

[*P11] **[**7]** Bayer develops, manufactures, sells and distributes its rubber-processing products through its Fibers, Additives and Rubbers Division. The Division is headquartered in Akron, Ohio. The Division manufactures rubber-processing chemical products which have a variety of differing roles in rubber-processing.

[*P12] Defendant Rhein Chemie Rheinau GmbH ("Rhein GmbH") is a business organized under the laws of the Federal Republic of Germany with its principal place of business located in Mannheim, Federal Republic of Germany. Rhein GmbH, a subsidiary or affiliate of Bayer AG, manufactures, sells and distributes the relevant rubber-processing chemicals throughout the global market, including the United States.

[*P13] Defendant Rhein Chemie Corporation ("Rhein"), a New Jersey corporation and a wholly-owned subsidiary and/or affiliate of Rhein GmbH, is responsible for the manufacture, sale and/or distribution of the relevant rubber-processing products throughout the United States, including North Carolina.

[*P14] On September 26, 2002, inspectors from the European Commission's Competition Division, assisted by officials from the Commission's member states, carried out unannounced inspections at defendants' European **[**8]** offices. According to a memorandum issued by the Commission on October 10, 2002, the stated purpose of the inspections was to "ascertain whether there is evidence of a cartel agreement and related illegal practices concerning price fixing for rubber chemicals." (Am. Compl. P 43.) On October 14, 2002, the Associated Press reported that Crompton, Bayer and Flexsys made press releases verifying that their respective companies were under investigation for alleged price collusion in rubber chemicals both by U.S. and European Union authorities. [2] On May 27, 2004, Crompton pled guilty to participating in a conspiracy to suppress and eliminate competition by maintaining and increasing the price of certain rubber chemicals sold in the United States and elsewhere during the period between July 1995 to 2001. The U.S. federal court imposed a fine of $50 million. On May 28, 2004, Crompton pled guilty to one count of conspiring to lessen competition unduly in the sale and marketing of certain rubber chemicals in Canada. The Canadian federal court imposed a sentence requiring Crompton to pay a fine of $7 million. On July 14, 2004, Bayer pled guilty to charges filed by the U.S. Department of Justice **[**9]** in Federal District Court in the Northern District of California and agreed to a $66 million fine for participating in an international conspiracy to fix prices in the rubber chemicals market.

[*P15] Plaintiff filed this action on November 5, 2002, only thirty days after the European investigation was announced, alleging violations of North Carolina's Unfair and Deceptive Trade Practices Act ("UDTPA"), including *N.C.G.S. §§ 75-1.1*, *75-2*, *75-5*, *75-16*, *75-16.1*. Plaintiff alleges that defendants "entered into an agreement, arrangement, contract, combination, conspiracy and/or understanding that was intended to and which did have the effect of fixing, raising, stabilizing and maintaining the price for the relevant rubber-processing chemicals." (Am.

[2] Miles Moore, *U.S., EU Probing Rubber Chemical Suppliers,* RUBBER & PLASTICS NEWS, Oct. 14, 2002, at 1.

Compl. P 40.) Plaintiff alleges that defendants' "supracompetitive pricing" was reflected in the prices of automobile tires manufactured using these rubber-processing chemicals. (Am. Compl. P 41.) Therefore, plaintiff alleges that consumers who purchased these automobile tires, not directly from defendants but rather from tire retailers, paid more **[**10]** than they would have in the absence of the alleged anticompetitive agreement. (Am. Compl. P 55.) Similar suits have been filed in other jurisdictions that recognize indirect purchaser standing. Plaintiff seeks to represent only persons who purchased tires at retail.

[*P16] Direct purchasers have filed a nationwide class action lawsuit seeking to recover the alleged overcharge that is the subject of the state litigation. *In re Rubber Chemicals Antitrust Litig.,* Master Docket No. C-03-1496 (N.D. Cal. (Judge Martin J. Jenkins)).

[*P17] Defendants have responded by moving to dismiss under Rule 12(b)(6) for failure to state a claim upon which relief can be granted based upon plaintiff's lack of standing to sue under North Carolina's antitrust laws.

[*P18] The case was assigned to this Court by Order dated April 19, 2004.

II.

Factual Background in *Morris*

[*P19] Plaintiff, Timothy Morris, is a resident of North Carolina. Plaintiff brings this contemplated class action on behalf of all North Carolina consumers who purchased goods from merchants who accepted Visa and/or MasterCard credit cards and debit cards during the four years preceding the filing of the Complaint.

[*P20] Defendant Visa U.S.A. Inc. ("Visa") is a Delaware corporation. **[**11]** Visa's principal place of business is San Francisco, California. Visa transacts business within the State of North Carolina. At all relevant times, Visa was a national bankcard association whose members included more than 6,000 banks.

[*P21] Defendant MasterCard International, Inc. ("MasterCard") is a Delaware corporation. MasterCard's principal place of business is Purchase, New York. MasterCard transacts business within the State of North Carolina. At all relevant times, MasterCard was a national bankcard association whose members included more than 6,000 banks.

[*P22] In October 1996, Wal-Mart Stores, The Limited, Sears Roebuck, Safeway, Circuit City, the International Mass Retail Association, the National Retail Federation, the Food Marketing Institute, Bernie's Army-Navy Store, Auto-Lab of Farmington Hills, Burlington Coat Factory Warehouse, Sportstop, Payless Shoesource Shoes, Etc., the Coffee Stop, UCC Kwik Doc, Computer Supplies Unlimited, Denture Specialist, Inc./Geneva White D.M.D., Shark 3 Audio, 53, Inc., and Scrub Shop collectively filed a claim challenging the "Honor All Cards" rules of Visa and MasterCard that require all merchants accepting Visa and MasterCard credit cards to also **[**12]** accept their debit cards. The plaintiffs alleged that this requirement was a tying arrangement violating section 1 of the Sherman Antitrust Act, *15 U.S.C. § 1*. Plaintiffs further asserted that Visa and MasterCard attempted and conspired to monopolize the debit card market in violation of section 2 of the Sherman Act, *15 U.S.C. § 2*. Plaintiffs alleged that the defendants' actions resulted in excessive fees to merchants for the debit card processing services. *See In re Visa Check/MasterMoney Antitrust Litig., 192 F.R.D. 68 (E.D.N.Y. 2000) aff'd, 280 F.3d 124 (2d Cir. 2001), cert. denied, 536 U.S. 917, 153 L. Ed. 2d 201, 122 S. Ct. 2382 (2002)*.

[*P23] In February 2000, a plaintiff class of approximately four million merchants who have accepted Visa and/or MasterCard credit cards and therefore were required to accept VisaCheck and/or MasterMoney debit cards under the "Honor All Cards" rule was certified. *Id.* Oral arguments on motions for summary judgment were heard on January 10, 2003. On April 1, 2003, the federal court granted the merchants' motion for summary judgment in part and denied it in part. The defendants' motions for summary judgment were denied in their entirety. In addition, MasterCard's **[**13]** motion for a severance was denied. *See In re Visa Check/MasterMoney Antitrust Litig., 2003 U.S. Dist. LEXIS 4965, at *27 (E.D.N.Y. Apr. 1, 2003)*.

[*P24] On the day that opening statements were to occur, April 28, 2003, MasterCard agreed to settle with the plaintiff class. *In re Visa Check/ MasterMoney Antitrust Litig., 297 F. Supp. 2d 503, 508 (E.D.N.Y. 2003)*. Visa agreed to settlement two days later, April 30, 2003. On December 19, 2003, the federal court issued an order providing final approval of the settlements. Pursuant to the settlement, merchants who accept Visa and MasterCard credit cards were free to reject Visa and MasterCard debit cards. In addition, Visa and MasterCard will pay more than $3 billion into a settlement fund to be distributed to the merchant class. *Id. at 506-08*.

[*P25] Plaintiff filed this action on December 31, 2003, alleging violations of North Carolina's Unfair and Deceptive Trade Practices Act, *N.C.G.S. § 75*. Plaintiff asserts consumer antitrust claims that attack the manner in which the "Honor All Cards" rules of the MasterCard and Visa national payment systems are applied to merchants across the country. Plaintiff's claim in this action is founded upon the same alleged **[**14]** "tying" conduct by Visa and MasterCard that was at issue in the federal merchant class antitrust action. (*Compare* Compl. PP 2-6, 27(m), 28-57, *with* *In re Visa Check/MasterMoney Antitrust Litig., 192 F.R.D. at 71-73*.) Plaintiff alleges that consumers paid higher prices for goods sold by the merchants bringing the claim in the federal action. Plaintiff alleges that because merchants were "compelled to pay supracompetitive prices," merchants, in turn, passed along their extra costs to consumers by raising the price of goods. (Compl. PP 57-58.)

[*P26] Defendants have responded by moving to dismiss under Rule 12(b)(6) based on two grounds: first, that plaintiff lacks standing to sue under North Carolina's antitrust laws; and second, that plaintiff seeks relief that would violate the *Commerce Clause of the United States Constitution*, which forbids states from regulating interstate commerce that requires uniform national regulation.

[*P27] The case was assigned to this Court by Order dated May 11, 2004.

III.

LEGAL STANDARD

[*P28] When ruling on a motion to dismiss under Rule 12(b)(6), the court must determine "whether, as a matter of law, the allegations of the complaint . . . are sufficient to state a claim upon **[**15]** which relief may be granted." *Harris v. NCNB, 85 N.C. App. 669, 670, 355 S.E.2d 838, 840 (1987)*. In ruling on a motion to dismiss, the court must treat the allegations in the complaint as true. *See* *Hyde v. Abbott Labs., Inc., 123 N.C. App. 572, 575, 473 S.E.2d 680, 682 (1996)*. The court must construe the complaint liberally and must not dismiss the complaint unless it appears to a certainty that plaintiff is entitled to no relief under any state of facts which could be proved in support of the claim. *See Id.*

IV.

[*P29] An understanding of the issues in these two cases necessarily begins with examination of the standing requirements under federal ***antitrust law***. That examination begins with the study of two cases, *Hanover Shoe Co. v. United Shoe Machinery Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*, and *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*. The interrelationship of those two cases is best described by William Landes and Richard Posner in their seminal article: *Should Indirect Purchasers Have Standing to Sue Under the Antitrust Laws? An Economic Analysis of the Rule of* Illinois Brick.

> In *Illinois Brick Co. v. Illinois,* the Supreme **[**16]** Court held that indirect purchasers do not have standing to sue for violations of the antitrust laws under section 4 of the Clayton Act, which authorized private treble-damage suits by individuals or firms injured in their business or property by a violation of those laws. To understand this decision, one must go back to *Hanover Shoe Co. v. United Shoe Machinery Corp.,* a suit by a shoe manufacturer against a manufacturer of shoe machinery who had earlier been found to have monopolized the shoe machinery industry in violation of section 2 of the Sherman Act. The defendant argued that it should be allowed to show that *its* customer had not in fact been injured by the antitrust violation because the customer had passed on the costs of the violation to its customers, the purchasers of shoes. The Supreme

> Court rejected this argument, holding that there is no "passing on" defense to a suit by a direct purchaser; the direct purchaser is entitled to get the overcharge back, trebled, whether or not he was really injured to that extent.
>
> *Illinois Brick* is the mirror image of *Hanover Shoe.* The plaintiffs in *Illinois Brick,* represented by the state of Illinois suing on behalf of itself and some 700 **[**17]** local government entities in the Chicago area, claimed overcharges in connection with various construction projects. The defendants, manufacturers and distributors of concrete block alleged to be in collusion, sold the block to masonry contractors who submitted bids to general contractors who in turn submitted bids to customers such as the plaintiffs. The *Illinois Brick* plaintiffs were therefore indirect purchasers of concrete block, standing in the same relation to the defendants as the buyers of shoes at retail stood to United Shoe Machinery Corporation. The predicate of the *Illinois Brick* suit was the passing on of all or part of the overcharge by the direct purchaser; without passing on, there could be no injury to indirect purchasers.
>
> Unless they are willing to countenance multiple liability, the courts cannot allow suits by indirect purchasers without also permitting the defendant to assert a "passing-on defense" against direct purchaser plaintiffs. As the Court recognized in *Illinois Brick,* there are only two ways of avoiding unacceptable multiple liability: (1) allow indirect purchasers to sue but overrule *Hanover Shoe* or (2) retain *Hanover Shoe* and preclude indirect purchasers **[**18]** from suing.

46 U. CHI. L. REV. 602, 602-03 (1979)(footnotes omitted).

[*P30] The rule governing indirect purchaser standing in federal antitrust cases has not changed since *Illinois Brick.* The fact that there has been no congressional or judicial repeal of the rule indicates that the policy behind it has proven effective. That policy holds that the direct purchaser suit is on balance a more effective instrument for enforcement of the antitrust rule prohibiting price fixing than the indirect purchaser suit. [3] Under the federal scheme, where avoidance of a double recovery is favored, the federal government has chosen the direct purchaser suit as the most effective means of enforcing the antitrust laws, particularly in price fixing cases.

[*P31] The choice made in the federal system had the effect of preventing indirect purchasers who were actually injured by a price fixing scheme from recovering their damages. It was a policy decision that was not well received in some states. There were rational arguments that the decision was wrong from a policy standpoint. Those arguments were made effectively by Justice Brennan in a well-reasoned dissent in *Illinois Brick.* A minority of states

---

[3] William Landes and Richard Posner, *Should Indirect Purchasers Have Standing to Sue Under the Antitrust Laws? An Economic Analysis of the Rule of Illinois Brick,* 46 U. Chi. L. Rev. 602, 634-35 (1979). The authors stated:

> Our analysis has suggested that the rule of *Illinois Brick,* which bars indirect purchasers from bringing private antitrust damage actions, is probably the soundest rule from the standpoint of maximizing the effectiveness of antitrust enforcement. **[**19]** We anticipate the argument that, however abstractly desirable it may seem to confine enforcement to direct purchasers, to do so is to alter the fundamental character of the private antitrust action in a way that cannot be squared with the intent of Congress in creating private damage remedies for antitrust violations. One way of characterizing our position is that it allows someone who may not be injured (or not injured much) -- the direct purchaser -- to recover (treble) damages while denying the right to recover any damages to other people -- indirect purchasers-who may in fact be injured. There is an element of paradox in this result, but it is dispelled by careful analysis. As we have shown, even if indirect purchasers were given the nominal right to sue, they would often fail to receive significant compensation. And anyone troubled by the windfall element in the judgment received by the direct purchaser must in logic reexamine the entire structure of private antitrust enforcement. Two-thirds of every private antitrust damage judgment (the punitive component of the judgment) is a windfall to the purchaser. In a class action, much of even the compensatory portion of the judgment **[**20]** may end up in the pockets of lawyers or in state treasuries, rather than in the pockets of the people who were actually harmed by the antitrust violation. The windfall element cannot be purged by the private antitrust suit without a complete reworking of antitrust enforcement. Until that is done, society will be well-advised to allow some direct purchasers to enjoy windfalls if, as we have argued, the direct purchaser suit is on balance a more effective instrument for enforcing the antitrust rule prohibiting price fixing than the indirect-purchaser suit.

Id. (footnote omitted).

chose to alleviate the problems created for indirect purchasers by *Illinois Brick* by either passing statutes (*Illinois Brick* repealer statutes) or interpreting their existing **[**21]** statutes as permitting indirect purchaser standing under the state ***antitrust law*** based upon some differentiation in language between the state and federal statutes. For example, the District of Columbia passed a statute [4] which was modeled directly on Justice Brennan's dissent in *Illinois Brick.* It specifically provides for indirect purchaser standing and it adopts the "target area" test for standing mentioned by Justice Brennan in his dissent. [5] It is a model for states desiring to create a clear statutory framework for indirect purchaser cases.

[*P32] The recognition of indirect purchaser standing by this minority of states created an unusual situation. In federal price **[**22]** fixing cases, direct purchasers were permitted to recover the artificially inflated price and treble damages even though they may have passed on the artificially inflated price to someone else in the distribution chain. They receive a windfall in some instances; but that windfall is predicated upon the policies that the federal scheme was (a) the most effective deterrent, (b) eliminated double recovery, (c) eliminated extraordinarily difficult damage proof [6] and (d) was economically rational. [7] When the minority states reacted by repealing *Illinois Brick,* they created a situation which (a) restored the ability of indirect purchasers to recover for injuries actually sustained as a result of anticompetitive behavior, (b) added a redundant and less effective deterrent, (c) condoned double recovery (trebled) against violators and (d) created the potential for extremely difficult damage proof issues.

[*P33] Not surprisingly, the state efforts to restore indirect purchasers' ability to recover for injuries sustained as a result of antitrust violations were challenged, primarily **[**23]** on the ground that state statutes were preempted by the federal scheme. That challenge was directly rejected by the United States Supreme Court in *California v. ARC America Corp., 490 U.S. 93, 104 L. Ed. 2d 86, 109 S. Ct. 1661 (1989)*. The Supreme Court held that states may allow an indirect purchaser to sue under state antitrust laws.

> When viewed properly, *Illinois Brick* was a decision construing the federal antitrust laws, not a decision defining the interrelationship between the federal and state antitrust laws. The congressional purposes on which *Illinois Brick* was based provide no support for a finding that state indirect purchaser statutes are pre-empted by federal law.

California v. ARC Am. Corp., 490 U.S. 93, 105-06, 104 L. Ed. 2d 86, 109 S. Ct. 1661 (1989).

This Court has previously noted the problems created by this dual enforcement in *Adams v. Aventis, S.A., 2003 NCBC 7, at P 23 (No. 01 CVS-2119, Craven County Super. Ct. August 26, 2003)(Tennille, J.)*. The Court stated:

> In 1995, the Section of ***Antitrust Law*** of the American Bar Association published a Report of the Indirect Purchaser Task Force outlining proposed legislative changes to address the "indirect purchaser problem." **[**24]** *Report of the Indirect Purchaser Task Force: Section of* ***Antitrust Law*** *American Bar Association,* 63 ANTITRUST L.J. 993 (Spring 1995). The report stated that the results of state *Illinois Brick* repealer laws are that:

---

[4] *See* *D.C. Code Ann. § 28-4509(a)*(1981).

[5] Justice Brennan suggested a target area test as one possible approach to standing, but did not actually endorse it as a test to be adopted. It is worthy of note that Justice Brennan was among the majority in its holding in *Associated General Contractors of California, Inc. v. California State Counsel of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*(*"AGC"*), which was decided subsequent to *Illinois Brick* and prior to the 1996 amendments to the North Carolina statute.

[6] *See* Lands and Posner, *supra* note 3, at 609, 615, 619-20.

[7] *See* Landes and Posner, *supra* note 3, at 611-12, 617-18, 620, 625.

> (1) The full amount of the overcharge, trebled, can be recovered by (i) direct purchasers who sue under federal law; (ii) the customers of those direct purchasers who sue under state law; and (iii) under most state *Illinois Brick* repealers, by indirect purchasers at every other stage of distribution down the line.
> (2) The overcharge that an indirect purchaser can have trebled may be a multiple of the overcharge to the direct purchaser because indirect purchasers can claim that their seller's markups on the original overcharge are also inflated because of that overcharge.
>
> (3) The direct purchaser cases can be prosecuted in federal court and the indirect purchaser cases can be prosecuted in state court(s). Indeed, the Supreme Court seemed to encourage that kind of multiple litigation in *ARC America* by broadly hinting to federal courts that they utilize pendent jurisdiction principles for state law indirect purchaser claims.
>
> (4) The results in the direct and indirect purchaser **[**25]** cases need not be consistent. The overcharge which is treated as the direct purchaser's in the federal court can be treated as the indirect purchaser's in the state court. In fact, if indirect purchaser cases are brought in several state courts, there may be inconsistencies in those decisions.

Thus, defendants in horizontal price-fixing cases face not only the burden and expense of multiple treble-damage lawsuits, but also enormous potential liability -- not just three, but multiples of three times the overcharge, if a lay jury finds liability. Few companies can afford to "roll the dice" on a jury verdict when the exposure is that high, no matter how innocent they believe they are.

Additionally, the current law turns judicial economy -- the principal reason for the decisions in *Hanover Shoe* and *Illinois Brick* -- on its head. Federal *and* state judicial resources are finite *and* precious. It makes little sense to permit, much less encourage, multiple litigation in federal and state courts. It makes even less sense to permit inconsistent judgments as to who bore the overcharge.

2003 NCBC 7, at P 23.

[*P34] Thus, states may provide indirect purchaser recovery based upon state antitrust laws even **[**26]** though (1) the result may and almost assuredly will be a double recovery and (2) a preferable deterrent exists under federal law. It is clear then that the primary rational for enforcement of the state antitrust laws is to provide a recovery for indirect purchasers *actually* injured by antitrust violations. That goal should be kept in mind when interpreting and applying the statute.

[*P35] The inquiry into standing in federal antitrust cases does not end with *Hanover Shoe* and *Illinois Brick.* Those cases dealt only with apportionment of damages in price fixing situations.

[*P36] The Supreme Court specifically noted that its decision was not directed to standing. It said:

> Because we find Hanover Shoe dispositive here, we do not address the standing issue, except to note, as did the Court of Appeals below, that the question of which persons have been injured by an illegal overcharge for purposes of § 4 is analytically distinct from the question of which persons have sustained injuries too remote to give them standing to sue for damages under § 4.

Illinois Brick, 431 U.S. at 728 n.7 (citation omitted).

[*P37] Since *Illinois Brick,* the federal courts have addressed standing in other situations involving indirect **[**27]** purchasers or persons indirectly injured by alleged antitrust activity. The leading federal case on standing in situations not involving price fixing is *Associated General Contractors of California, Inc. v. California State Counsel of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*(*"AGC"*). [8] In that case, the Unions sought

---

[8] The application of the *AGC* standing requirements was not originally argued in *Crouch,* but was argued in *Morris.* Subsequent to the oral argument in *Morris,* counsel in *Crouch* were afforded the opportunity to address the application of the *AGC*

damages under section 4 of the Clayton Act. [9] They alleged that the employer group defendant had coerced some of its members to enter into business relationships with nonunion contractors and subcontractors, thus adversely affecting the trade of the unionized firms and consequently the unions themselves.

[*P38] In holding that the Union was not a person **[**28]** injured by reason of a violation of the antitrust laws within the meaning of section 4 of the Clayton Act, the Supreme Court adopted a five factor standing test which it derived in part by looking at the standard applied in common law damage actions when the Clayton Act's predecessor was originally passed in 1890.

[*P39] Significantly, the Supreme Court rejected the argument made by both plaintiffs in these cases that because the language in the statutes (section 4 of the Clayton Act and Chapter 75) is broad and unrestricted, it covers any and every arguable injury flowing from an antitrust violation. [10] In rejecting a limitless interpretation of the language the Supreme Court said:

> A literal reading of the statute is broad enough to encompass every harm that can be attributed directly or indirectly to the consequences of an antitrust violation. Some of our prior cases have paraphrased the statute in an equally expansive way. But before we hold that the statute is as broad as its words suggest, we must consider whether Congress intended such an open-ended meaning.

AGC, 459 U.S. at 530 **[**29]** (footnote omitted).

[*P40] The Court then went on to hold:

> As this Court has observed, the lower federal courts have been "virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *Hawaii v. Standard Oil Co., 405 U.S. 251, 263, n. 14, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)*. Just last Term we stated:
>
>> An antitrust violation may be expected to cause ripples of harm to flow through the Nation's economy; but "despite the broad wording of § 4 there is a point beyond which the wrongdoer should not be held liable." [*Illinois Brick Co. v. Illinois, 431 U.S.], at 760, 52 L. Ed. 2d 707, 97 S. Ct. 2061. (BRENNAN, J. dissenting)*. It is reasonable to assume that Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property. *Blue Shield of Virginia v. McCready, 457 U.S. 465, 476-477, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*.

Id. at 534-35.

[*P41] The Supreme Court found that there was no single bright line test that could be applied in determining standing. Rather, **[**30]** it required federal judges to evaluate the plaintiff's harm, the alleged wrongdoing by the defendant and the relationship between the two according to five factors. The five factors to be used by federal courts in determining standing as set forth in *AGC* are: (1) whether the plaintiff is a consumer or competitor in the allegedly restrained market, (2) whether the injury alleged is direct and a first hand product of the restraint alleged, (3) whether there exists more directly injured parties with motivation to sue, (4) whether the damage claims are speculative and (5) whether the claims (a) risk duplicative recovery and (b) would require a complex apportionment of damages.

---

requirements as well as the application of a target area test to the fact situation in Crouch. Each side filed supplemental briefs on those questions.

[9] *15 U.S.C. § 15 (2004)*. That provision is the model after which the North Carolina statute is patterned. *See infra* P 46.

[10] *See* Pl.'s Opp'n Defs.' Mot. Dismiss at 8-9 in *Morris;* Pl.'s Mem. Opp'n Defs.' Mot. Dismiss at 4-9 in *Crouch.*

[*P42] The holding in *AGC* has been followed consistently in the federal courts. *See, Pocahontas Supreme Coal Co. v. Bethlehem Steel Corp., 828 F.2d 211, 219 (4th Cir. 1987)*(affirming dismissal because "though there obviously is a causal relation between the conduct and harm as alleged, it is remote rather than direct"); *Eagle v. Star-Kist Foods, Inc., 812 F.2d 538, 539-43 (9th Cir. 1987)* (affirming dismissal because plaintiffs "were neither consumers nor competitors in the relevant market," who alleged injuries derivative **[**31]** of others who also had sued defendants); *Henke Enters., Inc. v. Hy-Vee Food Stores, Inc., 749 F.2d 488, 489-90 (8th Cir. 1984)*(affirming dismissal because plaintiff "was neither a competitor, participant, nor consumer within the [allegedly restrained] market" and its alleged injury was "an incidental by-product of the conspirators' claimed anticompetitive action"). Viewed in the broader context of standing enunciated in *AGC, Illinois Brick* appears as a per se disqualification of indirect purchasers in price fixing cases under application of factors 2, 3 and 5. *Illinois Brick* and *AGC* are logically consistent.

[*P43] If *Hyde* is correct that the North Carolina statute created indirect purchaser standing and if the courts of this state are required to interpret our antitrust statutes consistently with federal law [11], reconciling *Illinois Brick* and *AGC* in this state requires that factor 3 be modified and that the application of factors 2 and 5 be limited by the statutory recognition of indirect purchaser claims. The courts of this state may not deny standing based upon *Illinois Brick* but must still determine standing based upon relevant factors.

[*P44] "Standing is a necessary prerequisite to a court's proper exercise of subject matter jurisdiction." *Neuse River Found., Inc. v. Smithfield Foods, Inc., 155 N.C. App. 110, 113, 574 S.E.2d 48, 51 (2002)* (*quoting Aubin v. Susi, 149 N.C. App. 320, 324, 560 S.E.2d 875, 878 (2002))*. "The term ['standing'] refers to whether a party has a sufficient stake in an otherwise justiciable controversy so as to properly seek adjudication of the matter." *Neuse River Found., 115 N.C. App. at 114, 574 S.E.2d at 51-52* (*quoting Sierra Club v. Morton, 405 U.S. 727, 731-32, 31 L. Ed. 2d 636, 92 S. Ct. 1361 (1972))*. Standing consists of three elements:

> (1) "injury in fact" -- an invasion of a legally protected interest that is (a) concrete and particularized and (b) actual or imminent, not conjectural or hypothetical; (2) the injury is *fairly traceable* to the challenged action of the defendant; and (3) it is *likely, as opposed to merely speculative,* that the injury will be redressed by a favorable **[**33]** decision.

Neuse River Found., 155 N.C. App. at 114, 574 S.E.2d at 52 (*quoting Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 119 L. Ed. 2d 351, 112 S. Ct. 2130 (1992))*(emphasis added).

"The gist of standing is whether there is a justiciable controversy being litigated among adverse parties with substantial interest affected so as to bring forth a clear articulation of the issues before the court." *Street v. Smart Corp., 157 N.C. App. 303, 305-06, 578 S.E.2d 695, 698 (2003)*(*quoting Texfi Industries v. City of Fayetteville, 44 N.C. App. 268, 269-70, 261 S.E.2d 21, 23 (1979)*, *aff'd, 301 N.C. 1, 269 S.E.2d 142 (1980))*. "Standing most often turns on whether the party has alleged 'injury in fact' in light of the applicable statutes or caselaw." *Neuse River Found., 115 N.C. App. at 114, 574 S.E.2d at 52*.

V.

[*P45] The federal law and the issue of preemption of state antitrust laws by federal law being clear, the Court turns to a review of the North Carolina experience in indirect purchaser cases.

A.

---

[11] *See infra* P 49; *N.C.G.S. § 75-1* (1999); Act of **[**32]** June 3, 1996, ch. 550, 1995 N.C. Sess. Laws 550 (titled "An Act to Revise the Statutes Regarding ***Antitrust Law*** to Ensure That These Provisions are Internally Consistent and Consistent with Federal Antitrust Laws").

[*P46] That review begins with the statute and its history. The only appellate decision interpreting the statute is *Hyde v. Abbott Laboratories, Inc., 123 N.C. App. 572, 473 S.E.2d 680 (1996)*, *disc. rev.* ***[**34]*** *denied, 344 N.C. 734, 478 S.E.2d 5 (1996)*. As this Court has previously noted:

> The *Hyde* decision is the only North Carolina appellate decision dealing with indirect purchaser standing. That case was settled after the Court of Appeal's decision and before review by the North Carolina Supreme Court. In *Hyde,* plaintiffs filed a class action against manufacturers of infant formula, alleging violations of North Carolina's antitrust laws. *123 N.C. App. at 573, 473 S.E.2d at 681*. The purported class consisted of ultimate consumers who purchased infant formula from parties other than the manufacturer. *Id. at 574, 473 S.E.2d at 681-82*. The defendants filed a motion to dismiss alleging that plaintiffs were indirect purchasers and therefore lacked standing to sue under *N.C.G.S. § 75-16*. *Id.* The Superior Court granted the motion to dismiss, and plaintiffs appealed. *Id.*
>
> The Court of Appeals reversed the Superior Court and found that under North Carolina's antitrust statute, an indirect purchaser may sue a manufacturer for antitrust violations. The Court of Appeals based this finding upon a review of the plain language of *N.C.G.S. § 75-16*. North Carolina's antitrust statute provides:
>
>> If any person **[**35]** shall be injured or the business of any person, firm or corporation shall be broken up, destroyed, or injured by reason of any act or thing done by any other person, firm or corporation in violation of the provisions of this Chapter, such person, firm or corporation so injured shall have a right of action on account of such injury done, and if damages are assessed in such case judgment shall be rendered in favor of the plaintiff and against the defendant for treble the amount fixed by the verdict. *N.C.G.S. § 75-16* (1999).
>
> The current version of *N.C.G.S. § 75-16* was amended in 1969. Prior to the amendment, the first sentence of the provision began: "If the business of any person, firm, or corporation shall be broken up . . . ." 1913 N.C. Sess. L. 66, 70. The *Hyde* court found it significant that, in amending the statute, the legislature decided to add the phrase "if any person shall be injured" to the beginning of the provision. *123 N.C. App. at 578, 473 S.E.2d at 684*. The court found that this evidenced an intent to expand the class of persons with standing to sue under Chapter 75, and thus provide a recovery "for all consumers," including indirect purchasers. *Id. at 577-78, 473 S.E.2d at 684*. **[**36]** A review of the legislative history also leads to the conclusion that the General Assembly intended to create indirect purchaser standing to sue under the state antitrust laws when it amended the statute. There is simply no logical reason for the amendment other than the creation of indirect purchaser standing.
>
> In holding that indirect purchasers have standing to sue under North Carolina ***antitrust law***, the Court of Appeals specifically declined to interpret the statute consistent with federal ***antitrust law***. As originally enacted in 1913, the North Carolina antitrust statute was modeled after federal ***antitrust law***, codified as Section 7 of the Sherman Act. *See* An Act to Declare Illegal Trusts and Combinations in Restraint of Trade, Ch. 41, § 14, 1913 Sess. Laws 66. Section 7 of the Sherman Act was recodified as Section 4 of the Clayton Act. Both federal and state law have been amended throughout the years; however, the language of the North Carolina statute has remained similar to the language of the Clayton Act.

Bruggers v. Eastman Kodak Co., 2000 NCBC 3, at PP 5-8 (No. 97CVS11278, Wake County Super. Ct. March 17, 2000)(Tennille, J.).

[*P47] This Court has previously held that unless and until **[**37]** *Hyde* is overruled by the Supreme Court or new legislation is passed, this Court is bound by the decision in *Hyde* to the extent that it holds that indirect purchasers have standing under the North Carolina antitrust laws. *See, Bruggers, 2000 NCBC 3, at P 17*; *Adams, 2003 NCBC 7, at P 8*; *MJM Investigations, Inc. v. Microsoft Corp.* (No. 00CVS4073, Wake County Super. Ct.; No. 00CVS1246, Lincoln County Super. Ct., N.C. Aug. 2, 2004)(Tennille, J.)(Order Approving Settlement). In *Hyde,* the Court of Appeals was only asked to consider the question of whether the statute provided indirect purchaser standing. It was not called upon to delineate the scope and breadth of standing under the statute.

[*P48] Since *Hyde* was briefed and argued there have been several developments which might have impacted the scope, if not the actual outcome, of that decision. Those developments demonstrate that the landscape upon which these types of claims are viewed has changed significantly since *Hyde* was decided.

[*P49] First, in June 1996 the General Assembly ratified a bill entitled "An Act to Revise the Statutes Regarding ***Antitrust Law*** to Ensure That These Provisions Are Internally Consistent and Consistent With Federal Antitrust **[**38]** Laws." Act of June 3, 1996, ch. 550, 1995 N.C. Sess. Laws 550 ("1996 amendments"). That legislative history is important for two reasons. First, if the General Assembly had desired to change the statute to provide for an *Illinois Brick/Hanover Shoe* limitation, it could have done so then. It did not, and it has done nothing to change the law since the *Hyde* decision. Second, and equally important, the General Assembly signaled a clear intent for the state courts to follow federal decisional guidance in interpreting and enforcing state antitrust laws. Clearly, counsel for the parties did not bring the 1996 amendments to the attention of the *Hyde* court. [12] The statutory direction to follow federal guidance has a bearing on this Court's decisions in these two cases, requiring the Court to reconcile the indirect purchaser standing statute with the federal standing requirements enunciated in *AGC.*

[*P50] Second, a track record is available which provides information not available to the *Hyde* court. [13] The **[**39]** track record to date establishes that state indirect purchaser cases are generally parasitic. They are not self-generating or supporting but almost always are dependent on some triggering federal action for their genesis. The track record also establishes that these cases pose significantly complex proof issues both as to damages and liability. [14] The track record establishes that they can in fact result in double recovery. [15] That same track record discloses that these types of cases are difficult to administer from a settlement standpoint and that the complexities and administrative costs and difficulties result in settlements that are something less than sterling from the consumer's point of view. [16] None of that information was available to the court in *Hyde.* This Court has previously

---

[12] The *Hyde* court held: "Unlike Texas, our General Assembly has not mandated that our antitrust laws be construed in harmony with federal antitrust laws." *123 N.C. App. at 581, 473 S.E.2d at 686*.

[13] *See* discussion *infra* Part V.B (describing the indirect purchaser litigation since *Hyde* was decided).

[14] The *Hyde* court specifically found that there were no complex damage or proof issues before it and further held that there was nothing in the record **[**40]** in that case to establish that other cases would pose difficult damage and administrative issues. The *Hyde* court said:

> It is clear that a suit by indirect purchasers under our antitrust laws will be complex. However, when asked at oral argument whether "chaos reigned" in states which have allowed indirect purchaser suits, defendants were unable to cite a single example. This failure to cite a single indirect purchaser case in which a court has been faced with an impossible complex situation counsels us that a fear of complexity is not a sufficient reason to disallow a suit by an indirect purchaser.

123 N.C. App. at 584, 473 S.E.2d at 687-88.

The facts in *Hyde* presented a fairly simple case. The product was a commodity which was not altered or incorporated in another product in the distribution chain, and the price fixing took place at the wholesale level, only one level removed from the consumer. Direct impact on the consumer and pass through were not difficult issues to prove. The question of whether the fixed price was absorbed by the consumer was not difficult. The complexity presented by *Morris* and Crouch differs dramatically from *Hyde.*

[15] The *Hyde* court found: "However, there are few, **[**41]** if any, reported instances of a defendant paying treble damages to two different classes of purchasers based on a single antitrust violation." *123 N.C. App. at 583, 473 S.E.2d at 687*. In *Crouch,* plaintiffs seek to recover the same damages for which direct purchasers such as tire companies may seek treble damages. In *Morris,* defendants have already agreed to a multibillion dollar settlement with the direct purchaser class. In *Bruggers,* the class recovered for the same offenses which were the subject of federal direct purchaser actions. Likewise, in *Microsoft,* the plaintiffs recovered on the same claims which were asserted by direct purchasers. The problems recognized with possible double recovery are obvious.

pointed out the problems with settlement of these kinds of cases. In approving the *Microsoft* indirect purchaser class action settlement, the Court noted:

> There is no definitive decision from the North Carolina Supreme Court ruling upon the issue of indirect purchaser standing in North Carolina, nor is there a clear legislative history. Accordingly, every plaintiff argues that there is indirect purchaser standing, and every defendant argues that there is no standing under North Carolina law. The stakes are almost always too high for either side to risk trial and an appeal. Further, numerous issues flowing from indirect purchaser standing remain unanswered. For example, who has the burden of proof on pass-through issues, and what must be shown? How indirect can the purchaser be? Who has the burden of showing that an indirect purchaser did not pass through the price increase to another consumer? Are there reliable means to determine pass through and the amount thereof? The answers to these questions dramatically affect liability and the potential for recovery. It is no surprise that neither **[**43]** plaintiffs lawyers nor defendants have wished to incur the expense of trial and appeal which would be necessarily incurred in getting the answers to these questions. It is likely that more than one trial would be required to get all the required answers.
> Additionally, there were significant questions concerning the application of the law of damages and how damages were to be determined in this case. The federal case which spawned this and other indirect purchaser cases was not a price fixing case. It involved anticompetitive behavior and not price fixing. The cost of Microsoft products at issue had decreased relatively speaking over the time in question. While there had been a determination in the federal action that Microsoft had a monopoly, there was no finding that it had used that monopoly to artificially increase prices. Proving damages by pass through of artificially inflated prices would have raised numerous novel questions of law. Proving damages to indirect purchasers by anticompetitive actions (which may have included artificially deflated prices) would raise a whole host of other issues for which there is no statutory or case law guidance.
>
> In short, the process of trying this **[**44]** case and going through an appeal and possible retrial meant that the case would not be finally resolved for at least four or five years. Final judgment would have been entered some ten years after the alleged damages were incurred. For reasons explained more fully below, that time lag was a significant issue.
> While there is a possible philosophical argument that this uncertainty has a salutary effect in promoting settlement of cases, this court does not believe it is the function of the law to create ambiguity and uncertainty. If consumers have a cause of action they should be entitled to full recovery, not a compromise amount. On the other hand, if no cause of action exists or damages are limited to direct pass through of artificially inflated prices, businesses ought not to have to pay for unfounded claims even if they are compromised. Under the present system, only the lawyers really benefit from the uncertainty. One of their clients is paying an unnecessary price.
> ….
>
> Two factors are critical to the Court's decision to approve the terms of this settlement affecting purchasers of Microsoft products -- timing and purchaser identification. Most indirect purchaser cases involve common **[**45]** problems -- how to identify the class members and distribute small amounts of money to them. This case is no different. Plaintiff's counsel and Microsoft have represented to the Court that a means of identifying all consumers who purchased the software at issue does not exist and cannot be created. Thus, there will be a claim process of some sort no matter the outcome of settlement or trial. As counsel for one of the interveners

---

[16] The settlements in *Long v. Abbott Laboratories, 1999 NCBC 10 (No. 97CVS8289, Mecklenburg County Super. Ct. July 30, 1999)(Tennille, J.)*, *Bruggers* and *Microsoft* demonstrate the difficulties inherent in consumer class action cases. *Long was a cy pres* settlement that provided no benefit to the class. *Bruggers* resulted in a settlement that went to class members under a cumbersome administrative process which did not likely reach anything more than a small minority of the class. *Microsoft* **[**42]** is a classic example of the complex administrative problems that can be created. It will likely result in primarily a *cy pres* settlement. All of these cases fit the forecast of difficulties made by Landes and Posner in their article. *See supra* note 3.

has suggested, even in cash refund cases, the claims process is abysmally ineffective, with only single-digit percentages of potential beneficiaries making claims. It thus appears to the Court that there will have to be a claims process no matter the outcome. If the case were tried and some amount awarded for damages to purchasers of specific products, a mechanism would have to be put in place for identification of products purchased, claims and payment. If that process were to be put in place three to five years from now and it covered products purchased in the late 1990s, it is unlikely that the claims process would result in any significant payout. Most of these technology products will have been replaced well before any claims process begins. If the funds **[**46]** were not paid out, Microsoft would get to keep the money. Purchasers would be required to prove purchases which occurred many years before the claim process begins. That will be difficult enough now, and perhaps impossible years from now. Settlement now, while there is some prospect that purchasers will have records of their purchases, is far more beneficial to the class. Here, most of the purchasers are businesses that arguably have better records of their purchases. For consumers, the settlement has the benefit of not requiring proof of purchase for smaller claims. The combination of the more current claim process and the *cy pres* component of the settlement make acceptance of the coupon aspect of the settlement acceptable, even if it is not the most desirable process. Given the rapid advancements in technology, it is also likely that computer owners will make purchases of new hardware and software, making the coupons more valuable than they would be for products not likely to be replaced.

MJM Investigations, Inc. v. Microsoft Corp. (No. 00CVS4073, Wake County Super. Ct.; No. 00CVS1246, Lincoln County Super. Ct., N.C. Aug. 2, 2004)(Tennille, J.) (Order Approving Settlement).

[*P51] Third, **[**47]** there are cases from other indirect purchaser states which provide some guidance with respect to limitations on standing. The case law has evolved from interpretations of state statutes to determine if they provide for indirect purchaser standing (as happened in *Hyde*) to a more detailed examination of standing requirements. Not unexpectedly, the far reaches of the claims against Visa and MasterCard in the various indirect purchaser states have prompted some of that evolution.

[*P52] At least eight other courts have rejected standing for plaintiffs with claims identical to those presented in the *Morris* case. Each of those states recognizes indirect purchaser claims. In South Dakota the court simply dismissed the case without detailed explanation. [17] In North Dakota the plaintiff's case was dismissed with the holding: "As 'non-purchasers' of defendants' debit card services to merchants, the Court believes that plaintiffs lack standing to sue for the alleged restraint of trade in such services. Their alleged injury is simply too remote." [18]

[*P53] In Michigan [19] the trial court applied the five *AGC* factors directly in dismissing similar claims, finding that each failed to support standing. Significantly, the Michigan court rejected an argument similar to that made by plaintiffs in these two cases that the broad language of the state statute trumped application of the *AGC* factors. In addition, the court found that plaintiff was not an indirect purchaser under the statute.

[*P54] In Minnesota the courts have also applied *AGC* factors in determining standing for indirect purchasers even though *Illinois Brick* was not applied to preclude indirect purchaser claims. In a well-reasoned opinion in the *Gutzmiller* [20] case, the court applied factors 1, 4 and 5 under *AGC* in denying standing to plaintiffs under the Minnesota statute, which is similar to North Carolina's ***antitrust law***.

[*P55] In New York, the Commercial Court in *Ho* [21] rejected standing for plaintiffs under circumstances identical to the *Morris* case. **[**49]** The court applied several of the *AGC* factors in determining that the plaintiffs lacked standing under New York antitrust laws.

[18] Beckler v. Visa U.S.A., Inc., Civ. No. 09-04-C-00030, **[**48]** at 5 (Cass County Dist. Ct., N.D. Aug. 23, 2004).

[19] Stark v. Visa U.S.A., Inc., No. 03-055030-CZ (Oakland County Cir. Ct., Mich. July 23, 2004).

[20] Gutzwiller v. Visa U.S.A., Inc., No. 14-C4-04-000058 (Clay County Dist. Ct., Minn. Sept. 15, 2004).

[*P56] In California the trial judge hearing the consolidated cases against Visa and MasterCard dismissed all the claims arising under the Cartwright Act, *Cal. Bus. &. Prof. Code § 16720, et seq.*, applying the *AGC* factors to find no standing. The court also held that plaintiffs were neither direct nor indirect purchasers of card services. [22]

[*P57] In Nebraska, the trial court applied the five *AGC* factors in dismissing the identical claims by plaintiff. Specifically, the court held that the plaintiff failed to satisfy factors 2 and 3 under *AGC.* The court also held that the plaintiff was not an indirect purchaser within the scope of the state statute, which expressly grants standing to indirect purchasers. [23]

[*P58] In Maine **[**50]** the trial court rejected standing for the plaintiffs under an application of the AGC factors. The court held that factors 3, 4 and 5 particularly weighed against standing. [24]

[*P59] In Superior Court in Buncombe County, North Carolina, Judge Dennis Winner dismissed the plaintiff's indirect purchaser claim, which was virtually identical to the claim in *Crouch,* stating:

> It is the opinion of the undersigned that notwithstanding the enactment of the amendment in 1996, the *Hyde* decision is still the law of this State with respect to the issue of suit by an indirect purchaser. Nevertheless, this Court believes that the General Assembly never intended that the antitrust laws of this State be used in the manner in which the Plaintiff has attempted in this case, and that this case is therefore distinguishable from the *Hyde* case. To rule otherwise would put this Court in an impossible position of attempting to determine whether the alleged price-fixing by an oligopoly of an ingredient used to make tires had anything to do with the price paid by the Plaintiff when he bought the tires. This Court believes that **[**51]** without some allegation and proof that the tire manufacturers themselves were an oligopoly and were fixing prices, that it would be impossible to show the price the Plaintiff paid was not set by the normal laws of supply and demand in our open economic system, and that even if it were possible to show that, there would be no way for the Court to, in any fair or just way, determine an amount the Plaintiff was damaged.
> Therefore, it is the opinion of this Court that the General Assembly could not have intended that our Antitrust Statue be used by an indirect purchaser of tires against the manufacturers of an ingredient placed in those tires.

Weaver v. Cabot Corp., No. 03CVS04760 (Buncombe County Super. Ct., N.C. Mar. 29, 2004)(Winner, J).

B.

[*P60] A review of indirect purchaser cases in North Carolina is informative. The Court does not believe the North Carolina experience differs substantially from the national experience. State indirect purchaser cases have common characteristics. They are seldom *sui generis.* More commonly they originate after a federal triggering event. Those triggering events include a guilty plea to federal price fixing, a class action suit by direct purchasers, or notice **[**52]** of a settlement of antitrust claims with private plaintiffs or the Department of Justice. *Morris* is an excellent example. Sometimes only the announcement in an SEC filing that there is an investigation underway will trigger suit. The *Crouch* case is an excellent example. Almost all of the cases are brought as class actions. [25] Discovery tracks the federal action permitting class counsel to piggyback on the work of the government or counsel for the

[25] The *Adams* case is an exception. In that case the plaintiffs were individual hog farmers who opted out of a class action settlement that they believed was disadvantageous.

direct purchasers. Both plaintiffs and defendants have a vested interest in seeing the federal action proceed first. Cases are filed in most if not all states having indirect purchaser standing, frequently by the same lawyers. The cases are seldom, if ever, tried. They get settled far short of trial. [26] Often and not unexpectedly, the settlements in the various indirect purchaser standing states track each other closely. The *Microsoft* case is an excellent example. Sometimes the state and federal actions are settled together. [27] The Court is unaware of any case in which the settlement reflected treble damages. Rather, most settlements are less than a whole recovery of the alleged overcharge and are not particularly satisfying from the perspective **[**53]** of the consumer class member. *Cy pres* settlements are not uncommon since the difficulties inherent in distributing tiny amounts among large numbers of consumers are daunting and expensive. The settlement in *Long v. Abbott Laboratories, 1999 NCBC 10 (No. 97CVS8289, Mecklenburg County Super. Ct. July 30, 1999)(Tennille, J.)* is an excellent example. The North Carolina cases mirror the national characteristics.

[*P61] This Court has presided over a number of class action settlements involving indirect purchaser claims, beginning with *Long v. Abbott Laboratories.* That case is instructive for a number of reasons. It was parasitic in the sense that it was filed after a federal direct purchaser antitrust case was filed and discovery consisted **[**54]** of following discovery in the federal case. Similar cases were filed in ten other states by the same counsel appearing in North Carolina. Fortunately for the plaintiffs, a class action settlement of the various state claims was reached prior to trial of the federal action. The federal case was decided adverse to the plaintiffs, and no antitrust violations were found. Since a settlement agreement had been reached, it was enforced. The agreement provided for a settlement fund of approximately $9 million for North Carolina residents of which class counsel sought approximately twenty-five percent. [28] Since the settlement could not be distributed to the class, which consisted of all North Carolinians who purchased a prescription drug at a retail drugstore, a *cy pres* fund for people who could not afford their medications was created. Class members received nothing, and the defendants [29] paid a cost of litigation settlement although no underlying claim was ever proved.

[*P62] In *Bruggers,* the state claim was filed after federal triggering **[**55]** events, including a federal action. *2000 NCBC 3, at P 15*. Claims were filed in other indirect purchaser states. [30] The defendants were alleged to have fixed the price of x-ray film. The class consisted of all consumers of x-ray film in North Carolina. The problems created by the great variety of purchasers and the number of distribution chains made settlement difficult. In the end, a settlement fund of approximately $200,000 was created and divided among claimants on a two fund basis. One fund went to purchasers based upon the pro rata amount of film they purchased and the other fund provided one lump sum payment to anyone who filed a claim, determined per capita based on the number of claims. In total, 116 claimants sought recovery through the settlement fund. However, only 100 claims were found valid. Potential claimants numbered in the thousands. In this instance, money actually went to class members although the payment was small and the cost of administration high. Class counsel sought and obtained a reasonable fee based upon the amount recovered for the class. Counsel for both sides urged the Court to approve the settlement based upon the uncertain state of the law in North Carolina **[**56]** and the difficulty of proof involving so many different purchasers and distribution methods. The pass through issues were extremely difficult, including questions of whether hospitals absorbed the cost or passed it on to patients and insurance companies and whether the dentist or patient ended up paying the cost for dental x-ray film. The Court is convinced that the vast majority of class members declined to take advantage of the settlement because the dollar amount was not worth the effort required by the claims process.

---

[26] The reasons for settlement are aptly described in the ABA Report of Indirect Purchaser Cases at *supra* P 33.

[27] See the settlements in *Adams,* and *Thai Holding v. Archer Daniels Midland Co.,* (No. 03CVS15096, Mecklenburg County Super. Ct., N.C. Aug. 24, 2004)(Tennille, J.)(Order Staying Action).

[28] The court reduced the request to approximately ten percent based on the poor results for the class.

[29] Twenty three of the largest drug companies in the world.

[30] The original complaint sought a nationwide class consisting of residents of all states which had indirect purchaser standing. The complaint was amended to limit the claims to North Carolina.

[*P63] The Court's most recent experience has been in the settlement of indirect purchaser claims against Microsoft. [31] Again, the action was filed after a federal triggering event, the determination in the government's federal case of abuse of monopoly power by Microsoft. Lawsuits were filed in numerous states and discovery coordinated with federal actions by direct purchasers. The direct purchasers recovered little in the federal action, and their counsel intervened in the state actions **[**57]** to try to obtain some of the attorney fees in the state actions even though they had no agreements with local counsel and had made no appearances in the cases. The settlement was complicated and had a significant *cy pres* component. [32] Counsel for the plaintiffs and Microsoft urged approval of the settlement over significant objections based in part on the complicated proof of damages and the uncertain state of the North Carolina law. Like *Morris,* that case did not involve allegations of price fixing among competitors.

[*P64] The Court is aware of other cases in this state. A class action settlement was approved in an alleged price fixing scheme involving vitamins. Those cases followed guilty pleas to federal criminal charges. That case was not before this Court, but a number of large hog farmers opted out of what they believed was an inadequate class settlement and filed their own indirect purchaser actions. This Court ruled that they had standing. [33] The defendants declined **[**58]** the Court's suggestion to seek appellate review of that decision, and those cases have settled without necessity of court approval since they were individual and not class actions. Another case involving price fixing of monosodium glutamate products has been stayed in this Court pending a global settlement covering the federal claims and all state indirect purchaser claims. [34] Such settlements are preferable, but rare. They produce a more rational allocation of the liability fund.

[*P65] The Court is not aware of any North Carolina class action that did not have a federal triggering event. The Court is not aware of any indirect purchaser case in North Carolina that has proceeded to trial, presumably because there is a federal triggering event establishing liability. In each case before this Court, the argument is made that the case must be compromised because the proof of damages is difficult and uncertain. Such arguments lead to a question of whether standing is appropriate. Settlements are to be encouraged, but **[**59]** they should have some basis in reality, and class counsel should be prepared to show the court more than the simple fact that the issues are difficult. That preparation undoubtedly requires some time and expense on the part of class counsel. Some investigation before rushing to the courthouse after a federal triggering event might generate better results or prevent dismissal on a challenge to standing.

VI.

[*P66] The following policy considerations are relevant in deciding the standing requirements in indirect purchaser cases in North Carolina.

[*P67] If Hyde is correct, the General Assembly intended for persons *actually* injured to be able to recover for injuries resulting from violations of the state antitrust laws.

[*P68] The General Assembly has directed the state courts to follow federal guidelines in determining standing.

[*P69] There is already an adequate deterrent to violation of the antitrust laws in the federal system. Accordingly, the focus of state law should be recovery for those *actually* injured: i.e., victim compensation.

---

[31] MJM Investigations, Inc. v. Microsoft Corp. (No. 00CVS4073, Wake County Super. Ct.; No. 00CVS1246, Lincoln County Super. Ct., N.C. Aug. 2, 2004)(Tennille, J.)(Order Approving Settlement).

[32] See the description at supra P 50.

[33] Adams, 2003 NCBC 7, at P 31.

[34] Thai Holding v. Archer Daniels Midland Co. (No. 03CVS15096, Mecklenburg County Super. Ct., N.C. Aug. 24, 2004)(Tennille, J.)(Order Staying Action).

[*P70] State indirect purchaser standing creates the prospect of double recovery, both as between direct and indirect purchasers and between indirect purchasers at different levels in **[**60]** the distribution chain. Double recovery is not favored, and where, as here, it is permitted between direct and indirect purchasers, it should be narrowly construed to ameliorate the adverse consequences.

[*P71] Indirect purchaser cases are expensive, inefficient and low-yield for consumers. The cost of obtaining information relevant to pass through of added costs from antitrust violations and investigating the pricing decisions made in the distribution chain is high. Apportionment among various tiers in the distribution chain involves extremely difficult problems of economic analysis and measurement. The practical difficulties of estimating both supply and demand elasticity at any one level and then over and among multiple tiers in the distribution chain results in speculative damage estimates. From an economics perspective, indirect purchasers face negligible price increases in comparison to direct purchasers. [35] Apportionment results in added cost of litigation and uncertainty. The actual recovery for class members in consumer class actions is relatively small and is frequently outweighed by the cost of administration and attorney fees. The yield is low given the potential expense of litigation. **[**61]** That is one explanation for the settlements which do not reflect actual injury as much as the costs of litigation.

[*P72] There is no single bright line test that works in every case. Each standing case must be decided based on its own factual situation.

[*P73] Given those policy considerations, the decision of the Court of Appeals in *Hyde,* the developments since *Hyde,* the history of the amendment of the statute and the subsequent directions from the General Assembly to follow federal guidelines, and the clear federal approach to standing, the Court believes that the North Carolina courts would apply a multifactor test to determine standing in indirect purchaser cases. The requirements would recognize indirect purchaser standing, but engraft upon the statute the requirements of standing enunciated in *AGC,* modified to recognize the right to recover for injury created by statute for indirect purchasers. The factors would include:

1. Whether the plaintiff is a consumer or competitor in the allegedly restrained market. This inquiry focuses on the market the alleged restraint was designed to impact and the intent of the actor in engaging in the restraint. **[**62]** One key question is whether the plaintiff claims injury in a market collateral to the market in which the alleged restraint took place. This factor recognizes that the antitrust laws are designed to see that customers in the relevant market get the benefit of price competition. This factor would have supported standing in *Hyde.*

2. The directness of the impact on the plaintiff. This factor is modified to eliminate the restriction of *Illinois Brick* against indirect purchaser standing. Being an indirect purchaser does not preclude standing. However, the causal connection between the act and the claimed injury cannot be too remote. Purchasers in the direct chain of distribution are more likely to be able to show sufficiently direct injury than those outside the chain of distribution. Purchasers who buy the product which is the subject of the restraint are more likely to be able to show sufficiently direct injury than those who purchase a product with a component which is the subject of the restraint. Purchasers of products whose manufacture was impacted by the restraint face significant hurdles showing sufficiently direct impact. Within the chain of distribution, the relative positions **[**63]** of the purchaser and the actor can be significant, depending on the length and complexity of the distribution chain. Even though a purchaser is removed from the direct restraint, he or she may still show direct injury. *See Blue Shield of Va. v. McCready, 457 U.S. 465, 478-81, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*. This factor would have supported standing in *Hyde.*

3. Whether there exist other indirect purchasers in the distribution chain who are more directly impacted by the alleged violation. The nature of the market is significant here. Courts must look at the nature of the product and the market for the product as well as the chain of distribution to determine the likelihood of direct pass through of the cost of the restraint or inflated price. The nature of the restraint must also be considered. Double

[35] *See* Landes and Posner, *supra* note 3, at 617.

recovery among indirect purchasers should be avoided. This factor would have supported standing in Hyde where the distribution chain was short.

4. The speculative nature of the damage claims. As damage claims move from direct to indirect and the distribution chain becomes more complex, the possibility of factors intervening to affect causation and price multiplies, and claims become **[**64]** more speculative. It is appropriate for purposes of determining indirect purchaser standing "to consider whether a claim rests at bottom on some abstract conception or speculative measure of harm." *McCready, 457 U.S. at 475 n.11*. In *McGready* the Court noted that the courts were required to be cautious when dealing with speculative, abstract and impractical damage theories. *Id.* This factor would not have prevented standing in *Hyde*. This factor focuses on sound economic analysis. Important factors would include reliable demand and supply curve studies and sufficient regression analysis to eliminate other factors in pricing.

5. The risk of duplicative recovery and danger of complex apportionment of damages. While these factors are limited by the General Assembly's creation of indirect purchaser standing, they should not be totally eliminated when considering the state claims. The courts still have the same interest in keeping the scope of a complex antitrust trial within judicially manageable limits. *AGC, 459 U.S. at 543*. The factors are simply taken down a level and the *Hanover Shoe*/*Illinois Brick* restrictions eliminated. State cases may present apportionment issues which are simply **[**65]** too complex and for which there exists no measure of recovery which is not speculative. It is clear that the General Assembly did not intend that every purchaser in the distribution chain have a right of recovery or that there be duplicative recovery among indirect purchasers. Such an interpretation would be contrary to the clear guidance to follow federal precedent and harmonize state ***antitrust law*** with federal law. Rather, it should be clear that the General Assembly intended that those who can show with some degree of certainty that they were directly impacted by the alleged acts in restraint of trade should be able to recover even though they are indirect purchasers. The courts must be cognizant that the problems between direct and indirect purchaser cases replicate themselves in state indirect purchaser cases where there are multiple levels in the distribution chain and multiple distribution chains. There should only be one fund constituting the amount of the alleged overcharge to North Carolina residents, and the courts must guard against multiple liability for the fund and prejudice to absent victims or non-class members. The complexity of the distribution chain and the variety **[**66]** of consumers in *Bruggers* highlight the issues this factor would implicate. As the Supreme Court noted in *AGC* and *Illinois Brick*, massive and complex damages litigation undermines the effectiveness of treble damage suits. The poor results obtained in settlement in the North Carolina cases confirms this view.

[*P74] There is no bright line test: each situation must be considered on its facts and the factors applied. Different factors might be important in different cases. Accordingly, the Court turns to the application of those factors to these two cases.

VII.

A. The *Crouch* Case

[*P75] The Court's analysis is premised on the underlying proposition that defendants have engaged in illegal price fixing in the market for rubber chemicals.

[*P76] Both Crompton and Bayer have pled guilty to conspiring to fix prices and suppress competition in the sale of certain rubber compounds and chemicals. On October 13, 2004, the Associated Press reported that Bayer pled guilty to a criminal charge involving a rubber compound used in hoses, belts, seals, adhesives and sealants. Crompton pled guilty in Canada to fixing prices on chemicals used in the manufacture of tire-quality rubber and non-tire applications such as automobile **[**67]** parts, conveyor belts, weather stripping and rubber latex gloves from July 1995 to 2001. Certain of the findings in the Agreed Statements of Facts in the *Crompton* plea agreement are instructive. It states:

> On a commercial basis, rubber chemicals are produced synthetically through highly sophisticated processes. It is apparent that rubber chemicals are now a commodity product and over capacity in the industry has been a constant restraint upon profitable operation and re-investment. Rubber chemicals are significant in the production of useable modern rubber products, principally tires. There are no practical or reasonable economic substitutes to certain rubber chemicals which are the subject of this proceeding, although innovation in both application and production does from time to time cause some products to be superseded. The accused and its co-conspirators are best situated from the perspective of size, experience and incentive to participate in such developments. Based upon facts obtained by the Commissioner, which Crompton is not aware of but does not contest for the purposes of this proceeding, rubber chemicals are said to constitute about 1% of the value of finished tires, they **[**68]** are a practical sine qua non to the manufacture of over $2 billion worth of tires produced in Canada annually. An additional approximately 30% of rubber chemical sales are devoted to non-tire uses in various automobile parts, surgical gloves and other commercial, industrial and health applications.
> The rubber chemical producers identified above manufactured and/or sold the substantial majority of the rubber chemicals that were sold or distributed in Canada during the period of the offence for use in the tire, automobile parts, industrial applications and health industries. Indeed a significant amount (approaching 50% in some instances) of the rubber chemicals manufactured in Canada are exported. Each of the above referred to entities participate, to varying degrees, in the globally organized tire manufacturing industry. The principal Tire Producers buy centrally (not in Canada) for delivery to their regional production facilities. The rubber chemical producers in turn organize their delivery logistics to best meet customer demands and their own production facilities. There is a significant buyer power within the tire-destined rubber chemical business.
> . . . .
>
> It is a matter of some debate **[**69]** between Crompton and the Commissioner as to the quantum of commerce affected by the illegal activity herein referred to. This requires specifically a consideration of the "lasting effect" of various price increases on certain specific rubber chemicals. This analysis however, given the prevailing conditions in the market, does not give credit to the fact that price increases may not have been appropriate at all and one or more producers may have had to exit the market, in the absence of such restraints upon the normal market processes. If Crompton's analysis is correct the gap between the opposing views of affected commerce may be measured in hundreds of millions of dollars. In any event it is agreed that the assessment of competitive injury is largely one of judgment in all of the relevant circumstances.

The Queen v. Crompton Corp., [May 2004] F.C._(Can.)(Agreed Statement of Facts).

[*P77] The Canadian plea agreement highlights two problems significant to the standing determination. First, the calculation of the impact on prices of the conspiracy will be difficult to determine. As noted, "In any event, it is agreed that the assessment of competitive injury is largely one of judgment in all **[**70]** of the relevant circumstances." That factor is complicated by the significant buyer power within the tire-destined rubber chemical business. Second, the impact on the retail consumer will be minimal. The example in paragraph 79 below highlights the degree of impact on the retail purchaser.

[*P78] The problems inherent in the *Crouch* claims are the same alluded to by Judge Posner in his noted article on pass through economic analysis. [36] First, the price-fixed item is a product consumed or altered in the manufacturing process. Accordingly, its use will vary with the type of rubber product being made. It may also vary with the nature of the product (chemical) being used and how it is used in the manufacturing process. Different direct purchasers (here, tire manufacturers) might use the various chemicals in various ways in differing products.

[*P79] The price today for a set of four BF Goodrich (R) Touring T/A SR4-P195/70R14 90S tires, which are similar in size and quality to those purchased by Crouch, is $222.64 at Sam's Club's posted price on the Internet. If the value of the chemicals represents 1% of the value of the tires, [37] the chemicals in the **[**71]** tires have a total

---

[36] *See* Landes and Posner, *supra* note 3, at 615-21.

[37] One percent was the actual number used by Canadian authorities in their case against Crompton. *See supra* P 76.

value of $2.23 or $0.56 per tire. If we assume that in an industry with overcapacity and strong buyer power the conspirators were able to artificially inflate prices by as much as 20 % [38] and assume that all of that can be proven to be passed through to retail consumers, Crouch's injury can be calculated to be $0.44 for the set of tires or $0.11 per tire. Bigger tires will cost more, smaller tires less. Thus, it is likely that the recovery per tire sold in North Carolina will be in the range of $0.01 to $0.11. That number represents a remote impact on its face. Certainly it would not represent a meaningful recovery for consumers. In any event, the costs associated with litigation and administration of any settlement would far outweigh the benefits to consumers. Few consumers are likely to fill out a claim form for $0.44 or even $1.32 (trebled damages). While the above calculations would affect class certification, they also are relevant to a determination of the remoteness of injury.

[*P80] In this instance, Crouch would be required to establish tire prices in North Carolina by manufacturer both before and after the alleged conspiracy period. Because this case involves a product used in the manufacturing process, regression analysis would be required to disaggregate any effect of other changes in the manufacturing process for each manufacturer for each product category. Further regression analyses would be required to disaggregate the impact on price, if any (by product category and by manufacturers), of other influences on the manufacturer's price. As the product moved down the distribution chain into various avenues of distribution, each step would require additional regression studies to disaggregate other impacts on prices until the final price paid by a consumer for different products purchased in different markets is determined. To perform such studies the economists will require enormous amounts of information, parts of which **[**73]** will constitute trade secrets or confidential information of nonparties, principally tire manufacturers. Many manufacturers are foreign companies. Determining a price differential per tire for tires sold in North Carolina which were manufactured using price-fixed chemicals during the relevant time period would be a Herculean task and one which the Court believes would not be free from speculation given the enormous number of disaggregating factors to be considered in the process.

[*P81] Clearly, the tires made for SUVs will differ from those made for compact cars. The market for these tires will vary. There is a range in quality and price of the products made using the price-fixed chemicals. If, as is usually the case, there is cheating among the price fixers, additional variations are created. [39] In this situation there are a small number of large producers, some or all of which could exert great pressure on price. Thus, at the outset the multiple of variations in pass through analysis is daunting. The discovery involved in ascertaining the production methods, costs and pricing strategies of tire manufacturers would intrude into their most fundamental confidential business information and **[**74]** trade secrets, insuring a long and difficult battle over access. If that information is available, the demand and supply curves must then be calculated for this myriad of products and suppliers and the prices determined by the intersections of those curves tested against rigorous regression analysis to insure that no external factors affected the pricing and pass through at the manufacturer level.

[*P82] Then the process of determining the subsequent pass through begins. Demand and supply curves and regression analysis must be created for the various lines of distribution and for the various companies and for the various products. Here, it is significant that consumers are at least three steps removed from the original offense. That makes apportionment of damages/pass through extremely difficult and raises a greater risk of double recovery.

[*P83] Again, the distribution processes may vary with producers and products. Are there tires on the market which were made with non-price-fixed chemicals? If so, how do they affect price? What is the effect of foreign competition? Do company owned stores **[**75]** or franchises sell at different prices than Sam's Club or Wal-Mart?

---

[38] The calculation of this number will be difficult, but it is difficult **[**72]** to conceive of prices being artificially inflated at a higher level in a market with strong buyer power and overcapacity. It is also unlikely that 100% of the inflated cost was passed through to consumers or that it affected consumer prices.

[39] Price fixing schemes frequently fall apart because the temptation to cheat to get market share is great.

Does the corner gas station price yet another way? Must the pass through expense be determined with reference to the customer base? These are but a sampling of the difficulties inherent in determining pass through in this case. [40]

[*P84] Each case must be analyzed individually. There will be cases where the economic analysis is not difficult. *Hyde* may have been one of those cases. There could be other examples where a component, such as a computer chip, is price fixed, and its costs passed through directly to purchasers of the product in which it is incorporated. [41] Individual cases will vary, and the factors must be considered in each case. The relevant reliability of economic analysis is a key factor in applying those factors. The economic analysis cannot be oversimplified. *See In re Aluminum Phosphide Antitrust Litig., 893 F. Supp. 1497, 1503 (D. Kan. 1995)*. There, the court rejected an expert report which failed to apply standard economic methodology **[**76]** to test the conclusions reached. In ruling on a motion *in limine* the court said:

> The goal of a prudent economist in performing the "before and after" analysis is to determine the hypothetical or "counter-factual" prices that would have prevailed during the conspiracy period, but for the conspiracy. In applying the "before and after" model of damages, it is fundamentally necessary to explain the pattern of forces outside the violation period using factors that might have changed (i.e., supply, demand, and the differences in competition) to predict the prices during the conspiratorial period. In this context, as in most economic problems, failure to keep "other things equal" is one of the known "pitfalls in the path of the serious **[**77]** economist." Samuelson, P. and Nordhaus, W.D., *Economics* (13th ed.) at p. 7. This case presents two potential normative periods, a "before" period and an "after" period that have distinctly different price levels. One therefore must identify the reasons for the disparate price levels. According to Dr. Siegfried, the field of economics supplies a statistical methodology for making this determination on a scientific basis, and the generally accepted means of predicting the prices that would have prevailed absent the conspiracy is regression analysis. At a minimum, regression analysis addresses supply and demand factors by looking at price trends over time. A prudent economist must account for these differences and would perform a minimum regression analysis if utilizing the "before and after" model.

Id. at 1503-04 (footnotes omitted).

[*P85] The five key factors are analyzed with respect to *Crouch* below.

1. The relevant market. The chemical manufacturers accused of price fixing sold to rubber manufacturers. Because the number of sellers and the number of buyers was relatively small, the price fixing scheme had to have at its core an effort to affect price pressure from the oligopolists in the **[**78]** tire manufacturing business. The antitrust laws are designed to see that customers in the relevant market get the benefit of price competition. This is a mixed case, as there are two relevant markets: the first is the market for chemicals, and the second is the market for rubber products indirectly affected by the artificial influence in the chemical market. As a purchaser at retail of a rubber product, Crouch is in a market secondarily affected by the restraint in the original chemical market. That is a complicating factor for standing. This factor weighs slightly against standing, as the alleged price fixing was directed at the market for chemicals, not the market for tires. Prices were allegedly fixed for chemicals used to manufacture other rubber products. However, the plaintiff purchased a product the price of which *may* have been influenced by the illegal restraint.

[40] *See,* Michele Molyneaux, Comment, *Quality Control of Economic Expert Testimony: The Fundamental Methods of Proving Antitrust Damages, 35 Ariz. St. L.J. 1049, 1074-75 (2003)*.

[41] The Court notes that certain manufacturers of DRAM chips used in a variety of computer products have been accused of price fixing. *See,* Stephen Labaton, *Infineon To Pay a Fine In the Fixing Of Chip Prices,* N.Y. Times, Sept. 16, 2004, at C6. The Court expresses no opinion on standing in that situation. Each case must be judged on its own merits, and that case is not before the Court. The Court simply notes that the nature of the component can make a difference.

2. Directness of impact on plaintiff. The fact that the artificially restrained price impacts the manufacturing process removes it at least one level of directness. Unlike a component that remains unchanged when incorporated in the final product, manufacturing costs are less directly passed through and may be affected **[**79]** by differing manufacturing processes used by producers. While it is clear that in most instances some portion of a price-fixed cost gets passed along, the directness can be impacted by the nature of the item subject to price fixing, be it a component, labor cost, or something used in the manufacturing process.
The nature of the item can influence the directness of the impact on the price of the end product at retail. Because these chemicals are products used in a manufacturing process, the direct impact at retail is less clear and subject to variation among manufacturers using the chemicals. The smaller the component, the less likely there will be impact on the final price. Here the chemicals only comprise 1% of the value of a tire, reducing the likelihood that total final price was significantly affected.
There is also an additional question of the length of the distribution chain. While plaintiff purchased from Sam's Club, which may have purchased directly from a manufacturer, other class members may have purchased through other lengthier distribution chains.
This factor weighs against standing.

3. Other indirect purchasers. This is the factor which gets most confusing when *Illinois* ***[**80]*** *Brick* is eliminated. State courts should focus this inquiry on whether or not the existence of other indirect purchasers in the chain of distribution gives rise to other claims against the fund representing the amount by which the price of the retail item has been artificially inflated. It becomes more of an examination of whether there will be double recovery on the state claim (eliminating the concern about double recovery created by standing holdings in *Hanover Shoe/Illinois Brick*). Here the other indirect purchaser claimants may be distributors and retailers who claim to have absorbed some of the price increase. No claims have been filed on their behalf. This factor would adversely impact standing in *Crouch* based on this record.

4. & 5. Speculative nature of damage claims and complexity. These items sometimes overlap. That is the case with *Crouch.* In this case there are multiple factors which render valid economic analysis either impossible or unmanageably complex. While the number of manufacturers is not great, each will have different manufacturing processes. Those processes and the use of alleged price-fixed chemicals will vary from product to product. Products will vary in **[**81]** size, quality and costs. There will be different markets for the products - retailers like Wal-Mart, Sam's Club, K-Mart and Sears, local tire stores, gas stations, company franchise stores and Internet sales. In a typical price fixing scenario, some, if not a substantial portion, of the price increase is absorbed at the earliest stages in the distribution chains. Some retailers will buy direct; some will buy from distributors. Foreign competition, not insignificant in the tire industry, can affect price. Tracing the price of the processing chemicals through foreign manufacturers provides other problems. The price of tires may be affected by external factors such as high gas prices, which could lower demand. Each variation in manufacturer's process, price, size, quality, market, distribution method and changes in applicable externalities requires individual supply and demand analysis and may require multiple regression analyses in order to eliminate the speculative nature of any damage calculation. Given the many variables, the issues surrounding allocation of the alleged price fixing fund in this case would be exceptionally complex and the results of economic analysis speculative.

Unlike **[**82]** direct purchasers who may recover for costs which they do not incur, state indirect purchasers may recover only for injury actually incurred. Thus, they must prove pass through of the artificially inflated cost. To prevent double recovery for the same alleged injury there must be a reliable means of allocating the effects of the price fixing among the various participants in the distribution chain. It must take into account other externalities. For example, how would purchasers of tires that were recalled and replaced be treated? Factor 5 takes this complexity into account when drawing the line on remoteness of claims. The size of the impact on tire prices is relevant here. As demonstrated in paragraph 78 above, any increase in tire prices will be relatively insignificant. In *Crouch,* factors 4 and 5 dictate heavily against standing.

There may well be occasions on which the Court should defer a standing determination until there has been far ranging discovery and expert evidence produced on pass through and allocation. The problem inherent in

> delay is the enormous cost involved in getting the information and expert analysis. If it proves insufficient, substantial resources will be wasted. **[**83]** Where, as here, it is apparent from the pleadings that any analysis will either be speculative or allocations enormously complex, the Court should rule on standing early in the process. Where, as here, counsel have not made any attempt to ascertain facts relating to standing prior to filing suit, the court's job is made more difficult. The rush to file in indirect purchaser states works against adequate investigation prior to filing.

[*P86] Considering all five factors, Crouch lacks standing to pursue indirect purchaser claims.

B. The *Morris* Case

[*P87] The *Morris* case presents a far easier analysis. It is not a price fixing case.

[*P88] In *Morris,* the underlying antitrust claim is for illegal tying of credit and debit cards under the "Honor All Cards" policy. For purposes of analysis here, the Court assumes the tying arrangement was illegal. Tying cases present unique damages issues.

> In tying cases, the measure of damages to an injured purchaser is described as "the difference between the price actually paid for the tied product and the price at which the product could have been obtained on the open market." However, several courts have held that damages can be recovered only if the combined fair market **[**84]** value of both the tying and tied products is exceeded by the amount actually paid for both.

Private Antitrust Suits, A.B.A. SEC. ***ANTITRUST LAW***, ***ANTITRUST LAW*** DEVELOPMENTS 875 (5th ed. 2002)(footnotes omitted).

[*P89] Here, not only would Plaintiff be required to show the underlying complicated damage to merchants, [42] but also how those damages got passed on in each and every consumer transaction by the merchant. In the case of a hot product which sells on its label (Calvin Klein jeans, for example) so that the price is unrelated to costs of sale, manufacture or distribution of the product, how could plaintiff possibly show what part of the price included a pass through cost resulting from the tying arrangement which would not have been included in the absence of the tying arrangement? [43]How could the Court administer a trial where every consumer transaction might be subject to that proof for every merchant? It cannot be done. More compelling is the fact that a determination would have to be made for every product since price elasticity varies between products. [44]

[*P90] The five key factors with respect to *Morris* are analyzed below.

---

[42] For cases discussing the difficulty of proof in tying cases see, *Will v. Comprehensive Acctg. Corp., 776 F.2d 665 (7th Cir. 1985)*; **[**85]** *Kypta v. McDonald's, 671 F.2d 1282 (11th Cir. 1982)*; *Siegel v. Chicken Delight, 448 F.2d 43 (9th Cir. 1971)*.

[43] Gutzwiller v. Visa U.S.A., Inc., No. 14-C4-04-000058 (Clay County Dist. Ct., Minn. Sept. 15, 2004). Judge Vaa presented an illustrative example:

> Assume that Plaintiff purchased an item at a K-Mart store which accepted Visa and MasterCards, on March 1, 2003. To recover damages, Plaintiff would first need to prove that as a result of Defendants' alleged restraint of trade in providing debit card services to that K-Mart store, K-Mart paid excessive debit fees. Plaintiff would then need to prove that K-Mart did not absorb any such excess debit fees by making less profit, or in some other non-monetary way, such as by hiring fewer employees and/or not making major repairs to its building, but instead passed on the excess debit fees in the price of the items sold to consumers. Plaintiff would then need to prove that some identifiable portion of the item was not attributable to any factors which might affect the price of that item on that specific date. Plaintiff would then need to make the same offer of proof for any item sold by the K-Mart store not only on March 1, 2003, but for **[**86]** every other day in issue, and would have to make the same offer of proof relative to every other merchant involved in his claim.

Id. at 16.

[44] This fact alone would render class certification impossible since each customer would have different damages depending on each individual purchase they made.

1. The relevant market. Defendants refer to plaintiff as a "non-purchaser." That is shorthand for not being a purchaser in a relevant market. The relevant market in *Morris* is the sale of credit and debit card services. Morris did not make a purchase in that market. *Morris* simply made purchases of consumer goods. Antitrust laws are designed to see that customers in the relevant market get the benefit of price competition. In this case the customers in the relevant market would be the retailers who purchase debit and credit card services, not all consumers of retail products. This factor alone would strongly support a finding of no standing in *Morris.*

2. Directness of impact. The underlying restraint alleged in *Morris* was a tying arrangement, not price fixing. It is founded on the proposition that retailers paid more for debit card **[**87]** services than necessary without the tying arrangement. Morris does not even allege he is a debit card holder. He seeks to represent a class consisting of consumers who paid by a credit card, paid cash, paid by check, bought on credit or used a debit card. The impact of the alleged tying arrangement (which applied only to retailers using debit card services) on consumers is as remote as this Court can conceive.

3. Other indirect purchasers. Since consumers are not a part of the relevant market for credit/debit card services, there are no other indirect purchasers. This is a situation where the impact, if any, of the tying arrangement falls directly on the direct purchaser.

4. Speculative nature of damage claims. This is not a price fixing case. It is at bottom a tying case which carries additional proof problems affecting the speculative nature of damages to indirect purchasers. Indirect purchasers would first have to prove what the damages were to retailers. Retailers would be required to show that the tied price of debit and credit cards was higher than the price of each sold separately in competitive markets. Indirect purchasers would then be required to show how those damages got **[**88]** passed through or had a direct impact on each consumer purchase they made in North Carolina, whether by cash, check, credit card or debit card. Two examples come to mind. When a teenager pays $100 cash for a pair of designer label jeans that cost $10 to make because they are the hot fashion item, are they paying more than they would have paid had there been no tying arrangement involving debit or credit cards? How could that be proven? What about the item that is put on sale below cost because it is outdated and needs to be cleared from inventory?

Assuming that injury at the retailer level could be quantified somehow, that injury would be attributable only to the increased use of debit cards, a minor part of the market. According to plaintiff, that cost is then spread over every consumer product sold by every retailer. If plaintiff is correct, the recovery per product will be infinitesimal. In addition, the manageability of the litigation and the administration of any settlement present insurmountable barriers. If the Court of Appeals asked today if there is an example of "an impossible complex situation," the *Morris* case would provide such an example. The Court cannot conceive of an **[**89]** economically feasible way to administer a trial which would require inquiry into how every retailer set the price for every consumer good sold in this state. Nor is it conceivable that any judgment would be in any amount which could be economically *allocated* and *paid* to *every* consumer in North Carolina.

5. Complexity. It is difficult to imagine a more complex damage case. Plaintiff's case would require an analysis of pricing of virtually every product sold at retail in North Carolina. The litigation could last an interminable period, and it is difficult to conceive of how a claims process would work. It is likely the price increases attributable to the excess cost to the retailer of using debit cards would be such a small measure that there would be no cost effective way to administer a claims process that would compensate consumers directly.

[*P91] Each *AGC* factor in *Morris* supports dismissal of the claims. Morris asserts remote claims outside the relevant market which involve speculative and complex damages. Eight other jurisdictions have agreed and thus placed limits on indirect purchaser standing. Plaintiff's counsel urged the Court to permit amendment to the pleadings to assert only claims **[**90]** for debit card holders. Such an amendment would make no difference in the outcome on this motion.

[*P92] Having found that the complaint is subject to dismissal, the Court does not need to address defendants' argument that plaintiff seeks relief that would violate the *Commerce Clause of the United States Constitution*.

CONCLUSION

[*P93] If state antitrust laws are to have any impact, they must work. Compromise *cy pres* settlements that provide no payments to consumers have little deterrent effect and no benefit for those actually injured. Where actual injury can be shown with reasonable certainty, defendants should pay those damages to the injured parties and be subject to statutory penalties. That is a real deterrent, and it benefits those injured.

[*P94] Part of the problem in dealing with indirect purchaser cases is the race to the courthouse which follows a triggering event at the federal level. Despite the fact that the case was two years old, when asked at oral argument, plaintiff's counsel in Crouch had no idea what the pass through per tire would be, either in cents or in dollars. His suggestion was for the Court to wait until class certification and address the issues in that context. Where, as **[**91]** here, it is apparent from the pleadings that either (1) sound economic analysis can only produce speculative damages or (2) the complexity of the required sound economic analysis is staggering and virtually impossible to accomplish given the inability to get at all the required information, deferral to class certification is unnecessary. The Court is not required to nor should it defer standing determinations to class certification. While there may be some overlap in the factors considered in each determination, the tests are different.

[*P95] As Justice Brennan noted in his dissent in *Illinois Brick,* the complexity of damage proof should not foreclose a claim. [45] That policy must be balanced with the need to control the manageability of litigation. Judge Posner has correctly noted that indirect consumer class actions frequently do little to provide redress for injury in indirect purchaser cases, [46] and the North Carolina cases support his conclusion. [47] The proper focus should be on insuring that those cases in which there is non-speculative proof of direct impact on consumers at something other than a negligible level get tried and those cases which fall outside the limits of rational accepted **[**92]** economic analysis are dismissed. The modified *AGC* factors provide guidelines for making those determinations at the trial level. Applying those factors to these two cases results in their dismissal. Other cases may come out differently or may require some discovery before ruling. Class actions which provide no redress to those actually injured do not fulfill the purpose of the state statute which is to redress injury to those directly impacted by the price fixing.

[*P96] State statutes do not provide as effective a deterrent as the federal scheme. There is an adequate and more effective deterrent to antitrust violations at the federal level. State indirect purchaser cases should be designed to provide relief to those directly injured by antitrust violations. Since they permit double recovery they should be narrowly construed. Similar to the judgments the legal system makes on "foreseeability" in negligence cases, judgments on "standing" are designed to place limits on what would otherwise be limitless claims. The two concepts are similar in that they set a boundary beyond which claims are determined **[**93]** to be too remote. Where a class action will provide no actual benefit or an insignificant benefit to class members, there exists a strong inference that the class claims are too remote or speculative to withstand scrutiny under the modified *AGC* factors. Sometimes, as here, the standing determination can be made early in the process and save significant resources. Other times the determination should await further discovery before decision. In either case, the five factors set out above should be applied and each case determined on its own facts. Applying the factors to the claims in *Crouch* and *Morris* results in dismissal.

It is hereby ORDERED, ADJUDGED and DECREED:

1. Defendants' Motion to Dismiss in *Crouch* is granted, and plaintiff's claims are hereby dismissed.

2. Defendants' Motion to Dismiss in *Morris* is granted, and plaintiff's claims are hereby dismissed.
3. Each party shall bear its own costs.
